NOTE

Section 119 of The Loan and Trust Corporations Act (R.S.O. 1927, Chapter 223) provides as follows:—

119.—(1) No corporation shall, under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled, make, print, publish, circulate, authorize, or be a party or privy to the making, printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

DEPARTMENT OF INSURANCE

TO THE HONOURABLE GORDON D. CONANT, K.C., M.P.P.,

Minister in Charge of the Department of Insurance.

Sir:—

I have the honour to submit herewith, as required by The Loan and Trust Corporations Act, the Fortieth Annual Report of the Registrar of Loan Corporations. It shows the particulars of the business of each registered loan corporation, loaning land corporation, and trust company doing business in Ontario during 1936, as ascertained from its annual and other returns and from the inspection and enquiries made by the Chief Inspector and his staff. Detailed statements of the individual corporations are grouped herein in accordance with these three classifications recognized by the Act and are further arranged in alphabetical order. In addition, statistical tables, tabulated summaries and comparative statements are included as shown in the Table of Contents.

The annual returns of the corporations covering their 1936 business were filed with the Department at the end of February, 1937. Upon filing, each return was carefully checked and a preliminary Abstract of this Report showing assets, liabilities, revenue accounts, profit and loss accounts and mortgage summaries was prepared and issued under date of April 19th, 1937. The remaining months of the year were required to complete the annual inspection of the corporations, more particularly described later in this Report, and to determine exactly what changes and what miscellaneous notes, if any, should be made in the individual statements of the corporations as a result of such inspections. The publication of the Report at an earlier date is not feasible without a substantially augmented inspection staff.

Discrepancies may be observed between the figures shown in the statistical tables, etc., included on pages 258 to 301 and the figures shown in the statements of the individual corporations on pages 3 to 254. The latter figures include the changes

the Registrar deems necessary to be made upon a review of the Inspector's inspection reports — changes which have not been carried, by reason of the time and expense involved, into the former figures which are reprinted without change as they appeared in the preliminary Abstract of this Report published last April.

I have the following registry changes to report :

The Crown Trust Company. The Crown Trust Company with head office in the City of Montreal in the Province of Quebec, was granted initial registry by certificate dated 16th January, 1937, to transact the business of a Trust Company in the Province of Ontario.

The Premier Trust Company—The Security Loan and Savings Company, St. Catharines. An agreement between these companies dated March 24th, 1937, ratified by shareholders of both companies on the 15th May, 1937, whereby the assets and liabilities of the loan corporation were taken over and assumed by the trust company as of December 31st, 1936, was approved by an Order-in-Council dated 23rd June, 1937.

REVIEW OF 1936 BUSINESS

Introduction:

Included herein are Statistical Tables which have been used for comparative purposes in preparing the following review of 1936 business.

Loan Corporations:

Total assets of loan corporations amount to \$206,857,598.00. They show a decrease during the year 1936 of \$6,597,000 as compared with a decrease of \$6,400,000 in 1935 and \$3,000,000 in 1934. Assets of loan corporations have decreased steadily from a high of \$239,900,000 at December 31st, 1931. The current decrease is reflected particularly in the Credit Foncier Franco-Canadien Corporation's liabilities which show an approximate decrease of \$7,000,000.

Total debentures outstanding amount to \$107,300,000 of which \$79,790,000 is payable in Canada and \$27,572,000 elsewhere. They show a decrease of approximately \$300,000. Trust deposits amounting to \$31,817,000 show a decrease of \$400,000 as compared with the year 1935.

Trust Companies:

Total assets of trust companies (exclusive of those held for estates, trusts and agencies) show an increase of \$13,000,000 over the previous year which is in contrast to a downward trend since 1930. Total assets held for company funds amounting to \$57,900,000 showed an increase of \$2,800,000 while total guaranteed fund assets amounting to \$140,900,000 increased by \$10,200,000. Of the \$13,000,000 increase in trust companies assets \$7,900,000 is attributable to The Eastern Trust Company being registered in Ontario in 1936. Collateral Loans held for company and guaran-

ted funds have increased by approximately \$7,200,000 which no doubt is due to the higher rates of interest obtainable on call loans as compared with other classes of investments. Trust Deposits increased by \$2,000,000 while guaranteed investment receipts increased by \$8,200,000. These increases are no doubt attributable to the higher rates paid by trust companies as compared with those paid by banks. Of the \$8,200,000 increase in guaranteed investment receipts \$6,600,000 is due to the Eastern Trust Company which was registered in Ontario in 1936.

Estates, Trusts and Agencies:

As in previous years, total assets under administration in this section have continued their upward trend, having increased \$98,000,000 in 1936 to a total of \$2,341,000,000 reflecting the public's continued confidence in trust companies.

Mortgage Loans:

Mortgages held by loan corporations in Ontario and elsewhere amount to \$151,600,000 while those of trust companies amount to \$85,100,000. Interest due and unpaid on such mortgages amounts to \$3,600,000 and \$4,600,000 respectively. These figures for loan corporations represent a drop of \$2,850,000 in principal and a decrease of \$3,300,000 in interest due and unpaid. Trust companies' holdings show an increase in principal of \$250,000 in company funds and \$625,000 in guaranteed funds, and a decrease of \$350,000 interest due and unpaid in company funds and \$1,120,000 in guaranteed funds.

The increase in mortgages held by trust companies is due to those held by the Eastern Trust Company.

The popularity of mortgages as an investment for loan and trust company funds has declined in recent years. This is directly due to the abnormal economic conditions prevailing, moratorium legislation, higher taxes, and uncertain real estate values. All these factors have combined to create a general feeling of uncertainty in respect of mortgages and have hampered the carrying out of contracts between mortgagors and mortgagees. In preference to mortgages, therefore, funds for investment have been diverted to other channels representing investment of a more liquid character. The latter class of investment has enabled the companies to meet demands for liquidation of debentures and guaranteed investment receipts and have ample funds available for any increase in withdrawals from savings accounts.

Under normal circumstances, repayments of principal, operating to reduce the total mortgage investments, are more than offset by new loans and renewals. Under the present conditions, accumulation of charges such as taxes, insurance, etc., paid by companies in protection of their investments together with the small number of new loans made, are more than offset by these repayments and the voluntary writing down of book values and transfers of foreclosed properties to real estate.

The steady decrease in mortgage investments of loan and trust corporations continued during 1936. The decrease is equally noticeable in both Eastern and Western Canada, although as noted before, the curtailment of loans on real estate did not occur in Eastern Canada until 1932, while in Western Canada, the downward trend commenced as early as 1930. However, when economic conditions did begin to influence the Eastern mortgage situation, the effect was more rapid and severe than was experienced by Western loans earlier in the period of stress. During the past two years (1935 and 1936) the downward trend in Eastern Canada and the downward trend in Western Canada appear to be on a more comparable basis.

In my Report last year I included a schedule showing the amount of principal and interest, respectively, falling due on Ontario mortgages held by life insurance companies, loan corporations and trust companies in each of the years 1933, 1934 and 1935, with the amounts actually paid in cash thereon during those years. The schedule also showed the percentage of total repayment to amounts falling due. While the percentage of principal repayments to principal amounts falling due showed improvement from 20.47 per cent. in 1934 and 26.29 per cent. in 1933 to 29.56 per cent. in 1935, the percentage of interest payments to interest falling due for 1935 showed only a slight improvement over 1934, and a decrease below the year 1933. The interest payment percentages were as follows:— 1935, 83.53 per cent.; 1934, 82.66 per cent.; 1933, 86.78 per cent. This data was compiled from information obtained in answer to a special questionnaire sent to companies during those years. As the questionnaire was discontinued last year, there are no current years figures to report.

Office Premises:

The total investment in permanent housings for the operation of loan and trust corporations amounts to \$12,639,000 which shows a decrease of \$380,000 due to the customary write downs in respect to depreciation.

Real Estate Held for Sale:

Real estate holdings of loan corporations amounting to \$10,145,000 increased by \$1,595,000 in 1936, while trust companies' holdings amounting to \$8,760,000 showed an increase of \$1,610,000 making a total increase of \$3,205,000 in respect to both loan and trust corporations. This increase is \$905,000 greater than that reported for 1935. Excepting loaning land corporations, real estate is not permitted as a direct investment of loan corporations or trust companies and the amounts held under that heading largely represent foreclosed properties and sale agreements, including accumulated charges and interest. Companies have endeavoured to avoid foreclosure proceedings wherever possible and it is apparent that properties have been taken over only after interest has fallen greatly in arrears and other methods of maintaining the investment have failed. Loan corporations' (including loaning land corporations) holdings now represent 4.91 per cent. of total assets as against 4.01 per cent. a year ago, while trust companies' holdings represent 14.36 per cent. of total company fund assets compared with 12.96 per cent. at the end of 1935.

Collateral Loans:

The total amount of collateral loans reached a peak of \$47,700,000 in 1928 but declined rapidly subsequent to that time, reaching a low point of \$22,300,000 in 1933. In 1934 an upswing was noticeable until at the end of 1936 the total of these loans held by loan and trust corporations reached \$30,100,000. The latter figure is made up of loan corporations \$373,100; company funds of trust companies \$5,387,000; and guaranteed funds of trust companies \$24,340,050. Collateral loans of loan corporations decreased by \$55,400, while those of trust companies' company funds increased by \$469,800, and those held for guaranteed funds increased by \$6,793,000. The increase in trust companies' collateral loans is principally due to inclusion of those held by the Eastern Trust Company. Reference to the statistical tables in the Report shows that the Montreal Trust Company and The Royal Trust Company carry substantially more than 75 per cent. of all collateral loans reported to the Department.

Bonds and Debentures:

Canadian government and municipal securities, including school districts and rural telephone companies, held by loan corporations moved up \$2,500,000 to \$20,200,000 and those of trust companies increased \$1,400,000 from \$33,200,000 to \$34,600,000.

"Other Bonds" held by loan corporations decreased \$1,470,000 to \$2,025,000 while such securities held in company funds of trust companies increased \$460,000 from \$6,260,000 to \$6,720,000. Such securities held in guaranteed funds of Trust Companies increased \$4,850,000 from \$4,050,000 to \$8,900,000. The decline in popularity of mortgages as investments with consequent shrinkage in earnings has encouraged many companies to increased investments in bonds.

Stocks:

Stocks held by loan corporations increased by \$135,000 from \$10,110,000 to \$10,245,000. Those held by trust companies increased \$750,000 from \$4,150,000 to \$4,900,000. To a considerable extent this increase may be said to be due to improved rates of dividends.

Cash:

Cash of loan corporations on hand and on deposit in banks decreased by \$240,000 from \$6,450,000 to \$6,210,000. Trust companies cash on hand and in banks in company funds increased \$420,000 to \$1,772,000 while in guaranteed funds there was a decrease of \$500,000 from \$8,100,000 to \$7,600,000.

Other Assets:

All other assets of loan corporations amount to \$1,098,000 an increase of \$56,000 from \$1,042,000. Those of trust companies in company funds decreased \$290,000 from \$3,980,000 to \$3,690,000 while those held in guaranteed funds decreased \$2,300,000 from \$3,600,000 to \$1,300,000.

Earnings:

Net profit of loan corporations, excluding transfers to and from investment reserves amounted to \$3,700,000 as compared to \$3,100,000 in 1935 and \$3,700,000 in 1934. Trust companies net profits (also exclusive of transfer to and from investment reserves) increased from \$2,550,000 to \$2,725,000. In 1934 the net profits of trust companies were \$2,440,000, in 1935 they were \$2,550,000 and in 1936 \$2,725,000. Examination of the detailed figures will show that management fees in respect to estates, trusts and agencies have been a major factor in maintaining earnings of trust companies.

The net amount transferred to investment reserves (amount transferred to investment reserves less the amount transferred from investment reserves, eliminated from the above figures for the purposes of comparison of net profits) totalled \$2,010,000 for the year 1936. Of this amount \$1,560,000 was in respect of loan corporations and \$450,000 in respect of trust companies. This is a decrease of approximately \$53,000 as compared with the year 1935. Loan and Trust Corporations policy of providing for decreases in asset values by setting up investment reserves commenced in the period of depression and has continued. Many of these corporations in order to provide additional investment reserves against decreases in the value of assets have transferred substantial amounts from their contingency reserves and reserve funds. Reserve funds and contingency reserves of loan corporations as at December 31st, 1936, amounted to 54 per cent of the paid in capital of such corporations while such reserves of trust companies amounted to 60 per cent of paid in capital.

Dividends:

Loan corporations declared dividends amounting to \$2,451,000 in 1936 as compared with \$2,473,000 in 1935 while those declared by trust companies in 1936 amounted to \$1,701,000 as against \$1,638,000 in the previous year. Dividends of loan corporations represent 4.35 per cent of the shareholders' equity. Those of trust companies were 3.81 per cent. Amounts and percentages are similar to those reported in 1934 and 1935.

Liquid Position:

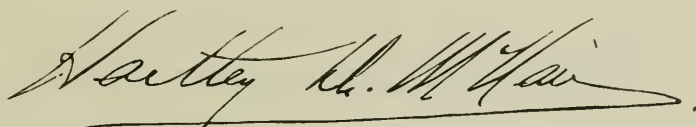

The liquid position of loan and trust corporations which accept deposits has been well maintained. Following is a comparative summary:

December 31, 1933	December 31, 1934	December 31, 1935	December 31, 1936
<u>63.28%</u>	<u>71.99%</u>	<u>67.15%</u>	<u>66.70%</u>

Mortgages and Agreements Two or More Years in Arrears of Interest:

This year there is shown in the statements of companies reported upon herein a memorandum of the amount of mortgages and agreements "two or more years in arrears of interest". It should be specially noted that these amounts actually represent

the amounts of the accounts on which both interest and charges due and unpaid are together equal to an amount not less than two full years' interest. While some of the totals shown include a number of accounts which are several years in arrears and which may have to be taken over by the mortgagees for resale, there are included also a substantial number which by reason of unpaid taxes and temporary delays on the part of mortgagors, fall within the "two or more years" category. Many of the companies have restricted their actual charging of interest to an amount not in excess of eighteen months on any one account, and many have substantial internal investment reserves which they claim to be sufficient to provide against any anticipated loss in realization.

A handwritten signature in cursive script, reading "Harry W. McLean". The signature is written in dark ink and is positioned above a horizontal line that serves as a separator between the signature and the title below it.

CONSTATING INSTRUMENTS

This corporation was incorporated under Special Act of the Dominion of Canada, 62-63 Victoria (1899), c. 101, under the name of "The Canada Permanent and Western Canada Mortgage Corporation," for the purpose of acquiring the assets and business of the Canada Permanent Loan and Savings Company, the Western Canada Loan and Savings Company, the Freehold Loan and Savings Company, and The London and Ontario Investment Company, Limited, which several purchases were confirmed by Special Act of Ontario, 63 Victoria, 1900, c. 129. The name

CANADA PERMANENT MORTGAGE CORPORATION—Continued

was changed to the "Canada Permanent Mortgage Corporation" by 3 Edward VII (1903), c. 94 (D), which Act also amended its lending powers. By 3-4 George V (1913), c. 86 (D), further amendments were made to the Incorporating Act.

Of the constituent companies, the Canada Permanent Loan and Savings Company was incorporated by declaration filed under The Building Societies Act (Cons. Stat. U.C., c. 53) in 1855, under the name of the Canada Permanent Building and Savings Society, which name was changed to the Canada Permanent Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 100.

The Western Canada Loan and Savings Company was also incorporated by declaration filed under The Building Societies Act in 1863, under the name of the Western Canada Permanent Building and Savings Society, and its name was changed to the Western Canada Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 79.

The Freehold Loan and Savings Company was also incorporated by declaration filed under The Building Societies Act in 1859 under the name of The Freehold Permanent Building and Savings Society; the name being changed to The Freehold Loan and Savings Company by 36 Victoria (Ontario), (1873), c. 104.

The London and Ontario Investment Company was incorporated by the Act of Ontario 39 Victoria, 1876, c. 62.

In 1918 the corporation purchased the assets and business of The Oxford Permanent Loan and Savings Society, which purchase was ratified by Order-in-Council of Ontario, dated July 31st, 1918, pursuant to The Loan and Trust Corporations Act.

In 1921, the corporation also purchased the assets and business of The London and Canadian Loan and Agency Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated September 23rd, 1921, pursuant to The Loan and Trust Corporations Act.

In 1927, the corporation purchased the assets and business of The Royal Loan and Savings Company, which purchase was ratified by Order-in-Council of Ontario, dated March 4th, 1927, pursuant to The Loan and Trust Corporations Act.

In 1927 the corporation purchased the assets and business of The British Columbia Permanent Loan Company, Vancouver, B.C.

In 1927 the corporation also purchased the assets and business of The Canada Landed and National Investment Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated December 30th, 1927, pursuant to The Loan and Trust Corporations Act.

CONSTATING INSTRUMENTS

1884—Letters Patent (under the Ontario Government Joint Stock Companies' Letters Patent Act) incorporating The Central Canada Loan and Savings Company of Ontario, with a capital of \$2,000,000, in 20,000 shares of \$100 each, dated 7th March, 1884.

1890—Act (of the Legislature of the Province of Ontario), 53 Vic., c. 129; declares capital to be \$5,000,000, in 50,000 shares of \$100 each; confirms the purchase of the assets of the Peterborough Real Estate Investment Company, Limited; authorizes the issue of debenture stock; authorizes agencies in the United Kingdom; defines the limit of borrowing powers.

1893—Supplementary Letters Patent (of the Province of Ontario), dated 8th June, 1893, extending the Company's purchasing and lending powers with regard to bonds, stocks and debentures to the Province of Manitoba.

1896—Act (of the Legislature of the Province of Manitoba), 59 Vic., c. 33, authorizes Company to exercise in the Province of Manitoba, with respect to real and personal property, all the rights, powers and privileges that it possesses in Ontario.

1897—Supplementary Letters Patent (of Ontario), dated 6th May 1897, amending the original Letters Patent by expunging therefrom powers of Company to buy and sell land.

1898—Act (of the Parliament of the Dominion of Canada), 61 Vic., c. 97.

1899—Act (of the Legislature of the Province of Manitoba) authorizing Dominion Company to exercise in Manitoba all its rights, powers and privileges; defining the powers of the Company and vesting all the assets of the old company in the new company.

1900—Act (of the Legislature of the Province of Ontario), confirming and validating the conveyance and assignment of 1st December, 1898 (see form of the conveyance and assignment in schedule to 61 Vic., c. 97), and transferring and vesting the assets of the Provincial Company in the Dominion Company.

--	------------

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, 9 Vict., c. 90 (Province of Canada), by declaration filed on 27th March, 1847, with the Clerk of the Peace for the Western District. The original corporate name was "The Port Sarnia Building Society." The society was reorganized as "The Lambton Permanent Building and Investment Society" under the said Act and other Acts, all of which became consolidated as Chapter 53 of the Consolidated Statutes of Upper Canada, by declaration filed 19th June, 1855, with the Clerk of the Peace for the County of Lambton. This latter corporate name was changed by Order-in-Council, 4th June, 1880, to The Lambton Loan and Investment Company.

The lending and the borrowing powers are governed by The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

CONSTATING INSTRUMENTS

Incorporated by an Act of the Legislature of the Province of Ontario, 1 Edward VIII (1936) Chapter 77 being "The Niagara Falls Loan and Savings Company Act, 1936" of which notice of approval was published in the Ontario Gazette in the issue of May 23rd, 1936.

The said Act vested in, and directed to be held by, the said Company, all the assets, property, real and personal, cash on hand and in bank, Mortgages, agreements for sale, rights, claims, debts owing to the Association, business or undertaking of the Association, theretofore belonging to or vested in the *Niagara Falls Building, Savings and Loan Association*, and all its interest in the same, and further provided that the said Company assume and pay the liabilities of the said Association other than its liabilities to its shareholders, which are dealt with in the said Act.

The lending and borrowing powers of the Company are now governed by The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, Consolidated Statutes of Upper Canada, c. 53, by declaration filed in the office of the Clerk of the Peace for the County of Middlesex, 26th September, 1870. The original corporate name was The Ontario Savings and Investment Society.

By Order-in-Council of Ontario, dated 4th October, 1879, and also by Order-in-Council of Canada, dated 29th October, 1879, the corporate name was changed to The Ontario Loan and Debenture Company.

The Company as now constituted was formed under the provisions of The Loan Corporations Act of Ontario by The Ontario Loan and Debenture Company, taking in by amalgamation

THE ONTARIO LOAN AND DEBENTURE COMPANY—Continued

the Agricultural Savings and Loan Company under Order-in-Council dated 10th November, 1911, and operates under The Loan and Trust Corporations Act, R.S.O. 1927, chapter 223.

By Order-in-Council of Ontario, dated 12th March, 1930, 20,000 shares twenty per cent. called and paid were converted into 4,000 shares fully paid, the authorized capital thereby being reduced from 100,000 to 84,000 shares.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company. Decl. Book II, p. 57.

Letters patent of Canada (6th April, 1883) incorporating the Company under The Canada Joint Stock Companies Act, 1877, with the corporate name of The Real Estate Loan Company of Canada, Limited,—Lib. 85, folio 282, Office of the Registrar-General of Canada. The capital authorized by this instrument was \$2,000,000, being the capital of the said The Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said The Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J. S. Co's. Act, 1877) and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V. c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from \$2,000,000 to \$1,600,000.

1913. Act of the Dominion of Canada, 3-4 George V, c. 184, increasing capital stock to \$2,000,000 in shares of \$100 each par value.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act (Consol. Stat. U.C., c. 53), by declaration, dated 12th March, 1870, and filed with the Clerk of the Peace for the County of Lincoln on the 21st March, 1870. The original corporate name was The Security Permanent Building and Savings Society of St. Catharines.

The corporate name was changed to The Security Loan and Savings Company, St. Catharines, in 1876 by 39 Vic., c. 64 (D); and also by Order-in-Council of Ontario, dated 18th August, 1876.

The authorized Capital Stock was increased from \$300,000 to \$500,000 on the 29th June, 1911. This increase was approved of by Order-in-Council of Ontario, dated 12th July, 1911.

The authorized Capital Stock was further increased from \$500,000 to \$1,000,000 on the 9th March, 1916. This increase was approved of by Order-in-Council of Ontario, dated 14th March, 1916.

The lending and the borrowing powers of the Company are governed by The Loan and Trust Corporations Act, R.S.O. 1927, Chap. 223.

CONSTATING INSTRUMENTS

This Company was, under the provisions of The Loan Corporations Act, formed by the amalgamation of The Building and Loan Association with The Union Loan and Savings Company.

The agreement for the amalgamation of these companies under the new corporate name of The Toronto Mortgage Company was executed by both companies on the 27th September, 1899; was ratified by the shareholders of the respective companies on the 15th November, 1899, and was assented to by the Lieutenant-Governor of the Province of Ontario by Order-in-Council, dated 15th December, 1899.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act (R.S.O. 1887, c. 169), by declaration filed with the Clerk of the Peace for the County of Carleton, on the 24th June, 1890. (Decl. Book II, 119). The Company, for purposes of distinction, ordinarily uses the words "of Ottawa" as part of its corporate name, but these words do not appear in the declaration of incorporation.

The lending and the borrowing powers are governed by The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

CONSTATING INSTRUMENTS

Incorporated as "The Toronto Real Estate Investment Company" by Letters Patent of Ontario (June 15th, 1885), issued under The Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (December 29th, 1887), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (September 25th, 1889) were issued under the last mentioned Act, increasing the capital stock from \$400,000 to \$2,000,000. Further Supplementary Letters Patent of Ontario (March 30th, 1891) were issued under the same Act, conferring agency powers on the Company. The corporate name was by Order-in-Council (April 2nd, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, chap. 150; R.S.O. 1887, c. 157; R.S.O. 1914, chap. 184; R.S.O. 1927, chap. 223.

CONSTATING INSTRUMENTS

Incorporated 20th May, 1905, by special Act of the Legislature of Quebec, 5 Edward VII, chap. 78.

Amendments to charter, 9 Edward VII, chap. 114, 7th May, 1909; 5th George V, chap. 125, 5th March, 1915; 7th George V, chap. 102, 22nd December, 1916; 9th George V, chap. 125, 4th March, 1919.

Authorized by special Act of the Legislature of Ontario, 10-11 Geo. V, chap. 156, 4th June, 1920, to transact business therein as specified in Section 5 of the said Act, which enacts as follows:

“(5) The company shall be limited in respect of all business relating to property and civil rights or provincial objects in the Province of Ontario, to the powers mentioned in the schedule to The Loan and Trust Corporations Act, and shall be subject to the general provisions of the said Act and of the general public law of the said Province relating to trust companies and trusts.”

The company has a deposit in the Province of Ontario amounting to \$50,000.00.

	<u>\$ 7,282 77</u>

CONSTATING INSTRUMENTS

The British Mortgage Loan Company of Ontario was incorporated by Letters Patent of Ontario, dated October 5th, 1877 (Lib. 5, No. 52), issued under R.S.O. 1877, c. 150, which Act was continued by R.S.O. 1887, c. 157, and was as to Loan Corporations superseded by 60 Vic., c. 38 (O), now R.S.O. 1927, c. 223.

By 16 George V, c. 121, the Company was given trust company powers and its name changed to The British Mortgage and Trust Corporation of Ontario.

The lending and the borrowing powers of the Company are derived from its Letters Patent and the above public general statute.

CONSTATING INSTRUMENTS

Incorporated by declaration filed May 11th, 1885, with the Clerk of the Peace for the United Counties of Leeds and Grenville. The declaration was made by virtue of "The Building Societies Act," R.S.O. 1877, c. 164, continued by R.S.O. 1887, c. 169, and superseded by 60 Vic., c. 38 (O), now R.S.O. 1897, c. 205. See R.S.O. 1927, c. 223.

The lending and borrowing powers are derived from the above public General Acts.

By a Special Act of the Legislature of Ontario, 18 Geo. V, c. 130, the Company was granted the powers of a trust company and its authorized capital stock was increased from \$500,000 to \$1,000,000. Its name was changed to The Brockville Trust and Savings Company.

CONSTATING INSTRUMENTS

The Canada Permanent Trust Company was incorporated in 1913 by a Special Act of the Parliament of the Dominion of Canada, 3-4 Geo. V, c. 87.

Authorized by Order-in-Council (May 7th, 1913), to carry on business in the Province of Ontario as a Trust Company, pursuant to the provisions of The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

In 1927 the Company purchased the assets and business of The Brantford Trust Company, which purchase was ratified by Order-in-Council of Ontario, dated 31st day of August, 1927, pursuant to The Loan and Trust Corporations Act.

Equity in The Provident Land Co. Ltd. Carried on books at	\$	1 00
Equity in Dixon Syndicate. Carried on books at		1 00
Equity in McMichael Syndicate. Carried on books at		1 00

CONSTATING INSTRUMENTS

The Title and Trust Company was incorporated in 1905 by Special Act of the Parliament of Canada, 4-5 Edward VII, chap. 162 (Royal Assent, July 20th, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to \$75,000.00 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII, chap. 118, the Company was, upon the conditions therein specified, made admissible to registry under The Loan Corporations Act, and initial registry was granted on the 30th August, 1907.

April 18th, 1914—Amendment to charter changing name to Chartered Trust and Executor Company.

May 16th, 1919—Absorbed Guardian Trust Company.

May 1st, 1929—Special Act increasing capital from \$1,000,000 to \$2,500,000.

November 12th, 1930—Absorbed Quebec Savings and Trust Company.

CONSTATING INSTRUMENTS

The Grey and Bruce Trust and Savings Company, cited 16 Geo. V (1926), c. 123. This Act confirms the amalgamation of The Grey and Bruce Loan Company and The Owen Sound Loan and Savings Company, and constitutes the amalgamated corporation a new corporation under the name of The Grey and Bruce Trust and Savings Company, with Head Office in the City of Owen Sound, and empowers the new corporation to carry on the business of a trust company under The Loan and Trust Corporations Act.

The Grey and Bruce Loan Company was incorporated under The Buildings Societies Act, R.S.O. 1887, c. 169, as a permanent building society under the name of The Owen Sound, Grey, and Bruce Loan and Savings Company, by declaration filed with the Clerk of the Peace for the County of Grey, May 10th, 1889. The corporate name was by Order-in-Council of Ontario September 15th, 1897, changed to The Grey and Bruce Loan Company.

The Owen Sound Loan and Savings Company was incorporated under The Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Grey on the 1st April, 1889.

The date of incorporation of The Grey and Bruce Trust and Savings Company being April 8th, 1926.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Lambton, 20th August, 1889.

By Order-in-Council approved March 6th, 1907, pursuant to the provisions of Section 4 (6), cap. 27, 63 Victoria, the authorized capital stock of the Company was increased from \$500,000.00 to \$1,000,000.00.

By 18 George V, Chapter 112, the Company was given Trust Company powers and its name changed to The Industrial Mortgage and Trust Company.

By 24 George V, Chapter 79, the Company assumed the liabilities and purchased under agreement the business, assets, etc., of The East Lambton Farmers' Loan and Savings Company.

The lending and borrowing powers are governed by The Loan and Trust Corporations Act R.S.O. 1927, c. 223.

By Order-in-Council approved 22nd April, 1936, the Lieutenant Governor assented to The Industrial Mortgage and Trust Company assuming the liabilities and purchase under agreement dated 24th December, 1935, of the business, assets, etc., of The Crown Savings and Loan Company.

THE LONDON AND WESTERN TRUSTS COMPANY, LIMITED—Continued**CONSTATING INSTRUMENTS**

Incorporated on the 17th September, 1896, by Letters Patent of Ontario, issued under The Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1887, Chap. 157. See also The Loan and Trust Corporations Act, R.S.O. 1927, Chap. 223.

February 18th, 1929—Order-in-Council confirming By-law No. 14 of the Corporation to increase the capital stock from \$500,000.00 to \$1,000,000.00.

August 21st, 1929—Order-in-Council confirming By-law No. 18 of the Corporation to increase the capital stock from \$1,000,000.00 to \$5,000,000.00.

On the 10th day of September, 1929, His Honour the Lieutenant-Governor approved by Order-in-Council the removal of the Head Office of The London and Western Trusts Company, Limited, from the City of London to the City of Toronto.

By an agreement, dated the 15th day of October, 1929, The London and Western Trusts Company, Limited, of London, Ontario, purchased the assets and liabilities, business, rights, property and goodwill, etc., of The Standard Trusts Company with Head Office in Toronto, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and was subsequently approved by the Lieutenant-Governor in Council. The transfer became effective on the 18th day of December, 1929. The Standard Trusts Company had, by authority of By-law No. 35, moved its Head Office from Winnipeg to Toronto, and was granted registry in Ontario under date of October 26th, 1929.

June 28th, 1932—Order-in-Council assenting to the conversion of partly-paid shares into fully paid shares equivalent to the amount paid in on account of subscriptions not including premiums.

MONTREAL TRUST COMPANY—Continued

CONSTATING INSTRUMENTS

The Montreal Trust Company was incorporated on the 21st day of March, 1889, by Special Act of the Province of Quebec, 52 Vic., c. 72 (Q) and the following subsequent special amending Acts. 54 Vic., c. 75. 55-56 Vic., c. 78, 63 Vic., c. 77, 20 Geo. v. c. 139 and 24 Geo. V. c. 121.

By Special Acts the name was changed in 1895 to Montreal Trust and Deposit Company, 59 Vic., c. 70 (Q), and again in 1909 to the Montreal Trust Company, 9 Edw. VII, c. 115 (Q).

Authorized by Order-in-Council to carry on business in the Province of Ontario as from the 11th day of March, 1909, subject to certain conditions and limitations.

Registered in the Trust Companies Register, January 21st, 1913.

By Order-in-Council, dated February 25th, 1928, the Capital Stock was increased from \$1,000,000.00 to \$2,000,000.00.

The Company has a deposit with the Province of Ontario amounting to \$200,000.00.

CONSTATING INSTRUMENTS

The Prudential Trust Company, Limited, was incorporated in 1909 by a Special Act of the Parliament of the Dominion of Canada, 8-9 Edward VII, Chapter 124.

Authorized in 1911 by Special Act of the Legislature, 1 Geo. V, Chapter 139, to transact business in the Province of Ontario as specified in Section 1 (5) of the said Act, which enacts as follows:

“(5) The Company shall be limited in respect of all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in this Act or granted from time to time to trust companies by any Public Act or Order of the Lieutenant-Governor in Council of the said Province and shall be subject to the general public law of the said Province relating to trust companies and trusts.”

The Company has a deposit in the Province of Ontario amounting to *\$50,000.00.

In 1922, by Chap. 71, George V, 12-13, the authorized capital was increased from \$1,500,000 to \$2,000,000 representing 20,000 shares of par value \$100.

In 1930, by Chap. 70, George V, 20-21, the capital structure was altered to represent 100,000 shares of stock with a par value of \$20 a share.

In 1934 by Bill No. 11, 5th Session, 17th Parliament 24, George V, the par value of the shares was reduced from \$20 to \$10.

*Under the provisions of 1 Geo. V, c. 139, as amended by 10 Geo. V, c. 158, the deposit as security to do business in Ontario may be fixed from time to time by the Lieutenant-Governor in Council. By Order-in-Council, dated June 15th, 1920, the Company's deposit of \$200,000 was exchanged for one of \$50,000.00, the public liability in Ontario being at that time \$1,123.43 on Trust Account and \$26,167.14 of assets under administration.

PRUDENTIAL TRUST COMPANY, LIMITED—Continued

*By Order-in-Council dated 4th July, 1933, The Honourable the Lieutenant-Governor of the Province of Ontario formally approved the reduction of the amount required to be held on deposit by the Department of Insurance in respect of The Prudential Trust Company, Limited, from Fifty Thousand Dollars (\$50,000.00) to Thirty Thousand Dollars (\$30,000.00).

CONSTATING INSTRUMENTS

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q), and by 59 Vict. (1895), chap. 67 (Q), and by 63 Vict. (1900), chap. 76 (Q), 6 Edw. VII, chap. 73, 17 Geo. V, chap. 147 (Q), 19 Geo. V, chap. 116 (Q).

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII, chap. 103, to transact business therein as specified in Section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to The Ontario Trust Companies' Act, and shall be subject to the general provisions of the said Act and of the general law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to \$200,000.00.

 Briar Hill Park Syndicate. \$ 14,946 07
 Trusts Buildings Limited. 621,160 77
11. The Department inspectors report that substantial additional investment reserves should be included in this statement to show their opinion of the true and correct financial condition of the company; the management does not concur in their opinion.

CONSTATING INSTRUMENTS

Incorporated on the 24th February, 1897, by Letters Patent of Ontario, issued under R.S.O. 1897, c. 191. See Ontario Trust Company Act (R.S.O. 1897, c. 206), and The Loan and Trust Corporations Act (R.S.O. 1927, c. 223).

Amendments to Charter: December 23rd, 1897, "The Ontario Companies Act"; February 25th, 1898; "The Ontario Joint Stock Companies Letters Patent Act" and "The Trust Companies Act, 1895"; August 14th, 1900, "The Ontario Companies Act"; March 28th, 1907, "The Ontario Companies Act."

By Order-in-Council, dated January 25th, 1934, the Lieutenant-Governor in Council formally approved an agreement dated December 7th, 1933, whereby Trusts and Guarantee Company, Limited, acquired the assets and assumed the liabilities of Union Trust Company, Limited.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, 1887, c. 169, as amended by 56 Vic., c. 31 (O), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 Vic., c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company, having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

By a special Act of the Legislature of Ontario, 13 Geo. V, c. 107, the Company was granted the powers of a trust company and the name was changed to The Victoria Trust and Savings Company. (See also The Loan and Trust Corporations Act, R.S.O., 1927, chap. 223).

CONSTATING INSTRUMENTS

Originally incorporated as a Loan Corporation by Letters Patent, 7th April, 1913, under the Loan and Trust Corporations Act, 2 Geo. V, 1912, chap. 34, now R.S.O. 1927, chap. 223. The original corporate name was The Waterloo County Loan and Savings Company.

By a special Act of the Legislature of Ontario, 12-13 Geo. V, c. 148, the Company was granted the powers of a trust company and the name was changed to the Waterloo Trust and Savings Company.

Quarterly Statements

OF

DEPOSITS

AND

Securities on Hand and Available for Depositors

FILED BY

Loan and Trust Corporations

DECEMBER 31st, 1936, TO JUNE 30th, 1937, INCLUSIVE

Pursuant to Sections 45 or 18a (3) of the Loan and Trusts
Corporations Act.

Sec. 45. Every loan company receiving deposits shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada less any incumbrances thereon and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon and the bonds or debentures issued by any incorporated company in respect of which bonds or debentures annual or semi-annual subsidy payments sufficient to pay both principal and interest thereof are, by virtue of any general Act of the Dominion of Canada, payable by the Government of the Dominion of Canada to a trust company as trustee for the holders of such bonds or debentures, and the principal amount of any moneys payable to the company on demand the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this section mentioned as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return on hand and available for depositors.

Sec. 18a.—(3) Every trust company receiving deposits in the manner authorized by subsection 3 of section 18 shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit, and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon, and the bonds or debentures issued by any incorporated company in respect of which bonds or debentures annual or semi-annual subsidy payments sufficient to pay both principal and interest thereof are, by virtue of any general Act of the Dominion of Canada, payable by the Government of the Dominion of Canada to a trust company as trustee for the holders of such bonds or debentures, and the principal amount of moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this subsection mentioned, as the said amounts stood at the end of the last preceding month, and including in such statement all such cash and securities and loans as defined in this subsection, whether owned by the company or held by it as guaranteed investments under the provision of subsection 2 of section 17, or subsection 4 of section 18, and stating that the same were at the date mentioned in such return on hand and available for depositors.

FOR THE

PROVINCE OF ONTARIO

FOR THE TWELVE MONTHS PERIOD

April 1st, 1935 to March 31st, 1936

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 8

ONTARIO

TORONTO

Printed and Published by T. E. BOWMAN, Printer to the King's Most Excellent Majesty

1937

To:
THE HONOURABLE HERBERT ALEXANDER BRUCE, R.A.M.C., F.R.C.S., (Eng.),
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

As required by law, I submit for the information of Your Honour and the Legislative Assembly, the Report of the works under the control of the Public Works Department, comprising the reports of the Deputy Minister, Architect, Engineer, Secretary and Accountant, for the twelve months' period, April 1st, 1935, to March 31st, 1936.

Respectfully submitted.

T. B. McQUESTEN,
Minister of Public Works.

Department of Public Works, Ontario,
Toronto, January 19th, 1937.

REPORT

OF THE

Deputy Minister of Public Works

HONOURABLE T. B. McQUESTEN, K.C., B.A., LL.B.,
Minister of Public Works and Highways, Ontario.

Sir,—

I have the honour to submit to you the accompanying reports of the branches of this Department for the year ending March 31st, 1936.

ARCHITECT'S BRANCH

The work of this branch for the year is summarized as follows:

Capital Construction:

Burwash Industrial Farm, completion of cell-block; custodial building; temporary boiler house and sewage disposal plant; reconstruction of electric power line from McVittie; new system from the Wanapetei River.

Properties Sold:

Toronto McMaster University.
St. William, Turkey Farm.

Buildings Wrecked:

Mimico, Victoria Industrial School, dormitory buildings and gymnasium.

Repairs, Alterations and Equipment:

Toronto, Parliament Buildings and East Block.
Toronto, Nos. 11, 15 and 39 Queen's Park Crescent.
Toronto, Highways and Provincial Police Garages.
Toronto, Liquor Control Board offices, 454 University Avenue.
Toronto, Employment Service offices, 70 Lombard Street.
Toronto, Osgoode Hall.
Belleville, Ontario School for the Deaf.
Brantford, Ontario School for the Blind.
The Various Normal Schools.
Guelph Agricultural College.
Kemptville Agricultural School.
Ridgetown Experimental Farm.
Vineland, Horticultural Experimental Station.
The Various District Buildings, including Court Houses, Registry and Land Titles Offices, Jails and Lockups, and Mining Recorder Offices.
Bowmanville, Boys' Training School.
Galt, Girls' Training School.
Brockville, Ontario Hospital.
Cobourg, Ontario Hospital.
Fort William, Ontario Hospital.
Hamilton, Ontario Hospital.
London, Ontario Hospital.
New Toronto, Ontario Hospital.
Orillia, Ontario Hospital.

Penetanguishene, Ontario Hospital.
 Toronto, Ontario Hospital.
 Toronto, Psychiatric Hospital.
 Whitby, Ontario Hospital.
 Woodstock, Ontario Hospital.

ENGINEER'S BRANCH

All work in this branch was carried out by day labour and was distributed so as to afford a maximum of relief where most needed.

Maintenance and Repair Work amounted to.....	\$ 15,596 85
Capital Expenditures (mostly construction) amounted to....	40,387 11
Total Expenditure	\$ 55,983 96

OFFICE OF THE SECRETARY

During the fiscal year, twenty-seven contracts were entered into as follows:

Fuel (15).....	\$ 74,836 92
General (12).....	54,368 76
	\$ 129,205 68

OFFICE OF THE ACCOUNTANT

	Ordinary	Capital	Total
Total Expenditure	\$ 552,120 71	\$ 259,204 25	\$ 811,324 96
Total Revenue.....	8,976 88	114,479 20	123,456 08
Net Expenditure.....	\$ 543,143 83	\$ 144,725 05	\$ 687,868 88

I have the honour to be, Sir,

Your obedient servant,

C. S. WALTERS,
Deputy Minister of Public Works.

REPORT OF THE ARCHITECT

THE HONOURABLE T. B. MCQUESTEN, K.C., B.A., LL.B.
Minister of Public Works and Highways, Ontario.

Sir:

I have the honour to report on the work done by the Architect's Branch of the Department of Public Works, Ontario, during the fiscal year—April 1st, 1935, to March 31st, 1936.

Government House.—Minor repairs have been made to roofs and to damaged plaster work in ball room. On the occasion of the death of His Majesty, King George V. the porte cochere at the entrance was draped.

Parliament Buildings.—The buildings, including the Parliament Buildings, East Block, Nos. 11, 15 and 39 Queen's Park Crescent, Highways and Provincial Police Garages, 112 College Street, and the Liquor Control Board Office Building at 454 University Avenue and the Labour Bureau Building at 70 Lombard Street have been kept in repair.

In the Parliament Buildings, the Savings Office has been moved to Room 255, and remodelled. The reception room on the second floor, west end, has been renovated and furnished complete as a dining room for members. Renewals of plumbing, piping, sanding and finishing of floors on third floor and in legislative library, and laying of linoleum on floors of government opposition lobby has been done. The oak panelling in the hallways and corridors has been thoroughly repaired and restained and finished. The top rails of lower sashes of all large windows have been repaired and strengthened with steel angle reinforcing. Many awnings have been renewed. New cold frames have been built at the rear of the greenhouses.

In the East Block, the bowling alleys which occupied the N. E. basement room, were removed to the Ontario Hospital, Hamilton, and the room was fitted up as a central storeroom for equipment and mechanical trades supplies. Repairs have been carried out in the Cafeteria to the floors, kitchen and refrigerator equipment. Dictographs were extended in the Department of Welfare and Agriculture. Changes have been made throughout several of the offices, and additional screen partitions have been erected, and shelvings supplied in vaults and in fitting up of basement storage rooms.

The driveways around the Parliament Buildings have been paved in asphalt with gutters and kerbs of concrete, in conjunction with and under the direction of the Department of Highways. The work was carried out by contract which was awarded to the Brennam Paving & Construction Company of Hamilton.

The area behind No. 11 Queen's Park Crescent has been filled in, levelled, and marked off as a paid parking area, and given under the management of the Civil Service for the cars of civil servants. The east and west courts behind the Parliament Buildings have also been marked off as paid parking areas for cars. The area, formerly the site of Nos. 1, 2 and 5 Queen's Park Crescent, has been levelled off and seeded and planted, under the direction of the Department of Highways, and opened up as a park.

The boundaries of the various parcels of land in Queen's Park and vicinity have been re-surveyed and established for the placing of permanent monuments, and these have been ordered.

A grand stand for 300 people was erected in front of the entrance of the Parliament Buildings on the occasion of the Jubilee celebrations of His Majesty, King George V. and the central part of the building and balcony were decorated.

On the death of His Majesty, King George V. the central part of the Parliament Buildings was heavily draped in black and purple. The west doorway of the East Block was also draped. The canopy behind the dais of the speaker's chair in the legislative chamber was draped in velvet and remained draped and lighted during the full period of mourning. The portrait of his late Majesty in the Council room was also draped.

The properties at Bon Air, Kingston Road; the site at the S. E. corner of Peter and Wellington Streets; and the site at the S. W. corner of Gerrard and Pembroke Streets have been listed for sale.

A number of the buildings at the Victoria Industrial School, including the dormitory buildings and the gymnasium, have been sold for wrecking, and the sites cleared. The Beverly Jones cottage on the property was fitted up as an office for unemployment relief. A portion of the land was leased for market garden purposes, and part for allotments for unemployed. The property has been listed for sale.

The property of the Alexandra School, Kingston Road, formerly the property of the Industrial School Association, has been placed under the care of this Department, and all buildings have been vacated. A record survey has been made by the Department of Highways.

The Ontario Government Exhibition Building, Canadian National Exhibition, has been inspected by this Department, and the city has carried out minor repairs asked for in terms of the agreement. The building was not used by the Ontario Government during the annual exhibition.

Liquor Control Warehouse.—Alterations were carried out for the Liquor Control Board in their warehouse at Wellington Street, Toronto. The old N. E. freight elevator was replaced by the unused elevator, formerly a passenger elevator already in the warehouse. This elevator was remodelled for use for freight, and installed by the Turnbull Elevator Company. A new central elevator fire-resisting shaft was built and a new push button electric freight elevator of 2,000 lb. capacity, with a speed of 60 ft. per minute, was installed under contract by the Otis Fensom Company.

Leaside Garage.—The warehouse purchased by the Department of Highways, at Leaside, Toronto, for the storage and repair of trucks and ploughs, has been altered and overhauled; the roof thoroughly repaired; the entrances improved; and the interior fitted up to provide heated workshop, store and office. A steam boiler has been installed and the piping connected to the existing heaters with fan blower distributor of hot air.

Osgoode Hall.—The brick boundary walls adjoining University Avenue on the west and the west portion of the wall adjoining Osgoode Street on the north were repaired, and all the loose and decayed bricks removed, and the foundations strengthened with new brickwork. Sections of the outside brickwork of the building were similarly repaired by replacing decayed brick with new. All stone copings were carefully pointed up. The building was examined by the city fire department, and recommendations to clean up basements and attics were carried out. Painting and furnishing was done in Mr. Justice Makins' room and Mr. Justice Henderson's room. At the death of His Majesty King George V the front centre of the building was draped.

EDUCATIONAL BUILDINGS

At the Normal School, Toronto, a new floor was laid in the gymnasium; minor repairs including heating and painting were done.

At the Normal School, Hamilton, repairs were made to heating, and to brickwork of boilers.

At the Normal Schools at London, North Bay and Ottawa, repairs were made to the heating systems.

At the Ontario School for the Deaf, at Belleville, repairs and decorating to the Superintendent's house were done, and repairs were made to the marble divisions in lavatories of girls' dormitory building. Repairs to the brickwork of boilers were done.

At the School for the Blind, at Brantford, new flush valves were installed and other repairs made to plumbing. An automatic underfeed stoker was installed under contract by the Livingston Stoker Company of Hamilton. Repairs and improvements to heating were carried out.

The English French Training Schools at Sandwich, Sturgeon Falls and Embrum have been leased by the Department of Education to the several school boards who will keep the buildings in repair under their agreement. The Northern Academy at Monteith has been closed, but heat has been maintained during the winter months to prevent frost damage.

AGRICULTURAL BUILDINGS

At the Ontario Agricultural College, Guelph, extensive repairs were made to roofs and gutters in the Dairy Building and Physics Building. Repairs to plaster work were made in ten separate buildings. In the Administration Building, the drains from the shower baths in the S. W. lavatories on three floors have been overhauled and new lavatory floor drains have been installed.

At the Veterinary College, repairs to the roofs were made. Sketch plans and estimates were prepared for the remodelling of the Old Dairy Building to give accommodation in the upper floor of that building for bedrooms and study rooms for a number of veterinary students.

At the Agricultural School, Kemptville, the main sewer was lifted and regraded to ensure greater fall to the septic tank. Repairs to plumbing were done and repairs to several of the farm cottages, including repapering of rooms, were also done. Nozzles for fire hose were supplied and fitted.

At the Dairy School, Kingston, repairs to roofs and windows and the boilers were done.

At the Experimental Station, Vinelands, minor repairs to plumbing and to pump at lake were done, and a number of fly screens were supplied.

DISTRICT BUILDINGS

Throughout the districts, the necessary repairs have been made to the Court House Buildings, Registry and Land Titles, Jails, Lockups and Mining Recorder Office Buildings.

At the Algoma District Court House, Sault Ste. Marie, repairs were made to plaster work, masonry and brickwork, plumbing work and to elevators. At the District Jail, improvements in heating were made. At the Jail building at Hearst, the Delco Electric System was overhauled, and the generator brought to Toronto for repairs. Window guards were supplied to cell windows.

At Cochrane, additional steel shelving was supplied and installed in the Land Titles Office.

At the Manatoulin Court House and Jail, Gore Bay, repairs were made to gutters, downpipes and roofing, and the chimneys. The heating boiler was overhauled.

At the Muskoka District Court House, Bracebridge, a new hot-water boiler was installed for the heating of the Court House; the old one having been condemned. The Jail roof has been reshingled and eaves troughs and conductors renewed.

At the Nipissing District Court House, North Bay, damage by fire to the roof was repaired. A new steel document file was supplied for the Registry Office.

At Parry Sound, extensive repairs were made to the roofs and eavetroughing of the Court House, Registry Office, Jail and Jailor's house.

At the District of Rainy River Jail, Fort Frances, a new hot-water heater tank has been installed, and hot-water piping under floors renewed.

At the Temiskaming District Court House, Haileybury, new blinds have been supplied, chimneys have been repaired. In the Land Titles Office, a new steel document file has been supplied and repairs have been made to rain water downpipes and brickwork. In the jail, the well hole on the second floor has been further protected by a horizontal metal grill.

At the Thunder Bay District, Court House, Port Arthur, plaster and roofing repairs have been made. In the jail the well hole on second floor has been further protected by a horizontal metal grill. A tenant has been put into the Wiley House to act as caretaker.

At Sudbury District Court House and Jail, the electric motors have been changed to meet the Hydro's change in power from 2-phase to 3-phase.

In all district buildings the annual inspection of boilers and heating apparatus has been made and all necessary repairs have been done.

ONTARIO HOSPITALS

Ontario Hospital, Brockville.—The new power plant was inspected by Mr. H. H. Angus, consulting heating engineer, and favourably reported on. The plant was formally turned over to the hospital engineering staff on May 15th. Alterations to steam main in old boiler house have been made. The work of remodelling Cottage 4 has been carried out by day labour and entailed the fireproofing of corridors and exit staircase equipping with fire doors. Steel fire escapes have been built at the rear of Cottages 4, 5 and 6 under a contract with the Rimmeymede Iron and Steel Company. Hose reels and radiator traps have been installed in the various cottages.

Ontario Hospital, Hamilton.—Working drawings are in course of preparation for New Nurses' Residence Building, the foundations of which are already in place.

Ontario Hospital, Kingston.—The renovation of Beechgrove has been completed and included the fitting up of X-ray room, reconstructing of operating theatre and providing and fitting up a mortuary. The Men's Ward under the Assembly Hall in the Main Building has been made fire resisting and the room provided with fire doors at exits. Open electric wiring in tunnels of Main Building has been overhauled and put in conduit. No. 4 boiler was retubed.

Ontario Hospital, London.—A heating apparatus consisting of a used boiler and used piping has been installed to protect the foundations of the new building for patients. The working drawings of this building are being proceeded with.

Ontario Hospital, Orillia.—Plans have been prepared for fireproof exit stair to Cottage L and the work begun by day labour. The work consists of taking out an

existing wood stair and replanning space to provide staff and utility rooms and exit fireproof stair for patients from the wards on three floors. Repairs have been made to power house radial stack. The exterior of the Infirmary Building has been painted. The effluent from this sewage plant has been treated by chlorination during the summer months, pending the providing of a sludge bed.

Ontario Hospital, Penetanguishene.—The ceiling of the Assembly Hall was made fire-resisting and a new wood floor was laid in this room and the lighting system there remodelled in accordance with the Hydro requirements. Extensive repairs and reshingling was done on the barn roofs.

At the Criminally Insane Building, new steel clad doors were installed at all exits from east and west stairways into yard. The brickwork openings were narrowed at west end doors to provide single leaf doors in place of double leaf.

Ontario Hospital, Whitby.—The trusses supporting the overhead coal hoppers in the boiler house have been renewed where former were weakened by chemical action. The steel track hopper which conveys the coal from the railway trucks to the coal vault was also renewed. The work was done by contract.

Extensive repairs were made under contract to the shingled roofs of the Main Barn and the Horse Barn.

Ontario Hospital, Fort William.—This property, formerly the Industrial Farm. Fort William, was acquired for hospital purposes by the Department of Health early in February. Plans were prepared to adapt the prisoners' dormitory building to the housing of patients. The remodelling shows two large dormitories for a total of 56 beds, a hospital ward for 6 beds and 7 single rooms, a day patients' room, patients' dining room, continuous bath unit of 3 baths, staff dining room, kitchen, bakery, stores and refrigeration rooms and maids' sleeping room. The work is being carried out by day labour with all available materials shipped from stores.

The building is of frame construction on a foundation of concrete with floor also of concrete and is heated by steam with the boiler in the basement which is fireproof.

There are three separate frame residences for staff and one staff building for attendants.

Improvements to sewage treatment and water supply were completed.

Ontario Hospitals, Generally.—It was found that a considerable quantity of mechanical equipment and supplies for steamfitting, plumbing and electrical trades were in the stores at the various hospitals and that more economical use of this material could be made by redistributing it from a central store for the use not only of the hospitals but of all Government buildings. With this in view, careful inventories were made and all surplus equipment and supplies were brought to a central stores in the Parliament buildings. These materials are distributed on requisition and considerable saving in the purchase of new materials has resulted.

For the Department of Health, the following have been reported on :

Brantford, Brant Sanitarium.
Cobourg, General Hospital.
Chatham, General Hospital.
Guelph, St. Joseph's Hospital.
Freeport, Freeport Sanitarium.
Gravenhurst, Muskoka Hospital for Consumptives.
Hawk Junction, Red Cross Society Hospital.
Hamilton, Mountain Sanitarium.
Kirkland Lake, District Hospital.
Kitchener-Waterloo, General Hospital.

London, Byron Sanitarium.
 Picton, Prince Edward Hospital.
 Ottawa, St. Joseph's Orphanage Home.
 Sioux Lookout, General Hospital.
 Sarnia, General Hospital.
 Toronto, Western Hospital.
 Toronto, 56 Isabella Street, Private Hospital.
 Toronto, 515 Jarvis Street, St. Mary's Hospital.
 Toronto, 862 College Street, Private Hospital.
 Toronto, 869 College Street, Private Hospital.
 Toronto, 10 Homewood Ave., Homewood Rest Home.
 Toronto, 17 Wellesley Street, Rest Home.
 Toronto, 43 Wellesley Street, St. Margaret's Rest Home.
 Toronto, 129 Havelock Street, Private Hospital.
 Toronto, 89 Charles Street, East, Elmhirst Private Hospital.
 Toronto, 89 Prince Arthur Ave., Private Hospital.
 Toronto, 76 Hayter Street, Nursing-at-Home Mission.
 Toronto, 626 Church Street, Private Hospital.
 Toronto, 123 Isabella Street, Private Hospital.
 Chesley, Ann Buckley Hospital.
 Campbellford, Private Hospital of Dr. E. A. Stuart.
 Cornwall, Hotel Dieu Hospital.
 Geraldton, Little Long Lac Private Hospital.
 Gravenhurst, Private Hospital.
 Hearst, St. Paul's Hospital.
 Hawkesbury, Private Hospital of Dr. E. P. Kelly.
 Hanover, Hanover Memorial Hospital.
 Lindsay, Ross Memorial Hospital.
 Niagara Falls, Lundy's Lane Private Hospital.
 Ottawa, Ottawa Civic Hospital.
 Northwestern Ontario District, Mental Hospital Accommodation.
 South Porcupine, Tisdale Public Hospital.
 Saltfleet, Parkdale Private Hospital.
 Aurora, St. John the Devine Convalescent Home.
 Sault Ste. Marie, General Hospital.
 Strathroy, General Hospital.

For the Department of Welfare, the following have been reported on:

Grimsby, Lake Lodge considered for Boys' Home.
 Napanee, House of Refuge.
 Hamilton, Orphanage for St. Mary's Girls' Orphans.

REFORMATORIES

Industrial Farm, Burwash.—The New Cell Blocks and New Custodial Building were completed, equipped and furnished. The buildings were occupied in October, 1935, and house 200 inmates. At the time of opening, a new telephone switch board was installed.

A temporary boiler house of frame construction was built to house two used boilers from the Ontario Veterinary College at Guelph to supply steam for heat and for kitchen.

The sewage plant has been completed and is in operation.

The electric pole line from the Hydro plant at McVittie to camp No. 2 has been overhauled under the direction of the Ontario Hydro Electric Power Commission engineers as referred to in last year's report, and poles through swamp lands have been properly cribbed. All new necessary transformers have been installed. The pole line has also been extended from the C. N. R. railway station to the new pump house at the Wanapetei River.

A decision having been made to take water from the Wanapetei River to the Main Camp, Messrs. James, Proctor and Redfern were appointed as engineers to design and detail the scheme which is described as follows by the engineers.

"The Main Camp had already an elevated storage tank and distribution system of mains. The new supply is connected to this system and briefly includes the following: a cast iron intake in the Wanapetei River; a pump filter house located on the river bank and which is constructed on a settling basin connected directly to the intake. In the pump filter house, there are located pump filters and meters. From this supply plant there has been laid a two mile length of forcemains which connects with the distribution system at the main camp."

The work was carried out by contract and these were awarded as follows:

Gartshore-Thompson Pipe and Foundry Ltd., cast iron pipes and specials.

Francis-Hankin & Co. Ltd., filter pumps and equipment.

M. J. Sulphur, Renfrew, Pump House and Intake.

St. Clair Construction Company of Windsor, laying water main.

Sketch plans were prepared and approved by the Provincial Secretary's Department for an additional wing in extension of the new buildings at Burwash, and working drawings and specifications have been proceeded with. This wing consists of a three storey building similar in dimensions and design to the cell block but is planned to accommodate 155 inmates in dormitories. The building houses on the first floor a hospital unit with open wards and single rooms and X-ray room, dispensary, doctors' and nurses' rooms. On the third floor is an Assembly Hall to seat 280 with a gallery for 24 additional seats. The basement is planned for general storage in one section and the other section as a day room.

Sketch plans have also been prepared for a permanent power plant but consideration of this has been left in abeyance.

Ontario Reformatory, Guelph.—Sketch plans have been prepared for the remodelling of the Old Dormitory Building, but the matter has been left in abeyance.

Sketch plans have been prepared for an Assembly Hall to be connected up by a covered passage-way to the Main Building. The building will be one storey and basement in height and is fireproof, except for the flat deck roof which will be slow burning construction. The Hall is 61 ft. x 80 ft. and will be used for exercise drill and games, and for lectures. On the same floor are guard room and lavatories and over these centrally placed, is a picture booth. A stage has been designed for one end of this building but will not form part of the immediate building program.

Mercer Reformatory, Toronto.—Plans and specifications were made for alterations to the heating plant at the Mercer Reformatory, and for the supplying and installing of stokers for which tenders will be called.

WELFARE BUILDINGS

Girls' Training School, Galt.—Sketch plans were prepared to provide additional accommodation which finally resulted in approval for consideration in the estimates of a new dormitory building for 50 girls.

Boys' Training School, Bowmanville.—Plans were prepared for a hospital unit in a separate building similar to the unit at Galt. The scheme was abandoned and sketch plans to provide a reception building with a hospital unit were approved for consideration in the estimates, to be placed on the Campus between the Dining Hall and Kiwanis Lodge.

ONTARIO SAVINGS OFFICES

The following is a list of premises which have been leased, altered where necessary, and fitted up as branches of the Ontario Savings Offices.

Toronto: Yonge and Davenport.
Yonge and Broadway.
Guelph.
Kitchener, Walper House.
London, Richmond and King.
Windsor, Canada Building.

DAFOE HOSPITAL, CALLANDER

Plans have been prepared for the improvement and extension of the Dafoe Hospital, to provide a suitably large day room and outside balcony and isolation wards with additional bath room. The work was carried out under the supervision of this Department for the Board of Guardians for the Quintuplets under contract with Mr. Dan Barker of North Bay. Alterations were made to the drainage system and a new metal septic tank was installed. Additional protecting chain fencing was also erected on the grounds with new entrance gates.

SCHOOLS

Reports have been made to the Department of Education on the following schools, plans of which have been submitted in some instances.

Blenheim.
Belleville.
Bowmanville.
Gores Landing, Rice Lake.
Long Lac.
Parry Sound District.
Orangeville.
Fort Erie.

I have the honour to be, Sir,

Your obedient servant,

G. WHITE.
Architect.

REPORT OF THE ASSISTANT ENGINEER

HONOURABLE T. B. McQUESTEN, K.C., B.A., LL.B.,
Minister of Public Works and Highways, Ontario.

Sir:

I have the honor to report on the work of the Engineer's Branch of the Department of Public Works for the twelve month period from April 1st. 1935, to March 31st, 1936.

All the work was carried out by day labor under local foremen, employing local men. This gave considerable help to many of the settlers in the north country who otherwise would have required relief.

During the year, there were built 50 timber bridges, 4 of steel and 12 of concrete. Repairs were made to 32 timber bridges and the dam at Tasso Lake on the East River, Muskoka, was repaired. The Huntsville locks were repaired and put in working order. A number of municipal drains were constructed in the various districts.

Maintenance work was as follows:

General, tools, repairs to equipment, etc.....	\$ 699 90
Maintaining navigable channels, etc.....	327 31
Repairs and lighting locks, docks and swing bridges:	
Port Carling locks.....	2,026 67
Port Sandfield docks.....	227 61
Huntsville locks.....	142 71
Repairs to storehouse.....	160 19
Repairs to dams:	
Bala dam.....	14 00
Kashee dam.....	49 22
Weslemkoon dam.....	73 40
Painting bridges, etc.....	724 25

REPAIRS TO BRIDGES

MUNICIPAL BRIDGES

NIPISSING

Blue Sea bridge, Bonfield Twp.—This is a timber bridge 27 ft. long, resting on rock-filled timber cribs. It is provided with timber railing.

Wassa Creek bridge, lot 14, con. 12 and 13, Chisholm Twp.—This is a timber bridge 67 ft. long consisting of a king truss span and a beam span. It rests on timber rock-filled cribs and has a timber railing.

Wassa Creek bridge, lot 14, con. 8, Chisholm Twp.—This is a timber bridge 41 ft. long, having a king truss and resting on rock-filled timber cribs. It has a timber guard railing.

Wassa Creek bridge, lot 26, con. 2, Ferris.—This is a timber bridge 30 ft. long, having a king truss and rests on rubble masonry abutments.

Sparks Creek bridge, con. 2, Bonfield Twp.—This is a timber bridge 22 ft. long and rests on rock-filled timber abutments.

PARRY SOUND

Shebeshekong bridge, Carling Twp.—This is a steel girder bridge 52 ft. long with 16 ft. clear roadway and concrete floor. It rests on concrete abutments. The bridge and approaches are provided with steel cable guard railing.

Sand Lake bridge, Proudfoot Twp.—This is a timber bridge 60 ft. long resting on pile bents. The bents at each end of the bridge were renewed and general repairs made to it.

Bear Creek bridge, Nipissing Twp.—This is a timber bridge 32 ft. long resting on rock-filled timber abutments. New stringers, flooring and railing were put on this bridge.

Sugar Creek bridge, Christie Twp.—This is a timber bridge 25 ft. long resting on rock filled timber abutments. It has a timber guard railing.

McRoberts culvert, Christie Twp.—This is a reinforced concrete culvert 45 ft. long with an opening 4'x4'. There was a heavy fill 10 ft. high which is provided with a steel cable guard railing on each side. The culvert was built below the old one so that the alignment of the road was greatly improved.

Axe Lake bridge, Monteith Twp.—This is a timber bridge 16 ft. long resting on rock-filled timber cribs.

Spence Twp. bridge, con. 10 and 11.—This is a timber bridge 15 ft. long resting on timber cribs.

Black Creek bridge, Machar Twp.—This is a timber bridge 24 ft. long. New stringers, flooring and railing were put on the old timber abutments.

Chapman Twp. bridge, lot 20, con. 12.—This is a timber bridge 20 ft. long and 7 ft. high, resting on rock-filled timber abutments.

Whitestone bridge, McKenzie Twp.—This is a timber bridge 210 ft. long consisting of 3 king truss spans on rock-filled timber cribs and 5 approach spans on the east end resting on timber pile bents. These approach spans were badly decayed and dangerous to traffic, so it was decided to fill this part which is 90 ft. long. A cable railing was provided on each side of the fill.

Wolf Creek bridge, Nipissing Twp.—The old bridge at this site was 56 ft. long. As only part of this was necessary to carry the water, a new timber bridge 25 ft. long was built and the balance filled with earth and rock.

Laurier Twp. bridge, lot 6, con. 10 and 11.—The old bridge at this site was 30 ft. long. A new timber bridge 18 ft. long was built and the channel diverted to straighten the course of the creek.

Pringle Twp. bridge, lot 24, con. 6 and 7.—The old bridge at this site was 35 ft. long. A new timber bridge 18 ft. long was built and the balance filled with earth and rock.

South Seguin bridge, Monteith Twp., lot 20, con. A and B.—This is a timber bridge 42 ft. long having a king truss. It rests on rock-filled timber cribs. The floor is 10 ft. above low water level. A timber railing was provided.

Armour Twp. bridge, lot 34, con. 14.—This is a timber bridge 33 ft. long resting on rock-filled timber abutments. It has a timber guard railing.

Joly Twp. bridge, lot. 1, con. 2 and 3.—This is a timber bridge 75 ft. long consisting of a king truss span over the channel with 2 approach spans on the east end and one approach span on the west end. It rests on timber pile bents of 4 piles each. It has a timber guard railing.

MUSKOKA

Cooper Lake bridge, Franklin Twp.—This is a timber bridge 25 ft. long resting on rock-filled timber abutments. The old bridge was 40 ft. long and 15 ft. was filled with earth and rock.

Hammel Creek bridge, Watt Twp.—This is a timber bridge 18 ft. long on timber abutments.

Black Creek bridge, Watt Twp.—This is a steel bridge resting on rubble masonry abutments and was built about 20 years ago. One wing wall on the upstream side had fallen in so that the stream was cutting into the roadway, leaving it in a dangerous condition. This wing wall was rebuilt in concrete.

Brunel Twp. bridge, lot 25, con. 12.—This is a timber bridge 15 ft. long resting on rock-filled abutments.

Wallington Creek bridge, Stinstead Twp.—This is a timber bridge 26 ft. long resting on rock-filled timber abutments.

Hoodstown bridge, Stinstead Twp.—This bridge is 78 ft. long and the floor is 14 ft. above water level. A 30 ft. steel beam bridge was put over the channel and a timber approach span on each end. It rests on rock-filled timber piers and is provided with a steel cable guard railing.

Stinstead Twp. bridge, lot 5, con. 1.—This is a timber bridge 15 ft. long resting on rock-filled timber abutments.

Echo Creek bridge, lot 23, con. 13, Oakley Twp.—This is a steel beam bridge 22 ft. long and rests on rock-filled timber abutments. It has a 3" plank floor and steel guard railing.

EAST SIMCOE

Black River bridge, lots 6 and 7, con. 6, Matchedash Twp.—This is a timber bridge 67 ft. long having 3 spans. It rests on rock-filled timber piers and is provided with guard railings.

Medonte Twp. culvert, lot 6, con. 12.—This is a concrete box culvert with a 6x6 ft. clear opening and roadway 18 ft. wide.

Medonte Twp. culvert, lot 5, con. 12.—This is a concrete culvert similar to the one on lot 6, as it is on the same stream.

Sturgeon River bridge, lot 5, con. 8, Tay Twp.—This is a concrete beam bridge with a 20 ft. clear span and 18 ft. clear roadway. It rests on concrete abutments and has steel posts and cable guard railing.

Willow Creek bridge, Oro Twp.—This is a timber bridge 20 ft. long on timber crib abutments. It has a timber guard railing.

CENTRE SIMCOE

Marl Creek bridge, Vespra Twp.—This is a timber bridge 18 ft. long resting on timber pile bents. It has a timber guard railing.

McNevin's bridge, lot 12, con. 8, Sunnidale Twp.—This is a concrete beam bridge with a 20 ft. clear span and 18 ft. roadway. It rests on concrete abutments and has steel posts and cable guard railing.

HALIBURTON

Union Creek bridge, lot 6, con. 6 and 7, Somerville Twp.—This is a concrete beam bridge with a 20 ft. clear span and an 18 ft. roadway. It rests on concrete abutments and has steel posts and cable guard railing.

HASTINGS

Alder Creek bridge, lot 13, con. 13, Carlow Twp.—This is a concrete culvert with a 12 ft. clear span and 18 ft. roadway. It rests on concrete abutments.

Mississippi bridge, lot 25, con. 13, Mayo Twp.—This is a concrete beam bridge with a clear span of 35 ft. and 18 ft. roadway. It rests on concrete abutments and has steel posts and cable guard railing.

ADDINGTON

Kelly's bridge, lot 20, con. 3, Bedford Twp.—This is a concrete slab bridge with a clear span of 10 ft. and 18 ft. roadway. It rests on concrete abutments. It has steel posts and cable guard railing which extend out over the approaches. The approaches were widened by filling with rock.

Chippago Creek bridge, Hinchinbroke Twp.—This is a timber bridge 12 ft. long resting on timber crib abutments.

California Road bridge, Sheffield Twp.—This is a concrete slab bridge with a clear span of 15 ft. and 18 ft. roadway. It rests on concrete abutments and is provided with steel posts and steel cable guard railing.

Clarendon Twp. bridge, lot 41, con. 1.—This is a concrete slab bridge with a clear span of 14 ft. and 18 ft. roadway. It rests on concrete abutments and has steel posts and cable guard railing. The site of this bridge was changed in order to straighten the road and considerable extra filling of the approaches was required on this account.

Otter Creek bridge, Kennebec Twp.—This is a timber bridge with a clear span of 15 ft. resting on rock-filled timber abutments.

Denbigh Twp. culverts.—Two timber culverts each 8 ft. clear span were built here.

Boundary bridge, Kaladar Twp.—This is a timber bridge with a 12 ft. clear span resting on timber abutments.

McLuckie's bridge, Kaladar Twp.—This is a timber bridge 18 ft. long resting on rock-filled timber abutments.

Sharbot Creek bridge, Olden Twp.—This is a timber bridge 16 ft. long resting on rock-filled timber abutments.

SOUTH RENFREW

Brudenel-Lyndock Townline bridge.—This is a timber bridge 30 ft. long on timber abutments.

Hurd Creek bridge, Sebastopol Twp.—This is a timber bridge 100 ft. long resting on rock-filled timber piers. The approaches were raised and widened.

Halliday Creek bridge, Bagot Twp.—This is a two span timber bridge 51 ft. long resting on rock-filled timber cribs.

Matawatchan Twp. bridge.—There was an old timber bridge 190 ft. long at this site. It had become badly decayed and was dangerous for traffic. The old bridge was removed and a fill was made on each end, leaving only about 30 ft. of bridge over the stream, which is sufficient to take care of the flow of water.

Constaw Creek bridge, Brougham Twp.—This is a concrete beam bridge with a clear span of 35 ft. and 22 ft. roadway. It rests on concrete abutments and has steel posts and cable guard railing on bridge and approaches.

Dam Creek bridge, lot 18, con. 9, Radcliffe Twp.—A timber bridge with a 25 ft. clear span was built at this site. It rests on rock-filled timber abutments.

The following bridges were also repaired and put in safe condition for traffic:

Tramore bridge, lots 8 and 9, con. 13, Hagarty Twp.

Woermke bridge, Sebastopol Twp.

Hagarty-Sherwood Townline bridge.

Schutt bridge, Raglan Twp.

Two bridges in Sherwood Twp.

Hurd Creek bridge, Grattan Twp.

Mississippi bridge, Raglan Twp.

Madawaska bridge, Raglan Twp.

NORTH RENFREW

Indian River bridge, lot 10, con. 2. Alice Twp.—This is a timber bridge 41 ft. long having a queen truss span. The abutments are rock-filled timber cribs. The floor is 10½ ft. above water level.

Chalk River bridge, lot 12, con. 14. Wylie Twp.—A timber bridge with a 30 ft. clear span was built here. It rests on rock-filled timber abutments.

Secretary and Purchasing Agent.

STATEMENTS

OF THE

Accountant of Public Works

(Twelve Months to March 31st, 1936)

HONOURABLE T. B. McQUESTEN, K.C., B.A., LL.B.,
Minister of Public Works and Highways.

Sir.—

I have the honour to submit detailed statements of Ordinary Expenditure of Civil Government and Maintenance and Repairs Government Buildings and Public Works; also Capital Expenditure on Provincial Public Buildings and Public Works, during the fiscal year which ended on the 31st of March, 1936.

I have the honour to be, Sir,

Your obedient servant,

C. KENTLETON,
Accountant Public Works.

TO THE HONOURABLE HERBERT ALEXANDER BRUCE,
a Colonel in the Royal Army Medical Corps, F.R.C.S. (Eng.)
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith for the information of Your Honour and the Legislative Assembly, the Twenty-Ninth Annual Report of the Game and Fisheries Department of this Province, for the year ended March 31st, 1936.

I have the honour to be,

Your Honour's most obedient servant,

H. C. NIXON,
Minister in Charge,
Department of Game and Fisheries

Toronto, 1937.

TWENTY-NINTH ANNUAL REPORT

OF THE

Game and Fisheries Department of Ontario

(With which is included the Report covering the five months' period ended March 31st, 1935.)

TO: THE HONOURABLE H. C. NIXON,
Minister in charge,
Department of Game and Fisheries.

SIR:—I have the honour to submit to you this, the Twenty-Ninth Annual Report of the Department of Game and Fisheries, outlining the various departmental activities for the year ended March 31st, 1936.

Comparative tables in this report will generally omit reference to those included in the previous report and which covered the transition five month period existing by reason of the change in the provincial fiscal year, which as noted above is included herein.

FINANCIAL

The subjoined table shows the total revenue of the Department during the year reported upon, and details the various sources of revenue with the amount derived therefrom in each instance.

REVENUE FOR THE FISCAL YEAR ENDING MARCH 31, 1936.

GAME—		
Royalty	\$110,884.40	
Licenses—		
Trapping	\$28,315.15	
Non-resident Hunting	53,080.00	
Deer	56,544.05	
Moose	2,728.00	
Gun	69,635.93	
Dog	3,239.35	
Fur Dealers	27,186.00	
Fur Farmers	6,940.00	
Tanners	170.00	
Cold Storage	109.00	
Hotel & Restaurant	20.00	
	247,967.48	
		\$358,851.88
FISHERIES—		
Royalty	\$ 7,600.50	
Licenses—		
Fishing	\$ 89,381.10	
Angling	200,641.65	
	290,022.75	
Sales—spawn taking	241.50	
	297,864.75	
GENERAL—		
Guides' Licenses	5,630.00	
Fines	9,018.40	
Sales—Confiscated articles etc.	7,162.45	
Rent	3,096.50	
Commission	1,952.40	
Miscellaneous	362.34	
	27,222.09	
		\$683,938.72

The total amount of this revenue exceeds by \$139,200.25 the amount collected during the period of the last fiscal year reported upon, i.e., ending October 31st, 1934, and represents an increase of more than twenty-five per cent. By far the greater proportion of this additional revenue resulted from the increased issue of non-resident licenses, an increase amounting to practically \$100,000.00,—more than \$72,000.00 from the sale of additional non-resident angling licenses, and more than \$27,000.00, from the sale of additional non-resident hunting licenses. Resident hunting licenses, which this year for the first time included licenses to use dogs to hunt deer, netted an additional \$22,500.00, while revenue from fines and sales of confiscated articles, resulting from the operations of the enforcement service, also increased by more than \$7,800.00.

The total expenditures of the Department for this financial year, including both ordinary and capital, amounted to \$451,041.91, and it will be noted that our operations showed a surplus of revenue over expenditures totalling \$232,896.81. Compared with the previous twelve-month period reported upon, expenditures show a decrease of somewhat in excess of \$105,000.00, and while the figures quoted are an evidence of the considerably improved financial position of the Department, such a desirable condition has been attained not through any curtailment of necessary services or interference with departmental activities, but rather because of close and careful scrutiny and the resulting elimination of any unnecessary items of expenditure.

STATISTICS

Various tables of statistics are included as appendices to this report. They contain in detail considerable information with reference to the output of the fish hatcheries and rearing stations maintained and operated by the Department under the Fish Culture Branch, as well as information as to the distribution of the product of these hatcheries and rearing stations and the waters re-stocked therewith. Tables are also provided giving information with reference to the commercial fisheries of the Province, while interspersed throughout the actual report are statistical facts which refer to other branches of departmental activity, assembled, compiled and included herein for information, and all of which may be considered to be of value and interest.

GAME

The following table gives details as to the numbers of the various hunting licenses, both resident and non-resident, issued during the year, as compared with similar information for the two preceding years, and which figures it will be observed indicate increases in practically all instances, and substantiate the comments made earlier in this report concerning the improvement in our revenue collections:—

	1933	1934	1935-36
Resident Moose	673	512	496
Resident Deer	12,756	12,890	14,779
Resident Camp (Deer)	165	175	258
Resident Farmers' (Deer)	5,113	4,902	5,221
Resident Gun	97,561	76,210	85,884
Non-resident small game	318	489	686
Non-resident deer		475	652
Non-resident "General"	634	457	680

We shall now endeavour to summarize conditions as they apply to our game life, animal and bird,—as compiled from reports submitted by the officers of the departmental field service stationed in various sections of the Province:—

DEER:—In the eastern portion of northern Ontario these animals are not too plentiful, and little, if any, improvement was in evidence. In the western portion of the northern division, including Rainy River and Kenora Districts and the westerly half of the District of Thunder Bay conditions are splendid and the animals quite numerous. So far as the easterly portion of Thunder Bay is concerned, while conditions are not as favorable as in the westerly portion, reports indicated that their numbers are increasing. In southern Ontario or south of the French and Mattawa Rivers and Lake Nipissing, they appear to be increasing in the counties in the western and eastern sections where the protection of an entire closed season has been effective in recent years, particularly in those areas in which favourable habitat is available. They do not exist in the most southerly counties of the central portion of southern Ontario, in which there has not been the same protection, and which areas are of course quite closely settled. In those sections of southern Ontario in which these animals are subject to the most intensive hunting during the open season, reports indicate that speaking generally, existing conditions are favourable and somewhat improved.

MOOSE:—Are found in fair numbers in various parts of the north and apparently increasing in the eastern portion, though in southern Ontario they are very scarce and may be found only in scattered and remote sections.

CARIBOU:—These animals are extremely scarce. The herds are few and scattered and reported only in the eastern and western districts of the far northern part of the Province.

ELK (Wapiti):—As stated in previous reports this species has been introduced here by the importation of these animals from western Canada, with the co-operation of the Federal Authorities. Herds were previously liberated in the Nipigon-Onaman, Chapleau, Goulais River-Ranger Lake, Burwash and Pembroke Game Preserves, while transfer was undertaken of some of the animals at Pembroke to Algonquin Park and the Bruce Peninsula. While the animals may possibly be increasing in number nothing of a reliable nature may as yet be stated as to the success or otherwise of this experiment.

RUFFED GROUSE (Partridge):—These birds according to all reports were considerably less than normal in number in practically every section of the Province, particularly the north.

SHARP-TAILED GROUSE (Prairie Chicken):—Found only in extreme north-western and northeastern portions, and there only in reduced numbers.

PTARMIGAN:—Conditions as they apply to this species are very similar to those reported for Sharp-tailed Grouse.

QUAIL:—Generally speaking, these birds may be found only in the extreme southwestern region, principally Essex, Kent and adjacent Counties, and reports indicate some improvement in this area. They are also noted as existing in some isolated spots in a few eastern Counties. The Department liberated live birds of this species, numbering 200 in all, principally in the Counties of Essex, Kent and Middlesex, in which the special open season prevailed.

DUCKS:—About the same as a general rule, with varying conditions in evidence in different sections, i.e. improvement and diminished numbers in intermingled areas.

GEESE:—Good along the James Bay shore, particularly in the vicinity of Moosonee. Conditions about the same along the routes of migration which follow through the north, and thence along the Counties bordering Georgian Bay, Essex and Kent, or through eastern Ontario.

PLOVER and SNIBE:—Neither of these two species is in any way plentiful. Conditions remained about the same in a general way, with slight improvement reported from widely separated areas. Present protective regulations quite necessary.

PHEASANTS (ring-necked):—Through departmental efforts these birds are now well established in the southwesterly Counties, and in the Counties bordering the western part of Lake Ontario. To the east of this they are showing some improvement and increase in number. Details of distribution show that during the year live birds numbering 1,122 were released, for the most part within the Counties in which the limited open season provided, particulars of which are given further on in this report, had prevailed, while 112 birds were taken and transferred from Point Pelee to other sections of Essex County. In addition 17,430 pheasant eggs were distributed to various applicants therefor, which included many settings to Game Protective Associations, to be hatched, and the chicks reared and liberated at the proper time for re-stocking. And again the Department is deeply grateful to those providing such co-operation in the matter of propagating and establishing this fine species of game bird. It is quite probable that this bird is now established in every section in which hope for its continued existence may be held.

HUNGARIAN PARTRIDGE:—The work of establishing this bird has been somewhat limited, and as a result they may be found only in a few scattered sections, where environment is suitable. They are not sufficiently established yet to justify the expectation of noticeable improvement.

WOODCOCK:—While conditions are fairly good in some sections, reports indicate they are not generally prevalent but are found in sufficient numbers for hunting purposes only in a few scattered districts.

RABBITS:—All species, including the cotton-tail, the snow-shoe and the European Hare or Jack Rabbit, are plentiful and provided good shooting during the late fall and early winter in practically all sections of southern Ontario, south of Muskoka, Victoria and Peterborough and east of Hastings. North and east of this, these animals showed quite a decrease in number and are somewhat scarce. In northern Ontario the jack rabbit does not exist, but the other species were scarce west of Algoma, but reported to be plentiful in the eastern section.

At this point reference is made to the special open seasons provided by regulation during the year, details of which follow:—

For deer in the Counties of Grey and Bruce November 18 to 23, and in that part of Carleton County west of the Rideau River, November 5 to 20.

For Moose in the County of Renfrew, November 5 to 20.

For partridge in southern Ontario, October 24, 25 and 26.

For pheasants on Pelee Island, October 23 and 24; and in the Counties of Haldimand, Lincoln, Welland, Durham, Northumberland, Leeds and Prince Edward-Lennox, November 1 and 2.

For pheasants and quail in the County of Middlesex, November 1 and 2.

For pheasants, quail and Hungarian partridge in the Counties of Essex and Kent, November 1 and 2.

Before closing this section of the report mention might reasonably be made of the Regulation which prohibits the feeding of migratory water-fowl for shooting

purposes, and which was effective for the first time during the open season which prevailed this year.

FURS

Conditions as they affect fur-bearing animals throughout the Province, and as they have been reported to the Department, may be summarized as follows:—

BEAR:—Conditions remained about the same. These animals would appear to be fairly plentiful in northern Ontario, and the more northerly parts of southern Ontario.

BEAVER:—Showing some improvement in northerly portion of southern Ontario and in westerly part of northern Ontario, while to the east they are still scarce. The protection of an entire closed season which has been in effect in a large portion of the Province for the past few years was extended to include all of Ontario, so that the trapping of these animals is now prohibited throughout the Province the year round.

FISHER:—These animals are apparently extremely scarce, though there are indications of some improvement in the northerly part of the Province.

FOX:—This species is very plentiful and greatly increased in numbers, particularly in the north. In the southern portion of Ontario they are quite plentiful in the sections to the north and east, though somewhat scarce in the Counties to the west and south.

LYNX:—So far as the northern sections are concerned, while scarce, there is reported to be some slight improvement, particularly towards the east. In the southern section they are extremely scarce, being unknown in many areas.

MARTEN:—While the figures in the subjoined table show a little increase over the figures of the previous comparative period, indications are that this species is becoming scarcer throughout the entire Province.

MINK:—Indications and reports are to the effect that the numbers of these animals are diminishing, and more particularly would this appear to be the case in southern Ontario.

MUSKRAT:—Conditions which govern the welfare of this species have not been at all favourable during the past few years, with the result that these animals are adversely affected. A considerable decline in the catch is indicated by the figures included in the succeeding table, and reports generally indicate a noticeable decrease in all sections, except possibly the eastern section of northern Ontario.

OTTER:—General conditions are about the same so far as Otter are concerned, with possibly some improvement in the northeastern part of the Province.

RACCOON:—This species is practically unknown in northern Ontario. In southern Ontario conditions which apply are not much changed, even though the total catch as reported shows some decline.

SKUNK:—These objectionable little nuisances continue to be very plentiful in practically all sections, and the reduction in the numbers taken may be attributed to the lack of demand for the pelts and the low prices prevailing therefor, which apparently are not sufficient recompense for the trouble and inconvenience trapping of the same entails.

WEASEL:—Continue to be rather plentiful, though their numbers are possibly somewhat reduced. The figures evidence a considerable decrease in the numbers trapped, but as in the case of skunk prevailing prices for the pelts do not encourage operations for the trapping of this species.

SQUIRRELS (black and grey):—These animals are reported to be on the increase in southern Ontario, especially in the western and eastern Counties. Their numbers were sufficient to warrant a two-day open hunting season south of the French and Mattawa Rivers and Lake Nipissing, i.e. on October 24th, and 25th.

Operations by licensed trappers are carried on very intensively throughout Ontario during the periods of the various open seasons, and in a general sense the fur-bearing animals native to the Province are as a result encountering more than a little difficulty maintaining the several species at levels existing in recent years. Restrictive regulations imposed for their protection, particularly in the way of closed periods, undoubtedly require continuation, and the active co-operation of all concerned in observing and complying therewith is urgently needed.

The following comparative table shows the numbers of pelts of the different species of fur-bearers exported from the Province and dressed within the Province during the years 1933, 1934 and 1936, and upon which royalty was paid as required by the Game and Fisheries Act.

	1932-33	1933-34	1935-36
Bear	556	341	411
Beaver	10,799	10,336	6,785

Wolverine	3	5	4
	891,704	780,679	613,057

Based on the average prices as computed by the Department from information secured from reliable sources, the value to the trapper of the fur catch of the 1935-36 season is estimated at \$1,906,121.04, appreciated values accounting for the increase over the previous comparative period. These figures do not take into consideration silver, black and blue foxes and mink the product of our licensed fur farms, the pelts of which animals are exempt from the royalty provisions of the Game and Fisheries Act. During the year reported upon a total of 21,318 silver and black fox pelts were either exported from the Province or tanned, as well as 15 blue fox pelts and 9,641 mink pelts. The estimated total value of all these pelts was \$827,451.11, which, of course, accrued to fur farmers licensed under the regulations which govern such operations.

FUR FARMING

At this time a short resume of this branch of industry in Ontario during the past few years, as well as its present status should be of interest.

Following the economic conditions which developed in 1930, values declined severely, forcing a revaluation and a corresponding reduction of breeding stocks on fur farms. 29,331 animals were pelted in 1931, as compared with 13,140 in 1930; 8,149 in 1929; and 5,427 in 1928. The increase over the normal production further adversely influenced prices in the fur market and caused some severe financial losses to individuals. There were, however, some factors which compensated the industry as a whole. In the process of reduction, the quality of breeding stocks was improved, creating a new standard of excellence. The lower values of breeding stocks attracted additional capital and new farms were established. While the reduction of breeding stock continued, the number of farms actually increased until a peak was reached in 1931, when 1,609 farms were licensed. A slight annual decline subsequently developed until 1934, when only 1,217 farms were licensed. The industry is again showing progress both in the number of farms and the breeding stock kept. There were 1,239 farms licensed this year and breeding stocks increased by eighteen per cent. The propagation of mink is now commanding considerable attention, live stock having increased almost fifty per cent, whereas the silver fox, the other principal species, increased only twelve per cent.

SUMMARY OF BREEDING STOCK ON LICENSED FUR FARMS
AS AT JANUARY 1ST

	1934	1935	1936
Beaver	60	78	70
Fisher	18	19	16
Fox (cross)	443	434	367
Fox (red)	360	286	228
Fox (silver or black)	16,826	19,314	21,645
Fox (blue)	10	10	5
Lynx	2	2	2
Mink	6,190	8,605	12,332
Muskrat	499	447	375
Raccoon	989	799	524
Skunk	2	0	3
Bear	14	11	21
Marten	22	9	4

The work at the Experimental Fur Farm continued, and the following is a short summary thereof:—

EXPERIMENTAL FUR FARM

Further investigations were carried out regarding the feeding of raw cereals to pup foxes after weaning at around eight to nine weeks of age. It was found that in an uncooked stage raw cereals were not only very improperly digested but that they were actually detrimental to the health of the pups. Scouring, bloating and intestinal disorders could be traced directly to this source. Once the raw cereal-fed pups were placed on a diet containing thoroughly cooked cereals these objectionable symptoms entirely disappeared.

Due to the number of enquiries from mink ranchers regarding the substitution of fresh meat and fish with dehydrated products, like meat meals and fish meals, feeding experiments were carried out to attempt to ascertain how far this might correctly be done. A summary of these experiments shows that fresh products cannot be entirely replaced by dried ones. Where animals were fed fish meals there was a steady decline in the haemoglobin of the blood resulting in nutritional anaemia. If liver meal was added to the fish meal diet the anaemia was arrested and finally disappeared. This was also the case with meat meals unless one third of the ration consisted of liver meal.

Apart from the nutritional condition of the animals there was a distinct tendency for the fur to be dry and scanty. It appears that quantities of fresh food must be fed to fur-bearing animals if the best results are to be obtained. Particularly does this apply to breeding stock, for if females are fed mainly on dried products they may breed and give birth to pups but they will invariably dry up during the lactation period and many pups will die at the fourth week as a result.

During the summer, regional meetings were held at Guelph, Owen Sound, Arnprior, Ridgeway and St. Mary's which were well attended and many and varied discussions arose during these meetings. In October a Field day was held at the Experimental Fur Farm at which time the foxes and mink were judged for quality and value by competent authorities on the subject. This meeting was highly successful and breeders attended from all parts of the Province.

CROWN GAME PRESERVES

The idea of Crown Game Preserves had its origin in the desire to protect and perpetuate the natural wild life resources of the country. The Department has not been slow in recognizing the value of protected areas for the natural propagation of game, and has continued to give increased attention to this phase of its conservation programme. In Northern Ontario, where the population is still sparse, and big game as a consequence more abundant, advantage has been taken of the fact that much Crown Land was available and large areas were in previous years established as Game Preserves. The ten largest of these, viz;—The Abitibi, Burwash, Chapleau, Goulais River-Ranger Lake, Lake of the Woods, Mississauga-White River, Nipigon-Onaman, Nipissing, Pipestone Lake and Superior, represent a total area of approximately 8,593 square miles. At the present time there are some 84 Crown Game Preserves in the Province, representing a protected area of close to six million acres.

During the period under review the Department has extended its game preserve policy to include a larger portion of southern Ontario. It is intended with the co-operation of private land owners to set aside as Game Preserves a number of small areas, each of about one thousand acres or so, located at strategic points in each County. While all species of game will be protected in these areas, they will be primarily useful as refuges for game birds, (migratory and non-migratory). The underlying idea in connection with these small Preserves is the same as in the case of the larger areas where big game is being successfully propagated. Given protection for a period of years game birds and animals, provided there is a foundation stock in the area, will increase in numbers and the overflow will serve to populate the surrounding districts. Fourteen of these Preserves have already been established in various Counties, (see tabulation). All of these areas are well suited for the purpose and most of them are already supplied with upland game birds. It is the intention of the Department however, to place the larger portion of its available adult birds on these Preserves for re-stocking purposes.

It is generally acknowledged that where the wild life is allowed to propagate with a minimum of human interference and in surroundings which provide natural food and cover, there will in time be a return to the normal conditions set up by nature. This means not only increased game in the protected areas but a general improvement in conditions throughout the Province.

So far as the general public is concerned these Preserves serve a dual purpose. From the standpoint of the sportsman they provide more game of all kinds and therefore better hunting. For those whose chief pleasure in the wild life is aesthetic, Crown Game Preserves will increase their pleasures by providing havens for the different species where they may be found in their natural state. In addition they will ensure that future generations will not be deprived of either the recreational or the aesthetic advantages which we now enjoy.

The following tabulation shows the Preserves added during the year in addition to several which have been either renewed or amended.

Name	County	Extent in Acres
x North Easthope	Perth	8,300
:x: Wilder Lake	Grey	4,480
:x: Woodlands	Halton	460
x Decew Falls (formerly Power Glen).....	Lincoln	2,000

WOLF BOUNTIES

During the year under review, 1935-36, 2,004 claims for bounty, involving the pelts of 2,905 wolves, were dealt with. Rather more than fifty per cent of these wolves were killed in the four western districts of northern Ontario, of which about sixty-five per cent were brush wolves. A slightly higher ratio of timber wolves was taken in Algoma, Sudbury and Nipissing Districts, while only twelve per cent of these animals which were taken in the District of Cochrane were brush wolves. The following table details the sources of origin of the pelts submitted for bounty:—

SUMMARY OF PELTS

District or County	No. of Adult Wolves		Number of Pups	Total
	Timber	Brush		
Algoma	124	157	7	288
Bruce	12	9	0	21
Cochrane	37	5	0	42
Frontenac	7	1	0	8
Haldimand	1	3	0	4
Haliburton	18	0	0	18
Hastings	8	1	6	15
Kenora	225	447	1	673
Lanark	5	1	0	6
Lennox & Addington	11	0	0	11
Manitoulin	27	130	4	161
Muskoka	9	5	0	14
Nipissing	79	42	5	126
Norfolk	0	4	1	5
Ontario	1	3	0	4
Parry Sound	89	16	1	106
Patricia	88	136	2	226
Peterborough	3	1	0	4
Rainy River	125	231	1	357
Renfrew	27	1	0	28
Simcoe	12	6	0	18
Sudbury	108	168	0	276
Thunder Bay	138	336	5	479
Temiskaming	4	7	0	11
Victoria	1	1	0	2
York	0	2	0	2
Total	1,159	1,713	33	2,905

Seventeen claims were not granted including 20 pelts of dogs and other animals which were not eligible for bounty.

Following is a comparative table of wolf bounty statistics covering the three last complete financial years:—

Period	Timber	Brush	Pups	Total	Bounty & Expenses
For year ending October 31, 1933...	1,112	1,229	43	2,384	\$53,433.88
For year ending October 31, 1934...	990	812	57	1,859	27,080.65
For year ending March 31, 1936....	1,159	1,713	33	2,905	42,399.89

Of the 1935-36 amount shown above, viz:—\$42,399.89, \$41,995.00 was the amount paid for bounty. Details of bounty paid are as follows:

Brush Wolves (Counties)	30 @ \$ 6.00	\$ 180.00	
(Districts)	1,666 @ \$15.00	\$24,990.00	
Total Brush	1,696		\$25,170.00
Timber Wolves (Counties)	73 @ \$ 6.00	\$ 438.00	
(Districts)	1,084 @ \$15.00	\$16,260.00	
Total Timber	1,157		\$16,698.00
Pups (Counties)	1 @ \$ 2.00	\$ 2.00	
(Districts)	25 @ \$ 5.00	\$ 125.00	
Total	26		\$ 127.00
Total	2,879 pelts		\$41,995.00

In respect to wolves killed in provisional judicial districts, bounty was paid by the Provincial Treasury, but for wolves killed in Counties it was paid by the County Treasury, of which forty per cent was rebated by the Province.

ENFORCEMENT SERVICE

Perhaps one of the most important services provided by the Department is the work of maintaining adequate respect for and proper observance of provisions of the Game and Fisheries Act and the regulations provided thereunder, as well as the various regulations applicable to Ontario adopted under the Fisheries Act, (Federal) and the Migratory Birds Convention Act. Generally speaking, this branch of activity is assigned to the members of the Field Service Staff, whose regular numbers were augmented by the appointment of additional Seasonal Overseers for special duty during the hunting seasons, and also during the critical fish spawning periods. This work is also included among the duties performed by members of the Provincial Police Force, a policy which was inaugurated during the latter part of 1934, and which assistance has been of considerable value. A word of appreciation may be expressed for the co-operation in this work which is provided by the many Deputy Game and Fishery Wardens, whose interest in the preservation of our game and fish resources is sufficient to encourage them to volunteer their services without remuneration, and who under such appointments are authorized to act in the capacity of enforcement officers for purposes of the Game and Fisheries Act. During the calendar year 1935 Deputy Game and Fishery Warden appointments totalled 836, and one hesitates to estimate the value of the service and co-operation the Department received from these honorary officers, and the least that may be said is that it would be difficult to replace or duplicate the services which they rendered.

Notwithstanding the fact that these enforcement services are provided, there are still those who, in the case of the Game and Fisheries Act as in the case of other regulatory legislation, will either knowingly or otherwise infringe and who therefore are confronted with inconvenience and difficulty if contacted by the enforcement service when the violations occur.

During 1935-36 there were 1,216 cases in which offences were committed and in which the offenders were relieved by various officers of their equipment and the unlawful game or fish which might have been in their possession on these occasions. An examination of the reports of these seizures of equipment and goods shows that in 987 cases action was provided by Game and Fisheries Overseers; in 144 cases by Deputy Game and Fishery Wardens; in 36 cases by members of the Ontario Provincial Police Force and in 46 cases by co-operative action, Overseers, Deputy Game Wardens and Provincial Police working in conjunction with each other; while in three cases the action was taken by Municipal Police.

A condensed summary of the articles thus seized is submitted herewith:—

Description	No.
Fire-arms and ammunition	440
Fishing equipment	308
Fish	197
Game	154
Pelts	121
Trapping equipment	118
Angling equipment	62
Water craft	38
Lights (artificial)	37
Live animals	16
Motor vehicles	9
Miscellaneous	42

Duplicate entries on one seizure, such as fire-arms and game; Angling equipment and fish; trapping equipment and pelts; and other combinations of a similar nature account for the apparent discrepancy in the total of the above table, viz.—1,542 as compared with the 1,216 actual seizure reports.

Departmental records contain evidence of the fact that during the year under review there were some 967 cases in which offenders against our legislation and regulations were prosecuted in the courts, and in which convictions were registered against such offenders. As in the case of the actual seizures these court cases were somewhat varied as to origin, as follows:—In 806 cases Game and Fisheries Overseers were responsible for the prosecution; Provincial Police in 51 cases; Deputy Game and Fishery Wardens in 42 cases, and in 66 cases the prosecutions were by Overseers, Deputy Game Wardens and Provincial Police acting in conjunction with each other; while in 2 cases Municipal Police undertook the action.

REPORT OF THE FISH CULTURE BRANCH

Ontario's commercial fishing industry is an important factor in our industrial life. In point of annual marketed value of production Ontario stands first among the provinces. In the four year period 1926-1929, before the world-wide disruption of economic conditions was felt, the average marketed value of Ontario's fish was \$3,693,000. In the four year period, 1930-33, the average marketed value of the catch was slightly in excess of \$2,500,000 and in 1934 the marketed value was \$2,316,965., and in 1935, \$2,633,512.90. These figures are cited to emphasize the value of our commercial fishing industry, the hopeful signs of recent increasing values and the importance of maintaining this industry on a proper basis.

On the other hand, Ontario's game-fishing interests are vitally important to every person in the Province, and the conservation of these interests is becoming of practical concern to increasing thousands of our citizens. This is not difficult to explain, when we consider the recreational and health advantages, and the direct and indirect financial benefits of a large and ever-increasing tourist trade, embracing as it does in one way or another every branch of industry, thus increasing employment. It is estimated that 10,800,000 tourists from the United States and other countries entered Canada in 1935, and left behind \$200,000,000. in cash; of this total Ontario received \$84,000,000. Emphasis is placed on the importance of the tourist trade, for it is generally conceded that the chief attraction to the tourist is our excellent fishing.

There are many complex factors involved in the maintenance of fisheries interests and a few of the more important may be cited:

1. Scientific inquiry.
2. Re-stocking measures of a practical nature.
3. Protection.
4. The spread and development of the ideals of true sportsmanship.

All these factors are inseparably linked together in the problem of fisheries management.

HATCHERIES AND REARING STATIONS:

The Department operates twenty-two fish cultural stations. This number includes all the major and subsidiary rearing stations. The actual number of hatcheries is nineteen; trout rearing stations, nine; bass rearing stations, three; in addition to the facilities for hatching bass in the Lake on the Mountain, Glenora Hatchery.

During the year, a new trout rearing station was built in the vicinity of Chatsworth, comprising the hatchery for hatching and culture to the advanced fry stage, and four rearing ponds, all of which are separately fed and drained. Two excellent sources of spring water supply the hatchery and ponds, and a very important advantage in the arrangement is that the hatchery supply and the supply to the main rearing ponds are separate. The water itself is of satisfactory composition and of low and approximately constant temperature 45°F. The total volume of water delivered is approximately 2100 gallons per minute. The constant and relatively high winter temperature induces early hatching, so that the fish are strong and well advanced for transfer to the rearing ponds in early summer.

The Department acquired a series of four ponds at Midhurst Reforestry Station. These were renovated and trout carried over winter. Additional improvements will be made on these ponds next year.

SPECKLED TROUT:

The Department's objective is to increase the number of sizable trout distributed to suitable waters year by year. This is necessary if we are to maintain the supply on account of the increasing intensity of the fishing. Furthermore, there are numerous streams in southern Ontario, in which the food supply for trout fry and fingerlings has diminished and cannot meet the requirements imposed on the stream by the introduction of additional supplies of baby fish. This condition is due to the rapid industrialization of the Province by agricultural, lumbering, manufacturing, and other interests, all of which have been instrumental in changing the character of our lakes and streams. It is clear to anyone, for example, how effective scouring freshets, and bulging streams heavily laden with silt are, in changing the quantity and quality of the food supply. During prolonged periods of drought, also, the shallow muddy shoals and backwaters, the home of minute life on which

young trout feed, become dried up. It is clear, therefore, that under such circumstances planting yearling and older fish which feed on the larger forms of terrestrial and aquatic life, insects, shellfish, and fish will have a better chance to survive. It is true that if fry and small fingerlings are carefully distributed in protected headwaters, a percentage will survive, but we may plant yearlings in the main streams of creeks with much greater impunity and with greater hope of success since fish of this age can more easily search out favourable sections of the stream for food and shelter. There are numerous lakes, also, where on account of the limitations of food supply, the planting of fry and fingerlings is undesirable. For example, lakes with both shallow and deep water, should produce more trout food for immature and mature trout than those with precipitous shores, where the shallow water fauna are extremely limited. In the latter case the planting of larger trout is desirable.

We must remember that the productiveness of any natural body of water is fixed by nature and our objective is to prevent fishing from reaching a low level. When a body of water becomes depleted to too low a level the increase of undesirables often goes on to such an extent that it becomes increasingly difficult for trout, especially young trout, to survive. The introduction of yearling and older trout, in such cases, is obviously a more practical procedure.

The following table illustrates the progress being made in the distribution of larger trout to suitable lakes and streams throughout the Province:

Length in Inches	1934	1935
3 to 7 inches	913,315	2,464,987
4 to 9 inches	19,538
4 to 16 inches	3,876	189,156

BROWN TROUT:

Brown trout are native to lakes and streams in the temperate portions of Great Britain, France, Germany, and other central European countries. The Loch Leven trout is a form of brown trout inhabiting Loch Leven in Scotland.

Brown trout have been introduced and are now fairly abundant in certain waters of the Great Lakes watershed. They have been propagated in Michigan since about 1880. Most of the early plantings of brown trout were in the fry stage, as a result of which they are now rather widely distributed especially in the lower peninsula. Brown trout are now being reared to the fingerling stage in Michigan and good results are claimed from these plantings to date. Brown trout are also established in the more southerly sections of Wisconsin and Minnesota, and also in New York State.

Conditions suitable for brown trout are closely parallel to those suitable for speckled trout, excepting that brown trout according to the experience of those best qualified to judge will endure much higher water temperatures than speckled trout, and hence are valuable for re-stocking lower stretches of streams which are no longer suitable for the latter on account of temperatures in excess of 75°F.

In a biological survey of the Genesee River system, in New York State, it was observed that with few exceptions brown trout were found in every stream inhabited by brook trout. However, in the colder brook trout streams, showing temperatures below 65°F. they were rarely encountered. They reached maximum size and abundance in streams ranging from about 68 to 75°F., and occurred in many others attaining temperatures as high as 80°F.

Our policy, and the general concensus of opinion of those who have had experience with this trout in America is that it should not be introduced into any waters where conditions are still suitable for native speckled trout, as experience

has shown that the brown trout become predominant, eventually, and replace brooks. They not only compete with brooks for food, but they spawn about the same time and are known to monopolize the spawning beds.

The lower reaches of many streams in southern Ontario do not possess suitable conditions for speckled trout. The headwaters of some of these streams, still provide suitable conditions for a limited number of small trout, but, on the whole, they could be more profitably stocked with browns. After careful survey and selection, a number of promising streams have been stocked in old Ontario and favourable reports have been received on some of these.

Brown trout are much more notional in their feeding habits than our native trout and hence are not so easily taken. They are considered a night feeder, and probably the best catches are made about dark, although there are many exceptions and good catches have been made during the day time. In view of the difficulties experienced in catching brown trout, they withstand heavy fishing pressure, and hence are valuable for re-stocking waters in populated areas.

There are several examples which testify to the fact that brown trout will live in lakes, but on account of the difficulty of capture in such an environment, from the standpoint of sport fishing, re-stocking seems impracticable. However, for the purpose of establishing natural sources of supply for brown trout eggs, the introduction to suitable and controlled areas is worth a trial. This was the Department's objective in re-stocking Brewer Lake, in Algonquin Park, as noted in the report of the Department for 1934.

A biological study of the lake was first carried out by setting test gill nets, etc., to determine the inhabitants of the lake, their relative abundance and their feeding habits. The lake was then intensively netted for mature trout, predatory and competitive fish. The catch was chiefly comprised of lake trout, speckled trout, suckers and ling. When the netting was completed, the outlet of the lake was suitably screened off and brown trout introduced. In addition to favourable biological features, the lake is also accessible and easily controlled.

RAINBOW TROUT:

A study similar to that conducted for brown trout was made on Costello Lake, located immediately below Brewer Lake and into which Brewer Lake drains. After screening the outlet, rainbow trout yearlings were planted directly into suitable parts of the lake and fingerlings were planted in the stream connecting Brewer and Costello.

The object of this work is to establish, if possible, a source of supply for collecting spawn in order to overcome the expense incurred in retaining domesticated stock in ponds.

The rainbow trout distributed in our waters show a strong migratory instinct to drop down to larger waters while they are yet immature. In this way they become lost to the stream in which they were originally planted, except during their return for spawning purposes. During the year fingerlings have been distributed in ponds, lakes and streams where the best possible results may be obtained. Care was taken to plant the rainbows in waters where spawning facilities were available and tributary to larger suitable waters.

As an illustration of some success of the introduction of rainbow trout, may we quote the result of planting rainbow trout fingerlings in Burnt Lake, Townships of Sherbourne and McClintock, District of Haliburton, in 1932:

"The development of Rainbow Trout in this water has been most satisfactory and the following is a record of fish taken during 1934, 35: J. M. Guide—5 from 15 to 18 inches long; B. B., Dorset—1, 2¼ lbs. in weight; A. M., Dorset, 3 about 16 inches long; A. T. W., Dorset, 3 about 16 to 18 inches long; L. R., Rochester, N.Y., 5 that were weighed at Robertson's stores and averaged 2½ lbs."

We have a supply of fall spawning rainbow trout breeders but how closely they will follow the fall spawning habit is questionable. It is reported officially, however, that this particular strain has a tendency to remain in the waters in which they are planted; they grow rapidly and withstand high temperatures. Spawn will not be collected from these fish until the fall of 1937, when they will be three years old. If any revert to a spring spawning habit, they will be segregated.

KAMLOOPS TROUT:

This species, described in a previous report, was introduced for the first time to a few specially chosen waters and these plantings will be carefully followed up to determine the results.

Kamloops trout spawn in streams and in lakes on bars at the mouths of spring streams. Although these fish do not spawn until April, May, or June, they are cultured similarly to speckled trout and in British Columbia live and thrive in waters suitable for speckled trout.

LAND-LOCKED SALMON:

The land-locked salmon or ouananiche was described in a previous report. The Department succeeded in planting 13,648 yearlings in specially chosen waters, and the results of these plantings will be carefully followed up. Lakes suitable for lake trout were chosen, since a closely related form thrives exceedingly well in a lake trout environment. The ouananiche, the chief centre of which is Lake St. John in Quebec, spawns in tributaries to that lake.

LAKE TROUT:

The number of eyed lake trout eggs distributed, set forth in the report November 1st, 1934 to March 31st, 1935, was nearly five times the number distributed in 1934.

More than six times as many fry were distributed in 1935 and over one million were planted in inland waters.

Half a million more fingerlings were distributed as compared with the previous year and nearly half the total distribution of lake trout fingerlings was planted in inland waters, thereby succeeding in the drive prophesied in the preceding report.

WHITEFISH:

Including that quantity of whitefish distributed between November 1st, 1934, and March 31, 1935, there was an increase in the 1935 planting amounting to slightly more than 13 per cent.

It should be stated that this distribution was exceeded only in 1924 and 1927.

HERRING:

There was an increase of 66.4 per cent. in the distribution of herring fry over that of the previous year, including one hundred thousand included in the report of the five months, November 1, 1934, to March 31, 1935.

YELLOW PICKEREL:

There was a decrease in the distribution of pickerel fry to the extent of approximately 48,841,000 due to an unsatisfactory run of pickerel in the Bay of Quinte.

Large numbers of fry were distributed to suitable inland game fishing areas.

SMALL-MOUTHED BLACK BASS:

There was a percentage increase in fry distribution over the previous year amounting to approximately 47 per cent. The Department was also successful in distributing more than four times as many fingerlings, that is an increase of over one hundred and seventeen thousand, in addition to 3,435 yearlings and adults, as compared with 420 adults in 1934.

LARGE-MOUTHED:

From one pond devoted to the culture of this species at the Mount Pleasant Hatchery, 130,000 fry and 2,153 fingerlings were distributed.

MASKINONGE:

As a result of the Department's operations on the Pigeon River at Omeme, 460,000 maskinonge fry were distributed to suitable waters.

The chief difficulties attending our operations this year were adverse weather conditions, that is sudden lowering of temperature from a gradually rising one and, also, the scarcity of ripe males and females. Abundance of eggs and a small amount of milt results in high fertility.

We have already discussed the unsuccessful attempts made on this Continent to rear maskinonge to the fingerling stage in appreciable numbers. Millions of fry have been produced in New York and Wisconsin hatcheries and Ontario can do likewise when sufficient spawning fish are available and when favourable spawning and hatching temperatures are actualities.

SANCTUARIES:

There is a tremendous demand for more and more black bass and maskinonge for maintaining the supply in our inland waters, since both of these species have a very great appeal to anglers. Our rearing ponds and hatcheries are doing good work, but considering the extent of Ontario's bass and maskinonge waters and the enormous resident and non-resident fishing population, we can scarcely hope to produce an adequate number of these species by pond culture to close the gap between supply and demand.

In addition to the imposition of suitable closed seasons, sane creel limits, the control of competitive and predatory species, and pollution, there is probably no more promising method of bass and maskinonge conservation than the establishment of sanctuaries, that is setting aside in certain suitable waters, a number of bays in which fishing of any kind is prohibited. The bass and maskinonge multiply in these areas without interference and spread to other parts of the said lake or stream, thus preventing depletion. By such means we may be approaching the ideal of maintaining a permanent breeding stock and taking each year only the natural increase from it.

In many areas of this kind maskinonge and large-mouthed black bass live and thrive. In many, also, there are mixed environmental conditions, so that small-mouthed black bass is a frequent inhabitant also. Closures of this nature will be followed up from time to time to determine the results and if there are deficiencies in these closed areas, we propose to remedy them, if possible. For example, condi-

tions in certain areas may be vastly improved by eliminating useless competitors or enemies, and a number of areas may show distinct possibilities for rearing lunge and bass under controlled natural conditions.

In view of an ever-increasing tourist trade, fishing for bass and maskinonge is becoming more and more intensive and considering the accessibility the ease and speed with which many of our waters may be invaded, it becomes increasingly evident that sanctuaries of this nature are necessary.

It is difficult to draw any hard and fast line between sanctuaries and closed areas enumerated below. In many of these and in many waters formerly closed, the sanctuary principle is evident. In many instances, however, the object of closure of an entire body of water is for stock and supply. Such an area is closed permanently to public fishing, so that quantities of bass may be removed each year by harvesting methods for re-stocking suitable waters in the vicinity. This type of closure is slightly different from the principle embodied in establishing sanctuaries but the same objective, namely practical re-stocking, is involved.

CLOSED WATERS:

The following waters were closed to all fishing during the year for the purpose and for the period specified:

Creamery Creek and Trout Rearing Pond in Harrison Park, Owen Sound—

Located in the Township of Derby, County of Grey,—closed until May 1st, 1939, for brown trout propagation.

North Lakes or Gravel Lakes and their connecting streams and Creek flowing from Fourth Gravel Lake to Whitefish Lake—

Located in unsurveyed territory west of the Township of Strange, District of Thunder Bay,—closed until August 22, 1938, for speckled trout propagation.

Silver Islet Creek—

Located in the Township of Sibley, District of Thunder Bay,—closed to all fishing until September 11, 1937, for speckled trout propagation.

A large number of waters were closed in 1936, and for information concerning these the Game and Fisheries Laws should be consulted.

REMOVAL OF COARSE FISH:

Between April 1, 1935, and March 31, 1936, hoop nets and trap nets were operated in the following lakes in Leeds and Lanark Counties, namely: Bennett, Christie, Pike, Otty, Rideau, Crow, and the Mississippi River, and a total of 1,818 ling were removed. Taking five pounds for the average weight of the ling from all of these lakes, 9,090 pounds were removed. Adverse weather conditions slowed up the work to a considerable extent. Blocked roads in the district prevented our officers from getting to the lakes as effectively as during previous winters when such work was undertaken.

Similar work was conducted on Lake Manitou, Manitoulin Island, where gill nets were set and a total of 2,416 pounds of ling were removed; the average weight of the ling was 4 lbs.

In order to have a more complete picture of the removal of ling from our inland waters, reference should be made to the report for the five month period, November 1st, 1934, to March 31, 1935.

WATER LEVELS:

In view of the shallowness of the water in which maskinonge, pike, black bass and forage fish spawn, sudden fluctuations in water levels over natural spawning beds are inimical. The Department has appealed to all those responsible for such operations and the Department of Railways and Canals was supplied with the following data on the waters on which they operate dams for power and navigation purposes, namely, the fish frequenting the waters, the spawning dates of the various species and the spawning depths. As a result we look for definite improvement along these lines. Judging from information received from our field officers, considerable improvement is evident.

NUTRITION OF TROUT:

During the fall, winter and spring of 1935-36 a number of feeding experiments were conducted in the Department's experimental hatchery in the Parliament Buildings, Toronto. The object of these experiments was to find a suitable food or mixture of foods that would produce healthy and vigorous trout at a lower cost than the food generally used, namely beef liver.

Previous investigations of this nature have been conducted by the Department and a short account of this was given in a report of December 21, 1935, entitled 'Ontario's Problems in Fisheries and Status of Research,' published in the proceedings of the Conference on Fresh Water Fish Culture, Ottawa, January 3rd, 1936.

The experimental hatchery contains four large glass aquaria 5' x 3' x 26" of water; six galvanized iron troughs, 2'4" x 6" x 6" of water; and four troughs, 5' x 10½" x 5" of water. (The small galvanized iron and wooden troughs were painted on the inside with paraffin varnish). Thus the experiments were divided into three groups and in each unit of each group, similar conditions prevailed. In each group a control unit was set up in which beef liver was used as a standard for comparison with the other feedings. Two per cent. by weight of cod-liver oil was added to all feedings. The diets used are tabulated below, indicating any changes made during the course of the experiments.

The diets used in the experiment and the percentages of the various constituents were as follows:

	Diet No.	Food	Percentage			
Group A Glass Tanks	1	Beef Liver	100			
	2a	Beef Liver Alewives	75 25			
	2b	Beef Liver Alewives	50 50	Feb. 3/36		
	3a	Beef Liver Soybean Meal	75 25			
	3b	Beef Liver Soybean Meal Pigmeal	40 10 50	Jan. 27	Jan. 31	Feb. 4
					50	50
					—	10
					50	40
	4	Beef Liver Pilchard Meal Ling	50 25 25	Sucker substituted for Ling April 27, 1936.		

	Diet No.	Food	Percentage	
Group B Tin Troughs	5	Beef Liver	100	
	6	Beef Liver Salmon Egg Meal	75 25	Lake trout egg meal used until Jan. 10th when salmon egg meal arrived.
	7	Beef Liver Pilchard Meal	75 25	
	8	Beef Liver Beef Heart Salmon Egg Meal Fish Mixture	20 14 17 34	Lake trout egg meal substituted for salmon egg meal until Jan. 10/36.
	9	Beef Liver Beef Heart Pilchard Meal Fish Mixture	20 14 17 34	
	10	Beef Liver Hog Melts Pilchard Meal Fish Mixture	25 25 25 25	
	Group C Wooden Troughs	11	Beef Liver Hog Melts Ling	50 25 25
12		Beef Liver Hog Melts Fish Mixture	50 25 25	
13a		Beef Liver Hog Melts	75 25	Jan. 18, 1936
13b		Beef Liver Hog Melts Salmon Egg Meal	50 25 25	
14		Beef Liver	100	

The fish mixture referred to was a mixture of equal weights of the flesh of the common sucker and ling. In the case of the alewife and gizzard shad, the entire fish was ground up.

Each unit of each group was fed the same weight of food and the amount fed was regulated in such a way that a minimum of uneaten particles was left on the bottom of the tank or troughs. Since there is no accurate way of measuring this waste food and since it was fairly uniform in each unit of each group, it was not included in the calculations.

At regular intervals the fish were weighed and the weight increase for that period was obtained. From this, the increase in weight for 100 fish could be

calculated and by taking the total increase in weight per 100 fish for the duration of the experiment and dividing it into the total amount of food fed per 100 fish the number of grams (or pounds) of food required to produce one gram (or pound) increase in weight of the fish was determined. This figure is called the 'efficiency factor.' Naturally, the lower this figure is, the more efficient the food.

Summarizing the details of the experiment we have the following results:

1. Diets 3a and 3b cannot be considered since, after feeding for a period of 132 days the fish began to die from an intestinal disorder which could only be blamed on the diet.
2. Diet No. 4 cannot truly be compared with the other diets of group A, since rainbow trout were fed, whereas the other diets of the group were fed to speckled trout. A different growth rate would be expected. However, it should be stated that these fish progressed in health and weight very satisfactorily and there was every reason to believe that the diet was a good one.
3. Diets 2a and 2b excelled diet No. 1, namely the liver control, as shown in the following table:

Diet No.	Cost for one pound increase in fish weight	
	Diets 2a and 2b and 2a+2b	Liver Control for same Period
2 a	62.5c	84.0c
2 b	69.2c	107.1c
2a+2b	67.4	95.5c

4. In Group B the diets appear in the following order from the standpoint of economy, namely, 8, 10, 7, 9, 6, and 5 (liver control).
5. In Group C diet 13a is the only one that showed any improvement over the liver control diet No. 14. The addition of salmon egg meal to this diet apparently proved uneconomical in this case.
6. Diet 2 appears to have excellent possibilities as an economical trout food. In view of the absence of suitable refrigeration facilities, at trout rearing stations, the use of raw fish products as food, during the summer months, is surrounded by many practical difficulties. During the winter, this difficulty can be overcome to a considerable extent, but there is the additional difficulty of keeping the fish in a wholesome condition for long periods. Processing the whole fish into a meal is a practical way of handling this food, and obviates the possibility of transferring fish parasites in the raw fish food. We have had several tons of alewives processed and found the meal mixed with raw beef liver equally as good as the fresh fish. The question of drying the fish has been considered, but this method has not been used to date, for the reason that quantities of alewives were difficult to obtain during that period when air drying would be most practicable.

Diet 13a should also be considered as well as the diets of Group B. Diets 8, 9, and 10 of this group include fresh fish and would present the same problem regarding preservation as diet 2. Diets 6 and 7 do not present these difficulties.

ACKNOWLEDGMENTS

In conclusion I desire to publicly express my appreciation of the assistance and support received by the Department from many sources during the year 1935-36.

Our work, which at times may be somewhat difficult and perhaps onerous, has been made the more pleasant and enjoyable by reason of the continued co-operation of interested persons and the various Fish and Game Protective Associations which

exist throughout the Province, and the personal contacts of myself with the officers and members of many of these organizations, and the assurances derived therefrom, are an evidence of the fact that the genuine sportsmen of this Province are interested in the work of the Department in every line of its endeavour, and more particularly in the policy and practice being followed to ensure a perpetuation for the mutual advantage of all our people of the wild life natural resources of this Province.

Mention might also be made of the fact that generally speaking, members of the staff, both the inside and the outside service, have conducted themselves and performed the duties assigned to them in the best interests of the Department and its varied activities.

All of which is respectfully submitted.

I am, Sir,

Your obedient servant,

D. J. TAYLOR,

Deputy Minister of Game and Fisheries

Toronto, March 10, 1937.

APPENDIX No. 1

SPECIES AND QUANTITIES OF FISH PLANTED IN PROVINCIAL
WATERS, 1935-36

Report

OF THE

Game and Fisheries Department

FOR THE FIVE MONTHS' PERIOD
ENDING MARCH 31st, 1935.

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 9, 1936

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty

1 9 3 7

TO THE HONOURABLE HERBERT ALEXANDER BRUCE,
a Colonel in the Royal Army Medical Corps, F.R.C.S. (Eng.),
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith for the information of Your Honour and the Legislative Assembly, Report of the Game and Fisheries Department of this Province for the Five Months' Period ended March 31, 1935.

I have the honour to be,

Your Honour's most obedient servant,

H. C. NIXON,
Minister in Charge,
Department of Game and Fisheries.

Toronto, April 2, 1936.

Report of the Department of Game and Fisheries

- OF ONTARIO -

For the Five Months Period ended
March 31, 1935

TO: THE HONOURABLE H. C. NIXON,
Minister in charge,
Department of Game and Fisheries.

SIR:—I have the honour to place before you this Report of the activities of the Department of Game and Fisheries during the five months' period, commencing November 1st, 1934, and ending March 31st, 1935.

In this report it will, of course, be impracticable to attempt comparative statements for obvious reasons, though statistical tables for the period under review have been prepared and are incorporated herein.

FINANCIAL

The revenue collected by the Department amounted to \$258,348.04, and details of the various sources from which it was derived are as set forth in the subjoined table.

REVENUE FOR THE FIVE MONTH PERIOD ENDING MARCH 31, 1935

GAME—

Royalty	\$ 34,307.15
Licenses—	
Trapping	\$ 14,070.90
Non-resident Hunting	30,315.45
Deer	48,684.40
Moose	2,194.50
Gun	39,564.72
Fur Dealers	14,536.00
Fur Farmers	5,585.00
Tanners	156.00
Cold Storage	64.00
	<hr/>
	155,170.97
	<hr/>
	\$189,478.12

FISHERIES—

Royalty	\$ 1,101.67
Licenses—	
Fishing	49,243.90
Angling	7,338.85
	<hr/>
	56,582.75
Sales—spawn taking	61.00
	<hr/>

57,745.42

GENERAL—

Guides' Licenses	370.00
Fines	3,761.00
Sales—Confiscated Articles, etc.	3,696.84
Rent	1,635.50
Commission	849.87
Miscellaneous	811.29
	11,124.50
	\$258,348.04

Quite naturally, the game division brought in by far the greater percentage of this revenue,—fishing, and more particularly angling, by reason of the weather conditions which prevail during this period being very extensively curtailed. It will be of interest to state that this revenue exceeded the amount which it was estimated would be collected.

The exercise of judicious supervision over expenditures was very essential, and while the total in this respect amounted only to \$168,202.67, it is submitted that the various results achieved were creditable, and that the proportionately reduced expenditures did not noticeably interfere with the proper performance of Departmental activities or the provision of necessary services.

GAME

In all, some 18,767 licenses to hunt big game, i.e. deer and moose, were issued under the following divisions:—

Resident licenses to hunt deer	17,584
Resident licenses to hunt moose	399
Non-resident general licenses	397
Non-resident deer licenses	387

In addition we also issued some 317 non-resident licenses to hunt small game animals and birds.

The foregoing figures are an indication that the attractions which the game of this Province affords to the interested sportsman and hunter have a prominent place in our scheme.

A limited distribution of game birds was undertaken during this period,—417 English ring-necked pheasants and 597 Hungarian Partridge according to Departmental records being liberated in different sections of the Province in which suitable environment for these desirable species of game birds was available.

In the matter of Crown Game Preserves, while much preliminary work was done in connection with suitable areas which have been subsequently established as Game Preserves, in only one case, that of the Pond Mills Crown Game Preserve, in the County of Middlesex, was final action provided, and this was the only Crown Game Preserve established during the period under review.

FUR

Active trapping operations were, of course, carried on during this period, though it would include but a very short portion of the open season for the taking of muskrat, one of the principal mainstays of our trapping industry.

The following table will show the number of pelts of various fur-bearing animals taken by trapping and sold to licensed fur buyers, as well as the numbers exported from the Province and dressed within the Province respectively.

	Total Pelts	Pelts Exported	Pelts Tanned
Bear	180	60	105
Beaver	4,356	2,055	33
Fisher	1,451	869	4
Fox (cross)	5,160	3,951	63
Fox (red)	27,501	21,109	1,699
Fox (silver black)	560	381	16
Fox (white)	904	31	1
Fox (not specified)	432	315	6
Lynx	2,180	1,039	9
Marten	943	574	12
Mink	62,162	53,606	1,171
Muskrat	28,340	12,762	15,002
Otter	2,439	1,066	7
Raccoon	11,919	5,764	6,036
Skunk	48,204	23,243	16,124
Weasel	36,904	26,975	433
Wolverine	1	1	—

Revenue from royalties actually received on the pelts exported and tanned, as indicated on the statement of revenue included in this Report amounted to \$34,307.15. This figure does not represent the total amount actually due, for the reason that the large fur companies operating numerous posts in the extreme northern portion of the Province, under an agreement with the Department, balance their fur royalty account at the end of the season, thus certain royalties due on pelts exported and tanned by these companies during the period under review were not received in the Department until after the expiration of this particular period.

Based on average prices which it is believed are reasonably accurate and fair, it has been estimated that for the pelts as shown in column 1 of the above table, trappers would receive from the sale thereof in all a total sum of \$1,024,888.28.

The previous table does not include pelts of silver, black and blue foxes raised on licensed fur farms, which are exempt from the payment of royalty. According to the fur records branch, 15,829 such pelts were exported and 1,587 tanned in the Province, and it has been estimated that in the case of these pelts, the sale of the same secured in excess of \$615,000.00 for the fur farmers responsible for producing the same.

FUR FARMING

Details of live animals stocked on licensed fur farms as at January 1st, 1935, together with similar figures for other years are tabulated below.

ANIMALS STOCKED ON LICENSED FUR FARMS

As at January 1st

	1933	1934	1935
Beaver	44	60	78
Fisher	50	18	19
Fox (cross)	559	443	434
Fox (red)	448	360	286
Fox (silver black)	15,938	16,826	19,314
Fox (blue)	13	10	10
Lynx	2	2	2
Mink	6,170	6,190	8,605
Muskrat	511	499	447
Raccoon	1,202	989	799
Skunk	10	2	—
Bear	16	14	11
Marten	37	22	9
Badger	4	—	—

The number of Fur Farmers' licenses issued during the period was 1081, chiefly comprised of renewals of existing licenses which expired December 31st, 1934.

WOLF BOUNTIES

During the period the Department paid bounty in respect of 1,859 wolves, which is exactly the same number of pelts upon which bounty was paid during the preceding fiscal year. The basic rate of bounty was \$15.00 for an adult wolf and \$5.00 for a pup. In respect to wolves killed in any County, the bounty is paid by the County Treasurer and the Government rebates 40% of the amount to the County.

Details of the expenditures incurred in this connection are as follows:—

1,787	adult wolves at \$15.00	\$26,805.00
x 66	adult wolves at 6.00	396.00
4	pup wolves at 5.00	20.00
x 2	pup wolves at 2.00	4.00
<hr/>		
1,859	Amount of bounty	\$27,225.00
	Expenses	102.58
<hr/>		
	Total Expenditures	\$27,327.58
x Killed in Counties.		

ENFORCEMENT

It was encouraging to observe the improvement which has been evident in this particular division of our work. The services of the regular staff of Overseers maintained by the Department to secure observance of the provisions of the Game and Fisheries Act and Regulations was appreciably augmented by the co-operation which was provided by members of the Ontario Provincial Police Force, and which co-operation is now a permanent feature of this branch of our activity. In addition to this particular improvement, we find an increasing desire on the part of interested sportsmen, both hunters and anglers, to co-operate with us in assisting our regular Overseers to maintain a proper degree of respect for our Game and Fisheries Regulations, even to the extent that in many cases in order to provide themselves with credentials of authority they accept appointments as Deputy Game Wardens, acting without remuneration, rendering co-operation, and providing a measure of service, the value of which, particularly from the moral point of view, it would be exceedingly difficult for us to estimate, and it is fitting and proper at this point in the report that expression should be given to our appreciation of this invaluable assistance and co-operation.

Records show that during the period under review there were 414 cases of infractions in which the offenders were prosecuted in the courts and in which convictions were secured and penalties imposed. In 267 of these cases, the action was originated by Game and Fisheries Overseers; in 104 by members of the Provincial Police force; in 13 by Deputy Game Wardens; and in 30 by co-operative action, Overseers, Deputy Game Wardens and Provincial Police acting in conjunction.

In all there was a total of 455 cases in which seizure of goods and equipment was involved. Here again it is shown that the action was provided by Game and Fisheries Overseers in 313 of these cases; by members of the Provincial Police Force in 52 cases; by Deputy Game Wardens in 58 cases; and in the remaining 32 cases by the co-operative action as previously set forth.

A condensed summary of the articles thus seized shows the following:—

Description of Articles	Number of Seizures
Live Animals	5
Birds, Animals and Game Meat	64
Fire-arms and Ammunition	211
Fish	21
Fishing Equipment (Nets &c.)	69
Miscellaneous Articles	12
Pelts	84
Trapping equipment	61
Water Craft and Motor Cars	11

While the total of this table would indicate 538 seizures, some of the actual 455 seizure cases would be duplicated in these entries; such as one seizure might report fire-arms, as well as birds etc.; another, fish and fishing equipment; while still others would include traps and pelts, and the apparent discrepancy is therefore accounted for by these various duplicate entries from one seizure report.

EXPERIMENTAL FUR FARM

During the period under review, an investigation was carried out regarding the digestibility of various cereal foods for foxes. The first problem investigated was the place of raw and uncooked cereals in the diet. The use of raw cereals finely ground has been widely advocated from time to time as a time and labour-saving method. However, the experimental data secured with test foxes receiving raw ground oatmeal, rice, whole wheat flour and corn meal, revealed quite definitely that they were not properly digested either singly or in combination with one another. The feces showed considerable quantities of undigested starch, thus demonstrating that the fox is unable to reduce starch to an assimilable form in the raw state. On the other hand, when the cereals mentioned above were thoroughly cooked for the period of one hour or so, the foxes were able to digest it very thoroughly. No raw starch could be demonstrated in the feces of these animals.

Further studies were carried out with the round worm and its relation to pathological conditions which are often found in the lungs of young fox pups from one to two weeks of age. From the time the egg is swallowed by the fox it is 51 to 52 days until the female worm reaches naturity and is producing eggs. Once the larvae hatch, they migrate through the body and cause a serious disturbance in the blood cells. This disturbance reaches the peak around the 12th day. It has been definitely established that pups become infected with round larvae previous to birth and that the pregnant female, if infected with larvae, can pass them to the pups by way of the blood stream. An examination of many pups which died in early age show that the small blood vessels of the lungs have been ruptured by the larvae, leading to serious pneumonia complications and often death. It is obvious that fur farmers, (once the cold weather has commenced in the Fall, and which weather conditions prevents parasitic eggs from developing) should make serious efforts to rid all females of adult worms by the use of capsules containing worm-destroying properties. A more detailed account of these experiments has been published in the fur farming press and the results have also been extended to fur farmers by lectures delivered at regional meetings held throughout the Province.

Apart from this work, the customary routine and post mortem examinations of animals sent from ranches for diagnostic purposes were carried out.

FISH CULTURE BRANCH

(See Pages 11, 12 and 13.)

REPORT OF THE BIOLOGICAL AND FISH CULTURE BRANCH

COLLECTION OF SPAWN

Generally speaking, the spawning season of lake trout, whitefish, and herring in the Great Lakes falls to some extent within the period of this report. The spawning season varies according to the species and the geographical, climatic, and limnobiological conditions existing in the various areas.

It would be out of place to go into a discussion of spawning seasons within the compass of this report. It is sufficient to say that during the fall spawntaking crews are organized for the purpose of collecting spawn of the commercial species for our various hatcheries which are located at strategic points along the Great Lakes' chain. In addition to the work of the hatchery crews, the Department has received

excellent co-operation in this respect from the commercial fishermen under the direction and guidance of the Branch. This team play resulted in a satisfactory production of eggs of commercial species and their resultant fry for re-stocking suitable sections of the Great Lakes and commercially fished inland waters. Lake trout are sought after by anglers to a considerable extent in the inland waters of the Province; these waters also receive necessary replenishment from time to time with hatchery stock.

It should be pointed out that an important principle is involved in the establishment of hatcheries on the various Great Lakes and connecting waters, namely, that the eggs collected from such areas are cultured in water of similar composition to that in which the species cultured live and thrive in a natural state, and in which the fry artificially cultured will ultimately be planted. Behind the establishment of district hatcheries there is also the same underlying principle.

The temperature of the water in these commercial fish hatcheries is, generally speaking, the same as the water over the natural spawning grounds where the young fish are developing from the time the eggs are laid on these grounds in the fall, during the winter, and until they hatch in early spring. In the hatchery, however, the eggs are protected from the hazards of a natural environment and are, therefore, carried over a critical period in the life-history of the fish.

Speckled trout spawn was collected from breeders retained in our breeding ponds at Dorion, Sault Ste. Marie, and Normandale. Brown trout eggs were collected from a breeding stock at Mount Pleasant and rainbow trout eggs from a breeding stock at Normandale.

DISTRIBUTION

Very little distribution is done at this period of the year, but during an advanced spring the fry of the whitefish and herring, especially the former, hatch rapidly and must be distributed, since they can be held in the tanks in the hatchery for a limited period only. The distribution made in accordance with directions issued by the Branch was as follows:

Whitefish	
Lake of the Woods	4,000,000 fry
Lake Erie	96,620,000 "
Lake Ontario (proper)	10,000,000 "
Bay of Quinte	20,000,000 "
Total	130,620,000 "
Herring	
Lake Erie	100,000 fry

The following distribution of lake trout eyed eggs was carried out on an exchange basis:

Federal Hatchery at Banff, Alta.	100,000	eyed eggs
Federal Hatchery at Middleton, N. S.	102,800	" "
Hatchery at French River, U. S. A.	700,000	" "
Pendleton Oreille Hatchery	100,000	" "
Hatchery at Colville, Washington	200,000	" "
State Fish Hatchery, Canaan, Vermont ...	209,800	" "
Government Hill Hatchery, Augusta, Maine .	102,800	" "
State Fish Hatchery, Colebrook, N. H.	308,400	" "
Monmouth Hatchery, Monmouth, Maine ...	102,800	" "
Total	1,926,600	" "

The arrangement with the Canadian Hatcheries was made through the Department of Fisheries, Ottawa, whereby eyed lake trout eggs were exchanged for 100,000 eyed Kamloops trout eggs from Kamloops hatchery, British Columbia. The exchange with the United States hatcheries was on the basis of an equal quantity of eyed speckled trout eggs in return for an equal quantity of lake trout eggs.

In addition to the above, the following distribution of game-fish was made:

Brown Trout		
Experimental purposes	100	yearlings
Rainbow Trout		
Experimental purposes	2,000	eggs
Private waters (sale)	3,000	fingerlings

REMOVAL OF NOXIOUS FISH

From January 29, 1935, to March 12, 1935, hoop nets and gill nets were operated in suitable parts of Lake Mindemoya and Lake Manitou, Manitoulin Island, for the purpose of removing ling during their spawning season. As a result, 2,431 ling were removed from Lake Manitou and 80 from Lake Mindemoya. The average weight of the ling taken from these lakes was 6 pounds and the total weight of ling removed was 15,066 pounds.

From December 21, 1934, to January 28, 1935, similar work was conducted in the following waters in Leeds and Lanark counties with the following results:

	No. of Ling Removed	Average Weight	Total Weight
Pike Lake	727	8	5,816
Bennet's Lake	199	5	995
Christie's Lake	334	8	2,672
Otty Lake	718	3	2,154
Otter Lake	26	4	104
Rideau Lake	415	5	2,075
			13,816

The removal of ling from these waters is valuable, in view of their known depredations on game-fish.

EXPERIMENTAL HATCHERY

In conjunction with the Branch laboratory, facilities were provided for carrying over limited quantities of fish in an experimental hatchery, a miniature of the standard hatchery provided with standard hatchery equipment. The hatchery was established for the purpose of continuing studies on the nutritional requirements of trout, the diseases of fish, and to check various phases of hatchery practice.

ACKNOWLEDGMENTS

In conclusion I desire to express my appreciation of the assistance and support rendered to the Department during this period. More particularly would I mention the various Fish and Game Protective Associations and allied organizations throughout the Province, the officers and members of which have at all times displayed keen interest in our work and exhibited a desire to see that the legislation for the administration of which we are responsible is equally fair to all concerned, and to this extent have therefore encouraged the Department in its efforts by an impartial administration to secure, as far as possible, proper observance of Game and Fisheries Regulations and thus promote improved conditions in the Province.

All of which is respectfully submitted.

I am, Sir,

Your obedient servant,

D. J. TAYLOR,

Deputy Minister of Game and Fisheries.

Toronto, April 2nd, 1936.

REPORT OF THE DEPUTY MINISTER OF LABOUR

For the Fiscal Year Ending March 31, 1936

TO THE HON. DAVID CROLL,

Minister of Public Welfare, Municipal Affairs and Labour.

SIR:

I have the honour to submit to you the following Annual Report of the Department of Labour of the Province of Ontario, including the Annual Report of the Minimum Wage Board, for the fiscal year ending March 31, 1936.

EMPLOYMENT CONDITIONS

Employment conditions showed continued improvement in Ontario during the fiscal year, as indicated by the index numbers of employment compiled by the Dominion Bureau of Statistics. These statistics are based on returns from more than 4,000 firms in which are employed over 395,000 persons, the index number average for the calendar year 1936 being 100. The index number average for the fiscal year ending March 31, 1936, was 104.1 as compared with 102.9 for the previous year. Advances were reported in twelve of the thirteen divisions of industry, the most notable being in logging, iron and steel, and in the mining industry, ranging from 11 to 30 points. These gains, however, were largely offset by a substantial decrease in the volume of employment in the construction industry.

Improvement in employment conditions was further indicated by the decrease in the percentage of unemployment reported among trade union members. The average for the fiscal year was 13.0 as compared with 17.4 for the previous year, or a decline of 4.4 points.

INDUSTRIAL DISPUTES

During the fiscal year 1936 there were 50 industrial disputes reported in Ontario, in which 9,120 workers were involved in a time-loss of 78,511 working days. These figures indicate a decided decrease in the volume of industrial unrest as compared with the fiscal year 1934, when the time-loss was more than three times this amount. Ten of the disputes, involving 1,549 workers, were settled in favour of the workers; 13, involving 773 workers, were settled in favour of the employers; 20, involving 4,714 workers, were settled by compromise; 2 were partially successful or indefinite and 5 were unterminated at the end of the fiscal year.

Almost half of this time-loss was due to two strikes in the logging industry involving 2,267 workers in a loss of 35,334 days. For the fiscal year 1934 the time-loss in this industry in Ontario was 123,365 days. It is worthy of note in this connection that, in the Thunder Bay District where most of this trouble took place, there were no strikes in the industry during the spring of 1936 when the schedule covering logging in this district pursuant to the Industrial Standards Act was in force.

In 7 of the 50 disputes, involving 1,645 workers in a time-loss of 10,513 working days, officials of the Department of Labour of Ontario assisted in negotiations and in all but one strike were successful in bringing about a settlement.

LEGISLATION

Four Acts administered by the Department of Labour were amended during the 1936 session of the legislature.

The Factory, Shop and Office Building Amendment Act:—This amendment requires employers in restaurants to keep registers of the women and young persons employed in the same manner as employers in factories and shops are required to do. It enlarges the scope of the regulations which may be made by the Lieutenant-Governor in Council for the protection of persons employed in processes involving the use of benzol or other industrial poisons by including processes in which other dangerous or harmful substances are used.

The amendment re-enacts the section relating to industrial homework, making it applicable to the whole Province instead of only to cities of 50,000 or over as formerly. Both homeworkers and their employers are required to obtain permits before such work is given out. No permit may be issued to a worker unless his health and the sanitary conditions of the premises are satisfactory to the inspector. No employer's permit is to be issued to any person unless the inspector is satisfied he is likely to comply with the Minimum Wage Act and the wages paid for such work must not be less than those established by the Minimum Wage Board for such employment. Employers are required to keep registers of their homeworkers and particulars of their employment. Permits of employers or homeworkers may be cancelled for violation of these provisions and a homeworke's permit may be cancelled because of ill-health or of the unsanitary conditions of the premises, which may be inspected at reasonable times. Provision is also made for the disinfection or destruction of articles considered injurious to the public health.

The Minimum Wage Amendment Act:—This amendment provides for all members of the Minimum Wage Board holding office during pleasure and for the payment to them of salaries to be determined by the Lieutenant-Governor in Council. The amendment requires that, except as provided by an order of the Board or with its written permission, the full amount of the minimum wage due employees is to be paid in cash or by cheque payable at par at the place where the work is done by the employees, and any agreements between employers and employees to waive or forego any provision of the Act or any agreement to refund a part of the minimum wage shall be null and void and shall be deemed an offense by the employer. The minimum penalty of "not less than two months" is deleted from the Act.

A new section added to the Act authorizes the Board to negotiate a settlement of a wage claim. If an employer fails to carry out the provisions of any such settlement to which he has agreed a magistrate may make an order for the payment of the amount unpaid under the terms of the settlement and a penalty not exceeding the balance unpaid under the order plus an amount of from \$10 to \$100 is provided for failure to carry out such an order.

The Apprenticeship Amendment Act:—This amendment provides for the Provincial Apprenticeship Board to hold office during pleasure and to serve without remuneration as the three members of the Board are officials of the Government. The Board is to submit the annual report to the Minister and all contracts of apprenticeship are to be registered with the Board. The scope of the regulations which may be made by the Board, subject to the approval of the Lieutenant-Governor in Council, has been increased to include such matters as the examination of and the issuance of certificates of qualification to persons engaged in a trade at the time it

becomes a designated trade; the registration of employers in a designated trade and the issuance to them of certificates of registration and the fees for examinations and certificates.

The Board shall appoint a provincial advisory committee for each designated trade or group of trades, such committee to have authority to make for its trade regulations not inconsistent with the regulations of the Board. In particular these regulations may prescribe the age of apprentices, the period of apprenticeship and the number who may be apprenticed to each employer, and changes in the regulations may be made according to stated procedure.

The provincial advisory committees may appoint local apprenticeship committees to assist with matters relating to their particular trade in the locality. The constitution, powers and duties of the provincial advisory committees and the local apprenticeship committees and the qualifications of members are set forth in the amendment. The term "Chief Inspector" has been changed to "Director" and the restriction of apprentices to minors has been removed since apprentices over 21 years are accepted in some trades.

The Industrial Standards Amendment Act:—This amendment clarifies the intent of certain sections of the Act. In its present form the Act provides that the Minister of Labour may authorize the Industrial Standards Officer to convene a conference of employers and employees in any industry within a designated zone or zones, if representatives of either group petition for such conference, for the purpose of investigating and considering conditions of labour and the practices in such industry and for negotiating an agreement. The conference may submit to the Minister a written schedule which may establish the maximum number of hours comprising the regular working day and week and the particular days of the week for the performance of labour in the industry affected, and the minimum rates of wages for regular working periods and for overtime and the conditions governing overtime. It may also classify the employees and provide separately for each classification with respect to any matter dealt with in the schedule and may define any terms used in the schedule.

If the Minister considers the schedule to be agreed to by a proper and sufficient representation of both employers and employees the Lieutenant-Governor in Council may declare such schedule to be in force during pleasure, or for the period, not exceeding twelve months, stipulated in the schedule, and it shall then be binding upon all employers and employees in the industry and within the zone to which the schedule applies. After the schedule has been in effect for not less than twelve months, a new conference may be convened for the purpose of arriving at a new schedule. The schedules become effective ten days after publication in the Ontario Gazette and employers are required to keep a copy posted in a conspicuous place where employees may easily read it.

The minister may set up for every zone or group of zones covered by a schedule an advisory board of not more than five members to hear complaints, fix minimum rates for handicapped workers, and assist generally in the enforcement of the Act and regulations. An appeal from any decision of the advisory board may be taken to the Minimum Wage Board, whose decision shall be final. The Minimum Wage Board is charged with the enforcement of the Act, the regulations and schedules, and is empowered to demand information and to inspect records of any employer affected by a schedule in force.

Penalties are provided for both employers and employees violating schedules applicable to them and a convicted employer must pay arrears of wages to the employee unless the employee has been guilty of collusion, in which case the unpaid wages may be paid to the Minimum Wage Board.

The Act applies to persons engaged in industry, with the exception of the mining and agricultural industries.

The Government Contracts Hours and Wages Act:—This is a new statute which provides for fair wages and an eight hour day and a forty-four hour week on works undertaken by the Government of Ontario by contract, and on works towards which provincial aid is granted by way of contribution, subsidy, loan, advance or guarantee. Every contract for these purposes is subject to such conditions as to wages and hours, but the conditions do not apply to the purchase of materials or equipment for use in the work contemplated under a contract of sale and purchase. Fair wages are defined as such wages as are generally accepted as current for competent workmen in the district in which the work is being performed for the character or class of work in which such workmen are respectively engaged, but shall in all cases be such wages as are fair and reasonable. Provision is made for regulations pursuant to the Act and non-compliance with the Act or regulations may entail a penalty of from \$50 to \$500. The Act and regulations are to be construed subject to the provisions of The Industrial Standards Act, The Minimum Wage Act and The Public and Other Works Wages Act. This Act will come into force on January 1, 1937.

ONTARIO GOVERNMENT OFFICES, EMPLOYMENT SERVICE OF CANADA

During the fiscal year, 140,265 placements were made by the Ontario Government Offices of the Employment Service of Canada. As compared with the previous fiscal year, this was a decrease, due largely to the reduction made by municipalities in their programmes of unemployment relief work during the past year. An encouraging feature, however, was the fact that in 1936 approximately 50 per cent. of the total placements were placements of a regular nature, that is, for employment lasting at least two weeks, whereas in 1934 only 40 per cent. of the placements were regular.

There were 149,043 vacancies reported to the offices, approximately 95 per cent. of which were filled, and 326,857 applications were made for work.

The special service rendered handicapped ex-service men in co-operation with the federal Department of Labour resulted in the placement of 1,750. During the winter months approximately 3,000 men were placed with the White River-Schreiber section of the Trans-Canada Highway.

BOARD OF EXAMINERS OF OPERATING ENGINEERS

The work of the Board of Examiners of Operating Engineers was carried on in the usual manner. The increase in the volume of work accomplished by the Board may be indicated in the following figures:— the net revenue of the Board, \$24,921.82, showed an increase of \$399.22; the number of certificates issued, 16,451, showed an increase of 201, and the number of candidates examined, 1,676, showed an increase of 190 as compared with the fiscal year 1934. Of the 1,676 candidates, 668 were examined at the Toronto office of the Board, where examinations were held daily except Sundays and holidays and 1,008 were examined at the thirty-eight outside centres most convenient to the candidates and where eighty-one sessions were held by members of the Board.

BOILER INSPECTION BRANCH

During the fiscal year 302 drawings and specifications of boilers, air receivers and other pressure vessels to be constructed for use in the Province were surveyed and registered in the Boiler Inspection Branch, as compared with 289 in 1934. Of new boilers and other pressure vessels 463 first, 315 second and 459 final inspections were made by inspectors of the Branch, and of used boilers and other pressure vessels the number of inspections, including 279 annual inspections, totalled 930. Altogether 2,286 certificates were issued during the year, as compared with 2,004 in 1934, and the sum of \$13,534.14 was transmitted to the Treasurer of Ontario.

FACTORY INSPECTION BRANCH

The fiftieth report of the Factory Inspection Branch records a busy year for the Branch and more satisfactory conditions prevailing in the industries of the Province. The improvement in business in manufacturing plants resulted in increases in the number of employees, longer hours in many instances and increases in the numbers of permits issued both for overtime and for double shift for female workers. While the value of industrial building did not increase during the year in keeping with the expansion in business, a greater proportion than ever before in the number of plans submitted were for additions to existing plants, which is an encouraging feature.

A total of 22,244 inspections were made by the inspectors and 6,629 orders were issued during the year. The accidents reported to the Branch numbered 3,037, of which 25 were fatal as compared with 32 in 1934. The permits issued numbered 3,009, chief among which were 2,175 for overtime, 53 in connection with work in bakeshops, 153 for double shift for female workers and 606 for homeworkers. Details of the amendment to section 51 of the Factory, Shop and Office Building Act, dealing with homeworkers, are given under the heading of Legislation. By this amendment homeworkers throughout the Province were brought under the supervision of the Factory Inspection Branch, both the homeworkers and the employers giving out homework being required to obtain permits. The wages paid must not be less than those established by the Minimum Wage Board for such employment.

APPRENTICESHIP BOARD

A decided revival of activities under the Apprenticeship Act took place during the fiscal year 1936. The motor vehicle repair industry was added to the designated list, the barbers and hairdressers made formal petition to be brought within the scope of the Act and preliminary steps were taken by the commercial artists, photo engravers, bakers and a number of other trades.

Since the Act became effective 1,806 apprentices have been registered to date, of whom 1,042 have completed their training and received diplomas, 337 have had their contracts cancelled for various reasons and 330 were being trained on March 31, 1936. During the past year 107 apprentices were indentured and it is apparent that the construction industry will be considerably hampered within the next few years because of a shortage of skilled mechanics unless the number of apprentices is greatly increased. It is expected that increased activities under the Industrial Standards Act will increase the scope of activities of the Apprenticeship Board, since attention is being focused on the need of adequate training facilities in trades

covered by schedules pursuant to this Act and the desirability of exempting apprentices from the provisions of the schedules during the period of their apprenticeship.

MINIMUM WAGE BOARD

The Minimum Wage Board continued its efforts in the rigid enforcement of the Minimum Wage Act and the orders of the Board. During the year wage returns were collected from 9,162 employers covering 105,840 female employees. From an analysis of these returns it was found that 2,604 employees in 1,166 firms were being paid less than the minimum wage required and orders were issued for an immediate adjustment of the wage rate or hours. In cases of excessive underpayment steps were taken by the Board to collect arrears owing employees. Complaints of alleged underpayments or of other violations of the Act totalled 887 for the year and the sum of \$29,778.86 was collected as arrears of wages from 593 employers on behalf of 967 employees. Fines amounting to \$460 were imposed by magistrates in 11 cases, in addition to the payment of arrears. It is the opinion of the Board that the need for such legislation was never more apparent and that employers as a whole are in agreement with the provisions of the Act.

INDUSTRIAL STANDARDS ACT

Under the Industrial Standards Act the Industrial Standards Officer directs all activities in connection with the convening of conferences, the drafting of schedules and obtaining their approval by Order-in-Council. After the schedules have been gazetted, thereby taking on the force of law, their enforcement becomes the responsibility of the Minimum Wage Board.

At the close of the fiscal year 35 schedules were in effect pursuant to this Act. It is not possible to estimate with any degree of accuracy the extent to which wages have been increased as a result of these schedules, since many employers adjusted their rates to conform with schedule rates as soon as schedules were approved. A total of \$946.89 was collected from 30 employers as arrears of wages due 45 employees during the year.

CONCLUSION

As indicated in the reports of the various branches, the work of the Department of Labour was increased considerably during the fiscal year. Several adjustments were therefore made in order to cope with the volume of work as far as possible without adding to the staff. The organization of the inspectors, formerly attached to certain branches, into a departmental inspection service was an important feature of this adjustment which has proved a decided success. The willing co-operation of all members of the staff has been appreciated and their readiness to meet unexpected demands has greatly aided our endeavour toward economy of administration. The administration of the Industrial Standards Act has led to new contacts between this Department and groups of employers and employees in different trades throughout the Province. May I acknowledge our appreciation of the harmonious relations maintained and the services of all those who have assisted us in our efforts on behalf of those engaged in industry in Ontario.

I have the honour to be, Sir,

Your obedient servant,

J. F. MARSH,

Deputy Minister of Labour.

**ONTARIO GOVERNMENT OFFICES OF THE EMPLOYMENT
SERVICE OF CANADA.**

GENERAL SUPERINTENDENT—H. C. HUDSON

Outstanding features of the work of the Ontario Government Offices of the Employment Service of Canada during the fiscal year ending March 31, 1936, included the development of closer co-operation with the offices of the relief administration, the extensive and successful farm relief campaign and the placement of more than 3,000 men on provincial highway jobs.

Below will be found a statement of the vacancies, applicants and placements in all offices during the twelve month period.

**ONTARIO GOVERNMENT OFFICES OF THE EMPLOYMENT SERVICE
OF CANADA**

Fiscal Year April 1, 1935, to March 31, 1936

Offices	Vacancies	Applicants	Placements

Total	149,043	326,857	70,681	69,584	140,265

Closer co-operation was maintained with the federal Department of Labour under the terms of the Employment Offices Co-Ordination Act. This relationship, which has been in existence for the past eighteen years, permits the offices to render a greater degree of service to both employers and applicants, due to the interprovincial system of Clearance and the uniformity of methods followed in all provinces.

The statistical table shows a decrease in the number of placements made as compared with the fiscal year 1934, the explanation being that municipalities greatly reduced their programmes of unemployment relief work during the past year. It is significant to note that in 1936 placements of a regular nature, that is for employment lasting at least two weeks, were approximately 50 per cent. of the total number of placements, as compared with 40 per cent. in 1934.

No completely satisfactory method has been evolved in Canada or in the United States for comparing the relative efficiency of any two employment offices, or of the different units comprising a provincial or state system. In an effort to reach a decision in this regard, various plans have been tried, among them being the use of a table showing placements made per unit of staff. The figures obtained were interesting but of little practical value as offices dealing with relief work, on a rotating basis or otherwise, showed numbers of placements so much greater than offices which did not handle relief work programmes that the comparison was obviously unfair. In the case of New Toronto, for example, a staff of three workers made 25,338 placements, or 8,444 placements per unit of staff. This figure may be misleading unless the fact that most of the placements were made on unemployment relief projects is taken into consideration.

Disregarding the offices dealing with relief work, it was found that comparisons had some value in indicating the activity rather than the efficiency of the various offices. The superintendent whose office is located in a manufacturing centre which has not recovered from the effects of the depression can not make such a good showing as regards placements as the superintendent in a booming mining town.

The placements made by all offices with a total staff of 107 numbered 140,265, or an average of 1,310 per unit of staff. The average placements made per staff member in the women's departments of the Service in Ottawa, Hamilton and London showed a relationship which is interesting and significant. The figures were respectively 1,139, 1,225 and 1,192. No unemployment relief work entered into the question of placement, and one might be justified in the conclusion that 1,200 would be a reasonable number of placements for each staff member placing women in jobs in cities ranging from one to two hundred thousand.

TRANSFERS THROUGH CLEARANCE SYSTEM

During the year 320 men and women were sent to employment outside the zone of the office in which they registered. This was the smallest number of workers sent through Clearance System since the offices were organized and indicates how nearly the local labour supply met the demand.

Details of these transfers are as follows:

Brantford	11
Kitchener	7
Niagara Falls	1
North Bay	126
Timmins	46
Toronto (Women)	129
	<hr/>
Total	320

During the year there were 3,566 transfers in from Manitoba, 470 of which were in the logging and lumbering industry. All these transfers were made from Winnipeg to the North-Western section of Ontario.

HANDICAPPED EX-SERVICE MEN

The offices continued to render special service to handicapped ex-service men in co-operation with the federal Department of Labour. Particulars of the placements and applicants among this group are as follows:

	Applications	Placements

The reports received from the Ontario Government Offices of the Employment Service of Canada have been summarized as follows:

Agriculture:—Early in the summer a harvest workers' plan was announced to be in effect for three months. According to this plan, the family of any employable man on relief who accepted farm employment would be continued on relief without reduction due to his earnings, provided such earnings were used for the benefit of his family, and the man's absence in connection with such farm work would not affect his municipal residence. The result of this announcement was a decided increase in the number of placements for farm work made by the offices of the Employment Service. Moreover, a weekly radio broadcast kept the farmers of Ontario informed of the facilities of the Employment Service and the increase in the volume of orders received was due in part to this medium of publicity. In the Toronto office a successful campaign was carried on to place all able-bodied, single, unemployed men residing in the hostels at either farm work or on government road work, with the result that there was an increase of more than 700 in the number of placements for farm work. In several districts local municipal authorities co-operated with the employment offices by providing trucks for the transportation of fruit pickers and other day labourers to and from the fields, and in one city a local newspaper allowed such workers to ride on their trucks free of charge.

Wages on the whole showed an upward tendency and an increase was reported in the numbers of farmers engaging men on a yearly basis and in those renewing yearly contracts. Many labourers taken on for the busy season were retained for the winter months. In connection with the difficulty of making satisfactory wage adjustments for farm labouring jobs, one superintendent presented a comprehensive schedule which he suggested might be standardized in the district. According to this schedule the monthly rates would be commensurate with the amount of work to be done, so that, if a farmer were paying \$300 a year, the monthly rates would range from \$12 for the slackest month to \$35 for the busiest months.

The phenomenal development in the business of growing tobacco in Norfolk County brought many orders to the Brantford office for men to work in the tobacco fields. In view of the fact that the acreage now exceeds 25,000 and the work requires approximately 12,000 men during the busy season, the superintendent recommended the opening of a temporary employment office, so that an orderly placement of workers might be made and the influx of would-be tobacco workers into this district controlled. In the Chatham area some difficulty was experienced in placing sugar-beet workers due to the efforts of a group to create a local labour organization to dictate wages and working conditions, but a satisfactory solution of the problem was arrived at before it was too late for cultivation.

Manufacturing:—The superintendent of the men's department of the Toronto office included in his report a survey of general conditions in the various industries in this city. The information was gained through close observation and from personal contact with many of the firms reporting and, generally speaking, it corresponded with the reports of other industrial centres of the Province. He stated in part:—"Considerable improvement was recorded in practically all lines, notable among which was increased production in the iron and steel industry, automobiles and accessories, farm implements, radios, the textile trades, soap and allied products, leather and rubber goods, such as luggage, leather garments, rubber sundries and tires, although production in rubber footwear was curtailed. In addition to the gains in the numbers of persons employed, steadier employment and wage increases were reported in many instances and practically all manufacturers considered prospects bright." Canning factories, sugar and tobacco firms had a successful year and called for large number of workers, especially women and girls, during the busy season.

As a result of this increased activity there was in many centres a shortage of skilled mechanics, tool, die and pattern makers, floor moulders, electric welders, special machine operators and draughtsmen, and in one district the demand for certificated engineers was reported the heaviest in the past ten years.

Lumber Industry:—The North Bay office reported on this industry in part as follows:—"The fact that thirty lumber camps gave employment to approximately 2,700 men in this district assumes significance when the figures dealing with the relief extended to settlers in the neighborhood this year are compared with those of previous years. The increased activity also afforded employment to many mobile workers who trek north for this purpose every fall and who otherwise would be a charge on the community. This army walked the highway, hitch-hiked or rode on trains to reach their destination and the influx last fall was the greatest ever experienced. While a certain amount of pulp-peeling was undertaken, the volume was on such a small scale that it could not take care of the jobless of the zone concerned, although a few transients managed to obtain employment in the bush."

Several of the employment offices reported that lumber companies experienced little difficulty in keeping their camps filled, due in part to the fact that little road work was available, and that the number of jobs available was not sufficient to absorb the large numbers of men anxious to obtain this type of employment, many of whom had walked 40 or 50 miles into the camp only to find no jobs open.

Mining Industry:—The report of the Timmins office stated:—"There are nine producing mines at present in operation in this district, with a total employment roll of 6,605. In the case of one mine, extensive diamond drilling and development work, with the construction of a 500-ton mill, provided a large amount of employment in the building of cook-houses, sleeping camps, hotel and a few houses. The managing directors of one of the larger mines placed his entire employment problem in the hands of the employment office superintendent and instructions were issued by him that all men taken on were to come through the Employment Service. Notwithstanding increased activities at the mines, placements in the industry through this office were somewhat lower because of men applying direct to the mines."

Other offices in the mining areas reported somewhat similar conditions and frequently the orders for experienced miners, engineers, hoistmen and pumpmen would be placed with the employment office, while muckers and labourers would apply and be taken on right at the mines as required. The extent of the territory served by the Port Arthur office of the Employment Service for this industry is evidenced in the fact that some of the workers sent to the various mines had to travel 200 miles before reaching their place of employment.

Building Industry:—General increased activity in the building industry was reported by most of the employment offices, although a few stated there had been no great demand for building mechanics as work had been confined to repair and alteration jobs, with no large buildings under construction. The Ottawa office reported:—"In spite of the reduction in the amount of highway work available, this office made substantially the same number of placements as during the previous year. More than 2,000 placements of skilled mechanics were made, the majority being of men selected for work on a rotation basis on the new federal building at Rockcliffe. Appreciation of the harmonious relations existing between this office and the representatives of organized labour in the city was indicated in two letters from the local unions expressing their thanks for the splendid co-operation and courtesy extended their members by the staff of this office. The establishment of agreements under the Industrial Standards Act has affected some 2,000 workers in the building trades in the Ottawa district."

In Northern Ontario building activity was greatest in the mining areas, where houses, school additions, theatres, bunk houses, stores, summer cottages and tourist camps gave considerable employment, with the result that at times it was impossible to get a sufficient number of building tradesmen, especially carpenters and tinsmiths, and bricklayers, stonemasons, millwrights and pipefitters were in demand.

Highway and Camp Work:—The superintendent of the North Bay office reported that a new road between North Bay and Temiscaming employed 350 men steadily throughout the year and resurfacing the North Bay-Pembroke section of the Trans-Canada Highway involved the selection and placement of men residing along the route. Seventy camp builders were sent to the White River-Schreiber section to erect camps and two

roads at Martin River and Caribou Lake provided work for 250 men who were rotated twice monthly.

The Toronto office was called upon to select 530 single, homeless, unemployed men for work in the various airway camps at the request of the Department of National Defence, and to be responsible for the medical examination of the men chosen, and for their transfer by train or bus to the place of employment. Much of this work had to be carried on by the staff after regular working hours. In addition, 872 men were transferred to government work camps under the jurisdiction of the Department of Northern Development.

The office at New Toronto organized the placement of men on unemployment relief projects in the five Lake Shore municipalities. The office also supervised the preparation of pay lists for 2,000 men working under the various municipal schemes. While little was required in the actual selection of men for the jobs, as placements were made on the basis of need and eligibility, more than the usual amount of clerical work was involved, in compliance with the requirements of the relief administration in the five towns. The employment office also co-operated in the placement of men on a highway widening job and a bridge job, all of which work was carried on under the policy of rotation of the unskilled workers. The offices throughout the Province co-operated to the fullest extent possible with the various organizations administering relief.

Handicap Division:—In this division of the Toronto office 1,337 placements were made, 94 per cent. of the applicants placed being ex-service men, of whom 84 per cent. were in receipt of disability pensions. In connection with the work of this division, tribute was paid to the officers of the Christie Street Hospital and the staff of the Toronto General Hospital and the Psychiatric Hospital for their splendid assistance in supplying comprehensive medical reports on disabled ex-service and other applicants referred from this office. Such reports assisted the office staff in placing these men in employment suited to their disabilities. Excellent work has been accomplished by the federal members of the staff of this division who have co-operated in every way possible to make this special phase of employment work a success. A similarly creditable report was received from the Ottawa office, where 441 placements were made.

Placement of Women and Girls:—The placement of women and girls is carried on in all offices of the Employment Service and in the larger centres separate departments are maintained for male and female applicants. Practically all offices reported a steady demand for experienced domestic help, and while hundreds of satisfactory placements were made, there was a decided shortage of applicants with the necessary training. Girls with office or factory experience were more ready than formerly to accept domestic employment and efforts were made to place such applicants, but with only a fair amount of success. Employers considered there was a two-fold objection in connection with these girls in housework, their lack of experience and their tendency to return to their former employment when

opportunity offered. One of the offices lacking satisfactory girls for domestic work was successful in placing several houseboys. Wages generally were reported as higher than last year, but in certain instances appeared inadequate and where positions were non-resident very little allowance was made to cover room rent. One effect of the shortage of regular domestic help was the increase in the numbers of women sent out for daily housework.

The number of placements made through the employment offices in factory work was not in proportion to the increased activities in industry, due to the fact that former employees were recalled by many employers as required. During busy seasons orders for certain types of workers could not be filled because experience was demanded. The placement of girls in various types of office work continued but opportunities were limited.

From five of the employment offices separate records were submitted on the employment work among women and girls. A total of 20,962 placements were effected by these five offices.

PRIVATE EMPLOYMENT AGENCIES

Only four licensed private agencies transacted business during the year, according to reports furnished this Department.

Details of the placements made by these agencies will be found below:

BOARD OF EXAMINERS OF OPERATING ENGINEERS.

CHAIRMAN — J. M. BROWN

MEMBERS — W. J. SCOTT, S. G. ROSE

Supervision of the granting of certificates to power plant engineers operating within the Province of Ontario was assumed by the Government in 1907. In the early years these were of one grade only, with the result that the standard of qualification was not very high. The adoption of graded certificates in 1920, however, proved a forward move. Engineers of higher grades are now qualified for positions of greater responsibility and greater remuneration, and those of the lower grades are provided an opportunity of obtaining higher certificates upon examination. The graded certificates thus offer an inducement to ambitious engineers to increase their knowledge and improve their status, and this increased efficiency of engineers makes for greater security in the protection of human life, as well as economy in power plant management.

In the following outline of the work of the Examining Board for the fiscal year ending March 31, 1936, an increase of \$399.22 is noted in the net revenue which amounted to \$24,921.82. The expenditures of the board amounted to \$24,859.76.

There was also an increase of 201 in the number of certificates issued, which fact would seem to indicate an upward trend in general conditions in industry. Of the 1,676 individual examinations held during the year, 668 candidates were examined at the Toronto office and 1,008 candidates were examined at the thirty-eight other centres throughout the Province.

Four years ago the Board of Examiners undertook the work of compiling suitable text books for the use of engineers in Ontario. To date six books have been produced with a total sale amounting to \$7,280.46.

The board wishes to take this opportunity of expressing to both engineers and plant owners in the Province its appreciation of their co-operation and support in the administration of the Operating Engineers Act.

BOILER INSPECTION BRANCH

CHIEF INSPECTOR, DEPARTMENT OF LABOUR — J. R. PRAIN

A greater number of designs of pressure vessels were submitted and registered this year, especially those of welded construction, indicating an increase in the number of these pressure vessels being manufactured.

The adoption of the A. S. M. E. Code for welding by this Province has necessitated considerable research work, and involved periodical visits to manufacturers' shops for the purpose of qualifying welders engaged in the fabrication of welded pressure vessels.

In order to meet the rapid strides being made in modern installation of welded high pressure steam lines carrying pressures up to 850 pounds and 850 degrees Fahrenheit superheated steam, it has been necessary to draw up specifications and qualification tests for welders both in electric and oxyacetylene processes. A standard procedure of weld tests is required under which several welders have been approved and found capable of meeting modern conditions. These welders are now employed on work formerly considered as requiring specially trained men from outside Canada. It is hoped that these proceedings for welded pipe lines will be the subject of discussion at the conference of provincial chief boiler inspectors being held in June for the adoption of a safe code to be incorporated in the Canadian Interprovincial Regulations.

Several investigations were made in connection with pressure vessels and equipment which failed while under pressure, but fortunately no fatalities were recorded. These vessels had not been built according to the requirements of this Branch and were replaced by those built in accordance with the Regulations.

TABULAR SUMMARY OF WORK

Drawings and specifications surveyed, registered and re-registered.

The total amount of monies transmitted to the Treasurer of Ontario for the fiscal year ending March 31, 1936, was \$13,534.14.

FACTORY INSPECTION BRANCH.

CHIEF INSPECTOR, DEPARTMENT OF LABOUR — J. R. PRAIN

This is the fiftieth report of the Factory Inspection Branch of Ontario. While the figures in the statistical section indicate the volume of work accomplished by the Branch as being similar to that of 1934, a great many calls were made by the inspectors on behalf of other branches of the Department and many visits were also necessary in carrying out investigations into labour conditions not specifically within the jurisdiction of the Branch. The inspectors were requested to arbitrate labour disputes on numerous occasions and were remarkably successful in their efforts.

The increase of one hundred in the number of overtime permits issued bears out the reports of inspectors that business has been improving steadily. While a number of firms made additions to their plants during the year, many resorted to overtime in order to take care of seasonal rush orders which could not be handled in the regular hours. In many instances also the hours of employment for females were extended to the sixty per week permitted by law so that as much as possible of the overtime allotment could be saved for the Christmas rush reason. It is our opinion that more firms than ever before made use of the full amount of thirty-six days of overtime allowed, in addition to working longer hours than their regular schedule. Another method of increasing output was by the double shift system for women under section 33 of the Act. Approximately sixty more double shift permits were issued this year than in 1934 and this type of permit is becoming increasingly popular in many industries. The double shift method of coping with extra work is encouraged by the Branch in order to avoid excessively long hours and also to increase the numbers employed.

The issuance of homework permits under section 51 has increased considerably, but since the 1936 amendment to that section of the Act, the wages paid to homeworkers are being controlled and a better understanding prevails.

The accident toll as reported in accordance with the Act remained high for the year, although the number of fatalities was lower than in 1934. It is evident that the vigilance of the inspectors must continue in order that an adequate degree of safety may be afforded to industrial workers in the Province. Special mention should be made of the increase in the number of persons suffering from industrial diseases, a total of 41, of which two cases proved fatal. Lead poisoning, dermatitis and silicosis were the chief of these diseases. Without the splendid assistance given by the Industrial Hygiene Branch of the Department of Health, the task of the Factory Inspection Branch would have been a difficult one. We wish, therefore, to express once again our highest appreciation of the services rendered by the Director, Dr. J. G. Cunningham, and his colleagues.

It is gratifying to find that child labour is practically non-existent in industry throughout the Province and the inspectors are careful in checking up any doubtful cases, insisting on birth certificates being produced.

Most of the complaints received and investigated were in connection with hours of labour and to a large extent concerned male employees in factories and shops. While there is no legal control of hours for men, except in bakeshops, under the Factory, Shop and Office Building Act, nevertheless the inspectors in many instances were successful in having reductions made in the daily number of hours where these were shown to be excessive.

Notwithstanding the general improvement indicated during the past year by both provincial and Dominion statistics, the amount of industrial building was slightly less than in 1934, amounting to \$6,238,850 as compared with \$6,426,000 in 1934. The accompanying diagram shows the estimated costs of buildings for which plans have been approved during the past ten years. It may be noted, however, that the number of plans submitted has shown a steady increase since 1933, being 115 in 1933, 202 in 1934, and 279 in 1936.

The number of plans submitted for additions to existing plants formed a greater proportion to the whole than in any previous year, namely, 82 per cent. As pointed out in other reports this is a most encouraging feature, indicating a sufficient increase in production to warrant extensions.

THE YEARS 1926 TO 1934 ARE FROM NOV 1ST TO OCT 31ST 1934.
 THE YEAR 1934-5 IS FROM NOV 1ST TO MARCH 31ST 1935.
 THE YEARS 1935-6 AND AFTER ARE FROM APRIL 1ST TO MARCH 31ST

The following statistical information from our records is of interest in depicting the scope of the work of this Branch:

	Year 1934	Year 1936
Total inspections and revisits.....	23,429	22,244
First inspections	18,398	17,803
Second inspection	5,031	4,441

In addition there were investigations of accidents and complaints and inspection of the premises of applicants for homework permits under section 51 of the Factory, Shop and Office Building Act.

There were also the usual special visits, office calls and conferences incidental to inspection.

Employees in the above industries, mercantile establishments and office buildings numbered 323,935, classified as follows:—

Year	Males over 16	Males 14-16	Females over 18	Females 14-18	Total	Children under 14 dismissed
1934	183,232	342	83,830	1,018	268,422	1
1936	231,200	43	91,864	838	323,935

HOURS OF LABOUR

Hours	Males					Females				
	45	50	54	58	60	45	50	54	58	60
Year 1936	153,681	23,113	18,178	961	15,879	68,017	9,904	5,231	242	2,195

Also 26,534 male and female employees working approximately 50 hours per week.

Orders issued relating to various requirements of the Act totalled 6,629, as compared with 4,851 in the year 1934.

PERMITS

Applications for overtime and other permits numbered 3,009 and were issued as follows:

Year	Double shift, section 33	Overtime, section 32	Bakeshop, section 71	Fruit camps, section 33	Sale of bread manufactured out of Province, section 70	Home-workers, section 51	Total
1934	94	2,073	27	12	—	220	2,426
1936	153	2,175	53	19	3	606	3,009

COMPLAINTS

Two hundred and thirty-seven complaints were received during the year. Upon investigation 135 were upheld, 75 not upheld, 23 are pending investigation and 4 do not come within the jurisdiction of this Branch. The subject of complaints were:—

	Year 1934	Year 1935
Heat	12	6
Elevators	5	5
Fire protection	15	21
Child labour	1	2
Lavatories	14	6
Sanitation	6	3
Boilers	18	10
Guards	1	1
Ventilation dust, fumes, etc	10	14
Overtime	15	8
Hours of labour	85	80
Manufacturing in basement	1	1
Miscellaneous	28	53
Violation of Minimum Wage Act	10	3
Violation of Operating Engineers Act	5	16
Violation of Adolescent School Attendance Act....	10	1
Not Under our jurisdiction	—	4
Mechanical exhaust	2	3
Totals	247	237

Violations of the Acts in the enforcement of which the inspectors have a responsibility were submitted as follows:—

Operating Engineers Act	33
Adolescent School Attendance Act	7
Minimum Wage Act	1,916
Steam Boiler Act	19

PROSECUTIONS

Proceedings were taken against four firms as follows:—two under section 30 regarding hours of employment, one under section 71 regarding hours in bakeshops and one under section 58 regarding boiler inspection. Convictions were recorded in all cases.

ACCIDENTS

Three thousand and thirty-seven accidents were reported for the year 1936, of which 25 were fatal, as compared with 32 fatalities in 1934. Fatalities were due to:—

Belts, pulleys and shaftings	1
Burns and scalds	1
Drowning	1
Electricity	2
Elevators	3
Explosions	2
Falls	5
Industrial diseases	2
Jammed between articles	3
Machinery connections	1
Miscellaneous	2
Paper machinery	1
Planer	1
	<hr/>
Total	25

EXPLOSIONS

The following explosions which caused injuries to employees were reported during the past year:—

April 11, 1935—Explosion took place in a furnace in a brass factory.

April, 1935—Acetylene torch exploded in a metal factory.

April 15—A poker quenched in a can containing gasoline caused it to explode.

May 4—Oil barrel caught fire and exploded in auto manufacturing company.

May 5—A 2,000-gallon capacity cold water tank exploded at a golf club.

May 20—A refrigeration unit exploded at a radio company.

June 30—Explosion in the dump near sample laboratory of cyanamid company.

August 7—Steam jacketed kettle exploded in a chemical company.

September 5—Electric furnace exploded in a brass factory.

September 17—Naphtha gas exploded in paint factory.

November 25—Explosion occurred in cyanide furnace.

January 7, 1936—Stick of dynamite exploded in coal crusher in paper company.

APPRENTICESHIP BOARD

CHAIRMAN — J. F. MARSH

MEMBERS — A. W. CRAWFORD, F. S. RUTHERFORD

DIRECTOR OF APPRENTICESHIP — FRED J. HAWES

A distinct revival in activities under the Apprenticeship Act has taken place during the past year and the outlook for further development in the immediate future is brighter than at any time during the seven year period since the Act became effective. Several new trades and industries are conferring with the Director of Apprenticeship with a view to taking advantage of the provisions of the Act, the motor vehicle repair industry has been added to the designated list and steps are being taken to re-organize and revive dormant activities in connection with the building trades.

REVIEW OF DEVELOPMENTS IN BUILDING TRADES

Before speculating as to future developments in connection with the building trades, it may be well to review briefly developments during the seven years in which the Act has been in force.

During the first fiscal year of the Act's operation, 1,049 apprentices were registered in the nine designated building trades. While the number registered was greatly reduced thereafter, owing to economic depression, a total of 1,806 apprentices have been registered to date, of whom 1,042 have successfully completed the full period of training and received diplomas; 337 have had their contracts cancelled for various reasons; and 330 were being trained on March 31st, 1936, distributed as per Table No. 2.

Since 1934, the number of new apprentices being indentured has shown fairly steady improvement but the fact that the total number of apprentices indentured during the past fiscal year was only 107 shows that the building trades throughout the Province have not yet fully recovered from the depression. It is also apparent that there will be a decided shortage of skilled mechanics in these trades within the next few years unless the number of apprentices is greatly increased or economic changes are brought about in the construction industry which practically eliminate the need for mechanics in connection with the erection of buildings. Evidence of such changes is not lacking but no matter how rapid this development may be, the construction industry will be considerably hampered during the next few years through lack of properly trained men.

SCHOOL TRAINING

Special school training for apprentices in the building trades during the past year was confined to classes in Toronto for painters and decorators, plumbers, steamfitters, sheet metal workers, and electricians with a total enrolment of 94, and to special day classes for apprentices in all trades conducted in the Hamilton Technical Institute on Saturday mornings, with a total enrolment of 25.

Owing to the small number of apprentices being indentured, special day classes for apprentices have not been held since 1933, and, despite renewed interest which was evident during the past year, it is unlikely that these classes will be revived within the next year or so. The Board has decided that it would be unwise to attempt to re-organize such classes until the assessment scheme is revived or other means found for payment of necessary expenses of apprentices who attend from distant centres.

HOME STUDY COURSES

As a result of the breakdown of day and evening class instruction, the Apprenticeship Board made an effort to revise the courses of study which had been specially prepared for day classes so that they could be used by apprentices as home study courses. A fair beginning has been made in this direction, eleven boys having utilized the courses during the past two years. The Board is now considering the advisability of re-organizing all courses so that each new apprentice may be supplied with a suitable course of instruction which must be completed either at home or in the local vocational school before a diploma is granted.

AMENDMENTS TO ACT—1936

During the past session of the legislature the Apprenticeship Act was amended to provide for the re-organization of the administrative machinery and to make special provisions in connection with the automotive repair industry.

The word "minor" was changed to "person" so that any trade added to the designated list in future may accept as apprentices persons over twenty-one years of age.

The title of "Chief Inspector of Apprenticeship" was changed to "Director of Apprenticeship" and Mr. Fred J. Hawes who has acted as District Inspector during the past seven years, was promoted to the position of Director by Order-in-Council, effective February 1, 1936, succeeding Mr. A. W. Crawford, who was appointed to the Board.

The Provincial Apprenticeship Board, which had been reduced from 10 to 3 members in April 1932, is now composed of three officials of the Civil Service, namely, the Deputy Minister of Labour, Mr. J. F. Marsh, Chairman; the Director of Vocational Education, Mr. F. S. Rutherford; and the Chairman of the Minimum Wage Board, Mr. A. W. Crawford. This Board, which was appointed by Order-in-Council dated February 7, 1936, serves without remuneration and is responsible to the Minister for the administration of the Act.

The Board is assisted by provincial advisory committees for each designated trade or group of trades. These committees are composed of not less than five members, an equal number of employers and employees and an official of the Department of Labour who acts as secretary.

Each provincial advisory committee has exclusive power to formulate regulations governing the period of apprenticeship, the number of apprentices to be trained, and the age at which apprentices may start. All other regulations must be approved by the Provincial Apprenticeship Board before being passed by Order-in-Council.

Provincial advisory committees may appoint local apprenticeship committees for each trade or group of trades in defined areas of the Province. Such local committees are established to co-operate with the provincial committee and departmental inspectors in supervising the training of apprentices in the immediate locality and to assist in enforcing the regulations.

PROVISIONS FOR AUTOMOTIVE INDUSTRY

A petition signed by approximately 578 garage operators throughout the Province was received by the Minister of Labour in October, 1935, requesting that the motor vehicle repair industry be added to the designated

list. An investigation was immediately made by the Director of Apprenticeship. On the recommendation of the Minister, the trade was added to the list by Order-in-Council dated February 5, 1936.

One of the conditions under which the garage owners and mechanics agreed to come under the provisions of the Act was that arrangements be made for issuing certificates of qualifications to mechanics in garages throughout the Province. Accordingly, the Act was amended to provide for the examination and certificates of mechanics in all garages and provision was also made for the registration of employers engaged in any designated trade, if the trade so requests through its advisory committee.

Certificates of Competency are to be issued without examination to all mechanics who have served at least seven years in the trade. Those having served from five to seven years are to be examined before being certified and those with from two to five years are to be required to complete five years' service before being examined. All employees with less than two years' service must be indentured in accordance with the provisions of the Act and satisfactorily complete a five year apprenticeship before being certified as mechanics. Certificates are to be renewed each year for a fee, which is expected to be \$1.00.

A very encouraging and promising feature of the scheme for training motor vehicle repairers, as exemplifying the relationship between vocational schools and industry, is the provision under which boys who have successfully completed a three year vocational course specializing in motor mechanics will have two years deducted from the apprenticeship period.

PETITION FROM OTHER TRADES AND INDUSTRIES

A number of trades have indicated their intention of petitioning to be brought within the scope of the Act. The barbers and hairdressers have made a formal petition and a survey is at present being made to ascertain whether it is the desire of the majority of persons in the trade to come within the scope of the Act. Work on this survey has been delayed owing to activities in these trades in connection with a private bill, which failed to pass the legislature and under which it is hoped to establish a licensing system for these trades. Preliminary steps have been taken by the commercial artists, photo engravers, bankers, and a number of other trades.

EFFECTS OF THE INDUSTRIAL STANDARDS ACT

Perhaps the one thing which has done more than anything else to revive interest in apprenticeship in Ontario is the operation of the Industrial Standards Act, which provides that all persons employed in designated trades and industries may receive standard rates of wages, except apprentices under the Apprentice Act. Some of the advisory boards which have been set up to assist in the administration of the Industrial Standards Act have consented to act also in the capacity of local apprenticeship committees. Employers who have been in the habit of employing young persons as helpers at low wages are now obliged to indenture such persons as apprentices or to considerably increase the wages. This is resulting in a marked increase in the number of applications for apprenticeship in the building trades and the prospects for the revival of the training programme inaugurated in 1928 are becoming increasingly bright. The establishment of wage schedules under the Industrial Standards Act in other trades and industries is focusing attention on the need for adequate training facilities and the desirability of exempting apprentices from the provisions of these schedules during the period of their apprenticeship. It is to be expected, therefore, that increasing activities under the Industrial Standards Act will greatly increase the scope and activities of the Apprenticeship Board.

MINIMUM WAGE BOARD

CHAIRMAN — A. W. CRAWFORD

MEMBERS — MISS MARGARET STEPHEN, PATTERSON FARMER

The work of the Minimum Wage Board during the fiscal year ending March 31, 1936, was divided into two departments dealing with minimum wages for female employees and standard wages and hours for designated trades and industries. The first division, which has heretofore occupied the full time of the Board and staff, has to do with the administration of the Minimum Wage Act. The second division covers all activities of the Board in connection with the enforcement of schedules under the Industrial Standards Act. It is new work in the process of development and will be dealt with in a separate section of this report.

MINIMUM WAGE ACT

Activities during the year in connection with the Minimum Wage Act have proceeded along the lines of previous years with a few changes in staff, routine of procedure, office records and forms.

AMENDMENTS TO ACT

No changes were made in the Act during the 1934-35 session of the legislature but the following amendments were passed at the recent session and received the Royal Assent on April 9, 1936:

Heretofore the Chairman held office during pleasure and the other members for a period of five years but now all three members are appointed during pleasure. Members are now paid such compensation for services as may be determined by the Lieutenant-Governor in Council rather than per diem allowances as previously.

Provision is now made for payment of the full amount of the minimum wage to an employee in the form of cash or by cheque payable at par where the work is done. No employee may agree to accept less than the minimum wage as prescribed by the Board and it is an offence for any employer to enter into any agreement, arrangement or undertaking with an employee whereby any part of the wages paid to an employee, or arrears of wages collected by the Board for an employee, are returned to the employer either directly or indirectly.

Changes were made in the wording of the penalty section and a new section was added providing a fine of from ten to one hundred dollars for violation of any provision of the Act or regulations or any order of the Board, for which no other penalty is provided.

Power is given to the Board or any person designated by the Board to negotiate a settlement in connection with a claim for arrears of wages and if the employer fails to carry out the provisions of the settlement, a magistrate may make an order for the payment of the amount remaining unpaid. Failure to carry out the provisions of such order renders the employer liable to a penalty of from ten to one hundred dollars in addition to the amount remaining unpaid under such order.

These amendments were made to conform with administrative changes and to enable the Board to control abuses and evasions of the Act through payment of wages by scrip, notes, goods, etc., and through refunds to

employers particularly after action has been taken by the Board to collect arrears. The policy of the Board has always been to arrange settlement of claims out of court except where there is repeated or deliberate violation, but in some cases it has been very difficult to collect full payments from employers after the agreement has been made. The new section of the Act gives such settlements the full force of law and provides a simple and effective method of collecting without cost to the employee.

NEW AND AMENDED ORDERS

No orders affecting additional occupations or industries were issued during the year but several orders were reprinted in new form, different orders affecting the same industry or class of employment were consolidated and amendments were made to the Telephone Orders which necessitated the regazetting of these orders in consolidated form as follows:

ORDER No. 11

TELEPHONE SYSTEMS

Effective from November 1, 1935

(This order replaces previous orders No. 11 and No. 12)

No female employee in a telephone system, or in connection with any telephone switchboard or exchange, in the Province of Ontario shall be paid wages less than those set forth in the following schedules:

1. SCHEDULE FOR POPULATION GROUPS

Population Groups	Experienced Workers	Inexperienced Workers
City of Toronto	\$12.50 per week	1st six months—\$10.00 per week 2nd six months—\$11.00 per week Thereafter —\$12.50 per week
Cities of Hamilton, Ottawa, London and Windsor	\$12.00 per week	1st six months—\$10.00 per week 2nd six months—\$11.00 per week Thereafter —\$12.00 per week
Cities, Towns, Villages and Unincorporated Urban Communities of from 10,000 to 50,000	\$11.00 per week	1st six months—\$ 9.00 per week 2nd six months—\$10.00 per week Thereafter —\$11.00 per week
Cities, Towns, Villages and Unincorporated Urban Communities of from 4,000 to 10,000	\$10.00 per week	1st six months—\$ 8.00 per week 2nd six months—\$ 9.00 per week Thereafter —\$10.00 per week

11. SCHEDULE FOR SMALL CENTRES (Under 4,000 Population and Rural Districts).

No. of Lines	Experienced Workers	Inexperienced Workers
Over 300	\$9.00 per week	1st six months—\$ 7.00 per week 2nd six months—\$ 8.00 per week Thereafter —\$ 9.00 per week
50 to 300	\$7.00 per week	1st six months—\$ 5.00 per week 2nd six months—\$ 6.00 per week Thereafter —\$ 7.00 per week
Under 50	No prescribed rates	

- (1) Hourly Rates:—The above minimum wages shall be paid for a maximum weekly work period of 48 hours. All time in excess of 48 hours must be paid for at an hourly rate not less than the hourly rate based on the prescribed minimum weekly wage for 48 hours. Part-time and occasional workers shall be paid at hourly rates not less than such overtime rates for experienced workers, regardless of length of service.
- (2) Part-time and Occasional Workers:—Are those who are employed for busy periods only, as substitutes for regular workers or in emergencies.
- (3) Night Operators:—Wages not less than the foregoing weekly rates shall be paid to night operators, regardless of the number of hours on duty per night or per week, where such operators do not commence work before 9 p.m. nor remain on duty after 8 a.m., are provided with suitable sleeping accommodation, and are permitted to sleep during each night's shift. Night operators who are required to be in constant attendance at the switchboard are to be treated as day operators and must be paid at the minimum hourly rates as defined above for every hour they are on duty in excess of the regular weekly period for which the minimum wage must be paid.
- (4) Population is the population according to the latest decennial census of the Dominion Government.
- (5) Unincorporated Urban Communities are sub-divided, thickly populated sections of a township in which the majority of the residents are engaged in pursuits other than agricultural.
- (6) Number of Lines means the number of active subscriber lines terminating on the switchboard. For the purposes of this order the average number of lines for the past year shall be the number determining the minimum wage rate.

- (7) Experienced Workers are those who have been employed for one year or more at any time in connection with any switchboard or telephone system.
- (8) Penalties:—Any violation of this order is punishable by fine or imprisonment (See Section 21, Minimum Wage Act).

Notice:—This order must be posted where it can be easily read by the employees.

MINIMUM WAGE BOARD

A. W. Crawford, Chairman,
Margaret Stephen,
Patterson Farmer.

The principal changes in this order are: The provision for lower wages to girls under 18 years of age has been eliminated; the basis for the classification of wage rates in small centres has been changed from the number of subscribers served to the number of active lines on the switchboard; and a uniform weekly work period of 48 hours has been established for the whole Province.

All changes were made with the consent of responsible representatives of the independent telephone systems and the Bell Telephone Company following conferences and consultations with all concerned during several months. The basic rates were not changed, therefore it was not deemed necessary to consult employees.

The Board consulted representatives of other industries with a view to amending other orders particularly those affecting restaurants, hospitals and hairdressing and beauty shops.

Application has been made by representatives of organized domestics requesting that an order be issued fixing minimum wages for all employees in private homes but the act specifically exempts domestics and agricultural workers. The difficulties of administration, the fact that most of such workers who are poorly paid receive board and room, and the apparent attitude of the general public in connection with government intervention in private homes make it inadvisable to recommend such action at present.

COMPLAINTS

During the twelve months period from April 1, 1935, to March 31, 1936, complaints were received by the Board from 887 persons in connection with alleged underpayments of female employees or other violations of the Act and orders. This number includes only those complaints which investigation showed to be based on fact or where situations were revealed requiring attention from the Board. Many other complaints, chiefly anonymous, were received which proved to be groundless. These were usually based on idle rumour or unwarranted statements of discontented and misinformed employees.

WAGE SHEET COLLECTIONS

It is the practice of the Board to collect wage returns once each year from employers in all classes of industry and occupations throughout the Province for purposes of checking wage levels and securing information regarding individual industrial plants, offices and retail establishments. During the past year such returns were received from 9,162 employers who reported wages for 105,840 female employees, as compared with 6,035 employers who reported 77,648 employees the previous year. Many questionnaires were sent to persons who replied that no females were employed. These returns were filed for future checking and were not added to the records. In addition to the regular collection of wage sheets, the Board sends for special returns where complaints are received, and where it is probable that violations may be found, as for example, in new establishments or in plants where adjustments have been ordered and no recent check-up made. These wage returns give particulars regarding names, wage rates, earnings, hours of employment, etc., for every female employee. They are carefully checked and the information compiled in tabulated form for the guidance of the Board. (See pages 49 to 69).

ADJUSTMENTS

Analysis of these wage returns during the year revealed necessary adjustments or underpayments in 1,166 establishments, affecting 2,604 employees. In each case the employer was ordered to immediately adjust the hours or wage rates and in those cases where previous adjustments had been ordered and where excessive underpayments were revealed, steps were taken by the Board to collect arrears owing to the employees.

ARREARS OF WAGES

The total amount of arrears collected during the year as a result of complaints, adjustments and court actions was \$29,778.86 which was collected from 593 employers. This amount is approximately \$22,000 less than was collected during the fiscal year ending October 31, 1934, and represents a proportional reduction in the number of employees affected although the reduction in the number of employers was only 71, or about 10 per cent. These reductions are largely accounted for by the fact that most of the employers from whom arrears were collected previously are now paying minimum wages.

While it is the policy of the Board to refrain from collecting arrears for a first offence provided a satisfactory adjustment can be arranged, collection is made if the employee is dismissed or is not satisfied to continue under corrected conditions. Collection is also made and court action resorted to in cases where an employer has wilfully underpaid the employee after being warned or where the offence is repeated.

ARREARS OF WAGES COLLECTED

April 1, 1935, to March 31, 1936

Month	No. of Firms	No. of Employees	Amount Collected
1935			
April	53	104	\$3,678.36
May	53	73	1,990.64
June	50	62	2,769.84
July	57	65	2,548.18
August	56	69	3,293.23
September	53	65	2,025.28
October	70	99	3,240.24
November	60	79	2,270.64
December	38	55	2,042.98
1936			
January	37	198	2,398.83
February	39	57	1,868.59
March	27	41	1,652.05
	593	967	\$29,778.86

COURT ACTIONS

Each case must be dealt with on its merits and the Board resorts to court action only where necessary to compel action by a recalcitrant employer or where it is deemed that the collection of arrears is not sufficient punishment. It is not deemed advisable to prosecute an employer who has underpaid an employee because of ignorance of the law or financial difficulties but such excuses cannot be accepted as reasons for underpayment.

During the year 46 prosecutions were undertaken by the Board. Of these 29 were withdrawn from court before trial because settlements were made satisfactory to the Board and all concerned. The magistrate dismissed three cases for lack of sufficient evidence and in three other cases the employers were ordered to pay arrears but no fines were imposed. Fines totalling \$460 were imposed in 11 cases, in all of which arrears were ordered paid to employees.

PERMITS

The Board is empowered to establish wages lower than the prescribed minimum for handicapped and aged workers. Persons over sixty years of age are classified as aged for this purposes and any worker who through physical or mental disability is incapable of successfully competing with normal workers may be granted a special permit. In all cases written application for permits must be sent to the Board, signed by both the employer and employee. It is not the practice of the Board to grant permits because a worker is slow or incompetent or because the employer finds it difficult to pay the required wages.

Permits are issued covering periods of from three to twelve months but in the cases of age and permanent handicap are renewed on application without further investigation.

The following table indicates the relatively small number of such permits in force covering only 125 employees throughout the Province:

	Firms	Employees
Permits in force April 1, 1935	65	111
Permits issued from April 1, 1935, to March 31, 1936	23	51
Permits cancelled or expired from April 1, 1935, to March 31, 1936.....	17	37
Permits in force April 1, 1936	71	125

STAFF CHANGES

The inspection staff of the Department of Labour has been reorganized and two inspectors of the Minimum Wage Board, Messrs. Chas. A. Needham of Windsor and W. C. Ferris of Toronto, were transferred to the departmental inspection staff on February 1, 1936. Mr. F. Hawes, of Hamilton, was transferred to the Apprenticeship Branch of the Department on February 1, 1936, and has taken over the duties of Director of Apprenticeship.

All inspection work for the Minimum Wage Board, with the exception of that done by Mr. E. W. A. O'Dell, special investigator, and Mr. Geo. Chambers, auditor, is now done by departmental inspectors under the direction of the Chief Inspector.

The additional clerical work in connection with the enforcement of the Industrial Standards Act has necessitated a slight reorganization of the office staff and the addition of two new members. Mr. Farmer has devoted almost full time to this work which has also occupied a considerable portion of the time of the Chairman.

ADMINISTRATIVE PROBLEMS

The additional work undertaken during the year with consequent reorganization has made it impossible to carry out proposed changes in existing orders of the Board particularly those which would involve consultation and conferences with representatives of employers and employees concerned. If possible, the Board plans to make certain necessary changes during the current year.

Difficulties have arisen in connection with the enforcement of orders in unincorporated urban and industrial sections of townships. Existing orders provide minimum rates according to population for cities, towns and villages but due to an oversight, no provision has been made for industrial sections of townships adjacent to large cities or in connection with mining developments and which are not incorporated as separate municipalities. Orders are being amended to correct this deficiency.

The increasing practice or habit of girls and women accepting employment at whatever wages may be provided or knowingly offering to work for less than the minimum rates and later, when difficulties arise, complaining to the Minimum Wage Board and demanding the collection of arrears, is causing considerable difficulty and may lead to reductions in the rates or to amendments which would be detrimental to the interests of employees and which would further increase the difficulties of administration.

The board has carefully considered the advisability of decreasing the minimum rates but despite the fact that slight decreases might be justified on the basis of decreased living costs it is deemed inadvisable to make such changes at present. The policy as enunciated in previous reports is to retain existing rates so long as they are acceptable rather than to change them to keep in step with any index of living costs or economic changes. Stability is deemed preferable to frequent fluctuations.

As previously indicated, one of the chief difficulties in enforcing minimum wage rates, particularly in small retail establishments, offices and establishments rendering personal services, is to secure adequate, accurate records of wages and hours. A special effort has been made during the past year to educate employers in connection with the necessity of protecting themselves in this respect but it appears that drastic action is necessary and the Board intends to revise regulations and take action against persistent offenders.

It is impossible to accurately determine the amount of arrears, if any, owing to pieceworkers whose earnings have been reduced through broken periods of employment and frequent waiting periods, where accurate records are not available. In such cases the Board gives the benefit of the doubt to employees although the piecework rates may appear to be in order.

Overtime periods in stores and offices may be offset by lost time due to illness, holidays and other time off with pay but unless the records prove such statements the Board must be guided by the information furnished by the complainant.

Another difficulty arises in connection with part-time and occasional workers who are notified to report for possible employment during rush hours or busy periods and who are frequently kept waiting for hours before being hired or sent home without work or pay after a long waiting period. Many of these workers are required to wait a week or more until the regular pay day before receiving their wages and in some cases the carfare and expenses are equal to the money received. This practice is increasing and the Board is considering amendments to existing orders whereby such workers must be paid at hourly rates in excess of the regular rate for experienced workers and be guaranteed at least three hours' pay on each occasion of employment.

Despite increasing difficulties of administration and continued economic depression resulting in lowered wage rates which in many cases are reduced to the legal minimum for all except highly skilled workers or exceptionally fast pieceworkers it can safely be said that the Minimum Wage Act in Ontario is being more rigidly enforced than ever before and that employers as a whole are in agreement with the provisions of the Act. Some inequalities exist in the application of existing rates throughout the Province and many persons are still ignorant of the full requirements of the law but the need for such legislation was never more apparent.

INDUSTRIAL STANDARDS ACT

Section 6 of the Industrial Standards Act provides that "the Minimum Wage Board shall have authority to enforce the provisions of this Act and of the regulations and schedules" The Board is the sole authority through which prosecutions may be launched and is also authorized to make inspections and to collect from employers all necessary information regarding wages, hours and records.

All activities in connection with the convening of conferences, drafting of schedules and securing their approval by Order-in-Council are carried on by the Industrial Standards Officer. The Minimum Wage Board takes over the enforcement of the provisions of each schedule after it has been gazetted and thereby becomes law.

Inspection work is carried on through departmental inspectors and much of the preliminary work in connection with the discovery and investigation of complaints is done by advisory boards. These representative bodies, which usually consist of three employers and two employees, are appointed by the Minister to assist in the enforcement of each schedule of wages and hours under the Act. The members serve without remuneration and meet periodically as required. Each advisory board is expected to receive and deal with complaints and inquiries and to transmit to the Minimum Wage Board those matters which require special attention, and all cases where it is deemed advisable to collect arrears of wages or prosecute. Minutes of each meeting are forwarded to the Minimum Wage Board, containing the findings and recommendations in connection with alleged offenses.

SCHEDULES

At the close of the year there were 35 schedules in effect, governing wages and hours in seven different industries, including eleven building trades. The following table indicates their distribution.

SCHEDULES IN EFFECT ON MARCH 31, 1935

Zone	Number of Schedules	Trades and Industries
Province of Ontario.....	3Millinery, Brewing, Cloak and Suit
Province of Ontario, Toronto excepted	1Furniture
Counties of Waterloo Wellington, Perth and Huron	1Baking
Port Arthur Forestry Division.....	1Logging
Toronto	11Building Trades
Hamilton	2" "
Windsor	5" "
Ottawa	4" "
London	2" "
Brantford	1" "
St Catharines	1" "
Kingston	2" "
Port Arthur and Fort William.....	1" "

COMPLAINTS

Numerous complaints were dealt with by each advisory board or by the Minimum Wage Board and officials of the Department and those concerned have been kept busy. As with all new legislation, those responsible for the enforcement of the Act have had to deal with many difficult situations and problems arising from misunderstanding of the legislation and have devoted much time to work of an educational nature.

PUBLIC INQUIRIES

Where violations exist, regarding which there is not sufficient evidence to justify collection of arrears or prosecution, and where the offence is of a minor nature and appears to be widespread, it is the policy of the board to arrange for a public inquiry at which witnesses are examined under oath and an effort is made to secure the co-operation of offending persons or to obtain data and evidence which will enable the Board to deal more effectively with such offences in future. Six inquiries of this nature were held during the past year.

Date	Trade or Industry	Number of Witnesses	Place of Meeting
November 15, 1935.....	Lathing	5	Toronto
December 4, 1935.....	Baking	25	Kitchener
January 13, 1936.....	Building Trades	28	Toronto
January 34, 1936.....	Building Trades	9	Toronto
February 19, 1936.....	Baking	22	Stratford
March 6, 1936.....	Cloak and Suit	17	Toronto

PROSECUTIONS

Sixty-two prosecutions were launched during the year which resulted in 36 convictions, 16 cases dismissed and 10 charges being withdrawn for various reasons. The total fines imposed in connection with the 36 convictions amounted to \$378, and a total of \$159.05 was ordered to be paid to the treasury of Ontario as arrears owing to employees who because of collusion with the employers were barred from receiving arrears owing them.

COLLECTION OF ARREARS

In addition to the arrears of wages collected for employees through court action which amounted to \$341.11, a sum of \$446.73 was collected through direct action on the part of advisory boards and the Minimum Wage Board. The total amount of \$946.89 arrears of wages was collected from 30 employers in various trades and industries on behalf of 45 employees.

In many cases adjustments in wage rates have been made as a result of investigations and interviews resulting from complaints. The wage reports submitted to the Minimum Wage Board show that many employers increased wages immediately on receiving notice of the schedule rates. It is impossible to estimate the amount by which wages have been increased as a result of the operation of the schedules but wage levels have undoubtedly been raised and the general effect of a schedule is to establish a wage level which approximates wages paid in the higher wage grade shops.

APPENDIX TO REPORT OF MINIMUM WAGE BOARD

The following tables indicate the number of firms reporting to the Board the number of female employees affected by each order of the Board, and the rates of pay for female employees throughout the province:

Note: The "No. of firms reporting" as indicated in the above table represents only employers who reported office workers only and who had no female employees affected by any other order of the Board. The number of employees, however, includes all office workers reported by all classes of employers listed under the different orders. Office workers are not reported in any other table.

REPORT
OF THE
Minister of Education
FOR THE YEAR 1936

TO THE HONOURABLE HERBERT ALEXANDER BRUCE, M.D.,
Colonel in the Royal Army Medical Corps, F.R.C.S. (Eng.),
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR,—

I beg leave to present to Your Honour the Report of the Department of Education for the year 1936.

The attendance at the Normal Schools for the session of 1936-37 was 1,082, being 155 below that of the session of 1935-36, which totaled 1,237. This decrease is due partly to improving economic conditions, partly to the realization that the profession is already overcrowded, and partly to the fact that the requirements for admission have been raised. While the quantity has diminished, the quality, as measured by mental ability, has improved. The only Normal School showing an increase in attendance for the year was that of the University of Ottawa. This school has been responsible, within the last ten years, for increasing the percentage of First and Second Class teachers in the schools attended by French-speaking pupils from 13 per cent. to 75 per cent. Its standards are fully equal to those of the other Normal Schools, and so excellent is the command of English possessed by its students that it is difficult to distinguish the class-room work in this subject from that of the other training schools.

There has been a general improvement in the qualifications of teachers throughout the Province. Large numbers of those possessing Second Class standing are undertaking through private study and through attendance at the summer courses offered by the Department to become possessors of First Class Interim certificates, while those with First Class Interim certificates are proceeding by similar means with the first year's University work necessary for the completion of their permanent standing. It is a tribute to the ambition, industry, and enthusiasm of such teachers that over 5,000 attended Departmental summer courses in 1936 and that at least an equal number attended courses given by the Universities. This means that about half of the teachers in the Province used part of their vacation to improve their academic standing.

Up to the present year the "single lesson" plan for practice teaching was in operation. One lesson a week was taught and, towards the end of the session, every student was given a continuous half-day's practice. This method was good training in the technique of teaching but was weak in that it failed to train the prospective teacher for teaching a series of lessons or to become acquainted with real problems in administration and with practical direction of activities.

The plan adopted for the session of 1936-37 is to have the student teach six or eight single lessons to familiarize him with the main principles of teaching and to afford an opportunity for obtaining some control in technique. The student body of each school is divided into four sections and after the preliminary practice mentioned above each section in succession is sent for a week at a time and in groups of two or three to the practice schools. Here the first day is spent in observation. On the second the student teaches at least one lesson and each succeeding day the number of lessons is increased until finally each student is given complete charge of the room for a whole half-day. The section then returns to the Normal school for three weeks while the other three sections, in succession, go into the practice schools. This routine is continued till the end of the school year. The practice teaching includes discussions on the lessons taught with the critic teacher in charge of the room. To avoid undue strain on critic teachers practice teaching in any given room is confined to alternate weeks. The change is proving satisfactory as it provides for better practical training under less artificial conditions than those prevailing under the former plan. The student, moreover, is given an opportunity of acquiring some skill in continuous work.

For some years it has been the practice of the Department to pass on the recommendation of the Normal School staffs students who have made at least 60 per cent. on sessional tests while those who failed to attain this standing were required to write on final examinations set by the Department and read by the staffs. Under the new scheme adopted for the session of 1936-37 such students will still write on the final Departmental examinations but the papers will be read by committees of Normal School teachers on a plan somewhat similar to that employed in Departmental High School examinations. It is hoped in this way to ensure greater uniformity of standards.

Administration of City Schools

In the administration of schools in urban centres there appears to be a tendency to place all schools, both elementary and secondary, under the control of one head. In 1925, London made the senior Public School Inspector responsible, not only for his own regular work, but also for the supervision of the purchases of all supplies both for the elementary and the secondary schools of the city. It was decided furthermore to have all reports presented to the Board through this official. The plan was successful from the beginning and the Department gave its approval to the arrangement. In 1931, Chatham adopted the London plan with some minor variations. Later, other urban Boards discussed with the officials of the Department the feasibility of placing all supervisory powers in the hands of one official. Accordingly, in 1932, a regulation was passed by Order-in-Council permitting the Board of Education in any city having a population of 100,000 or more to appoint a Superintendent of Schools. This official must be acceptable to the Advisory Vocational Committee and both his experience and academic and professional qualifications must be satisfactory to the Minister. The Superintendent thus appointed may exercise any powers assigned to him by the Board of Education and the Vocational

Advisory Committee, and approved by the Minister, provided that these powers are not inconsistent with the Statutes and Regulations of Public Schools, High Schools and Collegiate Institutes, and Vocational Schools.

In July, 1932, the City of Hamilton took advantage of the regulation and appointed a Superintendent of Schools, and in November of the same year Toronto followed suit. In 1935, the City of London asked that the regulation be modified to include cities with a population *below* 100,000. The regulation was amended to meet this request and in October, 1935, the London Board appointed the senior Public School Inspector as Superintendent. Shortly after this both Windsor and Chatham took advantage of the amended regulation and appointed Superintendents. In all the cities mentioned above the scheme has proved satisfactory.

During the year a number of rural school buildings have been erected, some to replace schools destroyed by fire, and others to replace buildings which time and changing conditions had rendered unsuitable for present-day use. The new buildings are modern, with standard class-rooms, good lighting (in many cases with artificial lighting), single desks, slate blackboards, separate cloak-rooms, inside toilets, and good heating plants. They are built of brick with cement foundations, are attractive in appearance, and are a credit to the trustees and ratepayers who have planned them and paid for their construction.

Especially worthy of mention is the school built in S.S. No. 1 Canboro, on the Provincial Highway three miles east of Dunnville. In addition to the features already mentioned this school contains at the rear of the class-room a closed stage with folding doors. Ordinarily this enclosed space can be used for library purposes and as a teacher's room. On special occasions and community gatherings the doors may be thrown open and the whole floor space is thus made available.

Another building which suits its purpose admirably is that built by the Kemptville Board. This houses both the elementary and the secondary school departments. There are separate entrances and corridors for each department and separate playgrounds, in addition to ample space for school gardens. Both auditorium and gymnasium are readily accessible to the pupils of either school. Further details of this building will be found in the Report of the Chief Inspector for Public and Separate Schools.

Health of Teachers

Some years ago the Teachers' and Inspectors' Superannuation Committee brought to the attention of the Department the somewhat alarming fact that an unduly large number of teachers were being granted pensions on the basis of disability. The number of these was much greater than the actuarial calculations had provided for and the situation constituted a possible threat to the future solvency of the fund. In September, 1935, it was therefore announced that all candidates for admission to the College of Education and the Normal Schools would in future be required to undergo a medical examination by doctors appointed by the Department. As a result, in 1936, twenty-nine candidates out of a total of 1374 were rejected on medical grounds. It is hoped that the average teaching efficiency of the staffs will be raised by the elimination of those who do not give promise of retaining good health throughout the normal period of expectancy. At present, illness among teachers is responsible for a very serious loss of time, not to speak of the lowered efficiency of those who remain on duty while handicapped by poor health.

Text-Books

During the year 1936 the new Treasury Readers, Books Five and Six, were authorized to replace the former Third Reader. These books were introduced into the schools in September. Plans are already under way for the introduction of two more Readers to replace the present Fourth Reader in September, 1937.

The Third and Fourth Readers have been in use for some ten or twelve years. During this time a good deal of research work has been done in the subject of reading and the old Readers were becoming more or less antiquated as compared with the type of modern books now available. Then, too, each of the old Readers contained what was supposed to be a sufficient amount of reading material for the two years the pupil would normally spend in the Form. The result, generally speaking, was that the pupils read, privately, all the selections in the Reader during the first year, and the second year's work in this subject was therefore monotonous and uninteresting to the pupils and consequently was pedagogically unsound. Modern methods demand a new book for each year's work. The challenge was met by the authorization of the Treasury Readers. A much more interesting and more suitable selection of reading matter was thus provided and the pupil will now have more reading material in one year than was formerly available in the Third Reader for two years. It was also felt that, since the amount of the reading material in the former books was limited, too much intensive teaching was done and that, in consequence, reading for pleasure and interest was somewhat neglected. The amount of reading material in the new books precludes the possibility of teaching all the selections intensively and the teacher is encouraged to make them the inspirational source of wider supplementary reading. Direction for such additional reading is furnished through the inclusion of lists of suitable books at the end of each topical section into which the books are divided.

In addition to the new Readers, the Spelling Book was replaced by two new books, Canadian Speller, Books One and Two. The old Spelling Book had been in use since 1925, and it was probably the best book available in the subject at the time of its authorization. But, as in the case of reading, a great deal of study has since been given to the subject of spelling and the new Spellers embody the results of the best research work available up to the present time.

The present Public School Arithmetic has been in use since 1925. It covers the whole Public School course in the subject and the amount of material for the individual grade is therefore limited. This applies particularly to the work for the junior classes. Modern methods call for a separate text-book for each grade and for problems more closely connected with the community life of the pupil. It has therefore become imperative for the Department to take advantage of the existence of newer books now available if Ontario is to keep pace with the educational progress in other states and provinces. Accordingly plans are already under way for the introduction of two new junior text-books which, it is hoped, will be ready for the opening of schools in September, 1937. The new books will be for the use of Grades III and IV (Junior and Senior Second classes), one book for each grade.

Respectfully submitted,

L. J. SIMPSON,

Minister of Education

December 1, 1937

APPENDIX A
REPORT OF THE CHIEF INSPECTOR OF PUBLIC
AND SEPARATE SCHOOLS

The Provincial Inspectoral Staff, 1936

I. IN MEMORIAM:

On August 12th, 1936, Mr. J. E. Benson, M.A., Public School Inspector for the City of Windsor died at his summer home in Wellington, Prince Edward County. He was in his 63rd year. Mr. Benson first began his duties as a Public School Inspector in Prince Edward County, his home area, on January 1st, 1913, and from that time to January 31st, 1920, he was instrumental in bringing about many improvements in the county schools, one of the chief of these being the organization of the Wellington Consolidated School. In Windsor, Walkerville, and Sandwich, and for the past year in the new City of Windsor, including East Windsor as well as the urban centres mentioned above, Mr. Benson gave outstanding service as an educational leader. The organization of the Rotary Schools of the Border Cities and the splendid special subject departments of these schools will stand out as one of his chief contributions to the advancement of the elementary schools in the Province. Mr. Benson possessed in a high degree those qualities required in a city superintendent of schools and by an educational leader, and the City of Windsor, as well as the Province at large, has lost through his death a leader in elementary school education. Mr. Benson received his early education in Prince Edward County and after some experience as a teacher he entered Queen's University, graduating in 1911 with honour specialist standing in Science.

II. RESIGNATIONS:

On March 31st, 1936, Mr. W. A. Wilson, B.A., retired as Public School Inspector for the cities of Port Arthur and Fort William. During his period of office in this area, beginning January 1st, 1925, he had been successful in introducing many progressive measures into the schools and at the conclusion of his service, due largely to his efforts, one of the cities had the highest percentage of First Class certificated teachers among the cities of the Province. Mr. Wilson gave strong leadership to his boards and teaching staffs and secured a very high degree of co-operation and initiative on the part of all his associates. The elementary schools of Port Arthur and Fort William made rapid progress under his supervision. In his earlier teaching experience he taught or acted as principal in the Gananoque, Kenora, and Haileybury High Schools. He was also Public School Inspector for the districts of Temiskaming and Cochrane from July 1st, 1919, to December 31st, 1924, and gave invaluable assistance to the Department in the early organization of pioneer school sections in these areas. Mr. Wilson graduated in Arts from Queen's University in 1897 and received his professional training at the Ontario Normal College in 1898.

Mr. W. R. Liddy, B.A., retired as Public School Inspector for Dufferin County, in part, and Peel County, in part, on August 31st, 1936. He received his public school education in his native township and his secondary education in the Orangeville High School. He began his educational career at 18 years of age

in School Section No. 2 Mono, subsequently teaching in School Section No. 6 Amaranth and in the Shelburne Public School. As a High School teacher he joined the staff of the Port Dover High School and after serving on it for two years was appointed principal, a position he held and filled most acceptably for thirteen years, resigning it to become Public School Inspector for Dufferin County on January 18th, 1912. As an Inspector, Mr. Liddy gave most creditable service. He was always alive to the interests of the schools in his inspectorate, winning the confidence and support of the boards of trustees by his tact, his fair-mindedness, his enthusiasm, and the keen interest which he at all times had in the schools. In the class-room he was an inspiration to the teachers and the pupils. To new educational movements he gave his whole-hearted support and co-operated splendidly with the Department of Education.

Mr. Chas. F. Ewers, B.A., Public School Inspector, Rainy River District, retired from his duties on August 31st, 1936. He had received his inspectoral appointment on September 1st, 1925, and gave eleven years of very successful service to the Department and to the people of his area. His inspectorate called for much tact in dealing with problems of school organization, school finance, and the erection of school buildings, and his fairness and good judgment led to the prompt and satisfactory adjustment of these problems. In the class-room Mr. Ewers was equally successful in assisting teachers to improve their methods. He received his early education in Port Perry, and graduated from the Toronto Normal School in 1891. In 1911 he received his Arts degree from Queen's University. His public school teaching experience took place at Kleinburg, Orangeville, and Bolton. He taught in continuation schools at Bolton and Lucknow and subsequently had experience as a high school teacher or principal at Caledonia, Bradford, Aurora, and Fort Frances.

Mr. J. C. Spence, B.A., B.Paed., resigned as Public School Inspector for Carleton County (West) and Lanark County (East) on December 31st, 1936. He had been appointed to this position in 1923. Mr. Spence was born at Glenarm in Victoria County and received his early elementary and secondary education in the home area and at Lindsay, Peterborough, and Collingwood. After completing the Normal School course in 1889 at Ottawa he received an appointment on the Ottawa public school staff, where he gave outstanding service as a teacher and principal until his appointment as an Inspector in 1923. During his teaching experience, Mr. Spence was a constant student and obtained through private study and summer courses his Arts degree with specialist standing in modern languages, his Bachelor of Pedagogy degree, and four other special certificates. Mr. Spence was unstinting in his services to the public schools both in the City of Ottawa and in his inspectorate and marked advancement was made in the schools under his supervision during his tenure of office as an Inspector.

Dr. Field is a native of Lincoln County, his birth-place being in the township of Grimsby. He began teaching when only seventeen years of age and continued in this important work until 1893, when he entered the University of Toronto and pursued an Honour Course in English and Modern Languages. On graduation in 1896 he was appointed to the staff of the Walkerton High School. In 1900 he accepted a position in the Goderich Collegiate Institute, serving under the late Dr. Hugh Innis Strang, whom he succeeded as Principal in 1906. Dr. Field was appointed Public School Inspector for the district of East Huron in February, 1911. He obtained the degree of Doctor of Philosophy in 1912. Subsequent to his appointment as Inspector he was offered a position on the staff of the Stratford Normal School, but he declined to accept it.

Dr. Field was a person of fine attainments and sane judgment, combined with a mildness of manner and heart and a sense of fair play. He was a most interesting and effective teacher, and a very successful principal. As an Inspector it may be truly said that he left the schools of his Inspectorate better than he found them. He laboured faithfully and well. The children of the schools which he served, the boards whom he advised, and the teachers whom he inspected know him as one who was always a gentleman and at all times interested in the progress of education in his Inspectorate, as well as elsewhere, and ever willing to do his best for its cause. Dr. Field retired on December 31st, 1936.

III. APPOINTMENTS:

The following appointments were made to the provincial staff of Inspectors during 1936:—

Mr. Wm. Edgar Eade, B.A., B.Paed., principal of Francis Public School, Fort William, to District Division II (Rainy River), to succeed Mr. Chas. F. Ewers, B.A. His duties began on September 1st, 1936, with residence at Fort Frances.

Mr. Wm. J. Judd, B.A., principal of St. James Public School, Port Arthur, to District Division III (Thunder Bay, in part, and the City of Port Arthur), to succeed Mr. W. A. Wilson, B.A. His duties began on September 1st, 1936, with residence at Port Arthur.

Mr. Geo. A. Campbell, B.A., Principal of the Kennedy Collegiate Institute, Windsor, was appointed by the Windsor Board of Education on November 4th, 1936, as Superintendent of Schools for the city and on the same date Mr. A. R. Davidson, B.A., Principal of King George School, Windsor, was appointed by the board as Public School Inspector. They succeeded the late Mr. J. E. Benson, M.A.

IV. TRANSFERS:

Mr. H. E. Elborn, M.A., was transferred from District Division XI (Temiskaming, in part, and the towns of Englehart, Iroquois Falls, Matheson and Kirkland Lake) to Waterloo County (No. 1), to begin duties on September 1st, 1937, with residence in Kitchener.

Superintendents of Schools in Cities

Beginning on January 1st, 1925, the Board of Education of the City of London gave to the Senior Public School Inspector, in addition to his duties relating to the Public Schools, the administration of the central offices of the Board of Education and made him responsible also for the supervision of all purchasing in behalf of both Public and Secondary schools. He was further required to prepare and bring all school reports before the Board and its committees for consideration. The plan worked successfully from the beginning and the Department of Education gave approval of the additional duties given to the Inspector. In 1931, the City of Chatham adopted the London plan with minor variations.

From time to time different urban centres have discussed with the Department the need for one official who would be given general supervisory powers over both elementary and secondary schools in each urban centre and become the chief advisory official to the Board of Education. Accordingly, the following regulation was passed by Order-in-Council in 1932:—"The Board of Education

of a city having a population of 100,000 or more may appoint a Superintendent of Schools who shall be acceptable to the Advisory Vocational Committee and whose academic and professional qualifications and experience in the schools of the Ontario Provincial system are satisfactory to the Minister of Education. The Superintendent so appointed may exercise any duties assigned by the Board and the Advisory Vocational Committee, and approved by the Minister, which are not inconsistent with the Statutes and Regulations of the Public Schools, High Schools and Collegiate Institutes, and Vocational Schools”.

In July, 1932, the City of Hamilton was first to take advantage of this regulation. Mr. F. E. Perney, B.A., B.Paed., Chief Inspector of Public Schools, was appointed to the position of Superintendent of Schools for the city.

The City of Toronto, on November 17th, 1932, appointed Dr. C. C. Goldring, M.A., as Superintendent of Schools.

In 1935, the City of London asked that the regulation be modified so that cities with a population below 100,000 might appoint a Superintendent of Schools. The regulation was amended to meet this request and on October 10th, 1935, the London Board of Education named Mr. G. A. Wheable, B.A., as Superintendent.

On November 4th, 1936, the City of Windsor appointed Mr. G. S. Campbell, B.A., Principal of the Kennedy Collegiate Institute, as Superintendent of Schools for the city.

On December 29th, 1936, Mr. H. A. Tanser, B.A., B.Paed., was appointed Superintendent of Schools by the Chatham Board of Education.

In all the cities mentioned above the new plan has worked out successfully and it appears probable that other cities of the Province will adopt this plan in the near future.

Additional Duties to Some Inspectors

With the object of keeping expenditures within the limits of the money voted by the legislature, it was necessary during the year 1936, to ask some of the Inspectors to share the duties in contiguous inspectorates where the regular appointees had retired or had been transferred.

Mr. W. F. Hiscocks of Monteith and Mr. J. M. Kaine of Haileybury have assumed between them, since September 1st, 1936, the duties of Mr. Elborn's former inspectorate in the Kirkland Lake area, and it will be necessary for them to continue under this arrangement until August 31st, 1937.

Mr. W. F. Smith of Collingwood, Mr. M. R. Fydell of Brampton, and Mr. W. H. Carlton of Bradford have assumed the duties of Mr. Liddy's inspectorate (Dufferin County) since September 1st, 1936, and this arrangement will continue until August 31st, 1937.

For the school year, 1935-1936, Mr. J. H. Smith of Stratford and Mr. Lambert Norman of Galt undertook, between them, the supervision of Mr. R. H. Roberts' inspectorate, Waterloo County, No. 1.

In the Elgin and Kent County areas, Mr. J. C. Smith of St. Thomas, Mr. A. B. Lucas, Chatham, and Mr. G. A. Pearson, Chatham, continued to carry the additional duties of a fourth inspectorate.

In all these cases the Inspectors co-operated most willingly with the Department of Education in meeting these additional demands and the services rendered were much appreciated.

Correspondence Courses

The Correspondence Courses conducted by the Department of Education were begun in 1926 with an enrolment of 50. They have therefore been in operation for 11 years and the enrolment is now over 2,000. Those eligible for admission to these courses are:—

- (1) Those out of reach of a school throughout the whole year.
- (2) Those who are unable to attend school for the winter months because of impassable roads, or the closing of the school. These attend school for part of the school year and take the Correspondence Courses during the months in which they are unable to attend their own schools.
- (3) Those who live within reach of a school but who are physically unable to attend. Such pupils are found here and there in all parts of Ontario, some living in rural sections and some in urban centres. There are about 100 such pupils enrolled at present.
- (4) Those long-time patients in sanatoriums who desire to have the lessons. In these cases the lessons are sent out but the answers are not returned for correction.
- (5) Other cases determined on their merits.

The plan on which these courses are conducted is as follows: Two lesson assignments (each of which means five days' work) are sent out on regular dates three times each month. All the necessary school books, supplies, answer sheets, and stamped, addressed envelopes for the return of the answers are provided free by the Department of Education. When the answers are returned, they are examined by a staff of fully qualified and experienced teachers in the Department, who correct them and make such suggestions and explanations as they find necessary. The Department also sends at Easter and Christmas each year supplementary readers to all those enrolled who are far enough advanced to read a book and to the others an Easter or Christmas card. That these courses are proving highly satisfactory may be judged by the hundreds of letters of appreciation received from those making use of them. As the lessons are based on the authorized text-books in use in the schools and on the courses of study prescribed for these schools, a pupil may change from day school to the Correspondence Courses, or vice versa, at any time without detriment.

These courses have recently been extended to include fifth class or lower school work (Grades IX and X); so that it is now possible for a child in any part of the Province, no matter how isolated, to obtain a complete public school or lower school education. Ninety pupils have already passed the High School Entrance examination through these courses. The fact that each teacher on the staff has charge of from 50 to 350 pupils, depending upon the grade, makes this by far the least expensive form of education in the Province. The cost per pupil, including expenditures of all kinds, is about one-seventh of the average cost per pupil in the rural schools of the Province.

The School Cars

This itinerant school, which brings education to the homes of isolated children in the north, has just completed its tenth year. It has changed life in these sequestered communities, and brought hope to scores of youth where nothing but blank ignorance and defeat had faced them in the struggle of life.

A recent report from one car shows where their after-school life has found them. Some have joined their fathers in the work of hunting, fishing, trapping, and bushranging on the frontier lines, but with a new interest and a happier outlook on life; others hold responsible posts in the mining fields or railway service; others are forging ahead in advanced schools, one, for example, completing his course for teaching in the University of Ottawa Normal School; and others again are pursuing study courses in commercial art, radio, and mechanical engineering. All are proving their capacity for self-dependent effort and achievement born of the self-help system peculiar to the school car. The thousand miles covered by the six cars are only a fraction of the wide areas in the north calling for help, but financial limitations forbid extension for the present. The idea has spread to other lands. The Imperial Commission governing Newfoundland, after enquiry into the organization and mode of operation of Railway School Cars in Ontario, has adopted the plan in that colony, and finds it a happy solution for its problems in territory similar to that in Northern Ontario.

Exchange of Teachers

There are 44 Ontario teachers on exchange for the school year, 1936-1937. This is the same number as that of last year, and with that exception the largest number in any one year for some time. Of these, thirty-seven are from Public Schools, three from Separate Schools, one from a Normal School, and three from Secondary Schools. None will dispute the educational value to the teacher of a year spent in service under systems different from those in our own Province. The exchange teachers have studied for themselves the conditions of other countries or provinces and their own land takes on a new significance as a part of the British Commonwealth of Nations.

To show that these exchanges are not confined to any one part of the Province it may be stated that the Ontario teachers at present on exchange are from York County, St. Thomas, Windsor, Beeton, Toronto (16), Perth, Oshawa, Keewatin, Niagara Falls, Brantford, St. Catharines, Ottawa, Eganville, Chatham, London, Hamilton, Schumacher, North Bay, Stoney Creek, Lucan, and Picton.

Summer Courses, 1936

The number attending these courses in 1936 was greatly increased, due largely to the new course in Education. The successful completion of this new course is now one of the requirements for a Permanent First Class certificate. Many of the teachers who attended this Course have expressed themselves as highly appreciative of its value; and there is no doubt that it will prove to be more and more valuable to those teachers who have had from two to four years of teaching experience. The numbers taking the Courses in Agriculture and Music were also much larger in 1936, due in a large measure to the active efforts of Mr. Davies, the Inspector of Agricultural Classes, and of the Provincial Supervisor of Music, Mr. Fenwick. The following is a statement of the enrolment by subjects:—

Agriculture.....	1,121
Art.....	292
Auxiliary Classes.....	134
Commercial.....	216
Education.....	668
English-French.....	253
Farm Mechanics.....	25

Health Teaching.....	176
High School Assistants.....	51
Kindergarten-Primary.....	279
Manual Training.....	102
Music (a) Vocal.....	542
(b) Instrumental.....	11
Oral French.....	46
Physical Education.....	252
Upper School.....	637
Vocational Courses.....	70
Vocational Guidance.....	6
Total.....	5,039

New School Buildings

During the year, a number of new school buildings were erected in the rural areas. A few of these were to replace schools which had been destroyed by fire, others to replace those which time and changing conditions had rendered unsuitable. These new buildings are modern, with standard class-rooms and splendid lighting (some have artificial lighting as well) with single desks, slate blackboards, separate cloakrooms, inside toilets, basements, and good heating plants. Most of them have been constructed of brick and cement and present an attractive appearance. The boards of trustees and the ratepayers concerned are to be congratulated on their fine new schools. Special mention may be made of the new rural school building in Public School Section No. 1 Canboro, situated on Provincial Highway No. 3, about three miles west of Dunnville. This school is of fine architectural design and has all the modern improvements. The most unique feature is a closed stage with folding doors at the rear of the classroom, which can be used as a library room or a teacher's room and serves a most useful purpose on special occasions for the pupils and for the people of the community.

An exceptionally fine school building was also erected in the town of Kemptville. The building is of fire-proof construction throughout and contains both the Public and the High School. There are separate entrances for these schools, also separate corridors, separate lavatories, separate playgrounds, and separate school gardens. The pupils can reach the gymnasium and the auditorium conveniently from either school. The foundation is of solid concrete. The walls above it are of brick with stone trimmings. All floors and roofs are of concrete slab on steel joists, and are insulated against winter cold as well as the heat of summer. The lighting, natural and artificial, of all the rooms is modern in character and excellent in quality. Mechanical controls maintain a uniform temperature throughout the class-rooms. The Public School has five class-rooms, four of which are of standard size, each with a cloakroom in the rear. The fifth class-room has a larger floor space than that of the others. The primary room is adequately equipped for kindergarten-primary work. Besides the regular class-rooms, the gymnasium, and the auditorium, there are three special rooms,—the general science laboratory, the household science room, and the general shop. The girls of the fourth classes are given courses in household science and the boys of the same classes receive instruction in shop work. Agriculture and music also receive special attention. The people of Kemptville have every reason to be proud of their fine new school. It was officially opened by Dr. McArthur, the Deputy Minister of Education, on January 4th, 1937.

The Medical Examination of Candidates Applying for Admission to the Normal Schools

Some years ago the Teachers' and Inspectors' Superannuation Commission brought to the attention of the Department of Education the fact that a large number of teachers were being compelled to apply for pensions on the disability basis. This number has been and continues to be greatly in excess of the number estimated by the actuary when formulating the conditions under which the pension scheme would operate. On November 1st, 1936, out of 1,601 teachers receiving superannuation allowances under the Act, some 622 (498 women and 124 men) had been granted their pensions under the disability clauses of the Superannuation Act. In other words, 38.8 per cent of the teachers retiring on pension were required to do so because of physical disability. In September, 1935, the Minister of Education announced by regulation that all candidates for admission to the Normal Schools and the College of Education would be required to undergo a medical examination by physicians appointed by him. The result was that twenty-three student teachers were not permitted to complete their teacher-training courses. In September, 1936, the number was twenty-nine out of a total of 1,374 candidates. There is no doubt that this practice will have a tendency to raise the efficiency of the provincial teaching staff through the elimination of those who do not give promise of good health over a normal teaching period. It is deemed essential also that teachers-in-service should give greater attention to the laws of health. If it were possible to make an accurate survey of the time lost by teachers due to absence on account of illness and also of the loss due to inefficiency because of poor health while on duty, there is no doubt such a survey would show that there is a very great lowering of teaching efficiency throughout the Province due to the effects of poor health among teachers.

School Health Supervision

During the past few years medical and dental services have not been extended to new areas as fast as might be desired. It is known that in many locations the people, and particularly the mothers, are desirous that this type of service should be given but it seems difficult to effect an organization since it becomes necessary for the rural school sections to secure this service through the local municipal Board of Health.

In Wentworth County a splendid system of medical and dental inspection of schools has been worked out, and through Dr. Holbrook and his committee the boards of trustees have been able to obtain the service at cost. By means of periodic meetings, the weaknesses of the service are constantly being corrected and frequent reports of the school nurses to the committee also result in a constantly improving service.

The individual school sections are made to feel that they are important links in the chain and the different boards send representatives to the periodic meetings of the committee. The result is a high degree of interest and co-operation among the members of the committee, the staff of nurses, the trustees, and the parents.

It is hoped that in the near future there may be an extension of this type of school medical and dental inspection on a county basis and somewhat similar to the plan now in operation in Wentworth County.

Rural School Fairs, 1936

Every county in old Ontario and every district in northern Ontario conducted Rural School Fairs in 1936. All told, 522 School Fairs were held, in which 111,910 pupils of rural Public and Separate Schools took part. The total number of entries made by these pupils was 348,276.

Rural School Fairs are a joint educational effort supported by the Departments of Education and Agriculture. They are designed for farm boys and girls with the object of giving practical application to the lessons in agriculture taught in the schools. Each pupil is supplied with one package of grain, root, or vegetable seed, and one package of flower seed for planting on the home farm. This seed is paid for by the Department of Education and distributed to the schools by the Agricultural Representatives of the Department of Agriculture.

The Agricultural Representative, in co-operation with the Public School Inspectors and teachers, drafts a prize list suited to the agricultural possibilities of the community. The Inspectors undertake the judging of exhibits and competitions dealing with school work, while the Agricultural Representative supervises the judging of the agricultural products and classes, and assumes the management of the Fair. Teachers, trustees, and parents all co-operate in making the Fair a community enterprise.

Provision is made in the prize list for boys and girls to exhibit the produce of the seed supplied in the spring, and classes are also included for live stock (calves, colts, and lambs) poultry, and fruit. Exhibits of art, writing, manual training, nature study collections, sewing, and cooking are evidence of their diligence both at school and at home.

An active programme is planned for School Fair Day, and pupils enter heartily into such competitions as judging live stock, fruit and vegetable naming, button-hole making, patching a grain bag, darning socks, identification of weeds, poultry culling, public speaking, recitations, music, Strathcona exercises, and sports. After the judging of exhibits is completed, the judges give reasons for their placings and explain the proper methods of selecting and preparing exhibits.

Visual Education

There is no disputing the fact that we are living in an age of appeal through the eye. Illustrated magazines, advertising and pictorial sections of newspapers, comic strips, travelogues, and the cinema all bear proof of the fact; and both art and science are lending their support to the development of colour photography, telephotography, and television.

Methods in education are falling in line, but with that conservatism which has always marked progress in things educational. The Department of Education has allied itself with this movement by taking over from the Ontario Government Moving Picture Bureau that portion of its relinquished material adapted to school use. One hundred and forty sets of lantern slides furnish the nucleus of a growing contribution to class-room studies in history, geography, travel, nature study, science, and industry. This material, for some time unused and unorganized, is being re-conditioned and put into shape for efficient service. The hand of the teacher who is skilled in adaptation and tactful in the use of time and method will be greatly strengthened, and she will make school, not only a more attractive place for the pupil, but an institution where the eye will aid the ear, the hand, and the voice in their service to education.

The New Courses of Study

For some years there has been a demand for a revision of the Courses of Study for the Public and Separate Schools in Ontario. Early in 1936 the Minister of Education appointed a number of committees to draft courses for Grades VII-X (Forms IV and V, junior and senior grades, in the present organization). It seemed necessary that these courses should be completed before the others in order to present what might be deemed satisfactory completing courses for those who would discontinue attendance at day school at or about sixteen years of age.

At midsummer 1936 these courses were typed in tentative form; but it was decided not to place them in use until further progress should be made, on the one hand with the courses for Grades I to VI, and on the other hand with those for Grades XI-XIII. Consequently in the early fall of 1936 committees were appointed and began work on these two divisions.

At the closing of the year 1936 the committee working on the courses for Grades I to VI had laid its plans. In accordance with these plans leading teachers in the elementary schools, members of the normal school staffs, and inspectors will be consulted, and the recent courses for elementary schools authorized by other provinces, states, and countries will be reviewed. It is also quite probable that the new Ontario courses will be issued in tentative form at midsummer 1937. The teachers and inspectors will be called upon to give the proposed courses a thorough trial and at the end of the school year, in June, 1938, to submit their comments on and criticisms of the courses to the Department. After further revision it may then be possible to give the courses full authorization in September, 1938.

A new feature of the revised courses will be the change from the former classification of Forms I-V to the newer one of Grades I-X. It has long been felt that the traditional classification of the Ontario Courses of Study for Public and Separate (elementary) schools made it difficult, among other things, to compare the school statistical tables of our Province with those of other systems.

It is too early to comment fully on the changes which will be shown in the new courses, but improvements are expected along the following lines:—

- (1) Greater attention to the English subjects.
- (2) Less number work in the primary grade and a more practical course in arithmetic throughout the grades.
- (3) Greater emphasis on health teaching.
- (4) Closer correlation as among civics, history, and other social studies.
- (5) More suitable completing courses for those who will leave school at the end of Grade IX or Grade X.
- (6) More detailed outlines of the work to be covered in each subject or group of subjects in each grade.
- (7) A grouping together of like subjects.

New Text-Books

In September, 1936, the Department introduced two new authorized readers for Grades V and VI (Form III) to take the place of the former Third Reader. At the same time decision was made to introduce two further new readers in September, 1937, to replace the present Fourth Reader. The number of passages and the amount of reading in these books will be more than double the content

of the two books replaced and the selections are more in keeping with the interests of the pupils concerned. The chief object in these changes is to encourage more extensive reading by the pupils and to discourage the intensive analysis of every lesson by the teacher. It is realized that if pupils are to read for enjoyment and appreciation and if they are to leave the elementary schools with a broad foundation of general reading they must be encouraged to do more reading from books which will appeal to them, as well as lead them afield to the school library, the public library, and to the choice of good books and good reading in later life. The books chosen for Grades V and VI were the Canadian Treasury Readers for these grades, published jointly by the Macmillan Company and the Ryerson Press. The books to be introduced in September, 1937, are from the Canadian Life and Literature Series for Grades VII and VIII, published jointly by Thos. Nelson and Sons and The Educational Book Company, Limited.

Two new Spelling books, one for the junior grades and one for the senior grades, were also introduced in September, 1936, to replace the single book formerly in use. The new books were those prepared by Dr. F. Quance, Dean of the College of Education at Saskatoon, and are published by the W. J. Gage Company, Limited. These new Spellers are the result of a scientific study of the subject of Spelling in Canadian Schools by Dr. Quance. The grading of the words and the assignments for each grade will make these books of great value to the teachers in improving the spelling of the pupils.

The Penny Bank

Thrift education is given in 499 schools of the Province by means of the Penny Bank of Ontario, an increase of eleven schools over 1935. The children in these schools now have on deposit \$1,272,209, being an increase of more than \$17,000 over a year ago.

Opportunity is given the pupils once a week to make deposits. Regularity in depositing rather than the amount of the deposit is stressed. It is noteworthy that at the end of the year 41 schools had 80 per cent. or more of their pupils making deposits each banking day in the month.

In addition to the opportunity to save regularly, the Penny Bank furnishes the schools with thrift lessons, in which wise spending is taught as the necessary complement to regular savings. That the children save for a purpose, and then spend to achieve their purpose is evident from the fact that although the deposits for the year totalled approximately \$700,000 all but \$17,000 was later withdrawn to make purchases.

The depositors practise foresight in determining ahead of time their future needs; they exercise self-control in denying themselves present trifles in order to make worth-while purchases in the future. Altogether the Penny Bank of Ontario is making a definite contribution to the development of good citizenship among the boys and girls of the Province.

Agents for School Supplies

For a number of years many of the young teachers who are in charge of their first schools have been visited soon after the beginning of the school term in September by itinerant "high pressure" salesmen who have often represented themselves as special officials of the Department of Education. As a consequence, the teachers have purchased materials which were supposed to be very helpful, but which in many cases, were found later to be of little or no value. The Department of Education has endeavoured through the co-operation of its

officials to protect these young teachers against such unfair and dishonest practices (1) by asking the normal school principals to advise the teachers-in-training against making purchases from these itinerant salesmen, (2) by requesting the Inspectors early in the school year to counsel beginners against such purchases, (3) by advising teachers who communicate with the Department regarding the deception practiced by agents to make no further payments if they can prove that they were persuaded to make the purchases through misrepresentation, and (4) by the issue of a circular letter to Inspectors for distribution among teachers cautioning them not to purchase from itinerant agents. It is very gratifying to note that as a result of these efforts of the Department very few, if any, communications reporting fraudulent practices on the part of salesmen have been received from teachers during the current school year.

The Closing of Small Schools

It is generally recognized that pupils in small ungraded rural schools do not make satisfactory progress. It is also the policy of the Department of Education to reduce the cost of education wherever possible without impairing its efficiency. With these two factors in mind a substantial number of such schools were closed during the year and provision was made for the conveyance of the pupils to other schools where, as part of larger groups, more effective instruction could be given and finer social qualities could be more effectively developed. In most cases the boards of trustees readily acceded to the suggestion to close their schools; in others some persuasion was required. These small schools are closed temporarily and may be re-opened when the Minister feels that such action is justified. A saving of \$100.00 to \$300.00 is in this way made to the ratepayers of each section and an equal amount to the Department of Education. The number of schools closed in 1936 was twenty-six, and the cases of sixty-five others with an attendance of eight or fewer are under consideration for closing at midsummer, 1937.

The Department is kept informed by the Inspectors from time to time respecting schools where the number of pupils of school age living in the section is fewer than eight for two consecutive years; and where there is little prospect that the number of pupils for the next succeeding years will exceed eight it is now a matter of policy to ask that the school be closed. The Public Schools Act requires that boards of trustees shall be elected, as formerly, in school sections where the schools are closed and that the boards shall give the proper care to the school properties and arrange for the tuition of the pupils in neighbouring schools.

Assisted Schools Grants

There are approximately 300 elementary schools in the Province in which the equalized assessment is less than \$10,000; over 500 where the equalized assessment is more than \$10,000 but less than \$25,000; and 325 where the assessment is more than \$25,000 but not more than \$50,000, or in all, approximately 1,125 schools in which the equalized assessment is \$50,000 or less. This means that there is a substantial number of the elementary schools which require more financial assistance from the Department than is given to them through the regular legislative grants. To meet this situation a special appropriation is made each year by the Legislature. For the fiscal year, 1935-1936, the amount of \$110,000 was voted by the Government for this purpose. Of this sum an expenditure of \$109,841 was approved. For the fiscal year, 1936-1937, only

\$50,000 was voted for assisted grants and at the end of the calendar year, 1936, the amount of \$36,904.13 had been spent. The amount of special assistance which any poor school receives is based upon the recommendation of the Inspector for the area. He is in a position to know intimately the financial standing of the school section or urban municipality, as the case may be.

A Larger Unit for School Administration

Fifty years ago in the Province of Ontario the High School Entrance Examination was regarded as a suitable minimum standard of education and the percentage obtaining this standard was not large. At the present time a very high percentage of pupils in Public and Separate Schools gain this standard and go forward to advanced classes in the elementary schools or to the secondary schools. Further, it is found that the average age at which pupils in large numbers cease to attend day school is sixteen years. It seems necessary, therefore, that in both rural and urban areas an attempt should be made to provide satisfactory completing courses for those who will not attend school beyond sixteen years of age. At once a problem is presented in the rural areas. It is impossible to offer satisfactory completing courses in the one-teacher school in each school section. If suitable courses in shop work, home economics, business practice, and agriculture are to be given along with the other so-called academic subjects it becomes necessary at once that senior pupils should be grouped in central schools or class-rooms where the advanced completing work may be carried on. It is to be hoped, therefore, that some method may be found of bringing about larger administrative units of five to ten school sections under one board of trustees in order that there may be placed in a central location in the larger school area the senior class-room, or class-rooms, in which better completing courses may be offered to the older pupils. In the urban centres these completing courses may be offered in senior elementary classes or in the lower forms of the secondary schools.

There are many arguments in favour of larger units of administration in rural areas but the chief one is the making possible of better types of courses for those senior pupils who are largely to discontinue day school attendance at or about sixteen years of age.

Equipment Grants to Rural Public and Separate Schools

For several years, previous to the year 1936, a grant has been apportioned to rural public and separate schools on the basis of the amount expended by the boards of trustees on equipment, provided the expenditure is approved by the local school inspector. The term "equipment" was defined to include all school materials used directly for instructional purposes, also items of expenditure on blackboards, water supply, sanitary accommodations, desks, library equipment, and lighting. The amount of the grant has been 25 per cent. of the approved expenditure (less any *pro rata* reduction necessary for the year in the case of all grants) up to \$100.00 per class-room in the case of rural schools in the counties, and a grant of 50 per cent. up to \$200.00 per class-room in the districts. In the schools located in counties the county council in each case is required to apportion a grant at least equal to the grant on equipment made by the Legislature.

For the year 1936 the definition of the terms "equipment" and "accommodations" was extended to include all repairs, renewals or additions to school buildings or school grounds, all school furniture, artificial as well as natural lighting, heating, ventilating, and other approved changes in accommodations

and equipment which are paid for from current revenue. The definitions, however, do not include fuel, caretaking supplies, rental, interest, debentures, or sinking funds.

These grants have encouraged rural boards of trustees to purchase more and better equipment and to improve their school accommodations.

In the year 1935 no less than \$70,774.02 was paid out in Legislative grants on the basis of expenditure on equipment. This means that *at least* four times this sum, or \$283,096.08, was expended by boards to provide better equipment for the rural schools. In the year 1936, \$116,994.95 was received by the schools in Legislative grants on the basis of expenditures on equipment. When the contribution of the county council is added it means that at least \$233,989.90 was received in grants and that the total amount expended on equipment and accommodations by rural boards exceeded \$437,979.80. It is probable, therefore, that more than half a million dollars was invested by boards of rural schools in the year 1935, as the grants paid are based on the expenditures made during the next preceding calendar year.

General Remarks

The year 1936 has been a more favourable one for the Ontario elementary schools than any previous year since 1930. More money was available for school equipment and for repairs and renewals to the schools. A number of fine new school buildings were erected in both rural and urban areas. In many rural and urban areas boards of trustees found it possible to restore teachers' salaries to higher levels and in some few cases to the amounts paid in 1929 and 1930.

While the general Legislative grants were given a 10 per cent. *pro rata* reduction below the bases used for the distribution, the actual total amount paid was approximately \$200,000 greater than in 1935.

It is impossible to mention all the various organizations which have generously supported the schools through their co-operation with boards of trustees, inspectors, and teachers, and through direct gifts of necessary equipment and services which the boards were unable to supply. The Home and School Clubs, the Junior Red Cross Society, the Women's Institutes, and the Daughters of the Empire are all worthy of special mention in this respect.

In the making of this report thanks are due to Dr. J. T. Phair, Chief Medical Officer, Department of Health; Mr. R. S. Duncan, B.S.A., Director of Agricultural Representatives, Department of Agriculture; and to Mr. J. R. Littleproud of the Ontario Penny Bank for the contributions relating to their different phases of work with the schools. The co-operation of Departmental officials who have contributed brief reports of the activities of the special branches under their charge is also much appreciated.

V. K. GREER,
Chief Inspector.

March 5, 1937.

APPENDIX B

REPORT OF THE CHIEF INSPECTOR OF SECONDARY SCHOOLS

I have the honour to submit herewith the reports of the High and Continuation School Inspectors and the Director of Vocational Education, for the school year 1935-36.

June 30th, 1937.

GEO. F. ROGERS,
Chief Inspector of Secondary Schools.

1. Report of the High and Continuation School Inspectors

At the beginning of the school year 1935-36, it was decided by the Department of Education to place all the Collegiate Institutes, High Schools, and Grade A and Grade B Continuation Schools of the Province in one category, and to assign the duty of inspecting these schools to the four High School Inspectors and the three Continuation School Inspectors. Each Inspector was to visit all such schools in the district assigned to him. It was felt that all schools doing the same type of work should be under the same inspection and that by this arrangement time would be saved and travelling expenses reduced.

Appointment of Robert H. Wallace, M.A., as High School Inspector

During the first year of inspection under the new plan the Training College for Technical Teachers at Hamilton was not in operation. The Principal of the Training College, Mr. F. P. Gavin, B.A., was thus set free to act as High School Inspector. Mr. Gavin's wide experience and sound judgment made him an ideal man to serve as Inspector. But on the re-opening of the Technical Training College in September, 1936, Mr. Gavin returned to his duties as Principal.

In September, 1936, Robert H. Wallace, M.A. (Queen's, Harvard), of Hamilton Central Collegiate Institute, was appointed High School Inspector and took up the work of inspection in succession to Mr. Gavin. Mr. Wallace saw overseas military service in the Great War. He is recognized as one of the outstanding teachers of the Province in the department of English and History.

Changes in School Accommodations

In several municipalities new schools have been built and in other municipalities accommodations have been improved during the year. At Kemptville a combined Public and High School building has been erected to replace two buildings destroyed by fire. In Toronto the new Lawrence Park Collegiate Institute was opened in September, 1936. At Waterford a large wing has been added to the High School, and the older part of the building, which had been greatly damaged by fire, has been rebuilt and remodelled, thus providing a modern High School building.

New High School Districts

Embrun, Havelock, and Tilbury have become High School Districts.

Number of Secondary Schools

The number of Secondary Schools in the Province in September, 1936, is shown in the following table:—

Collegiate Institutes.....	69
High Schools.....	157
Continuation Schools.....	207
Vocational Schools.....	58
Special Industrial Schools.....	5

The following schools have a Vocational Branch with the same Principal as the corresponding High School or Collegiate Institute:

Collegiate Institutes: Barrie, Belleville, Brantford, Brockville, Cornwall, Galt, Guelph, Hamilton (Westdale), Kingston, Kitchener-Waterloo, Napanee, Niagara Falls, North Bay, Oshawa, Owen Sound, Pembroke, Perth, Peterborough, Picton, Renfrew, St. Catharines, Sarnia, Scarboro, Stamford, Stratford, Woodstock, York East, Earl Haig. York: Runnymede, Vaughan Road, York Memorial.

High Schools: Beamsville, Fort Frances, Haileybury, Ridgetown, Simcoe, Timmins, Welland, Weston.

Total, 39.

Decreasing Attendance

In the reports for 1934 and 1935 reference was made to the decrease in attendance at High Schools. The decrease continues to show in the Secondary Schools for 1936. The figures below will show the nature and extent of the change. The following are the official figures for May, 1935 and 1936:

Enrolment	Collegiate Institutes and High Schools	Continuation Schools
May 1, 1936.....	67,899	9,464
May 1, 1935.....	67,395	10,852
Increase.....	504
Decrease.....	1,388
Net decrease in enrolment.....	884
Average attendance—1935-36.....	64,763	8,951
“ “ —1934-35.....	64,369	10,347
“ “ —Increase 1935-36.....	394
“ “ —Decrease, 1935-36.....	1,396
Net decrease in average attendance.....	1,002

While it appears above that there had been an increase in 1936 as compared with 1935 in enrolment and in average attendance at Collegiate Institutes and High Schools, the increase is due to the fact that twelve Continuation Schools became High Schools during the period under review. But even when this is taken into consideration the falling off in attendance in Secondary Schools is great.

Inspection

During the academic year 1935-36 each Collegiate Institute, High School and Continuation School (Grade A or B) received one regular visit of inspection. The nature of the accommodations, the professional certificates of the members of the staffs, and the skill and efficiency of each teacher were carefully considered. In each school the Inspector took occasion to discuss with the Principal not only the organization and management of his school, but also the character of the teaching of each member of the staff. The Inspector also discussed with each teacher personally the work he observed in the class-room and made such suggestions as he deemed wise. In most of the schools the Inspector met the Chairman of the Board of Education, or members of the Board, or the Secretary, and in some cases all of these. School matters were discussed at some length in such cases. Often also the Inspector took occasion to meet the teachers in a body or in groups of teachers of the same subject. Meetings of such nature were always arranged by the Principal of the school, who, whenever he found it possible so to do, attended the meetings.

After each visit of inspection a report was made to the Minister of Education on the official form provided. A copy of the report is sent to the Secretary of the Board concerned. In some few cases where circumstances made it desirable, a second visit was made to a school in order to meet members or officials of the Board of Trustees and discuss with them changes or improvements in accommodations as well as other matters of interest.

During the closing months of the school year as many schools as possible received short visits from the Inspectors. At these visits the Inspector discussed with the Principal of the school (1) matters relating to the carrying out of the plan of recommendation of students for credit in the various subjects of the courses of study; (2) the character and effectiveness of the experimental work being done in connection with changes in curricula or in methods of teaching the subjects of Latin, French, etc.; and (3) the proposed scheme or schemes of organization for the following year. As a result of these short second visits the Inspectors and the Principals have been enabled to co-operate more effectively in the work of the schools.

In concluding this report the Secondary School Inspectors feel it a duty and a pleasure to be able to report that they have found among the teachers of Secondary Schools an enthusiastic and progressive spirit. Many teachers have availed themselves of the opportunity to attend summer classes provided by the various universities or by the Ontario Department of Education. Some teachers have taken at least a one-year course in Modern Languages in Europe or a long summer course in Physical Culture in Denmark or Sweden. Others have taken courses in French at Sillery Convent, Quebec, or at McGill University, or at Trois Rivières. Large numbers of teachers have attended the summer schools for Agriculture, Art, Physical Education, etc. The result has been a marked advance in the character and efficiency of the work of the schools.

Toronto, January 4th, 1937

2. Report of the Director of Vocational Education. School Year, 1935-36.

For the past two years there has been a progressive increase in the number of students attending vocational schools, both in day and evening classes, although the number of centres has remained almost stationary. In the year 1933-34 attendance dropped to 33,000 and 22,000 pupils respectively. For the past school year the enrolment was, in round figures, 36,000 for day schools and 24,000 for night schools. These latter figures are considerably below those reported for the peak years 1930, 1931, and 1932, when day-school enrolment reached 37,000, and 47,000 adults were in attendance at evening classes; but the rise and fall reflect faithfully the trend of outside economic influences. During times of depression there is a tendency on the part of students to remain longer at day school with the result that day-school costs are increased. This reacts against evening classes which, in a number of centres, have unfortunately had to be discontinued for lack of funds.

Graph Outlines Growth

The composite graph appearing below shows the attendance at day and evening vocational classes since 1922-23 and the amount of aid supplied by the Ontario Government during the same period. For ten years prior to 1929 approximately three-sevenths of the grants-in-aid were contributed by the Dominion Government, but since that time the Province has continued to pay the Legislative grants to the schools without Federal assistance. The steep rise indicated in the graph line of grants-in-aid during 1931-32 resulted from two causes: (a) a steady acceleration in the day-school enrolment combined with unprecedented evening-class attendance, thereby causing additional expenditure for teachers' salaries

upon which the grants are mainly based; and (b) a substantial annual grant towards the debentures issued in connection with four new technical schools in Toronto. The sharp fall in the line in 1932-33 is attributable to reductions in the Government grants necessitated by economic conditions. It is hoped that this decline has now been permanently arrested, and that the grants will be stabilized at least at the level attained in 1930-31, namely \$1,100,000. At its peak, the Legislative grant amounted to \$1,500,000. It will be seen that the day-school attendance shows an increase from 9,000 in 1922-23 to 37,000 in 1932-33; then there is a slight decline, followed by an almost complete recovery, with 36,000 students in attendance in 1935-36. Attendance at evening classes, standing at 34,000 in 1922-23, reached 47,000 in 1930-31, and then decreased to 22,000 in 1933-34 during the years of depression. The trend is now decidedly upward in both day and evening schools, and this will naturally have the effect of increasing the grants.

The Trend of Education

With the almost complete disappearance of the erroneous idea that education in the schools is possible only through the media of so-called academic studies, the contribution of vocational training towards the development of both mind and character is becoming more and more widely acknowledged. The value of "industrial arts" in the educative process is now freely admitted, even stressed, as the natural corollary of what is known variously as academic or cultural education. It is now thoroughly established that there is no conflict between the two types; each is dependent upon and complementary to the other.

There is no doubt that the work accomplished in vocational schools has contributed largely to this modern conception of education.

The success attending matriculation students in the courses provided for admission to university faculties of Engineering, Household Science, and Commerce has been most marked. Facilities for these courses are not available in the smaller centres; but as the majority of students do not proceed to university, the provision of Industrial courses for boys and Home-making courses for girls has supplied the type of training that is most needed.

Apprenticeship Education

The educational provisions contained in the Apprenticeship Act of 1928 placed the responsibility for suitable school training upon the educational authorities. The act provides for collaboration with the schools on the part of the Inspector of Apprentices, and definitely stipulates that any prescribed courses shall conform to the provisions of the Adolescent School Attendance Act and the Vocational Education Act.

The Apprenticeship Act was first brought into force in connection with the building trades, and included provisions for "intensive training in technical schools". In 1930 regulations were passed on the advice of the Provincial Apprenticeship Board, providing that in any municipality where the Board prescribed full-time or part-time courses of instruction for registered apprentices, Advisory Committees were required to make such arrangements as to accommodation, staff, and all other matters relating to such courses, as would meet the requirements of the Apprenticeship Board and have the approval of the Minister of Education.

While, under the Apprenticeship scheme, there is no thought of attempting to substitute training in a vocational school for actual service in the trade, it is recognized by the trades themselves that these schools are equipped to furnish

the particular educational background required to ensure for apprentices an insight into the principles underlying practical trade operations, while acquiring a sound general education. It is the consensus of present-day opinion that the co-ordination of the school and the job has been fruitful of improved results over the former haphazard system of attempting to teach a trade by the "pick up" method and the assumed good-will of the journeyman.

The "depression" seriously interfered with the process of training apprentices and rendered the results almost negligible. The building trades were so badly affected that the method originally adopted of financing the scheme by assessing the trades was temporarily abandoned, and the educational arrangements became largely inoperative through lack of apprentices.

It is now felt that owing to an expected shortage of skilled workers, the time has come when school preparation as a feature of apprenticeship should be re-emphasized in readiness for an anticipated return of prosperity. An important report on the subject is contained in a letter addressed to the National Employment Commission at Ottawa by the Apprenticeship Committee of the Canadian Construction Association. The committee entertained the idea that they might work to mutual advantage with the National Commission because of the connection between the threatened shortage of mechanics and the problem of placing young Canadians in useful occupations. After pointing out that the plan of "mixing" intensive technical education with the practical field work produced a much higher type of mechanic than the old apprenticeship method, the report states:

"It is doubtful if any piece of legislation, or any industrial movement for that matter, ever accomplished such satisfactory results for youth in industry in such a short time as the Ontario Apprenticeship Act."

This, it should be observed, is the considered opinion of a representative body of influential employers.

In the Seventh Annual Report for the year ended June, 1935, the Apprenticeship Commission of Victoria, B.C., makes reference to the preparatory educational requirements for apprentices. It expresses the opinion that

"failure on the part of some employers to select properly qualified and proved lads for apprenticeship is responsible for practically all of their troublesome apprentice cases";

and proceeds further to state that:

"It has been realized in overseas countries that, owing to the continuous changes in modern methods of manufacture and the need for greater efficiency, more and more will industry have to rely on the technical schools to teach apprentices how to apply their skill in modern ways and how to adapt themselves to new methods and materials".

and adds that:

"Part-time day attendance at technical schools is a feature of most of the apprentice training schemes adopted by those countries".

Accepting these statements as reasonably accurate, their implications strongly support the conclusion that training in a vocational school has been wisely included as part of the terms of apprenticeship. These schools were created in response to the demands of Industry. In them youth is being prepared for employment by a training based on the fundamental principles which will develop leadership in the industrial occupations in which they will eventually find a place. It is well known that the scarcity of trained apprentices has been

causing grave concern to the various trades, and it is gratifying to know that the vocational school is regarded as an essential feature of plans to establish a more efficient and dependable method of training the artisans of the future than has been pursued in the past.

Conclusion

Vocational Education, constituting as it does a preparation for meeting the actual conditions of modern life, tends to provide a general and social culture abreast of the times and well adapted to the important tasks which the youth of to-day will be called upon to assume upon taking their places in society.

The following table of comparative statistics gives a complete picture of the situation in this Province for the past two years, in comparison with the year 1922-23:—

	1922-23	1934-35	1935-36
Number of Schools—Day	16	61	60
“ “ —Evening	51	30	28
Number of Pupils—Day	9,402	33,561	35,915
“ “ —Evening	33,511	23,803	24,360
Number of Teachers—Day	337	1,416	1,449
“ “ —Evening	1,097	745	766
Government Grants	\$638,217	\$1,145,599	\$1,112,078
Municipal Expenditure (Net)	\$1,233,397	\$4,287,665	\$4,079,358

F. S. RUTHERFORD,
Director of Vocational Education.

Toronto, May 28th, 1937.

APPENDIX C

REPORT OF THE DIRECTOR OF PROFESSIONAL TRAINING

1. Decrease in Number of Teachers-in-Training

The attendance at the Normal Schools during the 1936-37 session was considerably lower than during the previous year. This may be explained partly by improved economic conditions, which have opened up opportunities in the business and industrial world, partly by the realization that the teaching profession has for some years been overcrowded, and partly by the higher standard of scholarship—Upper School standing—now required for admission. Though the *quantity* of the student body as measured by numbers, has diminished, the *quality* as measured by mental ability has advanced.

The surplus of teachers appears to be decreasing through gradual absorption in the schools as vacancies occur through the retirement of other teachers in the natural course of events. If the low attendance in the training schools continues, the Province will soon experience a shortage of teachers for the elementary schools.

The single exception in the record of lowered attendance is the University of Ottawa, in which French-speaking teachers are trained for the English-French schools. Beginning with an attendance of 14 nine years ago, this school has made such rapid strides that the enrolment for each of the past three years has been well over two hundred. Second Class as well as First Class teachers are being trained in this school in order to provide as early as possible the schools attended by French-speaking children with teachers of higher qualification than they had when the Committee of Inquiry made its report in 1927. This Normal School is responsible for the raising of the percentage of First and Second Class teachers in the English-French schools from 13 per cent. to 75 per cent. within a decade. The standard of the work is on a par with that in the other Normal Schools, and so excellent is the command of English possessed by the students that the casual visitor would find it difficult to distinguish the class-room work in English from that of the other Normal Schools.

2. Improvement in the Qualification of Teachers

The discontinuance two years ago of training teachers for the Interim Second Class certificate, except in the University of Ottawa Normal School, has already had marked results in the advancement of the general status of qualification throughout the schools. It is a matter of satisfaction to the Department that such large numbers of teachers holding Interim Second Class certificates are advancing towards First Class standing through private study and through the Departmental summer courses. Many holders of Permanent Second Class certificates, not wishing to continue with the lower standard of qualification, are taking steps to obtain Permanent First Class certificates.

It is a tribute to the ambition, industry, and enthusiasm of the teachers of this Province, that in 1936 more than five thousand attended special summer courses provided by the Department of Education, and at least as many others attended courses provided by the universities. This means that more than half of all the elementary teachers of the Province utilized a part of their vacation to

advance their qualifications. The unanimity with which they have accepted as reasonable and desirable the Departmental regulation regarding permanent certificates indicates the excellence of the spirit that prevails among the teachers of Ontario.

3. Changes in Methods of Conducting Practice Teaching

Up to the present year, 1936-37, the plan in operation in all the Normal Schools for practice teaching was what might be called the "single lesson" system. Each student was assigned one lesson to be taught in the practice school each week. Towards the end of the session an effort was made to have each student take complete charge of a class-room for a half-day. This plan gave a fair degree of practice in the technique of teaching single lessons and to that extent was commendable. But it gave the students little opportunity to teach a series of lessons in succession or to become acquainted with the real problems of administering a school. It is more than probable that many failures in teaching might be traced to the lack during the training course of direct experience in many of the activities involved in teaching and managing a school.

In a new plan adopted during the 1936-37 session of the Normal Schools, the students are first given the opportunity of teaching six or eight single lessons each to familiarize them with the application of the main principles of teaching and to give them some control of the technique of instruction. After this preliminary training, the whole student body is divided into four sections, and each section is sent in succession for a week at a time in groups of two or three to the class-rooms of the practice schools. During the first day, the students merely observe the work of the class; during the second day each teaches at least one lesson; during the third and succeeding days the number of lessons for each student is increased; and towards the close of the week each takes complete charge of the room for a half-day. This section of students spends the next three weeks in the Normal School, the other three sections going out in succession in the meantime. In the fourth week the first section goes again to the practice school and the rotation is continued till the end of the session. It is thus arranged that each student shall have four or five complete weeks in continuous observation and teaching, at least one week of which is in an ungraded rural school. The work of the week includes, of course, frequent discussions with the critic teacher of the lessons observed and taught. In order not to place too great a strain on the critic teachers, only half of them have students in any given week, each being free of the practice work on alternate weeks.

The change of scheme has thus far proved satisfactory to all concerned, and has afforded the students much better practical training under less artificial conditions than those formerly prevailing. They now have the opportunity to appreciate the problem of guiding successfully the activities of the pupils for longer periods and to acquire some skill in the continuous direction of a school.

4. Changes in Examination Scheme

For several years, Normal School students who have obtained a minimum standing of sixty per cent. in their sessional work in the various subjects, including observation and practice teaching, have been passed by the Department on the recommendation of the staffs. This plan has resulted in reducing the examination work of the schools by more than half and in relieving outstanding students of part of the burden and anxiety of the course. Few of the students, however, are exempted from all of the examinations, though the great majority are not required to take all. Those who have failed to attain the minimum

standing in any of the subjects during the session must take final examinations in those subjects. The question papers for about half of these examinations have in the past been prepared by the Department and those for the other half by the staffs. The answer papers in all the subjects have been valued exclusively by the staffs. In this way the certification of inefficient teachers has been fairly effectively prevented.

For 1937 this scheme has been slightly modified. The staffs of the schools will still have the responsibility of selecting those students of whose efficiency and success there can be no doubt, and the Department will continue to pass such students in those phases of the course in which they are recommended. For the doubtful candidates, however, all the question papers will be prepared by the Department and the answer papers will be read in Toronto by committees of Normal School teachers upon a plan similar to that adopted by the Departmental High School examinations. It is hoped that in this way greater uniformity of standards will be maintained.

5. Changes in Staff

During the year three changes occurred in the staffs of the training schools. Miss L. M. Loriman, who had been in charge of the Fourth Form girls in the Ottawa Normal-Model School, and Miss Agnes Copple, who had been Music Instructor in the Ottawa Normal School, resigned to be married. Miss Jean D. Currie, who had been in charge of Form I boys in the Toronto Model School, died in the Autumn of 1936. Miss Currie was an efficient and painstaking teacher and her untimely death was a distinct loss to the staff. The positions of Miss Loriman and Miss Copple at Ottawa were filled respectively by Miss Margaret O. Cleland, B.A., formerly English teacher in the Sturgeon Falls Model School, and Mr. Quirt S. McKinney, formerly Music Instructor in the Glashan Public School, Ottawa.

6. The Passing of Dr. Merchant

The death of Dr. Francis Walter Merchant on January 30th, 1937, closed a career that is unique in the educational history of Ontario. After serving as principal of several of the largest Collegiate Institutes in Ontario, he was appointed in 1900 the first principal of the London Normal School. In 1908 he was made Chief Inspector of Public and Separate Schools and Inspector of Normal Schools. In the latter capacity he reorganized completely the training school system of the Province, and the essential features of that system still remain in our present scheme. This may be regarded as one of the most fruitful of his many educational activities. He was later made Director of Technical Education, and in 1923 he was elevated to the post of Chief Director of Education. He retired from active participation in administrative affairs in 1930, but was retained as Chief Educational Adviser to the Minister until his withdrawal from the Department in 1934.

Dr. Merchant's success as an educational administrator is explained in part by his clear grasp of the meaning and purpose of education and by his intense desire to give every boy and girl in the Province the best possible educational opportunities. But above all it was the result of his initiative and originality in devising plans for the attainment of what he conceived to be the true aims of education, and of his driving force and powers of leadership in securing the realization of those aims. Dr. Merchant's name will always stand high in the roll of great Canadian educationalists.

7. Attendance at the Normal School and Normal-Model Schools during the
1936-37 Session

Toronto.....	17	507
Total.....	31	923

I cannot close this Report without a well-deserved tribute to the work of the members of the staffs of the Normal and the Model Schools. Their progressiveness, their excellence as teachers, their industry, their devotion to duty, and their whole-hearted co-operation in carrying out the policies of the Department in their particular field are worthy of all praise.

W. J. KARR,
Director of Professional Training.

Toronto, April 8th, 1937.

APPENDIX D

**REPORT OF THE DIRECTOR OF FRENCH INSTRUCTION
ON THE SCHOOLS ATTENDED BY FRENCH-
SPEAKING PUPILS, 1936-37**

Since 1927, the schools attended by French-speaking pupils have been operating in accordance with the recommendations made in the Merchant-Scott-Coté report. Each year, marked progress has been noted in the ability of the pupils to use both languages and in their better mastery of the subjects on the course of study. When it is realized that a system of education which embraces the study of two languages must necessarily evolve slowly, the progress achieved in the short space of nine years has been remarkable.

In order to obtain a general idea of the conditions at present prevailing in the schools attended by French-speaking pupils, the Department, in the autumn of 1935, sent out a questionnaire to the Inspectors asking for the following information:

- (1) Number of one-room rural schools which you consider satisfactory from a general standpoint.
- (2) Number of such schools which you consider as being only fair, but which are improving from year to year.
- (3) Number of such schools which are poor and in which the progress is unsatisfactory.

The Inspectors were asked to make a similar report on the rural schools of two or more class-rooms and also on the urban schools.

Of a total of 471 rural and urban schools attended by French-speaking pupils, the Inspectors reported as follows: 40 per cent. of the schools are generally satisfactory; 45 per cent. are only fair, but are improving from year to year; 15 per cent. of the schools are poor and are not making satisfactory progress. In the case of poor schools, since the large majority of these are one-room rural schools, the percentage of poor classes in relation to the total number of French-speaking classes in the Province, approximately 1,300, is very small indeed. Nine years after the Merchant-Scott-Coté Committee had made a most unfavourable report on the general conditions of these schools it may truly be said that the school in which the progress is unsatisfactory has now become the exception. There is every reason to believe that the schools now graded "fair" will continue to improve and will be classified as "good" schools in the not too distant future.

Although it has been stated that the majority of the poor schools are one-room rural schools, one must not conclude that there has been no general improvement even in these. Of a total of 293 schools, 30 per cent. are generally satisfactory; 50 per cent. are fair; and 20 per cent. are poor. While these schools have not improved as rapidly as the others, if the deplorable state in which they were found in 1927 is taken into account, it must be admitted that much progress has been made. It should be remembered that, in these schools, the enrolment is usually large and the salaries small. It is, therefore, difficult for the boards to engage experienced and highly qualified teachers.

Qualifications of Teachers

In the schools attended by French-speaking pupils, there are approximately 1,300 teachers, of whom 75 per cent. are graduates of the University of Ottawa Normal School. In September, 1938, the minimum requirements for teaching in these schools will be Second Class certificates. The marked improvement in the qualifications of the French-speaking teachers of this Province since the year 1927 (when only 13 per cent. were Normal School graduates), coupled with the conscientious and effective work of the Inspectors, explains the rapid advancement made.

High School Entrance Examination

During the year 1936, of a total enrolment of 41,500 French-speaking pupils, 1,624 passed the High School Entrance Examination. While it must be admitted that this number is much below the required standard, it should be noted that the percentage of successful candidates compared to the total enrolment in the schools has doubled since 1928. In other words, if we adopt as a standard the number of pupils who complete the elementary school course up to Form V, we may say that the efficiency of the schools has been improved 100 per cent. in the short space of nine years.

Enrolment in Form V, Lower School, Middle School, Upper School

It is very gratifying to state that a large percentage of the pupils pursue their studies beyond Form IV. There are 1,544 pupils enrolled in Form V classes; 800 are taking the Lower, Middle, and Upper School courses in High Schools in which the special French course has been established; approximately 500 are taking these same courses in private schools and colleges. In 1927, some 500 French-speaking pupils were taking work beyond Form IV. In 1936, this number was nearly 3,000. It seems needless to stress the significance of this comparison.

Proficiency in the Various Subjects

Languages. To those who are not familiar with the work being done in the schools attended by French-speaking children, the acquisition of two languages would seem to impose a very heavy burden on the pupils. Experienced teachers know, however, that the efforts of young children in mastering a new language are not nearly so great as one would expect. In the study of two languages, there is no doubt a very great transfer of capacity from one field to the other. Ability in the use of the mother tongue facilitates greatly the acquisition of another language. Under efficient instruction, French-speaking pupils who have been well trained in French acquire the ability to read and spell English with comparative ease. The study of English grammar is greatly simplified by a knowledge of French grammar. The mental process involved in analysing a poem, parsing a sentence, or developing a topic in composition is applicable to any language. The best proof of this transfer of capacity may be discovered in any average class of French-speaking pupils working under normal conditions. In such a class, it is usual to find that pupils who stand high in French measure up well in English and that the weakest pupils are usually poor in both languages. It might be added that French-speaking children are introduced to the study of English at a stage in their school lives when the aptitude for learning languages is at its maximum.

In centres where the French-speaking pupils come in contact with English-speaking pupils, the problem of teaching conversational English is greatly simplified. When these pupils reach the senior classes, they speak English with a facility approaching that of English-speaking children. In such cases, the work of the teacher consists mainly in correcting mistakes, improving the pronunciation, and enlarging the vocabulary. However, in most of the rural schools in Eastern and Northern Ontario, practically the only English which the pupils hear outside of school is that which comes over the radio. In these schools, conversational English based on the direct method is begun in the first year, with the object of giving the pupils an English vocabulary that will enable them to begin reading English in an intelligent manner during the second year. Usually, the pupils acquire a simple everyday vocabulary very quickly and it is not unusual to find pupils of seven or eight years of age who are able to answer in English with surprising facility questions based on a story they have heard or on a picture they have studied.

As soon as the children are introduced to the reading of English the acquisition of a vocabulary proceeds rapidly, especially if they have access to interesting supplementary reading books provided by the Board. In addition to the reading, the teachers work methodically to increase the pupils' vocabulary through the medium of stories and picture study, as well as through history, geography, and arithmetic, in the teaching of which both languages are used. Proof of the success that is being achieved is found in the fact that last June over 500 French-speaking pupils from the rural schools, most of which are located in French communities, were successful at the High School Entrance examination.

Side by side with the teaching of English, the teachers are endeavouring to give French-speaking pupils the best possible training in their mother tongue. Previous reports have already called attention to the great improvement made in the standard of both the oral and written French. This is substantiated by the reports of the Inspectors themselves. The increasing number of French-speaking pupils who pass in the special French papers of the High School Entrance examination each succeeding year, as well as the comparatively large number of pupils who take the Special French course in the secondary school classes, is ample proof of the progress being made. In 1928, there were only fourteen French-speaking pupils who had the academic standing required for admission to the University of Ottawa Normal School. During the past three years, the average yearly attendance at this school has been over 225 pupils. This does not take into account the French-speaking pupils who did not complete their High School course or those who did not choose to follow the teaching profession.

History, Geography, Arithmetic. Methods in the teaching of history and geography have been greatly improved. The story method of teaching history has largely replaced the text-book method which was in vogue a few years ago in most of the schools. A better presentation of the subject matter and a more general use of concrete material have created in the pupils a much greater interest in the study of geography. It is felt, however, that in many schools which are in charge of inexperienced teachers, the pupils do not assimilate sufficiently well the subject-matter in both history and geography. A more active participation in the lesson by the pupils and less teaching on the part of the teacher would produce better results.

The Inspectors report that arithmetic is weak in many schools. This deficiency is the result of a weakness in teaching the fundamental rules, combined with a lack of practice in the solution of problems in the junior grades.

When the pupils reach the senior grades, they are inaccurate in their work, and what is worse, they do not know how to attack problems. In order to overcome this weakness, the Inspectors have been encouraging speed drills and competitive tests on the fundamental rules, as well as conducting daily exercises in the oral solution of problems in all grades.

Music, Physical Culture, Hygiene, Art, Nature Study, Agriculture. As the course of study for French-speaking pupils is fairly heavy, the teachers are instructed to stress the teaching of English, French, geography, history, arithmetic, and writing. However, as the proficiency of the pupils increases and the qualifications of the teachers are raised from year to year, more time can be devoted to music, physical culture, hygiene, art, and nature study. In view of the natural tendency which French-speaking pupils show for music, it is pleasing to state that rote singing is taught in practically all the schools. In some of the urban centres, the school boards have co-operated with the inspectors and the teachers in encouraging the teaching of music, and the results have been most gratifying. Apart from its cultural value, music gives pupils the mental relaxation necessary after long periods of concentration and without which the ability of the pupils to assimilate knowledge is greatly reduced; it creates a happy atmosphere in the class-room and, in general, reacts favourably on all the work of the school. After the pupils leave school, their appreciation of good music, together with their ability to sing, even in a limited degree, may prove to be a life-long source of enjoyment.

The subject of physical culture is also being given more attention than formerly. In many schools, a short period is set aside three or four times a day for simple exercises which are performed whenever signs of mental fatigue manifest themselves in the class-room. In some of the urban schools which have facilities for physical training, one or two periods a week are set aside for special drills. It is to be regretted, however, that in too many of the schools supervised play is not being given the attention it deserves.

It is expected that, as conditions in the schools improve, more time will be given to the teaching of art, hygiene, and nature study. It should be possible to devise an elementary course in art which would require but a very small portion of the time now being spent in teaching the fundamental subjects. A correlation of hygiene and nature study with language work would not increase unduly the work of the teacher. The promotion of good health habits and the development of an intelligent and kindly attitude towards nature are very important factors in the education of children.

In view of the fact that a large proportion of the French-speaking children now attending the rural schools will eventually be engaged in farming, it is vitally important that they should become interested in the subject of agriculture and that they should acquire, while at school, a certain amount of knowledge and training which will help to make their life work more enjoyable and more remunerative. Owing to the lack of properly qualified teachers, little improvement has been made in the teaching of this subject. It should be noted, however, that as the inspectors are encouraging their teachers to take a course in agriculture as one of the requirements for permanent certificates, the teaching of the subject will gain in efficiency with the increase in the number of properly qualified teachers. The excellent results obtained in a few rural schools in which the subject has been introduced, e.g., Separate School No. 2 Tiny, and Separate School U 1 Capreol and Hanmer, show what can be accomplished in this field when the pupils are in charge of teachers who are qualified to teach the subject effectively.

In this report, an attempt has been made to give a general summary of the conditions found in the schools attended by French-speaking pupils. To those who are conversant with the conditions as revealed by the 1925-27 report on the schools, the progress accomplished during the past few years is a source of great satisfaction. For this improvement, the Department is deeply indebted to the teachers, the inspectors, and the staff of the University of Ottawa Normal School, who have all worked conscientiously towards the great objective of having the French-speaking pupils of this Province acquire an education which, while meeting the wishes of their parents, will enable them to work and live in harmony and friendship with their English-speaking compatriots. It is confidently expected that the general public will continue to give these schools its sympathetic co-operation so that the arduous efforts of those who are concerned with the education of the children may continue to be fruitful.

A. J. BENETEAU,
Director of French Instruction.

Toronto, April 5th, 1937.

APPENDIX E

**ONTARIO TRAINING COLLEGE FOR TECHNICAL
TEACHERS**

Owing to the fact that very few applications for enrolment in the Training College were received for the session of 1935-36, no classes were held. The principal, Mr. F. P. Gavin, and Mr. Ashcroft, of the teaching staff, served temporarily as Inspectors of the secondary and vocational schools respectively.

APPENDIX F

REPORT OF THE INSPECTOR OF AGRICULTURAL
CLASSES

The year 1936 has been marked by continued progress in the extension of Agricultural instruction in the schools of Ontario. It is worthy of note that this progress persisted during the depression years and that there is an increase in the number of schools for 1936 in spite of changes in Regulations by which the special grants paid to teachers have been materially reduced. Grants to uncertificated teachers in elementary schools were discontinued as from January 1st, 1936, and grants to teachers in secondary schools were reduced by approximately fifty per cent. The fact that the number of schools in which the subject is taught, as detailed in subsequent tables, shows an increase over last year, is a sure indication that the value of the subject is recognized and that teachers and boards are continuing and introducing the work because of the interest and benefit to pupils in the schools. Additional figures based on reports for September, 1936, show that in the majority of ungraded elementary schools, the courses in Agriculture are being taken even where the teacher does not qualify for a grant and that in ninety per cent. of rural schools the courses in Agriculture are being followed.

The courses for the elementary school must of necessity be simple and the discussion of topics should be within the comprehension of the pupils. They are not essentially vocational in character for most of these pupils are too young to have decided definitely on a life activity. The purpose of these courses is to give, through observation of materials and discussion of facts, a knowledge of many things which would not otherwise be included in an elementary school course. The nature of the discussions for the rural pupil who has a background of experience in methods by which Agricultural products are produced should be different from that of an urban pupil who is more familiar with the products as they reach the consumer. In either case the result of the time given to Agriculture will be to broaden the pupil's knowledge of things about him. Nevertheless, it must be remembered that more than 40 per cent. of pupils in elementary schools do not attend more advanced schools and that for these the discussion of Agricultural subjects should have a definite relation to activities they will be engaged in after leaving school.

Agricultural courses in secondary schools should have a vocational trend, but except in twelve schools, the work taken is a part of the courses leading to Normal Entrance and Matriculation. Practical applications of topics studied are included in the courses and in many cases are stressed by teachers in assigning home projects. Even in Vocational Agricultural Departments some consideration has to be given in organizing the courses to the needs of the few who may wish to attend Normal School or University. This condition presents a serious difficulty to the extension and development of Agricultural instruction and is due to the more or less popular opinion that farming as a vocation is not on a par with other activities in offering an opportunity for success to the pupil with ability. In considering preparation for future activities of pupils, there is a tendency to emphasize professional, business, and industrial careers as being worth while and requiring training at school while little is said of the training necessary for success in farming.

The time has come when it should be more generally recognized that the boy of to-day who will be the farmer of to-morrow must have a good general education and special training in the scientific principles of Agriculture. This training should include: a study of noxious weeds, plant diseases and insects which affect different crops and a knowledge of approved methods of control; an understanding of the principles of maintaining and improving soil fertility by proper methods of cultivation, the use of crop rotations, and the application of fertilizers; a knowledge of the characteristics of the recognized breeds of live stock, the principles of breeding and good methods of feeding and care; a consideration of different varieties of fruits, vegetables, and field crops recommended for the locality; the principles underlying methods of beautifying home surroundings; and, finally, the ability to make use of special information furnished from time to time in bulletins and reports of the Departments of Agriculture and other Agricultural publications. These topics are dealt with in the secondary school courses, but too often their value is underestimated and boys who have decided to farm leave school as soon as they have reached the age when compulsory attendance is no longer required. In this respect opinion in Ontario is behind that in Michigan, Wisconsin, and Minnesota, States in which I was privileged to visit a number of schools in September. In these and other States, Vocational Agricultural Departments may be introduced in the schools under the provisions of the Smith-Hughes Act. Where the work is taken one finds that practically all boys from farm homes are enrolled in the Agricultural option, a four-year course, the purpose of which is to provide a good general education and a training in up-to-date and scientific methods of farming. The project activities are carried out on the home farm and their successful completion is essential for promotion. Most of these students are taking the courses because they expect to become farmers. In Ontario we have not yet reached this stage. There is still the tendency to belittle secondary school training for the boy who intends to farm. Nor is it fully recognized that special training in Agriculture will benefit the future farmer or that such instruction should be a part of the secondary school curriculum.

The progress made in the past is laying the foundation for broader, more comprehensive, and more practical courses in Agriculture which, however, can come only when the people of rural areas whose children attend our secondary schools demand such courses.

A new departure which brought to thousands of boys and girls the opportunity to view Agricultural products at their best was afforded by the arrangements made last fall whereby pupils from schools within a radius of 75 to 100 miles attended the Royal Winter Fair. On six different days students from secondary schools came by bus and motor car to spend the day at the Fair. A total of 14,000 attended and all were able to see the best of live stock, fruits, vegetables, grains, and other products of the farm which were there exhibited. Many expressions of appreciation were voiced by principals, teachers, and students for the opportunity given and the arrangements which were made.

The subsequent paragraphs of this report deal with the work carried on in the elementary schools, secondary schools, summer schools, and the Normal Schools, and a perusal of these paragraphs will give detailed information as to the progress in these different groups.

Public and Separate Schools

The number of schools which have met the requirements of the Regulations and qualified for grants for Form III, Form IV, and Form V since 1903 is given in the abbreviated table following:—

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1913.....	159
1914.....	264	208	56
1920.....	1,648	702	946
1928.....	3,395	1,059	2,536
1932.....	4,906	1,344	3,562
1934.....	5,201	1,594	3,607
1935.....	5,427	1,773	3,654
1936.....	5,534	1,619	3,915

The figures for 1936 show that of the 7,174 elementary schools in Ontario, 77.1 per cent. reported instruction in Agriculture as follows: 4,990 of 6,132 rural schools, or 81.5 per cent., and 544 of 1,042 urban schools, or 52.2 per cent. In many Inspectorates in Southern Ontario all schools are taking the work.

It will be noted that there is a decrease in the number of school gardens for 1936 as compared with 1935. This is largely due to a demand for a higher standard in the work than was formerly required. Unless a garden is properly planted and cared for it is of little credit to the school, the teacher, or the subject and, therefore, in some cases this activity has been discouraged. In others it has seemed wise to abandon the school garden in favour of a programme of beautification of the school grounds, with greater attention to the planting and care of flower beds and shrubs.

The new courses in Agriculture, introduced in September, 1935, are now in use for the second year and are followed in practically all the rural schools. This is an indication that they are meeting with the approval of all concerned. Sections B and C of the course were adopted as the basis of instruction in Agriculture at the Normal Schools for the school year 1936-37 so that new teachers who begin work in September, 1937, will be familiar with the subject matter of Course C, which will be followed in ungraded schools next year.

The following table shows the number of certificates held by teachers engaged in the work for the years given:—

Year	Part I			Part II		Total
	Elementary	Elementary	Intermediate	Intermediate		
1934.....	1,552	86	144	10		1,792
1935.....	1,957	106	163	16		2,242
1936.....	2,092	208	188	22		2,530

The records show that 5,882 Elementary and 864 Intermediate Certificates have been issued since 1909 when the Regulations first provided for such certificates. A comparison with the above figures for 1936 indicates that a great many certificated teachers have left the profession or have accepted positions in urban schools where the certificate is not used. For 1936 less than half the teachers in the schools which reported instruction in Agriculture held certificates, but it is probable that sixty per cent. will be qualified for 1937 because of the large attendance at the Summer Schools in Agriculture.

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in Fifth classes of 436 schools under the Regulations for Public and Separate Schools. The Lower School courses taught by a teacher holding an Intermediate Certificate are taken under the High School Regulations in the following schools:—

Britt Consolidated; S. S. No. 7 Biddulph, Granton; Elizabeth Ziegler Public School, Waterloo; R.C.S.S. No. 6 Ellice and Logan, Kinkora; General Mercer Public School, Toronto; Hespeler Public School; Innerkip Public School; Port Arthur—Central Public School, Cornwall Public School, St. James Public School;

Port McNicoll Public School; Port Stanley Public School; St. Michael's Separate School, Cobourg; St. Peter's Separate School, Peterborough; St. Raphael's West Separate School; Suddaby Public School, Victoria Public School, Kitchener; R.C.S.S. No. 8 Windham, La Salette; Tecumseh Public School.

Secondary Schools

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

(1) Optional classes in Lower and Middle School as a part of the course for Normal Entrance or Matriculation.

(2) Department of Agriculture under the High Schools Act.

(3) Department of Agriculture under the Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken and under (b) both Lower and Middle School courses.

Collegiate Institutes

(a) Clinton, Cornwall, Fort William, Goderich, Ingersoll, Oshawa, Perth, York Memorial, Vaughan Road. Total 9.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Kitchener, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 17.

High Schools

(a) Bracebridge, Cobalt, Durham, Englehart, Essex, Etobicoke, Kapuskasing, *Kemptville, Lucan, Markham, Mattawa, Meaford, Merriton, Niagara-on-the-Lake, *Port Credit, Shelburne, †Thorold, Trenton, Uxbridge, Wingham. Total 21.

(b) Alliston, Amherstburg, Athens, Beamsville, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Dundas, Dunnville, Elmira, Fergus, Fort Frances, Grimsby, Hagersville, Haileybury, Iroquois, Kincardine, Kingsville, Leamington, Listowel, Markdale, Midland, Milton, Mitchell, Nepean (Westboro P.O.), Newburgh, New Liskeard, Norwich, Norwood, Oakville, Petrolia, Port Elgin, Port Perry, Ridgetown, Ridgeway, Rainy River, Saltfleet (Stoney Creek P.O.), Simcoe, Smithville, Stirling, Tweed, Waterdown, Waterford, Watford, Whitby, Winchester. Total 48.

Continuation Schools

(a) Ailsa Craig, *Ayr, Beaverton, *Bothwell, *Brooklin, Burk's Falls, Coldwater, Eganville, Fordwich, *Little Britain, *Melbourne, Merlin, New Dundee, Orono, †Southampton, Tamworth, Tilbury, †Wales, Woodville. Total 19.

(b) Agincourt, Brownsville, Comber, Drayton, Drumbo, Embro, Pelham (Fenwick P.O.), Florence, Ilderton, Lobo (Ilderton, R.R. No. 2), Lynden, Lyndhurst, Merrickville, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Hamburg, Princeton, St. George, Sparta, Sundridge, Teeswater, Thamesford, Wheatley. Total 26.

*Introduced Agriculture in September, 1936.

†Discontinued Agriculture in June, 1936.

A summary of the above shows that Agriculture is now taken in twenty-six Collegiate Institutes, sixty-eight High Schools and forty-three Continuation Schools. During the year the work was discontinued in one High School and two Continuation Schools, but was introduced in two High Schools and five Continuation Schools. Both Lower and Middle School courses are taken in 91 schools.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work:—

	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....	..	1	1	2
1918.....	8	13	4	25
1923.....	8	23	4	35
1928.....	14	44	23	81
1933.....	24	54	33	111
1934.....	25	61	36	122
1935.....	26	67	40	133
1936.....	26	68	43	137

One hundred and seventy-eight teachers are engaged in giving instruction in Agriculture. Of this number one hundred hold the Specialist Certificate in Agriculture, of whom seventy-six are graduates of the Ontario Agricultural College.

The following schools are taking the work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley, and Whitby.

The organization of the work in these schools is the same as formerly reported and good work is being done in all. The modified plan of organization at Port Perry is now in the fourth year of operation and continues to meet with approval. Under this plan all pupils of first and second year receive instruction for one-fifth of the time in practical subjects. If the results for the fourth year are as satisfactory as those for the third year, one method of providing instruction in practical subjects in the small High School will have been established. Beginning in January, 1936, a six weeks' winter course in Agriculture, Farm Mechanics, and Household Science was held at Port Perry. This course attracted a number of young men and women who were not attending school and was quite successful. Short courses of this kind might well be provided in more of the schools where there are suitable accommodations.

Under (3) above the following schools are qualifying for grants under the Vocational Education Act: Beamsville, Kemptville, Renfrew, Ridgetown, Stamford, and Simcoe. At Stamford, provision is made for boys only, while at other centres courses in Home-making are also provided for the girls.

In all of these schools a very satisfactory type of work is being done and the courses offered are meeting the needs of the students and the approval of the communities. The first-year general course introduced at Ridgetown is now in the third year of operation. The results are very satisfactory and this plan might well be adopted by some of the other schools. At Simcoe, project work related to poultry, bee-keeping, and farm crops has been featured during the year. As a part of the work fowl were grown and dressed for market, and honey was produced and sold under the direction of the instructor.

At Kemptville, a new Composite School building was opened in December. Both public and secondary school pupils are housed in the one building. Rooms for Farm Mechanics and Household Science have been provided and equipped. Pupils from the Junior Fourth through to Form II will have regular instruction in these subjects. Agriculture is also taught during these four years. Grants under the Vocational Education Act are paid on the time of the teachers spent in giving instruction in the practical subjects as provided by the revised Vocational Regulations. The general organization and plan are commendable and provide for instruction in practical subjects during the years at the end of which many pupils leave school, but at the same time allowing those who continue to qualify for entrance to higher institutions of learning without loss of time.

The extension of Agricultural Departments under the Vocational Education Act in the past has been slow. It may be expected that with returning prosperity there will be a greater demand for the practical training offered by these courses, which have proved to be a benefit to a large number of boys and girls attending the schools.

Certificates and Summer Courses

Three special certificates in Agriculture—the Elementary, the Intermediate, and the Specialist—are issued by the Department of Education to those teachers who meet the requirements of the Regulations.

Teachers who have not taken Agriculture of the Lower and Middle School courses in a secondary school or who are not graduates of the Ontario Agricultural College must qualify for these certificates by attendance at Summer Courses held annually at the Ontario Agricultural College and at the Kemptville Agricultural School. Last summer, teachers from 125 Inspectorates were enrolled at these centres. The attendance at both centres set a high record, there being 330 at Kemptville and 791 at Guelph; a total of 1,121. The enthusiasm of the teachers at both centres was remarkable and the results of the Summer Courses generally were quite satisfactory.

The course for the Specialist Certificate was not given. In the course for the Farm Mechanics Certificate which was held at the close of the courses for Agricultural certificates, 24 teachers were enrolled.

The following tables show the attendance at the Summer Courses for the past five years:—

Attendance at Ontario Agricultural College, Guelph

Year	Elementary		Intermediate			Inspectors	Farm Mechanics	Total
	I	II	I	II	III			
1932.....	157	153	40	50	14	7	22	443

1935.....	116	40	156
1936.....	220	110	330

Normal Schools

Instruction in Agriculture at the Normal Schools is a part of the regular course for a First Class certificate and is taken by all students, but does not lead to a special certificate in the subject. The instructors are fully qualified and the practical phases of the work in gardening and other topics are stressed as far as possible with the accommodation and equipment available. At the first opportunity, however, graduates of Normal Schools who are engaged in rural schools should qualify for a special certificate by attendance at Summer Courses.

NORMAN DAVIES,

Inspector of Agricultural Classes.

May 1st, 1937.

APPENDIX G

REPORT OF THE INSPECTOR OF AUXILIARY CLASSES

Statistical Information for the School Year, 1935-36

Training Classes.—For backward and psychopathic children and those who cannot successfully pursue the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age.

Urban Organization .

Since the previous annual report new training classes have been opened in Belleville S.S. (1), Hawkesbury S.S. (1), Ridgetown (1), Scarborough No. 10 (1), St. Catharines (1), Sudbury S.S. (1) and new promotion classes have been established in Hawkesbury S.S. (1), Scarborough No. 10 (1), Sudbury S.S. (1), Windsor S.S. (1). The training class in Pembroke, which had been temporarily discontinued because of financial stringency, was reopened.

The Belleville Separate School, the Grantham Consolidated School, the Kingston Public Schools, the Niagara Falls Separate Schools, the Ridgetown Public School, the Windsor Separate Schools, and the Wallaceburg Public Schools were surveyed for purposes of auxiliary education. Application has been received for a survey of the Woodstock Public Schools. With the exception of three cities, Brockville, Cornwall, and Timmins, and several of the larger towns, all the more important urban centres throughout the Province have undertaken the provision of some form of auxiliary education. With the return of more prosperous times it is hoped that these unorganized centres may now see their way clear to give consideration to the needs of handicapped children and that certain of the larger cities may be able to round out their present organization more completely.

The rapid extension of auxiliary education throughout the Separate Schools of the Province during the past few years is to be especially noted.

Rural Organization

Complete surveys of rural inspectorates:—Grey North, Bruce North, 90 candidates, Inspector J. J. Wilson; Kent (1), 109 candidates, Inspector G. A. Pearson; Kent (2), Elgin (in part), 104 candidates, Inspector A. B. Lucas; Prescott-Russell (1), Lanark (in part), 53 candidates, Inspector C. B. Routley; District VIII Manitoulin Algoma (in part), 94 candidates, Inspector N. Wightman; and partial surveys of rural inspectorates:—Simcoe, Centre, 21 candidates, Inspector W. R. McVittie; District XIII, Parry Sound, Muskoka, 73 candidates, Inspector J. R. Pickering; were carried out by Miss DeLaporte and myself in conjunction with the inspectors concerned. In all 544 candidates were examined. For the large majority of those who were found to stand in need of assistance special educational facilities have been provided through the establishment of

rural training units for backward children, rural sight-saving units for children suffering from visual defects, rural home-instruction units for crippled children and rural speech-correction units for children handicapped by speech defects.

Up to the present time 10 rural inspectorates have been completely surveyed and 7 more partially. There are now in operation 61 rural home-instruction units, 146 rural sight-saving units and 705 rural-training units. A number of rural speech-correction units have been classed among the training units. Speech correction in rural schools is a recent venture. The moderate degree of success which has attended tentative efforts along this line leads to the hope that something of a substantially worth-while nature may be accomplished in providing remedial training for rural school pupils suffering under this handicap.

The rural home-instruction units are without exception functioning successfully and have been the means of bringing a new outlook upon life to the unfortunate children concerned. In addition to the 61 rural home-instruction units more than 100 sick and crippled children who cannot attend school are being looked after by means of correspondence courses.

The establishment of rural sight-saving units has likewise proved an unqualified success. Where such children pursue their studies in the regular grade classes with the help of large-type text-books they make as rapid progress as do similarly afflicted pupils, who, in the larger cities, are segregated in sight-saving classes.

Confidential reports from inspectors concerned go to show that on an average 65 per cent. of the backward pupils for whom special educational facilities have been provided markedly benefit from the help received. Many of the younger children after a year's treatment are enabled to return to the regular classes to make slow but profitable progress through the grades. Many of the seniors later leave school with renewed confidence in themselves and a happily readjusted attitude toward society. Due to frequent changes of teachers in rural schools or to inability of teachers to apply auxiliary class methods through lack of training or to as yet imperfect plans of procedure, some 35 per cent. do not respond appreciably to treatment. It is hoped that with wider experience a more effective technique may be developed. Appreciation is expressed of the whole-hearted co-operation extended by rural school teachers, trustees, and inspectors in making the venture the success it has been.

Arrangements have been completed for surveying the following rural inspectorates this spring:—Bruce East, Grey (in part), Huron (in part), J. M. Game; Elgin East, J. C. Smith; Frontenac North, Addington (in part), T. R. McEwen; Lincoln (in part), G. A. Carefoot; Northumberland and Durham (3), Hastings (in part), A. A. Martin; Renfrew, North, N. Campbell; Simcoe East, Muskoka (in part), J. A. Gibson.

Other applications are anticipated for next autumn. It is expected that by the end of 1937 one-fourth of all rural Ontario will have been surveyed and provision made for those children needing special help.

Methodology

In their efforts to simplify the presentation of various subjects auxiliary class teachers throughout the province have almost inevitably been compelled to undertake exploratory expeditions into heretofore unknown regions of methodology. Certain results are being briefly outlined not only because of their interest as educational experiments but likewise because of their possible value as suggestions to regular grade teachers.

Reading.—(1) Miss Matthews of Waterloo and Miss Detweiler of Kitchener, noticing, as every primary teacher has noticed, that children have less difficulty either in reading or spelling with such words as *automobile, house, jump, and yellow* than with words such as *why, are, there, and once*, began working on the hypothesis that the latter type of words, which may be briefly called “relative” words, have no meaning to children apart from sentences in which they occur and that to take them out of sentences and deal with them as words in themselves is only a cause for confusion. Accordingly, they conceived the plan of teaching only the former type of words, which may be briefly designated as “specific” words, by the “look-and-say”, “picture-place”, “action-name”, “flash-card”, and other similar devices. “Relative” words were to be dealt with both in reading and in spelling only in sentences or phrases. Thus a typical First Book spelling exercise would appear both in the presentation and the succeeding dictation test:

“Where is my hat?

Where is my coat?

Where are my shoes?”

Though this project involved a very considerable amount of labour, the success attending the venture and the good results attained by other auxiliary class teachers who have followed the same method cause one to wonder whether the so-called trivial errors which so frequently occur in Entrance Examination spelling papers may not be due to the failure of teachers to discriminate between the two word types. To an eight-year mind which experiences some difficulty in discerning any similarity between wood and coal, the sentence, “Where is my hat?” has meaning, while the word “where” taken by itself is merely an aggregation of letters without significance and easily confused with another similar meaningless aggregation.

(2) Miss Kellaway of Kent Street School and Miss Cairns of Duke of Connaught School, Toronto, working independently, have each compiled typed primers characterized by an extensive repetition of a few elementary words in sentence or short story form. These have been found particularly effective among very backward pupils who take delight in poring over books whose content is within their reading grasp. In ordinary graded classes similar results among more normal pupils are attained through blackboard reading. But for the ungraded rural school where class periods are limited in length it is possible that many modern primers have swung from the one extreme of all reading and no pictures to the other extreme of all pictures and no reading, especially where non-academic pupils are concerned.

History.—The majority of auxiliary class teachers throughout the Province now present History, not as a chronological list of events to be carried in the memory, but as lives of noteworthy people to be studied for social guidance. Thus the important thing about Alfred the Great is not that he defeated the Danes, nor that he founded the British navy, nor that he codified the laws of the land, but, as every schoolboy carries in effortless memory, that when military necessity required a dangerous bit of scouting to be done he went into the Danish camp himself and that when found negligent in the performance of a certain domestic duty he (though a king) took his deserved rebuke as became a man and a gentleman.

During a recent inspection tour it was interesting to find the boys of Mr. Slatterie’s class in Sarnia arriving at the same conclusion as did the girls of Mrs. Muller’s class in North Bay concerning the relative degree of perseverance dis-

played by Jacques Cartier and Champlain. An understanding of the influence exerted by personal character in history would seem to be as important to growing boys and girls as a knowledge of dates and events. After all, Canada is not likely in the near future to be lost and stand in need of rediscovery. Every pupil, however, sooner or later will be faced with life problems the successful solution of which will depend upon his ability to stick to his task.

Arithmetic.—Extensive experimentation has been carried on throughout the entire field of arithmetic, two phases of which may be briefly noted:—

(1) Considerable confusion during early stages of learning may result from a premature introduction of algebraic symbolism. A backward pupil and possibly a normal child has difficulty in interpreting the operations indicated by the forms $6+8=14$, $14-6=8$, $6\times 8=48$, in the adding, subtracting, and multiplying operations respectively. Many auxiliary class teachers have adopted with success a simplified symbolism which conforms more nearly with actual working conditions. One stroke above indicates addition, two below, subtraction, one below, multiplication, thus:

$$\begin{array}{r} \overline{8} \quad \overline{24} \\ 6 \text{ or } 75 \text{ is "add up";} \\ \underline{28} \\ 36 \end{array} \quad \begin{array}{r} 14 \quad 214 \\ \underline{6} \text{ or } \underline{156} \text{ is "add to";} \\ \underline{\quad} \quad \underline{\quad} \end{array} \quad \begin{array}{r} 8 \quad 348 \\ \underline{6} \text{ or } \underline{6} \text{ is "multiply"}. \\ \underline{\quad} \quad \underline{\quad} \end{array}$$

(2) It would appear that much time and effort is sometimes wasted in learning one set of facts for addition and another for subtraction, one set for multiplication and another for division. In many auxiliary classes only two sets of facts are learned for the four operations and the processes are simplified by

maintaining an identity of statement throughout; thus in both $\begin{array}{r} 854 \\ \underline{467} \\ 387 \end{array}$ and $\begin{array}{r} 854 \\ 387 \\ \underline{467} \end{array}$

the statements are: 7 and 7 are 14 , one to carry; 9 and 6 are 15 , one to carry; 4 and 4 are 8 . And in $6)2892$ the statements are similar to those in multiplication: 4 times 6 are 24 , 4 to carry; 8 times 6 are 48 , 1 to carry; 2 times 6 are 12 .

Auxiliary Organizations

(a) All teachers of Auxiliary Classes are specially trained in a five weeks' Summer Course. In 1936 a tri-part course was given (i) for teachers having at least an interim Second Class Certificate and three years' successful teaching experience in the Province, who wished to qualify as teachers of training and promotion classes; (ii) for teachers with at least an interim First Class Certificate and three years' successful teaching experience or an ordinary Vocational Certificate who wished to qualify as teachers in senior craft schools; (iii) a general course for teachers who wished to improve their professional standing or to prepare themselves for dealing with problem children in their classes. 86 took the first course, 13 the second, and 35 the third.

(b) Brief courses were given in each of the eight Provincial Normal Schools to acquaint teachers-in-training with methods of dealing with auxiliary type pupils, especially with those in rural schools. The many inquiries received by the Department from recently graduated teachers concerning the educational welfare of exceptional children is evidence of the interest aroused by these Normal School talks.

(c) The monthly or bi-monthly meetings of the eight Auxiliary Class Teachers' Associations throughout the Province have been the means of disseminating new ideas and practices and of affording fresh stimuli to a body of workers whose special duties tend to diminish their normal professional contacts.

(d) The Auxiliary Class Section of the 1936 O.E.A. was well attended. Several Ontario representatives took part in the 1936 Convention of the International Council for Exceptional Children held in Chicago. A large number of auxiliary class teachers in this Province are enrolled as members of the Council and the Journal connected with the organization has a wide circulation in Ontario.

(e) The "Special Class Teachers", a magazine devoted to the interests of special education, and published by the Auxiliary Class Section of the O.E.A., has enjoyed a greatly increased circulation during the past year. The efforts of its progressive management and editorial staff are being loyally supported by the provincial body of auxiliary class teachers with contributions as well as with subscriptions.

(f) A performance test known as the Ontario School Ability Examination was authorized by the Minister for use among deaf children whose native tongue is other than English, or who for any other reason are lacking in language facility. The use of this test has not only greatly facilitated the entrance of suitable candidates to the Ontario School for the Deaf but has provided a means of examining children to whom the Binet-Simon examination could not be satisfactorily administered.

Toronto, March 31st, 1937.

H. E. AMOSS,
Inspector of Auxiliary Classes.

APPENDIX H

REPORT OF THE DIRECTOR OF SCHOOL ATTENDANCE

Just fifty-five years ago the first real attempt was made to improve the attendance in our elementary schools. What a lot of water has passed under the educational bridge since that time! Then the Truancy Act required a minimum attendance of eleven weeks in a term for children between seven and thirteen years of age. The requirements were soon increased until at the present time the attendance standard has reached a very high level.

Elementary Schools

At the end of the 1935-36 school year, there were in Ontario 7,159 elementary schools, of which 6,347 were Public and 812 were Separate.

Secondary Schools

Besides these, there were 225 High Schools and Collegiates, 208 Continuation Schools, and 63 Vocational and Special Industrial schools, making a total for this class of 496. These, along with the elementary schools, made a grand total of 7,655. In May, 1936, pupils were enrolled in these schools as follows:—

Public Schools.....	460,785
Separate Schools.....	101,152
High Schools and Collegiates.....	67,899
Continuation Schools.....	9,464
Vocational and Special Industrial Schools.....	35,915
	675,215

The population of Ontario, according to the latest statistics, is 3,596,000. Approximately one-fifth of this population is enrolled in our Elementary Schools. Not only are they enrolled, but they are in attendance, as the following tables of percentages will show:—

Table No. 1

Class of School.....	1932	1933	1934	1934-35	1935-36	Increase in percentage over 1932
City Schools.....	90.88	92.21	92.82	91.70	91.87	.99
Town Schools.....	91.14	92.92	93.28	92.77	91.62	.48
Village Schools.....	90.79	92.47	92.49	91.57	91.39	.60
County Rural Schools.....	88.54	89.30	89.68	89.29	88.17	.37 (dec.)
District Rural Schools.....	87.69	87.98	87.69	87.33	86.29	1.40 (dec.)
All Urban Schools.....	91.08	92.40	92.84	91.94	91.64	.56
All Rural Schools.....	88.40	89.09	89.35	88.97	87.85	.55 (dec.)
All Elementary Schools.....	90.09	91.17	91.56	90.83	90.27	.18

In 1934-35 the Provincial leaders were:—

Urban	Percentage	Rural	Percentage
City of Fort William.....	95.33	County of Waterloo	94.32 (leader in 1934)
Town of Chelmsford.....	97.77	District of Sudbury	88.77
Village of Port Perry.....	96.68		

In 1935-36 the Provincial leaders were:—

Urban	Percentage	Rural	Percentage
City of Galt.....	95.34	County of Waterloo	93.47 (still leads)
Town of Chelmsford.....	96.85*	District of Nipissing	89.17
Village of Port Perry.....	96.51*

Public 404,510	89.84	18.95
Separate 91,545	92.24	14.31
Totals 496,055	90.27	18.11

Table No. 6 —Secondary Schools—1935-36

	Enrolment			Percentage Attendance			Increase over 1933-34
	1933-34	1934-35	1935-36	1933-34	1934-35	1935-36	
Continuation	11,070	10,852	9,464	90.73	93.37	90.90	.17
High Schools and Collegiates	68,013	67,395	67,899	93.32	93.49	93.51	.19
Vocational	31,491	32,551	35,915	92.94	91.47	92.08	(dec.) .86

Table No. 7—Distribution of Losses.

Days Lost Through	1934-35	1935-36
Illness	6,452,406	62.96
Home Help	785,754	7.67
Parental Neglect	523,837	5.10
Physical Obstacles	450,116	4.39
Truancy	24,310	.24
Privation	97,081	.95
Irregular Closing	713,514	6.96
Other Reasons	1,201,291	11.73
	10,248,309	100.00
		100.00

A comparative analysis of the above table shows improvement over the previous year in several respects. Home Help and Parental Neglect both decreased, apparently on account of greater interest shown by the parents in their children's attendance. An unusually severe winter last year was the cause of the increased number of absentees, but on the other hand, it is gratifying indeed to find that Truancy has been reduced to .24 of one per cent., a tribute possibly to more congenial surroundings and to increased skill on the part of the teachers in making school life interesting. An improvement in financial conditions is shown by the gradual decrease in Privation during the past three years. The increase in Irregular Closing is due principally to the fact that the opening day, January 3rd, fell on Friday and that nearly all the schools did not open till the following Monday.

Besides the various schools provided for the education of the children, there are other means for those who are not fortunate enough to be within easy reach of a school. Up in the scattered regions of the North, school cars are doing good work, while the Correspondence Courses give instruction to many a child who would otherwise be handicapped by the lack of educational opportunities.

In these and other ways, the Department of Education is providing for every boy and girl in the Province an opportunity for preparation for the part he or she is to play in the not far distant future.

R. D. KEEFE

Director of School Attendance.

Toronto, February 15th, 1937.

APPENDIX I

REPORT OF THE ACTING INSPECTOR OF
PUBLIC LIBRARIES

On October 1st, 1936, Mr. F. C. Jennings, the former Inspector of Public Libraries, left this branch to take the position of Chief Librarian of the Ottawa Public Library System. During his term of office as Inspector, Mr. Jennings covered the entire library field of the province by inspecting every free and association library, in many instances, where it was deemed necessary, making several visits. Included in his office duties was the editorship of the *Ontario Library Review*. He was also a special lecturer in the Library School, Ontario College of Education.

With his staff, Mr. Jennings was kind, thoughtful and considerate, and we feel that all who came in contact with him as Inspector will wish him success in his new field of labour.

Summary

The following libraries were added to the list of free public libraries during 1936: Fenelon Falls, Petrolia, and Edinburgh Branch at Ottawa. Fenelon Falls and Petrolia were former association public libraries.

The following association libraries were removed from the list of active libraries: Belle River, Chalk River, Copetown, Elmvale, and Scarborough Bluffs.

The library at Walton was re-organized and added to the list of association libraries.

County Libraries

There is a growing County Library consciousness throughout the province. Several new associations are in the formative stage and others have been organized. The Elgin County Library Association was organized in September 1936, and the Oxford County Library Association on January 2nd, 1937. These, together with the older associations such as Lambton and Middlesex, are taking up the library problem of the county and are performing a library function that could not be done in any other way. These associations deserve every encouragement, and the time seems not far distant when special legislation covering every phase of county library work must be prepared.

The Ontario Library Review

The *Ontario Library Review* has been published regularly and there is a growing list of subscribers. Group subscriptions are available to all free and association public libraries of the province. These provide for a copy to each member of the library board and of the librarian's staff at the yearly rate of one dollar. This amount is deducted from the annual grant. Individual subscriptions are received at a current yearly rate of twenty-five cents.

New Library Buildings

At Port Rowan, Mr. and Mrs. C. S. Killmaster and family generously donated an attractive and substantial building which will be a memorial to the family and a distinct acquisition to the community. The formal opening took place on July 19th, 1936.

The "Log Cabin Library" which is situated at Hyndford, was erected largely with voluntary labour and by local contributions. It is solid, comfortable, and economically built, since nearly all the material for the construction was obtained in the neighbourhood itself. The official opening was on June 3rd, 1936.

Travelling Libraries

A report on the Travelling Libraries for the year 1936 shows that the number of cases sent out was 583, and the number of application forms sent out was 584. The circulation of the books shows the following: Juvenile, 26,047; Classed, 12,051; and Fiction, 18,500; making a total of 57,048 volumes.

The number of cases loaned to Public Libraries was 233; to Schools, 166; to Women's Institutes, 76; and to Farmers' Clubs, Study Clubs, etc., 108. The increase in circulation over 1935 was 15,027 volumes.

A partial Open Shelf Service is being carried on, whereby an individual requiring books on a certain subject may obtain them from the Travelling Library collection for a period of three weeks, the only charge being the return postage. These books are loaned through the agency of the nearest local library. This service has not as yet been fully developed, as the stock of books is limited, and the greater number are out in circulation.

Donations

The Public Libraries Act provides that the books of association public libraries which have been closed revert to the Department of Education. They are distributed at the discretion of the Minister. As far as possible these books are left in the community by donating them to the local public school, but a large number come to the Department, where they are sorted, packed, and donated, on request, to lumber camps, construction camps, small libraries, and other places where use will be made of them. During the year 1,965 volumes were so distributed.

Work of the Public Libraries Branch

The work of the Branch has been carried on by the members of the staff under the direction of the Deputy Minister of Education.

I present herewith a statistical statement of the public libraries of the province.

S. B. HERBERT,
Acting Inspector of Public Libraries.

April 21, 1937

APPENDIX J

REPORT OF THE SUPERINTENDENT OF THE ONTARIO
SCHOOL FOR THE DEAF

I have the honour to submit herewith the Annual Report of the Ontario School for the Deaf for the year ending March 31st, 1937.

Attendance

The enrolment by months:—

	Boys	Girls	Total
April, 1936.....	158	141	299
May.....	158	141	299
June.....	158	141	299
September.....	146	134	280
October.....	151	136	287
November.....	152	137	289
December.....	152	138	290
January, 1937.....	153	139	292
February.....	150	141	291
March.....	150	141	291

Average attendance for the year—292.

Enrolment by counties and districts:—

Algoma.....	9 pupils	Muskoka.....	3 pupils
Brant.....	5 "	Norfolk.....	2 "
Bruce.....	3 "	Northumberland.....	2 "
Carleton.....	11 "	Nipissing.....	5 "
Cochrane.....	3 "	Ontario.....	4 "
Dufferin.....	2 "	Oxford.....	4 "
Dundas.....	6 "	Parry Sound.....	1 "
Durham.....	2 "	Perth.....	2 "
Elgin.....	1 "	Peterborough.....	2 "
Essex.....	26 "	Peel.....	1 "
Frontenac.....	6 "	Prescott.....	2 "
Grenville.....	1 "	Rainy River.....	4 "
Grey.....	3 "	Renfrew.....	7 "
Haldimand.....	4 "	Simcoe.....	6 "
Halton.....	3 "	Sudbury.....	7 "
Huron.....	2 "	Thunder Bay.....	10 "
Hastings.....	8 "	Timiskaming.....	13 "
Kenora.....	2 "	Victoria.....	1 "
Kent.....	7 "	Waterloo.....	14 "
Lanark.....	4 "	Wellington.....	6 "
Leeds.....	7 "	Welland.....	7 "
Lincoln.....	3 "	Wentworth.....	12 "
Middlesex.....	11 "	York.....	57 "

Enrolment by cities of 20,000 population or over:—(These pupils are also included in the enrolment by counties and districts).

Brantford.....	2 pupils	Ottawa.....	8 pupils
Fort William.....	5 "	Peterborough.....	0 "
Guelph.....	1 "	St. Catharines.....	1 "
Hamilton.....	10 "	Sault Ste. Marie.....	6 "
Kingston.....	5 "	Toronto.....	41 "
Kitchener.....	7 "	Windsor.....	13 "
London.....	7 "		

Fifty-four pupils left during the year, and forty-five pupils were admitted for the first time.

The ages of pupils leaving school were:—

22 years.....	1 pupil	18 years.....	5 pupils
21 ".....	5 pupils	17 ".....	11 "
20 ".....	4 "	16 ".....	8 "
19 ".....	11 "	Under 16 years.....	9 "

Of the nine pupils leaving school before they were sixteen years of age, four are attending public or separate schools, two are living outside the Province of Ontario, and two are ill.

Ages of new pupils on date of admission:—

4 years of age.....	1 pupil	11 years of age.....	3 pupils
5 " " ".....	6 pupils	12 " " ".....	2 "
6 " " ".....	7 "	13 " " ".....	1 "
7 " " ".....	7 "	15 " " ".....	1 "
8 " " ".....	6 "	16 " " ".....	5 "
9 " " ".....	1 "	17 " " ".....	1 "
10 " " ".....	3 "	20 " " ".....	1 "
Total.....		45 pupils	

The school is organized in three departments—junior, intermediate, and senior.

Ages of pupils, September 15th, 1936:—

Junior Department		Intermediate Department		Senior Department	
4 years of age.....	1	10 years of age.....	4	11 years of age.....	1
5 " " ".....	8	11 " " ".....	10	12 " " ".....	0
6 " " ".....	16	12 " " ".....	23	13 " " ".....	5
7 " " ".....	15	13 " " ".....	25	14 " " ".....	6
8 " " ".....	26	14 " " ".....	14	15 " " ".....	8
9 " " ".....	30	15 " " ".....	11	16 " " ".....	22
10 " " ".....	23	Total.....		17 " " ".....	14
11 " " ".....	12	87		18 " " ".....	8
12 " " ".....	2			19 " " ".....	6
Total.....				20 " " ".....	2
133				21 " " ".....	1
				Total.....	
				73	

Summary for School

4 years of age.....	1	13 years of age.....	30
5 " " ".....	8	14 " " ".....	20
6 " " ".....	16	15 " " ".....	19
7 " " ".....	15	16 " " ".....	22
8 " " ".....	26	17 " " ".....	14
9 " " ".....	30	18 " " ".....	8
10 " " ".....	27	19 " " ".....	6
11 " " ".....	23	20 " " ".....	2
12 " " ".....	25	21 " " ".....	1
Total.....		Average age.....	
293		11.6 years	

The causes of deafness, recorded from the statements of parents or guardians at the time of admission of pupils, but unsupported by medical evidence, were as follows:—

Congenital.....	175	Syphilis.....	2
Whooping Cough.....	12	Falls.....	5
Measles.....	16	Suppurating Ears.....	3
Scarlet Fever.....	16	Osteomyelitis.....	3
Spinal Meningitis.....	16	Rickets.....	1
Infantile Paralysis.....	3	Unknown.....	19
Influenza and Pneumonia.....	29		
Total.....		300	

Ages at which loss of hearing occurred:

Born deaf (congenital).....	175	Four years.....	9
Before one year.....	55	Five years.....	5
Between one and two years... .	32	Six to ten years.....	8
Three years.....	12	Over ten years.....	4
Total.....	300		

Dr. James Kerr Love, who was associated with the Glasgow Institution for the Deaf and Dumb, now known as the Langside School for the Deaf, for a period of forty years, presented a paper to the Royal Society of Medicine in 1932 on the topic "Toward the Prevention of Deaf Mutism". This paper was published in the *Teacher of the Deaf*, April, 1932, and in the *Volta Review*, August, 1932. In this paper Dr. Love states that in 1931 the population of Scotland was about 4,800,000 and that there were 534 deaf pupils in Scottish Schools. He further states, in referring to the cause of deafness, that the ratio in 1931 was: congenital deafness 72.2 and acquired deafness 27.8.

Degree of Deafness

Two hundred and forty-five pupils have had their hearing tested by use of a 1A audiometer. These tests for loss of hearing give the following results, the ear having the greater amount of residual hearing being used for record purposes:

90% to 100% loss of hearing.....	24	pupils
80% " 89% " " "	48	"
70% " 79% " " "	68	"
60% " 69% " " "	43	"
50% " 59% " " "	26	"
40% " 49% " " "	23	"
30% " 39% " " "	8	"
20% " 29% " " "	3	"
10% " 19% " " "	2	"

Employment of Graduates

In November, 1936, the following questionnaire was sent to pupils who had left school in June, 1935, and in June, 1936, and to seventy pupils who had left in June, 1934, or before that date:

1. What shop work did you learn at the Ontario School for the Deaf?
2. Have you been doing this work since leaving school?
3. Are you working now?
4. Where are you working?
5. How long have you been working?
6. What wages are you paid?
7. Do you use your speech and lip-reading with the people with whom you work?
8. If you are not working, tell what you are doing?

Answers to the questionnaire were received from one hundred and twenty-three former pupils. A consideration of these replies would suggest that:

1. A large proportion of former students are gainfully employed, full time or part time.
2. Those who are employed are earning fair wages.
3. Those who profited most from their training in school are earning the higher wages, in whatever work engaged.

4. A comparatively small percentage are engaged in the work in which they took their vocational training.
5. Those who left school without vocational training are unemployed.
6. The deaf find it difficult to obtain jobs initially, but once employed, retain their positions.

A more complete investigation into the employment of the deaf is very desirable. To be of greater value, data concerning the entire deaf population of the Province are necessary, and such information might be obtained with the assistance of organizations such as the Ontario Association of the Deaf.

Ontario School Ability Examination

Before the application of a pupil for admission to the School is accepted he is given the Ontario School Ability Examination by a qualified examiner. Dr. H. E. Amoss, Inspector of Auxiliary Classes, is the author of this Examination, which was published in 1936. On the title page Dr. Amoss states "This is a performance test prepared more especially for use among children who are deaf, whose native tongue is other than English, and who for other reasons are lacking in language facility."

A statement on the History of Establishment of the Examination includes the following: "The Ontario School Ability Examination was begun through an attempt to discover some means of deciding the eligibility of candidates for admission to the Ontario School for the Deaf." As a final conclusion the author expresses the opinion, "That the Ontario School Ability Examination is set forth as valid in the Province of Ontario and probably valid in other English-speaking areas for the purpose of determining the school ability of deaf children."

During this school year all new pupils have been re-tested after admission and the results indicate that the Examination is very reliable. There is also a close correlation between the mental age as determined by the test and progress in school. As pupils have been subjected to this examination for two years or more, before and since publication, results obtained have been valuable in effecting proper grading and promotions.

Retirement of Miss Deannard

Miss Elizabeth Deannard, who joined the teaching staff in April, 1910, retired on September 1st, 1936. During this long period Miss Deannard gave faithful, whole-hearted, and sacrificial service in the interests of the pupils. Early in her teaching experience her genius for teaching speech and lip-reading was recognized and she entered a wider sphere of usefulness as supervising teacher of the intermediate department.

As teacher in charge of the girls' residence, Miss Deannard had had the responsibility for the physical and moral welfare of the girls and was always very conscientious in discharging her numerous duties.

Closing Exercises

On Friday evening, June 5th, an entertainment by the children was presented on the school lawn. The programme included: a Spanish dance, pyramids and tumbling, club swinging, and a pageant, "The Coming of Spring". At the conclusion of the programme an exhibition of vocational work was on display in the assembly room and class rooms. The following excerpt is taken from the Ontario-Intelligencer: "Over one thousand residents of the City and

district responded enthusiastically to the cordial invitation to be guests at the Closing Exercises at the Ontario School for the Deaf, Friday evening, June 5th, when a programme of entertainment and practical demonstrations engaged the interest of the visitors for three hours. Two hundred children took part in the many engrossing features of the evening's presentation."

"The evening's visitors realized, as many of them had never before realized, the scope of the vocational work of the school. With so many varied branches of training opened to them, students will be fitted to take a useful place in business and industry, and the aim of the school, namely, developing worthy citizens, will have been realized."

Recreation and Physical Education

During the year the boys participated in the following games: softball, rugby, soccer, hockey, volley ball, and track and field events. In these games they competed successfully with teams from the secondary schools of the district. In the junior rugby schedule C.O.S.S.A., for boys under seventeen years, the deaf boys won second place, and our junior hockey team for boys under fifteen years of age won first place in the City Ki. Y. league.

Seniors, intermediates, and juniors competed in inter-mural sports in softball, rugby, soccer, volley ball, and hockey. A winter sports day and an ice carnival were held in February and a field day in June.

The girls' recreations included softball, badminton, club swinging, and skating, as well as various indoor games in the residence. A troop of girl guides consisting of thirty-two senior girls was organized during the year.

Report of the School Physician

During the year ending March 31, 1937, we have had 255 admissions to the School Hospital. Many of these admissions were for short periods of 24 hours or less; for observation, for minor disabilities, earaches, etc.

We have had no epidemic with the exception of influenza. Fortunately this epidemic was not of a severe type.

We have had one case of Still's disease; one case of osteomyelitis; one case of adenitis following measles of last year; two appendectomies; one fracture of ulna and radius; one fracture of the wrist; and one tonsillectomy.

In the outdoor department we had an average of 31 dressings a day. Children are weighed monthly. With a very few exceptions all children have shown a gain in weight.

Our younger children and those underweight are fed morning and afternoon between meals.

Classes under Miss Fitzgerald were given nursing instruction, as emergency work, bedside nursing, etc.

(Signed) R. W. TENNENT,
Physician.

Visit of the Minister of Education

The pupils were much interested in the visit of the Minister of Education to the school on May 12th, 1936.

The following reference was made to the Minister's visit by the Ontario-Intelligencer:

"On Tuesday, May 12th, the Honourable Dr. L. J. Simpson, Ontario Minister of Education, paid his first visit to the Ontario School for the Deaf and was greatly pleased with the work that is being accomplished there."

In speaking to the Ontario-Intelligencer, Dr. Simpson expressed much pleasure with his visit to the School. "I am impressed by the whole school", he said. "The buildings are in a wonderful state of repair and the grounds are beautifully kept."

The distinguished visitor was particularly impressed with the healthy, happy appearance of the children but could not help feeling profoundly touched with the tragedy of their handicap."

Belleville, April 15th, 1937.

W. J. MORRISON,
Superintendent.

APPENDIX K

REPORT OF THE SUPERINTENDENT OF THE ONTARIO
SCHOOL FOR THE BLIND

Aims

"At its best and widest, then, education is the art of employing experience to fashion modes of feeling, thinking, and action that conform to the highest standards of human value; it has no limits within the sphere of man's relationships to his fellows and to his material environment, and it should be subject throughout to the moral law that the opportunity to gain imposes the duty to give."

The phrase, "the education of the blind," implies education of the blind chiefly at the hands of seeing teachers and for the purpose of a seeing world. Between the education of the blind and the seeing, there is indeed no essential difference,—though the methods by which we seek to realize the aims are different. During the last generation, the focal point of educational concern has been the individual child. His right to unfettered development has been loudly proclaimed. Research workers have been investigating individual differences and advising means to enable him to make the best of the gifts with which he has been endowed.

On the contrary, little progress has been made—or even attempted—to find out the manner in which children develop into social beings, and the way the individual can best be trained to serve his fellows.

Just so, in the realm of educational method, great advances have been made in methodology. But little progress has been made in subjecting the entire body of information and technique to the sway of a single directive purpose that shall guide and unify all the activities of the school.

"To know, to desire, and actively pursue the things of greatest worth in the spheres of social and personal values are the marks of a good character, to the making of which all educational effort should be directed."

Enrolment

	Boys	Girls	Total
Enrolment Jan. 1, 1936	65	61	126
Admitted Jan. 1, to June, 1936	1	2	3
Admitted September, 1936	18	10	28

Total..... 32

It is rather significant that we have such a wide spread of ages in our new pupils. There are several causal factors for late entry, such as distance from a Prairie home, accident, re-entry after absence through illness, late onset of optic atrophy, and such like. Perhaps it will be interesting to give some detail of the above age-groups. Of our nine-year group, one was a western boy and the other a lad who had tried to get along in an auxiliary class in the city of Brantford, but failed through lack of necessary sight. In the ten-year group there is one westerner, a little Indian girl, and a very bright lad from the Toronto suburban area; age twelve, one accident case; age thirteen, two re-entries and one case where a good deal of intensive social and hygiene training was needed before the child could function in a school group. In age fourteen, there was one transfer from the School for the Blind in Batavia, N. Y., and one girl whose sight began to fade in Junior IV; age fifteen, one re-entry and one Prairie child; age sixteen, one boy from Cornwall who had been in an auxiliary class for some time, and one Prairie girl who had reached High School before her sight failed. Age seventeen was an Ottawa girl who had reached Junior IV before her sight failed. Age eighteen, an Ottawa boy who had put in two years at High School before optic atrophy forced him out of a school for the seeing; age nineteen, one re-entry; age twenty, one girl who had been two years at High School before her sight failed noticeably, and one boy re-entering for this year only.

Among this group are three pupils, ages sixteen, eighteen, and twenty respectively, who had completed two years or more of High School work, and I had very great doubts that their best interests would be served by coming to us. The sixteen-year-old girl is from Alberta, and the other two are Ontario children. Despite my questioning the wisdom of their coming, they all came, and have done uniformly good work. I asked them to write out a very brief statement of the benefits they felt they had received here, and quotations from two of their estimates follow:—

“During the last few months that I have spent here, I have learned much more than I did during my last year at Collegiate. The subjects are practical and useful. Of course, there is always the problem confronting us whether or not we will be equipped for any definite work when we leave school. On the whole, I think those pupils who have been here several years are just as well educated as any High School student.”

“I have been at this school just four months, but during this period I have learned a great deal, not only in my classes but also morally and socially. In my classes, I find it much easier to keep up with the other students. Writing all day in school and then coming home and spending two or three hours doing home-work is very strenuous for anyone; and for a partially sighted person it is practically impossible to keep up. In this school, you must learn to take your own part, to stand up for your rights. This will aid considerably after we leave here. These, I believe, are the most outstanding points of advantage in attending the school, but there are many more.”

The third statement is full of praise and appreciation, but makes no special statement that would be of value here.

Graduates and Withdrawals in Age Groups

Age	No. Pupils	Reason for withdrawal
7	1	Died as a result of brain tumour.
8	1	Died as a result of brain tumour.
11	1	To attend Sight-Saving Class.
12	1	To attend Sight-Saving Class.
15	2	One, Sight-Saving Class; the other to work on farm at home.
18	1	Manitoba boy, graduated in our industrial shops; went to work.
19	2	One boy remained at home with a heart condition. One girl, with considerable sight, left to do apprentice work in a beauty parlour.
21	2	One girl, taking further training in languages in Montreal. One boy, left to train for assistant executive post with the Canadian National Institute for the Blind.
22	2	One girl remained at home. One boy, working in shops of Canadian National Institute for the Blind.
24	1	Girl, at home (entered school for first time at age of 20).

The seven- and eight-year-old children who died as a result of brain tumour had both had removal operations before coming to school. The male student in the twenty-one-year-old group who left to train for an assistant executive position with the C. N. I. B., graduated with high standing in both our literary and music departments. Of the twenty-two-year-olds, one girl with entrance standing in literary work and very satisfactory work in household science left to help at home. The twenty-four-year-old girl who entered school at the age of twenty years, had first year High School standing, and did superior work along manual lines. She is hoping for employment as a visiting teacher with the Canadian National Institute for the Blind.

Intelligence Quotients of New Pupils

Of the thirty-one pupils admitted since January 1, 1936, we have not yet tested three re-admissions after illness, six entering High School and senior grades, and five junior pupils because of language difficulties, ill-health, and retardation through lack of social adjustment. The rating of the seventeen tested is as follows:—

50% to 70%.....	3	90% to 110%.....	5
70% to 80%.....	2	110% to 120%.....	1
80% to 90%.....	4	120% to 140%.....	2

The test used is Samuel P. Hayes adaptation of the Terman adaptation of the Binet-Simon Tests for the seeing. I think that the results are generally skewed a bit toward the left. However, for a small, selected group they show something approaching the normal curve. It will be interesting to give the results of a repeat test on these children in a year or two, after they have had the advantage of a larger social environment and a greater variety of contacts.

Non-Educable and More Retarded Children

These two groups of children, both subnormal from varying causes, do not qualify as candidates for our school. Yet both groups should be a matter of concern to the education or welfare authorities of our Province. The deaf-blind child, the very low grade mental defective who cannot attend to his personal hygiene, the child whose mental development is retarded by causes other than inherent defect of mind—all these are cared for in national homes in England. None of these can be cared for satisfactorily in the average home in which they live.

We think the less retarded (dull normal) should remain in our school, and that such differential treatment as they need should be provided by means of special classes or sectional treatment within the class.

It is indeed quite difficult to grade or test some children when they come to us. Frances came last September from a farm where she had no children as companions or neighbours. She had made no social contacts outside the home. She had not learned to obey in the home, nor had she learned satisfactory social behaviour. The problem presented nearly mentally unhinged both the class teacher and the house mother. This year, we shall try to lead her to re-act socially in a manner to satisfy both her classmates and her teachers. I may say that we have already made some progress. The parents are very much pleased with the results attained and have remarked again and again about the improvement noted during the recent holiday week at home.

Epileptic Children

May I quote from "The Education of the Blind" a survey of the situation in England:

"A child with sight suffering from epilepsy of the major form is excluded from school because his illness causes alarm and distress to the other children. It is obvious that a blind child with major epilepsy has to be excluded from a school for the blind for the same reason."

When I took over my duties at the Ontario School for the Blind, we had three students suffering from epilepsy. Last week, I had to exclude a Saskatchewan lad thus afflicted. The other two students are still with us, but will probably have to be excluded before their education is completed. What is one to say to the epileptic child who fervently appeals to remain? The only hope I could suggest was further training at the Canadian National Institute for the Blind, in protected shops.

Academic Work

The chief problem in educating the blind is to bring within the range of touch and earshot the commonplace happenings of daily life. No verbal substitutes will serve this purpose. The child must learn to know persons and things in terms of his own sensory powers, and to meet the situations in which they occur on an independent footing. To illustrate:

Last week we took a parade of classes to the barn "to see" three new baby calves. We were careful to have each child go over the body of a calf to build up a tactual image. Of course, the child is not always to be a player on the stage that the teacher sets for him; he has to be prepared to play a part in shifting scenes and to adapt himself to unforeseen contingencies. To achieve this is the peak of our problem, and we endeavour to do it day by day. Possibly we make our best contribution here in extra-curricular activities, such as dramatics, over-night or week-end hikes, sleeping out, student club groups, Girl Guides, and Boy Scouts.

Our elementary school is organized as follows:—

Grade	No. in Room	Teacher
Kindergarten-Primary	17	Miss Jean Babb
Senior First	12	Miss Agnes O'Donohue
Second	11	
Junior Third	16	Miss Anne Hodge, B.A.
Junior Third	14	Miss Esther Murray
Junior Fourth	21	Miss Isobel Draper
Senior Fourth	20	Mr. Alphonsus McNamara, B.A.

Our High School organization is as follows:—

Form	No. in Room	Teacher
Form II.....	17Mr. W. H. Little
Form III.....	16Mr. Ralph Brown

Subjects specially arranged:

Latin.....	Miss Esther Murray
French.....	Miss Agnes O'Donohue
French.....	Miss Anne Hodge
German.....	Miss Anne Hodge
Physical Training, Skating and Swimming.....	Mr. P. King and Miss Laura Behrens
Special Braille.....	Miss Agnes MacGillivray and all Form Teachers

This work was inspected by Dr. H. E. Amoss, whose criticisms were definite and suggestive, and opened up new fields for study and effort.

Manual Departments

Subject	Teacher
Typewriting.....	Miss V. Kellett and Miss M. Hunter
Piano Tuning.....	Mr. J. D. Ansell
Industrial Shop.....	Mr. R. Troughton
Sewing and Cooking.....	Miss L. Behrens
Knitting.....	Miss A. MacGillivray

In our manual departments we train in:

Basketry	Reed Work	Darning
Chair Caning	Willow Furniture Making	Knitting
Pith Seating	Rubber Mats	Piano Tuning
Raffia Work	Cookery	Piano and Organ Repairs
Furniture Repair	Sewing	Typewriting

This list includes all activities carried on elsewhere in the blind world except weaving, boot making, massage, and broom making. I doubt the value of the former two; the latter two we leave to the Canadian National Institute for the Blind.

Our boys' work is made practical, where possible, in such work as building stage equipment for our dramatic productions, repairing and re-caning all school furniture, supplying our own rubber mats, building reed baskets and vases for our own use. Last year we built a complete chesterfield suite for use in our school reception room. In addition, the boys did caning and repairing for outside customers to the value of forty dollars.

The girls in the cooking department serve occasional lunches to guests and staff members. The senior girls do their own darning; make window hangings for their own cookery, sewing, and club rooms; sew sheets, pillow cases, aprons, etc., for use in our hospital; make, in part, their own underwear, blouses, and wash dresses. One of our senior girls was called home for part of the year to take complete charge of a farm house, due to her mother's illness. Once a year,

the girls hold a bazaar when they sell articles made during the year. Last year, they realized \$55.00. This money goes to finance their Club activities. Articles sold included knitted wear,—babies' booties, caps, sweaters,—aprons, laundry bags, children's dresses, and candy. They also served tea, sandwiches, and cookies made in their cooking department.

In addition to giving articles to the bazaar collection, the girls executed private orders. One girl, during the last school year, made and sold the following articles:—

2 pairs bed socks.....	\$1.00	4 sweaters \$4.00.....	\$16.00
1 pair bedroom slippers.....	.50	Lace centre.....	1.00
Baby jacket.....	1.25	Lace for pillow slips.....	1.00
Skirt.....	10.00	Afghan.....	12.00
3 pairs mitts.....	1.50	Beret.....	.50
		Total.....	\$44.75

Library

During the past year, Mr. W. H. Little acted as Librarian. During the year, 1935-36, 84 pupils borrowed books from the school library, reading a total of 779 volumes.

Reading by Classes

Class	1934-35	1935-36
High School Class.....	73 volumes	151 volumes
Entrance Class.....	403 "	141 "
Senior III.....	163 "	179 "
Junior III.....	211 "	151 "
Second Book.....	115 "	154 "
First Book.....	7 "	3 "
Totals.....	972 "	779 "

During the present year we have inaugurated a card system for the books in our Braille library. The cards were prepared in duplicate, one set being kept as a permanent record, the other circulating with the books. There is a card on file for each pupil, and the numbers of the volumes read are placed on these individual cards, giving us a complete, easy reference record of his reading. The envelopes (attached to the books) in which the cards are placed, were made in our Manual Training Department, while the typed cards were prepared in our typewriting classes.

Last October, ten volumes of fiction were donated to our Braille library by Mrs. Radcliffe of this city. These are very acceptable, but there is an urgent need for more material for our senior and junior students.

Besides other Braille magazines mentioned in a previous report, we are now receiving a copy of the Reader's Digest, given us by an anonymous contributor. This is much enjoyed by our seniors and the information is quite invaluable, providing useful material for oral compositions and class essays.

During the year, we purchased one talking book, and in addition, the Brantford Lions Club donated to us two talking books. The Brant Chapter, I. O. D. E., donated \$10.00 worth of talking book records. To that, we have added records to the value of \$30.00 from our concert funds. This medium is a great aid to the enjoyment and knowledge of good literature. It will never replace the Braille book, but it gives the interpretation of a specially selected reader, is more recreational at the close of a day's work, and is invaluable to the blind student whose poor finger sense never allows him to become a really fluent reader.

Music

In our Music Department we aim to give instruction to every child beyond the first year who is desirous of studying music and who shows a capacity for progress. Our Musical Director, Mr. Frederick Lord, informs me that, during his connection with the school, our choral work has never before reached so high a standard. We have given more instruction this year in both individual voice training and choral training. We have increased the number of students doing orchestral work by eight; the number of piano students by twenty-two. We have extended our group teaching of piano from two classes to four classes. Indeed, this particular type of instruction has passed beyond the experimental stage with us. It means that we can serve sixteen pupils in the time formerly devoted from two to four individuals.

Last spring, at the Stratford Festival, one of our senior boys, Leo Carroll, won a silver medal against ten competitors in the open piano class. The following is a list of our candidates who sat for the Toronto Conservatory of Music examinations in June last, with their standings—

Subject	Pupil's name	Standing
History	Isabel Thomson	Honours
	Isabel Thomson	Honours
Form	Geraldine McGregor	Honours (First Class)
	Doris Wood	Honours
Harmony	Helen Self	Honours
	Geraldine McGregor	Honours (First Class)
	Elizabeth Gliddon	Honours
	Tina Biluk	Honours
	Louise Cowan	Pass
Theory—Grade II	Geraldine McGregor	Honours (First Class)
	Doris Jackson	Honours (First Class)
Counterpoint	Tina Biluk	Honours (First Class)
	Elizabeth Gliddon	Honours (First Class)

The following is a statistical summary of the instruction given in the various branches of our music department:—

Piano	84	Viola	2
Organ	4	Wood Instruments	8
Violin	18	Brass Instruments	10
Cello	4	Individual Vocal	9
Bass Viol	2	Musical Theory	100

The 100 taking Musical Theory does not represent 100 individual pupils, as many of these pupils are taking several subjects in this department.

I should like to make mention of the gift of an additional \$350.00 from the Brantford Lions Club to purchase orchestral instruments. During the year, the Department sent us two nearly new upright pianos and one nearly new concert grand piano. We are badly in need of additional individual practice rooms. At the present time, we are using academic class-rooms, library rooms, many dormitory bedrooms; in fact, so much of our available space that it is difficult for a student to find a quiet room to write a letter or to listen to the talking book.

Physical Training

The first precept in our Department of Physical Training is that every child should have a gymnasium period every day. With our Primary and First Book pupils, this means a period of socialized games and songs in the gymnasium, with a music teacher at the piano and two class-room teachers in the circle. During the spring and fall seasons, we endeavour to have these games out-of-doors in the sunshine.

In our intermediate and senior classes, the period is varied from training in field sports to a very limited amount of formal gymnasium, hiking, skating, and eurythmic exercises and folk dancing. In our intermediate and senior groups the sexes are separated. Our senior girls are in charge of a lady instructress, and the boys in charge of a male instructor.

Through the courtesy of the Y. M. C. A. and the Y. W. C. A., our seniors are given instruction down town in swimming. They not only rent us facilities for swimming at a nominal fee, but they supply help in the actual instruction at the tank.

Our Physical Training Department keeps monthly records of individual weights, and informs me of any special weight losses that may require the attention of our Medical Department. Considerable emphasis is given to corrective exercise, posture, and general hygiene.

Extra-Curricular Activities

The incidental training and social education our students receive through their extra-curricular activities is invaluable. Through their club activities, dances, skating parties, card parties, socials, hikes, and their concert and dramatic work, they are being unconsciously fitted to take their places in the seeing community in which they will later reside. Every child in the school has some experience in club life. The small folk have their story and social hour and, in a limited way, accept a certain responsibility toward their community. Under the guidance of a staff member, our small girls knitted individual squares for an afghan—a gift to the children in the Preventorium.

Our intermediates have their Scout and Guide Troops. Under the captaincy of Miss Esther Murray, our Girl Guides have become a very interested, interesting, and efficient unit. They take part in all city Guide activities, and are well on the way to becoming useful, fine citizens. Our Boy Scouts are at present interested in learning signalling. Their flags and kerchiefs were made by our Girl Guides in the sewing classes.

In our senior clubs we aim for a wide spread of activities. During the year, each club holds several dances, sometimes inviting outside boys and girls from the city, and at other times inviting the members of the senior clubs only. Arrangements for these dances are left very much to the students themselves, who plan the dance numbers, issue invitations, and prepare their own refreshments. The Boys' Club has been having a series of addresses from business and professional men, prominent in the city, and have arranged this term for a series of talks from C. N. I. B. officials. All-day hikes, week-end hikes, and skating parties have become an accepted part of the club activities. Poise, ease of manner, and ability to meet and converse with strangers naturally and unaffectedly are natural results of these varied activities.

Our students are constantly called on to take part in or do the whole of an evening's entertainment for church groups and other organizations. The following is a list of some of such services we have rendered during the year:

Eight pupils took over the choral work in a dramatic production at Brant Ave. United Church.

One of our teachers and three of our pupils presented a programme for the city Home and School Club at King Edward School.

Our school orchestra played at the Lions Club dinner.

Several of our pupils presented musical numbers at a Fireside Service at Brant Ave. United Church.

A special concert was given for a group of doctors and their wives visiting the school, and musical numbers were also presented for Miss Hampson, of the Wellesley St. School, Toronto, who gave a talk on her work.

A two-hour recital was presented by our pupils at Mt. Vernon.

Musical numbers at church suppers at Brant Ave., and Onondaga United Churches.

A special programme was arranged for a meeting of the Teachers' Institute.

Several of our pupils took part in a recital at the local C. N. I. B. meeting.

Our pupils gave the whole programme at one of the regular meetings of the Brantford Music Club,—our school orchestra being featured.

We presented a full evening's concert at St. Andrew's United Church.

Our pupils took a prominent part in the Lions Club annual broadcast for "Christmas Cheer."

This year, in December, at the request of many, we repeated our Christmas play of a year ago, "Why the Chimes Rang," along with a new play, "The Maker of Dreams." We were interested to see with what ease the "Chimes" caste picked up their parts, and even improved upon their production of the year before. Two of the caste of "The Maker of Dreams" were new to this work, but their work was excellent throughout.

The outstanding event of this past year was the production of our operetta, "Tangles," twice in Brantford, and once at the Eaton Auditorium in Toronto. It was an ideal school project, presenting the work of many departments, and representing the major part of our school population, both pupils and staff. Music, choral numbers, and solos were in the hands of the music department. The several intricate and beautiful dances, which made up the greater part of one act, were taught in the gymnasium to the whole class, from which were selected those to take part in the operetta. Costumes were made in the sewing department. Two girls with some sight did most of the purchasing of materials, often selecting the colours themselves. They were excellent buyers, making the rounds of the different stores to be sure they were getting the best value for their money. One of the girls in particular did excellent work in assisting with the intricate and artistic stage settings. The boys also assisted in this work, making many of the stage properties as well as the armour worn by the soldiers.

The operetta was presented in Brantford under the auspices of the Brantford Rotary Club, and in Toronto in conjunction with the Toronto Home and School Clubs, both of which organizations shared in the proceeds. The following are quotations from the Brantford and Toronto Press: "As an exhibition of the divinely creative element in human beings, it is one of the greatest puzzles to folk who can see." "How do these actor folk without vision do a long, intricate comedy-opera with such accuracy of movement and rhythm?" "'Tangles' is something to be remembered. Not a smile in it—and there are scores—and not a laugh in it, but had some deeper and better meaning than the smiles of ordinary entertainment. So much of our laughter is empty headed—and what is worse, empty hearted. But last evening's entertainment over 'Tangles' wasn't like that. We were better men and women for it . . . they sent us laughing into the night with a better understanding of what courage really is . . . and what wise compassion can accomplish when it really tries."

Visit of the Minister of Education

On June 8th, 1936, Dr. L. J. Simpson and his very gracious wife visited our school. The Minister saw some classes at work and inspected the grounds and buildings. We held a school assembly, where some concert numbers were

rendered and an exhibition of folk dancing was given. The Minister spoke to the students, complimenting them on their work and expressing his appreciation of the diversity of expression in their stage performance.

Acknowledgments

We wish to make the following acknowledgments of gifts and services rendered to us during the year:—

To the Junior Fourth pupils of Williamson Road School, Toronto, for money to purchase a trombone and a clarinet for our school orchestra. This money was raised from a candy sale.

To Brant Avenue United Church for various invitations for our pupils to toboggan parties, suppers, and concerts.

To Mr. J. Bolton of Toronto, for a gift of \$5.00 to be used for some deserving pupil.

To St. James Church for entertainments and a social evening for our A. Y. P. A. group.

To St. Andrew's United Church for invitations to parties and concerts at the church.

To Wellington Street Church, invitations to Father and Son Banquet.

To Junior Knights of Columbus Group, for an invitation to dress rehearsal of a musical review.

To Mrs. E. A. Jones for an invitation of a "Sugaring Off" for our Girl Guides.

To St. Basil's Choir group for an invitation to a theatre party for our pupils who were members of their choir.

To Mr. Arthur Axford for entertainment of the boys in his Sunday School class at a picnic.

To Mr. G. A. P. Arnold for his very valuable assistance in training our dramatic group.

To Miss A. Kellett for her work in creating stage settings for our plays.

To the Brantford Lions Club for a gift of \$350.00 for orchestra needs, and two talking books.

To Mr. E. Moule for several invitations to matinees at the Capitol Theatre.

Alumni Meeting

At the close of school in June, the alumni and alumnae of the school met one hundred and fifty strong. The meeting lasted four days,—two days to come and go, and two full-day sessions. They greatly enjoyed recreating old scenes and experiences. Addresses were given by the President, Dr. S. C. Swift, Alumnus W. G. Raymond, Vice-President, Kathryn Sells, Principal Vallentyne, and others. Subjects of cultural and vocational interest were discussed in general meetings. All details of arrangements were capably carried out by the secretary, ex-teacher W. B. Donkin, assisted by Mr. R. Troughton and our bursar, Mr. G. H. Ryerson.

Canadian National Institute for the Blind

I wish to draw to the attention of your Department the extent to which the Canadian National Institute for the Blind complements and supplements our work.

Their field workers get in touch with all our students in their pre-school period. In not a few cases, they send a field worker to the home to help the mother prepare her child that he may be ready to take his place in a school. Again, they are constantly serving in the making of ophthalmological diagnoses,

and in supplying glasses where such are recommended. They support financially, in whole or in part, twelve of our present pupils. Finally, and most important, we look to them to place all our graduates in gainful employment, or if need be, give further vocational training. That they have been able to accomplish this for nearly all in these last two difficult years is the greatest tribute I can pay to Capt. E. A. Baker and his splendid executive.

Reports

I herewith submit reports from Dr. J. R. Will, our dentist, Dr. Norman Bragg, our ophthalmologist, and Dr. Marquis, our medical officer,—also the financial statement for the year, April 1, 1935 to April 1, 1936:—

Report of Dentist

MR. H. VALLANTYNE, *Principal*,
Ontario School for the Blind.

Dear Sir:—

I have pleasure in presenting my report for the term 1936-7.

All the pupils have had their teeth examined and the work required has been finished.

One hundred and ninety-seven fillings have been inserted, twenty-five permanent and twenty-eight deciduous teeth extracted.

On the whole the pupils attend to their teeth very well.

I think you will be interested to know that fifty pupils required no fillings and thirty-eight only one. To me this is most gratifying for I attribute it largely to the good care taken of them daily. Of course a large proportion of the work is required by those attending for the first time.

I must mention, as I have so often, that the pupils, without a single exception, have given me wonderful co-operation in this work, which at times must be trying for them.

Yours sincerely,

J. R. WILL.

Report of Ophthalmologist

MR. H. J. VALLENTYNE, *Supt.*,
Ontario School for the Blind,
Brantford, Ont.

Dear Sir:—

I have the honour to present the report of the eye examination of the new pupils entering the Ontario School for the Blind for the year 1936-7.

This class numbers 31 pupils, 20 of whom are boys, and 11 girls.

In addition a complete ocular survey was made of every pupil in the school, some 147 in all. The results of the examination are as follows:—

New Pupils

Condition of Sight	Male	Female	Total
1. Limited vision in both eyes.	12	4	16
2. Limited vision in one eye.	2	0	2
3. Quantitative light perception in both eyes.	2	4	6
4. Quantitative light perception in one eye, none in other.	2	1	3
5. Without light perception in either eye.	2	2	4
	20	11	31

From a study of the above chart, and through comparison with those of former years, we find very little change in the degree of sight shown in this year's class. Compared on a percentage basis, very definite similar findings are noted, except in group 5, which in this year's class shows a much lower percentage than usual. The fact that fewer pupils coming to the School are totally blind is very gratifying, and might be indicative of the advance being made throughout the province in the prevention of blindness.

Diseases Causing Blindness

	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	4	6	10
2. Iritis, Uvetis and Sympathetic Ophthalmia.....	2	0	2
3. Congenital Cataract.....	4	2	6
4. Fundus lesions, Retino-Choroiditis.....	4	2	6
5. Optic Atrophy.....	2	1	3
6. Myopia.....	1	0	1
7. Congenital Glaucoma and Buphthalmus.....	1	0	1
8. Anirida and Amblyopia.....	2	0	2
	20	11	31

On consideration of aetiological factors producing blindness, we see from the above chart that, while there are quite a number of diseases actually causing blindness, by far the most important classifications fall into three groups,—namely, Keratitis, Congenital Cataract, and Fundus diseases,—especially Retino-Choroiditis. These three are responsible for the visual impairment of 22 pupils of this year's class, as against 9 from all other causes.

Taken separately, we find that there are ten cases resulting from Keratitis, a number of which are birth infections. This is always an unfortunate class, when one considers that many of these cases are preventable. As to the groups including Congenital Cataract and Fundus lesions, we note that in the main they are directly hereditary, and often there is an associated blindness in other members of the family. This type of disease, we hope, may be indirectly eliminated with the advancement of social legislation in future years.

Another pleasing feature noted is the smaller number of cases of Sympathetic Ophthalmia than is usual.

A very thorough ocular examination was conducted, as well, on every pupil in the school, which has proved most gratifying because of the fact that we were able to detect and correct a number of incipient conditions which had recently developed. Then too, we were able by our refractive efforts to improve materially the vision of a considerable group of pupils.

And lastly, we found that, in the case of many others, their sight had improved markedly as a result of the treatment and advice given in former examinations.

All of which is respectfully submitted.

NORMAN BRAGG, M.D.

Report of Medical Officer

MR. H. J. VALLENTYNE, *Supt.*,
Ontario School for the Blind,
Brantford, Ont.

Dear Sir:—

I herewith submit my report on the health of students and staff of the Ontario School for the Blind from January 1, 1936 to January 1, 1937:—

Total number of infectious diseases.....	80
(a) Mumps.....	37
(b) Measles.....	32
(c) Whooping-cough.....	6
(d) Scarlet fever.....	5
Toxoid reaction.....	8
Brain tumour.....	2
Pneumonia.....	3
Enucleation of eye.....	2
Colds.....	27
Influenza.....	22
Sore throat.....	10
Croup.....	1
Discharging ear.....	4
Burns.....	1
Infection and boils.....	6
Cervical adenitis.....	7
Rest following epileptic seizures.....	4
Observation of diabetic pupil.....	1
Sprains (ankle and back).....	3
Miscellaneous cases.....	36
Total number of patients.....	217
Total number hospital days.....	1,989
Number of deaths (brain tumour).....	2
Patients sent to Brantford General Hospital.....	4
Patients sent to Isolation Ward—General Hospital.....	5

Of the two deaths listed above, only one, that of June Rawn, should be recorded in this report,—strictly speaking. June was seven years old and lost her sight as the result of brain tumour, and it was a recurrence of this trouble which caused her death. Billy Nebbitt, a six-year-old boy, became ill early in December, 1936, and after observation in our school hospital was sent to the Brantford General Hospital. His parents, informed of the lad's illness, against my own advice and that of the hospital authorities, took the boy home to Toronto. Two days later he was entered at the Hospital for Sick Children, Toronto and the report from there was that he died fifteen minutes after admission. The parents did not wish to have an autopsy performed, and in the absence of more definite information, cause of death was given as brain tumour.

I should like to call your attention in the chart above to the cases of infectious diseases. Five scarlet fever cases were immediately removed to the isolation ward of the Brantford General Hospital, and the rest of the school placed under quarantine for the prescribed period. After release from the Isolation Ward, these patients were quarantined in our own hospital for a further period of ten days.

The cases of mumps, measles, and whooping-cough were cared for in our own hospital, under far from ideal conditions. With only one small permanent ward for boys and one for girls, and with these several infectious diseases occurring simultaneously, our resources and ingenuity were taxed to the utmost. After the sick period was past and the patients were merely under quarantine, they were still confined to these rooms as we had no extra room accommodation for them.

During the past year, every child in the school was given toxoid injections against diphtheria and it is gratifying to note that there were reactions in only eight cases out of about 150 receiving the treatment.

There were two cases of enucleation of eye,—both small boys. In one case, an operation was deemed advisable, as infection from the diseased eye was affecting the lad's general health. Very beneficial results have been obtained from this operation. The other was an emergency case. The boy struck his eye against the corner of a desk, rupturing it. He was rushed to the Brantford General Hospital for immediate attention. Our eye specialist, Dr. Bragg, performed both of these operations. These two cases, together with the two cases of brain tumour, make up the total four cases listed in the above chart as sent to the Brantford General Hospital.

We have at present in the school three pupils subject to epileptic seizures. At least one of these cases gives me grave concern. The seizures in this instance are of such a serious nature as to make it advisable to discontinue this boy as a pupil here. He is quite liable to do himself or any one of a number of smaller pupils serious injury. (Note: This pupil has since been returned home.)

Our past year's experience brings once more to our attention the very inadequate hospital facilities in our school. Our infirmary is situated at one end of the third floor of the main building. There are two boys' wards, one girls' ward, staff room, nurse's bed and sitting rooms, bathroom and dispensary, with a main hallway. This hallway must be used as a hospital ward in an emergency. Most of the rooms are poorly ventilated and lighted. We have no solarium or even a sunny room for the accommodation of patients in the hospital for long periods, such as those quarantined after infectious diseases.

To remedy these conditions, a separate hospital cottage with adequate bed accommodation, separate isolation wards, solarium, dispensary, nurses' quarters, would be ideal from the medical standpoint. Failing this, the removal of the hospital to sunny the side of the second or first floor of the main building, with careful consideration given to remedy present unfavourable conditions, would help materially in caring for the health of our students. These children need more than average constant, sympathetic, and intelligent care. The fact that we have a trained graduate nurse on constant duty has saved us inevitable worry in difficult situations.

J. A. MARQUIS,
Physician.

Appreciation

Finally, may I express my appreciation of the untiring efforts on behalf of the teaching staff to serve the blind child. They have at all times extended to me an appreciated loyalty. The house staff have shown a spirit toward the children akin to maternal care, and have been assiduous in the discharge of their duties.

I have the honour to be, Sir,

Your obedient servant,

H. J. VALLENTYNE,
Superintendent.

Financial Statement

Certified Correct,

G. H. RYERSON,

Bursar.

APPENDIX L

**REPORT OF THE PROVINCIAL SUPERVISOR
OF MUSIC**

A detailed report of the Music Department up to June, 1936, is contained in the previous Report of the Minister of Education. This report will cover the balance of the year 1936.

Since September, 1935, I have visited all the Public and Separate School Inspectors in their fields and have found everywhere a growing interest in Music and a desire to have the children exposed to its influence. Supervised music is spreading rapidly as is shown in the attached table. I wish to express my appreciation of the whole-hearted support of the Inspectors and the co-operation of such organizations as the Women's Institutes and the Home and School Associations. In visiting the various Inspectorates I have had the opportunity of addressing 34 Teachers' meetings, 28 Trustees' meetings, 13 Service Clubs, 4 School Assemblies, 4 School Fairs, 9 School Concerts, and have adjudicated at 8 Music Competitions.

Teacher Training—The Summer Sessions in Music at Toronto and London were largely attended, total enrolment being as follows:

1936—Toronto, 362; London, 191. Total, 553.

1935—Toronto, 264; London, 145. Total, 409.

The Course was extended to three years, and an Instrumental Course added in Toronto.

Music Festivals—Musical Festivals, both competitive and non-competitive, are spreading throughout the Province. To my knowledge, 9 new Festivals are planned for the Spring of 1937, bringing the total in Ontario to approximately 40.

Secondary Schools—There is a growing desire to include Music in the secondary schools. As soon as changes in the curriculum provide adequate time for Music, a large number of schools will introduce the subject. The number of secondary schools qualifying for special Music grants increased from 17 to 24, and many others are teaching Music but not qualifying for grants. A large number of schools have choruses and orchestras as extra-curricular activities, and great credit is due the teachers who freely give their time and talent to these. There is evidence that an increasing number of students are taking advantage of the Music options in Middle and Upper School.

The following statistical information is presented:

‡The following schools were raised to High School status during the year: Bancroft, Capreol, Dryden, Englehart, Gore Bay, Iroquois Falls, Keewatin, Lucknow, Marmora, Sturgeon Falls.

THE COLLEGIATE INSTITUTES AND HIGH SCHOOLS

TABLE 26—CLASSIFICATION OF PUPILS BY SUBJECTS OF STUDY, 1935-36

(1. Obligatory Subjects. 2. Optional Subjects)

Lower School

(1)		
English Composition . . . 34,631	British History 18,576	Algebra 20,125
English Literature . . . 34,707	Physiography 16,402	Geometry 16,122
(2)		
Arithmetic 16,902	Agriculture and Horti- culture—II 4,283	Vocal Music 2,289
English Grammar 15,479	Latin 29,370	Business Practice 2,350
Art 13,856	French 32,508	Civics 1,766
Geography 18,415	Special French 403	Physics 87
Botany 9,236	Greek 45	Farm Mechanics 33
Zoology 7,049	German 1,453	Social Science 184
Agriculture and Horti- culture—I 4,392	Manual Training 1,500	Library Science 312
	Household Science . . . 1,535	Current Events 42

Middle School

(1)		
English Composition . . 16,252	English Literature . . . 16,983	
(2)		
(a) Algebra 14,827	(b) Latin 17,583	(c) Manual Training . . . 10
Geometry 10,973	Greek 130	Household Science . . . 60
Physics 10,689	French 19,712	Art 59
Chemistry 8,569	Special French 311	Vocal Music 584
Agriculture and Horticulture—I . . . 1,829	German 2,530	Bookkeeping and Penmanship 52
Agriculture and Horticulture—II. 1,531	Spanish 49	Stenography and Typing 65
Canadian History . 13,672		World History 25
Ancient History . . . 10,230		Library Science 158

Upper School

(2)		
English Composition . . 8,253	Physics 2,604	Special French 86
English Literature . . . 8,756	Chemistry 2,946	German 569
Algebra 4,501	Botany 2,354	Spanish 20
Geometry 4,859	Zoology 2,299	Italian 2
Trigonometry 5,560	Latin 2,970	Music 110
Modern World History 4,211	Greek 120	Library Science 25
	French 5,678	

Commercial Course

(1)	
Literature (including Oral Reading) . . 1,564	Commercial Geography 591
Composition (including English Gram- mar) 1,111	Arithmetic (including Rapid Calculation) 1,750
Composition (including Business Correspondence) 1,157	Penmanship and Spelling 1,909
Canadian History and Civics 664	Bookkeeping (including Business Forms) 1,718
British History 514	Office Practice (including Business Law) 1,043
	Typewriting 1,904
	Physiography 456
(2)	
Shorthand 1,733	French 217

A Commercial Course Class was enrolled in the following Schools:

COLLEGIATE INSTITUTES					
Cobourg	Collingwood	Goderich Ingersoll	Lindsay Morrisburg	Orillia	Smith's Falls
HIGH SCHOOLS					
Almonte	Carelton Place	Gananoque	Meaford	Orangeville	Sandwich
Amherstburg	Chapleau	Grimsby	Merritton	Paris	Thorold
Arnprior	Dundas	Hanover	Midland	Port Colborne	Walkerton
Beamsville	Dunnville	Kenora	Mimico	Port Credit	Wallaceburg
Bowmanville	Elmira	Kirkland Lake	Nepean	Port Hope	Waterdown
Brampton	Etibicoke	Leamington	New Liskeard	Richmond Hill	Whitby
Burlington	Fergus	Listowel	Newmarket	Saltfleet	Warton
		Markdale	Oakville

*The following Continuation Schools were raised to High School status: Bancroft, Capreol, Dryden, Englehart, Core Bay, Iroquois Falls, Keewatin, Lucknow, Marmora and Sturgeon Falls.

THE CONTINUATION SCHOOLS

TABLE 32—CLASSIFICATION OF PUPILS BY SUBJECTS OF STUDY

(1. Obligatory Subjects. 2. Optional Subjects)

Lower School

(1)

English Composition... 5,275	British History..... 2,959	Algebra..... 3,129
English Literature... 5,278	Physiography..... 2,478	Geometry..... 2,501

(2)

Arithmetic..... 2,622	Agriculture and Horti- culture—I..... 1,319	Special French..... 4
English Grammar..... 2,996	Agriculture and Horti- culture—II..... 518	Manual Training..... 8
Art..... 2,397	Latin..... 4,372	Household Science..... 10
Geography..... 2,571	French..... 4,837	Vocal Music..... 330
Botany..... 2,173		Civics..... 64
Zoology..... 1,934		

Middle School

(1)

English Composition..... 2,846	English Literature..... 2,812
--------------------------------	-------------------------------

(2)

(a) Algebra..... 1,632	(b) Latin..... 2,148
Geometry..... 1,806	French..... 2,440
Physics..... 1,584	Special French..... 1
Chemistry..... 1,478	
Agriculture and Horticulture—I..... 180	(c) Art..... 1
Agriculture and Horticulture—II..... 278	Vocal Music..... 50
Canadian History..... 1,682	Bookkeeping and Penmanship..... 4
Ancient History..... 1,913	Stenography and Typing..... 7

Upper School

(2)

English Composition..... 428	Trigonometry..... 261	Botany..... 121
English Literature..... 425	Modern World History... 270	Zoology..... 116
Algebra..... 227	Physics..... 78	Latin..... 181
Geometry..... 182	Chemistry..... 73	French..... 233

Commercial Course

(1)

Literature (including Oral Reading).... 135	Commercial Geography..... 72
Composition (including English Gram- mar)..... 80	Arithmetic (including Rapid Calculation) 124
Composition (including Business Corres- pondence)..... 69	Penmanship and Spelling..... 140
Canadian History and Civics..... 71	Bookkeeping (including Business Forms). 96
British History..... 75	Office Practice (including Business Law) . 46
	Typewriting..... 142
	Physiography..... 23

(2)

Shorthand..... 139	French..... 30
--------------------	----------------

A Commercial Course Class was enrolled in the following Schools: Long Branch, Pelham, Preston.

TABLE 33—ADMISSIONS, TRANSFERS, RETIREMENTS, DURING THE YEAR

1935-36

Beginners Admitted—from Publicly-controlled Elementary Schools.....	3,269
“ Private Schools.....	0
“ Other Sources.....	68
	<hr/> 3,337
Transfers.....	217
Retirements (exclusive of Middle and Upper School Graduates)—	
—while in First Year.....	509
“ Second Year.....	388
“ Third Year.....	339
“ Fourth Year.....	183
“ Fifth Year and Beyond.....	66

UNIVERSITY OF TORONTO
REPORT
OF THE
BOARD OF GOVERNORS
FOR THE
YEAR ENDED 30th JUNE
1936

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 12, 1937

ONTARIO

TORONTO

Printed and Published by T. E. BOWMAN, Printer to the King's Most Excellent Majesty
1937

UNIVERSITY OF TORONTO

REPORT

OF THE

BOARD OF GOVERNORS

FOR THE YEAR ENDED 30TH JUNE, 1936

To His Honour the Lieutenant-Governor-in-Council:

The Governors of the University of Toronto have the honour to present their thirtieth annual report, with which is included the report of the President giving a complete review of the academic work of the University and its Colleges for the Session 1935-36, and the reports of various officers and departments dealing with the manifold activities of the institution.

There are appended also the usual statements covering the funds and assets, including investments, as they stood at the close of business on 30th June, 1936, together with detailed statements of the receipts and expenditures of the Board for the fiscal year which ended on that date, and the certificate of audit of the same by Mr. G. T. Clarkson of the firm of Clarkson, Gordon, Dilworth and Nash.

The auditor's report states that all the transactions of the year upon the Revenue and Capital accounts have been duly audited and found correct; that the securities representing the investments, which are held for safekeeping by the Canadian Bank of Commerce, were produced for his examination twice during the year and found to be in agreement with the Bursars' records; and that this officer's records are well kept and all endowment and trust funds properly accounted for. While a few municipal bonds continue in default, this is the experience of practically every investing corporation today; and the high character of the investments as a whole is shown by the fact that their market value on 30th June was greater than their book value by upwards of \$1,000,000.

During the year the Board purchased the property on Bloor Street West, formerly known as McMaster University, for the sum of \$100,000 cash, the purchase being financed from the proceeds of the Whitney Bequest; and there are now accommodated in this building the departments of Economics, Social Science, and Geography, together with some overflow from the departments of Chemistry and Psychology.

The general revenue for the year amounted to \$1,727,457. In addition there was credited to revenue the Legislative Grant of \$900,000, making a gross total of \$2,627,457. (An expected supplementary grant for the year was not voted). The

deduction from this sum of interest written to certain scholarship and trust funds, \$66,799, left available for expenditures upon salaries and maintenance \$2,560,658.

The disbursements under the appropriations made by the Board for these purposes (exclusive of the Ontario College of Education which is supported by a separate vote) totalled \$2,662,032. There was consequently an excess of expenditures over receipts of \$101,374, towards which the Board had available a credit balance from the previous year of \$55,496. The application of this sum left a final deficit on revenue account of \$45,878.

All of which is respectfully submitted.

D. BRUCE MACDONALD,
Chairman.

Toronto, 29th December, 1936.

PRESIDENT'S REPORT

FOR THE YEAR ENDING 30TH JUNE, 1936

To the Governors of the University of Toronto:

GENTLEMEN:

I have the honour to present to you, as required by statute, a report on the academic work of the University and of University College for the twelve months ending on the 30th of June, 1936:

INTRODUCTION

The detailed reports of the different Faculties and of University College are appended. I make reference only to some of the main features of the year's record. In submitting this report I am more than ever impressed with the magnitude, variety and importance of the work carried on in this University. The University is large in point of attendance, in number of buildings, and in the membership of its teaching staff. It seems that both the quality and the volume of its manifold services grow steadily greater year by year. The picture I have to paint is not unattractive. It is the portrayal of an institution throbbing with vitality, moving forward with good cheer and good hope. If in the future numbers decrease, it shall be our effort to secure the continuance of high quality. For this general progress the University is chiefly indebted to the fine idealism and cordial co-operation of the staff, both administrative and academic. To them; to all alumni and friends who have shewn themselves helpful; to the loyal and self-disciplined body of students; to the Chairman and members of the Board of Governors, who have at all times given wise counsel, practical aid, and timely encouragement, and to the Government which has largely provided for our financial needs, I offer my heartfelt gratitude.

ATTENDANCE

The total number of students enrolled was 7948, of whom 4979 were men and 2969 women; 7409 being registered in the colleges and faculties and 539 in the departments. The number of students proceeding to degrees was 6453 and to diplomas 909. Of the students in attendance 3919 came from Toronto, and 3263 from other parts of the Province of Ontario. Every county is represented. There has been an increase in registration of 237.

The dominant aim of the University is not so much more students as better students; not so much more courses of instruction as better instruction. A university situated in a large city in a populous province inevitably will have a large number of students and must provide many courses of study; but the University will always seek to avoid the dangers of mediocrity in the quality of the students admitted and in the quality of the instruction given. The ideal of quality in higher education must remain the true university idea. Numbers may have to be sacrificed to quality.

The proportion of young people who seek a university education is largely determined, so the British Universities Grants Committee think, by fashion and by economic conditions. In Great Britain one person in every 885 goes for full-time study to a university; in Italy one in 308; in Germany one in 604; in France one in 480; in the United States one in 125; in this province probably one in 300.

THE STAFF

The total staff of the University and University College numbered 875, of whom 119 were professors, 69 associate professors, 82 assistant professors, 216 lecturers, associates (in medicine and dentistry) and instructors in the College of Education, 2 directors, 387 demonstrators, fellows and instructors with sessional appointments. In the Federated Colleges there are 112. The total number in the complete staff is 987.

During the past year death has removed several members and former members of our staff:

F. B. Allan, M.A., Ph.D., dean, faculty of arts, and professor of organic chemistry; Wallace Seccombe, D.D.S., dean and professor, faculty of dentistry; Louis Allen, M.A., Ph.D. (Chic.), associate professor, French; H. S. McKellar, B.A., associate professor, French; Sir John McLennan, Ph.D., D.Sc. (Man. Liv.), LL.D., professor emeritus, faculty of arts; G. Chambers, B.A., M.B., formerly associate professor, clinical medicine; Donald M. Barton, chief gymnasium instructor.

Their services to the University are briefly recorded.

The whole University suffered a severe loss in the death on the 9th of January of Professor Francis Barclay Allan, dean of the faculty of arts. He had served as dean for only a year when an attack of illness laid him low. For more than eight months he struggled toward recovery amid several recurrences of his trouble, but finally succumbed to an acute relapse.

Like many another of the intellectual leaders of this country he came from the farm, and taught school to enable him to attend the University. He graduated from the University of Toronto in 1893, obtaining in due course his M.A. and Ph.D. degrees. In 1895 he was appointed a fellow in chemistry under Professor W. H. Pike and for forty consecutive years served on the staff of this University. He became ultimately professor of organic chemistry, and in 1934 dean of the faculty of arts, in succession to Dr. A. T. DeLury. He was a lucid teacher, a stimulating director of research, a friend and sympathetic helper of his students.

He was an ideal member of University Councils (arts and medicine) and of committees. His knowledge, good judgment, conciliatory manner, and absolute unselfishness made his advice invaluable. His services to the Department of Education were highly appreciated and maintained a close and happy connection between the Department and the University.

As he possessed those great fundamentals of character, which men most prize—straightness, decency, kindness—it is little wonder that he won the confidence and good will of his colleagues and students.

Under his chairmanship the Committee on University Extension (of which Mr. W. J. Dunlop is the energetic director) grew apace and ventured on many new and needed undertakings, which have brought the work and influence of this University into every section of the Province.

Dr. Louis Allen, a Canadian by birth, came to us in 1922 from the University of Chicago, as an assistant professor in the department of French, and became an associate professor in 1926. He was an authority on the history of the French language. He was widely versed in the Indian languages and dialects of this continent, and was himself a master of many spoken languages, including Russian. After a visit to Russia in the summer of 1935 he came with his wife to her home at Beziers in France and unhappily succumbed after an operation on the 27th of August. His knowledge of philology and of the development of human speech gave him notable prestige among scholars. He was a stimulating and incisive teacher.

Later in the academic year, on the 11th of April, 1936, the department of French suffered another loss in the death of Professor Herbert Sutherland McKellar. A graduate of this University in 1893, he taught in the High Schools and Collegiate Institutes of Kemptonville, Chatham, Owen Sound and London, before his appointment in 1917 as a lecturer in University College. He became an assistant professor in 1921 and an associate professor in 1927. He was an extremely good teacher, and made much

use of phonetics in his methods of guiding students along the path of accurate pronunciation. He was a favourite lecturer in the Department of University Extension.

After an illness which lasted since the close of the War and which affected him both in body and in mind, Dr. Graham Chambers passed away on the 27th of March. He obtained from this University his B.A. degree in 1886 and his M.B. degree in 1889. He taught as a fellow in chemistry from 1887 to 1890, and in medicine and clinical medicine as demonstrator, lecturer, associate and associate professor from 1900 till he went overseas as a Lieutenant-Colonel in the University Base Hospital. He had a distinguished record at Saloniki, Orpington Hospital (as head of the medical staff) and at Shorncliffe (Moor Barracks Hospital). His health failed on his return to Canada and he lived in retirement till his death. His devoted wife who nursed him all these years, herself passed on to join him a few months later. Dr. Chambers had a winsome personality and exercised a fine influence on his students.

Mr. Donald M. Barton, chief gymnasium instructor for the past sixteen years, died on November 4th, 1935, after a short illness. When Hart House was opened in 1919 Mr. Barton was appointed to the athletic staff and since 1923 he has been the director of all gymnasium activities. His relations with the successive generations of students who came under his charge were happy and helpful. By precept and example he taught how to keep the body fit and to use it as an efficient instrument of the mind and soul.

With startling suddenness on the 9th of October, 1935, Sir John Cunningham McLennan, K.B.E., F.R.S., passed away on a train in France as he was returning to England from a meeting of the International Committee of Weights and Measures. He had retired in 1932 from his professorship of physics in this University and from the headship of the great physics laboratory, which now bears his name; but he paid a yearly visit to us and gave a course of lectures to the students in physics, bringing to them the latest European researches and results. A service was held in Convocation Hall on October 13th in his honoured memory. After graduating from this University in 1892 he became a member of the staff and advanced from stage to stage of the academic hierarchy. He passed successively through the ranks of demonstrator, associate professor, professor and director of the physics laboratory and Dean of the School of Graduate Studies. He won a national and international reputation. Though many posts with greater remuneration were offered to him he chose to remain in Toronto. He was one of the founders of the Alumni Association of this University. One of the visible results of the efforts of this group of graduates (among whom McLennan was the driving force) was the erection of our Convocation Hall. Catching the modern spirit of scientific research from such men in England as Oliver Lodge and J. J. Thomson, he did as much as any one man to infuse the spirit of research into this whole institution. In four fields he carried on his investigations—radioactivity and cosmic rays; low temperature and the liquefaction of helium; the conductivity of metals at low temperature; and spectroscopy. His discovery of the green line in the light of the aurora which occurs at great height, and his proof that this originates from the electrical discharge in oxygen taking place at great altitude won for him in 1928 the gold medal of the year from the Royal Society and the Bakerian lectureship. To the Royal Canadian Institute and to the National Research Council he gave long and valuable service. His last years were devoted to the therapeutic use of x-rays and radium for the treatment of malignant tumours. During the Great War he was attached to the Admiralty. His work on the detection of submarines was of great value in reducing this menace to British shipping. In him this University had a loyal son, an arousing teacher, an untiring worker, a scientist of world-wide fame, and a brilliant leader in research. His influence on his students, many of whom are now themselves teachers, will live on in this University and throughout the world.

The Dean of the Faculty of Dentistry, Dr. Wallace Seccombe, succumbed on the 16th of January to a long-continued attack of some form of anæmia. He courageously carried on his work almost up to the day of his death. A graduate of the School of

the Royal College of Dental Surgeons of Ontario in 1900, he carried on private practice for some years, till he was appointed secretary of the Royal College and became a member of the staff of the School. His special department of teaching was preventive dentistry. Dr. Secombe was one of the leaders in the movement which led the School of Dentistry to become in 1925 the Faculty of Dentistry in the University of Toronto, and was its first dean. Under this arrangement the Royal College of Dental Surgeons resigned to the University its teaching functions, though it retained its licensing powers; and on the other hand, the teaching resources of the University became available to the dental students.

The result of these changes have abundantly justified the wisdom of Dr. Secombe and his associates. The Carnegie Corporation financed a survey of the curricula of the various dental schools of the continent, and of the Commission who made the survey Dr. Secombe had the honour of being chosen as chairman. He founded and edited for twenty-five years "Oral Health"—a magazine devoted to the science and practice of dentistry. As an authority on dental education his advice was sought throughout this continent.

The following members of the staff retired under the age limit:

M. A. Mackenzie, M.A. (Tor. Camb.), professor of mathematics; G. H. Needler, B.A., Ph.D. (Leip.), professor of German; T. R. Rosebrugh, M.A., professor of electrical engineering; F. A. Clarkson, M.B., assistant professor, clinical medicine.

The inexorable flight of time and the pension regulations of the University compel the retirement even of highly efficient instructors from the teaching staff. Those retiring this year have given the whole service of their active manhood to this University.

Michael Alexander Mackenzie, a son of the Ven. Archdeacon Mackenzie of Brantford, graduated from Trinity College, Toronto, and then proceeded to Selwyn College, in the University of Cambridge. On his return to Canada he became professor of mathematics in Trinity College, Toronto, in 1895. In 1904 he was made an associate professor of mathematics in the University of Toronto, and in 1914 a full professor. His special field of work was actuarial science. He was a fellow of the Institute of Actuaries of England. He was constantly consulted by governments and institutions on the subject of pensions, and served as a vice-president of the Teachers Insurance and Annuity Association of America (under the auspices of the Carnegie Corporation) since its foundation. Not only was he an accurate and helpful lecturer, but by his membership in the Athletic Directorate of this University, and by his deep interest in all intercollegiate sport he exercised a beneficent influence on general university athletics, and was ever a champion of clean, amateur sport. The Athletic Directorate of the University of Toronto has erected a bronze tablet in a corridor of Hart House to commemorate his long and helpful services to sound athletics.

George Henry Needler graduated as a B.A. from this University in 1886, and as a Ph.D. from the University of Leipzig in 1890. In the following year, 1891, he was appointed to the staff of University College as a fellow in German and passed through the ranks of lecturer and associate professor to the rank of professor and head of the department. In conjunction with Professor A. E. Lang of Victoria College he wrote the High School German Grammar in use in our secondary schools. He was a veteran of the North West Rebellion of 1885, and was Officer Commanding the Overseas Training Company of the C.O.T.C. from 1916-18. He was an accurate scholar, and a constant advocate of a high standard of entrance into the University.

Thomas Reeve Rosebrugh received from this University the degree of B.A. in 1887 and of M.A. in 1893 and D.Sc. *honoris causa* in 1936. In 1890 he joined the staff of "The School of Practical Science" and in 1901 became a full professor. For thirty-five years he was head of the department of electrical engineering. Quiet yet painstaking he left his imprint on the four thousand students who passed through the Faculty of Applied Science in his time. He has been a pioneer and leader in the field of electrical engineering. His contributions to the theory of long distance

electrical transmission and to allied subjects have been of great practical value, and have won him a high place among the authorities in electrical literature.

Dr. Frederick Arnold Clarkson, assistant professor of medicine, was in charge of the university medical service in the Western Hospital for the past thirteen years. Since 1902 he has been on our medical staff, serving as assistant demonstrator, demonstrator, clinician, associate, and assistant professor. He has been fully co-operative with his colleagues and a teacher of clarity and good judgment.

To these members of the staff whose life energies have been built into the educational fabric and the student life of this University, we offer our heartfelt thanks. We hope that in their life of retirement they will still find opportunities of continued investigation and of public service.

The following resigned their positions:

J. G. FitzGerald, M.D., LL.D. (Qu.), dean, faculty of medicine; W. A. Parks. B.A., Ph.D., LL.D., F.R.S., professor of geology; A. E. Webster, M.D., D.D.S. (Chic.), M.D.S., LL.D., professor of operative dentistry; Miss A. L. Laird, M.Sc., professor of household science; M. P. West, M.A., D.Ph. (Ox.), professor of educational research, Ontario College of Education; Mrs. M. M. Kirkwood, M.A., Ph.D., assistant professor of English.

After a long illness, from which there seemed no prospect of complete recovery, Professor W. A. Parks, head of the department of geology and palaeontology, resigned his chair at the end of the academic year. He graduated from this University in 1892 with honours in Natural Science, winning the Daniel Wilson scholarship and the McMurrich silver medal. He joined the staff of the University in 1893 as a fellow in geology, and was one of the earliest to receive the degree of Ph.D. from it. He rose through every academic step from fellow to full professor and head of the department. Practically his whole life has been devoted to the service of his university and of his department. His teaching was admirable—always clear and stimulating. His real monument is the Museum of Palaeontology in the Royal Ontario Museum, which contains his remarkable collection of dinosaurs—one of the finest in the world. In 1934 his achievement in the field of geology gained for him one of the “blue ribbons” of science, a fellowship in the Royal Society. Last spring the Senate of this University conferred on him by special statute the degree of LL.D. *honoris causa*. Like his brother-in-law, Sir John McLennan, he was both scientist and Christian; to him the long story of the rocks witnessed to the wisdom and patience of a personal and living God.

For some years Dr. Albert Edward Webster had been in failing health, but he continued to come to his laboratory up to the end of the academic year, when his resignation took effect. For forty-three years he had served as a teacher of dentistry. Trained both as a medical practitioner and as a dentist, he was well fitted to give a thorough training to his students both in the theory and in the practice of dentistry. He was professor first of orthodontia and then of operative dentistry from 1906 to 1936. He was Dean of the School of Dentistry under the Royal College of Dental Surgeons of Ontario from 1915 to 1923, when he became honorary dean and continued his teaching work as professor. As editor of the “Dominion Dental Journal” and as author of “A Manual for Dental Assistants” he was widely known throughout the ranks of his profession. His attainments were recognised by his election as a member or honorary member of scientific dental societies in Canada, Great Britain, the United States and France. In 1932 on the occasion of our international gathering of dentists in Toronto, this University conferred on him its honorary degree of doctor of laws; and in the same year he was awarded the William Jarvie Fellowship medal, given annually by the dentists of the State of New York for research. Few men were more respected and beloved by the members of his own profession.

Before this report could be printed both Professor Parks and Professor Webster have passed away.

Miss Annie L. Laird, Master of Science of Drexel Institute, who from its inception has been in charge of the department of household science, resigned this year in order

that she might have opportunity for travel and a well-earned rest. The remarkable development of this department, founded by the generosity of the late Mrs. Massey Treble, is in large measure due to her foresight, energy and good judgment. Her old students are now filling posts of responsibility over this continent, in schools, hospitals, and public institutions. She leaves a living monument behind her.

Dr. Michael West, an eminent student of linguistics and philology, resigned from his research chair in the Ontario College of Education, where for the past two years he has investigated the subject of vocabularies in relation to learning and speaking foreign languages. The results of these investigations have been published. This valuable research was made possible by the generous help of the Carnegie Corporation, to which once more we offer our sincere thanks. Dr. West returned to England and is now connected with the Institute of Education in the University of London.

Dr. C. B. Weld, assistant professor of physiology, left us to become professor of physiology in Dalhousie University, in succession to Dr. E. W. H. Cruickshank, who has gone to the chair of physiology in Aberdeen University, Scotland. Dr. Weld graduated in arts in the University of British Columbia and in medicine in the University of Toronto. He did valuable research work in the Connaught Laboratories, and served as physiologist to the Hospital for Sick Children. We follow with best wishes those members of our staff who have gone to other universities to undertake a larger work. They are living links of understanding and goodwill among our Canadian Universities.

Mrs. Kirkwood, M.A., Ph.D., assistant professor of English in University College, has become Dean of Women and an assistant professor of English in Trinity College. She was a writer of distinction and an excellent teacher.

The Board of Governors has suffered a loss in the unexpected death of Mr. W. R. Percival Parker, K.C. He contracted a cold at the funeral of a friend, and this speedily developed into pneumonia. Although he was but recently appointed to the Board, he had already shewn great interest in its work, particularly in the financial management of the University, and in its relation to the Conservatory of Music. Of this latter institution he had become a Governor.

It became necessary to appoint three deans. Dr. F. B. Allan, the Dean of Arts, died during the year. Professor Brett, the Dean of the School of Graduate Studies, very efficiently carried on the work of the Dean of Arts in addition to his own heavy duties, till the end of the term, when Professor S. Beatty, head of the department of mathematics, was appointed Dean of Arts. Dean Beatty has not only had long administrative experience in the University, but has also been in close touch with the Provincial Department of Education and the work of the secondary schools.

Dean Secombe of the Faculty of Dentistry, passed away during his term of office, and after much consideration Dr. A. D. A. Mason, professor of operative dentistry, was appointed to succeed him. He has had an intimate knowledge of the teaching work of the Faculty and of the general needs of the dental profession.

Professor J. G. FitzGerald resigned his deanship of Medicine in order to undertake for the Rockefeller Foundation a survey of the methods of teaching preventive medicine and hygiene in the various colleges on this continent and in Europe. This survey will probably take a year. We have therefore granted Dr. FitzGerald leave of absence from his teaching work in this University till the first of October, 1937. Then we hope to welcome him back to his regular duties. During his absence Dr. Robert Defries and Dr. C. H. Best will have charge of the School of Hygiene and the Connaught Laboratories. The choice of Dr. FitzGerald for this important task is a fine recognition of his leadership in the field of preventive medicine and brings no small distinction to his own university.

To succeed Dr. FitzGerald as Dean of the Faculty of Medicine, Dr. W. E. Gallie, F.R.C.S. (Eng.) has been appointed. He is the distinguished head of the department of surgery, a Hunterian Lecturer in England, and one of the leading surgeons of the world.

These three appointments to academic posts of pivotal importance in the University have met with the heartiest approval of their colleagues. In an institution so large and so complicated as is this University much of the efficiency and smooth running of the whole depends on the character and administrative ability of the deans.

We welcome back to our staff Professor Barker Fairley, who succeeds Dr. Needler as head of the department of German. For some years he taught in this department in Toronto until he was called to be professor of German in the University of Manchester. His volume on "Goethe," issued in connection with that great poet's centenary, was a notable and scholarly work on the interpretation and appraisal of Goethe as a literary figure in Europe. He is an M.A. of both Leeds and Manchester and a Ph.D. of the University of Jena. Under him Germanic studies, both on the linguistic and the literary side, will be competently and progressively directed.

After long and careful inquiry a successor to Miss Laird in the department of household science was found in the person of Miss Jessie Brodie, B.A. of this University, A.M. and Ph.D. of Columbia University. After taking the professional teacher's course in the Faculty of Education, she taught in Northern Ontario, and then proceeded to Columbia, where she studied under Dr. Henry C. Sherman, the Mitchell Professor of Chemistry in that University and the author of such standard books as "The Chemistry of Food and Nutrition" and "Food and Health". For the last six years she has taught in the George Peabody College for Teachers in Nashville, Tennessee. She returns to her native land and her *Alma Mater* with a wide experience and ripened judgment, well fitted to maintain and enrich the fine traditions of this department and to link them in sympathy with the various nutrition enterprises carried on in this city and province.

The department of mathematics has been strengthened by the addition of Mr. H. S. M. Coxeter, B.A. and Ph.D. of the University of Cambridge, and a former fellow of Trinity College, Cambridge, as an assistant professor. His appointment fairly well rounds out the teaching personnel in mathematics. Professor Coxeter is no stranger to us. While he was at the Institute of Advanced Studies in Princeton, New Jersey, one of the chief centres of mathematical research in the world, he was a visiting lecturer here and won golden opinions by his lectures.

By the aid of a Carnegie Fellowship we are able to have the services of Dr. Peter Brieger in the department of fine art. Dr. Brieger is a Ph.D. of the University of Breslau, and has more recently been on the staff of the Courtauld Institute of Fine Art in the University of London. He comes with the high endorsement of Professor W. G. Constable, Director of the Institute, and Slade Professor of Fine Art in the University of Cambridge. Dr. Brieger is bringing out an architectural atlas of Medieval Europe, to be published by the Oxford University Press. I am sure that his work as an assistant to Professor Alford will be of the most stimulating and helpful character.

I regret that at the end of the term two of our senior professors have been laid aside by illness—Professor W. R. Taylor of the department of Semitic languages in University College, and Professor T. L. Walker, head of the department of mineralogy. Arrangements will be made for the carrying on of their lectures for the coming year. It is our sincere hope that they both may be able to return to their work after this period of enforced rest.

Professor Peter Sandiford was special lecturer in education in the University of California for the last half of the year. He made a real contribution to the academic life of that University and will return to carry on his work in the Ontario College of Education with a wider experience and more practical knowledge of the educational problems of our American neighbours.

The best conception of a university is probably the ancient one of a society of scholars bound together for the purpose of preserving, imparting, increasing and enjoying knowledge. If this is true, then the chief asset of the university on the side of its equipment is its staff. This group of scholars stimulate the students by teaching and example; they publish the results of their research and so add to the store of

human wisdom; they arouse even the ordinary undergraduate, and they cultivate the best and most advanced intellects. In this way and to this extent they make their university great.

For university progress and achievement no factor is so important as that of personnel—the competence of the men and women who constitute the administrative and teaching staff. When vacancies occur they must be filled with the utmost care and discrimination. No college can be better than its faculty.

Of the members of our own staff we are with good reason proud. They are loyal and competent. The list of their publications reveals the character of the research work which is being carried on in the various departments; good teaching and good investigation are not incompatible; rather are they complementary. So far as the undergraduates are concerned good teaching is a necessity on the part of the staff. We are deeply grateful to the Government of the Province for that increase in our annual grant which made it possible to reduce by half the cut in salaries made inevitable by restricted revenues; and we trust that the day will soon come when our encouraging exhortations and promises especially to the junior members of our staff will pass into realities, and salaries will be restored to their former level. In Great Britain in spite of the rigid economy enforced by the great depression, the grants to Universities from the Imperial Treasury were never curtailed.

I am glad to note that throughout the University the advisory relation between teacher and student is being increasingly recognised. The members of the teaching staff are always willing and ready to give personal counsel and guidance to their scholars. This species of tutorial system serves both an intellectual and a moral purpose. The relation of teacher and pupil passes into that of older friend and younger friend.

Leave of absence was granted to:

For the session: F. B. Allan, M.A., Ph.D., dean, faculty of arts, and professor of organic chemistry; W. A. Parks, B.A., Ph.D., professor of geology; J. W. Bain, B.A.Sc., professor of chemical engineering; M. P. West, M.A., D.Ph. (Ox.), professor of educational research; Miss G. R. F. Rose, M.A., lecturer in household science.

For one term: G. Norwood, M.A. (Camb.), D.Litt. (Wales), director of classical studies; P. Sandiford, M.Sc. (Man.), Ph.D. (Col.), director of educational research, Ontario College of Education; A. S. P. Woodhouse, B.A., A.M. (Har.), assistant professor of English.

The following new appointments and promotions were made during the year:

In the Faculty of Arts:—Appointments: R. K. Young, B.A., Ph.D. (Cal.), Director of the David Dunlap Observatory; E. S. Moore, M.A., Ph.D. (Chic.), acting head of the department of geology; Griffith Taylor, B.E. (Syd.), B.A. (Camb.), D.Sc. (Syd.), professor of geography; R. Brauer, Ph.D. (Berlin), assistant professor of mathematics; H. L. Humphreys, A.B. (Mich.), A.M. (Prin.), Ph.D. (Col.), assistant professor of French; M. F. Crawford, B.A. (West.), M.A., lecturer in physics; Miss E. J. Allin, M.A., Ph.D., lecturer in physics; G. E. Britnell, B.A. (Sask.), M.A., lecturer in political economy; C. B. Macpherson, B.A., M.Sc. (Lond.), lecturer in political economy; E. R. Hopkins, B.A. (Tor. Ox.), LL.B. (Sask.), lecturer in law; J. A. Houpert, M.A. (Ill.); Miss M. Macdonald, B.A. (Laval), Dip. de l'U. Paris, lecturers in French; F. S. Haines, lecturer in fine art; K. G. Gray, honorary lecturer in law; V. W. Bladen, M.A. (Ox.), supervisor of studies in political economy; C. W. M. Hart, M.A. (Syd.), supervisor of studies in sociology.

Promotions:—G. W. Brown, M.A., Ph.D. (Chic.), from an associate-professorship to a professorship in history; H. J. Davis, M.A. (Ox.), from an associate-professorship to a professorship in English; J. F. Macdonald, M.A. (Qu.), from an associate-professorship to a professorship in English; F. R. Lorriman, M.A., Ph.D., from an assistant-professorship to an associate-professorship in chemistry; E. W. Macdonald, B.A. (Qu.), from an assistant-professorship to an associate-professorship in philosophy; M. D. C. Tait, B.A. (Ox.), from an assistant-

professorship to an associate-professorship in Greek; A. S. P. Woodhouse, B.A., A.M. (Harv.), from an assistant-professorship to an associate-professorship in English; H. Grayson Smith, B.A., Ph.D., from a lectureship to an assistant-professorship in physics; C. Barnes, M.Sc. (Leeds), Ph.D., from a lectureship to an assistant-professorship in physics; F. E. Beamish, M.A. (McM.), from a lectureship to an assistant-professorship in chemistry; G. P. Cosgrave, M.A. (Man.), Ph.D., from a lectureship to an assistant-professorship in psychology; Miss M. C. Needler, M.A., Ph.D. (Chic.), from a lectureship to an assistant-professorship in ancient history; N. J. Endicott, B.A., B.Litt. (Ox.), from a lectureship to an assistant-professorship in English; F. V. Winnett, M.A., Ph.D., from a lectureship to an assistant-professorship in Semitics.

In the Faculty of Medicine:—Appointments: A. Hunter, M.A., B.Sc., M.B. (Edin.), professor of pathological chemistry; H. J. Shields, B.A., M.B., associate in anaesthesia; G. L. Duff, M.A., M.D., Ph.D., lecturer in pathology; M. H. Roepke, B.A. (Kans.), M.S. (Ill.), M.A. (Tor.) Ph.D. (Minn.), lecturer in pharmacology; E. Fidler, B.A., M.D., lecturer in physiology.

Promotions:—Alan Brown, M.D., from an associate-professorship to a professorship in paediatrics; William A. Scott, B.A. (McM.), M.B., from an assistant-professorship to a professorship in obstetrics and gynaecology; G. E. Richards, M.B., from an associate-professorship to a professorship in radiology; G. M. Biggs, M.B., from an associateship to an associate-professorship in oto-laryngology; R. K. George, B.A., M.B., D.P.H., from a lectureship to an assistant-professorship in anatomy; E. T. Waters, B.Sc., Ph.D. (Wales), from a lectureship to an assistant-professorship in physiology; C. B. Weld, M.A. (B.C.), M.D., from a lectureship to an assistant-professorship in physiology; M. H. Brown, M.D., B.Sc. (Med.), from a lectureship to an assistant-professorship in hygiene and preventive medicine; H. B. VanWyck, B.A., M.B., from a senior demonstratorship to an assistant-professorship in obstetrics and gynaecology; E. A. Morgan, M.B., from a senior demonstratorship to an associateship in paediatrics; G. R. Pirie, M.B., from a senior demonstratorship to an associateship in paediatrics; A. A. Campbell, M.B., from a senior demonstratorship to an associateship in oto-laryngology.

In the Faculty of Applied Science:—Promotions: B. de F. Bayly, B.A.Sc., from a lectureship to an assistant-professorship in electrical engineering.

In the Faculty of Household Science:—Appointments: Miss E. W. Park, M.A., assistant professor; Miss M. R. McKellar, M.A., lecturer; Miss J. S. Roberts, lecturer.

In the Faculty of Dentistry:—Appointment: A. D. A. Mason, D.D.S., dean.

In the School of Nursing:—Appointments: Miss M. B. Millman, B.A., lecturer in public health nursing; Miss E. M. Stuart, lecturer in nursing.

In the Department of Social Science:—Appointment: A. E. Grauer, B.A. (B.C.), B.C. (Ox.) Ph.D. (Cal.), assistant professor.

In the Department of Medical Research (Banting):—Promotions: D. A. Irwin, M.B., B.Sc. (Med.), from an assistant-professorship to an associate-professorship; C. C. Lucas, M.A.Sc. (B.C.) from a research associateship to an assistant-professorship.

In the Ontario College of Education:—Appointments: G. Taylor, B.E. (Syd.), B.A. (Camb.) B.Sc. (Syd.), special lecturer, geography; L. H. Newell, B.A. (West.), Instructor in the University of Toronto Schools.

Honours were conferred upon members of the staff:

Professor C. H. Best was invited to Yale University as a visiting lecturer; Professor P. Edgar was awarded a gold medal from the Royal Society of Canada for his outstanding contribution to Canadian literature; Dr. J. G. Fitzgerald was appointed by the Rockefeller to serve another term as Scientific Director of the International Health Division, and has been asked to make a survey of the teaching of preventive medicine and hygiene in Canada, the United States and Europe; Mr. E. R. Hopkins was appointed one of the secretaries for the Rhodes Trust for the selection of Rhodes Scholars in Canada; Professor W. P. M. Kennedy was appointed

a member of the Committee on Comparative Law by the Government of France, under the French Ministry of Justice; Dr. K. G. McKenzie was elected President of the Harvey Cushing Society of America; Sir Ernest MacMillan had the honorary degree of Doctor of Laws conferred upon him by the University of British Columbia; Professor T. J. Meek was elected a Trustee of the American Schools of Oriental Research; Professor E. S. Moore was elected Vice-President of the Society of Economic Geologists of America; Mr. A. F. W. Plumptre was invited to give a series of lectures at Cambridge University, England, on "Recent Monetary Developments in the British Dominions"; Miss E. K. Russell was asked to make a study of the facilities for advanced nursing education in England in connection with the Florence Nightingale International Foundation; Dr. E. S. Ryerson was elected President of the Association of American Medical Colleges; Professor J. Satterly was elected President of the Devonshire Association for the Advancement of Science, Literature and Art; Professor V. G. Smith was elected chairman of the Toronto Section of the American Institute of Electrical Engineers; Mr. W. S. Wallace was awarded a gold medal by the Royal Society of Canada for his outstanding contribution to Canadian history; Dr. G. E. Wilson was elected second Vice-President of the American College of Surgeons; Dr. Healey Willan was appointed Chairman of the Board of Examiners for degrees in music at Bishop's College, Lennoxville, Q.

THE UNIVERSITY IN GENERAL

The visit in November, 1935, of Their Excellencies, the Governor-General of Canada and the Lady Tweedsmuir, was a most happy event in our history. They generously gave us a whole day of their time in Toronto, and at night were gracious enough to receive with the President and Mrs. Cody the members of the staff and their wives, who attended this annual function in the Museum—a magnificent background for such a social gathering. About fifteen hundred were present. This reception affords an opportunity for our whole academic family—belonging to all colleges, faculties and departments—to meet one another and to realize that they are members incorporate in one great university body.

Their Excellencies sent to the University signed photographs of themselves as a souvenir of their visit. These now hang in the upper corridor of Simcoe Hall beside the photographs of Earl Grey and his wife.

On the afternoon of Tuesday, the 28th of January, the day of the funeral of our late Sovereign, King George V, a memorial service was held in Convocation Hall. The order of service was that used in St. George's Chapel, Windsor. Principal Eakin of Knox College read the opening sentences, Provost Cosgrave of Trinity the 23rd Psalm, Chancellor E. W. Wallace of Victoria the lesson, Principal McElheran of Wycliffe read the appointed prayers, and I gave the address. The Lieutenant-Governor and Mrs. Bruce, the Chancellor of the University, the Minister of Education, members of the Board of Governors and of the Senate and a great throng of members of the staff and of students filled the Hall. King George received the honorary degree of this University on the occasion of his visit to Canada as Duke of Cornwall and York.

The School of Library Science has developed steadily under Miss Barnstead's direction. Most public libraries in the Province now seek a librarian who has been trained in an efficient Library School. Some universities give a degree in library science to those who have taken this course. In consequence graduates of a School which gives no degree are at a disadvantage in seeking positions in comparison with those who have received a degree. The Senate of the University therefore determined to extend the course in content and standard, and to grant the degree of Bachelor of Library Science to candidates who have successfully met the tests imposed. Nowhere in Canada are greater facilities available than in Toronto for a thorough training in librarianship.

The Ontario Educational Association celebrated this year the seventy-fifth anniversary of its foundation. The University determined to mark this event by

holding a special convocation at the annual meeting of the Association in Easter week for the purpose of conferring honorary degrees on the Minister of Education, two outstanding teachers in the secondary schools, and one veteran and progressive Public School Inspector. In this fashion honour was paid to the services of our teachers, who train the most precious assets of the Province, its growing boys and girls. "Ian Hay"—himself an old teacher—describes the profession to which he was proud to belong as "the most responsible, the least advertised, the worst paid, and the most richly rewarded profession in the world."

The usual Armistice Day commemoration was held on the eleventh of November, under the auspices of the Alumni Federation, at the Soldiers' Memorial Tower. It was marked by one of the largest gatherings of students in our university history. It is of no small significance that in the very centre of throbbing undergraduate life there stands a Tower of Remembrance which constantly proclaims the sacrifice by which our freedom and other priceless national possessions were maintained.

Each year we welcome to the University the convention of the editors of the High School journals of the Province. By their conference and by their contact with the University they become more conscious of the high calling of journalism and of its possibilities and responsibilities. Many of these students come afterwards as undergraduates to this University.

During the year the Board of Governors purchased from the Government the old building of McMaster University, now used to accommodate the departments of economics, geography and social science, and to provide additional laboratory space for organic chemistry and psychology. The Governors also purchased the Alfred Beardmore house on St. George Street, immediately south of the University College Women's Union. The house has been wrecked (as rehabilitation was too expensive) and the ground is kept for future expansion.

THE FACULTY OF ARTS

Under the head of "Social and Philosophical Studies" there has been prescribed a common first year course for modern history, philosophy, political science and economics, psychology and sociology. This forms a general basis for later specialisation.

The long standing honour course of English and history now yields to separate honour courses in English and in history. Each one of these courses, however, contains much of the other. It is impossible to lay too much stress on the value of a precise and idiomatic use of our mother tongue. It is the first mark of an educated man, no matter what course he has taken in the University. The sciences and the humanities find here an interest and a requirement in common.

Last year a pass course in fine art was established. This year begins an honour course as well in this most interesting subject. Such a course has a general cultural value, and also prepares a student for teaching art in the secondary schools. The number of students enrolled in this course has been so large as to demand an assistant to Professor Alford. As I have already noted the Carnegie Corporation has made it possible for us to secure the highly skilled services and scholarship of Dr. Peter Brieger. Thanks to the generous gift of Mr. J. W. J. Forster we have been able to enlarge the Fine Art Library and to procure a large number of the Medici reproductions in colour of famous masterpieces. The Carnegie Library of Art photographs has been catalogued and arranged in cases. A librarian is now in charge of these for eight months in the year. Commodious quarters have been provided in the third floor of University College for these art treasures and for the offices of Professor Alford and Dr. Brieger. As I stated in last year's report, this department will keep teaching distinct from propaganda in the field of art. It will not be the prophet of any special school or group, but will seek to present to the students the products of successive ages for their understanding and appreciation. No education is complete without seeking to instil a knowledge and love of beauty. The broad

aim of art would seem to be to represent the reality of things under the form of beauty.

The new professor of geography, Dr. Griffith Taylor, gave his inaugural lecture on "Illustrations of the New Geography." This was attended by the Lieutenant-Governor, Dr. Bruce, Dr. Camsell, the president of the Canadian Geographical Society, Dr. Joerg of the American Geographical Society, and Professor Preston James of the University of Michigan. Thus was auspiciously launched this University's new venture in geography—the story of the background of man's history; the description, localisation and explanation of the facts which relate man to his material environment. In his first year of work here Professor Taylor has aroused general interest in his subject and has specifically given courses in economic geography. Already it looks as though his regular course which will begin in the academic year 1936-37 will be crowded, and will demand further accommodation and assistance in teaching.

The new buildings of St. Michael's College will be opened in the autumn, and will house the Institute of Mediaeval Studies. This Institute under its able staff, which includes Professor Edouard Gilson and Professor Jacques Maritain of Paris, as well as Father Phelan and his colleagues, has already become famous on the continent as a seat of philosophical studies. We are grateful to Professor Gilson for his kindness in giving to the whole University a course of four lectures on DesCartes and his philosophy. It is our hope that in the next year or two we may add a mediaeval historian to the general history staff of the University.

The Law Club, embracing all the students in the department of law, gave a complimentary dinner to their head, Professor W. P. M. Kennedy, on the 17th of March—a delicate reference to Dr. Kennedy's nationality. In acknowledging this remarkable tribute of respect, Professor Kennedy referred to the development of legal studies in this University and to the present day scientific approach to the study of legal principles. Professor Kennedy and his colleagues are editing the *University of Toronto Law Journal* and are thereby making a great contribution to the furtherance of legal scholarship in Canada. Professor Auld is one of the editors of the "Laws of Canada", the Canadian parallel (on a smaller scale of course) to Halsbury's monumental volumes "The Laws of England". Professor Norman Mackenzie has been giving much attention in public addresses to problems in connection with the League of Nations and with international relations in general.

On the 9th of December, 1935, the University commemorated the 2000th anniversary of the birth of the famous Roman poet Horace. The President took the chair at a well-attended public meeting and Professor DeWitt of Victoria read a paper on "The Life and Thought of Horace", while Professor L. A. Mackay of University College read a paper on "The Art and Influence of Horace."

Professor Homer Thompson returns from Greece for half of the academic year to give his lectures in classical archaeology. The other half of the year he spends in actual excavation work under the American School in Athens. He has been a leader in excavating the Agora or ancient marketplace of Athens. Some of his brilliant topographical conjectures have been verified by the actual digging. On his own account he has continued his special work of excavating the Acropolis in and about the Pnyx—where the Athenian orators stood to harangue their fellow-citizens. The remarkable results of this excavation has been published as "Pnyx and Thesmoptorion" (reprinted from the famous magazine of Classical Archaeology, *Hesperia*). This immediate contact between the field of excavation and the lecture-room adds life and interest to Professor Thompson's teaching.

A new combined course in biology and physics has been established which, it is expected, will deal presently with the problems of modern refrigeration.

Graduate courses in Chinese archaeology and history have been approved by the Senate. Bishop White, the associate professor in this department, is looking forward to a class of students in this field. The unique collection of Chinese art and the Chinese library of 45,000 volumes should make Toronto, under Bishop White's

leadership one of the great centres of Chinese studies on this continent. Bishop White attended the remarkable exhibition of Chinese art held last winter in London, and is still enthusiastic over the marvel of our own collection in the Museum.

The late Sir John McLennan left a bequest of \$5,000 to the department of physics, together with his books and papers. This sum of money may be used for the benefit of the department in any way that may from time to time be determined. In all probability an additional fellow will be financed from it for the coming year.

FACULTY OF MEDICINE

In the Banting Institute readjustment of rooms has been made to provide reasonable accommodation for Dr. Hall's research work. Already this building, so recently erected, is becoming crowded and some addition, perhaps by way of an additional story, is urgently required.

The Branch of the Connaught Laboratories established in Vancouver in connection with the University of British Columbia and the Provincial Department of Health has rapidly expanded under Dr. Dolman's direction, and further extension must be considered.

On the home farm of the Connaught Laboratories extensive reconstructions, adjustments and additions have been made to the buildings at a cost of about \$100,000, paid out of the earnings of the Laboratories. Fifteen more acres of land have also been purchased.

Mr. E. C. Fox has succeeded Mr. Mark H. Irish as Chairman of the Board of the Toronto General Hospital.

Intensive courses for graduates and men in medical practice have been held in the departments of surgery and paediatrics. In each class about thirty were enrolled. The holding of such refresher courses will likely become a regular event each year.

The spirit of research permeates this Faculty to a remarkable degree. It has been possible to carry on medical researches even through days of financial depression, because of the various special funds from which grants could be made—such as the Banting and Best Funds, the Banting Research Foundation, the Insulin Royalties and the Connaught Laboratories Fund. I do not think that this fact is sufficiently realized. The field for further medical research is wide and can be more fully occupied if funds are forthcoming.

FACULTY OF APPLIED SCIENCE

On January 29th in the theatre of the Royal Ontario Museum the University celebrated the two hundredth anniversary of the birth of James Watt, the pioneer in the use of the steam engine. Dean Mitchell gave an introductory address and two illustrated lectures were given—one by Professor Angus of the department of mechanical engineering on "The Inventions of James Watt" and the other by Professor E. A. Allcut on "The Influence of James Watt in Modern Industry." Such commemorations remind modern folk of their debt to the past and throw into relief the great figures in the development of present-day civilisation.

The Engineering Society celebrated the fiftieth anniversary of its birth by a conference and reunion. Many eminent engineers returned to their old training school and discussed pressing engineering problems.

Much consideration is being given to the development of a course in aerodynamics and aeronautics for students who are properly prepared for it. Increasing interest in air-travel over the ocean and over the continent has quickened the pace of engineering research on which depends the future of such transportation. The wind tunnel has been placed in charge of a committee consisting of the President of the University, the Dean of the Faculty, and Professors Angus Young, Loudon and Burton, so that as wide use as possible be made of it under proper supervision.

There has been some demand for a course in Sanitary Engineering and this has been met by a temporary arrangement. But it may well be that permanent provision

should be made. The problem of the disposal of waste is so intimately associated with the promotion and preservation of public health that it has become one of the most important which confronts modern civilisation and must be faced by every civil engineer. Our engineering faculty must be a leader in meeting every new demand of social need.

The Wallberg bequest has furnished this Faculty with another grant for its student loan fund. Soon this fund will be measurably self-sustaining. From the same source have come the funds asked for certain specific researches, and for certain additional equipment in the department of chemical engineering, such as a higher-pressure filter press, an autoclave, a heat exchanger, an absorption tower, and a reconditioned fractionating still. This last equipment has made it possible for the teaching staff to illustrate by actual process the theoretical teaching of the textbooks and the lectures.

The School of Architecture continues its annual exhibition of watercolour sketches made by its senior students during their stay at the Survey Camp on the shore of Gull Lake. Some of the sketches reveal remarkable artistic power, and all show the beauty of this open-air practice in drawing and colouring. The Royal Architectural Institute of Canada conducts a yearly student competition. In the Class "A" Exhibition Building the first medal was won by Mr. W. A. Salter of our Toronto School and the second by Mr. J. F. C. Smith also of our School of Architecture. Five other students of this School received "first mention" and "mention."

The problem of more space, especially for chemical engineering still confronts us.

THE GRADUATE SCHOOL

For the last few years the number of students has remained practically the same, nearly 600. This department of our work is of the highest importance. A university gains rank among the great universities of the world by the excellence of its post-graduate work. Our departments vary in their attraction to graduate students.

The years of depression have undoubtedly increased the number of enrolments. Scarcity of employment has had an influence in prolonging the period of preparation for the enlarging opportunities of better times. It is, however, problematical whether or not the coming of improved economic conditions will decrease the number of graduate students. There really seems to be a strong tendency to prolong preparation, and this tendency may not be easily reversed.

Each graduate student is an individual problem and must be dealt with by himself. Real scholars—and such scholars a graduate school seeks to train—cannot be produced by mass instruction. Those enrolled in this School come from all parts of the Dominion and beyond its bounds. The special growth of this University must be along the line of developing postgraduate instruction, and of providing postgraduate laboratories and libraries. This will be probably one of our distinctive contributions to higher education in Canada.

In this School, we sorely need open fellowships of the value of \$500 or more.

UNIVERSITY EXTENSION

No department of the University has made greater or more permanent advances than this Department of Extension under the progressive and far-seeing direction of Mr. Dunlop. A new feature of this year's work was the provision of a course in Public Administration. It was attended by 90 men and women from different parts of the Province. The Hon. Mr. Croll, the Minister of Public Welfare, addressed the opening session and experts in finance, economics and administration took charge of the courses of lectures. Larger plans will be carried out in the coming session. We are glad to note that other universities have been by this effort stirred to provide similar courses. Municipal administration touches every citizen so closely that any improvement effected in it brings benefit to the whole community.

In the different groups of the Teachers Courses 1805 teachers have been served. No students are keener than are teachers. The broadening and enriching of mind and personality, gained in the studies leading to a degree through these courses, must react beneficially on the whole body of pupils in our elementary schools.

7,142 adults have been engaged in continuous courses of study under this department, and probably more than 50,000 in addition have taken advantage of extension and public lectures.

With the work of this department is closely linked the growth of the general Adult Education movement. For the past two years there has been in existence a Canadian Adult Education Association, of which Mr. Dunlop is president, and Mr. Corbett (formerly of the University of Alberta) is organising secretary. Universities, Provincial Departments of Education, Women's Institutes, the Y. M. C. A., the Y. W. C. A., and other voluntary agencies can combine to systematise and advance this much-needed endeavour. People are discovering that they can acquire knowledge as readily in adult life as in youth.

The demand for more systematic adult education has increased and become urgent as a result of at least three factors: (a) unemployment and the tendency towards shorter working hours; (b) the realisation by people generally that they need a better understanding of national and international affairs and of their influence on local conditions; (c) the increase of libraries, radios, programmes of study and summer schools and such like facilities offered by university extension departments. To meet this demand all the agencies concerned, libraries, universities, education departments, and voluntary organisations are seeking to provide education for adults, with a view to caring for those who have missed educational opportunities in earlier life; for those who are trying to keep up with the changing and growing content of knowledge; for those who would gain appreciation and enjoyment in art, music, literature, and nature; for those who would fill leisure with interest and increased power of service. I believe that the great next forward step in the world of knowledge will be taken in the field of adult education. Never was there greater need for knowledge and clear thinking. The acuteness of the need will evoke the answer. I believe that this University will continue to take a leading part in developing and supporting all sound schemes of adult education.

Under the supervision of this Department of University Extension, a general plan of co-operation between the Physical Education department of the University and the Margaret Eaton School has been carried out on the lines laid down by the Senate of the University. The University provided for the Margaret Eaton School anatomy courses for junior and senior students, English for the junior class and psychology for the senior class. The Margaret Eaton School provided for the University facilities for remedial gymnastics and massage for the first and second year classes in physiotherapy; the gymnasium three hours a week for the use of the Women's Athletic Association; a course in the theory and practice of gymnastics for first year students of physiotherapy and occupational therapy; and a course in remedial gymnastics for the second year class in occupational therapy.

THE LIBRARY

A university library is no longer regarded as a mere incidental appendage to the lecture-room. It is an essential factor in the educative process for both undergraduates and graduates. The vast strides made in recent years in certain branches of knowledge and the enormous output of the printing press have emphasized the function of the library in the work of the university. If a university "does not look to its books, it both fails to meet its responsibilities and takes the sure road to decline."

The number of books handled in our library increased by 13,000 or 4% over the previous year. The total circulation was 370,004, of these 330,579 were used by undergraduates. Dominion taxes have diminished our purchasing power by \$1500.

We are now confronted with an increasing circulation and a growing congestion in our stack rooms, our work rooms and our reading rooms. If any friend of the university would give a new or an enlarged library building and a corresponding endowment for books and periodicals, he would confer on the whole cause of higher education in Canada a benefit of lasting and incalculable value. Donations of any sums, large or small, for the purchase of books and scientific journals, would help us in our present necessities. It is in the field of graduate studies that this need is most keenly felt.

HEALTH SERVICE

Increasing attention is being paid in all universities to the physical health of the students, both men and women. As the ancient Greeks sought it in their "gymnastic", so are we moderns seeking to make the body a fit and trained instrument of a fit and trained mind and character.

Dr. Porter's statement about the health of the men students is reassuring. The number examined was 1742 (apart from those at the Ontario College of Education, who are examined by a special board). Of these 94 per cent. are fit for physical exercises, four per cent. require corrective exercises; and only two per cent. are physically unable to take exercise. Dr. Edith Gordon's report on the women is as satisfactory as it can be without a gymnasium. Every precaution is taken to detect incipient weakness and to apply the proper remedies. As a result of the exercises taken and prescribed, there is noted a general improvement in the physical condition of students in their second year.

I am glad to state, after consultation with Mr. Warren Stevens, the general athletic director, that the number of students who actually take part in sports and games is about 2,000. It is better to play some game than to watch others play.

There has been a fear expressed in some of the universities of the old world that their students would not submit to a compulsory medical examination or to supervision of games; they would refuse to be "regimented." But we have not found this to be the case. This obedience to a wholesome regulation is found to result in real freedom, freedom from disease, low spirits, inertia.

Dr. Gossage is now in attendance at the surgery in the athletic side of Hart House between the hours of 5 and 6:30 to deal promptly with any accidents that may occur either on the playing field or in the gymnasium.

THE SCHOOL OF NURSING

This year marks the completion of four years of the experiment inaugurated for the better training of Public Health Nurses. The first graduating class of eight received their diplomas as Public Health Nurses after a period of three years' training, during which they have been fitted to be both hospital and bedside nurses as well as fully competent public health nurses. It is into this latter field they now proceed. The School has trained registered nurses for public health nursing by an intensive additional one-year course, and for posts of teaching and administration in hospitals.

In response to pressing demands, refresher courses have been held alternately for hospital and for public health nurses. For one month about 160 nurses (at the rate of 24 a month) from the various hospitals in Toronto and outside it come for teaching in the preventive and public-health aspect of their training.

This School is evidently meeting a real need in the community and is setting a high standard.

STUDENT ACTIVITIES

Details of these will be found in the reports of the Warden of Hart House and the Secretary of the Athletic Directorate. In addition, there are numerous student organisations in connection with special courses and departments, such as the Com-

merce Club, and the Historical Club, and for purposes of general discussion and study, such as the Debates Union of Hart House.

The Dining Hall in Hart House is still meeting with competition from outside restaurants. Its equipment has been greatly improved by the provision of comfortable chairs (through the generosity of the Massey Foundation). Most of the university student organisations hold their annual festival gatherings in Hart House; I sincerely hope they will continue to do so. Hart House through its many-sided life contributes to the unification in sentiment of the constituent parts of the University. University authorities in all parts of the world know of its constitution and its accomplishment and pay it the tribute of admiration and imitation. Dr. Priestly, the Vice-Chancellor of Melbourne University (a brother-in-law of our own Professor Griffith Taylor) visited Hart House in the spring and gave careful and appreciative study to its place in our common university life.

One of the most interesting events of the year in Hart House is the dinner at the beginning of the term for all the members of the various committees who have charge of the manifold activities of the House. Usually about 130 are present.

It must always be remembered that students through experience of these voluntary organisations take no small part in their own education, and often win the inestimable boon of life-long friendships.

The Student Administrative Council, the chief undergraduate representative body, becomes increasingly useful. I wish to thank the Council and its secretaries for their understanding co-operation throughout the year. I congratulate them on their excellent financial management, whereby they are able to give substantial assistance to many student organisations, such as the Band and the Orchestra, and to carry on their most successful Loan Fund. Another development of the Council is the Employment Bureau, which has rendered great help to students in search of work.

The teams which have represented the University in different sports have "played the game", even when they have not won the championships. The Senior Rugby Team played splendidly throughout the series of intercollegiate games, although it was beaten by a narrow margin in the "play-off".

The C. O. T. C. has been up to full strength. Colonel Cockburn has been succeeded in the command by Colonel H. H. Madill. Our present Sovereign some time ago remarked with truth that "all discipline is not a training for war". I believe that things far deeper and more subtle than a university Officers Training corps are needed to make a nation war-minded.

THE ALUMNI FEDERATION

Under the new secretary, Mr. Byron Wood, and its president, Dr. Deadman of Hamilton, the Federation is seeking to "lengthen its cords and strengthen its stakes", to extend and to consolidate its work. *The Monthly* has come out in a new *format*, and plans are being prepared for the Home-Coming in October. The loyalty and helpfulness of our graduates are very real, but they must be organised and combined. The University depends upon the goodwill of the people. That goodwill can best be created by the services which the University renders to the Province, and the highest form of that service is embodied in the "graduate" as a good citizen. The University is rightly judged by its human product. It is from our universities that must come men and women some of whom will be wise leaders and some intelligent followers. The country needs both.

The secretary hopes to visit and organise alumni associations in various Canadian centres, so that there may be developed a sense of unified academic allegiance. Local associations could render great help to able students in these days by providing yearly scholarships in this University for young men and women from their immediate neighborhood.

THE UNIVERSITY LANDS

A recent visit to the Survey Camp on Gull Lake has not only made me realise the value of this fine practice ground for the civil engineering class, the students in architecture, and the group in geology, but has reminded me of the amount of land the University possesses around its various buildings.

At Gull Lake are 172 acres; around the Observatory are 177 acres; at the Connaught Laboratories are 75 acres; and here in the heart of a great city 71 acres (apart from additional holdings of the Federated Colleges); in all the University owns 495 acres.

UNIVERSITY BUILDINGS

The Superintendent of Buildings, Colonel LePan, has a task the magnitude of which is not often realised. On his office staff 14 persons are required. The buildings under the control of the University (not including the buildings of the Federated Colleges) number 57. The number of employees (carpenters, electricians, painters, plumbers, tinsmiths, labourers, cleaners, caretakers, and others) is 276. Employees salaries and wages amount to \$310,241. Customs entries reach a total of 1169. The financial turnover at the Post Office is \$32,747. The accounts for lighting amount to \$85,371, and for coal to \$101,435. The repairs and renewals cost \$71,655, which is less than one-half of one per cent of the replacement value. It is worthy of note that the buildings are well kept up, even though there is a minimum of expenditure on them.

There is much beauty in many of our university buildings and in the open spaces about them. Indeed the university group forms one of the chief architectural attractions of this city.

The Board of Governors through its Chairman and a committee is giving careful consideration to the plans, cost and maintenance of a gymnasium for the women students of the University. The problem of financial maintenance and of the necessary fee to be charged is not easy to solve; yet I trust that as soon as possible we may begin the erection of such a building. The health of the women students would be benefitted thereby.

VISITING LECTURERS

During the year the following special lectures were delivered:

On the Alexander Foundation a course of three lectures by Dean F. B. Snyder of Northwestern University on "Robert Burns: his personality, his reputation, his art"; a lecture by Professor F. Baldensperger, formerly professor of comparative literature at the Sorbonne, on "Les assises de la comedie humaine de Balzac"; a lecture-recital by Rev. Edmund H. Fellowes, director of the choir of St. George's Chapel, Windsor, England, on "Tudor-music", in association with the Tudor Singers of Toronto; a lecture by Mr. Richard Finnie, explorer, Ottawa, on "Wandering through French Canada"; a lecture by Professor R. H. Fowler, Fellow of Trinity College, Cambridge, England, on "Co-operative phenomena in matter"; a lecture by Miss Marjorie Gullen, chairman and director of studies of the Speech Fellowship and Institute, London, England, on "Choral speaking as a contribution to education"; the Donald C. Balfour lecture by Dr. Melvin S. Henderson, professor of orthopaedic surgery, Mayo Foundation Graduate School, Rochester, Minn. on "Orthopaedic Surgery: an historical review"; a lecture by Mr. C. W. Jenks of the Legal Section, international Labour Office, League of Nations, on "Federal States as members of the International Labour Organisation"; a lecture by Professor K. Kuratowski, on "The generalised theory of functions of a real variable"; a lecture by Professor H. Ries, head of the department of geology, Cornell University, on "Some recent advances in the geology and utilisation of the non-metals"; ten lectures by Dr. Ludwig Silberstein, consulting mathematician, Eastman Kodak Company, Rochester, N.Y., on "Discrete Spacetime";

the inaugural lecture by Professor Griffith Taylor of the department of geography, on "Illustrations of the new geography"; a lecture by Professor H. C. Urey, department of physics, Columbia University, on "Methods for the separation of Isotopes"; a lecture by Sir Alfred Zimmern, professor of international relations, Oxford University, on "The International Outlook."

In connection with the department of physics a series of twelve lectures by Dr. W. H. Kohl, research laboratory, Rogers Radio Tubes Company, Toronto, on "Electron optics, Thermionic Emission, Luminescent Screens"; eight lectures by Dr. B. Haurwitz, Carnegie Fellow in Meteorology, on "The Physics of the higher Atmosphere."

University College Department of English arranged an interchange of lectures between Professor H. J. Davis and Professor Devane of the English staff of Cornell University.

The following lectures were given in Convocation Hall under the auspices of the Royal Canadian Institute:

By Professor J. Ellis Thomson on "The Minerals that surround us"; Mr. James I. Hambleton, Department of Agriculture, Washington, D.C. on "The Realm of the Honey-Bee"; Professor Harlow C. Shapley, Harvard College Observatory, "Surveying the Outer Universe"; Dr. Arthur L. Day, Geophysical Laboratory, Carnegie Institution, Washington, D.C., "Hot Springs of Yellowstone Park"; Dr. H. T. Gussow, Dominion Botanist, Ottawa, "Botanic Gardens for Canada"; Dr. Raymond C. Dearle, Department of Physics, University of Western Ontario, "Physical Science in the Practice of Medicine"; Dr. David J. Price, Bureau of Chemistry and Soils, U.S. Department of Agriculture, "The Dynamite of Dust"; Dr. Burton T. Simpson, State Institute for the Study of Malignant Disease, Buffalo, N.Y., "The Cancer Problem"; Mr. Frank Pullen, Naturalist, Oakville, Ont., "With a Movie Camera in East Africa"; Professor W. L. Holman, "A medical study of famous people"; Professor C. T. Currelly, "Two Ancient Countries. Ontario and Egypt"; Professor L. C. Coleman, "The Story of Sugar Cane"; Mr. George O. Sanford, Engineering Division, Bureau of Reclamation, Department of Interior, Washington, D.C., "Boulder Dam"; Professor Griffith Taylor, "A Scientist in the Antarctic"; Dr. Frank Oastler, Naturalist and Explorer, New York, "Alaska and the Stikine"; Dr. C. M. Hincks, National Committee for Mental Hygiene, "Man's Last Spectre"; Professor A. O. Gross, Bowdoin College, North of Battle Harbour"; Professor A. P. Coleman, "Volcanoes of Mexico"; Dr. C. E. K. Mees, Eastman Kodak Company, Rochester, N.Y., "Some recent progress in astronomical Photography".

The following delivered lectures under different departments of the University:

Dr. T. Z. Koo, on "The Contribution of Christianity to China"; Sir Francis Floud, British High Commissioner in Canada, on "Canadian Agricultural Products in the British Market"; Dr. S. Pettersson of the Meteorological Service, Bergen, Norway, on "Fundamental Principles of Air Mass Analysis"; Dr. L. R. Broster, of Charing Cross Hospital and University of London, on "Change of Sex"; Dr. T. Kagawa of Japan, on "Religious Conditions in Japan".

VISITORS

Among the visitors during the year were:

Dr. F. H. Spencer, former chief inspector under the London County Council as a representative explaining British policies and systems in education; Dr. R. E. Priestly, Vice-Chancellor of the University of Melbourne, Australia. On the occasion of the 25th anniversary of the Overseas Education League the following: Mr. G. T. Hankin, staff-inspector, Board of Education, London; Mr. D. D. Anderson, inspector of schools, London; Mr. W. D. Cousins, director of education, Londonderry and Limavady; Mr. T. J. Rees, director of education for Swansea, Wales; Mr. W. A. F. Hepburn, Director of education for Ayrshire, Scotland; Dr. J. E. Smart, director of education for Acton, London; Mr. W. A. Brockington, director of education for

Leicestershire; Mr. F. H. Toyne, education officer for Brighton, England; Mr. E. M. Rich, education officer for London; Mr. E. Salter Davies, director of education for Kent; Mr. T. B. Tilley, director of education for Durham; Mr. J. A. Peart, director of education for Winchester.

LEARNED SOCIETIES

The following learned societies met at the University:

The American Ornithologists Union; The Association of American Medical Colleges.

SPECIAL CONVOCATIONS

Special Convocations were held:

November 27th, when the degree of Doctor of Laws, *honoris causa*, was conferred upon His Excellency Lord Tweedsmuir, Governor-General of Canada; April 14th, in connection with the 75th anniversary of the founding of the Ontario Educational Association, when the honorary degree of Doctor of Laws was conferred upon: The Honourable L. J. Simpson, Minister of Education for Ontario, Mr. H. R. H. Kenner, Principal of Peterborough Collegiate and Vocational School, Mr. J. H. Putman, Chief Inspector of Public Schools, Ottawa, Miss M. E. Spence, formerly of Parkdale Collegiate Institute, Toronto; on June 3rd when the honorary degree of Doctor of Laws was conferred upon The Honourable Horace Harvey, Chief Justice of Alberta, Dr. G. F. Kay, Dean of the College of Liberal Arts, University of Iowa, and *in absentia* upon Professor W. A. Parks, Department of Geology; the honorary degree of Doctor of Science upon Professor R. S. Lillie, University of Chicago, Professor T. R. Rosebrugh, Department of Electrical Engineering, and *in absentia* upon Dr. W. H. Collins, Director of the Geological Survey of Canada; the honorary degree of Doctor of Music upon Mr. W. H. Hewlett, Principal of the Hamilton Conservatory of Music.

PORTRAITS

The portrait of Dr. Althouse, now Dean of the Ontario College of Education, was presented to the University of Toronto Schools, of which for years he was the headmaster, and hangs beside the portrait of his predecessor, H. J. Crawford, and his great teaching colleague, Dr. T. M. Porter.

A portrait of Dr. C. F. Heebner, the Dean of the Ontario College of Pharmacy, was presented to him by the Ontario Druggists Association, and by him was presented to the College.

Sir John McLennan's portrait by Augustus John, R.A., hangs in the library of the McLennan Laboratory. It was the gift of a group of his friends.

BENEFACTIONS

During the year the University has received the following benefactions, totalling \$100,968.68:

From the Rockefeller Foundation: Child Research and Parent Education, \$19,968.23. School of Nursing, \$17,500; Eaton Endowment, \$25,000; Carnegie Corporation: Fine Art, \$7,511.50, Workers' Educational Association, \$2,543.75. Fellowship in Physics, \$2,410.50; Estate of the late Sir John McLennan, \$5,000. also books, papers and instruments; Canadian National Committee for Mental Hygiene, for psychiatry, \$4,354.36; Reuben Wells Leonard Fellowship and Scholarships, \$3,500; Flavelle-Peacock Lectureship: Sir Joseph Flavelle, \$1,250. Sir Edward Peacock, \$1,250; Graduate Fellowships: Sir Joseph Flavelle, \$500, Imperial Oil Limited, \$500. Estate of the late Sir Edward Kemp, \$500; Standard Brands Research Fund, for chemistry, \$1,002.65; D. A. Dunlap Memorial Scholarships, \$1,000; J. W. L. Forster Library Fund, for fine art, \$1,000; Robert Simpson Company Scholarships, \$550; St. Margaret's College Old Girls' Association, for Florence M.

Neelands Prize, \$520; Alma Anderson Bastedo Memorial Prize, \$512.50; Sir Edmund Walker Scholarship, \$450; Robert Bruce Scholarship, \$421.39; Gertrud Davis Exchange Fellowship, \$400; University College Alumni Matriculation Scholarship, \$400; S. R. Parsons Scholarship, Commerce and Finance, \$250; J. B. Willmott Scholarships in Dentistry, \$250; Canadian Dental Association Research Fund, \$200; Anonymous, for Mary Keenan Award, \$200; Social Science Scholarships: Anonymous, \$100. St. Margaret's College Alumnae Scholarships, \$75; Boiler Inspection and Insurance Company Scholarship, mechanical engineering, \$150; George Kennedy Scholarship, \$130.56; Sarah Kennedy Scholarship, \$130.56; Sir John Eaton Memorial Scholarship, University Schools, \$120; Maurice Hutton Matriculation Scholarship, \$100; Darling and Pearson Prizes in Architecture, \$100; Pan-Hellenic Association Prizes, \$100; Toronto Brick Company Prizes, architecture, \$100; University College Alumnae Scholarship, \$100; University Tours Association Scholarship, \$100; Canadian Engineer Prize, \$100; Ramsay Wright Scholarship, \$81.42; McCaul Scholarship in Classics: Professor M. Hutton, \$37.50, Professor G. O. Smith for group, \$17.00; Lambda Chi Alpha Alumni of Toronto for Ronald S. Saddington Medal, pathology, \$53.50; Hollywood Theatre Prizes in French, \$50.00; Dr. R. A. Reeve Prize in Medicine, \$50; F. W. Jarvis Bursaries, \$50; Toronto Women's League of the United Synagogue Scholarship, Medicine, \$50; Hon. Mr. Justice Riddell and Mrs. Riddell for Riddell Scholarship in Law, \$30; Pakenham Memorial Prize, \$25; Engineering Institute of Canada Prize, \$25; University College French Society Prize, \$25; Ontario Medical Association Prize, \$25; American Society of Heating and Ventilating Engineers, \$25; Canadian Medical Institute Prize, \$25; Alumnae Prize in English, \$10; Tracy Scholarship in Philosophy, \$10; Maurice Cody Memorial Scholarship, University Schools, \$10; Professor G. O. Smith for Fletcher-Johnston Prize, \$10; Sundry items, \$28.26.

In addition to the above a water-colour painting of the University of Toronto in 1876 by Lucius O'Brien was presented by two Governors of the University of Toronto.

We acknowledge these many contributions with sincere appreciation and a lively sense of gratitude. I believe that the donors will experience an equal sense of satisfaction, as they observe how their gifts are fulfilling the purpose they had in mind and are in so many cases making it possible for able, though needy, students to complete their courses and to become fit for a useful life-service.

SCHOLARSHIPS

Several new scholarships and prizes have been contributed during the past year: The Mary Keenan award of \$200 in political science; the Pakenham Memorial Prize in the Ontario College of Education; the Royal Architectural Institute of Canada Gold Medal, at graduation in architecture; the Caroline Macdonald Memorial award, to be given to a Japanese student who is studying Social Science in this University; the Toronto Women's League of the United Synagogue prize in second year medicine; the H. R. Bain Scholarship of \$200, at matriculation into the Faculty of Applied Science.

The Board of Governors has defined the conditions under which remission of tuition fees will accompany the winning of scholarships: Matriculation scholarships in Arts (1) carry remission of fees equivalent to the cash value of the scholarship; (2) this remission is continued through the course only if the student holds his first-class standing in the examinations. All scholarships in the subsequent years of the course carry no remission of tuition fees. These decisions of the Board were agreed to by the Federated Colleges.

For the purpose of encouraging graduate research work the existing graduate scholarships and fellowships carry complete exemption from tuition fees for the year in which the scholarship is held.

The details of the award of the Reuben Wells Leonard scholarships in University College have also been settled between the Toronto General Trusts Corporation and

the Governors of the University. At matriculation there will be four scholarships of \$300 each, available for students outside Toronto, and four of \$250 each, available for students from the whole Province, which also carry free tuition in the later years on condition that the scholarship holder maintains his first-class honour standing. There are also four scholarships of \$250 each to be awarded at the end of the first year at the discretion of the Council of University College to students in honour courses.

The Board of Governors set aside out of the general revenue a substantial sum to be used as a Bursary Fund in University College and in some of the Faculties. By reason of this fund, the Alumni Federation Fund, the Students' Administrative Council Loan Fund, the Wallberg Memorial Loan Fund for the Faculty of Applied Science, and the Loan Funds of the Engineering Society and the Medical Society, it is hoped that no deserving student will be unable to enter or to continue his course for lack of financial resources. The Federated Colleges have similar funds for the aid of students. Special consideration is given to students whose home is outside Toronto, and who must therefore pay the cost of board and lodging in addition to tuition fees. In this way an effort is made to equalise as far as possible the educational opportunities of city and country.

There is still need of more and larger scholarships. Whether given annually or endowed such scholarships would render a timely service to capable youths, to the University and to the country at large. Our scale of help to brilliant students is small in comparison with that adopted in the Mother Country. The Universities Grants Committee in Great Britain states in its report for this year, 1936, that fifty per cent of the students in the Provincial Universities began their education in the public elementary schools and that 45.2 per cent of the students received assistance. The percentage of assisted students at Oxford and Cambridge is about fifty. Moreover in many cases the College scholarships are so supplemented by grants from the County Councils that the total cost of the students' university education is defrayed.

Scholarships and other emoluments to the value of at least £1350000 per annum are being regularly given to university students, partly by the State and local authorities; partly by the Universities, Colleges and Schools; and partly by public trusts. These grants are regarded as good investments which bring in good yield in the form of educated humanity. I believe that we ought to increase the scale of our awards.

Many of our students in this University and in Canadian Universities generally, have to earn something by their own efforts either to supplement their scholarships or to provide wholly for their expenses. Their vacations are devoted if possible to profitable employment. This does make the summer reading party an unthinkable enjoyment, and doubtless the bloom of fine scholarship may be unattainable. But I think that what is lost in scholarship is gained in moral strength, self-reliance, and preparation for the struggle of life. Some of our students who win through at the price of self-sacrifice and hard work are veritable heroes; they have gained the moral "wrestling thews which throw the world" of obstacles; they will "make good".

Proposals have from time to time been made that the Federal Government should make grants for scholarships. Such a policy would doubtless justify itself. The best channel through which these students aids could be dispensed would be the various universities of the Dominion.

CONCLUSION

1. One of the significant features of the present situation is that youth seems to have more faith in universities than in most other organised expressions of national life. In spite of the limitations and defects of our universities, youth and adults alike are turning to them not only to learn how to make a living but to find answers to the baffling problems of our generation. Heavy indeed is the responsibility of the university and of university teachers in these days. In a singular fashion they have

the ear of youth. They must recognise that they are "vital agencies of civilisation", that they are not agencies of propaganda but agents for the discovery and dissemination of truth. The great lesson they must teach is that fundamentally "the history of civilisation is the history of the development of man's ideas and ideals, and the advance of humanity depends on the achievements of the human mind and spirit". If youth believes that the universities carry a vital message and in consequence yield to them a full measure of trust, the universities in all their members must try to prove worthy of that trust.

2. The importance of the social sciences is increasingly recognised. Human relations are after all the factors that make society. Civil people make civilisation. Sir Alfred Ewing in his presidential address at the British Association of 1932 said: "The cornucopia of the engineer has been shaken over all the earth, scattering everywhere an endowment of previously unpossessed and unimagined capacities and powers . . . many of these gifts are benefits to man, making life fuller, wider, richer in comforts and interests, and in such happiness as material things may promote." On the other hand, he goes on to say: "Man is ethically unprepared for so great a bounty. . . . The command of nature has been put into his hands before he knows how to command himself". A later president of the British Association, the famous astronomer, Sir James Jeans added this comment: "The tragedy does not lie in man's scientific control over nature but in his absence of moral control over himself".

There is here no belittling of the place and worth of physical science, but there is a demand for something more, something that inheres in man's character and determines his relations with his neighbour and his God.

This year's president of the same great scientific association, Sir Josiah Stamp, concluded his address with these words: "The duality which puts science and men's other activities in contrasted categories, with disharmony to be resolved, is unreal. . . . We have spent much and long upon the science of matter, and the greater our success the greater must be our failure, unless we turn also at long last to an equal advance in the science of man".

These utterances illustrate the trend of thinking to-day. The social sciences—the investigation of human relationships, the solving of the problem how men may live happily and helpfully together—will inevitably demand more attention in our academic courses of study. Such emphasis will not mean neglect of the great field of physical science: rather is the matter an illustration of the words "this ought ye to have done, and not to leave the other undone". Proper human relations are based mainly on intellectual, moral and spiritual factors. It is in ideas and ideals that the real wealth of the world consists. To this wealth, not only the scientist, but the philosopher, the poet, the moralist and the religious teacher make their contribution.

3. What does the university seek to do for a student? Its highest function is (in the words of the University Grants Commission Report) "to train students generally, and (without indoctrinating them in any particular brand of doctrine) in some sort of philosophy of life, which will enable them to do their duty to the community and to fulfil their duty in their station faithfully and soberly". Men must be trained and stimulated "to think strenuously about the great issues of right and wrong, of liberty and government, on which both for the individual and the community a balanced judgment is essential to a rational life".

A graduate, who has gained what his university has tried to give him, has at least an interest in general ideas; he will not accept or reject an idea till he has made an effort to understand it; he has been made "capable of philosophy"; he seeks to go down to the root of things; he has learned to understand the meaning of things in their universal relations; he has some power to discriminate and to appreciate.

All this personal culture he is taught to believe must issue in service.

Are there too many educated men and women among us? Can we really have too many men and women possessed of that combination of knowledge and sound judgment which it is the chief aim of the university to produce?

4. Many of the most cherished and unquestioned values which the past has bequeathed to us are in great areas of the world seriously called in question. Among these are the validity of democracy, the right of the individual to freedom of speech and opinion, the benefactions of modern civilisation, the reality and possibility of progress, the practicability of the highest religious ideals in corporate life, the ability of men to build a decent world, to discern truth, to "save their souls". Are these hopelessly obsolete? Or are they worth preserving? Can we in Canada, for example, maintain a sane and well-ordered democracy? Can we in our land arouse an enthusiasm for it and for our inherited freedom which is in other lands aroused for communism and naziism? More than any other form of government does democracy rest on the intelligence of the citizen. To the university man, who has learned to discipline himself and to think clearly and strenuously, the call comes in our land to-day to preserve and to purify our inherited democracy, to make and keep it free and ordered and efficient. If democracy fails nationally, it is because it has already failed in man's spirit, mind and conscience. Of the man of privilege and education is demanded a measure of public interest and public service. If there is a flight from reason and responsibility, then is the way prepared for dictatorship. The free university will prove one of the chief bulwarks of the splendid heritage of political, social and religious freedom which, won at great price, our fathers have handed down to us.

5. A living university has many needs. There is a point below which its income cannot sink without seriously impairing its efficiency. I do not think that our University can maintain its high standards, if its budget is further reduced, or rather unless its revenues are reasonably increased. Individuals may render substantial help. There are books to be purchased for special departments in the library; there are chairs that might be endowed, such as those in geography or in geophysics or in art or in music; there are loan funds and scholarships to be established in different faculties; there are postgraduate fellowships to be provided for students from distant parts of Canada; there are research funds to be set up in physical science, in social science, in engineering, in medicine, in dentistry, and in other fields of investigation. Such help if given is an investment yielding an abundant return that continues through future ages.

6. As a university grows in size and numbers its leaders must constantly ask themselves the question whether quality is being maintained, whether additions to numbers tend to weaken the quality of the institution or the value of the training for life which the university seeks to give or tend to lower the fitness and ability of those who enter. "It may seem democratic to diffuse, but it is a poor compliment to democracy to run shallow in its name". Meanwhile we do not seem to have reached a national saturation point for our students. Canada will surely, even though slowly, increase in population, in wealth, and in development of resources. I believe there will be suitable opportunities for those who are fitted to take them.

7. Will the world-order of the future take the form of a soulless and impersonal mechanism in which personal values disappear and freedom is only a dead dogma? Will anarchy and bloodshed be the end? Or will the spiritual regain the mastery and direct that order to a lofty goal? Do we look for defeat or revival? The answer to this crucial question rests I believe with the forces of religion and sound education. It is with a sense of almost overwhelming responsibility and yet with constantly renewed faith and hope that university administrators and teachers face their task to-day.

All of which is respectfully submitted.

H. J. CODY.
President.

November 26, 1936.

APPENDIX A

- (1) Report of the Principal of University College.
- (2) Report of the Dean of the Faculty of Medicine.
- (3) Report of the Dean of the Faculty of Applied Science and Engineering.
- (4) Report of the Dean of the Ontario College of Education.
- (5) Report of the Secretary of the Faculty of Household Science.
- (6) Report of the Dean of the Faculty of Forestry.
- (7) Report of the Dean of the Faculty of Music.
- (8) Report of the Dean of the School of Graduate Studies.
- (9) Report of the Dean of the Faculty of Dentistry.
- (10) Report of the Director of the School of Hygiene.
- (11) Report of the Librarian.
- (12) Report on Research.
- (13) Publications.
- (14) Report of the Director of University Extension and Publicity.
- (15) Report of the Director of the Department of Social Science.
- (16) Report of the Director of the School of Nursing.
- (17) Report of the Director of the Department of Military Studies.
- (18) Report of Health Services.
- (19) Report of the Warden of Hart House.
- (20) Report of the Director of the Connaught Laboratories.
- (21) Statement regarding the Museum of Archaeology.
- (22) Statement regarding the Museum of Biology.
- (23) Statement regarding the Museum of Geology.
- (24) Statement regarding the Museum of Mineralogy.
- (25) Statement regarding the Museum of Palaeontology.

(1) REPORT OF THE PRINCIPAL OF UNIVERSITY COLLEGE

(*Professor M. W. Wallace, M.A., Ph.D.*)

I have the honour to submit my annual report as Principal of the College.

I regret that I have to record the death of Professor H. S. McKellar of the department of French on April 11th last. He had been seriously ill for more than a year but continued to meet his classes intermittently until within a few months of his death. Professor McKellar was one of the most efficient teachers on the college staff. After graduating from University College in 1893 he taught for many years in the Collegiate Institutes of Owen Sound and London, before his appointment to the French staff of the college in 1917. He was untiring in his devotion to the interests of his students and of the wider interests of the college, and his death has called forth the deepest sympathy of all his colleagues for Mrs. McKellar and his son and daughter.

Professor G. H. Needler has reached the age of retirement and relinquishes his position as head of the department of German. After graduating from University College in 1886 Professor Needler spent several years of graduate study in Germany from which he returned in 1891 to accept an appointment as lecturer in German in his Alma Mater. Few graduates of the college have had such a long and continuous association with its work, and few have been able to render it more distinguished service. Apart from his leadership in all matters relating to German studies in Ontario, Professor Needler was widely known for his military services in the North-West Rebellion of 1885 and as Officer Commanding the Overseas Training Company of the University from 1916 to 1919. No one has given more intelligent attention to the problems of secondary education in Ontario. He retires with the good-will and admiration of a host of friends.

Mrs. M. M. Kirkwood has resigned as assistant professor of English to become Principal of St. Hilda's College. For many years Mrs. Kirkwood has taken a major part in the life of the college both as Dean of Women and as a member of the department of English. In both fields she was eminently successful, and many of our women graduates will remember her unflinching kindness and helpfulness as an administrator quite as warmly as her power to inspire her students with a love of English literature. The whole staff of the college unite in their congratulations to Mrs. Kirkwood on her new appointment, and in their regret that once more we have been compelled to weaken our own forces in order to supply leadership to a sister institution.

It is a pleasure to record the appointment of Professor Barker Fairley as head of the department of German. Professor Fairley is one of the most distinguished scholars in the whole field of German studies, and the prospect of his return to University College has given great pleasure to all his former colleagues. The University of Manchester has just conferred upon him the degree of M.A.

The Governors have finally disposed of the question of free tuition for students holding college scholarships by cancelling all free tuition for scholarships won in course, but granting free tuition to all holders of matriculation scholarships. In other words matriculation scholarships which are worth \$125 or more carry free tuition for the first year, and thereafter as long as the holder wins first class honours; scholarships of smaller value (\$100 or \$75) carry an allowance of \$100 or \$75 on the cost of tuition in each year. Accordingly we are now able to offer thirty-one matriculation scholarships ranging in cash value from \$300 down, the great majority of which carry complete free tuition. It is a magnificent provision for able students entering on a university course who need financial assistance. On the other hand the loss of free tuition for scholarships won in course makes it highly desirable that we secure further funds for the encouragement of those students who are of first-rate calibre but who have entered college without matriculation scholarships. Fortunately our bursaries allow us to give very substantial assistance to such students.

During the session the college has received the following gifts:

- (a) From Mr. Frank L. Bastedo ('09) of Regina the sum of \$500 for the establishment of the Alma Anderson Bastedo Prize in memory of his wife, the prize to be awarded to the student who stands first in English in the third year of the Moderns course.
- (b) From the Hollywood Theatre a renewal of the prize of \$50 in oral French which was also given last year.
- (c) From Dr. D. B. Macdonald, Chairman of the Board of Governors, a framed photograph of the University Commission of 1906.
- (d) From General Fotheringham, a framed photograph of the University College class in Classics of 1883.
- (e) From the Women's Undergraduate Association, \$60 for the purchase of an urn for the Women's Union.
- (f) From Miss Edith Cousins \$10 for the purchase of a tray for the Women's Union.
- (g) From Professor G. H. Needler a number of volumes on German literature for the Whitney Hall Library and also for the Women's Union Library.

The Alexander Lectures were delivered by Professor F. B. Snyder, Professor of English and Dean of the Graduate School in Northwestern University. The subject was *Robert Burns—His Personality; His Reputation; His Art*. Professor Snyder's biography of Burns is the most detailed and scholarly that has yet appeared, and his lectures delighted the large audiences that filled Hart House Theatre. They have been published by the University Press and immediately met with a wide-spread demand. Next year we expect the lectures to be given by Professor Nicol Smith of the University of Oxford.

The Public Lectures series of the year was opened by a course of four lectures on *Cartesian Thought* given by our distinguished colleague, Professor Etienne Gilson of the Institute of Mediaeval Studies. Professor Brett followed with two lectures on *Characteristics of Modern Thought*. Then came five lectures analysing modern tendencies or trends in social science, economics, international relations, political thought and jurisprudence respectively, delivered by Professors Urwick, Bladen, Norman Mackenzie, Brady and Auld. The experiment of providing a number of afternoon public lectures which graduates and friends of the college are invited to attend has become a fixed feature of our academic year.

For the third year in succession the college has been honoured by having one of its members appointed to a Rhodes Scholarship. The present recipient is Mr. J. E. L. Graham who came to us from Saskatchewan, and who has led the course in political science in each of his four undergraduate years. Mr. Saul Rae, who has had a parallel record in sociology, and who during his fourth year was President of the Literary and Athletic Society, has been appointed to the Massey Fellowship. We welcome these honours as confirmatory evidence that the college remembers its primary function—the development of intellectual capacity in its members.

(2) REPORT OF THE DEAN OF THE FACULTY OF MEDICINE

(J. G. FitzGerald, M.D., LL.D.)

This communication is a resumé of certain of the activities of the Faculty of Medicine during the forty-ninth session which closed on June 30th, 1936. It contains also reports from eighteen academic departments, an outline of the work of the medical art service, notes from the Secretary's Office and accounts of some of the extra-curricular student undertakings.

Certain questions have, during the past two or three years, occupied much time of various committees of the faculty. These have included among many others discussions of methods of improving the present courses of study; the development of a satisfactory and acceptable method of bringing about the limitation of undergraduate registration; means whereby bursaries and scholarships for most deserving

students may be increased in number and value: what may be done to stimulate and increase the interest of students in the libraries of the University; steps which will lead (it is hoped) to still further integration of teaching and the lowering of departmental barriers and greater, all-round emphasis on the teaching of preventive principles and methods in many of the laboratory and clinical departments. The most interesting and possibly most promising effort to bring about improvement in teaching arrangements and methods has taken place in the department of surgery. With the reorganisation of the surgical services at the Toronto Western Hospital, the appointment of Dr. T. A. J. Duff as surgeon-in-chief as well as six other surgeons (four of whom have already held university appointments), plans have now been completed there to provide for clinical teaching in surgery for sixth, fifth and fourth year students. This is a most satisfactory conclusion reached after much effort. These additional facilities, too, obviate the necessity of assigning certain sixth year groups to the Hospital for Sick Children, an arrangement never regarded as satisfactory because it meant that such students were not afforded suitable opportunities for the study of surgical conditions occurring in adults. Clinical instruction for all fifth year students will, however, be given at the Hospital for Sick Children.

In the departments of surgery and obstetrics and gynaecology dissatisfaction with existing opportunities for clinical teaching has led, this year, to determined efforts designed to improve matters. In surgery the students have been assigned regular hospital duties under interne direction. The experiment, however, has been only partially successful owing to existing lecture schedules. To ascertain, if possible, whether a limited amount of summer clinical teaching in surgery for a group of twelve students could be given satisfactorily, an experiment is being made during the months of June, July and August, 1936. Three students have been attached to each surgical division at the Toronto General Hospital and one to a similar division at St. Michael's Hospital. The opportunities for much more satisfactory preparation of the students in surgery appear to exist and much is hoped for from this effort. At the end of the three months period these twelve students who have volunteered and been admitted to the course will be given a clinical examination in surgery. If successful they will not be required to undergo a further clinical test in the subject at the close of the sixth year. A similar experiment is to be made by the department of obstetrics and gynaecology with a view to improving the clinical instruction in obstetrics. This is exceedingly important because of the place this subject should occupy in the medical curriculum.

A proposal emanating from the department of surgery looking to the extension of the final year from thirty to forty-eight weeks has been discussed in a preliminary fashion in the Committee on Curriculum and Examinations and is likely to receive further study and consideration. There is little doubt that the present break between fifth and sixth years when students should be (and many are, in an unorganised fashion) deeply engrossed in clinical studies, might well be superseded by some more suitable arrangement.

The unfortunate overcrowding, resulting from the admission of too large a number of undergraduates in the first year, continues. The observations made by two of my colleagues in reference to this question may be cited. Professor W. E. Gallie writes: "Each year I bring to your attention the calamitous effect of the constantly increasing numbers of our students on the quality of our teaching. I have no thought that it is the function of the Medical School to attempt to teach the art of surgery to undergraduate students, but it is becoming increasingly difficult, owing to the numbers, to teach them the bare essentials that are necessary for general practice. Besides interfering with the quality of our clinical teaching, the number of students is creating a nuisance in the hospitals. . . . We simply must find a way to limit the number of students coming into the clinical years". With that view I am in complete and entire agreement.

It might not be so serious if our students were of such quality that medical science and the community would likely suffer were some of them not afforded a

medical education (at least in this University). To allay any apprehension which might arise on those grounds I may quote from the report of one other colleague, Professor J. C. B. Grant, who states: "Our best students are excellent; our poorest students are numerous and extremely poor". The number of those who every session are "repeating" confirms this observation. The situation is one which should be remedied and in this report I desire once again to make a plea for limitation in the number of students admitted to classes in this faculty.

Attention was last year directed to the commendable action of the undergraduate Medical Society in again donating the surplus on operations of the society to the Board of Governors to provide modest bursaries for worthy students in need of financial assistance. The Medical Society contribution to which was added a sum provided by the Board of Governors, made possible the award of thirty-seven bursaries in all. These ranged in value from fifty to one hundred dollars. This most admirable arrangement is unique in this University and those undergraduates in medicine who are responsible are to be congratulated upon the wisdom they have shown in this connection. The thanks and appreciation of the Faculty are hereby tendered to the Medical Society.

Bursaries and scholarships and suitable criteria for admission to this faculty may some day mean that no boy or girl in this province who is a worthy candidate for a place in the profession of medicine will be denied admission or be unable to proceed with medical studies for economic reasons. State scholarships as well as those founded by private benefactors would hasten the arrival of that day. From the standpoint of the community as well as that of the profession it is a consummation devoutly to be desired.

The teaching of preventive medicine is not the responsibility of any single department in this faculty. Those which contribute largely to the present plan of instruction include: Hygiene and preventive medicine, medicine, paediatrics, psychiatry, obstetrics, physiology. Then too, the departments of the School of Hygiene and Connaught Laboratories also participate in the preparation of the undergraduate in public health and preventive medicine. While further progress can still be made it is not too much to claim that in this University the medical student has almost unique opportunities for becoming acquainted with the principles and methods of preventive medicine and with the opportunities which exist for the practice of preventive as well as of curative medicine. This year, as well, students in the fifth year during their field course have learned something of the social resources of the community. For this we are indebted to Miss Margaret Gould of the Child Welfare Council and to Miss Frieda Held, M.A., Assistant Deputy Minister of Labor.

This faculty in October had the pleasure of entertaining those who attended the annual meeting of the Association of American Medical Colleges. This was the first occasion upon which the Association has met in Toronto. Interesting and valuable discussions of various topics combined with the opportunity afforded of informal discussions of teaching problems between sessions and the social intercourse rendered possible by the assembly of representatives of eighty universities in the United States and Canada made the occasion altogether noteworthy. It was a source of great pleasure and gratification to his colleagues in this faculty when Dr. E. Stanley Ryerson, assistant dean and secretary, was named president-elect of the association for the next year.

In November 1935 representatives of the Council on Medical Education and Hospitals of the American Medical Association and of the Association of American Medical Colleges visited departments of the Faculty of Medicine and the teaching hospitals. This was really a survey of the present facilities and organisation of this faculty as a part of a study of medical education in all so-called "Grade A" schools in the United States and Canada. The reports of this enquiry will be compiled and arranged by Dr. H. G. Weiskotten, Dean of the School of Medicine of Syracuse University, who has served as director of the study. Dr. Ryerson assisted in the survey of a number of medical schools both in Canada and the United States. Such

periodical enquiries into the existing status of medical education, the scrutiny of methods of instruction and the organisation of courses of study, glimpses of the physical plant and equipment, and finally, careful consideration of the resources of each school in research and teaching personnel, undoubtedly serve many useful purposes. Complacency and satisfaction with present accomplishments are more than likely to be disturbed by visits from colleagues whose business it is to point out our shortcomings and inadequacies both in plans and methods.

In 1935 the College of Physicians and Surgeons of Ontario ceased to conduct examinations. The certificate of the Medical Council of Canada indicating that the candidate for registration has passed the examinations conducted by the Council is now accepted by the College as completing its requirements. Reference to this forward step has already been made. This year the College has raised the entrance requirements for registration as a medical student to conform to those of the universities in Ontario. Now remains the development and adoption of a plan acceptable to the Council, the College and the universities in this province whereby university degree and certificate and licensure may be obtained by passing one not two sets of examinations.

The undergraduate Medical Society has for many years past published a very creditable "Medical Journal". The editorial direction and business management are entirely in the hands of members of the Society. A member of the Faculty of Medicine serves in an advisory capacity to the editorial board. Thus far subscription to the Journal has been voluntary upon the part of medical undergraduates. This year the Society, having revised its constitution with the overwhelming approval of members of the Society, the Faculty of Medicine and the Board of Governors, gave approval to new constitution. This provides for an increase in the membership fee from three to four dollars. This fee will cover free subscription to the "Medical Journal" in addition to other privileges of membership heretofore enjoyed. It is anticipated that in future years any surplus on operation of the Society will be contributed to the Bursary Fund to which reference has already been made.

This session, Lister Day fell on Sunday and in consequence the ninth Donald C. Balfour Lecture in Surgery was delivered on Monday, April 6th. The lecturer was Dr. Melvin S. Henderson of the Mayo Clinic, Rochester, Minnesota. The title of the address was "Orthopaedic Surgery, an Historical Review". Dr. D. E. Robertson, a classmate of Dr. Henderson, moved the vote of thanks, upon conclusion of an interesting address. A few days thereafter Dr. Robertson was one of the victims of a mine cave-in and for ten days his colleagues shared with his relatives and literally thousands of friends and well-wishers not only in North America but in all parts of the world the gravest anxiety as to his survival. To the profound thankfulness and gratification of all, Dr. Robertson's life was spared and his colleagues rejoice that he has been enabled to continue the splendid service he has for long years rendered to mankind and very especially to crippled children.

His Honour the Lieutenant-Governor once again placed the Faculty of Medicine under a debt of gratitude by graciously entertaining for the Donald C. Balfour lecturer, the President of the University, a number of members of the Senate, heads of departments and others. His Honour also attended the Lister Day celebration.

Very successful post-graduate courses have been given during the session. Those provided by the departments of surgery and paediatrics were conspicuously successful and largely attended. In the past year members of the Faculty of Medicine to the number of sixty have participated in the extra-mural post-graduate medical meetings held under the auspices of the Ontario Medical Association. One hundred and sixty lectures in all were given. It is perhaps not generally realised the extent to which members of this faculty participate in such post-graduate work. The task of maintaining a high level of professional competence among members of the medical profession in the constituency served by this University is fully appreciated.

The Charles Mickle Fellowship, "awarded annually to that member of the medical profession who is considered by the Faculty of Medicine to have done most

during the preceding ten years to advance sound knowledge of a practical kind in medical art or science", has this year been given to Dr. Donald D. VanSlyke of the Rockefeller Institute for Medical Research for his work on methods of blood analysis and gasometric microanalysis, also for his work on respiratory and renal functions, on diabetes and nephritis, and in general, for his investigations in the field of quantitative clinical chemistry. The Ellen Mickle Fellowship has been awarded to Omand M. Solandt, M.A., B.Sc.(Med.). Dr. Solandt further distinguished himself by winning the Faculty Gold Medal, the Chappell Prize in Clinical Medicine, the William John Hendry Memorial Scholarship in Obstetrics and Gynaecology, the Ontario Medical Association Prize in Preventive Medicine, the Canadian Medical Institute Prize and the David Dunlap Memorial Scholarship in Psychology. A notable record.

The John Copp Bursary to which brief reference has previously been made was established in memory of the late John Copp. The purpose of the bursary is the advancement of medical education in the University of Toronto. The income from the trust is awarded to the student in this University who is eligible for admission to the fourth year. The award is made upon the recommendation of a committee which takes into account, in making a recommendation, the character, athletic ability, scholarship and general interests of those nominated, so that "the holder of the bursary should possess those qualities and attain a high standard in each, but in no one to the exclusion of the others; the holder to have qualities and attainments as much like the late John Copp as possible". It is further stipulated that while the recipient of the bursary must be a good student it is clearly understood that the other characteristics mentioned above as well as scholastic attainment must be possessed by the person recommended for the award. The nominee in 1935 was Mr. M. F. Williams, president of the fourth year class, and in June 1936, Mr. C. Cameron Gray was awarded this bursary. Two very worthy recipients.

To Dr. E. Stanley Ryerson has come election to the office of President of the Association of American Medical Colleges. Dr. H. C. Parsons has been made a Fellow of the Royal College of Physicians of London. A similar honour has come to Sir Frederick Banting. Dr. K. G. McKenzie has been elected President of the Harvey Cushing Society. Dr. M. M. Crawford has been appointed physician to the Canadian Olympic team to visit Berlin in August 1936. The Dean of the Faculty was reappointed a Scientific Director of the International Health Division of the Rockefeller Foundation for a three-year period. He has also been made a member of the Permanent Commission on Biological Standardisation of the Health Organisation of the League of Nations. The Rockefeller Foundation has invited him, also, to undertake for a period of one year from the middle of September 1935 a study of the methods at present employed in the teaching of preventive medicine in medical schools in the United States, Canada, the British Isles and Europe.

Sir Frederick Banting, Professor C. H. Best, Dr. W. R. Campbell, Dr. E. T. Waters, among others, attended sessions of the International Physiological Congress in Leningrad in August 1935. Professor Best spent the month of February as guest lecturer in Physiology at Yale University. The Morris Herzstein Lectures at Stanford University Medical School were delivered in San Francisco in March by the Dean of the Faculty. Dr. E. S. Ryerson attended the meetings of the Congress on Medical Education held in Chicago in March, and Dr. J. H. Elliott attended the Tenth International Congress on the History of Medicine in Madrid and Toledo in the autumn of last year. Dr. D. T. Fraser delivered a DeLamar Lecture at the School of Public Health, Johns Hopkins University, in April 1936.

The members of the Faculty of Medicine deeply regret the loss by death during the year of Dean F. B. Allan, for many years a most valuable and helpful colleague held in the highest esteem by all. They most deeply mourn also the loss of a former colleague and friend, Sir John McLennan, for many years a highly valued member of this faculty. The death of Dr. Graham Chambers, for a lengthy period a clinical teacher in the department of medicine, is sincerely regretted. The passing of Dean

Secombe of the sister Faculty of Dentistry during this session was the occasion of sorrow to his colleagues in this faculty. The death of Professor I. V. Pavlov, world famous physiologist and Charles Mickle Fellow in 1921, is here recorded with regret.

Dr. F. A. Clarkson retires this year as assistant professor of medicine. He carries with him into retirement the thanks and best wishes of the Faculty of Medicine. Dr. C. B. Weld has resigned his appointment as assistant professor of physiology upon his appointment to the chair of physiology in Dalhousie University. Dr. Weld has been a valued member of this University for several years past and sincere thanks for splendid service and every good wish for success in his new field are hereby extended to him. Dr. James Wood has resigned as demonstrator in surgery, Dr. J. C. Calhoun and Dr. M. B. Whyte as senior and junior demonstrator respectively in oto-laryngology. To all three gentlemen it is desired to express warm thanks for the services which they have given to the University. Dr. J. G. FitzGerald has resigned as Dean of the Faculty of Medicine, and Dr. W. E. Gallie has been appointed by the Board of Governors to serve as Dean for a three-year period from July first 1936.

(3) REPORT OF THE DEAN OF THE FACULTY OF APPLIED SCIENCE AND ENGINEERING

(C. H. Mitchell, CB., C.M.G., C.E., D.Eng.)

Again a most satisfactory report can be made with regard to the academic work in the Faculty of Applied Science and Engineering. The session 1935-36 may be regarded as a highly successful year, both in the undergraduate and graduate portions of the faculty work, as well as in the research achievements carried out by the School of Engineering Research.

The standard of work in the various departments of the Faculty, as performed by both staff and students, has been of a high order. It is observable that the marked application, interest and painstaking attention to their work by the members of the staff of all grades, has inspired a conspicuous reaction on the part of the students. Such a result is highly gratifying and is especially commendable in academic work in the realm of applied science education. One factor contributing to this is the manner in which members of the staff keep in touch with engineering projects both directly by their own professional activities and indirectly by keeping themselves informed of engineering progress in its ever changing features and applications.

The students on their part have continued to take a serious and earnest interest in their academic work while, at the same time, engaging in the many university and outside professional activities for which the students of this faculty are notable. This combined interest, encouraged as it is by the staff, has a most desirable effect in binding more closely staff, students, graduates, and the profession generally. Where, as in this case, a profession bears a direct relation to the material progress and development of the country, such co-operation is greatly to be desired and enables a university, with its alumni, to exert considerable direction and no small influence in the upbuilding of a young country like Canada.

The continued attendance of students in large numbers in this faculty demands renewed attention. As each year goes by in this recent cycle of depression and recovery, it is quite evident, if attendance at an engineering faculty in this country can be, as it is, a barometer of conditions, that the thinking people believe Canada is approaching a fresh advance in its development. In this I personally believe, because all the signs of reaction from the depression point that way. The reasons are more definitely apparent as we go through our annual stocktaking at each new year. For these same reasons I believe Canada will still continue to require engineers and applied scientists in large numbers for some years to come and even in increasing numbers. For these reasons, too, I am of opinion that the in-flow of students preparing themselves for such a key profession should not be discouraged.

It is of interest in these respects to observe the varying numbers of students in attendance in Applied Science in this University during the past fourteen years. It is of especial interest to note that in the past six years the attendance, while having reached a peak in 1932-33 and having naturally somewhat fallen off during the depression, still continues at a high figure, greater than during the first eight years of the fourteen year period, the slight decline in the past three years being quite out of line with what might have been expected during the severe depression we have just passed through. Further, it should be observed that the increasing numbers of the incoming first years has become quite marked the past two years. All this significantly indicates the estimate which the people of Ontario and Canada generally make of the engineering prospects of the country in having their sons obtain an applied science education. To illustrate the foregoing observations, the following table of attendances will be of interest:

ATTENDANCE IN FACULTY OF APPLIED SCIENCE

	<i>Years</i>					<i>Total Attendance</i>
	I	II	III	IV	V	
1922-23.....	139	167	182	265	—	743
1923-24.....	125	127	150	165	—	567
1924-25.....	116	121	113	138	—	488
1925-26.....	126	107	119	93	—	445
1926-27.....	163	110	110	104	—	487
1927-28.....	192	149	109	100	—	550
1928-29.....	204	165	131	100	—	600
1929-30.....	276	158	150	117	—	701
1930-31.....	329	231	151	139	—	850
1931-32.....	281	286	175	139	—	881
1932-33.....	265	250	236	157	6	914
1933-34.....	226	238	203	207	9	883
1934-35.....	221	189	198	179	8	795
1935-36.....	248	175	160	176	7	766

The foregoing table, however, indicates only the general situation with respect to the total numbers in the faculty year by year. An analysis of the figures by departments in the general fields of engineering, presents quite a different picture. The varying numbers in the fields of civil, mechanical, electrical, mining, metallurgical, and chemical engineering, and architecture, give considerable food for thought. I have, at various times the past few years, drawn attention to these, more especially pointing out the wide swings by which, either by popularity, fashion or considered judgment, incoming students have refrained from entering some departments and have crowded into others. Examples of these, at the present time, at opposite ends of the scale, are those of civil engineering and chemical engineering.

In recent years the number of students entering civil engineering has notably decreased, although there is now discernible a definite swing upwards. The downward swing has continued too long and despite the view oftentimes expressed the past five or six years, that this branch has a restricted future, the cumulative effect is apparent that we have been educating too few civil engineers. This cannot quickly right itself, although it is now slowly doing so. It is quite evident that, with returning prosperity and construction activity, we will be faced in this country with a shortage of young civil engineers in the course of the next three or four years.

On the other hand, the situation in the field of chemical engineering is the reverse. We have observed a rapidly increasing number of students entering this branch of the profession. The swing, moreover, seems to be continuing as evidenced by the increasing numbers of students entering the first year the past few years. Up to a certain point this increase should not have been discouraged as the country can now absorb a great many more chemically trained graduates for its varied industries than it could, say ten years ago. That the reasonable proportion has now been passed, is indicated by the numbers recently in the first year of this department,

viz.:—68 in 1932, 80 in 1933, 81 in 1934, and 82 in 1935, because these have composed 24%, 30%, 36%, and 37% of the total number of students in the first years of those respective sessions.

The disturbing feature of this rapidly increasing registration in chemical engineering, so far as our instructional capabilities are concerned, lies in the inadequate facilities at our disposal in both accommodation and equipment for efficiently providing for such large numbers of students in this department. In this regard I can only repeat the plea I have continuously put forward the past six years or more, urging greatly needed increased accommodation necessary for even a portion of those now seeking an education in chemical engineering. Even if the present large numbers were decreased by thirty per cent, we would still be quite inadequately served by our present facilities.

A notable feature of the past session has been the observance of the fiftieth anniversary of the founding of the Engineering Society, the students' organisation in this faculty. This Society was primarily founded to form an adjunct to the academic work of the faculty in the early days when it was the School of Practical Science. This object has carefully been kept in mind as the faculty has continued to encourage the Society in its functions of presenting to the student body papers and addresses by prominent engineers and others, directing student activities and representing the faculty as a whole in general university affairs. The students are again to be congratulated on the excellent manner they have carried these out and especially on the successful anniversary and reunion they brought about, thus enlisting the interest and attention of the graduates and binding them more closely to the University and its general interests.

Although again provided with but a very small appropriation, the School of Engineering Research has carried on through the year with those researches which were considered to be most urgent. Some of these were continuations of ones previously undertaken and several were new ones in fields and on subjects which are pressing for consideration. The difficult problem in laying down a research programme at this time, is to decide what are the most urgent subjects for research having regard to the financial stringency. The members of the staff of the faculty are to be complimented upon the attention and the interest they have given to pressing researches under these conditions, when funds for assistance and necessary equipment are so limited. A full report of the subjects and objects of research and the progress that has been made during the session, is being forwarded by the Committee of Management of the School of Engineering Research.

It is with very much regret we have to face the retirement of Professor T. R. Rosebrugh, professor of electrical engineering and head of the department. On reaching the retiring age limit, we realise Professor Rosebrugh has been a member of this staff for forty-seven years and his valuable and diligent service in his instructional work, his sound administrative ability, his thorough scholarship and his unending help to the graduates and the profession will long be remembered.

(4) REPORT OF THE DEAN OF THE ONTARIO COLLEGE OF EDUCATION

(*Dr. J. G. Althouse*)

The registration of the session 1935-36 was lower than that of 1934-35. Inclusive of the extramural students, the total number registered in the courses for teachers was 774 as against 930 in 1934-35. The most marked decrease is seen in the High School Assistants' course. It is interesting to note that the proportion of those seeking specialist standing has increased.

Some noteworthy changes have occurred in the work of the College. Continuous practice-teaching was introduced in the second term of the session. Professor Griffith Taylor inaugurated a special course of lectures in cultural geography.

The registration in the librarians' course was 55 and the demand for trained librarians for the public and special libraries of Ontario was relatively satisfactory. The Senate of the University has met the demand for the recognition of the courses offered by the Library School by establishing a course leading to the degree of Bachelor of Library Science. This course will be offered for the first time in 1936-37. The diploma course for those entering the Library School without previous graduation from a recognised University will be continued.

Dr. Sandiford, director of the department of educational research, was absent on leave at Stanford University from January 1st. and Dr. J. A. Long was acting director. Dr. W. Line of the department of psychology of the University assisted in the course in science of education in the College of Education. During the session, the department of educational research published two bulletins, completed the study of the financial support of the schools of the province, and began the study of the prognostic value of the marks in practice-teaching obtained by the teachers-in-training. This study has been undertaken through the generosity of the Carnegie Corporation, which has approved the application for this purpose of the balance of the grant originally made for language study. Dr. M. A. Cameron, assistant professor of educational research, will conduct the study.

Dr. Michael West, professor in the department of educational research, who was on leave for the 1934-35 session, resigned in order to undertake an investigation in basic English for the Carnegie Corporation.

(5) REPORT OF THE SECRETARY OF THE FACULTY OF HOUSEHOLD SCIENCE

(Professor C. C. Benson, Ph.D.)

Satisfactory progress has been made during the year, with a slight increase in registration from 45 to 53 for total registration in all years. This is chiefly due to the larger number of students who have come to us from Macdonald Institute. There have been 23 of these students with us this year, three in the fourth year, eight in the third year of the specialist course, and twelve in the pass course of that year, and in general their work has been satisfactory.

Like some others of Macdonald students of recent years, several of them have, however, experienced difficulty with the courses in chemistry, and a meeting was held during the year when means of lessening this difficulty were discussed. Dr. Christie, with three of the staff from Guelph, came here for this meeting; certain adjustments are already being made, and it is planned to hold similar meetings in the future, with the hope of properly fitting courses at Guelph and those given here.

There have been several changes of staff in the Faculty. Miss Charlotte Valentine, M.A., assistant professor of household science, retired last spring to be married, and Miss Edna Park, M.A., was promoted to the assistant professorship, with Miss Jessie Roberts, M.A., M.Sc., coming to us as lecturer in household science to carry on Professor Valentine's special work.

The most serious change, however, is the retirement of Professor Laird, who is resigning from the direction of the department of household science after twenty-five years of whole-hearted and faithful service. During this time she has established a strong department, and has had a large share in training graduates who are now doing good work as dietitians, teachers of household science, or as heads of their own households. The loyal affection of the graduates in household science—from this Faculty and from the department of household economics in the Faculty of Arts—was shown in their gift of her portrait to the University, and well expressed at the large gathering of these graduates who met to do honour to her at the time of the presentation.

(6) REPORT OF THE DEAN OF THE FACULTY OF FORESTRY

(*Dr. C. D. Howe*)

The enrolment in the Faculty of Forestry continues to decrease. This year, thirty-seven students were in attendance compared with fifty-two in the previous year. The entrance class of this year was not large enough to overcome the diminution caused by the removal of twenty-two students in the graduating class of '35, the largest graduating class in the history of the Faculty. The reduction in attendance is undoubtedly due to political and economic causes. The displacing of trained men in the administration of the fire protection staff and the complete cessation of forest investigative work in Ontario close for the time being one half the field of employment for our graduates. The plea that this has been done on the basis of economy is quite plausible but in the long run it will cost the people of the province much more than will be saved. The use of untrained men and the reversion to primitive methods in fire protection may seem apparently justified in wet seasons but will lay the country open to widespread destruction of life and property in the extremely dry seasons which occur periodically. The abandonment of forest research work means delay in the development of measures eventually to place our forests on a continuous production basis and thus places in jeopardy the future prosperity of wood-using industries.

The two principal fields of employment now left open to our men are the pulp and paper industry and the Dominion Forest Service. The former took seven of the fourteen of this year's graduates and the latter three. One went to the Dominion Entomological Branch and one to the wood using department of an agricultural implement manufactory. Thus eighty-five per cent of the graduates have found employment and practically all of them were assured positions before they were actually graduated. This latter is something that has not happened since the depression began. The three following classes will probably average not more than eight at the time of graduation, so even if the conditions of employment are no better in the immediately following years, we will not have enough men to meet the demand. As soon as this fact is publicly known our enrolment will undoubtedly increase.

Since it is probable that most of our men will go to private industries for the next few years at least, we have rearranged our practice camp so as to give the students a more intensive training in woods work. Instead of six weeks at the beginning of the fourth year the practice camp work hereafter will be given for three weeks at the end of the first, second, and third years. The site of the camp has been transferred from Algonquin Park to a more accessible area in Haliburton county. It also has a greater variety of forest conditions. The area is being carefully studied and surveyed from the standpoint of a permanent location.

(7) REPORT OF THE DEAN OF THE FACULTY OF MUSIC

(*Sir Ernest MacMillan*)

During the session 1935-1936 the number of students registered was 40, in the course leading to the degree of Bachelor of Music; 10 registered in the first year, 16 in the second year and 14 in the third year. The degree of Bachelor of Music was conferred on four, and the degree of Doctor of Music on three candidates.

The usual series of lectures have been given by members of the Faculty, and 9 students have been registered for special tutorial classes.

Six organ recitals were given during the season in Convocation Hall, arranged by Dr. Healey Willan, four of which programmes were played by Dr. Willan, and the other two by Mr. D'Alton McLaughlin and Mr. Frederick Silvester respectively. At the second of these organ recitals Dr. Willan was assisted by Mr. George Lambert (baritone) and the choir of the Church of St. Mary Magdalene.

The Conservatory Choir has appeared twice in Convocation Hall in performances of Handel's "Messiah" and Bach's "Saint Matthew Passion" on February 29th and April 7th respectively, and has also sung Brahms' "Requiem" and Beethoven's "Choral Symphony" in Massey Hall with the Toronto Symphony Orchestra. The Conservatory Orchestra, under the direction of Mr. Ettore Mazzoleni, gave a concert in Convocation Hall in January and appeared twice in Massey Hall during the spring. Other Conservatory organisations, notably the Conservatory String Quartet, have made valuable contributions to the musical season in Toronto.

The musical activities of Hart House have continued to hold the interest of the students. The progress made during the last season by the Hart House Glee Club under Mr. (now Dr.) Charles Peaker has been noteworthy. A valuable contribution to the musical life of the University has been made by the Hart House String Quartet in its special series of students' concerts in Convocation Hall. The Carillon recitals given in the Memorial Tower by Mr. J. L. Richardson are as always a popular feature of the musical life of the University.

The Toronto Conservatory of Music celebrates this year the fiftieth anniversary of its incorporation, although it was not actually opened until 1887. The first function connected with this event took the form of a Jubilee Reunion in March under the auspices of the Conservatory Alumni Association. This was followed by a Jubilee Concert in Massey Hall on April 27th and additional functions have been arranged for the autumn. Historical data regarding the Conservatory has been collected by Dr. Horwood who has also prepared a short historical record which appears in the Year Book for 1936-37.

The Conservatory will greatly miss the active help of Miss Marion Ferguson, who has been registrar since its foundation, and who is retiring this year. Miss Ferguson has devoted her life to the building up of the institution; her quiet efficiency, kindness and tact have made for her thousands of friends throughout Canada.

The vice-principal, Dr. Healey Willan, after an unbroken record of twenty-three years' service with the Conservatory, is being given a year's leave of absence, and will devote himself chiefly to composition. Mr. Norman Wilks will fill the office of executive assistant to the principal, and minor re-adjustments will be made in the administrative staff.

The Conservatory has been fortunate in securing the active co-operation of so many outstanding men to serve on its board. Last autumn, Colonel F. H. Deacon consented to accept the post of chairman, left vacant through the death of Sir Albert Gooderham, and with Mr. Floyd Chalmers as vice-chairman, heads a board whose courageous handling of the many problems which arise, promises to bear excellent fruit in the years to come. The untimely death of Mr. W. R. P. Parker removed from the Board one of its new members who, had he lived, would have doubtless proved a great source of strength to the institution.

The number of candidates entering for the examinations of the Toronto Conservatory of Music for the present season has been 14,109—as compared with 13,660 for the season 1934-35.

A proposal introduced into the Senate in March, to create a new honour Arts Course with music as one of the principal subjects, will be considered at length in the early autumn, and it is to be hoped that it will be established by the time the calendar for 1937-38 is issued. The claims of music to a prominent place in all educational schemes were never more fully recognised than they are to-day, and public interest is awake to the importance of the questions involved.

(8) REPORT OF THE DEAN OF THE SCHOOL OF GRADUATE STUDIES

(Professor G. S. Brett)

The number of students registered in the School of Graduate Studies for the year 1935-6 was 613. The number for the previous year was 614. Apparently the decrease noted in the report for 1934-5, which amounted to 100 or approximately 14 per cent, has not continued. The total enrolment for this year is practically identical with that of the previous year and the enrolment for the different degrees shows only minor fluctuations: the number of men enrolled as candidates for the M.A. increased by 16, the number of women candidates decreased by 18; the number of men candidates for D.Paed. increased by 15, the number of Women remaining unchanged; candidates for M.S.A. decreased from 13 to 4; for the other degrees the numbers varied very little. The total number of men increased from 438 to 452; the number of women decreased from 176 to 161.

The number of students resident in the Province of Ontario was 437, a decrease of 28; the number from Toronto was 257 (a decrease of 12); from the other parts of the Province 180 (a decrease of 16). (For details see p. 162.) The number of students from other Provinces of Canada was as follows:—Nova Scotia 21, New Brunswick 20, Prince Edward Island 4, Quebec 5, Manitoba 20, Saskatchewan 27, Alberta 11, British Columbia 16. These figures show no significant deviation from the previous year with the exception of the number from Saskatchewan which rose from 17 to 27. The number from other countries rose from 48 to 52, being composed as follows: 29 from the United States, 6 from England, 3 from India, 1 from Denmark, 2 from Japan, 3 from China, 1 from Germany, 1 from Ireland, 3 from British West Indies, 1 from Switzerland.

The number of institutions represented was 49. Out of the total number registered 176 held staff appointments (an increase of 11); 352 took their first degree at Toronto, 40 at Queen's, 39 at McMaster, 25 at Western Ontario.

The distribution of the candidates for the different degrees was as follows:—

Ph.D.	143
M.A.	156
M.S.	2
M.A.Sc.	11
C.E.	2
E.E.	2
D.Paed.	100
M.Sc.F.	2
M.Sc. (Dent.)	3
Mus. Doc.	3
M.S.A.	4

The distribution of the candidates according to their major subject was as follows:—Anatomy 1, applied mathematics 5, anthropology 3, astronomy 2, biochemistry 12, biology 24, botany 17, chemistry 41, chemical engineering 7, civil engineering 4, classics 23, dentistry 3, educational theory 3, English 62, epidemiology and biometrics 2, food chemistry 7, forestry 2, geology and palaeontology 9, Germanic languages and literature 10, history 27, household science 7, hygiene and preventive medicine 1, law 9, mathematics 12, mechanical engineering 3, mineralogy 5, mining engineering 3, music 3, pathology and bacteriology 7, pathological chemistry 5, pedagogy 100, philosophy 51, physics 29, physiology 14, physiological hygiene 1, political science 18, professional degrees 4, psychiatry 2, psychology 43, romance languages 16, semitic languages 9, surgery 2.

The number of students recommended for degrees this year was as follows:—

Ph.D.	36
M.A.	84
M.S.	1
M.A.Sc.	11
C.E.	2
E.E.	1
M.Sc.F.	2
Mus. Doc.	3
D.Paed.	2
M.Sc. (Dent.)	2
M.S.A.	1

Fellowships:—The Open Fellowships which are awarded by the Council of the School have for some years been four in number: two of these were given for a stated period of time: as one lapsed and the other was not definitely renewed before the end of the session, the Council made only two definite awards. These awards were made as follows:—

- G. J. Kane, B.A., British Columbia; department of English.
- M. D. Darrach, M.A. British Columbia; department of biochemistry.

Appointments to other fellowships made by the Council of the School were:—

- Alexander Mackenzie fellowships:—
- G. F. Butler, M.A. Dalhousie; department of history.
- A. Stewart, B.A. Western Ontario; department of political science.
- Ramsay Wright Scholarship:—
- W. B. Stallworthy, B.A. Toronto.
- McLennan award:—
- K. C. Mann, B.Sc. Saskatchewan, M.A.

Fellowships tenable in the School of Graduate Studies were awarded as follows:—

- War Memorial Fellowships:—
- William B. Spears, B.A. Western Ontario.
- S. A. Jennings, B.A.
- Maurice Cody Fellowship:—
- H. D. Woods, M.A. McGill.
- Leonard Fellowship:—
- C. T. Bissell, B.A.

The following members of the School of Graduate Studies obtained scholarships or fellowships for advanced study in other institutions:—

- Royal Society Fellowships:—
- H. N. Frye, B.A.
- T. A. Goudge, M.A.
- 1851 Exhibition:—
- A. D. Misener, M.A.
- S. L. Cohen, B.A., McM., Ph.D.

The Dean attended the annual meeting of the Association of American Universities held at Cornell University, November, 1935.

(9) REPORT OF THE DEAN OF THE FACULTY OF DENTISTRY

(*Arnold D. Mason. D.D.S.*)

During the year the different departments of the Faculty of Dentistry have progressed very harmoniously. The regrettable passing of Dean Wallace Seccombe shed a gloom over the whole Faculty as he was held in such high esteem and respect by every member of the staff. His death interrupted to some extent the activities of the Faculty but emergent adjustments were made as quickly as possible. Doctor

Secombe was a strong force in the development of dental education and the improvement of dental practice in Ontario, and even elsewhere, and my only hope is that I may build well on the fine structure he has erected.

The registration of students in the regular dental course was 192, an increase of 9 over last session. Three candidates enrolled for the B.Sc.(Dent.) degree, and one completed the requirements this year and was awarded the degree. Two graduates received the degree of M.Sc.(Dent.). Twenty young women were accepted for the course in Dental Nursing.

Fifteen dental graduates of other universities entered the final year and proceeded to the degree of Doctor of Dental Surgery. Of these 4 were from England, 11 from Australia and 1 from the United States. Three were graduates of Guy's Hospital and the others from the following universities: 1 Manchester, 5 Melbourne, 6 Sydney and 1 Marquette. Dean A. W. Lindsay, on furlough from West China Union University, spent the year at his *alma mater* on a study which qualified him for the degree of Master of Science in Dentistry.

Two post-graduate courses, each covering one week, were held in the subjects of oral surgery and anaesthesia, and in periodontology and radiodentia, and were attended by 18 dental practitioners from various points in Ontario, Nova Scotia and United States. These dentists felt that the instruction received would be of much value in their dental practice. No additional expense to the University was incurred by these courses.

Four other graduates, one from Calgary, Fredericton, Toronto and Ohio, attended for short refresher courses in orthodontia, ceramics and oral surgery. These men expressed their appreciation of the efforts of the Faculty and received considerable benefit from their instruction.

Through the generosity of the Board of the Royal College of Dental Surgeons of Ontario and in conjunction with the University, many members of the Faculty were able to carry the most recent methods to dental practitioners, even in remote parts of the province. This helps to keep the dentist in practice informed of new trends in dental thought and improve the standard of service rendered to the public. Thirty-seven meetings were held in twenty-one different centres under this extramural plan, and were addressed by fourteen members of the Faculty.

During the year many practitioners and students from other faculties have made use of the dental library in addition to the students of this Faculty, and it is a matter of but a short time until added facilities will be necessary to adequately house the books and museum specimens in possession of the department, as well as leave accommodation for reading.

This year the University for the first time granted the diploma in dental nursing. This will unify the arrangements for this course and is much appreciated by the Faculty.

The report of the Curriculum Survey Committee of the American Association of Dental Schools is being studied by the heads of departments and other members of the staff, and a comparison made with the curriculum of this Faculty. Some reports have already been submitted and changes that it is felt will improve the instruction to undergraduates are contemplated. The late Dean Secombe, who was Chairman of the Curriculum Survey Committee, was keenly interested in this survey and the report was published in book form just previous to his last illness. The report is being dealt with in accordance with the plans he proposed. At the annual meeting of the American Association of Dental Schools in March, I had the honour of being elected to the Survey Committee which is now proceeding with a study for the improvement of methods of teaching, development of graduate instruction and the training of dental teachers.

(10) REPORT OF THE DIRECTOR OF THE SCHOOL OF HYGIENE

(J. G. FitzGerald, M.D., LL.D.)

A decade has passed since this School was established in the University. To provide facilities for the teaching of preventive medicine and public health, to establish friendly and helpful relations with official and voluntary agencies in the fields of public health and social work, to maintain intimate and cordial co-operation with the Faculty of Medicine, to assume responsibilities with Connaught Laboratories for university activities not otherwise feasible, were some of the reasons why a School of Hygiene was organised.

From the first it has been recognised that graduate students from all parts of the Dominion of Canada and elsewhere should be offered courses leading to the degrees of doctor of philosophy and master of arts and the diploma in public health. Also it was an acknowledged responsibility of the School to organise and conduct suitable courses of instruction for undergraduates, medical and other, in this University. These activities required to be integrated with research and investigation. This is made possible through grants and otherwise, by Connaught Laboratories. Each year the departments of epidemiology and biometrics, of physiological hygiene and of chemistry in relation to hygiene receive from Connaught Laboratories substantial grants which make possible the investigation of problems of interest and importance. The academic staffs made up largely, but not exclusively, of Connaught Laboratories personnel, have also administrative responsibilities. They are thus investigators, teachers and administrators in the complete discharge of their duties.

No new courses of instruction have been developed during the session of 1935-36. Students to the number of 290 have been enrolled. These have consisted of:—

Graduate Students, 14 (of whom 10 were proceeding to the Diploma in Public Health).

Undergraduates:

Faculty of Medicine, fifth year.....	123
Faculty of Household Science, third and fourth years.....	27
Faculty of Arts, third year.....	35
Department of University Extension.....	42
School of Nursing.....	49

Students in the diploma in public health course, as has been the case in previous year, have come from many parts of Canada and from other countries. This year the Provinces of Manitoba (2), British Columbia (2), New Brunswick, Quebec (3), were represented and in addition there were one each from India and Jamaica. Of these medical graduates preparing themselves for whole-time work in the public health field, four held Rockefeller Foundation fellowships and five of them Connaught Laboratories fellowships. The student from India, a graduate of this University in medicine, was on leave of absence from the Indian Medical Service of which he is a member.

It is of interest to recall that a D. P. H. curriculum was first approved by the Senate in 1904. For many years no student applied for admission to the course. During the session of 1911-12, a medical graduate engaged in public health work petitioned to be permitted to proceed to the examinations leading to the diploma. Favourable consideration of the application and success in the subsequent examinations led to the first diploma being granted by this University in 1912. Since that year a total of 146 others have enrolled. Since the opening of the School of Hygiene building in 1927, no less than 97 students have obtained the diploma in public health. The great majority are engaged in public health work in Canada. More than 30 of them are so occupied in the Province of Quebec alone. They are medical graduates of the Universities of Laval and Montreal who have undertaken their graduate work here.

This year a second appointment to the Hastings Memorial Fellowship was made. A. E. Allin, B.A., M.D. of this University, was the recipient. Under the immediate direction of Professor D. T. Fraser in the department of hygiene and preventive medicine, Dr. Allin has well maintained the prestige of this fellowship established by his predecessor, Dr. A. H. Sellers, in the session 1932-33. Dr. Allin has explored several problems. The early fundamental work of Ehrlich on ricin has been repeated and extended. A study of the toxic action of that antigen and immunity thereto have been followed by the elaboration of new methods of assay for both toxin and antitoxin.

A study of sensitisation to diphtheria protein during an attack of diphtheria has also been investigated. That sensitisation does occur has been established by Dr. Allin and he has found, too, that sensitivity is the rule among diphtheria carriers. These results are interesting and important. An investigation of the response of macacus rhesus monkeys to diphtheria antigens has also been completed. Because of the limited number of animals studied this is to be regarded as preliminary to more extended work and leads already obtained render such desirable. Twenty-one monkeys in the group tested were found to have no natural antitoxin. Success was not obtained in infecting the monkey by the respiratory route. Further studies were made of the effect of cortin in guinea-pigs injected with diphtheria toxin and a method of determining blood volume in guinea-pigs by ascertaining the amount of diphtheria antitoxin in the circulation after passive immunisation by the intravenous injection of homologous antitoxin was elaborated.

The very great importance of access to well-organised, well-administered and adequately supported official and voluntary health and social agencies to both staff and students in a School of Hygiene has repeatedly been emphasized in previous reports. No School could be more fortunately or happily situated in these respects than is this School. Most intimate, friendly and mutually helpful relations exist between the Department of Health, Ontario, the Department of Public Health of the City of Toronto, and the School of Hygiene, University of Toronto. Similarly many other official and voluntary organisations in the public health field, social agencies, business organisations and private individuals have all been of the greatest possible assistance by permitting graduates and undergraduates to make observational visits. The staffs of such organisations have often contributed substantially to the success of visits by personal interest, and otherwise. This field work is now supervised by Dr. P. A. T. Sneath, to whom very great credit is due for the excellence of the arrangements maintained. Warm thanks and appreciation are here extended to all those who have made possible a clearer appreciation of the scope and nature of public health and preventive medicine in giving permission to staff and students of this School to enjoy quite unique facilities and opportunities of observation, study and investigation.

Few changes in personnel have taken place during the current session. Dr. Frieda H. Fraser has been promoted to an assistant professorship in hygiene and preventive medicine and Dr. James Craigie also has been made an assistant professor of epidemiology.

Details of investigations which have been carried on by members of the departments of the School who are also members of Connaught Laboratories staff or in receipt of research grants therefrom are to be found in the report of the Director of Connaught Laboratories.

It is a pleasure to record the fact that the School of Hygiene and Connaught Laboratories have had the joint opportunity and privilege of entertaining visitors from all parts of the Dominion of Canada and from many other countries. Guests from the United States of America, the British Isles, Argentina, Australia, Brazil, China, Esthonia, France, Germany, Holland, India, Japan, Mexico, Newfoundland, Norway, Peru and Switzerland were welcomed to the School of Hygiene during this session.

(11) REPORT OF THE LIBRARIAN

(W. S. Wallace, Esq., M.A.)

I beg to submit the following report of the work of the University Library for the year ending June 30, 1936:

The number of volumes added to the Library during the year has been 11,425, and the number of pamphlets, 8,676, making the total number of accessioned volumes in the Library 328,129, and the total number of pamphlets 127,275—or a grand total of 455,404 items.

The following are the statistics of the use of the Library by undergraduates, in comparison with previous years:

	1921-22	1926-27	1934-35	1935-36
Reading-room books.....	41,928	106,485	186,605	193,522
Overnight books.....	18,998	39,779	107,559	111,929
Week books.....	4,782	13,104	23,377	25,128
Totals	65,718	159,278	317,541	330,579

This represents an increase during the year of over 13,000 books handled, or an increase of approximately four per cent. At the professors' and graduates' register there has been a slight decrease, caused no doubt by the smaller registration in the School of Graduate Studies.

I append herewith a statement showing the total circulation in the library during recent year:

Total circulation	1926-27	1930-31	1934-35	1935-36
To undergraduates.....	159,278	231,759	317,541	330,579
To professors and graduates...	20,000	37,388	40,843	39,425
Totals	179,278	269,147	358,384	370,004

These figures are exclusive of books taken for consultation from the reference shelves, of which between twenty-two and twenty-three thousand have been replaced on the shelves by the library assistants during the year. They are, however, inclusive of interlibrary loans, of which 666 have been handled during the year, 461 being books lent by the University Library, and 205 books borrowed. An interesting feature of the interlibrary loan service is the increase in the number of photostats and bibliofilms received from other libraries in place of interlibrary loans of books.

I append also a statement showing the circulation in the medical, political science, University College, and law reading rooms, in comparison with last year:

	1934-35	1935-36	
<i>Medical reading-room:</i>	reading-room books.....	10,761	11,195
	over-night books.....	11,386	12,219
	week-books	3,606	3,622
	25,753	27,036	
<i>Political Science:</i>	reading-room books.....	12,567	11,208
	over-night books.....	6,890	6,338
	19,457	17,546	
<i>University College:</i>	reading-room books.....	33,325	30,746
	over-night books.....	17,943	16,466
	51,268	47,212	
<i>Law reading-room:</i>	reading-room books.....	8,822	15,585
	over-night books.....	2,870	4,368
	week books.....	251	524
	11,943	20,477	

The ravages caused by the steadily mounting circulation continues to be a problem. During the past year the binding and mending department has prepared for binding 2,855 volumes, has mended 2,524 volumes, and has put into pamphlet binders or boards 1,075 volumes.

I am glad to be able to report that the situation caused by the exorbitant cost of German scientific periodicals, combined with the unfavourable state of exchange between the Canadian dollar and the German mark, has been greatly improved by the action of the German publishers in making an all-round 25 p.c. reduction in their prices. This action was of course due largely to the pressure brought to bear on the German publishers by the American Library Association. As a result of it, the cost of periodicals in medicine, biology, chemistry, and other scientific subjects, has now abated, so that the cost of these periodicals no longer needs the total appropriation, and some funds are available for the purchase of monographs.

Unfortunately, no sooner has the library obtained relief from one quarter, than an equally serious drain on its resources has been imposed on it from another quarter. A year ago an Act was passed by the Canadian government removing from university purchases the exemption hitherto enjoyed from sales and excise taxes. This has meant that during the past year, in contravention of the long-established principle that books purchased for the University Library should be free from taxes, we have been compelled to pay a so-called excise tax of three per cent on books imported into Canada, as well as a sales tax of eight per cent on the binding done for the University Library by the University Press. I estimate that these taxes have diminished the purchasing power of the University Library during the past year by at least \$1,500. A particularly objectionable feature of the new regulations is that they do not even permit the introduction into Canada from the United States of interlibrary loans without the payment of the so-called excise tax. If, for example, the University of Toronto Library borrows from an American University Library a rare book valued for purposes of insurance at \$100, we are expected to pay a tax of \$3.00 on the book before it can be released from the customs, as well as having to pay carriage charges on the book both ways. If the Commissioner of Excise persists in his ruling that interlibrary loans are subject to excise tax, it will effectively put an end to all interlibrary loans from the United States—a serious state of affairs, when it is remembered that there are many scientific periodicals not to be found in any library in Canada. It is hoped, however, that joint action in regard to the matter will be taken by all the university and college librarians in Canada, and that relief may be obtained by a direct appeal to the Canadian government.

I wish again to bring to your attention the services rendered during the past year by my assistants in the University Library, under conditions which, with the continued increase in circulation, and the growing congestion in the stack-room, reading-rooms, and work-rooms in the Library, become yearly more difficult. In this connection, I should like to note also the retirement this year of Miss Helen Fairbairn, who has been a valued assistant in the University Library for twenty-eight years, after having served for twelve years in the McGill University Library, and who has been for the past fifteen years head of the periodical department in the University of Toronto Library. Miss Fairbairn carries with her the affection and esteem of all members of the library staff, and their best wishes for many years of well-earned leisure.

(12) REPORT ON RESEARCH

Anatomy, under direction of Professor J. C. B. Grant

The head of the department has been engaged in preparing the manuscript and diagrams of a book he has nearly completed.

Professor James Crawford Watt has continued research work along lines previously established: A. Continuation of the investigation of the processes involved

in calcification and ossification. Some new technical procedures for demonstrating calcium have been devised. These give promise of much usefulness. B. The arrangement of the cranial venous sinuses related to the confluence of sinuses (torcular Herophili) have been studied in more than 120 cases. Variations of much interest have been observed and sketched. An analysis of this series is being prepared. C. With the assistance of Dr. A. N. McKillop, further and more extensive investigation of the arteries in the posterior cranial fossa in man has been carried on. It is expected that a paper will be prepared on this subject during the summer.

Professor W. H. Piersol has completed the reconstruction and study of a human embryo of two somites. The model is so contrived as to show the more important aspects of its structure.

Professor A. W. Ham and M. B. Lewis found that disease of the coronary, intestinal, and renal arteries develops as a sequela to a calcium shower induced by one enormous dose of activated ergosterol. They showed also that the same primary lesion as that induced by an overdose of vitamin D could be produced by two weeks' excessive feeding of calcium, phosphorus and acid.

Dr. Purdy (Fac. of Dentistry) and Dr. Ham are investigating the effect of various disturbances of the calcium and phosphorus metabolism on teeth in order to determine whether mineral can be withdrawn from the latter. (This work is being carried on under a grant from the Canadian Dental Research Association.)

Mr. H. C. Elliott and Dr. Ham are investigating the effect, particularly on the joints and heart, of a long continued vitamin C. deficiency in guinea pigs. Dr. Schillington (Faculty of Dentistry) is studying the effect of Vitamin C. deficiency on the teeth of these animals. (This work is being carried on under a Banting grant.)

Certain B. & M. students, who elected histology as their fourth year option subject, performed research under Dr. Ham's direction: thus Miss C. Horner investigated the histological changes in the uterus and vagina of ovariectomized rats at various time periods following the administration of a single massive dose of oestrin: Mr. H. Fine investigated the problem of disuse atrophy of bone by means of alizarin staining: Mr. Powell investigated changes caused by scurvy in the blood of guinea pigs, particularly with regard to the Arneth count: Mr. H. Copp and Mr. W. Perry planned and constructed much of the apparatus for a small tissue culture laboratory and succeeded in cultivating chick tissue. Mr. B. S. Leibel investigated afresh the architecture of the heart muscle and made advances in our knowledge of this structure.

Professor Ruggles George has investigated the planimetry of the bodies of the vertebrae, and has made numerous other observations on the vertebrae and on the costo-vertebral articulations. This investigation will be completed during the summer.

Dr. M. H. Book is continuing his studies of the respiratory portion of the lung. His investigation of this development of the alveoli in the human embryo throws some light on the architecture of these structures in the adult lung, and tends to disprove the time-honoured concept of a continuous epithelial lining for the pulmonary alveoli.

Professor M. A. H. Siddiqi, M.S., F.R.C.S., England, professor of anatomy at King George V. Medical College, Lucknow, has worked in the department as a Vincent Massey Fellow. His studies on the development of the genito-urinary canal have thrown new light on our knowledge of the process. The results of his work are embodied in his M.A. thesis.

Mr. H. E. LeMasurier and Dr. B. L. Guyatt have made many technical improvements in detail related to museum work, such as: an improved coloured injection mass with glue as a basis; a method of strengthening osteological material; improvements in design of display tables.

Astronomy, under direction of Professor R. K. Young

During the session 1935-36 two graduate students were in attendance in the department of astronomy and completed the requirements for the degree of Master of Arts. Miss F. S. Patterson investigated the stellar wave-lengths in spectrographs of small dispersion and determined a number of lines suitable for radial velocity work in the region of the spectrum λ 4800-5700. Mr. W. H. Stilwell made a determination of the spectroscopic orbit of the binary star, H.D. 34762.

At the David Dunlap Observatory the various members of the staff have co-operated in the general programme of observation. The telescope has been in active operation since the end of June, 1935, and since that time has been used on every clear night from sunset to sunrise. From the date of the opening until May 27, 1936, we have had a total of 978 working hours.

Spectrographic Work

The one-prism spectrograph has been used to measure the radial velocity of the fainter stars in and near the Kapteyn areas. There have been secured 753 spectra of 430 stars ranging in magnitude down to 8.0. To date 260 of the spectra have been measured and the results tabulated prior to publication. In addition to the regular programme of radial velocities, the orbits of binary stars have been under investigation. Dr. Millman has completed the orbit of the eclipsing binary TX Leonis and Mr. Stilwell has obtained a preliminary orbit for the star H.D. 34762.

Newtonian Focus

Dr. Helen Sawyer Hogg, as research associate, has been engaged on a programme of variable star work in the globular clusters. Ninety direct photographs have been secured. These photographs have yielded the periods of 33 variable stars in the cluster N.G.C. 6934 and 3 in the cluster N.G.C. 6402. Thirty new variable stars have been discovered and nearly 12,000 estimates of magnitude made. The clusters N.G.C. 6254, 6760, 6779 and M 13 are under investigation.

Meteor Research

Dr. P. M. Millman has continued a programme of visual and photographic observation begun in 1933 before the completion of the telescope. To date a total of 12,700 observations have been made at the observatory and co-operating stations. Photographic programmes have resulted in six meteor spectra during a total exposure time of 143 hours and eight meteor trails in an exposure time of 46 hours with direct cameras.

Instrumental Work

A large part of the time of the director has been used in getting the telescope and equipment of the observatory prepared for observation and in designing and constructing new apparatus. A Hartmann microphotometer and a spectrum sensitometer have been constructed in the observatory workshops. The installation of the 19-inch telescope is well under way and the instrument will be in active operation by July.

Biochemistry, under direction of Professor H. Westeneys

Directed by Professor Wasteneys:

Mr. Bruce F. Crocker and Dr. Jacob Markowitz, acting on a suggestion from Dr. B. P. Babkin have successfully elaborated a new method for completely cannulating the intestine at any desired level. By this method, the entire meal fed to an animal may be collected and analysed. It is believed that by this means a more accurate picture of normal digestion may be obtained than by the methods used hitherto. Mr. Crocker in collaboration with Dr. Marion Lawson has used this method to study the digestion of its protein component when the food has reached the end of the duodenum. There are a number of points of interest in the results obtained to date.

The time for the passage of a given meal is remarkably constant from one experiment to another on the same dog, and also from one dog to another. This time, however, varies greatly for meals of different kinds of food. In this connection, it has been found that fat definitely retards the passage of the food with the result that the protein is more completely broken down when fat is present in the meal. The pH of the intestinal contents was found to be always acid and to vary within the limits of 4.7 to 5.7.

Mr. A. W. A. Brown, during the summer of 1935 and the winter and spring of 1936, has been engaged in a study of the gross metabolism of insects by the method of analysis of the excreta. He has found in the case of the flesh-fly larvae that the main end-product of nitrogenous metabolism is ammonia, although uric acid is also excreted in small amounts. He has succeeded in extracting the deaminating enzyme of these larvae which he has shown to be an intra-cellular enzyme, the substrate of which is not amino acids but is composed of the higher breakdown products of proteins. After studying methods of rearing the grasshopper *Melanoplus bivittatus* he investigated their nitrogenous excretions among which uric acid predominates but urea is also present as well as amino compounds. One-fifth of the excreta was found to be composed of a non-nitrogenous (peritrophic) membrane.

Dr. V. P. Ignatieff has commenced an investigation of the fat metabolism of the Canada Wonder bean, but the considerable technical difficulties which he has encountered have, so far, prevented him from reaching any definite conclusions. In continuation of his previous investigation into the role of phosphorus in plant metabolism he has studied the relative distribution of phosphorus and phosphatase activity in the floral parts of *nicotiana affinis*, *petunia*, *salpiglossus* and *gladiolus*. He finds that the sex organs as a whole and in the *gladiolus* the anthers especially, have a higher phosphatase activity than other floral parts. He finds also that in *gladiolus* the highest concentration of phosphorus occurs in the sex organs and particularly in the anthers.

Directed by Professor G. F. Marrian:

Dr. D. Beall during last summer vacation continued his research on the methods of isolation of the oestrogenic hormones from pregnant mare's urine.

Dr. S. Cohen has continued his work on the nature of combined oestrogens in human pregnancy urine. He was successful in isolating in a chemically pure condition the combined form of oestriol and in identifying it as an oestriol monoglucuronide. More recently he has improved and simplified the method of isolating this compound and he is accumulating large quantities of it for a more detailed chemical examination than was previously possible.

Mr. A. D. Odell during the first part of the session carried out a research on the physiologically inactive polycyclic alcohols which occur in human and equine pregnancy urine. He has been able to show that pregnandiol occurs in human pregnancy urine in an acid-hydrolysable combined form. Since pregnandiol is a valuable source of the corpus luteum hormone, this work, which makes possible the isolation of the former substance in much greater yields than have hitherto been obtained, is of very great practical value. Mr. Odell is now making a detailed study of the physiological potency of oestriol glucuronide on various test animals.

Mr. B. Schachter has been making a quantitative study of the excretion of oestrogens at different stages of pregnancy in the mare. He has also been attempting to isolate and identify the combined form of oestrone which occurs in mare's urine. He has made considerable progress towards achieving the latter.

Mr. G. Butler is engaged in a study of the factors involved in the initiation of normal parturition with particular reference to the possible role of the acetyl choline contained in the placenta.

Miss E. Batho is engaged in attempts to synthesise the compound equol which occurs in horse's urine and whose constitution was determined last year in this department. She is also attempting to determine the structure of the polyterpene compound, ursolic acid, which is present in many vegetable tissues.

Directed by Professor A. M. Wynne:

Dr. L. Farber, aided by a grant from the Banting Research Foundation, has investigated several factors affecting the growth and proteolytic activity of pathogenic *Staphylococci*.

Mr. M. Freed has continued the study of the synthetic action of pancreatic lipase. Several factors affecting the rate of synthesis of glycerides were investigated; the experimental results were analysed in terms of their relation to theories of the mechanism of enzyme action.

Mr. L. Rabinowitch has continued the investigation of the hydrolytic action of pancreatic lipase. He has studied (a) the affinity of the enzyme for various substrates and (b) various problems concerned with the inhibitory action of representative chemical compounds on lipolytic activity.

Mr. W. H. Fishman has critically examined certain methods for the determination of two volatile fatty acids in dilute solution and has modified the methods for use in the analysis of fermentation mixtures.

Professor A. M. Wynne, in collaboration with Mr. J. E. Boyd, Mr. J. A. Jackson and Mr. H. A. Proctor, has studied (a) the activity of yeast phosphatase, (b) the proteolytic activity of egg-white, (c) acid production by *Clostridium saccharobutyricum*, (d), the lipase activity of soya bean, (e) the purification of yeast invertase.

Biology, under direction of Professor E. M. Walker

The following summary includes investigations in progress, published, or in course of publication, for the year 1935-1936:

Vertebrate Anatomy

By Professor W. H. T. Baillie—Eye muscles and movements of eyeball in mammals: continued studies on sensitivity and pigmentation in lower vertebrates.

Under the direction of Professor W. H. T. Baillie:

C. K. Gunn—Origin and nature of pigment in rodent strains.

Invertebrate Zoology (including entomology and parasitology)

By Professor Norma Ford—Life history and behaviour of the parasitic flesh-fly *Wohlfahrtia vigil*: determination of the number of instars of *Grylloblatta* and their diagnostic characters: rate of growth of *Grylloblatta* at different temperatures.

By Dr. F. P. Ide—Distribution of mayflies in the Ottawa River and in one of its tributaries: identification of mayflies from stomachs of Atlantic salmon and of mayflies collected by Dr. D. S. Rawson in an investigation of Okanagan Lake, B.C., for the Biological Board.

By Professor E. M. Walker—Thoracic skeleton and musculature of *Grylloblatta*: diagnostic characters of larval stages of *Wohlfahrtia vigil* a new *Macromia* (Odonata) from British Columbia and its nymph: distribution of Ontario Odonata.

Under direction of Professor E. M. Walker:

C. E. Atwood—Effect of different foods and of starvation on longevity, size, reproductive capacity and sex ratio in certain insects of economic importance (Lepidoptera and Hymenoptera).

Miss J. A. Fraser—Ecological studies of caddis-flies and their larvae in streams in Algonquin Park, Ont.

Miss J. F. L. Hart—A comparative study of British Columbia *Anomura* (hermit crabs and related forms), based on both larval and adult structure.

Professor Wen-Chun Ho (West China Union University)—A comparative study of the thoracic musculature of orthopteroid insects.

Mrs. E. Kuitunen-Ekbaum—Life history of *Philometra americana*, a nematode parasite of the Starry Flounder (*Platichthys stellatus*): life history studies of the cestode *Triaenophorus crassus* and the acanthocephalan *Leptorhynchoides thecatus*: endoparasites of haddock.

Miss R. D. C. Martin—Life history and ecological studies of two stream-dwelling damselflies, *Agriion maculatum* and *A. sequabile*.

F. A. Urquhart—Comparative morphology of the digestive tracts of two Orthoptera, *Tridactylus apicalis* and *Nomotettix cristatus*: hibernation of *Tridactylus*.

Marine Biology

By Professor A. G. Huntsman—Factors determining return of the salmon, *Salmo salar*, from the sea (for the Biological Board).

Under the direction of Professor A. G. Huntsman:

W. H. Johnson—Food and feeding of the herring, *Clupea harengus*: daily migrations and behaviour of towards light of the copepods *Calanus*, *Pseudocalanus*, *Acartia*, *Eurytemora*, and *Tortanus* (also at Atlantic Biological Station).

H. M. Rogers—Hydrographic faunistic study of the estuary of the Saint John River, N.B.

J. A. Stevenson—Factors influencing growth and abundance in the scallop, *Placopecten grandis*, in the Bay of Fundy (also at Atlantic Biological Station).

A. L. Tester—Local populations of the herring, *Clupea pallasii*, in the waters of British Columbia, as shown by the structure and by the proportions of the various year-classes (also at Pacific Biological Station).

G. C. Whiteley, Jr.—Factors determining growth and abundance in the cod, *Gadus callarias*, and the existence of local populations of cod in the Newfoundland region (also at Newfoundland Fishery Research Laboratory).

Mr. H. C. White of the staff of the Biological Board of Canada was given accommodation in the laboratory for work on the Atlantic salmon, *Salmo salar*, in regard to bird-enemies, fish-enemies, age-determination, return to the home stream, and food of the young.

Vertebrate Embryology

By Professor A. F. Coventry—Continuation of collection of placentae and embryos of small mammals. The sectioned series of *Peromyscus* is approaching completion and material for a similar series of *Clethrionomys* is in preparation. A considerable quantity of *Microtus* material, as well as less complete collections of other genera, is ready for sectioning.

Animal Ecology, Mammalogy and Ichthyology

By Professor A. F. Coventry—Continuation of studies of populations of small mammals in Ontario: breeding characteristics of certain Cricetidae in Ontario.

Under the direction of Professor A. F. Coventry:

G. F. M. Smith—Investigation of the starfish, *Asterias vulgaris*, as a factor in oyster culture in Prince Edward Island.

By Professor J. R. Dymond—Ecology of fishes of Cache Lake, Algonquin Park: ecological and geographical distribution of fishes in Algonquin Park: taxonomic studies of maskinonge, *Esox masquinongy*.

Under direction of Professor J. R. Dymond:

F. E. J. Fry—Taxonomic studies of Lake Nipissing ciscoes, *Leucichthys artedi*.

D. A. MacLulich—Periodic fluctuations in the numbers of varying hare (*Lepus americanus*).

W. R. Whittaker—Growth studies of the pilchard (*Sardina caeruleus*).

J. M. Speirs—Migration studies of birds at Toronto.

Genetics

- By Professor J. W. MacArthur—Genetics and cytology of the tomato.
- By Professor J. W. MacArthur in collaboration with L. Butler—Rigorous genetic and physiological analysis of a quantitative character (size in tomato fruits).
- By Professor J. W. MacArthur in collaboration with Dr. A. N. Langford and Dr. D. L. Bailey, at Vineland, Ont.—Breeding and testing a new greenhouse tomato variety immune to brown mould.
- By Professor J. W. MacArthur in collaboration with Professor Norma Ford—Studies of finger, palm and sole prints in families where multiple births have occurred: study of the inheritance of physical characters in multiple births in man.
- Under the direction of Professor J. W. MacArthur:
- Miss V. E. Englebert—Genetic, cytological and taxonomic studies of blue grass species (*Poa* spp.).
- K. Gunn—Genetics, physiology and biochemistry of a new mutant character, hereditary haemolytic icterus, in the white rat.
- Professor G. Raithby (at O.A. College)—Systems of mating in cattle breeds and their genetic effects.
- Mrs. M. E. Richardson—Studies in the I.Q. of parents and siblings in social problem families.
- A. Wilkes—Mutation breeding and sterility in parasitic wasps.
- By Professor Norma Ford—Investigations of taste reactions in young children and in monozygotic twins.

Comparative Neurology

- By Professor E. H. Craigie—A study of the cerebral cortex of the ostrich: comparative study of the lateral cortex in a representative series of the Sauropsida: study of the respiratory centre of the cat (in collaboration with Professor V. E. Henderson).
- Under the direction of Professor E. H. Craigie:
- Dr. Carl G. Smith—Investigation of pathological changes in the olfactory apparatus of the albino rat.
- Miss H. M. Stevens—Relative vascularity in the hypophysis of the cat.

Limnology

- Under the direction of Professor W. J. K. Harkness:
- C. Carl—Changes in the flora and fauna of a lagoon in Stanley Park, Vancouver, accompanying a transition from brackish to fresh water conditions: distribution of plankton in lakes of British Columbia and the relations between the plankton and the productivity of the water.
- D. Chitty—Ecology of a marginal swamp, including plant succession, the relation of plants to the aquatic microfauna and macrofauna, and the relation of these to fish production. Mr. Chitty is continuing this study at the Bureau of Animal Production, Oxford, in conjunction with other work under Mr. Charles Elton.
- K. H. Doan—Factors controlling production and growth of the small-mouthed black bass (*Misopterus dolomieu*) in Lake St. Clair and in Algonquin Park. (This study was conducted by the Ontario Fisheries Research Laboratory in co-operation with and by the support of the Ontario Department of Game and Fisheries).
- F. E. J. Fry—Movements of cisco of Lake Nipissing, the factors controlling these movements and the relation between movements and feeding habits. Experimental methods were employed to analyse the effects upon the movements of fish produced by changes of temperature, oxygen and carbon dioxide, and the relation between temperature of water and feeding of fish.

- R. R. Langford—Continuation of studies on the plankton of Lake Nipissing, including their horizontal, diurnal, vertical and seasonal distribution throughout the lake. Determination by experimental methods of the reaction of plankton to such factors as light, temperature, oxygen and carbon dioxide. The distribution of the plankton crustacea was correlated with the feeding of plankton-feeding fish.
- W. E. Ricker—Continuation of studies on the plankton of Cultus Lake, B.C., with special emphasis on their seasonal vertical distribution and the relative efficiency of different methods of sampling plankton now in common use.

Experimental Biology

- By Professor L. Irving—Experiments upon the control of respiration in the beaver initial to a study of the animal during the act of diving.
- Under the direction of Professor L. Irving:
- E. C. Black—Study of the capacity of blood for oxygen in various fishes and the condition of transport in the blood of oxygen and carbon dioxide. The physico-chemical study is being related to the known habits of the fish with the object of showing the blood characteristics which determine the seasonal movements of the fish.
- K. C. Fisher—Extension of studies of the relation of oxygen and oxidation to the rhythmic activity of the heart; devising of various apparatus, including (a) a type of electrical resistance thermometer for measuring the changes in the rate of flow of blood in solid tissues (the device has been used for studying the blood flow in the muscles during asphyxia); and (b) an electron tube relay by means of which a current of several millionths of an ampere will break a circuit carrying 1000 watts. The relay has been applied in the laboratory to thermostatic controls, to a time signalling device, and to a recorder for the frequency of drops falling from a tube.
- Miss Greay—Continuation of studies on the balance of electrolytes in embryonic development by determining the changes in phosphates in developing fish eggs.
- Miss Robertson—Preparation of the enzyme carbonic anhydrase, which accelerates the hydration and dehydration of carbonic acid: development of apparatus and methods for a quantitative determination of the activity of the enzyme: distribution of anhydrase in the tissues of invertebrate and vertebrate animals and its relation to the formation of calcified deposits in the tissues.

Botany, under direction of Professor R. B. Thomson

Phanerogamic Botany and Genetics

- Anatomy and Experimental Morphology
- Baldwin, W. K. W.—The organisation of the young sporophyte of *Ophioglossum* and *Botrychium*.
- Bannan, M. W.—Investigations of intra-specific variations of wood structure in conifers.
- Haldenby, C. N.—The origin and distribution of horizontal resin canals in the conifers.
- Hull, Kathleen L., & Thomson, R. B.—The anatomical organisation of *Lycopodium* and *Selaginella*.
- Radforth, N. W.—The development of plant embryos in culture fluid.
- Taylor, T. M. C.—The sporeling organisation and the cladorhize development of the adult plant in *Equisetum arvense* L.
- Thomson, R. B.—Comparison of the vascularisation of the cone-scales in the Araucarian conifers.
- Thomson, R. B., & Hull, Kathleen L.—The organisation of the sporeling of *Osmunda* and of the lower vascular plants.

Wright, J. Gertrude—The nature of the pit-closing membrane in the higher gymnosperms.

Taxonomy

Krotkov, P.—Plant Survey work in the Bruce Peninsula; revision of the herbarium material; special study of Ontario willows and golden rods.

Taylor, T. M. C.—(1) A critical study of the genus *Betula*.

(2) Plant Survey work in the Batchawana and Port Arthur areas, in co-operation with the National Museum of Canada. A report on the collection from the former area is ready for publication.

Genetics

Thomson, R. B., & Wright, J. Gertrude—A Study of abnormal types of *Linaria vulgaris* and their heredity.

Mycology, Forest Pathology and Cryptogamic Botany

(Under direction of Professor H. S. Jackson)

Biggs, Rosemary P.—A cultural study of Thelephoraceae. A cytological study of a new species of *Dipodascus*.

Cain, R. F.—A taxonomic study of Ontario Sordariaceae and related Sphaeriales.

Dearness, John—With the co-operation of the Department of Botany, Dr. John Dearness, of London, Ontario, is preparing an annotated list of the fungi known to occur in Ontario.

Groves, J. W.—Cultural studies of certain canker forming species of *Dermatea*, *Pezizula*, *Godronia* and related forms. (In part submitted for publication).

Jackson, H. S.—(1) A study of the rusts of Panama and Costa Rica.

(2) The mycological flora of the Toronto region and of the Temagami Forest Reserve.

(3) Studies of Ontario Thelephoraceae.

Lehmann, A. J. V.—A study of the nuclear phenomena of the Germination of the teliospores of certain species of *Lepto-Puccinia*.

Macrae, Ruth—A study of phosphorescence in *Panus stipticus*.

Plant Ecology and Seed Studies

(Under direction of Professor H. B. Sifton)

Structural Ecology:

Baldwin, W. K. W.—A study of Leaf Fall in *Crataegus Oxycantha*.

Cormack, R. G. H.—A microchemical and experimental investigation of the development of root hairs. (Paper ready for publication).

McPherson, D. C.—On the structure, form and development of air-spaces in roots.

Sifton, H. B.—On the development of the leaves of Labrador Tea.

Seed Studies:

Leggatt, C. W.—Investigation of dormancy in Lettuce seed. (Paper ready for publication).

Investigation of certain mathematical aspects of seed analysis.

McCugan, Miss Jean E.—The seed-coats of the genus *Brassica*.

The occurrence of certain characteristic pigments in the cotyledons of *Brassica* species and varieties and their value in seed identification.

Identification of *Brassica* seedlings.

Sifton, H. B.—Investigation of the effect of alternating temperatures and light on seed germination.

Technique:

Hambly, D. H.—Microscopic illumination for biological work. (Paper about ready for publication).

Plant Physiology

(Under direction of Professor G. H. Duff)

- Brodie, Anne B.—The metabolism of nitrogen and its relation to respiratory metabolism. The drift with age of organic nitrogen in unstarved leaf cells has been established and related to the respiratory drift. The effects of starvation are now under examination.
- Duff, G. H.—Sugar degradation and respiratory metabolism. A study of metabolic mechanics in the plant cell. The reserve sugar has been isolated from the first leaves of wheat in crystalline form and its characterisation is in progress.
The metabolic gradient of the attached wheat leaf, its relation to sugar concentration and its modification after isolation.
- Losee, S. T. B.—Anaerobic metabolism in the wheat leaf.
- Phillips, W. R.—The physiology of pears in gas storage. (In co-operation with the Department of Horticulture, Ontario Agricultural College.) A paper is in course of preparation for publication.
- Tomalin, F. E. M.—The influence of age upon the sugar respiration relation. A study of metabolism in the juvenile state for comparison with that established for the state of maturity.
- Walford, E. J.—The respiratory metabolism of the tomato fruit and its relation to storage at 12.5° C. (In co-operation with the Department of Horticulture, Ontario Agricultural College.) A paper is now being prepared for the press.

Plant Pathology

(Under direction of Professor D. L. Bailey and in co-operation with the Vineland Experiment Station)

- Bailey, D. L.—Dead Arm Disease of Grape.
Diseases of Ornamentals.
(a) *Cytospora* disease of Koster's Blue Spruce.
(b) Suspected virus diseases of lilies and gladiolus.
Strawberry Root-rot.
- Langford, A. N.—*Cladosporium* leaf mould of tomato.
- Weaver, L. O.—Factors influencing the fungous flora of raspberry roots.

Cytology

(Under direction of Dr. L. C. Coleman)
The cytology of *Gasteria* and *Allium*.

Chemistry, under direction of Professor W. Lash Miller

Thirty-nine students were engaged in research during the past winter under the direction of professors of the department of chemistry. The degree of Master of Arts was conferred on thirteen of these viz:—Messrs. M. M. Bayne, H. R. Bernstein, A. G. Boyes, G. W. Graham, D. J. LeRoy, C. Marchant, R. N. Meals, J. J. Russell, A. J. Skey, R. S. Soanes, S. O. Thomson, F. J. Webb, and I. D. Wintrob; also on Mr. J. J. W. MacHattie who worked under Dr. A. E. R. Westman, in the laboratories of the Ontario Research Foundation.

The degree of Master of Science in Agriculture was conferred on Mr. S. G. Russell, who worked in the laboratories of the Ontario Agricultural College under the direction of Professor R. Harcourt.

The following were the subjects of research:—

- G. C. Allen, M.A.—Overvoltage
- M. M. Bayne, B.Sc., B.A.—Acid esters of naphthalic acid
- Prof. F. E. Beamish—Analytical determination of the platinum metals
- H. J. Bernstein, B.A.—The Raman effect in electrolytes

- A. G. Boyes, B.A.—Phenyl ethers from ethylene chlorhydrin
 R. C. Carlisle—The separation of intimately mixed solids
 M. Cohen, M.A.—The absorption of gasses on solids
 L. Cook—Effect of temperature and pressure on the position of spectral lines
 L. H. Cragg, M.A.—The sour taste of acids
 Miss E. V. Eastcott, Ph.D.—Purification of Bios IIB
 Miss M. L. Elder, M.A.—Purification of Bios V
 E. C. Forbes—Effects of platinum metals on the surface of the assay bead
 Prof. A. R. Gordon—Computation of thermodynamic quantities from spectral data
 G. W. Graham, B.A.—Density of methyl alcohol vapour
 A. H. Heatley, M.A.—Potential distribution in carbon arcs
 W. A. James—The diffusion of hydrochloric acid
 A. A. Janis, M.A.—Vapour pressures of salt solutions
 L. F. King, M.A.—Rates of reaction of esters with alcohols in alkaline media
 D. J. LeRoy, B.A.—Transport numbers by the moving-boundary method
 F. MacDonald—Preparation of 5, 5'dinitro 2, 2'bitolyl
 C. Marchant, B.A.—Preliminary study of two new constituents of Bios
 R. N. Melas, B.A.—Study of a method for separating certain amino-acids
 J. C. Morgan, M.A.—Diffusion in copper sulphate solutions
 J. R. Patton, M.A.—Base-exchange between certain artificial silicates
 R. J. Romans, M.A.—Photochemical reactions
 J. J. Russell, B.A.—Analytical determination of the platinum metals
 Miss C. J. Sanderson, M.A.—Influence of amino-acids on the yeast-crop
 S. Shankman—The Becquerel effect
 E. M. Sheffield—Cyclisation of 3-acenaphthoyl benzoic acid
 A. J. Skey, B.A.—Adiabatic calorimeter for specific heats of organic liquids
 R. S. Soanes, B.A.—Characteristics of Langmuir probes in carbon arcs
 G. A. Stewart—Specific reducing agents for the platinum metals
 S. O. Thomson, B.A.—Solubility of carbon dioxide in aqueous alcohols
 D. L. Turner—Intermediates for phenanthrene synthesis
 C. Unruh, M.A.—Aromatic diacid chlorides with polyphenols
 M. Wayman—Preparation of bios-constituents from tomato-juice
 F. J. Webb, B.A.—Alkaline reduction of aromatic nitro compounds
 T. W. Westlake—Separation of Fe and As in the presence of Co and Ni
 W. F. Weston, M.A.—Substituted phthalic anhydrides with acenaphthene
 F. E. W. Wetmore, M.A.—Potential of copper sulphate in acid solutions
 I. D. Wintrob, M.A.—Santalyl esters of phenyl-acetic acid

Food Chemistry, under direction of Professor C. C. Benson

There have been several graduate students working in this department during the year, some of them doing original work, but others doing only a small amount of such work but obtaining special training in the chemistry of foods as preparation for laboratory work later on.

Two of the students working in this department and registered in the Graduate School have, this year, been granted the degree of Master of Arts—Miss Jean Blundell, for a study of physical training in relation to basal metabolism and respiration, and Miss Dorothy Pearson, for a study of proteins of certain seeds which are largely used in Indian diets.

Geology, under direction of Professor E. S. Moore

Professor W. A. Parks completed his study of Devonian Stromatoporoidea during the summer months.

Professor E. S. Moore—Investigation of the geology and ore deposits of the Ramore area and of Afton and Scholes Townships, northern Ontario, for the Ontario Department of Mines.

Dr. M. Fritz—Study of the micro-fossils of the Devonian from wells in south-western Ontario.

Under the direction of the staff in geology

A. Holstein—The heavy minerals in the Silurian rocks of the Niagara Escarpment.

H. G. Way—The Silurian of Manitoulin Island.

Under direction of Professor E. S. Moore

J. E. Armstrong—Pyrometamorphic ore deposits.

O. F. Carter—Structural features of gold deposits in the Precambrian of Ontario.

H. C. Lane—Function of chlorine in the genesis of ore deposits.

W. W. Moorhouse—Types of igneous rocks genetically associated with gold deposits in Canada.

B. Russell—Genesis of ore deposits in Cameron Island area, Ontario.

Household Science, under direction of Professor A. L. Laird

During the session 1935-36 there were seven graduate students taking work in this department but only three of them were engaged in research.

Miss L. M. S. Davis has continued her study of the comparison of tensile strength, detergency, and whiteness retention of fabrics washed by domestic and commercial laundry methods, and has been granted the degree of Master of Arts. The problem was carried on with the co-operation of the Chemistry Division of the National Research Council, Ottawa, and the Toronto Launderers and Dry Cleaners.

Miss G. H. Donald is working on the calcium content of some Canadian foods, and Miss D. E. Mulholland is making a study of low cost special diets.

Applied Mathematics, under direction of Professor J. L. Synge

The following researches have been in progress during 1935-36:

B. A. Griffith, M.A.: Continuation of work on the problem of the flow of a viscous liquid past a circular cylinder by a combination of the methods of Stokes and Oseen.

A. F. Stevenson, Ph.D.: Generalisation of the Hartree-Fock equations for two-electron systems.

J. L. Synge, Sc.D.: Dynamical theory of electrical commutator machinery. Completion of Whittaker's extension of Gauss's theorem to general relativity.

Analysis of the new relativity proposed by Page.

Medical Research, under direction of Professor F. G. Banting

Dr. D. A. Irwin and his group of workers have investigated the toxicity of various kinds of quartz; the effect of the dilution of quartz by carbon and microcline; the toxicity of various mine dusts in the unaltered state and when separated into gravity fractions. With Dr. B. C. Coles he has studied the siliceous materials found in the lungs and lymphatic glands of non-silicotic persons.

A quantitative estimation of quartz in dust by X-ray diffraction method has been made with the assistance of Mr. H. H. Binden.

Dr. J. T. Fallon has found that the granulomatous tissue produced by the injection of finely particulate quartz contains a silica-free lipid which on injection produces a nodular fibrosis.

Dr. Coles has prepared aqueous solutions of quartz which, when injected into the lung, produced an early tissue response similar to that given by finely particulate quartz. The injection of varying concentrations of such a solution has given further information about the toxic properties of soluble silica.

Dr. W. R. Franks has continued the study of the effect of silica dust and silica solutions on monocytes in tissue culture.

Dr. Franks and Mr. A. Duncan have attempted to develop methods of analysing silica dusts by suspending them in fluids of known refractive index and studying their light value by the photoelectric dust estimator.

With the assistance of Mr. H. J. Creech and Miss M. Shaw, Dr. Franks has continued the work on the synthesis of chemoantigen related to tumor.

Dr. Franks and Mr. L. D. Proctor, in co-operation with the department of psychiatry, have been investigating the relation of glyoxalase activity to some mental diseases.

Dr. C. C. Lucas has succeeded in isolating the disulphide of normal urine in a pure condition. The compound has been identified as l-cystine. Further work on the neutral sulphur compounds in normal urine is in progress.

Dr. Lucas and Miss M. Dolan have continued the study of leaching silica from silicates.

Mr. K. Watson has been unable to find organic compounds of silicon in biological materials.

Mr. E. L. Outhouse has succeeded in identifying the phosphoric ester from tumors obtained last year, as amino-ethyl phosphoric acid. A study of the characteristics of the pure compound has led to improved methods of isolation, by means of which it is hoped to establish the presence or absence of this compound in normal tissues.

Mr. L. B. Macpherson has been engaged in a study of the fractional hydrolysis of cephalin. There is at present some evidence that lecithin and cephalin may be precursors of the phosphoric esters found in tumor tissue.

Mr. F. H. Lawford has prepared several new esters of phosphoric acid to add to the homologous series of compounds which he synthesised last year.

Drs. G. E. Hall, G. H. Ettinger, F. G. Banting and Mr. G. W. Manning have continued the study of the effects of the daily intravenous injections of acetylcholine in the dog. Miss J. Lang has investigated the effect of such injections on the cell-count, viscosity, CO₂ combining-power, sugar, N.P.N. and chlorides of the blood of these dogs.

Other problems being investigated by Dr. Hall and his group are:

Electrocardiographic changes by vagus-phrenic anastomoses.

The effect of daily injections of atropine and ephedrine on the blood-pressure of the dog.

The effect of continuous injection of acetylcholine in normal and atropinised and eserinated dogs.

Studies on the serum esterase.

The effects of long-continued stimulation of the vagus nerve of the dog.

Dr. F. G. Banting and Miss S. Cairns have continued the work on experimental tumor.

Medicine, under direction of Professor Duncan Graham

An increasing number of clinical problems are under investigation. It is very gratifying to observe the continued interest and activity in clinical investigation shown by former whole-time members of the staff who are now serving on a part-time basis.

Dr. Rykert and Dr. Hepburn have published a paper on the use of strophanthin in the treatment of auricular fibrillation.

Dr. Hyland has forwarded for publication a report of his results in the treatment of myasthenia gravis by glycine and ephedrine. Dr. Maltby has made a preliminary report of some observations on glycine metabolism in patients suffering from myasthenia gravis.

Through the kindness of Professor Best, a supply of protamine insulin from Professor Hagedorn was made available for the treatment of patients with diabetes mellitus. A preliminary report on the physiological and clinical aspects of protamine insulin by Dr. Kerr and Professor Best of the department of physiology and Dr. Campbell and Dr. Fletcher of the department of medicine has been made. Dr. Campbell, Dr. Fletcher and Dr. Kerr have published a report on the use of protamine insulin in the treatment of diabetes mellitus.

Dr. Campbell and Dr. Dauphinee have developed a method for the determination of iron in small amounts of blood and tissue which promises to yield valuable information in the study of the metabolism of iron. Dr. Campbell has modified Bennhold's Congo Red test for amyloid and developed a suitable clinical method for the quantitative estimation of amyloid.

Dr. Cleghorn is continuing his clinical and experimental studies on the adrenals. Last year reference was made to the work of Dr. Cleghorn and Dr. McHenry of the department of physiological hygiene on the preparation and assay of adrenal cortical extract. They have prepared a potent extract which has proved to be effective in the treatment of the crises occurring in Addison's disease. This extract is now being made and distributed by Connaught Laboratories. Dr. Cleghorn, S. M. M. Cleghorn, M. G. Forster and G. A. McVicar have published a paper incorporating the results of a two-year investigation on the factors influencing the survival of rats after adrenalectomy. Dr. Cleghorn and Dr. McVicar have continued their investigation on the chemistry of the blood and urine in adrenal insufficiency.

Dr. Dauphinee and Mr. Wakefield have made a preliminary report on the serum phosphatase in hepatic jaundice.

Studies on liver disorders, anaemia, pigment metabolism, and the peripheral vascular system are being continued.

Mineralogy and Petrography, under direction of Dr. T. L. Walker

Dr. T. L. Walker has carried on during the year the following investigations:

The investigation of the insect fauna in the amber from Cedar Lake, Manitoba, which was discovered by Dr. Walker, has been continued. The description of the species which are of Cretaceous age has been done by Dr. F. M. Carpenter of Harvard University and will shortly appear in printed form.

The study of the moving bubbles in quartz from the Pre Cambrian Mine, Vernon, B.C., was continued and a moving picture has been prepared to show the nature of these inclusions and the rapid movement of some of them.

Professor Ellis Thompson has continued his studies on tellurides.

Mr. V. Ben Meen continued his studies on the character of the quartz in which the gold ores of Canada are found.

Mr. A. S. Dadson continued his work on the relationship between the potential of minerals and ore deposition, and his results are nearly ready for publication.

Mr. James M. Baker has been engaged in an investigation of the mineralisation of the ore minerals at the Taylor-Windfall Mine, B.C.

Obstetrics and Gynaecology, under direction of Professor W. A. Scott

Dr. Henderson has carried on an investigation of pregnancy and heart disease and is reading a paper on this subject at the Canadian Medical Association in June. These cases are now being looked after by a combined cardiac and obstetrical clinic in conjunction with the department of medicine with most satisfactory results.

The study of Dr. Goodwin's in connection with pelvic inclination in pregnancy and the relationship of anthropological factors to labor has been completed and is being put in final form for publication.

Dr. Mann demonstrated a new obstetrical forceps before the New York Obstetrical Society and the forceps are now in the hands of the manufacturer preparatory to being put on the market. During the year Dr. Mann completed a very interesting study of the mechanical factors involved in the dilatation of the cervix and presented it to the staff by means of a very ingenious mechanical demonstration.

Drs. Scott, Cosbie and Mann, in collaboration with the Institute of Radium Therapy, have been carrying on the radiological treatment of carcinoma of the genital tract and Dr. Cosbie presented to the staff a valuable study of the results up to date.

Dr. Low presented to the staff a study of the caesarian sections done during the last ten years and this is being put into form for publication.

The study of the physiological changes in the ureters during pregnancy which was carried out in collaboration with the department of urology and radiology has been completed and the results are being prepared for publication.

Dr. M. C. Watson, who has been working as a voluntary assistant in the department, has, in collaboration with Dr. Marrian of the department of biochemistry, carried out an investigation on the clinical effect of various oestrogenic substances, the results of which have appeared in two articles. The work is still continuing.

The study of the sedimentation rate of the erythrocytes in cases of infection, cancer, early and late toxæmias of pregnancy, new born foetus and at various stages of the menstrual cycle have been carried on by Dr. Scott in collaboration with several members of the staff. This work is still being pursued.

Ophthalmology, under direction of Professor W. H. Lowry

Dr. MacDonald has overseen the section and study of one hundred and thirty-eight pathological specimens, a considerable increase over last year. Papers have been read in Ophthalmological congresses based upon the study of some of these pathological specimens. Quite a number of these specimens have been sent to the department from various centres throughout Ontario. No charge has been made for this work and it has come to the time when perhaps some of the expenses of the department should be borne by some compensation for this work done.

Dr. Morgan has been perfecting a technique for the transplantation of corneal tissue in rabbits and has some rather promising results already. So far we have not been able to do this on the human eye.

Dr. Johnston is doing some investigation in the fluid obtained in detached retina cases, with the object of adding to our knowledge of this serious disorder.

Pathological Chemistry, under direction of Dr. Hunter

Dr. D. L. Selby and Mr. J. B. Scott with the co-operation of the department of medicine, continued the investigation of kidney function in nephritic patients by means of xylose clearance. They also began experiments to find a simple method of measuring large amounts of iodine in blood and urine.

Dr. S. H. Jackson completed one stage of his work on the relationship of carbohydrate metabolism and staphylococcus infection. He has shown that the response to infection may be markedly modified by high carbohydrate diets.

Dr. T. F. Nicholson and Dr. R. W. I. Urquhart, with the assistance of Dr. D. W. G. Murray of the department of surgery, have devised a method whereby the changes in kidney function produced by experimental nephrosis may be separated from the effects of extraneous lesions and studied by themselves. Using this method Drs. Nicholson, Urquhart and Selby have made a number of interesting observations on kidney function in nephrosis.

Dr. Nicholson and Dr. R. M. Archibald, a voluntary worker in the department, have made further investigations on the use of *Proteus vulgaris* as a reagent for glucose and have found a means of quadrupling its activity without changing its specificity. They have also been able to delimit more strictly its field of usefulness in sugar analysis.

Dr. Hunter has devised an improved clinical method for the determination of urinary urea, and has perfected a manometric procedure for the enzymatic determination of arginine. The latter is being applied to two problems, (1) the specificity of the enzyme arginase and (2) the mechanism of the liberation of arginine in tryptic digestion.

Paediatrics, under direction of Professor Alan Brown

In conjunction with the Connaught Laboratories, an extensive survey has been made on children suffering from meningococccic meningitis from the standpoint of both treatment and prevention. The work on the development of an effective whooping cough vaccine and also the use of placental extracts in the prevention of measles is progressing with satisfactory results. The development of different serums is being carried out.

Working in association with the department of pharmacology and the Banting and Best department of medical research, further studies have been made on the important subject of the prevention of poisoning in children. Recommendations have been made to prohibit the use of certain pharmaceutical products which have been found to be the cause of the death of many Canadian children each year.

Observations have been continued on children suffering from nephritis and it has been found that a number of these patients have an underlying anatomical defect. Some of these defects lend themselves to surgical correction. Further progress is being made in the study of various chest conditions in children from the standpoint of their treatment and prevention.

The joint effort with the department of psychology on an investigation of the effect of dietary deficiencies in early life on learning ability is being continued.

Studies have been made on the iron requirements of children and the availability of iron in foods. It has been found that only a portion of the total iron in food is available for the iron nutrition of children. This is a very important observation and our present conception of iron metabolism will probably have to be changed.

Interesting studies have been made on the effect of a low mineral intake on intestinal stasis. During the past year it has been found that a diet low in calcium and potassium results in marked stasis in the appendix. Further studies are being conducted which may give results of considerable practical value.

The nutritional studies are being continued and information is being obtained which indicates very definitely that diets which we have considered adequate are still not optimal and that simple changes may be made which will do much to further increase the health of the infant and child.

Pharmacology, under direction of Professor V. E. Henderson

I would like to call your attention to the two studies of Choline and certain of its analogues by Drs. Roepke and Welch. These papers give us a further insight into the mode of action of a very important group of compounds, important because one of them we now believe is constantly produced in the body and, indeed, forms the means by which nervous impulses set into activity many of the secretory mechanisms of the body.

The paper on the Respiratory Centre by myself and Dr. E. Horne Craigie of the department of biology is a report on the location of the respiratory centre in the medulla and its connections. This has been a very wearisome study but is of undoubted value both theoretically to pharmacologists and practically to surgeons of the central nervous system.

Dr. Lucas and myself have concluded a paper which is now in press on The Physical Properties of Mucus Secretion. This paper reveals the lubricating and protective characteristics of the mucus produced in the bronchi and by the salivary glands.

In conjunction with Mr. A. H. R. Smith, working under a grant from the Banting Research Foundation, certain derivatives of furan have been studied for their anaesthetic properties. Though they are of theoretical interest, they are not practical anaesthetics. This paper is also in press. We have also carried out a further study of some of the impurities of the anaesthetic propylene, which has led us to examine another group of gases with extraordinary physiological properties. This paper too is of theoretical importance, as it discloses a type of impurity which might occur in cyclopropane and which will have to be guarded against in its preparation. In conjunction with Mr. Smith and Dr. Roepke a method of recording pulse pressure electrically has been devised and gives promise of enabling us to solve some of the problems of pulse pressure which are so important in clinical medicine.

Dr. Roepke has undertaken a study of the reactions occurring between acetylcholine and the esterase which breaks it up in the body. This study has revealed some very interesting data whose exact interpretation at the moment is not clear, but will undoubtedly throw important light on certain of the physiological mechanisms of the body. A preliminary report of this work was given before the American Pharmacological Society in March and a paper is being prepared dealing with the first phase of this work.

Physics, under direction of Professor E. F. Burton

A.

Low Temperature Problems:

In addition to the regular members of the staff the following have participated in this work: A. D. Misener, National Research Council Scholar, who carried out an investigation on the influence of magnetic fields on the superconductivity of metallic films, and on the specific heats of various substances at the temperature of liquid helium; K. E. Mann, B.Sc., B.Ed. (Sask.), who has carried out research on the construction, calibration, and use of a new form of superconducting galvanometer; A. H. Woodcock, assistant demonstrator, has been working on the thermoelectric effect in superconductors; A. I. Cove, assistant demonstrator, who has been working on the index of refraction of liquid oxygen, hydrogen, and helium in two states He I and He II; E. Bromberg (Columbia University), who was working on the Brownian movement at very low temperatures, and on the possibility of producing a permanent polarisation in quartz at the temperature of liquid helium; S. M. Dockerty, M.A. (Dal.) has just completed a three year research on the specific heat of copper at low temperatures.

Professor H. Grayson Smith and Mr. J. O. Wilhelm, who have been of great assistance in all the low temperature problems, have carried out a special research on the distribution of magnetic field about superconductors. The results of this work will be reported at the Seventh Congress on Refrigeration, in Holland, in June.

B.

Spectroscopy:

The work in this division has been carried out by A. B. McLay, M. F. Crawford, R. Richmond, S. M. Bateson, M. W. Johns, and C. A. Herald. They have been continuing the work on the hyperfine structure of the spectral lines of various elements. Papers containing the results of the investigations will be published shortly as follows: (1) Hyperfine Structure in Tl III (Thallium); (2) Nuclear magnetic moment of Bismuth; (3) Term analysis of Mercury III and IV.

Chemical Analysis by the Spectroscope.

Mr. Lorne Newman and Dr. E. Cohen have been continuing the work initiated last year on the specific determination of the absorption of ions by colloidal particles.

Miscellaneous spectroscopic work has been carried out as follows: By H. L. Welsh, M.A., on sensitised fluorescence set up in the vapours of other alkali metals by the Sodium D lines; L. B. Leppard, M.A., has concluded his work on the absorption of light by liquid ammonia solutions of the alkali metals; Dr. J. M. Anderson, of the staff of Scarboro Collegiate Institute, has been carrying out, very systematically, in his spare time, a very important experiment on the persistence of the metastable state of atoms.

C.

Electrons and X-Rays:

With the co-operation of Dr. W. H. Kohl, special lecturer in the department, C. E. Hall, B.Sc. (Alberta), holder of the Alumni Federation Fellowship, has been working in the new field of electron optics, and has completed, almost entirely by his own efforts, an electron microscope, of the electrostatic type. This work is so promising that the National Research Council has given the department an assisted research grant for the continuation of this work during the session 1936-37.

Analysis of Mine Dust by X-Rays.

With the support of the Banting Institute, H. H. Bindon, M.A., has been carrying out the X-ray analysis of mine dust by a method developed by Professor G. L. Clark, of the University of Illinois. The necessity of this work was first pointed out to Professor Clark by Professor T. L. Walker of the mineralogy department.

W. F. Oliver, M.A., demonstrator at McMaster University, has been continuing his work on the X-ray spectra of crystalline deposits of various materials.

A. R. Clark, M.Sc. (Sask.), has been continuing the work started by Dr. H. F. Batho, on the diffusion of ions in rare gases.

D.

Miscellaneous:

G. F. Clark, M.Sc. (Sask.), and G. F. C. Tait, M.Sc. (Alberta), have been continuing the work on the diffusion of gases through solids; in particular they have been testing the diffusion of light hydrogen and heavy hydrogen through copper.

L. G. Turnbull, M.A. (Dal.) has held one of the Graduate School fellowships during the past year. He has done a very remarkable piece of work on the dielectric constant of hydrated and dehydrated salts at high frequencies. This work will prove to be of very great importance in the consideration of the crystal structure of these salts.

With the assistance of Mr. Arnold Pitt, of the staff, D. W. R. McKinley has been developing an apparatus for a new determination for the velocity of light, using the properties of oscillating quartz crystals. This investigation also is a promising one, and the National Research Council has given the department an assisted research grant to continue this work during the session 1936-37. Under the direction of Professor John Satterly (with Mr. J. R. Levitt).

A continuance of the work on the structure of jets showing how ripples on vertical jets may be utilised to measure values of the surface tension and how they are related to the stream line motion in the liquid. Admirable photographs have been taken of ripples on water and mercury jets and the measurements linked up to hydrodynamic theory.

An experimental study of the so-called parabolic jets of liquids have been undertaken in order to see how nearly such jets conform to parabolic arcs. Contrary to common ideas the jets are not parabolas, but the range on the down side is greater than the range on the upside. This was foretold in some recent work by Levi-Civita

but even here the mathematician does not seem to have all the truth. The discrepancies have been carefully measured.

Under the direction of Professor L. Gilchrist.

During the summer of 1935 the following geophysical studies were made in the Sudbury Basin district, with the assistance of F. J. P. Consitt, F. A. O. Banks, J. E. Reid and H. Strangways.

(a) Location of a body of pyrrhotite in Falconbridge township by magnetometric measurements on the surface of the ground.

(b) Correlation of surface magnetometric measurements and self potential measurements with the probable existence of an extensive deeply placed pyrrhotite ore body in McLennan township.

(c) Preliminary study of the effect of geological structure on the transmission of radio waves.

Professor H. A. McTaggart has been studying the conditions under which monomolecular films of Barium Stearate, spread on a water surface, may be transferred from the water to glass surfaces. He has succeeded in producing some very remarkable layers of films, which were exhibited at the meeting of the Royal Society in Ottawa, May, 1936.

Just previous to coming to Toronto, Dr. B. Haurwitz had shewn that "the vertical wind distribution in the lowest layers of the atmosphere is greatly modified if the isobars and streamlines of the air are curved as in cyclones and anticyclones." He has continued his work by investigating the influence of eddy viscosity in curved air currents. In connection with a study of the origin of extratropical cyclones as waves on the polar front (according to V. Bjerknes) which is in progress, results were obtained which have a bearing on atmospheric tides. Since internal surface waves cannot appreciably modify the free periods of the whole atmosphere it seems that the discrepancy between computed and observed tides can only be overcome by the assumption that the tidal oscillations are almost auto-barotropic, i.e., a particle which was once in equilibrium with its surroundings will always remain so. A report was given at the meeting of the Royal Society of Canada in Ottawa, May, 1936.

Physiology, under direction of Professor C. H. Best

The teaching and research work of the department was conducted this year with the help of an enthusiastic group of junior members of the staff. Dr. C. Beecher Weld was appointed head of the department of physiology of Dalhousie University and was granted leave of absence for the months of April, May and June. He spent this time in London, England. The head of the department was appointed a guest lecturer at Yale University and gave a series of lectures on respiration and carbohydrate and fat metabolism.

Dr. Robert Kerr and the head of the department have been very much interested in the physiological effects of protamine insulin. Several members of the colony of diabetic dogs have been very successfully maintained on the new material. Dr. Kerr accepted invitations to discuss the results of this work at medical meetings in Atlantic City and in Kansas City.

Professor N. B. Taylor, with Dr. C. B. Weld and Dr. J. F. Sykes, has continued his researches on calcium metabolism as related to the action of the parathyroid hormone and irradiated ergosterol. The phenomenon of tolerance to parathormone and irradiated ergosterol, as exhibited by dogs receiving repeated doses of these agents, was investigated. A report of these experiments has been published. With the help of Dr. A. C. R. McGonigle, who devoted this year to research in the department, work upon intestinal obstruction was extended and a study made of the possible rôle played by dead muscular tissue in the causation of surgical shock. Dr. Sykes in a series of ultra-filtration experiments investigated the diffusible and non-diffusible fractions of the serum calcium in dogs and the effects upon them, respectively, of parathormone, irradiated ergosterol, parathyroidectomy and the calcium

intake level. The results of this investigation formed the basis of Dr. Sykes' thesis for his Doctor of Philosophy degree which he obtained this year.

In collaboration with Miss J. P. Griffiths, Dr. E. T. Waters has conducted further work on the metabolism of fructose in mammals. The rapidity with which the liver converts this sugar to some other substance, presumably to glucose, either directly or indirectly, has been shown by the very small amount of fructose present in the hepatic tissue of rats absorbing fructose from the intestine. They have been able to demonstrate for the first time that the liver is not the only organ of the body which can effect this conversion. Certainly when fructose is added to the perfusing fluid of a canine heart-lung preparation there is some utilisation of fructose, with a small but definite conversion to glucose. They are of the opinion that this conversion occurs in the lungs. Glucose-free blood has been prepared for use as perfusing fluid in these latter experiments. Using this blood, which has a number of obvious advantages, they have also investigated the utilisation by the heart and lungs of the substances, such as fatty acids, lactic acid, dihydroxyacetone and glyceraldehyde.

With Dr. A. H. W. Caulfield and Dr. M. H. Brown, Dr. Waters has made further studies on ragweed pollen sensitisation. By the addition of 1 per cent alum to an aqueous extract of ragweed pollen it is now possible to induce a high degree of sensitisation to the pollen in practically all guinea-pigs receiving an intravenous injection of the material. Inability to sensitise successfully more than a small proportion of injected guinea-pigs has been in the past a serious obstacle to obtaining conclusive results in some of these experiments. It has been established that the carbohydrate fraction of ragweed pollen does not bring about anaphylactic shock in animals highly sensitised to ragweed pollen. Recently the very encouraging result that carbohydrate when injected a few minutes before a shocking dose of antigen blocks the otherwise fatal anaphylaxis, has been obtained.

It has been generally assumed, chiefly on the basis of oral administration of lactate, that synthesis of lactic acid to glycogen in the liver is a normal step in the "carbohydrate cycle". Evidence that lactic acid is removed by the liver is satisfactory but (except in the case of oral administration) increases in liver glycogen subsequently have not been consistently demonstrated. The factors influencing deposition have been studied by Dr. Rhoda Grant, and the state of the liver with regard to fatty acid concentration has been found to be of importance.

An attempt has been made by Dr. J. M. Hershey to confirm the findings of Asher and his colleagues, that certain extracts of thymus glands produce remarkable effects on the development of white rats. The experimental procedure so successful in the hands of Rowntree has been followed. The onset of warm weather will delay or prevent the completion of this work, but no significant new findings have thus far been secured.

Psychiatry, under direction of Professor C. B. Farrar

Investigations being carried on in the department included studies in The Pathogenesis of Suicide, The Origin and Significance of Ideas of Reference, The Socialisation Factors Involved in Foster Home Placement and in the Treatment of Children with Conduct Disorders, The Relationship of Thyroid Conditions to Anxiety States, Metabolism Studies in Acute Febrile Excitement, The Etiology of Subdural Hematoma in Psychiatric Material, Neuropathology of States of Acute Excitement.

Psychology, under direction of Professor E. A. Bott

During the session 1935-6, fifty-three graduate students took instruction in psychology. Of these, twenty-seven were engaged upon special problems and the remainder were taking course work of graduate character; eleven were enrolled from other departments. One student completed the requirements for the Ph.D. degree in psychology, and six the requirements for the M.A. degree. The names of these candidates and the titles of their theses follow:

For the degree of Doctor of Philosophy:

Mrs. E. Palter—The Variability of Performance in Normal and Depressed Subjects.

For the degree of Master of Arts:

D. L. McEachern—Effect of dictation by meaningful groups of words on shorthand speed.

Mrs. D. Rabinowitch—Effects of success and failure on learning.

Miss M. L. Rean—Factors related to occupational preference of High School boys.

Miss M. D. Salter—Attitudes and the galvanic skin response.

W. V. Trott—Accuracy of arm movements in a horizontal working space.

G. H. Turner—An objective study of analogical and analytical reasoning.

Two important changes have been introduced this session in the plan of graduate instruction for students proceeding to higher degrees in psychology, the first concerning the advanced programme that qualifies students as candidates for the Ph.D. degree, the second concerning the programme for beginning graduates.

For several years a single preliminary examination on four papers had been used in psychology as a means for accepting students as candidates for the Ph.D. degree. This plan was found not to guarantee sufficient knowledge on all the essential branches of the subject and hence this plan has now been eliminated in lieu of a plan defined in two stages which respectively concern all the academic conditions and then the special thesis work. Students will be formally accepted by the department as candidates for the Doctor's degree only when all requirements for the academic stage have been certified.

The other change is on behalf of beginning graduate students who aim at the Master's degree in two years. Owing to our large enrolment of graduates from various courses and institutions, difficulty had been experienced in appraising their training and acquainting them at the outset with the possible lines of specialisation in our subject so that they might choose intelligently a branch upon which they would concentrate. The situation presented a problem in student guidance which required co-operative effort of all the staff for solution. As a pedagogical project the staff has therefore combined in organising a new compulsory course for beginning graduates, called introduction to research, which will bring all beginners into contact during the year with each of the major divisions of graduate work in psychology and each of the senior members of staff. Specialisation will then be deferred largely until the second year, when these students will have had a wider range of experience and opportunity for more intimate consultation than heretofore with all members of staff in the department.

During the year members of our staff have been engaged on special researches, individually and in groups. The previous plan of having joint appointments and research responsibilities between our staff and other staffs in the University and in public services outside the University has been continued and extended. This co-operation now obtains with the Ontario Department of Health (Mental Hospitals Branch), The Canadian National Committee for Mental Hygiene, Accident Prevention Associations in Ontario, The Toronto Juvenile Court Clinic, The Infants' Home and the Big Brother Association of Toronto, and the Department of Paediatrics (Animal Nutrition Laboratory) of the University. Mr. C. R. Myers through his connection with the Ontario Mental Hospitals has conducted an extensive study from case history materials of the causes of Mongolism. Professor W. Line working in association with the National Committee for Mental Hygiene and the Toronto Board of Education has developed a programme of study in the Primary School Grades designed to eliminate grade repetition and its psychological effects during the first three years of the Public School. Dr. K. S. Bernhardt, working with the research staff of the Paediatric Animal Laboratory, has supervised two studies on the effect of controlled deficient diets on the learning ability of litters of young white rats. It is

expected that these studies will furnish important leads in the clinical control of diets for children. Professor G. P. Cosgrave has continued the development of sensory and motor tests for use in differentiating accident prone and non-accident prone industrial employees. Dr. K. H. Rogers, whose work as director of the psychological clinic of the Infants' Home for the past two years has greatly contributed to the problems of foster child placement, was appointed in April, director of the work of the Big Brother Association in Toronto. This appointment, in charge of one of the leading agencies in the preventive field of child behaviour, furnishes an invaluable contact for psychological research and the training of graduate students. Dr. Rogers continues on our staff as a special lecturer. His former work at the Infants' Home has been taken over by a research assistant in psychology, Dr. Donald Snygg.

On the side of laboratory research, Professor Bott in collaboration with Mr. H. C. H. Miller has devised improved methods of studying the time relations of muscle action in complex voluntary movements; and with Mr. S. Glen, photographic registration of eye-movements in the visual observation of reversed perspective.

Professor S. N. F. Chant has engaged in four lines of investigation attitude measurement with special reference to emotional correlates and their significance for mental health; a study upon forms of reasoning; work upon methods of factorial analysis in psychological research; and the educational adjustment and mental health of individual students.

In the industrial and accident research laboratory established last year, Professor G. P. Cosgrave conducted an experimental study upon the effect of amount and direction of arm movement within the range of manual working space, with results that are applicable in the planning of repetitive industrial tasks. His development of a scale for measuring the attitudes of workers towards their jobs has continued.

In the comparative laboratory Dr. D. Snygg, working under Dr. Bernhardt, completed and published three studies upon fundamental characteristics of the learning process, which have attracted wide and favourable notice.

In social psychology, Professor J. D. Ketchum has continued the problem of analysis of life histories contributed autobiographically by young adults. Qualitative analysis has also been applied by Professor Line in evaluating certain thought forms characteristic of schizophrenic patients and those characteristic of persons possessing various levels of intelligence as measured by standard tests.

Research in the division of child psychology, conducted under the St. George's School for Child Study, will be separately reported by Professor W. E. Blatz, chairman of the University Committee on research in Child Study in Parent Education since 1934-5.

Surgery, under direction of Professor W. E. Gallie

During this year the research being conducted by Professor Best and Dr. Gordon Murray on the clinical uses of heparin has been brought to such a stage that it may now be used on patients. In order that it may be properly studied in the hospital, one of the assistant fellows, Dr. Wilkinson, has been released for six months from his regular clinical work in order that he may study those patients in whom heparin is used. It is hoped that the drug will prove of value in preventing thrombosis in blood-vessels which have been operated upon, and will lessen the incidence of pulmonary embolism after operations. This research will be continued by the departments of physiology and surgery.

The alliance of the departments of radiology and surgery continues to work satisfactorily and a most important clinical investigation is being conducted there by Drs. Richards and Wookey on oral cancer. Hundreds of cases are under constant observation and within a short time it will be possible for these gentlemen to issue an authoritative statement as to the prognosis and treatment of this disease.

Similar studies are being conducted by Dr. Richards along with Dr. R. M. Janes and Dr. R. I. Harris, on cancer of the breast and sarcoma of bone, and progress is being made.

Clinical studies of the action of staphylococcus antitoxin and toxoid are being conducted at the Hospital for Sick Children by Dr. Keith and at the General Hospital by Dr. Welsh. As the number of patients is small, it will be a long time before any authoritative statement can be made, but the study will be continued until the action of these products is well understood.

The study of nerve regeneration being conducted by Dr. Sullivan of the department of oto-laryngology, Dr. Linell of the department of pathology and Dr. Keith of the department of surgery continues. It should be brought to completion within a year.

The department of surgery, through Dr. Gordon Murray, has been of assistance to the department of pathological chemistry in a most promising research on the function of the kidney, being conducted by Drs. Urquhart, Nicholson and Selby.

Therapeutics, under direction of Professor R. F. Farquharson

Research work in the department of therapeutics is closely linked with similar activities in the department of medicine. Dr. J. C. Sinclair was appointed research fellow in therapeutics. He has continued the study of the effects of the prolonged administration of large doses of irradiated ergosterol to patients suffering from parathyroid tetany, with especial attention to the prevention of cataract. He has made careful observations concerning the relative efficacy of different calcium salts in tetany and other conditions. In this work he has been assisted by Mr. H. W. Wakefield, research assistant in the department of medicine.

Dr. Sinclair and Mr. Wakefield have also continued the study of pigment metabolism in various conditions. They have made interesting observations on the effect of diet rich in meat protein on the excretion of urobilinogen and on the effect of ingestion of certain preparations of bile salts on pigment excretion.

Report on Research in the Faculty of Dentistry

The various departments of the Faculty have been carrying on as much research as possible in the limited time available for such purposes.

Dr. Harold K. Box, research professor in periodontology, has continued his experiments on tooth mobility in sheep as affected by certain insufflation procedures. He also has been engaged on the problem of edema of the gingival tissues. The results of these studies are to be published at an early date. Further investigations have been carried out on the red bone-marrow of human jaws, especially in relation to bone resorption, and the findings have been recently published. Mr. A. F. Fenton, the research technician in this department, has been engaged in the study of mechanism concerned in the extrusion of fully-developed teeth, and certain new phases of the problem are being further pursued.

Professor F. M. Lott was awarded the M.Sc. (Dent.) degree for his study of the physical, chemical and biological factors involved in the use of glass as a denture base. The techniques used in this process are familiar to the dental profession and I feel that this form of denture service will be used in the practice of dentistry.

Miss D. F. J. Berry is proceeding with a study of phosphatase in saliva under the direction of Dr. Arthur Ham, department of anatomy.

Dean A. W. Lindsay, on furlough from West China Union University, received the M.Sc. (Dent.) degree on his exhaustive study of dental education and practice with special reference to the present national, social and public dental health requirements of China.

Dr. H. A. Cominsky was awarded the B.Sc. (Dent.) degree for his histopathological study of the supporting tissues of the tooth in retarded healing following extraction, which was under the direction of Dr. H. K. Box and Dr. J. H. Johnson. His thesis has added some knowledge on this controversial condition and Dr. Cominsky hopes to proceed further with this study next year.

Dr. G. B. Shillington began a study of the relationship of Vitamin C deficiency to dental disease, with special reference to animal experimentation, under the direction of Dr. Arthur Ham, department of anatomy.

Dr. E. C. Purdy has been associated with Dr. Ham on research in the field of calcium metabolism. This investigation is to study the relationship of alteration in serum to the structure of teeth and bones as affected by parathormone and dietary deficiencies.

School of Engineering Research, Faculty of Applied Science and Engineering

The progress of the School of Engineering Research has been retarded during the past year by lack of funds for the employment of research assistants in sufficient number. New problems which several members of the staff were desirous of attacking could not be undertaken and some problems had to be left in an unfinished condition.

It is highly desirable that the funds for research in this Faculty be increased, so that this research movement, which has had such an encouraging beginning, may continue to exert its beneficial influence upon staff and students, and to increase both in quality and quantity its contribution to new processes, to engineering practice, and to the sciences underlying applied science and engineering.

Following is a brief description of researches which have been in progress during the past year.

Department of Civil Engineering

Under the direction of Professor C. R. Young

The investigation of lateral support of steel columns has been brought a little nearer solution. It is hoped to complete the paper this summer.

Under the direction of Professor T. R. Loudon

The following researches were commenced:

- (1) An investigation of the compression properties of rubber at low temperature.
- (2) An investigation of the effect of excessive stagger with small gap of biplane airfoil arrangement.
- (3) A study of the effect of decalage of airfoil arrangement of number 2.

Department of Mining Engineering

Under the direction of Professor H. E. T. Haultain

- (1) The study of apparatus for size analysis of finely ground ore has been continued.

(with W. E. Mickelthwaite)

- (2) A study has been made of the viscosity of mill pulps, that is, of a mixture of water and solid particles in suspension.

Under the direction of Professor F. C. Dyer

The investigation of methods for the concentration from soil of the contained weed seeds has been completed and a report sent to the Seeds Branch of the Dominion Department of Agriculture.

The research on the cleaning of seeds and the separation from weed seeds has been continued. A method for removing Dodder seed from clover seed has been devised.

Under the direction of Professor J. T. King

The investigation on methods of determining gold and silver in cyanide solutions has been continued. Methods in use in Ontario mines and elsewhere have been studied, in an effort to ascertain the causes of inaccuracy in results obtained by the use of some of them.

Department of Mechanical Engineering

Under the direction of Professor R. W. Angus

(1) The theoretical investigation of various phases of water hammer and the construction of graphical methods for the solution of such problems has been continued.

(with J. B. Bryce)

(2) An experimental investigation was commenced of water hammer in pipes, and a study of the value of the indicator as an instrument for recording such phenomena.

(3) A model of the dam at the Abitibi Canyon, and of the discharge gates was constructed and experiments were made on the water flow, and a number of coefficients were obtained with different quantities of flow. These experiments have proved of great interest to the engineers of the Hydro-Electric Power Commission.

(with G. R. Lord)

(4) A study was made, using a scale model, of the wind pressures on the roof of an airship hangar for various angles of wind.

Under the direction of Professor E. A. Allcut

(with F. G. Ewens)

Researches on the heat transmission of building materials have been continued on the 24-inch and 8-inch hot plates. Considerable discrepancies have been found between the published results and those obtained with thick specimens on the larger plate. These differences appear to be characteristic of packed fibrous materials and the research is being continued to ascertain the reasons for them.

Department of Applied Physics

Under the direction of Professor K. B. Jackson

A research on illumination for the inspection of specularly reflecting materials was commenced.

(with D. H. Hamly)

The investigation of photographic sensitometry and the characteristics of available photographic materials was continued.

(with D. H. Hamly and V. L. Henderson)

The photometry of microscope illumination and the design of a microscope lamp was in progress.

Department of Chemical Engineering

Under the direction of Professor M. C. Boswell

(with W. R. Cale and G. R. Davidson)

Iron and copper compounds of humic acids made from peat and cellulose have been synthesised and the catalytic properties of the former compound studied.

(with L. J. Bohn and K. Patrick)

An improvement in the technique for the quantitative determination of methyl groups connected to nitrogen has been devised.

(with J. A. Rolls)

A new method for the quantitative estimation of inosite has been devised, which is much simpler to carry out than the existing method and possesses a higher degree of accuracy.

(with E. A. Dorfman)

The research on the catalytic reduction of sulphur dioxide by carbon monoxide and steam has been continued. This is a highly efficient process in the laboratory. The catalyst also accelerates the production of hydrogen from carbon monoxide and steam. The results of this investigation were presented at the Convention of the Canadian Chemical Association in June.

(with W. H. Rapson and G. T. Eaton)

A research was commenced on the synthesis of creatinine.

Under the direction of Professor E. G. R. Ardagh

(with W. H. Bowman)

Additional work on the chemistry of thiophene has been carried out.

A research is in progress on the preparation and chemistry of the phenolic derivatives of certain long chain acids of the aliphatic series. The results of this research were presented at the Convention of the Canadian Chemical Association in June.

The investigation of the mechanism of the corrosion of iron in sodium chloride solutions was continued.

(with E. B. Storey)

Some progress has been made in a research dealing with the occurrence of selenium in the cereal grains of Ontario.

Under the direction of Professor R. R. McLaughlin

(with K. R. Hymmen)

An extension of the existing semi-micro method for estimating carbon and hydrogen in compounds containing nitrogen and halogens was continued.

Under the direction of Professor E. A. Smith

(with G. V. Jansen and F. B. Pickett)

The investigation of the absorptive properties of silk and their relation to the fibre structure has been continued during the past year. The diameter of intermicellar spaces in dry natural silk has been studied.

(with G. P. Beal and A. R. Thompson)

An analytical method for the determination of aluminium in clays using 8-hydroxyquinoline has been developed and a method of producing aluminium sulphate from Northern Ontario clays using sulphur trioxide has been investigated.

(with R. P. Bigger)

An investigation of the syntheses of side-chain halogenated cresols has been commenced.

Department of Electrical Engineering

Under the direction of Professor H. W. Price

Following the development and installation of an automatic frequency regulator, studies were made of numerous records and charts showing the history of events with this control. The purpose was to find how the regulating apparatus and generators under control could best be made to meet the very varied requirements of operating conditions.

St. George's School for Child Study, under direction of Dr. W. E. Blatz

This year the School has completed the ten year experimental period assigned to it for proving the value of the child development project suggested by the Rockefeller Foundation when the grant was made.

The continuous record study of child development, begun in 1926, is going forward steadily and, in addition to studies made by graduate students, an investigation into methods of home discipline is in progress. During the past year also a special study of the effects of certain food elements on mental activity has been carried on in co-operation with the Hospital for Sick Children.

The Nursery School Division has widened its scope by acting in several instances as an advisory centre to other organisations or persons planing play-schools and playgrounds for pre-school children. A film showing activities throughout the nursery school day has been made and is being used to familiarise the public with nursery school ideals.

The Parent Education Division continued its study groups and its leadership course, having this year 13 extramural groups led by student leaders in training, as against 4 of these in 1930-31, the second session of the course. In addition, 27 groups were conducted in Toronto by former staff members and students. Membership in the regular School groups, led by members of staff, was considerably increased in two instances, where groups were administered by the University of Toronto Extension Department. The average membership in these two courses was four times the average membership in the five other courses conducted during 1935-36 by the School.

Advice and suggestions have been given, by mail and through personal visits of staff members, to the University of Manitoba, which is inaugurating a programme of child study in co-operation with the local Child Study Association in Winnipeg.

Publications include three additions to the University Studies in Child Development and a book on the School Age Child is about to go to press.

M.A. Theses, 1935-36:

The effects of success and failure on learning—D. Rabinowitch.

Factors related to the occupational preferences of high school boys—M. Rean.

(13) PUBLICATIONS

FACULTY OF ARTS

DEPARTMENT OF ANTHROPOLOGY

McIlwraith, T. F.—*Recent Publications Pertaining to Canada: VIII, Ethnology, Anthropology and Archaeology.* (Canadian Historical Review, March, 1936, pp. 116-124).

DEPARTMENT OF ARCHAEOLOGY

White W. C.—*A Bronze "Fu-Sang Tree" Lamp.* (Illustrated London News, January 11, 1936).

Chinese Jews. (Asia, January, 1936).

Bronze Lamp with a Phoenix on a Tortoise (28 B.C.). (Illustrated London News, April 4, 1936).

Chinese Jews. (The Jewish Tribune, Montreal, April, 1936).

DEPARTMENT OF ASTRONOMY

Hogg, F. S.—*The Application of the Spectrograph to Astronomy.* (Journal R.A.S.C., Vol. 30, pp. 35-47, 1936).

Hogg, F. S., and Hogg, Mrs. H. S.—*The Opening of the David Dunlap Observatory.* (Journal R.A.S.C., Vol. 29, pp. 235-298, 1935).

- Millman, P. M. and Robins, J. A.—*Some Properties of Enduring Meteor Trains*. (Publications A.A.S., Vol. 8, p. 147, 1935).
- Millman, P. M.—*Meteor News*. (Journal R.A.S.C., 1935).
- Young, R. K.—*The Hilger Spectrograph of the David Dunlap Observatory*. (Publications A.A.S., Vol. 8, pp. 230-231, 1936).
- The David Dunlap Observatory*. (Journal R.A.S.C., Vol. 29, pp. 299-308, 1935).
- The Application of the Spectroscope to Astronomy*. (Journal R.A.S.C., Vol. 30, pp. 1-13, 1936).

DEPARTMENT OF BIOLOGY

- Craigie, E. H.—*Some features of the pallium of the cassowary (Casuarus uniapendiculatus)*. (Anat. Anz., Bd. 81, pp. 16-28).
- Craigie, E. H. and Henderson, V. E.—*On the respiratory centre*. (Am. Jour. of Physiol., Vol. 115, pp. 520-529).
- Fisher, K. C.—*The respiratory system which maintains the heart in embryonic fish*. (Proc. Am. Physiol. Soc., March, 1936).

- The Evidence Presented before the "Canadian Macmillan Commission".* (The Canadian Journal of Economics and Political Science, Vol. 2, No. 1, February, 1936).
- Plumptre, A. F. W. and Gibson, J. D.—*The Economic Effects of Recent American Monetary Policies on Canada.* (Published by the Canadian Institute of International Affairs).

DEPARTMENT OF PSYCHOLOGY

- Bernhardt, K. S.—*The Selection and Guidance of College Students.* (The Ontario Vocational Guidance Association, Bulletin No. 5, September, 1935).
- Bott, E. A.—*Undergraduate Instruction in Psychology.* (Journal of Amer. Assoc. of Medical Colleges, Vol. II, No. 4, 1936).
- Chant, S. N. F.—*Leadership.* (The Canadian Credit Institute, September, 1935).
- Review of "Personality Maladjustments and Mental Hygiene," by J. E. Wallin.* (Psych. Bulletin, April, 1936).
- Chant, S. N. F. and Myers, C. R.—*An Approach to the Measurement of Mental Health.* (Amer. Journal of Orthopsychiatry, January, 1936).

- Cosgrave, C. P.—*The Will to Work*. (The Canadian Credit Institute, Bulletin No. 56, November, 1935).
Collection of Occupation Information. (The Ontario Vocational Guidance Association, Bulletin No. 13, June, 1936).
- Ketchum, J. D.—*Guiding and Personality Development*. (The Canadian Guider, Vol. 3, No. 6, November, 1935).
Sex Education: Why, When and How. (The Canadian Mentor, Vol. 18, No. 3, February-March, 1936).
- Line, W.—*Mental Hygiene, Research and Teacher Training*. (Co-author). The School. Vol. 24, No. 7, 1936).
- Snygg, D.—*The Relative Difficulty of Mechanically Equivalent Tasks: I. Human Learning*. (Journal of Genetic Psychology, Vol. 47, pp. 299-320, 1935).
The Relative Difficulty of Mechanically Equivalent Tasks: II. Animal Learning. (The Journal of Genetic Psychology, Vol. 47, pp. 321-336, 1935).
Mazes in which Rats take the longer Path to Food. (The Journal of Psychology, Vol. I, pp. 153-166, 1936).

CHILD PSYCHOLOGY (ST. GEORGE'S SCHOOL)

University of Toronto Studies: Child Development Series.

- Blatz, W. E. and Ringland, Mabel Crews—*A Study of Tics in Pre-school Children*. (University of Toronto Press, 1935).
- Blatz, W. E. and Millichamp, D. A.—*The Development of Emotion in the Infant*. (University of Toronto Press, 1935).
Outlines for Parent Education Groups: Pre-school Learning; Staff of St. George's School for Child Study, Parent Education Division. (University of Toronto Press, 1936).
- Blatz, W. E.—*Modern Mental Hygiene*. (Religious Education, July, 1936).
What do the Children think of the Movies? (Chapter 18, in *The Movies on Trial—A Symposium*, edited by Wm. J. Perlman, Macmillans, February, 1936).
- Bott, H.—*The Learning Process; the basis for Educational Programs*. (In *Growth and Development*: Pub. Progressive Educational Association, New York, 1936).
- Millichamp, D. A.—*Nursery School Education*. (Child and Family Welfare, Vol. XI, December, 1935).
The Significance of Play at the Preschool Level. (Child and Family Welfare, Vol. XII, January, 1936).
The Role of the Nursery School Child. (Child and Family Welfare, Vol. XII, March, 1936).

FACULTY OF MEDICINE

DEPARTMENT OF ANATOMY

- Grant, J. C. B.—*On the Frequency and Age Incidence of Duodenal Diverticula*. (The Canadian Medical Association Journal, No. 33, pp. 258-262, 1935).
An Anomalous Duodenal Pouch. (The British Journal of Surgery, Vol. XXIII, No. 89, 1935).
- Siddiqui, M. A. H.—*Variations in the lower end of the femora in modern Canadians and in American Indians*. (Journal of Anatomy, April, 1936).
Development and homology of the penile urethra and associated glands in the Spermophile (Citellus Tridecemlineatus). (Journal of Anatomy).
The prostatic utricle in the male Spermophile. (Journal of Anatomy).

Siddiqui, M. A. H. and Le Masurier, H. E.—*The microscopic anatomy and homology of the end of the penis of the Indian Ground Squirrel (Funambulus Palmarum)*.

DEPARTMENT OF BIOCHEMISTRY

- Beall, D.—*Some notes on the isolation of oestrone and equilin from the urine of pregnant mares.* (Biochem. J., Vol. XXX, No. 4, pp. 577-581, 1935).
- Brown, A. W. A.—*The excretion of ammonia and uric acid during the larval life of certain muscoid flies.* (J. Exp. Biol., Vol. XIII, No. 2, pp. 131-139, 1936).
Miscellaneous physiological observations on the laboratory breeding of flesh flies and of Melanoplus bivittatus Say. (Can. Entomologist, April, 1936).
- Cohen, S. L. and Marrian, G. F.—*The Hydrolysis of the combined forms of oestrone and oestriol present in human pregnancy urine.* (Biochem. J., Vol. XXIX, No. 7, pp. 1577-1585, 1935).
The isolation and identification of a combined form of oestriol in human pregnancy urine. (Biochem. J., Vol. XXX, No. 1, pp. 57-65, 1936).
- Farber, L.—*Applications of pervaporation.* (Science, Vol. 81, p. 158, 1935).
- Farber, L. and Wynne, A. M.—*Studies on pancreatic proteinase I.* (Biochem. J., Vol. XXIX, No. 10, pp. 2313-2322, 1935).
Studies on pancreatic proteinase. II. The effects of various compounds on the activity of the enzyme. (Biochem. J., Vol. XXIX, No. 10, pp. 2323-2330, 1935).
- Johnston, W. W. and Wynne, A. M.—*The amylase of Clostridium acetobutylicum.* (Jour. Bacteriology, No. 30, p. 491, 1935).
- Marrian, G. F. and Beall, D.—*The constitution of equol.* (Biochem. J., Vol. XXIX, No. 7, pp. 1586-1589, 1935).
- Weinstein, S. S. and Wynne, A. M.—*Studies on the pancreatic lipase I.* (J.B.C., No. 2, p. 112, 1936).
Studies on pancreatic lipase. II. Influence of various compounds on the hydrolytic activity. (J.B.C., No. 2, p. 112, 1936).

DEPARTMENT OF MEDICINE

- Caulfeild, A. H. W.—*Tulip Fingers.* (Canadian Medical Ass. Journal, Vol. 34, pp. 506-510, 1936).
- Caulfeild, A. H. W., Brown, M. H. and Waters, E. T.—*Experiments to determine whether the allergically active substance in Ragweed Pollen Extract is a single entity or multiple.* (The Journal of Allergy, St. Louis, Vol. 7, No. 1, November, 1935).
- Elliott, J. H.—*Pneumonia.* (Bulletin of the Academy of Medicine, Toronto, October, 1935).
- Trow, E. J.—*Industrial Dermatoses.* (Industrial Hygiene Section at the National Conference of the Canadian Public Health Association with the Ontario Health Officers' Association, The Canadian Tuberculosis Association, and the Canadian Social Hygiene Council, Toronto, June, 1935).
Oriental Sore—Report of a Case. (American Dermatological Association at Swampscott, Mass., June 6th, 1936).

DEPARTMENT OF MEDICAL RESEARCH

- Armstrong, A. R.—*Purification of the Active Phosphatase Found in Dog Faeces.* (Biochem. Jour., Vol. XXIX, No. 9, pp. 2020-2022, 1935).
- Banting, F. G. and Gairns, S.—*Resistance to Rous Sarcoma.* (Can. Med. Assoc. Jour., Vol. XXX, pp. 615-619, 1934).

- Belt, T. H., Irwin, D. and King, E. K.—*Silicon and Dust Deposits in the Tissues of Persons without Occupational Exposure to Siliceous Dusts*. (Can. Med. Assoc. Jour., Vol. 34, pp. 125-133, 1936).
- Botterell, E. H. and King, E. J.—*Phosphatase in Fractures*. (The Lancet, p. 1267, June, 1935).
- Coles, B. C.—*The Tissue Reaction to (Particle-free) Silica Solutions*. (Royal Society of Canada, 1936).
- Ettinger, G. H. and Hall, G. E.—*Synergy of Adrenaline and Acetylcholine on the Pulmonary Blood-Vessels in the Rabbit*. (Quart. J. Exp. Phys., Vol. 27, No. 3, October, 1935).
- Fallon, J. T. and Banting, F. G.—*The Cellular Reaction to Silica*. (Can. Med. Assoc. Jour., Vol. 33, pp. 404-407, 1935).
- Fallon, J. T.—*Specific Tissue Reaction to Phospholipids*. (Royal Society of Canada, 1936).
- Franks, W. R. and Watt, A. J.—*The Phagocytosis of Silica by Surviving Leucocytes*. (Trans. Roy. Soc. of Can., Sect. V, p. 43, 1934).
- Hall, G. E., Ettinger, G. H. and Banting, F. G.—*An Experimental Production of Coronary Thrombosis and Myocardial Failure*. (Can. Med. Assoc. Jour., Vol. 34, pp. 9-15, 1936).
- Irwin, D.—*The Experimental and Pathological Aspects of Silicosis*. (Annals Int. Med., Vol. 9, No. 5, November, 1935).
- Outhouse, E. L.—*Amino-Ethyl Phosphoric Ester from Tumours*. (Biochem. Jour., Vol. XXX, pp. 197-201, 1936).
- Ross, J. R. and Lucas, C. C.—*A New Method for the Determination of Minute Amounts of Lead in Urine*. (J. Biol. Chem., No. 2, p. 111, October, 1935).
- Tait, H. and King, E. J.—*The Oxidation of Lecithin and other Fatty Substances in the Presence of Gluthathione*. (Biochem. Jour., Vol. XXX, pp. 285-290, 1936).
- Watson, J. K. and King, E. J.—*Salts of Silico-Molybdic Acid with Organic Bases: The Gravimetric Determination of Small Amounts of Silica as Pyramidon-Silicomolybdate*. (Mikrochemie, Vol. 20, pp. 49-56, 1936).

DEPARTMENT OF ORSTETRICS AND GYNAECOLOGY

- Frawley, D'A.—*Edometriosis—Diagnosis and Treatment*. (Bulletin of the Academy of Medicine, Toronto, May, 1936).
- Henderson, D. N.—*The Treatment of Menorrhagia and Metorrhagia by Anterior Pituitary-Like Hormone*. (Canadian Medical Association Journal, No. 32, p. 615, 1935).
- Johnston, H. W.—*A Case of Carcinoid Appendix*. (Canadian Journal of Medicine and Surgery, No. 79, pp. 81-83, March, 1936).
- Mann, J.—*The Mechanism of Rotation in Occipito-Posterior Positions*. (Canadian Medical Association Journal, December, 1935).

DEPARTMENT OF OTO-LARYNGOLOGY

- Burnham, H. H.—*An Anatomical Investigation of Blood Vessels of the Lateral Nasal Wall and Their Relation to Turbinates and Sinuses*. (Journal of Laryngology and Otology, No. 50, pp. 569-592, August, 1935).
- Calhoun, J. C.—*A Case of Meningitis due to B. Proteus with Recovery*. (Canadian Medical Association Journal, No. 34, pp. 679-680, June, 1936).
- Goldsmith, P. G.—*Treatment of Acute Upper Respiratory Infections*. (Sectional Meeting of the American College of Surgeons, Buffalo, March, 1936).
- The Management of the Common Cold: Infectious Febricula*. (Sectional Meeting of the American Laryngological, Rhinological and Otological Society, January, 1936).

- Goldsmith, P. G. and Ireland, P. E.—*Mixed Tumours in the Nose and Throat*. (Sectional Meeting of the American College of Surgeons, Buffalo, March, 1936).
- Ireland, P. G.—*Association of Toxic Deafness to Toxic Amblyopia*. (Archives of Otolaryngology, No. 21, pp. 459-463, 1935).
- Rhinoscleroma—with report of a case*. (Canadian Medical Association Journal, No. 34, p. 313, March, 1936).
- McGregor, G.—*A Pathological Study of Bone Proliferation in the Accessory Sinuses*. (American Medical Association, Atlantic City, June, 1935).
- Strachan, J. G.—*Foreign Body Trapped by Multiple Strictures of Oesophagus*. (Canadian Medical Association Journal, No. 34, p. 313, March, 1936).
- Acute Otitis Media in Children*. (The Bulletin of the Academy of Medicine, Toronto, June, 1936).
- Sullivan, J. A.—*The Surgical Treatment of Facial Palsy by an Autoplastic Nerve Graft*. (Section of Surgery, Academy of Medicine, Toronto, January, 1936).
- A Review of Fifteen Cases of Facial Nerve Paralysis and Treatment*.

DEPARTMENT OF PAEDIATRICS

- Brown, A.—*Feeding of the New-Born*. (Medical Press and Circular, Vol. CXCI, No. 5033, October 23, 1935, London, England).
- Boyd, Miss G.—*Lobar Collapse in Children*. (J.A.M.A., Vol. 105, p. 1832, December, 7th, 1935).
- Drake, T. G. H., Tisdall, F. F. and Brown, A.—*Further Observations on the Antirachitic Effect of Irradiated Fresh Milk*. (Can. Med. Assoc. Jour., No. 34, p. 279, 1936).
- Irradiated Evaporated Milk in the Prevention of Rickets*. (Jour. Ped., Vol. 8, No. 2, p. 161, February, 1936).
- Johnston, Miss M. M. and Kaake, Miss M. J.—*Bacteria on Fresh Fruit*. (Am. Jour. Pub. Health, Vol. 25, No. 8, p. 945, August, 1935).
- Bacteriological Studies of Three Small Epidemics of Infectious Diarrhoea in Children*. (Jour. Ped., Vol. 7, No. 1, p. 65, July, 1935).
- An Investigation of the Role of Anaerobic Streptococci in Infectious Diarrhoea in Toronto*. (Can. Med. Assoc. Jour., No. 33, p. 632, 1935).
- Morgan, E. A.—*Cyanosis of the New-Born*. (Journal of the American Medical Association, Vol. 105, pp. 1085-1088, October 5, 1935).
- Morgan, E. A. and Brown, A.—*Cyanosis of the New-Born*. (J.A.M.A., Vol. 105, p. 1085, October 5, 1935).
- Robertson, Mrs. E. C.—*Diarrhoea and Typhoid Infections*. (Can. Pub. Health Jour., p. 37, January, 1936).
- Ross, J. R. and Lucas, C. C.—*A New Method for the Determination of Minute Amounts of Lead in Urine*. (Jour. Biol. Chem., Vol. 111, No. 2, p. 285, October, 1935).
- Ross, J. R. and Summerfeldt, Miss P.—*Haemoglobin in Children*. (Can. Med. Assoc. Jour., No. 34, p. 155, 1936).
- Silverthorne, N.—*Paediatrics in Europe*. (University of Toronto Medical Journal, December, 1935).
- Silverthorne, N. and Fraser, D. T.—*Observations on the Action of Human and Animal Blood on the Meningococcus*. (Jour. of Immun., Vol. 29, No. 6, p. 523, December, 1935).
- Snelling, C. E.—*Tetany in the New Born*. (Jour. Ped., Vol. 7, No. 4, p. 465, October, 1935).
- Jaundice in Children*. (Bulletin of the Academy of Medicine, p. 93, January, 1935, Toronto).

- Snelling, C. E. and Brown, A.—*A Case of Hemolytic Jaundice with Bone Changes.* (Jour. Ped., Vol. 8, No. 3, p. 330, March, 1936).
- Snelling, C. E. and Erb, I. H.—*Suprarenal Atrophy.* (Jour. Ped., Vol. 7, No. 5, p. 669, November, 1935).
- Summerfeldt, Miss P.—*Iron and Its Availability in Foods.* (Trans. Section on Pediatrics. A.M.A., 1935).
- Rheumatism in Children.* (University of Toronto Medical Journal, February, 1936).
- Summerfeldt, Miss P. and Johnston, Miss M. M.—*Ketogenic Diet in Persistent Pyuria.* (Arch. Dis. Child, Vol. 10, No. 59, p. 389, October, 1935).
- Tisdall, F. F.—*Inadequacy of Present Dietary Standards.* (Can. Med. Assoc. Jour., No. 33, p. 624, 1935; Trans. Section of Pediatrics, A.M.A., 1935).
- Prevention of Dental Caries and the Improvement of Health by Dietary Means.* (Pennsylvania Medical Journal, December, 1935.).
- Warner, Miss E. N.—*Survey of Mongolism.* (Can. Med. Assoc. Jour., No. 33, p. 495, 1935).

DEPARTMENT OF PATHOLOGY AND BACTERIOLOGY

- Anderson, W. A. D.—*A Histological Study of the Pineal Gland.* (For the degree of M. A.).
- Belt, T. H.—*Demonstration of Small Pulmonary Emboli at Autopsy.* (J. Tech. Methods, No. 15, pp. 39-41, 1936).
- Belt, T. H., Irwin, D. and King, E. J. (With the Department of Medical Research).—*Silicon and Dust Deposits in the Tissues of Persons without Occupational Exposure to Siliceous Dusts.* (Can. Med. Assoc. Jour., No. 34, pp. 125-133, 1936).
- Burchell, H. B.—*A Case of Pernicious Anaemia with Uric Acid Deposits in the Kidneys.* (Can. Med. Assoc. Jour., No. 34, pp. 540-541, 1936).
- Donohue, W. L.—*Studies of the Intervertebral Disc.* (For the degree of M.A.).
- Duff, G. L.—*Experimental Cholesterol Arteriosclerosis and Its Relationship to Human Arteriosclerosis.* (Arch. Path., No. 20, pp. 81-123 and pp. 259-304, 1935).
- Erb, I. H. and Farmer, A. W. (With the Department of Surgery, and the Hospital for Sick Children).—*Ileocolitis; Acute Ileocolitis Simulating Appendicitis and Characterized by Edema of Ileocecal Region and Mesenteric Glands; Its Relation to "Regional Ileitis" or "Chronic Cicatrizing Enteritis".* (Surg. Gynec. & Obst., No. 61, pp. 6-14, 1935).
- Erb, I. H. and Snelling, C. E. (With the Department of Pediatrics).—*Suprarenal Atrophy.* (J. Pediat., No. 7, pp. 465-467, 1935).
- Fetterman, G. H.—*Vascular Lesions in Surgically Excised Stomachs.* (Arch. Path., No. 20, pp. 189-200, 1935).
- Galloway, R. J. M.—*The Changes in the Appearance of the Wall of a Muscular Artery Between Diastolic and Systolic Blood Pressures.* (Am. J. Path., No. 12, pp. 333-340, 1936).
- Holman, W. L.—*Studies on Influenza.* (Am. J.M. Sc., No. 191, pp. 426-446, 1936).
- Josephson, J. E.—*Complement; and the Complement Titre of the Blood Serum in Cases of Lobar Pneumonia and Bronchopneumonia.* (For the degree of B.Sc.(Med.).
- Kerwin, A. J.—*Persistent (Partial) Truncus Arteriosus Associated with Double Aortic Arch.* (J. Tech. Methods, No. 15, pp. 142-147, 1936).
- Klotz, O.—*Tendencies in Modern Medicine.* (Bull. Academy of Medicine, pp. 38-49, November, 1935, Toronto).
- Albrecht von Haller (1708-1777).* (Ann. M. Hist., No. 8, pp. 10-26, 1936).
- Experimental Arteriosclerosis and Its Teaching in Reference to the Aetiology of Human Arteriosclerosis.* (Comptes Rendus de la Deuxième Conférence Internationale de Pathologie Géographique. Utrecht, pp. 120-229, 1934).

- Linell, E. A.—*Some Recent Advances and Events in Neurology*. (University of Toronto Medical Journal, Vol. 12, No. 7, May, 1935).
- Paterson, J. C.—*Vascularization and Haemorrhage of the Intima of Arteriosclerotic Coronary Arteries*. (For the degree of B.Sc. (Med)).
- Magner, W.—*Multiple Intracranial Aneurysms*. (Can. Med. Assoc. Jour., No. 33, pp. 401-403, 1935).
- Nachlas, A., Duff, G. L., Tidwell, H. C. and Holt, L. E.—*Liver function as tested by the lipemic curve after intravenous fat administration*. (J. Clin. Invest., No. 15, p. 143, 1936).

THE UNIVERSITY OF TORONTO QUARTERLY

(*Editor: A. S. P. Woodhouse*)

There has been during the past year a change in the editorial staff: Professor E. K. Brown has resumed a connection of high value to the QUARTERLY by becoming an associate editor. There has also been one innovation in policy. In the opinion of the editor the QUARTERLY was equipped to fill a pressing need in the study of Canadian culture and letters by supplying an annual survey of the literature, creative and critical, produced by Canadians. In collaboration with the associate editors and Miss Alison Ewart, he drew up a scheme for such a survey, and sought the additional aid of Professor E. K. Broadus and Mr. W. S. Milne in carrying it out. The first survey, "Letters in Canada: 1935," appeared in the issue of April, 1936. It consisted of essays on the chief divisions of literature and literary scholarship, followed by a series of bibliographies which had been collected (with conspicuous success) by Miss Ewart. The welcome which the first survey has received, with the many testimonies to its value and interest, has fully justified the experiment. In that experiment the QUARTERLY has found a distinctive work which it can do, and a specific service which it can render to Canadian culture, in addition to its more general function as a journal for the humanities in Canada.

(14) REPORT OF THE DIRECTOR OF UNIVERSITY EXTENSION AND PUBLICITY

(*W. J. Dunlop, Esq., B.A., B.Paed.*)

Among the new ventures in University Extension undertaken during the session, 1935-36, were the one week's course in Municipal Administration, suggested by the President, the summer course for teachers of the deaf, attended by seventy-five men and women, chiefly from the United States, and the correspondence courses conducted for the Certified Public Accountants' Association and the Chartered Institute of Secretaries.

Since this Department was organised in July, 1920, there has not been one session in which there have not been new developments of some kind nor has there been a session in which there has not been an increase in the number of adult men and women taking continuous courses involving serious and sustained study.

University Extension is, of course, one phase of Adult Education and there are many other phases, as has been abundantly made manifest since the organisation of the Canadian Association for Adult Education, of which the director of this department has been president since its inception more than two years ago. But University Extension is, in many respects, the most important phase of Adult Education and it has been gratifying to see one or two universities in Western Canada developing their extension services on the same basis as that laid down here years ago. Properly carried on, university extension courses cover their own cost, apart probably from "overhead", except when instruction is provided for workingmen and women and for farmers, who cannot, under present conditions, be expected to pay the full cost of the service provided for them.

The newest development, one which gives promise of permanence and of expansion, is the provision of courses in Public Administration. The University of Toronto has the honour of being first to enter this field, by co-operating for the past two years with the Canadian Seminar of Public Administration in Ottawa for which Dr. Alexander Brady has been the director and lecturer (and which was attended by 54

men) and by providing the week's course in Municipal Administration last February which was attended faithfully throughout (with seven lectures given each day) by 36 men and 4 women. Negotiations have been in progress for some months for a more pretentious course in this work in Ottawa and arrangements for a six weeks' summer course have been completed.

Another new venture has been a six weeks' summer course in Short Story Writing under the tuition of Dean Vernon McKenzie, a distinguished graduate of this University, who is now Dean of the School of Journalism of the University of Washington, Seattle. Years ago Dean McKenzie was the instructor of classes in journalism for this department and now he returns for a few weeks to the scene of his first teaching. Fifty-three enthusiastic students, some of them university graduates, are enrolled in this new course.

Teachers' Classes, held in the evenings and on Saturdays, for those proceeding to the degree of Bachelor of Arts, have been attended by 603, chiefly, but not exclusively, teachers. In the Summer Session there were 378 in the Pass Course for Teachers, 42 in the courses for prospective specialists, 128 in the courses in Pedagogy, and 466 in the correspondence courses preparing for the Summer Session. Teachers studying Upper School subjects by correspondence numbered 129, and those taking commercial studies numbered 48, while there were 75 teachers of the deaf in the special summer course. In all, 1805 teachers were served and there are 64 others, not teachers, working with the teachers toward the degree. It can now safely be said that no university in the Dominion provides such a complete and such a diversified service for teachers as does the University of Toronto. And the teachers show their appreciation by taking advantage of the facilities, in numbers unequalled anywhere in Canada.

The courses in Occupational Therapy and in Physiotherapy are growing—indeed are now rather beyond the limit of the clinical facilities available—and are not only providing new careers for competent young women but are doing a great public service in training therapists who, under the direction of the physician and surgeon, are able to use modern methods of treatment for the relief of suffering and the healing of those physically and mentally ill. During the session now closing there have been 36 students in the former course and 34 in the latter.

Correspondence courses for business organisations are producing good results in the education and training of men and women engaged in commercial pursuits. These organisations have their own educational charters fix their own courses of study, conduct their own examinations, and award their own diplomas. This department supplies the machinery for conducting the courses and gives advice and assistance when called upon. In the Canadian Credit Institute there were 72 students; in the Chartered Life Underwriters' Association, 125; and in the Certified Public Accountants' Association, 24. The work for the Chartered Institute of Secretaries was established but has not yet actually commenced.

In conversation with directors of university extension in the United States some weeks ago it was learned that the craze for "credit" is much more pronounced in that country than it is in Canada. These directors were amazed when told that between three and four thousand men and women are eager to study in classes arranged for the general public and for workmen, by this University, when for this study no credit of any kind is given, when there are no entrance requirements, no examinations, no certificate, diploma, nor degree. It is encouraging to find so many people anxious to obtain education for education's sake. Our Evening Tutorial Classes are always popular, the enthusiasm remains keen, the attendance does not noticeably fall off during the session; of course, the tutors are carefully chosen and are of the best. It is interesting to grade the subjects according to their apparent popularity, as follows: English diction, 241; public speaking, 227; psychology, 208; journalism, 198; accounting, 189; current events, 185; English literature, 168; conversational French, 146; economics, 138; interior decorating, 125; parent education, 107; modern international relations, 93; German, 74; advertising, 62; modern

history, 56; public administration, 54; astronomy, 53; English composition, 47; business organisation, 45; art, 44; oral interpretation of literature, 42; mercantile law, 40; lip reading, 36; investments, 34; theory and practice of purchasing, 34; metallurgy, 26; internal combustion, 26; secretarial practice, 26; traffic and transportation, 23.

The Workers' Educational Association continues to flourish. Under the title of *Agricola Study Clubs* its work has been extended to the young people on the farms of Ontario; bulletins on economics, written by members of the university staff, have been mimeographed and distributed to members of discussion groups and to individuals who are really interested in study. 309 persons made use of this service for which a nominal fee is charged. Classes have been conducted as follows: *Brantford* (current events), 38; *Fergus* (economics), 40; *Gamebridge* (economics), 25; *Galt* (current events), 40; *Guelph* (economics), 28; *Hamilton* (economics, 28; history, 29; hygiene, 28; journalism, 56; psychology, 67; public speaking, 37); *Keene* (economics), 25; *Kingston* (economics), 23; *Kitchener* (economics), 30; *London* (finance, 32; physiology, 25); *Oshawa* (political science), 32; *Peterborough* (economics), 30; *Preston* (economics), 25; *St. Catharines* (current events), 39; *Stratford* (history), 32; *Toronto* (art, 36; composition, 68; current events, 149; economics, 273; English literature, 44; philosophy, 32; physiology, 49; political science, 27; psychology, 208; public speaking, 60; sociology, 40; science, 39); *Windsor* (philosophy), 31; *Woodstock* (current events), 35. Though it is not strictly part of this report, the fact should be mentioned that the Workers' Educational Association has obtained the co-operation of McGill University in financing a class in Montreal and another in Verdun, the former having 24 students and the latter, 41.

With the co-operation of the School of Nursing, two refresher courses were conducted, one for Hospital Staff Nurses, with an enrolment of 46, and another for Public Health Nurses, the enrolment being 64.

7,142 adults did continuous study of a substantial sort under this department during the session, an increase of 51 over last year's total. As nearly as can be estimated, more than 30,000 others took advantage of extension lectures and public lectures; this figure is a most conservative estimate.

The members of the staff who gave extension lectures this year are as follows: W. J. Dunlop, 52; Dr. K. H. Rogers, 24; Professor N. A. M. MacKenzie, 21; Dr. V. Lange, 15; Professor F. H. Underhill, 11; Professor G. W. Brown, 6; Mrs. J. Creighton, 5; Dr. J. O. Wilhelm, 5; Dr. P. M. Millman, 4; Professor H. J. Davis, 3; Dr. Norma Ford, 3; J. B. Bickersteth, 2; Arthur Lismer, 2; Professor T. F. McIlwraith, 2; C. W. Woodside, 2; Professor E. R. Arthur, 1; Professor F. C. Auld, 1; Dr. F. L. Barber, 1; Professor V. W. Bladen, 1; Dr. W. E. Blatz, 1; Dean G. S. Brett, 1; Dr. L. C. Coleman, 1; Mrs. J. F. Davidson, 1; Professor J. R. Dymond, 1; Sir Robert Falconer, 1; Professor E. Goggio, 1; Professor G. W. Knight, 1; Professor E. W. McInnis, 1; Dr. D. C. Masters, 1; Dr. S. A. B. Mercer, 1; Arnold Pitt, 1; Professor L. J. Rogers, 1; Dr. E. M. Walker, 1.

The total number of lectures was 175, which were distributed as follows: Alliston, 1; Arnprior, 1; Ayr, 1; Bowmanville, 3; Brampton, 12; Brantford, 1; Campbellville, 1; Cobourg, 1; Fairbank, 1; Fergus, 1; Galt, 1; Guelph, 4; Hamilton, 11; Harriston, 2; Kincardine, 1; London, 6; Milton, 1; Montreal, 1; New York, 1; Niagara Falls, 16; North Bay, 5; Oshawa, 3; Ottawa, 3; Perth, 1; Peterborough, 4; Picton, 1; Port Colborne, 2; Port Credit, 1; Port Dover, 1; Port Hope, 1; Port Nelson, 1; Sarnia, 2; St. Catharines, 13; St. Thomas, 2; Simcoe, 1; Stratford, 2; Teeswater, 1; Toronto, 63; Whitby, 1.

Professor J. F. Macdonald's weekly radio book-reviews were continued from September until the end of April. These talks receive warm recommendation, by letter chiefly, from persons living as far west as the Rockies and as far east as Halifax. In some places listening groups have been formed for discussion of the book reviews.

The Inter-University Radio Debates were arranged as usual during January,

February, and March. Undergraduates of seventeen Canadian Universities participated. The team representing the University of Montreal was this year's winner. These debates do a great deal to strengthen the good feeling existing among undergraduates in the various universities. The debating teams represented Dalhousie, St. Francis Xavier, Mount Allison, New Brunswick, Bishop's, McGill, Laval, Montreal, Ottawa, Toronto, Queen's, Western Ontario, McMaster, Manitoba, Saskatchewan, Alberta, and British Columbia.

Each normal school in the Province was visited during the spring term, as is done every year, and the extension facilities available, especially the pass course in arts for teachers, were outlined to the students therein. A few collegiate institutes and high schools were visited, on invitation, and the various courses were explained to the pupils. This work should be greatly developed if there were means to do so. The pupils in the secondary schools do not know of the many university courses that are open to them nor do they know for what careers the different courses are intended to qualify those who complete them. Personal guidance is eagerly sought. Many parents come with their sons and daughters for advice in choosing courses and such advice is gladly given—but the giving of it consumes an incredible amount of time.

While university publicity is inextricably bound up with university extension, there is a separate field for the former and a wide one; of this full advantage has been taken. Articles have been written for and have been published by educational journals, general periodicals, and newspapers. The university advertising has been carefully placed. News items have been supplied to newspapers throughout the Dominion. The radio is used for publicity as occasion requires. As the clipping service abundantly shows, the University is given many columns of newspaper space each week. Through extension and publicity the University supplies education and news; at the same time it makes thousands of friends.

(15) REPORT OF THE DIRECTOR OF THE DEPARTMENT OF SOCIAL SCIENCE

(Acting Director, Professor E. J. Urwick)

Two causes have combined to make necessary a change in the conditions of entry to the course in Social Science. On the one hand, the standard of intelligent and efficient work expected of responsible social workers tends to rise, and should of course rise, as the field of administration in the different social services widens its area. On the other hand, the continued increase in the number of applicants for admission to the course (nearly 60 last year) makes difficult the task of arranging satisfactory practical training for students. We already ask the established agencies to bear a heavy burden in their co-operation—always most readily given—in the training of our students; but there are rather strict limits to the number of learners for whom suitable work can be found under adequate supervision. For these reasons the Committee of the Senate in charge of the course has decided that in future the condition of entry to the course shall be the possession of a university degree, with the proviso that exceptions shall be allowed in the case of men and women qualified by special experience or proved capacity in other fields.

This change will, it is hoped, lead to improvements in the training given. In the field of human and social relationships and the varied problems connected with them the lecture method of teaching is not satisfactory. We hope in future to be able to use, to a much greater extent, the method of group discussion and seminar work, combined with more continuous field work, especially for students who (like the graduates from the course in sociology in our University) have already spent some years in theoretical study. At the same time the system of apprenticing special students to social agencies during the second year of their course will be discontinued, except in the rare cases in which an agency desires a part time worker who need not be fully trained.

The department again acknowledges its debt to the numerous agencies in the city and the Province who have ungrudgingly given their help in the practical training of our students. We express our particular appreciation of the increased assistance afforded by the Public Authorities, who are often able to offer unique opportunities to students desiring special experience.

(16) REPORT OF THE DIRECTOR OF THE SCHOOL OF NURSING

(*Miss E. K. Russell*)

The year 1935-36 has been a difficult one for this School as it has been marked by increase in work together with shortage of staff and inadequacy of resources: at the same time there has been interesting progress that is encouraging, even while it puzzles us to find a way to develop quickly enough to use the opportunities that are presenting themselves.

Perhaps this report should repeat that the distinctive work of this school of nursing is found in the undergraduate course, a three-year training in nursing that prepares at one and the same time for the practice of public health nursing and of hospital nursing. The distinctive character of this training is made possible by the fact that the School has its own income; that it is, therefore, independent of hospital support; and that, consequently, the School has freedom in the planning of the training course, that is, freedom with regard to content, order of arrangement, selection and use of staff, living and working conditions, and so on. It is curious that it should be so difficult to explain that this freedom is quite unique. It may be, however, that the time is close upon us when all schools of nursing will have to find a like form of organisation as independent institutions, that is, independent of hospital support. If that be so, it is well that a small piece of research work, such as this, is under way in preparation for more general change.

As we now draw near to the end of the third year of the School's existence, the students of the first class to enter have not quite completed their course, so obviously it is too early to offer conclusions concerning this work. However there is ample evidence for the making of certain claims. One of these is that the work needs doing. There is no doubt that in general principle it is sound. Schools of nursing that are independent of hospital support are greatly needed, and are quite possible; in fact the most serious obstacle to their establishment is a bad tradition of thought. Sooner or later this will have to be changed: if for no other reason, the preparation of nurses for public health work would make it necessary.

Our second claim is that we ought to be doing this experimental work more thoroughly. It would be well worth while. A slight increase in our financial resources would make this possible, and in the end much time and effort would be saved by handling the whole task more resolutely.

We find that the other nursing schools and nursing organisations of the Province are looking to the School as an auxiliary institution to which they can turn for help in working out their immediate problems. Our help is given through special refresher courses for graduate nurses and the demand for these is insistent. As a school of the Provincial University we should be ready to give this help, so every effort must be made to meet the demand.

The statistical report for the year offers the following information:

Pupils in the 1st year of the new three-year course.....	11
Pupils in the 2nd year of the new three-year course.....	10
Pupils in the 3rd year of the new three-year course.....	7
Nurses in the 4th year of the former four-year course in public health nursing. (The last class to enter that course; the new three-year course takes its place)	7
Graduate nurses in the certificate courses.....	46
Special students from other countries not enrolled in certificate courses.....	5
Occasional students, including undergraduates from Toronto Hospitals.....	159
Nurses enrolled in refresher courses.....	106

(17) REPORT OF THE DIRECTOR OF THE DEPARTMENT OF
MILITARY STUDIES

(*Brig.-Gen. G. S. Cartwright, C.B., C.M.G.*)

I have the honour to report as follows upon the work carried out in this department during the academic year 1935-36:

The enrolment both as regards students taking this as an academic subject and in the special classes for the War Office examinations was satisfactory.

During the year great interest was displayed by all taking the lectures in this department and the examination results were very satisfactory; especially in the War Office (O.T.C.) examinations in March, 1935, when the percentage of those obtaining "A" and "B" certificates was .85 of those who wrote, comparing very favourably with other universities in Canada and Great Britain.

The possession of the O.T.C. certificate has proved to be of a practical value to graduates in choosing a career; for there are now a number of former students from this university with these qualifications who have obtained commissions in the Canadian Permanent Forces, the British Army, Air Force and the Indian Medical Service.

As the activities of this department do not appear to be understood by many I wish to make a few remarks relative to the value of the studies carried on therein.

Since the great war, Great Britain, in order to prove to other nations that her wish for a world peace was sincere and honest, reduced her armed forces below what has now been stated to be the safety limit and I think it can be claimed that her weakness was one of the factors leading up to the present disturbed conditions in Europe. The knowledge that Ethiopia was ill-equipped, possessing but few modern weapons and, therefore, not prepared to put up a strong resistance against the Italian up-to-date army, undoubtedly encouraged Mussolini to launch his attack on that country. All the above tends to indicate that unless a universal and well-balanced disarmament can be agreed upon and carried out by all nations, any one country weakening its defensive power below certain limits, tends to encourage war and not peace.

Mf. Stanley Baldwin, in addressing the British House of Commons, in support of the new loan for increased armaments, pointed out that although he considered it a terrible thing to say, it was necessary in order to check aggressor nations for the others to be much more ready for war than they are to-day.

The more war is understood, the more all will strive to find a way to prevent it and the ignorance of war and what it means is a case where little knowledge leads to trouble and those who read and understand military history and military science as a general rule will prove to be the best advocates for peace.

For these reasons it is thought that enrolment in the Department of Military Studies is worth while for all students desirous of understanding the problems of peace and war and thus equipping themselves to advance sound, well-balanced arguments in support of world peace.

(18) REPORT OF THE UNIVERSITY HEALTH SERVICES (MEN)

(George D. Porter, M.B., Director)

1935-36

I.

The report for the year shows that there have been

Examinations

First year students.....	830	
Second " ".....	647	
Senior " ".....	251	
	—	1728
Re-examined by Specialists.....		14
Total		1742

This does not include the O.C.E. students as in previous years, thus accounting for the smaller number explained.

Results

Those found fit for physical training.....	94%
Those having some disability requiring corrective or light exercises.....	4%
Those unfit for physical training.....	2%

Twenty-four (24) students were exempted for the following causes:

Heart trouble	7	Injury to spine	1
Infantile paralysis	2	Tuberculous Knee	1
Operations	3	Chest trouble	4
Diabetes	1	Nephritis	1
Peripheral Neuritis	1	Fracture	1
Otitis Media	1	Anaemia	1

We are pleased to report that no cases of Venereal disease have come under our observation this year. The average height of this year's freshmen is 5' 8 $\frac{3}{4}$ " and the average weight 142 $\frac{1}{2}$ lbs., the same as those of last year.

Improvement in the physical condition of second year students is shown in the majority of cases. Thirty per cent. of those below category A.1. in their first year had their rating raised during the year, while only six per cent. in all categories had their rating lowered. These latter were lowered owing to illness or accident during the year.

One hundred and thirty-five students were enrolled in the special classes under Mr. Martin, for the correction of such defects as round shoulders, flat feet, and spinal curvature.

Some of these were enrolled for the full year, and others for periods of from one to six weeks on account of injuries or disabilities, and those recovering from illness, which prevented their taking the regular P.T.

This class was under the charge of the late Mr. Donald Barton, for sixteen years, and he did splendid and faithful work during that time. He was always most considerate and efficient, and his absence will be felt by all those who have been associated with him during the past years.

Apart from our perennial epidemics of influenza, and a few cases of Scarlet fever and Measles, the general health of the student body has been excellent.

During the year, the usual large number of students came in for treatment of minor injuries received on the campus and in the gymnasium, and also for personal advice on health matters.

Dr. Charles Gossage was appointed during the year, by the Athletic Directorate, to attend to emergencies arising in the gymnasium and upon the campus: his hours are from five to six-thirty o'clock, when these accidents are most liable to occur. This is a much needed, and greatly appreciated service for the students.

The following are causes of absence from physical training classes for periods varying from one day to three months:

Colds	258	Heart trouble	2
Influenza	48	Adenitis	1
Sore throat	32	Appendicitis	1
Tonsillitis	4	Choroiditis	2
Bronchitis	4	Gastralgia	2
Chicken pox	1	Otitis media	2
German measles	11	Nephritis	1
Scarlet fever	2	Conjunctivitis	2
Sinusitis	1	Dental trouble	6
Lumbago	2	Transfusions	3
Enteritis	2	Injuries:	
Vaccination	3	Fractures	2
Local infections	6	Dislocations	3
Athletes foot	3	Sprains	67
Eczema	1	Cuts	12
Furunculosis	9	Abrasions	14
Psoriasis	1	Blisters	10
		Operations	13
	388		143
Total.....	531		

This year lectures on Personal Hygiene and First-Aid were given to first year students, by the Director of Health Service. Our Acting Gymnasium Director, Mr. Martin, made a request to the Athletic Association for these lectures to be held as part of the Physical Training Course, which was granted.

Regarding these lectures, "Varsity" reported that, "Wide-interest was evidenced by undergraduates, when they crowded the lecture room to capacity on the occasion of every address."

(18) REPORT OF MEDICAL ADVISER OF WOMEN

(Dr. Edith Gordon)

II.

I beg to submit the following report of the Medical Adviser of Women for the year 1935-1936.

The health of the women generally throughout the year has been excellent. While the Easter term brought several cases of Scarlet Fever, Measles, and Mumps, there was less absence from classes because of colds and minor indispositions. The physical condition of the entering students was particularly good.

Physical Examinations: There were 512 physical examinations. Of these 186 were first year students in University College, Household Science, Medicine, Applied Science and Dentistry. The rest were Arts students in the other years of University College, in Victoria, Trinity and St. Michael's Colleges, and students from the various departments of Public Health Nursing, Social Science, Occupational and Physiotherapy, Graduates, Ontario College of Education and Library School.

For the past three years, the physical examination has included an intercuteaneous tuberculin test, and for the past two years those students who give a positive test, have been requested to have an X-ray of the chest taken. In this way it is hoped that an early diagnosis of tuberculosis may be made, if it is present. Several students have been under supervision all year because of a history of contact with an open case of tuberculosis, or because of suspicious findings in the X-ray. No frank case of tuberculosis has been discovered. 346 I.C. tests were made. Of these 55.5% were positive and 44.5% were negative.

Throughout the year 20 re-examinations were made on students whose condition was not wholly satisfactory on entrance, and whom it was felt needed rechecking at a later date.

All women participating in sports are required to have a physical examination before playing the game they have elected. 156 such examinations were made.

Many students return each year for a physical examination in order to discover their physical status from year to year. An effort was made to have the graduating year report for a final check-up in February, and those who responded to the invitation felt that they had received something worthwhile. It is hoped that this examining of the graduating class in the Easter term may become an accepted fact. Valuable information could be obtained if this were enforced for the whole class.

Consultations: Again large numbers of students have availed themselves of the opportunities to consult with the Medical Adviser of Women. It is almost impossible to keep a complete record of all who call daily, but it is estimated that more than two thousand calls were made in the past year. These are for advice and treatment. It is gratifying to note that students from every faculty and department come into the Medical Office, and show a deep appreciation of the service rendered there. This individual health education, and care of minor ailments, brings the Medical Adviser into close touch with large numbers of the women students. By it frequently serious illness is avoided and greater physical efficiency is assured. 51 vaccinations were performed, and a considerable number of Shick and Dick tests were done, and following them the administration of toxoid and scarlet fever toxin was made in the susceptible individuals. 2 Urinalyses were made. The taking of the Haemoglobin is part of the routine physical examination, but complete blood counts are done where it is thought necessary.

Lectures: A course of 25 lectures in Personal Hygiene and First Aid was given to the first year students in the course in Physical Education. A group of four lectures was given in March to the students in the one year course in Public Health Nursing. Three talks on Personal Hygiene were given in the fall to the entering students. Miss Coventry very kindly made the necessary arrangements for these talks which were given in the Household Science Building.

Rest Rooms: The rest rooms were used regularly by the students who were substituting rest periods for the usual physical training classes on the advice of the Medical Adviser. They were also used occasionally by other students who were recovering from illness, and were excused from physical training for a week or two. In addition, many of the students found an occasional hour's rest helped them meet a heavy day's program, and were glad to have a quiet spot in which to relax. Through the rest rooms the Medical Adviser can keep in touch with students who most need care and supervision, and who might not otherwise come in contact with her.

During the final examinations the Medical Office was taxed to its maximum capacity in caring for students who through illness needed special help at that difficult time. 72 different students wrote one or more examinations in the Medical Office, and 184 papers were written under the supervision of the Medical Adviser. This service relieves the presiding officers in the examination halls of a difficult problem, and probably prevents complete breakdowns in some cases.

The Medical Office for women continues to co-operate with the department of gynaecology in a piece of research work. This opportunity is much appreciated by the Medical Adviser. Gratifying results have been recorded in many cases under observation and treatment.

Anthropometric studies have been continued, and it is hoped that the coming year may see this work very much enlarged.

Needs: The physical needs of the women students can only be met adequately in a building sufficiently large and properly equipped for developing their physical potentialities through directed physical training, competitive sports and recreational opportunities. It is hoped that the day when this will be available for them is close at hand.

(18) REPORT ON ATHLETICS AND PHYSICAL TRAINING

(T. A. Reed, Secretary, Athletic Association)

III.

The work of the department was handicapped shortly after the opening of the season when Mr. Donald M. Barton, our head gymnasium instructor, was stricken with an illness that terminated fatally on November 3rd. Appointed to the position on the resumption of organised activities after the close of the war, he had been in charge of the gymnasium and corrective work for sixteen years. Quiet, unassuming and modest, he had an influence far-reaching and of unquestionable good to the many thousands of students who passed through his hands and his special aptitude for the proper correction of disabilities made him a most valuable officer to co-operate with Dr. Porter in his work. His loss has been greatly felt. For the current session the work was reorganised under Mr. W. H. Martin and Mr. J. E. McCutcheon with the assistance of Charles Zwygard, a gymnast of outstanding ability.

Compulsory Physical Training:

Under this heading the work followed the usual programme, viz., Danish gymnastics, elementary apparatus and mat work and exercises on the horse and mats. The usual options were allowed, viz., (a) participation in competitive sports in the several interfaculty series, and, (b) enrolment in the Canadian Officers Training Corps. As far as possible first year men were urged to join the Life Saving and Learn-to-Swim classes for which they were granted Physical Training credits.

Men students enrolled in the first and second years.....	1795
From third and fourth years (being deficient in previous years).....	15
From Wycliffe College.....	1

 1811

From this total must be deducted those:

(a) With credit for two years physical training but repeating academic work	239
(b) Exempt on medical and other grounds.....	18
(c) Withdrawn from college during the session or registration cancelled....	28

 285

 1526

These 1526 elected to take their Physical Training as follows:

In Physical Training classes.....	1181
In the Canadian Officers' Training Corps.....	177
In the Corrective classes.....	90
In the following Intercollegiate & Interfaculty sports (part time):	
Rugby Football.....	158
Soccer Football.....	37
Track.....	31
English Rugby.....	9
Basketball.....	130
Hockey.....	114
Indoor Baseball.....	92
Boxing, Wrestling & Fencing.....	115
Swimming and Water Polo.....	62
Gymnastics.....	22
Lacrosse.....	40
Volleyball.....	57
Rowing.....	4
Jui Jitsu.....	3
Failed to register in Physical Training.....	51

 2373

 347

 1526

General Physical Training:

This work was carried on with Mr. W. H. Martin in temporary charge following the death of Mr. Barton, assisted by Messrs. J. E. McCutcheon, Chas. Zwygard and W. W. Winterburn. There were forty-four compulsory physical training classes held each week which included special periods for corrective work for those who had certain physical deficiencies.

In the various branches of athletics the following were enrolled:

Class	Enrolled	Weekly Periods
Boxing.....	48	5
Wrestling.....	64	5
Fencing.....	45	5
Gymnastics.....	35	3
Track: Outdoor.....	67	5
Indoor.....	42	2
Basketball.....	316	45
Indoor Baseball.....	252	21
Volley Ball.....	225	24
Lacrosse.....	130	21
Life Saving.....	382	13
Water Polo:		
Interfaculty.....	100	18
Intercollegiate.....	30	3
Swimming:		
Interfaculty.....	116	10
Intercollegiate.....	35	3

It is interesting to note the addition of a new activity, namely Jui Jitsu. Classes were organised by two Trinity students, Rev. P. Y. Kurose and Rev. T. Matsumoto. These two gentlemen hold the championship in Jui Jitsu known as the "Black Belt"

Altogether thirty-four men wished to register but on account of the novelty of the work it was decided to reduce the group after the Christmas vacation to thirteen pupils. Instruction was also given in Japanese fencing, with the assistance of S. Shimizu, and members of the class gave performances at the Alumni Night in Hart House, at Eaton's Young Men's Club and at Trinity College School, Port Hope.

Two hundred and four students enrolled in the Learn-to-Swim classes and three hundred and eighty-two in the Life-Saving classes. Of the latter one hundred and ninety-four received the award of the Royal Life Saving Society.

Mr. Martin in co-operation with Dr. Porter organised lectures on personal hygiene, artificial respiration and resuscitation. These were largely attended, the students being given credit for attendances at the three lectures. There was an average attendance of five hundred at each lecture.

Intercollegiate Athletics:

The University of Toronto entered teams in all competitions, winning the championships in the following:—Soccer, Intermediate Tennis, Senior Harrier, Intermediate Track, English Rugby, Intermediate Basketball, Gymnastics and Intermediate Swimming. In Rugby the Varsity Senior team, under the excellent coaching of Mr. Warren Stevens, was undefeated until the Intercollegiate playoff on November 16th when Queen's won the Yates Cup after a bitter contest on our field. Mr. Stevens also coached the Senior Basketball team and Mr. McCutcheon the Intermediate and Junior Basketball teams. Altogether twenty-five teams represented the University of Toronto, two hundred and ninety-four contestants wearing the university colours. Of these thirty-two took part in more than one activity.

Interfaculty Athletics:

The subjoined schedule shows the continued interest on the part of the students in competition for the various Cups therein named. Over one thousand players participated. Victoria College won the Mulock Cup presented by our Chancellor, Sir William Mulock, in 1894. This College was also successful in winning the Arts Faculty Cup for Soccer and the Jennings Cup for Hockey. The Medical Faculty won the larger number of interfaculty contests, namely in Basketball, Indoor Baseball, Gymnastics and Volleyball.

Series	Name of Cup	Winner	Inter-faculty Teams	Players
Rugby	Sir Wm. Mulock	Vic.	11	275
Track	W. L. Rowell Memorial	U.C.		56
Soccer	Arts Faculty	Vic.	9	145
Harrier	J. Brotherton	O.A.C.		32
Hockey	W. T. Jennings	Vic.	14	186
Basketball	Clifford Sifton	Jr. Meds.	19	228
Lacrosse	Dr. W. A. Dafoe	O.C.E.	11	116
Boxing, Wrest. & Fencing	Francis Davison	O.A.C.		59
Indoor Baseball	A. G. Spalding & Co.	Jr. Meds.	16	234
Swimming	A. M. Fitzgerald	Trin.		33
Water Polo	H. P. Eckardt	Sr. S.P.S.	8	104
Indoor Track	Toronto Cricket Club	Trin.		43
Tennis	F. Y. McEachren	W. P. Pigott, Ap.Sc. I		48
Gymnastics	H. A. Wilson	Meds.		12
Volleyball	Victoria College Staff	Jr. Meds.	16	186
				1762
Less duplications				716
Number of contestants				1046

The trophy presented last year in memory of the late John C. H. Copp, a student whose example both on the playing field and in other university activities will not soon be forgotten, was this year awarded to E. A. (Gus) Greco, who, by his team mates, was adjudged the worthiest in the current year. Other members of our Senior Rugby team distinguished themselves in academics, namely: M. F. (Turney) Williams

who received the John C. Copp Memorial Scholarship award for 1935-36, and C. C. (Cam) Gray who received the award for 1936-37. A former member of the Rugby team, O. M. Solandt, distinguished himself in the final year of Medicine by winning no less than six scholarships and the Gold Medal.

In conjunction with the Medical Health Service the Athletic Directorate recommended to the Board of Governors an extension of the emergency surgical service on account of the large number of students taking part in competitive athletics and gymnastics. In order that prompt attention could be given for minor injuries and first aid in more serious cases arrangements were made whereby Dr. Charles D. Gossage was in attendance in the late afternoons and early evenings to supplement the work under Dr. Porter's direction. The experiment has proved so successful that it is hoped that it will be further developed in the near future.

Our Arena was again placed at the disposal of the Promenade Symphony Concerts for the summer of 1935, the number of concerts being increased from sixteen to twenty-three. Altogether over one hundred thousand people listened to admirable programmes conducted by Mr. Reginald Stewart at popular prices, the proceeds being divided equally among the one hundred players participating. It is a matter of pride that the University can thus contribute to the artistic life of the City and to the general public good by the use of such a building for purposes other than those originally intended.

The season now closing marks the retirement of one who has been closely associated with university and intercollegiate athletics for the past twenty-one years. Professor Michael A. Mackenzie was appointed by the President as Faculty Representative on the Athletic Directorate in 1915. For twenty-one years he has been a member and for sixteen years he has filled the office of President of the Athletic Directorate and for a similar number of years has been the University of Toronto's permanent representative on the Canadian Intercollegiate Athletic Union. His influence has been wide spread, his judgment has been keen and fair and he has done more to solidify intercollegiate good-will than any other factor since the war. The esteem in which he has been held by the sister universities has been a potent factor in cementing the bonds of friendship.

The Athletic Directorate:

The Athletic Directorate for 1935-36 consisted of Dr. J. A. McCollum (President), Professor M. A. Mackenzie, Professor J. F. Macdonald, Dr. W. Easson Brown, Messrs. J. H. MacPherson, (Vice-President), F. P. McInnis, J. R. Coulter, H. R. Marks, W. A. McCatty, H. B. Squires, and, *ex officio*, Dr. G. D. Porter, Medical Director, Warren Stevens, Athletic Director, and T. A. Reed, Financial Secretary.

(18) DEPARTMENT OF PHYSICAL EDUCATION FOR WOMEN STUDENTS

(Miss I. G. Coventry, Director of Physical Education)

IV.

During the session 1935-36 there were 227 students enrolled in the physical education classes and approximately 770 class periods of instruction were given by the physical director and her assistant, Miss J. M. Forster.

Required Physical Training: The required physical training class with an enrolment of 139 students was subdivided into 20 class periods a week. This plan assisted principally in accommodating the students who presented various academic time-tables and also lessened the congestion on the gymnasium floor in the inadequate gymnasium quarters.

“ “ Applied Science.....	1
“ “ Household Science.....	11
“ “ Faculty of Dentistry.....	1

Corrective and Remedial Classes: Class periods of corrective and remedial gymnastics were given to students who were medically advised to take the special course arranged for their welfare. This essential part of physical training was under the personal supervision of the physical director. Marked improvement was noted and reported to the medical office at the end of the session.

Four Year Diploma Course in Physical Education in conjunction with the pass arts course: There were 12 students registered in this course and approximately 686 periods of instructions and lectures were given. Theory subjects and lectures numbered 290 and practice subjects 396.

The decrease in the number of students attending the course is due to the revision which now requires a higher scholastic standing and includes additional hours of class periods and lectures.

It is still interesting to note that the women graduates who have been granted diplomas in physical education by the University of Toronto are still in continued demand as full time physical directors in collegiates, technical, and high schools, in Toronto and other cities in Ontario.

Swimming: There were 226 students from all colleges, faculties and departments and approximately 363 periods of instruction were given by Mr. A. L. Cochrane and Miss A. Cochrane during the session of seven months.

(18) REPORT ON ATHLETICS FOR WOMEN

(Miss A. E. M. Parkes, B.A.)

V.

During the session 1935-36, the Women's Athletic Association sponsored intercollegiate competition in basketball, tennis and swimming and interfaculty competition in the above three sports as well as hockey, badminton, golf and indoor baseball. Students taking part in one or more of the activities of the Association were registered in University, Victoria, Trinity and St. Michael's Colleges, the Faculty of Medicine, the School of Nursing and the Department of Social Science, Occupational Therapy and Physiotherapy.

As in previous years, the expenses of interfaculty competition was borne in the main by the college and faculty associations, and of intercollegiate competition by the university association. To make this possible, in addition to the amount earned by the students at their Parking Stations during football games, contributions were made by the men's Athletic Association and the University College Women's Undergraduate Association. The use of the Arena for hockey practice and of the Hart House gymnasium and pool for certain events was also generously permitted by the men's Association.

The intercollegiate tennis championship returned to Toronto this year, with Miss Claire Walsh, Victoria I, winning the title. The basketball was won by the University of Western Ontario. The first women's intercollegiate swimming meet was held at McMaster in February, with teams from Macdonald Hall, Guelph, and Toronto competing with the home team. Toronto, with a team of six, won a first and second in each event. Although no intercollegiate hockey was played, the

University entered a team in the Toronto Hockey League senior series and won the championship.

The interfaculty record is as follows:

Series	Cup	Winner	Competitors
Tennis	Curlette Cup	Victoria	36 (6 teams)
Basketball	St. Hilda's Cup	St. Hilda's	135 (11 teams)
Hockey	Harston Cup	University College	65 (5 teams)
Swimming	Interfaculty Cup	University College	30 (6 teams)
Badminton	U.C. W.U.A. Cup	St. Hilda's	36 (6 teams)
Baseball	University College Cup	Victoria	30 (3 teams)

The Athletic Directorate for 1935-36 was made up as follows: Dr. C. C. Benson, President, Mrs. W. A. Kirkwood, Mrs. W. B. Elsley, Dr. E. H. Gordon, and the Misses J. M. Forster, E. M. Ardagh, J. B. Atkinson, M. Cowan, J. F. Davey, M. E. Dignam, J. E. Leitch and A. E. M. Parkes, Financial Secretary.

(19) REPORT OF THE WARDEN OF HART HOUSE

(*J. B. Bickersteth, Esq., M.C., M.A.*)

GENERAL

The total membership of Hart House during the past year was four thousand four hundred and forty-one of whom three thousand seven hundred and ninety-six were undergraduates and six hundred and forty-five were senior members. These figures compared with those of 1934-1935 show a diminution of about fifty undergraduates. The number of men using the Great Hall was very much larger than last year and the total number of meals served in Hart House from 1st July 1935 to 30th June 1936 shows an increase of 29 per cent. over that of the previous twelve months. Among the undergraduates the 20c. lunch was the most popular meal and the changes introduced in January 1935 evidently appealed to the student body in general. It is unlikely, however, that circumstances will permit the serving of meals at this very low rate to continue. The committees themselves realise this and are making plans to introduce a slightly higher scale of prices. Early in February owing to the generosity of the Massey Foundation three hundred and fifty specially designed chairs were installed in the Great Hall. These chairs are not only both durable and comfortable, but are also in keeping with the dignity of the Hall. During the winter the experiment of serving hot coffee in the shop was tried and has proved highly successful. During part of July and August Hart House was used by the French-Canadian teachers attending the summer school arranged by the Quebec Government, meals being served in the Great Hall throughout the period of the course. In January the King's death resulted in the cancellation of the C.O.T.C. ball. Instead of the Athletic At-Home a dinner was held at the end of March in the Great Hall. Another innovation was the so-called Alumni Night on 20th March. On this occasion when there were many athletic and swimming events, music by the Hart House Glee Club, an exhibition of graduate paintings in the art gallery, bridge, dancing and other entertainment the entire building was put at the disposal of the Alumni Federation. About 2300 people were present and the whole evening was an unqualified success. The committees of Hart House were delighted to be of assistance to the graduates by making Hart House available for this purpose. With these exceptions the usual social functions were held during the winter, though the character of the so-called stunt nights was greatly improved by requiring all acting to take place in the Theatre. Efforts were made to develop closer relation between undergraduates and the University Settlement and a larger number of men and boys of the Settlement than ever before were entertained at the annual Christmas party. The Warden's Christmas dinner was held on the last night of term in December and again showed to what an extent the University draws its students from all over the world.

At the end of September a simple but dignified memorial plaque to Mr. Henry Spratt was erected in the hallway near the main entrance to Hart House. The final words of the memorial are "His skill as a master of the Gothic form is woven into the fabric of this House". The cost was met partly from the funds of Hart House and partly by the Massey Foundation.

On his appointment as High Commissioner in London the Board of Stewards sent a resolution to the Hon. Vincent Massey congratulating Mrs. Massey and himself and emphasising the great contribution the Massey Foundation had made to academic life by the creation of Hart House.

MUSIC

Under the able direction of Mr. Charles Peaker the Hart House Glee Club have made outstanding progress during the past year as was shown by their Friday Afternoon Recital before Christmas and their Sunday Evening Concert on 1st March. On the latter occasion the Great Hall was packed and the Glee Club received an ovation. In view of the excellence of these performances the Glee Club have again been permitted to bear the name of Hart House and it is confidently expected that future years will see this organisation become one of the outstanding features in the musical life of the University. The usual series of Sunday Evening Concerts was held in the Great Hall one of the most interesting being that given by the Conservatory String Quartet when half the programme was played on 17th century viols and half on modern instruments. In September Hart House through the generosity of a few friends was able to obtain complete control of this fine consort of viols which up till then had been jointly owned. The Friday Recitals began at the end of October and continued till the end of February. The Songsters and the Middav Sing Songs were held as usual. To Mr. Campbell McInnes, Mr. Ross Workman and to all the musicians of Toronto Hart House owes an incalculable debt. This year the experiment was tried of introducing light but good music into the east common-room on certain days at the lunch hour and was sufficiently encouraging to justify its continuance next year.

ART

The arts and crafts room has now completed its second year of existence. The standard of the work shown at the annual exhibition in the print room, consisting of sculpture, lino cuts, etchings and wood carving, was a tribute to the instructor, Mr. Carl Schaefer.

The series of exhibitions held in the art gallery throughout the winter attracted wide interest. The artists were as follows: Arthur Heming, the Canadian Society of Painters in Water-Color, Arthur Lismer, the late Robert Holmes, Emily Carr, the late Harold McCrea, Gordon Webber and Mr. and Mrs. George Pepper with a group of artists who had been working in Quebec. There were also exhibitions of textile designs and of Rembrandt reproductions. The photographic show arranged by the Camera Committee in January was as popular as ever and the exhibition of work by undergraduates, though not drawing on as many students as in previous years, and the display of work by faculty and graduate members were both of considerable interest. The Art Committee arranged a series of exhibitions in the print room when reproductions of 16th, 17th, 18th and 19th century masters were shown and prints were always on display in the cabinet designed for that purpose. Before Christmas Professor John Alford kindly gave a series of four informal lectures on certain of the old masters and in the New Year on three successive Wednesdays Mr. Peter Haworth spoke on the crafts. In January Mr. Alec Miller, the well-known sculptor in wood, gave a lecture on the history of sculpture illustrating his remarks with examples of his own work. The Art Classes under the direction of Mr. H. S. Palmer were again held every Thursday night from October to February. Owing to the generosity and goodwill of each successive Graduating Year and with the help of the Murray and Harold Wrong Memorial Fund and other small sources of

revenue several pictures have been added during the past year to the Hart House collection, namely, "Saguenay River" by C. F. Comfort, "Mist, Rocky Mountains" by F. M. Bell-Smith, "Memory's Melodies" by W. J. Wood, "Dark Girl" by Prudence Heward and "Howe Sound" by W. J. Phillips. That Hart House has already acquired a collection of some importance is proved by the fact that eight pictures were borrowed for a special exhibition of Canadian work arranged by the National Gallery at Ottawa. Much time and thought have been given to the problem of maintaining the collection in good repair and all artists concerned have been asked to fill up a form giving technical information about their pictures. Several volumes have been added to the small art library in the gallery.

LIBRARY

The experiment of holding two "Library Evenings" in 1934-1935 proved so encouraging that during the past winter three such evenings were arranged and on each occasion there was an average attendance of forty to fifty undergraduates, smoking being allowed in the library. The speakers were Mr. J. V. McAree, Mr. Morley Callaghan and Professor A. T. DeLury. The first two spoke on their leisure reading and the latter on Irish literature. The address was in each case followed by a discussion. In January Mr. D. A. Sinclair who has done excellent work as curator wished, on reaching his final year, to be relieved of his duties. Mr. W. B. Wood (I U.C.) was appointed as his successor. The committee have done their best with the funds at their disposal to keep the library up to date and have added about one hundred new volumes. The problem of the removal of books from the room was somewhat serious during the earlier part of the year, but the checking in May showed a net loss of only four volumes which in view of the fact that there is no definite supervision of the library may be considered as very satisfactory. Several exhibitions of private press books have been arranged in the special display case. The committee have also maintained a representative selection of periodicals in the reading-room where a rack was installed to hold all magazines and reviews.

DEBATES

The usual number of debates were held and it is interesting to record that among the members of parliament at Ottawa are now to be found some who as undergraduates were active in debates at Hart House. The resolutions dealt with Italy and sanctions, a vote of confidence in His Majesty's Government at Ottawa, the intrusion of professors into politics and Quebec nationalism. Major C. G. Power, Minister of Pensions and National Health, was an hon. visitor at the last debate and took part in the discussion. At the November debate two undergraduates from British Columbia and Saskatchewan were hon. visitors. In April two Australian debaters stayed in Hart House, but owing to the proximity of examinations at that time of year no debate was possible. At the February debate carefully worded resolutions were passed conveying the condolence of the House to Her Majesty Queen Mary on the death of His Majesty King George V and a tribute of loyalty to His Majesty King Edward VIII. It was pointed out that the King, as Prince of Wales, had on several occasions visited Hart House and that he had presented a signed portrait of himself which hangs over the Speaker's chair. A reply to the resolutions was subsequently received from Lord Wigram thanking the House for their two resolutions, stating that His Majesty has the happiest memories of his visits to Hart House which date back over a period of seventeen years and assuring Hart House that he will always follow its fortunes with a keen and personal interest.

STUDENT CHRISTIAN MOVEMENT

The September Conference at Lake Couchiching was attended by one hundred and seventy-six students from Canadian universities and in the fall other week-end

conferences were held. During the Christmas vacation ninety-five undergraduates attended the Twelfth Quadrennial Convention of the Student Volunteer Movement. From time to time prominent religious leaders such as Dr. Wilson Cash, Dr. J. H. Oldham, Dr. T. Z. Koo, Dr. Samuel Zwemer, Dr. Peter Manniche and Dr. Sherwood Eddy have addressed the students. The holding of a series of after luncheon meetings in the music room when short addresses were given by members of the university staff and others was a successful experiment. Holy Communion was celebrated monthly in Hart House Chapel with an excellent attendance and during Holy Week services were held there. In the spring various changes were made in the organisation of the S.C.M. which it is hoped will result in greater efficiency. The Rev. Wilfred Lockhart has completed his first year as General Secretary of the S.C.M. and has carried out a difficult task with success.

THEATRE

Six plays were produced under the direction of Mrs. Nancy Pyper as follows: October "Once in a Lifetime"; November "Hounded by Hate"; December "Wappin' Wharf"; January "The Power of Darkness"; February three one-act plays; April "Judgment Day". During the last week in March the Central Ontario Drama Festival took place in the theatre. Many plays were produced by the college dramatic societies and this year the presentation of "The Inspector General" by the University Drama Committee marked the first attempt for some years to combine undergraduate talent for a representative university play. With the full support of the college dramatic groups and faculty members the committee hope to establish a permanent society for the coordination of university dramatic work.

In the absence of Mr. Vincent Massey in London Mr. Eric Haldenby took over the Chairmanship of the Board of Syndics.

VISITORS

Among visitors to Hart House during the past year may be named Mr. W. M. Goodenough (Barclays Bank), Archbishop J. C. McGuigan, the Dean of Canterbury, Major-General Andrew McNaughton, Mr. E. Salter Davies and a group of prominent directors of education from Great Britain, Mr. Paul Robeson, Mr. Carl Milles (the famous sculptor), Miss Ruth Draper, Sir Arthur Willert, Mr. Christopher Hollis, Canon Leonard Hodgson, Mr. Philip Chester, Mr. Allan Wade, Professor Ralph Fowler, the Hon. Ian Mackenzie, the Hon. C. G. Power, Mr. J. A. C. Osborne (Bank of England) and Dr. Raymond Priestley (Vice-Chancellor of the University of Melbourne).

COMMITTEES

On his retirement from the University this year Professor Michael Mackenzie has relinquished the Chairmanship of the Finance Committee of Hart House, a position he has occupied for sixteen years. During this important formative period Professor Mackenzie has not only put at the disposal of Hart House his wide experience and sound judgment as an expert in finance and administration but has interested himself in every effort Hart House has made to be of service to its members and to the University as a whole. His loss will be severely felt but happily his retirement from the Finance Committee does not mean his severance from the life of Hart House with which it is hoped he will long continue to be associated. Dr. V. E. Henderson has consented to succeed Professor Mackenzie as Chairman and Hart House is fortunate in securing the services of one who has been for so many years closely connected with its administration and to whom it already owes so much. Professor George Glazebrook has also retired this year from the Chairmanship of the Hall Committee and Hart House is deeply grateful to him for the long hours and good judgment he has given to the affairs of the Great Hall during the past six years. Not only the permanent staff but the undergraduates as a whole are deeply sensible

of the debt they owe to all senior members, both faculty and graduate, who at considerable sacrifice devote much time and thought to the various committees of the House.

(20) REPORT OF THE DIRECTOR OF THE CONNAUGHT LABORATORIES

(J. G. FitzGerald, M.D., LL.D.)

This is the twenty-second annual report of the Director of the Connaught Laboratories and consists of a survey of changes, progress and advancement during 1935-1936 in research, public service and collaboration with other organisations and agencies.

The Director of the Laboratories is the executive officer of the Committee of the Governors which is responsible to the University for the formulation of policies and general conduct of the Connaught Laboratories. The Chairman of the Committee from 1915 to 1935 was Colonel Sir Albert E. Gooderham, whose death in April of last year is recalled with deep regret. To fill the vacancy thus created, the Hon. and Rev. H. J. Cody, President of the University, was appointed by the Board. T. A. Russell, Esq., LL.D., Vice-Chairman of the Committee who acted as Chairman temporarily after the death of Sir Albert Gooderham, continues as Vice-Chairman, and His Honour Dr. Herbert A. Bruce, Lieutenant-Governor of the Province of Ontario, was made a member of the Committee in the place and stead of Sir Albert Gooderham. Other members of the Committee at present are Mr. F. Gordon Osler and Mr. Balmer Neilly.

The functions of the Laboratories are research in the domain of preventive medicine and the pursuance of medical public-service. Within the framework of this responsibility the Director has the collaboration of three associate and two assistant directors and a comptroller. The associate directors are immediately responsible for and have supervision of members of the staff in the sections of filterable viruses, bacteriology and immunology generally, and physiology and biochemistry. One assistant director has oversight of undertakings in chemistry in relation to immunology, as well as the production of diphtheria prophylactics. The other assistant director is in charge of the farm section of the Laboratories. The comptroller is responsible to the director for business administration, sales, services and liaison with the members of the scientific staff both those who are responsible for routine production and with those concerned solely with investigation and research. Since director, associate and assistant directors are also members of the academic staff of the University, teaching is a major responsibility. The newly established Western Division is in charge of a research member who is also an associate professor in the University of British Columbia and director of the Laboratories of the Provincial Board of Health of that province.

Primarily Connaught Laboratories serve the Dominion of Canada. In the distribution of biological products, however, their constituency is much more extensive. The list of countries included will be found elsewhere in this report where production and distribution are dealt with in greater detail. Ideally, future developments of Connaught Laboratories should be so planned that there may be, at least in this Dominion, a certain measure of decentralisation. It is suggested, in other words, that research and production should be carried on not only in this University but also in others with which collaborative arrangements may be made. Reference to such a development in the University of British Columbia received preliminary notice last year. It is a distinct pleasure at this time to report that the organisation of the Western Division has not only been wholly justified during its brief period of existence but is worthy of immediate expansion and extension. Such must be provided for, indeed, in the immediate future, if a quite unique opportunity in the Province of British Columbia is to be fully embraced. In the years to come Eastern Canada as well must receive appropriate consideration. If before the close of a

quarter of century of service to the people of this country Connaught Laboratories, from its centre and divisions, reaches from the Atlantic to the Pacific, a fine foundation will have been laid. Growth in numbers of staff and increase in scientific productivity as well as expanding routine production, while doubtless desirable objectives, will however not suffice as substitutes for leadership in the domain of investigation and the extension of the boundaries of natural knowledge. Those objectives must always be kept clearly in view as the primary purposes of the organisation now and in the years to come.

Specific preventive medicine or applied immunology is concerned with strengthening the forces of resistance of the individual in order that he may the better ward off the attacks of the causative agents of communicable diseases. This is one of the major fields of public health. In consequence, the campaigns directed against the ravages of diphtheria, scarlet fever, whooping cough, pneumonia, meningitis, smallpox, etc., have been waged. That there are other even more powerful, more ubiquitous and, upon occasion, vastly more devastating foes, has long been realised. Among such may be mentioned influenza and the common cold. Progress in the elucidation of knowledge respecting these enemies of mankind is being made. Plans have been developed in these Laboratories to provide staff and facilities for energetic prosecution of research into the etiology and specific prevention of influenza and the common cold. To participate in this activity Dr. Ronald Hare, at present a whole-time worker in the service of the Medical Research Council of Great Britain and detailed for duty at the Bernhard Baron Research Unit at Queen Charlotte's Hospital, London, will become a member of the staff of these Laboratories. Dr. Hare has made important contributions to knowledge in the field of bacteriology and will be warmly welcomed. Dr. Geoffrey Rake of the scientific staff of the Rockefeller Institute for Medical Research, a graduate of the University of London (Guy's Hospital Medical School), well known for his work, most recently, on meningococcal meningitis and experimental pneumonia, will, it is a pleasure to report, also come this year to Connaught Laboratories as a research associate. Dr. Hare will, it is anticipated, work in the University and Dr. Rake in the farm section of the Laboratories.

Reference, more specific and detailed, to the investigations conducted in various divisions of the Laboratories, will now be made. In the section of filterable viruses, epidemiology and medical statistics, under the direction of Professor R. D. Defries, further satisfactory progress has been made. Certain lines of enquiry have been followed as in previous years. Considering first the virus work, the studies have been concerned primarily with those of rabies and vaccinia. These two are responsible for hydrophobia or rabies, a disease still very prevalent in many parts of the world, afflicting both man and lower animals, and smallpox, a morbid condition of which human beings only are the victims. As disease entities both have long been known. Until very recently nothing was known as to their etiology, even less as to how they were spread and perpetuated themselves, but curiously enough a great deal of knowledge of a practical character is available as to their specific prevention. For that knowledge we are indebted chiefly to Edward Jenner and to Pasteur. Precise and exact information, however, as to the mechanism both of infection and immunity has been lacking. Dr. James Craigie and Dr. F. O. Wishart have carried further their enquiries into serological and immunological aspects of vaccinia and variola virus infections in monkeys and rabbits chiefly. The element in these viruses which stimulates the appearance of antibodies, protective and other, is exceedingly complex. The antigens are almost certainly multiple and one of these, the so-called LS antigen which predominates in the *in vitro* reactions, has been more carefully defined. It has been found to consist of heat labile and heat resistant elements. Each of these is capable of producing antibodies upon injection. Methods for preparing pure L or pure S antisera have been developed. The soluble precipitable substances of both variola and vaccinia have been shown to be the same LS antigen. The substances in immune sera which neutralise these two antigenic elements do so,

apparently, through two separate and distinct reactions because of the presence of two neutralising antibodies. Additional antigens are apparently present in these viruses and preliminary evidence suggests that they are apparently restricted to infective elementary antibodies. These antigens are being studied further. An improved technique for the variola complement fixation reaction has also been evolved by Dr. Craigie and Dr. Wishart. Dr. Defries has continued his work of exploring the possibilities of assaying the protective value of anti-rabic vaccines. White mice have been used for the purpose. A strain of rabies virus carried for years in rabbits has shown enhanced pathogenicity in mice when injected intramuscularly. Both mouse protection tests and virus neutralisation activities of immune sera have been resorted to in the assay of the relative prophylactic values of a number of anti-rabic vaccines.

Utilising cultures obtained by Dr. Kenneth F. Brandon in field studies of outbreaks of enteric infections, Dr. Craigie and Dr. Brandon have obtained bacteriophages for *B. typhosus*. One of them has been found to have a specific affinity for the V agglutinin which is present only in the V form or phase of that species. More than 450 freshly isolated strains of *B. typhosus* have been examined and all were found to be V forms with the exception of a few infected with V bacteriophage. Antigenic degradation of the V form of the micro-organism is induced by the phage similar to that which occurs after cultivation *in vitro* on laboratory media. These observations have immediate practical application in a laboratory method for rapid identification of *B. typhosus* from human cases or carriers and also to satisfy the requirements in the selection of pure V forms of *B. typhosus* used in the preparation of homologous bacterial vaccines.

Dr. Brandon has undertaken four epidemiological field studies in conjunction with officers of the Provincial Bureau of Health of Quebec and of the Department of Health Ontario, an excellent illustration of a function to which reference has already been made, namely collaboration with other organisations, in these instances with the two largest provincial health departments. The epidemic in the first instance was one of enteric fever in a general hospital in Montreal. This was found to be due to *B. paratyphosus* A. It is of especial interest because this is the first occasion upon which that species of micro-organism has been so incriminated. An outbreak of epidemic jaundice in a rural community in Ontario was also explored. Useful information respecting mode of transmission and the period of incubation of the disease was obtained. A very unusual and puzzling outbreak in an Ontario residential institution was studied by Dr. Brandon in which fourteen cases of erythema nodosum were found. All had been exposed to an open case of tuberculosis. All of them, too, gave strongly positive reactions to intracutaneous injections of tuberculin. Careful clinical, pathological, radiological as well as epidemiological enquiry made it appear that this was an epidemic of the childhood or primary type of tuberculosis. One of the individuals involved who was found to be negative to tuberculin one month before, became tuberculin positive after suffering an attack of erythema nodosum. Another enteric outbreak in Ontario also investigated by Dr. Brandon was found to be due to *B. paratyphosus* B. Sixteen persons were infected by drinking polluted water from a well while attending an exhibition in the western part of the province. Dr. Brandon in conjunction with members of the Health Department, Brantford, Ontario, investigated the Schick test reaction of a group of children who several years previously had been vaccinated against diphtheria. With Dr. D. T. Fraser a study of Schick test toxins distributed by various manufacturers was completed and important observations made upon them.

Epidemiological and statistical investigations have been carried on also by Dr. N. E. McKinnon and Dr. Mary Ross. The results which have followed the large-scale employment of toxoid during a period of eight years has been continued by the inclusion of 1934 results and the compilation of results for the entire period. Dr. Ross has also analysed the records of a series of more than 5000 Schick test results. These were made available through the courtesy of Dr. Grant Fleming of

McGill University, and represented the results obtained in immunisation clinics in Montreal.

Dr. Ross and Dr. A. H. Sellers in a study of mortality from cardio-vascular-renal diseases in Ontario for the period 1909-1934 have made excellent progress and preliminary results have already been presented. Dr. Ross and Dr. Brandon have made a statistical investigation of measles with especial reference to duration of illness and complications. Dr. Sellers has, himself, and in collaboration with Dr. J. T. Phair of the Department of Health, Ontario, made further progress in enquiries into the causes of maternal mortality; and with Dr. Ansley has studied the causes of foetal deaths. Other statistical investigations by Dr. Sellers have had to do with mortality from diabetes in the Province of Ontario; deaths from accidental causes; and compilation of essential facts relating to pernicious anaemia in Canada generally and in the Province of Ontario.

In the section of bacteriology and immunology under the direction of Professor Donald Fraser a varied and important programme of investigation and research has been carried on. Dr. Fraser has extended his own investigations of the amount and distribution of antitoxin produced in a group of children in response to the injection of diphtheria toxoid. Titrations of antitoxin have been completed at intervals of three, six and nine months. This enquiry has already elicited the important fact that in a group of 244 children given three doses of toxoid only one did not respond with a measurable amount of antitoxin. It has been learned also that the antitoxin level drops gradually from the third month onward. The duration of protection will also be ascertained. This study has been, because of its comprehensive character, exceedingly laborious and time-consuming. When completed, however, it should establish for the first time in human beings a suitable standard or criterion for ascertaining the efficacy of diphtheria antigens. Dr. Alan E. Young and Miss Halpern have assisted Dr. Fraser in this very important work. With Dr. Young and Dr. Mary Ross, Dr. Fraser has been exploring the question of the duration of artificially acquired diphtheria immunity as measured by the Schick test in a large group of school children. It has been determined that from 15 to 20 per cent of such children lose their antitoxic immunity in from four to five years. If they are given one extra dose of toxoid, however, nearly 99 per cent will once again become immune. Dr. Fraser's pioneer and very significant studies of the comparative response in children to three doses of toxoid and one dose of alum toxoid have been extended to two years after immunisation. The numbers are of necessity limited but the results are striking and entirely consistent with those published last year. A study of maternally transmitted diphtheria antitoxin has been resumed. A group of children given two doses of alum precipitated diphtheria toxoid dissolved in tartrate solution are having antitoxin assays made after an interval of one year.

In collaboration with Dr. Moffat of the Department of Public Health, Toronto, and Dr. Grant Fleming of McGill University, a diphtheria carrier survey is being made. Thus far the carrier rate in both cities has been found to be surprisingly low. Estimations of diphtheria antitoxin content of the blood of such carriers is also being made. Other studies of antitoxin content of persons under observation for many years past are being continued. Occult diphtheria immunity appears to be more durable than that artificially acquired. With Dr. Martel of Amos, P.Q., the antitoxin response to two doses of high Lf toxoid is being followed. The study being carried on at Western Reserve University, Cleveland, with Dr. J. A. Doull, continues.

Dr. M. H. Brown with Miss E. A. Anderson has made a careful study of the significance of the presence of *B. alkalescens* in the intestinal flora of 157 persons. They found that this species of micro-organism occurs in a great variety of gastro-intestinal conditions and is essentially non-pathogenic. Taxonomically *B. alkalescens* is related to the species of bacteria in the dysentery group. Studies of cases of infectious diarrhoea made by Dr. Brown and Miss Anderson have revealed the presence of *B. dispar* and the absence of all other significant species suggests that this micro-organism may play an etiological rôle. Studies of the antigenic efficacy

of typhoid vaccines have been made by Dr. Brown. He has investigated the prophylactic value in white mice of such vaccines when made from carefully selected strains of *B. typhosus* whose antigenic integrity had been maintained; in other words, those consisting entirely of "V" forms of the micro-organism. With such, the bactericidal power, phagocytic index and agglutinative titre of the blood of individuals, carefully selected, is being made. Two groups, normal and vaccinated, are to be studied and compared. The keeping properties of typhoid vaccine and the specificity of typhoid-paratyphoid vaccine have also been re-examined by Dr. Brown, who has found a remarkable specificity in the response in mice to injection of these vaccines made from closely related species. An examination of the results of specific serum therapy in lobar pneumonia at Toronto Western Hospital has been conducted by Dr. Brown in association with Dr. George Anglin. Forty-three patients with Type I pneumococcus infections given serum had a case-fatality rate of 23 per cent. In twenty-four cases of the same type not serum treated 41 per cent died. Fifteen Type II cases who were given serum all recovered. Dr. Brown and Miss Anderson have also continued their studies of pneumococci isolated from patients in the Hospital for Sick Children. To the present 500 strains have been obtained. The Neufeld method of sputum typing is now being employed to the exclusion of all others. With Dr. Caulfeild Dr. Brown has investigated the sensitising properties of alum precipitated ragweed pollen. This will be referred to in greater detail elsewhere. Negative results have been obtained in an investigation of the effect of cortin on hemolysin production in rabbits. Finally, Dr. Brown has determined the effect of pH upon the keeping qualities of diluted tuberculin.

Dr. J. S. Kitching, who has been given responsibility for the staphylococcus work in these Laboratories, has made a number of important and interesting additions to existing knowledge. Tests of toxigenic capacity of more than 60 recently isolated strains of staphylococci have given confirmatory evidence of the preliminary finding, namely that the ability to develop toxin, *in vitro*, measured by hemolysin production and combining power, does not correspond with severity of infection. The production of single-strain toxoids for human use has been continued and has yielded satisfactory results. One strain especially has occasioned very few untoward local or general reactions. The assessment of antigenic capacity of staphylococcus toxoids in human beings has been continued. The appearance of "rough" variants in strains of staphylococci cultured in certain media has been noted. Even dried cultures have in certain instances manifested this tendency to antigenic degradation.

With Dr. Kitching, Dr. Leone Farrell has conducted an enquiry into the effect of variation in the concentration of formaldehyde upon the rate of detoxification of staphylococcus toxin, the effect on combining power and upon antigenicity. Dr. Farrell has developed a method of assessing the amount of free formaldehyde in toxoids. A very careful and thorough investigation of staphylococcal immunity in rabbits and mice has been made by Dr. Farrell and Dr. Kitching. Active immunisation of these animals with staphylococcus toxoid enhanced resistance against lethal effect of staphylococci and staphylo toxin introduced parenterally, also against the dernonecrotic action of staphylo toxin. Formalinised staphylococcus vaccine produced little or no antitoxin and no increase in resistance to lethal effect in rabbits of this micro-organism or its toxin. Serum of rabbits treated with staphylococcus vaccines did not confer passive immunity against staphylococci in rabbits or mice. Staphylococcus antitoxin was found to be specific in conferring passive immunity against lethal effect of staphylococci and staphylo toxin and the degree of protection conferred was proportional to the amount of antitoxin given. A series of horses are being immunised with four different staphylococcus antigens. Dr. Kitching has investigated the staphylococcus antitoxin titre of more than 300 persons. These have been obtained, largely, from individuals suffering from acute and chronic staphylococcus infections. Then too, Dr. Kitching has followed the increase in natural antitoxic immunity occurring in patients suffering from acute osteomyelitis. In 350 cases of varying ages Dr. Kitching has endeavoured to ascertain the average

staphylococcus antitoxin content of the blood. There did not appear to be significant differences in concentration in persons in various age groups. The staphylococcus antitoxin of maternal and cord blood has been determined. Dr. Kitching has also investigated the antitoxin of various groups of human beings and of several species of animals. Dr. Farrell has studied the stability and antigenicity of diluted staphylococcus toxoid. Comparative immunising value of unmodified, alum precipitated and alum tartrate staphylococcus toxoid is being investigated by Dr. Farrell, who is also engaged in a chemical study of various fractions of staphylococcus toxin.

Dr. P. A. T. Sneath has continued his studies of tetanus toxoid in human beings and in guinea-pigs. Very interesting results have been obtained and it has been established that an exceedingly useful new antigen and weapon against tetanus has been made available. Dr. Sneath also followed the variations in tetanus antitoxin content of the blood of persons previously given toxoid.

Another very useful service rendered by Connaught Laboratories may here be referred to since Dr. Sneath is responsible for its conduct. For several years past an immunisation clinic established in the Hygiene Building has been available to students in the University. There the Schick test, Dick test and tuberculin test have been undertaken. Students have also been given the following antigens: diphtheria toxoid (alum precipitated and unmodified), scarlet fever toxin (formalinised and unmodified), scarlet fever antitoxin, staphylococcus toxoid, tetanus toxoid, typhoid and T.A.B. vaccines, vaccine virus, etc. The number of persons attending the clinic increased from 275 in 1934-35 to 741 in 1935-36. In addition, students in the D.P.H. and Public Health Nursing classes attended on various occasions for immunisations, etc.

Dr. Frieda Fraser and Dr. Helen Plummer have collaborated in the study of various streptococcus problems. As for many years past they have been especially concerned with the study of strains of streptococci isolated from cases of scarlet fever, puerperal fever, septic sore throat, generalised infection, etc. It has been ascertained that those strains of streptococci giving rise to human disease belong chiefly to the so-called precipitin Group A type of Lancefield. For purposes of identification of toxigenic strains from both scarlatinal and non-scarlatinal sources this fact is of major importance. There was found to be a significantly smaller portion of strains of streptococci from throats of normal persons capable of elaborating toxin. Among 215 strains of streptococci tested by Dr. Plummer and Dr. Fraser, the toxin elaborated by all of them could be neutralised by two antitoxins, no less than 85 per cent by antitoxin resulting from the injection of horses with toxin produced by the strain of streptococcus known as N.Y. 5; 8 per cent by the "Smith" strain; and 3 per cent by a mixture of the two. In deciding upon the strains to be employed in antitoxin production these facts are of material value. Dr. Plummer has explored the streptococcus antitoxin content of human blood of Canadian and of tropical origin. A comparison of the content of antitoxin in maternal and cord blood has also been made by Dr. Plummer. Doctors Frieda Fraser, Plummer and L. N. Silverthorne have estimated the antitoxin content of the blood of patients suffering from streptococcal infections and receiving serum. A study of the antitoxin content of persons who were found to be Dick positive before, during and after immunisation, and of pupil nurses at the inception and close of training and before and after immunisation, has been made by Dr. Plummer and Dr. Fraser. A serological and cultural study of more than 100 strains of streptococci from the points of view of pigment production in relation to classification by precipitin groups and of classification according to precipitin types in Group "B" has engaged Dr. Plummer's attention. Dr. Fraser has studied the fibrinolytic titres of strains of streptococci in relation to the severity of clinical infections (in association with Dr. R. R. Madison of Stanford University). Dr. Fraser, Dr. Plummer and Dr. Alan Young have co-operated in an epidemiological study of strains of streptococci isolated from children at the Preventorium. Some were from cases of scarlet fever, others from contacts both among staff and patients.

Dr. Caulfeild with Dr. M. H. Brown and Dr. E. T. Waters of the department of

physiology has made important observations in studies in allergy. Guinea-pigs have been sensitised to ragweed pollen extracts with great regularity when the extracts were submitted to preliminary precipitation by potassium alum. Brief reference has already been made to this exceedingly interesting and significant advance made by Dr. Caulfeild, Dr. Brown and Dr. Waters. The study of the influence of ragweed carbohydrate on the reaction (itself a matter of moment) has been reopened with most promising and interesting preliminary results. The serum content of skin sensitising antibody (reagin) in the blood of a number of persons sensitive to ragweed (who constitute a very large portion of so-called "hay-fever" patients) has been estimated. Thus far the results have not indicated that those persons who have a high content of sensitising antibody in the blood are especially likely to be free from symptoms of hay fever. Guinea-pigs have been utilised in the further study of skin sensitising antibody. Serum obtained from a highly sensitive guinea-pig has, by means of the Prausnitz-Küster procedure, been shown to possess a skin sensitising antibody analogous to that demonstrable in the serum of a sensitive human being. Studies of the behaviour of antigen and antibody injected intradermally in various proportions have been made and antibody activity under appropriate conditions has been observed to disappear. Chemical studies of various ragweed fractions have been initiated and the early clinical findings employing different fractions have yielded most intriguing results.

Dr. L. N. Silverthorne whose services are devoted to the Hospital for Sick Children as well as to Connaught Laboratories has made a number of exceedingly valuable contributions during the year. The bactericidal power of human and guinea-pig blood upon meningococci has been further investigated. In conjunction with Dr. Donald Fraser quantitative differences in the bactericidal power of blood from different individuals have been demonstrated. A considerable number of normal healthy persons examined over a period of years have been found to harbour meningococci in the naso-pharynx. Among 63 such persons from whom 1227 nasopharyngeal swabs with secretion were taken and examined at regular intervals for two years, 19 per cent were found to contain meningococci. The blood of these individuals was examined to determine its bactericidal power. The strains of meningococci isolated were tested to demonstrate the invasive power of the blood and with the aid of the "mouse-mucin" test could be classified as "virulent" or "avirulent". Carriers of the meningococcus possess bactericidal substance in the blood whether the strains which they harbour in the naso-pharynx are "virulent" or "avirulent". Blood from carriers has been found to possess bactericidal properties against some "virulent" cerebro-spinal fluid strains of meningococci. These observations are of great theoretical and practical importance. Dr. Silverthorne has also continued his studies of other phases of the problem of meningococcus meningitis. Active immunisation against whooping cough has occupied the attention of Dr. Silverthorne and Dr. Fraser. A study of influenza meningitis and a novel method of serum treatment of the disease has been developed by Dr. Silverthorne.

Most profitable and fruitful collaboration between members of the staff of Connaught Laboratories and of the Hospital for Sick Children, the Department of Public Health, Toronto, Riverdale Isolation Hospital, the Department of Health, Ontario, Toronto General Hospital, McGill University and various other organisations and institutions, has made possible much of the work in the section of bacteriology and immunology under the direction of Dr. Donald Fraser. This co-operation is deeply appreciated and acknowledged with gratitude. No less than fourteen scientific communications were published during the year by members of this section of the Laboratories.

The section of physiology and biochemistry has again been in charge of Professor C. H. Best. Exceedingly important investigations have been conducted during the year by Dr. Best and his co-workers and a number of communications were presented both at the International Physiological Congress at Leningrad in August 1935 and at the meetings of societies in the American Federation for Experi-

mental Biology (including the American Physiological Society, the American Biochemical Society and others) in Washington in March 1936. Dr. Best and Miss Ridout have presented the further results of their studies on choline and liver fat in a series of papers. The importance of choline in human and animal metabolism is receiving ever-increasing recognition. Dr. E. W. McHenry has shown that the addition of vitamin B₁ to a low choline diet fed to young rats brings about a marked increase in the fat content of the livers. He has also investigated the sparing action of vitamin B₁ on fats. Dr. McHenry has studied, too, the time required for the production of fatty livers and the relation of the fat content of the diet to the deposition of fat in the liver. Dr. Best with Mr. J. Campbell in studies of the relation of the anterior pituitary gland to fat metabolism has endeavoured to establish a quantitative test for the active material. Rats, mice, guinea-pigs and chickens have all been investigated and the reaction in mice gives promise of providing a rapid, useful test. The hormone has been investigated in elucidating the effect of extracts on ketosis, liver fat, body fat and kidney fat. Definite differences between the liver fat response of male and female animals have been shown to exist. Dr. D. L. MacLean has made histological studies on fat absorption with and without choline in the diet and in various other conditions. With Dr. McHenry, Miss Gavin has investigated several methods of animal assay of liver extracts. Dr. R. F. Farquharson and Dr. J. A. Dauphinee of the departments of medicine and therapeutics have given most helpful co-operation in this work and the thanks and appreciation of Connaught Laboratories are hereby extended to them and to Professor Duncan Graham, physician-in-chief to the Toronto General Hospital, for courtesies shown. Dr. McHenry and Dr. R. A. Cleghorn of the department of medicine have collaborated in further studies of cortin. Glycine has been supplied to the Toronto General Hospital for the study of its effect in myasthenia gravis. Dr. McHenry has prepared a testicular powder for study in the treatment of prostatic conditions by Dr. Robin Pearse and members of his staff at the Toronto General Hospital. Under Dr. McHenry, Mr. Reedman has investigated the ascorbic acid content of blood and urine in patients at the Hospital for Sick Children. Other studies of vitamin C have also been made. Dr. MacLean has studied various problems in lighting and ventilation; with Dr. H. H. Burnham he has observed the effect of various ventilatory conditions on the nasal mucosa; and with Dr. H. M. Barrett he has investigated the toxic effects of chemicals used in the cleaning industry.

Dr. D. A. Scott and his associate Dr. A. M. Fisher, in the course of their work directed to obtaining an insulin compound which would manifest a prolonged hypoglycaemic effect, have made very important advances. These workers had already shown that insulin solutions to which small amounts of zinc were added, retarded the onset of hypoglycaemia and prolonged insulin action. Hagedorn and his co-workers in Copenhagen subsequently demonstrated that suspensions of insulin and protamine produced a sustained lowering of blood sugar in diabetic patients. Various protamine preparations were made by Dr. Fisher and investigated by Dr. Scott and Dr. Fisher. Satisfactory preparations of protamine insulin have been made for clinical trials. Dr. Scott, knowing that insulin readily combined with zinc and that this metal forms complex salts with amines, postulated that zinc or some other metal might be a factor in the formation of suitable protamine insulin suspensions. Employing protamine and insulin of low ash content, only a slight prolongation of insulin action was observed. If, however, these same mixtures were taken and a trace of zinc added to them, they then produced, when injected, very prolonged hypoglycaemia. Spermine isolated from beef pancreas mixed with insulin containing a trace of zinc prolonged the hypoglycaemic action of insulin in dogs. These results of Dr. Scott and Dr. Fisher mark another important advance in insulin therapy and shed further light on the mechanism of insulin action. To Dr. W. A. Clemens and Dr. Mottley of the Pacific Biological Station at Nanaimo, B.C., warm thanks are extended for assistance in obtaining supplies of salmon milk from which protamine was prepared.

Dr. A. Charles and Dr. Scott have devised methods for the further purification of heparin. Dr. Barrett has investigated the toxicity of trichlorethylene and carbon tetrachloride. He has also continued his determinations of atmospheric pollution. Dr. Barrett has also devised a most ingenious and delicate apparatus for the preparation and analysis of deuterium-containing fats. Mr. K. K. Kay has completed and standardised in absolute energy units a spectroradiometer for the study of the absolute spectral intensity of any radiant energy source. By this means the antirachitic potency of such sources may be evaluated. Mr. Kay has also studied by means of spectroradiometer the transmission of smoky atmospheres for ultra-violet radiation. The reduction of ultra-violet radiation of antirachitic potency by smoky atmospheres has been determined both by biological assay and by the spectroradiometer. The results of the biological assay have been obtained in absolute units and are therefore universally comparable. This is a signal advance. Eighteen papers have been published during the year by Dr. Best and his colleagues.

Professor P. J. Moloney, Dr. E. M. Taylor, Mr. M. D. Orr and Dr. M. D. Smith in the section of chemistry in relation to immunology have made valuable contributions to both theoretical and routine activities of the Laboratories during the current year. Dr. Moloney and Dr. Taylor with Dr. K. F. Brandon have investigated very thoroughly fourteen Schick test toxins, determining combining power and toxicity in guinea-pigs. The criteria were those of the Permanent Commission on Biological Standardisation of the Health Organisation of the League of Nations. Employing the same toxins, Dr. Brandon has carried out a large series of tests in human beings. The results obtained in humans and guinea-pigs suggest that the present international standard for the Schick test might be improved by a change in toxicity and combining power requirements. Experiments have been undertaken to determine suitable conditions under which stable solutions of fresh toxin mixed with toxoid could be prepared, of which the level of toxicity and combining power could be fixed at will. Further work on toxin broth is being carried on to ascertain, if possible, whether variation in toxin production from hog's stomach autolysate is due to variations in the culture employed or in the constituents of the medium. Complete detoxification of toxin produced in this medium proceeds very slowly in the presence of formalin. The time required may be lessened by the dilution of the toxin or dilution of the broth prior to seeding. Dr. M. D. Smith has carefully studied a number of analytical methods with a view to improving accuracy and technique. Dr. Smith has also continued her study of the heat labile detoxifying action of bile on diphtheria toxin. Mr. M. D. Orr has investigated the stability of diphtheria toxoid in the presence of a variety of physical and chemical agents. Toxoid was found to be relatively stable in the presence of a high concentration of acid. This fact has made it feasible to further purify toxoid. Various toxoid complexes have been prepared and studied by Mr. Orr.

In the farm section under Professor N. E. McKinnon research activities have been prosecuted with great vigour and with most gratifying results. Investigation of various problems of fundamental interest have been carried to completion during the year. Dr. Donald Cameron has enquired into the influence of certain elements of the diet on immunity in guinea-pigs. He has shown that the antitoxin response following injection of diphtheria toxoid is definitely depressed in animals in a state of inanition due to vitamin C deficiency. Dr. Charles Siebenmann has continued his studies of the refractometric and chemical changes in culture medium during the growth of *C. diphtheriae*, with especial reference to physical conditions influencing toxin production. Observations on the relationship of toxin concentration to growth, determined gravimetrically, of protein to growth and to toxin concentration, of Lf units to toxicity, have been classified and published, as has a paper on the influence of aeration and diffusion on toxin formation. Dr. Siebenmann has also made exceedingly interesting observations on the detection of H_2S in various bacterial cultures by means of silver foil. He has explored, too, the influence of maltose and glucose on H_2S production. Using the Moloney-Taylor medium quite fundamental work has

been done in this field by Dr. Siebenmann. He has extended also his study of proteins in sera by refractometric methods. The technique developed is being applied also to observations of the plasma of horses undergoing immunisation. Other problems engaging Dr. Siebenmann's attention are methods and routes of immunisation of horses in the production of tetanus antitoxin; and the isolation of fractions of *C. diphtheriae*. The separation of a carbohydrate fraction has been completed.

Dr. R. C. French has studied the distribution of the various antitoxins in their respective plasmas. Methods for the further purification of antitoxin have also been examined. An investigation of the chemical changes in the blood of horses undergoing immunisation has also been undertaken by Dr. French. He has enquired into the antitoxin response to antigens in varying amounts, large and small, primary and secondary to similar doses in large and small volume. This has been done in received further consideration. Dr. Kerslake has studied the blood and urine of horses and guinea-pigs. The addition of adjuvants such as CaCl_2 to antigens has normal horses and of those under treatment. He has also continued his survey of parasitic infestation in horses. Dr. R. D. Heard has been engaged in studies of oestrin and related hormones. He has investigated also the employment of the dietary anoestrus mature rat as a test object for the oestruo-inducing gonadotropic hormone of pregnancy urine. Mr. Gunn has studied the effect of various diets on growth and survival of guinea-pigs, rabbits, mice and rats. The relationship of diet to fertility, the normal oestrus cycles and the effect of diet on oestrus cycles in these species has been explored. Mr. Gunn, too, has continued and extended his work on vitamin C content of diets in guinea-pigs in relation to character of the intestinal flora. He is attempting to develop by selective breeding a strain of guinea-pigs with uniformly high tolerance to vitamin C inadequacy. Mr. Gunn has also observed an interesting mutation among the animals in the albino rat colony. He has made a survey of flies and the fly problem at the University Farm. A study has been made of the normal bacterial flora of animals in the various colonies and of the species of micro-organisms associated with or responsible for sickness or death among these animals.

The very extensive series of investigations herein briefly referred to serves to indicate the extent to which the staff of Connaught Laboratories in both University and Farm Sections have devoted their efforts to the promotion of preventive medicine through enquiry and research.

The recent additions and improvements in the Farm Section have been completed. The Main Building has been altered and rearranged and is now occupied by administration offices, research laboratories and living quarters. Number I Unit, formerly the west stable, has been converted into a fine laboratory building where antigen production, washing, sterilisation and preparation of glassware is carried on. The operating unit has been remodelled and now serves as a concentration unit. Quarters for vaccine virus production, quite separated from all other activities, have been provided in Unit No. II, formerly the centre stable, the upper floor of which is now utilised for housing the mouse and rat colonies. The north end of this building houses animals on test and a portion of the south end has been developed as a store room. No. III Unit, formerly the east stable, provides for the guinea-pig colony but at the south end on the second floor, a splendid biochemical laboratory has been created. On the first floor directly beneath the biochemical laboratory, quarters for heparin production have been found. The Volatile Solvents Building for safe fractionation and recovery of volatile solvents such as ether, acetone, toluol, etc., has been completed. Two new brick stables, each with a capacity for 25 horses, have been built. The water supply plant has been enlarged to provide for the sedimentation, chlorination, filtration and pumping of 50 gallons of water per minute from the river. Additions to building, sedimentation tanks and pipe line, all had to be made. The daily requirements at present from this water supply amount to 6000 gallons. The entire project thus briefly outlined has been completed at a cost of

nearly \$105,000. This includes, of course, the purchase of five additional acres of land secured last year. The Farm now consists of 75 acres of land.

Plasma and serum production on a large scale has been carried on as usual at the Farm. Toxoid production has been greater than ever. Vaccine virus and rabies virus (veterinary) for use in Trinidad have been produced in large quantities. Nearly 6000 litres of media were prepared during the year and in less than three months there were recovered in the new Volatile Solvents Building no less than 540 gallons of toluol, acetone, alcohol, benzene and ether. Laboratory animals were supplied from the farm colonies, rabbits, guinea-pigs, rats and mice to the number of more than 34,000. The guinea-pig breeding colony is to be built up to a level of 5000 animals. The Farm Section of the Laboratories is now established and equipped as are few serum institutes elsewhere in the world. For research, demonstration and the production of biological products facilities have been made available which are unexcelled.

The Comptroller's Section has been extremely active during the year. The total volume of distribution was greater than in any like preceding period. During the last four months of the year three new products were added to those previously distributed. The list now includes:—diphtheria antitoxin, tetanus antitoxin, perfringens antitoxin, scarlet fever antitoxin, staphylococcus antitoxin, anti-meningococcus serum, concentrated anti-pneumococcus sera, anti-anthrax serum, diphtheria toxoid, staphylococcus toxoid, Schick-test preparations, scarlet fever toxins, typhoid vaccines, pertussis vaccine, vaccine virus, rabies vaccine, old tuberculin, pneumococcus typing-sera, heparin, liver extracts, insulin, adrenal cortical extract and epinephrine hydrochloride solutions.

During the year products of the Laboratories were sent to all provinces in the Dominion of Canada, Yukon and the North-West Territories, and exported to Bermuda, British West Indies (Leeward Islands, Windward Islands, Barbados, Trinidad and Jamaica), Chile, England, Formosa, India, Irish Free State, Japan, Newfoundland, South Africa and the United States of America.

Connaught Laboratories Fellowships in Public Health were awarded to Dr. A. R. J. Boyd and Dr. A. D. Lapp of British Columbia, to Dr. A. Gagnon, Dr. J. Paquin and Dr. J. S. Sirois of the Province of Quebec.

Many visitors from abroad have come to both University and Farm Sections of the Laboratories. This year they were from many parts of Canada, the U.S.A., the British Isles, Argentina, Australia, Brazil, China, Esthonia, France, Germany, Holland, India, Japan, Mexico, Newfoundland, Norway, Peru and Switzerland. Graduate and undergraduate students in the University and members of various societies and groups visited the Laboratories for demonstrations, class exercises and exhibitions.

The staff of the Laboratories on June 30, 1936, numbered 245. Ninety four of these are in the Farm Section, five in the Western Division, Vancouver, B.C., and the remainder in the University Section. During the year 48 new full-time appointments were made and there were 14 resignations. Among them was that of Miss Alison Kent who for eleven years was in the comptroller's section of these Laboratories and whose faithful and conscientious work is acknowledged with grateful appreciation. Miss M. B. Phillips, a graduate of the University in the Faculty of Household Science, has been placed in charge of the food kitchens and cafeteria. Mr. K. K. Kay, M.A., has been appointed an assistant in the comptroller's office from July 1st, 1936.

The library in charge of Miss O. E. Somerville, assisted by Miss K. Pichler, has again rendered most valuable service to staff and students not only in Connaught Laboratories but as well to graduates and undergraduates in various faculties and colleges. The seventh volume of Connaught Laboratories Studies was published in April. There are forty-six reprints in this volume. The Studies are sent to libraries in all parts of the world. The library exchange was quite active during the year. Loans have been made to the Farm Section as usual. The total attendance in the

library during the year was 6447. Miss Pichler has listed 2407 references to articles in current literature during the year. Reprints have been catalogued and arranged. Fifteen translations of articles in the literature have been made. One hundred and four current journals are received in the library and during the year 164 bound volumes and 96 books were added. Dr. A. H. W. Caulfeild, for many years chairman of the Laboratories library committee, resigned during the year. To Dr. Caulfeild warm thanks and sincere appreciation for his long-continued interest and enthusiasm for the library are here expressed.

I wish in conclusion again to refer to Western Division of Connaught Laboratories in the University of British Columbia at Vancouver, established in October last with Dr. C. E. Dolman, research member of these Laboratories, in charge. Dr. R. J. Gibbons and three others constitute the original staff of the Division. Dr. Dolman as head of the department of bacteriology and preventive medicine of the University of British Columbia and Director of the Laboratories of the Provincial Board of Health of British Columbia is directing a unique co-operative enterprise in the field of preventive medicine. Thus far, research enterprises only have been undertaken. Routine procedures may be developed later. Excellent progress has already been made. It is evident, too, that more space must be made available at once if full advantage is to be taken of existing opportunities for useful service.

To the Chairman and members of Connaught Laboratories Committee of the Governors of the University and to members of the staff of the Laboratories the Director extends his thanks and appreciation for continued support and co-operation.

(21) STATEMENT REGARDING THE MUSEUM OF ARCHAEOLOGY

(Professor C. T. Currelly)

During the past year, the Museum has continued its steady growth in most of the departments.

The prehistoric section, which has probably now reached first place in America, has been extremely fortunate in adding another forty-six Luristan bronzes, and with them a small series of early Persian potteries. After many years' desire, we have obtained one of the 15th century B.C. Syrian sceptre-swords, and also a number of very important early Syrian axes, swords and daggers, dating approximately from the same period or a few centuries earlier. From the Trans-Jordan comes a remarkable stone axe that must have been made somewhere not far from Hungary and have been passed south in early movements. Another wanderer far from home is an exquisitely beautiful Danish flint axe found in the Polish Carpathians. The British School of Archaeology in Jerusalem presented four hundred and eighty-three flint implements from Mount Carmel. After twenty-five years of hunting, a remarkably fine Bronze Age British bit has been added to the collection.

The Egyptian department has received a very fine temple seal, probably for sealing the strong-room, and also a continuation of Sir Robert Mond's gift from the work of the Egypt Exploration Society.

Our classical side has not been so fortunate, a little Roman-British decorated leather being the only material obtained.

In metalwork, six Merovingian bronzes and some interesting pieces of French-Canadian silver were secured, the latter through the kindness of Mr. Marius Barbeau; and several pieces of domestic silver were given by Miss Jean Robertson. A marvellous Siamese bronze head of about 1400 was presented by Mr. S. Yamanaka, and another very fine one of about 1300 came to us as a gift of the Reuben Wells Leonard Bequest.

The arms and armour section had very little addition, the only outstanding piece being a beautiful Persian powder horn of carved ivory, the gift of Mr. Joseph Brummer of New York.

In furniture, two interesting French-Canadian chairs were obtained, an early Canadian overmantel was presented by Mrs. A. Williams Moore, and four French Renaissance chairs were presented by the Reuben Wells Leonard Bequest. Of general woodwork, one of the quite early French-Canadian sculptures, probably late 17th or early 18th century, a statue of St. Roch in oak, and also two fine French-Canadian carved wood candleholders, were obtained through the kindness of Mr. Barbeau. Of general sculpture, through the Leonard Bequest we received a fine stucco Madonna and Child of the Italian Renaissance.

The R. S. Williams Collection of musical instruments was further enriched by an English flute, and Mr. Alan H. Ross gave three clarinets, a band flute, and a musette.

The ceramic collection came in for some very good additions. We were able to purchase several pieces of early English ware, in which our collection is now becoming quite rich; and with the money donated last year by the Ceramic Art Club, we obtained some excellent pieces of early English porcelain from the leading pottery works. A very fine series of Mohammedan Persian potteries was also received, seventeen pieces being presented by the Reuben Wells Leonard Bequest.

In textiles, several acceptable pieces were presented: a Paisley shawl from Mr. William Debenham; a fine cashmere shawl and a velvet garment from General W. F. Swiny; a Quaker bonnet from Mr. Esli Terrill; three wooden blocks for printing Indian fabrics from Mrs. L. W. R. Bryce; a printed silk gauze shawl from Mrs. Gladstone Edwards; a dress from Mrs. Fred R. Love; another Paisley shawl from Miss Jean Robertson; and a small collection of silk brocade from Mrs. J. B. Laidlaw.

The department of printing and the book obtained a number of etchings, colour-blocks and wood-engravings; and the collection of postage stamps has been very greatly augmented, chiefly through gifts obtained for us by Mr. Paul Hahn or given by him directly.

On the East Asiatic side, four Ying-Ch'ing porcelains were obtained; a collection of clay moulds for bronze casting was given by Bishop W. C. White; Mr. S. Yamanaka presented half of a very fine Han tile and three Sung tea bowls; and a coat of embroidered gauze was given by Miss Mabel E. Tom. As an example of what it is possible to do in very hard stone, there was obtained through the Reuben Wells Leonard Bequest one of the marvellous, almost paper-thin, jade plates made for the Emperor Ch'ien Lung in the latter half of the 18th century. We also obtained through the Leonard Bequest a remarkably fine Chinese bronze statuette of about 500 A.D., a beautiful painted Japanese screen of about 1600, and a fair-sized collection of 17th and 18th century Japanese ceramics. Mrs. W. C. White also presented a hundred Japanese stencils for printing textiles.

In the department of ethnology, we have received a large collection of British Columbia jade implements and the boulders from which such implements were cut. These show all the stages in the working of a boulder, and as we also received the stone saws with which the jade was cut, we are able to illustrate, as few places ever will be able to do, this remarkable industry. Thirteen beautifully decorated vases from Central America were obtained, and a small quantity of Mexican material. A large number of gifts was received in most of the subsections. Conspicuous among them was a Libyan collection from Dr. Henry R. Maurer; a Golden Har from Sir Harry Haig; a very fine Costa Rican metate from the Rev. R. L. Brydges; some fine Samoan tapa from the Rev. G. G. Brown; a collection of Patagonian silver from the estate of Mrs. S. A. Stewart; and from Mr. L. A. Learmonth a most important series of early Eskimo material. A remarkable piece of early Indian sculpture, part of a Mexican yoke elaborately carved from porphyry, was obtained through the Reuben Wells Leonard Bequest.

The general work of case-making, cataloguing and teaching has gone on as usual.

(22) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM
OF ZOOLOGY AND THE BIOLOGICAL MUSEUM*(Professor J. R. Dymond)*

The most noted exhibits added during the year were specimens mounted under the Reuben Wells Leonard Bequest. Those prepared during the past year included the takin, male and female mountain sheep, buffalo calf, elk fawn, coyote, wallaby, Tasmanian devil, mink, brush wolf, and timber wolf.

The exhibition series of Canadian and foreign birds have been improved by replacing a number of old specimens by more recent mounts. A series of insects of economic value, mounted on their food plants, has also been installed.

The research collections continue to grow as a result of donations, collection, exchange and purchase. The number of specimens of the more important groups added during the past year was as follows:

Mammals	1,476
Birds	1,539
Reptiles	55
Amphibians	122
Fish	439
Insects	2,437
Crustaceans	45
Molluscs	6,303
Miscellaneous	1,319

Among the more important of the donations were:

Brennard, C. G. 1 passenger pigeon.

Coventry, Prof. A. F. 118 mammal skins and 1 snake.

Boyd, Mossom. 119 volumes Buffon's *Histoire Naturelle*, published 1799-1805, and 42 volumes of Jardine's *Naturalists' Library*.

Clarke, S. H. A pair of pronghorns, commonly called antelopes.

Merriman, Miss Ida. Diaries and other records of natural history observations of her brother, the late R. O. Merriman, made between June, 1921 and October, 1934.

National Parks Branch, Department of the Interior, Ottawa. A caribou from Jasper Park, a mule deer from Buffalo Park, Wainwright, 5 coyotes, 1 cougar, 24 mammal stomachs and 27 photographic enlargements of animals.

Pirie, Dr. Alex. P. Case of 16 mounted Costa Rican birds.

Toronto Parks Department. 31 mammals, 27 birds and 2 reptiles, including Malayan Sun bear, striped hyena, alligator, 2 bear cubs, armadillo, two-toed sloth, red kangaroo and spotted hyena.

Walkinshaw, C. A. 2 Volumes, "Monograph of the Thrushes".

Waller, Sam. 21 birds, 3 mammals, 1 reptile, 6 bird nests and 59 bird eggs.

Whelan, R. V. 7 birds, 5 bird eggs, 15 mammals, 3 reptiles, 12 fishes, 49 amphibians, 775 insects, 4 leeches, 4 lots of crustaceans, 115 molluscs, 88 vials of spiders.

Fleming, J. H. 3 bird skeletons, 1 lot of molluscs, 184 mammal skins and 2 birds.

Donations were also received from the following: Ralph E. Akey, Dr. A. E. Allin, William E. Alton, Burt Armstrong, John B. Armstrong, C. E. Atwood, E. W. Bailey, James L. Baillie, Jr., Miss Joan Baillie, Gordon Blain, Miss Hettie Bain, Mrs. J. M. Baldwin, Frank Banfield, Professor E. W. Banting, Roger Barr, W. Baxter, R. Bayliss, L. H. Beamer, Garnet S. Bell, H. Bell, Mrs. B. A. Bensley, J. R. Bickerstaff, R. D. Black, Fred Bodsworth, Dr. H. M. Bowen, J. F. Brimley, Major

Allan Brooks, A. W. A. Brown, E. R. Buckell, Charles Burdette, A. G. Burns, E. Burnthal, H. Cameron, A. D. Campbell, Mrs. Capon, S. Chamberlain, J. Chisholm, Dennis H. Chitty, Dr. C. H. D. Clarke, Dr. F. Arnold Clarkson, M. F. Cook, Harry O. Cooper, Charles E. Corfe, Dr. A. Cosens, Norman R. Craig, Crewe Brothers, Stuart Criddle, E. C. Cross, Dr. C. T. Currelly, Murray W. Curtis, Rupert Davids, Lt. Col. L. S. Dear, Prof. A. T. DeLury, Jack Dennis, Wm. F. Depew, Otto E. Devitt, Russell G. Dingman, Kenneth Doan, Captain T. E. Donne, Stuart C. Downing, John Edmonds, Paul F. Elson, F. Hardie Emery, Entomological Society of Ontario, Louis Epps, A. M. Fallis, Federation of Ontario Naturalists, John Freeman, K. Freeman, G. F. Fry, Harold Fulcher, Robert J. Gill, M. E. Gillespie, H. Glazbrook, Norman L. Goldthorp, Norman Gooderham, Hedley K. Gordon, Arthur S. Goss, Dr. S. Hadwen, Paul Hahn, H. Handley, Professor W. J. K. Harkness, A. T. Harper, Dr. Paul Harrington, Miss J. E. L. Hart, Dr. John L. Hart, Mrs. J. A. Harvey, Donald Hassel, Holton B. Haugh, Thomas Hayman, Mrs. H. G. Henson, Miss Higgins, C. F. Holmes, Clifford E. Hope, G. Hopping, Professor A. G. Huntsman, G. D. Hurlburt, Dr. W. Ellis Hurlburt, Dr. F. P. Ide, W. I. Irving, H. Roy Ivor, Howard B. Jackson, Allan Johnson, R. W. Johnson, L. L. Jorgensen, Alfred Kay, Charles E. Kay, J. E. Keays, W. A. Kennedy, H. H. King, Miss Fanny Korn, Mrs. Ella Kuitunen, T. B. Kurata, Dudley Land, Monroe Landon, K. H. Lang, Hon. Chief Justice F. R. Latchford, B. J. Lee, Dr. A. H. Leim, C. B. Leonard, Mrs. R. W. Leonard, Wm. J. LeRay, R. V. Lindsay, Henry A. Little Estate, Misses Littman, Charles Lloyd, Hoyes Lloyd, F. Lockhart, E. B. S. Logier, Miss Ruth E. Logier, W. H. Lunn, E. G. MacDougall, F. A. MacDougall, B. H. MacIntee, H. G. Mack, Donald I. MacKinnon, D. MacLulich, Sr., D. A. MacLulich, Wm. C. Mansell, J. M. Maret, Rev. Donald B. Marsh, Thomas D. Masey, E. J. R. Mason, Jack May, J. M. McArthur, Dr. McCormack, Dan McCowan, J. V. McCutcheon, Robert McKay, Dr. F. W. McKee, W. W. McKinlay, Miss M. F. McLennan, Hugh McManus, Dr. G. A. McQuibban, J. C. Medcof, M. Meikle, Charles Melton, R. B. Miller, Jack Miner, Miss C. E. Mitchell, George C. Morrison, John P. Morton, Charles Mulcahy, Mrs. Ethel Rogers Mulvany, J. A. Munro, Dayton Murphy, George S. Myers, Dr. A. W. H. Needler, Knud Nielsen, George W. North, Wm. O'Neill, Ontario Dept. of Game and Fisheries, John G. Oughton, Mrs. John G. Oughton, Wm. Owen, H. M. Parrington, Mrs. T. C. Patteson, Herbert Pickering, W. E. Playter, Leslie A. Prince, Dr. A. L. Pritchard, D. L. Proctor, J. W. Rainbow, Wm. Renison, W. E. Ricker, Don Ritchie, Clifford Robb, Wallace Havelock Robb, Emerson Robertson, J. B. Roninson, Charles K. Rogers, Harold M. Rogers, H. R. Rogers, Blair Ronald, W. F. H. Rosenberg, Douglas Ross, J. B. C. Runnings, R. J. Rutter, A. Saunders, Dr. R. M. Saunders, D. M. Scott, Mrs. M. E. Servos-Snyder, R. W. Sheppard, T. M. Shortt, Dr. Siddigi, L. H. Sinclair, Mrs. W. C. Skelley, W. R. Skey, G. Foster Smith, G. F. M. Smith, T. N. Smith, V. Snowden, L. L. Snyder, H. H. Southam, Southwest Scientific Society, Dr. Cam Sproule, Dr. Fred Starr, Harold Steele, Levi Sternberg, J. A. Stevenson, Dr. V. H. Storey, Frank Stoughton, Edgar E. Sullivan, Miss E. Summers, Hampton W. Swaine, Andrew Tait Estate, Miss Nan Taylor, Roy and William Taylor, Dr. T. M. C. Taylor, S. L. Thompson, G. C. Toner, Toronto Public Library, H. H. Townson, Sprague Troyer, University of Michigan, Thos. F. Upham, Prof. J. Urich, H. A. Van Weeckel, Miss Dorothy Walker, Dr. E. M. Walker, Clarence Watson, J. W. Wickett, G. V. Wilby, A. L. Wilson, Miss M. Wilson, Robert E. Wright, V. C. Wynne-Edwards, Charles Zarobsky.

Additions to the library include 207 bound books and 758 pamphlets and unbound publications.

The use of the Museum's collections by research workers continues to increase. Specimens loaned to institutions and workers outside Toronto include molluscs loaned to the University Illinois and to the University of Michigan, mammals loaned to the University of California and to the United States Bureau of Biological Survey, birds examined by members of the American Ornithologists' Union attending the convention here in October, 1935, from the Smithsonian Institution, the University

of Michigan. The Bureau of Biological Survey, also birds were loaned to the United States National Museum.

As a result of a gift by Mrs. B. A. Bensley, the Royal Ontario Museum of Zoology was able to offer the services of a lecturer, Mr. F. A. Urquhart, to school classes visiting the Museum. At first, the response of classes was discouraging, but when the nature of the service became better understood, the number of classes increased. It is hoped to continue this feature next year.

The following studies, chiefly taxonomic and faunistic, have been carried on during the past year by:

- L. L. Snyder. Movements of willow ptarmigan (*Lagopus lagopus*) in relation to changes in their populations. Survey of distribution of birds in Central Ontario. Food studies of Ontario birds.
- E. C. Cross. Characters and distribution of Ontario wolves.
- J. L. Baillie, Jr. Distribution of breeding birds in Ontario.
- T. B. Kurata. Distribution of Ontario spiders.
- E. B. S. Logier. Taxonomy and distribution of Ontario amphibians and reptiles.
- J. G. Oughton. Distribution of Ontario mussels.
- Mrs. J. G. Oughton. Distribution of Ontario bats.

(23) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM OF GEOLOGY

(*Professor E. S. Moore*)

Two public lectures were delivered during the year under the auspices of the Museum of Geology: The Origin of the Great Lakes, by Dr. A. P. Coleman and the Story of Oil, by the Director. The section of glacial and interglacial formations at the Don Valley Brick Yard has been completed and installed in the gallery and forms an exhibit that is quite unique in museums. Other specimens added to the collections are as follows:

Donations:

- Gold ore from the Macassa mine, Kirkland Lake, Ont., by R. A. Bryce.
- Suite of specimens of clay, bentonite, shale, and sandstone from Saskatchewan, by H. H. Beach.
- Axinite from Porcupine district, Ontario, by Dr. M. E. Hurst.
- "Sand carbonate" lead ore, Paradise mine, B.C., by R. W. Brigstocke.
- Miner's safety lamp, by Miss A. Pride per Dr. W. A. Parks.
- Specimens of monazite and tourmaline pegmatites and axinite and dumortierite, from California, by L. H. Dykes.
- Kauri gum from New Zealand, by Miss L. J. Payne.
- Gold ore from the Afton mine, Timagami Forest Reserve, by W. E. Aitchison.
- Chert from Bedfordshire, England, by H. Cawley.
- Collection of clays and till from Port Hope, Bowmanville, Oshawa, Scarborough, and Highland Creek, Ont., by Dr. A. P. Coleman.
- Gold ore from God's Lake mine, by R. Jowsey.
- Polished specimen showing intricate vein structure from Cornwall iron mines, Penna., by Professor H. Ries.
- Limestone from Go-Home-Bay, Ont., by A. M. Bryton.
- Specimen illustrating vein structure from Peru, by Dr. T. L. Walker.
- Two specimens of *Elephas primigenius* of post-Glacial age. One from north of West Hill, Ont., by E. R. Halladay and the other from Hamilton, by E. M. Proctor per A. P. Coleman.
- Gypsum showing remarkable structure, and a suite of cave deposits from New Mexico, by R. M. Burnet.

Purchases:

Opal from Queensland, Australia.
Suite of concretions from California.
Collection of ores from Colorado.
Bismuth ore from Bolivia.
Axinite and dumortierite from California.
Polished scapolite and wernerite from Ontario.
Lead-zinc ore from Hartz, Germany.

Prepared in the Museum: Geological relief model of the Sudbury nickel field as part of an exhibit of this famous mining field.

Collections:

Rock and ore specimens from the Ramore area and Timagami Forest Reserve, Ontario, and from Pennsylvania.

(24) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM
OF MINERALOGY

(*Director, Dr. T. L. Walker*)

In the year under review the museum has added to its great store of minerals and rocks by collection in the field, purchase, exchange, and by donations from friends. The director spent a part of last summer collecting specimens in British Columbia. Professor A. L. Parsons, assistant director, was able to be in the field for three days only for a special collecting trip in Hastings County, Ontario. It is the settled policy of the museum to collect largely so as to be able to secure Canadian material which would otherwise be unobtainable, in order that by exchange with similar institutions in other parts of the world we may secure the best available material which in many cases could not be obtained in any other way. Already this plan has resulted in the enrichment of our collections by exchanges with most of the important museums of the world.

In the exhibition gallery the automatic balopticon with its series of pictures relating to the mineral industry continues to be an attraction to young and old alike. The exhibit of fluorescent minerals is a never failing attraction where thousands can see the different effect of ordinary light and ultra-violet light in producing colour in certain minerals. An ever increasing number of students are making use of the systematic collections of minerals and rocks and the paragenetic collections, with most gratifying results. The larger specimens in the high cases with their descriptive labels have received most favourable comment from visitors. One museum curator has asked for duplicates of these labels for use in his collection.

Further additions of fine specimens of gemstones have been made from money provided by the bequest of the late Reuben Wells Leonard, Esq. The collection now contains good specimens of most of the gemstones and is one of the most popular exhibitions in the gallery.

The work of the last twenty-five years has given the museum one of the finest gallery displays in America, so that the additions of a single year might easily be overlooked. Attention should be called, however, to an enormous slab of black mica from Hastings County which was presented by Dr. T. L. Gledhill. This occupies a wall case just inside the entrance to the gallery.

Heretofore the paid staff in this museum has consisted of two non-scientific assistants. With provision for a part-time scientific museum assistant for the coming year it is hoped that scientific work of value to the mineral industry may be carried on.

(25) STATEMENT REGARDING THE ROYAL ONTARIO MUSEUM
OF PALAEOLOGY*(Professor W. A. Parks)*

The progress in this Museum during the year 1935-36 was as follows:—

Much material was collected by graduate students, a limited number of foreign series was obtained by purchase, and a large collection of vertebrate fossils was collected from the Red Deer River; also, vertebrate material was received in exchange from the University of Pittsburgh and the Los Angeles Museum. Further, I am glad to record that all the remaining material from South America has been received.

In the invertebrate galleries the Ontario material and that obtained by purchase has been put in place, and considerable progress has been made in the installations of wax models in the geological series of cases.

In the vertebrate gallery the chief additions are a fine head of *Megatherium* received from South America; a complete skeleton of the camel *Stenomylus hitchcochi* and an excellent head of *Promerychochoerus* from the Carnegie Museum, Pittsburgh.

In the vertebrate workroom an excellent skeleton of a new species of trachodont dinosaur has been completely prepared as an open mount. Another trachodont dinosaur has been prepared for exchange with the Pittsburgh Museum.

Mr. Sternberg has been engaged in repairing and remounting some of the material obtained from South America. In particular, he has completed the carapace of a large *Glyptodon* which is now ready to place in the gallery.

The *Styracosaurus* material obtained by the expedition of 1935 has proved very interesting. We are indebted to Dr. Barnum Brown of the American Museum of Natural History who is collaborating with Mr. Sternberg in the working out of the anatomy.

Owing to the absence of the director, descriptive work on the dinosaurs and the completion of the monograph on stromatoporoids has of necessity been discontinued. Miss Fritz has completed the revision of our large brachiopod collection and has greatly assisted in carrying on the work of the director.

Progress has been made in the making of models in wax for the underwater specimens of the geological series. A new register of all our fossils is now under way; it is hoped that very shortly the registration of material will be in a more satisfactory condition.

The most important acquisitions during the year are as follows:

By donation

Two rare pelecypods from Kansas—Mr. J. B. Litsey, Dallas, Texas.

Crepidophyllum colligatum—Mr. E. J. Buckley, Hamilton, Ontario.

Collection of rocks and fossils from Wales—Professor A. P. Coleman, Royal Ontario Museum, Toronto.

Collection of Carboniferous plants—Mr. H. J. Fairhead, Lake Simcoe Ice and Fuel Ltd., Toronto.

Collection of cephalopods, corals and plants—Mr. W. H. Harris, Port Perry, Ontario.

A set of publications of the Geological Survey of New Jersey—Dr. Helgi Johnson, Rutgers University, New Jersey.

Specimens of *Gonioceras anceps* and *G. kayi*—Dr. Marshall Kay, Columbia University, New York.

Megalomus canadensis—Mr. D. H. Norman, 440 Millwood Road, Toronto.

Zaphrentis cf. *gigantea*—Mr. E. S. Pentland, Moose River, Ontario.

Plectorthis plicatella—Mrs. H. C. Rae, 40 Charles Street East, Toronto.

Collection of fossils from Alberta—Dr. J. C. Sproule, Royal Ontario Museum of Palaeontology, Toronto.

By exchange

Smilodon californicus (sabre tooth) and *Aenocyon dirus* (wolf)—Dr. C. Stock, Los Angeles Museum, Los Angeles, California.

Megatherium americanum—National Museum, Rio de Janeiro.

Collection of fossils from the Devonian and Cretaceous of Brazil—Brazil Geological Survey.

By purchase

Set of fine brachiopods and sea-urchins from Texas—Mr. J. B. Litsey, Dallas, Texas.

By collection

Summer expedition—per Mr. L. Sternberg.

Most of the skeleton of a horned dinosaur (*Styracosaurus albertensis*).

A large part of the crest of *Styracosaurus*.

Part of a head and a number of plates of plated dinosaur.

Skull and part of the skeleton of the plated dinosaur (*Pano-plosaurus*).

Turtle (*Baena*); Turtle (*Aspiderites*); Turtle (*Aspiderites*).

Large ammonite.

APPENDIX B

REPORT OF THE REGISTRAR

(*A. B. Fennell, Esq., M.A.*)

I beg to submit the following statistics for the year ending June 30th, 1936:—

- (a) Distribution of the staff of the University and University College (furnished by the Bursar).
- (b) Distribution of the staffs of the federated Arts Colleges (furnished by the Registrars of the colleges).
- (c) Registration of students by faculties and years.
- (d) Enrolment in the Arts Colleges (furnished by the Registrars of the colleges).
- (e) Enrolment in the university departments in Arts (furnished by the departments).
- (f) Registration in courses in the Faculty of Arts.
- (g) Registration in courses in the School of Graduate Studies (furnished by the Secretary of the School).
- (h) Results of annual examinations (furnished by the Secretaries of the faculties).
- (i) Admission to degrees.
- (j) Geographical distribution of students (furnished by the Secretaries of the faculties).

(a) Distribution of the Staff of the University and University College:

Professors	11	12	15
Associate professors	6	4	11
Assistant professors	2	..	1
Lecturers	9	5	12
Instructors	5	1	13
Fellows	1	2	..
Readers	2

(c) Registration of Students by Faculties and Years:

The number of students registered in the university, in colleges and faculties, in the session 1935-36 was 7,409, distributed as follows:

	Men	Women	Total
Faculty of Arts.....	2,234	1,796	4,030
University of Toronto.....	652	501	1,153
University College.....	650	535	1,185
Victoria College.....	468	497	965
Trinity College.....	239	143	382
St. Michael's College.....	227	127	354
Registered twice.....	2	7	9
Faculty of Medicine.....	829	63	892
Faculty of Applied Science and Engineering.....	763	4	767
Faculty of Household Science.....	...	53	53
Ontario College of Education.....	482	347	829
Faculty of Forestry.....	37	...	37
Faculty of Music.....	26	14	40
School of Graduate Studies.....	452	161	613
Faculty of Dentistry.....	195	23	218
Registered twice.....	55	15	70
	4,963	2,446	7,409

In departments there were registered 539, distributed as follows:

	Men	Women	Total
Department of Social Science.....	16	104	120
School of Nursing.....	...	349	349
University Extension (Occupational Therapy).....	...	36	36
University Extension (Physiotherapy).....	...	34	34
	16	523	539

The grand total of registration for the whole university was 7,943, of whom 4,979 were men and 2,969 were women.

In addition there were 5,894 persons registered in the Department of University Extension in courses and at provincial centres which are referred to in detail in Appendix A (14).

The figures may be further analysed as follows:

Faculty of Arts*University of Toronto*

	Men	Women	Total
Teachers' Classes and Summer Session.....	418	467	885

UNIVERSITY OF TORONTO
SUPERINTENDENT'S OFFICE

SUPERINTENDENT'S REPORT
1935-36

No new construction of a major nature was started during the year. Certain work at the Royal Ontario Museum and the David Dunlap Observatory, but more particularly, at the Connaught Laboratories Farm, brought the total value of new construction to approximately \$68,000.00.

BUILDINGS (MAINTENANCE)

During the year approximately \$72,000.00 was expended on Repairs and Renewals of the University buildings and the Royal Ontario Museum. This amount is considerably less than one-half of one percent of replacement valuation, and is used largely in maintaining the fabric and mechanical services of the buildings. With the appropriation available, it is impossible to meet the demands for such items as improved lighting and interior decoration.

The regular yearly inspection of all fire hose has taken place, and the necessary replacements made. Chemical extinguishers have been inspected, discharged and re-filled, and special extinguishers provided for special hazards. An inspector from the Toronto Fire Department has also made an inspection of our buildings from a fire hazard standpoint.

In addition to the 57 buildings directly supervised by my office, heat and light are supplied to Knox College, Victoria University and Wycliffe College, and some power to Trinity College.

The expenditure for fuel and electricity for University buildings and the Royal Ontario Museum, and the services to the colleges mentioned above, was approximately \$141,000.00. The consumption of electricity continues to increase. For financial reasons, this is checked as much as possible, even to the extent of lagging behind accepted practice. Due to the wider use of electricity in its application to teaching and research, and the demand for higher lighting intensity, this increase is inevitable. Both our present generating and distributing systems are inadequate.

EMPLOYEES AND WORKSHOPS

The average number of employees working for the office, exclusive of contracts, was 276, tradesmen accounting for 81 of this number. The merchandise distributed through Superintendent's Stores amounted to approximately \$104,000.00. The wage item for sundry labour was approximately \$282,000.00, while salaries of semi-permanent staff amounted to \$28,000.00, making a total of approximately \$310,000.00. These figures include services rendered to Connaught Laboratories, Hart House, Athletic Association, etc., the Royal Ontario Museum, and the colleges.

PURCHASING

During the year, 8,564 departmental orders and 7,002 Superintendent's Stores and work orders, a total of 15,566, were sent out, and, in consequence, 22,170 accounts were passed for payment. These purchases involved the passing of 1,169 customs entries handled within the office. In addition, 5,390 accounts for work done for separate financial entities were sent out for payment. Accounts are passed promptly for payment, so that all possible discounts are obtained, and the good will of the sales people maintained. Every effort is made to obtain the known benefits to which the University is entitled under the Customs and Sales and Excise Acts.

POST OFFICE

During the year, the turnover in the branch Post Office in the University amounted to approximately \$33,000.00. The revenue to the University from this source was \$1,097.88.

POLICE AND WATCHMEN

The Police Force has been successful in handling the problems created by the public. Its relationship with the student body continues cordial, and effective at the same time. We are indebted to the City Police for their willing co-operation at all times. A close supervision of the watchman service is maintained, and daily reports are carefully checked.

CENTRAL PLANT

The amount of radiation heated from the Central Plant, exclusive of high pressure service, was 347,856 square feet, as against 344,237 for the previous year. The total cost of operation was \$139,182.38, as against \$137,510.50 for the previous year. The total unit cost for heat and light was 40.0c per square foot of radiation, as against 39.9c for the previous year. The amount of 40.0c was made up of 24.0c for heat, and 16.0c for light and power. The average temperature, October to May inclusive, was 1.24 above the average, against 1.92 degrees above the average for the same period the year before. The unit cost of coal was approximately the same as for the previous year.

Comparative tables showing the operation of the Central Plant and the distribution of charges for 1934-35 and 1935-36 are attached.

A. D. LEPAN,
Superintendent.

November 2nd, 1936.

AUDITOR'S CERTIFICATE

Toronto, 19 November, 1936.

To the Governors of the University of Toronto:

GENTLEMEN:

I have verified the attached Balance Sheet of the University dated 30th June, 1936, and Schedules 1 to 10, and report that all the transactions of the year upon the Revenue and Capital Accounts have been duly audited and found correct.

The securities representing your investments are held in safekeeping by your bankers, The Canadian Bank of Commerce, and were produced for my examination on 2nd July, 1936, and also at another time during the year, and found to be in agreement with the records kept by the Bursar. Your securities consist largely of bonds issued or guaranteed by the Dominion of Canada and by the Province of Ontario and bonds of Ontario municipalities with certain corporation and other securities received as bequests. Their market value as at 30th June, 1936, was greater than their book value by approximately \$1,072,262.87.

Bonds of the following municipalities which are included in your investments are in arrears of interest from one to four years or interest payments are being received at reduced rates:

	Par Value	Book Value
Town of Mimico		
5½% 1942-45.....	\$21,000.00	\$21,919.25
Essex Border Utilities		
5½% 1945-47.....	19,047.60	19,802.72
Town of Weston		
5% 1936-1953.....	51,041.94	50,446.25
Town of Bridgeburg		
5½% 1936-1946.....	23,194.01	23,746.75
Township of East York		
5% 1944-1946.....	30,000.00	29,792.65
Township of York		
5% 1935-1936.....	16,000.00	15,942.20
Township of Scarborough		
5% 1943-1957.....	73,697.27	74,765.96
Town of Leaside		
5½% 1933-1944.....	4,029.24	1,895.79

I also report that no income was received from certain non-trustee securities which came to you from the Wallberg and Whitney bequests.

The Bursar's records are well kept and all Endowment and Trust Funds properly accounted for.

Yours faithfully,

G. T. CLARKSON, F.C.A.,
Auditor.

Mathematics

Professors:			
S. Beatty (paid also \$560 for Extension Work) \$5,500 — \$180.....		\$5,320	00
M. A. Mackenzie, \$5,500 — \$180 (retired 30 June).....		5,320	00
I. R. Pounder (paid also \$420 for Extension Work) \$4,500 — \$135..		4,365	00
Associate Professors:			
W. J. Webber, \$4,000 — \$115.....		3,885	00
N. E. Sheppard, \$3,800 — \$107.....		3,693	00
Assistant Professors:			
D. A. F. Robinson, \$3,350 — \$89.....		3,261	00
J. D. Burk (paid also \$366 for Extension Work) \$2,600 — \$63.....		2,537	00
G. deB. Robinson, \$2,600 — \$63.....		2,537	00
Richard Brauer, \$2,600 — \$63.....		2,537	00
Lecturers (Sessional):			
Miss C. Krieger (paid also \$322 for Extension Work) \$2,050 — \$46.50		2,003	50
Miss M. E. G. Waddell, \$1,950 — \$43.75.....		1,906	25
Fellows (Sessional):			
D. C. Baillie.....		700	00
D. B. DeLury.....		700	00
J. M. Kingston.....		700	00
Carson Mark.....		700	00
D. C. Murdoch.....		700	00
C. J. Nesbitt.....		700	00
H. C. Unruh.....		700	00
		<hr/>	
			\$42,264 75

Applied Mathematics

J. L. Synge, Professor (paid also \$25 from University Press) \$6,000 — \$205		\$5,795	00
A. F. C. Stevenson, Associate Professor, \$3,450 — 93.....		3,357	00
B. A. Griffith, Lecturer (Sessional) \$1,950 — \$43.75.....		1,906	25
G. E. Hay, Fellow (Sessional).....		700	00
		<hr/>	
			\$11,758 25

Physics

Professors:		
E. F. Burton, also Director of Laboratory, \$5,500 — \$180.....		\$5,320 00
J. Satterly, \$5,000 — \$155.....		4,845 00
L. Gilchrist (paid also \$280 for Extension Work) \$4,200 — \$123....		4,077 00
H. A. McTaggart, Associate Professor, \$4,200 — \$123.....		4,077 00
Assistant Professors:		
D. S. Ainslie (paid also \$420 for Extension Work) \$3,100 — \$79....		3,021 00
H. J. C. Ireton, \$2,950 — \$73.50.....		2,876 50
H. Grayson Smith, \$2,900 — \$72.....		2,828 00
C. Barnes, \$2,600 — \$63.....		2,537 00
Lecturers (Sessional):		
J. O. Wilhelm, \$2,800 — \$69.....		2,731 00
M. F. Crawford, \$2,400 — \$57.....		2,343 00
Lecturers and Demonstrators (Sessional):		
A. Pitt, \$2,250 — \$52.50.....		2,197 50
Miss E. J. Allin, \$2,000 — \$45.....		1,955 00
Miss K. M. Crossley, \$1,500 — \$32.50.....		1,467 50
Miss F. M. Quinlan, \$1,400 — \$30.....		1,370 00
J. K. L. MacDonald, \$1,200 — \$25.....		1,175 00
Special Lecturers (Sessional):		
A. B. McLay.....		300 00
W. H. Kohl.....		200 00
W. E. Jackson.....	} without salary.....	
W. E. K. Middleton.....		
John Patterson.....		
Andrew Thomson.....		
Bernhard Haurwitz, Carnegie Fellow, 9 mos. from 1 Oct. (paid \$1,800 from Special Fund).....		800 00
R. Richmond, Demonstrator (Sessional).....		800 00
Assistant Demonstrators (Sessional):		
S. M. Bateson (paid also \$30 as Technical Assistant).....		800 00
A. H. Woodcock.....		800 00
H. L. Welsh.....		700 00
G. F. Clark.....		500 00
F. J. P. Consitt (resigned 15 Feb.).....		281 25
Stuart M. Dockerty.....		500 00
D. W. R. McKinley.....		500 00
L. Newman.....		500 00
H. desB. Sims.....		500 00
A. I. Cove.....		450 00
J. R. Levitt.....		450 00
A. F. Chisholm, Special Demonstrator (Sessional — without salary).....	
Class Assistants:		
K. C. Mann.....		100 00
G. W. C. Tait.....		72 00
F. A. O. Banks.....		45 00
Miss A. T. Reed, Secretary and Class Assistant, \$2,000 — \$45.....		1,955 00
Miss B. M. Savage, Clerical Assistant, \$1,500 — \$32.50.....		1,467 50
T. S. Plaskett, Mechanician, \$2,600 — \$63 (retired 30 June).....		2,537 00
Assistant Mechanicians:		
B. Clark, \$1,800 — \$40.....		1,760 00
J. Anderson, \$1,800 — \$40.....		1,760 00
J. Ward, \$1,800 — \$40.....		1,760 00
G. T. Woodward, \$1,800 — \$40.....		1,760 00
R. H. Chappell, Glass-blower, \$2,600 — \$63.....		2,537 00
P. Blackman, Laboratory and Lecture Assistant, \$1,600 — \$35.....		1,565 00

\$67,420 25

Astronomy

R. K. Young, Professor, also Director of David Dunlap Observatory, \$4,500 — \$135.....		\$4,365 00
Lecturers (Sessional):		
F. S. Hogg, \$2,550 — \$61.50.....		2,488 50
P. M. Millman (paid also \$200 for Extension Work) \$1,750 — \$38.75		1,711 25
J. F. Heard, Demonstrator (Sessional — paid also \$200 for Extension Work) \$1,500 — \$32.50.....		1,467 50
Miss F. S. Patterson, Assistant (Sessional).....		500 00
Miss R. Northcott, Computer, \$1,000 — \$20.....		980 00
Miss E. M. Fuller, Secretary-Librarian, \$1,000 — \$20.....		980 00
Gerald F. Longworth, Night Observer, 9 mos., 22 days.....		973 34
Wm. MacDonald, Mechanician, 3 mos. @ \$110, \$330 — \$67.3.....		323 27

\$13,788 86

Geology

Professors:

W. A. Parks (on leave of absence) \$6,000—\$205 (resigned 30 June)	\$5,795 00
E. S. Moore. Economic Geology (paid also \$100 for Summer Field Work and \$1 from University Press) \$5,200—\$165.	5,035 00
A. MacLean (paid also \$280 for Extension Work) \$4,200—\$123..	4,077 00
Dr. Madeleine A. Fritz, Lecturer (part time—Sessional; paid also in Royal Ontario Museum) \$750—\$15.	735 00
Instructors (Sessional):	
J. Satterly, \$1,500—\$32.50.	1,467 50
J. C. Sproule, \$1,500—\$32.50.	1,467 50
Class Assistants (Sessional):	
J. E. Armstrong.	250 00
G. R. Berquist (resigned 28 Feb.)	156 25
O. F. Carter.	250 00
H. C. Lane.	250 00
W. W. Moorehouse.	250 00
Bruce Russell.	250 00
H. G. Way.	250 00
Douglas Monteith, Laboratory Attendant (paid also \$80 for Extension Work) 9 mos.	675 00

 \$20,908 25
Mineralogy

Professors:

T. L. Walker, also Director of Laboratory, \$6,000—\$205.	\$5,795 00
A. L. Parsons (paid also \$140 for Extension Work) \$4,500—\$135..	4,365 00
Ellis Thomson, \$4,000—\$115.	3,885 00
Demonstrators (Sessional):	
A. S. Dadson.	400 00
V. B. Meen.	400 00
J. M. Baker, Assistant (Sessional)	400 00
Wm. Wightman, Laboratory Attendant, 8 mos. (paid also \$40 for Extension Work)	800 00

 \$16,045 00
Chemistry

Professors:

W. Lash Miller, Physical Chemistry, \$6,500—\$305.	\$6,195 00
F. B. Allan, Organic Chemistry (ob. 9 Jan.—remainder of salary to 30 June paid to widow; paid also \$476 as Dean of Faculty) \$5,500—\$218.50	5,281 50
F. B. Kenrick (paid also \$260 for Extension Work) \$5,500—\$180	5,320 00
Associate Professors:	
J. B. Ferguson, \$4,400—\$131.	4,269 00
J. T. Burt-Gerrans, Electro-Chemistry (paid also \$10 for Extension Work) \$4,350—\$129.	4,221 00
L. J. Rogers, \$4,350—\$129.	4,221 00
W. S. Funnell, \$3,950—\$113.	3,837 00
W. H. Martin, \$3,950—\$113.	3,837 00
A. R. Gordon, \$3,300—\$87.	3,213 00
F. R. Lorriman, \$3,300—\$87.	3,213 00
F. E. Beamish, Assistant Professor, \$2,500—\$60.	2,440 00
Dr. Helen Stantial, Lecturer, Micro-Analysis, \$2,500—\$60.	2,440 00
Assistants (Sessional):	
Miss E. V. Eastcott, \$1,800—\$40.	1,760 00
C. Marchant.	740 00
L. H. Cragg.	724 00
A. A. Janis.	724 00
L. F. King.	724 00
J. R. Patton (resigned 20 May)	694 00
R. C. Romans.	724 00
Miss M. Scott.	724 00
Cornelius Unruh.	724 00
W. F. Weston (resigned 31 Mar.)	543 00
M. M. Bayne.	650 00
H. J. Bernstein.	650 00
D. J. LeRoy.	650 00
I. J. W. McHattie (resigned 31 Oct.)	81 25
R. N. Meals.	650 00
J. J. Russell.	650 00

F. J. Webb.....	650 00
I. D. Wintrob.....	650 00
M. Cohen.....	624 00
G. C. Allen (resigned 31 Mar.).....	428 57
Miss M. L. Elder (paid also \$490 from Special Fund).....	320 00
Miss C. J. Sanderson (paid also \$490 from Special Fund).....	320 00
M. Wayman.....	80 00
H. L. Collins.....	35 00
Demonstrators, Electro-Chemistry (Sessional):	
A. H. Heatley, \$2,000 — \$45.....	1,955 00
F. E. W. Wetmore, \$824 — \$16.40.....	807 60
R. S. Soanes.....	750 00
Laboratory Assistants:	
R. Fortescue (with rooms, heat and light valued @ \$420 as care-taker of building) \$1,150 — \$23.75.....	1,126 25
W. Banton, \$1,400; Lecture Assistant, \$200; \$1,600 — \$35.....	1,565 00
Laboratory Attendants @ \$11 to \$13 per week:	
H. Renwick, 52 weeks, 2 days.....	680 33
C. Howes, 41 weeks, 2 days.....	454 66
A. Kaellgren, 41 weeks, 2 days.....	454 66
F. H. Twigg, 153 hours @ 42c.....	64 26

\$70,865 08

Biology

Professors:	
E. M. Walker, Invertebrate Zoology, \$5,500 — \$180.....	\$5,320 00
W. H. Pierson, Histology and Embryology, @ \$5,100, of which half charged to Anatomy \$2,550 — \$80.....	2,470 00
Laurence Irving, Experimental Biology, \$4,500 — \$135.....	4,365 00
A. G. Huntsman, Marine Biology (without salary).....	
Associate Professors:	
A. F. Coventry, Vertebrate Embryology, \$3,950 — \$113.....	3,837 00
J. R. Dymond, Systematic Zoology, \$3,950 — \$113.....	3,837 00
W. H. T. Baillie, Mammalian Anatomy, \$3,950 — \$113.....	3,837 00
J. W. MacArthur, Genetics, \$3,950 — \$113.....	3,837 00
E. H. Craigie, Comparative Anatomy and Neurology, \$3,600 — \$99..	3,501 00
Assistant Professors:	
W. J. K. Harkness, Limnobiology, \$3,450 — \$93.....	3,357 00
Dr. Norma H. C. Ford, \$3,000 — \$75.....	2,925 00
F. P. Ide, Lecturer (Sessional—paid also \$580 for Extension Work) \$1,800 — \$40.....	1,760 00
Demonstrators (Sessional):	
C. E. Atwood, \$900 — \$18.....	882 00
K. C. Fisher, \$900 — \$18.....	882 00
Miss J. A. Fraser, \$900 — \$18.....	882 00
F. E. J. Fry (paid also \$220.50 in Special Research) \$900 — \$18.60	881 40
Assistants (Sessional):	
E. C. Black.....	400 00
Miss V. E. Engelbert.....	400 00
Miss J. F. Hart.....	400 00
G. Whiteley.....	400 00
J. V. McCutcheon.....	300 00
H. M. Rogers.....	300 00
G. F. M. Smith.....	300 00
Dr. Kathleen M. Bartley.....	200 00
C. C. Brown.....	150 00
E. A. Cummings.....	150 00
J. P. Fleming.....	150 00
C. I. Junkin.....	150 00
Miss M. F. Jarvis.....	90 00
N. W. Radforth (paid also \$150 in Special Research, Botany).....	80 00
Miss Grace Workman.....	75 00
J. M. Speirs.....	45 00
W. R. Whittaker.....	45 00
K. H. Doan (paid also \$60 in Special Research).....	40 00
Miss T. V. Green.....	35 00
Miss L. F. Harkness.....	35 00
Miss I. Lambert.....	35 00
R. B. Miller.....	35 00
Miss M. S. Milne.....	35 00
Miss D. E. Robbins.....	35 00

Miss S. Taylor (paid also \$30 in Special Research, Botany).....	35 00	
E. S. Pentland.....	20 00	
Miss K. M. Robertson.....	} without salary.....
Miss R. D. C. Martin.....	
J. Stevenson.....	
Technical Assistants:		
C. D. Barker, 9 mos., \$900 — \$18.....	882 00	
Thos. Stovell, 12 mos.....	800 00	
Miss A. H. Bell, 9 mos.....	650 00	
Miss M. Sewell, 9 mos.....	360 00	
E. C. Cross, Museum Assistant, \$1,650 — \$36.25.....	1,613 75	
W. J. LeRay, Curator of Vivarium, \$1,650 — \$36.25.....	1,613 75	
A. Wilson, Laboratory Assistant, \$900 — \$18.....	882 00	
Wm. Smith, Laboratory Attendant.....	520 00	
Secretarial Assistant @ \$1,350:		
Miss D. Tarr (resigned 29 Feb.) \$900 — \$19.16.....	880 84	
Miss H. McCaul, from 1 March (see also below) \$450 — \$9.59.....	440 41	
Miss Phyllis Foreman, 9 mos., \$810 — \$9.90.....	800 10	
Stenographer and Librarian:		
Miss H. McCaul, 8 mos. to 28 Feb., \$733.34 — \$15.....	718 34	
Miss Mildred Godard, 4 mos. from 1 March, \$366.67 — \$7.50.....	359 17	
		\$57,033 76

Botany

Professors:		
R. B. Thomson, Plant Morphology, \$5,500 — \$180.....	\$5,320 00	
H. S. Jackson, Mycology, \$5,200 — \$165.....	5,035 00	
Associate Professors:		
D. L. Bailey, Plant Pathology (2/3rds time) \$3,000 — \$75.....	2,925 00	
G. H. Duff, Plant Physiology, \$3,950 — \$113.....	3,837 00	
H. B. Sifton, Plant Morphology and OEcology, \$3,950 — \$113.....	3,837 00	
Assistant Professors:		
Dr. J. Gertrude Wright, \$3,000 — \$75.....	2,925 00	
T. M. C. Taylor, \$2,700 — \$66.....	2,634 00	
E. C. Beck, Lecturer (Sessional) \$1,950 — \$43.75.....	1,906 25	
W. R. Haddow, Special Lecturer (Sessional — without salary).....	
A. J. V. Lehmann, Senior Demonstrator (Sessional — paid also \$288.40 in Special Research) \$1,285 — \$32.75.....	1,252 25	
Class Assistants:		
K. W. Baldwin (paid also \$170 in Special Research).....	525 00	
M. W. Bannan (paid also \$120 in Special Research).....	525 00	
R. G. Cormack (paid also \$170 in Special Research).....	525 00	
Miss D. F. Forward (paid also \$110 in Special Research).....	525 00	
D. H. Hamly (paid also \$343 in Applied Physics and \$198.50 in Special Research) \$525 — \$13.60.....	511 40	
A. N. Langford (paid also \$170 in Special Research and \$40 in Biology).....	525 00	
D. C. McPherson (paid also \$170 in Special Research).....	525 00	
D. F. Putnam.....	525 00	
Miss R. P. Biggs (paid also \$170 in Special Research).....	490 00	
Miss A. B. Brodie (paid also \$110 in Special Research).....	490 00	
L. O. Weaver (paid also \$230 in Special Research).....	490 00	
L. G. Herman.....	390 00	
S. T. B. Losee.....	390 00	
P. G. Newell.....	390 00	
J. W. Groves (paid also \$450 as Technical Assistant — see below, and \$205 in Special Research).....	75 00	
Technical Assistants:		
Miss M. B. Givens, \$1,800 — \$40.....	1,760 00	
Miss C. B. Ross, \$1,400 — \$30.....	1,370 00	
R. F. Cain, \$1,350 — \$28.75.....	1,321 25	
J. W. Groves.....	450 00	
A. Simpson, Horticulturist (with living quarters valued @ \$360) \$2,200 — \$51.....	2,149 00	
L. Van Cleemput, Gardener, \$1,450 — \$31.25.....	1,418 75	
J. Van Beek, Assistant Gardener, \$1,400 — \$30.....	1,370 00	
Clerical Assistants:		
Miss L. Alward, \$1,400 — \$30.....	1,370 00	
Miss M. A. Forward, \$1,400 — \$30.....	1,370 00	
Dr. Kathleen L. Hull, Librarian, \$1,200 — \$25.....	1,175 00	
P. Krotkov, Herbarium Assistant, \$1,800 — \$40.....	1,760 00	

Laboratory Attendants:

R. Lynn, \$1,100 — \$22.50.....	1,077 50
S. G. Smith, \$1,000 — \$20.....	980 00
G. M. Proudfoot, \$900 — \$18.....	882 00

 \$55,026 40
History

Professors:

Chester Martin (paid also \$2 from University Press) \$5,500 — \$180	\$5,320 00
R. Flenley (paid also \$50 for Extension Work and \$4.25 from University Press) \$4,700 — \$143.....	4,557 00
F. H. Underhill (paid also \$22.75 from University Press) \$4,700 — \$143	4,557 00
G. W. Brown (paid also \$520.50 from University Press and \$256 for Extension Work) \$4,500 — \$135.....	4,365 00

Assistant Professors:

G. deT. Glazebrook (paid also \$342 for Extension Work and \$1.25 from University Press) \$3,250 — \$85.....	3,165 00
D. G. Creighton (paid also \$528 for Extension Work and \$2 from University Press) \$2,700 — \$66.....	2,634 00
Edgar McInnis (paid also \$918 for Extension Work and \$35 from University Press) \$2,600 — \$63.....	2,537 00
D. J. McDougall (paid also \$498 for Extension Work and \$1 from University Press) \$2,600 — \$63.....	2,537 00
R. M. Saunders, Lecturer (Sessional — paid also \$826 for Extension Work and \$21.25 from University Press) \$2,200 — \$51.....	2,149 00
Miss E. Sims, Reader (Sessional — paid also \$414 for Extension Work)	250 00

 \$32,071 00
Anthropology

T. F. McIlwraith, Associate Professor (paid also \$15 from University Press) \$4,200 — \$123.....	\$4,077 00
C. W. M. Hart, Lecturer (Sessional), also Supervisor of Studies for Course in Sociology (paid also \$100 for Extension Work) \$2,300 — \$54	2,246 00

 \$6,323 00
Archaeology

C. T. Currelly, Professor (part time — paid also in Royal Ontario Museum) \$4,500 — \$135.....	\$4,365 00
Rt. Rev. C. White, Associate Professor, Archaeology (Chinese — paid also in Royal Ontario Museum) \$2,500 — \$60.....	2,440 00
Homer A. Thompson, Assistant Professor, Classical Archaeology (half time) \$1,700 — \$37.50.....	1,662 50

 \$8,467 50
Fine Art

John Alford, Professor (paid \$5,000 from Special Fund, also \$200 for Extension Work).....
F. S. Haines, Lecturer (Sessional — without salary).....

Geography

Griffith Taylor, Professor, \$4,000 — \$245 (paid also \$2,440 in Ontario College of Education and \$17.50 from University Press).....	\$3,755 00
--	------------

 \$3,755 00
Political Economy

Professors:

E. J. Urwick, Economics (paid also \$2 from University Press) \$5,500 — \$180	\$5,320 00
W. T. Jackman, Transportation, \$4,900 — \$151.....	4,749 00

Associate Professors:

H. A. Innis (paid also \$36 from University Press) \$4,000 — \$115..	3,885 00
H. R. Kemp, \$3,900 — \$111.....	3,789 00
V. W. Bladen, also Supervisor of Studies in Political Economy (paid also \$400 from University Press) \$3,850 — \$109.....	3,741 00
A. Brady (paid also \$210 for Extension Work and \$175 from University Press) \$3,600 — \$99.....	3,501 00

Assistant Professors:

Lorne T. Morgan (paid also \$820 for Extension Work) \$3,450 — \$93	3,357 00
W. M. Drummond (paid also \$366 for Extension Work and \$17 from University Press) \$3,000 — \$75.....	2,925 00
J. F. Parkinson (paid also \$460 for Extension Work) \$2,500 — \$60	2,440 00
Miss I. M. Biss (paid also \$2 from University Press) \$2,500 — \$60	2,440 00

Lecturers (Sessional):

J. G. Perold (paid also \$400 for Extension Work) \$2,550 — \$61.50	2,488 50
A. F. W. Plumtre (paid also \$15.25 from University Press) \$2,400 — \$57	2,343 00
Donald C. MacGregor (paid also \$27 from University Press) \$2,400 — \$57	2,343 00
V. F. Coe (paid also \$11 from University Press) \$2,150 — \$49.50..	2,100 50
G. E. Britnell (paid also \$20 for Extension Work and \$19 from University Press) \$2,000 — \$45.....	1,955 00
C. B. Macpherson, \$1,800 — \$40.....	1,760 00
H. D. Woods, Assistant (Sessional).....	500 00
A. J. Glazebrook, Special Lecturer, Banking and Finance (Sessional — paid \$2,500 from Special Fund).....

Law:

Professors:

W. P. M. Kennedy, Constitutional Law (paid also \$210 from University Press) \$5,400 — \$175.....	5,225 00
N. A. M. MacKenzie, Public and Private International Law (paid also \$2 from University Press) \$4,000 — \$115.....	3,885 00
F. C. Auld, Associate Professor of Roman Law and Jurisprudence, and Special Lecturer, Commercial Law (paid also \$200 for Extension Work) \$4,000 — \$115.....	3,885 00
Jacob Finkelman, Assistant Professor, Administrative and Industrial Law (paid also \$30 for Extension Work), \$2,300 — \$54.....	2,246 00
E. Russell Hopkins, Lecturer (Sessional) \$1,500 — \$32.50.....	1,467 50
Kenneth G. Gray, Honorary Lecturer (Sessional — without salary)

Accounting:

W. S. Ferguson, Professor (part time — paid also \$20 for Extension Work) \$2,550 — \$61.50.....	2,488 50

Assistants for School of Nursing:		
Miss M. Rean.....	150 00	
G. W. Anderson (paid also \$150 in Psychiatry).....	100 00	
G. C. Cooper, Technician @ \$2,300, less 14 days paid by Workmen's Compensation Board; \$2,217.75 — \$51.95.....	2,165 80	
	<hr/>	
	\$30,725 80	
Less paid by School of Nursing.....	400 00	
	<hr/>	
		\$30,325 80

Italian and Spanish

Professors:		
M. A. Buchanan (paid also \$25 from University Press) \$6,000—\$205	\$5,795 00	
J. E. Shaw, \$6,000 — \$205.....	5,795 00	
Emilio Goggio, \$4,200 — \$123.....	4,077 00	
Associate Professors:		
G. C. Patterson, \$3,600 — \$99.....	3,501 00	
Juan Cano, \$3,600 — \$99.....	3,501 00	
Instructors (Sessional):		
Miss Grace A. Elliott, \$1,500 — \$32.50.....	1,467 50	
H. Petersen, \$1,500 — \$32.50.....	1,467 50	
	<hr/>	
		\$25,604 00

(2) Departments in University College (\$157,633.30)

Classics

Gilbert Norwood, Professor, and Director of Classical Studies (paid also \$40 from University Press) \$6,250 — \$255.....	\$5,995 00	
(a) Greek:		
E. T. Owen, Professor (paid also \$35 from University Press) \$4,700 — \$143	4,557 00	
Associate Professors:		
D. E. Hamilton, \$4,200 — \$123.....	4,077 00	
M. D. C. Tait (paid also \$420 for Extension Work) \$3,600 — \$99	3,501 00	
(b) Latin:		
Professors:		
G. Oswald Smith (paid also \$300 for Extension Work) \$5,000 — \$155	4,845 00	
E. A. Dale, \$4,500 — \$135.....	4,365 00	
Louis A. MacKay, Assistant Professor (paid also \$488 for Extension Work) \$2,950 — \$73.50.....	2,876 50	
(c) Greek and Roman History:		
C. N. Cochrane, Professor (also Dean of Residence with free house, heat and light valued @ \$300) \$4,500 — \$135.....	4,365 00	
Miss Mary C. Needler, Assistant Professor, \$2,700 — \$66.....	2,634 00	
B. R. English, Instructor (Sessional) \$1,500 — \$32.50.....	1,467 50	
	<hr/>	
		\$38,683 00

English

Professors:

M. W. Wallace (paid also \$1,399 as Principal of University College) \$6,000 — \$404	\$5,596 00
R. S. Knox, \$4,700 — \$143	4,557 00
H. J. Davis (paid also \$300 for Extension Work and \$32 from University Press) \$4,500 — \$135	4,365 00
J. F. Macdonald, \$4,500 — \$135	4,365 00

Associate Professors:

W. H. Clawson, \$3,800 — \$107	3,693 00
A. S. P. Woodhouse (paid also \$475 from University Press) \$3,600 — \$99	3,501 00

Assistant Professors:

Mrs. M. M. Kirkwood (paid also \$300 for Extension Work) \$3,000 — \$75 (resigned 30 June)	2,925 00
N. J. Endicott (paid also \$525 for Extension Work) \$2,700 — \$66 ..	2,634 00
J. R. MacGillivray, Lecturer (Sessional — paid also \$1,420 for Extension Work) \$2,550 — \$61.50	2,488 50

 \$34,124 50
French

Professors:

F. C. A. Jeanneret, \$5,500 — \$180	\$5,320 00
J. S. Will, \$5,000 — \$155	4,845 00
St. E. de Champ (paid also \$400 for Extension Work) \$4,500 — \$135	4,365 00

Associate Professors:

Louis Allen (a \$4,100 (ob. 27 Aug. — salary to 31 Dec. paid to widow) \$2,050 — \$59.50	1,990 50
H. S. McKellar (a \$4,100 (ob. 11 Apr.) \$3,416.67 — \$99.17, \$3,317.50; plus \$1,000 paid to widow as compassionate allowance	4,317 50
W. J. McAndrew (paid also \$776 as Registrar of University College) \$3,600 — \$107	3,493 00

Assistant Professors:

H. L. Humphreys, \$3,400 — \$91	3,309 00
J. G. Andison (paid also \$418 for Extension Work) \$3,300 — \$87 ..	3,213 00
R. D. C. Finch, \$2,950 — \$73.50	2,876 50

Lecturers (Sessional):

Miss A. C. Cole (paid also \$532 for Extension Work) \$2,350 — \$55.50	2,294 50
A. K. Laflamme (paid also \$300 for Extension Work) \$2,150 — \$49.50	2,100 50
Jean A. Houpert, \$2,000 — \$45	1,955 00
Miss Isabel Balthazard (paid also \$794 for Extension Work) \$1,800 — \$40	1,760 00
Miss M. MacDonald (paid also \$200 for Extension Work) \$1,700 — \$37.50	1,662 50

G. L. Assie, Instructor (Sessional — paid also \$782 in Forestry; \$175.75 in Dentistry, and \$200 for Extension Work) \$750 — \$16	734 00
--	--------

 \$44,236 00
German

G. H. Needler, Professor, \$5,500 — \$180 (retired 30 June)	\$5,320 00
Thure Hedman, Associate Professor, \$4,000 — \$115	3,885 00
G. E. Holt, Assistant Professor (paid also \$172 for Extension Work) \$3,450 — \$93	3,357 00

Lecturers (Sessional):

H. Boeschstein (paid also \$683.20 in Chemical Engineering and \$450 for Extension Work) \$1,950 — \$47.70	1,902 30
Victor Lange (paid also \$620 for Extension Work and \$30 in Ontario College of Education) \$1,900 — \$42.50	1,857 50

 \$16,321 80
Semitic Languages

Professors:

W. R. Taylor, \$5,500 — \$180	\$5,320 00
T. J. Meek, \$5,200 — \$165	5,035 00
F. V. Winnett, Assistant Professor, \$2,700 — \$66	2,634 00
W. S. McCullough, Lecturer (Sessional) \$2,200 — \$51	2,149 00

 \$15,138 00
Ethics

G. S. Brett, Professor (see also Philosophy) \$1,000 — \$58.50	\$941 50
--	----------

 \$941 50

University College General

M. W. Wallace, Principal (see also English) \$1,500—\$101.....	\$1,399 00
Miss Marion B. Ferguson, Dean of Women (with living valued @ \$400) \$2,500—\$60	2,440 00
W. J. McAndrew, Registrar (see also French) \$800—\$24.....	776 00

VI. FACULTY OF MEDICINE

53. SALARIES

Administration

J. G. FitzGerald, Dean (paid also in Connaught Laboratories and \$4,845 as Director of School of Hygiene) \$1,000 — \$50.....	\$950 00	
E. S. Ryerson, Assistant Dean and Secretary of Faculty, and Assistant Professor of Surgery (paid also \$387 in Dentistry and \$5 for Post Graduate Course) \$5,000 — \$162.....	4,838 00	
Assistants:		
Miss W. Jones, \$1,800 — \$40.....	1,760 00	
Miss O. Russell, \$1,750 — \$38.75.....	1,711 25	
Miss A. Perry, Clerk, \$1,500 — \$32.50.....	1,467 50	
Messenger, H. Saunders.....	800 00	
Hospital Theatre, Toronto General Hospital:		
Chas. Hart, Attendant, \$1,550 — \$33.75 (and overtime, \$3).....	1,516 25	
Robt. Murray, Attendant in Cloak room, 30 weeks @ \$15.....	450 00	
	<hr/>	\$13,493 00

Anatomy

Professors:		
J. C. Boileau Grant, \$7,000 — \$405.....	\$6,595 00	
W. H. Pierson, Histology and Embryology, @ \$5,100, of which half charged to Biology, \$2,550 — \$80.....	2,470 00	
J. C. Watt, \$4,800 — \$147.....	4,653 00	
H. A. Cates, Associate Professor (paid also \$245 from Child Research) \$3,700 — \$108.....	3,592 00	
Assistant Professors:		
Arthur W. Ham, \$3,700 — \$103.....	3,597 00	
R. K. George, \$3,100 — \$79.....	3,021 00	
Assistants in Histology (Sessional):		
H. D. Ball (paid also \$150 in Athletics and Physical Training — Women, and \$150 for Extension Work).....	500 00	
M. H. Book.....	500 00	
Demonstrators (Sessional):		
M. J. Wilson, X-Ray (paid also \$400 from Medical Research, Best Fund).....	400 00	
Miss K. McMurrich (paid also \$150 in Athletics and Physical Training — Women).....	550 00	
W. R. Fletcher.....	500 00	
M. C. Watson.....	500 00	
W. S. Anderson (paid also \$400 in Physiology).....	300 00	
H. M. Coleman (paid also \$250 in Physiology).....	200 00	
C. E. A. Hassard.....	200 00	
C. A. Armstrong (paid also \$25 as Prosector — see below; and \$250 from Medical Research, Best Fund).....	150 00	
Irving D. Kitchen.....	150 00	
A. W. M. White.....	125 00	
A. N. McKillop.....	150 00	

Embryology:	
A. E. Ashenhurst.....	50 00
J. S. Chaikoff.....	50 00
Neurology:	
W. E. L. Sparks (paid also \$100 in Health Service).....	55 00
T. G. Heaton.....	50 00
C. M. Warren.....	50 00
W. G. Young.....	40 00
R. C. Laird (paid also \$150 in Surgery).....	30 00
Eugene Montgomery, Dental Anatomy.....	300 00
Prosecutors (Sessional):	
E. M. Davidson (also Artist).....	900 00
Brock Brown.....	50 00
C. R. Rapp.....	50 00
C. A. Armstrong (see also above).....	25 00
H. LeMasurier, Senior Technical Assistant, \$1,800 — \$40.....	1,760 00
H. F. Whittaker, Technical Assistant (paid also \$117.60 in Dentistry) \$700 — \$14.....	686 00
Miss G. Dowsley, Clerical Assistant, \$1.250 — \$26.25.....	1,223 75
Laboratory Assistants:	
H. McCormick (paid also \$10 in Dept. of Surgery) \$1,650 — \$36.25.....	1,613 75
Stephen George, \$1,450 — \$31.25.....	1,418 75
Chas. Storton, Laboratory Boy.....	480 00
B. L. Guyatt, Museum Curator, \$1,550 — \$33.75.....	1,516 25
	\$38,501 50
Less paid by School of Nursing.....	200 00
	\$38,301 50
<i>Pathology and Bacteriology</i>	
Professors:	
Oskar Klotz, \$7,000 — \$405.....	\$6,595 00
W. L. Holman, Bacteriology, also Associate Director of Applied Bacteriology, \$5,000 — \$155.....	4,845 00
W. L. Robinson, Pathology, also Associate Director of Applied Pathology, \$2,200 — \$51.....	2,149 00
G. Shanks, Assistant Professor, Pathology.....	250 00
H. K. Detweiler, Associate Director, Serology (Sessional — without salary; paid in Medicine).....
W. Magner, Special Lecturer, Pathology (Sessional).....	750 00
Lecturers (Sessional):	
Pathology:	
G. Lyman Duff, \$1,700 — \$37.50.....	1,662 50
J. E. Bates.....	200 00
I. H. Erb (without salary — paid \$10 for Post Graduate Work).....
P. H. Greey, Bacteriology, \$1,800 — \$40.....	1,760 00
Dr. R. Margarite Price, Bacteriology and Serology, \$3,000 — \$75.....	2,925 00
Fellows, each 11 mos.:	
Pathology:	
W. A. D. Anderson, \$1,000 — \$20.....	980 00
W. L. Donohue, \$1,000 — \$20.....	980 00
F. C. Preston, Bacteriology, \$1,000 — \$20.....	980 00
Ross Robertson, Museum, \$1,000 — \$20.....	980 00
Demonstrators (Sessional):	
Pathology:	
J. C. Paterson.....	500 00
T. H. Belt.....
Dr. Helen L. Vanderveer.....
Bacteriology:	
E. J. Clifford.....	200 00
J. E. Josephson.....
Dr. Marion Ross.....
Assistants in Laboratory:	
Miss N. W. Simpson, Pathology, \$1,500 — \$32.50.....	1,457 50
Miss H. M. Boyd, Bacteriology, \$1,020 — \$20.50.....	992 50
Miss M. G. Hein, Technician, \$1,140 — \$23.50.....	1,116 50
Miss Amelia Alvey, Special Technician, \$1,020 — \$20.50.....	999 50
Laboratory Attendants for Preparing Media:	
Miss E. A. Gordon, Senior Technician, 11 mos., \$1,200 — \$25.....	1,175 00
Attendants:	
Miss C. Wallace, \$340 — \$16.80.....	823 20
Albert Vowles.....	600 00

Miss G. K. R. Boyd, Secretary, \$1,260 — \$26.50.....	1,233 50
Miss H. M. Hammond, Librarian and Assistant Secretary, \$1,020 — \$20.50.....	999 50
Miss V. L. McKinnon, Museum Stenographer, \$1,260 — \$26.50.....	1,233 50
J. F. Payne, Preparator, \$1,800 — \$40.....	1,760 00
Miss Erna Eck, Junior Attendant in Museum.....	600 00
Autopsy Recorder:	
Miss Eva Cameron, 2 mos. to 31 Aug., \$160 — \$3.20.....	156 80
Miss Margaret Wightman, 10 mos. from 1 Sept., \$790 — \$12.80.....	777 20
Miss G. F. Johnston, Autopsy Technician, \$960 — \$19.20.....	940 80

 \$40,639 00

Division of Neuropathology:

E. A. Linell, Professor, \$4,500 — \$135.....	4,365 00
Dr. Mary I. Tom, Fellow (Sessional) \$1,800 — \$40.....	1,760 00
Technicians:	
Miss H. P. Tett, \$1,020 — \$20.50.....	999 50
Miss V. O. Potter, Medicine and Surgery (resigned) \$1,020 — \$20.50.....	999 50
Miss C. A. Bell, Secretary, \$1,020 — \$20.50.....	999 50

 \$49,762 50
Pathological Chemistry

Andrew Hunter, Professor (paid also in Connaught Laboratories) \$6,000 — \$205.....	\$5,795 00
T. F. Nicholson, Assistant Professor, \$3,150 — \$81.....	3,069 00
R. W. I. Urquhart, Lecturer (Sessional) \$1,000 — \$20.....	980 00
Demonstrators (Sessional):	
D. L. Selby.....	600 00
D. H. Boddington.....	500 00
Fellows (Sessional):	
S. H. Jackson, \$1,100 — \$22.50.....	1,077 50
J. B. Scott, \$1,100 — \$22.50.....	1,077 50
Lorne D. Proctor, Assistant (Sessional — paid also \$393.75 from Medical Research, Banting).....	250 00
C. E. Downs, Technician, \$1,500 — \$32.50.....	1,467 50
Laboratory Assistants:	
Miss R. A. Welsh, \$1,100 — \$22.50.....	1,077 50
H. Downs, 9½ mos. from 16 Sept., \$870.83 — \$17.71.....	853 12
Laboratory Attendants:	
Mrs. J. Faulds.....	750 00
Mrs. C. McCallum.....	350 00
Miss C. A. Shannon, Secretary, \$1,100 — \$22.50.....	1,077 50

 \$18,924 62
Pharmacy and Pharmacology

V. E. Henderson, Professor, \$6,000 — \$205.....	\$5,795 00
G. H. W. Lucas, Associate Professor, \$3,600 — \$99.....	3,501 00
M. H. Roepke, Lecturer (Sessional) \$2,000 — \$45.....	1,955 00
W. R. Cameron, Fellow, 4 mos. to 31 Oct. (resigned) \$500 — \$10.84.....	489 16
Assistants (Sessional):	
J. F. A. Johnston (paid also \$784 in Ophthalmology) \$150 — \$3.....	147 00
J. M. Scott.....	150 00
A. Brock, Technical Assistant, \$2,000 — \$45.....	1,955 00
Cleaners:	
J. Brickles, 6 mos. to 31 Dec. (paid also \$444.78 in Ontario College of Education) \$580 — \$12.....	568 00
Chester Codner, 6 mos. from 1 Jan. (paid also \$338.77 as messenger, Convocation Hall, etc.) \$580 — \$12.....	568 00
A. C. Morrison.....	480 00
Miss D. Caldecott, Clerical Assistant.....	550 00

 \$16,158 16
Bio-Chemistry

H. Wasteneys, Professor, \$6,000 — \$205.....	\$5,795 00
Associate Professors:	
G. F. Marrian, \$4,200 — \$123.....	4,077 00
A. M. Wynne, \$3,600 — \$99.....	3,501 00
Senior Fellows (Sessional):	
B. F. Crocker (paid also \$196 in Special Research) \$1,300 — \$28.50.....	1,271 50
Mrs. Florence Ignatieff, \$1,200 — \$25.....	1,175 00
V. Ignatieff (paid also \$196 in Special Research) \$1,050 — \$22.25.....	1,027 75

Fellows (Sessional):

A. W. A. Brown.....	800 00
G. Butler.....	800 00
A. D. Odell, 3 mos.....	400 00
S. L. Cohen (paid also \$100 in Special Research).....	450 00
Miss M. Delamere, Secretarial Assistant, \$1,300 — \$27.50.....	1,272 50

Technicians:

J. W. Fletcher, Senior, \$1,600 — \$35.....	1,565 00
L. Sloan, \$1,600 — \$35.....	1,565 00
J. H. McClary, \$1,000 — \$20.....	980 00
Miss D. I. Skill, \$1,000 — \$20.....	980 00

Laboratory Assistants:

G. Lumbard, \$1,000 — \$20.....	980 00
W. Clough, \$1,000 — \$20.....	980 00

Laboratory Attendant:

Mrs. E. E. Davies, 5 mos. to 30 Nov.....	312 50
Mrs. Ethel Wilkie, 7 mos. from 1 Dec.....	420 00

 \$28,352 25
Physiology

Professors:

C. H. Best (paid also in Connaught Laboratories and \$2,500 from Medical Research, Best Fund) \$6,000 — \$205.....	\$5,795 00
N. B. Taylor, \$4,500 — \$135.....	4,365 00

Assistant Professors:

E. T. Waters (paid also \$440 for Extension Work) \$2,750 — \$67.50	2,682 50
C. B. Weld (part time — paid also \$5 for Post Graduate Course) \$1,700 — \$37.50.....	1,662 50
E. Fidler, Lecturer and Research Associate, \$1,500 — \$32.50.....	1,467 50
J. Markowitz, Research Associate (Sessional — part time).....	450 00
C. G. Smith, Demonstrator (Sessional) \$1,500 — \$32.50.....	1,467 50

Fellows (Sessional):

R. B. Kerr.....	600 00
W. S. Anderson (part time — paid also \$300 in Anatomy).....	400 00
A. C. R. McGonigle.....	400 00
H. M. Coleman (paid also \$200 in Anatomy).....	250 00
Miss Mabel Cory, Departmental Librarian, \$1,250 — \$26.25.....	1,223 75
Miss Doris Secord, Secretarial Assistant, \$1,250 — \$26.25.....	1,223 75
A. Elliott, Mechanician, \$1,800 — \$40.....	1,760 00
F. L. Robinson, Technical Assistant and Glassblower (paid also \$490 from Medical Research, Best Fund) \$2,000 — \$50.....	1,950 00
W. Huntley, Laboratory Assistant for Teaching Laboratories, \$1,400 — \$30	1,370 00
G. L. Robinson, Animal Caretaker, \$1,200 — \$25.....	1,175 00
A. D. Crouch, Assistant Animal Caretaker, \$900 — \$18.....	882 00

 \$29,124 50
Hygiene and Preventive Medicine

Professors (paid also in Connaught Laboratories):

J. G. FitzGerald (part time — see also Administration and School of Hygiene).....
R. D. Defries, Hygiene and Epidemiology (part time — paid also \$1,955 in School of Hygiene) \$1,500 — \$50.....	\$1,450 00
D. T. Fraser, \$4,500 — \$135.....	4,365 00
P. J. Moloney, Associate Professor (see School of Hygiene).....
M. H. Brown, Assistant Professor (part time — paid also in Connaught Laboratories) \$1,000 — \$20.....	980 00

Lecturers (Sessional — part time):

G. D. Porter (see also Health Service — Men) \$500 — \$16.70.....	483 30
Dr. Frieda H. Fraser, \$500 — \$10 (paid also in Connaught Laboratories).....	490 00
P. A. T. Sneath, \$500 — \$10 (paid also in Connaught Laboratories).....	490 00

Class Assistants (Sessional):

Miss G. E. Cowan, \$1,000 — \$20.....	980 00
Miss H. C. Plummer, \$500 — \$10 (paid also in Connaught Laboratories).....	490 00
Miss E. A. Anderson, \$200 — \$4 (paid also in Connaught Laboratories).....	196 00
J. S. Kitching.....	200 00
C. H. D. Clarke, Fellow (Sessional).....	800 00
Miss M. E. Collins, Laboratory Assistant.....	720 00
Miss E. Barr, Secretarial Assistant, \$1,000 — \$20.....	980 00

 \$12,624 30

Medicine and Clinical Medicine

Duncan Graham, Professor, \$10,000 — \$310.....	\$9,690 00
Assistant Professors:	
R. F. Farquharson <i>a</i> \$3,000, of which \$1,000 charged to Therapeutics (paid also \$10 for Extension Work) \$2,000 — \$45.....	1,955 00
W. F. McPhedran.....	500 00
Associates:	
W. R. Campbell, \$2,500 — \$60.....	2,440 00
A. G. McPhedran (half time — paid also \$200 in Health Service) ..	500 00
Senior Demonstrators (Sessional):	
W. P. Warner, \$1,000 — \$20.....	980 00
G. W. Loughheed, also in Clinical Microscopy.....	500 00
Trevor Owen, Medicine (paid also \$150 in School of Nursing)....	500 00
Junior Demonstrators (Sessional):	
R. A. Cleghorn, \$2,500 — \$60.....	2,440 00
J. A. Dauphinee (paid also \$10 for Extension Work) \$2,500 — \$60	2,440 00
H. E. Rykert (paid also \$5 for Post Graduate Course) \$2,500 — \$60	2,440 00
E. J. Maltby, \$2,000 — \$45.....	1,955 00
H. H. Hyland (paid also \$5 for Post Graduate Course) \$1,500 — \$32.50	1,467 50
N. M. Wrong, \$1,000 — \$20.....	980 00
Fellows (Sessional):	
G. A. McVicar, \$1,500 — \$32.50.....	1,467 50
A. E. Parks, \$1,000 — \$20.....	980 00
Harris Gray, Junior Demonstrator, Clinical Microscopy (Sessional)....	250 00
Research Assistants:	
H. W. Wakefield, \$1,400 — \$30.....	1,370 00
Miss M. I. Hanna, \$1,380 — \$29.50.....	1,350 50
Miss N. R. Hearn, Technician, Applied Physiology, \$1,320 — \$28.....	1,292 00
Miss S. H. Clutton, Secretarial Assistant, \$1,440 — \$31.....	1,409 00
Assistant Professors:	
F. A. Clarkson (paid also \$360 in Dentistry).....	300 00
Goldwin Howland (paid also \$30 for Extension Work and \$5 for Post Graduate Course)....	300 00
J. D. Loudon.....	300 00
J. A. Oille (paid also \$20 in Health Service).....	300 00
E. J. Trow (in charge of Dermatology).....	300 00
Associates:	
R. G. Armour (paid also \$30 for Extension Work and \$10 in Health Service)	250 00
H. K. Detweiler.....	250 00
J. H. Elliott (paid also \$686 as Professor of History of Medicine; \$39.20 in School of Nursing; \$30 for Extension Work; \$10 for Post Graduate Course, and \$26.25 from University Press) \$250 — \$5	245 00
A. A. Fletcher (paid also \$20 for Extension Work and \$5 for Post Graduate Course).....	250 00
H. C. Parsons (paid also \$20 for Post Graduate Course).....	250 00
F. W. Rolph.....	250 00
Senior Demonstrators (Sessional):	
Gordon Bates (paid also \$20 in School of Nursing).....	200 00
C. F. Boyer (paid also \$20 for Post Graduate Course).....	200 00
A. H. W. Caulfeild (paid also in Connaught Laboratories and \$10 in Health Service) \$200 — \$4.....	196 00
E. E. Cleaver.....	200 00
H. A. Dixon (paid also \$30 for Post Graduate Course).....	209 00
B. Hannah (paid also \$5 for Post Graduate Course and \$190 in School of Nursing).....	200 00
J. Hepburn (paid also \$10 for Extension Work).....	200 00
A. J. McKenzie.....	200 00
Harris McPhedran.....	200 00
W. E. Ogden.....	200 00
Junior Demonstrators (Sessional):	
E. F. Brooks.....	150 00
E. A. Broughton.....	150 00
J. G. Falconer (paid also \$200 in School of Nursing and \$50 for Extension Work).....	150 00

70. ART SERVICE

(a) Salaries:		
Miss M. T. Wishart, Director, \$2,500 — \$60.....	\$2,440 00	
Miss D. Foster, Assistant Artist, \$1,300 — \$27.50.....	1,272 50	
(b) Expenses:		
Part-time assistance (\$95.20):		
Miss Amy Cartwright, 62 hours.....	18 60	
H. A. James, 10 hours.....	5 00	
Miss G. Williams, 22 hours.....	6 60	
Miss Jean Wylie, 130 hours.....	65 00	
Supplies, etc. (\$163.49):		
Artists' Supply Co., drawing and tracing paper.....	12 94	
Ingram & Bell, beeswax and glycerine.....	13 45	
University Press, printing and stationery.....	24 08	
Accounts under \$10 (8).....	36 80	
Sundry disbursements by department:		
Stationery and art supplies, \$23.18; laundry, \$11.82.....	35 00	
Superintendent's Dept., excise tax, 15c; labour, \$29.74; material, \$11.33	41 22	
		\$3,971 19
Less sundry credits.....	26 32	
		\$3,944 87

71. GENERAL EXPENSES

Office supplies, stationery, printing, etc. (\$1,748.67):		
Lowe-Martin Co., cards.....	\$41 87	
R. H. Morris, subscriptions.....	10 00	
Office Specialty Mfg. Co., baskets, chair pad and stool.....	23 59	
Photographic Service, lantern service, prints and slides.....	97 32	
Postage	175 60	
Robbins & Townsend, typewriter inspection.....	35 90	
Simmons & Son, funeral wreaths.....	30 00	
Star Office Specialty Co., stapler and staples.....	11 50	
Stephens Sales Ltd., memo pad and rollers.....	14 50	
Underwood-Elliott-Fisher Ltd., rental and tabulator stop.....	18 30	
University Press, printing and stationery.....	734 13	
Accounts under \$10 (10).....	49 07	
Sundry disbursements by Secretary:		
Carfare and postage, \$12.67; telephone and telegraph, \$15.05; sundries, \$17.28.....	45 00	
Superintendent's Dept., labour, \$99.86; material, \$52.78.....	152 64	
Clerical assistance:		
Mrs. L. Lloyd, 19 hours.....	14 25	
Miss Dudley Martin, 9 weeks (paid also \$919.95 from Medical Research, Best Fund).....	225 00	
Miss D. Waugh, 2 weeks (paid also \$100 from Medical Research, Best Fund).....	50 00	
Alex. Gray, messenger service, 2 weeks.....	20 00	
Publications, Calendar, Dean's Report, Medical Bulletin and Lister Lecture (803.50):		
Postage	96 18	
University Press, printing and stationery.....	707 32	
Maintenance and equipment of Lecture Theatre:		
Superintendent's Dept., labour, \$72.47; material, \$39.65.....	112 12	
Medals (\$41.45):		
Birks-Ellis-Ryrie Ltd., engraving.....	5 01	
John Pinches, medals.....	36 44	
Association of American Colleges:		
Membership fees.....	150 00	
		\$2,855 74

72. MEDICAL BUILDING

Heat and light.....	\$4,472 48
Gas, water and occasional fuel (\$1,809.71):	
Gas, \$662.26; water, \$1,076.....	1,738 26
Central Coal Co.....	70 27
Superintendent's Dept., labour.....	1 18
Caretaker's supplies:	
Superintendent's Dept., material.....	135 98
Cleaning (\$2,028.14):	
Allen Mfg. Co., laundry.....	20 88
C. Waterhouse, window cleaning.....	50 00
Superintendent's Dept., labour.....	1,957 26
Repairs and renewals (\$2,542.20):	
Wm. Bartlett & Son, shades.....	17 25
City Treasurer, elevator license.....	5 00
John Inglis Co., installing tubes in incinerator.....	45 00
La France Fire Engine & Foamite Ltd., extinguisher.....	16 46
Routery Bros., plaster repairs.....	10 00
Superintendent's Dept., labour, \$1,830.83; material, \$617.66.....	2,448 49
Caretaker, F. P. Mottram, 12 mos. to 30 June (including attendance at Council meetings) \$1,400—\$30.....	1,370 00
	<hr/>
	\$12,358 51
Less heat and light charged to Central Power Plant.....	4,472 48

\$7,886 03

73. BANTING INSTITUTE

Heat, Dept. of Public Works, Province of Ontario.....	\$6,000 00
Gas, \$642.30; electric current, \$4,901.07; water, \$515.18.....	6,058 55
Caretaker's supplies:	
Superintendent's Dept., labour, 60c; material, \$439.17.....	439 77
Cleaning (\$5,311.17):	
Allen Mfg. Co., laundry.....	57 96
Canadian Cleaning Co., window cleaning.....	80 00
Superintendent's Dept., labour.....	5,173 21
Repairs and renewals (2,373.01):	
Canadian Charts & Supplies, charts.....	10 41
City Treasurer, elevator licenses.....	15 00
Mitchell & McGill, desks.....	110 50
Vulcan Asphalt & Supply Co., repairs to floor.....	158 90
Superintendent's Dept., labour, \$1,580.67; material, \$497.53.....	2,078 20
Caretaker:	
G. S. Laing, to 30 Dec., \$875—\$19.38 (retired).....	855 62
H. L. Vickery, 1 Nov. to 30 June, \$960 (less \$85 charged to cleaning) \$20.67 (and overtime, \$24.50).....	854 33
	<hr/>
	\$21,892 45
Less credit for cleaning.....	4 85

\$21,887 60

74. ANATOMICAL BUILDING

Heat and light.....	\$2,575 57
Gas, \$16.72; water, \$44.92.....	61 64
Caretaker's supplies:	
Superintendent's Dept., material.....	253 35
Cleaning (\$1,835.98):	
Allen Mfg. Co., laundry.....	23 04
C. W. Waterhouse, window cleaning.....	25 00
Superintendent's Dept., labour.....	1,787 94
Repairs and renewals (\$1,145.92):	
Armoured Floor Co., repairs to floor.....	101 20
City Treasurer, elevator licenses.....	10 00
Johnson Temperature Regulating Co., repairs.....	6 93
Vulcan Asphalt & Supply Co., repairs to floor.....	18 35
Superintendent's Dept., labour, \$821.46; material, \$187.98.....	1,009 44
Caretaker, M. J. Shephard, 12 mos. to 30 June, \$1,400—\$30.....	1,370 00
	<hr/>
	\$7,242 46
Less heat and light charged to Central Power Plant... \$2,575 57	
Credit for cleaning..... 5 00	
	<hr/>
	2,580 57

\$4,661 89

75 HYGIENE BUILDING

Heat and light.....		\$13,474 73	
Gas, \$944.11; water, \$2,418.43.....		3,362 54	
Caretaker's supplies (\$631.73):			
Dustbane Products Ltd.....		3 60	
Superintendent's Dept., labour, \$52.17; material, \$576.01.....		628 18	
Cleaning (\$7,488.39):			
Allen Mfg. Co., laundry.....		69 12	
Melrose Window Cleaning Co.....		60 00	
New York Window Cleaning Co.....		49 50	
Superintendent's Dept., labour.....		7,309 77	
Repairs and renewals (\$1,581.51):			
City Treasurer, elevator licenses.....		20 00	
Turnbull Elevator Co.....		185 48	
Accounts under \$10 (2).....		6 90	
Superintendent's Dept., labour, \$1,021.13; material, \$348.....		1,369 13	
Caretaker, James Irwin, 12 mos. to 30 June, \$1,400 — \$30 (and overtime, \$15.50).....		1,370 00	
			\$27,908 95
Less heat and light charged to Central Power Plant... \$13,474 73			
Credits for cleaning, and for share of gas, water and electric current.....	5,609 84		
			19,084 57
			<u>\$8,824 38</u>
Charged to Revenue, 1935-36.....			\$322,374 78
Charged to Eaton and Rockefeller Funds.....			83,073 11
			<u>\$405,447 89</u>

VII. SCHOOL OF HYGIENE

76. SALARIES

(1) Administration:		
J. G. FitzGerald, Director (see also Administration, Faculty of Medicine) \$5,000 — \$155.....		\$4,845 00
J. Craigie, Secretary (paid also \$490 as Lecturer—see below) \$500 — \$10.....		490 00
K. M. Kerns, Office Assistant (paid also \$350 as Laboratory Assistant—see below).....		350 00
(2) Epidemiology and Biometrics:		
R. D. Defries, Associate Director, School of Hygiene, and Professor of Hygiene and Epidemiology (see also Dept. of Hygiene) \$2,000 — \$45.....		1,955 00
N. E. McKinnon, Associate Professor, Hygiene and Epidemiology (paid also in Connaught Laboratories) \$1,000 — \$20.....		980 00
Lecturers (Sessional):		
J. Craigie, Epidemiology (paid also \$490 as Secretary and in Connaught Laboratories) \$500 — \$10.....		490 00
J. W. S. McCullough, Public Health Administration.....		250 00
A. E. Berry, Public Health Engineering (see also Civil Engineering: Municipal and Structural) \$500 — \$10.....		490 00
Miss Mary A. Ross, Vital Statistics, \$2,400 — \$57.....		2,343 00
K. F. Brandon, Fellow, Epidemiology (Sessional) \$2,000 — \$45.....		1,955 00
Clinical Associates, Epidemiology (Sessional—part time):		
J. T. Phair.....		300 00
A. L. McKay.....		250 00
Laboratory Assistants, Vital Statistics:		
S. Raven, \$340 — \$16.80.....		823 20
Miss S. R. McCausland.....		768 00
Walter Moore.....		660 00
K. M. Kerns (see also above).....		350 00
Robert Randall, Secretary, \$1,050 — \$21.25.....		1,028 75
(3) Physiological Hygiene:		
C. H. Best, Acting Head of Department (without salary—see also Dept. of Physiology).....		
Assistant Professors (paid also in Connaught Laboratories):		
D. L. McLean, \$2,700 — \$66.....		2,634 00

E. W. McHenry, @ \$1,700, of which \$600 charged to Medical Research, Best Fund (paid also \$10 for Extension Work) \$1,100 — \$25.50	1,074	50
J. G. Cunningham, Lecturer (Sessional) Industrial Hygiene, \$1,000 — \$20	980	00
Research Associates:		
H. M. Barrett, Industrial Hygiene, \$2,300 — \$54.....	2,246	00
Mrs. Ruth C. Partridge, @ \$2,200, of which \$1,200 charged to Medical Research, Best Fund, \$1,000 — \$26.....	974	00
Research Assistants:		
Miss E. G. Gavin, \$1,550 — \$33.75.....	1,516	25
K. K. Kay, Industrial Hygiene, 10 mos. @ \$80.....	800	00
Miss E. L. Mahon, Secretary, \$1,200 — \$25.....	1,175	00
C. R. Cowan, Senior Technical Assistant, @ \$1,800, of which \$400 charged to Medical Research, Best Fund, \$1,400 — \$32.....	1,368	00
Technical Assistants:		
J. D. Brown, \$1,000 — \$20.....	980	00
W. Staples, \$950 — \$19.....	931	00
Miss N. Thompson, \$825 — \$16.50.....	808	50
(4) Chemistry in Relation to Hygiene:		
P. J. Moloney, Associate Professor (paid also in Connaught Laboratories) \$4,000 — \$115.....	3,885	00
Miss E. M. Taylor, Demonstrator (Sessional).....	500	00
Miss M. D. Smith, Class Assistant (Sessional — paid also in Connaught Laboratories) \$200 — \$4.....	196	00
G. Kimm, Technical Assistant.....	720	00
		<hr/>
		\$39,116 20

77. MAINTENANCE OF DEPARTMENT

(1) Administration (\$547.96):		
Postage	\$40	00
Telephone service.....	388	80
University Press, printing and stationery.....	102	90
Accounts under \$10 (5).....	12	53
Sundry disbursements by department.....	3	73
(2) Epidemiology and Biometrics (\$495.63):		
Canadian Laboratory Supplies, thermometer.....	11	76
Canadian Press Clipping Service.....	25	00
T. Eaton Co., books.....	20	70
F. W. Fisher Co., reprint boxes.....	12	48
International Business Machines Co., cards, forms and statistical data	36	46
Thos. Pocklington Co., graph paper.....	10	73
Postage	70	00
Stephens Sales Ltd., coupons.....	21	60
University Press, printing and stationery.....	260	86
Accounts under \$10 (4).....	16	04
Sundry disbursements by department.....	10	00
(3) Physiological Hygiene (\$410.49):		
Canadian Industries Ltd., chemicals.....	10	49
Canadian Kodak Co., chemicals.....	33	27
C. F. Casella Co., filter disc.....	17	40
R. H. Chappell, glassblowing.....	27	00
Connaught Laboratories, alcohol, animals, chemicals, glassware, etc.	239	44
Geo. E. Wilkes & Son, animal cages.....	30	00
G. S. Woodward, making spectroscope parts.....	10	00
Accounts under \$10 (8).....	31	38
Superintendent's Dept., labour, .92; material, \$10.59.....	11	51
(4) Chemistry in Relation to Hygiene (\$728.95):		
Canadian Laboratory Supplies, chemicals and glassware.....	12	03
R. H. Chappell, glassblowing.....	50	10
Instruments Ltd., rule.....	10	25
Wilson Scientific Co., chemicals, glassware, thermometer and apparatus	380	91
Accounts under \$10 (9).....	45	13
Cleaner, Mrs. Ada Hall, 83½ days.....	208	75
Sundry disbursements by department.....	10	00
Superintendent's Dept., labour, \$4.86; material, \$6.92.....	11	78
		<hr/>
	\$2,183	03
Paid by School of Nursing.....	400	00
		<hr/>
		\$1,783 03

(Charged to Rockefeller Fund, Hygiene)..... \$40,899 23

VIII. FACULTY OF APPLIED SCIENCE

78. SALARIES

Dean's Office

C. H. Mitchell, Dean, \$6,000 — \$205.....	\$5,795 00	
		\$5,795 00

Electrical Engineering

Professors:

T. R. Rosebrugh, \$6,000 — \$205 (retired 30 June).....	\$5,795 00
H. W. Price, \$5,400 — \$175.....	5,225 00
A. R. Zimmer, Associate Professor (paid also \$10 for Extension Work) \$3,800 — \$107	3,693 00

Assistant Professors:

V. C. Smith, \$3,000 — \$75.....	2,925 00
B. deF. Bayly, \$2,700 — \$66.....	2,634 00
R. J. Brown, Lecturer (Sessional) \$1,800 — \$40.....	1,760 00

Demonstrators (Sessional):

J. E. Reid, \$1,350 — \$28.75.....	1,321 25
M. Ward, \$1,050 — \$21.25.....	1,028 75
W. B. Whalley, \$1,050 — \$21.25.....	1,028 75
J. W. Bell, \$1,000 — \$20.....	980 00
C. A. Norris, \$950 — \$19.....	931 00
E. A. Ricker, \$950 — \$19.....	931 00
H. R. Sumner, \$950 — \$19.....	931 00
W. F. McMullen (resigned 31 Jan.) \$542.85 — \$10.85.....	532 00
R. E. Santo, 3 mos. from 1 Feb., \$407.15 — \$8.15.....	399 00
J. W. Lawson, Mechanician, \$2,000 — \$45.....	1,955 00
W. R. McKee, Electrician, \$2,000 — \$45.....	1,955 00
W. L. Bakewell, Assistant Electrician, \$1,050 — \$21.25.....	1,028 75
Mrs. G. E. Hammersley, Office Assistant and Librarian @ \$1,150, of which half charged to Civil Engineering: Municipal and Structural. \$575 — \$11.88	563 12

\$35,616 62

Mechanical Engineering

Professors:

R. W. Angus, \$6,000 — \$205.....	\$5,795 00
E. A. Allcut (paid also \$410 for Extension Work) \$4,500 — \$135...	4,365 00
Ross Taylor, Associate Professor, \$3,600 — \$99.....	3,501 00
W. G. McIntosh, Assistant Professor (paid also \$10 for Extension Work) \$3,200 — \$83.....	3,117 00

Lecturers (Sessional):

G. R. Lord, \$2,250 — \$52.50.....	2,197 50
T. C. Graham, \$1,950 — \$43.75.....	1,906 25
R. C. Wiren, \$1,800 — \$40.....	1,760 00
G. H. Hally, \$1,800 — \$40.....	1,760 00

Demonstrators, Thermodynamics (Sessional):

F. G. Ewens, \$1,100 — \$22.50.....	1,077 50
R. J. Birss, \$1,000 — \$20.....	980 00
E. B. MacRobie, \$1,000 — \$20.....	980 00
R. S. Segsworth, \$1,000 — \$20.....	980 00

Demonstrators, Hydraulics (Sessional):

E. G. Gallagher, \$1,000 — \$20.....	980 00
H. A. Marten, \$1,000 — \$20.....	980 00
W. R. Sirman, \$1,000 — \$20.....	980 00
L. E. Jones, 3½ mos. from 6 Jan.....	525 00

Demonstrators, Machine Design (Sessional):

S. C. D. Lawson, \$1,100 — \$22.50.....	1,077 50
D. G. McGorman, \$1,000 — \$20.....	980 00
F. Hickey, Engineer and Machinist, \$2,000 — \$45.....	1,955 00
Arthur Savage, Assistant Machinist, 1,323 hours @ 70c.....	926 10
Earl Burt, Fireman, 1,532 hours @ 50c.....	766 00
W. Odd, Laboratory Attendant, \$1,200 — \$25.....	1,175 00
Miss M. Burt, Office Assistant and Librarian, \$1,100 — \$22.50.....	1,077 50

\$39,841 35

Civil Engineering: Municipal and Structural

Professors:	
C. R. Young, Civil Engineering, \$5,200 — \$165.....	\$5,035 00
T. R. Loudon, Applied Mechanics \$4,900 — \$151.....	4,749 00
Lecturers (Sessional):	
C. F. Morrison, Civil Engineering, \$2,400 — \$57.....	2,343 00
M. J. C. Lazier, Applied Mechanics, \$2,300 — \$54.....	2,246 00
W. L. Sagar, Civil Engineering, \$2,100 — \$48.....	2,052 00
A. E. Berry, Special Lecturer, Municipal Engineering (Sessional — paid also \$490 in School of Hygiene) \$1,000 — \$22.50.....	977 50
C. E. Helwig, Demonstrator (Sessional) \$1,200 — \$25.....	1,175 00
J. Brown, Laboratory Assistant, \$1,100 — \$22.50.....	1,077 50
W. Kubbinga, Mechanician, \$1,000 — \$20.....	980 00
Mrs. G. E. Hammersley, Office Assistant and Librarian (see also Electrical Engineering) \$575 — \$11.87.....	563 13
	<hr/>
	\$21,198 13

Civil Engineering: Surveying and Geodesy

W. M. Treadgold, Professor (paid also \$562.50 for Summer Camp) \$4,500 — \$135.....	\$4,365 00
Associate Professors:	
S. R. Crerar (paid also \$500 for Summer Camp) \$4,000 — \$115....	3,885 00
E. W. Banting (paid also \$475 for Summer Camp) \$3,800 — \$107..	3,693 00
J. W. Melson, Assistant Professor (paid also \$412.50 for Summer Camp) \$3,450 — \$93.....	3,357 00
T. L. Rowe, Instructor (Sessional — paid also \$100 for Summer Camp) \$1,400 — \$30.....	1,370 00
R. C. McMordie, Demonstrator, 3 mos.....	375 00
C. T. Harding, Mechanician, @ \$875, of which \$400 charged to Applied Physics and \$100 to Photographic Service (paid also \$278.50 in Special Research) \$375 — \$7.50.....	367 50
Miss R. Cave, Office Assistant and Librarian, @ \$1,225, of which \$500 charged to Applied Physics and \$100 to Photographic Service, \$625 — \$13.....	612 00
	<hr/>
	\$18,024 50

Mining Engineering

H. E. T. Haultain, Professor, \$6,000 — \$205.....	\$5,795 00
Associate Professors:	
F. C. Dyer, \$4,000 — \$115.....	3,885 00
J. T. King, \$4,000 — \$115.....	3,885 00
S. E. Wolfe, Instructor (Sessional — paid also \$50 for Summer Field Work) \$1,650 — \$36.25.....	1,613 75
Demonstrators (Sessional):	
J. E. Anderson (resigned 15 Mar.) \$785.72 — \$15.72.....	770 00
J. E. Hanlon, 1 month.....	150 00
E. Tozer, Laboratory Assistant and Mechanician, \$1,400 — \$30.....	1,370 00
C. Waybrant, Laboratory Attendant, Assaying, \$1,250 — \$26.25.....	1,223 75
H. J. Reilly, Assistant Mechanician, 30 weeks from 16 Oct., \$900 — \$18..	882 00
C. J. Rickard, Laboratory Helper, 30 weeks @ \$10.....	300 00
Miss V. A. Jordau, Office Assistant and Librarian, \$1,100 — \$22.50.....	1,077 50
	<hr/>
	\$20,952 00

Metallurgical Engineering

G. A. Guess, Professor, \$5,700 — \$190.....	\$5,510 00
Associate Professors:	
J. A. Newcombe (paid also \$330 for Extension Work) \$3,600 — \$99..	3,501 00
R. J. Montgomery, Ceramics, \$3,600 — \$99.....	3,501 00
J. E. Toomer, Assistant Professor, \$3,450 — \$93.....	3,357 00
Hector Ross, Laboratory Attendant, 10 mos. (paid also \$40 as Messenger)	650 00
Miss H. Redmond, Office Assistant and Librarian, @ \$750 for 9 mos., of which \$450 charged to Secretary's Office.....	300 00
	<hr/>
	\$16,819 00

Chemical Engineering and Applied Chemistry

Professors:	
J. Watson Bain, Chemical Engineering (on leave of absence) \$5,500 — \$180.....	\$5,320 00
M. C. Boswell, Organic Chemistry, \$4,900 — \$151.....	4,749 00
E. G. R. Ardagh, Applied Chemistry, \$4,500 — \$135.....	4,365 00

Assistant Professors:

E. A. Smith, Chemical Engineering (paid also \$261.75 from Stores) \$3,150 — \$81	3,069 00
R. R. McLaughlin, Applied Chemistry, \$2,850 — \$70.50.....	2,779 50
A. M. Fitzgerald, Instructor (Sessional) \$1,600 — \$35.....	1,565 00
Demonstrators (Sessional):	
G. P. Beal, \$1,300 — \$27.50.....	1,272 50
J. G. Breckenridge, \$1,150 — \$23.75.....	1,126 25
W. H. Bowman (paid also \$350 in Special Research) \$1,100 — \$22.50	1,077 50
G. T. Eaton (paid also \$450 in Special Research) \$1,100 — \$22.50..	1,077 50
G. V. Jansen (paid also \$350 in Special Research) \$1,100 — \$22.50	1,077 50
W. C. Macdonald, \$1,000 — \$20.....	980 00
W. H. Rapson, @ \$1,000 (less 2 mos. sick leave) \$800 — \$20.....	780 00
J. H. Thompson, substitute, 2 mos.....	200 00
H. Boeschstein, Instructor, Technical German (Sessional — part time; see also German) \$700 — \$16.80.....	683 20
A. S. Hunt, Lecture Assistant and Glassblower, \$1,600 — \$35.....	1,565 00
F. Westhead, Laboratory Assistant, \$1,100 — \$22.50.....	1,077 50
M. L. Hammond, Lecture Assistant, \$950 — \$19.....	931 00
Laboratory Attendants @ \$10 to \$15 per week:	
Thos. Storton, 52 weeks, 2 days.....	785 00
Jack Seymour, 39 weeks.....	429 00
Ernest Livingstone, 36 weeks.....	396 00
Bert Wood, 21 weeks.....	210 00
Robert Fines, 15 weeks.....	150 00
Special Lecturers (Sessional):	
A. V. DeLaporte, Sanitary Chemistry.....	200 00
T. Linsey Crossley, Pulp and Paper.....	100 00
Miss D. Birkett, Office Assistant and Librarian, @ \$1,200, of which \$200 charged to Secretary's Office, \$1,000 — \$21.....	979 00

\$36,944 45

School of Architecture

Professors:

H. H. Madill, \$4,500 — \$135.....	\$4,365 00
E. R. Arthur, Architectural Design, \$4,300 — \$127.....	4,173 00
H. J. Burden, Assistant Professor, \$3,000 — \$75.....	2,925 00
W. E. Carswell, Lecturer (Sessional) \$2,250 — \$52.50.....	2,197 50
Miss J. C. Laing, Librarian and Instructor, Architectural History and French, \$1,850 — \$41.25.....	1,808 75
Instructors (Sessional — part time):	
C. W. Jefferys, Painting (paid also \$1.75 from University Press) \$1,500 — \$32.50.....	1,467 50
F. Coates, Modelling, \$950 — \$19.....	931 00
Special Lecturers (Sessional — part time):	
Mackenzie Waters, Architectural Design, 6 mos., \$1,000 — \$20.....	980 00
A. S. Mathers, 7 mos., \$900 — \$18.....	882 00
W. S. Wilson, Architectural Economics (see also Secretary's Office) \$250 — \$10	240 00
A. Wardell, Heating and Ventilation (see also Engineering Drawing) \$200 — \$4.50	195 50
H. B. Dunington-Grubb, Landscape Architecture.....	200 00
G. A. Arksey, Attendant, Drafting rooms, 8 mos.....	800 00
Miss E. W. Dyer, Office Assistant, @ \$780 for 9 mos., of which \$330 charged to Engineering Drawing.....	450 00

\$21,615 25

Engineering Drawing

J. R. Cockburn, Professor, Descriptive Geometry, \$4,900 — \$151.....	\$4,749 00
Associate Professors:	
W. J. Smither, Structural Engineering, \$4,000 — \$115.....	3,885 00
W. J. T. Wright (paid also \$291 as Special Lecturer, Technical English) \$3,700 — \$106.....	3,594 00
W. B. Dunbar, Assistant Professor, \$2,700 — \$66.....	2,634 00
Lecturers (Sessional):	
P. V. Jermyn, \$2,250 — \$52.50.....	2,197 50
J. J. Spence, \$1,950 — \$43.75.....	1,906 25
A. Wardell (paid also \$195.50 in School of Architecture) \$1,800 — \$40.50	1,759 50
Instructors (Sessional):	
R. M. Clark, \$1,475 — \$31.85.....	1,443 15
G. R. Edwards, \$1,475 — \$31.85.....	1,443 15

Demonstrators (Sessional):		
J. M. Carswell, \$1,375 — \$29.40.....	1,345	60
J. Hvilivitzky, \$1,175 — \$24.35.....	1,150	65
W. W. Fawcett, \$1,100 — \$22.50.....	1,077	50
M. B. Watson, \$1,100 — \$22.50.....	1,077	50
G. Brown, Attendant, Drafting Rooms, 9 mos., \$1,100 — \$22.50.....	1,077	50
Miss E. W. Dyer, Office Assistant (see also School of Architecture)....	330	00
		\$29,670 30
<i>Applied Physics</i>		
K. B. Jackson, Assistant Professor, \$3,150 — \$81.....	\$3,069	00
Instructors (Sessional):		
C. A. Booth, \$1,500 — \$32.50.....	1,467	50
V. L. Henderson, \$1,500 — \$32.50.....	1,467	50
Demonstrators (Sessional):		
W. J. Jackson, \$1,300 — \$27.50.....	1,272	50
D. H. Hamly (part time — paid also \$511.40 in Botany and \$198.50 in Special Research) \$350 — \$7.....	343	00
Miss R. Cave, Office Assistant and Librarian (see also Civil Engineering: Surveying and Geodesy) \$500 — \$10.50.....	489	50
C. T. Harding, Mechanician (see also Civil Engineering: Surveying and Geodesy) \$400 — \$8.....	392	00
		\$8,501 00
<i>Special Lectures</i>		
Special Lecturers (Sessional):		
R. R. Grant, Accountancy and Business (paid also \$400 for Extension Work).....	\$300	00
R. E. Laidlaw, Engineering Law.....	250	00
W. J. T. Wright, Technical English (see also Engineering Drawing) \$300 — \$9.....	291	00
F. H. Kirkpatrick, Public Speaking (paid also \$600 for Extension Work).....	250	00
		\$1,091 00
<i>Secretary's Office</i>		
W. S. Wilson, Secretary (paid also \$240 in School of Architecture) \$3,100 — \$79.....	\$3,021	00
Miss E. Birkett, Assistant Secretary, \$1,550 — \$33.75.....	1,516	25
Miss M. Fenton, Assistant, \$1,150 — \$23.75.....	1,126	25
Stenographers:		
Miss H. Redmond (see also Metallurgical Engineering).....	450	00
Miss D. Birkett (see also Chemical Engineering) \$200 — \$4.....	196	00
		\$6,309 50
		\$262,378 10

79. ELECTRICAL ENGINEERING

Supplies (\$1,768.93):		
Aikenhead Hardware Ltd., hardware.....	\$122	40
Arrow, Hart & Hergeman, switches.....	16	58
Bakelite Corporation, panels and rods.....	20	08
Canadian National Carbon Co., batteries.....	59	31
Canadian S.K.F. Co., bearings.....	14	47
T. Eaton Co., brushes, stain, etc.....	13	12
Erie Resistor of Canada, Ltd., carbon resistor.....	15	41
D. Gestetner (Canada) Ltd., mimeo paper, etc.....	19	34
George Gordon Machine Co., cutter blanks.....	116	99
Arthur Jackson Machine Tool Co., vise.....	12	13
Leeds, Northrup Co., resistors.....	324	21
Photographic Service, blue-prints, etc.....	12	35
Postage.....	18	00
Richards Glass Co., jars and caps.....	29	83
Ryerson Press, mimeo paper.....	31	20
Sully Brass Foundry, castings.....	12	84
Swedish General Electric Co., repairs to motors.....	14	30
Thomas Corney Typewriter Ltd., typewriter.....	141	75
Weston Electric Instrument Corporation, terminals, etc.....	47	15
Wholesale Radio Co., radio parts.....	120	04
Worr Foundry Co., castings, etc.....	30	27
University Press, printing and stationery.....	30	94
Accounts under \$10 (5).....	26	82
Sundry disbursements by department:		
Stationery, \$5.05; hardware, \$11.31; sundries, \$14.30.....	30	66

Superintendent's Dept., freight, \$44.13; labour, \$222.41; material, \$222.20	488 74	
Apparatus (\$538.61):		
Burlec Ltd., circuit breakers.....	59 40	
George Gordon Machine Co., cutter and grinder.....	147 69	
Stromberg-Carlson Telephone Mfg. Co., radio parts.....	49 00	
Weston Electric Instrument Corporation, meters.....	91 58	
Wholesale Radio Co., radio.....	190 94	
Furniture, printing and incidentals:		
University Press.....	25 03	
		\$2,332 57
Less credits: Laboratory deposits, \$31.37; sale of meters, \$15.....	46 37	\$2,286 20

80. MECHANICAL ENGINEERING

Supplies (\$682.65):		
Aikenhead Hardware Ltd., hardware.....	\$86 13	
Canadian Laboratory Supplies, glassware, etc.....	49 32	
Crosby Steel Gauge Valve Co., springs and piston rods.....	23 49	
McColl-Frontenac Oil Co., grease and oil.....	58 93	
Photographic Service, blue-prints, etc.....	34 32	
Postage	18 00	
Scythes & Co., waste.....	17 01	
Taylor Instrument Co., thermometer.....	24 00	
Thomson-Gordon Ltd., packing.....	21 36	
Accounts under \$10 (5).....	28 10	
Sundry disbursements by department:		
Stationery and supplies, \$11.09; sundries, \$8.07.....	19 16	
Superintendent's Dept., freight, 54c; labour, \$39.22; material, \$263.07	302 83	
Apparatus — Thermodynamics and Aerodynamics (\$159.42):		
A. C. McFarlane, patterns.....	12 00	
Taylor Instrument Co., thermometers.....	22 60	
Superintendent's Dept., labour, \$68.10; material, \$56.72.....	124 82	
Apparatus — Hydraulics (\$68.55):		
Monarch Belting Co., belts.....	12 65	
Superintendent's Dept., labour, \$26.34; material, \$29.56.....	55 90	
Proportion of fuel for Experimental Plant (\$1,061.14):		
P. Burns & Co.....	1,060 39	
Superintendent's Dept., labour.....	75	
Furniture, printing and incidentals (\$243.11):		
University Press.....	151 85	
Superintendent's Dept., labour, \$75.49; material, \$15.77.....	91 26	
		\$2,214 87
Less credits: Sale of material, \$105.35; laboratory deposits, \$3.75....	109 10	\$2,105 77

81. CIVIL ENGINEERING: MUNICIPAL AND STRUCTURAL

Supplies (\$289.28):		
Aikenhead Hardware Ltd., hardware.....	\$11 55	
Baines & David, steel.....	40 20	
Canadian Laboratory Supplies, glassware, etc.....	26 61	
Photographic Service, blue-prints, etc.....	43 65	
Postage	24 00	
University Library, replacement of books lost.....	37 63	
University Press, stationery.....	30 57	
Accounts under \$10 (5).....	25 53	
Superintendent's Dept., labour, \$13.98; material, \$35.56.....	49 54	
Apparatus (\$32.60):		
Hamilton Beach Co., electrical mixer, etc.....	25 71	
Taylor Instrument Co., hydrometer, etc.....	4 67	
Superintendent's Dept., freight.....	2 22	
		\$321 88
Less credit for sale of manuals.....	26 00	\$295 88

82. CIVIL ENGINEERING: SURVEYING AND GEODESY

Supplies (\$329.36):	
Art Metropole, steel tapes and chaining pins.....	\$110 06
Photographic Service, blue-prints.....	46 73
Thos. Pocklington Co., repairing transit and plane table.....	18 00
University of Toronto Engineering Society, field books and supplies	52 28
University Press, printing and stationery.....	43 60
Accounts under \$10 (5).....	25 08
Sundry disbursements by department.....	10 00
Superintendent's Dept., labour, \$13.07; material, \$10.54.....	23 61
Summer Survey Camp—Equipment and Improvements (\$129.28):	
Gurney Foundry Co., heaters.....	48 78
J. E. Minto, boat and repairs to wharf.....	80 50
Summer Survey Camp—Maintenance (\$3,971.43):	
Instructional Staff (\$2,401.30):	
W. M. Treadgold, services, \$562.50; living expenses, \$55.55; travelling expenses, \$20.....	638 05
S. R. Crerar, services, \$500; living expenses, \$47.50; travelling expenses, \$20; supplies, \$2.....	569 50
E. W. Banting, services, \$475; living expenses, \$63.75; travelling expenses, \$20.....	558 75
J. W. Melson, services, \$412.50; living expenses, \$52.50; travelling expenses, \$20.....	485 00
T. L. Rowe, services, \$100; living expenses, \$50.....	150 00
Sundry expenses (\$895.13):	
Britnell's Bakeries, bread.....	19 32
Coleman Lamp & Stove Co., mantels, etc.....	18 33
T. Eaton Co., cups and saucers, etc.....	35 17
Hewitt Bros., freight and cartage.....	53.32
A. Langdon, stakes.....	11 92
Wm. A. Lindop, gas and oil.....	36 75
Loblaw Groceries Ltd., provisions.....	476 89
Mrs. J. E. Minto, milk.....	26 40
C. Trumbull, milk.....	52 00
John Welch, fireplace irons.....	11 00
S. W. Welch, provisions and hardware.....	75 80
Accounts under \$10 (3).....	13 21
Superintendent's Dept., freight, \$4.65; labour, \$40.84; material, \$19.53.....	65 02
Payments to help (\$675):	
J. E. Minto, caretaker, 12 mos., \$240; ice supply, \$35; cutting wood, \$75.....	350 00
Mrs. J. E. Minto, cook.....	325 00
	\$4,430 07
Less credits: Board at Summer Camp, \$1,002; laboratory deposits, \$191.70.....	1,193 70
	\$3,236 37

83. MINING ENGINEERING

Supplies (\$1,401.56):	
Aikenhead Hardware Ltd., hardware.....	\$24 75
Wm. Ainsworth & Sons, weights.....	12 67
Canadian Industries Ltd., acids.....	16 69
Canadian Laboratory Supplies, weights and glassware.....	152 34
Walter A. Carveth & Co., objective, etc.....	13 25
Central Scientific Co., glassware and chemicals.....	43 18
Denver Fire Clay Co., crucibles and lead.....	115 36
T. Eaton Co., oilcloth and utensils.....	113 91
Fletcher, Russell & Co., clay and stoppers.....	27 07
A S. Hunt, glassblowing.....	36 60
Imperial Oil Ltd., fuel oil.....	30 00
W. R. McKee, rheostats.....	11 00
Morgan Crucible Co., scorifiers.....	52 88
Ontario Rubber Co., stoppers and tubing.....	52 73
Photographic Service, rectigraphs.....	12 80
Postage.....	45 00
Robbins & Townsend, typewriter inspection and repairs.....	22 00
Sturtevant Mill Co., grinding discs.....	16 69
W. S. Tyler Co., metal screening.....	20 22
Wilson Scientific Co., glassware.....	61 70
University Press, printing and stationery.....	245 03

Accounts under \$10 (14).....	74 99	
Superintendent's Dept., freight, \$45.68; labour, \$24.58; material, \$130.44	200 70	
Apparatus (\$38.99):		
Toronto Welding Co., crusher arm.....	12 00	
Superintendent's Dept., labour, \$8.77; material, \$18.22.....	26 99	
		\$1,440 55
Less credit from laboratory deposits.....	115 18	\$1,325 37

84. METALLURGICAL ENGINEERING

Supplies (\$372.69):		
Canadian Industries Ltd.....	\$29 87	
Canadian Laboratory Supplies, glassware, etc.....	97 39	
Canadian Liquid Air Co., rental of cylinders.....	11 00	
Eastman Kodak Stores, plates and paper.....	45 72	
Imperial Refining & Smelting Co., crucibles.....	17 20	
Edward Orton Jr. Ceramic Foundation, pyrometric cones.....	14 63	
Washington Mills Emery Mfg. Co., emery.....	16 10	
Williams & Wilson, infrax brick.....	16 50	
Wilson Scientific Co., glassware.....	32 56	
University Press, printing and stationery.....	18 17	
Accounts under \$10 (10).....	36 77	
Superintendent's Dept., freight, \$4.88; labour, \$9.40; material, \$22.50	36 78	
Apparatus (\$133.46):		
Walter A. Carveth & Co., camera, hand press, etc.....	100 00	
Ferro Enamelling Co., paint spray gun.....	25 88	
Superintendent's Dept., labour, \$6.86; material, .72.....	7 58	
		\$506 15

85. CHEMICAL ENGINEERING AND APPLIED CHEMISTRY

Supplies (\$7,660.53):		
Armstrong Cork & Insulation Co., corks.....	\$86 31	
British Drug Houses, drugs and chemicals.....	424 30	
Canada Wire & Cable Co., copper wire.....	13 60	
Canadian Industries Ltd., acids.....	486 56	
Canadian Kodak Co., chemicals.....	105 47	
Canadian Laboratory Supplies, glassware, tubing and chemicals....	1,466 84	
Canadian Liquid Air Co., rental of cylinders and gas.....	163 17	
Central Scientific Co., glassware and stoppers.....	349 28	
Corbett-Cowley Ltd., towels.....	42 92	
Dominion Oxygen Co., rental of cylinders and gas.....	69 34	
General Steel Wares Ltd., pails.....	85 89	
O. W. Herzberg, chemicals.....	96 97	
Johnson-Matthey Co., platinum wire and crucibles.....	12 43	
Kelvinator Co. of Canada Ltd., refrigerant and gas.....	26 63	
Lake Simcoe Ice & Fuel Ltd., ice.....	51 21	
Liquid Carbonic Canadian Corporation, gas.....	40 00	
McIntyre & Taylor, tripods and plates.....	56 50	
W. R. McKee, repairing motor.....	18 35	
Merck & Co., mercury and acids.....	365 02	
Nichols Chemical Co., chemicals.....	208 67	
Photographic Service, plates and slides.....	22 72	
Thos. Pocklington Co., overhauling balances.....	94 00	
Robbins & Townsend, typewriter inspection, etc.....	11 40	
Standard Chemical Co., spirits.....	54 00	
Textile Products Co., towels.....	126 33	
Twisswire Brushes Ltd., brushes.....	39 65	
University Library, books replaced.....	25 20	
Wilson Scientific Co., glassware.....	1,046 94	
Wood, Alexander & James, files.....	14 84	
University Press, printing and stationery.....	274 85	
Accounts under \$10 (10).....	49 26	
Sundry disbursements by department:		
Hardware, \$10.68; stationery and postage, \$18.90; sundries, \$31.83	61 41	
Superintendent's Dept., freight, \$24.97; labour, \$906.78; material, \$738.72	1,670 47	

Apparatus (\$577.91):

Canadian Laboratory Supplies, crucibles, etc.....	465 04
Canadian Liquid Air Co., valves.....	15 00
Fidea Co., stop watches.....	17 00
Leeds & Northrup Co., potentiometer.....	80 87

\$8,238 44

Less credits: Laboratory deposits, \$1,277.31; container returned, \$1 1,278 31

\$6,960 13

86. SCHOOL OF ARCHITECTURE

Supplies (\$523.32):

Art Metropole, paints and brushes.....	\$12 99
Artists' Supply Co., frames, canvas and brushes.....	74 80
Beaux Arts Institute of Design, text books.....	25 34
Wm. Dawson Subscription Service, subscriptions.....	11 25
E. Harris Co., cameo paper.....	27 50
Photographic Service, blue-prints and slides.....	149 80
Postage.....	20 00
Ratcliffe & Ovey, stapler and staples.....	13 50
Robbins & Townsend, typewriter inspection.....	10 20
C. L. Todd, subscriptions.....	15 00
University Press, printing and stationery.....	69 18
Accounts under \$10 (10).....	30 03
Superintendent's Dept., freight, \$12.09; labour, \$16.12; material, \$35.52.....	63 73

Apparatus (including books) \$126.75:

Office Specialty Mfg. Co., steel shelving.....	108 15
University Library, books.....	11 98
Accounts under \$10 (2).....	6 62

Models for Life Class:

Prof. H. H. Madill, reimbursement for payments made..... 26 00

Staff expenses—outdoor sketching classes:

Prof. H. H. Madill, expenses (five members of staff)..... 106 75

\$782 82

Less credit from laboratory deposits..... 17 48

\$765 34

87. ENGINEERING DRAWING

Supplies (\$273.93):

D. Gestetner (Canada) Ltd., stencils and paper.....	\$27 72
Lloyd's Register of Shipping, publications.....	11 89
Photographic Service, prints.....	24 35
Star Office Specialty Co., stapler and staples.....	18 50
University of Toronto Engineering Society, text books and drawing supplies.....	30 69
University Press, printing and stationery.....	55 57
Accounts under \$10 (10).....	27 50
Superintendent's Dept., labour, \$68.43; material, \$9.28.....	77 71

Printing Instruction Sheets (\$70.96):

D. Gestetner (Canada) Ltd., paper and stencils.....	34 64
University Press, printing and stationery.....	36 32

\$344 89

Less credit from laboratory deposits..... 34 35

\$310 54

88. APPLIED PHYSICS

Supplies (515.81):

Aikenhead Hardware Ltd., hardware.....	\$40 80
Art Metropole, Oswald System.....	15 68
W. E. Booth Co., plates and films.....	68 65
Consolidated Plate Glass Co., glass.....	10 37
C. Crowther, optical flats.....	10 00
Eastman Kodak Stores, paper, films, etc.....	23 21
Imperial Optical Co., lenses.....	13 00
W. R. McKee, repairing meters.....	34 60
Photographic Service, plates, chemicals and prints.....	116 66
University of Toronto Engineering Society, drawing supplies.....	29 30
University Press, printing and stationery.....	15 89
Accounts under \$10 (14).....	60 45

Sundry disbursements by department:		
Postage and stationery, \$9.94; supplies, \$10.06.....	20	00
Superintendent's Dept., freight, \$4.11; labour, \$7.53; material, \$45.56	57	20
Apparatus (\$442.82):		
Canadian Westinghouse Ltd., tubes.....	85	00
Exide Batteries Ltd., cells.....	50	00
W. R. McKee, repairing motor, etc.....	22	85
Thos. Pocklington Co., slide and rule.....	20	93
Struthers, Dunn, Inc., relay.....	9	01
Weston Electrical Instrument Co., meters.....	67	41
Superintendent's Dept., labour, \$112.65; material, \$74.97.....	187	62
		<hr/>
		\$958 63
Less credit from laboratory deposits.....	108	32
		<hr/>
		\$850 31

89. GENERAL EXPENSES

Stationery, printing, Calendar, office supplies and incidentals (\$1,644.37):		
Canadian National Telegraphs.....	\$23	08
D. Gestetner (Canada) Ltd., stencils.....	34	00
McCann & Alexander, platen and rolls.....	10	00
Might Directories Ltd., city directory.....	21	20
National Stationers, Ltd.....	16	45
Photographic Service, rectigraphs and prints.....	150	43
Postage.....	193	00
University of Toronto Engineering Society, paper, pencils and reprints.....	10	38
University Press, printing and stationery.....	1,063	75
Accounts under \$10 (6).....	31	10
Sundry disbursements by Secretary.....	10	28
Superintendent's Dept., labour, \$68.02; material, \$12.68.....	80	70
Furniture, fixtures, books, etc. (\$19.20):		
Langley's Ltd., cleaning rug and covers.....	9	20
Scott Glass & Mirror Co., mirror.....	10	00
Clerical assistance (\$100.09):		
Mrs. N. Nixon, 5 days.....	16	67
Miss H. M. Redmond, 4 weeks, 2 days.....	83	42
Messenger service (\$825):		
A. C. Dykeman, 52 weeks, 2 days.....	785	00
Hector Ross, 4 weeks.....	40	00
		<hr/>
		\$2,588 66
Less credit from laboratory deposits.....	65	99
		<hr/>
		\$2,522 67

90. PHOTOGRAPHIC SERVICE

(a) Salaries:		
Professor G. R. Anderson, Manager (without remuneration).....		
Photographers:		
C. Crowther, \$1,450 — \$31.25.....	\$1,418	75
Mrs. Muriel Milne, \$1,200 — \$25.....	1,175	00
Frank Stark, 10 mos, \$1,000 — \$20.....	980	00
W. Vance, \$950 — \$19.....	931	00
Mrs. R. E. Morley, Bookkeeper, \$1,100 — \$22.50.....	1,077	50
Miss R. Cave, Office Assistant (see also Civil Engineering: Surveying and Geodesy) \$100 — \$2.10.....	97	90
C. T. Harding, Mechanician (see also Civil Engineering: Surveying and Geodesy) \$100 — \$2.....	98	00
Fred Sayer, Messenger and Studio Assistant.....	600	00
		<hr/>
		\$6,378 15
(b) Expenses:		
Supplies:		
W. E. Booth Co., plates and paper.....	\$188	02
Canadian General Electric Co., lamps and light meter.....	20	71
Eastman Kodak Stores, photo supplies and plates.....	442	32
T. Eaton Co., camera bellows, cheesecloth and films.....	28	76
Gevaert Co. of America, plates.....	244	31
Instruments Ltd., carbons and blue-prints.....	83	11
National Drug & Chemical Co., chemicals.....	102	00
Polaroid Corporation, polarizer screens.....	36	45
J. Frank Raw Co., dividers, paper, etc.....	53	02
Rectigraph Co., timer and paper.....	158	65

University Press, printing and stationery.....	79 54	
Accounts under \$10 (8).....	45 34	
Superintendent's Dept., freight, \$2.09; labour, \$7.57; material, \$5.89	15 55	
		\$1,497 78

\$7,875 93

NOTE: Receipts for photographic work done for various departments (including Accounts Receivable, \$122.62) amounted to \$4,681.35.

91. MINING BUILDING (INCLUDING MILL BUILDING)

Heat and light.....	\$7,270 94	
Gas, \$976.09; water, \$474.87.....	1,450 96	
Caretaker's supplies:		
Superintendent's Dept., material.....	260 68	
Cleaning (\$3,514.08):		
Allen Mfg. Co., laundry.....	27 96	
New York Window Cleaning Co.....	51 00	
Superintendent's Dept., labour.....	3,435 12	
Repairs and renewals (\$2,751.41):		
Wm. Bartlett & Son, shades.....	13 76	
City Treasurer, elevator licenses.....	15 00	
Routery Bros., plaster repairs.....	33 75	
Accounts under \$10 (3).....	17 13	
Superintendent's Dept., labour, \$1,822; material, \$849.77.....	2,671 77	
Sundries: Work in Room No. 15:		
Superintendent's Dept., labour, \$423.54; material, \$275.65.....	699 19	
Caretaker, A. Clarke, 12 mos. to 30 June, \$1,400 — \$30 (and overtime, \$75)	1,370 00	
		\$17,317 26
Less heat and light charged to Central Power Plant... \$7,270 94		
Credit for cleaning..... 31 00		
		7,301 94
		\$10,015 32

92. ENGINEERING BUILDING

Heat and light.....	\$3,374 48	
Gas, \$73.96; water, \$128.57.....	202 53	
Caretaker's supplies:		
Superintendent's Dept., material.....	195 62	
Cleaning (\$1,726.34):		
Allen Mfg. Co., laundry.....	20 64	
New York Window Cleaning Co.....	43 00	
Superintendent's Dept., labour.....	1,662 70	
Repairs and renewals (\$2,106.99):		
Wm. Bartlett & Son, shades.....	18 19	
City of Toronto, Dept. of Works, repairs to valve.....	22 32	
Routery Bros., plaster repairs.....	118 60	
Superintendent's Dept, labour, \$1,353.19; material, \$594.69.....	1,947 88	
Caretaker, F. Baker, 12 mos. to 30 June, \$1,400 — \$30 (and overtime, \$123)	1,370 00	
		\$8,975 96
Less heat and light charged to Central Power Plant... \$3,374 48		
Credit for cleaning, etc..... 146 98		
		3,521 46
		\$5,454 50

93. ELECTRICAL BUILDING (INCLUDING MECHANICAL BUILDING AND WIND TUNNEL)

Heat and light.....	\$4,589 81	
Fuel for Experimental Plant:		
P. Burns & Co.....	1,200 00	
Gas, \$62.88; water, \$373.73.....	436 61	
Caretaker's supplies:		
Superintendent's Dept., material.....	114 55	

Cleaning (\$1,951.63):		
Allen Mfg. Co., laundry.....	22	54
New York Window Cleaning Co.....	18	75
C. Waterhouse, window cleaning.....	45	00

		<u>\$11,043 56</u>
Less heat and light charged to Central Power Plant..	\$4,589	81
Credit for cleaning.....	14	00
		<u>4,603 81</u>
		<u>\$6,439 75</u>

94. GEODETIC OBSERVATORY BUILDING

Heat and light.....	\$271	23
Water.....	16	20
Caretaker's supplies:		
Superintendent's Dept., material.....	22	47
Cleaning (\$124.70):		
C. Waterhouse, window cleaning.....	5	00
Superintendent's Dept., labour.....	119	70
Repairs and renewals:		
Superintendent's Dept., labour, \$243.06; material, \$43.24.....	286	30
		<u>\$720 90</u>
Less heat and light charged to Central Power Plant.....	271	23
		<u>\$449 67</u>
		<u>\$313,778 00</u>

IX. FACULTY OF DENTISTRY

95. SALARIES

(a) Regular Staff

Professors:		
W. Seccombe, Preventive Dentistry, also Dean of Faculty (ob. 16 Jan.—remainder of salary to 30 June paid to widow) \$6,000—\$205	\$5,795	00
A. D. A. Mason, Clinical Dentistry, also Acting Dean of Faculty from 13 Feb. (paid also \$96.85 in Faculty of Medicine) \$5,000—\$156.85	4,843	15
F. M. Lott, Prosthetic Dentistry (paid also \$25 for Extra Mural Lectures) \$5,000—\$155.....	4,845	00
A. E. Webster, Operative Dentistry, \$4,000—\$115 (retired 30 June)	3,885	00
T. Cowling, Dental Technology and Metallurgy, \$2,000—\$45.....	1,955	00
G. C. Cameron, Dental Pathology and Bacteriology (paid also \$25 for Extra Mural Lectures and \$21 for Post Graduate Courses) \$3,000—\$75.....	2,925	00
C. A. Corrigan, Orthodontia, \$2,500—\$60.....	2,440	00
S. S. Crouch, Dental Anatomy.....	700	00
E. W. Paul, Dental Surgery and Anaesthesia (paid also \$77 for Post Graduate Courses).....	680	00
F. J. Conboy, Dental Praxis.....	400	00
R. Gordon McLean, Dental Praxis (paid also \$50 as Associate)....	200	00
L. H. Ante, Crown and Bridge Prosthesis (without salary—paid \$85 for Extra Mural Lectures).....		
Associate Professors:		
Dentistry:		
W. G. Switzer, \$4,000—\$115.....	3,885	00
H. A. Hoskin, \$4,000—\$115.....	3,885	00
C. A. Kennedy, Orthodontia, also Librarian and Curator of Museum, \$1,100—\$22.50.....	1,077	50
F. A. Clarkson, Medicine (paid also \$300 in Faculty of Medicine) ..	369	00
Fulton Risdon, Oral Surgery (paid also \$25 for Extra Mural Lectures and \$21 for Post Graduate Courses).....	180	00
E. S. Ryerson, Assistant Professor, Surgery (see also Faculty of Medicine) \$400—\$13.....	387	00

Associates:

Dentistry:

S. M. Richardson (paid also \$15 for Extra Mural Lectures and \$38 for Post Graduate Courses) \$3.150 — \$81.....	3,069 00
L. F. Krueger (paid also \$95 for Extra Mural Lectures) \$1,500 — \$32.50	1,467 50
G. H. Coram, \$1,400 — \$30.....	1,370 00
H. A. Ross.....	500 00
G. D. Beierl.....	750 00
F. L. Cole (paid also \$25 for Extra Mural Lectures).....	670 00
J. H. Duff, \$945 — \$18.90.....	926 10
W. T. Holmes (paid also \$25 for Extra Mural Lectures) \$1,000 — \$20	980 00
W. L. Hugill (paid also \$50 for Extra Mural Lectures).....	670 00
G. V. Morton.....	670 00
J. M. Sheldon (paid also \$25 for Extra Mural Lectures).....	670 00
R. R. Walker.....	670 00
R. S. Woollatt.....	670 00
R. Gordon McLean (see also above).....	50 00

Miss W. C. Riddle. Histology, Bacteriology and Pathology, \$2,160 — \$49.80	2,110 20
---	----------

Prosthetic Dentistry:

R. J. Godfrey (paid also \$35 for Extra Mural Lectures) \$1,200 — \$25	1,175 00
R. G. Ellis (paid also \$30 for Extra Mural Lectures and \$12 for Post Graduate Courses) \$2,400 — \$57.....	2,343 00
M. A. Cox. Preventive Dentistry (paid also \$30 in School of Nursing).....	520 00
J. H. Johnson. Dental Surgery and Anaesthesia (paid also \$15 for Extra Mural Lectures and \$34 for Post Graduate Courses) \$2,900 — \$72	2,828 00
C. H. M. Williams. Periodontia (half time — paid also \$25 for Extra Mural Lectures and \$53 for Post Graduate Courses) \$1,500 — \$32.50	1,467 50

Demonstrators, Assistants, etc. (Sessional):

P. G. Anderson, Demonstrator, Dentistry.....	495 00
E. M. Rigsby, Instructor, Dental Technology.....	240 00
C. C. Rous, Lecturer, Applied Chemistry and Metallurgy (see also Office Staff) \$300 — \$7.60.....	292 40
Miss D. F. J. Berry, Preventive Assistant, 10 mos., \$950 — \$19.....	931 00
J. Kreutzer, Demonstrator, Prosthetic Dentistry, and Fellow, Bacteriology and Pathology, \$900 — \$18.....	882 00
G. B. Shillington, Demonstrator, Prosthetic Dentistry (part time — paid also \$10 in School of Nursing).....	700 00
E. J. Pratt, Special Lecturer, English (see also Faculty of Medicine).....	360 00
G. L. Assie, Instructor, French (see also Faculty of Arts) \$180 — \$4.25	175 75
R. S. Hosking, Instructor, English Expression (paid also \$15 in Social Science and \$200 for Extension Work).....	100 00

Laboratory Assistants:

Technicians:

W. V. Byrne, Dentistry, 10 mos., \$1,900 — \$42.50.....	1,857 50
Miss Inez A. Bumby, Bacteriology and Pathology, \$1,020 — \$20.50	999 50
H. F. Whittaker, Histology (part time — see also Anatomy) \$120 — \$2.40	117 60
Mrs. M. Gratton, Histology (part time) 34 weeks @ \$9.....	306 00
H. Aylward, Infirmary, \$1,200 — \$25.....	1,175 00

\$70,650 70

(b) Infirmary Staff (including Nurses)

Nurses:

Miss L. A. Cameron, Supervisor, Dental Nurses in Training, 10 mos., \$1,300 — \$27.50.....	\$1,272 50
Miss L. E. Tutt, 10 mos., \$900 — \$18.....	882 00
Miss A. J. Park, 10 mos.....	800 00
Miss F. G. Whitehead, 8 mos.....	800 00
Miss A. H. Rose, 8 mos.....	798 00
Miss M. E. Crerar, 10 mos.....	700 00
Miss Muriel Graham, 10 mos.....	700 00
Miss A. E. Phipps, 10 mos.....	700 00

R. M. Turner, Instructor, Typewriting.....	100 00	
Mrs. L. Barraclough, Laundress, 42 weeks @ \$16.45.....	690 90	
		\$7,443 40
(c) Office Staff		
C. C. Rous, Secretary (paid also \$292.40 as Lecturer) \$2,800 — \$71.40..	\$2,728 60	
Miss F. A. Cook, Secretary to the Dean, \$1,560 — \$34.....	1,526 00	
Miss R. C. Hopkins, Assistant to the Secretary, \$1,200 — \$25.....	1,175 00	
Miss E. B. Mimms, Assistant in Library, \$1,020 — \$20.50.....	999 50	
Miss L. Park, Cashier in Infirmary, 10 mos., \$1,100 — \$22.50.....	1,077 50	
Miss Flora Ward, Stenographer, \$900 — \$18.....	882 00	
		\$8,388 60
		\$86,482 70

95a. POST GRADUATE COURSES

Honoraria to Instructors:

G. C. Cameron.....	\$21 00	
A. F. Fenton.....	12 00	
A. W. Lindsay.....	12 00	
S. M. Richardson.....	38 00	
C. H. M. Williams.....	53 00	
R. G. Ellis.....	12 00	
J. H. Johnson.....	34 00	
E. W. Paul.....	77 00	
Fulton Risdon, \$21; expenses, \$5.....	26 00	
		\$285 00

96. LABORATORY AND INFIRMARY SUPPLIES, ETC.

Agfa Anso Ltd., film and paper.....	\$12 12	
Aikenhead Hardware Ltd., hardware.....	36 77	
Art Metropole, slide boxes, paper, etc.....	84 27	
Ash Temple Co., dental supplies.....	1,581 44	
Bio-Chemistry Dept, laboratory supplies.....	11 91	
Burke Electric & X-Ray Co., intensifying screens.....	20 91	
Canadian Fairbanks-Morse Co., cement, etc.....	22 32	
Canadian Harrison & Van Winkle Co., pumice.....	51 55	
Canadian Laboratory Supplies, scales, etc.....	39 66	
Canadian Laundry Machinery Co., new parts.....	65 00	
Canadian Tumbler Co., tumblers.....	23 25	
L. D. Caulk Co., dental compound, etc.....	234 25	
Central Scientific Co., glassware, paper, etc.....	102 24	
Chemistry Dept., laboratory and sundry supplies.....	213 04	
Columbia Dental & X-Ray Corporation, dental supplies.....	126 05	
Consolidated Plate Glass Co., plates.....	18 81	
Cook Laboratories of Canada, ampules.....	19 63	
Corbett-Cowley Ltd., laboratory coats.....	253 50	
Crescent Dental Mfg. Co., test tubes.....	12 31	
Dental Co. of Canada, dental supplies.....	2,660 68	
Dental Equipment Service, ceramics furnace.....	45 00	
Dominion Dental Co., compound, etc.....	983 47	
Eastman Kodak Stores, films, chemicals, etc.....	581 93	
T. Eaton Co., utensils, groceries, etc.....	114 71	
Florentine Co., plaster models.....	38 30	
E. W. Goulding, sheep.....	21 00	
Gregg Publishing Co., text book.....	28 35	
Ed. Green Dental Specialties, dental supplies.....	86 47	
J. F. Hartz Co., alcohol, needles and thermometers.....	92 72	
Hotel & Hospital Supply Co., towels.....	40 99	
Ingram & Bell, dressing drums for sterilizer, etc.....	133 70	
Interlake Tissue Mills Co., paper napkins.....	79 35	
Lavoris Chemical Co., lavoris.....	33 60	
Dr. F. M. Lott, photographic enlarger.....	47 05	
S. McCord & Co., plaster paris.....	107 73	
W. D. McNeill, refinishing cabinet.....	225 00	
Medico Co., forceps, file, etc.....	29 22	
Merck Co., chloroform, etc.....	22 04	
National Drug & Chemical Co., chemicals.....	425 40	
National Refining Co., dental engines, \$2,045.76; dental supplies, gold, etc., \$3,264.61.....	5,310 37	
Office Specialty Mfg. Co., file and library shelving.....	246 50	
Paquin Camera Exchange, tripod.....	20 00	

Photographic Service, prints and slides.....	163 94
Physics Dept., laboratory supplies.....	35 40
E. C. Platt, Dunlop machine, oxygen, etc.....	101 80
Precision Dental Mfg. Co., coordnatol.....	35 99
Robbins & Townsend, carbon paper and repairs to typewriter.....	14 20
Ella Skinner, uniforms and caps.....	397 95
H. W. Spence, microtome and cover, \$405; less allowance on old microtome, \$50.....	355 00
Wallace C. Sproule, lettering cards.....	38 00
Stevens Co., absorbent cotton, etc.....	10 93
Taylor Instrument Co., thermo-couple.....	14 64
Toronto Dental Dealers, dental supplies.....	102 54
University of Toronto Engineering Society, drawing paper and pencils..	33 15
Victor X-Ray Corporation, bulbs, etc.....	17 40
S. S. White Co., electric engines, \$1,686.78; dental supplies, \$1,375.34..	3,062 12
White X-Ray & Surgical Supply Co., dental mounts.....	59 87
T. W. Woolworth, rubber gloves.....	12 00
Wright Display Service, show cards.....	12 75
University Press, kits for nurses.....	197 20
Accounts under \$10 (20).....	98 91
Sundry disbursements by Secretary:	
Laundry, \$129; sundry supplies, \$62.39.....	191 39
Superintendent's Dept., freight, \$22.41; labour, \$1,664.37; material, \$1,024.05	2,710 83
	<hr/>
	\$21,968 62
Less credits: Laboratory deposits, \$1,416.30; wire sweepings, \$75.09; sale of microscope, \$5.....	1,496 39
	<hr/>
	\$20,472 23

97. GENERAL EXPENSES

Stationery, printing, Calendar, office supplies and incidentals (\$1,877.30) :			
C. P. R. Telegraphs.....		\$34 33	
Might Directories Ltd., city directory.....		21 20

X. FACULTY OF HOUSEHOLD SCIENCE

99. SALARIES

(a) Household Science:		
Miss A. L. Laird, Professor (with rooms, heat and light valued @ \$280) \$4,200 — \$123.....	\$4,077	00
Assistant Professors:		
Miss Alice C. Willard, \$3,450 — \$93.....	3,357	00
Miss E. W. Park, \$2,700 — \$66.....	2,634	00
Lecturers (Sessional):		
Miss K. E. Bennett, \$2,500 — \$60.....	2,440	00
Miss G. R. F. Rose (on leave of absence without salary).....		
Miss J. S. Roberts, \$2,100 — \$48.....	2,052	00
Miss M. R. McKellar, \$1,800 — \$40.....	1,760	00
Miss H. R. Coatsworth (part time) \$1,000 — \$20.....	980	00
Assistants (Sessional):		
Miss L. M. Davis, \$900 — \$18.....	882	00
Miss D. E. Mulholland.....	800	00
Miss G. H. Donald, Research Assistant (Sessional) \$1,000 — \$20...	980	00
	\$19,962	00
Charged to Massey Treble Bequest.....	2,935	00
		\$17,027 00
(b) Food Chemistry:		
Dr. C. C. Benson, Professor, also Secretary to Faculty (with rooms, heat and light valued @ \$280) \$4,200 — \$123.....	\$4,077	00
Miss J. R. Panton, Lecturer (Sessional) \$2,150 — \$49.50.....	2,100	50
Miss E. I. Walker, Instructor (Sessional) \$1,450 — \$31.25.....	1,418	75
Assistants (Sessional):		
Miss F. I. Honey (paid also \$75 as Clerical Assistant) \$950 — \$19	931	00
Miss E. J. Reed, \$950 — \$19.....	931	00
Miss D. Chapman.....	800	00
Miss M. G. Cox.....	250	00
Miss J. Blundell.....	200	00
	\$10,708	25
		\$27,735 25

100. HOUSEHOLD SCIENCE DEPARTMENT

Laboratory supplies, (\$1,252.30):	
Acme Farmers' Dairy, milk.....	\$193 38
Canadian Industries Ltd., chemicals.....	12 91
Canadian Laboratory Supplies, crucibles, chemicals and glassware..	142 61
H. G. Cook & Son, meat.....	112 66
T. Eaton Co., towels, utensils, etc.....	81 09

Lever Bros.....		14 95	
Alex. Provan, provisions.....		629 86	
F. Simpson & Sons, provisions.....		11 15	
Robt. Simpson Co., linen.....		10 23	
Accounts under \$10 (5).....		25 02	
Superintendent's Dept., labour, \$7.50; material, \$10.94.....		18 44	
Laboratory attendance (\$1,500):			
Mrs. C. Brown, 28 weeks.....		140 00	
Miss A. Conacher, 45 weeks.....		720 00	
Mrs. E. Stroud, 40 weeks.....		640 00	
Equipment and incidentals (\$125.59):			
Continental Rug Co., rugs.....		50 50	
Accounts under \$10 (6).....		34 58	
Superintendent's Dept., labour, \$31.40; material, \$9.11.....		40 51	
Books and special equipment (\$641.02):			
B'nnington Home Appliances, washer.....		100 00	
Consumers' Gas Co., refrigerator.....		243 34	
Rogers-Majestic Corporation, Norge refrigerator.....		168 50	
John Wiley & Sons, books.....		21 31	
Wistar Institute of Anatomy and Biology, subscriptions.....		16 85	
University Press, printing and stationery.....		69 86	
Accounts under \$10 (9).....		21 16	
			\$3,518 91
Less credits: Laboratory deposits.....	\$159 35		
charged to School of Nursing.....	200 00		
charged to Massey Treble Bequest.....	641 02		
			1,000 37
			\$2,518 54

101. FOOD CHEMISTRY DEPARTMENT

Maintenance (\$872.33):			
Bellingham & Stanley, polarimeter repaired.....		\$12 69	
Canadian Industries Ltd., acid.....		16 53	
Canadian Laboratory Supplies, chemicals and glassware.....		161 30	
Walter A. Carveth & Co., microscope and lamp.....		121 00	
Central Scientific Co., crucibles and glassware.....		102 26	
Warren E. Collins, Inc., lime, soda, valves, etc.....		13 91	
T. Eaton Co., towels, utensils, etc.....		46 31	
Merck & Co., chloroform.....		14 51	
Ontario Rubber Co., tubing.....		12 84

L. F. Stephens.....	19 65	
		\$2,110 72
133. RECEPTIONS TO SOCIETIES AND UNIVERSITY VISITORS		
Expenses re sundry public lectures:		
Prof. F. Baldenspeiger.....	\$50 00	
Dr. E. H. Fellows.....	75 00	
Richard Finnie.....	30 00	
Prof. R. H. Fowler.....	20 00	
Prof. K. Kuratowski.....	25 00	
Dean C. H. Mitchell.....	42 50	
Major F. J. Ney for Miss M. Gullan.....	50 00	
Prof. H. Ries.....	33 57	
Dr. Ludwig Silberstein.....	100 00	
Prof. C. R. Young.....	32 50	
Sir Alfred E. Zimmern.....	50 00	
Meeting of Association of American Medical Colleges.....	295 21	
Entertainment of American Astronomical Association.....	48 40	
Catering on sundry occasions:		
Hart House: President's luncheons and dinners, \$318.01; sundry guests, \$10.40; lantern service, \$5.44.....	333 85	
York Club, luncheon to the Governor-General.....	176 35	
University College Women's Union: Dinner for Students' Administrative Council, \$29; tea for Prof. F. Baldenspeiger, \$15.90.....	44 00	
Geo. Coles Ltd., reception for Ontario Educational Association.....	125 00	
Robt. Simpson Co., reception for Graduates in Social Science.....	30 00	
		\$1,562 28
134. CONVOCATION EXPENSES		
Hoods, gowns, printing programmes, invitations, etc.:		
Harcourt & Sons, hoods and gowns.....	\$232 00	
University Press, printing and stationery.....	278 81	
Mrs. A. Yates, caretaker's overtime services.....	2 50	
		\$513 31
135. AID TO PUBLICATIONS AND SOCIETIES		
Alumni Federation, University of Toronto Monthly.....	\$1,500 00	
Royal Astronomical Society.....	150 00	
Royal Society of Canada.....	400 00	
Universities Bureau of the British Empire.....	298 86	
British School of Archaeology, Jerusalem.....	100 00	
American School of Oriental Research, Jerusalem.....	100 00	
American School of Oriental Research, Bagdad.....	100 00	
Association of American Universities.....	50 00	
Society for Promotion of Engineering Education.....	15 38	
Students' Administrative Council (re student lodgings).....	100 00	
		\$2,814 24
136. BURSARIES		
Awards to sundry students:		
Faculty of Arts.....	\$8,220 00	
Faculty of Medicine.....	2,525 00	
School of Graduate Studies.....	85 00	
	\$10,830 00	
Less portion charged to Medical Society donation.....	1,100 00	
		\$9,730 00
137. CONTINGENCIES		
Library Building Addition, Mathers & Haldenby, preparation of sketches for future addition.....		
	\$1,000 00	
Central Power Plant Addition, report by Angus & Watson on enlargement	500 00	
Canadian Bank of Commerce, charge re registration of securities.....	15 00	
Chartered Trust & Executor Co., commission on collection of postponed fees of students.....	69 54

University Press, address to His Majesty King Edward VIII.....	56 18	
Accounts under \$10 (4).....	22 36	
Workmen's Compensation:		
Workmen's Compensation Board, to cover allowances paid to employees	699 84	
Medical services for injured employees, etc.:		
Toronto General Hospital.....	87 75	
Dr. Roy H. Thomas.....	117 70	
Sundry doctors (5).....	47 00	
		<u>\$2,884 21</u>
		<u><u>\$89,257 11</u></u>

XXI. 138. CAPITAL ACCOUNT CHARGES

Accountant, Supreme Court of Ontario, twenty-seventh annual payment on debenture issue of 1909.....	\$25,260 00	
Less portion charged to Ontario College of Education	10,000 00	
		\$15,260 00
Accountant, Supreme Court of Ontario, twenty-first annual payment on debenture issue of 1915 re Hart House.....	5,975 00	
Accountant, Supreme Court of Ontario, twelfth annual payment on debenture issue of 1924 re Forestry Building.....	10,000 00	
Toronto General Hospital, twenty-fifth annual payment on debenture issue of 1911 re grant to Toronto General Hospital.....	15,157 00	
Toronto General Hospital, twenty-fifth annual payment on debenture issue of 1911 re old Pathological Building.....	6,568 00	
University of Toronto (Rockefeller Endowment—Medicine) seventh annual payment on debenture issue of 1929 re Banting Institute.....	64,193 00	
Royal College of Dental Surgeons, interest on liability of \$50,000.....	2,500 00	
		<u>\$119,653 00</u>

XXII. SPECIAL RESEARCH

139. DEPARTMENTAL APPROPRIATIONS

(a) Arts:		
Biology:		
Research Assistants:		
Miss H. M. Stevens, 8 mos.....	\$600 00	
L. Butler, 11 mos.....	570 00	
W. H. Johnson, 8 mos.....	450 00	
Mrs. E. Kuitunen, 8 mos.....	400 00	
D. A. MacLulich, 8 mos.....	400 00	
Wen-chun Ho, 8 mos.....	300 00	
A. Wilkes, 8 mos.....	300 00	
A. N. Langford, 1 month (paid also \$525 in Dept. of Botany and \$170 in Special Research, Botany)	40 00	
Assistant in Vivarium, D'Arcy LeRay, 12 mos. @ \$520, of which \$250 charged to department.....	270 00	
Expenses (\$475.36):		
W. L. Behan, meals and board at Algonquin Park for workers	19 90	
Crabtree-Miller Ltd., line cuts.....	11 94	
E. C. Cross, travelling expenses, \$18; gas regulator, \$21.40	39 40	
Mrs. E. Kuitunen, travelling expenses.....	38 19	
W. R. McKee, repairs to apparatus.....	10 20	
D. A. MacLulich, travelling expenses.....	75 00	
Maple Leaf Milling Co., flour and feed.....	18 87	
Ontario Agricultural Collegc, eggs.....	17 20	
Richards Glass Co., tubes.....	11 50	
Ward's Natural Science Establishment, insect nets.....	11 13	
University Press, printing and stationery.....	19 84	
Accounts under \$10 (19).....	102 35	
Sundry disbursements by department:		
Food supplies, \$34.18; seeds, \$12.34; sundries, \$13.48..	60 00	
Superintendent's Dept., labour, \$29.02; material, \$10.82..	39 84	
		<u>\$3,805 36</u>

Fisheries Research:

Research Assistants:	
R. R. Langford, 12 mos., \$900 — \$18.00.....	\$882 00
F. E. J. Fry, 3 mos., \$225 — \$4.50 (paid also \$881.40 in department)	220 50
W. A. Kennedy, 1 month.....	80 00
K. H. Doan, 1 month (paid also \$40 in department).....	60 00
Expenses (\$2,699.36):	
W. J. K. Harkness, disbursements:	
Provisions, \$323.39; payments to help. \$95.50; lumber supplies, \$158.86; travelling and hotel expenses, \$397.34; boat service, \$139.81; baggage transfer, \$8.20; freight and express, \$209.59; hardware, \$72.84; sundries, \$80.80.....	1,486 33
J. T. Arnold, car trailer.....	30 00
Canada Veiling Co., net.....	18 75
Mrs. M. Coleman, rental of cottage and equipment, Algonquin Park.....	100 00
Wm. & J. T. Greay Ltd., boling cloth and wire mesh.....	39 20
Holliday Flint Glass Works, vials and corks.....	20 00
Imperial Oil Ltd., drums.....	18 65
Ingram & Bell, chemicals, etc.....	24 50
Jack Leckie Ltd., tents, nets, rope, etc.....	311 19
National Motors Ltd., used truck.....	280 00
W. E. Ricker, honorarium for preparation and delivery of Manual Statistical Procedure, Aquatic Biology.....	100 00
Robt. Simpson Co., outboard motor.....	73 80
Watercraft Equipment Co., repairs to motor.....	43 39
University Press, printing and stationery.....	71 96
Accounts under \$10 (6).....	37 31
Superintendent's Dept., freight, \$18.97; labour, \$6.07; material, \$19.24	44 28

\$7,747 22

Botany:

Honorary Research Associate, John Dearness (without salary)
Research Associate, L. C. Coleman, 12 mos., \$1,000 — \$20.....	\$980 00
Research Assistants:	
A. J. V. Lehmann, 4 mos., \$290 — \$1.60.....	288 40
L. O. Weaver, 4 mos.....	230 00
J. W. Groves, 3½ mos.....	205 00
D. H. Hamly, 3 mos., \$200 — \$1.50.....	198 50
W. K. W. Baldwin, 3 mos.....	170 00
Miss R. P. Biggs, 3 mos.....	170 00
R. C. H. Cormack, 3 mos.....	170 00
A. N. Langford, 3 mos.....	170 00
D. C. McPherson, 3 mos.....	170 00
M. W. Bannan, 2 mos.....	120 00
Miss A. B. Brodie, 2 mos.....	110 00
Miss D. F. Forward, 2 mos.....	110 00
F. E. Tomalin, 11 mos.....	370 00
N. W. Radforth, 3 mos., 30 hours (paid also \$80 in Biology and \$50 for Extension Work).....	150 00
R. E. Fitzpatrick, 2 mos.....	120 00
Miss L. M. Hunter, 180 hours @ 50c.....	90 00
K. M. Mayall, 100 hours @ 50c.....	50 00
Miss S. Taylor, 1 month (paid also \$35 in Biology).....	30 00
C. N. Haldenby, 1 month.....	25 00
Expenses (\$513.21):	
W. E. Booth Co., films and plates.....	24 99
Cambridge University Press, reprints.....	22 72
Canadian Liquid Air Co., rental of cylinders and gas.....	27 83
Central Scientific Co., balance and counting apparatus.....	54 97
R. H. Chappell, glassblowing.....	15 80
Eastman Kodak Stores, chemicals, films, slides and paper..	49 45
Gevaert Co. of America, lantern plates.....	10 78
C. S. Hanes, apparatus.....	97 28
Lancaster Press, reprints.....	33 50
May Oil Burner Ltd., furnace parts.....	19 61
"Mycologia," reprints.....	10 08
Prof. R. B. Thomson, sundry travelling expenses, members of staff.....	25 30

Wickersham Printing Co., reprints.....	10	49	
Accounts under \$10 (13).....	49	82	
Superintendent's Dept., labour, \$44.93; material. \$15.66...	60	59	
			\$4,440 11
Less credit for gas tax.....		17	04
			\$4,423 07
(b) Medicine:			
Bio-Chemistry:			
Research Assistants (each 2 months):			
B. F. Crocker (paid also \$1,271.50 in department) \$200—\$4	\$196	00	
V. Ignatieff (paid also \$1,027.75 in department) \$200—\$4	196	00	
S. Cohen (paid also \$450 in department).....	100	00	
L. Farber. \$100—\$2.....	98	00	
			\$590 00
Experimental Medical Research:			
Chief Technical Assistant. W. Cowan, 12 mos. (paid also bonus of \$50 from each of Medical Research, Banting, and Dept. of Surgery) \$1,700—\$37.50.....	\$1,662	50	
Head of Animal Quarters, J. Minshull, 12 mos.....	600	00	
Assistants, Animal Quarters, each 12 mos.:			
G. Parkes.....	720	00	
A. W. Booth.....	660	00	
Cyril Lee.....	660	00	
Expenses (2,045.91):			
Allen Mfg. Co., laundry.....	103	67	
Jos. Cooper Ltd. meat.....	90	22	
Corbett-Cowley Ltd., laboratory uniforms.....	21	13	
E. Cullen, animals.....	469	80	
Guaranteed Exterminating Co.....	40	00	
Ingram & Bell, chemicals, syringes, etc.....	297	90	
Kelley Feed & Seed Co., feed.....	71	38	
Langley, Harris Co., dog biscuits.....	110	00	
John McGillian, carrots.....	55	80	
Mallinckrodt Chemical Works, ether.....	23	76	
Maple Leaf Milling Co., feed.....	132	76	
Ralston, Purina Co., feed.....	394	06	
E. H. Stanners, sawdust.....	11	25	
Accounts under \$10 (4).....	19	95	
Superintendent's Dept., labour, \$15.60; material, \$188.63...	204	23	
			\$6,348 41
Less credit from sale of animals and feed.....		499	80
			\$5,848 61
Charged to Dunlap Bequest.....	\$5,370	90	
Charged to Reeve Bequest.....	477	71	
			\$5,848 61
(c) Applied Science:			
Chemical Engineering:			
Research Assistants, each 3 mos. (paid also in department):			
G. T. Eaton.....	\$450	00	
W. H. Rapson.....	450	00	
W. H. Bowman.....	350	00	
G. V. Jansen.....	350	00	
Engineering Physics:			
Machinist, C. T. Harding, 9.28 weeks @ \$30 (see also department).....	278	50	
Expenses (\$206.02):			
Bausch & Lomb Optical Co., glass parts.....	92	00	
Henry Disston & Son.....	10	92	
Accounts under \$10 (5).....	19	66	
Superintendent's Dept., labour, \$57.54; material. \$25.90....	83	44	
Mechanical Engineering:			
Expenses (\$82.93):			
University Press, book.....	7	25	
Superintendent's Dept., material.....	75	68	
Mining Engineering:			
Research Assistants @ \$125 per month:			
W. D. Brittain, 4 mos., 22 days.....	591	66	
A. S. Drummond, 2 mos., 8 days.....	283	34	

Expenses (\$225):

Aikenhead Hardware Ltd., hardware.....	11 04
United Steel Corporation, chain and bore.....	31 00
Accounts under \$10 (5).....	17 59
Superintendent's Dept., labour, \$130.96; material, \$34.41..	165 37
	<hr/>
	\$3,267 45
Charged to Wallberg Bequest.....	3,267 45

(d) Dentistry:

Professor of Periodontology, H. K. Box, 12 mos., \$3,000 — \$75.....	\$2,925 00
Laboratory Technician, A. F. Fenton, 12 mos. (paid also \$12 for Post Graduate Courses) \$1,000 — \$20.....	980 00

 \$3,905 00

140. BANTING AND BEST RESEARCH

(a) Banting Research:

Professor of Research in Medicine, Sir Frederick Banting, 12 mos...	\$5,000 00
Associate Professor, D. A. Irwin, 12 mos., \$3,600 — \$99.....	3,501 00
Assistant Professors, each 12 mos.:	
W. R. Franks, \$3,400 — \$91.....	3,309 00
C. C. Lucas, \$3,000 — \$75.....	2,925 00

Research Associates:

G. E. Hall, 12 mos., \$2,500 — \$60.....	2,440 00
J. T. Fallon, 12 mos., \$2,160 — \$49.80.....	2,110 20
Miss S. Gairns, 12 mos., \$2,160 — \$49.80.....	2,110 20
G. Ettinger, 3 mos. @ \$4,500 per annum, \$1,125 — \$33.75.....	1,091 25

Research Assistants:

Miss J. M. Lang, 12 mos., \$1,400 — \$30.....	1,370 00
B. C. Coles, 12 mos., \$1,200 — \$25.....	1,175 00
Miss M. M. Shaw, 12 mos., \$1,200 — \$25.....	1,175 00
Miss M. E. Dolan, 12 mos., \$1,080 — \$22.....	1,058 00
Miss A. J. Watt, 10½ mos., \$787.50 — \$15.75.....	771 75
G. W. Manning, 9 mos.....	675 00
Miss H. Williams, 8½ mos.....	637 50
H. H. Bindon, 8 mos.....	500 00
J. E. Goodwin, 4½ mos.....	337 50
F. L. Lawson, 4 mos.....	300 00
K. Greer, 3 mos.....	150 00
G. Watts, 3 mos.....	150 00
B. Schachter, 2½ mos.....	125 00
H. Davidson, 1 month.....	75 00
B. Seaton, 1 month.....	75 00
P. T. Greenberg, 1 month.....	50 00

Research Fellows:

E. L. Outhouse, 12 mos., \$1,800 — \$40.....	1,760 00
H. J. Creech, 10 mos., \$900 — \$18.....	882 00
A. Duncan, 10 mos.....	750 00
F. H. Lawford, 10 mos.....	750 00
L. B. McPherson, 10 mos.....	750 00
Keith Watson, 10 mos.....	750 00
Lorne D. Proctor, 4 mos. (paid also \$250 in Pathological Chemistry) \$400 — \$6.25.....	393 75
J. J. Rae, 3 mos.....	300 00

Technicians, each 12 mos.:

L. C. Brock, \$1,320 — \$28 (bonus for extra work \$50).....	1,342 00
H. Douglas, \$1,200 — \$25.....	1,175 00
J. Conley, \$1,080 — \$22.....	1,058 00
T. Walker, \$1,080 — \$22.....	1,058 00
Miss G. Mulholland.....	660 00
Miss N. Davy.....	600 00

Secretarial Assistant, Miss M. J. Millar, 12 mos., \$1,080 — \$22.....	1,058 00
Cleaner, Mrs. Allison Moffitt, 12 mos. (part time).....	600 00

 \$44,998 15

Expenses (\$10,867.41):

Acton Tool & Stamping Co., chassis and cover.....	15 60
Aikenhead Hardware Ltd., hardware.....	203 22
Allen Mfg. Co., laundry.....	248 56
American Journal of Cancer, subscription.....	10 53
Art Metropole, microscope and refractometer.....	356 14
F. Broom, meat, etc.....	45 40

Burke Electric & X-Ray Co., tubes.....	395 00
Cambridge Instrument Co., filter, etc.....	47 28
Canadian General Electric Co., vacuum tube.....	16 55
Canadian Industries Ltd., chemicals.....	11 16
Canadian Kodak Co., chemicals.....	54 34
Canadian Medical Association, reprints.....	41 04
Canadian Westinghouse Co., battery charger.....	16 95
Carswell Co., books.....	30 10
Walter A. Carveth & Co., instruments, etc.....	808 43
Central Scientific Co., chemicals, glassware, etc.....	981 73
Corbett-Cowley Ltd., laboratory coats.....	97 26
W. Cowan, Technical Assistant, Medical Research, bonus for extra services.....	50 00
E. Cullen, animals.....	901 85
Eastman Kodak Co., photographic supplies.....	58 02
T. Eaton Co., grinder, motor and pulleys, etc.....	108 10
Gevaert Co. of America, plates.....	23 24
Giles, Rice & Peters, refrigerator service.....	31 75

Screen & Sound Service Ltd., parts for colorimeter.....	21 75
Stark & Tube, amperites.....	10 00
Toronto General Hospital, mechanical mill.....	10 00
University College, London, glass apparatus.....	33 28
University Laboratory of Physiology, special camera with timing device.....	224 39
University Press, Cambridge, reprints.....	11 35
Weston Electrical Instrument Corporation, analyzer.....	39 23
Wholesale Radio Co., radio parts.....	81 59
University Press, books, stationery, etc.....	120 08
Accounts under \$10 (31).....	155 90
Travelling expenses:	
Sir Frederick Banting.....	939 92
W. R. Franks.....	533 04
G. E. Hall.....	533 04
C. C. Lucas.....	100 70
D. A. Irwin.....	89 64
J. T. Fallon.....	63 30
Sundry disbursements by department:	
Postage, \$56.95; food supplies, \$23.74; sundries, \$85.43....	166 12
Superintendent's Dept., freight, \$119.78; labour, \$108.40; material, \$383.50.....	611 68
Contribution to Pension Funds.....	637 92
Alterations to Banting Institute (\$8,089.60):	
Harkness & Hertzberg, building inspection.....	10 00
Superintendent's Dept., labour, \$4,490.10; material, \$3,589.50..	8,079 60
	\$63,955 16
Credited from Banting Research Foundation.....	\$15,000 00
Medical Research, Best.....	2,500 00
Silicosis Committee.....	50 00
Sale of old cages.....	100 00
Charged to Insulin Committee Grants.....	38,805 16
	56,455 16
	\$7,500 00

(b) Best Research:

Research Associate, C. H. Best, 12 mos. (see also Department of Physiology)	\$2,500 00
Physiology:	
Research Associate, D. Y. Solandt, 12 mos. (on leave of absence) \$1,700 — \$37.50	1,662 50
Research Assistants:	
H. E. Woodward, 12 mos., \$1,800 — \$40	1,760 00
Dr. E. Rhoda Grant, 12 mos., \$1,500 — \$32.50	1,467 50
J. M. Hershey, 9 mos., \$1,000 — \$20	980 00
J. F. Sykes, 12 mos., \$1,000 — \$20	980 00
Miss J. P. Griffiths, 12 mos., \$850 — \$17	833 00
Mrs. M. S. Welch, 5 mos., 7 days	545 67
O. M. Solandt	440 00
M. J. Wilson (paid also \$400 in Anatomy)	400 00
R. A. Mustard	360 00
Miss J. F. Manery	330 00
Fellow, C. A. Armstrong (paid also \$175 in Anatomy)	250 00
Head of Technical Staff, F. L. Robinson, 12 mos. (share of salary charged to Research — see also Dept. of Physiology) \$500 — \$10	490 00
Technical Assistants:	
Miss G. I. Harpell, 12 mos., \$950 — \$19	931 00
L. V. Hodgins, 12 mos., \$880 — \$17.60	862 40
G. Scattergood, 12 mos.	800 00
T. Beaton, 12 mos.	780 00
Miss M. L. Palmer, 12 mos.	700 00
Mrs. J. M. D. Williamson, 10 mos.	600 00
Assistant Animal Caretaker, W. Dobbie, 12 mos., \$1,000 — \$20	980 00
Secretarial Assistants:	
Miss E. F. Dudley Martin, 7 1/3 mos. (paid also \$200 in Physiological Hygiene — see below; and \$225 in Medical Faculty General Expenses) \$738.70 — \$18.75	719 95
Miss D. Waugh, 1 month (paid also \$50 in Medical Faculty General Expenses)	100 00
Physiological Hygiene:	
Assistant Professor, E. W. McHenry, 12 mos. (share of salary charged to Research — see also School of Hygiene) \$600 — \$12	588 00
Research Associates, each 12 mos.:	
Mrs. Ruth C. Partridge (share of salary charged to Research — see also School of Hygiene) \$1,200 — \$25	1,175 00
Miss J. H. Ridout (paid also in Connaught Laboratories) \$1,100 — \$22.50	1,077 50
Research Assistant, J. Campbell	300 00
Technical Assistants:	
C. R. Cowan, 12 mos. (share of salary charged to Research — see also School of Hygiene) \$400 — \$8	392 00
J. G. Truax, 12 mos. less 4 days	790 00
Miss M. Luxton, 12 mos.	725 00
Miss L. C. Barber, 12 mos.	700 00
Miss M. E. Hocking, 12 mos.	650 00
Miss A. Jaffray, 12 mos.	650 00
Temporary Secretarial Assistant, Miss E. F. Dudley Martin, 2 mos. (see also above)	200 00

 \$26,719 52

Expenses (\$9,713.82):

Aikenhead Hardware Ltd., hardware	\$96 03
Automatic Coil Winder & Electrical Equipment Mfg. Co., meter	52 55
