**Wiki Loves Earth** is an international photography competition that took place in 2014, with **natural heritage** as a subject.

The aim of the contest is to collect pictures of natural heritage sites and gardens, such as nature reserves, nature / landscape conservation areas, natural parks, scenic / landscape areas, remarkable gardens, etc. Like **Wiki Loves Monuments**, official lists were used of natural heritage sites and gardens, usually available from government agencies.

The focus is not only on sites of national importance, but also on those protected at the regional level, and on the widest variety of natural sites possible: forests, parks, gardens, rocks, caves and whatever is protected in a country. This means that most users are able to find several natural heritage sites close to them.

The contest is aimed at collecting these pictures of natural heritage sites to illustrate articles in the world wide free Internet encyclopaedia Wikipedia and other Wikimedia Foundation projects. The idea of Wiki Loves Earth was born in April 2012 during a discussion between representatives of Wikimedia Ukraine and Wikimedia RU.

The contest was initiated and first held (as pilot) by Wikimedia Ukraine in 2013.

In 2014 Wiki Loves Earth became international with 16 countries participating from four different continents - Europe, Asia, Africa and America. Most of countries organised the contest from May 1 to May 31, while some countries extended the contest period till June 30, and Serbia was the last to finish on July 15. During the contest over 70,000 pictures were submitted by more than 3,000 participants.

All pictures of Wiki Loves Earth are free for further use, distribution and modification under the terms of the Creative Commons Attribution-Share Alike (CC-BY-SA) 3.0 licence. Read more at <http://creativecommons.org/licenses/by-sa/3.0/>
