At about 1600, 12 April an 8-plane TGAP of WG-94 FM-2's was vectored 10 miles to the north of its orbit point over Kerama Rette to intercept approaching enemy planes. While on this vector, at an altitude of 450 feet, Lt(jg) J.H. STOTZ, who was flying wing on the leader of the flight, Lt. L.E. TERRY, sighted a Somia at 10 o'clock 5 miles on a reciprocal course to our planes. With STOTZ leading, on instructions from TERRY, the two planes changed course to intercept. When they had closed to 2 miles, the Sonia, apparently sighting our planes, commenced a shallow circling dive to port in what appeared to be an attempt to suicide crash on a lone III) proceeding on the water below on course 200°. As our planes closed to range, the Sonia gradually nosed over in a 45° diving epiral and the Destroyer opened fire. Lt(18) STOTE opened fire from 1500 ft. 4 o'clock. altitude 2500 feet and followed the Sonia in its dive to 500 feet through intense anti-aircraft fire from below. Lt. TERMY also followed the Sonia down, staying to the port side of STOTE, and at about 1200 feet altitude fired a single burst from 1000 feet. The Sonia turned inside of him and, before he could get in position to fire again, he found himself at 800 feet Both TERRY and STOTZ were compelled to pull out at 800 feet to escape being shot down by the MD. A few seconds after they commenced their pullouts the enemy crashed on the bridge of the Mo.

Simultaneously with the sighting of the Somia, Lt. F.J. GLUGAS, leader of the other GAP division, spotted a Val at 2 o'cleck, 500 yds. away on a reciprocal course to his, speed about 140 kts. GLUGAS whipped his plane into a sharp turn to starboard and closed at 160 knots. At 900 feet from the Val he fired 1 burst in a 45 deflection shot from the tail. The Val turned to starboard and also commenced a suicide dive on the DD below, corkscrewing to evade our attacks. The DD opened fire on the Val. GLUGAS fired 2 more bursts and pulled out at 2500 feet to avoid the AA. During his attack he observed hits on the starboard side of the Val's engine and saw the Val smoke at that point.

Meanwhile the second section of GLUGAS division had also sighted the Val and given chase. Shortly before Lt. GLUGAS pulled out, Ansign R. A. GOELIER closed to within 500 feet on the tail of the Val. Pursuing it from 2500 feet to 600 feet in a 45 dive at 200 knots in the face of intense AA fire from the RD COLLIER fired numerous no-deflection shots into the engine and cockpit of the enemy. At 1200 feet the Val broke into flames around the starboard engine cowling and appeared out of control. It crashed in the water about 50 yds. from the RD.
