# Creating a Front-end App

---

- Reuse data from multiple items
- Present specific views of Wikidata data
- Customize the UI for use cases
- Encourage users to explore your data

# Audio Visual Materials

---

- Combine data from Wikidata with materials from institutional collections
- Present Wikimedia Commons material as IIIF

# Cataloging and Description

---

- Our institutions have already created documentation for our collection materials
- Opportunities to reuse descriptions and enrich them by combining with LOD

# International Image Interoperability Frame-work

---

- Open API specifications
- Enables interoperability of digital assets across institutions
- Widely-adopted by cultural heritage institutions
