THE PROSPECTS OF THE MONEY MARKET IN THE NEW YEAR.

The beginning of a new year commonly inclines us to look forward in money matters as well as in others. It is, owever, in general by no means easy to do so. The state of the money market is affected by so many disturbing agencies, and depends on such imperceptible causes, that no one who understands it will hazard a confident prediction respecting it. But although we cannot on such a subject hope to obtain absolutely certain conclusions, it may be useful to enumerate shortly the principal considerations which will probably influence the state of the money market during the present year, and to show what events are likely to take place in it, and what are not so.

The fluctuations in the value of money have been during the last four years very remarkable. In 1856 and 1857, its value was remarkably high; in 1858 and 1859, it was unusually low. In the two former years-in 1857 especially, the bill-brokers and joint stock banks were giving rates of interest for money much higher than any which they had ever offered before; during the last two years money has been, according to the cant phrase, "a drug" in the market, and it has sometimes been difficult to dispose of it satis-factorily on any terms. The explanation of this difference is not at first obvious. The foreign trade of the country has occupied, on the whole, quite as much of our capital in 1858 and 1859 as it did in the two previous years. The returns of the Beard of Trade for the country characteristic returns of the Board of Trade for the respective years show this, as we have frequently remarked, conclusively. The home trade of the country is still more remarkably prosperous. Probably so much sound and legitimate business has never been done in the domestic trade of the country as is being done now. We are employing on the whole as much of our capital, if not more, in the various branches of trade now, when money is cheap, as we were formerly when

it was very dear. The explanation of this is the contemporaneous augmentation of the means of the country. Year by year we make in this country a vast annual saving, the exact amount of which can never be accurately known, and the best estimates of

to compete with the funds which were previously accumu-lated there. Unless, therefore, there is a new source of demand to counterbalance this new source of supply, the value of money must fall. Although we are doing now as much trade as when the value of capital,-measured by the rate of interest in Lombard street, was exceedingly high, it is quite natural that the value of capital, when estimated in the same way, should now be low. We have much more in the same way, should now be low. We have much more capital than we had then to meet nearly the same demand and do nearly the same work.

This is, we think, the consideration which should most weigh with us in trying to form an anticipation of the future. The desirable and natural course is, that year by year the inventive business-talent of the country should open new fields sufficient to employ its new capital. In every year the new investments that are suggested *ought* to absorb the new capital that is saved. And in general we believe that this will be the case. It is true that some economists have thought that there were in operation causes which would probably reduce the value of capital in this country, but practically looking at the general history of the money market during the present century, we see little sign of a progressive fall, and we think that the causes alluded to are at present, and are long likely to be, counteracted by others of a contrary tendency, and at least an equal power. On the whole, we do not doubt that the business talent and practical sagacity of the country will be found quite able to practical segacity of the country will be found quite able to employ our new capital year by year in a proper manner; and the distributing machinery of banks and discount esta-blishments is now so ample and is so ably directed, that the new savings of the country will, we believe, ultimately for the most part get into the hands of good men of business, though they are very often accumulated by persons who are wholly unable to form any correct judgment of business matters matters.

We have now, however, to deal with a somewhat different state of things from this natural and ordinary one. We have, so to say, got behind. Our investments have been for the last two years in arrear of our accumulations, and we have not only to deal now with the customary employment of our very last savings, but also with some part of the savings of former years which are still on our hands. What, then, is likely to be the amount of this unusual pressure upon us, and what are likely to be the new ways of employing money that will be open to us?

We have, as we have explained, no accurate account of the uninvested savings of the country. Their amount is one which we cannot hope to estimate: the data for so doing are not given to us. But we possess a sort of barometer which may in part indicate to us when they are great and when they are small, and which, when properly used, will tell us something of their fluctuations from time to time, though nothing of their absolute amount. We allude to the returns of the Bank of England. We may assume that when the Bank has a large accumulation of bullion, and overflowing banking resources, the savings of the country are to an unusual extent still uninvested, and that when the Bank has no superfluous means, the precise contrary is in all like-lihood the case. What, then, are the facts? The most

important part of the Bank returns were last year and now respectively as follows :---

the state of the s	Jan. 8, 1800.		Jan. 4, 1800.	
Notes in circulation	21,704,045			
Public deposits				
Other deposits		********		
Public securities		*********	10,923,782	
Other securities				
Bullion		******		
Reserve	12,161,000	********	9,110,729	

We see, therefore, that in the course of the year the reserve of notes in the banking department has diminished by three millions, and the bullion by 2,600,000/. The loans, likewise, have increased by three millions, while the deposits have not varied very materially. The Bank has, on the whole, employed a considerable sum more than it did last year in advances to the public, and we may reasonably infer from these facts that a rise in the rate of interest, though not immediately to be anticipated, is nevertheless perceptibly nearer than it was last year.

We see no reason, therefore, to believe that the past and uninvested savings of the country, which are now reducing the rate of interest, are very large, or likely to be very influential. As far as the best indications which we have go, they are not so.

What, then, it remains to ask, are the channels of employ-ment likely to be open to us? Our domestic trade, we may consider, is likely to be, and now is, sound, good, and in-creasing; and this will be to a considerable extent a satis-factory source of investment. Nor can the domestic trade long increase alone. We import the principal raw products required for our principal branches of industry from foreign countries; and if we increase our domestic consumption of manufactured goods, we must buy the necessary materials more largely abroad. Shall we be able to do so? As far as respects the United States, which are, perhaps, the most important, their position is to a great extent similar to our own; they will be able to trade with us as much as they ever were; the value of capital there is below its ordinary rate just as it is here. On the Continent political disturbances will retard, it is probable, for a considerable period any very rapid development of trade. The vague and half-unaccounted for sense of insecurity which to some extent now prevails abroad, is of all states of mind the most unfavourable to trade. Definite danger may be removed, and definite fear may be dispelled; but what is in-definite shrinks from confutation in argument, and is only very gradually removable by an alteration of facts. Still, on the hole, the ordinary and natural development of industry may be expected to have some effect even on the Continent, and to belikely gradually to augment our trade with it. Moreover, the resources of India for productive purposes are only beginning to be made known, and if they can be properly used, will cause a great increase of our trade both of export and im-On the whole, there seems every reason to anticipate a port. considerable addition to our commerce during the present year. The foreign part of it has been for a considerable period substantially stationary, and may now fairly be expected to increase with more than ordinary rapidity. On the whole, therefore, we are inclined to think that the

On the whole, therefore, we are inclined to think that the unusual depression in the value of money which has marked the year 1858 and 1859, will not continue during the year 1860. We do not anticipate any immediate change, and minute temporary circumstances make money, as we write, a shade less valuable. But if we could venture to make a definite anticipation for the coming twelvemonth, it would be that the trade of this country, both foreign and domestic, would increase during the course of it, and that money would gradually and steadily rise in value, to some extent, in consequence.

THE LOOMING CONGRESS.

THE caccethes scribendi has been fatal to many reputations, and is dangerous to all. Especially is it the besetting peril of public men. Ministers and Princes, above all men, should say little and write less. Even Job among his miseries, clothed in sackcloth, sitting in ashes, and scraping himself with broken potsherds, could wish no more certain shipwreck to his enemy than that he might commit the irreparable blumder of writing a book. Expression of every kind has its shoals and quicksands, its sunken islands and its coral reefs;

but expression by the pen-the litera scripta which remains like the stain of blood-is of all bad habits at once the most seducing, the most formidable, and it would seem also the most incurable. Lord John Russell got into a sad scrape by the Durham letter. Lord Ellenborough gave us the measure of his wisdom by the Somnauth Proclamation. Sir Edward Bulwer Lytton floored himself by the Ionian Dispatch. But of all sinners and sufferers under this cruel malady, the Emperor of the French is perhaps the chief. For a great statesman and a great potentate he has at all times been too ready with his pen ; for a silent and reserved man, too, he ready with his pen, for a sizeh and the tongue ;---and his words, whether written or spoken, have a peculiar and characteristic ring about them which ensures at once recognition and remembrance. They cannot be forgotten, and are sure to be brought up against him. The opinions and criticisms of his "Idées Napoléoniennes" are cast in his teeth as mercilessly and as embarrassingly as Hansard is flung in as increases, and as encorrassingly as ranserd is hung in the face of a ministerial senator by an opposition aspirant. His sparkling sentence, when defending himself before the House of Peers,—though we understand it is ex-punged from the authorised edition of his Works,—has stood adly in the way of the cordial confidence of Englishmen. His letter to Edgar Ney must have been a thorn in his side during the whole period that the French occupation of Rome was doing the very opposite of what that letter urged and promised. Europe would have thought much less of his two promised. Europe would have thought much less of his two great wars and his constant preparation for contingent hos-tilities, had it not been for his Bordeaux declaration, "L'Em-pire c'est la paix." No one could have greatly blamed the unsatisfactory peace of Villafranca, had they not had his magniloquent proclamation at Milan wherewith to contrast its impotent and irreconcileable provisions. His letter to the King of Sardinia, stating what were the terms he intended to demand from the meditated Congress, dissatisfied Eng-land, disgusted and alarmed Italy, and lowered deplorably his reputation as a practical and qualified statesman. And his reputation as a practical and qualified statesman. now the Pamphlet which is the talk of all Europe-And and which no one hesitates to ascribe to his dictation or at least to his command-while recovering the good-will of Italy and England, and restoring his reputation for capacity and sense, seems to have rendered at least problematic the meeting of that Congress which he so ardently desires. The Pope says he will not attend unless the spoliatory Pamphlet be disavowed. Naples, Spain, and other Catholic Powers, declare that they will join in no Congress in which the Pope is not represented. Russia, it is said, has protested against ideas such as those promulgated in the obnoxious *brochure* being received as bases for discussion ; and Austria demands, but does not obtain, that France shall repudiate doctrines so inconsistent with the treaty of Villafranca, before she can take part in a general European Areopagus.

Now, much as we approved the general purport and arguments of the document in question, we can perfectly understand the unwillingness of the Pope and the other Legitimate Powers to become parties to a solenn conference of all the great European authorities to discuss projects and principles so startling, so liberal, and so beneficent; —especially with the probability that the preponderating influence of France, England, and Prussia conjoined would be exerted to procure their sanction. We scarcely expect that Louis Napoleon will disavow his programme ; we sincerely hope that he will not ; nor, if he did, do we imagine that much effect would be produced by the denial. Therefore—especially since the retirement of Count Walewski—we think it increasingly probable that the proposed Congress will never meet ; and, as our readers are well aware, the disappointment will be no grievous one to us. We always looked upon England's participation in such an assembly with grave uneasiness, and with by no means sanguine hope. The Congress might have done much good ; but it might also have involved us in serious embarrassments, in perilous engagements, and in questionable guarantees. If, indeed, we could have induced all the great Powers to embrace and to publish, as a maxim of the Public Law of Europe, the grand doctrine of non-intervention between Sovereigns and subjects, we should have achieved a grand and permanent benefit sufficient to have justified much labour and some risk. But if, as is more probable, we had merely been able to assist in securing the liberation and consolidation of Central Italy at the cost of

THE ECONOMIST.

guaranteeing to the Pope the residue of his subjects and territory to all time and in spite of any misgovernment, it may well be doubted whether the gain would have warranted the price.

It is not easy to foresee what effect will be produced by the non-assembling of Congress on the evolution of the Italian problem. We apprehend, how ever, that it can scarcely be otherwise than favourable. It is pretty clear that the views of the Emperor of the French have undergone a change for the better since the peace of Villafranca and the ill-omened letter to Victor Emmanuel. It is more than probable that he has obtained, at all events, the general countenance of England for this favourable modification of his schemes. The Central Italians and the Romagnese have at least the advantage of the status quo, and this is a great point. Parma, Tuscany, and Modena have been deserted by their Princes, and have formally abjured the fugitive dynastics. France has declared distinctly that she will not force them back upon an unwilling people, nor permit other Powers to do so. Romagna has not, indeed, been abandoned by the Pope himself, but the foreign legates, by whose means alone he had long governed it, fied, and can never again, we may be sure, be permitted to return ;—and their flight was virtually equivalent to a Papal resignation. De facto, Romagna is as free, and was as completely deserted by its Ruler, as any one of the Duchies. It is scarcely possible that, in the face of the arguments and declarations of the Pamphlet, Louis Napoleon can use force to restore the Papal authority in this province ; or that he can allow Austria to do so. It is certain that any such step would meet with the most earnest and solemn opposition from Engand. It is equally certain, we think, that the Pope cannot, by his lost territory. This being the case, Central Italy, including the Legations, may be considered to be really asian independent, and competent, therefore, to choose its own destiny and its own Ruler. Moreover, one of the special objections made a few weeks since by the forment when all the European Powers were about to assemble in solemn conclarve to deliberate upon their future look and decisive step in thi

There are, however, two rocks ahead, in avoiding which they will need to exercise both caution and resolution. The Emperor of the French may be willing enough to guarantee to the Central Italian States security against the employment of foreign force to coerce them into the reception of their discarded Sovereigns, but not willing to recognise as promptly and uareservedly as England would do, either the right of their present chiefs and national assemblies to speak in the name of the people, or the right of the people themselves to insist on amalgamation with Piedmont. If the national assemblies had adopted a course more in accordance with his supposed secret aims, we apprehend that he would never have demurred to their authority or inquired too closely into their credentials. But as long as they persist—and we earnestly trust they will persist to the end—in demanding to form part of one single Central Italian State strong enough to hold its own against any ordinary adversary, it is much to be feared that he may require an appeal to universal suffrage, as the only mode which he will admit as genuine and valid of ascertaining the popular decision. He has, consistently enough, always declared that the votes of mere numbers are the ultimate and only just sanctions and bestowers of Imperial Power; and it is just possible that such an appeal as this, made under French auspices and conducted under Priestly influences, might be more favourable to the views of Louis Napoleon than to those of count Cavour. It is possible also that, even if the result of such an appeal to the comparatively ignorant and uninterested masses were to result in an overwhelming demand

of emancipation from Grand Ducal influence and of annexation to Piedmont, not only France but the other European Powers might demur to the recognition of such a proceeding, and might declare that so great a *European* change as the creation of a powerful State in Italy, of at least the second order of greatness, could not be consummated without their sanction.

Both these are probable and imminent dangers, especially the latter, —and it behoves the Central Italians to act both warily and firmly. At present their position is an excellent one; and perhaps patience and inaction will be their wisest course. For, virtually, their annexation as well as their liberation is a *fait accompli*, though neither recognised nor formally completed. They have all declared in favour of a junction with Piedmont, and are now all united under one Regent, recommended, and in fact appointed, by the King of Piedmont. Buoncompagni governs Parma, Modena, Tuscany, and Romagna, *technically* as their chosen ruler, but ostensibly and really as the nominee of Victor Emmanuel. To change this state of affairs either foreign intervention or internal discord will be necessary. Let the Italians keep clear of the latter, and be careful to give no pretext to the former. The duty of England in this conjuncture is, we think, plain and heneficent. Let her at once precomines the de-

The duty of England in this conjuncture is, we think, plain and beneficent. Let her at once recognise the de facto Government of the States of Central Italy, and, if possible, induce France to do the same; — and let her declare in the strongest and most public language that she will be no party to the exercise of any coercion, of any sort whatever, of the popular will in those provinces; and will oppose most resolutely all such foreign interferences. Let her avow also, as distinctly as she feels it, that in her judgment the mere purchased, intimidated, or cajoled votes of uninstructed masses can never, as an indication of national resolve, be put in competition with the deliberate decision of the middle and upper ranks, comprising all portions of the nation sufficiently educated to form a qualified judgment, and sufficiently independent of priestly influence and foreign intrigue to form an honest and courageous one.

THE PRESENT RULES OF MARITIME WARFARE. WE gave but very recently a careful exposition of the injurious mode in which the present laws of maritime warfare had operated on a late occasion to some extent, and were likely to operate in future to a much greater extent. We return to the subject, because, as yet, it is not, we think, apprehended in its true relations.

A notion has been expressed that the proposal to exempt from capture the mercantile ships of belligerent nations, and the merchandise of such nations on board such ships, is not a genuine suggestion for the benefit of the world at large, but a sinister proposal which emanates from a spirit of mercantile selfishness. Merchants and shipowners, it is said, wish to go to war without risk; they wish to do so by proxy; they wish to confine the operations of war by sea to vessels of war, simply that their cargoes may not be impeded, and their ships may not be captured. They wish, it is said, to enjoy the glory of our national exploits, but to suffer none of the inconveniences, to share in none of the sacrifices, by which all victories are obtained.

But, on principle, why should the mercantile classes or the shipowning classes suffer any inconvenience or make any sacrifice which the whole nation does not make? Home traders, brokers, and shopkeepers are not affected by a war, cases of invasion excepted, except by an increase in the taxes they pay. Why should the shipowner, why should the merchant who has goods on the seas, be treated differently in any respect? —why should either of them suffer more? Undoubtedly, if it is necessary that property at sea should be subject to a different rule from property on land, —if the adoption of that varying rule will make wars shorter, and peace more durable, —if the existing usages of maritime warfare are the best usages,—then let those suffer who must suffer. If it be necessary that the merchant or the shipowner be more injured by war than other classes, so let it be. But there is no primâ facie justice in it. So far as it is inevitable, it should be endured, but it must always be a hardship and an evil.

Nevertheless, as we showed in our former article, there is not now any occasion for discussing the old theoretical argument as to the best code of maritime warfare, on which so many jurists have written, and on which such discordant

views have been advanced. The question is now much narrowed, and can be discussed in a far easier and more business-like manner. We should despair of asking the attention of the approaching Congress to the subject, if it were not for the important conclusion that was come to at the last.

4

As we have before explained, the last Congress of Paris decided as between the States who were then and there represented, that neutral ships should in future make neutral goods-that is, that all cargoes not being capable of being used for military purposes should be imported into and ex-ported from a belligerent country without liability of cap-ture and free of question. In all former controversies on the subject, this was the principal point under discussion. England especially contended against it. We conceived that had the command of the sen ; we wished, not unnaturally and not improperly, to make use of that command; and we therefore contended that we had a right to confiscate the cargoes of our enemies on board neutral ships, as well as (in the converse case) the goods of neutrals on board ships that belonged to our enemies. We steadily maintained this doctrine for very many years. But when the Russian war occurred, we found that we could no longer act upon it, or contend for it. During the long peace the number of ships that did not belong to us had very largely increased; the mercantile navies of all the States in Europe, and of America still more, had been much augmented. We found in practice that we could no longer adhere to our former doctrines; we could no longer deal as we had formerly done with the ships and cargoes of neutrals; we were obliged to yield to necessity. The resolutions of the Congress of Paris only expressed in a formal manner the actual practice of the Russian war. They have, therefore, not only the moral weight which belongs to all obligations of treaty, but the inherent strength which belongs to conclusions that have been found on actual practice to be necessary. We cannot, if we would, rescind them; they are sure to be in existence during any future We cannot, if we would, rescind war, and are sure to be acted upon.

The specific alteration now suggested is to make an addition to these resolutions: it is proposed to put the ships of belligerents on the same footing as the ships of neutrals. Let us shortly consider this suggestion, first with reference to the world at large, and next with reference to the particular interests of England.

The obvious doctrine as to all regulations of war is, no suffering and no inconvenience should be permitted by them which are not conducive to the legitimate end of war, the speedy attainment of a satisfactory peace. All ineffective pain is so much pure evil. The existing regulation as to ships belonging to the belligerents is, we think, clearly condemned by this principle. Why should the ships of a nation at war be subject to capture at sea? Will it tend to make the whole nation presumably willing to make a peace ? Not in the least. Shipowners are in every country a small class of capitalists. The nation at large will bear their evils very easily, and will not make peace a day the sooner for them. Under the principle for which England formerly contended, the result was different. So long as you were permitted to destroy the whole commerce of a country so long as you could intercept its whole imports, and shut in its whole exports—so long as you could ruin its whole external commerce-so long as you could injure large classes of producers in it, and straiten still larger classes of consumers,—you had an effective instrument for ensuring a speedy peace. You caused much suffering it is true, but you had an object in so doing. If your war was a just war, you might thereby obtain a just peace. On the other hand, the present remnant of the restrictive system is so much uncompensated evil. You will ruin the shipowners of the nation, but you will not thereby conquer it. It is as if in a war on land you exposed to peculiar rapine the property of the tanners or the grocers. To the general interests of the civilised world, we may be sure that the suggested alteration will be beneficial.

How is it with the interests of England? This is comparatively an inferior topic. If the alteration of a certain usage is shown to be for the general interest of the civilised world, it would be national selfishness to oppose such alteration. We should incur a just odium in all countries, if we opposed what is for their benefit, simply because it was not

for ours. But how do the facts stand ? Would England be injured by the abrogation of the existing rule ?

We have shown that, on the contrary, only a few months since, England was inconvenienced by the existing rule. American ships were then preferred to ours for the most valuable cargoes, wherever they could be found. The United States, from their distant position and fixed policy, were sure to be neutral in the contest between Austria and France. We, from our nearer neighbourhood and different principles, might not be neutral. As the existing rules give a very great advantage to the ships of neutrals over those of belligerents, those of America were naturally and inevitably preferred to ours. Now that the Navigation Laws are repealed, it is quite possible that English ships might be practically excluded from the trade between Calcutta and London—that they would not be chartered to bring an ounce of gold from Melbourne. A long period of European confusion would, with the present rules of maritime warfare, and under our present laws, be sure to effect this.

Again, suppose that England was not only thought likely to become a belligerent, but did in fact go to war, would she then gain or lose by the suggested alteration? It is clear that the nation which suffers most from the present rules will be the nation which has the most ships, the most valuable cargoes on board these ships, the greatest number of both in the most out of the way and unprotected places. The nation that suffers least will be that which has the fewest of all these. Surely it is not needful to say which of the two England is. We can hardly anticipate that we should be ever at war with any nation which has ships so valuable, or so many costly cargoes on board these ships, or commerce so diffused and ramified. There is, at least at present, no such nation. We may fear that England will be conceived to have a prejudice and selfish interest in the modification of the present rules, but we cannot suggest even a plausible argument to prove that she is interested in maintaining them.

It should be understood distinctly what the present proposal really is. We do not suggest that the rules of blockade should be altered, or the regulations as to goods which are contraband of war. These must stand on their own merits, or be condemned by their own defects; they have nothing to do with the point under discussion. We only propose that the mercantile ships of belfigerents should be put on the same footing as the corresponding ships of neutrals; and to this distinct proposal we have not as yet seen a distinct objection.

CATHOLIC CLAIMS AND ITALIAN RIGHTS. RELIGIOUS controversies are as a rule most studiously avoided by sober politicians and sensible journalists. To enter into them is commonly to involve oneself in a whirlwind of rage and abuse, out of which no good can come, and to be involved in irritation, misrepresentation, and annoyance incalculable, only to reap at last the gratifying conclusion that no result has been or could possibly have been achieved. Only when such subjects are brought inevitably into the political field ; when religious disputes become questions of political significance ; when the theologians of one school or another endeavour to force their views as a rule of political action upon the country, is it needful or desirable that statesmen or newspapers should take notice of topics which at ordinary times lie wholly apart from their proper sphere. And when such occasion occurs, it is well that the unpleasant task should be assumed boldly and decidedly ; that no compromise or vacillation should be allowed to seem possible; and that the course which is politically right and wise should be asserted and defended in distinct defiance of the dogmas of those who denounce it as theologically wrong. It becomes those who are here on their own ground sternly and fearlessly to rebuke the passions of those who have brought their feuds and quarrels to be fought out on neutral territory; and while avoiding all irritating treatment, all unnecessary offence to those whose feelings are already in a state of extravagant soreness, to indicate

unshrinkingly a determination to act without them, and if need be against them.

Now the Irish—and we are sorry to add the English _Catholics have at present forced the Liberal press into this attitude of rebuke and resistance by the course which they have, as Catholic Christians and British subjects, seen fit to pursue: a course respectful it may be to the head of their religion, but most insolent towards their fellow-countrymenand disloyal towards their Sovereign. They have met together in large numbers to reprobate the policy adopted, or supposed to be adopted by the Government of this country in regard to the territories nominally belonging to the Pope as a temporal Prince; they have manifested in the most flagrant manner a preference of their spiritual allegiance to the Church over their temporal allegiance to the Crown even in respect to things secular; and have justified to no small extent the warnings of those ardent Protestants who resisted to the last the emancipation of men whose religion was said to be incompatible with good citizenship and undivided loyalty. Their fathers resented that assertion as an insult and an injustice; the sons are busy now in proving, so far as in them lies, its literal truth. The wildest of their orators hint at their inclination to support with money, and if need be with arms, a Prince to whom they affirm their country to be hostile; the most moderate among those who have addressed them do not pretend to disguise the fact that their good wishes are with their 'co-religionists, as against those who are entitled to, and certainly possess, the full and cordial sympathy of Constitutional England.

If there were the slightest pretence for the assertion that the part played by England in recent diplomatic intercourse has been that of a Protestant Power, hostile as such to the temporal sovereignty of the Pope, the wrath of English Catholics would be justifiable, though their manifestation of it must, even in that case, be considered unseemly. But no man of impartial judgment can really believe such a charge. The first move in that direction—the first symptom of an anti-Catholic policy on the part of Great Britain— would at once neutralise her diplomatic influence. As the reof presentative of Protestantism she could have no right to be beard in the settlement of the issue between the Pope and his revolted subjects, still nominally Catholic. Nor, as the representation of Protestantism, would it be her interest to interfere vigorously on behalf of the Romagna. Nothing could injure Catholicism more than the spectacle of the restoration of that territory to the Pope; preceded by the siege and sack of half-a-dozen cities, by as many blo ody fights, and 'by some hundreds of military executions. The reconquest of the Romagna means the repetition of the horrors of Perugia in every important town in that territory ; and its reoccupation by the Pope implies the constant main in the name of the Vicar of Christ. What could do more serious mischief to the religion of which he is the head than such a standing scandal? or what could Protestantism, unless utterly bewildered by the clamour of Exeter Hall, desire more than the restoration of a system which desire more than the restoration of a system which perpetually exhibited the hostile Church with the gallows and the bayonet as supporters ? It is not as the first of Protestant, but as the greatest of Constitutional Powers that England, vindicating the law of nations and claiming for others the freedom which her good sword won for herself, defends the right of a people to cashier a ruler who has been found utterly and intolerably bad, whether that ruler be a King " by right divine," or a Church with pretensions higher still. And consequently she, whose voice would be silenced by the unanimous feeling of Catholic Europe if she spoke on behalf of an antagonistic faith, is of Catholic heard with reluctant respect by the most absolute of despots when she protests on behalf of national rights. She resists the reconquest of the Romagna for the Pope on the same ground, and for the same reasons, that she would resist the forcible restoration of Tuscany, Parma, and Modena to their former Sovereigns. And those who clamour against this policy, and angrily maintain the right of the Pope to his lost dominions, are reasonably regarded by their countrymen, not as steadfast votaries of a defeated Church, but as recreant Englishmen, eager to wrest from others the liberties which England but a generation since restored to themselves. It is, perhaps, natural that the Catholics should not, in

their present state of passionate excitement, fully compre-hend this. It is reasonable that they should be irritated by by the silly and ribald insult with which a certain portion of the press and of the pulpits of this country incessantly assails their religion and its head. But it is strange that they should be blind to the utter impossibility of the should be blind to the utter impossibility of the adoption—for whatever motive—of any other course than that of which they avowedly complain. Their protest is not against any aggressive designs on the Pope's remain-ing dominions, but against any interference with the pures of those who would reconquer for him what he has lost by the hatred of his own subjects. Now, it is clear that no Constitutional Government can, without stultifying itself as such, deny the right of the Romagnese to shake off a yoke which they felt to be intolerable, or refuse to defend that right when invited to take part in negotiations in which it is called in question. Thus much the Catholics of London and of Ireland ought to have understood; while against any ossible aggressiveness of Lord John Russell's Protestantism they might rely in safety on the jealousy of the Catholic Powers, and the hatred of political religion which is strong among the higher classes in England itself. An English statesman who should sacrifice a diplomatic advantage for the gratification of theological animosity, would find the sup-port of religious faction feeble against the condemnation of enlightened opinion ; and Catholics may rest assured that the representatives of England will regard the Pope, not as Pontiff, but as Prince, and will deal with him exactly as with Leopold of Tuscany or Francis of Modena.

5

We are afraid that this would not satisfy them. Their speakers mix up the temporal and spiritual claims of the Pope, and assert for him a divine and indefeasible right to his dominions in virtue of that supernatural character of which diplomacy can take no cognisance. That the infallible Head of the Church is amenable to no human jurisdiction or control, is a dogma of religion with which we have no concern. But that any Sovereign whatever, lay or clerical, is exempt from responsibility for his temporal rule, and entitled to deal with his subjects at his pleasure, while they have no right but that of unlimited obedience, is a doctrine which no English politician or writer can admit. The parallel to this pretension on the Catholic side would be a crusade by Exeter Hall against the Government of Rome, on the ground that the Pope's spiritual character can affect the purely political question of bis right to a temporal sovereignty which he has long and intolerably abused.

But it is alleged by English Ultramontanists that the Papal rule has been foully slandered in this country, and that Englishmen, without any inquiry, have unjustly assumed the incurable badness of one of the best and mildest of existing Governments. Passing over the fact that the most powerful work on the abuses of the Papal domination was written in Catholic France, and waiving all conclusions that might be drawn from M. About, or from the devoutly Catholic Farini, it would be sufficient evidence of the character of that rule to cite the Mortara case, and the ten-ycars' occupation of the Romagna by Austrian troops. It is strange, indeed, if that be a good Government which can only obtain obedience by foreign bayonets, and preserves order only by martial law administered by foreign Generals. But, in truth, we have no right to sit in judgment on the merits of the Papal Government other than France or Austria might have claimed to judge the quarrel of our forefathers with James II. Its subects have declared, as Englishmen declared in 1688, that the yoke is too grievous to be borne; and it is their right, as it was ours, to refuse to bear it any longer. Foreign Powers have no right to force a hated ruler on a reluctant people, however desirable they may deem the maintenance of his authority; and England cannot forego the assertion of this fundamental principle of international equity in deference to the religious prejudices of a most respectable class of her subjects.

THE REVENUE RETURNS.

THE Revenue returns of the last quarter are very satisfactory in their character, as we anticipated that they would be. The condition of the country is very good, and its trade remarkably sound, and it was inevitable that this should

THE ECONOMIST.

in some degree retarded by premature attempts at legislation." The point, which seems to have mainly been considered by the committee, and which is obviously uppermost in Mr Acland's mind, is how far the interests of the proprietor can be protected against the tenant without excessively restricting his freedom on the one hand, and without enabling him to make excessive demands against the landlord for improvements on the other.

the one hand, and windut deriver and the state the server demands against the landlord for improvements on the other. The question, however, is regarded almost exclusively from the landlords' point of view, and with reference to land-owners' objections to part with the control of their land for periods of any considerable duration. Thus, Mr Acland refers with some exultation, and "as at least one point gained, when a body of tenant-farmers clearly enunciate such prin-ciples as the following, i. e. "That damage done to a farm from foulness or bad management ought to be a charge against the outgoing tenant," and "that the obligation of a tenant ought to be indispensable in all cases, and without reference to the state of the farm at the commencement of the tenancy." Now the first seems a self-obvious proposition, and is in truth the actual law on the subject. But that such obligation is to be enforced without reference to the state of the farm at the commencement of the tenancy, is subject to very different considerations. The ordinary state of things where farms are let on yearly tenancies is, that the tenants enter on their farms in bad condition, and that either from want of sufficient capital, or from the absence of security for its recovery, they never bring the land thoroughly into a state of want of sufficient capital, or from the absence of security for its recovery, they never bring the land thoroughly into a state of clean and good cultivation. How, then, can it be consistent with common justice to charge any such tenant, when outgoing, with the difference of value between a really clean and well-cultivated farm, and the farm in its actual state, for that is what is meant by "damage done to a farm from foulness or bad management." It is not in truth damaged at all; it is simply that the good condition of which the land under cood management is campled is absent. is not in truth damaged at all; it is simply that the good condition of which the land under good management is capable, is absent. It is absolutely certain that with yearly tenancies the standard of culture, and consequently the condition in which farms are left by outgoing tenants, must be a comparatively low one. To meet this difficulty, many landowners and farmers have recommended what are called tenant-rights or stipulations that outgoing tenants shall re-size comparatively for unerthousted imprograments. And it is earned ceive compensation for unexhausted improvements. And it is a

improvement of estates." Now, what is this but an admission that if the landlerd shall agree to pay to a tenant for all improvements made upon a farm, and the tenant shall hold it for some years, and carry out a system of improved husbandry, the amount to be paid to such a tenant when outgoing would be much nearer the value of the farm itself than landlords would like to pay. And we believe that would often happen. Nor would such a state of things be altogether fair towards the landlord. Most acts of good husbandry and improvement, which the tenant executed with a view to his own profit, and which, if he has held the farm for a con-siderable time, may be reasonably assumed to have afforded him to his own profit, and which, if he has held the farm for a con-siderable time, may be reasonably assumed to have afforded him a fair profit, will have incidentally made the farm more valuable than it was at the commencement of the tenancy; and this in-creased value the proprietor may reasonably regard as his own. The value Mr Acland attributes to the labours of the committee "consists in the strength they give to the recommendations in favour of tenants, by the entire repudiation of all such unreason-able schemes, by defining the proper province of the valuer, and by tracing out the narrowest possible limits for the sphere of liti-gation." We will now turn to the resolutions and report made by the Committee to the Council of the Society. They say that the "terms of arrangement between landlord

the Committee to the Council of the Society. They say that the "terms of arrangement between landlord and tenant should be reduced to writing and signed before the entry of the tenant on the land." Of the propriety of this there can be no dcubt, and such in practice is the case where any written agreement is adopted. But it commonly happens that the agent presents to the tenant an agreement which he must adopt altog ther or not take the farm, and the majority of tenants enter into such agreements far too lightly. The 2nd resolution declares that "the basis of such arrange-ments should be one of mutual security to landlord and tenant:—

ments should be one of mutual security to landlord and tenant: (A) In favour of tenant. Security that if he farms the estate up to the expiration of the tenantry, as if he were going to continue the occupation, he shall not be called upon to leave capital bene-ficial to his successor, from which he has not had time to obtain a fair return himself, without being paid for it. (B) In favour of the landlord. Security that, on the other hand, any permanent or temporary damage done to the farm by foulness or bad management will be a charge against the outgoing tenant." Now, can any

<page-header><text> committee, this case has to be provided for. A yearly tenant manures his land yearly with purchased manure, or with manure enriched by the use of large quantities of artificial food given to his stock, and being liable to be turned out of his farm at short notice, it is clear he may "leave capital beneficial to his successor. from which he has not had time to obtain a fair return himself." They propose to meet that case by the 8th resolution: "That claims for compensation for muchaead claims for compensation for purchased manure or special food be matter of special agreement, under which compensation is not to r of speci be claimed without previous definite notice given and consent obtained from the landlord or his agent." This practically debars a tenant from all claim for manure applied to his land. To obtain the landlord's previous consent to the purchase of so many obtain the landlord's previous consent to the purchase of so many loads of town manure, or tons of guano, superphosphate, or the like, or to the consumption of so many tons of oilcake or quarters of meal, is simply to reduce the tenant-farmer to a kind of serf, and practically a man of capital and independence would not do so. The omission would involve the loss of his right to com-pensation for manure used when turned out of his farm. We don't therefore methy to avoid the consent to avoid the constant doubt, therefore, whether yearly tenants should consent to exclude the customary allowances without some substitute much less precarious than allowances for manures, &c., used with the landlord's

7

A better plan than that proposed by the 8th resolution, is that adopted on some estates in Lincolnshire and other counties, where the landlord agrees to allow a certain proportion of the cost of purchased food or manures which are specified, at defined rates. But, in truth, most landlords are rather afraid to make such agreements, for the sums so expended by enterprising tenants who farm on a large scale are generally so considerable, that the owners of the farms are unwilling to enter into obligations of such magnitude. We do not see that the resolutions of the Bath and West of England Society afford any solution of existing difficulties in the relation of landlord and tenant; on the contrary, they give the apparent sanction of some tenant-farmers to resolutions which resolve—so far as they of some tenant-farmers to resolutions which resolve as far as they resolve anything—all difficult questions in favour of the landlord. This will not do. An examination of the report, however, shows that all attempts to reconcile such farming as the exigencies of the timee demand with yearly tenancies is simply impossible. All the resolu-tion which are of any practical value point to lease as the true solu-tion of all "the difficult questions involved in the relation between landlord and tenant." Let a farm be taken on lease for twenty-one years or longer, the landlord taking care of course to secure a tenant possessed of competent capital, and then all questions as to restrictions on cropping and the like may be confined to the last restrictions on cropping and the like may be confined to the last two or three years of the term, and may be of the most simple description. No allowance for manures or purchased food would

THE ECONOMIST.

be necessary; and stipulations for permanent improvements, and the maintenance of building, roads, fences, and the like, would form the chief subjects of arrangement, about which there would seldom be any difficulty. We say advisedly that, in the actual state of English husbandry, there can be no effectual substitute for a lease, if agriculture is to advance, and contracts between landlords and tenants are to be fair and equal contracts.

8

Literature.

THE WEST INDIES AND THE SPANISH MAIN. BY ANTHONY TROLLOPE.

This book is unworthy alike of the author and of the subject. The author has a high and well-earned reputation as a writer of fiction, which he should have been slow to put to hazard by so filmsy and slipshod a performance. It is impossible in these slovenly and empty pages to trace or to recognise either the admirable delineator of character, or the consummate master of style, who delighted us in "Barchester Towers" and "The Three Clerks." Their verbosity is astounding; their repetitions are incessant. It would seem as if Mr Trollope had promised to write a book about his journey, but found that he had really nothing to say; and forgot that there are some promises which are more honoured in the breach than the observance. It would seem also as if he had contracted with the publishers to furnish a certain number of octavo pages, and being unable to fulfil his contract in spirit, descended to do so in the letter, and make words serve when matter and ideas fell short. Little is really told us—but that little is told as often as possible, and in as many words as possible. A more wearing or disappointing volume from a really able man we verily think we have never groaned over. The subject, too—even Mr Trollope's side of it—deserved something better. That side is not ours: nevertheleas we should like to have seen it more ably and more fully set forth. When we take up a book about our much-suffering and much-discussed

The subject, too-even Mr Trollope's side of it-deserved something better. That side is not ours: nevertheless we should like to have seen it more ably and more fully set forth. When we take up a book about our much-suffering and much-discussed West Indian colonies, we hope to read something worthier than the ster-otyped traveller's jokes and complaints about fare and lodgings, and something fresher than the old lamentations of the ruined planters. When we take up a book about Central America and the Spanish Main, we hope to learn something new and authentic about the real condition and prospects of those deplorable fragments and debris of the old Spanish Empire founded by Cortez and Pizarro. Mr Trollope was under no necessity to write about those splendid and unhappy lands, whose present is so and and whose future is dark and so perplexing; but, having undertaken to write, he was at least bound not to fab of purchasers and readers with criticisms of hotels and bills of fare, with dialogues with coloured Calypsos, with tedious ascents of mountains, with we clothes, dark rides, and ill defined impressions of the characters and positions of the different races—bout which, though much is said, little real or distinct information is conveyed.

The book is yet to be written—and it would secure a large sale if written well—which should give us a clear and perfectly fithful and mexaggerated view of the planters' wrongs and real difficulties, and a correct and reliable picture of the present actual and comparative condition, moral and physical, of the emancipated megrees. Mr Trolhope evidently considers the planters to have been hardly and unjustly dealt with by the authorities at home; but he does not even pretend to have mastered the subject, or examined cautionsly the truth of their complaints. He tells us that the negrees are relapsing fast into sloth and barbarism, if not already hopelessly sunk therein ;—but he gives us few facts, and has evidently gathered his impressions chiefly at second hand. He does not tell us whether religion or morals are making any progress among them; he does not appear to have questioned either missionaries or established clergymen, or colonial civil authorities, on these matters. He does not tell us whether the marriage tie is more respected than it used to be; whether the marriage tie is more respected than it used to be; whether the or otherwise amending their position. He merely describes them, in a declamatory Carlylese fashion, which inspires no confidence, as living idly upon yams and plantains,—working only fitfully and when they please, and in some islands scarcely working at all. He does not tell us what are the habits of the Coolie immigrants, and what has been the result of this immigration on the moral and physical condition of the antive population. In fact, he looked only at the surface, and heard only the tone of from what caught his eye and what struck his ear. He finds Barbadoes conceited and prosperous, British Guiana contented and confident, Jamaica wretched and Inchrymore ; and he comes home satisfied that the negrees are a nearly hopeless race, and that self-government in these islands is a mischievous and laughable farce. Now, there may be much truth in all these impressions: what we compla marked resemblance between the faults of this book of Mr Trollope's, and those of Mr Dickens' work on America which appeared some years ago, --though in style and spirit the latter was far the smarter of the two. As a novelist, Mr Trollope has not yet fallen so flat as his contemporary : as a traveller, he has sunk far lower.

As we have said, we should greatly value a competent book on the West Indies which should really give us the views of sober and qualified planters as to their own prospects and condition, and those of the negroes and the coloured race. We incline to beliew that they may have something to complain of as well as much to deplore. But unhappily their advocates scarcely ever state their just grievances without such exaggerations and misstatements as put them wholly out of court, and rarely attribute their sufferings to the true cause, or call for the fitting remedy,—or admit that the course of legislation pursued by the mother country in regard to both emancipation and free trade was simply inevitable, and on the whole righteous and beneficial, even though the source of perplexity and loss to themselves. What ruined them was not as much interference from home, as their general habit of managing estates by agents, or as "gentlemen farmers,"—against the wastefulness and ineffectiveness of which system, no property, however valuable, can in the end make head. What was so fatal in emancipation was not so much the liberation of the negroes in itself, whe mode in which it was done and the measures by which it was followed,—for which the planters have mainly to thank their own long years of obstinate recalcitration against any preparative contrivances. What struck them so hard in our commercial legislation was not the free sugar of the East Indies—a measure which it was difficult, if not impossible for even themselves to argue against or to resist. Want of economy, want of capital, want of labour:—these are the real causes of the ruin of Jamics, and do other islands which have suffered in the same fashion : for the two first of these the planters have to thank themselves and their forefathers exclusively:—the blame of the third must be shared between the Anti-Slavery party in England and the legislature which they persuaded to abolish the apprenticeship system and to throw for a long time very unwise and unwarant-

THE NATIONAL REVIEW. JANUARY. Chapman and Haff. THE most attractive and brilliant article, in the present number of this able review, is unquestionably the first—bearing the somewhat aggressive tile of "Mr Kingsley's Literary Errors and Excesses." This paper is not intended as a complete estimate of Mr Kingsley's merits and demerits—but rather as an expostulation addressed to one whose high claims to admiration have been already cordially admitted in the pages of the Review, on the serious qualifications to that admiration, to which his writings have been from the first more or less open, and of which, if we may judge by his persistence in and exaggeration of his faults, he is himself as yet profoundly unconscious or unconvinced. There is a kindly spirit exhibited towards this eminent writer in the concluding paragraph of the article, which might, perhaps, with advantage, have modified some strong expressions in the preceding pages,—still we cannot but think that the objections raised by the reviewer are substantially just, and that the admirable literary execution of the article will materially assist in bringing home to some quarters, where it is much needed, a more wholesome estimate of the relations of mere physical force, whether of body or mind, to the subtler, more delicate, and less trenchant natures with which it is now the fashion to bring it into such advantageous contrast. The article contains some excellent criticisms on Mr Carlyle, as an apostle of this "latter-day" faith—and the writer draws some thoughtful and discriminating comparisons between the Prophet of Chelses and the Crusader of Eversley. The reviewer illustrates his main objections to Mr Kingsley's "muscular" theory of right and wrong, by his unjust treatment of Shelley's character in comparison with Byron. Perhaps the reviewer himself has gone a little too far in the other direction, and has attributed to Shelley an instinctive moral sensitiveness to which he can only lay partial chaim. Of the o

THE ECONOMIST.

ay that he leans to "Gothic" as "Anglo-Catholic," and is as de-shores of keeping out ultramontane "Classic," as if it were a Papal Bull fresh from the Vatican. His argument is throughout rather

Bull fresh from the Vatican. His argument is throughout rather too exclusive and partisan. "The Blind," and "Intemperance, its Causes and Cure," are writeles, both in their respective ways, of much interest and ability. The former is necessarily the more ourious and generally attractive and all absolutely or approximately blind people must feel grateful to the writer for his indignant denial of Mr B. John's "prepa-terons assertion" that they have no idea whatever of space—and still more at the side which he has taken in the more important con-

from the magistrates. We think this undesirable, and wholly needless; the appeal to quarter-sessions appearing to afford a sufficient remedy in all well-grounded cases of complaint against the caprice or partiality of the licensing sessions. And the power of not renewing the license is far more likely to be exercised—though even this is far too rarely exercised— in case of misconduct than that of withdrawing it, applicable only atter legal proof of a species of misconduct most difficult to prove by legal evidence. We think that that suggestion which has reference to the assimilation of all retail licenses—the abolition of all distinction between asimilation of all retail license—the abolition of all distinction between beer shops and public houses—is shown by ample evidence to be necessary both for the protection of the revenue from illicit dealing, and for the proper maintenance of police regulations; but we would ac-complish the object by repealing the Beer-house Act, and placing the granting of licenses entirely under the jurisdiction of the local magistracy, ubject to appeal as at present. We would remove from wholesale desiers all those troublesome restrictions, which cannot be obsyed, and only lead to demoralisation by inducing breaches of the law; we would make the only distinction between the merchant and the publican the permission to cell liquor "to be drank on the premises," and make the evasion of this rule punishable by heavy penalties on both vendor and purchase. If anything be wanting to complete the power of police entance and supervision, the defect should be amended, and every pre-caution taken to oblige the publican to carry on his business under the event of the publicant or arry on the publicant be pre-sent on taken to oblige the publicant to carry on the substaces under the event of the stathority.

withinker, it anything, the defect should be amended, and every pre-cution taken to oblige the publican to carry on his business under the eye of a vigilant authority.
Following out a recommendation of the Committee, we would compel every publican, at the granting or renewal of his license, to produce two —or better, four—re-ponsible sureties, not being brewers, or wise or spirit merobatis, who should enter into recognisances for his good behaviour, it to be forfeited in the event of any violation of the law by the publican himself, or, at the discretion of the bench, in case of the commission of certain specific offences within the house itself. Thus, in the first place, we should have the strongest possible guarantee for the observances of rules made by the law for the regulation of the trade; and in the second place, we should have obtained an important security against the estab-lishment of what are known as "disorderly houses." No one would consent to risk the forfeiture of his money by entering into recognisances for the conduct of a house whose master he did not well know to be re-spectable. Receivers and returned convicts could only open their, but below that of the respectable publican, would be closed at once, and the lionest part of the trade thrown into the hands of a better class of men."
Much mischief is done by the music saloons, dancing room, and other places of amusement, statched to public houses. They are admittedly of the lowest character; are nests of immorisity themselves, and form a back-door through which lads and young gith, too respectable or too young to walk into the bar, are enticed into the public house. We have no right to prevent people from drinking; but we have a right to forbid the publican to allare them by such devices as these. We demand no restrictions on the use of liquers, no hindrance on those who desire to go and buy them, when we say that all places of public orfersiment-eting house, oyster shops, coffe houses, and the rest-onghi to beaulyed the c

* Ample evidence has been given to show that all places of this and should be exing homes, oyster shops, onfice houses, and the rest-ought to be subject to control ismilar to that exercised over public houses and the rest-ought to be subject to control ismilar to that exercised over public houses and the rest-ought to be subject to control ismilar to that exercised over public houses and Mr D. W. Harvey concur in testifying, "that we find more violations of the law taking pace in coffee houses, which are not under the cognisance of the police, than in public houses." These online shops remain open in same cases the whole night; receive those whom the public houses are obliged to turn out when the law compels them to close, and not unfrequently prove to be places for the likit sale of spirit, axempt from the restric-tions imposed on the law in the interview. It is clear that they should be placed on a similar footing as to license and supervision; the license-fee being of course is mall, as we do not wish to discourage this kind of establishment, and the surtius is meaning being for a less amount, and subject to less severe conditions, than a the case of houses where introvicating liqueers are to be sold.

brought under the act which subjects theatres to the control of the Lord Chamberlain ; and that officer should make it a rule to grant no license for any such establishment to the owner or occupier of a public house, or any place next door to a public house. W do net propose that this rule should be enforced by law, as such law would inevitably prevent refreshments, such as beer or wine, from being sold in any place of entertaisment; we merely wish that the Lord Chamberlain should use his discretion, by refusing to licence such places as appendages to the regular business of the publican, who is sure to regard them as means of increasing the sale of his warer, and attracting customers who would otherwise be sober enough, but who, having come to see or to listen, remain to drink and to get drunk.

9.

remain to drink and to get drunk. The article on "Theodore Parker," belongs to a topicon which we do not enter in these columns. The writer has a warm appreciation of Mr Parker's merits, and differs from him chiefly in the appli-cation of the conceptions of God and man, from which they agree in starting. The point on which they are thus most at issne, is the distinctive value of Christianity, and (in words at least) the admis-sion of the idea of "miraculous" interpositions. "England's policy in the Congress," takes a very sensible view of the part which it is the duty and interest of this country to play in the possible gathering of the European Powers. The writer insists on a firm adherence to the line of policy chalked out by Lord John Russell in his speeches and letter, and adds a practical hint which we trust will not be lost sight of, and without some attention to which the positive weight of England will be sensibly diminished :----It may be hoped that our plenipotentiaries will have the clearest

The reviewer, we should add, doubts the desirability of England being represented in the Congress by a "regular am-bassador" at any court:

Engined being represented in the Congress by a "regular am-basador" at any court: We are unable to notice the two remaining articles of this num-ber, as we could have wished to do. The first is a clear and ex-haustive exposition of Mr. Darwin's somewhat startling book on the "Origin of Species." Thereviewer, who writes as one "of authority," is favourably inclined to Mr. Darwin's speculations, and claims for them at least the merit of shaking comparative naturalists out of their comfortable, self-satisfied "conclusions" on the subject, and making them re-examine the grounds of their creed. As the first article in this number is the most brilliant, we should say that the last article is the most valuable and searching. "The History of the Unreformed Parliament and its Lessons," has never yet been fairly written or considered with any breadth of treatment or depth of insight. The present article is both deep and sensible, and, if we mistake not, points out for the first time the necessary and accidental excellency, and the inevitable and incidental defects, of the old parliamentary constitution of England. The writer holds that the House of Commons, in the early part of the 18th century, substantially represented the feelings and best interests of this country; that it represented a preponderating aristocratic and landed-gentry class, because they were the only class whose as-cendency at that time was possible or tolerable; that to the Par-liament thus constituted we were indebted for our salvation from a Stuart restoration, which would have been highly probable or inevitable under a nore equalised system of representation ; that, if warlike for an aristocracy, it was pacific for a national represen-tative, and that it was in the period that followed that its inherent inevitable under a more equalised system of representation; that, if warlike for an aristocracy, it was pacific for a national represen-tative, and that it was in the period that followed that its inherent defects became more evident; that its conditions became altered by the growth of the manufacturing interest; and, that its previous merits ceased in a great degree to be operative In considering its later stage—that which called down on it the remorseless ire of "Reformers,"—the reviewer examines the stock arguments in favour of nomination boroughs with great acumen and originality, and demonstrates that their asserted advantages as supports to a "strong Government," and a nursery of "states-men" are mere fallacies, or greatly exaggerated. We cannot but recommend the careful perusal of this article (which is worthy of a separate and less ephemeral existence) to all who wish to start with right notions of what has been, to the consideration of what is to be, and what should be, in a new Reform Bill:

THE ECONOMIST.

[Jan. 7, 1860.

FRASER'S MAGARINE. January. John W. Parker and Son. "FRASER' is in remarkable force with the new year, and seems determined to hold its own against its new monthly rivals. Among various excellent papers one will command more general interest and attention—a second biographical communication on the poet Shelley, from his friend Mr Peacock, groops of the recent "Shelley Memorials," by Lady Shelley. In noticing that book, we expressed our conviction that too much and too little had been said for the matter to be allowed to rest as the Shelley family seemed disposed to leave it. Mr Peacock's interesting paper confirms-our impression, and appears to render it impossible for Lady Shelley to withhold any longer those autobiographical materials which she states to be in the possession of the family. On important points, Mr Peacock distinctly contradicts her ladyship's statements, and, by a simple reference to date, shows that some other line of defence from in the case of the poet's treatment of his first wice. Mr Peacock 'brings forward the remarkable fact that Shelley and Harriet Westbrook were re-married at St George's, Hanover-doubt," as late as the 24th of March, 1814, and argues there from, fairly enough, that no disinclination on the part of the particle according to the English form, he would have sought, and might have easily obtained a divorce according to the law of sootland, in which kingdom the first marriage took place. He authority of the first Mrs Shelley herself, that the separation did FRASER'S MAGAZINE. JABUARY. John W. Parker and Son. Sociand, in which kingdom the first marrage took place. He also states positively—in contradiction to Lady Shelley—on the authority of the first Mrs Shelley herself, that the separation did not take place by mutual consent, but was simply a desertion of his wife by the poet for the daughter of Godwin. Of his state of mind during the straggle which preceded this step, Mr Peacock gives the following graphic and significant account : in contradiction to Lady Shelley-on the

He might well have said, after first seeing Mary Wollstoneccraft God-win, "Ut vidit ut periit" Nothing that I ever heard in tale or history could present a more striking image of a sudden, violent, irresistible, uncontrollable passion, than that under which I found him labouring when, at his request, I went up from the country to call on him in Lonwin, " Ut vids ! ... p. could present a more uncontrollable passio ring don. Between his old feelings towards Harriet, from show he was not then separated, and his new passion for Mary, he showed in his looks, in his gestures, in his speech, the state of a mind "suffering, like a little kingdom, the nature of an insurrection." His eyes were bloodshot, his

Man's happiest lot is not to be. And when we tread life's thorny steep, Most blest are they, who earliest free Descend to death's eternal sleep." Again, he said more calmly: "Every one who knows me must know that the partner of my life should be one who can feel poetry and under-stand philosophy. Harriet is a noble animal, but she can do neither." I said: "It always appeared to me that you were very fond of Harriet." Without affirming or denying this, he answered : "But you did not know how I hated her sister." The term "noble animal" he applied to his wife, in conversation with another friend now living, intimating that the nobleness which he thus

The term "noble animal" he applied to his wife, in conversation with another friend now living, intimating that the nobleness which he thus ascribed to her would induce her to acquiesce in the inevitable transfer of his affections to their new shrine. She did not so arquiesce, and he cut the Gordian knot of the difficulty by leaving England with Miss Godwin on the 28th of July, 1814. Of the first Mrs Shelley, Mr Peacock gives the following de-scription :--

scription :-

The starting of the start of the start of the starting of the start of the start of the start of the starting of the start at the start at the starting of the

taking place in the Serpentine, and not occur thi December, 1816, stated by Captain Medwin. Mr Peacock bears testimony to the agony of Shelley on the occasion, and records a remark of his at a later period, which shows that secret remorse clung to his me-mory and would not be shaken off. He corrects also the notion mory and would not be shaken off. He corrects also the notion that Shelley's elder children were taken from him on the ground of his Atheistic writings. It was on the fact of his *practical* illustration of the light in which he regarded the marriage tie, that the decree of the Chancellor proceeded. He gives some curious instances of Shelley's strange fancies and morbid delusions, and of his untruthfulness on such occasions, arising probably from a desire to lend plausibility to the delusion to which he had com-mitted himself. Of the poet's residence in Italy, Mr Peacock gives a rather different representation from that which Lady Shelley—following the widow of Shelley—has put forward. From

letters, Mr Peacock shows that the poet eagerly desired a termina-tion to his self-inflicted exile, and was weary of Italian surshine and separation from his English friends. That he concelled this feeling from his wife, whose desires on the subject were so dif-ferent, is, as Mr Peacock suggests, quite natural. The feeling of dejection at Naples, however, did not, he says, originate in solitude, as Lady Shelley supposes, since the Shelleys were in constant society with a large circle of friends at that time. Altogether, this paper is by far the most important contribution to the "Shelley Memorials" that has yet appeared, and will, we hope, be the herald of equally valuable disclosures from other quarters.

MACMILLAN'S MAGAZINE. No. III. THE continuation of the tale "Tom Brown at Oxford," which is the great attraction of this magazine, is very brilliant and success-ful. We confess to preferring it both to Mr Trollope's more full. We contess to preferring it both to Mr fromoses more artistic, but also more pallid, purposeless, and less vigorous tale in the "Cornhill Magazine," and also to Mr Thackeray's own contri-bution to that rival periodical. The Poet-Laureate has contributed to this number a poem, which the poet-Laureate has contributed to this number a poem, which the poet-Laureate has contributed to the prover the poet of the poet.

The Poet-Laureate has contributed to this number a poem, which is certainly not one of his finest, but nevertheless marked by his characteristic genius. Professor De Morgan has a characteristic and amusing paper on "Scientific Hoaxes." The editor does some-thing less than justice to Louis Napoleon's writings. Miss Mulech has contributed an essay which has nothing in it,—as indeed no essay could have,—of her characteristic capacity. There is a paper on "American Humorous Poetry" which will be read. And Mr Blakesley has contributed an article on a subject on which he is eminently qualified to speak, "Morocco and Northern Africa." The "Colloquies of the Round Table" have, we are very happy to say, entirely disappeared. Altogether we prefer "Macmillan's Maga-zine" to its Cornhill rival. It has more of distinct aim and purpose, though it still wants unity of design. We trust it will succeed.

Foreign Correspondence,

(FROM OUR CORRESPONDENTS.)

(FROM OUR CORRESPONDENTS.) PARIS, Thursday. The heavy fall which unexpectedly took place on the Bourse in the latter half of last month just as a great number of speculators had operated for a rise, has caused one of the most disastrons monthly actionment that here here to be a set of the set of monthly settlements that has been known for a long time past. Numerous "executions" of people unable to meet their engage-ments have taken place, and more are expected. The change in the Imperial policy with regard to Italy, though it has had the advantage of re-establishing a good understanding between France advantage of re-establishing a good understanding between France and England, which is a great thing in the eyes of the money market, is unfortunately accompanied with difficulties of the very gravest kind as regards Rome and Austria, and as regards the clergy (a powerful body) and certain political parties in France. clergy (a powerful body) and certain political parties in France. It has consequently created serious uncasiness on the Bourse. The postponement of the Congress, and the probability that after all the postponement may be indefinite, have increased that uncasi-ness; and, to-day, it has been further augmented by the retire-ment of Count Walewski from the Ministry of Foreign Affairs, and by the appointment of M. Thouvenel, the Ambassador at Constantinople, to be his successor, —a diplomatist who is supposed to entertain no friendly feeling towards England. At the present moment, the Bourse is in as bad a state as it well can be ;—and the discouragement is apparently as profound as it was last very the discouragement is apparently as profound as it was last year when war with Austria was decided on. 1858 was 114f.

1858 was 114f. The Credit Foncier Company announces that for the second six months of 1859 it will make a "provisional distribution" of 6f 25c per share. As the same sum was distributed for the first half-year, the shareholders will receive an amount equal to 5 per cent. on the calls they have paid up; and they will obtain a fur-ther sum when the definitive dividend of 1859 shall be declared in the central metric to be hold in Auril north in the annual meeting to be held in April next.

In the annual meeting to be held in April next. A vast number of companies are now, as usual at this epoch, making the payment of the half-yearly or yearly interest on shares and bonds, or of sums on account of dividend. Amongst those which are doing so are the Northern, Eastern, Orleans, Lyons and Mediterranean, Southern, Western, Geneva, Ardennes, Dauphiné, and Besseges to Alais railways; - the Credit Mobilier (25f per share on account), the Paris Onnibus Company (25f per share on account), the Immobilière Company of Paris, the Ser-vices Maritimes of the Messageries Imperiales, the Compagnie Generale de Eaux, the Union Financière et Industrielle, the Union des Gaz, the Grand' Combe, the Société Cail et Cié, the Union of Switzerland Railway, and the Banque Generale Suisse; --the Aus rian railways;--the Madrid and Saragoss, the Seville and Xeres, the Seville and Cadiz, the Cordova and Seville, and the Northern of Spain railways; and the Span ish Socié é Mer-cantile. cantile.

A number of merchants and shipowners of Bordeaux have A number of merchants and shipowners of Bordeaux have called on the Government to allow African gum to be imported free of daty. At present this article pays 100 the 100 kilogs, or, with what is called the "double decime," 12f; and the Bordeaux people represent that such a daty is perfectly exorbitant on an object which is not worth more than 80c the kilog; and which, heides, is required for numerous uses. The Treasury could well afford to give up the duty, seeing that it only produces annually about 400,000f. called

Subjoined is an account of the markets :-

. 57f 50c.

alone, 57: 50c. WHEAT.-At Paris, yesterday, the market was thinly attended, and basiness was not active. Choice was 31f to 31f 50c the sack of 120 kilogs; good qualities, 30f to 30f 50c; ordinary, 29f to 29f 50c. During the week there has been a rise of from 9c to 1f in 19 provincial markets; a fail of from 12c to 1f 30c in 78; and 52 markets have remained unnged.

changed. COTTON.—At Have, the brokers fixed the closing prices of the week ending Friday at 11 to 21 below those of the preceding week :—low New Orleans was consequently 103f the 50 kilogrammes, and very ordinary ditto, 108f. The sales of the week were 7,932 bales, and the importa-tions 18,472. The stock on the 1st of the present month was 45,130 bales; same date last year it was 136,690; of 1857, 82,600; and of 1856, 46,800. This week business has been caim, and yesterday low New Orleans was at 103f. cans was at 103f.

Orleans was at 103f. COFFRE.—At Havre, for the week ending Friday, a fair amount of business was transacted. The sales were 2,000 sacks Hayti at 71f to 72f 50c the 50 kilogs in bond; 1,200 sacks Gonaires, 73f 50c to 74f; 1,130 sacks Rio, not washed, 72f to 74f; 250 ditto, washed, 80f to 81f 50c; 375 sacks Manilla, 129f to 129f 50c duty paid; and 25 sacks Ceylon, 126f. Some lots of damaged were also sold by auction. The serivals were dull. The stock on the 1st of the present month was 61,767 sacks and 324 casks. Several sales have been made this week: Hayti, 72f to 73f 50c in bond; Rio, 70f to 73f 50c; Ceylon native, 122f to 125f duty paid. At Bordeaus, last week, the only transaction recorded was the sale of about 600 sacks Mysore at 137f 50c to 141f duty paid. Nothin

has been done this week. At Names, last week, nothing was done. " wwwk nearly 6,000 anchs Java have been sold, but the price is not sta At Marseilles, last week, business was calm; the sole sale being about soles Berry is a Self or Self. This Marseilles, last week, b a Brozil at 68f to 75f.

sacks Brozil at 66f to 75f. SUGAR.—At Haure, in the week ending Friday, about 1,250 casks of French West India were sold at 59f daty paid; and 2,972 casks Havana at 36f to 37f, in bond. The arrivals exceeded 3,600 casks or sacks. This week, Reunion has been at 63f; Havans, 36f 75c; French West India, 59f 50c. At Bordeaux, last week, only a small lot of French West India was sold at 59f, and 800 bales Reunion at 63f. The stock on the lat of this month was 1,250 casks French West Indis, and 10,618 bales Reunion. This week nearly 4,000 bales Mauritius have been sold at 66f 25c. At Names, last week, 3,722 aacks Reunion went at 63f to 63f 72c; 7,421 Mauritius at prices kept secret; and some lots of French West India t59f 50c 60f. This week, shout 20,000 sacks Reunion have been sold at 62f to 63f. At Marseilles, last week, some large lots of Reunion were sold at 61f to 66f. Impico at Houre, in the week ending Friday, was calm, but 22 cases

large lots of Keumion were sold at 5110 ool. INDIGO at Houre, in the week ending Friday, was calm, but 22 cases Bengal were sold at prices kept secret. There were no arrivals. The stock on the lat of this month was 1,568 cases; same date last year it was 1,571; of 1857, 2,077; and of 1856, 1,181. Some small sales have been made this week, but prices are not stated. At Borkeaux, last week, about 100 cases were sold at prices previously established. A small lot of Bengal has been sold, but prices are not given.

Bengai has been sole, but prices are not given. TALLOW.—At Harve, last week, no sales were made, and there were no arrivals. This week the article is not mentioned. At Paris, yesterday, the 100 kilogs were 1331 20c inside Paris,—126f ontside: a fail of 5f on last week? quotations. At Marsellas, last week, 30 tons of Italian were sold at 130f the 100 kilogs, and some Algerian at the same price.

aid weak's debiation. At Distance, last weak, 50 tons of rinnan were sold at 1307 the 100 kiloge, and some Algerian at the same price. HIDES.—Business at Haure, in the week ending Friday, was active, and prices were firm. 2,830 dry La Plata went at 145f the 50 kiloge duty paid; 292 bull ditto, 151f to 163f; 200 Rio Grande saited, 83f; 1,160 Rio Janeiro salted, 69f; 236 Martinique salted, 72f 50c; 500 New York salted, 62f 50c; 4,736 Mazatlan, 130f. The arrivals exceeded 24,000. This week, Boenos Ayres dry have been quoted at 160f duty paid; ditto salted, 69f in bond; Australian salted, 60f duty paid; Rio Janeiro salted, 69f in bond; New York salted, 63f in bond. Woot.—The sales at Haure, in the week ending Friday, were 75 bales La Plata, unwashed, at 1f 450 to 21 75c the kilog in bond; 61 bales Chill, unwashed, at 1f 450 to 21 75c the kilog in bond; 61 bales Chill, unwashed, at 1f 450 to 21 75c the kilog in bond; 61 bales Chill, unwashed, at 1f 30c; 24 bales sheepskins, La Plata, un-washed, 95c to 1f 30c; and 1 bale lambs', 1f 17gc. The arrivals exceeded 2500 bales. This week, Baenos Ayres, unwashed, has been quoted 2f 30c. Spiritra.—At Paris, yesterday, 3-6 of 90 dez. was at 82f to 83f the hectolitre; Montpelier of 86 deg., 130f. At Bordeaux, the day before yesterday, 3-6 Languedoc was 130f.

According to a telegram from Cadiz, the total export past year has reached 45,919 butts, against 28,729 in	n 1858, 50,707 in	Total	152	1
1857, and 54,610 in 1856. The two largest exporters w 3,561 butts; and Gonzalez Dubosc and Co., 3,530 butts. The latest advices from Jamaica are to the 10th of D continued scarce, and sales of ordinary had been made 100 lbs in sensil quantities. Sugar had ranged at from 100 lbs; fair was exceedingly scarce. There were no	ere F. W. Cosens, ecember. Coffee at 39s to 40s per n 16s to 22s per	The demand has been very lig without marked change in pri in the aggregate to 2,000 bale which were hard to obtain. W NEW YO Upland.	ices. Transac	tion

100 lbs; fair was exceedingly scarce. There were no sales of pimento to report. The present pimento crop is a small one throughout the island; in fact, it has been all but an entire failure in the principal pimento districts. The yield this senson is not expected to exceed 15,000 bags, against 30,000, 100,000 and 70,000 bags in the three previous years. One-half of the present crop had been exported already, and the other balf was in the hands of apeculators with the exception of perbaps 1,500 bags, which were held by planters at 2½ d per lb. Trinidad advices are to the 11th ult. The weather had been excessively wet, and it was feared that, should it continue, the crop would suffer very materi-ally. There was very little animation in the market at Trinidad.

ally. There was very little animation in the market at Trinidad. Advices from Bio are to the 8th ult. Business in coffee had been ex-tremely limited. Sales from the 7th of November to date had not ex-ceeded 50,850 bags, which were taken at a decline of about 100 rs on last quotations. The stock on sale had accumulated to 220,000 bage. Urgent wants of sugar for consumption, chiefly of white, which con-tinued arriving very sparingly, had caused a further rise; large quantities of the new crop being, however, expected from the north, a material decline was anticipated. From Bahia our correspondent writes that there was no maw sugar yet, and that coffee was very fine this season. Unimportant lots of brown sugar had been disposed of at 2,250 rs and 2,300 rs per arroba, and for a larger list, the only one remaining in the market, 2,400 rs was demanded. No whites offering; a few causes of fair quality had been sold in second hands at 3,400 rs. The article was in demand, but purchasers could not supply their wants. Considerable sales of Bahia coffee, seconds, had taken place latterly at prices railing from 5,150 rs to 5,250 rs per arroba.

An account of the amount of bank notes authorised by law to be issued by the several banks of issue in Ireland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 17th day of December, 1859 :--

There has been a fair amount of business done in cotton this week. The trade have bought more than their consumption, and there has been The trade have bought more than their consumption, and there has been a fair demand for the better qualities for export, and a little for specula-tion. In the middle of the week many saies were made at a light de-eline, but during the last few days the better grades of American have been somewhat more firmly held. We make no alteration in our quota-tions. Egyptian of the better qualities move readily at full price, but the inferior are 'atill unsaleable. Brazil have been sold on slightly easing terms. East India are without alteration. The seles to-day are estimated at 10,000 bales. The reported export amounts to 11,430 bales, consist-ing of 6,390 American, 30 Brazil, and 5,010 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Although the business doing in manufactured goods this week for export purposes has been by no means extensive, prices, under the influ of a steady home demand, have been well supported. In wool, the transactions have not increased, yet the stocks in manufacturers' hands are very moderate even for the time of year. Iron has been less active, and the quotations have shown a tendency to give way. Coals, too, have sold slowly, yet we have very little change to notice in the value.

sold slowly, yet we have very little change to notice in the value. MANCHESTER, Jan. 5.—Eastern accounts, cf which the latest has been received to-day to the 16th ult. from Calcutta, have continued to report languor and decline in our leading steples; but the market here has been entirely uninfluenced, and both yarns and cloths for India have shown an advance. Transactions have daily been extensive, probably exceeding in one week those of the two or three weeks ending last year. Generally speaking, export yarns have been sold rather freely at $\frac{1}{2}$ d to $\frac{1}{2}$ d over the recent highest offers. Home trade yarns have had a steady sale at full rates; some qualities meetly affected by dealings in a third yard. Shirtinga have been sold freely both for India and China at $\frac{1}{2}$ d to 3d per piece over the rates of last week. Printing cloths have again been contracted for liberally, the turn of the year having induced printers to sort up stocks. Other articles have been sold well, and the appearance of nume steadiness in the cotton market has not been without effect.

Baaronn.—Wool—There has been very little doing in the warehouses. The supply in the market is a fair average for this season, but prices are so high that buyers are cautious not to take larger supplies than their actual wants require. Yarna—There is a stillness in the yarn market ; business has not resumed its wonted activity. The continental buyers are open to make contracts where prices admit, but spinners are getting into a fix, owing to the high price of wool. Pieces—Fancy goods are in very large request, and none in stock. In fact, so busy are the mann-facturers of these goods, that merchants find it extremely difficult to get their orders executed in the required time. The animation which charac-terises this department of the trade is almost without precedent.— BARNELT.—The lineu trade of this town and district has lately shown some signs of improvement, and the operaives of the trade are tolerably Bansatr. —The line trade of this town and district has lately shown some signs of improvement, and the operatives of the trade are tolerably well employed. There is a better demand for yarns and goods, and hopeful expectations of a prosperous trade for some time to come are entertained. —Laiczstra. —The hosiery trade in all useful branches is in a healthy state. The operatives generally are well employed, and wages are as high, and in several cases higher, than for some time past. In the country bosiery district, mach-nery is well employed, and business is in a satisfactory condi-tion. Yarns are selling at late prices. The wool market is steady, without change in price. —Norrixona...There is very little alteration to report in the condition of the lace trade. In the cotton branch, plain goods are more than any other description in request. A few orders have been received for fancies, but this branch is extremely quiet. In the sik lace trade, business continues very languid. There is a fair amount of business doing in hosiery for the time of the year. Some good orders from the United State have been received, and the trade generally is in a satisfactory state. Yarns are firm, without change in prices. —BatrAst. from the United States have been received, and that tade generally is in a satisfactory state. Yarns are firm, without change in prices. — Burnstr. — The domand for yarns has fallen off, yet prices are supported. Linensy gene-rally, commands full quotation, and the stock on offer is only moderate. — DUNDER. — Trade continues sound and healthy, at very full quotations. — Woxvennamars full quotation, and the stock on offer is only moderate. — Plinished common Staffordabire bars, 7/ 10s at the works; best bars, 8/ 10s; sheets, 9/; doubles, 10/ 10; nail sheets, 8/ 10s; latin, 12/; boiler plates, 9/; best and best best in proportion; common rode, 7/ 10s; hoops, 8/ 10s; gus strip, 8/; Canade plates, 12/; and all other sorts in proportion. Favourite Shropsbire and Forest of Dean brands, 4/ 10s.

CORN.

AMERICAN GRAIN AND PLOUR MARKETS. New YORK, Dec. 21.—FLOUR AND MEAL —The market for State and Western continues inactive and irregular, and pricessfrongly tend in favour of the purchaser. There has been little or no demand for export or specu-lation, and the somewhat limited transactions have been almost wholly for lation, and the somewhat immited transactions have been almost wholly for the Eastern trade; sales for the three days comprise 14,400 bbls, iclosing dull. Southern flour is also dull, with a declining tendency; the sales are 2,300 bbls, including 750 yesterday, closing heavily at 5,95 dois to 6 dols for Baradywice, 6.50 dols for Georgetowo, and 5,50 dols to 6.20 ols for Baltimore; all other kinds are unchanged. Grain.—Inactivity is still the most noticeable feature in the market for whest, and the in-oury has been chiefy for immediate wants of consumers. Sales here Is still the most noticeable feature in the market for wheat, and the in-quiry has been chiefly for immediate wants of consumers. Sales here since Friday have been light, amounting to only about 21,000 bushels, including 6,000 Racine at 1.20 dol; 350 white Western, 1.40 dol; 11,700 red Southere, 1.25 dol to 1.30 dol; and 100 white Kentucky, 1.55 dol, yesterday, closing dull and heavy at our previous prices. Corn was buoyant on Saturday and Mooday, and holders obtained full prices. The market was dull prestrday, however, and prices tended downward; the sales comprise 31,900 bushels, at 92 to 98 cents for yellow Southarn and round yellow, and 90 to 96 for mixed Western; other kinds are steady. steady.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The holidays have, to some extent, interfered with the usual course of the trade; certainly millers, generally, have evinced no disposition to purchase beyond actual events, although there has been no pressure of supply. Compared with lat week, no quotable change has taken place in prices. Good and fine English wheats have been disposed of at fall curprecises but low and damp parcels have been dull in the extreme, at barely late rates. The arrivals of foreign wheat have continued very limited, and the quantities on offer have fallen off. However, importers have continued very firm in their demands, and the quotations have been orted.

The barley trade has been in a healthy state, but we have no change to notice in value. Fine malting parcels are still very scarce. New malt has moved off steadily—other kinds slowly, on former terms. The oat trade has continued in a healthy state, and prices have, in some instances, exhibited an upward tendency. Beans have ruled heavy, at 1s to 2p per quarter leas mosey, and the value of peas has given way 1a per quarter. Notwithstanding that very little foreign flour is now on offer, English qualities have been by no means active at late quotations.

Most of the continental markets have ruled somewhat heavy for wheat for export purposes; nevertheless, very little change has taken place in prices. Barley and cats have sold steadily, at fully late rases; but other articles have been duil and drooping. The latest advices from the United States are to the effect that both wheat and flour were duil and lower to purchase,

In Scotland, fine wheat, barley, and oats have moved off steadil fail prices. All other kinds of produce have met a dull inquiry, at he previous rates. The shipments to the South have continued season iy, at 800

The Irish markets have been somewhat heavy for wheat. In prices, however, very little change has taken place. Spring corn has maintained its previous value. The accounts in reference to the potato crop are very unfavourable.

unfavourable. A very limited supply of English wheat was on sale here, to-day. Fine dry samples were taken off readily, at fully Monday's prices; but inferior parcels were a dull inquiry. Foreign wheat realised extreme rates with an improved inquiry. Basley and oats were firm in price; but all other articles were very dull, at barely late rates. Mr Ed. Rainford reports the arrival of 27 vessels off coast laden with grain, since the 30th ult. In cargoes afloat, a fair business has been transacted.

At the corresponding period of the year 1850, a quarrel was brewing between Prussia and Austria. There were rumours of changes in the Cabinet of Prince Louis Napo-The French 3 per Cent. Rentes were quoted as low as 561, but English and foreign capitalists were competing eagerly for the new Paris and Avignon and other railway concessions. Then, as now, the world was kept waiting a long time for the American President's message.

In 1857, the Conferences at Paris were occupied with the tracing of the frontier between the Danubian Principalities and Bessarabia. The English funds were kept down to some extent by the Neufchâtel dispute between Prussia and Switzerland, but still more by the high value of money. The project for the establishment of a National Bank of Turkey occupied attention, the first firman having been obtained from the Sultan; but the scheme, in its original form, had a broad basis, and the capital spoken of was ten millions sterling. The pro-spectuses of the Oude and Central Oude Railway Com-panies-the latter of which is now being wound up-had een issued.

In 1858, the question of the union of the Danubian Prin-

cipalities under one head attracted notice. Reschid Pacha the able Grand Vizier of Turkey, had just died. The pro-The pro The Bank of England, on the 7th January, 1858, lowered their rate of discount from 8 to 6 per cent., the increase in the bullion and reserve being extraordinarily rapid.

ST.

In 1859, the French Emperor's speech to the Austrian Ambassador on New Year's Day had excited a sensation. Its full significance, however, was not yet understood; and rumours were in circulation that a reassuring note would shortly appear in the *Moniteur*. The French funds were shortly appear in the Moniteur. The French funds were falling, but were still as high as 711. Consols, which were quoted 96[‡] ex div. at the end of the previous December, commanded 96[‡] on the 6th January. Foreign stocks, incommanded 96‡ on the 6th January. Foreign stocks, in-cluding Turkish Bonds and Lombardo-Venetian Railway shares, were chieffy agitated, yet the Turkish Loan of 1854, was as good as 91, and that of 1858, 82, or 3 discount. Payments on the latter, as well as on the new Chilian Loan, ware in progress. The tenders had in the new Serie for the The tenders had just been sent in for the were in progress. new Victoria Railway Loan of 1,000,000/. The demand for money had temporarily revived, and the "other" securities

money had temporarily revived, and the "other securities in the Bank had increased a million and a quarter in a week. The amount of the "other" deposits, as compared with the "other" securities, showed, in 1850, a deficiency of 1,955,758/; in 1857, a deficiency of 9,198,773/; in 1858, a deficiency of 10,815,129/; and in 1859, a deficiency of 4,620,027, To 1860, the information of 509,5821 4,629,6364. In 1860, the deficiency is 7,683,5824. The demand for money this week has been quite as active

as was anticipated. Heavy revenue payments, coupled with the engagements maturing in the first week in January, have had the usual effect. In many quarters money has proved scarce; and the majority of the discount establishments have been obliged to resort to the Bank of England for the advances usual at this season. The Bank's business has consequently undergone a great expansion ; and, to a certain extent, the coming dividends may be said to have been antici-pated. The bulk of the advances fall repayable at that establishment between the 9th and 14th. Already, however, the pressure is subsiding, and money has become somewhat more abundant, in anticipation of the release of the dividends. Notwithstanding the calls upon the market on account of new projects, there is an expectation that the market will be better supplied next week. To-day the best bills were discounted in Lombard street at 21 per cent., but the demand, both there and at the Bank, was active.

The dividends will be payable to the public at the Bank on Monday, the 9th.

The arrivals of specie and bullion since the date of our last report have been large, comprising a total of about 660,000/, of which 390,000/ is from Australia. The whole goes away, the continental demand continuing; but the withdrawals from the Bank, which commenced last week, 8,000l in gold was taken out to-day have been checked. for exportation.

The movements in bullion and in the Indian Government paper are thus noticed by Messrs Pixley, Abell, and Langley, under date this day :-

ley, under date this day :--Gold.--A large business has been done during the past week. Since our last (29th Dec., 1859), the arrivals have been considerable, and the whole amount has been taken for exportation, together with about 30,000l purchased from the Bank of Englasd. The ships arrived are:-Edinburgh, from New York, with 45,000l : Persia, from New York, with 30,000l; Angleses, from Melbourne, with 280,000l; Lew Coew, from Melbourne, with 109,000l; La Piata, from the West Indies, with 8,000l; Tyne, from the Brazils, with 41,394l. A further amount of gold, saved from the wreck of the Royal Charter, will be sold in a day or two. The following table gives the number of cunces of gold that have arrived from Australia during the past three years:--AMOUNT OF AUSTRALLY GOL Approxem purply of THE YEARS 1857.

AMO

Silver.—There have been some considerable amounts of silver imported from the Continent during the past week. The La Plata has brought 186,000l from the West Indies, and the Euxine 6,254l from the Penin-sula. The bars bought by the La Plata have been sold at 62d per us standard, and we quote that price as very firm. Mexican Dollars.—The dollars brought by the La Plata have been sold at 61²/₂d, and that price we consider very firm. The Fulton, from New York, brought 10,000l in dollars. Exchange may be quoted for Bank paper 2s 0²/₂d to ²/₂d, both for Bombay and Calcuts, fid days' sight, with a fair business doing, particularly Bombay, inclining the rate for the latter more to ³/₂d then ¹/₂d. Madras, 60 days' sight, 2s to 2s 0³/₂d. Ir dia Government Loan Notes continue in excellent demand, at im-Silver. There have been some considerable amounts of silver imported

THE ECONOMIST.

proving prices. Very large amounts change hands from day to day, and we quote sales of 5½ per Cents. 103%, or 23 0% d to 23 15-16d. 5 per Cents. are very scarce, but we quote them nominal at 1s 11½d. Quotations for Bullion.—Gold—Bar gold, 77s 9½ d per ox std ; bar gold refundle, 78s 1d per uz std; South American doubloons, 75s 3d to 75s 6d per oz; United States gold coin, 76s 3½ d per oz, last price. Silver-Bar silver, 5s 2d to 5s 2Å d per ox std; bar silver, containing 5 grs gold, 5s 2Å per oz std; Mexican dollars, 5s 1Å d to 5s 2d per ox; Spanish dollars (Carolus), 5s to 6s 3d per oz, last price; five-franc pieces, 5s 0Å d per oz.

The Indian 5 per Cent. rupee paper has now reached a price here equivalent to $96\frac{1}{2}$ to $97\frac{1}{3}$, and the $5\frac{1}{2}$ per Cent., 104 to $\frac{1}{4}$. Investments continue to be made daily, and extend to all other classes of Indian securities, including the railways.

The continental exchanges this afternoon were flat. The Dutch exchange has fallen since last week. The Austrian on the other hand, has risen, owing to the revival of political distrust. As regards other places, the variations are not important.

Advices have been received of the sailing from Melbourne for England of the ships Water Nymph, Sussex, Donald

for England of the snips Water Nymph, Sussex, Donald-McKay, and Commodore Perry, with an aggregate of about 360,000*l* in gold. These vessels are not yet due. A very important financial operation—the conversion of the public debt of Canada—was inaugurated on the evening of Saturday, the 31st, Dec. by the issue of the following notice by Meesrs Baring Brothers and Co., and Glyn, notice by Me Mills, and Co.

London, 31st December, 1859. Messre Baring Brothers and Co., and Messre Glyn, Mills, and Co., the financial agents in England for the Province of Canada, beg to state that they are prepared, in conformity with the annexed statement, to receive applications for the loan, therein astborised, of 2,800,000/ (asy two mil-lions eight hundred thousand pounds of stock), bearing 5 per cent. interest, either in bonds to bearer, or in inscriptions, on the following conditions to

conditions :--Applications must be delivered at one of the respective offices of Messrs Baring Brothers and Co., or Messrs Glyn, Mills, and Co., on or before Tuesday, 10th January, with a specification whether the amount applied for be required in bonds or inscribed stock. No application will be received after three o'clock p.m., on Tuesday, 10th January. The latter of allowers in the store of the store of the store of allowers.

The letters of allotment will be transmitted with as little delay as pos The letters of allotment will be transmitted with an little dealy as pos-sible, and upon the amount allotted the payment of an instalment of 10 per cent. will be required on Monday, 16th January, at one of the banking houses of Messrs Baring Brothers and Co., or Mesars Glyn, Mills, and Co., where the subsequent instalments must also be paid, being in all as

90 per cent. First instalment 10 per cent. raid on allotment on 16th January.

100

¹⁰⁰ From these amounts to be deducted 2½ per cent. interest due 1st July, 1860, and 1st January, 1861, reducing those instalments respectively to 5½ per cent. and 7½ per cent. Discount at the rats of 5 per cent. per annum will be allowed on the payment in full in cash in asticipation of the above-mentioned instalments, but no discount will be allowed except on payments in full and in cash

Interest at the rate of 5 per cent. per annum on the nominal capital commences from 1st January, 1860, and the half-yearly dividends due 1st July, 1860, and 1st January, 1861, will be deducted from the instalments

ruy, 1860, and lat January, 1861, will be deducted from the instalments due in those months.
 On default of payment of any instalment on the day named, all previous payments will be forfeited, and the party so in default shall not be entitled, after the day fixed for the payment, to claim any bonds, certificates of inscription, or dividends.
 Bonds of 1,000l, 500l, and 100l each, with half-yearly coupons payable at the offices of the provincial agents in London (where the principal when due will be paid), for twenty-five years, and a takon or authorisation for the receipt of further dividend warrants when required, and when the principal of the bonds shall not have been paid, will be issued as soon as they are received from Canads, on payments in full; and in the meantime, provisional certificates for the payments and Co., and Measre Glyn, Mills, and Co.
 Gertificates of inscription will be delivered at the office of Messrs flyn, Mills and Co. to such persons as may prefer stock inscriptions of stock in the name or names of those who may present them for that purpose; but inscriptions of atoks cannot be converted into bonds. The bonds thus converted will be duly cancelled.

A sinking fund of one-half of 1 per cent, of the capital of the issue under the Act referred to in the annexed statement, with accumulating interest, will be applied to its gradual extinction, in the mode specified therein.

15

therein. The provincial sgents of Canada are prepared to receive in payment of this loan the Provincial Government 6 per Cent. Bonds payable in Canada, and the Cousolidated Municipal Loan Fund Bonds, until 30th Jame marf inclusive, on the conditions specified in the annexed statement; and also to carry into effect the exchange of the existing Sterling Bonds of Canada bearing 6 per cent. interest payable in London, na well as those bearing 5 per cent. interest, until 30th Jame marf inclusive; issuing, until bonds or certificates of stock are prepared, provisional receipts for the same. the same.

Together with this notice was published a long report from the Minister of Finance of Canada, explanatory of the position of the public debt, and of the objects sought to be attained by the present operation. We cannot find room for the latter document, which is by no means lucidly drawn up, but an abstract of its leading points may be useful. The Provincial Parliament has authorised the Govern-

ment to consolidate the existing debt into a new Canadian 5per Cent. sterling stock, irredeemable until after 25 years from the 1st inst. In lieu of stock, the Government are also empowered to issue *bonds*, under precisely the same con-ditions, and convertible into stock.

At present the public debt of Canada is composed as follows :-

1. Imperial Guaranteed Loan, bearing 4 per

279,325 London 8 Sterling Debentures, 6 per cent., payable in 7,223,600

Canada 3.000

5.	Currency	Debentures, 5 per cent., payable in	Street Barrier
	Canada	***************************************	147,683
6.	Currency	Debentures, 6 per cent., pavable in	

Canada 524.064

Total £9,667,672 chargeable on the Consolidated Revenue Fund, and bearing an annual interest of 546,3457.

In addition to the above, the Province, as trustee for the Consolidated Municipal Loan Fund, and for other special funds, has issued debentures chargeable specially upon the security of those funds, and not upon the Consolidated

London, 6 per cent. 8. Currency and Sterling Debentures, chargeable on the Consolidated Municipal Loan Fund, £200.000

payable in Canada Currency Debentures, 6 per cent., chargeable on minor special funds, payable in [Canada 1.720,160 63.178

ever, amounts already to 793,000%. The subscription list to the new loan is to be closed on the 10th instant, but up to the 30th June next (the final instalment not being due unti the 15th Jan., 1861) there will be received in liquidation of the instalments, in lieu of cash, Provincial Currency Bonds or Municipal Loan Fund Bonds, being the stocks numbered, respectively, 6, 7, 8 and 9, in the above statement of the debt. Were the whole of these bonds to be converted, they would cover nearly the whole of the new loan. A large amount, however, is fixed in one way or another, and will not be converted. For example, the Government themselves hold bonds-nearly all Currency Debentures-to the amount of 724'777! sterling, all Currency Dependures—to the amount of 724 7777 sterning, purchased on account of various "special funds." Again: By the terms of the charters granted to the provincial banks, they are required to hold as security for their issues Pro-vincial Depentures to the extent of 10 per cent. of their capital. The amount so held is now about 500,000*l* sterling,

XUM

which is thus withdrawn from sale. Consequently, the amount of debentures which it is estimated may be paid in on account of the new loan is reduced to 1,250,000*l*. The manner in which the proceeds of the new loan of 2,800,000*l* are to be applied, therefore, stands thus:--

1. To pay up in full the sinking fund for the Imperial Guaranteed Loan, about 700,000/.

". To reimburse the Consolidated Revenue Fund for advauces made in 1859, on account of redemption of debt, 406,0004.

3. To redeem so much of the Feudal Tenure Fund, 250,0004.

4. For public buildings at Ottawa, 200,000l.

16

5. For redemption of remainder of 6 per Cent. Currency Debt, both direct and indirect, about 1,250,000*l*.—Total, 2,800,000*l*.

It will be observed that the addition to the public debt of Canada involved in this operation consists only of the 200,000l which is to be applied to public buildings at Ottawa, the future capital. The remaining 2,600,000l goes in reduction, in some form or other, of the existing debt. So far as the English money market is concerned, the transaction becomes a new loan of 2,800,000l, less the 1,250,000l of debentures, principally held here, which are to be accepted in lieu of cash. Viewed as a whole, the operation is a highly desirable one, for Canada will effect a large saving in the interest of her debt, and the position of her creditors will be materially simplified. The terms upon which the bonds described are to be accepted in payment of the new loan are stated as follows by the Minister of Finance:—

will be materially simplified. The terms upon which the bonds described are to be accepted in payment of the new loan are stated as follows by the Minister of Finance:— Until 30th June eart, subscribers who are holders of Provisional Government 6 per Cent. Bonds payable in Canada, and having the direct engagement of the Consolidated Revenue Fund, will be permitted to pay their subscriptions to the new stock or bonds in these securities an par (viz., 1/4 s 4d currency for 1/ sterling), adding one quarter per cent. premium for each year the bond may have to run. Thus, a bond having twenty years to mature will be taken at 105, payable in the new stock or bonds at par. Subscribers who are holders of Consolidated Municipal Loan Fund Bonds will be permitted to exchange them at par for the new stock or bonds—viz., 1/4 s 4d currency for 1/ sterling. The applications already sent in to the agents are believed

The applications already sent in to the agents are believed to have reached 10,000,000*l* or 12,000,000*l*. A Consolidated Candian 5 per Cent.sterling stock or bond is a security highly calculated to attract the attention of *bona fide* investors, at a time when the current value of money is so low. The new loan has already been dealt in to some extent in the Stock Exchange, and was quoted this afternoon 2 to 24 per cent, per annum.

24 per cent. per annum. Thus far as regards the new loan of 2,800,000!. But, with a view to the consolidation of the entire debt of Canada, stock or bonds of the same character as that now offered may be accepted by the holders of the Sterling 5 and 6 per Cent. Bonds, payable in London (and numbered, respectively, 2 and 3 in the foregoing general statement of the debt). The terms upon which this further conversion may be effected are described as under by the Minister of Finance. There is no doubt that the option will be extensively accepted.

In order to facilitate the consolidation of the entire debt of the province, the Government are propared to convert the Starling Six per Cent. Bonds, payable in London, and carrying a direct charge upon the Consolidated Revenue Fund, into new stock or bonds of the same character as those now to be disposed of, and to be issued under the authority of the same act, at the following rates :--

	30	- B - CL

Holders of 5 per C(n^{*}. Sterling Bonds may convert at par. But neither class of such Sterling Bonds payable in London, can be received in payment of subscriptions to the new loan. The option of conversion is limited to the 30th June, 1860.

The prospectus of the Bank of Turkey, to the approach ot which reference was made in the last number of the Economist, has been issued. The capital is to be 1,000,000/, in shares of 20%, or 22 medjidiés each, with power to increase to three millions, with the sanction of the Ottoman

Government. The establishment is to have the right of issuing, to the extent of three times the amount of bulli in its coffers, bank notes, which shall be a legal tender at Constantinople and in all parts of the Sultan's dominions where the Bank may have branches or agencies. The shares command $\frac{3}{4}$ to $\frac{7}{5}$ prem. In these points we embrace all that is to be said in favour of the undertaking, which meets with numerous and weighty objections. Amongst these are the following :---1. The direction is almost exclusively Greek and French, the former element largely predominating. 2. The seat of management is to be at Constantinople. 3. The governor, sub-governor, and two of the censors, are to be appointed by the Turkish Government, and the rest of the directors and censors by the concessionaires during the first three years of the Bank's existence. 4. The Bank is not to commence business until the entire capital shall be paid-up in full; and this payment in full must be effected within six months of the date of the delivery of the Imperial firman; whilst another stipulation is, that the commencement of business shall not take place until the whole of the paper money shall have been withdrawn. The latter preliminary the Government appear to be utterly unable to accomplish, unless, indeed, the Bank propose to lock up their own funds largely in the operation. Other objections there are, but the main one is that the direction does not command confidence here.

The prospectus of the City of London Brewery Company, Limited, has likewise appeared. This company is to carry on the extensive business of Messrs Calvert and Co., who, through signal imprudences, brought themselves to a stop-page some eighteen months ago. The creditors in the old page some eighteen months ago. The creditors in the old concern continue their interest in the new one to the extent of 360,000l, but have consented to hold only a deferred rank. The capital now sought, and already partially ob tained, is 240,0007, in 6 per cent. preference shares of 257 each, redeemable at the end of ten years, with 20 per cent. bonus. The proceeds will form the working capital. It bonds. The proceeds will form the working capital. If results from the figures already rigorously tested by the ac-countants to the inspectors by whom the business has been carried on during the last eighteen months, that the net profits now exceed 50,000*l* per annum, being more than four times the sum required to meet the charge of the pre-ference task and even the a divided of unrule of the preference stock, and equal to a dividend of upwards of 8 per cent. per annum upon the whole capital of 600,000*l*. The preference capital will, therefore, in all probability, receive a considerable return beyond 6 per cent. Meanwhile, it forms a first charge, not only upon the profits, but upon the entire property of the undertaking, which is valued by inde-pendent authorities at 491,036/, and is made over to the new The project is very favourably recompany for 450,000l. garded, and the preference shares were quoted this afternoon 3 to 5 premium.

Brazilian railway shares have been unfavourably affected by a rumour that a scheme for the drainage of the city of Rio is about to be brought forward. This project, however, will not stand upon the same basis as the guaranteed railway shares. It is stated that an authoritative proposition will shortly be made for the capitalisation of a portion of the capital of the Brazilian railways into paid-up stock, leaving the non-capitalised shares alone liable for future calls.

San Paulo Railway shares are quoted $\frac{1}{2}$ to $\frac{1}{8}$ dis.; Ocean Marine Insurance, $1\frac{1}{8}$ to $1\frac{3}{8}$ prem.; and Universal Marine, $\frac{1}{8}$ dis. to p.r.

At Paris, to-day (Friday), the closing quotations of the Bourse were as follows, viz., 3 per Cent. Rentes, for money, $(8,50; ditto, for account, 68.45; ditto 4\frac{1}{2}$ per Cents., 96; Bank of France shares, 2,820. The 3 per Cents. show an improvement of $\frac{1}{5}$ to $\frac{1}{4}$ per cent. since yesterday afternoon, but a fall of $\frac{3}{4}$ per cent., compared with the final quotations of last Friday. The extensive speculation for a rise which was entered into during the month of December has been followed by a severe relapse at the settlement just concluded, aggravated by the rumour that the expected Congress has been indefinitively postponed.

been indefinitively postponed. The variations in the English funds have been trifling. Consols closed this afternoon barely $\frac{1}{2}$ per cent. lower than on last Friday, viz., at 95§, "sellers," ex div. for the 10th inst. Business has been very limited, but the market has derived support from the anticipation of the reJa

THE ECONOMIST.

is all prospect of a free accumulation of stock in Liverpool, so large are the shipments coming forward, and the receipts in America continue to increase considerably.

The following statistics show the import, consumption, &c., of otton in great Britain in the year 1859 :---

Imported into Great Britain in 1859 Exported from	2,828,900
Net import	2,391,850
Stock in Great Britain, December 31, 18 Nett import, as above	58 371,980 2,391,850
Stock in the kingdom, December 31, 18	2,763,830 59 469,520
Taken for consumption in 1859	
Against 41,820 in 1858 Again - 37,703 - 1857 - - 43,396 - 1856 - - 40,395 - 1855 -	
AVERAGE WEIGHT OF AMERICAN COT 1859	
	Actually Exported
by the Trade. bales. 1,780,522 Brasil 101,800 Egyptian 98,100	and other Outports. hales. 142,200

We have to report a steady inquiry for most kinds of tes, the prices of which have been freely supported.

Although within the last day or two the trade has been far from active, raw sugar has improved in value 1s per owt, and there has been a good demand for refined goods on rather higher terms.

terms. "The course of the sugar market during the past year," observe Messrs Trueman and Rouse, "has, on the whole, been one of great srenness, for although there have been temporary fluctuations in price, the extreme quotations have not shown a difference of more than 4s per cwt, and are now, in most instances, on a par with these of 1st January, 1859. The consumption of cane sugar has been comparatively but little interfered with by beetroot, which finds little favour with our refiners generally, and several of those who have used it will only do so again at such a difference in price as may compensate for the injury which they consider the character of their goods sustains by its introduction. There is, however, no doubt that in other European countries the reverse is however, no doubt that in other European countries the reverse is the case; beetroot sugar is gradually superseding that of tropical preduction, and this change would be still more decided in the event of much advance in the price of the latter. The estimates which were put forth in the early months of the year, as to the probable ont-turn of the crops, have been pretty well borne out by the results, and the imports during the past twelve months have but little exceeded those of 1858. Turning to the future, there seems at present no reason to look for creater supplies then have but little exceeded those of 1858. Turning to the future, there seems at present no reason to look for greater supplies than the demand will take off; from no tropical producing countries do the reports warrant the expectation of larger crops, except Cuba and perhaps the British West Indies, but any increase from these two sources will be required to make up for the deficiency in Louisiana; from nearly every source supplies are reported to be very late, and there can be no doubt that, for some time to come, the imports will in consequence be very light."

Privately, as well as at public sale, coffee has changed hands freely, at very full prices to a slight advance, and the show of samples is only moderate.

Samples is only monerate. Birports and Storks of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Eleven Months ending 30th November, 1355 and 1859.

* The stocks in Holland are in first hands only ; in all other countri in first and second hands.

Cocoa has commanded more attention, at extreme rates. The rice market has been tolerably active. In prices, however, actual advance has taken place. An improved business has no actual advance has taken place, been passing in most kinds of fruits.

Measure forwell and Co. have published their annual circular in reference to the leather trade. As regards the importation of hides, they intimate

hides, they intimate The trade has been sound and healthy, the demand legitimate, not speculative, and no heavy stocks are left on hand. It is obvious that, with the extensive importation of South American and Australian hides, and, we believe, a considerable addition also to the home slaughter; the tanners must have more leather in process than last year, making even a liberal allowance for a deficiency in the import of other goods, and for the increased exportation (representing probably 100,000 hides); but we are of opinion that there is not more leather in the hands of manu-facturers than will be required to meet the increased and increasing con-sumption of the country and of its dependencies, in their present properous state. tous state.

Messes Churchill and Sim have issued the comparative state-ment of the stock of timber, deals, staves, &c., at the public docks in London, at the close of the following years :-

	1857.	1858.	1859.	
Dealspieces	1,622,859	 1,668,686	 1,733,000	
Battens and boards	836,909	 611,443	 974,000	
Fir timberloads	67,013	 43,960	 71,000	
Wainsoot logs pieces				
Stavesmille	1,236	 998	 1,360	
	COLONIAL			
Deals and battens pieces	2,522,980	 2,072,934	 1,980,000	
Red pine timberloads	2,870	 1,688	 1,100	
Yellow pine ditto	11,452			
Oak timber, Quebec				
Teake, and African oak				
Elm and hardwood	7,243			
Stavesmille	1,139	 995	 950	

Both hemp and flax have met a very inactive inquiry; never-theless, holders, generally, have shown no disposition to accept

lower rates. The silk market may be considered in a healthy state ; but we have very little change to notice in prices.

blished until reliable information was received relative to the prospects of the growing crop, and which being considered favourable, lower rates were submitted to, and subsequently established a decline in some descriptions of nearly 2d per lb. There has been more inquiry for exportation, and sales made of upwards of 60 hads, chiefly of fine quality. About 90 hads were taken for the uavy. Latest accounts from New Orleans represent a very quiet market. Imports, 706 hads. Deliveries, 999 hads, against 976 hads in the corresponding month of last year. Stock, 16,890 hads segment 14,601 hads in 1859, 10,316 hads in 1858, 11,101 hads in 1857, 10,041 hads in 1856, and 11,354 hads in 1855.

Scotch pig iron has moved off slowly, at 57s 6d and 57s cash, mixed numbers. Copper has advanced 5*l* per ton. Tough cake is now worth 117*l*, and best selected 120*l* per ton. Several con-tracts have been entered into to deliver spelter in the spring at 21*l* 15s to 22*l* 2s 6d per ton.

Messrs Edwards, Eastty, and Co., have issued the annexe statement in reference to the movements of linseed in 1859 :----

In granary we have about 35,000 querters, namely, 11,500 Black Ses, 1,000 St Petersburg, and 22,500 East Indis, baside which about 20,000 quarters have been lately reported, but are not yet discharged from import ships. At Huil, there are 55,000 quarters, and there is said to be 45,000 quarters in crushers' hands, including what is adoat in the port. At Liverpool, about 20,000 quarters are held by importers. Off the coast, there are 40,000 quarters ordered, but not yet arrived at their destinations, and in addition 185,000 quarters expected within the ensuing three months, 70,000 quarters of which are Black Ses, 86,000 quarters Calentte, and 29,000 quarters Bombay, or in all about 100,000 quarters three month, 70,000 quarters of which are black Set, 80,000 quarters Calcutts, and 29,000 quarters Bombay, or in all about 100,000 quarters less then at the same time last year. The import into London is again greatly in excess, and stock being only about the same as last January, whils the export has been considerably less, proves that the consump-tion drawn from this district must have been nearly double that of the tion drawn from this district must have been nearly double that of the previous year. Subjoined are the respective annual official returns of the aggregate imports into the United Kingdom :--1841, 363,461 quarters ; 1842, 367,700; 1843, 470,539; 1844, 616,947; 1845, 655,793; 1846, 506,141; 1847, 439,512; 1848, 799,650; 1849, 626,495; 1856, 608,984; 1851, 630,471; 1852, 799,402; 1853, 1,035,335; 1854, 628,513; 1855, 756,950; 1856; 1,180,179; 1857, 1,031,113; 1858, 1,017,844; 1859, about 1,250,000. To this port the East Indies last year supplied nearly 350,000 quarters, the Black Sea about 35,000 quarters, and the remainder was made up of cotchels from the Bakic, Archangel, Alexandris, &c. The direct re-export from Regland amounts only to about 90,000 quar-ters, against 150,000 quarters in 1858, and 30,000 quarters in 1857. The aggregate into the United Kingdom is made up of about 300,000 quarters series, and remainder made up of Alexandrian and other Mediterranean ports, and sundries.

"During the year the public contracts for coals," write Messra Seymour, Peacock, and Co., "have been far below the actual supplies—excess in shipments under contracts or private arrange-ments having made up the deficiency. The contracts with the Peninsular and Oriental Company, Government, and Indian Council, consisted of the following quantities :--

	tons.	1	tons.	
Aden	20,000	Halifax	500	
Bombay	6,000	Alexandria	6,000	
Galle		Sierra Leone	4,000	
	5,500	Fernando Po	3,800	
Bermuda	2,000	Gambia	400	
Malta	25,000	St Paul de Loando	2,000	
Madras	7,000	Jamaica	8,000	
Kurraches	2,000	Gibraltar	3,500	
Ascension	6,500	1		
Sinous Bay		Total	.09,500	

The actual consumption of English coal in India and China is about 325,000 tons per annum ; in addition to which, about 35,000 tons has been exported to China by the English and French Governments during the autumn, in consequence of the war, precipitated by the transactions at the mouth of the river Peiho. The consumption at the Cape of Good Hope is about 25,000 tons per annum. The Egyptian Government imports into Alexandria about 36,000 tons per annum."

Linseed oil sold at 271 10s, with a moderate inquiry. Other oils have changed hands slowly, at barely late rates.

The tallow market has ruled firm, and P.Y.C. on the spot has sold at 57s 9d to 58s per cwt. The latest advices from St Petersburg are to the effect that very little business was passing for spring shipment.

Other articles of produce have ruled about stationary.

We extract the following statistics, having reference to shipping from the annual circular of Messrs Laming and Co. :--

"The market for all kinds of cotton goods of domestic manufact ture," observes the New York Shipping List of the 27th ult, "has been dull, but without leading to any material concession on the part of holders of desirable fabrics, though there is noticeon the part of holders of desirable fabrics, though there is notice-able a softening in rates of less desirable goods, which have accu-mulated. There is no change worthy of note, the transactions having been limited to the City trade. Shipments during the week have been heavier than for a long time, however, which betokens a continued healthy export movement, and for such goods as are most required for shipment, the market continues buoyant and holders firm, at full rates. Foreign goods are quiet, without alteration in prices." without alteration in prices."

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAT'S MARKETS, SEE " POSTSC MINCING LANE, FRIDAY MORNING.

Mincine LANS, FAIDAY MORNING. SUGAR. — There has not been quite so much animation in the demand, but importers generally have continued firm, and the advance of la per cut paid during the holidays was fully maintained up to yesterday, while sume parcels of foreign muscovado, offered by auction, were held for a forther rise. West India is very firm, owing to the indifferent sunply. 632 ca-ks, in public sale, about two-thirds sold : Barbadoes, middling to good, 39s 6d to 44s; brown and low yellow, 36s to 39s; Tobago, 36s 6d to 40s; cry-tallised Demenra, 42s to 45s; brown and low soft gry, 38s to 39s 6d. The deliverier, as usual in the Christmas week, were moderate, but the stock is reduced to 57,000 tons, against 53,600 tons last year. last year.

Mauritius .- A limited business has been done by private contract,

Mauritius.—A limited business has been done by private contract, chiefly in the lower qualities, at previous rates.
 Bengal.—1,239 bags ware partly sold at 41s to 43s for good soft middling to fins yellow Garpatta date; soft brown and yellow sorts bought in al 33s to 38s 5d per cwt.
 Madras.—5,065 bags Jaggery were bought in at 30s to 30s 6d, and were partly sold at 29s to 30s; washed, 29s to 29s 6d, 5,589 bags grocery, good rather soft to fine grainy yellow, 44s to 47s per cwt.
 Penang.—1,531 bags sold at 35s to 28s per cwt for brown and yellew. Foreign.—181 boxes white Cuba sold at 32s do 38s 6d. 415 caaks Porto Rice and 614 casks Cuba sold at 32s to 48s; and s cargo of 660 tons Jave, equal to No. 12, at 30s 6d per cwt.
 Befined.—The market has been stendy. Common dry goods quoted at 51s 6d to 52s; rushed, 49s to 51s 6d; piecce, 42s to 48s per cwt.
 There is a moderate supply, and fine qualities of the latter are searce.
 MozassE.—A stendy business has been done, the sales amounting to marry 300 puncheona West India at 15s to 16s 6d per cwt for common to good quality.

nearly Suo punctions. The good quality. Rux.-There is no change in the market this week. Jammica has been in stoady demand. The Government contract is stated to have been taken last week at 1s 10² d to 1s 11d per proof gallon. ConoA is firmer, and there has been more inquiry for West India by

private contract. COFFEE.—Several arrivals of Ceylon have taken place, but the market remains firm, and 262 casks 456 barrels and bags plantation brought forward yesterday: fine ordinary small berry to middling, 67s 6d to 73s 6d; good middling to good, 75s to 81s 6d. 383 bags good ordinary native sold at 59s to 59s 6d per cwt. No further transactions of import-

native sold at 59s to 59s 6d per cwt. No further transactions of import-ance have occurred privately. Tra.—Moderate purchases have been made by the dealere, and the market is firm : common congou quoted 1s 34d per lb. No further sales are at present declared for the ensuing week. Rrom.—The demand has been active, and at rather higher prices. On the spot rather a large business is reported : Arracan, 9s 6d to 9s 9d; Rangoon, 7s 3d to 9s 6d; Moulmein, 9s 6d; white Benzal, 10s to 13s 4d; i pinky Madras, 9s 6d to 10s. A floating cargo of Madras has sold at 9s 6d for Liverpool, the quality not guaranteed; and a floating cargo of Necranic Arracan at 10s 6d for the Continent. 6,614 bags Jave, by auction, were about two-thirds cold at 10s 6d to 12s 6d for for Javs, by auction, were about two-thirds sold at 10s 6d to 12s 6d for low broken to middling white; a small part sold at 11s. 1,530 bags Bengal were taken in above the value.

were taken in above the value. SALTEERE remains firm at the recent advance established. 1,700 bags Bengal in course of landing have sold at 41s to 42s; and about 2,000 bags on the spot since last Sriday: refraction 114 to 32, 37s 6d to 41s 6d. At auction, 355 bags partly met with purchasers: refraction, 43, 41s 6d; 9 to 63, 38s per cwt. MITRATS or SODA is in steady demand at 15s 6d. A floating cargo has sold, said to be at about 6d per cwt less. DYEWOODS.—Logwood is in active demand. A cargo of 400 tons St Domingo has been sold at 5l per ton. METALE.—There has not been quite so much animation in the market Foreign copper is higher, and English has advanced 2d per lb. Sootch pig iron has receded in value, closing yesterday at 57s per ton for mixed numbers. A few contracts have been made in spelter at 22l to 22l 2s 6d

POSTSCRIPT.

FRIDAY EVENIN

POSTSCRIPT. FRIDAT EVENIMO. SUGAR.—The market is firm but quiet. 17,400 bags Mauritius, 1,540 bags Bongai, 10,643 bags Madras, were mostly bought in. 2,200 bags Penang sold at 355 661 to 41s for brown and yellow. The sales of West Igaia for the week have amounted to 2,160 casks. Copyrg.—330 casks 86 barrels 700 bags plantation Ceylon sold at barely previous rates. 800 bags native ordinary to good, 59s to 61s 6d. Rice is very [dirm. 11,000 bags by auction to-day partly sold : Ne-casois Arracan, 9s 6d; white Bengal, 9s to 10s 6d. Sprcs.—800 bags Singapore black pepper sold stadily at 4<u>3</u>to 4<u>4</u>d. Breas nutmege and 12 cases mace realised the former value. 597 bags African ginger sold at 36s to 37s 6d per cwt. SattPartme.—300 bags sold privately at former rates.

ADDITIONAL NOTICES.

REFINED SUGAR.-The home market for refined augar have been very gaint this week. Common lumps, 51s 6d. In Holland, crushed augar cones firm.

GREEN FRUIT .- The demand continues of an extensive character, mild GREEN FRUIT.—The demand continues of an extensive character, mild wather assisting consumption. Several cargoes of oranges from St Michael, Terceira, Seville, and Valencis, sold by Keeling and Hunt at public sale, went at prices somewhat lower than were realised before Christmas. The price of black Spanish being reduced has improved the sale. Lemons without alteration. Confectioners are taking a quantity of the market.

ne market. Dar Faort.-There is every symptom of a healtby trade for some time come; stocks not excessive, and demand good to meet a large conaption.

ENGLISH WOOL .- The market is rather quiet, and prices ramain unnged.

12th instant.

12th instant. Toaacco. - The market has presented no change ; good and fine home trade caeriptions have been chiefly inquired after, and of which a few limited sales were effected at present quotations. Marans. - More activity has been visible during this week, and in some things a good business has been done. Coper advanced $\frac{1}{2}$ d per b on sheets, and δl per ton on unmanufactured, on the 5th inst, at which the market is very firm, and even buoyant. Iron is without change of consequence, but appearances are more favourable. Lead is still quiet. Speiter also quiet, but in good favour. Tin-English is scarce, and foreign firm at quotations. Tin plates in good demand. TALLOW.-Official market letter insued this evening :-

HOP MARKET.

HOP MARKET. BOBOUGH, Monday, Jan. 2.—The operations on our market, during the past week, have been somewhat limited, owing to the period of the year, and the scarcity of fine samples. In the few sales effected, recent rates have been fully supported. Mid and East Kents, 84s, 112s, 147s; Weald of Kents, 63s, 76s, 88s; Sussex, 60s, 68s, 76s. FRIDAY, Jau. 6.—The market continues active at late quotations.

POTATO MARKET. SOUTHWARK WATERSIDE, Monday, Jan. 2.—During the past week the arrivals coastwise have been light, owing to contrary winds; but there have been considerable supplies by rail. The following are this day's quo-tations.—York Regents, 90s to 130s; Lincolnahire ditto, 80s to 100s; Dunbar ditto, 100s to 115s; Kent and Essex, 70s to 100s; Perth, Forfar, and Fifeshire ditto, 70s to 100s; Rocks and Reds, 65s to 75s; French whites, 60s to 80s; Belgian ditto, 60s to 70s por ton. THURBAR, Jan. 5.—There has been no material increase in the arrivals of home produce, coastwise or by rail, since our last report. Trade is still rather active, in consequence of the short supplies. York Regents, from 130s to 140s; ditto Flukes, 140s to 150e; Kent and Essex ditto, 80s to 120s; Sootch ditto, 90s to 110s; ditto Cups, 80s to 90s; Dunbars, 120s to 130s; and French, 80s to 90s per ton.

HAY MARKETS. —THURSDAT. SMITHFIELD. — Meadow hay, 2/ 10s to 4/ 4s; clover, 3/ 10s to 5/ 0s; and straw, 1/ 5s to 1/ 10s per load. A steady demand. WHITECHAPEL. — Meadow hay, 2/ 10s to 4/ 4s; clover, 3/ 10s to 5/ 5s; and straw, 1/ 4s to 1/ 10s per load. Trade firm. CUMEERLAND. — Meadow hay, 2/ 12s to 4/ 4s; clover, 3/ 10s to 5/ 0s; and straw, 1/ 5s to 1/ 10s per load. Supply moderate, and trade firm.

COAL MARKET. FRIDAT, Jan. 6.—South Kelloe 195—Hengh Hall 175 6d—Whitworth 16a—South Durham 175 6d—Wall's-end Braddyll's Hetton 195—Walls-end Gordon 165—Belmont 175 6d—Tanfield Moor Butes 145 9d. 13 ships at

LIVERPOOL MARKETS.

WOOL

WOOL. (FROM OUR OWN CORRESPONDENT.) FRIDAY, Jan. 6.—The year has opened with a very good domand for all useful descriptions of foreign wool, but for want of stock, the transactions have been of no great extent. Prices continue to be very firm. CORN. (FROM OUR OWN CORRESPONDENT.) FRIDAY, Jan. 6.—Whesh in moderate request at full quotastions. Flour dull and neglected. Beans 6d cheaper. Indian corn inactive. Oats, oatmeal, and barley only in retail domand. METALS (FROM OUR OWN CORRESPONDENT.)

METALS (FROM OWN CORRESONDENT.) FRIDAY, Jan. 6.—The market, for both Staffordshire and Welsh manu-factured iron, remains firm, with a fair demand. In Scotch pig iron there has been, this week, a pause in the speculative movement that lately existed, and prices have slightly receded. Copper, which has for some time maintained great firmness, has been again advanced in price, to the extent of \$d\$ per 1b on manufactured, and \$d\$ per ton on tile and cake copper. Most other metals are without change.

The Gagette.

TUESDAT, Jan. 3. BANKRUPTS. J. Tilley, St Andrew's road, Horsemonger lane, Southwark, licensed victualler. G. Batters, Hakcham, Surrey, starch manufasturer. G. Sully, Cardiff, shipbroker. D. Richards, Tredegar, Monmouthshire, draper. SCOTCH SEQUESTRATIONS. W Less Glascow coal marchart

HUBBUCK'S PATENT WHITE ZINC PAINT.

Many Painters and Decorators have never seen really good Zine Paint. The adulterations so generally sold to them as Zine Paint bear no comparison with the genuine article. Ent still greater prejudice is excited by their having been supplied with the paint manu-factured by the foreign process, which does not resist the atmosphere of towns lighted by gas. It first loses the gloss, and ultimately washes off.

Hubbuck's Patent Process is completely impervious to every Atmosphere, Bilge Water, and Gas under every form. CAUTION,-The Officers of the H. E. I Company are requested to observe that HUBBUCK'S Zinc Paint supplied them for years, is totally different from what has lately been sent out for the Company's Service in India, that being obtained by public competition among the Paint Grinders at a less price than the raw metal could be bought for.

Each cash is stamped "HUBBUCK, LONDON, PATENT." THOMAS HUBBUCK and SON, PAINT and VARNISH WORKS, 157 FENCHURGE STREET.

£9 14s per 6 dos. £15 10s per 1-cask.
