REPORT

OF THE

Minister of Education

FOR THE YEAR 1945

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

Your Honour,

I beg leave to present to your Honour the Report of the Department of Education for the year 1945.

During the year grants for elementary and secondary education, intended to make possible an improvement in school services and to relieve the burden of local taxation, were paid on a new and generous scale. The total amount paid in legislative grants was \$25,752,256 as compared with \$7,979,716 in 1944. The promise to meet fifty per cent. of the cost of education was thus fulfilled, and at the same time the system of allocation was designed to afford the greatest help to the most needy areas. No rural school section received less than fifty per cent. of its approved costs and some received as much as ninety per cent. Grants to urban centres varied from thirty to sixty per cent. These direct payments have effected a marked reduction in the local levies for school purposes and have encouraged many boards of trustees to make more adequate provision for education.

Further progress was made in 1945 in the movement toward larger administrative units for elementary education. Almost forty per cent. of the rural school sections are now included in township school areas and are realizing the benefits which arise from improved services and a considered programme designed to meet all the needs of the community. A similar movement toward larger high school areas has begun in the counties of Essex and Kent. The advantage of adequate financial support, a diversified programme suited to local needs, and a greater measure of equality of opportunity, are pointing the way to a reorganization of the High School districts in a number of counties, where the serious limitations of many of the small secondary schools now in existence are being recognized.

An urgent problem is that of securing adequate buildings and equipment to enable the schools to offer their pupils an enriched programme of studies and also to serve the whole community as civic and recreational centres. An interim report was received from the Committee on Planning, Construction and Equipment of schools and a demonstration building based on this report is projected. It may be some time, however, before conditions of supply will permit an extensive application of the ideas and principles embodied in the report.

Education for responsible citizenship has been the aim in introducing a number of changes in the school programme. The courses of religious education

in the various grades of the elementary schools have proved acceptable and useful. Definite provision has been made for the study of Canadian and British institutions generally in the History course of the secondary schools. Cadet training has been made a part of the physical and health education programme. To assist pupils to make intelligent plans for their future and to choose and train for occupations in which they may have reasonable hope of finding success and satisfaction, a programme of Guidance has been introduced in the schools, and its usefulness is being widely recognized. A study of occupations has been added to the Grade IX course as a compulsory subject.

Provision has also been made for the extension under the Department of Education of educational and recreational facilities to the adult population. The Ontario Adult Education Board has been constituted; by co-ordinating existing agencies and establishing new programmes it will cover a wide field and make a useful contribution to the public welfare. In particular, it will assist in the organization of all kinds of adult study groups. The Physical Fitness Branch of the Department of Education is assisting in the organization of recreational programmes and in the establishment of community centres. This work is making rapid progress. Assistance has also been offered through this branch in the operation of summer camps by non-profit organizations.

While the war was in progress schools were seriously handicapped by a shortage of teachers. The return of those who have served in the Forces, and the increased enrolment in the Ontario College of Education and the Normal Schools will relieve this shortage and in time will overcome it. The resumption of summer courses for special certificates will also help to staff the schools with specially qualified teachers, and will provide for the necessary extension of instruction in practical agriculture, guidance, and other subjects in which expansion is anticipated.

The end of the war, while relieving some of the difficulties which faced our educational system, has presented other problems, not least of which is the training and rehabilitation of men and women who served in the Armed Forces. Supported jointly by the Dominion and Provincial Governments, ten training centres have been established in Ontario. Courses in a variety of trades and occupations as well as in academic subjects are being given and approximately 11,000 veterans are now in training. The universities and colleges of the province have also experienced a very heavy enrolment and their capacities are taxed to the limit, with ex-service personnel added to their normal influx of students.

The establishment of institutions for advanced and specialized technical training is a recognized need in this province. The Ontario Mining Institute at Haileybury and the expansion of the curriculum of the Ontario College of Art to include a school of design are indications that this need will be met. Other technical institutes will be established at strategic points throughout the province as conditions permit.

The Royal Commission on Education is continuing its deliberations. The information which it has collected on the state of education in Ontario and elsewhere, and the careful weighing of the evidence which it has heard, will enable it to present in its report a comprehensive plan for the improvement of our educational system. Until such time as it has made its recommendations, major changes in organization and policy are being held in abeyance.

With deep regret I report the loss of one of the senior officials of the Department of Education. Dr. V. K. Greer, Superintendent of Elementary Educa-

tion, died suddenly on November 11th, 1945, active to the last in the work which he loved. Dr. Greer gave a lifetime of service to the cause of education and especially to the improvement of the elementary schools. His wide knowledge and keen grasp of detail made him an invaluable counsellor. He will be long remembered as a wise and kindly public servant.

Respectfully submitted,

GEORGE A. DREW,
Minister of Education.

Toronto, December 2, 1946.

ELEMENTARY EDUCATION

Legislative Grants

In 1944 the Minister of Education announced a new scheme for the apportionment of legislative grants to elementary and secondary schools. This new scheme became effective in 1945, and, in conformity with the basis of apportionment outlined in Circular Grants General 12, 1944, the Department of Education paid to boards of school trustees a sum equivalent to 50% of the total approved operating costs of the elementary and secondary schools of the province. The grants thus paid to urban elementary school boards were calculated on the basis of population of the municipality concerned and ranged from 30% to 60% of the approved cost of operation for the year 1944. On an assessment per classroom basis, rural boards received 50% to 90% of their approved costs of operation for the preceding calendar year.

Payment of grants in two instalments, in April and September, assisted boards to budget for the school year. In 1944 the amount required for payment of the general legislative grants to elementary school boards was \$5,887,124.29. In 1945, under the new scheme, the amount so paid was increased to \$17,439,403.43. Financial benefits resulting from the greatly increased grants were passed on to the ratepayers, and throughout the province owners of real estate enjoyed a substantial decrease in tax levies.

Township School Areas

The Public Schools Act permits the municipal council of a township to pass a by-law placing two or more school sections of the township under one board of five trustees. The unit so formed is known as a Township School Area. Before 1945, 248 such Areas had been formed, comprising 1,423 school sections. In 1945, 149 Areas were organized, uniting 919 school sections. It will be seen, therefore, that 40.73% of the school sections of the province have been organized into Township School Areas. The acceleration in the formation of areas is due to the growing recognition of the advantages of this type of administration, viz. a more nearly equal educational opportunity for pupils, a better distribution of school costs, a more efficient method of financing schools, and a general improvement in services, school buildings and equipment.

The list of Township School Areas formed in 1945 follows:—

Township	No. School Sections	County or District	Inspector
Aberdeen, Galbraith, Plummer and Rose (Un.)	4	Algoma	S. Geiger

The Temporary Closing of Small Schools

The number of schools closed temporarily during 1945, because of low enrolment, was 99. This brought the total of such closed schools to over 500. In most cases the decision to discontinue operation was made by the local board of trustees. Where such schools were closed it became possible for the pupils concerned to attend schools of larger enrolment, and thus to associate with a greater number of pupils of their own age group.

The list of schools closed in 1945 follows:—

Inspectorate	Inspector	School
Bruce.....	J. M. Game.....	S.S. No. 4 Carrick

Transportation of Pupils to Secondary Schools

For seven years the Department has promoted a plan for transportation of high school pupils to secondary schools, where such need was apparent. Any two or more school sections wishing to participate in such a transportation scheme have been encouraged to make a mutually satisfactory arrangement for transportation of secondary school pupils, and, where contracts were approved, the Department assisted boards by paying 50% of the cost of the transportation. Each year the number of pupils being transported to their nearest secondary schools is increasing. In the case of township school area boards in particular, provision for transporting the high school children residing in these areas to secondary schools has been made on a wide scale.

Special grants on the 50% basis for the transportation of pupils to secondary schools were discontinued in December, 1944. Since that date the costs of transportation for high school pupils, when contracts are approved, are eligible for inclusion in the operation costs in the school budget, and the same percentage of grant is payable on the transportation costs as on the other items of expenditure. Rural school sections, therefore, receive grants on transportation ranging from 50% to 90%, as determined by the assessment of the section. These liberal grants, tending as they do to promote the principle of better educational opportunity, are making it possible for many more children in the rural parts of the province to secure a secondary school education.

The Supply of Teachers

During the school year 1944-45 approximately 600 teachers, trained in Wartime Emergency Summer Courses given in the Normal Schools at Toronto and London, were employed in the elementary schools of Ontario. Students who successfully completed the course were granted Deferred Interim Second Class certificates. Approximately 485 of these teachers returned to complete their course during the summer of 1945, and 464 were granted Interim Second Class certificates. The number of qualified teachers available for teaching positions was further augmented by the return to the profession, during the Fall term, of a number who had been on active service.

Letters of permission were issued for boards to engage 460 teachers who had attended teacher-training schools but who did not possess complete professional qualifications for Ontario schools. The summary below for the school year September, 1945, to June, 1946, indicates the number of these teachers who were employed by boards of trustees:—

Holders of Expired Ontario Third Class Certificates.....	215
Persons who failed at Ontario College of Education.....	2
Persons who failed at Ontario Normal Schools.....	92
Certificates from other provinces.....	150
Holders of U.S. Assistants' Certificates.....	1
	460

During the school year September, 1945, to June, 1946, it was necessary to issue 444 letters of permission for boards to engage teachers without teacher-training experience. The summary of the academic standing of the persons employed in this way is given below:—

University graduates.....	7
Some University work.....	29
Persons of Upper School standing.....	156
Persons of part Upper School standing.....	41
Persons of Middle School standing.....	172
Persons of part Middle School standing.....	23
Persons of Lower School standing.....	16
	444

Correspondence Courses

In June, 1945, another successful year in the operation of correspondence courses under the Department of Education was brought to a close. Children who were unable to take advantage of ordinary school facilities were enabled, through correspondence, to continue their education at home, in hospitals, sanatoria and preventoria, and with results comparable in many cases with those obtained by pupils in regular attendance at school. No part of the province is too isolated to be reached by correspondence course instruction, and, in addition to residents of Ontario, many children of former residents temporarily domiciled outside the province were enrolled. Lessons were sent to outlying posts in Canada such as Port Harrison, Fort McPherson and Prince George, and to the Congo, Liberia, Paraguay, Bolivia and Venezuela.

The total enrolment for 1944-45 was 2,488, of which number 2,218 were in the English course and 270 in the bilingual. During the year 526 promotions were made. Of the 36 candidates for High School Entrance, 35 were successful. In Grades IX and X the results were as follows:—

	4 completed	7 subjects
7	"	6 "
8	"	5 "
15	"	4 "
19	"	3 "
36	"	2 "
18	"	1 subject

Sixty-five sets of Grade IX and thirty sets of Grade X lessons were sent out to certain teachers in rural schools in the districts who were teaching on Letters of Standing or Interim Deferred Second Class certificates. These lessons in the hands of the teacher made it unnecessary to enrol in the correspondence courses pupils of Grade IX and Grade X who lived within reach of their own schools.

The staff of the correspondence courses consists of a Director and twenty-four full-time teachers, of whom nineteen are permanently employed and five temporarily.

The Correspondence Course Branch also supervises the Canadian Legion Course in English, Social Studies and Elementary Arithmetic. During the year 3,530 lessons were received from active service men.

Railway School Cars

During the year 1945 seven Railway School Cars operated along lines of steel in northern and northwestern Ontario, four on the C.N.R., two on the C.P.R. and one on the T. & N.O.R. The total enrolment was 226, representing children, adolescents and adults of fifteen different nationalities. These schools-on-wheels continue to do excellent work. Not the least valuable has been their contribution in bringing to isolated foreign-born families the spirit and standards of life and conduct of Canadian citizenship. Many an evening, from the window

of a fast Toronto-Winnipeg train, as it rushes by some lonely siding, passengers glimpse a school car silhouetted against the bush. There the teacher and his wife may be assisting adults in need of guidance and help, she, perhaps, showing a woman how to make a dress for a child, and he making out income tax returns for men with names that are hard to spell. During the day the children of these same families will have been given the same type of education offered in the elementary schools of Toronto, Fort William, or elsewhere in Ontario, but adapted to meet the needs of the local environment in which the school cars operate.

School Health Supervision

For many years school health supervision and services were provided only for pupils of the larger urban municipalities, but during the past four or five years these advantages have been extended gradually to rural schools and to those of smaller urban centres. These benefits are effected through two types of organization, both under statutory provision, viz. the County Public Health Nursing programme and full Health Units on a county or other area basis. The County Public Health School Nursing programme operated during 1945 in the Counties of Huron, Peel, Haldimand, Wentworth, Middlesex, Perth, Simcoe and Elgin. The following full Health Units are now in operation:—Stormont, Dundas and Glengarry, Porcupine, Kirkland Lake-Larder lake, Welland-Crowland, Northumberland and Durham, Elgin-St. Thomas, St. Catharines-Lincoln, and Oxford. The six last named are new Units established in 1945. Brant County Unit came into operation on January 1st, 1946. Five other County Health Units will be in operation by July 1st, 1946.

Religious Education in the Public Schools

A course in Religious Education was introduced into the public schools of Ontario in September, 1944, under a revision of Regulation 13 of the General Regulations for Public and Separate Schools. In addition to the religious exercises at the opening of school each morning, two one-half hour periods a week are devoted to religious education. The classes are conducted by the regular teacher except in those cases where, by resolution of the school board, a clergyman, or a lay person selected by the clergyman, gives the instruction. Any pupil may be exempted from taking the course in Religious Education on the request of his parent or guardian. A school board may be exempted from carrying out the course on request to the Minister of Education, and any teacher may be exempted from giving the course on application to the school board.

A programme for Religious Education was published and sent to all teachers in September, 1944. By December, 1944, Teachers' Guides to Religious Education for Grades I to III were in the hands of the teachers. Since that date three more Teachers' Guides in the subject have been prepared, one for each of Grades IV to VI inclusive, and distributed to all teachers. A revised edition of the Teacher's Guide for Grade II was prepared and sent to all teachers concerned in the autumn of 1945. The guide books are a revision of an English series published by the Religious Education Press, Limited, London, England, and are published in Canada by The Ryerson Press.

In the preparation of the course the Department of Education has had the advice and co-operation of the Inter-church Committee on Religious Education, a body of clergymen representing the major Protestant denominations. The course appears to meet with the general approval of the public, and a relatively small number of boards of trustees have asked for exemption for their schools.

Audio-Visual Aids

The use of educational films during 1945 showed an increase over the previous year. Sound and silent films were shown to a total audience of 3,125,292 students as compared with 1,645,164 in 1944. A supplementary catalogue describing additions to the Visual Education Film Library was published during the year. Approximately 100 schools were able to secure the delivery of projection equipment ordered during the war years, and these additions have made increasing demands upon the facilities of the Film Library.

Serving in the rural schools each month, in connection with the rural circuits of the National Film Board, are 27 field representatives of the National Film Board. Schools which do not possess projection equipment of their own obtain sound teaching films from the Visual Education Branch, to be used on the occasion of the visit of the National Film Board field representative. In this way Audio-Visual Aids were distributed to a greater number of schools than would otherwise have been possible.

In September, 1945 Major J. W. Grimmon was appointed Supervisor of Audio-Visual Aids. Major Grimmon has had wide experience in both elementary and secondary schools. Before the war he was principal of Elora High School. During the war he served as Adjutant of the Basic Training Centre at Kitchener, and in England and Canada on the Personnel Selection staff of the Canadian Army. During the war Major Grimmon had an opportunity to become familiar with the use made by the army of motion pictures and other visual aids to teaching, for purposes of training, a subject in which he was deeply interested.

School Radio Broadcasts

In 1945 the Department of Education, in co-operation with the Canadian Broadcasting Corporation, arranged the production of 45 school radio broadcasts in the following subjects:—Music, Social Studies, Junior English, Guidance, and Health. In addition, the National School of the Air broadcasts, prepared by the Canadian Broadcasting Corporation, and certain programmes of the American School of the Air, were used. About 2,265 public and separate schools are equipped with school radios, and are able to hear programmes designed, written, and produced especially for their use. A booklet outlining the programme of school broadcasts was prepared and distributed to all school teachers in the province in September.

Committee on Planning, Construction and Equipment of Schools in Ontario

A Committee on Planning, Construction and Equipment of Schools in Ontario was appointed on November 28th, 1944. The terms of reference for the guidance of the Committee were as follows:—"That the persons named hereunder be appointed to a Committee on Planning, Construction and Equipment of Schools in Ontario to inquire into the planning and equipment of schools; standard methods of construction; standards for mechanical services; the useful physical life of school buildings; for the purpose of making such recommendations as would appear to be in the best interests of the people of the Province of Ontario." Under date of May 28th, 1945, this Committee presented an Interim Report on Elementary Schools to The Honourable George A. Drew, Minister of Education. The chief recommendation made by the committee in its interim report may be summarized as follows:—

1. That school sites should vary in size between three acres and fourteen acres for 100 to 1500 pupils respectively.

2. That the principals of elementary schools be asked to organize the boys and girls of the school to assist the maintenance staff in the care and tidiness of outside school property.
3. That, if a separation is desirable, the grounds be divided more equally between boys and girls. Such dividing line between the boys' playground and the girls' should be indicated by a grass strip and low shrubbery, and not by any barrier such as a fence or wall.
4. That schools be without basements, except for specific purposes.
5. That seats and desks be of the moveable type.
6. That elementary schools be one storey in height.
7. That the Department of Education give some study to its present requirements with reference to the number of pupils per classroom.
8. That as much daylight as possible (and economically feasible) be admitted to the classroom by windows.
9. That provision be made for electric illumination wherever electricity is available at reasonable cost.
10. That the National Building Code of Canada be considered as the minimum governing code for all structural requirements. Local requirements of building codes exceeding those of the National Building Code must be followed.

The Committee did not present a number of type plans for different sizes of elementary schools, but it gave detailed diagrams and information respecting lighting, seating, blackboards, heating, cloak accommodations, cupboards, chalkboards and tackboard spaces, and definite information regarding toilet accommodation.

A demonstration elementary school building of four regular classrooms and three special rooms is to be erected at the cost of the Ontario Government, and under the supervision of architects of the Committee at the junction of the No. 11 highway and the Port Sydney-Parry Sound highway. It is expected that this school will be a type of central school for rural areas which may replace a number of one-room buildings. In this particular area some seven rural schools of one room each will be closed and the children will be transported to the new central school.

Improvement Districts

A development affecting certain schools has been the formation of Improvement Districts, organized under recent amendments to The Municipal Act. Nine such Improvement Districts operated in 1945, all being situated in the northern part of the province. Most of these are in newly opened areas, where municipal organization is required, but where people are as yet unable to provide it by and for themselves. In such cases, on petition of the inhabitants concerned, the Department of Municipal Affairs appoints a three-trustee board to govern and administer the affairs of the area pending the establishment of the regular municipal organization. These boards have been instrumental in providing school accommodations in mining and lumbering communities where, without such provision, facilities for education would be lacking.

Interchange of Teachers

The following exchanges were arranged for the school year 1945-46:—

<i>Ontario Teacher</i>	<i>Teacher from another Province</i>
Miss Mabel R. McClure, Rawlinson School, York Township.	Miss Nellie B. Short, Richard McBride School, Vancouver, B. C.
Miss Louisa Moisley, Central Public School, Welland.	Miss Irene C. Peatt, King Edward School, Prince Rupert, B. C.
Miss Mary A. Callaghan, Winchester Street School, Toronto.	Miss Mary B. Gillis, Gordon School, Vancouver, B. C.
Miss Violet J. St. John, King George School, North Bay.	Miss Margaret J. Winthrope, Saskatoon, Saskatchewan.
Miss Laurene Slaughter, Withrow Avenue School, Toronto.	Miss Marjorie Agnew, Technical School, Vancouver, B. C.
Miss Dorothy G. Cunningham, King Edward Public School, Toronto.	Miss Ethel H. Reveley, Henry Hudson School, Vancouver, B. C.
Miss Katharine B. MacKenzie, Park School, Toronto.	Miss Ida McFadyen, Lord Selkirk School, Vancouver, B. C.

The Provincial Inspectoral Staff, 1945

I. IN MEMORIAM:

Dr. V. K. Greer: The educational services of this province suffered a severe loss by the death on November 11th, 1945, of Dr. V. K. Greer, Superintendent of Elementary Education. Vanamber Kenneth Greer was born on July 28th, 1885, in the Village of Winchester, Ontario. He received his early education in the local schools and at Morrisburg, and attended the Normal College at Hamilton. Dr. Greer began his teaching career in a rural school in Wentworth County and later became principal of the Tweed Continuation School, where he served for two years before entering Queen's University. He graduated from Queen's with first class honours in Mathematics and received the degree of Master of Arts. After securing this degree, Dr. Greer taught in the St. Thomas Collegiate Institute until his appointment as Public School Inspector for the County of Dundas. In 1916 he joined the staff of the Stratford Normal School, and in 1919 became Inspector of Public Schools in the City of London, later becoming Inspector-Administrator. From this post he was called in 1925 to become Chief Inspector of Public and Separate Schools for the Province of Ontario.

As Chief Inspector, and later as Superintendent of Elementary Education, Dr. Greer laboured tirelessly for the betterment of elementary education in the province. He did much to guide the revision of the Programme of Studies,

which endeavoured to provide a modern approach to the problems of instruction in the elementary schools. He acted as Chairman of the Junior Red Cross Committee for Ontario, because he recognized the value of the democratic training that pupils received through participation in the Junior Red Cross programme. He served as Chairman of the 'Teachers' and Inspectors' Superannuation Commission until a few days before his death. He was an active member of the Canada and Newfoundland Education Association, of which he was President in 1943-44. He made an outstanding contribution to school administration by his tactful guidance of the movement which has resulted in the inclusion of more than 40% of the school sections of the province in Township School Areas.

Dr. V. K. Greer

Dr. V. K. Greer's outstanding service to Education was recognized by his Alma Mater in 1941, when Queen's University saw fit to honour him with the honorary degree of Doctor of Laws. In 1944 Dr. Greer became Superintendent of Elementary Education and Financial Advisor to the Minister of Education. When the Royal Commission on Education was set up in 1945, Dr. Greer was appointed Assessor of Evidence for the Commission, an appointment for which he was admirably qualified by his wide interests and varied experience in educational matters.

Dr. Greer was always sympathetic to every good cause. His friendly manner, quick and thorough grasp of a stated problem gave a feeling of confidence to all who sought his advice. His contribution to education within and without

the province was made possible by untiring zeal and enthusiasm, by a genial and inspiring personality, and, above all, by a genius for getting along well with people. To know him was to be his friend. At times the burden was heavy and his generous desire to be of service took a serious toll of his energy. The effect of his life will long be felt, and his name will become a legend in the annals of education. All who knew him will feel a keen sense of personal loss, no longer hearing his words of wisdom and kindness, no longer having their faltering courage renewed and quickened by the stimulus of his approbation, no longer having their vision enlarged by his ideals. Dr. Greer will be remembered by his colleagues within the Department, by inspectors and teachers, by boards of trustees and by pupils as a man who placed service above self.

Mr. A. L. Campbell, M.A., belonged primarily to York County. He was born in Vaughan Township and received his early education at Nobleton Public School and at Richmond Hill High School and Parkdale Collegiate Institute. Early in life he chose teaching as his vocation and graduated from the Toronto Normal School. He taught in his home environment at Concord and Eversley, and later at Binbrook and Fergus High School. He graduated with honours in Mathematics and Physics from Queen's University, where he was medallist in Science. After a period on the staff of Upper Canada College, Mr. Campbell became principal of Weston High School. In 1909 he was honoured with the appointment as York County Public School Inspector. He was one of the few privileged to inspect York County Public Schools in their entirety. Until he superannuated in 1938 Mr. Campbell continued to serve the county of his birth with dignity and distinction. Known and beloved through the years by succeeding Wardens and Councils, Inspector Campbell was frequently referred to as the "Dean of Education of York." His versatile abilities were well known. He was a natural athlete, a keen student with an intense love of the beautiful in nature and literature, a highly social member of his inspectoral group and of his community, and, above all, an indefatigable worker. His passing on March 3rd, 1945, closed an inspiring life of service as a true sportsman, a sympathetic teacher, a wise counsellor and an enthusiastic and cultured educationist.

Mr. J. W. Crewson, B.A., formerly Inspector of Public Schools for Glengarry County, died in Cornwall on October 7th, 1945. Mr. Crewson was born at Crewson's Corners in Wellington County on April 13th, 1856. He began his teaching career in the home school at Crewson's Corners and taught in various schools in Western Ontario before accepting a position on the staff of the Cornwall Collegiate Institute. After taking an Arts degree in Classics at Victoria College, Mr. Crewson returned to Cornwall as principal of the Model School, and later served again on the staff of the Collegiate Institute. He was appointed Public School Inspector for Glengarry County in 1910, and in 1912 removed to Alexandria where he resided with his family until he retired in 1931. From that date until his death he made his home in Cornwall. Teachers and trustees had confidence in the judgment and ability of Mr. Crewson. Under his guidance and direction the schools of Glengarry made rapid improvement. His passing was felt by many educationists who had profited by his wise counsel.

Mr. E. W. Jennings, B.A., who retired from active service as a public school inspector in February, 1939, died on September 9th, 1945. Mr. Jennings was born at Rednerville, Prince Edward County, on March 16th, 1874. His elementary education was obtained at Centreton, in Northumberland County, and his secondary education in the Deseronto High School and Kingston Collegiate

Institute. His first professional certificate was obtained at the Kingston Model School in 1892. After teaching for a few years he attended Albert College, Belleville, and later the Hamilton Normal College, from which he graduated in 1898. He then taught for two years before attending the University of Toronto, from which he graduated in 1903 with Specialist's standing in English and History. He taught for twenty years in the Richmond Hill High School and the Collegiate Institutes of Chatham, Owen Sound, St. Thomas and Lindsay. Mr. Jennings was appointed Public School Inspector for Victoria West on September 1st, 1923. He gave devoted and efficient service to the educational interests of the girls and boys of his inspectorate, and earned the confidence, respect and goodwill of teachers, trustees and all who were associated with him in the work of education.

Dr. G. W. McGill's death on March 19th, 1945, marked the passing of an inspector who has established for himself the genuine love and respect of teachers and children in the City of Toronto. He was born in the City of St. Thomas and received his elementary education in the schools of London. He attended secondary school in Bowmanville and later graduated from Queen's University. He was awarded a Master's degree from Toronto University, and in 1937 obtained the degree of Doctor of Pedagogy. He began his teaching career in Collingwood High School. In 1910 he was appointed to the Toronto Public School staff, where he served with distinction until he left for overseas in 1916 with the 52nd Queen's University Battery. On his return he became Headmaster of Ryerson School Annex, and later served as principal of McCaul and Leslie Schools. In 1925 he was appointed Public School Inspector for the City of Toronto. Dr. McGill was an ardent student. His progressive ideas were readily accepted and developed by teachers who were inspired by the warmth and sincerity of his personality. His sudden death was keenly felt by the children and teachers in the Toronto schools, who lost a genuine friend and confidant. His passing was a distinct loss to the cause of education.

Mr. Alexander Mowat, B.A., former Inspector of Public Schools in the City of Peterborough, died on September 24th, 1945, at Picton. Mr. Mowat was born in Caithness, Scotland, and came to Canada with his parents when only six years of age. He obtained his early education in Haldimand County and his secondary education at Port Rowan and Aylmer High Schools. After graduating from Model School, he began his work as a teacher in the rural schools of Haldimand County. He graduated from the University of Toronto in 1891. His experience as a high school teacher included principalships in Meaford High School, Seaforth Collegiate Institute and Brockville Collegiate Institute. On November 1st, 1907, he became Inspector of Public Schools for the City of Peterborough, which position he held until his retirement on July 31st, 1937. Mr. Mowat devoted thirty-nine years to the profession of teaching and the cause of education in this province. He will be remembered not only in the City of Peterborough, but throughout the province as one of the educational leaders of his day.

Mr. J. B. Robinson, B.A., B.Paed., was born in Lincoln County. He attended Central Collegiate Institute, Hamilton, and later the Ottawa Normal School. An honour graduate in English and History of Queen's University, he took post-graduate work in Pedagogy at the University of Toronto. Mr. Robinson taught in the schools of Brantford, as principal of West Avenue School in Hamilton, on the staff of the Central Collegiate Institute, Hamilton, and

later as principal of the Hamilton Model School. In 1917 he was appointed Inspector of Public Schools for Wentworth County, in which position he served with distinction until his retirement in 1938. Mr. Robinson was an ardent naturalist. His devotion to the raising and care of pheasants made him internationally known. Some of his first stock of pheasants, the existence of which attracted many visitors to his well-appointed property at Aldershot, were imported from the Prince of Wales Zoo in India. His collection of oriental birds was reputed to be among the best on the North American Continent. Mr. Robinson took a keen interest in church work, and his passing was a distinct loss to his community as well to the cause of education.

Mr. F. W. Sheppard, M.A., who retired from his position as Public School Inspector of North Waterloo and City of Kitchener in August, 1928, passed away in September, 1945. Mr. Sheppard was born in the City of Kitchener. He received his public school education in Breslau and Kitchener and his high school education in Kitchener. He attended Ottawa Normal School in 1884 and taught for many years in the Kitchener Secondary School before being appointed Inspector of Public Schools for North Waterloo and the City of Kitchener in 1906. As a tribute to his work, and in his honour, the Kitchener Board of Education named one of its schools "The Sheppard School." His kindly personality, his good judgment and his ability as an administrator, won for him the confidence and respect of all classes in the community.

Colonel E. E. Snider, B.A., Public School Inspector for the Counties of Durham and Northumberland, died at his home in Port Hope on January 16th, 1945. Colonel Snider was born in Prince Edward County of United Empire Loyalist stock, attended Albert College at Belleville, and after graduation from Victoria College in 1890, joined the staff of Mount Forest High School. He served as principal of Arthur High School for twelve years and later became principal of Port Hope High School. Colonel Snider went overseas in the First Great War as Second-in-Command of the 139th Battalion. He served in France as Brigade Camp Commandant and was invalided to Canada in 1918, resuming the principalship of Port Hope High School. Colonel Snider retained his connection with the militia, attaining the rank of Colonel in the Midland Regiment. Shortly after his return to Canada, Colonel Snider was appointed Public School Inspector for the Counties of Durham and Northumberland, a position which he held for twenty years. Colonel Snider was greatly interested in the teaching of Music, which he conceived to be of great value in elementary education, and was instrumental in introducing this subject in the schools of his inspectorate. He made a great contribution to the cause of education in his own area and throughout the province.

Mr. J. C. Spence, B.A., B.Paed., retired Public School Inspector for the County of Lanark, died on January 24th, 1945. Mr. Spence was a native of Victoria County, where he received his early education. Mr. Spence held the degrees of Bachelor of Arts and Bachelor of Pedagogy from Queen's University. From 1892 until 1923 he was principal of several Ottawa Public Schools, and during this period was associated with the Ottawa Normal Model School. In 1923 Mr. Spence was appointed Public School Inspector for Lanark County, and held that position until his retirement in 1936. Mr. Spence was highly regarded by teachers and trustees of Lanark West and Carleton East. He worked tirelessly for the public schools in his inspectorate and marked advancement was made in the schools under his supervision during his tenure of office as an inspector.

II. RETIREMENTS:

Dr. J. D. Campbell, B.A., was born in the Township of Turnberry and received his elementary education in the rural school in S.S. No. 9 Turnberry. He obtained his secondary education in Seaforth Collegiate Institute and Harriiston High School. He attended the School of Pedagogy in 1895 and began teaching in U.S.S. No. 12 Culross, where he remained for four and one-half years, resigning his position to become principal of Highgate Continuation School. After three years he attended the University of Toronto and graduated with First Class Honours in Mathematics and Physics in 1908. He was appointed to the staff of Chesley High School in September, 1908, and obtained the principalship in 1909, which he held until 1913 when he was appointed Master in Mathematics in the Stratford Normal School. Dr. Campbell later served with distinction as a Master at the Ottawa and Toronto Normal Schools. Under his skilful and steady guidance thousands of student-teachers learned a great deal of the more excellent way of teaching. In 1928 Dr. Campbell was appointed to the Technical staff of Inspectors in the Department of Education, and one year later was appointed Assistant Chief Inspector of Public and Separate Schools. In 1944 he became Assistant Superintendent of Elementary Education, a position which he held until his retirement on August 31st, 1945. Dr. Campbell obtained his degree as Doctor of Pedagogy from the University of Toronto in 1943. His thesis regarding Arithmetic in the Ontario elementary schools is a splendid contribution, and is indicative of the type of work done by Dr. Campbell. The educational system of the province has benefited greatly from the services of Dr. Campbell, and his sound scholarship and good judgment have won him the respect of all who have been associated with him.

Mr. R. F. Downey, B.A., B.Paed., retired on August 31st, 1945. Born near Bolton, Peel County, he received his elementary education at S.S. No. 6 Albion. Following attendance at Weston High School, Toronto Junction High School and Toronto Junction Model School, he received a Third Class certificate and began his teaching career at S.S. No. 10 Albion. After teaching for one year and three months he entered the Ontario Normal College at Hamilton, where he obtained his First Class Professional certificate in 1902. He was then appointed principal of the Public School and the Model School at Port Perry. While there, by extramural courses he graduated in 1907 from Queen's University with his Bachelor of Arts degree. A year later he obtained the degree of Bachelor of Pedagogy from Queen's, again extramurally, and with First Class honours. In that year, 1908, he became principal of Central Public School in the City of Peterborough. This position he retained until his appointment in 1923 as Inspector of Public Schools for Peterborough West and Victoria East. As Inspector of Public Schools he gave inspiring leadership to his teachers, and, with his scholarly manner, his kindly frankness, genial humour and balanced judgment, won the confidence and respect of all those privileged to be associated with him. The Ontario Horticultural Society awarded him a Certificate of Merit in recognition of the outstanding leadership which enabled schools of his inspectorate to win, during two consecutive years, the Carter Trophy, emblematic of the most improved school grounds in the province. His professional activities and his interest in church work, fraternal organizations and sports brought him many executive duties and made him a popular figure across the Province of Ontario.

Dr. G. G. McNab, M.A., retired from his duties as Inspector of Public Schools for Wellington South and the City of Guelph on August 31st, 1945.

Dr. McNab attended the public school in S.S. No. 6 Horton Township, Renfrew County, and obtained his secondary school education at Renfrew Collegiate Institute. After teaching in rural schools in Renfrew County for three years he attended Queen's University and obtained the degree of Master of Arts in 1902. His teaching experience included three years as Mathematics Master at Port Arthur Collegiate Institute and almost two years as principal of Gravenhurst High School. On April 1st, 1909, he was appointed Inspector of Public Schools of Renfrew South, which position he held until August 31st, 1931, when he was transferred to the inspectorate of Wellington South and the City of Guelph. Dr. McNab is a Past President and life member of the Ontario Educational Association, and has the distinction of having attended thirty-seven consecutive sessions of that Association. He served for some years as chairman of the Educational Committee for publications of the Department of Education, and was for many years a member of Queen's University Council. He has taken an active part in church and community work, and is a past District Governor of Rotary International. Dr. McNab secured the degree of Doctor of Pedagogy from Queen's University in 1924. He has written numerous articles on education and is the author of "The Development of Higher Education in Ontario." As an educational leader and writer, Dr. McNab has rendered splendid service to the cause of education in Ontario.

Mr. S. A. Truscott, M.A., retired as Public School Inspector for Frontenac South in August, 1945. He was born near Sydenham in the Township of Portland. He attended the public school in S.S. No. 5 Loughboro and secured his secondary education at Sydenham High School, where he was awarded the Mowat Scholarship in Mathematics. He taught in rural schools in the Townships of Loughboro and Storrington. Mr. Truscott graduated from Queen's University in 1904, securing a Master's Degree with Specialist standing in Mathematics. He attended the Hamilton Normal College, and later taught in the high schools at Waterford and Markham. In 1908 he was appointed principal of Iroquois High School, and resigned in December, 1912, to become Public School Inspector for Frontenac South. Mr. Truscott was unstinting in his services to the public schools under his supervision. The boards that he advised and the teachers whom he inspected know him as one who was, at all times, interested in the progress of education in his inspectorate.

Mr. L. J. Williams, B.A., retired from service as Public School Inspector of District Division III on August 31st, 1945. He was born in Warwick Township and received his elementary education in S.S. No. 6 Warwick and Watford Public School. His secondary education was obtained in Strathroy Collegiate Institute and Watford High School. He later attended the Forest Model School, the School of Pedagogy, Toronto, and graduated from Queen's University in 1906. Mr. Williams taught successfully as a public school teacher in S.S. No. 3 Brooke and S.S. No. 11 Warwick. He was a member of the staffs of the high schools of Tillsonburg, Watford, Georgetown, Pembroke and Sault Ste. Marie, and later acted as principal of Watford High School and Oakville High School. In 1914 he became principal of Medicine Hat High School, and later was transferred to the Calgary Normal School. In 1923 he was appointed principal of the Sault Ste. Marie Technical School. In June, 1925, he was appointed Inspector of Public Schools for District Division IV, and was later transferred to Division III, where he was Inspector of the Fort William Public Schools. The schools of Thunder Bay District have benefited greatly from the services of Mr. Williams.

III. APPOINTMENTS:

The following appointments were made to the provincial staff of inspectors during the year 1945:—

1. Department of Education: Mr. C. F. Cannon, B.A., B.Paed., Assistant Superintendent of Elementary Education, was appointed Superintendent of Elementary Education to replace the late Dr. V. K. Greer, duties beginning December 1st.
2. Department of Education: Mr. C. B. Routley, M.A., Public School Inspector for Wentworth County, was appointed Assistant Superintendent of Elementary Education, duties beginning June 1st.
3. City of Toronto: Mr. Z. S. Phimister, B.A., B.Paed., formerly Public School Inspector for Welland East and City of Niagara Falls, was appointed Superintendent of Public Schools upon release from the Army, duties beginning September 1st.
4. City of Toronto: Mr. William McKay, B.A., B.Paed., Principal of Park Public School, Toronto, was appointed Public School Inspector, duties beginning September 1st.
5. Essex: Mr. R. A. Pierce, B.A., Business Administrator for East York Board of Education, was appointed Public School Inspector, duties beginning September 1st.
6. Essex: Mr. C. E. McMullen, B.A., formerly on the staff of Toronto Normal Model School, was appointed Assistant Public School Inspector upon release from Air Force, duties beginning October 1st.
7. Frontenac North and Addington: Mr. R. C. Earl, B.A., formerly Principal of Flinton Continuation School, was appointed Public School Inspector upon release from Air Force, duties beginning September 1st.
8. Peterborough West and Victoria East: Mr. E. C. Anderson, B.A., formerly Principal of Bobcaygeon Public School, was appointed Public School Inspector upon release from Army, duties beginning September 1st.
9. Renfrew North: Mr. C. A. Mustard, B.A., formerly on the staff of Lansdowne Public School, Toronto, was appointed Public School Inspector upon release from Army, duties beginning September 1st.
10. District Division VI: Mr. A. C. Ritter, B.A., B.Paed., formerly Principal of Leamington High School, was appointed Public School Inspector upon release from Air Force, duties beginning September 1st.
11. District Division IX: Mr. G. L. Woodruff, B.A., formerly Assistant in Kent Street Intermediate School, Ottawa, was appointed Public School Inspector upon release from Army, duties beginning September 1st.
12. R.C.S.S. Division III: Mr. P. E. Piche, B.A., B.Paed., Principal of Garneau Separate School, Ottawa, was appointed Separate School Inspector, duties beginning September 1st.
13. R.C.S.S. Division XI: Mr. J. F. Kinlin, B.A., B.Paed., of the staff of the Ottawa Technical School, was appointed Separate School Inspector, duties beginning September 1st.

IV. RETURNED FROM MILITARY SERVICE:

The following Public School Inspectors from the staff of the Department of Education returned from service in the armed forces:—

- Mr. Russell Reid, B.A., B.Paed., to the City of Brantford Public Schools, on September 1st.
- Mr. Z. S. Phimister, B.A., B.Paed., to the position of Superintendent of Public Schools for the City of Toronto, September 1st, as noted above.
- Mr. H. H. Langford, B.A., to the inspectorate of Lennox & Hastings South, on February 1st.

V. TRANSFERS:

The following transfers were made in the provincial staff of inspectors during the year 1945:—

1. Mr. Norman Campbell, M.A., from Renfrew North to Frontenac South No. 1, September 1st.
2. Mr. R. C. Cassie, B.A., from District Division IX to District Division XV, September 1st.
3. Mr. C. X. Charron, B.A., from R.C.S.S. Division V to R.C.S.S. Division IX, March 1st.
4. Mr. G. L. Duffin, B.A., M.Ed., from Essex to the Department of Education, October 15th.
5. Mr. J. K. Evans, B.A., B.Paed., from the Hamilton Normal School to Wentworth, September 1st.
6. Mr. Charles Howitt, B.A., B.Paed., from Halton to York No. 8, September 1st.
7. Mr. Lucien Laplante, M.A., from R.C.S.S. Division IX to R.C.S.S. Division V, March 1st.
8. Mr. W. R. McVittie, B.A., from Simcoe Centre to Wellington South, September 1st.
9. Mr. G. A. Noble, B.A., Assistant Inspector in Essex, to District Division III as Public School Inspector, September 1st.
10. Mr. V. C. Quarry, B.A., from R.C.S.S. Division XI to newly organized inspectorate, R.C.S.S. Division XIII, September 1st.
11. Mr. P. M. Scott, B.A., from District Division XV to Simcoe Centre, September 1st.

VI. INSPECTORAL EXCHANGES WITH NORMAL SCHOOL STAFFS:

1. Mr. Maynard Hallman, B.A., B.Paed., from Frontenac North & Addington to the Hamilton Normal School, September 1st.
2. Mr. A. P. Silcox, B.A., B.Paed., from District Division VI to the Ottawa Normal School, September 1st.
3. Mr. L. L. Skuce, B.A., B.Paed., returned from the Ottawa Normal School to Halton County, September 1st.
4. Mr. J. K. Evans, B.A., B.Paed., from the Hamilton Normal School to Wentworth County, September 1st.

Conclusion

War work and the administrative duties connected therewith still required a large amount of the time of the inspectors during at least the January to June term of 1945. The contribution of the inspectors in organizing the schools for war effort has been most commendable during the whole period of the conflict, and pupils have thus received a practical education in democracy.

During 1945 the Ontario School Inspectors' Association presented to the Royal Commission on Education a comprehensive brief on all phases of elementary education. The brief was well received, and the inspectors were complimented by the Chairman and members of the Commission for their very valuable contribution. The presentation by the inspectors was of particular value in the solution of educational problems, since observations were objective in nature and derived from practical experience. Likewise, during the year, the Research Committee of the Inspectors' Association produced, by co-operative effort, a Handbook of Suggestions for use of members of Township School Area Boards. The Handbook was distributed in limited quantity, with the intention of revision and final publication after a year's trial in the hands of trustees.

Certain inspectors have also been called upon for extra duties in connection with surveys by Departmental secondary school officials and county council committees, looking toward the formation of larger high school districts. In each county so surveyed the public school inspector has acted as secretary of the survey committee. Although not strictly within the elementary school field, these duties have been willingly assumed by the inspectors for the general benefit of education.

The present incumbent of the position of Superintendent of Elementary Education takes this opportunity to express his appreciation to the inspectors, and his colleagues within the Department, for their loyal and sympathetic support in his difficult task of taking over the guidance of this branch from one so capable and beloved as his predecessor, Dr. V. K. Greer.

C. F. CANNON

Superintendent of Elementary Education.

Toronto, March 31st, 1946.

SECONDARY EDUCATION

I have the honour to submit herewith the reports of the High School Inspectors and the Director of Vocational Education for the school year 1944-45.

A. G. HOOPER,
Superintendent of Secondary Education.

June 17, 1946.

1. COLLEGIATE INSTITUTES, HIGH SCHOOLS AND CONTINUATION SCHOOLS

In the school year 1944-45 the total enrolment of pupils in the Collegiate Institutes, High Schools and Continuation Schools of Ontario was 82,863. The total number of teachers assigned to the instruction and supervision of these students was 3,362. The corresponding totals for the previous school year were 74,512 and 3,261 respectively. Thus it is seen that the pupil-teacher ratio of 22.85 to 1 for 1943-44 rose to 24.64 to 1 for 1944-45. This marked increase in teacher load becomes somewhat more apparent by noting that for 8,351 additional students only 101 more teachers were engaged—a pupil-teacher ratio of 82.7 to 1. In addition to the above-mentioned schools, the Middle School classes of 97 private schools were inspected.

The following changes in status are reported. The Continuation Schools at Merlin and Stouffville became High Schools. Kinmount and Red Lake were re-opened as Grade B Continuation Schools and new Continuation Schools were established at Riverside and Lafontaine. The High School at Keewatin and the Continuation Schools at Milford Bay and Chalk River were closed as of June 1945, while the Continuation Schools at Laurel and Feversham were reduced in status.

In keeping with the announcement that further major changes should not be expected until the report of the Royal Commission had been submitted, the revisions in the courses of study were of a minor nature. Perhaps the most significant changes were the introduction of Educational Guidance as a formal subject obligatory in Grade IX and the further revision of the course in Physical and Health Education and Cadet Training. As a guide to the selection of new texts for Lower School French, a number of schools co-operated by using two texts assigned from a group of four supplied by the Department of Education. The arrangements were such as would facilitate comparison between any two texts. Copies of the booklet "Canadian Democracy in Action" were supplied to the schools in March to supplement the course in Middle School History.

There were several staff changes during the year. Mr. R. W. Anglin retired after having served as registrar and inspector for more than thirty years. Mr. T. Kennedy retired after long service in Toronto collegiate institutes and five years as inspector. Mr. C. W. Robb resigned after five years' service as inspector to accept appointment as Superintendent of Secondary Schools for Toronto. All three of these gentlemen have made most valuable contributions to the cause of education throughout Ontario. Newly appointed as inspectors were Mr. J. E. Durrant, formerly vice-principal of the Guelph Collegiate-Vocational Institute;

Mr. A. L. Lakie, formerly master at the Ottawa Normal School; Mr. C. W. Booth, formerly assistant principal at Lawrence Park Collegiate Institute, Toronto; and Mr. F. C. Asbury, formerly principal of Sarnia Collegiate Institute and Technical School. The new appointees bring to the service of Ontario schools the benefits of broad experience, specialized training and sound scholarship.

For the first time in six years, students graduated from our schools into a world which called them to peace-time activities. In the final year of the war, appeals on behalf of the war effort found the same generous and sustained support that was so characteristic of previous years. Our schools had steadfastly refused to be worn down by the "long vigils of war." In the interests of the production and conservation of food, Boards were again authorized to defer the opening of schools in September and students were permitted to leave school early without loss of credits or certificates according to the provisions of Circular 27. Special efforts and faithful co-operation of teachers and pupils reduced the educational handicaps resulting from the shortened school year. With the close of the war and the expected lifting of restrictions on building, many Boards are looking forward to a building programme to relieve congestion or to provide additional educational facilities.

During the school year covered by this report, a movement towards the establishment of larger high school districts was begun in the County of Kent. Two districts were formed, one including the Village of Merlin and the surrounding rural area and the other the Town of Tilbury and all, or portions of, adjacent municipalities. Essex, following the example of its neighbouring county and carrying the policy still further, divided almost the whole county into high school districts. These districts operate secondary schools that will offer a diversified programme of studies suited to the interests and special needs of the pupils. The growing recognition of the advantages, both educational and financial, of the larger high school district is shown by the fact that many of the other counties in the province already have formed consultative committees for the purpose of making surveys and recommendations regarding the formation of such districts. The increased scale on which legislative grants for secondary school education are now being paid is evidently making possible the development of larger high school districts and this in turn should bring a measure of equality in educational opportunity as between rural and urban Ontario.

We are pleased to note the increasing use of educational broadcasts and sound films in the classrooms and the efforts made to integrate them into the regular courses of study. The effective promotion of the work in Music, in Physical and Health Education and in Guidance by the supervisor and directors concerned is quite apparent and we wish to record our appreciation of the counsel and assistance which they have given the inspectors and teachers. In conclusion we wish to pay tribute to the sound scholarship and devotion to duty of those retiring from the profession after many years of faithful service and to the enthusiasm and skill of those who have entered or returned to it during the year to which this report refers.

2. VOCATIONAL SCHOOLS

Instruction in the vocational schools during the school year 1944-45 has been maintained at a consistently high level and reflects credit on the school staffs who have co-operated closely with the Inspectors in introducing modern methods of instruction. This report of the main features of the year's work covers the several types of training established in these schools and also the ancillary work of the vocational branch in high schools and continuation schools. Comparative statistics regarding schools operating under The Vocational Education Act are given below:

Vocational Schools	1943-44	1944-45
Number of Schools—Day.....	62	³ 45
Number of Schools—Evening.....	46	45
Number of Pupils—Day.....	30,956	27,782
Number of Pupils—Evening.....	29,546	32,834
Number of Teachers—Day.....	1,591	1,615
Number of Teachers—Evening.....	958	1,081
Government Grants ¹	\$1,263,758	\$1,349,846
Municipal Expenditure (Net) ²	5,198,184	5,284,355

¹Fiscal Year.

²Previous Calendar Year.

³17 Commercial depts. transferred to High Schools.

Shop Work in Vocational Schools

The practical instruction provided in the various shops has been of a satisfactory character, noticeable progress having been made by the pupils in every department. The training in the shops develops increased pupil interest in the subjects of the classroom, with gratifying results from both angles. Considerable improvement, however, is necessary in the methods of teaching, and to this end a new plan has been introduced at the Training College at Hamilton by which it is hoped to increase the efficiency of the shop instructors. This plan is outlined in the following paragraphs.

The industrial, technical and commercial departments of the vocational schools filled an important role in Canada's war effort by providing facilities for the training of potential war workers, but the drain on the teaching profession created by these inroads and the call of the Armed Forces unfortunately resulted in a dearth of qualified teachers. The most important accomplishments, therefore, during the past year have undoubtedly been the introduction of a new method of training vocational shop teachers, and a campaign which has been undertaken to induce veterans and others to take the course. The plan provides (1) training on the job, (2) gradual introduction of teaching duties, (3) experience in three selected training centres, (4) new distribution of emphasis over traditional method, (5) supervised and directed observation opportunities, (6) study of modern teaching aids and (7) training in socialized instruction and procedure.

Teachers in vocational schools in Ontario have always enjoyed a large measure of freedom in their methods of presentation as well as in the content of the courses of instruction. Experiences derived from the war have aroused in them intense interest in matters pertaining to efficiency in educational methods as well as in the choice of subject matter. The new plan is an attempt to bring vocational teacher-training methods in line with actual teaching developments in our vocational schools throughout the Province.

The course was commenced on January 8th, 1945, and concluded on the 28th of June. The programme was organized in three parts, as follows:

- Part I Methods and management; observation and practice instruction.
- Part II History of education, school law, trade analyses and English.
- Part III Psychology and vocational guidance.

The studies in Parts II and III were conducted entirely in the Ontario Training College for Technical Teachers in Hamilton, while Part I was arranged on a co-operative plan which employed for part-time the facilities of a number of vocational schools within a fifty-mile radius of the College.

It is hoped that the plan will have a beneficial effect on the character of future teaching.

Commercial Courses

The courses both for pupils and teachers have been strengthened as follows:

1. Four additional papers have been authorized for Upper School Commercial Work. These are Accountancy Practice, Secretarial Practice, Mathematics of Investment, Business Organization and Administration. The courses in these subjects were organized by a joint committee of business men and teachers, and have been approved for credit for the Honour Graduation Diploma and for Entrance to Normal School. They are also being submitted to the various Universities and the Institute of Chartered Accountants for consideration.

2. The General Commercial Course has been broadened to include a clerical option in which Shorthand is not required.

3. Schools are being encouraged to set up machine rooms or office practice rooms equipped with a variety of business machines.

4. A course in Business Machines has been authorized as an option for Arithmetic of Investment on the Commercial Specialist's Teacher Training Course. A large class was enrolled in the course during the summer of 1945. Commercial Specialists are now required also to have six months of business experience satisfactory to the Minister.

5. A committee has been appointed for revising the Commercial Courses for reprinting. These will be ready for September, 1946.

Agriculture

Agricultural instruction under Vocational Regulations is maintained in the following schools:

Beamsville	High and Vocational School
Simcoe	High and Vocational School
Renfrew	Collegiate Institute and Vocational School
Ridgetown	High and Vocational School
Stamford	Collegiate-Vocational School

Instruction relating to practical activities on the farm has been stressed in classroom work and in supervised farm practice, in keeping with the revision of the time allotment for classes in Agriculture which has been increased in Grades IX and X. A programme correlating practical agriculture with other subjects

for all pupils in these grades taking vocational courses and those taking academic courses is deferred until the end of Grade X. The result will be a larger number of students taking the vocational courses in Grade XI. The service rendered by these schools is now well recognized in each locality, and more interest and attention is being given to agricultural instruction by the people of the Province generally.

Vocational Courses of Study

Committees of teachers and inspectors are working on a revision of the several vocational courses of study, and the Technical Research Committee and sub-committees of the technical section of the O.E.A. have done considerable work during the past year in an effort to improve standards of teaching. The work of the Technical Research Committee, which is composed entirely of vocational teachers, indicates that the teachers are interested in problems relating to vocational education and are prepared to offer their services freely in the study of problems related to the subjects of study. Active co-operation with the Department will result in improvement to courses, in the preparation of unit lessons, and in standards of evaluation.

Inspection of Schools

Inspectors are continuing their efforts to improve the internal organization of vocational schools by increasing the time devoted to consultation with principals, heads of departments and shop directors. A committee which reported on the duties of Industrial and Technical Directors reported their findings in June and made certain recommendations designed to improve the vocational regulations in this regard. These proposals dealt mainly with the necessity for co-ordination among department heads with respect to teaching aids, courses of study and project matter. Most of these suggestions are being embodied in the Regulations.

Industrial Arts and Crafts (Manual Training)

Elementary Schools

The continuous movement of shop teachers has resulted in the developing of itinerant teachers for Industrial Arts and Crafts in the rural districts. Where transportation facilities are difficult these teachers have filled a need; but where it has been possible to transport pupils to a central school and engage a full-time teacher with a properly equipped shop the type of work has proved much superior to that of the itinerant teacher. Due to the wide range of climatic conditions and transportation facilities both types of teachers in schools have been found necessary for rural districts.

The work in Grades VII and VIII has changed to some extent, in that instruction in a greater variety of crafts has been introduced in lieu of placing the emphasis on a high degree of skill in any particular phase of the work. The developing of blueprint reading and interpretation has been encouraged in preference to the excessive use of the mechanics of drafting. This method permits the teacher to cover a greater range of work and gives the pupils greater ability in interpreting blueprints which appear in magazines, books or mimeographed material supplied by the teacher.

Because of the shortage of teachers qualified to teach this work, it was found necessary to offer Saturday Classes during the winter of 1944-45 to enable

teachers holding Part I, Type A, Elementary Industrial Arts and Crafts Certificates to qualify for the certificate. These teachers at the same time occupied positions of full-time employment. Although it was impossible to cover all phases of shop work included in the course of study, Inspectors, school boards and principals have reported very favourably upon the quality of work these teachers were capable of doing.

Secondary Schools

Shop work in Ontario has been gradually expanding to the point where it is now an accepted subject for graduation purposes in many of our collegiates, high schools and continuation schools. Expansion in shop work has been delayed because of the difficulty of obtaining proper equipment, accommodation and supplies. This condition, it is hoped, will be alleviated in the near future.

During the school year 1944-45 the Ontario Training College was opened for the purpose of training teachers for the Intermediate Certificate in Industrial Arts and Crafts. The demand for such teachers, coupled with the thorough training provided by the Training College, enabled graduates to obtain positions with a salary of \$2,000.00 per annum. This is a decided improvement over the salary situation which existed previously.

Home Economics

The building programmes of school boards show that interest continues to grow in the study of Home Economics. However, equipment is not available at the present time in sufficient quantities to meet the needs of the classes, and the shortage of teachers is an additional drawback although some are being released from the Services.

Encouragement in the study of nutrition is showing gratifying results. An increase in the number of lunch rooms has been noted throughout the schools of the Province.

Summer session refresher courses attracted a considerable number of teachers and resulted in a definite improvement in teaching methods.

The Home Economics staffs are to be commended for their work during the year. A high standard of instruction has been achieved and the work of the pupils shows a corresponding improvement.

Education in Co-operation With Industry

The plan outlined in some detail in the report of the Director of Vocational Education for 1942-43, under which pupils enrolled in vocational schools spend part-time in some industry or business and part-time in the school classrooms and workshops, has met with considerable success. As stated at the time, the boards of education of both Toronto and Hamilton undertook to explore the scheme, the former in the Danforth Technical School and the latter in the Hamilton Technical Institute. Recent reports indicate that the number of students participating in this unique venture so far as Ontario is concerned has trebled in the Danforth school over the past two years and that the plan has made steady progress in Hamilton. Employers are giving strong support to the idea in the belief that it will provide the kind of training required by modern industry and commerce. The experiment is being watched with interest by the vocational Inspectors and, if this method of instruction proves the success that is anticipated, recommendations will be made for extending the arrangement to other schools.

The Provincial Institute of Mining

Sufficient progress was made in the organization of this Institute to ensure its opening in September, 1945. It is the first provincially-owned technical school in the Province. The Institute is intended primarily to serve the needs of the mining industry. It provides specialized technical courses in subjects relating to mining for capable boys who wish to enter the mining industry without investing the time and money which is required for technical University courses. Mining is of major importance to Ontario and Canada, and the Institute aims to give special technological training to meet the requirements of technicians in this particular industry.

The courses will stress the practical mining subjects in and about the mine, but will include a substantial measure of academic training, for it is recognized that academic ability often governs promotion in the mine although competence in the practical processes usually determines employment. The subjects of study include English, History, Mathematics, Physical Education, Surveying, Assaying, Milling, Mining, Physics, Chemistry, Mineralogy, Geology, Drafting and Shop Work. A two-year course is provided for prospective students who have successfully completed the Grade X general or vocational course in English, History, Mathematics and Science, and a one-year course is provided for those who have successfully completed the Grade XII general or vocational course in these subjects. Diplomas are awarded on the successful completion of either course. Upon the request of the Federal and Provincial departments which are responsible for rehabilitation, special courses will be provided for discharged members of His Majesty's Forces. The Institute will provide other special courses as the need arises.

Objects of the Course

The main purpose of the Institute is to train not only youths but also adults for employment in the technical occupations which are so numerous in the mining industry. It is possible that a programme of scholarships or bursaries will be developed to assist promising students. Consideration is also being given to a co-operative plan whereby students may alternate between the school and the mines for certain periods of time.

Direction of the School

The title of the Institute, which was acquired by the Province from the Municipality of Haileybury, is The Provincial Institute of Mining. It is governed by a board assisted by an advisory committee. The board consists of the Director of Vocational Education (Chairman), the Deputy Minister of Mines and the Principal of the Institute. This board, subject to the direction of the Minister, exercises full control over the administration of the Institute. The advisory committee is composed of (a) four members representing Boards of Education in areas adjacent to the lines of the T. & N. O. Railway, (b) five members representing the mining industry at large, and (c) a representative of organized labour. The board is responsible for matters connected with the establishment, organization and management of the Institute, while the advisory committee gives advice to the board on questions which may be referred to the committee by the board. Mr. O. E. Walli, the Principal of the Institute, is a Mining Engineer, certificated as a high and vocational school teacher, and has had wide teaching experience in the vocational schools of Hamilton, Fort William and Timmins.

L. S. BEATTIE,
Director of Vocational Education.

PROFESSIONAL TRAINING

To meet the problem caused by war-time shortage of teachers:

- (1) in 1940 and thereafter applicants were regularly admitted to Normal School on eight of the required nine Upper School papers. 968 have so entered during the past six years.
- (2) in 1943 applicants were admitted on seven, and in 1944 on five Upper School papers on condition that if successful they would be granted Deferred First Class certificates until the additional Upper School papers had been completed. 361 have so entered during the past three years.
- (3) In 1944 a First Year Normal School Summer Session of six weeks was established to which were admitted applicants holding at least full Middle School standing. 620 attended the London and Toronto centres of whom 572 were granted Deferred Second Class certificates valid for one year. 466 of these attended the Second Year Normal School Summer Session in 1945 of whom 449 were granted Interim Second Class certificates.

Up to January 9th 659 Letters of Permission were issued to unqualified teachers of whom 324 had received teacher training from other provinces or in earlier times. Last year at the same time 346 Letters of Standing had been issued.

Medical Inspection of Training Schools

All applicants to Training Schools are required to submit to a medical examination before they are finally accepted. In 1937 seventeen applicants were rejected; in 1938 twenty-seven; in 1939 twenty-six, in 1940 thirteen; in 1941 seventeen; in 1942 eight; in 1943 nine; in 1944 fifteen; in 1945 twelve. Applicants suffering from physical handicap of a less aggravated nature are permitted to enter on signing a waiver to claims for disability pension under the Teachers' and Inspectors' Superannuation. In 1939-40 two signed waivers; in 1940-41 seven; in 1941-42 thirty-eight; in 1942-43 forty-six; in 1943-44 forty; in 1944-45 sixty; in 1945-46 forty-three.

Cost of Medical Inspection

Amount paid physicians for medical examinations—1,397 × \$4.00.....	\$5,588.00
Amount paid hospitals and radiologists for X-ray films.....	910.35
Amount paid consultants obtained by the Medical Board.....	490.00
Amount paid nurses re medical examinations.....	132.99
Refund of fees to students excluded by the Medical Board.....	12.00
	\$7,133.34
Less fees paid by students.....	2,398.00
	\$4,735.34

Late registration fees were collected from some students. Other students who paid their fees in September required further examination. No extra fee was charged. Students with military service were not required to pay a fee.

This amount to be divided between:

Ontario Government.....	\$2,367.67
Teachers' and Inspectors' Superannuation Commission.....	2,367.67
	\$4,735.34

Practice Teaching—Normal Schools

In the Normal Schools practice teaching is carried on according to three methods: (1) Each student teaches a minimum of 23 lessons in graded and ungraded schools under competent and experienced critic teachers. The first five are prepared under supervision of the Normal School Masters in order that a reasonable degree of success may be obtained and confidence inspired. The remaining eighteen constitute the basis upon which the student's practice teaching is judged. (2) In the regular rural practice schools a student teacher takes charge of the whole school for one hour instead of teaching a single lesson to a single class. (3) During the latter half of the term students are assigned four weeks of continuous observation and practice teaching, two in rural schools and two in graded schools, taking full charge of the school for half of each week under the supervision of the teacher.

The average cost of practice teaching per student is \$101 per annum, made up as follows: practice teaching \$58, continuous teaching \$20, transportation \$8, grants to Boards and Janitors \$15, total \$101. This constitutes the major variable cost since it increases or decreases directly with the enrolment.

Exchanges

In September, 1945, Mr. F. B. Smitheram, Master, Peterborough Normal School, and Mr. K. O. Birkin, Inspector, Lennox and Hastings South, arranged to continue on exchange for the second consecutive year; Mr. J. E. A. Godbout returned to the staff of the University of Ottawa Normal School after serving two years as inspector, R.C. Separate School Division III; Mr. L. L. Skuce returned to his inspectorate, Halton, after a year on exchange in the Ottawa

Normal School and Mr. A. P. Silcox, Inspector, Division VII, took his place. Mr. J. K. Evans after two years on exchange in the Ottawa and Hamilton Normal Schools returned to his inspectorate, Wentworth, and Mr. M. M. Hallman, Inspector, Lennox and Hastings South, took his place on the Hamilton staff. Of the 37 principals and masters in the eight normal schools 22 have now enjoyed the advantage of inspection experience.

Changes in Staffs

In addition to those recorded above the following changes occurred on the staffs of the several Normal Schools of the Province:—

W. A. Beecroft, Clerk, Department of Education, Professional Training Branch, retired July 1st, 1945. Mr. Beecroft was born and received his early academic and professional training in Victoria county. After graduating from Toronto University and the Ontario College of Education he taught in Swansea and Toronto and entered the public service in 1913. His successor Flight-Lieutenant J. B. Silcox is a native of Elgin county, a graduate of Toronto University and the holder of a Public School Inspectors' certificate. He taught in central Ontario and became principal of a Brantford public school from which position he enlisted with the R.C.A.F. in 1941.

On December 16th, 1945, Miss M. E. Hay, Instructor in Home Economics on the staff of the Toronto Normal School, passed away after a prolonged illness. Miss Hay after teaching a number of years and graduating from the Home Economics course, Toronto University, entered the service in August, 1923, and for twenty-three years exerted a wide-spread and lasting influence on the lives and careers of the normal school students not only as an instructor but likewise in her capacity as Dean of Women.

On September 1st, 1945, Miss M. G. N. Irving, Master in the Hamilton Normal School, retired after a year's leave of absence. Miss Irving was born in Kingston. After attending the public and secondary schools of that city she graduated from Queen's University and took professional training at the Ottawa Normal School and the Queen's Faculty of Education. She taught in the public schools of Belleville and Toronto and in the Kingston Collegiate Institute and was appointed to the staff of the Hamilton Normal School in 1924.

On January 1st, 1946, Miss E. M. Munro, Librarian in the Peterborough Normal School, retired. Miss Munro was born and received her early education in the city of Peterborough. She graduated from Trinity College, University of Toronto, with a B.A. degree and later with an M.A. degree, and is a graduate of the Library School of the same university. She was appointed Librarian on the staff of the Peterborough Normal School in September, 1920, where she rendered effective service during the past twenty-six years in correlating the library with that of the public school.

On Easter Sunday, April 21st, 1946, the teaching profession in Ontario suffered a great loss in the sudden death of Mr. E. H. McKone, M.A., B.Paed., Principal of the Peterborough Normal School. Mr. McKone was born in London and received his early education in that city. After graduating from the University of Toronto he served as Principal of several Public Schools of London and as teacher of mathematics and science in the Brantford Collegiate Institute.

AVERAGE OF THE RATINGS OF TEACHING EFFICIENCY IN THE INSPECTORATE

He was appointed to the staff of the London Normal School November 1st, 1924, and to the Principalship of the Peterborough Normal School in September, 1943. During this period he served as Principal of the Kindergarten-Primary Summer courses both at London and Toronto, as Instructor in Summer Courses in Education given by the Department of Education in Nova Scotia, and as an exchange Public School Inspector for Huron South. All his life he was a great student of both nature and human nature and was an executive member of the Ontario Federation of Naturalists and of the Children's Aid Societies in both London and Peterborough.

On Sunday, June 16th, 1946, Mrs. Martha Maude Robertson, nee Watterworth, Instructor in the Primary Specialist Course on the staff of the Toronto Normal School, passed away after a brief illness. After successful experience as teacher at Dresden, Sutton and Swansea, Miss Watterworth was appointed in 1921 to the Toronto Normal-Model School staff where she did outstanding work as a demonstrator and critic teacher in primary methods and was co-author of several books on the subject. In 1939 she was appointed instructor in the newly organized Primary Specialist Course and contributed very effectively in its establishment.

Survey

The accompanying graph is a resume of the Inspectors' Reports on Normal School graduates of 1943-44 and on the teachers who secured Deferred Second Class certificates in the emergency Normal School Session of 1944 at London and Toronto centres. Compared with the graph shown in the previous Report of the Minister the Normal School graduates of 1943-44 display improvement particularly in Primary Reading, Craft, Spelling, Print Writing, Arithmetic and Grade Reading, a slight deterioration in Social Studies and in Science and Agriculture. In the first emergency summer course stress was laid on School Organization, Management and Business, and after that on the key subjects, English, Arithmetic and Social Studies. The secondary subjects, Art, Health, Craft, Science and Agriculture etc., were stressed during the second and completing summer course given in 1945 after the teachers had been in the field for one year. It is interesting to note how the records on the graduates from the schools which serve quite different parts of Ontario coincide and how the stress on certain subjects resulted in a higher record of teaching efficiency. It will likewise be interesting to note in the course of next year's survey how these enthusiastic young teachers fare as a result of two summers of intensive training, with a year of trial-and-error practice teaching between, as compared with regular Normal School graduates.

H. E. AMOSS,

Director of Professional Training.

Toronto, June 30th, 1945.

SCHOOLS ATTENDED BY FRENCH-SPEAKING PUPILS

Teachers' Training and Qualifications

In 1944-45 there were 96 teachers-in-training at the University of Ottawa Normal School, 25 of whom were enrolled in the First Class course, and 71 in the Second Class course. As a result of the term and final examinations 21 students were awarded First Class certificates, and 66 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1945, and the progress made in this regard since 1929:—

	1929	1939	1942	1943	1944	1945
Total number of French-speaking teachers in Elementary Schools	1,087	1,390	1,441	1,448	1,484	1,576
Number of above teachers holding I or II Class certificates	273	1,271	1,274	1,272	1,297	1,348
Percentage of French-speaking teachers holding I or II Class certificates	25.11	91.43	88.41	87.85	87.39	85.53

The slight decrease since 1942 in the percentage of First and Second Class certificated teachers is due to the abnormal situation caused by the war.

The present enrolment of teachers-in-training in the University of Ottawa Normal School is still insufficient to meet the needs of elementary schools attended by French-speaking pupils. During the school year 1945-46, owing to the acute shortage of qualified applicants, some 200 teachers without Normal School training had to be engaged by school boards. There is reason to believe, however, in view of the ever larger number of students reaching the higher grades of the secondary schools and the increasing teachers' salaries, that this regrettable situation will be corrected gradually within the next few years.

Secondary School Classes

A French-speaking section with an enrolment of 34 Grade IX students was established at the North Bay Collegiate in September, 1945.

In the following table are shown the enrolment totals of French-speaking students in the secondary schools of the provincial system for the period 1938-1945:—

Year	Grade					Total
	IX	X	XI	XII	XIII	
1938	327	182	155	143	32	839
1939	392	235	203	130	67	1,027
1940	440	310	172	132	48	1,102
1941	584	336	178	119	32	1,249
1942	531	336	189	101	30	1,187
1943	516	312	205	114	22	1,169
1944	644	384	215	142	33	1,418
1945	712	429	272	150	39	1,602

It will be noted that the enrolment of French-speaking students in the public secondary schools of the Province has almost doubled in the period of seven years.

The following table shows the number of French-speaking students enrolled in December, 1945, in the advanced French courses of Collegiate Institutes, High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

SCHOOL	GRADE					Total
	IX	X	XI	XII	XIII	
Alexandria High.....	15	19	9	1	4	48
Cornwall Collegiate and Vocational.....	73	50	6	4	4	137

Mattawa High.....	9	8	5	4	26
North Bay Collegiate.....	34	34
Ottawa Technical.....	46	46	33	24	149
Paincourt Continuation.....	20	8	4	1	33
Penetanguishene High.....	32	14	11	3	60
Plantagenet High.....	23	17	26	7	9	82
Rockland High.....	23	17	14	6	1	61
Smooth Rock Falls Continuation.....	11	5	4	4	24
Sturgeon Falls High.....	35	33	21	8	9	106
Sudbury High and Technical.....	77	38	29	15	6	165
Tilbury High.....	2	2	4
Timmins High and Vocational.....	100	45	15	6	166
Vankleek Hill Collegiate.....	10	6	5	4	25
Totals.....	712	429	272	150	39	1,602

NOTE:—The small number or the absence of students in the higher grades of some of the above schools may be accounted for by the fact that the advanced French courses were recently established in these schools.

Grade-Enrolment of Pupils in Elementary Schools

The following comparative table, for the years 1938, 1943, 1944 and 1945, shows the progress which has been achieved, during the period under review, in the grade-enrolment distribution of French-speaking pupils in all elementary schools:—

Separate and Public Schools

Grade	1938		1943		1944		1945	
	Number	Per cent	Number	Per cent	Number	Per cent	Number	Per cent
I.....	11,216	23.66	7,375	17.22	7,540	17.13	7,588	16.70
II.....	6,992	14.75	6,200	14.47	6,056	13.76	6,387	14.06
III.....	4,974	10.49	5,831	13.61	6,026	13.69	6,047	13.31
IV.....	5,548	11.71	5,514	12.88	5,678	12.90	5,833	12.89
V.....	5,828	12.30	5,292	12.36	5,101	11.59	5,516	12.14
VI.....	4,775	10.07	4,607	10.76	4,783	10.86	4,670	10.29
VII.....	3,764	7.95	3,560	8.31	3,837	8.71	4,049	8.91
VIII.....	2,913	6.15	3,112	7.27	3,315	7.53	3,492	7.68
IX.....	727	1.52	768	1.79	921	2.09	994	2.18
X.....	443	.93	398	.93	577	1.31	615	1.35
Auxiliary.....	217	.46	171	.40	191	.43	227	.49
Totals.....	47,397	100.00	42,828	100.00	44,028	100.00	45,418	100.00

NOTE:—The grade-enrolment for the year 1938 comprises some English-speaking sections of mixed schools in Northern Ontario which, prior to 1942, were included in the French-speaking Inspectors' Annual Age-Grade Reports.

When the 1945 grade-enrolment figures, as given above, are compared with those of 1938, it is evident that a successful effort has been made to bring about a more normal distribution of pupils throughout the grades. It is felt, however, that this progress would be enhanced, in urban centres especially, by the establishment of kindergarten-primary classes.

Elementary Schools
Age-Grade Distribution of Pupils

The tables on pp. 145-153, present a compilation of the French-speaking School Inspectors' Annual Age-Grade Reports for May, 1945.

TABLE No. 1
ANALYSIS OF AGE-GRADE DISTRIBUTION IN RELATION TO IDEAL AGE-SPREAD
IN ELEMENTARY RURAL AND URBAN SCHOOLS ATTENDED BY
FRENCH-SPEAKING PUPILS, MAY, 1945

(A) Separate and Public Schools

Grade	Under Ideal Age Spread		Within Ideal Age Spread		Over Ideal Age Spread	
	Number	Per cent	Number	Per cent	Number	Per cent
I.....	134	1.76	6,881	90.70	573	7.54

Totals.....	1,528	3.68	34,007	81.95	5,961	14.37

NOTE:—The 227 pupils enrolled in Auxiliary Classes are not included in the above table.

The following comparative table shows the grade-enrolment distribution of French-speaking pupils in separate and public schools for the years 1939, 1943, 1944 and 1945.

Separate and Public Schools

	1939		1943		1944		1945	
	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent
I-IV.....	29,098	59.00	21,921	58.19	25,300	57.46	25,855	56.93
V-VIII.....	18,473	37.46	16,571	38.69	17,039	38.70	17,727	39.04
IX-X.....	1,480	3.00	1,165	2.72	1,498	3.40	1,609	3.54
Auxiliary.....	268	.54	171	.40	191	.44	227	.49

The High School Entrance Examination

One of the means of testing the efficiency of the elementary schools lies in the number of pupils who complete the course and pass the High School Entrance examination. In June, 1945, the number of French-speaking pupils successful in this examination was 2,734, or 6.3 per cent of the May enrolment in Grades I to VIII.

Although these results are as yet below the average percentage for all schools of the Province, which stands at 9.1 for 1945, it should be noted that in June, 1929, the number of French-speaking pupils who completed the elementary school course and passed the High School Entrance examination was only 884, or 2.5 per cent of the enrolment in Grades I to VIII. The advance made in this regard by French-speaking inspectorates during the sixteen-year period is shown in the following table:—

Successful French-speaking Candidates at the High School Entrance Examination

Year	Successful Candidates		
	Number	Per cent of May Enrolment Grades I to VIII	Per cent for all schools of the Province
1929.....	884	2.5
1932.....	1,383	3.8	7.6
1937.....	1,841	4.0	9.1
1945.....	2,734	6.3	9.1

It is confidently expected that within the next four or five years the High School Entrance Examination record of the schools attended by French-speaking pupils will be as good as that of all schools in the Province. A feature worthy of note is the fact that the French-speaking pupils, besides writing four papers in French, write the same papers in English as the English-speaking pupils.

Oratorical Contest

ELEMENTARY SCHOOL SECTION

The finals of the eighth annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on April 4th and 5th, 1945. After winning preliminary tests in their own schools and inspectorates, twenty-four contestants—one boy and one girl from each of the twelve French-speaking inspectorates took part in this final competition. The four provincial winners, the

first two of whom were awarded secondary school scholarships by l'Association canadienne-française d'Éducation d'Ontario, were as follows:—

- 1st boy: Marcel Chénier, 13, Garneau School, Ottawa;
- 1st girl: Odette Parisien, 12, Village School, Alfred;
- 2nd boy: Rodolphe Tremblay, 13, St. Antoine School, Timmins;
- 2nd girl: Yolande Charron, 14, De la Nativité School, Cornwall.

SECONDARY SCHOOL SECTION

The third province-wide contest among the Grade XII and Grade XIII French-speaking students was held during the year. Preliminary contests were held in four regional centres and were followed by a final competition in Ottawa at the same time as the elementary school contest, on April 4th and 5th, 1945. The two provincial winners, who were also awarded valuable scholarships by l'Association canadienne-française d'Éducation d'Ontario, were the following:—

- André Audette, 18, Sturgeon Falls High School;
- Carmen Couillard, 16, Notre-Dame du Rosaire Convent, Ottawa.

Correspondence Courses

In June, 1945, ended the third school year in which correspondence courses for French-speaking children of Ontario were given by the Department of Education. Thus far, the lessons for pupils of Grades I to IV only were available.

In September, 1945, the courses for French-speaking pupils of Grade V and Grade VI were added and the enrolment during the school year 1945-46 was 380 pupils, divided as follows: Grade I, 91; Grade II, 92; Grade III, 76; Grade IV, 51; Grade V, 32; Grade VI, 38. A third French-speaking teacher, Miss Imelda Vaehon, was appointed to the Correspondence School staff.

The lessons for pupils of Grade VII and Grade VIII, which have been prepared by Inspector Adélarde Gascon, M.A., B.Paed., will be ready for distribution in September, 1946.

French Basic Vocabulary

As previously reported, it was decided in the spring of 1944 to assemble and rate approximately 5,000 French words which would be considered essential, or at least useful, to a Grade VIII French-speaking pupil. This basic list of French words, once properly classified for the various grades of the elementary school, could serve as material for the French readers, spellers, composition books, etc., which might be developed for schools attended by French-speaking pupils.

The French-speaking inspectors and Normal School masters resolved themselves into eleven committees, and each committee requested the assistance of grade teachers to examine approximately 100 pages of "Le Petit Larousse Illustré". The selection of words was made by the opinions technique. All the words selected were classified into three categories, under the headings of *classes primaires*, *classes moyennes*, *classes supérieures*, to show that they are appropriate for use in one of these three units of the elementary school.

A committee headed by Inspector Adélarde Gascon, M.A., B.Paed., examined and compiled the various lists of words. It was found that a total of some 11,500 words had been submitted, and that some of the lists still needed considerable revision in order to bring down the total number of words to approximately 5,000, as it was originally intended. The report of the committee showed also that the lists submitted were of uneven value. After some discussion, it was thought that

the remainder of the work should be done by one person, an outstanding teacher or inspector, who would pursue this research work in the form of a thesis in pedagogy. Inspector Laurier Carrière, B.A., B.Paed., of Cornwall, kindly consented to accept this task.

As stated in a former report, this undertaking is breaking new ground in Ontario French education; indeed, its usefulness for classroom work and for the preparation of text-books may be recognized beyond the boundaries of this Province.

ROBERT GAUTHIER,
Director of French Instruction.

Toronto, July 27th, 1946.

AGRICULTURAL CLASSES

Elementary Schools

Reports for the school year ending June 30th, 1945, were received from 2,714 elementary schools of which 440 were urban. Grants under the Regulations were claimed by 2,194 schools as compared with 2,637 last year. This reduction is due to the fact that reports were not sent in from many schools in which the subject was taught because of the change-over from the special grant scheme for expenditures to the general grant regulations. The revised regulations effective for the school year 1945-46 provide for payment of the grading grant only as a special grant. All expenditures are to be included in "operating costs".

School gardens were reported in 853 schools. "Improvement of Rural School Grounds" is an important feature in many schools and was reported as a part of the programme in 1,799 schools. Distribution of seedling trees from the Forestry Branch was continued in many inspectorates. The number of certificated teachers concerned in the schools reporting was 1,108 as compared with 1,297 last year, and 1,542 in the previous year. Many teachers with Normal School training only are, however, doing good work in both graded and ungraded schools.

School Fairs were conducted in a number of inspectorates. In the districts and some counties, separate fairs are held under direction of local committees of teachers and trustees, the Agricultural Representative and the Inspector. In many other areas a junior department is provided as a part of the programme of the local fall fair. Last year five separate school fairs were held in Middlesex County in the Inspectorate of Gordon Young, B.A. as a departure from junior departments of the fall fairs.

A book entitled "Suggestions for Teaching Agriculture in Elementary Schools" was distributed to all schools in the fall of 1945. 15,000 copies were printed and should meet the need for a five-year period. Many letters have been received from principals and teachers expressing their appreciation and stating that this book is a great value in the schools.

For the past five years conditions for the maintenance of a high standard in the number of schools taking the work have been unfavourable. Lack of qualified teachers, lack of summer schools to enable new teachers to qualify, inclusion of agricultural topics in Science courses and war activities in schools have in many inspectorates resulted in a reduction in the number of schools reporting. There is every reason to think that real interest has not been lost and that with a return to normal conditions the number of qualified teachers will be increased and a larger number of reports will be received from all inspectorates. Furthermore the increase in the number of larger areas of administration will result in an increase in the number of itinerant teachers of Agriculture and greater continuity in the programme in the schools of these areas.

Secondary Schools

Agricultural Science

In the fall of 1945 Agricultural Science was taught in 26 Collegiate Institutes, 88 High Schools and 56 Continuation Schools, a total of 170. Because of changes

in teachers the subject was discontinued in one High School and two Continuation Schools. The subject was introduced in six High Schools and six Continuation Schools. Both Lower and Middle School courses were taken in 116 schools. The number of teachers employed was 226 of whom 102 held the Specialist Certificate in Agriculture and 76 were graduates of the Ontario Agricultural College. Twenty-three teachers of Science were granted permission to teach Agricultural Science for 1945-46. Eighteen of forty-one teachers of Agriculture who were serving in the armed forces have returned to teaching.

The courses followed are those of Grades IX, X, XI and XII in which agricultural topics are taken with essential topics in Science. All schools are now well equipped for practical work in the various agricultural topics which are taught in the classroom or laboratory. School gardens are maintained in 146 schools and students have practice in planting and care of vegetables and flowers. Fruit trees and small fruits have been planted in many gardens and on larger areas a three-year crop rotation is followed. Small poultry houses have been provided at 31 schools. Chicks are raised in the spring, fowl fattened in the fall and laying stock kept through the winter months in most of these buildings. One or more colonies of bees are kept at 20 schools and instruction in this subject is practical. Frequently students start beekeeping at home as a result of instruction at school.

Continued attention is being given to productive home projects and in many schools students are rearing chickens, keeping records of egg and milk production and growing farm crops at home. Many students are members of various clubs conducted by the Agricultural Representatives and frequently secure a high standing. Growing of vegetables for home use is being stressed as a desirable home project for the coming year.

Changes in Regulations (Circular Agric. No. 6, Part I) provide for the grading grant only as a special grant and that from January 1st, 1946 all expenditures will be charged to "Operating Costs".

Departments of Agriculture

In September, 1945 in addition to Agricultural Science forty-two schools were giving additional time to Agriculture under Regulations for Departments of Agriculture. (Circular Agric. No. 6, Part II) In twenty-three of these schools the complete programme including home economics and shop work was carried on. Nearly twenty percent of the time in Grades IX and X was given to practical subjects.

The increase from 30 to 42 schools is due to the continued endorsement of this programme in a "Revised Schedule of Grants" approved by the Minister of Education in August, 1944. All school boards visited expressed approval of the plan to increase the emphasis on practical subjects in Grades IX and X and 12 boards decided to introduce the programme in September, 1945. The organization has been carried on at Port Perry representing a smaller school since 1933, and at Ridgetown since 1926 and Simcoe since 1933 representing larger schools.

The Regulations provide for approximately one-fifth of the time to be given for practical subjects in Grades IX and X. A grant of 75% of capital expenditure for providing and furnishing an agricultural classroom and storeroom is available. There are also annual grants to boards where the courses are established and further grants for accommodations for experimental plots; for equipment and materials; for teachers' salaries; for work during the summer by the

principal in promoting attendance and by the teacher in supervising home projects; for the provision of hot lunches; for the use of the school property as a community centre; for co-operation of shop work and home economics with the agricultural programme.

The complete organization for Grades IX and X was carried on in the thirty schools in which the Department of Agriculture programme was taken last year. An excellent beginning has been made in the twelve schools in which the work was introduced in Grade IX. In all schools a hot dish is being served at noon hour and increased use is being made of the accommodations for community activities. Further inquiries are being received from other school boards and the programme will be introduced in several additional schools in the fall of 1946. The schools in which the Department programme is taken are indicated by (D) after the name in the list of secondary schools forming a part of this report.

Inspection and Supervision

Mr. E. R. McClellan, B.S.A. who had been principal of Port Perry High School since 1939 was appointed a High School Inspector as of July 1st, 1945 to assist in inspection and supervision of the work in Agricultural Science and Departments of Agriculture. Due to the increase in the number of schools taking the work it had become impossible for one inspector to cover the field each year. In September, 1945 arrangements were made for inspection of all schools with Departments of Agriculture jointly by the High School Inspector concerned and either Mr. McClellan or the undersigned. This policy has resulted in a uniform report to the Boards of these schools.

Statistics and Comments

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools, the normal schools and summer courses.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1914.....	264	208	56
1926.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1943.....	3,299	871	Indefinite
1944.....	3,210	1,110	Indefinite
1945.....	2,714	853	Indefinite

Figures prior to 1942 are based on the number of schools qualifying for grants. For 1943 and 1944 the figure covers the schools where the courses were taught. Grants were claimed for 2,194 of these schools in 1945.

The following table shows the certificates held by teachers engaged in the work for the years given:—

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Total
1934.....	1,552	86	144	10	1,792
1936.....	2,092	208	188	22	2,510
1938.....	2,864	444	259	52	3,619
1941.....	1,956	94	236	17	2,303
1943.....	1,362	49	124	7	1,542
1944.....	1,157	58	123	10	1,348
1945.....	964	38	98	8	1,108

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 132 schools under the Regulations for Public and Separate Schools. The Lower School courses are taken under the High School Regulations in the following schools: Elizabeth Ziegler Public School, Waterloo; St. Andrew's West Separate School; St. Raphael's West Separate School; Victoria Public School, Kitchener; Toronto Public Schools: General Mercer, McMurrich, Perth Avenue.

Agricultural Science was taught during the year in the secondary schools listed below: Under (a) are schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses. Schools in which Departments of Agriculture have been established have (D) after the name:

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Runnymede, York Memorial. Total 9.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee (D), Orillia, Picton, Port Arthur, Renfrew (D), St. Mary's (D), Scarborough, Smith's Falls (D), Stamford (D), Strathroy (D). Total 17.

High Schools

(a) Bracebridge, *Chesley, Cobalt, Cochrane (D), *Dundalk, Dundas, Durham, Essex, Gore Bay, Harriston, Markham, Maxville, Merriton, Mount Forest, *Newmarket, Niagara, Orangeville, *Palmerston (D), *Parkhill, Port Credit, Preston, Tilbury, Waterford, Warton. Total 24.

(b) Alexandria (D), Alliston, Amherstburg, Arthur (D), Athens (D), Beamsville (D), Blenheim (D), Bowmanville, Brighton, Burford (D), Burlington, Caledonia, Cayuga, Chesterville (D), Dunnville (D), Elmira (D), Fergus, Fort Frances, Grimsby (D), Hagersville (D), Haileybury, Harrow (D), Iroquois, Kemptville (D), Kincardine (D), Kingsville (D), Lakefield, Leamington, Listowel (D), Lucan, Madoc, Markdale, Meaford (D), Midland, Milton (D), Mitchell (D), Morewood, Nepean, Newburgh, Newcastle, New Liskeard, Norwich (D), Norwood, Oakville (D), Petrolia (D), Port Elgin, Port Perry (D), Ridgetown (D), Saltfleet, Seaforth, Shelburne (D), Simcoe (D), Smithville, Stirling, (D), Streetsville, Sydenham (D), Trenton, Tweed (D), Uxbridge (D), Waterdown, Watford, Whitby (D), Williamstown, Winchester. Total 64.

Continuation Schools

(a) Ailsa Craig, *Ajax, Arkona, Bath, Bothwell, Burgessville, Chatsworth, Clifford, Eganville, Elgin, Grand Valley, Kars, Kinmount, *Millbrook, Milverton, Minesing, New Hamburg, Seeley's Bay, *Thedford, *Tottenham, *Wellington. Total 21.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Drayton (D), Drumbo, Florence, Fordwich, Ilderton, Inglewood, Lynden, Lyndhurst, Merrickville, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, Orono, Pelham (D), Port McNicoll, Princeton, St. George, Sparta, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley (D), Woodville. Total 35.

*Introduced Agriculture in September 1945.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1941.....	27	82	59	168
1943.....	26	78	49	153
1944.....	27	82	52	161
1945.....	26	88	56	170

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is part of the regular course and the subject is taken by all students. Some time is now being given to Science and Agriculture at the University of Ottawa Normal School. Students who have taken four years of Agriculture in an approved school during their Secondary School course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

Summer Courses

Permits to teach Agricultural Science were granted to 23 teachers of Science for the year 1945-46. The lack of teachers certificated in Agriculture has retarded the extension of Agricultural Science during the past five years. A number of teachers of Agricultural Science completed their standing at the Summer Course last year. Enrolment was Elementary I—7; Elementary II—5; Intermediate I—24; Intermediate II—21; Specialist—13; Farm Mechanics—15. It is expected that enrolment in Elementary Courses will be greatly increased in 1946.

NORMAN DAVIES,
Inspector of Agricultural Classes.

Toronto, August 1st, 1946.

AUXILIARY CLASSES

Teachers Returned From War Service

Since the close of World War II, some Auxiliary Teachers have been retained in the Personnel and Rehabilitation services while others have taken their discharge papers to resume civil life. The record of those who have returned is as follows:

- (a) Miss Jean Hampson who has for five years taught Occupational Therapy in the Astley-Ainslie Institute in Edinburgh, Scotland, has returned to her class in the Wellesley Orthopaedic School in Toronto.
- (b) Mr. George Charlton has accepted the post of Commissioner for the Boy Scouts Association of Waterloo County instead of resuming teaching the Handicraft Class in Victoria School, Kitchener.
- (c) Mr. Edgar Paquette after returning to the Opportunity Class in St. Louis de Gonzagues School, Sudbury, has been appointed Probation Officer to the Juvenile Court in Sudbury.
- (d) Messrs. C. Elliot and W. D. Royle have resumed teaching in the Church Street School for Boys after having served in the R.C.A.F.

Urban Organization

Auxiliary Classes are located in cities, towns and villages where there are sufficient numbers of academically and physically handicapped pupils to organize classes. It is estimated that any school unit of twelve classrooms will have enrolled a sufficient number of typical pupils to establish one opportunity class. In some of the smaller school administrative units the number of such pupils fluctuates from year to year and the class may be reduced to Partial Class status for periods of a year or more. Where the annual survey is conducted on the basis of the directions given in Circular A. C. 7 there is usually a waiting list of pupils who need educational guidance and remedial teaching in an opportunity or handicraft class.

Initial surveys of elementary schools are conducted in accordance with the instructions contained in the Regulations for Auxiliary Classes and at the written request of the school board concerned. In 1945 such surveys were conducted in Bronte, Dunnville, Listowel, Milton, Simcoe, Trenton and Weston.

As a result of these surveys and others conducted in previous years as well as the annual surveys made by local officials new classes were opened in September, 1945 as follows:

Handicraft Classes:	Guelph.....	1
	Kitchener.....	1
	Midland.....	1
	Toronto.....	4
	York Township.....	1
Home Instruction Classes:	Peterborough.....	1
Opportunity Classes:	Hamilton.....	1
	Kenora.....	1
	Kingston.....	1
	Kirkland Lake.....	1
	York Township.....	4
	Listowel.....	1

Speech Correction Classes:	Hamilton.....	1
	Ottawa.....	1
	St. Catharines.....	1
Sanatorium Classes:	Fort William.....	1
	Freeport.....	1

In the townships of York and East York, the annual survey is in charge of a teacher who holds a certificate in Auxiliary Education. Miss Bertha Hamilton has been appointed Supervisor of Speech Correction and Testing by the York Township Board of Education. Mr. C. C. Pitt, B.A., B.Paed. has been appointed Psychologist to the Board of Education for the Township of East York. Previously psychological services other than those which are given by teachers who are holders of Auxiliary Education certificates, had been provided only by the Kitchener, Ottawa and Toronto boards.

While it is an advantage to the teacher of the special class to have administered an intelligence examination to the pupils enrolled, the duty involves absence from her classroom. If the work of examining pupils requires one or two or more weeks of time of several teachers which is urgently required in the classroom, it also is evident that these duties can be combined to advantage and assigned to one teacher, who should be trained to administer all types of tests. Present indications are that other school boards will appoint psychologists.

The appointment of school psychologists should provide some relief from the tedious task of checking and filing thousands of intelligence test reports administered annually throughout the province of Ontario which is one of the duties of the Inspectors of Auxiliary Classes. These reports contain highly confidential basic information on individual pupils which should be available to local school officials. It is an established practice to have all test records filed locally where a suitable office is provided and they can be put under the special charge of a trained responsible official.

Rural Organization

Opportunity, Sight Saving, Speech Correction, Home Instruction and Transportation Units may be organized where the number of pupils is less than is required for a partial class. They are designed also to serve the multi-grade one-roomed school. These Auxiliary Education Units provide a type of individual instruction needed by one or more pupils who have failed to make normal progress in reading and arithmetic; or who have defective sight, speech or hearing; or who are home bound because of disease, accident or a crippling condition.

Application forms are secured from the Auxiliary Education Branch on which the necessary data on each individual child is recorded. Where the unit is organized to compensate for a physical defect, a medical certificate is required. In Opportunity Units set up to vary the programme of any pupil who is making slow academic progress, an inspector's report of intelligence and attainment tests is required.

Many Auxiliary Units (Opportunity, Sight Saving, Speech Correction, Home Instruction and Transportation) are set up as a result of investigations made by the resident inspector. The greater number are set up after a survey of the schools in an inspectorate, conducted by the Inspectors of Auxiliary Classes at the request and with the assistance of the public or separate school inspectors concerned.

In such a survey general retardation is indicated by the difference between the pupil's chronological age and the mean age for the grade as shown in the table given on Form A. C. 7. The teacher's report provides information on social, academic and physical development. Where a medical report or nurse's

report is available information on physical defects, physiological development and home conditions is given. Individual tests of intelligence and attainment tests in arithmetic and reading are administered privately to each pupil by the inspectors who also make notes on physical defects.

These data are organized and used to prepare advisements for the teacher in each individual case. The advisement suggests methods which should be more effective in teaching as well as materials of instruction which have not been associated with the pupil's previous failure. Copies of these advisements are sent to the teacher and to the inspector of the school. Checks on the success of these units show that approximately 65% of the pupils make definite progress; that 20% move out of the school area; and that 15% show little or no progress.

All the pupils in Auxiliary Units who show severe retardation cannot be classified as direct learners (I.Q. 50—75). A very large percentage are slow learners (I.Q. 75—90) and average learners (I.Q. 90—110). Approximately 95% of the pupils enrolled in classes and units, irrespective of their classification as to academic abilities are seriously retarded in reading. This is shown by their poor performance in oral and silent reading, by hold-over habits from the primary grades and the prevalence of errors in word recognition.

Retarded and backward pupils exhibit a greater number of physical handicaps than do those pupils who are successful in their school work. In carrying out school surveys of handicapped pupils selected by their teachers, one gets the impression that malnutrition, defective teeth, hearing and vision are a concomitant of low academic accomplishment.

The following table shows the surveys of rural areas conducted by Miss L. H. DeLaporte and me with the assistance of the sixteen inspectors concerned. Another group of approximately one hundred pupils were examined and reported by twenty other inspectors.

Inspectorate	Inspector	No. of Pupils
Bruce E., Grey (pt.), Huron (pt.)	J. M. Game	32
Halton	C. Howitt	57
Hastings South	R. H. Macklem	65
Huron South	R. O. Staples	22
Kent	G. A. Pearson	28

The Education of the Slow Learning Pupil

When the pupils are within two years of graduation from the elementary school, school administrators find that a small or large group of retarded pupils exists. This retardation amounts to two or more years or grade levels in reading, arithmetic and language. It is one of the concomitants of the grade organization of schools.

In a school where the grade organization cannot or will not be disturbed, a failing pupil must either repeat the grade for a year or be promoted to the

next grade without a proper foundation. His adaptability is probably greater at any age-level up to maturity than it is later, but he can only progress in those aspects of school work which are on his comprehension levels or on his attainment levels by subjects. The general result is further frustration and a wider gap between ability to comprehend and ability to perform.

Where the school is operated on a three-stream classification, the pupil will have the competition of his peers. Some adjustment of the curriculum to the needs of the pupil will be made except in promotion from one grade level to the next. The pupils with the higher academic abilities will tend to reach the top class and those with the least ability will gravitate to the bottom end of the slowest class.

The above-mentioned types of school organization do not provide for an individual pupil to progress at one rate in reading and a different rate in arithmetic which is a common manifestation of the individual differences among pupils. There is little provision for progress from one inter-grade level to another in sequence.

If the three-stream plan were varied to provide for a smaller number in each of the slowest groups and for different methods and teaching materials, it would be possible to provide for the pupil's individual rates of learning. The pupil's promotions could be made when he was ready instead of deferring it or accelerating it.

The Auxiliary Handicraft Classes were organized some years ago to provide this type of school training for pupils who require to be taught at a slower rate or who are in need of readjustment in one or more subjects. Over ten years ago the Toronto Board of Education opened a school to care for the educational needs of slow-learners as a group. This type of class did not develop further until 1942. In the past three years more attention has been given to the needs of the slow-learning pupil with the result that sixteen Handicraft Classes have been organized as "Catch-up Classes" in Kitchener, Toronto and St. Catharines.

From time to time, attempts had been made to organize "Catch-up Classes" for boys and girls who were retarded two to four years in one or more subjects. Classes varied from twenty-five to forty pupils. They were taught by a teacher whose whole experience had consisted in teaching large groups. In all cases very little and in most cases no special provision was made in school equipment. Such classes existed for a year or two and were discontinued.

The term "Handicraft Class" applies to classes of pupils 13 years of age or over taught by a specially certificated teacher in a classroom specially equipped with academic and craft learning materials. In these classrooms a study of each individual pupil is made so that the academic studies may be graduated to each pupil's achievement (or attainment) levels by subjects. New books and learning materials are required because it is vitally important that his learning tools be not associated with his previous failure. Work habits and some pre-vocational skills are developed by using hand tools and a few power tools.

Pupils who have been adjusted in these classes may be returned to a regular grade. Others graduate from elementary school and are absorbed into industry. Another group secure the minimum standard required for admission to vocational schools. A few delinquent boys have been benefited by training in these classes. A period of one, two or three years in a Handicraft Class appears to be very effective in adjusting slow-learning pupils both academically and socially.

The courses of study vary with the pupil personnel but in each case the topics are chosen from among those the pupil needs to know. The topics are

selected mainly from the Programmes of Study of either the elementary or secondary schools. If it appears advisable the teacher chooses topics from other sources.

It is found that the teacher with even a few weeks training in testing, individual differences, special methods and the pedagogy of the handicapped, is much more alert to the pupil's needs than the teacher with general training. Experience also shows that the services of highly capable, versatile, interested, zealous and faithful teachers is essential for this work if success is to be secured.

The appearance of over-age pupils in Grades 4, 5 and 6 is a fairly widespread condition. The surveys of elementary schools which include only the pupils judged by the teacher to be retarded show an unexpected selection from the superior, average, slow learning and direct learning groups. The pupils examined in the surveys conducted in the last three years vary in ability as follows:

Average or Superior Learners (I.Q. 90—125)	3 to 28%
Slow Learners (I.Q. 76—89).....	15 to 32%
Direct Learners (I.Q. 50—75).....	40 to 60%

It should be noted that these percentages relate to the number of pupils examined in surveys and are not percentages of the general school population.

The above data are submitted to show that the general ability levels of failing pupils is not necessarily very low, contrary to the opinions of many teachers.

The common difficulty noted among the pupils examined in surveys is inability to read successfully in the grade reader. Usually these pupils can read fluently in a reader of a grade two or more levels below. This is particularly true if the reader selected is one in which the vocabulary content and word repetitions are planned and carefully rationed page by page.

The importance of this group is stressed by Professor Burt, writing in 1937 in "The Backward Child", who says "Backward children (Burt's term for slow-learners) are seven times as numerous as the mentally defective (direct learners). Since no systematic provision has been made for them in English classes or schools they remain by far the most difficult group with whom the teacher has to deal; and as their subsequent life histories show, it is from their ranks, rather than from those of the mentally defective, that the bulk of our criminals, paupers and ne'er-do-wells are eventually drawn". (page 58.)

The evidence available on the slow-learning group in Ontario is a mixture of opinions and facts which may be summed up as follows:

- (1) Surveys of a relatively few schools indicate that the numbers of slow-learners constitute a serious educational problem;
- (2) Classes of slow-learners taught by a competent and suitably trained teacher can be effective if they are adequately equipped;
- (3) Juvenile court officers have stated that the delinquency rate has dropped after the opening of a special school;
- (4) Surveys of the destination of graduates indicate that few of the graduates of special classes are inmates of corrective institutions (See page 47 Report of the Minister of Education for 1942);
- (5) Criminal statistics indicate that a large percentage of the inmates of corrective institutions are slow-learners.

Rehabilitation Services in Sanatorium Schools

Sanatorium Schools were established by a change in the Regulations for Auxiliary Classes in the year 1939 which permitted the organization of schools to provide secondary, commercial and New Canadian types of education to patients sixteen years of age or over. Previously Hospital Classes for elementary school children had been maintained by urban boards of education but the enrolment had decreased due to a change in the policy of hospitalizing tuberculous patients.

In the five-year period preceding 1939 under the sponsorship of charitable organizations, adult education had been developed in Sanatoria and had achieved recognition as a therapeutic aid. The Sanatorium School registration had increased to the point where the financial load was too much for the resources of the voluntary association concerned.

Along with the establishment of Sanatorium Schools as institutions earning elementary school grants came the problem of organizing a school to provide:

- (i) Subjects leading to High School Entrance;
- (ii) Subjects in all Secondary School Courses;
- (iii) Commercial subjects;
- (iv) Vocational Courses such as Radiotelegraphy and Watch Repairing;
- (v) Courses in Canadian citizenship.

The teaching staffs at Mountain, Muskoka, Queen Alexandra and Toronto Sanatoria were recruited almost exclusively from among the patients who had recovered from tuberculosis. Many of them, but not all, were holders of certificates valid in Ontario schools. Instruction was usually given at the patient's bedside. On rare occasions a number of ambulant patients could be grouped for vocational or practical training.

The purpose of instruction in a Sanatorium School is to provide:

- (i) educational therapy to interest the patient after the period of despondency has passed;
- (ii) maintenance of skills such as typing and shorthand;
- (iii) continuance of courses which were interrupted by the onset of the disease;
- (iv) training which would enable the patient to change his occupation from one where there would be the hazard of developing tuberculosis again to another where these chances would be lessened.

The results of the establishment of the Sanatorium Classes may be measured by the facts mentioned below:

- (i) Mountain Sanatorium in a two-year period reported 35 men discharged and employed as radio mechanics after training in the school;
- (ii) Queen Alexandra Sanatorium reports that annually ten ex-patients secure positions as stenographers and book-keepers. Part-time employment on the staff is an effective method of hardening the patient before he attempts to compete with persons who have not had the disease.
- (iii) Muskoka Sanatorium reports the rehabilitation of patients through instruction in book-keeping, clerical work, watch repairing, journalism and printing. The British Columbia Correspondence School permits the patients to enroll in their courses in journalism and book-keeping.

In these first six years the needs of the Sanatorium School were shown to be:

- (i) a more intense study of the abilities of each individual patient prior to admission to a course of study;
- (ii) a more accurate appraisal of the patient's academic and vocational capacities;
- (iii) a wider choice of school subjects;
- (iv) vocational guidance or planned rehabilitation training;
- (v) teachers specially trained in Sanatorium School methods.

Suitable records are being kept. Commercial and manual dexterity tests are in use. Intelligence data on the basis of individual and group tests are being used. Patients who possess technical training are instructing others. The programme of studies is being enlarged by the enrolment of patients in correspondence school courses. In two sanatoria, the principals carry on post-discharge training by correspondence. A portion of the time of each teacher is given to veterans of World War II who are enrolled in D. V. A. Courses.

The re-admission of patients who have been discharged one or more times from Sanatoria is one of the problems which the Sanatorium School training is expected to reduce. Financially it means the saving of about \$1,000 a year for hospitalization. Economically, it would mean the value of a person's service to industry or commerce for the period of hospitalization and six months to a year in addition. Socially, it would mean a great saving in the maintenance of the home and the evils which follow its disruption.

The importance of planning rehabilitation has been recognized by all the trustees of Sanatorium Schools. The Queen Alexandra Sanatorium School Board (Byron, Ontario) has taken an important step in appointing Mr. Brenton Hellyar, a member of the teaching staff to the position of Rehabilitation Officer. Mr. Hellyar trained in a five-month course given by the American Tuberculosis Association.

Sight Saving Books

Junior Arithmetic (Grade 3) and Junior Arithmetic (Grade 4) were magnatyped by a photographic process with the permission of the publishers, the W. J. Gage Co. The Department of Education can now provide free of charge to all who need them any of the authorized text books for elementary school mathematics or spelling.

The ownership of copyrights has prevented production of magnatyped editions of the authorized readers, except those for Grades 7 and 8. Some parts of the readers for Grades 3 to 6 inclusive have been multigraphed because they are out of copyright but the result is unsatisfactory since the sight saving edition does not parallel the regular edition. The question of expense has held up the production of a large type edition of the Grade 2 reader.

Supplies of magnatyped books which can be substituted for those used in Ontario have been secured through The Clear Type Publishing Committee, Upper Montclair, New Jersey, but their supply of available titles is being rapidly reduced. Stanwix House, Pittsburgh, has been organized to prepare magnatyped editions as a commercial venture. The first issue will be the Winston Dictionary which should appear in September, 1946 for sale at \$38.00 per copy.

In 1945 the demand for magnatyped books at the high school level became imperative. Negotiations for permission to magnatype copies of secondary school text-books are under way and are meeting the usual hazards of publisher's consent and availability of materials.

It is becoming a policy to have a clause inserted in all contracts for textbooks which will give the Department of Education permission to magnatype five hundred copies without further negotiation with the company concerned. Provision is made in the budget for the expenditure of \$2,000 per annum on sight saving books.

When textbooks begin to come under the new contract form it will be possible to plan the production of sight saving editions of all authorized texts. The supply of books for the child with seriously defective eyesight cannot begin to meet the need until copyright restrictions are removed.

Audiometric Testing

Screening surveys of hearing are reported from Kitchener, Brantford and the Township of North York. The survey in Kitchener has been carried out by the Speech Correctionist, a teacher employed by the Board of Education. In Brantford a large group of pupils has been screened by officials of the newly organized Health Unit. In North York the survey was completely organized by the medical and nursing staff.

The experience in the surveys of Windsor and York Township Public Schools was duplicated. Pupils were located with hearing loss which had previously been unsuspected. Medical examinations of pupils located in the survey confirmed the results. In some cases the accumulation of wax interfered with hearing. In a few instances deafness in one ear was located resulting in a change of seating arrangements to allow him the maximum benefit and use of his good ear.

The experience with audiometric testing has shown in another field the benefits which accrue from the survey. The whole school population is screened and all doubtful cases are given a second and even a third trial before being recommended for medical attention or special instruction. The results in Ontario schools parallel very closely the results obtained from surveys conducted last year in schools in the province of Quebec.

Teacher Education

The supply of trained teachers for teaching posts in Auxiliary Education was exhausted early in World War II. Approximately one-quarter of the staff were untrained teachers with temporary certificates when the war ended. The sharp increase in the demand for speech-correction teachers was met temporarily by accepting training in United States Teacher Training Schools and by enrolling teachers in a Reading Course organized and administered by the Auxiliary Education Branch.

It is expected that the demand for teachers of Speech Correction and Lip Reading will increase and that the training courses will have to be lengthened and expanded. This could be done by providing instruction leading to elementary, intermediate and specialist's certificates.

In 1945 the Summer Courses in Auxiliary Education were resumed with a resultant sharp reduction in the enrolment in the Teachers' Reading Course. One hundred and twenty-seven teachers were enrolled in five separate though partially articulated courses as follows:

- Course I For teachers of Opportunity and Handicraft Classes.
- II For teachers of Speech Correction and Lip-reading Classes.
- III For teachers of Sight-saving Classes.

IV For teachers who have not the required experience to enter Course I.

V Refresher Course for holders of Auxiliary Education Certificates.

The certification of this group of teachers has eased the teacher supply problem but has not materially reduced the number of teachers holding temporary certificates. It should be noted that teachers from Bermuda, New Brunswick and the Protestant Schools in Montreal attended the 1945 summer courses.

The International Council for Exceptional Children resumed its programme of annual meetings by holding a convention in March. More than sixty special class teachers from Ontario were in attendance out of a total registration of 1256. Dr. Florence S. Dunlop, Psychologist to the Ottawa Public School Board was elected president of this organization. Plans are under way to hold the next convention in Ottawa.

The usual lectures on the education of academically and physically handicapped pupils were given in each of the Normal Schools.

C. E. STOTHERS,
Inspector of Auxiliary Classes.

Toronto, July 15th, 1946.

Statistical data relative to this report may be found on pp. 140-144.

SCHOOL ATTENDANCE

The compulsory school attendance age in Ontario is from eight to sixteen years, except in rural communities under certain conditions. If the help of a pupil fourteen years of age is required on the home farm for his own maintenance or the maintenance of some one dependent upon him, he may lawfully leave school at that age and no home permit is necessary. During the past few years because of the scarcity of help many pupils were withdrawn from school when this age was reached. Many drop out, too, after passing the Entrance examination if there are no nearby facilities for secondary education. It is true that a Grade IX class may be established but in many cases the school is crowded, there is little or no equipment provided, and often the teacher is not qualified or not anxious to have such a class started in the school. Under these conditions it is evident that the school life of many pupils in rural communities will cease at the age of fourteen.

Table No. 1—Enrolment

	1942-43	1943-44	1944-45	Increase or Decrease
Public Schools	425,335	433,494	434,425	931 I
Separate Schools	102,182	99,361	104,285	4,924 I
High Schools and Collegiate Institutes	67,563	66,041	73,866	7,825 I
Continuation Schools	9,115	8,471	8,997	526 I
Vocational and Special Industrial Schools—				
Day Classes	31,801	31,433	29,405	2,028 D
Night Classes	28,641	29,546	33,109	3,563 I
	664,637	668,346	684,087	15,741 I

From the above table it will be seen there has been a gradual increase in the total enrolment in the past few years. In the elementary system the Public Schools in 1943-1944 had an increase of 8,159 and the Separate Schools a decrease of 2,821. In 1944-1945 the figures are pretty much reversed; the Separate Schools show an increased enrolment of 4,924 and the Public Schools of only 931. In the Secondary Schools there is an over-all increase of 9,886.

Table No. 2—Schools and Teachers

	1943-44		1944-45	
	No. of Schools	No. of Teachers	No. of Schools	No. of Teachers
Public	6,540	14,544	6,603	14,754
Separate	900	3,158	907	3,225
Totals	7,440	17,702	7,510	17,979

During the year 1944-45 there was an increase of 70 in the elementary schools and an increase of 277 in the number of teachers, in spite of the fact that,

due to the small enrolment, many schools were closed and the children transported to other schools. This was advantageous in two ways: the children received training in better equipped schools and extra teachers were released to help overcome the shortage.

Table No. 3—Percentage Attendance

Class of School	1940-41	1941-42	1942-43	1943-44	1944-45

Table No. 8—Absence in Elementary Schools

Days Lost Through	1944-45	Percentage Loss			
		1941-42	1942-43	1943-44	1944-45
Illness.....	5,159,878	63.15	61.28	67.64	57.71
Home help.....	879,668½	11.54	10.16	10.09	9.84
Parental neglect.....	747,031	7.95	7.41	7.22	8.36
Physical obstacles.....	501,932	4.00	6.14	1.50	5.61
Truancy.....	36,085½	.45	.39	.43	.40
Privation.....	21,386½	.52	.31	.28	.24
Irregular closing.....	1,164,365	6.85	9.81	8.11	13.02
Other reasons.....	430,551½	5.54	4.56	4.73	4.82
Total Days Lost.....		8,338,886	9,961,625	9,304,145	8,940,898
The above losses are classified:					
Lawful.....		6,111,368	7,442,875	7,258,305	6,640,668
Unlawful.....		2,227,518	2,518,750	2,045,840	2,300,230
Percentage Attendance.....		91.7	89.9	90.8	91.0

An analysis of the above table reveals some interesting facts. The year 1944-45 was a healthy year among the school population, the percentage loss dropping to 57.71, the lowest in years. The losses for home help—still too high—are gradually on the wane. With the return of the army personnel and many who worked in the factories during the war, the scarcity of help will decrease and this percentage should drop. Many parents, far too many, are still negligent and the loss due to this factor has increased during the year just past. Parents, through their neglect, accounted for a loss of 747,031 days. Truancy is low—.40 of one percent. Loss due to privation has decreased yearly since the depression and now stands at .24 of one percent. As the Family Allowances Act has recently been put into force, this loss will be still lower in the future. The loss due to irregular closing is the highest in years. 1944-45 will go down in history as the year of much snow and many storms which caused the temporary closing of many schools. Then, too, the illness of teachers—there are no available substitutes—and closing for other unavoidable reasons brought losses to the peak of 13.02%. Individual losses due to stormy weather, blocked roads and distance are shown under physical obstacles.

In spite of the losses the percentage attendance for all elementary schools is good—91.03.

Table No. 9—Summary of Attendance Officers' Reports

	1941	1942	1943	1944
School Children's Employment Certificates issued.....	1,318	1,382	1,043	1,157
Home Permits issued.....	1,885	2,717	2,053	1,874
Employment Certificates issued.....	4,871	12,792	12,544	11,911
Cases brought before magistrates.....	614	820	1,113	1,085

The above reports are for calendar years.

In analyzing the above table it should be kept in mind that the total number of certificates issued does not mean that that number of pupils left school. School children's employment certificates are all for short periods—not more than six weeks in a term. Home permits, too, are usually for short periods. As an employment certificate is required for each change in employment, there are, naturally, many duplicates in the above total.

Table No. 10—Secondary Schools

Schools	No. of Schools	No. of Teachers	Enrolment		Percentage Attendance	
			1943-44	1944-45	1943- 44	1944- 45
High Schools and Collegiate Institutes	235	2,856	66,044	73,866	93.6	94
Continuation Schools	506	506	8,471	8,997	90.8	91
Vocational and Special In- dustrial schools	66	1,681			92.3	93
Day			31,433	29,405		
Night			29,546	33,109		
			60,979	62,514		
Totals	497	5,043	135,494	145,377		

The total over-all increase in the enrolment of Secondary Schools is 9,886, only the day classes in the Vocational Schools showing a decrease. There is an increase of 6 in the number of schools and an increase of 127 in the teaching staff. The percentage attendance in the Secondary Schools for 1944-45 was 93.

R. D. KEEFE,
Director of School Attendance.

Toronto, May 2nd, 1946.

THE SCHOOL FOR THE DEAF

I have the honour to submit the report of the Ontario School for the Deaf for the year 1945-46.

Attendance

Enrolment by months:—

	Boys	Girls	Total
April, 1945.....	118	138	256
May.....	118	138	256
June.....	118	138	256
September.....	128	138	266
October.....	130	140	270
November.....	130	140	270
December.....	131	141	272
January, 1946.....	130	139	269
February.....	131	139	270
March.....	131	139	270

Average enrolment for year—265

Sixteen pupils left school during the year, their ages at time of leaving school being:—

17 years.....	1 pupil
16 years.....	5 pupils
13 years.....	3 pupils
12 years.....	4 pupils
11 years.....	1 pupil
8 years.....	2 pupils

Of the ten pupils under sixteen years of age who left school eight are attending other schools.

Age of Admission

Thirty new pupils were admitted, their ages on date of admission being:—

4 years.....	3 pupils
5 years.....	10 pupils
6 years.....	3 pupils
7 years.....	4 pupils
8 years.....	3 pupils
9 years.....	4 pupils
11 years.....	1 pupil
12 years.....	1 pupil
14 years.....	1 pupil

Two of the pupils over 9 years of age had been attending other schools.

Age of Onset of Deafness

Two American schools for the deaf have recently reported the following figures:

	School A	School B
Congenitally deaf	46.2%	60.1%
Before age 3 (counting the 46.2%)	91.6%	90.8%
Before age 5 (counting the 91.6%)	96.9%	96.4%
After age 6	3.1%	4.0%
Hard of hearing	7.5%	8.6%

Comparable figures for The Ontario School for the Deaf in 1945-46 are:

Congenitally deaf	56%
Before age 3 (counting the 56%)	95%
Before age 5 (counting the 95%)	97%
After age 6	3%
Hard of hearing	2%

The above figures are very significant. Those who become deaf after 6 years of age, i.e. after they have acquired the use of the English language, are few in number compared with those who enter school with no language, having been born deaf or having lost their hearing before they learned to talk.

The former group, small in number, tend to think of themselves in later life as the normal deaf, which they are not. One of our pupils, F.C., became deaf at 7 years of age from spinal meningitis and is totally deaf for speech, having only 4% of hearing. As she lived in a remote part of Northern Ontario she obtained some education before and after she became deaf from correspondence courses, conducted by the Ontario Department of Education. Notwithstanding her limited opportunities to receive formal education, before entering this school two years ago at 9 years of age she had read such books as *Pilgrim's Progress*, *The Talisman*, *Oliver Twist*, *The Old Curiosity Shop*, and *Lorna Doone*. Her language is excellent and will improve.

If F.C. is compared with a child who was born deaf, the contrast is startling. Miss Catherine Ford, Directress of Professional Training in this school presented a paper on the education of the deaf to a section of the Ontario Educational Association from which the following excerpt is taken:

"What does it mean to be congenitally deaf? The most significant effect of deafness is the limitation that it imposes on language experience. The congenitally deaf child usually enters school without knowing a single word of the language that has been spoken in his presence from birth or that he has a name. Not a single word. The deaf child on entering school has no words."

If it is kept in mind that 95% of deaf children in a school for the deaf belong educationally to the group described by Miss Ford and not more than 3% belong to the group represented by our pupil F.C. a clearer understanding of our educational problems will be gained.

Gymnasium

The drill-hall built for the use of No. 5 I.T.S. of the R.C.A.F. during their occupancy of our buildings now serves as a gymnasium for our boys and girls. During 1945-46 it has been used continuously for such games as volley-ball and basket-ball. A girls' team was entered in the C.O.S.S.A. basket-ball series and although our deaf girls did not win any games they demonstrated in competition

with school teams from Belleville, Picton, Trenton and Albert College that deafness is only a minor handicap in this field of sport. Their teacher, Miss E. Leverance and the girls who composed the team are to be commended for their fine showing. Of course, in addition to the C.O.S.S.A. series inter-school games were played.

The gymnasium was used by the boys mainly under the direction of the boys' supervisor as we were without an instructor until Major J. A. Rickaby was released from the Army in March. Next September we expect to be able to inaugurate a complete programme of sports and recreational activities for both boys and girls.

The Canadian

Most schools for the deaf include printing as one of the trades taught to the senior boys. It is not only useful as a trade but the intensive work required has great educative value in the learning of English. For practice in printing as well as for motivation, school papers are published and for these reasons early in its history the Ontario School for the Deaf began the publication of THE CANADIAN which was continued for forty-eight years until the print-shop was closed in 1941 on account of the war. In December 1945 publication was resumed and in future the paper will appear at least eight times during the school year.

The Royal Commission on Education

At the request of The Royal Commission on Education, under the chairmanship of Mr. Justice J. A. Hope, on October 22nd, 1945, I presented a brief on the education of the deaf and submitted several recommendations. This brief was printed in full in the January, 1946, number of THE CANADIAN.

Dr. H. E. Amoss, Director of Professional Training also submitted a brief, which was published in full in the March, 1946, number of THE CANADIAN.

Staff

During the war years several married women, experienced in teaching the deaf, joined our teaching staff. In June, 1945, they resigned making necessary the appointment of several new teachers: Misses Brethour, Cook, Dillon, Evans, Hunt, Leverance and Mr. Cummings. Two former teachers, Messrs. Cunningham and Holmes, who had been teaching day classes returned to our staff and Lieutenant Morrison, Sergeant Hodgson, Captain Vaughan and Major Rickaby, former teachers were released from the Army to resume their teaching duties. These additions to our staff have made possible better organization and greater efficiency.

In November the position of matron, which had been vacant for some time was filled by the appointment of Mrs. Mary L. Quinn. This position includes the work of dietitian, and Mrs. Quinn has been very successful notwithstanding the scarcity of many standard foods.

New Regulations

Two new regulations governing the School became effective September 1st, 1945. The one in effect since 1870 requiring payment of \$50.00 per annum for each child to help defray the cost of food and sustenance was rescinded, thus placing deaf children on the same basis as blind children regarding cost of education. Parents will continue to pay for clothing, transportation and incidental expenses.

The second regulation reduced the age of admission from five years to four years for normal deaf children.

These changes are appreciated very greatly by parents and guardians.

New Equipment

During the year motion pictures have been shown on several occasions in both classroom and assembly room, projectors having been borrowed for the purpose. A new projector has been ordered and it is planned to extend the educational use of motion pictures next year.

Our former household economics room was dismantled by the R.C.A.F. To replace it a much larger room with modern equipment for the teaching of cooking is being installed. The room will also be furnished with living room and dining room furniture, making possible the teaching of a complete homemaking course. Owing to the difficulty in getting delivery of furniture, stoves, kitchen utensils and other articles it is unlikely that the room will be ready for use before September.

The school laundry also had been dismantled by the air-force, making necessary new installations and purchase of new equipment. This work was completed during the year providing all necessary facilities not only for doing the laundry of residences and children's clothing but making possible necessary training for the older girls on an educational basis under the direction of Mr. Cunningham, who is in charge of vocational training and under the supervision of Mrs. Mullins, head laundress.

Costs

The education of deaf children is expensive for several reasons. Instruction has to be individual, a teacher having a class of from ten to twelve pupils. As there are so few deaf children they must leave their homes and be maintained in a residential school, where they are provided with food, supervision, medical and dental care, etc. Advances in knowledge of nutrition require that they be given wholesome food properly prepared and served. Notwithstanding these requirements the Ontario School for the Deaf has been maintained at a cost per pupil much below that of similar schools in the United States.

I am pleased to refer to increases in salaries paid to teachers and other employees in recent years. Owing to the special training required of our teachers and the high qualifications demanded it is important that changes in staff should be few. Consequently it is necessary that salaries be maintained on a basis somewhat higher than those paid in public schools requiring equal qualifications. As our teachers have qualifications enabling them to accept positions in public schools the temptation to leave our staff for higher salaries is very great. I appreciate the fact that many faithful and efficient teachers have continued to teach these deaf children although they might have accepted other positions at greater remuneration.

New Positions

When Messrs. F. P. Cunningham and C. A. Holmes returned to the Ontario School for the Deaf in September from Hamilton and London respectively they received promotions which entail greater responsibility. Mr. Cunningham was given the class title of Guidance Officer and Mr. Holmes that of Assistant to the Superintendent. The former has responsibility for supervising the work of the

vocational teachers and the latter the work of academic teachers in the intermediate and senior departments. In addition each has charge of classroom work, and assists in the special religious education of the children.

Mr. Cunningham attended the Ottawa Normal School, after completing his secondary education in Arnprior. After teaching in schools on Manitoulin Island he joined the staff of the O.S.D. in 1929. He obtained his B.A. degree from Queen's University in 1936, and has a High School Assistant's certificate.

Mr. Holmes also attended the Ottawa Normal School after completing his secondary education in Spencerville and Kemptville. After teaching in Grenville County and Nobel he was appointed to the staff of the O.S.D. in 1932. He obtained his B.A. degree from the University of Western Ontario in 1946.

Medical Report for the School Year 1945-46

From April 1, 1945—March 31, 1946 there were 210 admissions to hospital.

All new pupils not immunized against smallpox, scarlet fever, diphtheria and whooping cough were vaccinated or given the necessary toxoids.

All pupils were X-rayed at the Provincial Chest Clinic.

One fracture of the arm.

One very severe case of pneumonia.

We have been fortunate in having had very little illness during the above mentioned period.

R. W. TENNANT,
Physician.

Staff Changes

During the summer vacation the Musical Director, Mr. Frederic Lord, died suddenly at his summer home. Mr. Lord had been a valued member of the staff for twenty-one years, during which time he proved himself to be a highly efficient and skilful Musical Director.

Miss Susan Miller, who had sole charge of the Musical Theory Department, resigned from the staff on September 1st, 1945. She, too, had given long service to the Ontario School for the Blind. Miss Miller is now with the Canadian National Institute for the Blind in Toronto where she is teaching the Canadian war-blinded service men.

On November 6, 1946, Mr. George Smale, formerly Supervisor of Music in the Brantford Schools, was appointed Musical Director. He brings to his work not only a rich and varied experience, but a kindly enthusiasm which augurs well for his work in the School.

Miss Eleanor Edmondson was appointed to the music staff of the Ontario School for the Blind on January 1, 1946. As the successor to Miss Miller, she will devote her entire time to the teaching of music.

Extra-curricular Activities

Under the inspiration and leadership of Miss Laura Behrus, Instructress in Physical Training, an evening's ice skating carnival was staged during the year. In this most successful endeavour, the members of the Brantford Skating Club gave splendid co-operation and assistance.

An "English Box" project was undertaken by the Dramatic Art Department under the direction of Miss Vera Kellett. The presentation of a Christmas play resulted in the collection of over \$100.00 which was sent to aid the war-blinded children of Great Britain. With the co-operation of other clubs and class groups, supplies to the value of more than \$300.00 were shipped to the School for the Blind at Bristol, England.

On June 4, the piano pupils of Miss Zella Perry gave a full evening programme in aid of the Restoration of British Organs Fund. The collection donated by the patrons of this concert was \$46.60.

Student Awards

The Character Cups for senior boys and girls were won this year by Betty Macmillan of Toronto, and Ronald Adams of Forest, Ontario. The Ethel Charlton Memorial Prize in the amount of \$45.00 was won by Gloria Mortimer of Toronto.

The Rotary Club Scholarship winners are as follows:

Dr. C. D. Chapin Memorial Scholarship—General Proficiency, Grade 8	
Norman Coombs, Hamilton, Ontario.....	\$5.00
Allen E. Cuthbertson Memorial Scholarship—General Proficiency, Grade 9	
Claude Chatelain, Plantagenet, Ontario.....	\$5.00
Ft. Lt. Ian Dowling Memorial Scholarship—General Proficiency, Grade 10	
Kenneth Holmes, Toronto, Ontario	\$10.00
Lt. Charles Waterous Memorial Scholarship—General Proficiency, Grade 11	
Marjorie Fulton, Portage la Prairie, Manitoba.....	\$10.00
Thomas Makusker Memorial Scholarship—Best Student Dept. of English, Grade 11 and 12	
Elwood Greenfield, Donovan, Saskatchewan.....	\$10.00
Theodore R. Hamilton Memorial Scholarship—Student who has made the greatest progress in music during the year	
Ronald Adams, Forest, Ontario.....	\$10.00

Report of Ophthalmologist

The following annual report presenting the result of the ocular examinations of the pupils at the Ontario School for the Blind includes, in addition to the twenty-four new pupils and re-entrants, a careful examination of all the pupils attending the school.

The following chart portrays the degree of sight found in new pupils:

Amount of sight	Count fingers both eyes	Limited sight one or both eyes	Limited sight one blind eye	Blind in both eyes	No.
Girls.....	2	3	1	1	7
Boys.....	6	3	2	6	17
Totals.....	8	6	3	7	24

Analysis of the chart shows that for the most part the degree of visual impairment found in these pupils compares favourably with that of former classes. The only noticeable difference is that in a group of twenty-four pupils, seven were totally blind in both eyes. This is a much higher percentage than normal.

Diseases Causing Blindness

Eye disease	Congenital cataract	Other congenital: Lesion, Retinitis Nystagmus, Optic Atrophy, etc.	Myopia	Keratitis	Uveitis and Sym. Ophthalmia	Total
Girls.....	2	4	1	7
Boys.....	2	6	1	1	7	17
Totals...	4	10	1	1	8	24

This chart classifies the number and variety of eye lesions producing blindness in this year's class. Examination of the chart reveals a new "culprit" as the major cause of blindness; formerly the congenital cataract was the highest single contributor, whereas now the lead is taken by another group of congenital cases such as Nystagmus, Retinitis, Atrophy, Aniridia, etc. This class produces ten out of a total of twenty-four cases, compared with four for congenital cataract. This is almost a reversal of position from that met in former examinations.

Running a close second to these congenital cases, injury and infection of the uveal tract is found to be the next largest factor causing blindness. This group provides seven cases, and peculiarly, they are all found in the boys' class. Only two of these were traumatic and developed subsequent sympathetic ophthalmia.

Myopia and keratitis, which in years past have always supplied their full quota, have fallen far behind this year, and provide only two cases.

A careful examination was made of all the other pupils of the school, and it was pleasing to note marked improvement had occurred in the eyes of many. The general health of all the pupils appeared better and this, no doubt, contributed much to the improvement.

Suggestions and advice were given to many pupils regarding the use and care of their eyes. A few needed some eye treatment. With others, it was necessary to make some refractive change. This work has been beneficial to the pupils, and it has been very gratifying to have been of service.

NORMAN W. BRAGG, M.D., F.A.C.S.

Medical Report

SUMMARY OF HOSPITALIZATION

Total Number of Patients..... 106

Total Number of Hospital Days..... 751

Communicable Diseases (60)

Impetigo.....	4
Measles.....	23
Chicken Pox.....	27
Infectious Hepatitis.....	3
Scabies.....	3

Accident Cases (5)

Fractured Wrist.....	1
Fractured Finger.....	1
Sprained Ankle.....	2
Lacerations.....	1

Miscellaneous (41)

Acute Pharyngitis.....	12
Coryza.....	10
Diphtheria Carriers.....	3
Post-tonsillectomy.....	3
Epilepsy.....	2
Eczema.....	3
Observation.....	5
Other Cases.....	3

There were no seriously ill patients or deaths during the term. The hospital bed occupancy was not large, excluding the admission for chicken pox, measles, and the period of isolation for the diphtheria carriers. Four cases required surgery; three of these were tonsillectomies, and the fourth enucleation of an eye following spontaneous rupture of the cornea. The surgery was performed at the Brantford General Hospital and the patients convalesced in the hospital at the Ontario School for the Blind.

In the late fall months, three diphtheria carriers were detected. These cases were admitted to hospital with acute tonsillitis, and routine throat swabs revealed a virulent diphtheria bacillus. None of these cases suffered from clinical diphtheria. It is interesting to note that they had all been given toxoid and had been previously immunized against diphtheria. Various measures were attempted to clear the throat culture without success. As all three boys suffered from chronically enlarged and infected tonsils, tonsillectomies were performed. Shortly following this procedure, the nose and throat culture in all three cases became negative, and the boys were released from quarantine. It was felt that a diphtheria epidemic was prevented in the school only by the fact that the immunization programme was effective.

The annual physical re-checks were carried out as usual, and new pupils were given a complete medical examination. The immunization programme was instituted on new-comers and brought up to date on older pupils by "booster" doses. Generally speaking, the pupils are in good physical condition. The health of a small group will be considerably improved by tonsillectomies. The parents in these cases have been advised that their children are suffering from diseased tonsils, and it is hoped that they will return in the fall with healthy throats.

Miss Anna Cook, the school nurse, handled the medical welfare of her charges with skill and efficiency. The pupils were assured of a sympathetic ear in times of illness, by reporting their troubles to her, and she always had time to lend aid cheerfully and to make the children feel at home.

J. A. MARQUIS, M.D.

Dental Report

One hundred and sixty pupils were examined and fifty-seven required only minor prophylactic treatment. The summary of work completed is as follows:

Boys	Girls
Fillings inserted 167	Fillings inserted 105
Requiring no filling 33	Requiring no filling 24
Requiring only one filling 19	Requiring only one filling 16
Extractions permanent 9	Extractions permanent 2
Extractions deciduous 25	Extractions deciduous 11

The small number of permanent teeth extracted is worthy of note.

J. R. WILL,
Dentist.

G. H. RYERSON,
Bursar.

In concluding this report, grateful acknowledgment is made of the loyalty and devotion of the teaching staff, and the faithfulness of the help staff.

I have the honour to be, your obedient servant,

H. J. VALLENTYNE
Superintendent.

PUBLIC LIBRARIES

I beg to submit herewith the statistical tables dealing with the operations of public libraries during the year 1944. These tables also show the legislative grants paid to the libraries in 1945 and give certain figures concerned with the Department of Education Travelling Libraries during that year.

While some progress has been made by a number of public libraries, the development of book service for the province as a whole has in no way kept pace with the urgent need of the day. Book service is clearly basic to all education, whether it be of the formal type as provided in schools and universities, or whether it be in the equally important,—or perhaps more important,—field of adult education. To assume, merely from the fact that we list five hundred libraries, that our educational system is backed by adequate book resources, in good selection and in a satisfactory system of distribution, would be a grave error.

The truth is that our libraries as a whole are too weak to carry the burden imposed upon them. Almost all are in too depressed a state, financially, to provide sufficient book stocks or to organize and distribute their material to the best advantage. Too few professionally qualified librarians are employed and these are, for the most part, paid salaries which are absurdly low in comparison with those received by teachers with equal qualification. Nearly all the buildings in which public libraries are housed,—some city buildings excepted,—are relics of a bygone age, ill-lighted, ill-ventilated, unsanitary. They are little better than museum pieces and are totally unsuited to the carrying on of this essential service under modern conditions.

During 1944 nine additional free public libraries were established and five association libraries which had become inactive were struck off the register. There are now 242 free libraries in the province, 255 association libraries and 10 county library associations or co-operatives. From these centres 712,000 borrowers used 13,500,000 books. It is noted that the use of books, which dropped sharply with the outbreak of war, is again on the increase. But of greater significance is the fact that almost all sources report a marked improvement in the quality of the reading done, an improvement which is probably due in large measure to the urge which people are feeling toward enlightenment in a troubled world, and which is certainly stimulated by the activities of the various agencies for adult education, including the libraries themselves.

Book stocks, which have been increased by about 100,000 volumes during the year, now stand at 3,700,000, or about one book per capita, which is one-third of the number required. In addition, it is observed that the great strength in book stocks is concentrated in the larger centres. In the smaller towns, villages and rural areas, the stocks are generally weak both as to quantity and quality. Only in the ten counties in which library co-operatives have been organized is there any marked improvement in this condition.

Expenditures of public libraries show an increase of \$123,000.00, of which \$33,000.00 was applied to book purchase and \$90,000.00 was absorbed in the general costs of administration. Total expenditure now amounts to \$1,700,000.00. At the same time legislative grants to libraries were increased by \$3,600.00 to a total of \$51,000.00, or 3% of all the money spent on the service.

The work of the Department of Education Travelling Libraries continues to expand under a steadily increasing demand from rural areas and the northern districts, although the crowded conditions under which this service operates presents a serious problem in administration.

Inspector of Public Libraries.

Toronto, Sept. 16, 1946.

Other statistical data relative to this report may be found on pp. 252-260.

PUBLIC RECORDS AND ARCHIVES

With the war over, many post-graduate students have resumed their interrupted studies and others are starting their theses; the interest of the public in local history and genealogy continues; along these and many other lines of study much information has been furnished by this Department, some given personally, a great deal sent by mail.

The calendaring and indexing of the Sir Alexander Campbell Papers (1855-1892) were completed during the year, making this valuable collection of private papers available to the public. Already they have been consulted by several researchers.

Our large group of maps, estimated at nearly five thousand, has been indexed. Many of these had to be repaired before re-arranging.

The reference library has had many additions of books, particularly on local history, biography, travel, reports of organizations, etc., as well as numerous pamphlets, all increasing its value to the general public.

Historical Exhibit

A new historical exhibit was prepared during the summer and was ready for use at the beginning of September but, before the schools opened, it was sent, by request, to the Canadian National Institute for the Blind. This exhibit is in great demand during the academic year and has met with approval, yes, enthusiasm, from various teachers of history. Some of their comments are given below:

The Canadian National Institute for the Blind.

As the teacher of academic subjects to the war blinded veterans, may I thank you for the loan of the historical exhibit you so carefully prepared for the use of schools.

The students though blind were very much interested as I read and explained the various documents to them. To my mind, the exhibit stimulated in them considerable interest in the early history of Canada, for they have since asked for a great deal more history.

Hoping you will have more exhibits of the same type for us, . . .

Jarvis Collegiate, Toronto.

We are deeply indebted to you for sending us your splendid exhibit about two weeks ago. It was used quite extensively in various classes throughout the school. I personally showed it to about eight classes and drew their attention particularly to the original copy of the Crown Land Grant to Margaret Powlis. It attracted a good deal of attention. The boys of the Canadian History forms were especially interested in the photographs of Brant's Rifle (1786) as I was myself, being especially interested in firearms.

Since seeing the exhibit, several pupils have brought in historical clippings and one boy an original tax sale land deed (1920). I feel there is tremendous historical value in this sort of thing. The school here has a framed copy of an original Crown deed for fifty acres in the Newcastle District (1826).

Thanking you very sincerely and trusting to have the opportunity of using the same or a similar exhibit next fall.

Listowel High School.

I wish to acknowledge receipt of the collection which you sent me so promptly two weeks ago. It arrived in time for open night and the public as well as the students were intensely interested in it. I can assure you it was used to good advantage by the Canadian History classes.

Dresden Continuation School.

Both the students and the staff enjoyed this exhibit very much. The students, on being asked which sections they liked best, immediately mentioned the vellum document with the bees-wax seal. Grade IX particularly liked the bus poster of 1876 and I think that the staff enjoyed the Niagara Spectator of 1819 most.

One student asked if it would be possible, at some future time, for an Indian exhibit to be sent.

This is the first time that such an exhibit has ever been in the Dresden Continuation School. We appreciate your efforts and would like very much to see more of such historical displays.

Eastern High School of Commerce, Chatham and Phin Avenues, Toronto.

We much appreciate your kindness in loaning us this historical exhibit. It came at a time when it illustrated the work we were doing and aroused keen interest. The deed to Margaret Powlis seemed to receive the most study.

The exhibit added much interest to our history and I thank you for making it available to us.

Riverdale Collegiate Institute, Toronto.

Thank you for making arrangements for us to enjoy the historical exhibit. We found that the exhibit interested different ages, as in Grades X and XIII and dull pupils as much as bright ones. They were especially interested, all of them, in the land patent with the seal, the 1819 newspaper and the picture of Brant's rifle. I, myself, found the "ads" in the paper the most interesting. They were impressed with your ingenuity in mounting and packing them. Our one regret is that we never can devote as much time to studying the details as we would wish.

Englehart High School.

The pupils seemed to be genuinely interested in the material, particularly in the Niagara Spectator and in the land grant and seal.

We appreciate this service and thank you very much for your help.

Peterborough Collegiate and Vocational School.

The exhibit was excellent and aroused the interest of the students. The newspaper was carefully and avidly read, as well as the grants of land to the officer and the private, the toll gate, etc. These led to a most stimulating discussion of social conditions. The deed was interesting and aroused questions such as—what routine preceded the granting of a deed? What is the significance of the coat of arms on the seal? etc., etc.

Leamington High School.

The articles which seemed to arouse most interest in the exhibit were the land grant, the letter regarding the sale of a wench, the newspaper and the advertisement of the bus ride. The students were particularly interested in the newspaper.

Collingwood Collegiate Institute.

We wish to thank you for the opportunity to have the travelling historical exhibit at Collingwood Collegiate Institute.

The exhibit was of interest to the classes as a collection of curios and of value as concrete historical data. The 1876 bus line poster and time-table provided evidence of the difference in travel then and now and the ads. in the "Niagara Spectator" of 1819 illustrated the barter system of trading and gave proof of the fact that in those times one of the cash products of the farm was ashes.

You will find enclosed a clipping from the last issue of the Collingwood Enterprise-Bulletin whose editor, Mr. R. W. Irwin, was one of the interested visitors at the school while the exhibit was on display.

New Liskeard High School.

Thank you very much for sending us the historical exhibit from the Archives. My classes have all enjoyed it immensely.

I teach history in all five grades and showed it to each separately once, and again a second and third time when a class requested it. It was, of course, of special interest to Grades X and XIII which take Canadian History, but all students certainly enjoyed it. Some of their comments were that it was interesting because of the age of the dates, because they were reading documents at first hand, because of the difference seen in the appearance of a newspaper and its advertisements. They were intrigued by the description of Brant's gun. Those who were interested in the Clergy Reserves from their studies this year felt that the documents had given them a more realistic view of the situation in Upper Canada.

Again I thank you on behalf of all the students who enjoyed the exhibit so much.

Acquisitions

- Brotherhood, R. W., Toronto: Packet of miscellaneous papers concerning McNab Township.
- Bruce, Alex. D., Unionville: Historical sketch of Melville Church and of its Presbyterian Background from 1801.
- Burkholder, Miss Mabel, Hamilton: History of Burkholder Church.
- Commission appointing Daniel Jones and Hamilton Walker to be Judges of the District Court, in and for the Eastern District of Upper Canada, December 21, 1825.
- Crowther, James, Toronto: Twelve grants of land in Toronto.
- Donovan, Mrs. Macdonald, Montreal: (1) John Beikie's Bible, with some family records, (2) "The Commandments Explained", formerly property of Simon Fraser, 1832.
- Dye, S. H., Toronto: 61st Roll Call, 10th Royal Grenadiers Veterans, Riel Rebellion, 1885.
- Fairchild, T. M., Iowa City, Iowa: Revised edition of the "Name and Family of Fairchild."
- Hillmer, Mrs. Alfred, Oakville: Minute Books of the Municipality of Oakville, 1886-1888.
- Hooker, Dr. Harry Lyman, New York City, N.Y.: Descendants of James McMichael (1772-1821) and Rosanna DeMott (1785-1856); Photostat copy of article on Mabee-Secord family history.
- Hunter, Miss Martha, Toronto: Facsimile of map of New France, 1660.
- Huntsman, Prof. A. G., University of Toronto: Three documents concerning the death of Dr. Thomas Rolph and his daughter's marriage to William Salmon of Woodhouse, November 10, 1835.
- Knox's Church, Toronto: Annual Report, 1848.
- Matthews, Mrs. Hazel, Oakville: A group of land papers belonging to the Chisholm family.
- McLean, Miss A. A., Owen Sound: Two maps of Thunder Bay District, 1869.
- O'Brien, A. H., Toronto: Petition to the Legislative Assembly, protesting against the founding of a secular university, by the Bishop of Toronto, 1843; Testimonial to Lawrence Quetton St. George, signed by Chief Justice Thomas Scott, et al, 1815.
- Packham, Murray A.: Histories of the Packham, Stephenson, Burkholder, Van Dusen, Rittenburgh, Carpenter and Coon families.
- Shaw, Stuart C.: Two oil paintings—Tom Thomson's birthplace at Claremont and Rockwood Academy; etchings of Friends' Meeting House at Newmarket and the Golden Lion Inn at Lansing.
- Weston Voters' Lists, 1894-1900. Also Auditors' Reports and Financial Statements, 1880-1895.

H. McCLUNG,
Provincial Archivist.

MUSIC

Extent of Music Instruction in Schools

Elementary Schools

The following statistics show the percentage of classrooms in the Elementary schools of Ontario providing a regular course in music, under the supervision of qualified music teachers. These figures are for September, 1945, and are based upon reports received from Inspectors.

	Per cent.
Cities.....	100
Counties.....	77.7
Districts.....	58.8
Separate (English).....	48.3
All Elementary Schools (except French-speaking).....	77.78

The remainder of the Elementary schools offer a limited singing programme under the direction of the regular teachers.

French-speaking schools, under the personal direction of Joseph Beaulieu, Mus. B., Assistant Provincial Supervisor of Music, continue to show satisfactory progress. Eight urban centres have appointed music supervisors, and in approximately 75% of the classes in the Province attended by French-speaking children, music is being taught satisfactorily. There has been a marked increase of interest on the part of the boys, due largely to the development of Boys' Choirs.

Secondary Schools

The number of Secondary schools offering a course in music is as follows:

Schools	Total No. of Schools	Music Grade IX	Music Grade X	Music Grade XI	Music Grade XII	Music Grade XIII
Collegiates.....	71	65	34	19	18	6
High.....	161	119	55	18	12	4
Continuation.....	197	115	79	31	21	1
Vocational.....	23	19	11	9	7	1
Total.....	452	318	179	77	58	12
Percentage.....		70	39.5	17	12.8	2.7

Music Organizations in Secondary schools included 92 Orchestras, 33 Bands, 62 Bugle and Pipe Bands, and 283 Choirs. In 87 schools 172 operas or operettas were presented during the past three years.

On September 1st, 1945, Major Brian S. McCool, B.A., was appointed Assistant Supervisor of Music to give personal direction to music in Secondary schools.

Music Teachers

The number of qualified music teachers and supervisors reported as being engaged in the schools during 1945 was as follows—in Elementary schools, 520; in Secondary schools, 241; total number of teachers 761. Due to the discontinuing of the Summer Courses during the war, many of these teachers are only partially qualified, or are teaching on permits. This situation should improve rapidly, with the re-opening of the training courses.

Summer Courses

The Department Summer School of Music was re-opened in July, 1945, at Jarvis Collegiate Institute, Toronto. Nine courses were offered and the total enrolment was 327.

Normal Schools

In the eight Provincial Normal Schools, music is taught to all students. While much time must still be spent in teaching the subject matter of music, there is a marked improvement in the attitude and ability of the student teachers, due to the Province-wide acceptance of music as a school subject during the past few years.

Matriculation Music

Music is one of the optional subjects in Grade XIII. This consists of either a school course or extra-mural private study represented by certificates from accredited music schools. Since Secondary school music has been for the most part confined to Grades IX and X, it will be some time before any considerable number of pupils are prepared to choose this option, but in 1945, pupils from four Collegiate Institutes wrote the Departmental examination in Grade XIII music. The number of students writing were as follows:

1945 — 33; 1944 — 22.

Music Festivals

Music Festivals have been encouraged as a means of motivating classroom work, establishing standards of performance, and stimulating public interest. The number of festivals held during 1945 were as follows:

Competitive.....	47
Non-competitive.....	71
	118
Total.....	118

Number of pupils participating, approximately 40,000.

Sound Films

Two music sound films were added to the Departmental Library which now contains 22 subjects dealing with music. The music films are among the most useful in the Library. The aggregate number of screenings for the music films was as follows:

1945 screenings	1,693	viewed by	20,370	adults and	158,094	children
1944	"	1,002	"	"	52,915	"
1943	"	514	"	"	7,805	"
					89,508	"
					74,622	"

Radio

During January, February and March the Department, in co-operation with CBC, presented two series of music broadcasts over a Province-wide network, i.e. JUNIOR SCHOOL MUSIC, 10 fifteen-minute programmes for Grades I to VI; MUSIC FOR YOUNG FOLK, 10 thirty-minute programmes for Grades VII to X. In November and December, 2 sixty-minute programmes for Secondary

schools were given by the Toronto Symphony Orchestra. In all these broadcasts, the commentary was prepared and given by the Provincial Director of Music. The estimated school audience was 100,000.

Publications

The following literature was prepared by the office of the Provincial Director of Music—

Songs of the Commonwealth
 Father Time's Musical Review
 Suggestions for producing Gilbert & Sullivan Operas
 French Songs for Grade I.

Field Activities of the Director of Music

	1944	1945
Music Festivals attended.....	26	29
School Concerts attended.....	13	11
Teachers' Meetings attended.....	5	18
School Assemblies attended.....	5	12
School Board Meetings attended.....	4	8
Service Club Addresses given.....	7	12
Broadcasts.....	12	22
Interviews with Inspectors.....	48	53
Schools Inspected—Elementary.....	103	80
Secondary.....	13	13

Respectfully submitted,

G. R. FENWICK,
Director of Music.

TRADE-SCHOOLS

I beg leave to present the report of the operations of The Trade-Schools Regulation Act for the year 1945.

The conclusion of World War II and the return of Canadian servicemen to their homes has placed an additional heavy task on the management of Trade Schools in helping to meet the desires of these servicemen who wish to take advantage of the opportunities offered for extending their education. Trade Schools are in an excellent position to supply training to returned men along many practical lines. The Department of Veterans Affairs, through their guidance work, makes frequent inquiries of this Department regarding registered schools and the work they are prepared to give. No assignments of students are made unless the school is regularly registered and assurance given that it is reliable and dependable. Hundreds of veterans have been assigned to these schools for training and the D.V.A. makes regular investigations to ascertain the individual progress made by the veteran. Through this work these schools are rendering valuable service in this important work of assisting with the rehabilitation of returned service men and women. Reports received from almost every school indicate that these rehabilitation students have proved themselves to be excellent and earnest in their work and with a keen desire to make good in their chosen vocation.

Since the inauguration of The Trade-Schools Regulation Act there has been a marked decrease in the number of complaints received from students in trade schools. In many of the representations now being made we find that the student is largely at fault in that he has not met his obligations to the school as required by the Act. The schools appreciate the value of their registration certificates and are generally scrupulous in observing the requirements of the Act. In no phase of the work is this more noticeable than in their advertising; material for advertisements is submitted for approval before use, as the Act requires, and seldom needs alterations.

Most cordial relations between the Department and the schools continue to exist. The schools are an important factor in the educational work of this Province. By invitation representatives of this Department have attended conventions of certain sections of these schools, have participated in discussions of topics of mutual interest and concern, and have been impressed by the desire of such groups to improve instruction being given. It would be very desirable for all members of the staffs of such privately operated schools to have the privilege of attending similar group conferences. The result would be beneficial in the development of improved courses of study and better teaching methods, and in the encouragement of inexperienced teachers.

The following courses of study are required to be registered under The Trade-Schools Regulation Act:—

- | | |
|---|--|
| 1. Advertising | 21. Landscape Gardening |
| 2. Aeroplane Construction and Operation | 22. Machine Shop Practice |
| 3. Air Conditioning and Refrigeration | 23. Mechanical Dentistry |
| 4. Broadcasting Practice | 24. Painting and Interior Decoration |
| 5. Business and Office Practice | 25. Photography |
| 6. Civil Service Occupations | 26. Plastics |
| 7. Commercial and Industrial Art | 27. Printing and Bookbinding |
| 8. Concrete Construction | 28. Pulp and Paper Making |
| 9. Dairy, Poultry and other Farm Work | 29. Radio and Wireless Communication |
| 10. Detective and Secret Service Work | 30. Railway Station Agents and other Railway Occupations |
| 11. Diamond Drilling | 31. Salesmanship |
| 12. Diesel and other Internal Combustion Engines | 32. Sheet Metal Work |
| 13. Dress and Garment Designing, including Millinery | 33. Sound Projection and Motion Picture Operation |
| 14. Electric and Acetylene Welding | 34. Speech and Oratory |
| 15. Foot Correction | 35. Stationary and Marine Engineering |
| 16. Foundry Practice | 36. Telegraphy |
| 17. Hand, Machine and Power Machine Sewing Operation | 37. Television |
| 18. Hotel Management and other Hotel, Cafe, and Hostess Occupations | 38. Theoretical and Industrial Chemistry |
| 19. Industrial and Business Management | 39. Theoretical and Industrial Electricity |
| 20. Journalism and Story Writing | 40. Theoretical and Practical Engineering |
| | 41. Woodworking and Cabinet Making |

The following schools have been registered during the year 1945 under The Trade-Schools Regulation Act:—

Warren Air Service, Hamilton
 Weller Secretarial College, Toronto
 Orillia Commercial College, Orillia
 Metzler Business School, Kingston
 Midland Business College, Midland
 Galt Business College, Galt
 Pembroke Business College, Pembroke
 Tillsonburg Business College, Tillsonburg
 Brockville Business College, Brockville
 Kingston Business College, Kingston
 Alexander Hamilton Institute, Toronto
 Cub Flying School, Hamilton
 Milton Business College, Milton
 Port Arthur Business College, Port Arthur
 Sarles Business School, Trenton
 Agar Business College, Ridgetown
 Newspaper Institute of America, New York
 Parkhill Private School, Ansonville
 Sarnia Business College, Sarnia
 O'Neill Business College, Chatham
 Windsor Business College, Windsor
 LaSalle Extension University, Chicago and Toronto
 Leslie Business School, Fort Frances
 Northern Business College, Owen Sound
 Helen M. Murphy Private Stenographic School, Ottawa
 Niagara Business College, Niagara Falls
 Northern Institute of Technology (Radio College of Canada), Toronto
 Campbellford Commercial School, Campbellford
 Fort Erie Business College, Fort Erie
 Simcoe Shorthand and Commercial College, Simcoe
 The Oshawa Business College, Oshawa
 National Business College, Ottawa
 Toronto School of Design, Toronto
 Jan Chamberlain Studio of Effective Speech, Toronto
 Euler Business College, Kitchener
 Northern School of Commerce, North Bay
 Capitol Radio Engineering Institute, Washington
 Robinson Business College, Welland
 Robinson Business College, Waterford
 Soo Business College, Sault Ste. Marie
 Bowmanville Business School, Bowmanville
 Lakeshore Business College, New Toronto
 Leamington Business College, Leamington
 Sudbury Commercial Institute, Sudbury

National Radio Institute, Washington
 Baker Business College, Lindsay
 St. Thomas Business College, St. Thomas
 Speedwriting School of Canada, Hamilton
 Kenora Business College, Kenora
 Canada Business College, Chatham
 Teresa Dress Designing School, Toronto
 Lincoln Institute of Canada
 Trenton Business College, Trenton
 International Accountants Society, Chicago and Toronto
 Miss MacKinnon's School, Ottawa
 Felt and Tarrant Comptometer School, Chicago
 Felt and Tarrant Comptometer School, Toronto
 Felt and Tarrant Comptometer School, Ottawa
 Felt and Tarrant Comptometer School, Hamilton
 School of Speedwriting Inc., New York
 The School of Commerce, Clinton
 Ontario Business College, Belleville
 Federal Business College, Peterborough
 Fort William Business College, Fort William
 General Welding Works, Toronto and Sudbury
 Avery's Business School, Gravenhurst
 Helen Burgoyne Secretarial School, Toronto
 Willis Business College, Ottawa
 Lewis Hotel Training School, Inc., Washington
 Sudbury School of Telegraphy, Sudbury and Port Arthur
 Toronto Business College, Toronto
 Timmins Business College, Timmins
 Turner's Business College, Hamilton
 Drummond College, Renfrew
 Wells Academy, London
 Branches: Aylmer Business College, Aylmer
 Central Business College, Goderich
 Central Business College, Stratford
 Guelph Business College, Guelph
 Petrolia Business College, Petrolia
 Wells Academy, Kitchener
 Woodstock Business College, Woodstock
 Washington School of Art, Washington
 Cornwall Commercial College, Cornwall
 Dominion Business College, Toronto
 Brantford Business College, Brantford
 London Business College, London
 Taber Business College, Carleton Place
 Taber Business College, Smith's Falls
 Sudbury Business College, Sudbury
 Park Business College, Hamilton
 Bilingual Stenographers' College, Ottawa
 M. C. C. Schools, Winnipeg
 Letchford Studio of Fashion Careers, Toronto
 St. Catharines Business College, St. Catharines
 Canada Business College, Hamilton
 Burroughs Adding Machine of Canada Limited, Toronto
 Gowling Business College, Ottawa
 Canada Business College, Toronto
 Reilly Institute of Effective Public Speaking, Toronto and Hamilton
 Westervelt School, London
 Leavens Bros. Air Services, Limited, Toronto, Windsor, London
 The Secord Secretarial School, Toronto
 Technological Institute of Great Britain, Toronto
 Standard Engineering Institute, Toronto
 Shaw Schools, Limited, Toronto
 Shaw Beaches School
 Shaw East Toronto School
 Shaw Riverdale School
 Shaw Danforth School
 Shaw Central School
 Shaw Deer Park School
 Shaw Dovercourt School
 Shaw Oakwood School
 Shaw High Park School
 Shaw North Toronto School
 Shaw Kingsway School
 Shaw Parkdale School

The Galasso School of Designing, Toronto
 The Gregg College, Toronto
 The Brampton Business College, Brampton
 The School of Stationary Engineering Sudbury
 Smith's Air Service, London
 International Correspondence Schools Canadian, Limited, Montreal
 The C. W. Wright Effective Speaking Course, Toronto
 St. Michael's Commercial College, Sudbury
 British Institute of Engineering Technology, Toronto
 Barrie Business College, Barrie
 Len Tripp Flying School, Toronto
 Buchanan's Victoria Secretarial College, Toronto
 Cassan Systems, Toronto
 Gillies Flying Service, Buttonville
 O'Neill Business College, Windsor
 National Schools, Los Angeles

The extent and importance of the operations of these Trade-Schools is shown by some statistics taken from reports which they have issued for the current year:—

Day School Registrations.....	9,953
Evening School Registrations.....	7,152
Correspondence Schools Registrations.....	34,171
Revenue Received.....	\$2,081,672
Expenditures.....	\$1,603,523

Almost complete absorption of the graduates into industrial and business life has been the experience of the year. In fact, many of these schools have been unable to fill the calls made upon them for trained personnel even with attendance records reaching numbers much beyond the average of previous years. It is an important responsibility of this Department to encourage and develop the work of these privately operated schools so that the instruction offered may give the best possible preparation to the student to enter into his chosen vocation. This Department does not perform its full function with reference to these schools by simply issuing Registration Certificates for the maintenance of correct ethical behaviour; it must also aid them to attain their full educational status as an important factor in the whole educational system of the Province. The private school operator is anxious to give good service. He appreciates assistance, direction and encouragement from reliable sources, which will the better enable him to give this service.

W. S. KIRKLAND,
Registrar of Trade-Schools.

Toronto, September 14th, 1946.

GUIDANCE

I beg leave to present the report of the Guidance Branch for the year ending December 31, 1945.

Considerable progress has been made in the establishment of guidance work. The fundamental framework is now taking shape. The year has been characterized by growing interest both from within the school structure and from without. The desire to put guidance on a practical basis has led to an exemplification of the principle that guidance to be truly effective must be a strengthening, through special organization and scientific procedures, of the informal guidance practices characteristic of any good school.

It was considered that the equivalent of one teacher's time-table for each five hundred pupils would provide adequate time for a well-rounded guidance programme in secondary schools, and the provision of that time was set as an objective. The only obligatory part of the programme was, in September 1945, stated as two periods a week for the group work in Grade IX called "Occupations". It has been gratifying to find that a large number of secondary schools have voluntarily provided similar classes in Grade XII.

During the year many schools have moved closer to this objective of one teacher's time-table for each five hundred pupils, with a director or teacher-counsellor appointed to organize the work and in larger schools as many as five teachers devoting part time to it. In all cases the greatest need has been trained workers. In 1945, the first summer course leading to the Elementary Guidance Certificate was attended by one hundred and fifty teachers from every type of school and from every part of the province. In the fall, an additional group of one hundred and four teachers who had taken training previous to the Departmental course, wrote a special examination to qualify for the Elementary Guidance Certificate. Plans have been announced whereby ex-service personnel may qualify for the same certificate without attendance. Plans have also been announced by which additional courses leading to Intermediate and Specialist Certificates in Guidance will be provided in future years. Through these steps it is hoped that the need for trained workers will be met.

Coupled with this great increase in the number of directors of guidance and teacher-counsellors has been provision by local authorities for space, time and privacy for the counselling which is considered the most important guidance service.

Among additional services and materials provided are books, pamphlets, files of occupational and educational information, vocations nights, tests and testing material.

In many centres considerable progress has been made in the development of guidance work in elementary schools. It is generally recognized that there the work is largely educational in nature with vocational guidance being introduced gradually in the senior grades. The main areas of responsibility for guidance work in the elementary schools are as follows:

1. The assembling into suitable form of all pertinent information which may be helpful in giving a better understanding of each individual pupil so that guidance will be truly effective.

2. A gradual introduction into grades seven and eight of such topics as will make the pupil realize the educational opportunities open to him and the relationship between school and the world of work.
3. The development of each pupil to the limit of his abilities and capabilities.
4. The preparation of each student for his secondary school life so that the transfer will cause the least possible disturbance to him.

While the larger elementary and secondary schools are progressing rapidly toward an organized guidance programme, it has been found necessary in the smaller schools to rely still upon informal guidance work. However, considerable help has been given such schools in organizing their informal guidance practices for greater effectiveness and in making use of the greatly increased amount of available educational and occupational information.

The Vocational Guidance Centre has proved to be a valuable means of distributing occupational information, forms, tests and other guidance materials. The *School Guidance Worker*, a new publication of the Vocational Guidance Centre, has provided a means of distributing information. It is sent free to every secondary school in Ontario.

The Ontario Department of Education, in co-operation with the Canadian Broadcasting Corporation, presented a series of five half-hour school radio broadcasts in guidance during October and November over a network of Ontario stations. Many valuable and gratifying comments and suggestions were received from the schools and the general public.

Mrs. Olive E. Palmer, of the staff of the Owen Sound Collegiate and Vocational Institute was appointed Assistant in the Guidance Branch and assumed her duties July 1, 1945. Her special experiences in guidance qualify her to render valuable service in the organization of the work.

In addition to the regular visits paid to schools, special assistance has been given to a number of schools and communities in the organization of their guidance work. At the request of a number of Boards of Education, visits were paid during which conferences were held with principals, teachers, and administration officials. At the same time, a survey was made of the school to determine the needs for guidance and to find out what facilities were available. Thereby it was possible to assist in the planning of the local guidance programme.

This year has made a number of facts increasingly clear. Guidance is simply practical assistance given to pupils and parents in the evaluation of abilities and capabilities, in the gathering of pertinent information about the educational and occupational worlds, and in the assistance given to each pupil in making decisions which will lead to his becoming a contented worker and a happy citizen. It is in no way dictatorial. It is a case of assisting pupils and parents to make decisions based upon facts and information more easily obtained by the school than by them. Guidance is an organized attempt to bring together all available information about occupational and educational opportunities, to put it into suitable form and to make it available to parents and pupils. It means putting into our schools trained teacher-counsellors who will be able to use all available scientific techniques. Generally speaking, it means organized assistance to pupils and parents so that intelligent decisions may be made in relation to choices of school courses, choices of life-work and all that may affect the future success and happiness of each individual pupil.

Toronto, June 1, 1946.

H. R. BEATTIE,
Director of Guidance.

PHYSICAL AND HEALTH EDUCATION

The Physical and Health Education branch is responsible for the administration of a school programme in Physical and Health Education and Cadet Training in the public and secondary schools, and the community programme in Physical Fitness and Recreation.

In Physical and Health Education, special attention was directed to assisting teachers who were supplying for men and women in the services. The course in Health Education became firmly established and the text-book "Good Health" was authorized and made available for secondary schools. The special summer courses in Physical and Health Education were re-established, and over half the men in attendance had been demobilized from the services. In the elementary schools, this branch co-operated closely with the various school inspectors and met with teachers' groups in all parts of the province. Close co-operation is maintained with the instructors in the various teacher-training institutions in order that a continuity may be maintained between the training schools, the special summer courses, and the teachers throughout the province.

Cadet Training

In September, 1944, Cadet Training became an obligatory subject of instruction in the secondary schools of the province. Except where exemption was granted by the Minister, each secondary school was required to organize a cadet corps to include all physically fit boys. Cadet corps are now organized in 227 secondary schools; 209 are affiliated with the army, and 18 are affiliated with the air force. Fifty-two new corps have been organized since September, 1944. There are 218 schools in which the cadet training course is being taught, but where the school attendance is below the required minimum for organizing a cadet corps. The Director of Cadet Training works in close co-operation with the cadet branch of the services, and constantly visits schools and camps where this training is being carried out.

Physical Fitness and Recreation

Regulations governing grants-in-aid to municipalities organizing programmes of Physical Fitness and Recreation were announced in April, 1945 and became effective in October. The purpose of these grants is to assist any community in establishing programmes of training in Physical Fitness and Recreation for all interested people, of either sex or any age, in the community. It is concerned mainly with adults and young people no longer in attendance at school; it does not include the direction or supervision of any school programme. During the four months of 1945 in which the regulations were in effect, grants were paid to 18 municipalities which established community programmes under a committee appointed by the municipal council. Community organizations approved by the municipal councils were established in 20 additional communities and were in process of organization in 22 more. The programme became firmly established

in 60 communities during 1945. In addition, any organization conducting a camp for children or adults on a non-profit basis was eligible for a grant to assist in meeting transportation charges. Grants were paid to 67 non-profit camps which operated during the summer. Interest in community organization for Physical Fitness and Recreation is wide-spread and not confined to any one section of the province. The development is equally spread over all sections, and includes urban and rural municipalities, townships and counties.

F. L. BARTLETT.

Director of Physical and Health Education.

Toronto, September 3, 1946.

Courtesy of The Globe and Mail

At the departmental Art and Crafts Course, teachers deal with all manner of materials and use them so that the activities performed may be correlated with other subjects on the programme of study. Here pioneer structures are made from corrugated paper. This work is correlated with social studies.

Courtesy of The Globe and Mail

From a total of twenty-two courses in art and crafts, student-teachers may elect the work which is of greatest value to them. Here, at the summer session, teachers draw from the draped model. Expert guidance is offered and all instructors are outstanding in their respective fields.

ART

A Programme of Departmental Supervision of Art Education

In September, 1944, the appointment was made in the Department of Education of a Provincial Supervisor of Art. This Official made a survey of the programme of art education in the classrooms of elementary schools in 12 representative inspectorates across the province. Having completed this survey, the Supervisor of Art put into effect a programme of in-service aid for teachers, keeping in mind the following objectives of art education:

1. To provide an opportunity for children's development in good citizenship, as well as a feeling of responsibility to the community.
2. To develop individual and group co-operation in securing and maintaining an ideal environment.
3. To assist in developing emotional stability.
4. To help bring about correct methods of thinking and to encourage initiative.
5. To develop good taste particularly with regard to objects selected for the immediate environment of the home, and to develop greater discrimination in personal creative output.
6. To develop interest in the arts as leisure-time activities.
7. To develop skills, not in isolation, but in relation to the needs of expression.

Courtesy of The Globe and Mail

The summer course in art and crafts enrolls children as well as student-teachers. These children work with the student-teachers. In this way direct observation may be made of the way in which children naturally handle media. Here, children construct animals from newspaper, while a student-teacher joins in the fun.

Courtesy of The Globe and Mail

Here two student-teachers experiment with textile designs. All the work at the summer course is creative. When these students return to their schools, they stress in their classrooms the need for a creative approach to art.

It will be seen that these objectives are broad, involving as they do the total personality within its social setting. Such objectives may be contrasted to the former "training of hand and eye."

A summary of the programme of art supervision follows:

- (a) A series of eight bulletins dealing with art and crafts in general education was sent to approximately 1200 elementary classrooms. At the close of the school year a questionnaire was sent to the teachers who used the bulletins. Returns from this questionnaire showed that the majority of teachers concerned found the bulletins acceptable. Many teachers offered valuable suggestions regarding the improvement of the bulletins.
- (b) The Supervisor gave talks and demonstrations to groups of teachers and children.
- (c) An experimental art and craft "workshop" was held in the city of Windsor. About 100 teachers of this city studied art techniques each afternoon for a week.
- (d) Eighteen exhibitions of art and craft work were forwarded to inspectors of schools, who in turn displayed them at teachers' meetings and in classrooms.
- (e) A summer course in art and crafts was held in Toronto. The organization of this course was patterned somewhat according to the "educational workshop." About 150 teachers from elementary and secondary schools attended.

In July, 1945, the Provincial Supervisor of Art was made a permanent Official of the Department with the title of Director of Art. During the school year 1945-46, he continued the programme begun during the previous year.

This student is engaged in a technique known as "montage". She arranges the masses and spaces of the design until they form a pattern having a satisfying unity, while she carefully sees that interesting variety is maintained. The patterns formed are used as a basis for textile designs.

Advanced design techniques are studied at the Art and Crafts Course. This student is experimenting with various materials to find their properties through contrast. The form created is known as "mobile sculpture,"—sculpture which moves. Transparency of materials used creates a special problem in design.

-
- (a) The bulletins of the previous year were revised and tested in 1600 classrooms. A questionnaire revealed that almost every teacher receiving them found them acceptable.
 - (b) A survey of the art programme in a limited number of secondary schools was made.
 - (c) A number of afternoon art "workshops" were held in rural areas.
 - (d) An experimental exhibition of children's art work was held in the Cornwall area. This exhibition was experimental in the sense that the work on display illustrated the place of art in general education rather than being an exhibit of art for its own sake. No prizes were offered since much of the work was performed by children working in democratic groups. Some 5,000 people attended this exhibition.
 - (e) The summer course in art and crafts held in Toronto was greatly expanded. Twenty-six staff members, including artists, craftsmen, teachers, and lecturers gave courses to some 350 students.
 - (f) During the 1946 sessions of the Ontario Educational Association, a forum dealing with present-day art education was presented for the inspectors of schools. Ten speakers dealt with the philosophy and pedagogy of child art. Large displays were used to demonstrate the various aspects of the subjects under discussion.

C. D. GAITSKELL,
Director of Art.

Toronto, July 31, 1946.

*319 men and 286 women who teach part of the school day in the academic department are already included in the number of teachers shown for High Schools and Collegiate Institutes.
†Net totals.

I—TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 75% of these pupils live in Northern Ontario, and 15% of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment (Net)—The number of pupils who have attended school during the year, excluding all duplications.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High School.**
- 2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are seven of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, with stops of about 5 days at certain stations. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. Emphasis is placed on English, writing, spelling and arithmetic. The present enrolment approximates 250, and comprises 15 nationalities. The Department pays all costs.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

II—SCHOOL ADMINISTRATIVE UNITS, NUMBER AND TYPE

*In addition there are 7 school cars distributed as follows: Kenora 1, Nipissing 1, Rainy River 1, Thunder Bay 1, Sudbury 3.

†There are, in addition, 5 senior auxiliary schools (Hamilton 2, Toronto 3) and 2 navigation schools (Collingwood and Kingston). These latter are open part of the year only.

‡18 schools having commercial departments only, formerly counted as composite, are now treated as purely academic.

IV—CLASSIFICATION OF ONTARIO SCHOOLS BY CLASSROOMS, 1944-45

NOTE:—Urban schools in this table are limited to those in cities, towns and incorporated villages. Large suburban schools are considered rural.

In the secondary schools, laboratories and shops are considered rooms.

A In all Provincially-Controlled Schools.
 B Commencing with 1943-44 the net enrolment is used. Previously the May enrolment figure was used. Large suburban and semi-urban enrolment is contained in the urban figure.
 C Covers the school year.
 D This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture, but excludes Itinerant Music Teachers.
 E This includes Third Class, District, Permanent Ungraded, and Temporary.
 F Included with Public Schools.
 G Combined in Elementary Schools.

*Special teachers are listed only where teacher devotes whole time to that subject.

† Music Teachers—Includes full-time teachers of music only. In addition there are many regular classroom teachers who also teach music and approximately 300 itinerant music teachers serving rural areas and smaller urban centres.

SUMMARY OF HIGH SCHOOL ENTRANCE EXAMINATION, 1945, AS COMPILED FROM DEPARTMENTAL RECORDS

(This includes results of candidates from private sources).

Enrolment Grade VIII on the last school day in May, 1945.....	53,684
Number of High School Entrance Candidates:—	
Recommended by Principal on Group II.....	32,505
Number taking written tests on Group II.....	19,603
	52,108
High School Entrance candidate percentage of 1945 Grade VIII enrolment.....	97.06%
Number of candidates successful on written test on Group II:—	
By Regulation 10—(1) and (2).....	11,812
(3) and (4).....	598
(5).....	391
(6).....	144
(7).....	328
	13,273
Total Number of Successful candidates.....	45,778
Percentage of candidates who were successful.....	87.85%
(62.38% by Principals' recommendation and 25.47% by passing written test)

The V. K. Greer Memorial School

Architect's drawings of a proposed 4-classroom, rural, elementary school, named in honour of a former Superintendent of Elementary Education, to be erected on No. 11 Highway, some 12 miles north of Bracebridge, in Muskoka.

The building is frankly experimental—to demonstrate some of the findings of the Committee on planning, construction and equipment of schools in Ontario, appointed by the Minister of Education. This school departs from the conventional prewar school in several important respects, the more striking departures being the absence of basement, lower ceiling height, larger and more continuous window areas, and the addition of bilateral lighting.

Some of the leading features of this school will be:

Height—One-storey, not designed to ever take an additional storey. This permits lighter, economical construction of walls and partitions, and the latter could be removed as teaching techniques change, requiring larger or smaller classrooms.

Heating—Hot-water, using convection-type heaters concealed under window sills in rooms. In addition, the 2 junior classrooms have hot water pipes imbedded in floors. These two rooms are equipped with individual temperature regulation.

Lighting—For most of the year natural lighting should be adequate. This is supplemented by indirect 20 foot candle illumination from pendent, bowl-silvered lamps for dark days, and night use. Chalk-board lights consisting of continuous, fluorescent strips are provided in all classrooms.

Ventilation—In general, window ventilation—air ingress through the low sash of main windows and egress through sawtooth windows above corridor roofs. Wash rooms and most cloak closets provided with forced exhaust ventilation by motor driven fan which discharges foul air high above the building through flue in main chimney. Other cloak closets have roof ventilators.

Sanitation—The plumbing system includes an electrically-operated automatic deep-well pump for a supply of running water to the modern washrooms and toilets. Warm water is provided the year round. Waste disposal is through a large septic tank and a disposal field located well away from the water supply. The design of the building necessitates the carrying away of rain water from large roof areas, and it is discharged to a near-by gully in a manner guarding against soil erosion.

Classrooms—Have built-in coat spaces with doors that pivot into the wardrobes, thus avoiding interference with traffic or causing congestion. The doors have inset corkboard panels for tacking space, and all coat closets are ventilated. Each classroom has a sink, and a project counter with storage cupboards above, a separate coat closet for the teacher, shelves for books and a "supplies closet". Floors are of asphalt tile laid in mastic on the concrete slab, chalk boards are white, and ceiling of fibre board. Woodwork and walls will be painted in light colours, furniture will be "blond" and all of mat finish to lessen glare and to aid to the attractive appearance.

Community purpose—The large playroom or "all purpose room" is close to the main entrance, and lavatories are so placed as to be reached conveniently. The home economics room adjoins the playroom, and a serving wicket permits convenient serving of refreshments. Home economics room and the workshop are separated from the classroom by glass screens.

TABLE 6—STATISTICS OF AUXILIARY CLASSES

OPPORTUNITY CLASSES

For backward and psychopathic children and those who have not successfully pursued the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

THE RAILWAY SCHOOL CAR

1. School-room 2. Kitchen 3. Living quarters 4. Concentration
5. School car 6. An extra-mural pupil 7. Sturdy Northerners

The "Schools on Wheels" bring education to children living in scattered, shifting settlements along the two transcontinental and the Ontario Northland railways. The original car of 1926 has now grown to seven. These are supplied free by the railways and the Department of Education pays for re-modelling the cars, for all school furnishings and pupil supplies. The cars aim to stay approximately one week out of every month at each teaching point. Attendance is excellent. Many pupils pass High School Entrance and continue school work, either in the cars or at secondary schools. Present enrolment is about 250, and 90% of these have foreign-born parents.

FINALISTS IN THE 26TH ANNUAL PROVINCIAL PUBLIC SPEAKING CONTEST

Courtesy Canadian School Journal

Contestants in order, left to right:—

1. Herbert Jobb, Listowel, (Guelph District)
2. Robert Robitaille, Penetanguishene, (Toronto District)
3. James Noyle, Courtright, (Chatham District)
4. Edmund Quinn, Castleton, (Northumberland District)
5. Eldon Hay, Marvelville, (Kemptville District)
6. Ann Garrity, Brantford, (Hamilton District)

The above elementary school pupils, all 12 or 13 years of age, and all from Grade 8, met in Convocation Hall, University of Toronto, during Easter week convention of the O.E.A. as representatives of their respective areas in the contest conducted by the Ontario Trustees' and Rate-payers' Association to develop public speaking.

Edmund Quinn was awarded first place and was presented with a set of the Book of Knowledge donated by the Grolier Society and also received the Provincial Public Speaking Shield, donated by Samuel Farmer, to be placed in his school for the year.

James Noyle was placed second and received a set of "Makers of Canada", presented by the Department of Education. The other contestants received sets of books presented by the Association.

All contestants spoke on the subject, "The Type of Secondary School I Would Like to Attend".

Leaside High School and Community Centre

Architect's drawing of the proposed building to serve the double purpose of a secondary school and a community centre in this rapidly growing town of approximately 10,000 population. To date, by arrangement, Leaside's 400 pupils beyond High School Entrance standing have attended the more adjacent collegiate institutes and vocational schools of Toronto. By September, 1947, it is hoped that they will be housed in their own school. The estimated cost of building alone is in the neighbourhood of \$600,000, to be financed through the issue of 20-year debentures.

Many of the leading features are listed below:

Land—15 acres park area for school sports and community use	Special girls' gymnasium	Chemistry laboratory
Board of Education offices	Swimming pool	Physics laboratory
Vocational Guidance office	Music practice room	Junior science laboratory
Medical centre—doctor's office, nurse's office, rest rooms, etc.	Nine standard classrooms	Social studies laboratory
Auditorium with gallery	Library-English room	Teachers' rooms
Full size stage with dressing room	Special art room	Cadet rooms and shooting gallery
Main gymnasium 56' x 96' with girls' and boys' dressing rooms, lockers, showers; P.T. instructors' rooms.	Two commercial rooms	P.T. and sports' equipment rooms
	Arts and crafts centre—community	Students' dining room and cafeteria
	Home economics centre	Teachers' dining room
	General shop department	Complete kitchens

Provincial Institute of Mining, Haileybury, Ontario

In 1944, on recommendation of the Royal Ontario Mining Commission, the Haileybury Mining School was taken over by the Province, to operate in future as the Provincial Institute of Mining. Its function is to train youths and adults for employment in the numerous technical occupations of the mining industry. Minimum academic requirement for admission is successful completion of Grade X general or vocational course in English, History, Mathematics and Science. Admission is by application only, and candidates are required to take a physical examination, including an X-ray test. The Institute diploma is awarded on successful completion of the course.

The Institute provides a one-year course, a two-year course, courses for returned men, and special subject courses as need arises. A co-operative plan with the mines is under consideration, whereby students may alternate between the school and industry.

Ontario students pay no fees. Others pay \$20 for each of three terms (\$60 a year). The school year starts the first Tuesday after Labour Day and closes the last regular school day in May.

THE VOCATIONAL

TABLE 37—EVENING SCHOOLS—ACADEMIC AND VOCATIONAL
Classification of Students by Subjects of Study 1945-46

I. ACADEMIC

A—CULTURAL

1. English for New Canadians	302	11. Latin	112
2. High School Entrance	237	12. French	114
3. Reading	165	13. French Conversation	18
4. Literature	569	14. Spanish	337
5. Composition and Spelling	781	15. German	34
6. Grammar	193	16. Music	73
7. Geography	387	17. Drama	27
8. Modern History	71	18. Dramatics	14
9. Civics	387	19. Journalism	99
10. Public Speaking	202	20. Psychology	25

B—PRACTICAL

1. General Mathematics	45	1. Geometry	581
2. Arithmetic	981	5. Trigonometry	277
3. Algebra	807	6. Shop Mathematics	1,112

II. VOCATIONAL AND INDUSTRIAL

A—DOMESTIC ARTS

1. Home Nursing	83	5. Pattern Making and Design	302
2. Meal Preparation and Serving	1,391	6. Tailoring	60
3. Nutrition and Dietetics	240	7. Millinery	279
4. Sewing and Dressmaking	6,640	8. Lingerie	11

B—COMMERCE

1. Writing	463	9. Rapid Calculation	50
2. Stenography	2,787	10. Commercial Mathematics	43
3. Typwriting	4,489	11. Bookkeeping	1,518
4. Business Correspondence	228	12. Industrial French	61
5. Transcription	81	13. Problems of Launching a Business	35
6. Business Machines	366	14. Advertising	163
7. Business Forms	184	15. Salesmanship	132
8. Office Routine	134		

C—ART, DRAFTING AND DESIGN

(a) Pure Art:			
1. General Art	37	6. Life Drawing	390
2. Colour Study	311	7. Antique Drawing	9
3. Painting and Drawing	72	8. Modelling	44
4. Oil Painting	16	9. Art Methods	39
5. Still Life Drawing	176		
(b) Applied Art:			
1. Lettering and Show Cards	261	4. Fashion Drawing and Design	102
2. Commercial Art	161	5. Photography	54
3. Illustrating	213	6. Interior Decorating	521
(c) Industrial Drafting and Design:			
1. Drafting (general)	820	5. Tool and Die Design	24
2. Blue Print Reading	235	6. Sheet Metal Drawing	94
3. Architectural Drawing	583	7. Electrical Drawing	34
4. Machine Drawing and Design	458	8. Horological Drafting	26

D—CRAFTS

1. Arts and Crafts	346	7. Rugs	17
2. Leather Working	516	8. Weaving	68
3. Glove Making	44	9. Wood Carving	24
4. Cabinet Making	331	10. Glass Blowing	19
5. Pattern Making	64	11. Pottery	129
6. Printing	118	12. Watchmaking	42

E—SCIENCE AND ENGINEERING

(a) Science:			
1. Physics	93	7. Electronics	90
2. Chemistry	336	8. Physiography	47
3. Industrial Chemistry	119	9. Mineralogy and Geology	81
4. Chemistry for Nurses	77	10. Metallurgy and Assaying	41
5. Photography	90	11. Technology of Textile Fibres	172
6. Electricity	1,003		
(b) Engineering:			
1. Applied Mechanics	12	6. Diesel Engines	45
2. Farm Mechanics	28	7. Refrigeration	71
3. Steam Engineering	388	8. Refrigeration and Air Conditioning	164
4. Surveying and Mapping	7	9. Telephony	40

Training College for Technical Teachers							20	1	21
Totals	19	105	508	85	68	59	20	1	865

*Candidates who were 17 years of age and who were admitted to Normal School with 5 Upper School papers were granted Deferred Interim First Class certificates. These may be changed to regular Interim First Class certificates upon completion of the full number of Upper School papers required for admission.

**In addition to the number shown here, 464 candidates who had obtained Deferred Interim Second Class certificates at the First Year Emergency Normal School Summer Session in 1944, returned for the Second Year Emergency Normal School Summer Session in 1945 and obtained Interim Second Class certificates.

A(2) Interim Certificates (Extramural)
 Issued to Extramural candidates who wrote the final examinations at the Normal Schools and the Ontario College of Education

	Classification of Interim Certificates				Total
	Interim Second Class	Interim First Class	Interim High School Assistant's		
			*Type B	Type A	
Teachers who already held lower Ontario certificates	1	239	**180	42	462
Teachers who had failed in previous years	13	22			35
Teachers from other provinces	3	29			32
Teachers from the British Isles		3			3
Total	17	293	180	42	532

*The Interim High School Assistant's Certificate, Type B, was formerly called the Interim High School Assistant's Certificate. The Interim High School Assistant's Certificate, Type A, was formerly called the Interim High School Specialist's Certificate.

**The majority of these were elementary school teachers whose academic standing and successful teaching experience entitled them to admission to the final examinations of the Ontario College of Education without attendance during the year.

In addition to the number shown in this table, 59 candidates who had obtained Limited High School Assistant's Certificates at the special Summer Session of the College of Education in 1944, returned for the special Summer Session in 1945 and obtained Interim High School Assistant's Certificates, Type B.

A(3) Interim Certificates in Special Subjects

Issued to teachers who took special courses at the Ontario College of Education during the school year 1944-45 or at the Departmental Summer Courses in 1945

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive. During that period, the following courses were offered:

- 1942 —Summer Course in Defence Training, Health and Physical Education—925.
- 1942-43—Winter Course in Manual Training, Type A—40.
- 1944 —Summer Course in Physical and Health Education and Cadet Training—313.
- 1944-45—Winter Course in Manual Training Type A—48.
- 1944 —Refresher Course in Medieval History given during Christmas vacation—45.

TABLE 45—SCHOOL YEAR AND HOLIDAYS

Sept. 4th, 1945, to June 28th, 1946

PROVISIONS OF THE SCHOOL ACTS

The school year shall consist of two terms, the first of which shall begin on the first Tuesday of September following Labour Day and shall end on the 22nd day of December, and the second of which shall begin on the 3rd day of January and end on the 29th day of June.

When the 3rd day of January is a Friday, the schools shall not be opened until the following Monday, and when the 29th day of June or the 22nd day of December is a Monday, the schools shall be closed on the preceding Friday.

Every Saturday, every public holiday, the week following Easter Day, and every day proclaimed a holiday by the authorities of the municipality in which the teacher is engaged, and every day upon which a school is closed under the provisions of The Public Health Act, or the regulations of the Department of Education shall be a school holiday.

HOLIDAYS

The following are the holidays in the schools during the school year 1945-46:

- (1) Thanksgiving Day.
- (2) Remembrance Day—November 11th.
- (3) December 22nd to 31st, inclusive—part of Christmas vacation.
- (4) The first two days of January—part of Christmas vacation.
- (5) Easter holidays—April 19th to April 28th—both days included.
- (6) Victoria Day—May 24th.
- (7) The Anniversary of the King's Birthday.
- (8) Summer vacation—June 29th to September 2nd, both days included.

DATES OF OPENING AND CLOSING OF SCHOOLS

The following are the dates of the opening and closing of the High, Continuation, Public and Separate Schools:

Open.....	September 4th	Close.....	December 21st
Reopen.....	January 3rd	Close.....	April 18th
Reopen.....	April 29th	Close.....	June 28th

NUMBER OF TEACHING DAYS

In the High, Continuation, Public and Separate Schools, the number of teaching days is as follows:

September.....	19	January.....	21
October.....	23	February.....	20
November.....	22	March.....	21
December.....	15	April.....	16
	—	May.....	22
	79	June.....	20
			—
			120
		Total.....	199

P.S.: As the exact dates of the Anniversary of the King's Birthday and Thanksgiving Day have not yet been proclaimed, the deduction has not been made from the above. The total number of teaching days for the academic year will be 197.

Number of teaching days for calendar year 1945 — 198; for calendar year 1946 — 197.

UNIVERSITY OF TORONTO

REPORT
OF THE
BOARD OF GOVERNORS
FOR THE YEAR ENDED 30TH JUNE, 1945

To His Honour the Lieutenant-Governor-in-Council:

The Governors of the University of Toronto have the honour to present their thirty-ninth annual report of the financial administration of the University, including an extensive research programme, together with the President's report on the academic work of the University and its Colleges for the Session 1944-45 and covering the activities of different departments.

Statements covering the funds and assets, including investment, etc., are shown as they stood at the close of business on 30th June, 1945, together with detailed receipts and expenditures of the Board, prepared by the Bursar, for the fiscal year which ended on that date, and the certificate of audit of Mr. G. T. Clarkson, F.C.A. of the firm of Clarkson, Gordon, Dilworth and Nash.

The Auditor's report states that he made an examination of the Balance Sheet as at 30th June, 1945, and that he examined or tested the accounting records; that the securities representing the investments of the University, the Endowment and Trust Funds, which are held for safekeeping by the Canadian Bank of Commerce, were produced for his examination on 3rd July, 1945, and found to be in agreement with the Bursar's records.

The general revenue for the year amounted to \$2,032,941, which together with the Special Legislative Grant of \$1,300,000 made a gross total of \$3,332,941. The expenditures under the appropriations made by the Board for salaries and maintenance totalled \$3,202,374 (exclusive of the Ontario College of Education which is maintained by a separate vote), to which was added \$66,375 representing interest written to certain scholarship and trust funds less interest on bank balances, together with \$85,630 for Wartime Bonus paid to salaried employees, making a total expenditure of \$3,354,379 resulting in an excess of expenditure over receipts for the year of \$21,438 which when reduced by the balance on operations of \$13,188 for the preceding year leaves a balance of \$8,250 at debit of Revenue Account.

The Department of Veterans' Affairs entered into an arrangement with the Bursar's Office for the distribution of subsistence allowance cheques issued each month to ex-service personnel attending the University, which together with additional financial arrangements pertaining to special courses for students returning from War service increased tremendously the details in connection with student operations in the University.

With the return of thousands of students, additional accommodation was urgently needed and the Board proceeded to negotiate with the Dominion Government for the acquiring of facilities at Ajax, Ontario.

Additional funds, totalling \$507,447 were administered by the office of the Bursar during the year, chiefly consisting of National Research Council

and other Dominion Government grants for 66 war research projects undertaken by various members of the staff. Funds were also administered in connection with loans to students from the Federal Department of Labour, Kellogg Foundation, etc., for the accelerated courses in Dentistry, Medicine, Science and Engineering, together with the distribution of Province of Ontario Scholarship Awards.

All controllable expenditures were reduced during the year and considerable saving in this connection was effected.

All of which is respectfully submitted.

21 January, 1946.

W. E. PHILLIPS,
Chairman.

AUDITOR'S CERTIFICATE

Toronto, 21st January, 1946.

To the Governors of the University of Toronto:

GENTLEMEN:

I have examined the balance sheet of the University of Toronto as at 30th June, 1945 and the related schedules 1 to 10. In connection therewith I examined or tested the accounting records of the University and obtained all the information and explanations I required from the Bursar and other employees, but I did not make a detailed audit of the transactions.

The securities representing the investments of the University, the Endowment and Trust Funds, are held in safekeeping by your bankers, The Canadian Bank of Commerce, and were produced for my examination on 3rd July, 1945. These were found to be in agreement with the records kept by the Bursar. The aggregate approximate market value of these investments as at 30th June, 1945 was greater than their book value by \$886,572.12. Certain non-trustee securities (including non-interest bearing securities) received as bequests are still held.

I have not examined the titles to the various properties.

I report that in my opinion, based upon my examination, the accompanying balance sheet and related schedules 1 to 10 have been properly drawn up so as to show the financial position of the University at 30th June, 1945 and the results of its operations for the year, according to the best of my information and the explanations given me, and as shown by the books.

Yours faithfully,

G. T. CLARKSON, F.C.A.
Auditor.

IV. ROYAL ONTARIO MUSEUM

University's share of maintenance advanced to the Trustees of the Royal Ontario Museum under R.S.O. 1937 cap. 343	\$ 81,000.00
---	--------------

V. FACULTY OF ARTS

Salaries

(1) Departments in University of Toronto (\$615,316.33)

Dean's Office	
S. Beatty, Dean (paid also \$6,000 as Professor of Mathematics)	\$ 1,000.00
	\$ 1,000.00
Anthropology	
T. F. McIlwraith, Professor	\$ 4,800.00
J. F. Embree, Assistant Professor, at \$2,600; on leave of absence	
R. L. Birdwhistell, Lecturer (Sessional)	2,200.00
C. W. M. Hart, Special Lecturer (Sessional; paid also \$3,300 in Political Economy)	200.00
Mrs. L. Winifred Bryce, Class Assistant (Sessional)	250.00
	\$ 7,450.00
Archaeology	
C. T. Currelly, Professor (paid also \$4,000 in Royal Ontario Museum)	\$ 2,000.00
H. A. Thomson, Associate Professor of Classical Archaeology, at \$4,000; on War Service; contribution to Teachers' Insurance and Annuity Association	200.04
Special Lecturers (Sessional):	
Mrs. Dorothy B. Thomson, Classical Archaeology (paid also \$175 for Extension Work)	1,900.00
Peter Brieger, Fine Art (paid also \$3,000 in Fine Art and \$300 in Faculty of Applied Science)	300.00
Rt. Rev. W. C. White, Chinese Archaeology, without salary (paid \$2,500 in School of Chinese Studies and \$2,000 in Royal Ontario Museum)	
	\$ 4,400.04
Astronomy	
R. K. Young, Professor; also Director of David Dunlap Observatory	\$ 4,500.00
F. S. Hogg, Associate Professor	3,600.00
Lecturers (Sessional; on War Service):	
P. M. Millman, at \$2,400; contribution to Teachers' Insurance and Annuity Association	120.00
J. F. Heard, at \$2,150; contribution to Teachers' Insurance and Annuity Association	107.52
Miss R. J. Northcott, Lecturer (Sessional)	1,800.00
Mrs. Helen S. Hogg, Lecturer and Research Associate (Sessional)	1,200.00
G. F. Longworth, Observer, at \$1,600; on War Service; contribution to Pension Fund	44.00
Summer Assistants:	
D. K. Norris	500.00
W. S. Armstrong	150.00
G. F. D. Duff (paid also \$151.67 in Special Research)	100.00
Miss E. M. Fuller, Secretary-Librarian (part-time)	800.00
	\$ 12,921.52
Botany	
Professors:	
H. S. Jackson, Mycology; also Head of Department	\$ 5,500.00
G. H. Duff	4,700.00
H. B. Sifton	4,700.00
D. L. Bailey (part-time)	3,800.00
L. C. Coleman (part-time)	2,700.00
Assistant Professors:	
Dr. J. Gertrude Wright	3,200.00
T. M. C. Taylor, at \$3,000; on War Service; contribution to Teachers' Insurance and Annuity Association	150.00
Lecturers (Sessional):	
A. J. V. Lehmann	2,300.00
M. W. Bannan	2,000.00
Miss D. F. Forward	2,000.00

D. H. Hamly	\$ 2,000.00	
N. W. Radforth (paid also \$75 for Extension Work).....	2,000.00	
R. F. Cain, Curator and Demonstrator.....	2,000.00	
Class Assistants (Sessional):		
Miss C. Curtis	560.00	
Miss V. Facey (paid also \$140 in Special Research).....	560.00	
H. M. Good (paid also \$70 in Special Research).....	560.00	
A. R. A. Taylor.....	560.00	
R. G. Atkinson, at \$560; resigned May 15.....	525.00	
K. H. Rothfels, at \$560; resigned January 31 (paid also \$140 in Special Research)	280.00	
D. A. Fraser, at \$560, from February 1 to May 31.....	280.00	
Dr. Kathleen L. Hull, Librarian and Teaching Assistant	1,600.00	
Technical Assistants:		
Miss C. B. Ross.....	1,800.00	
A. R. Gopal-Ayengar.....	1,600.00	
L. Van Cleemput, Horticulturist, at \$2,200 and \$200 additional allowance	2,400.00	
R. Lynn, Stock-Keeper and Technician, at \$1,300; on War Service; contribution to Pension Fund	32.50	
D. S. Hull, Stock-Keeper and Senior Laboratory Attendant, at \$1,060 and \$200 additional allowance (paid also \$20 for Extension Work)	1,260.00	
Clerical Assistants:		
Miss L. Alward	1,400.00	
Miss R. Hobberlin	1,400.00	
Laboratory Attendants and Assistants:		
Miss A. Vance	1,000.00	
Miss P. T. Malone	960.00	
S. G. Smith, at \$1,000; on War Service; contribution to Pension Fund.....	37.50	
		\$ 53,865.00

Chemistry

Professors:		
A. R. Gordon, also Head of Department	\$ 5,700.00	
G. F. Wright	5,500.00	
J. T. Burt-Gerrans, Electro-Chemistry.....	4,600.00	
L. J. Rogers, Analytical Chemistry.....	4,600.00	
Associate Professors:		
J. B. Ferguson	4,400.00	
F. E. Beamish	4,200.00	
W. S. Funnell	4,200.00	
F. R. Lorrinan	4,000.00	
Assistant Professors:		
D. J. LeRoy.....	3,500.00	
F. E. W. Wetmore.....	3,000.00	
Lecturers (Sessional):		
J. J. Rae (paid also \$194 for Extension Work and \$100 from Dental Research Fund)	2,800.00	
Miss E. V. Eastcott.....	2,000.00	
Lecturers in Micro-Analysis (Sessional):		
Mrs. Reta Currah, at \$1,100; resigned February 28	733.34	
Miss R. LaPrairie, May and June.....	220.00	
Assistants (Sessional):		
H. G. McLeod (paid also \$75 from Special Funds for Accelerated Course in Dentistry)	786.50	
A. Kahn	750.00	
P. E. Braid (paid also \$50 in Applied Science Summer Course, 1945)	724.00	
K. K. Carroll	724.00	
G. A. Ingham	724.00	
F. H. Krenz	724.00	
J. C. MacKenzie	724.00	
A. L. Rosenberg	724.00	

H. F. V. Wall	\$	724.00	
D. E. Ryan (paid also \$75 from Special Funds for Accelerated Course in Dentistry)		712.50	
Miss E. M. S. Arthur		710.00	
R. E. Thiers		710.00	
J. S. Brawn		650.00	
H. R. Chipman		650.00	
C. M. Finigan (paid also \$150 in Applied Science Summer Course, 1945)		650.00	
H. J. Knowlton		650.00	
D. L. MacDonald		650.00	
H. Mendelsohn		650.00	
J. W. Suggitt		650.00	
M. Milford, at \$650; resigned April 30		568.75	
D. White, November 15 to May 31		528.12	
A. W. Beecroft, at \$650; resigned March 31		487.50	
Miss M. Blackburn, at \$650; resigned November 15		121.88	
Mrs. Marguerite A. Thomson, 1 month		100.00	
Temporary Demonstrators:			
H. I. Schiff		135.00	
Miss D. Line		35.00	
R. Fortescue, Laboratory Attendant (with rooms, heat and light valued at \$420 as Caretaker)		1,350.00	
W. Banton, Laboratory and Lecture Assistant		1,800.00	
Mrs. Audrey Braid, Secretary-Assistant and Librarian		1,200.00	
Laboratory Attendants:			
E. Chadwick, at \$20 per week		1,043.33	
Miss M. Porter, at \$16 per week		834.67	
R. Porter, at \$14 and \$15 per week		745.67	
F. Twigg, 92 hours at 60c		55.20	
	\$	71,745.46	
Organic Chemistry Research:			
H. O. L. Fischer, Professor (paid \$5,000 from Special Fund)	\$	3,000.00	
Erich Baer, Assistant Professor		2,040.00	
J. M. Grosheintz, Research Associate			
Technicians:			
D. Edson, at \$780; on War Service		840.00	
Miss N. Gleaston			
Mrs. Cora McCallum, Laboratory Attendant, 5 weeks at \$5.60; 38 weeks at \$6.75 (paid also \$350 in Faculty of Medicine)		284.50	
			\$ 77,909.96
Fine Art			
John Alford, Professor	\$	5,000.00	
Peter Brieger, Associate Professor (paid also \$300 in Archaeology and \$300 in Faculty of Applied Science)		3,000.00	
C. F. Comfort, Assistant Professor, without salary; on leave of absence			
P. Haworth, Lecturer (Sessional; part-time)		700.00	
M. Baldwin, Special Lecturer, without salary (Sessional)			
Instructors (Sessional; part-time):			
C. Atkins		1,200.00	
Mrs. B. C. Haworth		250.00	
Miss R. M. Home, Special, without salary (paid in Royal Ontario Museum)			
Mrs. Isabelle Whitley, Reader (Sessional)		150.00	
Miss G. Bray, Secretary-Librarian (Sessional)		600.00	
			\$ 10,900.00
Geography			
Griffith Taylor, Professor; also Head of Department (paid also \$2,500 in Ontario College of Education)		4,000.00	
Assistant Professors:			
G. Tatham (paid also \$137.50 for Extension Work)		2,700.00	
D. F. Putnam (paid also \$12.50 for Extension Work)		2,600.00	

Fellows (Sessional):	
W. H. Draper.....	\$ 700.00
D. W. Kirk (paid also \$72.50 as part-time Assistant)	700.00
Assistants (Sessional; part-time):	
R. Ruggles.....	115.00
W. C. Wonders.....	115.00
Miss M. Lustig, Michaelmas Term.....	72.50
D. W. Kirk, Easter Term (paid also \$700 as Fellow).....	72.50
	\$ 11,075.00

Geology

Professors:	
E. S. Moore; also Head of Department (paid also \$100 for Summer Field Work)	\$ 5,500.00
G. B. Langford, Mining Geology, at \$4,900; on leave of absence.....	4,400.00
A. MacLean (paid also \$12.50 for Extension Work).....	
Assistant Professors:	
L. S. Russell, at \$2,800; on War Service; contribution to Teachers' Insurance and Annuity Association.....	140.04
Dr. Madeleine A. Fritz (part-time; paid also in Royal Ontario Museum and \$280 for Extension Work).....	1,100.00
Lecturers (Sessional):	
W. W. Moorhouse, at \$1,800; on War Service; contribution to Teachers' Insurance and Annuity Association	90.00
H. S. Scott (paid also \$300 for Extension Work)	800.00
F. G. Smith, Special Lecturer (Sessional)	2,800.00
Demonstrators (Sessional):	
R. Beland.....	500.00
J. W. M. Kerr (paid also \$140 for Extension Work)	500.00
G. M. T. Marshall, Class Assistant (Sessional; at \$250; resigned April 30).....	218.75
Miss J. Maxwell, Stenographer-Librarian (part-time; paid also \$500 in Mineralogy).....	500.00
W. D. Norgate, Laboratory Attendant, 35 weeks	700.00
	\$ 17,248.79

History

Professors:	
Chester Martin; also Head of Department	\$ 5,500.00
R. Fleuley (paid also \$300 in Arts Summer Course, 1945)	5,000.00
F. H. Underhill (paid also \$175 for Extension Work and \$5 from University Press)	4,800.00
G. W. Brown (paid also \$319 for Extension Work and \$400 from University Press).....	4,600.00
B. Wilkinson, Mediaeval History.....	4,600.00
Associate Professors:	
Edgar McInnis, at \$3,800 and \$200 additional allowance (paid also \$5 from University Press).....	4,000.00
D. J. McDougall, at \$3,500 and \$200 additional allowance (paid also \$450 for Extension Work)	3,700.00
G. de T Glazebrook, at \$3,850 ;on War Service; contribution to Teachers Insurance and Annuity Association.....	192.60
D. G. Creighton, at \$4,000; on leave of absence (paid from Special Funds).....	
R. M. Saunders, Assistant Professor (paid also \$693 for Extension Work and \$300 in Arts Summer Course, 1945)	3,400.00
Miss H. Neatby, Special Lecturer (Sessional; paid also \$175 for Extension Work)	3,300.00
Instructors (Sessional; part-time):	
W. R. Graham	1,000.00
H. B. L. Hughes	750.00
Mrs. Elaine G. Mitchell, Reader (Sessional)	500.00
Miss F. C. Hahn, Secretarial Assistant, 9 months	1,000.00
	\$ 42,342.60

Italian and Spanish

Professors:

M. A. Buchanan	\$ 6,000.00
J. E. Shaw	6,000.00
Emilio Goggio (paid also \$250 for Extension Work)	1,600.00

Associate Professors:

G. C. Patterson	4,000.00
Juan Cano (paid also \$500 for Extension Work)	4,000.00

Instructors (Sessional):

N. H. Tayler (paid also \$250 for Extension Work)	1,500.00
Miss M. I. Sirdevan	1,250.00
Mrs. Elizabeth Thomas	1,250.00
Miss V. Bowles, Special	800.00

\$ 29,400.00

Law

Professors:

W. P. M. Kennedy, Constitutional Law, without salary (paid \$6,000 as Dean of the School of Law)	\$
F. C. Auld, Jurisprudence, without salary (paid \$4,700 in School of Law)	
J. Finkelman, Administrative and Industrial Law, without salary (paid \$4,200 in School of Law)	

Assistant Professors:

J. E. M. Hancock, without salary (paid \$2,500 in School of Law)	
B. Laskin, without salary (paid \$2,500 in School of Law)	
G. D. Kennedy, Lecturer (Sessional; without salary; paid \$1,500 in School of Law)	

Special Lecturers (Sessional; without salary):

Dr. Sidney E. Smith (paid \$5,250 as Executive Assistant to the President and \$5,250 as Principal of University College)	
H. G. Fox, Industrial Property	

Mathematics

Professors:

S. Beatty (paid also \$1,000 as Dean)	\$ 6,000.00
I. R. Pounder (paid also \$800 in the Applied Science Summer Course, 1945)	4,900.00

Associate Professors:

W. J. Webber	4,400.00
N. E. Sheppard (paid also \$500 Honorarium for the quinquennial Employees' Pension Report)	4,300.00
A. F. C. Stevenson	4,300.00
D. A. F. Robinson	3,600.00
R. Brauer (paid also \$800 in the Applied Science Summer Course, 1945)	3,500.00
J. D. Burk (paid also \$800 in the Applied Science Summer Course, 1945)	3,500.00
H. S. M. Coxeter (paid also \$420 for Extension Work)	3,500.00
L. Infeld	3,500.00
G. de B. Robinson, at \$2,800; on War Service; contribution to Teachers' Insurance and Annuity Association	140.04

Assistant Professors:

A. Weinstein (paid also \$250 for Extension Work)	2,800.00
D. B. DeLury (paid also \$500 from Medical Research Banting Fund)	2,500.00
Miss C. Krieger (paid also \$94 for Extension Work)	2,500.00

Lecturers (Sessional):

Miss M. E. G. Waddell	2,200.00
B. A. Griffith, at \$2,250; on leave of absence	
D. C. Baillie, at \$1,550; on War Service; contribution to Teachers' Insurance and Annuity Association	77.52

Fellows (Sessional):

L. S. Sinclair.....	750.00	
A. Schild (paid also \$700 in Applied Science Summer Course, 1945)	750.00	
J. A. Jenkins (paid also \$700 in Applied Science Summer Course, 1945).....	650.00	
R. G. Stanton.....	650.00	
R. Steinberg.....	650.00	
	<hr/>	\$ 55,167.56

Military Studies

Major M. Barry Watson, Director and Assistant Professor, at \$2,600; part-time, \$1,600; Honorarium as Special Lecturer \$300.....	\$ 1,900.00	
W. A. Baughurst, Assistant, 10 months.....	1,100.00	
	<hr/>	\$ 3,000.00

Mineralogy

Professors:

J. Ellis Thomson, also Head of Department, at \$5,100; Ob. September 26; (paid also \$140 for Extension Work); balance of salary granted to Widow; Ob. May 12.....	\$ 4,414.50	
M. A. Peacock.....	5,000.00	
V. B. Meen, Assistant Professor (paid also in Royal Ontario Museum and \$125 for Extension Work).....	2,360.00	
E. W. Nuffield, Lecturer (Sessional; paid also \$1,000 in Applied Science Summer Course, 1945).....	2,000.00	
R. M. Thompson, Demonstrator (Sessional; paid also \$150 for Extension Work).....	600.00	
Miss J. Maxwell, Secretary-Librarian (paid also \$500 in Geology).....	500.00	
W. Wightman, Laboratory Attendant, 9 months (paid also in Royal Ontario Museum and \$50 for Extension Work).....	1,000.00	
	<hr/>	\$ 15,814.50

Philosophy

Professors:

G. S. Brett, Ob. October 27; balance of salary paid to Widow (paid also at \$1,000 in Ethics and at \$1,000 in School of Graduate Studies).....	\$ 5,000.00	
F. H. Anderson.....	4,800.00	
H. R. MacCallum.....	4,600.00	
W. J. McCurdy, Associate Professor.....	3,200.00	
T. A. Goudge, Assistant Professor, at \$2,700; on War Service; contribution to Teachers' Insurance and Annuity Association.....	135.00	

Lecturers (Sessional):

G. Edison, at \$2,800, of which one-third paid by Trinity College (paid also \$438 for Extension Work).....	1,866.66	
D. Savan (paid also \$1,000 in Ethics).....	1,300.00	

Assistants (Sessional; part-time):

D. L. Crocker.....	200.00	
L. Shein.....	200.00	
	<hr/>	\$ 21,301.66

Physics

Professors:

E. F. Burton; also Director of Physical Laboratory.....	\$ 6,500.00	
J. Satterly.....	5,500.00	
H. J. C. Ireton.....	4,500.00	
J. Patterson, Honorary.....		

Associate Professors:

D. S. Ainslie.....	4,000.00	
M. F. Crawford.....	4,000.00	
H. Grayson Smith.....	4,000.00	
C. Barnes; on War Service at \$3,600 to August 31; at \$4,000 from September 1.....	3,363.34	

J. O. Wilhelm, at \$3,600; on War Service; contribution to Teachers' Insurance and Annuity Association	180.00
Arnold Pitt, at \$3,600; resigned September 30	900.00
Assistant Professors:	
Miss E. J. Allin	\$ 2,700.00
J. M. Anderson	2,700.00
R. Richmond	2,600.00
Miss K. M. Crossley	2,400.00
Miss F. M. Quinlan	2,400.00
H. L. Welsh, at \$2,400; on War Service; contribution to Teachers' Insurance and Annuity Association	120.00
A. D. Misener, Lecturer and Demonstrator (Sessional)	2,200.00
C. G. Fraser, Special Lecturer (Easter Term)	300.00
Demonstrators (Sessional):	
Miss M. E. B. McKinley	1,700.00
Mrs. Dorothy Elson	1,512.50
S. G. Ellis	1,275.00
G. A. Wrenshall (paid also \$1,500 from Medical Research Best Fund)	1,000.00
R. W. McKay	600.00
Mrs. Mattie Rotenberg	500.00
Mrs. Louise Morrison, at \$600; resigned November 30	150.00
Assistant Demonstrators (part-time at \$1.25 per hour):	
J. L. Kerwin	365.63
P. H. D. Templin	265.00
P. W. R. Wade	265.00
Mrs. Clara Morrison	171.25
J. F. Hart	167.50
J. N. P. Hume	138.75
J. T. Dewan	137.50
D. M. Eisen	137.50
C. C. Cornett	135.00
L. N. Furry	135.00
I. D. Morrison	135.00
M. E. Baker	120.00
G. N. Boyd	120.00
L. A. Kaufman	120.00
J. E. Noakes	120.00
J. W. MacArthur	118.75
M. K. Price	116.25
E. J. Pivnick	112.50
A. C. McDonald	110.00
R. M. Bennett	108.75
H. Sobcov	107.50
D. H. W. Kirkwood	102.50
J. M. Spinks	100.00
K. N. Stevens	98.75
D. F. D'Arcy	92.50
J. H. Harrold	91.25
W. M. Kerrigan	85.00
G. B. MacSween	20.00
Miss I. E. Struthers	17.50

H. D. Ball, Assistant in Histology (paid also \$250 in School of Physical and Health Education).....	500.00	
Mrs. Dorothy I. Chubb, Assistant in Museum, at \$800; resigned December 31.....	400.00	
Y. T. Beh, Fellow, at \$1,200 from July 16	1,150.00	
H. E. LeMasurier, Senior Technical Assistant, at \$1,900; on War Service; contribution to Pension Fund	52.25	
Technical Assistants:		
H. F. Whittaker.....	1,650.00	
G. A. L. Ross.....	1,450.00	
Mrs. Clodagh Dowling, at \$1,080; resigned April 30.....	900.00	
C. Storton, Prosecutor and Museum Technician, at \$1,500; on War Service; contribution to Pension Fund.....	41.25	
Laboratory Assistants:		
H. McCormick, at \$1,950 and \$5.50 overtime.....	1,955.50	
J. Clarke, at \$1,300 and \$4.50 overtime.....	1,304.50	
M. J. Shepherd (paid also \$1,700 as Caretaker).....	169.50	
P. Wilcox, at \$750; on War Service.....		

Clerical Assistants:	
Miss G. Dowsley	\$ 1,400.00
Miss N. Joy, temporary	120.00
	<hr/>
	\$ 40,936.33
Less paid by School of Nursing	200.00
	<hr/>
	\$ 40,736.33

Art Service

Miss M. T. Wishart, Director	\$ 2,750.00
Miss M. Drummond, Assistant	1,400.00
Assistants (part-time; temporary):	
Mrs. Eila I. Ross	432.00
Miss E. Blackstock	285.65
Mrs. G. L. Storey	200.00
	<hr/>
	\$ 5,067.65
Less paid from Special Funds	300.00
	<hr/>
	\$ 4,767.65

Bio-Chemistry

Professors:	
H. Wasteneys (paid also \$200 as Special Lecturer)	\$ 6,000.00
A. M. Wynne	4,800.00
L. Young	4,200.00
B. F. Crocker, Lecturer, at \$2,400; on War Service; contribution to Teachers' Insurance and Annuity Association	120.00
Mrs. Jeanne M. Fisher, Demonstrator (Sessional; paid also \$1,700 in Faculty of Arts and \$145.75 from Special Funds)	1,100.00
Fellows (Sessional):	
J. A. McCarter (paid also \$137.50 from Special Funds)	1,000.00
W. D. Graham (paid also \$123.75 from Special Funds)	900.00
S. H. Zbarsky (paid also \$123.75 from Special Funds)	900.00
J. F. Morgan (paid also \$110 from Special Funds)	800.00
S. J. Patrick (paid also \$110 from Special Funds)	800.00
L. Sloan, Senior Technician	2,000.00
Technicians:	
J. W. Fletcher	1,800.00
Michael Edson	1,600.00
J. H. McClary	1,350.00
Laboratory Assistants:	
W. Clough	1,200.00
Mrs. Lucy Lombard	1,100.00
Laboratory Attendants:	
Mrs. Ethel Wilkie	1,000.00
Temporary:	
F. Harris, 36 weeks, at \$20 and \$23	808.83
F. G. Phillips, 10 weeks, 5 days, at \$20 and \$23 per week	234.67
F. Skilling, 2 weeks at \$20	40.00
Miss M. Delamere, Secretarial Assistant (paid also \$155 from Special Funds)	1,500.00
	<hr/>
	\$ 33,253.50

Hygiene and Preventive Medicine

D. T. Fraser, Professor (paid also in Connaught Laboratories; also in School of Hygiene, without salary)	\$ 4,500.00
Associate Professors:	
F. O. Wishart	3,450.00
Dr. Frieda H. Fraser (paid also in Connaught Laboratories)	1,100.00
M. H. Brown, at \$1,100 (also in Connaught Laboratories); on War Service; contribution to Teachers' Insurance and Annuity Association	55.08

Lecturers (Sessional):

A. M. Goulding (paid also \$150 in School of Physical and Health Education).....	1,044.00	
Miss H. C. Plummer (paid also in Connaught Laboratories).....	500.00	
R. Hare (paid also in Connaught Laboratories) and \$100 from Special Funds).....	400.00	
W. B. McClure, Parasitology.....	250.00	
Miss G. Mickle, Class Assistant (paid also \$250 from Special Funds)	1,200.00	
A. J. Bishop, Technician (paid also \$200 in School of Hygiene and \$200 from Special Funds).....	1,300.00	
Laboratory Assistants:		
Mrs. Florence E. Blake, at \$800; resigned October 14.....	230.11	
Miss A. Camilleri, at \$800 from October 11.....	578.50	
Secretarial Assistants:		
Mrs. Olive Munro.....	1,200.00	
Miss E. Barr, at \$1,200; on War Service; contribution to Pension Fund.....	33.00	
		\$ 15,840.69

Medical Jurisprudence

Lecturers (Sessional):

K. G. Gray.....	\$ 175.00	
W. L. Robinson (paid also \$2,200 in Pathology and Bacteriology)	115.00	
S. Lawson.....	50.00	
L. J. Rogers (paid also \$4,600 in Faculty of Arts).....	10.00	
		\$ 350.00

Medicine and Clinical Medicine

Duncan Graham, Professor.....	\$ 10,000.00
Assistant Professors:	
W. R. Campbell.....	2,000.00
Half-time:	
R. F. Farquharson (paid also \$1,000 in Therapeutics).....	1,000.00
W. F. McPhedran (paid also \$125 from Special Funds).....	500.00
Part-time	
H. K. Detweiler (paid also \$75 from Special Funds).....	300.00
G. W. Howland, retired June 30.....	300.00
J. D. Loudon.....	300.00
E. J. Trow (paid also \$75 from Special Funds).....	300.00

Associates:

Half-time:

Trevor Owen (paid also \$115 in School of Nursing and \$125 from Special Funds).....	500.00
W. P. Warner, at \$500; on War Service.....	

Part-time:

R. G. Armour (paid also \$50 for Extension Work and \$65 from Special Funds).....	250.00
E. E. Cleaver (paid also \$65 from Special Funds).....	250.00
H. A. Dixon (paid also \$15 in School of Nursing and \$65 from Special Funds).....	250.00
A. A. Fletcher, at \$250; on leave of absence.....	
Dr. Beverley Hannah (paid also in Connaught Laboratories and \$50 in School of Nursing).....	250.00
J. Hepburn (paid also \$65 from Special Funds).....	250.00
J. H. McPhedran.....	250.00
F. W. Rolph.....	250.00

Senior Demonstrators:

H. H. Hyland (paid also \$25 in Health Service).....	1,000.00
G. W. Loughheed (half-time; paid also \$125 from Special Funds)	500.00

Sessional (part-time):

G. Bates (paid also \$20 in School of Nursing and \$60 from Special Funds).....	200.00
---	--------

G. F. Boyer	200.00
E. A. Broughton	200.00
J. G. Falconer (paid also \$60 from Special Funds)	200.00
E. J. Maltby (paid also \$30 for Extension Work and \$60 from Special Funds)	200.00
W. E. Ogden (paid also \$60 from Special Funds)	200.00
J. A. Dauphinee, Senior Demonstrator in Clinical Microscopy, without salary (also Junior Demonstrator); on War Service	
H. M. Gray, Junior Demonstrator in Clinical Microscopy (Sessional)	250.00
Junior Demonstrators:	
Full-time:	
H. E. Rykert (paid also \$40 for Extension Work)	1,000.00
On War Service:	
R. A. Cleghorn, at \$3,000	
R. B. Kerr, at \$2,400	
J. A. Dauphinee, at \$2,000 (also Senior Demonstrator in Clinical Microscopy)	
J. W. Graham, at \$1,000	
Sessional (part-time):	
A. F. W. Anglin	150.00
E. F. Brooks	150.00
C. R. Burton	150.00
T. A. Crowther	150.00
A. R. Hagerman	150.00
F. C. Hamilton	150.00
E. S. Jeffrey (paid also \$1,000 in Health Service)	150.00
L. M. Murray	150.00
V. F. Stock (paid also \$40 from Special Funds)	150.00
On War Service:	
Ian Macdonald, half-time at \$500	
Part-time, at \$150:	
W. H. Brown	
A. E. Parks	
N. M. Wrong	
R. L. Stirrett, Fellow (paid also \$150 in Therapeutics)	1,000.00
Research Assistants:	
Miss M. I. Hanna	1,500.00
N. W. Simmons, at \$1,440; on War Service	
Miss K. Lee, Technical Assistant	1,140.00
R. H. Wilson, Laboratory Assistant, at \$780; on War Service	
Miss S. H. Clutton, Secretary	1,560.00
	\$ 27,450.00

Obstetrics and Gynaecology

William A. Scott, Professor (paid also \$10 in School of Nursing)	\$ 5,000.00
Assistant Professors (each paid also \$75 from Special Funds):	
W. G. Cosbie (paid also \$30 in School of Nursing)	300.00
N. D. Frawley	300.00
H. B. Van Wyck	300.00
R. W. Wesley	300.00
Associates (each paid also \$65 from Special Funds):	
W. A. Dafoe	250.00
D. M. Low (paid also \$30 in School of Nursing)	250.00
S. J. N. Magwood	250.00
Senior Demonstrators (Sessional; each paid also \$60 from Special Funds):	
D. N. Henderson (paid also \$500 as Fellow)	200.00
H. W. Johnston	200.00
Kent Manning	200.00
Junior Demonstrators (Sessional):	
M. C. Watson, at \$150; returned from War Service, March 1	50.00
Each paid also \$40 from Special Funds:	
L. T. A. Armstrong	150.00

D. E. Cannell.....	150.00	
J. C. Goodwin.....	150.00	
J. C. Mann.....	150.00	
W. Murby.....	150.00	
F. J. O'Leary.....	150.00	
A. D. T. Purdy.....	150.00	
G. L. Watt.....	150.00	
On War Service, at \$150:		
R. B. Meiklejohn.....		
W. T. Noonan.....		
Fellows (Sessional):		
J. W. Ross.....	1,000.00	
D. N. Henderson (paid also \$200 as Senior Demonstrator).....	500.00	
Secretary, at \$900:		
Miss E. Marshall.....	900.00	
Miss H. Carson, on War Service; contribution to Pension Fund..	27.00	
		\$ 11,227.00

Ophthalmology

W. W. Wright, Professor and Head of Department.....	\$ 700.00	
Associates (each paid also \$60 from Special Funds):		
C. E. Hill (paid also \$10 in School of Nursing).....	200.00	
W. R. F. Luke.....	200.00	
A. E. Macdonald (paid also \$365 from Medical Research Banting Fund).....	200.00	
H. M. Macrae, Associate, at \$200; on War Service.....		
Senior Demonstrators (Sessional; each paid also \$60 from Special Funds):		
J. F. A. Johnston.....	200.00	
A. L. Morgan.....	200.00	
T.H.Hodgson, Junior Demonstrator, in charge of Dermatology (Sessional; paid also \$85 from Special Funds).....	700.00	
E. I. Glenister, Associate Resident Fellow.....	600.00	
Miss M. E. Gray, Technical Assistant (paid also \$500 in Otolaryngology).....	550.00	
Miss F. Richardson, Secretarial Assistant (part-time).....	150.00	
		\$ 3,700.00

Oto-Laryngology

A. A. Campbell, Professor and Head of Department.....	\$ 700.00	
Senior Demonstrators (Sessional; each paid also \$60 from Special Funds):		
H. H. Burnham.....	200.00	
J. X. Robert.....	200.00	
A. H. Veitch.....	200.00	
D. E. S. Wishart.....	200.00	
C. A. Rae, Senior Demonstrator, at \$200; on War Service.....		
Junior Demonstrators (Sessional; each paid also \$40 from Special Funds):		
G. A. Fee.....	150.00	
H. W. D. McCart.....	150.00	
G. C. Snell.....	150.00	
J. Grant Strachan.....	150.00	
J. Sullivan.....	150.00	
Junior Demonstrators (Sessional):		
G. W. McGregor, at \$150; on leave of absence.....		
On War Service:		
P. E. Ireland, at \$500.....		
A. M. McLeod, at \$150.....		
Miss M. E. Gray, Technician (paid also \$550 in Ophthalmology).....	500.00	
		\$ 2,750.00

Paediatrics

Alan Brown, Professor (paid also \$10 in School of Nursing)	\$	700.00	
Assistant Professors:			
F. F. Tisdall, also Director of Research Laboratories		2,000.00	
E. A. Morgan (paid also \$100 from Special Funds)		400.00	
A. W. Canfield (paid also \$65 from Special Funds)		250.00	
T. G. H. Drake, Associate		2,000.00	
Senior Demonstrators (Sessional):			
Dr. Gladys L. Boyd (paid also \$125 from Special Funds)		500.00	
A. P. Hart (paid also \$60 from Special Funds)		200.00	
G. E. Smith (paid also \$60 from Special Funds)		200.00	
W. W. Barraclough (paid also \$40 from Special Funds)		150.00	
Junior Demonstrators (Sessional):			
John R. Ross, at \$700 from July 22 (paid also \$85 from Special Funds)		660.49	
N. Silverthorne, also Research Assistant without salary (paid also \$30 in School of Nursing and \$75 from Special Funds)		300.00	
C. E. Snelling (paid also \$30 in School of Nursing and \$75 from Special Funds)		300.00	
J. H. Ebbs (paid also \$20 in School of Nursing and \$60 from Special Funds)		200.00	
Dr. Elizabeth C. Robertson (paid also \$60 from Special Funds)		200.00	
Without Salary:			
H. Edwards			
G. P. Hamblin			
On War Service:			
A. L. Chute, at \$300 (also in Physiology)			
W. A. Hawke, at \$200			
J. D. Keith, without salary			
S. H. Jackson, Research Assistant in Chemistry (Sessional)		900.00	
Werner Stein, Research Fellow, without salary			
A. V. Greaves, Research Pathologist, without salary (paid \$100 in Pathology and Bacteriology)			
Technicians in Research Laboratories:			
Miss E. Balsdon, at \$700; resigned July 21		39.51	
Miss W. M. Johnstone, without salary			
Miss M. L. Cassidy, Secretarial Assistant (part-time)		500.00	
	\$		9,500.00

Pathological Chemistry

Andrew Hunter, Professor (paid also at \$1,000 from March 1 as Dean of School of Graduate Studies)	\$	7,000.00	
T. F. Nicholson, Associate Professor		4,000.00	
Lecturers (Sessional):			
D. L. Selby (paid also \$408 in Health Service)		1,000.00	
R. W. I. Urquhart (paid also \$5,200 as Director of Health Service)		750.00	
Fellows (Sessional):			
A. G. Gornall, at \$1,200; on War Service			
C. S. McArthur (paid also \$2,000 from Medical Research Banting Fund)		1,000.00	
Demonstrators (Sessional):			
D. H. Boddington		500.00	
J. S. Wilson		250.00	
Assistants (Sessional; part-time):			
G. McNaughton		250.00	
J. A. Zeigler		250.00	
C. E. Downs, Technician (paid also \$300 in Health Service)		1,650.00	
C. H. Downs, Laboratory Assistant		1,400.00	
Laboratory Attendants:			
Mrs. J. Faulds		750.00	
Mrs. C. McCallum (paid also \$284.50 in Faculty of Arts)		350.00	
Miss C. A. Shannon, Secretary		1,400.00	
	\$		20,550.00

Pathology and Bacteriology

Professors:

William Boyd	\$ 8,000.00
W. L. Holman	5,000.00
W. L. Robinson, Bacteriology; also Associate Director of Applied Bacteriology (paid also \$115 in Medical Jurisprudence)	2,200.00

Assistant Professors:

P. H. Greey	1,800.00
I. H. Erb	300.00
W. Magner	300.00
G. Shanks	300.00

D. Nelson Henderson, Associate, Gynaecological Pathology, without salary (paid \$700 in Obstetrics and Gynaecology)

Lecturers (Sessional):

Dr. R. Margarite Price	3,000.00
D. E. O. Magner, at \$1,700; on War Service; contribution to Teachers' Insurance and Annuity Association	85.08

Fellows in Museum, at \$850:

L. Bapty, from February 5; resigned May 31	273.21
D. K. McElroy, from April 16 (paid also \$300 in Anatomy and \$133.33 in Surgery)	177.09
Dr. Dorothea M. MacDougall, resigned August 31	141.67

Dr. Diane Croll, Fellow in Pathology, at \$850 from December 6; resigned May 31

Dr. Alice E. Gray, Fellow in Bacteriology

R. G. D. McNeely, Senior Demonstrator in Pathology, at \$1,200; resigned May 31

Demonstrators in Pathology (Sessional):

A. V. Greaves (also in Paediatrics, without salary)	100.00
Dr. Vivian Laughlen	80.00
Dr. Ethel Morgan	80.00
Dr. Mary I. Tom (paid also \$2,400 in Neuropathology)	80.00

Demonstrators in Bacteriology (Sessional):

L. S. Mautner	100.00
Dr. Margaret S. Thompson	100.00
E. J. Clifford, without salary	

Assistants in Laboratory:

Miss N. W. Simpson, Pathology	1,500.00
Miss H. M. Boyd, Bacteriology	1,100.00

Special Technicians:

Miss A. Alvey, at \$1,200; on War Service to January 15	575.85
Mrs. Marion Coleman, at \$70 per month; resigned October 21 ..	257.42
F. Giles, at \$70 per month from October 22 (paid also \$235.36 as Laboratory Attendant) resigned January 15	202.60
Mrs. Vera Young, at \$80 per month; resigned August 12	110.97

Miss J. C. Burk, Technician

Miss E. Lowrey, Autopsy Technician

Miss A. MacGregor, Autopsy Recorder

Clement Hunt, Technician

Mrs. Wanda March, Junior Attendant in Museum

J. F. Payne, Preparator

Attendants for preparing Media:

Miss E. A. Gordon, Senior Technician, Pathology, 11 months ..

1,200.00

Laboratory Attendants, Bacteriology:

Miss D. Nunn, at \$840; on War Service	
Miss Helen Train	920.00

Junior Laboratory Attendants:

F. Giles, at \$780; transferred October 21 to Special Technician ..

Miss C. Shane, at \$40 per month from October 27; resigned March 9

A. G. Carmichael, at \$35 per month from February 19 to May 31

D. M. Johnson, 24 days

E. Bera, 4 days

Miss G. K. R. Boyd, Secretary	1,420.00	
Miss V. L. McKinnon, Museum Secretary	1,120.00	
Miss H. J. Williamson, Librarian and Assistant Secretary	1,140.00	
Temporary Clerical Assistants:		
Mrs. J. McDermott	92.90	
Mrs. Betty Symmonds	80.00	
Mrs. Isabel Lewis	40.00	
Mrs. Margaret Fisher	20.25	
		\$ 11,177.21
Division of Neuropathology:		
E. A. Linell, Professor	1,500.00	
Dr. Mary I. Tom, Lecturer (paid also \$80 as Demonstrator in Pathology)	2,400.00	
Technicians:		
Miss M. G. Hein	1,140.00	
Miss M. L. Howard, Medicine and Surgery	960.00	
Mrs. Margaret Brown, temporary	112.23	
Miss C. A. Bell, Secretary	1,200.00	
		\$ 51,489.44

Pharmacy and Pharmacology

V. E. Henderson, Professor	\$ 6,000.00	
Associate Professors:		
G. H. W. Lucas	4,000.00	
J. K. W. Ferguson, at \$3,600; on War Service; contribution to Teachers' Insurance and Annuity Association	180.00	
J. E. McBirney, Assistant, June	100.00	
Allan Brock, Technical Assistant	2,300.00	
A. C. Morrison, Technician, at \$1,100; on War Service; contribution to Pension Fund	30.25	
Mrs. Elsie Long, Laboratory Attendant	1,100.00	
J. McMahon, Cleaner and Animal Attendant, 37 weeks, 3 days, at \$23 per week	862.50	
A. McCallum, Cleaner and Laboratory Attendant, 1 week, 3 days at \$20 per week	30.00	
Miss D. Caldecott, Clerical Assistant	750.00	
		\$ 15,352.75

Physiology

Professors:		
C. H. Best (paid also \$5,000 as Director of Banting and Best Department of Medical Research)	\$ 6,000.00	
N. B. Taylor	5,000.00	
Associate Professors:		
D. Y. Solandt, at \$3,700 of which \$1,360 refunded on account of Naval Stipend (paid also \$300 from Medical Research Best Fund and \$2,000 from Special Funds)	2,340.00	
E. T. Waters, at \$3,300; on War Service; contribution to Teachers' Insurance and Annuity Association	165.00	
Assistant Professors:		
L. B. Jaques	3,000.00	
E. Fidler (paid also \$450 for Extension Work)	2,500.00	
R. E. Haist (paid also \$1,400 in School of Physical and Health Education and \$400 from Medical Research Best Fund)	2,000.00	
J. Campbell, at \$2,500; on War Service; contribution to Teachers' Insurance and Annuity Association	125.04	
E. H. Botterell, Lecturer (Sessional, at \$1,500; also in Surgery) on War Service; contribution to Teachers' Insurance and Annuity Association	75.00	
Fellows:		
M. A. Ashworth, at \$1,200 from September 1; transferred from April 1 to Special Funds	700.00	
Miss A. P. Dunlop	500.00	

A. S. Deacon (paid also \$500 in Anatomy).....	450.00	
D. K. McElroy (paid also \$300 in Anatomy and \$133.33 in Surgery).....	220.00	
Research Associates:		
Mrs. Jean P. Fletcher, from September 1 (paid also \$525 from Special Funds).....	550.00	
A. L. Chute, at \$1,500; on War Service (also in Paediatrics).....		
Research Assistants:		
M. J. Wilson, July 1 to October 31 (paid also \$400 in Anatomy)..	400.00	
Miss H. J. Bell, at \$1,500; transferred from September 1 to Special Funds.....	250.00	
Miss A. G. Macdonald, at \$960; transferred from September 1 to Special Funds.....	160.00	
A. J. Stonyer, Technical Assistant (paid also \$1,392.95 from Special Funds).....	1,259.14	
J. D. Brown, Technical Assistant in Bio-Physics (paid also \$330 from Special Funds).....	1,600.00	
F. L. Robinson, Technical Assistant and Glass-blower (paid also \$500 from Medical Research Best Fund).....	2,000.00	
Temporary Technical Assistants:		
W. Benson.....	151.20	
W. Wilson.....	50.67	
A. Elliott, Mechanician, retired June 30.....	1,900.00	
G. Scattergood, Laboratory Assistant to Teaching Laboratories, at \$1,250; on War Service; contribution to Pension Fund.....	34.40	
Animal Caretakers, on War Service:		
G. L. Robinson, at \$1,350; contribution to Pension Fund.....	33.75	
S. McCracken, at \$1,040.....		
A. D. Crouch, Assistant Animal Caretaker, at \$1,100; on War Service; contribution to Pension Fund.....	30.25	
Miss M. Cory, Department Librarian.....	1,350.00	
Miss D. Secord, Secretarial Assistant (paid also \$150 from Medical Research Best Fund).....	1,350.00	
		\$ 34,194.45

Psychiatry

C. B. Farrar, Professor.....	\$ 5,000.00	
E. P. Lewis, Assistant Professor (paid also \$125 from Special Funds)..	500.00	
Dr. Mary V. Jackson (paid also \$100 in School of Hygiene; \$110 for Extension Work and \$65 from Special Funds).....	250.00	
Demonstrators (Sessional):		
G. W. Anderson (paid also \$100 in Faculty of Arts).....	150.00	
Dr. Ruth M. Franks (paid also \$200 for Extension Work).....	150.00	
Dr. B. T. McGhie (paid also \$100 in School of Hygiene) Ob. January 20.....	150.00	
L. D. Proctor (paid also \$2,500 in Psychiatric Research and \$40 from Special Funds).....	150.00	
G. H. Lugsdin, at \$150; on War Service.....		
K. G. Gray, Fellow in Forensic Psychiatry, without salary.....		
Miss A. F. Abbott, Secretarial Assistant, without salary.....		
		\$ 6,350.00

Radiology

G. E. Richards, Professor.....	\$ 700.00	
A. C. Singleton, Assistant Professor.....	250.00	
Senior Demonstrators (Sessional):		
M. M. R. Hall.....	200.00	
A. H. Rolph.....	200.00	
J. Somers, at \$200; on War Service.....		
H. M. Worth, Research Assistant (Sessional)...	750.00	
C. L. Ash, Assistant, part-time.....	500.00	
		\$ 2,600.00

Special Lectures

Special Lecturers (Sessional):

Dentistry:

A. D. A. Mason (paid also \$6,000 in Faculty of Dentistry)	\$ 100.00
D. M. Tanner, at \$100 (also in Faculty of Dentistry); on War Service	

History of Science and Civilization:

A. F. Coventry (paid also \$4,100 in Faculty of Arts)	200.00
H. Wasteneys (paid also \$6,000 in Bio-Chemistry)	200.00

Social Medicine:

S. K. Jaffary (paid also \$4,050 in School of Social Work)	60.00
--	-------

Medical Ethics and Economics:

G. S. Young, without salary	\$ 560.00
-----------------------------	-----------

Surgery and Clinical Surgery

W. E. Gallie, Professor (paid also \$1,000 as Dean of Faculty)	\$ 10,000.00
--	--------------

Assistant Professors (each paid also \$75 from Special Funds):

T. A. J. Duff	300.00
R. R. Graham	300.00
R. I. Harris	300.00
A. B. LeMesurier	300.00
K. G. McKenzie	300.00
R. Pearse	300.00
N. S. Shenstone	300.00
G. E. Wilson	300.00
H. W. Wookey	300.00

Associates (each paid also \$65 from Special Funds):

G. S. Foulds	250.00
R. E. Gaby	250.00
R. M. Janes	250.00
R. J. A. McComb	250.00
J. L. McDonald	250.00
C. B. Parker	250.00
T. A. Robinson	250.00
R. H. Thomas	250.00

J. W. Ross, Associate at \$250 on War Service

Senior Demonstrators (Sessional; each paid also \$60 from Special Funds):

H. G. Armstrong	200.00
J. H. Couch (paid also \$30 in School of Nursing)	200.00
C. R. B. Crompton	200.00
C. W. Harris	200.00
J. C. McClelland	200.00
D. W. G. Murray	200.00
J. Spence Reid	200.00
N. W. Roome	200.00
R. M. Wansbrough (paid also \$25 in Health Service and \$70 for Extension Work)	200.00

J. A. MacFarlane, Senior Demonstrator at \$200; on War Service

Junior Demonstrators (Sessional; each paid also \$40 from Special Funds):

W. G. Carscadden	150.00
J. T. Danis	150.00
F. I. Lewis	150.00
D. W. Pratt	150.00
E. E. Shouldice	150.00
A. W. M. White	150.00

Junior Demonstrators, at \$150 (Sessional; returned from War Service, January 1):

J. W. Brennan	75.00
S. A. Thomson	75.00

Junior Demonstrators at \$150 (Sessional; on War Service):

A. W. Farmer	\$
S. D. Gordon
W. S. Keith
R. C. Laird
D. R. Mitchell
T. R. Sarjeant
C. H. Watson
W. K. Welsh

Special Demonstrators (Sessional; each paid also \$40 from Special Funds):

M. H. V. Cameron	150.00
G. W. Carrow	150.00
R. G. MacKenzie (paid also \$550 in Anatomy)	150.00
E. S. Ryerson (paid also \$5,200 as Assistant Dean and Secretary and \$500 in School of Physical and Health Education)	150.00
Wallace A. Scott	150.00
R. V. B. Shier	150.00
W. O. Stoddart	150.00
A. T. Jousse, Special Demonstrator in Neuro-Surgery, Sessional at \$600; resigned February 28	375.00

Fellows (part-time):

C. Aberhart	1,800.00
Dr. Mary I. Davis (paid also \$20 in School of Nursing)	1,000.00
Dr. Jessie C. Gray (paid also \$360 in Faculty of Dentistry and \$115 in School of Nursing)	1,000.00
F. R. Wilkinson	1,000.00
E. H. Botterell, at \$1,500 (also in Physiology); on War Service; contribution to Teachers' Insurance and Annuity Association	75.00

Resident Fellows (On loan from R.C.A.M.C.):

W. G. Bigelow, at \$1,000 from October 10 to March 31	475.81
E. B. Tovee, at \$1,000 from July 1 to October 10	276.88
A. MacDonald, at \$400 from November 1	266.67
H. V. Slemon, at \$400 from January 1	200.00
K. McElroy, at \$400 from July 1 to October 31 (paid also \$300 in Anatomy and \$220 in Physiology)	133.33

Assistant Resident Fellows (Sessional):

D. R. Bohnen	300.00
J. W. Long	300.00

On War Service, at \$300:

J. E. Bateman
G. C. Cooper
W. R. Dalziel
N. C. Delarue
F. P. Dewar
J. R. Francis
G. A. Lane
P. F. McGoey
E. G. Meyer
W. T. Mustard
E. B. Tovee
G. E. P. Wilson

Miss T. W. MacLaren, Secretary (also Secretary to the Dean; paid also \$200 from Special Funds) 1,500.00

\$ 27,302 69

Therapeutics

R. F. Farquharson, Assistant Professor and Head of Department (paid also \$1,000 in Department of Medicine) 1,000.00

Associates:

W. J. Gardiner, in charge of Physical Therapy (paid also \$500 for Extension Work)	400.00
C. E. Cooper Cole	250.00
H. J. Shields, in charge of Anaesthesia	250.00

Junior Demonstrators in Anaesthesia (Sessional):

G. R. Balfour	\$	150.00
W. E. Brown (paid also \$10 in School of Nursing)		150.00
C. G. Bryan		150.00
S. M. Campbell (paid also \$1,000 in Health Service)		150.00
J. Chassels		150.00
N. S. Clark		150.00
S. J. Evelyn		150.00
H. R. Hargrave		150.00
K. M. Heard		150.00
C. H. Robson		150.00
A. R. Wilkins (paid also \$232 in Health Service)		150.00
K. E. Hollis, at \$150; on War Service		

Assistants in Anaesthesia (Sessional; without salary):

D. C. Bastow
H. E. Hopkins
F. L. Junkin
R. H. Meredith

Miss L. Pollard, Assistant in Physical Therapy (paid also \$2,400 for Extension Work) 300.00

Assistants (Sessional):

R. L. Stirrett (paid also \$1,000 in Department of Medicine and \$50 from Special Funds) 150.00
J. A. Traynor 50.00
A. Douglas (paid also \$25 from Special Funds) 25.00

H. E. Pugsley, Research Assistant (Sessional) 800.00

Mrs. Jean L. Reid, Secretarial Assistant (part-time) 600.00

VII. SCHOOL OF HYGIENE

Salaries

(1) Administration:	
R. D. Defries, Director; also Professor of Hygiene and Epidemiology (paid also as Director of Connaught Laboratories)	\$ 5,000.00
D. T. Fraser, Associate Director, without salary (paid in Department of Hygiene and Preventive Medicine and in Connaught Laboratories)	
J. Craigie, Secretary (paid also \$500 as Associate Professor of Virus Infections and in Connaught Laboratories) ..	750.00
Miss M. A. Ross, Associate Secretary, without salary (paid as Associate Professor, Epidemiology and Biometrics) resigned August 31	
Office Assistants (part-time):	
K. M. Kerns, at \$625; on War Service (also at \$625 as Secretary, Department of Epidemiology and Biometrics); contribution to Pension Fund	34.40
Miss B. M. Calvin (paid also in Connaught Laboratories) ..	600.00
(2) Epidemiology and Biometrics:	
N. E. McKinnon, Professor and Head of Department (paid also in Connaught Laboratories)	3,500.00
Miss M. A. Ross, Associate Professor, at \$3,000; resigned August 31; salary paid to November 30	1,250.00
F. W. Jackson, Special Lecturer, honorarium, \$210; expenses, \$150.70	360.70
Mrs. Margaret R. Richardson, Fellow, from March 1, at \$1,500 and wartime bonus at \$125	511.68
Laboratory Assistants, Biometrics:	
Miss S. R. McCausland	1,100.00
W. Moore, at \$1,000; on War Service; contribution to Pension Fund	27.5

Secretaries:	
Miss C. A. Miles	\$ 1,000.00
K. M. Kerns, at \$625; on War Service (also at \$625 as Office Assistant, Administration)	
(3) Physiological Hygiene:	
Associate Professors:	
D. Y. Solandt; also Acting Head of Department (paid also \$3,700 in Faculty of Medicine and \$300 from Medical Research Best Fund)	2,000.00
D. L. McLean, at \$2,900; on War Service; contribution to Teachers' Insurance and Annuity Association	145.08
H. M. Barrett, Assistant Professor of Industrial Hygiene, at \$2,900; on War Service; contribution to Teachers' Insurance and Annuity Association	145.08
Lecturers (Sessional):	
J. G. Cunningham, Industrial Hygiene, part-time	500.00
Mrs. Ruth C. Partridge, part-time (paid also \$2,200 from Special Funds)	300.00
Research Fellows:	
J. Hunter, at \$1,800 and wartime bonus \$140	1,940.00
G. E. Mack, at \$1,200 and wartime bonus \$110	1,320.00
G. J. Millar	1,320.00
Miss D. M. Allan	1,056.00
Miss J. Lock, at \$960 and wartime bonus \$96	1,056.00
Miss A. C. Steele	960.00
Miss A. Mackley, from September 6; at \$960 and wartime bonus at \$96	875.34
H. N. MacFarland	400.00
Miss M. Rutland, at \$960 and wartime bonus at \$96; resigned August 15	132.00
Technical Assistants on War Service:	
K. E. Roseblade, at \$1,500; contribution to Pension Fund	41.25
W. Staples, at \$950; contribution to Pension Fund	23.75
Technicians:	
J. Horwood	1,200.00
R. N. Smith	1,200.00
Miss P. A. Clark, at \$960; and wartime bonus \$96	1,056.00
J. D. Brown (paid also \$1,600 in Faculty of Medicine)	330.00
Mrs. Margaret Fussell, Secretary	1,100.00
(4) Chemistry in relation to Hygiene:	
P. J. Moloney, Associate Professor (paid also in Connaught Laboratories)	2,800.00
Miss E. M. Taylor, Lecturer (Sessional; paid also in Connaught Laboratories)	500.00
Miss I. C. Adams, Technician	1,032.00
(5) Public Health Administration:	
R. D. Defries, Professor, Hygiene and Epidemiology (paid as Director)	
W. Mosley, Associate Professor, at \$4,350; on War Service; contribution to Teachers' Insurance and Annuity Association	200.04
Associates:	
Dr. Vera I. Binnington	3,200.00
Miss E. Wheeler, at \$2,200 and wartime bonus at \$156; resigned February 28	1,570.66
J. T. Phair	300.00
A. L. MacNabb	150.00
G. C. Brink	100.00
B. T. McGhie (paid also \$150 in Faculty of Medicine) Ob. January 20	100.00
Lecturers:	
O. C. Powers	3,900.00
A. E. Berry, Public Health Engineering (Sessional; paid also \$1,000 in Faculty of Applied Science)	750.00

Visiting Lecturers:	
D. V. Currey.....	300.00
Dr. Mary V. Jackson (paid also \$250 in Faculty of Medicine)	100.00
R. H. Malyon, Clinical Assistant, 9 months	187.50
Temporary Assistants:	
E. R. E. Halnan.....	250.00
Miss J. Farquharson.....	75.00
Miss E. Cartwright, Technician.....	820.00
(6) Nutrition:	
E. W. McHenry, Associate Professor (paid also in Connaught Laboratories).....	1,300.00
Miss H. J. Leeson, Clinical Assistant.....	2,620.00
Research Fellows:	
W. W. Hawkins, at \$1,300 and wartime bonus, \$115.....	1,415.00
Mrs. E. M. Semmons, from August 1, salary, \$1,277.50 and wartime bonus, \$113.88.....	1,391.38
Miss E. C. Armstrong, at \$1,200 and wartime bonus \$110 ..	1,310.00
Miss R. Virtue, at \$1,200 and wartime bonus \$110.....	1,310.00
Miss F. B. Swan, from October 1 at \$120 per month	1,080.00
Mrs. Helen M. Ferguson, at \$1,400 and wartime bonus at \$120; resigned August 31.....	253.34
J. Gurland, Statistician, July 1 to October 15, at \$125 per month	437.50
Technicians:	
Miss L. C. Barber, at \$1,120 and wartime bonus \$106.....	1,226.00
Mrs. Joan S. Scott, at \$890 and wartime bonus \$89.....	979.00
Miss E. James.....	840.00
Miss R. Wood, at \$780 and wartime bonus at \$78; on leave of absence without salary to August 15; resigned June 30	750.75
(7) Virus Infections:	
J. Craigie, Associate Professor (paid also \$750 as Secretary)	500.00
Lecturers (Sessional):	
R. C. Parker.....	250.00
R. Hare (paid also \$400 in Faculty of Medicine).....	250.00
A. J. Bishop, Technician (paid also \$1,300 in Faculty of Medicine)	200.00
(8) Parasitology:	
A. M. Fallis, Assistant Professor, without salary.....	
Mrs. Ella Kuitunen, Demonstrator	1,650.00
	\$ 65,362.95

VIII. FACULTY OF APPLIED SCIENCE

Salaries

Dean's Office

C. R. Young, Dean, Salary.....	\$ 6,000.00	
Expenses.....	1,500.00	
		\$ 7,500.00
W. S. Wilson, Assistant Dean (paid as Secretary to the Faculty).....		\$ 7,500.00

Applied Physics

K. B. Jackson, Professor.....	\$ 4,200.00	
V. L. Henderson, Assistant Professor.....	2,900.00	
E. L. Dodington, Lecturer (Sessional).....	2,000.00	
Demonstrators (Sessional):		
H. W. Allan.....	1,300.00	
T. E. Munford.....	1,200.00	
H. C. Jones, (part-time).....	700.00	
D. J. McConnell, Mechanician (paid also \$800 in Civil Engineering; Surveying and Geodesy).....	1,000.00	
Miss R. Cave, Office Assistant and Librarian (part-time; paid also \$650 in Civil Engineering; Surveying and Geodesy and \$100 in Photographic Service).....	650.00	
		\$ 13,950.00

School of Architecture

Professors:

H. H. Madill, also Head of Department; part-time at \$4,700 to December 31; full-time at \$4,900 from January 1.....	3,550.00
E. R. Arthur, Architectural Design; at \$4,700; on leave of absence at half salary from January 1.....	3,525.00

Assistant Professors:

H. J. Burden, at \$3,200; on War Service; contribution to Teach- ers' Insurance and Annuity Association.....	160.08
W. E. Carswell, Architectural Design (paid also \$500 in Applied Science Summer Course 1945).....	2,800.00
A. P. C. Adamson, Lecturer (Sessional; paid also \$200 as Special Lecturer).....	2,000.00

Special Lecturers (Sessional):

W. S. Wilson (paid also \$4,000 as Assistant Dean and Secretary to Faculty).....	250.00
A. S. Mathers.....	200.00
A. P. C. Adamson, Town Planning (paid also \$2,000 as Lecturer)	200.00
H. B. Dunnington-Grubb, Landscape Architecture.....	100.00

Instructors (Sessional; part-time):

J. A. Murray.....	1,375.00
F. Coates.....	1,200.00
P. Brieger, Fine Art (paid also \$3,300 in Faculty of Arts).....	300.00

Special Instructors (Easter Term):

S. B. Barclay.....	600.00
A. H. Eadie.....	275.00

Miss J. C. Laing, Librarian and Instructor, Architectural History and French; at \$1,900; on leave of absence at half-salary from January 15 to March 15.....	1,741.67	
T. H. Laccohee, Attendant in Drafting Room, September 15 to January 15; resigned.....	400.00	
Miss E. W. Dyer, Office Assistant; (paid also \$450 in Engineering Drawing and \$110 in Applied Science Summer Course 1945).....	625.00	
		\$ 19,301.75

Chemical Engineering and Applied Chemistry

Professors:

J. Watson Bain, Chemical Engineering.....	\$ 6,000.00
M. C. Boswell, Organic Chemistry.....	4,900.00
E. A. Smith, Industrial Chemistry.....	4,200.00
R. R. McLaughlin.....	4,200.00

Assistant Professors:

W. C. Macdonald (paid also \$420 in Applied Science Summer Course 1945)	\$ 2,800.00
J. G. Breckenridge (paid also \$420 in Applied Science Summer Course 1945)	2,700.00
A. M. FitzGerald, Lecturer	1,950.00
T. L. Crossley, Special Lecturer in Pulp and Paper (Sessional; part-time)	200.00

Instructors (Sessional):

L. J. Rubin	1,750.00
W. G. MacElhinney (paid also \$764.17 in Special Research)	1,750.00
M. Adelman	1,600.00
W. F. Graydon (paid also \$225 in Special Research and \$660 in Applied Science Summer Course 1945)	1,600.00
E. T. Williams, Instructor, September 11 to December 6 (paid also \$414.17 in Special Research and \$112.50 for Extension Work)	675.00

Demonstrators (Sessional):

Mrs. Hilda Hampson	1,230.00
G. L. Milligan	1,150.00
F. A. de Marco (paid also \$350 in Special Research)	1,222.62
C. E. Drover (paid also \$500 in Applied Science Summer Course 1945)	1,125.00
F. Kubath	1,050.00
C. M. Humber	1,050.00
E. Yurasyk (paid also \$375 in Applied Science Summer Course 1945)	925.00
C. W. Gowley	600.00

Part-time:

W. A. Morse (paid also from Special Funds)	575.00
H. I. Hadler	523.52
F. J. Quail	465.00
A. S. Hunt, Lecture Assistant and Glass Blower	1,850.00
W. T. Storton, Laboratory Assistant	1,575.00
Ross Mowat, Lecture Assistant; on War Service at \$950	

Laboratory Attendants:

D. Mitchell, 20 weeks at \$18, 24 weeks at \$20, plus \$10 overtime	850.00
W. S. Fernie, 22 weeks at \$18, 18 weeks at \$20, plus \$37.50 overtime	793.50
A. Record, 42 weeks at \$18, plus \$15 overtime	771.00
D. Munro, 28 weeks, 1 day at \$18, 4 weeks, 1 day at \$20	590.35
J. Martin, 29 weeks, 1 day at \$18	525.00
H. Spence, 11 weeks, 5 days at \$18	213.00
D. Irvine, 7 weeks, 5 days at \$18	141.00
K. Godwin, 3 weeks, 5 days at \$18	69.00
S. Godfrey, 3 weeks, 2 days at \$18	60.00
P. Spiegel, 2 weeks at \$18	36.00
Miss P. Stonehouse, Laboratory Assistant, 5 weeks at \$15, 36 weeks at \$18, plus \$15 overtime	738.00
Miss D. Birkett, Office Assistant and Librarian (paid also \$200 in Secretary's Office)	1,200.00

 \$ 53,652.99

Civil Engineering; Municipal and Structural

T. R. Loudon, Professor of Civil Engineering and Aeronautics	\$ 5,500.00
--	-------------

Associate Professors:

C. F. Morrison	3,500.00
Robert F. Legget	3,500.00
W. L. Sagar, on War Service at \$2,700; contribution to Pension Fund	135.00
M. W. Huggins, Assistant Professor	2,900.00

Lecturers (Sessional):

C. E. Helwig	2,500.00
B. Etkin	2,100.00

Special Lecturers (Sessional):

A. E. Berry, Municipal Engineering (paid also \$500 in School of Hygiene)	\$ 1,000.00
W. H. M. Laughlin, Structural Engineering	400.00

Aeronautical Engineering:

H. S. Shenstone	75.00
Harold Pollard	40.00
R. D. Hiscocks	20.00

Demonstrators (Sessional):

C. W. Dillane	1,400.00
---------------------	----------

Part-time:

J. O. Gorman	650.00
R. G. Wykes	200.00

W. Kubbinga, Mechanician	2,200.00
--------------------------------	----------

S. W. Morey, Laboratory Assistant, 39 weeks at \$22.50	877.50
--	--------

Miss E. Anthony, Office Assistant and Librarian	1,100.00
---	----------

\$ 28,097.50

Civil Engineering; Surveying and Geodesy

Professors:

W. M. Treadgold, also Head of Department (paid also \$500 in Applied Science Summer Course 1945).....	5,300.00
---	----------

S. R. Crerar	4,600.00
--------------------	----------

Associate Professors:

E. W. Banting	4,400.00
---------------------	----------

J. W. Melson	4,200.00
--------------------	----------

Lecturers (Sessional):

T. L. Rowe (paid also \$200 in Engineering Drawing, \$491 in Special Research and \$600 in Applied Science Summer Course 1945)	2,025.00
--	----------

S. H. de Jong, (paid also \$600 in Applied Science Summer Course 1945)	1,800.00
--	----------

A. F. Fassell, Demonstrator (part-time; Michaelmas Term)	200.00
--	--------

D. J. McConnell, Mechanician; (paid also \$1,000 in Applied Physics)	800.00
--	--------

Miss R. Cave, Office Assistant and Librarian (paid also \$650 in Applied Physics and \$100 in Photographic Service)	650.00
---	--------

\$ 23,975.00

Electrical Engineering

Professors:

H. W. Price, also Head of Department	\$ 5,500.00
--	-------------

A. R. Zimmer	4,600.00
--------------------	----------

V. G. Smith	4,100.00
-------------------	----------

B. de F. Bayly, Associate Professor at \$3,400; on War Service; contribution to Teachers' Insurance and Annuity Association	170.04
---	--------

Assistant Professors:

D. N. Cass-Beggs	3,100.00
------------------------	----------

J. E. Reid	3,000.00
------------------	----------

Lecturers (Sessional):

R. G. Anthes	2,600.00
--------------------	----------

L. S. Lauchland at \$1,800; on War Service; contribution to Teachers' Insurance and Annuity Association	90.00
---	-------

R. J. Brown, Special Lecturer (Sessional)	1,000.00
---	----------

Instructors (Sessional):

R. Scott	1,800.00
----------------	----------

H. A. Courtice	1,600.00
----------------------	----------

Demonstrators (Sessional):

R. C. Henderson	1,400.00
-----------------------	----------

W. L. Phoenix	1,400.00
---------------------	----------

P. A. Rickard	1,400.00
---------------------	----------

A. Smith	1,400.00
----------------	----------

V. B. Coxworth	1,400.00
----------------------	----------

L. F. Buckley	1,300.00	
W. E. Hodges	928.58	
E. A. Pollard at \$1,300 from September 20 to October 31	257.60	
Report Readers:		
J. K. Allen Sessional	\$ 300.00	
A. J. Diinin	300.00	
C. J. Moull, Temporary	55.00	
W. R. McKee, Instrument Technician	2,500.00	
W. L. Bakewell, Electrician	1,700.00	
A. Cunningham, Shop Assistant at \$20 per week	1,013.33	
Mrs. Irene Turner, Office Assistant and Librarian	1,150.00	
		\$ 44,094.55

Engineering Drawing

Professors:		
J. R. Cockburn, Descriptive Geometry (paid also \$350 in Applied Science Summer Course 1945)	5,000.00	
W. J. T. Wright (paid also \$1,000 in Applied Science Summer Course 1945)	\$ 4,900.00	
Associate Professors:		
A. Wardell (paid also \$900 in Applied Science Summer Course 1945)	3,500.00	
W. B. Dunbar	3,400.00	
P. V. Jermyn, Assistant Professor	2,700.00	
Lecturers (Sessional):		
J. J. Spence (paid also \$350 in Applied Science Summer Course 1945)	2,600.00	
G. R. Edwards (paid also \$350 in Applied Science Summer Course 1945)	1,800.00	
D. P. Scott, Instructor (Sessional)	1,500.00	
T. L. Rowe, Special Instructor (paid also in Civil Engineering: Surveying and Geodesy)	200.00	
Demonstrators (Sessional):		
F. E. Deloume (paid also \$700 in Applied Science Summer Course 1945)	1,400.00	
W. S. Glynn	1,400.00	
E. Myatt (paid also \$250 in Applied Science Summer Course 1945)	1,000.00	
Part-time:		
H. J. Franklin	350.00	
J. W. Speight	350.00	
F. J. Simpson	300.00	
J. D. Grant, Reader (Sessional; paid also \$400 in Faculty of Arts)	150.00	
Assistants (Sessional):		
W. E. Lehman	200.00	
H. E. Oocomore	200.00	
G. Brown, Attendant in Drafting Room (Sessional; paid also \$150 in Applied Science Summer Course 1945)	1,100.00	
Office Assistants:		
Miss E. W. Dyer (paid also \$625 in School of Architecture)	450.00	
Miss G. M. Fry, from February 1	500.00	
		\$ 33,000.00

Mechanical Engineering

E. A. Allcut, Professor and Head of Department	\$ 5,500.00
Associate Professors:	
W. G. McIntosh	3,900.00
G. R. Lord	3,500.00
R. C. Wiren	3,200.00
Assistant Professors:	
D. D. Panabaker	2,900.00
L. E. Jones	2,700.00
I. W. Smith	2,600.00

Lecturers (Sessional):	
D. J. Parrish.....	1,800.00
W. A. Wallace (paid also \$350 in Special Research).....	1,800.00
R. T. Waines.....	1,800.00
Instructors (Sessional):	
W. Bruce.....	1,500.00
D. G. Huber (paid also \$350 in Special Research).....	1,400.00
F. G. Ewens, Special Instructor, Easter Term, Honorarium, \$195.75; Expenses \$179.25.....	375.00
Demonstrators (Sessional):	
G. G. Gilchrist.....	1,200.00
B. H. Lloyd.....	1,200.00
W. E. Rigg.....	1,200.00
B. D. Wood.....	1,200.00
O. Clodman, from October 30 to April 30.....	1,039.64
R. C. Cline, from September 18 to November 4 (paid also \$350 in Special Research).....	271.73
F. Hickey, Engineer and Machinist.....	2,200.00
John Price, Laboratory Attendant.....	1,200.00
G. Connor, Fireman at \$127.50 per month from September 25 (trans- ferred from Central Power Plant).....	1,173.00
W. Butler, Fireman, 476 hours at 60c.....	285.60
Miss M. Burt, Office Assistant and Librarian.....	1,350.00
	\$ 45,294.97

Metallurgical Engineering

Professors:	
L. M. Pidgeon, also Head of Department.....	\$ 5,500.00
J. A. Newcombe.....	4,400.00
R. J. Montgomery, Associate Professor.....	3,900.00
J. E. Toomer, Assistant Professor.....	3,550.00
A. Frumkin, Lecturer (Sessional, at \$2,100; resigned August 31).....	350.00
F. M. Aimone, Instructor (Sessional; paid also \$175 in Special Research)	1,600.00
Hector Ross, Laboratory Assistant (10 months).....	1,100.00
G. D. Lane, Laboratory Attendant, 36 weeks, 4 days at \$20 per week	733.32
Miss I. Warnock, Secretary and Librarian.....	1,050.00
	\$ 22,183.32

Mining Engineering

Professors:	
C. G. Williams, also Head of Department.....	\$ 6,000.00
J. T. King.....	4,500.00
S. E. Wolfe, Assistant Professor.....	3,400.00
Instructors (Sessional):	
S. G. Farrar.....	1,800.00
L. Pancer.....	1,500.00
G. K. Clement, 6 months from November 13.....	1,237.50
E. Tozer, Laboratory Assistant and Mechanician.....	1,500.00
C. Waybrant, Laboratory Assistant, Assaying.....	1,300.00
D. Santimo, Laboratory Assistant.....	1,043.33
J. Thomson, Assistant Mechanician, 24 weeks at \$30.....	720.00
Mrs. Thelma I. Stark, Office Assistant and Librarian.....	1,200.00
	\$ 24,200.83

Special Lectures

Special Lecturers (Sessional):	
R. R. Grant, Accountancy and Business.....	\$ 500.00
P. H. Mills, Engineering Law.....	500.00
Rev. G. A. McMullen, Public Speaking.....	200.00
English:	
J. F. Macdonald (paid also \$4,500 in English, Faculty of Arts)	50.00
Dr. Malcolm W. Wallace.....	50.00
C. R. Sanderson, English Literature (paid also \$150 in On- tario College of Education).....	25.00
	\$1,325.00

Secretary's Office

W. S. Wilson, Secretary (also Assistant Dean; paid also \$250 in School of Architecture)	\$ 4,000.00	
Miss E. Birkett, Assistant Secretary	2,200.00	
H. L. Shepherd, Counsellor, from March 15, at \$275 per month	975.80	
Miss E. Singleton, Assistant	1,200.00	
Stenographers:		
Mrs. Marjorie Illingworth	1,100.00	
Miss G. E. Simpson	1,100.00	
Miss A. M. Schofield, at \$1,050 to December 31 (transferred to Royal Ontario Museum)	525.00	
Miss I. V. Lanktree, from January 8 at \$1,050	505.25	
Miss D. Birkett (part-time; paid also \$1,200 in Chemical Engineering)	200.00	
Miss D. Y. Abercrombie, 3 weeks, 3½ days, at \$19.75 per week	70.75	
Office Attendants:		
Arthur Dykeman, at \$800; on War Service; contribution to Pension Fund	28.00	
R. D. Baggett, 37 weeks, 4 days, at \$15 per week	565.00	
R. Bradshaw, 9 weeks, 3 days, at \$12 per week	114.00	
		\$ 12,583.80
		\$329,159.71

Summer Courses (Applied Science)

Salaries

Faculty of Applied Science:

School of Architecture (\$610.00):

W. E. Carswell, Assistant Professor (paid also \$2,800 in Salaries Applied Science)	\$ 500.00
Miss E. W. Dyer, Librarian and Secretary (paid also \$1,075 in Salaries Applied Science)	110.00

Chemical Engineering (\$2,375.00):

Assistant Professors:

J. G. Breckenridge (paid also \$2,700 in Salaries Applied Science)	420.00
W. C. Macdonald (paid also \$2,800 in Salaries Applied Science)	420.00
W. F. Graydon, Instructor (paid also \$1,600 in Salaries Applied Science and \$225 in Special Research)	660.00

Demonstrators:

C. E. Drover (paid also \$1,125 in Salaries Applied Science)	500.00
E. Yurasyk (paid also \$925 in Salaries Applied Science)	375.00

Civil Engineering: Surveying and Geodesy (\$1,700.00):

W. M. Treadgold (paid also \$5,300 in Salaries Applied Science)	500.00
---	--------

Lecturers:

T. L. Rowe (paid also \$2,225 in Salaries Applied Science)	600.00
S. H. de Jong (paid also \$1,800 in Salaries Applied Science)	600.00

Engineering Drawing (\$4,050.00):

Professors:

J. R. Cockburn (paid also \$5,000 in Salaries Applied Science)	350.00
W. J. T. Wright (paid also \$4,900 in Salaries Applied Science)	1,000.00
A. Wardell, Associate Professor (paid also \$3,500 in Salaries Applied Science)	900.00

Lecturers:

J. J. Spence (paid also \$2,600 in Salaries Applied Science)	350.00
G. R. Edwards (paid also \$1,800 in Salaries Applied Science)	350.00

Demonstrators:	
F. E. Deloume (paid also \$1,400 in Salaries Applied Science).....	700.00
E. Myatt (paid also \$1,000 in Salaries Applied Science).....	250.00
G. Brown, Attendant (paid also \$1,100 in Salaries Applied Science).....	150.00
Faculty of Arts:	
Chemistry (\$200.00):	
Demonstrators:	
C. M. Finigan (paid also \$650 in Salaries Arts).....	150.00
P. E. Braid (paid also \$724 in Salaries Arts).....	50.00
Mathematics (\$3,800.00):	
I. R. Pounder, Professor (paid also \$4,900 in Salaries Arts) ...	800.00
Associate Professors:	
J. D. Burk (paid also \$3,500 in Salaries Arts).....	800.00
R. Brauer (paid also \$3,500 in Salaries Arts).....	800.00
Fellows:	
J. A. Jenkins (paid also \$650 in Salaries Arts).....	700.00
A. Schild (paid also \$750 in Salaries Arts).....	700.00
Mineralogy (\$1,150.00):	
E. W. Nuffield, Lecturer (paid also \$2,000 in Salaries Arts).....	1,000.00
W. Wightman, Laboratory Attendant (paid also \$1,000 in Salaries Arts).....	150.00
Physics (\$1,380.00):	
J. Satterly, Professor (paid also \$5,500 in Salaries Arts) ...	840.00
Miss K. M. Crossley, Assistant Professor (paid also \$2,400 in Salaries Arts).....	540.00
	\$ 15,265.00

Maintenance

School of Architecture:	
George Lightwood, drawing map.....	\$ 20.00
Civil Engineering: Surveying and Geodesy (\$87.00):	
Art Metropole, rod and targets.....	76.50
University Press, book.....	10.50
Engineering Drawing:	
Superintendent's Dept., labour.....	11.38
Secretary's Office:	
Occasional Assistance (\$44.00):	
Miss D. Y. Abercrombie.....	24.00
Miss D. McClymont.....	20.00
Maintenance:	
University Press, paper, envelopes.....	213.87
	\$ 376.25
To be accounted for 1945-46.....	7,168.75
	\$ 22,810.00

Maintenance of Departments

Applied Physics

Supplies (\$466.81):	
Aikenhead Hardware Ltd., hardware.....	\$ 39.78
Alpha Aracon Radio Co., condensers.....	15.96
Bakelite Plastics, bakelite.....	27.25
Canadian General Electric Co., radiotron.....	11.58
Copper Wire Products, transformer.....	15.12
R. G. Dalton Co., blueprints.....	13.66
Eastman Photographic Stores Ltd., plates, film.....	36.08
D. Gestether, stencils, ink.....	48.60
Photographic Service, slides, film, prints.....	71.79
University of Toronto Engineering Society, ink, tacks, paper.....	25.97

University Press, printing, stationery	84.83	
Accounts under \$10.00 (9)	42.69

Banting and Best Department of Medical Research

(a) Banting Research:

Salaries (\$60,216.97):

C. H. Best, Director and Professor (paid also \$6,000 in Faculty of Medicine)	\$ 5,000.00
---	-------------

Associate Professors:

C. C. Lucas	1,000.00
W. R. Franks, at \$3,700; on War Service; contribution to T.I. and A.A.	185.04
S. F. MacDonald, Assistant Professor, at \$222.25 per month from October 1 and \$127.50 wartime bonus	2,127.75
Lady Banting (Henrietta) widow of Sir Frederick Banting, allowance	2,000.00
D. B. deLury, Consultant in Statistics (paid also \$2,500 in Faculty of Arts)	500.00

Research Associates:

A. H. Palmer, at \$3,000 from September 1; Ob. April 10, 1945; balance of salary paid to widow	2,500.00
Dr. Jessie H. Ridout at \$2,500; wartime bonus \$165	2,665.00
J. E. Goodwin (paid also \$700 from Special Funds)	2,400.00
A. E. MacDonald (part-time; paid also \$200 in Faculty of Medicine)	365.00

Research Assistants:

E. S. Goranson, at \$1,600; wartime bonus \$130	1,730.00
Miss J. M. Lang, at \$1,550; wartime bonus \$127.50	1,677.50
Mrs. Rosemary B. Hawkins, at \$1,500; wartime bonus \$125	1,625.00
J. J. Russell, 5 months at \$205 per month	1,025.00
D. C. O'Connell, 6 months at \$1,900; wartime bonus \$72.50	1,022.50
Miss M. J. Murray, at \$1,020 from September 1; wartime bonus \$84.20	934.20
Miss M. M. Shaw (paid also \$660 from Special Funds); wartime bonus \$66	726.00
Miss J. M. Patterson, at \$1,440 from February 1; wartime bonus \$50.83	650.83
Mrs. Jean Gastle, at \$1,020 from September 5; wartime bonus \$46.08; resigned February 17	511.36
A. J. Chechak, at \$75 per month from March 12	419.15

On War Service:

L. B. Macpherson	
N. R. Stephenson	
C. S. McArthur, Research Fellow (paid also \$1,000 in Faculty of Medicine)	2,000.00

Assistants:

Miss M. O'Grady, at \$1,200; wartime bonus \$110	1,310.00
Miss A. Corrigan, 8½ months at \$1,140; wartime bonus \$77.66	905.08
C. R. Cowan, Senior Technical Assistant and Controller, at \$2,500; on War Service; contribution to Pension Fund	75.00

Technicians:

H. M. Douglas, at \$1,400; wartime bonus \$120	1,520.00
F. W. Funn, at \$950; wartime bonus \$95	1,045.00
T. Lennox, at \$820; wartime bonus \$82	902.00

On War Service:

G. Parkes, at \$1,300; contribution to Pension Fund	35.75
---	-------

J. E. Walker, at \$1,200; contribution to Pension Fund	30.00
L. C. Brock, at \$1,440; contribution to Pension Fund	39.60
W. Watson, at \$780.....
Laboratory Technicians:	
Miss A. Crooks, at \$900; wartime bonus \$90	990.00
Miss A. Marett, 33 weeks at \$18 per week; wartime bonus \$52.80.....	580.80
Miss Henrietta Morgan, 30 weeks at \$15.75 per week; wartime bonus \$47.25.....	519.75
Miss B. Wilby, 30 weeks at \$15.75 per week; wartime bonus \$47.25.....	519.75
Miss Gwen Deller, 12 weeks, 4 days at \$16 per week; wartime bonus \$20.80.....	228.85
Miss A. R. Grant, at \$960; resigned September 7; war- time bonus \$17.87.....	196.54
Miss Joyce Henderson, 1 week, 1 day at \$16 per week ...	18.70
Mrs. Gladys Steele, Technical Assistant, at \$900; on leave of absence for 1 week without salary; wartime bonus \$88.31	971.38
Laboratory Assistants:	
P. C. Fitz-James, at \$100 per month; wartime bonus \$110	1,310.00
Miss B. McCallum, at \$85 per month; resigned August 26	156.30
Miss M. Comer, 1 month.....	85.00
Mrs. Alison Moffitt, Laboratory Attendant, at \$780; war- time bonus \$78.....	858.00
J. W. Daniel, Laboratory Technician, at \$60 per month; re- signed August 12; wartime bonus \$8.33	91.58
Miss E. L. Mahon, Secretary, at \$1,350; wartime bonus \$117.50	1,467.50
Secretarial Assistants:	
Miss M. J. Millar, at \$1,200; wartime bonus \$110.....	1,310.00
Miss F. F. Herbert, at \$1,100; wartime bonus \$105.....	1,205.00
Miss M. L. Wilkinson, Secretarial and Library Assistant, at \$1,300; wartime bonus \$115.....	1,415.00
Temporary Animal Caretakers:	
Alfred Currell, at \$1,007.65; wartime bonus \$99.36	1,107.01
Joseph M. Cavanaugh, at \$876.50; wartime bonus \$85.75	962.25
J. Hector Jakeman, at \$19.50 per week; resigned May 12; wartime bonus \$72.22.....	800.22
George Williamson, 6 weeks at \$19.50 per week; wartime bonus \$12.26.....	135.76
Arthur Starnino, 6 weeks at \$19.50 per week; wartime bonus \$11.61.....	128.61
G. Pennell, 3 weeks, 7 days at \$16.50 per week; wartime bonus \$6.88.....	75.63
George Austin, 2 weeks, 8 days at \$16.50 per week; war- time bonus \$5.50	60.50
Donald Scroggie, 2 weeks, 5 days at \$15.75 per week ...	44.65
George Kett, 1 week, 3 days at \$16.50 per week; wartime bonus \$2.48.....	27.23
Bernard Bennett, 1 week, 2 days at \$16.50 per week; wartime bonus \$2.20	24.20
Cellular Physiology:	
Dr. Bruno Mendel, Professor.....	5,000.00
Expenses (\$27,800.18):	
Agfa Ansco of Canada, developer.....	10.20

APPENDIX III

University Press

Ledger Balances (net) as at 30th June, 1944:

Contingent Reserve Account		\$ 7,246.08
Surplus Account		21,623.45
		<u>\$ 28,869.53</u>

Transactions for the year ending 30th June, 1945

Receipts from Press, Book Department and Publications	\$421,443.15	
Expenditures (including plant purchased and charged to Surplus Account)	\$369,937.63	
Grant to Alumni Federation of the University of Toronto	1,200.00	
	<u>371,137.63</u>	50,305.52
		<u>\$ 79,175.05</u>
Transferred from Surplus Account to University Revenue		10,000.00
		<u>\$ 69,175.05</u>

Note

The above figures cover the accounts passing through the Bursar's Office. Supplementary thereto the Acting Manager of the Press had on hand on 30th June, 1945, as shown by his records, inventories, etc., (including work in progress) \$97,366.87; accounts receivable (less reserve) \$36,293.82; less sundry liabilities (net) \$22,257.94; making with the above cash balance of \$69,175.05 a total surplus over Liabilities of \$180,617.80.

Details of Expenditure

Salaries and Wages, including Wartime Bonus (\$120,604.02):

A. Gordon Burns, Manager, at \$4,800; on War Service; contribution to Pension Fund	\$ 150.00
W. J. Dunlop, Acting Manager (paid also \$6,000 as Director of University Extension and Publicity)	1,200.00
Miss E. M. Walker, Secretary	2,562.00
Clerks:	
Miss I. E. McTaggart	1,835.00
Mrs. Ellen W. Buzek, 3 months at \$1,400; 9 months, part-time, at \$700; resigned June 30	957.50
Miss N. M. Reany	1,730.00
Mrs. Florence Friendship	1,441.25
Miss M. Storey, at \$1,200; on War Service; contribution to Pension Fund	36.00
Miss R. Mitchell	1,310.00
Miss M. MacMurray	1,231.25
Miss D. Hand	1,205.00
Miss M. Lewis	1,205.00
Miss B. Roberts	1,205.00
Miss K. Cassels, at \$1,050; resigned July 31, 1944	96.04
Mrs. F. Davey, at \$1,040; transferred to Wages, April 1, 1945	808.91
Mrs. E. Groom, at \$950; resigned April 30, 1945	870.84
Miss A. E. Morris	572.00
George Edwards, Caretaker, at \$1,600; resigned August 31, 1944	288.32
C. Burnell, 2 months; transferred to Wages	205.20
Pay lists, wages of employees	101,694.71
Editorial Services (\$4,154.50):	
Mrs. Alison Hewitt, General Editor	\$ 2,304.50
Mrs. M. L. Bladen	50.00

REPORT
RELATING TO THE REGISTRATION OF
BIRTHS, MARRIAGES AND DEATHS
IN THE
PROVINCE OF ONTARIO
FOR THE
YEAR ENDING 31st DECEMBER
1945

(SEVENTY-SIXTH ANNUAL REPORT)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 13, 1946

ONTARIO

TORONTO

Printed and Published by Baptist Johnston, Printer to the King's Most Excellent Majesty
1947

TO HIS HONOUR THE LIEUTENANT-GOVERNOR OF THE PROVINCE OF ONTARIO.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Seventy-sixth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1945.

Respectfully submitted,

G. H. DUNBAR,
Registrar-General of Ontario.

SIR:

I have the honour to submit for your approval the Seventy-sixth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1945.

I have the honour to be, Sir,

Your obedient servant,

F. V. JOHNS,
Deputy Registrar-General.

TO THE HON. G. H. DUNBAR,
Registrar-General of Ontario.

INTRODUCTION

This report is divided into two parts. Part I consists of an analytical survey of the Vital Statistics of the province in the form of narrative summaries, summary tables and charts. Its objectives are (1) to indicate (in so far as can be portrayed by vital statistics) the general trend over the past several years, in the general state of the health of the people of Ontario; (2) to assess the vital statistics of 1945 in the light of these general trends; and (3) to bring to light certain specific problems in the field of public health, such as infant and maternal mortality and deaths from specific diseases such as cancer and tuberculosis and those resulting from accidental causes. Part II consists of detailed tables covering vital statistics for the year 1945. In the interests of economy several tables are not printed in this report. These are listed in the Table of Contents and the information is available upon request providing that such requests, in the opinion of the Registrar-General, are sufficiently warranted and urgent in the public interest.

PART I.—COMPARATIVE AND ANALYTICAL SUMMARY

Population

For reference purposes the estimated population of the province over a period of about two decades is shown by sex in Table A, while a distribution by sex and age-groups of the estimated population of 1945 is provided in Table B.

TABLE A—POPULATION, CENSUSES 1921, 1931 AND 1941 AND ESTIMATED FOR INTERCENSAL YEARS, BY SEX, ONTARIO

Year	Total	Male	Female	Year	Total	Male	Female
1921	2,933,662	1,481,890	1,451,772	1934	3,544,000	1,804,000	1,740,000
1922	2,980,000	1,507,000	1,473,000	1935	3,575,000	1,820,000	1,755,000
1923	3,013,000	1,525,000	1,488,000	1936	3,606,000	1,835,000	1,771,000
1924	3,059,000	1,550,000	1,509,000	1937	3,637,000	1,850,000	1,787,000
1925	3,111,000	1,578,000	1,533,000	1938	3,672,000	1,867,000	1,805,000
1926	3,164,000	1,606,000	1,558,000	1939	3,708,000	1,885,000	1,823,000
1927	3,219,000	1,635,000	1,584,000	1940	3,747,000	1,904,000	1,843,000
1928	3,278,000	1,666,000	1,612,000	1941	3,787,655	1,921,201	1,866,454
1929	3,334,000	1,696,000	1,638,000	1942	3,884,000	1,966,000	1,918,000
1930	3,386,000	1,724,000	1,662,000	1943	3,917,000	1,983,000	1,934,000
1931	3,431,683	1,748,844	1,682,839	1944	3,965,000	2,005,600	1,959,400
1932	3,473,000	1,769,000	1,704,000	1945	4,004,000	2,016,600	1,987,400
1933	3,512,000	1,788,000	1,724,000				

The estimated populations for 1932 to 1940 and 1942 have been revised and the necessary adjustments have been made in the tables showing rates.

TABLE B—ESTIMATED POPULATION OF ONTARIO, BY SEX AND AGE-GROUP, 1945

Age-Group	Total	Male	Female	Age-Group	Total	Male	Female
Under 5.....	363,800	186,000	177,800	50-54.....	224,400	114,600	109,800
5-9.....	302,900	153,800	149,100	55-59.....	200,300	102,300	98,000

20-24.....	346,400	171,000	175,400	70-74.....	93,200	45,000	48,200
25-29.....	323,800	160,500	163,300	60-74.....	386,100	192,000	194,100
15-29.....	1,000,200	497,800	502,400	75-79.....	60,400	28,100	32,300
30-34.....	314,500	158,100	156,400	80-84.....	31,600	14,200	17,400
35-39.....	283,400	143,900	139,500	85-89.....	12,400	5,500	6,900
40-44.....	264,200	136,300	127,900	75-89.....	104,400	47,800	56,600
30-44.....	862,100	438,300	423,800	90 and over..	3,300	1,300	2,000
45-49.....	244,200	124,600	119,600	Total.....	4,004,000	2,016,600	1,987,400

Figures supplied by Social Analysis Branch, Dominion Bureau of Statistics.

*These estimates do not take into account interprovincial migration, figures for which are not available for intercensal years.

The rural and urban distribution of the 1945 estimated population was as follows:—

Population Group	Estimated Population	Per cent
Incorporated centres *10,000 population and over	1,816,331	45.3
Incorporated centres *5,000 to 10,000 population	227,622	5.7
Incorporated centres *1,000 to 5,000 population	304,984	7.6
Rural Population (including incorporated centres under 1,000*)	1,655,063	41.3

*As at Census of 1941.

Births and deaths for the year 1945 are classified by place of residence. Marriages being classified by place of occurrence.

Tables 7, 8, 23 and 30 have totals by place of occurrence and place of residence.

Natural Increase

The natural increase in the population and the computed rates for the period 1923 to 1945 are shown in Table C.

TABLE C—NATURAL INCREASE AND NATURAL INCREASE RATES, ONTARIO, 1923-1945

Year	Live Births	Deaths	Excess of Births over Deaths	Natural Increase Rate per 1,000 Population
1923	70,056	35,636	34,420	11.4
1924	71,510	33,078	38,432	12.6
1925	70,122	33,960	36,162	11.6
1926	67,617	35,909	31,708	10.0
1927	67,671	34,775	32,896	10.2
1928	68,510	37,128	31,382	9.6
1929	68,458	38,123	30,335	9.1
1930	71,263	37,313	33,950	10.0
1931	69,209	35,705	33,504	9.8
1932	66,842	36,469	30,373	8.7
1933	63,646	35,301	28,345	8.0
1934	62,234	35,119	27,115	7.7
1935	63,069	36,317	26,752	7.4
1936	62,451	37,571	24,880	6.9
1937	61,645	38,475	23,170	6.3
1938	65,564	36,890	28,674	7.9
1939	64,123	37,530	26,593	7.2
1940	68,524	38,503	30,021	8.0
1941	72,262	39,226	33,036	8.7
1942	78,192	39,119	39,073	10.0
1943	81,173	41,063	40,110	10.2
1944	78,090	39,781	38,309	9.7
1945	78,974	39,499	39,475	9.8

The natural increase rate has shown a general downward trend during the past two decades with a considerable recovery taking place since 1939. This is attributable, to a large extent, to a sudden rise in the birth rate associated with the war, although the rate in 1944 and 1945 showed a slight decrease. The lowest rates were reached in the immediate post-depression period of 1933 to 1939, as is clearly shown in Chart 1. The main factors throughout were naturally a general falling birth rate and a relatively stable death rate for the total population despite an increase in the deaths among the higher ages which is directly associated with an ageing population.

Births

Table D presents an historical summary of births, stillbirths and illegitimate births, together with computed rates for each, while Chart 1 portrays the general trends over the same period.

TABLE D—SUMMARY OF LIVE BIRTHS, STILLBIRTHS AND ILLEGITIMATE BIRTHS, AND RATES, ONTARIO, 1923-1945

Year	LIVE BIRTHS		STILLBIRTHS		ILLEGITIMATE BIRTHS	
	Number	Rate per 1,000 Population	Number	Rate per 1,000 Live Births	Number	Rate per 1,000 Live Births
1923.....	70,056	23.3	3,028	43.2	1,579	22.5
1924.....	71,510	23.4	2,594	36.3	1,717	24.0
1925.....	70,122	22.5	2,782	39.7	1,881	26.8
1926.....	67,617	21.4	2,812	41.6	1,823	27.0
1927.....	67,671	21.0	2,758	40.8	1,958	28.9
1928.....	68,510	20.9	2,793	40.8	2,170	31.7
1929.....	68,458	20.5	2,730	39.9	2,376	34.7
1930.....	71,263	21.0	2,713	38.1	2,651	37.2
1931.....	69,209	20.2	2,652	38.3	2,773	40.1
1932.....	66,842	19.2	2,377	35.6	2,834	42.4
1933.....	63,646	18.1	2,161	34.0	2,786	43.8
1934.....	62,234	17.6	2,091	33.6	2,500	40.2
1935.....	63,069	17.6	2,140	33.9	2,642	41.9
1936.....	62,451	17.3	2,034	32.6	2,788	44.6
1937.....	61,645	16.9	1,988	32.2	2,796	45.4
1938.....	65,564	17.9	2,015	30.7	3,061	46.7
1939.....	64,123	17.3	1,965	30.6	2,884	45.0
1940.....	68,524	18.3	2,037	29.7	3,167	46.2
1941.....	72,262	19.1	2,084	28.8	3,384	46.8
1942.....	78,192	20.1	2,088	26.7	3,789	48.5
1943.....	81,173	20.7	2,060	25.4	3,741	46.1
1944.....	78,090	19.7	1,866	23.8	3,764	48.1
1945.....	78,974	19.7	1,844	23.3	4,075	51.6

The number of live births has shown a more or less general decrease from 1923 to approximately 1937 when 61,645 births were registered. There was some recovery up to the war period followed by a decided increase accompanying the war. The crude birth rate of 20.7 in 1943 was 20 per cent higher than in 1939, and was as high as that attained in 1929, a prosperity period. There was a slight decrease in 1945 when the rate was 19.7.

The stillbirth rate, on the other hand, has been on an extremely encouraging downward trend with a reduction of almost 45 per cent since 1923. In 1923 for every 1,000 babies born alive, 43 were stillborn, while in 1945 there were 24 stillborn—a fact which may be taken as a partial reflection of the improved health of mothers in the province and the improvement in obstetrical services.

Illegitimacy, however, has been increasing at an alarming rate—4,075 illegitimate births being registered in 1945 as compared with 1,579 such births in 1923. The rate has more than doubled since 1923 with over 51 of every 1,000 births in 1945 being illegitimate as compared with 23 in 1923 and 40 in 1931. It will be noted, however, that in the period 1923-1931 the rate rose 78 per cent as compared with a rise of only 21 per cent since that period.

Tables E, F and G provide a breakdown of births by age of mothers for the same three groups, and indicate to some degree the extent to which age has contributed to the trends outlined above, while Chart 2 provides an interesting picture of the age distribution over the same period on the basis of five-year averages.

Chart 1

TABLE E—LIVE BIRTHS, CLASSIFIED BY AGE OF MOTHER,
ONTARIO, 1923-1945

Year	Total Live Births	AGE OF MOTHER								
		Under 15	15-19	20-24	25-29	30-34	35-39	40-44	45-49	50 and over

NOTE:—Births to mothers of "not stated" ages have been distributed on the basis of specified ages.

Chart 2

PERCENTAGE OF
LIVE BIRTHS, STILLBIRTHS AND ILLEGITIMATE BIRTHS
IN EACH AGE-GROUP OF MOTHERS
ONTARIO

There has been a general tendency during the past two decades towards younger motherhood. For example, of every 100 babies born alive in 1923, 6 were to mothers under 20 years of age, over 24 to mothers 20-24, and 28 to mothers 25-29 or a total of 58 children to mothers under 30 years of age. In 1945 of every 100 live births, 7 were born to mothers under 20, 29 to mothers 20-24, and 28 to mothers 25-29 or a total of 64 children to mothers under 30 years of age. The picture, however, is not complete without mentioning the fact that fewer children are now being born to each mother than was the case two decades ago, and these are being borne in the early years of married life.

As a partial effect of the trend towards younger motherhood, a greater percentage of stillbirths is now occurring at the younger ages than was the case in 1923. In 1945, 29 per cent were to mothers below 25 years of age as compared with 23.7 per cent in 1923. In 1945 of every 100 stillbirths, 48 were to mothers over 30 years of age as compared with 51 in 1923 and 47 in 1931.

There are indications that the number of stillbirths per 1,000 deliveries has been decreasing at an encouraging rate over the past two decades, and that this has been evident for each age-group of mothers, although the fact remains that the risk of stillbirth delivery increases with age. The following summary sufficiently indicates the general trend in this respect over the 20-year period. For example, of every 1,000 deliveries among mothers 15-19 in 1945, 17 were stillborn as compared with 29 in the period 1922-27; among mothers 20-24 years of age, 19 as compared with 30; among mothers 25-29 years of age, 19 as compared with 33, with similar encouraging figures for older mothers, although the risk of stillbirth delivery increases rapidly for mothers over 35 years of age.

AVERAGE NUMBER OF STILLBIRTHS PER 1,000 DELIVERIES

Years	AGE OF MOTHER					
	15-19	20-24	25-29	30-34	35-39	40 and over
1922-27.....	29	30	33	39	49	64
1928-32.....	27	27	30	37	48	63
1933-37.....	27	25	28	34	45	64
1938-42.....	24	21	25	31	43	58
1942.....	22	19	23	29	41	57
1943.....	20	18	24	27	36	53
1944.....	17	19	20	26	34	47
1945.....	17	19	19	24	34	51

With respect to illegitimacy, Table G and Chart 2 indicate that the great majority of the illegitimate live births occur to mothers under 25 years of age.

Of every 100 such births in 1923, 78 were to this group of mothers, as compared with 67 in 1945.

In recent years a greater proportion of illegitimate births have been born to mothers in the older age-groups. Chart 2 illustrates this fact showing higher percentages for mothers in their 30's with proportionate reductions for mothers in the 'teen ages.

Infant Mortality

Table H and Chart 3 both show very clearly the declining trend in the number of deaths of children under one year of age. This decline in trend indicates, to a large extent, the success of a long range programme directed, during the last two decades, at the reduction of infant mortality.

Chart 3

INFANT MORTALITY ONTARIO DEATHS AT EACH AGE PERIOD

Five-year Averages 1931-1945
and for the year 1945

There was a reduction in the total number of infant deaths from 5,092 in the period 1926 to 1930 to 3,275 in the period 1941 to 1945. This reduction is apparent in every monthly age-group. The increases which are noted from 1941 to 1945 must be considered in comparison with the extensive increase in the number of births during the same years. The following summary indicating the number of infant deaths per 1,000 live births presents a picture of the rapid reduction in infant mortality:

Years	Infant Deaths per 1,000 Live Births
1926-30	74
1931-35	61
1936-40	50
1941	46
1942	40
1943	42
1944	43
1945	41

The rate of 40 per 1,000 live births in 1942 was the lowest ever recorded. The increase in the rates in 1943 and 1945 was due, for the most part, to an increase in the number of deaths from prematurity. In 1945 there was also an increase in the deaths from diseases of the respiratory organs. Table 1 which presents the deaths and rates for certain causes brings out the fact that there has been a notable reduction in deaths attributable to whooping cough. Diseases of the digestive tract also decreased in the period 1936 to 1943, increasing in 1944 and decreasing again in 1945. The group of diseases of early infancy showed a marked decrease in the period from 1936 to 1942, but due to the increase in deaths from prematurity the rate for this group increased in 1944 with a decrease in 1945. Influenza has fluctuated over the period showing the effect of minor epidemics and there was no improvement apparent in the death rate from malformations.

Maternal Mortality

From Table K, it will be noted that a considerable reduction in the number of deaths of mothers during childbirth has taken place during the past 20 years, and particularly during the past 5 years, with the 1945 rate being considerably below the average of the last decade. In general, the reduction in the rate seems to be more apparent in younger than in older mothers, although in 1942, and 1945, the latter group showed a marked decrease in the rate per 1,000 live births.

* Rates not computed because of small numbers.

The tables which follow present the distribution of maternal deaths during 1945 by locality, as well as deaths of women not directly classified as due to pregnancy or child-birth, but which were associated therewith.

The rates shown in Table L are of special interest in that they indicate clearly the general downward trend in maternal mortality in cities, towns and rural areas of the province. The rates for 1945 being 2.1 per 1,000 live births in cities, 2.0 in towns and 2.2 in the rural areas. The rural rates have been consistently lower than those for the urbanized communities with the exception of the years 1944 and 1945.

General Mortality

Table N presents a historical summary of deaths by sex in the province and the computed crude death rates over a 23-year period while Chart 1 presents a graphic picture of the general trend in the rate.

Over the past two decades two main trends are apparent. From 1923 to the early 1930's the rate averaged close to 11 deaths per 1,000 population. Dropping rapidly in 1931 and 1932, it has since stabilized at about 10 deaths per year per 1,000 population.

The death rate among males has been consistently higher than that among females and there are indications that this divergence between the two rates has been widening during the past decade or more.

TABLE N—DEATHS (EXCLUSIVE OF STILLBIRTHS) AND DEATH RATES PER 1,000 POPULATION, ONTARIO, 1923-1945

1945.....	39,499	21,563	17,936	9.9	10.7	9.0

Table O presents both male and female crude death rates for each 5-year age-group, based on the population as enumerated at the censuses of 1921, 1931 and 1941 and as estimated for the years 1942, 1943, 1944 and 1945. There are several features with respect to changing death rates which are worthy of comment, notable among which is the remarkable decrease in the death rate of children under 5 years of age from 21.2 in 1931 to 11.5 in 1945 for males and from 17.0 to 9.2 for females. Similar declines are apparent in the other age-groups up to middle life. After middle life an increase will be noted in the rate for males.

This latter fact is clearly portrayed in Chart 4 which depicts the percentage of deaths occurring in each age-group of the population.

TABLE O—DEATH RATES PER 1,000 POPULATION FOR EACH SEX AND AGE GROUP. 1931, 1941, 1942, 1943, 1944 and 1945

Causes of Death

The deaths shown in Table P are for selected causes or groups of causes to which, during the past 10-year period, more than 75 per cent of total deaths have been recorded. A large part of the increase in 1941 in diseases of the heart and intracranial lesions of vascular origin and the decrease in diseases of the arteries is due to changes in classification in the "Fifth Revision of the International List of Causes of Death." The increase in diabetes in 1941 is partly due to a change in preference when two causes are mentioned on a death certificate.

Chart 4

(1) Per cent of total deaths.

(2) Rate per 100,000 population.

NOTE: It should be noted that the effects of certain changes in classification and rearrangement of titles provided in the Fifth Revision of the International List of Causes of Death are apparent in the following: Tuberculosis, Diseases of the heart, Diseases peculiar to the first year of life, Diseases of the arteries and intracranial lesions of vascular origin.

The Four Chief Causes of Death in Each Age-Group

Table Q shows the four primary causes of death in each age group for 1945. It will be seen that violent or accidental deaths hold first place in every age group from 1 to 39 years of age. From 5 to 29 years of age tuberculosis is the second chief cause of death and fourth in the 30 to 49 year group. Pneumonia, bronchitis and influenza, taken as a group, are important in the younger age groups. Cancer does not appear as a main cause of death until the late 30's, the number of deaths increasing in each older age group. In general, diseases of the heart and arteries, cancer and intracranial lesions of vascular origin are the primary causes of death of persons over 50 years of age.

Mortality from Notifiable Diseases

A summary of deaths and death rates from notifiable diseases is shown in Tables R (1) and R (2) for the last 10-year period. In general, from 1936 to 1943 deaths from diphtheria, erysipelas, scarlet fever and typhoid fever have been on a general downward trend, but in 1945 there was an increase in diphtheria and typhoid fever. Deaths from influenza have shown a decided decline except for minor epidemics in 1937, 1939. Deaths from poliomyelitis have shown the same trend except for the years 1937 and 1944, as well as those from whooping cough except for the year 1941. Deaths from tuberculosis are discussed in detail in the section to follow.

TABLE R (1)—DEATHS FROM NOTIFIABLE DISEASES, ONTARIO, 1936-1945.

NOTE.—Previous to 1941 deaths from Septic Sore Throat were not tabulated separately.

Mortality from Tuberculosis

Chart 5

DEATHS FROM
TUBERCULOSIS, CANCER AND PNEUMONIA
ONTARIO, 1900-45
Rates per 100,000 population

Mortality from Tuberculosis

Table S(1) shows the deaths from all forms of tuberculosis in the province from 1936 to 1945. Table S(2) shows the death rates per 100,000 population classified by the age of the decedents for 1941, 1942, 1943, 1944 and 1945. There have been two main trends in the total number of those dying from tuberculosis; namely, a gradual decline from 1,327 deaths in 1936 to 1,011 in 1940, followed by a levelling off during the past four years, with an average of 1,069 deaths per year. On the other hand, the death rate shows a steady decline from 36.4 per 100,000 in 1935 to 26.9 in 1940, followed by slightly increased rates of 29.0 in 1941 and 28.1 in 1942 and 1943 and 26.9 in 1944. The rate in 1945 decreased to 25.3. Chart 5 illustrates the decided reduction in mortality from tuberculosis which has taken place since the beginning of the century.

The largest number of deaths occurred in 1945 in the age-groups 20 to 29 years, and 30 to 39 years, followed by the 40 to 49 year group. Since 1936 there has been a decline in the number of deaths in the younger age-groups, whereas, in the older age-groups there has not been much change in this period. The rates, however, in all instances, have been steadily declining. Although the number of deaths of children under four years of age has always been relatively small, since 1941 there has been a remarkable reduction in the death rate among this group of the population.

Table Z in Part I of this report, gives details of deaths and death rates for counties according to place of occurrence and place of residence for the year 1945.

Mortality from Cancer

Chart 5 illustrates the steady upward trend in the mortality rate from cancer since the beginning of the century. The increase in the total number of deaths since 1936 is shown in Table T (1) and is apparent in most of the age-groups particularly among older persons. In addition the general cancer death rate has increased over the past decade, standing at 132.2 deaths per 100,000 population in 1945, as compared with 130.2 in 1941 and 123.2 in 1936. Table T (2) shows the rate from 1936 to 1945 by sex and indicates that the female rate is higher than the male rate, but the death rate for males has increased more rapidly than that for females.

1945.....	132.2	125.6	138.9

The number of deaths from cancer classified by sites affected is given in Table U for the period 1936 to 1945. Cancer of the digestive organs and peritoneum accounts for almost half of the deaths from this disease, with an increase of 11.8 per cent in the number of deaths occurring in this group since 1936. The number of deaths from cancer of the male and female genital and urinary organs has increased 26.6 per cent since 1936, cancer of the breast 8.6 per cent, while cancer of the respiratory organs has more than doubled during the same period.

NOTE: Cancer of male genital organs and of urinary organs was not tabulated separately for the years 1935 to 1940.

Mortality from Pneumonia, Bronchitis and Influenza

In Chart 5 is a curve showing the trend in the death rate from pneumonia, a disease which may be affected by epidemics as illustrated by the peaks of 1907, 1916 and 1918. During the twenty years from 1925 to 1945 the death rate from this disease showed a general downward trend. The decrease was more noticeable after the introduction of the sulpho drugs for the treatment of respiratory diseases. The rate was 79.5 per 100,000 in 1924, 44.2 in 1941 and 40.8 in 1945.

Table U (1) shows the number of deaths from influenza, bronchitis and pneumonia and indicates the fluctuation in the number of deaths recorded as due to influenza.

TABLE U (1)—DEATHS FROM PNEUMONIA, BRONCHITIS AND INFLUENZA IN ONTARIO, 1936-1945

Int. List No.	CAUSE	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945

306	Bronchitis	93	85	88	85	103	119	107	167	138	134
107-109	Pneumonia (all forms)	2,520	2,595	2,495	2,174	1,977	1,676	1,798	2,031	1,684	1,635

Special Classes of Accidental Deaths

Table V shows that of the 2,292 deaths in 1945 cross-classified as to nature of injury, 841 were due to crushing, 847 to falls, 288 to drowning, 167 to burns and 149 to poisonous gas, suffocation, cutting or piercing instruments and electrocution. Of those injured by crushing 497 deaths were due to automobile accidents (excluding trains or street-cars), 88 to railway accidents (excluding motor vehicles) and 28 to air transport accidents.

TABLE V—CLASSIFICATION OF ACCIDENTAL DEATHS ACCORDING TO THE NATURE OF INJURY

These accidental deaths are classified according to circumstances involving the accident under rubrics 169 to 176, 178, 180, 181, 182, 183, 185, 186, 187 and 193.

Int. List No.	CAUSES OF DEATH	M.	F.

Marriages

From Table W it will be noted that there have been significant fluctuations in the number of marriages in the province since 1924, each of which have reflected general economic trends. For example, there was a general increase in marriages and in the marriage rate leading up to 1929, a prosperity period, followed by a decline coincident with the depression period which continued until approximately 1933. This was followed by a return to a more stable economic condition which is reflected by an increase in both the total number of marriages and the marriage rates. The effect of the war is clearly apparent in the relatively high rates of 11.0, 11.4 and 11.7 per 1,000 population during the three years, 1940, 1941 and 1942. In 1943 the rate decreased to 9.2 followed by a further decrease to 7.9 in 1944, and an increase in 1945 to 8.5.

TABLE W—MARRIAGES AND MARRIAGE RATES PER 1,000 POPULATION, ONTARIO, 1924-1945

Year	Number	Rate per 1,000 Population	Year	Number	Rate per 1,000 Population

1934.....	25,874	7.3	1945.....	34,137	8.5

Divorces

In Ontario, divorced persons form a very small proportion of the population as compared with some of the other countries of the world. The following summary indicates the number and percentages of such persons in the population of the province as enumerated in the past three censuses.

	1921*	1931	1941
Divorced persons—Male.....	1,135	1,071	2,291
Female.....	1,369	1,015	2,865
Per cent of population—Male.....	0.08	0.06	0.12
Female.....	0.09	0.06	0.15

*Including legal separations.

An historical summary of the number of marriages dissolved in Ontario since 1919 is presented in Table X. Previous to 1920 very few divorces were granted in the province. There was no appreciable increase in the number till the late 1920's, but since the transfer in 1930 of jurisdiction from the Dominion Parliament to provincial courts there has been a steady annual increase (except in 1937) in the number of divorces. Previous to 1930 a record number of 213 (1928) divorces were granted. From an annual average of somewhat over 300 in the early 1930's the number has increased rapidly to 949 in 1941, 1,185 in 1942, 1,376 in 1943, 1,510 in 1944, and 1,948 in 1945, representing an increase in the rate per 100,000 population of from 9 or 10 to 48 in 1945.

In the early 1920's the majority of the successful applicants were husbands, but since that period dissolutions granted on the application of wives have been in the great majority. Since 1935 for every 1,000 divorces granted to wives, an average of 550 have been granted to husbands as applicants, the ratio in 1945 being 835 per 1,000 divorces granted to wives.

TABLE X—DISSOLUTIONS OF MARRIAGE (DIVORCES) AND RATE PER 100,000 POPULATION, 1919-1945, AND RATIO OF DISSOLUTIONS TO MALES AND FEMALES, 1935-1945

Year	Dissolutions of Marriage	Rate per 100,000 Population	Year	Dissolutions of Marriage	Rate per 100,000 Population	Year	Dissolutions of Marriage	Rate per 100,000 Population	DISSOLUTIONS GRANTED TO—		Ratio of Dissolutions to Males per 1,000 Dissolutions to Females
									Husbands	Wives

TABLE 46—CAUSES OF DEATH FOR CITIES, TOWNS AND VILLAGES
ONTARIO, 1945—Continued

CAUSES OF DEATH	Total	Belleville	Brantford	Brockville	Chatham	Cornwall	Forest Hill	Fort William	Galt	Guelph	Hamilton	Kingston
94B. Angina pectoris.....	33			1	1						3	
95. Other diseases of the heart.....	221		2	1	9	2	1	2	1	1	17	5
95A. Functional diseases of the heart (no organic lesion).....	16								1			
95B. Other diseases of the heart (rheumatic).....	84							1			5	2
95C. Other diseases of the heart (non-rheumatic)....	121		2	1	9	2	1	1		1	12	3
96. Aneurysm (heart and aorta excepted).....	18		1				1				4	
97. Arteriosclerosis (coronary or renal sclerosis or cerebral haemorrhage excepted).....	267	9	5		2	1	1	3	1	10	23	8
98. Gangrene.....	23		1			1			1			
99. Other diseases of the arteries.....	33	1	3				1				2	
100. Diseases of the veins.....	22							3			3	
101. Diseases of the lymphatic system.....	3									1		
102. High blood pressure (idiopathic).....	16		1							1	1	
103. Other diseases of the circulatory system.....	3								1			
CLASS VIII.—DISEASES OF THE RESPIRATORY SYSTEM												
Total.....	988	9	23	4	9	15	2	9	6	14	102	21
104. Diseases of the nasal fossae and accessory sinuses	9											
105. Diseases of the larynx.....	4											
106. Bronchitis.....	71		2			1		1	1	1	5	2
106A. Acute.....	23		1									
106B. Chronic.....	39		1					1		1	4	1
106C. Unspecified.....	9					1					1	1
107. Broncho pneumonia.....	411	1	10	3	4	7			3	3	50	14
108. Lobar pneumonia.....	250	4	7		4	2	1	3		8	27	3
109. Pneumonia (unspecified).....	101		2			2		5	2	1	7	1
110. Pleurisy.....	25	1				1					3	
110A. Empyema.....	16	1									3	
110B. Others under this title.....	9					1						
111. Haemorrhagic infarction, congestion, oedema and thrombosis of the lungs.....	53	1	2			1				1	7	
111A. Haemorrhagic infarction and thrombosis of the lungs.....	14		1			1					2	
111B. Others under this title.....	39	1	1							1	5	
112. Asthma.....	39	1			1	1	1				1	1
113. Pulmonary emphysema.....	3										1	
114. Other diseases of the respiratory system (tuberculosis excepted).....	22	1		1							1	
114A. Silicosis.....	5	1		1								
114C. Gangrene of lung.....	1											
114D. Others under this title.....	16										1	
DISEASES OF THE DIGESTIVE SYSTEM												
Total.....	825	9	13	7	14	8	1	12	7	15	77	16
115. Diseases of the buccal cavity and annexa, and of the pharynx and tonsils.....	35		1		2	1			1	1	1	
115A. Diseases of the teeth and gums.....	3											
115B. Septic sore throat.....	10		1			1				1		
115C. Diseases of the pharynx and tonsils.....	18				2				1			
115D. Others under this title.....	4										1	
116. Diseases of the oesophagus.....	3											1
117. Ulcer of the stomach or duodenum.....	160	2		2	1	1		3	3	7	17	1
117A. Stomach.....	85	1		1		1		1	1	6	7	1
117B. Duodenum.....	75	1		1	1			2	2	1	10	
118. Other diseases of the stomach.....	8									1		
119. Diarrhoea and enteritis (under 2 years of age).....	91		2	1	1	1				2	5	2
119A. Diarrhoea and enteritis.....	91		2	1	1	1				2	5	2
120. Diarrhoea and enteritis (2 years of age and over).....	33		1								7	
120A. Diarrhoea and enteritis.....	19		1			1					3	
120B. Ulceration of the intestines.....	14										4	
121. Appendicitis.....	92	1		2	6			3	1		9	3
122. Hernia, intestinal obstruction.....	141		4	2	2	1	1	2	2	3	14	3
122A. Hernia.....	75		2	1	1			2	2	2	8	2
122B. Intestinal obstruction.....	66		2	1	1	1	1			1	6	1
123. Other diseases of the intestines.....	33					1		1			1	
124. Cirrhosis of the liver.....	92	1	2		2	1		1			13	5
124A. With mention of alcoholism.....	5										1	
124B. Without mention of alcoholism.....	87	1	2		2	1					12	5

1946

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the **Twenty-first Annual**
Report of the Department of Health, for the year 1945.

Respectfully submitted,

R. P. VIVIAN,
Minister of Health.

TO THE HONOURABLE R. P. VIVIAN,
Minister of Health.

SIR,—I have the honour to submit for your approval the Twenty-first Report of the Department of Health, made in conformity with and under the provisions of The Public Health Act, for the year 1945.

I have the honour to be, Sir,

Your obedient servant,

J. T. PHAIR,
Deputy Minister of Health.

Memoriam

BERNARD THOMAS MCGHIE, M.B., M.D.C.M., LL.D.
1889-1945

Deputy Minister of Health for Ontario
1935-1945

ANNUAL REPORT

OF THE

DEPARTMENT OF HEALTH

For the Calendar Year Ending December 31st, 1945

The year 1945 marked the fruition of a number of projects, the accomplishment of which for a number of years had been the objective of the Department, namely:

1. A general acceptance of the principle of a larger administrative unit for public health purposes. Only the unavailability of qualified staff has prevented the almost province-wide establishment of county health units.
2. The more equitable distribution of grants to both sanatoria and public general hospitals.
3. The initiation, on an experimental basis, of what would appear to be a sound approach to the provision of more adequate diagnostic and treatment facilities for cancer.

Our satisfaction in the accomplishment of these was marred by the death of Dr. B. T. McGhie, who for some ten years had occupied the post of Deputy Minister of the Department. Perhaps the best eulogy that Dr. McGhie could have would be a simple statement to the effect that he had accomplished much during his tenure of office. Dr. John T. Phair, who had been Chief Medical Officer of Health to the Department since 1935, succeeded Dr. McGhie as Deputy Minister.

In June of 1945, Dr. A. L. MacNabb, who had directed the laboratory services of the Department for some seventeen years, left the service to become Principal of the Ontario Veterinary College at Guelph. There was only one compensation for Dr. MacNabb's going and that was that during his term of office he had gathered around him a staff from which it was possible to draw a suitable successor, in the person of Dr. W. B. McClure.

Dr. J. E. Sharpe, upon his return in September from five years' service with the Royal Canadian Air Force, took over the newly-created post of Assistant Deputy Minister.

The Administrative Staff of the Department was further strengthened by the appointment of Dr. DeWillet S. Puffer as assistant to the Chief Medical Officer of Health.

PUBLIC HEALTH ADMINISTRATION

DEWILLET S. PUFFER, B.A., M.B., D.P.H.

R. G. STRUTHERS, M.D., D.P.H.

One of the distinguishing marks associated with any Department of Government is the interest displayed in its projects and its programmes by the public it serves. The activities of the Division of Public Health Administration, directed as they are toward the effective functioning of the community health programme, have, particularly in the last few years, grown in intensity and extended in application. Each year has witnessed, at the local level, progressively expanding programmes and concomitantly presented additional problems of administration. The general public continues to show evidence of an increasingly aroused health consciousness. The health authorities are no longer faced with the problem of devising methods of conversion, but now spend their time and effort in keeping abreast of public demand for increased service. This long hoped-for evidence of interest is much appreciated by those who have worked assiduously with limited staff in an effort to attain the rightful recognition due the projects they have sponsored. The war years brought added administrative difficulties. There is no need to recite or delineate them. The post-war era, happily ushered in, in the latter part of 1945, presented additional matters for adjustment. One of the major problems of the Division is the establishment and supervision of Health Units. Six of these were added during the year, making a total now of eight in operation. The preliminary work carried on in this comparatively new field under Departmental guidance resulted in the acceptance of the plan by six other areas which have made arrangements to commence operation in 1946. It might be pointed out in this connection, that on invitation, members of the Department addressed the Councils of half the Counties of Southern Ontario as well as numerous representative official and unofficial groups.

Surveys were undertaken in Northern Ontario and tentative plans made for the establishment of Units when qualified staff becomes available. The Health Units established to which reference has been made, together with the dates of their institution are as follows:

Stormont, Dundas and Glengarry	1940
Porcupine Mining Camp	December, 1944
Kirkland-Larder Lake	April, 1945
Welland-Crowland	June, 1945
Northumberland and Durham	July, 1945
Elgin-St. Thomas	July, 1945
St. Catharines-Lincoln	August, 1945
Oxford	September, 1945

To ensure suitable trained staff to meet the anticipated needs of Units, fellowships were provided for physicians proceeding to the diploma in Public Health and for sanitary engineers, veterinarians and dentists attending courses in public health designed to meet their particular needs and leading to appropriate diplomas as prescribed by the School of Hygiene, University of Toronto. It is doubtless appreciated that all full-time public health personnel employed as such in this province are by regulation now required to have these qualifications.

To those interested, professional and lay individuals who devoted themselves willingly and untiringly during the formative stages and continued to participate

by lending their support and aid after the Units' activities and programmes became an actuality, the Department acknowledges its deep appreciation.

Changes directly affecting this Department during the year 1945 as related to medical officers of health are as follows:

F. J. Nickle	Martin Powers	N. D. Kyle	W. H. Carson

REPORT OF THE SOLICITOR

CHARLES WALKER, *Solicitor to the Department*

Dr. Kenneth G. Gray retired on December 31st, 1945, to assume his appointment as Assistant Director of Health Insurance Studies, Department of National Health and Welfare, Ottawa.

The following legislation was passed by the Legislative Assembly in the 1945 Session:

New legislation:—

The University of Toronto School of Nursing Grant Act, 1945.

The following Acts were amended:

The Mental Hospitals Act.

The Public Hospitals Act.

The Public Health Act.

DIVISION OF DENTAL SERVICES

F. A. KOHLI, D.D.S., D.D.P.H., *Director*

The Division has continued its policy of cooperation with the Department of Education and organizations of the dental profession in an active dental health educational programme.

As in former years, our booklets "Mouth Hygiene" and "Treasure House" have been distributed for the use of teachers and nurses and to school children as a supplement to class instruction.

Throughout the province films and slides have been shown and talks given to interested groups. Active interest has been created in public dental health, particularly in regard to the dental needs of school and pre-school children, amongst such local organizations as Boards of Health, School Boards, Women's Institutes, Farm Forums and Service Clubs. This is evidenced by the fact that, despite an acute shortage of dental personnel, during the year the following have initiated school dental services which are now operating with the assistance of the departmental grant:

<i>Townships</i>	<i>Villages</i>	<i>Towns</i>	<i>Cities</i>
West Wawanosh Holland Saugeen Amabel Albermarle Elderslie	Elora Chatsworth Teeswater Sutton	Chesley Kincardine	Kingston

The annual meetings of the Northern Ontario Dental Association, Grey-Dufferin Dental Society and Eastern Ontario Dental Association were attended by the Director, as well as the Ontario Dental Association Convention and the Winter Clinic of the Academy of Dentistry.

Regular supervision and consultative service has been given to the Ontario Hospital dental clinics, the Central Laboratory and the clinics in the institutions under the Provincial Secretary's Department. A number of the dental personnel are still with the Armed Services, but routine and treatments are being carried on in a fairly satisfactory manner.

To meet an increased volume of work an assistant laboratory technician has been added to the staff of the Central Laboratory.

The Dental Car has had a busy year. During the month of October it was in the shops for renovation, but in the eleven months the car was travelling between Ingolf and Chapleau, over eleven hundred children were treated.

The Division continues its interest in emergent dental treatment for relief recipients, although the number taking advantage of this service is small.

The Division is associated with the Faculty of Dentistry in research into the control of dental diseases.

Considerable attention is being given to the possibility of the control of caries through the addition of fluorine to drinking water. Analyses have been made of the drinking water of a large number of localities in Ontario. The city of Brantford has embarked on an experiment of caries control by fluorination of the municipal water supply.

Prior to resuming his duties in the division, in May, the Director completed the post-graduate course in dental public health.

The year has marked the return to the hospitals service of several of the dental staff from active service.

DIVISION OF EPIDEMIOLOGY

R. P. HARDMAN, M.D., D.P.H., *Epidemiologist*

During the war years, the demand for man power in urban industrial centres attracted thousands of persons from rural areas to cities throughout Ontario. The increase in population in these centres caused excessive overcrowding, but with little effect on communicable disease morbidity rates. Contrary to expectations of an upward trend, there has been a marked reduction in the number of communicable diseases reported annually in Ontario since 1941, and during 1945 a new low was established. The most significant factor in the reduction of communicable diseases in 1945 was the absence of any Province-wide outbreak of minor communicable diseases, such as Chickenpox, Mumps, German Measles and Measles.

Outbreaks of Measles, since 1938, have followed biennial cycles. The expected outbreak of Measles in 1945 did not develop, and the incidence fell below that of the previous year. Prior to 1938, there was little evidence of periodicity in Measles outbreak years.

Influenza, Scarlet Fever and Whooping Cough have also shown a marked reduction in the number of cases reported during the past year. The incidence of Cerebro-Spinal Meningitis during 1945 dropped to pre-war level. There was also a reduction in the number of cases of Poliomyelitis in 1945, as compared with the corresponding period in 1944. The incidence of Tuberculosis, Syphilis and Typhoid Fever show lower trends. Of the twenty-seven communicable diseases reported during the year, there was a total reduction of over thirty-three thousand cases, as compared with the previous year.

However, not all communicable diseases reported in Ontario have shown a decrease during the year. Slight increases were noted in the incidence of Infectious Jaundice, Undulant Fever and Diphtheria. While no outbreaks of Infectious Jaundice were reported, there was an increase of 82 cases reported. A total of 83 cases of Undulant Fever were reported, over 55 in excess for the year previous. While the incidence is still low, as compared with pre-pasteurization years, the increase, in all probability, is due to the greater interest of physicians in the diagnosis of the chronic forms of the disease.

During the past two years, there has been an upward trend in the morbidity rate of Diphtheria. Since 1939, the rates have been consistently low, an average of 4 per 100,000. The rate for 1945 is estimated at 6 per 100,000. For years following the last war, epidemics of Diphtheria were common in Ontario. Outbreaks were finally controlled through massive immunization of the susceptibles against the disease. It required, however, the cumulative effort of years to produce the result. With the lag in sustained immunization during the war years, because of changing Medical Health Officer personnel and the acute shortage of physicians, yearly immunization against Diphtheria has declined to a dangerous level. With the demobilization of the Armed Forces from European areas where the Diphtheria incidence is known to be high, the chance of higher morbidity rates in Ontario is possible, due to the return of the troops from these points. Outbreaks of Diphtheria can occur in areas where immunization against Diphtheria has dropped to less than 75% of the school-pre-school group.

This Division continued to provide assistance and consultation services to many local Health Departments. Direct services were given particularly in the diagnosis of suspected Smallpox, Scarlet Fever, Diphtheria and Typhoid Fever.

Outbreaks of Food Poisoning were not as prevalent in the Province during 1945 as in previous years due to the demobilization of Armed Camps and industrial cafeterias. Several outbreaks were investigated, however, and in two outbreaks, the contamination of food by staphylococcus toxin was confirmed on laboratory examination. A winter outbreak of suspected Food Poisoning occurred in a small resort. Nausea and vomiting were the only symptoms. There was no common article of food, and analysis of the food samples was negative on examination. All indications pointed to a respiratory type of transmission, probably of the nature of a virus. Similar outbreaks previously reported have been quite common during the late summer months. The causative factor has not been discovered, staphylococcus and other types of food poisoning have been eliminated, following many investigations into the cause.

TABLE 1
CEREBRO-SPINAL MENINGITIS

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1941	501	29	13.2	1.9	14.0
1942	276	71	7.2	.8	10.9
1943	185	32	4.8	.8	17.2
1944	162	24	4.0	.6	14.8
1945	81	11*	2.0	.2	13.5

*Tentative.

As shown in the preceding table, there was a marked reduction in both the morbidity and mortality rates of Cerebro-Spinal Meningitis. During 1940, an increased incidence was noted. The peak was reached in 1941. Since that date, there has been a decline in the rates to pre-war levels.

TABLE 2
DIPHTHERIA

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1941	200	13	5.3	.3	6.3
1942	143	15	4.0	.4	10.5
1943	75	6	1.9	.1	8.0
1944	185	11	4.5	.2	6.5
1945	253	24*	6.0	.6	9.4

*Tentative.

There was an increase in the incidence of Diphtheria during the past two years in Ontario, and local outbreaks have occurred in municipalities in the eastern part of the peninsula, along the Ottawa River and as far west as Sudbury. Diphtheria has been reported in many counties and cities in Ontario that have been comparatively free of Diphtheria for many years. Cases have occurred in many municipalities where the local estimated number of children immunized

was considered high. In a survey made by this Division of 274 cases of Diphtheria during the past fourteen months, 173 children who developed Diphtheria were in the age group 0-14. 141 or 85% of the children in this age group had never received Diphtheria Toxoid.

TABLE 3

TYPHOID FEVER

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1941	133	15	2.8	.4	11.0
1942	109	8	2.8	.2	7.3
1943	60	9	1.7	.2	15.0
1944	78	7	1.9	.1	8.0
1945	58	4*	1.5	.1	6.8

*Tentative.

Fifty-eight cases of Typhoid were reported in the Province during 1945, and a new low morbidity rate was established in Ontario for this disease. There were no outbreaks of Typhoid Fever during the year, and only 22 counties and districts, of the total of 49 reported cases. Seven carriers were found during the year, following investigation of the cases.

TABLE 4

POLIOMYELITIS

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1941	141	10	3.7	.2	7.0
1942	89	11	2.1	.2	12.5
1943	89	9	2.1	.1	10.0
1944	332	20	6.5	.5	6.0
1945	183	4*	4.6	.1	2.1

*Tentative.

The high incidence of Poliomyelitis in Ontario in 1944 was not maintained during the past year, although the morbidity rate during the year was considerably higher than the rates for the two years prior to 1944.

In Counties that experienced a very high incidence during 1944, the outbreak year, the morbidity rates declined to low levels. Four counties in this group reported the absence of Poliomyelitis during 1945. The table shows the incidence of Poliomyelitis during 1944 and 1945 in 10 counties, for the two-year period.

With the exception of the District of Kenora in 1944, the outbreak of Poliomyelitis that year was localized in the south-western portion of the Province. During the past year, the incidence of Poliomyelitis was the highest in the Ottawa Valley District, the District of Temiskaming, the Counties of York and Ontario. With the exception of the County of York, where the morbidity rate was not excessive for 1945, there was a marked reduction in the number of cases reported in areas where the disease had been prevalent the previous year.

Of the 182 cases reported for the year, 169, or 93%, were treated in hospitals at the expense of the Ontario Government.

The remaining part of the Report consists of tables, and a brief summary is given.

Table 6 presents the total number of cases and deaths of communicable diseases reported in Ontario during 1945; and for comparative purposes, the number of communicable diseases for the past four years.

Table 7 shows the geographical distribution of communicable diseases, reported by county, for 1945.

Table 8. The incidence of communicable diseases by months is shown in this table, with comparative monthly totals for the past three years.

Table 9. Distribution of literature and various forms used in promoting and recording activities in immunization, are distributed upon request to small municipalities in rural areas.

Tables 10, 11, 12 and 13 deal with the distribution of Insulin, which is supplied to indigent patients. The distribution of free insulin and free biological products is another activity of this Division.

Table 14 shows the number of vials and cost of the various biological products distributed during 1945, by months.

Tables 16, 17 and 18 are tables showing the total costs of the products distributed during the year, and comparative costs for previous years.

Tables 19 to 22 show the annual distribution and cost of Tuberculin.

DIVISION OF INDUSTRIAL HYGIENE

J. G. CUNNINGHAM, M.B., D.P.H., *Director*

MEDICAL SERVICE

With the end of the war has come a reduction of medical staff in a number of large war industries. About one hundred and fifty nurses and fourteen physicians have been released. Practically all plants established for war purposes had developed medical services for the maintenance of the general health of employees and while now reduced, they have served to demonstrate to a large group of employees and to their employers, if such were needed, the value of these services.

There has been a small but steady demand from continuing industry for suitable medical personnel for this purpose but this has not been sufficient to provide much incentive to physicians and to nurses returning from the armed services to take special training for this work. A good opportunity is thus being lost. More intensive effort and much broader interest is necessary to bring home to employers the importance of health services in plants, in especially smaller plants.

The Government has seen fit to make available to the Civil Service, the facilities which it is considered should be available to employees elsewhere, as far as health is concerned. A full-time physician assisted by two nurses, to be increased shortly to three, conducts physical examinations, receives complaints of ill-health including emergencies, continues health teaching and otherwise attempts to raise the general level of health in the Civil Service group. This is not a scheme for the treatment of disease. It seems important that commercial and financial houses, including newspaper offices and plants, as well as other industries, should embark on a similar project. A number of the life insurance company offices now have such a program. One activity of the Department in this direction has been to approach employers in certain municipalities, pointing out the benefits of health supervision and undertaking to provide industrial visiting nursing services through the County Health Units where the employers establish health maintenance within their own plants. It is too early to say what response from employers this will bring. Health Departments in the larger cities could be more active in the same direction.

The Division has staff with experience in the establishment and operation of medical service within industry, who advise employers on the details of procedure to be followed. This year there have been executives of twenty-four plants make inquiries respecting the establishment of these services as a whole and ninety-six plants have inquired respecting nursing services. All of these have been interviewed on the subject. Sample record forms are provided as a contribution to the effort to bring before the employer a method for assessing the work of the medical service in his plant. The interested employer wants to know what a minimum industrial medical service provides and how he can determine that it is being provided.

In factories already supplied with some medical staff the consulting industrial nurse of the Division has had numerous requests for assistance in various aspects of the nurse's work. In about one-third of those visited where recommendations were made, these have already been carried out. In both undergraduate and postgraduate nursing training more time has been given to the subject of industrial nursing, and arrangements have been made in a number of instances for

nurses in training to see the work being conducted in factories. Industrial executives have always been very cooperative in this regard. The demand for personal health literature for distribution by nurses in industry continues to be high. The Registered Nurses Association of Ontario has recently established a Placement Bureau but in the meantime, the Division has acted to bring nurses with suitable experience and prospective employers together. The Victorian Order of Nurses sells part-time nursing service within small factories in Toronto, Hamilton, London and Stratford. This is an important development for small industry and should be extended. The Division's industrial consultant nurse is a member of the Ontario Red Cross Home Nursing Committee, of the Central Ontario Association on Health, Physical Education and Recreation, and of the Public Health Section, Labour Relations Committee, as well as the Industrial Nursing subsection of the Registered Nurses Association of Ontario.

WORKING CONDITIONS IN INDUSTRY

Occupational Diseases

Manpower and material shortages during the war have contributed to longer hours, difficulties in house-keeping and in the control of dust and fumes to increase the hazard from occupational diseases. The long range effects in some instances are only now becoming apparent, e.g., in foundries the need for more than one "heat" a day results in increased exposure to silica dust. The recovery of scrap metal from storage batteries and lead glass has been associated with increased exposure to lead. Dermatitis from lubricating oils has considerably increased skin eruption among certain machine operators. In the manufacture of artificial abrasives there has appeared an occupational lung condition which at this stage of the investigation seems to have been associated mainly with increased exposure at electric furnaces due to continued increased production during the war. This condition is now the subject of laboratory and clinical investigation including physical examinations, analyses of raw materials, the fumes produced and biological specimens. With the cooperation of the Department of Chemistry University of Toronto, in providing space and equipment, animal experiments are being conducted.

New materials constantly make their appearance. Some receive limited toxicity tests before they are put on the market but the effect they produce under conditions of use are of *first* importance, e.g., the introduction of an organic mercury compound as a disinfectant in glues and elsewhere; the use of a similar compound for the disinfestation of seed grains; the possible extended use of radioactive materials arising out of atomic research; and the materials used in the compounding of artificial rubber. The introduction of a complex organic substance to combat deterioration of fabric to be used under tropical conditions resulted in a number of severe cases of skin inflammation, seven of which required hospitalization. The use of this material for this purpose was discontinued at once. Such substances claim the attention of this Division. In addition is the great variety of occasional exposures encountered for which assistance is required either by the factories themselves, by the Factory Inspection Branch of the Department of Labour, the Accident Prevention Associations or the Workmen's Compensation Board.

About three hundred and fifty visits have been made to factories on various aspects of the control of occupational diseases. The extent of the staff limits these visits largely to special investigations on new hazards and to visits upon request. One physician in the Division spends two half days a week at the Workmen's Compensation Board in reference to claims for occupational skin conditions, especially in relation to his knowledge of exposure in industrial process.

PHYSICAL EXAMINATIONS

Periodic physical examination reports are received by the Division from industries with exposure to lead and benzol as required by the Factory Act, in thirty-two plants. Such examination reports are regularly received in the case of sixty others. The Division provides blood smear examinations for physicians encountering lead cases or in supervising the health of lead workers. There have been 3,700 of these smears submitted by one hundred and twenty-one physicians from ninety-one plants in addition to other blood examinations conducted in special cases.

Physical examinations conducted in relation to dust exposures number about 3,000. Five hundred and sixty of these were claimants appearing before the Silicosis Referee Board, another four hundred of them involve chest x-rays and reports on films of industrial workers referred from other Provinces; five hundred were for investigations associated with exposure to fumes and dust from electric furnaces.

Owing to shortage of staff only about 18,000 employees were examined by mass chest x-rays. Approximately .02 per cent of these had active tuberculosis. Many of these examinations at the same time reveal the presence of non-tuberculous pathology of which the family physician is advised. There were an additional seven hundred and twenty examinations or reports or both, for various Boards within the Civil Service.

The introduction of periodic physical examination of workers exposed to silica dust in such industries as granite cutting, foundries and procelain manufacture, has been delayed on account of the war but this should be instituted as soon as possible to prevent susceptible persons from sustaining these exposures and to ensure that cases of active tuberculosis are not employed among such groups of men.

LABORATORY ANALYSES

The accompanying table shows the distribution, by industry, of materials analyzed in the Industrial Hygiene Laboratory. The visits to which reference is made include only those made by the laboratory staff. Enquiry as to the content of materials used is facilitated by a regulation under the Factory Act requiring the manufacturer to provide the Department with this information so that the number of samples to be analyzed is reduced. Laboratory analyses can be used as a check on this information and seldom are errors detected. Similarly, manufacturers have conformed to the "labelling" regulation for containers with lead and benzol. In only one instance this year was a product detected containing benzol which was not labelled as required.

Moulding sands in common use have been studied as to particle size and silica content. Mercury exposure was below the allowable concentration in a dry battery process. Chlorinated naphthalenes produced skin eruption in certain small and large electric wiring operations.

The Industrial Hygiene Laboratory is responsible also for testing materials under the Bedding Regulations. Under the Fumigation Regulations respecting the use of cyanide compounds for fumigation purposes, thirty-one household licenses and seventeen commercial licenses have been issued during the year, all renewals except five of the household and four of the commercial licenses.

ANALYSES AND FACTORY VISITS FOR LABORATORY ENQUIRY

TYPE OF INDUSTRY	No. of Samples	No. of Companies	INSPECTIONS		HAZARD
			No. of Visits	No. of Companies	
Abrasive.....	30	3	11	4	Silica.

ENGINEERING CONTROL

Regular review of plans for new factory construction and equipment as required by the Factory Act is maintained with the Examiner of Plans of the Department of Labour. This provides an opportunity to make corrections or suggestions for the control of dust and fumes and for accommodation for medical services before construction begins. Private agencies preparing such plans have shown increasing interest and facility in meeting these needs and in bringing to the attention of the employer desirable features for the maintenance of health.

Special inquiry involving engineering recommendations has been made regarding the control of non-offset spray in printing, scrap lead recovery, electric furnace operation, and spray painting in garages. Enquiry for this type of service is constant and is not being met.

The control of the hazard from radioactive materials has involved frequent testing and close cooperation with those responsible for operation of these procedures. Employees engaged in dial painting have been markedly reduced since the war.

The continued cooperation of the staff of the Factory Inspection Branch of the Department of Labour, the Workmen's Compensation Board and the Accident Prevention Associations, is appreciated.

BEDDING

Under the Bedding Regulations the following inspections were made:

Manufacturers.....	541
Retailers.....	543
Suppliers.....	128
Renovators.....	264
Miscellaneous.....	129
	1,605
Total.....	1,605

There was an increase of some 500 inspections over the previous year which was due mainly to the return of Mr. W. L. Smith who resumed his work as Bedding Inspector after an absence of nearly six years on active service.

As a result of the above inspections, the following articles were placed "off sale":

Chesterfield Suites.....	275 (individual
Studio Couches.....	44 pieces)
Mattresses.....	106
Comforters.....	32
Pillows and Cushions.....	29
	486
Total.....	486

In the majority of cases, these articles originated outside the Province and were either unlabelled or mislabelled.

Some 500 physical and chemical tests were done on the 237 samples of filling materials submitted for analysis. These samples were collected from 85 different manufacturers, suppliers and retailers.

During the war many of the materials used in the bedding and upholstering industries were difficult or impossible to obtain. The situation is still acute but a gradual betterment may be expected. In spite of these handicaps most Ontario manufacturers, suppliers, retailers, etc., have cooperated with the Department in making the regulations effective. During the year the industry has given some consideration to the question of a Dominion Bedding Law.

Following are the titles of articles and addresses prepared on technical subjects during the year:

1. "Industrial Medical Service During the War"—F. M. R. Bulmer, M.B., at Meeting of Montreal Industrial Medical Association, Montreal, Quebec.
2. "Evaluation of Industrial Medical Services"—F. M. R. Bulmer, M.B., at Conference on Industrial Health, Health League, Toronto.
3. "The Physician's Role in Protecting the Worker's Health Through Control of Industrial Environment"—F. M. R. Bulmer, M.B., published in the Canadian Medical Association Journal, March, 1945.

4. "How the Employer May Evaluate His Medical Service"—F. M. R. Bulmer, M.B., published in *Industrial Medicine*, November, 1945.
5. "Pneumoconiosis as an Industrial Problem in Ontario"—A. R. Riddell, M.B., presented before a Meeting of Industrial Physicians in Montreal.
6. "Silicosis"—A. R. Riddell, M.B., presented before a meeting of the Canadian Workmen's Compensation Boards at Banff, Alberta.
7. A Course of Lectures on Silicosis was given by Dr. A. R. Riddell to certain members of the Armed Forces.
8. A series of three articles dealing with occupational dermatitis was prepared by Dr. Card and published in the *Canadian Paint and Varnish Magazine*, 1945.
9. Addresses were given to Public Health and Industrial Nurses at St. Catharines, Peterborough and Niagara Falls, and to students in Public Health Nursing.

Dr. J. R. Card was granted one year's leave of absence in September to take a special course on Dermatology, to assist the Division in dealing with occupational skin conditions.

Dr. W. H. Cruickshank, upon return from active service, has left the staff of the Division to become Medical Director, Bell Telephone Company of Canada, with headquarters at Montreal.

Attached is the Annual Report of the Chief Sanitary Inspector, Mr. D. S. McKee:

UNORGANIZED TERRITORY

The exceptional conditions brought about by the war and the termination of hostilities in 1945 has aggravated the demand for wood products and other raw materials. The present priorities given to lumber operations far surpasses the number of *experienced* workmen available for lumber camps.

From the information forms received from the various industrial operators with camps in the unorganized territorial districts, a total of 35,504 workmen was employed in camps. The following summary will indicate the nature of employment:

INDUSTRY	Number of Operations	Number of Camps	Number of Men Employed
Pulpwood Camps.....	55	366	13,767
Lumber Camps.....	131	261	9,704
Sawmill Camps.....	96	103	2,750
Mining Camps.....	32	26	7,125
Construction Camps.....	14	17	2,158
	328	773	35,504

To meet the demand for forest products and to overcome the shortage of labour, many employers continued logging camp operations throughout the

summer months. These camps required more frequent visits of inspection during the warm summer months to avoid infectious diseases among the employees. In the prisoner-of-war camps, there are civilian woods supervisors and others for whom the employer is responsible. The present expansion program of the pulp and paper mills throughout Northern Ontario has given employment to large groups of workmen on construction work and has stimulated woods camp operations.

New mills now under construction are the Brompton Pulp and Paper Company, Kraft Mills, Red Rock; the Kalamazoo Vegetable and Parchment Company, Espanola; the Marathon Pulp Mills of Canada, Marathon. The construction of another new pulp mill and the development of a townsite on the Aquasabon River at Black on the C.P.R. has been proposed. Preliminary work on the plant is now under way.

Mining camp operations, which were curtailed during the war period, are now becoming more active.

Owing to the temporary nature of many construction camps, more frequent visits of inspection were necessary during the summer months in regard to sanitary supervision by the Inspectors.

Medical and Sanitary Supervision:

During the year, 254 medical and sanitation contracts were entered into between employers of labour and contract physicians in the territorial districts.

The established departmental policy is to approve the Medical and Sanitation Contracts only when entered into with the nearest or most accessible resident physician to the camps and workmen. As an alternative, engaging a full-time resident physician at the centre of operations has proved very satisfactory. In many localities, this established policy is the primary basis for maintaining a medical service of any nature in the small towns and unorganized settlements throughout the North.

Pertaining to the medical services to workmen in these camps, the following information has been received from the Contract Physicians during the year:

Number of Medical and Sanitation Contracts	Number of Contract Physicians	Number of Assistant Physicians	Number Physicians' Monthly Reports	Number Inspectors' Reports
254	107	58	5,946	916
MEDICAL SERVICE RENDERED AS REPORTED MONTHLY BY THE INDUSTRIAL PHYSICIAN:				
Number of Workmen Employed	Number of Workmen Requiring Treatment	Routine Examinations	Communicable Diseases	Immunizations
35,104	21,761	15,011	1,766	781

The case record of communicable diseases reported by the contract physicians is lower than last year, taking into consideration the average number of employees engaged in camps over both years. Influenza was reported as epidemic in many camps during January and February, and was responsible for three deaths. In the Kirkland area, 114 cases of infectious jaundice were reported, and none from

other sections of the province. One death was reported from typhoid fever. The deceased was employed on a road camp. No fresh cases were reported from this camp. Sporadic cases of septic sore throat and other communicable diseases requiring the attention of the Contract Physicians and Inspectors were reported during the year.

Two outbreaks of food infections were reported, and sporadic mild outbreaks of diarrhoea were reported during the late summer and fall months. No serious lost time through this illness was reported at any time from this group.

Apart from cases reported by the Contract Physicians from the industrial camps, 265 other investigations were made by the Sanitary Inspectors in the control of communicable diseases, reported from the unorganized communities and settlements.

Health Units:

In the two Health Units established in Timmins and Kirkland Lake areas, only a very small number of industrial camps are located in the unorganized townships which form a part of these Health Units for health supervision.

Improvement Districts:

Nine Improvement Districts have now been established in the more densely populated areas in the unorganized territory. These districts are now operating under the same statutes as a municipality. The Sanitary Inspection work within these districts is still left with the District Provincial Sanitary Inspectors. This work will entail more frequent inspections and close sanitary supervision by our Inspectors.

Planning and Development Department:

One of the major problems of the Inspectors in the past has been the sanitary control of new townsites and communities. The new Department of Planning and Development will overcome many of the difficulties of our Inspectors in the past by exercising some control through the pioneer stage of development.

Tourist Camp Inspections:

During the summer months, 273 inspections were made of tourist camps, hotels, and road camps, located on Manitoulin Island, Temagami, Haliburton, Algonquin and Kenora.

In addition, 32 inspections were made of the various charitable organizations such as children's fresh air summer camps.

Venereal Disease Control Investigations:

Under the Venereal Disease Control Regulations, 138 investigations were made and notices served on contacts and patients. In co-operation with the Division of Venereal Disease Control, arrangements were made by the Inspectors for the distribution of large numbers of pamphlets and other literature, printed in English and French, on V. D. Control, to industrial workmen in the camps. Also, arrangements were made for a number of showings of films, such as "With These Weapons" and "Health is a Victory." These two films were well received by the employers and employees.

Four cases of tuberculosis were reported by the contract physicians. Arrangements were made by the Division of Tuberculosis Control for sanatorium treatment in these cases. Eight other investigations were made pertaining to after-care of tubercular patients.

REGULATIONS

During the year, amendments to the regulations were made necessary to conform with the establishment of Health Units in unorganized areas, and also with the Federal Government regulations pertaining to the Department of Veterans' Affairs.

Three of the sanitary inspectors, Mr. A. S. O'Hara, Mr. D. Moore, and Mr. George Powell were still in the Armed Forces as of December 30th. Mr. S. Harris returned to the staff from overseas in June and has resumed his duties, assisting in the Districts of Nipissing, Cochrane and County of Renfrew.

REPORT OF CIVIL SERVICE HEALTH CENTRE

The Report of the Medical Director of the Health Centre, Dr. A. Griffin Hill, is attached. This service has developed along the lines which industry and commerce employing groups of workers are encouraged to follow for the maintenance of the general health of their employees.

1. There are about nine thousand civil servants in Ontario and two thousand, seven hundred of them are in the Parliament Buildings. Visits to the Health Centre except for physical examination for category, are largely limited to those employees in Toronto.
2. Visits to the Health Centre have averaged 2.4 per year per employee covered which may be compared with an optimum of around 5.0 when it is recalled that the accident hazard is low. As the Health Service becomes better known and confidence is established, this figure should be attained. The number of visits for all purposes has increased in the past year by forty per cent.
3. There have been 1,811 employees categorized, 1,421 for permanent staff, 380 for temporary staff and 10 rejected.
4. There were only 133 periodic physical examinations. They should be largely increased.
5. There were 303 cases of occupational injury. Among the non-occupational conditions prominent are: non-industrial injuries, pyogenic infections care of the eyes, gastro-intestinal disturbance and, of course, upper respiratory infection.
6. In 201 instances, employees were referred to their family physicians and in 114 other cases, reference was made to specialists, clinics or to hospitals.
7. Rather more than one-half of those visiting the Health Centre were seen by the physician. This is a high proportion.
8. The details of arrangements for physical examination of outside staff, including chest x-ray have been worked out. A shortage of medical staff at outside points has delayed some of these examinations. This situation should adjust itself shortly.
9. A statement drawing attention to the Health Centre was prepared for printing in the Civil Service News and a detailed statement of arrangements for using the facilities of the Health Centre was prepared for distribution to Heads of Departments.

DIVISION OF LABORATORIES

W. B. McCLURE, M.B., D.P.H., *Director*

The Central Laboratory, which includes the East Block unit, 1011 Queen St. W. (Outfit Room and Virus Laboratory) and Mimico (Serological Laboratory), has 138 staff members. Of this number there are six medical internes and two Consultants. In the seven Regional Laboratories there are 56 staff members, bringing the total to 194 in the Division of Laboratories. There are also five Subsidized Laboratories, with additional staff who are not civil servants.

At the beginning of the year the laboratory suffered a great loss in the death of Dr. B. T. McGhie, who always interested himself greatly in the laboratory work. In June Dr. A. L. MacNabb assumed his duties as Principal of the Ontario Veterinary College. During the past 17 years, under his direction the work has increased greatly, and the standard of work done has steadily improved until to-day the Provincial Laboratories are widely recognized, not only in Canada but also in the United States. We are fortunate to have Dr. MacNabb available as Consultant Director of the Laboratory Division.

Nineteen members of our staff enlisted in the Armed Forces during World War II. Two of them paid the supreme sacrifice. Dr. Woolner, a pilot in the Air Force, was brought down over the sea and is buried on an island in the North Sea. Robert Tarbett, an Air Gunner, was killed over Germany. We shall ever remember them by their kindly manner and earnest co-operation while they were with us in the laboratory. A number of our staff have returned to duty and we welcome them back again.

A number of changes have taken place in the Directors of the Regional Laboratories. Dr. A. E. Allin has again taken over the Directorship of the Fort William Branch Laboratory, after an enforced absence due to ill health. Dr. S. F. Penny, who carried on in Dr. Allin's absence, is now Director of the Ottawa Regional Laboratory, where he will be commencing a Pathology service for the district. Dr. E. L. Barton, who has rendered valuable service as Director of the Ottawa Laboratory, has been transferred to the Central Laboratory. Mr. A. B. Lamb has been transferred to the Kingston Laboratory as Bacteriologist. Mr. A. D. McClure, who has been in the Air Force, has resumed his position as Director of the North Bay Laboratory. A Subsidized Laboratory is being opened in the Stratford General Hospital. Dr. S. J. Miller has been appointed Pathologist of this laboratory.

Dr. Labzoffsky has done valuable work in the Virus Laboratory and received his D.V.M. for a thesis submitted on "The Effect of Reducing Agents on the Viability of Equine Encephalomyelitis Virus and the Neutralization of Infectivity of Equine Encephalomyelitis Virus by Immune Serum." Considerable work is being done on virus infection in wild pigeons.

Miss R. Hughes and her staff have given valuable service in serology. Due to the blood examinations done on discharged personnel from the Armed Services, the work has been greatly augmented.

For the past six years many difficulties have been encountered in the conduct of the laboratories. At times it has been difficult to keep an adequately trained

staff. Supplies and equipment were difficult to obtain, although in some items priorities were more easily obtained, as a great deal of work was being done for the Army. A new laboratory building is a necessity in order that work may be brought together, in order to bring about a saving of time and cost of maintenance, and to provide more adequate space, as overcrowding in the East Block has reached the point where it is difficult to carry on the work efficiently.

The Division of Laboratories conducted 1,039,238 examinations during the calendar year 1945. This is an increase of 102,894 over the previous year. This is due chiefly to the blood tests done on all personnel discharged from the Armed Forces. During the war, until the end of 1945, the Laboratory Division have examined 1,078,238 specimens for the Armed Forces and 582,969 for the Red Cross.

In assuming the duties as Director of the Central Laboratory I wish to thank all my associates in the Central Laboratory and the various members of the Branch Laboratory Staffs for their valuable assistance and co-operation in the work.

Following is an outline of the work conducted by the Division of Laboratories during the year 1945, also a report from Dr. M. C. Dinberg, Pathologist, as well as reports from each of the Branch Laboratory Directors:

Table I lists the number and nature of examinations conducted at each of the Divisional Laboratories and diagnostic outfits distributed in 1945.

Table III indicates the amount of media, stains and solutions prepared at the Central Laboratory.

TABLE III
MEDIA, 1945

Liquid Media	4,131 litres
Solid Media	2,468 "
Stains	1,138 "
Saline	984 "
Poured Plates	74,781 plates
Egg Media	91,104 tubes
Bottles for Feces Outfits	17,314 bottles
Bottles for Blood Cultures	3,951 "
Wax Ampules for Dark Fields	4,512 vials
Laked Blood Tubes for G.C.	17,000 tubes
Distilled Water used	2,291½ gals.
Colloidal Gold	192 litres
N/1 NaOH. used	1,214 ozs.

The following Tables indicate the results of some of the diagnostic procedures conducted at the Central Laboratory:

Diphtheria:

Table IV indicates the number of examinations conducted for the isolation of *C. diphtheriae*, 8.7 per cent of which yielded positive results. Virulence tests were performed on 416 specimens. Some of these were from pure cultures and others were from field cultures on tellurite slants. 54% were positive.

TABLE IV
DIPHtheria—CULTURE AND VIRULENCE TESTS, 1945

CULTURES			VIRULENCE TESTS		
Number	Positive	Negative	Positive	Negative	Not Performed
7222	631	6591	225	191	215

Specimens were also identified as to whether the organisms were of Gravis, Mitis or Intermediate Type. Table V shows the incidence of these types isolated.

TABLE V
TYPES OF *C. DIPHTHERIAE*, 1945

Intermediate	Mitis	Gravis	Not Tested	Total
123	27	35	40	225

Tuberculosis:

In Table VI, of 28,727 specimens submitted for the identification of tubercle bacilli, 6.12 per cent were positive on direct smear examination.

TABLE VI
TUBERCULOSIS
MICROSCOPIC SMEAR EXAMINATION RESULTS FOR THE PRESENCE
OF TUBERCLE BACILLI

Number Examined	Number Positive	Per Cent Positive	Number Negative	Per Cent Negative
28,727	1,760	6.12	26,967	93.87

Table VII shows the results of cultural examination of tubercle bacilli on 15,844 specimens. 7.09 per cent of these showed a growth of tubercle bacilli. Specimens other than sputa were examined both by cultural and animal inoculation tests.

TABLE VII
CULTURAL EXAMINATIONS FOR TUBERCLE BACILLI, 1945

TYPE OF SPECIMEN	Number of Specimens	POSITIVE AT		Total Positive	Negative	Per Cent Positive
		4 Weeks	8 Weeks			
Sputa.....	12,713	431	509	940	11,773	7.76

PATHOLOGY SECTION

M. C. DINBERG, B.Sc., M.D., *Provincial Pathologist*

Herewith is submitted the annual report of the Division of Pathology for the year 1945. The number of specimens increased appreciably over the preceding year.

Dr. H. D. Howell returned to the Division following overseas service with the R.C.A.M.C.

Dr. Dinberg presented a paper "Myoblastoma" and a demonstration of "Benign Keratinizing Epithelioma" at the fall meeting of the Ontario Pathological Association.

I am grateful to Prof. W. L. Robinson for consultant advice and to Dr. W. B. McClure for kindly assistance.

BRANCH LABORATORY—BELLEVILLE

J. B. MCKAY, M.D., *Director*

The statistics from the Belleville Laboratory are herewith submitted for the year 1945.

S. Newport has been isolated from several patients and in one instance S. paratyphoid B. with S. Newport. Only one diphtheria organism was isolated from a patient. Bacteriological examination of dishwashing in restaurants and beverage rooms has been resumed.

Several examinations have been commenced including dark field examination, coagulase test, prothrombin time determination and Rh factor studies.

There was a decrease of 1,364 tests during the year due to a decrease in the number of examinations for the Air Force personnel.

The number of autopsies performed has increased from 19 in 1944 to 37 in 1945. The number of diagnosis outfits prepared has almost doubled in the past year.

I wish to express my sincere appreciation for the continued generous co-operation from the Central Laboratory and Barrie Street Laboratory, Kingston. I am particularly indebted to Dr. Wm. Robinson, Prof. James Miller and Dr. McClure for stimulating advice on many problems.

BRANCH LABORATORY—FORT WILLIAM

A. E. ALLIN, B.A., M.D., D.P.H., *Director*

I have the honour to submit herewith the annual report of the Fort William Regional Laboratory for the year 1945.

Routine examinations numbered 43,540, a decrease of 1,495 or 3.3 percent from 1944. 6,767 bottles of Biologicals, 1,913 vials of Insulin and 33,378 Outfits were distributed.

During the year, Miss Ellen Hirst resigned and was replaced by Miss Y. Hutchinson, who subsequently left the division to be replaced by Miss F. Hutchinson. Miss B. Martin joined the C.W.A.C. and was replaced by Miss E. Sylvester. Mrs. C. Barnes resigned at the end of December.

The Director was happy to return to his duties after a prolonged absence due to ill health. Major S. F. Penny, Acting Director, was transferred, becoming Director of the Ottawa Laboratory. We were pleased to note that a former member of this staff, Blake Hardy, who enlisted in June, 1939, and rose to the rank of Lieutenant Commander, was made a Member of the Order of the British Empire in the recent King's Honour List.

The routine Bacteriology was not unusual. Two strains of *Pasteurella* were isolated from cat-bite wounds. Enteric infections were seldom encountered, and positive reports for *Brucella abortus* were rare.

An increase in Diphtheria was noticed; 811 swabs were submitted, no less than 86 of which were positive for *C. diphtheriae*. An increased number of strains of *Streptococcus viridans* were isolated from blood cultures submitted from cases of sub-acute bacterial endocarditis.

Examinations for Syphilis and Gonorrhoea again constituted a large proportion of our work. Ninety-one dark field examinations were performed; 35 of these were positive. 8,797 bloods received a screen Presumptive Kahn; in

1,401 instances this test was followed up with a Standard Kahn and a Kolmer Wassermann.

From 1,023 patients, the majority of whom were females, both smears and cultures were examined for *N. gonorrhoeae*. The results are shown in the accompanying table.

COMPARATIVE STUDY OF SMEAR AND CULTURAL METHODS FOR THE ISOLATION OF *N. GONORRHOEAE*

1,023 CASES

873	33	41	28	10	38

This is the twenty-fifth annual report of this laboratory and it seems an opportune time to quote from the first annual report for 1920, prepared by the late Director, Dr. N. O. Thomas:

"I think that the closer a laboratory is to the spot the better it is for the community—it gives the director a good opportunity to see the clinical aspects and therefore he is more particular about his work and takes more interest in the same and develops more care and confidence; secondly, the physician must be constantly reminded of the weakness of a laboratory report so that he does not rest content with a negative or positive report as the case may be and personal contact with the physician and the man at the head of the laboratory is necessary to achieve this purpose."

I wish to express my thanks to Dr. McClure, to Dr. MacNabb and to the other members of the Central Laboratory for their continued help as well as the personnel of this laboratory for their loyal co-operation during the past and difficult year.

BRANCH LABORATORY—BARRIE ST., KINGSTON

J. H. ORR, M.D., *Director*

I have the honor to submit herewith a report on examinations performed in the Barrie Street Laboratory, Kingston, during the year 1945.

The total examinations for the year numbered 70,397. This shows a further increase over the work of last year. Since 1941, the number of examinations performed in this Laboratory has doubled, the number of examinations in that year having been 34,116. I should like to take this opportunity to commend the staff of the laboratory on the way in which they have co-operated during the past year.

During the year 1945, we took over the distribution of outfits and since the seventh of June we have distributed 34,867 outfits of various sorts.

Mr. R. S. Bull, in charge of Chemistry in the Laboratory, has prepared the various serological antigens, Kahns, Hinton and Kolmer, and during the year we have sent to the Central Laboratory a total of 19,875 cc of Antigen, 11,150 cc of Standard Antigen, 3,150 cc of Presumptive, 2,675 cc of Hinton Antigen and 800 cc of Kolmer Antigen.

At intervals throughout the year, from the mouse colony maintained in this Laboratory, we have sent to the Central Laboratory a total of approximately 3,500 Marsh Albino mice.

During the year, Miss Baycroft, who has been with the Department of Health for a number of years, and during the past four years an extremely valued member of the staff of this Laboratory, resigned. We have been very fortunate in obtaining as Bacteriologist the services of Mr. A. B. Lamb, B.Sc., recently in charge of the North Bay Branch.

RICHARDSON LABORATORY—QUEEN'S UNIVERSITY,
KINGSTON, ONTARIO

J. MILLER, M.D., F.R.C.P. (E), *Director*

Herewith, I beg to submit the statistics of work done in the Richardson Laboratory for the year ending December 31st, 1945.

There has been a rise in the total reports issued from 13,999 to 15,452. The number of examinations for the Army and Navy has fallen somewhat as it is to be expected.

Owing to the handing over the distribution of the diagnostic outfits to the Barrie St. Laboratory in June, the work done in this department is much less than formerly.

May I, as in former years, express my great appreciation of the loyal work of all members of my staff. May I also bear witness to the co-operation and kindness which I have received from Dr. A. L. MacNabb and Dr. W. B. McClure.

THE UNIVERSITY OF WESTERN ONTARIO
LONDON, ONTARIO

A. J. SLACK, M.D., *Director*

I have the honour to submit herewith the annual report of the laboratory examinations made during the year 1945 by the Branch Laboratory of the Department located in the Institute of Public Health, London.

The total number of laboratory examinations made for the Department during the year was 148,502 which is an increase of 16,091 examinations, or 12.1 per cent, over the previous year. Of these laboratory examinations, 39,497 were made for the Army, Navy and Air Forces, 1,437 for War Industries and 6,350 for the Red Cross. The increase in these combined War Service items over the previous year is 8,500 examinations or 21.9 per cent.

During the year 93,456 outfits for the collection of specimens were reclaimed and prepared for redistribution and 93,395 outfits were distributed. Biologicals distributed from this centre, exclusive of insulin, numbered 22,765 packages as compared with 23,460 packages distributed during 1944. Free insulin distributed amounted to 3,619 packages or 1,588,600 units of Ordinary insulin and 3,437 packages or 1,671,200 units of Protamine Zinc insulin. This represents an increase of 141,200 units over the amount of free insulin distributed during 1944.

The most significant increase in laboratory examinations is shown in the number of whole blood specimens submitted for serological tests. There has also been a consistent increase over a period of years in the number of tissue specimens submitted for pathological diagnosis. The usual variation in the number of specimens for other types of routine examination is again noted. Such increases or decreases occur from year to year and are without special significance.

I wish to express my appreciation to the staff of the Institute and to Dr. McClure and the staff of the Central Laboratory for their hearty co-operation throughout the year.

BRANCH LABORATORY—NORTH BAY

A. D. McCLURE, B.A., *Director*

I have the honour to submit herewith the tabulated report of the number of examinations conducted in the North Bay Laboratory of the Ontario Department of Health during the year 1945.

The credit for the direction of this laboratory during the year must be given to Mr. A. B. Lamb and Dr. E. C. Beck. Mr. Lamb directed the laboratory's activities until the end of September at which time he was transferred to the Laboratory in Kingston. Dr. Beck of the Ottawa Laboratory temporarily replaced Mr. Lamb until my return from the Royal Canadian Air Force in the middle of December.

This country has been engaged in a war for all or part of the last six years. It is interesting to note the course of the curve given by the number of laboratory examinations during this period. They are as follows:

1938.....	35,000
1939.....	44,213
1940.....	46,987
1941.....	61,487
1942.....	50,498
1943.....	43,943
1944.....	47,697
1945.....	36,786

During the early war years there was an increase in the examinations performed but this has decreased and in 1945 was slightly above the 1938 level. We can but hope that it may again in the future, now that peace has been re-established, be used to a greater extent by the physicians for the benefit of the general health of the people of Ontario.

May I express my gratitude to the Director and staff of the Central Laboratory for the co-operation which this laboratory has always received.

BRANCH LABORATORY—OTTAWA

E. L. BARTON, M.D., *Director*

I submit herewith a report of the work performed in this laboratory for the year 1945.

During the year 140,512 examinations were performed. This is an increase of 17,983 examinations over the previous year. This increase has been in part due to the increase in the number of specimens received in the serological section.

Two new members have joined the staff and one has left the service to be married. Mr. Norman Martin has rejoined the staff after five years' service with the Royal Canadian Air Force.

Owing to the resignation of Dr. A. L. MacNabb, Director of Laboratories, Dr. Barton was transferred to the Central Laboratory. During the time Dr. Barton was director, there was a marked improvement in the services rendered to the physicians with a corresponding increase in the volume of work done.

I wish to thank Dr. A. L. MacNabb, Dr. W. B. McClure of the Central Laboratory and Dr. T. A. Lomer, Medical Officer of Health for the City of Ottawa, for their co-operation during the year.

BRANCH LABORATORY—PETERBOROUGH

C. B. WAITE, M.D., *Director*

I wish to submit my report for the Branch Laboratory, for the year 1945.

During the past year, there were no epidemics in this district, although there were a few sporadic cases of diphtheria. The end of the war terminates a period of increasing work. We are also commencing, at the latter part of the year, to do some work for the Department of Veterans' Affairs. This will, perhaps, increase during the next year. Although the war has terminated and some of the work undertaken to assist in the war has now ceased, we appear to be busier than ever. I might also note the appearance of a few cases of Salmonella infection in the district.

I wish to express my gratitude for assistance received from the Central Laboratory during the year.

ST. CATHARINES GENERAL HOSPITAL—
PATHOLOGICAL LABORATORYLORNE WHITAKER, M.D., *Director*

I have the honour to submit a report of the work done in the St. Catharines Laboratory for the year 1945.

In February, Miss Joyce Rourke joined the Laboratory Staff. She has served very acceptably, her major work being in serology. We regret that she is to leave shortly to take up work in her home city in Nova Scotia. As yet no definite arrangements have been made for her replacement.

We should like to express our appreciation to the Central Laboratory for releasing Miss Frances Sabiston, of Kingston, to supply during the absence of Miss Parry during February and March. Also we are grateful for the help and interest of the housemen, Drs. Lorne Merritt and William Ghent who helped very materially during their time in the hospital.

Two new acquisitions to the laboratory equipment have made for more efficient service. The automatic electric drying oven is proving of great value and convenience in the work of sterilization. The autotechnicon acquired in October has relieved the nurses on Ward D and is working in a satisfactory manner.

The Blood and Plasma Bank has been used more extensively this year. 301 donors were bled as compared with 167 in 1944. Whole blood was used 141 times for 96 patients as compared with 33 in the previous year. The amount of plasma used decreased, being employed 66 times for 42 patients as compared with 93.

From March an arrangement was made with the Welland County General Hospital to supply them with blood and plasma where this was possible. Since that time 12 whole blood transfusions were given and 49 pints of plasma. In November plans were made for going to Welland every second week to bleed donors in the hospital. In this way 36 donors have been used to date.

Preparation of outfits and distribution of biologicals has increased during the past year. This year, 7,482 outfits were made up as compared with 5,590 in 1944. The distribution of outfits remained about the same, viz., 8,970 for 1944 and 8,909 for 1945. The insulin distribution has remained at about the same level, 29 patients receiving 558 bottles during the year.

The gross total of specimens shows an increase over 1944 of almost 1,000. This increase is shown in the number of autopsies and bacteriology under the free routine, while the serological examinations are down by approximately 1,500. This decrease is largely accounted for by the diminution in the number of specimens submitted by the Armed Services.

Under the column Chargeable, there is an increase in all numbers being most marked in the haematological examinations of 1,500. This represents an increase in the work ordered on patients in the hospital.

A study of the data shows that of the examinations provided free, there are the following: Bacteriology 2,792, Gonorrhoeal smears 1,343, Syphilis (Kahn) 5,906 and Blood sugars 564, or a total of 10,605 examinations.

BRANCH LABORATORY—SAULT STE. MARIE

N. F. W. GRAHAM, M.D., *Director*

During the past year, a general increase in the number of specimens examined is to be noticed. While the services to the Armed Forces has been greatly reduced with the discontinuance of war, both in Sault Ste. Marie, Michigan, and Sault Ste. Marie, Ontario, an increase is shown. The previous year over 12,000 specimens were examined for Sault Ste. Marie, Michigan, War Memorial Hospital, as a special effort. The reason for this assistance was an arrangement made by our late Deputy Minister, Dr. McGhie, and Dr. Young of Lansing, Michigan, of the U.S. Public Health Service, whereby this Laboratory, in the absence of a Director of Laboratories in Sault Ste. Marie, Michigan, took over that work. It may be recalled this whole border area was an International War Area under control of the U.S. Army. This arrangement is no longer in effect so that the Laboratory here is now dependent on this city and district alone as before. This Laboratory feels justly proud of the assistance it was able to give our American ally though at a considerable strain on the staff.

An enlargement of our present building was not consummated last year.

Last October 1st, the Sault Ste. Marie Blood Bank came into being as it was thought while the people were blood donation minded, sufficient blood could be made available for civilian use through the Blood Bank. Assistance was given by the Rotary Club in setting up the Bank. Our laboratory assisted in this project.

BRANCH LABORATORY—TIMMINS

G. MACPHERSON, B.A., M.A., *Acting Director*

I have the honour to submit, herewith, the Annual Report of the Branch Laboratory, Timmins, for the year 1945.

The work has approximately doubled during 1945. The haematological and electrocardiographic sections show the greatest increases with 2,597 and 310 tests respectively. The total examinations for the year were 5,635.

I wish to thank Dr. W. B. McClure and the staff of the Central Laboratory for their co-operation during the year.

ANNUAL REPORT OF THE LIBRARY, 1945

FREDRITA HENLEY WRIGHT, *Librarian*

The year 1945 proved to be a busy one with library service gradually increasing. Requests for information on post-war health rehabilitation and atomic energy were greatly in demand.

ACCESSIONS

During 1945 the following accessions were made:

CENTRAL LIBRARY

Books purchased	143
Journals (subscriptions)	116
Complimentary subscriptions	20
Pamphlets	1,520
	<hr/>
	1,799

ONTARIO HOSPITALS

Books purchased—	
Medical	103
Fiction:	
New
Library discards	970
Journal subscriptions (med. and tech.)	228
Year Books	9
Periodicals—	
New (subscriptions)
Newspapers (subscriptions)	97
	<hr/>
	1,407

LOAN SERVICE

During the year 1945, there were 4,883 loans made by the Central Library. Of these loans, 3,875 were immediate departmental requests and 1,008 were outside requests. The loan service of the Central Library is extended to Physicians, Nurses, Occupational Therapists and Dietitians connected with the administration of fourteen Ontario Mental Hospitals; the Directors and staffs of Mental Hygiene Clinics and the Directors and staffs of the Branch Laboratories.

CIRCULATION OF JOURNALS

Journals are circulated to physicians, nurses, and members of the staffs of the immediate department. In addition, journals are circulated to the Clinicians in charge of the Provincial Travelling Chest Clinics at Belleville, Ottawa, Fort William and Timmins, and to the Tuberculosis Unit at the Ontario Hospital, Woodstock.

Again in 1945, journals containing articles dealing with Shock Therapy in the treatment of schizophrenia were circulated to the Ontario Hospitals doing special work on this disease.

The Branch Laboratories at North Bay, Ottawa, Kingston, Belleville and Mimico received a regular circulation of technical journals.

The Library during the year 1945 has had pleasure in extending its services to the Department.

DIVISION OF MATERNAL AND CHILD HYGIENE

ELIZABETH L. KITELEY, M.B.

Recognizing the direct relationship between the life and health of mothers and the health and security of children, this Division is appreciative of the fact that maternal deaths and disabilities attendant on childbearing continue to occur in too large numbers. This assumes a particular significance in the light of the forecast for the near future of the continued aging of the population and should be viewed with more than casual concern by both public and profession alike. Past experience shows that in time of war increases in maternal and infant death rates might be anticipated but it is gratifying to report that apart from a small fractional increase in these rates in one year only (1944), there has been a general decline. While not unmindful of the many factors that undoubtedly play a part, the Division feels that a measure of pride is justifiable in these more favourable conditions. Table A and Graph A illustrate the change in trend over the last twenty-four years.

TABLE A

Year	Number of Living Births	Number of Maternal Deaths	Maternal Death Rate (Rate per 1,000 living births)
1920.....	72,511	489	6.52
1925.....	70,122	388	5.5
1930.....	71,263	440	6.2
1935.....	63,069	313	4.9
1940.....	68,524	254	3.7
1943.....	81,173	189	2.3
*1944.....	78,394	199	2.5

*Preliminary figures.

It is not practicable to measure statistically all disabilities that arise from childbearing but a fairly good index of the hazards of pregnancy is to be found in a study of the causes of death among these women. Infection again has assumed first place in the list with 52 cases (or 26% of all the maternal deaths) dying from this cause. This does not include the group (17%) who are reported as to have died from abortion complicated by infection. While infection is conceded to be largely preventable by good care before and at the time of delivery, the question of the various curtailments as the results of war has probably some bearing on its incidence. However, it may be anticipated that with the early and full investigation of each case and the consequent early institution of proper treatment, there will be further reduction in these cases. Puerperal toxæmias have been definitely lessened, accounting for approximately 16% of the maternal deaths. This is the cause which is most affected by prenatal care and the downward trend's continuance will be dependent on the adequacy of such service. The unmet need that looms largest at the present appears to be the necessity for the patient herself to be convinced of the benefits of early, regular and constant medical supervision during the entire period of pregnancy. There has been a slight but significant decrease in the deaths from puerperal hemorrhage. 11% of the women died from this cause. While prevention in all of these fields must, to a large extent, wait upon knowledge of the specific factors which are operable,

GRAPH A

it is generally recognized that the borderline between health and disease is less distinctly marked during gestation than at other times and derangements so slight as to be of but little consequence under ordinary circumstances may readily be the precursors of pathological conditions which may seriously threaten the life of the mother or child or both.

An indication of progress in conservation of infant life is expressed by mortality rates. While the aforementioned slight increase is regrettable, there is no significant change in the general trend. Table B and Graph B demonstrate dramatically the picture over the last twenty odd years.

TABLE B

Year	Number of Living Births	Infants Dying Under 1 Year of Age	Infant Death Rate (Rate per 1,000 living births)
1920.....	72,511	7,802	107.5
1925.....	70,122	5,530	78.9
1930.....	71,263	5,260	73.7
1935.....	63,069	3,515	55.7
1940.....	68,524	2,959	43.2
1943.....	81,173	3,390	41.8
*1944.....	78,394	3,357	42.8

*Preliminary figures.

GRAPH B

Deaths under one month continue to account for 64% of the total infant deaths with prematurity ranking as the highest single cause. Late in the year, the Division added to its staff a nurse inspector, Miss Edna Hewson, whose activities will be confined to inspection of obstetrical and new-born nursery services of hospitals and it is hoped that improved conditions in these wards will bear fruit in lessening the number of infant deaths under one month of age, particularly in that apparently most vulnerable group, those born prematurely.

In conjunction with and with the co-operation of the Division of Repatriation, Department of National Defence, arrangements have been made whereby Medical Officers of Health in all municipalities are supplied with lists of names and addresses of war brides coming to the Province. In all cases of expectant mothers and those with young children, a message of welcome from The Honourable, the Minister of Health and a copy of the Department-sponsored publication "The Baby" is sent direct to each of these new citizens. Up to date, some 1,200 of such letters and books have gone forward.

In order to augment the bridging of the gap in health supervision between the period of infancy and the school age, many municipalities are carrying on so-called pre-school programmes. At the request of the local health authorities, the Division gave assistance in such projects to six municipalities in the last year. It is indeed encouraging to note in the examination of these children the effect of prenatal and infant care reflected by a generally improved health status.

As a basic factor in any well-rounded school health programme, the health of the teacher is of primary concern. For the eleventh consecutive year, the Department co-operated with the Department of Education in arranging for the medical examination of all applicants to the ten teacher-training schools of the Province. The physicians' findings in these examinations would indicate that this is an exceedingly valuable service not only as a fact finding measure for existing defects, the majority of which are readily correctable, but also as an effective supplement to the educational programme carried on in the schools both curricular and extra-curricular in which these applicants will ultimately find themselves.

MEDICAL STATISTICS BRANCH

L. S. PENROSE, M.A., M.D., *Acting Director*

Extended leave of absence for service with His Majesty's Forces was granted to Dr. A. H. Sellers, who left on November 12th, 1940. For the present year the essential work of the Branch was again carried on under the part-time supervision of Dr. L. S. Penrose. The activities of the Branch fall into three main classes—Statistical Analysis relating to Mental Hospitals, Cancer Control and Special Problems.

1. MENTAL HOSPITAL STATISTICS

(a) *Monthly Surveys and Reports:*

Monthly statements relating to the Movement of Patient Population, etc., are submitted to the Branch by each Ontario Hospital. From these statements are compiled monthly reports which indicate the trend of the patient population, i.e., whether the patient population has increased or decreased as compared with the same period during the previous year, together with a periodic analysis of admissions, discharges, etc., and surveys concerning bed occupancy and estimates of future requirements.

(b) *Annual Report:*

Each Ontario Hospital also submits an annual report comprising some 30 statistical tables, which give full details of the hospital population during the year. A synthesis of these reports together with other information dealing with dental, laboratory, nursing and x-ray services forms the annual report for mental hospitals.

(c) *Mental Health Clinics:*

In previous years the coding and tabulating of the individual Mental Health clinics records was carried on by the Branch. Since 1942, each clinic has submitted a statistical report in much the same manner as do the Ontario Hospitals. The resulting figures are summarized and analyzed in the Branch and published in the Annual Report of the Hospitals Division.

2. CANCER STATISTICS

The collection and tabulation of statistical information concerning Cancer Control continues to be one of the foremost responsibilities. The follow-up cards for all patients examined at the clinics of the seven Ontario Cancer Centres during the year are forwarded to the Branch for analysis. All deaths occurring among patients treated for cancer in the clinics are checked against the official death certificates by the Branch. An effort is made in this way and other ways to assist the clinic physicians in following up their patients.

3. SPECIAL PROBLEMS

(a) *Public Health Statistics:*

Following the procedure of previous years, the Branch has prepared a bulletin concerning the chief causes of death in Ontario for the year 1944. This bulletin is sent to the Medical Officers of Health in the larger communities

throughout the Province. The data are appended to the present report. (See below.)

(b) *Shock Therapy:*

A survey of the results of Electro-shock Therapy in mental hospitals, similar to those carried out in previous years, was again undertaken and will be completed some time during 1946. Approximately 1,500 patients who received electro-shock Therapy are included in the survey.

(c) *Miscellaneous:*

A large proportion of the work done by the Branch takes the form of giving assistance to Divisions of the Department in respect to the various requests for statistical information. The preparation of charts, diagrams, and maps for special purposes, constitute another type of useful statistical service.

THE CHIEF CAUSES* OF DEATH IN ONTARIO DURING 1944

The following tables are based on the official records of the Dominion Bureau of Statistics and summarize the chief causes of death in Ontario during the year 1944. The list of causes of death follows the Fifth Revision of the International List by the Commission in Paris in 1938, again this year as in 1941, so that the figures in the last four reports are strictly comparable.

The crude death rate of 10.03 per 1,000 population in 1944 was slightly lower than the same rates for the past five years. This recession of the death rate will probably be temporarily due to the fact that the population of the Province is slowly but steadily becoming older.

Table I shows the 20 specific causes, and all other causes, the number of deaths, the specific death rate per 100,000 population and the percentage of all deaths due to that cause. These 20 commonest specific causes of death were responsible for 35,697 deaths or 89.7 per cent of all those recorded during the year. The first four causes of death show some slight changes in rank with the exception of diarrhoea, enteritis and dysentery which increased from the eighteenth position in 1943 to twelfth position in 1944. The actual number of deaths from this cause were 439 in 1944 and 281 in 1943.

Diseases of the heart accounted for 12,403 deaths or 31.2 per cent of all deaths during the year. The specific death rate for this cause was 312.8 per 100,000 population.

Cancer (all forms) continued to contribute substantially to the death rate as the second most common cause; it was responsible for 5,236 deaths or 13.2 per cent of all deaths in 1944 as compared with a slightly smaller figure of 5,193 deaths or 12.6 per cent in 1943.

Intracranial lesions of vascular origin was responsible for 4,053 deaths or 10.2 per cent of all deaths in 1944. The corresponding figures for this cause in 1943 were 4,113 deaths or 10.0 per cent.

Accidental Causes, which ranked fourth, continued to be a major cause of death with 2,530 deaths or 6.3 per cent of all deaths during 1944 as compared with 2,550 deaths or 6.2 per cent in 1943.

The remaining causes of death show but slight fluctuations in 1944 from the figures of 1943 with the exception of deaths from diarrhoea, enteritis and dysentery which advanced from eighteenth place in 1943 to twelfth place in 1944 as was mentioned above.

*"Chief causes" has the force of "most frequent causes" without any other implication.

TABLE I
CHIEF CAUSES OF DEATH—ALL AGES
ONTARIO, 1944

Rank	CAUSE OF DEATH	Int'l. List Numbers	Number of Deaths	Specific* Death Rate	Per Cent of Total Deaths
1	Diseases of the heart.....	90-95	12,403	312.8	31.2
2	Cancer (all forms).....	45-55	5,236	132.1	13.2
3	Intracranial lesions of vascular origin.....	83	4,053	102.2	10.2
4	Accidental causes.....	169-195	2,530	63.8	6.3
5	Nephritis.....	130-132	1,962	49.5	4.9
6	Pneumonia and bronchitis....	106-109	1,822	46.0	4.6
7	Prematurity.....	159	1,079	27.2	2.7

9	Diabetes mellitus.....	61	944	23.8	2.4
10	Diseases of the arteries.....	96-99	915	23.1	2.3
11	Congenital malformations....	157	611	15.4	1.5
12	Diarrhoea, enteritis and dysentery.....	27, 119, 120	439	11.1	1.1
13	Influenza.....	33	434	10.9	1.1
14	Senility.....	162	393	9.9	1.0
15	Injury at birth.....	160	324	8.2	0.8
16	Suicides.....	163-164	318	8.0	0.8
17	Diseases of the prostate.....	137	314	7.9	0.8
18	Hernia and intestinal obstruction.....	122	313	7.9	0.8
19	Ulcers of stomach and duodenum.....	117	295	7.4	0.7
20	Syphilis.....	30	244	6.2	0.6
TOTAL.....			35,697	9.00**	89.7
ALL OTHER CAUSES.....			4,084	1.03**	10.3
GRAND TOTAL.....			39,781	10.03**	100.0

*Rates per 100,000 population (3,965,000) estimated.

**Rates per 1,000 population.

Figure I shows diagrammatically the percentage of total deaths due to each of the twenty specific causes and all other causes.

Table II shows the eight chief causes of death during infancy (i.e., during the first year of life) for 1944; the number of deaths is shown first and then the percentage of all deaths due to a given cause. In 1944, as in 1943, prematurity, congenital malformations and pneumonia and bronchitis were the three leading causes of death. Prematurity showed a slight increase in the percentage of deaths in the age group, from 31.0 per cent in 1943 to 32.2 per cent in 1944. Conversely, congenital malformations, and pneumonia and bronchitis showed a decrease. Diarrhoea, enteritis and dysentery increased from 5.7 per cent in 1943 to 9.7 per cent in 1944 or from 237 per 100,000 live births in 1943. Influenza which contributed 105 deaths or 3.1 per cent of all deaths in this age group in 1943, does not appear in the eight chief causes in 1944.

The specific death rate per 100,000 infants born is also shown in Table II. It will be seen that a rise to 4,268 deaths from 4,177 deaths per 100,000 live births occurred in 1943 to 1944. Deaths due to prematurity more than cover this increase, the rate being 1,376 deaths per 100,000 in 1944 compared with 1,296 in 1943.

FIGURE I.

THE PERCENTAGE OF TOTAL DEATHS DUE TO EACH OF TEN SPECIFIC CAUSES AND ALL OTHER CAUSES

TABLE II
CHIEF CAUSES OF DEATH DURING INFANCY
ONTARIO, 1944

Rank	CAUSE OF DEATH	Deaths in Age Group	Per Cent of Deaths in Age Groups due to a Specific Cause	Specific Death Rate per 100,000 live births	
				1944	1943
1	Prematurity.....	1,079	32.2	1,376	1,296
2	Congenital malformations.....	526	15.7	671	717
3	Pneumonia and bronchitis.....	344	10.3	439	490
4	Diarrhoea, enteritis and dysentery.....	326	9.7	416	237
5	Injury at birth.....	324	9.7	413	442
6	Other diseases peculiar to infancy*.....	231	7.0	295	297
7	Accidental causes.....	82	2.5	105	117
8	Congenital debility.....	81	2.4	103	83
	Other causes.....	353	10.5	450	498
	TOTAL.....	3,346	100.0	4,268	4,177

*The first year of life.

Table III shows the eight chief causes of death after infancy for 1944. The number of deaths is shown and also the percentage of all deaths in the group due to a given cause.

TABLE III
CHIEF CAUSES OF DEATH AFTER INFANCY
ONTARIO, 1944

Rank	CAUSE OF DEATH	Deaths in Age Groups	Per Cent of Deaths in Age Groups due to a Specific Cause
Ages—1-4 years:			
1	Accidental causes.....	173	28.0
2	Pneumonia and bronchitis.....	81	13.1

TABLE III (Continued)
CHIEF CAUSES OF DEATH AFTER INFANCY
ONTARIO, 1944

Rank	CAUSE OF DEATH	Deaths in Age Groups	Per cent of Deaths in Age Groups due to a Specific Cause
Ages—50-59 years:			
1	Diseases of the heart.....	1,605	33.7
2	Cancer (all forms).....	970	20.4
3	Intracranial lesions of vascular origin.....	437	9.2
4	Nephritis.....	234	4.9
5	Accidental causes.....	191	4.0
6	Tuberculosis (all forms).....	158	3.3
7	Pneumonia and bronchitis.....	157	3.3
8	Diabetes mellitus.....	142	3.0
	Other causes.....	864	18.2
	TOTAL.....	4,758	100.0
Ages—60-69 years:			
1	Diseases of the heart.....	2,931	38.6
2	Cancer (all forms).....	1,371	18.1
3	Intracranial lesions of vascular origin.....	874	11.5
4	Nephritis.....	404	5.3
5	Diabetes mellitus.....	277	3.6
6	Pneumonia and bronchitis.....	249	3.3
7	Accidental causes.....	240	3.2
8	Tuberculosis (all forms).....	134	1.8
	Other causes.....	1,106	14.6
	TOTAL.....	7,586	100.0
Ages—70 and over:			
1	Diseases of the heart.....	6,927	39.4
2	Intracranial lesions of vascular origin.....	2,538	14.4
3	Cancer (all forms).....	2,138	12.2
4	Nephritis.....	1,065	6.1
5	Pneumonia and bronchitis.....	792	4.5
6	Accidental causes.....	780	4.4
7	Diseases of the arteries.....	770	4.4
8	Diabetes mellitus.....	418	2.4
	Other causes.....	2,152	12.2
	TOTAL.....	17,580	100.0

At *pre-school ages, 1-4 years*, accidental causes together with pneumonia and bronchitis are the leading causes of death. These two causes contributed 254 deaths or 41.1 per cent of all deaths for the group. Congenital malformations remained in third place, with no significant change in either the number of deaths or the percentage. Diarrhoea, enteritis and dysentery deaths increased from 21 deaths in 1943 to 37 deaths in 1944. Leukaemia, measles and appendicitis rank eighth, each contributing 15 deaths.

In the *school age period, 5-14 years*, accidental causes continue as the leading cause of death. The percentage for accidents has risen for this year, the figure being 39.4 per cent, compared with 33.7 per cent in 1943. For pneumonia and bronchitis the percentage is down to 4.7 per cent from 7.6 in 1943 and 8.1 in 1942. Diseases of the heart also show a decrease from 3.6 per cent in 1943 to 2.8 per cent in 1944.

At ages 15-19 years, accidental causes and tuberculosis (all forms) are the two leading causes of death. Together they account for 48.8 per cent of all deaths in the group. Diseases of the heart contributed 6.1 per cent of the deaths in 1944, compared with 4.2 per cent in 1943. The percentage of deaths from pneumonia and bronchitis dropped from 4.5 per cent in 1943 to 2.8 per cent in 1944.

Ages 20-49 years shows again, as in 1943, diseases of the heart as the leading cause of death, followed by cancer (all forms), accidental causes and tuberculosis in that order. Together these four causes contributed 57.9 per cent of all deaths in this age group. The percentage of deaths from nephritis increased from 3.8 per cent in 1943 to 4.5 per cent in 1944.

At ages 50-59 years and 60 to 69 years diseases of the heart, cancer (all forms) and intracranial lesions of vascular origin are the three commonest causes of death in 1944 as in 1943. These causes accounted for 63.3 per cent of the deaths in the former group and 68.2 per cent in the latter. Accidental causes of death showed a decrease from 4.6 in 1943 to 4.0 per cent in 1944 in the age group 50-59 years. For the group 60-69 years, the percentage shows an increase, from 2.9 per cent to 3.2 per cent.

TABLE IV
PROPORTION OF DEATHS OCCURRING BY A GIVEN AGE

Ages 70 or more years show diseases of the heart and intracranial lesions of vascular origin as the leading causes of death. These two accounted for 53.8 per cent of all deaths in the group. Cancer remained in third position, contributing 12.2 per cent of the deaths. Pneumonia and bronchitis remained in the fifth rank with a decrease from 5.4 per cent in 1943 to 4.5 per cent in 1944. Senility, which was the eighth cause of death in this group in 1943, was replaced by diabetes mellitus in 1944.

Table IV shows for each of the twenty principal causes of death (as in Table I), what proportion had occurred by a given age. For instance, 0.3 per cent of all cancer deaths occurred in children under 5 years of age, 1.1 per cent among persons under 20 years of age, etc.

Table V gives a summary of the age distribution of the twenty principal causes of death in the province during the year 1944.

THE TENTH ANNUAL STATISTICAL REPORT ON CANCER
CALENDAR YEAR—1945

Prepared by the Medical Statistics Branch

This Report presents trends in cancer mortality for the year 1944, and tabulations of the work performed by the seven Ontario Cancer Centres during the year 1945. This is the first printed Departmental report on cancer since 1941. It is the intention to considerably extend it in future.

CANCER MORTALITY

The volume of deaths attributed to cancer during the past twenty years are set out in Table A. The percentage of total deaths attributed to cancer has increased by fifty per cent since 1925, from 8.7 per cent to 13.2 per cent. The crude death rate has shown a steady increase from 95 to 132 deaths per 100,000 population.

TABLE A

RECORDED CANCER MORTALITY
ONTARIO, 1925-1944

Year	Total Deaths All Causes	Cancer Deaths	Per Cent of Total Deaths	Crude Death Rate*
1925.....	33,960	2,951	8.7	95

1941.....	39,226	4,931	12.6	130
1942.....	39,119	5,005	12.8	131
1943.....	41,063	5,193	12.6	133
1944.....	39,781	5,236	13.2	132

*Rate per 100,000 population, all ages (estimated).

Site of Disease—The distribution of cancer deaths in Ontario, by site and sex, for the five years 1940-1944 is presented in Table B.

Cancer of the digestive tract, other than stomach and duodenum, was the most common for both men and women. Nearly one-third (31.9%) of the 25,212 deaths (both sexes) during this period were classifiable as cancer of this site. The next most frequent site among men is the stomach and duodenum,

TABLE B
CANCER DEATHS BY SEX AND SITE
ONTARIO, 1940-1944

SITE	MALES		FEMALES		BOTH SEXES	
	Deaths	Per Cent of Total	Deaths	Per Cent of Total	Deaths	Per Cent of Total
Stomach and duodenum...	2,680	22.1	1,619	12.4	4,299	17.1
Other digestive tract.....	3,970	32.8	4,062	31.0	8,032	31.9

Respiratory organs.....	1,116	9.2	396	3.0	1,512	6.0
Skin.....	281	2.3	145	1.1	426	1.7
Other and unspecified sites.	1,036	8.6	902	6.9	1,938	7.7
ALL SITES.....	12,117	100.0	13,095	100.0	25,212	100.0

nearly one quarter of all male cancer deaths falling in this group. Among women, the next most frequent sites are the breast and genital organs, each contributing approximately one fifth of all female cancer deaths. Deaths from cancer of the buccal cavity and pharynx, urinary organs and respiratory organs are more common among males than among females.

Age—Deaths from cancer at certain ages is shown in Table C.

TABLE C
CANCER AS A CAUSE OF DEATH BY AGE
ONTARIO, 1944

AGE GROUP	Cancer Deaths	Per Cent of All Deaths	Rank as a Cause of Death	Specific* Death Rate	Per Cent of All Deaths from Cancer
0 to 19	58	1.2	5	1.1
20 to 49	698	14.4	Second	40	13.3
50 to 59	970	20.4	Second	232	18.5
60 to 69	1,371	18.1	Second	479	26.2
70 and over	2,139	12.2	Third	1,079	40.9
ALL AGES	5,236	13.2†	Second	132.1	100.1

*Per 100,000 population (3,965,000.) †Total deaths in 1944 were 39,781.

During the year 1944, 13.2 per cent of all deaths in the province were attributed to cancer. At ages 20-49, 50-59 and 60-69, this disease held second place as a cause of death. Nearly 15 per cent of the deaths from cancer were under 50 years of age. At ages 50-59 years and 60-69 years, cancer deaths were exceeded only by diseases of the heart.

In Table D there is shown those deaths attributed to cancer of an "accessible" site at ages under 70 years.

Only 62 or 4.4 per cent of the male deaths are so classified. In the case of females, 687 or 40.7 per cent are in this category. Deaths from cancer of the breast constituted slightly over one-fifth (21.8%) of the female cases and uterus cases one-sixth (17.1%).

TABLE D

ONTARIO CANCER CENTRES—CALENDAR YEAR 1945

The following is a statistical report compiled by the Medical Statistics Branch of the Ontario Department of Health, from the individual record card of each patient admitted to one of the seven Ontario Cancer Centres in the province during the calendar year 1945.

In Table 1 there is shown the volume of new cases seen and treated by each clinic. During the year, a total of 6,310 *patients* were treated at the clinics. Patients with non-malignant tumours and non-neoplastic diseases comprised slightly over one-half of these cases. Of the total of 3,070 cases of malignant diseases seen during the year, 2,918 or 95 per cent received treatment. Private cases exceeded public cases in all clinics.

TABLE 1
NEW CASES ADMITTED—BY CENTRE
CALENDAR YEAR 1945

CENTRE	CANCER CASES						Non-Cancer Cases†	Total New Patients Treated
	On Record			Treated*				
	Private	Public	Total	Private	Public	Total

TOTAL.....	2,111	959	3,070	2,012	906	2,918	3,392	6,310

*Treated by any method or combination. Includes cases treated by surgery alone, but excludes palliative surgery.

†Non-malignant tumours and non-neoplastic diseases.

The number of new cases admitted during the year 1945, by site of disease, for each of the seven centres, is shown in Table 2. Comparison of these figures with those in the last published report (1941) shows an increase in all sites other than air passages and rectum. Cases of cancer of the breast show the most pronounced increase, from 396 cases in 1941 to 567 cases in 1945, a percentage increase of 43 per cent.

*Alone or in combination with surgery or other methods.
Cases treated by surgery alone and cases not treated are excluded.

The number of cases treated by radiotherapy (alone or in combination with other methods) in each clinic for the last five years is shown in Table 3. A steady increase is noted for each year, except for the number of public cases treated during 1943, at which time the number of cases was slightly less than the number in 1942.

Table 4 sets out the number of cases treated during 1945 by detailed site and status. Of the 2,711 new cases treated, 207 or 7.6 per cent were reported to have died *during the year*. The figures for the year 1941 were 1,961 cases and 334 deaths or 17.0 per cent.

	IV	38	1.4	7	1.0
	Total	2,772	100.0	729	100.0

*Recurrences excluded.

There has been a discouragingly small improvement in the proportion of new cases seen in the early stages. Details by site can be obtained directly from the table.

Evidence of greater delay (in terms of stage of disease when treatment was begun) in public patients as compared with private patients, still persists. (Table 7.) In cases of oral cancer, 68.3 per cent of the private patients presented them-

selves for treatment before local spread or metastasis had occurred, compared with only 25.4 per cent of the public cases. In cases of breast cancer the percentages were 41.8 per cent for private cases and 11.8 per cent for public cases. The same trend is evident in cases of cancer of the cervix uteri.

TABLE 7

STAGES OF DISEASE—PRIVATE AND PUBLIC CASES—CERTAIN SITES*
NEW CASES TREATED ONLY, 1945

STAGE	BREAST				CERVIX UTERI				ORAL CAVITY			
	Private		Public		Private		Public		Private		Public

*Recurrences excluded.

Table 8 gives the *classification* of patients admitted during the year. Nearly one-third of the recurrences were cancer of the breast while over one-half of the "previous" cases (those cases in which other methods first preceded radiotherapy) were breast cases.

TABLE 8

CLASSIFICATION OF NEW CASES ADMITTED DURING 1945

SITE OF CANCER	CLASSIFICATION				Total
	Primary	Previous	Recurrent	Not Treated	
Breast.....	136	339	57	35	567

TOTAL.....	2,103	624	191	152	3,070
PER CENT.....	68.5	20.3	6.2	5.0	100.0

Of the total 2,918 treated cases, there were 2,445 cases or 84 per cent for which a histological confirmation of the clinical diagnosis was available (Table 9). A pathological examination was done in 86 per cent of the breast cases, 96 per cent of the uterus cases, and 88 per cent of the oral cases.

*Includes breast, uterus, oral cavity, air passages and rectum.

Table 11 gives the recorded prognosis (i.e., whether regarded *at the outset* as treatable for cure or palliation only) of the new cases treated during the year. Of the total 3,070 cases seen at the centres, 1,938 or 63.1 per cent were considered "treatable for cure" and 848 cases or 27.6 per cent were "treatable for palliation".

A summary of the methods of treatment among new cases during the year is shown in Table 12. Of the 2,879 cases, 1,762 cases or 61 per cent received radiotherapy alone, 221 cases or 8 per cent were treated by surgery alone or else were not treated. The remainder received the combined treatment by radiotherapy and surgery. Comparison of this table with that for 1941, a *decrease* in the percentage of cases treated by radiotherapy alone is noted. In 1941 this percentage amounted to 69.6 per cent; in 1945 the figure was 61.2 per cent.

Table 16 gives the proportion of new cases treated by sex and age for each site of disease. Female cases are in excess of male cases at all ages under 70 years. The over-all ratio is 82 males to 100 females. In 1941 there was a predominance of male patients at ages over 60 years, while in 1945 the male predominance does not appear until the age group 70-79 years is reached. Pronounced sex differences will be seen in breast, oral and skin cases.

The distribution of new cancer cases by county or district (together with case rates) is given in Table 17. The Ontario case rate of 70.4 per 100,000 population for 1945, compares with a rate of 60.5 given for 1941. The county rates per 100,000 population range from 25 in Grey to 166 in Frontenac.

*Per 100,000 population. †Including breast, uterus, oral cavity and skin.

‡Including District of Patricia.

Of the 6,310 cases treated in the centres, 3,392 were classified as non-cancerous (Table 18). Of these, 1,941 were patients with benign tumours and 1,451 were patients with various non-neoplastic diseases. It is to be noted that the number of cases of "keratosis" which was 130 in 1940 and 227 in 1941 has risen to 441 in 1945. This is significant in view of the fact that this condition is commonly regarded as a pre-cancerous lesion.

DIVISION OF NURSES' REGISTRATION

ALEXANDRA M. MUNN, Reg. N., *Director*

I have the honour to submit the following report for 1945:

Council of Nurse Education:

The Council held four meetings during the year. The Annual Meeting was held on March 23rd, 1945. Miss Priscilla Campbell of Chatham retired as Chairman and Miss Constance Brewster of Hamilton was appointed in her place.

JOINT COMMITTEE—This Committee is composed of the Council of Nurse Education and representatives of the Registered Nurses' Association of Ontario. The Committee met three times to discuss special items of business such as a suggested outline for the training of assistant nurses in hospitals.

COMPOSITE COMMITTEE—This Committee was formed at the request of the Hon. the Minister of Health to study a plan for centralizing a course for student nurses and met once to hear the report prepared for the Minister. This was favourably received by the Minister in February, 1945. No immediate action was planned.

Legislation:

In June, 1945, an Order-in-Council was passed which provided for a special admission requirement to approved schools of nursing for demobilized members of the Armed Forces. The special admission is four Middle School subjects instead of the six subjects required for all other candidates.

Bill No. 66, an amendment to The Nurses' Registration Act, was introduced in the House for first and second reading. Owing to the dissolution of the House and the subsequent request of the Registered Nurses' Association for withdrawal the Bill was not passed. The amendment introduced the registration of the assistant nurse.

Regulations were drafted to implement Section 4 (f) of The Nurses' Registration Act, which deals with the regulating of post-graduate studies for registered nurses. It was decided to table the draft regulations for the time being.

Revision of the Minimum Curriculum:

The Council of Nurse Education referred the revision of the Minimum Curriculum to the Nursing Education Committee of the Registered Nurses' Association of Ontario for an opinion about the general policy to be followed. The actual revision is now proceeding satisfactorily.

Change in Personnel:

On February 4th, 1945, Miss Edith R. Dick returned to the Nurses' Registration Branch from Overseas service with the R.C.A.M.C., at the request of the Hon. the Minister of Health.

Registration Examinations for Nurses:

Examinations were held in May and November for 1,356 candidates. A second examiner is now appointed for each subject. This has reduced the time

required for marking, thereby lessening the inconvenience to hospitals which release teaching staff for the Examining Board.

Applicants Registered from other Provinces and the United States:

During the year 1945 applicants were registered from Provinces of the Dominion and the United States as follows:

Alberta.....	14	California.....	1
British Columbia.....	14	Connecticut.....	2
Manitoba.....	17	Illinois.....	7
New Brunswick.....	8	Maine.....	1
Nova Scotia.....	12	Maryland.....	1
Prince Edward Island..	1	Massachusetts.....	4
Quebec.....	25	Michigan.....	5
Saskatchewan.....	27	Nebraska.....	1
	—	New Jersey.....	2

REPORT OF THE INSPECTOR OF TRAINING SCHOOLS FOR NURSES

An attempt was made by the newly appointed Inspector of Training Schools to inspect all approved schools of nursing in the Province, in order to appraise the educational standard of the school and to obtain information regarding the quality of nursing provided by students in the care of the sick.

Fifty-three approved schools of nursing were inspected and sixteen short visits were made to hospitals covering affiliation for student nurses and the closure of weak schools of nursing.

It is considered that the nursing staff in hospitals is below a safety margin to ensure good nursing care for the public. The number of student nurses in the Province compares favourably with the enrolment of other years. The depleted nursing staff is due to the increased number of building programmes and the growing rate of hospitalization. The cause for decreased nursing staff is the unattractive working conditions for graduate nurses. They are seeking employment outside the hospital. Hospitals are concerned. They are making a definite effort to improve matters. Many hospitals are sponsoring scholarships for post-

graduate education in order to provide a qualified teaching and supervisory staff which will ultimately affect the quality of nursing care. Many hospitals are employing nurse aides and non-registered nurses to help meet the needs of the sick. These aides have been given some instruction prior to coming on the hospital wards but the amount and kind of training varies.

The nursing schools in the Province are providing the greater part of the nursing care for the sick. At the same time the nursing schools are presenting the students with a heavy course of studies in order to prepare them to accept the responsibilities placed upon them.

It is found that residence accommodation for student nurses is generally poor and crowded. Most of the classrooms and dining rooms are located in basements. Hours of duty for student nurses have improved slightly. There is no financial statement prepared to show the cost of nursing education in comparison with the value of nursing service rendered.

Very few Superintendents of Nurses have representation on the Hospital Board of Governors and few have an effective Advisory Committee to assist in the nursing school administration. The optimism with which the Superintendent of Nurses administers the nursing school and accepts responsibility for providing adequate nursing service in the hospital is admirable and challenging. A number of hospitals have recognized the need to appoint a Principal of the nursing school as well as a Director of Nurses.

DIVISION OF PUBLIC HEALTH NURSING

EDNA L. MOORE, REG.N., *Director*

A quarter of a century is a significant period of time upon which to review growth and development. For twenty-five years public health nursing has been a recognized field of the Department's activities. In 1920 sixteen staff nurses, eight being provided by the Red Cross for one year, were given an intensive three-months' course of preparation and two were assigned to each of the eight health districts to assist the District Medical Officers of Health in the promotion of organized community health work. The project consisted of demonstrations of generalized public health nursing service for varying periods in local communities throughout the Province.

When this pioneer effort was begun the City of Toronto was the only centre in the Province having a generalized public health nursing programme. There were, however, specialized school nursing services in a number of urban and in a few rural areas before that time. The fact that fifty-six generalized public health nursing services, including eight that are part of Health Units, are functioning at the close of the year 1945 is evidence of both growth and development. There are also eight county school, forty-eight local school, twenty child hygiene, and seven tuberculosis nursing services carried on by public health nurses in Ontario.

During the year just ended, seven Health Units were established between January 1st and October 2nd. These organizations needed for their programmes sixty-eight Public Health Nurses including seven supervisors. In addition a number of existing services expanded their programmes, thus requiring additional staff. Because of the limited number of experienced Public Health Nurses available a member of the Division Supervisory Staff was loaned to one Health Unit for five months and two staff nurses for four months. A staff nurse was loaned to another Health Unit for a period of two months.

The Director's assistant was loaned to the Hospital for Sick Children Campaign for eight weeks to act as Executive Secretary of the Women's Advisory Committee.

In September Major (P/M) Marjorie A. Rutherford re-joined the staff following an absence of five years' service with the Royal Canadian Army Medical Corps in England, Italy, Belgium and Holland. After a short stay at central office she was loaned to the Elgin-St. Thomas Health Unit to fill the post of supervisor.

In December the Macmillan Company of Canada Limited made available an eagerly awaited book "PUBLIC HEALTH NURSING IN CANADA" by Florence H. M. Emory, Reg.N., Associate Professor of Nursing and Associate Director, School of Nursing, University of Toronto. The book contains several chapters contributed by health workers in different parts of the Dominion including two nurse members of the Department's staff: the Consultant in Industrial Nursing and the Director of this Division.

The Educational Supervisor's work was predominantly with and in behalf of the graduate students enrolled under the Department's Assistance Plans. Included were interviews, group conferences, lectures, and thirty-three out-of-town visits. The next activity, in point of time, was assistance to local supervisors in the development of staff education programmes. Several requests for assistance in planning introductory teaching of Public Health Nursing in hospital schools

of nursing and for help in the arranging of affiliation for under-graduate students were received in correspondence from hospitals and municipal public health agencies. Several visits were made as the result of these requests.

Questions received relative to secondary school health services increased considerably over the previous year. Further help was given where programmes had been already established. Five agencies undertaking new services were assisted with their organization and plans for procedure.

There has also been active cooperation between the Division of Public Health Nursing and the members of the Department of Education in jointly planning several projects.

An increasing number of registered nurses wishing to investigate further the field of Public Health Nursing has been interviewed and given individual counselling.

Assistance in the preparation of staff nurses was continued. Of the fifty-two nurses who had begun this preparation in September, 1944, under Plan I, fifty-one completed the Certificate Course in June at the Universities of Toronto and Western Ontario. They accepted positions in Health Units, County School Health Services and local centres from Fort William, Timmins and Kirkland Lake to Windsor, Lincoln County and Kingston. In September thirty-two Registered Nurses began the Certificate Course at the Universities of Toronto and Western Ontario under Plan I, also four experienced Public Health Nurses entered upon the course in Administration and Supervision in Public Health Nursing at the University of Toronto, Plan II. One of this number is on leave of absence from her organization through an arrangement to return to a senior post at the end of the course. The other members of the group have accepted the commitment to serve in supervisory posts wherever they are needed in Ontario. A considerable amount of the Educational Supervisor's time was expended in connection with these Plans. She interviewed all applicants and assisted the Director in selecting those accepted to receive assistance for the courses.

A further effort was made to meet the critical need for staff by offering a one-month intensive introductory period for registered nurses to enable them to serve in health organizations as junior staff. Seven nurses were accepted for this training which was carried on during the month of October. Each applicant entered into a contract to pursue a certificate course in Public Health Nursing beginning in 1946 or 1947. Three members of this group were Nursing Sisters. At the end of the period the nurses were placed in local health services and with Health Units where their work could be given close supervision.

In addition to the periods of service for which they were loaned to Health Units and local organizations the members of the general supervisory staff visited one hundred and six centres, representing six hundred and sixty-nine days. These visits included the introduction of sixty-three nurses to new situations. Surveys of Public Health Nursing needs and services were carried out in three centres. Each centre was studied with a view to assisting the local health authorities in establishing nursing programmes planned to meet the needs of the particular community. They also gave twenty-four days to the Normal School examination programme.

During the year, forty-four field trips were made by the Director and talks given to a number of nursing groups, Home and School Associations and Women's Institutes. Numerous conferences associated with the organization of Health Units and County School Health Services, as well as many committee meetings in connection with health and nursing questions were attended.

A total of fifty-four days were spent by the supervisors and staff nurses in connection with the examination of applicants for entrance to Normal Schools and the Ontario College of Education.

In June Miss H. Elizabeth Smith retired. Her outstanding service to the Temiskaming District was recognized by a letter from the Medical Society, a gift and address from the Registered Nurses' Association, District IX, and many letters of regret from people throughout the area. Miss Smith, who was a member of the group referred to at the beginning of this report, has made a notable contribution to nursing in the larger professional sense and to her chosen field of Public Health Nursing in particular.

A member of the nursing staff was transferred to Main Office in November.

Staff nurses assisted at chest clinics of the Division of Tuberculosis Prevention, with immunization in unorganized territory and at the Civil Service Health Centre.

The organization of the Canadian Paraplegic Association has created new facilities for both returned personnel and civilians. In one of the Division Bulletins this organization was described and suggestions made to local Public Health Nurses should they find cases who might be benefitted by these advantages.

The Public Health Nurses of the Ontario Society for Crippled Children have acted as special consultants in orthopaedic nursing in the areas covered by their services. This valuable contribution to public health nursing is gratefully acknowledged.

A one-day conference was held with the Senior Public Health Nurses of the County School Health Services following the O.E.A. Convention.

Two Bulletins covering a wide range of topics were prepared and sent to the Public Health Nurses of the Province during the year. A Christmas greeting and news letter was mailed also.

The volume of correspondence was greater than in 1944 when an increase over previous years was recorded. Enquiries from many parts of Canada, the United States, Great Britain, Brazil and Calcutta were received. In order to cope with these and many other demands, and under somewhat trying physical arrangements in the office, the secretarial staff worked hard but cheerfully. Their understanding cooperation is commended.

Among the interesting, and interested, visitors were: J. Murray Gibbon, Esq., Montreal, who is writing the History of Nursing in Canada; Mrs. Sophia Pincheira, Quinta Normal, Santiago; Miss Elizabeth Martin, Departmental Nursing Service, St. John's, Newfoundland; Miss Alma C. Haupt, Director, Nursing Bureau, Metropolitan Life Insurance Company, New York City; Miss Lillian G. MacKenzie, Director of Nursing, Winnipeg Health Department; Dr. H. S. Lawrence, Medical Officer in Charge of Rural Health Demonstration Scheme, Jamaica; Miss Hazel Herringshaw, Executive Secretary, Committee on Prepayment Plans for Health Services, American Nurses Association, New York, N.Y.; Miss Irma Biehuson, Assistant Professor, Health Education and Director of Health and Welfare, Yale University School of Nursing, New Haven, Connecticut; Miss Margaretta Craig, School of Nursing Administration, Delhi, India; Miss Elizabeth Smith, Director of Nursing Services, Department of Public Health, Saskatchewan; Miss Esther M. Hirst, Rockefeller Foundation, Peru; Miss Margaret S. Hart, Manitoba Department of Health; Miss Ruby I. Tinkiss, Nursing Specialist, Division of Maternal and Child Hygiene, Department of National Health and Welfare, Ottawa; and Miss Mildred I. Walker, Chief, Division of Study for Graduate Nurses, Faculty of Public Health, University of Western Ontario, London.

DIVISION OF SANITARY ENGINEERING

A. E. BERRY, M.A.Sc., C.E., Ph.D., *Director*

In submitting the Annual Report of the Division of Sanitary Engineering for the year 1945, it seems appropriate to point out that the end of the year marked a clear line of distinction between two periods. One is of reduced activity in the sanitary field resulting from the depression and the war, and the other a period of greatly renewed programmes in which it is hoped that a great deal can be accomplished in the provision of sanitary works for the benefit of the municipalities in Ontario.

At the conclusion of the war, and for some time before this had taken place, there was an increasing interest in construction of waterworks and sewerage projects. While actual construction could not be carried on, there was a good deal of planning and preparation for the time when it would be feasible to get the building under way. General activities of the Division during the year were continued in much the same manner as previously, and included supervision of public water supplies, and sewage treatment plants, the examination of plans and specifications for new work, or extensions, supervision over milk processing plants, with the issue of the necessary certificates of approval, inspection and licensing of summer camps, with supervision over recreational facilities as far as it was possible to supply this, and assistance to officers in the correction of nuisances and conditions which give rise to complaints.

The members of the staff of the Division which were in the Armed Services were all returned to duty prior to the end of the year. These were: Ft./Sgt. H. G. Taylor, R.C.A.F.; Capt. L. A. Kay of the R.C.E., and Lieut. J. K. Curtis of the R.C.E. This increase in staff facilitates the work of the Division, but the number was still considerably short of that required.

Water Programmes:

While it has not been possible to carry on much water works construction during the year, there is an increase over that reported previously. One hundred and fifty-one certificates of approval were issued, with an estimated value of the work \$3,229,829.55. This is in comparison with the figure of \$1,921,679.97 of the previous year. The year 1944 had shown a considerable increase in work in this field, and 1945 continues this tendency. It is apparent that there is a very substantial programme of water works required for the post-war period, and many municipalities are getting ready not only to put in new systems, but to make extensions and improvements to existing ones. The supply of material and labour for this work was still very limited at the end of the year.

Two new water works systems came into operation during the year, these at Rodney and Dutton. Both obtain their supply from the Village of West Lorne, making a very attractive combination of three centres being supplied by one filtration plant. During the same period plans were prepared for new systems in several municipalities. The water filtration plant at Wallaceburg was started late in the year.

It has been most gratifying to note during the end of the year, the great interest in obtaining water works for the municipalities of small populations. It is apparent that these communities have recognized the fact that water works is essential, and that every effort will be made to secure these utilities. There are major programmes planned, not only for the small centres, but for the large

ones as well. Just how long it will take to get these under way will depend to a large extent on the availability of material and labour.

In view of the changing situation in the water works field, the following statistics are submitted and having to do with the waterworks systems in operation at the end of 1945.

Total number of waterworks systems.....	317
Number of supplies treated by filtration and chlorination .	64
Number of supplies treated by chlorination only.....	82
Number of supplies treated by softening and iron removal	2
Number of supplies treated by softening, iron removal and chlorination.....	1
Number of supplies with no treatment.....	122
	<hr/>
Total.....	271

Municipalities supplied by other centres:

(a) with filtered and chlorinated water.....	35
(b) with chlorinated water only.....	10
(c) with water not treated.....	1
	<hr/>
TOTAL.....	46
GRAND TOTAL.....	317

It can be anticipated that the next few years will bring considerable changes in the water supplies of this Province. This will include additions to filtration plants, water softening, general improvements in quality and extensions of mains and other facilities to serve outlying areas. It is also anticipated that there will be a very considerable increase in the number of waterworks systems in operation in the next few years.

It has not been possible to give as much attention to the supervision of water treatment plants as would be desired, but this has been due to the inadequacy of staff for that purpose. Regular inspections have been made as far as it was feasible, and assistance given to the operators of the plants and to local Boards of Health. Special attention has been directed to chlorination plants, and to conditions which would give rise to complaints of taste.

FLUORINATION AT BRANTFORD

During the year the application of fluorine to the Brantford water supply was initiated, thus marking the third place on the continent where sodium fluoride is being added to a public water supply as a measure to prevent dental caries. At Brantford the fluorine is applied in solution, as the water enters the filters, and subsequent to coagulation. The dosage is adjusted to bring the fluorine in the effluent as close as possible to 1 p.p.m. The Brantford water has less than 2 p.p.m. present naturally, and the difference between this figure and 1 p.p.m. is made up with sodium fluoride applied with dry feed equipment and then made into solution before it reaches the main water supply.

During the year visits were paid to Grand Rapids, Michigan, and to Newburg, New York, to study the procedures in vogue there where they had previously initiated the application of fluorine. No particular difficulty has been found at Brantford or at the other places in using this substance. It is recognized that it will be some time before the results can be interpreted.

Examinations have continued on other municipal supplies in an effort to determine to what extent fluorine is present. It has been found that the Stratford supply has an amount in excess of 1 p.p.m. St. Marys water has slightly less, but also in excess of 1 p.p.m. That locality seems to be favoured with water which contains an appreciable amount of fluorine, and studies are being directed to compare the condition of the teeth of these people with those elsewhere.

PUBLIC SEWERAGE SYSTEMS

In the sewerage field there has been a very noticeable interest in the construction of new systems and extensions of existing ones. It was not possible to do much construction in this field, but plans are under way and in many instances the voters have expressed their desire to proceed with the work.

The number of certificates of approval issued for the year 1945 is 168, and the estimated expenditure involved is \$4,346,003.30, as compared with \$1,187,828.70 for the previous year. The 1944 figures showed a considerable increase over 1943, and this year's figures indicate a sharp trend in that direction. Similar factors have been at work in the sewerage field as those in waterworks. The war did not end early enough in the year to enable much construction of sewers or treatment plants, and progress was also hampered by the inadequacy of supplies and lack of labour. At the end of the year, while there was a very considerable interest in these systems, there was little indication of an early improvement in the labour market, or of material. Under these circumstances it is not easy to predict how rapidly sewerage programmes may be advanced.

The following statistics now apply to the municipal sewerage systems of the province:

Total number of sewerage systems in operation	159
Total number of sewage treatment plants (these supplying eighty-two municipalities)	87
The treatment plants are made up as follows:	
Activated sludge	31
Inhoff tanks and sprinkling filter	5
Sedimentation tanks and sprinkling filters	2
Intermittent sand filters	3
Sedimentation tanks	43
Screening plants	1
Screening and incineration	1
TOTAL	87

Five municipalities were having their sewage treated in other plants.

Municipalities with no sewage treatment plants numbered 72.

The treatment of sewage, or lack of treatment in the province is shown for the various centres as follows:

1. Secondary or complete treatment:

(a) *Cities*—8

Guelph, Kitchener (part), London (3 plants), Peterborough, St. Thomas, Stratford, Toronto (north) and Woodstock.

(b) *Towns*—23

Alliston, Aurora, Bowmanville, Brampton, Burlington, Cochrane, Dundas, Falconbridge, Grimsby, Hespeler, Leaside, Mimico, New Toronto, Orangeville, Palmerston, Port Colborne (2 plants), Preston, Riverside, Simcoe, Timmins, Waterloo, Weston, Whitby.

- (c) *Villages*—4
Crystal Beach, Long Branch, Forest Hill, Swansea.
- (d) *Townships*—6
East York (2 plants), North York, Scarborough, York, Etobicoke, Westminster.
2. Partial treatment:
- (a) *Cities*—8
Fort William (part), Galt, Hamilton, Kitchener (part), North Bay, Oshawa, Sudbury, Toronto (main plant).
- (b) *Towns*—27
Almonte, Barrie, Blind River, Carleton Place, Capreol, Collingwood, Coniston, Copper Cliff, Elmira, Fort Erie, Haileybury, Hanover, Iroquois Falls, Kingsville, Kirkland Lake, Napanee, New Liskeard, Oakville, Orillia, Rainy River, Schumacher, South Porcupine, Tillsonburg, Trenton, Tweed, Warton, Wingham.
- (c) *Villages*—10
Ajax, Ansonville, Cardinal, Chippawa, Fergus, Kearns, Nipigon, Plantagenet (part), Port Elgin, Virginiatown.
- (d) *Townships*—3
Crowland, Stamford, Tisdale.
3. Sewered Municipalities with no sewage disposal plants:
- (a) *Cities*—15
Belleville, Brantford, Chatham, Cornwall, Fort William (part), Kingston, Niagara Falls, Ottawa, Owen Sound, Port Arthur, St. Catharines, Sarnia, Sault Ste. Marie, Welland, Windsor.
- (b) *Towns*—45
Alexandria, Amherstburg, Arnprior, Bracebridge, Brockville, Campbellford, Chesley, Cobalt, Cobourg, Dryden, Dunnville, Eastview, Englehart, Espanola, Fort Frances, Gananoque, Goderich, Hawkesbury, Huntsville, Iroquois, Kapuskasing, Kenora, Kincardine, Lindsay, Matheson, Meaford, Merritton, Midland, Mount Forest, Newmarket, Niagara-on-the-Lake, Parry Sound, Pembroke, Penetanguishene, Perth, Petrolia, Port Hope, Prescott, Renfrew, Smith's Falls, Sturgeon Falls, Thornbury, Thorold, Walkerton, Wallaceburg.
- (c) *Villages*—5
Iroquois, Morrisburg, Plantagenet (part), Port Dalhousie, Port Dover.
- (d) *Townships*—9
Anderson, Barton, Cornwall, Grantham, Nelson, Nepean (Ottawa West, Westboro), Gloucester (Overbrook), Sandwich East, Sandwich West.

Fifty-three per cent of the municipalities which are now sewered have sewage treatment works, and 70% of the total population of these sewered centres is supplied with treatment. This means that 30% of the population of sewered centres is discharging raw sewage. It is anticipated that considerable progress will be made in the near future to improve this situation, and to eliminate as far as is feasible the discharge of raw sewage.

Construction has been continued on the sewage treatment plant of the City of Toronto. The progress is slow because of lack of labour and materials, and it is not certain at this time when the initial unit can be put into operation. During

the year favourable votes of the ratepayers were recorded at Georgetown, Milton and Listowel for new sewerage systems. At Belleville a vote for a sewage treatment plant was in the negative.

The operation of sewage treatment plants in existence has been supervised by the staff of this Division as far as it has been possible. It is recognized that a number of these plants which have been in operation for several years have now become considerably overloaded, and it will be necessary to increase their capacities, and to provide better effluents than has been feasible during recent years. With an increase in staff, it should be possible to assist the operators to a greater extent, and to aid them in turning out a better quality of effluent.

MILK CONTROL PROGRAMME

The number of milk pasteurization plants under the supervision of the Department has not changed a great deal during the year. At the end of 1945 the number was 697.

Difficulty in securing trained help in the operation of pasteurization plants has continued, but with some indication of improvement toward the end of the year. It is obvious that more trained men can be used in this activity than the dairies have been able to secure in the past. The problem of giving instruction to these continues to be a pressing one.

The number of inspections made by officials of the Division on milk pasteurization plants was 861, a figure slightly below that for the previous year. In this activity, 1,118 samples of milk were collected, 36 farm inspections were made under special conditions, and four raw milk dairies were inspected, 12 plans for pasteurizing plants were examined. It was apparent that the visits that were possible to these pasteurizing plants were entirely too few, but the inadequacy of staff prevented anything further in the field.

There was less difficulty associated with the handling of milk in 1945 than was apparent the previous year. As help becomes available both in the dairies and on the farms, this situation should continue to improve.

Pasteurization was carried on during the year to the extent of over 98% of all milk sold for fluid consumption. No illness was traceable to any supply where pasteurization was in operation. This legislation has now been in operation since 1938, and most of the larger centres in the province which can be supplied with pasteurized milk have been listed under the Act. The restrictions on gasoline and tires have made it impossible to extend these areas in recent years, and there was at the end of the year some smaller centres which could be included under this legislation. It is hoped that before a great while it will be possible to bring the advantages of pasteurized milk to the maximum number of persons in the province.

REFUSE COLLECTION AND DISPOSAL

No particular change was made in this field during the year. There has been an increasing interest in the use of incineration, and also an added concern in disposal of refuse by sanitary fill. The availability of mechanical earth moving equipment had aided greatly in this. It is somewhat difficult for our winter conditions, but where a suitable site is available it would seem that sanitary fill, with cover applied, can be quite an economical and sanitary method of handling refuse.

FOOD CONTROL

During the year there was a change in the programme for food control in the Department. Dr. G. A. Edge, a veterinarian with post-graduate training in public health, was engaged, and devoted his time to making surveys and studies of existing problems. Much valuable information has been secured in this way, and an effort has been made to work out programmes which will be beneficial to the municipalities, and which will bring about improvements in the safety and sanitation of food supplies.

The activity of this branch is being directed to determining what the existing situation is in the various centres, and towards formulating standards or regulations which may be adopted provincial-wide for the control of such places as restaurants, slaughter houses, bakeries, and all places where food is handled. Consideration has also been given to milk production, and while only a limited number of inspections of the farms have been made, an effort has been put forward to working out a standard code which may be adopted for the entire province.

During the year an effort has been made to formulate regulations for frosted food locker plants. This was completed, but had not been passed as a Regulation, although authority for doing this was contained in an amendment to *The Public Health Act* of 1945. It was proposed to license all such plants, with inspection by the Department.

RECREATIONAL SANITATION

A new procedure was instituted in the supervision of the recreational areas in Muskoka and Lake of Bays. The removal of the restriction on automobile travel increased traffic considerably in these areas, and they were very thickly populated during the summer season.

A Sanitary Engineer was stationed at Gravenhurst during the summer season, and was available for service to all the areas in that territory. In this way it was possible to take care of complaints promptly, and to supervise more closely than ever before the water supplies, sewage disposal and food supplies of the resort areas. This procedure, in use for the first time, proved effective and enabled the Division to take care of problems in a manner that could not be done under the old system.

The inspection and licensing of summer camps continued in much the same manner as before. Two hundred and fifty-eight licenses were issued to summer camps, and there were 252 inspections of these. It was not possible with the limited number of staff to visit all camps as promptly as possible, but it is apparent that there has been a decided improvement in the sanitary conditions in these licensed camps. There is indication of an increasing interest in the opening of camps, and it is highly essential that every effort be made to ensure that these will function in a manner which will not endanger the health of the occupants.

Farm Service Force Camps were continued during the year, and 180 inspections of these were made by officials of this Division. This is somewhat less than for the previous year, and as these camps became more accustomed to the procedure required a definite improvement has been apparent.

Other recreational facilities including tourist camps, refreshment booths, and accommodation in private homes have been as in previous years under the supervision of the local Boards of Health. No effort has been made by the Division to make inspections of these, and it has been somewhat difficult for the local Boards of Health to give adequate supervision to these places. The method of supervision by the local Boards does not tend to uniformity, and there are a

number of disadvantages with this procedure. This continues to be a problem, and as the tourist activities for Ontario return with the lifting of the travel restrictions it will intensify, not only in Muskoka and in the Lake of Bays areas, but in a great many places throughout Ontario. Summer hotels are now available in many areas and during the year 145 inspections of these were made by the Division.

NUISANCES AND COMPLAINTS

The staff of the Division has been required as in the past to deal with many complaints involving nuisances or annoyances to people in the province. These investigations again numbered approximately 200. Many of them are made at the request of the local Boards of Health, and in other instances the complaints come directly to the Department. They involve a variety of situations, including: odors, drainage, and inadequate sanitation giving rise to objections on the part of those living nearby.

REDUCTION IN TYPHOID FEVER

The Typhoid statistics of the province continued to be most favourable. The figures for 1945 show 58 cases and four deaths, giving a death rate of .1 for the entire province. This figure is now exceedingly low and reflects on the controls exercised over such foci of infection as water supply, milk, etc.

CEMETERIES

The Division has continued to exercise the supervision over cemeteries as required under the regulations. It is not the practice to make inspections of these in the field, but in some instances it is necessary for officials to visit areas to discuss with local officials some of their problems of administration. There has been a large number of plans submitted as well as rules and regulations. These have been reviewed, and approvals given when they complied with the Provincial Regulations. The suggested set of rules for the guidance of cemetery operators prepared previously by the Division has been found to be effective and helpful.

A review of the activities of the Division for the year 1945 indicates that progress has been made in spite of many difficulties. The end of the year shows a most encouraging outlook in which it is hoped that it will be possible to bring sanitary facilities to a greatly increased number of centres, and that it will be possible to eliminate much of the pollution which is now being discharged into the waters throughout the province. The prospects for food control are favourable and it is believed that a great deal of assistance can be given, not only to local Boards of Health and Health Units, but to the public as well. The Division is endeavouring to provide an increased number of publications which will serve to educate the public and to render assistance in the provision of better public health.

During the year the laboratory of the Division examined 1912 bacteriological water samples and 699 chemical samples. The analyses for sewage included 132 bacterial and 3,780 chemical, and for milk the bacteriological examinations were 972, with 20 for butter fat and 570 for phosphatase. Sanitary surveys were made in 15 centres, and the number of field inspections for the year included 552 for water, 352 for sewage, 609 for camps, 912 for milk and 106 general, making a total of 2,531.

Appended is a summary of the certificates issued during the year in respect to waterworks and sewerage systems.

New sewerage systems.....	1,052,471.00
Total.....	\$4,346,003.30

The total number of applications favourably reported upon re waterworks and sewerage for the year was 319 and involves an estimated expenditure of \$7,575,832.85

DIVISION OF TUBERCULOSIS PREVENTION

G. C. BRINK, M.B., *Director*

The Division has carried on with the same staff in 1945 as during the past two years. Two of the Travelling Clinic units have been without physicians and the Toronto unit only operated for five months. There has been no physician available for sanatorium consultation work.

Plans are under way for increased sanatorium accommodation, although the only addition actually in process of erection, in 1945, was at Niagara Peninsula Sanatorium, St. Catharines, where forty-seven beds are nearing completion. New 100 bed institutions are planned for Kingston and Sudbury, with substantial additions at Ottawa and Fort William.

The system of payment of sanatorium grants for the maintenance of in-patients has been revised on a basis of work done which allows a more equitable return to individual sanatoria. This is to go into effect on January 1st, 1946.

Reciprocal Agreements have been reached with the Provinces of Saskatchewan and Quebec for the payment of sanatorium maintenance of their respective patients who have not established residence in the province concerned; other agreements are pending with the Provinces of Manitoba and Alberta.

The improvement of tuberculosis control procedures in the Province of Ontario has been the subject of careful study by the Division of Tuberculosis Prevention. The following programme outlines a satisfactory method by which this may be accomplished.

1. The entire population of Ontario should receive a miniature X-Ray of their lungs by means of community mass surveys.
2. In communities where satisfactory X-Ray facilities are available permanent periodic chest clinics should be established.
3. Diagnostic clinics, previously in operation, should be assisted where necessary to improve or increase their activities.
4. All X-Rays taken in mass surveys, and chest clinics, should be free.

The success of this expanded programme precludes the government from assuming the entire financial responsibility. Experience has shown that if a comprehensive diagnostic service is offered, the public will assume a considerable portion of the cost and organization—community co-operation is in direct ratio to the facilities provided in any public health programme.

The Ontario Tuberculosis Association was formed early in 1945 as a voluntary organization to enlist public support in providing community X-Ray surveys and establishing or improving periodic local chest clinics where chest films would be free. Experience has demonstrated that the local financial obligation for a community tuberculosis control programme can best be met by funds raised locally through the sale of Christmas seals.

The Ontario Tuberculosis Association has organized thirty-five local voluntary tuberculosis committees in nineteen counties; five organizations already engaged in tuberculosis control have been either assisted or re-organized. The Association plans to increase the scope of its activities and expects to form an additional thirty or more committees during the present year.

The Christmas Seal Sale funds, collected by the new committees, will be used to pay a considerable portion of the respective community survey costs, and the returns indicate that there has been a great increase over previous years. These committees will continue to solicit funds yearly for the support of permanent local chest clinics.

Eleven community surveys have already been conducted and some fifty centres will be given a similar service during 1946; approximately 150,000 people receiving an X-Ray of the lungs. The programme of the Gage Institute, Toronto, to examine similarly the million residents of York County, is now under way.

While mass surveys open up a new field in the discovery of unrecognized cases of tuberculosis, the regular diagnostic chest clinic is the foundation on which adequate tuberculosis control must be built and maintained.

There were approximately 100,000 individuals given free X-Ray films of the lungs in the mass surveys; a detailed account being given later in the report.

PART I

A

REPORT OF THE WORK DONE BY THE DEPARTMENT'S TRAVELLING CHEST CLINICS

As in 1944 the clinics have been understaffed. For part of the year clinics were operated out of the Toronto Office but had to be discontinued in June; the Fort William and North Bay units operated without a physician; films being interpreted in the central office.

Toronto Unit—10 clinics in 10 centres.

A clinic was conducted in each of the following centres: Lindsay, Hanover, Shelburne, Orangeville, Listowel, Palmerston, Owen Sound, Oshawa, Wingham and Lucknow.

Ottawa Unit—44 clinics in 16 centres.

Ottawa, 12 clinics; Pembroke, 11 clinics conducted locally, the films being sent to Ottawa for interpretation; also one clinic visit to Pembroke; Hawkesbury three visits, Prescott two visits, Smiths Falls two visits, Renfrew two visits and one visit to each of the following: Perth, Almonte, Carleton Place, Arnprior, Bourget, Kemptville, Eganville, Plantagenet, Casselman and Rockland.

Belleville Unit—31 clinics in 14 centres.

Belleville, 12 clinics; Brockville, 4 visits; Peterborough, 3 visits; Port Hope, 2 visits; and one to each of the following: Picton, Napanee, Tweed, Gananoque, Havelock, Marmora, Bancroft, Madoc, Cobourg, Haliburton.

Timmings Unit—18 clinics in 7 centres.

Timmings, 12 clinics; and one visit to each of the following: Fraserdale, Iroquois Falls, Smooth Rock Falls, Englehart, Cochrane and Moose Factory.

Fort William Unit—22 clinics in 14 centres.

(a) Fort William (small clinics); Kenora, 3 visits; Sioux Lookout, 2 visits; Nipigon, 2 visits; Rainy River, 2 visits; Emo, 2 visits; Fort Frances, 2 visits;

Dryden, 2 visits; and one to each of the following: Nakina, Armstrog, Geraldton, Beardmore, Nolalu, Upsala.

(b) Survey of Indian schools at Kenora (2), Fort Frances, Fort William, Sioux Lookout and McIntosh.

North Bay Unit—32 clinics in 17 centres.

(a) North Bay, 12 clinics; Sault Ste. Marie, 3 visits; Sudbury, 2 visits; Chapleau, 2 visits; and one visit to each of the following: New Liskeard, Sturgeon Falls, Mattawa, Huntsville, Burks Falls, Killarney, Little Current, Manitowaning, Richard's Landing, Thessalon, Blind River, Massey and Espanola.

(b) Survey of Indian Schools at Chapleau and Sault Ste. Marie.

SUMMARY OF NEWLY DISCOVERED CASES—TOTAL 260

- 260 new cases of tuberculosis were found.
- 202 or 77.7% were found on first examination and 58 or 22.3% on repeat examination.
- 103 or 39.6% gave a history of contact with tuberculosis; 157 or 60.4% gave no history of contact.
- 136 or 52.3% were males; 124 or 47.7% were females.
- 159 or 61.1% were classed as active; 101 or 38.9% were classed as inactive.
- Of the 103 giving a history of contact, 82 or 79.6% were referred because of contact only and with no symptoms referable to the chest.
- 126 or 48.5% were recommended for sanatorium; of these 37 or 28.8% did not realize they were ill and were classified as follows:

Childhood (Primary Infection).....	9
Minimal.....	15
Moderately Advanced.....	10
Far Advanced.....	3

COMMENTS ON TABLE X

- 1,169 persons who had received treatment in sanatorium attended the clinics.
- 551 or 47.1% were males; 618 or 52.9% were females.
- In 100 or 8.5% the disease by X-Ray had cleared or become so well healed that it was not considered a factor at the time of examination.
- In the 1,074 with pulmonary tuberculous disease still evident, 52 or 4.8% were considered to be active and in need of further treatment; 1,022 or 95.2% were considered to have inactive disease.
- The above table illustrates the value of follow-up examinations of ex-patients of sanatoria.

PREVIOUS DIAGNOSIS

REMARKS ON TABLE XI

1. Of 4,998 persons examined by our Travelling Clinics in some previous year, and classified as having no disease, 41 or .8% developed some form of tuberculous disease.
2. Of 64 persons examined by our Travelling Clinics in some previous year, and classified as suspects, 10 or 15.6% developed some form of tuberculous disease.
3. Of 1,869 persons examined by our Travelling Clinics in some previous year, and classified as having inactive re-infection type of disease, 34 or 1.8% had become reactivated.
4. Of 132 persons examined by our Travelling Clinics in some previous year, and classified as having childhood (primary infection) type of disease, only 5 or 3.8% had developed reinfection type of pulmonary tuberculosis.
5. Of 1,030 persons examined by our Travelling Clinics in some previous year, and classified as having minimal disease, in only 16 or 1.5% had the disease extended.
6. Of 738 persons examined by our Travelling Clinics in some previous year, and classified as moderately advanced, inactive disease, 12 or 1.6% had become active.
7. Of 156 persons examined by our Travelling Clinics in some previous year, and classified as having far advanced, inactive disease, only 4 or 2.5% had become active.
8. The above findings stress the value of re-examination of persons classified as having inactive pulmonary tuberculosis.

TABLE XVII

THE AVERAGE COST OF DISCOVERING A NEW CASE OF TUBERCULOUS DISEASE ON REPEAT EXAMINATION

(Based on an average cost of \$3.15 per clinic examination)

Number of repeat examinations.....	7,580
Cost of this service.....	\$ 23,877.00
Number of new cases of tuberculosis discovered.....	58
Average cost per case.....	\$411.67
*Number cases recommended for sanatorium.....	100
Average cost per case.....	\$238.77

*Some of these were known cases who had become reactivated.

MISCELLANEOUS

1. 3,254 chest films were interpreted in the Central Office for various agencies,—public hospitals and private physicians.
2. 2,480 films were taken in the Central Office—1,133 on provincial civil servants; 441 on persons referred by private physicians; 348 on employees in industry; 207 on persons referred by staff physicians; 142 on employees of hospitals having no X-Ray facilities; 128 on teachers or teachers-in-training; 42 on students of the University of Toronto; 20 on persons receiving post-sanatorium care from the Department; 13 on persons in receipt of Mothers' Allowances because of tuberculosis, and 6 on federal civil servants.

B

REPORT OF MASS X-RAY SURVEYS CONDUCTED BY THE
DIVISION OF TUBERCULOSIS PREVENTION
ONTARIO DEPARTMENT OF HEALTH
1945

Mass surveys using 4" x 5" miniature films were conducted in 58 centres, 99,098 individuals receiving an x-ray of their lungs. In addition 7,102 miniature x-ray films were taken in Toronto and processed for the Gage Institute in order to assist that organization in initiating its programme of surveying all the residents of York County. These films were interpreted by the physicians of the Gage Institute who also examined those individuals requiring such investigation.

In conjunction with the recently formed Ontario Tuberculosis Association the organization of community surveys, begun in September, 1944, was actively carried on during 1945 in 11 centres, viz., Cochrane, Iroquois Falls, Kapuskasing, Smooth Rock Falls, Hearst, Pembroke, Eganville, Cobden, Picton, Simcoe, and Waterloo. All the residents of these areas were given an opportunity of receiving a free chest x-ray, the district financial obligation being paid out of funds raised locally through the sale of Christmas Seals. The response of the public was most satisfactory, in a number of surveys more than 90% of the population over pre-school age being examined.

The employees of 90 industrial concerns as well as the students of the five Ontario Universities, eight Normal Schools and Indians on four reservations were also surveyed. In 17 centres where industrial groups were being examined, arrangements were made for the residents to attend a general clinic. The number of whites constituted 98.4% and the Indians 1.6% of the total number examined.

In 1945, the incidence of tuberculosis (active and inactive) was .7%, the percentage of active cases being .12%. These figures are lower than those for the previous three years, and are due to several factors: (1) The majority of surveys were conducted in areas where the incidence and mortality rates of tuberculosis were lower than in certain localities where large surveys were held previously. (2) The students of both primary and secondary schools were examined in the eleven community surveys in addition to the secondary school pupils in a number of smaller local surveys. The incidence of disease in these groups was negligible.

The incidence of active pulmonary tuberculosis among the Indians who constituted 1.6% of the total number x-rayed was ten times greater than that for the whites examined and accounted for 14.7% of the total number of active cases reported.

CENTRES WHERE SURVEYS WERE CONDUCTED—1945

Algoma—	Sault Ste. Marie.
Bruce—	Kincardine, Port Elgin, Ripley, Southampton, Walkerton.
Carleton—	Ottawa.
Cochrane—	Cochrane, Hearst, Iroquois Falls, Kapuskasing, Smooth Rock Falls.
Essex—	Amherstburg, Leamington.
Grey—	Hanover.
Hastings—	Belleville, Trenton.
Kent—	Chatham, Tilbury.
Lanark—	Almonte, Carleton Place, Perth, Smiths Falls.
Manitoulin—	Manitowaning.
Middlesex—	London.
Norfolk—	Simcoe.
Peterboro—	Peterboro.
Prescott—	Hawkesbury.
Renfrew—	Arnprior, Cobden, Eganville, Haley, Pembroke, Renfrew.
Stormont—	Cornwall.
Waterloo—	Waterloo.
York—	Toronto.
Indians—	Cape Croker, Manitoulin Island, Parry Sound and Saugeen Indian Reserves.
Penitentiaries—	Portsmouth and Collins Bay.
Universities—	Toronto, Queen's, McMaster, Western, Ottawa University Seminary.
Normal Schools—	Ottawa (2), North Bay, Peterboro, Toronto, Hamilton, Stratford, London.

TABLE XVIII
 MASS X-RAY SURVEYS—1945

1. Total number X-rayed.....		99,098
2. No evidence of disease or abnormality.....	96,360 —	97.2%
3. Pulmonary tuberculosis (active and inactive) (including 1 pleurisy with effusion).....	684 —	.7%
4. Pulmonary tuberculosis suspects.....	47 —	.05%
5. Other abnormal chest conditions.....	2,007 —	2.0%

	Number	GROSS COST				NET COST			
		Total Cost	Cost per Examination	No. Active Cases	Cost per Active Case	Revenue	Total	Cost Per Examination	Cost Per Active Case
*MASS X-RAY SURVEYS	99,100	\$50,560 00	51	121	\$418 00	\$30,400 00	\$20,160 00	.20	\$166 00
PROVINCIAL TRAVELLING CHEST CLINICS	15,454	48,753 00	\$3 15	293	\$166 00		48,753 00	\$3 15	\$166 00

*The Department received from industry and local tuberculosis committees, 30 cents for each person given a miniature X-ray film of the lungs in mass surveys. Of the total number examined, 974 persons missed in the regular surveys were later given a 14" x 17" chest film in our follow-up clinics at the rate of \$1.00 per person. This extra revenue accounts for a net cost of 20 cents per person instead of 21 cents.

The Departmental net cost of discovering an active case in mass surveys and Provincial Travelling Chest Clinics was the same, viz., \$166.00 per case.

Fifty-nine per cent of the active cases of pulmonary tuberculosis found in mass surveys occurred in the minimal stage as compared to 28% found in Provincial Travelling Chest Clinics.

In addition to the active cases of pulmonary tuberculosis shown in the chart, one case of pleurisy with effusion was reported in mass surveys and 18 in the Provincial Travelling Chest Clinics. If these are included in the total number of cases the departmental net cost of finding an active case in mass surveys was \$165.00 and in the Provincial Travelling Chest Clinics \$157.00.

GRADUATE NURSES

1. NEWLY DISCOVERED TUBERCULOUS DISEASE:

- 5 Minimal, active..... (a) Two entered sanatorium
 (b) Three treated at home
 2 Moderately advanced, active..... Entered sanatorium
 All of the newly discovered cases of tuberculosis required treatment.

2. PREVIOUSLY KNOWN:

- 26 Moderately advanced, inactive..... Remained on duty
 12 Moderately advanced, inactive..... Remained on duty
 7 Far advanced, inactive..... Remained on duty
 None of the previously known cases of tuberculosis became reactivated.

NON-GRADUATE NURSES

1. NEWLY DISCOVERED TUBERCULOUS DISEASE:

- 6 Pleurisy with effusion..... (a) Three entered sanatorium
 (b) Three treated at home
 1 Minimal, inactive..... Remained on duty
 13 Minimal, active..... (a) Four entered sanatorium
 (b) Four treated in hospital
 (c) Five treated at home
 6 Moderately advanced, active..... Entered sanatorium
 All except one of the 26 newly discovered cases required treatment.

2. PREVIOUSLY KNOWN:

- 1 Primary infection, inactive..... Remained on duty
 18 Minimal, inactive..... Remained on duty
 16 Moderately advanced, inactive..... Remained on duty
 9 Far advanced, inactive..... Remained on duty
 None of the previously known cases of tuberculosis became reactivated.

NOTE: Most of the previously known cases of tuberculosis were among non-graduate nurses employed in sanatoria.

TABLE XXX-A

YEARLY AVERAGE	27.2	9.8	6.2	41.2

PART IV

HISTORY OF SANATORIUM TREATMENT WITHIN FIVE YEARS OF DEATH IN PERSONS DYING OF TUBERCULOSIS IN ONTARIO 1944

The record was obtained of persons dying of tuberculosis in Ontario in 1944 who had received sanatorium treatment within five years of death.

Table XXXI gives the summary of the findings for deaths of all forms of tuberculosis, as well as pulmonary only; a separate tabulation being made for Indians, whites, and whites and Indians combined.

It will be noted that 70.5% of all persons dying of tuberculosis (all forms) had been in sanatorium, while 79.8% of those dying of pulmonary tuberculosis had received sanatorium treatment. (If the white population only is counted the percentages are 72.6% and 81.8% respectively.)

Tables XXXII, XXXIII and XXXIV give the details re the deaths from pulmonary tuberculosis in counties, districts, cities and towns.

Table XXXV shows the analysis of those persons (excluding Treaty Indians) who died of pulmonary tuberculosis in 1944 who had not been in sanatorium within five years of death. It will be noted that 71.0% of these were over 50 years of age, and 48.0% were over 60 years of age.

TABLE XXXI

TABLE XXXV

PERSONS (Excluding Indians) DYING FROM PULMONARY TUBERCULOSIS IN
ONTARIO IN 1944—NOT TREATED IN SANATORIUM WITHIN
FIVE YEARS OF DEATH

1. Analysis According to Sex and Age

AGE GROUPS	Male	Female	Total	Percentage of Total
0 to 4	..	2	2	1.4
5 to 9	1	..	1	.7
10 to 14
15 to 19	..	4	4	2.8
20 to 24	1	3	4	2.8
25 to 29	..	4	4	2.8
30 to 39	9	7	16	11.0
40 to 49	7	3	10	6.9
50 to 59	23	10	33	22.7
60 to 69	28	11	39	26.8
70 and over	24	7	31	21.4
Not stated	..	1	1	.7
Total	93	52	145	100.0

It is noted that 71% of those dying of pulmonary tuberculosis without the benefit of sanatorium treatment were over 50 years of age and 48% over 60 years of age.

2. Analysis According to Classification of Pulmonary Tuberculosis as Primary or Secondary Cause of Death

AGE GROUPS	Pulmonary Tuberculosis Given as Primary Cause	Pulmonary Tuberculosis Given as Secondary Cause
0 to 4	1	1
5 to 9	..	1
10 to 14
15 to 19	4	..
20 to 24	3	1
25 to 29	3	1
30 to 39	11	5
40 to 49	10	..
50 to 59	26	7
60 to 69	34	5
70 and over	25	6
Not stated	..	1
Total	117	28

3. Analysis According to Reason for not Entering Sanatorium

(a) Refused Sanatorium treatment.....	18
(b) Diagnosed shortly before death or at autopsy.....	94
(c) Sanatorium treatment not considered necessary by physician or clinic....	29
(d) No answer to questionnaire.....	4

*145

*Ten of these had been in sanatorium previous to the five year period preceding death.

64.8% of persons dying of pulmonary tuberculosis who did not have the benefit of sanatorium treatment were discovered very shortly before death or at autopsy.

PART V

REPORT UPON POST-SANATORIUM CARE OF EX-PATIENTS
OF SANATORIA

The Department accepts responsibility of the care of those persons who, prior to admission to sanatoria, resided in unorganized territory or failed to establish residence in any municipality within the meaning of the Sanatoria for Consumptives Act. Post-sanatorium Care provides for treatment, including food, lodging, necessaries of life, and transportation. One hundred and two such persons were discharged from sanatoria in 1945. Sixty-six of this group were in a position to assume immediate responsibility for their own welfare or sufficiently recovered to return to employment immediately and nine required some initial assistance (clothing, transportation). The remaining twenty-seven required assistance with board and lodging; and 25 of these also required further help (clothing, transportation).

The Department continues to assist financially, when indicated, with the payment of pneumothorax refills and transportation to and from the pneumothorax treatment centres. During 1945, approximately 1,700 patients received in excess of 30,000 refills.

Assistance was given patients in securing suitable employment.

PART VI

SANATORIUM STATISTICS

ADMISSIONS TO SANATORIA BY AGE GROUPS DURING 1944

Age Groups	Number	Percentage
0-9.....	111	3.8
10-19.....	368	12.7

DIVISION OF VENEREAL DISEASE CONTROL

W. G. BROWN, M.D., D.P.H., *Acting Director*

There has been continued progress toward the attainment of the objectives of the programme as set forth at the time of the re-organization of the Division some two years ago. Some objectives have been attained, others have been attained in part, while a few have been beyond attainment due to the limitations of staff.

The purpose of the programme is the mitigation and prevention of venereal diseases in our Province. Although the statistical picture presented in this report might be taken to indicate favourable progress, the prevalence of this group of communicable diseases continues to be far in excess of that which should obtain. It is obvious that a considerable reservoir of unrecognized communicable infection continues to exist. Communicable venereal diseases, and syphilis in particular, are not characterized by acute physical disability. A great proportion of infected persons, therefore, are not aware of their infection and do not seek or obtain medical treatment. Direct control measures depend upon the reporting of cases as they occur and only when their existence is revealed to the public health authority can necessary steps be instigated to trace the infections back to their sources. In spite of the known incompleteness of reporting, the greatest contribution to venereal disease control in this Province, incongruous as it may appear, is being made by the victims of venereal disease themselves. They are the source of the information respecting possible contacts which provides the key to epidemiological follow-up, which in turn enables us to bring a significant amount of unrecognized infection under treatment. The co-operation being given to our health authorities by those who have suffered infection is improving in direct proportion to our understanding and appreciation of the problem they are facing.

A summary of the reports of Venereal Disease Infections, received by the Division during the past year, is given in Table I.

TABLE I
THE INCIDENCE OF VENEREAL DISEASE IN ONTARIO
Showing Annual Number of Venereal Infections Reported
For the Years 1937 to 1945

YEAR	SYPHILIS (All Forms)	GONORRHOEA	TOTAL VENEREAL DISEASE	RATIO SYPHILIS TO GONORRHOEA
1937.....	2,415	3,481	5,896	1 : 1.4
1938.....	3,010	4,188	7,198	1 : 1.4
1939.....	3,285	4,125	7,410	1 : 1.3
1940.....	4,953	4,218	9,171	1 : 0.9
1941.....	7,484	5,293	12,777	1 : 0.7
1942.....	5,952	6,220	12,172	1 : 1.0
1943.....	6,849	6,390	13,239	1 : 0.9
1944.....	5,365	7,908	13,273	1 : 1.5
1945.....	4,919	8,225	13,144	1 : 1.7

It will be noted that there has been little change in the total numbers reported since 1942. The total reports for syphilis for 1945 is the lowest since 1939. It is 446 less than in the year 1944 and 1,930 less than in the year 1943. This might indicate a favourable trend which has been experienced in spite of a phenomenal

rise in contact reporting and in spite of the demobilization of the armed forces. The increase in total reports of gonorrhoea has resulted in an improved ratio of this disease to reported syphilis. This ratio of 1.7 : 1 is the most favourable yet recorded for any one year.

FIGURE II
 INCIDENCE OF GONORRHOEA IN ONTARIO
 Showing Number of Cases Reported by Agency Reporting
 For the Year 1945

The sources of reports of newly recognized infections are listed in Table II above. This table shows that almost an equal number of reports were received from private physicians and from clinics. In the year 1944 over 40 per cent of the total reports were received from physicians and 27 per cent were received from clinics. It is our belief that the change of these percentages for the year 1945 is a reflection of the greater use of clinics, particularly by those persons who were located and diagnosed as the result of contact follow-up. The percentage of the total reports, received from the armed forces, has remained practically unchanged.

An analysis of case reports by age, sex and stage of disease is given in Table III. The total reports received show a reduction of only 129 cases from the 1944 reports. Total reported syphilis shows a reduction of 446 cases or 8.3 per cent, whereas total reported gonorrhoea shows an increase of 317 cases or 4.0 per cent.

It is noted also that syphilis was reported in a ratio of 1.9 cases in males to every case in females. Gonorrhoea shows this ratio to have been 3.2 to 1.

There was a reduction of 34 reported cases of prenatal syphilis, the total for 1945 being 131 as compared with 165 in 1944. Although this might be considered to be a definite improvement, it remains a fact that the 131 cases, reported during the past year, were inexcusable and would have been prevented if the infections of the mothers concerned had been recognized in the early stages of pregnancy.

Of the total venereal disease infections reported, approximately 70 per cent occurred in the 15-34 year age groups and almost 60 per cent of the total reported infections were in the 15-30 year age groups. The peak of occurrence of infection is still in the 20-24 year age group and the significance of this fact becomes more apparent when it is realized that it is during this same age period when the greatest number of marriages are contracted.

More than one out of every ten persons reported as having venereal disease infection were boys and girls in their adolescent years. This fact clearly calls for the attention of those who interest themselves in the welfare of youth and certainly signifies the urgent need for adequate education of our children before they even reach this period in their physical and emotional development.

A. ADMINISTRATION

In this Province venereal disease control legislation places authority and responsibility at the local level of public health administration. The development of full-time public health administration in larger urban centres and more recently on the Health Unit basis is promoting more effective venereal disease control. Although many smaller urban and rural municipalities have active public health programmes the limitations of the services available from the part-time medical officer of health must be recognized. The part-time medical officer of health is frequently unassisted by a public health nurse and is restricted by the responsibilities of active private practice.

Improvements in legislation are being recommended and when they have been enacted a revision of Regulations will be necessary to coincide with current progress in procedures.

The limitations of staff have imposed severe restrictions on the activities of the Division. To this limitation has been added the recent resignation of the Director, Dr. John A. Leroux, who, during his tenure of office, made such valuable contributions to the programme which he designed. The Department, and our Division in particular, are appreciative of the assistance rendered by the Department of National Defence through which his services were initially made available. The resignation of Dr. Helen Thomson earlier in the year deprived the Division of the services of an able physician whose contribution to epidemiology made the growth of our present epidemiological service possible. The recent appointment of Mr. W. B. Nichols, B.A., in the capacity of statistician and assistant in education, assures more valuable benefits from these two important phases of the programme. A fifth consultant has been added to the staff, bringing to the physicians of the Province a consultant service in Syphilology. Through the cooperation of the Ontario Hospitals Division a member of their psychiatric staff is now available to the Division in an advisory and research capacity.

The clerical staff of twelve has been maximum for the accommodation of our offices. It is worthy of note and commendation that their application to their duties has made possible the absorption of increasingly heavy office routines with the continued maintenance of all our central office services.

Clinic services have shown improvement during the year, although clinic facilities in general are still far from those which are desirable. Some alterations have been carried out in two clinics and plans are under consideration for similar improvements in others. The importance of adequate and attractive accom-

modation for clinics cannot be over-emphasized. The relegation of venereal disease clinics to quarters which would be considered quite unsuitable for any other clinic purposes has been a common practice. In regard to some clinics a decision will soon be necessary as to whether the unsuitability of present quarters warrants the closing of this service in these centres. It is far from true to assume that "any clinic is better than no clinic at all."

Total.....	140,622	143,844

*Clinic closed on October 31st, 1945.

There has been an increased attendance at clinics to the extent of 3,222 visits. This increase is also expressed in the summary of new admissions which shows an increase of 66 per cent over 1944. This substantial increase has occurred in both syphilis and gonorrhoea new admissions for males and females. There is reason to believe that the more intensive epidemiological follow-up occurring in most clinics areas has contributed to this rise.

There has been no reduction in the extent of use of fever therapy in the Province. The hospitals operating subsidized fever therapy centres now assume full responsibility for the therapy provided. The Department maintains equipment, provides grants in lieu of medical and nursing services and assumes payment for hospitalization of ward cases unable to assume this expense themselves. In addition a subsidy is paid by the Department for a thorough pre-fever examination of all candidates for this form of therapy, thus providing a means of evaluation of risk with a reduction of mortality.

1945.....	981	683	1,664	1,455	900	2,355	2,436	1,583	4,019

Extensive assistance was provided during the year in the form of re-imbursment to municipalities toward payment of physicians providing treatment at municipal expense. The greatest encouragement is given to municipalities to more liberally interpret the qualification of indigency or inability to pay. Treatment of venereal diseases is usually prolonged and expensive and it is important

that the dependents of persons requiring treatment are not subjected to hardships which are so frequently detrimental to family health and welfare. It is less expensive to treat venereal diseases early and thoroughly than to permit neglect and face the possibilities of greater expenditures in the future.

The increasing use of penicillin in the treatment of venereal diseases has led to an expansion of Departmental assistance, particularly in the form of subsidized hospitalization. During the past year the Department has subscribed to the principle that, in general, hospitalization is necessary to assure satisfactory penicillin therapy. Study is being made of new preparations toward the possibility of making greater use of this valuable therapeutic method.

Approved arsenicals and heavy metals are distributed without charge to any physician requesting them for the treatment of any of his patients suffering from syphilis. The only requirement imposed by the Department is that the registration number of the patients to be treated be given on the requisition form. Penicillin is not available for distribution to physicians but is made available for treatment in hospitals either by direct supply from Division stocks, as in the case of clinic hospitals, or by re-imbusement of the purchase cost.

C. EPIDEMIOLOGY

Knowledge of the occurrence of every instance of venereal disease infection is the only basis upon which effective control measures can develop. This implies both complete reporting by physicians and clinics and prompt public co-operation in seeking early diagnosis and treatment. Every instance of infection implies a second existing infection which may be the source and also implies possible contacts who must be found, examined and thus protected. This is the basis of applied epidemiology.

During the year 1945 there were 13,144 new reports of venereal infections forwarded to our Division. In the same year these infected individuals assisted the public health authorities by providing information toward identifying and locating 10,360 other persons who were possible sources or contacts of their infections. Although the information provided has frequently proven to be inadequate for identification, a great number of persons, who were in danger of infection, were located and were examined. These investigations found many proven cases which would otherwise have passed unrecognized and would have been a definite danger to the public health.

Applied epidemiology is now accepted in principle and is being gradually accepted throughout the Province in actual practice. Larger urban centres can institute such a service because they can have trained personnel. Health Units in their areas can do likewise. Smaller urban and rural centres present a more difficult problem but in many instances a commendable service is being rendered by the medical officers of health and their limited staff. We have good reason to believe that the 13,144 reports of new venereal disease infections should have yielded over 22,000 contact reports, which means that there is still considerable scope for improvement.

It is now recognized that trained personnel are essential if the most effective use is to be made of the contact information received. Advanced epidemiological technique is basically educative and when the proper attitude and approach is used by trained workers more effective results can be expected. Toward this end a training course for public health nurses, delegated for study by local health departments, will be opened early in 1946. Our Department now accepts as a fact that venereal disease contact follow-up can best be carried out by the public health nurse in the course of her duties in generalized public health nursing. To promote the wider acceptance of this principle, our nursing supervisor with the Division, Miss Pearl Stiver, P.H.N., has carried out an extensive programme of education and interpretation among undergraduate and graduate nurses as well as among the public health nurses in local departments. Studies in the use of applied psychiatry in epidemiology are being carried out and the development of techniques which take advantage of our findings will be reflected in the course of training which has been prepared.

FIGURE III
 EPIDEMIOLOGIC INVESTIGATIONS OF VENEREAL DISEASE CONTACTS
 IN ONTARIO

Showing Number of Contacts Reported by Agency Reporting
 For the Years 1943 to 1945

Attention is drawn to the number of reports respecting female contacts of gonorrhoea in the 15 to 24 year age group (Table IX. This number represents approximately one-third of the total of all contact reports. It appears indicated to examine the reasons for the much lower contribution of information respecting male contacts, which should in our belief have been at least as large.

 For the Year 1945

AGE GROUP	GONORRHOEA			SYPHILIS			TOTAL VENEREAL DISEASE		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Under 15.....	10	18	28	117	127	244	127	145	272
15-19.....	182	1,020	1,202	70	220	290	252	1,240	1,492
20-24.....	491	2,342	2,833	238	417	655	729	2,759	3,488
25-29.....	333	927	1,260	241	215	456	574	1,142	1,716
30 and over....	321	426	747	403	271	674	724	697	1,421
Not stated.....	382	792	1,174	387	410	797	769	1,202	1,971
Total.....	1,719	5,525	7,244	1,456	1,660	3,116	3,175	7,185	10,360

The contact reports received respecting the 20 to 24 year age group constitutes 33.7 per cent of the total contacts reported. This again emphasizes the importance of venereal diseases as a threat to health in the age group when most marriages are contracted.

D. EDUCATION

Public Education:

It is a fallacy to assume that the dissemination of information is analagous to education. The presentation of information which we may hope will be absorbed as knowledge, must be both continuous and diversified if it is to result in education. The individual who receives factual information and approved recommendations must always be considered to be still free to draw his or her own conclusions. To assume, therefore, that the quantity of literature distributed or the number of films projected, or the size of audiences addressed, is a measure of the public education accomplished, is an error. We can but aim to acquaint as many of our citizens as possible with the essential facts concerning venereal diseases toward protecting them from infection.

One new booklet was added during the year, namely the general booklet entitled "Information About Two Serious Diseases". In addition to its distribution on request, a copy is sent to every physician whenever he reports an instance of venereal disease infection. It is provided in this way for the information of his patients.

Two new films are now available, which are suitable as a supplement to teaching in secondary schools. One film is prepared for men and boys and the other film is for women and girls. These films are more specific than the more general films already in our library and bring our available stock to more than fifty prints. Films are not made available to any who request them, but are supplied whenever there is evidence that they are to be used as a visual aid to other suitable instruction.

"Anti-V.D." community programmes were assisted in Kitchener-Waterloo and St. Catharines, and supervision is being given in the preparation of similar programmes in three other cities. Many smaller rural communities have presented similar programmes in a most commendable manner. A project by which

films were included in the rural film circuits of the Farm Radio Forum and Federation of Agriculture has proven to be valuable from at least a survey and experimental standpoint. Reception and interest was uniformly excellent and the way seems now to be opening for a more extensive programme of rural education.

During the year steps were taken to implement the recommendation that instruction regarding venereal diseases be included in the course in Health and Physical education in secondary schools. A teachers' manual of factual information was prepared by the Division and was approved and distributed by the Department of Education. A booklet for "teen-agers" has been completed and has gone to press.

Professional Education:

Every effort has been made to bring to the practising physician the latest practical knowledge to assist him in the diagnosis, treatment and management of cases of venereal disease.

The Bulletin for physicians has been issued every two months and has presented the following leading articles:

- (i) The Theory and Practice in the Treatment of Gonorrhoea in the Male.
- (ii) Eight Health Department Services for Physicians in Ontario.
- (iii) The Management of Congenital Syphilis.
- (iv) Management of Latent Syphilis.
- (v) The Care of the Veteran in Civilian Life.
- (vi) Diagnostic Aids in Syphilis.

A second Bulletin prepared for Public Health personnel has been adopted, being issued monthly. It gives information of assistance to medical officers of health, public health nurses, and sanitary inspectors. This Bulletin has also been used as a medium for the circulation of current statistics.

The Division acknowledges with thanks the valuable assistance given in public health education by the Medical Officers of Health throughout the Province of Ontario, by the Federal Department of National Health and Welfare, and finally the considerable co-operation by medical personnel from the armed forces.

The following presents a summary of educational activity of the Division during 1945:

- (a) Public Addresses—Members of the staff gave 67 public addresses during the year.
- (b) Film Projections—Films were projected on 474 occasions to a total audience of over 53,600 individuals. The groups viewing these films included public mass meetings, service clubs, women's organizations, home and school clubs, secondary-school classes, and other groups.
- (c) Over 210,000 pieces of literature were distributed. One-quarter of this quantity reached the public through community programmes while three-quarters were distributed in response to specific requests for information. There were six issues of the Bulletin of Venereal Disease Control published and distributed to physicians with a circulation of approximately 4,500 copies each issue. A second bulletin, for Medical Officers of Health, Public Health Nurses, and Sanitary Inspectors, was

adopted in 1945 and seven monthly issues were distributed with an average circulation of 2,200 copies.

- (d) Posters Distributed—More than 16,000 posters were distributed to community programmes, health departments and other organizations during the year. There was a substantial increase in the number of posters distributed to industry and voluntary welfare agencies during the past year.
- (e) Displays—The displays of the Division were in frequent use throughout the year and the total number of units exhibited exceeded seventy.

E. ACKNOWLEDGMENT

The Division has been most appreciative of the generous and active co-operation and assistance which has been provided by the various Divisions of the Department. In particular, mention should be made of the important and fundamental contribution made by the Central Laboratory and its branches throughout the Province. The free provision of serological and other diagnostic test services, together with the distribution of diagnostic outfits, has contributed greatly to our programme. The central Laboratory has furthermore assumed responsibility for the care of treatment drug stocks and for the forwarding of requisitioned supplies to physicians and clinics outside of the City of Toronto.

SEVENTY-EIGHTH ANNUAL REPORT
OF THE
HOSPITALS DIVISION
DEPARTMENT OF HEALTH
UPON THE
ONTARIO HOSPITALS FOR THE
MENTALLY ILL, MENTALLY DEFECTIVE,
EPILEPTIC AND HABITUATE PATIENTS
OF THE
PROVINCE OF ONTARIO

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Seventy-eighth Annual Report of the Hospitals Division, Department of Health, relating to the Ontario Hospitals for the Mentally Ill, Mentally Defective, Epileptic and Habituate Patients, for the year ending March 31, 1945.

Respectfully submitted,
RUSSELL T. KELLEY,
Minister of Health

THE HONOURABLE RUSSELL T. KELLEY,
Minister, Department of Health,
Parliament Buildings,
Toronto, Ontario.

SIR:

I have the honour to submit for your approval the Seventy-eighth Annual Report of the Hospitals Division, Department of Health, relating to the Ontario Hospitals for the Mentally Ill, Mentally Defective, Epileptic and Habituate Patients, for the year ending March 31, 1945.

Respectfully submitted,

J. T. PHAIR, M.B., D.P.H.
Deputy Minister of Health

REPORTS OF THE SUPERINTENDENTS

ONTARIO HOSPITAL, BROCKVILLE

DR. C. E. HANNA, Superintendent

Care and Treatment of Patients

The priority and the requirements of the war effort have continued to exert a severely restraining influence on commitments and activities in all departments of this hospital throughout the year 1944-45. Scarcity of materials has reduced much needed construction to the vanishing point and has limited maintenance to the bare necessities, while our skeleton staffs have laboured unceasingly to operate and sustain services to the maximum of possible efficiency. Such circumstances are building up a growing problem for post-war consideration.

Attention is again directed to the pressing problem of suitable accommodation and segregation of the increasing numbers of the old-age psychotic group.

Electro-shock therapy has been added to our armamentarium and standard equipment and trained personnel are rapidly extending this form of therapy to all selected cases where beneficial expectancy would seem to warrant. The results have, on the whole, been gratifying but we feel that further experience and study are necessary to evaluate the permanency of such treatment.

The Out-Patient Clinic for the control and treatment of venereal disease has continued to serve the local district (Brockville and Prescott) efficiently, with an average of ten to twelve cases treated weekly on Thursday afternoons.

Staff limitation has of necessity curtailed recreational and amusement programs. However, we have concentrated our effort to furnish patients with as much diversion as the circumstances would permit. Moving picture programs and skating parties during the winter months, with small picnic groups, tennis and bowling to a limited extent during the summer, and outdoor walking parties throughout the year, have formed the main features of this plan. Our accustomed patients' dances, concerts and outside athletic diversions have had to be temporarily discontinued for the duration of the war.

The Mental Health Clinic, consisting of a Director, a Psychologist and a clerical assistant, but without the services of a Social Worker, has continued to render invaluable service to this Eastern District, especially in Ottawa, Cornwall, and Brockville. The quality and type of service available is being increasingly recognized by the medical profession, hospitals, municipalities, schools and charitable institutions, as well as Social Service Organizations throughout Eastern Ontario, and there is evident an awakening public interest in mental health.

The Clinic has kept this centre in touch with our patients on probation, has given regular lectures in psychiatry and mental health to nurses in the city hospitals, to the pupils of schools, as well as to those of our own Training School. A more detailed report of its activities is appended.

The Canteen has been enlarged and enhanced in appearance by the purchase and installation of attractive show cases. Sales through patients' pin money accounts and staff patronage have been appreciably accelerated. A soft drink refrigeration unit (electric) has also been added and gives refreshing advantages to patients and staff during the summer season. This feature is serving an important function in the general welfare of the institution.

The Occupational Therapy Department, although depleted in staff, has performed its functions with commendable skill and industry. Our lone Therapist has carried the burden of effort through the year, and, in addition, during the summer months has given instruction and received welcome assistance from a rotating group of student internes.

Staff, Administration and Buildings

Fortunately, there have been no further separations from our medical staff during the year. The three physicians left on ward duty continue to render yeoman service, covering all requirements of their respective services.

Two of our staff members have returned from service with the Armed Forces—David Smith, tinsmith, (R.C.A.F.) on June 19, 1944, has been active since his return in making repairs sadly neglected, and in general maintenance upkeep. Clarence Jenkins (R.C.A.F.) returned on January 15, 1945. Acting supervisor on enlistment, he has now been re-established as supervisor. We welcome the return of these trained employees to our staff. From time to time we have been in communication with other members of our staff still in the Armed Services regarding their eventual return and await expectantly their restoration to our organization.

We regret to report the loss, through superannuation on October 31, 1944, of Mr. Robert C. Tennant, Laundryman, of long and valued service. He was succeeded on November 1, 1944 by Mr. Kenneth Reynolds, formerly of our attendant staff.

Mrs. Barbara Alexander, X-ray and laboratory technician, resigned December 26, 1944 and we were without the services of a technician until the appointment of Mr. Aldo Bottos, formerly employed at the Sanatorium, Port Arthur, Ontario, on March 6, 1945.

Miss Doris Neil, Nurse, Gr. 1, returned February 17, 1945 from taking the course for clinical clerks at the Psychiatric Hospital, Toronto.

In the continued absence of a dietitian, Miss Frances Grant has been appointed housekeeper as of September 1, 1944.

Ten Nurses' Aides and two ward maids, as well as five part-time nurses, have been given employment as emergency measures, to replace the shortage in nursing staff due to enlistments and resignations to take other employment.

The graduating exercises of the Nurses' Training School took place at 2.30 p.m. Thursday, September 6, 1944. Judge Hawley S. Mott of the Court of Domestic Relations, Toronto, delivered an inspiring and constructive address to the graduates.

Our building program has of necessity been in abeyance during the past few years. As to maintenance, some urgent replacements have been carried out.

Under the efficient management of Mr. R. M. Miller, there has been a marked improvement in conditions at our hospital farm.

ONTARIO HOSPITAL, COBOURG

DR. G. W. KELLS, Superintendent

Care and Treatment of Patients

During the year 22 patients were admitted. Sixty-two were transferred from other Ontario Hospitals, 158 were placed on probation and of these 130

were returned. Five died and 43 were discharged. Eight were placed in the Colony House, and of these 5 were returned.

Religious services were held in the Auditorium every Sunday during the year by the Protestant and Roman Catholic Clergy of Cobourg. Some members of the Clergy conducted services during the week at the Hospital, and some of our girls attended services in the Cobourg churches.

Our moving picture machine was in operation during the winter months, and during the remainder of the year a group of our girls was sent to the picture show in Cobourg on Saturday afternoons. A number of other girls who had pin money, were allowed to accompany them.

The Annual Hallowe'en party was held in the Auditorium. A Christmas Tree was held for the patients on December 23.

A concert was given by a group of local amateurs in the Auditorium.

The entire patient population, as well as most of the Staff, have been given Schick and Dick Tests, and all positive cases have been given prophylactic treatment, and all new cases were given typhoid inoculations shortly after admission.

Staff, Administration and Buildings

Dr. S. O. Morris was transferred to this Hospital from the Ontario Hospital, Kingston, to act as Assistant Physician.

The Mental Health Clinic, formerly operated at the Ontario Hospital, Whitby, was transferred to this Hospital in April 1944 and gave service locally, as well as to the cities of Peterboro and Oshawa, and the towns of Lindsay, Whitby, Bowmanville, Port Hope and Cobourg. A number of people were examined, especially adults, coming from outlying districts.

Mr. Wm. Brown, our Engineer, died August 18, 1945 and Mr. C. F. Gee, who was formerly on the staff of the Ontario Hospital, London, and served about four years in the Navy, was taken on the staff as Engineer.

The work in the Engineer's and Carpenter's Departments was practically all maintenance. These services have been well maintained.

The inside of the Administration Building has practically all been redecorated and repainted, also both residences attached to the hospital.

ONTARIO HOSPITAL, FORT WILLIAM

DR. C. A. CLELAND, Superintendent

Care and Treatment of Patients

In April 1944, the Ontario Hospital building in Port Arthur was returned to us by the Army and we have been able to transfer twenty-nine patients to this unit. This has been quite valuable because it enables us to segregate the aged and infirm patients from the more active ones. It has also relieved a certain amount of congestion at the Fort William Hospital.

Electroshock therapy was begun in July 1944, and thirty-four patients have received this treatment. The clinical results have been good, in some cases surprisingly so, and the secondary results have been a stimulation of interest in the hospital shown both by relatives and also by the local medical profession.

Church services for our patients have been continued every second Sunday by the Baptist Young People's Organization, and for special occasions by the Salvation Army. These have been greatly appreciated.

In the summer our farm provides fairly satisfactory occupational therapy, and each evening there are basketball or football games in progress. In the wintertime, however, there is need for more occupational and recreational therapy.

We have endeavoured to supervise patients on probation but we find this a difficult problem in this area, particularly because of the fact that a great number of our patients either live or find employment hundreds of miles from the hospital.

Staff, Administration and Buildings

Miss A. Baillie, Reg.N., our superintendent of nurses, has been supervising the Port Arthur Unit ever since it has been opened. Mrs. McGrath, Reg.N., was appointed to our staff in September 1944. Miss W. Laine, clerk-stenographer, was appointed in April 1944 at the Port Arthur Unit. Mr. E. Rollason has been acting-supervisor of attendants at the Port Arthur Unit.

Our staff generally has functioned very satisfactorily although the turnover in the attendant staff has been very high. Organized recreation is possible in the staff quarters, both in Fort William and Port Arthur, during the winter and the summer.

All members of staff, both inside and outside, have been given instructions in the care and treatment of patients and each one realizes that he has a part to play in assisting the individual patient towards recovery.

A course of lectures and clinics in psychiatry and mental hygiene has been given to the nurses in training in each of the three local general hospitals. Three addresses have been given to the local Registered Nurses Association, particularly regarding treatment in psychiatric disorders. Three addresses have been given to local service clubs on subjects related to mental health. Psychiatric consultation work in the two lakehead cities has become quite a heavy task.

During the year, a one-storey building was constructed on the west side of the barn and it is being used to house our beef stock. Our program of beef production has continued during the past year and we were able to ship one carload of beef east, in addition to supplying all our own demands in beef, veal, lamb and pork.

ONTARIO HOSPITAL, HAMILTON

DR. J. N. SENN, Superintendent

Care and Treatment of Patients

There has been no essential change in the care and treatment of patients in this Institution during the last year. Electro-shock Therapy is being used in conjunction with other methods, with good although not universal results. The consultant service is provided in all fields. We are feeling the loss of our dentist rather severely, he being on active service and his place being vacant. The Division of Dental Care has provided us to the best of their ability from other hospitals but a full-time dentist is necessary to adequately carry out the program. All wards throughout the hospital are terribly overcrowded, to the extent that one dining room is still used as a dormitory. We particularly noticed the proportion of elderly patients in residence and being newly admitted. This makes for an additional strain upon Infirmary accommodation, which, at the present time is hardly sufficient for our use. Our admission rate continues high and the proportion of elderly patients being admitted is outstanding, so much so that admission dormitories are frequently completely filled with all elderly

patients. As soon as possible a special geriatric unit should be provided to care especially for this type of patient. This would be very greatly to their advantage and to ours.

Staff, Administration and Buildings

Dr. J. S. Stewart, Medical Superintendent, was transferred from this hospital to the Ontario Hospital, Kingston, and his place was taken by the above named. Dr. Stewart will be missed at the hospital by employees and patients alike. The Medical Staff has shown no change, with this exception, during the past year and it is extremely low in numbers. General staff has had to be obtained through the Selective Service and with exceptions, the staff that is recommended to us from the Selective Service is not of good quality. Absenteeism is high and the wards necessarily are showing the result of understaffing over several years' time. The senior members of the staff, particularly on the wards, are to be commended for their devotion to duty and for the fact that they have unhesitatingly given of their best to assist the hospital through a very difficult phase. We are slowly getting members of the staff returned from the Armed Forces. They are universally adding to the quality of the staff of the hospital. I would personally like to express my appreciation to Dr. Stewart for the manner in which the hospital was functioning at the expiration of his superintendency, to the Assistant Superintendent and all other members of staff for their co-operation in the rather trying time of adjusting from one superintendency to another.

ONTARIO HOSPITAL, KINGSTON

DR. J. S. STEWART, Superintendent

Care and Treatment of Patients

The hospital continues to be understaffed in the medical service, and in the male and female nursing services. The auxiliary services are reasonably well staffed. We have, nevertheless, maintained the diagnostic and treatment care of patients.

The absence of a Mental Health Clinic is seriously felt in centres such as Renfrew, Pembroke, Belleville and Picton, and frequent calls are made from the latter two centres for the services of a clinic physician. These requests have been filled with as little delay as possible, but we have not always been able to send a physician at the exact moment requested.

The only change in treatment is the replacement of Metrazol Therapy with electro-shock.

Staff, Administration and Buildings

On September 1, 1944, Doctor C. M. Crawford, acting superintendent, was retired on superannuation and Doctor J. S. Stewart, superintendent of the Ontario Hospital, Hamilton, was transferred to the Kingston Hospital, as superintendent. Doctor P. P. Mandl was appointed to the temporary staff on February 7, 1945. Effective March 31, Doctor E. A. James was transferred from the Ontario Hospital Training School, Orillia, to Kingston, replacing Doctor S. O. Morris, who was transferred to the Ontario Hospital Training School, Cobourg. On the same date, Mr. C. R. Wartman, Steward, was transferred to the Ontario Hospital, Woodstock, and was replaced by Mr. G. W. Boag, Steward of the Woodstock Hospital.

The graduating exercises of the School of Nursing were held on the afternoon of November 3. Principal H. A. Kent of Queen's Theological College, delivered the address to the graduates.

Most of the hospital buildings are in a state of disrepair owing to halting of activities during the war. A thorough survey has been made of all buildings to be repaired.

ONTARIO HOSPITAL, LANGSTAFF

DR. W. A. REDDICK, Superintendent

Care and Treatment of Patients

In the autumn of 1944 ninety male patients were transferred from our Concord Unit into the Langstaff Hospital and the administration of the Concord Unit was turned over to Dr. J. R. McGeoch, Superintendent of the Ontario Hospital, Toronto, to accommodate women patients from the Toronto Hospital. We still administer the Concord and Brampton farms, carrying our patient workers to these other institutions. Our daily average population during the year was between 430 and 440 patients.

As all our patients are ambulatory the majority of them are used in our farm operations, as this is the only form of therapy we have at this hospital.

Our recreational activities consist of church services, picture shows in the winter months, ward games, radio programs, etc.

Staff, Administration and Buildings

Due to our increase in patient population our attendant staff was increased from thirty-six to forty-five. Fewer changes have taken place this year in our staff as the majority of them are older men, living in the neighbourhood of the hospital.

The pure-bred cattle sale held on October 7, 1944 realized \$14,975.00, which was obtained from the sale of fifty-one heifers and four calves. Farm and garden crops were probably the best ever produced on this farm as weather conditions were favourable.

No major building operations were carried out through the year as we directed our attention mostly to repairs of present buildings. The lower floor of our attendants' residence was converted into an apartment.

In conclusion, I must report that we had a very successful year, both from the standpoint of our patients' health and also the wonderful farm crops we produced. I must also add that all Head Office officials have given our hospital every consideration and assistance and it is a pleasure for me to extend to them the thanks and appreciation of our whole staff. On the whole I have had little difficulty in obtaining replacements for staff and I must again thank them for their loyalty, support and co-operation.

ONTARIO HOSPITAL, LONDON

DR. G. H. STEVENSON, Superintendent

Care and Treatment of Patients

During the year there were admitted 501 persons, the first admissions totalling 166 men and 203 women, and the readmissions 56 men and 76 women. This is a very moderate increase over the preceding year. Discharged were 137 men and 166 women, a total of 303. The percentage of discharges based on admissions is a scant 60 per cent, the lowest we have had since 1937, although practically the same as last year. We believe this lowered discharge rate to be largely due to the increase in the senile and arteriosclerotic group, who because of the nature of their illness, have a low discharge rate. I urge the importance

of special hospital facilities for this old age group apart from our mental hospitals.

In spite of wartime difficulties we have endeavoured to give every patient admitted the benefit of all diagnostic and treatment facilities which might be helpful to him. With the transfer of Dr. John Geoghegan to our staff we placed him in charge of shock therapy as a full-time service. Ward 9 was taken over for this therapy, insulin treatments being administered in the mornings and electro-shock in the afternoon. A few patients received metrazol.

During the latter months of the year an eye, ear, nose and throat clinic was established and equipped in a room close to the operating room. Dr. John Armstrong was appointed consultant in these fields and holds a weekly clinic for examinations and treatments.

All other diagnostic and treatment facilities have been continued without interruption.

Staff, Administration and Buildings

We have been able to maintain reasonable numbers of staff except physicians and graduate nurses. Nurses have been replaceable in part by nurse assistants who have been of very great help to us. The early end of the war should bring additional physicians. In this connection it might be noted that Dr. Hilda Lewis returned to her home in England in December 1944. I cannot speak highly enough of the excellence of her services to the patients under her care. We miss her greatly. Dr. Helena Hellerova was also granted leave of absence to enter the service of UNRRA in order to help her people of Czechoslovakia. Dr. Carpenter went to the Toronto Psychiatric Hospital in September to commence his post-graduate course in psychiatry. Dr. John Geoghegan was transferred to our staff on September 1, 1944. Dr. Mischa Hertzberg was transferred to our staff from Penetang on January 22, 1945 and Dr. J. J. O'Connell returned to us after 4½ years in the R.C.A.F. on October 2, 1944. We have also had assistance from the R.C.A.M.C. who loaned Captain Garner and Captain Stoffman to us for a number of months. Dr. C. A. Bright joined our staff in part-time capacity on December 1, 1944 to operate the mental health clinic and other duties in the London area. He also directs the psychomedical ward at Victoria Hospital which completes its first year of operation at the end of this fiscal year. This ward has served a useful purpose but is handicapped by being able to accommodate patients of only one sex. Until January 1, men only were admitted. From that date only women have been admitted. It is hoped additional facilities may be made available shortly so that both men and women can be cared for and that with more physicians available the psychiatric service may be extended more generally into all other divisions of Victoria Hospital.

At the end of the year our honour roll shows the names of 97 members of staff who have enlisted for active service. We are very proud of this fine record and will welcome back to our staff all these persons as soon as they can be spared from military duties. The staff at home has responded excellently to each Victory Loan campaign, oversubscribing our objective each time. Many of our staff are also blood donors.

It is an honour to be associated with such a fine staff as we have at this hospital and I should like to express my warmest appreciation to all who have so loyally responded to the call, whether in the Armed Forces or here in the hospital caring for our mentally ill.

Our School for Nurses received only 4 applicants in the September class. This steady decline in candidates for our school of nursing, is undoubtedly due to wartime problems. We have continued to receive students from a number

of general hospitals for three month affiliation courses in psychiatric nursing, as well as a few post-graduate students. Courses of instruction have also been given to the nurse assistants and the attendants. Our nurse graduation exercises were held on the evening of June 9, 1944 and the address was delivered by Mrs. Laura Fitzsimmons, consultant in nursing to the American Psychiatric Association.

Other educational activities of the hospital staff comprise lecture courses to nursing students in hospitals visited by our mental health clinic, the training of psychological, occupational therapy and medical internes, courses of instruction in the Faculties of Medicine and Arts, addresses to various clubs and organizations dealing chiefly with mental hygiene. Papers have also been read before various scientific bodies and several have been published in scientific journals. In addition we gave four courses of instruction for army nursing orderlies, each of four weeks' duration.

Every effort has been made to maintain the physical condition of our buildings and grounds satisfactorily. New sidewalks have been laid, flooring installed, buildings repainted and repaired, etc. Only minor repairs and alterations have been possible, because of the war, but we earnestly hope that the early cessation of hostilities will make possible much needed major alterations and new buildings to relieve overcrowding and to enable us to give to our mentally sick citizens the same standards of care and treatment to which all types of hospitals aspire.

ONTARIO HOSPITAL, NEW TORONTO

DR. T. D. CUMBERLAND, Superintendent

Care and Treatment of Patients

There has been a shortage of staff during the last year and a number of the attendants are old men, and a number of the nurses are married women who have volunteered to help out for the duration of the war. The health of the patients has been remarkably good. Unfortunately, it has been impossible to get them out-doors to the same extent as when we had a full staff. We have been unable to operate the continuous baths on account of the help situation. Good progress has been made by insulin and electro-shock therapy.

Staff, Administration and Buildings

The staff is very depleted. A number of the permanent staff enlisted in His Majesty's Services shortly after the outbreak of war. Some of these have now returned to their positions at this hospital.

The necessary repairs to buildings were made during the year and they are in good condition at the present time.

ONTARIO HOSPITAL, ORILLIA

DR. S. J. W. HORNE, Superintendent

Care and Treatment of Patients

The activities of this Institution for the fiscal year just ended, show little change over the preceding year.

The average resident population during the year was 2,149, which is a mild increase over the preceding year. This increase has stretched our accommodation to its limit. It is now only possible to admit a new patient when one is discharged.

The new admissions totalled 178. New admissions were less than the preceding year due to our inability to provide accommodation. On the other hand, applications for admission increased. These applications were from the younger age groups, both chronologically and intellectually.

As a result of continued increase in the younger age groups, further re-adjustments of school classes were necessary, and two junior vocational classes were started for girls and boys. There was a special training program devised for these children and it has worked most satisfactorily. There was an average of 176 children passed through each of these rooms daily.

Staff, Administration and Buildings

Excellent progress has been made in the erection of the 300-bed unit, and it is only a matter of weeks before this unit will be ready for occupation. The unit is complete in every detail to care for infirm patients, and we feel the type of construction and equipment is of high standard and will greatly facilitate the care of the patients that will be confined to this unit.

The help situation has eased greatly, particularly in regard to male employees. There are a number of men who have received their release from the armed forces and are looking for employment. We are particularly short of graduate nurses, but have been able to partially fill this lack of nurses by employing ward aides. As the new unit will be completely staffed with female help, a greater number of ward aides will be required, and we are getting enquiries from the Women's Division of the Armed Forces regarding the nature of this work, and we trust we will have no difficulty in completing our staff on the female wards.

Lectures given to the ward aides have proven most satisfactory, both to the ward aides and to the Institution in the general care of the patients at large.

We are glad to report the return from active duty of Mr. Keith Murphy and Mr. Allan Lauder, who have again resumed their duties at this Institution.

I feel that a high standard of efficiency in the care and training of our patient population has been maintained through the year, and I wish to express my personal thanks for the co-operation given by members of the staff in maintaining this efficiency. I also wish to thank the members of the Department of Health who have given willingly of their time and co-operation in assisting with the many problems that have presented themselves during the past twelve months.

ONTARIO HOSPITAL, PENETANGUISHENE

DR. C. A. McCLENAHAN, Superintendent

Care and Treatment of Patients

During the past year 45 patients were admitted to the hospital. There were 14 deaths and 6 discharges. The present population is 639. The health of the patients was good. The Clinic for Venereal Disease has only two patients.

One hundred new books were added to the library.

Staff, Administration and Buildings

Dr. Hertzberg was transferred to the London hospital and replaced by Dr. N. Khmelevsky in February 1945.

The eight-hour day is working satisfactorily. One enlistment, Attendant E. Marcille has returned to duty after three years' service in France.

The nurses of St. Andrews Hospital, Midland, as well as new nurse-attendants on the staff were given a course of twenty lectures.

Miss MacMillan, Occupational Therapist, was away on sick leave for six months, but has returned to duty.

ONTARIO HOSPITAL, TORONTO

DR. J. R. McGEACH, Superintendent

Care and Treatment of Patients

Cottage "A" was transformed into Departmental office space and 85 female patients were transferred to the Ontario Hospital at Concord.

Seventy cases of General Paresis were admitted, 42 were discharged and 18 died during the year. This discharge rate of 60 per cent is the highest that has been obtained in the past five years.

Electro-shock treatment has been found to be a useful preparatory treatment in cases of General Paresis, who are unco-operative because of excitement, or in poor physical condition from a depressive syndrome, and several cases have shown surprising mental improvement before starting the course of artificial fever treatment.

The total admissions were lower this year, due largely to lack of accommodation, and numbered 434. The discharges were 259 (59 per cent), as compared to 43 per cent last year.

The number of patients on probation was reduced by 32 during the year and there are 33 in boarding homes, compared to 36 last year. Our social service nurse has been able to find employment for a larger number, as well as placing more on the old age pension.

Staff, Administration and Buildings

Dr. Florence L. Nichols resigned on July 31, 1944.

Dr. A. T. Jousse resigned on March 31, 1945.

Dr. Ruth M. L. Edwards was transferred from the Ontario Hospital, New Toronto, September 14, 1944.

Dr. R. J. W. Brooke was appointed as consultant in Neurosyphilis and General Medicine on October 1, 1944.

Captain Jean Dargis was seconded from the Army and reported for duty on March 12, 1945.

Eight nurse-attendants were given a course of lectures and 27 out of a total 33 have now taken the course.

ONTARIO HOSPITAL, WHITBY

DR. D. R. FLETCHER, Superintendent

Care and Treatment of Patients

If the success of the hospital is measured by results, we have had a good year. We have discharged outright over 400 patients, which is 80 per cent of our admissions, this in spite of the fact that the difficulty in obtaining staff was greater this year than at any time during the past twenty years.

In spite of this staff shortage, we have maintained our various vocational groups. We have kept up our group and individual psychotherapy. We are giving more shock therapy than ever before, and the results, I am sure, have justified the means used.

Our boarding out program and our probational group are as large as ever, and we have placed a great many patients in remunerative employment during the year.

One new departure in treatment has been tried with the co-operation of the Department and of our local industries. We have placed five alcoholics working

in local industries with their own consent and the consent of their families. Their wages were paid direct to the hospital and, after they paid the minimum rate for their board and a reasonable weekly sum to their family, the balance was saved for them so that they would have a nice little sum in cash when they left the hospital. During this period, they were all off on Saturday afternoon, and I personally gave them psychotherapy once a week. I do not know whether the results are going to be very startling, but at least the families have had a steady income, sometimes for the first time in years.

The problem of finding room for old people, who could be accommodated in community hospitals with a minimum of nursing care, and cases with physical ailments which appear to be chronic, as well as for the serious mental cases, continues to be acute. This applies especially to female patients.

No improvement is yet in sight in the employment situation in regard to nurses and nurse-attendants, and the training school is at its lowest mark in numbers since its establishment. What we lack in numbers is apparently made up by the fact that all our students offering themselves now are earnestly desirous of becoming nurses, and have been diligent in their studies.

Staff, Administration and Buildings

We have welcomed back two members of our staff who, although wounded, returned to us in pretty good health and in fine spirits, Mr. John Gudgeon and Mr. Melvin Toffin, the latter being the only surviving member of his platoon. We are glad to note that Mr. R. V. Ogilvie, R.N., reported missing in our last report, is now safe and freed from imprisonment. The following members of the staff were superannuated: Mr. Arthur Bullock, Supervisor, and Mr. Fred Harvey, Fireman. Dr. E. A. McArthur was added to the staff on transfer from the Ontario Hospital, Toronto, and we have had several young physicians from the armed forces for a period of training in psychiatry.

No major changes were made in our physical equipment during the year, with the exception of new ranges and new ovens in kitchens one and two, which are appreciated.

In conclusion, I would like to pay particular tribute to those who have resisted the opportunities offered elsewhere and have remained with us. In spite of rather short staff, our contributions to the Red Cross and other worthy causes were the highest on record. We exceeded our allotment on every Victory Loan and without any high-pressure methods. I do not think there is any better barometer of the loyalty and enthusiasm of the staff. I would like to mention at this time the married women who have come to us as office staff, domestic staff, and nursing staff, without whose loyal help the measure of success indicated in this report would not have been possible. I would also express my thanks to the public and the Press of the district who have helped us in every way possible. I would also express my thanks to you, Sir, and to the Director of Hospital Services for consistent support and assistance at all times.

ONTARIO HOSPITAL, WOODSTOCK

. DR. E. A. CLARK, Superintendent.

Care and Treatment of Patients

During the past three years, a moderate decrease in the number of first admissions has occurred, due, undoubtedly, to the fact that employment was readily available for anyone able to do even part-time work. To offset this apparent gain, it is noticeable that of those admitted, very few will be candidates for discharge at any time due to the chronic nature of their illness. Thus each year, a rapidly increasing residue of permanent patient residents is building

up. The present population of 1,212 shows an increase of only 17 during the same three-year period, again, doubtless, due to the urgent demands in the labour world, which makes it possible for even handicapped individuals to secure work and remain gainfully employed.

The program initiated in January 1944, of admitting all cases of suspect tuberculosis to Woodstock has continued without interruption, and only one Ontario hospital remains to be cleared of its Isolation Wards. During the year, 152 patients were admitted by transfer to the Tuberculosis Unit as against 90 and 60 in the two preceding years. The value of this arrangement, whereby all cases of active and suspect disease are segregated in one centre, is already apparent, as reflected in the decreasing incidence of new disease among patients and staff throughout the whole hospital system.

Early in the year, a reclassification of patients in the Tuberculosis Unit made it possible to reopen a ward which had been closed a couple of years previously due to shortage of staff.

Staff, Administration and Buildings

There is a shortage of ward personnel. A graduate nursing staff of 112 in 1940 had diminished to 48 at the end of this fiscal year. More unfortunate is the fact that no early increase in the graduate staff can be expected. The decreasing numbers of students in Training Schools during the war make it appear quite probable that no considerable group of nurses will be available for at least two to three years, and the continued employment of an increasing number of ward aides is, therefore, inevitable. Too much praise cannot be given to the supervisors and other senior members of the ward staff for the manner in which they have carried on with only a handful of experienced personnel.

Miss Margaret E. Hunt, Superintendent of Nurses in the Epilepsy Division, resigned during the year due to ill health, and was succeeded by Miss Kathleen S. Brand who returned from the School of Nursing at the University of Toronto. Miss Marjorie Bowen was appointed to the Occupational Therapy Staff of the Tuberculosis Unit, and Miss Rae Weatherwax resigned from the same Department. Mrs. Margaret McDonald was appointed as assistant dietitian. Approximately 70 members of the staff are still with the Armed Forces.

A new Occupational Therapy Centre and male and female admission and Infirmary Wards were completed in the Epilepsy Division. A complete new Branch Laboratory was built in the Tuberculosis Division, and will serve the surrounding community as well as the hospital. A considerable portion of the work on these four projects was carried out by the hospital maintenance staff. No other construction of major importance was undertaken.

ANNUAL REPORT OF ONTARIO HOSPITALS' CHEST CLINIC

For the Fiscal Year Ending March 31, 1945

O. V. DENT, M.D., Clinician

The work of this Clinic in the control of tuberculosis among patients and staff of the Ontario Hospitals by means of chest x-rays and Tuberculin Tests, has continued according to the plan described in the report of the fiscal year ending March 31, 1938.

The table, *"Report of Work by Ontario Hospitals Chest Clinic," accompanying this report, indicates the volume of work carried out during the year. The grand totals show that the amount of work in general has remained much the same as in previous years.

During the past year it has been possible to remove immediately all patients with Active Tuberculosis from Ontario Hospitals as soon as they have been discovered, and also to admit Tuberculous patients from sources other than Ontario Hospitals (mainly from Sanatoria) without delay. It may be noted that during the past year 62 patients in Ontario Hospitals were discovered to have Active Tuberculosis and were recommended for transfer to the Tuberculosis Unit. It is interesting and very encouraging to note, upon reviewing previous tables, that there has been a steady decrease in the numbers with Active disease—for the fiscal years from March 31, 1940 to the present these are respectively, 137, 99, 90, 79, 73 and 62. This decline in active cases can possibly be accounted for, at least in part, by the fact that admissions to the Tuberculosis Unit are not delayed since the Unit was established at Woodstock in October 1939, with its increased bed capacity.

In an effort to remove potential sources of infection from Ontario Hospitals, shortly before the beginning of the past fiscal year, a program was begun, and continued during the year, by which patients with Questionably Active or Suspect Tuberculosis who previously had been cared for on the Chest Observation Wards, were transferred to the Tuberculosis Unit for the further investigation of their chest conditions. In order to accept these patients, it has been necessary to transfer patients with Minimal, Arrested Tuberculosis from the Tuberculosis Unit to the other Ontario Hospitals where they can be cared for having Casual Observation on the general wards. By the end of the fiscal year, patients with Questionably Active or Suspect Tuberculosis had been transferred to the Tuberculosis Unit from all except 2 Ontario Hospitals.

During the past fiscal year 1,113 staff applicants were examined radiologically. Of these 7 or 0.63 per cent were considered unsuitable for employment because of pulmonary tuberculosis either active or questionably active and 262 or 23.54 per cent were accepted with reservations because of abnormal chest x-ray markings, possibly but not necessarily tuberculous in nature. These were accepted for temporary employment only, and would have further investigation within 6 months of commencing employment. (It is noted in this and previous reports that the group accepted with reservations constituted over 20 per cent of the applicants in the mid and latter war years as compared to 7 per cent or less in pre-war, which is probably accounted for at least to some extent by the fact that older persons and those not medically fit for the Armed Forces were applying for positions during the war.) The remaining 844 or 75.83 per cent were considered suitable for employment, without reservations as far as chest x-ray was concerned.

*Table No. 40, Page 90

Two thousand, seven hundred and twenty-six (2,726) patient admissions were examined radiologically. Of this number 16 or 0.6 per cent were found to have Active Pulmonary Tuberculosis and were therefore recommended for transfer to the Tuberculosis Unit, and 11 or 0.4 per cent were recommended for isolation and further investigation in their respective hospitals (in those where Chest Observation Wards still remained, otherwise transferred to T.B. Unit for investigation) because of Questionably Active or Suspect Tuberculosis. Also 34 or 1.3 per cent were recommended for isolation because of pneumonia of unknown etiology (not suspected of tuberculosis) on their routine admission films. In addition 456 or 16.7 per cent were placed on Casual Observation because of abnormal chest x-ray markings, possibly but not necessarily tuberculous in nature. The remaining 2,209 or 81.0 per cent had normal films.

The following table indicates the status of tuberculous patients in all Ontario Hospitals as at March 31, 1945:—

	MALE	FEMALE	TOTAL
Number Under Treatment (or investigation) in Tuberculosis Unit at Woodstock.....	321	264	585
Number Under Isolation for Active Disease at the Various Ontario Hospitals, Awaiting Transfer to the Tuberculosis Unit.....
Number Under Segregation for Further Investigation at the Various Ontario Hospitals—Actually Only 2 Hospitals Remaining With Chest Observation Wards (questionably Active or Suspect Tuberculosis).....	17	5	22

A word of explanation appears necessary here as there is some apparent conflict between the above Table and the large Table "Report of Work by Ontario Hospitals Chest Clinic," in that the column "Number of cases advised for investigation, staff merely repeat x-rays, patients segregated while investigated" in the large Table indicates the patient total as 1,664—which includes not only Questionably Active and Suspect Tuberculosis, but also those with abnormal x-ray markings, whether tuberculosis arrested, probably arrested, etc., and recommended for Casual Observation while on the general wards; whereas the small Table above shows only those isolated because of Questionably Active or Suspect Tuberculosis.

A further subdivision of the patients under treatment in the Tuberculosis Unit is presented in the following Table which indicates the classification with reference to tuberculosis at the end of the fiscal year. These figures change frequently as a result of the recheck examinations but the table is of interest in showing an approximation in the tuberculous status of patients in residence in the Tuberculosis Unit. It should be mentioned that patients who are classified as having "quiescent" tuberculosis are on part-time exercise, and those classified as having "probably arrested" disease are for the most part on full exercise, and depending on their next examination, their classification may be altered; if improved they will be classed as having "arrested" tuberculosis. The "arrested" group have been on exercise for at least 6 months without showing any radiological changes. It is from this "arrested" group that patients are selected for transfer out of the Tuberculosis Unit, either to return to the various Ontario Hospitals, or if their mental condition warrants, to be placed on probation. It should also be mentioned that patients whose tuberculosis is classified as other than "arrested" and whose mental condition has improved sufficiently are transferred to a Sanatorium for further treatment of their chest disease.

	ACTIVE	SUSPECT AND ACT. QUEST.	QUIESC.	PROB. ARRIESTED	ARRIESTED	NON- PULMONARY	TOTALS
Male	77	28	51	70	94	1	321
Female	100	30	52	42	37	3	264
Total	177	58	103	112	131	4	585

NOTE: Table G of the Tuberculous Unit Annual Report gives information similar to the above and is further subdivided for age groups and extent of disease.

In cases of Ontario Hospital employees who develop tuberculosis, this Clinic performs or arranges for re-examinations during their convalescence following discharge from Sanatoria and after their return to duty. The Clinic also performs artificial pneumothorax refills upon Ontario Hospital employees discharged from Sanatoria who require such treatments and who live within reasonable distance. There is close co-operation between the Division of Tuberculosis Prevention and this Clinic with regard to "post-sanatorium care" of members of Ontario Hospital staff discharged from Sanatoria.

The conducting of Surveys has been continued as described for the previous fiscal years and on approximately the same scale, with Dr. Lois E. Kent very ably continuing the duties of Travelling Chest Clinician.

The continued assistance and co-operation of the Superintendents and Staffs of the various Ontario Hospitals, has been of great help in the completion of this work. Moreover the members of the Chest Consultant Board, Dr. J. T. Phair, Dr. G. C. Brink, Dr. A. R. Riddell and Dr. K. M. Shorey have continued to take a very active interest in this Service, for which we are grateful, and we herewith express our appreciation of their help.

DIVISION OF PSYCHIATRIC RESEARCH

The Director of the Division, L. S. Penrose, M.D. has this year accepted an appointment to the Galton Chair of Eugenics at the University of London, England.

Four reports were prepared and issued by this Division as listed below.

1. Some Observations in Cardiovascular Changes immediately following Electro-shock Convulsions. March 1945.
2. Deaths after Shock Therapy with special reference to Tuberculosis. May 1945.
3. Mental Illness in Husband and Wife. A study of Ontario Hospital Data. June 1945.
4. Survey of Cases of Familial Mental Illness. July 1945.

ONTARIO HOSPITAL POPULATION STATISTICS ANNUAL REVIEW - 1945

C. ROGER MYERS, Acting Medical Statistician

The general trend in the Ontario hospital population figures can be seen by examining Tables I to XII in this section. These tables summarize some of the information given in the detailed statistical tables.

Again in 1945, as in 1944, both the number of patients in residence and the number of patients on the books have shown only a small increase over the previous year. The rate per 100,000 population has continued to fall until this year it stands at the 1938 level. (Table I.)

A decrease in both the number of patients on probation and the number in boarding homes is again noticed in 1945. (Table II.)

Table III shows the age distribution of the general provincial population and the Ontario hospital resident population for each sex in five-year age groups. As in previous years, the male rate in Ontario hospitals is higher in the age groups up to 45 years, and the female rate is higher in all age groups over 45 years. In 1945 the over-all rate per 1,000 for the male population was 3.71, as compared with a rate for females of 3.82.

Table IV shows the number and rate of first admissions for each sex by age group. Except at the extremes of the age distribution, the rates of first admissions are higher for females than for males.

In Table V, the rates for first admission and for resident population by age group are given for both sexes combined. In both cases, rates increase with increasing age. In the case of first admissions, there is a sharp rise in rate after age 70. In the case of resident population, there is some tapering off in rate after age 70 due to relatively high death rates.

The diagnostic composition of the resident population is given in Table VI with rates for each year since 1940. There has been a steady increase in rate for both senile and cerebral arteriosclerosis psychoses with a corresponding decrease in rates for other types.

A similar trend is to be observed in Table VII which gives the rates of first admission by diagnosis for each year since 1931.

Discharge and death rates for each Ontario hospital, based on total admissions and total treated, are given in Table VIII. Individual differences between hospitals are, of course, related to the type of patient treated. However, a somewhat more favourable general picture is shown this year than last. As shown in the last two lines of the table, the discharge rates are higher and the death rates considerably lower than for the previous year.

The number of patients discharged as recovered has shown an increase over the past four years. The figures were 607 in 1942, 641 in 1943, 577 in 1944 and 687 in 1945. The rates per 100 admitted and per 1,000 treated have risen accordingly. Detailed figures and rates by hospital are given in Table IX.

Discharge and death rates for certain selected psychoses are shown in Table X. As is to be expected, senile psychoses show the lowest discharge rates and the highest death rates. At the opposite extreme, the manic depressive group shows the highest discharge rates and the lowest death rate per 100 admissions.

Table XI shows discharge and death rates by age groups. The highest discharge and lowest death rates are shown by the age group 15-24.

The recorded causes of death for patients in Ontario hospitals are shown in Table XII. The over-all rate of 49.6 deaths per 1,000 patients treated compares favourably with the rate of 61.5 reported for 1944. Deaths attributed to diseases of the heart have shown a relative increase, and deaths attributed to pneumonia and bronchitis have shown a relative decrease as compared to the previous year.

1946

Parliament Buildings,

Toronto, July 24, 1946

TO THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to transmit to Your Honour the Seventy-sixth Annual Report on the Hospitals and Sanatoria of the Province of Ontario, for the year which ended December 31, 1945.

Respectfully submitted,

R. P. VIVIAN, M.D.,

Minister of Health

Parliament Buildings,

Toronto, July 24, 1946

THE HONOURABLE R. P. VIVIAN, M.D.,

Minister of Health

SIR:

I have the honour to submit to you the Seventy-sixth Annual Report on the Hospitals and Sanatoria of the Province of Ontario, for the year which ended December 31, 1945.

I have the honour to be, sir,

Your obedient servant,

C. J. TELFER,

Inspector of Hospitals

FOREWORD

Herein is presented a detailed report on General, Red Cross, Convalescent Hospitals, Hospitals for Incurables and Sanatoria for Consumptives, operating in the Province of Ontario, as compiled from the Financial and Statistical Statement submitted for the year which ended December 31, 1945.

There were 170 institutions in operation and participating in Provincial grants during the year. These are classified as follows:

118 General Hospitals	3 Convalescent Hospitals
25 Red Cross Hospitals	2 Convalescent Summer Camps for Children
9 Hospitals for Incurables	13 Sanatoria for Consumptives

The number of patients, together with the number of days' treatment (excluding Sanatoria for Consumptives) is indicated on the opposite page. There was an increase in the number of patients treated of 29,914 over the previous year, and an increase of 255,718 days' treatment. The average number of patients in hospital daily was 15,481, or 843 more than the previous year.

Total costs increased over the previous year by.....	\$2,738,014.83
Total revenue increased over the previous year by.....	2,606,149.10
<hr/>	
Excess of cost increase over revenue increase.....	\$ 131,865.73
<hr/>	

The following revenue increases and decreases are noted:

From patients, increased.....	\$2,733,919.08
From municipalities (statutory), increased.....	295,283.38
From Provincial Government (statutory), decreased.....	105,528.06
From investments, increased.....	11,862.25
From donations, decreased.....	328,792.14
From municipalities for capital account, decreased.....	595.41
<hr/>	
Net increase.....	\$2,606,149.10

During the year four new general hospitals were established, namely Arnprior and District Memorial; St. Joseph's, Little Current; St. Joseph's, Sarnia, and West Lincoln Memorial, Grimsby; also one Hospital for Incurables, namely Runnymede Hospital, St. John's Road and Runnymede Avenue, Toronto.

On pages 30 and 31 of this report will be found information concerning the private hospitals licensed during the year under report.

C. J. TELFER,

Inspector of Hospitals

TO THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present the Annual Report upon the Prisons and Reformatories of the Province of Ontario for the year ending 31st March, 1945.

Respectfully submitted,

G. H. DUNBAR,

Provincial Secretary

HONOURABLE G. H. DUNBAR,
Provincial Secretary of Ontario.

SIR:

Now that the war is ended it is timely in reporting on the Prisons and Reformatories, not only to report concerning the past fiscal year, but to review the important facts concerning crime and prisoners. It is important to keep the facts in proper perspective, to know the ways and means to correct crime and prisoners. Then by taking inventory of our present means we know what are still needed in the three distinct phases: (1) Prevention, (2) Institutional Care, (3) Rehabilitation.

The Training Schools Report already submitted to you gives facts and statistics concerning the juvenile problem and juveniles sent to such schools.

The following table shows the commitments to prisons and the number sentenced during many years past.

YEAR ENDING SEPTEMBER 30TH	APPROXIMATE POPULATION OF ONTARIO	PERSONS COMMITTED FOR TRIAL	PERSONS SENTENCED TO PRISON
1913	2,767,000	19,250	11,897
1914	2,770,000	22,777	14,801
1915	2,788,000	20,337	12,663
1916	2,728,000	16,100	9,364
1917	2,750,000	12,445	7,867
1918	2,769,000	13,242	7,874
1919	2,821,000	13,096	7,904
1920	2,849,000	14,756	8,643
1921	2,934,000	16,800	9,790
1922	3,101,000	14,800	9,312
1923	3,035,000	13,995	8,036
1924	3,075,000	15,879	8,834
1925	3,115,000	18,023	11,306
1926	3,151,000	18,033	11,371
1927	3,176,000	20,578	13,927
1928	3,241,000	23,786	16,358
1929	3,285,000	25,980	17,626
1930	3,366,000	29,126	21,421
1931	3,432,000	26,358	18,127
1932	3,479,000	25,235	15,804
1933	3,510,000	22,484	14,538
1934	3,540,000	20,916	13,509
YEAR ENDING MARCH 31, 1936	3,690,000	24,053	16,356
1937	3,711,000	27,592	20,618
1938	3,731,000	30,345	23,649
1939	3,750,000	34,914	27,926
1940	3,755,000	33,075	26,543
1941	3,757,000	30,875	25,627
1942	3,760,000	27,225	19,652
1943	3,790,000	25,411	18,551
1944	3,800,000	25,975	19,159
1945	3,815,000	26,299	19,132

NOTE.—The fiscal year was changed in 1935 to end March 31.

The wide fluctuations in the numbers committed and sentenced naturally induces enquiry and speculation concerning the causes. The drastic reduction during the First Great War was caused by scarcity of man power for general

purposes in the national economy and for the armed services. Daily during most of that war petty offenders were taken direct from the police courts to enlistment in the Army either voluntarily to obtain acquittal or by conscription. The types that usually are brought to police courts were needed in labour battalions and elsewhere. Also great numbers were taken direct from prisons and reformatories.

The revolt of youth from parental authority which occurred following that war synchronized with an era of economic prosperity. That resulted in the great increase in the number of prisoners which continued until 1930. Then during the worst of the Great Depression another drastic reduction occurred. Children and youths spent more time at home because there was less, much less money in the family purses. When family finances improved again they spent less time there, became freer from parental discipline, and the number of prisoners again increased, reaching an all-time peak. Then came the Second Great War. Gradually man power became scarcer and again there was a reduction. Many of the types who may get into prison enlisted, and some of them won honour in the armed services. But the physical and mental standards for the services were higher for this war than in the previous one. Labour battalions were not formed; and the authorities, having learned by experience, were not eager to enlist the prison types. Therefore the reduction in the number of prisoners in proportion to total population was not as great as in the First Great War.

During the past year 26,299 were committed to prison and 19,132 were sentenced, an increase of 324 commitments and a reduction of 27 in sentences from the previous year. (It should be noted that there were not that many different persons committed and sentenced. Some receiving short sentences such as "drunk and disorderly" repeated several times during the year.)

The truth is very evident of the oft repeated statement that lack of parental control, training and responsibility is one of the main causes of delinquency and crime. When there is this failure and to the extent it is not repaired by the parents, then corresponding action must be taken by others if crime is to be reduced. This can be by individuals, organizations and the State properly correlating their work. It needs to extend through the fields of prevention, institutional care and re-establishment. Much has been said and written to good purpose in recent years concerning the causes of delinquency and some things have been done to prevent and remedy. But much is still to be done to steer youthful activities to healthy activities, physically, morally and mentally.

When and where delinquency does occur it is of the utmost importance to detect it in its incipient stage and then really do something about it. At this point school teachers, parents, social service organizations and probation officials working together can achieve real results. It is a critical spot in the child's life, either turning to the right or leading to a life of crime. Quite rightly, probation has been emphasized and urged as a useful means of correction. It has been and is a potent factor when wisely used. Not so much has been said about its unwise use.

The official files of this Department show that many of our present prisoners, who have lengthy criminal records, on the first appearance in court were placed on probation or suspended sentence. When the child or youth is charged in court for the first time and the court is convinced that the expressed repentance of the offender is sincere, it is the natural and right course to use probation. Then comes the parting of the ways. The probationer is made to realize the serious facts and is influenced and directed to proper activities and trained in good habits by the parents, probation officers and others—or the probationer is not brought to that realization and is not so influenced, directed and trained. In the latter case there is failure. The probationer repeats the delinquency or crime. Parents who have failed are rather likely to fail again unless they are sufficiently strengthened and helped by probation officers and others who are capable. Very often that support and help are non-existent. In much of this Province there are no regular probation officers, and where they are their time and energies are spread over too many cases. Where they are not available the police and others have this added duty thrust on them, and all credit should be given to them for the measure of success they achieve.

Probation without proper supervision is dangerous. Too frequently it is worse. Our files show cases where the juvenile delinquent was placed on probation the second, third, fourth or subsequent time. No wonder there has been failure. Probation misused in that manner is a potent factor in making criminals. It develops in the recipient a contempt and disdain for law and order.

Akin to the abuse of probation is the practice of suspending sentences without a proper follow-through. Generally there is no follow-through. Delinquents and criminals are well aware of that fact. The chance that they will be brought back and sentenced for breach of recognizance or the offence on which sentence was suspended is so small that they boldly ignore it and pursue their way. Some of them actually regard it as closely related to acquittal. The result does not increase their respect for those who administer justice or their respect for law and order.

Something should be said concerning short sentences and their effect on the recipients. The 26,299 committed to the gaols last year spent an average time of 15½ days there. That includes the time spent there by the 4,348 who were transferred to reformatories, etc., and the 399 who were sent to the penitentiaries. During the past year 19,132 prisoners were sentenced. Of these, 2,569 were given suspended sentences; 6,258 sentences less than 30 days; 3,665 sentences of 30 days or more but less than 60 days; 1,630 sentences of 60 days or more but less than 90 days, and 1,551 were given sentences of three months. Thus, of the total 19,132 sentenced, 15,673 were given suspended sentences or sentences not exceeding three months.

A sentence of any kind sometimes has a sobering effect or may be a mental shock to the extent that it causes the prisoner to do some real thinking, perhaps for the first time in his life. To the extent that such is the result, the effect is highly desirable. However, gaol officials know that such is not the effect on very many and mentally they just shrug off the short stay in

gaol as a mere episode of no great consequence in their lives. Sometimes courts have little choice because of statutory limitations and lack of the necessary supervision if they place them on probation or suspended sentence. In such cases they cannot more accurately make the punishment fit the offender. Nor can the gaol officials properly correct the offender in such a short time. The legislators might legalize some short drastic punishment effective in some cases, but experience has taught that it takes considerable time to properly correct. Because of that knowledge commitments to Borstal schools in England (for youths 16 to 23 years) cannot be less than two years. Only rarely are sentences of that length given to youths in Ontario to be served in our reformatories (see statistical tables attached). The average time spent by prisoners in the Ontario Reformatory, Guelph, last year was about six months. Seventy per cent of them had previous convictions. There was an even higher rate of recidivism of those sent to Mimico and Burwash.

Surely the cure lies in properly overhauling the statutes with particular reference to penalties, setting up a complete probation system, and then suitable commitments to suitable correctional institutions for those who should be sent there.

In the institutional phase of correction, permanent staff, buildings, land and equipment are absolute necessities. If the desired results are to be achieved the staffs must be trained and experienced for particular work and responsibility. That means that each must have the requisite characteristics mentally, morally and physically—plus suitable education—plus sufficient and the right kind of experience. There are plenty of disappointments in correctional work, and so those engaged in it must be able to rise above those disappointments and not become cynical and not quit. Early in the war we lost some of our institutions that were important parts of our work. That made the difficult work more difficult. Enlistments depleted experienced staff, others went to more remunerative work. As the war progressed replacements became scarcer and those engaged were inexperienced and frequently unsuitable. I earnestly and gratefully give tribute to the experienced officers, and others less experienced but willing, who have carried the load in these difficult times. They have had to endure criticisms, sometimes from unexpected sources, and we believe without knowledge or appreciation of all the facts. For the staffs this past year has been the most anxious and difficult one since the end of the First Great War. As this is being written, the staff situation is beginning to improve. The inauguration of the 48-hour week for custodial officers is greatly increasing the number of officers appointed, and it will take some years for them to gain the necessary experience. A training school for carefully selected new officers, with suitable curriculum, combining theory and practice, well administered, would raise the standard of our institutional work.

If it is to be properly done, there must be suitable buildings, reasonably safe custodially and from fire hazard for the type of persons placed there, easy to maintain proper sanitation and good health, classrooms for academic and vocational training, repair and manufacturing shops, adequate power and heating units, modern equipment for all of them, suitable acreage for agricultural and other purposes. In our Ontario climate agricultural work

alone cannot provide enough work for prisoners and must be supplemented with other useful work, especially in the winter months when frequently the institution population reaches its annual peak.

Each institution obviously must be designed to fulfil its proper part in the whole carefully considered plan. Earlier in this report reference has been made to the large numbers of prisoners who serve their sentences in the gaols. Those gaols during the history of the Province served useful purposes and were suitable for past conditions. The advent of modern transportation has altered the situation. It is now as easy to take prisoners across several counties to a place of confinement as it was across part of one county in the early days. Transportation has also made easy the passage to and fro of dangerous criminals. These gaols were not designed to cope with these modern criminals. They were not designed to provide suitable work. Lack of useful work has been one of the curses of prisons through the past ages. Modern, humane thought has required comfortable living conditions, and this has lessened the punishment for some. Proper classification in each is difficult.

As a result of the survey you had made, you already have announced your intention to commence replacing them by a smaller number of district industrial farms. It is the sincere wish of many that this reform will be accelerated. When established they will take care of remand and many short-sentence prisoners, chiefly from their own districts. Other classes and types of prisoners will go to other institutions, such as the Ontario Reformatory, Guelph, the Industrial Farm, Burwash, the Ontario Reformatory, Mimico, and the Andrew Mercer Reformatory.

Most of these specialized institutions have buildings and equipment which are a credit to this Province. But they need additions and other equipment if they are to obtain all the results expected and required.

All this institutional program will involve very considerable expenditure, but will effect the modernization of the whole system, and in constructing it can provide much useful work and instruction for prisoners.

This correctional work is a salvaging process; salvaging, as far as possible, damaged human beings. Some require only one process, others two, three or more. That is well stated in the attached report of the Superintendent of the Ontario Reformatory, Guelph. There is a considerable residue. Generally the correctional influences started too late and their weaknesses too great to repair. Special institutions must take care of them, where they can live and work under necessary direction and thus derive some satisfaction and reward from their endeavours. To the extent they are kept there, they can be protected from their weaknesses and other citizens be protected from them.

It has often been truly said that a prisoner's worst punishment occurs after he is no longer a prisoner. He is free, but he has to face and live among honest citizens. Many of these citizens are sympathetic and helpful, but others are not. Many ex-prisoners have the courage and determination to live down their past. Many others find the going rough, and fail again. There is a great need in this country for organized societies to aid ex-prisoners.

There have been and are very few. There have been many in England, and therein is much of the success of England's prison and Borstal systems. To a considerable extent they are financed by government grants.

Prevention, probation, institutional care for those who need it, and re-establishment are each very, very important parts of any carefully considered plan of crime reduction. If any of these parts is inadequate, the others are overloaded and then failure is the result. It is very apparent that thus our correctional institutions have been overloaded, handicapped, and then too much expected and demanded of them. Redistribution of the present load on them is long overdue. .

Turning to the statistics concerning the offences for which prisoners were committed, it should be stated that there are always variations in the various categories from year to year. The most startling change last year was the great increase in the number of persons committed for murder—1945, 32; 1944, 8; 1943, 16; 1942, 15. Those committed for crimes against the person increased from 1,024 to 1,145 from 1944. Otherwise there were no changes of real significance.

It has been apparent that more frequent inspection of the gaols has been advisable, and therefore during the year inspections were often repeated. These should be further increased.

The fear that there would be a large increase in crime following the close of the war has been often expressed recently. There was no large increase until five years after the close of the First Great War. The great increase that then followed was because youth got out of control. If a large increase occurs following the end of this war, it will no doubt be for the same reason. The line that prevention should take is therefore self-apparent. There is little cause to fear that much crime will be committed by those discharged from the armed services. Almost always when crime has been committed by an ex-service man following the other war or so far after this war, it is found that he had a previous record of crime or delinquency. Ex-service men have been trained in obedience to law and order, are generally of a splendid type and are not likely to offend.

Properly controlling and training the growing youth is the important problem. It is to be fervently hoped that other authorities who have responsibility therein will take appropriate action. It is just as urgent that this Department will be provided the authority and means to properly gather the personnel, buildings, equipment and facilities necessary for the phase for which we are responsible.

We here record our grateful appreciation of co-operation and assistance from officials of many other Departments, many religious and other organizations which have laboured in the institutions, and employers and others who have helped discharged prisoners and those going on parole to suitable employment.

C. F. NEELANDS,

Deputy Provincial Secretary

REFORMATORIES

THE ONTARIO REFORMATORY, GUELPH

DEAR SIR:

The attached statistical report of the Ontario Reformatory, Guelph, covers the fiscal year ending March 31, 1945.

1,781 were committed during the year, which is a decrease of 558 commitments below the preceding year. The total number in custody during the year was 2,810. Our average daily population for the year was 816.2, which is an increase over the preceding year of 14.4 inmates daily. This definitely shows the effect of the loss of our releases through war purpose tickets-of-leave.

833 admissions were under the age of 21 years. This is 49 of a decrease in this age group (14-20 years) below the preceding year. There were 83 less admissions in the age group below 19 years than in the previous year, and fortunately none in the 14-year-old class.

Of the 1,781 admittances, it is noted that:

534 or 29.99% are first offenders,
332 or 18.65% " second "
216 or 12.13% " third "
699 or 39.23% have more than three previous convictions registered against them.

Sixty-three per cent of our more-than-third offenders are over 21 years of age. This means that this class is comprised to a great extent of alcoholics, one of whom has been admitted sixteen times. These men are given a new committal number each time they are admitted, and some of them have at least four admittances in a year, which together with their long records lowers our general statistics

895 of the total commitments were 21 years of age or under. Of these—

295 or 32.96% were first offenders,
186 or 20.78% " second "
156 or 17.43% " third "
258 or 28.83% had more than three previous convictions.

Of the 186 second offenders—

64 had previously been placed on probation,
55 had served suspended sentences,
22 had been placed in training schools,
21 had served gaol sentences,
15 had previously been in a reformatory,
9 had previously paid fines.

160 of the 895 (17.87% per cent) had previously been in boys' training schools, and 221 or 24.7 per cent had served a term or terms in this institution. Of these 221 recidivists to our own institution, a total of 66 or 29.86 per cent had previously been in a training school.

We can divide these 221 Ontario Reformatory, Guelph, recidivists into three groups:

- | | | | | | | | | | |
|----|-----|-----|-----|------|----|--------|-------|-------------|-------------|
| A. | 169 | who | had | been | in | Guelph | once | previously, | |
| B. | 47 | " | " | " | " | " | twice | previously, | |
| C. | 5 | " | " | " | " | " | three | times | previously. |

Dealing with each of these groups individually, and omitting the previous Guelph committal or committals, we find: in the 169 of *Group "A"*:

- | | | | | | | |
|----|-----|-------|----------|--------------|----------|-------------|
| 36 | had | no | previous | convictions, | | |
| 57 | " | one | " | conviction, | | |
| 44 | " | two | " | convictions, | | |
| 14 | " | three | " | " | | |
| 7 | " | four | " | " | | |
| 5 | " | five | " | " | | |
| 3 | " | six | " | " | | |
| 1 | " | nine | " | " | | |
| 2 | " | ten | or | more | previous | convictions |

In the 47 of *Group "B"*:

- | | | | | |
|----|-----|-------|----------|--------------|
| 4 | had | no | previous | convictions, |
| 18 | " | one | " | conviction, |
| 11 | " | two | " | convictions, |
| 10 | " | three | " | " |
| 1 | " | four | " | " |
| 3 | " | five | " | " |

In the 5 of *Group "C"*:

- | | | | | |
|---|-----|-------|----------|--------------|
| 1 | had | one | previous | conviction, |
| 2 | " | two | " | convictions, |
| 1 | " | three | " | " |
| 1 | " | four | " | " |

To me these figures are very illuminating, as they prove that over 80 per cent of these recidivists had convictions registered against them before coming to this reformatory. One might notice the ratio of first offenders appearing in the recidivists—36 : 4 : 0. One might also notice the falling ratio of 169 : 47 : 5 of return for treatment once, twice, or three times. Some of our critics would have us believe that very few of those ever sent here are reformed, but I am quite sure you and I would be the first to worry if the results were as bad as they are sometimes painted.

One could justifiably claim that we have a 75 per cent ratio of success, as a similar method is used by the institutions of the Borstal system to claim their successes.

Intelligence tests were given to all inmates serving over three months' sentences, with the exception of B.L.C.A. offenders. An analysis of the results of these intelligence tests showed:

10.13%	were	mental defectives,
14.04%	"	borderline,
32.79%	"	dull normal,
40.85%	"	normal,
2.19%	"	of superior intelligence.

These figures may vary a couple of percentage points in a different class each year, but they are consistently constant.

Educational tests were only given to those above borderline intelligence. These educational tests showed that:

5.26%	had an educational score equal	to their own claim,
2.80%	" " " " superior	" " " "
91.94%	" " " " inferior	" " " "

While 422 inmates claimed to have entrance standing or better, actually only 88 had this standing by actual test. 62.8% of those tested fell below Grade VI in educational standing. Educational ability is not one of the characteristics of the reformatory inmate, which is explained by lack of interest while at school and truancy.

The school had a successful year. Eleven candidates wrote their Entrance examinations and eleven passed, seven with honours. Good progress was made with the junior and illiterate classes. The night vocational classes functioned as usual.

The library books at the end of the year number 6,821 volumes. 2,234 volumes were received from thirteen different Ontario cities, to whom we are greatly indebted.

Physical training classes were held five nights a week, with an inmate orchestra furnishing music for the exercises. Boxing bouts and basketball were the winter sports, and softball games were enjoyed during the summer. Outside teams competed on many occasions with our inmate teams in softball and basketball.

EDUCATION AND INSTRUCTION

SUMMARY OF ATTENDANCE—Months September to June Inclusive

	ACTUAL ATTENDANCE (DAYS)	PERFECT ATTENDANCE (DAYS)	AVERAGE ATTENDANCE	PERCENTAGE ATTENDANCE
Grade X.....	254	254	1.23	100.00
Grade IX.....	1,229	1,245	5.94	98.71
Grade VIII.....	1,886	1,903	9.11	99.11
Intermediate.....	3,056	3,078	14.76	99.32
Illiterate.....	1,772	1,785	8.56	99.27
TOTALS.....	8,197	8,265	39.60	99.18

8,197 (pupil days') instruction were given in our school for the school year 1944-45, to an average attendance of 39.60 pupils, with a percentage attendance of 99.18 per cent.

Night School Division

	ACTUAL ATTEND- ANCE (DAYS)	PERFECT ATTEND- ANCE (DAYS)	AVERAGE ATTEND- ANCE	NUMBER OF CLASSES	NUMBER RECEIVING INSTRUC- TIONS
Shorthand and Typing..	446	513	9.10	49	40
Bookkeeping.....	137	170	5.57	21	32
Tailoring.....	162	196	4.63	35	10
Barbering.....	321	345	4.22	76	17
General Review.....	118	131	3.03	39	14
Study.....	877	980	9.04	97	40
Electricity.....	252	293	6.81	37	33
Laundry and Dry Cleaning..	160	174	6.67	24	18
TOTALS.....	2,473	2,802	6.54	378	204

2,473 (pupil days') instruction were given in the night school for the year 1944-45, to an average attendance of 6.54 pupils. 378 classes were held and 204 inmates took all or part of this instruction. The attendance was 88.26 per cent of perfect attendance possible.

One could say then that 204 inmates out of an average population of 845 showed some interest in our night school. But, when one figures the total actual average attendance for the several courses, one finds that only 50 were always present, which again brings that figure of 17 per cent, which I have quoted to you on several occasions as being the true picture of those actually interested in bettering themselves by volunteer action.

There are *eight officers* concerned who give of their time to put over our night educational program, and often I think they bear up well under the disappointment of inmates' lack of interest. The fact that there are always two or three in each class who do well seems to be the saving grace, for these officers.

There are *three officers* concerned with the physical training program. The physical training classes are compulsory and reach approximately two-thirds of our population in the competent age groups. The boxing and games classes are drawn from these classes.

The orchestra set-up has *two officers*. These two classes have about 35 interested inmates, and while sometimes the noise is rather excruciating they do field a good orchestra of about twelve to fifteen pieces, which plays at all picture shows and other entertainment.

In the actual work operations around the institution a great many officers have to teach the inmates a working knowledge of what they are doing. These might be listed as follows:

NAME OF DIVISION	WORK TAUGHT	INMATES EM- PLOYED	OFFICERS INSTRUCT- ING
The Cannery.....	Preserving fruit and vegetables and making jams and marmalades.	15-100	2
The Abattoir.....	Slaughtering, pickling and smoking meats, and manufacturing pickles. Shipping clerk.	30	4
The Planing Mill.....	Manufacture of furniture, carpentry and repair work.	20	2

NAME OF DIVISION	WORK TAUGHT	INMATES EMPLOYED	OFFICERS INSTRUCTING
Tailor Shop	Manufacture of 140 different clothing articles, including suits. Manufacture of mattresses.	35-45	3
Tin Shop	Sheet-metal work of all types.	8	1
Machine Shop and Welding	Fabricating metal into grilles, steel cabinets, etc. Manufacture of beds and monel metal plates, bowls and cups.	7-30	2
Woollen Mill	Manufacture of blankets and cloth and socks.	30	2
Marker Plant	Manufacture of motor markers. Operation of presses, coaters, etc.	20-25	3
Upholstery	Upholstering furniture, new and repair work.	1-3	1
Power House	Firing boilers and general care of plant. Moving coal.	25	4
Electrician	Upkeep of system.	3	1
Bricklaying, Cement Work and Tile Setting	Upkeep of system.	5-15	1
Plumbing	Upkeep of system.	3	1
Horse Barn	Teamsters and care of horses. Proper use of farm implements.	25	2
Blacksmith	Horseshoeing. Repair of implements. Manufacture of parts.	3	1
Dairy	Care of dairy cows. Feeding, cleaning, milking and care of milk.	30	3
Piggery	Raising and care; feeding of pigs.	8	1
Farming	All general farming operations.	40	3
Greenhouse	Care of plants; raising garden produce in hotbeds, and flowers.	15-20	2
Garden and Lawns	Raising garden produce. Care of lawns and flower beds.	30-40	3
Kitchen	Cooking and preparing food, baking bread and cutting meat.	60-70	4
Laundry	Washing, ironing, cleaning suits and pressing. Shoe repair.	35-40	2
Stores	Care of all incoming and outgoing merchandise.	7	2
Clerks	Stenographers and clerkships to cover all inmate posts.	15	6
Main Work Gang	On land—reclamation.	150-200	3
Painters	Spray painting in shops. Upkeep painting of plant.	15-20	1

Thus 73 officers are definitely handing out instructions in different lines of work, while every officer in the place is giving advice at times on conduct and deportment.

The general health of the inmates was good. 28,399 attendances were made on sick parade during the year, while 5,550 days were spent in hospital by 1,084 inmates. 22 major and 14 minor operations were performed successfully in St. Joseph's Hospital, Guelph. No deaths occurred during the year. The dental clinic gave 1,682 treatments on 1,326 patients. 78 X-ray examinations were made by St. Joseph's Hospital for our inmates. 6 patients were mentally ill and were transferred to Ontario Hospitals for treatments. 84 inmates received treatments for syphilis during the year; a small number had two or more admissions during the year. Of these, 60 had positive bloods, 10 were doubtful, and 14 were treated because of a recent history. Lumbar puncture was performed on 18luetics; 12 had negative fluids, 1 was doubtful.

and 5 positive. One of these was mentally ill and was transferred to a mental hospital. 35 inmates were admitted with gonorrhoea; 4 sulfonamide resistive cases—one of which had developed gonorrhoeal conjunctivitis—were treated by penicillin with dramatically successful results. Venereal disease is not a serious problem with our inmates. 1,281 blood donations were made to the Red Cross blood bank during the year.

13 escapes were made during the year; all were recaptured. Discipline was well maintained during the year, although our staff situation was still difficult.

All of our industrial departments operated throughout the year. The total industrial revenue was \$518,792.64, which is an increase of \$109,082.75 over the preceding year.

On our farm the crops were fairly good, and our recoveries amounted to \$62,332.62, which is a decrease of some \$3,113.43 below the previous year. 402 hogs and 4 sows were sold, with a return to us of \$12,316.02. Our milk production was 853,996 pounds, with a monetary return of \$20,989.29. The garden crops amounted to 1,114,867 pounds, with a monetary return of \$15,827.80, an increase over the previous year in value of \$5,683.86. The field crops had a value of \$9,723.45, which is a slight increase over the previous year of \$694.23.

We are very grateful to those, who during the year provided religious services, and especially to those who gave generously of their time for individual religious interviews. We are also grateful to those who furnished entertainment.

I wish to commend my staff to you for their conscientious and loyal service in these difficult times.

I wish to thank the Honourable Mr. Dunbar, yourself and your staff for assistance, courtesy and kindness extended to us throughout the year.

Yours very truly,

J. D. HEASLIP, M.D.,
Superintendent

INDUSTRIAL FARM, BURWASH

DEAR SIR:

Herewith is the statistical report of the Industrial Farm, Burwash, for the year ending March 31st, 1915.

Admissions during the year, 1,068; discharged, 1,025. Inmates remaining in custody at the end of the year, 718.

Nineteen inmates escaped custody. All were recaptured. One inmate who escaped in 1923 returned to custody.

Discipline was maintained throughout the year, and all members of the staff are to be commended for their close attention to routine duty.

It is with regret that I have to report the sudden death of Mr. W. Y. Stoddart, who was a highly esteemed member of the staff of this institution for over twenty years.

The general health of the inmates was very good. A thorough medical and dental examination is given all inmates when admitted, including blood tests and X-ray. Immediate hospitalization or segregation is carried out wherever necessary. Number of inmates admitted to hospital, 291. 18 major and 51 minor operations performed. Dental treatments, 1,158.

Visits to Burwash from the Blood Donors Travelling Clinic from the Sudbury Branch of the Canadian Red Cross Association resulted in 1,021 donations being made.

INSTRUCTIONAL WORK

OFFICERS	NUMBER	PERCENTAGE OF TIME INSTRUCTING
Engineers	6	100%
Electricians.....	1	100%
Plumbers.....	1	100%
Carpenters (Maintenance and Repair of Buildings. Building Construction)	4	100%
Farm Hands.....	5	100%
Dairy.....	3	100%
Painters.....	1	100%
Laundry.....	2	100%
Tailor Shop	2	100%
Cooks.....	3	100%
Sawmill and Planing Mill.....	3	100%
Blacksmith.....	1	100%
Garage.....	1	100%
Greenhouse and Root Houses.....	2	100%

OFFICERS	NUMBER	PERCENTAGE OF TIME INSTRUCTING
Stores.....	2	100%
Hospital Staff.....	4	100%
TOTAL.....	41	

All of the above officers devote their entire time to their special duties.

Fuel Wood Cutting.....	21	40%
Logging.....	6	40%
Clearing Land, Ditching, Grading and Assisting in Harvesting Operations.....	60%
TOTAL.....	27	

Logging operations during winter months produced 16,640 saw logs, 2,462 cedar fence posts.

Revenue derived from lumber and sawmill operations, \$17,384.18.

Revenue from tailor shop, \$18,031.42.

The land clearing program was continued. At Camp 1, 200 acres brushed and 50 acres stumped. At Camp 2, 40 acres cleared and ploughed, 10 acres brushed. At Camp 5, 30 acres cleared, ploughed and sown. 50 acres stumped ready for ploughing and 40 acres ploughed. Roughly 200 acres brushed ready for pasture.

Farming operations resulted in a fair potato crop. Grain and root crops good.

Structural alterations completed at Camp 1 barn have made a decided improvement.

Farm returns for the year, \$75,699.96.

Due to labour shortage a number of prisoners were employed on railway work adjacent to the Farm property.

The usual form of recreation was provided. Baseball games, field sports and concerts, inmates providing their own talent.

The services of all spiritual advisers conducting services at this institution is greatly appreciated, both by staff and inmates.

The assistance and consideration given this institution by the Honourable G. H. Dunbar is greatly appreciated. The help and understanding extended by you and the members of your staff benefitted greatly the various operations undertaken during the year.

Yours very truly,

W. L. McJANNET,

Superintendent

ONTARIO REFORMATORY, MIMICO

DEAR SIR:

Herewith is the statistical report for this institution covering the period May 1st, 1944, to March 31st, 1945. During the period July 1st, 1940, to April 30th, 1944, the main buildings and industrial plant were occupied by the Department of National Defence as an internment camp for German war prisoners. The farm and farm buildings were operated by the Department of Health under the supervision of the Ontario Hospital, New Toronto. During the month of April, 1944, the German war prisoners were removed to other camps, and on May 1st, 1944, the main buildings and industrial plant were formally returned to the Province of Ontario. The Department of Health immediately vacated the farm and farm buildings.

Mr. R. M. Harden, Mr. J. H. Masterson and myself were appointed to our former positions, together with a few officers from other institutions. Arrangements were made to receive inmates from the Toronto Gaol and steps taken to build up the necessary staff.

Considerable cleaning, renovating, repairing and repainting was required. This kept a large number of inmates busy most of the summer.

The general health of the inmates has been good since reopening the institution, there being no serious illness, no accidents, no deaths and no cases requiring hospital treatment. This is considered very good, as many men on admission are broken in health due to drinking bad substitutes for liquor. Good food, fresh air, work and rest do much to repair this. Our dental requirements have been taken care of by Dr. E. B. Sisley of New Toronto.

Discipline has been maintained. During the year there were two escapes, both being recaptured by the Toronto police and returned to this institution.

During the eleven months of operation our admissions totalled 1,217. Of these 904 or 74.2 per cent were for breaches of The Liquor Control Act, 122 or 10 per cent for theft, 80 or 6.6 per cent for fraud, robbery, etc., 23 or 1.9 per cent breaches of various wartime measures, 18 or 1.4 per cent crimes of violence, and 72 or 5 per cent miscellaneous offences of a minor nature.

Only taking over the farm in the early part of May, farming operations were late getting under way. Seeding was further delayed due to a rainy season. However, some crops were very good, our oats being of outstanding quality. All farming operations, gardening, care and feeding of livestock and teaming performed by inmates under the supervision of a farmer and officers. While this could in no way be considered a normal year, the following farm recoveries are interesting:

857 doz.	-	Eggs)	
150 only	=	Chickens)	Valued at \$532.43 at Institution prices.
56 only	-	Hogs		Valued at \$1,841.87
63,588 lbs.	-	Fruit and Vegetables		Valued at \$780.35 at Institution prices.
30,082 lbs.	-	Milk		Valued at \$905.77.

The nucleus of a Holstein dairy herd was obtained from the Ontario Reformatory, Guelph, and the Industrial Farm, Burwash; the former supplying 6 milch cows and 6 two-year-old heifers, and the latter 12 heifers rising two years. Milk is being sold to a local dairy, no pasteurization facilities being available.

Some hogs were secured from the Ontario Reformatory, Guelph, and the Ontario Hospital, Hamilton. In addition to building up some breeding stock we were able to sell 56 hogs, bringing in \$1,841.87 in revenue, including subsidies, many grading "A" when slaughtered.

During the summer, steps were taken to put the mill in order to produce agricultural and structural tile and bricks. Many difficulties were experienced due to the plant being old; being idle for four years much deterioration had set in. Production commenced early in September and the following were produced:

140,000	-	4" Agricultural Tile
12,000	-	6" Agricultural Tile
40,000	-	Structural Tile of various sizes
200,000	-	Bricks, common and tapestry

Production in the mill was slowed during the winter due to heavy snow and severe storms making it impossible to assure sufficient quantities of raw materials.

INSTRUCTIONAL WORK

Many of the inmates now being admitted are advanced in years, broken in health and, serving short terms, they have not the ability to learn much. As they are here such a short time it is not possible to furnish sufficient training or knowledge to become proficient in any skilled trade.

Industrial

1. *Open pit mining operations* are carried on, mining the clay and shale. Under a competent officer useful knowledge is given in drilling and blasting the raw material.

2. *The mill*, our most important industry, employs a large number of inmates in the various operations of grinding and mixing the clay and shale, manufacturing common and tapestry brick and structural and agricultural tile. Recently manufacturing operations were resumed on floor and wall tile. Unfortunately this plant is so old and worn out constant breakdowns do not permit instruction in mass production. A considerable effort has been made to secure a competent brickmaker to take charge of this plant, without success. A new brick and tile cutting machine has been ordered which, we hope, will help speed up production and make a better class of goods. However, instruction and much knowledge in manufacturing process is given.

3. Under a competent ceramic burner, useful knowledge and experience is given in setting kilns and burning the various products.

4. *Machine shop*. This shop is in charge of a competent machinist. Some useful knowledge and training is given in general machine shop work, including

repairs to equipment and dies and making dies. Better training would be given, if the various machines were replaced with more modern equipment.

Custodial

1. The *kitchen* employs a large number of inmates under a competent chef, who receive training in the preparation and cooking of food. Some inmates have been given sufficient training to take jobs as short-order cooks and as second cooks in lumber camps on release.

2. We usually have a reasonably skilled barber, able to instruct in the care of razors, sterilizing, haircutting, shaving, etc., under the supervision of an officer.

Clothing Repair Shop

We usually have a reasonably competent inmate tailor, able to instruct in repairing, cleaning and pressing clothing, either hand work or flatwork sewing machine. Usually we have an inmate shoe repairer, able to instruct in hand shoe repairing and stitching machine. These inmates work under the supervision of an inside officer.

Central Heating Plant

Under a competent stationary engineer inmates may secure enough training and experience to qualify for Fourth Class Engineer's Certificates. Training is also given in plumbing, steamfitting, electric wiring and maintenance. Previous to the war, a few inmates did secure Fourth Class Certificates on training received here.

I am hoping to secure the service of a carpenter guard, competent to read blueprints and take charge of carpentering and painting work. At present such repair work is performed by skilled inmates under the sergeant or a guard.

Much useful training has been given inmates by a guard skilled in brick-laying, including repairs to kilns and new construction.

Blacksmith

As it is very difficult to get blacksmith work done, such as horseshoeing, I am hoping to secure a guard who might be sufficiently skilled to take charge of such work and provide some training.

Farm

Much useful training is given in the various farm activities, such as hoe and grain crops; also in the care and feeding of hogs, cattle, chickens and horses. This training is given under the direction of our farmer, who is well qualified in many lines of farm work, particularly livestock.

* * *

We are very grateful to the Salvation Army and Rev. Father McGrath, who during the year provided religious services and spiritual guidance for our

inmates, and to the Salvation Army for providing movies and entertainment.

I wish to thank the Honourable Mr. Dunbar, yourself, and staff for many kindnesses and courtesies shown during the year.

I also wish to commend the staff of this institution for their loyalty and co-operation under the trying conditions of re-establishment during wartime.

Yours sincerely,

J. R. ELLIOTT,

Superintendent

MERCER REFORMATORY, TORONTO

DEAR SIR:

I have the honour to submit the annual report of the Andrew Mercer Reformatory, giving the statistics for the fiscal year ending March 31, 1945.

The reports of the various departments of the institution have been compiled and may give some idea of the more material aspect of the training given, but it would be impossible to mention all the methods used in helping the inmates, as they must be treated individually in the way considered likely to be most effective.

Of the total 282 admitted during the year, 104 were 'teen-age girls and, while there is a natural dislike to repressing the high spirits of youth, it was proved before their admission here that these girls must be given training under stricter supervision and discipline which, in most cases, was entirely lacking in their homes. Remembering this, it can be realized that effective training in these cases is possible only when they are here a sufficient length of time. Short terms can be of little value, and cause unrest and lack of incentive to the inmates to settle down to learn what would be of use to them in the community outside. Good results can be obtained where the term permits the learning of good habits in place of bad ones and the acquiring of skill at some particular occupation, with the moral uplift brought by the development of hitherto unimagined ability and usefulness. The aptitude of the inmates varies greatly, of course, and individual mentality must be taken into account in what is expected of them.

Employment has been provided in part by the industries of the institution. Our clothing factory is well equipped and well lighted and ventilated to allow of good work, and is in the charge of an instructress and a matron. Work is done for other institutions as well as for our own; 121,978 articles were made during the year. The work includes the cutting, sewing, pressing, folding, sorting, tying in bundles of dozens—garments: dresses, kimonoas, gowns, underwear, etc.; flatwork: sheets, towels, etc.

The matron in charge of the sewing room looks after the cutting and making of the inmates' uniform dresses and underclothing, baby clothes, rugs and curtains, etc., all for our own institution. She teaches inmates to sew, and to mend stockings and repair clothes and linen, etc.

The laundry is divided into three departments—wash-house, mangle room and ironing room, each in charge of a matron, who is responsible for the inmates' training and the work done in her particular section. Laundering is done for our own and other institutions, and the total number of pieces laundered during the year was 439,031. The work includes careful marking, sorting, listing, washing, starching, drying, pressing, ironing, checking and packing.

All meals for staff and inmates are prepared in one kitchen, supervised by a matron, who teaches the inmates the preparation and cooking of food. Before being cooked, the meat and vegetables are prepared elsewhere in the building, under the direction of a matron who has charge of refrigerated supplies. The two dining rooms for staff and inmates respectively are in the charge of one matron on each of the eight-hour shifts, and training is given in the serving of food and waiting on table. In each department the matron in charge supervises the cleaning of her section of the building.

Since the establishment here of the eight-hour day and six work days a week for the staff, seven matrons (with two extra, as relief) have supervision of the cleaning of the offices, halls, inmates' corridors, staff rooms, and they instruct the inmates in orderly and thorough cleaning—scrubbing, polishing and dusting. A matron has charge of the clothes room where, after they have been fumigated, inmates' own clothes are kept until required just before each inmate's release. They are then examined and fitted, altered if necessary, and pressed. Two matrons (and one extra, as relief) are on night duty and make hourly inspections, each time punching the clocks throughout the building.

The painting on the inside of the institution is done during the winter months by inmates under the direction of a matron who, in summer, supervises inmates in attending to the vegetable garden as instructed by our gardener.

The garden crop for the year was as follows: spinach, 450 lbs.; onions, 1,887 lbs.; lettuce, 325 lbs.; beets, 1,375 lbs.; carrots, 2,710 lbs.; celery, 900 lbs.; cabbages, 1,860 lbs.; peas, 250 lbs.; radishes, 350 lbs.; tomatoes, 1,000 lbs.; beans 625 lbs.; parsnips, 900 lbs.; corn, 1,990 lbs.; cauliflower, 120 lbs.; leeks, 150 lbs.; squash, 120 lbs.; vegetable marrow, 150 lbs.; eggplant, 200 lbs.; melons, 200 lbs.

There is daily recreation out-of-doors when the weather permits, and the health of the inmates was good throughout the year. On being admitted, each inmate is given a thorough physical examination with tests for venereal disease, including lumbar punctures when indicated. The treatment of venereal disease is a large and very important part of the medical work here. Intravenous and intramuscular injections for syphilis are given two to three times a week by the visiting medical officer, assisted by one of our three graduate nurses, whose duty hours rotate so that each takes her turn on night duty. The following is a statistical record of the year's work: blood tests, 504; lumbar punctures, 95; treatments—mapharsen, 1,666; bismuth, 1,151; bismarsen, 97; tryparsemide, 14; vaccinations, 36; sick parades, held twice daily, 1,108.

The dentist comes to the institution one half day per week. The total number of inmates who attended the clinic during the year was 646, and the dental services were: examination, 281; patients treated, 365; local anaesthetics, 361; extractions, 364; fillings, 162; treatments for pyorrhoea, 19; other treatments, 48; prophylaxis, 24; replacements, 13; dentures repaired, 3.

Tuition in our school is of great benefit to the illiterate and to those who have come from non-English-speaking countries. The library is an adjunct of the schoolroom, and the books are in eager demand by the inmates, who also enjoy very much the magazines which their friends are allowed to send direct from the news agent.

Of the 107 women released on parole, 22 were returned as parole violators. I have previously urged that those on parole should have strict supervision, as in many cases monthly reports are unreliable. The critical time for these women and girls is immediately after their release from the reformatory, and it is then, more than at any other period, that, with proper assistance, there is the greatest opportunity to advance the reformatory work.

I wish to thank the numerous clergymen who have conducted services in the institution, and the Sunday school teachers. My sincere thanks are also tendered to the many kind friends who have remembered the institution on holiday occasions, and to those who have contributed to the programs at the different entertainments. In the latter connection, I must mention particularly Major Bryant of the Salvation Army, who has been so kind in coming frequently to show current pictures to the inmates.

The co-operative spirit shown by all the employees is to be highly praised, and I wish to express my appreciation of their loyalty and to acknowledge my indebtedness to them. Their attitude has been a great inspiration to me, and I feel that they are worthy of special commendation.

I wish to thank you and the members of your Department for the assistance and courtesy extended to us throughout the year.

Yours very truly,

J. MILNE,

Superintendent

BOARD OF PAROLE

ANNUAL REPORT OF THE ONTARIO BOARD OF PAROLE

For the Year Ending March 31st, 1945

It is the duty of the Ontario Parole Board to enquire from time to time into the cases of prisoners sentenced to the Ontario reformatories and industrial farms, and it has authority to parole prisoners serving indeterminate sentences in these institutions. Immediately upon admission to these institutions, information is forwarded to the office of the Secretary and Chief Officer of the Board, and automatically the prisoner is listed for a personal appearance before the Board and a hearing at a date prior to the termination of the definite portion of his sentence. Just prior to the date of that hearing a summary or brief of the prisoner's file is prepared so that the Board is ready to deal with the case when the prisoner is brought before them.

Before the expiration of a week from the date of his hearing the prisoner is advised of the decision of the Board in his case. He may appeal to the Board for another hearing, but further hearings are not granted unless the prisoner produces facts regarding his case which were unknown by the Board at the previous hearing. Although prisoners with indeterminate sentences may have parole authorized it cannot be made effective until satisfactory employment and living conditions are provided, which is investigated by the police at the request of the Parole Office.

The police of the district in which he is to reside and work are advised that he is being placed on parole, and they are requested to give supervision and assist the person in becoming re-established as a good citizen. If the person violates the conditions of parole, the Board has authority to revoke the parole or may replace him on parole as may be advisable in certain cases, or the Chief Officer may be instructed to have him charged in court with having been unlawfully at large by reason of violation of parole conditions.

This has been a most difficult and trying year. Despite rumours of cessation of hostilities that were afloat, causing a state of restlessness and unsettled conditions, there was a slight decrease in the numbers of failures over last year.

The following are the statistics for the past three years:

	1943	1944	1945
Number of meetings held.....	31	35	45
Cases investigated for parole.....	1,133	1,449
Paroles authorized.....	506	635	795
Paroles put into effect.....	453	508	729
Reconvicted while on parole.....	34	59	63
Sent back and parole cancelled.....	12	32	26
Disappeared while on parole.....	15	20	50
Total Failures.....	61	111	139
Failures Percentage.....	11.48%	17%	16.3%

During this year the work of the Board, and in particular the work of its staff, has been greatly increased through acceding to the request of the Department of Justice that all those receiving over a six months' sentence be interviewed, to supply information when desired by the Remission Service of the Department of Justice. 1,773 were thus interviewed, and files and information prepared by the office staff. Of the 1,773 persons interviewed, there were only 147 given a ticket-of-leave, or a percentage of 8%.

Many ex-prisoners of gaols and other institutions call at the Parole Board office for assistance, guidance and advice. 750 were helped financially through the Prisoners' Rehabilitation Fund.

In the latter part of last year a reorganization of the Board was necessary owing to the resignation of Mr. L. J. Long and Colonel A. F. Hatch. A new Board was named, with Mr. W. B. Common of the Attorney-General's Department as Acting Chairman, together with Colonel W. A. Bunton of the Salvation Army; J. P. Balharrie, Judge of the Juvenile Court of Ottawa; W. R. McConnell, retired member of the Toronto Police Department; R. A. Jeffery of Arnprior. Miss S. A. Melrose of our staff was appointed a member of the Board.

The Board is indebted for the assistance given by the officials and officers of the Provincial Police, the Chief Constables in the Province, the National Selective Service and welfare organizations, and to the Salvation Army, who are always ready to find a job for the man who is unable to obtain one. The Board recognizes the fact that these and the Parole Officers can and do give valuable assistance to persons on parole. Nevertheless, if a person is to become a good citizen it would be largely through the efforts of himself and those of the citizens in daily contact with him.

THE SALVATION ARMY

REPORT OF PRISON, JAIL AND POLICE COURT WORK IN ONTARIO

For the Year Ended December 31st, 1944

Our report this year simply gives a very brief account of the work done in the prisons, jails and police courts of Ontario. While we are thankful for that which has been accomplished, we wish considerably more could have been done.

It is accepted that statistics can never tell the whole truth, but by this means only can we give an account of the work done. Every effort is put forth in hope and assurance that the results will be seen after many days, and it is encouraging that in some cases we do not have to wait "the many days." In our midst today are men working and doing well, who a year ago we met in prison or police court. Some of these men gave little thought to the higher things of life.

Our officers are regularly in touch with the men in Burwash, Mimico, Guelph, and the women in the Mercer, etc., and *every man and woman* on discharge may be accommodated in our Home (if they have no residence) for a period of time in order to help them back to work or relatives. Hundreds accept this offer, and many appreciate it and make good. We also hold services at Langstaff, and Concord for the mental cases. Dr. Reddick comments on our work from time to time.

We have certain officers set apart who spend all their time in this work, and in practically every city and town our officers are available for visiting the families of men and women in prison and of helping the man or woman on their return home.

It is very difficult for a man or woman leaving prison to regain their former place in society, but many do so, and often the way is made easier for the man and woman by arrangements made by our officers prior to release, and therefore ready to welcome them.

Of course, it is well known that the real sufferers are the wives and families. It cannot be otherwise. Our prisons are far more comfortable than many of the homes where the families reside, and the meals provided for men and women in the institutions are better by far than many of our working families can afford. It is well that men and women should be cared for while in prison, but unfortunate that the innocent have to suffer at home for the wrong doer. There appears no way out just now; therefore the limited assistance that we are able to render is appreciated, although we are very much aware that it is far from meeting the need. What we can do in helping materially these families, though small, is done gladly.

The thousand religious services conducted in the prisons during the year, and the hundreds of personal interviews with the men and women, plus the

contacts in their own homes on release and in the prison office—are all to the man's and woman's good.

In closing, I want to put on record our gratitude and thanks to superintendents and officials of the various institutions, also to magistrates and Crown Attorney for their real kindness and help in cases where they feel that mercy can be extended yet justice done. I want also to refer to the consideration shown by the officials at the Parliament Buildings, Hon. George Dunbar, Mr. C. F. Neelands, also Hon. Leslie Blackwell, the Attorney-General and others, who give us the opportunity to be of service.

REPORT OF PRISONS, GAOLS AND POLICE COURT WORK

For the Province of Ontario, Year Ending December 31, 1944

Visits to jails, prisons and police courts, including visits when services are held.	4,173
Interviews with men	15,290
Religious services conducted in prisons and jails	1,466
Men handed to the Salvation Army, met on discharge, or who have come direct to the prison office	2,000
Meals and beds supplied free.....	7,790
Letters written, or calls made by phone in order to bring about reconciliation, or secure employment for discharged men	10,311
Visits to homes, also prospective employers on behalf of prisoners	2,337
Employment secured, returned to former jobs, or sent back to friends or parents, mostly from the police court	1,268
Number provided with clothing.....	899
Gifts are given to men and women at Christmas at all prisons and jails.	

The statistics given above refer to Ontario only, and do not include other parts of Canada.

The visits, telephone calls and letters referred to are in order to bring about reconciliation with families when necessary, or to interview employers for reinstatement of former employees, or prospective employment, and to secure work for men.

Every man and woman leaving prison may be provided with meals and beds for a few days or longer in order to give them an opportunity to regain their feet.

Concerts are given at Christmas in several institutions, and a treat of chocolates given to each inmate. These treats, which number thousands, are appreciated by the inmates, and make the Christmas season more real to them. This helps to make the man and woman more likely to give attention to the more important matters concerning their personal welfare.

Needy families of the men and women in various institutions are assisted, although not to the extent that we would like, owing to lack of funds, but we seek to meet emergency cases.

No charge is made at *any time* for services rendered, or for goods supplied to men or women or their families.

STATEMENT OF INCOME AND EXPENDITURE
For the Fiscal Year Ended December 31, 1944

EXPENDITURE		By INCOME
Assistance to prisoners and dependents.....	\$ 4,712.56	Grants:

REPORT OF THE DEPUTY MINISTER

TO THE HONOURABLE W. A. GOODFELLOW,

Minister of Public Welfare.

I beg to submit herewith a report covering the activities of the Department of Public Welfare for the fiscal year commencing April 1, 1944, and ending March 31, 1945.

During the year a consolidation of Regulations under The Unemployment Relief Act was effected. The outstanding feature of these Regulations was the adoption of a food schedule, based on a report made by Dr. E. W. McHenry and associates of the Department of Nutrition, School of Hygiene, University of Toronto. This food schedule provides food allowances on a minimum nutritional basis. Most of the Ontario municipalities have accepted the principles entailed in these Regulations. The number of persons on relief in the Province for the year 1944-45 has varied little, as compared with previous years. This is explainable by the fact that relief is only granted to unemployable persons.

There were a number of changes in the Dominion Old Age Pensions Regulations, dealing with residence. Amendments to Dominion Regulations, to make more equitable certain requirements with respect to residence, have long been felt necessary. The amendment specifically providing for the presumption that an applicant is residing in the province where he has the required residence, although he is actually residing at the time of application in another province, is one that means much to persons applying for Old Age Pension.

Mothers' Allowances were adjusted during the year by the addition of a possible \$10 per month to a beneficiary, based on need. This adjustment has enabled the Commission to provide for certain specific cases more adequately and also has enabled the Commission to assist mothers with unusual expenditures.

During the year a Division of Youth and Child Welfare was organized. This Division has combined the Children's Aid Branch, Day Nurseries Branch, British Child Guests and supervision of Children's Institutions. It is significant to note that there is some reduction in the number of families who are given protection services by the Children's Aid Societies. The reduction in such cases is also reflected in a reduction in the number of new wards committed to the Societies. However, while there was a reduction of new cases, there was an increase in the number of families returning for further assistance, which was also reflected in the number of extended commitments of wards. It is also noted that there is a slight decrease in the number of Unmarried Parents cases being dealt with by the Societies.

During the year the movement of British children from Ontario to their own homes in Great Britain commenced. These children, who have been in Ontario since 1940, are gradually being returned to their own homes as shipping facilities become available.

There is some decrease noted in the total number of residents in the Homes for the Aged. The average population, however, has remained at approximately 6,000 persons, with approximately 2,176,246 days' care being provided during the year.

The Soldiers' Aid Commission held two general meetings and one special meeting during the year. This Commission continues to make emergency grants to veterans and to give general information and advice to service men and dependents. These activities, together with special information and advice concerning pension claims, and War Veterans' Allowances procedure, accounted for much of the work of this Commission.

All of which is respectfully submitted.

B. W. HEISE,

Deputy Minister of Public Welfare

PART I

ANNUAL REPORT

of the

UNEMPLOYMENT RELIEF BRANCH

For the Fiscal Year 1944-45

The number of persons qualifying for Direct Relief during the fiscal year ending March 31, 1945, was consistent with existing employment conditions. The rolls point to an irreducible minimum of cases at a period when shortages of all types of manpower were evident.

During the year a Consolidation of Regulations pursuant to the Unemployment Relief Act was effected. In this regard a Manual of Relief Regulations was prepared and issued for the guidance of Municipal Relief Administrators. Food Allowances were recognized in the new Regulations on the basis of a report prepared by Dr. E. W. McHenry and three Associates of the Department of Nutrition, School of Hygiene, University of Toronto. The majority of Ontario municipalities have adopted these food allowances.

The predominant reason for persons applying for, and receiving relief, continues to be illness and age. Two out of every three cases in receipt of relief are sixty years of age and over, while nine out of ten of the cases receive relief due to ill health since Unemployable persons only qualify for relief allowances to which the Province will contribute. The Table hereunder shows the comparison in numbers receiving relief during the months of March 1945, 1944 and 1939.

TABLE I

COMPARATIVE CASE-LOAD AND PERSONS IN RECEIPT OF RELIEF MONTH OF MARCH

	TOTAL CASES	TOTAL PERSONS	TOTAL HEADS OF FAMILIES	TOTAL SINGLE PERSONS	PERCENT. OF POPULATION ON RELIEF
March 1939	87,571	313,359	69,663	17,908	8.80
March 1944	8,532	16,468	3,429	5,103	.46
March 1945	8,154	15,922	3,298	4,856	.43
Percentage of Decrease—					
Mar. 1945, under 1939.	90.7	94.9	95.3	72.9	
Percentage of Decrease—					
Mar. 1945, under 1944.	4.4	3.3	3.8	4.8	

Expenditures for relief during the year proved to be as constant as the numbers receiving relief. The policy of the Province in recognizing expenditures by the municipalities on a shareable basis of 50 per cent, continued during the fiscal year under review.

TABLE II
DIRECT RELIEF GROSS EXPENDITURES AND PERCENTAGE OF
CONTRIBUTION FOR FISCAL YEAR

	1944-45	PERCENT- AGE	1943-44	PERCENT- AGE	1939-40	PERCENT- AGE
Province ..	\$1,182,816	52.52	\$1,222,829	52.17	\$8,467,108	43.28
Dominion	7,441,274	38.04
Municipalities ..	1,069,284	47.48	1,121,020	47.83	3,655,356	18.68
	\$2,252,100		\$2,343,849		\$19,563,648	

Monthly accounts are received from all the cities in the Province, while only approximately one-half of the towns, villages and townships submit accounts for contribution. Direct relief is still largely an urban problem. Based on the month of March 1945, the cities comprising 47 per cent of the provincial population were responsible for 68 per cent of the relief expenditures. Conversely, the townships (including those adjacent to the large centres of population) account for 32 per cent of the population and are responsible for only 15 per cent of the total provincial relief expenditures. Table III following, includes expenditures for numbers in receipt of general assistance for the month of March 1945, in accordance with municipal divisions.

TABLE III

*Subject to adjustment

During the war years there has been a considerable movement of persons to industrial areas both intraprovincially and interprovincially. Concentration of industry in Ontario caused this substantial movement of persons to this Province; many being referred to jobs in Ontario by the Dominion Selective Service. There is little evidence of a desire on the part of these persons to return to the districts whence they came, and there are indeed symptoms that these recent additions to Ontario cities will seek other employment with the secession of activities in war industries. While there has been potentially a larger number of persons, who, through breakdown in health and other qualifying reasons might be eligible for relief, to date, a very small number of such persons have found it necessary to make application for assistance.

The clarification of the regulations during the past year has proven beneficial to the municipal authorities and eliminated some misunderstandings on their part. The staff of the Unemployment Relief Branch continue to cooperate with the municipal authorities in the administration of relief.

JAS. S. BAND,

*Assistant Director,
Unemployment Relief Branch*

ANNUAL REPORT
of the
OLD AGE PENSIONS COMMISSION
For the Fiscal Year Ending March 31, 1945

In compliance with the provisions of the Ontario Old Age Pensions Act, we have the honour to present the report of the administration of the Act for the fiscal year ending March 31, 1945.

During the war period the number of new applications for pension diminished, but they have greatly increased during 1944-1945. A number of citizens who were engaged in full or part-time employment have now been told that their services will no longer be required, and it has been necessary for us to reinstate them.

Our province is divided into districts and a certain number of Investigators are appointed to each district, with a supervisor over each to help by general supervision in all matters pertaining to the work. This has proven very beneficial.

The agreement made between the Ontario Medical Association and the Department of Welfare is a step in the right direction, and has proven a great blessing to a large number of old age pensioners.

During the fiscal year, changes were made in a number of the Regulations dealing with residence in Canada and in the province. While there has been little objection to the requirement of sixteen years residence in Canada during the twenty years immediately preceding the date of the proposed commencement of the pension, the residence regulations have been criticized because some applicants who were absent from Canada for more than four years were required to reside in Canada for longer periods than others, before becoming eligible to receive pensions. To correct this defect in the Regulations, an amendment was made which allows the pension authority to grant pensions to applicants who have lodged in Canada for sixteen years after attaining the age of fifty years, in the case of an applicant for an old age pension, or since attaining the age of twenty years in the case of an applicant for a pension with respect to blindness.

Under the Regulations dealing with residence in the province applicants, in some cases, have had to leave the province in which they were residing and return to the province in which they had lodged for at least 700 days within the five years immediately preceding the date of the proposed commencement of the pension. To do away with the necessity of travelling from one province to another in order to qualify for pension, the Regulations were amended so that an applicant is presumed to be residing in the province where he has the required residence although he is actually residing in another province at the date on which he applies for a pension.

The residence Regulations were also amended to allow the pension authorities to disregard absence from Canada in cases where applicants were employed as fishermen or on ships, provided such applicants during their absence from Canada maintained a home in Canada as defined by the Old Age Pensions Regulations.

The collection from the estates of deceased pensioners still continues to be a matter of great importance, as we do not make a claim, where there is a Will, against an estate which does not exceed Two Thousand Dollars; but

where a pensioner dies intestate the question of requesting a refund is left to the discretion of the Commission no matter what the value of the estate.

The Local Boards and Clerks of the municipalities still continue to function in a co-operative manner.

The following statistics cover the activities of the Commission during the fiscal year:

OLD AGE PENSIONS

Applications received	8,508
Increase over previous year	916
Pensions granted	8,031
Applications refused	1,095
Pensions reinstated	1,182
Pensions suspended	1,190
Pensions increased	5,039
Pensions reduced	709
Pensions transferred to Ontario from other provinces	371
Pensions transferred to other provinces from Ontario	315
Number of pensioners deceased	6,125
Number of pensioners on payroll as of March 31, 1944	56,156
Number of pensioners on payroll as of March 31, 1945	58,113
Increase over preceding year	1,957
Number of pensions granted since the inception of the Act on November 1, 1929	164,280
Number of pensions rejected since the inception of the Act on November 1, 1929	25,740
Total net amount of pensions paid	\$16,452,148.07
Reimbursed by Dominion Government	12,291,117.43
Supplementary cost of living bonus paid	1,971,892.20
Total amount of old age pension and cost of living bonus paid	18,424,040.27
Total amount paid to other provinces for Ontario pensioners resident therein	65,459.29
Total amount received from other provinces for their pensioners resident in Ontario	507,558.92
Average old age pension paid, including provincial bonus	26.53

BLIND PENSIONS

Applications received	184
Increase over previous year	45
Pensions granted	118
Applications refused	54
Pensions reinstated	22
Pensions suspended	11
Pensions increased	19
Pensions reduced	17
Pensions transferred to Ontario from other provinces	9
Pensions transferred to other provinces from Ontario	26
Number of pensioners deceased	73
Number of pensioners on payroll as of March 31, 1944	1,449
Number of pensioners on payroll as of March 31, 1945	1,448
Increase over preceding year	39
Number of pensions granted since the inception of Pensions for the Blind on September 1, 1937	2,284
Number of pensions rejected since the inception of Pensions for the Blind on September 1, 1937	432
Total net amount of pensions paid	\$ 144,071.53
Reimbursed by Dominion Government	331,210.30
Supplementary cost of living bonus paid	52,288.30
Total amount of blind pension and cost of living bonus paid	496,359.83
Total amount paid to other provinces for Ontario pensioners resident therein	2,449.38
Total amount received from other provinces for their pensioners resident in Ontario	11,424.40
Average blind pension paid, including provincial bonus	27.39

OLD AGE AND BLIND PENSIONS

Recovery from estates and reimbursements from old age and blind pensioners	366,198.75
Adjustments issued with respect to deceased old age and blind pensioners	40,502.88

All of which is respectfully submitted.

NOTE:- Blind Pensions Granted Sept. 1, 1937.

ANNUAL REPORT
of the
MOTHERS' ALLOWANCES COMMISSION

April 1, 1944 to March 31, 1945

The continuance of adequate employment during the year under review enabled many families to become self-supporting and as such to cease to qualify for assistance under the provisions of the Act. The statistical report will show a continued decrease in the number of families on the pay list.

In determining self-supporting status of a family the Commission is not governed by a minimum budget. All circumstances are taken into consideration and no changes made in an allowance unless the income is sufficient to supply adequate needs.

The additional assistance provided from April 1, 1944 in cases where the Commission adjudged there was need has benefitted many families. In addition to granting regular or supplementary monthly assistance, grants have been made to certain mothers who met expenses of an unusual nature.

Such unusual expenses included extensive and special dental treatment, special assistance for a mother with a very large family at a time when she was required to completely outfit the group with winter clothing.

The Commission has been able to review cases very carefully which has resulted in enlisting the co-operation of the Children's Aid Societies and other social organizations in solving a number of problem cases. Mothers who otherwise would have been debarred from receipt of the allowance because they would not have been fit and proper persons have been so rehabilitated as to provide a satisfactory home for their children. The average monthly rate per family increased from \$40.33 to \$41.68 during the period under review.

The Commission continues to receive valuable co-operation from the Local Boards, Service Clubs and Social Welfare organizations.

H. BENTLEY,
Chairman

E. V. McKECHNIE,
Vice-Chairman

B. W. HEISE,
Commissioner

MOTHER'S ALLOWANCES Province of Ontario
Number of Beneficiaries at the end of each fiscal year

Note—Large increase in 1935-36 due to allowances being granted to mothers with one child.

ANNUAL REPORT
of the
CHILD WELFARE DIVISION
Department of Public Welfare
April 1, 1944, to March 31, 1945

A beginning has been made in a plan to co-ordinate the various children's services within the Department into one Division of Child Welfare. The advantages of such a plan have proved effective in the interests of efficiency and modern social work practice.

The following reports of the children's services are indicative of the scope of activities within this Division.

CHILDREN'S AID BRANCH

In the work of the fifty-three Children's Aid Societies during the fiscal year 1944-45 there were two principal indications. The first that the services of these Societies were beginning to be more widely appreciated throughout the communities, largely as a result of War Services.

Secondly, that the work of the Societies has been increasing at a rate greater than that at which necessary qualified staff replacements and increases could be secured.

Protection (Preventive Services)

In the prevention of neglect the actual number of families receiving assistance for the first time was almost 8 per cent less than the previous year, but the number of families who had received assistance in some earlier year and returned for further assistance increased by almost 25 per cent, with the result that there were 352 more families receiving assistance at the end of the year than there were at the beginning.

The situation faced by the Societies is indicated by the increase in problems referred to the Societies. Abuse, imprisonment and divorce problems referred increased by more than 50 per cent. Marital discord, death and non-support increased by more than 25 per cent and illness of parents or guardian by 23 per cent.

Wardship

It is interesting to note that the decrease in new cases occurring in the preventive work is repeated in ward commitments to the Society. New commitments in 1943-44 being 1,870 and in 1944-45, 1,708, a decrease of 162 cases.

Similarly the increase of families returning for further preventive service is paralleled by an increase in the number of commitments extended from 2,124 in 1943-44 to 2,942 in 1944-45.

Children in Care

Admissions of children to care were very slightly increased by 237. The comparison as between wards and non-wards is interesting. Ward admissions were down by 198 while non-ward admissions were up by 420. The number of children discharged from care was down 396, resulting in an overall increase of 949 children in care.

During the year an increasing difficulty in securing foster homes was felt by the majority of Societies, but despite this difficulty and shortage of staff, the Societies succeeded in placing ninety more children in free care than they did the year before, continuing a trend previously established which would relieve the overburdened municipalities to some further slight degree.

The Child Born Out of Wedlock

For five consecutive years the number of Unmarried Parent cases referred to Children's Aid Societies has been on the increase. This year the trend has been reversed and shows a decrease of 55 cases or 1.7 per cent. Monies collected from the putative fathers, however, continue on the up grade and this year \$151,692.29 was collected as against \$137,433.29, an increase of \$14,259.00.

Adoptions

Adoptions reached an abnormal height during the war years with the completion of adoptions for purposes of Dependents' Allowance for many children who had been in servicemen's homes for varying periods. This year the number of adoptions is thirty-one below last year, indicating that conditions in this area are being restored to normal. A scrutiny of the statistics having to do with adoptions reveals nothing out of the ordinary with the exception of the fact that the number of children adopted by the husband of the mother fell off noticeably, namely by 41 per cent.

Finance

There is a slight upward trend in monies collected indicated throughout the year. The total receipts increased by 13.7 per cent (\$309,938.36), parents' fees by 29.4 per cent (\$78,095.69), funds from private sources by 4 per cent (\$7,853.15), municipal maintenance by 12 per cent (\$133,865.26) and municipal grants by 12.6 per cent (\$32,651.15).

Total receipts increased by 16 per cent (\$354,904.01), the amount spent on shelter care by 14.4 per cent (\$27,593.27) and on boarding home care by 17.7 per cent (\$250,619.62). The per diem cost of shelter care increased by 6.8 per cent; per diem cost of boarding home care by 3.9 per cent.

War Services

As might be expected investigations made for the Dependents' Allowance Board concerning the eligibility of dependents for Allowances decreased by 13 per cent and similarly the number of soldiers' families supervised by Societies and the number of Allowances administered decreased by 10 per cent and 18 per cent respectively.

On the other hand, as the possibilities of discharge and the need of rehabilitation increased, so did the investigations for the Dependents' Board of Trustees and the Department of Pensions and National Health, applications for supplementary grants necessitating 42 per cent more investigations and applications for compassionate discharge, over ten times the investigations made in the previous year.

Investigations concerning pensions increased almost four times and those concerning War Veterans' Allowance by more than twice the previous year's figures.

Conclusion

In conclusion it would be well to point out that, despite the increasing appreciation of the services rendered by the Children's Aid Societies giving rise to increased demands for services, and despite the increased difficulties in developing and retaining adequate staffs, the Children's Aid Societies of the Province of Ontario maintained a high level of service throughout the year.

DAY NURSERY BRANCH

The number of applicants for Wartime Day Nursery and Day Care Services has increased steadily. Day Nursery facilities throughout the Province now accommodate approximately one thousand children (23 units), Day Care facilities approximately three thousand (42 units).

As a further provision per capita grants have been provided to two private Day Nurseries for those children in their care whose mothers are employed in essential industry.

A study of enrollment indicates that Day Nurseries are becoming increasingly valuable as a welfare service, solving such home problems resultant from the war as the incapacitated father, the widowed mother, and inadequate housing conditions. Day Nurseries in such cases are assisting to preserve home life.

During the last two and half years of operation, Nursery practices have been studied and tested with the result that a standard procedure is now being carried out consistently throughout the Dominion-Provincial Wartime Day Nursery Program. Three aspects of pre-school care, namely Health, Nutrition and Education are emphasized. Requirements for the most adequate School Day Care nutritional and recreational program are receiving similar study.

BRITISH CHILD GUESTS

Since September 1940, 624 children have been evacuated from Great Britain through the Children's Overseas Reception Board and placed under the supervision of the various Children's Aid Societies of Ontario.

Practically all of these children are making an excellent adjustment in Canadian life. Many of the older boys are now joining the Canadian Services. At this time, 34 are serving in the Armed Forces.

A movement is now underway to have some of the children return to their homes as shipping accommodation becomes available. Up to the present 188 children have returned home and it is anticipated there will be a general movement to the United Kingdom for all the children in the very near future.

British Child Guests are still being supervised through the various local Children's Aid Societies throughout Ontario. A strong attachment has grown up between the children and their foster parents.

CHILDREN'S INSTITUTIONS

Thirty-nine children's institutions qualified under the Charitable Institutions Act in the year under review.

The per diem cost ranged from 64 cents to \$3.01 and averaged \$1.18, with the year's expenditures totalling \$1,011,837.34, covering 1,137,054 days.

A total increase of 153,596 days care was given over the corresponding period of the preceding year. Maintenance costs increased \$48,336.65. At the end of the year 2,824 children were in care, compared with 2,685 at the end of the year previous—an increase of 139.

Receipts from paying residents increased \$34,501.04 during the year, while donations, endowments, and receipts from investments increased \$15,100.52 for the same period.

ANNUAL REPORT

of the

REFUGES AND HOMES FOR THE AGED

January 1 to December 31, 1944

General conditions resulting from the continuance of hostilities have increased the problems with which administrators of Homes for the Aged have had to cope. Notwithstanding these difficulties, Superintendents and Matrons have carried out their respective duties with patience and results of their efforts are evidenced by the creditable appearance of appointments and buildings. The cost of maintenance in the County Homes has increased 10 per cent from 1943 to 1944 and 32 per cent during the past five war years.

While there was a decrease in the total number of residents in homes during the year 1944, the average has remained the same or at approximately 6,000 persons. The total operating costs for all Homes for the Aged has exceeded \$2,300,000 and the average cost per diem of \$1.01 set an all time high for this type of assistance.

Many improvements and alterations have been or are being made but a number of the homes are becoming obsolete. There is a possibility of from three to six new modern homes being constructed during the next few years.

Many Old Age Pensioners prefer the security offered by a Home for the Aged. In 1944, 28 per cent of the operating costs was secured from pensioners and 43 per cent of such costs was provided by pensioners and paying residents.

This Department appreciates the co-operation and assistance given by all Superintendents, Matrons and Boards of Management.

The following table presents in brief form a resumé of the 1944 Statistics:

	CITIES	DISTRICTS	COUNTIES	TOTAL
Number of Refuges	44	3	31	78
Average Number of Persons	3,537	168	2,259	5,964
Total Number of Persons	6,253	218	2,807	9,278
Total Number of Pensioners	2,099	69	888	3,056
Total Number of Non-pensioners	4,154	149	1,919	6,222
Total Days' Stay	1,291,716	61,277	823,253	2,176,246
Average Cost per Diem per Person	\$1.16	\$0.96	\$0.90	\$1.01
Total Cost of Maintenance	\$1,496,402.39	\$76,674.53	\$743,499.45	\$2,316,576.37

S. L. CHARLTON

Inspector of Refuges

ANNUAL REPORT
of the
SUPERVISOR OF INVESTIGATORS FOR OLD AGE
PENSIONS AND MOTHERS' ALLOWANCES COMMISSIONS
Fiscal Year 1944-45

In reviewing the work of the Investigation Staff for the fiscal year 1944-45, appreciation of the co-operation and assistance given by both the Mothers' Allowances and Old Age Pensions Commission should be recorded.

The ninety-nine investigators throughout the Province carried a total case-load of 7,076 Mothers' Allowances beneficiaries and 58,113 Old Age and Blind Pensioners, necessitating a total of 76,601 calls to the homes besides the very numerous collateral calls required for the completion of the 63,068 reports submitted by them during the year.

As these calls have to be made throughout the entire year, there are naturally many hazards to be faced especially during the winter months, but the difficulties are overcome by the investigators and the excellent co-operation throughout the Province is gratifying.

The general encouragement and stimulation for continued progress and the recognition of work well done which the district supervisors give to their individual investigators, is to be commended.

The continued co-operation and assistance of various local Social Agencies, Officials of the Registry Offices and the Surrogate Courts as well as Municipal Officials is appreciated.

Respectfully submitted,

NORA E. SMYTH

Supervisor of Investigators

ANNUAL REPORT
of the
SOLDIERS' AID COMMISSION OF ONTARIO

April 1, 1944, to March 31, 1945

Commission Membership

No changes occurred in the membership of the Commission during the fiscal year, April 1, 1944 to March 31, 1945, now under review. It should be noted, however, that leave granted Commissioner Brigadier Rutherford, now on Active Service in Great Britain has continued in force throughout the year.

Commission Meetings

Two general and one special meeting were held during the year, all members showing their usual keen interest.

Commission Staff

No staff changes have occurred during the period. Prompt and efficient service has been rendered by all members.

Audit

Following the end of the fiscal year, an audit of the books and accounts was performed by a representative of the Provincial Auditor's Department. All books and accounts were reported to be in order and to correctly reflect the operations and transactions of the Commission throughout the year. Financial statements will be found appended hereto.

Wards

Services to Wards in general is covered by a special statistical report appended hereto. It will be noted that during the year the 5 wards still under the guardianship of the Commission on March 31, 1944, attained the age of 21 years. We note with satisfaction that a substantial number of former wards of the Commission were on active service in this war, either overseas or in Canada. We have reports of some former wards who have become casualties and some being killed in action.

Assistance and Advice to Veterans

1. Emergency grants for the year number 1,428 as compared with 1,251 for the previous year. (No. 8 Account grants shown separately).
2. General information and advice services rendered to ex-service men and dependents totalled 2,603 compared with 2,284 for the previous year.
3. Office interviews for this period were 2,513 as compared with 2,158 for the previous year.
4. Special information and advice *re* pension claims, War Veterans' Allowance procedure, etc. number 497 as compared to 558 for the previous year.

It may be interesting to note that 420 cash grants representing an amount of \$3,746.14 were made to men and dependents of men with service in this war. This shows a substantial increase in numbers served and assistance involved over the previous period when 282 grants amounting to \$2,190.25 were made.

Kathleen Hammond Fund

The assistance from this fund to widows of veterans, widowed by the war (1914-18) served 413 cases of emergency or special need during the past year as compared with 377 in the previous year. The corpus of this fund was subject to further increases during the year.

Croft Estate

Continues to show surplus of income over carrying charges. Prospect for vacant Real Estate in Yonge Eglinton Avenue area steadily improving.

Ex-service Men of the Second Great War

Pursuant to authority granted by Sixth Session, Twentieth Legislature, Ontario, the Commission has rendered to ex-service men of the present Great War and their dependents, services commensurate with their needs and comparable to those rendered ex-service men and dependents of the First Great War. In this connection, however, it should be noted that special Trust Funds, (Kathleen Hammond, Scott, Croft and McNab Estates), administered by the Commission for ex-service men and dependents of the First Great War, are not available for the benefit of ex-service men of the present war, because of specific restrictions governing these respective bequests and donations. It is, of course, anticipated, that in due time bequests and other Trust Funds will be available to the Commission on behalf of those whose service has been in this war. While the Commission keeps in close touch with the Dominion Government, Red Cross and all other facilities available to help needy and deserving cases, it should be noted that the number of requests for service requiring emergency assistance from the Commission has been gradually increasing, and this increase is likely to continue until at least 3 years after the end of the war.

Garden Land Settlement

During the year two soldier settlers have continued to reside on Allotments, while the remaining cottages have been rented to families seeking residence in the district through housing shortage. Revenues from these rentals retained in a special reserve fund have been substantially augmented during the year under review.

General

During the period under review the Director made personal calls on some 145 Branches of Veterans' Organizations in the Province, when meetings were held with the officials of these bodies and addresses given at general meetings of the members. The work and scope of the Commission was reviewed, individual and general problems discussed and help or advice arranged for or given.

A very helpful system of co-operation has been established and continued throughout the Province.

In addition to the veterans' organizations, contact is also made with the Inspectors of Children's Aid Societies; Officials of the Provincial Government's Agricultural Loans; and the Provincial Police (especially in unorganized areas), in the different areas visited.

The members of the Commission being widely representative of the Province and being imbued with a sense of responsibility for service to, and the welfare of all ex-service men and their dependents, have conscientiously endeavoured to meet and even to anticipate needs.

The staff of the Commission with long experience and guided by the keen spirit of service actuating the Director, has been able to advise and very promptly assist a great number of deserving ex-service men and dependents who were in need and often discouraged to the breaking point.

Apart from the actual achievements of the Commission as recorded in the service and financial assistance statements, we believe that an even more important contribution has been made through the cultivation of a better understanding of the reasonable rights and privileges of all who are eligible for assistance, and all veterans' organizations and friends who are interested and anxious to help. Actually the development of this better understanding and a truly co-operative spirit, while requiring much time and persevering effort, has done more to create satisfaction and harmony than the mere expenditure of dollars and cents. When such efforts are coupled with the ability to provide prompt assistance where necessary, the service ensures both practical and doubly valuable results.

The Commission also desires again to gratefully acknowledge the co-operation of the veterans' organizations; The Canadian Red Cross Society; I.O.D.E.; The Last Post Fund and all other organizations and individuals who have in numerous ways been helpful during the year.

Respectfully submitted,

E. A. BAKER.

Chairman

Liquor Control Board of Ontario

454 University Avenue,
TORONTO 2, Ontario
December 31st, 1945.

TO THE HONOURABLE GEORGE A. DREW, K.C.,
Prime Minister of Ontario,
Parliament Buildings, Queen's Park, Toronto 5, Ontario.

Sir.—

I have the honour to submit herewith the Nineteenth Report for the twelve months' fiscal period which ended the 31st of March, 1945.

FINANCIAL STATEMENT

The Balance Sheet, certified to by Messrs. Robertson, Robinson, McCannell & Dick, Chartered Accountants, shows the amount of fixed assets to be \$102,177.00. This amount represents the value of the Board's real estate, consisting of the land and buildings situated at 154 Wellington Street West, Toronto, 210 Victoria Avenue, Fort William, and 28 Silver Street, Cobalt, occupied as warehouses and stores, and the value of all furniture, equipment and alterations in the various premises of the Board, less depreciation, which, since the commencement of operations in June, 1927, has been provided to an extent of \$1,098,518.19.

Other assets totalled \$7,430,321.79 being comprised of the following items:

Cash on hand and in transit from branch banks	\$3,302,744.28
Accounts Receivable—hospital charge sales, beer levies, duty recoverable items, freight claims, fines, etc.	445,762.62
Inventories of liquors and supplies	3,628,220.02
Prepaid items.....	53,594.87

Liabilities amounted to \$1,009,803.05 as follows:

Accounts Payable—for liquors and supplies, accrued charges, etc.	997,165.49
Due Provincial Treasurer—Confiscated Stock.....	12,637.56

The proceeds from sales of Individual and Special Permits which were previously payable to The Provincial Treasurer are now, according to an amendment to The Liquor Control Act of Ontario, included in the revenue of the Board. The amount unpaid from the previous year totalled \$210,255.39 which was remitted to The Provincial Treasurer.

The item of \$12,637.56 represents a balance due for forfeited liquor which was purchased by the Board after careful examination and in accordance with the provisions of Section 132 (2) of The Act.

Contingent liabilities amounted to \$5,603,416.14. These items comprise the value of undelivered orders and also the amount of Customs and Excise Duties which will have to be paid on the goods which were in bond on our premises March 31st, when the same are cleared. These items are not chargeable against, nor do they affect the operations of The Board for the period under review.

The Profit and Loss Account shows sales for the twelve months from Liquor Control Board stores of \$38,346,454.16.

The same account shows a gross trading profit of \$14,179,205.70 with total expenses, including depreciation and items written off, of \$3,025,117.81 which produced a net trading profit of \$11,154,087.89. This latter sum, together with other revenue derived from permit sales, fees and taxes on brewers and wine manufacturers and their products, as well as from authority holders and from fines which amounted to \$7,870,184.78, resulted in a total net income of \$19,024,272.67. The expenses incurred by The Liquor Authority Control Board since October 24th, 1944, the date on which The Liquor Authority Control Act came into force, amounted to \$53,261.75. This item is chargeable against the profits of The Liquor Control Board as provided by Section 10 of The Liquor Authority Control Act. The net income of the Board was reduced thereby to \$18,971,010.92 which is carried to the Surplus Account.

For the purpose of comparison, the percentage that the cost of stock sold, miscellaneous earnings and expenses and other revenue bear to the sales are given for the fiscal year 1943-4 and the twelve month's period herewith reported upon.

The Surplus Account shows a balance at the commencement of the period of \$6,053,546.88, this being the amount carried forward from the previous year's operations which had not been transferred to The Provincial Treasurer. After the addition of \$499.04 which represented sundry adjustments and the twelve months' net income of \$18,971,010.92, a total amount is shown of \$25,025,056.84. From this sum \$18,502,361.10 was remitted to The Provincial Treasurer. The total payments to The Provincial Treasurer during the twelve months were therefore:

On Account of Profits.....	\$18,502,361.10
On Account of 1943-4 Permits.....	210,255.39
	\$18,712,616.49

Besides the Balance Sheet, Profit and Loss Account and the Surplus Account, a statement showing the expenses of Administration and Operation

for the twelve months is also attached. Individual percentages which these expenses bear to the total sales are given for the twelve months and also for the preceding fiscal period. On March 31st, 1945, the staff comprised 1,170 employees, 314 of these being part-time or seasonally employed, as against 839 permanent and 305 part time employees at the previous year-end.

All Liquor Control Board stores, brewers' retail stores, breweries and wineries privileged to sell alcoholic beverages in Ontario, as of March 31st, 1945, are set forth on Schedule II; a classification of permits and licenses issued appears on Schedule III, and a summary of Authorities and Standard Hotel licenses issued, cancelled, suspended, surrendered and re-instated during the period from April 1st to October 23rd, 1944, is set forth on Schedule IV.

SALES

The application of the Dominion Government's "Wartime Alcoholic Beverages Order, 1942" continued during the year under review. Such Order, as explained in our previous report, limited the proof gallonage of spirits obtainable by each Liquor Commission of Canada during each twelve months commencing November 1st, 1942, to not more than 70% of the proof gallonage obtained during the twelve months which ended October 31st, 1942. With regard to wine, the limitation was 80%, and beer, 90%. The application of this Order to domestic beer was revoked on March 13th, 1944, but as the volume of beer available was insufficient to meet the demand, sales limitations were continued in order to ensure maximum equality in distribution. The quantity of spirits available continued to be restricted by the Dominion's Order and rationing thereof had to be extended over the entire twelve months.

The monthly sales limitations per individual permit-holder and the concurrent month-end outstanding permits were as follows:

Month	Monthly Limitation per Individual Permit-holder	Number of Annual Individual Permits Outstanding at Month-end
April, 1944	26 oz.	629,637
May	26 oz.	786,428
June	13 oz.	893,617
July	13 oz.	1,006,208
August	13 oz.	1,090,763
September	13 oz.	1,192,887
October	26 oz.	1,265,580
November	26 oz.	1,344,411
December	26 oz.	1,476,093
January, 1945	26 oz.	1,500,347
February	26 oz.	1,519,523
March	26 oz.	1,537,497

The sales limitation established during the preceding fiscal year of four bottles of imported wine and twenty-four small bottles, or the equivalent, of imported beer, monthly, was continued. Likewise, the monthly sales limitation of domestic beer for home consumption was limited to twenty-four pints, or the equivalent, per individual beer ration coupon book-holder.

The number of individual beer ration coupon books outstanding each month-end was as follows:

Month-end 1944	Total Issued
April 1st—Cumulative total since commencement of issue to March 31st, 1944	1,156,873
April 30th	1,233,394
May 31st	1,323,639
June 30th	1,433,473
July 31st	1,589,943
August 31st	1,722,480
September 30th	1,785,611
October 31st	1,807,027
Total Issue of Beer Book No. 2	1,807,027
November 30th—Individual Beer Ration Coupon Book No. 3 (New Book)	1,002,766
December 31st	1,260,315
1945	
January 31st	1,335,293
February 28th	1,382,389
March 31st	1,455,223

The available supply of domestic beer was insufficient to entirely meet the demand and necessitated the continued monthly allotting of beer to authority holders during the entire fiscal year.

Restrictions on the sale of Ontario wine for home consumption were continued from April 1st, 1944, to March 31st, 1945, at two bottles (26 ounces) per two-week period. Ration coupon books outstanding each month-end were as follows:

Month-end 1944	Total Issued
April 1st—Cumulative total since commencement of issue to March 31st, 1944	479,681
April 30th	520,520
May 31st	559,226
June 30th	594,513
July 31st	630,942
August 31st	662,524
September 30th	687,812
October 31st	715,242
November 30th	756,877
December 31st	875,617
1945	
January 31st	899,996
February 28th	917,178
March 31st	935,172

The sale of spirits, beer and wine from liquor stores during the twelve months amounted to \$38,346,454.16. The net value of beer sold from breweries and brewers' retail stores, exclusive of any charge for containers, totalled \$61,034,601.10. Sales of Ontario wine made direct to customers from licensed

Ontario wine sales offices and, where permitted, from winery premises amounted to \$3,504,791.69.

The following comparative sales statistics are given for the fiscal year under review and also for the preceding twelve months:

VALUE

	Twelve Months ending March 31, 1944	Twelve Months ending March 31, 1945	Increase or Decrease	Percentage
Domestic Spirits	\$31,008,797.42	\$25,200,540.97	\$5,808,256.45	18.7 Dec.
Imported Spirits	9,152,274.93	7,876,867.50	1,275,407.43	13.9 Dec.
Domestic Wines	2,085,189.44	2,369,193.08	284,003.64	13.6 Inc.
Imported Wines	413,040.24	431,623.10	18,582.86	4.5 Inc.
Domestic Beers	1,153,192.83	2,333,746.05	1,180,553.22	102.4 Inc.
Imported Beers	95,343.49	134,483.46	39,139.97	41.0 Inc.
Total Sales from Liquor Stores	43,907,838.35	38,346,454.16	5,561,384.19	12.6 Dec.
B. & B. R. S. Sales - Domestic Beer (exclusive of container value)	48,647,605.09	61,034,601.10	12,386,996.01	25.4 Inc.
Wineries' Sales (Domestic Wines)	3,264,069.83	3,504,791.69	240,721.86	7.3 Inc.
Total	95,819,513.27	102,885,846.95	7,066,333.68	7.3 Inc.

GALLONAGE

	Twelve Months ending March 31, 1944	Twelve Months ending March 31, 1945	Increase or Decrease	Percentage
Domestic Spirits	1,591,793	1,209,400	382,393	24.0 Dec.
Imported Spirits	349,838	308,667	41,171	11.7 Dec.
Domestic Wines	633,284	698,507	65,223	10.3 Inc.
Imported Wines	43,901	44,782	881	2.0 Inc.
Domestic Beers	678,310	1,366,943	688,633	101.5 Inc.
Imported Beers	21,641	29,888	8,247	38.1 Inc.
Total Sales from Liquor Stores	3,318,767	3,658,187	339,420	10.2 Inc.
B. & B. R. S. Sales (Domestic Beer)	37,807,947	45,785,337	7,977,390	21.1 Inc.
Wineries' Sales (Domestic Wines)	864,060	880,883	16,823	1.9 Inc.
Total	41,990,774	50,324,407	8,333,633	19.8 Inc.

As shown in this report, the Board paid to The Provincial Treasurer the sum of \$18,712,616.49 on account of Profits, License Fees, etc. The Board also paid, in accordance with the law, to the various municipalities, 20% of the fees received from Hotel Authorities, such amount totalling \$335,860.67 which was distributed to 315 municipalities.

Additional to the above substantial payments made by the Board, the Dominion Government received during the course of the year in Customs

and Excise Duties and Sales and Excise Taxes on spirits, wines and imported beers purchased by the Board, \$14,219,549.62. There also was paid to the Dominion Government for Malt Duties and Taxes on domestic beers and wines sold in Ontario approximately \$22,000,000.00, making a total of about \$36,200,000.00.

Therefore, the grand total of revenue payments received by respective Dominion, Provincial and Municipal Governments was in excess of \$55,000,000.00 as a result of levies on alcoholic beverages sold in Ontario during the year. This amount was exclusive of Dominion and Provincial corporation and Municipal realty taxes paid by the respective manufacturers and authority holders.

STORES

The number of liquor stores in operation on March 31st, 1945, was one hundred and thirty, there having been no change in the number during the year.

BREWERIES AND BREWERS' RETAIL STORES

On March 31st, 1945, there were twenty-one Ontario and four Quebec breweries licensed to sell their products in Ontario, a reduction of one from the previous year end,—Bixel Brewing and Malting Company, Limited, having ceased operations as of April 1st, 1944.

The gallonage of domestic beer sold in Ontario during the years 1941 to 1945 inclusive, as computed from the sales records of the Board and with respect to sales to destinations outside Ontario, from the monthly reports of the Ontario brewers was as follows:

	1941 (12 months) Gallons	1942 (12 months) Gallons	1943 (12 months) Gallons	1944 (12 months) Gallons	1945 (12 months) Gallons
Sales from Liquor Stores' Stock	672,064	839,827	933,142	678,044	1,366,886
Beer orders taken at Liq- uor Stores for delivery by breweries and brew- er's retail stores.....	5,004	6,739	5,636	267	57
Sales from breweries and brewers' retail stores.....	30,626,640	37,640,744	40,650,522	37,807,947	45,785,337
Total Ontario sale of Domestic Beer.....	31,303,708	38,487,310	41,589,300	38,486,258	47,152,280
Sales to other Provinces ..	2,344,029	2,923,485	3,269,717	3,460,560	3,874,106
Export Sales.....	133,610	1,394,525	1,280,491	2,071,002	1,704,639
Total	2,477,639	4,318,010	4,550,208	5,531,562	5,578,745

The numbers of Brewers' Retail Stores in operation at the year-end totalled one hundred and twenty-five, one store having been opened during the period at:

125W Main & Gilbert Streets, Delhi, on November 15th, 1944.

From June 1st to September 30th, 1944, a Brewers' Retail Store was operated at Jackson's Point.

As mentioned in previous reports, the policy of The Liquor Control Board has been to have periodical analyses made by the Chief Provincial Analyst of all brands of beer produced by Ontario brewers, as well as the products of the Quebec breweries which are licensed to sell in the Province. The analyses of last year indicated that all the samples examined conformed to the requirements of the Regulations passed pursuant to The Food and Drug Act of Canada.

WINERIES

309 analyses of the products of all Ontario licensed wineries were carried out during the year for the Board by The Provincial Department of Health in order to ensure that they conformed to the Board's regulations with respect to Ontario wine. In addition nine wineries availed themselves of the facilities of The Provincial Board of Health Laboratories and procured twenty-seven cultures of yeast for wine-making.

A price of \$65.00 per ton payable by wine manufacturers to the grape-growers for grapes delivered for wine-making was negotiated by the Board and proved acceptable to both parties for the 1944 crop.

On March 31st, 1945, there were twenty-one wineries operating in Ontario. Sales were conducted direct from the premises of six wineries and from forty-three branch retail sales offices, there being no change since the previous year-end.

The following statistics of gallons of Ontario wine sold have been compiled from the monthly reports submitted to the Board by the respective wineries:

	1941 (12 months) Gallons	1942 (12 months) Gallons	1943 (12 months) Gallons	1944 (12 months) Gallons	1945 (12 months) Gallons
Sales at Wineries	1,101,193	1,054,881	1,040,949	864,060	880,883
Sales to the Board	896,801	834,519	856,741	614,675	681,371
Total Ontario Sales	1,997,994	1,889,400	1,897,690	1,478,735	1,562,254
Sales to other Provinces	1,850,008	1,537,579	1,806,083	1,542,432	1,554,265
Export Sales	5,892	4,766	5,315	61,602	49,769
Total	3,853,894	3,431,745	3,709,088	3,082,769	3,166,288

The tonnage of grapes and cherries used by the various wineries during the past four years was as follows:

	12 mos. ended March 31st, 1942	12 mos. ended March 31st, 1943	12 mos. ended March 31st, 1944	12 mos. ended March 31st, 1945
Grapes used in the manufacture of wine	13,810 tons	13,414 tons	9,780 tons	12,436 tons
Grapes used in the manufacture of concentrates	2,855 tons	3,786 tons	2,268 tons	2,703 tons
Grapes used in the manufacture of brandy	—	5,693 tons	491 tons	930 tons
Cherries used in the manufacture of wine	236 tons	10 tons	9 tons	8 tons
Total	16,901 tons	22,903 tons	12,548 tons	16,077 tons

Last year 4,037 gallons of Ontario wine were distilled into grape spirit for wine fortification, while during the year under review, 258,488 gallons were used for such purpose.

AUTHORITIES FOR THE SALE OF BEER AND WINE

On October 24th, 1944, an Act known as "The Liquor Authority Control Act, 1944" was brought into force by the proclamation of The Lieutenant-Governor. It provided for the creation of The Liquor Authority Control Board of Ontario.

By virtue of this new Act, the responsibility of issuing authorities for the sale of beer and wine and the renewal, transfer, suspension or cancellation thereof passed from The Liquor Control Board of Ontario to the new Board. The new Act provided that authority fees should continue to be paid to The Liquor Control Board of Ontario, transfer fees directly to The Provincial Treasurer and also (after amendment) for the payment of the expenses of the new Board by The Liquor Control Board of Ontario. Authority fees were continued at the same rates.

Complete details by municipalities of the number of authorities which were issued, cancelled, suspended or surrendered, together with re-instatements from April 1st, 1944, to October 23rd, 1944, are set forth on Schedule IV.

On October 23rd, 1944, 1,318 Standard Hotel licenses were effective, of which 1,231 possessed authority to sell beer and wine; 87 held only the Standard Hotel license. There were also 263 Clubs and 216 Military Mess authorities then operative.

HOTELS

Effective October 24th, 1944, the provisions of The Liquor Control Act of Ontario relative to "Standard" hotels and the regulations passed pursuant thereto were repealed.

HOME-MADE WINE PERMITS

Since the regulations became effective on January 1st, 1940, which required that any person manufacturing more than 100 gallons of Home-Made Wine must obtain a permit from the Board, 1,410 Home-Made Wine Permits had been issued up to March 31st, 1944.

During the fiscal year herein reviewed, a further 49 Home-Made Wine Permits have been issued, thus bringing the total to 1,459.

Since January 1st, 1940, 32 Home-Made Wine Permits have been cancelled for failure on the part of the permittee to comply with these regulations or other provisions of The Liquor Control Act.

PERMITS

From April 1st, 1944 to March 31st, 1945, there were 1,537,497 individual annual liquor permits issued. Individual permits sold to non-residents valid for a period not exceeding one month numbered 112,106. In addition 5,578 special permits were issued to physicians, druggists, hospitals, etc.

In accordance with the requirements of the Act, the Board deemed it advisable during the year to issue 4,167 Prohibitory Orders. Such action followed either notification relative to conviction for violation of the Act, or the receipt of a request or recommendation from some interested party, such as a relative, friend, magistrate, police officer, physician, relief officer,

etc. These Prohibitory Orders comprised 1,342 full Board Orders which precluded the individual concerned from purchasing alcoholic beverages from any source, of which, 42 resulted from Judges' Orders of Interdiction and 463 were the result of convictions having been registered under The Criminal Code of Canada for intoxication while in charge of a motor vehicle.

Of the remaining 2,825 Orders which varied in degree of restriction, 1,025 followed the conviction of the individual for violations of The Liquor Control Act and the premises of 406 of these were declared a "public place" within the meaning of the Act. The other Orders were issued as being in the best interest of all concerned according to the judgment of the Board.

During the year, after full investigation and consideration, it was decided to fully revoke 649 and partially revoke 120 of the Prohibitory Orders which had been made effective at some prior date.

1,565 Special Permits were issued to Druggists, three of which were suspended during the year. These Special Permits allowed the druggist to purchase liquor in limited quantities for compounding medicines or for use as a solvent or preservative. It also accorded him the privilege of buying rubbing alcohol for resale. The premises of all holders of Druggists' Special Permits were subject to periodical inspections and, in addition, druggists were required to maintain an accurate record of each purchase and sale of rubbing alcohol.

Efforts were continued to prevent the use of rubbing alcohol as a beverage and during the year, the names of 41 addicts were posted with all druggists in the large communities of the Province.

L.C.A. INFRACTIONS

Classification of the offences against The Liquor Control Act according to the Monthly Certificates received from Ontario magistrates from April 1st, 1944, to March 31st, 1945, resulted in the following statistics being recorded:

OFFENCE	No. of Fines	No. of Gaol Commitments	No. of Suspended Sentences and Remands	Total Convictions
Sec. 43 (1) L.C.A. Having liquor in an illegal place	2,852	245	19	3,116
Sec. 87 (1) Selling liquor illegally or keeping for sale..	9	70		79
Sec. 96 (1) L.C.A. (Consuming liquor in other than residence)	605	29		634
Sec. 96 (2) Intoxication	7,891	5,655	3,997	17,543
Sec. 106 (1) Illegal possession of liquor	50	12		62
All other L.C.A. infractions	3,805	1,309	18	5,132
	<u>15,212</u>	<u>7,320</u>	<u>4,034</u>	<u>26,566</u>

GENERAL

I would like to express my appreciation of the loyalty and co-operation extended to me by the entire staff of the Board.

I have the honour to be, Sir,

Your obedient servant,

W. G. WEBSTER,

Chief Commissioner.

- R. W. THOMPSON, B.S.A. *Provincial Entomologist.*
- L. STEVENSON, B.V.Sc., M.S. *Provincial Zoologist.*

ONTARIO AGRICULTURAL COLLEGE

The Four Year Course in Agriculture had an enrolment of 246, divided by classes,— First Year, 90; Second Year, 46; Third Year, 57; Fourth Year, 53.

While the first year showed an increase over a year ago, the enlistments in the armed services from the upper classes left the total number of students very little above that of the previous year.

Winter Short Courses

With an attendance of more than 900, the winter courses in Agriculture were held January 1-6, 1945. The dormitories and dining hall were available and all were housed and fed in a satisfactory way. Members of the staff were greatly impressed with the unusual interest shown by the members of these courses. The attendance was regular and everyone took an active part in the work. It was felt that a real service was rendered by the College through this group which came from all parts of the province. Our main problem is that of furnishing the necessary accommodation in the way of classrooms and laboratories and to furnish qualified leadership and instruction.

The College is indebted to the Ontario Farm Federation, the United Farmers, the Milk Producers' Association and other associations for their helpful co-operation and assistance. These people furnished a large number of scholarships which were not only appreciated, but made it possible for the attendance of a large number of young men and women.

Dairy Short Courses

With the co-operation of the Canadian Vocational Training Branch of the Dominion Department of Labour with the Department of Dairy Husbandry, two three months' dairy courses were held during the periods October 1-December 21, 1944, and January 2 - March 23, 1945, with a total attendance of 102.

While the three months' course in the Dairy Department has been continued for a long period of years, a special effort was made to enroll men and women to assist in the dairy plants and relieve in part, the shortage of skilled labour. The Canadian Vocational Training Branch assisted men and women by meeting a part of their expenses.

Poultry Short Courses

The annual course of four weeks for practical poultrymen was held in January with an attendance of 29. An effort was made to cover the practical phases of management, selection, and breeding of poultry. A large share of the time was given over to laboratory work.

During the period September 18-30, 1944, two egg grading courses were conducted by the Department of Poultry Husbandry in co-operation with the Poultry Services of the Dominion Department of Agriculture. Other courses were held at Ridgetown Experimental Farm, October 2-7, 1944, and at the Kemptville Agricultural School, October 23-28, 1944. During these periods, men and women were given instruction on the many phases of grading, packing, storage and shipping of eggs. Real progress is being made in the development of egg grading stations throughout the province. This co-operative work has proved most helpful.

MILITARY TRAINING

Canadian Officers' Training Corps

The O. A. C. contingent was again organized as a three-company unit under the command of Lt. Col. E. W. Kendall, with Capt. H. H. Town as training officer. Through the co-operation of Headquarters of Military District No. 1, the training was again improved. Army vehicles were made available which made possible practical field training throughout the fall term. In the winter term training films were used more extensively and training on the miniature rifle range was intensified. Competitions were introduced into weapon training.

Disbandment of the University Air Squadron with transfer of personnel to the C.O.T.C. at Christmas somewhat complicated the training syllabus for the remainder of the year. A very successful summer camp was held on the O.A.C. campus. Use of College facilities cut administration and fatigues to a minimum and allowed the maximum time to be spent in actual field training.

In rifle competitions the Unit has had a very successful year, winning first honours in the Military District No. 1 Rifle League. In the Dominion of Canada Rifle Competitions with approximately 600 teams across Canada competing, the C.O.T.C. first team won 14th prize in the January match, 3rd prize in February, and 39th in March. The second team placed 65th, 61st, and 72nd respectively.

Highest scorer on the M.D. No. 1 team was Sgt. P. W. Couse, 3rd year O.A.C. On the D.C.R.A. team W. R. Muschett, O.A.C. 1st year, was high man. The teams were coached by Capt. F. F. Morwick, former member of the Canadian Bisley Team, and Lt. J. C. Taylor.

University Air Squadron

First, second, and third year students of the O.A.C. University Air Squadron attended camp at an R.C.A.F. station in the spring where regular I.T.S. examinations were written. The number of students accepted in the squadron at the beginning of the fall term was reduced to fifty-two. Owing to a scarcity of instructors at No. 4 Wireless School, training was confined to aircraft recognition, airmanship, signals, and drill. Squadron Leader E. H. Garrard was again the local commanding officer.

In keeping with the general reduction of R.C.A.F. training in Canada, instructions were issued from Air Force Headquarters to the effect that all University Air Squadrons were to disband on December 31, 1944. Following these orders, all equipment was returned, the men were discharged, most of the documents and records were destroyed, and the U.A.S. office was closed. The men were transferred to the C.O.T.C. in January, 1945.

University Naval Training Division

The naval training begun at the Ontario Agricultural College in the winter of 1942-43 has been continued. Increasing numbers of students have taken the opportunity presented to undergo naval training.

During the college term of 1944-45 two courses were offered: one, a course for students who had no previous training; and the other, a more advanced course for students who had taken a full year's training the previous college year. Thirty-four students entered the first course and thirty-seven the second. Both groups took two weeks' summer training at Cornwallis, Nova Scotia, at the conclusion of the academic year.

Throughout the year the training was under the immediate direction of Lieutenant O. K. S. Russel, assisted by Leading Seamen, J. R. Ireland and S. J. Heyes, all regulars from H.M.C.S. "Star", Hamilton. Lieutenant-Commander G. P. McRostie was again the local commanding officer.

IMPORTANT EVENTS OF THE COLLEGE YEAR

Visitors from the Maritimes

On January 19, 1945, the College was visited by the Hon. W. F. A. Stewart, Minister of Agriculture for Prince Edward Island, Mr. C. Eric Boulden, Principal of the Nova Scotia Agricultural College, and Mr. R. W. Maxwell, Principal of the Agricultural School at Woodstock, New Brunswick. The three visitors were a delegation from a larger committee which has been set up to study agricultural education in the Maritime Provinces. While at the College they discussed various educational problems with members of the staff.

British Minister of Agriculture Visits O.A.C.

About one hundred men, including members of the staffs of the Ontario Agricultural College and Ontario Veterinary College, members of township councils, members of parliament and representative farmers attended a luncheon in the O.A.C. dining hall on Saturday, January 6, 1945, to hear an address by the British Minister of Agriculture, Robert S. Hudson. Premier George Drew accompanied Mr. Hudson to Guelph.

Following the luncheon, the Minister visited the O.A.C. live stock pavilion and barns where he inspected the live stock.

Visits of Members of Manitoba Legislature

On June 8, 1944, a party of six members of the Manitoba legislature, headed by the Hon. John C. Dryden, Minister of Education, opened a tour of educational facilities in Ontario by visiting the O.A.C.

Mr. Dryden addressed a gathering of directors of the Ontario Crop Improvement Association at a noon luncheon held at the College.

Dominion Judging Contests for Junior Farmers

All nine provinces were represented by boys' and girls' teams in the Dominion Judging Contests held at the O.A.C., November 21, 1944.

A noon luncheon was served in the Field Husbandry Building and the group met for supper in the Norfolk Street United Church, where they were addressed by Dr. G. I. Christie, President of the College.

For the first time since the annual contests began in 1931, teams from all nine provinces competed in one project, when nine entries were received for the dairy calf contest.

Western Ontario Junior Farmers' Conference Held at O.A.C.

With twenty-eight counties represented, the first Junior Farmers' Conference ever held in Western Ontario commenced a three-day session on January 22, 1945, at the Ontario Agricultural College.

Various members of the O.A.C. staff addressed the afternoon sessions, and evening entertainment programmes were presented in War Memorial Hall.

One of the highlights of the three-day conference was a banquet in the College dining hall on Tuesday evening, January 23, 1945, when the guest speaker was Premier George Drew of Ontario.

Superannuation of A. W. Mason

Because of ill health, Mr. A. W. Mason was granted superannuation from the staff of the Department of Field Husbandry on January 5, 1945.

Mr. Mason graduated from the Ontario Agricultural College in 1905. Immediately after graduation he worked as chemist with the Ontario Sugar Co. of Berlin, Ontario, and there gained an understanding of the sugar beet crop that served him well in later life. In 1907 he returned to the O.A.C. as Lecturer in Field Husbandry and he was connected with that department continuously in different capacities until his retirement.

Mr. Mason will be particularly remembered through his activities with the Experimental Union, and through his extensive acquaintanceship with individual seed growers. His work in field husbandry has left an indelible impression on the farming areas of Ontario both in the production of new varieties of field crops and in improved cultural practices designed to give more profit to farmers.

Superannuation of A. E. Whiteside

Mr. A. E. Whiteside was granted superannuation on account of poor health on March 31, 1944.

Mr. Whiteside has established a long-time record of employment at the Ontario Agricultural College. Born within sight of the College grounds in 1874, he started to work for Dr. Zavitz as a young lad of fifteen. He was attached continuously to what is now the Department of Field Husbandry, and contributed particularly to the neat appearance and efficient results of the experimental work with field crops. He will be long remembered by the farmers of Ontario for his keen interest in crop improvement, and for his eagerness to share his accumulated fund of agricultural experience with visitors to the experimental grounds.

Superannuation of Miss Louise Watt

In May, 1944 Miss Louise Watt, College Librarian, was granted superannuation. After graduation as B.A. from the University of Toronto, Miss Watt, who was born in Guelph, went to Scotland. For two years she worked in Edinburgh in the office of the Mission to Lepers. Proceeding to India she remained there ten years. She learned the Hindustani language and taught in a mission school.

On her return to Canada, Miss Watt took a course in Library Science at Simmons College, Boston. In June, 1928, she was appointed to the O.A.C. staff as Assistant Librarian and in February, 1930, she was made Librarian. Her gracious personality and the conscientious manner in which she fulfilled her duties won her the esteem of students and staff.

Farm and Home Week

Farm and Home Week was held June 12-16, 1944, with an attendance of over 15,000 for the week. An all-time record for attendance on any one day was set June 15th when more than 7,000 people visited the College.

The daily live stock parade continued to be one of the highlights of the week. The various departments of the College co-operated with the Department of Extension in erecting educational exhibits dealing with wartime problems in agriculture.

Alumni Reunion

The annual reunion of the alumni of the Ontario Agricultural College and the Alumnae of Macdonald Institute was held on June 17, 1944, with a large attendance.

Mr. E. H. Stoltz of Toronto was elected President of the Alumni Association, and Mr. J. T. Ziegler of Kitchener and Cornwall, Vice-President.

Fire on College Farm near Arkell, Ontario

On July 19, 1944, during a fierce electric storm the silo, feed room, and root storage building located on the live stock farm near Arkell, Ontario, were struck by lightning. The concrete block silo was only slightly damaged, but the feed room and root cellars were completely destroyed.

COLLEGE FUNCTIONS

Baccalaureate Service

The annual Baccalaureate Service for the graduating classes of the Ontario Agricultural College and the Ontario Veterinary College was held in Massey Hall on Sunday, March 26, 1944.

The speaker was the Rev. Stuart H. Brownlee, Rector of St. George's Church, Guelph.

Convocation for Students in Agriculture

Convocation for the Class of 1944 was held in War Memorial Hall on Tuesday, May 16, 1944. Seventy students received their degrees from the Honourable and Reverend H. J. Cody, President of the University of Toronto, who officiated in the absence of the Chancellor of the University, the Right Honourable Sir William Mulock.

Addresses were delivered by the Minister of Agriculture, the Honourable T. L. Kennedy, and President H. J. Cody of the University of Toronto.

War Memorial Hall was made available to the students for this important ceremony through the generosity of the Commanding Officer of the No. 4 Wireless School.

SCHOLARSHIPS, PRIZES, AND GIFTS

Ontario Wholesale Farm Equipment Association Prizes

The Ontario Wholesale Farm Equipment Association has donated \$100.00 in prizes to the members of the second year of the Ontario Agricultural College to be divided as follows:— First Prize, \$30.00; Second Prize, \$25.00; Third Prize, \$20.00; Fourth Prize, \$15.00; Fifth Prize, \$10.00.

These prizes will be awarded to the members of the class who have the most thorough working knowledge of machinery used in the operation of the Ontario farm.

Pioneer Feed Awards

The Western Ontario Flour Mills Co. Ltd. is offering an annual award of \$150.00 to three fourth year students in the Animal Husbandry Option. It will be divided as follows: First Prize, \$75.00; Second Prize, \$50.00; Third Prize, \$25.00.

This award will be based on general academic standing and proficiency in live stock, poultry and nutritional studies, campus conduct, and ability to cooperate and participate in all student organizations and college activities. Special emphasis will be placed on rural background, experience, keen interest, and generalized knowledge pertaining to agriculture in all its aspects.

I.C.I. Scholarships

The Imperial Chemical Industries Ltd., has established agricultural scholarships at the Ontario Agricultural College for two boys from Malta. These scholarships cover the entire cost of the Four Year Degree Course together with living expenses for the entire period.

George Thake and Robert Pace were the successful candidates for these scholarships and will complete their first year at O.A.C. in April, 1945.

National Research Council Grant

During the year an application was made, through the Department of Bacteriology, for a grant from the National Research Council, Ottawa, to aid in research on the Occurrence and Distribution of Salmonella Types in Fowl. This application has been approved and the work on the project is progressing.

Airman's Portrait Presented to the O.A.C.

In 1942, Evan Macdonald, an outstanding Canadian artist who resides in Guelph, sought permission of the Commanding Officer of No. 4 Wireless School to paint a Wireless Air Gunner typical of those in training at the school. Permission being granted, a subject, whose home was in Toronto, was selected and his portrait painted wearing his flying suit.

This painting then went on exhibition in various parts of Canada to receive favourable comment. When the members of the 1945 Short Course at the Ontario Agricultural College desired to make a presentation to the College, their attention was called to Mr. Macdonald's painting of the Wireless Air Gunner. The artist felt that the Ontario Agricultural College was the logical place for his painting because it had housed these Wireless Air Gunners when in training. Consequently, he generously made a substantial reduction in the price of the painting thereby making it possible for the members of the Short Course to purchase it and present it to the College.

At a special gathering of the members of the Short Course, the President of the College accepted the painting "Wireless Air Gunner", on behalf of the College.

Gifts to the O.A.C.

Miss Sybil Tanner, Guelph, presented a pair of horns of the Bok or African Antelope to the College.

A portrait of the late William Duthie, noted Shorthorn breeder of Scotland, was presented to the College by Mrs. Z. A. Hall of Guelph.

Mrs. Norman Wallace of Guelph presented the College with a beautifully mounted Bird of Paradise.

Mr. Jas. T. Campbell, Chicago, Ill., presented the College with the original pedigree of a famous Clydesdale horse, Joe the Banker. This document has been placed in the records of the Department of Animal Husbandry.

Several pieces of the early equipment used in agriculture were presented to the College during the year;

Mr. Dan O'Neil, Paris, Ontario, made a gift to the College of a fork and wooden hames.

Mr. Howard Fraleigh, Forest, Ontario, presented the college with a one-way disc and seeder.

The College received an ox-yoke which was used in clearing the land in the period around 1890 from Mr. Howard Smith of Manitowaning, Ontario.

RESEARCH AND SERVICE

Land Clearing

During the past year the members of Farm Forums have developed a keen interest in land clearing on areas under their supervision. The clearing of whole sections under the guidance of the Department of Agricultural Engineering is being undertaken. Safety rules and instructions in the use of explosives are being taught.

Labour-Saving Machines

During the year improvements have been made in the design of the sweep rake and the corn sheaf loader. Information in regard to the improved models of these labour-saving machines has been made available in a supplement to bulletin 427 (for the sweep rake) and in Circular No. 66, "Sheaf Loader Attachment for Corn Binder."

Farm Drainage

Assistance in a variety of drainage problems was given to 367 farmers. The outstanding feature of the year's work was the large number of systematic surveys made in various districts. Shortages of material and labour have continued to limit the amount of work which could be done and have necessitated carrying over to another year more than 150 requests for assistance.

Record Egg Production

In addition to meeting the demand for a 20 per cent increase in domestic consumption over pre-war needs, Ontario supplied almost thirty-three million dozen eggs for export to Britain, contributing 39.6 per cent of the amount supplied by the whole of Canada.

Flock Approval Programmes

Two flock approval programmes were operated by the Poultry Department in 1944. Under the Ontario Breeding Station programme, initiated in 1913, there was a total entry of 643 breeding flocks, containing 288,384 birds. All birds were tested for pullorum disease, some two and even three times. The total number of tests was 404,085.

In July, 1944, a programme of flock approval previously operated by the Federal Department of Agriculture was taken over by the Poultry Department and became known as the Ontario Accredited Poultry Flock policy. Over 600,000 birds from 2,100 flocks were inspected during the year.

Riboflavin in Breeding Ration

Further work on the use of riboflavin in breeding rations has confirmed an earlier report that this material is quite adequate to replace most of the natural occurring riboflavin in buttermilk powder, when suitable protein adjustments are made. A suggestion arising from previous work that there may be a seasonal variation in the requirements of riboflavin is being investigated at the present time.

Greenfeeds in Breeding Rations

In response to numerous enquiries concerning the possible use of silage for breeder rations, various forms of alfalfa, sprouted oats, and silage were studied with respect to their effect on hatchability. On the results obtained, silage cannot be recommended.

Rearing Ducklings to Market Age

Using young ducklings, progeny of the thirty-three year inbred line of Pekin ducks belonging to the Department, feeding tests were conducted with ground, rolled, and whole grains to determine the most efficient and economical type of feed. Whole grain proved unsatisfactory, but there was close relationship in the results between the ground and rolled grains.

Genetic Studies in Poultry

Work was continued in the development of fast feathering strains of Barred and White Plymouth Rocks, White Wyandottes, New Hampshires, and Chanteclers. The study of chick down colour in relation to adult plumage colour and colour sexing of Brown Leghorns was advanced. The inheritance of egg size production, and hatchability was further explored. Fertility and artificial insemination experiments were carried out, and some work was done on the use of stilbesterol and its effect in retarding sexual development of male chicks or as a substitute for caponizing.

Linseed Oil Meal

Research was continued in 1944 in an effort further to evaluate linseed oil in chick diets and the possible toxic effect of the cyanogenic glucosides which the meals contain in varying proportions. Results of this work support earlier research in 1943, indicating this is not a good source of protein supply for chicks.

Vitamin D Assays

The vitamin D assay programme included both routine assays of vitamin D preparations and investigational work designed to increase the accuracy and efficiency of the assay method. The acute shortage of vitamin D which existed at the beginning of the war is now no longer a serious problem since synthetic vitamin D is being made available in larger quantities.

Horn and Hoof Meal in Poultry Rations

An extensive study on growing chicks was conducted to determine the value as a protein source of a mixture consisting of cattle, calf, and hog hooves and cattle horns. This so-called "hoof and horn meal" proved to be of low value and a poor substitute for the commonly used protein materials.

Nutrient Content of Forage Crops

A joint study of forage crops begun late in 1943 by the Departments of Field Husbandry and Animal Nutrition was continued throughout 1944. The project involves protein and mineral determinations of forage plant varieties and mixtures of these. The information obtained will be of great assistance in planning a satisfactory forage plant breeding programme.

Analysis of Canadian Feeds

Analysis of Canadian feedstuffs for crude protein, ether extract, crude fibre, calcium, phosphorus and manganese were carried out on several hundred samples during the period from 1939 to 1943. The accumulated data were compiled in 1944 and submitted for publication.

Apiary Inspection and Disease Control

During the year, 7,832 apiaries, consisting of 203,730 colonies were registered.

Inspections were made of 3,466 apiaries, consisting of 54,298 colonies. Disease was found in 2,397 colonies, or 4.4 per cent of those inspected.

Over 300 samples of bee diseases have been diagnosed microscopically. Many samples of honey have been graded.

Queen Rearing Project

A study has been begun of the possibility of rearing in Ontario queen bees which may be better suited to local conditions than those now imported from the southern United States. Pelee Island seems to be well suited for this undertaking. Accordingly plans have been completed for the establishment of an experimental breeding station on Pelee Island.

Nosema Disease

A survey of Ontario apiaries carried out during the past two years has shown that *Nosema apis* is widespread and is associated with much loss both during the winter and just at the beginning of the honey flow. Preliminary tests have been started on the use of drugs on the infected colonies.

Bacteriological Analysis

Two hundred and eighty-six samples of well water from farms and dairies were analysed. One hundred and thirty-five samples of milk were tested for off-flavours, mastitis, and other abnormalities.

Legumes Cultures and Lactic Starters

More than 7,000 cultures for legume seed inoculation were made and forwarded to seedsmen, agricultural representatives, and farmers. One hundred and seventy-one lactic starters were forwarded to dairies and creameries for butter, buttermilk, and cheese manufacture.

Pullorum Antigen

For the work in pullorum blood testing of the Ontario Breeding Stations and other flocks and for distribution to private laboratories, a total of more than one million c.c. of pullorum antigen was prepared, of which 282,000 c.c. was pullorum variant antigen.

Fumigation of Incubators.

The efficiency of the fumigation methods used to destroy the pullorum organism in incubators and hatching compartments was investigated by trips of inspection and by experiments. Where suitable recommendations established by previous work were followed, reduced mortality of baby chicks was noticeable.

Control of Water-core in Turnips

A spray schedule has been developed which has proved to be a practical means of control as demonstrated on more than 500 acres of turnips in widely scattered districts of Western Ontario during 1944. Lack of adequate spray equipment restricts the use of this method. A borax dust preparation has been developed which shows promise for practical use.

Chemical Weed Killers

Experiments are being continued to test the effectiveness of three different weed killers in killing three pernicious perennial weeds and Poison Ivy.

Spraying to Control Rust of Red Pine

Experiments have been begun to test the effectiveness of two types of spray in the control of rust in red pine plantations.

New Sprays for Apples

Flotation Sulphurs and Micro Flotation Sulphurs, representing a comparatively new class of fungicides, give promise of being very effective in the control of Scab and causing little or no foliage injury.

Soil Testing Service

During the year 3,558 samples of soil sent into the soil laboratory from farmers in many different parts of the Province were examined and recommendations for treatment made for each.

Dairy Chemistry Service

Sixteen lots of standard solutions were prepared and sent out to dairy plant testing laboratories. The following materials were analysed: 100 samples of milk, 96 samples of cheese, 12 samples of whey, 2 samples of butter, 2 samples of rennet extract, 2 samples of indicator, 1 sample each of cleaning compound, cheese salt, boiler compound, and residue, and 1 special solution.

Tobacco District Advisory Service

More general occurrence of diseases in the greenhouse tobacco beds greatly increased inspection work over the preceding year. A new tobacco disease, encountered in some fields in 1943 and as yet unidentified as to causal organism, was found to be more wide-spread in 1944.

Soil Conservation

A visit to Ontario by a member of the United States Soil Conservation Service for consultation on soil conservation problems, and the study of soil conservation methods and field operations in the United States by two members of the soil survey staff are assisting in the development of a soil conservation programme in Ontario. Need for such a programme is shown by the rapidly growing interest in this subject and by the increasing demand for advice and recommendations on soil-conserving practices.

Soil Surveys

The regular programme of soil surveys in both Southern and Northern Ontario was considerably advanced during the year. The Report of the Soil Survey of Carleton County was published in 1944. Progress is being made in the preparation for publication of reports for Durham County, Prince Edward County, and North-eastern Ontario. The Report of the Reconnaissance Soil Survey of Parts of North-western Ontario will be available for distribution early in 1945.

Fertilizer Demonstrations and Experiments

The study of fertility treatments in a four-year rotation was continued at seven centres. Final results will be available in 1945.

Extensive tests were conducted to compare the application of fertilizers in corn and potatoes by the plough-sole method with application by drill. With potatoes the results were definitely favourable to plough-sole application.

Minerals and Vitamins in Canadian Cheese

Experiments conducted over a twelve-month period show that about 61 per cent. of the calcium originally present in the milk is retained in cheddar cheese; of the phosphorous, 53 per cent. is retained, and of the riboflavin

content about 23 per cent. The balance of the minerals was almost completely accounted for in the whey; of the riboflavin, approximately 66 per cent. was found in the whey.

Yeast and Mould Service

More than 1758 churnings of butter were analysed during the year for yeast and mould content. Records show considerable improvement by many creameries which have consistently taken advantage of this service. Yeast and mould merit lists of creameries are published quarterly.

Moisture Loss and Colour Defects in Printing Butter

Investigations have shown that the printing losses and colour defects encountered in the use of power cutters may be avoided by efficient working of the butter to the proper stage before printing.

DDT and 666

Investigations of the new insecticides designated by these abbreviations has been carried on. While neither is yet available for general use both give great promise for the control of a variety of insects. It appears that DDT is one of the most outstanding insecticidal discoveries of all time.

Tobacco Cutworm Control

Results obtained in continued co-operation with the Dominion Division of Entomology showed further proof that bran is an efficient carrier, that molasses is not an essential ingredients in baits, and also that smaller amounts of poisons, especially paris green, may give satisfactory results.

Mosquito Survey

In co-operation with the Dominion Division of Entomology and at the request of Canadian Military Headquarters a survey is being made to check the occurrence of malaria-carrying species of mosquitoes in areas surrounding certain military hospitals.

Winter Wheat

An extensive programme for the improvement of winter wheat was begun early in 1943. An excellent collection of winter wheat varieties has been secured for investigation. To develop this new breeding material as rapidly as possible, a crop was grown in the greenhouse during the winter. Considerable experimental work has been necessary to meet the problems arising in this connection particularly with regard to proper "vernalization" and the most effective use of artificial lighting. An extensive system of regional testing of winter wheat has been put into operation and very satisfactory progress has been made in setting up a winter wheat testing laboratory.

Spring Barley

New crosses were made and progeny testing for malting quality and protein content was increased. While only preliminary progeny testing has been possible to date, several of the new strains show a low enough protein content to classify as possible malting barleys and several others had a high protein content.

Forage Crop Improvement

The fourth season's comparison of the yield of our improved grass and clover varieties with those of commercial strains has been completed. Tests show the desirability of the new productions and have furnished sufficient evidence to obtain a license for nine improved varieties of grasses and four improved varieties of legumes. These new varieties are being considered for registration in the near future. The acquisition during the year of two new properties for the production of forage seeds will eliminate one of the greatest difficulties in the distribution of the new varieties, the lack of an adequate system of increasing new strains.

Regional Crop Testing

In order to test on different types of soil and under varying climatic conditions the many new varieties of field crops which are being developed, 103 variety tests were conducted during the past year on 4,500 plots in co-operation with farmers in representative grain growing areas.

Potato Tests

Of the early varieties tested in the investigational area of Alliston, Warba and Irish Cobbler appear to be the most generally suitable. Of the later maturing varieties Katahdin, Chippewa, and Sebago are serving a useful purpose but are still far from being ideal.

Results of tests of the vitamin C content of potatoes in storage show a significant difference in the vitamin C content of the varieties of potatoes but very little difference resulting from methods of storage or containers used.

Greenhouse and Garden Advisory Service

Over 3,000 samples of soil from greenhouses and gardens were analysed as a part of this service. A partial survey has been made relating crop yield to soil analyses for greenhouse-grown tomatoes and cucumbers.

Gladiolus Test Garden

A total of 320 varieties was grown in 1944. Included in this number were 189 standard varieties, 76 new varieties planted for testing, 20 numbered seedlings for trial, and 35 small-flowered varieties. Public interest in the garden was keen and great interest was shown in the new variety trials.

Frozen Foods

The testing of varieties of vegetables for preservation by freezing was continued with special emphasis on corn and squash. All varieties tested gave better frozen products when they were fully cooked before freezing.

Evergreen Seedling Trees

In collaboration with the Ontario Department of Lands and Forests investigations are being made as to the possibility of harvesting and packing evergreen seedlings in the fall and storing them through the winter so that they may be available without delay for planting in the short spring season.

Harvesting Hay

Two methods of harvesting hay were compared. Fifty tons baled and trucked four miles required the services of six men for two days, while twenty tons stacked in the field required the services of five men for one-and-one-half days. The hay baled in the field showed little wastage, while there was a wastage of at least two tons when the stack was baled.

Cobalt Sulphate

Cobalt sulphate has proven to be effective in curing calves of wood chewing. It is suggested that this mineral may have a place in the feeding of older animals that are being maintained on certain types of soils in Ontario.

Use of Vitamin A

Large doses of Vitamin A have been used to prevent the occurrence of severe cases of acetonemia and the results indicate a benefit.

Length and Shape of Face of the Hog Related to Back Fat

In a co-operative study carried on by the Department of Animal Husbandry and the Production Services of the Federal Department of Agriculture, it is indicated that there is a definite relationship between the length and shape of face of a hog and the uniformity of thickness of back fat in the carcass. The face of medium length and with adequate width between the eyes and across the poll is related with more uniform back fat, while the extremely short face with the turned up snout is associated with excessive collar and shoulder fat covering.

ONTARIO VETERINARY COLLEGE

CONVOCATION

At the Convocation of the University of Toronto held on May 12th, 1944, the Chancellor conferred the degree of Bachelor of Veterinary Science (B.V.Sc.) on nineteen graduates.

COMMENCEMENT

The Annual Commencement and Presentation of Prizes took place on November 17th, 1944, in the Assembly Hall of the College. The Honourable T. L. Kennedy, Minister of Agriculture, presided. In the course of his address he expressed satisfaction that the College was maintaining a high standard of qualification for graduation in keeping with other learned sciences. He also referred to the leadership given in research work and hoped that continued progress would be made in the prevention and control of animal diseases.

STUDENT ENROLMENT

A total of 113 were enrolled. As in former years, students were in attendance from all the Provinces of Canada, also from other parts of the British Commonwealth and from the United States.

THE TEACHING AND EXECUTIVE STAFF

C. D. MCGILVRAY, M.D.V., D.V.Sc., *Principal: Contagious Diseases, Sanitary Science.*

W. J. R. FOWLER, V.S., B.V.Sc., D.V.M.: *Surgery, Anatomy.*

R. A. McINTOSH, M.D.V., B.V.Sc.: *Diseases of Cattle, Obstetrics, Therapeutics.*

F. W. SCHOFIELD, B.V.Sc., D.V.Sc.: *Pathology, Bacteriology.*

L. STEVENSON, B.S.A., M.S., B.V.Sc.: *Zoology, Fur-Bearing Animals.*

J. S. GLOVER, V.S., B.V.Sc.: *Milk and Meat Hygiene, Poultry Diseases.*

- *A. A. KINGSCOTE, B.V.Sc., D.V.Sc.: *Pathology, Parasitology.*
 F. J. COTE, B.V.Sc.: *Canine and Feline Diseases.*
 V. R. BROWN, B.V.Sc.: *Anatomy, Hygiene.*
 G. CAIRNS, B.V.Sc., M.R.C.V.S.: *Sporadic Diseases, Hygiene.*
- *A. F. BAIN, B.V.Sc.: *Bacteriology.*
- *R. T. INGLE, B.V.Sc., M.Sc.: *Pathology.*
 A. H. KENNEDY, B.S.A., B.V.Sc., D.V.Sc.: *Pathology, Parasitology.*
 C. E. PHILLIPS, B.V.Sc.: *Pathology, Bacteriology.*
 H. T. BATT, B.V.Sc., M.V.Sc., Ph.D. (Cornell), Certificat de l'Ecole d'Alfort (France):
Histology, Physiology.
- *D. L. T. SMITH, B.V.Sc.: *Serology, Poultry Diseases.*
 W. B. DURRELL, B.V.Sc.: *Serology, Poultry Diseases.*
 A. L. DUNBAR: *Jurisprudence.*
 A. L. SHEPHERD: *Executive Clerk.*
 MRS. W. A. BUIE: *Secretary.*
 MISS M. URQUHART: *Stenographer.*
 MISS E. SHEPHERD: *Stenographer.*
 MISS J. McDONALD: *Stenographer.*
 MISS H. WHYTE: *Stenographer.*
 MISS M. S. NAISMITH: *Stenographer.*
 MISS P. MOORE: *Stenographer.*
 MISS O. SZOMBATTY: *Technician.*
- * *On Military Leave.*

ADMISSION REQUIREMENTS AND COURSE OF STUDY

The prescribed course of study qualifies for the degree of Bachelor of Veterinary Science (B.V.Sc.) and extends over a period of five years. The requirements for admission come under the jurisdiction of the University of Toronto. In order to gain entrance, applicants must furnish Junior and Senior Matriculation certificates, or Junior Matriculation certificate and a certificate covering the satisfactory completion of the first year in a degree course at a recognized Agricultural College or University. The final examinations for graduation likewise come under the jurisdiction of the Senate of the University, and the examiners are appointed by the University. Graduate courses leading to the advanced degrees of Master of Veterinary Science (M.V.Sc.), Doctor of Veterinary Science (D.V.Sc.) and Diploma in Veterinary Public Health (D.V.P.H.) are available under the School of Graduate Studies of the University.

A detailed outline of the entrance requirements and the course of studies is contained in the College Calendar, which is available to those interested. In addition to the regular undergraduate course outlined in the calendar, special short courses were provided as follows:

PUBLIC HEALTH COURSE

A special course of study in Public Health work was given Senior students by the Director and Staff of the School of Hygiene and Connaught Laboratories of the University of Toronto. The course included the following subjects:

Public Health Administration, Principles of Sanitation, Communicable Diseases, Food-Borne Infections, Interpretation of Laboratory Findings, Bacteriology of Enteric-Infections, Human Parasitic Infections, Inspection of Water Supplies, Inspection of Sewage Disposal, Inspection of Restaurants and Bottling Plants, Industrial Hazards in Meat Packing Industry, Ventilation and Fumigation, and Dairy Sanitation.

SPECIAL COURSE FOR FUR BREEDERS

During the month of June a course was provided for those engaged in the rearing of fur-bearing animals. About two hundred and seventy-five attended. The course was arranged in co-operation with the Ontario Fur Breeders' Association and comprised lectures and demonstrations on the following subjects:

Pearl Platinum Foxes, Scientific Methods in Fur Animal Industry, Norwegian Platinum Fox, Government Fur Grading, Silver Fox Breeding, Fantasy in Fur, Mating Problems and Practices, Mink Breeding, Mutation Mink, Genetic Principles in Breeding Mutation Mink, Mink Breeding Problems, and Discussion of Principles and Practises in Fur Breeding.

REFRESHER COURSE FOR VETERINARIANS

During the month of July, a special course for graduate veterinarians was provided in co-operation with the Ontario Veterinary Association. There were approximately 175 in attendance and the programme embraced the following topics:

Sulphonamide Preparations and Their Value in Veterinary Medicine, The Determination of Sex, A System of Bookkeeping for the Veterinarian, Foetal Monstrosities with Reference to Their Clinical Aspects, Treatment and Control of Parasitism in the Horse, Acidophilus Milk Therapy in Calf Scours, Acetonemia and Its Treatment, The Use of Vaccines in the Treatment of Acute and Chronic Mastitis, and Routine Blood Testing for Bang's Disease.

CLINICAL SERVICE

This service is provided for veterinarians and live stock owners where clinical assistance is desired. Animals of all classes were admitted for diagnosis, medical and surgical treatment as follows:

Horses:—The cases submitted were largely surgical in character and included cases of poll-evil, fistulous withers, roaring, hernia, cryptorchidism, dental disease, tumours, hoof disease, lameness, skin diseases, retention of after-birth, dystokia, nymphomania, and leukorrhœa. The diagnosis of pregnancy was also conducted.

Cattle:—Many of the cattle cases were of an unusual character and frequently represented herd conditions. The predominating diseases included sterility, mastitis, calf scours, calf pneumonia, necrotic stomatitis, nutritional diseases, retention of the after-birth, dystokia, hypocalcemia and acetonemia.

Swine:—These comprised surgical cases and diseases prevailing in litters and herds. The surgical cases comprised cryptorchidism, scrotal and umbilical hernia. Among the diseases affecting litters and herds were gastro-enteritis, pneumonia, anemia and other nutritional diseases, parasitic diseases, erysipelas, hemorrhagic septicemia and necrotic enteritis.

Sheep:—Many of the sheep cases were parasitic infestations more especially stomach worm disease. Other conditions comprised nutritional diseases, pregnancy disease, stiff lamb diseases, tetanus following docking and castration.

Small Animals:—These comprised dogs and cats submitted for surgical attention such as spaying. A large number of diseased conditions were also treated including digestive disturbances, distemper, renal diseases, respiratory diseases, mange and other skin diseases.

Fur Bearing Animals:—The diseases of fur bearing animals and general problems of the fur breeding industry were given the required attention by the Provincial Zoologist. Food toxemia has ever been the main cause of loss on fox and mink ranches. Out of every one hundred carcasses submitted for laboratory examination, evidence of food toxemia was revealed in thirty-two cases. There has been considerable interest manifested during the past year in the rearing of Angora and Chinchilla rabbits.

EXTENSION WORK RELATING TO BANG'S DISEASE

In co-operation with practising veterinarians and live stock owners the work relating to the control of Bang's disease in cattle (Contagious Abortion) has been further expanded under the following plans:

1. *Testing of Individual Herds:*

Under this plan 48,493 cattle were tested of which 34,160 were Negative, 10,805 were Positive, 3,233 Doubtful.

2. *Testing of Dairy Cattle for Export:*

These tests were made to facilitate the exporting of dairy cattle to the United States and comprised 7,736 cattle, of which 7,262 were Negative, 260 Positive, 214 Doubtful.

3. *Supervised Calfood Vaccination:*

Under this plan, vaccination was undertaken in 4,226 herds. A total of 52,603 calves between four and eight months of age were vaccinated and check tested 30 days after being vaccinated.

4. *Testing of Herds in Prescribed Areas:*

Under this plan 12 areas have been established as follows:

1. *Schomberg Area:* Includes 287 herds comprising 3,769 cattle.
2. *Northumberland Area:* Including 189 herds comprising 2,888 cattle.
3. *Stormont Area:* Includes 62 herds comprising 1,184 cattle.
4. *Maxville Area:* Includes 52 herds comprising 1,502 cattle.
5. *Vars Area:* Includes 41 herds comprising 1,316 cattle.
6. *Durham Area:* Includes 39 herds comprising 480 cattle.
7. *Carp Area:* Includes 77 herds comprising 1,798 cattle.
8. *Orono Area:* Includes 18 herds comprising 171 cattle.
9. *Almonte Area:* Includes 15 herds comprising 185 cattle.
10. *Brockville Area:* Includes 10 herds comprising 309 cattle.
11. *Vaughan Area:* Includes 73 herds comprising 1,327 cattle.
12. *Appleton Area:* Includes 166 herds comprising 2,787 cattle.

RESEARCH AND INVESTIGATION

During the year quite a little time was devoted to research and investigational work. Some of the problems dealt with are briefly summarized herewith:

Mastitis in Cattle:—This disease has formed the major project of the year. Hundreds of samples of milk have been cultured and the organisms responsible for the infection identified. Herd bacterins have been prepared in many cases. Recently penicillin has been employed in the treatment of this serious disease with encouraging results.

Haemorrhagic Septicemia in Swine:—This important disease of swine has received further attention both from the standpoint of diagnosis and treatment. A simple and reliable laboratory method of diagnosis has been developed which has proved to be valuable in the recognition of this disease.

Salmonellosis in Pigs:—An investigation was made into this disease. It is apparently wide-spread in the Province and the cause of considerable loss. Bacterins have proved to be of definite value in treatment.

POULTRY DISEASES LABORATORY SERVICE

This consists chiefly in the routine examinations of diseased poultry sent or brought to the laboratory. Only one serious outbreak of disease was encountered during the past year. This was in a flock of 225 Barred Rock hens. In less than three days fifty-four birds died suddenly without any previous symptoms of sickness being observed. From the livers, hearts and intestines of the birds examined a hemolytic streptococci was isolated. No deaths occurred in the flock after the administration of sulphanilamide. Omphalitis (navel ill) was encountered quite frequently and in many cases was found to be associated with *S. pullorum* infection. Advice is always given regarding the handling of a flock to prevent the spread of infectious disease.

The number of specimens received during the past year totalled 3,269 and the diseases and conditions found are shown in the following list:

Disease or Condition	Total
<i>Adult Pullorum Infection</i>	123
<i>Ascites</i>	2
<i>Avian Diphtheria</i>	11
<i>Coccidiosis</i>	636
<i>Coryza and Roup</i>	18
<i>Enteritis</i>	18
<i>Enterohepatitis</i>	33
<i>Laryngotracheitis</i>	16
<i>Leucosis</i>	97
<i>Pullorum Disease in Chicks and Poults</i>	1094
<i>Omphalitis in Chicks and Poults</i>	55
<i>Omphalitis Associated with Pullorum Disease</i>	160
<i>Tuberculosis</i>	55
<i>Other Infections</i>	76
<i>Impaction (Crop, Proventriculus, Gizzard or Oviduct)</i>	6
<i>Eversion</i>	7
<i>Injuries</i>	23
<i>Nutritional Conditions</i>	439
<i>Ruptured Liver</i>	13
<i>Ruptured Oviduct</i>	5
<i>Tumours</i>	19
<i>Worms (Ascaridia)</i>	113
“ (<i>Capillaria</i>)	41
“ (<i>Large Tapes</i>)	37
“ (<i>Minute Tapes</i>)	32
“ (<i>Ascaridia and Tapes</i>)	12
<i>External Parasitism</i>	11
<i>No Evidence of Disease or Putrid</i>	117
<i>Totals</i>	3269

BIOLOGICAL LABORATORY SERVICE

Preparation and Distribution of Antigen:—5,316 test doses of *Brucella abortus* antigen were distributed to veterinarians for the agglutination test for Bang's disease.

Preparation and Distribution of Fowl Pox Vaccine:—252,350 doses of vaccine were prepared and distributed for the vaccination of poultry by the *Johnson Stick Method* for the prevention of Fowl Pox.

Agglutination Tests:—During the year 84,694 blood samples were received to be submitted to the agglutination test for Bang's disease. Included in this number are samples from cattle intended for export or exhibition purposes, from calves in herds under our calfhood vaccination plan, and from cattle in herds in prescribed areas. The results of these tests are shown in the following table:

	Negative	Positive	Doubtful	Total
<i>Routine Samples</i>	34,160	10,805	3,233	48,198
<i>Export or Exhibition Samples</i>	7,262	260	214	7,736
<i>Calfhood Vaccination Samples</i>	1,449	16,844	695	18,988
<i>Prescribed Area Samples</i>	8,847	432	493	9,772
<i>Totals</i>	51,718	28,341	4,635	84,694

Routine Examination of Milk and Cream Samples:—Routine and investigational tests were made on approximately 600 samples of milk and cream submitted to the laboratory from time to time. These tests included fat and total solids determinations, standard plate counts, coliform, reductase, phosphatase and various mastitis tests.

During the year a large volume of correspondence has received attention, together with personal interviews with those seeking advice regarding their animals. The demand for veterinary extension, investigation and research work has noticeably increased. This is particularly evident in connection with the adoption of calf vaccination as an aid in the control of Bang's disease in cattle. With the increased demand for these services the entire staff has been exceedingly busy and have performed their duties faithfully. Efforts have been directed towards maintaining a high standard of efficiency and all expenditures have been carefully checked and kept at a minimum cost.

KEMPTVILLE AGRICULTURAL SCHOOL

The Kemptville Agricultural School was officially transferred back to the Ontario Department of Agriculture by the Department of National Defence during the month of May, 1944, after having been occupied as an Administration School by the Canadian Militia since November, 1942.

A satisfactory adjustment on repairs to buildings was arrived at by the Department of National Defence, the Ontario Department of Public Works and the Ontario Department of Agriculture. The Administration and Residence buildings were made ready for the resuming of Agricultural and Home Economics classes, both of which were painted and repaired. The necessary alterations and re-establishment of Soils, Home Economics and Biology laboratories and class rooms were completed by November 1st. Only temporary changes were made in the Live Stock Pavilion and Agricultural Engineering buildings to permit the holding of classes.

Additional equipment taken over from the Department of National Defence included two Loctave huts, kitchen stoves, racks, refrigeration plant and water tower, all of which were a needed addition.

Owing to the fact that the members of the Senior Year in Agriculture were permitted to transfer to the Ontario Agricultural College at the time the Department of National Defence took over, and many others enlisted in the Armed Services, no Senior Courses in Agriculture and Home Economics were offered. The enrollment in the Junior Agricultural Course was very satisfactory, being one of the largest classes in the history of the School. The enrollment in Home Economics was somewhat disappointing, due largely to the fact that advance information on the Course was not available until shortly before opening of classes. The applicants for the Dairy Course were away above availability to accommodate in the class rooms.

During the Christmas holidays, the School was the meeting place of the Junior Farmers' Conference for Eastern Ontario, at which time approximately 100 delegates occupied the residence and class rooms.

Early in October the Kemptville Agricultural School was host to the Junior Department of the Central Canada Exhibition, and throughout the year numerous farmers' and other groups met at the School.

The enrollment in the various classes was as follows:—

<i>Agriculture — Junior Year</i>	41
<i>Home Economics — Homemakers</i>	6
<i>Dairy — Cheese and Buttermakers</i>	59
<i>Junior Farmers' Conference</i>	100
<i>Central Canada Junior Fair</i>	385 boys and girls

Enlistments of members of the Staff in the Militia made it necessary to operate with a limited staff. Major F. J. Parish, Instructor and Extension

Specialist in Agricultural Engineering, and Capt. J. A. Berry, Instructor in English and Economics, being absent with the Services. Mr. A. D. Runions, Instructor and Extension Specialist in Animal and Field Husbandry, was transferred to the Department of Animal Husbandry, O.A.C., and Mr. J. A. Dalrymple was appointed as head of the Animal and Field Husbandry Department.

The Kemptville Agricultural School wishes to acknowledge the co-operation and assistance to the school by the following:—

Agricultural Representatives Branch, Dominion Experimental Farm Services, Dominion Production Services, Ontario Women's Institute Branch, Ontario Live Stock Branch, Dominion Health of Animals Branch, Ontario Field Crops, Seeds and Weeds Branch and the Agricultural Weekly and Daily Press.

DIVISION OF HOME ECONOMICS

The Home Economics Course of the Kemptville Agricultural School reopened in November 1944, the School having been taken over by the Department of National Defence for the two previous seasons.

The staff included the following members:—

RUTH B. RORKE, B.H.S. — Director of Home Economics.

MARGARET COBURN, B.H.S. — Instructor in Clothing and House Furnishing.

JEAN L. MALCOMSON, R.N. — Resident Nurse and Instructor in Health Education and Child Care.

MARION COOPER — Housekeeper.

Of those students who had completed one year prior to the closing of the School, there were not enough available to consider offering the Second Year of the Home Economics Course. It is our hope, however, that those students may at some future time be able to complete the second term.

Twelve applications were received but due to illness and other conditions, only six students were ready for the fall term.

The entire department was redecorated before the opening of the school term. Replacements in the Residence included the installation of a new Aga coal range in the kitchen, a newer type washing machine for the laundry and a new chesterfield and slip covering for the Assembly room.

Displays of work in Clothing and Applied Art were shown at the K.A.S. Royal on March 21st.

The students proved to be interested and enthusiastic regarding the course. Their work and progress throughout the year was satisfactory, as indicated by their high standing in the final examinations. Some of the group plan to return to complete the second term next year. A much larger registration is hoped for for next year, now that the Course has become re-established.

Gatherings Addressed

September 14th, 1944 — Morrisburg Women's Institute — "Christmas Suggestions"	40 members
September 19th, 1944 — Belleville Fair (Junior Day) — "Home Economics at K.A.S."	60 present
September 20th, 21st, 22nd — Short Course — Kemptville Women's Institute	75 present
October 17th — Kingston Area Convention — Women's Institute — "Home Economics at K.A.S."	200 present
October 19th — Ottawa Area Convention — Women's Institute — "Home Economics"	400 present
December 11th — Macdonald College Students — "W. I. Work"	35 present
January 11th — Kemptville Women's Institute — "Nutrition"	50 present

DIVISION OF ANIMAL AND FIELD HUSBANDRY

The School herd continues to supply breeding stock to farmers throughout Eastern Ontario with demand particularly heavy the latter part of the year for boars. The following animals were sold — 29 Yorkshire boars, 10 Yorkshire sows, 15 purebred Dairy bulls and 9 purebred Dairy cows and heifers. In addition to breeding stock being sold, 90 pigs were sold for slaughter.

A flock of purebred Oxford ewes was added to the live stock on the farm, mainly to supply classes for judging purposes.

In spite of a very dry summer, yields of farm crops were quite satisfactory with Fall Wheat, the Rideau variety, again yielding well. One of the highest yields of barley was threshed on the farm, with an average yield of over 60 bushels per acre of Nobarb II.

The following is a summary of crops produced:—

Fall Wheat (Rideau)	274	bushels
Spring Wheat (Coronation II)	64	"
Oats (Ajax)	247	"
" (Alaska)	407	"
" (Cartier)	322	"
" (Erban)	328	"
Barley (Nobarb II)	208	"
Mixed Grain	28.2	tons
Hay	115	"
Ensilage Corn	323	"
Potatoes (Irish Cobblers)	316	bushels
" (Green Mountain)	25	"
" (Katahdins)	84	"
Mangels	8.5	tons
Turnips	23.1	"

SEED CLEANING PLANT

The Seed Cleaning Plant, still in temporary location, serviced one hundred and seventy-five farmers from the surrounding district.

Small Seeds —

Alfalfa	9,426	lbs.
Sweet Clover	14,225	"
Timothy	16,570	"
Red Clover	2,062	"

Grains —

Oats	3,855	bushels
Barley	309	"
Beans	13	"
Wheat	26	"
Peas	12	"
Buckwheat	58	"
Flax	5	"
Soybeans	2	"
Millet	14	"

DIVISION OF CHEMISTRY, SOILS AND FERTILIZERS

The extension work of this Division is divided into the following projects:—

1. Permanent Fertility Trials

This type of project involves an area of from nine to twelve acres at three locations, where the field is divided into four equal sized plots receiving various fertility treatments throughout the rotational period. These plots are located at the following centres, with the length of period each has been conducted:—

Merrickville	6 years	Foxboro	4 years
--------------	---------	---------	---------

2. *Co-Operative Cereal and Variety Tests*

This work is carried on in co-operation with the Cereal Division of the Central Experimental Farm, Ottawa. In previous years rod row tests have been laid out in various selected areas but owing to scarcity of labor and travel restrictions, this has had to be discontinued. In order to main the securing of information as to character and production of several promising varieties, small observational plots were placed in different localities. Drill width tests of approximately 1/10 acre were conducted in four locations, using five varieties of oats and three varieties of barley.

3. *Demonstrational and Special Plots*

These projects included test trials on the following:—

1. Securing of residual data on previous applications.
2. Pasture fertility treatments.
3. The use of Boron in fertilizer on Turnips.
4. Fertilizer treatments on different potato varieties.
5. Spring vs. Fall applications of fertilizer.
6. Use of Plow Sole fertilizer attachment.
7. Comparison of different varieties of Soybeans sown with Hybrid Corn.

4. *Soil Testing*

This service has increased during the past year, after a lapse the previous year. The value of this service in ascertaining the proper fertilizer mixture and supplemental treatments is proving its value and is being made use of to a much greater extent than formally. Some twelve hundred and forty samples were tested and report of recommendations forwarded.

5. Forty-one Field and Special Meetings were attended, when soil problems and fertility practices were discussed.

DIVISION OF HORTICULTURE

The Spring and early Summer of 1944 proved to be one of the most satisfactory growing seasons experienced for several years, with the consequent result that early vegetable crops were particularly good. From the middle of July, however, until practically the end of the season, the weather was exceptionally dry and hot. With the exception of an occasional thunderstorm, no rain of any consequence fell, and for the first time during twenty-five years of temperature recording, the thermometer registered 100 degrees F. or slightly higher on three occasions.

With this exceptional heat and lack of rain, many succulent crops were seriously affected and spring plantings of bush fruits and strawberries did not make satisfactory growth. Some small patches of strawberries grown under a straw mulch produced, despite unfavourable conditions, quite satisfactory rows of plants.

A plot of Riverside Sweet Spanish onion grown in the School gardens produced a good crop with many of the individual onions weighing over twenty-five ounces and some over thirty ounces.

During the season, a certain amount of grading and filling was done to extend the north campus to the adjacent buildings, this area was seeded and some necessary trees planted.

During the summer season, and as far as limiting factors on transportation would permit, in response to requests from orchardists, vegetable growers and others on a variety of matters, visits to outlying districts were made. Demonstrations and talks on horticultural phases of work were made to Community groups on orcharding, pruning, spraying, vegetable gardening, a Community Recreation Park, and on insect and disease control.

Classes in Agriculture and Domestic Science were again resumed in the Autumn, and lectures and practical instruction in Horticultural subjects, in Entomology and Botany were given to the student body.

A number of meetings were attended throughout the year and special extension work done in connection with the Eastern Ontario Export Food Show, that has added a fruit section to the other exhibits of bacon, cheese and honey. Several of the County Agricultural Representatives materially assisted in the matter of transportation to a number of orchard growers in their several districts.

Acknowledgement, with thanks, is made particularly to the Central Experimental Farm at Ottawa and the Horticultural Experiment Station at Vineland for stock and seed of new varieties for trial.

POULTRY DIVISION

The K A. S. poultry flock has had a very good year. The outbreak of Laryngotracheitis was controlled without any serious loss.

The plant is now in process of changing to a larger percentage of "Fast Feathering Rocks" as it is felt that this type of bird more nearly meets the demand for a good market chicken. We now have some five hundred birds of this type on the poultry plant and it is hoped to trap nest about two hundred pullets this fall. The cockerels from this group were all fully feathered at four weeks of age. This factor does away with the bare-backed cockerels so common in many flocks.

There is still a large amount of extension work being carried on as the following list will show:—

Farmers' Club Meetings	35
Women's Institute Meetings	8
Combined Meetings	34
Farm Demonstrations	20
Boys' and Girls' Club Meetings	4
Boys' and Girls' Flock Inspections	70
Farm visits re disease	230
Total attendance at meetings	2,500

DIVISION OF DAIRYING

The fifty-first session of the Dairy School for Eastern Ontario had an enrolment of fifty-nine students for the three months diploma course. One hundred and four applications were received for the course, and of these forty-five had to be refused admittance owing to lack of accommodation. The course was conducted under the Canadian Vocational Training, which provided a subsistence allowance for each student. This inducement undoubtedly contributed to the large attendance for this course. The registration shows the following eighteen counties represented:— Carleton 7, Cochrane 1, Dundas 5, Frontenac 5, Glengarry 1, Grenville 2, Hastings 5, Lanark 2, Leeds 7, Lennox and Addington 3, Nipissing 1, Northumberland 3, Ontario 1, Prescott 4, Prince Edward 2, Renfrew 4, Russell 3, Stormont 3.

At the conclusion of the course fifty-eight students wrote the examinations for the Dairy School Diploma and of these, fifteen passed with First Class Honors, thirty passed with Second Class Honors, and nine obtained Pass Standing. The Montreal Provision Trades Association awarded One Hundred Dollars (\$100.00) in prize money to stimulate competition among the students, and the S. F. Lawrason Company Limited, London, Ontario, donated a Silver Trophy to the student showing the best attitude to dairy work.

The bacteriological service supplying Lactic cultures to cheese factories in particular, and other dairy plants, was conducted from the Dairy Laboratories, throughout the year. During 1944 fourteen hundred and six of these cultures were supplied. Four hundred and fourteen cheese factories throughout the province applied for these cultures out of a total of five hundred and ninety-seven, or sixty-nine per cent. This aggregate percentage includes 72% of the factories in Eastern Ontario, 53.6% of the factories in Northern Ontario, and 40% of the factories in Western Ontario.

Dairy Chemistry services and supplies have been provided for twenty-nine cheese and creamery instructors in Eastern and Northern Ontario.

During the year thirty-eight visits were made to cheese factories, creameries and dairymen's meetings and addresses given in connection with the work of the school and the Dairy Branch.

HORTICULTURAL EXPERIMENT STATION

This report abstracts a few of the Station projects and activities under the general titles Research, Plant Breeding, and Extension. More detailed treatment of these projects and other Station work is included in the 1943 and 1944 (combined) report of the Horticultural Experiment Station, now in course of preparation.

RESEARCH

Project 371. A Comparison of Pruning Methods for Bearing Peach Trees.

These experiments were conducted at the Horticultural Experiment Station and at the Blackhall orchard near St. Catharines.

For bearing peach trees in their prime, fifth to eleventh or twelfth year, which were making satisfactory growth, heading into two-year wood or thinning of healthy laterals definitely reduced both crop and monetary returns. Under the conditions of these experiments growth was sufficiently maintained and yields and returns were highest where minimum pruning methods were practised. This involved removals of (1) dead, dying, and very weak wood, (2) low drooping branches, (3) branches having bad crotches, and (4) branches in a vertical position which would not have been pulled down by the weight of fruit.

Project 372. Methods in Training Peach Trees to the Modified Leader System.

At planting time the peach trees were pruned to a 45-inch whip, leaving two-bud spurs only where there was a scarcity of buds on the trunk. In each of five years, all trees were trained to the modified central leader system, two methods being employed to that end — (1) removal of excess shoots when they averaged about two inches in length, a few weeks after planting, and (2) removal of excess branches one year after planting. The two methods resulted in about the same size of tree but the second method is preferred because the tree, due to wider crotch angles, is less subject to breakage.

Even after exercising extreme care in retaining shoots with what appeared to be good angles at their point of origin there were, on the average, *three* weak crotches for every four trees under the shoot-removal treatment. For the branch-removal method there was only *one* weak crotch for every four trees. So important is the building of strong peach trees that deferment of permanent branch selection for one year after planting is recommended.

Project 341. French Mazzard and Mahaleb Seedlings as Rootstocks for Several Sweet Cherry Varieties.

In six orchards out of seven, the trees on Mahaleb are now larger than those on Mazzard roots. It would appear therefore, that the claim of dwarfing effect from Mahaleb is not justified under conditions in Niagara District, at least up to the eleventh year in the orchard. There has been no appreciable rootstock effect in time of coming into bearing in the three orchards where yield records are being obtained. In two of these orchards the trees on Mahaleb have outyielded those on Mazzard, but in the other orchard the opposite condition holds.

For some time it has been evident that Mahaleb does not stand "wet feet" nearly as well as the Mazzard rootstock. In the one orchard where drainage is not good five out of ten trees on Mahaleb are dead while only one out of ten on Mazzard is dead. The remaining trees on the Mahaleb root have been very much weakened. On soils at all questionable as to drainage, it would be unwise to plant sweet cherry trees on the Mahaleb root.

Project 392. The Effect of Exposure to Drying Conditions on Stand and Growth of Nursery Fruit Trees.

Dormant nursery fruit trees in good condition were left lying flat on the ground, one at a place, for varying lengths of time. In 1939 and 1940, exposure up to 24 hours caused no significant reduction in stand or growth. In 1941, 1942, and 1943 exposure for two days (48 hours) usually resulted in a slight decrease in stand up to 12 per cent, and a slight decrease in growth, up to 11 per cent. After seven days' exposure the average percentage stand ran from 92 per cent in apples to 37 per cent in peaches. Growth was reduced to a relatively greater extent than was the stand.

Project 402. The Use of Moist Peat Moss in Transplanting Fruit Trees.

On a fine sandy loam soil at Vineland there has been no advantage in the use of moist peat moss in transplanting nursery trees of apple, pear, plum, cherry or peach. Tests over a four-year period have not shown significant increases in either stand or growth of trees.

Project 431. Quantity and Quality of Fruit (Fresh and Processed) as Affected by Stage of Maturity at Picking Time.

In 1943 and 1944 three varieties of cherry, five of plum, three of peach, and two of pear were picked at regular intervals before, at, and after, optimum maturity. The summarized data show a steady increase in tonnage where picking was delayed until the optimum maturity stage was reached. This increase was accompanied by a corresponding improvement in quality as measured by sugar and acid content, edibility, and appearance, points which directly affect saleability and consumer acceptance.

In the *final week* before optimum maturity the cherries, European plums, and pears increased in weight from one to two per cent per day, and Shiro plums and peaches from three to five per cent per day. In a consideration of possible loss of fruit from dropping or bird damage this normal increase in tonnage should be taken into account.

In the same period there was a daily increase in sugar of about one per cent in cherries and pears, and two per cent in plums and peaches. The changes in total acid were somewhat more variable but, on the whole, there was less acid in the fruit picked at optimum maturity than in that picked one week previous. In conformity with the changes in sugar and acid, and other constituents not measured, improvement in eating quality up to the optimum maturity stage was noted.

Project 432. Experimental Shipments of Fruit from Vineland. (In co-operation with the Ontario Fruit Branch).

Eleven experimental shipments were made in 1944 to the following markets: Toronto, North Bay, Port Arthur, Montreal and Halifax. Four shipments were graded on size and seven on maturity. One of the latter was of Shiro plum but all other shipments were of peaches.

A new feature in 1944 was the selection by the shipping point inspector, of commercial packs of "doubtful" maturity to be sent along with the experimental pack. Most of these commercial lots were very hard, took a long time to ripen, and were subject to greater wastage from brown rot than were the experimental lots.

Peaches and Shiro plums picked at the time of, or just previous to, the disappearance of the green pigment from the ground colour carried well and gave consumer satisfaction. Fruit picked previous to this stage took too long to ripen and was of inferior quality both in the fresh and processed state. Left on the tree after the optimum picking stage the fruit was subject to excessive bruising in handling.

Toronto and North Bay consumers expressed a preference for Select peaches over No. 1 (2½" to 2¾") when sold at the same price, and for No. 1 over No. 2 even though the latter was priced 15 to 20 cents lower.

FRUIT BREEDING

The most extensive breeding projects are with the strawberry, raspberry, apple, cherry, peach, plum, pear, and grape. Somewhat less extensive work is under way with other fruits adapted to Ontario conditions. Table 1 summarizes all the fruit breeding work since its inception in 1913, up to, and including, 1944. Table 2 lists the varieties introduced by the Station, together with parentage and year of introduction. Table 3 summarizes grower and nursery distribution of Station introductions.

Table 1. Fruit Breeding Summary, 1913-1944.

	<i>No. of crosses or parentages</i>	<i>Hybrid plants set in field</i>	<i>No. of selections</i>	<i>No. of introductions</i>
Apple	197	6,636	42	...
Cherry	70	2,576	70	3
Peach	387	13,171	289	8
Pear	155	5,770	34	1
Plum	118	4,633	40	...
Grape	608	57,377	219	...
Blackberry	45	4,627
Raspberry	228	31,886	115	1
Currant	29	516
Gooseberry	83	4,220	17	...
Strawberry	366*	37,555	406	4
Totals	2,286	168,967	1,232	17

* There were 33 additional crosses, no plants set in field.

Table 2. Station Varieties. Parentage and Year of Introduction

NOTE:—The first two figures of the breeding number, as 16 for 1916, indicate the year of origin, i.e., the year of hybridizing.

Kind and Variety	Breeding Number	Parentage	Year of Introduction
SWEET CHERRY			
Velvet	160119	Windsor x open	1937
Vernon	160133	Windsor x open	1937
Victor	160138	Windsor x open	1925

EXTENSION

Spray Calendar for Fruits.

The "Alternate" calendars distributed experimentally in 1944 received the approval of growers generally and have therefore been adopted for general distribution in 1945. The new calendars give more complete information regarding the purpose of the various recommended sprays, this information being of particular value to the many newcomers to fruit growing.

Planting Distances for Fruit Trees.

In April 1943, a questionnaire was sent to all growers on the Niagara Spray Service asking for information on planting distance of bearing trees and young trees, and distance proposed for future orchards, of peaches, cherries, pears, and plums. Three hundred and fifty replies were received from 1,518 questionnaires sent out.

A summary of these replies shows a definite trend to wider planting. For example, 19.7 per cent of bearing peach trees are under 18 feet apart, 12.5 per cent of *young* orchards are under 18 feet, and only 5.4 per cent of future plantings are planned for under 18 feet. Conversely, in the "22 feet and up" distance the percentages are, 1.6 for bearing orchards, 2.2 for young orchards, and 18.2 for future plantings. For other kinds and varieties of fruits the trend in planting distances is similar.

WESTERN ONTARIO EXPERIMENTAL FARM, RIDGETOWN

The season of 1944 was fairly satisfactory for crop production at the Western Ontario Experimental Farm. The early season was rather wet and backward. This was followed by a period of hot dry weather which did considerable injury to the bean crop. The fall, however, was excellent. There was no early frost, which permitted good maturity for corn and other late maturing crops. The winter was rather severe and interfered with our winter program considerably. Roads were blocked for a period of over two months. Our Annual Farmers' Week had to be cancelled as well as several other series of meetings throughout Western Ontario which members of our staff had arranged to attend.

The program of the Experimental Farm was much the same as in the last few years. Besides the usual experimental and extensional work, the growing of foundation stock for hybrid seed corn was extended to nearly one hundred acres. We have for the first time sufficient first cross seed of all varieties and almost a year's surplus in most varieties. The sale of this seed was down somewhat owing to the large surplus of hybrid seed in the growers' hands from last year's record production.

A change has been made in the distribution of our seed beans. Up until this year beans were supplied to any growers making application for them. In many instances these growers just sold the beans for commercial purposes. We have now made arrangements with the Ontario Bean Marketing Board to handle all our crop. They intend to let it out to other seed growers and hope in this way to supply the commercial bean growers with a uniform supply of seed beans.

ANNUAL SALE

The annual sale of surplus live stock was held on August 30th. There was a large turnout, and prices were fairly satisfactory. The following is a summary of the sale:

15 bred sows averaged \$60.00; 14 sows bred about one month averaged \$38.20; 18 gilts averaged \$24.20; 8 boars averaged \$36.56; 3 shorthorn heifers averaged \$133.33.

This stock was distributed throughout South Western Ontario as follows:

Kent, 23 head; Essex, 11 head; Elgin, 11 head; Lambton, 9 head; Middlesex, 2 head; Outside counties, 3 head.

CATTLE

The shorthorn herd has been maintained at about the usual number. This year six baby beef steers were fed and marketed at the average age of thirteen months. These six head sold after deducting shipping costs for \$520, which figure compares very favourably with the amount of revenue which we received from feeding fifteen head of Hereford steers. They gained an average of 230 pounds and brought \$522 in revenue.

Cattle are kept on the farm for experimental purposes. There is a demand for shorthorns that are truly dual purpose in this section of the country; that is, that they are capable of giving sufficient milk to make them profitable and at the same time have good feeding qualities. An effort is being made to study the effect of handling these shorthorn heifer calves so that they can produce a suitable amount of milk for home consumption. Good results have been obtained for hand-feeding these heifers rather than let them nurse their dams. This appears to be the biggest factor in developing beef bred shorthorn heifers as milk producers.

Cattle are maintained at the farm on roughages that are unmarketable for any other purpose; some silage from immature corn, corn fodder, bean and soy bean straw are among the cheap unmarketable roughage in this section. These have been fed the last few years along with immature and cull corn on the cob put through the hammer mill as the chief ration. In the summer the cattle are used largely for testing out the different varieties of grasses and grass mixtures for pasture.

SWINE

The breeding herd of Yorkshires consist at the present time of sixteen sows and two boars. Our revenue last year from our pigs amounted to around \$6,000, a little over \$400 per sow. Seventy head of pigs were sold at our annual sale, a number of weaned pigs were distributed to the local swine club, some young boars were sold, and the remainder were marketed commercially.

Two years ago a survey of the district was made and Chester White pigs stood next to Yorkshires as a breed factor in the commercial pigs of the district. With this in mind, some experimental work has been done in comparing Chester-Yorkshire cross bred during the year. This work is not complete as yet, but indications are that these cross bred make excellent gains and are fairly economic pork producers, but fall down in the percentage of A carcasses.

During the year a number of pastures were tried out for pigs, but none of them equal alfalfa or marrow stem kale insofar as palatability and carrying capacity is concerned.

Hay cured on tripods and fed directly from the field gave better results than other alfalfa hay when fed to pigs of all ages.

Work which started in establishing a couple of inbred lines in our herd a couple of years ago is still continuing. We have at the present time two strains that are being developed. Experimental work will be carried on by using these two lines during the next year. It seems apparent that boars bred in this way give a little better results than do the sows, as we have had a few boars that have given excellent results when used on grade sows in the district.

FERTILITY MAINTENANCE

During the past six years a four-acre field has been divided into eight plots for the purpose of studying different methods of maintaining soil fertility. Plot No. 1 receives barnyard manure every four years. Red clover is ploughed down every second year and commercial fertilizer is used at the regular rate which is in general practice in the district. Plot No. 2 receives the same manure and green manure as Plot No. 1 but no fertilizer. Plot No. 3 receives only green manure. Plot No. 4 receives green manure and fertilizer. Plot No. 5 receives barnyard manure only. Plot No. 6 receives commercial fertilizer only. Plot No. 7 is left seeded down one year in six and receives manure and fertilizer the same amount as No. 1. Plot No. 8 is left seeded down for two years out of six and receives the barnyard manure and commercial fertilizer the same as Plot No. 1.

In 1944 the fall wheat and sugar beets were grown on these plots.

Plot		Wheat	Sugar Beets
1	yielded	40. bushels	17.2 tons per acre
2	yielded	27.5 "	14. "
3	yielded	15. "	10.9 "
4	yielded	35.8 "	11.2 "
5	yielded	28.3 "	12.1 "
6	yielded	35. "	11.8 "
7	yielded	39.2 "	16.3 "
8	yielded	43.3 "	16.8 "

From these figures it can plainly be seen that as far as the wheat crop is concerned the application of commercial fertilizer was definitely beneficial while in the sugar beets the advantage of humus seems to be more in evidence. This is also true on the years when corn or beans are grown on these plots.

PASTURE

For the past five years considerable study has been made of pasture grasses suitable for the district. A number of plots composed of individual grasses were put in as well as grass mixtures. This series of plots were put in in a low part of the farm and cattle were turned in to study the palatability of the grasses. On the type of soil used the grasses which gave the best growth throughout the year was orchard grass meadow fescue, parkland brome and Reed's canary grass. Ladino clover has been outstanding in the clovers. Of the grasses, orchard grass is standing up the best of these varieties. Parkland brome is by far the most palatable, but has suffered more than the other two grasses from being closely grazed. It also seems to be a little more susceptible to severe spring frost. Reed's canary grass produces the earliest grazing.

From observation made from these plots it would seem evident that a mixture of orchard grass, parkland brome, meadow fescue, Reed's canary along with ladino clover would give maximum pasture throughout the year for a permanent mixture.

In order to study the adaptability of the grasses, another plot was put in during the fall of '43 along with winter barley. It is too early to make predictions on the result of this plot at the present time. It is to be expected, however, that Reed's canary grass and ladino clover will not do as well under these conditions.

EXPERIMENTAL WORK — ERIEAU MARSH

At the request of the Onion Growers of Erieau Marsh, the departments of Chemistry and of Horticulture at the O.A.C., and Ridgetown Experimental Farm undertook to do investigational work in the marsh during the growing season. The onion growers have numerous growing problems, the chief of which is probably a yellowing of onions as they mature, causing a considerable loss of both quantity and quality of the product. This condition is especially bad in wet seasons.

It was felt by the departments of Agriculture concerned that it would first be necessary to make a general survey of the marsh and to make soil samples monthly throughout the growing season. This latter work was undertaken by this Experimental Farm and the samples were forwarded to the Department of Horticulture for analysis, 123 samples were taken from 29 areas in the marsh and analysed. At the end of the year the data collected was summarized and showed that the pH condition of the muck areas and the quantities of Nitrogen, Phosphorous, Potash, Calcium and Magnesium were suitable to the growing of onions and such other marsh crops as carrots, spinach and beets. The sand areas were found to be deficient in some of these necessary elements. As the analysis of areas in which yellowing of the onions occurred was the same as that in which the onions made normal growth, it was concluded that this condition could not be caused from lack of major fertilizing elements and that in all probability was due either to the lack of some minor element or to the depth of the water table. It was further decided that the investigational work should continue in 1945 to determine if the absence of minor elements or depth of water table were the causes of the yellowing condition.

During August a special investigational visit to the marsh was made by Prof. Ruhnke, Dr. J. H. C. Truscott, C. L. Thompson and J. J. Neilson.

During the winter a report of the progress made was given to the Erieau Onion Growers at a special meeting in Blenheim and was received by them with satisfaction and with the request that the work be continued; the growers gave ample assurance of co-operation with the investigators.

This work will be continued in 1945.

SUMMARY OF TOMATO FERTILIZER EXPERIMENT

In 1942 an experiment in fertilizing field tomatoes, (variety John Baer), was commenced and continued for three years. The two main objects were (1) to determine the effect of starting solution, 8 - 24 - 8, on total yield and earliness of maturity, (2) to determine the better methods of applying fertilizer.

Summary

1. Starting solution on the three-year average did increase earliness of maturity and total yield to the extent that the use of such solution is to be recommended to growers. Nevertheless neither increased earliness nor increase in total yield through use of starting solution is certain especially in fertile fields with abundant moisture at and following planting.
2. The methods of applying fertilizer were as follows:
 - (a) 1000 lbs. of 20% superphosphate applied on the mark and turned under. Then 200 lbs. of 10 - 0 - 25 applied two weeks after planting in bands one foot long, four inches deep and four inches from plant.
 - (b) 1000 lbs. of 2 - 12 - 10 fertilizer broadcast and worked in just before planting.
 - (c) 500 lbs. of 2 - 12 - 10 placed in trench after ploughing out double furrows, then soil thrown back on earth by cultivator; this to give a strip on bottom of furrow of twelve to fifteen inches fertilizer mixed with soil. Then 500 lbs. of 2 - 12 - 10 broadcast on surface and worked in.
 - (d) 1000 lbs. 2 - 12 - 10 in furrow as in (e).
 - (e) 1000 lbs. 2 - 12 - 10 applied in bands two inches wide, four inches deep and four inches from plants after planting.

These methods are listed above according to their results, the best one first, etc. The first four methods gave excellent results with little if any significant differences. The fifth method proved decidedly inferior to the other four. All gave very large increases over unfertilized plots though the plots each year were on fertile soil in good physical condition.

As these methods of application have been previously tested by other investigators it would seem that on fertile soil the grower can with profit use the method entailing the least expense and most suited to his liking.

WINTER BARLEY

Winter barley is becoming an important crop in South Western Ontario and is replacing spring barley in this district. For six years it outyielded any of the spring varieties at the Western Ontario Experimental Farm. At the present time only winter barley is grown on the farm. The three best varieties tested so far are Tennessee, Belgian and Wong. Wong stands up better than most other varieties and is free from beards. It has not been tested long enough to recommend it unconditionally, but it looks promising.

In eight years experience there has not been a single year of winter killing.

BEANS

White beans are an important crop in this district. The Michelite variety continues to give best results here. It is very resistant to disease, and the seed is uniform and has less culls than most varieties. It has an excellent quality as a cooker.

This year in co-operation with the Ontario Bean Marketing Board, plans are arranged to conduct a number of bean variety trial plots in other sections of the bean growing area.

Variety Plots, 1944

Baby Limas	34 bushels	Mich. Robust	*26 bushels
Michelite	32 "	Corvette	26 "
Ithaca Robust	31 "	Blue Pod	24 "
Guelph Robust	28 "	Pinto	23 "
E. F. R.	28 "	Yellow Eye	18 "
Wis. Robust	27 "	Red Kidney	16 "

SOYA BEANS

Soya beans have become a widely established crop in South Western Ontario. For Essex county A K variety is very widely grown. In Kent, Richland is popular, while in other sections Mandarin and O.A.C. 211 leads all other varieties. Under our conditions Richland and Mandarin have stood up better than other varieties which were more inclined to lodge. The following table gives the yields in the variety tests plots in 1944:

Mandarin	40 bushels	O.A.C. 211	34 bushels
A. K.	36 "	Harrow 813	33 "
Hudson Heights	36 "	Cayuga	30 "
Harmon	35 "	Kabott	25 "
Richland	34 "		

OATS

The oat crop is still of considerable importance in Western Ontario. On many farms the acreage is rather small but on most farms oats are still grown, but early varieties are by far the most popular. The following table gives the results of variety plots in 1944:

Ajax	88 bushels	Mable	75 bushels
Vicland	83 "	Vanguard	73 "
Erban	82 "	Cartier	70 "
Alaska	78 "		

WHEAT

Wheat is always an important crop in South Western Ontario, particularly in the bean growing areas, as it follows beans in the rotation with very little expense in working the land.

No experimental plots have been grown during the past two years except to co-operate with the Wheat Committee who are conducting extensive variety tests throughout Ontario. Wheat however is a main crop on the Experimental Farm, and two varieties are grown for seed purposes. In white wheat, Dawsons 61 was grown and in red wheat our own selection which is called Ridgetown.

CORN

The corn work in Ontario is done by the Ontario Corn Committee and to the Western Ontario Experimental Farm is designated the work of handling the crossing stocks and distributing them to the hybrid seed corn growers in the Province of Ontario. In all, crossing stocks of thirteen varieties of hybrids

are produces. In 1944, ninety-five acres of this material was produced. The varieties now grown are: Can. 240, Can. 255, Can. 275, Can. 279, Can. 355, Can. 531, Can. 606, Can. 645, Can. 625, Can. 696, Harvic 222, Harvic 300, Harvic 333.

Varieties of hybrid corn that may be produced in Ontario are recommended by the Ontario Corn Committee and are based on the results of tests grown under the supervision of the Central Experimental Farm, Ottawa; O.A.C., Guelph. Harrow Experimental Station and the Western Ontario Experimental Farm. Two of these test plots were conducted by the Western Ontario Experimental Farm, one at Ridgetown and the other at Rodney. In order to give the extent of this testing work, the following table is a report of the test plot at Ridgetown in 1944:

LICENSE TEST OF HYBRID CORN — 1944

Ridgetown Test

Planted May 13th

Harvested October 11th

NOTE: — Yield of shelled corn calculated on 15% moisture.

Experimental work as to origin of seed, cultural methods, fertilizer application, and cultivation tests are under way at the present time. Many of these experiments have been reported in other annual reports.

The following table will give an idea of the relative productivity of inbred seed first crosses and second crosses when grown together where open pollination can take place. Different results are obtained when these types of seed are grown under the regular cultural methods:

R3 inbred	35 bushels per acre
WF9 inbred	37 bushels per acre
R3 X WF9 first cross	67 bushels per acre
645 second cross	64 bushels per acre
23 X 29 first cross	58 bushels per acre
23 inbred	40 bushels per acre
26 inbred	37 bushels per acre

The above results were obtained in 1944. Experimental plots show clearly the increase in yield from crossing inbred lines.

Cultivation experiments show that the less cultivation done except for control of weeds gives the largest yields of grain.

Fertilizer application in the bottom of furrow did not show significant results in 1944. This method of application was also tried on soya beans, tobacco, potatoes, white beans and oats. None of these trials showed any greater yield than when the regular application of fertilizer was made.

GREENHOUSE

In order to test out the use of chemical soil treatments for nematodes in greenhouses and for weeds and fungus growth in tobacco beds, a number of chemical materials are being tried out at the present time. This work has not progressed far enough to report definitely, but results so far look promising, particularly for nematodes in the greenhouse.

POULTRY

A flock of Barred Rock poultry is maintained at the Experimental Farm. Very little experimental work is done with them. They are kept largely for distribution of hatching eggs and breeding stock.

There is probably more extension work done in this branch than in any other. Many farmers are assisted each year in their poultry problems and many visits are made to poultry farms throughout the district.

DEMONSTRATION FARM, NEW LISKEARD

The growing season of 1944 was drier than average with the exception of the almost daily rains July 20-31. Benefits derived from a proper crop rotation and soil management were quite marked on the Demonstration Farm. Crops were good and the fall work was completed in good time.

1944		Particulars	1943	
May	17	Commenced work on land	May	13
"	18	First grain sown	"	13
"	12	Turned cattle on pasture	"	29
June	2	Finished seeding	"	29
"	21	Started to cut hay	June	25
August	5	Finished haying	August	9
"	14	Started to cut grain	"	12
"	12	Cut second crop of alfalfa	"	23
"	18	Filled silo (alfalfa)	"	16
"	19	Finished cutting grain	"	30
September	19	Filled silo (corn)	September	16
October	3	Harvested vegetables and potatoes	"	24
"	28	Finished ploughing	October	25
November	6	Cattle brought in for winter	"	16

FIELD HUSBANDRY

Grain

All grain sown was treated with Ceresan. There was practically no smut and rust-resistant varieties were free from rust. The new seedings were an excellent stand and all wintered well.

Test Plots

Variety	Acreage	Yield per Acre		Days of Maturity	Remarks
BARLEY:					
O.A.C. 21	$\frac{2}{3}$	33	bushels	85	
Nobarb	$\frac{2}{3}$	31½	"	90	
Plush	$\frac{2}{3}$	33	"	94	Trifle late
Byng	$\frac{2}{3}$	33	"	94	Trifle late
Newall	$\frac{2}{3}$	31½	"	94	Trifle late
OATS:					
Vanguard	$\frac{2}{3}$	51	"	94	
Erban	$\frac{2}{3}$	49½	"	93	Stem rust
Ajax	$\frac{2}{3}$	55½	"	90	Very clean straw
Cartier	$\frac{2}{3}$	43½	"	85	
WHEAT:					
Reward	$\frac{2}{3}$	19½	"	92	
Regent	$\frac{2}{3}$	21	"	93	

Yields in the plots were generally lower than those in the larger fields.

Hybrid Corn

Hybrid corn was again tested this year. It was harvested in different milk stages according to variety and ensiled.

Variety	Date of Planting	Yield of Fodder per Acre		Date Harvested	Remarks
Canada 275	June 14	25	tons	Sept. 16	
Canada 355	"	24½	"	"	All varieties were well eared except 355. Stocks were fairly tall and slender with small immature ears on 355.
355 Large Flat	"	23	"	"	
279 Top Cross	"	21½	"	"	
Wisconsin 240	"	21	"	"	
Wisconsin 255	"	19	"	"	

Yields of corn crops were arrived at by weighing 1/1000 of an acre.

Peas

Canning factory peas were almost a complete failure as the early peas were damaged badly by frost on June 17. The late peas were completely ruined by aphids.

Hay

Mixture used: Alfalfa, 10; Timothy, 6; Red Clover, 4; 20 pounds per acre.

The yield and quality was exceptionally good. Alfalfa is increasing every year and has contributed considerably to the protein content of the hay and pasture. We expect that alfalfa will be our main hay crop in time. Yield averaged slightly over two tons per acre first cutting, second crop was used for ensilage and pasture.

Pasture

Our Blue Grass pastures are being slowly replaced by improved pasture mixtures.

Ensilage

Second crop alfalfa and hybrid corn were ensiled and the ensilage came out in excellent condition. No additional moisture was added to these crops. The alfalfa was ensiled when about 1/3 in bloom and nothing was added to it in the way of a preservative.

Main Field Central Crops

Variety	Acreage	Date of Planting	Yield	Date Cut	Remarks
Dawson's Golden Chaff Fall Wheat	2	Aug. 23	51½ bus.	July 30	Discontinued
<i>Mixed Grain</i>					
O.A.C. 21 Barley					
Cartier Oats	18	May 24	853½ "	August 14	
Nobard Barley	10	May 20	557½ "	August 18	Badly lodged.
O.A.C. 21 Barley	14½	May 20	234½ "	August 13	Badly frozen June 17.
Regent Wheat	10	May 18	259½ "	August 20	
Ajax Oats	4	May 23	169½ "	August 19	Ground very dry. Grain came up uneven.
Cartier Oats	13	May 25	743 "	August 18	
Erban Oats	8	May 18	500 "	August 19	

The yields from varieties tabulated in the above synopsis should not be compared as some fields are more fertile than others.

LIVESTOCK AND POULTRY

The livestock breeding work has been carried on much the same as usual, chiefly supplying foundation stock to settlers, assisting farmers in the purchase of stock from other districts and demonstrating proper care and management of herds and flocks.

The Annual Auction Sale was held on August 16th. There was an average crowd and fair prices were realized.

Horses

Seven horses were kept and no foals were raised.

Cattle

The Shorthorn herd has been increased to 53. Four R.O.P. records were completed. Official R.O.P. herd test averaged 4.3% for the year. Nine bulls were sold for breeding. Four head of cattle were sold to the butcher. Our heard sire Aimshaugh Champion was sold for meat and the services of the O.A.C. Ranson 135th has been obtained from the Ontario Agricultural College.

Swine

Our breeding stock was again wintered in an outside hut and fed grain in self-feeders and clover on the snow. This method of wintering stock proved quite satisfactory, and also reduces the cost of labour as well as keeping the sows in better health.

Five sows farrowed good healthy litters with an average of 10. All young pigs were fed Ferris Sulphate and treated for internal parasites.

Thirteen boars and eighteen sows were sold for breeding purposes, and twenty-three for meat.

Sheep

Our flock was reduced to approximately 30 ewes, two-thirds of which are purebred Oxfords. We have continued our grading up programme of grade Suffolks and Hampshires and have demonstrated that a good flock can be developed when a purebred ram of the same breed is consistently used. Four purebred Hampshire ewes were purchased as a nucleus for a Hampshire flock.

There was a good demand for breeding ewes and rams. Thirty-three sheep were sold for meat, and nineteen were sold for breeding.

All our grade lambs graded No. 1 at the Lamb Fair selling at 11½ cents.

Poultry

Approximately four hundred and fifty Barred Plymouth Rock pullets were put in the laying pens. Culling was practiced throughout the winter. There was a good demand for hatching eggs. Seven hundred and eleven baby chicks and four hundred and eighty-eight cockerels were sold. Excellent reports were received on the chicks distributed.

Poultry continues to be the most lucrative division.

HORTICULTURE

Farmers were assisted in laying out grounds and encouraged to plant trees around buildings. The tree planting programme was continued at the Farm.

We co-operated with the local Kiwanis Club in their District Tree Planting competitions. Trees used chiefly were white birch, spruce and cedar.

DEMONSTRATIONS

Rotations

We are continuing our five year rotation with excellent results.

Curing and Harvesting Hay

Tripoding of early cut clovers or alfalfa has become a regular practice. Approximately twenty acres were tripoded on the farm during the last week in June.

We are able to start haying earlier which makes better utilization of our labour and a higher protein feed can be harvested which justifies the additional labour.

A buck rake has been used for the past two years and has proven to be an efficient hay implement. Three tons per hour was drawn from fields close to the barn. We had a heavy crop of excellent quality hay.

Pasture

Alfalfa has proven to be a satisfactory pasture especially in dry seasons. White Blossom Sweet Clover has demonstrated its worth as a summer pasture particularly for dairy cattle.

Improvement of Worn Out Pastures

Three thousand pounds of artificial fertilizer was applied to ten acres in the early spring. Three other acres was plowed fertilized and re-seeded to an improved pasture mixture. The results will be recorded in 1945.

Value of Milk and Clover in Hog and Poultry Feeding

The pasturing of hogs and poultry on clover supplemented by crushed wheat, oats, barley, buttermilk, and bone meal has been continued with satisfactory results.

The poultry are gradually changed from growing mash to crushed home grown grains, buttermilk and bone meal at about 10 to 12 weeks of age. Pullets raised in this manner develop slower but grow to be large and rugged hens.

This method of raising hogs and poultry reduces the cost of labour and enables one to make better use of home grown grains.

Sheep Shed

The use of a straw sheep shed for wintering our flock has been continued with excellent results.

Reinforcing Manure

We have continued the use of Stable Phos in our stables and have found that when the manure is put in large well tramped piles that the reinforced manure has a higher moisture content, is better rotted and there is less burning. This manure is spread on our meadows the following Fall, this allows plenty of time for weed seeds to be destroyed.

Ploughing

The system of permanent and dead furrows has been continued. This makes possible the rounding of the lands, thus a more efficient system of drainage which has resulted in excellent stands of alfalfa, earlier seeding and better soil conditions throughout the season.

Potatoes

Demonstration plots were started at Kennebeek in 1941 on a weedy depleted sandy farm.

Rotation: Potatoes; grain seeded to red clover; one cut of hay, second crop ploughed under; and seeded to fall rye, this to be ploughed under immediately before planting our potatoes. 1944 started our second round of rotation. The yield of potatoes has increased from approximately 100 bags in 1941 to approximately 600 bags in 1944 on the same two acres. Hay and grain has increased accordingly.

The increase in yield was accomplished by improved cultural practices, artificial fertilizer and the addition of humus, by ploughing under of second crop hay and rye.

This demonstration has created considerable interest in the Kennebeek area.

GENERAL EXTENSION

The Superintendent judged at 6 agricultural fairs, 3 Field Crop Competitions, and attended 32 Farmer's Meetings.

13 organizations or groups visited the Farm.

SUMMARY

More interest is being taken in the activities on the Farm by the district farmers. They appear to be particularly interested in the new varieties of grain and improved hay and pasture mixtures, probably due to the fact that we had luxurious pasture and a heavy hay crop while most of the farmers had very little of either. Interest appears to be growing in most classes of livestock. The number of visitors and correspondence continues to increase from year to year.

DEMONSTRATION FARM, HEARST

Seeding operations commenced earlier than usual and all the seeding was completed May 25th. The weather was very cold around the middle of June and on June 18th there was a heavy frost that froze potatoes, gardens and some grain. The cold weather prevailing most of the month with lots of moisture was detrimental to our hay crop. A fair yield of hay was harvested in fields where there was alfalfa, but the timothy was a failure. There was sufficient hay, however, on the farm for all our requirements and some hay was sold to neighbours. The grain did not do well in June and part of July, but there was plenty of moisture the latter part of July and August and a fair yield was obtained.

Seasonal Dates

	1944-1945
First work on land	May 18
First seeding of cereals	May 20
Seeding completed	May 25
Turned cattle on pasture	June 6
Started haying	July 10
Finished haying	August 12
Started cutting grain	August 19
Finished cutting grain	August 23
Finished threshing	September 6

FIELD HUSBANDRY

Only O.A.C. 21 Barley and Cartier Oats were sown. Both gave good yields. The grain was harvested in good condition and threshing was completed before the wet weather started. These early varieties were more practical than the later ones as the grain that was not saved by September 7th was on the field until October and was greatly damaged.

ANIMAL HUSBANDRY

Every animal in the Ayrshire herd is registered and the R.O.P. records are very satisfactory. Heifers or cows that will not qualify the first year are immediately sold. The herd was composed of 3 bulls, 10 cows, 6 heifers and 3 heifer calves. One aged bull classed AA was loaned to the Kapuskasing Experimental Farm and it was bred by them and they wish to continue with the same family. The one used on the farm was a Class A bull purchased from the Trappist Fathers, Mistassani. This bull was loaned to farmers in Hallebourg during the summer months and bred 62 cows. The third bull was too young for service, but will be loaned out to farmers this coming summer and all his calves will be observed.

SWINE

Five breeding sows were kept and four had satisfactory litters. One proved to be a poor sow and was sold, so that only four had the second litter. Eight boars and 18 young sows were sold for breeding.

POULTRY

Four hundred mixed day old Plymouth Barred Rock chickens were purchased in April. The roosters were all caponized at the end of May and sold locally. One hundred and fifty hens were wintered.

AID TO FARMERS

The use of a good sire is being demonstrated and farmers are observing the results on our herd. Many farmers are asking for the use of our bulls and we are selling four to six bulls from qualified cows every year. The use of alfalfa was very much encouraged, as the alfalfa did exceptionally well during the dry spring while timothy was poor on the neighboring farms. The small Cletrac tractor used on the farm is very practical for this type of soil.

STATISTICS AND PUBLICATIONS BRANCH

The work of compiling agricultural statistics was carried on during the year along the same lines as in the previous year, and excellent co-operation was extended by the rural school teachers, farmers, dairies, cheese factories, creameries, and other processing plants in supplying information requested on the different schedules relating to various branches of agricultural activity.

The Annual Statistics Report shows by county division the acreage, production, and value of crops; the number and value of live stock on farms; a record of the number and amount of Chattel Mortgages outstanding; detailed weather information; and a valuable summary of field crop and live stock statistics for the province since 1882.

The Monthly Crop Report contains current information relating to field crops and live stock, including such items as acreage, conditions, production and values.

The Monthly Dairy Report contains statistics of total commercial sales of whole milk by distributors in the Province of Ontario by sales areas, production of butter and cheese by county, and other information relating to prices and stocks in dairy products.

The Fruit and Vegetable Crop Report, which is issued monthly from May to October, covers the development of fruits and vegetables.

The annual Reports of the various Branches of the Department of Agriculture, and agricultural bulletins printed for distribution during the year are as follows:—

**AGRICULTURAL AND HORTICULTURAL
SOCIETIES BRANCH
AGRICULTURAL SOCIETIES**

FALL FAIRS

The season of 1944 was favourable for fairs and a total of 229 was held, being an increase of four over the previous year. Fairs were revived by Normandy, Proton, Markdale, Bolton, Lombardy and Wollaston Societies. Tillsonburg and Utterson were dormant. For the third year in succession, the majority of Societies reported an increase in gate receipts, as 59% were higher than in 1943. An increase in exhibitors was reported by 64% of Societies. Those leading in gate receipts are listed:

<i>"B" Class Fairs</i>		<i>2-Pay Day Fairs</i>	
Can. Lakehead ..	\$13,460.36	Collingwood	\$ 3,234.00
Lindsay	13,209.47	Oshawa	2,744.85
Leamington	9,664.80	Caledonia	2,586.05
<i>1-Pay Day Fairs</i>			
Teeswater	\$ 3,392.50		
Woodbridge	3,365.20		
Picton	2,720.97		

Weather on the whole was favourable. A few early fairs suffered from rain; then fine weather prevailed until September 27 for which date 35 fairs had been advertised. A total of 36 Societies received Special Weather grants which permitted the full payment of 90% allowed by the Act.

JUDGES

Departmental judges were supplied for all fairs in Northern Ontario.

WAR PROGRAMME

As usual, Societies kept war enterprises to the fore by exhibits, military bands, offering facilities to recruiting officers and to patriotic organizations.

The Consumer Branch, W.P.T.B., was offered space at 109 fairs and assisted with exhibits by providing a background, material and suggestions. At several fairs, including Brampton and Caledonia, this was supported by "Remake Review" demonstrations.

Hogs for Britain classes were prominent at many shows and accounted for large exhibits of market bacon hogs. The T. Eaton Co. Ltd. offered specials of \$30.00 to 60 Societies for pens of four market hogs. Largest exhibits were at Erin — 108; St. Mary's — 88; Carp — 76. Export Bacon Shows, with hogs slaughtered in advance and the carcasses judged and hung for inspection at the fairs, were conducted under the supervision of the Dominion Department of Agriculture at Caledonia, Vankleek Hill, Maxville and Walkerton.

Other export products were prominent, such as eggs and cheese. At Perth, 18 exhibits of cheese represented all but three of the factories eligible.

Victory Gardens were sponsored by several Societies. Burford had 23 gardens entered and 69 exhibits from them at the fair.

ENCOURAGEMENT TO JUNIORS

Supervised by the Agricultural Representatives, 128 Societies sponsored teen-age clubs with nearly 2,000 members. These young showmen not only brought out a large number of high class exhibits, but gave demonstrations in showmanship. Societies also sponsored some 40 Garden Brigade clubs supervised by the Women's Institutes Branch, which provided many attractive hall displays.

Central Canada Exhibition again held a Junior Show at Kemptville with over 200 young participants. The Canadian Lakehead Exhibition organized a camp for some 60 boys and girls for whom a new junior headquarters building was provided in 1944.

School Fair sections were enlarged and improved to offer greater opportunities to public school pupils, the group formerly served by specialized school fairs.

SPECIAL BREED SHOWS

Sponsored by Societies, but organized by Breed Associations and assisted by grants from the Ontario Live Stock Branch, special county and district Breed shows were held as follows:

Holstein Friesian	37
Holstein Friesian Championship	4
Ayrshire District Shows	10
Ayrshire Championship Shows	1
Shorthorn District Shows	8
Ontario Swine Breeders' District Shows	8
Ontario Yorkshire Championship Show	1

CENTENARY GRANTS

While Agricultural Societies are among the oldest organizations in the Province and nine had completed a century of service, recognition was accorded by the Department for the first time in 1944 when a grant of \$1,000 was made to Vankleek Hill and to County of Carleton (Richmond) on condition that an historical structure be placed on the grounds with plans approved by the Department. On each property there now stands a Centenary Flag staff in front

of which is a stone pylon about 5 feet by 2 feet, in the face of which is a bronze plaque with inscription,—

In Recognition of
One Hundred Years Service
to Ontario Agriculture by
(—————) AGRICULTURAL SOCIETY
1844 - 1944

this Pylon and Flag Pole presented by
The Ontario Department of Agriculture

The flag staff and pylon stand on a stone platform 10 feet by 16 feet approached by steps on three sides with a low stone wall at the back. It is expected these structures will be suitably landscaped and the general effect be quite impressive.

By special committee, each of these old Societies planned centenary ceremonies which included historical floats, pageants, antique displays and tree planting.

OTHER PROJECTS

In response to the restoration of special grants by the Department, 139 field crop competitions qualified for the grant of \$50.00 each and, in addition, the services of expert judges were supplied for all contests. The majority conducted one competition each, but 27 Societies had two and two Societies conducted three competitions. The largest potato contest was sponsored by Tiny and Tay with 38 entries; Lennox had 26 entries in oats. Walkerton and Carrick co-operated in a competition to improve a leading cash crop of the district, table turnips; a total of \$230 was offered in prize money which prompted 65 entries.

While 229 fairs were held, grants were paid to 245 Societies. This covered other projects such as the Maintenance of Pure Bred Sires with grants paid on 2 stallions, 69 bulls, 24 boars and 11 rams, a total of 106. Grants to spring stock shows were paid to South Huron, Moore, Arthur and Erin.

The comprehensive programme which may be promoted by an Agricultural Society is indicated by the report by Barrie which did not hold a fall fair, but was active in sponsoring clubs and competitions for which an Achievement Day was held on September 20. The following enterprises were represented:

1. Field Crop Competition in registered oats
2. Field Crop Competition in seed potatoes
3. Kiwanis Club Boys' Grain Club.
4. Kiwanis Club Boys' Potato Club.
5. Lions Club Boys' Holstein Club.
6. Junior Swine Show by Kiwanis Club and Fair Board.
7. Girls' Garden Brigade Display sponsored by Kiwanis Club.
8. Girls' Poultry Club sponsored by the Soroptimist Club.
9. Showmanship for Boys' Club members.
10. Judging Competitions.

ASSOCIATION ACTIVITIES

The Ontario Association of Agricultural Societies was active in promoting the interest of Societies and contending with problems which affected all. It is felt arrangements made and concessions granted with reference to wartime restrictions on the use of power, transportation of midways and live stock and rationing were satisfactory.

The Annual Convention in February 1945 broke all records for enthusiasm and attendance. A total of 736 attended the annual dinner.

Area meetings organized by this Association were held in each district except Nos. 14 and 15. In several districts, two were called. Diplomas for presentation by Societies were engrossed and provided for 70 Societies.

POST-WAR PLANS

While the war programme was given first place, many boards gave consideration to the improvement of property. A better financial position was indicated by the burning of mortgages and the purchase of Victory Bonds. In many of these cases, property had become run down due to the financial stress of the depression years.

To assist Societies contemplating improvements, the Ontario Board appointed a special committee to offer suggestions on ground layout and suitable buildings. The prospects for and the adaptability of War Assets buildings are also being studied.

HORTICULTURAL SOCIETIES

While the total number of Societies receiving grants declined from 173 to 164 in 1944, there was increase in aggregate membership, as the active Societies reported more. New Societies were organized at St. Joseph Island, Clover Leaf (Port Credit), Ajax and Flesherton-Artemesia. The following were re-organized:—Strathroy, Sandwich, Brooklin, Malton and Brigden. Societies reporting over 100% increase in member:—Richmond Hill, Peterborough and Huntsville.

PATRIOTIC ENTERPRISES

Practically all Societies had one or more war features, with Victory Gardens given a prominent place. Thirty had a definite garden plan with about 3,000 community plots. Flowers were provided for Military Hospitals and, in many cases, Military camps received landscape planting and care. Donations were made to a variety of patriotic organizations.

JUVENILE ACTIVITIES

An increasing number provided programmes for Juniors. Forty-three staged Junior flower shows and 19 had garden competitions for children. Other contests included essays, posters, birdhouse construction and miniature landscape.

PUBLIC BEAUTIFICATION

More than half of the Societies carried on civic improvement in some form. While new plantings were undertaken by a few, the majority concentrated attention on maintenance. Forty Societies reported the assumption of full responsibility for public planting of trees, shrubs and flowers.

SHOWS AND GARDEN COMPETITIONS

Flower shows were reported by 80, several having monthly exhibitions. Garden competitions were conducted by 33. In many cases, these included vegetables as well as flowers and lawns.

Other activities included ragweed control, horticultural books for libraries, church floral services, garden tours and social events.

ONTARIO HORTICULTURAL ASSOCIATION

The 1945 Convention was the largest yet held, with 636 in attendance at the annual dinner. Central meetings were held in most of the Association districts with district flower shows held in conjunction in some cases.

SEEDS FOR PRISON CAMPS

By contributions from some 47 Societies, a donation of \$902.17 was forwarded to the Royal Horticultural Society of Great Britain for seeds for prisoner-of-war camps in enemy countries. Letters from prisoners and camp officials give ample assurance that vegetable seeds previously sent contributed substantially to prison fare, and the flowers and the enjoyment of gardening did much to brighten and interest prison life.

Extract from letter — Stalag XX B-2.5.44. "On behalf of the prisoners of this Stalag, I should like to tender my most sincere thanks for your kindly thought. I am glad to say that a great many men have taken a keen interest in gardening; in fact, this hobby provides just the right amount of relaxation and pleasure necessary to them."

Extract from letter — Stalag VII B-5.1.44. "The gardens have given healthy occupation to a large number of officers. We have about one and a third acre of kitchen garden and $\frac{3}{4}$ mile of flower borders, all planted with seeds sent by the Royal Horticultural Society. We had excellent crops of vegetables such as carrots, lettuce, radish, tomatoes, onions, leeks, cucumbers, marrows, beetroot, spinach, etc., and a good show of annual flowers which were much used for decoration in the rooms."

RURAL SCHOOL IMPROVEMENT COMPETITIONS

Sponsored by the Association, 11 county or school inspectorate competitions were held with 93 schools entered. The first prize winner in each local contest was eligible for a provincial competition, the prize winners of which were:

1. S.S. No. 11 — Smith — Peterboro West — J. E. Carter Trophy.
2. S.S. No. 4 — Hope — Durham — Ont. Hort. Assoc'n. Trophy.
3. S.S. No. 3 — Stamford — Welland — T. Eaton Co. Ltd. Prize.
4. S.S. No. 13 — Percy — Northumberland — T. Eaton Co. Ltd. Prize.

The Association adopted a new policy to encourage improvement in a township where it might be found difficult to organize a competition. A suitable certificate is offered by the Association to the rural school selected by the inspector in each township as making the greatest improvement in the school year.

CONSERVATION

At the Annual Convention in 1944, a Conservation and Reforestation committee was appointed, which was quite active during the year. On the recommendation of this committee, Zone forestry competitions were announced with \$50.00 prize money offered in each of six zones. The winners in each zone will be eligible to compete in a provincial competition with four prizes totalling \$100.00.

This committee also conducted a survey by mailing a questionnaire to each Horticultural Society with reference to post-war plans and activities.

OTHER ASSOCIATION SERVICES

An O.H.A. silver medal and diploma were awarded to A. H. Richardson, Toronto, for "Leadership in Conservation".

The recipient of the J. E. Carter medal for 1944 was A. A. Martin, Brighton, for "Leadership in Public Beautification".

A service diploma, to be awarded for meritorious and unselfish service, was engrossed and provided without cost to each of 34 Societies.

Sets of slides were provided to 40 Societies; record book supplies sold to 24.

An Horticultural Society News page was provided regularly and published through the kind co-operation of "Canadian Horticulture and Home Magazine". Considerable time was spent providing horticultural material for broadcasters maintaining a series of talks.

MEETINGS AND FIELD SERVICE

The Field Man in this Branch gave addresses to 74 Horticultural Societies and district meetings, visited 168 schools and gave 38 addresses at service club and other meetings.

ONTARIO PLOWMEN'S ASSOCIATION

Owing to the restriction on travel and the shortage of labour, a large Match was not organized, and the efforts of the Association were confined chiefly to the encouragement of Branches and the holding of the Annual Convention. The latter, in February 1945, was the largest and most enthusiastic ever held, with emphasis placed on soil conservation and machinery for post war agriculture. The guest speakers were Dr. Wm. A. Albrecht, Chairman Department of Soils, University of Missouri, Columbus, U.S.A., and Prof. L. G. Heimpel, Macdonald College, Quebec.

Officers were encouraged to learn that in Great Britain, where agriculture had been keyed to a high degree of efficiency, plowing matches and demonstrations had been deemed of first importance. Sponsored by the Government and county organizations, demonstrations on the setting and the proper use of plows had been held in large number throughout the country. The Tyneside Agricultural Society sponsored a match after a lapse of 30 years.

BRANCH ACTIVITIES

The following table summarizes events organized by Branches in 1944:

Number of Branch Matches	59
Number of Home Plowing Competitions	7
Number of Junior Matches	3
Number of Dynamometer Demonstrations	11
Match Day Banquets	26

There was an increase of two matches over the previous year and some of them had a large entry, such as Haldimand — 51, and Welland — 50. Departmental judges were supplied for all Matches and demonstrations.

EDUCATIONAL DISPLAYS AND DEMONSTRATIONS

Several Branches took advantage of the cancellation of the wartime order prohibiting the exhibition of new machinery, and demonstrations of labour

saving devices were features at many Matches. The nature of these is illustrated by the list of displays and demonstrations at the Halton Match;

- | | |
|--------------------------------------|--|
| 1 — Manure loader. | 11 — Power mower with windrow attachments. |
| 2 — Three buck-rakes. | 12 — Power chain saw. |
| 3 — One homemade power rip saw. | 13 — Row-crop tractor with cultivator attachments. |
| 4 — Corn picker. | 14 — Binder wheel pigfeed hopper. |
| 5 — Corn sheller. | 15 — Electrically equipped lawn mower. |
| 6 — Corn display. | 16 — Homemade potato molder. |
| 7 — Two homemade corn sheaf loaders. | 17 — Tractor fertilizer attachment for plow-sole delivery. |
| 8 — Chicken picker. | |
| 9 — One-way disc. | |
| 10 — Disc plow. | |

Loud speaker equipment used when owners described equipment.

Demonstrations

- 1 — Demonstration with dynamometer illustrating plow setting, draft, etc.
- 2 — Demonstrations with power chain saw felling a 59-foot elm tree.
- 3 — Demonstrations with one-way disc and plow (planned but, owing to lack of time, did not materialize).
- 4 — Horse show.
- 5 — Junior Farmer home plowing competition.

FARM IMPLEMENTS

The Farm Implement committee continued to serve by advising and co-operating with the Administrator and Rationing officers in the equitable distribution of available supplies of machinery consistent with the production of essential food produce.

Early in the year it was evident that the number of power dusters allotted was quite inadequate to protect the larger acreage of potatoes from insects and, particularly diseases. A plan was worked requiring every farmer being allotted a machine to agree to dust a minimum acreage. A well supported application was made to the Implement Administrator for an increased quota. He was successful in processing an appeal at Washington with the net result, the number of units was practically tripled. A somewhat similar problem arose due to the desire of farmers outside the recognized corn belt to take advantage of hybrid strains in the production of corn for grain. By requiring each applicant to pick at least 100 acres, and to give evidence this acreage of grain corn would be produced in his community, it was possible to get additional units and to place machines in most of the counties in Southern Ontario and all lake counties as far east as Durham.

Service was rendered on the newly organized National Agricultural Engineering committee and assistance given this body in organizing a survey of the farm implement situation and post-war requirements. The agenda of this committee included other Agricultural Engineering problems, such as farm drainage, land improvement and farm building.

AGRICULTURAL POST-WAR PLANNING

While the committee appointed in 1943 was not active, considerable work was done by this Branch in completing project surveys and other work undertaken, and in dealing with post-war problems referred to the Department by various sources from time to time.

Considerable time was devoted to the interests of the Department of Agriculture and of rural people in the disposal of the War Assets by the Dominion Government.

COMMUNITY HALLS ACT

Wartime building restrictions limited the construction of new halls and only one, authorized because of fire, was inspected for grant. An appreciably increased correspondence indicates much thought is being given in rural communities to the provision of athletic and recreational facilities by taking advantage of the legislation to secure grants for community halls, parks and athletic fields. Approval was given several park projects, and plans are ready for numerous halls to be built as soon as permits are procurable.

LIVE STOCK BRANCH

INTRODUCTION

Within eight months of the outbreak of war it became apparent that most of Britain's meat supply must come from the North American continent for the duration of the war and some time thereafter. Britain's live stock population, dependent as it was on imported feed, must of necessity suffer a reduction on account of the difficulty in transporting such bulky material as grain, particularly at a time when that grain was needed for human food and when the shipping space was so urgently required for moving other war materials. Meat producing countries in the southern hemisphere appeared to be too far away to provide a reliable source of supply.

Decisions made by governments of Great Britain and Canada in 1940 had a distinct bearing on the live stock position of this country in 1944. Those decisions anticipated the need for increased live stock production so campaigns designed to attain that objective were instituted and have been vigorously promoted in all provinces in each succeeding year. The results of the campaigns were manifest last year when live stock marketings reached an all time high. Because of the increases Canada was able to export to the United Nations over 913,000,000 pounds of meat and meat products of all kinds and at the same time remove rationing restrictions at home. The amount of meat shipped overseas in 1944 was slightly less than the entire production of inspected plants in this country in the year before the war.

ONTARIO'S LIVE STOCK MARKETINGS

Live stock production in Ontario during 1944 again proved to be one of the most important branches of our farm operations. Marketings remained at high levels in spite of labour shortages. The following table shows Ontario's marketings of cattle, calves, hogs, sheep and lambs over a five-year period:

<i>Year</i>	<i>Cattle Marketings</i>	<i>Calf Marketings</i>	<i>Hog Marketings</i>	<i>Sheep and Lamb Marketings</i>
1944	459,943	235,185	2,108,734	258,803
1943	408,821	216,319	2,029,228	236,170
1942	457,727	268,551	2,021,591	229,070
1941	534,055	298,776	2,326,623	244,740
1940	456,205	290,310	2,191,456	226,485

The above figures includes deliveries to stock yards, packing plants and direct export shipments.

The importance of truck transportation in the movement of Ontario's live stock to market is indicated by the following table. This covers 1944 deliveries.

	To Stock Yards			To Plants		
	By R.R.	By Truck	% By Truck	By R.R.	By Truck	% By Truck
Calves	78,109	66,991	46.16	44,874	43,773	49.37
Cattle	176,040	106,340	37.65	58,611	85,359	59.28
Hogs	112,252	153,265	57.72	698,860	1,144,357	62.08
Sheep and Lambs	66,359	62,885	48.65	36,782	79,334	68.32

The Estimated Value of Ontario's Cattle, Calves, Hogs, Sheep and Lambs Marketed at Stock Yards Direct to Packers and Direct on Export:

	1944	1943	1942	1941	1940
Cattle	\$ 41,325,878	\$ 39,410,344	\$39,570,499	\$35,835,091	\$26,003,685
Calves	5,439,829	6,089,379	7,385,153	6,095,030	4,877,208
Hogs	56,748,480	54,383,310	50,438,695	47,537,732	39,227,062
Sheep and Lambs	2,644,966	2,692,338	2,577,038	2,410,689	1,947,771
	<u>\$106,159,153</u>	<u>\$102,575,371</u>	<u>\$99,971,385</u>	<u>\$91,878,542</u>	<u>\$72,055,726</u>

HORSES

Interest in horse breeding reached an all time low for the past decade during 1944. With a shortage of help prevailing on most farms, farmers turned to power machinery to relieve the situation. Only the shortage of power equipment saved the horse population from further liquidation. Since the more important shows were cancelled early in the war there was little demand for top quality horses. Good farm chunks found ready sale in the fruit and tobacco growing districts of the province. Otherwise trade was confined very largely to occasional purchases by farmers who needed an odd horse for replacement purposes.

STALLION ENROLMENT

The stallion population of Ontario recorded a further decline in 1944, a trend which has been evident since 1939. In the year just ended 1,041 horses were enrolled as compared with 1,701 five years earlier. In 1944 the total enrolment was made up as follows: 207 Form 1 horses, 185 in Form 2, 646 in Form 3, with three being granted Interim certificates. Horses in Forms 1 and 2 were eligible for premiums of \$1.50 and \$1.00 respectively for each in foal mare provided five or more mares were left with foal. 111 of the Form 1 horses qualified for A premiums, totalling \$5,958, while 103 Form 2 horses qualified for premiums amounting to \$3,571. The owners of those stallions received premiums from the Dominion Department of Agriculture in amounts equal to 75 per cent of the contributions made by the Province of Ontario.

HORSE SHOWS

Spring horse shows have undoubtedly played an important role in helping maintain interest in the breeding of better horses. This has been particularly evident since the major shows were discontinued. The Ontario Live Stock Branch assisted local horse show associations by making grants based on 50% of the prize money paid out, up to a maximum of \$200 for any one show. In cases where all local associations in a county united to form a county association, the maximum grant was \$500, provided an equal amount be obtained from

the county in which the show was being held. A summary of grants paid in 1944 follows:

Elora Spring Horse Show	\$ 79.50
Clinton Spring Horse Show	200.00
Perth County Horse Breeders' Association	500.00
St. Catharines Riding and Driving Club Ltd.	500.00
Linwood Spring Horse Show	144.00
Middlesex Heavy Horse Show	98.20
Toronto Horse Show Association	200.00
Wingham Horse Show	200.00
Brooklin Spring Horse Show	150.00
Cannington Farmers' Agricultural Society Horse Show	174.50
	<u>\$2,246.20</u>

CATTLE

The cattle population of Canada registered a substantial increase during the war years. In 1939 it was reported to be 8,374,409 but by June of 1944 had risen to 10,345,800 head. Inspected slaughterings which were moderate during the years when the population was in an upward direction recorded a sharp increase in 1944 and reached 1,354,104, an increase of approximately 330,000 head over the previous year. Because of the prevalence of beef, meat rationing was discontinued on March 1st.

The embargo on shipments of slaughter cattle to the United States remained in effect and surplus supplies of beef were shipped to the United Kingdom. During the calendar year 129.8 million pounds of beef were shipped overseas. This represents the product of approximately 296,000 cattle or more cattle than have been exported from Canada in any single year except 1919. Overseas shipments included a variety of product ranging from top quality steer beef to boneless beef from canner cows. Total exports of beef and canned meats to all countries amounted to 145,850,389 pounds. Marketings at stock yards followed the usual seasonal trend, averaging about 67,000 head per month during the first half of the year and slightly over 100,000 per month in the last half of the year. Throughout the month of October slow-downs occurred in Ontario packing plants, and since this condition coincided with heaviest marketings serious congestion occurred on the Toronto market and heavy hold-overs continued until early in 1945. Ontario's inspected slaughterings of cattle totalled 372,674, of which 32% were cows and bulls. There was a remarkably low percentage of top quality cattle, only 11.1% being eligible for red brand and 15.5% for blue brand. It would, therefore, appear that 41.4% of the cattle marketed fell into the intermediate categories.

Canadian dairy cattle continued to be in good demand in United States. Exports of dairy cattle for the year 1944 totalled 35,149, of which 19,845 head originated in Ontario.

RESTRICTED AREAS

Most counties in Old Ontario have now petitioned for tuberculosis testing under the restricted area plan. The Dominion authorities are experiencing difficulty in maintaining an adequate staff and, as a consequence, testing has not kept pace with the demand during the war years. Initial testing was completed in a number of counties and districts, while several other areas have had retests. The results in counties or districts in which tests were conducted during the year were as follows:

Initial Testing, 1944-45

<i>County or District</i>	<i>No. Herds</i>	<i>No. Cattle</i>	<i>No. Reactors</i>	<i>% Reactors</i>
Algoma	793	11,383	78	0.68
Cochrane	1,293	11,268	125	1.11
Grey	7,731	136,967	4,039	2.95
Haldimand	1,746	26,656	701	2.63
Wellington	4,675	92,460	4,513	4.88

<i>County or District</i>	<i>Test</i>	<i>No. Herds</i>	<i>No. Cattle</i>	<i>No. Reactors</i>	<i>% Reactors</i>

As in previous years the Ontario Department of Agriculture reimbursed the Dominion Department of Agriculture for transportation expenses incurred by members of its staff while engaged in area testing. The total cost to the province for the fiscal year 1944-45 was \$13,579.37.

ARTIFICIAL INSEMINATION

Artificial insemination has been a lively topic of discussion in the Province of Ontario for a number of years. In 1942 a unit was organized in Waterloo County by the members of the Holstein Club. In 1944 the Ontario Cheese Producers' Association requested the Ontario Department of Agriculture to organize a unit among grade cattle owners engaged in producing milk for cheese factory purposes. This organization selected an area in the north-western part of Leeds County as a representative site for such a project. The Ontario Department of Agriculture, through the Live Stock Branch, agreed to co-operate and entered into an agreement with a local association organized in the area. Under the terms of the agreement the local association was required:

1. To obtain sufficient members to ensure the enrolment of 1,000 cows;
2. To appoint a suitable caretaker for bulls to be supplied, and to hire a competent technician;
3. To collect service fees from members at the rate of \$2.00 per cow and to supply such fees to the cost of operations.

The Ontario Department of Agriculture agreed:

1. To supply sufficient bulls to artificially inseminate cows owned by members;
2. To loan the technical equipment required to practise the technique of artificial insemination;
3. To provide funds in such amounts as might be necessary to cover the balance of the operating costs, the assistance so offered to be made available for a period of two years.

Eighty-five farmers joined the association and enrolled 1,080 cows. Three Holstein bulls were purchased by the Ontario Live Stock Branch and loaned

to the association. A local farmer was appointed caretaker and a Leeds County boy with two years of training at the Ontario Veterinary College was engaged as inseminator during the summer months. Since most of the members wanted spring freshening cows, the greater part of the breeding was done while this man was employed. During the period of his employment the caretaker received instruction in the technique and acted as technician in the fall and winter months. 463 cows were bred between June 1st and December 31st, 1944. Of this number 276, or 59.6%, failed to return to the first service. 120, or 25.9%, were bred twice only. It would, therefore, appear that approximately 85.5% conceived to the first or second service, a rate of conception that compares favourably with results obtained in other Canadian units.

Operating costs amounted to approximately \$4.50 per cow inseminated, a figure that would have been substantially reduced had more cows been bred. The results of this experiment lead to the conclusion that artificial insemination provides a practical and effective means of improving and standardizing the type and quality of cattle in a district. It will be more widely adopted only after the cost becomes attractive. Service fees cannot be kept at attractive levels unless the unit has a large number of members residing within reasonably close proximity of one another. A satisfactory rate of conception can be expected if sufficient bulls are maintained to ensure adequate supplies of viable semen at all times and provided a competent technician is engaged to supervise the project. Even under most favourable conditions some herds will present problems.

As a result of the work instituted by the Ontario Live Stock Branch widespread interest in live stock improvement through artificial insemination has become evident and, as the year drew to a close, attempts were being made in several counties to organize self-supporting units among the commercial cattle owners.

AUCTION SALES OF PURE-BRED CATTLE

A number of County or District Cattle Breeders' Clubs follow the practice of holding consignment sales annually as a means of distributing high-class surplus stock. The Ontario Live Stock Branch continued to assist such Clubs by providing inspectors who helped select the entries and by making grants to aid in covering the costs of the sales. 1944 grants were on the basis of \$4.00 per animal sold, up to a maximum of \$150.00 for any one sale, provided all animals offered were free from T.B. and contagious abortion. When shows were held in conjunction with sales additional grants, up to \$25.00, were available. Following is a summary of assistance granted to Breeders' Clubs sponsoring auction sales during the fiscal year:

<i>Association</i>	<i>No. of Head Sold</i>	<i>Grant</i>	<i>Prize Money Grant</i>
All Eastern Ontario Holstein Sale Association	56	\$150.00	
National Holstein Sale Association	64	150.00	
Grey County Shorthorn Breeders' Club	34	136.00	\$25.00
Tri-County Shorthorn Club	43	150.00	
York Jersey Club	39	150.00	
Ontario Aberdeen-Angus Association	58	150.00	
Western Ontario Consignment Sale Company	41	150.00	
Bruce County Shorthorn Club	23	92.00	12.00
Ontario Hereford Breeders' Association	38	150.00	
Prince Edward County Holstein Breeders' Club	42	150.00	25.00
Lambton, Middlesex and Oxford Shorthorn Club	44	150.00	
Brant District Holstein Breeders' Club	33	132.00	
Durham County Shorthorn Association	26	104.00	
Victoria Shorthorn Association	25	100.00	
Ontario Jersey Cattle Breeders' Association	48	150.00	
	<u>614</u>	<u>\$2,064.00</u>	<u>\$62.00</u>

Breed	No. of Cattle Sold, 1943	No. of Cattle Sold, 1944	Average Price	
			1943	1944
Jersey	47	87	\$256.70	\$261.15
Aberdeen-Angus	55	58	753.54	577.93
Hereford	34	38	227.06	345.66
Holstein	170	195	404.18	364.32
Shorthorn	251	236	190.50	184.66

CATTLE SHOWS

Special cattle shows have been held in Ontario for a number of years but since the outbreak of war have become a common feature in most Ontario counties. These shows are sponsored by Breeders' Club and are usually held in conjunction with Agricultural Societies. The Ontario Live Stock Branch assists by contributing grants based on twenty per cent of the prize money paid out, up to a maximum of \$100.00 per show. Following is a summary of payments made to Breeders' Clubs holding special shows in 1944:—

Name of Show	No. of Cattle	No. of Entries	Grant
BLACK AND WHITE SHOWS:			
Dresden (Kent County)	18	112	\$ 73.20
Kincardine (Bruce County)	57	86	52.20
Comber (Essex County)	78	105	74.00
Stratford (Perth County)	130	158	94.20
Norwich (Oxford County)	141	205	86.80
Seaforth (Huron County)	83	104	48.60
Wyoming (Lambton County)	71	88	63.20
Simcoe (Norfolk County)	127	174	80.80
Napanee (Lennox and Addington County)	90	129	69.60
Picton (Prince Edward County)	62	78	46.60
Stirling (Hastings County)	91	126	76.80
Warkworth (Northumberland County)	130	183	100.00
Orono (Durham County)	111	165	100.00
Lakefield (Peterboro County)	103	154	95.20
Port Perry (Ontario County)	142	195	100.00
Beeton (Simcoe County)	104	161	66.60

SWINE

Canadian hog marketings reached an all time high in 1944 in which year 8,863,178 hogs were marketed. This number was almost one and three-quarter million greater than the figure for 1943, the previous peak year. The increase was common to all Provinces with the greatest gain being recorded in Western Canada. That area produced less than 40% of Canada's hogs in the years previous to the war but accounted for 65.6% in 1944. Bacon exports for the year amounted to 695,757,400 lbs. and pork exports totalled 22,707,200 lbs. Despite the enormous quantities shipped abroad it was possible to remove restrictions on domestic slaughter and consumption during the year. At the beginning of 1945 a reduction in marketings appeared inevitable. Since the demand for bacon in Britain was as great as ever steps were taken to divert more of the product overseas. Regulations effective early in 1945 diverted all A and B1 hogs in Western Canada and all A and 65% of the B1's in Eastern Canada to

the Canadian Meat Board for shipment overseas. As a result of this action more and better bacon was directed to the British consumer in the hope of establishing a favourable reputation for the Canadian product. Ontario continued to lead the Dominion in the production of top quality hogs, 82.9% qualifying for the two top grades. Of the balance some were off type, a number carried too much finish, but the great majority were marketed at the wrong weight.

The Dominion premium policy instituted early in 1944 made premiums of \$3.00 a head on A's and \$2.00 a head on B1's available to producers. The Ontario hog subsidy augmented these amounts by \$1.00 and 50c respectively, assistance that had been available since 1941. The system of paying the Ontario subsidy was changed during the year and is now paid by the Dominion Department and included with those premiums.

BACON HOG CLUBS

The bacon hog club policy is generally applicable in Eastern South-Western and Northern Ontario, because of the fact that those areas produce hogs of lower quality than other sections of the Province. Moreover it is a fact that fewer pure bred breeders reside in those areas, hence improved breeding stock is not so readily available. Under the terms of the policy boars are loaned to communities in which clubs have been organized, the minimum requirements for a club being six members owning not less than twenty sows. The cost of the boars and of transporting them to the nearest station of the club is borne by the Ontario Live Stock Branch. Boars may be placed in other areas when special circumstances warrant such action. As a general rule members of a club must purchase pure bred sows in order to merit consideration. During the year 46 boars were purchased at a cost of \$2,609.00. The transportation charges incurred in placing the boards amounted to \$383.01. Following is a summary of clubs operating on March 31st, 1945:—

<i>County</i>	<i>Clubs Organized 1944-45</i>	<i>No. of Clubs March 31, 1945</i>

ASSISTANCE TO SWINE SALES

The Ontario Live Stock Branch assists swine breeders' associations or clubs holding auction sales, through the payment of grants. Such grants are reckoned on the basis of \$2.00 per head sold, up to a maximum of \$150.00 for any one sale. The following organizations received assistance in 1944:—

<i>Organization</i>	<i>No. Head</i>	<i>Grant</i>
Ontario Yorkshire Breeders' Society	70	\$140.00
Grey and Bruce County Yorkshire Breeders' Club	41	82.00
Eastern Ontario Yorkshire Breeders' Association	41	123.00
Stratford District A. R. Yorkshire Club	40	80.00
South-Western Ontario Yorkshire Breeder's Association	41	82.00
Simcoe County Yorkshire Breeders' Club	40	80.00
	273	\$587.00

SHEEP

The results of campaigns designed to increase sheep production in Canada and conducted in 1941 and 1942 became manifest in 1944. For the first time in history sales at Stock Yards, direct to packers and direct on export exceeded the million mark. Marketings totalled 1,039,700 as compared with 887,200 in 1943, the latter figure constituting a record up to that time. The Prairie Provinces and Ontario provided all the increase. Early in September the embargo on lamb shipments to the United States was removed and between that time and the end of the year approximately 135,000 head moved across the Border. This action proved most fortunate as it relieved Canadian markets of serious congestion and stimulated prices at a time when all indications pointed in the other direction. The quality of lambs marketed in 1944 was down. Never in the last fifteen years has the percentage of good lambs been so low and of common lambs so high. Wool production for the year totalled approximately 19,279,000 lbs. All of the crop destined for commercial use was purchased by the Canadian Wool Board.

WOOL SUBSIDY POLICY

The wool subsidy policy instituted in 1943 was continued in 1944. The object of this policy is to encourage the marketing of clean wool. Under the terms of the policy the Ontario Department of Agriculture reimburses the producer of clean fleeces to the extent of 4¢ per pound. The Provincial Department of Agriculture is later reimbursed by the Dominion Department of Agriculture for one-half the total amount paid out in wool subsidies. Following is a summary of payments made during 1944-45:—

Number of applications	16,938
Number of pounds clean wool	2,155,675
Total Subsidy paid	\$86,227.00

ASSISTANCE TO SHEEP SALES

Sheep breeders' clubs holding auction sales were eligible for grants on the basis of \$1.00 per lot sold, up to a maximum of \$100.00 per sale. The following clubs received assistance in 1944-45:—

Ottawa Valley Sheep Breeders' Association	\$ 58.00
Grey-Bruce Sheep Breeders' Club	49.00
	\$107.00

LAMB FAIRS

Lamb Fairs represent a co-operative effort on the part of the Ontario Live Stock Branch and the Production Service of the Dominion Department of Agriculture. These Fairs have been held in the more densely sheep populated areas

of Northern Ontario, for the purpose of encouraging the marketing of lambs on a quality basis. Lambs brought forward to these fairs are graded and each grade is sold on its merits. It is generally agreed that the fairs have assisted the producers of good quality lambs in obtaining substantially higher prices than those prevailing in the district. A number of lambs marketed through fairs held in 1944 were shipped direct on export to the United States. Each Department contributed a maximum of \$30.00 towards providing a suitable prize list at each fair. Following is a summary of lamb fairs held in 1944:—

<i>District</i>	<i>Location of Fair</i>	<i>Prize Money Paid by Each Department</i>
Thunder Bay	Canadian Lakehead	\$ 29.00
Temiskaming	Uno Park	30.00
Algoma	St. Joseph's Island	30.00
Kenora	Oxdrift	30.00
Manitoulin	Manitowaning	30.00
Manitoulin	Little Current	30.00
Manitoulin	Barrie Island	29.00
Manitoulin	Gore Bay	21.50
Manitoulin	Mindemoya	30.00
		<u>\$259.50</u>

BOYS' CLUBS

Boys' clubs occupy a prominent place in Ontario agriculture. Under the terms of the policy prize money is shared equally by the Ontario Live Stock Branch, the Dominion Department of Agriculture, and the sponsoring organization. Following is a summary of contributions made by the Branch to live stock projects held in 1944:—

<i>Type of Club</i>	<i>No. of Clubs</i>	<i>Total Contribution</i>
Calf	89	\$1,610.50
Foal	4	43.50
Swine	27	429.00
Sheep	1	90.00
Poultry	12	147.00
	<u>133</u>	<u>\$2,320.00</u>

The Branch also contributed to the Inter-Club competitions held at Guelph and Kemptville as follows:—

<i>Kind</i>	<i>Amount</i>
Dairy Cattle O.A.C.	\$ 30.00
Dairy Cattle K.A.S.	15.00
Beef Cattle O.A.C.	22.50
Swine O.A.C.	36.50
Swine K.A.S.	7.50
Foals O.A.C.	13.50
Poultry O.A.C.	13.50
	<u>\$138.50</u>

POULTRY

The Ontario Live Stock Branch made grants to Local Poultry Associations for the purpose of assisting them in holding fairs, and also paid the salaries and expenses of judges and lecturers at fairs and meetings of Poultry Associations. Following is a summary of the activities and contributions in which this Branch participated:—

Number of Associations holding shows during the year	11
Number of Judges and Lecturers supplied	11
Total amount of grants paid to local Associations	\$530.50
Judges' Services	90.00
Judges' Travelling expenses	108.81

LIVE STOCK PROTECTION ACT

The Live Stock Protection Act contains a clause whereby parties dissatisfied with awards made by local valuers have the right to appeal to the Minister of Agriculture. In 1944-45 seven appeals were received from sheep owners. Special valuers were appointed by the Minister to deal with those cases.

BRANDING OF LIVE STOCK ACT

Under the terms of this Act the Director of the Live Stock Branch is designated as Recorder of Brands for the Province. During recent years poultrymen have constituted the largest group applying for brands. 42 new brands were allotted and 54 were renewed in the past fiscal year, thereby bringing the total number recorded up to 2,952.

LIVE STOCK ASSOCIATIONS

The office of Secretary of a number of Ontario Live Stock Associations is held by members of the Ontario Live Stock Branch. These include the following Associations:—

Ontario Horse Breeders' Association, Ontario Cattle Breeders' Association, Ontario Sheep Breeders' Association, Ontario Swine Breeders' Association, Ontario Yorkshire Breeders' Society, Ontario Berkshire Breeders' Society, Ontario Tamworth Breeders' Society, Ontario Aberdeen-Angus Breeders' Association, Ontario Hereford Breeders' Association, Ontario Poultry Association and Ontario Poultry Confederation.

The executive work in connection with these organizations is carried on by the Secretary.

ONTARIO PROVINCIAL WINTER FAIR

Following the outbreak of war the buildings used by the Ontario Provincial Winter Fair were commandeered by the Dominion Department of Militia and Defence. In the years 1939 to 1941 inclusive Commercial Live Stock Shows were held at the Union Stock Yards under the management of the Ontario Provincial Winter Fair officials. No shows were held in 1942 or 1943, but there was sufficient interest in 1944 to warrant reviving the show. The exhibit brought forward 146 cattle in the classes for single cattle, and five groups consisting of six cattle each. The sheep exhibit consisted of 29 lots of five lambs, while the swine exhibit brought forward 136 animals. In the auction held following the show the grand champion steer sold for \$1.10 per pound, the first prize pen of lambs for \$2.00 per pound, and the first prize pen of hogs for 27¢ per pound. It is estimated the total offering of cattle, lambs and hogs realized a premium over prevailing market prices of approximately \$24,000. The total prize offering, all of which was contributed by the Ontario Department of Agriculture amounted to \$1,684.00.

WOMEN'S INSTITUTE BRANCH

GENERAL

Membership

Number of Senior Women's Institutes in Ontario, March 31, 1945	1,213
Number of Junior Women's Institutes in Ontario, March 31, 1945	35
Total number of Women's Institutes in Ontario, March 31, 1945	1,248
Membership, March 31, 1945 (approximate)	32,000
Institutes organized during the year	14
Institutes disbanded during the year	16

Of the Institutes organized, 3 were Junior and 11 were Senior Institutes.
Of the Institutes disbanded, 4 were Junior and 12 were Senior Institutes.

The newly organized Institutes were:

Dufferin District	Rosemont and Whitfield
Grey North	Sarawak
Huron South	Grand Bend
Huron West	Blyth Juniors and Clinton Juniors
Lanark North	Appleton, Ramsay
Oxford South	Ostrander Juniors
Victoria West	North Ops
Muskoka North	Ilfracombe
Parry Sound North	Beaver
Renfrew South	Glasgow Station
Thunder Bay	Kakabeka Falls

The Institutes disbanded were:

Grey South	Neustadt
Middlesex West	Strathroy Juniors
Norfolk North	Boston
Peel	Bolton Juniors
Perth North	Milverton
Peterborough	Lakefield Juniors
Welland	Port Robinson
Wellington Centre	Erin
York West	Islington
Cochrane North	Florida, Hanna Township, Kapuskasing, Margaret Rose
Kenora	Kenora
Manitoulin East	Killarney, Tehkummah Juniors

District Annual Meetings and Conventions

In May and June 1944 annual meetings were held in 99 districts with representatives from 1129 Institutes (93%) and a total attendance of 8427, an increase of 712 over the preceding year.

Thirteen area conventions were held in the fall of 1944 with an attendance of 3427, an increase of 677 (20%) over the preceding year.

The Women's Institute Branch was represented at all district annual meetings and conventions.

Correspondence

Circular letters approximated 35,000; personal letters approximated 25,000.

Legislative Grants

To districts \$3,569.00; To Institutes \$1,605.00; Total \$5,174.00.

Literature Printed

Home and Country — 4 issues	38,000 copies each
Co-operative Program in Home Economics	7,000 copies
Homemaking Clubs For Rural Girls	4,100 folders
How Many Vegetables Did You Eat Today?	2,000 leaflets (reprint)
Jam for Britain — Recipes and Directors	1,600 copies

FEDERATED WOMEN'S INSTITUTES OF ONTARIO

The provincial board held two meetings, April 1944 and November 1944. At the November meeting Mrs. Hugh Summers, Fonthill, R.R. 1, was elected president succeeding Mrs. Clarence Holmes, Belleville, R.R. 3. Mrs. W. B. Leatherdale, Coldwater, was re-appointed Secretary-Treasurer.

The treasurer's annual statement showed receipts of \$7,661.11, expenditures of \$4,055.95 with a balance of \$3,605.16.

Affiliations

Affiliation has been continued with the Federated Women's Institutes of Canada, the Associated Country Women of the World and the Federation of Agriculture. Mrs. Clarence Holmes and Mrs. L. Challand were appointed directors to the F.W.I.C. Board to represent Ontario at the Biennial Meeting in Victoria, B.C. in June 1945.

Letter Friends

To establish closer bonds of friendship and understanding between Ontario Institutes and other groups affiliated with the Associated Country Women of the World following new letter friends were arranged: Australia 19, England 6, United States of America 4.

Standing Committees

All standing committees continued to function effectively. The Historical Research Committee is asking that every Institute have a Tweedsmuir Village History established before 1947.

Putnam Memorial Fund

Through this Fund \$8.20 was used for transportation of goods for the relief of needy persons in Northern Ontario. The articles of clothing and other supplies were the gift of East York District Women's Institutes.

SPECIAL WARTIME ACTIVITIES, F. W. I. O.

Central War Charities Fund, F. W. I. O.

Balance on hand, January 1, 1944	\$2,288.74
Total receipts, January 1, 1944, to December 31, 1944	6,079.83
Total expenditures, January 1, 1944, to December 31, 1944	6,812.39

Outstanding Contributions in 1944

Vegetable Seeds for Women's Institutes of England	\$1,159.68
Canadian Red Cross Society — Prisoners of War Fund	1,061.45
Canadian Red Cross Society — Ontario Division	237.90
Navy League of Canada	687.50
The Queen's Canadian Fund for Air Raid Victims	851.78
The Kinsmen's Milk for Britain Fund	574.35
The Telegram British War Victims' Fund	428.45
The Save The Children Fund	275.00
Y.W.C.A. Mrs. Winston Churchill's Fund for Br. Service Women ..	250.00
The Salvation Army — War Work	197.53
British Minesweepers' Auxiliary	175.00
United Nations' War Relief Funds	346.70

Jam for Britain 1944

With the Ontario Division, Red Cross Society the Women's Institutes of Ontario sent 143 tons of jam, jelly and honey to England for distribution to civilians, especially children, and to Canadian military hospitals. Contributions to the Central Sugar Fund administered by the Women's Institute Branch totalled \$4,398.08. Institutes reported local cash purchases of jam or honey to the value of \$11,115.87.

Local War Work

As in previous years Institutes have worked steadily and efficiently for the relief of suffering and for victory. The following partial list of accomplishments gives some idea of the variety and scope of work done.

Total money raised	\$156,400.38
Gifts to local enlisted men and women	67,953.57
Contributions to war charities	54,396.84
War Savings Certificates and Bonds purchased	12,228.58
Blood donor clinics	759.39
Wool and sewing supplies	13,511.08
Knitting — number of articles	57,244
Sewing — number of articles	42,754
Blood donors — number of donors	2,836

THE WOMEN'S INSTITUTE BRANCH

Staff

The staff consisted of a superintendent, five full-time and five part-time field assistants for the Senior Women's Institute program, two field assistants in home economics who work part-time with the Senior Women's Institutes and part-time with the Junior Extension program, one supervisor of the Junior Extension program, seven county home economics coaches, one loan librarian, one nurse for part-time service, and an office staff of four.

Staff Conferences

In December 1944 a conference of all staff members was held in Toronto and in the Spring of 1945 conferences of all field assistants in the Senior Women's Institute program were held to plan the Co-operative Program in Home Economics and to prepare for District Annual meetings.

CO-OPERATIVE PROGRAM IN HOME ECONOMICS

Realizing that the members of the Women's Institutes of Ontario are deeply interested in the maintenance and betterment of home life, and, believing that the Canadian home is the foundation of a satisfying community and national life, the Women's Institute Branch has continued to present a homemaking program designed to promote the development of rural home, family and community life.

District services included one-day conferences (to be followed by local study) in Care of Clothing, Wise Buying of Clothing and To-day's Food Problems; one-half day lectures and discussions on The Family Co-operates for Good Nutrition, Household Accounting and Citizenship; one-day lecture-demonstrations in Health Education; and one-day rallies in Administrative Leadership.

Short courses were offered to local Institutes as follows: Modern Dress-making and Remodelling Clothing — 5 days each; Making the Most of Food and Food Conservation — 2 and 3 afternoons respectively; Knitting — 2 days; Leather Glove Making — 3 days; Quilts and Quilting — 2 days; Braided Rugs — 5 days; The Furnishings of the Living Room — 2 afternoons; The Time-Saving Kitchen — 3 afternoons; and Health Education — 5 days.

DISTRICT PROGRAM

Topic	Districts Served	Meetings Held	Institutes Represented	Enrolment
Care of Clothing	10	45	97	778
Wise Buying of Clothing	2	6	18	134
Today's Food Problems	1	6	19	92
Family Co-operates for Good Nutrition	10	48	75	1221
Household Accounting	2	4	16	108
Health Education	21	85	181	1839
Citizenship in the Rural Community	15	55	153	1384
Administrative Leadership	28	49	272	1180

INSTITUTE PROGRAM

Short Courses

Topic	Number of Courses	Enrolment	Average Attendance
Modern Dressmaking	16	224	14
Remodelling Clothing	15	157	10
Food Conservation	2	21	9
Making the Most of Food	14	279	16
Braided Rugs	6	77	10
Leather Glove Making	5	48	9
Quilts and Quilting	4	69	17

LOAN LIBRARY

Number of folders sent to Institutes	4933
Number of Women's Institutes served	863
Number of letters sent with folders	863

To assist members in the preparation of programs 4,933 folders were sent out on loan for a two-weeks period. The following classification indicates the interests of the Institutes: Home Economics 952, Citizenship 922, Agriculture and Canadian Industries 518, Women's Institute Work 365, Health 356, Education 234, Social Welfare 247, Historical Research 292, Music, Art, Literature 89, Unclassified 958.

JUNIOR EXTENSION PROGRAM IN HOME ECONOMICS

Junior Homemaking Clubs

The Junior Homemaking Club program for girls and young women, ages 14 to 26, is planned to give training in home economics, to develop leaders and to promote intelligent rural citizenship. This program is carried on through local leader training schools, conducted by the county home economics coach, which are followed by club meetings and county achievement days.

Units	Training Schools for Leaders	No. of Clubs	No. of Members	No. of Achievement Days	Records of Achievement
Food and Nutrition Clubs	36	136	630	511
Clothing Clubs	42	148	579	438
House Furnishing Clubs	12	54	275	200
Hospitality Clubs	2	9	41	32
Home Defence Clubs	4	11	82	67
Totals	96	358	1607	46	1248

Fifty-seven members participated in the Junior Homemaking Club program at the Belleville Fair, 42 at Stratford Fair and 130 at Central Canada Junior Day at Kemptville Agricultural School.

Provincial Honour pins and certificates were awarded in 1944 to 25 club members who had completed 12 Homemaking Club units.

Girls' Garden Brigades

Girls' Garden Brigades had a membership of 2104 in 1944. Brigades were organized in 49 counties and districts under the supervision of the agricultural representatives and the home economics coaches. Records show over 94% of the gardens in production with 65% of the gardeners completing every phase of the program.

Junior Women's Institutes

The Junior Institutes, during the year, have become affiliated with the Junior Farmers' Association of Ontario which was organized in April 1944. Through this provincial association young men and women, — members of Junior Farmers' Associations, Junior Women's Institutes and other young people's groups — aim to co-operate with other farm organizations in developing agriculture, home life, community spirit and citizenship.

Program kits on topics of special interest to young people — Junior Institutes in particular — have been compiled to assist in planning and carrying on purposeful programs. These kits include articles, publications and references to assist in the preparation of papers and demonstrations and in the planning and conducting of discussions on such topics as: Family Living, Personality, Citizenship, Education and Schools, Today's Women, Make Your Home and Farm Safe and Do You Know the Rules.

British War Garments

Homemaking Clubs, Junior Institutes and county organizations continued their donations and work on British War Garments, bringing the total fund up to \$1,771.96.

COMMUNITY NUTRITION COURSE

The Women's Institute Branch co-operated with the Canadian Dietetic Association in the organization and administration of a post-graduate course in Community Nutrition. Each of three home economics graduates, who had been granted bursaries provided by the Canadian Life Insurance Officers' Association, spent six weeks with the Women's Institute Branch as part of her nine-month course.

CO-OPERATION WITH OTHER ORGANIZATIONS

The Women's Institute Branch wishes to acknowledge the assistance given so generously by other Branches of the Department, especially the Agricultural Representatives Branch, the Ontario Agricultural College and the Kemptville Agricultural School.

The Women's Institute Staff has co-operated with such organizations as the Women's Division of the Ontario Agricultural Societies, the Junior Farmers, the Federation of Agriculture, the Canadian Youth Commission, the Canadian Red Cross Society, the Consumer Branch of the Wartime Prices and Trade Board, the National War Finance Committee, the Canadian Society for the Control of Cancer, the Canadian Society for the Prevention of Tuberculosis, the Advisory Educational Committee of the Division of Venereal Disease Control and other agencies.

OUTLOOK

The Women's Institute Branch, working with the Senior and Junior Women's Institutes and the Homemaking Club members, looks forward to a

period of constructive work in the interests of rural life. With the end of the war in Europe the time seems opportune for expansion and growth. We must meet the challenge of the day and devote our thoughts, time and energy to the solution of the problems of home and family living which face us now and in the immediate future.

To do this adequately will make heavier demands on the staff of the Women's Institute Branch. Unfortunately, during the war, it has been difficult to secure successors for retiring staff members; but if the work is to be well done we hope that the staff may be augmented in the near future.

In concluding this report, allow me to express my appreciation of the staff of the Women's Institute Branch.

FRUIT BRANCH

Reference was made in the previous report to unfavourable weather conditions during the winter 1942-43, which caused very serious damage to tender fruit trees throughout the Niagara Peninsula. Many trees weakened at that time and by the prolonged wet spring of 1943 have since died or have been destroyed because of lack of vigour. The number of bearing trees has, therefore, shown a very considerable reduction. Some replanting has taken place but scarcity of nursery stock has delayed somewhat plans for setting out new orchards. The general impression now is that not until new plantings, hereafter being made, come into commercial production can the commercial crop again equal the production of 1942.

In general, weather conditions throughout the winter of 1944-45 have been more favourable, all tree fruits, vine and bush fruits over-wintering in splendid condition. The final production of the various fruits varied much according to locality. In an area as widespread as the Province of Ontario conditions vary greatly. The following table shows total precipitation for three-month periods together with the all-time average for the same period for each of four stations located in important fruit and vegetable producing areas:

Three Month Period	Year	Colling- wood	Sta. Av.	Leam- ington	Sta. Av.	Vine- land	Sta. Av.	Belle- ville	Sta. Av.
Jan.-Mar.	1943	9.24 }	4.17	5.95 }	6.57	8.99 }	7.28	8.96 }	8.35
	1944	5.21 }		6.57 }		6.27 }		7.38 }	
Apr.-June	1943	4.87 }	5.99	14.10 }	8.26	11.96 }	7.72	10.32 }	7.20
	1944	4.71 }		9.21 }		9.67 }		7.92 }	
July-Sept.	1943	6.08 }	7.60	6.68 }	7.22	5.41 }	7.83	8.85 }	7.95
	1944	4.23 }		8.54 }		9.16 }		6.11 }	
Oct.-Dec.	1943	5.44 }	6.97	3.68 }	6.78	5.97 }	7.17	7.35 }	7.67
	1944	9.01 }		3.24 }		7.39 }		9.47 }	

Note: Averages given above for each three-month period are those furnished by the Dominion Meteorological Office. The averages cover the period of record of the station. Precipitation and temperatures are two chief factors influencing growing conditions and the quality of the fruit produced. From the precipitation table above it will be noted that rainfall in the April, May and June quarter, 1944, at Vineland, was 2" above normal. Wet, cool, foggy weather prevailed in the Niagara Peninsula at a season when pollination was adversely affected. At the same time weather conditions were favourable for stem rot development in cherries and plums. In the Leamington area for the same period the precipitation was only 1" above normal and weather conditions at time of blossom were more favourable. Essex, therefore, harvested one of the best crops of

peaches in several years — both as to quantity and quality. In the Niagara Peninsula, however, despite unfavourable weather, increases in commercial production over that of 1943 were obtained for all major fruits as is shown in the summary given below.

*Commercial Crop Tender Fruits 1944
together with comparative figures for 1943*

		Yield		1944
		1943	1944	% Change
Cherries—Sour	bus.	76,170	95,876	plus 26
Cherries—Sweet	bus.	36,000	43,900	plus 22
Grapes	tons	26,000	28,670	plus 10
Peaches	bus.	440,000	1,174,200	plus 167
Pears	bus.	334,000	371,765	plus 11
Plums	bus.	131,500	144,200	plus 10

Throughout most of the main apple producing areas reasonably good weather prevailed during the critical blossom period. Later in the season a prolonged hot, dry period adversely affected sizing of apples in the Collingwood and Belleville districts — the rainfall in the former area being 4.65 inches below normal for the April-September period.

Variations as between districts respecting yields and financial returns, of course, prevailed. The overall returns for the Province do reveal that the fruit growers realized higher gross returns for 1944 than for 1943. Though in several cases even though the unit value was lower the increased yields produced higher gross returns. The final returns for some of the fruits are given for 1943 and 1944 for purposes of comparison.

The cost of the package has been deducted in arriving at the unit price here shown.

*Comparison Values of Certain Fruits
for 1943 and 1944 Crop Years*

		1943		1944		1944
		Value	Value	Value	Value	% Change
Apples	bbl.	\$ 3.84	\$3,038,700	\$ 3.05	\$2,660,400	minus 12
Cherries—Sour	bus.	4.76	352,700	5.09	488,600	plus 39
Cherries—Sweet	bus.	6.96	250,250	7.64	335,400	plus 34
Grapes	tons	63.50	1,651,000	79.42	2,227,000	plus 38
Peaches	bus.	3.18	1,399,200	2.49	2,923,800	plus 109
Pears	bus.	2.07	690,700	1.81	673,400	minus 3
Plums	bus.	2.81	369,800	2.49	359,600	minus 3
Raspberries	qts.	.30	1,523,200	.31	1,410,800	minus 7
Strawberries	qts.	.20	1,199,500	.21	993,400	minus 17

VEGETABLES

Vegetable growers despite a pronounced labour scarcity and a prolonged dry hot summer harvested vegetables valued at \$28,934,000.00, which value was \$2,665,000.00 higher than the corresponding figure for 1943. Early potato acreage was substantially higher in 1944. Good yields and satisfactory prices prevailed. The yields of the mid-season and late plantings of potatoes were adversely affected during the growing period by the hot, dry weather. Compared with the 1943 season the acreage of onions showed a 27% increase. Yields were heavy and the general supply position was such that a substantial tonnage stored at producing centres were never marketed. The growers and shippers of staked tomatoes, jointly, have greatly improved marketing of this commodity and plans are presently under way to make further improvement this coming season. Rather outstanding was the increase in production in 1944 of the five major canning crop vegetables as will be noted from the following 1943 and 1944 figures showing the tons of each vegetable purchased for processing:

*Comparative Figures of Purchases by Processors
of Major Canning Crop Vegetables — Tons*

	1943	1944	1944 % Change from 1943
Asparagus	1,349	1,828	plus 36
Beans—Green and Wax	1,034	1,011	minus 1
Corn	34,692	44,861	plus 29
Peas—Shelled	11,366	23,046	plus 103
Tomatoes	136,136	243,269	plus 78

The usual extension work among the vegetable growers was undertaken by Mr. Geo. Rush. Assistance was also provided by judging at fairs and exhibitions, attending meetings and generally advising commercial growers on various problems. As far as time would permit assistance was given to Victory gardeners whose contribution to the war effort was magnificent.

THE PLANT DISEASES ACT

Japanese Beetle!

Under the provisions of The Plant Diseases Act a survey to determine the degree of infestation of Japanese Beetle was conducted jointly by the Dominion and Provincial staff. School girls were employed as trap attendants during the summer months under the supervision of the officers of the Dominion Department of Agriculture. The girls rendered a very satisfactory service. The survey showed a slight increase in infestation over that of the previous year, chiefly in three small areas — two in Hamilton and one in Toronto. Appropriate control measures were taken.

Bacterial Ring Rot in Potatoes

Working with the Crops Seeds and Weeds Branch the survey commenced last year to ascertain the prevalence of Bacterial Ring Rot in Potatoes was much enlarged. The survey revealed the occurrence of the disease in twenty-four counties of the Province, though in most cases the infestation was slight. The cases reported by the inspection staff totalled 463 farms infected with a combined acreage of 2800. The corresponding figures for the previous year were 157 farms and 1200 acres infected. Measures to prevent the spread of the disease were rigidly enforced and an extensive educational programme was undertaken for the benefit of potato growers.

Nursery Inspection

Again this year undergraduate women students were appointed to undertake inspection of nurseries under the supervision of the Provincial Entomologist. These inspectors have proven themselves painstaking and conscientious in their work.

Apple Maggot

An advisory apple maggot control committee was named by the growers, which committee recommended an extensive educational campaign embracing meetings, articles to the press and work among the growers, particularly in the recognized commercial producing areas. The eradication of neglected apple orchards, of apple trees and hawthorns along highways and roads and on lands adjacent to or in close proximity to commercial orchards was stressed by the committee. This Branch had fieldmen in certain sections of the Province urging a more determined clean up programme and more thorough and timely spraying. Partly due to this effort and partly because of weather conditions which proved to be less favourable for apple maggot, the cross section survey made in the fall revealed a substantial reduction in the percentage of infestation.

During the year regulations respecting Bacterial Ring Rot in Potatoes, Sugar Beet Nematode and certain other plant diseases were amended and printed in handy pamphlet form for distribution to persons interested.

INSPECTION — FRUIT AND VEGETABLES

The limited inspection staff appointed under the provisions of The Farm Products Grades and Sales Act has not been able to cope with the inspection work necessary in all parts of the Province. Inspection work was extended in the potato growing areas in Dufferin and Simcoe Counties to meet the needs of certain co-operative marketing organizations. At these points the co-operatives packed potatoes in new branded bags and sold same subject to government inspection at time of shipment. This policy of selling potatoes by grade soon established a buyer's confidence and the members of the co-operative organizations realized substantially higher prices than those non members who sold in second hand bags through ordinary channels of trade.

Administrative inspection work was undertaken to the extent possible with the limited staff available but not to the extent formerly done. Throughout the year there has been close co-operation between staffs appointed by the Dominion and by the Province.

FIELD WORK

Fieldmen at Brighton, Barrie, Iroquois and Toronto were assigned sections of the Province. The staff has rendered a varied service advising growers in their district on such general matters as pertain to approved methods of culture, packing and marketing of fruits and vegetables.

COLD STORAGE EXPANSION

Throughout the past year a marked expansion of facilities for cold storing, central grading and packing of farm products was undertaken throughout the Province. The following companies were assisted in the construction of new cold storages or in making additions to existing plants:

New Plants

Almonte Co-operative Storage Limited	Almonte
Dixie Growers' Co-operative Storage Limited	Dixie
North Grey Cheese Co-operative Limited	Owen Sound
The Oxford Farmers' Co-operative Produce Co. Ltd.	Woodstock
St. Lawrence Valley Co-operative Storage Limited	Iroquois
Upper Ottawa Co-operative Poultry Products	Renfrew

Additions to Existing Plants

Aldershot Distributing Co-operative Company Limited	Aldershot
Elgin Growers' Co-operative Limited	St. Thomas
Kent Fruit Growers' Co-operative Limited	Blenheim

The combined capacity of cold storages assisted under the provisions of The Co-operative Marketing Loan Act now totals 2,903,700 cu. ft. cooler space and 300,815 cu. ft. freezer space.

Loans made by the Province under the provisions of The Cold Storage Act to cold storages are in good standing both as to payment of interest and to the repayment of principal.

GOVERNMENT STORAGES

Cold storage space for farm products has been in keen demand during the current year. The Thedford plant, owned by the Province, operated throughout the twelve months receiving for storage 87 carloads of eggs, 36,000 crates of

celery, 653 tons of carrots, and upwards of 800 tons of miscellaneous produce thus establishing an all time record of commodities handled and for earnings. Some additions were made to the facilities at the plant, the capacity for loading and unloading carlots being increased 25% thereby.

During the year from operating earnings the costs of maintenance and operation were paid, a house was purchased as a dwelling for the manager, the indebtedness to the bank was retired and a payment to the Province of \$17,444.20 for account of interest and principal reduced the equity of the Province in the plant to \$30,000.00. Since 1942, Mr. Wm. V. Blewett has been manager and engineer-in-charge, at all times striving to give efficient administration and to serve the interests of the agricultural producers in an acceptable manner.

The Brighton Cold Storage also had one of the most successful years of its history. The capacity of this plant is not nearly adequate to handle the apples produced in the vicinity. The manager, Mr. H. Morley Webster, has so operated the plant that local growers have been well pleased with the services rendered. The manager has also acted in an advisory capacity for other cold storage companies owned and operated by producers.

DAIRY BRANCH

For the fourth consecutive year the provincial cheese subsidy of two cents per pound of cheese was paid to the cheese factory milk producers. The amount of subsidy paid to the producers during the fiscal year, April 1, 1944, to March 31, 1945, was \$2,152,194.80 compared with \$2,085,302.22 for the previous year.

The supervision of creamery claims for federal subsidy to primary producers on butterfat used for the manufacture of creamery butter was again done by the Dairy Branch with the creamery instructors making routine inspections at the plants for verification purposes. The subsidy paid was ten cents per pound for the whole year.

Butter production in Ontario was the lowest since 1933, declining 8.8 per cent from the previous year. The decline can be attributed for the most part to the increased demands for milk for other dairy products and the unfavourable price structure for butter compared with these products. Cheese production was approximately the same as the preceding year, increasing only 0.5 per cent.

Both creameries and cheese factories experienced much difficulty in obtaining sufficient help of any kind to carry on the necessary plant operations. The Dairy Branch staff spent much time endeavouring to assist these plants to obtain help. Through the co-operation of the Department of Education creameries were allowed to use student labour under the early release from school plan, similar to that provided for farms and cheese factories, but under certain very definite restrictions and under the strict supervision of the Dairy Branch. Although this permission was not granted until late in the season, some 24 students were so employed and on reports from the instructors very definitely did all possible to ease the very serious help shortage during the period of peak production.

Several changes were made in the Dairy Branch staff during the year — Mr. H. B. Sandwith, Chief Cheese Instructor for Eastern Ontario, was retired on superannuation on January 31, 1945, and was replaced by Mr. J. F. Robinson of Kemptville. Mr. Robinson was a dairy produce grader with the Dominion Department of Agriculture for the past six years. Previous to that he was a

cheese instructor with the Ontario Dairy Branch and instructor in cheese-making at the Eastern Dairy School at Kingston and latterly at Kemptville. Mr. Robinson's headquarters are now at Kemptville. Mr. J. D. Henderson and Mr. Geo. Sheriff retired from the cheese instruction staff and were replaced by Mr. H. V. Richards and Mr. E. W. Henderson. Mr. H. W. Cunningham, cheese instructor, resigned to accept the position of dairy produce grader with the Dominion Department of Agriculture. Mr. Roland Johnston, creamery instructor, retired on superannuation in January, 1945, having served in that capacity since 1925. The cheese instruction staff lost another member through the sudden death of Mr. W. T. Oliver.

CHEESE FACTORY INSTRUCTION

Due to the shortage of labour on the farms and in the factories the quality of cheese was not quite as good as in 1943. The exceedingly dry weather also had a detrimental effect on quality. Eastern Ontario, the large cheese producing district, was very dry. Many producers due to shortage of water were not able to cool the milk properly. In many instances producers were forced to haul water for their live stock in August and September.

During the year the instructors made 10,171 visits to cheese factories and 4,271 visits to producers sending low quality milk to cheese factories. The reports received from the instructors would indicate that much low quality milk from these producers was due to lack of water for cooling milk properly.

The quality of milk received at cheese factories was determined by means of the Methylene Blue Test, the Fermentation Test and the Sediment Test. In 1944, the instructors made 14,925 fermentation tests — 40,476 methylene blue tests and 47,860 sediment tests.

In the spring of 1944 the instructors were all supplied with modern sediment testers and a good deal of time was spent on testing milk for sediment. Sediment test charts were supplied to the instructors to aid the instructors to properly classify the milk and to notify the producers as to the classification of the milk. The results of the sediment tests were posted in the cheese factory or sent direct to the producers. This work resulted in a decrease in the amount of extraneous matter in the milk of many producers.

This work also encourages the use of the new type of filter strainer devised by the Dairy Branch for the use of the cheese factory milk producers. Unfortunately, due to war conditions the manufacture of these strainers was not adequate to supply the demand and many producers were not able to obtain them. The results obtained where the strainers were used were quite satisfactory and it is hoped that filter strainers will be available to all producers this year. The elimination of extraneous matter from Canadian cheese is of vital importance to the industry and every effort is being made by the officials and instructors of the Dairy Branch staff to bring about the required improvement in Ontario cheese.

The production of cheese has been well maintained in Ontario despite the shortage of labour on the farms. This can be attributed to a large extent to the increased number of milking machines in use. The unsanitary condition of some of these milking machines has resulted in low quality milk. This is not the fault of the manufacturers but can be attributed to careless methods of washing the machines. The cheese instructors and inspectors are continuously inspecting milking machines and instructing producers in proper care and sanitary methods of handling these machines.

Mr. A. L. Gibson of the Dairy Division of the Kemptville Agricultural School has devised a practical test for testing the strength of the lye solution required for the proper cleansing of milking machines and by use of this test the instructors have overcome much of the difficulty with unsanitary milking machines. Visits to producers of poor quality milk have become one of the important duties of the instructors, especially since milking machines are being so widely used. They have been a means of keeping up production during the war years and a benefit to the industry when properly cared for.

Production of Creamery Butter in Ontario

	1943	1944
Western Ontario	53,222,784 lbs.	49,353,077 lbs.
Central Ontario	14,628,344	12,822,915
Eastern Ontario	9,924,551	8,126,156
Northern Ontario	4,722,403	4,500,598
Totals.....	82,498,402 lbs.	74,802,746 lbs.

Ontario produced 25.1 per cent of Canada's total creamery butter compared with 27.1 per cent in 1942 and 28.4 per cent in 1941.

Federal Grading of Ontario Creamery Butter

Approximately 39.0 per cent of Ontario's creamery butter is graded.

	Total Boxes	Per Cent. 1st Grade	Per Cent. 2nd Grade	Per Cent. 3rd Grade	Per Cent. Below 3rd Grade
1944	520,559	59.37	36.21	3.87	0.55
1943	560,299	61.21	34.84	3.23	0.72

18.50 per cent of the Ontario butter graded was first grade for flavour and workmanship but was lowered to second grade because of used boxes, single liners, or having over 2 per cent salt. Making this allowance the quality of Ontario butter which was graded is as follows:

	Per Cent. 1st Grade	Per Cent. 2nd Grade	Per Cent. 3rd Grade	Per Cent. Below 3rd Grade
1944	77.87	17.71	3.87	0.55
1943	77.43	18.62	3.23	0.72

Cream Quality

The quality of the cream received at the creameries as compiled from the instructors' monthly reports is as follows:

	Per Cent. Special Grade	Per Cent. 1st Grade	Per Cent. 2nd Grade	Per Cent. Off Grade	Per Cent. Special and 1st Grade
1944	3.16	88.70	8.10	0.04	91.86
1943	3.20	87.85	8.90	0.05	91.05

To guard against any further decline in cream quality as was evidenced in 1943, the Director of Dairying in June recommended to the Administrator of Services, Wartime Prices and Trade Board, that creameries be allowed to gather cream twice a week until further notice. Permission was subsequently granted to gather cream twice a week during July and August only.

As any further attempts to zone cream routes were abandoned in the spring of 1944 and the alternative of limiting gas allotments to creameries was instituted, many creameries endeavoured to cover the same territory by the restricted pickup system. Consequently many creameries did not take advantage of the twice a week pickup privilege, especially when it was granted for such a short period. There is little doubt but that with normal gathering conditions cream quality would have been much better.

Creamery Summary

	1944	1943
Number of creameries operating	286	293
Number of patrons	75,786	78,072
Average per cent. fat in cream	31.8	32.2
Number of creameries making cheese	24	25
Number of creameries making powdered or condensed milk	18	17
Number of creameries making whey butter	36	38
Number of creameries with locker storages	88	83
Number of creameries manufacturing butter only—		
(a) with no other associated product	62	65
(b) with no other dairy products	139	146
Average price of butter (solids)	34.5	34.1
Average price of first grade butterfat on truck (subsidy not included)	34.9	34.9
Approximate per cent. of cream delivered to creameries by producers	30.7	29.1
Average per cent. of fat in milk received at manufacturing plants	3.59	3.61

Buttermakers' Certificates Issued

	First Class	Second Class	Permits	Beginners' Permits	Special Permits	Total
1944	238	21	—	19	23	301
1943	241	29	—	29	19	316

CREAMERY INSTRUCTION

The creamery instruction staff again carried on with one man less than in normal times and with the dairy school at Guelph conducting two short courses, the instructor in charge of buttermaking was off his territory six months instead of the usual three. With each instructor having over 30 plants under his supervision they found it extremely difficult to keep everything under control.

The result of the inability of plants to obtain efficient dependable help was most evident in the weighing, sampling and testing of milk and cream. The instructors were obliged to spend the greater part of their time in plants checking this work. More adjustments in tests were required than would be expected from normal efficient work.

Mechanical defects in butter were 7.5 per cent less than the previous year and flavour defects indicated that less butter was lowered in grade through faulty plant methods. There were no serious outbreaks of surface taint during the year.

A few more creameries took advantage of the sample grading service offered by the Grading Service of the Dairy Division, Dominion Department of Agriculture. More interest was noted in the Yeast and Mould Service.

Instructors found that creamerymen generally were anxious to keep their plants and equipment in good condition. Dairy supply houses were swamped with equipment orders and because of rationed supplies could not guarantee deliveries for many months.

New, seasoned butter boxes were very difficult to obtain and many creameries experienced difficulty obtaining a sufficient supply of boxes of any kind. A very serious situation developed with a number of creameries when new butter boxes they purchased developed mould. Observations indicated that these boxes were made from unseasoned lumber and apparently all originated from one source. The creamery instruction staff spent considerable time and effort endeavouring to have this condition rectified. Assurance was given by the Director of Wood Boxes and Shooks, Wood Products and Metal Containers Division, Wartime Prices and Trade Board, that he would make sure that butter boxes would be kept up to grade and standard in the future.

For the fifth consecutive year the workmanship and composition control competition was conducted in the Southwestern Ontario group of creameries. Efficiency in manufacturing methods in this group has now reached a high standard.

Only two buttermakers' clubs operated during 1944, although several others held one meeting.

Instructors as usual attended and addressed meetings of producers and manufacturers and acted as judges in dairy products at a number of fairs.

The supervision of the weighing, sampling and testing of milk at the milk manufacturing plants was under the creamery instruction staff.

AGRICULTURAL REPRESENTATIVE BRANCH

FOREWORD

In addition to the all out production programme, war work such as postponement investigations and labour problems continued to occupy a lot of the Agricultural Representative's time. Post war planning, an increase in co-operative activity and other types of farm organization, including a rapid increase in Junior Farmer organization and the development of County Agricultural Committees represented added duties to the heavy extension programme.

CHANGES IN PERSONNEL

New Appointments

- A. M. BARR, *Agricultural Representative*, Stormont County, April 15th, 1944.
- P. L. BOURGEOIS, *Agricultural Representative*, Cochrane West, September 1st, 1944.
- C. L. MOXLEY, *Assistant Agricultural Representative*, Kent and Essex Counties, June 1st, 1944.
- A. O. DALRYMPLE, *Assistant Agricultural Representative*, Grey County, June 1st, 1944.
- D. A. TAYLOR, *Assistant Agricultural Representative*, Simcoe County, June 1st, 1944.
- J. Y. HUMPHRIES, *Assistant Agricultural Representative*, Renfrew and Carleton Counties, June 1st, 1944.

Promotions

- R. G. BENNETT to *Agricultural Representative*, Glengarry, November 1st, 1944.
- A. G. GRUBBE to *Agricultural Representative*, Lanark, March 26th, 1945.

Resignations

- J. A. DALRYMPLE, *Agricultural Representative*, Glengarry County, October 31st, 1944.
- D. C. McLEAN, *Assistant Agricultural Representative*, Elgin County, January 31st, 1945.

Death

FRED FORSYTH, *Agricultural Representative*, Lanark County, died on January 9th, 1945, at the age of 58. Mr. Forsyth graduated from the Ontario Agricultural College in 1914, was Assistant Agricultural Representative in Middlesex and Haldimand Counties and promoted to Agricultural Representative in Lanark County in 1916, transferred to Bruce County in 1929, then to Glengarry in 1934. He resigned to go farming in 1936 and rejoined the Service again on January 1st, 1944.

Decoration

LIEUT. NORAH J. COOPER, former member of Head Office Staff, was awarded the M.B.E. in the King's Birthday List.

OFFICE STATISTICS

53 offices only

	<i>Total</i>	<i>Average Per Office</i>
Number of Letters Received	118,384	2,233
Number of Letters Written	110,599	2,087
Number of Circular Letters Mailed	495,905	9,357
Number of Incoming Telephone Calls	117,170	2,211
Number of Visitors at Office	150,954	2,849
Number of Meetings Held in Office	3,095	56
Number of Bulletins and Reports Distributed Through Office	122,871	2,318
Number of Miles Travelled on Government Business	784,863	13,677
Number of Meetings Addressed	2,935	55
Number of Additional Meetings Attended	2,324	44
Attendance at Meetings	341,837	6,450

LIVE STOCK IMPROVEMENT

Horses

Interest in horses is at low ebb. In spite of this the Elgin County Horse Breeders' Association was organized. The Middlesex Heavy Horse Association held an excellent show at Glencoe. The Perth Horse Breeders' Association continued with a big fair at Stratford, with 439 entries, \$2,672.00 in prizes, and an attendance of 2,500. A good show was also held at Millbrook.

Agricultural representatives in Kenora, Rainy River and Thunder Bay treated over 600 horses for Encephalomyelitis. Agricultural Representatives provided transportation for the stallion inspectors.

Cattle

Interest in calthood vaccination and in artificial breeding developed rapidly. In Peel County a Calthood vaccination project was started as an experiment. In the few months the project has been underway 1,327 calves on 364 farms were vaccinated. In Leeds County an artificial breeding club was organized, also as an experiment. The club covers approximately two townships in a cheese factory area where grade Holsteins predominate. Three bulls were purchased, technician and caretaker engaged, bull barn prepared and equipment purchased. During the year, 525 cows were bred in 73 herds, 80% of the cows are safe with calf. Much useful information is being secured from this project. The Agricultural Representative acts as Secretary-Manager for the club.

The number of cows on test under the Cow Testing Association Plan increased from 732 in 1943 to 1,169 in 1944. In Halton, where 9 herds are on test, the high herd of 11 cows averaged 10,794 lbs. 3.57 milk valued at \$273.63 per cow, whereas the low herd of 11 cows averaged 5,227 lbs. 4.13 milk valued at \$143.48 per cow, the difference being \$130.15 per cow. Under the Restricted Area Plan regular tests were completed or will be underway in 8 counties. The first general test was made in 4 counties and a canvas is underway in 1 county and 2 districts.

Warble Powder continues to be distributed in a number of areas. For instance, the District of Algoma distributed 208 cartons of powder and 5,200 cattle were treated for Warbles.

103 Special Cattle Shows were held, including 40 Black and White Shows, and 11 Red and White Shows. There was a total of 6,470 entries and more than \$26,640 paid in prize money. In Northern Ontario 121 Bull Clubs, with 573 members, are in operation.

In order to defray the high cost of freight on stock coming to market from the Cochrane District, the Department of Agriculture provided a co-operative plan whereby a flat rate was charged the shipper and the Department paid the balance of the freight, as well as insurance and the travelling expenses of an attendant for each case.

<i>Stock Shipped Under the Plan</i>		<i>Cost to the Department</i>	
Cattle	342	Freight	\$ 818.79
Calves	27	Travelling Expenses	433.49
Hogs	102	Insurance	88.48
Sows	18		
Lambs	180		
	<hr/>		
Total	669	Total	<hr/> \$1,340.67 <hr/>

With the absence of qualified veterinarians in Northern Ontario, Agricultural Representatives are called to treat many farm animals. For instance, the following is a report of veterinary work carried on by the Agricultural Representatives in the Rainy River District.

Office callers	845
Phone calls	1,655
Prescriptions given	1,657
Calls to farms	319
Animals treated	2,605
Post Mortems	29
Minor operations	9

Sheep

Agricultural Representatives conducted 38 sheep parasite demonstrations with an attendance of 287. In Northern Ontario 9 Lamb Fairs were held with 1,289 entries. 6,968 lambs were marketed co-operatively at these Lamb Fairs.

Under the Ram Grading Policy, 79 breeders had 317 rams graded.

Swine

During the year, two new Yorkshire Clubs were organized, the Quinte Kawartha Yorkshire Club and the Durham Yorkshire Improvement Association.

In Bruce County, in order to improve the quality of market hogs, the 75% A project was started. A record has been obtained of the number and grade of all hogs marketed by each farmer in Bruce County during the period 1941 to 1944. Farmers are invited to forward their grading slips to the Agricultural office. Prizes totalling \$491,00 are offered to farmers who make the greatest increase in quality of hogs marketed. In preparation for this, a circular letter was sent to all hog producers. 30 barn meetings and 9 carcass demonstrations were held. 14 10-minute radio talks and 5 ½ hour radio interviews were given.

Agricultural Representatives continue to co-operate with the Dominion Production Service in taking the quarterly Pig Survey.

There are in Ontario 154 Boar Clubs organized by Agricultural Representatives in co-operation with the Ontario Live Stock Branch.

46 Special Swine Meetings were held with an attendance of 3,403.

In order to determine the cost of producing market hogs under varying farm conditions, 100 Junior Farmers co-operated with the Department of Agriculture in a Cost of Hog Production Project. Each co-operator kept records of the kind and amount of feed fed a litter of pigs from weaning to marketing. Weights, grades and costs were recorded. Both summer and winter litters were used. The project is still in progress.

Poultry

In order to handle the greatly increased volume of poultry, and stimulated by a special market with the United States Army demanding graded dressed poultry, new or remodelled Co-operative Poultry Processing Plants were completed or under construction at Peterborough, Woodstock, Renfrew, Cayuga and Owen Sound. Arrangements were also completed for installing a privately owned plant in Glengarry County. The Plants are all modern and capable of handling at least 2,000 birds per day. The Renfrew plant, for instance, is entirely new and cost \$75,000.00.

The Cayuga plant started in October and to March 31st, handled 80,000 birds and 45,797 dozen eggs.

Under the Breeding Station Policy there are in Ontario 462 flocks with a total of 398,694 birds.

27 poultry culling demonstrations were held with an attendance of 693.

Live Stock General

There are in Ontario 265 county and district Breeders' Clubs, with a membership of 4,841. Agricultural Representatives act as the Secretaries for most of these.

SOILS AND CROPS

Agricultural Representatives act as Secretaries for the 53 County Crop Improvement Associations and are largely responsible for the organization of the following:

- 30 Seed Fairs and Seed Displays.
- 16 Field Meetings.
- 117 Hall Meetings.
- 3 Field Crop Tours.

EXPERIMENTAL AND DEMONSTRATION PLOTS

Variety Test Plots	266
Variety and Fertility Plots	103
Fertility Plots	54
Junior Farmer Test Plots	23
Rod Row Plots	104
Hay and Pasture Plots	209
Mustard Control Plots	4
Disease and Insect Control Plots	3
Other types of Test or Demonstration Plots	196
Total	962

277 soil samples were tested in the Agricultural Representatives' offices, and 1,540 were sent away for analysis.

2,515 Nitro Cultures were distributed from the Agricultural Representatives' offices. Special soil projects and programmes were started in many counties. In Essex County, for example, a project was started to return more organic matter to the soil, and in Simcoe County an extensive Soil Conservation and Land Utilization Programme is under way.

Seed surveys were conducted in a number of counties. Assistance was given in the collection of Milk-Weed pods.

Hay Distribution

During the winter when roads were blocked and hay was scarce in certain areas, surveys were made of available supplies. A few roads were plowed at Departmental expense and contracts were made between buyer and seller for upwards of 100 cars of hay.

Seed Grain Distribution

306 settlers in Northern Ontario secured seed under the Seed Grain Distribution Policy. Of these, 244 paid cash and 62 gave notes.

The total cost of seed and distribution charges amounted to \$9,069.19. Total cash received amounted to \$6,272.40.

Orchard Spray Service

Agricultural Representatives forwarded an average of 10 spray service letters to 4,617 fruit growers.

Drainage

197 requests were received for drainage surveys. 82 surveys were made by Agricultural Representatives. The remainder were forwarded to the Drainage Department at Guelph. 5,436 acres were surveyed and of this 4,614 were tiled. 136 septic tanks were installed with the use of tank forms located at Agricultural Representatives' offices.

FARM LABOUR

Applications for farm help received	6,027
Number placed by Agricultural Representatives	1,870
Postponements investigated	8,533
Harvest Leave applications investigated	4,266
Conscientious objectors investigated	199
Permits signed for bush work or other special jobs	8,931
Western harvesters coming East	801
Ontario farmers sent West for the harvest	4,166
Soldiers under the Farm Duty Plan	856
Prisoners of war working on farms	300
Japanese farm labourers	23
Total	<u>35,972</u>

Farm placements and postponement cases occupied a lot of the Agricultural Representatives' time. J. A. Garner, Agricultural Representative for Kent, had charge of the placement of prisoners in South Western Ontario. W. M. Crokery, Agricultural Representative in Carleton County, assisted in placing a number of prisoners on individual farms in that area. E. I. McLoughry supervised the placing of conscientious objectors.

Almost every Agricultural Representative devoted considerable time to organizing cities, towns and villages in his own County for commando labour. Although totals are not available for the province, the City of Toronto provided 10,300 man days, St. Catharines 5,400 man days, Chatham, 6,200 man days, and Brantford, 38,500 man hours.

REFORESTATION

Many counties indicated renewed interest in county forests. Bruce County purchased 3,600 acres to be added to the County forest. York purchased 635 acres and Wellington 300 acres.

CO-OPERATIVE ORGANIZATION

Rapid strides were made in Co-operative Organization, and Agricultural Representatives spent much time with farmers in planning and constructing new buildings, installing new equipment, making additions to old buildings and in reorganizing or consolidating existing organizations in line with greatly expanded business. Several Agricultural Representatives were on loan for various periods to Co-operative Companies, until suitable managers could be secured.

COUNTY COMMITTEES

During the year to March 31st, 1945, the following Counties and Districts organized County Agricultural Committees under the County Committees Act: Algoma, Bruce, Carleton, Durham, Essex, Halton, Hastings, Kenora, Lambton, Lanark, Norfolk, Northumberland, Peel, Perth, Peterborough, Rainy River, Simcoe, Waterloo and Wellington.

In each case the Agricultural Representative is Secretary of the County Committee.

JUNIOR DEVELOPMENT

Rural School Fairs

37 school fairs were held with 367 schools taking part. 8,827 pupils made 24,074 entries. The attendance amounted to 10,637 children and 23,970 adults.

Boys and Girls Club Work

5,280 boys and girls were enrolled in 468 clubs in 1944, as compared to 442 clubs with a membership of 5,137 in 1943. Club work in the counties is organized by Agricultural Representatives and a local committee for each club. Prize money is provided equally by the Federal and Provincial Departments of Agriculture and the local sponsoring organizations.

Clubs Organized in 1944

	<i>No. of Clubs</i>	<i>Membership</i>
Calf Clubs	91	1,470
Swine Clubs	27	383
Foal Clubs	4	51
Sheep Clubs	2	20
Poultry Clubs	10	180
Grain Clubs	23	349
Potato Clubs	44	727
Girls' Garden Brigades	267	2,104
Totals	468	5,280

Provincial Inter-Club Competitions

Provincial Inter-Club Competitions were held at the Kemptville Agricultural School and at the Ontario Agricultural College.

Winning Teams

Project	Teams Competing at		County	Coach	Team Members
	Guelph	Kemptville			
Dairy Calf	17	7	York	W. M. Cockburn	Archie Fletcher, Maple. Keith Wardlaw, Kleinburg.
Beef Calf	6	..	Ontario	F. M. Campbell	Edward Ball, Uxbridge. Lance Beath, Oshawa.
Swine	17	3	Durham	E. A. Summers	Boyd Ayre, Hampton. Frank Stenger, Enniskillen.
Foal	3	..	Middlesex	W. K. Riddell	Bev. Robb, Ilderton. Bob Evans, Ilderton.
Poultry	3	..	Grenville	C. C. Tennant	Lorena Beckett, Kemptville. Lorna Render, Oxford Station.
Grain	13	2	Durham	E. A. Summers	Bruce Taylor, Enniskillen. John Green, Nestleton.
Potatoes	19	5	Durham	E. A. Summers	Loyd Ayre, Hampton. Dalton Darrell, Nestleton.

182 boys and girls in 91 teams participated in the Provincial Contests.

National Contests

The Provincial Championship teams in Dairy Calf, Swine, Grain, and Potato projects were selected to compete in the National Club Contests at Toronto, in competition with Championship teams from other provinces. The Ontario Dairy and Potato teams won first place, the Swine team second, and the Grain team fourth. Since 1931, Ontario has entered 51 teams in National Contests, winning 24 National championships, 15 seconds, 8 thirds, 3 fourths, and 1 fifth.

Junior Fairs and Club Camps

Two Junior Fairs or Club Camps were held. The Lakehead Exhibition, in co-operation with Service Clubs, staged a three-day Club Camp with 67 boys and girls participating.

The Central Canada Exhibition Board, in co-operation with the Ontario Department of Agriculture, staged a Club Fair at Kemptville. A total of 320 boys and girls participated.

The following table is a record of participation in the various departments of the fair:

Club Show — Holstein	86
Ayrshire	40
Jersey	6
Shorthorn	18
Hereford	9
Baby Beef	8
Swine	12 (2 sows each)
Garden Brigades and other girls' work	130
Judging Competition — Seniors	11
Intermediates	35
Juniors	79
Total	434

All boys and girls participating were housed at Kemptville overnight.

JUNIOR FARMERS

The Ontario Junior Farmers' Association was organized on April 4th, 1944. On February 6th, 1945, an agreement was reached between the Ontario Federation of Agriculture, the Ontario Department of Agriculture and the

Junior Farmers' Association to the effect that all organizations concerned would co-operate in making the Junior Farmers' Association the basis for all Junior development in Ontario for the age group of roughly 16 to 30 years of age. The membership at the time of the formation of the Provincial organization stood at 3,800. On March 31st, 1945, it had increased to 5,500.

Provincial Projects

Conferences were held at Kemptville and Guelph and the Annual Meeting was held at Guelph. Total attendance at these three functions amounted to 500. Since 1941, \$11,500.00 has been raised through the Junior Farmers' War Service Fund. 100 Junior Farmers participated in the Cost of Hog Production Project. 29 boys and girls attended the 4H Club Congress in Chicago. 2 Inter-County Seed Judging Competitions were held. Durham County won the Quinte District Competition and Grenville County the Ottawa Valley Seed Judging Competition.

During the year "Junior Farmer News" was expanded from a mimeographed publication going to about 300 people, to an 8-page printed monthly edition with a circulation of over 4,000.

Club Programmes

Practically all clubs carried on regular monthly meetings as well as a wide list of projects and social and recreational activities. Prominent in its list are Live Stock and Seed Judging Competitions, Public Speaking and Drama Contests, Music Festivals, Conservation and Reforestation Projects, Church Services, Salvage Drives, Draws for War Funds, assistance with Victory Loans, Annual Meetings, Banquets and Field Days, Garden Parties, trips to Packing Plants, Farm machinery painting project, County Conferences, skating parties, Moonlight excursions, fostering boys' and girls' club work, radio forums, etc.

The Junior Farmer Movement is developing rapidly and is fast becoming one of the leading farm organizations within the Province.

SURVEYS

During the year Agricultural Representatives made the following special surveys:

- Farm Machinery Survey.
- Farm Buildings Survey.
- Water Shortage Survey, including list of well drillers.
- Sheep Losses Survey.
- Hay Survey, including list of operators of hay and straw balers.
- County Seed Survey.
- Wind Damage Survey.
- Investigation re damage to crops in 21 plane crashes.

WAR SERVICE ACTIVITY

Agricultural Representatives are called upon to act on many War Service Committees and hold important positions in such organizations as the Canadian Red Cross Society, Victory Loan Committees, Community Fund Committees, Blood Donor organizations, Salvage Drives, Victory Garden Committees, Distribution of Ration Books Committees, Rehabilitation Committees, Navy League, Children's Aid Society, War Savings Stamp Drive, Reception Committee for Returned Men and Auxiliary and Citizens' Committee.

Most Agricultural Representatives are members of Service Clubs and many hold executive positions in these organizations.

shall give all producers a milk quota by which the producer knows in advance of the shipment period how much milk he may ship to his market at the basic price. Thus, for the first time, provision is made for all fluid milk market producers in Ontario to be on a sound scientific basis in sharing equitably in the fluid milk markets.

Milk production for the fluid milk markets presented many difficulties for producers and distributors. The increased trend of milk consumption, so noticeable during the war years, continued its upward trend in 1944 and was a real challenge to producers of milk to meet the demand. Considering the many difficult situations with which farmers were faced especially in regard to farm help, milk producers made an outstanding contribution to the war effort in their endeavour to produce sufficient milk to meet the consumer demand. Market requirements were met for the most part by the regular producers to the fluid milk markets but at times throughout the year, especially during the fall months, supplementary supplies from manufacturing plants had to be purchased.

During the year milk distributors made a commendable effort to meet very difficult situations. The milk supply from regular producers, while improved over 1943, was at times inadequate. Extra supplies from outside sources were costly and uncertain as to quantity and, in some cases, quality. The restrictions, imposed by the Agricultural Food Board in procuring new producers, added to the difficulties in securing an ample milk supply. The big snow storm of December provided a real challenge to the milk distributor. Despite this and many added problems of increased output, of labour, of supplies, the interests of the milk consumer have been well served by the milk distribution industry.

Subsidies paid by the Federal government continued throughout the year and helped greatly to encourage milk production. In the majority of our markets producers of fluid milk received a subsidy as follows,—

January 1 to April 30	55 cents per hundred pounds
May 1 to September 30	35 cents per hundred pounds
October 1 to December 31	55 cents per hundred pounds

In a few small places producers received a subsidy of 25 cents per hundred pounds throughout the year.

During the year Board meetings were held as follows:—

1. Meetings having to do with fluid milk matters	38
2. Meetings having to do with manufacturing milk matters	2
3. Registered notices of Hearings before Board	106
4. Appointments in Chairman's office	201
5. Meetings attended by Chairman out of the office	46

At these meetings personal hearings were conducted and decisions were rendered on 601 separate items. It was possible to administer the Act with a smaller number of meetings than in former years because, under the Amendment to the Act, the Board instructed the Chairman to clear non-contentious matters which came up between Board meetings, subject to the Board's approval at the next meeting. This arrangement made possible the more expeditious handling of Board business and generally increased the efficiency of the Board's work.

A total of 1,102 licenses were issued to milk distributors; 45 to milk processors; 184 to milk transporters in the Toronto milk market.

The total amount of bonds on file with the Board during the year for the guarantee of payments to producers for milk purchased from them was \$2,957,750.00. For the first time since Milk Control was instituted in 1934, the

prices in effect. The producers to manufacturing milk plants received subsidies as follows,—

January 1 to March 31	30 cents per hundred pounds
April 1 to September 30	15 cents per hundred pounds
October 1 to December 31	30 cents per hundred pounds

In conclusion, it can be fairly said that the legislation has served a very useful purpose, in that very worth while progress has been made during the year. The industry has been placed on a solid basis of operation by the provisions of the Order No. 44-6. It is anticipated that once this order is fully understood by producers and distributors and applied to the markets of the Province, it will bring about an orderly method of the marketing of milk by producers and generally will be of great assistance to the industry and especially the producers in sharing a market equitably among producers in times of surplus production.

CO-OPERATION AND MARKETS BRANCH

The activities of the Branch are devoted to administering The Farm Products Control Act under the jurisdiction of The Farm Products Control Board, and The Credit Unions Act under the jurisdiction of the Supervisor-Inspector and Registrar of Credit Unions.

THE FARM PRODUCTS CONTROL BOARD

Under The Farm Products Control Act, the Farm Products Control Board is given authority to recommend the approval of marketing schemes, and, if approved by the Minister of Agriculture, to establish and supervise the operation of local boards to administer the schemes.

Marketing schemes are the legally constituted means for collective bargaining and regulating the sale of designated farm products. Each scheme must provide for a definite program of marketing activities and must be supported by a vote by ballot showing that a fairly representative number of the growers concerned are in favour of the scheme.

Each scheme is administered by a local board of growers, elected by the growers. Subject to the approval of the Farm Products Control Board, local boards are empowered to negotiate and fix agreements respecting minimum prices, premiums, discounts, forms of contract and conditions of sale. Growers now have some direct voice and authority in marketing their own produce.

Presently there are nine Schemes covering twelve crops in force under the Act, viz.,

- The Ontario Cheese Producers' Marketing Scheme, 1938.
- The Ontario Asparagus Growers' Marketing Scheme, 1938.
- The Ontario Pear, Plum and Cherry Growers' Marketing Scheme, 1938.
- The Ontario Peach Growers' Marketing Scheme, 1938.
- The Ontario Tomato Growers' Marketing Scheme, 1940.
- The Ontario Sugar Beet Growers' Marketing Scheme, 1942.
- The Ontario Berry Growers' Marketing Scheme, 1944.
- The Ontario Bean Growers' Marketing Scheme, 1944.

During the year under review the Ontario Strawberry Growers' Marketing Scheme approved in 1942 and the Ontario Raspberry Growers' Marketing Scheme approved in 1943 were amalgamated, at the request of the growers concerned, into one scheme known as the Ontario Berry Growers' Marketing Scheme.

Also during the year under review the Board approved the Ontario Bean Growers' Marketing Scheme after the petition and the vote by ballot of the growers concerned required by the Farm Products Control Act. The scheme provides for the marketing of the Ontario dry bean crop which annually approximates 1,250,000 bushels valued at some \$3,000,00. and produced largely in the five south western counties of Kent, Huron, Elgin, Middlesex and Lambton. Of the total number of 5,669 bean growers involved 3,688 growers voted in favour of the scheme or 65.04% of those eligible to vote and 104 growers voted or opposed or 2.7% of the votes cast.

A brief comment on the working of each Scheme will illustrate the scope of the marketing activity involved.

1. *The Cheese Scheme:*

Some 26,000 milk producers supply milk for processing into cheese. The cheese scheme was the first marketing scheme approved under the Act. The purpose of the scheme is —

“to require the primary sale or primary offer for sale of all cheddar cheese produced in Ontario to be made on local cheese boards under uniform rules and regulations.”

The extent of the scheme has achieved its primary object of stimulating competition in buying cheese is evident from the figures that during 1944 95% of the cheese graded in Ontario was sold on local cheese boards whereas only 36.6% of the cheese graded was sold on local cheese boards in 1935, the year prior to the commencement of the scheme's operations.

2. *The Asparagus Scheme:*

Some 800 growers sell asparagus annually to the canners in Ontario for processing. Only the processing industry is regulated; i.e., asparagus sold on the fresh vegetable market is exempt from the scheme. One marketing agency appointed by the local board sells all the asparagus purchased for processing, each growing district being allotted its share of the tonnage sold. A unique feature of this scheme is an agreement by the growers to cease cutting when total orders have been filled. In this way production is fitted to demand.

In 1944 — 1,636 tons of asparagus were sold for processing at a total value of \$313,267.34. This compares with 1,208.3 tons valued at \$226,570.11 sold for processing in 1942.

In 1944 asparagus minimum prices compared with 1943 were:—

1944	1943
Grade No. 1 12¼¢ per lb.	Grade No. 1A 12¼¢ per lb.
Utility Grade A 10¢ per lb.	Grade No. 1B 10⅞¢ per lb.
Utility Grade B 8¢ per lb.	Utility Grade A 9¼¢ per lb.
Grade No. 2 5¼¢ per lb.	Utility Grade B 8¢ per lb.
	Grade No. 2 5¼¢ per lb.

3. *The Pear, Plum and Cherry Scheme:*

Some 2,700 growers sold 1,761 tons of sour cherries valued at \$351,997.64; 489 tons of sweet cherries valued at \$145,292.40; 2,136 tons of plums valued at \$194,528.16; 2,563 tons of Bartlett pears valued at \$149,042.91; and 5,400 tons of Kieffer pears valued at \$303,592.61, or a total of \$1,144,453.72 for processing in 1944.

This compares with 1,283 tons of sour cherries valued at \$237,413.93; 206 tons of sweet cherries valued at \$49,612.00; 1,480 tons of plums valued at \$149,092.56; 1,066 tons of Bartlett pears valued at \$104,875.06; and 3,083 tons of Kieffer pears valued at \$172,951.27, or a total of \$713,944.82 sold for processing in 1943.

In 1944 cherry, plum and pear minimum prices compared with 1943 were:

	1944	1943
*Sour Cherries _____	\$200.00 per ton	*180.00 per ton
*Sweet Cherries _____	300.00 " "	240.00 " "
Plums _____	90.00 " "	100.00 " "
Bartlett Pears, 2" and up _____	100.00 " "	100.00 " "
Bartlett Pears, 1 ³ / ₄ " to 2" _____	70.00 " "	70.00 " "
Kieffer Pears, 2" and up _____	60.00 " "	60.00 " "
Kieffer Pears, 1 ³ / ₄ " to 2" _____	40.00 " "	40.00 " "

*The Wartime Prices and Trade Board refused to concur in the Farm Products Control Board's Orders establishing these minimum prices. Processors generally paid these prices however, because of market conditions due to light crops. The above prices include Dominion Government subsidies of \$30 per ton paid on sweet and sour cherries processed in 1944 compared with no subsidy paid in 1943; \$40. per ton paid on plums processed in 1944 compared with \$50. per ton paid in 1943; \$40. per ton on No. 1 Bartlett and \$30. per ton on No. 2 Bartlett pears processed in 1944 compared with the same subsidies paid in 1943; \$20. per ton on No. 1 Kieffer and \$17.50 per ton on No. 2 Kieffer pears processed in 1944 compared with the same subsidies paid in 1943.

4. The Peach Scheme:

Some 900 growers sold 8,473 tons of peaches valued at \$808,978.00 for processing in 1944. This compares with 2,543 tons of peaches valued at \$332,632.18 sold for processing in 1943.

A more nearly normal peach crop was harvested in 1944, necessitating a minimum price structure based on varieties, than in 1943 when only one minimum price for all varieties was established due to the virtual crop disaster from weather conditions that season.

Minimum prices in 1944, compared with the overall minimum price in 1943, were:—

	1944	1943
Elbertas and Jubilees _____	\$97.50 per ton	All Varieties
"V" Type and other varieties _____	92.50 per ton	\$130.00 per ton

The above prices include Dominion Government subsidies of \$32.50 per ton paid on all varieties processed in 1944 compared with \$67.50 per ton paid on all varieties processed in 1943.

5. The Tomato Scheme:

Some 7,500 growers sold 243,325 tons of tomatoes valued at some \$4,890,-832.50 for processing in 1944. This compares with 144,468 tons of tomatoes valued at \$2,339,772.73 sold for processing in 1943.

The minimum price in 1944 was \$20.10 per ton including Dominion subsidy of \$6.00 per ton compared with the minimum price in 1943 of \$17.10 per ton including Dominion subsidy of \$3.00 per ton.

6. The Seed Corn Scheme:

The membership of this marketing group is comprised of some 260 open pollinated seed corn growers and some 200 hybrid seed corn growers in South-western Ontario who specialize in the production of corn for seed purposes. The scheme's object is to make the production of seed corn sufficiently attractive, despite the extra costs of selection and isolation, that certain varieties and strains will be preserved and maintained. Through negotiation with the dealers in seed corn a scale of premiums to the growers for different services rendered is established for the different varieties of hybrid seed corn to be paid over and above the average January market price per bushel for dried

commercial corn in each year. Also through negotiation with the dealers in seed corn a scale of minimum prices per bushel is established for the different varieties of open pollinated seed corn in each year. In 1944 some 263,325 bushels of open pollinated seed corn and 147,725 bushels of hybrid seed corn were produced compared with 175,641 bushels of open pollinated seed corn and 92,241 bushels of hybrid seed corn produced in 1943.

The minimum prices for open pollinated seed corn and minimum premiums for hybrid seed corn in 1944, compared with those in 1943 were:—

Open Pollinated Seed Corn

		1944	1943
(1) Dents, Golden Glow, Wisconsins, No. 7, White Cap, Yellow Dent, Bailey, Bloody Butcher and Sweep- stakes	Registered No. 1	\$4.25 per bu.	\$4.25 per bu.
	Registered No. 2	4.00 per bu.	4.00 per bu.
	Registered No. 1	4.75 per bu.	4.75 per bu.
	Registered No. 2	4.50 per bu.	4.50 per bu.

Hybrid Seed Corn

OPTIONS

	1944 basic price \$1.04 per bushel plus following premiums	1943 basic price \$1.04 per bushel plus following premiums
(1) Dealer supplies seed; grower supplies land, cultivates and uses every reasonable endeavour to assure early maturity.....	\$.50 per bu.	\$.40 per bu.
(2) Grower supplies seed, plants, grows, cultivates, detassels, harvests, properly sorts, dries, processes, treats and delivers in new bags	2.75 per bu.	2.75 per bu.
(3) Grower supplies seed, plants, grows, cultivates, detassels, harvests, properly sorts, dries, shells and delivers	1.80 per bu.	2.00 per bu.
(4) Grower supplies seed, plants, grows, cultivates, detassels, harvests, properly sorts and delivers...	1.40 per bu.	1.50 per bu.

7. The Berry Scheme:

Some 400 growers sold 1,219,701 qts. of strawberries valued at \$231,895.96, and 181,363 qts. of raspberries valued at \$57,379.70 for processing in 1944. This compares with 1,705,539 qts. of strawberries valued at \$278,984.65 and 267,016 qts. of raspberries valued at \$73,453.75 sold for processing in 1943.

The 1944 minimum prices established by the Board after negotiations between growers and processors were 15¢ per qt. on strawberries and 12¢ per pint on raspberries, which included a Dominion Government subsidy on each crop of 3¢ per lb. (qt. equivalent of 20 oz.). Subsequently The Wartime Prices and Trade Board refused to concur in the Farm Products Control Board minimum strawberry and raspberry price Orders. Consequently the Orders were withdrawn and the market declared free and open. Processors actually paid 19¢ per qt. average for strawberries and 15.8¢ per pint average for raspberries for processing in 1944 due to the relatively high fresh market price level as a result of the steadily reduced acreage being devoted to these crops since 1937 which situation has been further aggravated by wartime labour conditions.

8. The Sugar Beet Scheme:

Some 2,500 growers sold 131,328 tons of sugar beets with an average sugar content of 18.54% for a total value of \$1,602,675.00 for processing in 1944. This

compares with 66,312 tons with an average sugar content of 18.65% for a total value of \$766,556.08 sold for processing in 1943.

The minimum average price (16% beet) in 1944 was \$11.00 per ton giving effect to the benefit of the Dominion excise tax reductions and including the Ontario subsidy of \$1.55 per ton compared with \$10.00 per ton (16% beet) in 1943 under the same Dominion excise tax reduction and including the Ontario subsidy of 55¢ per ton.

9. The Bean Scheme:

As noted earlier the bean scheme was approved by the Board during 1944. The aims and objects of this scheme are similar to those already in operation and concern chiefly the establishment of minimum prices, grades, price differentials between grades, picking charges and other matters relating to the marketing of white pea and yellow eye beans produced in Ontario.

Some 5,700 growers marketed approximately 1,149,000 bushels of beans at a total value of \$3,102,000.00 in 1944. Returns to growers were under a two-price plan whereby \$2.50 per bushel including Dominion Government subsidy of 50¢ per bushel was paid for all beans sold on the domestic market and \$3.00 per bushel was paid for all beans exported under contract to the United Kingdom. The crop was allocated under an arrangement whereby the first 600,000 bushels were held for domestic use, the second 600,000 bushels exported and all stocks in excess of 1,200,000 bushels were divided equally between the domestic and export markets.

General:

As reported in each of the past two years the operations of the Farm Products Control Board were necessarily curtailed and its authority limited following the establishment of the Wartime Prices and Trade Board. This was inevitable under Section 2 (3) P.C. 8528 (Dominion) which provides that no properly constituted authority, Dominion or Provincial, by statute or regulation shall fix or approve any specific maximum or minimum price or mark-up at which any goods or services may be sold, offered for sale or supplied except with the written concurrence of the Wartime Prices and Trade Board.

The Farm Products Control Board has co-operated with the Wartime Prices and Trade Board in every possible way and was able to obtain concurrence to all its 1944 minimum price Orders excepting sweet and sour cherries, strawberries and raspberries as previously noted.

As reported for the fiscal year ending March 31st, 1944, there was then under consideration the establishment of a commercial corn marketing scheme and a pea, corn and green bean marketing for processing scheme. Early in the present fiscal year the Board arranged for a vote by ballot of the growers concerned to determine the majority in favour of each scheme. The result of the vote in each case indicated, in the Board's opinion, that insufficient grower support was in evidence and the Board therefore decided it could not recommend either scheme for approval.

In conclusion the Board records that as at the end of the year there was under consideration with the growers concerned a second application for the pea, corn and green bean marketing for processing scheme above noted. The Board has satisfied itself that the proposed scheme sets out a practical marketing program and that these crops are subject to effective regulation under Provincial jurisdiction. Consequently it has arranged for a re-vote by ballot of the growers concerned under a plan that it is hoped will provide an opportunity for a much wider expression of opinion of those directly concerned in the matter.

CREDIT UNIONS

The recent extensive development of credit union organization and activity in the Province of Ontario has continued during the year 1944 at an accelerated rate — 58 new credit unions were incorporated; total membership increased from 32,289 to 44,480, or about 39%; total assets increased from three and a half million to almost five million dollars, or about 43%; the number of loans made increased 27%, and the total amount of new loans, 44%.

The stability of the movement is seen in the fact that only one charter was surrendered during the year, and in this case there was no liquidation — the business having been amalgamated with that of another credit union operating among the employees of the same industrial firm.

Credit Unions in Ontario are authorized by The Credit Unions Act, 1940, and Amendments thereto, which Act replaced the Co-operative Credit Societies' Act, 1922 and The Credit Unions Amendment Act, 1939. Membership in Credit Unions is limited to groups of persons within a well defined neighborhood or community and business may be carried on with members only.

The main objectives of credit union organization are as follows.—

1. To encourage thrift among the members;
2. By the consolidation of the small savings of individuals to create a source of credit at reasonable rates of interest for the provident and productive purposes of the members; and
3. To encourage among the members a programme of education in co-operation and personal finance.

Every credit union is required to make annual returns to the Inspector of Credit Unions which returns include the Financial Statements and certain statistical information. These annual returns from the individual credit unions for the fiscal year ended December 31, 1944, have been consolidated and analyzed and these summaries form the basis of these reports.

INCORPORATIONS

More Credit Unions were organized during 1944 than in any previous year — 58 Certificates of Incorporation were issued. The following table shows the year-by-year situation as to incorporations and dissolutions.

Credit Union Incorporations and Dissolutions

Year	Charters Issued	Charters Cancelled	Dissolu- tions	Amalga- mations	Charters Outstanding as of Dec. 31
1928	1	—	—	—	1
1929	6	—	—	—	7
1930	8	—	—	—	15
1931	8	—	—	—	23
1935	2	—	—	—	25
1936	1	—	—	—	26
1937	—	—	1	—	25
1940	41	9	—	—	57
1941	26	—	—	—	83
1942	38*	—	—	—	121*
1943	43	1	—	—	163*
1944	58	—	—	1	220*

* League Charter included.

ONTARIO CREDIT UNION LEAGUE

The Ontario Credit Union League which has been operating for five years was incorporated under Section 48 of The Credit Unions Act in 1942 as The Ontario Credit Union League Limited. This organization carries on educational and organizational activities and since incorporation, has also conducted a central credit department which acts as a depository for the surplus funds of local credit unions and as a source of credit for local member credit unions whose assets are not large enough to satisfy loan requirements.

The educational activities of the League include the issuance of a monthly publication "The Ontario Credit Union News", which now has a circulation of approximately 2500; the operation of a supply department through which educational, bookkeeping and other supplies are sold to the local credit unions on a favourable price basis; and the supplying of speakers and advisers to local credit unions.

The central credit department is becoming increasingly valuable, and the annual report of this department shows a balance at the end of December, 1944, available for loans to local credit unions, of \$48,201.60 — an increase of 228% over the previous year.

At the end of 1944, 143 local credit unions were members of The Ontario Credit Union League, Limited.

The Ontario League is affiliated with the Credit Union National Association (CUNA) whose headquarters are at Madison, Wisconsin. This affiliation makes the educational and field services of "CUNA" available to members of the league and among other services provides facilities for the bonding of officers and the securing of loan insurance on a co-operative basis.

CREDIT UNION CHAPTERS

In many areas where a number of credit unions are operating, these credit unions are becoming organized into local chapters for educational purposes. These chapters conduct educational meetings, carry on educational work and give assistance to new credit unions in connection with accounting and other problems. Chapters have now been organized in the following areas: Barrie, Hamilton, London, Niagara District, Ottawa, Port Arthur-Fort William, Toronto and Windsor.

CONSOLIDATED FINANCIAL STATEMENTS

The financial statements of the 219 local credit unions doing business in 1944 have been consolidated and these consolidated statements are given herewith. Owing to inadequacy of information in some returns and inaccuracy in others it has been necessary in these consolidations to act upon arbitrary assumptions in some cases which may have led to error but such errors will be minor.

STATISTICS

Some idea of the extent and the rapid development of credit unions in Ontario can be obtained from a study of the statistics given below which show the Provincial totals of the various items included.

PROVINCIAL STATISTICS (TOTALS FOR 219 CREDIT UNIONS)

Item	1943	1944
Number of Incorporated Local Credit Unions as of December 31st	162	219
Provincial League of Credit Unions	1	1
Incorporations during year	43	58

Total Guarantee Fund	\$ 216,760.73	\$ 240,580.07
Victory Bonds Purchased during year	\$ 248,000.00	\$ 352,380.00
Victory Bonds on hand	\$ 528,050.00	\$ 880,430.00
<i>Savings of Members</i>		
Share Savings	\$1,354,713.56	\$2,042,471.30
Deposit Savings	\$1,722,510.73	\$2,445,574.96
Total Savings	\$3,077,224.29	\$4,488,046.26
Total Savings per Member	\$ 95.30	\$ 100.09
<i>Loans</i>		
Total Amount Loaned	\$2,398,674.39	\$3,466,480.76
Number of Loans Made	23079	29336
Average Size of Loan	\$ 103.93	\$ 118.13
Average Amount Loaned per Borrower	\$ 195.56	\$ 210.15
Bad Loans Written Off	\$ 92.67	\$ 708.52
Loans Written Off as a Percentage to Total Amount Loaned0039%	.0204%

Credit union organization is greatly expanding over the entire Province. During 1944 the first credit union was organized in each of the following Counties or Districts,—Brant, Frontenac, Lincoln, Rainy River and Sudbury. The number of credit unions in each County or District at the end of 1944 is shown in the following table—

County or District	Total Number Credit Unions
Province	219
Algoma	1
Brant	1
Bruce	2
Carleton	12
Cochrane	9
Dufferin	1
Essex	23
Frontenac	1

Wentworth	29
York	69

CREDIT UNIONS INCORPORATED IN 1944

	<i>Incorporated</i>	<i>Group Served</i>
165 St. Andrew's Parish Credit Union (Port Arthur) Limited	Jan. 4/44	Members of St. Andrew's Parish, Port Arthur.
166 Formco (Plant Four) Credit Union Limited	Jan. 11/44	Employees of the Ford Motor Co. (Plant Four), Windsor.
167 Inco Falcon Mine, Mill and Smelter Workers' Credit Union Limited	Mar. 7/44	Employees of the International Nickel Company and Falcon Mining Co., Sudbury.
168 St. Mary's Parish (Brantford) Credit Union Limited	Feb. 16/44	Members of St. Mary's Parish, Brantford.
169 Formco (Plant One) Credit Union Limited	Feb. 16/44	Employees of the Ford Motor Co. (Plant One), Windsor.
170 Caisse Populaire de Saint-Joseph d'Orleans Limitee	Mar. 15/44	Members of St. Joseph's Parish d'Orleans.
171 Auto Workers (Oshawa) Credit Union Ltd.	Mar. 15/44	Employees of General Motors, Oshawa.
172 Ste. Anne's Parish (Hallebourg) Credit Union Limited	Mar. 15/44	Members of St. Anne's Parish, Hallebourg.
173 Holy Rosary Parish (Toronto) Credit Union Limited	Mar. 17/44	Members of Holy Rosary Parish, Toronto.
174 Hearst Parish Credit Union Limited—Caisse Populaire de Hearst Limitee.....	Mar. 17/44	Members of Hearst R.C. Parish, Hearst.
175 Caisse Populaire de L'Original, Limitee—L'Original Credit Union Limited.....	Mar. 15/44	Members of L'Original R.C. Parish, L'Original.
176 Caisse Populaire d'Alfred Limitee	Mar. 28/44	Members of Alfred R.C. Parish, Alfred.
177 Caisse Populaire de Chelmsford Limitee	Apr. 11/44	Residents of Chelmsford District, Chelmsford.
178 Dacto Employees' Credit Union Limited.....	Apr. 11/44	Employees of Square D. Co., and Acton Tool Company, Toronto.
179 Cathedral Parish (Pembroke) Credit Union Limited	Apr. 25/44	Members of the Cathedral Parish, Pembroke.
180 Port Arthur Shipyards Employees' Credit Union Limited	Apr. 25/44	Employees of Port Arthur Shipyards, Port Arthur.
181 Canada Packers Employees' Credit Union Limited	Apr. 27/44	Employees of Canada Packers, Toronto.
182 St. George's Parish (Ottawa West) Credit Union Limited	May 1/44	Members of St. George's R.C. Parish, Ottawa.
183 Caisse Populaire L'Assomption de Kirkland Lake, Limitee	May 3/44	Members of L'Assomption Parish, Kirkland Lake.
184 Beaver Credit Union Limited	May 8/44	Employees of the Canadian Pacific Railway, West Toronto.
185 Acme Employees' Credit Union Limited	May 11/44	Employees of Canadian Acme Screw and Gear, Toronto.
186 Caisse Populaire de Sarsfield Limitee—Sarsfield Parish Credit Union Limited	May 11/44	Residents of Sarsfield Parish, Sarsfield.

	<i>Incorporated</i>	<i>Group Served</i>
187 Saint Patrick's Parish (Ottawa) Credit Union Limited	May 17/44	Members of St. Patrick's Parish, Ottawa.
188 Nasco Employees' Credit Union Limited	May 17/44	Employees of National Steel Car, Hamilton.
189 Caisse Populaire de Pinewood, Limitee	May 17/44	Members of Notre Dame du Chemin, Pinewood.
190 Motorco Employees' (Plant One) Credit Union Limited	May 23/44	Employees of Chrysler Co. (Plant One), Windsor.
191 Cobalt Protestant Credit Union Limited	May 23/44	Protestant residents of Cobalt.
192 Caisse Populaire de St. Joseph (Ryland) Limitee	May 31/44	Members of St. Joseph's Parish (Ryland).
193 St. Lawrence's Parish (Hamilton) Credit Union Limited	May 31/44	Members of St. Lawrence's Church, Hamilton.
194 Caisse Populaire de Vars Limitee — Vars Parish Credit Union Limited	June 13/44	Residents of Vars.
195 Caisse Populaire de Point - aux - Roches, Limitee	June 23/44	Residents of Annonciation Parish, Stoney Point.
196 Mohawk Employees' Credit Union Limited	June 28/44	Employees of Mohawk Mills, Hamilton.
197 Ukrainian (Toronto) Credit Union Limited	July 4/44	Members of Ukrainian Federation (Toronto).
198 Ukrainian (Sudbury) Credit Union Limited	July 4/44	Persons of Ukrainian descent, Sudbury.
199 Motorco (Office Workers—Plant One) Credit Union Limited	July 6/44	Employees of Chrysler Co. (Plant One), Windsor.
200 Innisfil Farmers' Credit Union Limited	July 6/44	Residents of Innisfil Township, Barrie.
201 Caisse Populaire de Cyrville Limitee	July 6/44	Members of Notre Dame de Lourdes Parish, Cyrville.
202 Toronto Negro Forum Credit Union Ltd.	July 11/44	Members of Toronto Negro Forum, Toronto.
203 Oakwood Co-operative Services Credit Union Limited	July 25/44	Members of Co-operative Services, Toronto.
204 Port McNicoll Community Credit Union Limited	Aug. 14/44	Employees of C.P.R. and Residents at Port McNicoll.
205 Cambridge Employees' (Plant Three) Credit Union Limited	Aug. 14/44	Employees of Canadian Bridge Co. (Plant Three), Windsor.
206 Caisse Populaire de Noelville Limitee	Aug. 17/44	Residents of Noelville, District of Noelville.
207 Formco (Plant Five) Credit Union Limited	Aug. 18/44	Employees of Ford Motor Co. (Plant Five), Windsor.
208 Dundas Neighbourhood Clubs Credit Union Limited	Sep. 14/44	Members of the Dundas Neighbourhood Clubs, Dundas.
209 DeHavilland Employees' Credit Union Limited	Sep. 14/44	Employees of DeHavilland Aircraft, Toronto.
210 Fellowship of Coloured Churches (Windsor) Credit Union Limited	Sep. 19/44	Members of the Coloured Churches, Windsor.
211 Caisse Populaire de Saint Albert Limitee	Sep. 29/44	Residents of St. Albert Parish, St. Albert.

	<i>Incorporated</i>	<i>Group Served</i>
212 St. Martin's Parish (London) Credit Union Limited	Sep. 29/44	Members of St. Martin's Parish, London.
213 Hamilton Hydro Electric Employees' Credit Union Limited	Nov. 2/44	Employees of Hamilton Hydro Electric, Hamilton.
214 Motorco Employees '(Plant Three) Credit Union Limited	Nov. 2/44	Employees of Chrysler Co. (Plant Three), Windsor.
215 Caisse Populaire Ste. Jeanne d'Arc Ansonville Limitee	Nov. 15/44	Persons of French descent, Iroquois Falls.
216 Burdevatt Credit Union Limited	Nov. 16/44	Residents of LaVallee.
217 Caisse Populaire de Mattice Limitee—Mattice Parish Credit Union Limited	Dec. 5/44	Members of Mattice R.C. Parish, Mattice.
218 St. John's Parish (Kingston) Credit Union Limited	Dec. 5/44	Members of St. John's R.C. Parish, Kingston.
219 Postal Employees' (Toronto) Credit Union Limited	Dec. 5/44	Employees of Postal Department, Toronto.
220 Niagara Township Credit Union Limited	Dec. 11/44	Members of Niagara Township Fruit Co-operative.
221 Labatt Employees' (London) Credit Union Limited	Dec. 14/44	Employees of John Labatt Co., London.
222 Ancaster Co-operative Credit Union Limited	Dec. 18/44	Members of Ancaster Co-operative Assoc., Ancaster.

CREDIT UNIONS DISSOLVED

- 15 International Harvester Twine Mills Employee's Co-operative Credit Society Limited. (This Credit Union was amalgamated with International Harvester Employees' Credit Union Limited.)

CROPS, SEEDS AND WEEDS BRANCH

SEED PROGRAMME

It was apparent during the summer months of 1943 that we would not have sufficient seed for our 1944 requirements and action was taken in September to meet the situation. The co-operation of growers, Crop Improvement Associations, seed cleaners and seed dealers was solicited in providing sufficient high quality seed. Seed surveys were made at regular intervals until seeding was completed and contacts made between buyer and seller, and lists of seed for sale were prepared and given wide distribution. Information regarding the seed situation was made available by means of radio broadcasts, press articles, crop meetings, seed fairs and office correspondence. Contacts were made with Seed Growers' Associations, grain companies and individual growers in Western Canada and information received regarding seed for sale from these sources was given wide distribution. Arrangements were made to hold several carloads of western seed grain in storage in Toronto as a guarantee against any possible seed shortage. This seed was moved as required. Freight was paid on a carload of western Registered Ajax Oats purchased by the Quinte Seed Growers Association. This seed was distributed to selected growers in ten counties. Many farmers, who might otherwise have sown feed grain, were able to obtain high quality seed of recommended varieties at reasonable prices as a result of this seed programme, and sufficient seed was available to meet our requirements.

SEED CLEANING PLANT POLICY

One hundred and four seed cleaning plants have been subsidized by the Department of Agriculture through this Branch to the extent of \$250.00 each during the period 1931-1944. The following is a brief summary of the work done by these plants during the past year:

Grain cleaned	1,020,275 bushels
Clover and Grass seed cleaned	5,737,632 pounds
Farmers served	14,848

New plants were installed during the year at New Liskeard, Sydenham, Durham and Casselman.

GRAIN AND POTATO CLUBS

This Branch, in co-operation with the Plant Products Division, Dominion Department of Agriculture, paid \$1.00 per entry exhibited on Club Achievement Day up to a maximum of \$20.00 to each club. Assistance was given at Provincial Inter-County Club Competitions, also in supplying show ribbons and prize money for same. Expenditure during the year to grain and potato clubs amounted to \$763.50.

NORTHERN ONTARIO SEED PURCHASING POLICY

This Branch had charge of the purchase of seed for northern Ontario. All seed was purchased in accordance with The Canada Seeds Act. Distribution of seed was taken care of by Agricultural Representatives in their respective districts. The following is a brief statement of the number of settlers who received seed, quantity of seed purchased and expenditures:

Number of settlers who received seed	306
Total cost of seed	\$9,069.19
Total cash received	\$6,272.40

AGRICULTURAL LIMESTONE SUBVENTION POLICY

The Department of Agriculture in co-operation with the Dominion Department and Railway companies offers the following financial assistance with the transportation of Agricultural Limestone:

(a) assistance by rail up to a maximum of \$1.00 per ton in Southern Ontario and \$1.75 per ton in Northern Ontario.	
(b) assistance by motor truck at the rate of 3¢ per mile up to 50 miles, minimum subsidy 50¢ per ton, maximum \$1.00 per ton.	
Tonnage on which subsidy was paid by rail	5,402
Tonnage on which subsidy was paid by motor truck	442
Total (166 — 30-ton cars)	5,844
Total expenditure under policy	\$5,828.66

ADMINISTRATION OF WEED CONTROL ACT

The labour situation, gasoline and rubber restrictions made it extremely hard to make progress in the control of weeds. Five District Weed Inspectors were appointed to assist in the administration of the Act. Information and supplies were forwarded to 65 Municipal Weed Inspectors. Inspectors were contacted by visits and circular letters from time to time during the summer months. Arrangements were made to obtain 25 extra units of gasoline for weed control for Inspectors who had only an AA category. An inspection of the Dodder-infested area in Glengarry county involving 547 acres was conducted and a survey made of Leafy Spurge in Perth County. Broadcasts and news articles on weed control were prepared.

SPRAYING DEMONSTRATIONS

In order to encourage the use of chemicals as a means of weed control, the Department, through this Branch, conducted 43 spraying demonstrations during the year. These demonstrations were undertaken on county and township roads, also on private property on various kinds of weeds. Stephen weed killer and Atlacide were used. Demonstrations were advertised, brief talks given and records kept. Assistance was given to municipalities and counties in pooling their chemical requirements, in the purchase and care of sprayers and in their spraying operations. The Branch co-operated with the Botany Department, Ontario Agricultural College in experimental work with various chemicals.

POTATO IMPROVEMENT

Potato improvement work undertaken during the year included Bacterial Ring Rot survey, securing permits and gasoline for legitimate truckers, obtaining sprayers, dusters and other potato machinery for growers, issuing export permits, advising on price ceiling regulations, distribution of information regarding prices and market outlook, locating supplies of seed and table stock, organization of eleven 500 Bushel Potato Clubs, judging entries in various competitions, addressing meetings, giving and arranging radio talks, preparation of 65 publicity articles, organization of annual potato meeting, arranging and attending committee meetings, following up resolutions, work on various committees, distribution of general information by letter, telephone and personal contact in connection with potato production and marketing.

The Bacterial Ring Rot survey which was conducted by fourteen inspectors revealed the presence of the disease on 463 farms of 3000 farms inspected, involving 2800 acres of diseased potatoes. The disease was found in 24 counties and districts. Percentage of infection varied from a trace up to 30%. All growers whose crops were infected were sent registered letters advising instructions to follow under the Plant Diseases Act. Assistance was given in marketing infected potatoes, disinfection of premises and in securing new seed. Subsidy amounting to 4¢ each on one-half the cost of paper bags was paid. Good progress was made in cleaning up. Investigation of ways and means to properly disinfect used potato bags was undertaken by the Branch in co-operation with the Department of Bacteriology, Ontario Agricultural College. The 1944 potato crop in Ontario was estimated at 120,000 acres yielding 8,508,000 cwt. and valued at over 15 million dollars.

ONTARIO CROP IMPROVEMENT ASSOCIATION

The activities of the above Association were administered by this Branch. Fifty-three Branch Associations have been organized to date. The Annual Meeting, which also included a Seed Display, held in Toronto, February 5th-8th, was the largest and most successful in its history. Thirty thousand reports of the addresses presented at this meeting were printed and given wide distribution. A \$200.00 annual grant is available to each Branch Association on approved projects which are conducted. Projects undertaken during the year included: demonstration plots of recommended varieties of oats, barley, wheat, soy beans, peas and corn; potato variety demonstration plots, including the use of fertilizers, dusting and spraying; various types of hay and pasture projects; demonstration plots on fertilizers, agricultural limestone, rates of seeding, cultural practices and methods of weed control. In the majority of cases a check plot was included for purposes of comparison and field meetings and farm tours were held. A number of these associations also held soil and crop meetings. Seed Fairs, displays and sales, and conducted seed surveys.

The following is a brief summary of the activities of the Association during the year:

Projects undertaken	135
Co-operators	793
Acreage under projects	1,479
Seed Fairs and Seed Displays	30
Exhibitors	856
Entries	2,309
Attendance	10,623

LONG-TERM PASTURE PROJECT

During the year a definite step forward was taken in pasture improvement. The Ontario Crop Improvement Association, in co-operation with the Ontario Pasture Committee and Department of Agriculture, located 188 long-term pasture plots throughout the province—total acreage 845½. Each association was entitled to a maximum of twenty acres and each plot had to include a check plot sown to the mixture usually sown on the farm, immediately adjoining, of not less than three acres. The Department paid for the seed for all demonstration plots, also for sufficient 4-12-6 fertilizer for each plot to be applied at the rate of 200 pounds per acre. The seed mixture was as follows: Parkland Brome, 5 pounds; Orchard Grass, 4 pounds; Meadow Fescue, 3 pounds; Timothy, 4 pounds; Alfalfa, 3 pounds; Kentucky Blue, 2 pounds; Canada Blue, 1 pound; White Dutch, 2 pounds. Early oats sown at 1½ bushels per acre or perennial rye at 8 pounds per acre were used as nurse crops; information regarding each plot was recorded on record sheets. Plots were inspected during the fall months and co-operators were advised regarding pasture management. During 1945 these plots will be supervised under the direction of this Branch. Fieldmen will be appointed to give information and accumulate data regarding pasture days, yields and survival of various grasses and clovers in the seed mixture. A uniform sign will be erected at each plot and a tour of plots will be arranged by the Associations. This project will be continued in 1945.

GENERAL CROP IMPROVEMENT PROGRAMME

Assistance was given with the activities of The Dominion-Provincial Committee on Increased Production of Field Root and Garden Vegetable Seed. Forty-seven growers produced 140,900 pounds of mangels, beets, onions, Swede turnips, radishes and cucumber seeds. Seed was paid for by this Branch and cost of same collected from growers after crops had been harvested. This Branch completed all arrangements for shipment of 75,000 pounds (2 carloads) of mangel seed to Czechoslovakia. Tests with seed treaters were continued with the object of improving the efficiency and eliminating the hazard to health of the machines being offered.

Letters received during the year	6,752
First-class mail forwarded	6,226
Second-class mail forwarded	119,186

Several thousand pamphlets, including coloured illustration of perennial sow thistle, wild carrot and chicory, were printed and given wide distribution.

The following posters and cards were printed and distributed in co-operation with the Entomology and Botany Departments, Ontario Agricultural College, Guelph:

Smut Posters	5,000
Smut Control Cards	25,000
Insect Control Cards	25,000
Recommended screens for seed cleaning	3,000

Members of the Branch assisted with the activities of the following Committees: The National Flax Council, The Departmental Implement Committee, The Standing Committee on Field Crop Improvement, Departmental Radio Committee, Alsike Seed Production Committee, Field Root and Garden Vegetable Seed Production Committee, Potato Committee, etc.

Assistance was given to York Crop Improvement Association with its Barberry eradication programme. A portion of the chemical was paid for by this Branch, our sprayer was used and one of our men supervised spraying operations.

News articles on crop production, seed cleaning and weed control were forwarded to the press for time to time during the year and ten broadcasts were prepared for presentation over C.B.L.

The activities of the Branch during the year also included regular office routine, assistance on various committees judging field crop competitions, fall fairs and seed fairs, preparation and distribution of various mimeographed articles, pamphlets and bulletins in connection with crops, seeds and weeds, preparation and setting up of displays at seed fairs and crop meetings and assistance with a general crop improvement programme throughout the province.

PROVINCIAL ENTOMOLOGIST

The Provincial Entomologist in addition to his regular duties, continued as Acting Head of the Department of Entomology and Zoology at the Ontario Agricultural College.

EXPERIMENTAL WORK

The staff of the Entomological Department have, as in previous years, carried on the experimental work of the Provincial Entomologist under his guidance and supervision. Problems included under this heading and involving studies of some of the newer insecticides are given in the report of the Entomological Department. This arrangement, which is by no means satisfactory, is necessitated by the extremely heavy extension and regulatory programme carried by the Provincial Entomologist. It is hoped that, with the cessation of hostilities and the anticipated improvement in conditions, an adequate field and office staff may be provided for the Provincial Entomologist in order that this phase of provincial work may assume its proper status.

EXTENSION

Spray Service Supervision

In co-operation with the Ontario Fruit Branch and the Department of Botany, Ontario Agricultural College, this work was continued as in previous years. Spray service circular letters with detailed directions for each spray were prepared and sent at the proper times to all commercial orcharding areas in Ontario outside the Niagara Peninsula.

Ontario Spray Calendars

The Ontario Spray Calendars were revised in co-operation with the Botanical Department, Ontario Agricultural College, the Ontario Fruit Branch, and the Dominion Department of Agriculture on the basis of experimental results and also orchard observations obtained during the year. Several

important changes in the fruit calendars were introduced this year. The basic unit of 40 gallons or 1 barrel which has been in use since spray calendars were first printed was increased to 100 gallons and this agrees with the basic spray unit of the other fruit producing provinces of the Dominion. To simplify calculations and to avoid errors a table was included, giving the correct amounts of spray materials for spray tanks varying in capacity from 40 gallons to 320 gallons. A feature from earlier spray calendars was also reintroduced in that the specific insect pests and diseases controlled by the recommended sprays are now indicated for each spray. These changes in the calendars are being submitted for approval of all growers as a result of affirmative replies to questionnaires sent out during the past year. Some temporary changes were necessitated by shortages of certain insecticides owing to war conditions.

White Grub Control

On the basis of June beetle flights and first year white grub occurrence during 1944, it is anticipated that injury by two-year grubs may be quite severe in many parts of the province in 1945. In co-operation with the Dominion Field Crop and Garden Insections Investigation personnel, therefore, a folder showing anticipated areas of damage in the province and giving control measures for white grubs was prepared. Copies of this folder were distributed to the agricultural representatives in the threatened areas so that the information would reach farmers prior to planting of susceptible crops.

Japanese Beetle

Co-operation in active participation in the control and survey programmes for this insect with the Ontario Fruit Branch and the Dominion Department of Agriculture was continued.

The season's trapping and scouting records from Ontario showed concentrations of beetle recoveries in two areas in the City of Hamilton and one area in New Toronto in 1944. While there was some increase in comparison with 1943 in the number of beetles taken in Niagara Falls and London districts, the specimens were single and scattered recoveries. A total of 240 beetles of both sexes was taken in Ontario from traps, scouting and interceptions. This shows a slight increase over the 1943 total of 195 beetles from Ontario. Three small areas comprising the two in Hamilton and one in New Toronto referred to above were grub-proofed with lead arsenate during the late fall of 1944.

Personal Visits

In keeping with the necessary restrictions on gasoline and rubber, these visits have been kept at a minimum consistent with securing first-hand knowledge of insect conditions in connection with major crops throughout the province.

Miscellaneous

Fruit, vegetable, field crop and gardeners' meetings were addressed on timely topics in many parts of the province throughout the year. Topical press and radio releases were prepared on insects of special importance. The monthly insect survey reports were continued at the request of the Statistics and Publication Branch.

Because of the effect of wartime conditions upon available supplies of insecticides, conferences of the Pesticides Requirements Committee, of which the Provincial Entomologist is a member, were continued to safeguard the insect control programmes of the province.

With the organization of the exterminators and fumigators into an association, particularly the more recently formed Ontario Pest Control Operators' Unit, the co-operation of the Provincial Entomologist has been frequently requested.

Radio and press releases prepared by this office and other agencies have brought in a greatly increased number of inquiries for information on insects and their control. The resulting increase in correspondence during the past year was consequently relatively large.

REGULATORY DUTIES

The Provincial Entomologist is charged under the Director of the Fruit Branch with the supervision and enforcement of the Plant Diseases Act and its regulations. This work entails also the expenditure of considerable time by at least one member of the Entomological Department of the Ontario Agricultural College in assisting the Provincial Entomologist.

European Corn Borer

A total of 88 inspectors and assistant inspectors was employed during the spring of 1944 to enforce corn clean-up regulations. Twenty counties and Pelee Island comprised the territory from Essex County to Northumberland County in which the regulations were in force.

Reasonably good co-operation was given by practically all corn growers in this area. As a result of the clean-up in 1944 more corn refuse was disposed of than in 1943. It is encouraging to note that this co-operation was secured in spite of the manpower shortage and weather conditions which were adverse to clean-up operations.

The fall survey of stalk infestation showed a general reduction in comparison with 1943. The most marked decreases occurred in the husking corn counties of Essex and Kent. Almost 50% decrease in average stalk infestation was recorded in Essex and 33% decrease in Kent County. Commercial loss from corn borer in 1944 was limited to very early maturing fields of table corn and canning corn. Field corn was not seriously affected in any part of the territory surveyed.

During the spring months of 1944 weather conditions were favourable to the borer but drought followed during the period when borer eggs were being laid and when young worms were entering the stalks. This, fortunately, aided to a considerable extent in reducing the borer population.

Some increase in the two-generation strain of corn borer was noted in Western Ontario, with significant numbers being recorded in Essex, Kent, South Lambton, Elgin, Middlesex, Oxford and Norfolk Counties. This strain is not limited to corn as is the common, well-known, single-generation strain in Ontario, but attacks many crops as well as a large list of ornamental plants.

Nursery Inspection

The plan adopted in 1943 of using under-graduate women students as temporary nursery inspectors was continued in 1944. Six inspectors were secured through the co-operation of the Ontario Farm Service Force. These were divided into three teams and given a specific area of the province to inspect.

In the 88 nurseries operating as such and selling stock, 1,734,800 units of nursery stock susceptible to San Jose scale were examined. Of this total, 1,675 units were found to be infested by San Jose scale and 415 units of fruit stock infected by pear blight.

The standard of work given by the inspectors was careful and conscientious. The reaction of nurserymen to the employment of women students for this work has in almost every case been very favourable.

Nursery Stock Fumigation

As in 1943 there was a reduction in the amount of nursery stock entering Nova Scotia from Ontario and thus a smaller number of fumigations was again required in comparison with some previous years.

Apple Maggot

Because of the marked increase in apple maggot infestation in Ontario apple orchards shown by the 1943 fall cross-section survey, a new Apple Maggot Control Board for the province was constituted early in 1944. The Board comprises representatives from all the major apple-producing areas of the province. The unanimous opinion of the Board was that the primary consideration in reducing apple maggot infestation in Ontario was the initiation of an extensive educational campaign. In this, special addresses, special press articles, correspondence to the press and additional spray supervision all combined to urge better and more complete spraying for the control of the apple maggot. Attention was also focussed on the important part played by neglected apple and hawthorn trees in the neighbourhood of commercial orchards. As a result of this educational campaign and the occurrence of weather conditions less favourable to the insect than in 1943, a significant and encouraging decrease was recorded in the 1944 fall cross-section survey. Not only was a decrease in the percentage of infested orchards secured, but the degree of infestation in orchards generally was markedly reduced. In many cases infestation in 1944 was limited to only a few apples of one variety in a whole orchard.

Nine of the twenty-one counties inspected in 1944 showed a lower percentage of infestation even than in 1942 when totals were by no means as high as in the serious year of 1943. Fourteen counties showed reductions in 1944 in comparison with 1943. Five counties showed no change in percentage of infestation and two showed a slight increase in comparison with 1943. In the latter case neither Lincoln nor Welland counties are to be regarded as outstanding apple-producing districts.

The cross-section survey was carried on again jointly with the Ontario Fruit Branch and the Dominion Department of Agriculture.

Sugar Beet Nematode

No further spread of the sugar beet nematode outside the area of infestation in the Blackwell "precautionary" area was recorded in 1944. All beets from the "precautionary" area were shipped by railway car to the Wallaceburg sugar factory. Washing of the cars, which were on the whole more suitable than in 1943, was carried on by means of a wet hopper, the wash water making its way to the settling basin at the factory. The erection of a beet unloader at the Blackwell siding was completed in time to save considerable manual labour in loading cars during the 1944 season. Requests to ship beets from Blackwell from outside the "precautionary" area resulting from the improved conditions brought about by the beet unloader had to be refused because of the increased danger of spread which such procedure would have entailed.

A new regulation was added in 1944 to those already in force in connection with sugar beet nematode. Its object is to avoid the spread of sugar beet nematode by means of dirt contained in or attached to any containers used for

transporting table beets and carrots produced in the "precautionary" area to processing plants and storages in the sugar beet producing area of western Ontario. This regulation requires all such dirt to be placed in covered containers or closed buildings at the factory or processing plant and to be treated to kill the contained nematodes. Superheating of such dirt proved satisfactory in those cases where the treatment had to be given in 1944.

Peach Yellows, Little Peach and Peach "X" Disease

The effects of the lethal low temperatures of the winter of 1942-43 are still showing up to some extent in the peach orchards of the Niagara Peninsula. It is therefore difficult to determine correctly the presence of any of these three diseases in the case of abnormal trees. Actual figures, therefore, of marked trees and those removed are of little value. Inspection has, however, been continued with the object of safeguarding against a big increase in the number of trees infected by these diseases.

ONTARIO FARM SERVICE FORCE

The Ontario Farm Service Force once again operated successfully during the 1944 season. On account of the heavy crops and the continuing shortage of regular farm labour, the help supplied through the operations carried on was of exceptional value to the agricultural industry. Its activities can best be summarized in the fact that over 108,000 workers were registered with the Ontario Farm Service Force as working on farms in the Province. These included over 30,000 Public School boys, girls and teachers who worked on the farm under special early farm release regulations. According to a comprehensive survey and record, 25,000 secondary School teachers and students worked on farms and in canning factories during the 1944 season.

Some idea of the type of operations carried on with Secondary School students can be gathered from the following record:

1,987 boys were placed on individual farms by Ontario Farm Service Force Placement Officers.

606 boys were accommodated in 6 government camps.

108 boys were accommodated in two private camps.

357 girls were placed on individual farms.

3,349 girls were accommodated in 24 government camps.

540 girls were accommodated in 16 private camps.

4,273 volunteers worked in day-by-day work, going out from the Western end of Toronto.

Thirty-nine girls acted as Japanese beetle trap attendants and six girls acted as fruit inspectors in co-operation with Prof. R. W. Thompson, of the O.A.C., Provincial Entomologist and the Fruit Branch of the Department of Agriculture.

Farm Commando Brigades were organized in over 100 Ontario communities, and these supplied approximately 40,000 workers giving evening hours, half days, whole days, week-ends and holidays.

Officers of the Ontario Farm Service Force made contacts with the armed services camps in their areas, and through the co-operation of commanding officers, the services of both men and women from the forces were secured for nearby farm operations. A party of some 50 members of the Royal Navy lent valuable assistance in the Holland Marsh area during the heavy vegetable season after the schools had re-opened in the fall.

The Farm Service Camps for both boys and girls were operated very successfully, and high standards of health and care were maintained, through the co-operation of the Y.W.C.A., the Y.M.C.A. and the Ontario Department of Health.

The following is a statistical report covering the operations of the 1944 season:

Children's Brigade

Boys	16,147
Girls	10,162
Teachers	590

Farm Cadet Brigade — Young Men

Working on own farm	5,500
Working on farm of own choice	4,320
Placed by O.F.S.F. Officer	1,987
O.F.S.F. Government Camps — Number of Camps	6
Boys in Camp	500
Y.M.C.A. Staff	30
Y.W.C.A. Staff	68
Labour Secretaries	8
O.S.F.S. Private Camps — Number of Camps	2
Boys in Camp	96
Y.M.C.A. Staff	2
Y.W.C.A. Staff	10
Secondary School Teachers	365

Farmerette Brigade — Young Women

Working on own farm	5,200
Working on farm of own choice	4,560
Placed by O.F.S.F. Officer	357
O.F.S.F. Government Camps — Number of Camps	24
Girls in Camps	3,059
Y.W.C.A. Staff	290
O.F.S.F. Private Camps — Number of Camps	16
Girls in Camps	501
Y.W.C.A. Staff	300
Labour Secretaries	34
Japanese Beetle Trap Attendants	39
Fruit Inspectors	6

Women's Land Brigade

Individual Placements	63
Day-by-Day Work	4,201
Farm Girls Brigade	900
Holiday Service Brigade	400
Farm Commando Brigade	40,000
Family Placements	120
Secured for Canning Industry	750
Japanese Camps — Number of Camps	2
Number in Camps	43
Western Harvesters	750
War Prisoners	325
Placed through Employment Office — (Experienced and Partly Experienced)	5,500

Armed Services

Army — Active Army — Part Time	300
Off Hour Workers	150
Farm Duty Plan	475
C.W.A.C. — 48-hour Leaves	100
Navy — H.M.C.S. York — 48-hour Leaves	50
H.M.C.S. Star — 48-hour Leaves	52
W.R.N.C.S. — 48-hour Leaves	30
Royal Navy — British Sailors	52

THE WEATHER

TEMPERATURE.—The following table gives the temperature of the Province for each month during the last five years, together with the mean annual temperature for the six months, April–September, practically the growing season, together with the average for the five years, 1941-1945, and the sixty-four years, 1882-1945.

Months	1945	1944	1943	1942	1941	1941-1945	1882-1945
	°	°	°	°	°	°	°
January.....	10.7	23.9	13.5	18.7	17.2	16.8	18.2
February.....	20.6	19.9	20.5	16.8	18.7	19.3	18.0
March.....	39.7	23.8	24.1	32.6	23.2	28.7	27.6
April.....	45.5	38.2	35.5	47.2	47.2	42.7	41.5
May.....	48.6	57.6	52.3	55.4	56.1	54.0	53.6
June.....	61.4	64.8	66.2	64.0	66.2	64.5	64.0
July.....	65.3	68.8	68.3	67.2	70.5	68.0	68.4
August.....	66.4	69.2	66.1	66.4	64.0	66.4	66.0
September.....	59.8	59.4	56.7	57.8	61.1	59.0	58.7
October.....	46.1	47.3	46.4	48.5	48.8	45.4	47.5
November.....	36.8	37.4	34.3	35.8	38.3	36.5	35.3
December.....	19.4	19.8	21.5	19.3	27.2	21.4	23.4
Annual Mean.....	43.3	44.2	42.1	44.1	44.9	43.7	43.5
Mean for six months April–September.....	57.8	59.7	57.5	59.7	60.8	59.1	58.7

The mean temperature for 1945 was 43.3 degrees or 0.9 degree below preceding year and 0.2 degree below the normal for the sixty-four years, 1882-1945.

The mean for the six months, April–September, was 57.8 or 1.9 degrees below the preceding year, and 0.9 degree below normal.

Six months were above normal and six below. March had the greatest departure above normal with 12.1 degrees, and January the greatest below with 7.5 degrees.

SUNSHINE.—In the following the averages of sunshine are derived from the records of the weather stations at Woodstock, Toronto, Lindsay and Ottawa.

Months	Sun. above horizon	1945	1944	1943	1942	1941	1941- 1945	1882- 1945
	hrs.	hrs.	hrs.	hrs.	hrs.	hrs.	hrs.	hrs.
January.....	285.7	101.6	84.0	70.5	87.5	86.5	86.0	77.5
February.....	293.2	87.4	97.7	119.7	108.5	116.5	106.0	103.0
March.....	369.9	165.2	142.8	157.2	103.7	179.0	149.6	140.6

The year.....	4465.1	1846.0	1941.2	1903.0	1880.2	2087.8	1931.6	1935.5
For six months April-Sep- tember.....	2614.9	1201.8	1338.2	1268.8	1266.0	1448.5	1304.6	1334.6

The year 1945 had 1846.0 hours of sunshine or 89.5 hours less than the average for the sixty-four years. The six growing months, April–September, had 1,201.8 hours or 132.8 hours below normal. Three months were above normal and nine below. December had the greatest departure above with 34.2 hours and May the greatest below with 48.9 hours.

The rainfall for the six months, April–September, comprising what is the growing season for most crops, is given in the following table covering the last five years, 1941-1945, and the normal for the sixty-four years, 1882-1945.

Months	1945	1944	1943	1942	1941	1941- 1945	1882- 1945
	in.	in.	in.	in.	in.	in.	in.
April.....	2.97	1.57	1.27	1.26	1.57	1.72	1.90
May.....	4.32	2.47	4.49	4.62	2.14	3.61	2.75
June.....	3.29	3.54	3.55	1.94	2.24	2.91	2.83
July.....	3.62	3.24	3.03	2.93	3.57	3.27	2.89
August.....	2.26	2.21	3.32	2.31	3.48	2.71	2.58
September.....	5.27	3.85	2.40	4.69	3.00	3.84	2.89
Total for six months...	21.73	16.88	18.06	17.75	15.90	18.06	15.84

The rainfall for the six months, April–September, was 21.73 or 4.85 more than preceding year, and in comparison with the sixty-four years 5.89 inches above. Five months were above normal and one below. September with 2.38 above and August with 0.32 below had the greatest departures during the growing season.

PRECIPITATION.—The fall of both rain and snow for the five winter months including November, 1945, and March, 1946, is given in the following table for five years, together with the average for the sixty-five years, 1882-1946. Ten inches of snow is equal to one inch of rain.

Months	1945	1944	1943	1942	1941	1941-1945	1882-1945
	in.	in.	in.	in.	in.	in.	in.
November, 1945:							
Rain.....	1.61	1.55	1.88	2.30	2.11	1.89	1.96
Snow.....	9.1	8.7	9.3	4.7	17.6	9.9	7.6
December, 1945:							
Rain.....	0.62	0.26	1.22	1.23	1.76	1.02	1.15
Snow.....	14.6	11.5	24.1	11.3	13.4	15.0	15.5
January, 1946:							
Rain.....	0.62	0.44	0.10	0.79	0.38	0.47	0.88
Snow.....	20.3	5.6	25.7	16.8	19.9	17.7	18.6
February, 1946:							
Rain.....	0.55	0.38	0.59	0.49	0.23	0.45	0.70
Snow.....	19.4	13.0	13.8	15.8	15.7	15.5	15.5
March, 1946:							
Rain.....	0.85	0.94	1.45	1.96	0.23	10.8	1.17
Snow.....	2.8	17.3	14.1	12.0	12.0	11.6	11.1
Five Months:							
Rain.....	4.25	3.57	5.24	6.77	4.71	4.91	5.86
Snow.....	66.2	56.1	87.0	60.6	78.6	69.7	68.3

The total amount of rainfall for the five months was 4.25 inches or 1.61 inches below the average for the sixty-five years, 1882-1946. The total amount of snowfall was 66.2 or 2.1 below normal.

VALUE OF LIVE STOCK ON HAND

The following table gives the value of Horses, Cattle, Sheep, Swine and Poultry on hand in June of each year for the sixty-three years, 1883-1945, except for the ten years, 1882-1891, when farm live stock was valued in bulk.

Years	Horses	Cattle	Sheep	Swine	Poultry	Total
	\$	\$	\$	\$	\$	\$
1945	44,165,000	183,326,000	6,714,000	36,921,000	25,762,000	292,688,000
1944	44,581,000	151,655,000	5,612,000	22,720,000	18,224,000	242,792,000
1943	44,909,000	145,061,000	5,833,500	20,800,000	16,929,000	233,532,500
1942	47,779,000	125,648,900	5,797,000	21,317,966	13,163,448	213,706,314

FORTY-FOURTH ANNUAL REPORT
OF THE
Temiskaming and Northern Ontario
Railway Commission

ONTARIO GOVERNMENT RAILWAY
HONOURABLE GEORGE A. DREW, PREMIER

FOR THE YEAR ENDED
March 31st, 1945

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 23, 1946

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1946

TO THE HONOURABLE ALBERT MATTHEWS,
Lieutenant-Governor, the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour of presenting to Your Honour the Forty-fourth Annual Report of the Temiskaming and Northern Ontario Railway Commission for the year ended March 31, 1945.

Respectfully submitted,

GEORGE A. DREW,
Prime Minister and President of the Council.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION

North Bay, Ontario,
August 15, 1945.

HONOURABLE GEORGE A. DREW,
Prime Minister,
Province of Ontario,
Parliament Buildings,
Toronto, Ontario.

SIR:

In conformity with Section 36 of the Temiskaming and Northern Ontario Railway Act, Chapter 55, Revised Statutes of Ontario, 1937, I have the honour of submitting the Forty-fourth Annual Report of the Temiskaming and Northern Ontario Railway Commission, for the fiscal year ended March 31, 1945.

SPECIAL ACTIVITIES

With the coming of peace in Europe, which was so plainly foreshadowed throughout the year 1944, the attention of the Commission has been given increasingly to the problems of peace. Among the foremost of these problems the following may be mentioned:

- (a) Development and settlement of the great agricultural lands of the north.
- (b) Encouragement of tourist travel to those parts of Northern Ontario suited to such activities and development of new areas.
- (c) Publicizing the great opportunities in many lines of endeavour in the north.
- (d) Assistance and guidance for returning war service personnel, both employees of the Railway and others.
- (e) Post-war planning with the view of assisting to take care of any employment slack by capital undertakings which may be economically justifiable.

In the furtherance of these various endeavours the Commission has purchased the charter and physical assets of Temagami Navigation Limited, a Company which serves the needs of the people who use the exquisite Temagami Lake as their summer home. The former owner of this service found it impossible to secure labour and material to maintain his docks and floating equipment in acceptable condition and as result of pressure from camp owners and others, it was determined to take the Company over and rehabilitate the service completely. New docks, offices and waiting rooms had to be built at Temagami; several additional boats had to be purchased; repair and storage buildings had to be built. It is not anticipated that the full programme of rehabilitation will be completed before 1946, but when done, there is every reason to believe that the present summer population will not only have their needs met in an acceptable form, but many more thousands of city people will make the Temagami Lake District their summer home—including many residents of the United States.

Much interest has been shown by many people in the Hudson's Bay and James Bay area as evidenced by many inquiries received about accommodation at Moosonee. So far we have had to discourage travel to this area on account of lack of accommodation which has existed since the destruction of the James Bay Inn by fire, a number of years ago. In order to remedy this situation

plans are being considered to build a small hotel with dining room facilities and sleeping quarters in comfortable detached cabins. It is confidently believed that when facilities are available and the attractions of the far north become known, that hundreds, if not thousands, of people will visit this interesting territory, both for summer vacations and for the goose shooting in the fall.

The problems of agriculture and settlement in the north have called for much study and thought. Consultations have been held with District Representatives of the Department of Agriculture, to learn at first hand, the needs of the north and to secure suggestions as to how best the Commission could be of assistance. One unanimous request was for assistance by the Railway, in improving the breed of beef cattle in the north. Accordingly the Commission solicited buying orders throughout the District and agreed to pay all the expenses of buying and transporting a selected grade of breeder beef cattle for farmers; the buyer's cost being only the amount paid at the point of purchase. As a result, several cars of excellent stock were placed with farmers in the north, to their very evident satisfaction.

Consideration is being given to the possibility of operating an abattoir under the guidance of an expert manager and with the assurance of Government support. It seems anomalous that a land so adapted to the production of fodder and thus of livestock, should be producing only about 10% of the meat consumed in the district. Studies are being made under the direction of the Commission, as to how best to meet this situation and thus contribute to the economic well-being of established farming communities.

Again, we have before us large areas of land well suited to agriculture, standing idle, and throughout the world, men are hungry for land. This situation calls for immediate action. We dare not leave these great areas unoccupied or some one more aggressive than we, will insist on action. It is, however, not enough to say to prospective settlers—"here is the land; clear it and it is yours." More than that is required. Mechanical devices must be used to clear enough land for the settler to start right in as a producing farmer. This problem of new settlement is considered as a primary function of the Commission and vigorous and prompt action is demanded and will be given.

All these activities call for the expenditure of money, and with the approval and at the insistence of the Government, such expenditures will be proceeded with even though there may be no immediate return on the investment. Publicity campaigns in various forms must be undertaken and qualified settlers must be directed and assisted in their endeavours, always with the long term vision in mind, of those early pioneers who saw in the north, a New Ontario. The day for scepticism about this vast empire of the north is over; the day of faith and action is at hand.

Many other projects not listed herein, have been considered. These studies will eventually bear fruit—they include boat services at places where present services are inadequate; camps for children at summer resorts; hotel services at northern points, now inadequately served or where development may follow; land clearing and settlement schemes; directed colonization and guidance and aid for settlers during the first hard years.

The Commission is co-operating to the fullest extent with other Departments and Agencies of the Government, in the furtherance of what it conceives to be its major function, i.e. the development of Northern Ontario in particular, and making such contribution as lies within its power, to the general good of the entire Province.

All of which is respectfully submitted.

C. E. REYNOLDS,
Chairman.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION

North Bay, Ontario,
August 15, 1945.

COLONEL C. E. REYNOLDS, D.S.O., M.C.,
Chairman.

SIR:

I now submit report of operations of the Temiskaming and Northern Ontario Railway, covering the fiscal year ended March 31, 1945.

RAILWAY EARNINGS AND EXPENSES

Results of operations as compared with previous year:

	Year Ended March 31, 1945	Year Ended March 31, 1944	Increase or Decrease
Operating Revenues.....	\$6,605,360.94	\$6,358,428.95	(i) \$246,931.99
Operating Expenses.....	5,496,504.60	4,864,032.76	(i) 632,471.84
Operating Ratio.....	83.2%	76.5%	(i) 6.7%
Net Operating Income.....	1,108,856.34	1,494,396.19	(d) 385,539.85
Non-Operating Income.....	94,380.08	66,459.04	(i) 27,921.04
Gross Income.....	1,203,236.42	1,560,855.23	(d) 357,618.81
Deductions from Gross Income*.....	474,015.29	486,544.45	(d) 12,529.16
*(Hire of freight cars debit balance; Joint Facility Rents, interest; exchange, etc.)			
To Profit and Loss Account.....	729,221.13	1,074,310.78	(d) 345,089.65

PROFIT AND LOSS ACCOUNT

The surplus in Profit and Loss Account on March 31, 1945, was \$10,165,459.81. For the year under review this surplus was increased by \$718,406.27 as shown in detail in the Profit and Loss Statement appended to the General Balance Sheet.

NET PROFIT

The Net Profit for the year after payment of all expenses, including interest on Bonds held by the Public, and after making provision for depreciation on rolling stock and for the retirement of abandoned facilities, was \$718,406.27, compared with \$1,037,074.82 for the previous year, being a reduction of \$318,668.55. The following table shows the Net Profit in recent years and the percentage of net calculated on the Provincial Investment of \$30,907,235:

Year Ended	Net Profit	Earnings Rate
March 31, 1941	\$1,316,470.99	4.36%
" 31, 1942	1,311,304.97	4.34%
" 31, 1943	1,155,394.56	3.82%
" 31, 1944	1,037,074.82	3.36%
" 31, 1945	718,406.27	2.32%

This steady decline in net earnings has been experienced in the face of steadily increasing Operating Revenues as shown in the following table.

Year Ended	Operating Revenues
March 31, 1941	\$5,873,399.83
" 31, 1942	6,277,832.75
" 31, 1943	6,240,648.91
" 31, 1944	6,358,428.95
" 31, 1945	6,605,360.94

It will be observed that when the years ended March 31, 1941, and March 31, 1945, are compared, there is an increase in Operating Revenues of \$731,961.00 and at the same time, a decrease in Net Profits of \$598,064.72. This brings into sharp focus the conditions under which steam railways in Canada are operating. The cost of operations has been steadily increasing, while the selling price of the only product which a railway has for sale, viz., transportation, is firmly frozen, leading inexorably to the only possible result—a decline in net earnings.

FINANCIAL

The Commission has no bank indebtedness whatever. The funded debt consists of \$5,155,000, 4% bonds, being the balance outstanding of an issue of \$6,000,000 dated February 1, 1928, and maturing serially until 1968. Bonds to the extent of \$136,000.00 matured on February 1, 1945, and were retired. On March 31, 1945, Current Assets amounted to \$2,723,146.02 and Current Liabilities stood at \$570,335.38.

TRAFFIC

Traffic throughout the year continued at high levels, as may be noted from the following table:

	Year Ended March 31, 1945	Year Ended March 31, 1944
Freight Revenue	\$4,467,277	\$4,478,313
Passenger Revenue	1,183,092	1,067,239
Gross Revenue (all sources)	6,605,361	6,358,429

There was a slight recession in both volume of freight moving and in freight revenue, but this was more than offset by increased passenger revenue and revenue from miscellaneous sources, such as commercial telegraph and long distance telephone services, bus operations, etc.

IMPROVEMENTS AND ADDITIONS TO PROPERTY

No major capital improvements to property were undertaken during the year, nor was any additional rolling stock purchased.

FIRE INSURANCE RESERVE

Some years ago the Railway adopted the policy of carrying its own fire insurance. This was considered reasonably safe having in mind the widely diversified character of the property insured and its distribution over such a large area. So successful has this policy been that all fire losses have been met and a Reserve Fund of \$118,000.00 has been built up. The amount now charged to Operating Expenses to protect against fire losses has been reduced by one-third; with the prospect of further reduction unless some major fire loss occurs in the near future.

This Fire Insurance Reserve Fund is all invested in securities issued or guaranteed by either the Dominion of Canada or the Province of Ontario.

PENSION FUNDS

In 1922, the Commission established a Non-Contributory Pension Plan; and in 1939, a new Contributory Pension Plan was adopted. To provide for pensions under these regulations, two funds totalling \$1,225,377.10 have been established. Like the Fire Insurance Reserve, these Pension Funds are all invested in Dominion or Ontario bonds or bonds guaranteed by the Dominion or the Province. The Annual Report of the Contributory Pension Board

shows 139 pensioners on March 31, 1945, with a monthly pension payroll of \$6,380.05. At the same time there were 65 pensioners on the Non-Contributory roll with monthly distribution of \$2,414.34.

GENERAL

Employee relationships continue to be satisfactory. Up to the end of the European phase of the war, some 380 employees served in the Armed Forces. One former employee (a son of a present employee) and a resident of the Town of Latchford, brought great honour to himself in being awarded the Victoria Cross for valour in battle at Mooshof in Holland. It is sad to record that this valiant young man lost his life in this, his final battle, on February 26, 1945. It is with pride that we record his name: Sergeant Aubrey Cosens, B.46495, The Queen's Own Rifles of Canada.

At the time of writing (midsummer, 1945) there is no indication of any recession in traffic as a result of the end of the European phase of the war—in fact, the reverse is the case, and there is the strong possibility that traffic may be heavier in the immediate post-war years than during the war itself.

The purchasing of new equipment has had to be deferred for several years and will have to be resumed when conditions are favourable. No serious amount of maintenance work has had to be deferred and the railway will enter into its peace-time activities in good physical and financial conditions to meet its responsibilities.

A. H. CAVANAGH,
General Manager.

AUDITORS' REPORT

EDWARDS, MORGAN AND COMPANY
Chartered Accountants

TO THE COMMISSIONERS,
Temiskaming and Northern Ontario Railway,
North Bay, Ontario.

We have examined the books and records of the Temiskaming and Northern Ontario Railway for the year ending March 31, 1945.

The record of securities owned and held in trust on that date has been verified by examination of the said securities in the custody of the Treasurer.

We certify that the annexed Balance Sheet and Surplus Account are in accord with the books and records and that they are, in our opinion, properly drawn up so as to show the true financial position of the Railway at March 31, 1945, and correctly set forth the result of operations for the year ending on that date.

(Signed) EDWARDS, MORGAN & CO.,
Chartered Accountants.

Toronto, Ontario, July 24, 1945.

Rent of Road to Temiskaming and Northern Ontario Railway	1.00
Deficit, March 31, 1945.....	<u>\$674,390.71</u>

TO THE COMMISSIONERS,
Temiskaming and Northern Ontario Railway,
North Bay, Ontario.

We have examined the books and records of the Nipissing Central Railway for the year ending March 31, 1945.
We certify that the above Balance Sheet and Surplus Account are in accord with the books and records and that they are, in our opinion, properly drawn up so as to show the true financial position of the Railway at March 31, 1945.
