This is the best...Our New certified Gold Tag Lawn Grass Mixture

Certified by Maryland State Board of Agriculture

Gold Tag Certified Lawn Mixture Provides:

- Superior Color and Texture
- Longer Life
- Disease Resistance
- Vigorous Growth
- Reduced Maintenance
- Adaptability to

Variations in:

- Soils
- Moisture
- Acidity
- Sun/Shade
- Drainage
- Fertility

1,000 sq. ft. box \$5.45
2,500 sq. ft. box \$12.95

The ultimate In consumer protection

This quality seed mixture is recommended for use in Maryland and Virginia by Maryland and Virginia research and extension turf specialists where a durable, vigorous, disease resistant, deep-rooted fine texture turf is desired. Seed lot certified to be of the kinds and varieties listed on the label and to be free of all noxious weed seeds and free of objectionable weed and crop seeds. Seed lots inspected, tested, mixed, tagged and sealed by a representative of the Maryland State Board of Agriculture - see "Certification Seal" on the box.

Why certified seed?

Certified seed is the best guarantee of varietal purity. The selected seed fields are inspected by state agricultural officials while growing and at the time of harvest. Seed lots are laboratory tested for purity, germination, weed and crop content and only lots meeting high standards are eligible for certification. All containers of certified seed are sealed by state agricultural inspectors to insure that the contents reach the consumer in uncontaminated form.

This is the best!

"Certified Gold Tag" is the best selection of established and new turfgrass varieties that have shown superior performance over a number of years in our area. These varieties are known to be complimentary to each other in providing resistance to disease, adaptability to variations in moisture, soil types, fertility, acidity, and exposure to sun.

**Planning on being in

Develop a beautiful Bolgiano Lawn...Nature-ally

Nature-ally is the way to a beautiful lawn

The grass seed you select must be adaptive to our unique climatic conditions. Bolgiano, as your local seed house, selects and mixes only high quality varieties of turf grass seeds that have tested and performed well in this area.

Nature-ally plant your lawn this fall

Ally with nature and plant your lawn this fall. Fall is nature's time to drop seeds. The cool-season grasses used in Bolgiano's mixes give maximum root growth in fall and early spring when top growth is slow. A well developed root system is much better able to withstand the stress of summer heat, and will crowd out weeds.

Nature-ally prepare your soil

Where a sufficient depth of reasonably good topsoil does not exist, that which is there must be improved to a depth of 4-6 inches, or additional good soil must be brought in.

Nature-ally improve your soil

For each 1,000 square foot area, work in to a depth of 4-6 inches 50 pounds of organic material such as Milorganite, or cow manure (free of weed seed.), 100 pounds of reed-sedge peat moss or humus, 25 pounds of super phosphate and 50 pounds of ground limestone. These materials can be spread at one time and worked in together using a spading fork, spade, or small rotary tiller depending on the size of the area. Level off to make the seed bed; then spread 5 pounds of Bolgiano's turf food; cover lightly before seeding. Care should be used to assure proper grading for good drainage.

Nature-ally seed your lawn

Sow seeds according to coverage recommendations on box. It's the number of seeds in a package that's important - not the weight.

Using either a mechanical spreader or by hand, walk in parallel rows in one direction sowing $\frac{1}{2}$ the required quantity of seed, then walk in parallel rows at right angles sowing the rest of the seed.

This will insure even coverage. After seeding, roll the area or tamp the earth firmly, to promote a good soil to seed contact. This helps the seed draw water from the soil. Then water with a sprinkling effect but do not soak! Keep the earth moist until the seeds germinate.

Nature-ally improve an established lawn

Rake the lawn vigorously with a metal rake. Bite into the soil, tear out undesirable thatch, rake in some peat, apply 50 pounds ground limestone and 5 pounds of Bolgiano's Gold Tag Ura-Form Turf Food for each 1,000 square feet of lawn. Sow seed according to preceding instructions.

bolgiano

Seedsman since 1889

Bolgiano's Nature-ally Winter Fertilization Program puts the growth where you want it!

Fertilization during the cool season reduces the strain on the rapidly growing grass in the warmer months which helps reduce summer burn out -- a common problem in this area.

The cool season is also when the grass plants are putting on maximum root growth, instead of top growth, and manufacturing plant nutrients for storage in the roots. A healthy root foundation will sustain the turf all year.

In autumn many weeds die and are not present to compete with the grass for fertilizer.

Gold Tag Turf Food Fertilization Program . . . Allied with Nature

MONTH	FERTILIZER	RATE
September	Gold Tag Turf Food	5 lbs. per 1,000 sq. ft.
October	Gold Tag Turf Food	5 lbs. per 1,000 sq. ft.
December	Gold Tag Turf Food	5 lbs. per 1,000 sq. ft.
February	Gold Tag Pre-Emergent Crab Grass Killer	8 lbs. per 1,000 sq. ft.
May/June	Gold Tag Weed and Feed	4 lbs. per 1,000 sq. ft.

Care of your lawn

Watering: Lawns should receive one inch of water each week from June through September. This deep watering helps to develop a better root system deep in the soil. By applying the water slowly, maximum advantage can be made of each gallon. The water moves through the top soil and subsoil slowly, and if water is applied too rapidly, the surface will become saturated and much of the water will run off and be wasted. You may check your watering habits by using a trowel to see that the soil is moist to a 4" depth.

Saucers or tin cans can be used to measure the amount of water applied to a specific area of your lawn. After a few timings you will know how long it takes to apply an inch of moisture. Don't make frequent or light waterings because this will restrict root development deep in the soil and will result in a shallow root system. Since the surface soil can dry out rapidly - even a few hours - it is essential that the grass roots be below this area. Deep watering at infrequent intervals will cause the root system to develop deep enough so that it will remain moist and cool all week.

Cutting: There are two important considerations to remember when cutting your lawn:

1. Mow high--2 inches or so. Tall grass shades out unwanted weeds. Tall grass also tends to have deeper roots which can reach deep for water and nutrients to sustain the turf during summer heat and drought. Tall grass shades the soil.

2. Mow frequently so no more than one-third of the leaf blade is removed at any one cutting. Leaf blade area is needed to capture the sun's rays and manufacture grass food by photosynthesis. Suddenly removing leaf blade area reduces food production and causes the grass plant to utilize reserve nutrients stored in the roots and rhizomes. This weakens the grass plant making it more susceptible to disease, heat, drought, insect attack and competition from weeds.

PLANT SPRING!

How to plant bulbs

Spring flowering bulbs are easy to plant. Simply:

1 - Dig a hole with a spade or trowel to the correct depth (3-6 inches depending on variety. Depth information is in this guide (see diagram, page 11) and comes with the bulbs).

2 - Set bulbs in position with pointed end up. If you wish, add Bolgiano's bone meal or other slow release high phosphate fertilizer.

3 - Replace soil.

4 - Water bed thoroughly immediately after planting. This is important to help the bulbs develop good root systems. Then you can walk away whistling, and before you know it . . . Spring flowers.

When to plant bulbs

In October and November

More specifically, when soil temperature cools down to

50 to 55 degrees, bulbs need four weeks in the soil before deep frost sets in to develop a good root system.

How to use bulbs

Many ways. For example:

In moss beds of color

In borders along the house, along walkways, around trees and bushes, along hedges, around the mail box.

In ground cover such as pachysandra, ivy, myrtle, etc.

In beds with annuals.

In naturalized, meadow type set-ups. Take a handful of bulbs and toss them in one sweep. Plant them in the ground where they fall. Use minor bulbs such as Crocus, Snowdrop, etc. which are less expensive.

In rock gardens.

How far apart to plant bulbs

Distance same as depth.

The list of bulbs below is arranged in the order in which blooming occurs. Exact blooming time can vary from year to year depending on growing conditions, however the

bulbs will generally bloom in the below sequence relative to each other. The heights listed are relative. Exact height will depend on growing conditions.

Flowering Schedule

Under normal conditions, the order of bulb flowering is as follows:

- | | | |
|----------------------------------|---------------------------------|--|
| 1 Galanthus (Snowdrop) | 8 Trumpet Daffodil | Daffodil: |
| 2 Eranthis (Winter Aconite) | 9 Single Early and Double Early | 13 Short-cupped, Poet's Narcissus, |
| 3 Iris Reticulata | Tulip: | Jonquil |
| 4 Chionodoxa (Glory of the Snow) | 10 Hyacinth | Tulip: |
| 5 Pushckinia libanotica | 11 Medium-cupped daffodil | 14 Parrot, Cottage, Lily-flowered, |
| Tulip Species: | Tulip: | 15 Double Late, Darwin, Breeder |
| 6 Kaufmanniana, Fosteriana, etc. | 12 Triumph, Darwin Hybrid | 16 Scilla Campanulata (Spanish squill) |
| 7 Muscari (Grape Hyacinth) | | 17 Dutch Iris |

Bulb Planters - the short and long of it

Bulb planter

Plant setter and bulb planter. This handy tool makes a hole in one operation. Merely cut the tool into the soil, remove it with a slight twisting motion and the soil comes with it, leaving a clean hole in which plants or bulbs may be set BP \$1.79 each

Long-handled bulb planter

Easily cuts a cylindrical hole up to 10 inches deep. With a slight twist, the tool draws out the soil, leaving an ideal hole for bulbs and plants, and automatically pushes the soil from the cylinder with each succeeding insertion. LBP\$4.09

F.W. Bolgiano & Co., 411 New York Ave., N.E. Washington, D.C., 547-4812

There's a new stranger in town

FloweRock, a new dimension in ground cover

From way out West comes this strange, good lookin' volcanic rock that's amazingly lightweight. FloweRock is an economical ground cover designed especially for landscaping. Adds beauty, insulates the soil and helps retain moisture. Prevents mud splash on walls, windows and walks. Will not harbor termites, insects or vermin.

FloweRock Boulders (brown) 1000 lb. ctn. 50-100 lbs. ea. (approx.)	\$15 lb.
FloweRock Tumblestone (brown) 60 lb. ctn. approx. 12 stones at 5 lbs. ea.	\$14.99
FloweRock Granules (reddish brown) 50 lbs. per bag	\$4.98

The Repeater I-Beam Open Back Shovel

Here's an economical shovel that is made to really last. The Repeater has special I-beam construction - similar in principle to that found in tall office building (see enlarged drawing at right). Here's strength that won't let you down. Steel blade is heat treated and handle is grade 1-A Ash.

\$4.95

Steel "I" beam construction makes a bridge of strength at point of greatest stress

Prevent winter injury- protect your plants with mulches, nature-ally

How to use mulches effectively

Mulches should be used to protect low-growing evergreen plants and somewhat tender plants, including many bulbs, from winter injury from low temperatures when there is no snow cover. Placed around plants newly set out in the fall, a suitable mulch will prevent them from being heaved out of the ground by alternate freezing and thawing during the winter - a common experience in the Washington area.

Byron's Tan Bark

Fine quality, clean, genuine spent dark oak bark. Excellent decorative mulch and soil conditioner. Helps protect plants, holds moisture and checks weed growth. 1.7 cu. ft. bag (approximately 50 lbs.) **\$2.59**

Cascade Chunk Bark

Covers soil beautifully. Three sizes: small (1/4 - 3/4") - A decorative ground cover and ideal carpet for paths, playgrounds and pet enclosures. Medium chunk bark (3/4 - 1 1/2") - For flower and shrub beds, edgings and all accent areas. Large chunk bark (1 1/2 - 2 1/2") - The ultimate in decorative ground cover. 3 cu. ft. bag **\$4.50**

Pine Bark Mulch

Provides an excellent mulch to landscaped areas, discourages weeds and gives maximum beauty to your plantings. 3 cu. ft. bag **\$2.99**

Pine Bark Chips

A companion product to Pine Bark Mulch. May be used alone or as a top dressing for that well-dressed appearance. 3 cu. ft. bag **\$3.89**

Soil conditioners from Bolgiano

Sphagnum Peat Moss

The best rich brown sphagnum peat moss, finely granulated, thoroughly air dried and sun cured, is 98% organic, maintains proper moisture. As a mulch around vegetables, flowers and shrubbery.

Standard 6 cu. ft. bale **\$7.25**
 Kar 4 cu. ft. **5.35**
 Karry 1 1/2 cu. ft. **3.00**
 Pick-Up 3/4 cu. ft. **1.80**

3 pecks **1.29**
 1 peck **.75**

Reed-sedge Peat

The original BACTIVATED peat, rich nitrogen-releasing bacteria. A highly organic, living sedge peat, screened of impurities and ground to a smooth texture. Binds sandy soils, loosens clay soils, and releases moisture during dry spells, making the perfect soil conditioner, mulch and growing medium. 100 lbs. covers 300 sq. ft. 1/4 in. deep.

100 lbs. **\$4.25**
 50 lbs. **2.69**
 25 lbs. **1.79**

peck **1.29**
 1/2 peck **.79**

Peat Humus- Natures' own soil enricher

A cultivated reed and sedge peat, odorless, sweetened and of a fine black fibrous texture. It is the "pure humus" organic soil vitalizer, regulates moisture and develops strong root systems. Ideal for top-dressing lawns and gardens. For lawns use 200 lbs. per 1000 sq. ft. 50 lbs. **\$1.95**

F.W. Bolgiano & Co. 411 New York Ave., N.E. Washington, D.C. 547-4812

They're for the birds...Hollow-

Hollow-Log houses and feeders are of the highest quality in materials and workmanship. All board parts are craft finished and dipped in hot oil stain for lasting beauty. Long resin coated nails prevent swelling or warping apart. All houses have proper size entrance hole and nest cavity, ventilation, drainage, open to clean and are easy to erect.

Bluebird houses are also used by swallows, woodpeckers, nuthatches, chickadees, etc.

Bracket House

Most natural, actually a hole in a tree. A beautiful lawn ornament and loved by the birds.

Log bird houses and feeders

Hollow-Log seed feeders are ruggedly built to last for many years. Feed troughs are narrow, birds can eat but not scratch the seed out. As they eat the trough automatically fills. Glass sides show when feeder needs filling. All exposed glass edges are dulled so birds cannot get cut. All models have copper ridge hanging rings and filler door.

Rustic Feeder

Hollow-log filled with our seed and suet mix. Copper hardware, nifty looking and a favorite of chickadees, nut-hatches, woodpeckers, etc. Gift Boxed.

SF-2 Packed 12 - weight 21 lbs
\$4.45

Junior Feeder

HDF Holds 3 lbs. of seed. Packed 8 - weight 20 lbs \$6.45

Senior Feeder

HDF-5 Holds 5 lbs. of seed. Packed 4 - weight 14 lbs \$7.95

The Cafeteria

HDR-SR has seed hopper in center with suet cake holder on each side. Holds 3 1/2 lbs. of seed and 2 suet cakes.

Packed 4 - weight 13 lbs \$8.95

Refill

Peanut heart, sunflower, millet and cracked grain bonded with pure beef kidney suet, molded in a cylinder to refill the Rustic Feeder. An excellent food wherever a round cake is used. Cellophane wrapped.

SR-2 Packed 24 boxes of 4 - weight 20 lbs \$0.75

Wedge Suet Cake

SR-3 Our high grade suet and seed mix molded in a plastic dish. Easy to handle, no messy fingers. Packed 24 in boxes of 4 - weight 17 lbs \$1.95

Wedge Cake Feeder

WF-1 A small screw fastens it to your favorite viewing spot. Attracts the small suet and seed eaters. A lot of entertainment for little money. Packed 24 - weight 24 lbs \$5.55

Other fine lawn grasses from bolgiano

Kentucky Blue Grass (*Poa pratensis*)

The most widely adapted permanent lawn grass. Creeping underground stems produce a durable green turf that thrives best in neutral soil. Recommended mowing height is 1½ inches or more. May be sown alone or in mixtures. Lb. .98; 5 lbs. \$4.45; 25 lbs. \$21.00.

Creeping Red Fescue (*Festuca rubra*), Pennlawn Strain.

A perennial, spreading from roots that creep underground, producing a dense green turf of needle-like leaves. Highly resistant to drought and disease and thrives in all types of soil. Sow in combination with other grasses. Lb. \$1.29; 5 lbs. \$5.45; 25 lbs. \$22.50.

Fylking Kentucky Bluegrass

An improved variety of Kentucky Bluegrass. Low growing, fast spreading, and resistant to smut and many other diseases, it's one of the four improved varieties recommended for the Maryland-Virginia area. (Other three are Merion, Pennstar, and Adelphi) Lb. \$3.35; 3 lbs. \$9.90.

Penncrest Bent (*Agrostis palustris*)

Developed by Penna. State University, a truly fine creeping Bent Grass from seed. It surpasses other Bents in density and is more disease resistant. Especially adapted for golf putting greens. Lb. \$5.25.

Red Top (*Agrostis alba*)

A member of the Bent Grass family. It is used as a quick cover nurse grass, lasting about three years. Lb. \$1.98.

Merion Kentucky Blue Grass.

Developed by the USGA Greens Section. A superior strain of Kentucky Blue Grass, being sturdier, more drought and disease resistant. Withstands closer mowing. May be sown alone or in mixtures. Lb. \$1.98; 5 lbs. \$9.75; 25 lbs. \$45.00.

Chewings Fescue (*Festuca rubra fallax*)

Noted for its ability to thrive in shade, especially under trees. It forms a dense, mat-like turf, fine leaved, drought resistant and adaptable to most soils. Lb. \$1.29; 5 lbs. \$5.45; 25 lbs. \$22.50.

Kentucky 31 Tall Fescue.

An easily started, vigorous, broad-bladed grass which endures wear, particularly on playgrounds and athletic fields. Adaptable to wet, poorly drained soils, as well as dry. 5 lbs. \$2.95; 25 lbs. \$14.50.

Pelo Perennial Rye Grass.

Forms a fine-leaf turf that's dense, resilient and tough; resistant to heat, drought and leaf disease. Is clean mowing and grows thicker each year. Compatible with blue grasses and fine-leaved fescues. Lb. \$1.45; 5 lbs. \$6.75.

White Clover (*Trifolium repens*)

A familiar low-growing, perennial, having white blossoms and spreading by trailing stems. Hardy and rapid growing. ½ lb. 75¢; lb. \$1.25.

Annual Rye Grass (*Lolium multiflorum*)

Sometimes called Italian or Domestic. Generally used as a quick-sprouting, fast-growing, temporary cover, when conditions are unfavorable for permanent seeding. Somewhat coarse in texture. 5 lbs. \$1.49; 25 lbs. \$6.45.

Perennial Rye Grass (*Lolium perenne*)

Of a finer texture than annual, lasting several growing seasons. It is a good grass for late seeding in the spring and fall. 5 lbs. \$2.69; 25 lbs. \$10.95.

Green survival . . .

What can one man do?

It is time for a change in our attitude toward the use of our resources if we are to have a clean and beautiful environment - a liveable environment. It is not too late. The knowledge, the ability, the tools are at hand. Some are discussed here.

In the struggle to save man from his own ecological abuse, the nursery industry provides leadership and technical assistance to purify the air, stabilize soil, clarify water, and abate noise. Because of the enormously important role of planted materials - trees, shrubs, grass, plants - in the ecological balance, the people of the nursery industry recognize that green is truly the color of survival in the environmental crisis.

And green survival depends on you.

Air

Plants are one of nature's most efficient dust traps. 12 million tons of particulate matter (the dirt in the air we breathe) are released into the atmosphere of the United States every year... and trees, shrubs, vines and flowers act as natural traps for this air-borne matter.

The hairy leaf surfaces catch falling particles and keep a steady rain of dust and dirt from saturating the air with solid pollutants. In fact, trees are such effective dust catchers that one of our cities, Los Angeles, has to wash its trees periodically in a detergent solution. In another area, the dust count on the sheltered side of a plant section was 75% lower than a similar count on the windward side.

So the trees and shrubs you plant around your home can form a protective barrier, contributing to the cleaner air you need.

Earth

You can cut your weekly refuse volume in half or better by a combination of these steps:

*Flatten all containers to reduce volume.

*Cut both ends out of metal cans.

*Deposit newspaper in a recycling collection point near you.

*Start a compost pile for vegetable matter refuse. Mix with soil and it will decompose rapidly to enrich the ground. If you haven't room for a compost pile, get the same effect by burying the vegetable refuse in your garden. Your nursery garden center can give you simple instructions.

*Maintaining good healthy soil and cutting grass to a proper length can help keep crabgrass out of your lawn. For blue grass type lawns, no lower than 2½ inches; for bermuda or zoysia type lawns, ½ to ¾ inches.

Water

There are some periods in the life of your trees, plants, shrubs, and grass when a considerable amount of water is required; however for most of their life they will thrive on less water than you might realize. Research has shown that thorough watering as needed is much better for the plant than frequent limited watering. Much less costly, too. Let your retail nursery advise you; you'll enjoy healthier plantings while you save water.

Sight & Sound

Plant parts break up sound waves, change their direction, and reduce their intensity. Among the various types of buffer plantings you can use are: hedges, trees, shrubs, grasses, vines and combinations of these.

In addition to their service in silencing your surroundings, shrubs and trees can screen moving traffic or other unwelcome visual intrusions, giving your yard a sense of privacy you'll welcome.

. . . it depends on you.
