TO OUR FRIENDS AND CUSTOMERS

It is with great pleasure that we are again sending you our 1931 Catalogue, and we beg to tender thanks to old customers who have shown their approval of the quality of our stock and our methods of serving them by repeated orders.

During the past season it has been our privilege to receive once again a record number of orders, and while deeply appreciative of the continued confidence thus shown, we venture to regard this fact as an indication of the success of our efforts to supply the best, and make prices as low as possible with high grade quality.

We grow new varieties of Gladiolus, Dahlias and Peonies from many growers in this country and Europe, from these we select for our customers choice, only those varieties that are of outstanding merit in their particular class. Varieties, for which we find more worthy successors, are discarded each year.

We extend to you a cordial invitation to visit our gardens any time, our blooming season is from June 1st until frost.

Sincerely yours,
J. V. EDLUND.

GENERAL INFORMATION

We are always glad to give information or answer questions of any kind.

Order early, as the stocks of some of our finest varieties are limited. Early orders are solicited to prevent disappointments in case the varieties selected should be sold out.

Discounts. On all orders received before March 1st, 1931, amounting to \$2.00 or more, we will allow extra bulbs, your selection equal to 10% of the order. No orders accepted after May 1st.

We do not substitute unless directed to do so.

Terms. Net cash before shipment, 25% deposit will hold your order until March 1st. Orders not fully paid will be sent C. O. D. for the balance.

Remittance may be made by post-office order, bank-draft, express money order or personal check.

We pay postage on all orders of \$1.00 or more; of less amounts add 25 cents to cover postage.

Six bulbs sold at the dozen rate.

At prices quoted $\frac{1}{2}$ size Gladiolus bulbs will be sold at $\frac{1}{2}$ price, where the price is 20c or more.

In comparing prices please bear in mind that quality bulbs and roots can not be produced and sold at cut rate prices.

If you do not find the varieties you want in this catalogue, write us. We have many of which stock is too limited to list.

Wholesale orders. We are in a position to accept wholesale orders on quantity lots of many varieties listed. If interested write for quotations.

OUR GUARANTEE

Every bulb and root is guaranteed to be true to name and healthy. Our stock is semaphen treated; a certificate of inspection will be attached to each package where required.

If for any reason you are dissatisfied with the stock, when received, return it and your money will be refunded.

How to Grow Gladiolus

Plant the bulbs in well-worked soil 5 to 6 inches deep. Deep planting will serve to protect the roots from the hot sun, keeping more moisture about the roots, and also serves to hold up the heavy spike after it has grown to its full height.

The Gladiolus will thrive in almost any good garden soil, but seems best results are obtained in soil that are more or less sandy. Plant in a sunny location away from trees and large shrubs. The first planting may be made in the spring as soon as the ground is warm and in good workable condition. If a succession of blooms are desired throughout the summer, new plantings may be made about 10 days after the foliage of the previous planting show through the ground and additional plantings continued until the last week in June, which is about as late as is safe to make the last planting in order to secure flowers before frost.

Cultivate often and thoroughly; the more you cultivate the better they grow. Do not allow the ground to bake around the plants. The bulbs should be dug before the plants are too ripe and before hard frosts. Dig the bulbs and cut off the tops close to the bulbs. Dry well in the open air and sunshine, then put in dry airy place for two or three weeks to cure. Be sure to protect against frost. As soon as well dried the old bulbs, bulbets and roots can easily be removed.

Put bulbs in trays not over four inches deep. Store in cellar or basement where the temperature is uniform and around 40 to 45 degrees.

MINNESOTA GROWN

Minnesota grown bulbs are conceded to be the best produced anywhere, because of the climatic conditions which tend to develop a much firmer, healthier bulb than those grown under warmer and more humid climatic conditions.

The Gladiolus

HYBRID DELPHINIUMS

Delphiniums are perfectly hardy, there has been a great revival of interest in them the past few years due to the wonderful improvements that have been

made in them. Several famous hybridizers have been working on them and have produced new forms and types and beautiful colorings, many of them now having beautiful shades of pink, mauve and purple mingled with the various shades of blue and shades of white.

Our plants are grown from the finest seeds obtainable in England and France, which are in no comparison with the old common kinds; they can be planted in September or early spring and bloom the first year. We offer in assorted colors one year plants; each \$1.00; Doz. \$10.00.

We are also offering for spring delivery only, pot-grown plants of Delphiniums. These plants are the same that we will be using for our own planting. To those who have had difficulty in germinating the seed of Delphiniums, this is an opportunity to get these young unflowered plants, and thus get the initial benefit from them.

These plants will all bloom from August until frost, giving spikes from 3 to 4 feet in height and the following year they will be at their best.

Plants carefully packed and guaranteed to arrive safely \$5.00 per Doz.

Mastodon Strawberries

We have grown Mastodon strawberries for the past three years and have found them to be far superior to any everbearing strawberry we have ever seen, planted early they will begin bearing about August 1st and continue until killed by heavy frost and again an early crop in the spring; plant in rows about three feet apart and one foot in the row and keep free from weeds and remove all blossoms until about July 1st, then give them a good dressing of well-rotted manure and a good mulch. Our plants are the true Mastodon ever-bearer. Doz. 50c; one hundred \$3.50, postpaid.

Montbretias

One of the brightest of our late summer and fall flowering bulbs. They should be set out early in April. They should be planted and handled the same as Gladiolus. We offer, only the variety *Crocsmiaeflora* which is a color of orange scarlet. Strong bulbs, per Doz. \$1.00.

Dahlias

Dahlias are easily grown, requiring no special soil or treatment to bring them to perfection. They like an open, sunny situation, but also succeed in partial afternoon shade.

Prepare the soil thoroughly by spading 12 to 18 inches deep, and if the soil is poor work in some 2-16-8 Commercial fertilizer about two weeks in advance of planting, about six or seven pounds to 100 square feet. Dig holes 3 or 4 feet apart and about 5 inches deep; drive a stout stake in each hole and lay the tuber down flat with the crown toward the stake and the eye upward, then cover with 2 or 3 inches of soil, leaving the balance of the hole to be filled up later, after the plant comes up.

Plant any time from May 15th to June 15th in this vicinity, the later date being the best for exhibition flowers.

To prevent the plant from growing too tall, they can be pinched back at the top when they have made their third set of leaves, this will make them branch and we think produce more blooms.

Allow only one plant to each stake. Tie plant securely to stake as it continues to grow. Cultivate at least once every week and after each rain, until the buds appear, rake in the soil a handful of hardwood ashes if possible and mulch the ground with well-rotted manure or lawn clippings and water thoroughly whenever the plants need it.

Disbudding the side buds, leaving only the terminal bud to develop, will bring larger blossoms.

After the plants have been killed by hard frost they should be carefully dug, allowed to dry a few hours, and stored in a dry cellar tops down and with dry soil over them to keep from shriveling. We have them stored in boxes or barrels and covered them with dry pine sawdust with excellent results.

GREEN PLANTS

Our cuttings are taken from stock of healthy named varieties and grown cold, it has been our experience that cold grown plants will establish themselves more quickly than if grown under a very warm condition when they are moved to the field and they need not be protected against the warm sun.

The popularity of our green plants is growing fast, and we suggest that you give give them a trial on your next order if you are buying the higher-priced varieties, as plants are about one-half of root price in most cases. Green plants when properly grown from healthy stock, give equal or better blooms than from roots.

Plants should be set a little deeper than roots, plant at least six inches deep, the lower leaves may be removed if necessary, the after-cultivation and care of plants should be the same as for roots. Our plants will be ready for shipment after May 20th.

Our collection of Dahlias received the highest awards at the Minnesota State Fair and at the annual show of the Minnesota Dahlia Society 1930.

Full Illustrated Cultural Directions furnished with each order.

- WATCHUNG SUNSET (Smith)**—Decorative. Lavender-pink. Good sturdy grower, a wonderful keeper and highly recommended as an exhibition flower. Plants \$2.50

BEGINNERS COLLECTION OF DAHLIAS

For those who are not familiar with the different varieties of Dahlias. We will send you six Dahlia roots, all different and labeled correctly, for \$3.00 pre-paid. This collection is made up from surplus roots some of which we have not in sufficient quantity to list in catalog.

Pompon Dahlias

This class is a miniature form of the show or ball Dahlias, having the same round, ball-like form, but much smaller in size. The plants are also smaller, of branching habit, producing the flowers in endless profusion. As they can be cut in sprays they are valuable for bouquets and particularly table decorations. They last a long time when cut.

We only offer tubers of these as we do not propagate green plants of this section.

- AIMEE**—A wee flower of bronze, color new and charming. Each 50c
- BELLE OF SPRINGFIELD**—One of the smallest and most popular on the exhibition table. Soft red. Each 50c
- CHARMING**—Fine for exhibition or cutting. A beautiful shade of lavender pink. Each 50c
- DAINTY**—Tiny pointed petals of white, shading to pink. Each 50c
- GOLDIE**—A tiny flower of pure gold color. Each 50c
- HARRY SNOOK**—Beautiful light pink, with gold stems. Each 50c

- YELLOW GEM**—Canary yellow, small and good form. Each 50c

Peonies

Peonies are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted, increase in beauty each year.

Planting—Peonies may be planted any time in the Fall, from September 1st until the ground freezes. No Peonies are handled by us in the spring, as that is entirely the wrong time to plant them.

Size of Root—Making a specialty of growing Peonies and Gladiolus our progress depends entirely upon the results obtained from our roots and bulbs; for this reason we quote prices on 3 to 5 eye, or large divisions only.

Important! An important point to observe in the planting of Peonies is not to plant too deep. The roots should be placed so that the eyes are two inches below the surface, and the soil tightly packed about them.

It will be noticed that we are not quoting any Peonies for less than \$1.00 as we cannot grow, care for our stock, dig, pack, label and supply our customers with good, strong plants and make a living profit for less than this amount.

Discounts—On all orders amounting to \$10.00 or more a discount of 10% will be allowed when cash accompanies the order.

The figures that follow the variety name denote the rating given by the American Peony Society. The valuation is based on a possible score of ten. Where no rating is shown, the variety is too new to have had sufficient votes to be properly judged.
