GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS

IPO 500
13 August 1946

Information of General Application, pertaining to Directive Number (SCAFIN-1133) file AG 387.6 (13 Aug 46) ESS/IN dtd 13 Aug 46, subject: "Reparations Selections within the Machine Tool Industry."

1. With reference to memorandum Number (SCAFIN-1133), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.
2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army is to insure availability for interim reparations removals of listed facilities in the best possible condition.
3. The items within listed factories and installations which may be considered suitable for reparations are such things as machine tools, production machinery, heat treating equipment, furnaces, cranes and conveyors, precision testing and research equipment and power equipment. Expendable parts such as special dies, jigs and fixtures, bolts, nuts and small parts, etc., if available and when practicable should remain with the factory. No definite classification can be made but the use of good judgement in preserving for reparations removal those items suitable for the purpose and in allowing the Japanese to use that portion of the remainder which will contribute to needed civilian production is the end in view.
4. It is not contemplated that buildings which are part of factories taken under custody and control will be used for reparations or destroyed except in special cases. Such cases may be those where part of the building frame forms a track for overhead cranes and the steel building skeleton can be easily dismantled for resetting. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations materials it may be released to them.
5. This directive stops all manufacture of new machine tools in listed plants, though permitting completion of units for which major component parts already are manufactured.
6. The primary reason for allowing continued production in any of the listed factories is to meet the needs of the occupation forces and essential civilian economy. Insofar as possible all production in these factories should be arranged so that shutdown, when necessary for reparations removal, will have the minimum disruptive effect on the overall civilian economy.
7. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each factory who are familiar with its equipment and requirements for maintenance.

BASIC: Information of General application pertaining to Directive Number (SCAFIN -1133) , file AG 387.6 (13 Aug 46) ESS/IN.

8. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing, with necessary materials to be furnished by the Japanese Government, when not available.

9. It is expected that a system will be established for spot-checking each installation periodically. When corrective action can be accomplished locally by conference it should be done. In cases of wilful violation or neglect, immediate report should be made through military channels.

10. A letter of command instructions pertaining to the execution of the subject memorandum follows through command channels.

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT.

THROUGH : Central Liaison Office, Tokyo.

SUBJECT : Reparations Selections Within Privately-
Owned Munitions Plants.

1. The Imperial Japanese Government is notified that all munitions plants on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates plants subject to removal under the interim reparations program. Pending further instructions they may continue operations if they are producing items necessary to the civilian economy, in accordance with instructions from the Commanding General, Eighth United States Army. In all cases, whether or not operations continue in listed plants, you will take such measures as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. You will make available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army, to receive detailed instructions to accomplish the purpose of this memorandum.

5. Provisions of this memorandum shall not be construed to preclude immediate shut down and removal of specific plants that may be designated by subsequent memoranda.

FOR THE SUPREME COMMANDER:

JOHN B. COOLEY,
Colonel, AGD,
Adjutant General.1 Incl

Information of General Application pertaining to Directive Number (SCAPIN-1134) file AG 387.6 (13 Aug 46) ESS/IN dated 13 August 1946 Subject: "Reparations Selections of privately owned Munitions Plants."

1. With reference to Memorandum Number (SCAPIN-1134), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army, is to insure availability for interim reparations removals of listed facilities in the best possible condition.

3. The same standards will be adhered to in preserving these facilities as in other plants heretofore listed for reparations.

4. All machinery, equipment, and accessories, which by virtue of initial design, construction, or major structural change, are, as individual items, special purpose in nature and functionally limited to use in connection with the manufacture of equipment or supplies for war or warlike purposes, will be held at locations you specify, pending further instructions concerning their disposition.

5. The closing down of listed factories is not required by this directive. Insofar as possible all production in these factories should be arranged so that shut-down, when necessary for reparations removal, will have the minimum disruptive effect on the overall civilian economy.

6. It is contemplated that the Japanese will furnish personnel and material required by you; that they will use, for custodial personnel, individuals previously employed in each factory who are familiar with its layout and requirement for maintenance.

7. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing with necessary materials to be furnished by the Japanese Government when not available at any plants.

8. It is expected that a system will be established for spotchecking each installation periodically. When corrective action can be accomplished locally by explanation it should be done. In cases of wilful violation or neglect immediate report should be made through military channels for corrective action.

9. A letter of command instructions pertaining to the execution of the subject memorandum follows through command channels.

Distribution same as SCAPIN 1134

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERSAG 387.6 (13 Aug 46) ESS/IN
(SCAPIN - 1135)APO 500
13 August 1946

MEMORANDUM FOR: IMPERIAL JAPANESE GOVERNMENT.

THROUGH : Central Liaison Office, Tokyo.

SUBJECT : Reparations Selections Within the Shipbuilding Industry.

1. The Imperial Japanese Government is notified that all privately-owned shipyards and Japanese naval shipyards on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates the shipyards subject to removal under the interim reparations program and is not to be construed as complete or final. The present program for construction and repair of vessels in listed shipyards will be continued in accordance with existing instructions. In all cases, whether or not operations are permitted to continue in the listed shipyards, such measures will be taken as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. There will be made available to the Commanding General, Eighth United States Army, and the Commander Naval Activities, Japan, all personnel, equipment and supplies deemed necessary by them for the establishment of proper custody, control and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives detailed to the Commanding General, Eighth United States Army, and the Commander Naval Activities, Japan, to receive detailed instructions to accomplish the purpose of this memorandum.

5. The Commander Naval Activities, Japan, will have custody of the Yokosuka Naval Yard, Kanagawa Prefecture. All other shipyards will be under the custody of the Commanding General, Eighth United States Army.

6. Provisions of this memorandum shall not be construed to preclude immediate shut-down and removal of specific plants that may be designated by subsequent memoranda.

FOR THE SUPREME COMMANDER:

1 Incl:
List of Shipyards

for 
JOHN B. COOLEY,
Colonel, AGD,
Adjutant General.

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERSAPO 500
13 August 1946

Information of General Application pertaining to Directive Number (SCAPIW - 1135), file AG 387.6 (13 Aug 46) ESS/IN dated 13 August 1946, subject: "Reparations Selections within the Shipbuilding Industry."

1. With reference to memorandum number (SCAPIW 1135), for the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for all concerned.
2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army, and Commander Naval Activities, Japan, is to insure availability of facilities in listed Shipyards in best possible condition for interim reparations removals.
3. The facilities within listed plants which may be considered suitable for reparations are all major units and auxiliary equipment except those units composed principally of masonry and which are not sufficiently enclosed in metal framework as to prevent loosening of the masonry during transportation to another site. This problem will arise in the transportation of brass and iron foundries within the shipyard.
4. It is not contemplated that buildings which are part of Shipyards taken under custody and control will be used for reparations or destroyed, except in special cases. Such cases may be those in which part of the building frame forms an overhead craneway and the steel building skeleton can be easily dismantled for resetting. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations equipment it may be released to them.
5. The primary reason for allowing continued production in any of the listed Shipyards is to meet the needs of the Occupation Forces and Civilian Economy. Insofar as possible all production and repair work in these shipyards should be arranged so as to reduce inventories of steel plates, raw materials, and other Shipbuilding materials to practicable working minimums so that shutdowns, when necessary for reparations removal will have the minimum disruptive effect on the overall civilian economy.
6. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each Shipyard who are familiar with its equipment and requirements for maintenance.
7. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance of equipment is to include sufficient oiling and greasing with necessary materials to be furnished by the Japanese Government when not available at the Shipyards.

MEMORANDUM FOR: IMPERIAL JAPANESE GOVERNMENT.

THROUGH : Central Liaison Office, Tokyo.

SUBJECT : Reparations Selections Within the Shipbuilding Industry.

1. The Imperial Japanese Government is notified that all privately owned shipyards and Japanese naval shipyards on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates the shipyards subject to removal under the interim reparations program and is not to be construed as complete or final. The present program for construction and repair of vessels in listed shipyards will be continued in accordance with existing instructions. In all cases, whether or not operations are permitted to continue in the listed shipyards, such measures will be taken as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. There will be made available to the Commanding General, Eighth United States Army, and the Commander Naval Activities, Japan, all personnel, equipment and supplies deemed necessary by them for the establishment of proper custody, control and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives detailed to the Commanding General, Eighth United States Army, and the Commander Naval Activities, Japan, to receive detailed instructions to accomplish the purpose of this memorandum.

5. The Commander Naval Activities, Japan, will have custody of the Yokosuka Naval Yard, Kanagawa Prefecture. All other shipyards will be under the custody of the Commanding General, Eighth United States Army.

6. Provisions of this memorandum shall not be construed to preclude immediate shut-down and removal of specific plants that may be designated by subsequent memoranda.

Information of General application pertaining to Directive Number (SCAPIN 1136, file AG 387.6 (14 Aug 46) ESS/IN dtd 14 Aug 46 subject: "Reparations Selections within the Precision Bearing Industry."

1. With reference to memorandum Number (SCAPIN 1136), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.
2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army, is to insure availability for interim reparations removal of listed facilities in the best possible condition.
3. The facilities within listed plants which may be considered suitable for reparations are all major units and auxiliary equipment except those units composed principally of masonry and which are not sufficiently enclosed in metal framework as to prevent loosening of the masonry during transportation to another site.
4. It is not contemplated that buildings which are part of factories taken under custody and control will be used for reparations or destroyed except in special cases. Such cases may be those where part of the building frame forms a track for overhead cranes and the steel building skeleton can be easily dismantled. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations material it may be released to them.
5. The interim reparations program is designed to leave within Japan the capacity to manufacture 32.5 million yen worth of bearings based on 1943 and 1944 prices. Plants listed on SCAPIN 1136 while considered excess of 32.5 million yen capacity may be permitted to continue operations realizing that after 30 days they are subject to shut down and removal without advance notice.
6. It is contemplated that the Japanese will furnish personnel and material required by you; that they will use, for custodial personnel, individuals previously employed in each factory who are familiar with its layout and requirements for maintenance.
7. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing with necessary materials to be furnished by the Japanese Government when not available at the plants.
8. It is expected that a system will be established for spot-checking each installation periodically. When corrective action can be accomplished locally by explanation it should be done. In cases of wilful violation or neglect immediate report should be made through military channels.

Information of General Application pertaining to Directive Number (SCAPIN-1134) file AG 387.6 (13 Aug 46) ESS/IN dated 13 August 1946 Subject: "Reparations Selections of privately owned Munitions Plants."

1. With reference to Memorandum Number (SCAPIN-1134), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army, is to insure availability for interim reparations removals of listed facilities in the best possible condition.

3. The same standards will be adhered to in preserving these facilities as in other plants heretofore listed for reparations.

4. All machinery, equipment, and accessories, which by virtue of initial design, construction, or major structural change, are, as individual items, special purpose in nature and functionally limited to use in connection with the manufacture of equipment or supplies for war or warlike purposes, will be held at locations you specify, pending further instructions concerning their disposition.

5. The closing down of listed factories is not required by this directive. Insofar as possible all production in these factories should be arranged so that shut-down, when necessary for reparations removal, will have the minimum disruptive effect on the overall civilian economy.

6. It is contemplated that the Japanese will furnish personnel and material required by you; that they will use, for custodial personnel, individuals previously employed in each factory who are familiar with its layout and requirement for maintenance.

7. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing with necessary materials to be furnished by the Japanese Government when not available at any plants.

8. It is expected that a system will be established for spotchecking each installation periodically. When corrective action can be accomplished locally by explanation it should be done. In cases of wilful violation or neglect immediate report should be made through military channels for corrective action.

9. A letter of command instructions pertaining to the execution of the subject memorandum follows through command channels.

SUPREME COMMANDER FOR THE ALLIED POWERS

AG 387.6(13 Aug 46)ESS/IN
(SCAPIN- 1133)

APD 500
13 August 1946

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT.
THROUGH : Central Liaison Office, Tokyo.
SUBJECT : Reparations Selections within the Machine
Tool Industry.

1. The Imperial Japanese Government is notified that all machine tool manufacturing plants on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates plants subject to removal under the interim reparations program. These plants will be shut down, or will be permitted to continue operation to complete machine tools under current manufacture or in the production of consumer goods, in accordance with instructions from the Commanding General, Eighth United States Army. In all cases whether or not operations are permitted to continue in the listed plants, such measures will be taken as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. There will be made available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control, and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army, to receive detailed instructions to accomplish the purpose of this memorandum.

BASIC: Memo for Imp. Jap. Govt., AG 387.6(13 Aug 46)
(SCAPIN-1133), dtd 13 August 1946 sub: "Reparations
Selections within the Machine Tool Industry."

5. Provisions of this memorandum shall not be construed to preclude immediate shut-down and removal of specific plants that may be designated by subsequent memoranda.

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS

APO 500

13 August 1946

Information of General Application pertaining to Directive Number (SCAFIN- 1133) file AG 387.6 (13 Aug 46) ESS/IN dtd 13 Aug 46 , subject: "Reparations Selections within the Machine Tool Industry."

1. With reference to memorandum Number (SCAFIN-1133), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.
2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army is to insure availability for interim reparations removals of listed facilities in the best possible condition.
3. The items within listed factories and installations which may be considered suitable for reparations are such things as machine tools, production machinery, heat treating equipment, furnaces, cranes and conveyors, precision testing and research equipment and power equipment. Expendable parts such as special dies, jigs and fixtures, bolts, nuts and small parts, etc., if available and when practicable should remain with the factory. No definite classification can be made but the use of good judgement in preserving for reparations removal those items suitable for the purpose and in allowing the Japanese to use that portion of the remainder which will contribute to needed civilian production is the end in view.
4. It is not contemplated that buildings which are part of factories taken under custody and control will be used for reparations or destroyed except in special cases. Such cases may be those where part of the building frame forms a track for overhead cranes and the steel building skeleton can be easily dismantled for resetting. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations materials it may be released to them.
5. This directive stops all manufacture of new machine tools in listed plants, though permitting completion of units for which major component parts already are manufactured.
6. The primary reason for allowing continued production in any of the listed factories is to meet the needs of the occupation forces and essential civilian economy. Insofar as possible all production in these factories should be arranged so that shutdown, when necessary for reparations removal, will have the minimum disruptive effect on the overall civilian economy.
7. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each factory who are familiar with its equipment and requirements for maintenance.

BASIC: Information of General application pertaining to Directive Number (SCAFIN -1133) , file AG 387.6 (13 Aug 46) FSS/IN.

8. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing, with necessary materials to be furnished by the Japanese Government, when not available.

9. It is expected that a system will be established for spot-checking each installation periodically. When corrective action can be accomplished locally by conference it should be done. In cases of wilful violation or neglect, immediate report should be made through military channels.

10. A letter of command instructions pertaining to the execution of the subject memorandum follows through command channels.

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT.
THROUGH : Central Liaison Office, Tokyo.
SUBJECT : Reparations Selections within the Machine
Tool Industry.

1. The Imperial Japanese Government is notified that all machine tool manufacturing plants on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates plants subject to removal under the interim reparations program. These plants will be shut down, or will be permitted to continue operation to complete machine tools under current manufacture or in the production of consumer goods, in accordance with instructions from the Commanding General, Eighth United States Army. In all cases whether or not operations are permitted to continue in the listed plants, such measures will be taken as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. There will be made available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control, and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army, to receive detailed instructions to accomplish the purpose of this memorandum.

BASIC: Memo for Imp. Jap. Govt., AG 387.6(13 Aug 46)
(SCAPIN-1133), dtd 13 August 1946 sub: "Reparations
Selections within the Machine Tool Industry."

5. Provisions of this memorandum shall not be construed to preclude immediate shut-down and removal of specific plants that may be designated by subsequent memoranda.

FOR THE SUPREME COMMANDER:

John B. Cooley

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS

LPO 500
13 August 1946

Information of General Application pertaining to Directive Number (SCAFIN- 1133) file AG 387.6 (13 Aug 46) ESS/IN dtd 13 Aug 46 , subject: "Reparations Selections within the Machine Tool Industry."

1. With reference to memorandum Number (SCAFIN-1133), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.
2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army is to insure availability for interim reparations removals of listed facilities in the best possible condition.
3. The items within listed factories and installations which may be considered suitable for reparations are such things as machine tools, production machinery, heat treating equipment, furnaces, cranes and conveyors, precision testing and research equipment and power equipment. Expendable parts such as special dies, jigs and fixtures, bolts, nuts and small parts, etc., if available and when practicable should remain with the factory. No definite classification can be made but the use of good judgement in preserving for reparations removal those items suitable for the purpose and in allowing the Japanese to use that portion of the remainder which will contribute to needed civilian production is the end in view.
4. It is not contemplated that buildings which are part of factories taken under custody and control will be used for reparations or destroyed except in special cases. Such cases may be those where part of the building frame forms a track for overhead cranes and the steel building skeleton can be easily dismantled for resetting. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations materials it may be released to them.
5. This directive stops all manufacture of new machine tools in listed plants, though permitting completion of units for which major component parts already are manufactured.
6. The primary reason for allowing continued production in any of the listed factories is to meet the needs of the occupation forces and essential civilian economy. Insofar as possible all production in these factories should be arranged so that shutdown, when necessary for reparations removal, will have the minimum disruptive effect on the overall civilian economy.
7. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each factory who are familiar with its equipment and requirements for maintenance.

BASIC: Information of General application pertaining to Directive Number (SCAPIN -1133) , file AG 387.6 (13 Aug 46) ESS/IN.

8. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing, with necessary materials to be furnished by the Japanese Government, when not available.

9. It is expected that a system will be established for spot-checking each installation periodically. When corrective action can be accomplished locally by conference it should be done. In cases of wilful violation or neglect, immediate report should be made through military channels.

10. A letter of command instructions pertaining to the execution of the subject memorandum follows through command channels.

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT.
THROUGH : Central Liaison Office, Tokyo.
SUBJECT : Reparations Selections within the Machine
Tool Industry.

1. The Imperial Japanese Government is notified that all machine tool manufacturing plants on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates plants subject to removal under the interim reparations program. These plants will be shut down, or will be permitted to continue operation to complete machine tools under current manufacture or in the production of consumer goods, in accordance with instructions from the Commanding General, Eighth United States Army. In all cases whether or not operations are permitted to continue in the listed plants, such measures will be taken as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. There will be made available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control, and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army, to receive detailed instructions to accomplish the purpose of this memorandum.

SUPREME COMMANDER FOR THE ALLIED POWERS

LPO 500

13 August 1946

Information of General Application pertaining to Directive Number
(SCAFIN- 1133) file AG 387.6 (13 Aug 46) ESS/IN dtd 13 Aug 46 , subject:
"Reparations Selections within the Machine Tool Industry."

1. With reference to memorandum Number (SCAFIN-1133), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.
2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army is to insure availability for interim reparations removals of listed facilities in the best possible condition.
3. The items within listed factories and installations which may be considered suitable for reparations are such things as machine tools, production machinery, heat treating equipment, furnaces, cranes and conveyers, precision testing and research equipment and power equipment. Expendable parts such as special dies, jigs and fixtures, bolts, nuts and small parts, etc., if available and when practicable should remain with the factory. No definite classification can be made but the use of good judgement in preserving for reparations removal those items suitable for the purpose and in allowing the Japanese to use that portion of the remainder which will contribute to needed civilian production is the end in view.
4. It is not contemplated that buildings which are part of factories taken under custody and control will be used for reparations or destroyed except in special cases. Such cases may be those where part of the building frame forms a track for overhead cranes and the steel building skeleton can be easily dismantled for resetting. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations materials it may be released to them.
5. This directive stops all manufacture of new machine tools in listed plants, though permitting completion of units for which major component parts already are manufactured.
6. The primary reason for allowing continued production in any of the listed factories is to meet the needs of the occupation forces and essential civilian economy. Insofar as possible all production in these factories should be arranged so that shutdown, when necessary for reparations removal, will have the minimum disruptive effect on the overall civilian economy.
7. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each factory who are familiar with its equipment and requirements for maintenance.

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT

THROUGH : Central Liaison Office, Tokyo.

SUBJECT : Reparations Selections of Steam-Electric Power Generating Plants.

1. The Imperial Japanese Government is notified that all steam-electric generating plants designated on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.
2. This list designates plants subject to removal under the interim reparations program.
3. There will be made available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control and protective maintenance.
4. Within seventy-two (72) hours of the time of receipt of this memorandum, the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army, to receive detailed instructions to accomplish the purpose of this memorandum.
5. The Imperial Japanese Government will take action to stop immediately all removals of machinery and equipment from the plants, installations and facilities. No removals will be permitted without specific authority from the Commanding General, Eighth United States Army. Any equipment that has already been removed and is essential to the functioning of the plant must be returned or replaced without delay. Instructions for inventories of machinery and equipment to be made within the listed installations will be issued at a later date. All records and technical data pertaining to the machinery and equipment, including, manufacturers instruction books, arrangement drawings, detailed drawings, and operating instructions must be preserved and made readily accessible.

BASIC: Memo to IJG; AG 387.6 (18 Aug 46)ESS/IN, (SCAPIN-1181), Subject: "Reparations Selections of Steam-Electric Power Generating Plants," dated 13 August 1946.

6. Within 60 days of the date of this memorandum, each plant on the attached list must be prepared and held ready for immediate shut-down, if so ordered by General Headquarters, Supreme Commander for the Allied Powers. The Imperial Japanese Government will promptly take all steps necessary to rearrange the dispatching of power load in the area served by these plants so that the essential power demands of the areas will not be dependent on them. If specific plants cannot be brought to this state of readiness within the 60 day period, a written report covering each plant shall be submitted to the Commanding General, Eighth United States Army within 30 days from the date of this directive, outlining the difficulties involved including a proposed plan for rearranging the load distribution and the date on which this readiness will be accomplished.

7. In plants where construction is not complete, work will be continued until adequate protection has been provided for the machinery and equipment already installed. Wherever possible, you will endeavor to expedite and accept delivery of machinery or equipment needed to complete the plant at the site of construction. A report on undelivered purchase orders required to complete the plant will be prepared for submission on request.

8. Provisions of this memorandum shall not be construed to preclude immediate shut down and removal of specific plants that may be designated by subsequent memoranda.

Information of General Application pertaining to Directive number (SCAPIN 1131), file AG 387.6 (13 Aug 46) ESS/IN dtd 13 August 1946, subject: "Reparations Selections of Steam-Electric Power Generating Plants."

1. With reference to memorandum Number (SCAPIN 1131), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The purpose of issuing the referenced letter to the Japanese Imperial Government and the related letter to the Commanding General, Eighth United States Army, is to initiate the action necessary to prepare for ultimate removal of the subject steam-electric generating plants for interim reparations. Until such time as these plants are actually removed they must be properly maintained to prevent deterioration of the equipment.

3. The facilities of these power plants includes not only the equipment installed in the buildings but also yard equipment such as coal handling facilities, outdoor switchgear and transformers.

4. Removal of steam-electric power generating equipment cannot be accomplished without allowing an interval of time during which all necessary arrangements can be made to redistribute the power loads. This is to assure uninterrupted supply of electric power for essential demand without depending on the generating plants which have been selected for removal. Sixty days has been allowed for the readjustment period, although, in some cases, longer time may be necessary.

5. Essential electric power demand as used in the memorandum is defined as that which is required to supply the needs of the occupation forces and to supply normal civilian demands that affect the maintenance of the minimum economic welfare of the people.

6. Since the beginning of the occupation the Japanese Government and the Generating Companies have encouraged widespread use of electricity for the expressed purpose of utilizing surplus electric power to overcome shortages of coal and other fuels. They have encouraged, without any apparent limitation or plan, the installation of many inefficient make-shift salt manufacturing plants utilizing electric power for production of salt from sea-water. Many factories have electrified coal burning boilers and other industrial heating apparatus, while neither the Government authorities nor the operating companies took precautions to properly regulate such practices. Unlimited use of electricity for household cooking and heating has been permitted even where such practices were contrary to existing rules for controlling unsafe and disturbing uses of electric power. Such demands are abnormal when considering essential demands from a long range economic standpoint. Any practical use of surplus hydro-electric power to overcome shortages of other fuels can be justified. When hydro-electric power output is reduced during dry seasons, the use of steam generating facilities to supply electric power for the abnormal demands, that have developed since the beginning of the occupation, is not justified.

BASIC: Information of General Application pertaining to Directive Number (SCAFIN 1131), file AG 387.6 (13 Aug 46) ESS/IN.

These abnormal demands must not be interpreted as essential demand to justify indefinite need for or permanent retention of the subject power plants.

7. The directive does not intend to restrict the continued operations of these plants. The plants may continue to operate if necessary, however, when the actual date of removal has been decided, the plant must be ready for shut-down. By that time, the Japanese should have made arrangements to insure, by proper load dispatching, at all seasons the distribution of sufficient power to satisfy essential demands. The limited period of 60 days has been established by the directive in order that the Japanese will take direct and effective action to place the plants in a state of readiness for shutdown by the earliest possible date.
8. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each factory who are familiar with its equipment and requirements for maintenance.
9. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing, with necessary materials to be furnished by the Japanese Government, when not available at the plant.
10. It is expected that a system will be established for spot checking each installation periodically. When corrective action can be accomplished locally by conference, it should be done. In cases of wilfull violation or neglect, immediate report should be made through military channels.
11. Of special importance is the preservation of all records pertaining to the construction and operation of these plants. Such things as foundation plans, arrangement drawings, detail drawings of the individual pieces of equipment, manufacturer's instruction books, operating instructions, records of past operation, and design data for the plant as a whole, will be invaluable during the process of dismantling and reerecting the plants. The same will be true of special instruments and tools which are required for operation and maintenance. The items of this nature located at the plants must be considered as a part of the facilities which are to be taken into custody and preserved.
12. Surveillance will be necessary to discourage replacement of experienced operating personnel with subsequent possible damage to equipment occasioned by personnel unfamiliar with the equipment.
13. A letter of command instructions pertaining to the execution of the subject memorandum follows through command channels.

MEMORANDUM FOR THE UNITED STATES MEMBER,
FAR EASTERN COMMISSION

In accordance with instructions of September 10, 1946, from the State-War-Navy Coordinating Committee there is enclosed a copy of SWNCC 315 on United States policy in regard to the Removal of Synthetic Oils and Synthetic Rubber Industries from Japan, approved by the State-War-Navy Coordinating Committee on September 10, 1946.

The United States Member, Far Eastern Commission, is requested to present the United States views in the Removal of Synthetic Oil and Synthetic Rubber Industries from Japan to the Far Eastern Commission

DCR for its consideration.

The Honorable William L. Clayton
Acting Secretary of State
Washington, D. C.

DIVISION OF JAPAN
SEP 13 1946
DEPARTMENT OF STATE
Memo for Secy. of State
13 Sept 46
AJD

My dear Mr. Secretary:

The Terms of Reference of the Far Eastern Commission provide that one of the functions of the Commission should be to "formulate the policies, principles and standards in conformity with which the fulfillment by Japan of its obligations under the Terms of Surrender may be accomplished."

XR
740.00119 Control (Japan)

894.654
740.00119 P.W.

It is further provided that when such decisions are made by the Far Eastern Commission, "The United States Government shall prepare directives in accordance with the policy decisions of the Commission and shall transmit them to the Supreme Commander through the appropriate United States Government agency."

894.60/9-1346

At the twenty-fifth meeting of the Far Eastern Commission held at 2516 Massachusetts Avenue, Northwest, Washington, D. C., on 12 September 1946, the enclosed policy decision relative to Interim Reparations Removals: Synthetic Oil and Synthetic Rubber Industries was unanimously approved.

As Secretary General of the Far Eastern Commission, I have been instructed to forward this decision to you on behalf of the Commission, in order that the appropriate directives may be prepared and transmitted to the Supreme Commander in accordance with the Terms of Reference.

In adopting the enclosed policy decision, the Commission agreed that it should be released to the press forty-eight hours after its receipt in Tokyo, so as to give the Supreme Commander time to provide for simultaneous release if he so desires. I would appreciate it if you could make arrangements to notify me when the enclosed policy decision has been received in Tokyo.

INTERIM REPARATIONS REMOVALS:
SYNTHETIC OIL AND SYNTHETIC RUBBER INDUSTRIES

The action specified below should be taken with respect to facilities identified in the following categories of Japanese industry. Such action, under the Interim Reparations Removals Program, should be taken without prejudice to further removals that may be ordered under a final reparations program.

1. Synthetic Oil Industry

(Definition: Those plants and establishments, both government and privately owned, engaged in the manufacture of petroleum products from coal, whether by high-pressure hydrogenation, the Fischer-Tropsch hydro-carbon synthesis, or low temperature carbonization).

a. All facilities identified within this category should be made available for claim, subject to the following reservation:

(1) Any plant designated as suitable for actual or potential conversion to the manufacture of sulphate of ammonia for fertilizers should be retained in operation until the supply of fixed nitrogen from other sources becomes adequate.

2. Synthetic Rubber Industry

(Definition: Plants and establishments engaged in the production of synthetic rubber).

a. All facilities which have been engaged in the production of synthetic rubber should be made available for claim.

MEMORANDUM FOR THE SECRETARY, SWNGC

**Subject: Directive Regarding Interim Reparations
Removals: Synthetic Oil and Synthetic
Rubber Industries.**

JK

There is enclosed a draft directive prepared on the basis of a policy decision unanimously approved at the 25th meeting of the Far Eastern Commission on September 12, 1946, under the provisions of paragraph II, A, 1, of its terms of reference. It will be noted that this policy decision is quoted verbatim in the enclosed draft directive.

It is requested that the enclosed directive be forwarded to the Joint Chiefs of Staff for transmission to General MacArthur for his guidance in accordance with paragraph III, 1, of the terms of reference of the Far Eastern Commission. It is assumed that if the Joint Chiefs of Staff have any question regarding the draft directive they will refer the matter to the State Department for clarification before transmitting a directive on the subject.

894.60/9-1346

The Secretary-General of the Far Eastern Commission has requested that the Joint Chiefs of Staff in transmitting the enclosed draft directive to the Supreme Commander for the Allied Powers inform him that in adopting the policy decision on which this directive is based the Commission agreed that it should be released to the press 48 hours after its receipt in Tokyo in order to give the Supreme Commander time to provide for simultaneous release if he so desires. Acknowledgment of the receipt of the directive is therefore requested.

Because of the intention of not releasing the enclosure to the press until it has been received in Tokyo, the Commission would appreciate it if appropriate arrangements might be made to preserve the necessary security in the transmission of this message.
