DIVISION OF STABLISHED 182 RPORATION

CARD.

We have recently constructed a much needed rear entrance to our premises from 21 1-2 North St., and having removed the remaining walls between our store and that formerly occupied by Parker & Wood, whose business we bought in 1892, we are enabled to re-locate our shipping room between our elevators and give our salesroom an unbroken area of 10,000 square feet, which in connection with our aggregate floorage of nearly two acres, affords an opportunity for business probably unapproached by any other house in our line in this country.

A clock that stands fifteen feet above the sidewalk now marks our principal entrance, 51 and 52 No. Market St., and will prove a convenience to our patrons as it is one of Howard's

finest movements.

Your consideration is asked for the breadth and usefulness of our offer, "We Double It," (see pages xi. and xii.), made in the interest of agriculture and horticulture. Under the same offer, made last year with the approval of Horticultural and Agricultural Societies generally, we paid hundreds of dollars to exhibitors in nearly every state in the Union.

We make free delivery of all goods, with very few exceptions, throughout the country when cash accompanies the

order. (See "Special Offers" 3rd page of cover.)

Breck's Chance Potato, Harvard Sweet Pea and New Life Pea, introduced by us in 1895, met with unqualified approval, and are placed in the front rank of desirable acquisitions.

Attention is called to our complete list of Insecticides and Fungicides, with a Spraying Calendar that covers the experience of years of the Experiment Stations throughout the country, and which makes an invaluable guide for the use of these articles. (See pages 53-55.)

New Philadelphia Lawn Mowers "T" and "K" (see pages xxi. and xxii.) that combine every improvement in Lawn

Mowers will be a feature of our Machinery Department.

The business of this Department, as well as that of our Hardware, Woodenware and Poultry Supply Departments, and our Bureau of Registry and Information is steadily increasing, and no effort will be spared to keep all well abreast of the times.

We are thankful for the generous patronage heretofore given, and assure our customers that the utmost care and fidelity

will be exercised in promoting their interests.

Entrance at the "Big Clock" 51 and 52 North Market St., also entrances at 46 Merchants Row and 21 1-2 North St.,

BOSTON, MASS.

Jufth Brock for

OUR GUARANTY.

First.—Our seeds are guaranteed pure and clean, and of the percentage of vitality named on the label accompanying and describing contents of each package.

Second.—This guaranty is subject to the test and analysis of the botanist of any of the State experiment stations, and to properly authenticated complaint being made to us within twenty days from time of purchase of seeds complained of. If the result of the analysis does not confirm the guaranty, we will take back the seeds, and refund the money paid for them, and pay the cost of transportation both ways.

Third.—Seeds once sown, or the above specified time for complaint having expired, our responsibility ceases. The results in field culture depend upon so many things besides the quality of the seeds, that the growth and crop cannot be guaranteed.

The advantages of this method of guaranty will at once be apparent to the careful farmer; it will give security as to vitality, freedom from noxious weeds, and to some extent, confidence as to varieties planted; in short, by obtaining seeds a few days before they are required for planting, you can have, without cost (for we assume expenses if results of tests are unsatisfactory), a warrant against almost everything except the visitations of Providence.

A GOLDEN ROLL OF HONOR.

J. HARRIGAN, Esq.
East Foxboro, Mass.
A Customer for over 40 Years.

We desire to establish a GOLDEN ROLL OF HONOR that shall include, as far as possible, the names of those who have dealt with us either as buyers or sellers for over forty years.

It is our purpose, in various ways, to show in some degree, however inadequate, how highly we esteem this long business connection.

THEREFORE,

PLEASE NOTICE. We will esteem it an especial favor if parties who have traded with us for forty years and upwards will advise us of the fact, with particulars as to length of time of their dealing with us, and of any features of interest that have been connected with the same during these long periods of years. One cannot but agree that when a silvery-haired customer remarks to us, as is not infrequently the case, "I have traded with this house, father, son, and grandsons," 40, 50 or even 60 years, as the case may be, the relation between us is a little nearer than that of mere buyer and seller, and that it is not surprising that we feel it to be so.

The likenesses reproduced above are those of old friends who have traded with the three generations of Brecks, who have controlled this business since it was established nearly three quarters of a century ago. All are customers to-day, 60, 50, 40 years, surely this is evidence of

honorable dealing.

1896

NOVELTIES AND SPECIALTIES

IN VEGETABLES.

This list embraces new varieties that are, we believe, meritorious, and standard sorts worthy of special attention.

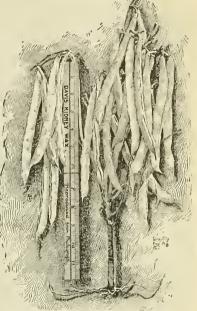

DAVIS' KIDNEY WAX BEAN.

Expert bean growers claim that this new variety will entirely supersede the old Kidney Wax and White Wax varieties, because the seed is pure white, ripens earlier, and has all the requirements as to quality, shape, size, productiveness, ripening well to the tip, hardiness, etc., that go to make up the perfect bean either for the private or market grower. Per pkt., 10 cts.; pt., 35 cts.; qt., 60 cts.

BRECK'S SOYA BEAN.

(Glycine Hispida,)

This bean was introduced by us in 1893, and specially recommended Into bean was introduced by us in 1893, and specially recommended to be grown for fodder and silo purposes as well as the best New England green crop for plowing under. The plant matures in New England and an average crop of from twenty-five to thirty bushels per acre may be harvested. The dry beans are fit either for baking or they can be made into meal by the local miller. This meal is more valuable, ton for

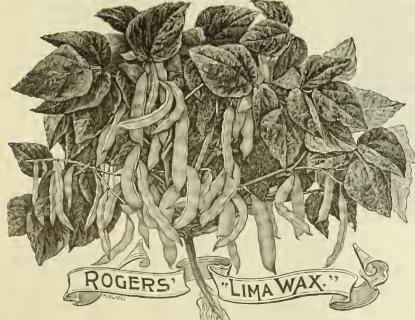

Davis Kidney Wax Bean

ton, than cotton-seed meal, bran. or any grain, being very high in nitrogen, which is essential in feeding either for growth or milk. When roasted and ground the beans form an excellent substitute for coffee. They may be sown broadcast at the rate of half a bushel per acre, or planted in drills three feet apart and one foot between the plants. Per pkt., 10 cts.; qt., 20 cts.; pk., \$1.25.

ROGERS' LIMA WAX BEAN

Is branching and vigorous, with an immense amount of foliage; pods are borne in the greatest profusion, a single plant often having 60 or more.

When in bloom the plant is completely covered with flower spikes, and as the pods form in clusters they sink beneath the dense foliage, which shields them from light showers, heavy dews, and hot sun, which prevents their rusting or becom-ing soiled. The pods are the broadest of all wax bush beans, color transparent, glossy lemon wax, which they retain for a long time after being picked. This bean is very productive, handsome color, delicious flavor, and being white seeded makes an excellent dry bean for baking. Pkt., 15 cts.; 2 pkts., 25 cts.; 10 pkts., \$1.00.

Business looks well and the farmers here are crasy over Breck's Seeds, as you will see when you hear from me again with a batch of orders. W. L. W.,

Searsmont, Me.

THORBURN PROLIFIC MARKET BEAN.

An exceedingly vigorous and healthy grower and enormously productive. It is rust-proof to a remarkable degree. The seeds being black, it is likely to remain true to its character longer than light or different-colored beans. The pods are of a light green color, long and perfectly round, solid-fleshed, and of very soft marrow and texture. Per pkt., 10 cts.; pt., 15 cts.; qt., 30 cts.

HORTICULTURAL LIMA POLE BEAN.

This is described as a cross between the Common Lima and Horticultural beans. It has the shape of the former and color of the latter, while its flavor is a combination of these two finest of beans. It is very prolific, bearing five to seven beans in each pod, and is fully three weeks' earlier than any other Lima. Per pkt., 10 cts.; qt., 30 cts.; pk., \$2.00.

THORBURN'S VALENTINE WAX BEAN.

This is without any exception the earliest Wax Bean in use, being even earlier than our Refugee Wax. Beans planted on June 18 produced pods 4 inches long by July 25, and on August 1 half a crop could be picked.

The pods are very meaty, and with so very little string that they may justly be called *stringless*. Certainly no other bean has less string or hard shell to the pod as long as they are suitable for cooking. It is the best quality for snap beans of any Wax Bean in use. It is remarkably free from rust, and remains a long time without becoming tough. Pkt., 10 cts.; pt., 20 cts.; qt., 35 cts.; pk., \$2.25.

So. Presque Isle, Me., Oct. 22, 1895.

Gentlemen,—We obtained two first prizes with the product of your seeds, including one for Wax String Beans.

F. McG. & Son.

J. E. Hackett, Dover, N. H., was awarded thirty first prizes with Breck's Seeds at the Rochester Fair Association Exhibition, including two for beans.

WORCESTER CARMINE PODDED HORTICULTURAL POLE BEAN.

This bean, offered under many names, is the richest colored and most productive Horticultural Variety produced to date. The pods are of a bright carmine color, very large and well filled with extra sized beans that are also of a very bright appearance. It has so many features to recommend it that we feel sure both the private and market grower will, after a fair trial of it, discard other Horticultural Pole sorts. Pkt., 10 cts.; pt., 20 cts.; qt. 35 cts.; pk., \$2.25.

The collection of Beans I had from you gained me first prize at the New York State Fair.

C. W. Eno, Hannibal, N. Y.

COLUMBIA BEET.

When this beet was introduced, the claims made for it were so many that we doubted if any one variety could embrace them all, but two years' trial has demonstrated their correctness. Its handsome appearance is well represented in the illustration herewith. The roots are of a neat turnip shape, with smooth skin and deep blood-red flesh, of rich, tender quality. It is as early as the Egyptian and does not become coarse and stringy as does that variety when of large size. Compared with such sorts as Edmands' and Eclipse, the Columbia has proved earlier than either and even better in quality than these two really first-class varieties. It is of neat growth with rich bronze color foliage. We recommend it to both private and market growers. Pkt., 5 cts.; oz., 10 cts.; lb., 75 cts.

I was awarded first prizes on Edmands' Egyptian and Crosby's Egyptian Beets at Rutland County (Vt.) Fair on the product of seeds bought of Breck.

B. W. Brown, Springfield, Vt.

CROSBY'S EGYPTIAN BEET.

A desirable extra-early market variety, selected from the original Egyptian by the late Josiah Crosby, of Arlington, who spared neither labor nor expense in perfecting it. It is as early as the original variety, thicker, of better color and quality, besides being smoother. The seed we offer is not Arlington grown, but was carefully raised from stock seed supplied by an Arlington farmer. Per pkt., 5 cts.; oz., 10 cts.; lb., 75 cts.

Edmands' Beets, from Breck's Seeds, exhibited by Warren Heustis & Son, Market Gardeners, Belmont, Mass., at the R. I. State Fair, obtained first prize.

NEW ROSE CELERY.

For quality this celery stands in the front rank. The color is, as the name implies, a delicate shade of rose, the quality (and comparisons have been made by disinterested authorities) is ahead of any other varieties in cultivation, being fine, mild-flavored, solid, crisp, and entirely free from stringiness. Per pkt., 5 cts.; oz., 25 cts.; lb., \$3.50.

PARIS GOLDEN SELF-BLANCHING CELERY.

Our Illustration of Paris Golden Celery is a photographic reproduction of a single plant grown from Breck's Seed, and which was exhibited at the Massachusetts Horticultural Society's Show last October, by Messrs, W. Heustis & Son, Belmont, Mass. A special prize of \$8.00 was awarded it as the finest specimen ever tabled. Plessrs. Heustis showed this same strain at four different exhibitions of the Massachusetts Society and was each time awarded first prize.

Breck's Paris Golden Celery, (Self-Blanching,)

We offer not only the same strain of seed, but seed from the identical lot that Messrs. Heustis was supplied from. It was grown for us by the originators, in France, season of 1894, and in our tests recently made shows a growth of 90 per cent. It is almost entirely pure and true to type, and cannot but give perfect satisfaction to those who plant it. Pkt. 10 cts.; oz. 35 cts.; ½ lb., \$1.00.

BOSTON MARKET CELERY.

We have pleasure in offering our customers a limited quantity of the genuine Boston Market strain, grown by Messrs. Crosby Bros., Arlington, Mass. Of late years, inferior types of this valuable and favorite variety have brought it into such disrepute that many growers have taken to other sorts. Those who like the true Boston Market quality can sow the strain we offer in the full assurance of getting a crop that will please them in all particulars. Pkt., 10 cts.; oz., 40 cts.; 1/4 lb., \$1.25.

Our Boston Market Celery secured first prize at R. I. State Fair, season of 1895.

ROSE-RIBBED, PARIS, SELF-BLANCHING CELERY.

A sport of the Paris, Golden, Self-Blanching, of which it possesses all the good qualities for which the latter has become world famed. It has its beautiful, golden-yellow color, and differs from it only by the color of the ribs; a pretty shade of rose which deepens as the season advances. This feature gives the plant a pleasing appearance and enhances its value for both table and market. Pkt., 15 cts.; oz., 50 cts.

DANVERS' HALF-LONG CARROT.

In our 1895 Catalogue we had a photograph of a field at Lexington of this strain of Danvers Carrots. It showed that quantity was a characteristic of this selection, as well as color, smoothness and quality. The product of this same seed was exhibited at many of the Autumn Fairs, in competition with the most lauded sorts, and first prizes were awarded to Breck's every time. Some of the exhibits were made by Messrs. J. M. & A. H. Smith, Chicopee, Mass., at the Hampden Agricultural Society's Show; H. R. Kinney, Worcester, Mass., at the Mass. Horticultural Society's Show; J. E. Hacket, Dover, N. H., at the Rochester (N. H.) Fair Association's Show, and many others. This test on the exhibition tables is sufficient evidence of merit. Pkt. 5 cts.; oz. 10 cts.: 1b.\$1 00.

BRECK'S GIANT PASCAL CELERY.

The illustration is another photographic reproduction of a prize specimen from Breck's seeds. The plant was grown by Mr. H. R. Kenney, Worcester, Mass., and shown at the Massachusetts Horti-

cultural Society's October Exhibition.

This, the best keeping, best flavored, and heaviest cropper, is a sport from the Golden Self-Blanching Celery; it couples with all the meritorious features of that variety, greater size and better keeping qualities. The stalks are very large, thick, solid, crisp, and of a rich, nutty flavor, entirely free from any trace of bitterness. Per pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00.

BRECK'S PERFECTION RED CABBAGE.

This, the best strain of Red Cabbage yet introduced, was awarded first prizes at shows in nine different States in the Union, season of 1895. The market gardeners of Boston prefer it to all others, because of its color, size, compactness of growth, certainty of heading and solidity. Our stock was originally procured from S. P. Buxton, Esq., of Peabody, Mass., and great care has been taken to select and improve the type. We recommend it to all who grow red cabbage. Pkt., 10 cts.; oz., 40 cts.; lb., \$4.00.

Hingham Agricultural and Horticultural Society.

FIRST PRIZE

Breck's Perfection Red Cabbage awarded to Aaron Low, Essex, Mass.

BRECK'S PREMIUM DRUMHEAD CABBAGE.

See Special Offers on third page of cover-

The illustration shows one of three cubbages that were exhibited by Messrs Heustis & Son, at the Massachusetts Horticultural Society's Show, and rc-ceived first prize in the class open to Market Gardeners. It is an average specimen of what can be raised from this strain of seed with ordinary cultivation. riety is recommended for its immense size and sure heading qualities, as well as its fine texture and firmness. It comes in as a second early, and is also a splendid winter sort. Pkt. 5 cts; oz. 25 cts;

JAPANESE CLIMBING CUCUMBER.

The faithful likeness in the above illustration will doubtless be recognized by many of our old customers. It represents Mr. D. T. Curtis in his garden at West Medford, Mass. Mr. Curtis was formerly of the firm of Curtis & Cobb, Seedsmen, Boston, and later was associated with us, having charge of our Flower Seed department until incapacitated for acive business, he resigned some years ago. He still, however, has a "hobby" for gardening and makes a specialty of testing novelties as introduced. The plants climbing on the end of the arbor in which he stands are the latest introduction in cucumbers—The Japanese Climbing. Mr. Curtis says it is equal in beauty to any climber he has ever grown, both in flowers and foliage, and has the further advantage of producing an abundance of medium sized, bright green fruits that are excelled by none for table use. The seed should be planted in May or early June. They grow very quickly and provide a grand shade. Pkt., 5 cts.; oz., 15 cts.

Specimens of White Spine, Long Green and Early Russian Cucumbers grown from Breck's Seeds by H. R. Kinney, Worcester, Mass., and B. W. Brown, Springfield, Vt., were awarded first prizes by the Massachusetts Horticultural Society and the New Hampshire and Vermont Interstate Fair.

EXTRA EARLY CROSBY SWEET CORN.

We offer home grown seed of this famous, early white sweet corn. We believe it to be as early as any corn obtainable and the name 'Crosby' is a sufficient guarantee as to quality. Per pkt., 10 cts.; qt., 25 cts.; pk., \$1.25.

FIRST CROP SUGAR CORN.

We offer an exceedingly fine strain of this extra early, good quality, sweet corn. It was grown from the introducer's stock under our personal care and is, through continued selection, superior to the original strain. Per pkt., 10 cts.; qt., 25 cts.; pk., \$1.25.

C. W. Eno, Hannibal. N. Y., was awarded first prize at the New York State Fair on the product of Breck's Seed Corn.

BRECK'S WHITE BOUQUET CAULIFLOWER.

Since we introduced Breck's White Bouquet Cauliflower five years ago, it has, on its own merits, found its way into nearly all the best private and market gardens in New England, as well as many other States. We claimed it to be in all respects equal at least to any other sort in cultivation, Now a great many of our customers, who have grown it. claim it is better than all other sorts, no matter at what price offered. We have continually aimed to improve the strain, if possible, by selection, and we feel we have succeeded in producing a type that is without an equal, either for forcing or open-ground cultivation. It is earlier than any other cauliflower, produces a larger percentage of solid pure-white heads, averaging ten inches in diameter, is dwarfer, and more compact in habit, and has no useless, rank-growing outer leaves to take up space. Its natural early maturing, coupled with its neat form of growth, make it peculiarly suitable for growing under glass during winter or spring. We own the entire seed stock, and every package of the genuine will be sealed with our trade-mark. Per pkt., 25 cts.; oz., \$3.50; ¼ lb., \$12.00.

This season I have grown Breck's White Bouquet Cauliflower side by side with two other choice selections of the snowball type. I certainly prefer Breck's because it is of more compact growth, has better protected heads and is likely to be a surer cropper in this climate.

C. H. W., Woburn, Mass.

John E. Bandy, East Barnet, Vt., was awarded first prize for Breck's White Bouquet Cauliflower at the Caledonia Co. (Vt.)

Agricultural Society's Show.

BRECK'S PREMIUM SWEET CORN.

This Sweet Corn has obtained for itself a substantial place in the esteem of our market gardeners, by whom it is pronounced an unequaled variety for market purposes. It is a few days later than Cory, but of so much better quality that it is grown by many to the exclusion of all others. Its qualities are, large size, earliness, pearly whiteness and delicious flavor. It is unsurpassed as a main crop variety for the home garden; we especially recommend it to those who desire both quality and quantity. Pkt., 10 cts.; qt.. 25 cts.; peck \$1.00.

EVERGREEN CUCUMBER.

The originator of this variety says he distributed, spring of 1890, ten thousand packets of it, and all reports were "praising it in unstinted terms." This variety has been thoroughly tested the country over, last season, and the favorable reports are still coming. One of our special claims for this variety is its wonderful prolificacy. The grower to whom we entrusted the contract for growing our supply of the seed, states, after the frost had killed the vines, it really looked as if the fruit entirely covered the ground when the field was viewed from a short distance. Another grower says it outyields average sorts, four to one. Per pkt., 5 cts.; oz., 10 cts.; lb., \$1.00.

BRECK'S FORCING WHITE SPINE CUCUMBER.

This is a very fine strain of the White Spine for forcing. The seed we offer was raised under glass from selected specimens and will we think give satisfaction to all who plant it. Pkt., 10 cts.; oz., 40 cts.

BRECK'S BOSTON MARKET LETTUCE.

This is a fine selection of the White-seeded Tennisball, and is exceedingly valuable for forcing. We recommend it, with much confidence to all who prefer the Boston Market type. Per pkt., 10 cts.; oz., 40 cts.

HITTINGER'S BELMONT FORCING LETTUCE.

We offer seed of this improved forcing lettuce that was grown especially for us by Mr. Ward. This variety is displacing the Boston Market. It is a sure cropper, not liable to dampen off and of extra crisp quality. Per pkt., 5 cts.; oz., 40 cts.

LEARNED'S BLACK SEEDED TENNISBALL LETTUCE.

This variety differs from others of the type by reason of its having been specially bred by years of selection and cultivation for culture under glass. It is twice as large as the White-seeded variety and is much esteemed by the critical market gardeners of Arlington. The growers say that under ordinary cultivation, out doors, not one plant in a hundred will fail to make a solid head. Pkt., to cts.; oz., 40 cts.

The product of Breck's Boston Market Lettuce Seed grown by Mr. Kenney, Worcester, gained the Massachusetts Horticultural Society's First Prize.

JAPANESE MILLET.

(Panicum Miliaceum).

The original seed-stock was imported over five years ago from Japan, where the grain is largely used as human food. The importer in 1891 planted a small plot of ground, which yielded at the rate of six and three-quarters tons dry straw, and over ninety bushcls of seed per acre. The yield of seed is surely a remarkable one, especially since a considerable amount was lost through the ravages of birds (which prefer it to common millet) as well as by rattling out, for unlike common millet, this threshes very easily. There is good reason to believe this new variety will prove an exceedingly valuable crop for green fodder or for the silo, as it is as much superior in every respect to all other millets as is the Japanese buckwheat, that has, since its introduction, gained such popularity over the common sort formerly largely grown. The seed of this millet constitutes an excellent grain for hens,

and when ground is a wholesome, nutritious, and economical food for cattle. The plants attain an average height of six feet, are short-jointed, and at every joint there is put forth an immense number of long, thick, fleshy leaves that increase its value as a cattle food. The heads average a foot in length and over six inches in diameter. Our illustration, drawn from nature, is one-twelfth natural size, but it scarcely conveys an adequate idea of the great food-producing qualities of this millet. The demand for this millet, we believe, will again exceed the supply; therefore, we recommend our patrons who desire to secure seed to order at once. The price we quote is very low in order to induce a general demand for this variety, and is not subject to either of our special offers. Per peck, 50 cts.; bushel, \$1.75.

BRECK'S EMERALD GEM MUSK MELON.

This variety of Emerald Gem couples size with all the desirable qualitieof the original It has the same thin, dark-green rind, thick, melting salmons colored flesh, and high flavor. We recommend it with the fullest confidence as the very best, all round melon in existence. Per pkt., 10 cts.; oz., 25 cts.

Hingham Agricultural and Horticultural Society.

FIRST PRIZE

For Breck's Emerald Gem Musk Melon, awarded Aaron Low, Essex, Mass.

MAMMOTH SILVER KING ONION.

This is one of the largest onions in cultivation, averaging from 15 to 22 inches in circumference, and often weighing from 2½ to 4 pounds each. It is quite early, of fine shape, a little flattened, but very thick. The skin is a beautiful silvery-white color; the flesh, pure white, tender, and very mild-flavored. It has attracted much attention by its large size and handsome appearance, which qualities, together with its mild flavor, recommend it for the exhibition as well as the home table. Per pkt.; 10 cts.; 0z., 25 cts.; lb., \$2.50.

WHITE MULTIPLIER ONION SETS.

This is really a White Potato Onion. It is earlier, hardier and more productive than the common yellow or brown variety. It is of fine quality and a remarkable keeper. Per qt., 25 cts.; peck, \$2.00.

For the "Best Collection of Vegetables" grown in the State of Wisconsin, and exhibited at The Great Wisconsin State Fair, Mr. H. P. West, Fayetteville, Wis., was awarded first prize. The entire collection was raised from Breck's Seeds.

MELROSE MELON.

A very hardy, strong and vigorous grower, the vines remaining green longer than any other variety. The melons are produced abundantly, and very close to the hill,—a feature of the greatest value. The color is rich dark green; the shape is oval. The fruit average in weight about four pounds, and are finely and densely netted, and very uniform in appearance. The flesh is very thick and solid; clear, light green in color, shading to a rich salmon at the seed cavity. Flavor is unequaled. Desirable for both home use and market. Per pkt., 5 cts.; oz., 10 cts.; lb., \$1.00

BRECK'S DANVERS YELLOW GLOBE ONION.

When the seed stocks of growers of Danvers Yellow Globe Onion Seed, throughout the United States deteriorate or exhaust, they naturally turn to Boston to replenish, because they know the best and truest type is only to be procured there, and we need scarcely say that we do the larger part of the replenishing, for it is well known that we have devoted special attention to the growing of this variety and are generally credited with having the best strain on the market. The seed we offer this season is as usual home grown and is, we believe, likely to give every satisfaction to purchasers. Pkt., 5 cts.; oz., 25 cts.; lb., \$2.00.

Onions grown from Breck's Strain of Danvers Yellow Globe, were first prize takers at N. H. & Vt. Interstate Fair, Maine State Fair, Bay State Fair, Valley Fair, Vt., New York State Fair and many others, season of 1895.

ROSE GIANT ROCCA ONION.

This variety is now in considerable demand with Market Gardeners on account of its large size, delicate color, heavy cropping qualities and mild flavor. Our cut is that of a bulb grown by Mr. George. P Winn, of Arlington, Mass., which weighed 19½ oz.; under ordinary cultivation the bulbs will average from ¾ to I pound each, and they sell readily at a good price. Pkt., 5 cts.; oz., 20 cts; lb., \$1.50.

Giant Rocca Onion

GRAY WINTER OR TURF OATS.

The great value of these oats is just beginning to be appreciated, because they can be sown like wheat in Fall; they are hardy and will stand as much cold as that crop, after they have got well started. They should be sown broadcast at the rate of 1½ bushels per acre, in August or September in New England, and further South up to the middle of October. They make a good growth before winter sets in, and furnish excellent grazing during late Fall and early Spring, without injury to the grain crop afterwards. Their turfing and stooling qualities are remarkable, and even when thinly sown, they will, under anything like favorable conditions soon spread and cover the ground with a thick heavy growth. The yield of grain on good soil is frequently from 50 to 70 bushels per acre; the grain is a dark gray color, with distinct strip, and often weighs from 35 to 40 pounds per measured bushel. These oats may also be used for Spring seeding, and if put in early in April will produce a much larger crop than the ordinary oats. Per peck, 75 cts.; bush . \$1.75.

F. A. Wolf, Salem, Oregon, was awarded by the Oregon State Board of Agriculture first prize for the best collection of vegetables raised in the State. All were grown from Breck's Seeds.

NOTT'S EXCELSIOR PEA.

This new, dwarf, extra early wrinkled Pea is superior in earliness, size, quality and productiveness to both American Wonder and Premium Gem. It grows about half as tall again as American Wonder, and its pods are larger in proportion. Being within a day or two as early as the first early smooth pea, it is sure not only to be grown but to supersede other early kinds, Per pkt., 10 cts.; pt., 20 cts.; qt., 40 cts.; pk., \$2.50.

PARAGON PEA.

A main crop pea of extra quality. The pods, borne in pairs, are large, well filled, and of fine color. Pkt., 10 cts.; pt., 15 cts.; qt., 25 cts.; pk., \$1.50.

SHARPE'S QUEEN PEA.

An English variety that has been tested in this country and found to be an acquisition. It somewhat resembles Stratagem, but is of stronger growth, and fully as abundant a cropper. We recommend market gardeners to try it, because of its large, even-sized pods, fine color, quality, and ready sale in the market. Pkt., 10 cts.: pt., 20 cts.; qt., 35 cts; pk., \$2.25.

WM. HURST PEA.

Another Extra Early Dwarf wrinkled variety from England. The vines attain a height of 1½ ft., and produce an abundance of bright green pods. Pkt. 10 cts.; pt. 20 cts., qt. 35 cts.; pk. \$2.25.

See Special Offers on third page of cover.

BRECK'S NEW LIFE PEA

Is a wrinkled, green seeded variety of sturdy, vigorous growth, the vines grow to a height of two feet and are unusually prolific. pods mostly borne in pairs, are large, of good color and well filled with peas of the best quality, and are quite showy in all stages of growth. It is of the Stratagem type but has none of the faults of that variety. Pkt., 10 cts.; pt., 25 cts.; qt., 40 cts ; pk., \$3.00.

We received many flattering reports from persons who grew them

last season.

HERE ARE A FEW OF THE EXPRESSIONS:

The Breck's New Life Peas are A No. 1 in all respects. The vines grow to an even height, are of vigorous growth, and bear a great number of well-filled pods mostly in pairs. The peas are large and of extra quality. Many of my neighbors think so highly of them that they intend planting a considerable quantity next season. — Chas. J. Kennedy, Barre Plains, Mass.

I consider them (Breck's New Life Peas) a grand acquisition to the list of vegetables. I have practiced market gardening for twenty-five years, so flatter myself I am qualified to judge.—RICHARD KING, Brooklyn, Ct.

We have grown many varieties of peas, but find the New Life to be superior to anything we have yet raised. - JESSE STRONG, Thomaston, Me.

Breck's New Life were the best eating peas that we have had and we grew a number of varieties. They are large and of good color. — Homer Dow, Metheun, Mass.

Breck's New Life Peas produced the strongest vines I ever saw, were of an even height, and produced large well-filled pods. The vines were loaded down with the crop. — Joseph Green, Worcester, Mass.

JUNO PEA.

The pods of this variety are remarkably large, long, straight, thick through and well filled. The peas are a very dark green color, and of fine flavor. Pkt. 10 cts.; pt. 20 cts.; qt. 35 cts.; pk. \$2.25.

FLAT FORAGE PEA (Lathyrus Sylvestris Wagnerii).

This is rich food for cattle, hogs and sheep. It will grow on land too poor to pay the cost of cultivation, and after becoming firmly established will yield for years large crops of fodder suitable for pasture or hay. The seed requires several weeks to germinate, and growth is slow the first season. The land should be ploughed deeply and thoroughly worked. Plant the seeds very thinly in drills one foot apart. Pkt., 10 cts.; oz., 25 cts.; lb., \$2.50.

LADY FINGER POTATO.

The old-fashioned variety for baking. The Lady Finger is a very old variety, of pretty appearance, and much esteemed as a Baking Potato. The tubers are long and slender, of nearly the same diameter throughout, and when cooked are as white as snow and very meaiy; the eyes are numerous and slightly depressed. Per lb., 25 cts.; half pk., 50 cts.; pk., 75 cts., bu., \$2.00. By mail, 35 cts. a lb., postpaid; 3 lbs. for \$1.00.

Special offer No. 2 only, applies to the Carman Potatoes.

CARMAN NO. 3 POTATO.

The introducer says: This splendid new Potato, introduced by us last year, is, without any approach to an exception, the greatest yielder ever introduced! It may fairly be claimed that it does not yield any small tubers at all. It bears its tubers very close to the plant, a single turn of the fork turning out every Potato. It is of the largest size and of the shapeliest form. It is a perfect keeper, that is, it will not sprout up to planting time, unless kept in a warm place. Both skin and flesh are of extreme whiteness. Eyes few and shallow. Late in ripening. \$1.00 pk. and \$3.00 bu.; \$7.00 bbl.

CARMAN NO. 1 POTATO.

The Carman No. 1 is, like the Carman No. 3, a seedling from seedlings raised through several generations. It is intermediate in ripening, and resembles the Carman No. 3 in shape, and also in having very few and shallow eyes. The flesh is peculiarly white, perfect in quality, and very dry. It is an enormous yielder, the tubers being very hand-some and uniformly large. In every point of merit it is incomparably superior to any second early in cultivation. 75 cts. pk.; \$2.25 bu.; \$5.00 bbl.

BRECK'S CHANCE POTATC.

When introducing this potato we gave its history, which in short is: A "sport" from Pearl of Savoy, found by a Connecticut farmer in 1888. In the tests made for three years following, the type and characteristics were retained, and the potatoes harvested from year to year proved to be possessed of so many desirable points, that we last year offered them to the public under the name of Breck's Chance. We received last fall many flattering reports from persons who grew them, and we are satisfied that the "Chance" will soon be taken advantage of, and become a popular standard sort.

cf, and become a popular standard sort.

The vines are of vigorous growth. The tubers are ready for table as soon as those of Pearl of Savoy (which was originated by us some ten years ago, and is to-day perhaps the most popular early kind

grown). Under ordinary cultivation the crop is abundant, and as a keeper they are unsurpassed, but the greatest merit of the variety is QUALITY, in this particular they are much superior to all other kinds. Quality is the leading feature, and if you are a potato grower you must know that quality, and in fact everything else desirable, in most potatoes of recent introduction, have had to take second place, if only earliness could be obtained. Pkt. 75 cts.; bu. \$2.25; bbl. \$5.00.

John T. Ruff, Phillips, Wis., was awarded first Prize on Breck's Chance, as the Earliest potato shown at Wisconsin Fair.

EVIDENCE.

Mr. Wm. F. Hosmer, steward at The Brunswick, Back Bay, Boston, writes under date Nov. 9, '95.—I have given Breck's Chance Potatoes a thorough trial, and can unhesitatingly pronounce them a very superior variety.

N. S. Palmer, De Soto, Mo. — We cooked some, and pronounced their eating qualities superior, compared with potatoes raised in this locality.

Rufus W. White, Clifford, Mass. Of the fifteen varieties of potatoes I raised this year, I like your Chance best.

LEWIS MILLS, North Haven, Me. Breck's Chance potatoes exceeded all other varieties I grew this season, in earliness and yield; they were even, large and smooth.

Horace Kellogg, Oconomowoc, Wis. — The Chance potatoes were early and extra quality. The yield was good.

M. W. Niles, Oak Hill, N. Y.— The Chance potatoes were planted side by side with Early Rose, and proved as early. They were very smooth and nice.

ARTHUR HUNT, North Woodstock, N. H.—The Chance potatoes proved very satisfactory, large, smooth, a good yielder and very fine quality. I can recommend them to those wanting "The best."

F. B. Bailey, Durham, Ct. The Chance did well with me, I raised 65 pounds from one pound of seed, with ordinary field cultivation. They were the earliest of the several sorts I grew, and of superior quality.

SPURREY.

(Spergula Arvensis.)

Since the recent introduction of Spurrey, there is a bright outlook for owners of barren, sandy land in the United States. Spurrey is an annual; its value has been recognized and appreciated in Europe for a great many years. It is cultivated on the barren soils of France and Germany, and as winter pasturage for cattle and sheep. It grows on sand that is too dry and thin to support clover, and so rapidly that three sowings may be made in one season. The crop may be fed both green and dry. About twenty pounds of seed is required for an acre, and it should be broad-casted and harrowed in same as clover. As a fertilizer for ploughing in, Spurrey will undoubtedly prove of much value, because it grows quickly on soils that will scarcely produce a green blade of anything else. Per pound, 25 cts.; per 100 lbs., \$20.00.

SACALINE.

(Polygonum Sachalanense.)

If half the claims made for this new forage plant are realized, it will prove one of the most wonderful and desirable in existence.

The introducer says:—"It is perfectly hardy; once planted, stands forever; requires no cultivating or manuring, endures the severest drought with impunity. Thrives equally well on wet or dry soil. The young shoots and leaves may be eaten as a vegetable. The stems and leaves, green or dry, are greatly relished by sheep and horses. It is more nutritious than clover and produces from fifty to a hundred tons of green fodder per acre."

The seed should be started in the same way as Cabbage, and the plants, when large enough, set out four feet apart, each way. Pkt., 10 cts.; oz, 25 cts.

We offer true and pure home-grown roots of this wonderful new forage plant at 15 cts. each; \$10.00 per 100.

BOOKS ON RURAL TOPICS.

NEW DICTIONARY OF CARDENING.

A PRACTICAL ENCYCLOPÆDIA OF HORTICULTURE.

Edited by George Nicholson, of the Royal Botanic Gardens, Kew.

With over 2,000 Illustrations and Colored Plates.

Everybody who has an interest in Horticulture, whether for pleasure or as a means of livelihood, should possess this work. It will pay for itself twice over in six months.

Price, complete, in four volumes, beautifully bound, gilt edges, \$20.00.

AND THROUGH ITS

Female Mercantile Department,

Supplies approved Female Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Ladies for Office Work, etc.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining.

How well we have succeeded is shown by the rapid growth of this Department of our business, and the many voluntary statements received concerning its convenience and the high grade of employees furnished.

We mail free on application circulars descriptive of our Bureau and blank forms whereon employers can

state particulars necessary to guide us in selecting suitable employees.

Our Bureau of Registry and Information has certainly improved and elevated the service and we believe

it will continue to do so, besides supplying a long-felt want.

We take this opportunity to thank our customers for the business given us and to assure them that our Bureau was never so well prepared to serve them as now; those who have not as yet patronized it are invited to do so, and give us an opportunity to practically demonstrate the benefits to be derived from its use.

Yours respectfully,

Entrance at the "Big Clock," 51 & 52 North Market St., Also Entrances at 46 Merchants Row and 21½ North St., BOSTON, MASS.

Jufil Precher for

Goods Delivered in your Town or City at Prices Quoted.

See Special Offers on Third Page of Cover.

URS is the oldest and the largest business of the kind in New England. The honest representations made of the seeds offered from season to season are appreciated by descendants of customers who became familiar with our establishment almost three-quarters of a century ago; their recommendations annually bring us new patrons. If our methods of doing business are unknown to you, some of your neighbors can tell you of them, and also of the quality of our seeds; inquire, and if results warrant it, send us a trial order. We supply only tested seeds of varieties that experience has shown to be the best.

Note. - Prices may vary as the season advances. Ours will always be as low as the lowest for goods of equal quality.

ARTICHOKE.

German, Artischoke. - French, Artichaut. - Spanish, Alcachofa.

CULTURE. — Sow seed in April in drills 1 in. deep. Following spring transplant the young plants in rows 2 ft. plant to plant, 3 ft. between the rows. Mulch during dry weather. They prefer rich deep toam, and should be well manured every spring. One ounce of seed sows 30 ft. of drill.

LARGE GREEN GLOBE, grown for the unripe flower-heads, which are produced in abundance from May to August. Packet, 5 cents; ounce, 25 cents; lb., \$3.00.

JERUSALEM, thrives best upon light, hard soil. Cultivated for pickles, also for feeding to sheep and swine. Tubers per quart, 25 cents; per peck, \$1.00.

ASPARAGUS.

German, Sparget. - French, Asperge. - Spanish, Espárragos.

(For price on Asparagus Roots, see Vegetable Plants.)

An Asparagus bed may be made from one, two, or three year old roots, planted in October, or during April and May. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly 2 ft. Plant the roots in rows 4 ft. apart. leaving about 12 in. between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow.

Seed may be sown in April in drills I in. deep and I ft. apart. One ounce of seed sows 60 feet of drill.

(For Asparagus Plants, see under "Vegetable Plants.")

BEANS. Dwarf or Bush.

German, Bohne. - French, Haricot. - Spanish, Frijorenano.

To afford a regular succession of crops throughout the season, plant every two weeks, from the middle of spring to the end of summer; but not until the soil becomes warm, as they are very sensitive to both heat and cold. Plant in rows, eighteen inches apart, two inches deep; cultivate frequently, but only when dry as the scattering of earth on the foliage or pods, when moist, will cause them to become damaged with rust.

One quart will plant 100-feet drill.

BEET.

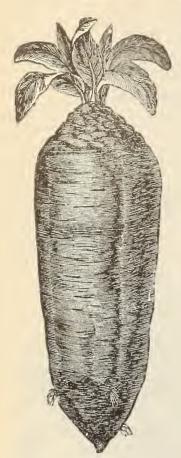

German, Runkel Rube. - French, Betterave. - Spanish, Beteraga.

Sow from April to middle of June, in deep rich sandy loam, one inch deep, or in drills about one foot apart. Thin the young plants to the distance of six or eight inches, and fill up the vacant places with those taken out. The early turnip-rooted are the earliest, and are of fine quality. When young, the leaves make excellent greens. One ounce will sow fifty feet of drill.

BORECOLE, or KALE.

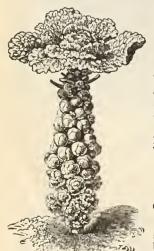

German, Blatterkohl. - French, Chou Vert. - Spanish, Breton.

Sow early in the spring in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for cabbage. They are extremely hardy, and will endure quite a low temperature. One ounce will sow 150 feet drill.

WINTER or GERMAN GREENS, "Sprouts," should be sown in August or early in September in rows one foot apart, and treated as

apart, and treated as Spinach. They make Pkt. Oz. Lb. excellent spring greens, .05 .10 .75

BROCCOLI.

German, Spargelkohl. — French, Chou Brocoli. — Spanish, Bróculi.

One ounce of seed produces about 1,200 plants.

This vegetable somewhat resembles the Cauliflower, but is hardier. In parts of the country where the thermometer does not fall below 20° to 25° Broccoli can be had from November until March. It succeeds best in a moist and rather cool atmosphere. The seed should be sown in May in a seed-pan and the plants afterwards set out in rows two and a half feet apart and eighteen inches between the plants.

BRUSSELS SPROUTS.

German, Sprossenkohl. - French, Chou de Bruxelles. - Spanish, Berza de Brusela

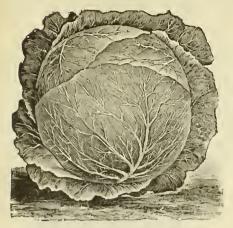

Species of the Cabbage family. It produces along the whole length of the sten small sprouts resembling miniature cabbages. These heads are a great delicacy boiled in the same way as Cauliflower. Seed should be sown about the middle of May in a seed-bed, and the plants afterwards set out in rows two feet or more apar. It is ready, for use late in autumn after the early frost. One ounce of seed produces

and cultivated like Cabbage.

DWARF IMPROVED FRENCH, of sturdy compact growth. Packet, 5 cts.; ounce, 20 cts.; pound, \$2.50 IMPROVED PARIS MARKET, a most desirable strain. Packet, 5 cts.; ounce, 20 cts.; pound, \$2.50

CABBAGE.

German, Kopfkohl. - French, Chou Pomme. - Spanish, Berza.
(For price on Cabbage Plants, see Vegetable Plants.)

All the cabbage tribe requires is the soil to be rich, deep, well-drained, and abundantly manured. For the early kinds, plant thirty inches between the rows and sixteen inches between the plants. For late kinds, three feet between the rows and two feet between the plants. For very early use, sow in January or February, in hot-beds. Set out when the plants are strong enough into other hot-beds, or set in cold-frames in March. Transplant when danger from frost is past to the open ground. For a succession, sow in the open ground last of March or early in April. Late plants are sometimes subject to attacks of the cabbage fly, which destroys them as fast as they appear above ground. To prevent this destruction, sprinkle the plants with wood ashes, air-slacked lime, plaster, slug-shot, or tobacco dust, when the plants are wet with dew. One ounce of seed produces about 3,000 plants.

CARROT.

German, Möhre. - French, Carotte. - Spanish, Zanahoria.

Carrots are grown largely both for feeding to stock and culinary purposes; the long varieties used for the former, the "Horn" and medium sorts for the latter. The "Horn" sorts can be grown on thin soil and are mostly for early use. The others prefer deep, sandy loam that was well-manured the previous year for some other crop, such as potatoes or onions. Sow in April or May in drills about one inch deep and fifteen inches apart. Thin out the plants from three to eight inches apart, according to variety. One ounce of seed is sufficient for one hundred feet drill, four points to an acre.

CARDOON.

German, Kardon. - French, Cardon. - Spanish, Cardo Hortense.

Cardoon is grown for the midrib of the leaf, which requires to be blanched in the same manner as celery. Sow early in spring, where the plants are to remain, in drills three feet apart and an inch and a half deep, and thin out the young plants to a foot apart in the drills.

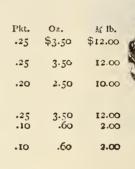

CAULIFLOWER.

German, Blumenkohl. — French, Chou-fleur. — Spanish, Coliffor. (For price on Cauliflower Plants, see Vegetable Plants.)

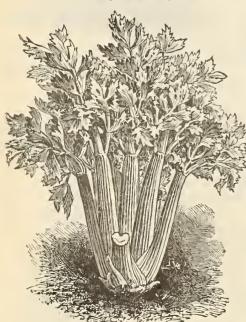

Cauliflower is the most delicate and delicious of the cabbage family. For the production of the Cauliflower a rich, deep loam is required, a low moist situation being preferable. A liberal supply of water when possible produces very marked results. Seed of the early variety should be sown in a hot-bed in February or March. For later supply, sow seed in May, choosing a cool, moist place. When large enough, transplant, making the rows about 2½ feet apart, and 18 inches between the plants. Transplanting should be done in moist weather. One ounce of seed produces about 2500 plants.

RECK'S WHITE BOUQUET. This we believe
the earliest and most reliable Cauliflower for
New England. Since its introduction it has be-
come an especial favorite with the market gar-
deners around Boston

See Special Offers on third page of cover.

tained a height of three inches, transplant in prepared border, setting them four inches apart. In order to secure "stocky" plants, cut off the tops once or twice before transplanting into richly manured soil, in rows four feet apart, and from seven to nine inches plant to plant. Keep down all the weeds, and as fall approaches draw earth up to the plante, keeping the stalks well together. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with litter, or stored in cold cellars. Some of the varieties, such as Golden Self-Danching and White Plume, may be blanched by simply placing a board twelve to fifteen inches wide on edge on each side of the row, and to hold them in place tack bits of laths across the rows at the top. One ounce of seed produces about 3,000 plants.

One ounce of seeu produces about 3,000 pr	111113.

CORN SALAD, or FETTICUS.

German, Lammersalat. - French, Mache. - Spanish, Macha Valerianilla.

Used as a salad. It is sown very early in spring, in rows one foot apart, and is fit for use in six or eight For early spring use sow in September, and winter in cold-frames, or cover with litter. One ounce will *ow 100 feet of drill. Large-leaved. Per pkt., 5 cts.; ounce, 10 cts.; pound, \$1.00.

CRESS.

German, Gartez und Brunuez Kresse. - French, Cresson. - Spanish, Mastuerzo.

Sow early in the spring and at intervals throughout the season; for a succession, thickly in shallow drills, as it soon runs to seed The Water Cress requires a stream of running water, ditch, of pond, in which it will grow without care, except at first keeping weeds from interfering with it. It is easily introduced by planting along the margins of ditches or streams, and increases rapidly by the spreading of the roots or from the seed.

CUCUMBER.

German, Gurken. - French, Concombre. - Spanish, Pepino.

The first planting should be made early in May on partly spent hot-beds; inverted sods form an excellent medium for both planting on and for carrying the young plants to their permanent location, or small pots can be used.

Such plantings are usually ready for transplanting to the open ground in from three to four weeks, and are seldom troubled with the striped bug. Transplanting, when practical, should be lone in the evening, into hills four feet apart each way. Thin out to about four plants to a hill when established. The seed may be olanted in hills late in May, thus giving a succession. For pickles, plant during the last two weeks of June Plaster Dust, or an infusion of Hellebore powder in water, will destroy the striped bug.

One ounce will plant about fifty hills.

DANDELION.

German, Pardeblum. - French, Pisse-en-lit. - Spanish, Amargon.

The Dandelion is cultivated for spring greens, or for blanching for salad.

Sow seed in May or June, in drills half an inch deep and ve inches apart. Cultivate, to keep down the weeds during twelve inches apart. summer, and upon the approach of severe weather cover with litter, which should be removed early the following spring.

One ounce will sow 200 feet of drill. One lb. will sow an acre. AMERICAN IMPROVED. A fine home- Pkt. Oz. Lb. grown variety .IO .40 \$4.00 THICK-LEAVED FRENCH. Large and tender .10 4.00

EGG-PLANT.

German, Eierpflanze. - French, Aubergine. - Spanish, Berengena. (For price of Plants, see Vegetable Plants.)

Sow the seed in hot-beds the first week in April, care being taken to protect the young plants from cold at night. Plant out about June 1, about two and a half feet apart. One ounce will produce about 1,000 plants.

ENDIVE.

German, Endivien. - French, Chicorec. - Spanish, Endivia.

Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way, in August and September.

As it is generally used for salads, it should be blanched by tying all the leaves into a bunch at the extreme

One onnce will sow 150 feet of drill.

nicely and bears close planting

The most easily grown of all open-air plants used for salads. It requires a warm soil that has had a liberal dressing of wellrotted manure and abundant moisture. To be of a satisfactory quality, the growth should be rapid and vigorous. Seed may be sown in a frame in February or March, the plants set out as early as the ground can be worked, as light frosts will not injure them. Set the plants 9 inches apart in the rows, and 18 inches between the rows. For successive crops, sowings may be made every two weeks up to the end of August. One ounce of seed will produce about four thousand plants.

MARTYNIA.

The seed-pads are used for pickling, and should be gathered when green and tender. Plant in the open ground the last week ot May in rows two feet apart, making hills one foot apart in the rows; place several seeds in each hill, and when well up thin out to one plant. One ounce will plant fifty hills.

Lb. Martynia Probescidia \$4.00 .05

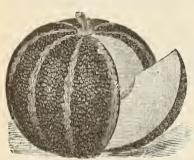

MELON (Musk).

German, Melone. - French, Melon. - Spanish, Melon.

Melons prefer a warm, light, sandy loam; being tender plantings, should not be made before middle of May. Plant about six seeds, half-inch deep, in hills five to six feet apart each way. The hills should have at least a peck of well-rotted compost thoroughly

stirred into each of them before the seed is planted. When well grown thin out to three plants in a hill. If an earlier crop than this method of cultivation allows is desired, the directions given for growing early cucumbers may be followed.

One ounce will plant about sixty hills. Two pounds will plant an acre.

MUSHROOM.

German, Champignon. - French, Champignon. - Spanish, Hongo.

(Special offer No. 2 only applies to Mushroom Spawn.)

Mushrooms may be grown in cellars, out-houses, sheds, or under greenhouse benches. The amateur, however, is more likely to meet with success in cellars than elsewhere, as the cool moisture of the atmosphere and the uniform temperature are more congenial to the growth of this vegetable than that in structures above ground. The temperature should range between fifty-five and sixty degrees. Use a mixture of equal weights, fresh horse droppings and loam that has no manure in it. Before placing this mixture in the bed turn it over every day for a week so that it does not heat violently, and be careful to keep it under cover so that it cannot get wet. Then begin to make the bed by spreading thin layers of the mixture, and pound each firm, until you have in all a depth of eight to ten

inches; leave it thus for a few days until the heat runs up to a hundred degrees or over and then declines to ninety degrees; when this point is reached it is ready for spawning, which is done by making holes, three or four inches deep and twelve inches apart each way; into each hole put a piece of spawn about as large as a hen's egg and fill in the hole with compost. At the end of ten or twelve days the spawn will have run through the whole bed. There should then be spread over the entire surface about two inches of fresh loam. Over all place a few inches of straw. All that remains to be done is to keep the temperature as near to sixty degrees as possible; it should never be allowed to fall below forty degrees, or the crops will be both reduced and delayed. Ordinarily, if the conditions are right, mushrooms will appear in about six weeks and continue to come for about a month. In the event of the surface of the bed becoming very dry at any time sprinkle it freely with water at a temperature of about a hundred degrees. After the first crop has been taken off the bed, it should receive a dressing of fresh loam to a depth of half an inch, thoroughly firmed, over the entire surface, and when dry a sprinkling with water as above recommended, and a second crop will soon be had. A brick of English spawn is sufficient for nine square feet of bed.

ONION.

German, Zweibel. - French, Ognon. - Spanish, Cebolla.

The Onion thrives best in rather strong, deep, loams soil, which should be well enriched with old well-rotter, manure or compost, or what is better, deeply trench, add manure the autumn previous to sowing, and lay upon ridged during the winter to soften. Sow the seed thinly in drills about one-quarter inch deep and one foot apart. To ensure quick and safe germination after sowing the seed, the drills should be trod along evenly with the foot, and then raked even, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed. When three inches high thin to two inches apart. Hoe frequently to keep down weeds. In the seed rows where the hoe cannot be used, the soil should be stirred with the fingers, otherwise weeds will quickly grow up and choke the crop. One ounce of seed will sow one hundred feet drill; four pounds per acre.

PEAS.

German, Erbse. - French, Pois. - Spanish, Chicaros.

Peas come earliest to maturity in light, rich soils, but for a general crop a deep loam or moderately heavy soil is better. For early crops decomposed leaves or leaf mould should be used; if the soil is very poor stronger manure may be applied. The first sowing will be earlier if covered only one inch deep; those following should be covered two to six inches deep, the deep planting preventing mildew and prolonging the season. Fresh manure, and wet, mucky soil should be avoided, as they cause the vines to grow too rank and tall. All wrinkled. Peas are superior to, more delicate in flavor, and remain longer in season than the smooth sorts, but should not be sown until the ground becomes warm, for, as in sugar-corn, the wrinkled appearance indicates the greater amount of saccharine matter.

PEPPER.

German, Pfeffer. - French, Piement. - Spanish, Pimiento.

Golden Dawn Mango Pepper.

Plant in hot-beds in March, and transplant into the open ground the latter part of May, in rows about twenty inches apart and eight inches apart in the row. Repeated hoeings promote their growth.

One ounce of seed will produce about 2,000 plants.

PUMPKIN.

German, Kurbis. - French, Courge. - Spanish, Calabaza.

The Pumpkin is now little used except for agricultural purposes, the squashes being so much sweeter and drier and finer grained for the kitchen. The farmer, however, finds the Pumpkin a serviceable addition to his feed. The most common and least troublesome method of cultivation is to plant them with corn, two or three seeds in each hill.

POTATOES.

PRICES SUBJECT TO MARKET CHANGES.

Special prices on large quantities quoted on application. Special Offer No. 2 only applies to Potatoes. Of the many varieties of Potatoes that claim public favor, we have selected only a few, and these the best in cultivation. We aim to include in our list only those sorts which we have found by actual test are worthy of cultivation. Orders will be booked as received, and shipped in rotation, after danger of freezing is over; and as Potatoes are of perishable character, we assume no responsibility for damages incurred in transit, but we will, of course, exercise the greatest care to guard against sudden changes in the temperature.

RHUBARB.

German, Rhabarber. - French, Rhubarbe. - Spanish, Ruibarbo Bastardo.

(For price of Rhubarb Roots, see Vegetable Plants.)

Sow early in the spring, in drills a foot apart, thinning out to about the same distance apart in the tows when a few inches high. In fall, or the following spring, transplant into deep, rich soil about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, planting it at the same distance apart as given above.

Victoria, very large, later than Linnæus				•			.IO	.25	3.00

RADISH.

German, Rettig, Radieschen. - French, Radis, Rave, Petit Rave. - Spanish, Rábano.

Radishes require a light, rich, sandy loam; heavy or clayey soils not only delay their maturity, but produce crops much inferior, both in appearance and especially in flavor. For a constant supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot-bed in February. For winter Radishes, sow the seed about beginning of July, and keep the roots during winter in a cool cellar, covered with earth. They should be placed in cold water an hour or so before using.

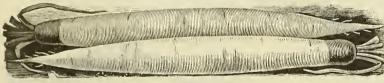

1 oz. of seed will sow 100 feet drill; 10 lbs. per acre.

SALSIFY, or OYSTER PLANT.

German, Boksbart. - French, Salsifis. - Spanish, Ostra Vegetal.

The demand for Salsify is increasing from year to year, as its delicious qualities are becoming known. It

is used stewed, boiled, or fried, and sometimes as a salad sliced raw in vinegar with salt and pepper. When cooked it has an oyster flavor, and is commonly called "vegetable oyster." Cultivate and start same as Parsnip. One ounce will sow fifty feet of drill.

SQUASH.

German, Kurbiss. - French, Courge. - Spanish, Calabaza Tontanera.

As all Squash are somewhat tender, they should not be planted out until danger from frost is past. They will grow on almost any soil, but a warm, mellow one that has been well manured suits them best. The hills for bush varieties should be about six feet apart; for running sorts, eight to ten feet. Thin out to two plants to a kill, and in the early stages of growth keep well sprinkled with plaster dust. Bush varieties, one ounce to fifty hills; running varieties, one ounce to twenty hills; four pounds per acre.

TOMATO.

German, Liebesapfel. — French, Tomate. — Spanish, Tomate. (For Tomato Plants, see Vegetable Plants.)

The seed should be sown in a hot-bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out about four or five inches apart in another hot-bed. About the middle of May the plants may be set in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotten manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. One ounce will produce about 2,000 plants.

TURNIP.

German, Steckrube. - French, Navet. - Spanish, Nabo Comun.

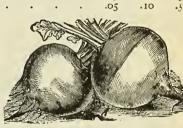

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crop, and early in August for a fall and winter crop. A light soil well manured the previous year is the best; no manure should be applied at the time of sowing, unless it be well-decomposed compost, or the roots would be liable to be bad-flavored. The ground should be dug and ploughed deep and made mellow and fine. Sow the seed of the flat sorts broadcast, and rake in evenly After they are well up, thin to six or eight inches apart, and keep them clear from weeds. The Ruta Baga sorts should be sown in drills fifteen inches apart, and for winter use may be sown from the twentieth of June to the middle of July, on land that has been well manured for other crops in spring; thin out as for the early crop. One ounce will sow 150-feet drill. Two pounds will sow one acre in drills. One pound will sow one acre broadcast.

GRASSES.

" And he gave it for his opinion that whoever would make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together." - SWIFT.

We desire to call special attention to the following list of AGRICULTURAL GRASSES, which will, we think, be found very comprehensive, both as to varieties and descriptions. We are devoting a great deal of time to this most important subject, and the department has already become an extensive

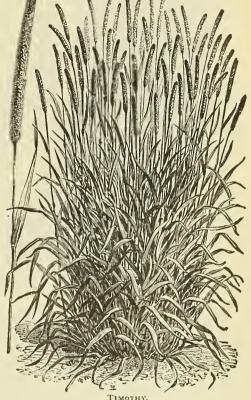

one with us.

Having learned by experience that the so-called imported grasses which are offered by those making a specialty of them in this country are very far from reliable, both as regards purity and quality, we have found it necessary to import all our seeds of this character direct. We have accordingly made arrangements for our stocks with one of the most prominent growers of Agricultural Grasses on the continent, who, by virtue of many years' experience in growing seeds of this peculiar character, has become the recognized headquarters for same. This will enable us to furnish our customers with the very best, and that which we know to be free from all adulteration.

It seems almost unaccountable that at this day, when the different branches of practical agriculture are seemingly so thoroughly understood, that our American farmers should apparently ignore the importance of sowing upon their fields only those kinds of grasses which are adapted to the soil and climate, and which will produce in the shortest length of time a luxuriant crop of the desired character. The list of grasses now in use by most of our farmers can be counted on the fingers of one hand, which showing is indeed a small one, when we take into consideration the many species, valuable because of their respective merits, which should be in constant demand for the various soils and climates of America. We invite special attention to our "Mixtures" for Perma-

nent Pastures and Mowing Lands, which follow our descriptions. We have endeavored to bring into prominence a few important facts under the head of Mixtures, which, we think, cannot fail to be of interest to any one who is concerned in the laving down of profitable pastures, or who desires to obtain large crops of hay of choice quality from their fields.

TIMOTHY (Herd's Grass or Catstail) (Phleum Pratense). Root fibrous on moist soils; on dry soils often bulbous:

perennial; flowers in June and July. While this grass is (Phl um prattense.) commonly known as Timothy, it is frequently called Herds Grass, as this is the name under which it was originally cultivated. It is, without doubt, a most valuable grass for hay, especially in the North. It thrives best on moist, loamy soils of medium tenacity. Grows very readily and yields large crops on favorable soils. Should be cut just when the blossom falls. The hay is of best quality, yielding, under favorable circumstances, three or four tons per acre.

ORCHARD GRASS (Dacty.is glomerata.) Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, the luxuriance of its aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, where the subsoil is favorable it withstands. droughts better than most species on dry sandy soils. It is very valuable to be used in a mixture with Timothy and Clover, and produces splendid crops of hay. This grass is sometimes condemned because of its coarse growth, which is only apparent when in a neglected condition, but with proper management no grass is more valuable. When pastured Orchard Grass should never be allowed to become coarse, but should be kept closely cropped. In this condition it is highly nutritive, and relished very much by all kinds of stock.

KENTUCKY BLUE GRASS (Meadow Grass, June Grass, Spear Grass), (Poa pratensis). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, and is claimed by some to be the most valuable of all the grasses in our pastures. On the other hand, some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North, while in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. Kentucky Blue Grass requires about two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, hence it is not suited for alternate husbandry, or where the land is to remain in grass two or three years, and be then plowed up.

See Special Offers on third page of cover.

ROUGH STALKED MEADOW (Poa Trivialis)

PERENNIAL RYE (Lolium perenne). A very valuable grass; arrives early at maturity, and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very early Spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers

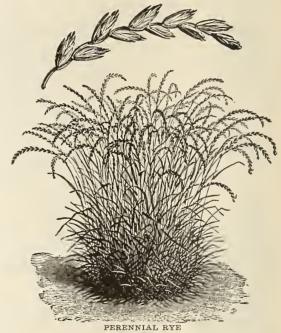

ITALIAN RYE (Lolium Italicum). This is one of the most valuable grasses brought into notice during the present century. In nutritive value, earliness and quickness of growth after it has been mown, it by far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate husbandry; but as it does not last over two years it is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile, and tenacious, or of a medium consistency, and on such soils it is said to be one of the best grasses known to cut green, affording repeated luxuriant and nutritive crops

FOWL MEADOW (False Red Top, Duck Grass, Swamp Wire Grass, (Poa serotina). Root slightly creeping; flowers in July and August. This perennial native grass is found on lowlands in many places, though it seldom takes full possession of the soil unless seed is sown. It has been largely introduced into New England, and is particularly adapted to moist, rich soils, such as the borders of rivers, ponds, etc., owing to the fact that an

RED TOP (Herd's Grass), (Agrostis Vulgaris). Root ping; perennial; flowers in July. This valuable grass has creeping; perennial; flowers in July. been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the Clover soon disappears followed by Timothy, after which the Red Top usually takes its place, and with some wild indigenous grass forms a close sward. When sown alone three bushels per acre are required.

RHODE ISLAND BENT (Agrostis canina). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and for lawns. For the latter purpose it is often sown by itself, and if cheapness is an object perhaps it is as good as could be sown, but we recommend the lawn mixture wherever practicable. Soil and treatment same as for Red Top (A. vulgaris).

ROUGH STALKED MEADOW GRASS (Poa trivialis). Root fibrous; perennial. This grass is valuable on account of its quick growth, productiveness, and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the Spring, and continues green until late in the Fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Cattle, sheep, and horses show a great partiality for it, and the pasture is generally eaten barest where this grass predominates. Does not thrive well on dry soils.

(Lolium Perenne)

occasional overflow will not injure its growth. It may be mown at any time from June to October, as it never becomes so coarse and hard but the stalk is sweet and tender and eaten without waste. It makes an excellent grass for oxen, cows, and seep, but is thought too fine for horses. It is easily made into hay which is of a nutritive character.

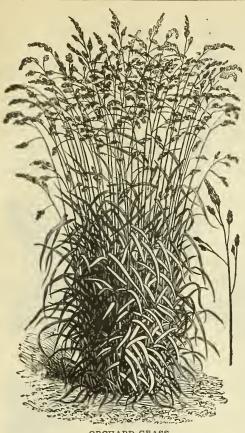

MEADOW FOXTAIL (Alopecuris pratensis). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. It endures the cropping of cattle and sheep probably better than any other variety of grass, making it, as stated above, well-nigh indispensable in all first-class permanent pastures. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering.

CRESTED DOG'S-TAIL (Cynosurus cristatus). Roots fibrous and tufted; perennial, This is a most valuable manent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine,

close growth, and pleasant green color. It should form a portion of all mixtures for lawns.

MEADOW FESCUE (Festuca pratensis). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long tender leaves being much relished by cattle. It should be always sown mixed with other grasses.

See Special Offers on third page of cover.

ORCHARD GRASS.

SHEEP'S FESCUE (Festuca ovina). Somewhat creeping; perennial; flowers in June and July; ospecially desirable on light, dry, sandy soils It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suitable for lawn mixtures.

TALL FESCUE (Festuca elatior). Root fibrous, somewhat creeping; perennial; flowers in June and July. In appearance this species resembles the Festuca pratensis, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils.

HARD FESCUE (Festuca duriuscula). This is one of the best grasses of the Fescue family. It is regarded by some s a variety of the Red Fescue, though taller, and the panicle more open. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists the Summer drought, and develops remarkable verdure during Winter. It should form a part of every mixture for lawn or pleasure grounds, and for permanent pasture and alternate husbandry.

RED OR CREEPING FESCUE (Festuca rubra). This grass is found growing on light, dry, sandy soils, and trom its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated sheep pastures

SWEET VERNAL (Anthoxanthum odoratum). Root fibrous; perennial; flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flowerstalks till the end of Autumn, upholds its claim to a place in all compositions where permanency is an object. It is very Will grow in almost any kind of soil, but prefers those which are rich and fragrant, and imparts a pleasant odor to the hay. moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, and is largely used for this purpose. The seeds of this grass are scarce and most difficult to be had TRUE. An inferior variety of Anthoxanthum being sometimes offered at a low price by unscrupulous dealers, care ought to be exercised in buying. Our seed is guaranteed to be the true Perennial Sweet Vernal.

YELLOW OAT GRASS (Avena Flavescens). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils, and is particularly adapted to exposed and elevated situations, where it is found growing naturally. Cattle eat it readily, and it is much relished by sheep. The seed of this grass, like that of the Sweet Vernal, is scarce and most difficult to be had true. The seed we offer is guaranteed to be the true Yellow Oat Grass.

TALL MEADOW OAT GRASS (Arrhenatherum avenaceum). A fibrous-rooted perennial; flowere in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late

woods, and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth. for towing on shady lawns and under trees on pleasure grounds. Root fibrous, flowers in June and July.

MILLETS.

COMMON MILLET (Panicum Miliaceum). Requires a dry, light, rich soil, and grows two and a half to four feehigh, with a fine bulk of stalks and leaves, and is excellent for forage. For ha ow broadcast one-half bushel per acre from May first to August first. For grain, sow in drills, one peck to the acre, and talter than June 20th.

GERMAN, OR GOLDEN MILLET (Panicum Miliaceum var.). An improved variety, medium early, growing three to five feet high. The heads are closely condensed, though the spikes are very numerous. The seeds are contained in

rough, bristly sheaths, and are round, golden yellow, and beautiful in appearance.

From close observation during the past few years, the fact has been established beyond doubt that seed of the German or Golden Millet grown in southern latitudes will produce a much larger yield of hay than from seed grown in northern or western sections of the country, and for that reason is far better for farmers to sow. We have a good stock of southern grown seed, and, knowing its value, confidently recommend it. Bear in mind that to the farmer, southern grown seed is worth double that of northern or western grown, as that seed is degenerated and hybridized with other millets.

grown seed, and, knowing its value, confidently recommend it. Bear in mind that to the farmer, southern grown seed is worth double that of northern or western grown, as that seed is degenerated and hybridized with other millets.

HUNGARIAN GRASS (Panicum Germanicum). This is a species of millet, growing less rank, with smaller stalks, often yielding two or three tons of hay per acre. It is very popular and valuable with those who are clearing timber ands. Like the common millet, it is an annual, and requires to be sown every season, but will produce a larger return that

almost any other crop.

CLOVERS.

There are no plants so valuable for fertilizers as the Clover. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

MEDIUM RED (Trifolium pratense). This is the common Red Clover in general cultivation, and too well known to need a general description. It is by far the most important of all varieties for the practical purposes of agriculture. When sown alone produces hay of splendid quality, and with Timothy or other grasses forms a desirable pasture.

MAMMOTH, or PEA VINE (Trifolium pratense var.). Grows five or six feet high; its stalks are so coarse and large that stock will eat only the leaves, but by its judicious use lands which

have been exhausted can be reclaimed, as it will grow where the common clover will fail.

ALSIKE or SWEDISH (Trifolium hybridum). This is the most hardy of clovers, and is fast gaining popularity. It resists cold and extreme drought and wet, and on rich moist soil yields an enormous amount of hay or pasture of a nutritive quality. Can be cut several times in a season. It is well suited to low lands liable to wash, as its long, fibrous routs appread over a large area and hold the soil so as to resist

the heaviest rains. The heads are globular, very sweet and fragrant, and much liked by bees, who obtain a large amount of honey from them.

LUCERNE or ALFALFA (Medicago sativa). Where this variety succeeds well it is probably one of the most valuable of all clovers. It is not, how ever, particularly adapted to the Eastern or Northerz States, but flourishes in all Western and Southern. It requires a fine mellow soil to get it firmly established, but when once thoroughly fixed will produce a profitable crop for a number of years. It yields an enermous amount of green fodder, and should be cut when commencing to blossom. Although a prodigious yielder, it does not exhaust the soil, but on the contrary improves it. In States to which it is adapted, four or five crops can be obtained in one season.

WHITE CLOVER (Trifolium repens). The value of this Clover to the farmer is well known, and it is to be found in nearly every natural pasture. It is adapted to all soils. Being a deep-rooted plant, it withstands drought on dry, sandy sections. It should form a part of all mixtures for permanent pastures

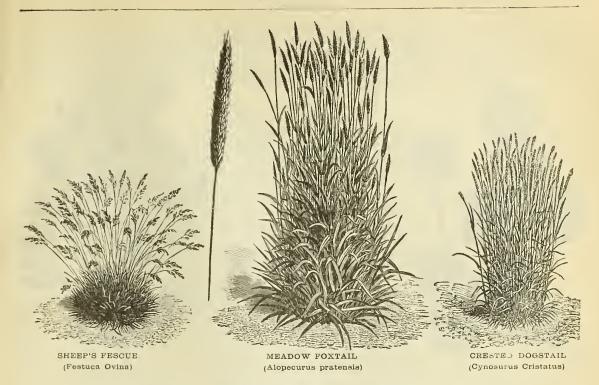

and is also valuable for alternate husbandry, when these crops are sown down for more than one year.

CRIMSON CLOVER (Trifolium incarnatum). Is also known as Scarlet Clover and Carnation Clover. It is of rapid growth, and of great value where only one crop is desired, sown either alone or with Italian rye grass. It is an immense yielder, and can be fed green or made into hay It may be sown in the fall for an early summer crop, or in the spring for cutting in July

See Special Offers on third page of cover.

YELLOW OAT.

(Avena fiavescens.)

MIXTURES FOR PERMANENT PASTURES.

"One thing is certain: that good pasture land is the foundation of the riches of a farm "-SINCLAIR.

The oft-repeated complaints of wornout and exhausted pastures, made to us by some of our best New England farmers, have long impressed us with the fact that there must be something radically wrong with the manner in which our pastures are formed and cared for. Some remedy for this state of matters is imperatively necessary, and it seems to us that one most important line of improvement would be the sowing of a larger

number of species of grasses in the laying out of these pastures.

As we have already expressed as our opinion, farmers, as a rule, in preparing their mixtures of grasses to be used in the laying down of permanent pastures, confine themselves to too few varieties, thus failing to arrive at the most profitable results. The chief properties which give value to a grass are nutritive powers, produce, early growth, and reproductiveness (that is, the property of growing rapidly after being cropped). If one species of grass could be discovered that possessed all these qualities in a superior degree to every other, there would be no necessity beyond that of botanical science for us to acquire the knowledge which enables us to distinguish the different species of grasses, the soils and subsoils best adapted to their growth, natural habits, and comparative value; but the results of all experiments have proven that a combination of all the merits and properties which give value to a grass is not to be found in any single species, or in fact in any two or three. In sowing a mixture of a number of different varieties we are but following nature, who can be always depended upon as the best teacher. This can easily be demonstrated by the careful examination of any old, rich, permanent pasture, on which will invariably be found fifteen or twenty species of grass or forage plants growing in great profusion. Where, however, it is left to nature to supply the necessary plants to make a rich and succulent pasturage, a great deal of valuable time is, of necessity, lost, as seven or eight years will elapse before the field will naturally assume the character of a rich and profitable pasture, while by artificial means the same result can be brought about in one fourth the time.

In compiling any table of grasses and clovers to be used for permanent pasture purposes there are several important features to be taken into consideration. First, the proportion of plants which would be produced from the amount of each kind of seed sown should be determined, so that the undue predominance of any particular variety may be avoided. We have given this point special consideration in preparing our mixtures. A selection of grasses should be made that blossom at alternate months of the year, as it is a well-known fact that there is no month from April to September, inclusive, in which some of the valuable grasses do not attain their

full perfection.

EXPERIENCES.

- C. A. Dresser, Treasurer of the Central Mills Co., Southbridge, Mass., in speaking about our Permanent Pasture Mixtures, says:—"The cattle feed upon it ravenously."
- S. C. HUNTINGTON, Henniker, N. H., says:—"The Clover and Grass Seeds which I purchased of your house two years ago proved far better than any I could procure in this vicinity."

WHITE CLOVER

(Trifolium repens.)

By using a mixture comprising these species, it will be at once apparent that a rich and luxuriant growth will be secured broughout the entire season, which result cannot possibly be obtained if the stereotyped mixture usually recommended composes the sward. It would be almost impossible for us to give a series of tables which would comprehend all the variations of tables, altitudes, and climates. We think, however, that those which we have compiled will be found sufficiently comprehensive

to meet nearly all the contingencies that arise in ordinary farming.

These mixtures, which we recommend only after careful study and consultation with the best authorities, are of little or no value unless the seeds composing them are absolutely pure and true to name. We, therefore, especially request those who desire to obtain the best results from their mixtures for alternate husbandry, mowing lands, and permanent pastures, to avoid the probability of disappointment which would naturally attend the placing of orders with parties who have never given any degree of attention to this most important subject, and buy from us direct (or authorized agents), who are the first in this country to make a specialty of this branch of the seed business. We doubt if a full stock of all the grasses which form the components of our mixture could be found anywhere in the United States outside of our own establishment, and know they cannot be obtained in the same quantities and of equal quality.

In conclusion, we would say, that although pastures be formed in the best manner as recommended by us, with a combination of MANY different species of grasses, yet a judicious mode of treatment afterwards is as necessary to continue their value. By proper stocking and top-dressing, very indifferent pastures may be brought to a state of great fertility; but, on the contrary, the richest pastures by neglect of proper stocking, top-dressing, or by the too frequent repetition of hay crops, will become so unprofitable as to require many years to bring them again to their original value. This fact every practical farmer is well aware of, and after the proper mode of sowing and stocking has been determined on, a suitable top-dressing should be found. Under the head of Fertilizers, in another part of this Catalogue, will be found a reliable top-dressing which we can strongly recommend as being specially adapted for pastures of this character.

Alternate Husbandry.

MIXTURES FOR MOWING AND GRAZING LANDS.

As the pioneers of grass mixtures in this country, we naturally have great pleasure in learning from day to day and sason to season that our remarks under the heading, "Mixtures for Permanent Pastures," are fast becoming universally similted facts; and we predict, with confidence, that the time is not far distant when the practice of sowing only one convolves of grass seeds with the hope of obtaining the best results from it will pass, and the better and more profitable one of following nature's plan be adopted.

Many of our statements regarding Permanent Pasture Mixtures are equally pertinent when applied to Alternate Husbandry. It does not require much thought to convince any practical agriculturist that there is no basis to a system that employs the same quantity and kinds of grass seeds on all occasions, without regard to soil, duration of lay, or the condition in which the crop is to be used. All mixtures for Alternate Husbandry should include, say for one or two years lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that are of slower growth.

If a mixture, principally for mowing, is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, consequently, much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it has, however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence when we see an old field of grass that was originally sown with Timothy, Redtop, and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixtures practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equaled first crops of Timothy.

In making up the following tables the utmost care has been exercised, and we have no hesitation in recommending them to our patrons.

NOTE.

It will be noticed that the different tables are all based on the quantity required to sow one acre, so in ordering, war patrons will please state the number of acres for which the seed is desired. We shall, unless we are especially instructed to the contrary, put up each variety of seed in separate packages, packing the entire quantity necessary for one acre in a case. We recommend our friends to always buy their mixtures put up as above, and to refuse to receive them in any other shape. The advantage of buying the seed before it is mixed is very apparent, as it insures the purchaser obtaining the exact varieties and quantities which should compose the mixture he has ordered. This protection cannot be enjoyed where the seed is mixed before it is sent out.

PRICES FOR JOSEPH BRECK & SONS' SPECIAL MIXTURES FOR PERMANENT PASTURES AND MOWING AND GRAZING LANDS.

When ordering, simply give number and kind of mixture selected and the number of acres for which seed is resired; for example: "Send me No. 2 Mixture for Permanent Pastures for three acres."

Special prices for quantities for ten acres and upwards.

While it is true that the mixtures which we have recommended are SEEMINGLY much more expensive than what sommonly used, it should be borne in mind that a vastly increased value is given to the pasture, not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ORDINARY sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

CAUTION. — Appreciating the fact that some unscrupulous parties will probably offer mixtures for permanent pastures, nowing lands, and alternate husbandry, purporting to be the same as ours, we shall, as a matter of protection to both our patrons and ourselves, stencil or print on each case, and also on package containing each variety of seed, our name and address, and request our patrons before purchasing from any other source than ourselves direct, that they examine the case containing same, and if not stenciled as described they may know that IT IS NOT our mixture, and herefore not in any way entitled to our endorsement.

ENSURE A BEAUTIFUL LAWN BY USING BRECK'S LAWN GRASS SEED.

Breck's Lawn Grass Mixture has many imitations but no equal. Sow in Spring or during August and September.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so se'dom seen in this country.

One quart will sow 300 square feet .						Price:	per	quart	\$0.25
One half peck will sow 1,200 square feet						4.6	" 1	peck	.75
One peck will sow 2,400 square feet .					.•	64	4.6	peck	1.25
One bushel will sow 10,000 square feet						6.6	6.6	bush.	4.00
Four bushels will sow one acre									

TWO SPECIMENS.

The lawn for which you sent me Seed and Fertilizer last October is astonishingly successful. It looks like a growth of two

T. W., Wonalancet, N. H. I can only say if the rest of your goods give as great satisfaction as your Lawn Seed Mixture I shall know who to trade with. Send me, etc.

J. S., Exeter, N. H.

See page 60 for particulars of BRECK'S ODORLESS LAWN DRESSING.

WIRE FLOWER-POT STANDS.

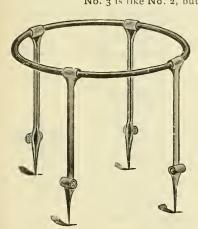

These stands are most desirable, either for household use or for conservatories and other purposes. They are elegantly made, painted a beautiful green, mounted on porcelain castors, and finished with gold bronze, making them very attractive and ornamental.

Oblong Stand, 24 in. high, 30 in. long, 9½ in. wide.

No. 2, \$3.25. Square Stand, with 2 shelves, 33 in.

No. 4, \$4.75. Semicircle stand, 36 in. high, 26 in. deep. high, 18 in. deep, 33 in. long. No. 3 is like No. 2, but has 3 shelves, 36 in. high, 24 in. deep, 33 in. long. \$4.00.

PATENT FOLDING WIRE PLANT STANDS.

Can be opened or folded in a few seconds' time by simply spreading the plant stand apart at the bottom and dropping the cross-bars into their Trays are in position and plant stand is ready for use. To fold it, lift up the cross-bars and close the stand together closely and it is The motion of spreading apart the plant stand opens the trays folded to position; the motion of closing it together folds it compactly. 2 and 3 shelves, same sizes and prices as the rigid.

CHAMPION WIRE TOMATO SUPPORT.

The hollow wire of which these are made is about 1/2 inch in diameter, which prevents cutting the plants. They are set on four legs, easily applied and support the plants thoroughly. When not in use they pack into very small space. Per doz, \$1.25.

WOODEN TOMATO TRELLIS.

Made of hard wood; very durable and useful. Per doz., \$1.50.

BELLOWS, WOODASON'S, FOR LIQUID AND POWDER.

Large double cone, each, \$3.00; large single cone, each, \$2.00; small single cone, each, \$1.00; liquid spraying, each, \$2.00.

CARNATION SUPPORT.

It is cheap, indestructible, is adjustable to different heights, is quickly placed in position, strings are

No. 1 is the standard size; it enters the soil 5 in., its height is 20 in. above foot-piece, and has 3 rings each 6 in. in diameter. Price, \$2 50 per 100.

GLAZIER'S POINTS, VAN RIPPER'S.

The only durable and reliable points. Made of galvanized steel wire; no rights and lefts. Price per box of 1000, 60 cents; by mail, 75 cents. Pincers for driving same, 40 cents; by mail, 50 cents.

PLANT TRUCKS.

This is a large waterproof Saucer on castors, for extra large sized pots or tubs with plants. Their use makes the moving of the plants from one place to another easy, and prevents the carpets being in-

jured by water. Large size, 17 inches in diameter, 75 cents each. Small

65 Saucers without castors, 6 in., 80 cents; 8 in. \$1.00; 12 in. \$1.25 per dozen.

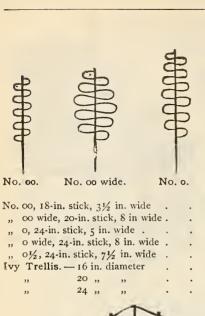

FLORISTS VASES.

Made of Indurated Fibre Ware, light, neat and clean. 8 in. d'ameter, 13 in. deep, 40 cts. each 5½ in. diameter, 10 in deep, 35 cts. each. 4 in. diameter, 6 in. deep, 25 cts. each.

> Special offer No. 2 only applies to articles on this page. See Special Offers on third page of cover.

SPRAYING CALENDAR.

This calendar, in a concise way, gives our friends the benefit of the many experiments made by the Agricultural Colleges of the country for a number of years. It is believed they can be followed without danger to the crops and with much profit to the grower.

The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If the crops are not affected at the time advised, the spraying is unnecessary. Know the enemy and the remedy, and apply them at the proper season, keeping in mind the fact that good judgment and prompt and persistent action is more necessary to success than any definite rules.

The applications to which an asterisk * is prefixed are of most importance.

DIANT	mi a a Hanaina	Consul Application	Third Application	F th. Annillantian
PLANT.	First Application.	Second Application.	Third Application.	Fourth Application.
APPLE (Scab, eodlin moth, bud moth.)	When huds are swell- ing, copper sulphate solu- tion.	*Just before blossoms open, Bordeaux. For bud moth, Arsenites when leaf buds open.	*When blossoms have fallen, Bordeaux and Arsenites.	*S-12 days later, Bordeaux and Arsenites.
CABBAGE (Worms, aphis.)	*When worms or aphis are first seen, Kerosene emulsion.	7-10 days later, if not heading, renew emulsion.	*7-10 days later, if heading, hot water 130° F.	Repeat third in 10-14 days if necessary.
CARNATION (Rust and other fungous diseases, red spider.)	*When rust is first roticed, Bordeaux. Ker- osene emulsion when red spider is first seen.	*For rust repeat first in 10-14 days. For red spi- der repeat in 3-4 days.	Repeat second, using the Ammoniaeal earbon- ate of copper if plants are in bloom.	Repeat second as before if necessary.
CHERRY (Rot, aphis, slug.)	As buds are breaking, Bordeaux; when aphis appears, Kerosene emul- sion.	When fruit has set, Bordeaux. If slugs ap- pear, dust leaves with air- slaked lime. Hellebore.	10-14 days if rot appears, Bordeaux.	10-14 days later, Ammoniacal copper carbonate.
CURRANT (Mildew, worms.)	*At first sign of worms, Arsenites.	*10 days later, Hellebore, If leaves mildew, Bor- deaux.	If worms persist, Helle- bore.	
Gooseberry (Mildew, worms.)	*When leaves expand, Bordeaux. For worms, as above.	*10-14 days later, Bordeaux. For worms, as above.	*10.14 days later, Ammoniacal copper carbonate. For worms, as above.	*1014 days later repeat third.
GRAPE (Fungous diseases, Flea beetle.)	In spring when buds swell, copper sulphate solution. *Paris green for flea beetle.	*When leaves are 1-1½ inches in diameter, Bordeaux. Paris Green for larvæ of flea beetle.	*When flowers have fallen, Bordeaux. Paris Green as before.	*10-14 days later, Bordeaux.
Nursery Stock (Fungons diseases.)	*When first leaves appear, Bordeaux.	*10-14 days, repeat first.	10-14 days, repeat first.	10 14 days, repeat first.
PEACH, NECTARINE, APRICOT (Rot, Mildew.)	*Before buds swell, cop- per sulphate solution.	Before flowers open, Bordeaux.	*When fruit has set, Bordeaux.	*When fruit is nearly grown, ammoniacal copper earbonate.
PEAR	As buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. Kero- sene emulsion when leaves open for psylla.	*When blossoms have fallen, Bordeaux and Ar- senites. Kerosene emul- sion if necessary.	*S-12 days later, repeat third.
PLUM	*During first warm days of early spring, Bordeaux for black knot. When leaves are off in the fall, Kerosene emulsion for plum scale.	*When buds are swell- ing, Bordeaux for black knot and other fungous diseases. During mid- winter, kerosene emul- sion for plum seale.	*When blossoms have fallen, Bordeaux. Begin to jar trees for curculio. Before buds start, Kero- sene emulsion for plum scale.	*10-14 days later, Bordeaux. Jar trees for eureulio every 2-4 days. For San Jose scale, Kerosene emulsion when young appear spring and summer.
POTATO (Scab, blight, beetles.)	*Soak seed for scah in corrosive sublimate solu- tion (2 oz. to 16 gals, of water) for 90 minutes.	*When beetles first appear, arsenites.	*When vines are two- thirds grown, Bordeaux. Arsenites for beetles if necessary.	10-15 days later, repeat third.
RASPBERRY BLACKBERRY DEWBERRY (Anthracnose, rust.)	Before buds break, eop- per sulphate solution. Cut out badly diseased eanes.	During summer, if rust appears on leaves, Bordeaux.	Repeat second if necessary.	*(Orange or red rust is treated bestby destroying entirely the affected plants.)
Rose (Mildew, black spot, red spider, aphis.)	For mildew, *Keep heating pipes painted with equal parts lime and sulphur mixed with water to form a thin paste.	For black spot. *Spray plants once a week with Ammoniaeal copper earbonate, using fine spray.	For red spider. *Spray plants twice a week with kerosene emulsion. Ap- ply to under side of foli- age.	For aphis. *Spray affected parts with Kerosene e mulsion when necessary.
STRAWBERRY (Rust.)	*As first fruits are set- ting, Bordeaux.	As first fruits are ripening, Ammoniacal eopper earbonate.	*When last fruits are harvested, Bordeaux.	Repeat third if foliage rusts.
Tomato (Rot, blight.)	At first appearance of blight or rot, under glass or out of doors, Bordeaux.	Repeat first if diseases are not checked.	Repeat first when necessary.	

For Aphides or Plant Lice use Kerosene Emulsion on all Plants.

See Special Offers on third page of cover.

INSECTICIDES AND FUNGICIDES.

For spraying pumps and appliances see Index.

Breck's Liquid Anti-Ants. A preparation that destroys or drives away ants from lawns, trees, etc. ½ pt., 30 cts.; pt., 50 cts.

Breck's Anti-Ant Powder. A preparation in powder form that contains the same qualities as the preceding, and can be used indoors as effectively as on small plants, flower beds, etc. Per box 30 and 50 cts.

Breck's Dalmation Insect Powder. ("Buback.") Manufactured especially for us from clean, dried flowers. It is put up in air tight packages and keeps its strength indefinitely. It is invaluable to the housekeeper for the destruction of flies, fleas

(RAUPEN LEIM)

MARK

Owl Trident Brand.

roaches and other noxious insects. Packed in four sizes, 10, 15, 25 and 40 cts. Breck's Bordeaux Mixture. Sufficient to make 50 gals., \$1.00; for 20 gals., 50 cts.

Bordeaux Mixture, Lion Brand. A liquid form, only requires water added to make it ready for use. I gallon

makes 50 of proper strength for applying. Per gal., \$1.00; per qt., 40 cts.

Carbolic Purifying Powder. For removing unhealthy odors. Small pkg. 25 cts; 6 lb. pkg., \$1.00.

Canker Worm Exterminator, (Morrill's Tree Ink,) a sure protection to trees from the ravages of grub and canker worms. Directions with each can.

Caterpillar. Lime. (Ermisch's Raupenleim). This is a German preparation. Recommended by the Royal Ministry of Agriculture, and also by several U.S. Agricultural Experiment Stations as being superior to any yet offered to prevent the ravages of grubs, cankerworms, etc. It is applied in the same way as Tree Ink and is more lasting and effective. 5 lb cans, \$1.00; 10 lb. can-, \$1.75; 25 lb. cans, \$4.00; 50 lb. keg, \$6.75; 100 lb. keg, \$12.75; in barrels of about 250 lbs., per lb., 11 cts.

This article is higher in price than other preparations for the purpose but the long effectiveness of a single application com-

pared with that of others makes it really the cheapest. Dip, McDougall's Sheep. An effective, non-poisonous preparation for killing vermin on sheep, cattle and domestic animals. Per

lb., 75 cts.; ½ gal., \$1.50; 1 gal., \$2.50.

Dip, Leggatt's Sheep. An American article for the same purpose as the preceding. Per lb., 75 cts; ½ gal., \$1.50; 1 gal., \$2.50.

Disinfecting Powder. Searle's. A powerful deodorizer in powder form. Per can, 25 cts.

Eciffo. A sure cure and prevention of water bugs, cockroaches, etc. Per tin, 50 cts.

Fir Tree Oil. Soluble. An invaluable preparation for destroying all insects and parasites that infest fruit trees, plants and animals, whether on the foliage or at the roots of the plants. Per qt., \$1.25;

pt., 75 cts.; ½ pt., 50 cts.

Fir Tree Oil Soap. This article contains no poison, yet is quite effective in destroying red spider, mealy bug, aphis, etc. It can also be used in the garden against potato bugs, cabbage worms, currant worms, black fly, etc. Trial pkt., 10 cts; ½ lb. tin, 25 cts.; 2 lb. tins, 75 cts.

fly, etc. Trial pkt., 10 cts; ½ lb. tin, 25 cts.; 2 lb. tins, 75 cts.

5 lb. pkg., 50 cts.

Fruit and Flower Soap. An effective, general insecticide. Pkg., 25 cts.

To prevent mildew on grapes and other fruits and vegetables,

A POWDERED BORDEAUX MIXTURE

rotting of tomatoes, potatoes, and all diseases of a fungus character, apple scab and mildew, pear leaf blight, plum fruit rot, cherry, gooseberry, strawberry and celery blight. 1 lb. boxes, 15 cts each; 5 lb. boxes, 75 cents each.

TRADE

Grape Dust. Destroys mildew on grape vines. Can also be used in the garden for mould, mildew or rust mites.

5 lb. pkg, 35 cts.

Hellebore. Breck's Pure Powdered. We furnish a guaranteed pure article; ground from fresh roots. It is easily applied either in liquid or powder form and destroys currant worms, role slugs, etc. Each package has special directions for its effective usc. Packed in three sizes, air tight packages, 10, 15 and 25 cfs. each. Kill-M-Right. A soap that is specially prepared to be applied with the "Stott" sprayers. It destroys red spider,

mealy-bug, aphis, etc. 5 lb. tins, \$1.75; 10 lb. tins, \$3.25; 20 lb. tins, \$6.00.

Kerosene Emulsion. Breck's. For plant lice, scale, cabbage worm, etc., see spraying calendar. Per qt., 25 cts.; gal.,

50 cts.; 5 gal., \$1.25.

Little's Antipest. A safe and sure preparation for the destruction of all insect pests, equally suitable for greenhouse, garden and orchard. Per pt., 60 cts.; qt., \$1.00; gal. \$2.50.

London Purple. For spraying fruit trees, potatoes, etc. 1 lb., 25 cts.

Paris Green, Breck's Guaranteed Pure. 1/4 lb. 10 cts.; 1/2 lb. 15 cts.; 1 lb., 30 cts.

We are Sole New England Agents for W. S. Powell & Co.'s Reliable Fungicides and Insecticides, and offer the following at the manufacturer's prices:

Powell's Guicide Powder. For potato blight, potato rot, grapevine flea beetle, potato bugs, pear and cherry slugs, codling moths, curculio and strawberry crown borers. Can be used either dry or in solution. 25 lb. boxes, .06 per lb., \$1.50 per box.

INSECTICIDES.—Continued.

For spraying pumps and appliances see Index.

Powell's Copperdine. For black rot, downy mildew, and anthracnose of the grape, pear leaf blight, pear scale

apple scab and powdery mildew. I gallon cans, (makes 100 gallons wash) \$1.50 per can.

Powell's Quassaine. This is a concentrated fluid extract Quassia, held in suspension by Whale Oil Soap—adopted and officially recommended by the State Horticultural Board of Washington, as a cheap and reliable non-poisonous insecticide for hop lice, aphis and all scale insects, nothing better for rose bushes and house plants. Quart cans, (50 gallons wash) \$1.00 per can; I gallon cans, (100 gallon wash) \$1.50 per can; 2 gallon cans, (200 gallons wash) \$2.50 per can.

Powell's Carbolized Soap. For peach, apple and other tree borers, also for washing trees to prevent attacks of

I gallon can, (makes 12 gallons paint) \$1.00 per can. animals or vermin.

Powell's Sulpho-Steatite Powder. For lettuce mildew, powdery and downy mildew of the grape, rose mildew and

other fungus diseases affecting plants under glass. 25-lb. boxes (used as a dust) 8 cents per lb.

Slug Shot, not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. It contains nothing injurious to domestic animals, and does not deteriorate by age. On low-growing plants it should be dusted on with a very fine sifter. On tall shrubs and trees it should be applied with bellows. Price, 5 lb. package, 30 cts; 10 lb. package, 50 cts; in barrels of about 225 pounds, 4 cts. per lb.

Soap, Pinner's Tobacco, manufactured from the essential oil of tobacco, for the destruction of all insects, para-

sites and their eggs. Per lb., 50 cts; 1/2 lb., 30 cts.

Soap, Whale Oil, for destroying insects on plants, trees, vines, etc., for washing down the bark of trees, grapevines, etc. In boxes, 1 lb., 15 cts.; 2½ lb., 35 cts.; in buckets of about 14 lbs., \$1.75.

Soap, Sulpho-tobacco. Rose's Perfected. Does perfect work on all insects affecting flowers, trees and ani-

mals. In tin boxes, sufficient for 10 gals. of water, 25 cts.

Spanish Pink. A safe and effective article for the destruction of cabbage and web-worms, caterpillars and other chewing insects that affect cabbage, squash, cucumbers, melons, etc. Non-poisonous. 35 cts. per pound. Sulphur, Flowers of. Used to prevent and cure mildew on plants. 8 cts. per lb.; \$6.00 per 100 lbs.

Tobacco Extract, Rose Leaf Brand. A perfectly pure, aqueous extract, highly concentrated and always uniform in strength of nicotine poison. Destroys green fly, mealy bug, red spider and scale. \$1.50 per gal.; \$6.00 5 gals.

Tobacco and Sulphur Powder. Prevents and cures mildew. Kills green and black fly and other insects. 10cts. per lb.; \$6.00 per 100 lbs.

Tobacco Dust. Very finely pulverized. A valuable insecticide and fertilizer. 5 cts. per lb.; \$2.00 per 100 lbs. Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the de-Tobacco Dust. structive work of the wire and cut worms. \$1.00 per bbl.; \$2.50 per bale.

INSECTICIDE DISTRIBUTORS.

LIQUID SPRAYING BELLOWS

Bellows, Woodason's for Liquid and Powder. Though a little higher in price than other makes, these are really the cheapest bellows on the market, because they are well made of the best materials; consequently do better work and last longer. Large double cone, each, \$3.00; small single cone, each, \$1.00; liquid spraying, each, \$2.00.

Houchins' Bellows. Cheap and useful for applying inse in powder form. Nos. 11, 75 cts; 14, \$1.00; 19, \$1.25. Cheap and useful for applying insecticides

Dusters, Tin. These have finely perforated bottoms for applying Paris Green, Slug Shot, etc. 20 cts. each.

Gun, Excelsior Powder. For applying insect powders, etc. 15 cts. each.

Cyclone Powder. 15 cts. each. Blizzard Powder. 10 cts. each. Powder Puff, Scollay's Insect. is a large, strong rubber bulb, with long metal neck and distributor set at an angle that enables the operator to apply either powder or liquid over or under the leaves. \$1.00 ea.

BRECK'S FLOWER FOOD.

Twelve years ago we introduced an entirely odorless fertilizer, that could be used on the lawn and garden without offence to either user or neighbor. It has yearly grown in popularity, and on account of its success several imitations were put on the market, yet its sales are greater than those of its combined imitations. Many people who used it on their lawns and flower beds were so pleased with the results, and its freedom from all offensiveness to either smell or touch, have also been using it largely on their house plants. We do not recommend it for this purpose, because it is neither so highly concentrated or as quickly soluble as a pot-plant fertilizer should be. For these reasons, and to meet the demand for a really odorless and reliable article, we now offer Breck's Flower Food. Its users will promptly be surprised at the way it promotes a healthy, vigorous growth of wood, leaf and flower, and wonder how it can add such color and fragrance. Put up in two sizes beautiful lithographed boxes.

No. 1, sufficient for 30 plants for one year, 25 cts.; by mail, 35 cts.

No. 2. sufficient for 30 plants for three months, 15 cts.; by mail, 25 cts.

Bradley's Lily Brand Flower Food. No. 1, 25 cts.; by mail, 50 cts. No. 2, 15 cts.; by mail, 25 cts.

Special offer No. 2 only applies to articles on this page.

MISCELLANEOUS REQUISITES.

Baskets, Verbena. Wood or wire handles. Standard size per 100, \$2 00; per 1000, \$18.00. Large size: 12

in long, 7 in. wide, 4 in. deep, per 100, \$3.00; 1000, \$25.00.

Caps, Hay, Breck's Improved, brown, medicated, complete with ropes and pins, 50 cts. each; \$45 00 per 100.

Color, Improved Butter, Well's Richardson & Co,'s imparts the "golden tint of June" to butter at all seasons

of the year. Bottles sufficient for 500 lbs., 25 cts.; 1250 lbs., 50 cts.; 3000, \$1.00. Color, Hanson's Butter, a universal favorite, bottles, 25 cts., 50 cts., and \$1.00 each.

Cotton Batting, for packing flowers, etc., per sheet, 6 cts.

Mats, Archangel, an excellent light covering for frames, hotbeds, etc., 75 cts. each.

Mats, Straw for hotbeds, etc., 6x6, \$1.50 each. Other sizes to order.

POULTRY SUPPLIES.

PRICES SUBJECT TO CHANCE.

BRECK'S Poultry and Swine MEAL.

Breck's Poultry and Swine Mcal was first offered the American public in 1893, but it has, since that time, found its way into the yards of the most progressive poultrymen in the country, because it is superior in every respect to all other Meals Made From Meat or Animal Matter.

A reasonable trial only is necessary to prove its superiority as producer of eggs and as a maker of flesh, bone,

and muscle.

It is not a new article, but one that has been used for a great many years in Germany, where it is known as "Thieren Mehl," which in English means meat meal or meal made from animal matter. It is perfectly sweet and wholesome, being prepared when the materials are fresh, and it is guaranteed to keep longer and better than good beef scraps. Its odor is sweet and the flavor more agreeable than any other meat or animal meal on

In addition to the pure meat and bone, we have combined in this preparation some of the most potent agents known for the production of eggs, not by stimulating but rather by preventing disease and promoting general good health, which condition is also necessary for fattening both fowl and swine. This preparation is not only more nutritious and palatable than other animal matter meals, but is entirely free from bad odors, is cheaper than either beef scraps, bone meal, fish meal, or similar manufactured articles. Order a trial bag and you will be convinced as to its great merits. 100 lb. bags, \$2.25; trial bag (a month's supply for 30 hens) \$1.00.

Ground Oyster Shells. 100 lb. bags, 65 cts. per 100

lbs.; in bbls. of 250 lbs., 65 cts. per 100 lbs.

Mica Crystal Grit. 50 lb. bag, 75 cts.; 100 lb., \$1.00. Cracked Poultry Bone. Per bbl. of about 200 lbs.,

\$2.50 per 100 lbs. Bone Meal for Poultry and Cattle. 50 lb. bag, \$1.50; 100 lb. bag, \$2.50; per bbl of about 200 lbs.,

\$2 50 per 100 lbs. Flour of Bone. 50 lb. bags, \$1.50; 100 lb. bags, \$2.50; per bbl. of about 200 lbs., \$2.50 per 100 lbs.

Ground Beef Scraps. 50 lb. bags, \$1.50; 100 lb.

Fish Meal. (Desiccated Fish.) 50 lb. bag, \$1.25;

INSECTS

and all forms of the lower order of animal organism, that are a source of annoyance to the human race and the lower animal kingdom, including our feathered friends, can be cheaply and effectually destroyed by using Sulpho-Napthol. This includes fleas on dogs, lice on hens and cattle, and all insect pests that the florist and gardener have to contend with. No winged insect will infest anybody, anything or any place where Sulpho-Napthol is used. Sulpho-Napthol is not poisonous or corrosive, and is perfectly harmless to use wherever water can be applied, and its price makes it practical to use.

An investigation of our endosements, which are contained in circulars, will prove what we claim to be facts. Sold and endorsed by Joseph Brek & Sons, and the Sulpho-Napthol Company, No. 687 Washington Street, Boston,

Mass. 50 cent bottle makes 10 gllons; \$1.00 bottle, 50 gallons solution.

Save and Improve Your Stock by Using . . .

"TOUGH ON FLIES."

Harmless and effective. One application instantly and positively relieves horses and cattle from all annoyance from Green Heads, the dreaded Texas Hecl Fly as well as from other flies, gnats and insects of every description for at least twenty-four hours. It improves the coat of the animal and abolishes the use of fly-nets. It prevents thrush and other hoof diseases. It is soothing and healing if applied to sores, and stands unrivalled as a disinfectant. Applied to cows, its wonderful effect in securing for them perfect rest and a chance to feed in peace quickly manifests itself in their improved appearance and by the in-

creased quantity of milk given. It is the greatest compound of this progressive age. Recommended by thousands using it. One gallon lasts four head of horses or cattle an entire season. Price of "Tough-on-Flies": Quart cans, \$1.00; ½ gallon cans, \$1.75; gallon cans, \$2.50; and 5-gallon cans, \$2.00 per gallon, including cup and brush with each can. When brush is not supplied, the price is 25 cts. less than above prices.

* EVERYTHING THAT WEARS FEATHERS *

will harbor vermin unless you do something to prevent. There is nothing better for this purpose than the article here illustrated, Lambert's Death to Lice. This preparation does the work "while you wait," writes W. C. Prentiss, Billerica, Mass. "It saves 100 times its cost," Frank B. Thompson, Pittsburg, Pa. "It kills all at one time dusting," Mrs. J. W. Smallwood, Washington, N. C. "Destroys insects of all kinds," Mrs. W. H. Henderson, Downing, Colo. "I can't raise chickens without it," W. A. Crosby, Fairfield, Me. "It keeps hens clean," Thos. Turner, Lonsdale, R. I. Tons and tons of this remedy are sold annually. Successful poultry raisers use and recommend it all over the land. It is especially adapted for sitting hens. It will not injure the hen, eggs or chickens should they hatch in it. Broods that are started free from lice and nits can be reared with one-half the care and mortality of lousy, sickly ones. Dealers sell this powder at the following prices:-

5 oz. Box, 10 cts. 15 oz. Box, 25 cts. 48 oz. Pkge, 50 cts. 100 oz. Pkge, \$1.00.

D. J. LAMBERT, M'f'r, = Apponaug, R. I. JOS. BRECK & SONS, Jobbers, Boston, Mass.

"The Best Poultry Paper Published." FARM=POULTRY.

It costs only \$1.00 semi-monthly.

THE DEMAND for choice market poultry in the form of chickens for broilers, roasters, fowl, ducks, turkeys and eggs, is every year increasing. The average price in the large markets rules high the year around. The demand for "good" poultry and "fresh" eggs is not supplied by the raisers of this country, and will not be for years to come. Prices are steadily increasing year alter year.

THEREFORE, why do you not give more attention to poultry raising? You may answer, "Oh! there is no profit in it here." Yes there is "there" or anywhere if rightly done. "Scrub" poultry, poorly prepared for market, and stale eggs, like all other second grade goods, will always sell slow in the market.

THAT BEST of all poultry papers, FARM POULTRY, published by 1.S. Johnson & Co., Boston, Mass, has done, is doing and will continue to do very much to teach every person who reads it carefully and practices its teaching, how to raise poultry for profit, because all the matter that goes into it is the result of actual experience by the editor on a poultry farm. Upon this farm is being done every year just what FARM.POULTRY and and will teach you, if you study its pages every issue. It is a practical instructor; it is a helpful friend and aid; it is to the beginner an ever ready reference and guide to success.

How to dress and market poultry; How to prevent and cure all chicken and poultry diseases; How to bring the pullets to early laying maturity; How to price perent and cure all chicken and poultry diseases; How to bring the pullets to early laying maturity; How to make hens lay most eggs at season when prices are high.

Do you care to learn how others make their hens pay \$2.50 each per year? Then subscribe to FARM-POULTRY. "What has been done can be done again." Remember the price; one year, \$1.00; sample copy, 2 cts.

Prevents all Disease; Cholera, Roup,

FERTILIZERS.

BRECK'S LAWN AND GARDEN DRESSING.

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is a brand manufactured expressly for our own trade, and we can therefore vouch for its containing all the constituents required to produce a growth of grass of a luxuriant nature and rich green color. While many Lawn Dressings are claimed to be odorless, we believe beyond a question that ours is the only absolutely odorless. It is also so clean that the most fastidious person can apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a firmer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year from April to November, as often as the grass seems to need nourishment. In making new lawns apply at the same time the seed is sown and rake in with the seed. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flower-beds and all vegetable crops as for the lawn.

SHEEP MANURE.

The superior of all natural manures. Better than any chemical fertilizer. This is a pure natural manure, and the most nutritious food for plants. Its effect is immediate. It is the best of all manures for mixing with the soil for green-house plants—one part manure and six parts soil. Strewn over and dug into the vegetable garden, or placed directly in drills or hills, it promotes a rapid, steady growth until maturity. It makes the richest, safest and quickest liquid manure, rivalling guano, without any deleterious effects. For use in liquid form, one pound to five gallons of water will make a dark liquid which can be used with safety daily if necessary. Retail price, in bags of 100 lbs. each, \$3.50; ½ ton, five bags, \$15.00; per ton. 20 bags, \$45.00. Sheep manure at ton price is net F. O. B. Boston; smaller quantities as quoted are subject to Special Offer No. 2 only.

PLASTER DUST.

For destroying insects upon vines. Per 5-lb. box, 15c.; 25-lb. bag, 5oc.; barrels of about 150 lbs, \$2.00 per barrel. Net F. O. B., Boston.

See Special Offers on third page of cover.

THE MAPES MANURES.

These are the standard Special Crop Fertilizers of the world. They may cost a little more than some other "complete manures," but they give far better results in the field.

We are the sole Boston Agents, also, for some other New England sections. Pamphlets giving full informa-

tion in regard to the Manures mailed free.

These Fertilizers are packed in bags of 200 pounds each. 2,000 pounds to the ton.

Our Special Offers do not apply to Mapes Manures, but we allow five per cent discount for cash payments. F. O. B. Boston.

Potato Manure. For Irish and sweet potatoes; also for asparagus, early vegetables, tomatoes, sugar beets, fruits, sorghum, and sugar cane. Per bag of 200 lbs., \$4.50: three bags and over, \$43 00 per ton.

Fruit and Vine Manure. For insuring fruiting power, particularly in quality of fruit in vineyards (grapes), pears, apples, plums, strawberries and all small fruits. Is slow in effects. Per bag of 200 lbs., \$4.20;

three bags and over, \$40.00 per ton.

Complete Manure (for heavy soils). For use on heavy or clay soil, for wheat, rye, oats, seeding-grass, or spring too-dressing of meadows, pastures, etc., on any soils where small quantity of potash, but large quantities of ammonia and phosphoric acid are required. It is very safe for use around young plants, nursery work, strawberry vines. Is very forcing. Per bag of 200 lbs., \$4.40; three bags and over, \$42.00 per ton.

Complete Manure (for light soils). Early vegetable or truck manure. For all kinds of soils, light or heavy, use broadcast; special for onions, also on light soils for asparagus, sweet potatoes, melons, tomatoes, wheat and seeding to grass Per bag of 200 lbs., \$4.60; three bags and over, \$44 00 per ton. Complete Manure ("A" Brand). For use in hill or drill on all crops, particularly in connection with farm manures. Special for peas, beans, buckwheat, and turnips. Per bag of 200 lbs., \$3.90; three bags and over, \$37.00 per ton.

Complete Manure (for general use). A substitute for stable manure. For use on all crops and all soils with or without stable manure. Use broadcast; use sparlngly, if put in hills. Special for oats, Hungarian grass, vegetables, melons, tomatoes, and seeding with or without grain. Per bag of 200 lbs., \$4.20; three bags and over, \$40 00 per ton.

Corn Manure. For sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. Per bag of 200 lbs., \$4.30; three bags

and over, \$41.00 per ton.

Cauliflower and Cabbage Manure. Ammonia, 5.50 to 6.50 per cent.; phosphoric acid, 6 to 8 per cent.; actual potash, 8 to 10 per cent. Per bag of 200 lbs., \$4.20; three bags and over, \$40.00 per ton.
Grass and Grain Spring Top Dressing. Ammonia,

5 to 6 per cent.; phosphoric acid, 7 to 9 per cent.; actual potash, 5 to 7 per cent. Per bag of 200 lbs., \$4.30; three bags and over, \$41.00 per ton.

STOCKBRIDGE MANURES AND BOWKER'S PHOSPHATE.

These goods are so well known in New England that remark from us regarding them is uncalled for.

LIST OF STOCKBRIDGE SP AL MANURES.

Stockbridge Potato Manure, for or	ne acre	without st	able manure,*	1,000 to 1,500 lbs.	Per bag	(100 lbs.), \$2.25
Stockbridge Corn Manure,	6.4	"	64	600 to 1,200 lbs.	"		2.25
Stockbridge Grass Manure, Top							~
Dressing,	4.6	6.6	4.6	300 to 600 lbs.	"	"	2.25
Stockbridge Seeding Down Manure	1	4.4	6.6	600 to 800 lbs.	44	4.6	2.25
Stockbridge Vegetable Manure,	6.4	4 6	6.6	1,000 to 2,000 lbs.	6.6	4.4	2.25
Stockbridge Fruit Manure,	4.6	4.6	4.6	1,000 to 2,000 lbs.	6.6	4.6	2.25
Stockbridge Root Manure,	6.6	6.6	4.4	600 to 1,500 lbs.	6.6	4.6	2,25
Stockbridge Asparagus Manure,	2.4	6.6	6.6	1,200 to 2,000 lbs.	6.6	+ 6	2.25
Stockbridge Celery Manure,	6.6	4.6	4.6	1,500 to 2.000 lbs.	6.6	6.6	2.25

*The above quantities recommended for one acre are without stable manure; but, if stable manure is used in connection with the Stockbridge, then a smaller amount can be used, depending on the amount of manure applied and its richness. About one-half the quantity of each is the rule.

The first column gives the usual quantities which farmers apply, and the second column the usual quantities which market gardeners apply.

Bowker's Hill and Drill Phosphate. Per 50 lb. bag, \$1.25; per 100 lb. bag, \$2.00; per ton, \$36.00.

Bowker's Fresh Ground Fertilizer Bone. Per 50 lb. bag, \$1.25; per 100 lb. bag, \$2.00; per ton, \$35.00. The prices quoted on "Stockbridge Manures," Bowker's "Hill and Drill." and "Fresh Ground Bone," are net f. o. b. Boston, and not subject to our special offers; but a discount of five per cent may be deducted when cash accompanies order.

CHEMICALS.

Prices Variable. Subject to Change Without Notice.

Sulphate Ammonia, 25 per cent. ammonia,	per 100 lbs.					\$3.75
Nitrate Soda, 95 per cent. purity,	4.6					2.75
Muriate Potash, So to S5 per cent. M. Potash,	6.6					2.50

Kainit, 20 to 25 per cent. Sulphate Potash,	6.6					1.00
Bone Black,	4.6					1.50
Sulphuric Acid,	6.					1.75

Land Plaster. Per bbl., \$2.00; per ton, \$9.00, net f. o. b. Boston.

Carbovs for Sulphuric Acid, \$1.50, returnable. Chemicals, net cash, F. O. B. Boston.

BRADLEY'S

THE WORLD'S BEST

ORLD'S FERTILIZERS

"Let every farmer clearly understand that when he buys Bradley's Fertilizers he is getting as rich, as available, and as concentrated fertilizers as the world has ever known. They are endorsed by thousands of practical farmers and gardeners, who have made careful and personal tests of their efficiency in growing superior crops at reasonable cost.

"Every bag of Bradley's Fertilizer carries with it a guarantee of an honorable, enterprising, and well-equipped concern, and contains a fertilizer, the component parts of which and the practical value of which have been determined by two generations of skilful and careful experiment, not only in the laboratory and in the factory, but in the soil itself,"—

Boston Cultivator.

BRADLEY'S

THE WORLD'S BEST

FERTILIZERS

(SEE NEXT PAGE.)

Bradley's Fertilizers

Are guaranteed to contain more plant food in better mechanical condition and of higher agricultural value than any other fertilizers in the world, and they are, therefore, as the "New England Homestead" affirms, "the most economical to use."

Do not be misled into purchasing unknown fertilizers of uncertain value, but buy Bradley's Fertilizers, which have grown large crops of superior grass, grain, and vegetables, on thousands of farms all over New England for more than thirty years.

Among their leading brands are

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world.

From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise,—"the Old Reliable."

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure.

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated *field tests* have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced "special potato manures" whose alleged scientific combination is their principal claim to the farmer's patronage.

BRADLEY'S COMPLETE MANURE

For Potatoes and Vegetables.—For Corn and Grain.—For Top-Dressing Grass and Grain.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable, combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Send to us for finely illustrated pamphiets, describing all of their brands, and let us quote you frices on all of these unequated fertilizers before purchasing elsewhere.

cherishing them into health and vigor."

Mrs. Celia Thaxter, in her beautiful book, "An Island Garden," when touching this subject, says: "You may give them all they need of food and drink and make the conditions of their existence as favorable as possible, and they may grow and bloom, but there is a certain ineffable something that will be missing if you do not love them."

This was her experience, and from it may be gathered the fact that something besides a skilled preparation of the ground and sowing the seed is needful. Of course it is well to know that Poppies delight in a rich, sandy loam, that Eschscholtzias will do best in a poor soil; or of Pansies, give them abundance of old manure, the richest earth you can find, plenty of water and partial shade; that you need not be anxious if it is not convenient to carry water for Nasturtiums in a dry time, for their habitat is dry Chili, and they will thrive in a dryer soil and atmosphere than almost any other plant; or that Zinnias like a heavy, cool clay; Sweet Peas a deep, rich soil and plenty of water, while such gross feeders as Roses, Sunflowers, Hollyhocks, Dahlias, and Asters cannot be planted in too rich a situation; yet,

"To raise your flowers, various arts combine, Study these weil, and fancy's flight decline; If you would have a vivid, vigorous breed, Of every kind, examine well the seed; Learn to what elements your plants belong, What is their constitution, weak or strong; Be their physician, careful of their lives, And see that every species daily thrives; These love much air, these on much earth rely, These, without constant warmth, decay and die; Supply the wants of each, and they will pay For all your care through each succeeding day."

with the results obtained by her labor and love. "The Norwegians have a pretty and significant word, 'Opelske,' which they use in speaking of the care of flowers. It means literally 'loving up' or

EXPLANATORY.

Our General List of Flower Seeds, it will be found, is divided into the following groups, viz.; Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings: Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in the front of book. Following the botanical name is a brief description of the plant—its color, habits, etc. In the first column at the right, the hardiness and duration is given; in the second column, the height of plant; in the third column, the price of seed per packet. To this arrangement and the following abbreviations we have given the most careful attention, and we trust that its simplicity will not only find favor with our customers, but prove valuable to them as a handy reference, to be used in all matters pertaining to floriculture.

KEY TO ABBREVIATIONS.

A designates Annuals - Lasting but one year.

" Biennials - Lasting two years.

В

P " Perennials - Lasting three or more years.

" This sign, where affixed to B or P, indicates Biennials or Perennials, which, if sown early, flower the first season.

hA " Hardy Annuals - Seed may be sown in early spring or late in fall.

hhH " Hardy Annuals - Seed should be sown about middle or last of May.

Tender Annuals - Seed must be started in artificial heat, and transplanted to open ground about June 1st.

hB or hP designates Hardy Biennials or Perennials—Plants stand the coldest winter without protection.

hhB or hhP "Half Hardy Biennials or Perennials—Plants requiring to be well protected during winter.

" Tender Perennials - Plants requiring greenhouse protection during winter.

Hard. and Dur. signifies Hardiness and Duration; Trai., Trailing; H'g't, Height; and Var., Various.

in heat. Plumosa Nana. The sprays when cut will remain green in water for a month. BEGONIAS. These are increasing in popularity yearly. The tuberous-rooted kinds grow well either in shade or sunshine and are splendid for pot culture. The ornamental foliage sorts are all suitable for house cultivation and some of them surpass in grandeur of foliage and continuity of flower any other plants suitable for bedding. Seed should be started in a gentle heat. We have made a specialty of Begonias for years and can assure our friends that Breck's strains surpass all others in quality.	66			.20

NOVELTIES AND SPECIALTIES

IN FLOWER SEEDS, BULBS AND PLANTS

Dwarf Antirrhinum

ANTIRRHINUM, This family has been so much improved in habit, form, color, and substance of flower within the past few years, that it has become a general favorite with florists and private growers both for cutting purposes and bedding. We especially recommend the strain here offered, because it is superior to all others known to us.

Dwarf. This class is of neat growth and densely

covered with flower spikes; if sown in March or April and planted out when strong enough, they make a fine display throughout the summer and fall. Height, 1/2 ft. Crimson, Scarlet, Striped, Yellow, White, Carmine and White, any color. Pkt. 10 cts; mixed pkt., 10 cts.

Tom Thumb. These are of dwarf compact

growth, and come very true in color from seed. They are effective when grown in beds or masses. Height, 9 to 12 in. Crimson, Rose, White, Yellow, Striped, Orange and Scarlet, any color. Pkt. 10 cts.; mixed pkt. 10 cts.

Yellow Queen. An undoubted acquisition; the plants grow 15 inches high and produce, true from seed, an abundance of large, beautifully formed flowers of a bright yellow color. Pkt. 15 cts.

I have always got the finest seeds from you for myself, and now I want some for -

P. L., Chocorua, N. II.

ASTERS. The Aster Seeds we offer are in every case the very best of the several classes, all having been grown especially for us by the most skilled and successful cultivators of the different kinds in America, England, France and Germany; many of the strains, which are superior to all others, we control exclusively. Our Aster Seed is popular with the leading Florists and private growers throughout the Union, and we recommend it in the full assurance that it will satisfy and delight all who plant it. For complete list of varieties see pages 68-71

COMET, Delicate Rose. An exceedingly beautiful and desir-

The Bride. Pkt., 20 cts.

The Bride. The flowers of this new aster are of immense size, very double, and composed of long, wavy, twisted petals, borne on long stems. The color is white, passing into rose. Very delicate and beautiful. Pkt., 15 cts.

DWARF CHRYSANTHEMUM, Terra-Cotta. The color of

this new variety, when opening its blossoms, is bright salmon-red; when in full bloom it changes to terra-cotta

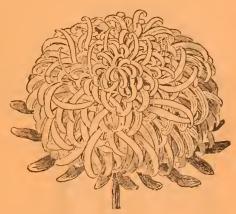

brown. Pkt., 15 cts.

DOBBIE'S GLOBE QUILLED. This strain has been grown and selected for over thirty years. It has been twice commended by the Royal Horticultural Society of England, after trial in their gardens. The blooms are large and of very beautiful colors. Assorted colors, pkt, 10 cts.; collection six distinct colors, 50 cts.

DWARF PÆONY-Perfection. Dark Purple. This is the true paony form, the color is entirely new amongst asters,

being a very deep, velvety purple. Pkt., 20 cts.

Blackish-Violet. This is the darkest colored aster yet produced; seen from a little distance it seems quite black. Pkt., 20 cts.

Comet Aster

ASTER. MIGNON. Rosa-Alba. The value of this class is enhanced by the addition of this new shade, rose, with an under-glaze of white. Pkt., 20 cts.

PRINCESS ROSE. This is the favorite "Snowball" type. The color of this new claimant for ball "type. The color of this new claimant for this result is the result of the result in the rose it is the rose i

favor is bright rose; it is an acquisition. Pkt.,

BRECK'S INTERNATIONAL PRIZE. Those of our friends who wish a full assortment of the most desirable kinds of asters, are invited to try this mixture; it is composed of the very best strains of the leading French, German and American Growers. Pkt, 15 cts.; oz. \$3.00.

I send certificate from the Berkshire Horticultural Society to show that I received First Prize on Collection of Asters. They were grown from Breck's Seeds and were

Begonia Vernon Compacta

BEGONIA VERNON COMPACTA. Charming new compact variety of the beautiful and universally admired Begonia Vernon, forming small round, very compact bushes of about 4 to 5 inches in height and possessing the same good qualities as its taller growing parent, namely, the brilliant red flowers and the deep brownish red foliage. Blooming in the greatest profusion throughout the summer and autumn, this new variety may be considered one of the best bedding plants for dwarf groups or ribboning. Pkt., 25 cts.

Hybrida. Hero. A result of crossing Baumanii with Gigantea Alba; this new, robust growing variety produces long flower stalks with large, well-formed, sweet-scented flowers. the color of La France Rose. Pkt., 25 cts.

Aurora Odorata. A new sweet-scented variety with coppery-crimson flowers. Pkt., 25 cts.

Tuberous-Rooted. Breck's International Prize. Single-Flowered. This strain is saved from selected flowers of the largest and best collection in the world. Pkt., 25 cts.

Double-flowered, equal to the preceding. Pkt., 25 cts.

CHRYSANTHEMUM CARINATUM. Purple Crown. This new summer flowering variety, is of dwarf, compact and very regular growth, with beautiful yellow foliage. Its flowers, produced in great abundance, are purple-scarlet with a bright golden-yellow ring which contrasts admirably with the purple around it. Pkt., 20 cts.

> I have seen your advertisement recently in the Youth's Companion, but to one whose experience of your firm has been like mine, that is but a reminder of good things.

> > Mrs. T. A. B. J., Lexington, Mass.

COSMOS. Golden Yellow. This new Cosmos is perfectly distinct in character and color. Its height is from two to three feet, and the plant is of branching habit, being furnished from the bottom up with

finely cut glossy-green foliage. Pkt., 10 cts.

Chrysanthemum Carinatum

AMPANULA JAPONICA. A new perennial variety from Japan. The plant is of fine branching habit, each stem bearing several flowers from 21/2 to 3 inches across, and of a deep blue color; the flower forming quite a regular star composed of twelve petals. It is perfectly hardy and if sown in summer will bloom from June until August of the following year. Pkt. 20 cts.

COREOPSIS JAPONICA. A new Japanese variety of this popular annual. The plant is of a globular, branching growth, and from June until frost is covered with flowers of a pure canary-yellow. Pkt., 15 cts.

Celosia Ostrich Feather

Coreopsis Japonica

CELOSIA. Ostrich Feather. This new Celosia produces very large plumes, which are exquisitely curved and curled like an ostrich feather. The plant grows about 3 feet high, is of handsome pyramidal form, and is effective for either pot or outdoor cultivation. It requires the same treatment as the ordinary Cockscomb.

CENTAUREA CHAMELEON. Similar in habit and attractiveness to the Margaret Centaurea, introduced two years ago. The flowers are pale sulphur-yellow with a purple shading. Pkt., 10 cts. Margaret. Distinct from all other centaureas and undoubtedly the most beautiful variety known. The large flowers are of purest white, deliciously

New Single Dahlias.

Centaurea Margaret

DAHLIA. Single Perfection. This splendid, giant, single-flowered strain is of French origin and surpasses all others now in cultiva-tion. The seed being gathered from the largest and broadest petaled flowers only, varying in diameter from 4 to 6 inches, reproduces them in a variety of the most splendid colors, amongst which the striped sorts predominate. Pkt. 25 cts. Breck's Premier. A choice selection of the best sorts only.

Mixed. Pkt., 10 cts.

DIANTHUS SUPERBUS TELEKII. A new cross between Superbus and Laciniutus. It is a hardy perennial of robust growth that flowers incessantly from June until frost. The flowers, which are double and single, vary in all shades of color known amongst Chinese Pinks. Pkt., 20 cts.

DATURA. Golden Queen. This variety has all the fine qualities of the popular D. Cornucopia, but, on account of its brilliant yellow flowers, it is a more showy and effective plant. From seed sown in the open ground, it grows in a single season to a height of $2\frac{1}{2}$ feet, forming a compact bushy plant. The flowers are of gigantic size, many of them 10 inches long, very double and produced in great numbers. Pkt., 10 cts.

EUPATORIUM SERRULATUM. A new greenhouse plant, from South America, with beautiful green foliage and umbellated, purple-rose flowers which appear on the tip of the branches. It is of the easiest culture and is especially valuable because it flowers during winter when flowers are scarce. Pkt., 20 cts. Weinmannianum Tricolor. A new variegated variety. The leaves are green, yellow, silvery-white and pink, making the plant very effective during the whole year. The color of the foliage is not affected by the sun, which fact makes the plants valuable for bedding as well as pot culture. Pkt., 15 cts.

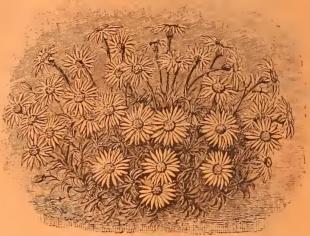

FELICIA ABYSSINICA. A perennial that will flower the first year. It is a lovely dwarf alpine from Africa, producing in June a great abundance of graceful flowers of lilac color, which often changes to blue. suitable for border or carpet bedding. Pkt. 20 cts.

When in Boston I purchased some Seeds of you. They gave perfect satisfaction, Enclosed please find order for Bulbs, etc.

> MRS. C. S., Pt. Huron, Mich.

Gloxinia Aigburth Crimson

Felicia Abvssinica

GLOXINIA. Aigburth Crimson. This is the finest highcolored sort ever sent out. As its name indicates, it is a vivid crimson self. The flowers are erect, of the finest form, substance, great size, and abundantly produced; the habit of the plant is all that could be desired. Pkt., 50 cts.

Hetherset Hybrid. We introduced this variety three years

ago, since which time it has been tested by many of the leading gardeners and florists of the country and pronounced superior to any other strain. The flowers are borne erect and measure 3 to 4 inches in diameter; the colors are of every conceivable shade of white, pink, rose, lilac, scarlet, crimson, maroon, purple, to the richest purplish black; nearly all profusely spotted in the throat. Pkt., 50 cts.

GODETIA. Yellow Queen. A new variety, of the large flower-

ing class of Godetias, with pale yellow flowers. It is a valuable acquisition and sure to find favor. Pkt., 20 cts.

HOLLYHOCKS. Breck's Silver Medal Strain. This strain, introduced by us in 1891 as superior to any in cultivation, has well maintained its position. No other collection approaches it in length of spikes, profusion and texture of flowers and foliage or variety of colors. Collection of twelve distinct colors, \$1.00. Mixed colors, about 20 shades, pkt., 10 cts.

> LEPTOSYNE GIGANTEA. This new Leptosyne is a native of California, and is of such peculiar habit and beauty that will cause it to become a general favorite. It is a biennial, but will flower here the first year from seed. Our illustration gives a good idea of the form of the plant, but does not convey a shadow of its beauty. It is of quick growth, attains a height of 4 fect, and is crowned with a wealth of finely-cut, light. green leaves, from out of which the yellow sunflower-like flowers peep. Pkt., 20 cts.

Silver Medal Hollyhocks

Leptosyne Gigantea

Lobelia Gerardi

LOBELIA GERARDI. Mixed. These new shades of perennial lobelia were introduced in France two years ago and are now offered in America for the first time. They are of the Cardinal Flower class and are acquisitions, giving, as they do, a greater variety of color to cultivators of that favorite border plant. The leaves and stalks are of a bright green color, which contrast beautifully with the flowers, which are produced in panicles of from 12 to 16 inches in length from June until frost; the colors are rose, coral red, blood red, and purple violet. Mixed, pkt., to cts.

Erinus Delicata. A new dwarf variety with large flowers of a

brilliant indigo blue and a distinct clearly marked white eye. Pkt.,

20 cts.

I have grown a number of strains of Cineraria this year, but none of them begins to compare with vour " Columbia."

W. N.,

Framingham, Mass.

LINARIA HENDERSONI ERICOIDES. The plant grows only eight inches high, but branches out laterally to the space of ten inches. The thin flat stalks are thickly covered with smooth, narrow, sage-green leaves, forming a bush from which sprout up the corn-shaped spikes of flowers, giving the plant somewhat the

appearance of a Heath, on which account I have given it the name of Ericoides. Individually, the small snapdragon-like flowers are of a purplish-violet color, striped and veined with lines of a darker shade.

This Linaria is a perennial plant, but may be treated entirely as an annual, as the seedlings bloom very early the first year. They produce an uninterrupted succession of bloom until late in the autumn. The variety comes nearly true from seed, submits willingly to being transplanted, and will flourish in almost any soil. For dwarf beds and borders, as well as pot-

culture, this novelty will be found very useful.

The sowing must be made under glass early in March, and as soon as the seedlings are strong enough they should be planted out where they are to bloom. Pkt., 15 cts.

Golden Machet Mignonette

MATRICARIA EXIMA. Golden
Ball This pretty novelty forms a densely-compact bush, about 12 inches high by 10 inches across, profusely covered

by a multitude of rayless, Matricaria Exima quilled flowers of a rich and intense golden yellow. It is entirely distinct from older varieties and surpasses them by virtue of its telling color. It is useful alike for beds, borders or pot culture. Pkt., 15 cts.

MIGNONETTE. Golden Machet. All the excellences peculiar to the popular

Machet, the best for all purposes, are possessed by this new variety.

plants are of strong compact habit with the large crinkled leaves of the Machet class, and bear long massive spikes

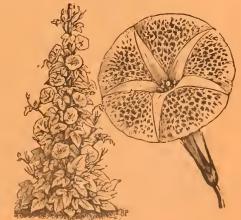

of golden yellow blossoms.
Pkt., 20 cts.
MIMULUS HYBRIDUS. Diadem. This new Mimulus is distinguished by its dwarf

compact growth and sturdy stems, which bear the flowers freely and very erect. The foliage is of a deep green and the blossoms, which are produced in great abundance, are large and richly colored. Pkt., 25 cts.

MORNING GLORY. Marbled, Ivy-Leaved. A very pretty, new variety, with large, light-blue, marbled and striped flowers. Pkt., 15 cts.

MYOSOTIS. Fairy Eye. This is the largest flowered variety of the true Forget-me-not. The plant is of robust growth, and when placed in a somewhat moist situation will continue in bloom from May until frost. The color is delicate sky-blue with a deep-yellow eve. Pkt., 20 cts.

Morning Glory, Marbled, Ivy-Leaved

MARIGOLD. Pride of the Garden. A new dwarf, extra early variety that produces a multitude of very large,

double golden yellow flowers. Pkt. 10 cts.

This is a new and pleasing variety of the Dwarf Striped French class. It is the result of many years patient selection. In habit it is dwarf, compact and a profuse bloomer. The colors, which are very attractive, are a bright lemon stripe on a chocolate maroon background. Pkt. 20 cts.

Purple and Gold, Dwarf French. This charming marigold grows about 12 in. high, and produces from July

until frost a great profusion of single flowers about 2 in. across, of a lovely golden yellow, with a purple, velvety spot on each of the six or eight petals. Pkt. 10 cts.

MIGNONETTE. Breck's Giant Machet. This strain is just what we have been asked to supply for a number of years—a large-flowered, bright-red colored, sweetly-scented, compact-growing, and free-flowering Mignonette. It is the selection of a florist who makes a specialty of Mignonette for market, and is superior to all other varieties for both pot culture and out-doors. Oz. 70 cts.; pkt. 10 cts.

NEMESIA STRUMOSA SUTTONI. This charming plant is one of the most beautiful annuals that has been introduced for years. The color of the flowers is exceedingly variable, being white, pale yellow, deep yellow, orange, magenta, carmine to deep purple, the throat being dotted with black on a yellow ground, and the outside is often veined and marked with purple. Pkt. 15 cts.

NASTURTIUMS. We call especial attention to our strains of Tall and Dwarf

NASTURTIUMS. We call especial attention to our strains of the control of the control of this popular flower them grown for us by the most successful cultivator of this popular flower in the world. We assort the varieties ourselves, and can thus assure customers of their obtaining, not only the most vigorous strain in existence, but the greatest number of shades and delicate colors. The mixture includes,—white, pink, rose, scarlet, crimson, brick, claret, garnet, orange, primrose, yellow.

I had some of your Nasturtiums last summer and they were very fine. Many people saw and admired them.

Your Wild Garden Seeds are a great novelty. I found many new and choice things among them.

H. A. B., Springfield, Mass.

NASTURTIUM LILIPUT. Under this title is introduced an entirely new class of Dwarf Nasturtiums, and one which deserves the greatest attention. The plant is in every respect smaller than the Tom Thumb, and the pretty little flowers, produced in the greatest profusion and standing up well above the small-cut, bushy foliage, make it one of the prettiest annuals imaginable. The blossoms are of the most varied and showy colors, and it is noteworthy that some quite new shades appear among them; this feature, and the further one that the seed is much smaller than that of

Nemesia Suttoni

the Tom Thumb variety, are the best evidence that we have here to do with an entirely new break in the Tropæolum family. Mixed colors, pkt. 15 cts. For complete list of Nasturtiums see pages 86 and 91

The Tall Nasturtiums I bought of you last spring were the best I ever had. They were awarded First Prize (\$3.00) at the Worcester County Horticultural Society's Show on Sept. 5th.
M. E. A., Worcester, Mass.

OXALIS. TROPÆOLOIDES. A new variegated leaved variety of the wellknown O. Tropæoloides. The dark brown leaves are mottled and blotched with sal-

Nasturtium Liliput, mony rose. It comes about 70 per cent-true from seed, and will be found very useful for carpet bedding. Pkt., 25 cts. Brilliant. Similar to the preceding except that the variegation is rosy-crimson. Pkt., 25 cts.

Hardy Hybrid Blue Primrose

PRIMULA SINENSIS FIMBRIATA. "Snow-ball." This is described as the finest white Primula in cultivation. The foliage is remarkably vigorous. The flower stem is very stout and bears a profusion of massive flowers of a pure white color and of great substance. Many of the individual blooms measure 3½ in. in diameter and are exquisitely fringed. Pkt., 50 cts.

When you send out catalogues kindly favor me with them. I ordered some flower seeds of you last spring and was delighted with them. Next spring will order all our vegetable and flower seeds of you.

S. E. S., Winchester, Mass.

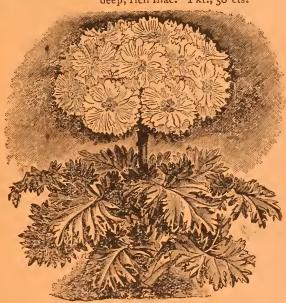

Sinensis Fimbriata. Magnum Bonum. This beautiful variety will form an excellent companion to the "Snowball" introduced last year. The plants are very sturdy, and compact in habit; the flower stem is strong and rises well above the foliage. The blooms, produced in great profusion, are very large and beautifully fringed. The coloris a rich, deep red. Pkt., 50cts.

Poppy

PRIMROSE. Blue Hardy Hybrid. The most prominent feature of this Primrose, and that which clearly distinguishes it from all others in cultivation, is its remarkable color, which is developed into many shades of blue, from pale lavender to deep violet. The flowers are freely produced on single stalks, not in bunches, rising well above the foliage, and are superior in size, shape and duration to the best of the older sorts. They have received six awards of merit from the Royal Horticultural Society of England, and a special award in April, 1835. We recommend this as a sterling novelty to all who love spring flowers. Pkt.,

PRIMULA OBCONICA. New, largeflowered. The flowers of this fine variety are much larger and of greater substance than the type, measuring from I to 1¼ in. in diameter; they are also much deeper in color, being a deep, rich lilac. Pkt., 50 cts.

50 cts.

Primula, Snowball

POPPY, Yellow Rose. A beautiful new variety of the dwarf double carnation—flowered poppy. The color is pale yellow and rose; a very pleasing combination. Pkt., 10 cts.

low and rose; a very pleasing combination. Pkt., to cts.

POLYGONUM. Persicaria, Alba. An elegant new white flowering variety of the dwarf-growing Oriental Polygonum; it forms a regular and many branched bush 2 ft. high, well covered with luxuriant foliage, above which are borne on slender stems the exceedingly pretty and numerous hanging flower-spikes. Pkt., 20 cts.

PETUNIA. Purple King. A valuable acquisition to the large flowered class of petunias. When opening its flowers the color is of a velvety purplish-violet, which changes in a few days to blood red, and later into fiery red. A distinct lilac, dark-veined throat adds to its beauty. Pkt., 25 cts.

I want the true Blushing Bride Sweet Peas such as I have had from you other years, and which is the finest variety I ever saw.

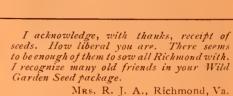

> P. L., Jamaica Plain, Mass.

PANSIES. Breck's Boston Prize. This strain stands easily at the head of the list for size, form, substance, color, and every feature that goes to make the perfect pansy. Since the original stock came into our possession a few years ago we have been continually improving it, and now we feel sure that Boston Prize Pansy is superior to all in quantity and quality, of color, etc.; sold in sealed packages only. Pkt., 25 cts. For complete list of Pansies see page 87

Pansies

RUELLIA TUBEROSA. A free-flowering plant of dwarf, branching habit. The large, Bignonia-like, clear blue flowers, are borne freely above the pretty foliage. It must be sown in heat, transplanted to small pots as soon as it can be handled, re-potted singly, as growth requires, and at the end of May set out in a warm, sunny spot, where it will flower from July until frost. Pkt., 25 cts.

Ruellia Tubsrosa

RICINUS ZANZIBARIENSIS. Mixed. These new and distinct varieties of the Castor Oil Plant are natives of East Africa. The plants attain great dimensions, their gigantic leaves surpass in size and beauty all the species and varieties known hitherto. We do not doubt but that, as soon as these new Ricinus are introduced, the older varieties will soon disappear altogether. The variety named above produces light-green leaves 2 to $2\frac{1}{2}$ feet across. The mixture embraces the following sorts, which are of similar growth to above, but different in color, viz:

R. Z. Maculatus. Leaves coppery bronze, changing to dark green with reddish ribs.

R. Z. Cinerascens. Leaves brownish purple, changing into dark green, with lighter ribs.

R. Z. Niger. Leaves bronze, passing into dark green with reddish ribs. Pkt., mixed, 10 cts.

SCABIOSA. Pompadour. A new variety that grows to a height of three feet and produces very large flowers of a globular form. The large, rounded petals are of a dark purple at the base, merging into a pure white from the centre to the edge. Pkt., 25 cts.

Ricinus Zanzibariensis

STOBAEA MEMBRANIFOLIA. Exceedingly handsome plant from South Africa. The leaves are 2 feet long by 6 inches in breadth; on the surface dark green, underneath silvery white. Flower scape branched, flowers large, sulphur-yellow. Pkt., 20 cts.

STREPTOCARPUS. Veitch's Improved Hybrids. These are dwarf in habit, profuse bloomers, and have an abundance of leaves. This strain is composed of the best and brightest colors, most elegant markings and largest forms only. Pkt., 25 cts.

SAINTPAULIA IONANTHA. The leaves of this interesting novelty, which are dark-green, of fleshy consistence and downy surface, spread themselves laterally just over the soil, and form, as it were, a rosette, in the centre of which spring up quite a bouquet of flowers, violet-like both in color and shape, but 114 inches in diameter, and gracefully borne on stalks 2 to 3 inches high. These begin to appear whilst the plant is quite young and continue their display through the entire season. The seed is extremely fine and it requires similar treatment to Streptocalpus. Pkt., 25 cts.

SWEET PEAS. - LATHYRUS ODORATUS.

SWEET PEAS' BLOSSOMS

On wings of blue
And purple flame;
On wings of white
And violet light;
On wings of scarlet hue;
On ambered-colored wings;
On wings of pink,
And wings that blink
With triple shaded glow
On wings of yellow,
And orange fire—
They float and flutter
Quiver and shine,
Up the slender threads
Of a tremulous vine. On wings of blue Of a tremulous vine.

M. V. Jones

The varieties here described, together with those on page 89-91 embrace everything in sweet peas, produced to date, that is distinct, beautful and desirable. We were the first seedsmen in America to popularize these gems of beauty and fragrance and we still maintain our position with the largest stock of the best strains of the kinds that give satisfaction to planters. The prices we quote speak for themselves.

See also pages 89-91

BRECK'S HARVARD. This beautiful, deep crimson variety, introduced by us two years ago, has become a great favorite throughout the country. Here are seven opinions selected from more than 700, all equally good.

MRS. C. P. WHITTEMORE, Skowhegan, Me.—" Your Harvard Sweet Peas greatly excel all others in color, fragrance and quantity of blooms,"

MR. CHAS. A. HITCHINGS, Grafton, Mass.—" The Harvard Sweet Pea surpassed any that I ever raised in brilliancy of color and freeness to bloom. The stems were very long; some of them measured 14 inches."

MR. BENJ. R. DURDING, Rock Hall, Md. - " The Harvard Sweet Peas were satisfactory in every respect. They left nothing to wish for, but were the admiration of this neighborhood."

MRS. L. E. SINCLAIR, Normal, Ill.—" The Harvard Sweet Peas were simply immense, both in growth and beauty of flowers."

MRS. GEORGE C. McMurty, Des Moines, Ia.—" I was very much pleased with the color, quality of flowers and thriftiness of the Harvard Sweet Peas. They were greatly admired here."

MR. B. F. HEDDON, Le Roy, N. V.—" We had 166 feet sown to Sweet Peas in double rows, mostly Eckford's

varieties. Your Harvard crimson attained a good growth and bore four or five flowers on a stem. (The other kinds scarcely averaged three). Their color was very rich and beautiful, attracting wide-spread attention. We shall grow more n'xt year.'

Mrs. Julia A. Hickok, Marietta, O.—" The Harvard Sweet Peas were the first to blossom. They surpassed any I had by their rich and beautiful color. I shall grow them again next spring."

Harvard Sweet Peas. Per lb., \$1.00; ounce. 10 cts.; pkt., 5 cts.

BLUSHING BRIDE. The beautiful rose and white flowered variety, grown so largely by Boston florists. Per lb., \$1.00; oz., 10 cts.; pkt., 5 cts.

Alice Eckford. Rich, cream tinted cerise standards, white wings. A refined, beautiful flower. In sealed pkts.,25 cts. Blanche Burpee. A pure white, of exquisite form and immense size. Pkt., 5 cts.

HARVARD

Blanche Ferry. Improved extra early strain. Two weeks earlier in flowering than the original Blanche Ferry. Oz., 40 cts.; pkt., 10 cts.

Cupid. This dwarf variety of the Sweet Pea is quite an acquisition both to the flower garden and the greenhouse. Its pure white flowers are of the full size of the ordinary Sweet Pea, freely produced and fragrant. The entire height of the plants is about 6 inches, and yet there is nothing stunted looking about then. The flower stems are about 4 inches long and bear three blossoms each. The plant is a wonderfully free

bloomer, and begins to flower as early as May and continues until November. Full size originator's pkt., 25 cts. See Special Offers on third page of cover.

SWEET PEAS. NEW INTRODUCTIONS. Continued

Crown Jewel. Pale standard, tinted and veined with violet-rose, the wings creamy, slightly tinted with rose. A most profuse bloomer. Pkt., 25 cts.

Captivation. Rosy-purple self, finely expanded, shellshaped standard, a charming and distinct variety. Pkt., 25 cts.

Countess of Aberdeen White margined with pale pink, finely formed standards. Pkt., 25 cts.

Duke of Y rk. The standard is bright, rosy pink, with a primrose tint. The wings are primrose, tinted white. Pkt., 20 cts.

Eliza Eckford. Standards a pretty hue of rose, the back of the standards having each a flake of deep rose and tinted with the same. The wings delicately striped with rose. Pkt., 20 cts.

Katherine Tracy. A well-formed, graceful flower, of much substance. The color is soft, but brilliant pink of precisely the same shade in wings and standard. Oz., 40 cts., pkt., 10 cts.

Little Dorrit. Carmine, tinted pink, standard of finest form, large white wings. Pkt., 25 cts.

Meteor. Standard very bright orange salmon, wings delicate pink with slight veins of purple. Pkt., 25 cts.

Mikado. Deep orange cerise ground, striped white.

Mrs. Joseph Chamberlain. White striped and flaked with bright rose. Pkt. 25 cts.

Princess May. The standard and wings throughout are pale heliotrope. Pkt., 25 cts.

For other Varieties of Sweet Peas see pages 89-91

WILD FLOWER GARDEN. Your Wild Flower Seed was a well-spring of great pleasure to me, as well as others. I gave away bouquets, adorned churches with flowers, and sent to invalids. They lasted for a long time in water. I took care of them well and they paid me. Even the city people said, " What

THISTLE. Onopordon Acanthium. A new, white flowered variety. The leaves and stalks are of a greyish green color, covered with a cobwebby texture. The plant attains a height of 7 feet and forms attractive specimens or groups. Sow the seed singly in small pots and transplant without disturbing the roots as soon as large

Mrs. A. G. II., Osterville, Mass.

pretty flowers."

See page 95

SUNFLOWER. Stella. This new annual Sunflower attains a height of 3 to 4 feet and differs from the miniature sunflower by its larger and better-formed flowers of the purest golden-yellow, with a black disc. The individual flowers, 3 inches across, are all borne on long stems and rise well above the small green foliage. Sown on a sunny spot in the open ground in May, flowers may be cut daily from July until the plants are killed by frost. Pkt., 20 cts.

New Double-Flowered Annual. This plant in many respects

resembles the well-known double-flowered perennial sun-flower. It is of compact, pyramidal growth, attains a height

Thistle. Onopordon Acanthium.

enough. Pkt., 20 cts.
Zinnia Elegans Liliput. Double white. Charming new variety, with small, pure white, very double flowers. Pkt., 20 cts.

TUPA MONTANA. This plant is similar in growth to Lobelia Cardinalis but much larger. It is a tender perennial. The second year from being sown it produces five or six flower spikes that attain a height of 4 to 5 feet, the upper part of which is covered with about a hundred deep-scarlet blossoms. The culture is the same as that of the Lobelia Cardinalis. Pkt., 25 cts.

WE DOUBLE IT!

ESTABLISHED 1822.

WE DOUBLE IT.

FIRST PRIZE.

duplicate all first premiums offered in 1896 by any Horticultural or Agricultural

A PROPOSITION WELL WORTH YOUR CARE-FUL CONSIDERATION. he United States, that may be secured with the produce of seeds or bulbs purchased of us. We will pay the amount on presentation of the certificate of the society's award, accompanied by a statement that the seeds from which the prize winners were grown, were BRECK'S SEEDS.

A PROPOSITION WELL WORTH YOUR CARE-FUL CONSIDERATION.

We made this offer last year in the interest of growers, with the hearty endorsement of Horticultural and Agricultural Societies throughout the country. To show how it worked we select as an example H. P. West, of Fayetteville, Wis., to whom we have paid \$90.50 being an amount equal to that awarded him for premiums on the produce of our seeds at the Wisconsin State Fair, Walworth Co., Wis., Agrl. Soc. Exhibit; Minn. State Fair and La Cross, Wis., Inter-State Fair.

Full particulars of this offer in our 1896 illustrated cutalogue, 170 pages; muited free. Reptete with culturat directions, news about novelvies, standard varieties of vegetable and flower seeds, and the most approved agricultural and horticultural implements.

"Everything for Farm, Garden and Lawn."

JOSEPH BRECK & SONS, Boston, Mass.

The above advertisement will appear this Spring in a large number of American newspapers and periodicals.

Our purpose in making this unique offer is threefold -

- 1st. We aim to awaken a greater interest in Horticultural and Agricultural Societies, and to increase the competition at their Exhibitions for the premiums offered.
- 2nd. We hope that the enhanced value of the FIRST PRIZES—our offer, you observe, doubles each one—will result in the production of better specimens exhibited, through the planting of high-grade seeds and more intense cultivation; and that by demonstrating possibilities, stimulate a purpose on the part of both gardeners and farmers to raise better, and, therefore, more profitable, crops.
- 3rd. We believe that the Flower, Vegetable and Field Seeds and Flowering Bulbs offered by us are the best strains in the world, and we wish to encourage those who are not acquainted with our goods to ascertain it by experience.

If you are successful in obtaining any FIRST PRIZES with the product of BRECK'S SEEDS (Cereal grains excepted) or BULBS, send us the society's certificates of such prizes (which certificates will be returned to you), together with any particulars of cultivation, or other matter of interest, and we will send you a sum equal to that awarded by the society. The same specimens must not be entered in more than one class or show, and if awarded specific prizes they cannot also be included in collections. We do not duplicate prizes offered for arrangement of exhibit.

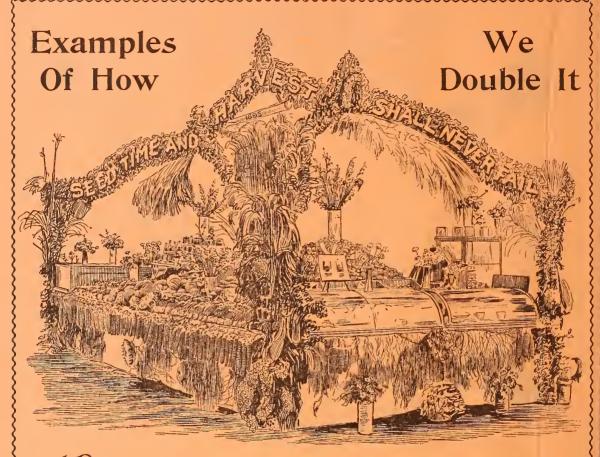

Persons who intend competing for prizes must secure the necessary seeds or bulbs direct of us.

Entrance at the "Big Clock," 51 & 52 North Market St.,

Also Entrances at 46 Merchants Row and 21½ North St.,

BOSTON, MASS.

Juft M Brocker for for (CORPORATION.)

E think our customers will be interested to learn about the highest amount paid any one party under our offer of 1895 to duplicate first prizes obtained with the product of Breck's Seeds and Bulbs. While under our offer we have paid all the way from 50 cents to \$75, the premiums awarded Mr. H. P. WEST, of Fayetteville, Wis., amounting to \$90.50 (see preceding page), made the largest demand on us, and this sum, in addition to the same amount awarded by the societies at which he exhibited, and the satisfaction of having produced the best articles of the different kinds where competition was so keen as at the great State Fairs of Wisconsin and Minnesota, were a source of gratification and just pride to Mr. West.

The illustration on this page, reproduced from a photograph, shows the exhibit made by the Tatnuck Farmer's Club, at the joint Fair of the Bay State and New England Agricultural Societies, held at Worcester, Mass. It was awarded the first prize, \$75, as the best collection of vegetables and flowers. The entire display was the product of Breck's Seeds and Bulbs, and we therefore paid the Club the sum of \$75. The members of the Club say that for profit as well as competition, Breck's Seeds are unsurpassed.

Another notable example of the superiority of Breck's Seeds, is the awards made to Mr. H. R. Kinney, Market Gardener, Worcester, Mass., by the Massachusetts Horticultural Society, the Worcester County Horticultural Society, and the Bay State Agricultural Society. Mr. Kinney made seventeen entries in closely competed classes and secured seventeen first prizes with the product of Breck's Seeds. We paid him \$41.50.

Messrs. Warren Heustis & Son, the well known Market Gardeners of Belmont, Mass., were successful in eleven entries at the Massachusetts Horticultural Society Shows, and two at the Rhode Island State Fair Association's Exhibition, obtaining first prizes amounting to \$42, which we duplicated. As competition in the Market Gardeners' Classes at these shows is always very great; there is much reason for pride and satisfaction in the achievement.

The foregoing examples give an idea of what has been accomplished with Breck's Seeds and are an earnest of what may be attained with them.

The products of Breck's Seeds were awarded many first prizes at exhibitions in nearly every state in the Union. Purchasers in every instance express great satisfaction with both our seeds and methods, and we believe their recommendations will result in business, equal to what many of them term our "generosity."

"AN ISLAND GARDEN."

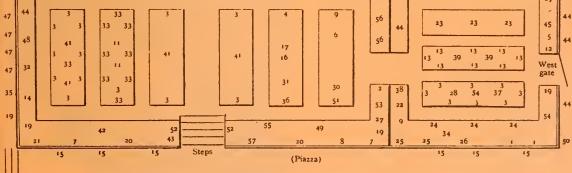

GREAT many people who love flowers and have a little space to devote to their cultivation are frequently at a loss how to begin, what to plant, how to arrange, etc. For the benefit of such we reproduce, by kind permission, from Mrs. Celia Thaxter's beautiful and interesting book, "AN ISLAND GARDEN" (published by Messrs. Houghton, Mifflin & Co., Boston; price \$4.00), a diagram, with particulars of arrangement, of a garden loved and cultivated by Mrs. Thaxter. The bare outlines with figures and names gives but a poor idea of the wealth of beauty and fragrance obtainable in such a small space. Yet Mrs. Thaxter's garden was a joy and wonder to herself and friends, and we feel sure that anyone who follows her arrangement and selection. either in whole or part, will be fully repaid and more than pleased with the result.

We will furnish enough material to start a similar garden, viz.: 6 Lilies, named, assorted; 4 Water Lilies, named, different colors; 34 Plants and Vines, and 36 packets Flower Seeds, for \$12.00.

We will send "An Island Garden" post-paid at publishers price.

NOTE - The garden is 50 ft. long by 15 ft. wide, and is surrounded by 2 Forder of all sorts of mixed flowers. A bank of flowers at the southwest corner slopes from the garden fence.

BULBS AND PLANTS.

ACHIMENES. Free flowering plants of easy cultivation. The bulbs should be potted early in a mixture of loam and leaf mould. Keep warm and water carefully. Assorted colors; 5 cts. each; 50 cts. doz.

Amaryllis Equestre

Johnsonii. Large crimson and white flowers. 50 cts. each; \$5,00 per doz.

Lutea. (Sternbergia.) Showy yellow, autumn flowering variety, 15 cts. each; \$1.50 per doz.

Vallotta Purpurea. Crimson-scarlet flowers borne in clusters of five or six on a long stem. A fine sort for pot culture. 50 cts. each; \$4.00 per doz.

Vittata Red and white grounds, beautifully peaked with many tints. 60 cts. each.

APIOS TUBEROSA. A pretty, hardy native climber. The flowers resemble the well-known Wistaria, and are very fragrant. 20 cts. each; \$2.00 per doz.

ANEMONES. Wind-Flower. The following sorts are perfectly hardy, and well worthy a place in every garden.

A. Japonica. 2 ft., September. Of free, vigorous habit of growth, and in autumn producing a continuous abundance of bright red flowers. 20 cts. each; \$2.25 per doz.

A. Japonica Alba. 2 ft., September. An excellent companion to the preceding sort. The flowers are pure white with yellow centre, fine for cutting. 20 cts. each; \$2.25 per doz.

A. Japonica. Whirlwind. This plant is of more vigorous growth than either of the above, and has handsomer, broader and thicker foliage. The distinct, pure white, semi-double flowers appear in August and continue until frost. Each flower is on a stiff, clean stem, admirable for cutting purposes. 25 cts. each; \$2.50 per doz.

AGAPANTHUS. African Lily. These are fine for tubs, pots, vases, etc. The flowers are borne in magnificent trusses that show to advantage against the glossy-green foliage.

Umbellatus, Lily of the Nile. Blue, 50 cts. each.

Umbellatus, Albus. White, 50 cts. each.

AMARYLLIS. Lovely lily-like plants that produce flowers in almost every shade of color, ranging from pure white to deep crimson.

Atamasco Pink and white. Showy for borders. 15 cts. each; \$1.50 per doz.

Belladonna Major. Rosy pink, fragant. 25 cts. each.

Crispa. Deep pink. 25 cts. each.

Defiance. Carmine with white stripes. 60 cts. each.

Equestre The flowers measure five or more inches across, and are bright, sparkling orange-red, with a green and white star at the centre. 20 cts. each; \$2.25 per doz.

Formosissima. (Jacobean Lily.)
Blooms freely out doors, the flowers are of a deep velvety crimson color. 25 cts. each; \$1.75 per doz.

GONIA. Tuberous Rooted. These are desirable plants for bedding as well as pot culture. The flowers are not destroyed by rain storms but seem to shine more brilliantly after every shower. The colors are varied and beautiful. Our bulbs are from the same source as our seed and are unsurpassed. Single flowered sorts, red, crimson, scarlet, rose, pink, white, yellow, gold and bronze, striped and flaked. 10 cts. each; \$1.00 per doz.; \$7.00 per 100.

Mixed colors, 6 cts. each; 50 cts. per Single Flowered. doz.; \$3.50 per 100.

Double Flowered Sorts. Same colors as the single kinds, 15 cts. each; \$1.50 per doz.

Double Flowered Mixed. 12 cts. each; \$1.25 per doz.

SSERA ELEGANS. (Coral Drops). This beautiful bulbous plant resembles *Millo Biffora* in growth. The pendulous clusters of bell shaped flowers are borne on long BESSERA ELEGANS. slender stems. The color is a striking shade of coral scarlet with pure white cups and dark blue anthers. 8 ets. each; 75 ets. per doz.

The Tuberous Rooted Begonias I had from you last spring were a beautiful surprise to myself and neighbors. The flowers were very large and of many charming shades of color; they continued longer in bloom than anything else I grew, and strange to say, were never injured by either wind or rain.

W. G. H., Providence, R. I.

Tuberous Rooted Begonias

Calla Lilies

CALADIUM ESCULENTUM. Beautiful, ornamental foliage plants. The leaves are of immense size, light green, with darker veins. Will grow in any good garden soil to a height of five feet. Dry Bulbs, according to size, 10, 15 and 20 cts. each; \$1.00 to \$2.00 per doz. Bulbs started in pots, 20 and 25 cts. each; \$2.00 to \$3.00 per doz.

CALLA LILIES, White. 25 cts. each; \$2.50 per doz.
Little Gem. 25 cts. each; \$2 50 per doz.
CINNAMON VINE. A hardy climber with shining green foliage and fragrant white flowers, .06 cts. each; 50 cts. per

CRINUM. Amaryllis-like bulbous plants, suitable for pot or open ground culture.

Capense. Bright rose. 25 cts. each.
Kirkii. Large white, purple-striped flowers borne on dark
purple-colored stems 2 feet high; 40 cts. each.

Ornatum. Delicate blush with a pink stripe through the centre. Very fra-grant. 35 cts.each.

I want 300 seeds Cyclamen, same as you sent last year. They were the best I ever saw. P. McG., Belmont, Mass.

CYCLAMEN. Suitable for pot culture only. Plant the bulbs in a light, rich soil, and water sparingly till started.

Persicum Giganteum. Mixed colors, 25 cts. each; \$2.50 doz. Started Plants in pots, 50 cts. to \$1.00 each.

CYCLOBOTHRA FLAVIA. This golden gem is of great beauty and easily grown; the habit of plant and bloom is similar to Bessera; the color is clear golden-yellow, with intense black spot on each petal. Scts. each; Socts. per coz.

CACTUS. These plants require absolutely no care. They grow for months in the house or garden without watering, and increase in value yearly. Their flowers are of exquisite beauty and fragrance, and their curious forms render them exceedingly interesting. In winter they require scarcely any water. We send by mail to fine plants of blooming size, each one distinct and named, for \$1.00, or 5 for 50 cts.

CANNAS. Large Flowering Dwarf French. We know of nothing so effective in foliage or continuous in flower as these new Dwarf French Cannas. They are becoming very popular, and they certianly are entitled to a place in every garden. The following list embraces the "cream." To aid our customers in making selections, we have indicated what we consider the best six by prefixing three stars ***; to the best twelve, two stars **

***Admiral Courbet. Light green foliage. Flowers, yellow, speckled with orange scarlet; height, 4 ft.

***Alphonse Bouvier. Strong green foliage. Flowers, crimson scarlet; height, 5 ft.

***Ami Pichon. Light green foliage. Flowers, crimson scarlet; height, 3 ft. 50 cts each. Admiral Avellan. Dark purple foliage. Flowers, deep

carmine, beautifully spotted; one of the best dark

foliage sorts: height, 4 ft. 50 cts each.
Belle of Newport. Light green foliage. Flowers, golden yellow; height, 3 ft. 50 cts. each.

Childsii. Light green foliage. Flowers, bright glossy yellow, thickly spotted with crimson; height, 3 ft. ***Chicago. Deep green foliage. Flowers, vermilion

scarlet, shaded orange; height, 4 ft. 50 cts. each.

**Comtesse M. de Lusignan. Bright green foliage. Flowers cherry red; height, 4 ft.

Duc de Montmart. Green foliage. Flowers, orange yellow, spotted with cinnamon red; height, 3 ft.

Eldorada. Green foliage. Flowers, very large and of a bright yellow color, speckled red; height 31/2 ft. 35 cts. each.

***Florance Vaughan. Deep green foliage. Flowers, golden yellow spotted with bright red. Height 3½ ft. Flora. Light green foliage. Flowers, bright yellow with

**F. Morel. Dark green foliage. Flowers, bright yellow with light orange spots; height, 3 ft. 35 cts. each.

**F. Morel. Dark green foliage. Flowers, bright scarlet; height, 3½ ft.

F. Corbin. Dark green foliage. Bright cherry red

flowers; height, 4 ft.

***Geoffry St. Hillaire. Foliage, chocolate color. Deep glowing orange flowers; height, 5 ft.

Gustav Sennholz. Deep green foliage. The flowers upon first opening are of a light salmon shade, which changes as they expand to a clear, silvery rose, mottled

with salmon; height, 31/2 ft.

John Laing. Dark chocolate foliage. Flowers, red bordered with canary yellow; height, 21/2 ft. 75 ets.

**J. Cordioux. Light green foliage. Bright carmine flowers; height, 4 ft.

**La Guille. Deep green foliage. Flowers, rich salmon color; height, 5 ft.

Madame de Montefiore. Foliage, deep green. Flowers, very large, golden yellow, spotted with crimson; height, 4/2 ft. 25 cts. each.

M. Cleveland. Foliage, deep green. Flowers, orange scarlet, overlaid with crimson; height, 5 ft.

Madame Just. Dark veined foliage. The lower petals of the flower are flame color, the upper, golden amber; height, 4 ft.

Madame Oriol. Bright green, massive foliage. Flowers, orange red; height, 31/2 ft.

***Madame Crozy. Deep green foliage. Flowers crimson scarlet, bordered with yellow. 20 cts. each;

\$1.50 per doz; height, 3½ ft.

**Queen Charlotte. Bluish green, musa-like foliage.
Flowers, blood red, broadly banded with bright canary yellow; height, 4 ft. 25 cts. each, \$2.50 per doz.

The foregoing Cannas 15 cts. each; \$1.00 per doz., except as noted. Cannas are not subject to either of our Special Offers.

RNATIONS. For blooming in the garden we can furnish three colors that will flower if set out after the CARNATIONS. middle of May, from July until frost.

Scarlet, Crimson, White. Extra strong plants from pots.

25 cts. each, \$2.50 per doz.

Mound Pinks. These old favorites, if given enough room, form a pretty mound of bluish-green foliage and produce freely beautiful, blush-pink fragrant flowers. 20 cts. each, \$2.00 per doz.

Nicholson. Soft rose, very fragrant. 20 cts. each, \$2.00

per doz.

Ada Byron. Rosy-pink, very fine. 20 cts. each, \$2.00

per doz.

This is the new class that blooms from seed in about four months. About 90 per cent of the flowers are double. All very sweet scented and they embrace a great variety of delicate shades. They are exceedingly useful for cutting. Strong plants, 15 cts. each; \$1.50 per doz.

CONVOLVULUS. Moonflower or Evening Glory. The flowers of this lovely climber are very large, very freely produced, pure white in color and very fragrant They open in the evening and are wonderfully attractive. should not be set out until danger of frost is past. 15 cts. each; \$1.50 per doz.

CLEMATIS PANICULATA. We cannot better describe this marvellously beautiful and fragrant climber than by the following, which appeared in a Boston daily paper, Sept. 19, 1892. "This is the time of the full splendor

Summer Flowering Carnations

of that wonderful climber, as yet quite new here, Clematis Paniculata. It covers some porches that the Listener' knows well, with a white sheet of beautiful bloom, and fills the air all about with the most delicious perfume. It was introduced only a few years ago, and its growth is so marvellously rapid, and its adaption to our climate so complete, that it already threatens to reach the housetops. In a general way it resembles our common wild Clematis or Virgin's Bower, but its blossoms are more profuse and pure white, and exquisitely and penetratingly fragrant. It needs a trellis to grow upon. Of course it is an added recommendation to it that its flowers come in late September, when shrubs and climbers in bloom are rare. It is only one of about a million beautiful things, more or less, in nature and art, that we owe the mother-land of gentleness and beauty, Japan." Plants, 25 cts. to \$1.00 each; \$3.00 to \$10.00 doz.

Chrysanthemum

CHRYSANTHEMUM. We offer these from one of the largest and best collections in the country. If what you want is not included in the sorts here named send us your list, we can furnish every desirable variety.

Ada Spaulding, light pink; Cullingfordi, dark red; Col. W. B. Smith, yellow; Domination, white; Eda Prass, pink; E. G. Hill, yellow; H. Waterer, yellow; Harry May, yellow; Ivory, white; J. H. White, white; Judge Hoitt, pink; Kioto, yellow; Lincoln, yellow; Louis Boehmer, pink, plumed; Madame Hardy, white; Mrs. Jerome Jones, white; Mermaid, pink; Mutual Friend, white; Norma, pink; Puritan, pink; Rosyln, pink; Sunnyside, pink; William Falconer, red, plumed; Yellow Ball, yellow. Ready for delivery after the middle of April. 15 cts. each; \$1.50 per doz.

HARDY CHRYSANTHEMUM. Golden Fleece. A small yellow-flowered variety for garden culture. 15 cts. each; \$1.50 per doz.

DAHLIAS. Large Double Show. Named sorts in a large variety of colors. 15 cts. each; \$1.50 per doz. Pompon or Small-Flowered Double. These are really

more desirable and popular than the foregoing. sorts, in a great variety of colors. 15 cts. each; \$1.50 per doz.

Single Flowered. From a grand collection. 15 cts. each; \$1.50 per doz.

Cactus. Large double and single flowered. 20 cts. each; \$2.00 per doz

HARDY DAHLIA. Golden Ball. Although not really a Dahlia this plant bears so much resemblance to the family that the name is appropriate; the plants attain a height of 4 feet, are furnished with pretty dark-green foliage, which in fall just shows through the covering of beautiful, double golden-yellow flowers that last till frost. Seeds, per pkt., 5 cts. Extra strong plants. each 15 cts.; per doz., \$1.50.

DODECATHEON MEADIA. A hardy plant, of rare beauty, producing large, cyclamen-like, fragrant flowers.

Bulbs, 10 cts. each; \$1.00 per doz.

GLADIOLI. This valuable and easy cultivated class of bulbs is not half appreciated. They can be grown in beds or borders, and a continuous bloom can be kept up from June till frost by a succession of planting.

Fine mixed varieties, doz., 25 cts.; 100, \$1.75. Named sorts, mixed, doz., 30 cts.; 100, \$2.00. Scarlet shades in mixture, doz., 20 cts.; 100, \$1.50 Crimson shades in mixture, doz., 20 cts.; 100, \$1.50.

Pink shades in mixture, doz., 35 cts.; 100, \$2.75. White shades in mixture, doz., 40 cts.; 100, \$3.00. Yellow shades in mixture, doz., 40 cts.; 100, \$3.00.

Striped and variegated, doz., 30 cts.; 100, \$2.00. French Hybrids, doz., 50 cts; 100, \$3.50.

Lemoine's Hybrids, collections of 10 named varieties, \$2.00.

Snow White. Nearly the entire spike of this variety is a perfect paper white with a slight cream shade on lower end of petals. Each, 15 cts.; per doz., \$1.50.

Gloxinia

GLOXINIA
BULBS. Our
stock of this exquisite plant is
very choice.
The bulbs
should be potted in the
spring in light,
sandy loam,
and they will
commence
growing and

Gladioli

blooming at once. In the fall, dry them and store in a warm place through winter. Strong, flowering bulbs, mixed colors, per bulb, 15 cts.; \$1.75 per dozen.

HEUCHERA SANGUINEA. One of the handsomest hardy perennials of recent introduction. The flowers are of a rich crimson color, the leaves light-green. The graceful flowers on long spikes form splendid material for bouquets. Roots, 15 cts. each; \$1.50 per doz. Seed, per pkt., 10 cts.

HYACINTHUS CANDICANS. Perfectly hardy. Grows to a

HYACINTHUS CANDICANS. Perfectly hardy. Grows to a height of three feet and bears an abundance of pure-white, bell-shaped flowers. Each, 10 cts.; per doz., 75 cts.

IRIS KAEMPFERI. When these are in bloom nothing in the garden is grander. The name "Poor Man's Orchids" has been suggested for them on account of their ease of culture and great beauty. Think of a plant sending up to a height of 3 feet a dozen flower spikes, each spike bearing from two to four enormous blossoms 8 to 10 inches across, and of the most delicate and beautiful colors, markings, and combinations. The Kaempferi is this and much more, for with all its beauty it is perfectly hardy. Choice named varieties, \$2.50 per doz. Double and single mixed, \$1.75.

IRIS. GERMANICA. The German Iris bloom earlier than the Kaempferi, they embrace many charming combinations of colors, and are very fragrant. Choice named varieties, \$1.50 per doz. Fine mixture, \$1.00 per doz.

varieties, \$1.50 per doz. Fine mixture, \$1.00 per doz.

IPOMÆA NOCTIFLORA. Moonflower or Evening Glory.

These rapid climbers produce large, white, fragrant flowers that open in the evening, or earlier on cloudy days. They bloom from June until frost. 15 cts. each; \$1.50 per doz.

LILIES. Those who desire flowering plants that will, after planting, practically take care of themselves, find in this beautiful family almost everything desired. The Japanese sorts are in large demand, and may be styled the cream of the list. For list of varieties see next page.

Iris Germanica

THE GRAND NEW LILY.

Lillium Wallachianum Superbum.

"The variety Superbum of the Indian Lily is much superior to the type both in vigor of constitution and in the size and beauty of its flowers."—Garden and Forest, Aug. 27, 1890.

This is beyond question the most beautiful of all the Trumpet Lilies, the flowers being of purest white, the tube being about 10 inches long and shaded a most lovely primrose yellow at the base. As exhibited for the first time in this country by Mr. H. H. Hunnewell and Mr. W. C. Strong, the tollowing description is given by the Flower Committee of the Massachusetts Horticultural Society in its Report for 1891: "It is a magnificent Lily, with an immense funnel-shaped flower with solid texture, and beautiful in color, which is white shaded with chocolate on the outer side and delicately tinged with yellow on the inside. It was awarded a first-class certificate.'

Strong flowering bulbs, price, each, first size, 60 cents; second size, 40 cents. Price, per doz., first size, \$6.50; second size, \$4.50.

Lilium Auratum. Golden Banded Lily of Japan. Immense white flowers, each petal marked with a wide gold band and spotted with maroon. Each, 20 cts.; per doz., \$2.00. ilium Lancifolium Rubrum. White with rich

Lilium Lancifolium Rubrum.

crimson spots. Each, 15 cts.; per doz., \$1.50.

Lilium Lancifolium Roseum. White stained and spotted rose. Each, 15 cts.; per doz., \$1.50.

Lilium Lancifolium Album. Large pure white flowers. Each, 20 cts.; per doz., \$2.00.

MILLA BIFLORA. Beautiful white waxy flowers with pale lemon anthers. Deliciously fragrant. Plant outdoors in May and take up bulbs in fall like Gladioli. Each, 10 cts.; per doz., 75 cts.; per hundred, \$5.00.

MADEIRA VINE. A beautiful rapid-growing climber, bearing in profusion very fragrant white flowers. Each,

5 cts.; per doz., 50 cts.

MONTBRETIA. Crocosmiaeflora. Very large flowers of fine shape. Base of flowers is bright orange, sprinkled with purple spots, arranged like Tigridia. Each, 10 cts.; per doz., 75 cts.

Lillium Wallachianum Superbum

NYMPHÆA. No plants have acquired such universal appreciation within as short a period as Aquatica, The flowers are most fascinating, interesting and beautiful, and none can be grown with less trouble-and risk of failure. The hardy varieties may beplanted as soon as vegetation commences in the spring. If not convenient to grow them in a pond or lily tank (which is preferable), they may be grown in tubs, several varieties being well adapted to this mode of culture. A warm sheltered position, yet with full exposure, and sunshine should be selected. Fill the tubs two-thirds full of turfy soil enriched with decomposed hot-bed or farmyard manure; cow manure is very desirable; cover with two inches of sand and fill with water. The crowns of the plants should be placed just under the surface of the soil.

Nelumbium Speciosum. (Egyptian Lotus). This grand lotus is perfectly hardy. The flowers when just expanding are of a beautiful rosy pink color;

when open they are of a creamy white and pink, and are very fragrant. 75 cts. and \$1.50 each.

Nymphæa Alba Candidissima. This is a large flowered variety of the English water lily; flowers white a continuous bloomer, very desirable. \$1.00 each.

Nymphæa Odorata. The well known white fragrant pond lily. 20 cts. each; \$2.00 per dozen.

Nymphæa Marliacea Chromatella. The best yellow water lily in cultivation; the habit of the plant is like N.

Candidissima flowering freely the entire season.

Candidissima, flowering freely the entire season. 75 cts. each; \$7.50 per dozen.

Nymphæa Mexicana. This variety is far superior to N. Flava; its continuous and free-flowering qualities, and its rich yellow flowers, place it in the front rank. 50 cts. each.

Nymphæa Odorata Rosea. (Cape Cod Water Lily). One of the best pink hardy Nymphæa in cultivation; it possesses all the desirable qualities of the white flowered species, hardiness, freedom of bloom and delicious fragrance. 75 cts. each; \$7.50 per dozen.

Nymphæa Zanzibarensis Azurea. Deep, rich azure blue; very free and continuous bloomer; delicately scented. 75 cts. each.

Nymphæa Scutifolia. Clear, light blue; very free flowering, continuous until frost. \$1.00 each.

Nymphæa Zanzibarensis Rosea. This is like N. Zancibarensis in every respect except that the flowers are a beautiful, deep rose color. 75 cts. each.

Water Hyacinth. Very interesting and beautiful; floats on the surface of the water and produces fine spikes of

light rosy lilac flowers. 15 cts. each; \$1.50 per doz.

Water Poppy. (Limnocharis Humboldtii). Flowers, beautiful, clear yellow; must be grown in shallow water;

very attractive. 15 cts. each; \$1.50 per doz.

Water Snowflake. (Limnanthemum Indicum). In growth the plant esembles a water lily with leaves from three to five inches across; flowers, white. 25 cts. each.

Cyperus Papyrus. (Egyptian Paper Plant). 25 cts. and 50 cts. each.

WATER LILY SEED. Nymphæa Zanzibarensis. 15 cts. per pkt.

Nymphæa Zanzibarensis Rosea. 15 cts. per pkt. Nymphæa Zanzibarensis Azurea. 15 cts. per pkt. Nymphæa Gracilis. 15 cts. per pkt.

PÆONIES. We can furnish these well-known, old favorites in all the newest varieties.

Hardy Herbaceous Sorts, named. 50 cts. each.

Hardy Herbaceous, assorted colors; large flowering roots. 50 cts. each.

Hardy Herbaceous, large, double, white. 50 cts. each.
ROSES. The following are new sorts well worthy the attention of all growers of the "Queen of Flowers."

Crimson Rambler. A new Japanese climbing variety introduced last year. It has proved perfectly hardy, and on account of its rapid growth, quantity and quality of flowers and fragrance, it is destined to become the leader among climbing sorts. Plants, each, according to size, 25 and 50 cts.

HYBRID RUGOSA. Madame G. Bruant. Double white. A cross between Rugosa and Tea. Very fragrant, large white, semi-double flowers, shaped like Niphetos. 50 cts. each; \$5.00 per doz.

Madame Chas. Worth. Similar to preceding except color, which is reddish carmine. 50 cts. each; \$5.00 per doz. New Afghan Yellow. A new and beautiful yellow rose from India. The plant is of bushy growth and very productive. 50 cts. each.

Sweet Briar. Janet's Pride. Beautiful semi-double flowers of rich crimson-lake, and broad stripes of light

crimson. 50 cts. each.

SMILAX. A beautiful climber for greenhouse or window culture. Plants from 2½ inch pots. 15 cts. each; \$1.00 per doz.

TIGRIDIA. (Shell Flower). Beautiful, large, shell-like flowers, produced from July until frost. They require similar treatment to the dahlia.

Conchiflora. Orange and crimson spots. 5 cts. each; 50 cts. per doz. Grandiflora. Crimson. 5 cts. each; 50 cts. per doz. Grandiflora Alba. White flowers spotted with maroon and rose. 5

cts. each; 50 cts. per doz.

Pavonia. Red with crimson spots. 5 cts. each; 50 cts. per doz.

TUBEROSES. These are universal favorites and very easily grown. Before potting, remove the small offsets. Use rich loam and start in a hot bed or in the house. Do not set out until all danger from frost is past.

Excelsior Double Pearl cts. each; 25 cts. per doz.; \$1.75 per 100.

Tall, Double. 5 cts. each; 25 cts. per doz.; \$1.75 per 100.

Albino. This variety is har-

dier and earlier than the others. The flowers are single, white, large and fragrant. 5 cts. each; 30 cts. per doz.; \$2.00 per 100.

Tigridia

FOLIAGE PLANTS FOR THE HOUSE.

ARICA LUTESCENS. A majestic palm. Its dark, glossy-green leaves are gracefully curved on slender stems. The trunk and stems are a golden yellow, irregularly spotted with bronzy green. Each, 1½ ft.,\$1.50; 2½ ft.,\$3.00. KENTIA BELMOREANA. Sometimes called the "Curly l'alm," recognized as one

of the best for all purposes, being able to withstand more ill-usage, perhaps, than any other. Each, 1½ ft., \$2.00; 2 ft., \$3.00; 3 ft., \$5.00.

LANTANIA BORBONICA. This is a typical palm and is more largely used than

any other. It is of strong, healthy habit, and especially suitable for window culture. Each, 1½ ft., \$1.50; 2 ft., \$2.00; 2½ ft., \$3.00; 3 ft., \$5.00. PANDANUS UTILIS. This is a most desirable variety for window culture, and

will bear without injury a great deal of neglect. Each, I ft., \$1.00; 1½ ft., \$2.50. DRACENA INDIVISA. Valuable as a window plant and for centres of vases,

baskets, beds, etc.; 50 cts. to \$1.50 each.

DRACENA TERMINALIS. A beautiful decorative plant, gorgeous shades of crimson, bronzy-green and pink foliage; 50 cts. to \$1.50 each

RUBBER PLANTS, Ficus Elestica. We can furnish nice, healthy plants of this favorite at from \$1.00 to \$5.00 each, according to size.

NEPHROLEPSIS EXALTATA. Sward Fern. A very popular window-plant. It bears well with heat, dust and neglect, and always has a bright, fresh appearance. Strong plants, 50 cts. to \$2.00 each.

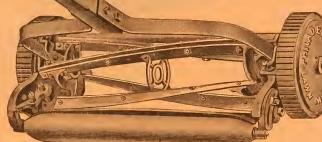

Genuine Philadelphia Lawn Mowers

FOR 1896

HAND MACHINES.

Recognizing the fact that we are the pioneers in the retail lawn mower business of the United States, the Philadelphia Lawn Mower Co., of Philadelphia, Penn., have given us the exclusive sales in eastern New England of their latest and best inventions, namely, the new mowers designated as styles T and K, (as shown in this circular.

inches in diameter. The wiper is made

from wrought iron, having the spiral knives bolted on. By this device the knives can be easily detached and replaced at a trifling cost, if necessary. Having a four-blade cylinder, the machine does fine work. While these improvements add considerably to the cost, the price is no higher than that of other machines. Every Style T Mower will be accompanied with our guarantee, covering a period of five years.

PRICE LIST.

> In order to prevent deception by unscrupulous dealers, we have had the wheels of the Styles T and K Mowers cast with raised letters, as follows: On one wheel "Joseph Breck & Sons, Corp., Boston, Mass." on the other, "Philadelphia Lawn MowerCo." No others genuine.

The Style K Mower, with its 10-inch wheels and 5-bladed cylinder is the lightest running and smoothest cutting mower ever used on a lawn. It will cut as high grass as any machine made, and, like the other Philadelphia mowers, it combines all that is desirable in the way of quality, simplicity, durability and ease of operation. Taking the foregoing into consideration, the prices are very reasonable.

REMEMBER . . .

Each machine is fully guaranteed for five years.

Style K Philadelphia Mower. See Special Offers on third page of cover.

Horse Machines.

The Philadelphia Pony and Horse Mowers are the results of an experience of over 25 years and we do not know of a single instance wherein they have failed to give perfect satisfaction. On all government grounds, public parks and fine lawns the Philadelphia Horse Mowers are the leading machines, which is the best

possible recommendation for them. For 1896 new sizes have been added, and on grounds too large for hand machines it is now an easy matter to select a size adapted to the requirements, at a reasonable price.

Before purchasing a machine of this class, we invite correspondence and feel confident that our experience in this branch of the Lawn Mower business will materially aid you in making your selections.

The 30 and 35-inch machines are made with either open or closed cylinders, all others with open cylinders only. With Horse Mowers a side draft attachment is provided so that the horse may walk on uncut grass. No charge for same is made if ordered with the machine.

In addition to the machines shown in this catalogue we carry in stock all the other mowers made by the Philadelphia Lawn Mower Co., and can furnish same at the lowest cash prices.

Complete descriptive catalogue mailed on application.

THE "IMPROVED"

WHITE MOUNTAIN FREEZER.

Cream can be frozen in 4 minutes in the "Improved" White Mountain.

As features of especial merit, we claim:

A strong waterproof tub, bound with heavy, galvanized iron hoops that fully protect the tub and do not fall off; the gearing completely covered, so that nothing can get between the cogs. Cans full size and made of the very best quality of charcoal tin plate; beaters of malleable iron and tinned; all castings attached to the tub nicely galvanized to prevent rusting. It is the only Freezer in the world having the celebrated duplex dasher, with double self-adjusting wood scraping bar, by the use of which cream can be frozen in less than one-half the time, yet finer and smoother than can possibly be produced in any other Freezer now in use. Positively the best Freezer in the world.

The Monitor Incubator.

If any one goes into the raising of poultry, the most practical and economical method of hatching and raising chicks and ducklings is by the use of incubators and brooders. They are an absolute necessity where the business is carried on with the object of making it pay, and, of course, if broilers are the object, an incubator and brooder must be used, as hens will not sit at the time that these are wanted. The large number of practical poultrymen who are using the

MONITOR INCUBATOR and BROODER

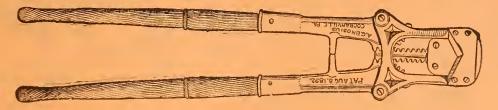

testify to the fact that they are appreciated.

THE=

... KEYSTONE DEHORNING CLIPPER

Highest Honors at the World's Columbian Exposition, Chicago, III.

MEDAL AND DIPLOMA.

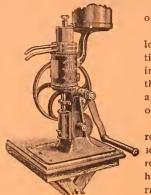

Dehorning is an improvement in the herd that is becoming very popular and spreading with great rapidity. Everyone that tries it is so well pleased with the way the cows herd together (much after the manner of a flock of sheep) that they wonder how they put up with the goring and loss of calves, to say nothing of the danger of life to man as well as beast..

The Keystone Dehorning Clipper was gotten up to fill the want of an easy, practical and scientific method of removing the horns from cattle, felt by the farmer, dairyman and veterinary surgeon. As everyone pronounced it such a complete success, and so far ahead of anything before used, it has been placed on the market to fill this demand. It is the most simple, yet the most powerful. Consists of frame, blade, and two handles. No chute required, and the only clipper that does not need one in any case.

"Baby" Cream Separators. The De Laval

Baby No. 2.

NO EXPERIMENT 20,000

MADE AND USED

The purpose of the Cream Separator is the expeditious and complete separation of cream from milk in the most practical manner possible.

The De Laval S parator is the invention of Dr. Gustaf de Laval, of Sweden, long esteemed one of the most practical scientists and prolific inventors of the time, and often fitly termed the "Edison of Dairying." It was introduced in Europe in 1879, and in this country several years later. Since its introduction - within these few years—the cream separator has fairly revolutionized dairying methods, and there are now some 60,000 De Laval machines in use, scattered far and near over every civilized country of the world.

The De Laval Cream Separators well sustained their world-wide prestige at the recent World's Columbian Exposition, Chicago, Ill., having been the only machines selected by the committee of experts and experiment station representatives for regular use in the great international breed test or practical working dairy, and having received the only award-consisting of medal and diploma-given to separators by the regular committee of judges in the exhibition department.

SOMETHING NEW FOR 1896 ... The De Laval "Humming Bird" Separator.

Price \$65.00. The only practical low-priced Separator in the Market.

Essay, "A Practical 'Education' in the Varied Advantages of Centrifugal Separation," with full description and prices, mailed upon application.

De Laval Separators not included in our Special Offers.

MOUNTED GRINDSTONES.

We make a specialty of mounting, in a superior manner, the finest quality of Bay de Chaleur, Nova Scotia Stones.

They contain more wear than any grindstones known, and are not to be confounded in any way with the cheap western

Stones that are being put on the market in large quantities.

Our stones, are mounted by skilled mechanics, in our own workshop, who take pains to turn them very smooth and perfectly true.

A cheap grindstone soon becomes water soaked, making one side heavier than the other, and the grit being very uneven, the stone soon gets out of true, and is practically useless.

None but the best grits are used, and, if in ordering, the kind of tools the stone is to be used for are mentioned, we can select a grit that is just right for the tools. We use the heaviest and strongest fixtures only. Our mounted stones cannot be excelled in quality and service.

PLANT DEPARTMENT.

To this important branch of our business we are giving much attention, and are in a position, second to none, to supply Fruit Trees, Shade and Ornamental Trees, Evergreen and Flowering Shrubs, Vines, Herbaceous and Summer Bedding Plants, etc., in all desirable varieties and sizes, at lowest prices. We shall be glad to advise intending buyers as to selection, and also furnish plans and estimates for laying out and planting ornamental grounds.

While we exercise the greatest care to have all Nursery stock pure and reliable, we sell no Trees, Plants, Shrubs or other Nursery stock with warranty, express or implied, in any respect. If the purchaser does not

accept these goods on these terms, they must be returned at once.

COPYRIGHTE BY JOSEPH BRECK & SON'S 1891.

The Roses we offer are from the Nurseries of one of the most renowned and extensive growers in Britain. They were grown on a clay soil, in an exposed situation, near the sea, which insures thrifty growth, ripe wood and hardiness. They are all budded very low on the stock, and have fine roots.

The list of varieties is revised, and contains nothing but the really most desirable and distinct kinds.

PLANTING. If possible, select a position sheltered from high winds but open to sunshine. If the soil is not naturally suitable it must be improved—if light, by the addition of rich loam and decomposed cow or stable manure, well worked in; where stiff and heavy, good drainage and rough stable manure are the essentials.

When planting, carefully prune all dead or bruised roots or branches, spread the root fibres as much as possible, and set deep enough to cover the junction of the bud and stock, thereby preventing suckers, and enabling the *rose* to make roots.

During the growing season, frequent waterings with liquid manure is an advantage. It is easily made by

mixing cow manure with water in an old tub or barrel.

In the following list of one hundred varieties we have aimed at selecting those that combine, in the fullest manner, the five requirements of a perfect rose, namely: beauty of color, beauty of form, fragrance, profusion and continuity of bloom, and vigor of growth. To aid our customers in making selection, who cannot give space to a hundred kinds, we have indicated what we consider the best fifty, by prefixing a star *; to the best twenty-five, two stars **; to the best twenty-five, two stars **; to the best twenty-five, two stars ***.

Strong Plants, 30 cts. each; \$3.00 per doz. Extra Strong Plants, 50 cts. each; \$4.00 per doz.

See Special Offers on third page of cover.

HYBRID PERPETUAL ROSES.

THE BEST HUNDRED VARIETIES.

*Abel Grand, silvery rose, large, very free bloomer. ****Alfred Colomb, bright fiery red, large and very fine. Alfred K. Williams, carmine red, fine form.

Strong Plants 30 cts. each, \$3.00 per doz. Extra Strong Plants 50 cts. each, \$4.00 per doz. Special prices for larger quantities upon application.

CLIMBING ROSES

Crimson Rambler, the finest climbing rose yet offered; it is a very rapid grower, and produces an immense number of lovely pink flowers. It forms a nice bed if the shoots are pegged down as is sometimes done with Verbenas.

Blairii, a new variety that is unsurpassed as a climber; color, rosy-blush; very large and delightfully fra-grant flowers; borne in profusion all summer; perfectly hardy.

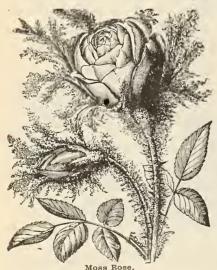

Climbing Victor Verdier, a perpetual blooming, hardy, climbing rose; color, beautiful deep carmine; large and well-formed.

Gloire de Dijon, buff, orange centre; splendid foliage: tea scented.

Baltimore Belle, pale blush, changing to white; fine.

Queen of the Prairies, bright, rosy red; frequently with white stripe.

Strong Plants. Fifty cents each; \$4.00 per dozen.

Little Gem, white, slightly tinted with pink. Mme. Cecile Brunner, salmon rose, buff shaded.

MOSS ROSES.

Crested Moss. Rose large and full; beautiful. Glory of Mosses. Blush, very large and full. Laneii. Rosy crimson, tinted purple; large and full. Little Gem. Crimson, very small and double; beautifully mossed. Princess Adelaide. Pale, glossy rose. Reine Blanche. Fine white, large and full.

Strong Plants, 50 cts. each; \$4.00 per doz.

AUSTRIAN ROSES.

These are the showiest yellow roses in cultivation; very profuse bloomers, their bright flowers literally covering the bush.

Harrisonii, fine golden Yellow. | Persian Yellow, the deepest yellow. 50 cts. each: \$4.00 per doz.

POLYANTHA, OR FAIRY ROSES.

These are of low, compact habit, producing small, graceful flowers in great abundance. They are perfectly hardy, and will bloom through the hottest and dryest months of summer. Excellent for a border in front of a rose-bed, and for vases. The flowers are especially adapted for personal wear. A most exquisite class, rapidly gaining in popular favor, which they richly deserve.

Paquerette, pure white; dwarf and free flowering. Perle d'Or, saffron yellow, deeper in centre, edges white; very fine.

Mignonette, blush; very fragrant and free flowering. Price, small plants, 35 cts. each; \$3.50 per doz; large plants, 50 cts. each; \$4.00 per doz.

SINGLE ROSES.

Capucine, dazzling orange scarlet, shading to orange at the base of the petals, very distinct and attractive.

Bracteata, (Macartney Rose,) small, deep green leaves, and large flowers of pearly whiteness.

Rugosa Alba, forms large bushes with deep green, glossy foliage, flowers beautiful pure white, sweetly scented.

Rugosa Rubra, similar to the preceding, but with large rosy crimson flowers, succeeded by cherry-like fruit. Madame G. Bruant, double white flowers, otherwise

resembles R. Alba. Madame Chas. Worth, double crimson flowers, habit similar to R. Rubra.

Carolina, (Wild Swamp Rose,) Flowers very bright. 25 cts. each; \$2.00 per doz.

Wichuriana, low trailing variety, suitable for covering banks, rocks, etc. Glossy green foliage, pure white, very fragrant flowers. 35 cts. each; \$3.00 per doz.

Strong plants, 50 cts. each; \$4.00 per doz., except as noted.

EVERBLOOMING TEA ROSES.

The Teas are tender, and require careful protection. They should not be planted out in spring until all danger of frost is passed. For parlor or conservatory culture they are unequalled.

Bon Silene. Rosy-Carmine. shaded, free flowering, fragrant.

Catherine Mermet. Bright silvery pink, fragrant.
Cornelia Cook. Pale yellowish-white, large and full. Madam de Waterville. Salmon-white petals edged

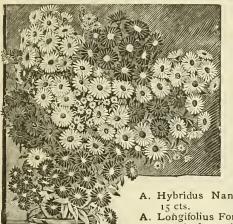

with bright rose. Very free flowering. Madam Hardy. Pine white, fine substance, full. Madam Hoste. Yellowish-white, centre deeper yellow; good form, very free blooming.

Marie Van Houtte. White, tinged with yellow; large.

Niphetos. Pale yellowish white, large buds. Perle des Jardins. Straw color, large and full.

Safrano. Saffron and apricot, very beautiful. Waban. A sport of Catherine Mermet, which it resembles in every way except color; rich, clear pink.

Small plants 15 cts. each, \$1.50 per doz.; Large Plants 30 cts. each, \$3.00 per doz.

HARDY ASTERS.

We have in this class some of the most showy, as well as really beautiful and interesting flowering plants in cultivation. All are quite hardy, graceful in habit, and bear such profusion of flowers that they are invaluable in the garden, especially as they blossom when the scarcity of hardy flowers is most marked. The color of the flowers has the widest range. Will thrive in the grass or any rough spot and bloom freely the first season,

A. Alpinus. 9 in. July. Bright purple.
A. Amellus Bessarabicus. 2 ft. Rich purplish-blue flowers with orange centre; one of the finest. 25 cts.
A. Chapmanni. Numerous heads of small flowers of a light

clear blue. 15 cts.; \$1.50 doz. Horizontalis. Numerous branching stems smothered with red and white flowers; pretty, neat habit. 15 cts.

A. Hybridus Nanus. 18 in. Smothered with bright pink and white flowers.

A. Longifolius Formosus. 3 ft. October. A dwarf-growing variety, which is a cloud of very large, bright, rose-colored blossoms; a superb aster. 25 cts.

A. Novæ Angilæ. 4 ft. Our grandest American species, with thousands of big,

A. Novæ Anglæ. 4 tt. Our grandest American species, with thousands of oig, violet-purple blossoms; a grand aster. 15 cts.
A. Nova-Belgica, var. Lady Trevellyn. 4 ft. Sept, Oct. Large heads of pure white flowers, with yellow centres. 25 cts. each; \$2 75 per doz.
A. N. Roseus. 4 ft. A most charming variety of the above, with all shades of rose and crinison. The most magnificent of all hardy asters. 25 cts.
A. Ptermacoides. 1½ ft. August, September. Flat, open heads of pure white

flowers; fine for cutting. 25 cts. each; \$2.75 per doz.

A. Sibericus. 9 in. Aug., Sept. The plant forms a perfect hemisphere, and is completely covered with clear pink flowers in autumn. 35 cts. each; \$3.75 doz.

Hardy Asters

HELIANTHUS. — Perennial Sunflowers.

These form a very important group of bold, showy autumn-flowering plants,

H. Decapetalus. 5 ft. September to frost. Fine free-flowering form, with clear

yellow flowers, immense panicles. 20 cts. each; \$2.00 per doz. H. Lætiflorus. A grand perennial sunflower; flowers large and of a rich dark

yellow color, the disc also being yellow. Extra strong clumps. 25 cts.

H. Japonicus. This resembles in many respects H. rigidus, but is far the best of the two. The flowers are deeper in color, of a better formation, and about

three weeks earlier in bloom. 20 cts. each; \$1.50 per doz.

H. Maximus. The Great Perennial Sunflower. An enormous growing variety. species. This should be grown in every garden where sufficient space could be found for it. The Garden says: "It is, in our opinion, the most beautiful of all sunflowers." 25 cts.

H. Plenus. This is the Double Perennial Sunflower, one of the most useful perennials we have. 20 cts. each; \$2.00 per doz.

H. Orgyalis. A remarkable species, 10 feet high, with foliage as long and narrow as willow leaves, and blooming latest of all, in October, at the tips, high up in the air. Exceedingly graceful and beautiful. 25 cts.

H. Multiflorus Grandiplenus The true variety; a very superior form with flowers much brighter and better shape than Multiflorus Plenus. 25 cts.

HOLLYHOCKS. - Breck's Silver Medal Strain.

This strain has been awarded a silver medal by the Massachusetts Horticultural Society, and always obtained the first prize wherever exhibited. No other collection can approach this in variety of shades of color, length of spikes, profusion and texture of flowers and foliage.

We offer a fine lot of strong, healthy plants, in all shades of white, carmine, dark maroon, salmon, appleblossom, light and dark crimson, rose, yellow, purple and variegated. 25 cts. each; \$2.50 per doz.; \$18.00 per 100.

HARDY HERBACEOUS PERENNIALS.

This collection, value \$13.75, will be delivered free, as per Special Offer No. 1, on receipt of \$10.00.

EVERGREENS.

Arbor Vitæ (Thuja occidentalis). Common American form. 50 cents.

Fir Balsam (Abies balsamea). Erect, regular pyramidal tree, rapid grower,

very hardy. 50 cents to \$1.00 each.

Fir, Douglas. Hardy, and very ornamental. Price \$1.00 each.

Fir, Nordmann's. Dark rich, green foliage, silvery underneath. 11/2 feet, .

\$1.00 each; 3 feet, \$5.00 each.

Juniper Virginiana (Red Cedar). Native variety. 3 ft., 50 cents; 5 ft., \$1.00. Pine, Swiss Stone (P. Cembra). Short needles, compact growth, very attractive. 3 feet, \$1.00.

Pine, Austrian. Stout growth, long needles, perfectly hardy in bleakest exposure. I foot, 25 cents; 3 feet, 75 cents each.

Pine, White (P. Strobus). The most ornamental of all our native pines.

2 feet. 50 cents; 5-6 feet, \$1.00 each.

Retinospora Aurea (Cypress). Of bright golden color. 3 feet, \$1.00. Retinospora Plumosa. Very hardy, with plume-like foliage. 3 feet, 50

cents; 4-5 feet, \$1.00.

Spruce, White (Picca Alba). Very hardy native tree. 2 feet, 50 cents;

3 feet, \$1.00.

Spruce, Colorado (P. Pungens). Perfectly hardy, pyramidal in shape,

foliage of a dark steel-blue color. \$1.50 to \$5.00 each.

Spruce, Norway (Abies Excelsa). An elegant tree, extremely hardy, of lofty, rapid growth, and pyramidal form. 2 ft., 50 cents; 5 ft., \$1.00 each. Spruce, Hemlock (Abies Canadensis). Of good shape and habit. 3 feet, 75 cents; 5 feet, \$1.50 each.

Blue Spruce

HEDGE PLANTS.

Acacia, Three Thorned. Beautiful foliage, makes a strong and fine fence. \$8.00; 3 years, \$10.00 per 100.

Arbor Vitæ, American. Stocky plants. 1-11/2 feet, \$10.00 per 100.

Barberry. Common kind, fruit is very conspicuous in the

Barberry, Purple. 2 years, \$6.00 per 100.

Barberry, Purple. Foliage soft purple, very beautiful.

1 foot, \$10.00 per 100; 2 feet, \$15.00 per 100.

Suckthorn. Makes a hardy and strong fence. 2 years, \$8.00; 4 years, \$15.00 per 100.

California Privet. Of rapid growth, very hardy. \$10.00 per 100.

English Privet. Hardy and very desirable. \$10.00 per COI

Lilacs. The standard purple. 2-3 feet, \$10.00 per 100.

Lilacs. Chinese White. \$15.00 per 100.

Spruce, Norway. Unsurpassed for windbreaks or screens. Small plants, \$10.00 per 100; 2 feet, \$15.00.

Spruce, White. Rapid grower. Small plants, \$10.00 per 100; 2 feet, \$15.00 per 100.

SHADE AND ORNAMENTAL TREES.

Rock Maple

Apple, Japan Crab (Malus Halleana). Also sold under the name of Parkman's Crab, a beautiful variety producing long, pink flower-buds, quite conspicuous. 50 cents, 75 cents and \$1.00 each.

Ash, American White (Fraxinus Alba). A large, noble tree. 10 feet,

75 cents; 12 feet, \$1.00.

Ash, Weeping (F. Pendula). A beautiful tree of irregular form. 6-7 feet, \$1.00.

Ash, Mountain (Sorbus Americana). Very ornamental, bearing large

clusters of shining red berries. 6-7 feet, 50 cents; 10 feet, \$1.00.

Beech, American (Fagus Feruginea). Compact form, with rich, glossy, attractive foliage. 5 feet, 50 cents; 7-8 feet, \$1.00.

Beech, Rivers Purple (F. Atropurpurea). The finest of all purple-leaved

trees, beautiful as single specimens. 4 feet, \$1.50.

Beech, Cut Leaved (F. incisa). Distinct and fine. 4 feet, \$1.00.

Beech, Weeping (F. Pendula). A remarkable picturesque tree of curious growth. 4-6 feet, St. 50.

Birch, European White (Betula Alba). A graceful tree with silvery bark, and slender branches, and elegant drooping habit. Price, 4-5 feet, 50 cents; 7-8 feet, \$1.00.

Birch, Canoe (B. papyracea). A native variety which attains great size. 5 feet, 50 cents; 8 feet, \$1.25.
Birch, Cut Leaved, Weeping (B. Pendula laciniata). One of the most

popular weeping trees, most beautiful as single specimens on the lawn. 5-6 feet, \$1.00; 8-10 feet specimens, \$2.00.

Catalpa Speciosa. A Western type, very desirable, being more hardy and

finer in bloom than the common variety. 6-7 feet, 75 cents. Chestnut, American (Castanea Americana). A tree of stately growth, very ornamental. 4-5 feet, 50 cents; 8 feet, \$1.00.

Chestnut, Horse (Esculus Hippocastrum). Strong habit, magnificent foliage, and fine spikes of flowers in May and June. 4-5 feet, \$1.00; 6 feet, \$1.50.

Cornus, Florida. Of fine form and, very effective | Elm, American. (Ulmus Americana.) The noble when covered with its large, broad-petaled flowers. | spreading and drooping tree of our own forests. 4 feet, 75 cents. Cornus, F. Rubra. Same as above, except in color,

spreading and drooping tree of our own forests. 10-12 feet, \$1.00; 15 feet, \$1.50.

Elm, English. (U. Campestris.) An erect, lofty tree of rapid, compact growth. 8-10 feet \$1.00; 15 feet, \$2.00.

which is bright-red, very showy. \$1.00. Special offer No. 2 applies only to articles on this page.

SHADE AND ORNAMENTAL TREES, continued.

Hawthorn, Double White (Cratagus Alba fl. pl.). Highly ornamental flowers and foliage. 6 feet, \$1.50

Hawthorn, Paul's Scarlet (C. coccinea fl. pl. Paulii). Flowers bright carmine, red, makes a striking contrast when planted with the white. 5-6 feet, \$1.50.

Laburnum, Golden (Cytisus). A small tree producing freely long clusters of the brightest golden-yellow blossoms, of sweet-pea size and shape. 4 feet, 50 cents; 5-6 feet, \$1.00.

Larch, European (Larix Europæa). An elegant, rapidgrowing, pyramidal tree. 4-6 feet, 75 cents.

Linden, American, or Basswood (Tilia Americana). A beautiful, rapid-growing, native tree with large leaves and fragrant flowers. 8 feet, 75 cents; 10 leet, \$1.00.

Linden, European (T. Europæa). Pyramidal tree of larger size. 7-8 feet, 75 cents; 8-10 feet, \$1.00.

Maple, Cut Leaved Weeping (Acer Wierii Laciniatum). A weeping silver-leaved variety with deeply cut foliage. 8 feet, \$1.00.

Maple, Japan (Atrosanguineum Purpureum). This is the richest crimson and the most brilliant, vigorous, and the best type of the Japanese varieties. \$2.00 each.

Maple, White or Silver-Leaved (A. Dasycarpum).

native variety of rapid growth, very beautiful. 8-10 feet, 75 cents; 10-12 feet, \$1.00; 13-15 feet, \$2.00 each. Maple, Norway (A. Plantanoides). Of spreading habit,

foliage dark green. 8 feet, \$1.00; 10 feet, \$1.25

Maple, Sugar. (Aver Saccharinum.) One of the best street trees. 10·12 feet, \$1.00; 12·15 feet, \$1.50.

Magnolia Acuminata (Cucumber M.). Of pyramidal

growth, flowers yellow, tinted with bluish purple. Fine specimens. 5-6 feet \$1.00.

Magnolia Conspicua. (Chinese White). A variety of great beauty; the flowers are large, pure white, and appear before the leaves. \$1.50-\$2.00 each.

Magnolia Soulangeana. Flowers white and purple, cupshaped; foliage, large and glossy. Fine specimens, \$1.50 to \$2.00 each.

Mulberry, Downing's Everbearing (Morus). A rapidgrowing tree which bears nice fruit. 4-5 feet, \$1.00.

Mulberry, Teas Weeping. Absolutely hardy and free from disease, very vigorous in growth. 2 years old, \$1.50.

Oak, White (Quercus Alba). One of the finest of American trees, of large size and spreading branches. \$1.00.

Oak, Red (O. rubra). A native species of rapid growth. \$1.00 each.

Poplar, Bolleana (Populus). Pyramidal growth. 8-10 feet, \$1.00.

Poplar, Lombardi (P. fastigiata). Well known and remarkable for its erect rapid growth. 6-8 feet, 50 cents; 8-10 feet, 75 cents.

Prunus, Pissardi. One of the best novelties of late years. The wood and leaves are dark purple throughout the entire season. 5 feet, 50 cents; 8-10 feet, \$1.50

Syringa Japonica (Giant tree lilac). It makes a stout tree with large rich foliage, and throws up well above the leaves large clusters of white flowers about a foot long. 2-3 feet, 75 cents each.

Willow, Kilmarnock (Salix Caprea Pendula). An exceedingly graceful tree with glossy foliage and perfect umbrella head. \$1.00 each.

Willow, White (S. Alba). Rapid grower. Valuable for seashore. 6-8 feet, 50 cents; 10 feet, 75 cents; 12-14 feet, \$1.00 each.

Willow (S. Babylonica). Great Weeping Willow. immense and beautiful tree with bright green foliage and pendant branches. 6 feet, 35 cents; 8 feet, 50 cents each.

HARDY CLIMBING PLANTS.

Actinidia Polygama. A strong clean vine from Japan. 50 cts. each.

Akebia Quinata. Of rapid growth, with shining foliage and

bluish clusters of fragrant flowers. 35 and 50 cts.

Ampelopsis Englemanni. A variety of the Virginia Creeper, with bright foliage; fine color in the autumn; the tendrils enable it to support itself like A. Veitchii. 25 and 35 cts.

Ameplopsis Quinquefolia (Virginia Creeper). Well-known climber; very vigorous. 25 cts. each.

Ampelopsis Veitchii (Boston Ivy, Japanese Ivy). Well-

known particularly around Boston. It grows rapidly and clings to a wall or fence with the tenacity of Ivy; the foliage is handsome in the summer, and changes to a crimson-scarlet in autumn. For the ornamentation of brick or stone structures, it can be especially recommended. 25 cts. each; \$2.50 per dozen.

Bignonia Radicans (Trumpet Vine). A quick-growing vine, bearing large scarlet flowers, very brilliant. 25 and 50 cts, each.

Celastrus Scandens (Roxbury Wax Work). A vigorous vine with conspicuous orange-scarlet berries in autumn. 35 and 50 cts. each.

Euonymus Radicans. Variegata, retains its glossy green and white foliage through the winter; nice plants 25

Honeysuckle, Hall's Japan. Abundant, vigorous foliage retained until early winter, flower white and yellow,

fragrant. 35 and 50 cts. Honeysuckle, Scarlet. Strong, rapid grower, bright scarlet. 25 and 50 cts. Honeysuckle, Belgica. Dutch monthly, very sweet scented,

red and buff. 25 and 35 cts. Silk Vine. A rapid growing vine, will make 30 to 40 feet

in a season. 35 to 50 cts. each. Wistaria Chinensis. One of the most elegant and rapid growing of all climbing plants, bearing long pendulus clusters of pale blue flowers in May and June. 50 and 75 cts. each.
Wistaria Chinensis Alba. White, otherwise similar to preceding. 75 cts. and \$1.00 each.

Special offer No. 2 only applies to articles on this page.

CLEMATIS (Virgin's Bower).

Elegant slender plants of rapid growth., handsome foliage, and beautiful large flowers. Perfectly hardy with a slight root covering

Miss Bateman. White; chocolate-red anthers. 50 cts. and \$1.00 each.

Flammula (European Sweet Clematis). Flowers small, white, and very fragrant. 25 and 50 cts. each.

Fortuneii. Double; rosette formed; creamy white; fragrant. 50 and 75 cts. each. grant. 50 and 75 cts. each. Jackmanni. Large, intense violet-purple remarkable for

velvety richness; free in growth and an abundant and successive bloomer. 50 and 75 cts each.

Jackmani Alba. Like preceding, except in color, which

is pure white. 50 and 75 cts. each. Lawsoniana. Large rosy purple,darker veins. 50 cts.each Mrs. James Bateman. Pale lavender. 75 cts. and \$1.00 each.

Virginiana (Amer. White Clematis). A remarkably rapid climbing plant, growing to the height of twenty feet, producing an immense profusion of flowers in August. 25 and 50 cts. each.

RHODODENDRONS.

We draw our supply of Rhododendrons from what we believe to be the finest stock in the world. All the plants, even the small sizes, are symmetrical in form, well furnished, and have good fibrous roots that make transplanting comparatively safe.

R. Catawbiense. 8 ft., June. This is one of the types from which the hardy named varieties originated. It forms a broad, dense bush with handsome, deep-green evergreen foliage, and bears at the extremity of each branchlet immense heads of clear lilac, spotted purple flowers. I ft., 75 cts. each; \$9.00 per doz.; stronger plants, \$1.00 to \$2.50 each.

R. Maximum. 10 ft., July. A hardy native. The foliage is the largest and most effective of all hardy kinds. The leaves are of the deepest glossy-green

and often 10 inches long. The flowers are borne in dense heads 4 to 6 inches across, white tinged with pink and yellow. This is of rapid growth, and is the latest flowering of all hardy kinds. Small plants, 75 cts. each; \$9.00 per doz.; larger plants, \$1.00 to \$2,00.

R. Ponctacum. 6 ft., June. Another rare native species, quite hardy, with medium sized glossy-green foliage, and moderate sized heads of light pink flowers.

NAMED HYBRID RHODODENDRONS.

Album Grandiflorum. Blush, changing to white Atrosanguineum. Deep blood red.

Barclayanum. Deep rosy crimson. Berty Parsons. Mauve with brown eye.

Bicolor. Rose with white spot on upper petals.

Caractacus. Rich purplish crimson.

Chas. Bagley. Cherry red.
Corraceum. Yellowish, changing to pure white.

Delicatissimum. Blush white, tinted pink. Everastianum. Rosy lilac, spotted red; fringed and

crisped. The best perfectly hardy Rhododendron.

Giganteum. Light rose. H. H. Hunnewell. Dark, rich crimson. James Bateman. Clear rosy scarlet. Lee's Purple Dark purple. Old Port. Rich plum.
Onslowianum. Waxy blush, yellow eye. Purpureum Grandiflorum. Purple. Roseum Elegans. Rich rose. Roseum Grandiflorum. Clear rose, Stella. Pale rose, deep chocolate blotch.

Price: 1 ft., \$1.00 each; 12 to 18 inches, \$1.50 each; 18 to 24 inches, \$2.00 each. Prices on larger plants, and per dozen and hundred on application.

HARDY FLOWERING SHRUBS.

Almond (Prunus Jap. Rubra fl. pl.). Double pink flowers. Large plants, 50 cents.

Almond (Prunus Jap. Alba fl. pl). Double white flowers beautiful. 50 cents.

Althæa purpurea plena (Rose of Sharon). Hibiscus. 35 and 50 cents each.

Althæa Striata Carnation striped. 35 and 50 cents each. Althæa. Double variegated. 35 and 50 cents each.

Andromeda Floribunda. A pretty evergreen plant with rich, dark-green foliage, and pure white flowers in great abundance in spring. \$1.00 each; extra

size, \$2.00 each. leas. Ghent Hybrids, perfectly hardy, and of many brilliant colors. Fine plants, \$1.00; large Azaleas. sizes, \$2.00 and \$2.50.

Azalea Mollis. A new type, flowering earlier than the Ghent, and in color and form approaching the Indian varieties. 75 cents to \$1.00.

Barberry (Berberis Thunbergii). A low growing shrub

of arching habit; the foliage changes to many brilliant colors in the fall. Strong plants. 50 cts. each.

Calycanthus Floridus. Strawberry tree or sweet scented shrub, dark flowers. 50 cents; small plants, 25 cts.

Corchorus Japonica (Kerria). A small shrub with bright green leaves and clear yellow flowers. 35 and 50 cents each.

Cornus Elegantissima. With variegated foliage, the leaves are marked with silvery white, very attractive. 50 cents each.

Daphne Cneorum. A low growing evergreen, produces panicles of bright pink flowers. 50 cents each.

Hydrangea, Paniculata Grandlflora

Special offer No. 2 only applies to articles on this page.

HARDY FLOWERING SHRUBS.

Deutzia Gracilis. Compact, filled with starry white flowers. 35 and 50 cents each.

Deutzia Crenata fl. pl. Flowers double white, tinged with rose. 35 and 50 cents each.

Deutzia C. fl. Alba pl. With very double pure white flowers. 35 and 50 cents eacn.

Elder, Golden. Very effective for its bright yellow foliage. 25 and 50 cents each.

Eleagnus Longipes. A new fruit-bearing ornamental shrub from Japan

A decided novelty. 75 cents each.

Exochorda Grandiflora. A choice shrub of strong, upright growth, producing a profusion of large snowy-white flowers in June. cents each.

Forsythia Suspensa. Trained as a standard, it becomes one of the most beautiful weeping shrubs, covered with bright golden yellow blossoms, early in summer. Dwarfs, 25 and 50 cents each; standards, 75 cents and \$1.00 each.

Hydrangea, Paniculata Grandiflora. Flowers white in great pyramidal panicles, about a foot long. 50 cents, 75 cents and \$1.00 each.

Kalmia Latifolia. A choice native evergreen shrub with shining foliage, and dense clusters of pink or nearly white flowers. \$1.00 to \$1.50 each.

Lilac (Syringa). Common bluish purple flowers. 25 and 50 cents each.

Weigelia

Lilac (S. Alba). Pure white. 25 and 50 cents each.

Mock Orange or Syringa (Philadelphus). Of compact habit, with creamy white flowers, deliciously fragrant. 35 and 50 cents each.

Mahonia Aquifolia. A handsome shrub with shining prickly leaves, and showy, bright yellow flowers in May, followed by large clusters of purple berries. 25 cents each.

Pyrus Japonica (Cydonia). Japan Quince, flowers bright scarlet, very showy. 25 and 50 cents each.

Rhus Cotinus. The well-known smoke bush. 3 ft., 25 cts.; 5 ft., 50 cts. each.

Rosa Rugosa. Forms large, thick, close bushes of very deep glossy foliage, which is covered with bright rosy crimson flowers, succeeded by large berries of a rich rosy red. 50 cts. each.

Snowball (Viburnum Plicatum). A great improvement on the old-fashioned sort, with dark green foliage, and superb trusses of white flowers in midsummer. 50 and 75 cts. each.

Spir.ea Aurea. Frequent pinching produces a deep golden yellow color. 35 and 50 cts. each.

Spir.ea Thunbergii. Dwarf, flowers early, very pretty. 35 and 50 cts. each

Spir.ea Van Houtti. The most profuse flowering of all the Spir.eas, the bush being a mass of white bloom. 35 and 50 cts. each.

Special Offer No. 2 only applies to articles on this page.

APPLES.

We can furnish all varieties usually catalogued, but the following list comprises the most desirable sorts.

Astrachan, large, crimson, very early. Early Harvest, pale yellow, excellent, early. Sweet Bough, large, pale yellow. Williams, dark red, mild flavor.

AUTUMN.

Gravenstein, large yellow, striped red. Fameuse (Snow apple), crimson, flesh white, excellent. Porter, medium, bright yellow, good. Pippin, fall, yellowish green, very fine.

WINTER.

Baldwin, large, dark red, productive, medium. Golden Russet, medium, yellow, good flavor.

Hubbardston, large, yellow, splashed red, early.

King, large, striped red, excellent.

Lady, small, yellow and red, good.

Northern Spy, large, striped red, good keeper.

Rhode Island Greening, large, yellowish green, medium. Roxbury Russet, extra quality, largest of the russets.

Tolman's sweet, medium, light yellow, excellent. Murphy, of good size, "better than Baldwin," ripens in December and January, but can be kept until April, bears regularly every year, and an experienced and most careful judge says of it that he "does not know of an out about it." We offer a limited number of two-year old grafts at 50 cents each.

Price 35 cents, 50 cents, 75 cents, and \$1.00, according to size.

CRAB-APPLES.

Hyslop, October to January; deep crimson. Red Siberian, September to October small, red.

Transcendent, Sept. to Oct.; striped, red and yellow. Price 35 cents, 50 cents, and 75 cents each, according to size.

We can supply all varieties. Following are the leading kinds.

SUMMER.

Clapp. Very productive; large, juicy, and rich. Bartlett. Large, clear yellow, juicy; late.
Doyenne, d'Ete. Early, small, dotted red.
Gifford. Medium; greenish yellow, juicy, good.

AUTUMN.

Beurre Hardy. October; large greenish russet.
Belle Lucrative. September; yellowish green, juicy, melting.
Bosc. October; large, russet, buttery, rich.
Comice. November; large, greenish yellow, juicy, mellow.
Duchess d'Angouleme. October; very large, greenish, very good. Howell. October; large, light yellow, melting.

Louise Bonne. October; large, pale yellowish and red, juicy.

Seckel. September: small, dull brown, red cheeked, sweet. Sheldon. November; large, russet brown, very juicy.

Anjou. November - January; large, greenish yellow, red cheek, rich, high flavor.

Dana's Hovey. November; small, rusty yellow, rich, juicy.

Lawrence. January; medium, pale yellow, sweet.

Nellis. January; medium, of excellent quality.

Vicar. December; very large, yellowish green; cooking.

Wilder. New variety; ripens about August 1; of superior quality, free from rot at the core, very productive, and of the best flavor imaginable. able. \$1.00-\$1.50.

Price, standards 5-7 feet, selected, \$0.75. Bearing trees, \$1.50 and \$3.00

Special offer No 2 only applies to articles on this page.

HARDY GRAPES.

We can supply all the really valuable sorts; the following varieties we can recommend for general

Brighton, September, red, sweet, excellent.

Concord, well known, very popular.

Delaware, September; small, unsurpassed quality.

Eaton, large, black, very juicy. \$1.00 each. Green Mountain, extra early, productive, strong.

One year vine, \$1.50; 2 years, \$2.00.

Hayes, white, sweet, juicy, good. Jefferson, large, bright-red, juicy; price, 50 cts. Moore's, early, large black, earlier than Concord.

Moyer, a new red variety from Canada, a cross between the Delaware and some native sort, juicy and sweet, hardy and productive plants; I year old,

50 cts.; 2 years old, \$1.00. Niagara, large, white, melting sweet.

Pocklington, pale, yellowish green, very sweet, 50 cts. Pottel's Sweet, Sept.; black, very sweet, \$1.50 each. Vergennes, large, dark red, sweet, juicy.

Worden, black, very productive, good flavor.

Price, except when noted, 1 year vines, 35 cts.; 2 years old, for 50 cts.

BLACKBERRIES.

Early Harvest, extra early, productive . \$1.00 \$5.00 Dorchester, very early, rich and sweet : 1.00 6.00 Taylor's Prolific, very large, superior qual. 1.00 6.00 Wachusett, hardy, good size and qual. . 1.00 Lucretia Dewberry, a trailing variety of immense size, sweet and luscious . 1.00 6.00

CURRANTS.

Cherry, large, red, juicy and acid Fay, like cherry, but more prolific		Per doz. \$1.00 2.00		White Dutch, the least acid kind	Per doz. \$1.00	
La Versaillaise, very large, red Red Dutch, a well-known variety		00.1	7.00 7.00	Crandall, an improved sort, fruit very large		7.00

STRAWBERRIES.

We consider the following the best system for cultivating the strawberry:

Set your plants about one foot apart in the rows, and the rows three feeet apart (it will take about fifteeen thousand plants per acre at this distance), and allow them to make runners to fill up a space of about twelve to fourteen inches wide; that would give you a space about twenty two inches wide for a path.

It is claimed that one can get two thousand quarts more fruit off the same ground grown in these narrow rows than by allowing them to run all over the ground, and the fruit is of better quality.

They should have from fifteen to twenty cords stable manure per acre, or one ton of ground bone, one-half ton muriate of potash, and four hundred pounds nitrate of soda to be worked into the soil.

In field culture they should be worked once a week with cultivator, and gone over by hand once in two weeks; care should be taken, after runners start to work cultivator always the same way, to prevent breaking runners.

They should be mulched in fall after ground is frozen to protect from thawing and freezing during winter, and part of the mulch should remain during fruiting season. Any good corn land will raise strawberries if properly fertilized.

For garden culture, set plants one foot apart in the row, and the rows two feet apart, keep the runuers cut off, and otherwise carry out the instructions as given above.

The varieties marked "P" are pistillate, and must have a row of staminate, or perfect-flowered varieties, planted sayevery ten feet among them. Those not marked "P" are staminate or self fertilizing varieties.

Belmont, (S). A strong growing sort, dark crimson. Late.

Bubach, No. 5, (P). A productive, bright scarlet variety. Late.

Gandy. (S.). A medium sized scarlet-crimson sort, very productive. Medium.

Greenville. (P.) Large, bright crimson, very productive, medium.

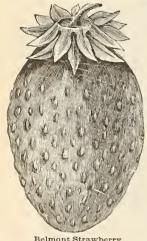

Haviland, (P). Glossy crimson, good quality, excellent for heavy soils. Medium.

Leader. (S.) Large, bright crimson berries, exceedingly early and continues in fruit a long time. Early.

Marshall (S.) Very dark crimson, fine flavor and good keeper, immensely productive. The very best. Late. 35 cts. per doz.; \$1.50 per 100.

25 cts. per doz.; 75 cts. per 100, except as noted. Special prices on large quantities.

Special offer No. 2 only refers to articles on this page.

EVERYTHING FOR THE

In our Agricultural Implement Department we offer only those articles whose merits are beyond question. The goods described in the following pages represent a very small portion only of an "up to date" stock of Agricultural Implements and Machines. In this catalogue, owing to limited space, the descriptions are not as complete as could be desired; this, however, we can obviate by mailing, on application, catalogues, circulars, etc., relating not only to the goods shown in this book but to any other article we offer.

SPECIAL OFFERS.

SEE THIRD PAGE OF COVER.

They apply on Implements and Machines just the same as on Seeds, Plants, Fertilizers, etc.

Breck's Combination Sprinkler, Especially Designed for HOT-HOUSE, LAWN AND GARDEN WORK.

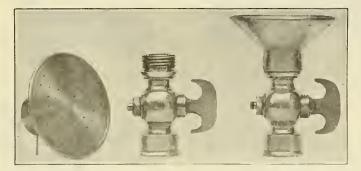

Fig. 1.

Fig. 2.

Fig. 3.

The "Breck" sprinkler is made entirely of Solid Brass, from our own patterns, and is in every way superior to any other. The face of the sprinkler is three inches in diameter, pierced with numerous holes of just the right size to throw a copious and gentle stream on the plants or lawn. The washing up of the soil, common to ordinary nozzles, is entirely avoided by using the "Breck." The face being perfectly flat and the holes bored straight, the spray is thrown without spreading, making it invaluable for Hot-house work.

THE "PLANET JR." TWELVE TOOTH HARROW, CULTIVATOR AND PULVERIZER. NET CASH PRICE, PLAIN, \$5.00; WITH WHEEL, \$6.25; COMPLETE, \$7.50.

This new tool is offered as the very best known for its intended purpose. The frame is high, and the blades are an inch wide, and of such perfect shape

satisfactory manner, and to offer an unusual amount of wearing surface. The frame is heavy and strong, and the teeth set straight with the line of motion at medium width, and are interchangeable.

As As our space is limited we cannot give as full a description as we could wish to the Planet Jr. implements and their attachments. To all interested in the finest labor-saving tools ever invented, we would recommend sending for the complete Planet Jr. Catalogue, which we will mail to any address on application.

We will mail on application, a large illustrated Catalogue, giving many valuable hints on the cultivation of the soil, and directions for the use of the Planet Jr. and Fire-Fly Tools.

SUPERIOR STEEL FIELD AND LAWN ROLLERS.

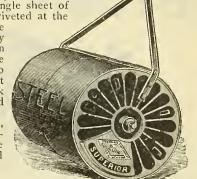

STEEL HORSE LAWN ROLLER.

QUESTION. Why buy an old-fashioned cumbersome machine, when you can get the latest improved and practically indestructible Steel Roller at nearly the same price?

Our roller is light, as is best in certain soils

and for certain crops, and easily weighted for the heaviest soils and purposes. Each section is made from a single sheet of hardened steel, rolled and riveted at the

edges, and supported as the tire of a wagon wheel, by oak felloes and wrought-iron spokes. These spokes are double-nutted and fit into iron corner blocks, which act as wedges, and firmly lock together rims, felloes and boxes.

\$30.00 \$25.00

Horse and Hand Lawn Rollers have come into quite general use, and are important if a really fine lawn is expected. Not only in putting down a lawn is the roller important, but frequent use should be made of them in the spring, as the frost is leaving the ground, and after heavy rains in the summer.

THE WORLD'S BEST.

THE BLANCHARD CHURN

Has been on the Market

3/4 OF A CENTURY.

NEITHER its materials, workmanship, finish, nor results have been surpassed, in spite of the numerous attempts of would-be rivals.

This justly celebrated Churn combines more desirable qualities than any other make or kind. It has never been beaten in any fair competitive trial, either in quantity or quality of butter made.

PRICE LIST OF FAMILY SIZES.

Mfrs. List J. B. & S. Prices. Net cash prices. No. 3. Will churn up to 2 gal. of Cream \$6.00 \$5.00 6.00 4. 4 7.00 " " 8.00 5. 8 7.00 12 " 6. 10.00 9.00 44 16 12.00 11.00

More than a quarter of a million in daily use. Pulley for power furnished for \$2.00.

GET THE BEST.

Owing to the demand for a Churn embodying the same general principles as the "Blanchard," but of cheaper materials and construction, we placed the "LIGHTNING" upon the market some time ago, and a steadily increasing sale is the best proof that they meet the popular demand for a Churn of this character.

SIZES AND PRICES.

						Mfrs. List Price	J. B. & S. Net cash Price:

PORTER'S HORSE HAY FORKS AND CARRIERS.

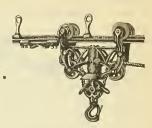

SIMPLEST, STRONGEST AND BEST.

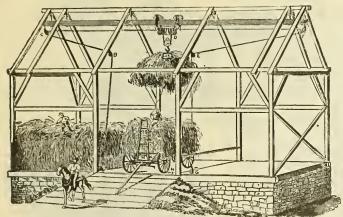

HARPOON AND GRAPPLE

* Hay Forks, Pulleys, Etc.

Manufactured by J. E. PORTER CO., Ottawa, III.

For sale by JOS. BRECK & SONS, Boston, Mass.

This cut shows the arrangement of a system of putting hay into a barn by horse power, doing it at less cost and more expeditiously than in the old-fashioned way. The prices given below for fitting up different sized barns with the most improved machinery for unloading and storing hay are not exact figures, but are approximate, and can be varied according to the quality of material and style of fork used.

For fitting up a 40-foot Barn, about \$25.00 For fitting up a 60-foot Barn, about 40.00

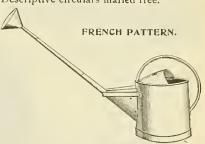

Estimates furnished on application. In inquiring for prices, please state length of barn, number of rafters, height from floor to ridgepole, and send rough sketch of barn showing location of doors and bays.

Descriptive circulars mailed free.

"CRESCENT" REVERSIBLE LAWN RAKES,

With Self-Cleaning Attachment.

(Patented, February 21st, 1893, April 10th, 1894.)

This is our No. 12 rake equipped with self cleaning attachment which keeps the teeth free from leaves and grass and the eyes on the end teeth prevent the rake from digging in the ground or tearing the sod. When the rake is drawn forward the cleaning bar is forced up the teeth to the head. When the rake is raised the bar drops, and its weight cleans the teeth. The construction of this rake is so simple that it cannot get out of order and it does its work perfectly.

Price, No. 14. 24 Teeth, No. 9 Wire, Head 2014 inches long, Tinned, per dozen, \$6.00. Each, 75 cents.

THOMPSON'S

SEEDER.
For Broadcasting Grass Seed. Light, Strong, and Simple.

Sows uniformly the whole length of the hopper, twelve feet. Its simplicity of construction and its accuracy of work in the field places it at the head of all seeders. It has no cam or cog gearing to get out of order. It has a positive motion, and works as freely and easily when sowing as when empty. Seeding is generally done at the time of year when winds pre-

vail; it is then that the Seeder can be used with marked success.

THE ROSS ENSILAGE AND FODDER CUTTERS.

THE E. W. ROSS CO., Springfield, Ohio, Manufacturers.

JOSEPH BRECK & SONS (Corporation), BOSTON, General New England Agents.

The subject of cutting fodder has been taken up so many times that there is really not much necessity of saying anything about it. There are very few farmers who are alive to their best interests who do not realize and know the benefits of cutting their coarse fodder. and also hav when it is not plentiful.

The Ross Cutter is guaranteed by the manufacturer to do twice as much work in a given time as any ensilage cutter, having the same length of knives, in the United States.

ROSS CUTTERS

SOMETHING NEW. THE PERFECTION FUMIGATOR.

For use in Greenhouses, Graperies, Hotbeds, Poultry Houses, Etc.

This fumigator is made of heavy galvanized iron, and is strong and durable. It is well made and neatly finished. It is composed of two cylinders of galvanized iron—one a little smaller in diameter than the other, and fitted inside of it. The space between the two, and surrounding the inner one, is to be filled with water. The inner one is to hold the tobacco stems. It is so arranged that a hose or pipe may be attached to convey the smoke and fumes to hot-beds.

HUDSON HOSE MENDERS.

Hudson Hose Menders are especially adapted for family use. They are made in three sizes for ½-inch, ¾-inch, and 1-inch hose. Each box contains 1 pair Plyers, 6 Tubes, and 20 Bands. The pliers are of refined iron, nicely japanned. The tubes are of sheet brass, and the bands of best malleable brass wire. The device is SO SIMPLE A CHILD CAN USE IT.

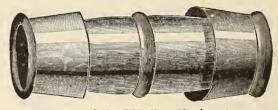

. . . NET CASH PRICE 75 CENTS PER BOX. . . .

Hose can be mended or couplings fastened on more securely than with any other device.

Screw menders will tear the lining from the hose, ours will not. Every person who uses hose should have one of these boxes. We furnish extra parts when wanted.

THE "SIMPLEX" HOSE COUPLING AND MENDER.

No Bands or Clamps required.

The "SIMPLEX" Hose Mender.

The Simplex Hose Coupling and Mender. No Bands or Clamps required. The best coupling ever placed upon the market. Warranted to stand any Hydrant Pressure. Waste no valuable time or money over useless bands. The Simplex holds without. The Simplex can be pushed into place as easily as the ordinary coupling, and once in is there to stay. The cone ends, being undercut, form a perfect anchor, embedding themselves in the rubber tube, and cannot be blown out under any hydrant pressure. For steam hose it has no equal.

NET CASH PRICE LIST.

Simplex Hose Menders, 1/2 or 3/4 inch, per doz., 75 cts.; each, 10 cts. Simplex Hose Couplings, 1/2 or 3/4 inch, per doz. sets, \$1.00; per set, 15 cts.

The "SIMPLEX" Hose Coupling.

NEPTUNE HOSE NOZZLES.

Made of Hard Rubber with soft Rubber tip. By the pressure of the finger on the tip it makes a spray nozzle particularly adapted to Florists' use.

Price, 35 cts, each. By mail, 40 cts.

LAWN MOWERS OF ALL KINDS REPAIRED. Send Machines to us early and avoid the rush.

"White Mountain" Refrigerators.

Style of "White Mountain" Pine Refrigerator.

The illustration represents our "White Mountain" Pine Refrigerator, No. 108. This pattern is a favorite for large families. It has two distinct and separate apartments for provisions, each furnished with a lock and key. It is deep enough to hold several rows of dishes, and the large capacity of the ice box also gives room for extra storage. It is painted and grained to imitate antique oak. Has handsome metal trimmings of new design, and strong metallic shelves of improved pattern.

They have positive dryness.

They have the best and latest scientific method of Cold Dry Air Circulation.

They are economical in the use of ice.

They preserve food perfectly. They are odorless and free from impure and musty air. The Metallic Shelves are very strong, and contain no folds or crevices where dirt can hide. These shelves are suitable for holding small articles as well as large, and they allow the air to circulate freely through the provision chamber.

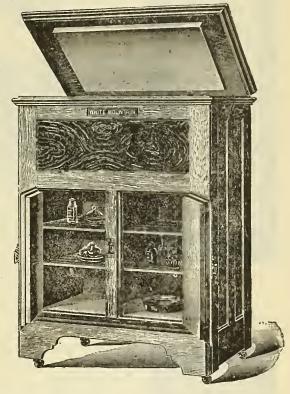

Our Patent Trap positively prevents all odor from the overflow from working back into the ice chamber.

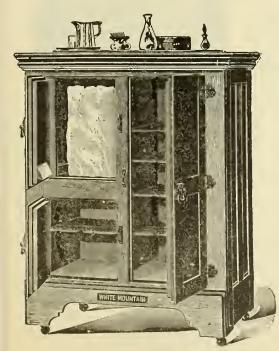

They have the dead air space, which, with the felt packing, makes the best non-conductor for the purpose.

The floors to the provision chambers are flush with the door sills, making them easy to clean.

Ice racks are made of heavy galvanized iron. All of the ice chambers are of extra size, being very deep, owing to their peculiar construction.

J. B. & Sons' Lbs. Ice. Length. Depth. Height. Mfg.'s Price. Cash Price. 39 in. 24 in. 50 in. \$25.00. \$18.75.

Style of "White Mountain" Pine Refrigerator. No. 125.

The illustration represents a very popular style of our "White Mountain" Pine Refrigerator, preferred by some dealers to any other. They are made from well-seasoned pine, handsomely grained to imitate oak. More shelf room can be had in this style of Refrigerator than in any other, and we highly recommend this property. and we highly recommend this pattern for convenience and economy. We guarantee it to give perfect satisfaction.

The Owosso Spring Adjustable Window Screen

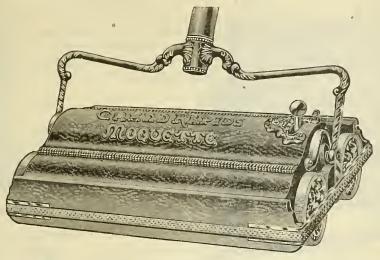

The Owosso Spring Adjustable Window Screen has become a leader in the market over all other screens and is conceded by all to be the best; it being the most perfect screen in the market. The wings are operated by coil springs and are made adjustable by means of steel rods screwed into them, which also preven s them from warping or splitting. One imporant feature about all of our screens is that they adjust on a wire rod which prevents all possibility of their binding.

Packed one dozen in a crate.

Clothes Wringers.

These Wringers are made expressly for us by one of the largest and most reliable manufacturers in the United States. In answer to our inquiry as to the quality of the goods they were furnishing on our orders, they advised us as follows, viz:

ERIE, PA., June 21, 1893.

Gentlemen:

In answer to your inquiry of recent date, would say that we use the Genuine Patent Rolls, Vulcanized to the Shaft, in all wringers of our manufacture, the very best rolls known to the wringer business. All materials used in our wringers are of the best quality, and the workmanship and finish are not surpassed by any similar goods in the market. We aim to make the best goods known to the trade.

Yours respectfully,

LOVELL MFG. CO., Ltd.

Spraying Pumps.

The Aquapult is made of brass, portable, and is the best pump in the market for spraying plants and shrubs. For grapevines the Knapsack Sprayer is conceded the best. Send for circular descriptive of Spraying Pumps.

Factory: MIDDLETOWN, CONN.

Copper Knapsack Sprayer, Net price, \$14.00.

Pump, Net price, \$4.50.

Branch Warehouses, \{ 85 and 87 John Street, NEW YORK. \\ 197 Lake Street, CHICAGO, III See Special Offers on third page of cover.

Barrel 16 in. x 11/2 in. diameter

THE PERFECTION FORCE AND SPRAY PUMP.

Patented January 3, 1893, and July 31, 1894.

The Wonder of the Age. Is semi-automatic, and throws a solid stream of fine spray. Warranted superior to any other Spray Pump in existence or money refunded.

Price of Pump complete (including $2\frac{1}{2}$ feet Hose, Discharge Pipe and Brass Spray Nozzte) with Brass Cylinder, Brass Valves and Brass Air Chambers, \$4.00; all Brass, \$5.00.

The only Pumps made without Stuffing Boxes, Rubber Valves, Leather or Packing of any kind about them. Can be used in Tank, Pail, Barrel (through the bung hole), or wherever you choose, as they require NO foot brace or fastening in any shape or manner. Each Pump has automatic mixer.

THE CORNELL UNIVERSITY COLLEGE OF AGRICULTURE.

ITHACA, N. Y., Feb. 7, 1895.

Gentlemen, — I have given the Perfection Pump a thorough trial and find that it is a very handy machine to use for throwing water and spraying solutions. The spray thrown by the nozzle is very good. The spring arrangement has decided advantages (as it causes the pump to adhere and stay in position where ever used, and does away with the foot stirrup and other fastenings so annoying to the operator). I thank you for allowing us to test the pump, and it is now placed on exhibition with other spraying machines.

Yours very truly,

E. G. LODEMAN.

JOSEPH BRECK & SONS, Sole Agents, BOSTON, MASS.

DEAKIN'S SYRINGES AND PUMPS.

Embracing 27 Varieties in prices ranging from \$1.20 to \$9.00. For use in the Greenhouse, Forcing House and Garden. Special Syringes and Pumps for Spraying Purposes.

Sold by all Seedsmen.

During the past year we have built a new factory at our present address, and have increased facilities for this s, acial work.

MANUFACTURED BY

The Acme Pump. ROBERT T. DEAKIN & CO.,

Ogontz, Montgomery Co., Penn.

We sell the Deakin Syringes exclusively, and offer them at the following Net Cash Prices:

Hotchkiss Bros.' Insect Powder Distributor.

REASONS why the Distributor is the best machine ever offered to the fruit growers and farmers.

1st. It has three necks attached to the barrel. The powder falls in and out as the barrel revolves, making it impossible for the powder to clog.

2d. The machine feeds so perfectly that a small boy can use it and be sure to do the work with success.

3rd. The machine is the only one that has an outlet sufficient to poison two rows of potatoes at once with success.

4th. The Distributor has a pocket in front of the fan; should a small amount of powder fall back when the machine is used elevated it drops in the pocket, this keeps the powder from falling in the fan chamber then on the operator.

Hellebore Insect Powder, Flower of Sulphur Bordeaux Mixture, London Purple or Lime, can be distributed better and more economically than in any other way. Pat. U. S., Oct. 17, 1893; May 8, 1894. In Canada, Jan. 8, 1895.

Act Cash Price, \$5.00 each.

THE LENOX SPRAYER!

IMPROVED 1896.

No more excuse for poor crop.

Everybody Sprays and You Want to.

FOR

TOBACCO WORMS,

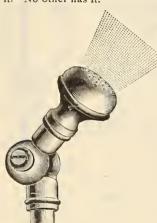

ORCHARD, GARDEN,

Grape and Small Fruit Culture.

Sprays like a mist. Turn nozzle up, you can spray 15 feet high. To stop the spray, release pressure of thumb.

From past season's experience, that Paris Green must be mixed, we again put our Patent Agitator in our Sprayers. A flexible blade sweeps bottom, mixes it as you walk. Settling of the poison impossible. When buying our Improved Lenox see that the agitator is in it. No other has it.

The LENOX IMPROVED BRASS EXTENSION three feet long, with the TURNABLE LENOX NOZZLE; turns at any angle.

Packed in a neat box 12 inches long. Can go by mail.

Tobacco worms, cabbage maggots, etc., feed on the underside of the leaf. Always hold Extension Tube down to the ground with nozzle turned up. It works very nice.

LEGGETT'S PARIS GREEN OR DRY POWDER GUN.

The distribution of the powder can be so easily regulated that a half pound or a pound of Pure Paris Green or London Purple may be evenly distributed over an acre of Potatoes. By leaving only a slight opening in the slots at the bottom of the reservoir, the faintest smoke of powder can be forced from the gun.

Hellebore, Insect Powder, slug shot, flower of sulphur or lime can be distributed better and more economically than in any other way.

Price, . . . \$7.50 each.

Circulars mailed on application.

DUTTON'S ASBESTOS TORCH. SAVE YOUR TREES! DESTROY THE CATERPILLARS.

Saturate with kerosene oil, light and hold under the caterpillars' nests, and pass quickly along the branches and around the trunk of the tree where the insects lodge. The great heat instantly destroys the insect, and will in no way injure the tree.

Price, 50 cents each.

WELL SUPPLIES.

BAY STATE CUCUMBER-WOOD PUMP.

The genuine Bay State Pump has already received a favorable introduction among our best customers, and during the present year we shall spare no pains or expense to make it the best Cucumber-Wood Pump in New England.

A NEW INVENTION

... Avoid Accidents!

The Detroit Sure-Grip Steel Tackle Block

will hold load at any point without fastening the rope. The wedge-shaped brake has a double grip, and is absolutely automatic and reliable. The heavier the load the better the grip. They are universally admitted to be the greatest improvement ever made in tackle blocks. In many instances fully half the cost of handling can be saved. They are the best and cheapest, because the same amount of money invested in ordinary tackle blocks will not begin to give the same amount of service.

The price of the Sure Grip is practically nothing over the

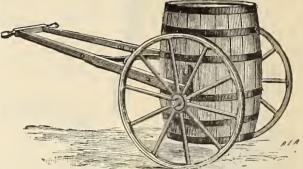

ordinary block of same quality. Send for full descriptive folder.

WATER-BARREL TRUCK.

The Water-Barrel Truck is designed for carrying water to the garden or lawn, and will be found of great service during the hot summer months. By its use the flower garden and lawn can be kept well watered with an expenditure of very little time and labor, and instead of the lawn or garden becoming burned and dried up by the scorching sun, the few minutes spent in the morning or evening watering will be amply repaid by the fresh and beautiful appearance of both flowers and grass. Considering the innumerable purposes for which this truck is adapted, it becomes indispensable after once using. The barrel can be raised from the ground, carried to the place desired, and instantly detached, all without handling.

Net Price. Truck complete with Barrel, \$10.00 net.

Anderson's Composite Swivel Window Screens

Patented August 11, 1885.

THE ANDERSON INVISIBLE WEATHER STRIP.

It consists of the parting-bead (A—see cut) covered on both sides with felt, and strips of coated felt cemented

on the top rail of upper sash (B), between the sashes at centre of window (C), and on the bottom rail of lower sash

They render the window, when

closed, absolutely dust and weather proof, besides being

invisible, and preventing all rattling of windows.

This system of weather stripping is decidedly better than double windows, very durable and materially lessens the consumption of fuel.

The atmosphere having no effect whatever upon the cement used, it will never harden, thus preventing all possibility of the goods peeling off.

They are invariably recommended by architects and others who have used them.

The price for fitting an ordinary dwelling house is two dollars per window. Manufactured by WM. G. ANDERSON, 446 TREMONT ST., Boston. Telephone No. 811.

Not included in our Special Offers.

PLEASE READ THIS BEFORE MAKING UP YOUR ORDERS.

SPECIAL ÖFFERS.

CARRIAGE PAID OR 10 PER CENT. DISCOUNT ALLOWED.

We make the following offers on all orders made up from our ANNUAL CATALOGUE FOR 1896, at the net cash prices therein stated (except as noted), SENT US BY MAIL OR EXPRESS, ACCOMPANIED BY CASH.

OFFER No. 1.

We will send GOODS PREPAID by Mail, Express, or Freight, as we may deem advisable, TO ANY CITY OR TOWN IN NEW ENGLAND.

OFFER No. 2.

We DELIVER ALL MAILABLE goods, including Vegetable and Flower Seeds quoted, by packet, ounce, pound, pint or quart; also Bulbs (except Caladiums), to any POST-OFFICE in the United States.

OFFER No. 3.

On all orders WHERE CUSTOMERS PAY TRANSPORTATION CHARGES THEMSELVES we will allow A DISCOUNT OF TEN PER CENT.

PLEASE REMEMBER.

That orders sent in early SECURE THE FIRST SELECTIONS.

That our SPECIAL OFFERS are POSITIVELY LIMITED to ORDERS BY MAIL or EXPRESS ACCOMPANIED BY CASH, postal note, draft on New York or Boston, stamps, express or post-office money order.

Thut "Special Offers Nos. 2 and 3" are especially advantageous to PARTIES LIVING OUTSIDE of New England; when goods are not mailable, in a majority of cases the 10 per cent, discount will offset transportation charges.

PLEASE NOTE.

We offer such extraordinary inducements for orders sent us by mail or express, accompanied by eash, because we can execute them in the quiet of our mail order department with promptness, dispatch, and with goods of the highest excellence, and increase the volume of our business without impairing the efficiency of its service.

BAGS. — Persons remitting with their orders should include a sufficient sum to cover cost of bags necessary to contain purchase. Prices are: 1 or 2 bushels, 20 cents; 1-2 bushel, 15 cents; 1-4 bushel, 10 cents; 1-8 bushel, 8 cents. The amount charged will be refunded if bags are returned in good condition free of expense to us, within one month from date of purchase.
