# THE PRACTICAL NURSERYMAN.

A TRADE JOURNAL

Vol. 3.

HUNTSVILLE, ALA., APRIL, 1895.

No. 4.

## THE PRACTICAL NURSERYMAN.

PUBLICATION OFFICE:

HUNTSVILLE.

ALABAMA.

W. F. HEIKES, Editor and Manager.

Issued Monthly. Sent only to those in the trade. Advertisements 10c. a line a gate; \$20.00 a page; one-half page \$10.00; one-fourth page \$5.00. Advertisements must be handed in one week before the day of publication. Advertisements for less than \$5.00 will not be accepted. Discounts: 3 times 5 per cent.; 6 times 10 per cent.; 12 times 25 per cent.

### TO ADVERTISERS.

The circulation of this Journal will be confined strictly to Nurserymen, Florists and Seedsmen, and only invited advertisements of articles pertaining specially to these trades will be inserted. We guarantee a regular monthly circulation of 4,000.

We purpose to mail this paper to every nurseryman, florist and seedsman in the United States, and to leading firms in the same vocations in foreign countries. We do not solicit subscriptions. If you value THE PRACTICAL NURSERYMAN, please accept it with our compliments.

### Fruit Prospects.

The fruit buds of deciduous fruits both North and South endured the winter well and reports from all parts of the country up to date, indicate the most abundant crop for many years. The good condition is universal, except a partial damage to the Apricot crop, by frost, in Southern California. The lateness of the season South retarded the swelling of the fruit buds much beyond the usual time, in consequence, the promises of a good crop there is unusually bright.

Mr. Samuel W. Hoover, president of the Hoover & Gaines Co., of Dayton, Ohio died March 10th. We yielded to him our highest respect and we join with his friends and business associates in mutual sympathy.

A summer school of forestry continuing from the 8th of July until the 10th of August, is to be held under the auspices of the American Association for

the Advancement of Education, at Avalon, N. J., fifteen miles north of Cape May, on the coast.

### Government Publications.

The fourth number of the current volume of the Experiment Station Record contains a review of the recent work in agricultural science throughout the world, with a report of the eighth annual convention of the association of American agricultural colleges and experiment stations, and timely editorials. The division of botany has issued Bulletin 16 on the commercial history, protection and cultivation of American ginseng. The weather bureau has compiled the rainfall and snow of the U S to 1891; and issued a storm bulletin on the blizzard of 1895, together with the usual monthly weather crop bulletin, weekly snow charts, semi-daily weather maps, and wreck and casualty chart of the great lakes. Bulletin 13 is a report of the third annual meeting of the American association of state weather service co-operating with the national weather bureau. Farmers' Bulletin 22 explains the scientific feeding of farm animals, while bulletin 25 describes the culture and uses of the peanut. Among the reprints of this useful series of bulletins is a revised edition of Directions for the preparation and use of important insecticides (B 19); Instructions for cultivating and curing tobacco (B 6); Some destructive potato diseases what they are and how to prevent them (B 15); Fertilizers for cotton (B 14); A compilation of analyses of American feeding stuffs (B 11); and Sorghum experiments (B 37). Library Bulletin 5 has been issued to give notice of the accessions to the national agricultural library. The proceedings of the Virginia good roads convention are given in Bulletin 11 of the office of road inquiry. Statistical Report 123 contains a report on farm animals; the cotton crop; live stock in Great Britain and Ireland; cotton crop of India for 1894; a French congress on popular credit; the Australian wheat crop of Victoria; transportation rates and notes on foreign agriculture. For any of these valuable publications, address the secretary of agriculture at Washington.—American Agriculturalist.

## JAPANESE PLUMS.

## Description of Varieties in the Order of Ripening.

We give on this page descriptions of the most complete assortment of Japan plums, in the order of their ripening—Some of our box lots contain a very full assortment, and this is a good opportunity to secure a desirable assortment. Our nomenclature can be depended upon.

**YOSBE**—Size of Wild Goose, round with a little point, dark purple, yellow flesh, quality good. Ripens with Early Richmond cherry. Later in blooming than other Japan sorts. Very hardy.

**BERGER**—Fruit small, globular, bright uniform red, yellow flesh, very small stone. Free. Too small for market, but desirable for the home garden.

**STRAWBERRY**—Small, round - oblate, red-purple, with firm yellow flesh; cling; very early; moderately productive. Ripe with the last of the strawberries.

**WILLARD**—Medium size, round, not pointed; color dark clear red, with minute yellow dots; yellow fleshed, sweet and of fair quality. The earliest profitable market plum yet tested. The tree is very distinct and hardy, and matures its foliage earlier than any other Japanese variety, which is quite an important feature with this race of plums.

**RED NAGATE (Red June)**—Medium size, pointed; color deep red-purple, flesh yellow, quality good; cling. A good market variety.

**OGON**—Medium size, round; color golden yellow; freestone. Moderately productive.

**KERR (Hattankin No. 2)**—Large, usually pointed, color orange-yellow, with creamy bloom; flesh yellow, juicy, sub-acid; quality good; cling. Very prolific and a profitable early market fruit.

**BERCKMANS (True Sweet Botan, Sweet Botan, White-Fleshed Botan)**—Medium to large, broadly and obtusely conical; deep blood red if ripened in the sun; flesh very sweet, excellent in quality; cling or semi-cling. Ripens with Abundance, or just ahead of it. One of the best.

**ABUNDANCE (Yellow-Fleshed Botan, Botan)**—Large, ranging from nearly round to distinctly sharp pointed; color bluish red with a darker cheek, on yellow ground; flesh yellow, juicy and sweet, quality good; cling. A strong-growing, upright, hardy tree, with numerous well distributed branches, very distinct. This is the most popular of all the Japanese plums. Very prolific and valuable as a market sort.

**MARU**—Medium size, round and somewhat flattened; color orange red; flesh yellow, of fair quality; free or nearly so. Hardy in bud. Showy.

**NORMAND**—Large, obtusely conical; color clear golden yellow; flesh yellow, of high quality; free. Pit small. Very prolific and one of the most desirable varieties.

**YELLOW JAPAN**—Large, oblong-conical, pink red in color, with many very fine gold dots; flesh yellow and juicy, good quality; cling. Very productive and one of the most valuable.

**CHABOT**—Large, light and bright red on yellow ground, flesh yellow and of good quality; cling. A tall growing tree with few branches at one year old.

**SATSUMA (Blood)**—Large, broadly conical with a blunt sharp point; suture very deep; color very dark dull red all over; flesh blood red, rather coarse and acid, fair quality; cling. Pit small.

**BURBANK**—Large, roundish conical in form, the point generally blunt; color cherry red on mottled yellow ground, flesh yellow, rich and sugary; cling. Larger and better quality than Abundance, and rather handsomer in its varied markings, and three or four weeks later. Exceedingly productive. Next in popularity to Abundance.

**BAILEY**—Large, nearly round, color light and bright cherry-red on rich orange ground; flesh yellow, of excellent quality; cling. Rounder and larger than Burbank. A valuable sort.

**KELSEY**—Very large and long pointed, tapering gradually from a heart-shaped base, usually somewhat lopsided, with a deep furrow-like suture; color reddish purple on yellow ground; flesh yellow, rich and pleasant in flavor; pit very small, free or only slightly clinging. The tree is tender if planted far north. It is more particular as to locality than any of the other Japanese varieties; but where it succeeds well it is the most magnificent plum in size and appearance in existence.

In different seasons and in some localities, the order of ripening given in this list may vary more or less. The first four varieties are all exceedingly early, and differ very little in their season of ripening.

**Bulletin No. 5.**

# Shipments from St. Louis AT ONE DAY'S NOTICE.

—\* **SURPLUS STOCK** \*

—FROM THE—

## Huntsville Wholesale Nurseries.

HUNTSVILLE, ALA.

We have for the past fifteen years offered in assorted lots, at St. Louis, in Spring, such stock as we had in surplus. The plan has been satisfactory to our customers and ourselves. Herein is a schedule of what we now have in St. Louis for immediate shipment. This stock is exclusively our own growing at Huntsville, Alabama, fresh dug this Spring, and packed in the best manner, in moss, and warranted in fine condition. Everything is fine of the grade, with full fibrous roots, and not culled, as we adhere to a strict system of grading.

### Below the Blizzard Line.

Our Nurseries are far enough south to escape the severe freezing weather. Everything is bright, green and fresh—sound to the tips. Nearly all the sorts offered are standard sorts, such as most nurserymen can use in assortment with their own growing. Orders should be sent in as early as possible; but the stock need not be shipped until wanted, as we are prepared to hold it here in good condition. We have nothing for sale not offered on this list.

It will be noticed by some of our correspondents that we have refused orders the past season for several articles listed. Our fear of overselling, and some countermands, account for this. We ask attention to the small-sized trees offered, for transplanting into nursery rows. All of the small trees, as well as the large ones, are very nicely rooted, and everything is young, smooth and bright.

We can refer to nurserymen who have bought of us in nearly every State and Territory. We have given satisfaction, and guarantee it for these shipments.

**Terms**—Cash with order, or 30 to 60 days from date of shipment to responsible, prompt-paying parties. Address W. F. HEIKES, Manager, 2018 Chouteau Ave., St. Louis, Mo., until May 1st.

For convenience in telegraphing for assorted lots, a cipher is given. The cipher word stands only for one box in cases where there are more than one in the same assortment.

Address **W. F. HEIKES, Manager,**  
2018 Chouteau Avenue, ST. LOUIS, Mo.

ST. LOUIS, Mo., April 2d, 1895.

For usual conditions concerning risk of transportation, claims, etc., see Huntsville Wholesale Nurseries pages in *The Practical Nurseryman*.

**A STUMP PULLER.**

In the Genuine Smith Grubber we claim the most perfect machine ever invented for pulling trees, stumps, cleaning timber-land, moving buildings, and for work where a windlass is necessary.

We claim that in proper use the machine will pay for itself in a week; inexperienced hands have averaged one-half acre a day in close timber with this machine; it practically does away with the labor of ten men; trees are pulled out of the ground more rapidly than two men can chop them down; it requires but one minute to pull a tree six and seven inches through!

More than 5,000 of these machines have been sold since the first patent was issued, in 1882. No purchaser has ever entered a complaint. We challenge such! Our machine is a pronounced success.

We have just tried your machine in pulling Black Jack and Old Field Pine. It is more powerful than we supposed, and the effective work done with it is surprising.—**W. F. HERKES.**

By placing your orders with me you will  
receive the fairest treatment and the full value  
of your money. (113)

## FRANK HANCOCK,

MATHERS, WISCONSIN,

DEALER IN

## SPHAGNUM MOSS.

I am absolutely the only dealer in this vicinity  
who owns the swamp from which the moss is  
taken, and I personally superintend getting out  
the moss for my customers. I can therefore  
guarantee my moss to be of the very best  
quality and the bales to be of the largest size.  
Moss can be supplied in any quantity desired  
either in bulk or in bales. Be sure to get my  
prices before placing your orders elsewhere.
