W. S. Exploring Expedition, 1838-42

Catalogue of Specimens Received or Deposited at
the Philadelphia Museum, from the W. S. Ex-
ploring Expedition, with receipts for the same, signed
by Franklin Peale.

Begins with "List 3".

128150
C

(List - No. 3)

"The specimens belonging to the Botanical & Horticultural Department, ready to send to the U. States, are packed in five Tin Cases; each enclosed in a wooden Box.

- No. 1. Contains - 677 specimens of plants collected on the Island of Madeira.
 - 200 do " do " " do
- No. 2. Contains -
 - 280 do " do " " Island of St. Jago.
 - 200 do " do " in the vicinity of Rio de Janeiro
 - 100 do " Mosses & Lichens collected on Madeira.
- No. 3. Contains - 600 do - " plants from the vicinity of Rio de Janeiro.
 - 530 do " do collected on the Organ Mountain
- No. 4. contains -
 - 50 do " Coralines & Hydrophytes, from N. Atlantic.
 - 44 do " Hydrophytes, collected at Madeira.
 - 20 do " do " " St. Jago.
- No. 5. contains -
 - 43 papers of seeds, from the Island of Madeira.
 - 17 do do " Island of St. Jago.
 - 53 do do " vicinity of Rio de Janeiro.

Also, dry roots of Gesnerias, Anaryllis, Cattleya Korbesii, Begonia sp from the Organ Mountains. Cactus sp - Vanilla aromatica, &c. &c.

Total number of specimens from Madeira - 1011
 do from St. Jago - 320
 do from vicinity of Rio de Janeiro - 800
 do from Organ Mountains - 530
 Total 2661

"The specimens are packed in bundles, and the Station where they were collected wrote on the cover; also the number of specimens in each bundle. - The seeds are all named and the locality given."

Geological Specimens in Box No. 1. Sent from Rio de Janeiro, Decr. 1838.
(Signed) James D. Dana

From Porto Santo

- Nos. 1. 16. 17. Limestone from P. S. obtained on the Island of Madeira, where it is brought to burn for lime.
2-26. - The same limestone, containing fossils. Nos. 14 & 24, contain pebbles of the volcanic rock of P. S. indicating the recent origin of the limestone.

From Madaira

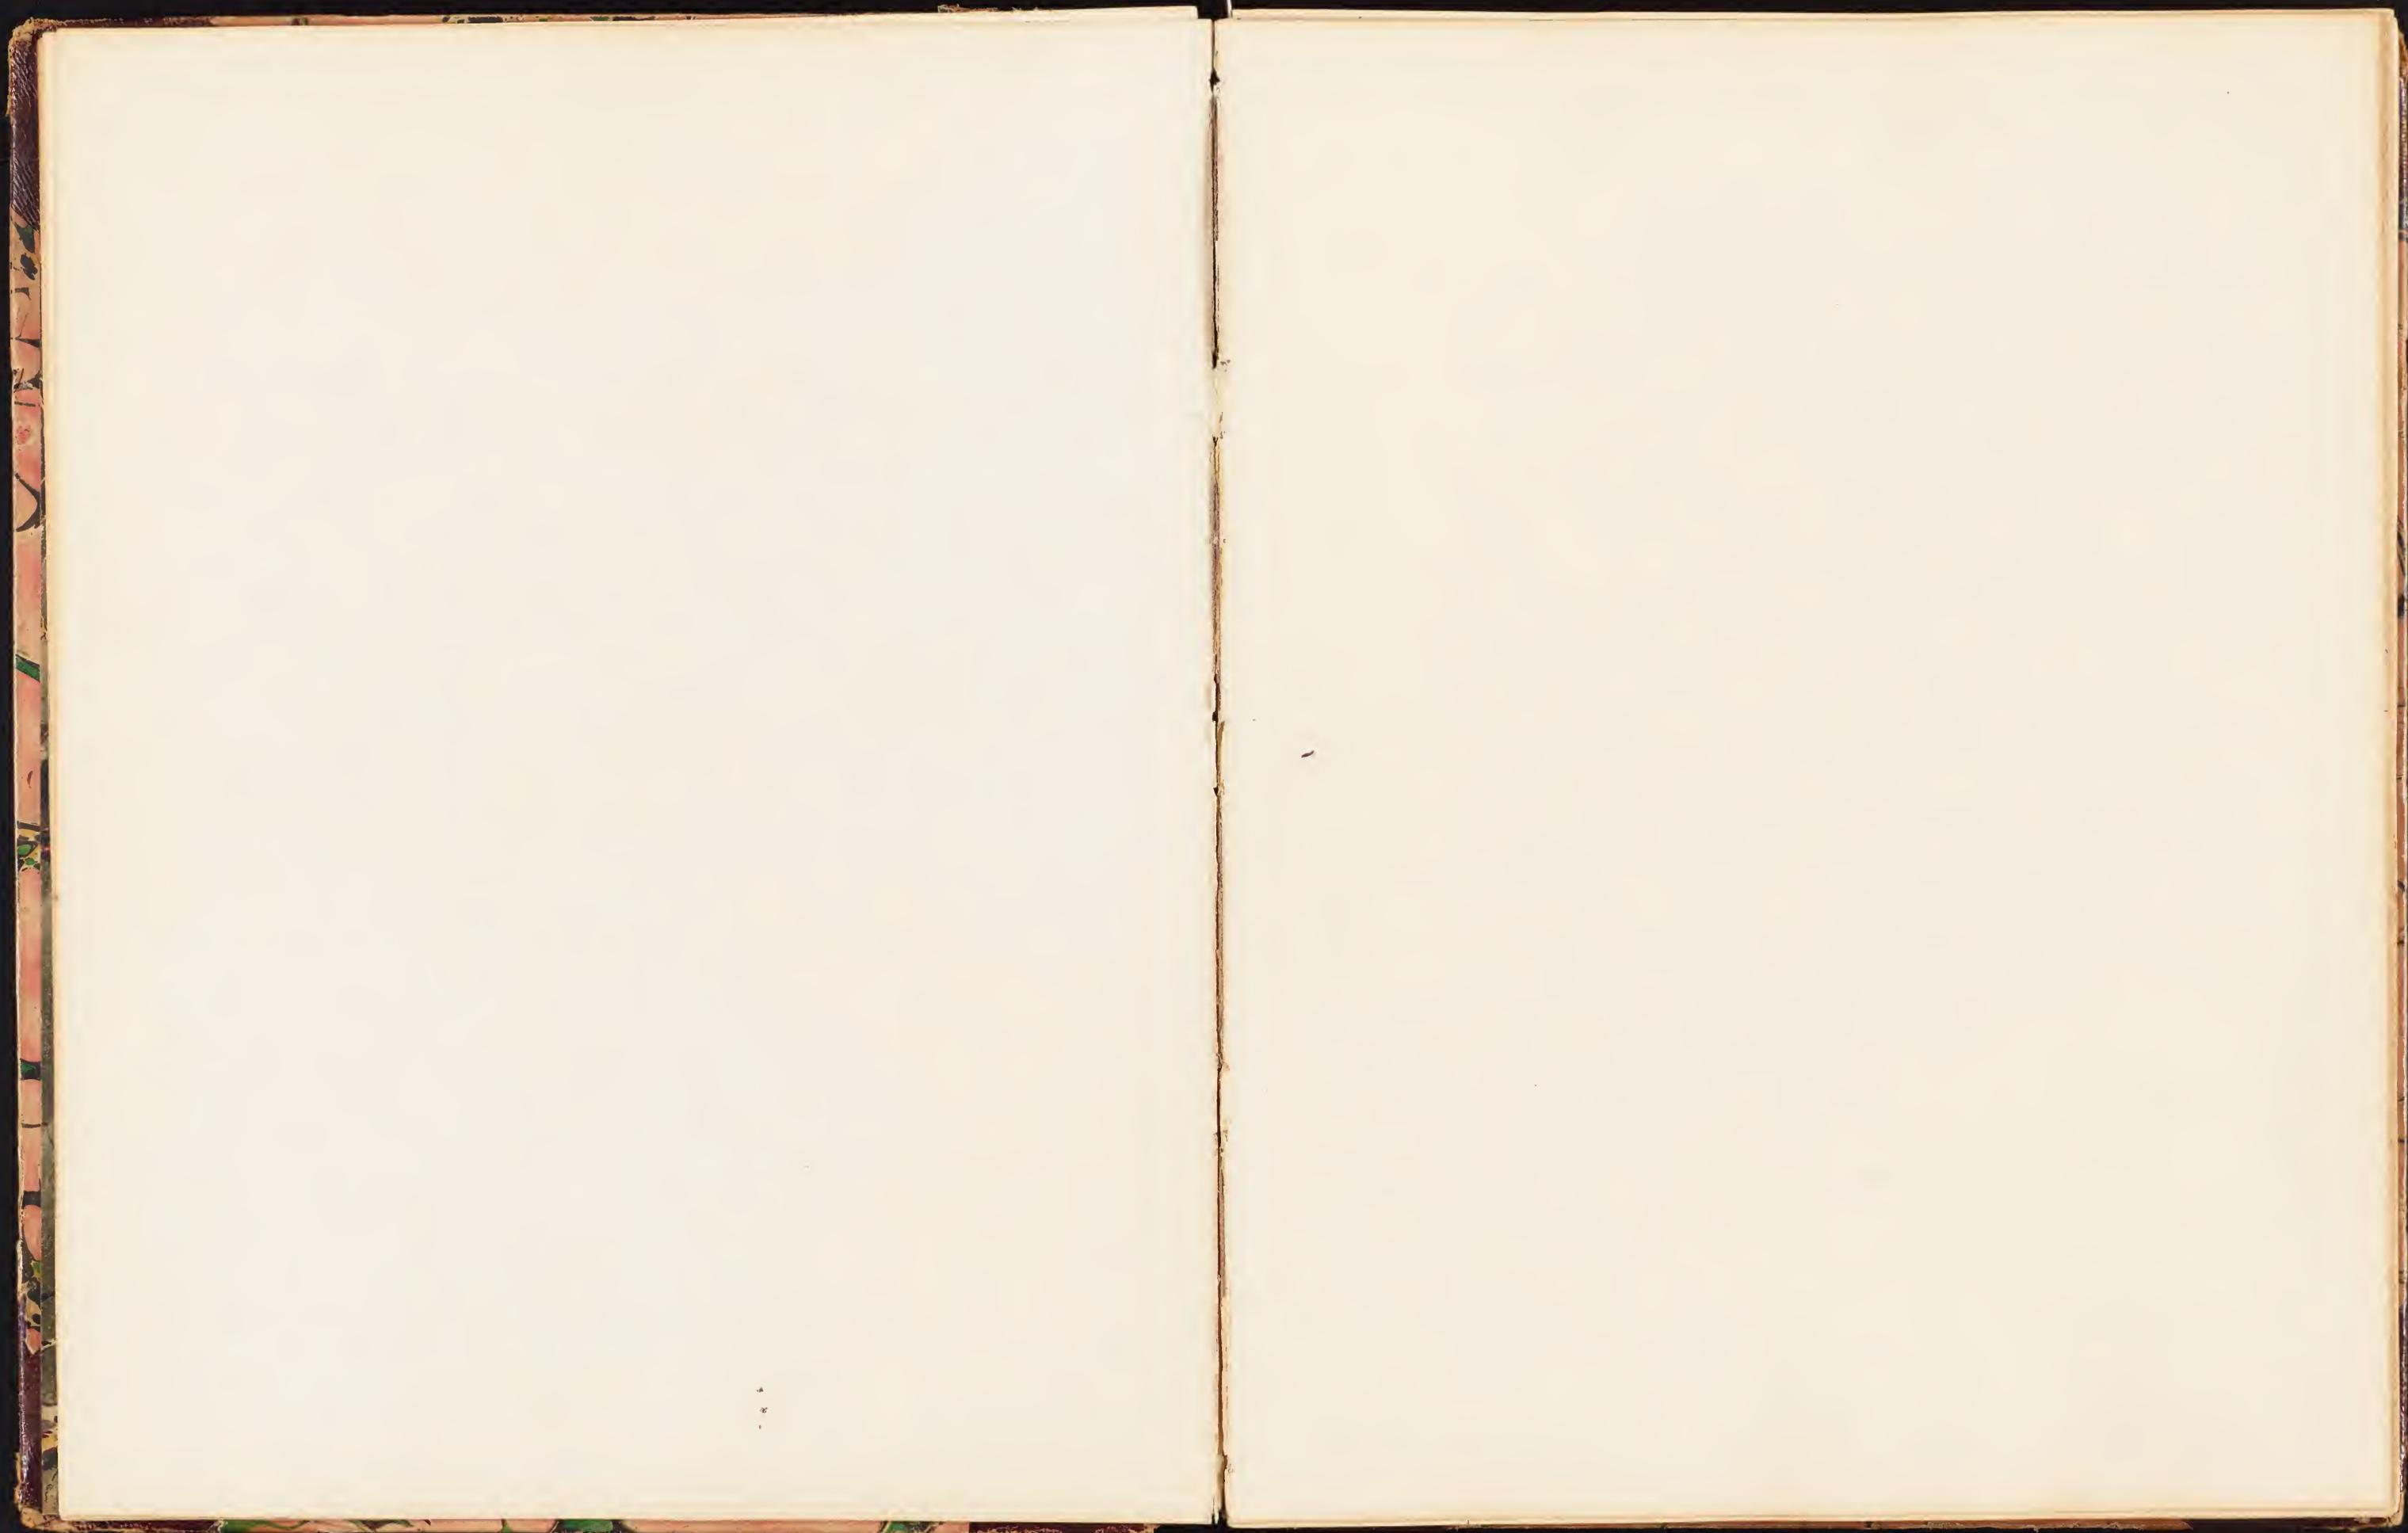

- Nos. 28-35. - From a recent limestone formation on the eastern extremity of Madeira, near Carriceol.
Nos. 32-35. - Contain several specimens of recent land & sea shells. *Helix nitidiuscula*, & *H. turriculata* of Bowditch, also a small *Cerithium*, *trocha* & *Littorina*.
Nos. 36-41. - From the same formation
" 42-45. - Scoriaeous basalt, encrusted with carb. of lime: from the cliffs between the mouth of the River Secorridos & Camara de Labas.
Nos. 46-47. - Red Tufa, containing Carb. of Lime; from same locality, where it forms a layer of 2 to 3 ft. between the solid basalt. This layer contains also concretions of carb. lime.
Nos. 48-50. - Red Tufa, from the valley of the River Secorridos.
Nos. 51-52. - Pieces of Pumice; from a layer of pumiceous Tufa, 3 ft. thick, at the Brazen Head.
Nos. 53-55. - Prismatic specimens of Tufa, from a layer 6 to 7 ft. thick; the upper part hard and prismatic; the lower soft and yellow. - Brazen Head.
Nos. 56, 57, 59. - Yellow Tufa. - Brazen Head.
No. 60-63. - Scoriaeous basalt, of a brownish color, from the upper surface of the lower basaltic layer at the Brazen Head.
Nos. 64, 65, 67. - Similar scoria, encrusted with globular concretions of carb. lime. (arragonite)
No. 69. - More scoriaeous than the preceding, similarly encrusted.
" 70. - Brick red scoria - from the Coural.
" Nos. 71, 72, 74. - Compact basalt, from the Brazen Head.
" 76 & 78. - Yellow Tufa, containing yellowish green crystals of *Chrysolite*.
No. 97. - The same Tufa, in contact with the superincumbent rock.

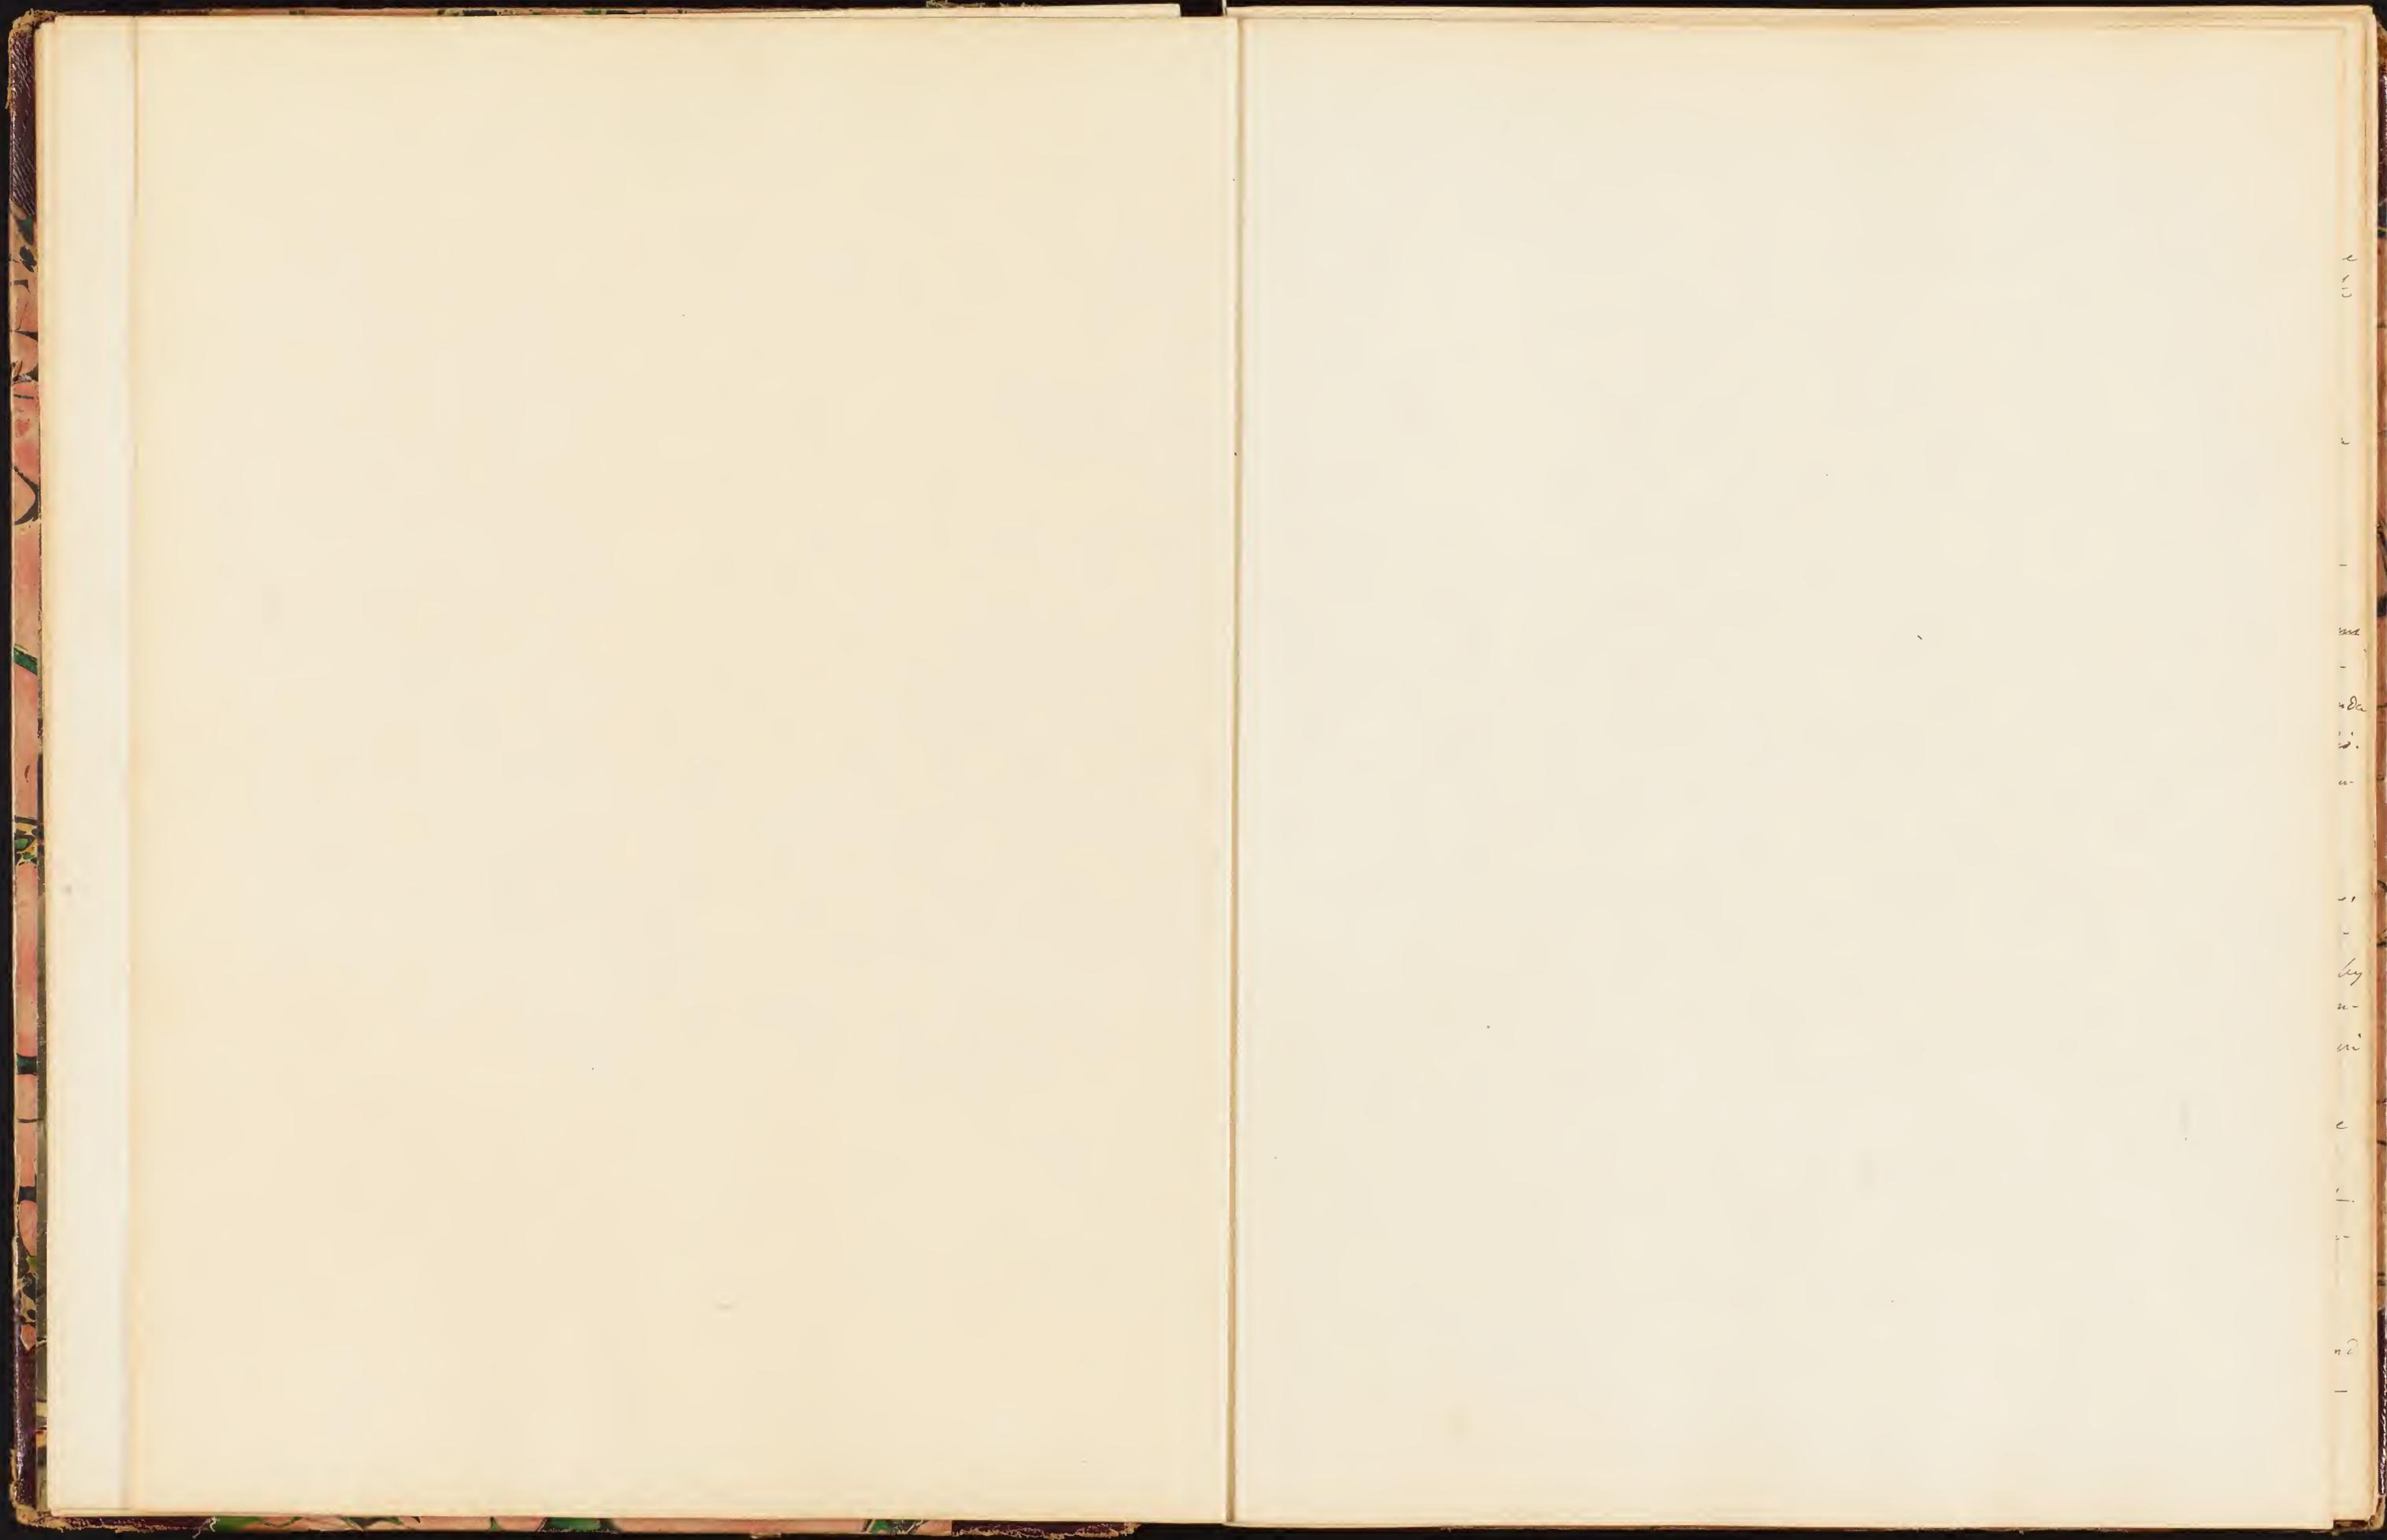

- No. 79-82. - Trachyte - corral
- " 84-86. - Basalt, containing large crystals of Hornblende - ^{Corral}
- " 88. - Basalt, containing Olivine - Corral.
- " 89. - Brownish red Scoria, encrusted with lime. - Brazen Head.
- " 90-93. - Grayish Basalt. - corral.
- " 94-96. - Vesicular Trachyte, containing hornblende, feldspar, and decomposing Olivine.
- " 98-101. - Incrustation of specular Iron; from Cape Giram.
- " 102-105. - Compact Basalt, containing Olivine
- " 128-129. - Scoriaous basalt, containing a few microscopic circular Crystals. - Brazen Head.
- " 123-125. - Scoria, from the summit of Pico Anuro, the highest peak of Madeira; 6240 feet above the sea.
- " 126. - Pico Anuro - Madeira
- " 127. - Vesicular basalt. - Corral
- " 128. - Brick red Tufa, containing regular crystals of Augite from Santiago (one of the Cape Verde Islands)
- No. 108. - Basalt, from Porto Praya
- " 109. - Imperfect Pitchstone
- " 110-111. - Gray Basalt, from the cliff fronting the harbor of Porto Praya.
- " 112, 114, 115. - The same, containing minute crystals of Natrolite.
- " 113, 116, 117, 118. - Pitchy scoria, with infiltrated carb. of lime.
- " 119-122. - Yellow Tufa, containing Augite in Crystals - from the West side of Porto Praya.
- From Rio de Janeiro
- No. 130-131. - Gneiss, from the Floria quarries near R. Janeiro.
- " 132-133. - Granite, from veins in the gneiss of the same quarries.
- " 134-136. - Porphyritic gneiss, from the quarries just back of Rio, towards Matapora. - This is the prevailing character of the gneiss about R. Janeiro.
- " 137-138. - Granite, from veins in this quarry.
- " 139. - Coarse Granite from the same quarries, containing Iron Pyrites, Crystallized Mica, and feldspar.
- " 140. - ¹³⁹ Distorted Crystal of Iron Pyrites, from the same quarry.
- " 141-144. - The same, with mica and crystals of feldspar. - The small crystals of the latter mineral are transparent.
- " 145. - Crystals of feldspar - from same quarries.

- No. 146. — Feldspar.
 " 147. — The same, with crystals of quartz.
 " 148. — The same, with a small crystal of Apatite.
 " 149. — The same, with a cruciform crystal of mica.
 " 150-153. — Decomposing gneiss. — from the hills back of Rio, — color brick red, resulting from the iron in the decomposed mica.
 " 154-155. — From a very narrow vein of quartz, intersecting the gneiss near the Rio, just to the East of Praya Grande.
 " Specimens of Crustacea, sent to the U. States, Decr. 1838
 (Signed), James D. Dana

From Rio de Janeiro

- No. = LXV* (265). — Lupa. — Color dull olive green. Four posterior pair of legs, mostly blue, anterior purplish; verging towards fine blue along the anterior margin. — 4 Specimens.
 " = XLII (342) — Lupa spinimona. — Extremities of 4 posterior pair of legs, reddish, verging towards purple. — Anterior legs mostly olive green above, with the extremity of the hand brownish red. — Spines white at base, with brownish red tips. — 3 Specimens.
 " — LIII. — Penaeus. — Color mostly grayish blue, or greenish, somewhat clouded. — 3 Specimens.
 " = XXV (325) — Uca. — Color varying — olive green yellow — never bright. — 3 Specimens.
 " = XLIV. — Penaeus. — Light olive green along the back, sides verging to white, with some brown and lake. — Outer leaflets of tail, fine deep blue. — along the inner margin Antenna, with alternate oblong rings of white & brown. — 3 Specimens.
 " — LIV. — Squilla. — Nearly colorless. Spines on the margins of the 3 posterior joints of abdomen, rose-colored. — 2 Specimens.
 " — LXVI. — Squilla. — Nearly colorless. — ridge, on the segments, bluish copper green. — 4 Specimens.
 " = VI (306) — Pagurus. — Yellowish brown, somewhat reddish in abdomen, and verging to rufous brown, and blackish brown in anterior feet. — 1 Specimen.
 " — I. — Hepatus. — 2 Specimens.
 " — LV. (255). — Oxyroda. — 2 Specimens. Burrows in a beach near Boca (near Munnepally, stand for hundred, is = LXV-265, &c.)
 * — N.B. In the labels attached to the specimens of Crustacea, the horizontal marks, preceding the No.

Bottle No. 2.

- Ligia*. — 8 specimens. Common about the Harbor.
Alpheus. — 3 do. Found in cavities among the *Serpulas*, &c. near
Praça Grande.
Hippa-emerita. — From the sand beaches near (Botu Laga. — also, more
abundantly, on the N. side of the Harbor of Rio, near the
entrance. more than 10 specimens.
Albuan. — Found on the N. side of the Harbor, with the above
Hippa's — 1 specimen.
Geladonius. — 5 specimens. — 3 Males, 2 Females. Found along a
brushy, nearly fresh swamp, back of the City of
Rio Janeiro, near the Alameda.

Bottle No. 3. Several minute specimens of *Gammarus*,
—, *Nimfithoe*, &c., from sea weed in the Harbor.

- Idotea*. — Length $\frac{1}{2}$ to $\frac{3}{4}$ inch. — found in the Harbor off the City. 3 specimens.
Helina (Dana) a new genus, allied to *Idotea*. 1 specimen. Found a-
mong the sea weed, along the shores of the Harbor near Praça Grande.
Philoscia. — 3 specimens. Found under stones in the woods near Rio.
Hippolyta — (or allied to it) 10 specimens. Found with the above *Gam-*
marus, &c., among the sea weed along the shores, near
Praça Grande.

Ectodelphys (Dana) *gracilis*, a new genus of the family Schizopoda,
remarkable for carrying the embryo in a pouch un-
der the posterior part of the abdomen, which is formed by
the meeting of a pair of concave lamella. Very abun-
dant in the Harbor of Rio, near Hospital Island, and in
various other parts. Upwards of 20 specimens.

Caprella. — *robusta* (Dana) — Found with the *Gammarus*, &c. above
referred to, near Praça Grande. Very abundant.

Caprella — *catenata* (Dana) Found with the above: not abundant.

Caprella — *cornuta* (Dana) — The same locality as above. Abun-
dant, both Male & Female.

Caprella — *gracilis*. (Dana) With the above. Not abundant.

Caprella — *elongata* — (Dana) Very long & slender. Abundant: found
at the same place with the above species. —

In all these are about 36 specimens of the
above species of *Caprella* preserved in the bottle.

The Contents of Box No 3. Ornith. Dept. per Relief. corresponds with the catalogue; but in Box No 2 per Relief there were 13 Ornith. Spec. with an envelope stating that they belonged to ~~the~~ Box No 3. (some probably No 4? in part?) Box No 4 in very ~~bad~~ bad condition, with only 13 instead of 17 specimens, perhaps a part of the above 13 being here. There was but 72 Ornithological Specimens in No 5. contrary to 77; the other articles were as stated in the Catalogue.

No Box No 1 per Relief could be found; there was one with the Relief label No 9 containing the articles called for in this Box. No Box No 2 per Relief could be found. There was one No 10 with 59 Bird Skins. No Box No 3 per Relief could be found; there was one No 11 with 5 Albatross Skins.

Box No 9 of the Botan. Collection, presented its contents in an entire state of decomposition.

"List of Boxes and Breakers containing Specimens of Zoology, Mineralogy, Botany, &c. &c. Collected by the Exploring Expedition, and placed on board the U.S. Ship Relief, for transportation to the U. States. viz:—"

- Box No. 3. } — 1 Cigar Box of Shells, 1 Deer's head & Horns, 1 Skin of
Contains } Luna Patagonica, 2 Latuscia Minutia, 40 Skins of
Birds.
- Box No. 4 } — 17 Ornithological Specimens.
- Box No. 5 } — 6 Packages of Shells, 4 Cigar Boxes of do. 2 pack-
Contains } ets of Star Fish, 3 Ratone Skins, 1 Opossum Rat
Skin, 1 Lizzard, 1 Small box of Insects, and 77
Ornithological Specimens.
- Breaker No. 6 } — 1 Guano's Skin, (and 1 Deer do
contains })
- Breaker No. 7 } — 1 Guano's Skin, and 2 Fox do
contains })
- Box No. 8, contains — 1 Porpoise Skin, & 1 Young do do
- Box No. 1, contains — 6 Albatross Skins, 3 Wolf do, 1 Arma-
dillo do, 24 Bird do, and 1 Porpoise Skull.
- Box No. 2, contains — 52 Bird Skins
- Box No 3, do — 5 Albatross do
- One Breaker do — A Sea Leopard Skin
- One Bundle do — 14 Lances from the Savage Islands.

"The foregoing list of Specimens were collected by Mr. J. R. Peale, Naturalist of the Exploring Expedition. The Boxes are marked "Exploring Expedition, Zoological Dept. No. &c." and are sealed with the Seal of the Expedition."

Breaker No. 1. — Contains Crustacea
do " 2 do do
Boxes Nos. 2, 3, 4, 5 do Minerals, Collected by Mr. J. D. Dana, Mineralogist, Marked, the Keys, "Crustacea", and the Boxes, "Mineralogy, Exploring Expedition", and are sealed with the Seal of the Expedition.

Boxes Nos. 1 to 8, — Contain Botanical Specimens: Box No 9, seeds and Plants.
"Collected by Messrs. Wm. Reich, Botanist, and Wm. D. Brackenridge, Naturalist; Marked "Botanical Specimens, Exploring Expedition", and sealed with the Seal of the Expedition.
Box No 2. — contains Zoological Specimens.

Breaker No 3. & 4. Contain Zoological Specimens

Boxes, 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 3. — Ditto

" Collected by Messrs. J. P. Coathony and C. Pickering, Naturalists; marked "Exploring Expedition, Zoological Specimens" and are sealed with the seal of the Expedition.

One Box marked "Mummies, Exploring Expedition."

One do do "Sea Water in Bottles, from different depths, Exploring Expedition."

(Signed) Charles Wilkes
Command. Explor. Exped.

Note: "On page 1st. the two checked Boxes, and Breakers are not to be found, but there are 3 extra Boxes on board, marked "Zoological" Nos. 9, 10 & 11, which are not on the list, and are probably the articles missing. — Some of the marks were altered by the Scientific Gentlemen, after they had been received on board at Callao, with the original list, which list was not altered, and this may account for the discrepancy. —

In addition, we find among the collection one box of Artificial Curiosities, and one do of Crustacea — No. 8, on page 1st. it is presumed is intended for a Breaker, and not a Box. —

1 Package in Canvas, marked shells from Ship Relief.

2 War Clubs and Staff, from Marquess Island

1 Dagger, from Kingmill group."

I acknowledge to have received on deposit the foregoing articles to be held subject to the order of the Hon. the Secretary of the Navy, or the Commander of the Explor. Expedition, at the risk of the Government.

(Signed) Franklin Peale

for the Museum Company

"There is some confusion in the number and marking of the boxes, and one or two not included in the foregoing list: all of which were received on the 1st. of April 1840, from Lieut. J. B. Dale.

(Signed) Franklin Peale

Invoice of sundry packages received from the Exploring Squadron, and shipped by Leonard Jarvis, Navy Agent, at the Port of Boston, on board the Brig Acorn, Capt. Howes, bound for Philadelphia, and consigned to Michael W. Ash, Navy Agent, at the latter port, for account of the U. States, viz:-

U. S. Ship Vincennes
Rio de Janeiro

Sir,

I have requested the Honorable Secretary of the Navy to direct the Navy Agent at Philad. to deliver you a box presented by me to the latter, marked "Seeds & Plants No. 5, Exploring Expedition" which contains the following seeds & plants collected by our Botanists, viz.

43 Papers of seeds from the Island of Madeira

17 " " " St. Jago

53 " " from the vicinity of Rio de Janeiro

Also dry roots of Guenerias, Amaryllis, Cattley or Hor-
besa, Begonia, Specimens from the Orgua Mountains,
of Brazil Cactus, &c.

Vanilla Aromatica &c. &c. —

On receiving which, I trust it will afford you pleasure to make the best possible use of, by cultivation &c. with a view of introducing them into our own Country.

I am Sir

Very Respectfully

Your Obedt. Servt.

(Signed) Charles Wilkes
Commandr U. S. Exp. Exp.

To Mr Buist

Philad^{ca}

U. S. Ship Vincennes
Pia de Janeiro
Decr. 25th. 1838

Sir,

At the suggestion of your brother Mr. T. A. Peale, of the Peacock, I have requested the Honorable the Secretary of the Navy to place in your charge (and keeping certain boxes of Specimens in Natural History, Botany, Mineralogy, &c. which have been collected by the Scientific Corps of the Exploring Expedition, and forwarded by the Brig L'Orient to the Navy Agent at Philadelphia

I enclose herewith lists of the contents and numbers of each box and have to request that on receiving instructions from the Navy Department you will take charge of the same and keep them in a proper and secure place, until the return of the Expedition to the United States.

I request particularly that none of the boxes be opened or disturbed at any time, except those marked as containing Specimens in glass and spirits, which will require examination and filling up in the event of leaking, but there should be great care that none of the wrappers or labels be removed.

Any services rendered in regard to these will confer a particular obligation, and any expenses incurred be cheerfully repaid, and the assurances of your brother induce the belief that no exertions will be spared on your part in complying with our wishes in regard to the Specimens.

I am respectfully
Sir,

(Signed) Mr. Ad. Levot

Mr Franklin Peale
Philadelphia

U. S. Ship *Triton*
 Harbour of Rio de Janeiro
 Decr. 25th. 1838

Sir,

I have the honor to enclose herewith lists of about 5000 specimens in Natural History, Botany, Mineralogy, &c. which have been collected and prepared by the Scientific Corps of the Exploring Expedition, since we left the United States, which affords satisfactory evidence of their industry and application in the various duties assigned them.

I have had these specimens carefully packed in boxes, marked and sealed with the seal of the Expedition, and put on board the American Brig *L'Orion*, Capt. Hull, for Philadelphia, and consigned to the Navy Agent there, subject to your order, and given directions that they should not be opened or distributed, but stored in a proper place until required by you.

Among the boxes is one marked "No 5. Seeds & Plants," in relation to which I take leave to enclose a letter to Mr. Quist, the Florist of Philadelphia, requesting him to take and cultivate its contents, and if it seems your approbation, I request the letter may be forwarded to him with an order on the Navy Agent for the box.

I would strongly recommend Mr. Franklin Peale of Philadelphia, brother of Mr. J. A. Peale, one of our Naturalists, as a suitable person to take charge of all the specimens except the box of seeds & plants, and to keep them safely until our return, and take leave to enclose a letter to him to be forwarded with copies of the lists & an order from you on the Navy Agent for the boxes.

I have addressed a letter to the Honorable the Secretary of the Treasury & one to the Collector of Philadelphia, stating the contents of the boxes, & requesting that they may be passed through the Custom House without being opened or disturbed.

The freight of the same to Philadelphia has been paid here.

To Hon. J. N. Paulding
 Secy of Navy

I have the honor to be
 Sir, Respectfully &c. &c.

U. S. Ship Vincennes
 Oahu, Sandwich Islands
 November 9th, 1840

Sir,
 The Specimens that have been collected by the Exploring Expedition and shipped at different times to the U. States, have been preserved and packed with the utmost care under the immediate supervision of the Gentlemen to whose Departments they respectively belong; equal care has been taken to seal the boxes, and mark legibly, on their contents, and Catalogues including the most minute Specimen have from time to time been placed in my possession.

I would impress upon the Board, Sect^y of the Navy, that in order to keep them in a state of preservation, and thereby ensure success to this branch of the enterprise, it is of the highest importance, that they be moved as little as possible, and kept unopened, in a safe and dry Depository, until the return of the Squadron, when with the assistance of the Catalogues, they can be arranged in order, without difficulty.

I have the honor to be

Sir,
 Most Respectfully

 November 9th 1840

Sir,

I have the honor to enclose you a list of
 Boxes, Barrels, Bundles, &c. containing specimens
 collected since we left New Zealand.

I have shipped these specimens to New York
 by the Ship Lausanne, and consigned them to the Navy
 Agent at that place. Great care has been taken in their
 collection and preservation, and among them, there are
 many rare and valuable. I must therefore request
 that you will instruct the Navy Agent at New York
 to receive and retain them with care, until you
 shall think proper to have them removed.

I have the honor
 to be

Sir

Oahu, Sandwich Islands
November 28th. 1840

Sir,

I have the honor to inform you that I have sent to New York per ship Lousanne, one of Ward's boxes with living plants from the Fiji Islands, a list of which you will find herewith, and have requested the Navy Agent there to hold them subject to your order.

I regret to learn that the seeds sent to you from Rio de Janeiro were lost by being placed in the hands of irresponsible person, and I trust that those sent from this place and the box of plants will not share the same fate.

Much time has been consumed in gathering and preserving these seeds, and it will be a loss of credit to the expedition if it should fail to benefit the country by the introduction of the many rare and valuable plants among this collection.

I would recommend Feast Senior of Baltimore as a suitable person with whom to intrust them, but he should be made to give assurances that proper care will be given to their cultivation.

I have the honor
to be Sir
