## PREFACE.

The Catalogue of Plants now given to the public, was presented to the Agricultural and Horticultural Society of Western India by the late John Graham Esq. Deputy Post Master General of this Presidency, and one of the Members of the Society. The following Letter, which accompanied it's presentation, will explain the circumstances under which it was drawn up.

Bombay, July 20th, 1838.

- To

## J AMES LITTLE, Esq.

Secy. to the Agri. and Hort. Society of Western India. Sir,
I beg to present to our Society a List of the Vegetable productions of the Bombay Presidency, and to signify my willingness to see it correctly through the press, should the Society deem it worthy of publication.

It has been drawn up with great care through the assistance of Mr. Nimmo; and not a single Plant is put down which has not been seen and examined by one or other of us.

I need hardly say that such a List is much wanted by all who pay any attention to the study of Botany, and will save much tinie and trouble in consulting Books and figures.

> I am, \&c.
> JOHN GRAHAM.
> Member of the Agri. and Hort. Society."

Viewing the undertaking in the light of a desideratum, the Committee of the Society promptly and liberally accepted the offer, and the printing of the Catalogue had proceeded under Mr. Graham's superintendence, as far as the 200 th page, when death terminated his labours. The remainder has been completed under the supervision of J. Nimmo Esq. who has been for nany years a zealous and ouccessful fellow labourer in the same field of science.

The lovers of botanical Science here gladly avail themselves of this opportunity of expressing their deep sense of obligation to Mr. Nimmo for the cordial co-operation, without which this work -frould not have been undertaken. The valuo of this assistance was
highly appreciated by Mr. Graham, and (had his life been prolonged) would have been publicly acknowledged by him. The melancholy satisfaction of fulfilling his intentions now devolves upon bis friends; and while they record their gratitude to Mr. Nimmo for his steady and disinterested aid throughout the prosecution of the work, they have the gratifying assurance that he will continue to dedicate his time to the investigation of the hitherto neglected Flora of this part of India, much of which still remaius unexplored.

It is unnecessary to enumerate the various sources whence the Author derived materials for the preparation of this Catalogue: but acknowledgments are especially due to Mr. Law of the Civil Service, and to Doctors Lush, Gibson, Murray and Heddle of the Medical Establishment, with whom the Author was in constant correspondence on the subject of the work, and from whom he received numerous interesting contributions and much valuable information.

The want of a guide, to the Botanical riches of this Presidency has been very generally felt and acknowledged. To supply this deficiency the present Catalogue was undertaken. It makes no pretension to a systematic treatise, but merely professes to present a List, (with references to Plates, and remarks on the more interesting species) of such Plants, indigenous and exotic, added to a comparatively few novelties, as have been ascertained; and was thus intended to form the groundwork of a plan, the completion of which should be left to future research. Even in it's present state, however, it must be considered a valuable contribution to Indian Botany, and it will be peculiarly acceptable to those who engage in the study of the vegetation of this Presidency. The friends of Mr. Graham have the gratification to state, that Mr. Nimmo, whose botanical acquirements peculiarly fit him for the task, has undertaken to carry out the plan by printing annual Supplements to the Catalogue: and they indugge the hope, that all who have the opportunity, but more particularly those Gentlemen, who have already so actively and liberally assisted in the preparation of the work, will lend their aid towards it's completion.

Before concluding these prefatory remarks to this Catalogue, a few words may be permitted regarding it's lamented Author.

Mr. Cirplam, a native of Dumfrieshire, arrived in India in 18:8, under the patronage of the late Sir John Malcolm, who was at that tine Gorernor of this Presidency. He was honoured with the friendship and estecm of that great and good man, and lived in his family until he was nominated by him to the appointment of Deputy Post Master General, which he held up to the period of his death. He possessed a combination of qualities which peculiarly fitted him for the duties of his Office. The natural kindness of his disposition led hin to be courteous and obliging to every one who had business to transact with him, and to be ever ready and willing to investigate every complaint, and to rectify any errors that might have been committed by his subordinates; while at the same time, no unreasonable applications or groundless complaint disturbed the equanimity of his temper: nor did he serve the Government with less zeal and diligence than he served the public.
The performance of his arduous duties left him little leisure for the prosecution of his favourite pursuit: but the few and brief opportunities, which were afforded him, were eagerly laid hold of and improved; and it should be added, that one of the objects he was desirous to effect while Superintendent of the Society's Garden, shortly after its establishment, was to store it with an extensive assortment of rare wild as well as useful Indian plants, chiefly collected by himself.

His private virtues will long he held in affectionate remembrance by his sorrowing friends. There was a gentleness and modesty of manner, a simplicity and ingenuousness of disposition, a humble mindedness, and a total freedom from guile and self-seeking which engaged the attachment and esteem of every one to whom he was known. His whole character and conduct were habitually regulated by a deep sence of his own moral imperfection, and by a humble endeavour to act, in all things, in conformity with the Divine Will.

Mr. Graham expired at Kbandalla, the favourite scene of his botanical researches, on the 28th of May, 1839, at the age of 34, after only a few days illness. The intelligence of his death was receired at every station within this Presidency, with an almost universal feeling of sorrow and regret, and his friends have testified their admiration of his character, and their sorrow for his death, by the erection of a handsome monument over his grave.

An annual; naturalized in Deckan Gardens where it is planted belof Orange and Peach trees to keep down weeds. (Dr. Lush.)

## ORDER 2. DILLENIACE E. Dc. Prod. 1. p. 67.

Sub-Tribe 1. Delimaceæ.
4. TETRACERA. l. Polygamia Dioecia.

Tetras-four, Keras, ahorn; the four-fold capsules resemble horns, Gaert. є. 69.
5. T. Rheedir. w. \& A. 14. dc. syst. 1. p. 402. Rheed. Mal. 5. t. 8, Wight's Icones $t$. 70.

A Slirub; flowers white, sweet scented.-Hilly parts of the South Concan. N.
5. DELIMA. dC. Polyandria Monogytia.

Delimo-to file, the leaves are used for polishing wood. Lam t. 47u.Gaert. t.106.
6. D. Pelify, dc.syst. 1. p. 4u8, Peripu, Rheed. Mal. 7. t. 54.

A Shrub; fluwers small white; in terminal panicles.
The South Concan, N. Willdenow refers his Trucera Surmentosa, a Ceylon plant (Bot. ilag. t. 3658) to Rheede's Fig: but Decaudolle says, they are quite distinct, and that it is doubtful whether the Peripu belongs to the genus or even to the order.

Sub-Tribe 2. Dilleniae, dc. prod. 1. p.70.
7. DILLENIA. L. Polyandria Polyginia.

Dillenias; Professor of Botany at Uxford; author of the Hortus Elthamensis. Lam t. 492.
7. D. Pentagyna. w \& a. I6. Rox. Cor. 1. t. 20, Rox. Flora 2, p. 652.

Kurmul. A stately forest tree; conmon along the west face of the Ghauts, and in the vales formed by the rivers running from them. Bauks of the Gutpurba, Sonthern Marhatta Country. (Mr. Law.)

Flowers March, aud April; yellow; showy; in clusters on the branches. The fruit is the size of a small Gooseberry.

The leaves are much used at Poona, as a substratum for chuppered roofs; they are sold in the Bazar. (Dr. Gibson.)
8. D. Speciosa. W \& A. 17. dc. syst. 1. p. 436. and 437. D. elliptica, Songium. Rumph, Amb. 2. t.45. Syalita. Rheed Mal, 3.t. 38 \& 39. Wiyht's Icones No. 17.

Mrota Kurmul. A large abd beautiful tree; flowers 6 or 9 inches in diameter; petals white, anthers yellow. Fruit size of a Coco-nut. - The Southern Concan. N.-

The thick fleshy lafets of the calyx have an agreeable acid flavour, and are eaten by the Natives.

There is a tree in Kennery forests, Salsette, belonging to this genus, with leavest or 5 feet long: it may be Roxburgh's D. Augusta, or what is more prohathable a young plant of ID. pentagyua, the leaves of which decrease in size as the tree advances in age.

Rox. Cor.t. $3 \overline{3}$. Dons. syst 1. p. 92.
A tree. Berries numerous, about the size of a matmeg; of a purple colour. -
Elephanta; hilly parts of the Concan. Duddi. S. M. Country. (Mr. Law.) Perhaps the tree here referred to is Rovburgh's Jhana S'u'orosa (Rux. L'or. t. 31,) though it best agrees with the Fig, of his $U$. tomentosa.
15. U. Heyneana, w. \& a. 27.

Guatteria montana. Dc. syst, p. 1. p. 508, Rheed, Mal. 5. t. 17.
A shrub with oblong lanceolate shining leaves.
16. U. Nardm, w. \&a. 29. dc. syst, 1. p. 486, Rheed. Mal, 2. t. 10, Wight's Illust, part I. t. 5 ,

A climbing shrub; berries numerrus, on long stalks:-the Concans.
11. UNONA. L. Polyandria Polyginia.

Unus-one; the stamens are united with the germens.
17. U. Discolor. w. \& a. 32, dc. syst, 1. p. 494.
U. clinensis. DC. sy/st, 1 p. 495.

Uvaria monilifera. Gaert, $t$. 114, Vahls Symbols e, t. 36.
A small tree; flowers white, delightfully fragrant. Fruit monliform, like the Sophora tomentosa.

Dapooree, introduced from China. (Dr. Lush.)

## 12. ARTABOTRYS, r.b. Polyandria Polyginia.

Artao, to suspend, botrys, a bunch; the peduncle has a curious hook which lays hold on any support near, and assists in bearing up the clusters of fruit.
18. A. Odoratissimus, w. \& a. 33.

Uvaria odoratissima, Rox. Flora. 2. p. 666.
U. uncata, Rox. Flora. 2. p. 666.

Modira walli, Rheed. Mal. 7. t. 12. usually referred to, is perhaps the Aneistrocladus Heynianus.
$\Lambda$ scandent shrub with shining leaves, and very sweet scented flowers.
In gardens Bombay, as an ornamental plant.
13. GUATteria, w \& a. Polyandria Polyginia.

Guatteri-an Italian Botanist.
19. G. Longifolia. w. \& A. 35. Unoma longifolia. dc. syst. I. p. 492.

Arbre de mature. Sonnerat, voy., fud. 4. $t$. 131. who says, it is planted by the ro id sides at Pondicherry. Wight's Icones, part. I. No. 35. Asiat. Res. 4. p. 288.

Asoca. Rat-Jrmbool. Deodar; a very handsome erect growing tree; leaves linear oblong; with waved margins.--in gardens Bombay and the Deccan. The Natives have an idea that it is the male of Jonesia Asoca, which belongs to a quite distinct tribe.
20. G. Cerasomes. w. \& a. 36. Uvaria cerasoides, Rox Cor. t. 34.

A large tree; fruit dark red, about the size of a Cherry.
The Tull Ghaut; Jowar Forests; flowers in February and March.
21. G. Suberosa. w. \& a. 37. Uvaria suberosa, Rox. Cor. I.t. 34.

A tree. Bark of the trunk much cracked.-The Concans.
22. G. Korinti. w. \& A. 38. dc. syst. 1. p. 507. Fheed. Mal. 5. t. 14.

A climbing shrub,--the hilly parts of the Concans. N.
23. G. Sempervirens, w. \&a. 39. Rheed. Mal.5. $t$, 16.

A shrub; leaves coriaceous, shining.-The Concans.
24. G. Laurifolia. g.

Undie; a very elegant tree with polished oblong leaves, something like the Portugal Laurel.

Flowers sinall white, solitary, or in little fascicles, on the branches below the leaves; appear in November; fruit rotud, size of a marble, one or two seeded: on being cut open it smells agreeably of the wild English Angelica. in the ravines along the west face of the Gliauts: hills at Nagotnah, and probably throughout the Concan. Jowar Jungles N.

ORDER 5. MENESPERMACEAE. DC. prod. 1. p. 95.

## The Coculus Tribe, Lind. nat. syst.p. 31.

14. COCCULUS. dc, Dioecia Hexandria.

Coccus-cochineal; the berries of most of the species are of a scarlet color. Gaert. t. 46 and 70. Lam. t. 824.

111. T. Populnea. w. \& a. 197. Hibiscus populneus. Rox. Flora. 3, $p$, 190. H. populnoides. Rox, Flora, 3, p. 191. Rheed, Mal. 1, t. 29. Aiuslie. Mat. Ind, 2. p. 333.

The common Bendy tree; native also of Guinea and the Society Islands. The wood is used for making rollers and other purposes where closeness of grain is required; the fruit abounds in a yellow pigment which might perhaps be turned to some account.

56, GOSSYPIUM. L. Monodelphia Polyandria.
A name applied by Plinyto a shrub which grew in upper Egypt, and bore cotton.-Lam, $t$. 586. Gaert. $t, 134$.
112. G. Album. w. \& A. 198. G. herbaceum. Rox. Flora. 3. p. 184. Rheed. Mal. 1. t. 31.-Hamilt. in Linn. Trans, 13. p. 494.-G. obtusifolium. Rox, Flora, 3. p. 183. Rox. Cor.3, t. 269. - Wight's Icones. Purt 1. No. 198.Ainslie, Mat. Ind. 2. p. 282.

The Cotton plant; extensively cultivated in Guzerat and some parts of the Dercan. Cotton as is well known, forms the staple article of the commerce of Bombay.
113. G. Nigrum. w. \& A. 199. G. Barbadense. Wight's lllust. No. 4.t. 28.-in gardens Bombay, Bourbon, and Sea Island Cotton,-The variety, G. Arboreum. Linn.-is generally to be met with about houses and in gardens, as an ornamental shrub.

## 114. G. Religiosum. w. \& A. 200.

Des Kapoos.-Ek sheng Kapoos,
A shrub; grows at a temple in Giergaum road Bombay,-Rutnagiree. (Mr. Elphinstone.)

The habit of this is very different from that of the last two, and it seems to be a distinct species.

## 115. G. Vaupellif. G.

Heergoonda-Kapoos.-a shrub 8 or 10 feet high; grows at Sidhpoor in Guzerat, It appears to be quite distinct from the other three Indian species (varieties?) of Gossypium.-(Mr. Vanpell.)
57. ABUTILON, w. \& A. Monodelphia Polyandria.

The Greek name of the mulberry; applied to this genus on account of a resemblance in the leaves, Lam. $t$. 578. Gacrt. $t$. 135.
116. A. Polyandrum: w. \& a, 202. Sida Polyandria. Rox. Flora. 3. $p$. 173. Burm. Ind. t. 47. f. 1.-annual, erect; leaves alteruate, long petioled, cordate, dentate; flowers large yellow, with the petals reflexed; appear in December and Jaunary.-hills about Parr; at Kandalla \&e.
117. A. Indicum. w, \& A, 205. Sida Populifolia. Rox. Flora, 3. p, 179, Rheed. Mal. 6. t. 45, Rumph. Amb, 4. t. 11. Wight's Icones. Part I. No. 205.

A tall herbaceous plant 3 or 4 feet high, leaves round cordate serrate, very soft and velvetty; flowers sinall yellow, appear thronghont the year; Carpels numerous, truncate; placed ound a common axis.

Common in waste places about villages.
118. A. Asiaticum. w. \& a. 206. Sida Asiatica, Rox. Flora. 3. p. 179. a biennial downy glutinous plant, with very beautiful large orange coloured flowers.-in gardens Bombay.
119. A. Graveoleus. w, \& A. 208.-Rumph. Amb. 4, t. 29.-much Jike the last; flowers sinaller.-S. Concan. N,

58, SIDA, L. Monodelphia Polyandria-a name applied by Theophrastes to a malvaceous plant-(Don.) side-is usually translated a pomgranate. (see Aristophanes in Plutus, 8. 721.)
120. S. Acuta. w. \& A. 210. Rheed. Mal. 10. t. 53. Rumph. Amb. 5. t. $18 \cdot f .2$. Wight's Icones. No. 5.t.85.-a shrubby plant with twiggy branches, narrow lanceolate leaves and small yellow axillary flowers.

Malabar Hill; the Scotch Burial Ground Bombay;-not common.
121. S. Cordifolia. w. \& A. 219. Rheed. Mal, 10. t. 54. Fleming in Asiat. Res. 11. p.178.--a suffruticose plant, leaves cordate, carpels beaked. -the Concans.

12:. S. Retusa. w. \& A. 215. Rheed. Mrl. 10. t. 18.---a shrubby plant with short petioled cuneate serrate leaves; peduncles axillary one flowered...at Kandalla, and probably along the line of Ghauts;---flowers in the rains.

## ORDER 21. BOMBACE A. dc. Prod. 1. p. 475.

The Cotron Tree Tribe. Lind. nat. syst. p. 35.
59. HELICTERES. L. Mondelphia Decandria.

Helix---a screw---in allusion to the twisted, screw like carpels-- Lam, $t$. '735. Gaert. t. 64,

123 H, Isora. w. \& A. 224. Rheed. Mal. 6, t. 30. Bot. Mag. t, 2681. Ainslie. Mat. Ind. 2.p. 447.
Muradsing,-Kawun,-Kewannie,-Dhamnee-Screw tree.
A tall shrub or small tree, much resembling the common hazel; flowers bright red, showy; appear in the rains--carpels 5; screw-like; twisted together. -Rope may be made from the fibres of the hark of this shrub.-common throughout the hilly jungly parts of the Concan, and on the Ghauts.-used medicinally in diseases of the ears. (Dr. Gibson.)
124. H. Hirsuta, Dons.syst. 1. p. 507,

A shrub, with oblong lanceolate serrate leaves.-Parell garden; probably intd. from the Eastern Islands.--Dapooree. (Dr. Gibson)-the fruit is straight, and corered with a thick coat of soft bristles.
125. H. Purpurea. (Dr, Gibson.)

A shrub with bright red flowers--- Dapooree- intd. from Calcutta;-probably this is identical with Decandolle's H. lanceolata.
60. ADANSONIA. L Monodelphia Polyandria.

Adtanson-a Freuch Botanist and traveller in Senegal.-Lam. 5. t. 588. Gaert. t. 135.
126. A. Digitata. w. \& a. 226. Rox. Flora. 3. p. I64. Bot. Mag. t. 2791. and 2792.

The Baobob or Monkey Bread tree.---a fantastic looking tree with trunk of an immense size close to the ground, but fast tapering and of little height; somewhat resembling a cone; flowers large, white; appear in May and June.-near the wilderness Bombay, Colaba, Matoonga; probably planted:---along the sea coast of Guzerat, where the fishermen use the large fruit as a float for their nets. (Bombay Med. Trans. 1. p. 18) it is also used medicinally by the natives, who like the Africaus esteem it cooling; the leaves are eaten with their food, and are said to restrain excessive perspiration.

A few trees are generally found at places where the Musselmen have been, but it is not indegenous on this side of India. (Dr, Gibson.)
61. BOMBAX. c. Monodelphia Polyandria.

Bombyx-a Greek name for cotton: the capsules are filled with a kind of co ton.
127. B. Malaharicum. w. \& A. 227. B. heptaphyllum. Rox. Flora. 3. p. 167. Rheed. Mal. 3. t. 52. Asiat. Res. 4. p. 297. Rox. Cor. 3. t. 247. Wight's Rllust. $\mathrm{t}, 29$.

Sterculius---a Roman God---Lam. t. 736.
131. S. Balanghas, w. \& a. 229. Rox. Flora. 3. p. 144. Rheed. Mal. 1. $t .49$. Wight's Illust. No. 5. $t .30$.

A tree; leaves alternate, elliptic oblong; ffowers in axillary pendulous panicles; appear in April and May; carpels large, ovate, many seeded...-S Concan. N.
132. S. Gurtata. w.\& 4. 230, Rox. Flora. 3. p. 148. Rheed. Mal. 4. t. 61.

Kıokur.-Goldar,--a large erect tree; leaves long petioled, oblong entire, villous underneath; flowers in simple terminal racemes; segments of the calyx revolute, pubescent on both sides, outer of a pale yellow, inuer of the same colour, marked with purple spots.-flowers January and Fehruary, when the tree is bare of leaves:-carpels size of a lare apple, 3 or more growing together, of a reddish colonr; seeds size of a chesunt; they are roastid and eaten by the natives.---common along the Ghants. Ruxburgh mentious that a hind of fax is obtamed from the bark in Malabar, which is manufactured into cloth.
133. S. Colorata. w. \& a. 233. Rox. Flora. 3. p. 146. Rox. Cor. 1. t. 25. Khowsey or Bhape kore.-a large tree willa palately 5 lobed leaves, deciduous in the cold weather; flowers March and April; carpels hright red, pendulous, sumewhat resembling a broad pod of a pea opened, with the peas adhering: the trees have a very strange appearance when covered with them, and may be recognized at a long distance. - on Elephanta hill; -jungly tracts throughout the Concaus;-above the Ghauts. (Dr, Gibson.)
134. S. Urens. w. \& A. 234. Rox. Flora. 3. p. 145. Rox. Cor. 1.t 24.

Karulee.-a large tree; leaves round cordate, 5 lobed, deciduous in the cold weather; flowers February and March; very smaii; in terminal panicles; carpels clothed with rigid bristly hairs which puncture like Mucuna pruriens.

The bark of the trunk is white, and gives to the tree a dead appearance; the seeds are cathartic.-a kind of coffee may be made of them. (Dr. Gibson.) -Malabar hill, Bombay.-common throughout the Concans.-Native Guitars are made of the wood of this tree.
135. S. Villosa. w. \& A. 235. Rox. Flora. 3. p. 153,--a tree: leaves palmately 5 or 7 lobed-S. Concan. N.
136. S. Foetida. w. \& a. 236. Rox. Flora. 3. p. 155. Rumph. Amb. 3. 6. 107. Ainslie. Mat. Ind. 2. p. 119.--Sonnerat. voy. t. 132.

Jungly-Budam, Poon--tree;---a very stately tree with digitate leaves, deciduous in the cold weather: flowers March and April; of a dull crimson colour, and like those of S. guttata, with an offensive smell; carpels large, kidney shaped: the seeds are roasted and eaten like chesnuts.-Mahim and Giergaum woods, Bombay; but evidently planted,-It is a most useful tree and furnishes the masts known by the name of Poon spars.
65. HERITIERA.w. \& A. Monoecia Momodelphia.

Heretier-a celebrated French Botanist.-Gaert. t. 98. and 99.
136. H. Littoralis. w. \&a.237. Rux. Flora. 3. p. 172. Rbeed. Mal. 6.t.21.

A small tree with alternate entire leaves, and flowers in axillary panicles. --s. Coucan. N.
66. Kleinhovia. l. Monodelphia Polyandria,

Kleinhoff-once Director of the Botanic garden at Batavia-Lam.t. 734Gaert. t. 137.
138. K. Hospita. w. \& A. 238. Rox. Flora. 3. p. 141.-Rumph. Amb. 3. t. 113.

A tree with alternate broad cordate leaves, and small pink coloured flowers, in terminal panicles;-capsule pear shaped, inflated.-S. Concan. N.
67. THEOBROMA. Monodelphia Decandria.

Theos.---god---broma-fond.-celestial food;-surely chocolate does not fairly merit such distinction.--Lam. t. 635. Gaert. t. 122.
139. T. Cacao. w. \& A. 239.

Common chocolate nut tree.--native of South America.-Hort. Soc. garden. Intd. by Col. Frazer, resident in Travancore.
68. ABROM 1. L. Monodelphia Decandria.

A privative, and broma food;--not fit for food; in contradistinction to the last.--an unmeaning name but luckily short.--Lam. t. 636. and 637. Gaert. 6. 64.
140. A. Augusta. w. \& a. 241. Rox. Flora. 3. p. 156. Gossypium daemonum. Rumph. Amb. 4. t. 14.

A shrub, with soft velvetty branches, leaves ovate oblong acuminate; flowers in the rains; of a dark purple colour and rather pretty; capsule 5 angled.---in gardens Mazagaum, not common:-the fibres of the bark are very tough and well adapted for making cordage.

## 69. GUAZUMA. w. \& a. Monodelphia Deccandıia:, <br> A Mexican name. Lam. t. 637.

141. G. Tomentosa. w. \& A. 240. Wight's Illust. No. 5. t. 35.

A tree with small yellow axillary, and terminal flowers; capsule woody, tubercled; about the size of a bullace plum...-Pretty common about Bombay, but evidently planted.

Cal. Scleft. Cor. Shot. Slam 20. 5of them stevile. Ory hedieclled 5 celled. Cap uovidy. Scedt uninged

Fo. BYT"NERIA. L. Monodelphia Decandria.
Byttner---once Professor of Botany in the University of Gottengen.
142. B. Herbacea. w. \& a. 242. Rox. Flora. 1. p. 619. Rox. Cor. 1. t. 29.-a small herbaceous plant with flowers somewhat resembling those of the Guazuma:--petals yellow on the outside, red within; forming a circular dome over the pistil and nectary. - Pretty common in Bombay during the rains.

## 71. RIEDLE[A. w. \& A. Monodelphia Pentandria.

Reidle-a French naturalist.
143. R- Corchorifolia. w. \& A. 245

Melochia corchorifolia. Rox. Flora. 3. p. 139, Rheed. Mal. 9. t, 73. Aiuslie. Mat. Ind. 2. $p$ 440. -a common herbaceous plant with sub-cordate plaited leaves.-flowers terminal; pale purple, with a yellow centre.
144. R. Tiliaefolia. Dons. syst. 1. p. 529. R. odorata, and R. velutina. Dons. syst. 1. p. 529. Visenia umbellata. Sprengel syst. 3. p.29. Dous, syst. 1. p. 538.

Mathooree, - a small tree, with alternate, long petioled, sub-cordate, serrate leaves; the young ones very soft and velvetiy;-stipules numerous, resembling those of Cassia auriculata.- flowers small, rose coloured; in axillary and terminal corymbiform panicles; appear in November.-The Hill above Sir Herbert Compton's Bungalow at Kandalla, - near Belgaum. (Mr. Law.)
72. PENTAPETES. L. Monadelphia Polyandria.

Pente---five; in allusion to the five celled fruit.---Lam. t. 576. Gaert. $t .134$.
145. P. Phoenicea. w. \& a. 248. Rox. Flora. 3. p. 157. Rheed. Mal. 10. t. 56. Herbaceous erect growing plant, 3 or 4 feet high; leaves alternate, linear lanceolate; flowers axillary, large, of a beautiful bright red colour; appear during the rains.---in gardens Bombay.

## 73. DOMBEYA. w. \& A. Monodelphia Polyandria; <br> Dombey-a French traveller in Peru-Gaert. t. 137.

146. D. Palmata. w. \& a. 249. Wall. Pl. As. rar, 3. t. 235.

A shrub; leaves palmate, 5 or 7 cleft , having some resemblance to those of the common castor oil plant; flowers in large terminal corymbs; they appear in September and October.-Sir Roger de Faria's garden, Mazagaum; intd. from Bengal.

## 147. D. Angulata. dC. pronl. 1. p. 498.

1). tiliaefolia. Rox. Flora. 3. p. 157. Bot. Mag. t. 2905.

A shrub; leaves cordate acuminate, serrate, old ones 3 or 5 angled; flowers in terminal corymbs; of a pretty rose colour, something like those of the common Oleander-intd. from the Mauritius by N .
148. D. Tomentosa. dc. prod, 1. p. 498.

Walkuffa?-Bruce's Travels. 7. $\boldsymbol{t}$. 20. - A small tree with sub-rotund cordate, acuminate, tomentose leaves; flowers in terminal corymbs; rose coloured; small. compared with those of the two last species.-intd. by N. from the Mauritius.
74. PTEROSPERMUM. w. \& A. Monndelphia Polyandria.

Pteron-a wing, spermu-seed; the seeds are winged-Lam. t. 576.--velago -Gaert t. 133.
149. P. Suberifolium. w. \& a. 252. Lam. Illust. t. 576. f. I.

Muchucunda;-a tree with alternate cuneate oblong leaves, and axillary fragraut flowers, which appear in May,-The Concans. N.
150. P. Glabrescens w. \& a. 255. Rheed. Mal. 6. t. 58. -a tree-m- $S^{-}$ Concan. N.
151. P. Acerifolium: w. \& a. 256. Rox. Flora. 3. p. 159.-Bot. Mag. t. 620 .

A 1:rce tree, leaves slightly peltate, roundish, cordate at the base. under side hoary: flowers in May and June, pretty large, segments of the calyx linear, ohlong, recurved,-covered with a whitish felt inside; on the out with short brown hairs.-In the late Col. Huogh's garden, Colabah,---Giergaum wouds.- not common.
95. 1 ASTRAPAEA. Lind. Monodelplia Polyandria.

Astrape.-lightening ; in allusion to the brightuess of the flowers.
152. A. Wallichir. dc. prod. 1. p. 500. Bot. Mag. t. 2503.-a shrub, leaves cordate, angularly lobed, very soft to the touch; flowers in large compact umbels; scarlet, with yellow authers; have rather a disagreeable smell. The mode of growth somewhat resembles that of the Compositat, In Mr. Skinner's garden, Mazagaum.
76. KYDIA. Rox. Monodelphia Polyandria.

In memory of Colonel Kyd, the founder of the Botanic garden, at Calcutta.
153. K. Calycina. w. \& a. 2b7. K. faterna. w. \& A. 258. Rox. Flora. 3. p. 188. and 189. Rox. Cor. 3. t. 215 and 216.

Warung or Warungud;-a middle sized tree, with altermate, petioled broad cordate, anglefl leaves, and small white flowers, in terminal panicles: they appear in Uctober and November; capsule size of a pea, hid in the calyx,-Kennery Furests, Salsette;-along the Ghauts, pretty common.
77. ERIOCH\&AENA. dC. Monodelphia Polyandria.

Erion---wool-chlania-a cloak, in allusion to the wooly calyx.
154. E. Hookeriana. w, \& A. 259.

Bootee or Bother, -a middle sized, scraggy looking tree;-leaves ronndish cordate, toothed, soft and whitish beneath;-flowers February and March, yellow;-capsule woody, size of a plum; 10. celled, 10. valved.-near Karlee Caves (Dr. Arbuckle.)---along the Ghauts, not common.

Probably it is identical with. E. Candolii-Wall. As. Pl. rar, 1.t. 64-a native of Burnab.

## ORDER 23. TILIACEAE. Dc. prod. 1. p. 503.

The Linden Tribe. Lind. nat. syst. p. 40.

Maker limboo.-- Ranlimboo.--a large ever-green shrub, armed with small thorns; flowers in November: white.--common on the Ghauts.---at Siduey Puint, Mahableshwur.
89. TRIPHASIA. w. \& A, Hexandria Monogynia.

Triphasios;--in allusion to the 3 cleft calyx, and 3 petals.
175. T. Trifoliata. w. \& A. 323. Bot. Rep, t. 143. Citrus parva dulcisSonn. It. t. 63.

A conmon shrub in gardens: called China Limboo; flowers white, fragrant; berries size of a sloe; make good preserves.-grows wild in S. Concan. N.

It is also a native of China, from which country the plants in Bombay gardens have probably been introduced.
89. LIMONTA. L. Decandria Monogynia.

Lymoun-the Arabic name. Lam. t. 353. Gaert. t. 58.
176. L. Acidissima. w, \& A. 342. L. crenulata, Rox. Cor. t. 86. Rheed. Mal. 4. $t$. 14.

A shrub with pinnate leaves, and winged petioles: fruit size of a pea: much used as a tonic in Malabar where it forms an article of commerce with the Arabs. intd. by N.-common on sandstone hills at Padsliapore, and at the falls of Gokauk where it is associated with Tephrosia suberosa, \& Chlorvoxylon swietenia. (Mr. Law.)
90. GLYCOSMIS. w. \& A. Decandria Monogynia.

Gilycus-sweet-osme-smell; the flowers are sweet scented.
177. G. Arborea, w. \& A. 327. Rox. Cor, t, 85. Bot. Mag. t. 2074.-a small tree with pinnate leaves.-S: N. Country. (Dr. Lush.)
178. G. Pentaphylla. w, \& a. 328. Rox. Cor. t. 84.-a tall shruh with pinuate leaves; closely allied, if not a mere variety of the last.-.-in a garden opposite the "Bee Hive," Bombay.
179. G. Chylocarpa. w. \& a. 332.--a shrub with pinnate leaves, and the hatit of the last species; flowers November and January; white,--the fruit much resembles the commongall found on Oak trees in England and is
mucilaginous.--common in ravines at Kandalla, and generally along the Ghauts in shady places;---it is perhaps identical with the Parel. Rheed. Mal. 2. 6. 9.
91. BERGERA. Koen. Decandria Monogynia.

Berger-formerly a professor of Butany at Keil.
180. B. Kobengur. w. \& A. 334. Rox. Cor. t, 112. Wight's Icones Part 1. Ain-lie. Mat. Ind. 2 p. 139. Rheed. Mal. 4. t. 53.

Koodia neem; -a small tree with pinnate leaves, which are much used in curries by the natives.---gardens Bombay.
181. 13. Integerama. Ros. Flora. 2, p. 376.--also called Kondia neem;--a small tree common on the (hhate; flowers Febrany and March: in terminal corrmbiform panicles; of a whitish yellow colour.---Pedhaps the tree here referred to is the $\boldsymbol{B}$. Koenigii in its wild state.
93. MURRAYA. L. Decambia Monogynia.

Murray-once Professor of Botany at Guttingen. Lam. $t$. 352. Gaert. t. 93.
182. M. Exorica. w. \& A. 335. Wight's fcomes, No, 5, t, 9i, Cimu= nium sinense. Rumph, Amb. 5. t. 18. f: 2 .

Koontee;-a pretty ormamental shrub, with white fragrant flowers;--in gardens; probahly intd. from China. Dr, laoyle remarks, that it is found all along the janyly tract at the fout of the Himatayas.
183. N. Paniculata, w. \& a. 33f. Rumph. Amb. 5 t. 17.- a small tree with pirnate leaves, - flowers white fragrani; appear in Vecember and January; fruit reddish; something like a small capsicum,-the table land of Mahableshwur. - the Ghauts; not common.
93. COOKIL. Sonn, Decandria Monogynia.

Cook-ihe celebrated voyager. Lam. t. 304.
18t. C. Punctata, w. \& a. 338. Rumpl. Amb. 1. t. 55. The Wampee. a Cunese fruit iree; in girdens Bombay and Dapooree.
91. FE:ADNIA. Corr. Decandria Monogynia.

Feronia-the Gindless of furests, she had a temple on Mount Soracte, (Horace Book 1. Ode. 9.)
185. F. Elephantun. w. \& A. 341. Rox. Cor. t. 141. Asiat. Res. 4. p. 280. Wight's Icones. Part 1.

Cawthri-the Elephant or woorl apple; a large and handsome tree, with pimate leaves; fruit large, with a grey coloured, very hand rind-gardens Bomb:y.-Faria baug, Ahmedhugerur. The vale of the Taptee common; also on the Xool river, and throughout finzerat. (Dr. Gibson.)
97. AEgLA, Corr. Polyaulria Monngyia.

The Greck name of one of the Hesperides.
186 A. Marmelos. w. \& a. 34.2. Rheed. Mal. 3. t. 37. Rox, Cor. t. 143. Asiat, Res. 2, p. 349. Aiusliヶ. Mat. Iud. 2. $p$, I88. 'IV ight's Ionnes Par: I.

Bale - Bilwa - Bengal duine;-a thorny tree with ternate leaves. Fruit smonth, yellow; with a very hard rind. - the pulp is much used by the natives in enses of chronic diarhoea. (1)r. vibson)-Malabar Hill Boabay, Elephanat; - bont temples in many parts of the Deccan;-Duddi on the Gutpurba (Mr. Law.)-Dr. Loyle says, that the astringent rind is used in dyeing yelluw.
96. CITRUS. L, Polydelphia Polyandria.

Origin of the name unkuown,-Lam, t, 639. Gaert. t. 121, Tourn. Inst. 39. 5. and 396 .

 ualate jrees. Shrubs. lateral keins. sise resinous Aeriá fungation yellor

18\%. C. Decumana. w, \&a. 34.3. Rumph. Amb. 2. t. 21. The we!l known Pum nals, or s'ilad lock.--common in Bombay gardens.
183. C. Aurantium. w. \& a. 343.-the Orange, several varieties of which are cultivated. Aurungabad has long been famed for its Cintra orangez, a name adopted into the native languages.
189. C. Limonum. w. \& A. 6th. var. of C. Aurantium. - the lime tree; or Limbou.-common in gardens.

Those who wish for information on this difficult genus, sh.)uld consult Risso and Poitean's work, and the 6th vol. of Wernerian transachions, containing Buchonnan Hamilton's Commentary on Rumphius.

There is a member of the family growing apparently wild near Parr, and on the level part of the Rotunda Ghaut. The natives call it Maloonga; it is armed with long spines, and has flowers like the citron.

Dr. Royle says, that in the tract bordering the foot of the Himalayas, he noticed two plants growing apparently wild, the one called Pijooree, the other Biharee; the first having the characteristics of the citrois, the other of the lemon;-probably the Parr plant is identical with one of them, and with a plant which Mr. Vaupell found on Mount Aboo in Guzerat, decidedly wild. It bears a truit of the size and shape of the China orange, and is used at Deesa as a stock to graft on.
97. AGLAIA, L. Monodelphia Pentandria.

The name of one of the Graces, expressive of beauty and elegance; it is well bestowed on this family.
19). A. Odorata, Lour. Cochin China. Camunium Chinense, Rox. Flora. 1, p. 936. Opilia odorata. Sprengel.- Rumph. Amb.3, t. I8.

A shrub with ternate and pinnate leaves, (like Jasminum odoratissinum) and very suall yellow flowers in axillary racemes.-gardens Bombay.probably introduced from Chiaa.
98. PARAMIGYNA. Wight. Decaudria Monogynia.
191. P. Monvphylla - IVight's Illust. No. 7. p. 108. Micromelum Monophyllum. Wight's Jllust. 6. t. 4?.

Ranyeed.-a scandent shrub, armed here and there with stout, blunt, recurved thorns; leaves alternate, ovate oblong, ibout 3 inches long and 2 broad: fruit pomaceous; somewhat resembling that of the Sabia, figured in the 1 th vol. of Linn. Trans.--on the Parr Ghaut, rare,--Broaght to Mr. Nimmo from the South Concan.

ORDER 29, GUTTIFER E. Dc. prod. 1. p. 557.
The Mangosteev Tribe. Lind. nat. syst. p. 45.
99. GARCIN1A. L Polyandria Monogyuia.

Garcin-a French Botanist and traveller in the Eıst. Lam. t. 406. Gaert. t. 105.
192. G. Affinis. W. \& A. 351. G. Kydia. w. \& A.353. G. Cambogia. Wight's lllast. No. 8,p. 125 Rheed. Mal. 1. t. 24.

A very handsome tree common in Travancore, and some parts of the MaLabar Coast.- Hort. Soc. garden. intd. by Col. Frazer, resident in Travancore.
193. G. Purpurea, Rox. Flora. 2. p. 624. Wight's Illust. No. 8. p. 125. Rumph. Amb. 3. t. 32.

The Kokum.-Brindad, of the Portugueze;-a very elegant tree; head generally of a conical form; brauches drooping; leaves dark green, shining;
fruit round smooth, not furrowed; size of a crab apple,-when ripe of a purple colour throughout; it has an agreeable acid flavor, and is eaten by the na-tives.-Workers in iron use the acid juice as a mordaunt.-a concrete oil is obtained from the seeds which is well known and used at Goa for adulterating Ghee. (Bombay Courier 12th June 1830.)-in gardens Bombay.-pretty common in some parts of the Concan:-in the ravines at Kandalla.
194. G. Mangostana. Rox. Flora. 2. p. 618. Rumph, Amb. 1. t. 43.

The Mangosteen tree; intd. by N. from Sincapore.--Perhaps it may be naturalized by grafting on the last species.
195. G. Roxburgil. Wight's Illust. No. 8. p. 125.
G. Zeylonica, Roy. Flora. 2. p. 621.
G. Cowa. Rox. Flora. 2 p. 622.
G. Cambogia. Rox. Cor, 3. t. 298.-fruit furrowed.--some very large trees grow in a grove at Belgaum. (Mr. Law.)

## 100. XANTHOCHYMUS. Rox: Polyadelphia Polyandria.

Zanthos.-yellow, chio-to pour out:-the fruit abounds in yellow juice.
195. X. Ovalifolius, w. \& a. 355. Rox. Flora. 2. p. 632.-Garcinia Gutta. Wight's Illust. No. 8. p. 126. Hebradeudron Cambogioides. Wight's. Mlust. t. 44 .- in Madras Journal of Science. No. 13.

Taveer;-a small tree: leaves opposite, oval, polished: flowers sessile; verticilled on the branches; small, white; appear in December; fruit ripens in March and April; round, with a smooth green rind; about the size of the Kinonnm; (farcinia purpuret.) full of a yellow clamay juice.-In the ravines at Kand:llo.-n the Parr Ghaut; along the line of Ghauts generally.

Dr. Wight describes the fruit as heing about the size of a cherry; perlapps be saw it before it had attained the full size, or the plant here referred to may be a distinct species, though it accords well with the one he has figured in lllust. $t$. 34.--probably this is the tree which furnishes the Gamboge gun of commerce. It is very ornamental.
101. MESUA. L. Polyandria Monogynia.

Mesues - the father and son:-Arabian Physicians who lived at Danascus in the sth and 9th centuries.
197. M. Ferrea. w. \& a. 357. Rox. Flora. 2. p. 605. Rheed. Mal. 3, t. 53. Nagkesura. Asiat. Res. 4. p. 295. - where Sir W. Jones well remarks, "surely the genuine appeilation of an Indian plant should be substituted for the corrupted name of a Syrian Physician who could never have seen it: and if any trivial name were necessary to distinguish a single species, a more absurd one than iron (ferrea) could not possibly have beenselected for a flower with petals like silver and authers like gold,"

One of the most elegant trees;-much cultivated in the Eastern Islands and Malabar for its beautiful flowers, which in size and shape resemble those of the sweet briur:-their perfume partakes of the rose and violet.-S. Concan. N. where it is called Nag chumpa. In a grove near Belgaum where it is also called Nag Chumpa;-the flowers are regularly picked as they expand, for sale in the bazar, and preserve their fragrance even when dried. The Jonesiu asoca grows in the same grove. (Mr. Law.)

Dr. Wallich found both these elegant trees growing round the spot where he discovered the Amherstia nobilis, in Burmah.

## 102. CALOPHYLLUM. L. Polyandria Monogynia.

Kalos-beautiful, phyllon-a leaf:-the leaves are elegantly veined. Lam. t. 459 .
198. C. 1 nophyllum. w, \& a. 358. Rox. Flota. 2. p. 606, Rheed. Mal, 4. t. 38.-Wight's Icones, t, 77. 11lust. No, 8, p, 128,

Poona; -the Alexandrian Laurel; -a very beautiful tree with dark green polished leares, elegantly veined; (hence the appropriate trivial name inophyllum.) flowers white, fragrant; appear at the commencement of the rains; fruit round, smooth, size of a walnut; the natives obtain lamp oil from it.-Lamark says Tacamrhac gum exudes from wounds made in the truak of this tree and is collected in the Isle of Bourbon.-see Encyclopatlie Methodique. 1. p. 457.-Love Grove, Bombay.-cominon on Salsette, and in the Concans, on sandy soil near the Sea.
199. C. Spurium. w. \& a. 359. Rheed. Mal. 4. t. 39. C. Calaba-Wight's Illust. No, 8. p. 128.

A tree with cuneate obovate leaves, much smaller than those of the last species.-S. Concan, N.

## 103. CATYSACCION. Wight. Dioecia Polyandria.

200, C. Longifolium. Wight's Illust. No. 8. p. 130. C. Suriga? Rox. Flora. 2. $p, 60 \%$.

Woondy.-a large tree; leaves opposite oblong; flowers in March and April, in clusters on the thick branches below the leaves; small white, streaked with red, dioecious. - the male tree is called Woondy-the female Poonag both are also known by the name of Suringee and Gordeoondy.--Parell and Worlee Hills, Bombay;-Keunery jungles in considerable abundance.-on the Ghats and throughout the Coneans.---the flowers are collected and exported to Bengal for dyeing silk. This tree is closely alliod to Wallick's new genus Kayea. (Asiat. Pl. Rar, 3. t. 210.)

## ORDER 30. HIPPOCRATEACEAE. dc. Prod. 1. $p, 567$

10t. HIPPOCRATEA. \&. Triandria Monogynia.
Hippocrates $\rightarrow$ the celebrated Greek Physician.-.-Lam, t. 28.
201. H. Indica w. \& A. 361, Rox. Flora. 1. p. 16.5. Rox. Cor. 2. t. 130.

Turroolee.-a scandent shrub, with oval acute shining leaves, slightly serrated; and very minute yellow flowers in corymbiform panicles. -banks of the Qunina river above Parr bridge, -and generally along the Ghauts. The foliage is pretty, and recommends it to a place in gardens.
202. H. Obtusifolia w. \&a. 362. Rox. Flora. 1. p. 166.-Salacia laevigata. Wight in Hooker's Bot. Mise. 3. t. 36.

Dausheer. - a very beautiful scandent shrub, running over high trees; leaves shining, foriaceous; flowers very numerous, minnte; in terminal and axillary panicles, which shont out heyond the Ieaves. Carpels about 2 inches long, flat, resembling a paper fulder:-Linowlee grove, Kaudalla; about Pars \&c.-this is much more common than the last species.
105. SALICIA L, Triandria Monogynia.

The wife of Neptune, Salamis? whon he carried off to the Island which bears that name.
203. S. Punoides. w. \& A. 363, Johnia Coromandelia. Rox. Flora, I. p. 169. - a shrub with small shining polished Ieaves; flowers small, axillary; appear in December and Jannary; fruit about the size of a cherry-on the cormda side of the Hill above Kandalla tank.-common about Halliar and Amboulee, Sa!sette. N,

ORDER 31. MALPIGHLACEE. DC. prod. 1. p. $67 \%$.
106. MALPIGHIA. L. Monodelphia Decandria,

Malpighi-once a Professor of Medicine at Pisa, Lam. t. 38L,
204. M. Coccifera. dc. prod. 1, p. 578. Bot. Reg. $t$, 568.-a small stinted shrub, with box looking leaves.-Parell and Dapooree gariens; probably intd. from Bengal.
107. Hiptage. Gaert. Decandria Monogynia.

Hiptanai-to fly; in allusion perhaps to the shape of the petals, or the fruit which is winged. Gaert. t. 116.Molina. Lam, t, 349.
205. H. Madablota. w. \& A. 370.-Gaertnera racemusa. Rox. Flora. 2. p. 368. Rheed, Mal. 6. t. 59. Rox. Cor. 1. t. 18. Madablota. Sonn. voy. Ind. 2, p, 135. Asiat. Res. 4. p 23.2. Wight's Illust. No. 7, t, 50.

Bokhee. Utimookta-a large climbing shrub, with very beautiful white and yellow (one of the 5 petals is yellow, the rest white) flowers, in terminal ia. cemes; petals fringed; one of the stamens is much longer than the rest ; fruit unequally 3 winged.

Grows in great abundance on the Ghauts; flowers in February and March;-= in Bombay gardens. Sir W. Jones observes, that it was a favorite plant of Sacontala which she justly called the "Delight of the woods."

The bark is a very good suh-aromatie bitter. (Dr. Lush.)
108. ANCISTROCL 1 DUS. Wall. Decandria Trigynia.

Ankistron -a hook, Kludos-a branch; in allusion to the hook like tendrils on the branches.
206. A. Heyneanus. Wall. Cat. No. 7262. Modira valli. Rheed. Mal. 7. t. 46. Valli Modegam, Rheed. Mal. 7. t. 47.

Kurdul.-a climbing shrub with oblong leaves growing at the ends of the branches; flowers small, whitish, in terminal racemes; appear in March.-The Parr Ghaut; ravines at Kandalla; not common.

The Modira Valli usually quoted for Art. botrys odoratissima, has a great resemblance to this plant: The next figure alluded to by Wight and Arnott (prod. 1. p. 107.) has the leaves too broad; besides it wants the looks on the branches which the Kurdul is furuished with. Aublet's Genus Potalia. (Lim1. t. 348.) seems to have an affinity.

This is a very pretty shrab, but hardly known yet to European Botanists.
109. HIRAEA• w. \&A. Decandria Trigynia.

Nicholas de la Hire-a French Physician. Lam. t. 382. Gaert. t. 116.
207. H. Indica. w. \& a. 373. Rox. Flora. 2. p. 448. Rox. Cor, 2. t. 160. -a scandent shrab with opposite ovate leaves, and flowers in axillary and terminal panicles; fruit like hops.-Khandalla Ghaut.

## ORDER 32. SAPINDACEA. DC. prod. 1. p, 601.

The Soap-tree Tribe. Lind. nat. syst. p. 116.
110. CARDIOSPERMUM. E. Octandria Trigynia.

Kardia-the heart-sperma-seed: in allusion to the shape of the seeds. Lam. t. 317. Gaert. t. 79.
208. C. Helicacabum. w. \& a. 376. Rox, Flora. 2. p. 292. Rheed. Mal. 8. t. 28. Bot. Mag. t, 1049.-Ainslie. Mat. Ind. 2. $p, 204$.

Hewt pea.-an annual climbing plant wilh an inflated membranaceous capsule, from which it is sonetimes called the Balloon Vine..--common in hedges \&c. during the rains.

 striught hi it les of cortyler.
 uneywal dided ikenne de valed. Fil.
F2. furpile, diughe / Celled I seeded (D)
224. A. Macrophylla. n. -a solitary tree, grows in the ravine at Kandalla below the old Toll House; the leaves are pimate about 3 feet long; fruit ripens in March. It much resembles a ball of Windsor soap, is 3 celled, 3 valved, opening from the apex; seeds solitary, of a scarlet colour.

This is quite distinct from Amonra curullata. Rox. Cor. $t$. 2js. whether it is identical with Blume's Aphanamixis grandifolia, remains to be discovered,

## 122. SANDORICUM. L. Decandria Monogynia.

Santoor.-the Malay name. Lam. t. 350.
225. S. Indlcum. w. \& A. 400.---Rox. Cor, t. 261.--Rumph. Amb. 1. t. 64.-an elegant tree with ternate leaves; fruit size of an apple; native of the Moluccas, intd. by N.--it is closely allied to the yerizdec.
123. GUAREA. Rox. Octo-Decandria Monogyuia.

The Cuba name ofone of the species--Lam.t.301.
226. G. Binectarifera. Rox. Flora. 2. p. 240.

Yerindee.--a tree with pinnate leaves; leafets alternate;--flowers August and September, in axillary panicles: frnit size of an apple, 4 celled, 4 valved; of a brownish yellow colour;-rind hard;-seeds solitary, size of a chesnut: monkeys are very fond of them,--Lanowlee Grove and in the ravines at Kandalla; not common.

If the tree here referred to, is not identical with Roxburgh's, which is doubtful, it will form the type of a new genus.
124. EPICHARIS. Blume. Monodelphia Octo-Decandria.

Greek name for beantiful; given in allusion to the appearance of the trees.
227. E. Exarillata. n.

Boorumb.--a tree, leaves pinnate; leafets 2, or 3 pair; flowers in December and January; small white, in axillary racemes: they rarely expand and are generally destroyed by insects.---fruit size of a plum; pear shaped, indehiscent; abounding in a white resinous juice.--this tree requires examination: probably it will form the type of a new genus.--Kandalla, hills about Nagotnah, the Parr Ghaut \&c.
125. HEYNEA. Rox. Decandria Monogynia.

Dr. Hync---a German, who spent some time in India.
228. H. Trijuga. Rox Flora. 2. p. 390 and Cor. t. 260--Bot, Mag. t. 1738.

Limbara:---a small tree with alternate pinmate leaves, leafets 3 or 4 pair with an odd one; flowers in axillary corymbiform panicles; of about equal length with the leaves; small, white; appear in March and April: fruit red, resembles the rowan-bery; opening from the apex like the teesul. (Fayara.) seed solitary covered with a thin white aril.--common abont Kandalla, the Parr Ghaut ixc. it is perhaps different from Roxburgh's plant.
126. MALLEA. w. \& A. Monodelphia Decandria, Lam. t. 358 ,
229. M. Rormi. w. \& A. 397. Ekebergia Inlica. Rox. Flora. 2. p. 392.

A shrub with pinnate leaves; flowers small, white, in axillary panicles.fruit ripens in Mareh, red, much like the rowan-berry--grows in great abundance on the Katruj Ghant near Poona, and is probably to be met with on all the chains of hills running inland from the Ghauts.
127. TURRAEA. L. Monodelphia Decandria.

Turra-once a Professor of Botany at Padua. Lam. $t, 351$.
230. T. Virens. dc. prod. 1. p. 260.

A *hrub, flowers in April and May, much resembling those of the common honeysuckle. - Kandalla;--in considerahle abundance towards bottom of Parr Ghaut.- the shrub is destitute of leaves when the flowers appear, which sets them off to more advantage.

The Rue Tribe. Lind. nat. syst. p. 134.
141. PEGANUM. L. Decandria Monogynia.

Peganon---Greek name of Rue---in allusion to the resemblance of the plants. Gaert, t. 95. Lam, t. 401.
268. P. Harmala. w. \& A. 473.

Herbaceous plant, with multifid leaves, and white flowers, with greem veins.---grows in considerable abundance on the ruins of Beejapoor (Mr. Law.) It is also a native of the sandy plains about Madrid, and in the Levant. With the exception of Beejapoor this interesting plant has not yet been found in any other part of Western India. Can it have been introduced by the Muselmen?
142. RUTA. L. Octandria Monogynia.

Rute--Greek for Rue---Lam. t. 345. Gaert. t. 111.
269. R. Graveolens. dc. prod. 1. p. 710. Ainslie. Mat. Ind. 1. p. 351.

Saturee, Rue.--The herb of grace.
" Reverend Sirs,
For you there's Rosemary and Rue, these keep
Seeming and favor all the winter long."
The Winter's Tale.
In gardens, cultivated.-by no means common.
143. CYMINOSMA. Gaert. Octandria Monogynia.

Kyminon---cumin, osme---smell; the fruit has the smell of cumin seed.
270. C. Pedunculata. w. \& A. 475. Rheed. Mal. 5. t. 4. and 15. Vahls Symbols $t .61$.

A shrub with yellowish flowers, in corymbs.--S. Concan. N.
144. ZANTHOXYLON. L. Dioecia Tetrandria.

Xanthos-yellow, Xylon---wood.---Lam. t. 84. Gaert. t, 68.
271. Z. Rhetsa, w. \& A.476. Fagara Rhetsa. Rox. Flora. 1. p. 417. Rheed. Mal. 5. t. 34.

Teesul,--Cochlee.--a large tree, completely armed with sharp prickles; leaves pinnate; deciduous in the cold weather. Flowers October and November, in terminal panicles; capsule round, size of a pea; opening from the apex; I seeded. It has a strong aromatic taste, something like orange peel, and the seeds are used for pepper. Rheede says, it is cultivated in Malabar and the seeds used as a condiment. It is possible the Egyptians used them in embalm-ing.---Parr village. (Capt. Twemlow.) The hill side above Sir H. Compton's Bungalow, Kandalla. (Dr. Arbuckle.) in Kandesh. (Dr. Elliot.) It is a rare tree.

Rhetsa maun---is the Telengi name of this tree, and according to Roxburgh rhetsa means " a committee or select member of men assembled to settle disputes \&.c. and maun, means trees of the largest size. Under the shade of this tree the Hill people assemble to examine and determine their matters of public concern." (Flora. Ind. 1, p.417.)
272. Z. Triphyllum. Dons. syst. 1. p. 804.

Fagara tripliylla.--Rox. Flora. 1. p. 416 . Rumph. Amb. 2.t. 62.
A small unarmed tree, with opposite trifoliate leaves, and small white flowers in axillary panicles; they appear in April and May. The capsules are much smaller than those of the last, but possess the same aromatic proper-ties.---the ravines at Kandalla.--Parr Ghaut, and table land of Mahableshwur; not very common.

Rumphius says, the Amboina women prepare a cosmetic from the bark, and apply it to improve their complexions.

The trees from which Roxburgh's description was made, were sent to Calcutta Botanic garden from Pulo Penang, and Wight and Arnott observe in their Prodromus that it had not yet (1834) been found in the Peninsula of India. It has now, (1839) and probably extends along the Ghauts.
145. TODDELIA. Juss. Pentandria Monogynia.

The Malabar name, latinized-Lam. t. 139.

273. T. Aculeata. w. \& a. 479. Rheed. Mal. 5. t. 41. Ainslie. Mat. Ind. 2. p. 2c0. Scopolia Aculeata, Rox, Flora. 1. p. 616. Zey. Burm. 3. t. 24. -a thorny shrub with trifoliate leaves and small white flowers in axillary racemes; fruit size of a small cherry; has a strong pungent taste, like black pepper.-S. Concan. N.
146. AILANTHUS. L. Polygamia Monoecia.

From the Molucca name of one of the species. Lam. t. 859.
274. A. Excelsa. w. \& a. 481. Rox. Cor, $t, 23$. Rox. Flora. 2. p. 450.

A large tree with pinnate leaves, from 2 to 4 feet long; leafets coarsely toothed; flowersiuterminal panicles; appear in January and February. - the light wood is much used for making sword handles \&c.
'Ihe English Burial Ground, Surat. (Lt. Giberne, ) Pretty commonabout Broach and Baroda. (Dr. Lush.) thinly scattered over the Deccan. (Dr. Gibson.)
275. A. Malabarica, w. \& A. 482. Pongelion. Rheed. Mal- 6. t. 13. dc. prod. 2. p. 89.

Wood.--a very handsome tree, with long pinnate leaves, collected at the ends of the branches: leafets quite entire with the mid rib placed to one side; in shape like those of the Datira; (Ficus tseila. Rheed. Mal. 3 t. 63.) flowers small, white; in terminal racemes, almost hid by the leaves; appearin February and March.--close to Indapoor on the road leading to Mahar; in the ravinesat Nagotnal.---Korinda Village, Kandalla, rare.-It is quite distinct from the last species, and Decandolle is correctin assigning it a place in his Prodromus.

The Brucea of Abyssinia which produces the Angostura bark of commerce is allied to this genus.

ORDER 42. SIMARUBE E. dc. Prod. 1. p. 733.
The Quassia Tribe, Lind. nat. syst. p. 137.
147. SAMADERA. Gaert. Octandria Monogynia. Gaert. t. 156. Niota. Lam. t. 299.
276. S. Indica. w. \& A. 483. Rheed. Mal. 6. t. 18. Vittmania Elliptica. Vahls Symb. t. 62-Niota pentapetala. Lam. Ency. Meth.

A tree, with large, alternate oblong leaves: peduncles axillary or terminal ; long, divided at the top into a small umbel which becomes pendulons in fruit.-Throughout the South Concan. N.-Goa Jungles, (Dr. Lush.)-N. lucida, a native of Martaban is figured in Wall. Pl. Asiat. Rar. 2. t. 168.

## ORDER 43. OCHNACEAE. DC. prod 1. p. 735.

148. OCHNA. L. Polyandria Monogynia.

Ochne-Greek name of the wild pear;-the foliage bears a resemblance. Lam. $t \cdot 472$.
277. O. Squarrosa. w. \& a. 404. Rox. Cor. t. 89, Rox. Flora. 2. p. 643. O. lucida. Lam. Illust. $t .472$, f. I.

A small tree with ovate oblong shining leaves, slightly serrated; flowers numerous, yellow: growing in racemes from the branches below the leaves; carpels several; placedin a circle round the base of the style.-Parell road side, Bombay; planted.-grows wild in the Concans.-It is a very handsome tree at all times, but particularly so when in flower, in March and April.
149. GOMPHIA. w. \& A. Decaudria Monogynia.

Gomphos---a club; the fruit is club slraped.
278. G. Angustifolia. w, \& A. 487. Rheed. Mal. 5 t. 48. and 5. t. 32.

Walkera serrata. Dons, syst. 1. p. 817.
A shrub with elliptic oblong shining leaves, and small yellow flowers in terminal racemose panicles.-S. Concan. N.

## ORDER 44. PITTOSPOREA. DC. Prod. 1. p. 345.

150. PITTOSPORUM. Banks. Pentandria Monngynia.

Fitte-resin, sporos-seed; (Mark. C.4.v.26, in allusion to the resinous pulp which surrounds the seed. Gaert. $t .59$.
279. P. Floribundum. w. \& a. 488.

Celastrus verticillata. Rox. Flora. 1. p.624. Senacia Nepaulensis. dc. prod. 1. p. 347.

Yekuddy.-a small tree with elliptic, lanceolate, waved leaves, and dingy white flowers in terminal umbellate corymbs: they appear in Aptil and May; capsule size of a pea; opens from the pointed apex: seeds covered with a reddish resinous substance.-Kaudalla, pretty common:-the Rotanda Ghaut, and table land of Nahableshwur and probably along the range of Ghaut.

Mr. P. scott, C. S. brought capsules of P. undalatum, from N. S. Wales: probably it is identical. Cortcx foetidus, Rumph. Amb. 7. 6. 7. seems to belong to the gewus.--Dr. Royle remarks, that the family is scattered from New Zeyland in the Southern, to Madeira in the Northern hemisphere.

## ORDER 45. CELASTRINE E. Dc. prod. 2. p. 1.

## 151. ELAEODENDRON. w. \& A. Pentandria Monogynia.

Elaia-an olive, dendron-a tree; the fruit somewhat resembles an olive.Gaert. t. 57.
280. E. Roxburgit. w. \& A. 492.
E. Glaucum. Rox. Schrebera albens. Retz. Obs. t. 33.--a shrub, or small tree, with opposite leaves, obtusely serrated.- Drupe round, hard, size of a cherry. -the Sattara and Kamatkee Ghauts; about Hurrychunderjee. (Dr. Gihson.)

This plant requires examination. It seems to differ from Roxburgh's $\boldsymbol{E}$. glaucum, which was introdaced by Mr. Nimmo, from Bengal, in 1833.
159. CELASTRUS. L. Pentandria Monogynia.

Kelas-the latter season; a name applied to certain trees which pere late in ripening their fruit; as the Holly \&c. Gaert. $t$. 95.
281. C. Paniculata. w. \& A. 496. Rox. Flora. 1. p. 621 and C. nutans. Rox. Flora. 1. p. 623.

Kangoonee, Karung-Kangoonee;-a tall scandent marmed shrub, witis small yellow flowers in terminal panicles.-appear in June,-common on the Gbauts and throughout the hilly parts of the Concan; at Mahableshwur. (Dr. Murray.)
282. C. Heyniana. w. \& A. 497.-an unarmed scaudent slirub;-common in the hedges of S. M. Country. (Dr. Lush.)
283. C. Montana. w \& a, 501. Rox. Flora. 1. p, 620.

A thorny shrub, with numerous flexuose branches; leaves smooth obovate, flowers small, whitish, very numerons; growing among the leaves towards the end of the branches; appear in February and March; fruit pear shaped; about the size of a pea.---exceedingly common on Hills in the Deccan where it usurps the place of the Concan Carissa, (Corinda) to which it bears some resemblance.

Gli. Cal. A-5eleft deshiv, wal. Set. hovied or runvol. meat? in thion

284. C, Emarginata. W. \&a. 502.

Yenkul.- a large erect growing shrub, with smooth obovate leaves; young branches armed; flowers from the branches below the leaves; fruit pear ehaped, size of a large pea; of a bright red colour. - common on the Ghauts, also at Mahableshwur.

Perhaps this may be referred to the C. rigida of Wallick, in Flora. Ind. 2. p. 397, or it may prove a new species. It requires examination.

## ORDER 46. RHAMNE E. dc. Prod. 2. p. 19.

## The Buckthorn Tribe. Lind. nat. syst. p. 113.

153. ZYZIPHUS. L. Pentandria Monogynia.

Zizouf-the Arabic name of the Lotus. Gaert. t. 43. Lam. t. 185.
285. Z. Rugosa. w. \& A. 506. Z. latifolia. Rox. Flora. 1. p. 607.

Toorun.-a large straggling thorny shrub, with flowers in terminal panio cles; fruit pear shaped; eaten by the natives; in season April and May.-common on the Ghauts. This is the species referred to by Dr. Gibson, in Bombay Med. Trans. 1. p. 20.
286. Z. Xylopyra. w. \& A. 508.

Gootee. - a small thorny tree, fruit size of a large cherry, round, hard, 3 cel-led.-the Ghauts pretty common---Duddi. (Mr. Law.) The fruit is used by Moochies, for blackening leather, and for making blacking. (Dr. Gibson.)
287. Z. Jujuba. w. \& A. 509. Rheed. Mal. 4. t. 41. Rumph. Amb. 4. t. 36. Ainslie. Mat. Ind. 2. p.94. Wight's Icones, No 5. t. 99. Linn. Trans. 17. p. 211.

The wild Bhere tree.-common almost every where.--very abundant in the Kandesh Jungles, particularly towards the Taptee. (1r. Gibson.)
288. Z. Oenoplia. w. \&a. 511. Rox. Flora. 1. p, 61I. Burm. Zey. t. 61. A thorny shrub; leaves covered with a rusty down beneath:-the Concans.
299. Z. Vulgarıs. Rox. Flora. 1. p. 609. Z. sativa. Gaert. t. 43. f. 4.

The cultivated Bhere. - generally found about old Musselman cities in the Deccan and Goozerat, and probably introduced at the time of the Mahomedan conquest; -fruit oblong; ripens in January. The Teesgaum Bhere, famed in the Deccan, is rather a fine fruit.

A fine gum similar to Kino exists in the inner bark of this genus; it is also found in the bark of Buchanania latifolia. (Dr. Gibson.)

The Lote tree of Mungo Parks Travels belongs to the genus. It is deservedly held in great repute, and is to the Africans what the Date is to the Arabs.

The Greeks gave the name of Lotophagi to a tribe who occupied the modern Kingdon of Tunis. A kind of wine was obtained from the fruit on which Ulysses and his friends made merry. (See the Odssey.) Mahomet has ventured to transplant the Lote tree to the seventh Heaven. (Sale's Koran. C. 53.)
154. COLUBRINA. w. \& A. Pentandria Monogynia.

Lam. t. 129.
290. C. Asiatica. w. \& A. 518. Ceanothus asiatica. Rox. Flora. 1. p. 615. Rheed. Mal. 5. t. 47. Burm. Zey. t. 48 -

Gootee.---a large shrub.-common on Elephanta and the Ghauts.
155. SCUTIA. w. \& A. Pentandria Monogynia.

Scutum---a shield; in allusion to the form of the disk. Gaert. $t, 106$.
291. S. Indica, w. \& A. 517. Rheed. Mal, 5. t. 30. and 31 .

Cheemut.--a tail straggling, armed shrub with small opposite shining leaves; fiowers February and March; in small umbels from the axils of the leaves,very common at Mahableshwnr. (Dr. Murray.) It would form an excellent kedge plant.
156. Ventilago. l. Pentandria Monogynia.

Fentus---the wind, ago---to drive; the seeds are winged and easily carried away with the wind, Gaert. $t .49$.
292. V. Maderaspatina, w. \& a. 514. Rox. Cor. t. 76. Rex. Flora. 1. p. 629. Rumph. Amb. 5. t. 2.

Lokundie. - Kunwail.--a large scandent shrub, with alternate bifarious leaves, and small greenish flowers in terminal panicles; they appear in February and March, and have a very unpleasant smell; capsule size of a small pea, stretching into a long linear membranaceous wing.-Lanowlee grove, Kan-dalla;-on the Ghauts generally. Padshapore. (Dr. Lush.) Cordage is made of the bark. Asiat. Res. 6. p. $352 .--$ Rumphius says, the Amboina fishermen use the flexile stems, instead of ropes.
157. HOVENIA. Thunb. Pentandria Monogynia.

Hoven---a Dutch resident in Japan. Lam. t. 131.
293. H. Dulcis. Rox. Flora. 1. p. 630. Bot. Mag. $t .2360$.

A Chinese fruit tree;---intd. by N. in 1833.

## ORDER 47. SAMYDE Æ. Dc. Prod. 2. p. 47.

## 159. CASEARIA, dc. Octandria Morotynia.

Cusearius-a Missionary at Cochin, who assisted Rheede in the Hortus Malabaricus. Anavinga, Lam. t. 355. Vareca. Gaert. t. 60.
291. C. Ovata. Rox. Flora. 2. p. 420. Rheed, Mal. 4. t. 49. Linn. Trans. 17. p. 224.-a very common shrub, and when out of flower not easily distinguishable from Nerium antidysentericum; flowers in March, small, greenish white; growing in clusters from the naked brauches.
295. C. Esculenta. Rox. Flora. 2. p. 422. Rheed. Mal. 5. t. 50.-a shrub; ---the hilly parts of S, Concan. N.
296. C. - Bocarah.-a shrub;-on the Glauts; has rather a pretty appearance, with its close clustered reddish coloured fruit, about the size of a gooseberry; growing from the branches.

## ORDER 48. TEREBINTHACE Æ. JUSS.

## The Turpentine Tribe.

## Sub-Tribe 1. Anacardeae, or Cassuviae.

159. ANACARDIUM. L. Polygamia Dioecia,

Ana-above, without, Kurdia-the heart:-the heart-shaped uut, contratry to the usual practice of nature, is borne on the outside of the fruit. Lam. t. 332. Gaert. t. 40.
297. A. Occidentale. w. \& a. 522. Rheed. Mal. 3. $t$. 54. Rumph. Amb. 1. $t$ 69. Rox. Flora. 2. p. 312.

Hijulee-badum, Cashew nut.-A small handsome tree; flowers in March and April: small, reddish coloured, sweet scented; in terminal panicles.Malabar and Parell hills Bombay.-Salsette common;-near Damaun. (Dr. Gibson.) erroneously printed Semecarpus in Bombay Med. Trans. 1. p. 18.

The astringent juice of the fruit is said to have a powerful effect in reducing dropsical habits. (Dons. syst. 2. p. 62.)
 Caurte, ince talern. leanes. Inture: chiefg. Jil usu- imijex. Cal. smali prensist wiet 5 or $3-h_{-}-1$ divis. Set $=$ div $o$ cal. perig. dometinses 0. Restiv in bo. Staus $=$ fret. or do uble. Libt: fleshy. Stylil-3-4 Tr. Arupuiot modehis.

1is3. Cal. 5 beaned or 5 harted. Cor. Horshetalled. Germe ICelled iscade Drpe superior Reniform
 alter-hetioled rachived, laneeolute, ontine, firm, snirevite Sherisigy edicles thickish at the buse

A kind of wine is made from the fruit in the West [ndies.
160. SEMECARPUS. L. Polygamia Dioecia.

Semeion-a mark, Karpos---fruit.--the juice of the fruit is used as ink-Lam. t. 208. Gaert. t. 40.
298. S. Anacardium, w. \& a. 523, Rox, Cor. t. 12. Ainslie. Mat. Ind. 2. p. 371. Rox. Flora. 2. p. 83.

Bhela, or marking nut tree.--Flowers in May and June: the juice of the fruit is exceedingly acrid; for the peculiar effects produced by it, applied externally, see cases by Drs. Morehead and Gibson in Bombay Med. Trans. vol. 1:-common throughout the Concans and in Guzerat, whence a considerable qu:ntity of nuts are exported. (Dr. Gibson.) It is one of the commonest trees in Berar (Dr. Smyttan.)
299. S. Cuneifolia. Rox. Flora. 2. p. 86.

Biboo.-a large tree, with cuneate oblong leaves; flowers in Decemher; quite distinct from the lastspecies. It much resembles the Holigarna longifolia, and can only be distinguished from it by the fruit.-Lanowlee Grove, Kandalla.-Jungles about Parr.
161. Holigarna. Rox. Polygamia Dioecia.

Native name adopted by Dr. Hamilton.
300. H. Longifolia. w. \& A. 524. Rox. Flora. 2. p. 80. Rheed. Mai. 4. t. 9. Rox. Cor. t. 282. Mangifera racemosa. Lam. Ency. Meth. Linn. Trans. 17. p. 155.-a large tree also called Biboo;-in the hilly wooded parts of the Concan.
162. BUCHANANIA. Rox. Decandria Pentagynia.

Buchanan Hamilton-the well known author of "Journey in Mysore" \&c.
301. B. Latifolia. w. \& A. 525. Rox. Flora. 2. p. 385.

Lurmzon.--Asiat. Res. 5. p. 123.
Pyal. Char. Charolee.-a large tree; the kernel of the nut is much used in native confectionary, and abounds in a bland oil which may be turned to gome account. The tree is common in the Barria Jungles east of Baroda, and the Bheels dispose of the kernels at the rate of 8 or 10 lbs . per rupec. (Dr. Gibson.) - In the Jungles near Belgaum. (Mr. Law.) Salsette, pretty common. N.
302. B. Angustifolia. w. \& A. 526. Rox. Flora. 2. p. 386. Rox. Cor. t. 262.---a tree with linear oblong leaves.--the Adjunta Jungles.
163. MANGIFERA. L. Polygamia Monoecia.

Mango-fero-to bear mangoes-Lam. t. 138. Gaert.t. 100,
303. M. Lndica. w. \&A. 527. Rox. Flora, 1. p. 642. Rheed. Mal. I. t. l. and 2. Rumph. Amb. 1. t. 25.

Amb. or Amba.--the well known mango tree; grows very common throughout the Concans, and in some places attains a magnificent size.
304. M.Sylvatica. Rox. Flora. 1. p. 644.—near Kennery Caves. (Mr. Vaupell.)
305. M. Opposittfolia. Rox. Flora. 1.p. 640.-native of Burmah. intd. by N, in 1833 .

There is a variety of the common mango tree, or perhaps a distinct species which bears fruit nearly as large as a man's head: the tree grows about Savanoor, in S. M. Country, and in Cannara.

## Sub-Tribe 2 Sumachinez.

## 164. RHUS, L, Pentandria Trigynia.

Roos---red; in allusion to the colour of the leares and fruit of some of the species-Lam. t. 207. Gaert. t. 44.

3i6. R. Lucida. Sprengel gyst. I. p, 937. Pluk, Phyt. t. 219. f. 9.-Shining leaved Sumach:-intd, at Dapooree from the Cape. (Dr. Lush.)
307. R. Parviflora. Rox. Flora. 2. p. 100.

A small tree, intd. at Dapooree from Bengal. (Dr. Lush.)
165. ODINA. Rox. Octandria Tetragynia.

The native name in the south of India, latinized.
308. O. Wodier. w, \& A. 530. Rox. Flora. 2. p. 293. Wight's Icones. Part 3, t. 60.-Rheed. Mal. 4. t. 32.-Royles Illust, Part. 3. t. 32.

Shimtee:-a small tree; leaves deciduous after the rains; flowers very small; growing from the extremities of the branches, in pendulous filiform racemes; fruit kidney-shaped; size of a French-bean.-Malabar hill, Bombay, -Elephanta.-On the Ghauts, pretty common.

## Sub-Tribe 3 Spondiae,-The Hogplum-Tribe.

## 166. SPONDIAS. L. Decandria Pentagynia

Greek name for a plum; which the fruitresembles. Lam. t. 384, Gaert, t. 104.
309. S. Mangifera, w, \& a. 533. Rox. Flora. 2. p. 451. Rheed. Mal. I. t. 50. Rumph. Amb. 1. t. 61.-Asiat. Res. 4. p. 284.-Poupartia mangifera. Don's, syst.2. p. 79.

Ran Amb, Hog plum.-A large tree with pinnate leaves, deciduous in the cold weather; they have a very peculiar smell whell bruized.-Giergaum and Nahim woods, Bombay; probably planted.
310. S. Acuminata. Rox. Flora. 2. p. 453.

Ambut or Ambada---A middle sized, elegant looking tree; leaves pinnate, leafets crenulate, polished. Fruit about the size of a chickens egg; ripens in January, -The Hills near Kennery Caves, not common.
311. S. Dulcis. Rox. Flora. 2. p. 452. S. cytheraea. Sonn. It. 2. p. 123. Gaert t. 103. Lam. t. 384. Rumph. Amb. 1. t. 60.

The Otaheite apple tree---much cultivated in the Society Islands. Intd. by N. from Bengal.

## Sub-Tribe 4 Burseree. Kunth.

167. BOSWELLIA. Rox. Decandria Monogynia.

Dr. John Boswell---of Edinburgh.
312. B. Glabra. w. \& a. 535 Rox. Flora. 2, p. 384. Rox. Cor. t. 207. Ainslie. Mat. Ind. 1. p. 136. Rumph. Amb. 2. t. 50.

Salphullie, or Salai.---a small tree; leaves pinnate, deciduous in the cold weather. Flowers March and April, in terminal racemes; small, white, with a red nectary, and yellow authers--Common on the bare rocky hills of the Deccan; abundant in the Sautpoora Jungles, where the gum may be bought at the rate of 12 lbs . per rupee. (Dr. Gibson.)

This tree grows readily from cuttings. It matters little how large they are,
313. B. Thurifera. w. \& a 536. Rox. Flora. 2. p. 28:3. Colebrooke in Asiat. Res. 9. p. 3i7. and 11, p. 158. and in Linn. Trans. 15. p. 355.

Dup-Salai.-- a tree; leaves pinnate;--S. Concan. N.--Jungles above Rajoor. (Dr. Gibson) Hill of Shendoor in the Chichooree Talook, of the Belgaum Collectorate. (Mr. Law.)

These trees furnish the gum Olibanum of commerce.-the Libaros of the Greeks. (Rev. 18. 13.) Probably Mount Libanon, or the white mountain, took its name from the Frankincense trees which grew on it.

The genus is closely allied to Amyris and Canarium; several of the lattor are figured in the 2d. Vol. of Rumphius Amboina plants.
168. BALSAMODENDRON. Don. Dioecia Octandria.

Balsamon-dendron---balsam tree.

## 314. B. Gileadense, Dou's. syst. 2 p. 81.

Protium gileadense. w. \& A. 543. Vahls symbols 1. $t$, 11. Amyris gileadensis. Rox. Flora. 2. p. 246, The Balessan of Bruce's Travels figured in Vol. \%. 8. 2. and 3. should perhaps be joined: it is at all events closely allied.---Virgil alludes to this slirub in the Ceorgics.
"Solis est thurea virga sabacis;" and it probably furnished the retine mentioned in Genesis 37. v. $25^{\circ}$ (see Septuagint).

Hort. Soc. Gardens. Intd, by Mr. Wathen, C. S. in 1837, from Mecca, under the name of Balsam tree. It is a stunted looking shrub with ternate, and pinnate leaves, and conveys a good idea of the sterile soil of Arabia.
169. GARRUGA. Rox. Decandria Monogynia,

The Teliagi name adopted.
315. G. Pinnata. w. \& a. 539. Rox. Flora. 2. p, 400. Rox. Cor. t. 208. Rheed. Mal. 4. t. 33. Linn. Trans. 17. p. 190.

Kanykur, or Kooruk---a tree: leaves pinnate, deciduous in the cold weather. Flowers of a yellowish white colour; in panicles, which are frequently covered with a mealy kind of substance; fruit size of a gooseberry, good for pickling,---on the Ghauts aud throughout the hilly parts of the Concan. The Cassuo or Banksia Abyssinica of Bruce's Travels 7. t. 22. and 23. seems to be allied to this genus.

## Sub-Tribe 5 Amyridef. dc. prod. 2. p. 81.

170. AMYRIS. Rox. Octandria Monogynia.

A intensitive and Myron, Myrrh---the resinous juice of the trees has a strong balsamic smell. Lam. $t .303$.
316. A. Heptaphylla. Rox. Flora. 2. p. 248.-Colebrooke in Linn. Trana. 15. p. 365.

Karunphul--a shrub with alternate, pinnate leaves, and small yellowish flowers in terminal panicles. The leaves when bruized have the fragrance of fresh Anise seed.

In Mr. Baxter's garden, Tardeo; probably introduced from Bengal.-Dr. Wight refers it to the genus Clausena. Lam. Illust. t. 3lu. (see w. \& A. Prodromus 1. p. 95.)

## ORDER 49. MORINGEA. W. SA. prod. 1. p. $17 \%$.

171. MORINGA. dc. Decandria Monogynia.

The Malabar name. Lam. t, 337. Gaert. t, 147.
317. M. Pterygosperma. w. \& a. 545.

Hyperanthera moringa. Rox. Flora. 2. p. 368. Rheed. Mal. 6. t. 11. Rumph. Amb. 1. t. 74. Asiat. Res. 4. p. 277. Ainslie Mat. Ind. 1, p. 175.

The Horse radish tree. - common about villages all over the country. Oil is obtained from the seeds.--- the unripe legumes make a good substitute for Asparagus. (Dr. Gibson.)

## 318. M. Concanenis. N.

A new species, discovered by Mr. Nimmo in the South Concan.

## ORDER 50. LEGUMINOSAE. DC. prod. 2. p. 93.

The Pea Tribe. Lind, nat. syst. p. 87.
Tribe 1. Papilionaceæ.
Sub-Tribe 1. Sophoreæ.
172. SOPHORA. L. Decandria Monogynia,

Said to be from the Arabic sophero; - the name of a tree with pea flowers. Lam. t. 325. Gaert. 2. t, 149.
319. S. Tomentosa. w. \& A. 548. Rox. Flora. 2. p. 316. Rumph. Amb. 1. t. 22, Bot. Mag. t. 3390 .

A shrub with pinnate leaves, and pretty yellow flowers in terminal racemes; pod necklace-shaped; each bead--like knot containing one seed. Ir gardens, common.
It is a very ornamental plant when in flower.
173. VIRGILIA. Lam. Decandria Monogynia.

The Poet Virgil, who wrote of rural affäirs in his Eclogues and Georgics. Lam. t. 326.•
320. V. Aurea. w, \& a. 549. Lam. t. 326. $f$. 1.

Golden flowered virgilia. - a shrub with large drooping flowers; the bark affords a yellow dye,

In gardens, Belgaum. (Mr. Law.) It is said to be a native of Abyssinia.
321. V. Capensis. dc. prod. 2, p. 98. Bot. Mag. t. 1590. Bot. Rep. t. 347.

A shrub; flowers pink colored;-Dapooree, intd, from the Cape. (Dr. Lush.).

## Sub-Tribe 2, Loteae.

174. HEYLANDIA. dc. Monadelphia Decandria.

Heyland-an Artist, employed by Decandolle.
322. H. Latebrosa. w. \& a, 550. Crotularia uniflora. Rox. Flora. 3. p. 271. Pluk. Alm. t. $454, f .8$.

Herbaceous procumbent plant, with small yellow flowers, and a 1 or 2 seeded legume.-On pasture grounds,
175. CROTALARIA. L. Monadelphia Decandria.

Krotalon-a rattle; (Nubes. 259.) the pods are inflated, and the seeds rattle: when they are shaken. Gaert, $t, 148$. Lam, $t \cdot 617$.
323. C. Anthylloides. w. \& A. 554.

Annual plant;-in the rains pretty common.
324. C. Fulva. w. \& A. 561.

A shrubby plant, common on the Ram Ghaut. (Mr. Law.)
325. C. Ramosissima. w. \& a, 564.

Suffrutescent, spreading; very villous and viscous; common in fields at Nalutwar; stains the fingers of a yellow colour; perhaps it might be used in dyeing. (Mr. Law.)
C. Juncea. w. \& A. 570. Rox. Cor. ${ }^{-t}$. 193. Bot. Mag. t. 490 and 1933.

Sana. Asiat. Res, 4. p, 296. Rox. Flora. 3. p. 259.
Tug, Ambaree-Sun-hemp-annual erect species, much cultivated for the sake of its fibres, of which cordage is made.
326. C. Leschenaultio? w. \& A. 574.

Dingala.-a shrub 3 or 4 feet high; flowers in terminal racemes, large, of a bright yellow; like the broom; they appear in October and November, when it is the greatest ornament of Mahableshwur where it grows common. (Dr. Murray.) On the Ram Ghaut. (Mr. Law.) Perhaps it is a new species.
50. Berta eemesflants, shrubs av trees with. alternate usually compround stifulateleanes. Ir C. hequenth frafietion cecousiand In. leguminoms. Ale peats afy the wonld. Wholesome thvisiondey Cal. 5 pait. tworthed a clefft mitt the odd seg. anter. Det 5 or by.

 lequens oretempe

327. C, Sericea. Ir. \& a 575. Rheed. Mal. 9. t. 26.

Annual erect; flowers in terminal racemes. In pasture grouids, Bombay, during the rains; it has a very different habit from the cultivated Tag, and seems to be a distinct species.
328. C. Retusa. w. \&a. 577. Rox. Flora. 3, p. 272. Rheed. Mal. 9. t. 25. Rumph. Amb. 5. t. 96. Bot. Mag. t. 2561, Bot. Reg. t. 253.
Annual erect branched plant about a foot ligh; flowers in terminal racemes; large yellow.-common in the compounds on Bombay Esplanade, during the cold season.
329. C. Verrucosa w. \& A. 578. Rox. Flora. 3. p. 273. Rheed. Mal. 9. t. 29. Bot. Reg. t. 1137 . Bot. Mag. t. 303 t .

Annual, with pale blue flowers; common in Bombay during the rains. In the Sholapore Listricts. (Mr. Law.)
330. C. Bifaria. w. \& a. 583.

Herbaceous procumbent plant; the Ram Ghaut. (Mr, Law.)
331. C, Linifolia. w. \& A. 589.-at Kandalla.
332. C. Umbellata. w. \& A. 593.-the Ram Ghaut. (Mr. Law.)
333. C. Laburnifolia. w, \& a. 6u2. Rox, Flora. 3. p. 275. Rheed. Mal. 9. t. 27. Burm. Zey, t. 25.

An erect slirubby plant with large yellow flowers.-The S. Concan. N.
334. C. Quinquifolia. w. \& A. 606. Rox. Flora. 3. p. 278. Rheed. Mal. 9. t. 28.

Annual, on the margins of rice fields \&c. during the rains.
335. C. - ?

A new species, discovered on the Ram Ghaut by Mr. Law.
176. SPARTIUM. 2. Monadelphia Decandria.

Sparton-cordage; in allusion to the uses of the plants. Gaert. 2.153.
336. S. Junceum. dc. prod. 2. p. 145. Bot. Mag. t. 85.

Spanish Broom. Hort. Soc. Garden. intd, from Egypt. In Languedoe, thread is made from the fibres of the bark.

## 177. MEDICAGO. L. Diadelphia Decandria.

Gaert. t. 155: Lam. t. 612.
337. M• Sativa. dc. prod, 2. p. 173. English Botany. t. 1749.

Lucern-cultivated in the Deccan for feeding horses; also in Goozerat where it is coming fast into use among the natives as green food for cattle. (Dr. Gibson.)
178. TRIGONELLA. L. Diadelphia Decandria.

Treis-three, gonia-a corner; in allusion to the shape of tho flowersGaert. t. 152. Lain. t. 611 .
33s. T. Foenum-graecum. w. \&a. 610.
Woodville Med. Bot. t. Iós.
Maitee or Meetee-Bajee.-a small annual; commonly cultivated during. the cold season and used as greens by the natives. The seeds are esteemed slightly tonic. (Dr. Gibson.)
179. Méllotus, Tourn. Diadelphia Decandria.

Mel-lotus-houey-lotus; bees are fond of the flowers. Lam. t.613. Tourn.
6. 229.
339. M. Leveantha. w. \&A. 612.

Trifoliun officinale. Var. B. Limn.---white flowered melilot-mative of Europe, in pasture grounds.-Islauds in the Kistua, near Nalutwar, (Mr. Law.)
340. M. Paitiflora. w. \& a. 613.

Trifolium indicum. Rox. Flora, 3. p. 388.--annual.--on pasture grounds \&e. appears in the cold season.
180. Cyamopsis. dc. Diadelphia Decandria.

Kuamos-a bean-opsis-reseınblance; a plant with something of the habit of the common bean.
341. C. Psoraloides. w. \&A. 614.

Dolichos fabaeformis. Rox. Flora, 3. p, 316.
Mutkee.--Gaur or Goor; annual erect plant with small purplish coloured Howers;-cultivated for the sake of the pods, which are eaten like Freuch beans.
181. PSORILEA, L. Decandria Monogynia.

Psoraleos-sorry, scurvy: in allusion to the plants being frequently covered with tubercles. Lam. t. 614. Gaert. t. 145.
342. P. Corylifolia. w• \& A. 616. Rox. Flora. 3. p. 387.

Burm. Ind t. 49.f. 2. Bot. Mag. t. 665.
Bawurcheen.-a commonweed in the Deccan.-also in Bombay.
182. IN DIGOFERA. L. Diadelphia Decandria.

Indigo-fero-to produce Indigo. Lam. t. 6:26. Gaert. t. 148.
343. I. Linifolia, w. \& A. 618. -Rox. Cor. t. 196. Rox, Flora. 3, p. 370.

A small diffuse plant, common on pasture grounds.
344. I. Aspalathoides, w. \& A. 622.

Rheed. Mal. 9. t. 37. Aspalathus indicus. Linn. -a shrubby erect plant with small red flowers.
345. I. Uniflora. w. \& a. 623.

Peremial, with prostrate slender stems. S. M. Country. (Mr. Law.)
346. I. Tinctoria, w. \& A. 633. Rox. Flora. 3. p. 379. Rheed. Mal. 1. $t$, 34. Lam. 1. 626. f. 1. Pluk. Alm. $t \cdot 165 . f$. 5.

Dyer's Indigo; -grows wild insome parts of the Concan. N.
Hitherto the culture of this useful plant has been little attended to in Western India; the climate and soil of southern Guzerat are the same as in Bengal, and if it thrives in the one, it is reasonable to suppose it will also in the other.

It is cultivated to some extent in Scinde where it forms one of the chicf dyes of the country, besides being exported in considerable quautities. (Dr. Burnes, K. H.)
347. I. Pulchella? w. \& A. 635.-I. atropurpuiea? Rox. Flora. 3. p. 381.

Neerda.-an erect growing shrub with long axillary racemes of pretty dark coloured, purple flowers, whichappear in February and March.-at Mahableshwarpretty common.-Perhaps it is identical with I. Atropurea, figured in Bot. Mag. t. 30135 .

It is well worthy of a place in gardens, as an ornamental shrub.
348. I. Trita. w. \& A. 636. Rheed. Mal. 9.t. 36,--herbaceous erect growing plant, with trifoliate leaves.-common.
349. I. Hirsuta. w. \& a. 640. Rox. Flora. 3. p. 366. Rheed. Mal. 9, t. 30. Burm. Zey. ו. 14.-annual erect plantabout 2 feet high, flowers in terminal racemes.-legumes reflexed, hairy.-common every whete in waste places during the rains.-It is particularly abundant on Malabar hill, Bombay.

[^1]83. Cor dufirie, taune. larqe evpoouding undev the wiong aiqumis dightelfubercent / Celled Mrany sceded

3ó1. C. Tekvatea. W. \& A. 611. Rox. Flora, 3. p. 321 . Rheed. Mal. 8. t. 33. Rumpl. Amb. 5. 6. 31. Bot. Mag. t. 1542 . Ainslie. Mat. Ind. 2. p. 139.

A shrubby twining plant; in flower almnst all the year round: there are varieties with blue and white flowers.-In hedges and Jungles every where.in gardens;-of easy growth and well adapted for covering trellis work.-The flowers are used in Amboina to tinge boiled rice a coerulean colour. (Rumphius.)
352. C. Annua. g.

Herbaceons, annual species.-common on Malabar hill \&c. during the rains.
353. C. Vaupelli. G.

A suffruticose, erect growing, much branched species: in Mr. Vaupell's garden, at Bandora.
354. C. Brasiliana. dc. prod. 2. p. 234,-Perennial, scandent, with large white or blue flowers intd, by $N$.
184. PUERARIA. dc. Diadelphia Decandria.

Puerari.-a professor at Copenhagen.
355. P. Tuberosa. w. \& A. 642. Hedysarum tuberosum. Rox. Flora. 3.p. 363.

A twining shrub, with wondy stems, running over high trees; flowers in long simple or branched racemes; of a beautiful bright blue: appear in March and April.-Roxburgh says, cataplasms are made of the large tuberous roots, and used by the natives to reduce swellings in the joints.

On Malabar hill near Walkeshwar village.-in hedges about Matoonga. It has the habit of a Desmodium and should probably be referred to that genus.
185. TEPHROSIA. Pers. Diadelphia Decandria.

Tephros-ash coluured; in aliusion to the colour of the bark and foliago of some of the species-Lam.t. 606. Gaert. t. 145.
356. T. Suberosa. w, \& A. 652. Robisia suberosa. Rox. Flora. 3. p. 327.

Soopee or Sooptee.-a shrub with corky, ash coloured bark, and very beautiful rose coloured flowers, in terminal racemes.-In gardeas Bombay: grows abundantly on the rocky hills to the eastward of Belgaum. (Mr. Law.) The seeds are used to poison fish. It grows abundantly in the Wasua Ghaut. (Dr, Gibson.)
357. T. Candida. w. \& A. 653. Robinia candid, Rox. Flora. 3. p. 327. A shrub.-Dapooree, intd. from Bengal. (Dr. Lush.)
35\%. T. Incana? w. \& A. 659.-A slirubby diffuse plant.-in Guzerat; associated with the next species, butby no means so common. (Mr. Law.)
359. T. Purpurea. w. \& a. 663. Rheed. Mal. 1. t.55. Burm. Zey. t. 32. Anslie. Mat. Ind. 2. p. 49.

Galega purpurea and hancapfolia. Rox. Flora. 5. p. 386.
Wild Indigo;-a shrubby branched plant appearing with the rains and flowering towards the close of them, when it dies away.-common both in the Concan and Deccan, asd particularly abundant about Deesa. (Dr. Brown in Bombay Med. Trans. J. p. 20.2.)

This plant, hut particularly the Cisssia occidentalis, when in progress towards decay, emit a heavy sickening smell.
186. SESBANIA. Pers. Diadelphia Decandria.

Sesban-:he Arabic name.
360. S. Aegyptiaca. w. \& A. 667. Aeschynomene sesban. Rox. Flora. 3. p. $333^{2}$. Rbeed. Mal. 6. t. 27. Asiat. Res. 4. p. 297.

Wight's Icones. part. 2. $t$. 32.

Shewaree. -a small tree of very quick growth; flowers dark gurple, with yellow spots; in axillary pendulous racemes. It is cultivated and extensively used in the plain parts of the Decc.m as a substitute for the Bamboo. (Dr. Gibson.)
361. S. Aculeata. w, \& a, 668. Coronilla aculeata. Willd, Jacq. Ic. Rar. ง. $t .564^{-}$

A large erect growing annual, 8 or 10 feet high; stem smooth, woody, with a reddish bark; leaves pinnate, with many pairs of leafets.-common during the rains. It is a graceful looking plant.
362. S. Procumbens. w. \& a. 670.

An annnal straggling plant; grows most abundantly on rice fields in Bombay during the rains; cattle eat it.
187. AGATr. Adans. Diadelphia Decandria.

The native name adopted.
363. A. Grandiflora. w. \& a. 671.

Aeschynomene grandifora, Rox. Flora. 3. p. 331. Rheed. Mal. 1. t. 51. Ramph. Amb. 1, t, 76 and 77.

A very common tree of rapid growth, generally found in the neighbourhood of temples and villages. It is cultivated for the sake of its large flowers and pods, both of which are eaten by the natives. There are varieties with white, variegated and red flowers,

## Sub-Tribe 3. Hedysaref.

188. ZORNIA. Gmelin. Diadelphia Decandria.

Zorn-a Continental Botonist.
364. Z. Angustifolia. w• \& A. 673. Hedysarum diphyllum. Rox. Flora. 3. p, 353. Rheed. Mal. 9. t. 82,

Annual diffuse plant, with lanceolate leaves in pairs.-common in the rains.
365. Z. Zeylonica. w. $1 \&$ a. 674. Burm. Zey. t. 50. f. I. Hedysarum conjugatum. Willd, Rheed. Mal. 9. t. 83.

Annual; common in the rains.
189, GEISSASPIS. w. \&. A. Diadelphia Decandria,
366. G. Crist+ta. w. \&. A. 675.

Anuual; on rice fields, Bombay. N.
190. ASCHYNOMENE. L. Diadelphia Decandria,

Aischuno - to be ashamed; in allusion to the leaves shutting up like those of the sensitive plant. Lam, t. 629. Gaert. t. 155.
367. R. Indica, w, \& A. 679. Rheed. Mal. 9. t. 18.

Annual; common in the rains.
191. SMITHIA. Ait, Diadelphia Decandria.

Sir J, E. Smith-Founder of the Linnean Seciety, author of English Flora: \&c. Lam, $t .627^{\circ}$

368, S. Sensitiva. w, \& a, 683. Rheed. Mal.9. t. 38.
A small annual with pinnated leaves;-common in Bombay towards the close of the rains.
369. S. Racemosa? w. \& a 684.

Near Belgaum. (Mr. Law.)
370. S. -_?

A large species, growing to the height of 2 or 3 feet; near Belgaum, (Mr. Law.)
192. LOUREA. Neck. Diadelphia Decaudria,
371. L. Vespertilionis. w. \& A. 685. Hedysarum vespertilionis, Rox. Flora. 3. p. 352 Jacq. Icones. Rar. 3. t.566.-annual erect, with simple and teruate leaves, crescent shaped. N .

But-wing leaved Lourea.
193. URARIA. Desv. Diadelphia Decandria.
372. U. Picta. w. \& A. 688. Doodia picta. Rox. Flora. 3. p. 368. A shrubby erect plant with long terminal racemes of small red flowers.-Dapooreeintd. from Bengal. (Dr. Lush.) common in the districts south east of Surat. (Mr. Law.)

## 194. DESMODIUM. DC. Diadelphia Decandria,

Desmos-a band; in allusion to the conmected stamens. Desv. Journ. Bot, 3. t. 5. f. 15. and 22.
373. D. Umbella tum. w. \& A. 692. Burm. Zey. $t$. 51. Rumph. Amb. 4. f. 52.

A shrub, leaves trifoliate; flowers somewhat umbellate; white-Districts south east of Surat; near Belgaum; always grows on the banks of streams, (Mr. Law.)
374. D. Triquetrum. w. \& A. 695. Burm. Zey. $t, 81$. Burm. Ind. $t, 52$. f. 2. Hedysarum alatum. Rox. Flora. 3. p. 348.

A shrubby hranched plant; flowers in August and September; small, violet coloured.-Malabar Hill.-Salsette, \&c. common: it is easily recognized by its triangular stems and wiuged petioles,
375. D• Latifolium. w• \& A. 696. Hedysarum latifolium. Rox. Flora. 3. p. 350, Pluk. t. 432. f. 3. Bot. Reg. t. 356.

Shrubhy; racemes terminal and axillary; flowers purple.-hilly parts of the Concan.
376. D. Gangeticum. w. \& a. 697. Pluk. t. 50.f. 3. Hurm. Zey, t. 49. Shrubby, with angular stems, and simple leaves; flowers violet coloured, in axillary and terminal racemes.-Malabar hill \&c.-common in the rains.
377. D. Recurvatum? w. \& a. 700. Hedysarum recurvatuin. Rox. Flora. 3. p. 358.

Juagly ganga,-a shrubby plant: leaves trifoliate; flowers in August aud September, purple and white; in long axillary and terminal racemes.-on the Ghauts common;-when in flower, it is a very urnamental shrub.
378. D. Gyrans. w, \& a. 701. Hedysarum gyrans, Rox. Flora. 3, p. 351. Jacq. Ic. Rar. $t$, $\mathbf{0 6 7}$,-a curious suffruticose plant, with simple and ternate leaves; flowers pale yellow, tinged with blue. -the lateral leafets have the singular power of voluntary motion--intd. by N . from Bengal, where it is indegenous.
379. D. Polycarpum. w \& a. 703. Hedysarum purpureum. Rox. Flora. 3. p. 355. Lam, t. 628.f. 4. Pluk t. 433.f. 3.

A suffruticose plant with purple flowers.-the Ram Ghaut. (Mr, Law.)
380. D, Triflorum. w. \& A. 706. Burm. Zey. t. 54.f. 1 and 2. Hedyansum reptans. Rox. Flora. 3, p. 354.

A procumbent, diffuse plant, with trifoliate leaves.-common in the rains,
195. HEDYSARUM. dc. Diadelphia Decandria.

Herlys-sweet, aroma-perfume.
38 I . H. Gibsoni. g.
Herbaceous; stem round, slightly furrowed; leaves simple, alternate; flowers axillary, 2 or more on a common peduncle: legume jointed; covered with
bristles, 2 seeded.- the margins of rivers and streams in the Deccan; the roots appear to possess the same properties as the common liquorice, and may form a good substitute. (Dr. Gibson.)

## 196. ALHAGI. Tourn. Diadelphia Decandria.

The Arabic name altered.
382. A. Maurorus, iv. \& a. 714. Manna Hebraica. Don. Hedysarum alhagi. Rox. Flora. 3. p. 344.

Jowasse -shrubby; leaves obovate; flowers purple; common in Guzerat and S. M. Country. (Mr. Lawr.) native also of Egypt, Syria, Mesopotamia \&c. The Hebrew or Persian Manna exudes from its leaves and branches. In the hot season when almost all the smaller plants die, this sends forth leaves and flowers. (Dr. Gibson.)
It is also found throughout Scinde. (Dr. Burnes. K. H.)
197. ALYSICARPUS. dc. Diadelphia Decandria.

Alysis-a chain, Karpos-fruit; the legume is composed of several 1 seeded joints.
383. A. Nummularifolius. w. \& a. 716. Burm. Zey. t. 49. f. 1.

A shrubby plant; common in cultivated places; flowers purple.
384. A. Bupleurifolius. w. \& a. 718. Hedysarum bupleurefolium. Rox. Cor. t. 194. Bot. Mág. t. 1722.

Suffruticose; leaves linear lanceolate, flowers red in terminal spikes.
Hare's ear leaved Alysicarp.
385. A. Styracifolius. w. \& a. 720.

Slirubby; flowers in terminal spikes; red ; appear in September and October.
386. A, Belgaumensis. Wight Icones. No. bt. 92.

A new species, discovered by Mr. Law on the Ram Ghaut; flowers in September.

## Sub-Tribe 4. Viciae.

198. CICER. Tourn. Diadelphia Decandria.

Kikus-strength; in allusion to the nourishing properties of the pulse. The Roman Family of Ciceros probably derived their name from it. Gaert t. 121. Lam. t. 632.
387. C. Abietinum, w. \& a. 723. Rox. Flora. 3. p. 324. Bot. Mag, t. 2274. Chickpea, Hurburvee.-Chunna.-Gram.-extensively cultivated in some parts of the Deccan and Goozerat for feeding horses with-Nothing looks more heautiful than a luxuriant field in full blossom, glistening with dew.
Dr. Christie in Madras Journal of Science, No. 13. mentions that an acid (oxalicacid.) exudes from all parts of the plant, which is collected by the liyots and usedin their curries instead of vinegar.
199. ERVUM. L. Diadelphia Decandria.

Said to be derived from a Celtic word, signifying tilled land. Gaert. $t$. 151. Lạ. t. 634.
388. E. Lens. w. \& a. 724. Cicer lens. Rox. Flora. 3. p. 324.

The Lentil or Mussoor:-commonly cultivated. It was known to the Greeks by the name of Fhakos, and has been in estimation as a pulse ever since the days of Esau. (See Genesis C. 25, v. 24. Septuagint Version.)
200. PISUM. L. Diadelphia Decandria.

From the Celtic, for a pea. Gaert. t. 152. Lam, t. 633.
389. P, Sativum: dc. prod, 2. 368.

Common pea;--cultivated in gardens, during the cold season. Its native counry is unknown.

04kod hith the dianima bityle apirally tivisted

Hullounda.-a perennial twining plant, with large violet or purple coloured: flowers, which appear in the rains.-common throughont the Concans. The natives eat the tuberous roots.

## 398. P, Caracalla, dc. prod. 2. p. 390, Bot. Rep. $t .341$.

The Snail plant.-has flowers much like the last species, intd. at Goa by the Portuguese; in gardens Bombay, not common.
399. P. Trinervius. w. \& a, 755. Rheed. Mal. S. t. 37.

A twining plant, with trifoliate, hairy leaves, of rather a hard texture; flowers yellow; appear in August and September; legume hairy.-common during the rains.
400. P. Mungo. w. \& A. 756. Rox. Flora. 3. p. 292. Rheed. Mal, 8, t. 50.

Oorced. Moong. Oolandoo.-several varieties are commonly cultivated all over the country. It is a most useful plant to the natives.
401. P. Trilobus. w. \& a. 760. Pluk, Alm, t. 120. Burm. Ind, $t, 50, f .1$. Ainslie, Mat. Ind. 2. p. 434.

Flowérs small, yellow; in heads.-common in the Deccan. (Dr, Lush.)
402. P. Aconitifolius. w, \& A. 761. Rox. Flora. 3. p. 299. Jacq. Obz. 3. $t .52$.

Mut.-cultivated in the Deccan and Goozerat.
403. P. $\qquad$ ?

A species on the Ram Ghaut, with large flowers. (Mr. Law.)
404. P. Hirtus. Sprengel syst. 3. p. 254.

Flowers purple, fragrant. intd. by N.
205. SOJA, w. \& A. Diadelphia Decandria.

Sooja-name of a Chinese sauce prepared from the seeds.
40ã. S. Hispida. w. \& a. 762. Dolichos soja, Rox. Flora. 3. p. 814. Jacq. Ic, Rar. $t .145$.

An annual, hairy plant; flowers small, of a reddish purple; in gardens. In Japan the seeds are called Miso, and are commonly eaten in soups. (Don.)
206. DOLICHOS. L. Diadelphia Decandria.

Greek, for long,-tedious: (Odys, ) name given in allnsion to the habit of the plants, sending forth long shoots. Gaert. t. 150. Lam. t. 610.
406. D. Uniflorus. w. \& A. \%66. Pluk, t. 213. $f$. 4.-D. bifiorus. Rox. Flora. 3. p, 313.

Kooltee.-cultivated in the Deccan. (Dr. Lush.)
407. D. Falcatus. w. \& a. 768. Rox. Flo ra. 3. p. 311.

Flowers of a blueish purple colour, appear in the cold weather.-in hedge \& c. common.
408. D. Sinensis. w, \& A. 771. Rumph, Amb. 5. t. 134. Rheed. Mal. 8, $t$. 41. Bot. Mag. t. 2232. Rox. Flora. 3. p. 302.

S'uffeed lobeh. Hurreu lobeh, Choulee.-commonly cultivated.
207. LABLAB. w. \& A. Diadelphia Decandria.

Gaert. $t$, 150 .
Said to be the Arabic name for Convolvulus, with which this genus has no affinity whatever, except in its twining habit.
409. L. Vulgaris. w. \& a, 772.-Dolichos lablab. Rox. Flora. 3. p. 305. Rumph. Amb. 5. t, 136. 137, 141•Bot. Mag, t. 896. Wight's Icones. Part. 3. t. 57.

Saim ka puttee.-commonly cultivated. There are several varieties.
208. PSOPHOCARPUS. Neck. Diadelphia Decandria.

Psophos-a sound, and Karpos, fruit;-the seeds rattle in the pods wher shaken.
410. P. Tetragonolobus. w. \& a. 776. Dolichos tetragonolobus. Rox. Flora. 3. p. 305. Rumph. Amb. 5. t. 133.

Chandaree. Charputtee, Chevaux de Frize-Bean, so named from the pods having 4 membranaceous angles, with jagged edges. In the Mauritius where it is indegenous, it is called Pois carré. - commonly cultivated in gardens and used like French-beans.
209. CANAVALIA, w. \& a. Diadelphia Decandria.

The Malabar name of one of the species.
411. C. Gladiata. w. \& a. 777. Rheed. Mal. 8.t. 44. C, ensiformis. Don's, syst. 2, p. 363. Rumpls. Amb. 5. $t$. 135, f. 1. Dolichos gladiatus, Rox. Flora 3. $p .300$.

Commonly cultivated. There are varieties with red and white flowers. The half grown pods are eaten like French-beans.
412. C. Virosa. w. \& A. 778 . Rheed. Mal. 8. $t, 45$. Dolichos viroens. Rox. Flora. 3. p. 301.

Biemial, twining; flowers large, of a beautiful colour, between rose and purple.-common in liedges and jungles; in flower a great part of the year. It is reckoned a poisonous plant.
413. C Obtusffolia. w. \& A. 780. Rheed. Mal. 8. t. 43. Pluk. t. 51. f. 2. Dolichos rotundifolius, Rox, Flora. 3. p. 302.-the Concans.
210. MUCUNA. w, \& A. Diadelphia, Decandria.

The Brazil name of one of the species.
414. M. Monosperma. w. \& a 781. Wight's Icones, Part 2. t. 35. Carpo pogon monospermum. Rox. Flora. 3. p. 283.

A large perennial twining plant; produces the Brahminee vegetable called Negro Bear. (Dr. Lush.)
415. M. Atropurpurea. w. \& A. 782, Carpopogon atropurpureum. Rox Flora. 3. $p \cdot 287$.

Legume curiously plaited; armed with stinging hairs.-S. Concan. N.
4i6. M. Gigantea. w. \& a. 783. Rheed, Mal. 8. t. 36. Carpopogon giganteum. Rox. Flora. 3. p. 286. Rumph. Amb. 5. t. 6.

A large perennial twining plant with sulphur coloured flowers, in pendulous umbels;--the Concaus. N.
417. M. Prurita. w. \& a. 785. Rheed. Mal. 8. t. 35. Rumph. Amb. $5 \cdot$ t. 142. Carpopogon pruriens. Rox. Flora. 3. p. 283. Ainslie Mat. Ind. 1. p. 93. Cowi tch.-annual, twining, with pendulous racemes of dark coloured flowers, which appear in the rains. Pod shape of the letter $S$, clothed with stinging hairs. One of the commonest plants in hedges and jungly tracts during the rains.
418. M. Gibsonir. g.--Scandent; flowers deep blue, in racemes going off at right angles to the stem.-On the road between Trimbuck and Wadewara. (Dr. Gibsom.)
211. PACHYRRHIZUS. Rich. Diadelphia Decandria.

Pachys--thick, and rhize, a root: in allusion to the thick tuberous roots of the plants.
419. P. Angulatus, w. \& a. 774. Dolichos bulbosins, Rox, Flora. 3. p. 309. Rumph. Amb. 5. t. 132. Pluk Alm. t. 52.f: 4.

A twining plant; flowers of a beantiful blue violet colour; in long axillary racemes.
212. CAJANUS. DC. Diadelphia Decandria.

Amboina name, Catjang.-Lam. $t .618$.
420. C. Indicus. w. \&. A. 789. Cytisus cajan. Rox. Flora. 3. p. 325. Rheed. Mal. 6. t. 13.

The Pigeon Pea, Toor, Dhal.-a shrub; leaves trifoliate, flowers yellow.commonly cultivated; the seeds are generally suwn in rows among different kinds of grain. In the West Indies it is uscd as a fence for Sugar plantations.
213. atylosia. w. \& a. Decandria Monogynia.
421. A. Lawi. Wight's Icones. No. 5. t. 93.

Ran-toor-a shrubby plast with trifoliate leaves, and small yellow flowers. -common at Nahableshwar, and along the line of Ghauts.
214. CYLISTA, w. \& A Diadelphia Decandria.

Kylix. -a calyd; in allusion to the large scarious calyx.
422. C. Scariosa. w. \& a. 796. Rox. Cor. t, 92, Rox. Flora. 3. p. 320.

Ranguera, - perennial, twining plant, with woody stems;---flowers December and February; yellow; almost hid in the large curious shaped calyx.--common on the Ghouts and hilly parts of the Concan.---grows abundantly in Keunery Jungles, Salsette.
423. C. Tomentosa. Rox. Flora. 3. p. 319, Rox. Cor, t. 221. Cyanospermum tomentosum. w. \& A. 797, iutd. by N. from Bengal.
215. ERYTHRINA. L. Viadelphia Decaudria.

Enythros--red; the flowers are of a very brilliant red colour, and the name is given par excellence, on this account. Lam. t.605.

424, E. Indica. w. \& A. 793. Rox. Flora.3. p. 249. Rheed. Mal. 6, t. 7. Rumph. Amb. 2. t. 76.

Kuara?-Bruce's Travels. 7. t. 19. Wight's Icones. part 3. t. 5S
Pangara. - Indian Coral tree.-A middle sized tree, trunk and branches armed with black prickles; leaves ternate, deciluous after the rains. Flowers in March and April; in terminal horizontal ratemes; of a bright scarlet colour. In the Deccan this tree is generally used as a prop for Vines.--It grows common throughout the Concans.

Bruce says, the seeds of kuara, which is perhaps identical, have been used. from the earliest ages as a weight for gold --hence "Carat."
"Thou best of gold, art worst of gold;
Other, less fine in carat is more precious,"
Shakespeare.
425. E. Suberosa. w. \& a. S00. Rox. Fiora. 3. p. 253.

A tree, with light coloured, deeply cracked, corky bark; flowers at the same period with the last species --pretty common in the Mahal districts east of the Ghauts,--in Goozerat. ( Dr. Gibson.) Kandesh. (Lt. Auld.)
426. E. Siricta. w. \& A. 799. Rox. Flora, 3. p. 251.-a tree, completely armed with strong prick!es; trunk branches, and leaves.--Elephanta.--on the Ghauts.--not very cominon.

## Sub-Tribe 6. Dalbergeae.

216. BUTEA. Rox. Diadelphia Decandria.

John, Earl of Bute,---a Patron of Rotany.
427. B. Frondosa. w, \& a. s(12. Rheed. Mal. 6. t. 16 abd 17. Rox. Cor. t. 21. Rox. Flora. 3. p. 244. Ainslie. Mat. Ind. 2. p. 335.

Erythrina monosperma. Lam. Ency. Meth.
Pullus.-Kukria, Guz, also called Bastard Teak;-a large tree, flowers in February and March; in large axillary and terminal racemes, closely clustered; of a beautiful deep. red, shaded with orauge, downy, they are used to dye with, and also applied as a discutient to indolent tumours; a powder prepared from them enters into the composition of "Goolal."

Conmon both in the Concans, Kandesh and Goozerat; it is one of the few trees which thrives on black soil. (Dr. Gibson.)

Malasi.-Asiat. Res, 3 p. 469 and 4. p. 2.29.-a venerable and holy tree; gave its name to the celebrated plain of "Plassey" in Bengal.
428. B. Parviflora. w. \& a. 804. Rox. Flora. 3. p. 248.

A large scandent shrub, running over high trees; -flowers small white--Hilly parts of the Concan; - not commou. One grows over the Well at the bottom of the Nagotnab kind. When out of flower it much resembles B. superba. Rox. Cor, l, t. 22.
215. Cal. bilabiate. Corv with the staudaral much larye lean the Smale bruqs t keel. degume fedies leed, torave +24. Cul thathineernd aheq emtineled Storched. Keel 2 hot. like the onnus. Sogume cesfidate veryphotuberact at the

Temees -a tree; leaves temate, flowers small white, sonething like those of the Farunj.-common in the Buglana Jingles, ano abont Jooneer; carpenters prefer it to all other woods, for works requiring towghess of tibre; as shafts for gigs ©c. A few trees grow near Yelloo, on the road betiveen Poona and Mahableshwur.
217. PONGAVIA. Lam. Diadelphia Decandria.

Pongam-the Malabar name. Lam. t. 603.
430. P. Glabra. w. \& A. 805. Rheed. Mal. 6. t. 3. Dalbergia arborea. Willd. Galedupa Indica. Rox. Flora. $3 \quad p, 239$, Asiat. Res, 4. p. 3un. Wight's Icones, Part 3. t. 59. Ainslie Mat, Ind, 2, p. 332.

Karurj.-a large tree with light green foliage like the Beech. Flowers in April and May. Oil is made from the seeds;-very common throughout the Concans; also near rivers in the Deccan, (Dr. Gibson.)

Buchanan calls it Robinia mitis, and says, it flourishes equally on the arid hills of the Carnatic, and the muddy banks of the Gauges.
431. P. Uljginosa. w. \& A. 807. Galedupa uliginosa. Rox. Flora. 3. p. 243. Rheed. Mal. 8, t. 46.

A twining shrub with rather pretty rose coloured flowers, in axillary racemes. - the sea shores on the verge of high water mark. - near the "Wilderness," Bombay.-east side of Neats Tongue, Salsette.

## 218. DALBERGIA. L. Diadelphia Decandria.

Dalbergh.-a Swedish Botanist.
432. D. Scandens, w. \& a. 812. Rheed. Mal. 6. t. 22. Rox. Cor. t. 19. t. 192. 2. Rox, Flora, 3. p. 2:32.

A very beautiful scandent shrub, with dark green polished leaves, and long drooping racemes of light rose coloured flowers;-they appear in the rains; this shrub is well adapted for covering trellises; it looks pretty at all times.common throughout the jungly tracts of the Concan; also in the Mawul districts. (Dr. Gibson.)
433. D. Sissoo. w. \& a. 81.3. Rox. Flora. 3. p. 223.

Sisso tree,-common in Kennery Jungles.--hills about Nagotnah.--in Coozerat. (Dr, Gibson.)
434. D. Latifolia, w. \& a. 814. Rox. Flora. 3. p. 221. Fox. Cor. t. 113. The Blachoood tree, used for making furniture.--S. Cuncan.--hanks of the Kalinadi river, S. M. Country. (Mr. Latv.)
435. D. Volubilis, w, \& a. 818. Rox, Flora. 3, p. 231. Rox. Cor, t. 191.

Scandent shrub.--hills about Nagotnah.--The plant here referred to, requires examination.
436. D. Paniculata. w. \& A. 819. Rox. Flora. 3. p. 227. Rox, Cor, t. 114. Passee.-alarge and useful tree; pretty common in the Mawul districts, above the Ghants. (Dr. Gibson.)
437. D, Frondosa? w. \&. A. 820. Rox. Flora. 3, $p, 266--a$ tree; on the Ghauts, has somewhat lance shaped leafetslike Rheede's Figure of D. scandens; legume thin; 2 seeded.--the Lulling pass, Kandesh, (Dr. Gibson.)
438. D. Sympathetica. N.

Ana Mullu--Rheed. Mal, 8, t. 40.
Pentgool, or P'endiool. - a very large scandent shrub, running over high trees; the trank is armed with strong blunt thorns, growing in clusters, from 0 to 10 incheslong, and sometime beautifully curved;-the foliage resemble
that of the Tanwind tree. - Common on the Girmts: when no apport is near, it forms large striggling shrab. Whowersin Febramy and Mareh

Some very large plants of it grow in a wonded ravine near Parr.
219. PTEROCARPUS, L. Diad elphia Decandria.

Pteron.-a wing-karpos-fruit; the fruit is girt round with a wing. Lom. 6. 602. Gaert. $t$. 156.
439. P. Marsupium. w. \& a. 823. IRox. Flora. 3. p. 23 t, Rheed, Mal. 6 t. 25. Rox. Cor. $t$. 116.
Bewba, Bin, or Beebla.-a cree with pinnate leaves and white flowers in terminal panicles.-Common in some parts of the Concans.-Rajpeepla Jungles. (Dr. Lush.)
rihe bark and leaves afford Gum kino, exported in considerable quantities from Malabar. (Dr. Gibson.) The best Kino is obtained from the Nauclea Gambir. N.

The Dragon's blood tree of the West India 1slands belongs to this genus.It is said also togrow on Socotra Island, but this is doubtful.

Tribe 2. Mimoseae.

## Sub-Tribe 1. Acacieae.

220. ENT ADA. w. \&. A. Polygamia Monoecia.

The Malabar name. D. C. Mem. Legum. 12,
440. E. Pusaetha, w. \& A. 826. Rheed. Mal. 8. $t .32,33$ and 34 , and $9 . t$. 77. Rumph. Amb.5.t.4. Ainslie Mat. Ind. 2. p. 107 -Mimosa scaudens. Rox. Flora. 2. p. 554 . A cacia scandens. Willdenow.

Garbee, or G'ardul. - an immense climbing shrub, running over the highest trees, and forming elegant festoons: legumes from 1 to 3 feet long, and 4 or 5 inches broad, formed of a series of joiuts, each containing one seed.-Lanowlee grove, near Kandalla.-along the range of Ghauts pretty common:-at Wanjura in Bamsari, one grows with a stem full 6 feet in circumference, and runs over trees to a great aistance. (Dr. Gibson.)

The seeds are used as an antifebrile medicine by the Ghaut people. (Dr. Gibson.)

In Java and Sumatra they-are roasted and eaten like chesnuts. (Rumphius.)
221. MIMoSA. W. \&A. Polygamia Monoecia.

Mimos-a mimic ; in allusion to the sensitive properties of the leaves. Gaert. t. 155.
441. M, Pudica. Rox. Flora. 2. p. 564. Bot. Rep. t. 544.-Lajuck or Lajalu.
The sensitive plant; well named Aischynomene, by the Greeks-in gardens common.
442. M. Hamata. w. \& A. 827. -an armed shrub with curved legumes, common about Surat. (Mr. Latw.)
443. M. Rubricaulis. w. \& A, 828.-M. Octandra. Rox. Flora. 2. p. 564. Rox, Cor, $t .200$. - A large straggling shrub, well armed.-Malabar hill \&c. common; flowers in the rains; legumes prickly.
222. INGA. w. \& A. Polygamia Monoecia.

The South American name of one of the species.
444. 1. Dulcis. w. \& A. 829. Mimosa dulcis. Rox. Flora. 2, p, 556. Rox. Cor. $t .99$.
A large and handsome tree, with drooping branches, armed with short straight thorns. Pods curiously twisted, filled with a sweet firm pulp, which forms a very nourishing food.-common about Bombay, in Nesbit Lane \&c. probably introduced from the Eastern Islands, of which it is a native.

$\frac{8}{8}$
$\pi^{m}$
\&45. I. Xylocarpa. w. \& a. 831. Rox. Flora. 2. p. 543. Rox. Cor. 1, $\boldsymbol{k}$, 400. Don's. syss. 2. p. 363.

Jamba.-an unarmed tree; flowers in May.-Legumes falcate; very hard and woody.-the hilly parts of the, Concan.-Parr Ghaut \&c.-Roxburgh says, the timber is servicea ble for ship building.
446. I. Bigemina. w. \& A. 833, Rheed. Mal. 6. t. 12. Don's. syst. 2. p. 394, Mimosa lucida. Rox. Flora. 2. p. 544.
A tree with bipinnate leaves and spirally twisted legumes.-the Concans. N .
223. PARKIA. Br. Monadelphia Decandria.

Mungo Park, the celebrated Traveller in Aftica.
447. P. Biglandulosa. w. \& A. 865.

Chendoo-phool-A very elegant tree; the flower buds resemble balls of red velvet; legumes filled with a farinaceous edible pulp. One tree grows in the neighbourhood of Belgaum, which has probably been planted. (Mr. Law.) in a garden at Kurmulla. (Dr. Gibson.)

The Nitta tree of Parks Travels, is a closely allied species, if notidentical.
224. DESMANTHUS. w. \&A. Polygamia Monoecia.

Desme-a bundle-anthos-a flower; in reference to the mode of growth.
448. D, Natans. w. \& A. 835. Rheed. Mal. 9. t. 20. Rox. Cor. t. 119. Mimosa natans. Rox. Flora. 2. p. 553.

Anmual, aquatic, with jointed flexuose piped stems.-Tanks throughout the Concan. N.
449. D. Triquetrus. w. \& A. 836. Mimosa triquetra. Rox. Flora, 2.p. 552. Pluk. t. 307.f.4.-biennial, prostrate plant_--common about Surat. (Mr. Law.)
225. DICHROSTACHYS. dc. Polygamia Monoecia.

Dis-two-chroma---a colour--the spikes of flowers are of two colours.
450. D. Cinerea. w. \& A. 838. Mimosa cinerea. Rox. Flora. 2. p. 561. Rox. Cor. t. 174. Burm. Zey. t. 2. Ainslie Mat. Iud. 2. p. 458.

An armed shrub with flowers in cylindric spikes, one half of which is yellow, the other white or rose coloured.--Common on the sterile plains of the Deccan;--flowers in the rains.--This is rather a pretty shrub.
226. ADENANTHERA. l. Decandria Monogynia.

Aden--a gland, and anther;--the anthers are tipped with deciduous glands. Lam. t. 334. Gaert. t. 149.
451. A. Pavonina. W. \& A, 839. Rox. Flora. 2. p. 370. Rheed. Mal. 6. t. 14. Rumph. Amb. 3. t. 109.

All unarmed tree; flowers small white; in axillary and terminal racemes.-The seeds are of a bright scarlet colour, and are worn by women as beads; they are also used as weights;--the wood yields a dye which is used by the Brahmins for marking their foreheads "Runjuna":--(Dr. Gibson.) The late Col. Hough's garden, Colabah; Bycullah and Girgaum gardens.--grows wild in some parts of Guzerat and Kandesh.
227. PROSOPIS. L. Polygamia Monoecia.

Prosopon--a mask--applicatiou of the name unknown--Lam. t. 340.
452. P. Spicigera. w. \&a. 840. Adenanthera aculeata. Rox. Flora. 2.p. 37 ı. Rox. Cor. t. 63.--Asiat. Res. 4. p. 405.
A tree with bipinnate leaves; flowers in axillary spikes; small yellow; pods round, pendulous, filled with a brown mealy substance like the Locust tree of the Levant.-common in Guzerat, where it grows to a large size. (Mr. Law.)
229. VACHELLIA.w. \& A. Polygamia Monoecia.

The Revd. G. H. Vachell, residing in China.
453. V. Farnesiana. w. \& a. 841. Pluk. t. 73. f. 3. Asiat. Res. 4. p. 307. Mimosa farnesiana. Rox. Flora. 2. p. 557.
A shrub with bipinnate leaves and turgid legumes, containing two rows of seeds.--very common in the eastern parts of the Deccan; it exudes gum like Acacia Arabica. (Dr. Gibson.) grows abundantly throughout Sicinde. (Dr. Burnes, K. H.)
229. ACACIA. w. \& A. Polygamia Monoecia.

Akadzo-to sharpen; in allusion to many of the species being armed with spines. Lam. t. 846.
454. A. Catechu. w. \& a. 842. Ainslie Mat. Ind. 1. p. 63. Mimosa catechu. Rox. Flora. 2. p. 562.
Kair or Khadera.-a small armed tree, flowers in the rains; white; in long axillary spikes.-common on the hills about Vear, Salsette; and in some parts of the Northern Concan.

This and some other species or varieties furnish Kult or Terra Japo-nica---An account by Major Mackintosh, of the Madras Army, of the curious tribe of people called Kuttoorees, will be found in the Proceedings of the Bombay Geographical Society, for May 1838.
There is a variety or distinct species in. Dapooree Garden with white bark, and another with a narrow legume;-common in Kandesh. (Dr. Gibson.)
455. A. Latronum. iv. \& a. 845. Mimosa latronum. Rox. Flora. 2. p. 559.

A shrub, armed with very large white thorns united at the base.---common in the barren tracts of the Deccan.---Willdenow calls it "frutex horridissi-mus"---the thorns entitle it to such distinction.
456. A. Modestan. Wall. Pl. Asiat. Rar. t. 130.

A shrub.---Hort. Soc. garden, intd from Bengal. The foliage has something the appearance of that of the Horse Radish tree. (Moringa.)
457. A. Stipulata. w. \& a. 847. Mimosa stipulacea. Rox. Flora. 2. p. 549.

A tree, unarmed; has large semicordate stipules by which it may easily be recognized; flowers in April and May, of a pink colour; rather pretty.--common on the Ghauts, about Kandalla «c.
458. A. Amara? w, \& a. 848. Mimosa amara. Rox. Flora. 2. p. 548. Rox. Cor. t. 122.

A middle sized tree; unarmed;-common on the banks of the Krishna, about Nalutwar. (Mr. Law.)
459. A. Odoratissima. w. \& a. 850. Mimosa odoratissima. Rox. Flora. 2. p. 546, Rheed. Mal. 6. t. 5. Rox. Cor. t. 120. Pluk. t. $351 . f$. 1.

A tree, unarmed; flowers in May: legumes flat, thin, linear, with thickened margins.-the Concans.
460. A. Speciosa. w. \& A. 852. Mimosa serissa. Rox. Flora. 2. p. 544. Jacq. Ic. Rar. 1. t. 198. Pluk. t. 331. f. 1.-Sassa.-Bruce's Travels. 6. t. 4. \& 5.

A common tree of rapid growth. Flowers in May; white; very fragrant. It may easily be recognized by its long stamens.---it is identical with Linnaeu's A. lebleck, native of Egypt, which name it should bear. (Dr. Lush.)

Roxburgh says, the wood is much like that of Inga Xylocarpa, and equally serviceable.
461. A. Glauca. Sprengel. syst. 3. p. 139.

A tall erect growing unarmed shrub.---common in gardeus, Bombay; it possesses little beauty; spreads very fast, and is difficult to root out.
462. A. Tomentosa. w. \& A. S54. Mimosa tomentosa. Rox. Flora. 2. p. 558. Hewur.---an armed tree, legume thin, linear, foliate.---very common in Deccan and Kandesh Jungles, and always springing up in waste black soil. (Dr. Gibson.) abundant in the Sholapore districts.---looks like a stunted variety of the next species. (Mr. Law.)
463. A. Arabica. w. \& A. 853. Nimosa Arabica, Rox. Flora. 2. p. 557. Rox. Cor. t. 149. Pluk. Alm. t. 221.f. 1. Ainslie Mat. Ind. 2. p. 142.

Babool tree;--common in the Deccan, where it thrives equally well on a black or red soil: Dr. Gibson some years ago suggested that plantations bo made of it in the bare waste parts of the Deccan, both with the view of economical purposes, and improving the climate. It grows rapidly and requires no water. When covered with round heads of yellow flowers it is a very ornamental tree---Moore has happily introduced it in an Arabian scene.
" Our rocks are rough, but smiling there
The Acacia waves her yellow hair
Lonely and sweet, nor lov'd the less
For flowering in a wilderness."
Lalla Rookh.
There is a variety or distinct species in Kandesh called Ram Kanta--n tall erect growing broom-like tree; and another in the Buglana districts which abounds much more in gum than. the common Babool, and differs from it in the form and colour of its legumes.

The seeds and pods of these trees are of great value to the shepherd in the hot season, as food for his flock, when grazing is scarce. (Dr. Gibson.)
464. A. Leucophlea. w. \& A. 859, Mimosa leucophlea, Rox. Flora. 2. p. 558. Rox. Cor. t. 150.

A tree; armed.---common in some parts of the S. M. Country, and in the Sholapore districts between the Bheema and Krishna.--A spiritnous liquor is distilled from the bark, and in some places the trees are farmed on account of Goverument. (Mr. Law.)
465. A. Pennata. w. \& a. S60. Burm. Zey. 2.t. 1.

A straggling scandent species.--bunks of the Gutpurpa, near Diddi. (Mr. Law.)
466. A. Concinna. w. \& A. 861. Mimosa concinna. Rox. Flora. 2. p. 565. Burm. Zey. t. 1. Pluk.t. 121. f.6. Ainslie Mat. Ind. 2. p. 374.

Chicakai.-a large scandent shrub covered with prickles.---The thick succulent legumes are sold in the Bazar and used as soap for washing the hair \&ic. they are also used by the Hindoos for marking the forehead:- the leaves are acid, and used in cookery instead of Tamarinds. N.
467. A. Intsia. w. \& A. 863. Mimosa intsia. Rox. Flora. 2. p. 565. Rheed Mal. 6. t. 4. Pluk. t. 122. f. 2.

A large straggling shrnb well armed with recurved prickles.--common on the Ghauts and throughont the jungly tracts of the Concan.
468. A. Gibsonil. g.

Keemjee.-an unarmed tree with smooth white bark and red leafy legumes.
-flowers in October.--The Adjunta and Sautpoora hills; not commus. (Dr. Gibson.)
469. A. ?-a middle sized unarmed tree, growing to the lieight of about 20 feet; with very dark coloured bark; foliage like that of the Catechu; deciduous in the cold weather; flowers like those of the Serissa; legume broad leafy.-About Kundapore, and in Kandesh. (Dr, Gibson.)
470. A. ?-a shrub; stems red, armed with strong broad recurred horns; flowers pink coloured, in globular heade: legume leafy, about 3 inches

Hong.--Very common in the Kandesh, and in the large inland Deccan Jungies. (Dr. Gibson.)
471. A. Mucronata. Bot. Mag. t. 2747.-a shrub with curious falcate leaves.-Hort. Soc. garden, intd. by Mr. P. Scott, C. S. from N. S. Wales.

## Subtribe 2. Caesalpineae.

## 230. ARACHIS. L. Diadelphia Decandria.

Aracos-a name applied by Pliny to a plant which had neither stem nor leaves;---applied here, in allusion to the strange circumstance of the fruit being borne under ground. Lam. t. 615. Gaert. t. 144.
472. A. Hypogea. w. \& a. 866. Rox. Flora. 3. p. 280. Pluk. t. 60. f. 2. Rumph. Amb. 5. t. 156. f. 2.

Velaiti-Moong.-- Boi-Moong.--Earth-nut,--The legumes which are known by these names, grow under ground, and are commonly sold in the Bazars.
231. GUILANDINA. dc. Decandria Monogynia.

Guilandinus---a Prussian Traveller. Lam. t. 336. Gaert. t. 148.
473. G. Bonduc. w. \& A. 867. Caesalpinia bonducella. Rox. Flora. 2. p. 357. Rheed. Mal. 2. t. 22. Rumph. Amb. 5. t. 48. and 49. f. 1. Asiat. Res. 2. p. 351. 4. p. 276. and I1. p. 159. Ainslie. Mat. Ind. 2. p. 135.

Sagur-gota---a scandent well armed shrub; flowers yellow; appear in the rains.---legumes ovate, covered with prickles. In Amboina Rumphius remarks, that it is called selit, a name probably derived from the Hebrew schaid, which signifies a bramble bush; perhaps both may be traced to the Sanscrit.--Common in hedges and jungly tracts. The powdered seeds mixed witl pepper are an excellent and readily available febrifuge. (Dr. Gibson.)
232. GLEDITSCHIA. L. Polygamia Dioecia.

Gleditsch—once a Berlin Professor. Lam. t. 857.
474. G. Sinensis. Dc. Prod. 2. p. 479. G. horrida. Wil!d. 4. p. 1098.

A tree, armed with strong branched thorns. - Dapooree, probably intd. from. China, of which country it is a native.

## 233. CAESALPINIA, L. Diadelphia Decandria.

Caesalpinus-Physician to Pope Clement VIII. Lam. t. 335. Gaert. t. 144.
475. C. Paniculata. "w. \&a. 869: Rox. Flora. 2. p. 364. Rheed. Mal. 6. t. 19. Wight's Icones. Part 2 t. 36. Don's syst. 2. 430.

A scandent armed shrub, with fragrant yellow flowers.-Banks of the Saweetree, between Dasgaum and Mahar.
476. C. Sappan. w. \& A. 870. Rox. Flora. 2. p. 357. Rheed. Mal. 6. t. 2. Rox. Cor. 1. t. 16. Rumph. Amb. 4. t. 21. Don's. syst. 2. p. 430.

Sappan wood.---a large armed shrub: flowers in terminal panicles; legumes thick, woody.---In gardens Bombay and the Deccan. The wood is used in dyeing red.

## 477. C. Digyna? w. \& a. 871. C. oleosperma? Rox. Flora. 2. p. 356.

Wakeeree or Wamera.--a straggling somewhat scandent shrub; armed. Flowers in simple racemes, red and yellow; or very dark orange and yellow. They appear in January and February; legumes oblong thick; much swelled at the seeds.--Pretty common on the Ghauts; the flowers are beautiful and entitle it to a place in gardens. Dr. Wight says, it is different from his $C$. digyna, and thinks it will form the type of a new genus. (Mr. Law.)
478. C. Mimosoides. w. \& A. 872. C. simora. Rox. Flora. 2. p. 359- Rheed. Mal 6. t. 8. Lam, t. 335.f. 2. Don's, syst? 2. p. 4 il.
 in Giended, uphes me nolenas

 Cague turoid 4 - 8 sceled serinitan sluafad

A scandent armed shrub, ruming over trees; flowers solitary, bright yellow; Mahim woyds Bombay \&c.
479. C. Abob-ensis. Vaupell.

A thorny shrub, with kidney shaped pods;---grows on Mount Aboo, in Guzerat. (Mx. Vaupell.)
480. C, Sepiaria. w. \& A. 873. Rox. Flora. 2, p, 360. Wight's Icones. part 2, t. $37^{\circ}$

Chillur.-Mysore thorn.-A scandent, strongly armed shrub; flowers in March and April; yellow.--Generally used as a fence in the Bughayat lands of the Deccan. (Dr. Gibson.)---Hyder Alli surrounded fortified places with it. It forms an almost impenetrable fence.
481. C. Nuga. dc. Prod 2. p. 4S1. Rumph. Amb. 5. t. 50. Don's. syst. 2, p. 430. A thony shrub flowers yellow in racemose panicles.

About Sanglee, in S. M. Country. (Dr. Lush-)
234. POINCIANA. L. Decandria Monogynia.
M. de Poinci---once Governor of the Antilles. Lam. t. 333. Gaert. t. 150.
482. P. Pulcherrima. w. \& a. 874. Rox. Flora. 2. p. :355. Rheed. Mal. 6. t. 1. Rumph. Amb. 4, t. 20. Bot. Mag. t. 995, Ainslie Mat. Ind. 2. p. 148. Gool Mohur, Barbadoes flower fence.-Common in every garden.-At the Caves of Ellora, but evidently planted.
483. P. Elata...w. \& a. 875. Rox. Flora. 2. p, 355. Don's. syst. 2. p. 432. A small unarmed tree, with large showy yellow flowers; petals fringed.- In Goozerat. (Dr. Lush.) gardens, Kandesh. (Lient. Auld.) One tree grows in the square of the great temple at Fultun. (Dr. Gibson.) Can this be the Aönla of Tod's Rajhistan?
235. MEZONEURUM, w. \& A. Diadelphia Decandria.

Mesos-the middle, ncuron-a nerve; in allusion to the joint of the pod to which the seeds are attached, being expanded into a wing.
484. M. Cucullatum. w, \& A. 876. Caesalpinia cucullata. Rox. Flora, 2. p. 358 ,

Ragee.-A large, scandent, armed shrub, running over high trees.--fowers in December and January; in racemes, of a greenish yellow colour.--L Lanowlee grove, Kandalla; where it forms lovely festoons along with the Gurdul. ( Entada pusaelha.)--Ravines about Parr, not common; the flowers are very ornamental.

## 236. PARKINSONIA. L. Decandria Monogynia.

Parkinson-author of some Botanical Works, published at London in 17 th century. Lam. $t$. 336.
485. P, Aculeata w. \& a. 878. Don's syst. 2, p. 434.

A graceful looking shrub, with pretty yellow flowers, in loose, pendulous racemes.--native of $S$. America, but now almost naturalized in India.--common about Bombay; it seems well adapted for a hedge plant, and grows. rapidly from seeds.

## 237. HARDWICKIA. Rox. Decandria Monogynia. Major General T. Hardwicke, late of Bengal Establishment.

486. H. Binata. w. \& a. 879. Rox. Flora. 2. p. 42:3. Rox. Cor. 3. t. 309. Unjun.-a large tree with binate leaves; - common in the Lulling Pass between Malliganm and Dhoolea. (Dr. Gibson and Lieut. Auld.) probably it has some other name, as Unjun is generally applied to the Memccylon, a quitedifferent tree.
487. JONESIA. Rox. Heptandria Monogynia.

Named in honour of the celebrated Sir W. Jones.
241. Cal. a spatheeoms border or tubutar base. Cor. irreg. 5 het expluuding. Au then liceambent fustin, longtitio on theindides.
496. C. Florida. w. \& a. S93. Senna Sumatrana. Rox. Flora. 2. p. 347.

A handsome tree with bright yellow flowers;--in gardens, Bombay;-Belganm. (Mr. Law.) Dapooree and Hewra. (Dr. Gibson.) It is of very rapid. growth, and was probably intd. from the Eastern Islands.
497. C. Glauca. w. \& a. 895. Sema arborescens. lRox. Flora. 2. p. 340. Rheed. Nal 6. t. 9. and 10.

A small tree, flowers very numerons, in axillary racemes; common in gardens.
498. C. Auriculata, w. \& a. 898, Senna auriculata. Rox Flora. 2. p. 349. Pluk Alm. t.314.f. 4. Ainslie. Mat. Ind. 2. p. 31.

Turwar-Awul.-one of the commonest shrubs in'India;-grows abundantly in the sterile tracts of the Deccan and Goozerat.-It is of great importance to the tanner, and to workers in Iron, who use the root in tempering iron with steel. (Dr. Gibson.) Another common use to which this plant is applied, is the making of Datuns or native tooth brushes. For this purpose the branches of it are esteemed preferable to those of any other plant. (Dr. Burn.)
499. C. Occidentalis. w. \&a. S99. Senna occidentalis. Rox. Flora. 2. p. 343. C. foetida. Rox, in E. 1. C Mus. Tab, 1419. Bot. Reg. t. 83,

Annual;-abundant every where in the rains, but particularly among rubbish in the neighbourhood of villages.-It covers the ruins of Aurungabad, and has a most heavy, sickening smell; probably it is the cause of much sickness.
500. C. Tora. w. \& a. 900 . Senna tora. Rox. Flora 2. p. 340. Rheed. Mal. 2. t. 53. Rumph. Amb. 5. t. 97.f.2. C. tora and C. tagera. Don's syst, 2. p. 439,

Arnual, common, in the rains.
239. CYNOMETRA. L. Decandria Monogynia,

Lam, t. 331. Gaert, t. 156.
501. C. Cauliflora. w. \& A. 906. Rumph. Amb, 1. t. 62.

A small tree with conjugate leaves, and reddish flowers, growing in clusters from the trunk; bees are very fond of them. Legume thick, half orbicular; sold in the markets of Amboina (" sine pudore") under a strange name, (Rumphius.)-In gardens Bombay, not common.
502. C. Ramiflora, w. \& A. 907. Rheed. Mal. 4. t. 31. Rumph. Amb, 1. $t$. 63. Lam, Illust. $t$. 331. $f .1$.

A shrub;-flowers from the branches among the leaves,---S. Concan. N.
240. HYMEN/EA. L, Decandria Monogynia.

Hymen---God of marriage.---in allusion to the twin leaflets, Lam, $t .330$, Gaert. $t 144$.
503. H. Courbaril. dc. Prod 2, p. 511. Don's. syst. 2, p. 458.

Courbaril.---locust tree, native of S. America. intd. by N.
Gum auime, a fine transparent resin, exudes from the roots of this tree. It makes the fincst varnish known, superior even to the Chinese lac. (Don.)
241. BAUHINIA. L. Decandria Monogynia.

Name by Plumier, in memory of Johu and Caspar Baulin, Botanists of 16th century. Lam. t. 329.
504. B. Acuminata, w, \& A. 910. Rox. Flora, 2.p. 324. Rheed, Mal. 1.t. 34.

Farek?---Bruce's Travels. 7. t. 18. Don's. syst. 2. p. 460.
A. shrub, 6 or 10 feet high; flowers white, fragrant - -In gardens common.
505. B. Tomentosa, w. \& A, 911. Rox. Flora, 2. p, 323. Pluk, t. 44. f. 6. Rheed. Mal. I. t. 35. Ainslie Mat. 1nd. 2. p. 49. Don's. syst. 2, p. 461.

A shrub, flowers of a pale sulphur colour.-. In garders, Bombay; wild in the Concans. N.
506. B. Racemosa. w. \& a. 912. B. parviflora. Rox. Flora. 2. p. 323.

A small crooked tree with rigid branches;---tine bark is used for making matches;---common on the Ghats and hilly parts of the Concan; flowers in April and May, very small; white or yellowish.
507. B. Variegata, w. \&a, 913 . B. candida. Rox. Flora, 2. p. 318. Rheed. Mal. 1. t. 32. Rox. Flora, 2. p, 319.

Kana raj, or Kunchum-a tree with white or variegated flowers: appear in April and May;-gardens Bombay; perhaps the Apta tree of the Coucans is identical. The flowers of this and the next species are very beautiful.
503. B. Purpurea. w. \& a. 915. Rox. Flora. 2, p. 320. B. tíiandra. Rox. Florı, 2. p, 320. Rheed. Mal. 1, t. 33. Asiat. Res. 4. p. 273.

Dewa Kunchun.-a tree with fragrant flowers of a deep rose colour.-Gardens Bombay; flowers at the beginning of the rains.
509. B. Vahlil, w. \& A, 916. B. racemosa, Rox. Flora. 2. $p, 325$. Asiat. Res. 11. p. 576. Vahl's Symbols. t. 62. Don's. syst, 2. p. 461.

Chambolee or Chambuour---An immense standent shrub, running over high trees;---leaves about a foot in breadth with rounded lobes; legumes pendulous from 12 to 20 inches long; covered with a brown velvet; down---the Tull Ghaut; ravines at Kandalla, rare; in some parts of India the leaves are used for thatching houses.
510. B. Anguina. w. \& A. 917. Rox. Flora. 2. p. 328. Rlieed. Mal. 8, t. 30 and 31. Rox. Cor. t. 285. Don's. syst. 2. p. 462,

An extensive rambling shrub with flexuose compressed stems, and small white flowers in terminal panicles--S. Concan. N.

511, B. Scandens. Rox. Flora. 2. p. 326. Rheed. Mal. 8. t. 29, Rumph. Amb. 5. t. 1. B. lingua? Dore's. syst. 2. p, 462.

A pretty scandent shrub, with weak flexuose branches.---Parell garden; grows wild in the Concans. N.

All the Badhinias are very ornamental, and may be readily known by their curious two-lobed leaves, like the Goat's font Convolvulus.

## ORDER 51. ROSACE A. Dc. Prod. 2. p. 525.

The Rose Tribe. Lind. nat. syst. p. 81.
24.2. RUBUS. L. Icosandria Polygyuia.

Said to be derived from the Celtic for red. Lam. t. 441. Gaert. $t .73$.

The strawberry;-cultivated with success in the Deccan, and in Bombay by Dr. Montifiore; but generally speaking, the table land of the Deccan seems to suitit best; -it grows well also at Mahableshwur, and at Belgaum.
244. ROSA. L. Icosandria Polygynia.

From rhos, red;-Greek, rhodon. The rose;-a favorite flower, celebrated in poetry, from the time of Anacreon, downwards. Gaert. t. 73. Lam. t. 440.
515. R. Damascena. Don's syst. 2.p. 571.

The Damask rose;-native of Syria, but commonly cultivated in Indian gardens. "I am the rose of Sharon." (Solomon's Song.)
516. R. Microphylla. Don's. syst. 2. p. 581. Bot. Mag.t. 3490.

Simall leaved rose; flowers pale red; uative of China; common in gardens.
517. R. Indica. Don's. syst. 2. p.5s1. R. semperflorens. Rox. Flora. 2, p. 34. Bot. Mag, t. 284. and 1762.

The China rose, of which there are several varieties; common in every garden, and in flower all the year. It forms a pretty good edging for garden walks, when neatly kept.
518. R. Sinica. Don's. syst. 2. p, 584. R. triplyylla? Rox. Flora, 2. p. 515. Bot. Mag, 2847.

Scandent, with ternate leaves.-Dapooree. (Dr. Lush.)
519. R. Multiflora. Don's, syst. 2, p. 583. Bot. Mag. t. 1059.

Bramble flowered rose; -a scandent species, native of China and Japan.Dapooree. (Dr. Lush.)
520. R, Glandulifera. Rox, Flora. 2. p. 515.

Shewatee Goolab;-white rose;-common in gardens at Belyaum, where it is in flower all the year. (Mr. Law.)
52:. R. Rubiginosa. Don's. syst. 2. p. 577. English Botany.t. 991.
Sweet Brier;-Eglantine.-In gardens; a delicate plant in India.
" $\qquad$ With fairest flowers,
Whilst summer lasis, and I live here, Fidele,
I'll sweeten thy sad grave; thou shalt not lack
The flower that's like thy face, pale primrose; nor
The azured harebell like thy veins; no, nor The leaf of Eylantine; whom not to slander, Outsweetened not thy breath."

Shakespeare, in Cymbeline.
522. R. Canina? Dons. syst. 2. p. 579.

The Dog or wilding Rose "emblem of hope and love."-(Sir W. Scott.) grows on Mount Aboo, in Guzerat. (Mr. Vaupell.) Can this be identical with $\boldsymbol{R}$. Leschenaultiana, found on the Neilgherries? Thespecies are distinct, but this is a difficult genus, and from a casual observation, it is possible to coufound the two.
245. ERIOBOTRYA, Lind. Icosandria Pentagynia.

Erion-wool, botrys - a bunch; in allusion to the flowers and fruit, which are covered with a woolly kind of substance.
523. E. Japonica. w. \& a. 931. Mespilus Japonica. Rox. Flora. 2. p. 510. Lindley in Linn. Trans. 13. p. 102, Bot. Reg. t. 365. Pluk. Alm. t. 371.f. 2. Dou's, syst. 2. p. 602.

The Whampee or Loqaut.-A Chinese fruit tree; leaves broad lanceolate, wrinkled, serrate, woolly beneath; flowers in terminal, compound woolly racemes; they have the smell of hawthorir blossoms. In gardens Bombay; Dapooree. (Dr. Lush.) Little attention has hitherto been paid to its cultivation.
246. PYRUS. L. Icosandria Pentagynia.

From the Celtic for a pear. Lam, $t .435$.
524. P. Malus. Rox. Flora. 2. p. 511. Don's. syst. 2 p. 623.

The Apple tree;-in gardens Bombay and the Deccan, It becomes an ever-green in Bombay, and when it does bear fruit, it is of very inferior quality; the Deccan suits better. The Ameers of Scinde cultivate it to a considerable extent, but the fruit is of small size and paltry in appearance. It sells in the Bazars at the rate of 40 u for a rupee. (Dr. Burns, K. H.)
525. P. Cydonia, Rox. Flora, 2, p. 511.

The Quince tree;-intd. from Persia by N.
Quince seeds are imported in considerable quantities from Persia. They abound in mucilage and are used medicinally by the natives in cases of inflamation of the throat \&c. (Mr. Little.)
526. P. Tomentosa. Rox. Flora. 2. p. 512. Cydonia vulgaris. Don's. syst. 2. $p .650$.

Bengal Quince;-Dapooree, intd. from Bengal. (Dr. Lush.)
247. CHRYSOBALANUS. L. Icosandria Monogynia.

Chrysos-gold, Balanos-an acorn: in reference to the colour and form of the fruit. Lam. t. 428.
527. C. Icaco. Don's, syst. 2, p. 477. Jacq. Amer. t. 94.

The Coco Plum tree;-native of the West Indies; intd. by N.
248. PARINARIUM. Juss, Icosandria Monogynia.

Parinari-the Guiana name. Lam, t. 429. Aublet's Guiana.
528. P. Excelsum? Don's syst. 2. p. 479.

A large tree; Goa;-where it is known by the name of Matomba.--Sir Roger de Faria says, it was introduced by the Jesuits from Mozambique. The fruit which ripens in December and January, resembles a large coarse grey skinned plum, and is held in considerable estimation at Goa. The tree is not to be found in any other part of Western India.
249. AMYGDALUS. L. Icosandria Monogynia.

From Amysso - to fret or wound slightly; in allusion to the shell of the nut having fissures. Gaert. t. 93. Lam. t. 430.
529. A Communis.|Rox. Flora. 2. p. 500, Don's. syst. 2, p. 482.

Buddam or A mond tree;-native of Persia;-iutd. by N.
530. A. Persica. Rox. Flora. 2.p. 500. Persica vulgaris. Don's. syst, 2. p. 483.

The common Peach tree:-in gardens; it thrives well in the Deccan and about Belgaum.

The noist warm atmosphere of the Concans does not seem to suit it.
250. PRUNUS. L. Icosandria Monogynia.

Origin of the word unknown. Lam. $t .431$ and 432. Gaert. $t .93$.
531. P. Cerasus. Rox. Flora. 2.p. 501. common Cherry tree.-Dapooree. (Dr. Lush.)
532. P. Armeniaca. Rox. Flora. 2. p. 501. Armeniaca vulgaris, Don's syst. 2. p. 495. Lam.t. 431.

Pistali;-the common Apricot tree:-Dapooree. (Dr. Lush.)

## ORDER 52. SALICARI E. DC. prod. p. 302.

The Loosestrife Tribe. Lind. nat. syst. p. 59.
251: ROTALA. L. Triandria Monogynia.
Latin for a little wheel;-name given in allusion to the whorled leaves.

 cul. Int os $t$ 'indhucat to it. Aerbyt diesty shith wou. Erting than tolf. raue.iiler. eukire evétifu le wod
55. Cal. btorthed. Ist. Is insented by drust +eurled. Grway 3-b celled, celliminy scedes atruch. pentiul. Craf. dufiezion 3-b illed. Lce Is 1reveral hrinqoal. Imbry o uith ceutrepetal tadiche

533. R. Verticillaris. w. \& a. 932. Rheed. Mal. 9. 6.81 .--an aquatic with linear leaves in verticils;-abundant in Bombay Fort Ditch;-tanks \&c.
252. A.MMANNIA. L. Tetrandria Monogynia.

Amman-formerly Professor of Botany at St. Petersburgh, Lam. t. 77. Gaert. $t$. 112.
534. A. Octandra. w. \& A. 934. Rox. Flora. 1. $p, 425$. Rox. Cor. 2. 6. 133. A, Coccinea. Persoon. Don's syst 2, p. 710.

Annual erect plant, with 4 sided stems: flowers in September and October, small, bright red.-moist places, Salsette.

This is rather an ornamental plant.
535. A. Vesicatoria. w. \& a. 939. Rox. Flora. 1. p. 426. Ainslie Mat. Ind. 2. p. 92. Pluk. Alm. t. 136. f. 22. Don's. syst. 2. p. 709.

An annual erect plant having a strong muriatic smell.
The leaves are exceedingly acrid, and are used by the natives for raising blisters. N.-common in moist places, Salsette, \&c. towards the close of the rains.
253. LAWSONIA, L. Octandria Monogynia.

Named after Dr. Lawson who, published a "Voyage to Carolina in 1709." Lam. $t$ 296, Gaert. $t$. 110.
536. L. Alba. w. \&A. 948. L. inermis. Rox. Flora. 2. p. 258. Rheed. Mal. 1. $t$. 40. Kumph. Amb. 4. t, 17. Ainslie. Mat. Ind. 2. p. 190.

Mendie or Henna.-very common in gardens as a hedge plant. It a good deal resembles the English Privet. There is a beautiful red flowered variety, $\mathrm{N}_{\text {。 }}$
254. GRISLEA. L. Octandria Monogynia.

Grisley-a Portuguese surgeon.
537. G. Tomentesa. w. \& A. 949. Rox. Flora. 2. p. 233. Rox. Cor, 1. 8. 31. Dhawry. Asiat. Res, 4. p. 42. Bot. Reg. t. 30

Dhatee, or Dhauree;-A very common shrub throughout the jungly tracts of the Concan, and along the Ghauts. It has rather pretty red flowers, in axillary racemes. They appear from December till February, and in Kandesh where the shrub grows abundantly, form a considerable article of commerce inland, as a Dye. (Dr. Gibson.)
255. LaGERSTROEMIA. l. Icosandria Monogynia.

Named by Linnaeus in honor of Lagerstroem, of Gottenburgh. Gaert. $t$. 133. f. 2.
538. L. Indica. w. \& A. 951. Rox. Flora. 2. p. 505. Rumph. Amb. 7. 8. 28. Bot. Mag. t. 405.

China mendie.-a common shruh in gardens, and native of China, though named $L$. indica;-flowers small, reddish: in terminal panicles.
539. L. Parviflora. w. \& A. 952,-Rox. Flora. 2. p. 505. Rox. Cor. 1. 8. 66. Wight's Icones No. 4. t. 69.
L. microcarpa. Wight's Icones No. 6. t. 109.

Naneh;-A middle sized tree, with very numerous small white flowers in terminat panicles: they appear in May;-fruit size of a pea.-Kennery forests, Salsette;-common on the Ghauts.-hills near Sattara. (Capt. Twemlow.)
540. L. Reginae. w. \& A. 953. Rox. Flora. 2. p. 505. Rox. Cor. 1, t. 65. Rheed. Mal. 4. t. 20 and 21.-Arjuna. Asiat. Res. 4. p. 301.

A small tree with opposite oblong leaves; flowers in May; in large terminal panicles: of a dark blue or purple colour; exceedingly showy.-In gardens, Bombay,-Grows wild in the vale of the Nagotnah river, near its source. Few trees can vie with this in beauty, whes clothed with a profusion of blossoms.

The fruit resembles in shape that of the Sonneratia, and iamiton monts that they may belong to the same or an allied family. (See Linn. Trans. 17 p.176.)
541. L. Lanceolata. w. \&a. 955.

Bodah, or Bondaga:-an erect growing tree, with oblong lanceolate leaves:: flowers small white, appear in April and May; fruit about the size of that of L. reginae.-Perhaps the L. Montana, alluded to in the 6th vol. of Asiat. Res. p. 364. is identical.-Common in the hilly parts of the Concan, and on the Ghauts. -It is a very distinct species.-Kandesh Jungles. (Lieut, Auld.)

## ORDER 53. RHIZOPHOREE. W. \& A. prod. p. 310.

## The Mangrove Tribe. Lind. nat.syst.p. 60.

256. RHIZOPHORA. I. Icosandria Monogynia.

Rhiza-a root, and phoreo-to bear: in allusion to the strange mode of growth. Gaert. t. 45. Lam. t. 396.
542. R. Candelaria. w. \& a. 959. R. mangle, Rox. Flora. 2.p. 459. Rheed. Mal, 6. t. 34. Rumph. Amb, 3. t. 71 and 72.

A large shrub, or small tree: grows abundantly in salt marshes, all along the Cuast.

Rumphius speaking of the uses of the wood, says, " a curious custom obtainsat the Moluccas, where contrary to the European custom, anchors are made of wood, boats of stone,"
543. R. Candel. dc. Prod, 3. p. 32. Kandelia Rheedei. w. \& A. 960. Rheed. Mal. 6. t: 35.

A shrub with long acute fruit. In salt marshes.
544. R. Gymnorhiza. Rox. Flora. 2.p. 460. Bruguiera Gymnorhiza. w. \& \& - 961. Rheed. Mal, 6, t. 31 and 32.

A shrub, in salt marshes.
545. R. Parviflora. Rox. Flora. 2. p 461. R. Caryophylloides. Déc. Prod. 3.p. 32. Rumph. Amb. 3. t. 78.

A small shrub with ovate lanceolate leaves, flowers 8 petalled. Salt marshes near Moul, Salsette; not common.
257. CARALLIA. Rox. Dodecandria Monogynia.

The Telingi name latinized. Don's. syst. 2. p. 674.
546. C. Integrifolia. G.

Punschi.-A small tree with obovate, dark green, polished leaves, quite entire. Flowers in February and March, in axillary umbellets; small and inconspicuous; fruit size of a pea.- The vale of the Saweetree between Poladpore and the Ghauts; hills about Parr, at Kandalla \&c. It differs from Roxburgh's C. lucida. (Cor. 3. t. 211.) in having much smaller leaves, of a different shape, and quite entire.

There is a very elegant tree in Parell garden, with drooping branches, and flowers like dried clove buds, in curious cross armed panicles; it certainly belongs to this genus;-whence it was introduced is unknown. Both are very ornamental trees.

ORDER 54. COMBRETACE A. DC. proul. 3. p. 9.

## The Myrobolan Tribe. Lind. nat. syst. p. 67.

 Sub-Tribe 1. Terminaliee.258. TERMINALIA. L. Polygamia Monoecia.

Name given in allusion to the leaves growing in clusters at the ends of the branches. Lam. t. 848. Gaert. t. 127.
53. Cul adher. 4-12 lobed. nesh. $\mathrm{vul} . \mathrm{Pef}=$ lobse of eul. A atter. into itam. Stan. luserted a itt iel. turie a therie their number. Fill

547. T. Angustifolia. w. \& a. 964. Catappa benzoin. Gaert. 6. 127.

A tree, branches in whorls; leaves linear lanceolate, with purple veins. It produces benzoin gum.--intd. by N .
548. T. Catappa. w, \& a. 965. Rox. Flora. 2. p. 430. Rheed. Mal. 4. t. 3. and 4. Rumph. Amb. I, t. 68. Bot. Mag. t. 3004.

Buddum, or Almond-A large handsome tree, with verticilled, horizontal branches, rising in teirs; the branches of each verticil decreasing in length, and forming a pyramidal head.-Common in gardens and abont houses, Bombay; but appareutly planted.-Possibly the garden of Nuts, (Karua.) mentioned in Solomon's Song, was planted with this tree, or one of the family; the fruit resembles a knob, and a componnd of the word is used in the Septuagint, (Exodus 25. 33.) to denote this figure. Xewophon in the Expedition of Cyrus, Book 5, also mentions the Karua.

May not rather Akroot, (Walnut.) be derived from Karua. N.
549. T. Bilirica w. \& a. 966. Rox. Flora. 2.p. 43I. Rheed. Mal. 4.t. 10. Linn. Trans. 17.p. 157. Rox. Cor. t. 198. Buchanan's Mysore. 2. p. 342.

Buhiru; Bherda.-A very large tree; leaves deciduous about the beginning of the hot weather, when the flowers appear. Fruit nearly round; size of a crab apple; covered with a grey silky down.-Malabar hill, Bombay.--common along the foot of the Ghauts, where iu some places it attains a great size; - the flowers have a very offensive smell.
550. T. Chebula. w. \& A. 967. Rox. Flora. 2. p. 433. Rox. Cor. t. 197.Asiat. Res. 11. p. 181. Ainslie Mat. Ind. 2. p. 128.

Heerda.- A large tree, flowers in May; in terminal spikes, simple or com-pomd.-Harness makers use the fruit to form blacking with.

Pretty common on the table laud of Mahableshwur;--at Kandalla and all along the Ghauts. - Duddi. (Mr. Law.)
551. T. Nitida. Don's. syst. 2. p. 659.

Yella. A magnificent tree, apparently allied to T. Bilirica, but with larger and more oblong fruit, which possesses an intoxicating principle.-Thinly scattered over the Deccau and Kandesh. (Dr. Gibson.)
259. PENTAPTERA. Rox. Polygamia Monoecia.

Pente-five-pteron-a wing; in allusion to the winged fruit,
552. P. Tomentosa, Rox. Flora, 2. p. 440. Terminalia tomentosa. w. \& A. 972.

The Ain or Ayeen tree; grows to a considerable size; has erect rigid branches and leathery leaves, entire or slighlly crenulate;-fruit smooth, 5. winged. The wood of this tree is much used for making shafıs to Gigs and other things where toughness of fibre is required.- Common on the Ghauts. and throughout the hilly parts of the Concan;-in the jungly tracts of Guzerat.. (J)r. Gibsou.)
P. Coriacen, $f^{\prime}$. Glabra and P. Crenulata, seem to be mere varieties.

55:3. P, Arjuna. Rox. Flora. 2, p. 438.
Arjuna, urjoon sadra.- A tree; common in the jungles to the south east of Surat. (Mr. Law.)

The bark is in great repute among the natives as a tonic internally, and $a$. vulnerary applied externally; it is sold by most Druggists. (Dr. Gibson.)
554. P. Angustifolia. Rox. Flora. 2. p. [437. Terminalia Berryi. w. \&s; A. 969 .

A tree, with drooping branches and lanceolar leaves;-common on thebanks of the Kalinadi and Gutpurba rivers, S. M, Country, (Mr. Law.)
555. P. Paniculata. Rox. Flora. 2. 442.

Terminalia paniculata. w. \& A. 974.
Keenjoora. Avery handsome tree, with oblong coriaceous leaves. - Flowers in May; in terminal spikes, forming a compound panicle:-fruit small compared with that of the other species, 3 winged; one wing larger than the athers.-common in the vales of the Concan rivers near their source:-in great abundance in the jungles south east of Surat. (Mr. Law.)
260. CONOCARPUS. Gaert. Decandria Monogynia.

Konos-a cone-karpos-fruit: in allusion to the mode of growth. Gaert. e. 177.
556. C. Latifolia. w. \&. A. 976. Rox. Flora. 2. p. 442.

Daura, or Dabria.--A large erect growing tree with simple opposite leaves, and small aggregated, scale-like fruits.-Kennery Jungles; the vales of the Concan rivers near their source; common.-Also on the inland Deccan hills, where it appears of stunted growth and gnarled form. (Dr. Gibson.)
261. GETONIA. Rox. Decandria Monogynia.

Gaert. t. 217. Calycopteris. Lam. t. 357.
557. G. Floribunda. w. \& a, 975, Rox. Flora. 2 p 425. Rox. Cor. t. 67.

Ooksey, or Wooksey. Bagoolee.-A stout scandent shrub running, over trees; flowers very numerous; greenish white; in terminal and axillary panicles; they appear in great profusion in March and April, and give the shrub a showy appearance.-Very common among the rocks on Malabar hill; Elephanta; the Ghauts \&c.-Roxburgh's G. Nutans is perhaps identical.
262. LUMNITZERA. Willd. Decandria Monogynia.

Lumnitzer-author of a Botanical work published at Leipsic.
558. L. Racemosa. w. \& a. 978. Petaloma alternifolia. Rox. Flora. 2. p: 372. Rheed. Mal. 6. t. 37.

A shrub, with alternate, thick, veinless leaves, and white flowers in axillary spikes.-Margins of salt water creeks, S. Concan. N.

Allied to Aublets genus Cacoucia. Lam. t. 359.

## Sub-Tribe 2. Combreteae.

263. QUISQUALIS. Rumph. Decandria Monogynia.

Quis-who-qualis-of what sort; name perhaps given in reference to the uncertainty as to what family it belonged. Lam. t. 357.
559. Q. Indica. w. \& A. 982. Rox. Flora. 2. p. 427. Rumph. Amb. 5. t. 38. Bot. Mag. t. 2033.

A scandent shrub, with very beautiful sweet scented flowers of various colours, from orange to red. They grow in terminal and axillary spikes.Common in Bombay gardens, but no where wild on this side of India.
264. COMBRETUM. L. Decandria Monogynia.

A name given by Pliny to a climbing plant. Gdert. t. 36. Lam. t. 282.
560. C. Ovalifolium. w. \& a.980. Rox. Flora. 2. p. 226. C. heyneanum. Wight in Hooker's Ibot. Misc. t. 22. C. albidum. Don. in Linn. Trans. 15. p. 429.

Yelloosey.-A large scandent shrub; flowers in April and May; in terminal and axillary spikes; small: of a yellowish white colour; - the winged hop Bike fruit ripens in June.-Very common on Elephanta and throughout the jungly tracts of the Concan.--in Guzerat. (Dr. Gibson.)
561. C. Wightianum. w. \& A. 981. C. laxum. Rox. Flora. 2. p. 231. Pee-Ula. Rheed. Mal. 7. t. 23.

Peeloka.-A large scandent shrub; flowers in December and January; in

2b1. Cal. 1-leaved shar ted herman. Cir none. filane nidertes mito tho Cul. voy ungenor. attueth Rahor, deed doly crewned inth Hes remanimis ent.

asillary spikes: was first noticed by Mr. Nimmo, in the south Concan in 1824:-it grows in great abundance in the ravines at-Kandalla, and at Lanowlee, running over the highest trees:- the flowers of this species are rather pretty, and render it worthy of a place in gardens.

## ORDER 55. MEMECYLE E. W. \& A. prod. p. 318.

 265. ME\ECYLON. L. Octaudria Monogynia.A name adopted from Dioscorides; probably it was applied by the Greeks to the Arbutus, to which this genus bears some resemblance.
+562 . M. Tinctorium. w. \& a. 984. M. edule. Rox. Flora. 2. p. 260. Rox. Cor. 1. t. 8\%. Rheed. Mal. 5. t. 19.

Aujun, or Anjunee.-A highly ornamental tree, with deep? green polished leaves. Flowers in February and March; in umbellets from the naked branches; small, of a pretty purple colour, with the calyx beautifully streaked on the inside-Common at Mahableshwur, where it is called Iron wood tree. (Dr. Murray.) at Kandalla and along the Ghauts. Perhaps Lamarck's M. ramiforum. (w. \& A. 983.) is identical; Roxburgh joins them. The Malapoenna. Rheed. Mal. 5. t. 9. if a Memecylon, is evidently a distinct species.

Very abundant in the forests to the north and east of Belgaum. (Mr. Law.)

## ORDER 56. MELASTOMACEA. w. \& a. prod. 1. p. 320.

266. SONERILA. Rox. Triandria Monogynia.

The Malabar name adopted.
563. S. Rheedei. w. \& A. 990. Rheed.- Mal. 9. t. 65, S. maculata. Rox. Flora, 1. p. 117.

Herbaceous plant, with unequally cordate, rough spotted leaves.-Rheede compares it to a Pulmonuriu, and says, it belongs to the Asperifolia.-S. Con can. N.
267. OSBECKIA. L. Octandria Monogynia.

Osbeck---a Swedish naturaliśt. Gaert t. 126. Lam. t. 283.
564. O. Zeylonica. w. \& A. 994. Rox. Flora. 2. p. 223.

Annual, erect plant, with 4 sided stems; bristly.---S. Concan. N.-The Ram. Ghaut. (Mr. Law.)
565. O. Virgata. w. \& A.998. Rheed. Mal. 4. t. 44.

Shrubby, erect, with 4 sided, hispid branches-S. Concan. N.
268. MELASTOMA. L. Decandria Monogynia.

Melas-black, and stoma-the mouth; in allusion to the berries staining the mouth when eaten. Gaert. $t$. 126. Lam. $t .361$,
566. M. Malibathricum. w. \& A. 1001. Rox. Flora. 2. p. 406. Rheed. Mal. 4. t. 42.

A shrub, with broad lanceolar leaves, and large red flowers;-grows about Asunwaree, in S. M. country. (Dr. Lush.) S. Concan. N.

Dr. Jack in Linn. Trans. 14. p. 4. observes, that it grows abundantly throughout Sumatra and the Malay Islands. The genus is closely allied to Osbeckia.

ORDER 57. ALANGITA. W. \& A, Prod. 1. p. 325.

## 269. ALANGIUM, Lam. Icosandria Monogynia.

The Malabar name latinized.
367. A. Decaperalum. W. \& a. 1005. 1. hexapetalum. w. \& A. 1006. Rox. Flora. 2. t. 502 . Kheed. Mal. 4. 6. 17 and 4. $t .26$.

Ankool.-A small tree: when young the branchlets frequently end in blunt spines; leaves oblong lanceolate, much resembling those of a tree known to the natives by the name of Gowlee, and which is probably the Grewia salvifolia of Linnaeus.-Flowers in March and April; whitish; petals linear, reflexed.

Elephanta, opposite the entrance of the Caves: near Cawasjee Patel's tank, Bombay;-common in Guzerat. (Dr. Gibson.)

The number of petals varies on the same tree 6,8 or 10 . There is oilly one species in the neighbourhood of Bombay, and hexapetalum or decapetalum are equally applicable as a trivial name,

The fruit is eaten by the uatives: the taste is somewhat astringent like that of Syzygium jambolanum. (Mr. Law.)

## ORDER 58. MYRTACEA. W. \& A. prod. 1. p. 3:6.

## The Myrtle Tribe, Lind. nat. syst. $p, 63$.

270. SONNERATIA. L Icosandria Monogynia.

Named by the younger Linnaeus in memory of Sonnerat the voyager. Lam. t. 420. Gaert. t. 78,
568. S. Acida. w, \& A. 1008. Rox. Flora. 2. p. 506. Rheed. Mal. 3. t. 40.

A small tree, with drooping branches and oval, oblong, thick veinless leaves: flowers at the beginning of the rains. - In the salt marsh on the Salsette side of Sion Causeway, growing in a line by the road side. This is rather a pretty tree.

It is probably identical with the "Tewar" noticed by Dr. Heddle in his Mss. Report on Scinde, as being a better substitute for coal in Steamers, than any other kind of wood. The supply is stated to be inexhaustible in the Delta of the Indus.
569. S. Apetala. w. \& a. 1009. Rox. Flora. 2. p, 505.

A shrub; grous in the salt marsh by the road side leading from Bombay to Sewree. It requires examination, and seems a very doubtful species.
271. PUNICA. Tourn. Icosandria Monogynia.

Punicus-Carthaginian: it is a native of the north of Africa. Lam. $t$. 415. Gaert. t. 38.
570. P. Granatum. w. \&. a. 1010. Rox. Flora. 2. p. 493. Ainslie Mat. Ind. 1. p. 322 and 2. $p$ 157. Bot. Mag. $t, 1832$.

The Pomegranate tree: common in gardens: cultivated more as an oruamental plant than for the sake of the fruit, which is of very inferior quality to that brought from Muscat and Persia, for sale.

> "Nor, on its slender twigs
> Low-bending, be the full pomegranate scorned."

Thomson's Seasons.
272. PSIDIUM. L. Icosandria Monogynia.

From psidion, the Greek name of the pomgranate; root psix-a crumb; name given in allusion to the number of seeds. Lam. $t$. 416. Gaert. $t, 38$.
571. P. Pyriferum. w. \&. a. 1012. Rheed. Mal. 3. t. 34. Rumph. Amb. \#. t. 47.-common white pear-shaped Guava:-in gardens every where.

572, P. Pomiferum. w. \&a. 1013, Rheed. Mal. 3. t. 35. Rumph. Amb. 1. 4. 48.

Round fruited Guava. The one is a mere variety of the other, and the swo species ought to be united. The West Iudies and South America ar

## 274. SYZYGIUM. Gaert. [cosandria Monogyvia.

From the Greek for a yoke,-coupled; name given in allusion to the branches going off in pairs. Gaert. t.33. Don's. syst. 2, p. 848.
574. S. Jambolanum. W. \&a. 1015. Eugenia jambolana. Rox. Flora. 2. p. 484. E. obtusifolia, and E, caryoplayllifulia. Rox. Flora. 2. p. 485, and 486. Rheed. Mal. 5. t. 29. Rumph. Amb. 1. t. 42. Ainslie Mat. Ind. 2. p. 232. and 444.

Jambool.-A large and handsome tree found in various parts of the Concan. It is by far the commonest tree on the table land of Mahableshwur, where it thrives equally well as in the, sheltered spots of the low Country. - The fruit ripens in August and September. Itis sold in the Bazars, and has an astringent rough flavour peculiar to most of the Myrtaceac.
575. S. Caryophyllaeum. w. \& a. 1017. Rheed. Mal. 5, t, 27. Don's. syst, 2. p. 849.

A tree with obovate leaves, and flowers in terminal corymbose cymes.S. Concan. N.
576. S. Zeylanicum. w. \& A, 1020. Rheed. Mal.5. t.20.

A small tree.-S. Concan. N.
577. S. Rubicunbum? w. \& A. 1018.

A shrub, leaves opposite, sessile: flowers in terminal cymes; covered with a resinous substance, before expansion. -The hed of the Yena, and in the ravines about Mahableshwar;-it is quite distinct from the Jumbool, and is probably a new species.
578. S. Salicifolium? w. \& A. 1024.

A shrub, with lanceolate, willow-looking leaves; flowers in March; in lax panicles from the naked branches.-The Rotunda Gliaut, Mahableshwur; -also in the bed of the Qoina above Parr bridge.-The last 2 species require examination.
579. S. Gibsovis. G.

Carambu-A tree; It produces a small oblong fruit which is eaten by bears. -grows on the sides of high mountains, as at Hurrychunderghur \&c. (Dr. Gibson.)
275. CARYOPHYLLUS. L. Icosandria Monogynia.

From the Arabic name of the clove. Quarenphul. Gaert. 't. 33. Lam. t. 417.
580. C. Aromaticus. Don's. syst. 2. p.850. Eugenia caryophyllata. Rox. Flora 2. p. 495 . Ainslie Mat. Ind. 1. p. 593. Rumph. Amb. 2, t.1, 2 and 3. Bot. Mag. t. 2749 and 2750.

The common Clome tree; so named from the French Clow -a nail, to whiche the uncexpmed flowers or Cloves of commeree, bear a considerable resem-blance.-In gardens Bombay, Poway, Salsette: intd. from the Eastern Islands.
276. EUGENIA, w. \& A. Icosandria Monngynia.

From Eugenos-noble; name given in allusion to the handsome appearance of the trees. Gaert. $t$. 33.
581. E. Acris? w. \& A. 1030. Bot. Mag.t. 3135.

Lung.-wild clove tree.-a small tree with whitish, dead-looking bark: leaves smooth, coriaceous: lave a pleasant aromatic smell when bruized. Parell garden; gardens in Mazagaum, not common.
277. JAMBOSA. dc. Icosandria Monogynia, Altered from Schambu, the Malay name of one of the species. Lam. $4,418$.
582. J. Vulgaris. w. \& a 1032. Eugenia jambos. Rox. Flora, 2. p. 494. Rumph. Ainb. 1. t.39. Rheed. Mal. 1.t.17. Asiat. Res. 1. p. 419. Bot. Mag, t. 1696 and 3356.

The Rose Apple. Jambiee, or Gulab Jamb;-a frit tree, commonly cultivatedin gardens; preserves are made of the fruit.
$583 . J$. Malacensis. iv. \& a. 1035 - Eugenia malaccensis. Rox. Flora. 2. p. 483 . Rheed. Mal. 1. t. 18. Rnmph. Amb, 1. t. 37 and 38.f. 1.

The Malacca Jambo: common in gardens; leaves large, polished, flower red, showy, growing from the branches below the leaves; fruit whitish, size of a small orange, Like the Love Apple, (Solanum lycopersicum) it is more pleasant to the sight than the taste.
278. BARRINGTON1A. Forst. Icosandria Monogynia.

1n honor of Davies Barrington, fellow of the society of Antiquaries, Lam. t. 590 and 901 , Butonica. Gaert. $t$. 101.

581, B. Racemosa. w. \& a. 1037. Rox. Flora 2. p. 634. Rheed. Mal. 4. t. 6. Linn. Trans. 17. p. 151.

A tree witl broad lanceolate serrulate leaves, and flowers in pendulnus racemes; fruit ovate, bluntly angled. -The Concans. N.
585. B. Acutangula, iv. \& a. 1038. Rox. Flora. 2. p. 635. Rheed. Mal. 4. t. 7. Rumph. Amb.3. $t$. 116. and Butonica terrestris rubra. 3. t. 115.

A large tree, leaves cuacate obovate, serrulate. Flowers in pendulous racemes; of a dark scarlet colour; fragrant; appear in May and June, Fruit oblong 4 sided, with sharp angles.---near Belgaum. (Mr. Law.) in gardens. at Mihim and onsalsette;---thinly scattered throughout the Ataveesy. (1)r, Gibson.)
loth species are well worthy of cultivation, on account of the beauty of their flowers.
279. Cireya. Rox. Icosandria Monogynia.

Naned after the late Revd. Dr. Carey, of Serampore, Bengal.
586. C. Arborea. w. \& a. 1039. Rox. Flora. 2. p. 638. Rox. Cor. 3. t. 218. Rheed. Mal. 3. t. 36.

Koombah, or Kumba.---A large tree; leaves deciduous in the cold weather. Flowers in March and A pril; fruit ovate, size of an apple; has a very pecaliar and rather unpleasant smell;---no use is made of it.--Malabar and Parell hills, Bombay; Jungles in Salsette, common; also along the Ghants.---In Guzerat; where it attains a majestic size. (Dr. Gibson.) In Kandeslı. (Lieut.
Auld.)
The bark is used by Matchlock men. (Captain Twemlow.)
280. FOETIDIA. Com. Icosaudria Monogynia.

From foeteo;--so mamed from the smell of the wood. Lam. t. 419.

GG. Cul. tuct. limb usu. 4 sometimes 2.3 . 6 dir. cost. val. pet $=$ caliscy. Reg. aost krited. Jtam ha or 8 epiy. Jilam

 actar. or aff. Simp. leques.

## 75

587. F. Maurytiana. Rox. Flora. 2. p. 480. Don's. syst. 2. p. 871.

A small tree, with veinless leaves, of a reddish colour heneath; flowers white; appear in the rains. Fruit much like that of the Sonneratia.---Parell garden; probably introduced from the Mauritius where it is indigenous, and known by the name of Bois puant.

ORDER 59. ONAGRARIA. w. \& A. Prod. 1. p. 335.

$$
\text { The Evening Primrose Tribe, Lind. nat. syst. p. } 56 .
$$

281. Cenothera. l. Octandria Monogynia.

Oinos--wine, thera--a snare. (Rom. C. 11. V.9.) the roots of one of the species were formerly eaten to give a zest to wine, as olives are at the present day. Lam. t. 279.
588. CE. Biennis. Don's, syst. 2. p. 685. English Botany, t. 1534.

Common evening Primrose;--a biennial erect growing plant, with pale yellow fragrant flowers. In gardens Belgaum. (Mr. Law.)
589. CE. Grandiflora. Don's. syst. 2. p. 685. Bot. Mag. t. 2068.

Dapooree, intd. from the Cape of Good Hope, (Dr. Lush.)
590. EE. Molissima? Don's syst. 2.p. 686.

Native of South America.--Lı gardens Belgaum. (Mr. Law.)
591. CE. Acaulis. Don's. syst. 2. p. 688. Bot. Reg. t. 763.

Fowers white, changing to red as they fade;---native of Chili:--Dapooree. (Dr. Lush.)
282. JUSSIAEA. L. Octo.-Decandria Monogynia.

In memory of the Jussieus, the celebrated family of French Botanists. Gaert. t. 31. Lam, t. 280.
592. J. Repens. w. \& A. 1040. Rox. Flora. 2. p. 40!. Rheed. Mal. 2. t. 51. Linn. Trans. 14. p. 205. Don's, syst. 2. p. 692.

An annual aquatic plant, common on the margins of the tanks, and in rice fields during the rains.
503. J. Villosa. w. \& A. 1041. J, exaltata. Rox, Flora. 2. p. 401. Rheed. Mal. 2. t. 50. Linn. Trans. 14.p. 303. Bot. Rep, t. 621.

Herbaceous perenuial plant; grows in moist places at Kandalla, and throughout the Concans.

The very beautiful Epilolium angustifolium, or Willow herb, native of Scotland and Sweden, is closely allied to this genus.
283. LUDWIGIA. Rox. Tetrandria Monogynia•

In honour of Luducig, formerly professor of Medicine at Leipsic. Lam. $t$. 77. Gaert.t. 31.
594. L. Parviflora. w. \& a. 1042. Rox. Flora. 1. p. 419. Caramby. Rheed. Nal. 2. t. 49. L. diffusa. Don's. syst. 2.p. 696.

A small annual plant; common throughont the Concans during the rainy season. It has the capsule of a Jussica, 4 sided, 4 celled.
284. TRAPA, L. Tetrandria Monogynia.

From calcitro-to kick, spur; name giren in allusion to the spur-like processes with which the fruit is furnished;--Lam, t. 73. Giaert. t. 26. Tribuloides. Tourn. t. 431 ,
595. T. Bispinosa. w. \& A. 1043. Rox. Flora. 1, p. 42s. Rox. Cur. 3. t. 23t. Rheed. Mal. 11. $t .33$. Asiat. Res. 1. p. 253.

Shingaree.-The fruit is eaten by the uatives on fast days. Irr tanks throughout the Concans. N.-In Goozerat it forms an important article of food to certain classes. The Bhoie, or Hamal caste of fisliermen take precautions to preserve it from extirpation, to which it might be liable when the tanks dry up, in the Oonale or hot season, by making nurseries in the pools of rivers, and transplanting it at the beginning of the rains into tanks.-The karkwa or river tortoise is another enemy which they have to contend agaiust.

A second purpose to which the fruit is converted, is, in making a dye of a red colour, which is used along with a yellow dye obtained from the flowers of the kackria, (Butea frondosa.) during the Hooly festival,
"The revel of the earth, the mask of India."
(Dr. Burn. C. S. Kairah.)
Childe Harold.
Dr. Royle says T. natans, abounds in the lakes of Cashmere.

## ORDER 60. HALORAGEA. W. \& A. prod. 1. p. 337.

285. SERPICULA. L. Monoecia Tetrandria.

From serpo---to creep; the species are small creeping plants, Lam. t.758,
596. S. Verticillata. Rox. Flora. 3.p. 578. Rox, Cor. 2. t. I64. Udora verticillata. Sprengel. Elodea granatensis. Humbold.

The plant here referred to has a considerable resemblance to the Empetrum nigrum, or Crow berry, on which grouse feed on the moors in Scotland. It grows on the margins of pools in the Yena river at Mahableshwur, but as the flowers have not yet been seen, it may probably belong to a different genus, from Serpieula.
286. MYRIOPHYLLUM. L. Monoecia Tetrandria.

Myrios.-a myriad, and phyllon-a leaf: in allusiou to the numerous divisions of the leaves. Gaert. t. 68. Lam, t. $775^{-}$
597. m. Tetrandrum, w. \& a. 104s. Rox. Flora. 1.p. 451.

A small aquatic plant with verticilled leaves.-in tanks throughout the Concans.

ORDER 61. CUCURBITACEAE. W. \& A. Prod. 1. p. 340.
The Gourd Tribe. Lind. nat. syst. p. 192.
287, LAGENARIA. Ser. Monadel phia Tri andria.
From Lagena-a bottle; inallusion to the shape of the fruit. Lam. t. 795. Gaert. 2. $\boldsymbol{t}$. 88.
598. L. Vulgaris. w. \& a. 1051. Don's, syst. 3, p. 4.

Cucurbita lagenaria. Rox. Flora. 3. p. 718. Rumph. Amb. 5.t. 144. Rheed. Mal. 8, t. 1, 4 and 5. Lam. Illust. t. 795. f. 2.

Hurrea Kuddoo;-white Pumpkin; bottle gourd;-very commonly cultivated, and of great importance to the natives as an article of food. The hard woody cortex is used as a bottle for containing honey \&c.

A variety called Kurwa Bopla is generally used as a buoy for swimming. across rivers, transporting baggage $\& c$. 1t is by no means so common as the sweet bottle gourd. (Dr, Gibson.)
288. Cucumis. Monoecia Monadelphia.

Sikuos-a Cucumber. (Arist. in Acharn.)-Sikueraton-a garden of Cu cumbers. (Isaiah C. 1, v. 8.) Gaert. t. s8. Lam, t. 795.
599. C. Melo. w. \& A. 1052. Rox. Flora. 3. p. 720. Moris. Hist. 1. t. 6. f. 4. Black well. $t .329$.

The Melon;-Khurbooza; -cultivated all over India. - It seems to have been a favourite food with the 1sraelites in Egypt, as they put Moses in mind of it in the Desert.
"We remember the fish which we did eat in Egypt; the Cncumbers and the Melons." (Peponai.) (Numbers 11, 5.)

600, C. Momordica. w. \& a. 1053. Rox. Flora 3. p, 720.
Cultivated; much like the common cucumber, but smoother, and larger.
601. C. Sativus. w. \& A. 1054. Rox, Flora. 3. p. 720. Blackwell. $t$. 4. Mullen belleri. Rheed, Mal. 8. t. 6. Moris. Hist. 1. t. 6.f. 6. Lam. Illust. t, 795.

Keera, Kankurai-common Cucumber, cultivated to a considerable extent as an article of food among the natives.
"Pant for the praise of dressing to the taste
Of critic appetite, no sordid fare,
A cncumber."

## Cowper's Task.

602. C. Utilissimus. w \& A. 1056. Rox. Flora. 3. p. 721.

Field Cucumber, also called Kunk arai or Kakri;-cultivated much more commonly than the last.
603. C. Colocynthis, w. \& A. 1062. Rox. Flora. 3. p, 719. Moris. Hist. 1. t. 6.f. 1. Blackwell. t. 441. Ainslie. Mat, Ind. 1, p. 84.

Indrayan, or Indophul, the Colocynth plant;-fruit round smooth, size of an Orange, streaked.

Common in Salsette Jungles; on the plains of the Deccan; in great abundauce on the sea shores of Guzerat. (Dr. Gibson.) There is a sweet variety which is edible, and cultivated. (Mr. Vaupell.)

Perhaps the Indian Colocynth is different from the Turkish, though both would appear to possess the same medicinal qualities.

There is a variety, or probably a distinct species on the waving downs south of the Beema;--the leaf is nearlygentire, and the plant is destitute of tendrils. (Dr. Gibson.)
289. LUFFA. Tourn. Monoecia Pentandria.

The Arabic name of one of the species, altered. Cav. Icon. 1. $t$. 9.
604. L. Pentandra. w. \& a. 1064. Rox. Flora. 3, p. 712, Rheed. Mal. 8, t. 8. Rumph. Amb, 5. t. 147.

Gosulee Toorai.-Fruit oblong, round, smooth, marked with longitudinal lines; from 1 to 3 feetlong, and about 3 inches in dianeter. Cultivated.
605. L. Acutangula. w. \& a. 1065. Rox. Flora. 3, p. 713. Rheed. Mal. 8. t. 7. Rumph. Amb. 5. t. 149.

This is also called Gosalee or Toorai, and is commonly cultivated. The leaves resemble those of T'ussilago petasiles.
606. L. Amara. w. \& a. 1066. Rox. Flora. 3. p, 715. Pluk. t. 172. f. 1.

Fruit oblong, tapering towards each end, 3 or 4 inches long, bitter; medicinal. N.

Grows wild abont Bombay in the rains, and throughout the Concans.
290. BENINCASA. Savi. Monoecia Triandria.

In lionour of Beuiucasa, an Italian Nobleman.
607. B. Cerifera. w. \& a. 1070. Cucurbita pepo. Rox. Flora, 3. p. IIS. Rlieed. Mal. 8. t. 3.
$P$ andree Chickee;-fruit sub-rotund, 12 or 15 inches in diameter, haisy
when young; smooth with a whitish bloom when ripe.-Commonly cultivated in Bombay and the Deccan.

## 291. BRYONIA. L. Monoecia Monadelphia.

From Bryo-to sprout out; in allusion to the rapid growth;-a name equally applicable, to all the tribe, from Jonah's Gourd downwards. Gaert. t. 88. Lam. t. 796.
608. B. Scabrella. w. \& a. 1074. Rox. Flora. 3. p. 724.

Cucumis maderaspatanus. Linn. Pluk. t. 170. f. 2. Rheed. Mal, 8. t. 13.
Creeping or climbing plant, leaves toothed, scabrous;-fruit size of a pea, smooth, striated. Common about Bombay in the rains.
609. B. Umbellata. w. \& a. 1077. Momordica umbellata. Rox. Flora. 3. p. 710. Rheed. Mal. 8. t. 26.

Fruit oval, size of a pigeons egg; when ripe, red, smooth.-Common in hedges and uncultivated places about Bombay during the rains.
610. B. Laciniosa. w. \& a. 1072 . Rox. Flora. 3. p. 728. Rheed. Mal. 8. 8. 19. leaves palmate, fruit size of a cherry, smooth, round;-common in hedges \&c.
611. B. Garcini. w. \& a. 1071. Rox. Flora. 8. p. 727.

Sicyos Garcini. Linn, Burm. Ind. t. 57, f. 3.-Berries small, smooth, red; inversely kidney shaped. Common in the rains.
292. COCCINIA. w. \& a. Dioecia Monadelphia.

Coccineus-scarlet: in allusion to the bright red fruit.
612. C. Indica. w. \& A. 1084. Momordica Monadelphia. Rox. Flora. 3. p. 708. Bryonia grandis. Willd, 4. p. 617, Rheed. Mal. 8. t. 14. Rumph. Amb. 65. t. 166. f. 1. Burm. Zey. t. 19. f. 1. and 2.

Leaves cordate, 5 angled, with a few teeth round the edges; fruit oblong, smooth, about 2 inches long by oue in diameter; -when ripe red;---in an unmature state marked with 10 white streaks.

Common in every hedge, and on old walls about Bombay, during the rains.

## 293. MOMORDICA. Monoecia Monandria.

From mordeo-to bite; - the seeds appear as if bitten;-or perhaps from the general appearance of the fruit;-Gaert. 2. t. 88. Lam. t. 794.
613. M. Charantia. w. \& a. 10s6. Rox. Flora. 3. p. 707. Rumph. Amb. 5.t. 151. Pnudi-pavel. Rheed. Mal. 8. t. 9. Pavel. Rheed. Mal. 8. t. 10. Bot. Mag. t. 2455. Ainslie. Mat, Ind. 2. p. 275.

Purwud, Karaila:-very commonly cultivated about Bombay in the rains. Fruit 12 or 15 inches long, and 2 to 4 in diameter; strangely notched, and ridged;-in appearance like a crocodiles back.

It requires to be steeped in salt water befure being cooked. (Dr. Gibson.)
614. M. Dioica. w, \& A. 1087. Rex. Flora. 3.p.709. Ainslie. Mat. Ind. 2. p. 274. Bem. paval. Rheed. Mal, 8. t. 18 and 8. t. 12. (female) cultivated; fruit size of a pigeons egg, knobbed.
294. TRICHOSANTHES. Monoecia Monadelphia.

From thrix-a hair, and anthos-a flower; the flowers are prettily fringed. Lam. t. 79 1. Don's. syst. 3. p. 38.
615. T. Anguina. w. \&a. 1093. Rox. Flora. 3. p. 701. Rumph. Amb. 5. t. 148. Bot. Mag. $t$. 722. Ainslie Mat. Ind. . p. 392. Lam. t. 794. f. I.

Chiconda. - Srake gourd.-commonly cultivated about Bombay,--fruit long, spindle shaped.
616. T. Nervifolia. w. \& a. 1091. Tota-piri. Rheed. Mal. 8. t. 17.

Leaves cordate, acmminate;-fruit ovate. Grows wild in the Concans,

414
617. T. Cuspidara. w. \& A. 102z. T. Candata, Willd. 4. p. G00. Rheed. Mal. s, t. 16.

Perhaps a mere variety of the last.
618. T. Cucumirina. w. \& a. 1092. Rox. Flora. 3. p. 702. Pada ralam. Rheed. Mal. 8. t. 15. T. laciniosa. Ainslie. Mat. Ind. 2. p. 296.

Grows wild in hedges \&c.-fruit somewhat oblong, 2 or 3 inches long and 1 to $1 \frac{1}{2}$ in diameter.
619. T. Palmata. w. \& a, 1095. Rox. Flora. 3. p. 704. Modecca bracteata. Lam. Ency, Meth. Ainslie Mat. Ind. 2. p. 85.

Mukal, Koundul?-A large climbing plant with palmate leaves;-fruit globular, smooth, of a bright red colour; size of an orange.

In Jungles in the Concans and on the Ghauts pretty common; at Mahableshwur. (Dr. Murray.)

The root and stem is much esteemed in diseases of cattle, as inflamation of the lungs \&c. (Dr. Gibson.)
295. CUCURBITA. L. Monoccia Monadelphia.

The Latin name for the Gourd;-Greek Kolokunthe. Gaert. 2. t. 88. Lam. t. $79 . \%$.
620. C. Maxima. w. \& a. 1096. C. melopepo. Rox. Flora. 3. p. 719. Rheed. Mal. 8. t. 2. Moris. Hist. 1. t. 8. Kumph. Amb. 5. t. 145.

Squash Gourd,-fruit large, roundish, size of a Pumalo;-commonly cultivated.
621. C. Citrullus. w, \& A. 1098. Rox. Flora. 3. p. 719. Ainslie. Mat. Ind. 1. ข. 217. Anguria indica. Kumph. Amb. 5. t. 146, f. 1. Moris. Hist. 1. t. 6. f. 2. Pluk. t. 164. f. I.

Tarbooza.-Water Malon; extensively cultivated, and almost as much prized in India as it is in Egypt, and the sonthern parts of Europe.

Probably it is the fruitililton had in view, at the entertainment of the Angel in Paradise.
" I will haste and from each bongh and brake,
"Each plantand juiciest gourd, will pluck such choice
" To entertain our Angel guest.
Eve, in Book 5. Paradise Lost.
622. C. Ovipera. Don's. syst.3. p.41. bc. prod. 3.p. 317-C. pyriformis. Lob. Hist. 367.f.2. C. polymorpha pyridaris. Lam. Ency. Meth.

Vegetable Marrow; -reckoned one of the most nourishing and wholesome of the tribe.

In gardens Bombay; not very common;-Intd. from the Cape Good Hope. It is indigenous about Astrachan.
296. TELFAIRIA. Hooker. Dioecia Pentandria.

In honor of the late well known Mr. Telfair, Superintendent of the Royal garden at Mauritius.
623. T. Pedata. Bot. Mag. t. 2751 and 2752. Feuillia pedata. Bot. Mag. t. 2681. Ampelosicyos scandens. Don's. syst. 3. p. 39.

A large perennial plant, ruming over trees on the eastern coast of Africa, and bearing a fruit 2 or 3 feet long; full of seeds, which yield oil equal to that of the finest olives.

The flowers are very heautiful, and fringed as in the genus Trichosunthes.
Introduced at Bombay by Mr. Nimmo. This plant if the soil and climate suit it, of which there is little doubt, may hereafter prove of great importance to India.

ORDER 62. PAPAYACEAE. W. \& A. Prod. 1. p. 851.
The Papan Tribe. Lind. nat. syst. p. 191.
297. CARICA. Linn. Dioecia Decandria.

From Cariu, in Asia minor, of which country it was erroneously supposed to be a native. Lam. $t$. 821. Gaert. 2, t. 122.
624. C. Papaya. w. \& a. 1099. Rox. Flora. 3. p. 824. Rumph. Amh. 1. t. 50. Bot. Reg. t. 459. Bot. Mag. t. 2898 and 2899.

Papaja. Rheed. Mal. 1. t. 15. Ainslie Mat. Ind. 2.p. 343. Asiat. Res. 2. p. 162. Wernerian Trans, vol. 3.

The Papaw tree, common about every village; native of the banks of the Mississipi.

On the West Coast of Africa, the sickening smell emitted by the flowers, is considered the cause of much sickness.

## ORDER 63. PASSIFLOREE. W. \&A. prod. 1. p. 352.

The Passion-Flower Tribe. Lind. nat. syst. $p, 148$,
293. MODECCA. Rox. Monadelphia Pentandria.

The Malabar name adopted. Don's, syst. 3. p. 58.
625. M. Trllobata? loox. Flora. 3. p. 132. Rox. Cor. 3. t. 297.

Paratrope--a bending: in allusion to the bent petioles. Gaert. t. 178. Lam.
t. 217.
664. P. Venulosa. w. \& a. 1163. Rheed. Mal. 7. t. 28. Aralia digitata. Rox. Flora. 2. p. 187.

A small, tree with digitate leaves: in the late Col. Hough's garden, Colaba.
ORDER 73. LORANTHACEE. Dc. prod. 4. p. 277.
The Mistletoe Tribe. Lind. nut. syst. p, 208.
325. VISCUM. L. Monoecia Tetrandria.

Viscus-bird-lime;-in allusion to the clammy nature of the berries. Gaert. t. 27. Lam. t. 807. Don's, syst. 3. p. 402.
665. V. Attenuatum? w. \& a. 1174. V. opuntioides. Rox. Flora. 3. p. 764. Sloane Jam. Hist. 2t. 201. f. 1?

Indian Mistletoe;--a leafless parasite, with flexile stems.-Common throughout the Concans, and on the Ghauts. It seems to grow indifferently on all kinds of trees; only preferring the more aged, from their affording perhaps, the more nourishment.-Parasites "advance their pride against the power that bred them."

It is interesting from its connection with the representative of the family in England; ( $V$. album. Eng. Bot. $t$, 1470.) which, according to Washington Irving, still holds a place in Christmas festivities. (see Christmas Eve, in the Scetch Book. Vol. 2.)

> "WAll your temples strow With laurel green and sacred mistletoe." The Druids held it sacred. (Henry's Britain.)
666. V. Wightianum. w. \&A. 1169.

Stem and branches round, jointed; leaves flat, obtuse, coriaceous;-common on trees at Mahableshwur, towards the Rotunda Ghaut.

The plant here referred to, has something of the habit of a Loranthus.
326. LORANTHUS. L. Pentandria Monogynia.

Lorum-a thong-anthos-a flower; in allusion to the shape of the petals. Lam, t. 258. Gaert, t. 27.
667. L. Obtusatus. w, \& a. 1178.

Parasitic; leaves large; flowers in long racem es; appear in May.
Mahableshwur; the Rotunda Ghaut• \&c. not common;-a very beautiful species. One plant grows at the west entrance to the "Craig," Mahableshwur.
668. L. Loniceroides. w. \& a. 1180. Rheed. Mal. 7. t. 29.

On trees;-the Ghants and jungly parts of the Concan.
669 L. Buddleioides. w. \& A. 1133. L. Scurrula. Rox. Cor. t. 140. Rox. Flora. 1, t. p. 550.

On Asana, and Kurmul trees, at Kandalla;-flowers Febrnary and March.
670. L. Longiflorus. w. \& a, 1186. Rheed, Mal. 10. t. 4. Rox. Flora. 2. p. 217. (Ed. Wall.) Rox. Cor. t. 139. L. bicolor. Rox. Flora. 1. p. 548.

A pretty plant, with honeysuckle-looking flowers;-common on mango trees, Bombay, and throughout the Concans; flowers chiefly in March and April.
671. L. Amplexifolius. w. \& A. 1187.

Baingoolee;-flowers red, very showy;-appear in the cold season.-On trees, Kandalla Ghaut.
672. L. Elasticus. w. \& A. 1192. Rheed. Mal. 10. t, 3. On trees; the Concans.
673. L. Ampullaceus. Rox. Flora. 1. p. 552.-the Concans. N.
674. L. Kannell. w. \& A. 1197. Rheed. Mal. 10. t. 5.---the Concans.
675. L. Lageniferus. Wight. Mss.

Leaves alternate, short petioled, veined;---flowers, in a curious, dull red, bell-shaped involucre, which grows sessile on the branches; appear in the rains.---This strange looking parasite is to be found on kanta koomla (Sideroxylon) trees at Kandalla.---It is by no means common.

679. N. Parvifolia. w. \& a. 1207. Rox. Flora. 1. p. 513. Rox. Cor. t. 52.

Kuddum.--A large tree; generally met with about villages throughout the Concans;-common in the Mawul districts; the wood is much used for various purposes connected with gumery. (Dr. Gibson.)
680. N. Cordifolia, w. \& a. 1208. Rox Flora. 1.p. 514. Rox. Cor. t. 53.

Edoo, Eydee.--A middle sized tree, common throughout the Concans; the Bombay Carpenters use the wood for planking \&c; but it is of a very inferior description, and soon decays.
681. N, Cadayba. Rox. Flora. 1. p. 512. N. purpurea? w. \& a. 1209. Rheed. Mal. 3. t. 33. Linn. Trans. 15. p. 90. Rumph. Amb. 3. t. 19. Asiat. Res. 4. p. 257. Don's. syst. 3. p. 467.

Nhew. Cuddam. Cadamba;-" the holiest of Indian trees;" grows to a very great size;-common ahout villages in the S. Concan. Some very stately trees are to be found in a mango grove at Poladpore. The fruit is about the size of a small orange, and is eaten by the natives.

Wight and Arnott in their Prodromus remark, that N. Cadamba is not a native of the Peninsula. This is surely the tree.
329. HYMENODYCTION. DC. Pentandria Monogynia.

Hymen-a membrane, and dyction-a net; the seeds are girded by a netted inembrant. Dow's. syst. 3 p. 480 .
682. H. Excelsum. w. \& A, 1211. Cinchona excelsa. Rox. Cor.t. 106. Flora. 1. p. 529. Ainslie Mat. Ind, 2. p. 341. Wight's Icoues t. 79.

Kurdwah--Kurwah, Koodyee.-A tree, with small greevish flowers in terminal panicles; the bark possesses the bitteruess and astringency of Peruvian bark, and may prove an useful substitute; - common along the Ghauts; flowers'in the rains.
683. H. Thyrsiflorum. dc. prod. 4. p. 3358. Cinchona thyrsiflora. Rox. Flora. 1. p• 530. Don's. syst. 3. p. 480.

Seereed. Kurwee;-a tree; flowers in July. in drooping thyrses; some what resembling Panicum italicum. Salsette and Jowar Jungles. H. flaccidum. Wall. As. Pl. rar, 2, t, 188. is a closely allied species.
684. H. Obovatum. w. \& A. [212. Rox, Flora 2. p. 153. (Wallichs Ed.) Wight's Icones Part. 4 t. 30. Ben-teka. Rheed. Mal. 4. t. 30. on Dr. Wight's anthority.

A large tree; leaves obovate, acuminate, smooth; flowers in the rains; They have a powerful pungentsmell, like that of strong vinegar. - The Ram Ghaut. (Mr. Law.)

Buchanau Hamilton in his Commentary on the Hortus Malabaricus, published in Linn. Trans. passes over the Ben-teka above referred to, merely hinting, that he can find no notice taken of it, nor does he appear himself to have had any idea of what family it belonged to. Dr. Wight feels confident that it is identical with his $H$. obovatum. (Wight Mss.)

There is a noble tree near the foot of Parr Ghant, the seed-vessels of which bear a strong resemblance to the flowers of the Ben-teku. It flowers in March; but its affinities have not yet been traced. It seems altogether|different fromany thing in the known vegetable kingdom, and may prove the head of a new and undiscovered family. -The natives call it "Jungle Bendy," but it is far removed from the Malvaceae.

## Tribe 2. Gardeniaceae.

330. MUSSAENDA. L. Pentandria Monogynia.
the Ceylon name;-Gaert. t. 28. Lam, t. 157. Don's, syst. 3 p. 489.
331. M. Frondosa. w. \& a. 1215. Rox. Flora. 1, p. 557. ISelilla. Rheed. Mal. 2. t. 18. Rumph. Ainb. 4. t, 51. Burm. Zey, t. 76.

Sarvud.---Lanchout.---Bhootcase. A shrub; flowers in the rains; of a deep golden colour. It is easily distinguished by the large white bractea-formed leaf, growing out of the calyx. - In. gardens Bombay, -common on the Ghauts:-the natives use it as a charm to drive away Dæmons.
331. GARDENIA. w. \&A, Pentandria Monogynia.

Dr. Garden-of Charleston, Carolina; a correspondent of Linnaeus, Lam. t. 158. Gaert.t. 23, 177, 193, 194. Don's.syst, 3, p. 496.
686. G. Enveandia? w. \& A. 1217. G. latifolia. Rox. Cor. t. 134. Flora. 1. p. 706.

Pandroo.--Papura.-Karinga.--A tree, unarmed; flowers large, white fragrant; fruit round; size of an apple.---Parell garden;-near Nagotnah.---the Tull-Ghaut.---Jamboseer, Guzerat. (Mr. Vaupell.) Perhaps the tree here referred to, is the $G$. latifolia of Wight; the fruit somewhat resembles that of Careya arborea---Jungles in Kandesh, where it is called Taindroo. (Lieut. Auld.)
687. G. Latifolia. w. \& a. 1218. Gaert. 3. t. 193.f. 3.

A tree; unarmed; leaves opposite, or in threes.--Fruit large round.---Duddi on the Gutpurba. (Mr. Law.)
688. G. Lucida. w. \& a. 1219. Rox. Flora. 1. p. 707. Pluk. t. 367.f. 1.

Decamalee.---A large shrub or small tree; in gardens, Bombay; grows wild on Elephanta; Kennery Jungles; S. M. Country. (Mr. Law) Flowers in June; pure white, fragrant;---It furnishes the gum called Decamalee.
689. G. Gummifera, w, \& a. 1220. G. arborea. Rox. Flora, I. p. 708.

An unarmed tree, with resinous buds, like the last species.-.-Very common about Duddi on the Gutpurba. (Mr. Law.)
690. G. Montana. w. \& a. 1223. Rox. Flora. 1. p, 709.

A tree, with short rigid spines;---leaves oblong, with the margins reflexed; almost sessile; fruit size of a chicken's egg.---In the Ataveesy; rare. (Mr. Law.)
691. G. Florida. Rox. Flora. 1. p. 703. Rumph. Amb. 7. t. I4. f 2. Bot. Mag.t. 26273349 and $t .1842$. Don's. syst, 3 p. 496.

Fundhe raja.-- I small unarmed shrub, of alow growth.---In gardens; pros bably intd. from China;---flowers in the rains, pure white, and very fragrant.
332. RANDIA. w. \& A. Pentandria Monogýnia.

Dr. Rand-formerly of Chelsea Botanic garden. Lam. t. 156. Ceriscus. Gaert. 1. 28.
$\checkmark$ 69\%. R. Dumetorum. w. \& a. 1224. Posoqueria dumetorum. Rox. Flora. 1. p. 713. Gardenia dumetorum. Rox. Cor. $t$. 136. Ainslie. Mat. Ind. 2. p. 185̃. Don's. syst. 3. p. 500 Pluk. t. 9s. f. 6. Lam, t. 156. f. 4.

Ghelah.--G'aerah.---Peiraloo.-A tall shrub, or small tree; armed; flowers white, changing to yellow; fragrant; fruit like a crab apple: used for poisoning fish. Don. notices this, but he makes a mistake in saying the shrub is frequent on the sea shore; (it rather affects hill tops) and also in saying that Cocculus indicus does not grow in these parts. It does grow throughout the Concans and Malabar, and is also used for poisoning fish.-Very common at Maliableshwur. (Dr, Murray in Bombay Med. Trans, vol. 1.)-all along the Ghauts; Kennery Jungles \&c.-Guzerat. (Mr. Law.)
693. R. Uliginosa. w. \& a. 1230. Posoqueria uliginosa. Rox. Flora. 1. p. 712. Rox. Cor. t. 135. Dor's. syst. 3. p. 500.

A tall, armed shrub, with straight rigid, 4 sided branches; flowers in May; white, fragrant; frnit size of a small lemon,-By the banks of rivers in the Concan.-S. M. Country• (Mr. Law.) flourishes in the Ataveesy, where the Coolies roast and eat the fruit. (Dr. Gibson.)

69 4. R. Longispina. w. \& A. 1227. Posoqueria longispina. Rox. Flora. 1. p. 716, Don's. syst. 3. p. 501.

A tree; armed with long, straight thorns;-leaves deciduous in the cold weather; fruit size of a small wood apple. - Common in the Jungles of Kandesh; -in the Ataveesy, rare. (Dr. Gibson.)
333. GRIFFITHIA. w, \& A. Pentandria Monogyuia.

Dr: Griffith, of the Madras medical establishment.
695. G. Fragrans. w, \& a. 1235 . Posoqueria fragrans. Rox. Flora. 1. $p^{\cdot 717 .}$ Ben-kara. Rheed. Mal. 5. t. 35. Rox. Uor. $t$. 197. Stylocoryne malabarica. D. C. syst. 4. p. 377. Stylocoryne Pandaki? Dox's, syst. 3. p. 495.

An armed slurub, with white flowers in terminal corymbs; fruit red; size of a pea.-S.Concan. N.
334. STYLOCORYNE. w. \& A. Pentandria Monogynia. Stylos-a style, koryue-a club; the style is club shaped.-Gaert. t. 197.
696. S. Webera. W. \& A. 12:36. Rheed. Mal. 2. t. 23. Webera corymbosa. Rox. Flora. 1. p, 696. Cupia corymbosa. Don's. syst. 3. p. 506. Bot. Regt. $t$. 129.

A large branched shrub, with small white flowers in terminal corymbs. S. Concin. N.-Goa Jungles. (Dr. Lush.)

Tribe 3. Hedyotidee. w. \& A. p. 401.
335. WENDLANDTA. w. \& a. Pentandria Monogynia.

Wendland, a Botanist who wrote about the leafless Acacias of N. S. Wales.
607. W. Notonina. w. \& A. 1239. Cupia thyrsoidea. dc. Prod. 4. p. 394. Don's. syst. 3. p. 507.

A shrub; flowess in March; pure white, fragrant; in terminal panicles.banks of the Yena by the Wye road side, Mahableshwur; rare.-Dr. Wallichs specimens (Cat. No. 2673.) were collected by Mr. B. Noton, on the Neil-gherries;-Don joins with it, Roxburgh's Iara congesta, but they are proba-
bly very different plants. He also inserts the same plant under the name. of Cupia thyrsoidea.

This is a very ornamental shrub when covered with a profusion of flowers.
336. DENTELLA. w. \&A. Pentandria Monogynia.

The segments of the corolla are furnished with small teeth. Lam. t. 118.
698. D. Repens. w. \& a. 1246. Rox. Flora. 1. p. 5:32. Rheed. Mal. 9. 6. 39. Rumph. Amb, 6. t. 170.f. 4. Don's. syst. 3. p. 524.

Herbaceous plant.-common in Salsette \&c.
337. HEDYOTIS. L. Tetrandria Monogynia.

Hedys-sweet, ous--ear, the leaves of some species are ear-shaped. Gaert. t. 3U. Don's. syst. 3. p. 524.
699. H. Lawsonie. w. \& a. 1217. Rheed. Mal, 4. t. 57.

A shrubby plant.-the Concans. N.
700. H. Rheedei. w. \& A. 12j4. Rlieed. Mal. 10. t. 25. Burn. Zey. 6. 108. $f$. 1,-herbaceous: common.
701. H. Iuricularia. w. \& a. 1260. Rheed, Mal. 10. t. 32.-herbaceous: common in the rains, Gaimaril. resorted to in diseases of cattle N.
702. H. Umbellata. iv, \& a. 1263. Oldenlandia umbellata. Rox. Flora. 1. p. 421, Rnx. Cor. t.3. Don's. syst. 3. p. 529.

Indian Madder-A suffruticose plant.-common in the Concans. Root used in dying red, purple, and brown orange.
703. H. Burmanniana, w, \&A. 1270. Oldenlandia biflora. Rox. Flora. 1. p. 422. Rheed. Mal. 10. t. 35.-common; annual.
701. H. Heynei. w. \& A. 1273. Oldenlandia lerbacea. Rox. Flora. 1. $p$. 424. Rheed. Mal. 10.t. 23. common; annual.

Tribe 4. Guettardacee. w. \& a. p. 418.
335. MORINDA, l. Pentandria Monogynia.

Morus-indicus-Indian Mulberry.-Lam. t. 153. Gaert. t. 29.
705. M. Citrifolia. w. \& a. 1286. Rox. Flora, 1. p. 541. Rheed. Mal. 1. 1. 52. Rumph. Amb. 3. t. 99. Don's, syst. 3. p, 544.

Aal.-A small tree, common in Bonbay; extensively cultivated in Kandesh, Berar, Surat, and about Punderpore in the Deccan: the roots are used in dying. For a particular description, see Asiat. Res. 4. p. 38.- They are partly dug up the second year, and are in perfection the third. (Dr. Gibson.)
706. M. Tinctoria. w. \& A. 1287. Rox. Flora. 1. p. 543.

A small tree, common on Elephanta\&c. probably it is the wild state of the last species.
707. M. Exserta. w. \& A. 12S9. Rox. Flora, 1. p. 545.-a small tree:common in the Ataveesy Jungles. (Mr. Law.)
708. M. Tomentosa. w. \& A. 129:. M. mudia. Hamilton in Linn. Trans. 13. $p$. 536.-a shrub, young branches 4 angled-at a village below Poorundher Fort, in the Deccan. (Dr. Gibson.)
709. M. Umbellata. w. \& a. 1293. M. scandens. M. Tetrandra. Don's. syst. 3. p. 546. Rox. Flora, 1. p. 548. Rheed, Mal. 7. t. 27. A climbing shrub -S. Concan, N.
339. VANGUERIA. w. \& a. Pentandria Monogynia.

From the Madagascar name. Lam. t. 159. Gaert. t. 193.
710. V. Spinosa? Rox. Flora. 1. p. 536. V. Edulis. w, \& a, 1294. Don's. syst, 3. p. 549.

Rubus---red: in allusion to the dyeing properties of the roots, Lam. $\boldsymbol{t}$. 60.
732. R. Condifolia, w. \& A. 1355 . R. munjista. Rox. Flora. 1. p. 374. Asiat. Res, 11, p. 177. Pallas. Itin. 3. t. 50.f. 1. Ainslie Mat. Ind. 1. p. 202. and 2. p. 182.

Indian Madder.-A perennial climbing plant, running over trees; leaves 4 fold, hispid;-common at Mahableshwur;-it bears a considerable resemblance to Galium aparine, or Goose grass of England.

Madder is imported at Bombay from the Red Sea, but whether it is the roots of this or a different remains to be determined.

35 ORDER 76. VALERIANE E. Don's. syst. 3. p. 665.
The Valerian Tabe. Lind. nat. syst. p. 197.
353. VALERIANA. L. Triandria Monogynia.
733. V. Leschenalifin? w. \& a. 1363.

Herbaccous, erect, about a foot high.-Kandalla, in the rains; not common.
-the plant referred to requires eximination. The spikenard of the ancients belongs to this tribe.
354. CENTRANTHUS. dc. Monandria Monogynia.

Kenthron-A spur, anthos-a flower; the flowers are spurred.
734. C. Ruber. Dons. syst. 3. pr. 672. Valeriana rubra. Lam. Eng. Bot. t. 1532.

Annual; in gardens, not common. It is a native of the northern parts of Africa;-also found on Mount Yesuvius, and in Lima.
355. SCABIOSA. L. Tetrandria Monogynia. Gaert. t. 86.
735. S. Atropurpurea. Don's. syst. 3, p, 691. Bot. Mag. t..217. flowers sweet scented. Herbaceous plant-Dapooree, intd, from the Cape. (Dr. Lush.)
736. S. Africana. Dor's. syst. 3. p. 692.

An Evergreen shrub, 3 or 4 feet high-Dapooree, intd. from the Cape. (Dr. Lush.)

## ORDER 78. COMPOSIT E. dc. prod. 5. p.1.

## Sub-Order 1. Cichoraceae.

356. SONCHUS. L. Syugenesia Polygamia Aequalis.

Altered from Somphos-soft, spongy: name given in allusion to the habit of the plauts. Tourn.t.268. Gaert. t. 158. Lam. t. 649.
737. S. Oleraceus. Rox. Flora. 3, p. 403. S. orixensis, Rox. Flora. 3. p. 403. Wight's Con. Ind. Bot. p. 27. Eng. Bot. t. 843.

The Sow Thistle.---Aumual; flowers yellow, terminal.-In Deccan gardens. (Dr, Lush.) at Surat N,
357. LACTUCA. L. Syrgenesia Polygamia Aequalis.

From lac.-milk; the plant abounds in milky juice. Tourn. t. 267. Gaert. t. 158. Lam. t. 649.
738. L. Sativa. Rox. Flora. 3. p. 403. Blackwell t. 88.-Mori s. Hist. 3. S. 7.t.2.f. 2.

Common Lettuce, Its' milky juice yields a species of opium. N:
358. PRENANTHES. L. Syugenesia Polygamia Aequalis.

Prenes---prostrate, (Acts 1. 18.) anthos-a flower; name given in allusion to the drooping flowers, or perhaps the creeping habit of the plant. Gaert. t. 158.
739. P. Sarmentosa. Willd. 3. p. 1540. P. asplenifolia. Rox. Flora. 3. p. 404. Lactuca sarmentosa. Wight's Cont. Ind. Bot. p. 27.

A common, slender, creeping plant, with small yellow flowers.--On the Esplanade, Bombay \&c.
359. CICHORIUM. L. Syngenesia Polygamia Aequalis.

Said to be an Egyptian name adopted by the Greeks. Lain. t. 658. Gaert. 2. $t .157$.
740. C. Endivia. Willd. 3. p. 1629.

Common Endive:-in gardens, Bombay; Belgaum and Surat. (Mr. Law.)
360. HIERACIUM. L. Syugenesia Polygamia Aequalis.

Hierax-a hawk; in allusion to the belief, that birds of prey made use of the juice of these plants to strengthen their sight. Lam. $t$. 652. Gaert. 2.t. 158.
71. H. durantiacum? Willd. 3. p. 1569. Eng. Bot. t. 1469.

Orange Hawk weed.-In gardeus Belgaum. (Mr. Law.)

$$
1=
$$

361. SERRATULA. L. Syngeneaia Polygamia Aequalis.

Diminutive of Serra-a sav; in allusion to the serrated leaves. Gaert. 2. $t$. 162. Lam. t. 666.
742. S. Indica. Willd. 3. p. 1642. Tricholepis angustifolia. Wight's Con. Ind. Bot. $p .2$.

Indian Suw-wort. - In the black cottrn lands about Erroor in S. M. Country. A grateful and agreeable bitter, partaking more of the qualities of Succory than Chamomile. (Dr. Lush.) Salsette and Concans, N.
362. CYNARA, L. Syngenesia Polygamia Aequalis.

Said to be derived from kuon-a dog; from the spines of the involucre being thought to resemble dogs teeth. Lam. t. 663.
743. C. Scolymús. Willd. 3. p, 1691. C. cardunculus Sprengel syst. 3. $p$. 369. Rox. Flora. 3. p. 409. Ainslie. Mat. Ind. I. p. 22. Bot. Mag. t. 2862 and t. $32 \neq 1$.

Kingin, Artichoke; -of which the Cardoon is a variety.-Cultivated in Deccan gardens.

Bacon says, 'no herbs lave curled leaves, but cabbage and cabbage lettuce; none have double leaves, one belonging to the stalk, another to the fruit or seed, but the Artichoke." He could never have seen the Indian Mussaenda; the strange looking, white, calycine leaves of which are eaten by the nativen.

36:3. CARTHAMUS. L. Syngenesia Polygamia Aequalis.
Said to be derived from an Arabic word, signifying to paint; in allusion to the colouring matter obtained from the flowers. Touru. $t .2 j 8$. Gaert. 2. $t$. 161. Lam. t. 661.
744. C. Tinctorius. Rox. Flora 3. p. 409. Crocus indicus. Rumph. Amb. 5. t. 79. Bot. Reg. t. 170. Ainslie Mat. Ind. 2. p. 364.

Koosumba, Saftower,--Cultivated in various parts of the Deccan for the use of Dyers, and for the oil obtained from the seeds;-also in Guzerat, to a small extent. (Dr. Gibson.)
366. CENTAUREA, L. Syngenesia Polygamia Frustranea.

Named after the Centaur Chiron, who was skilled in medicinal herbs, and is said to have used a species of Centaury in curing wounds. He is now in the Zodiac, under the name of Sagittarius, Lam. $\boldsymbol{t}$. 703.
745. C. Moschata. Rox. Flora. 3. p. 444. Moris, Hist. '3. S. 7, t. 23. f, 5. Shah-pusund.-sweet Sultan.-in gardens; flowers chiefly during the cold seaaon.
746. C. Cyanus. Wild. 3. p. 2291. Eng. Bot. t. 277.

The Blue bottle.-in gardens Belgaum. (Mr. Law.)

## Div. 2. Echinopsedee.

365. ECHINOPS. L. Syugenesia Polygamia Segregata.

Echinos-a hedge-hog, and opsis-resemblance; in allusion to the bristly heads of flowers, like hedge-hogs. Gaert. 2. t. 160. Tourn. t. 262. Lam. t. 719.

## 747. E. Echinatus. Rox. Flora. 3. p. 447.

The Globe thistle-an annual, spreading plant, much like the common thisthe; with white flowers in globular spinous heads.-common in the Deccan.At Siduey Point, Mahableshwur.-S. M. Country. (Mr, Law.)
366. SPH.ERANTHUS. L. Syngenesia Polygamia Segregata,

From Sphaira-a globe, and anthos-a flower; the flowers are in globular heads. Gaert. 2. t. 164. Lam. t. 718.
748. S. Molds. Rox. Flora 3. p. 446. S. hirtus. Wight. Con. Ind. Bot. p. 11. Kheed. Mal. 10. t. 43. Jurni. Zey. t. 94.f. 3. S. Hirtus. and Mollis. DC. prod, 5. p-369.

A very common plant on rice fields during the cold scasou-Flowers purple; in globular heads.
367. BIEPHARISPERMUM. dc. Syngenesia Polygamia Segregata.

Blepharis-the eye lashes and sperma seed.
749. B. Subsessile. dc. prod. 5. p, 363.

A low shrubby plant, -common about Dharwar. (Mr. Law.)
368. ELEPHANTOPUS. L. Syngenesia Polygamia Segregata.

Elephas-an elephant, and pous-a foot; in allusion to a fancied resemblance in the leaves. Gaert. 2. t. 165. Lam. t. 718.
750. E. Scaber. Rox. Flora. 3. p. 445. Wight's Con. Ind. Bot. p. 8. dc. prod. 5. p. 86. Ainslie Mat. Ind. 2. p. 17. Kheed. Mal. 10. t. 7. Pluk. Alm. t. 388. f. 5.

Herbaceous plant; leaves radical, spreading flat on the ground; stem erect, from 6 to 12 inches high, bearing pretty purple flowers.-Grows abnndantly in Malim woods.-On P'arell and Malabar hills, in shady places;-flowers in the rains.
369. CASULIA. Rox. Syngenesia Polygamia Segregata,
751. C. Axillaris. Rox. Flora. 3. p. 447. Rox. Cor. 1. t. 93. Bot. Rep.t. 431. DC. prod. 5. p. 482. Meyera orientalis. Sprengel syst. 3. p. 602. Brown in Linn. Trans. 12, p. 94 .

Annofl, with alternate lanceolate leaves, and light purple flowers, sessile in their axils. - Common o: rice fields and other moist places, Bombay. Flowers in September.
370. LAGASCA. Cav. Syngenesia Polygamia Segregata.

In honor of La Gasra, once a Professor of Botany at Madrid.
752. L. Mollis, dc. prod. 5. p. 91. Bot. Mag. t. 1804. Noccea mollis, Iacq. Frag, $t$, 13.

Herbaccous plant, native of the West Indies.-Dapooree. intd. (Dr. Jush.)

## Div. 3. Vernoniaceae.

371. VERNONIA. L. Syugenesia Polygamia Aequalis.

In honor of Vernon, a Botanist and traveller in America,
753. V. Arbonea. dc. prod. 5.p. 22. Sprengel syst. 3. p. 434. Hamilton in Linn. Trans. 14, p. 218. Conyza arborea, Wall. Cat.

A tall slirub, in gardens, Bombay; not common; probably intd. from Bengal.
704. V. Cinerea. de. prod. 5. p, 24. Serratula cinerea. Rox. Flora. 3. p. 406. V. physalifolia. Wights Con. Ind. Bot. p. 6. Rheed, Mal. 10. t. 64. Rumpl. Amb. 6.t. 14. f: 1. Burm. Zey. t. 96. $f^{\text {P 1. Pluk. t. 177. f. } 2 .}$

A common weed, during the rains.
755. V. Antielnintica. dc. prod. 5. p. 61. Wiglits Con. Ind. Bot. p. 7. Serratula anthelmintica. Rox. Flora. 3. p. 40த. Rhéed. Mal. 2. t. 24. Hamiltou in Linn. Trans. 14. p. 214, Burm. Zey, t. 95. Ainslie, Mat. Ind, 2. p, 54.

An annual erect plant, grows in waste places, and fiowers in the cold weather.
372. BLUMEA. dc. Syngenesia Polygamia Superflua.

Named after Dr. Blume, an excellent botanist formerly resident in Java.
756. B. Lacera. dc. prod. 5. p. 436. Conyza lacera. Rox. Flora. 3. p. 428 Hurm. Ind. t. 59, f. 1.

Annual, erect, flowers in terminal umbellets of a dull yellow colour. The Concans. N.

Koxburgh ohserves, that the whole plant smells of turpentine.
757. B. Balsamifera. dc. syst. 5. p. 447. Conyza balsamifera. Rox. Flora. 3. p. 427. C. odorata. Rumph. Amb.6. t. 24. f. 1. Baccharis salvia. Lour. Cochin China.

A shrubby erect plant; leaves lanceolate, tomentose, serrated; flowers in terminal corymbs, yellow.

The plant when bruized smells of camphor. The Concans. N.
758. B. Alata. dc. syst. 5. p. 448. Conyza alata. Rox, Flora. 3. p. 430.

Herbaceous, erect, leaves linear lanceolate; petioles winged, running down the stem. The Concans. N.
759. B. Aurita. dc. syst. 5.p. p. 449. Conyza aurita. Rox. Flora. 3. p. 428. A nnual, erect, covered with glutinous down; smells strong of turpentine; flowers yellow; terminal. The Concans. N.
760. B. Pubiflora, dc. syst. 5. p. 434. Erigeron asteroides. Rox. Flora. 3. p. 432 .

Annual glutinous plant; flowers terminal, appear during the cold season; florets of the disk yellow; of the border blue. The Concans. N.
373. DECANEURUM. bc. Syngenesia Polygamia Aequalis.
761. D. Molle. dc. prod. 5, p. 67. D. Epilejum. Wight's Con. Ind. Bot. p. Rheed. Mal 10.t. 63.

Herbaceous, erect growing plant,-S. Concan. N.
374. CONYZA. L. Syngenesia Polygamia Superflua.

From konops-a gnat! in allusion to the supposed properties of the plants; being obnoxious to insects. Gaert. 2. t. 166.
762. C. Absinthifolta. dc. prod. 5. p. 383. Wiglit's Con. Ind. Bot. p. 16. C. pinnatifida. Rox. Flora. 3. p. 430.

A shrubby erect plant; flowers in terminal corymbs;-near Belgaum. (Mr. Law.)
375. GNAPHALIUM. L. Syngenesia Polygamia Superflua.

A name applied by Dioscorides to a plant with white soft leaves, such as several Cape species of everlasting have. Gaert. 2. t. 165. Tourn, t. 261.
763. G. Indicum. Wight's Con. Ind. Bot. p. 22. G. strictum. Rox. Flora. 3. p. 424. Pluk. t. 187.f. 5.

A small annual with yellow flowers;-appears in moist shady places during the cold weather.
764. G. ————?

A small shrub, with white smooth leaves, which have an unpleasant smell when bruized. In gardens at Belgaum;-probably iutroduced from the Cape of Good Hope. (Mr. Law.)
376. V[COA. dC. Syngenesia Polygamia Superflua.
765. V. Indica. dc. prod. 5 p. 474. Doronicum Calcaratum. Rox, Flora. 3 \& 3 4. Burm. Zey, t. ธ̄5.f.2. Pluk, Alm, t, 149.f. 3.

An annual erect plant, with sagittate stem-clasping leaves; finwers terminal, yellow; appear towards the close of the rains. Salsette \&c, near Belgaum in fields. (Mr. Law.)
377. CALLISTEPHUS. dc. Syngenesia Polygamia Superflua.

Kalistos-prettiest, and $\boldsymbol{p}$ hainomai-to appear; in allusion to the flowers.
766. C. Chinensis. dc. prod. 5. p. 274. Aster chinensis. Röx. Flora 3. p. 433. Dill. Elth. $t .34$.

The China Aster, Reine Marguerite-of the French;-Dapooree. (Dr. Lush.)

## Sub-Order 3. Eupatoreez.

378. EUPATORIUM. L. Syngenesia Polygamia Aequalis.

Named after Eupator, King of Pontus, who is stid to have used the plant. in medicine. Gaert 2. t. 166. Lam. t. 672.
767. E. Divergens? Rox. Flora. 3. p. 414.

Boondar,-A. shrub, 6 or 8 feet high, with erect growing, slender branches. -leaves alternate, sessile; flowers purple, very numerous; in large terminal panicles: appear in Janwary and February.

The shaded ravines at Kaudalla and Parr; the Rotunda Ghaut, Mahablesh-wur;-not very common. It is a plant which requires examination, and may perhaps prove a new species of Decaneurum.
768. E. Ayapana. dc. prod. 5. p. 169. E. triplinervii. Sprengel syst, 3. p. 416. Vent. Malm. t. 3. Herbaceous plant.-Dapooree. (Dr. Lush.) In gardens Bombay. A good bitter, native of S. America.

The leaves are used as a substitute for tea in the Isle of France.
379. ADENOSTEMA. Dc. Syngenesia Polygamia Aequalis.

Aden-a gland, stemma-a stigma.
769. A.—— an undetermined species near Belgaum. (Mr. Law.)
770. A. Viscosum. dc. prod. 5. p, 111. Rlieed. Mal. 10.t.63.-a common weed.
380. AGERATUM. L. Syngenesia Polygamia Aequalis.
$A$-privative-geras-old age; Everlasting-Lam. t. 672.f. 1 and 2.
771. A. Conyzoides. dc. prod. p. 108. Hooker's Ex. Flora. t. 15. A. cordifolium. Rox. Flora. 3. p. 415.

Annual, leaves opposite, cordate, hairy; flowers terminal, numerous, of a pale purple.-The whole plant has a strong umpleasant smell.

One of the commonest weeds in gardens at Belgaum. (Mr. Law.) Also in Bombay, and generally, everywhere.

## Sub-Order 4. Jacobee.

381. CACALIA. L. Syngenesia Polygamia Aequalis.

Said to be a name applied by Dioscorides to a mountain plant with large leaves. Gaert. 2. t. 166. Lam, t. 673.
772. C. Sonchifolia, Rox. Flora. 3. p. 413. Emilia Sonchifolia. Wight's Con. Ind. Bot. p. 24. Rheed. Mal. 10, t. 68.

Sonchus amboinensis. Rumph. Amb. 5. t, 103.f, 1. Pluk. Alm. t. 144.
Annual; leaves stem clasping, lyrate: flowers in terminal umbellets, small, purple.-waste places: flowers in the cold weather.
773. C. Kleinit. Sprengel syst. 3. p. 427. Kleinia neriifolia. Haw. dc. Plant. Gras, $t$. 12. Dill. Elth. t. 54. $f$. 2.

Gao-Zaban. Cabbage tree, Oleander-leaved Cacalia,-used in medicine.

A small shrub, with stems resembling the Cabbage tribe, and leaves like those of Euphorbia neriifolia: flowers terminal, corymbose. Grows on high rocky situations in the Deccan, such as the Fort of Unky Tunkey, the Katruj and Kamatkee Ghauts, \&c. (Dr. Gibson.) It is also a native of the Canary Islands.
774. C. Sempervirens? Sprengel syst. 3. p. 428. C. semperviva. Forskohl's Arabia. $p, 146$. C. cuneifolia? native of the Cape.

Herbaceous plant, with thick fleshy leaves like those of the English House leek;-flowers greenish white.-In gardens Bombay.
382. TAGETES. L. Syngenesia Polygamia Superflua.

Said to be named after Tages, a heathen divinity. Gaert. 2. t. 172. Lam. t. 684.
775. T. Patula. Rox. Flora. 8. p. 434. Dill. Elth. t. 279. f. 361. Bot. Mag. $t$. 150.

Gool Jafree, French Marygold.-common in every garden. It is quite naturalized about Belgaum, growing on the borders of rice fields, at a distance from gardens. (Mr. Law.)
776. T. Erecta. Rox. Flora. 3. p. 435.

African Marygold.-common. The flowers of these plants are sold in the Bazars, and worn by women in their hair.

## Sub-Order 5. Hellantheae.

383. SPILANTHES. L. Syngenesia Polygamia Aequalis.

Spilos-a spot-anthos--a flower;-flowers yellow, with brown disks. Gaert. 2. t. 167. Lam. t. 668.
777. S. Oleracea. Rox. Flora. 3. p. 410, dc. prod. 5. p. 624. IacqHort. Vind. 2. t. 135. Bidens fervidn. Lim. Ency. Meth.

An anuual plant, cultivated in Decean gardens as a pot herb. (Dr. Lush.)
778. S. Acmella. Rinx. Flora. 3. p. 4l0. S, Pseudo acmella. dc. prod. 5. $p$. 625. Rumph. Amb, 6. $t$. 65. Pluk. Alm. t. 159. $f$. 4. Acmella mauritania. Persoon's Synop. 2. p. 472.

Annual, flowers yellow, conical.---S. Concan. N.
:384. ZINNIA L. Syngenesia Polygamia Superfua,
Named after Zinn, a German Botanist. Gaert. 2. t. 172. Lam.t. 685.
779. Z. Elegans. dc. prod. 5. p. 536. Iacq. Ic. Rar. 3. t. 589. Bot. Reg. $t .55$. and $t .1294$. Bot. Mag. $t .527$.

A handsome annual, with fiowers something like Tagetes, but of a violet, or purple colour.-In gardens.
780. Z. Terviflora. dc. prod. 5. p. 535. Lacq. Ic.Rar. 3. t. 590. Bot. Mag, t. 555.- In gardens, naturalized.
385. ECLIPTA. L. Syngenesia Polygamia Superflua.

Said to be derived from the Malay name-Gaert. 2. t. $169 . \quad$ Lam. $t$, 687.
781. E. Prostrata. Rox. Flora. 3. p. 438.

Micrelium tolak. Forskohl's Arabia. Rheed. Mal. 10. t. 41. Rumph. Amb. 6.t.18. f. 2. Dill. Eith. $t$. 113. $f, 137$ and 138. Pluk. Alm. $t$. 118.f. 5. Ainslie. Mat. Ind. 2. p. 129. Dc. prod. 5. p. 490.

Maaka. Bungrah.-A common weed, to be met with almost every where. The natives sometimes use it as a potherb.
386. SIEGESIBECKIA. L. Syngenesia Polygamia Superflua.

Named after Siegesbeck, a German Plysician. Gaert. 2.t.168. Lam. t. 687.
782. S. Orientalis. Rox. Flora. 3. p. 439. S. brachiata. Rox. Flota. 3. p. 439. dc. prod. 5. p. 495. Wight's Con. Ind. Bot. p. 17.

An annual erect plant, with small yellow flowers.-Common in the Deccan. (Dr. Lush.) It is also indigenous in China, the Mauritius, and Society 1slands.
387. GLOSSOCARDIA. dc. Syngenesia Polygamia Superflua.
783. G. Boswellia. dc.prod 5. p.631. Verbesina Boswellia. Rox. Flora. 3. $p .443$.

Annual plant, spreading flat on the ground; leaves alternate, divided into numerous linear segments.-Common about Kalludgee. (Mr. Law.)
388. VERBESINA, L. Syngenesia Polygamia Superflua,

From verbena-vervain; in allusion to one of the species resembling vervain in its foliage. Gaert. 2. t. 171. Lam. t.686.
784. V. Calendulacea, Rox. Flora. 3. $\boldsymbol{\mu}$. 410. Wedelia calendulacea, Wight's Con. Ind, Bot, p. 17. oc. prod. 5.p. 539. Rheed. Mal, 10. t. 42. Burm. Zey. t. 22. f. 1. Lam. Ill. $t$. 686. f. 1.
Trienuial, creeping; leaves opposite, broad lanceolate; flowers on axillary peduncles, large bright yellow.-moist places throughout the Concans.
785. V. Biflora. Rox. Flora. 3. p. 440, Wedelia biflora. Wight's Con. Ind. Bot. p. 18. W. urticifolia. Var. B. dc. prod. 5. p. 539. Rheed, Mal. 10.t. 40.

Soonkee.-An annual erect growing plant, about a foot high:-Flowers terminal yellow; appear in the rains.-Very common on the Ghauts,-covers the roofs of houses at Kandalla.
The plant here referred to, has a good deal the habit of Dr. Royle's Calameris. (See his Illust. Part. 6. t. 58.)
786. V. Sativa. Rox. Flora. 3. p. 441. Ramtilla oleifera. Wight's Con. Ind. Bot. p. 18. Guizotia oleifera. bc. prod. 5. p. 551, Jacquera abyssiuicaSprengel syst. 3. p. 590 . Polymuia frondosa. Bruce's travels. Ainslie Mat. lind. 2. $p$. 256.

Ramtill, or Blacktill, of the Deccan, where it is commonly cultivated for the sake of the oil it affords. - A field iu full flower looks rather pretty.
389. HELIA NTHUS. L. Syngenesia Polygamia Trustranea.

Helios---the sun---anthos-a flower. Tourn. t. 279. Lam. t. 706.
787. H. Annuus. Rox. Flora. 3. p. 443.

The common Sun-flower;-in gardens.
-" One, the lofty follower of the sun Sad when he sets, shuts up her yellow leaves, Drooping all night; and when he warm returns, Points her enamour'd bosom to his ray."

## Thomson's Summer.

788. H. Tuberosus: Sprengel syst. 3. p. 616, Iacq. Vind. 2. t. 161.

Jerusalem Artichoke; cultivated in Deccan gardens, where it grows remarkably well. (Dr. Lush.)-dhout Sabathoo on the Himalayas; where it is known by the name of Kuchaloo or Pinaloo.(Capt. Gerard ịn Edin. Journal of Science. vol.9.p.235.)

## 390. DAHLIA. Cav. Syngenesia Polygamia Superfua.

Named after Dahl, a Swedish Botanist and pupil of Linnaeus.
789. D. Variabilis. dc. prod. 5. p. 494. Georgia variabilis. Sprengel syst. 3. p. 610. Cav. Ic. 1, $t$, 80 and 3. $t .265$.
The well known Dallia; perhaps the most beautiful flower of all the Compositae. - In gardens. There are several varieties.
391. CALIOPSIS. dc. Syugenesia Polygamia Frustranea.

Kalos---fair--opsis---sight, resemblance: in allusion to the beautiful flowers, Lam. $t, 704 \cdot$
790. C. Tinctoria, dc. prod. 5. p. 568. Bot, Reg. t. 846. Coreopsiz tinctoria Bot. Mag. t. $2 \overline{1} 12$.

A very pretty annual, with dusky yellow flowers.---common in gardens.
Almost naturalized about Belgaum. (Mr. Law.)
392. COSMOS. Cav. Syngenesia Polygamia Frustranea.

Kosmos---beauty, ornament: in allusion to the flowers.
791. C. Sulphureus. Dc. prod. 5. p. 606. Coreopsis artemisæfolia. Iacq. Ic. 3. t. 595. Cav. Ic. 1. t. 79, Southernwood--lenverl Cosmos.

Native of Mexico. intd. by N, The flowers are very beautiful.
393. BIDENS. L. Syngenesia Polygamia Frustranea.

Bis-twice---dens---a tooth; the seeds are two toothed, Gaert. 2. t. 167. Tourn. t. 262. Lam, t. 668.
792. B. Wallichit? dc. prod. 5. p. 598. B. bipinnata? Rox. Flora. 3. p. 411. Agrimonia moluccana. Rumph. Amb. 6. t, 15.f. 2.

A very common aunual on Malabar hill \&c. during the rains.-flowers yellow, terminal.
394. CALENDULA. L. Syngenesia Polygamia Necessaria.

Gaert. 2. t.168. Lam. t. 715.
793. C. Officinalis. Sprengel syst. 3.p. 623.

The common Maryyold, "that goes to bed with the sun, and with him rises weeping."-In Gardens.-Shakespeare calls the flowers Mary-buds.
"And winking Mary-burls begin
To open their golden eyes;
With every thing that pretty hin
My Lady sweet arise.
Song in Cymbeline.

## Sub-Order 6. Ambrosiaceae.

395. XANTHIUM, L. Monoecia Pentandria.

Xun'hos-yellow; an infusion of these plants is said to stain yellow. Gaert.
2. t. 764.Lam. t. 765.
794. X. Indicum. Rox. Flora. 3. p. 601. de. prod. 5. p. 523.

An amual plant with rery tough stems, generally marked with dark spots.---Flowers terminal, white; fruit covered with bristles.

In the vale below Parell Flag Staff.-Common, especially on the banks, and in the beds of rivers throughout the S. M. Country. (Mr. Law.) About. Panwell. N.

## Sub-Order 7, Anthemidef.

396. ETHULIA. L. Syngenesia Polygamia Aequalis.

Gaert. 2. t. 164. Lam. t. 699.
793. E——?

A new species, or perliaps the type of a new genus.-mear Belgaum. ( $\mathbf{M r}$, Law.)
397. ARTE.MISIA. L. Syngenesia Polygamia Superflua.

Said to be named after Artemis, on account of the uses to which the plants were applied.-Artemis is the Greek name of Diana. (Acts. 19. v, 34.) Gaert. 3. t. 164. Lam. t. 695.

Scaeva-the left hand; defective; the flowers have the appeatance of wanting one half---Lobelia. Gaert. I, $t .25$.
804. S. Taccada. Rox. Flora 1. p. 527. Rheed. Mal. 4. t.59. Rumph. Amb. 4. t. 54, Bot. Mag. t. 2732.

Rather a pretty shrub, with alternate, obovate leaves, and white axillary flowers, slightly fragrant and villous inside. It may be readily known by the cleft tube of the corolla; and the seginents of the border all on one side: gardens, Bombay.-- not common.

38 ORDER 81. CAMPA.VULICE E. Don's. syst. 3. p. 733. The Campanula Thibe, Lind. nat. syst. p. 185.
404. CAMPANULA. e. Pentandria Monogynia.

Name given in allusion to the shape of the flowers.
805. C. Dehiscens. Rox. Flora, 1. p. 504. Wahlenbergia dehiscens. Don's syst. 3.p. 7 to. Wallich in Asiat, Res. 12.p. 571.

An annual plant, with alternate, linear lanceolate leaves, and small bluish white, terminal, corymbiform flowers.

It possesses no great beauty; but is interesting from its connection with the "purple heather-bell,"-SirWalter Scott's hare-bell, but not Shakespeare's, which is the Hyacinthus non scriptus.
"A foot more light, a step more true, Near from the heath-flower dash'd the dew; E'en the slight hare-bell raised its head, Elastic from her airy tread."
"For me,"--she stoop'd and, looking round,
Pluck'd a blue-hare-bell from the ground,
"For me whose memory scarce conveys
An image of more splendid days,
This little flower that loves the lea,
May well my simple emblem be,"
Then playfully the chaplet wild She wreathed in her dark locks, and sniled.

Ellen, - the Lady of the Lake.
" That evening fell so sweetly still,
So mild on lonely moor and hill,
The little genii of the fell
Forsook the purple-heather-bell, And all their dripping beds of dew, In wind-flower, Thyme, and violet blue."

> The Queen's Wake.

Sprengel confounds $C$. gracilis, and some others with this species.-Grows in the dry rocky bed of the Yena, above the Fall, Mahableshwur. Flowers in April and May. - It is a rare plant.

## ORDER 82, SYMPLOCINEA. Don's. syst. 4. p. 1.

405. SYMPLOCOS. L. Polyadelphia Polyandria.

Syn-with, and plico-to fold; in referea:ce to the limb of the corolla. Lam. t. 455.

## 104

806. S. Racemosa? Rox, Flora. 2. p. 539. Don's. syzt. 4. p. 3.

Hoora. - A very beautiful tree; leaves alternate, oblong, or hroad lanceolate; very slightly serrated; of a thick firm texture; Flowers in December and January, in simple axillary and terminal racemes: small, yellowish white; have an agreeable fragrance of almond blossoms; fruit ripens in May; smooth oblong, crowned with the calyx; size of a Barberry.

Grows on the table land of Mahableshwur, and next to the Elueocarpus oblongus, is the most omanental tree to be met with there. (Dr. Murray.) Probably this is identical with a tree at Hurrychunderghur, known to the natives by the name of K/hadeer. (Dr. Gibson.)
807. S. Laurina, Don's. syst. 4. p. 3. Eugenia laurina. Rottler's Herbal. A tree with smooth shining leaves; flowers in simple racemes, downy. The Ram Ghaut. (Mr. Law.)
809. S. $\quad$ an undetermined species; grows on the Ram Ghaut. (Mr. Law.)

## ORDER 83. MYRSINEACE E. Don's. syst. 4. p. 7.

406. EGICERAS. Gaert. Pentandria Monogynia.

Aix-a Goat, and keras-a horn; in allusion to the form of the fruit. Gaert. \&. 46.
808. A, Fragrans. Don's. syst. 4. p. 8. Rheed. Mal. 6, t. 36.' Rumph. Amb. 3. t. 77. Rhizophora corniculata. Linn.

A small milky shrub, with numerous white fragrant flowers, in terminal umbels.--common in salt marshes.

It is called Chaweer in lower Scinde, where it grows abundantly. Bees. give it the preference to all other shrubs, in attaching their combs to it. (Dr. Heddle's MSS. Report.)
407. ARDISIA. L. Pentandria Monogynia.

Ardis-a point; in allusion to the pointed anthers. Gaert. t. 77. Icacorea. Lam. t. 136. $f$. 1.
809. A Solanacea. Rox. Flora. 1. p. 580. Rox. Cor. t. 27. A. humilis. Don's. syst. 4. p. 15. Bot. Mas. t. 1677.

A shrub, with alternate, oblong shining leaves, and pretty large rose coloured flowers, in corymbiform racemes.-S. Concan. N. Kaka, Njara, Rheed. Mal. 5. t. 23, probably belongs to this genus.
408. EMBELIA. l, Pentandria Monogynia.

The Ceylon name of one of the species.
810. E. Ribes. Rox. Flora. 1. p. 586. Don's. syst. 4, p. 20. Burm. Ind. t. 23. Alphonse De Candolle in Lim. Trans. 17. p, 129.

Kurkunnie:-a large scandent shrub; stems about as thick as a man's arm; covered with scabrousspots, and rough tuberous knobs;-flowers in February;--very numerous, minute, of a greenish yellow; interminal panicles. Mahableshwur, pretty common. One grows on the side of the main road, near the entrance to Mr. Brownrigg's Bungalow.

Sil. E. Tsjerian-Cottam. Don's. syst. 4. p. 21. Rheed. Mal. 5. t. Il. Antidesma pubescens. Rox. Flora. 3 p. 770. Rox Cor.t. 167.

A small tree with greenish yellow flowers;-the Concans. N.-It is very doubtful whether it belongs to this order.
812. E. Basaal. Don's syst. 4. p, 21. Rheed. Mal. 5. t. 12.

Amtee, Ambut, Barbuttee, Byebering, Jondully.-- A shrub with alternate leaves, and racemed fruit about the size of a currant,-Pretty common at Kandalla,--hills on Salsette \&.

Kuta--hoomla, or Koombul:--A middle sized tree, frequently armed with blunt thorns: leaves alternate; under surface of the younger ones, covered with a rusty coloured substance: flowers in February and March; of a dingy white, and somewhat resembling those of Nimusops hexandra. Borry ovate, size of a pham. Sambre are foud of it. (Dr. Gibson.)

Grows pretty common on the Ghauts;-Duddi on the Gutpurba. (Mr. Law.) There are some handsome trees near the botom of the Rotunda Ghant.
411. CFRSSOPHTLLUM. L. Pentandria Monogynia.

Chrysos-gold, and phyllon-a leaf; the leares of some of the species are clothed with a yellow silky dorm beneath.

S18. C. Aceminaten, Ros. Flora. 1. p. 599. C. Roxburgii, Don's, syst. 4. p. 33.

Roxburgh's star-appif tree; native of Silhet; intd. by N. from Bengal. The fruit is about the size of a crab-apple; yellow, when ripe, and much esteemed by the people of Silhet.
112. - CCFRAS. L. Pentandria Monogyia.

The Greek name of the wild pear Lam. 6255.
819. A. Sapota. Rox. Flora, 2. p. 18!. Don's. syst. 4. p. 33. Sloanes Jamaica. 2. $t$. 230. Bot. Mag. $t .3111$ and 3112. Sapota achras, Gaert. 2. t. 104 .

Supota Plum, or Bully tree.-Bombay name, Kowut.-A small tree with dull white, scentless flowers, and something of the general appearance of Mimusops elengi;-fruit size of a quince, covered with a brown scabrous rind. Parell garden;-the late Colonel Hough's garden, Colaba; not common.
413. INOCARPUS. L. Decandria Monogynia,

From is, inos---a fibre, and Karpos --fruit; in allusion to the tough fibres of which the shell of the nut is composed. Lam. $t .362$.
820. I. Edulis. Rox. Flora. 2. p. 416. Don's, syst, 4. p. 34. Gajanus, Rumph. Amb. 1. t. 65. Rox. Cor. 3. t. 263.

The Otaheite Chesnut tree.-The nuts are noticed in Cook's voyages under that of Eisi;--indigenous also in the Moluccas, New Hebrides and New Guinea; where the natives smear the heads of their arrows with the expressed resinous juice. (Don.) intd. by N. in 1833.
414. MIMUSOPS. L. Octandria Monogynia.

From Mimos---an ape, and opsis-resemblance; in allusion to a fancied resemblance between the flowers and an ape's countenance. Gaert. 1. $t .42$. Lam. t. 300.
821. M. Elengi. Rox. Flora, 2. p. 236. Don's. syst. 4. p. 34. Elengi. Rheed. Mal. 1. t. 20. Bacula. Asiat. Res. 4. p. 273. Flos cuspidum. Rumph. Amb. 2. $t$. 63. Kummul. Brace's Travels, 7. t.54. Rox. Cor. I. t. 14.

Pomme d' Aäami, (Goa name)---Bolesaree, (Guzeratee)---Bugool or Buckoolee, (Mahratta.)-Taindoo, (Nagpoor name,) near which city it grows common. (Capt. Twemlow.) Vowlee, Bombay name. N.

A highly ornamental tree, with dark green, oblong, alternate leaves, and white fragrant flowers.-In gardens, Bombay; grows wild in the ravines at Kandalla, where it is some times called Waula, the native name of the Indian Elm. (Ulmus integrifolia.) At Mahar there are some very noble trees growing by the banks of the river. The Mussulmen had the good taste to plant it round their Mausolenms:-Some fine trees grow in the garden surrounding the Tomb of Rabbia Dooranee at Aurungabad. A good drawing of the Tomb will be found in "Sealy's Ellora."
822. M. Hexandra. Rox. Flora, 2. p. 238. Don's. syst. 4. p. 35. Rox. Cor. 1. t. 15.

Kernee.-Rayanee.-Rajun.-This is also a pretty tree, with rigid branches and broad wedge-shaped leaves.-It is very common on Malabar hill, Bombay, but seldom flowers. The Musselmen planted it along with Elengi.-The grove at Imaumpore, near Ahmednuggur, consists entirely of it.

The wood is much used in Guzerat for a variety of purposes, such as making sugar-mill beams, Well frames, and other things where toughness is re-quired.-The fruit of both this and the last species is eaten. (Dr. Gibson.)
823. M. Kanki. Rox. Flora. 2. p. 238. M. dissecta. Bot. Mag. t. 3157. Achras dissecta. Lim. Supp. Metrosideros macassierensis. Rumph. Amb. 3. t. 8. Don's. syst. 4. p. 35. Manil-kara, Rheed. Mal. 4. t. 25. corrupted from Malsaree, i. e. Mala. a string of flowers or a rosary. N.

A tree; formerly in the late Col. Hongh's garden, Colabah; probably introduced from Malabar, or the Eastern Islands; where Rumphius says, it is commonly planted around dwelling houses, on account of the elegance of its form, and the grateful shade it affords. Intd. by Mr. Nimmo, in whose collection only, this beautiful tree is now to be found.
415. BASSIA. Koenig. Dodecandria Monogynia.

Named by Koenig, in honor of Bassi, Superintendant of the Botanic garden at Bologıa. Gaert. 2. t. 104. Lam. t 398.
824. B. Latifolia. Rox. Flora. 2. p. 526. Rox. Cor. 1. t. 19. Don's. syst. 4. p. 36. Madhuca! Asiat. Res, 1. p. 300. 2. p.301 4. p. 203. Ainslie Mat. Ind. 2. p. 100 .

Movhra tree; leaves deciduous in the cold season. The intoxicating spirit called Mowhra is distilled from the flowers; they appear in February and March, and have a very heavy, sickening smell. A concrete oil is obtained from the seeds which is used to adulterate Ghee. (N.) also for frying cakes. (Buchanan's Mysore.)

It forms one of the chief ingredients in the soap manufactories at Kupperwunj, north of Kairah. (Mr. P. Ewart.)

Grows on Malabar hill, Bombay; and throughout the Concans; very common in Guzerat. (Dr. Gibson.) In Malwa. (Sir John Malcolm's Memoir on Central India.)

The Shea or Butter tree of Africa, noticed by Park and Bruce in their Travels, belongs to this genus. For an account of the Indian Butter tree, (B. butyracea.) see Roxburgh in Asiat. Res. 8. p. 477.

The wonderful "Cow Tree;" native of south America, which yields a milk like that of animals, was supposed to belong to the Sapotea. (see Edin. Phil. Jourual. vol. 12. p.97. Liudley refers it to Artocarpece.

## ORDER 85. EBENACEE. Don's. syst 4. p. 3\%.

## The Ebony Tribe, Lind, nat. syst. p. $2 \cdot 2$.

416. DIOSPYROS. L. Polygamia Dioecia.

Dios---divine, and pyros---wheat:---a strange application of the name, to trees which have not the most distant connection with whe at; and which besides, produce very indifferent fruit, as far as regards man's taste; and Milton hints that the taste of Angels may be similar. Gaert. 2. $t$. 179. Laim, t. 858.

The climate of India seems to suit it, and it may possibly hereafter become of some importance.
s34. O. Fragrans. Rox. Flota. 1. p. 105. Don's. syst. 4. p. 48. Osmanthus fragrans, Lour, Cochiu China, Thuubergh's Japau. t. 2. Bot, Mag, t. $155 \%$.

A small tree with elliptic, lanceolate leaves, and sweet scented, yellowish white dowers which are sad to be put into teas to impart flavour to them.

Native of Japan and China, - Dapooree, intd. (Dr, Lush.)
835. O. Dioica. Rox, Flora. 1. p. 10\%, Don's. syst. 4. p. 49-D. Wightiana. Dou's, syst, 4. p. 49. Tetrapilus brachiatus Lour. Cochin Chiaa. Kara. Vetti. Rheed, Mal. 4. t. 5t. Hamilt. ju Linu. Trans. 17. p. 2:36.

Indian Olive.-I'arr Jainh.-(not very different from the silhet name Atta Jamb.) A large tree, with opposite, oblong, serrate leaves, and small white flowers in axillary panicles. They appear in February and March, and the fruit which ripens at the beginning of the rains much resembles, as Roxburgh observes, the common sloe, Perlapis this tree ought to be referred to the genus phillyrea.

Some stately specimens grow in Lanowlee grove, near Kandalla.
It is very common towards the top of the Kotunda Chaut, Mahableshwor.
419. SYRINGA. L. Diandria Monogynia.

Syrinx-a pipe; the lilac was ancienty called "pipe tree."-or perhaps a poetical nane from the Nymph Syrina who was dhanged into a reed, when Pan pursued her,-"Lorpore pro Nymphae calamos tenuisse palustres." (Ovid.) Gaert. t. 49. Tourn. t. 372. Lam. 1.7.
836. S. Vulgaris. Don's. syst. 4. p. 51. Bot. Mag. t. 183.

The common Lilac, so well described by Cowper.
$\qquad$ " various in array, now white,
Now sanguine, and her beanteons head now set
With purple spikes prramidal, as if
Studions of ornament, yet unresolv'd Which hue she most approv'd, she chose them all."
Hort. Soc, garden:-intd. from the Cape of Good Hope by Mr. A. N. Shaw, C. S. in 1837. It had been previously intd. by N.
837. S. Persica. Don's. syst. 4. p. 51. Bot. Mag, t. 466.

The Persian Lilac; intd. by $N$.
420. LINOCIERA. Don. Diandria Monogynia.

Named by Swartz after Linocier, once a Physician at Tournon.-Chionauthus, Lam. Ill. t. 9. Gaert. t. 215.
838. L. Malabarica. Don's syst. 4. p. 53. Chionanthus Malabaricus. Heyne's Herb. C. glandulifera, N.

Huddee.-A small tree; leaves smooth, elliptic, tapering to both ends, sometimes obovate; flowers small yellowish white, growing from the branches below the leaves, fragrant; appear in November and December. - In the ravines, and on the undulating ground about Kindalla; not very common.

The Ram Ghaut. (Mr. Law.) who observes that the flowers have the fragrance of ripe apples.

Perhaps this is identical with Roxburgh's Chionanthus ramiflora. Flora, Ind. 1. p. 107.

## ORDER 8\%. JASMINEACER. Don's. syst. 4. p. 59.

 The Jasmine Tribe. Lind. nat. syst. p. 222.421. JASMINUM. L. Diandria Monogynia.

Said to be derived from the Arabic name, Lam. t. 7. Tourn, t, 368. Gaert. t. 42.

## Sect. 1, Leaves Simple.

A very beantiful scandent shrub, with lanceolate, shining leaves. Flowers terminal, tinged with red. - Parell garden; intd. from the Mauritius by the Hon'ble Capt. Cavendish.

The Cape of Good Hope, is said to be its native country.
846. 1. Elongatum. Rox. Flora. 1. p. 90. Don's. syst. 4. p. 59.

Newalee.-A climbing shrub; flowers pure white, fragrant, calyx small, divisions subulate, hairy.-In Deccan gardens. Dr. Lush.)

## Sect. 2. Leaves Ternate.

847. I. Auriculatum. Rox. Flora. 1. p. 98. Don's. syst. 4. p, 62. Bot. Rey. $t .264$ Asiat. Res. 4. p. 246.

Jai.-d shrub; inferior leaves ternate, superior simple; flowers small, white.-In gardens, scarce.
848. I. Odoratissimum. Don's. syst. 4. p. 63. Bot. Mag. $t .285$.

Yel,ow Jasmine;-an elegant looking shrub, with small, shining, ternate and pinnate leaves. Flowers terminal, yellow, and like most of the family sweet scented; but by no means so much so, as to merit the trivial name of odoratissimum. In gardens and flower pots about Bungalows.

It is a native of Madeira and probably found its way here from the Cape of Good Hope.

## Sect. 3. Leaves pinnate.

849. I. Officinale. Don's. syst. 4.p. 63. Bot. Mag, t. 31. Lam. Ill. t. 7.f. 1.

Common Jasmine; said to be a native of the south of Europe. In gardens.
Perhaps it ought to beblended with the next species, which it very much resembles.

Cowper has given it a place in his shrubbery.

- "and luxuriant above all

The jasmine, throwing wide $h \in r$ elegant sweets, The deep dark green of whose unvarnish'd leaf Makes more conspicuons, and illumines nrore, The bright profusion of her scatter'd stars."

The Task.
850. I. Grandiflorum. Rox. Flora. I. p. 52. Don's. syst. 4. p. 63. Rheed, Mal.6.t.52. Bot. Reg. t.91.

Chumbelly, Jatee Jui.-Catalonian, or Spanish Jasmine. In gardens every where. The flowers of this species are peculiarly sweet-scented, and are commonly used in making Durbar and Wedding garlands.
There is a plant running over a tree about midway between Chowke and the bottom of the Ghant on the Poona road, at a distance from any village but probably it has been placed there.
422. NYCTANTHES. L. Diandria Monogynia.
$N y x$-night-anthos-a flower; in allusion to the period at which the flowers expand; Lence the trivial name arbor tristis. Lam, t. 6. Gacrt. t. 51.
851. N. Arbor-tristis. Rox. Flora. 1. p. 86. Dou's. syst. 4. p. 64. Rheed. Mal. 1. t. 21. Linn. Trans, 13. p. 484. Gaert. Fruct. 2. t. 12s. Sephalica. Asiat. Res. 4. p. 244. Bot. Reg. t. 309.

Parjatie Harsingahur, i. e. yellow singahar.
Har, Singahar, Shiooli, -The Arabian Jasmine-A very common ornamental shrub in gardens, and about villages:-brauches 4 square; leaves scabrous, deciduous in the hot season; used for polishing wood. Flowers white, tube orange, very fragrant; appear more or less all the year, but most profusely in the cold season. They are used for dyeing.

In Guzerat it attains the size of a small tren; probably introduced, as it has not been found in a wild state. (Mr. Vaupell.)
423. SCEREBERA. Rox. Diandria Monogynia.

Named by Dryander in honor of schreber, Editor of the Genera Plantarum. It is placed here among the Jusminencea on the authority of Jussieu, but it is possible that it may form the type of a new order.
852. S. Swieteviomes. Rox. Flora. 1. p. 109. Rox. Cor, 2. t. 101.

Mokha, or Mokadee.--A large tree, with pinnate leaves; flowers in thin terminal panicles; small, white and variegated. The capsule resembles a small pear, opens from the apex; is very hard, and dotted with white, scabrous specks. From a fancied resemblaace it bears to that of Swietenia febrifuga, the only species yet known, has got the rather uncouth appellation of Suietenivides.

Dr. Heddle conjectures, that the hair combs in common use at Hybrabad in Seinde, are manufactured from the wood of this tree. It grows on the Mala hills west of the Indus; also on the Tull Ghaut near Bhewndy. (Ars. Giberne, C. S.) and probably extends along the great range.-Jowaur. N.

The wood is very hard and close grained like the Box,

## ORDER 88. STRYCHNEACER. Don's. syst. 4. p. 65.

42 \%. STRYCHNOS. L. Pentandria Monogynia.
A Greek name of Solanum. Gatrt. t. 179.
85:3. S. Nux Vomica. Rox. Flora. 1. p. 57. Don's. syst. 4. p. 65. Rhe ed. Mal. 1. t. 37. Rox. Cor. t. 4. Aiaslie Mat. Ind. I. p. 31s. and 2. p. 489.

Fajra. Paison.-The poison mut tree;-hilly parts of the Concans. Strychnine a principle extracted from Nux vomica has been found a powerful agent in the rure of paralytic affections. - The bitter wood of the root is used by the natives in the cure of intermittent fevers,
8.54. S. Potatorum. Rox. Flora. 1. p. 576. Don's. syst. 4. p-65. Rox. Cor. $t$. 5. Asiat Res 11. p. 178.

G!!ja. Nirmulla.-d middle sized tree, flowers in March and April, small, greenish yellow.

The ripe seeds are used by the natives for clearing muddy water.-Hilly parts of the Concans.-Adjunta Jungles, (Dr. (ibson.) banks of the Kalinadi river, S. M. Country. (Mr. Law.) Hills about Parr; the Ghauts generally,

## Tribe 3. Alstone.e.

433. ALSTONIA. R. Br. Pentandria Monogynia.

In memory of Dr. Alston of Edinburgh. Brown in Mem. Soc. Wern. 1.p. 75.
872. A. Scholaris. Don's. syst. 4, p. 86. Lignum scholare. Rumph, Amb. 2. 8. 82. Pala. Rheed. Mal. 1. t. 45. Linn. Trans. 13. p.517. A. plumosa? Labill ${ }^{4}$ Nov. Caled, t. 32. Septaparna. Sir W. Jones in Asiat, Res. 4. p. $26 \overline{0}$.

Satween, or Shai'an.-A pretty large, erect growing tree; may be readily known by the whorled leaves at the ends of the branches; flowers in February, of a greenish white; follicles long, slender; - the hilly parts of the Concan, pretty common - the vale of the Saweetree, between Poladpore and the Ghauts.

The natives have a superstitious fear of it, and say, it assembles all the trees of the forest once a year to pay homage.

The bark possesses very powerful tonic properties and may prove an useful antiperiodical. in agues;-a common rustic medicine in bowel disorders. N.
873. A. Spatulata? Don's. syst. 4. p. 87.

A shrub; in Parell garden; flowers in the rains, white; this plant require examination.

## Tribe 4. Tabernemontane.

434. TABERNAMONTANA. Plum. Pentandria Monogynia.

In honor of Theodore, surnamed Tabernæmontanus, from the place he was born. Lam, t, 170.
874. T. Coronaria. Rox. Flora. 2.p. 23. Don's. syst. 4.p.90. Rheed. Mal, 2. $t .54$ and 55. Rumph. Amb. 4. t. 39. Linn. Trans. 14. p. 311. Bot. Mag. $t$. 1861. Ainslie. Mat. Ind, 2. p. 257.

Tuggai;-a very common shrub, in gardens; flowers generally double, pure white.
875. T. Alternifolia. Rox. Flora. 2. p. 24. Rheed. Mal. 2. 46. Linn. Trans, 13. p. 520. T. orientalis. Don's. syst. 4. p. 88.

A shrub, in gardens.
876. T. Dichotoma.? Rox, Flora. 2. p. 21. Don's. syst. 4. p. 91.

Titul, Doodee-ka-jhar-A. small tree on the Parr Ghaut; flowers white fragrant, noticed by Captain Twemlow, who learnt from the natives, that a decoction of the leaves is used for curing sores on cattle:-common on the hills close to Jooner. (Dr. Gibson.) This tree requires examination.
435. PLUMERIA. L. Pentandria Monogynia.

Plumier-a celebrated French Botanist. Lam. t. 173.
877. P. Acuminata. Rox. Flora. 2. p. 20. Rumph. Amb. 4.t. 38. Bot. Reg. 8. 114.

The Khair Chumpa, of Forbes' Oriental Memoirs. A small, elegant tree, common about villages; flowers white and yellow, tinged with red; delightfully fragrant. Dr. Gibson suggests that Caoutchouc may be obtained from this tree, and from the corinda berry in an unripe state.

It very rarely bears seeds, perhaps from being always propagated by cuttings.
436. CATHARANTHUS. Don. Pentandria Monogynia.

Katharos-neat-anthos-a flower;-a silly name but preferable to some of the barbarous combinations of Greek and Latiu, applied to plants. Lam. t. 172. Gaert. $t, 117$.
878. C. Roseus. Don's. syst. 4. p. 95. Vinca rosea. Rox. Flora. 2. p. I. Bot. Mag. t. 248.

A small perennial, common in gardens:-In flower all the year.
879. C. Pusillus Don's. spst. 4. p. 95. Vinca parviflora Rox. Flora. 2. p. 1. Rheed. Mal. 9. t. 33.

A small annual, flowers in the rains:-the Deccan. (Dr. Lush.)
Tribe 5. Alyxiee.
437. CERBERA. L. Pentandria Monogynia.

Dog Cerberus-(Aeneid, Book 6.) the plants are poisonous. Lans t. 170. Gaert. 2. $t$. 123.
880. C. Odollam. Rox. Flora, 1. p. 692, Rheed. Mal. 1. 1. 39. Bot. Mag. t. 1845. Ainslie? Mat, Ind. 2. p. 260. Gaert. 2. t. 124, Tanghinia odollam. Don's. syst. 4. p. 97.

A tree, native of salt swamps on the the coast of Malabar and S. Concan.Common on the Maldive and Laccadive Isles from which seeds were brought by Captain Moresby, I. N. The C. Tanghin, of But. Mag. t. 2968, is the famous ordeal tree of Madagascar.
881. C. Theveria. Don's. syst. 4. p. 97. Bot. Mag. t. 2309. Pluk. Alm. t. 207. $f$. 3. Native of S. America and West Indies.

A large shrub, with oleander-looking leaves, and pretty hell-shaped yellow flowers, fruit size of a crab-apple:-common in Bumbay gardens, It is easily propagated from cuttings.
438. OPHIOXYLON. L. Pentandria Monogynir.

Ophis-a serpent, Xylon-wood; in allusion to its supposed healing properties. Gaert. $t$. 109.
882. O. Serpentinum. Rox. Flora. 1. p. 694, Rheed. Mal.6.t.47. Rumph, Amb. 7. t. 16. Bot. Mag, t. 784. Ainslie Mat. Ind. 2. p. 441.
"Few shrubs in the world are more elegant, especially when the vivid carmine of the perianth is contrasted, not only with the milk white corolla, but with the rich green berries, which at the same time embellish the fascicle". Sir W. Jones in Asiat. Res. 4. p. 308.-in gardens Bombay-Goa Jungles. (Dr: Lush.) The Concans. N.

## Tribe 6. Allamandeef.

## 439. ALLAMANDA. L. Pentandria Monogynia.

Allamand,-a Surgeon who trayelled in Griana. Gaert. t. 61, Lam. t. 171.
883. A, Aubletif, Don's. syst. 4. p. 103. A, cathartica. Roemer and Schultz. Bot. Mag, t. 338. Ainslie. Mat. Ind. 2. p. 9.

A scandent, milky shrub, with large yellow flowers, which come out in succession all the year:-common in gardeus; probably intd. from S. America of which Country it is a native, The flowers are very showy.

Tribe 7. Carandiee.
440. CARISSA. L. Pentandria Monogynia.

From the Sanscrit name. Lam. $t$. 118.
884. C. Carandas. Rox. Flora. 1. p. 687. Rox. Cor. t. 77. Rumph. Amb. 7. t. 25. Asiat. Res. 4. p. 263. Pluk. Alm. t. 305. f. 4. Don's. syst. 4. p. 104.

Corindu-A very common thorny shrub: grows throughout the Concans and on Ghauts:-at Mahableshwur, rare. The fruit ripens in May, and is sold in the bazars. It has some what the taste of the Blaeberry. (Vaccinium.)
___ " Nimium ue crede colori,
Alba ligustra cadunt, vaccinia nigra leguntur."
Virgil.
885. C. Villosa. Rox. Flora. 1. p. 690. Don's. syst. 4. p. 104.

A shrub;-grows wild on the hills eastivard of Belgaum. (Mr. Law.)

A thoray shrub, somewhit resemhling the common Furze of England grows in abundance about Dharwar Fort. (Mr. Law.)
889. M. Dlacantha. Dou's, syst. 4. p. 105. Azima diacantla. Lam. Ency. Rheed. Mal. 5. $t .37$.

A thorny shrub; - the Concans,

## ORDER 90. ASCLEPIADEA. Don's. syst. 4. p. 106.

## Thibe 1. Stapeliee.

## 442. CEROPEGIA. Pentandria Digynia.

Keros-wax - Pege - a fountain; - poetically a candelabrum; in allusion to the mode of disposition of the flowers of one of the species. Lam. $t$. 179.
890. C. Candelabrum. Rox. Flora. Ind. 2. p. 27. Rheed. Mal. 9.t. 16. Wight, Con. Ind. Bot. p, 33, Chaudelier Ceropegia. Don's. syst. 4. p. 112.

A perennial twining plant, with curious pendulous umbels of fluwers somewhat like a chandelier.-S. Concan. N.-fluwers in the rains.
891. C. Bulbosa. Rox. Flora. 2. p. 27. Rox. Cor. 1. t. 7. Don's. syst. 4. p. 111. Wight in Hookers Bot. Misc. Part. 1.t. 2.

Stems herbaceous, twining:--flowers in the rains; umbels small.
Malabar Hill, Bombay: - throughout the Concans:-not common; Roxburgh says, the fresh roots taste like raw turnips. This and C. tuberosa, are badly named, as all the Indian species have tuberous roots.

S92. C. Acuminata, Don's. syst. 4. p. 111. Rox. Cor. 1. t. 8.
Herbaceous twining plant. The country about Dharwar, where it grows in company with C, bulbosa, (Mr. Law.)
893. C. Tuberosa. Don's. syst. 4. p. 111. Rox. Cor. 1. 6, 6. Wight Con. p. 32.

Leaves ovate, umbels erect-the Concans. N.
894. C. Juncea, Don's. syst 4. p. 110. Rox. Cor. I. t, 10.

Leaves very small, sessile, lanceolate, flowers pretty large, greenish yellow, veined with putple. Kasersaye Jungles. (Dr. Lush.)
895. C. Lushif. Don's. syst. 4. p. 110. Prof. Graham. in Edin. Phil. Jour. Bot. Mag. t. 3300.

A smooth twining plant, with linear, fleshy, channelled leaves; nearly allied to C. acuminata. Rox. Cor. 1, t. 8 .

Discovered by Dr. Lush in Kasersaye Jungles, and sent by him to Edin-burgh-Botanic Garden,

The corolla is of a yellowisly green, tinged with purple.
896. C. Odorata. N.

Flowers yellow, fragrant; so unusual in this genus.
897. C. Micans. n.
898. ${ }^{-}$C. Arcta. n.

Three new species, discovered by Mr. Nimmo, in the Concans.
There is a plant at Kandalla, leaves opposite, between oval and heart-shaped, on pretty long, chamelled petioles.-Flowers solitary or in pairs, the peduncle not axillary, but arising from the stem between the insertion of the leaves, hairy. - Tube of the corolla swelled towards the base, of a dingy white; inside of the crown, rose colored.

It seems distinct from C. tuberosa, and may perhaps be referred to Linnaeut c. biflora. No. 110. Fl- Zey.
443. CARALLUMA. R. Br. Pentandria Digynia.

Said by Loudon to be the Indian name, but this seems doubtful.
899. C. Adscendens? Don's. syst. 4. p. 123. Wights Con. Ind. Bot. p. 33. Stapelia, adscendeus. Rox, Cor. I. t. 30.

Makur Singee-Monkey's horn; erect fleshy plant, with angular stems, and something of the habit of a diminutive Cartus. Country about Dharwar. (Mr. Law.)

Very common on a range of hills east of Ahmednuggur, and sparingly in the open parts of the Deccan.-It is eaten as a vegetable by the natives. (Dr. Gibson.)
444. LEPTADENIA. R. Br. Pentandria Digynia.

Leptos-slender-Aden-a gland; in allusion to the slender pollen masses. Brown in Wern. Trans. 1. p. 34.
900. L. Reticulata. Don's. syst. 4. p. 125. Wights Con. Ind. Bot. p. 47. Asclepias suberosa. Rox, Flora. 2. p. 38. Cynanchum reticulatum, Willd. 1. $p .1258$.

A large twining plant, with corky, much cracked bark; leaves opposite oblong, cordate, downy when young;-flowers greenish yellow, scentless:-common in hedges about Surat and in S. M. Country. It is easily recognized by the valvate aestivation. (Mr. Law.)
445. STAPELIA. Pentandria Digynia.

Named by Linnæus in memory of Stapel, an Amsterdam Physician. Lam. t. 178.
901. S. Bufnnia. Sprengel. 1. p. 838. S. bufonis. Bot. Mag. t. 1676. Orbea hufonia. Don's, syst. 4. p. 120.

A strange looking stemless plant, with foetid flowers resembling a toad's back; the corollas flat with no tube.

Gardens Bombay, rare, intd. from the Cape.
902. S. Lentiginosa. Curt. Bot. Mag. t. 506. Heurnia lentiginosa. Don's. syst. 4. p. 113.

Dapooree, intd. from the Cape. (Dr. Lush.)

## Tribe 2. Hoyacee.

446. HOYA. R. Br. Pentandria Digynia.

Named after Mr. Hoy, formerly Gardener to the Duke of Northumberland.
903. H. Carnosa. Don's. syst. 4. p. 126. Wight's Con. Ind. Bot. p. 38, Stapelia chinensis, Lour. p. 160̄. Bot, Mag, t. 788. Smith's Ex. Bot. t. 70.
905. Martaran. (Rs collecm)

Wax Plant,-(Bombay name.) Common in gardens, and in flower pots about Bungalows:-it is a plant well adapted for covering trellis work;--the large umbels of curious flowers are very beautiful.
904. H. Parasitica. Don's. syst. 4. p. 126. Wights Con. Ind. Bot. p. $37^{\circ}$ Asclepias parasitica. Rox. Flora. 2. p. 42 H. pallida. Bot. Reg. t. 951.

Ambree.-A parasitic species with the h bit and appearance of $H$. curnosa:only in this the leaves have a whitish dead appearance, as has the whole plant. It seems to approach pretty near to Wallichs H. fusca. Pl. As. Rar. 1. $t .75$ if it is not identical.

Very common on trees at Mahableswur: frequently hanging down in fes-toons.-Lanowlee near Kandalla: Nagotna Jungles \&c. flowers in October and November.
905. H. Pendula. Don's. syst. 4. p. 125. Wights Con. Ind. Bot. p. 36. Asclepias pendula. Rox. Flora. 2. p. 36. Rheed. Mal. 9. t. 13.

Stems woody, twining; leaves, oblong veinless: flowers white, fagrant: appear in the rains.
S. Concan. N. Hills about Nagotna, (the late Ensign Dickinson).
906. H. Viridiflora. Wight's Con. Ind. Bot. 39. Asclepias volubilis. Rox. Flora. 2.p. 36. Apocymum tiliæfolium. Lam. Ency. Meth, Dons. syst. 4. p. 81. Wight in Hooker's Bot. Misc. Part. 2. t. I. Rheed. Mal. 9. t. 15. Ainslie Mat. Ind. 2. p. 154. Rumph. Amb. 5. t. 175. f. 2.

A large scandent shrub; readily distinguished by its drooping umbels of green flowers, which appear in April and May: the follicles are 3 or 4 inches long and as many in circumference, at the thickest part;-covered with a brown mealy substance, which the Bombay cow-keepers give to their cattle as medicine.

Common in Bombay, Elephanta, the Ghauts:-on the table land Mahableshwur, where it is called Dooree; perhaps on account of the flexile stems being used as ropes.
447. MARSDENIA. R. Br. Pentandria Digynia.

In honor of Marsden, author of the well knowi History of Sumatra.
907. M. Tenacissima? Don's. syst. 4. p. 131, Wights Con. Ind. Bot. p. 41. Asclepias tenacissima. Rox. Fl. In. 2. p. 51. Rov. Cor. 3. t. 240.

Perennial twining plant, running over trees; flowers greenish yellow;-of the fibres of this plant $H a r$ is made on which flowers are sometimes strung in Mahratta visits of ceremony. (Dr, Lush.)

Hab. - the Deccan?
448. COSMOSTIGMA. Wight. Pentandria Digynia.

Kosmos-pretty-stigma-style; in allusion to the peculiar aud beautiful stigma.
905. C. Racemosa? Wight Con. p. 42. Asclepias racemosa. Rox. Flora. $2^{\circ}$ p. 32. Rheed. Mal. 7. t. 32.

A large scandent species, rumning over high trees:-flowers in axillary umbels, small, yellow; marked with ferruginous dots. Follicles size and shape of those of Hoya viridiflora; quite smooth and green;-leaves deciduous in the cold weather;-flowers in the rains.

Parell Hill, Bombay; Rheede's plant is identical with the one here referred to; perhaps Roxburgh's is different. Can this be the Marsdenia Tenacissima.?
449. PERGULARIA. l. Pentandria Digynia.

Pergula-said to be used by Pliny for trellis work;-name given in allu. sion to the plant being suitable to cover trellises. Lam. 1.t. 176.
909. P. Odoratissima? Dons syst. 4. p. 132. Wight's Con. Ind. Bot. p. 43. Asclepias odoratissima. Rox. Fl. Ind. 2. p. 46. Bot. Rep. t. 18j. Bot. Mag. t. 7.55. Rumph. Amb. 7. t. 26. $f$. 1.

Stems with woody deeply cricked bark;-flowers yellow, very fragrant.
Common in gardens, Bombay.
450. DISCHIDIA. R. Br. Pentandria Digynia.

Dis-twice, and shizo-to split.
9ín. D. Benghalensis, Don's. syst. 4. p. Colebrooke in Linn. Trans. 12. p. 357. Bot. Mag. t, 2916.

A half parasitical plant, with small, opposite fleshy leaves. - S. Concan. N.
451. GYMNEMA. R. Br. Peutaudria Monogyuia.

Gymnos-naked, nemu-a thread; (neo; to swim, to spin,) so named, in alltsion to the naked stamens.
911. G. Nepaulevse? Wall. Don's. syst. 4, p. 136. Wights Con. Ind. Bot. p. 46. Wall. Tent. Fl. Nepaul. t. :38. Rheed. Mal.9. t. 8.

Kaulee, Lamtannee;-A stout shrub; with flexuose twining branches, and opposite, ovate obloug, smonth laurel-looking: leaves:-flowers sinall, dingy white: in large, lax corymbs; appear in February and March.

Very common at Kandalla:- the plant here referred to is undoubtedly the same as Rheede's, but is perhaps different from Wallich's.
912. G. Sylvesthe. Don's. syst. 4. p. 135. Wight's Con, Ind. Bot, p. 44. Asclepias geminata. Rox. Flora. 2. p. 45.

A large twining woody plant; flowers small yellow, appear in the rains. Hills near Bagulcota and Badamee. S. M. Country. (Mr. Law.)

## Tribe 3. Ascleple.

452. ASCLEPIAS. R. Br. Pentaudria Digyuia.

From Aesculapius, the god of medicine: name given in allusion to the medicinal effects of some species. Browne in Wern. Trans. I. p. 36.
913. A. Curassavica. Don's. syst. 4. p. 139. Bot. Cab. t. 319. Bot. Reg. t. 81, Dill. Elth. t. 30. $f .33$.

Herbaceous erect growing plant, with linear lanceolate leaves, something like those of Nerium oleander; -flowers terminal of a reddish orange colour. The juice and pounded plant is said to be an excellent styptic. The root dried and reduced to powder is frequently used by the Negroes in the West Indies as an emetic; hence the name wild Ipecacuanha. (Don.)

In gardens pretty common; flowers in the rains. It is almost naturalized.

## 453. PENTATROPIS. R. Br. Pentandria Digynia. <br> Pente-five--tropis-a keel.

914. P. Microphilla? Don's. syst. 4. p. 145, Wights Con. Ind. Bot. p. 52. Asclepias microphylla. Rox. Flora. 2. p. 3j. Rlieed. Mal. 9. t. 17.

A small twining peremnial plant; flowers in the raits.
Conmon on the sea shore, just without the line of high water mark---Malabar Hill, Salsette \&c. The nectary of the flower entraps small flies, \&c. N.
454. CALOTROPIS. R. Br. Pentandria Digynia.

Kalos-beautiful-tropis - a keel; the leafets of the corona are keeled.
915. C. Gigantea. Donis. syst. 4. p. 146. Wights Con. Ind. Bot. p. 53. Asclepias gigantea. Rox. Fl. In. 2. p. 30. Ericu. Rheed. Mal. 2. t. 31. Rumph. Amb. 7. t. 14. f. I. But. Reg. $t, 53$. Linı. Traus. 14, p. 233. Asiat. Res. 4. p. 267. Ainslie Mat. Ind. 1. p. 486 and 2. p. 488.

G1s Echites panieulata Rov. Curdenden Inauri. Oulyell Fl. mumerous smale pule rallow. Stallieles utte iturated ufuourds from an oroud base somechat woody snowth

Arha, Akiree, Rowee. The ront reduced to powder, is given to horses, Captain Twemlow mentions that the hill people abont Matableshwn obtain anintoxicating liquor called Bar from the plant. It furnishes the subso tance called Mudarine, by Dr. Duncan of Edinburgh.

Gommon every where, and in flower all the year; -charcoal for gunpowder is made from it in Kattywar. (Captain Jacob.)

The leaves warmed and moistened with oil, are applied as a dry fomentation in paius of the stomach; they form a valuable rubefacient. (Dr. Gibson.)
916. C. Hamleonir. Don's. syst. 4. p. 147. Wight in Nadras Jour. of science. No. 6. Wight Con. Ind. Bot. p. 53. Bot. Rep. t, 271. Linn. Trans, 14. p. 246.

A shrub much resembling the former; but differs in the segments of the corolla not being reflexed.

Common in the Deccan.
455. OXYSTELMA. R. Br. Pentandria Digynia.

Oxus-sharp-stelma-a crown; in allusion to the corona being pointed.Brown in Wern. Mem. 1, p. 10.
917. O. Esculentum. Don's. syst. 4. p, 144. Wight's Con. Ind. Bot. p. 54. Periploca. Linu. Asclepias rosea. Rox. Flora. Ind. 2. p. 40. Rox. Cor. 1. t. 11. Pluk. t. 359 f. 6. Dhudiga. Asiat. Res. 4, p. 268.

A twining peremnial, with linear leaves, deciduous in the cold season:flowers in the rains; large, white, with a slight tinge of rose colonr, and elegantly streaked with purple veins; texture, thin and delicate. This is by far the most beantiful of the tribe, and deserving of Sir William Jones' epithet-"lovely twining Asclepias." - Roxburgh's name is much more ap. propriate tlan Linnæus' or Brown's. Flowers in the rains.-Generally to be met with on milk bush (Euphorhia tirucalli) hedges, and on the Tamarisk: -almost leafless shrubs, where it shows off its truly elegant blossoms to the best advantage.
456. HOLOSTEMMA. R. Br. Pentandria Digynia.

Holos-entire-stemmu-a crown; in allusion to the almost entire corona.
918. H. Rueeder. Don's. syst. 4. p, 149. Wight's Con. Ind. Fot. p. 55. Asclepias amularia. Rox. Flora. Iud. 2. p. 37. Sarcostemini. Roth. Rheed. Mal. 9 t. 7.

Stems twining, peremnial; leaves broad cordate; flowers pretty large, thick and fleshy: colour, a mixture of red, green and white; agreeably fragrant.

Running up trees, and in hedges on Malabar hill; Salsette \&c. common in the rains; towards the cluse of which the flowers appear. They are edible and sweet. N.
457. CYNANCHUM. L Pentandria Digynia.

From kuon-a dog, and agcho-to strangle; perhaps in allusion to the poisonous effects of some of the species.
919. C. Callalata. Don's. syst. 4. p, 151. Wight's Con. Ind. Bot. p. 56. A twining glahrous plant, with winged follicles, from which it derives its barbarous trivial name, callialata.-kalos-Greek-alutus-Latin.
920. C. Alatum. Wight's Con, Ind. Bot, p. 57. Don's. syst. 4. p. 151.

S . Concan. N. the follicles of this species are also winged.
9?1. C. Pauciflorum. Don's. sysi. 4. p. 151. Asclepias tunicata. Rox. Flora. 2. 35. Periploca tunicata. Willd. 1. p. 125.

A twining shrub; leaves cordate, smooth; flowers small, of a rusty colour; appear during the rains.-Country about Dharwar. (Mr. Law.)

The leaves of C, argel are used in Egypt for adulterating Senna. (Dr, Lindley.)
458. DCEMIA. R. Br. Pentandria Digynia.

Said to be derived from the Arabic--Pergularia. Lam. 6, 176.
922. 1). Extensa. Don's. syst. 4. p. 156. Wight's Con. Ind. Bot. p. 59. Asclepias echinata, Rox. Flora. In. 2. p. 44. Cynanchum extensum. H. K. Iacq. Ic. I. t. 54. - C. bicolor. Bot. Rep. t. ड53.

A peremial, twining, hairy plant, witls rather an unpleasant smell; flowers in the rains; dull white, on long peduncles. Follicles covered with soft bristles.

Common on the bushes among the rocks on Malabar hill. In herges about
Ahmeduuggur \&c.-and almost every where; next to the Calotropis gigantea, it is the commonest of the Asclepiadere (Mr. Law.) The roots are used in infantile diseases. N ,
459. SARCOSTEMMA. R. Br. Pentandria Vigynia.

Sur $x$-thick, fleshy-stemma-a crown; in allusiou to the enronal processes.
924. S. Viminale. Don's. syst. 4. p. 156. Wight Con. Ind. Bot. p. 59. S. brevistigma, Wight, Alp. Aegypt $t$. 19u. Asclepias acida. Rox. Flora. Iud. 2. p. 31 .
A. aphylla. Rox. in E. I. C, Mus. Tab, 607.

A curious, voluble, leafless plant, somewhat resembling Euphorbia tiru-calli:-flowers white; in terminal umbels; appear during the rains.

On the rocky hills about Loonee;---the barren parts of the plain between Dowlatabad and the Godavery; the Kamatkee aud Katruj Ghauts, and throughout the Deccan.-Isle of Perim. (1)r. Lush.)

It is probably the Phoke plant, noticed by the Hon'ble Mr. Elphinstone in the deserte of Rajpootana, on his journey to Cabul.

Dr. Gibson mentiors, that it is often brought from a distance by Farmers, to extirpate white ants from their Sugar Cane fields:-a bundle of the twigs is put in the trough of the well from which the field is watered; along with a bag of common salt hard packed, so that it may dissolve gradually; the water so impreguated, destroys the ants without injuring the crop.

## Tribe 4. Secamonefe.

460. TOXOCARPUS. w. \&. A. Pentandria Digynia.
461. T. Kleinh. Don's. syst. 4. p. 160.

A scandent shrub, with smooth leaves; stems elliptic, shortly acuminate; flowers in corymbs, longer than the leaves.-Salsette, $N$.

Tribe 5, Periplocef.
461. HEMIDESMUS R. lir. Pentandria Digynia.

Hemisus,-half-desmos-a band; in allusiun to the incomplete coherence of the anthers and the stigmas.
925. H. Innicu's. Don's. syst. 4. p. 161. Wight Con. Ind. Bot. p. 63. Asclepias pseulosarsa. Rox. Flora. In. 2. p. 39. Kheed. Mal. 10. t, 34. Burm. Zey. $t$. 83. $f$. $1 \cdot$ Pluk. $t$. 359. $f .2$.

A shrubby, twining plant; with leaves varying a good deal in shape, and frequently striated with white. -Flowers in the rains. - The roots are used as a sulstitute for Sarsaparilla. This genus, like the next one, and Gymnema, and Leptadenia, has no staminal crown. N.

Malabar Hill, Mazagaum \&c. very common, Abundant on the hills at Wurgaum.
462. CRYPTOSTEGIA. R. Br. Pentandria Digynia.

Cryptos-hidden, stege-a covering; in allusion to the corona being concealed within the tube of the corolla.
926. C. Grandiflora. Don's. syst. 4. p. 164. Wights Con. Ind, Bot. p. 66. Nerium grandiflorum Rox, Flora- 2. 1. 10, Bot. Keg. t: 43.

"Wild Indian Corn-flower." An annual, erect-growing plant; stems slightly four-angled; leaves opposite, sessile, three nerved, oblong, lanceolate; flowers numerous; in terminal corymbs. They appear towards the close of the rains, are of a most lovely, lively lilac colour; exceedingly beautiful; and in the expressive language of Milton,-" to the heart inspiring verual delight and joy."
> -_ " who can paint
> Like nature? can imagination boast
> Amid his gay creation, hues like these?"

Thomson's Spring.
This is a flower, though native of a lower world, worthy of the garden of Paradise; and might put forth claims to be of the number of those, which excited Eve's affecting and womanly regrets, on being forced to quit that happy scene. $\qquad$
That never will in other climate grow, My early visitation; and my last At even; which 1 bred up with tender hand From the first opening bud, and gave you names;
Who now shall rear you to the sun, or rank
Your tribes, and water from th' ambrosial fount?
How shall I part, and whither wander down
Into a lower world, to this obscure
And wild?"
Paradise Lost. Book. 11 .
It grows abundantly on the pasture lands of the Concan between Panwell and Kaudalla; also above the Ghauts.-Country about Belgaum. (Mr. Law.)

The Gentiana chirata,-Wall. Asiat Pl, Rar. 3. t. 25\%, native of Nepaul and the lower range of the Himalayas belongs to this tribe. It has not yet been discovered in Western India. Every member of the tribe possesses a bitter tonic principle, useful in medicine.

Anmul; stems round, smooth, succulent; flowers of a bright blue colour. Margins of tanks throughout the Concans.

ORDER 95. CONVOLVULACE 胥. D.jn's. syst. 4. p. 233.
The Bindweed Tribe. Lind. nat. syst. p. 218.

## Tribe I. Argyrele.

Pericarp baccate, indehiscent.
472. RIVEA. Don. Pentandria Monogynia.

Auguste de la Rive, a physician of Geneva.
953. R. Tulefolia. Don's. syst. 4, p. 253. Convolvulus gangeticus. Rox. Flora. 1. p. 467.

Twining, suffruticose; flowers large, white, -Dapooree. intd. from Bengal. (I)r. Lush.)
954. R. Hypocrateriformis. Don's. syst, 4. p. 233. Lettsomia uniflora. Rox. Flora. I. p. 495.

Twining, perennial; leaves heart-shaped; flowers pure white--Malabar hill, Bombay; the Concans.
955. R. Fragrans. N.

Kulmiluta,-Clove-scented creeper; peremnial, twining; leaves roundish, emarginate. Peduncles $3-5$ flowered;-flowers pure ransparent white, about half the size of the Munda valli. (Rheed. Mal. 11.t.50.) expanding at sun-set and perfuming the air with the scent of cloves; appear in June and July; pretty common in Bombay; the Concaus; Guzerat. (Mr. Vaupell.) leaves used as a pot herb. N:
956. R. Ornata? Dons's. syst. 4. p. 25t. Lettsomia ornata? Rox. Flora, 1. $p .496$.

Leaves round cordate or reniform; flowers pure white. Worlee hill, Bom bay; Salsette \&c. in the rains.
473. ARGYRELA. Don, Pentandria Monogyuia.

Argireios-silvery; in allusion to the leaves, which are of a silvery colour beneath.
957. A. Speciosa. Don's. syst. 4. p. 254. Lettsomia nervosa. Rox. Flora. 1. p. 489. Convolvuius speciosus, Linn. Rheed. Mal. 11. t. 61. Burm. Ind. t. 20. f. 1. Bot. Mag. t. 2446.

Samudra shoka, Googulee,-Elephant creeper. Common in Bombay, on Malabur hill, and other uncultivated places; also at the bottom of hills in the Deccan. The upper side of the leaves is used by natives, to act as a discutient; the under, or white side, as a maturant. (Dr. Gibson.) Flowers chiefly in the rains: of a deep rose colour. This species may be readily distinguished by its large white bractes.

93s. A. pomaces? Don's. syst. 4. p. 255. Lettsomia pomacea? Rox. Flora. 1. p. 493. Ipomea Zeylonica- Gaert. t. 178.

A stont twining species; flowers pure white; appear in the rains; common on the Avicennia trees, at the Vellard, Bombay. The fruit agrees with Roxburgh's description, but not the flowers; perhaps it is a distinct species.

93う. A. Splendens. Don's. syst. 4, p. 255. Lettsomia splendens. Ros. Flora. 1. p. 487, Ipomea splendens. Bot. Mag. t. 252s. flowers pale red; berry scarlet, surrounded by the permanent crimson calyx. intd. by N. from Bengal.
930. A. Cunesta, Don's. syjst.4. p. 255. Lettsomia cuneata. Rox. Flora, 1. p. 491. Ipomea atrosanguinea. Bot. Mag. t. 2179. Bot. Reg. t. 661.

A shrub; twining, when near support; flowers in August and September; pretty large, of a deep, bright purple colour.-Common in the Mawnl districts, above the Ghauts;-in Bombay, and Deccan gardens. The flowers of this species are exceedingly beautiful; aud entitle it to the first place among the Convoluulacea.
931. A. Elliptica. Don's. syst. 4. p. 255. Convolvalus laurifolius. Rox. Flora. 1. p. 470.

Bontwail.-Stems woody; leaves ovate elliptic, somewhat like Rheede's Convolvulus. 11, $t$. 54.- flowers in the rains; of a rose colour; bottom of the bell deep purple.-Very common on the Ghauts. Mableshwar. (Dr. Murray.)
982. A. Malabarica. Don's, syst, 4. p. 256. Convolvulus Malabaricus. Rox. Flora. 1. p. 469. Rheed. Mal. 11. t. 51.

Stems perennial, woody; flowers in the cold weather; large and showy cream-coloured; with a deep purple bottom;-pretty common on the Ghauts where it takes the place of the last species during the cold season. Mahim woods; -the root is cathartic. (Mr. Vaupell.)
963. A. Aggregata. Don's. syst. 4. p. 257. Lettsomia aggregata. Rox. Flora, 1. p. 488.
Convolvulus canescens. Sprengel. Stems woody, twining; leaves cordate, woolly beneath; corolla, with the border cut into 5 lobes. The flowers of this species are small, and possess little beauty.

Southern Mahratta Country. (Mr. Law.) in gardens, Bombay.
901. A. Acura. Don's. syst. 4. p. 257.-A. festiva. Wall. Pl. Asiat. Rar. 1. t. 76.

A scandent shrub; leaves subcordate, mucronate; clothed with silvery down beneath; flowers in terminal panicles, white, showy.

Parell garden, intd. from the Mauritius in 1837. It is a native of China.

## Tribe 2. Convolyulere.

Pericarp capsular, Dehiscen:.
474. QUAMOCLIT. Don. Pentandria Monogynia.
"From kuamos--a kidney bean, klitos-dwarf; becanse it resembles the kidney bean in its climbing stems, but is less tall". (Don.) In what Greek author does Ǩuamos-signify a kidney bean particularly; and klitos-dwarf? May the name not more easily be derived from its Indian appellation-"Camalata" Lim. t. 10 t.
965. Q. Phoenicea. Don's. syst. 4. p. 258. Ipomoea phœnicea. Rox. Flora, 1. p. 502. Bot. Rep. t. 449.

Crimson Quamoclit:-twining, leaves cordate reniform; side sinuate, flowers in the cold weather, of a most beautiful bright crimson colour:-tube long, sleuder. In gardens, pretty common.
966. Q. Vulgatis. Don's. syst. 4. p. 260. Spomoca Quamoclit. Rox. Flora. 1. $p, 503$. Convolvulus pinnatus. Lim. Ency. 3. p, 567. Flos cardinalis. Rumph. Amb. 5. t. 2. Ikheed. Mal. 11. t. 60. Bot. Mag. t. 244.
Lam. Illust. 1. $t, 104$. Camalata. Asiat. Res. 4. p. 256.
Its elegant blossoms are "celestial rosy red, love's proper hue."--(Sir W. Jones, quoting from Milton.)

Cupids fower,-Irdian forget me not.-An annual, twining plant, with pinnate leaves; leaflets filiform;-flowers in the rains.-Common in gardens. There is a pure white flowered variety, equally common. (Mr. Vau pell.)
475. BATATAS. Don. Pentandria Monogynia,

The West Indian and American name:-also applied to the common po-Eatoe.-probably adopted into the Malay language, when the plant was introduced there by the Spaniards?
967. B. Edulis. Dou's. syst. 4. p, 260. Convolvulus batatas, Rox. Flora, 1. p. 483, Rheed. Mal. 7. t, 50. Rumph. Amb. 5. t. 180. Moris. Hist. 2, t. 3. f.

Rattaloo.--Sukur-kund.---Sukurid-kind.-.-the Sweet potatoe:-very generally cultivated all over India. It is held in much esteem in Scinde, where regetables are scarce, and is the chief one cultivated. (Dr. Burnes, K. H.)

According to Polack a reduudant but pleasing writer, who talks of " nebulous clouds" and "pluvious showers," (Scottice-a "small little thing".) the Kumera or Convolvulus battatas, "is accounted the most invaluable food possessed by the New Zeylander, and is the sole edible that has been handed duwn by tradition, as having been coeval in the country with the remotest of its aborigines."

He seems to he corrcct in identifying the Kumera, with the Butatas, notwithstanding he does in the same page call the Arum esculentum, a well known legume; with sundry other sayings counected with the vegetable productions, which must be equally astounding to Botanists in the northern Hemispliere. But he may be right.
"Ask where's the north? - at York 'tis on the Tweed".
(See Polack's New Zeyland vol, 1. chap. 9.)
968. 13. Paniculata. Don's. syst. 4. p. 261. Convolvulus paniculatus. Rox. Flora. 1. p. 476. Pul. Modecca. Rlıeed. Mal, 11. t. 49. Bot. Rep. t. 636. Bot. Leg. t. 70. Ipomoea insignis. Bot. Mag. t. 1790.
Perennial, twining; leaves palmate, 5 or 7 cleft. Flowers in the rains, numerons, large; of a beautiful dark purple colour:-seeds woolly,-Malabar Hill; Bombay.-Cruss Island, in great abundance; Mahim woods \&c.
969. B. Pentaphylla. Don's. syst. 4. p. 261. Convolvulus hirsutus. Rox. Flora, 1. p. 479. C. munitus. Wallich. Wight in Hookers. Bot. Misc. Part. 1.t. 7. C. pentaphyllus, Sprengel's syst, 1. p. 590. and Appendix, Vol. 4. p. 60.

Anmual, twining, very hairy; flowers in the rains; cream-coloured;-common on Malabar Hili \&c.
476. PHARBITIS. Choisy. Pentandia Monogynia.
970. P. Nil. Don's. syst. 4. p. 262. P. hederacea. Don's. syst, 4. p. 263. Ipomoea coerulea. Rox. Flora. 1. p. 501. I. hederacea. Linn. Bot. Reg. t. 85. and $t$. 276. Jacq. Icon. Rar. $t$. 36. Gaert. Fruct. 2. t. 134. $f$. 2. Dill. Elth. t. 80. f. 91? P. Purshii? Dons. syst. 4. p. 263. Bot. Nag. t. 188?

Aunual, twining, bairy; leaves cordate, 3 lobed, downy.-Flowers large; of a lovely, light, bright blue. They appear in the rains; expand early in the morning, and shut up during the day. The Italians call this species Campanu Azurea. Roxburgh's Ipomoea Cvervlescerss, and Forster's ConvolvuIus Caelestis, are varieties (Don.)

Common in Bombay and throughout the Concans; flowers towards the close of the rains. The $P$. Purshii, sative of Virginia and Carolina which is probably identical, is called "Morning-glory." The Indian plant equally deserves the name. A cheap and safe cathartic. See an excellent paper on the subject by Dr. O'Shaughnessy of Calcutta. N.
477. CALONYCTION. Choisy. Pentandria Monogynia.

From kalos-beautiful, and $n y x$-night; in allusion to the large showy flowers, expanding at night.
971. C. Roxburghif. Don's. syst. 4. p. 263. Ipomoea grandiflora. Rox. Flora. 1. p. 497. Munda vaik. Rheed. Mal. 11. t. 50. Asiat. Res. 4. p. 257. Gool-chandnee,- Soma vela,-Moon flower,-Bombay name.-A large twining plant; stems sometimes armed with inoffensive prickles; leaves cordate, petioled, pointed; flowers very large; the border from 3 to 6 inches in diameter; pure white, slightly fragraut, open at sunsset, and close up the following morning.

In gardens, Boinbay;-flowers chiefly during the rains.
972. C. Muricatum. Don's. syst. 4. p. 264. Ipomoea muricata. Rox. Flora. 1. p. 499. l. bona-mrox. var-purpurascens.

Annual, twining, stems covered with inoffensive prickles;-flowers in the rains, pretty large, of a pale bluish purple colour. Common among rubbish, and in waste places about Bonibay. The tumid peduncles are in use for culinary purposes. N.
478. IPOMOEA. Choisy. Pentandria Monogynia.

From ips-bindweed, and omoios-similar; in allusion to the habit of the plants.
973. I. Reptans. Don's. syst, 4. p. 265. Convolvulus repens. Rox. Flora. 1. $p, 48 \%$ and C. reptaus. 1. p. 483. Ballel. Rheed. Mal. 11. t. 52. Olus vagum. Kumph. Amb. 5. t. 155.f. 1.

Anuual, creeping, stems rooting; leaves sagittate, lanceolate; flowers rose-coloured;-margins of tanks and other moist places throughout the Concans.
974. I. Pes-capre. Don's. syst. 4. p. 265. Convolvulus bilobatus, and C. pes-capræ. Rox. Flora. I. p. 485 and 4 46 . I. maritima. Browne's Prod. 486. Rheed. Mal. 11. t. 57. Rumph. Amb. 5. t. 159. f. 1. Bot. lieg. t. 319. Convolvulus bauhinifolia. Salisbury's Prod.

Chagul-hoon,-Dobutee-lutco-Goats foot---leaver Ipomoea;--perennial. creeping; stems rooting; leaves smooth, long petioled, trvo lobed like those of the Bauhinia;-flowers large, of a pretty reddish purple.-Common on sandy beaches where it is of great use in binding the soil.

The natives boil the leaves and apply them externally as anodyne in cases of colic.

It encircles the globe, being found in China, New Holland, the Sandwich Islands, South America, Isle of Bourbon, and Arabia. - No doubt it is equally abundant on the shores of Africa.
975. 1. Ruaosa. Don's. syst. 4. p. 266. Convolvulus tiagelliformie. Rox. Flora. 1. p. 481. Rheed. Mal. 11, t. 58.

Stems creeping, perennial; leaves reniform; peduncles axillary, solitary; bearing several white flowers.
976. I. Rentrormis. Don's. syst. 4. p. 266. Convolvulus reniformis, Rox. Flora. I. p. 481, Evolvulus emarginatus. Burm, Ind. t. 30. f. 1.

Perennial, creeping. smooth, leaves long petioled; reniform emarginate; peduncles many flowered; flowers yellow. Pretty common in the rains.
977. I. Thidentata. Don's. syst. 4. p. 266. Convolvulus tridentatus. Rox. Flora. 1. p. 475 . Evolvulus tridentus Burm. Ind. t. 16. f. 3. Rheed. Mal. 11. t. 65. Pluk. Alm. t. $276 . f .5$.

Annual, leaves short petioled, sub-cuneate; flowers small, yellow;-appear in the rains. In waste places, and pasture lands.

9:8. I. Filicavlis. Don's. syst, 4, p. 266. Convolvulus medium. Rox, Flora. 1. p. 474. I. denticulata. Brown's Prod. 1. p. 48j. Bot. Reg. t. 317. Rheed. Mal. 11, t. 55.

Biennial; leaves linear lanceolate, stem clasping;-flowers pale yellow; appear during the rains.

The Concans and Deccan.--It is a native also of China, America, New Holland, the Cape of Good Hope. \&c.
979. I. Turpethum. Don's syst. 4. p. 26. Convolvulus turpethum. Rox. Flora. 1. p. 476. Bot. Rep. t. 279. Bot. Mag. t. 2093. Wight in Hookers Bot. Misc. 3. t. 88.

Doodh-Kulmee. Teuree-Perennial, stems 3 or 4 sided; angles winged; flowers white, appear in the rains--Bombay, Salsette, and the Concans. The bark of the roots is used by native Doctors as a cathartic.

The whole plant abounds in a milky juice,-is very common in the southern parts of Goozerat, especially about Durrumpore. (Dr. Gibson.)
980. I. Campanulata. Don's. syst. 4. p. 268. Convolvulus campanulatus. Sprengel's syst. I. p. 60s. Adambo. Rheed. Mal. I1, t. 56.
On the Gliauts;-hilly parts of the Concan.
981. I. Sepiaria. Don's. syst. 1. p. 273. Rox Flora. I. p. 499. Tiru-tali. Rheed. Mal. 11.t. 3 . I. striara. Persoon's Synop. 1. p. 183. Convolvulus marginatus. Lam. Ency. 3. p. 558, C. maximus. Willd. 1. p. 853.

Perenuial twining, with cordate leaves;-flowers pretty large, of a beautiful rose-colour, appear during the rains.-Common in hedges \&c.
982. I. Obscura. Don's.syst. 4. \%. 274. Convolvulus obscurus, Rox. Flora. 1. $p, 472$. Bot. Reg. $t, 239$. Dill. Elth. t. $83 . f, 95$.

Annual; peduncles jointed, clavate beyond the joint. flowers yellow, with a purple throat.-The Deccan, (Dr. Lush.) also common about Bombay, during the rains.
983. I. Stipulacea. Don's. syst. 4. p. 276. Convolvulus stipulaceus. Rox. Flora. 1. p. 484. Creeping; leaves cordate; peduncles. 3 to 6 flowered; flowers pure white. The Concans. N.

984 I. Fastigiata. Don's. syst. 4. p. 2\%G. Convolvulus fastigiatus. Rox. Flora. 1. p. 468. C. Essequibensis. Sprengel's syst. 1. p. 600. Fenillee. 3. t. 1.

Twining, peremial, leaves cordate; young, shoots generally tinged with purple; - peduncles many flowered;-flowers purple, showy;-appear during the rains. Capsule and seeds smooth.-The Concans. It is a native also of the West India Islands and Guiana.
985. I. Bracteata? Don's. syst. 4. p. 278. Twining;-leaves smooth, cordate; flowers rose-coloured; hairy outside; bottom of the bell of a deep purple; -2 of the stamens much longer than the rest;-all of them thickened
and hairy at the base. This lovely species grows pretty common by the road side between Chowke and the Ghauts; flowering towards the close of the rains. Perlaps it is distinct from Don's. I. bracteata.
986. I. Coptica. Don's. syst. 4. p. 278. Convolvulus copticus. Rox. Flora. 1. p. 477.

Herbaceous, procumbent; leaves palmate or pedate; leaflets lanceolate, serrate:-flowers small white:---appear towards the close of the rains,---In the open glades about Kandalla, creeping among the grass.
987. I. Pulchella? Don's. syst. 4. p. 279. I. tuberculata. Don's. syst. 4. p. 279. Convolvulus digitatus. Rox. Flora. 1. p. 479. C. dasyspermus? Spreugel. I. stipulata. Iacq. Schoenb. 2. t. 199.

Twining; stems a little spinulous; leaves alternate, petioled, digitate; flowers purple, This very beautiful species is generally to be found on trellises about Bombay.
988. I. Sinuata. Don's. syst. 4. p. 279. I, dissecta? Don's. syst. 4. p. 279. Iacq. Obs. 2. t.28. Hort. Vind.t. 159. Stems hairy; leaves smooth, 7 parted; segments sinuated; peduncles axillary, I flowered; flowers white; native of the West India Islands, and of Georgia and Florida. Perennial.---intd. by N.

Hydrocyanic acid is obtained from this plant.
989. I. Pes-tigridis, Don's. syst. 4. p. 280. Rox. Flora. 1. p. 503. Convolvulus pes-tigridis, Sprengel's syst. 1. p. 455. Rheed. Mal. 11. t. 59. Dill. Elth. $t .318 . f .411$.

Stems and leaves hairy; flowers in involucred heads, small, white, with a slight tinge of purple.---Common every where durin; the rains. It possesses little beauty.
990. I. Vitifolia. Don's syst. 4. p. 281. Convolvulus vitifolius. Rox. Flora. 1.p. 476. Burm. Ind. t. 18.f. 1. Pluk. Alm. t. 25. f. 3.

Perennial hairy, leaves cordate, palmately 5 cleft;---flowers large, bright yellow; appear both in the raius and cold season. Malabar Hill, Bombay. Hills about Bassein. (Mr. Vaupell.)

In Deccan gardens pretty common; It grows there much more luxuriantly than it does below the Ghauts. "The Prince of Convolvuli" (Dr. Lush.)
991. I. Tuberosa. Don's. syst.4. p. 281. Pluk. Alm. t. 276.f. 6. Sloane's, Hist.t. 96.f. 2. Bot, Reg, t. 768.

An immeuse climbing plant, with woody stems; common in Bombay and known by the name of Malabar Creeper; though it is a native of tropical America;---leaves palmately 7 parted; flowers showy, yellow; appear in October and November. It is in general use for covering old walls, treltises \&c. for which purpose, from its exceeding rapid growth, it is well adapted.
992. I. Multiflora? Rox. Flora. 1. p. 499. I. Roxburghii, Sweets Hort. Brit, $\boldsymbol{p}$. 289.
Stems woody, climbing over trees; leaves broad cordate, entire; flowers very numerous, large, rose coloured; appear in the rains.---Mahim woods; Salsette \&c. pretty common.

This is one of the most showy of the tribe.
479. CONVOLVULUS. Choisy. Pentandria Monogynia.

From convolvo-to entwine; in allusion to the twining habit of the plants.
993. C. Arvensis. Don's. syst. 4. p. 288. C. Malcolmii. Rox. Flora. I. p. 474. C. Chinensis. Bot. Reg. t. 322. English Botany, t. 322.

Stems twining, furrowed; leaves sagittate, with large angular auricles; peduncles axillary, 1 or 2 flowered; flowers of a lively pink colour.

The seeds of Roxburgh's plant were brought from Persia by the late Sir John Malcolm in 1801. He lints at its connection with the $\boldsymbol{C}$, arvensis, or

Corn bindweed of England, and there is little doubt, they are at the most, ouly varietics of each other.

Grows common on the black soil of the Deccan; flowering during the rains. (Dr. Gibson.)
994. C. Capensis. Don's, syst. 4. p, 287. C. hastatus. Thunbergh's Prod. p. 55. herbaceous, smooth; leaves hastate, lobed: flowers very numerous of a light rose colour, and exceedingly beautiful.

Bombay is indebted for this species to Mr. George Noton, who introduced it from the Cape of Good Hope in 1833. It seldom bears seeds, but can be propagated by cuttings, or layering.
995. C. Lacteus. Wallich.-Dapooree, intd. from Bengal. (Dr. Lush.)
480. ANISEIA. Choisy. Pentandria Monogynia.

From anisos-unequal; the segments of the calyx are unequal in size and shape.

9y6. A. Uniflora. Don's. syst: 4. p. 295. Convolvulus Rhcedii. Rox. Flora. Wallichs Edit. 2, p. 70. Bentiru tali. Rhced. Mal. 11. t. 54. Wight in Hookers Bot. Misc. t, 8. Burm. Ind, t. 21. f. 2.

Stems creeping, hairy; leaves short petioled, lanceolate, oblong, hairy; flowers white, campaunlate, pubescent.-S. Concan. N.
481. SHUTER1A. Choisy. Pentandria Monogynia.

Named after Dr. Shuter, who collected plants in the neighbourhood of Madras.
997. S. Bicolor. Dor's. syst. 4. p. 297. Convolvulus bicolor. Rox. Flora. 1. p. 475. Bot. Mag. t. 2205.

Perennial, twining, hairy; leaves alternate, broad, cordate; flowers yellow, bottom of the bell deep purple; appear during the rains; capsules hairy, 4 celled, with 1 seed in each.-The Concans. N.
482. PORANA. L. Pentandria Monogynia.

From poreuo-to journey; in allusion to the habit of the plants sending forth long shoots. Lam. t. 186.
998. P. Racemosa. Rox. Flora. 1. p. 466. Dinetus racemosus. Sweet. Brit. Fl. Gard. $t$. 127.
Bhowree.-Annual, twining, filiform; leaves cordate acuminate; flowers in axillary and terminal racemes; appear in the cold weather; calyx growing with the pericarp into 5 scarious wings.-S. Concan. N.---Mahableshwur. (Dr. Murray.)

Dr. Wallich remarks, that it is common in the vicinity of Katmaundoo.
483. CRESSA. L. Pentandria Digynia.

From the Isle of Crete, now Candia, where a species apparently the same as the Indian one abounds. Lam. $t .183$.
999. C. Indica. Don's. syst. 1. p. 300. Rox. Flora. 2. p. 72. C. cretica? Don's, syst. 1. p. 300. Smith's Flora. Graeca. t. 256. Pluk. Alm. t. 43. f. 6.

A small annual, with very numerous white flowers, which give it a hoary appearance at a distance.-Grows most abundantly on rice fields, Bombay, after the rains.
484. EVOLVULUS. L. Pentandria Digynia.

From evolvo-to turn round;-plants with the habit of Convolvulus. Lam. 1. 216.
1000. E. Hirsutus. Don's. syst. 4. p, 300. E. alsinoides, Don's. syst. 4. p. 300. Rox. Flora. 1. p. 105 and 106. Anagallis hirsuta minor. Burm. Zey. t. 6. $f$. 1. Vistnu clandi. Rheed. Mal. 11. t. 64.

A pretty, herbaceous, creeping plant, with small deep bright blue flowers. It is very common on the plains of the Deccan during the rains.-Malabar hill, Bombay, rare.

Burmann says, it is called Vishnugarandi, after a heathen Diety, and that it is reputed a sovereign remedy for dysentery.

## Tribe 3. Cuscutee.

485. CUSCUTA. l. Pentandria Digynia.

Name said to be derived from the Arabic. Gaert. t. 62 Lam. t. 88.
1001. C. Reflexa. Don's, syst. 4, p. 305. Rox. Flora. 1. p. 447. Rox. Cor. 2. t. 10t. C. Hookerii. Hookers Exot. Flora. 150.
Akas puwan.-Amurvel.---A parasite with filiform, twining, succule it stems, leafless, smooth, yellow; flowers white, small.
The Concans. N. on trees at Malableshwur.-Common in Guzerat, on hedges and bushes ly the road side. (Mr. Vaupell.)
1002. C. Sulcata. Don's. syst. 4. p. 305. Rox. Flora. 1. p. 447. Much like the last, but of smaller size. Common in gardeus, adhering to greens. \&c. N.

These plants bear a considerable resemblance to the Cassytha filiformis.

## ORDER 97. BORAGINE EE. Don's. syst. 4. p. 306.

The Borage Tribe. Lind. nat. syst. p. 241.
486. TRICHODESMA. Don. Peutandria Monogyuia.

From thrix-a bair, and clesmos -a bond; the anthers are bound together with hairs.
1n03. T. Indicum. Don's. syst. 4. p. 311. Borago indica, Rox. Flora. 1. p. 458. Pluk. Alm. t. 76.f. 3.

Chota-Kulpa.-An annual plant, with scabrous leaves, and pale blue flowers. It springs up very common in wriste places during the rains.-Abundant in the Deccan. (Dr. Gibson.)
1004. T. Zeylanicum. Don's. syst. 4. p. 311. Borago zeylanica. Rox. Flora. 1. p. 458. Burm. Ind. t. 14. f. 2. Pluk. Mant. t. 33.5. f. 4. Lacq. Icoa. Rar. t. 3!4.

Annual; stem purplish, hispid: flowers pale blue.-In the Ataveesy, south of the Taptee. (Dr. Gibson.) The Deccan. (Dr. Lush.)
487. LITHOSPERMUM. L. Pentandria Monogynia.

From lithos.--a stone, and sperma--seed; in allusion to the hard stony seeds. Lam, t. 91. Gaert. t. 67. Tourn, t. 55.
1005. L. Purpureo-ceruleum. Don's, syst. 4. p, 321. Smith's English Botany. t. 117. Pluk. Pliyt. t. 76.f. 2.
Herbaceous plant with scabrous stems; flowers showy, red, changing to purple. Dapooree. ind. from the Cape of Good Hope. (Dr. Lush.) It grows wild in the chalky soil of Kent.
488. ECHIUM. L. Pentaudria Monogynia.

From Echis-a viper; in allusion to a fancied resemblance between a viper's head and the seeds. Lam. t. 94. Gaert. t. 67.
1006. E. Violaceum, Don's. syst. 4. p. 332. Herbaceous plant, with large violet or pale blue flowers. Dapooree. ind. (Dr. Lusb.)
1007. E. Capitatum. Don's. syst. 4. p. 330. A suffruticose, hispid plant, with red, terminal flowers. Dapooree. intd. from the Cape of Good Hope where it is indigenous. (Dr. Lush.)

The E. vulgare, or common Vipers Bugloss. Eug. Bot. t. 181, is.one of the möst beautiful of wild English flowers.

489. CYNOGLOSSU VI. L. Pentandria Monogriat.

From Kuon-a dog, and glossa -a tonure; in allusion to a fancied resemblance in the leaves. Lam. $t .9$ 2. Gaert. $t .67$.
1008. C. Canescens. Don's. syst. 4. p. 3.j4. C. racemosum. Rox. Flora. 1. p. 455. C. hirsutum. Iacq. Hort. Schoen. 4. t. 489.

Leacherdie.-Annual, erect, with lanceolate, sessile, hairy leaves; flowers in terminal and axillary racemes; much resembling those of the favourite English "Forget me not." seeds 4:-covered with bristles.

Common on the Kandalla Gbaut;-flowers towards the end of the rains. In various parts of the Concan. $N$.
1009. C.

A small herbaceous plant; flowers in October; -the roots appear to be mu-cilaginous;-grows at Mahableshwar. (Dr. Gibson.)

Perhips the plant here referred to, may be indentical with C. Wallichii. Don's. syst. 4. p. 354.
493. HELIOTROPIU\I. L. Pentandria Monogyuia.

From helios.-the sun, and trope-a turning; in allusion to the flowers turning towards the sun. Gaert. t. 63. Lam. t. 91.
"Her looks their paleness in a flower retained, Still the lov'd object the fond leaves pursue, Still move their root, the moving sun to view, And in the heliotrope the nymph is true."

Ovid's Meta. Book. 4.
1010, H. Peruvianum. Don's. syst. 4. p. 357. Bot. Mag. t, 141.
A shubby plant with sweet scented, lilac coloured flowers in terminal spikes. Dapooree, intd. (Dr. Lush.)
1011. H. Coromandeliana. Don's. syst. 4. p. 359. Rox. Flora. 1. p, 454.

Annual; leaves obovate; flowers small, white, in terminal spikes.-The high lands at Beema Sunker. (Dr. Gibson.)
491. PIPTOCLAINA. Don. Pentandria Monogynia.

From pipto - to tall, klainu-a cloak; in allusion to the deciduous calyx.
1012. P. Malabarica. Don's. syst, 4. p. 364. Heliotropium Malabaricum. Willd. 1. p. 742. Burm. Ind. t. 16. f. 1,

A diffuse plant, with ovate, plicate, leaves;-flowers in lateral and terminal spikes; longer than the calyx. The Deccan during the rains. (Dr. Lush.)
492. TIARIDIUM. Don. Pentandria Monogynia.

From tiara-a Persian diadem, and eidos-resemblance; in reference to a fancied likeness in the capsules.
1013. T. Indicum. Don's. syst. 4. p. 364. Heliotropium indicum. Rox. Flora, I. p. t5t. Rheed. Mal. 10. t. 48. Pluk. Alm, t. 245. f. 4. Bot. Mag. t. 1837. Ainslie. Mat. Iud. 2. p. 414.

Bhooroondie. - Hatti soora, Indian Turnsole.-An annual hairy plant, with lilac, or bluish coloured flowers, in terminal spikes. Common among rubbish, and in waste places by road sides \&c. during the rains.
493. COLDENIA. l. Pentandria Monogynia.

Named by Linnaeus in honor of Colden, a North America Botanist. Lam. t. 89. Gaert. t. 68.
1014. C. procumbens. Don's. syst. 4. p. 365. Rox. Flora. 1. p. 448. Pluk. Alm. $t, 64 . f$. 6. Ainslie Mat. Ind. 2. p. 435.

A sinall aunual spreading plant, with villous leaves;-flowers white, Common on rice fields after the rains,

ORDTR 98. CORDIACEE. Don's. syst. 4. p. 374.
494. CORDIA. l. Pentandria Monogynia.

Named by Plumier, in honor of Cordius, a German Botanist. Lam. t. 96, Gaert. t. 76.
1015. C. Rumphin. Don's. syst. 4. p. 374. C. subcordata? Don's. syst. 4. p. 374. C. campanulata. Rox. Flora. 1. p. 593. Novella nigra. Rumph. Amb. 2. t. 75. Wanzey? Bruce's Travels. 7, t. 17.

A tree; leaves ovate oblong, acuminate.-Flowers yellow, or of a reddish orange colour, somewhat resembling those of the Indian Cress; (Tropueolum Minus.) hexandrous.-One tree formerly grew in the circle on Bombay green; probably brought from some part of the Concan.
1016. C. Latifolia. Don's. syst. 4. p. 378. Rox. Flora. Ind. 2. p. 230 Wallich's Ed,

Broad-leaved Sepistan.-Arab and Pers. Sepistan and Pistan-Guz.Burgoondiand Vurgoond.-Mah.-Bhokur-Hind.-Bura-Leesura-BengBuhu rasi-Sans-Buhorracake. (Mr. Vaupell.)

A tree from 12 to 25 feet high;-leaves roundish cordate, entire, repand, 5 nerved; smooth above, scabrous beneath; flowers in terminal and lateral panicles, polygamous, numerous, small white.-Drupe about an inch in diameter, yellow when ripe, pulp soft, clammy, eaten by the natives.-Dr. Wallich proposes, as previously so named by. Dr. Roxburgh, to give this species the specific name of C. sepistana, and the West Indian species now called Sebestena. C. coccinea, Wallich in Rox. Flora. Ind. 2. p. 232.

Common throughout Guzerat, where it is called Burgoond; the young tender fruit is pickled; also eaten as a vegetable by the natives. (Mr. Vaupell.)
1017. C. Myxa. Don's syst. 4. p. 379. Rox. Flora. 1.p. 590. Vida marum. Rheed. Mal. 4.t. 47. Gaert. Fruct. i, t. 76. Pluk. Alm. t. 217. f. 3. Delile's Flora. Aegypt. t. 19. $f$. 1 and 2. Cornus sanguinea, Forskol. Ainslie. Mat. Ind. 2, p, 466.

Bhokur--A common tree in Bombiy.-On the Ghauts and about villages, througliout the Concan.-It a gond deal resembles the English Alder; (Alnus glutinosa,) flowers polygamous; white, in terminal and lateral panicles;-appear in March and April.-The natives pickle and eat the fruit.-It abounds in a transparent glutinous juice-Dried it is the Sebestena of the Materia Medica.

In Otaheite the juice of the leaves is used in dyeing.
1018. C. Monoica. Don's. syst. 4. p. 379. Rox. Flora. Ind. 1. p. 592. Rox. Cor. 1.t. 58.
A shrub of no beauty, with ovate, toothed, scabrous leaves; flowers small white.-In gardens Bombay, and probably wild in the Concans.
1019. C, Angustifolia. Don's. syst. 4. p. 3i9. Rox. Flora. Ind. 1. p, 595. C. reticulata. Roth. Nov. Spec. 124.

Goond, or Goondnee.-A tree from 30 to 40 feet high; leaves sub-opposite, lanceolate, scabrous; branches slender drooping; flowers in terminal corymbiform panicles; small, white, tetrandrous; fruit size of a pea; smooth, yellow.

- Bombay.-about Villages in the Deccan and Guzerat.

The wood is very tough, and useful for making carriage poles \&c. (Dr, Gibson.)
1020. C ——?

A new species discovered by Mr. Law at Duddi, on the Gutpurba, 1838.
1021. C-_?

A middle sized tree: in gardens at $W$ ye.
495. EHRETIA. L. Pentandria Monogynia.

Named by Linnaeus, in honor of a French Botanist. Lam. $\boldsymbol{t}, 96$,
 Scleft. decid. asitiv klecatéor ing. Steim. inserted oncor. equchl
 is. initle. Jn. iuh or lue . tier byor thulby hith ceter-leavy

102\%. E. Laevis. Don's. syst. 4. p. 390. Rox. Flora. 1. p. 597. Rox. Cor. I. f. 56.

A free, with ovate smooth leaves and small white flowers in lateral corymbs.
Gor fingles. (Dr. Lush.) Jingles to the south east of Surat. (Mr. Law.) About Beema Sunker. (Dr. Gibson.)

4!9. ERYCIBE. Rox. Pentandria Monorynia.
From its native name. Erimatalia. Lan. Enc. 2. p. 343 .
1023. E. Paniculata. Don's. syst. 4. p. 302. Rox. Flora. 1. p. 585. Roxo Cor 2. t. 159. E. Rheedei. Don's. syst. 4. p. 392. Erima-tali, Rheed. Mal. 7. ©. 39.

A large climbing shrub, with alternate, linear oblong leaves, and small yellow flowers in terminal panicles.-The Concan, N.

## 1024. E. Wiehtiana. g.

A scandent slirub; with rigid stems; leaves alternate, ovate, petioled; Gowers in axillary and terminal racemes; small, of a dark brown colour; border of the corolla 5 parted; somewhat twisted as in the Apocyneae: segments revolute, deeply emarginate. Racemes and calyxes covered with a rusty coloured tomentuin.

In the deep ravine at Kandalla, below Colonel Dickiuson's Bungalow. Flowers in November; perlaps it may prove identical with some of Dr. Wallichs Burmah species.

Don remarks, that the genus is nearly allied to Moorrroftia and Maripa; on the one band, and Apocynece on the other.

## 〈sORDER 99. SOLANACEA. Don's. syst. 4. p. 397.

> The Nightshade Tribe, Lind. nat syst. p. 231.
> Tribe 1. Solanee.
497. SOLANUM. l. Pentandia Monogynia.

Origin of the word unknown. Gaert. t. 131. Tourn. t. 62. Lam.t. 115.
1025. S. Tuberosum. Don's. syst. 4.p. 400. Blackwell. t. 523.

The well known common potatoe; now pretty generally cultivated by the natives, and beginning to supersede the comparatively unwholesome Aroidea and Cucurbitaceae; which used to form so large a portion of their diet.

If ever the potatoe shall, become cheaper than rice, it will no doubt be generally preferred; and the fact of a dry season being certainly the best for this vegetable, must render it particularly valuable, when the rice crop fails. N .

The red soil of the Deccan and S. M. Country, are most favorable for its cultivation.-That of Mahableshwur also suits well.

102f. S. Pseudo-Capsicum. Don's syst. 4. p. 411. Sab. Hort. Rom. t. 59.
Winter Cherry, or Tree nightshade.-A shrubby, glabrous plant, with small white flowers, and scarlet berries of the size of a cherry. - Native of Madeira. Dapooree. ind. from the Cape of Good Hope. (Dr. Lish.)
1027. S. Incertum. Don's. syst. 4. p. 412. S. nigrum? and S. rubrum? Don's. syst. 4. p. 412 . S. rubrum. Rox. Flora, 1. p. 56.5 . Nelem tsjuna. Rheed, Mal. 10. t. 73. Smith's Eng. Bot, t. 566? S. Rumplii. Kumph. Amb. 6. $t$. 25. $f .2$. is closely allied, or perhaps only a variety of this polymorphous plant.

Bombay name Ghattee; Dekanee name Camunee-in gardens, pretty common. It is called Brede at the Mauritius, and generally cultivated as a pot herb.

The leaves are applied externally to cure Cancers, but must be used with caution. Lour. Cochin China, I. p. 1:33.

Forskol mentions a similar use to which the Arabs put them in cases of an ulcerou* disease called Bala,-Forskol's Arabia.p. 46 ,

## 138

1028. S. Verbisceftolum. Dons. ayzt. 4. p. 415. S. pubescens. Rox. Flora. 1. p. 564. Lour, Cochin China. 1. p. 128. Pluk. Alm. t. 31G. f. I. Jacq. Horto Vind. 1. \&. 13.
Mullein---leaved Nightshade.-A shrub, with ovate oblong leaven, quite entire; tomentose and white beneath; flowers small white; in terminal corymbs, berry size of a small cherry.

The neighbourhood of Dharwar. (Dr. Lush.) Probably this is identical with an umarmedspecies in Deccan gardens, having the habit and appearsnce of S. giganteum. (Dr. Gibsou.)
1099. S. Scandens Don's. syst. 4. p. 422.

Stem herbaceous, twining; leaves cordate, ovate, soft beneath; fowers in serminal umbels; corilla rotate, with recurved segments; berry round size of a cherry; native of Surinam, intd. by N.
1030. S. Giganteum. Don's. syst. 4. p. 430. S. farinosum. Wallich in Rox. Flora. Ind. 2. p. 255. Linn. Trans. 17, p. 47. Iacq. Icon. Rar. 2 t. 328. S. niveum. Vahls. Symbols 2. p. 41. and Thunbergh's Flora Capensis. I.p. 189. Bot. Mag. t. 1921.

Cheena, or Chunna Jhar, of Mahableshwur. (Dr. Murray, in Bombay Med. Trans. 1, p. ४6.)

A middle sized shrub; branches armed with stout prickles; yellowish towards the point; their base thickly covered with a white tomentum, as is also the under side of the leaves, and young shoots; flowers numerous; in terminal corymbs; of a purplish violet colour. Berry size of a large pea, dark yellow or inclining to red, when ripe.

Common on the table land of Mahableshwur; in flower and fruit all the year. It is also to be found on the hills about Parr.-Hurrychunderghur, (Dr. Gibson.)

It seens to differ in no wise from the Cape of Good Hope plant, figured in Bot. Mag* and which Professor Nees joins.
1031. S. Melongena. Don's. syst. 4. p. 432. Rox. Flora. 1. p. 556. Nila barudena. Rheed. Mal. 10. t. 74. Trongum hortense. Rumph. Aınb. 5. t. \$5. Plık. Alm. 1. 220. f. 3. Blackwell t. ¿49.

For synonyms, see Professor Nees ab Esenbeck, in Linn. Trans. 17. p. 48 He joins with it, and is followed by Don. Kheede's Chunda. 2. t.37. the S. undatum, of Lam. Ency. Meth. 4. p. 381. but the accuracy of this may be questioned.

The Brinjal, or Egg Plant; Aubergine:--extensively cultivated for the sake of its fruit. There are several varielies, as Dorrlee Wangee---round Brinjal. Ban wangee---large common---Yel wangee---suall long white, a subvariety of which, is red striped.

Roxburgh considers the common large, long Brinjal a distinct species, and calls it S.lnngum.---Next to the potatoe perhaps, the several varieties of Brinjal, are the most useful of Indian vegetables.

## 498. LYCOPERSICUM. Don. Pentandria Monogynia.

From lyhos-a wolf, and persicon-a peach;-the wolf peach. Tourn. t. 63. Lam. t-115. f. 2.
1036. L. Eseulentuv. Don's. syst. 4. p. 413. Solanum lycopersicum. Rox. Flora. §. p. 565. Pomu:n amoris. Rumph. Amb. 5. t. 154. f. 1. Lour. Cochin China. 1. p. 130,-wild and cultivated. Blackwell t. 133. Linn. Trans. 17. p. 61.

Wall Wangree.-The Tomata or Love Apple;-also calle I the Wolf Peach; in allusion to its very beantiful appearance, but worthless qualities as a fruit; -Common in gardens. The fruitis used as a garnish. It is also eaten by some, in soups \&c.

The plant grows wild in many parts of the Deccan; particularly about old Forts. Probably it was introduced by the Musselnen, and has since been naturalized. (Dr. Gibson.) Thrives luxuriantly at Surat. N.

## 49:. CAPSICU M l. Pentandria Monogynia.

From kapto-to bite: in allusion to the pungent qualities of the pericarp. and seeds.-Lam. t. 116 . Gaert. 2.t. 132. Touru, t. 65 .
1037. C. Frurescens. Don's. syst. 4. pr 443. Rox. Ftora. 1. p. 574. Rumph. Amb. 5. t. 83.f. 1. Capo molago. Rheed. Mat. e. $t$ 56. and Valiacapomolago. 9. t. 35.-C. annuam. Don's. syst. 4. p. 444. Bot. Mag. t. 1835?

Lal Mirchee, Chilly;-to be found in every garden. Extensively cultivated about Poosasowlee, south of Sattara, and sent to the Concan markets by way of Mahableshwur;-also all over the Deccan and Kandesh. (Dr. Gibson.).

The Caffiee Mirehee is the C. Grossum, of Botanists. This is probably a mere variety, as well as C. annuum and C. minimum; and no better entitled to rank as species, than the different kiuds of Apples and Goosebarries.
1038. C. Nepaulensis. Dr. Owen.

A pretty, erect growing shrub; bears yellow fruit; intd. at Seroor by Dr. O.wen from Nepaul,-periaps it is only a variety of tue common Chilly, obtained by cultivation.
5no. Phishlis. l. Pentandria Monogynia.
From phissit -a bladder; in allusioiu to the inflated calyx. Gaert. 2, t. 131.
Lam. t. 116 . Tourn, t. 64.
1039. P. Somnirera? Don's. syst. 4, p. 44s. P. flexuosa, Rox. Flora. 1. p. 561. Jacq. Ecl. $t .22$ ? and 23? Ainslie Mat. Ind. 2, $p$. 14.

Pevitti. Rheed. Mal. 4. t. 55. usually, quoted for this plant, is described by Rheede as a tree " justae, magnitudinis," whereas this is a small shrubby plank
with flexuose branches; and if Rheede's description is correct, must be distinct. See Hamilton in Linu. Trans. 17, p. 236. also Professor Nees in the stme work, and vol. $p .66$. who still, and perhaps with justice, continues to quote the Pevettifor this plant. It much resemblesit,-viz. Roxburgh's $\Gamma$. fexuosa.

The English Burial ground, Bombay. - Both the Concans and Guzerat,- $P$. somnifera. is quite distinct. N.
1040. P. Peruviana. Don's. syst. 4. p. 449. Rox. Flora. 1. p. 562. P. edulis. Bot. Mag. t. 1068. Linn. Trans. 17. p. 67,

Peruvian Winter Cherry.-A biennial, diffuse plant, with villous leaves; cultivated in gardens, and known by the name of Cape Gooseberry.

There is a plant very much resembling this, growing wild on the banks of the Yena, and other moist places Mahableshwur. It requires examination.
1041. P. Minma. Don's. syst. 4. p. 450. Pee inota inodien. Rheed. Mal. 10.t.71. Rox. Flora.1, p. 563. where the reference is made to Inota Inodien. Rheed. Mal. 10. t. 70. Probably they are mere varieties and also Don's $P$. angulata, and P. indica.
The plant here referred to, is a common annual; covered with clammy hairs. Flowers small yellow.

ご01. NICANDRA. Adans. Pentandria Monogynia.
Named by Adanson, in honor of Nicander, a Greek Poet, who lived about the time of Attalus.-A manuscript of his is preserved at Vienna.-(Don. quoting from Haller.) Gaert. $t .131$.
1042. N. Physaloides. Don's. syst. 4. p. 457. Jacq. Obs. 4. t. 98- Bot. Mag. t. 2458.
An ammual plant, with oval, oblong, unequally sinuated leaves; and pretty large, bell-shaped, blue flowers.-Native of Peru and Chili.

Grows wild about Dapooree. (Dr, Lush.)
502. LYCIUM. L. Pentandria Monogynia.

Said to be named from the province of Lycia in Asia minor. Gaert. 2. t. 132, Lam. t. 112.
1043. L. Afrcm. Don's. syst. 4. p, 459. Bot. Reg. t. 354. Lam. 111. t. 112. f. 1.

Box thorn.- A shrub with spreading, spiny oranches, linear leaves, and violet coloured flowers.

Dapooree. intd, from the Cape of Good Hope. (Dr. Lush.) The plant here referred to is perhaps the L.. tenue, of Don.

## Tiribe 2. Nicotlaneae.

503. NICOTIANA. L. Pentandria Monogynia.

In honor of Nicot once French Ambassador at the Court of Portugal. Gaert. t. 55. Tourn, t. 41. Lam, t. 113.
1044. N. Tabacum. Don's. syst. 4. p. 462. Blackwell, t. 146.

Common Tobacco plant;-" the tranquillizing herb." (Southey.) cultivated to a considerable extent in various parts of the Deccan and Guzerat. The crops are frequently injured by a curious parasite;-the Orobanche indica,
1045. N. Persica. Dor's. syst. 4. p, 466. Bot. Reg. t. 1592,

The famed Shiraz tobacco plant; cullivated in the Company's garden at Hewra; perhaps the Kosiroom, which is also cultivated there, is a variety. (Dr. Gibson.)
504. HYOSCYAMUS. L. Pentandria Monogynia.

From hys.-a sow, (Odyss. B. 8.) and kyamos-a hean; in allusion to the fruit which bears some resemblance to a bean, and is said to be poisonous to, all animals, except swine. Lam. t. 117. Gaert, t. 75.
55. Cor. fun nel shupised/hailed. Cufp- 2 celled, 4 lo lved
1016. H. Niger. Don's syst. 4. p. 471. English Botany, t. 591. Bot. Mag. t. 2394 . Ainslie Wat. Ind. 1. p. 167.

Common henbane. - Native of Britain; among rabbish and on dung hills; intd at Dapooree by Dr. Lash. It bears poison in its looks. ("Quid ut norverca me intueris"?)

Cultivated at Hewra by Dr. Gibson, who has prepared the extract, and found it equally active as a medicine, with that obtaned from England.

Tribe 3. Daturef,
505. DATURA. L. Pentanlria 11 onogynia.

From the Sanscrituame Dhustura; Gaert. 2. t. I32. Lam. t. 113. Denoting a Trumpet. N,
1047. D. Alba. Don's. syst. 4. p. 474. D. metel. Rox. Flora. I p. 561. Humaln. Rheed. Mal. 2. t. 28. Stramonia indica prima, seu Datura alba. Kumph. Amb. 5. t. 87. f. 1. Stramonium indica tertia, seu Datura rubra. Rumph. Amb. 5. t. 87. f. 2. on the authority of Hamilton. (see Linn. Trans, 14. p. 232.) Lour. Cochin China. I p. 110. Fleming in Asiat. Res. 11. p. 165. Hardwicke. in Do. 6. p. 351. D. metel. Don's. syst. 4. p. 474. Hot. Mag. t. 1440 .

The common Dhutura, or Thorn Apple;-generally found growing amongrubbish about villages, all over the country.-A lured looking plant; in flower and fruit all the year.

It possesses very strong narcotic properties, and has on several occasions been fatally used by Bombay thieves, who administer it to deprive their victims of the power of resistance. The Chinese use D. ferox, for the same nefarious purposes. (see Crawfurd's Archipelago, vol. 1.)
1048. D. Fastuosa. Don's. syst. 4. p. 474. D. dubia. Don's. syst. 4. p. 274. Rox. Flora. 1. p. 561. Hamilton in Linn. Trans. 13. p. 237. Nili bumatu. Rheed. Mal. 2. t. 29. Mudela humatu. Rlieed. Nal. 2. t. 30.

The black Dhatura;-found in the same localities.- It has frequently double flowers, and is esteemed a more virulent poison than the white flowered. (Dr. Gibson.)

They seem to be mere varieties of each other, Lieut. Col. Sykes says there are many species of Datura in the Deccan (Madras Jomrn. of Science, No. 22. p. 165.) Surely he mistakes.
506. BRUGMANSIA. Pers. Pentandria Monngynia.

Named by Persoon, in honor of Professor Brugmans.
1049. B. Candida. Don's. syst. 4. p. 475. Datura arborea. Linn, Flora. Peri. 2.t. 128.

A shrub, native of Peru; where it is cultivated for the sake of its large, showy white flowers. Hort Soc. Garden, and at Dapooree. intd. by Mr. Marullough from Egypt in 1837.

The flowers are about half a foot in length, and appear during the rains.

## ORDER 100. VERBASCIN AE. Don's. syst. 4. p. 488.

507. CELSIA. l. Didynamia Angiospermia.

Named by Linnaeusin honor of Olaus Celsius, a Professor in the University of Upsal, Gaert. t. 55. Lam, t. 532.
1050. C. Arcturus. Don's. syst. 4. p. 499. Vahls. Symbols 3. p. 79. Bot. Mag. t. 1962. Jacq. Hort. Vind. 2. t. 117.

Herbaceous; radical leaves lyrate; superior, oblong; flowers large yellow; filaments bearded with purple hairs; native of Candia.-Grows wild about Dapooree. (Dr. Lish.) Common in the bed of almost every river. (Mr. Law.)

Perhaps the plant here referred to may prove identical with Roxburgh's C. coromandelia. Rox. Flora. 3.p. I00. Are they distinct species? C. coromandelia is in Mr. Nimmo's collection,

ORDER 101. SCROPHULARINEAE. Don's. syst. 4. p. 504.

## The Figwort Tribe. Lind. Nat. syst, p. 228.

## Tribe 1. Scrophularinee.

808. DIGITALIS. દ. Didynamia Angiospêrmia.

So named from the resemblance the flowers bear, to the finger of a glove. Tuurn. 1 . 73. Gaert t. 53. Lam. t. 525.
1051. D. Purpurea. Don's. syst. 4. p. 504. Blackwell. t. 16.

Purple flovered, or common Fox-glove-"emblem of pride." (Scott.) Dapooree, intd.-A most active and useful medicine is obtained from it.

## Tribe 2. Antirrinee.

509. LINARIA. l. Didynamia Angiospermia.

From linon-flax; name given in allusion to a similarity in the leaves. Lam. $t .531$.
1052. L. ?

A perenuial plant with yellow flowers.-The Deccan. (Dr. Lush.) requires examiuation.

Perhaps this is identical with a plant which Mr. Law says, grows common on the ruins of Ahmedabad; flowers yellow; and which he doubtfully reters to Sprengels L. cirrhosa, remarking that it may prove a uew species.
610. MAURANDYA. Don. Didynamia Angiospermia.

Named in honor of Dr. Maurandy, a Botanical Professor at Carthagena.
1053. M. Semperflomens. Don's. syst. 4. p. 533. Bot. Mag. t. 40U. Bot. Rep, t. 63. M. scandens Persoons Synop, 2. p. 160.

A perenuial and delicate rlimber, native of Mexico. Has very pretty llowers, something like those of the Foxglove. Intd. by N.
1054. M. Antirrhiniflora. Don's. syst. 4. p. 533. Bot. Mag. t. 1643.

Blue-flowered Maurandya;-au elegant climber like the last.-In gardens; not common.

## Tribe 3. Gratiolea.

511. DOPATRIUM. Don. Diandria Monogynia.
512. D. Junceum. Dons. syst. 4. p. 536. Gratiola juncea, Rox. Floraa 1. p. 142. Rox. Cor. 2. t. 129.

A small annual, with rose coloured flowers; appears in the rains.
512. MICROCARPAA. Don. Diandria Monogynia.

Micros-small-karpos-fruit; in allusion to the small capsules.
1056. M. Spathulata, Don's. syst. 4. p. 536. Hookers' Bot. Misc. Supp. 1. t. 4. Peplidium capense. Spreng. syst. 1. p. 43.

Creeping, perennial; the margius of tanks and other moist places. N.
513. PEPLIDIUM. Don. Decandria Monogynia.

From peplos-purslane, and idea-form; plants with the habit of purslane. Delile's Aegypt. t. 4.f. 2.
1057. P. Humifusum. Don's. syst. 4. p. 537. Deliles' Flora. Aegypt. t. 4.f. 2. Microcarpea cochlearifolia. Smith in Rees Cyclo. Hookers' Bot. Misc. Supp. 3, t. 29.

Creeping, herbaceous plant, with opposite, obovate leaves, Margins of tanks \&c.
514. BONNAYA. Don. Diandria Monogynia.

Named after Bonnay, a German Botanist.
1058. B. Brachiata. Dun's, syst, 4.p. 537. Gratiola serrata. Rox. Flora. 1. p. 139. Rheed. Mal. 3. t. 59.

Anuual erect; flowers terminal; of a pink colour:-common on pasture lands in the rains.
1059. B. Veronicaefolia. Don's. syst. 4, $p$. 537. Gratiola veronicaefolia . Rox. Flora. 1. p. 138. Rox. Cor. 2. 1. 154. Rumph. Amb. 5. t. 170.f 2.

Annual, creeping; flowers in terminal spikes;-of a violet colour. The bed of the Yena, Mahableshwur; and other moist places.
1060. B. Verbenaefolia. Don's. syst. 4. p. 537. Gratiola racemosa. Rox. Flora. I.p. 138.

Annual; erect; flowersin terminal racemes; long pedicelled. On cultivated lands during the rains.
1061. B. Grandiflora, Dom's. syst. 4. p. 537. Gratiola grandifiora, Rox. Flora, 1. p. 136. Rox. Cor. 2. t, 179.

Annual, creeping plant; leaves sessile, broad lanceolate; flowers light blue;-Common in the rains.
1062. B. Oppositifolia, Don's. syst. 4. p. 537. Gratiola oppositifolia. Rox. Florạ. 1. p. 139. Rox. Cor. 2. t. 155.

Annual, erect; stems 4 sided, smooth; flowers small, blue.-Common in the rains.
1063. B. Hyssopoides. Don's. syst. 4. p. 538. Gratiola hyssopoides. Rox. Flora. 1. p. 141. Rox. Cor. 2. t. 12s. Pluk. Alm. t. 193. $f$. 1.

Annual, with pale blue flowers.
1064. 13. Parviflora. Don's. syst. 4.p. 538. Rox. Flora. Ind. 1.p. 140. Rox. Cor. 3. .203.

Annnal, erect, ramous; flowers long peduncled, solitary; white or blue.
1065. 13. Rotundifolia. Don's. syst. 4. p. 538. Gratiola rotundifolia. Rox. Flora. 1. p. 137. Rox. Cor. 3. t. 2ú. Rheed. Mal. 9, t. 57. Annual, diffuse; flowers white.
515. LINDENBERGIA. Don. Didynamia Angiospermia.

In honor of Lindenberg, author of a botanical work.
1066. L. Urticaefolia. Don's. syst. 4. p. 539. Stemodia ruderalis. Rox. Flora. 3. p. 94.

An anuual, diffuse, downy plant, with ovate serrate leaves, and small yellow flowers.-On old walls, Bombay Fort \&c.
516. STEMODIA. Don. Didynamia Angiospermia.

From stemon-a stamen, and dis.-double; in allusion to each stamen bearing 2 anthers. Lam. $t .534$. $f$. 1. Gaert. $t .52$.
1067. S. Viscosa, Don's. syst. 4. p. 540. Rox. Flora. Ind. 3. p. 94. Rox. Cor. 2. t. 163.

A small annual, hairy, glutinous plant; with small axillary, solitary, violet coloured flowers.
517. LIMNOPHILA. Don. Didynamia Angiospermia.

From limne-a lake, and phileo-to love; water loving plants.
106s. L. Gratioloides. Dou's. syst. 4. p. 543 and L. chamaedrifolia. 4. p. 543. Columuea balsanica. Rox. Flora. Ind. 3. p. 97. Rheed. Mal. 9. t. 85 and 12.t. 36. Burm. Zey. t. 55.f.2.

A small annual; to be found in tanks and other moist places. It has an agreeable turpentine smell. It is the Hottonia indica of Linnaeus.
1069. L. Roxburghir. Don's. syst. 4. p. 543. Capraria gratissima. Rox. Elora. Ind. 3. p. 92. Rheed. Mal. 9. t. 78,

Annual, aquatic; stems round, rooting at the joints;-fiowers axillary, bellshaped, purple;-Delightfully aromatic, and has a sweet pleasant taste. (Rox.)
1070. L. Racemosa. Don's. syst. 4. p. 543. Cyrilla aquatica. Rox. Flora Ind. 3. $p$. $11 \overline{5}$ Rox, Cor. 2. t. 189.
Annual, aquatic;-leaves verticelled; pinnatifid;-flowers in terminal racemes; - of a purple colour. Throughout the Concans. N. about Belgaum. (Dr. Lush.)
1071. L: Gratissima. Don's. syst. 4. p, 543. Rheed. Mal, 10. t. 6.

An aquatic, leaves 3 in a whorl;---linear lanceolate;-peduncles and calyxes clothed with glandular hairs.
518. HERPESTIS. Don. Didynamia Angiospermia.

From lerpestes-any thing that creeps;-name given in allusion to the habit of the plants. Gaert. $t, 214$.
1072. H. Monniera. Don's. syst. 4. p. 545. Gratiola monniera. Rox. Flora. Ind. 1. p. 141. Rox. Cor. 2. t. 178. Bot. Mag. t. 2557. Rheed. Mal. 10. t. 14. Slodnes Hist. Jam. 1. t. 129.f. 1. Bramia indica. Lam. Eucy. I. p. 459.

An annual, creeping plant, with blue flowers, which appear during the rains.-generally to be met with on the margins of tauks.

Roxburgh says the natives use the expressed juice, mixed with Petroleum, to rub on parts affected with rheumatic pains.
519. VANDELLIA. Don. Didynamia Angiospermia.

Named in honor of Vandelli, Professor of natural history at Lisbon. Lam.
t. $522 \cdot f .4$.
1073. V. Crustacea. Don's. syst. 4. p. 548. Gratiola lucida. Rox. Flora. Ind. 1. p. 138. Rox. Cor. 3. t. 202. Rheed. Mal. 9. t, 58. Rumph. Amb. 5. t. 170.f. 3.

Annual, diffuse plant, with blue flowers;-common in the rains.
1074. V. Roxburghir. Don's. syst - 4. p. 549. Torenia diffusa, Rox. Flora. Ind. 3 p. 95. V. diffisa. Willd, spec. 3. 343.
Annual, appears during the rains.
520. ARTANEMA. Don. Didynamia Angiospermia.

From artao-io suspend, and nema-a filament; in allusion to the structure of the stamens. Don. in Sweet's H. Gard $t$. 34.
1075. A. Sesamoides. Don's. syst. 4. p. 550. Bahel. tojnlli. Rheed. Mal. 9. t. 87. Dicervs longifolius. Persooil's Synop. 2. $\boldsymbol{p} 164$-Archimenes sesamoides. Vahls Symbols 2. p. 71.
Herbaceous plant, with tetragnal stems. oblong lanceolate leaves, and flowers in terminal racemes. The Coucans. N.
521. TORENIA. L. Didynamia Angiospermia.

Named by Limnaeusafter Olof Toreen, a Swedish Clergyman and Voyager to the East, Lain. t. $\mathbf{0} 23$.
1076. 'T. Aslatica. Don's. syst. 4. p. 550. Rheed. Mal. 9. t. 63. Lam. Ill. t. 523. f. 1. Pluk. Amalth, t. 373.f. 2. Bonnaya alata. Sprengel's syst. 1. p. 41. Ainslie. Mat. Iud. 2. p. !22;

A glabrous, herbaceous plant, with creeping stems, and heart-shaped. serrated leaves on long petioles.-S. Concan. N.
1077. T. Cordifolia. Don's. syst. 4. p. 550. Ros. Flora. Ind. 3.p. 95. Rox. Cor. 2. $t \cdot 161$, Rheed. Mal. 9, t. 68 -

Annual, 4 sided plant, with orate leaves; flowers bluish purple,--S. Concan. N.
1078. T. Minuta. Don's. syst. 4. p. 550. Rheed. Mal. 10, t. 50. A small annual; common in the rains.

## Tribe 4. Gerardieae.

522. SOPUBIA. Don. Didynamia Angiospermia.

The native name altered. Lam. t. 529.
1079. S. Delphinifolia. Don's. syst. 4. p. 560. Gerardia delphinifolia, Rox. Flora. Ind. 3. p, 98. Rox. Cor. 1. t.90. Pluk. Alm. t. 358. f. 3. Persoon's Nyop. 2. p. 154.

An annual, erect growing plant, 12 or 18 inches high; leaves pinnatifid, with filiform segments, like those of the Camalita: flowers axillary, solitary, of a very beautiful pale rose colour: appear towards the close of the rains.

Common on pasture lands throughout the Concans.-On the Ghauts at Kandalla.

This is one of the prettiest of Indian wild annuals, and it is to be hoped will regain its old name Gerardia.
523. CENTRAN'SHERA. Don. Didynamia Angiospermia, From kentron-a spur, and anthera-an anther. Brown's Prod. p. 438.
1080. C. Hispida. Don's. syst. 4. p. 562. Digitalis stricta. Rox. Flora. 3. p. 99. Wall. Pl. Asiat Rar. 1. t. 45.

An amual, elegant plant; clothed with hoary, harsh hair; leaves opposite, linear, scabrous; flowers axillary, subsessile; of a pretty rose colour.

Grows on the top of the Ram Ghaut. (Mr. Law.)

## Tribe 5. Buchnereae.

324. STRIGA. Don. Didynamia Angiospermia.

So named from the strigose habit of some of the plants.
1081. S. Coccinea? Don's. syst. 4. p. 583. Campuleia coccinea? Hookers Ex. Fl. 3. 6. 203. Buchnera cocciuea. Bentham Scroph. Ind. p. 40.

Annual plant, from 6 to 12 inches high; leaves linear; flowers of a rich pink colour; appear in October and. November;-at Mahableshwur. (Dr. Murray.)

This pretty plant, requires examination. The whole of it is of a reddish hue. (Dr. Gibson.)
1082. S. Euphrasioides? Don's. syst. 4. p. 583. Buchnera asiatica. Rox. Flor. 3. p. 31. Rheed. Mal. 9. t. 66. Pluk. Alm. t, 177. $f$. 6.

A small, erect annual, about a foot high; leaves sessile; flowers white axillary, solitary, -Common on rice fields Bombay, during the rains.

There is variety or distinct species on Kandalla Ghaut, with yellow flowers; a minute plant, 3 or 4 inches high.
525. RHAMPHICARPA. Don. Didynamia Angiospermia.

From rhamphos - a beak, karpos - fruit; in allusion to the beaked capsule.
1083. R. Longiflora. Don's. syst, 4. p. 585. Buchnera longiflora. Wight's Mss.

A small, erect, branching annual; leaves pinnate, narrow, linear; segments few and distant; somewhat resembling those of the Sopubia delphinifolia;fluwers white, with a tube Irom 1 to 2 iuches long; pretty.-Grows commou on pasture lands throughout the Concans towards the close of the rains. - About. Belgaum. (Mr. Law.) Native also of Senegal. A very pretty little plant, with pure white flowers.

ORDER 103. OROBANCHEE. Dan's. syst. 4. p. 629.

## The Broom-Rafe Tribe. Lind. nut. syst. p. 227.

326. PHELIP.EA. Don. Didynamia Angiospermia. Named by Tournefort, in honor of the family of Phelipeaux; patrons of natural science. Gaert. t. 185. Lam. t. 551.
327. P. Indica. Don's. syst. 4. p. 63?. Orobanche indica. Rox. Flora. 3. p. 27. Rox. Cor. 3. t. 292.

A strange looking parasitic plant; roots fibrous;-scape 6 or 12 inches high; terminated by a spike of purple coloured flowers.

Common on tobacco plants, in the Deccan and Guzerat. The crop is frequently injured by it.
527. AGINETIA. L. Didynamia Angiospermia.

Named in memory of Paul Aeginette, a Physician of the 7th century. (Don.) Rox. Cor 1. t. 91. Wall, Pl. Asiat. Rar 3.t. 319.
1085. Æ. Indica. Don's. syst. 4. p. 635. Rox. Flora. Ind. 3. p. 30. Rox. Cor. 1. t. 91. Tsjein cumulu. Rheed. Mal. 11.t. 47.

A small, rush-like, annual plant; scape from 6 to 10 inches high, terminated by the dark purple coloured, curved flower, which bears some resemblance to the howl of a tobacco pipe.

Kandalla, below bushes; springs up towards the close of the rains.-Salsette and Concans. N. It is a singular looking plant.

ORDER 103. GESNERIACE E. Don's. syst. 4. p. 644.

## Tribe 1. Gesneriace.

528. GESNERIA. L. Didynamia Angiospermia.

Named by Plumier, in honor of Gesuer of Zurich, a Botanist and natural historian. Gaert. t. 177. Lam, t. 536.
1086. G. Bulbosa. Don's. syst. 4. p. 646. Bot. Reg. t. 343.

Herbaceous plant; stem erect; leaves opposite, broad ovate, cordate; cymes many flowered; disposed upwards into a terminal thyrse; flowers of a very beautiful blue colour.-Native of Brazil; intd. by N.
529. GLOXINIA. Don. Didynamia Angiospermia.

Named in memory of Gloxin of Colmar.
1087. G. Speciosa. Don's. syst. 4. p. 649. Bot. Reg. t. 213. Bot. Mag. t. 1937. Bot. Cab. t. 28.

Perennial, tuberous, herbaceous plant; flowers showy: of bluish purple colour;-native of Brazil;-intd. by N.

## Tribe 2 Cyrtandraceae.

530. AESCHYNANTHUS. Don. Didynamia Angiospermia.

From aischuno - to be ashamed, and anthos-a flower. Jack in Linn. Trans. 14. p. 42. t. 2 and 3. Wall. Pl. Asiat. Rar. 1. t. 71.
1088. Æ Grandiflorus. Don's, syst. 4. p. 656. Incarvillea parasitica. Rox. Flora. 3. p. 112. Rox. Cor. 2. t. 291. Trichosporum graudiflorum. Don. in Edin. Phil. Journal.

A parasite, with crimson yellow flowers; in shape and size like those of Digitalis purpurea. Stem succulent, smooth; with swelled joints from which fibrous roots issue. On trees in $S$, Concan. N.

103 Cal. pantially. adher. 5 hantite. aste vul. Cor. Ononapet.tulo mure or less inueg tolued. arit. tine.  MuI: Jerrate.
1089. $\boldsymbol{E}$ —

Parasitic; differs from the last, in the flowers being solitary, and much smaller. On trees in S. M. Country. Probably a new species. (Mr. Law.)
131. DIDYMOCARPUS. Don. Didynamia Angiospermia.

Didymos-twin-Karpos-fruit; name given in allusion to the twin capeules. Jack in Linn. Trans. 14. p. 32.
1090. D.-—?

Au undetermined species; grows in the Snuth Concan. N.
The D. aromatica, Wall. Asiat. Pl. Rar. 2. t. 141. produces an aromatic drug, in high repute among Hindoo Ladies, who use it as a perfume. See Edinburgh Philosophical Journal. I. p. 348.

## ORDER 104. LABIATAE. Don's. syst. 4. p. 665. <br> The Mint Tribe. Lind. nat. syst. p. 239. <br> Tribe 1. Ocymoideae.

532. OCYMUM. Don. Didynamia Gymnospermia.

From Ozo - to smell; name given in allusion to the powerful smell of tho plants. Lam. t. 514.
1091. O. Canum. Don's. syst. 4. p. 670. O. album. Rox. Flora, 3. p. 15. Bot. Mag. $t .2452$.
Annual Hoary Basil;-erect pubescent; leaves ovate, cordate; flowers white; in simple terminal racemes.
1092. O. Basilicum. Don's. syst. 4. p. 670. Basilicum indicum. Rumph. Amb. 5. t. 92. f. 1. B. citratum. Rumph. Amb. 5. t. 93. Rox. Flora, 3. p. 17. Soladi tirtava. Rheed, Mal. 10. t. 87. O, Americanum. Jacq. Hort. Vind 3. t. 86. O. thyrsiflorum. Jacq. Hart. Vind 3. t. 72. Plectranthus Barrelieri. Sprengel syst. 2. p. 691.

Common or Sweet Basil.
" The Basil tuft that waves
Its fragrant blossom over graves."
Moore, in Lalla Rookh.
An annual, smooth, erect plant, with white flowers;-In gardens. The leaves and slender stalks of this and some other species are used in seasoning dishes.
1093. O. Gratissimum. Don's. syst. 4. p. 671. Rox. Flora. 3. p. 17. Cattu tirtava. Rheed. Mal. 10. t. 86. Jacq. Icon. Rav. 3. t. 495. Burm. Zey. t. 80. $f$. 1.

Ram Toolsee; Shrubby Busil.-Common in gardens;-flowering chiefly in the rains; very fragrant.
1094. O. Sanctum. Dons's. syst. 4. p. 672. Rox. Flora, 2. p. 14. Nalla tirtava., Rheed. Mal. 10.t.86. Salassi. Rumph. Amb. 5, t.92. f. 2. Ainslie. Mat. Ind. 2. p. 426. Parnassa. Asiat. Res. 4. p. 188.

Kula Toolsee.-Holy Basil.-Common in gardens, and about Hindoo Temples every where; and in flower all the year round.

The juice expressed forms one of the ingredients of a celebrated and rather effectual nostrum, for the cure of ring worm. (Dr. Gibson.)
There are several undetermined species of Ocymum on Salsette; one has the scent of peppermint; another is a large shrub; a third has thick leaves deeply serrated or crenated; and a fourth seems to delight in boggy situations. $\mathbf{N}$.
533. GENIOSPORUM. Don. Didynamia Gymnospermia.
1095. G. Prostratum. Don's.syst. 4. p. 674 Elsholtzia ocymoides. Persoons Synop. 2. p. 114. Mentha Zeylanica. Burm. Zey.t. 70.f. 2. Lumnitzera prostrata. Sprengel's syst. 2. p. 687. Kuttu tumba. Rheed. Mal. 10. $t_{0}$ 92.

Herbaceous, much branclied, prostrate plant; flowers in whorls; numerous, small.-S. Concan. N.
534. PLECTRANTHUS. Don. Didynamia Gymnospermia.

From plectron.-a cock's spur, and anthos-a flower;-name given in reference to the spurred corollas.
1096. P.Rotundifolius. Don's. syst. 4. p. 678. Nepeta Madagascariensis. Willd. Coleus rugosus. Bentham in Wall. Pl. As, Rar. 2. p. 15. Kurka. Rheed. Mal. 11.t•25.

Herbaceous, stem procumbent, rooting at the base; flowers blue.-The Concans. Tubers edible. N.
1097. P. Cordifolius. Don's syst. 4. p. 678. Ocymum molle. Aiton. P. secundus? Rox. Flora. 3. p. 20. Perimtolassa. Rheed Mal 10. t. 84.

Anmual, erect, 4 sided, flowers light blue; in long terminal and axillary racemes; appear in the rains.

Grows in great abundance throughout Kandalla village; also on the ruins of Rasa, near Ellora Caves; and generally every where near the habitations of man.
1098. P. Wightil. Don's. syst. 4. p. 680. Herbaceous, erect, branched plant; corolla inflated.-The Ram Ghaut. (Mr. Law.)
535. COLEUS. Don. Didynamia Gymnospermia.

From Koleos-a sheath; in allusion to the filaments being connected at the base, and sheathing the style.
1099. C. Barbatus. Don's. syst. 4. p. 682. Plectranthus monadelphus. Rox. Flora, 3. p. 22. P. Forskoelii. Willd. Spec. 3. p. 169. Bot. Mag. t. 2036. P. comosus. Bot. Mag. t. 2318. Bentham in Wall. Pl. Asiat. Rar. 2. p. 15.

Annual; stems shrubby at the base; flowers beset with white hairs of a light purple colour; -in verticels of 6 .

Commonly cultivated in native gardens for the roots, which are pickled. (Mr. Law.) On rice fields in Guzerat. (Dr. Gibson.) Sold in the green market, Bombay. N.

Roxburgh observes that the whole plant possesses a strong, thaugh not disa greeable smell.

Can Don's C. tuberosus 4. p. 685. (Rumph. Amb, 5. 182.f.I.) be identical?
1100. C. Aromaticus. Don's. syst. 4. p. 682. Plectranthus aromaticus. Rox. Flora. 3. p. 22. Marrubium album Ambonicum. Rumph. Amb. 5. 1. $102 f .3$. Bentham in Wall. Asiat. Pl. Rar.2. p, 15.

Pathur-choor.-Country Borage; an agreeably fragrant plant, common in gardens, Surat \&c. (Mr. Law.)
536. ANISOCHILUS. Don. Didynamia Gymnospermia.

From anisos-unequal, and chilos-a lip; in reference to the inequality of the lips of the calyx and corolla.
1101. A. Carnosum. Don's. syst. 4. p. 685. Plectranthus strabiliferus. Rox. Flora. 3. p. 23. Lavandula carnosa. Willd. Katu Kurka. Rheed. Mal. 10. t. 90.

Fova.-A Perennial, erect, with fleshy, hairy leaves, and lilac coloured flowers, in terminal spikes.
537. LAVANDULA. Don. Didynamia Gymnospermia.

From laun-to wash; in allusion to the use of the plants in baths and fomentations, Gaert. t. 66. Lam. t. 504
1102. L. Stoechas? Don's.syst. 4. p. 709. Stoechas purpurea. Tourn. Ins. t. 95.

A plant, with very glancons, linear leaves, with revolute margins; spike tetragonal; verticels 6 to 10 flowered; flowers dark purple.

In gardens at Belgaum and Dharwar; said to have been introduced from the Cape of Good Hope, and commonly called Lavender. (Mr. Law.)
1103. L. Spica. Don's. syst. 4. p. 710.

Spica, or broad leaved lavender.-In gardens Belganm. (Mr. Law.)
The flowers are used in the South of France for the distillation of what is called Oil of spike. (Don.)
1104. L. Vera. Don's. syst. 4. p. 709. Woodvilles Med. Bot. t. 55,

Lavender:-in gardens Bombay, and Nahableshwur.
The well known Lavender water is distilled from it.
1105. L. Gıbsonit. g.

Herbaceous; leaves lyrate. The hill Fort of Pundooghur; requires examination.
" Probably this is only a young plant of the next species which begins to flower within ten days, or a formight after it has sprung up; though it afterwards grows in a good soil to the height of 2 or 3 feet." (Mr. Law.)
1106. L. Burmanni. Don's. syst. 4. p. 710. L. mutabile. Burm. Ind. t. 34. f, 1. Chaetostachys multifida. Bentham in Wall. Pl. Asiat. Rar. 2. p. 19.

Herbaceous; clothed with fine pubescence; stem leafy tetragonal; flowers in October.

Grows about Dowlatabad and Ellora. (Jacquemont.) Common all over the Deccan, where it is known by the name of Gorea. (Dr. Lush.)

## Tribe 3. Menthoider.

538. POGOSTEMON. Don. Didynamia Gymnospermia.

From pogon-a beard, stemon-a stamen; in allusion to the filaments being generally bearded.
1107. P. Paniculatum. Don's. syst. 4. p. 711. Elsholtzia paniculata. Willd. 3. p. 59. Hyssopus cristatus. Lam. Ency. 3. p. 187. Manam podam. Rheed. Mal. 10. t. 65. Bentham in Wall. Pl. Asiat. Rar. 1. $\boldsymbol{\mu} 30$.

Stemerect downy, 2 or 3 feet high; leaves unequally ovate; racemes ter-minal.-Grows in moist places in S. Concan. N.
1108. P. Heyneanum. Dori's. syst. 4. p. 711. Origanum indicum. Roth. Cottam. Rheed. Mal. 10. t. 77.

Herbaceous, from 2 to 3 feet high; leaves ovate, long petioled; irregularly crenated.

Pach.-An aromatic plant beld sacred by the natives.-It is to be met with in gardens; alro wild in the Concans.

The leaves are sold in the Bazar, and put among cloths to prevent moths eating them.

They are also in general use as an ingredient in the mixture of tobacco called Gorackoo. It is doubttul what i'ach is. (see Wallich and Wight in Madras Journal of Science) Cultivated in Bombay, N.
1109. P. Frutescens. g.

A very beautiful suffruticose plant, with minute red flowers, in terminal spikes,---They appear in December and January.---Grows in large patches near Egutpoor, above the Tull Ghaut. (Dr. Elliot.)

Perbaps the plant here referred to may prove a species of Elsholtzia. (E. polystachya!) It requires examination.-
5:39. DYSOPHYLLA. Don. Didynamia Gymnospermia.
Dysodes--the smell of the leaves. Benth. Lab. p. 156.
1110. D. Auricularia? Don's. syst. 4. p. 712. Majana foetida Rumph. Amb. 6. $t$, 16, $f$. 2.Mentha auricularia Willd. Spac. 3. p. 74.

Annual erect plant; leaves oblong, opposite; flowers red, very small; in den eterminal spikes; appear in October and November.
The beds of water courses at Mahableshwur.---Perhaps this plant is the D. myosuroides. It requires examination. Hills about Goa. N.
1111. D. Srellata. Dons. syst. 4. p. 713. Meutha quaternifolia? Roth.

A small plant with verticelled, linear leaves, and purple flowers in dense spikes.
Growsin great abundance on rice fields, about Belgaum, during the cold season; large patches being coloured purple with the flowers. (Mr. Law.)
54. ELSHOLTZIA. Don. Didynamia Gymmospermia.

Named after Elsholtz, a Prussian Botauist. Lam. t. 502.
1112. E. Polystachya. Don's. syst. 4. p. 713, Mentha fruticosa. Rox. Flora. 3. p. 6. Aphanochilus polystachya. Wall. Pl. Asiat. Rar. I. t. 33.

A shrubby plant, 3 or 4 feet hiph; leaves ovate, lanceolate, serrate; spikes loose, panicled. Grows near Chibler, in the Surat Collectorate. (Mr. Law.)

Roxburgh remarks, that it possesses a strong, heavy, aromatic smell, and bitterish taste.
1113. E. Cristata. Don's. syst. 4.p. 714. Hyesopus ocymifolius. Lam. Ency. 3. p. 179.
Mentha Patrini. Pallas. Bot. Mag. t. 2560. Lam. Ill. t. 502.f. I.
Annual; native throughout Asia; abont lake Baical and the Altaian mountains. Dapooree; reared fro:n Euglish seeds. (Dr. Gibson.)
541. COLLEBROOKIA. Don. Didynamía Angiospermia.

Named in hourr of Henry Thomas Colebrooke, formerly of Bengal; and well known as a Botanist. Smith's Ex. Bot. 2. p. 111.
1114. C. Ternifolia. Don's. syst. 4. p. 715. Rox. Flora. 3. p, 25. Rox. Cor. 3. t. 245. Smith's Exot. Bot. 2. t. 115.
Dussaree ha jhar.-Dussaie, or Bhamince.-A small shrub, 3 or 4 feet high; leaves 3 fold, lanceolate, serrate; villous, and soft to the touch; flowers very minute, white; in terminal cyliudric spikes; like a squirrel's tail; appear in February and March. Grows on Kanddlla Ghaut; hills about Parr; Sidney point, Mahableshwur \&c.
512. PERILLA. Don. Didynamia Gymuospermia.
1115. P. Ocymoides. Don's. syst. 4. p. 715. Mentha perilloides. Rox. Flora. 3. p. 7. Lam. t. 503 Bot. Mag. $t, 2395$.

Panglee. Annual, erect plant, growiug to the height of about 3 feet; flowers blue; appear in February and March. The whole plant has a strong, and rather disagreable smell;-common on the Glants;-at Mahableshwur. (Dr. Murray.)
There is a shrubby plant which much resembles this, common at Mahableshwur: and generally growing under the shade of trees. Probably it is a new species of Pogostemon. The natives also call it Panglee.
543. MENTHÁ. Don, Didynamia Gymuospermia.

The Greek name of Mint; from Mentha, the daughter of Cocytus, who, according to fable, was changed into mint. Lam, $t .503$,
"Cuuld Pluto's queen with jealous fury storm. And Meuthè to a fragrant herb transform?''

Ovid's Meta. Book 10.
111t. M. Piperita? Don's. syst. 4. p. 718. Smith's Eng. Bot. t. 687.
Peppermint? - grows on the banks of the Yena at Nahableshwur. (Mr, Law.) This is probably a new and undescribed species. The true Peppermint is ouly to be found in gardens and was originally introduced from Europe. N.
1117. M. Anvensis, Don's. syjst. 4, p. 7i9. M. sativa. Rox. Flora. 3. p. 6. Smith's Eng. Bot. t. 448. Linn. Trans. 5. p. 199.

Common Mint;-in gardeus.
Water-mints are one of three kinds of plants. specified by Bacon in his Essay on Gardens as " perfuming the air delightfully on being trodden upon."
"Of bean-flowers I speak not, because they are field flowers; but those which perfume the air most delightfully, not passed by as the rest, but being trodden upon and crushed, are three; that is, burnet, wild thyme, and water mints; therefore you are to set whole alleys of them, to have the pleasure when you walk or tread."
54. MERLANDRA. Don. Diandria Monogyuia.

From meris - a part, and aner-a male; in allusion to the superior stamens being abortive, -Bentham in Bot. Reg, vol. 15.
1118. M. Benghalevsis. Don's. syst, 4. p. 722. Salvia Benghalensis, Rox. Flora. 1. p. 145. Ainslie. Mat. Ind. 1. p. 3.59.

A shrubby plant; leaves and young brauches canescent-In gardens. Taste andodour of the leaves stronger thauthat of Suge. - Wallich ouserves, that the whole plant exhales an ociour like camphor, when rubbed.

## Tribe 3. Monardee.

545. SALVIA, Don. Diandria Monogynia.

From Salno--to save; in allusion to the supposed healing qualities of Sage. Gaert, t. 66. Tourn. t. 83, Lam, t. 20.
1119. S. Officinalis. Don's. syst. 4. p. 723. Woodville's Med. Bot. t. 38. Common Sage - in gardens.
1120. S. Indica. Don's. syst. 4. p. 738. Bot. Mag. t. 395, Jacq. Hort. Vind. 1. t. 78, Moris. Hist. 3. S. II. t. 13. $f, 16$.
Seotee, Indian Sage.-Burrage. - In gardens; cultivated. Is this distinct from Meriandra Bengalhensis? N.
1121. S. Pseudo. coccinea. Don's. syst. 4. p. 749. Jacq. Icon. Rar. 2. t. 209. Bot, Mag. t. 2864. Willd. Spec. I.p. 141.

Flowers of a beautiful scarlet colour. - Dipooree, intd. from the Cape. (Dr. Lush.) It is a native of tropical America, and nearly allied to S. coccinea.
546. ROSMARINUS. Don. Diandria Monogynia.

From ros-dew, and marinus-pertaining to the sea; in allusion to its place of growth. Lam. t. 19. Tourn. t. 92.
1122. 12. Officinalis. Dons. syst. 4. p. 757. Sinith's Flora. Graeca. 1. t. 14. Woodville's Med. Bot. $t$ - 87. Blackwell. $t$. 159.

Common Rosemary; in gardens. The emblemof fidelity in lovers.

> "There's rosemary, that's for remembrance." Ophelia, in Hamlet.

It forms a principal ingredient in what is called Hungary water. (Don.)

## Thibe 1. Saturelneae.

547. MARJORANA, Don. Didynamia Gymnospermía.

The Arabia name altered. Benth. Lab. p. 338.

## 1123. M. Hortensis. Don's. syst. 4.p. 766.

Origanum marjorana. Linn Woodvilles Med. Bot. t. 165. Blackwell. t. 319. Moris. Hist. 3. S. II t. 3. f. I.

Sweet Marjoram; annual:-In gardens.
548. THYMUS. Don. Didynamia Gymnospermia.

From thymos -streagth; in allusion to the reviving smell of thyme. Lam. $t$. 512. Benth. Lab. p. 340.
1124. T. Vulgaris. Don's. syst. 4. p. 767. Woodville's Med; Bot. t. 109.

Common Thyme: In gardens, Belgaum. (Mr. Law.) also in Bombay gardens.

> "Kids flowery thyme, gaunt, wolves the kid pursue, The crane the plough-share," Trans. Theocritus Idyll. 10. Hawkes Tre The trembling eyebright showed her sapphire blue, The thyme her purple, like the blush of even; And, if the breath of some to no caress Invited, forth they peeped so fair to view, All kinds alike seemed favourites of Heaven."

A kind of Thyme and Rue are said to cover the Comntry of Kandahar, above the Bolan Pass. Probably the later is the Paganum harmala.

## 1125. T, —?

A plant, apparently belonging to this genus; in gardens at Belgaum, where it is called Indian Thyme. (Mr. Law.)
549. SATUREIA. Don. Didynamia Gymnospermia.

From an Arabic word, applied generally to labiate plants. Lam. t. 504.
1126. S. Hortensis, Don's. syst. 4. p. 771. Blackwell. t. 419. Moria' Hist. S. 11. t. 17.f. 1.
Summer Savory:-Danooree, intd. from the Cape. (Dr, Lush.)
Tribe 5. Scutellarineae.
550. SCUTELLARIA. Don. Didynamia Gymnospermia,

From scutella-a little saucer; in allusion to the form of the calyx. Tourn.
8. 84. Lam. t. 515.
1127. S. Indica. Don's. syst. 4. p. 793. Rox. Flora. Ind. 3. p. 24. Pluk. 8. 441. $f$. 1. Willd. Spec. 3.p 175.

Annual, with petioled round cordate, cremate leaves, and white flowers, which appear in October. At Mahableshwur. (Dr. Gibson.) It is a native also of China, Japan, Java, and other eastern Islands.

## Tribe 7. Stachydeae.

551. LEONURUS. Don, Didynamia Gymnospermia.

From leon-a lion, and oura-a tail. Tourn t. 87. Lam, t. 509.
1128. L.Tataricus. Don's. syst. 4. p. 821. Willd. Spec. 3. p. 116

Tartarian Motherwort:-conmon in Gardens at Belgaum, where it is naturalized. (Mr. Law.)
552. ANISOMELES. Don. Didynania Gymnospermia.

From anisos-unequal, and melos-a number; in allusion to the anthers of the lower staneus being halved.
of Iter!herume bai $21 / 2+10$

S. Concan. N. - Common abont Belyaum; frequently growing in company with the next species, which is also common in liedges \&c. (Mi: Law.)
1163. C. Serratum. Sprengel's syst. 2. p. 75s. Volkameria serrata. Rox. Flora. Ind. 3. p 62. Isjeron Teka. Rheed. Mal. 4. t. 29.

Barungee.-A shrub; young shoots 4 sided; leaves opposite or tern; from 5 to 10 inches long, and broad in proportion; serrated; Flowers in terminal panicles; appear in the rains; of a pretty pale blue colour.-The natives eat them as greens, also the leaves.

Kandalla;-thronghont the Mahal districts, above the Ghauts; and in Salsette. N. - It is an ormamental shrub, when in flower.
1164. C. Siphonanthus. Sprengel's syst. 2. p. 758. Siphonanthus indica. Rox. Flora. lıd. 3. p. 67. Lam. Ill, i. 79. f. 1. Burm. Ind. t. 43. f. L. Ovieda mitis. Willd. 3. $p, 38$. .

Also called Burungee. - A tall, erect-growing, sulfruticose plant, with linear leaves, like Nerium Oleander; flowers white, or cream-coloured, with very
long tubes.

Com non in Bombay gardens;-said to grow wild on the hills east of $A$ hmedauggur. (Dr. Gibson.)
$116 \overline{0} . \mathrm{C}$. Fragrans. Spreugel's syst. 2. p. 760. Volkameria Japonica. Thunb. Vent. Malm. $t$. 70. Bat. Mag, $t$. 18:34.- Duable variety. Herbaceous, with large, wrinkled leaves:-native of Caina, and now pretty common in Bumbay gardens.
1166. C. Aculeata.

Volkameria aculeata. Spiengel's syst. 2. p. 760. Brown's Jamaica t. 20.f. 2. Pluk. Phyt.t. $351 . f$. 2. Jacq. Amer, $t$. 117. Slanu. Jam, 2. t. 166.f. 2 aud 3.

A thick bushy shrab, somewhat armed: Fluwers white, in terminal corym= biform panicles. - It is a ntive ofthe W'est Inlies, and wasprobably introduced by the late Lieut. Col. Hough, in whose garden on Colabith it is to be met with.
1167. C. Emirnense. Bot. Mag. t. 2925.

A sirub, with dingy white flovers, in terminal corymbs.-Parell garden; introluced from the Muritius; - it is a native of Madagascar.

All the species are worthy of cultivation for the sake of their flowers. K:aton mal Plua. Rheed. Mal 5.t. 2 . described as a tree of large size, either belongs to this, or a closely allied geaus.
565. GMELINA. L. Didynamia Angiospermia.

In honor of Gmelin, a German Naiuralist and Traveller. Gaert. Fruct. I. $t$. 66. Lam. t. 542.
1163. G. Arborea. Rox. Flora. Ind. 3. p. 84. Cumbulu. Rheed. Mal. 1. t. 41. Rox. Cor. 3. t. 246.

Sewun, or Shewunee--A large fimber tree; leaves petioled, cordate point-ed.-Flowers in April and Hay; large, yellow, tinged with brown; in terminal racemes.

Common throughout the Concans; -also on Bombay Island.
The light wood of this tree is used by the Natives of Hindoostan, for making the cylinders of the Drums called Dholucks. (see Asiat. Res. 6. p. 365,) also for makiny carriage pannels; as combining lightness with strength; common on the Decean hills; but does not attain any size. (Dr. Gibson.)
1169. G. Asiatica. Rox. Flora. Ind. 3. p. 87. G. parviflora. Rox. Flora. Ind. 3. p. 87. !?umph. Ainb. 1. t. 40. Pluk. Alm. t. 14. f. 4. Rax. Cor. 2. t. 162. Rumph. Amb. 2.t. 39.

A pretty shrub, with small scolloped leaves, and large yellow flowers, which come out chiefly in October, but more or less throughout the year.

Common in Bombay gardens. It is armed with thorns, and forms an elegant, and excellent hedge.
566. ZAPANIA. Juss. Didynamia Angiospermia.

In honor of 'Zappa, an Italian Botanist. Lam. Illt. I7.
1170. Z Nodiflora. Persoon's Synop Lippia repens, and L. sarmentosa. Sprengel's syst. 2. p. 752. Burm. Ind. t. 6. f. 1. Plora. Graeca. t. 553. Verbena nodiflora. Linn. Ana-coluppa. Rheed. Mal. 10.t. 47.

An annual, creeping plant, with wedge-shaped, cordate leaves, and spikes of flowers in conic heads; common all over Bombay, creeping among the grass. It seems to be indigenous in every quarter of the Globe.
567. ACROCEPHALUS. Wight. Didynamia Angiospermia.
1171. A. Capitatus. Wight.

A plant with erect stems;-S. M. Country. (Mr, Law.)

1173. A. Tomentosa. Rox. Flora. Ind. 3. p. 88. Oepata. Rheed. Mal. 4. t. 45. Wall Pl. Asiat. Rar. 3. t. 271.

Scemra maritima. Forskol's Arauia p. 37. Jacq. Amer. t. 112, f. 2.
White Mangrove. - A small tree, with opposite, obovate or oval leaves; a little hoary underneath. Flowers in April and May; terminal, small; of a dingy yellow colour.

Grows abundantly in salt. marshes; -the Vellard, Sion Canseway \&c.Flowers 4 petalled; stamens 4, equal. -This is probably the tree Camoens alludes to,
" Wide forests there beneath Maldivia's tide
From withering air their wondrous fruitage hide.
The green-hair'd Nereids tend the bowery dells,
Whuse wondrous fruitage poison's rage expels."
Lusiad. Book 10.
The bark of this rree is much used at Rio Janeiro for tanning.

## ORDER 10 A. ACANTHACE A . Brown's prod. p. 472.

## The Justicia Tribe, Lind. nat syst. p. 233.

570. ACANTHUS. L. Didynamia Angiospermia.

Acanthos-a spine;-some of the species are armed with spines.-Gaert. 1. t. 54. Lam. Ill. $t .550$.
1174. A. Ilicifolicius. Rox. Flora. Ind. 3. p. 32.

Aquifolium indicum Kumph, Amb. (6. t. 71.f.1? Paina schulli. Rheed. Mal。 2. $t$. 48. Hamilton in Linn. Trans 14. p. 297, Pluk. Alm. $t$. 2it. $f$. 4. Ainslie Mat. And. 2. p. 306. Dilivaria ilicifolic. Persoon's Synop. 2.p. 179.

Sea Holly.-A. shrub, with waved, spinous-dentate, polished leaves, and pretty blue flowers.

Grows abundantly in salt marshes. - It is very much like the common English Holly.-There is a species of Berberis on the Neilgherries, to which it also bear a considerable recemblance.

Milion makes an Acanthus assist in adorning Eve's "blissfulBower."
_ On either side
Acanthus, and each odorous bushy shrub
Fenc'd up the verdant wall."

## Paradise Lost. Book 4.

Probably he had in view A. spinosus. Bot. Mag, t. 1803. which is supposed to have furnished the Greeks with the elegant Acauthus leaf of their Ar-chitecture;-the prototype of the Corinthian capital.

## 571. LEPIBAGATHIS. Willd. Didynamia Angiospermia.

From lepis-a scale, and agathis-a clew; in allusion to the mode of growth resembling a scaly ball.

## 1175. L. Cristata. Rox. Flora. Ind. 3. p. 53. Rox. Cor. 3. t. 267.

A small perennial plant with the inflorescence in a dense imbricated head, close on the ground. Flowers small, rose coloured; appear in the rains,

Common on bare rocky ground, such as Malabar hill \&c.
There is a variety or distinct species common at Mahableshwur and spreading over rocks to a great extent; the leaves are of purple colour, and spinous pointed; Flowers pink, spotted on the inside. (1)r. Gibson.) Perhaps it may be the L. purpuricaulis of Professor Nees in Wall. Asiat. Pl. Rar. 3. p. 96.

572: BLEPHARIS. Juss. Didynamia Angiospermia.
Greek for the eyelashes;-name given in allusion the shape of the bracts of the calyx.
1176. B. Molluginifolia. Sprengel's syst. 2. p. 820. Acanthus repens, Vahl's Symbols. 2. p. 76.

A small creeping, hispid plant; grows on rocky ground by the sea shore, during the rains.
1177. B. Boerhatifolia. Sprengel's syst. 2. p. 820. Nees in Wall, Pl. Asiat. Rar. 3. p. 97. Acanthus maderaspatensis. Rox. Flora. Ind. 3. p. 33. A. ciliaris. Burm. Ind. t. 42. f. 2. Pluk, Phyt. $t$. 99. $f$. 3.

Annual, diffuse weed, with quatern leaves; aud blue flowers. Common in the rains.
1178. B. - ?

A new species; annual, erect, with flowers much larger than those of the last. Discovered on the Kam Gliaut by Mr. Law.
573. BARLERIA. L. Didynamia Angiospermia.

In honor of Barelier, a celebrated French Butanist. Gaert. Fruct. 1. t. 54. Lam. Ill, t. 549.
1179. B. Prionitis. Rox. Flora. Ind. 3. p. 36. Coletta veetla. Rlieed. Mal. 9, t. 41. Rumph. Amb. 7. t. 13. Pluk. Alm.t. 119. f. 5. Justicia appressa. Forskols Arabia. p. 6. Ainslie. Mrt. Ind. 2. p. 376.

Kholeta.-A shrubby plant, armed with axillary, sharp thorns; Flowers axillary, large, yellow; appear all the year round, but in greatest abundance about the close of the rains. Common on Malabar Hill, and every where.
1180. B Buxifolia. Rox. Flora, ind. 3. p. 37. Cara schulli. Rheed. Mal, 2. $t$. 47. Hamilton in Linn. Trans. 14. p. 292. Barleria cristata. Var. B. Lam. Ency. Meth. 1. p. 380. Lam. Ill. t. 549. f. 2.

A shrubby, spreading plant, with opposite subrotund, nearly sessile leaves; spines in axillary pairs, longer than the leaves. Flowers solitary in the forks of the spines, large, of a beautiful pink colonr. The Concans N.
1181. B. Cristata. Rox. Flora. Ind. 3. p. 27. Moris' Hist. 3. s. 11. t. 23. f. 7. Bot. Mag.t. 1615. Lam. Ill, t. 549. f. 1.

swo if to Atern. raciuule. Caf. 2 celled, 2 val. hersting hictiteladis erubiany to int hartition

A shrnby unarmed plant; leaves sessile, broad lanceolate. Flowers axillary; of a blue colour with a dash of purple;-appear in the rains; the caly $x$ is $\&$ leaved; 2 of the leaves much larger than the others, and frimged with bristles.

In gartens Bombay; a very beautiful shrub when in flower, but of rather a scraggy appearance at other times.
1182. B. - ?

Herbaceous, erect growing plant, 2 or 3 feet high; flowers bright blue with long tubes; 2 of the segments of the calyx much larger than the others, butnot ciliated like the last species.-G rows in qreat abundance on Cross Ishud; flowering in September. It does not appear to be described.
1183. B. Longiflora? Rox. Flora. Ind. 3. p. 40. Vahl's Symbols. 1. t. 16. Ruellia grandiflora. Persoon's Synop. 2.p. 175. Camellia grandiflora. Furskol,

A shrubby, warmed plant; with axillary and terminal flowers; pure white with long tubes; they appear in November and December; grows about Kan-dilla;-a very ornamental shrub.

There is an unarmed species, on Kandalla Ghant, with yellow flowers (Ruellia flavn? Rox.) which appear in November and December. It seems closely allied to 13. corulea. Perhaps the $B$. longiflora here referred to, is identical with Roxburgh's B. dichotoma.
1184. B. Coerulea? Rox. Flora, Ind. 3. p. 39. B. strigosa. Willd. Spec. 3. $p, 379$.

Wahitee.-An unarmed shrub; leaves subsessile, oblong; stems erect, round, jointed, and swelled above the joints; Flowers in short axillary and terminal spikes; large, of a beautiful blue; appear in November and December; Kandalla Ghaut, and in garden hedges about Kandalla village, This is a shrub worthy of cultivation, on account of its showy fluwers,
1185. B. Longifolia. Willd. 3. p. 375. Ruellia longifolia. Rox. Flora. Ind. 3. p. 50. Astriacantha longifolia. Nees in Wall. Pl. Asiat. Rar. 3. p. 80. Jahel schulli. Rheed. Mal. 2. t. 45 Hamilton in Linn. Trans, 14. p. 288' Gegantaca. Asiat. Lies. 5. p. 291. Pluk. Alm. t. 133.f. 3. Ainslie Mat. Ind* 2. p. 236.

A very common herbaceous plant, springing up in moist places; it is easily recornized by its verticilled leaves; with six spines at each verticil; flowers of a bright blue colour:

The seeds are prescribed by Hukeems under the name Tal-mugami. (Dr. Gibson.)
1186. B. ?

A suffruticose, armed plant, about the size of B. cristula; flowers very small, compared with those of the other species; appear in Janary and Februnry; of a ding'y white, or freckled.-In hedges on Halabar hill.
574. RUELLIA. L, Didynamia Angiospermia.

In honor of Ruelle, a French Botanist, and Physician to Francis Ist. Gaert. Fruct. 1. t. 54. Lam. Ill. t. 5 50.

Abboolec.-A shrubby plant, with large, bright'orange-coloured flowers;common in flower pots about Temples, and in almost every garden.
1188. R. Zeylanica. Rox, Flora. Ind. 3. p. 42. Vali Upa Dili. Rheed. Mal. 9. t. 45.

A suffruticose, s:andent plant, with whitish, or pale blye flowers, in terminal racenes; they appear in the rains. In hedges Brombay;-common at K audalla.
1189. R. Obovata. Rox. Flora. Ind. 3. p, jı. Nir schulli. Rheed. Mal 2. 6. 46. Hamilton in Limn. Trans. 14. p. 289.

Annual; flowers about the close of the rains.
1190. R. Bracteata. Rox. Flora. Ind. 3. p. 47.

A shrubby plant; stems round, sinooth, juinted; leaves opposite, petioled, peduncles axillary, solitary; bractes 2 , opposite; covering the 5 leaved calyx. Flowers large, white; corolla with a gibbous tube.-On the Ghauts; flowers in the cold weather. Hills in the vicinity of Panwell. N.
1191. R. Ringens. Rox. Flora. Ind. 3. p. 44. Hygrophylla ringens. Sprengel's syst. 2. p. 828. Upa Dali. Rheed. Mal. 9. t. 64.

Perennial, creeping plant, with pale blue, bell-shaped flowers; the Concans. N.
1192. R. Patula. Rox. Flora. Ind. 3. p. 45. Lam. Ill. t. 650. Jacq. Icon. Rar. 1. t. 119.

Perennial, with ovate, scolloped leaves. Peduncles axillary; three flowered; flowers pale blue.
1193. R. Deccanensis. G.

Annual, creeping plant, with large, beautiful, bright blue flowers. Common in the Deccan, below bushes, during the rains. (Dr. Gibson.)

It seems to be allied to R. hirla. Vahl's Symbols 6. 67. What is Roxburgh's $\boldsymbol{R}$. latebrosa?
1194. R. Elegans. Bot. Mag.t. 3389.

Herbaceous, erect, hairy; leaves opposite, ovate, acuminate, tapering into the foolstalk; calyx of 5 linear, lanceolate, ciliated segments; tube of the corolla whitish; limb bright blue,-On the Ghauts; flowersin the rains. Salsette. N. The plant figured in Bot. Mag. was reared from seeds sent by Mr. Nimmo to Sir W. J. Hooker.
1195. R. Imbricata? Rox. Flora. Ind. 3. p. 48. Willd. Spec. 3. p. 366. Vahl's Symbols. 2.p. 73. Aetheilema veniforma. Nees in Wall. Asiat. PI. Rar. 3. p. 94.

Wayutee. (Mahableshwur name.) A perennial plant, with a strong balsamic smell; leaves opposite, long petioled; one of the pair much smaller than the other. Flowers in axillary and terminal racemes; whitish; appear in December and January. Calyx and bracts covered with clammy hairs. The ravines about Parr. (Dr. Murray.) In thick Jungle on the Ghauts, generally.
575. STROBILANTHUS. Blume. Didynamia Angiospermia.

Strobilus.-a cone-anthos-a flower; in allusion to the mode in which the flowers grow.
1196. S. Clliata? Wall. Pl. Asiat. Rar. 3. p. 35.

Karwee.-An erect growing shrub; stems as thick as a walking stick; branchless; (when it is regularly cut down.) something like young shoots of the English Elder. (Sambucus nigra.) Commonly used by the natives in the construction of mud walls, and for making fences with. Flowers in October; of a bright blue; in closely imbricated cone---like spikes, formed by the bracts, as in Barleria lupulina of the Mauritius; are they distinct! N.

Grows in great abundance on the Ghauts, frequently covering acres of ground, to the exclusion of every thing besides.-At Mahableshwur; most of the bungalow fences on Bombay Esplanade are made of it. The natives have a tradition, that it flowers only once in 10 years. It is a mast useful plant to them.
1197. S. Glutinosa?

Karwee;-much like the last, but with hairy, glutinous bracts, having a strong balsamic smell.

4

201. Fl. oppe sat. Ac cu't. Rale blue er. with lony it. zo der tuly

On the Ghauts;-perhaps it is a mere variety of the last.
The smell of the glutinous deposit on the bracts, in making ones way through a thick Jungle is very overpowering. (Dr. Gibson.)

There is another variety or distinct species called Wailee, (Ruellia imbricata is alsoknown by this name, or Waktee, generally found in thick Jungle below the shade; it is perhaps a species of Ruellia; grows in great abundance in the ravines at Kandalla, and ahout Parr;-flowers in the cold weather.

This genus requires examination.-Mr. Law mentions 2 species which he sent to Dr. Wight of Madras; both of which are considered new.-In regard to flowering; he alludes to several Ceylon species, whose habits have been carefully studied, and it has been observed that some flower every 3rd year, some every 5 th or 6th, and others only every 9 th year. After they have Howered, they die down to the root, to be reproduced the next year, and go through a similar course.
S. Auriculata, is figured in Wall . Asiat. Pl. Rar. 3. t. 295.
576. THUNBERG1A. L. Didynamia Angiospermia.

In honor of Thunberg, a celebrated Traveller and Botanist. Lam. Ill. t. 349.
1198. T. Fragrans? Rox. Flora. Ind. 3. p. 33. Rox. Cor. 1. t. 67. Bot. Mag. t. 1881.

A twining plant; leaves opposite, narrow cordate; lobed at the base;-flowers large, pure white, but without any fragrance: appear in the rains, capsule size of a pea: flat, and beaked.

Common in Kennery Jungles and on the Ghauts; the flowers look something like those of Convolvulus sepium.

The plant here referred to agrees well with Roxburgh's figure, but Mr. Law thinks it is a new species, as the flowers have no fragrance.
1199. T. Grandiflora. Rox. Flora. Ind. 3. p. 34. Bot. Reg. t. 493.

A perennial twining plant, with opposite, cordate leares; flowers large, of a beautiful light blue colour.

Common in gardens, Bombay; flowers in the rains. It makes an elegant covering for trellis work. The colour of the flowers varies to a pure white. N.

57\%. ERANTHEMUM. Br. Diandria Monogynia.
Ear-anthos.-Spring flower; badly applied to the Indiau species; as they flower in autumn, or rather in winter. Lam. Ill. 1. t. 17.

Silver--spiked Cockscomb.--Annual, common every where during the rains. It assumes very different appearances, according to the soil or situation it may be found in.
1230. C. Cristata, Rox. Flora. 1. p. 679. Amarainthus vulgaris. Rumph. Amb. 5.f. 84.
Common Cockscomb. - Lal Moorga-Cultivated in gardens for the sake of its strange looking, beautiful, crested flowers. C. flova, is a variety. N.
1231. C. Monsonie. Roemer and Schultz. Achyranthes Monsoniae. Rox. Flora. 1. p. 67:3. Pluk. Alin. 11. t. 334. f. 2.

Annual, diffuse, flowers in terminal spikes, minute, rose coloured.
586. DEERINGIA. R. Br. Pentandria Monogynia.

Named in memory of Mr. Deering, author of a Flora of Nottingham.
1232. D. Celosoldes. Rox. Flora. 1, p. 632. Blituin frutescens. Rumph. Amb. 5. t. 83. f. 2.

Pereunial, scandent plant:-In hedges \&c.

## 587. ACHYRANTHES. L. Pentandria Monogynia.

From achyron-chaff, (Job. 21. 18.) and anthos-a flower; in allusion to the chaffy wature of the floral involucres. Lam. t.168. Gaert. '2. t. 128.
1233. A. Aspera. Rox. Flora. 1. p. 672. Rheed. Mal. 10, t. 78 and 79. Burm. Zey. t. 50. $f$, 3. Pluk, Phyt. t. 260. f. 2. Rumph. Amb. 6, t. 11 and $t$. 12.f. I? Ainslie. Mat. Ind. 2. p. 221.

A common weed; appears during the rains; flowers in rough, terminal spikes.
583. DESMOCHAETA. D. c. Pentandria Monogynia.

Desmos-a bond-chaita-a sheath; in allusion to the mode in which the flowers grow.
1234. D. Atropurpurea. Sprengel's syst. 1. p. 817. Achyranthes lappacea. Rox. Flora. 1. p. 673. Rheed. Mai. 10. t. 59. Burm. Zey. t. 18. $f$. 1. Pluk. Alm. t. 82. $f$. 2.

Annual, common; flowers with long purple bristles.
1235. D. Prostrata. Sprengel's syst. 1. p. 818. Achyranthes prostrata. Rox, Flora. 1. p. 674. Rheed. Mal. 10.t.79. Auris canina femina. Rumph. Amb. 6. $t$. 11.-anuual: a weed.
1236. D. Muricata. Sprengel's syst. Appen. p. 102. Rumph. Amb. 5. セ. 83. f. 1.-anuual.
589. ALTERNANTHERA. R. Br. Pentandria Monogynia.

Plants witlualternate anthers;-some fertile, some barren.
1237. A. Sessilis. r. Brown. Illecebrum sessile. Sprengel's syst, I, p. 819. Achyranthes triandra. Rox. Flora. 1. p. 678. Coluppa. Rheed, Mal. 10. t. 11. Burm. Zey, t. 4. f. 2. Rumpi. Amb. 6. t, 15. f. I.

Anuual;-a common weed.
Knot-grass is the Englishname of Illecebriam, but surely the "Savoury berb" Milton alludes to in his Comus, must have belonged to a different genus.
"This evening late, by then the chewing flocks
Had ta'en their supper on the savoury herb
Of knot-grass dew-besprent, and were in fold."
590. AERUA. Juss. Pentandria Monogynia,

From its Arabic name.
1238. A. Linata. Sprengel's syst. 1. p. 815. Achyrantlies lamata. Rox. Flora. 1. p. 676. Scherubula. Rheed. Mal. 10. t. 29. Burm. Zey. t. 60. $f$. B. - A common weed.
591. GOMPHRENA. L. Pentandria Monogynia.

A name said to have been applied to a plant of the Amaranth tribe, hearing red and green leaves, Gaert. 2. t. 12う. Lam. t. 180.
233-Loume thanye bo "hietty 2eot co iore
1239. G. Globosa. Rox. Flora. 2. p, 63, Flos Gloho3ns. Rizmph, Amb. 5. t. 10) f. 2, Wadapu. Rheed. Mal. 10. t. 37. Bot, Mar. t. 2315.

Jafferee Goondee,-Globe Amaranth.-Anaual; common in every garden. The flowers are in heads, and look much like red clover. The native wonen wear then in their hair. In Catholic Europe tisey are used for decorating Charehes.

Probably this is Milton's
" Immortal amarant, a flower which once In Paradise, fast by the tree of life, Began to bloom."

## Paradise Lost, Book 3.

He might possibly notice it when travelling in Etaly, and borrow the idea from 1st Peter 1. 4. and 万. 4. amaranton, and amarantinon:- the unfading inheritance; contrasted with the fuding crowns, of wilil olive, laurel, pine and parsley, for which the Greeks contended in the Olympic Games, and to which Paul makea beautiful allusion iu Ist Corinth. C. 9. 25. to the ead.
1240. G. Hispida. Willd. Spec. 1. p. 1321. Nin angani. Rheed. Mal. 9. t. 72. Grows wild in S. Concan. N.
59.2 A VARANTHUS. L. Monoecia Pentandria.

From a-privative, and moraino-to wither: in allusion to the flowers of most of the species retaining their bright colvars when dead. Lam. t. 767. Gaert. 2. t. 123.
1241. A. Tenuifolius. Rox. Flora. 3.p.602.-annual, diffuse plant.
[24.2. A. Polygasids. Rox. Flora. 3. p. 603. Blitum indicum album. Rumph. Amb. ธ. t. 82. f. 1.
Choolue.-C'ommon Bajee.-A diffuse plant, with rhomb-ovate leaves: much cultivated.

121:3. A. Thistrs. Rox. Flora. S. p. 67t. Blitum indicum secundum. Rumph, Amb. 5.t.82. f. 2, A. campestris. Willd. 4. p. 332.

Annaal, erect, ramoas, from 1 to 2 feet high: frequently tinged with red: cultivated in alnost every garden. Roxburgh says, it differs from $A$. olerazeus, in having long difiuse branches from the base, and in having always terminal spikes.
1244. A. Firidis. Rox. Flora. 3. p. 60.5. Willd. Amar. 18. t. 8. f. i6.

A conmon weed, in gardeus and cultivated grounds;-native also of the Brazils.
1245. A. Oleraceus. Rox. Flora. 3. p. 605. Willd. Amar. 17.t. 5. f. 9. Tamon?ja, Mut Tanb)ree. -Several varieties are commonly cultivated and used as Spimage. -Roxburgh says, Willdenow's figure does not agree with his plant.
1246. A. Tricilor. Rox. Flora. 3. p. 609. Willd. Amat. 11.t. 6. f. 12.

Three-coloured A maranth;-an erect growing plant, from 2 to 3 feet high; leaves variegated. - Common in gardens, and in flower all the year.
1247. A. Spinosus. Rox. Flora. 3. p. 611. Willd. Amar. 33 t. 4.f. 8. Rumph. Amb. S.t. 33. f. 1.

A common weed amoing rabbish during the rainy season; armed with spines in the axils of the leaves.
1248. A. Caudatus. Sprengel's syst. 1. p.929.

Love lies óleeding. - Aunual, 10 garden: -an ornamental plant.

The Thessalians adorned Achilles' grave with a kind of Amaranthous.
What is Shakespeare's Love-in-Idleness?
" Yet mark'd I where the bolt of Cunid fell:-
It fell upon a little western flower,
Before milk-white; now purple with love's wound,
And maideus call it love-in-idleness.
Midsummer's Night Dream:

## ORDER 113. CHENOPODEE. Sweet's Hort. Brit. p. 338.

## The Goose-foot Tribe. Lind. nat. syst. p. 167.

593. BASELLA. L. Pentandria Trigynia.

The Malabar name adopted. Gaert. 2. t. 126. Lam. t. 215.
1249. B. Alba. Rox. Flora. Ind. 2. p. 104. B. rubra, variety. Rheeत。 Mal. 7.t.24. B. lucida, and cordifolia. Willd Spec. 1. p. 1514. B. rubra aud alba. Willd. Spec. I• p. 1513 and 1514. Gandola alba. Rumph. Ainb. 5. p. 417. Gandola rubra. Rumph. Amb. 5, t. 15t. f. 2. Pluk. Alm. t. 63. f. I.

Malabar Nightshade. Doodee.
Myal-ke-bajee, Wahlea.-Twining, succulent plants, with smooth fleshy leaves. They grow very rapidly and are generally cultivated as Spinage by the natives. The red variety is very ornamental. Roxburgh considers $\boldsymbol{E}$. alba as the original stock.

Dr. Gibson suggests, that the beautiful purple juice afforded by the fruit, of the red var. night be turned to some account as a dye.
594. SALSOLA. L. Pentandria Digynia.

From sal-salt; in allusion to the place of growth, and the alkali obtained from the plants. Gaert. 1.t. 75. Lam. t. 181.
1250. S. Indica. Rux. Flora. 2. p. $62 \cdot$

Indian Saltwort.-A perennial, erect growing plant, with woody stems; much branched; branches diffuse: leaves sessile, linear, fleshy: fluwers small, in terminal leal-bearing spikes.

Grows in salt marshes, salsette \&c. The natives eat the leaves.
1251. S. Nudiflora. Rox. Flora. 2. p. 60. Willd. Spec. I. p. 1313,

Prostrate, perennial plant, with linear fleshy leaves and flowers in long terminal, leafiess spikes.

Grows in a salt marsh near Moul, on Salsette, and generally in the same localities as the last.

Roxburgh observes, that the taste is strongly saline, and that it would no doubt yield good fossil alkali.

From N. kali, common on the shores of Britain, kelp, used in the manufacture of glass is obtained, S. sodla and S. sutiva furnish the alkaline salts barilla and soda, so extensively used in medicine and the arts.

## 12j2. S. Fruticosa? Willd Spec. 1.p. 1316.

Chenopodiun fruticosum? R. S• Eng, Bot. t. 635. Duhamel's Traite dea Arbres. 1, t. 62.

An erect growing shrub, with linear, fleshy leaves, and axillary flowers; stamens 5, erect: anthers yellow: styles 3, purple.

Grows in salt marshes on the shores of Spain, France and Persia.
Perhaps the Darun, or Lanah, which grows abundantly in lower Scinde, and forms the chief luxury of the Camel, is identical. It is said to resemble English Heath? No specimens have yet been received.

                                M-2,
IGthin
```

What is the Nunica sulina, common on the saline plains near Agra, and described as a shrub, size of the Tamarisk, with diffuse branches, sub-sessile, fleshy leaves, and solitary seeds immersed in a pulpy receptacle? (See Buchanan Hamilton in Edinbargh Jourual of Science. Vol. 7. p. 245.) May not this plantalso be identical?
59.5 CHENOPODIUM. L. Pentandria Digynia.

From Chen-a goose, poles-a foot; in allusion to a fancied resemblance in the shape of the leaves. Gaert. t. 75. Lam. t. 181.
1253. C. Viride. Rox. Flora. Ind. 2. p. 58. C. album. Rox. Flora. Ind. 2. p. 58- English Botany. t. 1723. Blackwell. t. 553.

Chakecet.-Gieose-foot.-Several varieties are cultivated as pot herbs.
The C. bonus-Henricus; (English Mercury.) is cultivated for the same purpose in England.
595. ATRIPLEX. L. Polygamia Monoecia.

From a-privative, trepho-to nourish; plauts yielding no nourishment; not very appropriately applied, since some of the species are used as Spinage, Gaert. t. 75. Lam, t. 853.
1254. A. Hortense. Sprengel's syst. 3. p, 916. Blackwell. t. 99 and 552.

Garilen Orache.-Cultivated in the Decean, as a Spinare. (Dr. Lush.) also in Bombay. N.

There are several varieties tinged with red or purple.
Loudon says, Orache is cultivated to a considerable extent in the neighbourhood of Paris.
597. BETA. L. Pentandria Digynia.

From the Celicic bett-red. Lam t. 182. Gaert. t. 75.
125.5. 13. Vulgaris. Sprengel's syst. I. p. 950.

Paluk, or Palung-Chukunder, Rerl Beet.-Commonly cultivated in car-dens.-The vailety Macroriza; or Wungel Wurzel does not appear to have been yet introduced on this side of India.-It misht prove useful for feeding cattle.

59s. SPINACIA. l. Dioecia Pentandria.
From Spina-a prickle; in allusiou to the prickles on the seeds. Gaert. 8. $1<26$.
1256. S. Oleracea. Sprengel's syst. 3. p. 903. Paluch.-Common Spinach;-cultivated in gardens.
509. Salicornia. l. Monandria Monogynia.

Sal,-Cornu.-Salt-horn;-marsh samphire. Gaert. t. 127. Tourn. t. 485. Lam. t. 4.
1257. S. Indica. Rox, Flora. 1. p. 85. Indian Jointed-saltivort.

A perennial, ditfuse plant, common on salt marshes. - It is pickled by the natives who call it Miuchoor; Grows abundantly about Bassein, and like Salsola, furuishes alkali, used in the manutacture of soap and glass.
600. BOSEA. Rox. Pentandria Monogynia.

Named in honor of Bose, a Leipsic Botanist. Gaert. t. 97. Lam. t. 182.
1259. B. Trinervia. Rox. Flora. 2. p, 87.

Cajoo.-A middle sized tree, with oval, 3 nerved leaves, much resembling those of Strychnos nux vomica. Flowers in axillary racemes; s.uall, greenish white; appear in March; fruit size of a cherry, one seeded.
Grows pretty commou on Kandalla Ghaut. The tree here referred to requires examination. It wants the babit of the Goose foot tribe.

## ORDER 114. BEGONIACEIE. Sweet's Hort. Brit. p. 341.

601. BEGONIA. L. Monoecia Polyaudria.

Named in honor of M. Bagon, a Frenchman and Patron of Botany. Lam, t. 778. Gaert. 1. t. 31.

12isy. B. Malabarica, Rox. Flora. 3. p. 64s. Tsjiria narenampuli. Rheed. Mal. $9 \cdot t$. 86. Dryander in Linn. Trans. 1. $p$ 171.

Herbaceous, succulent plant; leaves alternate, semicordate, unequally serrated, covered with a few stiff hairs. Pedmacles axillary, many flowered; dowers of a pale pink colour; fragrant. S. Concan. N.
1200. B. Cuenata? Sprengel's syst. 2. p. 62.5.

Mootea.-A small herbaceous plant, with sub-rotund, semicordate, crenate leaves, and white fiowers., On Kandalla that towards the close of the rains, springing from the clefts of rocks.-It is also parasitic on trees, Salsette. N.

The Empetrum acelosum. Rumpl. Amb. 5. 1.169. $f, 2$. bears al considerable resemblatace; tho' without a tuberous root, of ten cited for $B$. tuberosa.

ORDER 115. POLYGONEA. Sweet's Hort. Brit. p, 34.
The Buek-Wheat Tribe. Lind. Nat. syst. p. 169.
6n2. POLYGONUN. L. Octandria Trigynia.
From polys, many-gonu-a knee; in allusion to the jointed stems. Lam. t. 310 . Gaett. 2. t. 119.

## ORDER 116. LAURINAE. Sweet's Hort. Brit. p. 344.

## The Laurel Thbe. Lind. Nut. syst. p. 29.

605, CINNAMOMUH. R. Br. Enneandria Monorynia.
Said to he derived from the Arabic; or perhaps a contraction of China, Amos niam. Gaert. 2, i, 92. Tourn, t. 367. Lam. t. 321,
1265. C. Aromaticui. Nees in Wall. Pl. Asiat. Rar. 2. p. 74. Wight's Icon. t. 136. Laurus cinnamomum. Bot Rep. t. 595. Persea cassia. Spreugel's syst. 2. p. 2;7, Laurus cinn monnm. Bot. Mag, t. 2023. Wight's Iconez t. 1-29. Rox. Flora. 2. p. 29.5.

The China Cinnamon tree. In gardens Bombay;-rare.
C. Zeylanicum, Wight's Icones. $t$. 12:3. is cultivated to a great extent in Ceylon, for the sake of its aromatic bark so well known in commerce. Several species produce it, of different qualities.

Frequent mention is made of Cinamon in the Sacred Scriptures, and it would appear to have been used as a spice from the earliest ages.
"Take thou also mato thee principal spices, of pure myrrh five handred shekels. and of sweet Cinnomon half so much." (Numbers 30-23,)
"I have perfumed my bed with myrrh, aloes, and Cinummon" (Proverbs 7-17.) "Calamus and Cinnamon." (Song of Solomon 4-14.)
". To what purpose cometh there to me incense from Sheba and the sweet cane (septurgint Cinumonum) fron a far country" (Jer.6. 20.)

This is a very doubrful quotation, and ailudes inost probably to some of the Scitamineous tribe.
"And Cinnamon and odours and ointment." (Rev. 13-18.)
1237. C. Iners. Nees in Wall. Pl. Asiat. Rar. 2. p. 73. Wight's Icones, $t .122$ and $t .130$.

Carus. Rheed. Mal. 1. t. 75. Hamilt. in Linm. Trans. 13. p. 555.
Ohez. Bojenar. Will Cinamon.-A pretty large, and elegant tree, with broad lanceolate, three-nerved leaves, which have a strong spicy smell on being bruized. It grows along the great range of thats, and in the hilly parts of the Conctus and Malabne, an! in al! probability is the tree which famished the Cassic of the ancients. The name is sad to come from a Hebrew word, simifying a scrapiag: in allusion to the bark being stript from the tree, and used as a spice. - Tal matives do so at this day, and pat it in their curries \& B Billets from the tree, arefoften sold together with other kinds of firewond, by the iroodeutters, both here and in Malabar. N.

A fuw trees grow in tae ravines about Kandalla, but it is not common on that part of the Ghauts.

Milton makes several allusions to Cassia.

## $\qquad$ " and now is come

Into the blissful field, through groves of myrrh And floweringodours, cussia, nard and balm."

Paradise Lost, Look 5.
"There eternal summer dwells, And west winds with musky wing, About the cedar'd allies fling Nard and cassia's bahy smells."
"Sleen in thy peace that bed of spice, And make this place all paradise; Let balm and cussin send their seent From out thy maden monument."

Some excellent remarks on the Laurus cassia of Linnaeus, and the plants producing the cassia bark of conmeree, by Dr. Wight, will be found in No. 2:2 of the Madras Journal of Science.
60s. PERSEA. Gaert. Eaneandria Monogynia.
A name applied by Theophrastus to an Egyptian tree,
1263 . P. Gumissima. Siprengel's syst. 2. $p$, 2hs. Laurus Persea. Willd. Spec. 2, p. 480. Pluk. Alm. t. 267. f. 1 Sloane's Jamaica 2. t. 2.2.2. f. 2.

The Alligator Pear. Arocado, and Sabaltern's butter tree, of the West Indies; intil. by N .
The fruit is of the size and shape of a large pear, and is deservedly held in great esteem in the West Indies, where according to Grainger, it is called also Sabacca.
"Nor let thy bright inpatient flames destroy
The golden shaddock; the forbidden fruit
The white acajou and rich sabacca."
607. LAURUS. Rox. Emeandria Monogynia.

Fron the Celtic forgreen; in allision to the perpetual green of the laurel.
1269. L. Glaucescens? Rox. Flora. 2. p. 307. Kare Kandel. Rheed. Mal. 5. $t$ : 13.? Cecidodaphne glancescens. Nees in Wall. Asiat. Pl. Rar. 2. p. 70.

Goolmab.-A middle sized tree, with alternare, ovate, lanceolate leaves, glancous beneath; flowers small, white, in terminal panicles; appear in January and Febrary. - Fruit roand, size of a plum; hack when ripe, and abonding in an oily substance, which may possibly be turned to some account. Grows in Lanowlee grove, Kandalla.-Ravines about Parr, and generally on the Ghants. It requires examination, and is probably quite distinct from Roxburgh's tree.

## 1270. L. Rumpili? g.

Lauraster Amboinensis. Rumph. Amb. 2 t. 15.
A large tree, with allernate, broad lanceolate, dark green leaves; fruit oval, size of a plum, dark coloured when ripe, and abounding like the last, in an oily substance. It ripens in May.

This elegant tree grows in the ravines at Kandalla; also about HurryChunderglur. (Dr, Gibson.)
It requires examiation. Can it he identical with Roxburgh's L. lanceolaria?
693. TETRANTHERA. Rox. Dioecia Enneandria.

Tetras-four-anthera-an anther. Gaert. 3. $t$. 232, f.2.
1271. T., Apetala! Rox. Flora. Ind. 3. p. 819. Rov. Cor. 2. t. 147 ? T. Roxburghii. Nees in Wall. Pl. Asiat. Rar. 2. p. 65. Tonex sebifera. Willd. Spec. 2p. 840 Gaja pippala. Asiat. R'es. 4. p. 303. Laurus involucrata. Retz. Obs. 6. p. 27.

Chichna-Warus.-A small tree; leaves somewhat obovate; collected at the ends of the branches. Fruitsize of a pea; black when ripe, towards the close of the rains.

Parell hill Boabay, wild; Parell garlen. It is rather a rare tree. What is Roxbargh's T. laurifolia? Probaby this plant should be referred to it.
1272. T. Lanceafolia? Roy. Flora. 3. p. 822.

Peesah. Goolchae.-A small tree, with bruad lanceolate, light green leaves, paler beneath; crowded at the ends of the branches. Fiowers in Deceinber and January, from the naked branches below the leaves; in fasci.les; very small; of a pale yellow colour.-Fruit much resembling a small acorn; half hid in the calyx; ripens in June, of a red colour.-Next to the Jambool; it is the commonest tree at Mahbleshwur. (Dr. Murr.y.) at Hurrychunderghur. (Dr. Gibson.) and probably along the higher parts of the ghauts. There is a solitary plant of it on the hill above Kandalla tank.

The Chinese Convicts at Mahableshwur say, it grows in their country.
What is T. ramiflora, of Moon's Catalogue of Ceylon plants?
1273. T. Monopetala? Ros. Flora. 3. p. 821. Ros Cor. 2. t. 148. Tomex Japonica. Willd. Spec. 2. p. 8:39. Kutmonea. Asiat. Res, 6. 1.377. Nees in Wall. Asiat. Pl. Kar. 2. p. 66.

A shrub, called Peesah, at Kandalla;-Kalla Jhar. at Parr.— Flowers in November, from the branches like the last species; but by nomeans so numerous. In this they are on lons peduncles, in the other sessile -- Yo:nng branchestomentose; slightly angled; leaves altemate, petioled, tonentose beneath; collected about the ends of the branches, somewhat whorled; smell of cinnamoa when bruized. Grows on Kandalla Ghint and the hills about Parr; but it has not yet been discovered on the table land of Maha-bleshwur.-All the above species require examination, as well as of the Cinnamomum, and Laurus.
609. CASSYTHA. L. Enneandria Monogynia.

The Greek name of the Cuscuta which this plant much resembles. Lam. t. 323. Gaert. 1. t. 2 '.

The Iir $p$ ant. - A thread like, leafless parasite; spreading over hedges, and on trees throughont the Concans.

This strange plant difers in no respects from the Laurinae except in its peculiar habit-
ORDER 113. MYRISTICEE. Sweet's Hort. Brit. p. 345.
The Nutmeg Taibe. Lind. nat. syst.p. 23.
610. MYRISTICA L. Dioecia Monadelphia.

From Myrra-Myrrh; in allusion to the grateful odour of the frait. Gaert. t. 41. Lam. t. $8: 32$ and $8: 33$.
1275. M. Moschata Rox. Flora. Ind. 3. p. 813. Nux myristica. Rump!. Amh. 2. t. 4. Wuodville's Med. Bot. t. 134. Rox. Cor. 3. 6. 27t. Bot. Mag. t. 2756 and $t$. 2757. Hooker's Ex. Flora. t. I55. and 156.

Jay-phul.-Common Nutmeg. - A native of the Moluccas, and other Eastern Islands, where it is much cultivated for the sake of its weli known, spicy fruit.
1276. M. Amygdalina. Wall. Pl, As. Rar. 1. t. 90.

A tree, leaves alternate, petioled, oblong, glaucous beneath, with prominent veins running from the mid-rib to the margin; flowers in October and November; frait sise of a small peach, covered with a rusty coloured, mealy substance, as are also the young shoots and petioles.

Grows in the deep ravines at Kandalla, but by no means common. It is a very handsome tree, with something of the habit of Michelia champaca.
1277. M. Tomentosa. Sprengel syst. 3. p. 65. Panam palea. Rheed. Mal. 4. $t .5$.

A tree. S. Concan. N.
Can this be the $M$, dactyloides of Col. Sykes? IIe says, it is frequently imposed apon the ignorant for the real mataeg. (see Mudras Joaraal, of Science No. 22, p. 161.) The tree is uot sleuder like the date palm, nor does the fruit resemble a date. $N$.

ORDER 118. PROTEACEAE. Sweet's Hort. Brit. p. 345.
611, BANKSIA. R. Br. Tetrandria Monogynia.
Named in honor of Sir Joseph Banks. Gaert. t. 48, Lam, t. 54.
1278. B. Integrtfolia. Sprengel's syst. 1. p. 485. Bot. Mag. t. 2770.

A tree with ligulate, stiff, undulate leaves, covered on the under side with a white tomentum.

Hort. Soc. garden Intd, from the Cape of Good Hope, by Mr. A. N. Shaw, C. S. in $1^{8,} 37$.
612. HAKEA. R. Br. Tetrandria Monogynia.

In honor of Baron Make, a German Botanist.
1279. H. -?

An undetermined species raised in Hort. Soc, garden, from seed brought from N. S. Wales by Mr. P. Scott, C. S.

Dr. Lindley remarks, that this curious tribe of plants is almost entirely confined to the Southern hesmisphre.

## ORDER 119. THYMELERE. Sweet's Hort. Brit. p. 350.

## The Mezereon Tribe. Lind. Nat. syst. p. 75.

613. GNIDIA. L. Octandria Monogynia.

An ancient name of the Daphase to which this genus is closely allied. Lam. t. 291.
1280. G. Eriocephala. Wallich.

Rameta.- Woolly headed Gnidia.-An erect growing shrub, with willowlike leaves, and pretty yellow flowers, in large terminal umbels; they come ont in October, and continue till February; during which period it is a hig hly ornamental shrub.---The natives attribute poisonons qualities to it.

Very common at Mahableshwur. (Dr. Murray.) Hilly paris of S. M. Country. (Mr. Law.) About Karlee Caves, and on the Kandalla Chaut.
614. CANSJERA, Juss, Tetrandria Monogynia.

The Malabar name altered.
1231. C. Scandens. Rox. Flora. Ind. 1, p. 441• Rox. Cor. 2. t. 103. Scheru valli caniram. Rheed. Mal. J. t. 4. Scheru cauiram. kheed. Mal. 7. t. 2. Daplue polystachyon. Willd. Spee, 2. p. 420.

A large scandent shrub, with alternate, two faced leaves, and small sessile, yellow flowers in axillary spikes: they appear in February and March. Berry red, smooth, size of a large pea.

Malabar hill, Bombay; Elephanta, Salsette; the Ghants \&cc. pretty cominon.
Perhaps it should be removed from the Thymeleae.
615. TROPHIS L. Dioecia Tetrandria.

From trepho-to nourish; the leaves and tivigs of T. Americana are used as fodder for cattle sometimes; the fruit is also eaten. Lam. $i$. $\delta 00$.
1232. T. Aspera. Rox. Flora. Ind. 3. p. 761. Tinda Parua. Rheed. Mal. 1. p. 48. Asiat. Res, 4. p. 305. Streblus aspera. Lour. Cochin China.

A small tree, with alternate, scabrous leaves; flowers in February and March; small, greenish yellow. Berry size of a pea; when ripe yellow.

Roxburgh sars, the natives use the rough leaves for polishing ivory. Grows on Malabar hill, Bombay, and generally throughout the Concans.

Surely it must be removed to some other tribe.-Allied to the Enphorbiacea? N.

The Cape of Good Hope and New Holland are the Head Quarters of the Thymeleae. Dr. Lindley remarks, that the great feature of the order is the causticity of the bark, which acts upou the skiu as a blister, and causes excessive pain if chewed.

short period during the rains, wheu it puts forth a few leaves, rather takes from, than adds to the beauty of a landscape. It affords good shelter to tigers and other wild animals.

About Karachee, in Scinde, it grows to a small tree. (Lt. Preedy.)
Ligularia, Rumph. Anb. 4. ל. 40. with somewhat twisted, 5 angled stems, seems closely allied to it:-are they not identical? It is the Ligulariu, which is common in Bombay.
1292. E. Antiquorum. Rox. Flora. Iıd. 2. p. 468 Schadida calli. Rheed. Mal. 2. t. 42. Hamilt. in Linn. Trans. 14, p. 280. Ainslie Mat. Ind. 1. p. 12), and 2. p. 425. Com. Hort. 1. t. 12.

A leafless, fantastic-looking shrub; with spreading, triangular branches, armed with double spines; flowers in October and November.

In gardens Bombuy, grows wild in the Jungles about the falls of Gockauk, S. M. Country.
1293. E. Tirvcalli. Rox. Flora. Ind. 2. p. 470. Tirucalli. Rheed. Mal. 2. 九. 44. Ossifraga lactea. Rumph. Amb. 7. t. 29. Pluk. Pliyt. t. 319. f. 6. Hamilt. in Lim. Trans. 14.p. 286. Ainslie Mat. Ind. 2.p. 133.

The comm on Milk Bush;-attains the leight of about 20 feet. It is much used as a hedge plant in Guzerat, and though unarmed, makes a tolerably goud fence; -also common about villages in the Deccan and Concan.-The green, leafless brauches, look something like gigantic rushes.
1294. E. Tithymaloides. Willd. 2.p. 890. Jacq. Amer. t. 92. Pluk. Alm. t. 230.f. 2. Dill. Elth. t. 288.f. 372. Ainslie Mat. Ind. 2. p. 99.

Thor;-the Slipper plant.-A small, unarmed shrub, about 3 feet high: leaves deciduous in the cold weather; flowers small, papilionaceous, of a bright scarlet colour.

Commonin almost every garden, as edging to walks.
E. Carinata, Bot. Mag. t. 2514. much resembles it; and probably is the plant here referred to.
1295. E. Acaulis. Rox Flora. Ind. 2. p. 472.

A small, stemless plant, with tuberous roats, from which the peduncles spring in March and May, before any leaves appear. - The flowers are rather pretty; hills in the Concan; Mahableshwur;-not common.
1296. E. Hıta. Rox. Flora. Ind. 2. p. 479. Esula esculenta. Rumph. Amb. 6. $t$. 23. $f$. 2. Burm, Zey, $t$, 104. Ainslie Mat. Ind 2. p. 99.

A very common weed, springiag up on garden walks \&ic. The milky juice yields a large crop of silhy radiated crytals, when heated with diluted sulphuric acid, N.
1297. E, Prostrata. Willd. 2. p. 895.

A very small creeping plant; common on rice fields during the cold season; native also of the W'est Indies.
1298. E. Segetalis. Willd. 2. p. 913. Moris. Hist. 3. s. 10. t. 2. f. 3. Nir cottam pala. Rheed. Mal. 10•t. 51 ?

Naitee.-Herbaceons, erect growing plant, from 12 to 18 inches high; Flowers in terminal umbels.-The plant liere referird to resembles the English Sun spurge, (E. helioscopia.) and if it is the E. segetalis of Willdenow, must have a wide range, as he gives for, habitats, Mauritania, Russia, England, France and Germany.
1299. E. Varians. Sprengel's syst. 3. p. 787.

An armed shrub; cominon about Jejoory, in the Deccan. (Dr. Lush.)
1300. E. Parviflora. Rox. Flora. Ind. 2. p. 472. Burm. Zey, t. 105. f. 2.

An annual, smooth plant, grows on cultivated lands \&c.

## 621. CICCA. L. Monoecia Tetrandria.

Meaning of the word unknown. Lam. Ill. $t$. 757,
1301. C, Disticha. Willd. 4. p. 632. Phyllanthus longifo!ins. Rox. Flora. Ind. 3. $p$. 673. Neli-puli. Rheed. Mal. 3. $t$. 47 and 48. Cheramela. Rumph. Amb. 7.t. 33, f. 2. Jacq. Hort. 2. t. 194. Hanilt. in Linn. Trans. 15. p. 123.

Harparewree; Country Gooseberry.-A small tree, pretly cummon in gardens, Bombay. Leaves pinnate, from one to two feet long; scattered about the ends of the branches; flowers racemed, small, of a reddish colour, growing from the branches; appear in May; fruit round, size of a Gooseherry; it has an acid flavour, and is sometimes sold in the Bazar, though no great use appears to be made of it.
622. PHYLLANTHUS. L. Monoecia Monadelphia.

From Phyllon---a leaf-anthos-a flower. In some of the species the flowers grow on the leaves. Gaert. Fruct. t. 108. Lam. Ill, t. 756.

## Leaves Simple.

1302. P. Madraspatensis. Rox. Flora. Ind. 3. p. 654.

Annual; with narrow, cuneate leaves, and axillary flowers; common in Gardens and cultivated grounds.

## 1303. P. Retusus? Rox. Flora. Ind. 3. p 657.

A poor looking shrub, with obovate, cuneate leaves; flowers in the rains. Berries round, white, size of a small pea. The description Roxburgh gives of P. leucopyrus agrees with the plant here referred to, except that it is not armed. Perhaps it ntay be his $\mathbf{P}$. virosus.

Malabar and Worlee hills, \&e common.

## Leaves Pinnate.

1304. P. Niruri. Rox. Flora. Ind. 3. p. 659. Kirganelli. Rheed. Mal. 10. t. 15. Rumph. Amb. 6. t. 17. f. 1. Burm. Zey. t. 93. f. 2. Ainslie Mat. Ind. 2. $p$. 150.

A common weed, in gardens and cultivated lands. Roxburgh mentions that the fresh roots have been found a good remedy in cases of jaundice.
1305. P. Urinaria: Rox. Flora. Ind. 3. p. 660 . Tsjeru Kirganelii. Rheed. Mal. 10.t. 16 . Rumph. Amb, 6.t.17.f. 2. Pluk, Alm. t. 183. f. 5. Ainslie. Mat. 1nd. 2. p. 151, and 437.
Much like the last species, but distinguishable by its sessile flowers, and rough capsules.-Common in Bombay during the rains.
1306. P. Multiflorus. Rox. Flora. Ind. 3. p. 664. Niruri, Rheed, Mal. 10. $t$. 27. Ainslie. Mat. Ind. 2. p. 323.

A straggling shrub, of no beauty.-Water courses, and other shady, moist places in the Concans.
1307. P. Vitis idaea, Rox. Flora. Ind. 3. p. 665. Katou nirouri. Rheed. Mal. 5. t. 44.

A shrub, with alternate, bifarious, pinnate leaves; flowers axillary. Berries succulent; when ripe, red;-the Concans. N.
1308, P. Turbinatus. Rox. Flora. 3. p. 666. Parin niruri. Rheed. Mal. 5, t. 43. Bot. Mag. t. 1862.
A shrub; leaves alternate, bifarious, flower bearing;-berry size of a pea, surrounded by the enlarged, coloured calyx.
Malabar and Worlee hills; Salsette \&c. Roxburgh says, it grows to be a large tree; here it is a mere shrub;-flowering period, the rains.-It is a very curious looking plant when covered with fruit growing on the leaves.

Perlaps this is different from Roxburgh's plant.
1309. P. Emblica. Rox. Flora. Ind. 3. p. 671. Emblica officinalis. Gaert. Fruct. 2. t. 108. Nelicamaram, Rheed, Mal, 1, t. 38. Amlika, Asiat.

Res, 4. p 308. Ainslie, Mat. Ind. 1. p. 240 and 2. p. 244. Rumph. Amb. 7. $\ell$. 1. Black well. t. 400 . Bot. Cah. t. 548.

Aunlee or Awla tree; - in gardens Bombay; but grows wild thronghont both the Concans and Deccan;-particularly in the hilly parts of the Souther Mahratta Country. The fruit is eaten by the natives. It approaches in form and flavor that of the Garuga. N.-Roxburgh says, the bark is strongly astringent.
1310. P. Lawil. g.

A shrub; leaves pinnate, leaflets very small; fringes the banks of the Gutpurba about Duddi;-also grows common on the binks of the Krishaa, near Nalutwar, along with Trichaurus ericoides, and a new species of Adelia. A. retusa, (Mr. Law.)

## 623, ALEURITES. l, Monoecia Monadelphia.

From Aleiar-wheat flour; in allusiou to the young shoots and panicles being covered with a mealy substance. Gaert. Fruct. 2. t. 125. Lam. t. 791,

13il. A. Triloba. Rox. Flora. Ind. 3. p. 629, Camirium. Rumph. Amb, 2. t. 58. C. cordifulium. Gaert. Fruct. 2. t. 25.

Japhal.-Belgaum Walnut.-A large tree; leaves petioled, cordate; margins entire or scolloped;--frequently 3 or 5 lobed; from 5 to 8 inches long and nearly as broad;-flowers small; white; in terminal panicles, clothed with a mealy substance; appear in May.-Fruit roundish, somewhat compressed; pointed, very hard, 2 celled, eaclr cell containing a hard nut, like a Walnut.

In gardens Bombay;-grows wild in the S. M. Country about Belgaum.It is a handsome tree. The seeds afford an oil suitable for burning. It is a native also of the Society Islands.
624. SAPIUM. Rox. Monoecia Monadelphia.

Said to be derived from Sap, the Celtic for fat; in allusion to the unctuous juice with which the plants abound. Lam. t. 792.
1312. S. Indicun. Rox. Flora. Ind. 3. p. 692. Bengieri. Rheed. Mal. 4. t. 51. Hamilt. in Linn. Trans. 17. p. 229.

A small tree, with pendulous branches, sometimes ending in thorns; leaves alternate, lancenlate, serrate; male flowers on terminal aments, with female flowers at the base. Fruit round, hard, size of a nutmeg; 3 celled, with a seed in each. Various parts in the S. Concan. N.

Roxburgh says, the juice of this tree is of a very poisonous nature, and that the seeds are used for intoxicating fish.
1313. S. Sebiferum. Rox. Flora. Ind. 3. p. 693. Stillingia sebifera. Willd. 4. p. 588. Croton sebiferum. Linn. Pluk. Amalth. t. 390 f. 3. Ainslie Mat. Ind. 2, $p .433$.

Pippal yank. Tallow tree, of China.-A tree; branches drooping, leaves rhomb-ovate, pendulous; flowers very small, yellow: in terminal racemes. Fruit size of a small cherry, ticoccons; very hard.

In a garden at the Police Office, Mazagaum. Poway, Salsette; probably introdued from China; it is rare in Bombay. At a distance, this tree much resembles the Birch.

## 1314. S. Baccatum? Rox. Flora. Ind. 3. p. 694.

Keerud.-A small tree, with thick spreading branches; leaves dceiduous in the cold weather, Flowers in January; in terminal racemes; when the tree is destitute of leaves. Fruit purple, size of a pea; growing in a close spike and resembling Dog berries (Cornus sangninea.) strung together. The wood of this tree is very soft, and abounds in a thick milky juice.

Common at Kaudalla;-about Nassick. (Dr, Gibson.)

This tree requires examiation. Probably it is different altogether from Roxburgh's S. buccatum.
The fanous Manchineel tree of the West Indies, is closely allied to this genus.
62.5. OLILANTHUS. Grah. Monoecia Monadelphia.

From Homalos-s:nooth-anthos-a flower.
1315. O. Populfolia. Professor (Graham in Jameson's new Ediur. Journof Science. 1827. p. 175. Bot. Mag, $t$, 2780.

A slırub, with atternate : leaves, on long, red, filiform stalks, rhomb-ovate, acuminate. Flowers, in terminal racemes; the female ones occupying the lower part. Fruitsize of a large pea, terminated by the bifid style.

Native of New Holland,-intd. by Mr. Nimmo. It has an affinity with Sapium sebiferum,
625. CROTON. l. Monoecia Mouadelphia.

Greek for a tick,--an insect; troublesome to dogs; the seeds of some of the species resemble it. Gaert. Fruct. 2. t. 117. Tourn, Jus. 6. 123. Lam, t. 790.
1316. C. Vabiegatum, Rox. Flora. Ind. 3. p. 678. Tsjera-maram. RheedMal. 6. t. 61, Rumph. Amb. 4. t. 25 and 26. f. 2. Codiaeum pictum. Bot. Mlag. $t 3051$. Bot. Cab. t. 870.

The Varieguterl Luurel. - A very common ormamental shrub in gardens and flower pots. It is easily raised fron cuttings. Rumph. Amb. t. 20. $f .2$. represents the willow-leaved variety. Perhaps the C. lineare of Jacquin, should be united with it.
1317. C. Plicatum. Rox. Flora. Ind. 3. p. 681. C. tinctortum. Burm. Ind. t. 62. f. 1. Aiuslie Mat. Ind. 2. p 308.

Anual, straggling, hoary plant, with round, cordate, waved leaves, and rough fruit. Common on rice fields in the cold weather.
1318. C. Tiglium. Rox. Flora. Ind. 3. $p, 682$ Cadal avanacu. Rheed. Mal. 2. t. 33. Rumph. Amb, 4. t. 42. Burn. Zey, t. 90. Ainslie Mat, Ind. 1. p. 101,

A small tree; leaves alternate, ovate, cardate; from 3 to 5 inches long, and 2 or 3 broad. S. Concan. N. not common. It grows in abundance in Travancore. - The famous croton oil of the Materia Medica is obtained from the seeds.
C. eleuteria, native of Jamaica, furnishes the cascarilla bark of commerce.
1319. C. Rheeder. g. Welia cupamenia. Rheed. Mal. 10. t. 83.

An erect, suffruticose plant, 2 or 3 feet high. Flowers in April, in terminal spikes. the Tull Ghaut. Salsette and Jowaur N. It seems to be different from Acalypha indica, to which Rosburgh refers it.

## 1320. C. Gibsonir. g.

An erect, suffruticose species, with petioled, cordate, serrate leaves. It much resembles the Welia cupameni. Rheed. Mal. $10 t .83$, and should probably be referred to it.-The northern parts of the Deccan, (Dr. Gibson.)

## 1321. C. Ramiflorum. g.

A small tree; leaves alternate, petioled, ovate oblong. Some what glaucous beneath. Flowers, small white; gruw from the naked branches. Fruit size of a large pea, covered with a few adpressed hairs; half hid in the calyx which grows into 5 scarious wings.

In the shaded ravines at Kandalla ; not very common, flowers in October.
627. JATR $\cap$ PEA. L. Monoecia Monadelphia,

From iatron-a remedy-phago-to eat; some of the species possess medicinal properties, and one affords nutritious food. Tourn. Ins. t. 438. Gaert. Fruct t. 108. Lam. t. 791.

1124 Inalecal. sharted. ivr 1-s itct. If aur about 10. Few calticor cike male dicile, 3 bifid. Cuff. ticeveerus.

 cereey:d
326. Fi. numorons sh: all puî qiceen. Inales ofonquary frome

1322. J. Curcas. Rox, Flora, Ind. 3. p. 686, Ainslie, Mat. Ind. 2. p. 45, Asiat. Res. 11. p. 169. Jacq. Hort Vind. 3. t. 63.

Angular-leaved Pluysic nut.- A very coinmon shrub, in Bombay, and about Villages thronghout the Conean; it is used as a hedpe plant; primeipally perhaps from its easy growth, as it forms a bare, bad fence: It flowers in the rains; - the leaves are deciduous in the cold weather.
lor. Lindley says, the varnish used by the Chinese for covering hoxes, is made by boiling an oil obtained from the seeds of the Curas with oxide of iron.

The nuts of I. gossypifolia are roasted and eaten in the West Indies, and Grainger goes so faras io call them "luscious."

> "Nor shall the ricinus unnoticed pass;
> Yet, if the cholic's deathful pangs thou dread'st, Taste not its luscious nut."
1323. J. Manihot. Willd. 5. p. 563. Ianipha manihot. Sprengel's syst. 3. 77. Pluk Alm. t. p. 205. f. I. Sloane's Jam, Hist. 1. t. 85. and 6. 141. Ainslie. Mat. Ind. 1. p. 428. Bot. Mag. t. 3071.

The Tapioca, or Cassada plant; native of South Anerica, and well known for the nutritious flour obtained from the roots. It is a shrub with palmate leaves, and something of the appearance of Castor oil plant; of the easiest culture, and suited to the climate of India; growing equally well in any soil or situation.-lt is said to have beeu first introduced by the Portuguese at Gea, and is now pretty common in Bombay gardens; but simply as an ormamental shrub; the natives do not seem to be aware of the uses to which it can be applied, and if they were, could only be driven to them. by a scarcity of their common and inferior articles of food, afforded by the Cucumber and Arum tribe. It is the Mandioca of the Brazils.

There is a tradition in the Carribee lsles that a Numen appeared, broke his staff into three pieces, planted them in the ground, and produced Cassada. Grainger alludes to the fable.
"From a good Demon's staff Cassada sprang.Tradition says, and Carribees believe."

The Sugar Cane, Book 4.
$1: 324$ J. Multifida. Willd. 4. p. 561. Dill. Elth. $t$. 173. $f$. 213, Moris. Hist. 3. s. 10 t. 3 Salisb. Parad. Lond. 1. 91. Ainslie, Mat. Ind. 2. p. 47.

A slarub, native of America, but common in Bombay Gardens, where it is known by the name of Coral piant; to which substance the flowers have a considerable resemblance.
1325. I. Glauca? Sprengel's? syst. 3. p. 76. Croton lohatum. Forskols Arab. p. 162.

A sliruh, with fusiform stems, and lobate leaves, bristle-edged. Flowers in corymbiform panicles.

Grows near Punderpore in the Deccan, where a fabulous legend is connected with its first springing up, which conventional language forbids to be repeated. (Captain St. John.)

Perhaps Roxburgh's I. glandulifera is identical. This strange looking plant has not yet been found in any other locality under this Presidency.
628. RICINUS. L. Monoecia Monadelphia.

A tick; the seeds bear a resemblance. Tourn. Ins. $t$. 307. Gaert. Fruct 2. t. 107. Lam. Ill. t. 792.
1326. R. Communis. Rox. Flora. Ind. 3. p. 659. Blackwell t. 148. Avanacu. Rheed. Mal. 2. t. 32. Bot. Mag. t. 220:9. R. ruber, Rumph. Amb. 4. $t$. 41. seems a variety. Ainslie. Mat. Ind. 2. p. 472.

The Erindi, or Castor oil Plant.-Common about villages all over the Country.

## 184

In the Kairah Zillah the seed is sown in June and July, together with Bujree, Bowtah and Kodra; and again in September and Uctober both by itself and with Kasoomba and Toor. The first sowing is on brown soil:-and the second either on black soil or the land on the margins of rivers called Batta.

The first produces several successive crops of seeds, commencing in December, and continuing till June; the second, only one crop in April.

The seeds are used by Dyers to mix with colouts and render them permanent. -The oil obtained from them is a well known cathartic.---It is atso generally used in lamps, by the natives. (Mr. Kirkland, C, S.)

## 629. HURA. L. Monoecia Monadelphia.

The South American name. Lam. Ill. t. 793.

## 1327. H. Ürepitans. Sprengel's syst. 3. p. 884. Lam. Ill. t. 793.

The Sand box tree;-in gardens, Bombay, not common. A small, armed tree, of rapid growth; wood very soft and brittle; the fruit resembles a small orange without the peel, and when ripe, it's numerous valves burst with au elastic jerk. The sap of the leaves and bark, is said to be corrosive.
630. BRIEDELIA. l.Polygamia Monoecia.

In honor of Professor Bridel. Clutia? Lam. t. 833.

## 1328. B. Sinica. Rox. Flora, 3. p. 700. Pluk. Alm. t. 368.f. 1.

Bhoma.-A small tree: leaves bifarious, oblong, entire shining;-flowers axillary, small, white; capsule size of a pea. Common at Kandalla and along the Ghauts.-On the ridge leading to Sidney Point, Mahableshwur.

Probably the tree here referred to, is identical with Roxburgh's B. nitida.
1329. B. Scandens. Rox. Flora. 3. p. 736. Cluytia scandens. Rox. Cor. 2. t. 173. Scherunam cottam. Rheed. Mal. 2. t. 16.

A scandent shrub, with oblong leaves, a little downy beneath; flowers small, of a greenish yellow; appear in November and December; in terminal, leafy panicles.-Berry size of a pea, juicy; when ripe, hlack.-Hills near Nagotnah, and about Parr.--Common on the banks of the Gutpurba, near Duddi. (Mr. Law.)
1330. B. Spinosa. Rox. Flora. Ind. 3.p. 735. Cluytia Spinosa. Rox. Cor. 2. t. 172.

Asanna.-A pretty large tree; trunk, and larger branches armed with strong thorns; leaves alternate, bifarious; flowers small, of a greenish yellow; in axillary or terminal spikes; appear in September and October; fruit size of a pea, succulent. Common on Elephanta and the Ghauts. Salsette. N.

Roxburgh says, the bark is strongly astringent.
1331. B. Montana. Rox. Flora. Ind. 3. p. 735. Cluytia montana. Rox. Cor, 2. t. 171.
Asanna.-A tree, exactly like the last, but withont thorns--The wood is red coloured, andvery hard;-on the Ghauts.-Banks of the Gutpurha. (Mr. Law.) Probahly it is a mere variety of the last.
631. ROTTLERA. Rox. Dioecia Icosandria.

Named by Roxburgh after Dr. Rottler, a Danish Missionary, who spent a great portion of his life in the South of India.
1332. R. Tinctoria. Rox. Flora, 3. p, 827. Rox. Cor. 2. t. 168. Ponnagam. Rheed. Mal. 5. t. 21. Croton coccineum. Willd. 4. p. 544.

Shendree.-Cornuga Mungi Maram.-Monkeys face tree.-in allusion to their painting their faces red, by rubbing them with the fruit. (Buchanan's Mysore.) A large tree, with alternate, ovate, oblong leaves of a ferruginous colour beneath. Flowers in the cold weather, in axillary and terminal panicles; fruit size of a pea; tricoccous; covered with a red, mealy powder, which
is used by the natives to dye red. Parell hill, Bombay; hills thronghout the Concans;-Siduey Point Mahableshwur;-very common in the jungles between Muıdighur, and Sanklee, S. M. Country. (Dr, Lish.)

Tabs. 22, $2: 3$ and $2 t$. of Rheede's Hort. Mal. belong to this genus; the latter in a diseased state, like Celosiz cristata.
632. TREWIA. L. Dioecia Polyandria.
1333. T. Nudiflora. Rox. Flora. 3. p. 837. Canschi, Rheed. Mal. 1. t. 42. Tetragastris ossea. Gaert. 2. $t$. 109, $f \cdot 5$.

Petaree-A tree, with opposite, long : petioled, cordate leaves; the male flowers in pendulous racemes, not unlike the male aments of the common hazel; appear in February and March, when the tree is destitute of leaves.

Parell hill Bombay; common in the jungle between Nagotuah and the Pass leading to Indapore. This tree requires examination.
633. GELONIUM, Gaert. Dioecia fcosandria.

Gaert. 2 t. 139.
13:34. G. Bifarium? Rox. Flota. Ind. 3. p. 830.
A shrub? or tree; with alternate, oblong; coarsely serrated leaves, and dicoccous fruit; size of a gooseberry, on long pedicels. In the ravine below Col. Dickenson's Bungalow, Kandalla.

Only a solitary specimen of the plant here referred has been seen, and it is very doubtful whether it belongs to this genus or not;-allied to the Ricinus dicoccus of Roxburgh? N.

There is another small tree pretty common in the ravines at Kandalla, and which the natives eall Jungly-Rete. It has very small, yellowish white flowers, which appear in October and November, and tricoccous fruit, covered with soft bristles. It probably belongs to the Eruphorbiaceae.
634. EXCACARIA. L. Dioecia Monadelphia•

From excreare -to bint; in allusion to the acrid juice of the plants Gaert, 2. t. 108 . Lam. $\boldsymbol{t} .805$.

13:35, E Agallocha. Rox. Flora, 3. p. 756. Arbor excœcans. Rumph. Amb. 2. $t, 79$ and 80. Amvetti Rheed. Mal. 5. t. 54 ?

A smatl tree; leaves alternate, long petioled, slightly serrated; flowers in axillary aments:-grows in salt marshes along with the Avicentia and Rhizophora.

Rovburgh says, that the wood cutters of the Sunderbunds report, that the pale white milky juice of this tree, is highly acrid and very dangerous; producing inflammation. - The wood is white and soft, and conld not have been the Agallochum of the Greeks, as it pussesses no aromatic properies what-ever.- Their Avallochum was probably the sandal wood.
1305. E. Cammertia. Sprengel's syst. 3. p. 2j. Cametti. Rlieed. Mal. 5. $t .45$.

A small tree; leaves ovate, oblong, acute, entire; flowers in terminal aments.-Salt marshes. S. Concan. N. '

6:35. ADELIA, L. Dinecia Monadelphia.
From a-privative-delus-visible; in allusion to the very minute flowers. Lam.t. 831.
1337. A. Nereifolia. Rox. Flora. Ind. 3. p. 849.

Shernee.-A shrub; 2 or 3 feet high, with alternate leaves like those of he common oleater, hat smaller:--llowers in axiliary spikes: - grows coanmon in the beds of Concan and Deccan rivers, along with the Tamarisk.

13:38. A. Retusa.g.
A stunted shrub; 2 or 3 feet high, leaves alternate, sessile, obovate, retuse, slightly crenate; flowers axillary, appear in March and April:-grows coin-

## 186

mon on the Islands in the Krishna, near Nalutwar. (Mr. Law.) Generally to be met with in the beds of Deccan rivers, (Dr. Gibson.)
It bears some resemblance to the Sloe bush. (Prunus spinosa,) and also to the Sida retusa, in its foliage.
636. ACALYPHA. L. Monoecia Monadelphia.

The Greek name for the Nettle, which this genus resembles.-From. a--privative,-kalos-beauty -aphe - touch; plants without beauty and with very stinging properties. Gaert. 2. t. 107. Lam. t. 789.

13:3. A. Indica. Flora. Rox. 3. p. 675. Cupa meni, and Wellia cupa meni. Rheed. Mal. 10..t. 81. and t. 83? quoted above for a Croton.

An annual, common weed, during the rains; flowers in axillary spikes. Cats are as much affected by the roots of this as by those of the Valerian. N.
637. TRAGIA. L. Monoecia Triandria.

Named in honor of a German Botanist. Lam. t. 754.
1340. T. Involucrata. Flora. Rox. 3. p. 576. Schorigenam. Rheed. MaI. 2. t. 39. Burm. Zey. t. 92.

Kooltee.-A shrubby, twining plant; leaves oblong, serrate; covered with stinging hairs; flowers in leaf-opposed racemes.-Grows on bushes above Kandalla tank, and probably along the Ghauts.
1341. T. Mercurtalis. Rox. Flora. Fud, p. 3. p. 576. Pee cupameni. Rheed. Mal. 10. $t, 82$.

An annual, erect plant; with ovate, cordate, serrate leaves, much like Acalyphat indica: and both of them bearing a strong resemblance to the Mercurialis perennis of England; common during the rains.
1342. T. Chamaelea, Rox, Flora. 3. p. 577. Codi avanacu. Rheed. Mal. 2. t. 34 Burm. Zey. $t .25$.

An erect growing plant, with linear leaves. S. Concan. N.

## ORDER 124. STILAGINEA. Lind. Nat. syst. p. 96.

638. ANTIDESMA. L. Dioecia Pentandria.

Anti-substitution, (Anti Herodou, Matt. 2. 22) and desmos-a bond; name given in allusion to the bark of some of the species being used as ropes. Gaert. I. t. 39. Lam. t. 812.
1343. A. Alexiteria, Willd. Spec. 4. p. 762. Nuli tali. Rheed. Mal. 4. t. 56. Stilago bunias. Rox. Flora. 3. $\mu$. 758. Bunias sativus. Rumph. Amb. 3. t. 132.

Amtee.--A large shrub; leaves alternate, oblong, tapering towards both ends: smooth, polished; flowers, in axillary and terminal spikes: appear about the beginning of the rains. Fruit size of a Barberry; red when ripe. On the K.ndalla Ghaut; rare. It is a very ornamental plant.
1344. A. Paniclilata. Rox Flora. 3. p. 770.

A small tree, with alternate, short petioled, round ovate leaves, villous underneath; Flowers in axillary and terminal spikes: forming panicles. S. Concan. N.
1345. A. Pubescens. Rox. Flora. 3. p. 773. Rox. Cor. 2.t.167. Tsjeriam cottam. Rheed. Mal. 5. t.11.?-A small tree. S. Concan, N. Quoted above for an Embelia.
1346. A. Sylvesthis. Willd. 4. p. 763. Mail Combi. Rheed. Mal. 5.t. 26.-A shrab. S. Concan. N.

Guemon sylvestris. Rumph. Amb. 1. t. 73. seems to belong to this genus. The species are very little known, and require investigation.
gel 3

## ORDER 125. URTICEA.

## The Nettle Tribe. Lind. nat. syst. p. 93.

639. URTICA. L. Monoecia Tetralidria.

From uro-to burn; in allusion to the stinging properties of mary of the species. Gaert. 2. t. 119. Lam. t. 761.
1347. U. Interrifta. Rox. Flora. 3. p. 585. Batti schoriginam. Rheed. Mal. 2. t. 40. Boehmeria interrupta. Willd. Spec. 4. p. 342.

A large, erect, annual plant, with cordate, serrate, leaves; flowers during the rains. The whole plant is sprinkled with stinging hairs like the common nettle;-grows in waste places.
1348. U. Heterophylla. Rox. Flora. 3. p. 586. Ana schorinigam. Rheed. Mal. 2. t. 41. Upalmata. Forskol's Arabia. p. 159.

Anmual, erect plant; leaves alternate, long petioled; covered with stinging hairs.-Grows in various parts of S. Concan. N.
640. PARIETARIA. L. Polygamia Monoecia.

From paries-a wall: in allusion to the place of growth of the species, on old walls and among rubbish. Gaert 2. t. 119. Lam. t. 853.
1349. P. Indica. Sprengel's syst. 3. p. 914.

A small perennial plant; grows about Dapooree. (Dr. Lush.)
641. CANNABIS. L. Dioecia Tetrandria.

Probably derived from the Arabic name, Quanab. Gaert. 1. 6. 75. Toura, 6. 308. Lam. $t .814$.
1350. C. Sativa. Rox. Flora. 3. p. 772. C. indica. Rumplı, Amb, 5. t. 77. Kalengi cansjava. Rheed. Mal. 10. t. 60. and Tsjeru cansjava. 10. t. 61. Ainslie. Mat. Ind. 2. p. 189. Black well $t$. 322. Lour. Coch. China. 2.p. 616 .

Bhang.-Ganja.-Common Hemp plant: cultivated all over India for the sake of the intoxicating liquor called Bhang, which is prepared from it: also for the leaves which are smoked to cause intoxication. Its use as a cordage plant is hardly known. It has been long cultivated in Russia for this sole purpose, and sirange to say, England derives all her supplies from that Country instead of her own Eastern possessions; - the home of the hemp plant.-Alluding to this, Bacon in an Essay notices a trivial prophecy of his time, though in his own words it " ought to serve but for winter talk by the fire side."
" The trivial prophecy which I heard when I was child; and Queen Elizabeth was in the flower of her years, was;

> "When hemp is spun, Eugland's done:"
whereby it was generally conceived, that after the Princes had reigned which had the principal letters of that word hemp, (which were Heury, Edward, Mary, Philip and Elizabeth) England should come to utter confusion; which thanks be to God, is varied only in the change of the name, for that the King's style is now no more of England, but of Britain."

Should we ever grow our own hemp, may the result be equally favorable!

## 642. BOEHMERIA. L. Monoecia Tetrandria,

Named after Rudolph, a German Botanist. Lam, t. 763.
1351. B. Ramiflora? Sprengel's syst. 3. p, 845. Willd. Spec. 4. p. 312, Procris ramiflora. Lim. Ill. t. 763. Caturus ramiflarus, Linn, Maut. Urtica pulcherrima? Rox,

Capsee.-Kurgool. A middle-sized shrub, with broad lanceolate, acn= minate leaves, serrated. white brneath; and beautifully netted and pitted. Flowers in January and February from the naked stems; fruit yellow: some what resembling a mulberry.
Grows in the ravine helow the Burial ground at Mahableshwur; also by the side of the road teadmg to Malableshwur village;-not common.
The plant here referred to, seems in no wise to differ from the W est India olle.

What is Roxburgh's Caturus spiciforus? Rumph. Amb. 4. t. 37.f. 1 and 2.
643. GNETUM. L. Monoecia Monadelphia.

Altered from Ginemon, the Ternate name of one of the species.
1352. G. Scandens. Rox. Flora. 3. p. 518. Ula Rheed. Mal. 7. t. 22. Gnemon funicularis. Rumph. Amb. 5. t. 7 and 8. Thoa edulis. Willd. Spec. 4. $p .477$.

Koombul. Omblee.- A large scandent shrub. Young shoots round, smooth, jointerl, and swelled at the insertion of the leaves. Leaves opposite, oblong, polished. Flowers in curious aments; appear in March and April: fruit oblong, size of a small plum. The pulp is intermixed with stinging hairs like those on the capsule of Sterculia urens.
(irows in Lanowlee grove near Kandalla;-the ravines at Parr, and probably :long the Ghants. It looks very ornamental, with the smooth, jointed stems, and firm glossy leaves, Both Concans. N.

Botanists have not yet determined what natural order it belongs to.
There is a scandent milky shrub in Dr. McLennan's componnd, on the Esplanade, with large alternate leaves, and curious dingy white, fragrant flowers growing from the stem, something like small heads of cauliflower. It perlaps belongs to the Urticeae, or some allied order, Urtica globulifer? S. Concan. N.

The well known and useful Hop plant, belongs to this order.

## ORDER 126. ULMACEAE.

## The Elm Thibe. Lind. nat. syst. p. 93.

644. ULMUS. L. Pentandria Digynia.

Said to he derived from the Celtic name of the Elm tree, Gaert. $t .49$. Lam. t. 185.
1353. U. Integrifolia. Rox. Flora. Ind. 2. p. 68. Rox. Cor. 1- t. 78. Sprengel's syst. 1. p.931.

Woula. Keul. J'apura.-Indian Elm.-A large tree, the timber of which is applied to the same purposes as that of its Congener, the English Elm; viz. making Carts, Door Frames, \&c. The leaves are deciduous in October. Flowers in Fehruary and March; at which period also the young leaves bewin to : ppear, Malabar hill, Bombay. Common in the forests about Nagotnah and at Kandalla.-Salsette, N.

In the Southern Mahratta Country. (Mr. Law.) In the Kandesh Jungles, about Daung. (Lieutenant Auld.)

This is one of the trees, in the forks of the branches of which, the natives lodge their straw, and unthrashed grain; to keep it out of the way of cattle, and may bring to mind Cowper's Thrasher: -
--" The grove receives us next,
Between the upright sliafts of whose tall elms,
We may discern the thrasher at his task."
Cowper's Task.
Buchanan says, it is common on the Ghauts near Arcot. (Journey in Mysore.)
645. CELTIS L. Pentandria Digynia.

A name said to have been formerly given to a species of lotus. (Zizyphus?) Gaert. t.77. Lam. $t .844$.
1354. C. Orientalis. Rox. Flora, Ind. 2. p. 65. Sprengel's syst. 1. p. 932. Mallam taddali. Rheed. Mal. 4. t.40. Hamilt. in Linn. Trans. 17, p. 207. Pluk. Alm, t. 22 $1 . f .4$.

Indian Nettle tree.-A small tree, with obliquely heart-shaped, bifarions, serrated leaves; whitish beneath. Flowers axillary; very minute; appear in February and March.--Common along the foot of the Ghauts; Kenmery forests, Saleette \&e.

The fibres of the bark are very tough, and probably good cordage might be manufactured from them.

## ORDER 127. ARTOCA PPEAE.

The Bread-Fruit Tribe. Lind. nat. syst. $p .95$.
646. FICUS, L. Polygamia Monoecia.

Derivation of the word unknown-Greek, $S_{y} / k e$, which is said to come from the Hebrew, to overspread or cover; in allusion to the grateful shade Fig trees afford, (See Ist Kings. 4. 25. Nicah. 4. 1 and John. 1, 49. 51.) Syke, is the root of the English word sycophant, a tattler,---busy-body; an informer against Fig stealers; the ancient Athenian law, forbidding the exportation ot figs from Attica. Gaert. 2. $t .91$ and 179. Tourn. $t$. 420. Lam, $t$. 861.
135.5. F. Indica. Rox. Elora. 3. p. 539. F. Bengalensis. Willd. Spec. 4. p. 1135 Peralu. Rheed. Mal. 1. t. 28. Varinga latifolia. Rumpli. Amb. 3. t. 84. Vuta, Asiat, Res, 4. $p$ 310. Pluk. Phyt. t. 178. f. 1.

Wur...-The Banyan, or Indian Fig-tree; common all over India; and in some places of an immense size. One growing on an Island in the Nerbudda above Broach, has long been celebrated.---Lieut. Col. Sykes mentions one at the village of Mhow in the Poona Collectorate, with 68 stems descending from the branches, and capable of affording shade, with a vertical sun, to 20,000 men. (Madras Journal of Seience No. 22.) Kabir Bhur, near Broach, is now the gloomy recess of superstitions, and the haunt of its hateful birds, the owls and flying foxes. N.

Canthrs be the "Bearded Fig" of the West Indies, from which Barbadoes is said to take its name?
> "But chief that land, to whieh the bearded fig, Prince of the forest, gave Barbadoes name."

Grainger.
The name is given perhaps in allusion to the beard-like fibres which the branches send forth.

There ean be little doubt it is the tree Milton had in view for clothing our first Parents, though the leaves are not broad as " Amazonian targe;" but allowance must be made for his source of information-Pliny; who says it has "folium maximum umbrosissimum," (Lib. 16. Cap. 26.) and adds in prose in another Book, what Milton has so elegantly turned into poetry.
" -There soon they chose
The fig-tree, not that kind for fruit renown'd;
But such as at this day to lndians known
In Malabar or Decean, spreads her arms
Branching so broad and long, that in the ground
The bended twigs take root, and daughters grow
About the mother tree, a pitlared shade
High over-arched, and echoing walks between;
There of the Indian herds-man shuming heat,
Shelters incool, and tends his pasturing herds
At loopholes cut thro' thickest shade."
Paradise Lost, Book 9.
" Intra sepem eam aestivant pastores." (Pliny.)
The idea of cuting loopholes, must have been borrowed from Pliny' hedge. (sepes.) It is purely poetical.

Southey's description is equally good.

> "It was a goodly sight to see That venerable tre, For o'er the lawn irregularly spread, Fifty straight columns propt its lofty head; And many a long depending shoot, Seeking to strike its root, Straight like a plummet, grew towards the ground. Some on the lower boughs, which crost their way, Fixing their bearded fibres, round and round, With many a ring and wild contortion wound, Some to the passing wind at times, with sway Of gentle motion swung. Others of younger growth, unmov'd, were hung Like stone drops from the cavern's fretted height. Beneath was smooth and fair to sight, Nor weeds nor briars deform'd the natural floor, And through the leafy cope which bower'd it o'er Came gleams of checquer'd light. So like a temple did it seem, that there A pious heart's first impulse would be prayer."
1356. F. Religiosa. Rox. Flora. Ind. 3. p. 547. Arcalu. Rheed. Mal. 1. t. 27. Rumph. Amb, 3. t. 92. Pluk. Alm. t. 178. f. 2. Pippula. Asiat. Res. 4. p. 309. Gaert. Fruct. '2. t. 179. f. 5.

The Pippul. A large tree; equally common with the last. It is always to to be met with, plainted about temples. The Chinese make beautiful paintings on the leaves. Roxburgh says, silk worms are fond of them.

This tree proves most destructive to neglected buildings; when once rooted in crevices, nothing can withstand its progress.
1357. F. Elastica. Rox. Flora. Ind. 3. p. 541.

Indian Rubber tree; In gardens about Bombny; a very handsome tree with large, firm, glossy leaves. It furnishes Caoutchoue in large quaitities.
1358. F. Comosa. Rox. Flora. Ind. 3. p. 5.52. Rox. Cor. 2. t. 125. Bot. Mag. t. 3305. The Tufted Fig.

A tree; leaves oblong, entire, smooth, shining; fruit size of a gooseberry. The Ghauts and hilly parts of the Concans.
13.59. F. Glomerata. Rox. Flora. 3. p. 558. Rox. Cor. 2. t. 123. Oodumbur. Asiat. Res. 4. p. 309• F. racemosa? Willd. Spec. 4. p. 1l46. Atti alou. Rheed. Mal. 1, t. 25?

Oombur.-A large tree, with fruit much like the common fig, and which is eaten sometimes by the natives. It grows in clusters from the large branches. Common about Vear on Salsette; and generally by the banks of water courses thronghout the Concans. On the table land of Nahableshwur; where it flourishes equally well as in the low sheltered spots of the Concan. The natives call it the " water tree;" in allusion to its generally being ffound near springs or water courses.
1360. F. Conglomerata, Rox. Flora. 3. $p .559$. Perim teregam. Rheed. Mal. 3. t. 61. Rumph. Amb, 3.t.95. A tree; the Concans.
1361. F. Nitida. Willd. Spec. 4. p. 1145. Rheed. Mal. 3. t. 55. Rumph. Amb, 3. t. 90. A tree; the Concans.
1362. F. Benjamina. Rox. Flora. 3. p. 550. Itty 1lu. Rheed. Mal. 1. t. 26.

Nandrook.-Next to $F$. elastica, this is the most beantiful of the tribe, with its shining, polished leaves; grows common throughwut the Mawul districts. There are some fine specimens in the vale between the Kamatkee Ghaut and Wye.
1363. F, Asperrima. Rox. Flora. 3. p. 55t. Teregam. Rheed. Nal. 3. $t$. 60.

A large tree, with very scabrous leaves, fruit size of a gooseberry; when ripe yellow; -hilly parts of the Concan.
1364. F. Citrifolia. Willd. Spec. 4 p. 1137. Catou alou. Rheed. Mal. 3. $t$. 57.-A tree; the Concans.
1365. F. Infectoria. Rox. Flora. Ind. 3. p. 551. Tsjakala. Rheed. Mal. 3. t. 64. Asiat. Res. 4. p. 310.-A tree; the Concans.
1365. F. Tsiela. Rox. Flora. Ind. 3. p. 549. F. Indica. Willd. Spec. 4. p. 1146, Tsiela, Rheed. Mal. 3. t. 6:3, Rumph. Amb. 3. t. 89.

Datira.-I large tree; on the Ghauts. One grows at Toolsee, near Kennery Caves, Salsette; and is probably the identical tree noticed by Mrs. Heber, in "Bishop Heber's Journal."
1367. F. Terebrata, Willd. Spec. 4. p. 1145 . Tsjerou Meer Alou, Rheed. Mal. 3.t. 56.-A tree; the Concans.
1363. F. Racemosa. Willd, 4. p. Il46. Alty-alou. Rheed. Mal. I.t. 25. Grossularia domestica. Rumplı. Amb. 3. t. 87 and 83.-A tree; the Concans.
1369. F. Oppositifolia. Rox. Flora. Ind. 3, p, 561. Willd. S̈́pec. 4. p. 1151. Rox. Cor. 2. t. 124.

Kurwut.-A small tree; may be readily known by its opposite leaves,
Hills east of Panwell.-Kandalla. (Dr. Arbuckle.)
1370. F. Heterophylla. Rox. Flora. Ind. 3, p. 532. Valli teregam. Rheed. Mal. 3, t. 62. F. aquatica. Willd. Spec. 4. p. 1133.

A shrub, with scabrous leaves, variously lobed; Nalabar inill Bombay; the Ghauts \&c.
1371. F. Excelsa. Rox. Flora. Ind. 3. p. 552. Atty-meer alou. Rheed. Mal. 3. $t .58$. Rumph, Amb. 3. t. 84.

A tree, with alternate, bifarious leaves, slightly scabrous beneath.-Fruit size of a gooseberry; yellow when ripe.
1372. F. Carica. Rox. Flora. Ind. 3. p. 523. Blackwell. t. 125. Gaert. 2. t. 91. f. 7.

Unjeer.- The common cultivated Fig.-In gardens all over India. The fruit is inferior in size and flavor, to the Smyrna fig. Does it arise from caprification not being practised in this Country? N.

It has been cultivated from time immemorial, and is mentioned in the most ancient fable extant,-viz. the fable of the trees. Judges, 9. 8.
"And the trees said to the fig-tree, come thou and reign over us. But the fig-tree said unto them, should $\bar{I}$ forsake my sweetness, and my good fruit, and go to be promoted over the trees?"
Thomson in his own descriptive language has pictured the mode of growth.

> Beneath his ample leàf the luscious fig."

Autumn.
The green skinned variety according to Shakespeare, is the Fairie's favorite.

> Be kind and courteous to this gentleman,

Hop in his walks, and gambol in his eyes;
Feed him with apricots and dew-berries
With purple grapes, green-figs and mulberries."
Midsummer-Night's Dream.
1373. F. Rheedi. Handur alou, Rheed. Mal. 3. t. 59.

A tree, with alternate, long petioled, ovate oblong leaves. The Concans, and on the Ghauts.
1374. F. Cordifolia ? Rox. Flora. Ind. 3. p. 548.

Pair.-A large tree; leaves heart-shaped, pointed; curiously netted beneath; on long slender foot-stalks,

At Kandalla, pretty common.-The tree here referred to, has something of the habit of $\boldsymbol{F}$. religiosa.
1375. F. Daemona? Rox. Flora. 3. p. 562.

A tree, with very scabrnus leaves; and fruit growing in large clusters from the trank. Bombay;-the Ghants de. pretty common.

The sycamore tree, (Luke 19.4) is the Ficus sucomorus; native of Egypt and Syria. Like the tree here referred to, it bears its fruit on the trunk.
1376. F. -?

Longour.-A large tree with something of the habit of $F$. elastica. Grows on Parell hill, and at Major Miller's old Bungalow, Matoonga.
1377. F. Acuminata. Bot. Mag. t. 3282.

A tree, fruit solitary, yellow. The Concans.
647. ARTOCARPUS. L. Monoecia Monandria.

From Artos-bread (Psalins 104,15 . root aireo, to raise np, strengthen; French lever, - hence the English word leaven.) and karpos-fruit;-Bread fruit tree; first miole known to Europe by Dampier and Ansoa, and the celebrated Capt. Cook. - (see his Voyages.) The English wo:ds bread, and bronse, may come directly from the Greek Broma-food. Lirm, $t, 7 t t$ and 740. Gaert. $t .71$ and 72.
1378. A. Incisa. Rox. Flora. 3. p. 523. Socens lanosus, granosus an d sylvestris, Rumph. Amb. I. t. 32. 33. 34. Bot. Mag. t. 2893. 2370. and 2871. Fruit au pain, Sonnerat Voy. New Guinen, t. 57. 60.

The Brearl fruit tree. A middle sized tree; branches full of a viscid milky juice; leaves large, variously cut aud lobed. Fruit ronnd, size of a small /'ummalo; curiously muricated.

Parell garden,-Giergaum Woods.--Fort.-Colabah.-Only five or six trees are to be found on the whole Islamd. They seem to be of slow growth, but to thrive well; and it may hecome an object of importance to increase their cultivation,-Roxburgh says, the winters is Bengal are too cold for it. It does not appear to be affected by them here.

Most people have heard of the unfortmate Captain Bligh, who was sent to the South Sea Islands, for the purpose of introducing the Bread fruit tree in the West Indies.
1379. A. Integrifolia. Rox. Flora. Ind. 3. p. 522. Soccus arboreus. Rumph. Amb. 1. t. 30. and 31, Tsjaca maram. Rheed. Mal. 3. t. 23. 27. and 28. Rox. Cor. 3. t. 250. Polyphema Jaca. Loureiro's Cochin China Sitolium cauliforum, Gaert. Fruct. 1. t. 71. and 72, Bot. Mag. t. 2833 and 2834.

The Phunnus, or Jack tree; generally to be met with about villages, throughout the Concans,---The large fruit, which grows from the trunk and main branches, forms to the natives an article of diet; and the wood is in common use among Carnenters, for making household furniture,-- In Malabar, the tree attains a large size,

```

```

1380. A. Hirsuta. Rox. Flora. Ind. 3. p. 521. A pubescens. Willd. Spec. 4. p. 198. Ansjali. Rheed. Mal. 3. t. 32.

A large timber tree, native of the forests of Malabar. Intd• by N.-Rheede mentions, that the trunk of it is hollowed out, and converted into fishing Canoes, the same as is done with the trunk of the Bombax ceiba, in the West Indies.
1381. A. Lakoocha. Rox. Flora. Ind. 3. p. 524.

Lowi.-A tree; native of Bengal. Leaves alternate, oval, entire, pointed, downy beneath; deciduous in the cold weather; fruit nearly round, smooth, size of a large orange, yellow, when ripe, edible. Roxburgh says, the roots of this tree dye, yellow.---Salsette and the North Concan; only in a cultivated state. N.

## 647. LEPURANDRA. N. Monoecia Monandria?

From lepur--a scale-audros---a male; in allusion to the numerous scaly receptacles in which the anthers are placed.

## 1382. L. Saccidora. N.

Chandul.---A stately forest tree, with alternate, oblong-elliptical, acuminate, dentate, serrulate, stipulate leaves; base sub-cordate, petioles short; young shoots clothed with short brown hairs; Flowers in October, in very curious reflected aments, something like a common Mulberry. Drupe, size and shape of a small fig; covered with a beautiful purple coloured down; first noticed by Dr. Lush, at Kandalla in 1837.
The Nuts are inteusely bitter, and contain an azotized principle, which may prove an active medicinal agent. N.
Grows in the deep ravines at Kandalla. It is truly majestic, and deserves to be classed amoug Thomson's
> " Lofty trees, to ancient song unknown,
> The noble sons of potent heat and floods
> Prone-rushing from the clouds."

## Thomson's Summer.

It is common in the jungles near Coorg, where the people manufacture very curious sacks from the bark, and by a most simple process, which will hardly he credited in Europe. A branch is cut, corresponding to the length and diameter of the sack wanted. It is soaked a little, and then beaten with clubs until the liber separates from the wood. This done. the sack formed of the bark, is turned inside out, and pulled down until the wood is sawed off, with the exception of a small piece left to form the bottom of the sack, and which is carefully left untouched. These sacks are in general use amoug the villagers for carrying rice, and are sold for about 6 amas each. (Mr. F. N. Maltby. Madras C. S.) Some of them have been sent to England as curiosities, by Mr. P. Ewart.
The tree abounds in a milky, tenacious juice, like most of the Artocarpecee: ard it is in the mean time placed among them, until its affinities are better known. The general habit is that of the order, with the fruit of Galuctodendron, which belongs to it, tho' Dr. Arnott has referred it to the Apocynea.
6i8. MORUS. L. Monoecia Tetrandria.
Morin or Moron, a Greek name of the mulberry. (1st Maccabees 6. 34.
"the blood of grapes and mulberries.") Gaert. 2. t. 126. Tourn. $t$. 362. Lam. $t .762$.

According to fable, the mulberry bore a snow-white fruit, till stained by the blood of Pyramus.
> "Arborei foetus aspergine caedis in atram
> Vertuntur faciem; madefactaque sanguine radix
> Puniceo tingit pendentia mora colore."

Ovid's Meta. Book 1. Fable 4,

## 194

"The berries, stain'd with blood, began to show
A dark complexion and forgot their snow:
While fattened with the flowing gore the ront, Was doom'd for ever to a purple fruit."

Eusden's Trans.
1383. M. Indica. Rox. Flora. 3. p. 596. Willd. Spec. 4. p.370. Sprengel's syst. 1. p. 492, Rumph. Amb. 7. $t^{\cdot 5}$.

Toot.-A small tree, with ovate, cordate, long tapering leaves, sometimes lobed; fruit dark red; sold in the hazars for making tarts \&c.

Roxburgh says, this is the species cultivated in Bengal for feeding silk worms, and that it is usually cut over four times in the year and kept down as a bush. The system was tried in the Deccan, (at Ahmednugger, by Dr. Graham,) but without success; as might have been anticipated, from the difference in soil and climate.

In Bengal the deep rich soil is so moist as to render little irrigation necessary. In the Deccan it is just the reverse; and the cost of cultivation on the Bengal plan ruinous;--for irrigation alone.

Mr. Mutti, au Italian, commenced a plantation of standard trees at the Heera Baugh, near Poona 6 or 7 years ago; on the principle that as soon as they attained a certain size, their roots would strike beyond the sun's influence and render little irrigation necessary; at the same time that an equal quantity of leaves would be obtained from an equal space of ground, with the further advantage of growing annual crops between the rows of trees. The experiment has been successful, and small plantations under his direction are now gradully extending over the Deccan. One was made in Bombay, near Parell, of about 2000 trees, by Mr. De Ramos, in 1838. It bids fair to answer expectations. The plants are chiefly of the white St. Helena mulberry to which Mr. Mutti gives the preference from its rapid growth, the small quantity of water required and the nourishing qualities of its leaves.
1384. M. Alba. Rox. Flora. 3. p. 594. Willd. Spec. 4. p. 368. M. Italica. Poir.

A tree: leaves cordate, serrate, entire, or varinusly lobed: fruit rather small, white.-In gardens. The "Dopia Foglia," and other white fruited varieties form the greatest portion of Mr. Muti's plantations.
1385. M. Atropurpurea? Rox. Flora, 3, p, 595, M. rubra? Lour. Cochin China 2. p, 555. Pluk. Alm. t. 246.f. 4.

A tree, with cordate serrate leaved and dark purple cylindric fruit, Can this be indentical with the Shaitoot, which is generally to be met with about Musselnan cities, and was probably introduced by the Moguls?

## 1386. M. Nigra. Willd. Spec. 4. p.36y. Blackwell $t$. 126.

A tree: leaves cordate, ovate, unequally toothed: fruit black. In Parell garden; also in front of the house. - Some plants of this species were brought from Egypt by Mr. Maccullough in 1837. It is grown in that country for feediug silk worms.

1:387. M. Leptostachya. Wallich. Dapooree. Ind. from Bengal. (Dr Lush.)
1388. M. Scandens. Dapooree. intd. from Bengal. (Dr. Lush.)

The production of silk is an object of importance, and though ouly in its infancy in Western India, that state shows what may probably be effected in the course of years. As soon as the natives find it profitable to orow mulberry trecs, it is reasonable to suppose they will do so; and as there is little danger of all the world falling into a "pet of temperance" a ready market will generally be found,

The leaves of all the species of Mulberry form the favorite food of that truly wonderful insect,--the silk worm,--Milton makes elegant allusion to it, in his Comus.
"Wherefore did Nature pour her bounties forth
With such a full and unwithdrawing hand,
Covering the earth with odours, fruits and flocks,
But all to please and sate the curious taste?
And set to work millions of spinning worms
That in their green shops weave the smooth hair'd silk,
To deck her sons.
—_If all the world
Should in a pet of temperance feed on pulse,
Drink the clear strean and nothing wear but frieze,
The All-giver would he unthank'd, would be unpraised,
Not half his riches known, and yet $d \in s p i s ' d$ :
And we should serve him as a grudging master,
As a penurious niggard of his weal th."
The famous, half fabulous $U_{\text {pas. tree }}$ of Java. (Antiaris toxicaria) belongs to this tribe. The inspissated juice is poisonous, but the baleful effect of its shade is only imaginary, and poetical. Southey in his "Paraguay" alludes' to it.
" A direr curse had they inherited,
Than if the Upas then had rear'd its head'
And sent its baleful scions all around,
Blasting where'er its effluent force was shed,
It air and water, and the infected ground,
All things wherein the breath or sap of life is found:"

## ORDER 128. SALICINE E.

The: Willow Tribe. Lind. Nat. syst. pı 98,
649. SALIX. L. Dioecia Diandria.

Said to be derived from the Celtic sal-near-lis-water; in allusion to the habitat of the willow tribe. Gaert. 2.t. 90. Tourn. $t$. 364. Lam. 3. $t$. 802.

1389, S. Tetrasperma. Rox. Flora. 3. p: 753. Rox. Cor. I. t. 97.
Indian willow. - A small, elegant looking tree, with lanceolate, serrulate leaves, whitish beaneath:-flowers in the cold weather,

The vale of the Yena and other moist places, Mahableshwur.-In various parts of the Southern Mahratta Country. (Mr. Law.)
1390. S. Babylonica. Willd. Spec. 4. p. 671. Lour, Cochin China. 2. p. 609.

The Weeping willow:-In gardens, introduced.
"By the rivers of Babylon there we sat down: We hangedi our harps upon the willows, in the midst thereof."

Psalm 137.
Pope had one at Twickenham,
"With graceful grandeur towering, Its pensile boughs profusely spread,
The breezy lawn embowering."

## Montgomery.

There is a plant, in Parell garden, reared from a cutting of the tree, which appropriately shades the tomb of the Emperor Napoleon,-It is in no wise different from the Babylonian willow, here referred to.

## ORDER 129. MYRICEAE.

## The Gale Tribe. Lind. nat. syst. p. 100.

## 650. NAGEIA, Gaert. Dioecia Pentandria.

The Japanese name of one of the species, altered. Gaert. 1. $t, 39$.
1391. N. Putranjifa. Rox. Flosa. Ind. 3. p. 766. Pongolam. Rheed. Mal. 7. t. 59. Ainslie. Mat. Ind. 2. p. 322.

A very elegant tree, with dark green, alternate, lanceolate, oblong, serrulate leaves: flowers very small, yellowish white, appear in March and April.-Drupe obovate, size of a gooseberry.

In an old garden at the top of the steps leading to Malabar hill, Bombay. In the ravines at Nagotuah and Kandalla-Kennery Jungles, Salsette. In the Jungles to the north and east of Belgaum. (Mr. Law.) Common along the foot of the Himalayas. (Dr. Royle.) Concans. N.

Rheede ascribes great virtues to it, such as driving away colds, fevers \&c. It is well worthy of a place in Gardens as an ornamental tree.
651. CASUARINA, L. Monoecia Monandria.

Nanie taken from Rumphius, who probably gave it in allusion to the resemblance the foliage bears to the plumage of the Cassowary. Lam. t. 746.
1392. C. Muricata. Rox. Flora. 3. p. 519.

The Cassarina tree;-Tinian Pine now pretty common about Bombay. It grows very rapidly, assuming a graceful appearance, and bearing a considerable resemblance to some of the Fir tribe.
C. Equisetifolia is figured in Rumph. Amb. 3. t. 57. Martin in illustrating Paradise Lost with plates, seems to have had it in view:-or perhaps fancy led him to figure something unlike the usual forms of vegetation; as his landscapes are by no means happy, or in accordance with appearances in this nether world.

## ORDER 130. CONIFERe.

The Fir Tribe. Lind. Nat. syst. p. 247.
652. PODOCARPUS. L'. Her. Monoecia Monadelphia.

From pous-the foot-karpos-fruit; in allusion to the stalk of the fruit-
1393. P. Elongatus? Sprengel's syst. 3. p. 889. Taxus elongata: Thunberg.

A tall erect growing shrub, with subverticelled branches and linear lanceolate leaves.-Parell garden, probably introduced from the Cape of Good Hope, where it is indigenous. The branches are remarkably tough.
653. CUPRESSUS. L. Monoecia Monadelphia.

Named from the Isle of Cyprus where the tree grows abundantly. Lam. $t$. 787. Tourn. $t$, 358. Gaert. 2, t.91. Or perhaps from the fable of Cyparissus who was changed into a Cypress tree, after killing a favorite stag of Apollo's.

> "Apollo sad look'd on and sighing cry'd,
> Then be for ever what thy prayer imply'd:
> Bemoan'd by me, in others grief excite;
> And still preside at every fun'ral rite."

Ovid's Meta. Book 10.
C. Glauca. Sprengel's syst. 3. $p$. 889. C.-lusitanica. Willd. Spec. 4. p. 511. C. pendula. Persoon's Synop, 2, $p, 580$, L, Herit, Stirp. t. 8, Lambert, Pin, t. 42.

The common Indiun Cypress, or Cedar of Goa-In Gardens Bombay, and the Deccan. It thrives best above the Ghauts.--There are some fine specimens in the Peshwa's old garden at Phoolshaher; and also a little lower down the river, at Corygaum, surrounding anl Obelisk raised to comnemorate the battle fought there on 1st January 1818. -The residency at Sattara; Gardens Ahmednuggur \&c.

> "Here towers the Cypress, preacher to the wise, Lessening from earth her spiral honors rise, Till as a spear-point reard the topmost spray Points to the Eden of eternal day."

The Lusiad, Book 9.
"And winding through the verdant vale, Flow'd streams of liquid light; And fluted Cypresses rear'd up Their living obelisks."

Southey's Thalaba. Book 6.
Almost all the Poets assign these graceful trees to the melancholy office, of shading the mansions of the dead; but surely their elegant appearance does not justify the hard things some say of them.
> "Jubet sepulchris caprificos erutas Jubet Cupressus funebris."
> "Trees, whose horrors gloomy spread Round the mansions of the dead."

> Francis' Horace. Book 5. Ode. 5.
> -Poison be their drink!
> "Gall, worse than gall, the daintiest that they taste! Their sweetest shade a grove of cypress trees."

2nd Part of King Henry 6th:
"Come away, come away, death, And in sad cypress let me be laid."

> Song, in Twelfth Night.
"And oft the living by affection led
Were wont to walk in spirit with their dead
Where no dark Cypress cast a doleful gloom."
Montgomery's World before the Flood.
Lieut. Col. Sykes observes, (Madras Journal of Science, No. 22.) the Deccan produces none of the Coniferous family, except Cupressus; but it should be added, that it is only found in gardens, or planted by the hand of man. It was originally intd. at Goa, by the Portuguese, and has since spread over the Country. Not a single member of the family has yet been discovered wild in Western Iudia, and there is good reason to believe that none exist. The Himalayas produce some of them-Pinus excelsa. P. Smithiana. $\boldsymbol{r}$. Brunoniana.-Wall. Asiat. Pl. Rar. 3. t. 201. 246 and 247. and in Sylhet the Podocarpus latifolia. (1. t. 30.) is found.

Is there not also some mistake in regard to carrots, turnips and radishes heing indigenous in the Deccan!-they are cultivated all over it, but have not been found wild:-also in regard to the snpposition that the Makur Neembonee of the Ghauts, is the original of some of the species of Citrus. in the Deccan. It belongs to a different genus, the Atalantia; and could not under any cultivation be transformed into a Citrus.-Both belong to the same tribe, and the one may be grafted on the other. The Atalantia will form a good stock. The Gopher, of which Noah's Ark was made, Cupressus and Cafur seem to be derived from the same root. N :

## 654. THUJA, L, Monoecia Monadelpbia.

From thyo-to kill, to sterifice; in allusion to the wood being used in sacrifices; it gives out an agreeable perfume on being burnt. Lam. 11l, t. 787. Tourn. $t$. 353. Gaert. 2. t. 91 .
1391. T. Orientalis. Rox. Flora. 3. p. 653. Lam. Ill, t. 787. f. 2. Gaert. 2. t. 91.f. 2. Lour, Cochin China, 2, p. 580.

Chinese Arbor-Vitae.-A shrub; in Parell garden.
655. AGATHIS. Salisb. Monoecia MonadeIphia.

From agatis-a cluster; in allusion to the flowers growing in clusters.
1395. A. Australis. Lambert. Pin. 2. t. 6.

The New Zeyland Pine.-one of the most stately trees in the world. Hort. Soc. Garden. Intd. from the Cape of Good Hope, by Mr. A. N. Shaw. C. S.
A. Loranthifolia. Rumph. Amb. 2. t.57. is the Dammer Pine of the Eastern Islands.

## ORDER 131. CYCADEE. Sweet's Hort. Brit. p. 374.

6ä6, CYCAS. l. Dioecia Polyandria.
A name said to have been applied to a palm which grew in Ethiopia.
1396. C. Circinalis. Rox. Flora, 3. p. 744. Olus calappoides. Rumph. Amb. 1. t. 22 and 23. Todda-pama. Rheed. Mal. 3, t. 13-21. C. inermis. Lour. Cochin China. 2. p. 632. Bot. Mag. 2826.

A handsome tree: in appearance much like the Palm tribe, but in reality nearly related to the Coniferae.-In gardens, Bombay, Intd. from the Eastern Islands.

It is the common tree from Tellicherry, to the foot of the Ghauts; above the Ghauts it disappears, and its place is taken by the truly elegant Areca Dicksonii. (Dr. Lush.)

The fructification of Manicaria saccifera. Lam. t. 774. and Gaert. t. 176. is somewhat similar. It is placed among the Palms.-Does it connect that tribe, with the Cycadeat?

65\%. ZAMIA. L. Dioecia Polyandria.
From Zemia-loss, or damage.
1397. Z. Horrida. Sprengel's syst, 3. p. 998. Jacq. Frag. t. 27. and 28.

A strange looking plant, with pinnate frouds; leaflets lanceolate, acute, pointed, glaucous: with spiny teeth on the outside. Dapooree, intd. from the Cape. (Dr. Lush.)

## ORDER 13?. PIPERACE E, Sweet's Hort. Brit. p. 380.

$$
\text { The Pepper Tribe, Lind. nat. syst. p. } 174 .
$$

## 658. PIPER. L. Diandria Trigynia.

From the Indian name. Lam. t. 23. Gaert. 2. t. 92.
1398. P. Nigrum. Rox. Flora. 1. p. 150, Molago codi. Rheed. Mal.7. t. 12. Bot. Mag. t. 3131. Pluk. Alm. t. 437.f. 1. Moris Hist. 3. f. 15. t. 1.f. 1 .

Miree, Kala Miree, - Black Pepper. Vine,-Ingardens, For information regarding its culture, see Marsden's History of Sumatra.
1399. P. Betce. Rox. Flora. 1. p. 158. Betela codi, Rheed. Mal. 7. $t_{5}$ 15. Bot. Mag. t, 3132. Rumph, Amb, 5, t. 116.f. 2. Burm, Zey. t. 82,

Paon,-Balute leaf,-Tumbolee-ku-paun.-Cultivated-The leaves are sold in every Bazar, and the roots are used medicinally as a stimulant called Paun-ka-jhar and Pippla mool. (Mr. Vaupell.)
"High on a blazing couch the monarch sate,
Lordly his posture and his brow serene:
An hoary sire submiss on bended knee,
(Low bowed his head,) in India's luxury,
A leaf all fragrance to the glowing taste, Before the King each little while replaced."

The Lusiad. Book 7.
1400. P. Malamiris. Rox. Flora. 1. p. 160. Amalago. Rheed. Mal. 7. t. $16 \cdot \mathrm{~S} . \mathrm{Concan}^{2}$ N.
1401. P. Trioicum. Rox. Flora. 1, p. 151.

Cockerwail.-Grows in great abundance at Lanowlee, near Kandalla, clothing the trunks of high trees.
1402. P. Longum. Rox. Flora. 1. p, 154, Cattu tirpalli. Rheed. Mal. 7. . 14. Pluk. Alm. t. 104. $f$. 4.

Pippul, Pippere-Long Pepper.- Cultivated at Poway, Salsette \&c.
The culture of this plantat Bassein by an intelligent European Portuguese who died in 1836, was successfully tried, and there can exist little donbt that the soil and climate of the Concans are both favorable to it. (Mr. Vaupell.) S. Concan. N.

ORDER 133. ALISMACEE. Sweet's Hort. Brit. p. 375.

## The Water Plantan Tribe. Lind. Nat. syst. p. 253.

659. SAGITTARIA. L. Monoecia Polyandria.

From Sagittican arrow; name given in allusion to the shape of the leaves. Lam. t. 776.
1403. S. Obtusifolis. Rox. Flora. 3. p. 646. Culi-tamara. Rheed. Mal. 11, t. 45. Pluk. Alm. t. 200.f. 7.

An aquatic plant; leaves long petioled; ovate sagittate, with the lobes tapering to long narrow points; flowers small, white,-In tanks throughout the Concans.
S. sagittifolia. (English Botany. t. 84.) is a very handsome plant.-In China it is cultivated for the sake of its roots, which form an article of food,

## ORDER 134. HYDROCHARIDE E. Sweet's Hort. Brit. p. 374.

The Frog-bit Tribe. Lind. nat. syst. p. 254.
660. Vallisneria. l. Dioecia Diandria.

Named after Vallisneri, an Italian Botanist. Lam. $t$. 799.
1404. V. Octandia. Rox. Flora. 3. p. 752. Rox. Cor. 2. t. 165. Saivala. Asiat. Res. 4. p. 275.

A grass-like plant; leaves radical ensiform: flowers white, pedicelledThe margins of tanks throughout the Concan. N.
1405. V. Alternifolia. Rox, Flora, 3, p. 750. Wight in Hooker's Bot. Misc. Part. 2, 6.11,

Stems filiform, branched; leaves alternate, linear, 3 or 4 inches long; flowers pedicilled, small-In tanks throughout the Concans, N.-It is used for refining sugar.
1406. V. Spiraloides. Rox, Flora. 3, p. 750. V. spiralis. Willd. Spec. 4. p. fi50. Wight in Hooker's Bot. Misc. Part. 3. t. 23 and 24.

Leaves radical, ensiforn. Female flowers on a spiral, thread like scape. In tanks. N. It is found also throughout Europe, New Holland, and North America.
661. DAM.SSONIUM. L. Hexandria Polygynia.

From damao-to take away, or subdue; in allusion to the supposed medicinal qualities.
1407. D. Indicum. Rox. Flora. 2. p. 216. Ottel Ambel. Rheed. Mal. II. 46. Rox. Cor. 2. 1.185. Bot. Mag. t. 1201.

An aquatic plant, with large cordate leaves, which generally grow under water. Peduncles radical, of sufficient length to raise the flower above the surface of the water: corolla 3 petalled.
Nagaum tank, Bombay. N. Bulsaur tank. (Dr. Lư̌h.) Generally throughout the Concans.

## ORDER 135. PISTIACE E.

## The Duck-weed Tribe. Lind, nat. syst. p. 291.

662. PISTIA, L. Monadelphia Pentandria.
i408. P. Stratiotes. Rox. Flora. 3. p. 131. Kodda pail. Rheed. Mal. 11. t. 32. Plantago aquatica. Rumph. Amb. 6, t. 74 . Tala indica. Lour, Cochin China. Ainslie Mat. Ind. 2. p. 7. Rox. Cor. 3. t. 268.

An aquatic plant: a good deal like the commongarden Endive. It has a peculiar muriatic smell, and in tanks where it abounds, is said to injure the water by imparting to it acrid qualities. -Common throughout the Concans.

ORDER 136. FLUV1ALES. Sweet's Hort. Brit. p. 376.
663. POTAMOGETON. L.Tetrandria Tetragynia.

From Potamos-a river-gaiton-a neighbour; in allusion to the habitat of the plants- Iam. $t$. 89. Gaert, t. 84. Tourn. $t .103$.
1409. P. Indicum. Rox. Flora. 1. p. 452.

A creeping plant, with alternate, narrow, lanceolate leaves.-In tanks.
1410. P. Tuberosum. Rox. Flora. 1. p. 452.

Leaves alternate, sessile, linear waved. In tanks common; abundant in a tank at Wurgaum. on the road to Poona.
664. APONOGETON. L. Hexandria Trigynia.

Apo-on-potamos-a river; in allusion to the place of growth, Lam. t. 276.
1411. A. Monostachyon. Rox. Flora. 2. p. 210. Parua Kelangi: Rheed. Mal. 11. t. 15. Rox. Cor, 1. t. 81. Bot. Rep. t. 406.

An aquatic; leaves radical, long petioled, cordate at the base, spike simple, calyx of 2 wedge shaped concave leaflets.-Margins of tanks, Salsette and the Concans. N .

Roxburgh says, the tuberous roots are eaten by the natives, and are almost as good as potatoes.

Mr. Young C. S. mentions a plant which grows in great abundance in some swampy tracts to the westward of Ahmedabad and Kairah, the roots of which are dug up and eaten by the natives.

Perhaps this may be the plant he refers to. No specimens have yet been seen.

## ORDER 137. ORCHIDELE. Sweet's Hort. Brit. p. 381.

## The Orchis Tribe. Lind, Nat. Syst. p: 262.

665. ORCHIS. L. Gynandria Monandria.

The Greek name of the plant.
141\%. O. Commelinefolia. Rox. Flora, 3. p. 451.
Root of twn or more spindle-shaped, succulent tubers. Scape erect, about 18 iuches high: round, suouth jointed; with cylindric sheathes about half the length of the joints. Flowers white, scentless; appear about the middle of the rains.-On pasture lands in the Southern Concan. N.
666. HABENARIA. R. Br. Gynandria Monandria.

From Habena-a thong or rein; in allusion to the long spurs with which the flowers of most of the species are furnished.
1413. H. Platyphylla? Sprengel's syst. 3. p. 690. Orchis platyphyllos Rox. Flora. 3. p. 4.5u. O. platyphyllos. Willd. Spec. 4. p. 11. O. Roxburgii. Persoon's Synop, 2. p. 503. Rox. Cor. I. t, 37.

Root, perennial, size of a pea. Scape erect, 12 or 18 inches high, round, smooth, furnished with leafy sheathes.

At the bottom of the scape there is a single round leaf pressed flat on the ground. Flowers white, fragrant; appear at the beginning of the rains. S. Coucan, N.

Common about Belgaum at Dharwar. (Mr. Law.)
1414. H. Gigantea, Sprengel's syst. 3. p. 693. H. Susannae. Sprengel's syst. 3. p. 692. Flos Sussamnae. Rumph. Amb. 5. t. 99. $f$. 2, Herm. Parad. t. 209. Orchis gigantea. Smith's Exot. Bot. 2. t. 100. Bot. Mag. t. 3374.

Stem 2 or 3 feet high, leafy; lower leaves broad, concave; flowers large, greenish white, fragrant; appear towards the close of the rains.-The Concans. N. At Kandalla, on the open ground about Sir Herbert Compton's Bungalow.-S. M. Country. (Mr. Law.)

This is a very superb flower, and has a strange appearance with it's long horn and pectinated lateral lobes of the corolla.

The plant from which the figure in the Botanical Magazine was drawn, was reared in Glasgow Botanic Garden, from roots seut there by Mr. Nimmo, who has identified it with $H$. Susunnae.
1415. H. Marginata.' Sprengel's syst. 3. $p .69$ I.

The 3 lacineae of the labellum yellow, the middle one shorter than the others.-Fornix with a yellow margin.-Appears in the rains.-S. Concan. N.

Mr. Law says, an Orchideous plant, with greenish yellow flowers, succeeds $H$. platyphylla.; in the S. M. Country-Probably this is the one.
1416. H. Goodyeroides. Sprengel's syst. 3. p. 690. Bot. Mag. t. 3397. Dou's Prod. Flora. Nepaul. p. 25.

Stem 12 or 18 inches high, erect, round leafy; the upper ones gradually increasing in size. Flowers small white in a densely crowded spike; furnished with lanceolate bractes.-S. Concan. N.-Appears during the rains. The plant from which the figure in the Botanical Magazine is drawn, was sent to Glasgow by Mr. Nimmo.
1417. H. Verecunda. N.
1418. H. Meridiana. N.

Two new species discorered by Mr. Nimmo in S. Concan,

## 1419. H. Longicorniculata. g.

Stem from one to two feet high, leaves ovate, oblong; growing pretty close together near the bottom; decreasing in size upwards, verging into linear lanceolate. Flowers very fragrant, appear towards the close of the rains, of a greenish white colour; lower lip entire so far, and then split into 3 segments, of equal length, the 2 side ones broadest, all with truncated ends. From below it prorudes a long slender horn, (thickened a little towards the extremity.) which-gives the plant a very curious appearance.

On the open ground about Sir Herbert Compton's Bungalow at Kandalla, S. Coucan N.-S. M. Country. (Mr. Law.) Common on the Pulney hills (Dr. Wight.)
H. longicauda. Bot. Mag. t. 2957, native of Demerara, seems to be an allied species, but in it the segments of the lower lip are double the length, and of a different shape. Both are very interesting plants.
1420. $\mathrm{H}_{\iota} \longrightarrow$ ?

Stems about 12 or 18 inches high, leafy, stout. Flowers white. Kandalla. Hilly parts of S. Concan. N.-Mahableshwur, where it is called Mhenus. (Dr. Murray.)

The plant here referred to, is probably new.
1421. H. - ? Rumph. Amb. 6. t. 2 ?

A small plant, 3 or 4 inches high, stems leafy: flowrrs white.-Grows pretty common about Kandalla towards the close of the rains. Proiably it belongs to some other genus.
667. EULOPHIA. R. Br. Gynandria Monandria.

Eulophos-well crested; in allusion to the middle lobe of the lip.
1422. E. Carinata Lindley. Aerobion carinatum. Sprengel's syst. 3. p. 718. Limodorum carinatum. Willd. Spec. 4. p. 124. Katon kaida. Maravara. Rheed. Mal, 12. t. 26.

A terrestrial plant, allied to Roxburgh's L. ramentaceum. Leaves radical, linear, acute, keeled; scape simple. S. Concan. N.-S. M. Country. (Mr. Law.)
1423. E. Virens. Lindley. Limodorum virens. Rox: Flora. 3. p. 467. Rox. Cor. 1. t. 38. Katon theka. Mara bara, Rheed. Mal. 12. t. 2j. Wilid. Spec. 4. p. 123.

Terrestrial, leaves radical, linear, slightly nerved. Scape from 1 to 2 feet high, dotted with purple spots, flowers of a greenish yellow colour.Pasture lands in the Concan. N.
1424. E. -?

A new species with red flowers, discovered by Mr. Nimmo in the Concan.
668. MALIXIS. Willd. Gynandria Monandria.

Malaxis-sofness; in allusion to the texture of the leaves of some of the species.
1425. M. Rheedei. Willd. Spec. 4. p. 90. Sprengel's syst. 3. p. 740. Persoon's Synop. 2. p. 514. Epidendrum resupinatum. Forst. Prod. No. 322. Basaala Ponlon. Maravara. Rheed. Mal. 12. t. 27. Microstylis Rheedei. Lind.

A parasite, on trees in S. Concan: N. Found also on rocks; leayes lanceolate, ovate, plicate, nerved. Scape somewhat 3 cornered. Flowers small. redulish.
1426. M. Odorata. Willd. Spec. 4. p. 91. Sprengel's syst. 3. p. 740. Liparis odorata. Lind. Katou Ponnam Maravara, Rheed. Mal, 12, t. 28.

Terrestrial, leaves lanceolate, ovate: Scape 3 cornered; flowers of a yellowish green colour.-Rheede says, the juice of the leaves is an efficacious remedy in swellings of the feet called St. Thomae. Q. Elephantiusis?
1427. M. Cernua.\{Willd. Spec. 4' p. 93. M. nutans. Willd. Spec. 4. p. 93. Limodorum nutans. Rox. Flora. 3. p. 470. Rox. Cor. I. t. 40. Bela pola. Rheed. Mal. 11. $t$. 35. Geodorum purpureum. Sprengel's syst. 3. p, 726. Cymbidium pictum. R. Br.
Terrestrial; leaves oval, oblong pointed, 5 nerved. Scape longer than the leaves. The flower bearing part of it pendulous. Flowers of a beautiful rose colour. S. Concan. N.

What is Rheede's Ela pola. 11. t. 36?
669. CYMBIDIUM. Willd. Gynandria Monandria.

From Kymbe-a little boat; in allusion to the form of the labellum.
1428. C. Aphyllum. Willd. Spec. 4. p. 100. Rox. Flora. 3. p. 462. Limodorum aphyllum. Rox. Cor. 1. t. 41.
Terrestrial. Stems simple, jointed, leafless. Flowers of a pale sulphur colour: On dry barren rocky grounds in the Concan. N.
!429. C. Aloifolium. Willd. Spec. 4. p. 101. Rox. Flora. 3. p. 458. Kansyram Maravara. Rheed. Mal-12-t. 8. Jacq. Hort. Schoen, 3. t. 38:3. Sprengel's syst. 3. p.725. Epidendrum aloifolium. Linn. Spec. p. 1507. Bot. Mag. t. 387.
A parasite; stemless; leaves radical, linear, ohtuse, alternate, bifarious. Scape radical, nearly as long as the leaves.

On trees at Mahableshwur, the Ghauts and hilly parts of the Concans; flowers in April and May.
1430. C. Pendulum. Willd, Spec. 4. p. 101. Rox. Flora. 3. p. 458. Epidendrum pendulam. Rox. Cor. 1. t. 44 .
A parasite; stemless: leaves radical, linear, retuse. Scape radical, from 1 to 2 feet long; flower bearing part pendulous. Flowers striated with red and yellow; very beautiful: appear in April and May.-On trees; the Ghauts \&
1431. C. Ovatum. Willd. Spec.4. p. 101. Sprengel's syst. 3. p. 725.

Angraecuen album minus. Rumph. Amb. 6. t. 43. f. 1. Anantali. Maravara. Rheed. Mal. 12. t. 7. Epidendrum ovatum. Linn. Spec. p. 1506.
A parasite: leaves on the stem.sessile, ovate, acute, nerved; stem panicled; flowers in the hot weather.
1432. C: Premorsum. Willd. Spec. 4. p. 103. Rox, Flora. 3. p. 465. Epidendrum praemorsum. Rox. Cor. 1. t. 43. Linn. Spec.p. 1516. Thalia Maravara. Rheed. Mal. 12.t. 4. Saccolabium papillosum. Lindley.

A parasite; caulescent; leaves bifarious imbricated, linear channelled. 6. or 8 inches long, and about 1 broad. Spikes lateral, much shorter than the leaves. Flowers small, mumerous, variegated with red and yellow; appear in March and April.-Grows abundantly on a grove of Ayeen (Pentaptera tomentosa) trees near Indapoor, S. Concan.-Generally throughout the Concans. N.-at Mahableshwur. (Dr. Murray.) It is one of the most common of Orchideous Parasites.
143.3. C. Tenufolum. Willd. Spec. 4. p. 103. Sprengel's syst. 3. p. 722 Epidendrum tenuifolium. Linn. Spec. p. 1506. Tsieron-mau Maravara. Rheed. Mal. 12. t. 5. Rumph. Amb. 6. t. 49. f. 1.

Parasitic; caulescent; leaves linear, subulate, channelled. Spikes opposite to the leaves; few flowered.-S. Concan. N.
Kolly-tsieron-man Maravara, Rheed. Mal. 12, t. 6. may perhaps also be referred here,
1434. C. Imbricatum? Rox. Flora. 3. p. 460. Pholidota imbricata. Sprengel's syst 3. p. 727. Wellia-theka Maravara. Rheed. Mal. 12. t. 24. Hooker's Exot. Flora. t. 138.

Parasitic;-root of numerous small fleshy fibres, which adhere to the bark of trees;-leaves somewhat ensiform, smooth; flowers very minute in slender cylindric spikes.

On trees in the ravines about Parr. Perhaps the plant here referred to may prove a species of Eria. -The leaves are not nerved.
670. AERIDES. Willd. Gynandria Monandria.

From aer.-air; plants which possess the peculiar property of existing for months on air alone.
1435. A. Retusum. Willd. Spec. 4. p. 130. Sprengel's syst. 3, p. $7!9$. A. guttatum? Rox. Flora. 3, p. 471 . Epidendrum retusum. Linn. Spec. p. 1507. Ansjeli Maravara. Rheed. Mal. 12. t. 1. Saccolabium guttatum. Lind. Ruıph. Amb. 6. t. 42.

Parasitic; leaves sub-radical, linear thick, with a retuse apex. Flowers in long racemes, reddish, spotted; very beautiful; appear in April and May.-Common at Mahableshwur and on the Ghauts.
1436. A. Praemorsum. Willd. Spec. 4. p. 130. Sprengel's syst. 3. p. 719. Saccolabium praemorsum, Lind. Rox. Cor. 1. t. 43. Biti-marum Maravara. Rheed. Mal. 12. t. 2.

Parasitic; leaves radical, linear channelled; apex truncated. Flowers in long racemes, pink coloured, spotted, very beautiful; appear in April and May.-Mahableshwar; - the Ghauts generally.

The Chinese convicts at Mahableshwar say, that a cooling decoction is made from the roots of this plant in China.
1437. A. Multiflorum, Rox. Flora. 3. p. 475. Sprengel's syst. 3. p. 719. Rox. Cor. 3. t. 271. Vanda multiflora. Lind. Coll. t. 38.

Parasitic, caulescent; leaves linear channelled, obliquely emarginate, with a hooked point; flowers in long racemes, pretty large, of a beautiful pink colour; appear in May.-This lovely epiphyte grows in considerable abundance in a grove of trees near Mahar, in the South Concan. It seems to give the preference to the Mango.
671. VANDA. R. Br. Gynandria Monandria.

The native name adopted.
1438. V. Spathulata. Lindley, Limodorum spathulatum. Wild. Spoc. 4. p. 125. Ponam-pu Maravara. Rheed. Mal. 12. t. 3. Rumph. Amb. 6. t. 44. $f$. 1.

Parasitic, caulescent, leaves on the stem, alternate, oblong, obtuse, veinless. Flowers in axillary racemes.-S. Concan. N.
1439. V. Roxburghit. R. Br. Bot, Reg. t. 506.

Parasitic; leaves obliquely, 3 toothed at their ends.
672. DENDROBIUM. Rox. Gynandria Monandria.

From Dendron-a tree---bio-to live; in allusion to the plants growing on trees.
1440. D. Pierardi? Rox. Flora. 3. p. 482. Hooker's Exot. Flora. t. 9.

Patric.-A parasite; caulescent; stems leafless from 6 to 12 inches long, round, jointed; with something of the habit of Polygonum.-Flowers several towards the top of the stem, of a light rose colour, and very beautiful; appear in February and March,-Common on trees along the Ghauts.Mahableshwur.

Jy. Cor. 5 pet., shreading, Lik calearate: II nuiva doceate
Cuthor a deciduous lid

The plant here refered to, is probably a new and undescribed species of Dendrobinm.
673. PHIUS, Wall. Gynandria Monandria.
1441. P. Albis. Wall, Asiat, PI. Rar. 2. t. 198.

Parasitic, canlescent, leaves alternate, oblong, lanceolate, acute. Flowers white, showy, in terminal racemes; appearin July. On trees at Kandallarare. This is a very beautiful Parasite, but as it flowers in the raine, it is seldom observed.
674. CIRRHOPETALUM. Lind. Gynandria Monandria.

From Cirrhus-a tendril-petalum-a petal; in allusion to the long filiform tendril-like termination of the lateral sepals.
1442. C. Wallichil? Wall. Pl. Asiat. Rar. I. t. 67.

Parasitic. Stem slender, 4 or 6 inches high: flowers terminal, disposed in umbels of a brownish yellow. Grows on Aycen trees about Parr and the Rotunda Ghant;-by no means common. It is a very diminutive, plant and probably different from Wallich's.

What is the Teka Marabara. Rheed. Mal. 12. t. 22? It seems to belong to this genus.

This is a very beantiful tribe, but of little importance to man beyond pleasing the eye. The roots of some of the terrestrial species furnish the substance called Sulep.
675. EPIPACTIS. Box. Gynandria Monandria.

From Epipegnuo, to coagulate; the supposed property of the plant in curdling milk.
144. E. Carinata. Rox. Flora. 3. p. 454.

Terrestriul-Leaf solitary, long petioled, plicate, cordate. Flowers greenish yellow on a scape which appears before the leaf, soon after the first fall of rain.

## ORDER 133, SCITAMINE E.

## The Ginger Tribe. Lind. nat. syst. p. 265.

676. HEDYCHIUM. Koen. Monandria Monogynia.

Hedys-sweet. chion-snow; in allusion to the sweet-scented, pure white flowers;-or Heden, chien-to pour forth sweets.
1444. H. Coronarium. Rox. Flora, I. p. 10. Rumph. Amb. 5. t. 69. f. 3. Linn. Trons. 8. p. 342. Evot. Bot. t. 107. Bot. Mag. t. 708.

Sonetukkah - Doolubu chumpa.-In Gardens. The flowers, which appear in the rains, are large, pure white, and very fragrant. The Hindoos and Malay Belles wear them in their hair. Roxburgh calls it the most charming plant of the order.
1445. H. Flavum. Rox. Flora. In. I. p 12. Roscoe. Scit. Pl. t. Bot. Mag.t. 3039. Bot. Cab. t. 604.

Sonetukka---Hema champa.-Flowers large, fragrant, resembling in colour to those of Michelia champaca: Parell Garden, probably introduced from Bengal. It is a native of Silhet.
1446. H. Angustifolium. Rox. Flora. In. I. p. Flowers small, of a dull red colour, native also of Silhet.
1447. H. Sulphureum. Wall.

The two last named species were introduced from Bengal. by $\mathbf{N}$,
1448. H. Scaposum, N,

## 206

A new species, discovered by N. in the Southern Concau in 1824.
Colla.--Soonhu.-- Khandalla names.
It grows in great abundance on the marshy parts of Karlee plain, and on the west border of Lanowlee grove.- Leaves sessile, stem sheathing broad, lanceolate. Scape central, round, smooth, naked, green, tapering, from 12 to 15 inches lony and about as thick as a slender riding whip, bearing a closely imbricated spike of pure white scentless flowers with long tubes, sometimes erect, sometimes recurved, outer border of 3 segments, the lower 2 of which are linear lanceolate, the upper about double their size; inner of 3 broad ovate segments alternating with the outer, all pure white, also the anther which is sessile in the centre, and bent from the broad segment of the outer border. Flowers in July and September.
677. ALPINLA. Linn. Monandria Monogyuia.

In nemory of Alpinia, an Italian Physician, who practised at Cairo in the17 th ceutury. Plum. Gen. t. 3. Gaert. Fruct, 1.f. 12.
1449. A. Nutans. Rox. Fora. Ind. 1. p. 65. Globba nutans. Persoons Renealinia nutans. Bot. Rep. t. 360. Rumph. Amb. 6. t. 62. and 63. Bot. Mag, $t$. 1903. Roscoe in Li!m. Trans. 8. p. 346.

Poona Chumpa.-Poon Maga-Nag-Dumnee-Nag-Chumpa.-A very gaudy plant; native of China and the Eastern Islands, common in gardens. Flowers chiefly in the rains, but more or less throughout the year.
1450. A. Allughas. Rox. Flora. Ind. 1. p. 61, Linn. Trans. 8. p. 346. Hellenia allughas. Will. and Persoon. Heretiera allughas, Rext. Obs. Fasc. 6.p. 17. t. 1. Mala inchi kua. Rheed. Mal. 11. t, 14. Bot. Rep. t. 501.

1451. A. Galanga. Rox. Flora. Ind. 1. p. 59. Maranta galanga. Linn. Rumph. Amb. 5. t. 63.

Anomum galanga, Lour. Cochin China. 1. p. 5. where it is cultivated as well as wild, and the fresh roots used to sea=on fish, and other economical purposes. It is the Galanga major of Druggists.

Koolinjana.-The plant is found throughont the Eastern Islands, also in. Southern Concan. N.---Flowers of a pale greenish white.
1452. A. Calcarata. Rox. Flora. Ind. 1.p. 69. Renealmia calcarata. Bot. Rep. t, 421. Globba Erecta Redouté. Liliac, t. 174. Bot. Mag. t. 1900. Bot. Reg. t. 141.

Native of China, found also indigenous in Southern Coll can. N.-.-Flowers. streaked with purple veins, on a yellow ground.

## 1453. A. Cardamomum. Rox Flora. Ind. I. p. 70.

Amomum repens. Rosc. Willd. and Sonnerat. Ellettaria cardnmomum. Maton in Linn. Trans. 10. t. 4. and ó. Sonnerat Ind. 2. t. 136. Rheed. Mal. 11. t. 4. and 5. Rox. Cor.3. t. 226. Buchalan's Journey 2. 336, 510.538 and 3. 22.5. Matonia. Thomson's London Dispensary p. 437. Cardamomum minus. London and Edinburgh Pharm.

Ela.-Ailum cheddy.-Elachee-Elah and Eldorah.-Produces the well known C.rrdamums of commerce; native of the hilly parts of Malabar and Travancore. Introduced at Poway in Salsette, cultivated about Soonda Soopa, south of Dharwar. (Dr. Lush.)

For a particular description of this useful plant, the mode of cultivation \&c. see a paper by the late Dr. D. White, of this Est. in Linn. Trans. vol. 10. p. 229.
1454. A. Nimmonil. G.

Stem 4 or 5 feet high, annual, round, as thick as a slender walking cane; leaves alternate, bifarious, sessile on their stem-clasping sheathes, spikes cadical, just rising above the grouud at alittle distance from the stem. Cap-
$-$
sules dark brown or reddish, fleshy, crowded; have some resemblance to the Lilium bulbiferum when it begins to shoot out of the earth in spring. This plant was first observed by Mr. Nimmo; it grows abundantly iur Luowlee grove near Kandalla, also in the densest part of the jungle clothing the ravines above, and below Sir Herbert Compton's Bungalow; seems to be confined to the thick shade.

## 1455, A. Neesana, G.

Neesum-Has much the appearance of the last, only it is smaller and the leaves are of a darkergreen, with the margins trequently reflected.
The scape, or culm, (for it is jointed, compressed and turnished with sheathing leaves like the Graminea, ) rises at a little distance from the stem to the height of 2 feetor more, and is terminated with a closely imbricated spike, of dingy brown fleshy capsules, which are hid in bractes of a lighter colvur; when broken open they have a peculiar and rather unpleasant smell.
The flowers of neither species have yet been observed.
The hills at Wargaun; the borders of Lanowlee grove, and below bushes and detached trees on the undulating ground about Kandalla. The table land of Mahableshwur. (Dr. Murray.)
678. ZINGIBER. Gaert. Monandria Monogynia.

The plant is eutirely green, even the coma of the spike, hence its specific name. Native of Sumatra, introduced by N.
1472. C. Petiolata. Rox. Flora. Ind. 1. p. 37. Rosc. Scit. Ic. Allied to C. cordata, Wall. Pl. As. Rar• 1, t. 10. Flowers small yellow, leaves heartshaped. Native of Pegu.
1473. C. Parviflora. Wall. Pl. As. Rar. 1. t.75. A neat little flant, the smallest species of the genus, Wall.
1474. C. Strobilina. Wall.
1475. C. Glaucophylla. Wall.
1476. C. Attendata. Wall.

The five last species were introduced by N. from Bengal.
1477. C. Pseudo-Montana. G.

Sinderbur. Sinderwanee or Sliindelwan. Hellownda-Leaves in luxuriant plants from 2 to 3 feet long including the petiole; tapering towards both ends, from 6 to 19 inches broad, quite green.

Scape central, bractes broad rounded, green, with their edges frequently dark, brown or reddish. Cama of a very beautiful dark rose colour, waved. Flowers yellow, of about equal length, with their bractes, 2 or 3 in each.

Bulb or root oblong. From it descend rather stout fibers, bearing at their ends round tubers of the size of a small potatoe. They are perfectly white inside, and are boiled and eaten by the natives when grain is scarce and dear.

This species seems to be nearly allied to Roxburgh's C. Montana. Rox. Cor. 2. t. I51. which has pale yellow palmate tubers.

Mr. Davies C. S. mentions in a Report on the Tanua Collectorate, that it is common for the people to eke out months every year, by living on the tubers of an "Arrowroot plant" which grows common on all the bills, of the Concan, is called Kutchoora (a general name for the whole tribe) and flowers in October. The flowers have not yet been examined, but the plant he alludes to, has more the habit of a Zingiber than a Curcuma.

It grows in great abundance about Malhar, Salsette. (Mr. Vanpell.)
1478. C. Caulina. g.

Chowur-Root or bulb fusiform, biennial. Fibres numerous, tough considerably thickened at their insertion on the root, and bearing large obloug tubers, white inside and yielding an excellent flour; radical leaves, opposite sheathing, short petioled, from 12 to 20 inches long and broad in proportion. Scape or flower bearing stem central, leafy, rising to the height of $\mathbf{3}$ feet and upwards. Lower leaves nearly opposite, upper alteruate; base of the petioles long, runuing down and closely sheathing the stem, frequently tinged with a beautiful red, as is also the strm when stripped of them.

Stem above the uppermost leaves round, naked, green, in length from 3 to 12 inches to the commencement of the bractes which are usually green, large, loose, oval or pointed-Coma white.

Flowers yellow, consid erably elongated beyond: the bractes, outer border of 3 pale yellow or whitish segments, inner of 3 yellow -the uppermost double size of the others and deeply cleft, anther double, erect-spurred standing opposite the large cleft, segment of the inuer border oblong of equal length, ending in a small cup or funnel.

This plant differs from all other known Curcumas in having a stem.
Abundant on the table land of Mahableshwur and noticed by Dr. Murray in Bombay Med. Trans, vol. J.p.87. Flowers in August and October.

Mansutareue-hertaeeons klants-Coutiois much ptanch Panna'. Auster sinule, attureked tothe cone of the pectal fine
 Ytima linear. Cafriulez celled. Serio several nathed. 483. Leaued irncti-lunecalate: acquisuty of the in nas borden of the corial lancealutet bilantate
1479. C. - ?

Bınks of the Kali-nadi river, S. M. Country-discovered by Mr. Law, C. S. 1837.
682. GLOBBA. Willd. Monandria Monogynia.

Said to be the Molucca name.
1480. G. Marantina. Rox. Flora. 1. p. 77. Colebrookia bulbifera. Doni. Hort. Exot. Bot. 2, t. 103.

Native of the Moluccas. Flowers in terminal spikes, slender, bright yellow. They are by no means fragrant as stated by Roxburgh. N.
1481. G. Careyana. Rox. Flora. Ind. 1. p. 80. Bot. Cab. t. 691.

Flowers small, of a deep orange colour, racemes terminal bulbiferous; quative of Pegu.
1482. G. Expansa. Wall.

All the three species were introduced by $\mathbf{N}$.
The Scitaminece recommend themselves to notice not only on account of she curious structure and beauty of their flowers, but also for the valuable medicinal and ecenomical properties which the seeds and roots of several of them posses.

## ORDER 139. MARANTACEA.

The Arrow Root tribe. Lind. nat. syst. p. 267.
683. CANNA• L, Monandria Monogynia.

From the Hebrew, for a reed or caue. Lam. Ill. v. 1, t. Gaert. Fruct. v. I.. 4. 12.
1483. C. Indica. Rox. Flóra, 1. p, 1.-C.indica. Var. rubra. Aiton. Hort. Kew. C. coccinea, Roscoe Bot. Mag. t. 454.-Katu-bala. Rheed. Mal. 11. t. 43. Bot. Cab. t. 739. Canuacorus. Rumph. Amb. 5. t. 71.f. 2. Moris Hist 3. $t \cdot 14 . f$. 1. and 6. Bot. Reg. t. 776.

Dewa-Keli.--Nana-Keli.-Vana-Keli.-Surba-jurga.-Krishna tamara,Akulbuera.

Common Indian Bead. or Shot; so named from the resemblance the seeds have to small shot.

In gardens every where, and in flower the gratest part of the year, native of Asia, Africa and America. Its leaves are used to thatch houses with in Cayenne. The seeds dye a beautiful but not a durable purple. Rees. Cyc. in loco.
1484. C. Flaccida. Roscoe. Scitam, Ic. Dill. Elth. t. 59.f. 60. Salisb Icon. $t .2$.

A native of moist places in Carolina,-introduced.-A distinct species from C. glauca. See Roscoe in Linn. Trans.11. p. 272. -The flowers are large, of a very pale yellow, in short thick spikes.
1485. C. Glauca. Linn. Smith's Exot. Bot. t. 102. Bot. Mag. t. 2302 V ar rufa, buff-colored, and $t .3437$. Var. rubrolutea. yellow with red spots introduced by Dr. David White in 1815.
Common in gardens, a native of South America and the West Indies.
1486. C. Latifolia. Roscoe. C. gigantea. Sims. Bot. Mag. t. 2316. Bot. Reg' $t$. 206. Redoute Liliac. $f .331$.
Stem 3 or 4 feet high, flowers Scarlet.
1487. C. Speciosa. Roscoe. Bot, Mag.t. 2317. Nepaul Canna.
1488. C. Lutea, Roscoe. Linn. Trans. 8, p, 338. Bot. Mag, t. 2085. Bot. Feg. t. 773. Yellow Indian Canna,

## 1489 . C. Nepaulensis. Wall.

The most beautiful of the genus. Bombay is indebted for the three last aamed species to Mr. Nimmo.
From the root of a species of Canna a nutritious aliment has been lately prepared; peculiarly fitted for invalids from the very small tendency it has to acescence. (Dr. Gibson.) See Med. Chir. Review for 1837.
684. Maranta. l. Monandria Monogynia.

In memory of Maranti, a Venetian physician, in 16th century. Lam. Ill. 1. $t$. 1 .
1490. M. Zebrina. Sims. Bot. Mag. t. 1926. Calathea Zebrina. Liud. Bot. Reg. t. 385.

Striped-leaved Maranta;-A rative of Brazil;-introduced by N. The flowers of this species are very beautiful.
1491. M. Ramosissima. Wall. As. PI. Rar. 3. t. 286.

A native of Silhet, and introduced by N. from Bengal.
"Has numerous long clavate tubers, and much resembles the West India arrow-root:" Wall. Hort. Soc. Gar. from Dr. Lush at Dapoorce, The dry air of the Deccan in the cold season seems to affect its developement. (Dr. Gibson.)
685. PHRYNIUM. e. Monandria Monogynia.

Phrunos-a toad, (Aristoph. in Plautus.) an inhabitant of marshy places:name given in allusion to the habitat of the plants.-Or from Phrynion, a kind of dry or hard plant. (Roscoe.)
1492. P. Eapitatum, Rox. Flora. 1. p. 8.

Naru-killa. Rheed. Mal. 11. t. 34. Asiat. Res. 11. t. 3. Plyllodes placer-
taria. Lour. Cochin China. 1, p. 13. who says, puddings (cibaria) are rolled up in the leaves, and so boiled, to give them colour and grateful flavor.

Kudali---Flowers in sessile heads, bursting from the jointed petioles, in the manner of the Pontederia.
1493. P. Dichotomum. Rox. Flora. 1. p. 2.

Tealia cannoformis. Will, Rumph, Amb, 4. t.7. Donax arundastrum, Lour. Cochin China. 1. p. 11.

Mookta-patee---Patee---A very elegant shrub, native of India, the Eastern Islands and New Hebrides. The flowers are in terminal racemes; large, pure white. Introduced from Bengal by N.

ORDER 140. MUSACE E. Sweet's Hort. Birt. p. 392.
The Banana Tribe. Lind. Nat. syst. p. 268.
686. MUSA. L. Polygamia Monoecia.

Said to have been named by Plumier, in memory of Musa, a Freedman of Augustus. Should not such an unmeaning name be rejected and the proper classic one "Platanus" be given?-Linnaeus' Platanus is no better entilled to the distinction than a hundred other trees which afford equal shade. This is on accouut of its large and broad, platus, leaves. Gaert. 1. t. 11. Lan. 3. t. 836 and 837.
1494. M. Sapientum. Rox Flora. 1. p. 663- Bata. Rheed. Mal. 1. t. 12. 13 and 14. Mussa. Rumph. Amb. 5. t. 60 and 61? M. Paradisiaca. Linn. Arbor Pala. Pliny's Nat. Hist, Book 12, s, 12, Hamilt, in Jim. Trans, 13.
p. 376. Ainslie. Mat. Ind. 1. p. 316. Rox, Cor, 3. t. 275.

Khela.-The common Plantain; in season all the year round, and deserving of Thomson's praise.

> "The pride
> Of vegetable life, beyond what e'er
> The Poets imag'd in the "Golden Age"
> Eve first saw Adam "under alatan"
> " Wut follow Strat could I do do
> Thinht, invisibly thus led?
> Till I espyd the fair indeed and tall,
> Under a platan"

## Paradise Lost. Book 4.

The plantain is said to have the peculiar property of cooling the air where it is grown to any extent. The stems are used in Siam for purifying Su-gar;-an elegant substitute for the clay of the West Indies. (Dr. Gibson.)

A green fruited variety is cultivated about Bassein, and a red one in Bombay Gardeus.
1495. M. Textilis? Marsden's Sumatra. Eusatte? Bruce's Travels. 7. t. 8 and 9. M. troglodytarum Sykes.

Ran-khela-Cowdera.-In almost stemless plant which dies away to the ground every season.
Common on the Ghauts and hilly parts of the Concau during the rains. The leaves are used for thatching houses, and for plates by the natives.
They strip the bulb or stem of leaves and hoil and eat it. It is also dried and pounded imo a kind of flower of which cakes are made. (Mr. Davis, C. S.)

Dr. Gibson mentions, that owing to the scarcity of rain last season, the poor people about Hurrychundarghur, have ran short of grain and subsisted entirely for the last 2 montis (May 9, 1839;) on the inner rind and heart of the bulb of this plant.
687. URANIA, L. Hexandria Monogynia.

The name of one of the Muses "Descend from heaven, Urania by that name. If rightly thou art called"-(Milton) Inappropriately applied by Schreber to this plant, on acconnt of its connection with Musa, surely not the Freedman of Augustus.-Ravenala. Lam. III. $t$. $2 \geqslant 2$.
1496. U. Spectosa. Rox. Flora. 3. p. 114. Ravenala Madagascariensis, Sonn. Voy. t. 124, 125 and 126. Jacq. Schoenb. 1. t. 93.

Plantain leaved Urania.-A very elegant tree with leaves like the Plantain, but with the solid trumk of a Palm. The leaves are very large and form a semicircular head, like an open fan. Parell Garden-It is a native of Madagascar.-The fruit is of a beautiful blue colour. The juice of it is used for dying.

## 688. HELICONIA. l. Pentandria Monogyuia.

Helicon.-Mountain of the Muses; so named on account of its connection with Musa;-another inconsistency, as the Freedman of Angustus is said to give name to Musa.
1497. H. Buccinata. Rox. Flora. 1.p. 670. Rumph. Amb. 5. t. 62. f. 2.

A stemless plant with large lanceolate glossy leaves from 2 to 4 feet long and about one broad, with sheathing petioles from 3 to 6 feet long. -Native of India aquosa. intd, by N, in 1833,
689. STELITZLA. H. K. Pentandria Monogynia.

Named by Sir Joseph Banks, in honor of Charlotte, Queen of Georye 3rd who was of the House of Mecklenhurgh Strelitz.
1498. S. Regine. Sprengel's syst. 1, p. 833. Redoute Liliac. t. 77 and 78. Aitn's Hort. Kew. 1. p. 285. t. 2.

A stemless plant with showy flowers and the habit of a plantain. Intd. from the Cape of Good Hope by Mr. Geo: Noton in 1833. It had been previously intd. by N.

This small tribe is very valuable to man.

## ORDER 141. IRIDEEE. Loudon's Hort. Brit.p. 537.

$$
\text { The Corn Flag Tribe, Lind. nat. syst. p. } 260 .

709. SANSEVIERA. Thunb. Hexandria Monogynia.

From Sansevier, a Swedish Botanist.
1536. S. Zeylanica. Rox. Flora. Ind. 2. p. 161. Katu Kapel. Hort. Mal. 11. t. 42. Cor. Pl. 2. $\boldsymbol{t}$-184. Bot. Reg. t. 160. Moorva, As. Rer. 4. p. 271. Pluk. $t$. 256. fig. 5 Bow-string hemp. A cordage plant. Gardens, rare.
710. ALOE. L, Hexandria Mouogynia.

From alloeh.-it's Arabic name. Lam, 111. t. 236. Gaert. Carpology, t. 17.
1537. A. Perfollata. Rox. Flora. Ind. 2. p. 167. Kadenaku. Rheed. Mal. 11. t. 3. Bot. Mag. t. 472? Taruni, Asiat. Res. 4.p. 272, Dill. Elth. t. 17. fig. 19. Kuar pur common in Gardens.
1538. A. Soccotrina. De Cand. Bot. Mag. 1474.

Hort. Siociety's Gardens, Intd. from Soccotra.

## ORDER 145. DIOSCORIN E .

## The Yam Tride. Lind. nat. syst. p. 278.

7II. DIOSCOREA, L. Dioecia Hexandria.
In memory of Pedacias Dioscorides, a Greek physician. Gaert. 1. 17. Lam. Ill, t. 8!8.
1539. D. Sativa. Willd. 4. p. 795. Mu-Kelengue. Hort. Mal. 8. t. 51. Olus sanguinis. Rumph. Amb, 5. t. 180.

Common Yam; cultivated.
1540. D. Globosa. Rox. Flora. Ind. 3. p. 797.

Tubers round white; cultivated.
1541. D. Alata. Rox. Flora. Ind. 3. p. 797. Katsji Kelengu. Hort. Mal. 7. t. 38. Ubium digitatum. Kumph. Amb. 5. t. 121. and 5. fig. 1. 22. Stems and petioles winged. Wild in both Concans-
1542. D. Aculeata. Rox. Flora. Ind. 3. $p$ 800. Cumbilium, Rumph. Amb. 5. t. 126. Kata Kelengu. Rheede's Hort. Mal. 7.t.37. The Pidava Kelengu. Rheede 7. $\boldsymbol{t} 51$ and 52.noticed by Rumph. as a variety of his plant, seems to be a Mermuid with the foliage of a Dioscorea, and the flowers of a Clematis?

Goa Potatoe-a very useful esculent, common in Bombay, tho' not grown here, but imported from Goa \&c.
1543. D. Triphylla. Willd. 4. p. 790. Rox. Flota. Ind. 3. p. 805. Tsiager nuren. Hort. Mal. 7. t. 33. Ubium Sylvestre. Rumph, Amb. 5. $t, 128$, Jacq. Ic. Rar. $\boldsymbol{t}$. 627.

Mar-chaina.-The root isintoxicating and intensely bitter, and is often resorted to for the purpose of rendering Toddy more potent, by infusing a few . slices of it in that liquor or sap contained in the Calabash usually employed for holding it. N. common in both Concans.
1544. D. Pentaphylla. Willd. 4.p. 789. Rox. Flora. Ind. 3. p. 806, Nureni Kelengu. Hort, Mal. 7. t. 35. Ubium quinque foliam. Rumph. Amb. 5. t. 127.

Shendorvail-chand-and oolsee,--Flowers which appear in October are greenish white and exquisitely fragrant. The male flowers are sold in the Bazar and eaten as a green, and are said to be very wholesome and resemble
in flavor fish-rocs. The tubers are large, and dug up in November and used as an esculent by the natives. (Mr. Davies. C. S.) Common in the Ghauts, and in both Concans.
1545. 1). Bulbifera. Willd. 4. p, 793. Katu Katsil. I heed, Hort. Mal, 7. t. 36. Ubium pomiferum. Rumpl. Amb. 5. t. 124. Pluk. Alm. 220. f. 6. Sal. Par. Lond. t. 17.

Caroo-carunda.-The flowers and roots are eaten by the poorer classes; the latter are very bitter, but after undergoing the process of being covered over with ashes and steeped in cold water, to edulcorate them, they become edible. There is a variety which does not demand this preparation, as being naturally sweet. Both Concans.
1546. D. Oppositifolia. Rox. Flora. Ind. 3. p. 804. Petiv. Gaz.t. 31. fig. 6. Mar Paspolee.-Leaves simple, ovate. Mahableshwur. Dr. Murray; on the Ghauts about Khandalla.

Some of the species are extensively cultivated in the West Indies for their roots. The flowers appear after the rains in long cord-like spikes or racemes, suspended from the trees round the branches of which the plants twine.

## ORDER 146. SMILACEA.

The Smilax Tribe. Lind. nat. syst. p. 277.
712. SNILAX. L. Dioecia Hexandria.

From Smile-a scraper, in allusion to the prickly stems, or perhaps 'from Smilax, Bindueed, (Aves. 215) alluding to the twining habit of the plants. Gaert. 1. t. 16. Lam. Ill. t. 817.
1547. S. Ovalifolia. Rox. Flora. Ind, 3. p. 794. S. Zeylanica. Willd. 4. p. 775. Kari Vilandi. Rheed. Hort. Mal. 7. t. 31. China Amboinensis, Rumph. Amb• 5. t. 161.

Gootee wail-a scandent armed shrub. Deccan and Concans.
1548. S. Macrophylla. Rox. Flora. Ind. 3. p. 793.

Salsette and Concans, N.

## ORDER 147. ASPHODELEA.

The Asphodel tribe. Lind. nat. syst. p, 273. Loud. Hort. Brit. $\dot{p} .539$,
713. ASPHODELUS. L. Hexandria Monogynia.

Compounded of $a$-privative and sphallo - to supplant; the flowers not being surpassed by others in beauty.
1549. A. Clavatus. Rox• Flora. Indica. 2. p.148. Common in corn fields about Admedabad. Mr. Law.
" The Asphodelwas planted by the ancients near burial places, in order to supply the manes of the dead with nourishment" Johnson. Pope alludes to the custom in his St. Cecilia.
"By those happy souls who dwell in yellow meads of Asphodel"
714. ANTHERICUM. L. Hexandria Monogynia,

Anthos-flower-herkos-a hedge; a name applied by Greeks to the stem of the Asphodel. (Loud.) Lam, 1ll. t. 240.
1550. A. Tuberosum. Rox. Flora. Ind. 2. p. 149. Cor. Pl. 2. t. 138, Flowe ers in the beginning of the rains, Tubers edible, Both Concans,
1551. A. Nimmoni. G,

A larger species than the above, panicle radical, large diraricate; reclinate. Leaves lanceolar, smooth, glossy. Flowers white, appear later in the rainy season than the above. S. Concan. N.
715. BULBINE. W. Hexandria Monogynia.

From Bolbos-a bulb. Gaert. 1. t. 13.
1552. B. Floribundum. Ait.

Dapooree, intd. from the Cape. Dr. Lush.
716. ORNITHOGALUM. L. Hexandria Monogynia.

From ornis-a bird-gala-milk; Gaert. 1. t. 17. Lam. Ill. t. 242.
1553. O. Pyramidale. L. Willd. 2. p. 121. Jacq. Ic. Rat. t. 425.
1554. O. Longibracteatum. Jacq. Willd. 2 p. 120. Jacq. Hort. Vind. 1. t. 29.

Intd. from the Cape at Dapooree. (Dr. Lush.)
1055. Thyrsceides. Willd. 2. p. 124. Jacq. Hort, Vind. 3. t. 28. Bot. Mag. 1164.

Intd. from the Cape at Dapooree. (Dr. Lush.)
717. SCILLA. L. Hexandria Monogybia.

From skullo-to injure; the poisonous quality of the roots of some of the species. Lam. Ill. t. 238.
1556. S. Indica, Rox. Flora. Ind. 2. p. 147.

Erythronium Indicum. Rottl.-Jungle Peaz, country squill, being usually employed as a succedaneum for the true squill. Comman on the sandy shores of both Coucans.

71s. LACHENALIA. Jac. Hexandria Monogynia.
In honor of W. de la Chenal of Switzerland, a Botanist of celebrity.
1557. L. Pendula. Willd. 2. p. 180. Jacq. Ic. Rar. 2.f. 396, and 400. Bot. Mag. 590.

Dapooree, Intd. from the Cape. (Dr. Lush.)
719. LEDEBOURIA. Roth. Hexandria Monogynia.

Named after Ledebour, author of Flora Altaica and Russian Counsellor of State.
1558. l. Hyacinthina. Spr. 2. p. 97. Bot. Mag. t. 3226.

Boe-kunda. -Tho' quoted as a synonym. for the Erythronium indicum (Scilla Indica of Rox.) it is quite distinct from it, and seems rather to appertain to the Asphodelœ than the Smilacinae under which it is ranked in the Bot. Mag. by Boyle. Both Concans, with 2 or 3 other undetermined species. N.
720. ALLIUM, l, Hexandria Monogynia,

From the Celtic. all-signifying hot, in allusion to the acrid propertiee of the bulbs. Gaert. 1.t. 16. Lam. Ill. t. 242.
1559. A. Ascalonicum. Rox. Flora. Ind. 2. p. 142. Moris' Hist. 254. f. 14. fig. 3. The Shallot, cultivated.

1560, A. Cepa. L.
Piaz-common onion, for the cultivation of which Bombay has long been famed.
1561. A. Sativum. L. Rox, Flora. Ind. 2. p, 142, Lobel. Il, $t, 158$, Morris'. Hist. 4. t. (5. fig. 9.

Lussun,-Gaslic, cultiyated,
1562. A. Porrum. I. Rox. Flora. Ind. 2.p. 141. Black. 421. Khorat. Leek, cultivated, but to a small extent.
721. DRAC.ENA. L. Hexandria Monogynia.

From drakon.-a Dragon, in reference to the likeness the inspissated juice has to Dragon's blood, a well known resinous substance. Lann. III. t. 219. Gaert. Carp. 1.t. 16.
1563. D. Ferrea. L. Rox. Flora. Ind. 2. p. 156. Bot. Mag. 2053.

Terminalis rubra. Rumph. Amb-4.t. 34 fig. 2. Red Liliac $\ell .91$. The leaves of a reddish or ferruginous hue. Common in Gardens. Intd. from China.
1564. D. Maculata. Rox. Flora. Ind. 2.p. 157.

The leavesare marked with yellow spots. S. Concan, with two other undertermined species. N.
1565. D. Mauritiana?

Seeds resembling blue beads. Parell Garden.
722. ASPARAGUS. L. Hexandria Monogynia.

From sparasso - to tear, in allusion to the prickles with which some of the species are armed. Gaert. Fruct. I. t. 16. Lail. Ill, t. 249.
1566. A. Sarmentosus. L. Willd, 2. p. 155. Rheed. Hort, Mal. 10. t. 10.

Satavree - a pretty scandent armed shrab, with linear leaves, and small white flowers in racemes. In Gardens as an ornamental plant. Deccan and Concans. The roots are often candied, in which state they are often brought from Clina.
1567. A. Officinalis. L. Rox. Flora. Ind. 2. p. 150. Eng. Bot, t. 339. Blackwell. t. 332.

Common asparagus, cultivated.

## ORDDR 148. TULIPACE E.

## The Tulip Thbe, Loudon's Hort. Brit. p. 539.

723. YUCCA. L. Hexandria Monogynia.

The St. Domingo name, Gaert. Carp. 2, t. 85.
1568. Y. Gloriosa. l. Sprengel. 2. p. 41. Bot. Mag. t. 1260. Adam's needle. In Gardens, where it seems to be quite naturalized; flowers in the rains when the large panicle has a very showy appearance, being covered with white blossoms.
1569. Y. Aloifolio. l. Sprengel. 2, p. 41. Bot. Mag. t. 1700.

Intd. at Dapooree, (Dr. Lush.)
724. GLORIOSA. L. Hexandria Monogynia.

From gloriosus-magnificent, in allusion to the beanty of the flowers. Gaert. Fruct. l. $t .18$.
1570. G. Superba. L. Rox. Flara, Ind. 2.p. 143. Mendoni Rheede. Hort. Mal. 7. t.57. Bot. Reg. t.77. Pluk. Alun. t. 116. fig. 3. Darwin's loves of plants.

Buchnag-kalawee-indoii-karianag. The Superb Lily. A very accurate appellation, for, tho' common, it is one of the most gaudy and beautiful flowering creepers we have. The flower lasts seven days without drooping, and undergoes during that time various change of colour. The plants spring, up only during the rains, and its tuberous root is accounted poisonous.

Common in Guzerat and Concans, Mahableshwur. Dr. Murray.

## ORDERS 149. MELANTHACE E.

The Colchicum Tribe. Lind. Hort Brit. p. 539.
725. ANGUILLARIA. R. Br. Hexandria Monogynia.

From anguilla-an eel; the application not obvious.
1571. A. Indica, Sprengel, 2. p. 146. Melanthium Indicum. Willd. 2: p. 268. Wall. Pl. Asiat. Rar. 3. t. 259. Melanthium racemosum and Caricinum? Roth.

Mar-kullai-A small plant, springing up during the rains. Concans. N. Kandalla.

## ORDER 150. BROMELIACER.

The Pine-Afple Tribe. Lisd. Loud. Hort. Brit. p. 539.
726. AGAVE. L. Hexandria Monogynia.

From aganos-admirable, stately ; in reference to the appearance of the plant. Lam. Ill. t. 235.
1572. A. Cantula. Rox. Flora. Ind. 2 p. 167. Aloe Americana. Rumph. Hort. Amb. 5. t. 94.

A stately Aloe-looking plant. The central scape rising to the height of 15 to 20 feet, flowers in the rains. In Gardens, Bombay, Seroor. There is a variety with long flexuous leaves. The seed germinates in the capsules before they drop off as in A. vivipara.
727. BROMELIA. L. Hexandria Monogynia.

So named by Linnaeus in memory of Bromel, a Swedish Naturalist. Gaert. Carp. 1. t. 11 Tourn. Inst. t.426. t. 428, Lam, Ill. t. 223.
1573. B. Ananas. Rox. Flora. Ind. 2. p. 116. Bot. Mag. t. 155t. Kapa-tsjakka. Rheed. Hort. Mal. 11. t. I. and 2. Rumph. Hort. Amb. 5. $t$. 81. The well known Pine-apple, cultivated in Gardens.

## ORDER 151. PONTEDEREA.

$$
\text { Lind. nat, syst. p. 272. Loud. Hort. Brit. p. } 540 .
$$

728. PONTEDERIA. L. Hexandria Monogynia.

In memory of Pontedera, a Professor of Botany at Padun. Lam. Ill. t. 225.
1574. P. Vaginalis. l. Rox. Flora. Ind. 2. p. 121. Carimgola. Rheede. Hort. Mal. 11. t. 44. Rumph. Hort. Amb. 6. t. 75. fig. 1. Rox. Cor. Pl. $2 \cdot$ t. 110. Pluk. Alm. t. 215. fig. 4.

Leaves cordate on long petioles from which the racemes of pretty blue flowers burst. Rice fields and margins of Tanks. Concans. N.
1575. P. Hastata. L. Rox. Flora. Ind. 2. p. 121. Cor. Plants. 2. t. 111. Pl. Alm, t. 220. fig. 8, Moris. Hist. 3. S. 15. t. 4. f. 7. Found in similar sitution with the above. N.

## ORDER 152. XYRIDEA.

Lind. nat. syst. p. 255,
729. XYRIS. L. Triandria Monogynia.

From xyros-acute, pointed; in allusion to the shape of the leares, Gaert. Fruct. 1• $t, 15$, Lam, Lil, t. 36.

1588. C. Avenaefolia. G. Leaves sprinkled with hairs, sheaths hairy. Involucre truncate. In the deuse parts of the jungle at Kandalla,

1589, C. Nimmoniana. G.
A small plant with discoloured linear pointed leaves.
Malabar Hill on the bare rocky parts; in the crevices of rocks in the vicinity of Rosa and Elora. All the species are annuals with pretty blue Howers which withdraw themselves during the day into their curiously shaped involucres. Two or three other species remain to be determined and described hereafter.

## ORDER 155. PALME.

## The Palm Tribe. Lind. nat. syst. p. 279. 80.

© Palms, the splendid offspring of Tellus and Phoebus, chiefly acknowledge as their native land those happy regions seated within the tropics, where the beams of the latter for ever shine". Von Martius.
733. CORYPHA. I. Hexandria Monogynia.

Takes it's name from Koryphe, the top or summit; in allusiou to the uppermost leaves or frouds which form immeuse faus. Gaert. I t.7. Lam. Ill. t. 899.
1590. C. Umbraculffera. l. Rox. Flora. Ind. 2. p. 177. Codda panna. Rheed. Mal. 3. t. 1. t. 12. Kumph. 1, t. 8.

The Talipot Palm of Ceylon. The leaves are used for writing on with an iron skewer. For an account of this curious Palm, see Knox's Hist. of Ceylon. Intd. by N. in 1833.
734. TALIERA. Mart. Hexandria Monogynia.

It's vernacular name in Bengal.
1591. T. Bengalensis. Sprengel.Corypha, Taliera. Rox. Flora. Ind. 2. p. 174. Cor. Plants. 3. t. 255. 256.

Intd. by N. 18i33. What is the Corypha elata of Bombay in Messrs. Loddige's Palmarium at Hackney! see Gardeneı's Magazine. Vol. 1. p. 137.
735. PHOENIX. L. Dioecia Hexandria.

The Greek naine of the date. Lam. Ill. t. 863. Gaert. Fruct. 1. t. 9.
1592. P. Dactylifera. l. Rox, Flora. Ind. 3. p. 786. Kaemp. 686. t. 1. 2. Kajooree-the Date Palm. Deccan. Col. Sykes. Baroda. N.
1593. P. Sylvestris. Rox. Flora. Ind. 3. p. 787. Elate Sylvestris, Linu. Katou-indel. Rheed. Mal. 3. t. 22 to 25,

Sindee-Wild Date, common throughout India.
The Ta baia tou phoinicon mentioned in St. John's Gospel were probably the fronds of the Date palm.

Baia is an Egyptian word, denoting a leaf or frond, not a branch. Park. Lexicon.
736. HYPHENE: Gaert. Dioecia Hexandria.

From Hyphaino--to entwine; alluding to the fibres on the fruit. Gaert. Carp. 2. t. 82. Lam. Ill. t. 900,
1594. H. Coriacea. Sprengel. Hyphaene Crinita, Gae. Cucifera. Thebaica, Delil.

The Doom palm of Egypt. Intd. by. N. 1828; by Mr. Maccullough. 1837.
For an outline of this palm see Ld. Valentia's royages Vol, 4. Pl. Watch tower between Mocha and Musa.
737. AREC.1. L. Monoecia Hexandria.
said to be the Malabar or Malyalum name latinized. Gaert Fruct. 1. $t$. 7. Lam. Ill. t. 895.

Foflee-sooparee-The Betel nut palm. A very handsome and gracoful tree, commonly cultivated.
1596. A. Gracilis. Rox. Flora. Ind. 3. p. 619. A small species, wild in S. Concan. N. The Cabbage palin rendered classical by the story of Paul and Virginia is the Areca oleracea.
738. COCOS L. Monoecia Hexandria.

Derivation of the bame precarious. Gaert. Fruct. 1. t, 5 and 6. Lam. Ill, t. 894.
1597. C. Nucifera. l. Rox. Flura. Ind. 3. p. 614. Tenga. Rheed. Hort. Mal 1. t. 1. to 4. Caluppa. Rumph. Amb. 1. t. I, and 2. IRox. Cor. P1. 1. t. 73. Asiat. Res. 4. p. 312. Trans. Wern. Society vol. 5.

Nariel-common Cocoanut tree, the most prominent ohject in an Indian landscape near the sea, perhaps the most useful in domestic ecoaomy and the arts, next to the Elais Guineensis.
" What glorious palms on Goa's isle I see, Their blossoms spread great Albuquerk, for thee."

Lusiad, Book 10.
Amid a thousand strange and lovely shapes,
The lofty palm, that with its nuts supplied
Beverage and food, they edged the shore and crowned
The far off mountian summits, their straight stems
Bare without leaf or bough erect and smooth,
Their iresses nodding like a crested helm,
The plumage of tie grove."
Southey's Madoc. Book 5.
739. LICUALA. Thun. Hexandria Monogynia.

Said to be the native or vernacular name in the Molnceas. Gaert. Carp. 2. \&. 139.
1598. L. Spinosa Thun. Rox. Flora Ind. 2. p. 181. Rumph. Amb. I. t.9. Licuala arbor. Corypha Licuala. Lam, 2. p. 131. Daporee. Intd. by Dr.Lush.
1599. L. Peltata. Rox. Flora. Ind. 2. 179. Intd. by N.
740. CALAMUS. L. Dioecia Hexandria•

From the Arabic for a reed, which the plant resembles. Gaert. Fruct. 2. t. 139. Lam. Ill, t. 779.
1600. C. Rotang. l. Rox. Flora. Ind. 3. p. 779. Tsjeru tsjurel, Rheed. Mal. 12. t. 64. Rumph. Amb. 5. t. 55. f. 2?

Bet-A scandent plant. whose flexuous stem is the well known Rattan. S. Concan N. Ram Ghant. Mr. Lush.

1601 C. Rudentum. Lour. Rox. Flora. Ind. 3. p. 776. Sprengel. 2. p. 1. Palma juncus albens, Rumph. Hort. Amb. 5. t.53. Common calamus or Rattan Cane.

In Gardens at Seroor, probably introduced from the Eastern Islands.
741. CARYOTA. L. Monoecia Polyandria.

The Greek name of a kind of Date, from which a strong wine was obtained, whigh soon went to the head, Kara. Gaert, Carp. 1. 1, 7. Lam. Ill. t. 897.
1602. C. Urens. l. Rox. Flora. Ind. 3. p. 625. Schunda pana. Rheed. Mal. 1.t. 11. Saguaster Major. Rumph. Amb. I. t. 14.

Bherlee-mhar-Another stately palm, and perhaps the most ornamental of the whole tribe with it's long pendulous clusters of dark red succulent berries, which are very acrid. The pith yields a species of Sago, and the sap or toddy is in common use in the Deccan for the purpose of yeast for raising or fermenting bread. Buchanan says, the trunks are the favorite food of Elephants. Common on the Ghauts aud Concans. In Gardens, Bont-: bay.
742. GOMUTUS. Rumph. Monoecia Polyandria.

The Malay name, which has it's root in the Arabic Chamuta.
1603. G. Sacchar'fer. Sprengel. 2. p. 624. Sagaerus. Rumphii Rox. Flora. Ind. 3. p. 626 Gomutus gomuto. Rumph. Amb. I.t. 13. Bqasus gomutus. Lour. Cochin. 759. Aringa Saccharifera. Labillardiere.

Bhirlee-A very stately palm with the aspect of the Cocoanut tree, but with leaves considerably larger. The pith affords tolerably good Sago, the sappalm wine and sugar, and the black horse-hair like fibres of the trunk are converted into excellent cordage. It merits extensive cultivation. See Marsden's Hist. Sumatra, and Crawfurd's Ind. Archipelago.

Near Cawasjee Patell's Tank. Intd.
743. BORASSUS. l. Dioecia Hexandria.

A name applied to the spatha of the date tree. Lam. Ill. t. 898. Gaert. Carpology. 1.t. 8.
1604. B. Flabelliformis. l. Rex. Flora. In. 3. p. 790.
Carim pana-Rheed. Hort. Mal. 1, t.9. female.
Anpara ..... ........... ib. 1.t. 10. male.
Lontarus domestica Rumph. Hort. Amb. 1. t. 10.
Rox. Cor. Plants. 1. t. 71. and 72. Asiat. Res. 4. p. 311.
Tarh.-Palmyra or Brab tree. The loftiest of it's tribe on this side of
India and perbaps the most productive.
This majestic Palın delights in elevated and hilly situations, and its
crown waves slowly over the silent roof and cottage which it overshades,
like a symbol of peace and tranquility. It is justly styled by Grainger
"fair Palmeto, the chief of palms and pride of Indian grove." The ancient
Tud-mor or Palmyra takes it's name from this noble palm. See 1st Kings,
chap. 9. and Gibhon's Rome. 2. p. 32.

## 1605. B. Dichotomus. White.

Oka-mundel, covers the whole of Diu Island, and is also found in various parts of Goozerat. Mr. Vaupel.

A solitary tree grows on a Hill at Mazagon, and it is branched like the Doom palm. The fructification has not been examined. See a sketch of the tree, Madras Journal of Science. N.

The Palin family are very useful to man. The very peculiar and striking effect in the picture of a landscape produced by their towering stems and waving crowns, or the beauty and majesty of the proud forms of these ancient denizens and incomparable oruaments of the forests, no language can describe, especially the Brazilian species.

## ORDER 156. PANDANEE. Sweet's Hort. Brit. p. 377.

The Screw-Pine Tmibe. Lind. Nat. syst. p. 284.

744. PANDANUS. L. Dioecia Monandria.

Said to be derived from the Malay name, Pandang, Lam. t. 798,
:606. P. Odoratissimus. Rox. Flora. 3, p. 738. Rox. Cor. t. 94,95 and 96. Asiat. Res. 3. p. 161. Kaida. Rheed. Mal. 2. t. 1, 2, 3, 4 and 5, 6, 7 and 8. Rumph. Amb. 4. t. 74 and 75 Keura odorifera. Forskol.

Keura, or Keura-ka-khet.-An elegant shrub, from 6 to 10 feet high, with fusiform roots issuing from the stem. Leaves from 3 to 5 feet long; at the extremities of the branches, drooping, smooth and shining;-the margins and back armed with sharp spines. Flowers white, very sweet scented. They are generally sold in the Bazars.

Pretty common among the Cocoa-nut trees in Mahim wonds:-on the sea Beach at Elephanta \&c. In a ravine near Parr, but probably planted. Snakes are said to be very fond of this plant, and when in a low bushy form, as it may be frequently met with, to lurk among its leaves. It is possible the flowers may attract them.

Matting and package bags are made from the leaves of this plant in the Mauritius. Loureiro says hedges are made of it in Cochin China, and that it is also used for feeding tame Elephants, Lour. Cochin China. 2. p. 603.

## ORDER 157. TYPHINE. Sweet's Hort. Brit. p. 372.

The Bulrush Tribe. Lind. Nat. syst. p. 285.
745. TYPHA. L. Monoecia Triandria.

From typhos-a marsh; in allusion to the place of growth of the plants. Gaert. 1. t. 2.
1607. T. Elephantina. Rox. Flora. 3. p. 566.

Elephant grass.-Culms round, smooth, glossy, jointed at the insertion of the leaves, from 6 to 10 feet high. The margins of tanks and in the beds of rivers throughout the Concans. N.

It is called Pauna grass, in Scinde, and is of great importance for binding the soil on the banks of the Indus, with its long tortnous roots, of which great care is taken, when the culms are cut down, to make matting of. They are also tied in bundles and used like sedges (Sparganium ramosum) in England, as buoys to swim with. (Dr. Heddle's Mss. Report.)
1608. T. Latifolia. Willd, Spec. 4. p. 197. Moris. Hist. 3. s. 8. t. 13. f. 1. English Botany t. 1455 . Lour. Cochin China. 2. p. 552.

Jungly Bajree.-Cats tail. A handsome grass-like plant. The Deccan. (Dr. Gibsou.) Perhaps this is identical with Roxburgh's $\boldsymbol{T}$. angustifolia. Linuæus informs us the roots hare sometimes been eaten in Sallads. N.

## ORDER 158. ROXBURGHIACEE.

## The Roxburghia Tribe. Wallich.

746. ROXBURGHIA. Dryander. Octandria Monogynia.

Dedicated to Dr, Roxburgh, the well known author of Flora Indica \&c.
1609. R. Gloriosoides. Rox. Flora. Ind. 2. p. 234. Cor. Pl. 1. t. 32. Bot. Mag. $t$. 1500 . Rumph. Amb. 5. t. 129. Ubium polypoides. See another species. Wall. Pl. Asiat. Rar, p. 282. Koxburghia viridifora, or Stemona tuberosa. Jour. 2 p. 404. The affecting anecdote counected with this "uncommonly curious and beautiful plant" is well known, Intd, by N .

## ORDER 159. AROIDE 胥. Swett's Hort. Brit. p. $37 \%$.

## The Abum Tribe. Lind. Nat. syst. P. 285.

747. ARUM. L. Nonoecia Polyandria.

Supposed to be derived from the Egyptian language. Gaert. 2. t. 84. Tourn. t. 69.
1610. A. Colocasia? Rox. Flora. 3, p. 494. Ramph. Amb. 5. t. 109. Catesby's Carolina. 2. t. 45.

Stemless with peltate leaves; grows among lushes and in the clefts of trees at Kandalla, during the rains;-requires examination.
1611. A. Nymphaefolium. Rox. Flora. 3. p. 495. Caladium nymphaefolium. Willd. 4 p. 488. Welie-ela. Rheed. Mal. 11, t. 22.

The Water-lilly-leaved Arum.-Much like the last, and as Roxburgh hints probably only a variety. In moist places throughout the Concans.
1612. A. Viviparum. Rox. Flora. 3. p. 496. Maravara Tsjembo. Rheed Mal. 12. t. 9.

Stemless; leaves peltate, acuminate, runners or spikes from the root. bearing scaly bulls in clusters, of the size of a small barberry, and armed. with hooked bristles.-Both Concans. N. Sometimes parasitic Nepal, (Dr. Wallich.
1613. A. Divaricatum. Rox. Flora. 3. p. 503. Nelen Schena Major Rheed. Mal. 11-t. 20. Rumph. Amb. 5. t. 107.

Stemless; leaves cordate, accuminate, scapes solitary, spathe ending in a slender, drooping spiral point; of a beautiful crimson colour on the inside.The Concans. N.
1614. A. Crenatum. Hooker. Wight in Hooker's Bot. Misc. Part. I. t. 3. A small stemless plant, much like the last species;-moist places. S, Concan. N.
1615. A. Thlobatum. Rox. Flora. 3. p. 505. Arisarum Amboinicum. Rumph. Amb. 5. t. 110.f. 2, Bot. Mag. t. 339. and Var-auriculatum. t. 2324. Eour Cochin China. 2 p. 534.

Stemless; leaves 3 lohed; spathe with a spiral apex resting on the ground. The Concans. N.-Perhaps the plant here referred to, is identical with Roxburgh's A. Orixensis. But. Reg.t. 450.
1616. A. Gracile. Rox, Flora. 3. p. 505. Katu-schena. Rheed. Mal. 11 ${ }^{\circ}$ t. 21. Rumph. Amb. 5. t. 115.

Stemless; leaves sub-ternate, with acute lobes.
16:7. A. Minutum. Willd. Spec. 4. p, 484. Neleschena minor. Rheed. Mal. 11.t. 17.

Stemless; leaves, hastate sagiltate; spathe white, suffused with red. A very small plant.-S. Concan. N.
1618. A. Spirale. Willd. Spec. 4. p. 486. Ambrosinia spirale. Rox. Flora3. p. 492. Bot Mag. t. 2220 .

Stemless; leaves petioled, linear lanceolate; spathe axillary, of equal length with the petiols of the leaves, twisted, of a dark purple colour.

The banks of Deccan rivers: (1)r. Lush.) The Concan. N.
1619. A. Campanulatum. Rox. Flora. 3. p. 509. Tacca sativa. Rumph. Amb. 5. t. 112 . Tacca phallifera. Rumph. Amb. 5, t. 113. Schena and Malen Schena. Rheed. Mal. 11.t. 18 and 19. Rox. Cor. 3. t. 272. Bot. Mag. t. 2812.

Soorun.-Cultivated in Bombay Gardens, for the sake of its large tuberous roots, which are eaten by the natives. Also to a considerable extent about Surat, where it is esteemed a very wholesome food, (Dr. Gibson.)

15\%. mono-happory. Y. qgur." umisex- nas. hiev. fu doze in a

 sume edifle.
 buse, etaninems about the middle and natied abve

In the Kairah Zillah, it is planted in May and yields from 100 to 2.50 Maunds per Begah. It sells for about I Rupee per maund. (Mr. Kirkland.)

The large dark coloured flowers of this plant have a very curiousappearance. In Bombay they come out before the close of the rains.

## 1620. A. Murrayi. g.

The Snake Lilly of Mahableshwur,-seems nearly allied to Wallich's A. erubescens, Asiat. Pl. Rar. 2. t. 135. Stemless; leaves long petioled, digitate. The scapes spring out of the ground immediately after the first fall of rain; spathe white, suffused with red, tapering to a spiral point; fruit ripens in October; exceedingly acrid. (Dr. Murray.) A very beautiful plant.

Mr. Law says, he has frequently met with it in the vallies of the Bansda hills to the South West of Surat; so that it is by no means exclusively an alpine plant. The roots are tuberous, about the size of a small potatoe.
1621. A. Bulbiferum, Kox. Flora. 3, p. 510. Bot. Mag. t. 2072 and 2508. This may be readily distinguished from all the other species, by the small round bulbs produced on the upper side of the divisions of the leaves, which are decompound. S. Concan. N.

There are several non-descript species of Arum to tbe met with, in various localities during the rains.- The whole genus requires examination,
748. CALADIUM. w. Monoecia Polyandria.

A name taken from Rumphius,
1622. C. Ovatum. Willd. Spec. 4. p. 488. Karịn pola. Rheed. Mal. 11, t. 23. Arum ovatum. Linn.-Stemless; leaves ovate oblong. The Concans. N.
C. esculentum. Willd. Spec. 4. p. 489. C. sagittifolium? Willd. Spec. 4. p. 489. Arum esculentum. Liun. Caladium aquaticum. Rumph. Amb. 5. t. 110.f. 1. Sloane's Hist. 1. t. 10i.f. 1. Lour. Coehin China. 2. p. 535.

Aloo.-A stemless plant with peltate, sagittate leaves, for the sake of whel it is very generally cultivated during the rains. It grows abundantly in Mahim woods. Prohably the C , sagittifolium which is cultivated in the West Indies, and all over the world within the tropics, is identical.
16.3. C. Grandifolium. Willd. Spec. 4. p. 490. Jacq. Hort. Schoenb, 2. t. 189. Bot. Mag. t, 2643 and 3345 .

Canlescent: leaves cordate, hastate; very large; 2 or 3 feet broad. In gardens, Bombay. It never seems to flower; native of South America, on rocks and trees. It bears a strong resemblance to the Arum colocasia, or the plant referred to as sucb in this List.
749. DRACONTIUM. L. Heptandria Monogynia.

From Drakon-a dragon; in allusion to the freckled stems, like the skin of a suake.
1634. D. Polyphyllum. Willd. Spec. 2. p. 238. Schena and Mullen Schena. Rheed. Mal. 11. t. 18 and 19. Tacca sativa. Rumph. Amb. 5.t. 112. Pluk. Alm. t. 149. f. I. Bot. Reg. 6. 700.

A very common plant; stemless. Leaves on long petioles springing from the root, supra-decompound; appear in July. The scape springs up at the cominencement of the rains, and lias a most unpleasant smell.- Malabar hill;-throughout the Concans.
750. POTHOS. L. Tetrandria Monogynia.

Said to be derived from the Ceylon name.
1625. P. Scandens. Rox, Flora. ). p. 430. Ana-parua. Rheed. Mal. 7. t. 40. Rumph. Amb. 5. t. 184. f. 1, 2 and 3. Lour. Cochin. China. 2. p. 532.

A parasitic plant, with stems as thick as a slender walking stick; leaves alternate, with winged petioles: flowers in May. Grows in dense Jungles throughout the Concans, N. - Goa Juugles. (Dr, Lush.) In the ravines abous. Pars,

16\%6. P. Pertusa. Rox. Flora. 1. p. 434. Elettadi Marawara. Rheed. Mal. 12. t. 20 and 21.

Gunneskund.-Perennial; running over trees and rooting on them; leaves alternate, from 12 to 18 inches long; often perforated, and cut in the margins like thoseof the Bread fruit tree. (Artocarpus incisa.) S. Concan. N.
751. ACORUS. L. Hexandria Monogynia.

From $a-$ privative-Kore-the pupil of the eye: the plant is thought to be good for maladies of the eye, Lam. t. 252. Gaert. 2. t. 84.
1627. A. Calamus. Rox. Flora. 2. p. 169. Vaembu. Rheed. Mal. II.t. 48. Rumph. Amb. 5. t. 72. f. 1. English Botany t. 356. Calamus aromaticus of the Shops C. Verus of Willdenow. N.

Yekund. The Sweet Flag. Grows wild in the Southern Concan. N. cultivated in Deccan gardens. (Dr. Lush.)

Linnieus observes, that it is the'only native aromatic plant of northern climates. Solomon notices it "Calamus and Cinnamon with all trees of Frankincense." (Song. Chap. 4.)

The root is employed in medicine as a febrifuge.
752. TACCA. L. Hexandria Monogynia,

The Malay name of the plant. Gaert. 1. t. 14. Lam. t. 232.
1628. T. Pinnatifida. Rox. Flora. 2. p. 172. T. littorea. Rumpl. Amb. 5. t. 114. Bot. Cab. t. 692.

A curious looking herbaceons plant, with leaves like Dracmitium polyphllum. Scapes radical, 3 or 4 feet high, bearing an uinbel of greenish coloured flowers. Worlee and Parell hills, Bombay; throughout the Concans. N.

Roxburgh says, an excellent starch is obtained from the large tuberous roots. In Otaheite where the plant also grows, bread is made of the starch,
1629. T Laevis. Rox. Flora. 2.p. 171. Grows in the S. Concan. N.

It is perhaps allied to T. integrifolia. Bot. Mag. $\boldsymbol{t}$. 1488.

## ORDER 160. JUNCEE.

753. FLAGELLARIA. L. Hexandria Monogynia.

From Flagellum, - a thong; in allusion to the length and toughness of the shoots. Gaert. Fruct. I. t. 16. Lam. 111, t. 266.
1630. F. Indica. L. Rox. Flora. Ind. 2. p. 154. Panambuvalli, Rheed. Mal.7.t. 53. Sirioides. Rumph. Hort. Amb. 5. t. 29. Redou t. Lil. t. $257 \cdot$

Climbs by means of it's cirrhose leaves like the Gloriosa Superba. Intd. by N.

## ORDER 161. ERIOCAULEE. Beauvois.

## Restiacee. Lind. nat. syst. p. 283.

754. ERIOCAULON. Gronov. Monoecia Hexandria.

From Erion, wool-caulos-a stem. Roxburgh's name Leucocephala is much more appropriate to the Indian species. Lam. Ill. 1. t. 50 .
1631. E. Setaceum. L. Tsjeru cottsjelleti pulu, Rheed. Mal. 12. t. 68.

A Small annual with an angular culm and white globular heads, like some of the Cyperacec. Rice fields after the rains.
1632. E. Quinqcangulare. l. Lencocephala graminifolia. Rox, Flora, Lud. 3. p. 612. Pluk. Alm, t, 221.f. 7, Rice fields and moist places:
1633. E. Sexangulare. l. Leucocephala spathacea. Rox. Flora. Ind. 3. p. 613. Burm. Ind, t. 9.f. 4.

Mar-Goondea-Margins of springs \&c. at Kandalla.
1634. E. Brownianum. Wall. Pl. Asiat. Rar. 3.t. 248.

Moist places near the site of the Hon. Mr. Elphinstone's Bungalow, Kandalla.

## ORDER 162. RESTIACEAE.

Lind. nat. syst. p. 283.
755. RESTIO. L. Dioecia Triandria.

From Restio-a rope; in allusion to the uses of this plant. Lam. Ill. 3. t. 804.
1635. R. Tectorum. Willd. 4. p. 721. Rottb. gr. 10. t. 3.f. 2.

Thatch-Rope-grass. Ind. in Dapooree from the Cape of Good Hope, where it is much used for thatching houses. Dr. Lush.
705. WILLDENOVIA. Thunb. Dioecia Triandria.

In honor of Willdenow, the celebrated Botanist.
1636. W. Teres. Thunb. Aot. Hol. 1790. t. 2. f. 2.

Restio dichotomus. Gaert. Fruct, 2. t. 82. A rush-like plant with long shoots. Dapooree. Ind. from the Cape. Dr. Lush.

## ORDER 163. CYPERACEE.

The Sedge Tribe. Lind. nat. syst. p. 304. Loud. Hort. Brit.p. 541.
757. CYPERUS. L Triandria Monogynia.

From Cypris, a name of Venus, from her being born on the Isle of Cyprus. The roots of some of the Cyperaceæ are said to possess specific properties "quo calet juventus" hence the name. Gaert, Fruct. 1, t. 2. Lam. Ill, t. 38.
1637. C. Squarrosus. L. Rox. Flora. Ind. 1. p. 190. C. diffusus. p. 189. Mulen pulu. Rheed. Mal. 12. t. 54. C. Pygmaeus. Vahl. Wight's Cont. p. 72. Rottb. gram. 20.t. 14.f. 4 and 5.

Culm 4 or 5 Inches high; head terminal globular; scales mucronate recurred. Concan.

1744. A. Saccharatus. Rox. Flora. Ind. 1.p. 271 . Holcus Sacharatus, . Shaloo-Cultivated in the Deccan. Sykes.
788. SACCHARUM. L. Triandria Digynia.

From the Arabic Saukar, which has its root in the Sanscrit. Lam, IIl. f. 40. Gaert. Fruct, 2. t. 82.
1745. S. Officinarum. L. Rox. Flora. Ind. 1. p. 237. Rumph. Amb. 5. t. 74. Sloane's Jamaica. 1. t. 66.

Common Sugar Cane, several varietics are cultivated of which the Otaheite is considered the most productive.
1746. S. Exaltatum. Rox. Flora. Ind. 1. p. 245.

Kerpa,-Rheed. Mal. 12, t. 46, S. spontaneum. Lin. Sara, Asiat. Res. 4. p. 248. Grows to the height of 10 or 12 feet and has a very graceful appearance with its large fether-like panicle. The Indian Mars, according to the Poranas, was born in a cover of this beautiful grass. Sir W. Jones.
1747. S. $\longrightarrow$ ?

The Bhooroo reed of which the Native pens are made. Common in the Concans.
1748. S. Cylindricum. L. Rox. Flora. Ind. 1. p. 234. Laguris cylindrica Gramen caricosum. Rumph. Amb. 6. t, 7.f 2. common in Guzerat. Mr. Law C. S.
789. ISCHAEMUM. l. Triandria Digynia.

From Ischo-to restrain, and haima-blood; it's supposed medicinal qualities. Lam. Ill. 3. t. 8ë9.
1749. I. Aristatum. S. Rox. Flora. Ind. 1. p. 319.
1750. I. Conjugatum. Rox. Flora. Ind. 1.p. 320.
1751. 1. Rugosum. Kox. Flora. Ind. 1. p. 320. Salisb. Strip. Rar. 1. i. 1.
1752. I. Pılosum. Wight. Nuth or Nuthoo grass. An interesting accomnt of which will be found in the Madras Journal of Science, Yo. 7. The black soil of the Deccan.
790. APLUDA. L. Triandria Digynia.

Used by Pliny for chaffis or refuse. Gaert. Fruct. 2. t. 175. Lam. Ill. t. 841.
1753. A. Aristata, l. Rox. Flora. Ind. 1. p. 324. Schreb. Gr. 2. t. 42. Andropogon involucratus. Kon.

A very common grass, and it forms some portion of the hay used in Bombay.
791. ANTHISTIRIA. L. Triandria Digynia,

From Anthis temi, (Rom, 13. 2.) to resist; in allusion perhaps to the strong awns, which puncture and render it unpleasant to walk among this grass. Gaert, Fruct. 2. t. 175. Lam. Ill. t.47. and t. 841.
1754. A. Ciliata. Retz. Rox. Flora. Iud. 1. p. 247. Car. Ic. 5. t. 459. Gaert. Fruct. 2. 1. 175.

This grass grows most abundantly throughout the Concans, and is commonly converted into hay for feeding horses.
1755. A. Cymbaria. Rox. Flora. Ind. 1. p. 251.
792. BAMBUSA. Schreb. Hexandria Monogynia.

From the Indian name Bamboo or Vans. Lam. Ill. t. 261 .f. 2.
1756. B. Anundinacea. W. Rox. Flora. Ind- 2. p. 191. Ily. Rheed. Mal. 1.t. 16. Rox. Cor. PI. I.t. 79.

The common Bamboo. This arborescent grass is applied to a great variety of economical purposes. In Mysore and $S$. Concan the seeds are gathered for food by the pourer classes: (Buchanan's Journey.)
g93. NELOCANNA. Trin. Hexandria Monogynia.
From melon-apple, kanna-reed; alluding to the large pear or melon shaped fruit of this genus.
1757. M. Bambusoides. Tr. Bambusa baccifera. Rox. Flora. Ind. 2. p. 197. Beesha. Rheed. Mal. 5. t. 60. Rox. Cor. Pl. 3. t. 243. Intd. by N. 1833.
794. ZIZANIA. L. Hexandria Digynia.

A Greek name (Zizanion) for the Lolium temulentum or ray-grass. It is translated tares in the New Testament, to the injury of the force and beauty of the original (see Matth. 13. v. 29.) Gaert. Fruct. 2. t. 82.

1758, Z. Terrestris. W. 4.p.396. Katon Tsjolam. Rheed. Mal, 12. t. 60. S. Concan. N.

This has uo relation to the Darnel of Shakespeare.
Darnel, and all the idle weeds that grow In our sustaining cora.

> And oats unblest, and darnel domineers, And shoots it's head above the shining ears.

Dryden's Virg. Georg. 1.

SWERTIA. L. Pentandria Digyuia.
From E. swert of Holland.
48. S. Decussata. N. Dharwar \&c. Mr. Law.

## ORDER 94. PEDALINEAE. p. 126.

49. Sesamum laciniatum. W. Sprengel's syst. 2. p. 814. A procumben plant with beautiful flowers. At Badamee. Mr. Law.

## ORDER 96. CONVOLVULACEF. p. 12\%.

50. Ipomoa Pileata. Rox. Flora. Ind. 1. p. 504.

An annual. S. Concan, tho' a native of China. N. It is remarkable for the curious bonnet or involucre inclosing the flowers.
"These, nature sworks, the curious mind employ.
Iuspire a soothing, melaucholy joy.".
51. Porina paniculata? Ros. Flora. Ind. 1. p. 464. Cor Pl. 3. 九. 235.

In a Garden at Belgaum. Mr. Law. C. S.
52. Convolvulus Littlei. N. Stem beset with hairs like a Caterpillar. Leaves three lobed. N. Concan.
53. C. Macrocarpus. Wall, Intd. by N.
54. Aniseia Calycina. At Surat, in hedges. Mr. Law.
55. Argyrela Setosa, Surat districts. Mr. Iatw.

## ORDER 104. LABIATA. p. 147.

56. Coleus Malabaricus. Wall. Pl. As. Bar. 2.p. 16. The leaves and rootappear to contain much camphor. Habitat, Hills of Braminwara Range, Dr. Gibson, Cochin. N.

## ORDER 106. ACANTHACER. p. 159.

57. Strobllanthes Auriculatus! Wall. Pl. As. Rar. t. 295. Salsette. N.

ORDER PHYTOLACCEE. Loud. Hort. Brit. p, 531. gisekia. l. Pentandria Pentagynia.
Named after Giseke, a Dutch botanist.
58. G. Pharnaceoides. l. Rox. Cor. Pl. 2. 183. Concans. N.

SALVADORA. Tetraudria Monogynia.
59. S. Persica. e. Rox. Flora. Ind. I. p. 389. Cor. Pl. I. t. 26. Rivina paniculata. L. Cissus arborea. Forsk. Near the Sea, both Concans.

## ORDER 116. LAURIN E. p. 173.

60. Camphora Officinarum. Bauh. Laurus camphorifera. Rox. Flora。 Ind. 2. p. 304. Kaemph. Amoen. 770. t. 771. The Camphor tree of China. Intd. by N. 1833.

GY ROCARPUs, Jaeq. Polygamia Monoecia.
From Gyro-to turn round, and Karpos-fruit, alluding to the capsule turning round in the air by means of it's two long wing-like appendages.

Gaert. Carp. 2. t.97. Jacg. Pl. Am. t. 178, 80.
61. G. Jacquini. Rox. Flora. Ind. 1. p. 445. Cor. Pl. 1. t. 1.

On the Banks of the Krishna, near Nalutwar- Mr. Law. C. S. Specimen of the flowers axamined show them to be tetrandrous, and furuished with four "staminodia glanduliformia," in place of sour "staminodia, stipitata, clavata," according to Prof. Nees. Ab. Esenbeck in Wall. Pl. As. Rar. vol. 2. $p$. 68 , or the nectary of four clavate glands of Dr. Roxbourgh, nor could his perforated receptacle be discerned. Germ only seen, N.

## ORDER 122. ARISTOLOCHIE. p. 178.

## BRAGANTIA. Lour. Gynandria Hexandria.

In memory of the Duke of Braganza. Lam. Ill. t. 64 ! .
62. B. Wallichir. R. Br. Apama siliquosa. Rheed. Mal. 6. t. 28. Wight and Arnott in Edin. Phil. Journal. Vol. 15. p. 180.

A shrub, leaves alternate, oblong, lanceolate. fruit a kind of silique. S. Concan, rare, N .

## ORDER 123. EUPHORBIACEE. p. 178.

TRAGIA. l. Monoecia Triandria.

- From J. Bock surnamed Tragus, a German Botanist.

63. T. Cannabina. Rox. Flora. Ind. 3. p. 575.

It has curious pimatifid calyces, cuvered with white filaments. Dr. Gibson.
64. Euphorbia Ligularia. Rox. Flora. Ind. 2. p. 465.

A much larger species than E. Neriifolia, with 5 angled branches spirally twisted as represented in Rumphius's figure. Deccan. Mr. Law.
65. E. Rupestris. Law.

A new herbaceous species, with pink-coloured flowers, on rocks or rockyhills, 20 miles North of Dharwar. Mr. Law.
66. Aleurites. - ? or all allied genus.

Leaves cordate, five-lobed, the under surface densely tomentose. Calyx 3 parted Petals six Nectary 5 cordate glands Stamens about 20, polyandrous A shrub. Mr. Law.
67. Cioton Gibsonianus N.

A tree 15 feet high leaves bifarious, oval acuminate, entire, furnished with two glands at the base; male calyx deeply five-cleft, petals five: nectary five orange colored, cordate glands. Stamina about 15 capsule tricoccous red when ripe size of a walnut. Female flower not yet seen N. At Hurreechunderghur a? topical remedy for Rheumatism. Dr. Gibson. ?
68. Croton Lawianus. N.

Seed as in Croton, capsule girded by a 3 leaved involucre Leaves oblong lanceolate, entire A large tree. Bheema Sunker. Dr Gibson.

ORDER 126. ULMACE. p. 188.
69. Ulmus Lanceœfolia. Rox. Flora. Ind. 2. p. 66. Wall. Pl. As, Rar. t. 200.

Leaves as represented in the above cited figure. Filaments theree, each bearing one large 4 celled anther. N. A large tree, Kassersay and Naneli Ghaut Jungles Dr. Gibson。

## ORDER 134. HYDROCHARIDE.$p .199$.

STRATIOTES. Dioceia Dodecandria.
From Stratos--an ariny, alluding to the Sword-like leaves.
70. Acoroides. Willd. 9. p. 820. Rumph. Amb. 6. i. 75. f. 2. Wa-ter-soldier. An aquatic. S. Concan. N.

## order butomee.

The Flowering Rush Tribe. Lind. nat. syst. p. 253. BUTOMUS. L. Emneandria Hexagynia.
From Buus-an Ox, and temno - to cut; cropped by oxen. Gaert. fr. 1.t.19.
71. B. Lanceolatus. Rox. Floraind. 2. p. 315. Royle's Illust. No. 10. In the Tank at Chiblee in the Surat districts. Mr. Law.

## ORDER 137. ORCH1DEE. p. 201.

LIPARIS. Rich. Gynandria Monandria.
From Liparos-unctuous; smooth surface of the leaves of the original spe. cie

## 72. L. Diphyllos. N.

Leaves two pressing on the ground, ovate, acute, plaited, flowers greenish, lip large and round. S. Concan. N.
73. Habevarta. Schizochilus. N. Flowers white, labellum unguiculate with 2 pair, pinnate, segments, each cuneiform ciliated, and terminated by a long fili form process. spur very long. A new Genus. two petals abortive and the lip ascending with an appendicula between it and the column Ram Ghaut. Mr. Law, C. S.
74. Habenaria. - ?

Resembles in many respects the H. longicauda, Bot. Mag. 2957, except the spur being here shorter and more slender, Both Concans. N.
75. Eulophia. Nov. Spec. Flowers yellow. In the vicinity of Belgaum.

This will be described fully hereafter. Mr. Law, C. S.

## ORDER 15̃6. PANDANEÆ. p. 226.

76. Pandanus. Nov. Spec.

Spikes of male flowers tetragonal, and inodorons. Fruit considerably smaller than in P. Odortissimus; on the banks of rivulets between Belgaun and the Ram Ghaut. Mr. Law, C. S.

## ORDER 159. ARO1DEE. p. 228.

## ARIOPSIS. N. Monoecia Polyandria.

77. A. Peltata. N.

Leaf solitary, orbicular, peltate, spath small cowled, opening in front a little longer than the spadix, the male portion of which is free above and the female portion below adnate with the spath, having two series of germs insident thereon, all secuid, styles 4 to 5 . The free club-shaped part of the spadix is foraminous, containing the anthers.

## ORDER LEMNACEE.

## LEMNA. L. Monoecia Diandria.

From Lepis-a scale; alluding to the form of the minute plants.
78. L. Globosa. Rox. Flora. Iud. 3. p. 565

Covering the surface of Tanks like a green scum.

## ORDER 164. GRAMINEIE. p. 233.

79. Bambusa balcua. Rox. Fora. Ind. 2. p. 196.

A very large species. S . Concan. N .

## ORDER———?

ANICTOCLEA. n. Dioecia Tetrandria?
From Anviktos,-open, and Kleio to enclose; in allusion to the open capsule.
80. A. Grahamlana. N.

Jungle Bendy, referred to p. $88^{\circ}$
Leaves long petioled, cordate, short acuminated serrated, racemes terminal calyx monosepalous, 4 parted, division acute, persistent, stamens 4 opposite to the div. sepals, longer, insident on a thin torus. anthers double, capsnle? membranaceous. crowned by 4 gland-like remainsof the sterile filaments on the apices of the female calyx; inferior one-celled? seeds? minute; 4 parietal placenta? style or stigma net conspicuous,

## ORDER——?

SYMPHOREMA. R. Octandria Monogynia.
From Symphoreo-to accumulate; alluding to the involucre containing a cluster of flowers each.
81. S. Involucrata. Rox. Flora. Iud. 2. p. 262. Cor. Pl. 2. t. 186. Comcans.

## 82. S. Polyandra. N. Both Concans. Dharwar

Spec. No. 61 For Hulberee read Kulkeree.
--n- 6: For Shrub, read tree.
Gen. No. 36 Dioecia Pentandria.
spec. No. 80 This will probably prove, on further examination, to be T. faras described by Mr. Edgeworth as so common in the protected Seik States, attaining the sise of a large tree. Vide Journ. Asiat. Society of Bengal for Sept. 1838. Mr. Law.

- 88 Add Synonym. Pharnaceum Mollugo.
————130 For Zebinthinus read Zibethimus.
—— 139 Ind. by N. in 18:33.
-143 The tree intended is Visenia umbellata of Blume, or Glossospermum velutinum? of Wallich, the seeds being winged. The stamens do not show the least tendency to be monadelphous, but are distinct and insident on a torus or disk, being broad and membranaceous in their margins and closing around the germ. N.

190 Rumph, Amb. 5. t. 18. f. 1.
192 Wight's Icons. No. 6. t. 113.
Gen. No. 98 For Paramigyna read Paramiguya.

- 99 Fir Polyandria Monogynia read Dioecia Polyandria.

Sp. No. 195 The species intended was the common Kokum or G. purpurea -_202 For H. obtusifolia read H. Grahamii. Wight's Mss.
Spec. No. 219. Common in both Concans. N.

- 220. The normal number of valves seems to be five. N.
———226 Rumph. Amb. 7.t 8. f. 2. A congener? N.
-     - 227 Epicharis exarillata is synonymous with Guarea binectarifera. This will probably constitute a new genus.
- 232 For C. Tubularis, rearl C. Nimmonii, Gr. Wight's Illust. No. 10 p. 148. For Decr. 1838, read April 1837. The normal developement is 5 valved, N .

272 For 1839 read 1837.
301 Add Synouym Chirongia sapida. Buchanan.
318 A shrubby species 5 or 6 feet high, slender as a walking canc, dying down to the tuberous root annually, and springing up in the rainy season, near Cruciferæ? N.
-_ 378 Add English name " Moving plant."
— 381 This will probably prove a New Genus.
459 Bois noir of the Mauritius.
539 Two distinct species; the $L$. parviflora is a celebrated native remedy for the mange in dogs. Dr. Gibson.
-. 579 A new geuus; sced furnished copiously with albumen. N.
647. The young flat stems resembling leaves are eaten when boiled, and dressed with buiter, salt and peper.
789. Lot. Mag. t. 762 and 1884-5.
793. Bot. Mag. t. 3204.

802 For Dawul read Deonul.

- 823 The remark respecting Malsaree is iutended to be applied to Bolesaree spec. No. 821.
——_ 829 For acid read acrid.
—— 865 The plant intended for the "Exile" is Cerbera Thevetia.
--- 952 Comp. Bot. Mag. t. 26.
———955 Distinct from the Kulmilata of Roxburgh.
-_ 1052 Linaria Ramosissima. Wall. Pl. Asiat. Rar. 2. t. 153.
-- 1270 A Cimnanomun? Fertile fil 9 sterile 3 Three of the former are furnished with a pair of stipitate glands each.
——— 1276 This is probably a distinct species; the ripe fruit has not yet been seen.
1291 Prickly Pear is the vulgar name for Opuntia Dillenii.
Mr. Law.
—— 1296 For heated read treated.
-     - 1311 Only in a cultivated state, probably introduced from Gor. Mr. Law.
—— 1334. For a fig of G. fasciculatum, see Bot. Mog. t. 3231.
-_ 1381. lndigenous at the foot of Ram Ghaut. Mr. Law.
Gen. No. 673. For Phius read Phaius.
-     - 689 For Stelitzia, read strelitzia.

Spec. No. 1517 Rumph. Amb. 6.t. 69.
1520 For 4 read vol..
1534 This flower sheds it's perfume most powerfully after sum set, and has been observed in a sultry eveniug, after thunder, when the atmosphere was highly charged with electric fluid, to dart small sparks of lucid flame, in great abundance, from such of its flowers as were fading. Edin. Phil. J urn. 3. p. 415.
Spec. No. 1536 Growing on rocks at Badamee. Mr. Law.

- 1572. A species with broad erect leaves in Gardens at Sholapoor, is the A. Americana. Mr. Law.
$\qquad$ 1573.
> " The sun's child, the mail'd anana yields His regal apple to the ravished taste." Grainger. Concan. N .

1609. This species has since been found indigenous in the $S$.

1784 The specis intended is $O$. Wightii.

- 3 Of the Addeuda. Rumph. Amb. 7. t. 19.f. 1. and 2. - 25 For I. Rivularis read I rivalis Madras Journal of science for January 1837.
- 39 For vol. 2nd readvol. 11 th. This genus appertains to the nat series Sphenncleacea.
As the last sheets were passing thro' the Press, the following were communicated: Rhus Mysorensis, Hiraea cordata, a new Asplenium and Delphinium Cashmerianum (Habit, hill of Suleiman near Joonere) by Dr. Gibson; Ficus caricoides, Ophioglossum parvifolium, a Gymnema, Corchorus humifusus (Law), Tephrosia spinosa and Striga Orobanchioides, by Mr. Law. The following exolics have heen lately introduced by the latter Gentleman: Alstroemeria tricolor, Oculata and Hookeri, Fuchsia grandiflora and globosa, Verbena pulchella and Melindris, Bouvardia triphylla; Stanbopen grandifiora and numerousother Epiphytes.

Ceratonia siliqua. Intd by N.

Cyathorlinn du- spilanthes calva, Indigofera gla wisensis and clavata, Indigofera cordifolia, Polygonum lanatum and tonentosum, Urtica caudata, Ficus, nov. spec. Coix barbata (Guzerat) Ionidium leptorhizum, Cissus setosa, Leea crispa, Impatiens rufescens, Acacia cineraria, Ammania rotundifolia, Leucas, nov. spec. Lycopodium vernicosum. Hedyotis caerulea, Mollugo cerviana, Hedy-sarum monophyllum (Law) Bignonia spathacea, Athanasia Indica, Ambrosinia unilocularis, Ambrosinia rugosa (Law) Alysicarpus pubescens, and Dysophylla stellata by Mr. Law.

## GERANIUM LAWIANUM. N.

Leaves long petioled, ovate, cordate at the base, entire, or undivided, toothed:stipules lanceolate. Flowers axillary, solitary, of a beautiful pink colour; peduncle long, bearing two bracteoles about the middle. Sepals very bairy.

Perennial, herbaceous, three or four inches high. The second Peninsular species. near Indipore, and on the broken ground north of the Beema, near Kbeir, Sept. 1838. Dr. Gibson.

EURYCHITON ADENSIS. N.
Calyx gamosepalous, infundibuliform subscarious, with a slightly \& lobed plaited limb; and subtended by scarious bracteæ. Corolla gamopetalous funnel, formed smaller than the calyx and purple coloured Stamens 5 liypogynous, Styles 5 seed vessel not seen. Nat. ord. Plumbagineæ.

Stem short and branching leaves obovate-oblong, flat, pubescent, glaucous, mucronate, attenuated into long petiole which is sheathing at the base, Peduncle erect, Panicle circinate, flowers one-ranked.

SYNMERIA SCHIZOCHILUS. N,
The 2 petals of the Orchideæ No. 73 of the Addenda, stated before to he abortive, having been found on minute examination to be comuate with the supreme sepal forming a galea, not partially as in Aspasia, the necessity of separating it from. Habenaria is obvious. It is now appropriately named in allusion to this circumstance.

Artocarpus chaplasha. N. Concan. N.
Haematoxylon campeachianum Intd, by Mr. Law.
