GARDENIA PLANT FOOD

THE HOME OF THE BELMONT GARDENIA

BELGARD Gardenia Plant Food

After years of experimenting, we have perfected and offer for sale our **BELGARD** fertilizer which has proven to be the most superior plant food for growing gardenias. This preparation keeps the soil in a slightly acid condition without injurious buffers such as Sulphur, Iron and Aluminum Sulphate, etc.

This fertilizer is recommended for use after plants have become established. The reaction on the plants is very beneficial and increases bud development when **BELGARD** is used regularly every 5 or 6 weeks throughout the growing season. This fertilizer is also recommended for all plants requiring slightly acid soil such as Rhododendrons, Azaleas, Hydrangeas, etc. The guaranteed analysis shows ingredients as follows: Nitrogen 6%; Phosphoric Acid 15%; Potash 4%.

The use of this fertilizer results in active growth. This plant food contains different elements that gardenias require and it tends to keep plants healthy and of dark green color. Dissolving in the water used for one good watering is recommended when feeding gardenias in pots. Surface feeding can be done by broadcasting before watering.

DIRECTIONS FOR USE

For potted plants use 1 teaspoonful for each plant once every four weeks. This applies to standard pots measuring 5-inch to 6-inch size. On larger pots a heaping teaspoonful can be used with safety. On smaller pots use accordingly. For surface feeding when plants are grown in a greenhouse bed or bench, use at rate of $\frac{1}{4}$ lb. to 10 square feet every five or six weeks.
