

# WHAT WE WANTED TO ACHIEVE

Primary idea was motivating LGBTQ community and increasing their visibility and presence in wiki projects. It involved educating members of the LGBTQ community in terms of editing Wikipedia, but also increasing available knowledge about LGBTQ topics.

## PROBLEM

We noticed the lack of LGBTQ-related content, both on Serbian Wikipedia and Wikimedia Commons.

The already existing content was insufficiently presented, and oftentimes the Community considered them to be irrelevant.

Even though some articles exist, they had a negative connotation and were written in a condemnatory tone.

## HOW WE DID IT

1

- Design ideas and ways to change and improve things related to this issue
- Plan activities which would help us achieve our goals

2

- Establish communication with LGBTQ organizations in terms of launching joint actions and activating the environment.

3

- Organize activities and events
- Make a list of the 100 most needed LGBTQ articles

4

- Organise edit-a-thon
- Create Photo tour during the Pride Parade
- Participate and Support the Movement

5

- Gather and share results
- Nomination for the **Rainbow Award**
- Enrich WMRS library
- Start a process of releasing images of previous Pride events in Serbia
