TERMS OF SALE.

ORDERS:

Prices of all our offers are quoted net, subject to market fluctuations and stocks being unsold.

Verbal agreements will not be considered.

All orders are accepted subject to satisfactory crops.

By placing orders, buyers are considered to agree with these terms, even where they may differ from those usually obtaining in their own country.

All goods are sold f.o.b. warehouse or Portland, and travel at purchaser's risk and expense.

Unless orders to the contrary are given, insurance will be provided for at purchasers' cost.

ACCOUNTS: All accounts are strictly due 3 months after date of invoice. 2 % for cash is allowed for payments within 30 days after date of invoice. Complaints or claims about the quality of goods supplied cannot be entertained unless made immediately upon receipt of same.

> No warranty is given express or implied and we will not be in any way responsible for the results of planting or forcing of any bulbs and roots we send out, but we guarantee all varieties to be true to name and description.

> Cases and packing, together with freight, forwarding and insurance charges will be collected on delivery.

> If at the time of shipment purchasers have not yet settled their previous years accounts, or in the case of unknown customers they cannot supply sufficiently good references or in the case of unsatisfactory information, we shall be compelled to cancel any orders placed with us.

Cable Address: ORBULB Portland Oregon. Mailing address: Oregon Bulb Farms, Inc. 812 Journal Building, Portland, Oregon.

Large buyers should write for quotations, as all prices are subject to crop and market changes and to stocks being unsold.

American-Grown Bulbs.

The hardy narcissus, iris and montbretias offered on the following pages are grown by the Oregon Bulb Farms, Inc. with offices at 812 Journal Building, Portland, Oregon and farms 23 miles east of Portland at Dodge Park, Ore.

The Oregon Bulb Farms act as agent for de Graaff Brothers, Inc.

All communications regarding the Pacific Coast orders for Dutch bulbs should be addressed to them.

Under the personal supervision and management of Mr. Arthur Bowman and Mr. Jan de Graaff great changes have been made in the operation of the farms. The interesting machinery which has been developed for planting, digging and cultivating has effected a much lower production cost.

We have decided to give our customers the full advantage of this lower production cost and they will find that we are now offering our American grown bulbs at the same prices as in Holland or England.

Since particular care has been taken to eliminate all pests and diseases, we guarantee our bulbs to be clean, firm and healthy. The bulbs are government-inspected, fumigated and carry inspection tags.

The extreme care in handling the stocks, the up-to-date equipment, treating tanks, fumigators and ideal storage facilities have given us the satisfaction that our stocks are recognized as the healthiest and strongest of their kind in the United States.

Classification of Daffodils of the Royal Horticultural Society of England

The eleven divisions are as follows:—Division 1.—TRUMPET DAFFODILS.

Distinguishing character—Trumpet or crown as long or longer than the perianth

(a) Varieties with yellow or lemon-colored trumpets, and perianth of same shade or lighter (but not white).

(b) Varieties with white trumpet and perianth.

(c) Bi-color varieties, i.e., those having a white or whitish perianth and a trumpet colored yellow, lemon, or primrose, etc.

Division 2.—INCOMPARABILIS.

Distinguishing character—Cup or crown not less than one-third but less than equal to the length of the perianth segments.

(a) Yellow shades with or without red coloring on the cup.

(b) Bi-color varieties with white or whitish perianth, and self-yellow, red-stained, or red cup.

Division 3.—BARRI (INCORPORATING BURBIDGEI).

Distinguishing character—Cup or crown less than one-third the length of the perianth segments.

(a) Yellow shades, with or without red coloring on the cup.

(b) Bi-color varieties with white or whitish perianth and self-yellow, red-stained, or red cup.

Division 4.—LEEDSIL

Distinguishing character—Perianth white, and cup or crown white, cream or pale citron, sometimes tinged with pink or apricot.

(a) Cup or crown not less than one-third but less than equal to the length of the perianth segments.

(b) Cup or crown less than one-third the length of the perianth segments.

Division 5.—TRIANDRUS HYBRIDS.

All varieties obviously containing N. triandrus blood, such as Queen of Spain, Moonshine, Pearly Queen and Agnes Harvey.

(a) Cup or crown not less than one-third, but less than equal to the length of the perianth segments.

(b) Cup or crown less than one-third the length of the perianth segments.

Division 6.—CYCLAMINEUS HYBRIDS.

Division 7.—JONQUILLA HYBRIDS—All varieties of N.Jonquilla parentage, such as Buttercup, odorus, etc.

Division 8.—TAZETTA and TAZETTA HYBRIDS.—To include N. Tridymus, poetaz varieties, the Dutch varieties of Polyanthus Narcissus, N. biflorus, N. Muzart and N. intermedius.

Division 9.—POETICUS VARIETIES. Division 10.—DOUBLE VARIETIES.

Division 11.—VARIOUS.—To include N. Bulbocodium, N. cyclamineus, N. trlandrus, N. juncifolius, N. gracilis, N. Jonquilla, N. Tazetta (sp), N. Viridiflorus, etc.

Attention is drawn to "A Tentative List of Tulip Names" and the "Classified List of Daffodil Names", both published by The Royal Horticultural Society, Vincent Square, London, England. These list are indispensable for all those interested in daffodils or tulips, as they give the correct names, synonyms, name of raiser, and in the tulip list, a short color description.

Daffodils and Narcissi for Naturalizing

Our mixtures are especially made up from named varieties and are greatly superior to the cheap mixtures frequently sold. We do not grow any mixed daffodils and we only select varieties that are especially adapted for naturalizing. They may be relied upon to give an abundant supply of flowers over a long period.

	_	
We offer the following mixtures:	p. 100 \$	p. 1000
Flower Border and Naturalizing Mixture—A superior mixture of	·	·
yellow, bicolor and white trumpets, showy varieties of Barrii		
Incomparabilis and Leedsii, Jonquils and Poeticus for grouping		
in the flower border. An ideal cut flower mixture	5.—	40.—
Seedling Yellow Trumpets Mixed—All pure golden-yellow trumpets		
of the King Alfred, Minister Talma group	6.—	50.—
Seedling White Trumpets Mixed—Made up from hybrids of Peter		
Barr, Madam de Graaff and many others	6.—	50.—
Seedling Bicolor Trumpets Mixed—Choice hybrids of the Spring		
Glory, Vanilla and Victoria class	6.—	50.—
Seedling Red Cupped Varieties Mixed—A most attractive mixture		
made up from Barrii, Incomparabilis and other short cupped groups	6.—	50.—
Seedling Bunch Flowered Varieties Mixed—Made up from Poetaz,		
Polyanthus and Jonquil groups	5.—	40

To produce best effects in naturalising, each group should be planted separately. The varieties in each mixture have been selected so as to give a continuous flowering for a month or more each year.

The descriptions for this catalogue have been written expressly for us by Mr. F. F. Rockwell, the well known writer on horticultural subjects during a visit to our farms in the spring of 1930.

We are glad to announce that Mr. Rockwell author of The Book of Bulbs, which is recognised as the standard work on this subject in this country, is preparing another volume which will deal fully with Daffodils, Tulips, Bulbous Irises and Montbretias. This work, to be profusely illustrated in color, will give long needed information on these subjects, which are of ever increasing interest to the American garden public. This new volume, we understand, will be published by the MacMillan Co. of New York, publishers of the Book of Bulbs and several more of Mr. Rockwell's garden books.

The contents of this catalogue are not copyrighted; if suitable any descriptive matter may be freely used.

We also have a very complete collection of photographs and colorplates suitable for reproduction in catalogues, which we will gladly lend to any of our customers for use in their publicity.

In addition to the varieties we offer in this catalogue, we grow a very large number of the latest and best European hybrids, including the leading novelties of 1931.

Large buyers should write for quotations, as all prices are subject to crop and market changes and to stocks being unsold.

Yellow Trumpet Daffodils.

Division Ia: Trumpet as long or longer than perianth segments, trumpet lemon, yellow or sulphur colored, with perianths of same shade but not of white.

white.	each	Per 100
ADEOLITE Hara is a golden deffect!! that is some to wearless means	\$	\$
AREOLITE—Here is a golden daffodil that is sure to replace many		
of the present varieties as it becomes available; the large flower is beautifully proportioned, giving the impression of gracefulness,		
despite its size; perianth deep primrose, with a pure medium-		
yellow trumpet which is left in bold relief by the broad pointed		
star formed by the flat opening outer petals, an inch and a half		
wide; medium early, but remains until late, and is one of the		
longest lasting of all daffodils either in the garden or after being cut	1.—	
ALASKA—Giant flower of deepest gold; more graceful than most	***	
of the giant Ajax varieties as the trumpet is deeply frilled and		
recurved	6.—	
ALASNAM—Wide, short, densely frilled trumpet of pure deep		
yellow, a shade deeper than the perianth; finely placed with good		
neck; flower "looks you in the eye"; excellent for landscape		
groups, also for forcing; very early	1.50	
BEN HUR-A glorious "loud speaker" trumpet, deeply frilled of		
pure Roman gold, 2½" across at the mouth; in spite of its immense		
size the whole flower is finely proportioned, one of the best of		
the new giant trumpets, A. M. 1930	7.50	
CLEOPATRA—A splendid flower which has won many awards		
and is well known everywhere; lemon-yellow perianth over-		
lapping petals; trumpet light yellow; very late, A. M. 1913		12.50
DIONYSIUS—Glorious flower of uniform light gold; star shaped		
perianth; unlike most of the Giant trumpets flowers do not all		
face one way in group planting		60.—
DIOTIMA—Considered by many experts as the very best of the		
new super-giant yellow trumpets; despite its huge size (perianth		
being five to six inches across) the whole flower is beautifully		
proportioned and is carried gracefully on flattened tapering stems,		
two feet tall, entirely free from the amaryllis-like stiffness of many		
of the giant trumpets; the broad over-lapping petals form a star		
shaped perianth of medium deep primrose, trumpet somewhat		
more deeply colored; undoubtedly one of the top-notchers for many years to come	20.—	
DUCHANEL—A beautifully balanced flower of giant size — a	20.—	
strikingly clear self yellow, widely flaring trumpet is deeply		
frilled. Especially valuable as it is very late, an outstanding show		
flower	1.50	
EMPEROR—Backhouse, perianth primrose, trumpet darker, a		
forcing and bedding flower of proven merits		8.—
FANTIN LATOUR—Very deep golden yellow throughout, an		
immense bloom excellent for exhibition and the garden; medium		
early, A. M. 1915	1.50	

Yellow Trumpet Daffodils—continued.	\$ each	\$ Per 100
GIANT KILLER—Long, straight frilled trumpet, rich yellow, lighter at base, and with deep primrose perianth; somewhat similar to Van Waveren's Giant but deeper in color; vigorous grower	2.—	
GOLDEN SPUR—Uniform yellow the most popular forcing daffodil HECTOR TREUB—De Graaff, uniform golden yellow, very early HELOISE—Medium size; same coloring as Tresserve; lemon perianth		8. <i>—</i> 60. <i>—</i>
and golden trumpet, more graceful in form, medium late HENDRIK IBSEN—A real "golden daffodil" which will appeal strongly to those who do not insist uron size above everything else; a pure self color, and of much ore graceful conformation than most of the larger yellow trumpets, with the flower held	. 50	80.—
well above the foliage; very free flowering and very early KING ALFRED, —One of the finest of all the new super-giant the Yellow Trumpets, F. C. C. 1899 KING ARTHUR—One of the finest of all the new Super-giant trumpets; perianth pure rich lemon yellow, with wide, deep golden trumpet; really an improved King Alfred, which should find a	1.50	12.50
place in every garden		50 75
MAC MAHON—A splendid deep golden self color with a remarkable metallic sheen, the perianth glittering as if dusted with mica; green coloring of stem runs well up the base of perianth; graceful stem and exceptionally good neck; a King Alfred seedling of great merit	15.—	80
well proportioned; an extra fine flower which lasts a long time; late MATAMAX—A strong grower and exceptionnally tall; clean, golden color, fine substance; very late; King Alfred seedling MOUNT ROYAL—Wide spreading trumpet, with perianth having three base petals extra wide, the three inner being narrower and		80. <i>—</i> 75. <i>—</i>
more curved, making a particularly well formed attractive flower MUSTAPHA—Another splendid King Alfred seedling; exceptional large flower of very deep gold; substantial petallage; medium late	3. <i>—</i>	
OLYMPIA—A much improved and enlarged Emperor, free-flowering and hardy, A. M. 1914		16.—
very late		80.—
really representing a new type in the Ajax group TRESSERVE—One of the leaders among the new giant trumpets; deep canary yellow with a paler perianth, the segments of which reach forward about the trumpet, producing a flower of distinct individuality; the trumpet mouth, 2" across, is deeply lacinated WARWICK—Another of the striking new King Alfred seedlings outstanding in every way and very early; refined stem and neck bearing a star-shaped perianth of great substance; golden yellow,	60.—	12.50
with trumpet a shade deeper in color	1.50	

White Trumpet Daffodils.

Division Ib: Varieties with white perianth and white or nearly white trumpet including pink or apricot trumpets. per 100 ADA FINCH—Pure white overlapping perianth, white trumpet, very fine noveelty A. M. H. 1927, F. C. C. 1930 20.~ ALICE KNIGHTS—Uniform creamy white, A. M. 1905 12.-COL D'ANTERNES-Giant white self-colored pure creamy white, of informal type, with slightly rolled perianth petals; very tall; late 32.— EGGISHORN—Uniform cream white; a self-color, of medium height, good for planting in front of taller sorts, or against dark back-40.ground such as evergreens; late flowering EVE—Of good size, but of such perfect proportions that the name suits it absolutely; a harmony in white and old ivory, with even the pistil and stamens blending into the color scheme; the green and gold shading at the outer base of the trumpet adds to the flower's delightful charm JIM-A very delicate white trumpet with slightly reflexed and curved perianth segments and of quite unusual texture; both crimpled and lacinated-like primrose silk or delicate apricot brocade, A. M. 1927 12.-JUNGFRAU—One of the most popular of the new white trumpets; pure cream-white perianth with a pale primrose trumpet; a strong 1.20 grower; very tall; a fine propagator, a great show flower LA VESTALE—Giant trumpet type with pure ivory white perianth, of informal design, with trumpet of deep cream yellow, tall, fine for small groups or naturalizing in dim shade; though of delicate appearance, it is of extra good substance and lasts well; very 2.early, A. M. 1923 LORD LOUIS MOUNTBATTEN—An outstanding flower of giant size but beautiful proportions which will appeal to the discriminating; broad overlapping perianth petals of palest primrose, orange at base on the outside; trumpet, just a shade deeper at the base, color intensifying toward the mouth; strong grower but 6.a refined flower of delicate and harmonious coloring, A. M. 1926 LOVENEST—One of the very few members of the "pink daffodil" class; among the daintiest of all the trumpets; medium in height with a starry shaped perianth of informal type; nicely proportioned trumpet of saffron vellow turning to apricot pink; delight-3. fully charming at all stages; very early, A. M. 1925 MAD. DE GRAAFF—This lovely graceful daffodil was the first of 8.a new class and most famous of the white trumpets, F. C. C. 1887 MRS. JOHN BODGER—Considered by many the most exquisite of the new white trumpets; a semi-dwarf hybrid of medium size, with a pure white star shaped perianth and a good trumpet; wonderful variety for the rock garden or the front of the border;

sure to become a great favorite as it has been enthusiastically received at every show

6.-

White Trumpet Daffodils — continued.	each \$	per 100 \$
MRS. R. O. BACKHOUSE—This is the famous "pink daffodil"; fine		
informal perianth of ivory white, and beautifully proportioned, slim long trumpet of apricot pink, changing to shell pink at the		
deeply fringed edge; delicately beautiful but of exceptional sub-		
stance; long lasting; early; belongs in every collection	16.—	
PETER BARR—One of the first of the new type white trumpets,		
but still extremely popular; a large fine flower of medium height		
and somewhat drooping habit; creamy white cactus-like perianth,		
and very slim lemon-yellow trumpet; fine for rock garden, and also		50.—
for naturalizing, as it is now very moderate in price, A. M. 1902 PRESIDENT CARNOT—A self-colored creamy white trumpet, of		50.—
the Olympia type, with perianth petals slightly twisting and		
reaching forward, adding beauty of form to the charming color		
harmony		60.—
QUEEN OF DENMARK—A giant white trumpet with wide deeply		
cut rim, flushed gold at the base; excellent exhibition variety	8.—	
W. P. MILNER—A charming free flowering variety, pure white		
when forced, highly recommended for rock gardens and natura-		20
lising etc. A. M. 1914		20.—

Bi-color Daffodils.

Division Ic: Bicolor Trumpet Daffodils, with white or whitish perianth and a yellow, lemon or pale primrose trumpet.

lemon or pale primrose trumpet.		
•	eech \$	per 100
DICK—A splendid bi-color, fine widely opened and slightly reflexed	Ψ	Φ
trumpet, the bulbs are particularly hardy, F. C. C. 1908		8.—
JEFTA—Very delicately colored giant trumpet of moderate size;		
cream colored perianth and pale lemon trumpet slightly recurved		
at mouth; King Alfred seedling, early	1	
OCTAVIANUS—Exceptional flower of beautiful proportion and		
finish, with a large recurved deep trumpet supported by an ex-		
ceptionally substantial perianth; good stem and up-looking neck;		
the perianth is pale primrose and the trumpet a pure moon yellow		
when opening, giving the effect of moonlight through mist. When		
fully open the perianth turns slightly paler, justifying its classifi-		
cation under this class	16.—	
ROBERT E. LEE—A striking new giant bi-color with frilled lemon-		
yellow trumpet, 2" across; perianth pale citron; outstanding on		
the show bench, A. M. 1928	20.—	
SPRING GLORY—Still a favorite both for the garden and for		
forcing; pure yellow trumpet, slightly paler perianth, excellent		
stem, and always free blooming		8.—
SYLVANITE—A striking new variety with broad overlapping pe-		
rianth of creamy white, and light canary trumpet; strong grower,		
but graceful in habit		60.—
VAN WAVEREN'S GIANT—Enormous flower with deep yellow		
trumpet, well opened: perianth pale yellow with outer petals ex-		
ceptionally broad and inner ones usually slightly twisted making		
the flower more graceful		16.—
VICTORIA—A standard commercial flower for forcing		8.—
WEARDALE PERFECTION—An old variety still deservedly po-		
pular; broad overlapping perianth with trace of gold down center		
of each cream white petal; graceful trumpet of good proportions,		12
and uniform clear, deep canary-yellow, F. C. C. 1894		12.—

Incomparabilis Narcissus.

Division II: Incomparabilis, cup or crown measuring from one-third to nearly the length of the perianth segments.

length of the perfaith segments.	each	per 100
ABELARD—Broad yellow cup, orange tint at edge, and showy orange anthers, supported by broad primrose perianth of exceptionally good substance; beautiful in the unfolding bud, and unusually long lasting flower, A. M. 1928 ADLER—A universal favorite both among exhibitors and amateurs; a really marvellous flower with perianth of the purest white, overlapping and opening nearly flat, circular in outline and 4"	24.—	•
across, with a beautifully proportioned cup of pure chrome yellow, shading to blood-orange at the deeply frilled edge; the most admired flower in many large collections, A. M. 1928	60.—	
unusual and beautiful	24.—	
BARTHOLD MERYAN —White perianth with gold-dust sheen at base; cup saffron yellow, deep orange frill	20.—	
BENNETT HALE—A giant flower, 4½" across, of loose construction; perianth pure white star-shaped, fine deep yellow cup, shading to orange at the margin	4.—	10
very free-flowering, good grower, recommended BETTY KING—Pure white, broad petaled well formed perianth,		10.—
with cup of glowing deep orange-red; a favorite on the show bench	6.—	
CALVIN COOLIDGE—Broad overlapping perianth, deep cream		
yellow with firy orange cup; good show-flower	24.—	
CARMENCITA —Overlapping perianth of pure white; cup a uniform pure orange; flower of refined form, beautiful in its simplicity	60.—	
CROESUS—Universally popular both for the garden and for ex-		
hibition; light canary-yellow perianth of perfect form, with outer		
petals nearly touching, the inner ones overlapping, opening flat;		
broad fluted cup of rich orange to base; substantial, free-flowering, and a fine propagator; desirable in every way, F. C. C. 1912		60.—
DONATELLO—Very attractive moderately priced flower which will		
appeal to the discriminating; light primrose perianth, slightly		
reflexed, with overlapping petals giving a golden effect, sup-		
porting a pure deep yellow trumpet of beautiful design, ruffled and frilled and of a uniform pure yellow; medium late		30.—
FLORIDA—A glorious bloom of informal, semi-cactus type; deep		50.—
primrose perianth with petals of fine substance, standing freely		
away from base of deep trumpet, chrome yellow on outside,		
tinged orange inside of frill, and curled and twisted orange		
anthers; unusual in both form and coloring; strong grower, and	20.—	
free-flowering, A. M. 1930	20.—	

Incomparabilis Narcissus—continued.	a.ab	100
FRANCISCA DRAKE—It is impossible to describe adequately the	each \$	per 100 \$
beauty of this unusual flower of a distinct new type; the pure		
white perianth petals are of unusual substance, an inch and a		
half wide, and tinted gold at the base, which shows through on the outside; the cup, wide and deep, is golden yellow at the base,		
changing gradually to flame orange at the densely frilled edge;		
the flowers are held well above the fine foliage and give the		
effect of a flock of white seagulls taking flight; strong-growing and very free-flowering	4.—	
GALLIPOLI—World famous variety, citron-yellow perianth; cup		
deeply fluted to base, and with a double frill effect at edge, is		
yellow, shading to vivid orange; buds and flowers somewhat drooping; very decorative	2.—	
GERTRUDE HASTINGS—One of the most perfectly formed of the		
large-cupped Poeticus hybrids; petals pure white daintily tipped, cup yellow, shading to orange	6.—	
GHANDI—Fine broad petaled, light primrose perianth, with a deep	0	
broad cup of intense orange at the edge, changing to chrome	4.0	
yellow at the base; striking and unusually beautiful flower; late	10.—	
GLORIA MUNDI—Star shaped yellow perianth with deep cup of yellow-edged red, F. C. C. 1908		8.—
GREAT WARLEY—One of the first of the new Giant Incompara-		
bilis, a splendid flower even when judged by modern standards; perianth overlapping, pure white, star form, and megaphone-		
shaped trumpet of rich light golden yellow, an even tone from		
base to frill, F. C. C. 1912		30.—
HOMESPUN—Flat star shaped perianth of light canary-yellow, with		
fluted cup of deep primrose-yellow, harmonizing; flowers held well above the foliage; an old variety, but a fine flower, excellent		
for naturalizing, A. M. 1907		8.—
JEFFERSON DAVIS—Cup deep orange yellow, shading to pure		
orange, supported by fine perianth with three inner petals slightly	32.—	
twisted; splendid flower of artistic design	52	
contrast in the pure white overlapping perianth and the frilled		
cup of dark blood red; wonderful show flower, A. M. 1928	80.—	
JOHN EVELYN—Deservedly an international favorite; outstanding among the new Incomparabilis hybrids; flatly opening perianth, 4		
to 5" across, with a flat cup nearly 2" in diameter, densely frilled,		
the perianth being pure white, without trace of shading, and the		
cup lemon yellow and fluted or shirred to the base; good neck; strong grower; free flowering and a good propagator; one of the		
greatest daffodils of the present day and for years to come,		
F. C. C. 1925	6.—	
varieties; star-shaped cream-primrose perianth and chrome yellow		
cup with deeply fringed edge of burning scarlet-orange; unsur-	80	
passed for the show table	80.—	

Incomparabilis Narcisqus—continued.		100
	each \$	per 100 \$
LOUDSPEAKER—Among all the fine daffodils of recent intro-		
duction, no other has more quickly made a name for itself; a flower of great size, $4\frac{1}{2}$ across, with wide flaring trumpet 2"		
across, the whole flower being finely proportioned, and borne on		
a tall stem with a good neck; in color the perianth is pure citron		
yellow, and the cup chrome yellow, deepening slightly at the		
frilled edge; conspicuous styles of the same shade as the perianth		
add to its beauty; outstanding and in every way a satisfactory		
as well as a sensational flower, both in the garden and on the		
show table	10.—	
MARY LONGSTREET—Beautifully formed flat flower on tall grace-		
fully slim-necked stem; groad overlapping perianth, with petals creamy white tinted gold at edges, forms an unusual background		
for the flaring deeply crinkled cup of uniform blood orange; very		
handsome and unusual novelty	24.—	
MERCURIUS—Very tall and outstanding; bright primrose perianth		
and pure yellow trumpet of Loudspeaker type, with a tint of		
orange in the frills; very vigorous grower; mediumly late	80.—	
MI-CAREME—Another of the Loudspeaker type, perianth somewhat		
lighter, trumpet deeper in color; less flaring and more deeply frilled; a little earlier than Loudspeaker; this variety, with Mer-		
curius and Loudspeaker, make a wonderful trio of a distinctly		
new type	2.—	
MILFORD-HAVEN—Fine flower with cream-white perianth and		
wide cup ruffled and deeply frilled at edge, chrome yellow at base		
and shading into rich orange scarlet, the same gorgeous color	6	
combination as in the Montbretia "His Majesty", A. M. 1926 MRS. GEORGE CHANDLER—Light citron perianth, the outer	6.—	
petals very broad; cup of pure chrome-yellow, double frilled,		
deeply lacinated, shading on the inside to deep orange, A. M. 1927	15.~~	
ORANGE KING—A gorgeous flower of substantial build and unu-		
sually long lasting; perianth light citron, supporting a wide, deep		
and densely frilled cup, chrome yellow at base, changing to vivid		
flaming orange in a broad band extending half an inch down, both inside and outside, from the frill; mediumly late	60.—	
ORANGE OPHELIA—One of the finest introductions of 1928; finely	00.—	
built perianth of cream-white, and deep cup with dense frill of		
the same shade as the popular Orange King Calendula; very late	45.~	
ORANGE SUN—Perfectly formed flat opening perianth of pale prim-		
rose; beautifully proportioned trumpet of deep primrose, with		
orange fringed frill; very pleasing color harmony, A. M. 1926	80.—	
PEDESTAL—Extremely dainty, nicely formed flower, with perianth		
citron colored, changing to light primrose, and a deep cup of		
pure yellow, intensifying to red at the margin; good variety for		50.~
the rock garden or for naturalizing PETRONIUS—Creamy white perianth of informal build, star-shaped,		50.~
with deep, densely frilled trumpet, yellow outside and golden		
orange inside; late	2.—	

Incomparabilis Narcissus—continued.	each \$	per 100
PHOEBE—Beautiful flatly opened star shaped perianth of creamwhite, with flaring cup very densely frilled, chrome yellow deepening to sunrise orange at the edge	24.—	•
frilled edge; broad strong foliage and tall stem with upright neck, holding the flower well aloft; extra fine	40.—	
yellow cup densely frilled, of deep orange; substantial and long lasting, and fine both in the garden and for exhibition, F.C.C. 1923 RED EYE —A very tall variety with citron colored perianth; beautiful proportions; heavily frilled cup of pure chrome yellow self-color throughout with no trace of orange; fine for the show	6.—	
bench; late	12.—	
SHEHERAZADE—A very tall variety with citron colored perianth; beautiful proportions; heavily frilled cup of pure chrome yellow self-color throughout with no trace of orange, A. M. 1930 SHERMAN—Bold broad-petaled overlapping perianth of creamywhite, and heavily frilled cup of deep orange yellow, with con-	28.—	
spicuous apricot anthers; buds hang down but flowers stand up well, making a pretty contrast; late	30.—	8.—
cup of golden yellow	6.~	
STELLA PRATT—Not unlike Red Cross, star-shaped perianth of light primrose, deep yellow trumpet, shading to orange; white tips on perianth petals	2.—	
yellow	12.—	
TAMPA—Extra large flower, reflexed, with extremely broad petalled perianth of cream-white and immense cup, heavily frilled, with the coloring of Gallipoli; late	1.—	
A. M. 1926	16.—	
flat, or slightly reflexed; cup fluted and frilled, deep primrose, with orange edge; flower held well above foliage		10.—
perianth, petals often slightly curled; good cup of yellow ochre with flaming orange-scarlet edge; fine for the rock garden, or for naturalizing near a small pool, F. C. C. 1898		10.—
YEKA—A huge flower of unusual form; the petals of the citron colored perianth are characteristically curved like the blades of a propeller, the very broad outer petals forming a perfect triangle suggesting a trillium; frilled golden yellow cup and conspicuous		
anthers of pure yellow; fine in the garden and for exhibition	1.—	

Barrii Narcissus.

Division III: Barrii, cup or crown measuring less than one-third perianth segments.	the length	of the
ADELGAR—Flame-orange colored, deeply lacinated cup, supported by an extra fine perianth, creamy white, of unusual substance excellent exhibition novelty, A. M. 1928	16.—	
reflexed: inner petals narrower, but over-lapping, rim of splendid yellow cup with deep red-orange frill; extra tall, and very late ALCIDA —Giant flower, pure white perianth opening flat, starshaped, with individual petals over 1½" wide; broad citron-yellow	1.—	
cup with blood-orange frill; strong grower, fine substance and wonderfully free-flowering; very late, A. M. 1921	2.—	
trumpet deeply crinkled and frilled; cup of darker yellow shading to orange at edge; very tall stem; mediumly early	6.—	
one of the best of its type	1.—	
perianth, opening flat; conspicuous apricot stamens standing out against the yellow cup add to its beauty; worthy a place in every collection	4.—	
orange-scarlet, A. M. 1915		20. <i>—</i> 10. <i>—</i>
stem, but very dainty	1.—	
extremely desirable for naturalizing in partial shade, A. M. 1906 CHARM—A low growing, daintily poised Barrii, pure white reflexed star-shaped perianth, densely frilled cup, primrose yellow at base, burning red-orange at edge; splendid variety for the rock garden		24.~
and for other intimate locations CINDERELLA—A dainty flower with perianth of the palest primrose, almost white, and nicely fringed cup of reddish goldenorange, the color extending clear down to the base	1.—	60.—
DIANA KASNER—A pure white perianth and a large fluted yellow cup with blood-red frill, very free-flowering and an excellent forcer. A. M. 1924. We consider this variety as one of our most valuable introductions and cannot recommend it too highly for show purposes	1.—	

lapping petals, and deep lemon yellow flaring cup, edged red- orange medium late but excellent for forcing; splendid variety	Barrii Narcissus—continued.	each	per 100 \$
EARLY SURPRISE—A little beauty; semi-dwarf habit of growth; pure white perianth with orange colored cup, fine for naturalizing, and the earliest for forcing of this type, F. C. C. 1924			
pure white perianth with orange colored cup, fine for naturalizing, and the earliest for forcing of this type, F. C. C. 1924			10.—
and the earliest for forcing of this type, F. C. C. 1924			
ECLAIR—Semi-Poeticus type with broad overlapping perianth of purest white; and shallow cup yellow at base shaded to deep blood-red; unique flower of unusual substance, very late			8.—
blood-red; unique flower of unusual substance, very late			
EDITH—One of the best of the new Poeticus type exceptionally wide perianth petals and fine form: very late, A. M. 1928		60	
### STATESTAIL Poservedly popular the world over; broad petalled creamy-white perianth and large orange cup with scarlet-orange firl, F. C. C. 1925 **FALU MAGAET HOHMANN—Flat opening petalled cream-white perianth: flaring lemon yellow cup with orange made of firll; free flowering, very late **FREIFRAU VON FREISEN—Exceptionally tall stem and good neck supporting a broad creamlike perianth and outstanding of all the recent introductions **GIONESIUS—A beauty, with flat nicely formed perianth and creamy yellow, 3¾" across, and a pale citron chalice-shaped deep cup, edged saffron orange **GLAD BOY—Nearly a self color, with perianth lemon yellow, and deeply crinkled cup just a shade darker; extremely late, fine novelty **LADY DIANA MANNERS—Very tall, with pure white wide overlapping petalls, and deep lemon yellow flaring cup, edged read-orange medium late but excellent for forcing; splendid variety **24.— 25.— 26.— 26.— 27.— 28.— 29. 29. 20.— 20.— 20.— 21.— 21.— 21.— 22.— 22.— 22.— 23.— 24.— 25.— 26.D Deventment the mon yellow overlapping petalls, and deeplemon yellow flaring cup, edged read-orange medi		00.~	
orange cup; extremely tall; very early		32.—	
ELLY NEY—Remarkable flower, entirely distinct, of perfect design and build; pure Poeticus white perianth, outer petals so broad they nearly touch, and the three inner petals overlapping, forming a saucer-shape perianth for the cup of deep lemon yellow with the edge picoteed deep blood red; still in great demand though introduced six years ago, A. M. 1925			
and build; pure Poeticus white perianth, outer petals so broad they nearly touch, and the three inner petals overlapping, forming a saucer-shape perianth for the cup of deep lemon yellow with the edge picoteed deep blood red; still in great demand though introduced six years ago, A. M. 1925		24.—

substantial flower remaining in good condition even where many other varieties "burn": late, but an excellent forcer, F. C. C. 1924			12
MASTERPIECE—Engleheart, perianth, creamy white, star-shaped,	MASTERPIECE—Engleheart, perianth, creamy white, star-shaped,		
flat, orange cup, nicely frilled, very free-flowering, A. M. 1912 8.—			8.—

Barrii Narcissus- continued.	each	per 100
MAY BLOSSOM—One of the new Barrii-Poeticus hybrids with perianth of pure glistening white, overlapping petals, and yellow eye with red picotee; extremely tall, very striking; late blooming A. M. 1924 MISS WILLMOTT—Extra fine pure white perianth; slightly reflexed,	12.—	
of Poeticus type, and deep yellow eye, picoteed orange-red MRS. BARCLAY—Large flower with flat, reflexed, broad-petaled overlapping perianth of pale primrose, changing to pure white; deeply frilled flat cup of primrose-yellow, with dainty orange picotee; extremely showy, and a great favorite in the garden for exhibition, A. M. 1925	1.~	20.—
MURIEL—Most distinct and delightful perfect round perianth of pure white, held on slim stem well above the foliage, gives much the effect of an anemone dancing in the breeze; cup with brilliant red edge; especially fine for naturalizing, A. M. 1926 NANNIE NUNN—A charming very free-flowering variety creamy		40.—
white perianth and clear orange cup, A. M. 1926	24.—	20.—
creamy white; flat eye, edged intense red-orange; the unopened bud droops prettily making a contract with the opened flowers A. M. 1926	6.—	
overlapping petals; cup orange fringed scarlet	1	
a flaring frilled cup of most intense scarlet orange, shading to yellow orange at the base; very tall, fine neck, and in every way an outstanding flower	60.—	
of lemon yellow with golden orange margin; tall, vigorous grower; very late, A. M. 1930	40.—	
points of petals turned forward; cup yellow, edged intense red; refined artistic flower; very late	8. <i>—</i>	
rose perianth, with broad overlapping petals; flat frilled cup of deep lemon shading to deep orange, with yellow breaks in the orange giving an effect similar to that of Radio, A. M. 1927 RED BEACON—Creamy white overlapping perianth, cup orange, frilled	16.—	8. —
RED CHIEF—White star-shaped perianth flat orange cup		8.—

Barrii Narcissus—Continued.	each	per 100
RICHMOND—A splendid large flower with cream-white starry perianth and flaring cup of pure yellow, tinged deep orange; outstanding variety, very late ROSE MARIE—Extremely large flower on strong stem; broad petalled white reflexing perianth; fluted cup of pale primrose, shading	1.—	\$
to deep primrose at the frill; beautiful and outstanding flower; medium late, A. M. 1926	32.—	
orange, the unique shade of Cheiranthus Allioni, the Russian Wallflower, A. M. 1928	8.—	
free flowering; extremely tall; late, fine for naturalizing STRIKING—Well-named, as this variety stands out at once in the largest collection; overlapping perianth of purest white with flat cup of striking color, just the shade of Orange King Calendula;		8.—
tall, graceful stems make it a "dancing daffodil"	1.—	
to brilliant orange-scarlet; extra fine, F. C. C. 1925	4.—	
of clear deep yellow-orange; unique and very attractive, F.C.C.1912 SUNSTAR—Creamy-white, broad petaled perianth, segments slightly reflexed; flat yellow cup with broad orange margin; tall fine stem and neck; Poeticus habit; beautiful both in the garden and		20.—
on the show bench, A. M. 1928	16.—	
grower; free-flowering and extra good	8.—	
deepening in the frill; extremely tall, extra fine, A. M. 1915 VILLAGE BEAUTY—Similar to Mrs. Barclay which was a fore- runner of this fine variety, medium growth, extra fine perianth with broad petals irregularly reflexed, light golden stripes, something like those of an Auratum Lily, down each petal, turning	7.50	
later to pure white; cup yellow, picoteed orange, A. M. 1920 VULCANUS—Fine cream-white perianth; slightly reflexed, frilled, flaring cup of red-orange	1.—	40.—

Leedsii Narcissus.

Division 4: Perianth white, cup white, or pale citron, sometimes tinged with pink or apricot.

pink or apricot.		
	each	per 100
ARION—Very broad-petalled perianth of double-triangle form, pure cream-white, with light sulphur-yellow cup, deep and flaring,	•	20
orange picotee at the crinkled edge, A. M. 1915 DAISY SCHAFFER—One of the best of the remarkable new Giant		20.—
Leedsii type; the flower $4\frac{1}{2}$ " across, with cup nearly 2" resembles		
a Giant Trumpet, but much more graceful in form; perianth pure white, with cup opening primrose and turning to light canary-		
yellow, deeper at the base; long, lemon yellow stigma and styles		
add to the color harmony of this remarkable flower; undoubtedly	80	
a leader for years to come, A. M. 1925 DELAWARE—Somewhat similar to Daisy Schaffer, but smaller	80.—	
throughout, and if possible even more gracefully formed; strong		
grower and very free-flowering; cup opens a golden quince color, changing to creamy lemon, exceptionally deeply crinkled; a		
splendid flower	1.—	
DUKE OF MARLBOROUGH—Reflexed perianth of artistic form;		
petals of great size and substance; pure white with light lemon yellow trumpet; very tall		20.—
EMPIRE—A dainty, perfectly balanced flower of ideal proportions;		
pure white perianth of almost veil-like transparency, yet of good substance; delicately formed trumpet of mellow candle-light		
yellow; not one of the largest but certainly one of the most		22
exquisitely beautiful of the newer light-colored Leedsii, A. M. 1920 EVANGELINE—A tall dancing daffodil with reflexed, star-shaped,		30.—
white perianth, and lemon yellow cup; fine for naturalizing		8.—
GAINSBOROUGH—Perfectly formed, broad-petalled, flat opening perianth; light canary-yellow cup with dainty orange picotee		
around the deeply crinkled edge; tall growing and free-flowering;		
exceptionally fine		32.—
with pure white perianth similar to and as large as Van Waveren's		
Giant, with a beautifully proportioned pale primrose cup deeply		
fluted and frilled and of translucent texture; unusually long pistils and anthers match these colors perfectly; a most handsome		
flower, A. M. 1930	6.—	
GRAND CANYON—Splendid representative of the new type of Giant Leedsii, which might well be termed "cactus" narcissi; the		
extremely long petals of the perianth are gracefully twisted		
forming a remarkable artistic star-shaped flower of great size; the straight cup opens pale lemon but changes to pale primrose		
and finally to cream white, the exact shade of the perianth; a		
wonderful flower for the large rock garden and to plant in groups against evergreens		40.—
against evergreens		10.

Leedsii Narcissus—continued.	each	p. 100
HERA—Broad-petalled creamy white perianth, star-shaped and deeply frilled cup of creamy white with a dainty edging of light primrose; one of the most chastely beautiful of all daffodils A. M. 1915		20.—
LAUGHING WATER—Perianth, pure white, and light canary-yellow cup; finely proportioned and graceful flower, held well above		32.—
the foliage; free flowering and excellent for naturalizing LORD KITCHENER—Fine star-shaped white perianth; canary-		8.~
yellow cup, nicely frilled, A. M. 1905 LOUIS CAPET—A dainty little flower of perfect conformation from whatever angle viewed; poised on tiptoe ready for a dance at the slightest breath of air; perianth white; trumpet light primrose, with golden anthers, and pale green shading to gold; foliage clean and upright, not too heavy; an ideal narcissus for naturalizing and for the rock garden; there is a mistaken idea that only low-priced varieties should be utilized for naturalizing; half a		0.~
dozen bulbs of such new varieties as this one make an immediate show and will increase rapidly		40.—
orange	20.—	
and sure to become immensely popular		80.—
of all daffodils	2.—	
white stripes or rays running down from the edge	16.—	
informal in character but not freakish, and a great favorite with all who see it	4.—	
perianth; extra fine, and very free-flowering		20.—

Oregon Bulb Farms Inc., 812 Journal Building, Portland, Oregon 21	
each per 100 \$ \$)
TULLIA—Remarkable beautiful, self color; fine, broad-petalled perianth and short cup with double frill, both of creamy-white, the cup having a faint pink flush at the edge	
Triandrus Hybrids.	
Division 5	
These are the cyclamen-flowered daffodils with reflexing perianth. The flowers are more or less drooping, of elegant form and graceful habit.	
p, 100 \$	
AGNES HARVEY—A most dainty daffodil of drooping habit, one to three flowers on a stem; white starry perianth with Triandrus type trumpet, of the same color, sometimes flushed faint apricot; a wonderful flower for naturalizing, especially near water, and also for cutting; desirable in every way, A. M. 1902 MOONSHINE—A beautiful Triandrus hybrid, star-shaped creamy white flower, often 3 to a stem, drooping gracefully, very beautiful and a great favorite, especially for the rock garden or for naturalizing in the shade, A. M. 1930 MRS. ALFRED PEARSON—Dainty star-shaped flowers in generous clusters; white perianth and pale primrose cup; new type from crossing a Leedsii and a Polyanthus; excellent for the rock garden PEARLY QUEEN—Triandrus hybrid, 2 or 3 flowers to a stem; star-shaped cream-white perianth, with clear lemon-yellow short trumpet; distinct pearly sheen provides the name; drooping habit; free flowering and a strong grower A. M. 1930 50.—	
Cyclamineus Hybrids.	
Division 6 Cyclamineus blood like that of Triandrus, imparts such a distinct form to Daffodils, that a separate division has been made for its hybrids, which have trumpets rich yellow, straight and tube like and perianths reflexed as in a Cyclamen, very early flowering. FEBRUARY GOLD—De Graaff, perianth golden yellow, trumpet tinged orange, very early	e -
Tazetta and Tazetta Hybrids. Division 8 SOLEIL D'OR —Yellow with orange cup PAPER WHITE GRANDIFLORA—White SOLEIL D'OR — 4.—	_

Jonquilla Hybrids.

	each	per 100
Division 7 BUTTERCUP—Similar to Golden Sceptre; a clear buttercup yellow; somewhat lighter in color than that wonderful variety and with a straighter trumpet	Ψ	12.—
CHRYSOLITE—A new jonquil yellow trumpet hybrid of well-ba- lanced form and large size; pure light golden color; a generous proportion of two flowered stems, but just as beautiful as a		12.—
single flower GENERAL PERSHING—New type of jonquil hybrid; large as some of the moderately sized Ajax varieties, such as Golden Spur; foliage is flat but very long and narrow, much more graceful than that	2	
of Ajax type, flower much more refined in form than the Giant Trumpets, $3\frac{1}{2}$ " in diameter, of purest jonquil gold; trumpet just a shade deeper than the perianth; a lovely flower in every way		
and sure to become immensely popular, A. M. 1919	4,—	8.—
GOLDEN SCEPTRE—Standard bearer of the new type of jonquil x Ajax hybrid which has become popular because so much more gracefully proportioned than the Giant Trumpets; a medium-sized perfectly built flower of deep jonquil yellow, 3" or so in diameter,		0.—
the perianth star-shaped, just a shade lighter in coloring than the trumpet, which is slightly rolled and flaring at the mouth like a miniature Ajax; the whole flower, as with the others in this class, is of the greatest substance keeping in perfect condition exceptionally long both in the garden and when cut; the foliage		
is attractive and the flowers are produced on tall tapering stems; very vigorous in growth and a strong propagator; Golden Sceptre should merit a place in every garden; late flowering, F.C.C. 1913 LADY HILLINGDON—A fine companion for Golden Sceptre, blooming earlier; cluster-flowering type, but well worth growing		8.—
even if all the flowers came singly; perianth a clear butter yellow, with broad outer petals opening flat like those of a Trillium, with the narrow inner petals curving forward around the moderate-sized shapely trumpet of deep jonquil yellow, with anthers to match; a lovely flower in every way, borne gracefully on a very		
tall stem above clean attractive foliage; ideal for cutting as well as for garden display and a strong propagator; every beholder falls in love with little Lady Hillingdon		40.—
reflexed and deeply frilled; it increases rapidly and makes an ideal daffodil for naturalizing or for the rock garden		80.—

Jone	milla	Hybrids-	continued.
a ordid	uilla	IL JULIUS -	Comming and

ORANGE QUEEN—Strong little flowers of the brightest jonquil	Φ	Φ
gold, with a distinct orange tinge and a delightful jonquil fra-		
grance; borne one to two or three to a stem, and produced in		
the greatest profusion on wiry stems about level with the tops		
of the strong but not coarse foliage; truly a daffodil for every		
garden and the gayest of the lot, large or small, for cutting, display		0
and exhibiting		8.—
RUGULOSUS—A tiny golden daffodil with tips of pointed grass-		
like foliage reaching above the flowers; the broad overlapping		
petals make a nicely rounded perianth; there are frequently two		Q
ROMULUS—Similar to Numa Pompilius, not quite so tall, and a		0.—
shade lighter in color, with a shorter and more flaring trumpet	4	
TULLUS HOSTILIUS—Of the jonguil yellow trumpet type; strong	1	
growing flower of remarkable substance, lasting exceptionally		
long in the garden or when cut; an ideal daffodil for informal		
use and for the large rock garden		20.—
WHITE WEDGEWOOD—A dainty and charming flower borne on		
a tall stem; starry perianth of cream-white, with a trumpet of		
a pale primrose; beautiful for cutting and effective in groups in	•	
front of the daffodil border, among other varieties	2.—	

Narcissus-Poetaz.

Division 8

The Poetaz group has never had the recognition it deserves. Its greatest merit is that all of them will force easily and flower from small bulbs. This, added to the fragrance and the attractive coloring of the flowers, has given them a very ready sale in Europa.

All Poetaz are hybrids from Poeticus Ornatus x Polyanthus Narcissi such as Soleil d'Or. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant, and they have the great advantage over the Polyanthus types of being much hardier. There is no better group for indoor culture in flats, pots or bowls, while if planted in time, their hardiness outdoors leaves nothing to be desired.

We offer a complete range of varieties, including the two winners of First Class Certificates in Holland, Glorious and Golden Perfection. For those interested in hybridizing, we do not know of a better field as all the existing commercial varieties seed freely.

Division 8	each \$	per 100 \$
ADMIRATION—Lemon-yellow perianth, orange cup, A. M. 1914	Ψ	10.—
ASPASIA—Pure white perianth, yellow cup, true Poeticus form,		
fine long stems		8.—
CHEERFULNES—The double Elvira, a very pleasing double white		00
Poetaz, good stems, a fine garden and show flower		20.—
DUPLEX—Soft yellow perianth, dark yellow cup		8.—
ELVIRA—Creamy white perianth, yellow cup edged orange		8.—
EURIDICE—White, broad petals, light orange cup		8. ~
FRANS HALS—Creamy white perianth, yellow cup, free-flowering		0.—
GLORIOUS—Tall, usually two flowers to a stem, held well above		
the foliage; flower delightfully informal in habit, perianth Poeticus		
white with eye orange, edged red; good for semi-shade; very early and an excellent forcer, F. C. C. 1927	15.—	
GOLDEN PERFECTION—A perfect perianth with wide overlapping	13.	
segments, deep citron yellow with mica sheen, and cup of pure		
gold perfectly proportioned to balance of flower; calyx grey-green		
flecked with gold; a Giant Poetaz unique in its class, F.C.C. 1926	24.—	
HELIOS—A Poetaz of Poeticus habit of growth, on a tall very		
graceful stem, instead of on the fat, short, Polyanthus type; the		
flowers, borne in clusters, have wide open pure white perianth		
with buttercup yellow cup; a good variety for forcing		8.—
IDEAL—Bears up to seven flowers on a stem; perianth white and		_
cup dark orange		7.—
KLONDIKE—Rich yellow perianth, darker cup, one of the finest		0
yellows		8.—
LAURENS KOSTER—Creamy white perianth, lemon-yellow cup,		6.—
free-flowering, recommended		6.—
LOUISE—Pure white perianth, yellow cup		6.—

attractive novelty		7.—
SYCAMORE—Large pure white perianth, dark yellow cup		40.—
or ordinates and pure times permining mark years was treet		

Poeticus Narcissus.	1	100
Division 9. CHAUCER—White perianth, with broad petals, separated; of in-	each \$	per 100 \$
formal habit, intensely vivid scarlet cup; very early; fine for		
exhibition; very tall		8.—
COMUS —Fine flower of recurvus type; medium height and excellent		
for the rock garden; pure white perianth; flat lemon yellow eye, frilled deep red; fine foliage; excellent for naturalizing or for		
the rock garden		8.—
DECAMERON—Large, snow-white flat opened perianth; with		
pheasant's eye cup, yellow edged red; tall stem holds flowers well above clean, greenish-blue foliage		40.—
DULCIMER —Pure white perianth; cup of a striking greenish yellow		10.—
with very broad, scarlet orange margin; different and very		
striking; extremely late, A. M. 1927		32.—
EDWINA—Purest white perianth, broad and overlapping petals, very flat cup, yellow-edged red. Fine form and substance, highly		
recommended. A. M. 1926	1.—	
GLORY—White perianth, yellow cup, edged red		8.—
HEPTAMERON—Moderate-sized flower; very dainty, but of good		
substance; perianth with broad outer petals, almost circular in form, of pure white, and flat eye, orange with reddish edge		36.—
HOMER—Large star-shaped perianth, gleaming white, with flat eye,		
yellow edged red; tall, graceful, and free-flowering; one of the		
best of all the new Poeticus varieties; very late		8.—
petals, A. M. 1914		8.—
JULIET—Saucer-shaped perianth of pure white, petals, inclined		
to flex forward; flat frilled cup with bright red edge		8.—
KENTUCKY —Absolutely distinct variety showing new coloring, the perianth being a distinct coffee shade, with orange-red cup; flowers		
of moderate size, but borne well above the foliage on splendid		
slender stems; unusually dainty flower	32.—	
Mme. SANS-GENE—Overlapping perianth of pure white; deeply		40.—
frilled flat eye of solid color, brilliant orange		10.—
blooms to a stem, growing 8 to 12 inches tall; glistening snow-		
white perianth gracefully reflexed from a "pheasant's eye" cup; a wonderful little daffodil for the rock garden, flowering when		
most of the other early bulbs have passed		40.—
PELLEAS—New giant flowered type like Edith and Peggy Bauer;		
possibly larger than either; extremely broad overlapping perianth petals; extra tall and strong grower	30.—	
ORNATUS—A good commercial Poeticus		6.—
ORNATUS MAXIMUS—Extremely broad overlapping petals, re-		
curving from typical pheasant's-eye cup; a larger Ornatus, unsurpassed for naturalizing		8.—
RUPERT BROOKE —One of the finest of the new Poeticus varieties,	2	
beautifully proportioned; small pheasant's eye reddish cup SNOW KING—Glistening white perianth with exceptionally broad	2.—	
petals; cup with broad red edge; outstanding among the newest		
Poeticus varieties; tall growing; good neck, A. M. 1927	2.—	

Double Narcissus.	each	per 100
Division 10	\$	\$
ALBUS PLENUS ODORATUS—Snowy white, sweet-scented,		
highly recommended		6.—
tively formed, resembling a carnation		8.—
DAPHNE—The most promising novelty of 1928, pure white, sweet		
scented, large double flowers, early forcer, A. M. 1928	12.—	
DUBLOON—Longer petals of primrose, interspersed with shorter		0
petals of canary yellow, giving a golden glow to the entire flower INDIAN CHIEF—Very large and very double, bright yellow inter-		8.—
spersed with orange; the petals curled and twisted	4.—	
LIVIA—Taller and smaller but of better form than Indian Chief;		
sulphur-yellow and burnt orange, A. M. 1930	8.—	
MARY COPELAND—One of the famous varieties of the new semi-		
double type, this variety has been termed the most striking double		
in cultivation; the longer petals are pure cream white with a golden ray down the center, interspersed with shorter petals of		
lemon and brilliant orange, giving a three color effect; unsur-		
passed for the garden or the show bench, F. C. C. 1926	12.—	
MOULIN ROUGE—Very lovely double, long primrose petals shading		
to cream down the center, short petals deep yellow orange, giving		
a tri-color effect; light citron yellow overlapping perianth, orange cup deeply frilled; very late, A. M. 1926	8.—	
ROYAL SOVEREIGN—Valuable addition to the Twink group of	0.—	
new type semi-doubles most graceful of all in form, and the most		
charming, if not the most striking, in coloring: creamy white inter-		
spersed with crinkled and frilled trumpet petals of primrose yellow, shading to pale primrose as the flower develops; a daffodil		
appealing to every flower lover's fancy, A. M. 1914	2.—	
SNOWSPRITE—A double Leedsii; flowers borne on tall stems;		
pure white, interspersed with very light lemon; a novelty and		
a good florist's flower; extremely late	1.—	
THE PEARL—Nice flower; not too double, creamy white, interspersed with sulphur-yellow, deeper at the center, very charming		8.—
TEXAS—Taller growing and of better form than Indian Chief; pale		0.
yellow interspersed with brilliant orange; very late, A. M. 1927	12.—	
TWINK—Perhaps one of the most promising daffodils we have		
introduced. It is a double of the semi-full type, the petals alternating a soft primrose and clear orange, and so arranged as to		
give the flower a most attractive appearance, and making it a		
most adaptable flower for large scale decorative work. Twink		
forces as easily as Golden Spur, but also flowers very early in		
the field, is very free-flowering and hardy and we sincerely be- lieve that, as soon as the stocks become larger, this variety will		
be used by every commercial grower. In the meantime it is a		
most splendid showflower and has created much interest when-	,	
over shown, A. M. 1926	1.— 8.—	
TON SION—I are yenow, good forcer	0,—	

Miniature Daffodils	
Division 11	
The following are charming little subjects for rock work, where their d	
flowers are seen to perfection. They should be left undisturbed for years, a	
happy will soon establish themselves and afford a lovely picture in early specific and afford a lovely picture in	
All the Bulbocodium (except monophyllus) and the Cyclamineus like moisture	
should therefore be planted at the foot of the rockery. Bulbocodium monople flourishes in a warm dry sheltered situation planted in almost pure sand;	
coming into bloom give water freely. Triandrus albus (Angel's Tears) and J	
folius delght in partial shade and a light gritty soil, and should be given a	well-
drained position.	each
BULBOCODIUM CITRINUS—Large sulphur Hoop Petticoat, very beautiful	•
pale citron-yellow, ht. 6 to 8"	0.20
BULBOCODIUM CONSPICUUS—Yellow Hoop Petticoat, flowers rich golden-	
yellow of hoop-petticoat form and rush-like foliage, ht. 6"	0.20
BULBOCODIUM MONOPHYLLUS—White Hoop Petticoat, producing in	
winter little snowy white flowers of exquisite beauty, ht. 6"	0.25
CYCLAMINEUS—The yellow Cyclamen-flowered Daffodil. The trumpet is	
rich yellow, straight and tube-like, elegantly serrated at mouth, while the	
perianth is reflexed like a cyclamen	1
JUNCIFOLIUS—Small graceful rich yellow flowers, rather smaller than a	
buttercup, with a dainty little flat crown	0.30
MINIMUS—True. The smallest and dwarfest of all daffodils, producing outdoors	0.00
in February dainty little trumpet flowers of a rich full yellow, height about 2"	0.25
MINOR—True, a most graceful and charming very early-flowering miniature	
daffodil of Maximus form, flowers with full yellow perianth gracefully twisted	
and the miniature trumpet elegantly flanged at mouth, ht. 6"	1.—
TRIANDRUS AGNES HARVEY—A beautiful chalice-cupped hybrid, perianth	
snow-white, cup pure white sometimes flushed a soft apricot, one to three	
blooms on a stem, slightly drooping, ht. 13"	0.12
TRIANDRUS ALBUS—An exquisitely beautiful little species, it is of slender	• • • • •
growth and produces a cluster of elegant creamy white little flowers with	
globular cup and perianth reflexing as in the Cyclamen, ht. 7"	0.16
TRIANDRUS CALATHINUS—The flowers are produced in clusters of two	
and three are snowy white and more than twice the size of Triandrus Albus	
with long goblet-shaped crown prettily fluted, the foliage has a curious	
habit of curling over, ht. 7". A. M. R. H. S.	1
TRIANDRUS CONCOLOR—True, bearing clusters of dainty fragrant flowers	-
of similar form to Triandrus Albus, but of a uniform soft yellow, a rare and	
beautiful little daffodil, ht. 7"	1
TRIANDRUS PULCHELLUS—A very beautiful little daffodil with elegant	
clusters of flowers, primrose perianth and creamy white cup, ht. 9"	0.40
TRIANDRUS QUEEN OF SPAIN—A wild hybrid. The flowers vary slightly	0.11
in size, and sometimes in form of trumpet, but all are a uniform, delicate	
creamy-yellow with graceful reflexing perianth, ht. 12"	0.16
W. P. MILNER—A charming free-flowering variety, with dainty sulphur-	2.20
colored flowers, one of the best varieties for pots and for growing in fibre	
in bowls. A. M. R. H. S.	0.20

We can offer from our own stocks small quantities of these daffodils.

Dutch Iris-De Graaff Hybrids.

This very distinctive group is of very recent origin and has in a few years won international recognition. The flowers are not only superior in substance, brilliancy and purity of color, but also earlier, larger and of greater refinement than the old Dutch and Spanish Iris. The new Hybrids we offer are readily distinguished by the narrow orange stripe on the falls, while the older varieties have a larger yellow blotch.

These iris are unsurpassed as cut flowers, since they will stand any amount of handling and traveling, while their earliness and good forcing habits make them valuable for the commercial grower and florist.

Their hardiness and large color range have made them very popular for garden purposes, and, though in extreme climates they need some protection, they seem to do quite well as far north as New York. The varieties we list have been carefully selected to give the full range of colors and we have large stocks of the varieties that have proven most profitable in the English and European flower markets. We also have a complete collection of the latest novelties, which show great improvements.

Iris Reticulata.

The violet-scented iris, flowering outside in February, brilliant deep violet-purple flowers with golden-yellow blotch.	р. 100	p. 1000
We have secured a very fine strain of this scarce iris and can		
offer a limited quantity of extra strong bulbs	24.—	200.—

Spanish Iris.

Since the new Dutch iris we offer are so far superior, we do not offer in this list any of the old Spanish types. We have, however, two unique novelties with ruffled petals, which we recommend strongly.

	8
GOLDEN LION—26 in., F.C.C.H. 1924, standards lemon-yellow, falls golden	
yellow, standards not so much frilled as falls. Very beautiful	1.—
GOLDEN WONDER—26 in., A.M.H. 1918, standards and falls golden yellow,	
both very much frilled. A very graceful and attractive flower	1.—

Iris Tingitana Hybrids.

The two Tingitana Hybrids we offer are a distinct improvement over the French Tingitana iris, in that they can be depended upon to flower and in that they are hardier. Recent winters have shown us, however, that considerable care should be taken in planting these bulbs outdoors and we recommend them only for greenhouse forcing. Plant the bulbs in deep pots as soon as received, plunge the pots in beds and cover with a 2-inch layer of pure soil. If necessary, cover this with straw or litter as a frost protection. Bring the pots into the greenhouse towards the time frost can be expected and keep them cold but frost-safe (40-45° Fahr.). As soon as the buds are palpable, the temperature can be increased gradually to 55° Fahr. It should be kept in mind that irises want more water than any other bulbs. For very early forcing only the top size bulbs should be used.

THE FIRST—24 in., F.C.C.H. 1922, standards and falls beautiful	\$	\$
marine-blue, strong stems, excellent forcer	12.—	100,—

blue, excellent forcer	12. —	100.—

Iris Filifolia.

IMPERATOR—Large free-flowering, dark blue iris. Later than the		
Dutch, but a good commercial variety	2.—	30.—

Earlham Large-Flowered Hybrid Montbretias.

These are the magnificent new Montbretias which have attracted so much attention the last year or two at the Royal Horticultural Society's shows in late summer and during autumn and gained the Gold Medal. They are a completely new race, of flowers, the sesult of hybridization successfully carried out by the late Mr. Sydney Morris of Earlham Hall, Norwich. They represent an enormous advance over the ordinary montbretias in commerce, being generally much taller and more robust in growth, and having flowers of great size and beauty, some measuring 3 to 4 or more inches in diameter. These montbretias make first-class border plants and are of great decorative value for cutting.

Montbretias are of easy culture, preferring a light loamy soil well-enriched with leaf mold, but no manure or chemical fertilizer should touch the roots. A little bone meal can be used and a light dressing of lime may prove beneficial. The moisture supply should be good. They thrive in the partial shade of borders or shrubbery as well as in full sunlight. If planted in the fall, mulch lightly with peat or litter but not manure.

In severe climates spring planting is best and they can be treatment as gladioli.	given the	same p. 1000
GOLDFINCH—The branching heads of flowers are of good size, bright yellow with small maroon blotches at center, outer petals heavily shaded brilliant cherry-scarlet, very decorative HIS MAJESTY—A glorious variety, flowers measuring, 4 inches or more across, very broad-petalled, deep velvety scarlet shading	15.—	120.—
down to gold, reverse of petals dark crimson shading down to gold, height 4½ feet; the largest-flowered of all montbretias. First Class Certificate, R.H.S. and Glasgow	18.—	150.—
some, height $3\frac{1}{2}$ feet, Award of Merit, Haarlem and R.H.S	18.—	150.—
