ECONOMICS AND RESEARCH BRANCH

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents. L2-2/1963

Industrial and Geographic Distribution of Union Membership in Canada, 1962 (English or French). Price 15 cents. L32-763

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 50 cents. L2-159

Wage Rates, Salaries and Hours of Labour. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance and service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. (Bilingual). L2-545

First year service including attractive binder with index tabs and paper-bound volume, \$9.50; service without indexed binder, \$7.00; individual tables, 15 cents. Paper-bound volume, \$1.30.

Group Hospitalization and Medical Insurance Plans in Canadian Manufacturing Industries (English or French). Price 35 cents. L36-558

Working Conditions in Canadian Industry, 1962. Price 35 cents. L2-1562

CORRESPONDENCE—Address letters dealing with editorial matters to the Editor, those dealing with subscriptions to the Circulation Manager. SUBSCRIPTIONS—Canada: \$3 per year, single copies 50 cents each; all other countries: \$5 per year, single copies 50 cents each. Send remittance by cheque or post office money order, payable to the Receiver-General of Canada, to The Queen's Printer, % Superintendent of Government Publications, Ottawa. All subscriptions payable in advance. SPECIAL GROUP SUBSCRIPTION OFFER—Five or more annual subscriptions, \$1.50 per subscription (Canada only). Send remittance, payable to the Receiver-General of Canada, to the Circulation Manager. BOUND VOLUMES—\$5 per copy delivered in Canada, \$7 per copy to other countries. CHANGE OF ADDRESS—Please attach label showing previous address.

Labour-Management Co-operation

Labour-Management Committees in operation across the country now total 1,811 and represent 506,514 workers, a gain of 62 committees and 10,000 workers over totals for previous year

More than 500,000 workers in Canadian industry are now represented on Labour-Management Committees across the country. A statement issued last month gave the exact total as 506,514 workers—an increase of almost 10,000 over the total in 1962.

At October 31, 1963, the number of LMCs operating in industry was 1,811, an increase of 62 over last year's total.

Active promotion of these committees is conducted by the Labour-Management Co-operation Service of the Department.

Primarily concerned with bettering employer-employee relations and improving plant operations, the committees provide labour and management with an opportunity to meet on a regular basis for joint discussion of mutual problems other than those dealt with in collective bargaining.

Topics discussed at LMC meetings include automation and technological change, production, trade, morale of the work force, unemployment and layoffs, quality of products, union-management objectives, competition in industry, employee welfare, safety, fire prevention and care of equipment.

Although all of these topics are not discussed by all committees, there is a steadily increasing use of joint consultation as a means of solving problems affecting the welfare of both labour and industry as a whole.

The largest number of committees, as of October 31, 1963, was in the manufacturing industries, with a total of 1,183 committees, representing 308,997 workers. Highest among these industries was the iron and iron products group, with 295 committees, representing 82,492 workers.

The number of committees and of workers represented in the manufacturing industries were:

Textile products	47	13,007
Rubber & its products	21	10,436
Pulp, paper & paper products	118	46,019
Printing & publishing	17	3,124
Lumber & its products	74	11,213
Edible plant products	83	17,086
Leather & its products	21	4,900
Edible animal & sea products	68	14,025
Iron & its products	295	82,492
Non-ferrous metals & their products	56	19,879
Clay, glass & stone products	85	17,128

Non-metallic mineral products	24	4,524
Tobacco products	6	5,002
Beverages	37	9,210
Electric light & power	99	9,563
Chemical & allied products	64	14,561
Electrical apparatus	54	24,675
Miscellaneous	14	2,153

Next after the manufacturing industries came the transportation industry, with 153 committees representing 80,475 workers. It was followed by the service industry, with 189 committees and 66,236 workers.

The number of committees and of workers represented in industries other than manufacturing were:

Transportation	153	80,475
Service	189	66,236
Communications	160	30,802
Trade—Retail & Wholesale	87	8,782
Mining	30	8,591
Construction	4	1,407
Logging	4	890
Finance	1	334

In the transportation industry, railways had 111 committees, representing 64,348 workers, the rest being accounted for by air, street railways, and forwarding and storage, with 42 committees involving 16,127 workers.

The mining industry had 7 committees in the metallic-ores group, with 5,060 workers represented, and 23 committees and 531 workers in other non-metallic minerals.

Committees were operating in all 10 provinces, with the number of committees and of workers represented as follows:

Newfoundland	9	3,142
Prince Edward Island	6	1,278
Nova Scotia	30	11,749
New Brunswick	23	11,455
Quebec	468	185,631
Ontario	793	187,155
Manitoba	112	30,446
Saskatchewan	103	15,314
Alberta	127	37,045
British Columbia	140	23,299

The union affiliations of the bargaining agencies in plants in which the committees were operating were:

Canadian Labour Congress	1,366	369,224
International Unions		
Unaffiliated	87	13,819
Confederation of National Trade Unions	106	40,319
Others	252	83,152

50 Years Ago This Month

Except for usual seasonal decline during winter months, the general trend of wages during 1913 was upward. Nine-hour day introduced at Ford in Windsor and at silver mines at Cobalt

The general trend of wages in 1913 was upward, but in those days in Canada a seasonal reduction during the winter months was usual, especially for casual labour.

The January 1914 *Labour Gazette* reported that wages had continued to increase during the first three quarters of 1913, the greatest number of changes taking place in April, May and June. But "the usual tendency toward lower wages was evident during December."

Unskilled labour was plentiful, and in Ontario and the western provinces particularly, labourers were working at lower wages than previously. In Quebec and the Maritime Provinces, there was a plentiful supply of labour, and, owing to the scarcity of work, "farmers were able to secure help under contract for a year."

The nine-hour day was introduced at Ford Motor Company at Windsor, and for 1,200 silver miners at Cobalt. The working hours of operatives at the Dominion Textile Company's works were reduced from 58 to 55 a week.

Wage Increases

Some employees of the CPR received substantial wage increases during 1913. Engineers on lines east of Cartier gained an increase of 10 per cent, and an increase of the same proportion went to some 9,000 men employed in the company's mechanical departments in Eastern Canada.

Some 2,500 street railway men in Montreal got an increase of 1 cent an hour.

"Overground labourers at Westville to the number of 500 were given an increase in wages of about 10 per cent during June."

Shorter Hours

A number of manufacturing plants were reported to be working shorter hours. This apparently meant a permanent shortening of hours, since the statement was coupled with the report of the nine-hour day for 300 Ford employees; previously they had worked a ten-hour day.

The reduction in working hours at Dominion Textile was as a result of legislation enacted during 1912. The rate of wages remained the same as previously. About 6,000 workers in all were affected by this change.

Though the word "automation" had not been coined in 1913, evidence that technological change was going on is contained in the following "Traffic on the Michigan Central Railway was fairly heavy, but long trains were responsible for a reduction in the number of crews and service. Eight or ten crews were laid off during the month [December], which is unusual at this time of year . . ."

Railway Building

Railway building had been going on apace in 1913. Canadian Pacific built 1,700 miles of line west of Fort William during the year. "Grading was carried on on 550 miles of new line exclusive of sidings and terminal work, and 262 miles of double-tracking on the main line."

Work on the Canadian Northern between Ottawa and Toronto was finished, and it was announced that a passenger and freight service over the new line would commence early in 1914.

"The Canadian Northern Railway has steel laid up to the site of its Calgary terminal and will open its freight and passenger service next month connecting Calgary directly with Saskatoon . . . A start was made on the construction of the Alberta and Great Waterways Railway from Edmonton to Fort McMurray during December. A considerable number of men will be employed on this line."

Elsewhere the *Gazette* said: "Features of the year were the completion of the Eastern division of the National Transcontinental Railway between Winnipeg and Quebec, and the piercing of the mountain at Montreal by the Canadian Northern Railway."

This journal quoted the *Canadian Railway and Marine World* as authority for the preliminary estimate that in all, 3,144.59 miles of new track had been laid in Canada in 1913 by 20 railway companies. This did not include 254.3 miles of second track laid by the CPR. Of the total length of track, the Northern Ontario Railway laid 590; the Canadian Northern 480.96; the Canadian Pacific, 683.4; and the Grand Trunk Pacific, 600.

NOTES OF CURRENT INTEREST

Appoint 25 Members of Economic Council of Canada

The appointment of 25 members to the Economic Council of Canada was announced by the Prime Minister just before Christmas. Dr. John J. Deutsch had been appointed Chairman of the Council in September, and shortly afterwards, J. L. E. Couillard and Arthur J. R. Smith had been named as directors. These three are full-time posts.

Among the 25 part-time members are six representatives of labour organizations: Claude Jodoin, President of the Canadian Labour Congress; Marcel Pepin, General Secretary of the Confederation of National Trade Unions; A. R. Gibbons, Secretary of the National Legislative Committee, International Railway Brotherhoods; Stanley A. Little, President, Canadian Union of Public Employees; William Ladyman, Vice-President, International Brotherhood of Electrical Workers; and William Mahoney, Canadian Director of the United Steelworkers.

The other members of the Council include representatives of industry and business, agriculture, and various organizations.

Dr. Deutsch, who at the time of his appointment to the Council was Vice-Principal of Queen's University, is an economist who began his career as a research assistant at the Bank of Canada in 1936. He served on the Rowell-Sirois Commission from 1937 to 1940, and lectured in economics at Queen's from 1940 to 1942, when he became special assistant to the Under-Secretary of State for External Affairs. Dr. Deutsch entered the Department of Finance in 1946 and became an Assistant Deputy Minister of the Department in 1953. He later held posts at the University of British Columbia and Queen's University. He has served on a number of Royal Commissions and was economic adviser to the Special Senate Committee on Manpower and Employment in 1960.

When appointed to the Council, Mr. Couillard was Canadian ambassador to Norway and Iceland; Mr. Smith was secretary-treasurer and director of research of the Private Planning Association of Canada.

31,000 Graduates in 1963 Exceed Total in 1962 by 17 Per Cent

Graduates from Canadian universities in 1963 are estimated to have totalled approximately 31,000, according to an annual survey of the supply of and demand for university graduates prepared by the National Employment Service. The total was 17 per cent higher than that of 1962 graduates.

The total was made up of 27,000 students who graduated with first degrees or equivalent diplomas, and 3,450 who received graduate degrees: 3,100 masters and 350 doctors. A total of close to 37,000 is expected in 1964.

Graduating classes may be expected to expand in the coming years, the NES points out, as enrolments at Canadian universities and colleges continue their rapid increase. The full-time enrolment of 141,388 students in 1962-63 represented an increase of 10 per cent over the previous year, and with the same rate of increase the number of full-time students in 1963-64 will be about 156,000.

Starting salaries for new graduates continued to rise in 1963, the most substantial increases being in mathematics, pharmacy, commerce and business administration, commerce for C. A. articles, and economics and political science.

The increases ranged from 5 per cent for graduates in economics and political science to 10 per cent for those in mathematics. In engineering, salaries were from

1.5 to 3.5 per cent higher than in the previous year, the largest increase being in metallurgical engineering.

The demand for scientists and engineers in the United States is expected to rise by nearly 800,000 during the 1960's, from the 1,157,000 employed at the beginning of the decade—January 1960—to 1,954,000 at the end, 1970, according to projections by the U.S. Bureau of Labor Statistics.

The largest increase will be in the demand for mathematicians, which is expected to rise to more than double the present demand, the Bureau says.

Physicists, medical scientists and biological scientists will come next in the rate of growth. They will have to increase in number by nearly 100 per cent to keep up with the demand, followed by scientists (73 per cent increase) and engineers (67 per cent). Requirements for chemists—now the largest profession in numbers—will increase at a rather slower rate than the average for all scientists.

Report on Changing Occupational Composition of Labour Force

A new publication of the Department of Labour, *Occupational Trends in Canada, 1931 to 1961*, presents comparable data on changes in the occupational structure of the

Canadian labour force during two periods, the three decades 1931 to 1961 and the decade 1951 to 1961.

In comparison with the changes that took place over the whole period, the foreword to the booklet points out, the changes that occurred during the later decade were significant.

The publication is Report No. 11 in the Research Program on the Training of Skilled Manpower but is the beginning of a new series of studies into the changing occupational composition of the Canadian labour force.

13 Occupational Groups

The study, which deals with 13 main occupational groups and 117 selected occupations, and which contains a number of tables and charts, is based on data obtained in the decennial censuses taken during the period.

The report is divided into two parts. Part I deals with the labour force as a whole; Part II, with the female labour force.

The study presents data on the occupational structure of the labour force for each of the four censuses during the period, giving the number in each occupation, the percentage of the labour force in each occupation, and the percentage change over the two periods.

The provision of the data supplied in this bulletin is only the first step in the projected series of studies, the report says. The next step will be to show the changes that are taking place in the distribution of the various occupations within each of the main groups of industries. "It is only through this intermediate stage that occupational requirements can be linked to general economic developments," the report says.

The report was prepared by the Economics and Research Branch of the Department of Labour. Copies may be obtained from the Queen's Printer, Ottawa.

Jewish Vocational Service, Toronto Cited for Retraining of Unemployed

A national social welfare award has been won by the Jewish Vocational Service, Toronto, for conducting a training program under which more than 200 unemployed men have been prepared for jobs as building caretakers.

The award is the honourable mention citation in the William J. Shroder Memorial Award Competition sponsored by the Council of Jewish Federations and Welfare Funds, an association of 217 Jewish welfare organizations throughout the United States and Canada. This is the first time that a Canadian agency has been cited since the Shroder Award was established in 1952.

The program of training in building maintenance services was started by the Jewish Vocational Service in 1962 as part of its plan of retraining for other jobs workers displaced by technology and automation. The program is being financed by federal-provincial funds administered by the Toronto Board of Education under the Technical and Vocational Training Assistance Act (Program 5).

The JVS building maintenance course provides six weeks of training for a wide range of jobs, including those of building superintendent, maintenance worker, cleaning specialist and janitor. The course teaches such things as care of floors, shampooing carpets, washing walls, looking after boilers, fire control and property protection. It also includes group counselling sessions on attitudes toward work, labour market information and ways of finding work.

In order to make the course as congenial as possible to adults, emphasis is placed on demonstrations and practice rather than on classroom discussions. There are no age limits or educational requirements, and no restrictions as to race, religion or nationality.

75% Find Jobs

So far, 214 men have successfully completed the training program, and about 75 per cent of these have found jobs. The selection of trainees and finding work for them after they have been trained is carried out with the help of the National Employment Service.

CLC Commissions Eugene Forsey To Write Union History

As part of its contribution to the celebration of Canada's Centenary of Confederation, the Canadian Labour Congress has commissioned Dr. Eugene Forsey, the director of its Research Department, to write a history of the trade union movement in Canada. Dr. Forsey, who has been closely connected with the Canadian labour movement since 1942, has already begun research into original documents. He has appealed to the unions to assist by providing him with their early records.

Trustees Ban Unions' Defamatory Statements, Call Management Meeting

Two actions were taken last month by the Board of Trustees of the Maritime Transportation Unions:

—The unions under trusteeship were informed that in future, publications of any kind issued by them must be submitted to the Board for approval before being published or distributed.

—The employers in the inland shipping industry were invited to arrange for a repre-

sentive delegation to meet the trustees in the near future. In a directive sent on December 4 to the unions, the Board said:

"Publications, whether newspapers, magazines, bulletins, circulars, or otherwise, that contain defamatory references to other trade union leaders or members, particularly officers and members of the maritime unions under trusteeship, cannot be approved."

The trustees said that they had no wish "to hinder or prevent fair competition between the unions under trusteeship." But it was their intention to see that the competition was "constructive and lawful, and that the literature in support thereof does not offend the law, particularly the law of defamation."

In Parliament Last Month

(page numbers refer to Hansard)

Among the bills passed by the House during December were amendments to the Old Age Assistance Act, the Disabled Persons Act, the Blind Persons Act, the Emergency Gold Mining Assistance Act, and the Railway Act.

Bill C-125, to amend the Old Age Assistance Act, the Disabled Persons Act and the Blind Persons Act, increased the maximum amount of assistance or allowance to \$75 a month. It was introduced and given first reading on December 6 (p. 5519), second reading on December 10 (p. 5658) and third reading on December 12 (p. 5752).

Bill C-124 to amend the Emergency Gold Mining Assistance Act, extended its application to the years 1964, 1965, 1966 and 1967. It, too, was introduced (p. 5510) and given first reading on December 6 (p. 5519). It was given second (p. 5610) and third reading on December 9 (p. 5619).

Bill C-110, to amend the Railway Act, allowed certain grants to be made from the railway grade crossing fund for a further period of three years from January 31, 1964. Introduced (p. 5071) and given first (p. 5079) and second reading on November 25 (p. 5087), it was given third reading on November 26 (p. 5109).

On December 6, the Minister of Transport introduced a measure to authorize the implementation of certain recommendations of the Royal Commission on Transportation with respect to the rationalization of branch lines and passenger train services; the fixing of freight rates under, and consistent with a national transportation policy suited to modern transportation conditions; the payment of certain subsidies; and other matters (p. 5510).

The Department of Labour estimates relating to industrial relations activities

The call for a meeting with the employers was issued in a letter sent on December 11 to some 40 steamship, tugboat and dredge operators. More than 60 interviews had made it clear that one of the contributing factors at the root of the labour strife on the Great Lakes and the St. Lawrence River had been a serious failure on the part of management to carry out some of its responsibilities, the letter said.

The object of the proposed meeting will be to lay the groundwork for a revision of labour-management relations in the inland shipping industry, and the letter mentions forthcoming collective bargaining negotiations as among the matters that need to be discussed by the trustees and the companies' representatives.

were passed (p. 6162). These activities included the administration of the Industrial Relations and Disputes Investigation Act, the Canada Fair Employment Practices Act, the Female Employees Equal Pay Act, the Fair Wages and Hours of Labour Act, the Annual Vacations Act, and regulations; and the promotion of labour-management co-operation.

The first session of the 26th Parliament prorogued on December 21 (p. 6377). Opening on May 16, it had occupied 23 weeks.

During the session Parliament passed the Maritime Transportation Unions Trustees Act, amended the Technical and Vocational Training Assistance Act to increase support for the construction of training facilities and the provision of training, approved measures to stimulate industrial expansion through tax incentives, established the Economic Council of Canada, increased the number of members of the Atlantic Development Board and provided a capital development fund of \$100,000,000, established a Department of Industry, adopted measures to provide tax incentives for industrial expansion in areas of slow economic growth and serious and persistent unemployment, increased the pension paid under the Old Age Security Act to \$75 a month from \$65, and pension payments to those receiving old age assistance and blindness and disability allowances by a like amount, increased the incentives to municipal winter works and expanded the construction of federal works during the winter, established a bonus to encourage the building of houses during the winter, and approved an experimental program to encourage the employment and training of unemployed older workers.

Industrial and Geographic Distribution of Union Membership in Canada, 1963

Membership statistics obtained from individual union locals are broken down by industry, province and labour market area

Union membership in Canada at the beginning of 1963 totalled 1,449,200, according to survey returns received by the Economics and Research Branch of the Department of Labour directly from national and international union headquarters, central labour congresses, and independent local organizations. This total represents a net increase of 26,000 over the previous year's figure.

The data obtained from the survey were published in the 1963 edition of *Labour Organizations in Canada*, a handbook that contains statistical tables on union membership and a comprehensive directory of labour organizations, with names of their principal officers and publications and the distribution of their locals. The statistical data contained in the handbook are Canada-wide totals broken down by congress affiliation and type and size of union.

The tables on the following pages supplement the information included in *Labour Organizations in Canada* by showing the distribution of union membership in Canada by industry, province and labour market area. The tables are based on information obtained in a separate survey directed, at the beginning of the year, to individual local unions across the country. In this survey, each local union was requested to report the total number of its members, and the industry and location in which all or most of them were employed.

Table 1 gives a distribution of union membership by industry on the basis of the DBS Standard Industrial Classification (1960). The data are shown for the most part on the "major group" level. In instances where more detail could usefully be provided, care was taken to adhere to combinations of recognized industrial sub-groups. For the railway industry, which is not further subdivided in the standard classification, subtotals are provided to show the division of membership between the operating and non-operating sectors.

Included as a supplement to the first table, Table 2 shows in alphabetical order the names of international and national unions or independent local organizations that account for more than one tenth of the union membership within the industry

groups. The table thus does not necessarily show all organizations active within any particular industry group, but only those having more than 10 per cent of the organized workers in the group.

In Table 3 union membership in Canada is broken down by province, and Table 4 shows its distribution by labour market area. The boundaries of the labour market areas dealt with in Table 4 are broader than those of the centres for which the areas are named. In general, a labour market area corresponds to the area served by a local office of the National Employment Service. In some cases labour market areas consist of two or more NES local office areas. These composite areas are identified by an asterisk and the local office areas they comprise are listed in the Appendix to Table 4.

Locals accounting for just over 7 per cent of the membership total indicated that their members were dispersed throughout several locations in different areas or provinces. Since these locals and their membership could not be allocated to any one area or province, they have been classified to "two or more provinces" or "two or more areas" in Tables 3 and 4.

At the beginning of 1963 more than 7,000 union locals with a total of one and one-half million members were active in Canada, and although the survey met with a generally excellent response, not all of the locals supplied the required data. The number of locals from which no information was obtained appears in Tables 1 and 3. The corresponding entry for these locals in the membership column in Tables 1 and 3 represents the difference between the Canada-wide membership total based on the survey of union headquarters mentioned earlier and the membership reported by the responding locals.

The uneven quality of the basic source data and the practical difficulties inherent in the processing of the returns necessarily reduce the accuracy of the results. The statistics presented here, therefore, indicate only in a broad and approximate way the industrial and geographic distribution of organized labour in Canada.

The information for this article was obtained by the Collective Bargaining Section of the Economics and Research Branch from local union secretaries, whose co-operation is gratefully acknowledged.

TABLE 1—UNION MEMBERSHIP BY INDUSTRY, 1963

Based on Standard Industrial Classification (1960)

Industry	Locals	Membership
Forestry*	24	39,800
Fishing and Trapping	8	4,300

LABOUR MARKET AREAS COMPRISING TWO OR MORE LOCAL OFFICE AREAS

Labour market areas appear in bold type, followed by names of the component NES local office areas in light type.

Québec

Farnham-Granby: Cowansville, Farnham, Granby. **Gaspé:** Causapschal, Chandler, Gaspé, Matane, New Richmond. **Lac St. Jean:** Chicoutimi, Dolbeau, Jonquière, Port Alfred, Roberval, Ville d'Alma. **Lachute-Ste Thérèse:** Lachute, Ste Thérèse. **Montréal:** Montréal, Ste Anne de Bellevue. **Québec-Lévis:** Lévis, Québec. **Québec North Shore:** Baie Comeau, Forestville, La Malbaie, Sept Iles. **Rouyn-Val d'Or:** Rouyn, Val d'Or. **Ste Agathe-St Jérôme:** Ste Agathe, St Jérôme. **Sherbrooke:** Magog, Sherbrooke. **Thetford-Mégantic-St Georges:** Mégantic, Thetford Mines, Ville St Georges. **Trois Rivières:** Louiseville, Trois Rivières.

Ontario

Belleville-Trenton: Belleville, Trenton. **Fort William-Port Arthur:** Fort William, Port Arthur. **Niagara Peninsula:** Fort Erie, Niagara Falls, Port Colborne, St. Catharines, Welland. **Ottawa-Hull:** Hull, Que., Ottawa, Ont. **Sudbury:** Elliot Lake, Sudbury. **Timmins-Kirkland Lake:** Kirkland Lake, Timmins. **Toronto:** Long Branch, Newmarket, Oakville, Toronto, Weston. **Woodstock-Tillsonburg:** Tillsonburg, Woodstock.

British Columbia

Central Vancouver Island: Courtenay, Duncan, Nanaimo, Port Alberni. **Okanagan Valley:** Kelowna, Penticton, Vernon. **Trail-Nelson:** Nelson, Trail. **Vancouver-New Westminster:** Mission City, New Westminster, Vancouver.

Annual Labour Briefs to Cabinet

Canadian Labour Congress and National Legislative Committee of International Railway Brotherhoods make annual submission of legislative recommendations. CNTU presentation delayed

The Canadian Labour Congress and the National Legislative Committee of the International Railway Brotherhoods made their annual presentation of memoranda to the federal Cabinet on December 11 and 12 respectively, exactly a year from the dates they had made their previous presentations. The Confederation of National Trade Unions is expected to appear before the Cabinet in February.

The CLC's brief was read by Claude Jodoin, President of the Congress. Prime Minister Pearson and 13 members of his Cabinet attended the presentation, and the Prime Minister and Hon. Allan MacEachen, Minister of Labour, replied on behalf of the Government. The Railway Committee Room of the Parliament Buildings was filled to capacity by an audience consisting of CLC officials, trade union representatives, members of the federal Civil Service, and others.

The Congress again made clear its stand with regard to the Government trusteeship over the Canadian maritime transport unions, and gave its views on unemployment and the economic situation in general, and on a number of other matters.

The Railway Brotherhoods' memorandum was presented by J. A. Huneault, Chairman of the Committee, attended by five of the other six members. The Committee asked the Government to give serious consideration to measures for dealing with unemployment, and it repeated its request for

amendment of the Railway Act to provide compensation for railway employees displaced by technological changes. A number of other questions were also touched on.

The Brotherhoods' delegation was received by Hon. Lionel Chevrier, Acting Prime Minister in the absence through illness of Mr. Pearson. The Minister of Labour and Hon. George McIlraith, Minister of Transport, joined Mr. Chevrier in replying for the Government.

The CLC Brief

The CLC in its brief expressed qualified and reluctant approval of the establishment of a government trusteeship over the Canadian maritime transport unions. The Congress said that the consequences of the Maritime Transportation Unions Trustees Act, under which the trusteeship was set up, were so far-reaching, and the time the Act had been in effect so short, that it was "still virtually impossible at this moment to gauge its result."

The Act could be regarded as part of a general trend toward more active intervention by governments in trade union affairs, or it could be looked at from the point of view of freedom of association, the brief said. But the Congress's view was that it "must be examined in the light of the circumstances which led to its enactment, and of the need to preserve the public interest in the broadest sense of that term"

Strikes

"The imposition by force of law of a trusteeship over certain maritime unions, and more particularly the Seafarers' International Union of Canada, reflected a situation that could no longer be considered open to solution by other than government action." But the Congress made "very considerable" efforts to bring peace and order to the waterfront by voluntary means.

It was impossible to arrive at an agreement over the terms of composition of a voluntary trusteeship without jeopardizing "our own independence as a Canadian labour movement The obvious misunderstanding and misinterpretation which were given in the United States to the situation . . . led eventually to the complete breakdown in negotiations for a voluntary trusteeship, and we were forced to recognize the need for the type of legislation contained in the Maritime Transportation Unions Trustees Act."

The Congress said it had confidence in the trustees that were appointed and in their integrity and sense of public service.

The Act had created uneasiness among Congress members but the CLC's misgivings about the Act had been tempered to some extent by the Government's obvious reluctance to enact it, the brief said. "We choose to regard it, not as a precedent for further legislation of this sort, but instead as an action taken in the face of a situation which required extraordinary measures. Otherwise our opposition to this Act would have been plainly manifest, and we would not have identified ourselves with it."

Here the Congress took advantage of the opportunity to clarify certain misunderstandings.

Whatever differences may have arisen over the question of trusteeship and its administration, they do not reflect a conflict between national and international trade unionism . . . What has been brought into clear focus is something else entirely, namely, the importance of establishing once and for all the fact that Canadian trade unions must be free to develop their own policies in the light of conditions in their own country.

Referring to the Norris report, the CLC expressed regret that neither its recommendations nor the legislation recognized that employers had been irresponsibly involved in the affair. "Where there is a corrupt union leader, there will also be found an employer willing to be his accomplice," the brief declared, and argued that it was "less than just that the burden of trusteeship should have been imposed on trade unions alone, and more particularly on four of the five unions involved which emerged from the Norris inquiry with a clean bill of health."

The brief commended the Government for not yielding to pressure on it to intervene during the longshoremen's strike in Quebec, at a time when it seemed that the strike might delay wheat shipments to the Soviet Union. "There were many voices calling upon you to intervene, to bring the strike to a halt . . . regardless of what would happen to the workers involved and to the right of their union to conduct a legitimate strike."

The CLC pointed out that the strike occurred after protracted negotiations and conciliation, and after the required proceedings under the Industrial Relations and Disputes Investigation Act. The dispute was eventually settled voluntarily.

The CLC admitted that it had caused inconvenience and annoyance to some and misgivings to others, but said that these were some of the inevitable consequences of industrial disputes, and constituted one of the calculated risks that any free society must take.

Referring to the strike of loggers in Northern Ontario last winter in which three strikers were shot and killed, the Congress reflected on the justice of court decisions that had imposed fines of \$100 each on those charged with the shootings, and of \$200 each on strikers who had been convicted of unlawful assembly in connection with the same occurrence.

Unemployment

Although there had been a modest reduction in the number of unemployed during the year, and some improvement in the economy—the large sales of Canadian wheat abroad was an encouraging development—unemployment will continue to be one of our principal problems, the Congress said.

Because it had repeatedly put itself on record concerning unemployment and had offered solutions, the CLC recounted them only briefly in its submission: a program of planned deficit financing, a very substantial expansion in the public sector of the economy, and increases in social security benefits and reductions in tax rates for those with low incomes—since the beneficiaries of such measures have "the greatest propensity to consume and any additions to their incomes would be reflected immediately in new purchases."

The brief expressed satisfaction with various measures the Government had taken to relieve unemployment and to spread work more evenly over the year: incentives to winter house-building, extension of the municipal winter works incentive program, establishment of the Municipal Development Loan Fund, and provision

of more funds for training. It also approved of the recent increase in old age security benefits.

The Government's proposed Manpower Consultative Service, the CLC said, might make a significant contribution to the problems of technological change and unemployment.

The Congress considered, however, that the measures already taken and those proposed were not enough to produce the degree of economic activity required to "satisfy the need for jobs and for progressively improving the standard of living." It disagreed with the Government's budgetary policies, and it argued that this was not the time "for trying to balance budgets and increasing tax revenues through such devices as extension of the sales tax on building materials and machinery."

On the contrary, the Government should "have faced up to continued budgetary deficits and the use of fiscal and monetary policies to stimulate the economy to a consistently high performance," involving considerably more than had so far been undertaken in this direction. "In short, we favour economic planning," the brief said.

It welcomed the establishment of the Economic Council of Canada as a desirable step in the direction of such planning, and referred with satisfaction to the Council's terms of reference that required it to discuss with major economic groups and organizations plans for production and investment that would best promote "a high and consistent rate of economic growth."

Canada Pension Plan

Some concern was shown in the brief at the delay in setting up the proposed Canada Pension Plan; but the CLC said it was glad to note the Government's evident determination to go ahead with the plan.

It referred to "an extensive campaign" being waged by "the insurance industry" to prevent the pension plan from becoming a reality. But it said that this should not deflect the Government from giving effect to "socially desirable policies."

Unemployment Insurance Act

The Congress expressed approval of the recommendations of the Gill Committee of Inquiry into the Unemployment Insurance Act that related to: universal coverage of all employees, general pooling of risk, establishment of a new insurance class, increase in the ratio of benefit to previous earnings, and the maintenance of the same rates for extended benefits as for regular benefits.

It was also very much in favour of the proposal to transfer the National Employment Service from the Unemployment Insurance Commission to the Department of Labour.

But it strongly opposed the proposal to reduce the maximum period of benefit from 51 to 26 weeks. It also opposed two recommendations that had to do with the accumulation of contributions and entitlement to benefit, which, it said would make it more difficult for claimants to establish eligibility than was now the case. It took exception to those recommendations that had to do with the definition of "earnings," which, if implemented, would deprive of benefit many thousands of workers who now qualify, it contended.

International Issues

The CLC reiterated its advocacy of the six-point program adopted at its fourth convention, which it had set out in the brief it presented last year (L.G., Jan. 1963, p. 15). But it expressed disappointment in the decision to equip Canadian forces with atomic weapons.

"The Canadian Labour Congress does not contemplate a neutralist or non-aligned position for Canada," the brief said, but it did support those who were against a "nuclear role for Canada's armed forces." Instead of trying to keep up with the atomic arsenals of the two big powers, "we should concentrate our military efforts on the things which we can produce ourselves within our economic and fiscal capabilities, and which will make our contribution a distinct and essential component of the over-all strategy of our alliances and partnerships."

The establishment of the Special Parliamentary Committee on Defence was welcomed as one of the things the CLC had asked for in its memorandum last year, as also were the Government's pledges to help in strengthening the political organs of the United Nations.

"Canada should also help strengthen the authority of the United Nations by ratifying the Conventions adopted by the UN and its Agencies. We refer in particular to the international instruments adopted by the International Labour Organization."

The Congress welcomed the announcement that the Government would double Canada's contribution to the United Nations Special Fund. It urged, however, that Canada's contribution to the assistance programs of the U.N. should be increased to at least 1 per cent of her gross national product.

Other Recommendations

The Congress was encouraged by the Government's "tariff-incentive scheme" to help the Canadian automobile industry; it welcomed such schemes to assist secondary industries to improve their efficiency and expand their exports.

At the same time, it urged proper safeguards to prevent dislocation of labour. If such schemes did result in dislocation of labour or capital, adequate compensation should be given to the employees and employers affected.

The brief favoured the passing of Bill C-15, to amend the Railway Act (Responsibility for Dislocation Costs), which, it said, would be "a great step forward in providing workers with the assurance that technological change would not merely result in their being thrown on the industrial scrap heap."

Canadian railways should face the consequences of problems created by technological changes they introduce, the CLC said. Over a period of years Canadian railways had "relentlessly pursued a course of change calculated to improve their efficiency."

We can readily appreciate the motives behind the railways' actions. Like any other industrial undertakings, they must constantly strive to operate as economically as possible. But we strongly object to the fact that the cost of improved efficiency is being borne by the workers in the industry.

Displaced railway workers are being thrown out of employment, sometimes after long years of service, and compelled to find employment under vastly different circumstances than any that they had been trained for or experienced.

It is not enough for them to be entitled to unemployment insurance benefits nor is it reasonable to assume that they should be forced to accept employment at lower wages or under inferior working conditions because the qualifications which made them good railway employees are not valuable in other industries. We consider that the consequences of redundancy should be faced up to by the railways which create it.

The CLC said the Government should take a more active role in determining the location of industry. In a number of cases—Windsor, Ont., was an example—both employees and communities had suffered from the transfer of plant operations.

The decision to establish plants in a particular community or to transfer a plant from one locality to another should not lie with the corporations alone. The far-reaching effects of the decision require that the Government should participate. If measures to remedy unemployment and provide full employment are to be the policy of your Government, they must include a position on this important matter.

The CLC in addition:

—Urged action by the Government to establish a minimum wage of \$1.25 an hour and a maximum work week of 40 hours, to amend the Vacations With Pay Act, to introduce a new Fair Wages Act, and to amend the Industrial Relations and Disputes Investigation Act to provide for the check-off of union dues.

—Opposed the proposal adopted by organizations of municipalities in favour of what is commonly known as work for relief.

—Welcomed the establishment by the Government of the Preparatory Committee on Collective Bargaining in the Public Service, but opposed compulsory arbitration of disputes between the Government and its employees, favouring rather voluntary arbitration.

—Asked for income tax exemption with respect to the cost of tuition fees and other expenses connected with technical or educational evening courses for employed persons trying to improve their productive capacity.

—Reiterated its support of the Canadian Broadcasting Corporation as the principal broadcasting medium in Canada.

—Urged amendment of the Canada Elections Act to forbid an employer to prohibit or interfere with his employees' right to stand as candidates, or to engage in lawful activities in an election campaign.

—Asked the Government to consider "the adoption of a new sugar policy to rectify the present intolerable situation" relating to the price of sugar.

—Urged extension of the Industrial Relations and Disputes Investigation Act to the ship building and repair industry, and imposition of fair wage schedules on all government work done in private shipyards; establishment of a national advisory committee on fair employment practices; reservation of coastal and intercoastal trade to vessels built and manned in Canada, and reservation of trade in inland waters to Canadian and American vessels; establishment of a Canadian deep sea fleet by means of subsidies; establishment of an air transport industry council; and amendment of the Income Tax Act to allow loggers to claim deduction of expenditures for transportation to and from their place of work, board and lodging at logging camps when the logger has to maintain a separate establishment elsewhere, and on clothing and tools used in their work.

The Government's Reply

The Prime Minister

In replying to the Congress, Prime Minister Pearson said, with reference to the maritime union trusteeship, that the Government had taken the action it did with reluctance. It was not a course that it would care to take except in circumstances such as those that had prevailed last summer, in which, even with the help of the Congress, no alternative to Government intervention had been found.

Mr. Pearson recalled that at about the same time the Government had been urged to intervene with respect to the right to strike, and he said he was very glad that such intervention had not been necessary, and that the situation referred to had been corrected "without any violation of this right."

The unemployment situation, the Prime Minister said, was improving. Figures that had just come out showed a further reduction in unemployment, with the percentage of unemployment "lower than it has been for a good many years." But, he added, it was not low enough; and the Government would not be happy until it was down to where it should be.

Mr. Pearson said the Government accepted deficit financing, provided it "does what it is meant to do: to keep the economy moving and get people to work."

For social services, and a combination of assistance schemes and to help the provinces meet their obligations, and for other purposes which we think will add to our employment, we have added a further \$250,000,000 to our budget—last year's budget.

The Prime Minister expressed satisfaction that the Congress supported the Government's "desire to facilitate economic planning" through the formation of the Canadian Economic Council, and, regarding the Canada Pension Plan, he said that the Government thought that it should stand by its proposal for a national contributory portable pension scheme, and intended to proceed with such a plan as soon as possible.

The Minister of Labour

Within the framework of the maritime union trusteeship, the Government had tried to provide a situation that would recognize and abide by present collective agreements and would provide for their renegotiation in the normal way, the Minister of Labour told the Congress delegation. He said that the trusteeship would not destroy or abrogate in any way the constitution and by-laws of the unions concerned, and that any such changes could

be made only by the members of the unions themselves.

He pointed out that Parliament had provided for the termination of the trusteeship at the end of a three-year period, and that it could be extended only by the action of the Governor-in-Council, and was then subject to possible revocation at the request of any ten members of Parliament.

The intention of the Government was to let the trusteeship carry on its activities independently, the Minister said. The trustees were in certain respects union officers, and the Government did not wish to interfere with their day-to-day activities.

With reference to the way in which the Government had respected the longshoremen's right to strike, Mr. MacEachen said that what had happened in that matter had taught him the lesson that many of the "arguments of national peril" put forward in a time of crisis become obsolete almost as soon as the dispute is settled.

Although the unemployment situation had shown improvement, the Minister agreed that the present rate of unemployment was too high, and the Government intended to do everything possible to reduce it, he said.

Mr. MacEachen described the Winter House Building Incentive Program as "a great success." He said that the 26,000 applications received, covering more than 31,000 dwelling units, would provide substantial employment and would help to stabilize employment over the total 12-month period.

The volume of applications under the Municipal Winter Works Incentive Program, and the labour content of the program, this winter would greatly exceed those of any preceding winter, the Minister reported, saying that this justified the Government's decision to shorten the period of the program.

Any changes in the Unemployment Insurance Act made as a result of the recommendations of the Gill Committee would have to be carefully considered, Mr. MacEachen said, and "at the appropriate stage any principle affecting these changes ought to be sent to a Parliamentary committee so that further representations may be made by interested bodies."

International Railway Brotherhoods' Brief

By far the largest part of the brief of the National Legislative Committee of the International Railway Brotherhoods was devoted to a request for amendment of the Railway Act to provide "in clear and unmistakable language" for compensation for employees affected by the abandonment of railway lines.

This request, which the Committee has made in its submissions since 1958, took up 11 of the 21 pages in the brief. Requests for further changes in the Act, relating to level crossings, occupied another page.

Among the other requests and suggestions were many that had been made in earlier submissions, including:

—Transfer of the National Employment Service from the Unemployment Insurance Commission to the Department of Labour.

—Establishment of a Canadian Transportation Authority “to carry out a national policy affecting transportation.”

—Consideration of four major recommendations on the effects of automation and technological change.

—Amendment of the Criminal Code to permit legal lotteries, the funds raised to be allocated to social services.

Unemployment Insurance Act

Dealing with the Unemployment Insurance Act, the Committee recommended that the National Employment Service be transferred from the Unemployment Insurance Commission to the Department of Labour, as recommended by the Gill Committee of Inquiry into the Unemployment Insurance Act.

The brief also expressed the desirability of having all employers register job vacancies and requirements with the NES. Further, it requested that the payment of unemployment insurance benefits by mail be extended to all regions of Canada, and that “consideration be given to expanding and improving the National Employment Service in an effort to achieve full employment in Canada.”

The Railway Act

In its request for amendment of the Railway Act to make effective the principle of compensating railway employees affected by the abandonment of branch lines and similar changes, the Committee said:

We most urgently request that amendments be made to the Railway Act by revising Section 182 to provide in clear and unmistakable language for compensation for financial loss caused to employees by any change whatsoever made in the operation of the railways which requires employees who are retained in the service to change their places of residence, whether such changes are authorized under Section 168 or any other portion of the Railway Act.

We also request the same consideration for employees who are deprived of employment as is contemplated in the Canadian National-Canadian Pacific Act.

Earlier in the submission the Committee recalled how the Canadian National-Canadian Pacific Act, which had for its purpose

the provision for co-operation between the Canadian National Railways and the Canadian Pacific Railway system, was amended in 1939 to provide for severance pay for “every employee who is deprived of his employment as a result of any . . . measure, plan or arrangement . . . by Canadian National Railways or Canadian Pacific Railways . . .”

In addition, arrangements were provided for those who should be laid off and subject to call to return to work and for those who chose to resign and seek work elsewhere. Provision was also made to compensate displaced employees for financial loss occasioned by having to change their place of residence.

Many classes of employees are being affected by changes and reorganization by the railways, the brief continued. Branch lines are abandoned, small terminals eliminated, maintenance of way sections greatly extended, and stations closed.

“Over a recent two-year period, more than 150 station agents were removed from railways in Canada,” the Committee said. “It is safe to say that the removal of such agents has resulted in a saving to the railways of three quarters of a million dollars a year.”

And this is a continuing saving each year, whereas compensation would cost only a fraction of the saving made in one year and would be a one-time cost, the Committee pointed out.

The same principle applies, it said, in the case of all employees who are moved but retained in railway service.

According to DBS, the reduction in the number of employees on Canadian railways in one recent year was almost 18,000, which constitutes almost ten per cent of the work force. Where such reductions can be made without affecting the efficient operation of the railways there can be no question that the railways have the right to make such reductions; but we do not believe they had the right to cause financial loss to their employees without some compensation . . .

We have every reason to believe that reduction in staffs will continue for some time at least; and we urge the necessity for early action on our requests.

Automation and Technological Change

The brief commended the federal Government for initiating the establishment of an Economic Council of Canada. To assist the effective operation of the Council, the brief advanced four major recommendations:

1. Government policy should be primarily concerned with the human consequences of technological change and not only with the possibility of economic growth through increased production.

2. Close liaison should be developed between the Economic Council of Canada, the Advisory Committee on Technological Change, branches of the Department of Labour, and all other government agencies.

3. Co-ordination of research projects conducted by the Economic Council and the Department of Labour so as to avoid overlapping and duplication.

4. Expansion of and publicity on the services offered by the Department of Labour through the Manpower Consultative Service program.

National Transportation Policy

The brief urged the Government to set up a Canadian Transportation Authority in order to formulate and carry out a national transportation policy. This body would combine and expand the present functions, duties and responsibilities of the Board of Transport Commissioners, the Air Transport Board and the Canadian Maritime Commission, the brief said. The Authority would see to it that equitable competition was maintained between the various forms of transportation, and would co-ordinate transportation services in the interests of the Canadian public.

With respect to the St. Lawrence Seaway, the brief opposed a reduction of tolls or a rearrangement of financial obligations that "would circumvent the intention of Parliament in establishing the St. Lawrence Seaway Authority."

The Act provides that full recovery of construction and operating costs should be effected from the toll charges collected in the 50 years following 1959. A policy of inadequate seaway tolls would prevent this and would also provide seaway transportation with an unfair competitive advantage to the detriment of rail transportation, the brief asserted.

Air Pollution

Pointing out that millions of tons of pollutants were being released into the air every day, and that research had established a link between air pollution and cancer of the throat, lungs and stomach, the brief called for expanded government research on this problem.

The Committee expressed particular concern over the fact that during last July, 24 railway workers were stricken with carbon monoxide poisoning during a tour of duty "in the spiral tunnels of British Columbia," and required hospital treatment. The effects suffered by the remaining 150 employees was cause for additional concern.

Legal Lotteries

The brief called for amendment of the Criminal Code to permit legal lotteries, and suggested that the funds raised be allocated to social services. It pointed out that large amounts of money were annually leaving Canada in connection with lotteries conducted in other countries, and that race track betting has legal status in Canada.

Canada Pension Plan; Other Subjects

Supporting the Government on its proposed national contributory pension plan, the brief nevertheless expressed concern over the effect that the plan might have on the private pension plans in which many railway employees are now participating.

The brief supported the immigration of persons who could contribute to the development of the country, but stressed that Canada's skilled workers should be encouraged to remain in Canada. It commended the joint efforts of the federal and provincial Governments in the training of skilled workers, so that Canada need not depend on immigration to supply this type of labour.

The brief recommended the repeal of Subsection 6 of Section 265 of the Railway Act, which deals with the Railway Grade Crossing Fund. As the Act stands now, the Committee believes, it tends to reduce the number of grade separations that are built and appears to involve duplication of expense.

Concerned over the number of accidents at level crossings, the Committee again asked for action in this problem. But instead of repeating its request for the elimination of level crossings—which had been shown to be prohibitively expensive—the Committee in its brief recommended the installation of manual or signal protection at hazardous crossings. In addition, it suggested that the Minister of Transport request the National Research Council to conduct research on warning systems for use on all public and commercial vehicles.

On taxation, the brief urged that the basic exemptions under the Income Tax Act be increased, and that the basic exemptions under the Estate Tax be raised from the present \$60,000 to \$100,000. The present method of estate taxes on pensions and annuities requires widows to pay these taxes on amounts not yet received.

As in previous briefs since 1958, the Committee asked for legislation that would insure enforcement of improved health and sanitation standards for railway employees. A standard of sanitation and facilities equal to those provided for the travelling public should be given to railway employees, the Committee said.

The Committee again repeated its recommendation that labour be adequately represented on government-appointed boards and commissions.

The Government's Reply

Hon. Lionel Chevrier, Minister of Justice and Acting Prime Minister, was first to reply to the brief presented by the Railway Brotherhoods.

In reply to the request for establishment of a Canadian Transportation Authority to formulate and carry out a national transportation policy, the Acting Prime Minister said he remembered how the Turgeon Commission had strongly made that recommendation, and he had hoped one day to bring in an amendment to the various acts that would implement that recommendation (Mr. Chevrier is a former Minister of Transport).

But "there were so many amendments to the various statutes that had to be brought forward in order to implement all the recommendations of the Turgeon Commission that it was impossible to reach this one." The recommendation, which in his opinion had "a tremendous merit," had been discussed with keen interest at the time, but it had provincial implications as well, he pointed out.

As to the St. Lawrence Seaway tolls, he said there was an agreement between two countries and he did not think that any Government would dare change the policy of using tolls to amortize and recapture the cost of the facilities.

Replying to the request for legal lotteries, he stated the subject had come up for discussion at the recent Dominion-Provincial Conference. He said he personally favoured the establishment of lotteries, under provincial jurisdiction, but that there were other views also. He added that he would be reporting soon to the Cabinet on the views of the provinces.

The Minister of Labour

"I am very pleased that you recognize, as we do, the necessity of training and education and retraining in creating an adaptable labour force," the Minister of Labour told the delegation. He mentioned the additional assistance in training allowances and contributions for technical-training facilities that the federal Government was extending to the provinces.

Answering other points of the brief, he stated that steps had been taken to strengthen the personnel resources of the National Employment Service. As for severing the NES from the Unemployment Insurance Commission, as recommended by the Gill Committee, this matter "is under active consideration and we may be able to announce steps in that direction in the near future," he declared.

On the question of paying special attention to the human factors of technological

change, he mentioned that the Department of Labour had established a new manpower consultative service to assist labour and management in particular plants to make studies and adjustments. He also said the Government hoped to encourage any suitable retraining programs and had in mind re-employment incentives to provide employment assistance for workers displaced by technological change.

The Minister of Transport

Hon. George J. McIlraith, Minister of Transport, dealing with the Committee's requests and recommendations concerning the Railway Act, said that one thing was quite clear: the legislation was out of date. He thought this was certainly true of Section 182 and the related sections.

Presenting another side to this question, the Minister of Transport said: "Now, I am not sure, in my mind, as to whether that kind of thing should be part of the negotiations and agreements or whether it should be part of legislation. There is a question there." He stressed that he would want to reserve the right to give further consideration to this question, as it was quite a serious matter.

As to the Railway Grade Crossing Fund, he said "legislation had been put through now and we can try extending the Grade Crossing Section of the Railway Act for another three years." A "technical change" was also to be made in the method of providing funds, facilitating the work of the Board of Transport Commissioners when it deals with the municipalities.

Although statistics of motor car accidents and fatalities presented a constant warning, during the last six years there had been a consistent decrease in the number of motor vehicle accidents at railway crossings when related to the total number of motor vehicle accidents, "so there is some real good being accomplished by that fund," the Minister observed.

Referring to the request for a national transportation policy, the Minister said he thought "it was imperative that we try to get forward with as much as we could of the MacPherson Royal Commission legislation because the railway legislation was so far out of date." The Government had progressed to the point where the proposed legislation was placed on the order paper, but it was obvious that it would not go through at the then current session and would have to stand over until early spring.

Because this matter would have to take priority over that of obtaining a Canadian Transportation Authority, there had been no decision and no real consideration for

setting up such an authority "and doing away or embodying the other transportation in it."

Some consideration had been given this matter in his own department, he said. He

pointed out that some real problems would be involved—for example, incorporating into such a central body the Canadian Maritime Commission, which is primarily concerned with shipbuilding subsidies.

The Canadian Chamber of Commerce Submits Recommendations to Cabinet

Urges immediate implementation of recommendations of Gill Committee, proposes that all federal deputy ministers should be fluently bilingual, favours Ontario's kind of pension law

In its annual policy presentation to the federal Cabinet on December 6, the Canadian Chamber of Commerce urged the immediate implementation of the recommendations of the Gill committee of inquiry into the Unemployment Insurance Act.

It made a recommendation that it had not made in previous representations to the Cabinet in proposing that all deputy ministers of federal departments should be "fluently bilingual."

The delegation, headed by President Howard T. Mitchell, said the Chamber recognized that some Canadians were unable to provide adequate medical care for themselves and their families. It approved the measures proposed by the voluntary service and indemnity plans, and by some provincial governments, to provide medical coverage for these people; but it expressed the opinion that the contributions of governments at all levels should be made only on behalf of those who were unable to provide for themselves.

The Chamber's statement of policy, which was formulated at its 34th annual meeting in October, was presented under 46 headings and covered the broad subjects of: freedom of enterprise, human resources, material resources, external relations, finance, defence, transportation, and miscellaneous. In general, the recommendations followed closely those of previous years.

The Chamber, in referring to unemployment insurance, said that the Canadian system of support for the unemployed should be based primarily on insurance principles, and should be so administered that abuses were eliminated and public support for the system engendered. It repeated its previous assertion that "the original concept of unemployment insurance should not be expanded to embrace unemployment assistance by using contributions from non-seasonal employment to subsidize seasonal unemployment."

Regarding old age security, the Chamber favoured the kind of pensions legislation enacted in Ontario. "This legislation, which extends existing provisions for pensions, utilizes the existing savings media, thus aiding the economy by creating new capital which becomes available for industrial expansion and the creation of new employment opportunities. Further, this legislation maintains equity between all contributors and avoids subsidy between the various groups of the population," the Chamber said.

It expressed concern about the suggestions made in Parliament that a contributory wage-related government pension should be added to the present flat-rate government pension. "In such a plan, cross-subsidies between various groups are unavoidable, and, as in the United States, result in the highest subsidies to the highest income groups. Furthermore, a government contributory plan would withdraw large amounts of savings from the capital market to the great detriment of Canada's capital hungry economy."

The Chamber contended that "the role of the federal Government in further extensions into the field of old age security should be confined to assisting the provinces in the co-ordination of pensions legislation throughout the country . . . Government-operated plans should be confined to the federal flat-rate pensions programs, with the possible addition of disability and survivors' benefits."

It added that pension arrangements should be reasonably uniform across the country, "since so many Canadians are employed with companies operating in more than one province."

Its often expressed concern about the continually rising burden of taxation in Canada was reiterated by the Chamber, and it suggested that some shift in emphasis from taxes on income to taxes on expenditure should be considered in order to encourage industrial expansion and

employment, and stimulate private initiative and effort. "Tax policy should be designed to encourage the flow of capital and resources into efficient industries and not into non-competitive uneconomic operations, which are wasteful of our natural resources," the statement said.

"Programs for further expenditures, for any purpose, must now be weighed against the regressive effects of increased costs of government upon the ability of the country to achieve a more rapid rate of growth which would itself go far toward achieving the socially desirable goal of such programs," the Chamber said. It again recommended a balanced budget as "a pressing objective."

Employer-Employee Relations

Under the heading of employer-employee relations, the Government was told that the Canadian Chamber was suggesting to its member Boards of Trade and Chambers of Commerce that they take the leadership in their communities in finding opportunities to promote closer collaboration and understanding between labour and business in seeking solutions to Canada's economic problems.

Ever-improving productive efficiency achieved in co-operation with labour will aid materially in the expansion of trade at home and abroad, the Chamber stated. Technological advances are essential to the country's general welfare and its economic strength.

But these should take into account and make provision for the human values involved through constant attention to education and retraining, the statement declared.

Handicapped and Older Workers

Employers should recognize the important contribution that special categories or workers, such as old-age or handicapped groups, could make to the nation's productive efforts, the submission said. It repeated previous recommendations to employers to give consideration to the suitable employment of older workers and physically handicapped persons and to the federal Government to encourage and support the provinces in developing co-ordinated rehabilitation programs, in which it should be given the fullest support by employers, workers, government and voluntary agents.

Besides recommending that all deputy ministers of federal departments should be fluently bilingual, the Chamber said that "within each Government department, French and English should be recognized as official languages, not only in theory but in practice"; that all federal Government forms and documents should be bilingual when practicable, or else be available in both languages; and that employees of the federal Civil Service should "be encouraged to take special training to develop greater understanding and facility in communications between the two major language groups of the country."

The Chamber urged that the Parliament of Canada should formally adopt and authorize a distinctive national flag, and that the federal Government should adopt officially approved texts in both official languages of "O Canada" as the official national anthem of Canada.

The Chamber asked that the Government, as a consistent policy, actively ensure a greater and more continuous flow of desirable immigrants to Canada.

Decisions of Umpire

(Continued from page 57)

expected to know what is the exact range of the prevailing rates of pay for all the (types of) employment which may be suitable in his particular case in the area in which he is prepared to accept work. It would, therefore, seem to me that, in the absence of definite evidence to show that a claimant, before making a statement of the

kind which is alleged to have been made by the instant claimant, was reasonably informed by the interviewing officer of those rates and of the relevant provisions of the Act or Regulations, little, if any, value can be attached to such statement.

I consequently decide to allow the claimant's appeal.

5th Biennial Convention of the AFL-CIO

Gives Executive Council power to waive the internal disputes machinery in disputes between affiliates in Canada, when and if CLC adopts similar plan for handling jurisdictional fights

The power to adjudicate jurisdictional disputes between Canadian branches of international unions will be handed over by the AFL-CIO to the CLC "when and if" the Canadian organization adopts a plan for dealing with such disputes.

The 5th biennial convention of the AFL-CIO, held in New York from November 14 to 20, approved a recommendation to empower the AFL-CIO Executive Council to waive its internal disputes machinery in disputes involving the Canadian membership of international unions affiliated with both the AFL-CIO and the CLC, if that congress adopts a similar jurisdictional disputes plan.

The CLC had long been seeking autonomy in this matter.

The convention did not amend the AFL-CIO constitution to give clear and immediate recognition to the right of the Congress to be the final arbiter in these disputes, as the CLC had hoped, even though the convention resolutions committee had drafted a constitutional amendment.

The resolutions committee was working on a resolution submitted by the Pulp, Sulphite and Paper Mill Workers, who lost their position as bargaining agent at a British Columbia plant through an AFL-CIO ruling under its internal disputes plan. The resolution pointed out that the failure of the AFL-CIO to recognize the autonomy of the CLC had led to agitation for national unions in Canada.

The current CLC constitution provides that jurisdictional disputes between affiliates will be submitted to the CLC President, who "shall endeavour by consultation with the appropriate officers of both affiliates to settle the matter by voluntary agreement between such affiliates." If no voluntary agreement is reached, the President reports his recommendation to the Executive Council for a decision. If an affiliate refuses to comply with that decision, the Council submits the matter to a convention for action. It was under this provision in the constitution that the Seafarers' International Union was expelled.

The AFL-CIO's internal disputes plan (L.G., 1962, p. 38) provides for the arbitration of jurisdictional disputes by an impartial umpire. The umpire's decision

may be appealed to federation's Executive Council but to date the umpire's decisions have stood.

Another question particularly affecting Canada—the government trusteeship over Canadian maritime transport unions—did not come before the convention, although it was a burning issue at the three-day convention of the Maritime Trades Department of the AFL-CIO, which was held just before the parent body's convention (see following story). At the MTD convention, George Meany, AFL-CIO president, declared that he was "opposed to Government-controlled trade unions here in the United States, in Africa, in Germany under Hitler, in Russia under Stalin, and in the Dominion of Canada."

Unemployment and the civil rights issue were two of the main subjects of discussion at the convention. A move to allow the International Brotherhood of Teamsters to be re-admitted to the federation failed when it was strongly opposed by President Meany.

The convention was described as the quietest since the merger of the AFL and the CIO in 1955.

President's Address

President George Meany proposed the 35-hour work week now and a shorter one later on as a means of alleviating unemployment, and he described automation as a "curse" to society, with "no element of blessing in it."

In his presidential address, as further measures for wiping out unemployment, he called for an accelerated public works program, a substantial increase in the federal minimum wage and an extension of its scope, and lower income tax for those with small incomes.

"Unless we wake up and do something about it," Mr. Meany said, "our whole system as we know it today will go down the drain as a result of the automation and unemployment it is creating." He questioned the accuracy of the unemployment estimate of 5 per cent, placing it at nearer to 8 per cent. The reason for this, he said, was that the official figure took account of registered unemployed only, and did not include workers who did not register because they had no hope of finding employment.

Joseph Morris

Joseph Morris, Executive Vice-President of the Canadian Labour Congress, in his address as fraternal delegate to the convention, without explicitly mentioning the trusteeship question, referred to "the differences of opinion which have arisen between our two labour movements during the past few weeks and months," and went on to say plainly that "the leadership of the Canadian labour movement has given in this matter has been based firmly upon our intention of preserving the right to determine our own affairs."

Canadian trade unionists have never been isolationists, Mr. Morris said. "More than 70 per cent of the membership of the Canadian Labour Congress is made up of members of international trade unions . . . We have taken the position of defending and promoting international unionism because we believe it is a correct position in a continent with the complementary economies and institutions found in North America. We have, too, within the Canadian Labour Congress, as you have also within the AFL-CIO, purely national unions where that type of organization is felt to be appropriate.

"You should be aware that during the last few years there has been the understandable development of national feeling in Canada and a growing desire for greater national self-determination within the family of free nations. The dispute relating to the maritime union situation has focused sharp attention on these sentiments of nationalism and self-determination. The position taken by the Canadian labour movement in this matter has received almost unanimous editorial and public support.

"In each of our nations, from time to time, legislation is enacted which has some bearing on the institutions of the other . . . When such matters are before our legislative bodies," Mr. Morris continued, "we make representations to the authorities involved . . . Our representations are based on the wishes and best interests of our members.

"The Canadian labour movement reserves the right to determine democratically what those wishes are and where the best interests of its members lie. We are happy to seek advice and counsel of fraternal organizations, but whatever decision is finally taken, that decision must be ours."

Toward the end of his address, the speaker repeated, "Above all, we believe that we must retain our right to make decisions concerning our own national affairs.

To do less would be to surrender our sovereignty. We must retain the power to make decisions—right or wrong—which affect us and the welfare and progress of those whom we represent."

President Kennedy

President Kennedy called unemployment "the basic issue" and asked for organized labour's help in getting his economic program through Congress. The nation did not "dare to wait until it is too late" for the passing of a bill to reduce taxes; the bill offers a promise of new jobs for two or three million now out of work, he said.

"We urgently need that tax cut as insurance against a recession next year," the President said. The "whole economic climate" is already affected, he contended, by lack of work for 4,000,000 people, and by a rate of unemployment in 1963, a "year of prosperity," as high as it was in 1954, "a year of recession."

Productivity goes up so fast, so many millions come into the labour market, that unless we have the most extraordinary economic progress in the history of our country, we cannot possibly make a dent in the 5.5 per cent jobless figure.

Some considered civil rights the number one issue, President Kennedy said, and he agreed that the nation "needs the passage of our bill if we are to fulfil our constitutional obligations." But, he continued, "No one gains from a fair employment program if there is no employment to be had. No one gains by being admitted to a lunch counter if he has no money to spend. No one thinks much of the right to own a good home and to sleep in a good hotel or to go to the theatre, if he has no work and no money."

Willard Wirtz

A statutory reduction of the work week would "at best only spread unemployment," and at the worst "would so increase costs as to curtail markets and reduce jobs," U.S. Secretary of Labor Willard Wirtz told the delegates. He added that it would also mean giving up the standard of living that the United States could attain as a nation by continuing with the present work week.

One of the things affecting employment was that the private economy was not at present producing anything like enough jobs for people who want to work. Another was that an increasing number of people were not qualified to do the jobs that today's automated economy would provide even if it expanded.

There was no reason to be afraid of machines, Mr. Wirtz contended. "We can use in this country all the things and services, all the machines, and all that the working men and women can produce. There is great reason, however, to be concerned about how hard it is to get people who are educated and trained to see what machines are doing to people who are not educated and trained."

The nation faced a problem in unemployment resulting from automation, but he found encouragement in the growth of the economy during the past three years, in the increase in earnings, in the rejection of the idea that depressions were inevitable, and in the new evidence that a capitalistic people could meet the challenge of technology.

Other Speakers

Governor Nelson A. Rockefeller of New York also dealt with the unemployment question when he addressed the delegates. He said that the nation was going to need 20,000,000 new jobs in the next five years.

The first essential step in developing these jobs, he said, was to make properly designed tax reductions, together with strict controls on expenditure, to stimulate investment and increase individual incentives in the private sector of the economy.

John I. Snyder, Jr.

Another speaker, John I. Snyder, Jr., President of U.S. Industries, Inc., said that he favoured a shorter work week as a means of solving the unemployment question, in the absence of other solutions. "I want to sell the automation machines my company makes, and if our economy turns sour, if the unemployment is not solved, I will have difficulty selling them," he said. He described President Kennedy's proposed tax reduction of \$11,000,000,000 to create new jobs as only a partial solution.

(A little more than a year ago, U.S. Industries and the International Association of Machinists, which represents the firm's employees, established an "American Foundation on Automation and Unemployment," financed by U.S. Industries through a royalty on sales and rentals of its equipment. Al Hayes, President of the IAM, is co-chairman of the Foundation with Mr. Snyder.)

Mr. Snyder said that "most of our experience" refuted the myths that retraining and relocation of those displaced was the answer to the disturbance caused by automation. He contended that these ideas "unfortunately serve only as easy palliatives for those who either cannot or will not come forward and grapple with problems."

His view was that the solution to unemployment brought about by automation lay in general planning directed toward creating new industries and new markets for products.

A. Philip Randolph

For the first time, civil rights were given priority at an AFL-CIO convention over all other business, and the first place among the speakers was given to A. Philip Randolph, President of the Brotherhood of Sleeping Car Porters, the federation's only Negro vice-president.

Mr. Randolph warned the delegates that the Negro's traditional loyalty to organized labour had been put to a severe strain, and that the Negro-labour alliance was being pulled apart by a combination of persistent discrimination in a number of unions with the failure of the trade union movement to throw its full weight into the civil rights revolution in every community.

The convention's response was to pass a resolution on civil rights that was the strongest statement on the subject ever to come before an AFL-CIO convention and that marked a new phase in the federation's policy on discrimination. The resolution made a sweeping demand for equality for Negroes, both within the labour movement and on the community, state and national planes.

Resolutions

When the attempt was made to get the International Brotherhood of Teamsters taken back into the federation, President Meany said that the union had not asked to come back, and that it would not be considered for re-affiliation until it made proper application.

Mr. Meany pushed through a verbal vote against considering re-admission of the union, and over-rode the protests of some Teamsters' supporters who tried to get the floor. The resolution passed by the convention said that the Teamsters union must apply for re-admission "under conditions that will fully protect the rights of all affiliates under the AFL-CIO constitution." The resolution also applied to the International Longshoremen's and Warehousemen's Union.

The convention agreed to support the maritime unions in their efforts to bring flag-of-convenience ships under American union jurisdiction. It also passed a resolution calling for assistance to the Government in expanding the nation's foreign trade.

Toward the end of the convention, the delegates approved a 15-point program for a "comprehensive and massive job-creating effort." One of the 15 proposals called for

early passage of President Kennedy's proposed \$11,000,000,000 tax reduction. Failure to do this, the resolution said, "could mean the onset of another recession and rapidly rising unemployment during 1964."

Besides this, the 15-point program urged: formation of a national planning agency, bigger public works programs, a youth employment project, reversal of the Federal Reserve Board's recent increase in the rediscount rate, quickened increases in wages and fringe benefits, legislation to broaden minimum wage coverage and an increase in the minimum to \$2 an hour; a shorter work week—to be reduced to 35 from 40 hours—without reduction in pay, more liberal unemployment insurance, a national manpower policy, a federal commission on automation, increased aid to low-income families, federal advances in limiting job discrimination against Negroes and other minorities, curbing of corporate price policies in leading industries, and new measures to improve the U.S. balance of payments.

Maritime Trades Department Convention

The AFL-CIO's Maritime Trades Department, at its three-day convention held in New York just before the parent federation's convention, drew up a program for fighting the Canadian government trusteeship over the Seafarers' International Union of Canada and four other maritime transport unions. A special committee established to put the program into action began immediately to consider ways and means.

The MTD, which represents 29 unions with a total membership of 400,000, adopted without discussion a policy statement, or special report, that said government control over trade unions must be opposed by all possible means.

The first of seven recommended measures outlined in the report was to carry the fight to the United Nations and the International Labour Organization. There was, however, no hint in the report as to how the MTD planned to place the issue before the U.N.

The program included economic action, as deemed advisable, and consideration of a campaign of selective boycotting of Canadian goods and services. Other parts of the plan were an educational program to inform trade unionists and the public of the "abrogation of the rights of Canadian trade unionists under the trusteeship," and possible action by appropriate legislative agencies in the United States.

In proposing representations to the U.N., the document maintained that Canada had

violated articles of the U.N. Charter that call for respect for human rights and fundamental freedoms, including the freedom of association and the right to join trade unions for the protection of the individual's interests.

Another resolution passed by the convention threatened to withdraw the AFL-CIO's traditional support for a liberal foreign trade policy unless government aid was forthcoming for American workers laid off because of imports. Labour's support of the Trade Expansion Act of 1962 was based on adequate assistance or relief for those adversely affected by imports, the resolution said. "Its continued support for liberal trade depends on the fulfilment of this premise." The U.S. Tariff Commission has refused requests by three unions for assistance for their members under the Act. The resolution said that the law could be effectively administered by the Commission without amendment; but "if it is not so administered . . . an amendment will be necessary."

Election of Officers

In the election of officers, George Meany was re-elected President, and William F. Schnitzler Secretary-Treasurer. The 27 vice-presidents on the Executive Council were all re-elected without opposition.

The policy statement contended also that the trusteeship contravened the principles of freedom of expression and association embodied in the charter of the ILO, and it proposed suitable action by that organization.

The statement described the Canadian Government's action as the gravest threat to free trade unionism ever made on the North American continent. The following are two extracts from the statement:

"We have reviewed all the circumstances leading to the creation of this trusteeship, and we most strongly feel that the drastic action which the Canadian Government has seen fit to take as a means of dealing with a labour-management dispute is clearly unwarranted. Certainly we, as trade unionists, cannot accept this method of dealing with a dispute between a union and an employer.

"Aside from the merits of the dispute itself, the application of government control over trade unions must be repugnant to every member of the free trade union movement, and must be opposed by all possible means."

The special report was drafted and signed by officers representing six unions,

all but one of which have Canadian branches. These officers were: A. F. Young, Director of the Iron Shipbuilders International Marine Council, International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers; Robert E. P. Cooney, Vice-President, International Association of Bridge, Structural and Ornamental Iron Workers; S. Frank Raftery, Special Representative, Brotherhood of Painters, Decorators and

Paperhangers of America; Thomas Gleason, President, International Longshoremen's Association; Russell Crowell, President, Laundry and Dry Cleaning International Union; and Stephen J. Leslie, International Representative, Marine Division, International Union of Operating Engineers.

Affiliation of the first four is AFL-CIO/CLC; of the last two, AFL-CIO. The Laundry and Dry Cleaning International Union has no members in Canada.

Industrial Fatalities in Canada during Third Quarter of 1963

Deaths from industrial accidents during 1963's third quarter numbered 282, of which 58 occurred in construction industry

A preliminary count of reports received by the Department of Labour shows that there were 282* industrial fatalities in Canada during the third quarter of 1963.

During the previous quarter, 257 fatalities were recorded, including 25 in a supplementary list. In the third quarter of the previous year, 320 fatalities were recorded.

During the third quarter of 1963, there were two accidents that each resulted in the deaths of three or more persons. On August 18, seven workmen were killed or died later of injuries received, when a boiler and furnace exploded at a pulp and paper mill in Woodfibre, B.C. On July 13, four RCMP officers were killed when a float-equipped aircraft crashed and burned on the outskirts of Carmacks, Y.T.

The largest number of fatalities, 58, occurred in the construction industry. Of the 58 fatalities, 25 were in miscellaneous construction, 20 in highways and bridges, and 13 in buildings and structures.

In the manufacturing industry, 10 of the 42 fatalities were in paper products; 9 in iron and steel products; 4 each in food and beverages, and in wood products; 3 in non-ferrous metal products; 2 each in transportation equipment products, electrical apparatus products, products of petroleum and coal, chemical products and miscellaneous manufacturing products; 1 each in rubber products and textile products.

The 39 fatalities that were recorded during the third quarter in the transportation, storage and communication industry were distributed as follows: 18 in local and

highway transportation, 13 in railway transportation, 5 in air transportation, 2 in water transportation, and 1 in the storage industry.

In the service industry, 27 of the 37 fatalities were in public administration; 9 in business, personal and domestic service; and 1 in recreation service.

In the mining and quarrying industry, 13 of the 30 fatalities were in metal mining, 12 in non-metal mining, and 5 in coal mining.

In the remaining industries, the 76 fatalities that occurred during the quarter were distributed as follows: 26 in agriculture, 20 in logging, 12 in public utilities, 10 in trade, and 8 in fishing and trapping.

Analysis by Cause

An analysis of the 282 fatalities during the third quarter of 1963 shows that 67 (24 per cent) were the result of collisions, derailments, wrecks, etc.; 32 of them involved automobiles and trucks, 16 involved aircraft, 8 involved tractors and load-mobles, 4 involved railways, 3 each involved watercraft and miscellaneous agencies, and 1 involved an animal-drawn vehicle.

Sixty fatalities were the result of being struck by different objects. Of these fatalities, 9 were caused by moving vehicles; 6 were the result of being struck by tools, machinery, cranes, etc.; and 45 were in the category "other objects" such as falling trees and limbs, and landslides or cave-ins.

Fifty-seven fatalities were caused by falls and slips; all but five were the result of falls from different levels.

Forty-eight fatalities were the result of being caught in, on or between; most of

* See Tables H-1 and H-2 at back of book. The number of fatalities that occur during a quarter is usually greater than the figures quoted in the quarterly articles. Information on accidents that occur but are not reported in time for inclusion is recorded in supplementary lists, and statistics are amended accordingly.

The industrial fatalities recorded in this quarterly article are fatal accidents that involved persons gainfully employed and that occurred during the course of, or arose out of, their employment, including deaths that resulted from industrial diseases. Statistics on industrial fatalities are compiled by the Economics and Research Branch from reports received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners and certain other official sources. Newspaper reports are used to supplement these. For industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible, therefore, that coverage in such industries as agriculture, fishing and trapping, and certain of the service groups is not as complete as in industries covered by compensation legislation. Similarly, a small number of traffic accidents that are in fact industrial may be omitted from the Department's records because of lack of information in press reports.

them involved tractors, loadmobiles or machinery.

The remaining 50 fatalities were distributed as follows: 24 were caused by electric current; 13 were the result of conflagrations, temperature extremes and explosions; 8 were caused by inhalations, absorptions, asphyxiations and industrial diseases; 2 were the result of over-exertion; and 3 were

under the heading "miscellaneous accidents."

By province of occurrence, the largest number of fatalities, 114, was in Ontario. In British Columbia there were 66, in Quebec 28, and in Alberta 23.

During the quarter, there were 101 fatalities in July, 95 in August, and 86 in September.

Out of every 100 students who enrolled in engineering courses in Canadian universities during the period 1950-59, an average of 44 a year dropped out of university without receiving a degree. The drop-out rate includes both failures and withdrawals.

This is one of the findings of a study made by the Economics and Research Branch of the Department of Labour and published as "Professional Manpower Bulletin No. 3, *Drop-out Rates in University Engineering Courses*."

A comparison of drop-out rates in engineering with those in seven other faculties shows that arts and science was the only other faculty in which the drop-out rates in the period were close to those in engineering. In commerce, the rate was higher than in engineering at the beginning of the period but dropped considerably below during the latter part.

"The average drop-out rate in engineering in 1956-58 appears to have been higher than that of the university as a whole," the bulletin says. "Further, the engineering drop-out rate in these years was increasing while rates in several other faculties were relatively stable."

"In engineering, most of the drop-out took place in the first year of the course. On the average, 24 per cent dropped out after first year, 10 per cent after second year, 6 per cent after third year, and 4 per cent in their graduating year."

The bulletin raises the question whether those who dropped out had enough ability to succeed in university in the first place. "A full answer to this question must wait upon the results of more intensive educational studies," it says, but the available evidence suggests that the relationship

between drop-outs and low scholastic ability is not as close as might be supposed. But the results of the Atkinson Study of Utilization of Student Resources issued by the Ontario College of Education in 1959 showed that "a significant proportion of first year failures had previously demonstrated scholastic ability."

What then accounts for this loss of "potential," and what factors other than lack of scholastic ability contribute to drop-outs. In trying to answer this question, the bulletin quotes from the third study report of the Canadian Conference on Education, which suggests that "our failure to achieve greater development of the total student potential by formal education and training is due to many factors. Some of these operate within the personality of the individual pupil, but are generally the result of his reaction to external factors over which he has little control."

Four factors that contribute to failures and withdrawals in the school system as a whole were enumerated in the cited report: the lack of effective guidance by parents and by society; the failure of parents and teachers to inspire motivation; the lack of opportunity provided by the curriculum; and the lack of means."

In seeking an explanation for the higher drop-out rate in engineering compared with other faculties, the bulletin deals briefly with several possible reasons. It notes that an increase in the student-staff ratio might raise the drop-out rate by inflating the proportion of students receiving less scholastic attention. And it points out that there were more "students per staff" in engineering than in the university as a whole.

Employment and Unemployment, December

The estimate of 6,428,000 persons employed in December was 68,000 smaller than that for November; but the decrease was less than seasonal.

Yet the increase in unemployment during the month, by 43,000 to 346,000, was unusually small for the time of year. The average increase during this period in the past five years was 82,000.

During the month, the labour force decreased, from an estimated 6,799,000 in November to 6,774,000 in December, so that the seasonally adjusted unemployment rate fell from 5.1 per cent in November to 4.9 per cent in December.

Employment in December was higher by 268,000, or 4.4 per cent, from December 1962; and unemployment was lower by 68,000. The labour force was up by 200,000, or 3.0 per cent, from a year earlier.

Employment

The decrease of 36,000 in non-farm employment was the smallest decline between November and December in the past seven years. Farm employment declined seasonally by some 32,000 from November.

Manufacturing employment, which usually falls at this time of year, was well maintained during the month. Layoffs in construction were relatively light owing to a recent strengthening in residential construction.

Total employment in December was 4.4 per cent higher than a year earlier, compared with an average December-to-December increase over the past decade of 2.0 per cent.

The largest increases were in service and manufacturing, which together accounted for about three quarters of the over-all

advance. Smaller gains took place in trade, forestry and construction. In the remaining industries, employment levels were much the same as the year before. The number of employed women increased by 141,000, or 8.1 per cent, over the year. Almost two thirds of them were married women.

The number of employed men was higher by 127,000, or 2.9 per cent, than a year earlier; some 86,000 of the increase was among married men.

Employment was up considerably from the previous year in all regions except the Atlantic region, where it was virtually unchanged. The increases ranged from 4.1 per cent in the Prairie region to 5.7 in the Quebec region.

Unemployment

Unemployment rose from 303,000 to 346,000 between November and December, an unusually small increase for the time of year. The increase was entirely among men.

Compared with a year earlier, unemployment was down 68,000. More than four fifths of the decrease was among men 25 to 64 years of age.

Of the 346,000 unemployed in December, some 273,000 had been unemployed for three months or less. An estimated 35,000 had been seeking work for from four to six months, and 38,000 for seven months or more. Virtually all of the year-to-year drop in unemployment was among persons unemployed for more than one month.

Unemployment in December represented 5.1 per cent of the labour force, compared with 6.3 per cent a year earlier and 6.4 per cent two years ago. In November the rate was 4.5 per cent.

Unemployment rates were lower than a year ago in all five regions.

LABOUR MARKET CONDITIONS

Labour Market Areas	Labour Surplus				Approximate Balance		Labour Shortage	
	1		2		3		4	
	Dec. 1963	Dec. 1962	Dec. 1963	Dec. 1962	Dec. 1963	Dec. 1962	Dec. 1963	Dec. 1962

NOTE: Kitimat Labour Market Area is no longer included in this listing.

→The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For an explanation of the classification used see page 491, June 1963 issue.

Sheltered Employment Expanding in Canada

Examples from Edmonton, Toronto, Calgary, Ottawa and Sault Ste. Marie of development of sheltered workshop facilities

Development of sheltered employment facilities is increasing throughout the country. An example is the Edmonton Sheltered Workshop, which has been providing service to the disabled of the community since 1955, and which on December 2 opened a "Goodwill" workshop and store. This type of workshop receives discarded household articles and clothing, renovates and repairs them and sells them in the shop, thus providing many opportunities for training disabled persons in a variety of skills.

Ontario Division CNIB

The Ontario Division of the Canadian National Institute for the Blind also has instituted several new projects during the past year. A large adjustment-training centre in Toronto provided a three-month training program for 14 newly blind persons; eight were returned to employment and others were referred for further training with the catering department. In addition, facilities were re-arranged to provide space for 50 persons to be employed on subcontract work, with room for further expansion.

A film-processing room was built for the training of blind X-ray technicians. Over the past 15 years, X-ray film processing has proved to be a satisfactory career for several blind persons, but training had to be arranged through hospital facilities. Ten blind persons are now employed in Ontario in this work; the training facilities will open the field to many more.

On-the-job training in catering was provided for 43 persons and 17 were placed in positions before the end of the year. This brings to 246 the number of blind persons employed in this type of work. There are 487 blind persons employed in industrial jobs in outside firms.

Handicapped Workers Make Christmas Seals

The Calgary Rehabilitation Centre, which began manufacturing Christmas seals five years ago as a small sideline, has developed it into a major industry.

Used Christmas cards are collected, sorted and sent to five disabled persons, confined to their homes, for cutting. They are returned

to the centre, where other handicapped persons spray on the glue and package them.

The seals that are made are larger than the usual ones, being about 3 x 3 inches in size, and fill a gap in the market. High standards of workmanship must be maintained by all workers so that the seals sell on their own merit.

Ottawa Neighbourhood Services

The annual report of the Ottawa Neighbourhood Services, a self-sustaining salvage type of operation entirely dependent on the income derived from the sale of household materials reconditioned by the handicapped, indicates an expansion of activities.

During the year employment was given to 118 workers on a full- or part-time basis. Average rate of pay was \$1.10 per hour. These 118 persons paid \$5,768.75 in income tax.

The report states, "For some this was their first job. For others it meant employment after years of idleness. For the older worker it meant part-time employment to supplement his pension.

"Utilization of the skills of handicapped workers in productive employment is sound and necessary, both for the contribution these workers can make to our national productivity and from the sense of independence and well-being they can derive from doing a good job.

"In our workshops handicapped people with virtually all types of disability are successfully performing jobs of almost every conceivable occupation because their abilities have been found to be adequate for job performances and their disabilities not to be a restricting factor."

Sault Ste. Marie Workshop

Operation Reclaim (Algoma) Inc., another salvage type of sheltered workshop formed in Sault Ste. Marie in June 1962, is already proving its value in the community. The staff at present consists of eight persons, three of whom have never worked before.

A branch of Marina Creations has also been organized in the Sault Ste. Marie area; about 12 disabled persons are participating and more are expected to join.

Extend Older Worker Incentive Program

Older Worker Employment and Training Incentive Program is extended from January 31 to March 31, Minister announces

Hon. Allan J. MacEachen, Minister of Labour, announced last month that, among other changes, the hiring period under the Older Workers Employment and Training Incentive program had been extended from January 31, 1964 to March 31, 1964.

Under this program, which went into effect on November 1, 1963, the Department of Labour will pay up to \$75.00 a month to employers for each eligible older worker hired by them for a new job between November 1, 1963 and March 31, 1964. Payments can be made for a total period up to 12 months. Eligible older workers must be aged 45 or over and have been unemployed for at least six of the previous nine months.

Mr. MacEachen explained that this extension of time will give employers more time to consider fully their manpower requirements and make any necessary adjustments in their hiring practices in order to take advantage of the program. At the same time an additional number of older workers would have the chance to benefit from the program.

The Minister pointed out that the program involved an entirely new concept in hiring workers. It was an imaginative experiment designed to help overcome reluctance to hire older workers and to bring back to employment those older workers who were experiencing lengthy periods of unemployment. As such it had received the full endorsement of the Canadian Manufacturers' Association, the Canadian Chamber of Commerce, the Canadian Labour Congress, the Canadian Federation of Mayors and Municipalities, and other national organizations. The Provincial Departments of Welfare were also giving their support and co-operation.

Considerable interest in the program's possibilities has also been shown by individual employers in all parts of Canada. It was, of course, realized that a program involving such a new idea and specifically timed to encourage increased employment during the traditional winter lull would be slow in starting.

This timing had tended to slow down employer response, since many of the job openings at this time of year were filled by re-hiring workers temporarily laid off. During the first month of hiring, however, some 325 applications were received from employers. The extension of the hiring period

would allow more time for job opportunities to develop and it was expected the number would increase as the program gained momentum.

The Minister also announced another important change in the program. He said that the requirement that applicants for employment under the program must have exhausted regular unemployment insurance benefits had been removed. As long as they were aged 45 or over and had been unemployed for at least six of the previous nine months they would be able to participate.

Removal of this requirement would enable many more older workers to participate in the benefits of the program. At the same time it would be likely to increase employer interest, as it would provide them with a wider selection of older applicants from which to choose workers to fill new job openings.

Mr. MacEachen explained that the services of the National Employment Offices across Canada were being utilized for the approval of eligibility for both workers and job openings. Officials of local employment offices were also making direct contacts with employers to encourage them to take advantage of the program.

The Minister pointed out that it was hoped that close observation of the development and response to this new experimental concept of hiring would result in a significant contribution toward solution of the older worker problem. It was quite possible, he thought, that information gained from an evaluation of the program might be helpful in planning future action on behalf of older workers.

There were a great many capable older workers, with many years of useful service ahead of them, who were frequently turned down for employment because they lacked up-to-date work experience in business or industry. Lengthy periods of unemployment tended to intensify this lack of experience and make it increasingly difficult for them to find jobs.

The Older Worker Employment and Training Incentive Program was designed to assist such workers to gain the up-to-date knowledge and experience needed for jobs in modern industry. The incentive payments will assist employers during the period needed to bring an older worker up to full productivity.

Working Women in Australia

Women make up one quarter of Australia's labour force, and between 1954 and 1961, female labour force grew 25.3 per cent

In Australia there are 1,059,158* women in the labour force, making up one quarter of all workers.

The 1961 census disclosed a striking difference between the rates of growth of the male and female labour force, the female labour force having increased by 25.3 per cent between 1954 and 1961 and the male labour force by 10.8 per cent.

Where they work—Manufacturing employs 23.9 per cent of women workers; commerce, 22.2 per cent; community and business services, including the professions, 21.5 per cent; and amusement, hotels and personal services, 12.8 per cent. More than half the workers are women in a number of branches of manufacturing, textiles, boots and shoes, pharmaceutical and toilet preparations, confectionery and tobacco. Women are more than one quarter of those employed in food processing, plastic moulding, sheetmetal work, foundry casting and printing. In health services they comprise nearly three quarters of the total and in social welfare they make up approximately half.

The number of women engaged in the professions is not yet available from the 1961 census but up to the present time certain professions have become "feminine" and women tend to concentrate in these. They include school teaching, library work, social service, physiotherapy and research. The number of women in medicine, architecture, law, engineering and the wider fields of administration is negligible.

Their ages—Young women predominate. The 1954 census revealed that 40 per cent of working women were between 15 and 24 years of age. The relatively smaller proportions in the higher age groups reflect the large-scale withdrawal of women from the labour force after age 24. It is expected that the 1961 census will reveal further additions in the younger age groups because of the high birth rate in the immediate post-war years.

Married women—At the time of the 1954 census, married women comprised 30.4 per cent of the total female labour force and 12.6 per cent of all married women were in employment. Those with family responsibilities make up the largest portion of part-time workers. Most are employed in

domestic service and other service occupations and in sales and office work. Except in the case of domestic service, part-time employment is usually offered by employers to cope with peak hours of activity.

Day nurseries which care for the children of working mothers are set up mainly in the highly industrialized areas but are not numerous. Normally employers do not provide such facilities at the place of work. They are usually financed by voluntary effort but some receive state and municipal assistance.

Except in the public services of two states there is no legal requirement for maternity leave.

Equal pay for equal work—In Australia wages are fixed through arbitral tribunals established in pursuance of commonwealth or state legislation and are made up of two parts, the basic rate applicable to all workers and additional compensatory margins which depend on the nature of the work to be performed. In the majority of cases women are granted both a lower margin and a lower proportion of the male basic wage. In a few awards women are granted an equal margin but only 75 per cent of the male basic wage.

The State of New South Wales enacted legislation in 1958 to provide for equal pay by 1963 for certain groups of women workers performing work of the same nature and of equal value to that performed by men. The legislation applied to less than 10 per cent of the women workers in the State.

Women in the Commonwealth Public Service performing the same work as men receive equal margins but only 75 per cent of the male basic wage. The Commonwealth Government has consistently refused to legislate for equal pay as it believes that application of the principle is a matter for determination in the first instance by the Commonwealth Conciliation and Arbitration Commission.

Participation in trade unions—Well over half of the trade unions affiliated with the Australian Confederation of Trade Unions have women members. The largest number are in the Clothing Trades Union, followed by the Clerks Federation, and the Textile Workers Union. In only seven unions do women hold branch office and state office; in only two are there women officers at the federal level.

* Figures are from the 1961 census unless stated otherwise.

COLLECTIVE BARGAINING REVIEW

Collective Bargaining Scene

Agreements covering 500 or more employees,
excluding those in the construction industry

Part I—Agreements Expiring During January, February and March (except those under negotiation in December)

(No cases during December)

Part III—Settlements Reached During December 1963

(A summary of major terms on the basis of information immediately available. Figures on the number of employees covered are approximate.)

CBC COMPANY-WIDE—PUBLIC EMPL. (ARTEC) (CLC): 3-yr. agreement covering 2,100 empl.—wage increases of 3% eff. April 1, 1963, 3% eff. April 1, 1964 and 3% eff. April 1, 1965—compounded; agreement to expire March 31, 1966.

CDN. WESTERN NATURAL GAS, CALGARY, & NORTHWESTERN UTILITIES, EDMONTON, ALTA.—EMPL. WELFARE ASSN. (IND.) & EMPL. BENEFIT ASSN. (IND.): 1-yr. agreement covering 850 permanent empl. and 350 temporary empl. in office and plant units—wage change of \$20 a mo. to all basic salary ranges which includes \$10 which had previously been part of cost-of-living bonus (increase varies from 1½% for top ranges to 3% for lower ranges with an average increase of 2¼%); wage increase of 8¢ an hr. (4¢ an hr. retroactive to July 1, 1963), plus an adjustment of 6¢ an hr. which had previously been part of cost-of-living bonus, on hourly rates for temporary empl.; 4 wks. vacation after 25 yrs. of service (formerly after 30 yrs.) eff. Jan. 1, 1964; board and lodging now paid for all labourers required to work away from their home base; rates for labourers \$1.88 to \$2.05 an hr.; agreement to expire Dec. 31, 1964.

COMMISSION DES ECOLES CATHOLIQUES, MONTREAL, QUE.—PUBLIC SERVICE EMPL. FEDERATION (CNTU) (MAINTENANCE EMPL.): 2-yr. agreement covering 600 empl.—general wage increase of \$200 a yr. retroactive to July 1963; additional wage increase of \$100 a yr. for labourers and caretakers' helpers eff. July 1964; long-service bonuses—\$104 after 10 to 14 yrs. of service, \$156 after 15 to 19 yrs. of service, \$208 after 20 to 24 yrs. of service and \$260 after 25 yrs. of service—eff. July 1965; rate for labourer in July 1964 will be \$4,055 a yr.; agreement to expire June 30, 1965.

DENISON MINES, ELLIOT LAKE, ONT.—STEELWORKERS (AFL-CIO/CLC): 2-yr. agreement covering 870 empl.—general wage increase of 5¢ an hr. and for hoistmen with compressor's papers, 2¢ an hr. additional eff. Sept. 1, 1964; in the event of a shutdown, severance pay to be \$6 per mo. of continuous employment from last date of hiring for a maximum of \$450 up to Sept. 1, 1964 and \$500 if the shutdown occurs after that date; rate for labourer on Sept. 1, 1964 will be \$2.10 an hr.; agreement to expire Aug. 31, 1965.

DOMINION STEEL & COAL, TRENTON, N.S.—STEELWORKERS (AFL-CIO/CLC): 2-yr. agreement covering 700 empl.—wage increases of 2¢ an hr. retroactive to Dec. 31, 1962 and 3½¢ an hr. eff. Dec. 1, 1964; employer to contribute 2¢ an hr. additional to welfare plan retroactive to Dec. 1, 1962; employer to contribute 3½¢ an hr. additional to pension plan eff. Dec. 1, 1964; rate for labourer on Dec. 1, 1964 will be \$1.64½ an hr.; agreement to expire Dec. 1, 1965.

MARITIME TEL. & TEL. & EASTERN ELECTRIC, COMPANY-WIDE, N.S.—I.B.E.W. (AFL-CIO/CLC) (plant empl.): 2-yr. agreement covering 500 empl.—wage increases of \$1 to \$3.25 a wk.; 1 wk. vacation after 1 yr. of service, 2 wks. vacation after 2 yrs. of service and 3 wks. vacation after 3 yrs. of service (formerly 2 wks. vacation for empl. with less than 15 yrs. of service and 3 wks. vacation after 15 yrs. of service) and 4 wks. vacation after 25 yrs. of service; if vacations are taken between Nov. 1 and April 30, 2 wks. vacation to be extended by 2 days, 3 wks. vacation to be extended by 4 days, and 4 wks. vacation to be extended by 5 days; rates for labourer \$45 to \$98.45 a wk.; agreement to expire Dec. 31, 1965.

TCA, CANADA-WIDE—MACHINISTS (AFL-CIO/CLC): settlement pay of \$60 for time worked between July 1 and Nov. 4, 1963 and wage increase of 4% eff. Nov. 5, 1963 on wage reopener provided for in 2-yr. agreement covering 4,400 empl.; base rate for labourer \$1.89 an hr.; agreement to expire June 29, 1964.

TORONTO TRANSIT COMMISSION, TORONTO, ONT.—STREET RAILWAY EMPL. (AFL-CIO/CLC): 27-mo. agreement covering 4,600 empl.—wage increases of 5¢ an hr. eff. Jan. 1, 1964, 5¢ an hr. eff. Oct. 1, 1964 and 5¢ an hr. eff. July 1, 1965 for unskilled empl.; wage increases of 6¢ an hr. eff. Jan. 1, 1964, 6¢ an hr. eff. Oct. 1, 1964 and 6¢ an hr. eff. July 1, 1965 for operators; wage increases of 7¢ an hr. eff. Jan. 1, 1964, 7¢ an hr. eff. Oct. 1, 1964 and 7¢ an hr. eff. July 1, 1965 for skilled tradesmen; night shift premium of 5¢ an hr. for non-uniformed empl. introduced; benefits from contributory welfare plan to be \$11 a day in 1964 (formerly \$10 a day) and \$12 a day in 1965 with payments beginning on second day of illness instead of on third day; bereavement leave of 1 day; rate for labourer will be \$2.20 an hr. and rate for operator will be \$2.48 an hr. on July 1, 1965; agreement to expire March 31, 1966.

WABASSO COTTON, GRAND'MERE, SHAWINIGAN & THREE RIVERS, QUE.—UNITED TEXTILE WKRS. (AFL-CIO/CLC): 2-yr. agreement covering 2,200 empl.—wage increases of 5¢ an hr. retroactive to June 1, 1963 and 5¢ an hr. eff. Nov. 28, 1964; night shift premium increased to 10¢ from 9¢ an hr.; new provision for 3 days bereavement leave in the event of death of father, mother, spouse and children; weekly indemnity to be \$25 (formerly \$20) for single empl. and \$30 (formerly \$25) for married empl.; agreement to expire Dec. 1, 1965.

TEAMWORK in INDUSTRY

No strike and no major industrial relations trouble in 50 years is the proud record of labour and management at Dominion Forge Limited, Windsor, Ont., manufacturers of crankshafts, connecting rods and other components for the automobile industry.

Dominion Forge's personnel manager Ernie Marks thinks that this achievement is the result of an amalgam of two-way loyalty, maturity and patience, social pressures within the plant, and the presence of family characteristics arising from close working relationships between long-term employees and long-term management.

"Our good relations were created out of the responsible attitudes of both management and employees," said Mr. Marks. "I think the maturity in this plant developed over the years out of sincere attempts by labour and management to show consideration for each other."

Dave Orloph, president of United Auto Workers Local 195 for 22 of the past 24 years, explained the high level of relations in the plant by saying that management and the union prefer to use good judgment and common sense rather than argument. "There isn't one problem that can't be straightened out by labour-management discussion," he declared.

Albert Elson, serving the Windsor area as industrial relations officer with the federal Labour-Management Co-operation Service, reported: "What labour and management have at Dominion Forge is a genuine two-way street. They also have the assets on both sides to handle any problems that come their way."

As a result of the latest negotiations at Dominion Forge, a profit-sharing plan was introduced. The plan recognizes that the success of the company and the security of the employee depend on the co-operative and loyal efforts of everyone. Consequently each employer has a personal stake in the company's operations.

Management sees to it that there is joint consultation on all issues affecting the welfare of the plant and its people. There is frequent discussion on contracts. Said Mr.

Orloph: "To meet the cost and delivery requirements involved in defence contracts with the United States, the union will up daily production. It can always be done somehow."

The firm's pension plan itself is the product of labour-management consultation. Former company president Robert T. Herdegen was the man chiefly responsible for management's part in originating the basic plan in 1949-50, but its final form was jointly determined by a pension committee composed of three company and three union representatives. Company and union actuaries also jointly debated the various financial intricacies involved. The plan, which pays \$140 a month to each retired employer with 25 years service, was recently acclaimed by George Burt, Canadian director of the UAW, as a credit to labour and management at Dominion Forge.

"What we've all learned," declared local president Orloph, "is that teamwork puts money in the pockets of both union and management."

Company vice-president and general manager Herbert Young stated recently that the only meaningful security in industry is a profitable company to which labour is contributing the weight of its energy and skills. "This is a thought that should be conveyed oftener by management to trade unions," he said.

* * *

"Labour and management tend to blame government for the problems that confront them but they know deep in their hearts that these problems could be resolved if both parties sat down and discussed them honestly," said Marcel Pépin, general secretary of the Confederation of National Trade Unions during an address to the recent Labour-Management Committee Area Conference in Alma, Que.

Mr. Pépin urged that labour and management together work out an effective formula to make the worker as interested in his job as he would be if he owned the business which employs him. The employee today is in this sense virtually a stranger to the enterprise in which he works, he said. "If such a formula is *not* found," declared Mr. Pépin, "the conflict between labour and management will continue forever."

The Alma meeting was Canada's first conference of labour-management committees conducted entirely in French, and there was 100-per-cent representation of LMCs in the Saguenay-Lac St. Jean area.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

CERTIFICATION AND CONCILIATION

Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board did not meet during November. During the month the Board received five applications for certification, one application for revocation of certification, one application under Section 19 of the Act for a provision for the final settlement of differences concerning the meaning or violation of a collective agreement, and two requests under Section 61(2) of the Act for reviewing of earlier decisions.

Applications for Certification Received

1. Association of Canadian Television and Radio Artists, on behalf of a unit of staff announcers and staff performers employed by Baton Broadcasting Limited, Agincourt, Ont. (Investigating Officer: A. B. Whitfield).

2. Transport Drivers, Warehousemen and Helpers' Union, Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Martel Express Ltd., Farnham, Que. (Investigating Officer: Miss M.-P. Bigras).

3. Transport Drivers, Warehousemen and Helpers' Union, Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers, helpers and warehousemen employed by Transport D'Anjou Inc., Rivière-du-Loup, Que. (Investigating Officer: Miss M.-P. Bigras).

4. Miscellaneous Workers, Wholesale and Retail Delivery Drivers and Helpers, Local 351, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of O'Connor Transport Limited, North Burnaby, B.C. (Investigating Officer: G. H. Purvis).

5. Communications Workers of America, on behalf of a unit of employees of the British Columbia Telephone Company, Vancouver, B.C. (traffic division) (Investigating Officer: D. S. Tysoe).

Application for Revocation Received

Ian Byers, *et al.*, applicants, Kitchener-Waterloo Broadcasting Co. Ltd., Kitchener, Ont., respondent, and the National Association of Broadcast Employees and Technicians, respondent. The application was for the revocation of the certification issued by the Board on June 22, 1960 in respect of a unit of employees of Kitchener-Waterloo Broadcasting Co. Ltd. (L.G. 1960, p. 812).

Application under Section 19 Received

Application for the provision for final settlement of differences concerning the meaning or violating of the collective agreement between the Atlantic Shipping Agencies, *et al.*, as represented by the Shipping Federation of Canada, Inc., applications, and the General Longshore Workers of the Port of Saint John, N.B., Local 273, of the International Longshoremen's Association, respondent.

Requests for Review Received

1. Request for review of the certificate issued by the Board on May 26, 1962 affecting the Canadian Wire Service Guild Local 213, American Newspaper Guild, applicant, and the Canadian Broadcasting Corporation, respondent (L.G. 1952, p. 912).

2. Request for review of the certificate issued by the Board on May 15, 1953 affecting the Canadian Wire Service Guild Local 213, American Newspaper Guild, applicant, and the Canadian Broadcasting Corporation, respondent (L.G. (1953, p. 1020).

Conciliation and Other Proceedings before the Minister of Labour

Conciliation Officers Appointed

During November, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Central Truck Lines Ltd., Val d'Or, Que., and local 938 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: C. E. Poirier).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

2. The Bell Telephone Company of Canada, Montreal, and Traffic Employees' Association (Conciliation Officer: C. E. Poirier).

3. Pacific Western Airlines, Vancouver (I.F.R. and V.F.R. Divisions) and Canadian Air Line Pilots' Association (Conciliation Officer: G. R. Currie).

4. Canadian Pacific Railway Company, Merchandise Services Department, Prairie and Pacific Regions (Clerical Staffs) and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Conciliation Officer: G. R. Currie).

Settlements by Conciliation Officers

1. Atomic Energy of Canada Limited, Chalk River, Ont., and Chalk River Atomic Energy Draftsmen, Local 1569, CLC (Conciliation Officer: T. B. McRae) (L.G., Dec. 1963, p. 1116).

2. The Toronto Harbour Commissioners, Eastern Canada Stevedoring Co. Limited,

Cullen Stevedoring Co. Limited, Pittston Stevedoring Corporation of Canada Limited, Brown & Ryan Ltd., and Economic Stevedoring Corporation and Local 1869 of the International Longshoremen's Association (Conciliation Officer: T. B. McRae) (L.G., Dec. 1963, p. 1116).

3. The Bell Telephone Company of Canada, Montreal, and Traffic Employees' Association (Conciliation Officer: C. E. Poirier) (see above).

Conciliation Boards Appointed

1. Robin Hood Flour Mills Limited (laboratory department employees), Humberstone, Ont., and United Packinghouse, Food and Allied Workers (L.G., April 1963, p. 310).

2. Robin Hood Flour Mills Limited (plant employees), Humberstone, Ont., and United Packinghouse, Food and Allied Workers (L.G., Oct. 1963, p. 899).

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation service under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for application for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of four officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the province of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; five officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Legal Decisions Affecting Labour

Supreme Court of Canada confirms constitutional validity of B.C. legislation prohibiting use of union dues for political purposes. Ontario High Court finds collective agreement no bar to action for recovery of unpaid vacation pay, rules tips are part of minimum wage, disqualifies Labour Relations Board member, and enjoins peaceful picketing by an uncertified union

The Supreme Court of Canada, by a majority decision, upheld the constitutional validity of the British Columbia legislation prohibiting the use of union dues for political purposes as being legislation within the powers of the British Columbia Legislature under Section 92(13)—Property and civil rights in the Province—of the BNA Act.

In Ontario, the High Court ruled that a collective agreement, and the provisions of the Ontario Labour Relations Act regarding arbitration of disputes under collective agreement, are not a bar to an employee's suing in ordinary courts for unpaid vacation pay owed to him.

In another decision, considering the wording of the definition of wages in the Ontario Minimum Wage Act (before the 1962-63 amendment), the Court ruled that tips received by a waitress had to be considered wages, and hence were calculable in determining whether the employer had complied with the minimum wage provisions of the Act.

In another decision, the Court, in disqualifying a member of the Labour Relations Board from hearing an application for certification, ruled that since the Board is a quasi-judicial tribunal, its members must act judicially in discharge of their duties and any of them should disqualify themselves if there is bias or a reasonable likelihood of bias; the test of reasonable likelihood of bias is an objective consideration of whether a reasonable person in all the circumstances might suppose that there would be an improper interference, conscious or unconscious, with the course of justice if the challenged member heard the application.

In another decision, the Court enjoined peaceful picketing conducted in disregard of the procedures outlined in the Labour Relations Act and held such picketing illegal as interfering with the rights of citizens to carry on their business.

Supreme Court of Canada . . .

. . . upholds validity of B.C. law banning use of union dues for political purposes

On October 1, 1963, the Supreme Court of Canada, dismissing an appeal from a decision of the British Columbia Court of Appeal, by a majority decision of four to three held that Section 9 (6) of the British Columbia Labour Relations Act, which prohibits the use of union dues for support of political parties, was within the legislative competence of the Legislature of British Columbia. The Section was added in 1961 by the Labour Relations Act Amendment Act.

Prior to its amendment in 1961, Section 9 of the British Columbia Labour Relations Act contained, *inter alia*, the following provisions:

S. 9(1) Every employer shall honour a written assignment of wages to a trade-union certified under this Act, except where the assignment is declared null and void by a Judge or is revoked by the assignor.

. . . (3) Except where an assignor of wages revokes the assignment by giving the employer written notice of the revocation, or except where a Judge declares an assignment to be null and void, the employer shall remit at least once each month, to the trade-union certified under this Act and named in the assignment as assignee, the fees and dues deducted, together with a written statement containing the names of the employees for whom the deductions were made and the amount of each deduction.

In 1961, the Labour Relations Act Amendment Act added to Section 9 a new subsection (6), which provides as follows:

6(a) No employer and no one acting on behalf of an employer shall refuse to employ or to continue to employ a person and no one shall discriminate against a person in regard to employment only because that person refuses to make a contribution or expenditure to or on behalf of any political party or to or on behalf of a candidate for political office.

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

(b) No trade-union and no person acting on behalf of a trade-union shall refuse membership to or refuse to continue membership of a person in a trade-union, and no one shall discriminate against a person in regard to membership in a trade-union or in regard to employment only because that person refuses to make or makes a contribution or expenditure, directly or indirectly, to or on behalf of any political party or to or on behalf of a candidate for political office.

(c)(i) No trade-union and no person acting on behalf of a trade-union shall directly or indirectly contribute to or expend on behalf of any political party to or on behalf of any candidate for political office any moneys deducted from an employee's wages under sub-section (1) or a collective agreement, or paid as a condition of membership in the trade-union.

(ii) Remuneration of a member of a trade-union for his services in an official union position held by him while seeking election or upon being elected to public office is not a violation of this clause.

(d) Notwithstanding any other provisions of this Act or the provisions of any collective agreement, unless the trade-union delivers to the employer who is in receipt of an assignment under subsection (1) or who is party to a collective agreement, a statutory declaration, made by an officer duly authorized in that behalf, that the trade-union is complying with and will continue to comply with clause (c) during the term of the assignment or during the term of the collective agreement, neither the employer nor a person acting on behalf of the employer shall make any deduction whatsoever from the wages of an employee on behalf of the trade union.

(e) Any moneys deducted from the wages of an employee and paid to a trade-union that does not comply with this subsection are the property of the employee, and the trade-union is liable to the employee for any moneys so deducted.

Local 16-601 of the Oil, Chemical and Atomic Workers International Union was certified, under the provisions of the Labour Relations Act, as the bargaining agent for a group of employees of Imperial Oil Limited at its refinery at Ioco, B.C. Under the provisions of the collective agreement, the company had agreed to honour written assignments of wages given by the employees in that group in favour of Local 16-601 and to remit to that Local each month the amount collected.

After the enactment of subsection (6) of Section 9 of the Act, the company advised the union that it could no longer honour the written assignments unless the union supplied it with the form of statutory declaration required by para. (d). The union refused to supply this and sued the company to compel it to honour the assignments, contending and seeking a declaration that para. (c), (d) and (e) of subsection (6) were *ultra vires* of the Legislature of the Province of British Columbia.

The trial judge held that the statutory provisions under attack were *intra vires* of

the Legislature of the Province of British Columbia (L.G. 1962, p. 219). This decision was affirmed by the unanimous judgment of the Court of Appeal of British Columbia (L.G., 1962, p. 1184).

On appeal to the Supreme Court of Canada, the union contended that the clauses in question were *ultra vires* of the Legislature of the Province of British Columbia, on the ground that the authority to enact them is not to be found within any of the subsections of Section 92 of the British North America Act; that they relate to the subject of federal elections and that they seek to curtail the fundamental rights of Canadian citizens essential to the proper functioning of parliamentary institutions. Further, it argued that the contested clauses affect the political activity of trade unions, whose right to engage in such activity is beyond the powers of provincial legislation to curtail.

The Attorney General of British Columbia, who intervened in the proceedings, submitted that the legislation in question was a limitation only of the power to use certain specified funds for particular purposes by trade unions; that this limitation is valid legislation in respect of the field of labour relations and that the Legislature of British Columbia has the authority to enact it as being within the field of property and civil rights in the province, within Section 92(13) of the British North America Act.

Mr. Justice Martland (with whom Justices Taschereau and Fauteux concurred) in his reasons for judgment said that in the case of *Toronto Electric Commissioners v. Snider* (1925) A.C. 396, it had been established beyond doubt that the field of legislation in relation to labour relations in a province is within the sphere of provincial legislative jurisdiction. This was not disputed by the union, which, however, contended that the clauses in question were not in respect of labour relations at all.

In order to determine these issues, Mr. Justice Martland considered the provisions of the Labour Relations Act as a whole, and, in particular, the true purpose and effect of the clauses under attack.

The object of the Labour Relations Act, as described by Mr. Justice MacDonald in *Re Labour Relations Board (Nova Scotia)* (L.G. 1952, p. 937), is to facilitate collective bargaining and stabilize industrial relations by enabling a union to establish before the Board its ability to represent a group of employees; and, with this controversial question settled, to require the employer, upon notice from the union, to negotiate with it and (with the aid of conciliation services) to promote the conclusions of an

agreement which shall be legally enforceable; and generally to ensure a greater measure of industrial peace to the public. Certification is, of course, not necessary for collective bargaining, but the policy of the Act undoubtedly is to promote it as a means to more orderly bargaining.

The instrument for collective bargaining on behalf of employees is a trade union. Although it is theoretically possible for a collective agreement to be made with an uncertified trade union, it is possible for a trade union to become the bargaining agent for a unit of employees who are not all members of the union only by obtaining certification under the Act. In Mr. Justice Martland's opinion, it is clear that the Act is primarily concerned with the procedures necessary to obtain certification and collective bargaining after certification has been obtained.

Those procedures materially affect the rights of employees in any unit suitable for collective bargaining and of their employer, who is compelled to bargain collectively with a certified trade union. The primary purpose of the Act is, therefore, to spell out the respective rights and obligations of the employer, the employee and the certified trade union, each of which is subject to its mandatory powers.

A trade union, as defined in the Act, may obtain certification for a group of employees in accordance with the statutory requirements. It may apply for certification if it claims to have as members in good standing a majority of the employees of that group.

When a trade union has been certified by the Labour Relations Board, it has exclusive authority to bargain collectively on behalf of the unit and to bind the individuals in that unit by a collective agreement. It can require an employer to enter into collective bargaining with a view to the making of a collective agreement, and such an agreement, when made, is binding, not only upon the trade union which has entered into the agreement, but also upon every employee covered by the agreement. Every person who is bound by a collective agreement is obligated, by the Act, to do everything he is required to do and to refrain from doing anything that he is required to refrain from doing by the provisions of the collective agreement.

The position is, therefore, Mr. Justice Martland continued, that a trade union can, under the provisions of the Act, become the bargaining agent for all the employees within a particular unit, irrespective of the individual wishes of the minority of employees within that group, and that it can

then bind each of such employees by the collective agreement which it makes. It is placed in a position to persuade those employees within the group who are not members of the union to seek membership, for it is now their bargaining agent, entering collective agreements on their behalf. In some instances, the form of the collective agreement which it makes may compel their contribution to its funds, whether they are members or not.

In addition, Section 8 of the Act provides as follows:

S. 8 Nothing in this Act shall be construed to preclude the parties to a collective agreement from inserting in the collective agreement a provision requiring, as a condition of employment, membership in a specified trade-union, or granting a preference of employment to members of a specified trade-union, or to preclude the carrying out of such provisions.

Where a collective agreement contains a provision of the kind contemplated in this section, membership in the trade union becomes a condition of employment within the group of employees in question and loss of membership automatically involves loss of employment. A person seeking employment in such a group, or desiring to remain as an employee within it, has no alternative but to obtain membership in the trade union which is the bargaining agent, and, for that purpose, to pay to it such dues as are imposed as a condition of membership in it.

Next, Mr. Justice Martland dealt with the provisions of the clauses whose constitutional validity was challenged. He noted that the union's attack was mainly upon clause c(i), which prohibits a trade union from contributing to, or expending on behalf of a political party or a candidate for political office, directly or indirectly, moneys deducted from an employee's wages under the check-off (whether statutory or pursuant to a collective agreement), or paid to it as a condition of membership in the trade union.

Clause c(i) deals first with funds obtained by the check-off, which is imposed under the statute by the provisions of S. 9(1). The right of check-off was created by the statute and granted as a statutory privilege to the trade union. The Legislature which conferred that statutory right could also take it away again. If the Legislature can eliminate the right entirely, in Mr. Justice Martland's opinion, it is equally possible for the Legislature to apply limitations in respect of its use.

Regarding the provision as to membership dues paid by an employee to a trade union as a condition of his membership in it, counsel for the union argued that

membership fees paid to a trade union were its own property, which, as a voluntary association, it is entitled to disburse in such manner as its own constitution permits and as the majority of its membership decides; that a trade union is entitled to engage in political activities as a free association of individuals and, therefore, within the limits previously mentioned, could disburse its funds for such purposes, and any attempted interference with such powers by a provincial legislature would be an interference with the democratic process in Canada, and, therefore, beyond its powers.

In Mr. Justice Martland's view, this argument would have considerable force as applied to a purely voluntary association. However, the position of a trade union which has been certified as a bargaining agent under the Act is substantially different. Such a union has, as a result of certification, ceased to be a purely voluntary association of individuals. It has become a legal entity, with the status of a bargaining agent for a group of employees, all of whom are thereby brought into association with it, whether as members, or as persons whom it can bind by a collective agreement even though not members. It must, as their agent, deal equitably with the members of the group which it represents. It is clothed with a power to make binding agreements which can compel membership in it as a condition of employment.

Mr. Justice Martland found it difficult to regard as a free, voluntary association of individuals an entity which, by statute, is clothed with a power to require membership in it, and to require the consequent payment of dues to it as the price which must be paid by an individual for the right to be employed in a particular employment group.

Mr. Justice Martland stated that the Labour Relations Act has materially affected the civil rights of individual employees by conferring upon certified trade unions the power to bind them by agreement and the power to make agreements that will compel membership in a union. Such legislation falls within the powers of the Legislature of the Province of British Columbia to enact, as being labour legislation, and, therefore, relating to property and civil rights in the province.

In Mr. Justice Martland's opinion, the legislation under attack in the case at bar does nothing more than to provide that the fee paid as a condition of membership in such an entity by each individual employee cannot be expended for a political

object which may not command his support. That individual has been brought into association with the trade union by statutory requirement. The same legislation which requires this can protect his civil rights by providing that he cannot be compelled to assist in the financial promotion of political causes with which he disagrees. Such legislation is, in pith and substance, legislation in respect of civil rights in the province, Mr. Justice Martland concluded.

Counsel for the union, relying on the judgment of Chief Justice Duff of the Supreme Court of Canada in the *Alberta Act to Ensure the Publication of Accurate News and Information* (1938) S.C.R. 100, contended that the legislation in issue curtailed the right of association to exercise the right of public discussion, and thus interfered with the working of the parliamentary institutions of Canada as contemplated by the provisions of the BNA Act and the statutes of the Dominion of Canada.

In rejecting this argument, Mr. Justice Martland stated that the legislation in question did not affect the right of any individual to engage in any form of political activity which he might desire. It did not prevent a trade union from engaging in political activities. It did not prevent it from soliciting funds from its members for political purposes, or limit in any way the expenditure of funds so raised. It did, however, prevent the use of funds obtained in particular ways from being used for political purposes.

Further, Mr. Justice Martland added the question in issue was not as to the right to engage in political activity, but as to the existence of an unfettered right to use funds obtained in certain ways for the support of a political party or candidate. If such legislation were required, a provincial legislature could prevent the contribution of trust funds for such a purpose and, equally, it could prevent the use by a corporation, created under provincial law, of funds derived from the sale of its bonds or shares for such a purpose.

A trade union, when it becomes certified as a bargaining agent, becomes a legal entity (*International Brotherhood of Teamsters v. Therien*) (L.G. 1960, p. 276). When the Legislature clothes that entity with wide powers for the exaction of membership fees by methods which previously it did not, in law, possess, it can set limits to the objects for which funds so obtained may be applied. Legislation of this kind is not a substantial interference with the working of parliamentary institutions.

With reference to the decision of the Supreme Court in *Switzman v. Elbling* (L.G. 1957, p. 983), where it was held that the Act Respecting Communistic Propaganda of the Province of Quebec was *ultra vires* of the Legislature of that province, counsel for the union argued that, even if the legislation were to be considered as, in pith and substance, designed to safeguard the fundamental right of an individual to support the party of his choice, it would still be *ultra vires* of a provincial legislature. It was contended that only the Canadian Parliament could legislate in relation to individual political freedom. As a provincial legislature could not legislate to derogate from such rights, conversely it could not legislate for their protection. In rejecting this contention, Mr. Justice Martland stated that legislation that seeks to protect certain civil rights of individuals in a province from interference by other persons also in that province is legislation in respect of civil rights within the province.

Finally, in support of the argument that legislation regarding contributions to federal political parties is a matter outside the sphere of a provincial legislature, counsel for the union pointed out that in 1930 the Parliament of Canada repealed the following provision of the Dominion Elections Act:

No company or association other than one incorporated for political purposes alone shall directly or indirectly, contribute, loan, advance, pay or promise or offer to pay any money or its equivalent to, or for, or in aid of, any candidate at an election, or to, or for, or in aid of, any political party, committee, or association, or to, or for or in aid of, any company incorporated for political purposes, or to, or for, or in furtherance of, any political purpose whatever, or for the identification or reimbursement of any person for moneys so used.

This, in the opinion of the union, showed that the legislation under review must have been an encroachment on the field reserved to the Parliament of Canada.

Mr. Justice Martland disagreed. He stated that the repealed provision of the Dominion Elections Act did not enable an association or company to make contributions for political purposes. Actually, it forbade them. It does not follow that without that provision every association and company did have the legal right to make such contributions. The right of any association or company to do so would depend upon the scope of its lawful authority, which, in certain cases in any event, would depend upon the powers which had been conferred upon them by provincial legislation.

Mr. Justice Martland concluded that for these reasons the union's appeal should be dismissed.

Mr. Justice Ritchie, although concurring with Mr. Justice Martland, added, *inter alia*, that the addition of subsection (6) to Section 9 of the Act in 1961 was directed toward ensuring that legislative machinery involving the adjustment of civil rights that was created for the regulation of relations between employers and employees should not be used for the collection of political party funds or in such manner as to curtail the fundamental political rights of any individual employee. Just as it is within the power of the province under S. 92(13) of the BNA Act to create this legislative machinery for the purpose of furthering the cause of industrial peace, so it is within its power to control its use for the same purpose.

Even if it could be said, Mr. Justice Ritchie added, that the legislation under attack had any effect on political elections, such effect could only be incidental and this would not alter the fact that the amendment in question is part and parcel of legislation passed "in relation to" labour relations and not "in relation to" elections, either provincial or federal. The legislation under review has the effect of ensuring that associations which have been given a controlling power over their members by provincial legislation are not to be permitted to use that power for the purpose of compelling such members to support a political party not of their own choice. Mr. Justice Ritchie concluded that Section 9(6)(c) and (d) of the Labour Relations Act Amendment Act 1961 was within the legislative competence of the Legislature of British Columbia.

In a dissenting opinion, Mr. Justice Judson held that the legislation in question was *ultra vires* of the provincial legislature for the following reasons.

In his opinion, the union's submission that the matters dealt with in the questioned clauses do not fall within the field of labour relations but are in relation to the political activity of trade unions is an accurate characterization of this legislation. Section 9(c) has no relationship whatever to trade union action designed to promote collective bargaining, to change conditions of employment or the contract of employment. Its sole object and purpose is to prevent trade unions from making these contributions out of their own moneys. The leading feature of the legislation is the prohibition, found in clause (c), of political contributions by trade unions.

Further, the legislation in question is directly related to elections, including federal elections. In his view, the provincial legislature has no power to restrict the

right of any person or organization within the province to make contributions at federal elections and to federal candidates. There was at one time such a restriction in the Dominion legislation and this provision was repealed in 1930. The Canada Elections Act 1960 c. 39 contemplates, in terms broad enough to include a trade union, the making of contributions to aid expenditures on behalf of political parties and candidates for political office. The provincial legislation in question is really a re-enactment against trade unions in British Columbia of the former prohibition contained in the Dominion Elections Act and repealed in 1930. In Mr. Justice Judson's opinion, the control of political behaviour does not fall within the field of labour relations and is not within the provincial power, and secondly, the legislation under review is legislation in relation to federal elections, a field exclusively within the Dominion power.

Mr. Justice Abbott, in his dissenting opinion, was in agreement with the reasons stated by Mr. Justice Judson. He held, *inter alia*, that under the Canadian constitution, any person or group of persons in Canada is entitled to promote the advancement of views on public questions by financial as well as by vocal or written means. It follows that any individual, corporation, or voluntary association such as a trade union is entitled to contribute financially to support any political activity not prohibited by law.

Whatever power a provincial legislature may have to regulate expenditures for provincial political activities, in Mr. Justice Abbott's opinion, it cannot legislate to regulate or prohibit contributions made to assist in defraying the cost of federal political or electoral activities. Similarly, for the reasons which Mr. Justice Abbott expressed in the *Switzman* case, Parliament itself cannot legislate to regulate or prohibit financial contributions for provincial political or electoral purposes except to the extent that such regulation or prohibition is necessarily incidental to the exercise of its powers under Section 91 of the BNA Act.

Further, Mr. Justice Abbott stated, the legislative purpose of subsection 6(c) of Section 9 of the British Columbia Labour Relations Act is clear and unambiguous. That purpose is to prohibit political contributions made directly or indirectly by one class of voluntary organization—a trade union—out of moneys received as a condition of membership, whether or not there is a check-off. Legislation of this character cannot be supported as being in relation to property and civil rights in the province

within head 13 of Section 92 of the British North America Act, nor can it be said to be in relation to matters of a merely local or private nature in the province. Therefore, it is clearly *ultra vires*.

Mr. Justice Cartwright also dissented from the majority decision and agreed with the conclusions reached by Mr. Justice Judson. He added, *inter alia*, that the legislation in question is an absolute and unconditional prohibition of the contribution by a trade union to any political party or any candidate for political office of any moneys paid to the union as a condition of membership. As the money so paid makes up practically the whole of the income of the union in question (and this applies, generally speaking, to all trade unions in British Columbia), the effect of the impugned legislation is a virtually total prohibition of the expenditure by a trade union of any of its funds to further the interests of any political party or candidate in a federal election; this amounts to the prohibition of, *inter alia*, of political activity in the federal field, which, prior to the enactment, was lawful in Canada. The prohibition, if valid, would be operative even if the forbidden contribution were approved and directed by a unanimous vote of all the members of the union concerned. Mr. Justice Cartwright was unable to accept the argument that this prohibition of a heretofore lawful and indeed normal political activity in regard to federal elections is ancillary, or necessarily incidental, to any of the provisions of the Labour Relations Act which are within provincial power.

The Supreme Court, by a majority decision, dismissed the union's appeal and upheld the constitutional validity of Section 9(6) of the Labour Relations Act Amendment Act 1961 as being *intra vires* of the Legislature of British Columbia. *Oil, Chemical and Atomic Workers International Union, Local 16-601 v. Imperial Oil Limited and the Attorney-General of British Columbia*, (1963), 45 WWR, Part 1, p. 1.

Ontario High Court . . .

. . . hold employee may sue for vacation pay owed him under collective agreement

On March 27, 1963, Chief Justice McRuer of the Ontario High Court, in dismissing an application for *certiorari* to quash a judgment given on a claim for vacation pay under a collective agreement, ruled that a collective agreement setting out the terms governing the employment relationship does not abrogate the common law relationship between the employer and

employee and that the requirement for arbitration in Section 34(1) of the Labour Relations Act does not oblige an employee seeking payment of vacation pay to resort to arbitration to the exclusion of a court action.

The employee was employed as a painter under a written contract, which provided that the employer would pay the employee an amount equal to four per cent (4%) of his wages as vacation pay. The employee alleged that he had received only \$72.80, which was equal to two per cent (2%), and he claimed that another \$72.80, another two per cent (2%), was owed to him.

The employer disputed the claim and maintained that Section 34(1) of the Ontario Labour Relations Act was "a complete bar to the action." Chief Justice McRuer stated that this was the only question with which he was concerned. Section 34(1) reads as follows:

34(1) Every collective agreement shall provide for the final and binding settlement by arbitration, without stoppage of work, of all differences between the parties arising from the interpretation, application, administration or alleged violation of the agreement, including any question as to whether a matter is arbitrable.

The section further provides for insertion of such a clause in agreements where one does not already exist.

The Chief Justice doubted his right to entertain the application, since the judge in the Court which rendered the decision had the sole jurisdiction to hear the claim and subsequently made his decision from which there is no appeal. However, he stated, an important question of law had been raised and, to his knowledge, for the first time in British jurisprudence. For these reasons, Chief Justice McRuer dealt with the question raised by counsel.

It was argued that the provisions of Section 34(1) of the Act were broad enough to preclude a person employed under the terms of a collective agreement from bringing an action against his employer for his wages. It was further argued that in such cases the arbitration procedure set out in the collective agreement must be followed and, when the arbitration is completed, the claim against the employer is filed with the Registrar of the Supreme Court in accordance with Section 34(9) of the Act and then it has the same force and effect as a Court judgment.

Chief Justice McRuer thought that if he adopted this argument, chaotic conditions would occur with reference to the simple

matter of the prompt payment of employees who operate under a collective bargaining agreement; and it would also put in the hands of a union that has been certified as a bargaining agent extraordinary power over non-members of the union who were employees of the same employer. The union, in such cases, could see fit to assert the claims of its members and not those of the non-members. He stated that it was not his belief that this broad meaning was the intention of the Legislature.

The Chief Justice fortified his argument by turning to the Supreme Court of Canada decision of Mr. Justice Judson in *Le Syndicat Catholique des Employés de Magasins de Québec Inc. v. La Compagnie Paquet Ltée.*, (L.G. 1959, p. 286), in which the scope of a collective agreement is defined as follows:

The union is, by virtue of its incorporation under the Professional Syndicates' Act and its certification under the Labour Relations Act, the representative of all the employees in the unit for the purpose of negotiating the labour agreement. . . . There is no room left for private negotiation between employer and employee. Certainly to the extent of the matters covered by the collective agreement, freedom of contract between master and individual servant is abrogated. The collective agreement tells the employer on what terms he must in the future conduct his master and servant relations. When this collective agreement was made, it then became the duty of the employer to modify his contracts of employment in accordance with its terms so far as the inclusion of those terms is authorized by the governing statutes. The terms of employment are defined for all employees, and whether or not they are members of the union, they are identical for all.

Chief Justice McRuer interpreted this to mean that "a collective agreement sets out the terms of employment that are to be effective between the employer and the employee but it does not abrogate the common law relationship of employer and employee in the sense that the employer is required to pay his employee according to the terms laid down in the agreement and that the employee gives his work to the employer on those terms." The employer must pay promptly since the employee has a right of action against the employer for the wages due to him.

The Chief Justice held that the lower Court's decision was correct in holding that the employee had a right to assert his claim in the courts and that the claim for wages for services rendered is not a matter required to be arbitrated. He therefore dismissed the application. *Re Grotoli v. Lock and Son Ltd.* (1963), 39 D.L.R. (2d) 128.

Ontario High Court . . .

. . . rules that tips given to a waitress are part of wages under Minimum Wage Act

On April 5, 1963, Mr. Justice Landreville of the Ontario High Court, allowing an appeal by way of stated case from a conviction for a violation of the Ontario Minimum Wage Act, held that, since Section 1(d) of the Act defines wages as including "every form of remuneration for labour performed," and, since it is not specified that they be paid or granted by the employer, tips received by a waitress at the restaurant from her employer's customers are to be considered as wages and included in determining whether the employer has paid the required minimum wage.

A magistrate for the City of Hamilton submitted the following question to the Ontario High Court:

Was I wrong in holding that tips (monetary gratuities) received by the employee, Dorothy Leaver, during the course of her employment from patrons of the appellant Tavern and Restaurant, were not wages within the meaning of Section 1(d) of the said Minimum Wage Act.

The waitress in question had been paid \$22 a week, although the minimum required in that area was \$30 a week. It was stated and not contradicted that the waitress received between \$20-\$30 a week in tips while on the job at the restaurant.

Mr. Justice Landreville ruled that the relevant sections of the Minimum Wage Act, in addition to "the spirit and intention of the statute," were Section 1(d) and Section 6. Section 1(d) states that "wage" or "wages" includes every form of remuneration for labour performed. Section 6 states:

Every employer who permits any employee to perform any work with respect to which a minimum wage is established shall be deemed to have agreed to pay to the employee at least the minimum wage established and the minimum wage shall be paid to the employee only by cash or by cheque payable at par at the place where the employee performed the work.

Moreover, he stated that the Act neither defines nor refers expressly or impliedly to the term "tip".

Mr. Justice Landreville stated that the Act was penal in nature, since it imposed an obligation on employers, and it therefore had to be strictly interpreted. He said that if the act complained of was expressly covered, or if the purpose of the statute prohibited such an act, then the person charged with committing the act was subject to the provisions of the statute.

Mr. Justice Landreville ruled that the Act did not deal with tips or gratuities. He said that he could not "strain the interpretation" of its provision to cover cases where the employee receives such income. On the contrary, he held that the definition of "wage" in Section 1(d) would lead one to believe that it included every form of remuneration. He commented that if the phrase "paid or granted by an employer" were included in that section it would have conclusively excluded tips received from third parties from the provisions of what constitutes a minimum wage. Therefore, he ruled that, since the phrase did not appear, there was "no clear cut wording" leading to the conclusion that tips must not be taken into consideration.

Mr. Justice Landreville stated that he was not led to this conclusion merely because a bill was before the Legislature that would alter this interpretation.* The Act, he said, was designed to assure reasonable and livable wages for the area in which the employee lives. The word "remuneration" in S. 1(d) was synonymous to income, he held, and income can come from various sources. Moreover, he noted that tips were taxable under the federal Income Tax Act.

In reply to the magistrate's question, Mr. Justice Landreville ruled the answer to be "yes". He set aside the magistrate's decision and ordered that a verdict of acquittal be entered for the employer. *Regina v. Duffy's Tavern (Hamilton) Ltd*, (1963), 39 D.L.R. (2d), 126.

Ontario High Court . . .

. . . on ground of reasonable likelihood of bias, bars Labour Relations Board member

On April 10, 1963, Chief Justice McRuer of the Ontario High Court granted a prohibition to stop certification proceedings before the Ontario Labour Relations Board on the ground that a member of the Board representing the employees should have disqualified himself on the ground of reasonable likelihood of bias.

The Court drew a distinction between membership in a trade union of a member of the Board representing the employees and the holding of an executive office in a central labour body by such a member. The Court held that, when a member of the Board is also the chief executive officer in a central labour body and, by virtue of

* The Minimum Wage Amendment Act, 1962-63, amended clause (d) of Section 1 of the Minimum Wage Act, which now reads: "(d) 'wage' or 'wages' includes every form of remuneration for labour performed, but does not include 'tips' and other gratuities."

this position is bound to promote the interests of the affiliated unions against outsiders, he should disqualify himself from sitting in a certification proceeding where there is a contest for bargaining rights between one of the affiliates of his organization and a union opposed by it.

In December 1962, the Sudbury General Workers' Union, Local 101, Canadian Labour Congress, applied for certification as the bargaining agent for a unit of employees at the I.G.A. Foodliner in Sudbury. The Sudbury and District General Workers' Union, Local 902 of the International Union of Mine, Mill and Smelter Workers, intervened and opposed the application.

The Labour Relations Board advised the Mine-Mill local that a hearing to determine the allegations against the application was to be held on December 20, 1962. Counsel for the Mine-Mill union objected to one member of the Board hearing the application on the ground that he was biased. The Board member, who was the president of the Ontario Federation of Labour, an affiliate of the Canadian Labour Congress, refused to disqualify himself. Then the Mine-Mill local applied for prohibition to stop the certification proceedings.

Dealing with the application, Chief Justice McRuer noted that the impugned member of the Board became a member in 1948 and took the oath set out in Section 75(5) of the Ontario Labour Relations Act, which reads as follows:

S. 75(5) I do solemnly swear that I will faithfully, truly and impartially, to the best of my judgment, skill and ability, execute and perform the office of member . . . of the Ontario Labour Relations Board and I will not, except in the discharge of my duties, disclose to any person any of the evidence or any other matter brought before the Board.

Section 75(6) states that a quorum shall consist of the chairman, the vice-chairman, or a deputy vice-chairman, one member representative of employers and one representative of employees.

The impugned member had been elected as president of the Ontario Federation of Labour in 1958. At that time, he swore to an oath contained in Section 6 of Article V of the Constitution, which states as follows:

. . . I make oath and say that I am not associated in any manner . . . with any group which expounds or promotes or encourages any doctrine or philosophy contrary to or subversive of the fundamental principles and institutions of the democratic form of government of Canada, and further, *I make oath and say if elected I will faithfully support the constitution, principles and policies of the Ontario Federation of Labour and the Canadian Labour Congress.* [emphasis added.]

The Constitution of the Canadian Labour Congress, which the Ontario Federation of Labour subscribes to, states its purposes in part, as follows:

1. To support the principles of the Canadian Labour Congress.
2. To promote the interests of its affiliates and generally to advance the economic and social welfare of the workers of Ontario.
3. (a) To assist affiliated organizations in extending the benefits of mutual assistance and collective bargaining to workers.

Local 101 of the General Workers' Union, the union applying for certification, is affiliated with the Ontario Federation of Labour and is a chartered local of the Canadian Labour Congress.

Evidence indicated that a conflict existed between locals of the International Union of Mine, Mill and Smelter Workers and locals of the Canadian Labour Congress. In 1961, at the Ontario Federation of Labour's fifth annual Convention, over which the impugned member presided, a resolution was put forth offering support to the Canadian Labour Congress in its battle to destroy the "Communist-oriented leaders of Mine-Mill."

Chief Justice McRuer stated that he was not concerned with the struggle between the respective labour organizations. He noted, however, that it was of utmost importance that persons exercising judicial or quasi-judicial functions should act in accordance with the law.

The Chief Justice went on to point out that, although Section 75(2) of the Act required as Board appointees an equal number of representatives of employers and employees, the Board members did not represent either employers or employees. He quoted from the judgment of Mr. Justice Roach in *Re Ontario Labour Relations Board, Bradley et al. v. Can. Gen'l Electric Co.* (L.G. 1957, p. 860), as follows:

. . . As members of the Board they are independent of both (employers and employees). They occupy a quasi-judicial position and in the discharge of their duties they must act judicially. Sitting in between them is an equally independent chairman. The present incumbent of that position has never been affiliated with either management or labour but it would be quite wrong to say that on that account he is more independent than his fellow members . . . because as between all the members there can be no gradations of independence.

Chief Justice McRuer reviewed the authorities and ruled that the Board members exercise quasi-judicial functions in determining certification matters and that, if a Board member is shown to be biased, the Board decision may be quashed on *certiorari*.

With regard to the question of "real or reasonable likelihood of bias," the Chief Justice considered a number of judicial precedents and concluded that it would be wrong for a person to act if there was a real likelihood of bias in favour of one of the parties; that if a person who is required to act judicially (or quasi-judicially) has a pecuniary interest in the matter in dispute, no matter how small, bias is presumed even in cases where the tribunal has in fact acted impartially; and that there was another class of case in which the objection is not founded on any pecuniary interest but would be in the nature of a challenge to favour and that in such cases the question to be answered is what are the facts of the case. He thought that question was the one to be determined in the case at bar. He stated, however, that it was not necessary, in answering the question, to decide whether bias had in fact existed.

Moreover, he noted that the authorities pointed out that it was difficult to determine the existence of bias as a matter of fact. Lord O'Brien in *The King (De Vesci) v. Justices of Queens County*, [1908] 2 Ir. R. 285, stated:

We rarely, if ever, could ascertain the actual condition at a given moment of the human mind. All we are concerned with in such a case as the one now before us is, whether there was, at the outset of the inquiry, a real likelihood of bias; whether, under all the circumstances, there were reasonable grounds for believing that any one of the adjudicating magistrates would be, even unconsciously to himself, influenced by bias. By "bias" I understand a real likelihood of an operative prejudice, whether conscious or unconscious.

Chief Justice McRuer stated that the weight of the authorities established "reasonable likelihood of bias" as the correct test. He ruled that "real likelihood of bias" of the impugned member was not to be determined by an analysis of his mind or character but by an objective consideration of whether a reasonable man under the circumstances might suppose that there would be an improper interference, conscious or unconscious, with the course of justice if he sat.

The Chief Justice noted that when the impugned member was nominated as the president and chief executive officer of the Ontario Federation of Labour, he obligated himself to "faithfully support the constitution, principles and policies" of the Federation. He would have to promote the interests of Canadian Labour Congress affiliates, such as the General Workers' Local 101, as well. The Federation resolution made it a fixed policy to destroy the Mine-Mill union as a bargaining agent and that policy would have involved Local 902, if carried out.

The Mine-Mill intervention contesting the General Workers' certification application placed the impugned member of the Board in the position of sitting in judgment on an issue in dispute between the two unions. His decision could advance or retard the declared policy of the Federation. The Board member's oath required him to be impartial and his Federation oath required him, as chief executive and president, to carry out the Federation policies. Chief Justice McRuer ruled that it was "asking too much of human nature to hold that the chief executive of an organization which had announced a declared policy of destroying another organization should sit to decide disputes between the two organizations or their constituent affiliates."

It was argued that Section 75(2) of the Labour Relations Act gave the impugned member a statutory right to act even in cases where bias might be inferred. Moreover, it was argued that every trade union member has an interest in advancing the policies of his union and its affiliates and that, if the law was applied strictly, trade union members would be barred from sitting as Board members on every dispute between a union and an employer.

The Chief Justice ruled that the Legislature contemplated employees' representatives on the Board would be trade union members. Mere membership in a trade union affiliated with the Federation, he stated, would not warrant disqualification of the impugned member. The authorities demonstrate a distinction between mere membership and an executive responsibility to carry out the declared policies of a body.

Chief Justice McRuer went on to say:

A man might well be a member of a trade union and be free to act with respect to matters before the Board affecting another trade union. It is . . . a different thing where a member of a board has a dual responsibility, on the one hand to carry out the declared policies of the . . . Federation . . . and on the other hand to decide impartially any matters that may be in conflict with those policies. I do not think on any recognized principle of law applicable to judicial or quasi-judicial tribunals one who has clearly divided loyalties as in this case can be permitted to act.

The Chief Justice made it clear that he did not make any suggestion of *mala fides* (bad faith) on the part of the impugned member. He felt quite confident that, if the matter had been presented to him at the time the objection was taken in the light of the present reasons for judgment, he would have disqualified himself and permitted another member of the Board to sit who did not have the same responsibilities and obligations in the Ontario Federation

of Labour that he had undertaken. The application for prohibition was granted. *Regina v. Ontario Labour Relations Board; Ex parte Hall*, (1963), 39 D.L.R. (2d), Part 2, p. 113.

Ontario High Court . . .

...enjoins uncertified union's peaceful picketing in disregard of Act's procedure

On June 7, 1963, Mr. Justice Landreville of the Ontario High Court, delivering written reasons for the injunction order he granted on June 5, ruled that peaceful picketing conducted by an uncertified union can be enjoined where it occurs in disregard of the procedures set out in the Labour Relations Act.

Edland Construction (1960) Ltd. was engaged in construction of a warehouse in Niagara Falls. On May 27 and 28, 1963, a picket line was formed by a dozen men who apparently were not employees of the company in question and were led by the business agent of the International Association of Bridge, Structural and Ornamental Iron Workers, Local 736.

There was no labour dispute between the company and its employees and there was no relationship between the company and the picketing union. No trade union was certified as a bargaining agent for any of the company's employees in Niagara Falls and no application for certification was made to the Labour Relations Board. Apparently the purpose of picketing was through intimidation either to compel the employees to "sign up" or to impose on the employer a collective agreement.

In the opinion of Mr. Justice Landreville, it was a case of clear interference with the private rights of labourers and employers. Further, he stated that, although there may be a common law right to communicate peacefully information by placard-bearing men on a picket line, that right must be cautiously exercised; for, if through that conduct there can be drawn any inference of intimidation or threats, or any interference with the acts of employees or the movement of merchandise and vehicles of the employer, such picketing constitutes the

offence of watching and besetting, and further, it constitutes a conspiracy and a nuisance. Such picketing is designed to force a union contract on two groups by other than peaceful persuasive methods. Picketing, being lawful as a means of communicating information, ceases to have a character of righteousness when it acquires a character of investiveness and interference in the rights of citizens to carry on their business.

Mr. Justice Landreville noted that, in *Smith Bros. Construction Co. v. Jones* (L.G. 1955, p. 678), Mr. Justice McLennan, referring to peaceful information picketing, stated that "if the development of the trade union movement has reached the point where workers will not cross a picket line to go to work, that is just as effective an interference with contractual relations as any other form of restraint might be. Loyalty to the rule . . . having been developed, the rule should not be abused for a wrongful purpose and where there is no justification."

That rule of loyalty to the picket line, Mr. Justice Landreville added, has now stretched out to the members of the public. Then, picketing ceases to mean communication of information and becomes a measure, to a varying degree, to a course of watching, besetting and intimidating others. It ceases to have a character of peacefulness when it aims at causing such nuisance and damages to the other as to force him into submission.

Mr. Justice Landreville concluded that picketing, even if it is peaceful, can be enjoined where it occurs before the required resort is taken to the steps set out in the Labour Relations Act. The Act proclaims the procedure to be followed, and to take the course indicated in the Act is not only a right but becomes an obligation. To act outside of the provisions of the Act to achieve a like end becomes a prohibition and is illegal. The injunction order against picketing was issued until the trial. *Edland Construction (1960) Ltd. v. Childs and Sallafranque*, (1963) 39 D.L.R. (2d), Part 7, p. 536.

Recent Regulations, Federal and Provincial

British Columbia issues three new minimum wage orders. New Brunswick issues rules for hairdressing and barbering schools

The federal Government issued the Older Worker Employment and Training Incentive Program Regulations and amended the Prevailing Rate Employees General Regulations, 1963.

In British Columbia, a new male minimum wage order for the machinist, moulder, refrigeration and sheet-metal trades established a minimum wage of \$2 an hour for journeymen. Two other new orders, applicable to both men and women, set a minimum wage of \$1 an hour for elevator operators and starters and for janitors and resident janitors in apartment buildings, with provision for lower rates during the first three months of employment.

In New Brunswick, rules for hairdressing and barbering schools were issued under the Trade Schools Act.

FEDERAL

Appropriation Acts

The Older Worker Employment and Training Incentive Program Regulations (SOR/63-439) were gazetted on November 27. These regulations set out the conditions under which the federal Government will pay a monthly incentive to employers who hire certain eligible older workers between November 1, 1963 and January 31, 1964.

These regulations were reviewed on the Older Workers page of the December issue, page 1102.

Financial Administration Act

Amendments to the Prevailing Rate Employees General Regulations, 1963, dealing with reporting pay and leave of absence with pay were gazetted as SOR/63-429 on November 13.

A new section on reporting pay has been added. It provides that, where a prevailing rate employee has reported to work his normal working hours or a scheduled overtime shift and the deputy head has certified that no work is available for him, he must now be paid two hours pay at the applicable normal or overtime rate, as the case may be.

Another new provision gives the deputy head discretionary power to grant leave of absence with pay to an employee who is called as a witness before an Appeal Board established by the Civil Service Commission or who is acting as the representative of the appellant before such a Board.

PROVINCIAL

B.C. Male and Female Minimum Wage Acts

The British Columbia Board of Industrial Relations recently issued three new minimum wage orders. The first established a minimum wage of \$2 an hour for men in the machinist, moulder, refrigeration and sheetmetal trades. The second order, which is applicable to both men and women, increased the minimum wage of elevator operators and starters from 75 cents to \$1 an hour. The third order, which also covers both male and female employees, set a minimum wage of \$1 an hour for janitors, including resident janitors in apartment buildings.

Machinist, Moulder, Refrigeration and Sheet-metal Trades. The new order for the machinist, moulder, refrigeration and sheet-metal trades (B.C. Reg. 179/63, gazetted October 31) replaces three orders that set a minimum of \$1.25 an hour for employees in the machinist and refrigeration trades and a minimum of \$1.50 an hour for sheetmetal workers. Previously no minimum wage was fixed for moulders.

The \$2-an-hour rate set by this order applies to all journeymen in these trades except persons permanently employed at maintenance work, employees engaged in the production-line or assembly-line manufacture of metal products for resale, and persons acting in a supervisory, managerial or confidential capacity who are exempt from the Hours of Work Act. In line with the usual practice, an exception is also made for an apprentice, part-time or handicapped employee with a special permit from the Board to work for less than the minimum wage. Such an employee must be paid at the rate specified in the permit.

A new feature of the order is that time and one-half the regular rate is now payable after 40 hours in a week instead of after 44 hours. If, by agreement, hours are averaged over a fixed period, the overtime rate must be paid for all hours worked in excess of a weekly average of 40 hours. As before, this premium rate is also payable for all hours worked in excess of eight in the day.

The daily guarantee provision is similar to that in most British Columbia minimum wage orders. Every employee must receive at least two hours pay at the regular rate if he reports for work in response to a call

from the employer and four hours if he commences work, subject to the usual qualifications.

Hours are limited to 8 in the day and 44 in the week, subject to the exceptions provided in the Hours of Work Act, but there is no provision for a weekly rest.

Elevator Operators and Starters. Like the majority of orders issued in British Columbia within the past year, the revised order for elevator operators and starters sets a regular minimum of \$1 an hour, with provision for lower minima during the first three months of employment. During the first month of employment, the minimum is 85 cents an hour, increasing to 90 cents the second month and to 95 cents the third. As in other recent orders, a month's employment is defined as 22 working shifts.

Time and one-half the regular rate must now be paid after 40 hours in a week instead of after 44, and, as before, after 8 hours in a day. This brings the overtime requirement into line with the standard set in the majority of orders issued during the past year.

The daily guarantee provision, which is unchanged, is the same as that in the order for the machinist, moulder, refrigeration and sheetmetal trades described above.

The order again requires elevator operators and starters to be given a weekly rest of 32 consecutive hours, with provision for exceptions with the approval of the Board.

The revised order again gives the Board discretionary power to require an employer to furnish the elevator operator or starter with a seat or chair while on duty if it considers it necessary for the welfare of the employee.

The prohibition against an employer's requiring an elevator operator or starter to partake of meals or make use of lodgings as a condition of employment is continued. If the employee agrees to accept meals or use the lodgings provided by the employer however, the Board, as before, may regulate the charges if it thinks that the employer is charging too much for the type of services provided.

Janitors. The new order for janitors (B.C. Reg. 196/63, gazetted November 28) differs from the former order in that it sets the same minimum wage, \$1 an hour, for resident janitors in apartment buildings as for janitors employed in other types of buildings. The previous order set an hourly minimum of 75 cents for janitors in buildings other than apartments and for resident janitors in apartments with four suites or less, and minimum monthly rates ranging from \$50 to \$265 for resident janitors in larger apartment buildings.

Another new feature is that, in line with recent practice, lower minimum rates are now set for janitors with less than three months experience. The minimum is 85 cents an hour during the first month of employment, 90 cents the second month and 95 cents the third.

Time and one-half the regular rate must be paid for all hours worked in excess of 8 in the day and 44 in the week, with the usual exception where hours are averaged over a fixed period. This provision represents a change for resident janitors; the previous order did not set overtime rates for these employees.

The order contains the usual daily guarantee provision but, as before, it applies only to persons employed by an employer whose sole or principal business is that of providing janitor service.

The policy with respect to charges for accommodation has been changed. An employer is now forbidden to make any charge for the accommodation provided for the resident janitor in an apartment building containing more than 10 suites.* In smaller apartment houses, the maximum charge is \$50 a month. The Board has authority to order adjustments in the rates charged if it considers the accommodation is unsuitable or the charges unreasonable. Previously there was no provision for free accommodation nor any limitation on charges but the Board was empowered to regulate charges if it considered it necessary.

The maximum charge for gas or electricity remains \$4 a month unless a meter is installed, in which case the resident janitor will be charged according to the amount used.

Hours of janitors and resident janitors are limited to 8 in the day and 44 in the week, with provision for variations by agreement between the employer and the employee and for extended hours in emergencies, subject to the approval of the Board.

If a janitor is working on a split shift, his hours must be confined within 12 hours immediately following commencement of work.

The provision requiring employees to be given a weekly rest of 32 consecutive hours, which previously applied only to janitors, now applies to resident janitors as well. The previous order provided for a weekly rest of 24 hours for resident janitors in buildings with 20 or more suites, and of 12 hours for those in apartments with 12

* The suite occupied by the janitor is not to be counted when computing the number of suites.

(Continued on page 62)

**UNEMPLOYMENT INSURANCE
NATIONAL EMPLOYMENT SERVICE**

Monthly Report on Operation of the Unemployment Insurance Act

Claimants for unemployment insurance benefit number 218,900 on October 31, a total 17 per cent higher than at previous month-end but 10 per cent lower than the year-earlier figure

Claimants for unemployment insurance benefit numbered 218,900 on October 31.* This was 17 per cent more than the total of 186,300 on September 30 but 10 per cent less than the figure of 244,100 on October 31, 1962.

Males made up most of the increase from the previous month and of the decrease from the previous year, amounting to 81 and 86 per cent respectively.

Of the male claimants on October 31, the proportion on claim for from one to four weeks was 57 per cent, compared with 50 per cent in the previous month. This increased percentage reflects the preponderance of males among the new applicants. Of the total number of males, 11 per cent had been on claim for 14 to 26 weeks, compared with 14 per cent in the previous month.

Initial and renewal claims filed during October numbered 126,200, an increase of some 33,000, or nearly 36 per cent, compared with total of 92,900 in September. The October total, however, was 16 per cent below the total of 150,400 in October 1962.

Beneficiaries and Benefit Payments

The average weekly number of beneficiaries in October was estimated at 148,800, compared with 133,000 in September and 152,900 in October 1962.

Payments during the month totalled \$14,000,000, compared with \$12,500,000 in September and \$15,800,000 in October 1962.

The average weekly payment per person was \$23.51 in October, \$23.54 in September, and \$23.42 in October 1962.

*See Tables E-1 to E-4, pages 83-85.

In a comparison of current unemployment insurance statistics with those for a previous period, consideration should be given to relevant factors other than numbers, such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation. Claimants should not be interpreted either as "total number of beneficiaries" or "total job applicants."

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process.

Insurance Registrations

On October 31, insurance books or contribution cards had been issued to 4,834,660 employees who had contributed to the Unemployment Insurance Fund at one time or another since April 1, 1963.

On the same date, registered employers numbered 338,085, a decrease of 17 since September 30.

Enforcement Statistics

During October, 12,101 investigations were conducted by enforcement officers across Canada. Of these 7,302 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 367 were miscellaneous investigations. The remaining 4,432 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 269 cases, 125 against employers and 144 against claimants.*

Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 1,741.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in October totalled \$30,963,087.46, compared with \$29,718,170.57 in September and \$30,065,935.05 in October 1962.

Benefits paid in October totalled \$13,989,451.92, compared with \$12,527,626.72 in September and \$15,753,718.61 in October 1962.

The balance of the Fund on October 31 was \$41,265,044.22; on September 30 it was \$24,291,408.68 and on October 31, 1962 it was \$89,928,587.38.

* These do not necessarily relate to the investigations conducted during this period.

Monthly Report on Placement Operations of the NES

During November 1963, the National Employment Service placed 100,300 persons in employment. Some 73,100, or 72.9 per cent, of these were men and 27,200, or 27.1 per cent, were women.

The cumulative total of placements for the 11 months ended in November was 1,073,300, comprising 724,500 placements of men and 348,800 placements of women. For both November and the 11 months, placement totals were between those of 1961 and 1962.

Some 3,800, or 3.8 per cent, of November's placements involved the movement of workers from one area to another; during the 11-month period, such transfers, 59,600 in all, accounted for 5.6 per cent of the placements effected.

The regional distribution of placements in November and in the 11 months was:

<i>Region</i>	<i>November</i>	<i>Eleven Months Ended November</i>
Atlantic	6,900	75,700
Quebec	39,500	309,000
Ontario	31,900	374,200
Prairie	14,100	184,300
Pacific	7,900	130,100

Vacancies notified by employers to national employment offices during November followed the same general pattern as placements. Vacancies for men numbered 90,300, or 69.6 per cent of the total of 129,700.

For the 11 months ended in November, vacancies reached a total of 1,339,000, of which 870,300 (65.0 per cent) were male vacancies and 468,700 (35.0 per cent) were female.

As in placements, vacancies notified during November and during the 11-month period reached a point between the totals of 1961 and 1962.

Decisions of the Umpire under the Unemployment Insurance Act

Decision CUB 2262, Nov. 6, 1963

Summary of the Main Facts: The claimant, married, filed an initial application for benefit at a local office of the Unemployment Insurance Commission on May 4, 1962, and was registered for employment as a bookkeeping machine operator. She had worked for the same employer from July 9, 1951 to March 2, 1962, when she voluntarily left because of pregnancy. Her rate of pay had been \$307 a month.

Her child was born on April 1, 1962, and as arrangements for the care of the child in the event that she was offered employment had not been confirmed, the insurance officer disqualified her from receipt of benefit commencing April 29, 1962. The disqualification was terminated, however, on May 19, 1962, and the claim was allowed.

As a result of an investigation, the claimant made the following Statutory Declaration to the Commission dated August 30, 1962:

I, . . . do solemnly declare that: . . . I last earned \$307 a month as a bookkeeping machine operator. I quit 2 March 1962 because of pregnancy—my first boy [was] born 1 April 1962, claim filed 4 May 1962 . . . Mrs. X, who is unemployed and not a UIC claimant, is my baby sitter . . . I have had no employment, earnings or vacation while on claim. I am capable and available for full-time work in Z— . . . I am not willing to work for less than \$280 a month. I have made no applications for work . . .

And I make this solemn declaration conscientiously believing it to be true, and knowing that it is of the same force and effect as if made under oath, and by virtue of the Canada Evidence Act.

The local office commented that the prevailing rates in the area were \$40 to \$60 a week and referred the claim to the insurance officer for adjudication.

The insurance officer disqualified the claimant and suspended benefit from September 2, on the ground that she had failed to provide she was available for work, as required by Section 54(2)(a) of the Act, as she was unduly restricting the wages she was willing to accept. The insurance officer notified the claimant of the disqualification in a letter dated September 18.

The claimant appealed to a board of referees in a letter, which was received in the local office on September 25. The letter reads:

. . . Your officer was in to see me and he asked me what wages I would accept; usually everyone quotes high but accepts less. Not ever having been on unemployment insurance before or knowing bookkeeping machine operator wages—naturally a person would quote nearer [her] former wages. Why do you people ask what wages we would accept when you know the salary wages in Z—; after all, who should know better than you people. If you work in one office for 11 years you don't know what other businesses are paying. You put the question to us and if we answer wrong you cut our benefits. I don't think you are being fair.

In the meantime, I have been watching the want-ads and have visited a few places . . . but had no luck—I will continue looking . . .

On receipt of the appeal, the local office wrote to the claimant on September 28, asking her to state the minimum salary she would consider acceptable in regard to any employment. Her reply, dated October 1, reads:

Regarding your letter dated September 28, 1962, the minimum salary I would consider acceptable is \$250 per month. Hoping this salary is close to bookkeeping machine operators in Z— . . .

In the Submission to Board of Referees dated October 9, the insurance officer said:

The insurance officer gave very little weight to this last statement by the claimant as it was made after she had been disqualified. She had been unemployed since March 1962 and had shown no effort of her own to obtain employment. In his opinion her intentions and attitude toward employment showed a complete lack of interest in returning to the labour market and he, therefore, effected no change in his decision.

The unanimous decision of the board of referees, which heard the case on October 23, 1962, reads:

The claimant was present at the hearing, and complained to the board that when asked what wages she would accept for work, it was only a natural reaction of a party so asked that the figure quoted would be as close as possible to the wages formerly received by her. The claimant admitted receiving the UIC 501D booklet at the time of registering for benefits, and indicated that she had read some but not all of it.

Apart from the positive statement of the claimant on 30 August 1962 that she would not work for less than \$280 per month, the claimant also indicated that she had made no applications for work as of the time the said statement was given.

She has apparently made applications for work since that time, but when asked whether she would be willing to accept work in a department store as a sales clerk at a wage of approximately \$35 to \$40 per week, the claimant indicated that she did not see why she should be expected to take a position such as a sales clerk for a salary of that amount. This statement was made by the claimant notwithstanding that she has been unemployed for a considerable period of time, and that there have apparently been no available positions in her own line of work obtainable through either the [UIC] office or through her own efforts.

. . . The claimant has accordingly failed to prove her availability for work on 2 September 1962, and subsequently.

. . . The appeal of the claimant is dismissed and the decision of the insurance officer is upheld.

The claimant applied to the chairman of the board of referees for leave to appeal to the Umpire and in that connection, her lawyers, in a document dated November 2, 1962, stated:

. . . It is respectfully submitted that the facts of the subject case raise serious and profound

issues relative to the proper interpretation of Section 54(2)(a) of the Unemployment Insurance Act, and, as well as to the type of evidence upon which the board of referees may properly affirm a disqualification decision of an insurance officer. The relevant evidence before the board may be summarized as follows:

The claimant swore a Statutory Declaration on the 30th day of August 1962 . . . It is to be emphasized that the applicant swore this Declaration at the request of an officer of the [UIC] and that the statements set forth in the said Declaration do not present all the conversation which took place between the unemployment insurance officer and the applicant.

The applicant made it abundantly clear at the time that she had been following local newspapers for a possible position in the category of work in which she was skilled, but had not found any such positions advertised up to the date of the Declaration. In other words, she had taken steps prior to August 30, 1962 to seek out employment as a bookkeeping machine operator through the want-ads of the local papers, but had been unsuccessful in this regard.

As regards her statement to the effect that she would not be willing to work for less than \$280 per month, it is to be emphasized that this statement was made in response to questions from the aforesaid unemployment insurance officer and it is only reasonable for a person who has been earning up to \$307 per month in a reasonably skilled position to hope for future employment at approximately the same wage scale.

Reviewing the sequence of events up to the second day of September 1962, it is obvious that the insurance officer who effected the order for disqualification of the applicant placed great reliance on the Statutory Declaration sworn on the 30th day of August. In other words, the disqualification arose not through the lack of co-operation or indifference to seeking out job opportunities, but rather *through her response to a question put to her by the unemployment insurance officer as to what wage rate she was seeking.*

The applicant would refer to the submission made to the board of referees by the insurance officer and especially page 2 of the said submission, where the insurance officer points out that prevailing rates in the Z— area ranged from \$40 to \$60 per week for workers in the [type] of employment in which the applicant was skilled.

It is to be emphasized that at no time was the applicant advised of prevailing rates and, accordingly, could have no knowledge that her requested wage rate of \$280 per month was out of line with current prevailing wage rates in that area.

In the statement of facts set forth in the decision of the board of referees, the learned members of the board appear to lay great weight upon a statement made by the applicant to the board to the effect that she did not see why she should be expected to take a position such as a sales clerk's for a salary approximating \$35 to \$40 per week. The applicant respectfully submits that her statements to that effect should have no bearing on a determination of her availability to work on September 2nd, 1962, and subsequently. It is respectfully submitted that the disqualification order of September 2nd, 1962, was based and, in fact, could only be based upon the evidence set forth in the applicant's Statutory Declaration of August 30th, 1962, and that the evid-

ence set forth in the said Statutory Declaration was not a proper basis upon which the insurance officer and the board of referees could find the applicant was unavailable for work on September 2 and subsequently.

It is respectfully submitted that it was not unreasonable for the applicant to hope to gain employment at \$280 per month at that time and that if officers of the [UIC] thought that her request for such a salary was unreasonable, *they should have communicated that fact to her in the clearest terms before disqualifying her.*

It is obvious from all the evidence in this case that the insurance officer used the applicant's Declaration, and especially her statements therein regarding the wage rate she was seeking, as an excuse for disqualifying her. In this regard it is to be emphasized that the applicant was not warned or cautioned at the time she made this Declaration that she would be bound by it and that it would be used as a basis for disqualification in the event that she did not reduce her wage rate demand below the \$280 figure set forth therein.

The applicant reiterates that serious issues are raised by the unusual nature of the evidence upon which the insurance officer and the learned members of the board have founded their decisions and, accordingly, respectfully applies for leave to appeal the decision of the board of referees herein . . .

Leave to appeal to the Umpire was granted to the claimant by the chairman of the board of referees, who said:

I cannot agree with the submissions in the claimant's application for leave to appeal that question the right of the board of referees to attach weight to statements made by the claimant at the hearing. . . However, this claimant is only one of several claimants who have appeared before this chairman in recent months, complaining of the manner in which they were questioned on the wages which they were willing to accept . . .

Several such persons have indicated that there is no possible way for them to know what the prevailing rates for positions are in this area and, accordingly, to know whether their own suggested wage rate is out of line with the current prevailing wage rates in that area. When asked what wages they were willing to accept they stated that it was only natural to request a wage approximately their former salary.

Accordingly, I am consenting to the claimant's application for leave to appeal to the Umpire, since I feel that a principle is involved here which requires clarification and comment through the medium of an Umpire's decision . . . it would [also] be appreciated if the Umpire would comment on or answer the following questions:

1. Should a claimant be advised what the prevailing rates are in an area before being asked what salary he or she is willing to accept?
2. Was this claimant prejudiced in the making of her claim in not being advised of the prevailing rate before being asked to state her required wage?

The [claimant's] law firm, in a document dated July 18, 1963, submitted a statement of observations for consideration by the

Umpire and a request for an oral hearing of the appeal. The document reads:

The appellant . . . requests that a hearing be granted for this appeal so that she may be given the opportunity to present *viva voce* evidence with respect to the matter under appeal.

The appellant points out that a formal application for leave to appeal from the decision of the board of referees herein was submitted on her behalf on November 2nd, 1962, and . . . presented the facts in issue and the grounds of appeal.

The appellant concedes that a formal appeal was not submitted in exact accordance with Section 75 of the Unemployment Insurance Act, but would point out that the application for leave to appeal contained all of the basic facts and information upon which the appeal would be argued. In this regard the appellant adopts the points raised by [the] chairman of the board of referees in his consent order under which he approves the appellant's application for leave to appeal to the Umpire.

The appellant respectfully submits that there are serious substantive issues raised in the instant case which should be adjudicated upon by the Umpire, and respectfully requests that a formal hearing be granted so that *viva voce* evidence may be given by the appellant as to the issues under appeal. . .

The case was heard in Z— on September 26, 1963. The claimant, who was present, was represented by her solicitor, and the Commission by one of its solicitors.

Considerations and Conclusions: The only ground on which the claimant was disqualified by the insurance officer is that she had failed to prove that she was available for work from September 2, 1962, in that she had unduly restricted the wages she was willing to accept when she stated on August 30, 1962, "I am not willing to work for less than \$280 a month."

In her appeal to a board of referees on September 25, 1962, the claimant contended, in effect, that her statement had not been accurately transcribed by the interviewing officer and that she had been prejudiced in not being informed of the prevailing rates of pay before being asked to state what salary she was willing to accept.

In a decision dated June 14, 1963, namely, CUB 2178, which dealt with a similar case, the Umpire decided to allow the appeal because the terms of the questions which had been put to a claimant had not been recorded in the declaration she had signed, and also because no information appeared to have been given to that claimant regarding the prevailing rates of pay and the law applicable in her case before being questioned by the interviewing officer.

The reason behind the aforementioned decision, and this remark seems to apply in the instant case, is that a claimant, as a general rule, does not know and is not

(Continued on page 23)

WAGE SCHEDULES

Wage Schedules Prepared and Contracts Awarded during November

Works of Construction, Remodelling, Repair or Demolition

During November the Department of Labour prepared 183 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, a total of 140 contracts in these categories was awarded. Particulars of these contracts appear below.

In addition, 195 contracts not listed in this report and which contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, Defence Construction (1951) Limited and the Departments of Defence Production, Northern Affairs and National Resources, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in November for the manufacture of supplies and equipment were as follows:

<i>Department</i>	<i>No. of Contracts</i>	<i>Aggregate Amount</i>
Defence Construction (1951) Limited	1	\$21,000.00
Defence Production	161	979,410.00
Post Office	4	51,437.50
Public Works	1	9,346.00
Transport	4	12,581.80

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour showing the applicable wage deemed to be required in the execution of the work. These wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classification to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(b) The working hours shall be those fixed by the custom of the trade in the district, or if there be no such custom, then they shall be fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Wage Claims Received and Payments Made during November

During November the sum of \$1,623.51 was collected from five contractors for wage arrears due their employees as a result of the failure of the contractors, or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 35 workers concerned.

Contracts Containing Fair Wage Schedules Awarded in November

DEPARTMENT OF AGRICULTURE

Near Elbow Sask: Emil Anderson Construction Co Ltd, Square M Construction Ltd & Coleman Collieries Ltd, construction of Qu'Appelle River Dam, SSR Project (Contract 36). *Near Lethbridge Alta:* Burns & Dutton Construction (1962) Ltd, construction of main canal, Waterton to Belly River.

ATOMIC ENERGY OF CANADA LIMITED

Chalk River Ont: Franki of Canada Ltd, supply & installation of Franki caissons for Bldg No 137.

CENTRAL MORTGAGE AND HOUSING CORPORATION

Halifax N S: Construction Equipment Co Ltd, installation of fencing, Mulgrave Park. *Moncton N B:* Community Enterprises Ltd, construction, site work & landscaping of 103 dwelling units (FP 1/63). *Saint John N B:* Cameron Contracting Ltd, construction, site work & landscaping of 94 dwelling units (FP 5/63). *Montreal Que:* The Tower Co (1961) Ltd, construction of retaining walls, curbs, type & chain link fencing & paving, Le Domaine Apartment Project; D Ferruccio & T Ricci, snow removal, Benny Farm; Ernest Rollin Co Ltd, snow removal Cloverdale Park; Mucci & D Trevisonno, snow removal, Le Domaine; Ugo Bachetti, snow removal, Park Royal. *Pierrefonds Que:* Andre Prefrontaine, repairs to MIF houses. *Ville St Laurent Que:* Sestock Construction Ltd, interior renovations, Park Royal Apartment Project. *Ottawa Ont:* Comet Electric, parking lot improvements & installation of underground electric car heater system for Strathcona Heights housing project.

In addition, this Corporation awarded 15 contracts containing the General Fair Wages Clause.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

Bruce Indian Agency Ont: Lexington Contracting Ltd, construction of school, Cape Croker. *Portage la Prairie Indian Agency Man:* Relf Plumbing & Heating Ltd, installation of dishwashing facilities, Brandon IRS. *Carlton Indian Agency Sask:* Dashchuk Construction Ltd, installation of diesel-electric plant, outside power distribution, wiring & heating of school-teacherage & separate teacherage, Montreal Lake IDS.

DEFENCE CONSTRUCTION (1951) LIMITED

Cornwallis N S: Fundy Construction Co Ltd, renovations to bldg No 7, HMCS Cornwallis; Rodney Contractors Ltd, construction of earth fill dam & mains, etc, HMCS Cornwallis; Roy V Germain Ltd, renewal of lighting fixtures, bldg No 10, HMCS Cornwallis. *Shearwater N S:* Diamond Construction (1961) Ltd, installation of storm sewer system, RCN Air Station. *Renous N B:* Mace Ltd, additions to electrical power distribution system, RCN Ammunition Depot. *St Hubert Que:* Great Contractors Ltd, supply & installation of industrial space heaters, Hangar 12, RCAF Station. *Valcartier Que:* Cardinal Painting & Decorating Co Ltd, interior painting of 199 PMQs, Camp. *Centralia Ont:* International Painting & Decorating Co, interior painting of 91 PMQs. *Kingston Ont:* E S Fox Plumbing & Heating Ltd, replacement of boiler & conversion to gas heating, bldg

No 12. *London Ont*: Peerless Enterprises, Division of Tectum Ltd, re-roofing of warehouses Nos 2 & 3, No 27 COD. *Shirley Bay Ont*: Universal Electric, Division of Univex Electrical Construction & Engineering Ltd, installation of roadway lighting, DRB. *Trenton Ont*: Walker Painting & Decorating Co Ltd, interior painting of 181 PMQs, Middleton Park; Walter F MacCormack Ltd, interior painting of eight bldgs, No 6 RD. *Fort Churchill Man*: F Fentiman & Sons Ltd, replacement of overhead doors, Bldg D-13, RCASC & Pan-American Vehicle Garage. *Winnipeg Man*: Hay Decorating Co Ltd, interior painting of 109 PMQs, Fort Osborne Barracks. *Shilo Man*: Hay Decorating Co Ltd, interior painting of 102 PMQs, Camp. *Edmonton Alta*: Ernest Painting & Decorating Ltd, interior painting of 120 PMQs, Griesbach Barracks. *Sarcee Alta*: Park & Derochie Decorating Co Ltd, interior painting of 10 bldgs, Camp. *Aldergrove B C*: A B Longstaff & Son Ltd, land clearing, HMCS *Aldergrove*. *Comox B C*: Beaver Construction Co Ltd, construction of runway & taxiway & overlay of runway, taxiway & apron, RCAF Station; H B Contracting Ltd, installation of water main, HMCS *Quadra*. *Masset B C*: Northern Engine & Equipment (BC) Ltd, installation of diesel electric set, bldg No 18.

In addition, Defence Construction (1951) Limited awarded one contract containing the General Fair Wages Clause.

DEPARTMENT OF DEFENCE PRODUCTION

Summerside P E I: Leonard Roofers & Metal Workers Ltd, roof repairs, RCAF Station. *Greenwood N S*: G W Sampson Construction Co Ltd, interior painting of 26 PMQs, RCAF Station. *Halifax N S*: Dartmouth Asphalt Co Ltd, asphalt paving, Shannon Park married quarters; Harrison Bros, interior painting, bldg No 61, Windsor Park; Standard Paving Maritime Ltd, paving repairs, HMCS *Stadacona*. *Bagotville Que*: Les Entreprises d'Embellissement du Saguenay, alterations to floors in various hangars, RCAF Station. *Montreal Que*: Jos Dufour, interior painting of workshop & offices, 405 Chabanel St. *Quebec Que*: Parent & Fils Enr, interior painting, Grand Allee Armoury. *Valcartier Que*: Construction Orleans Inc, paving of various areas, CARDE. *Clinton Ont*: W MacDonald Electric Co Ltd, installation of fixed fire detection & alarm system in Bldgs 6 & 7, RCAF Station. *Downsview Ont*: Dominion Steel & Coal Corp Ltd, fencing of Keele Street boundary, RCAF Station. *Guelph Ont*: George Keen Construction Ltd, alterations to heating & stores accommodation, Armoury. *Kingston Ont*: Canada Shipbuilding & Engs Ltd, repairs to coal bunkers, Barriefield Camp. *Oakville Ont*: Toronto Building Cleaning & Tuck-pointing Ltd, exterior repairs to Bldgs 1A-B-C, Ortona Barracks. *Petawawa Ont*: Rondeau Electric Ltd, installation of warning lights on heating systems, Camp. *Trenton Ont*: Wilson Concrete Products Ltd, supply & installation of prestressed concrete slabs, bldg No 28, RCAF Station. *Calgary Alta*: Borger Construction Ltd, installation of water main, Currie Barracks. *Cold Lake Alta*: "Tony" Construction Co, alteration & conversion of bldg into dental clinic, RCAF Station. *Boundary Bay B C*: M Sleightholme & Co Ltd, interior painting, Vancouver Wireless Station.

In addition, this Department awarded 58 contracts containing the General Fair Wages Clause.

NATIONAL HARBOURS BOARD

Montreal Que: Hurtsteel Products Ltd, construction of dust bins for shipping galleries, elevators Nos 1, 2, 3 & 5. *Quebec Que*: Michaud & Simard Inc, paving of roadways. *Vancouver B C*: Grinnell Co of Canada Ltd, installation of sprinkler system, shed No 1, Lapointe Pier; Vancouver Pile Driving & Contracting Co Ltd, construction of pile dyke, Mosquito Creek Outfall.

DEPARTMENT OF NORTHERN AFFAIRS AND NATIONAL RESOURCES

Kitchener, Iona & Amherstburg Ont: Litwiller Bros, removal of trees, Woodside National Historic Park, Southwold Earthworks National Historic Site & Fort Malden National Historic Park. *Prince Albert National Park Sask*: North West Electric Co Ltd, construction of underground electrical distribution system for new serviced campground. *Jasper National Park, Alta*: Whissell Enterprises Ltd, construction of water supply main, septic tank & outfall sewer, Whistler Mountain Campground. *Kootenay National Park B C*: Poole Construction Co Ltd, construction of toilet bldg, Marble Canyon & workshop bldg for warden's station, Kootenay Crossing.

In addition, this Department awarded one contract containing the General Fair Wages Clause.

POST OFFICE DEPARTMENT

This Department awarded 53 contracts containing the General Fair Wages Clause.

DEPARTMENT OF PUBLIC WORKS

Cartwright (Labr) Nfld: J V Dawe Ltd, installation of underground electrical service cable for RCMP detachment quarters. *Jerseyside Nfld:* H Drover & Co Ltd, breastwork repairs. *Lower Bacon Cove Nfld:* Benson Builders Ltd, wharf reconstruction. *St Brides Nfld:* Benson Builders Ltd, breakwater repairs. *St John's Nfld:* Benson Builders Ltd, alterations & additions for Department of Forestry, Sir Humphrey Gilbert Bldg. *St Lawrence Nfld:* William A Trask Ltd, construction of retaining walls. *Twillingate Nfld:* W J Goulding Ltd, installation of water treatment equipment in RCMP detachment bldg. *Carleton Village N S:* Shelburne Contracting Ltd, wharf repairs. *Church Point N S:* Bernard & Gerard Lombard, wharf repairs. *Lower Sandy Point N S:* Shelburne Contracting Ltd, breakwater repairs. *Murphy's Pond N S:* Albert MacDonald, repairs to harbour facilities. *Skinner's Cove N S:* Joseph Almon, harbour improvements. *Yarmouth N S:* Marsh Plumbing & Heating Ltd, installation of water line. *Arvida Que:* Girard & Freres, repairs to public bldg. *Chambly Que:* Electra Construction Ltd, construction of post office bldg. *Cowansville Que:* Argo Construction (1961) Ltd, construction of various bldgs for Medium Security Institution, phase No 2. *Lac St Amant Que:* P E Bellehumeur, wharf construction. *Lanoraie Que:* Turnbull Construction Inc, construction of protection works (project No 2). *Longueuil Que:* Lemieux & Frere Inc, addition & alterations to post office. *Matane Que:* Fernand McMullen, breakwater repairs (east pier); Ouellet Electric, installation of lighting system for town wharf. *Montreal Que:* Prieur Enterprises Inc, addition, alterations & new conveyor installation, Postal Station "E", St Laurent St. *Natashquan Que:* Pierre Paul Gauthier, construction of two classrooms & teachers quarters addition to IDS, Seven Islands Agency. *Paspebiac Que:* Jacques Normand, installation of wharf lighting system. *Perkins Landing Que:* Turnbull Construction Inc, wharf repairs. *Pointe au Pic Que:* Claude Belley, construction of concrete wall. *Quebec Que:* Louis Philippe Racine, snow removal, federal public bldgs. *Ste Agathe des Monts Que:* Sylvio Valiquette, interior alterations, federal bldg. *St Jean Que:* Roger Gregoire, interior painting of federal bldg. *Ste Marthe Que:* Theodose Pelletier, wharf repairs. *Haliburton Ont:* Bailey Construction Co Ltd, tourist wharf extension. *Joyceville Ont:* Ruliff Grass Construction Co Ltd, construction of water filtration plant & pumphouse, Joyceville Institution. *Kemptville Ont:* E A Crain Construction Ltd, installation of sewage disposal unit & subsoil drainage system, WSAC Bldg. *McKeller Ont:* Ruliff Grass Construction Co Ltd, construction of wharf. *Ottawa Ont:* A Lanctot, construction of loading zone, Daly Bldg; O'Leary's (1956) Ltd, site development, Confederation Heights. *Sarnia Ont:* Fowler Masonry Repair Service, interior & exterior repairs to federal bldg. *Skeleton Bay (Lake Rousseau) Ont:* Alfred Haigh, construction of wharf. *Val Caron Ont:* Fielding Construction (Sudbury) Ltd, construction of post office bldg. *Wolseley Bay Ont:* Albert Haigh, wharf repairs & extension. *Lake Lenore Sask:* C W Hill Construction Ltd, construction of post office bldg. *Langham Sask:* J G J Wolfe Construction Ltd, construction of post office bldg. *Regina Sask:* Beattie Ramsay Construction Co Ltd, construction of site roads, water distribution system & sewage disposal facilities, New Experimental Farm. *Rocanville Sask:* Logan Stevens Construction Ltd, construction of post office bldg. *Calgary Alta:* Befus Construction Ltd, alterations to areaway retaining wall, Traders Bldg. *Cardston Alta:* Weston Bros Ltd, repairs to St Mary's school gymnasium. *Edmonton Alta:* Parkins Construction Ltd, foundation & subfloor repairs, bldg No 19, Charles Camsell Hospital. *Castlegar B C:* Boundary Electric (Castlegar) Ltd, installation of ventilation system, federal bldg. *Chilliwack B C:* West Coast Painting Co Ltd, general repairs & repainting, federal bldg. *Deep Bay B C:* Pacific Pile-driving Co Ltd, installation of float booster logs. *Kamloops B C:* Smith Bros & Wilson Ltd, construction of parking site, 359 St Paul St. *Lund B C:* Westminster Boiler & Tank Co Ltd, breakwater replacement. *Vancouver B C:* Kelsey Construction Ltd, alterations to 6th floor, Begg Bldg; Grinnell Co of Canada Ltd, alterations to bldg for fire protection installation, RCMP Fairmont Barracks. *Westview B C:* McKenzie Barge & Derrick Co Ltd, harbour improvements (breakwater, dredging & fill). *Hay River N W T:* Mix the Mover, moving six federal housing units.

In addition, this Department awarded 49 contracts containing the General Fair Wages Clause.

THE ST LAWRENCE SEAWAY AUTHORITY

Near St Lambert & Beauharnois Que: Frost Steel & Wire Co (Quebec) Ltd, erection of chain link fencing, St Lambert, Caughnawaga, St Louis & Valleyfield Bridges. *Merritton & Port Colborne Ont:* Sheaffer-Townsend Ltd, reconditioning of balance chains, Bridges 5 & 20, Welland Canal. *St Catharines Ont:* Blenkhorn & Sawle Ltd, supply & installation of water line, Lock 3, Welland Canal.

DEPARTMENT OF TRANSPORT

Ramea Nfld: Newhook & Morgan Engineering Ltd, construction of bachelors' quarters, combined generator & radio beacon bldg & installation of fencing. *Halifax N S:* Diamond Construction (1961) Co Ltd, installation of cable ducts under runway 09-24 & taxiway, International Airport. *Ancienne Lorette Que:* La Cie de Construction des Blvds du Quebec, revisions to entrance road & car parking area, Que Airport. *Matane Que:* La Compagnie D'Equiptement et de Construction de Rimouski Ltee, extension of runway 07-25. *Fort William Ont:* Sillman Co Ltd, alterations & extension to air terminal bldg, construction of operations bldg & related work, Lakehead Airport. *Malton Ont:* Conniston Construction Co Ltd, site services (Phase 3), Toronto International Airport. *Near Rosedale Ont:* Risi Stone Co Ltd, restoration of concrete at lock No 35, Trent Canal. *Thompson Man:* Poole Engineering (1958) Ltd, construction of paved runway, Airport. *Edmonton Alta:* Hillas Electric Co Ltd, installation of power to car park attendants' bldg, ticket machines & related work, International Airport. *Empress Alta:* D L Guthrie & A Dyberg, construction of dwelling & related work. *Abbotsford B C:* Bill Toews & Sons, clearing of approach to runway 24. *Amphitrite Point B C:* Quinney & Fuller Construction Ltd, construction of dwelling, Lightstation. *Kamloops B C:* Interior Contracting Co Ltd, paving of maintenance garage apron & access road & construction of car park & entrance road for new air terminal bldg. *Scarlett Point B C:* Canwest Construction Co Ltd, construction of dwelling & tower, Lightstation. *Watson Lake Y T:* Nadon Sheet Metal Works Ltd, replacement of furnaces in five dwellings & related work.

In addition, this Department awarded 18 contracts containing the General Fair Wages Clause.

Recent Regulations

(Continued from page 53)

to 19 units, but did not provide for a weekly rest for resident janitors in smaller buildings.

Effective Dates. The order for the machinist, moulder, refrigeration and sheet-metal trades (B.C. Reg. 179/63) went into force on December 9, 1963, and the order for elevator operators and starters (B.C. Reg. 190/63) on December 16. The revised order for janitors and resident janitors (B.C. Reg. 196/63) went into force on January 5, 1964.

Order Rescinded. A 1947 order that set a minimum wage of \$20 a week for the personal service occupation was rescinded by B.C. Reg. 191/63, gazetted November 14.

New Brunswick Trade Schools Act

In New Brunswick, regulations under the Trade Schools Act governing hairdressing and barbering schools approved by O.C. 63-823 were gazetted on November 20.

Before a hairdressing or barbering school may be registered as required by the Act, the operator must furnish the Minister of Education and Municipal Affairs with a

copy of the theory examination and an outline of the practical examination acceptable to the Minister.

Every trade school offering a hairdressing course must give a minimum of 1,000 hours of instruction, which must include at least 150 hours of theory instruction.

A barbering school is required to give at least 800 hours of instruction, which must include a minimum of 120 hours of theory.

The operator of a hairdressing or barbering school may not permit an instructor to instruct more than 15 students at the same time.

Every hairdressing and barbering school must supply the trainee with the necessary tools but provision for theft or unnecessary damage may be made in the contract signed by the student.

Quebec Workmen's Compensation Act

In Quebec, the Department of Tourism, Game and Fish was added to Schedule 2 of the Workmen's Compensation Act by O.C. 1938, gazetted November 16. The Schedule lists the industries in which the employer is individually liable to pay compensation.

PRICE INDEX

Consumer Price Index, December 1963

The consumer price index (1949=100) rose to 134.2 in December, up 0.1 per cent from the November index of 134.0 and 1.7 per cent above the December 1962 index of 131.9.*

Between November and December, increases occurred for five of the seven main components. The Transportation component was lower; tobacco and alcohol showed no change.

The food index rose to 131.4 from 130.8, an increase of 0.5 per cent. Prices were higher for most dairy products, fats, bakery and cereal products, fresh and canned vegetables, poultry and a number of specific items, including jams, coffee, soft drinks and apples. Prices were considerably lower for eggs, oranges, bananas and sugar, and more moderately lower for most meats.

The housing index edged higher to 137.0, up 0.1 per cent from 136.9, as a result of increases in the shelter component. Within shelter, the rent index was unchanged but the home-ownership index was higher. The household operation component was unchanged as scattered price increases for some items of furniture, floor coverings, textiles, utensils and equipment, and household supplies were not sufficient to move the index.

The clothing index increased 0.2 per cent to 118.9 from 118.7. Indexes for men's wear, footwear and piece goods increased while indexes for women's wear, children's wear and clothing services moved down.

The transportation index fell 0.4 per cent to 140.6 from 141.2, reflecting a decrease in the index of automobile operation. Initial prices for the 1964 models of new passenger cars were below the year-end prices of 1963 models. Prices for gasoline and chassis lubrication were slightly lower; for motor oil, somewhat higher.

The health and personal care index moved to 165.4 from 164.8, an increase of 0.4 per cent, as a result of higher prices for men's haircuts.

The recreation and reading index rose 0.3 per cent to 151.4 from 151.0. In the recreation component, prices were higher for toys. A newspaper price increase in Montreal moved the reading component.

The tobacco and alcohol index was unchanged at 118.5.

Group indexes in December 1962 were: food 127.8, housing 135.7, clothing 115.8,

transportation 140.2, health and personal care 159.8, recreation and reading 148.2, and tobacco and alcohol 117.8.

City Consumer Price Indexes, November '63

Consumer price indexes rose between October and November in seven of the ten regional cities.* Increases ranged from 0.1 per cent in Toronto and Saskatoon-Regina to 0.5 per cent in Winnipeg. The Ottawa index declined 0.1 per cent and the Edmonton-Calgary and Vancouver indexes were unchanged.

Higher food indexes were common in six cities, the greatest increase being 1.0 per cent in Winnipeg. Two cities had lower food indexes; two were unchanged. Housing indexes were higher in four cities, lower in one, and unchanged in five. Higher clothing prices were reported in six cities, lower in one, and unchanged in three. In three cities increases were registered in the transportation index; in all others it remained unchanged. The health and personal care index moved up in eight cities and down in one. Indexes for recreation and reading were higher in all ten cities. Tobacco and alcohol indexes rose in one city and fell in three.

Regional consumer price index point changes between October and November were: Winnipeg +0.6 to 131.2; St. John's +0.5 to 120.8†; Montreal +0.5 to 133.9; Saint John +0.3 to 133.3; Halifax +0.2 to 131.4; Toronto +0.2 to 135.2; Saskatoon-Regina +0.1 to 128.7; Ottawa -0.2 to 134.5. Edmonton-Calgary and Vancouver remained unchanged at 127.7 and 131.8 respectively.

Wholesale Price Index, November 1963

The general wholesale index (1935-39=100) rose 0.4 per cent in November, to 247.0 from 245.9. It was 1.9 per cent above the index of November 1962.

Six major group indexes increased, one declined and one remained unchanged.

The vegetable products group index advanced to 237.6, or 1.9 per cent from the October index of 233.2. The non-ferrous metals products group index rose 0.6 per cent to 199.7 from 198.6 a month earlier; the wood products group index of 326.4 was 0.5 per cent above the October index of 324.8; and the textile products group index moved up 0.4 per cent to 249.7 from 248.8. The indexes of the non-metallic minerals products group and the chemical products group both rose 0.3 per cent to 191.0 from 190.5, and to 188.8 from 188.2, respectively.

*See Table F-2, p. 87.

†On base June 1951=100.

* See Table F-1, page 87.

The animal products group index declined to 250.3 from 252.7, or 0.9 per cent.

The iron products group index was unchanged at 254.4.

The index of Canadian farm product prices at terminal markets (1935-39=100) advanced 0.5 per cent, from 214.7 to 215.7, in the three-week period ended November 22. The animal products index rose 0.9 per cent from 265.3 to 267.8, and the field products index eased 0.2 per cent from 164.1 to 163.7.

The residential building material price index, on the base 1935-39=100, advanced 0.4 per cent from 313.4 to 314.7 between October and November, and on the 1949=100 base, from 137.5 to 138.0. The non-residential index (1949=100) rose 0.2 per cent from 136.8 to 137.1.

U.S. Consumer Price Index, November '63

The United States consumer price index (1957-59=100) rose by 0.2 per cent, from 107.2 to 107.4, between mid-October and mid-November. The increase resulted largely from unseasonal rises in food prices. Prices for 1963 as a whole are expected to reach a five-year high.

The November 1962 index was 106.0.

British Index of Retail Prices, October 1963

The British index of retail prices (Jan. 16, 1962=100) rose from 103.3 to 103.7 between mid-September and mid-October. The month's rise was attributed to increases in the price of sugar, potatoes and milk.

The food index was up from 103.0 to 104.2.

The index for October 1962 was 101.4.

Publications Recently Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the *Labour Gazette*.

List No. 183

Accident Prevention

1. INTERNATIONAL LABOUR OFFICE. *Manual of Industrial Radiation Protection. Part 1. Convention and Recommendation concerning the Protection of Workers against Ionizing Radiations, adopted by the International Labour Conference at its 44th Session, Geneva, June 1960.* Geneva, 1963. Pp. 24.

2. U.S. BUREAU OF LABOR STANDARDS. *Static Electricity.* Washington, GPO, 1963. Pp. 20.

How to control the hazards of static electricity.

3. U.S. BUREAU OF LABOR STANDARDS. *Using Injury Statistics.* Washington, GPO, 1963. Pp. 18.

"... Discusses the latitude and limitations of injury statistics and suggests how such statistics can be utilized as a means for establishing an injury prevention program."

Annual Reports

4. CANADA. BUREAU OF STATISTICS. *Annual Report for the Fiscal Year ended March 31, 1963.* Ottawa, Queen's Printer, 1963. Pp. 46.

5. CANADA. DEPARTMENT OF LABOUR. *Annual Report for the Fiscal Year ended March 31, 1963.* Ottawa, Queen's Printer, 1963. Pp. 92.

6. CANADA. DEPARTMENT OF LABOUR. ACCIDENT PREVENTION AND COMPENSATION BRANCH. *Eleventh Annual Statistical Report of Claims for Work Injuries of Federal Public Service Employees for the Fiscal Year ending March 31, 1963.* Ottawa, 1963. Pp. 15.

7. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Annual Earnings in the Scientific and Technical Professions, 1962; a Preliminary Report.* Ottawa, Queen's Printer, 1963. Pp. 8.

French text inverted. French title is, *Gains annuels dans les professions scientifiques et techniques, en 1962.*

8. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Wage Rates, Salaries and Hours of Labour. Annual Report No. 45. October 1962.* Taux de salaires, traitements et heures de travail. Rapport annuel no. 45. Octobre 1962. Ottawa, Queen's Printer, 1962. Pp. 400. Text in English and French.

9. CANADA. DEPARTMENT OF LABOUR. TECHNICAL AND VOCATIONAL TRAINING BRANCH. *Report of the Director of Technical and Vocational Training for the Fiscal Year ended March 31, 1962*. Ottawa, Queen's Printer, 1963. Pp. 23.

Reprinted from the Annual Report of the Department of Labour for the same period.

10. CANADA. NATIONAL PRODUCTIVITY COUNCIL. *Second Annual Report, 1962-1963*. Ottawa, 1963. Pp. 91.

11. CANADIAN AUTOMOBILE CHAMBER OF COMMERCE. *Facts and Figures of the Automotive Industry, 1963 Edition*. Toronto, 1963. Pp. 44.

12. GREAT BRITAIN. FACTORY INSPECTORATE. *Annual Report of the Chief Inspector of Factories, 1962*. London, HMSO, 1963. Pp. 124.

13. GREAT BRITAIN. FACTORY INSPECTORATE. *Annual Report of the Chief Inspector of Factories on Industrial Health, 1962*. London, HMSO, 1963. Pp. 58.

14. NEW ZEALAND. DEPARTMENT OF LABOUR. *Report for the Year ended 31 March 1963*. Wellington, Government Printer, 1963. Pp. 77.

15. UNITED NATIONS. ECONOMIC COMMISSION FOR EUROPE. *The Situation and Future Prospects of Europe's Electric Power Supply Industry in 1961/62*. Geneva, 1963. Pp. 87.

16. U.S. BUREAU OF LABOR STANDARDS. *Annual Digest of State and Federal Labour Legislation for the Years 1961 and 1962*. Washington, GPO, 1963. Pp. 249.

Automation

17. CONFERENCE ON AUTOMATION AND PERSONNEL ADMINISTRATION. *Proceedings, 1st-2nd, 1962-1963*. Washington, Society for Personnel Administration, 1962-1963. 2 volumes.

These two conferences deal with the part played by automation in personnel administration.

18. INDUSTRIAL RELATIONS RESEARCH ASSOCIATION. *Adjusting to Technological Change*. Editors: Gerald G. Somers [and others] New York, Harper, 1963. Pp. 230.

Contents: Gains and Costs of Technical Change, by Walter Buckingham. Organized Labor and Technical Change: a Backward Look, by Philip Taft. The Impact of Technology on Labor-Management Relations, by Jack Barbash. Cooperative Approaches to Problems of Technological Change, by Charles C. Killingsworth. The Interplant Transfer of Displaced Employees, by Arnold

R. Weber. The Armour Experience: A Case Study in Plant Shutdown. Technological Change and the Community, by Sar A. Levitan and Harold L. Sheppard. Policy Implications of Technological Change in Western Europe, by Bertil Olsson.

19. SYMPOSIUM ON THE EDUCATIONAL IMPLICATIONS OF AUTOMATION, WASHINGTON, D.C., 1962. *Automation and the Challenge of Education; Proceedings of a Symposium, held in Washington, D.C.* Sponsored by the Project on the Educational Implications of Automation, National Education Association. Edited by Luther H. Evans and George E. Arnstein. Washington, National Education Association, 1962. Pp. 190.

The educational implications of automation were examined by an educational policy planner, a curriculum specialist, a social psychologist, a business executive, a trade union official, an economist, a political scientist, an educational administrator, and a sociologist.

Business

20. EUROPEAN PRODUCTIVITY AGENCY. *Cost Reduction in Industry; an Integrated Approach to the Practical Application of Progressive Management Techniques for the Control and Reduction of Cost*. Paris, 1961. Pp. 170.

Contains basic information about cost reduction and selected factual case studies illustrating practical applications.

21. NATIONAL CONFERENCE ON SMALL BUSINESS, WASHINGTON, D.C., 1961. *Problems and Opportunities confronting Negroes in the Field of Business; Report*. Chairman: Charles O. Diggs, Jr. Editor: H. Taylor Fitzhugh. [Washington, GPO, 1962, i.e. 1963] Pp. 102.

"Sponsored by an independent committee composed mainly of Negroes engaged in business and related activities in Government and education and some national organizations."

22. U.S. SMALL BUSINESS ADMINISTRATION. *Starting and managing a Small Motel*, by Harold Whittington. Washington, GPO, 1963. Pp. 70.

Contents: What is it like in the Motel Business? Things to decide before You invest in a Motel. Financial Arrangements. Getting ready to open. Good Hostmanship. Keeping Your Records Straight. Motel Advertising and Promotion. Motel Housekeeping. Looking out for Your Future. For Further Information.

Civil Service

23. HOLLAND, ANN (UNRUH). *Unions are here to stay; a Guide for Employee-Management Relations in the Federal Service*. Washington, Society for Personnel Administration, 1962. Pp. 41.

A brief outline of the report of the President's Task Force on Employee-Management

Relations in the Federal Service and of two Presidential Executive Orders dealing with Employee-Management Relations.

24. SYMPOSIUM [ON] ACHIEVING EXCELLENCE IN PUBLIC SERVICE, PHILADELPHIA, 1963. *Achieving Excellence in Public Service; a Symposium, sponsored by the American Academy of Political and Social Science and the American Society for Public Administration*. Edited by Stephen B. Sweeney and James O. Charlesworth. [Lancaster, Pa.] American Academy of Political and Social Science, 1963. Pp. 209.

The Symposium dealt with public administration needs in the U.S. and with the quality of public administration personnel.

Economic Conditions

25. EUROPEAN ECONOMIC COMMUNITY. COMMISSION. *The First Stage of the Common Market; Report on the Execution of the Treaty (January 1958-January 1962)*. Brussels, 1962. Pp. 115 [5]

26. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Fiscal Policy, Cycles and Growth*, by Michael E. Levy. New York, 1963. Pp. 141.

Partial Contents: Fiscal Stagnation: Evidence and Proposed Remedies. Government Saving and Full Employment: a Structural Analysis. Budget Deficits and Growth: European Experience. Potential GNP: Concept and Measurement. The Full-Employment Budget Surplus: Concept and Measurement Problems. The National-Income-Accounts Budget as a Tool for Fiscal Analysis.

27. ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT. *Economic Surveys: Ireland, March 1963*. Paris, 1963. Pp. 28.

28. UNITED NATIONS. SECRETARIAT. *International Flow of Long-term Capital and Official Donations, 1959-1961*. New York, United Nations, Dept. of Economic and Social Affairs, 1963. Pp. 66.

"Examines the flow of funds from the developed countries, the flow of funds to the under-developed countries and the international economic assistance of the centrally planned economies during the years 1959-1961." Also reviews the international flow of private capital during 1959-1961.

Education, Vocational

29. LEVITAN, SAR A. *Vocational Education and Federal Policy (Administration Bills H.R. 3000 and S. 580, Congressman Carl D. Perkins H.R. 4955, Senator J. Caleb Boggs S. 1222)* Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1963. Pp. 30.

A brief look at existing U.S. federal programs in vocational education and current proposals for the extension of vocational training.

30. ONTARIO. LEGISLATIVE ASSEMBLY. SELECT COMMITTEE ON MANPOWER TRAINING. *Report*. February, 1963. Toronto, 1963. Pp. 126.

The Select Committee on Manpower Training of the Ontario Legislature was set up to look into the Apprenticeship Act, all aspects of the apprenticeship system, the training, retraining and upgrading of skills of workers, and the role to be played by government, industry and labour in the field of training.

31. SMITH, HAROLD T. *Education and Training for the World of Work; a Vocational Education Program for the State of Michigan. With Solicited Chapters on Programs in Other States*. Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1963. Pp. 165.

Examines vocational education in Michigan and suggests what institutions, what administrative organization, and what financial structure are needed to meet the needs of vocational education in Michigan. There are also chapters dealing with vocational education in 10 other States.

Employees—Training

32. U.S. BUREAU OF LABOR STATISTICS. *Industrial Retraining Programs for Technological Change; a Study of the Performance of Older Workers*. Washington, GPO, 1963. Pp. 34.

This report is based on a study of four companies in different industries where technological changes were introduced, requiring the retraining of employees. It shows something of the capacity of older workers in industry to adopt to technological change.

33. U.S. OFFICE OF MANPOWER, AUTOMATION AND TRAINING. *Young Workers: Their Special Training Needs*. Washington, GPO, 1963. Pp. 19.

"... Reviews the training needs and the status of training for young men and women between the ages of 14 and 19 years who will be entering the labor market with a high school education or less. Particular emphasis is placed on youths who will have special problems in finding employment because of their race, physical and mental handicaps, or for other reasons."

Employment Management

34. BUREAU OF NATIONAL AFFAIRS, WASHINGTON, D.C. *Employee Selection Procedures*. Washington, 1963. Pp. 13.

This survey is based on information supplied by 170 personnel and industrial relations executives. The procedures for hiring that are considered are the application form, pre-employment testing, pre-employment physical examinations, and pre-employment interviewing.

35. BUREAU OF NATIONAL AFFAIRS, WASHINGTON, D.C. *Practices for White-Collar Employees*. Washington, 1963. Pp. 13.

An examination of the present state of fringe benefits and hours of work. Information for this study was based on replies from 175 personnel and industrial relations executives.

36. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Vacations with Pay, 1951-1961; an Examination of Vacation Practices in Canadian Industries*. Ottawa, Queen's Printer, 1963. Pp. 32.

Provides information about the development of paid-vacation practices in Canadian manufacturing industries during the period 1951-1961 and about vacation practices and patterns. Also tells about the length of the vacation and the period of employment required to qualify for specific paid vacations.

37. GREAT BRITAIN. DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH. *The Supervisor and his Job*, by K. E. Thurley and A. C. Hamblin. London, HMSO, 1963. Pp. 40.

An interim report on a research project on "Systems of Supervision" carried out by a team from the London School of Economics over a five-year period from 1959 to 1963. An attempt is made to examine the tasks performed by supervisors in five different industries to see how much variation, and how much there is in common in the jobs of supervisors in different situations.

38. NEW YORK (STATE) DEPARTMENT OF LABOR. DIVISION OF RESEARCH AND STATISTICS. *Union-Management Agreements in New York State; Selected Provisions, Jury Duty Pay, Funeral Leave Pay, Overtime, Supplementary Unemployment Benefits*. New York, 1963. Pp. 29.

Based on a study of 1,786 agreements covering 1,800,000 workers at the beginning of 1961.

39. ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT. *Fitting the Job to the Worker; Seminar on Ergonomics for Engineers, Liege, 5-12 September, 1961*. General report by S. Laner. [Paris, 1963?] Pp. 106.

Contents: The Structure of Engineering Education in the Participating Countries. Present State and Outlook for Ergonomics in Engineering Training Establishments. Opening Session of the Seminar. Programme of Lectures and Other Events—Final Sessions. Recommendations to the O.E.C.D. and to Other International Bodies.

40. U.S. BUREAU OF LABOR STATISTICS. *Digest of Nine Supplemental Unemployment Benefit Plans, Early 1963*. Washington, GPO, 1963. Pp. 25.

" . . . Summarizes the major provisions of nine supplemental unemployment benefit plans designed primarily to provide weekly supplements to State unemployment insurance benefits received by laid-off workers."

Labour Organization

41. AUSTRALIAN WORKERS' UNION. *Official Report of the Seventy-seventh Annual Convention . . . Sydney, New South Wales . . . together with Head Office and "Worker" Accounts*. Sydney, 1963. Pp. 196. Convention held Jan. 29 to Feb. 6, 1963.

42. CANADIAN LABOUR CONGRESS. *The Truth about Unions on the Lakes; a Summary of Findings of a Year-long Investigation conducted by an Official Canadian Government Commission*. Ottawa, 1963. Pp. 22.

A summary of the findings of the Norris Commission (the Industrial Inquiry Commission Concerning Matters Relating to the Disruption of Shipping on the Great Lakes, the St. Lawrence River System and Connecting Waters)

43. ST. PATRICK'S COLLEGE, OTTAWA. EXTENSION DEPARTMENT. *Labour Unions, an Introductory Course for Individuals and Study Groups*. 2d ed. Text and references completely revised. Edited by Mary Kehoe. Ottawa, 1963. Pp. 167.

Partial Contents: The Role of Unions in Society. Collective Bargaining. Workers' Rights and Duties. The Wage Package. Union Security. Grievances. Union Structure. Labour Legislation. Strikes. Labour and Co-operatives.

Labouring Classes

44. AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. DEPARTMENT OF RESEARCH. *Shorter Hours: Tool to combat Unemployment*. Washington, 1963. Pp. 53.

Based on a series of articles appearing in the *American Federationist*.

The AFL-CIO Executive Council favors a 35-hour basic work-week. This pamphlet presents arguments for a 35-hour week.

45. NORTH AMERICAN CONFERENCE ON THE SOCIAL IMPLICATIONS OF INDUSTRIALIZATION AND TECHNOLOGICAL CHANGE, CHICAGO, 1960. *Industrialization and Society*; [Proceedings] edited by Bert F. Hoselitz [and] Wilbert E. Moore. [Prepared by the International Social Science Council with the assistance of the Ecole pratique des hautes études (vi^e section). Paris] UNESCO, 1963. Pp. 437.

This Conference was sponsored jointly by UNESCO, the Canadian and the United States National Commissions for UNESCO, and the University of Chicago and was held in Chicago from September 15 to 22, 1960.

46. ONTARIO FARMER-LABOUR CONFERENCE. 4th, PORT ELGIN, ONT., 1963. *Report*. Toronto, Ontario Federation of Labour, 1963. Pp. 54.

Sponsored by the Farmer-Labour Committee of the Ontario Federation of Labour with the co-operation of the Farmer-Labour Co-ordinating Council of the Canadian Labour Congress.

Research, Industrial

47. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Research and Development: its Growth and Composition*, by Nestor E. Terleckyj. Assisted by Harriet J. Halper. New York, 1963. Pp. 115.

Contents: The Research Background. Basic Structure of Research and Development. Research and Development in Industry. Organizational Composition of Industrial R & D Operations. Composition of Research Staffs and Costs. Intensity of Industrial Research.

48. U.S. NATIONAL SCIENCE FOUNDATION. *Research and Development in Industry, 1960; Final Report on a Survey of R & D Funds and R & D Scientists and Engineers*. Washington, 1963. Pp. 118.

An analysis of the expenditure of \$14 billion on industrial research and development in 1960.

Science

49. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Technicians in Science and Engineering*. Ottawa, Queen's Printer, 1963. Pp. 81.

Contents: Nature of the Work. Fields of Work. Preparation and Training. Personal Qualities Needed. Advancement. Earnings. Organizations. Employment Outlook. Seeking Employment. Includes a list of educational establishments and of typical occupations.

50. CONFERENCE ON SCIENTIFIC MANPOWER. 11th, PHILADELPHIA, 1962. *Scientific Manpower, 1962; Papers of the Eleventh Annual Conference on Scientific Manpower*. Washington, GPO, 1963. Pp. 46.

The general theme of the conference was "Community Programs for Motivation to Science and Engineering Training" aimed at secondary school levels of education.

51. U.S. NATIONAL SCIENCE FOUNDATION. *Profiles of Manpower in Science and Technology*. Washington, 1963. Pp. 36.

By means of charts and tables, this booklet presents some statistical information about the numbers of people who are employed in the U.S. as scientists, engineers, technicians, and teachers of science and mathematics in secondary schools.

Women

52. CLARK, FREDERICK LE GROS. *Woman, Work and Age; to study the Employment of Working Women throughout Their Middle Lives*. London, Nuffield Foundation, 1962. Pp. 111.

Partial Contents: Married Women in the Labour Market. Bearing of the Marital State on Employment: (1) The Widowed Woman; (2) The Single Woman. Women who need to limit their Working Hours. Conditions that affect for Women the Limitation of Working Hours. The Age of Women's Withdrawal from Outside Work. The Later Working Lives of Employed Women. Impaired Health and the Rates of Withdrawal from Work. The Older Woman in the Manufacturing Industries.

53. CONFERENCE OF REPRESENTATIVES OF UNIONS CATERING FOR WOMEN WORKERS. *Women Workers, 1963; Industrial Chapter for Women and Report of the 33rd Annual Conference of Representatives of Trade Unions Catering For Women Workers*. London, Trades Union Congress, 1963. Pp. 56.

54. NATIONAL COUNCIL OF WOMEN OF CANADA. *Year Book, 1963*. Ottawa, 1963. Pp. 124.

55. U.S. PRESIDENT'S COMMISSION ON THE STATUS OF WOMEN. *American Women; Report*. Washington, GPO, 1963. Pp. 86.

Contains recommendations dealing with the following topics: education and counseling, home and community, women in employment, labour standards, security of basic income, women under the law, and women as citizens.

Miscellaneous

56. LONDON, ONT. UNIVERSITY OF WESTERN ONTARIO. FACULTY OF LAW. *Current Law and Social Problems*. Volume III. Editor: E. E. Palmer. Toronto, University of Toronto Press, 1963. Pp. 237.

Partial Contents.—The Law and Industrialism, by I. C. Rand. Jurisdictional Disputes in Canada: a Study in Frustration, by J. H. G. Crispo and H. W. Arthurs. The Drift toward a British National Wages Policy, by W. F. Frank. Labour Legislation in the Province of Quebec, by Marie-Louis Beaulieu. Peaceful Picketing and the Criminal Code, by R. S. Mackay. Conciliation Boards in British Columbia, by Raymond G. Herbert.

57. PHILLIPS, WALTER. *Technological Levels and Labor Resistance to change in the Course of Industrialization*. Berkeley, University of California, Institute of Industrial Relations, 1963. Pp. 257-266.

58. SASKATCHEWAN. AGED AND LONG-TERM ILLNESS SURVEY COMMITTEE. *Report and Recommendations [and Supplementary Documents]*. Regina, Queen's Printer, 1962-1963] 4 volumes.

Contents: [1] Report and Recommendations. [2] Survey of Employers. [3] Information and Opinion Survey of Senior Citizens. [4] Survey of Patients aged 65 and over in Mental Hospitals, Tuberculosis Sanatoria, Geriatric Centres, and Nursing Homes.

C—Employment, Hours and Earnings

Tables C-1 to C-3 are based on reports from employers having 15 or more employees; at October 1963 employer in the principal non-agricultural industries reported a total employment of 2,963,858. Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners in the reporting firms.

(2)Includes 205 registrations reported by the Magdalen Islands local office.

*Effective September 28, 1963 the area served by the Princeton local office is served by the Kamloops and Penticton local offices.

E—Unemployment Insurance

Unemployment insurance statistics are concerned with numbers of persons covered by insurance and claimants for benefit at Unemployment Insurance Commission local offices. The data are compiled in the Unemployment Insurance Section, DBS from information supplied by the UIC. For further information regarding the nature of the data see Technical Note, page 86.

Total, Canada, October 1962.....	672,646	15,753,741

*"Weeks paid" represents the total of complete and partial weeks of benefit paid during the month.

Technical Note to "E" Tables

Under the Unemployment Insurance Act contact between the claimant and the Unemployment Insurance Commission is made through a network of local offices. The statistics in Tables E-2 to E-4 relate mainly to local office claim operations.

Upon separation from employment, a person wishing to file a claim for benefit applies to the nearest local office of the Commission in person or by mail. An application for employment is taken by the Employment Branch of the local office and, if a suitable vacancy exists, a referral is made. If suitable employment is not available, a claim for benefit is taken by the Insurance Branch.

If the person applying for benefit has had no previous entitlement established, an initial claim will be taken and entitlement computed, otherwise a renewal claim will be filed. Initial and renewal claims thus constitute an advance notice by a claimant that he wishes to draw benefit. In some cases where employment is found immediately, however, the claimant may not return to prove unemployment.

The total of initial and renewal claims (Table E-3) thus approximates the number of new separations from insured employment during a month. To the extent that an initial claim is taken from a person who has exhausted his benefit and seeks re-establishment of further credits, the total would, however, constitute an overstatement of the volume of new separations.

Claims in the category "entitled to benefit" include initial claims established on which no disqualification was imposed, and renewal claims allowed, no disqualification. Claims "not entitled to benefit" consist of failures on initial claims due to insufficient contributions, and, in addition, disqualifica-

tions imposed on either initial or renewal claims. Claims not completely processed at the end of a month are shown as pending.

Claimants are required to report weekly, except postal claimants, who may report every two weeks. Data on claimants currently reporting to local offices are obtained from a count of individual unemployment registers in the current file at the month-end (Table E-2). Once a claim is taken, the document on which the record of current activity is maintained is placed in the current file and becomes dormant only after the scheduled reporting pattern has been broken twice in succession. The count of weeks of proved insured unemployment is begun again simultaneously with a new renewal claim and with initial claims, except those representing re-computation of additional credits. In these latter cases, the count is cumulated from the claim taken at the time the employment terminated.

Information on payments (Table E-4) is provided by Treasury offices of the Unemployment Insurance Commission and relates to payments made during a month. In some cases, however, the compensated unemployment would have occurred in a prior month. Data cover partial as well as complete weeks of unemployment.

Estimates of the insured population (Table E-1) are based on a count of persons either working in insured employment or on claim at June 1 each year. Monthly estimates are based on the June count of persons employed projected, by industry, using employment indexes from *Employment and Payrolls* (Employment Section, Labour Division, D.B.S.). To these employment data are added the number of claimants reported at month end, as described above.

①St. John's index on the base June 1951=100.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Department of Labour on the basis of reports from the Unemployment Insurance Commission. The first three tables in this section cover strikes and lockouts involving six or more workers and lasting at least one working day, and strikes and lockouts lasting less than one day or involving fewer than six workers but exceeding a total of nine man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the unions directly involved in the disputes leading to work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series see page 954, October 1963 issue.

TABLE G-1—STRIKES AND LOCKOUTS, 1958-1963

Month or Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year			
		Strikes and Lockouts	Workers Involved	Duration in Man-Days

Electric current.....	4				5	6	1	7			1		24
Over-exertion.....						1					1		2
Miscellaneous accidents.....					2						1		3
Total.....	26	20	8	30	42	58	39	12	10		37		282*

*Of this total, 174 fatalities were reported by the various provincial Workmen's Compensation Boards and the Board of Transport Commissioners; details of the remaining 108 were obtained from the other sources. The number of fatalities that occur during a quarter is usually greater than shown, as not all fatalities are reported in time for inclusion in the quarterly tables. Fatalities not recorded in the quarterly tables are included in the annual tables appearing in the May issue.

*See footnote to Table H-1.

Technical Note to "D" Tables

Tables D-1 to D-5 present selected statistics emanating from operations of National Employment Offices. These statistics, therefore, must be interpreted in the light of National Employment Service policy, operations, and reporting methods. Within this context, these operational statistics can provide useful information on labour supply and demand, historically and at specific points in time, by occupations, industries and local office areas.

Each National Employment Office is engaged in: (1) receiving applications for employment, assessing and recording the qualifications, interests, and aptitudes of the applicants, and assigning the occupational classifications which represent the applicant's highest levels of skill; (2) receiving orders for workers from employers, recording the employers' specifications for job vacancies, and classifying the orders occupationally and according to the industrial activity of the employers; (3) selecting from among available applicants the persons whose qualifications most closely approximate the specifications on the employers' orders; and (4) initiating clearance procedure to inform other National Employment Offices when suitable applicants are not available locally to fill employers' requirements. (There are numerous other related activities engaged in by National Employment Offices, but these are not the subject of the operational statistics under discussion.)

The industrial classification system used to classify employers and employers' orders is the Standard Industrial Classification of the Dominion Bureau of Statistics.

The occupational classification system used for classifying employers' orders and applications for employment is that of the Dictionary of Occupational Titles, published by the United States Employment Service. This system is based solely on the needs of the personnel selection process, and as a result is dissimilar from other occupational groupings such as occur in the census or in various salary evaluation systems.

The two basic statistical reports of the National Employment Service reflect these operations and systems of classification.

One of these statistical reports is produced from a physical count of the local office files of orders and applications, and shows by occupational groups the number of unfilled vacancies and registrations for employment that are active *on the last working day of each month*. Certain exclusions are made in this count, however. Total unfilled vacancies specifically exclude "deferred vacancies," i.e., those vacancies that are listed with the local offices

but for which employers are not yet ready to accept referrals or confirm hiring. Total registrations for employment exclude those persons who are known to be employed but are seeking different work, those persons who also have applications registered with other local offices, those persons who are seeking part-time work only, those persons who have registered in advance of their availability for work, and a few other similar categories. Since registrations are retained on an active basis for 14 days, these totals will include some applicants who have found work on their own but have not so notified the local office. Month-end data taken from this report on unfilled vacancies and registrations for employment are to be found in Tables D-1, D-4 and D-5. With particular reference to Table D-5, it should be noted that the totals given for each office represent the whole area served by the office and not simply those in the city or town in which the office is located.

The other basic statistical report contains monthly totals of certain National Employment Office operations, including such items as registrations received, vacancies notified, and placements effected, *during the whole of the month reported*. In this report, "registrations received" include the total number of registrations recorded during the month, and therefore differ considerably from "registrations for employment" taken from the other report, which deals only with selected registrations at a specific point in time. Vacancies notified and placements effected are recorded in this report by industry groups, but in the table published here, only placements effected are shown by industry groups.

"Vacancies Notified" are the total number of job openings that have been listed by employers with National Employment Offices, and, as such, provide an indication of fluctuations in the demand for workers. "Placements Effected" are the number of confirmed placements made by the NES on the vacancies notified. As such, placements effected provide an indicator of the number of persons who have found employment during the period. Placements effected include regular placements, casual placements (in jobs with an anticipated duration of six days or less), and transfer-out (placements involving the movement of workers from one local office area to another).

Tables D-2 and D-3 contain data on registrations received, vacancies notified and placements effected, and placements by industry, respectively, taken from the operational report covering the whole of each month.

The first part of the report deals with the general situation of the country and the progress of the war. It is followed by a detailed account of the military operations and the state of the army. The author then discusses the political and economic conditions of the country and the measures taken by the government to support the war effort. The report concludes with a summary of the achievements of the army and the government and a forecast for the future.

PUBLICATIONS OF THE DEPARTMENT OF LABOUR

Send remittance by cheque or post office money order, payable to the Receiver-General of Canada, to The Queen's Printer, % Superintendent of Government Publications, Ottawa. All subscriptions payable in advance.

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Price 35 cents. Catalogue No. L1-1963

ECONOMICS AND RESEARCH BRANCH

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents. L2-2/1963

Industrial and Geographic Distribution of Union Membership in Canada, 1963 (English or French). Price 15 cents. L32-764

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 50 cents. L2-159

Wage Rates, Salaries and Hours of Labour. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance and service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. (Bilingual). L2-545

First year service including attractive binder with index tabs and paper-bound volume, \$9.50; service without indexed binder, \$7.00; individual tables, 15 cents. Paper-bound volume, \$1.30.

Group Hospitalization and Medical Insurance Plans in Canadian Manufacturing Industries (English or French). Price 35 cents. L36-558

Working Conditions in Canadian Industry, 1962. Price 35 cents. L2-1562

Small Business Management Training

Federal-provincial small business management training program, formerly under Department of Trade and Commerce, now part of Technical and Vocational Training Branch of Labour Department

Courses conducted under the federal-provincial Small Business Management Training Program are having a beneficial effect on the operations of small businesses. This was illustrated at a conference last month in Ottawa of the administrators of Small Business Management Training from six provinces and one international trade association.

The meeting was called by the federal Department of Labour, and included representatives from British Columbia, Alberta, Saskatchewan, Ontario, Prince Edward Island and Nova Scotia.

It was shown that, as a result of federally supported business courses in local communities, many owners and operators of small businesses are changing their methods of keeping records, handling accounts receivable, keeping inventory, determining prices, interpreting financial statements, buying, budgeting, and conducting sales promotion and other business operations.

The courses, prepared by the Department of Labour and written by authorities in each aspect of small business management, include: retailing, management accounting, and marketing for small manufacturers. The courses have been organized in some 30 local communities by boards of trade, service clubs, businessmen's and trade associations, and have been attended by 1,000 owners of small businesses.

The program is administered provincially by Departments of Education, which arrange for instructors chosen from the ranks of business and professional men.

The meeting was told that the business community is giving the program a great deal of support. The provincial administrators reported a heavy demand for courses throughout their respective provinces. A number of companies are studying the program with a view to adapting it to the needs of their dealers, retail outlets and industrial salesmen.

Speaking at the opening of the meeting, Dr. C. R. Ford, Director, Technical and Vocational Training Branch, Department of Labour, stressed the necessity for management training, stating that the courses specifically designed for Canadian small business can be of great assistance to continuing economic growth in all parts of Canada.

Improved small business performance is a decided asset to the growth of Canada's economy at the rate necessary to provide a satisfactory level of employment and standard of living, he said.

Dr. Ford said that every survey and analysis of small business, both in North America and Europe, has established that managerial shortcomings outweigh all other reasons for small business failure and poor performance. He added that the conclusion must be drawn that management training will improve this situation.

The Small Business Management Training Program was formerly under the Department of Trade and Commerce. During December 1963, it was transferred to the Department of Labour, where it has become a division of the Technical and Vocational Training Branch.

D.S. Conger, who was formerly chief of the Management Training Division in the Department of Trade and Commerce, where the Small Business Branch was first established in 1958, is in charge of the program.

The program comes under the Technical and Vocational Training Assistance Act, and is eligible for financial support under Program 4 of the Technical and Vocational Training Agreement. The courses, which are given at the local community level, are sponsored by a local trade or business association, service club, board of education or other interested group.

A local sponsoring committee works with a provincial superintendent to select the required courses and then assumes responsibility for conducting and administering the courses. The courses now available for sponsorship are: Accounting for Owners, Bookkeeping for Owners of Small Businesses, Marketing for Manufacturers, and Retailing.

Interested sponsoring groups may write to the Department of Education in the provinces of British Columbia, Alberta, Ontario, Prince Edward Island and Nova Scotia, to get in touch with the provincial administrator or superintendent of small business management training. Further information is also available direct from the Small Business Management Training Division, Technical and Vocational Training Branch, Department of Labour, Ottawa.

50 Years Ago This Month

Fourth annual convention of British Columbia Federation of Labour adopts resolution condemning "grossly biased attitude" of two judges in trials of striking Vancouver Island miners

A resolution condemning the "grossly biased attitude on the bench" of a county court judge of the County of New Westminster and a judge of the British Columbia Supreme Court, in the trials of miners from Vancouver Island, was passed by the fourth annual convention of the British Columbia Federation of Labour, held in New Westminster on January 26 to 30, 1914.

The resolution referred to the judges' "browbeating of the counsel for the defence, [and] the unwarranted denunciation of the witnesses for the defence as liars and perjurers" during the trial. It provided for the setting up of a special committee "to confer with the solicitors for the defence with a view to preparing charges against one or both judges; and that the said charges be sent to the Hon. R. L. Borden, M.P., Prime Minister of Canada; Hon. C. J. Doherty, M.P., Minister of Justice; H. H. Stevens, M.P., and J. D. Taylor, M.P., with a request for the impeachment of the said judges."

The report of this convention in the LABOUR GAZETTE of February 1914 said that a large part of the President's report was "devoted to a review of the coal miners' strike on Vancouver Island and the efforts put forth on behalf of the miners in an endeavour to effect a settlement." The President's report severely criticized the provincial Government for sending militia and special constables into the strike district, and "the militia as an institution was condemned," the report said.

"Disappointment was expressed at the lack of co-operation between officials of Vancouver Trades and Labour Council and officials of the Federation in the protest entered by the latter body against the use of the militia in connection with the miners' strike."

The report of the convention continued: "In submitting the question of a 48-hour strike as a protest of organized labour against the treatment accorded the striking miners on Vancouver Island, the executive committee put the question as follows: 'If you are willing to lay down your tools and leave your employment for a period of 48 hours in order to make the most emphatic protest possible against the actions of the Government, you will say *Yes*; if, however,

you approve of the use of the militia in an attempt to defeat the workers, you will say *No*.' Of the 120 organizations asked to vote on this question, only 12 sent in returns, the votes cast being 670 in favour of strike and 270 against."

Among the other resolutions passed by the convention were some that:

—Favoured the absolute exclusion of all Asiatics from Canada; endorsed the movement to obtain equal suffrage for women; favoured legislation to secure minimum wage boards and an eight-hour day for female workers; declared that "neither the name nor the funds of the British Columbia Federation of Labour shall be used to promote the interests of any political party"; declared against military training in schools;

—Favoured the shortening of hours of labour in mines to six hours per day, bank to bank, and to seven hours per day for all other classes of labour in British Columbia, with a minimum wage of \$4 per day; favoured the abolition of private employment agencies; favoured the payment of wages at least fortnightly and in cash; favoured the expiry of all trade agreements with employers on May 1;

—Decided that no fraternal delegate would be sent to the next meeting of the Trades and Labour Congress of Canada; recommended that all affiliated unions should have a clause inserted in their constitutions prohibiting members from belonging to any military organization; and favoured the expulsion of all Asiatics from the mines, and urged that further restrictions be placed on their employment.

CPR Financial Statement

The value of the assets of the Canadian Pacific Railway, according to a special valuation just completed by officials of the company, was \$846,000,000, this journal reported. These assets included "lands, mileage, stations, rolling stocks, steamships and all property owned by the company."

The railway itself was valued at \$452,320,780, and the 70 vessels of its steamship fleet at \$23,049,283. The company owned 2,052 locomotives.

The company's total income for the year ended June 1, 1913 was \$139,395,000, with operating expenses of \$95,145,875.

Government Planning Labour Standards Legislation

Revised labour standards for industries coming under federal jurisdiction were part of the new legislation involving his Department that the Government had in mind for 1964, Hon. Allan MacEachen, Minister of Labour, told the Windsor Chamber of Commerce last month.

There was already legislation providing for minimum standards regarding wages, hours, holidays and vacations in most provinces, but there was an important gap here to be filled, Mr. MacEachen said.

Safety Legislation

The Government was considering legislation on occupational safety. There was at present no federal legislation directed toward the prevention of accidents in the course of employment and the elimination of industrial dangers to health in the various works, undertakings and businesses within federal jurisdiction.

The purpose of the proposed law, the Minister said, was to require the institution

of measures to protect the health and safety of employees with respect to matters that did not already come within the province of other federal departments.

Unemployment

After referring to the steps the Government had taken in 1963 to reduce unemployment or alleviate its effects, Mr. MacEachen said that further action was being considered for 1964 to improve existing machinery for dealing with unemployment. He alluded particularly to contemplated legislative changes to the Unemployment Insurance Act and the operation of the National Employment Service as a result of proposals made by the Gill Committee.

A careful review of these proposals, including those relating to changes in organization directed toward fuller co-ordination and integration of the work of the NES with that of the Department of Labour, had been under way for some time, the Minister said.

Economic Council of Canada Meets, Announces First Project

Dr. John J. Deutsch, Chairman of the new Economic Council of Canada and former Vice-Principal of Queen's University, last month stated that the first project of the Council is to produce a report on Canada's medium- to long-term prospects and problems. The report is to be completed by the end of the year.

Dr. Deutsch also announced that the nucleus of a research staff would be engaged almost immediately. Its task will be to initiate the studies that will form the basis for the long-range economic survey to be prepared by the 28-member Council (L.G., Jan., p. 4).

Executive Committee

An initial meeting of the Council approved the formation of an executive committee composed of: Dr. Deutsch; J. L. E. Couillard and Arthur J. R. Smith, the two permanent Directors of the Council; Roger Charbonneau, Director of the Ecole des Hautes Etudes Commerciales; Robert Fowler, President of the Private Planning Association of Canada; Claude Jodoin, President of the Canadian Labour Congress; and David Kirk, Secretary-Treasurer of the Canadian Federation of Agriculture. Mr. Couillard was also named Vice-Chairman of the Council.

The Council also established four standing committees to delve into economic growth, labour-management relations, productivity, problems of adjustment, and industrial research and technology.

Advice on Policies

Hon. Maurice Lamontagne, the then President of the Privy Council, responsible to Parliament for the Economic Council of Canada, in addressing the meeting said the Government intended to ask the Council from time to time "for specific advice on policies having long-range implications." He also pointed out there would be no attempt by the Government to influence the Council.

The Chairman emphasized that the Council was not intended to engage in economic planning that would be imposed on the various sectors of the country but to develop a consistent and logical set of policy recommendations that would promote the best performance of the economy.

Its goal is to seek a consensus among those responsible for making decisions in business, agriculture and government about the best way of promoting steady economic growth, he said.

29,000 Apply for House-Building Incentive in Plan's First Month

At the beginning of last month, the Department of Labour had received some 29,000 applications for the construction of winter-built houses under the Winter House Building Incentive Program (L.G., Oct. 1963, p. 862). As the program ends on March 31, by which date construction must be completed if the houses are to qualify for the \$500 incentive payment, the flow of applications had likely passed its peak by January 1.

A tabulation of the first 27,796 applications received showed that 190 were cancelled by the applicant and about 900 did not meet the required conditions regarding the amount of construction permitted before December 1, 1963.

Of the remaining 26,678 applications, Quebec and Ontario had produced the most, with more than 8,000 each. Alberta was third, with 3,627 applications. Figures for other provinces were: Newfoundland 180, Prince Edward Island 49, Nova Scotia 336, New Brunswick 233, Manitoba 1,288, Saskatchewan 1,156, British Columbia 2,678, and Yukon and Northwest Territories 31.

The 26,678 applications covered 2,433 duplexes, 184 triplexes, 539 four-unit buildings, and 23,522 single houses. Seventy per cent are being built with National Housing Act financing.

It is estimated that construction under the applications approved up to the beginning of the year will require 95,000 workers on the construction sites during the four winter months, and another 115,000 workers in the industries that manufacture, transport and sell building materials.

Winter Works Incentive Program Surpassing Last Year's

By January 24, federal government contributions under the 1963-64 Municipal Winter Works Incentive Program were higher than in the comparable period of the previous season, although the number of applications received was lower. The consolidation of applications by participating municipalities accounts for the higher contributions on a lower number of applications.

And both the estimated cost of projects during the period of the program and the estimated number of men to be hired reached new records by January 24.

The estimated federal government share of direct payroll costs for the 1963-64 program had reached \$42,477,000, compared

with a cumulative total of \$35,811,000 for the comparable week last year.

Applications received in the 1963-64 program were 5,678; in the 1962-63 program at this date they numbered 5,917. Applications accepted numbered 5,608 and 5,853, respectively.

Participating local authorities totalled 2,400 for the 1963-64 period ended January 24, compared with 2,293 for the similar 1962-63 period.

In the week ended January 24 this year, the estimated cost of projects during the period of the program reached 233,300,000, and the estimated direct payroll cost, \$80,530,000. The estimated number of men to be hired during the period of the program was placed at 126,013 and the number of man-days of work at 5,564,246.

U.S. Teamsters Win Agreement On First Nation-Wide Contract

The International Brotherhood of Teamsters and the United States trucking industry last month reached agreement on a nation-wide contract, their first national labour contract.

The contract encompasses more than 400,000 Teamster members and 400 locals in a single bargaining unit, and involves some 16,000 local and long-distance trucking companies. Only negotiations in the U.S. steel industry, which usually affect some 500,000 workers, cover a greater number of workers.

Among main provisions of the three-year contract, expiring March 31, 1967, are:

—An increase of 28 cents an hour in three annual stages.

—An increase of \$3.00 in weekly payments to the medical-care fund, spread over the three-year period.

—An increase in the weekly pension fund payments, of \$1.00 on February 1, 1964 and \$1.00 on February 1, 1966.

—Four weeks vacation after 16 instead of 18 years of service.

—An additional 1-cent-an-hour increase on February 1, 1965 for employees earning less than \$3.13 an hour.

—A two-year "moratorium" on the annual cost-of-living pay increases (in recent years averaging 3 cents a year).

CNTU Appoints Vice-President

The executive of the Confederation of National Trade Unions has appointed Jean-Noel Godin a Vice-President to succeed René Gosselin, who has been named a member of the Quebec Labour Relations Board. Since June 1959, Mr. Godin had been president of the National Federation of Clothing Workers.

Labour Attache in Belgium Returns, Heads International Affairs Branch

A. J. L. Mainwaring, formerly Canadian Labour Attache at Brussels, Belgium, last month became Director of the International Labour Affairs Branch of the Department of Labour, which was formerly the International Labour Organization Branch. He succeeds Paul Goulet, who is on retirement leave.

Dr. R. M. Adams, formerly Head of the Labour-Management Division, Economics and Research Branch, has taken Mr. Mainwaring's place in Brussels.

Mr. Mainwaring was associated with the ILO on numerous occasions; he had attended seven sessions of the International Labour Conference by the time he was posted to Brussels in November 1958, and had represented Canada at other ILO meetings in North America and Europe.

Before his assignment to Brussels, Mr. Mainwaring was Head of the Labour-Management Division, Economics and Research Branch, and before that, Assistant Editor of the *LABOUR GAZETTE*. He had joined the Department in 1942.

Dr. Robert McDonald Adams has been associated with the Economics and Research Branch since 1958, and has been chief of the Labour-Management Division of the Branch since 1960.

John Mainwaring

Demand Continues Strong For University Graduates

University graduates continue to be in strong demand in Canada, although the number of students graduating increased by 17 per cent—from about 26,500 to 31,000—between 1962 and 1963. In 1964, it is expected that the total number of those receiving degrees—Bachelor, Master or Doctorate—will approach the 37,000 mark.

Starting salaries are also continuing their upward trend.

These and additional data, together with descriptions of job prospects for graduates of the various courses, are given in *Supply and Demand—University Graduates 1963-64*, published last month by the Executive and Professional Division of the National Employment Service.

Graduating classes may be expected to become larger in the coming years as the enrolments at Canadian universities and colleges continue to increase rapidly, the booklet points out. Full-time enrolment reached 141,388 students in 1962-63, representing an increase of about 10 per cent over the previous year. If the same rate of increase continues in 1963-64, then some 156,000 full-time students will be studying at institutions of higher learning throughout the country.

Estimated monthly starting salaries offered to the 1963 graduates are based largely on rates paid by the larger national employers. For Bachelors, they range from \$345 to \$470; Masters, \$451 to \$490; and Doctors, \$658 to \$700 (figures for the latter two categories are not complete).

Increases in starting salaries apply to nearly all courses, and range from 5 per cent for graduates in economics and political science to 10 per cent for graduates in mathematics. In the engineering profession, salaries are from 1.5 to 3.5 per cent higher than in the previous year, metallurgical engineering showing the largest increase.

On the demand side, the booklet includes the following estimates:

—About 9 per cent more social scientists will be needed in 1964; universities and colleges will require 13 per cent more.

—Some 7.8 per cent more economists will be required in 1964, with universities needing the largest number.

—Each year there are potential openings for 1,500 agricultural science graduates but new graduates total less than half that number.

—There is a particular demand for high school specialists in mathematics, science, home economics and commercial work.

—Demand for engineers continues to be strong in industry, government and universities.

AUTOMATION

Employer speaker at AFL-CIO convention says automation "our greatest domestic problem" and calls for total preoccupation of all—industry, labour and government—with ways to solve it

"I am convinced that as a result of automation, as a result of our new relationship to machines, the relationship of the worker to both management and his union will also have to change.

"I am convinced that because the problem is so enormous, we have entered into an era in which we must court totally new ideas and totally new ways of approaching our problems—ideas and techniques that will be far removed from any approaches we have known before.

"All such ideas should get fair hearings, no matter how outlandish they may seem. Our very salvation, in my opinion, depends on innovation—innovation and the co-operative will of us all."

These words were spoken by an employer, John I. Snyder, Jr., President and Chairman of the Board of U.S. Industries, Inc., at the 5th biennial convention of the AFL-CIO. Mr. Snyder is co-chairman with A. J. Hayes, President of the International Association of Machinists, of the American Foundation on Automation and Employment, his company produces automation machines and the subject of his address was "Automation."

Automation is "our greatest domestic problem," he said. "We need to become totally preoccupied with this problem—all of us in industry, labour and government—if we intend to solve it.

"It seems to me there is no question that we have already entered upon a time which requires a far greater degree of whole-hearted co-operation between labour, management and government than mankind has ever known before." He said the Automation Foundation was a sign pointing in that direction, a sign that such co-operation was possible.

Mr. Snyder began by saying that he did not agree that automation was an evil. (In his presidential address to the convention, George Meany had said that automation was a curse to society.)

I believe automation is necessary for this nation today if we are to produce and sell goods in the face of world competition, and that ultimately it can do greater good for mankind, relieving man of much drudgery he has had to perform before.

I also believe, however, it is in the best interests of all businessmen to work hard to solve the very real and immediate human problems that automation is creating.

There is no question that automation is displacing workers, Mr. Snyder said. But there is some question about the rate at which machines are taking jobs away from men. Here he found fault with the conclusion reached by the President's Council of Economic Advisers that unemployment in the industries most affected by automation was less than projections of early figures had indicated (L.G., Dec. 1963, p. 1071).

The formula used in the Automation Foundation—the over-all employment figure multiplied by the rate of increase of output per man-hour—showed that in the United States in 1962 more than 2½ million jobs were lost to automation. "That would be 51,000 jobs a week. To allow for a margin of error, we have maintained that automation has been a major factor causing the loss of jobs at the rate of 40,000 a week."

There was nothing sacred or exact about that figure, Mr. Snyder continued. But what he did regard as sacred was the necessity to face up to two "hard and brutal" truths: automation is here to stay, and automation is putting and for a long time to come will continue to put a lot of people out of work.

And these people include both blue-collar and white-collar workers: bookkeepers, clerk statisticians, and accountants who are rapidly being replaced by "sophisticated electronic brains."

Yet the country as a whole remains singularly unaroused and I can't help but wonder why. Is it because today we have so many benefits that we did not have back in the Thirties—social security, welfare, unemployment compensations, and all the other desirable, necessary, and good benefits which we fought so hard to win? Is it because the unemployed aren't organized or represented by any spokesmen? The unemployed would make a pretty big union.

Mr. Snyder said he was angry about the emergence of a whole series of delusions that are widely accepted and have "a deep tranquilizing effect on many men and women who otherwise might help solve the human problems automation is creating." These delusions must be exposed as the fallacies they are, he said.

Fallacy No. 1 was that automation really is not going to eliminate many jobs. "Automation is indeed eliminating jobs," he said. Detroit is the centre of automation and is also one of the country's largest and most critical unemployment areas. He cited

figures from a June 1963 survey that showed that employment in companies, in various industries, had dropped at least 5 per cent and at most 43 per cent; but in almost all of the companies, productivity was up.

In addition, automation has displaced people through "silent firings," which Mr. Snyder defined as workers who without automation would eventually have been hired for specific tasks that are now automated.

There are also those workers who lose their jobs through vertical integration due to automation, as in the case of a company which formerly supplied a third of Ford's body parts. When Ford automated its stamping plants, no Ford employees were displaced, but 5,000 employees of the body company were obliterated from the payroll.

Fallacy No. 2 was that automation will create jobs, not only in the running of machines but also in the building and maintenance of them. But experience has shown that after the initial "debugging" of automated machines, they require very little maintenance; if this weren't so it wouldn't make economic sense to automate. And if the same number of workers replaced by automation were needed to build the machines, there would be no point in automating.

Fallacy No. 3 was that all the people who lose their jobs to machines can be rapidly retrained and placed immediately in other jobs requiring higher skills. "Most of our experience so far refutes this claim," he said "Unfortunately, many of our workers appear to be simply not retrainable by present techniques.

"You cannot force people into retraining, and after you retrain them you can't manufacture jobs out of thin air. We have not yet discovered a satisfactory system for retraining and re-employing a significant number of workers."

Here Mr. Snyder touched on another barrier to retraining. In the face of an "appalling" lack of teachers, we can't provide retraining by using traditional training

methods; yet we cannot use modern machine teaching techniques unless people accept them.

Fallacy No. 4 related to the Negro. The key issue in the Negro protest movement was jobs, and automation has played a role in aggravating this problem. There was a relationship between the "Second Industrial Revolution" and the "Second American Revolution."

These "Four Fallacies of Automation" were serving as "deep sedation for those who either cannot or will not come forward to grapple with the human problems caused by automation.

"It is much easier to look for proof that these problems do not exist than to admit their existence and move ahead toward a solution."

What are the solutions? Is tax reduction a solution? Will collective bargaining provide a solution? Will the shorter work week be the solution to the problems of automation?

Mr. Snyder was of the opinion that a tax cut can be a partial solution—"if it creates enough purchasing power to stimulate enough additional production to stimulate additional employment."

He did not believe that collective bargaining can help solve the human problems created by automation but he did believe that the collective bargaining process will prove invaluable if it is employed with the kind of wisdom and vision that resulted in the Kaiser steel agreement (see page 101).

The shorter work week, he believed, had merit as a solution "in the absence of other solutions, and only because of some long-term benefits that it may produce." He explained: a shorter work week means more leisure time, more leisure time requires means of constructively using it, constructive use of leisure time will require new leisure-time industries, and new leisure-time industries mean more total jobs.

It was here that Mr. Snyder appealed for the total preoccupation of industry, labour and government with the problem of automation.

Shorter Work Week No Cure for Unemployment—Cornell

A shorter work week with the same weekly pay will not necessarily mean more jobs, according to a study carried on at Cornell University.

Labour leaders are asking for a shorter work week because they believe that it will solve, at least partially, the problem of unemployment, explains Marcia L. Greenbaum, a former research assistant in

Cornell's New York State School of Industrial and Labor Relations.

Union leaders, she says, are convinced that automation is a major cause of unemployment and that a shorter work week is needed to spread a decreasing amount of available work among an increasing number of workers.

But both management and government argue that reduction in working hours without a reduction in pay is more likely to destroy jobs than to create new ones. Union demands for the maintenance of take-home pay is the equivalent of a large wage increase, and higher labour costs may discourage hiring, she points out in a bulletin, "The Shorter Workweek," issued by the School.

To maintain take-home pay will require a 14.3-per-cent wage increase, which will almost always mean an increase in the firm's labour costs, says Miss Greenbaum. If a firm is in such a highly competitive industry that it cannot raise its prices, management may attempt to offset a wage increase, economists believe, by reducing the number of workers or by increasing the productivity of the present workers, she maintains. On the other hand, if the firm increases prices, lower sales and less production may result.

In neither case, says Miss Greenbaum, does the employer have any incentive to hire more workers. In addition, some marginal firms might be pushed completely out of existence.

Management and government officials also contend the shorter work-week with the same pay will probably mean a drop in living standards. The 14.3-per-cent wage increase is almost five times more than the normal annual productivity increases of 3 per cent. Productivity would have to increase as much as wages increase to prevent inflation, explains Miss Greenbaum. The workers' real wages would be less since rising prices would mean higher living costs.

Union leaders hope also to induce employers to hire more workers when they need additional help by demanding double-

time instead of time-and-a-half for overtime work. In particular, says Miss Greenbaum, unions would like to see the 35-hour week lead to an extra shift of workers in many plants now working a single 40-hour shift. Miss Greenbaum thinks, however, that demand for the employer's product would have to increase substantially to make two shifts profitable.

Employers' increased costs from a shorter work week could eventually be met by increased productivity and increased labour efficiency, but not all at once. "With an annual productivity gain of 2 to 3 per cent predicted for the next few years, it is unlikely that this rise can offset in one fell swoop the 14.3-per-cent initial wage increase and possible additional costs from overtime payments or extra shift arrangements," Miss Greenbaum says.

Some side effects of a shorter work week might be an increase in "moonlighting" and an increase in the labour force of "secondary workers" such as housewives and retired workers.

There are other ways of decreasing hours of work, such as longer weekends, longer vacations and earlier retirement ages. Miss Greenbaum also mentions the sabbatic leaves that are being introduced for older workers. And the working life of younger people is being shortened by longer vocational training and other education, which postpone their entrance into the labour force.

In the future, the standard 40-hour work week is likely to disappear, concludes Miss Greenbaum. But she believes that the reduction in working hours will occur more gradually than many labour leaders might prefer and in far less dramatic forms than the sudden leap to a 35- or 32-hour week.

The Long-Range Sharing Plan of Kaiser Steel, United Steelworkers

Employment-stabilizing sharing plan agreed to by Kaiser Steel and United Steelworkers set a precedent for entire industry

When the Kaiser Steel Corporation in the United States signed its employment-stabilizing Long-Range Sharing Plan with the United Steelworkers of America (L.G., Jan. 1963, p. 6), it set a precedent for the entire industry.

Details of the plan, which came into effect on March 1, 1963, were explained during the Staff Training Conference of District 6, United Steelworkers of America, held in Niagara Falls, Ont., on November 24-29, by Marvin J. Miller, Assistant to the Presi-

dent of the USW. Mr. Miller is co-ordinator of the Human Relations Committee established under the United States steel industry agreements with the USW in January 1960 and is one of the three union representatives on the tripartite USW-Kaiser Steel Long-Range Committee, which developed the plan now in effect at the company.

The basic objective of the Long-Range Sharing Plan entered into by the Corporation and two Steelworkers locals is to pro-

vide employment protection against technological change.

Among major provisions of the Long-Range Sharing Plan are:

—Allocation of 32½ per cent of the monthly savings resulting from increased productivity or material savings to the more than 4,000 employees affected by the plan. Subtractions are made from this share, until a certain adjustment is reached, for a company-maintained Wage and Benefit Reserve.

—A guarantee of at least as much in wages and fringe benefits as employees of other steel companies.

—An employment guarantee, made effective through establishment of a plant-wide employment reserve.

—A displacement differential to be paid to any employee affected in his job classification by technological change.

—A “short-week” payment to employees scheduled for a work week of less than 40 hours (because of technological changes or new work methods) and who are available for 40 hours of work in a week.

—Incentive provisions of the collective bargaining agreement continued in effect, but the company will not establish new incentives, and terms of the plan in general are such as to facilitate the switch to the Long-Range Sharing Plan on the part of incentive employees.

—A minimum sharing guarantee, involving payments by the company into the employees’ gross share, provided that the application of this feature does not cause the total actual labour and material and supply cost for the year in question, including the employees’ share, to exceed standard costs of production.

—Grievance and arbitration provisions of the collective bargaining agreement between the company and the union remain in effect; grievances involving interpretation of the plan are referred to the Long-Range Committee, and if necessary, to the public members of this tripartite committee (which has public, union and company members) for final and binding arbitration. Unless changed or modified by the provisions of the plan, all existing agreements between the company and the union remain in effect.

—Annual review and revision of the plan by the company and the union are provided for, and are to be undertaken in the 90-day period prior to each anniversary date. The plan may be terminated by either party upon four months notice to the other party, which must be served within the 12 months following the fourth anniversary date of the plan, and each four years thereafter.

The terms of the plan also state that its provisions shall not be construed as requiring the company to hire new employees, and it reaffirms management’s rights and responsibilities with respect to “such matters as sales policies, purchasing policies, research projects, management compensation, expansion of capacity and other similar areas.”

Long Range Sharing Plan

The groundwork for the Kaiser-USW Long-Range Sharing Plan was laid on October 26, 1959, when an agreement between the two parties provided for the establishment of a tripartite committee. This committee was to formulate “a long-range plan for equitable sharing in the company’s progress.” After more than two years of study and discussion, the committee developed a plan, which was accepted by David J. McDonald, President of the United Steelworkers of America, on behalf of the union, and by Edgar F. Kaiser, Chairman of the Board, Kaiser Steel Corporation, on behalf of the company.

Employees’ Share of Gains

A basic total of 32½ per cent of the monthly savings resulting from increased productivity or material savings—savings resulting from technological changes, improvements in labour performance, material and supply usage, and related factors—goes to the more than 4,000 employees affected by the plan.

Gains from these improvements are measured from the base point of the company’s actual operations in the calendar year 1961, the standards and improvements in manufacturing costs being in terms of appropriately weighted manufacturing cost per finished ton of iron and steel produced.

Detailed rules are set out for the calculation of gains, and the extent to which capital expenditures are taken into account is defined. Capital expenditures for new processes or new equipment to increase capacity do not figure in the adjustment of the total dollar gains. Costs of certain additions and improvements for reducing product cost, however, are used in the adjustment, but such adjustments continue only until an amount equal to the capital expenditure itself has been prorated, and this class of adjustment is made only for the months in which the projected cost reductions are achieved. Maintenance jobs of \$300,000 or more are prorated over a 12-month period.

Lump sums paid out by the company to eliminate incentive plans and out-of-line differentials (see below) are translated monthly into a current labour cost.

The employees' gross share of the gains are regarded as consisting of two parts. The first part consists of 32.5 per cent of the total net dollar gains as calculated under terms described above. Graduated, monthly amounts are subtracted from this share for incorporation into a Wage and Benefit Reserve established as part of the plan. These subtractions started with one fifth of one per cent during the first month. From the Wage and Benefit Reserve there is subtracted each month the total increase in employment costs resulting from wage and benefit increases according to the guarantee provision of the plan (see below). There are certain exceptions to the subtractions from the Reserve.

The progression of the subtractions from the employees' gross share is adjusted in such a way and under specified terms such that, six months after the effective date of any increase in wages or benefits occasioned by industry adjustments, the net balance of the Wage and Benefit Reserve is zero.

The second part of the employees' gross share of gains involves lump sums paid by the company to eliminate incentive plans and out-of-line differentials.

The plan incorporates a detailed schedule for the distribution of gains under the 32.5-per-cent gross share, taking various group classifications into consideration (units electing to remain on incentive are excluded).

Employment Guarantee

The plan incorporates an employment guarantee, which is made effective by setting up of a plant-wide employment reserve. This provision is designed to give protection against unemployment because of technological change and new or improved work methods. It also covers any other operational changes that do not result from a decrease in man-hour requirements because of a drop in finished steel production or a change in product or production requirements.

An employee who would normally be laid off as a result of basic changes as above is accepted into the plant-wide employment reserve. Any necessary layoffs are to be made through the employment reserve, the size of which and other conditions attached to it also being defined. There is an employment reserve for the production and maintenance employees and another for the clerical and technical employees.

Payment of Displacement Differential

An employee whose job classification is affected by a technological change or new or improved work methods, in that he would otherwise be promoted under existing seniority arrangements to a higher job

classification, or an employee whose job classification is lowered because of such changes, receives a displacement differential. Such payment is not included in the calculation of incentive earnings.

Payment of the displacement differential to an employee ends after 52 weekly payments, or as follows: on the date when he fills a vacancy for a permanent job of a class equal to or higher than the one for which the differential was paid; and alternatively, on the date when the employee rejects or fails to accept promotion to a permanent job of a higher rating, and which he is able to fill. The maximum duration of any displacement differential is three years from the date the particular change was instituted. Other governing conditions are included.

Short Weeks Provision

Employees who are scheduled for a work week of less than 40 hours and who are available for 40 hours of work in a week receive a "short-week" payment when they are employed for the shorter week as a result of technological changes or new work methods. The payments make up the difference. All such short-week payments are deducted from the total dollar gains as calculated under the sharing plan.

Status of Incentives

Under the plan, all incentive provisions of the collective bargaining agreement between the USW and Kaiser Steel Corporation continue in effect, but the following provisions should be noted:

—No new incentives will be established by the company, nor will incentives be applied to employees not covered by such incentives on the date of the plan's becoming effective.

—Temporary incentives in effect before introduction of the plan are settled as permanent incentives by agreement of the parties or by final and binding arbitration after 60 days from the date of the plan's installation.

—Employees belonging to an incentive unit and who received incentive payments during the 13-week period immediately preceding a company offer made under an applicable clause of the plan can choose from various options, some involving lump-sum payments for elimination of an incentive plan and transfer to the Long-Range Sharing Plan. Employees on incentive may remain on that basis under prescribed conditions, and continuing incentive plans may be adjusted.

The amounts that would have been payable to former employees under elimination of an incentive by a lump-sum pay-

ment or a related choice, or to employees who came under adjusted incentives, are added to the employees' gross share.

Payments under Minimum Guarantee

A minimum guarantee concerning the employee's share is provided in the plan. It involves payments by the company into the first part of the employees gross share, with the provision that these payments do not cause the total actual labour and material and supply cost for the year in question, including the employee's share, to exceed standard costs of production.

Payments under this provision come into play when the total actual labour cost—including the employee's gross share—is a smaller percentage of total labour and material and supply cost than the percentage that standard labour cost was of the standard total cost.

The minimum guarantee clauses of the plan also continue in effect the provision in the Supplemental Memorandum of Agreement by the two parties, dated March 9, 1961, that states that any wage and benefit adjustments agreed to by the union and the basic steel producers shall be put into effect by the company. The total increase in employment costs resulting from this provision (with the exception of any industry wage or benefit increase effective within six months after the effective date of the plan), is subtracted from the Wage and Benefit Reserve for each month. If the Reserve is insufficient under these conditions, the company makes up the difference.

Termination of Agreement

The plan is subject to review and revision by the parties each year in the 90-day period preceding each anniversary date of the plan. Termination of the plan by either party is provided for, contingent upon four months notice to the other party, the notice to be served within the 12 months following the fourth anniversary date of the plan, and each four years thereafter.

In case notice of termination is given by either party, the plan provides that the parties jointly determine the provisions for

the period following the termination, giving consideration to guidelines provided in the plan. Failure of the parties to agree within 60 days calls for referral of the matter to the public members of the Long-range Committee. Following their review of the matter, the public members of the committee are authorized under the plan to take any one of a series of alternative steps, including mediation and recommendations to the parties.

If no subsequent agreement follows termination of the plan, a strike or lockout may be resorted to. And in case of termination, the entire amount in the Wage and Benefit Reserve is to be paid to the employees on the same basis as provided for under the plan.

A new Kaiser Steel-USW pact broadens extended vacation plan coverage to include almost all of the company's hourly work force.

The basic steel contract, signed last year by other major steel producers (L.G., July 1963, p. 549), provides that the senior 50 per cent of hourly work forces receive a 13-week vacation with 13 weeks pay every five years. It also provides additional vacation benefits for all workers, depending on the money available in the vacation fund set up by the contract.

The new Kaiser agreement will give about 75 per cent of the company's hourly work force a 13-week vacation with 14 weeks pay every five years, and most of the remaining hourly employees a 7-week furlough with 8 weeks pay every five years.

The extended vacation plan will not affect Kaiser costs because such benefits are paid out of a fund provided by the Long-Range Sharing Plan that went into effect March 1. Nor will the new vacation plan have any effect on the bonuses paid to workers under the sharing plan, since money for this is already being funded under a schedule of deductions from the gross amount of the employees' share of cost savings. These deductions precede bonus payments.

First Director of U.S. Women's Bureau Dead at 91

Miss Mary Anderson, Director of the Women's Bureau of the United States Department of Labor from its founding in 1920 until her retirement in 1944, died in Washington on January 29 at the age of 91.

Miss Anderson spent 18 years on a stitching machine in a Chicago shoe factory, during which time she became President of Local 94 of the Boot and Shoe Workers Union, and then became an organizer for the National Women's Trade Union League. In World War I, she was called to Washington to work with the Women in Industry Service of the National Defence. When the Service became the Women's Bureau in 1920, she was made its director.

Labour Market Developments in 1963

Business expansion shows no sign of slowing down. Last year, production, employment and incomes rose substantially, prices rose only modestly. Expansion continues to be broadly based

The current business expansion, which started early in 1961, has already lasted longer than most of the postwar periods of expansion. But there is little evidence to indicate any slowdown within the next few months.

In fact, the recovery seems to have picked up some momentum during the latter part of the last year. The major indicators reveal a substantial strengthening during the final months from the brief hesitancy apparent earlier in 1963.

During the past year, the economy showed a strong advance. Production, employment and incomes rose substantially; prices showed a fairly modest increase. The expansion continued to be broadly based, with most industries and most parts of the country sharing in the improvement.

The most significant contribution to the increase in demand came from a sharp expansion in merchandise exports, higher outlays for fixed capital and increased consumer spending.

Merchandise exports in the first half of 1963 were \$226 million higher than in the corresponding period of the previous year. This increase, which amounted to better than 7 per cent, resulted in an export surplus of \$135 million on merchandise trade, compared with a \$52 million deficit during the same period in 1962.

Combined capital outlays on plant and machinery during the first half of 1963 averaged 3.5 per cent higher than in 1962. The increase in expenditures on machinery and equipment brought the annual rate in the second quarter to the highest value since the high investment level of 1957.

The upward trend in labour income seems to have had considerable influence on the buying mood of the average consumer. Retail sales have shown a strong advance. In the third quarter, they were running about 6 per cent ahead of the year before. Government spending on consumer goods and services was moderately higher in 1963 than in 1962. Housebuilding was an additional source of strength: housing starts in 1963 were 16 per cent higher than in 1962.

But there are still a number of problems to be solved. Unemployment is still high, despite the very considerable decrease that occurred during the past year. In addition, soft spots in particular industries and in particular areas require special attention.

In December, employment was 268,000 higher, and unemployment 68,000 lower than a year earlier. In September and October the seasonally adjusted unemployment rate was 5.3 per cent, the lowest since early in 1957.

The sharp fluctuations in seasonal activity continue to be one of the largest single causes of unemployment in Canada. As part of a program aimed at reducing this kind of unemployment, the Government has taken certain measures with respect to particular industries. The construction industry, which accounts for a major part of seasonal unemployment, has been given particular attention.

The Municipal Winter Works Incentive Program has been expanded and changed in several ways. This program has been broadened progressively since it was introduced in the winter of 1958-59, so that winter employment provided through the program has expanded steadily. This year, the ceiling on federal incentives for buildings and municipal renovations was raised from \$50 thousand to \$100 thousand in order that municipalities could plan the inclusion of larger buildings in their winter work plans.

A new incentive has been added to provide further stimulus to construction in 45 areas of high winter unemployment and 35 areas of heavy long-term unemployment. The federal payments for approved projects in these areas have been raised from 50 to 60 per cent of payroll costs.

To promote a higher level of residential construction, a new incentive has been tried this year: a direct payment of \$500 to the first purchaser or owner of a house which is substantially built during the months December to March. This incentive has had a substantial impact on housebuilding employment this winter: housing starts in December in urban centres of 5,000 population and over were 109.9 per cent more than starts in December 1962.

In addition to action to reduce unemployment during the winter months, a program has been established to attract new industrial facilities to areas of slow growth and chronic unemployment. Under this program, firms establishing new enterprises in 35 designated areas will be allowed a "tax holiday" for three years, and may thereafter claim accelerated depreciation for income tax purposes.

In many parts of eastern Canada, unemployment has been a more persistent and more serious problem than in other parts of the country. The Atlantic Provinces Development Board has been established to strengthen these provinces and a fund has been provided to promote capital investment.

The Government intends to increase its support to the training of unemployed workers. In order to provide further encouragement to the training of unemployed workers, the Government proposes to increase its contribution to the provinces from 70 to 90 per cent of the provincial training allowance. This additional contribution will allow the provinces to release more funds for additional programs.

Action has also been taken to reduce unemployment among older workers. The Older Workers Incentive Program is an experiment to see whether the payment of part of wages will encourage employers to hire and train workers over 45 years of age who have been unemployed for six months or more.

Wages and Working Conditions

In August 1963, average weekly wages and salaries of non-farm workers in Canada was \$83.28, an increase of \$2.48, or 3.0 per cent, over August 1962. This increase represented a rise in real wages and salaries of more than 1 per cent over the twelve-month period.

All major industrial groups in the economy shared in the increase of weekly wages and salaries achieved between August 1962 and August 1963. Earnings in manufacturing, construction, public utilities, mining, forestry, and transportation, storage and communication showed a greater rate of increase than the over-all industrial averages. The ranking of industries by average weekly wages and salaries was unchanged from 1962. As in the previous year, the largest relative increase in weekly income was in the Atlantic region. British Columbia continued to enjoy the highest average income.

Over the past decade or so, Canadian industry has reduced the work-year by reducing the standard work week and by extending annual paid statutory holidays and vacations. A survey of working conditions in Canadian manufacturing industries shows that last year, 75 per cent of plant workers were employed in establishments with a standard work week of 40 hours or less, compared with 25 per cent in 1949.

Over the same period, at least two weeks of vacation has become practically universal.

In addition, the proportion of plant workers granted three weeks annual paid vacation after varying years of service increased to seven out of ten plant workers from the 1949 level of three out of ten. A further change in the pattern of paid vacations has been the steady increase in the number of long-service employees entitled to a fourth week—40 per cent in 1963 contrasted with only 4 per cent a decade ago.

In the past ten years, the proportion of plant workers entitled to eight or more statutory holidays annually has increased from 50 per cent to nearly 75 per cent.

Industrial Relations

Collective agreements covering hundreds of thousands of workers were concluded without work stoppage during 1963. In the first nine months of the year, the proportion of working time lost through industrial disputes amounted to less than one tenth of one per cent.

The most extensive strikes were in the construction industry in Ontario, manufacturing in Quebec and in the fishing industry in British Columbia. A strike involving construction workers in the Toronto area resulted in an employment loss of 63,000 man days.

One of the more discouraging situations that had to be faced during the year concerned the actions of the Seafarers' International Union. In order to put an end to the harassment to maritime shipping, the Government accepted the recommendations of the Norris Industrial Inquiry Commission and, after approval by Parliament of the necessary legislation, imposed a temporary Government trusteeship over maritime transportation unions.

During the first half of 1963, nearly 150,000 workers across Canada were affected by 116 major collective agreements negotiated in all industrial sectors except construction. A major collective agreement is one that covers 500 or more employees.

The duration of these major agreements ranged from one to three years; 27 were effective for a one-year term, 69 for two years, 16 for three years, and the rest for various other periods within the range.

More than half of the one-year contracts provide wage increases of 3 to 6 cents an hour on labour rates. Nearly half of the two-year contracts gave increases of 7 to 13 cents a year. Eight of the three-year agreements granted wage increases totalling 10 to 13 cents an hour over the life of the agreement.

Economics and Research Branch.*

ILO Reports on World Labour Situation in 1963

The world labour situation in 1963 followed the pattern of previous years: continued improvement in industrialized countries, a generally stagnant situation in the developing countries. Such is the picture that emerges from the statistical data gathered by the International Labour Office and released last month.

In the industrialized countries, employment is rising and unemployment (except in a few cases) is diminishing, weekly hours of work are going down, and money wage increases generally exceed rises in consumer prices, despite the fact that prices have been increasing, in most cases at an accelerating rate.

Figures relating to the developing countries are spotty. Nevertheless, the available data show that the workers in these countries continue to suffer from widespread unemployment and underemployment, often accompanied by price increases reaching as high as 40, 80 or even over 100 per cent. The gap between the situation of workers in industrialized and developing countries is thus widening.

The total number of employed persons reached new record levels in 1963 in almost all of the industrialized countries. In several countries, however, the rate of increase was somewhat slower than in 1962. In the industrialized countries, workers in agriculture and in mining continued to move into other industries.

Unemployment, as in previous years, was unevenly spread in the world. As a result of favourable conditions, it has fallen in a number of countries (most of the industrialized countries of Europe and Japan) virtually to a rock-bottom level. In fact, many European countries have had a shortage of manpower. Scattered and incomplete data from the developing countries indicate that unemployment and especially underemployment remained very high, largely as a result of the increasing population.

The rise in consumer prices was slightly more rapid in 1963 than in the previous year in most of the countries surveyed; but in one country out of five the rise slackened.

Money wages increased in virtually all the countries for which data were available.

Employment and Unemployment, January

An estimated 6,231,000 persons were employed in January. The decrease of 197,000 during the month was about in line with seasonal expectations.

Unemployment increased seasonally by 120,000 between December and January, to 466,000. The labour force declined by 77,000 to 6,697,000, mainly as the result of withdrawal of seasonal workers.

Unemployment in January represented 7.0 per cent of the labour force, compared with 8.3 per cent in January 1963 and 8.5 per cent in January 1962. In December the unemployment rate was 5.1 per cent.

Seasonally adjusted, the January unemployment rate was 4.9 per cent, unchanged from December.

Employment in January was up by 275,000, or 4.6 per cent, from a year earlier, and unemployment was down 75,000. The labour force was 200,000 higher than in January 1963.

Employment—The employment decline between December and January stemmed mainly from seasonal reductions in outdoor activities and the release of temporary help hired for the Christmas season. In non-farm industries, employment showed a net decrease of 189,000, which was about average for the period. The decline in farm employment was the smallest in several years.

Compared with a year earlier, non-farm employment was up 240,000. The largest increases occurred in service, manufacturing and trade. Agricultural employment was 35,000 higher than in January 1963.

During the fall and early winter months, the number of employed men decreased less than usual, reflecting the strength of the goods-producing industries, particularly manufacturing, forestry and residential construction. In January 1964, an estimated 4,416,000 men were employed, some 143,000, or 3.3 per cent, more than a year earlier. This compared with an average annual rate of increase of 1.4 per cent during the past five years. Employment of women continued at a high level.

Employment was up considerably from the previous year in all regions except the Atlantic, where it was virtually unchanged. The increases ranged from 4.4 per cent in Ontario to 6.7 per cent in British Columbia.

Manpower Situation, Fourth Quarter, 1963

The last half of 1963 was a period of continuing economic expansion in Canada, during which industrial output, employment and incomes advanced to record levels. The improvement surpassed earlier expectations.

For a brief period early in the summer, the pace of business activity showed signs of slowing down: many key sectors of the economy experienced little or no advance for several months. In the last half of the year, however, the expansion became more broadly based. As a result, the momentum picked up considerably, especially in the final quarter of 1963. Moreover, most of the key business sectors which tend to foreshadow coming events showed a concerted rise. Thus, at the start of the new year, prospects for the months ahead were generally bright.

Productive activity has been rising steadily during recent months. Between August and October, the seasonally adjusted index of industrial production increased by 2.5 per cent. Production increases were recorded in almost all parts of manufacturing; especially large gains took place in some of the durable goods industries.

Data on new orders and unfilled orders indicate that the high level of activity in manufacturing will be sustained. Unfilled orders have risen steadily since August (discounting seasonal factors), climbing to \$2.4 billion in October. The October total of unfilled orders—up 9 per cent from January 1963—was the highest in almost six years.

Increased consumer expenditures on goods and services provided a strong expansionary influence during 1963. Supported by a strong demand for automobiles and other durables, retail sales in the first 11 months of the year were 4.9 per cent higher than in the corresponding period in 1963; in the July-November period, the increase over the year was 6.1 per cent.

Although quantitatively less important than consumer expenditures, exports, government spending, and investment on machinery and equipment increased substantially over the year. Merchandise exports in the first 11 months of 1963 were 8.4 per cent higher than in the corresponding period in 1962.

The upward trend in consumer spending has been reinforced by rising incomes. Between January and October, labour in-

come increased by 4.6 per cent, after seasonal adjustment. All provinces and all major industries shared in the increase in labour income.

Employment declined less than seasonally during the last quarter of 1963. This was the second consecutive quarter in which there was a noticeable improvement, the combined increase for the two quarters being 3.0 per cent, after seasonal adjustment.

The average length of the work week in manufacturing was 40.9 hours in October compared with 40.5 hours in July, which was the low point for the year. Average weekly hours declined steadily between April and July, after which they began to increase again. Average hourly earnings, at \$1.97 in October, were at an all-time high. The increase since the beginning of 1963 was 6 cents an hour.

Unemployment increased less than seasonally between the third and fourth quarters of 1962. Rising by 34,000, the increase was only about half the average for the period during the past five years. The seasonally adjusted unemployment rate declined steadily during the last half of the year, from 6.0 per cent in July to 4.9 per cent in December. At year-end, the unemployment rate was at its lowest since the summer of 1957.

Employment

Employment in the fourth quarter of 1963 averaged higher by 248,000, or 4.0 per cent, than in the corresponding period in 1962. Almost all of the increase was in non-farm industries. The largest gains occurred in service and manufacturing, which together accounted for about three-quarters of the total advance. Smaller gains took place in trade, forestry and construction. In the remaining industries, employment levels were much the same as the year before.

During the second half of 1963, total employment, seasonally adjusted, increased by 3.0 per cent, which represents some 189,000 new jobs. This was a substantially higher rate of advance than in the first six months. The improvement was widespread; most of the major industrial divisions outside of agriculture showed gains. By contrast, in the earlier part of the year, the employment expansion was largely confined to the service industry.

The remarkably strong performance of the economy during the second half of

The review is prepared by the Employment and Labour Market Division of the Economics and Research Branch.

1963 can be attributed, in large part, to the resurgence of activity in manufacturing. Employment gains in manufacturing were generally larger and more widespread than in any similar period of the current business upturn. Between June and November, total manufacturing employment increased by 2.0 per cent. The seasonally adjusted employment index in November climbed to 118.0. This was 10.1 per cent above the trough of the last business cycle and established a new peak, breaking the previous record established in 1956.

The durable goods sector of manufacturing has been a major expansionary force during recent months. Between June and November, employment in this component increased by 3.3 per cent, after allowing for seasonal factors. The automotive industry continued to be the pace-setter. At the end of November, motor vehicle employment was 16.4 per cent higher than the year before and 26.0 per cent higher than two years ago. Motor vehicle parts and accessories registered a similarly large advance. During the latter part of the year, activity in this industry was at an all-time high.

Other durable goods industries that figured prominently in the business upturn during the past year were iron and steel, aircraft and parts and wood products. Activity in the electrical apparatus and supplies industries remained fairly stable during the first half of 1963, after expanding at an unusually rapid pace during 1961 and 1962. More recently, this industry has resumed an upward trend, and recorded an employment gain of 1.3 per cent between July and November. Except for shipbuilding, which registered a slight decrease, employment levels increased over the year in all of the durable goods industries.

Responding to the upward trend in orders from such important steel consuming industries as building construction and the automotive industry, output and employment expanded noticeably in almost all branches of iron and steel products. Canadian mills turned out 8 million tons of steel ingots in 1963, an increase of 14.2 per cent from the previous year.

To an increasing extent, Canadian producers were supplying the domestic market. At the same time, there has been a strong advance in exports. In the first eleven months of 1963, exports of iron and steel products were more than one-fifth higher, in value, than in the corresponding period in 1962. The largest employment advance during the year was in primary iron and steel; in November, the employment index was 6.1 per cent higher than a year earlier and 19.5 per cent above the cyclical low point, which was reached at the beginning of 1961.

In the non-durable goods sector, employment expanded during the second half of 1963 in the clothing and textile industries. Each of these registered a year-to-year employment advance of 5.0 per cent at the end of November. Elsewhere in this sector of manufacturing, employment levels showed little year-to-year change.

The service industry experienced a relatively slow rate of employment growth during the first half of 1963 but it has been a major expansionary force since then. In the final quarter of 1963, employment in the service industry averaged 108,000 higher than in the corresponding quarter of 1962. The largest gains were in community, and personal service.

Unemployment

Unemployment declined noticeably during 1963, particularly during the last half of the year. The unemployment rate averaged 4.5 per cent in the fourth quarter of 1963, the lowest of any fourth quarter since 1956.

Between the fourth quarter of 1962 and the fourth quarter of 1963, the unemployment rate dropped from 6.0 per cent to 5.1 per cent for men and from 3.2 per cent to 2.9 per cent for women.

In December 1963, unemployment was estimated at 346,000, down 68,000 from the year before. Virtually all of the drop was among persons unemployed for more than one month, and more than four fifths of the decrease was among persons 25 to 64 years of age.

Regional Manpower Situation

ATLANTIC

In the Atlantic region, employment showed an above-average decrease during the latter part of 1963. Between the third and fourth quarters, total employment fell by an estimated 36,000, which compares with an average decline of 24,000 during this period in the previous five years. By contrast, each of the nation's other four regions registered better-than-seasonal gains during this period.

The slowing-down that became apparent in the October-December period followed a fairly strong third quarter. Between the second and third quarters of 1963, total employment in the region, allowing for seasonal factors, increased by 1.7 per cent, the same rate of advance as for the country as a whole. The first half of 1963 was a period of relatively slow growth, so that the net advance for the full year was fairly small.

The lack of over-all employment growth during the fourth quarter of 1963 is somewhat surprising, considering the improvements in certain key industries. Manufacturing, for example, has shown further strengthening, with virtually all major sectors of the industry sharing in the improvement.

Mining employment edged down during the last half of the year but it continued substantially above year-earlier levels. The construction industry was a constant source of weakness throughout 1963. In the service-producing industries, employment changes during the final quarter of 1963 were about in line with seasonal patterns.

In the fourth quarter of 1963, employment averaged 555,000, about the same as the year before. The year-to-year comparison shows a mixture of gains and losses among individual industries and areas. Employment was higher than the year before in manufacturing, mining and forestry, and lower in transportation and construction. There was little change over the year in the number of employed persons in the service industries.

Employment in manufacturing increased considerably during the past year. At the end of October, the index (1949=100) was 120.1, up from 115.0 a year earlier and up from 110.0 two years before. The improvement in this industry was remarkably widespread. Except for railway rolling stock, which showed little or no change, all parts of manufacturing shared in the increase. Year-to-year gains ranged from 2.8 per cent in paper products to 11.0 per cent in shipbuilding.

Activity in metal mining showed an irregular decline during the last half of 1963. Nevertheless, total mining employment remained appreciably higher than a year earlier. At Bell Island, Nfld., operations were resumed in September, after a two-month shutdown, although small reductions in the work force took place again during the final quarter of 1963. In the fourth quarter, employment was higher than the year before in both metal mining and non-metal mining. Activity in fuels showed little change over the year.

Forestry employment increased more than seasonally during the latter part of 1963, after being at an unusually low level for more than a year. The construction industry, which has been a continuing source of weakness throughout the current business upswing, failed to improve during the last half of the year. Prospects were a little brighter, however, as a result of an upward trend in contracts awarded. In the July-October period, the value of construction contracts awarded was 11 per cent higher than in the summer months in 1962.

Unemployment in the Atlantic region during the fourth quarter of 1963 averaged 45,000, or 7.6 per cent of the labour force. In the fourth quarter of 1962, the average unemployment rate was 9.1 per cent and in 1961, it was 8.8 per cent.

In December, the classification of the 21 labour market areas in the region (last year's figures in brackets) was as follows: in substantial surplus, 17 (18); in moderate surplus, 4(3).

QUEBEC

The last half of 1963 featured a strong employment advance in the Quebec region. Increasing by 2.3 per cent in the third quarter and 1.5 per cent in the fourth quarter (allowing for seasonal factors), the expansion represents a net gain of about 65,000 new jobs since April-June. This was a substantially faster pace of advance that

in any previous six-month period of the current business upswing. This rise in employment was accompanied by a strengthening in labour force growth.

The number of unemployed, adjusted for seasonal variations, remained relatively high during the summer months but

registered a decline during the last half of 1963.

Consumer expenditures on goods and services have provided an important stimulus to the employment expansion. In October and November, retail sales in Quebec were about 6 per cent higher than in the summer months in 1962. Providing additional support was the rising trend in exports, increases being recorded in a fairly wide range of products.

Estimated employment in the fourth quarter of 1963 averaged 1,803,000, which represents a net gain of 93,000, or 5.2 per cent, over the fourth quarter of 1962. All of the advance was in non-farm industries. Farm employment was slightly lower than a year earlier.

One of the more notable developments in the Quebec labour market during the second half of 1963 was the unusually strong advance in service employment. The improvement appears to have been mainly in business, community and personal service. Other industries, which recorded noticeable employment gains since the middle of the year, discounting seasonal influences, were trade, finance, insurance and real estate.

Increasing job opportunities in the service-producing industries attracted a large number of women into the labour market, and an equally large number found jobs. In December, the number of women in the labour force of the Quebec region was estimated to be 48,000 higher than a year earlier. Between 1960 and 1961, and 1961 and 1962, (December figures), the number of women in the labour force showed very little change.

The pace of business quickened in Ontario during the last half of 1963. The improvement was reflected in increased employment and income and a substantial decrease in the number of unemployed. By the end of the year, production levels continued to be well maintained in most industrial centres. Much of the support has come from heavy expenditures on consumer goods. Other important contributing factors stemmed from an upward trend in exports and a renewed expansion of expenditures on capital goods.

Total employment, seasonally adjusted, increased by an estimated 23,000, or 1 per cent, between the third and fourth quarter of 1963. The main supporting strength can be traced to manufacturing and the service-producing industries. Service employment, which expanded relatively slowly during 1962 and the first half of 1963, has shown

Employment levels in manufacturing have been generally well maintained. Industries that showed further signs of strengthening were clothing, textiles and wood products. Activity in shipbuilding and electrical apparatus declined during this period.

Construction and mining employment declined seasonally during the fourth quarter. Residential construction was reported to have held up better than usual, but decreases in other sectors of construction appear to have been about in line with seasonal patterns. Housing starts in November were 12 per cent higher than a year earlier.

The largest year-to-year employment gains took place in the service-producing industries. Manufacturing registered a net gain of about 1 per cent with gains in food, textiles, clothing, wood products and non-ferrous metals. The employment advances in these industries more than made up for the losses in shipbuilding and electrical apparatus. At the end of October, the employment index in construction was 148.8, up from 146.8 a year earlier. Mining and forestry registered small year-to-year declines.

Unemployment in the fourth quarter of 1963 averaged 114,000, or 5.9 per cent of the labour force. In the last quarter of 1962, the unemployment rate was 7.0 per cent; in 1961, it was 6.5 per cent.

In December, the classification of the 24 labour market areas in the region (last year's figures in brackets) was as follows: in moderate surplus, 6(7); in substantial surplus, 18(17).

ONTARIO

a strong advance during the past three months. A similar trend has been apparent in trade, the most marked improvement being in retail trade.

The upward trend in manufacturing employment that began in the second quarter of 1962 continued unabated during recent months. Showing the strongest year-to-year advances were the automotive and automotive parts industries, steel, lumber and textiles. Production of passenger cars in the last five months of 1963 was one-fifth higher than in the corresponding period of the previous year. For the calendar year, output of motor vehicles (passenger cars and trucks) totalled 630,550, establishing a new record. At year-end, employment in the automotive industry was 15 per cent higher than the year before.

Steel plants operated at close to rated capacity during the fourth quarter, with

ingot production showing a substantial increase over the year. As a result of expanding rolling-mill facilities, which have made it possible to produce an increasing variety of extra-wide plates and sheets, there has been a substantial reduction in imports. About 90 per cent of Canadian requirements are now being met by domestic producers. Over the year, employment in primary iron and steel, and steel products other than transportation equipment, rose by approximately 5 per cent.

Among the metal-using industries that showed sizeable gains during the last half of 1963 were agricultural implements—benefitting from increased domestic and export sales—machinery—where bookings were still increasing—and makers of iron castings. There was some improvement, too, in the aircraft industry. Activity in the electrical-goods industry has levelled off at the high plateau that was reached in the early part of the year.

Except for certain parts of non-ferrous metals, which experienced cutbacks in production and employment during the latter part of the year, employment levels were well maintained in all parts of the durable-goods industries. In the soft-goods sector, there was evidence of further strengthening.

PRAIRIE

A record wheat crop, estimated at 703 million bushels, gave the Prairie economy a considerable boost during the last half of 1963. The bumper crop found a ready market in Russia, China and other Communist countries. The resulting increase in farm cash income provided a strong stimulus for expansion of consumer goods and services which, in turn, gave rise to a pick-up in employment throughout the region. Reflecting the increase in farm cash income, purchases of farm implements during the latter part of 1963 were running 15 per cent ahead of a year earlier.

In the fourth quarter of 1963, employment was estimated to average 1,136,000, an increase of 36,000, or 3.3 per cent, over the fourth quarter of 1962. Most of the improvement took place in the last half of the year. The largest gains over the year were in non-farm industries—mainly in trade, finance and services. Farm employment, however, increased by an estimated 18,000, against the secular trend.

During the seasonal peak in farm activities last summer, employment in agriculture was estimated to be 346,000, which was some 9,000 higher than the year before. However, even with a larger farm work force, farm help was reported to have been in short supply in most areas during the

harvesting season. With the completion of grain harvesting, the demand for farm workers eased noticeably. During November and December, cattle feeders and general farm workers were in demand in a number of areas.

There were moderate gains in textiles and clothing, both of which showed an improvement over the year. In other non-durable goods industries, employment levels have shown little change since the middle of the year, apart from seasonal fluctuations. The construction industry showed some improvement in the final quarter of 1963, after contributing little to the expansion of the economy during the spring and summer months. Housing starts increased sharply during the latter part of the year. Suppliers of building materials were reported to be very busy, reflecting the pick-up in residential construction.

In farming and forestry employment, changes between the third and fourth quarter followed seasonal patterns. Employment in metal mining showed a somewhat larger than seasonal decrease.

Unemployment in Ontario increased seasonally between the third and fourth quarter of 1963. Averaging 77,000, or 3.1 per cent of the labour force, it was slightly lower than a year earlier.

In December, the classification of the 34 Labour market areas in the region (last year's figures in brackets) was as follows: in balance, 5(4); in moderate surplus, 27(25); in substantial surplus, 2(5).

The construction industry experienced a relatively slow third quarter but showed some improvement in the final quarter of the year. Housing was a little stronger at year-end, although it still lacked much of the vigour which was in evidence a year earlier. Activity in non-residential construction continued at about the same level as the year before, a decline in institutional building being offset by gains in other sectors, notably in pipeline construction.

Manufacturing employment continued to expand. In the fourth quarter, year-to-year gains were apparent in clothing, wood products, iron and steel and transportation equipment. The aircraft and parts industry showed a particularly strong advance. Railroad and railway rolling stock equipment showed a more modest improvement.

Employment was lower than a year earlier in non-metallic minerals and petroleum and coal products. Mining employment rose during the last half of 1963, mainly as a result of increased output of non-ferrous metals and potash. Some improvement

occurred also in coal mining and oil drilling. During the last half of 1962 and the first half of 1963, mining employment had been following a downward course.

The general prosperity of the region brought about a decided increase in activity in trade, finance and services during both the third and fourth quarters. In transportation and public utilities, employment was remarkably stable during the period under review, aside from seasonal variations.

Unemployment in the region dropped seasonally in the third quarter of 1963 and increased less than seasonally in the final quarter, when it averaged 33,000, or 2.8 per cent of the labour force, compared with 41,000, or 3.6 per cent of the labour force, a year earlier.

In December, the classification of the 19 labour market areas in the region (last year's figures in brackets) was as follows: in balance, 1 (0); in moderate surplus, 17 (14); in substantial surplus, 1 (5).

PACIFIC

The brisk upward trend that was characteristic of employment in the Pacific region during the early part of 1963 gained momentum as the year progressed. Over the year, total employment in the region rose by an estimated 27,000, a gain of about 5 per cent. Except for a temporary pause during the second half of 1962, the region has experienced an uninterrupted expansion during the past three years. The largest gains in the latter half of 1963 took place in forestry, manufacturing, construction, trade and finance.

Construction employment has shown a strong advance since mid-summer, resulting in the busiest fourth quarter since 1959. The most marked improvement was in residential construction. Housing starts in October-November were 35 per cent higher than in the corresponding months of 1962. Activity in the non-residential sector also increased, as work advanced on several large business and engineering projects. The \$73.5 million Portage Mountain hydro dam on the Peace River is one of the larger engineering projects presently under construction.

Employment in all major sectors of the forestry industry showed increases during 1963, the total gain being approximately 5 per cent. The logging, lumber and plywood industries experienced substantial advances in production and sales, and benefited from improved prices. Increased lumber shipments to the United States helped to bolster activity in this industry. The two-month strike of the United States west-coast lumber industry provided a temporary stimulus to output and employment in Canadian mills.

Mining employment remained fairly stable during the second half of 1963, after registering an advance during the early part

of the year. New markets were secured with Japan for coal, copper and iron ore. Another development that had an impact on the mining industry during the year was the completion of the oil pipeline linking the Peace River district and the coast, thereby allowing shipments to the United States.

Manufacturing employment rose by about 2 per cent over the year, most of the gain occurring in the last half of 1963. Advances were recorded during the third and fourth quarters in wood and paper products. Printing shops and chemical plants also contributed to the employment rise. The iron and steel industry continued to operate at a high level, turning out structural and reinforcing steel, conveying equipment, and various machinery items.

In the shipbuilding and food industries, employment levels were moderately lower than the year before. Layoffs were reported to have taken place in a number of meat processing plants during the past year as a result of automatic equipment being installed.

All parts of the transportation industry experienced a busy fourth quarter; employment was slightly higher than a year earlier. In trade, finance and service establishments, employment rose by about 5 per cent over the year. About half of this was in the final two quarters.

During the fourth quarter of 1963, unemployment in the Pacific region averaged 38,000, or 5.8 per cent of the labour force. In the fourth quarter of 1962, it averaged 42,000, or 6.7 per cent of the labour force.

In December, the 11 labour market areas in the region (last year's figures in brackets) were classified as follows: in moderate surplus, 7 (6); in substantial surplus, 4 (5).

CLASSIFICATION OF LABOUR MARKET AREAS—JANUARY

	Substantial Labour Surplus	Moderate Labour Surplus	Approximate Balance	Labour Shortage

Vocational Rehabilitation of Older Disabled Persons

Little-known feature of Canada's federal-provincial program of vocational rehabilitation services for disabled persons is that it has no upper age limit. Of 1,814 cases of successful rehabilitation in 1962-63, more than 400 were aged 45 or more

Canada's federal-provincial program of vocational rehabilitation services for disabled persons is fairly well-known. What is not so well-known is that the program has no upper age limits. Many persons of advanced age have been and are being successfully rehabilitated, many to suitable employment.

It is widely accepted that age in itself can be a significant social handicap to obtaining or returning to gainful employment. When this handicap is coupled with a physical disability the odds against a return to self-sustaining status are multiplied.

In view of those difficulties, success in even a relatively small number of cases is significant and offers ample evidence that older, and sometimes quite elderly disabled persons can become self-sustaining. If it can be done for those with disabilities what might be accomplished for those who are able-bodied and in good health?

Of 1,814 cases of successful rehabilitation reported in 1962-63, 407 or 22.7 per cent were aged 45 or over. Of this number, 267 were men and 140 were women. Eighty-four of these older people, 46 men and 38 women, were in the age group 66 and over; 121, of whom 82 were men and 39 women, were in the 56-65 age group; the remaining 202—139 men and 63 women—were aged from 45 to 55 (see table, Part A).

These older people suffered from various types of disabilities in the following classifications: amputations, neuro-muscular-skeletal, hearing, seeing, neurological, respiratory, cardio-vascular and neuro-psychiatric problems (see table).

Despite these disabilities and their advanced ages, 227 of them—184 men and 43 women—were rehabilitated into gainful employment and the remainder were enabled to look after their own needs or to assume their normal roles as housewives (see table, Part B).

The types of occupations entered by these 227 disabled older people is significant also. Nine men and two women entered the professional and managerial field; 40 men and 11 women became sales persons or clerical personnel; 37 men and 26 women were

placed in service occupations; 22 men went into agriculture, fishery or forestry occupations; 30 men and 1 woman became skilled workers; 12 men and 1 woman became semi-skilled workers; and 34 men and 2 women were placed in unskilled occupations.

Part 3 of the table indicates that rehabilitation services take time. For 71 of these older disabled persons more than 24 months were required; but for 143 less than six months were needed.

The numbers involved were relatively few but still represented a significant proportion (22.7%) of all cases reported to Civilian Rehabilitation, Department of Labour, in 1962-63.

The following case histories are typical.

Case 1—Mr. X, aged 63, with a Grade 9 to 10 education, had had arteriosclerotic gangrene necessitating above-knee amputation of the right leg. His previous occupation had been toolmaker. His rehabilitation services, which lasted nine months, included surgery, physiotherapy, occupational therapy and an artificial limb. He was enabled to return to tool and die making, earning \$347 monthly.

Case 2—Mr. Y, aged 65, had educational qualifications ranging from the equivalent of Grades 5 to 8. His disability was intervertebral disc deterioration in the lumbar region. He suffered back pains and had difficulty in walking. The disability began in 1958. He had been a labourer, but was on public assistance at acceptance for rehabilitation services. After eight months of medical treatment and physiotherapy he was placed in unskilled labour at \$300 a month.

Case 3—Mr. A, aged 71, has educational equivalents Grades 5 to 8. His disability was vascular deficiency, necessitating amputation of the left leg below the knee. On Old Age Security, he was formerly a labourer. Rehabilitation services took eight months and included surgery, provision of an artificial limb and counselling, after which he became self-employed at odd jobs, supplementing his old age pension by about \$25 monthly.

Collective Bargaining, Fourth Quarter, 1963

During the fourth quarter of 1963, collective bargaining in Canada led to nearly 40 major settlements covering approximately 80,000 workers in a wide range of industries.

Three of these settlements brought an end to strikes of longshoremen at St. Lawrence River ports, and at two manufacturing plants in St. Jerome, Que. Other major agreements signed during the period included contracts covering employees in air transportation, telephone communications and uranium mining.

Contract negotiations affecting more than 120,000 workers in the railway industry were opened during the quarter with 16 unions presenting their proposals to the major companies.

In the longshoring industry, approximately 3,800 port workers at Montreal, Quebec and Three Rivers returned to work October 14 after a ten-day strike against member companies of the **Shipping Federation of Canada**. The strike came to an end when members of the **International Longshoremen's Association**, which had been negotiating with the Shipping Federation for nearly a year for the renewal of contracts that had expired on December 31, 1962, voted to accept settlement terms recommended by Judge René Lippé, federal mediator in the dispute.

The settlement gave wage increases of 30 cents an hour to longshoremen at Montreal and Quebec, 39 cents an hour to longshoremen at Three Rivers, 33 cents an hour to checkers at Quebec, and 34 cents an hour to checkers at Montreal in new three-year agreements. In addition, premium pay clauses were amended. Rates for Saturday work, previously straight time until noon, were changed to time and one half all day; for work from midnight to 5 a.m., previously time and one half, to double time. The formula for vacation pay is to be 4 per cent of gross earnings in lieu of the previous 8 cents per man-hour worked. The employers will also increase their contribution from 29 cents to 33 cents per man-hour worked toward the pension, welfare and vacation plans.

An important part of the settlement is provision for an enquiry into the administration and operation of the Shipping Federation of Canada-ILA trust funds, as recommended by a conciliation board the previous month (L.G., Oct. 1963, p. 886).

At the outset of negotiations, the Shipping Federation bargained with an ILA committee representing about 4,000 workers at Halifax and 2,800 workers at Saint John as well as employees at the St. Lawrence River ports. Agreement was reached last February—the proposed terms included annual wage increases of 5 cents an hour and annual increases of 2 cents an hour in company contributions to the welfare plan in a two-year contract—but the terms were rejected by the union locals at Montreal, Quebec and Three Rivers.

The union locals at Halifax and Saint John, however, accepted these proposals tentatively with the understanding that further meetings would be held if a different settlement were negotiated for the St. Lawrence River ports.

In November, negotiations between the Shipping Federation and the Halifax and Saint John locals were reopened and the employer representatives proposed terms along the lines of the Montreal settlement. The terms were subsequently accepted by the longshoremen.

Two strikes involving approximately 1,800 workers at St. Jerome, Que., ended during the quarter with the signing of new agreements between the **Rubber Workers** and **Dominion Rubber** in October and the **Textile Workers' Union** and **Regent Knitting Mills** in December.

The work stoppage at the Dominion Rubber plant had begun in September and lasted six weeks until a settlement was ratified by members of the Textile Workers' Union. The new agreement is for a term of three years and gives wage increases of 11 cents an hour to male employees and 9 cents an hour to female employees, and a reduction in the work week from 45 to 44 hours. Other terms of settlement include an increase in the night shift premium to 7 cents from 5 cents an hour, a minimum monthly pension of \$97.50, which had previously been \$87.50, and a reduction in the qualifying period for four weeks vacation from 25 to 22 years of service.

At Regent Knitting Mills, an 18-week strike that had started in August ended with the signing of a three-year contract giving general wage increases amounting to 14 cents an hour and classification adjustments ranging from 4 to 43 cents an hour. Furthermore, the work week is to be

This review is prepared by the Collective Bargaining Section, Labour-Management Division, of the Economics and Research Branch.

reduced from 49 to 45 hours in two steps for about 80 workers and from 48 to 46½ hours in two steps for some 200 workers, with other employees remaining on a 45-hour work week. Provision is also made for three weeks vacation after 18 years of service in 1964, after 17 years of service in 1965 and after 16 years of service in 1966.

Collective bargaining with Canada's major railways was opened in November as existing contracts of 15 unions representing non-operating employees and of the Brotherhood of Railroad Trainmen were due to expire December 31.

When contract negotiations began, 14 of the non-operating employees unions submitted their proposals jointly to the CNR, CPR and other railways on behalf of 80,000 employees of the companies. The Canadian Brotherhood of Railway, Transport and General Workers, bargaining agent for about 22,000 non-operating employees of the CNR and the Ontario Northland Railway, later presented its demands separately. In previous years, the CBRT had entered negotiations along with the other unions; this year it withdrew from joint bargaining in November.

According to newspaper reports, the non-operating employees unions were seeking a one-year agreement that would establish parity between their average hourly rates and wages paid in such durable goods industries as wood products, iron and steel products, transportation equipment, non-ferrous metal products and electrical apparatus and supplies manufacturing. The CBRT requested, in addition, longer vacations, a new system for sick leave, increases in health and welfare benefits, and a job freeze for employees with more than five years of service.

In November, Bell Telephone negotiated five company-wide agreements with its independent employees' associations—the Canadian Telephone Employees' Association, representing clerical and associated employees, communications sales employees and craft and services employees, and the Traffic Employees' Association, bargaining agent for telephone operators and dining service personnel.

More than 27,000 workers in numerous centres in Ontario and Quebec are covered by the new contracts, which supersede agreements that had expired in November. With the exception of the agreement covering telephone operators, which is for a term of 15 months, all contracts are of one year's duration.

The agreement covering employees in clerical and associated occupations gives wage increases ranging from \$1 to \$2.75 a week on top salary rates and from \$1.50 to

\$4.50 a week on starting salaries, such increases varying according to the grades and localities of the employees.

The wage increases granted to communications sales employees amount to \$18 a month in all localities plus an additional \$6 a month in communities other than Toronto, Montreal and Windsor.

In the bargaining unit comprising craft and services employees, wage increases of up to \$3 a week on starting rates and of \$2.25 to 3.50 a week on top rates, depending on the localities and classes of employees, were granted as a result of the settlement.

Under the agreement applying to traffic operators, wage increases on top salaries range from \$1.25 to \$2.50 a week, depending on locality. The agreement negotiated by the Traffic Employees' Association on behalf of dining service employees provides for wage increases of \$1.50 to \$2 a week on top rates for female employees and of \$2.25 a week for male employees, and wage increases on starting rates for female employees of \$2.50 to \$5 a week and for male employees of \$1.75 a week.

During the quarter, TCA negotiated two major settlements. One of these agreements, with the Canadian Air Line Flight Attendants' Association, is for a 20-month term and provides for annual salary increases of 2½ per cent. Included in the contract is a new rule that stewardesses and pursers based in Montreal will be required by May 1, 1965 to be bilingual; the company will provide courses of instruction.

The other TCA settlement resulted from negotiations on a mid-term wage reopener provided in a two-year agreement with the Machinists. The agreement covers about 4,400 employees in the maintenance and overhaul, station services and stores departments of the company.

In October and November a conciliation board assisted in the negotiations. In its report, the board noted that this was the first time in the 14-year history of collective bargaining between TCA and the Machinists that the two parties required the services of a conciliation board, and commended the existing relationship. In December a settlement was reached and ratified by the union membership. It gives increases of 4 per cent effective November 5, 1963 and provides for settlement pay of \$60 prorated from July 2, 1963 for employees on the payroll November 27.

In December, the United Steelworkers and Denison Mines, with assistance from a conciliation board, reached a settlement covering approximately 870 employees at Elliot Lake, Ont. The new agreement is of two years duration and provides for a wage

increase of 5 cents an hour in September 1964 and an additional wage increase of 2 cents an hour for hoistmen with compressor's papers.

During negotiations, an important issue in dispute had been a provision for separation allowances. Previously, the separation allowance was \$6 per month of service to a maximum of \$400. The union was requesting that the \$400 limit be removed. Under the new agreement, continuity pay for employees in the bargaining unit will be a maximum of \$450 up to September 1, 1964 and \$500 after that date, to be accumulated at the rate of \$6 a month of continuous service by employees from their last date of hiring to the expiry date of the agreement. Employees who have more than six months of continuous service with the company will qualify for continuity pay. No severance pay shall be granted, however, unless the severance is directly due to a complete shut-down.

To obtain severance pay, the employee must remain in the employ of the company

until his services are permanently severed for the above reasons. The obligation of the company to pay severance pay will cease at the termination of the agreement on August 30, 1965.

At an annual convention of the **United Packinghouse Workers** held in Vancouver during October, the delegates approved proposals for submission to meat packing companies in forthcoming negotiations. Contracts between the union and **Burns and Company, Canada Packers and Swift Canadian** are due to expire in March 1964.

The proposals formulated include: a reduction in the 40-hour work week to 37½ hours, an increase in the night shift premium from 12 cents to 21 cents an hour, up to six weeks vacation after 25 years of service, double pay for vacation taken outside the summer months, sabbatical leave of 13 weeks every five years for employees with 15 years of service, elimination of part-time work, wedding and bereavement pay for three days, voluntary overtime and separation pay.

Major Settlements in 1963

During 1963, collective bargaining in Canada in industries outside the construction sector resulted in 211 major settlements—those covering bargaining units of 500 or more employees—and produced new contracts for approximately 293,000 workers. More than half of these settlements were negotiated in manufacturing industries, and close to 20 per cent were signed in the service sector, which includes

such employers as municipal and provincial governments, hotels, hospitals and educational institutions.

Most of the major agreements reached during the year were signed for a two- or three-year term; two-year contracts predominated. Only 43 out of the 211 major agreements were for a period of one year.

Twenty-five of the major settlements gave no general wage increases but provided for

WAGE SETTLEMENTS DURING 1963, BY INDUSTRY

Collective agreements covering 500 or more employees concluded between January 1 and December 31, 1963 excluding agreements in the construction industry and agreements with wage terms in piece or mileage rates only. The data are based on preliminary reports where copies of new collective agreements had not been received before compilation.

⁽¹⁾ The wage increases shown relate only to base rates, i.e., labour rates or their equivalent. Fractions of a cent are rounded to nearest cent. The data on the number of employees covered are approximate and include all classifications covered by the agreement.

⁽²⁾ Includes two bargaining units (600 and 4,400 employees) for which two wage settlements were concluded during 1963. The number of employees in each of these bargaining units appears twice in the table.

other improvements. Most of the settlements that provided no general wage increase were in the pulp and paper industry in eastern Canada; their main features were classification adjustments for skilled tradesmen, higher shift premiums, provisions for jury-duty pay, shorter qualifying periods for four weeks vacation, higher company contributions toward hospital and medical insurance plans, and improvements in group life insurance and pension benefits. A few settlements in this industry, however, provided for wage increases ranging from 2 to 6 cents an hour.

About two-thirds of the 43 major one-year agreements signed during the year gave wage increases of 3 to 8 cents an hour on labour rates.

Of the 119 major two-year agreements reached in 1963, more than half provided for labour rate increases ranging upward from 10 cents an hour.

In about one-third of the 39 three-year contracts, wage increases of 10 to 14 cents an hour on labour rates or their equivalent were provided for; in one-half of the three-year contracts, wage increases ranging upward from 15 cents an hour.

Education and Training of Girls in Britain

Women in Britain today spend more years in paid work outside home. Two recent studies of educational programs for girls deal with training in industry and total preparation of girls

Women of today's generation in Britain are spending more years in paid work outside the home. More free time from family duties, coupled with thriving economic conditions in the country, have created a new situation that has brought a pressing need to re-appraise educational programs for girls. Of special interest are two recent studies directed to this end.

The first of these, "Training Girls in Industry," a 35-page booklet published by the Industrial Training Council*, stresses the advantages of organized training programs for girls in industry. For employers it is sound business, as, in a competitive labour market, companies offering the best training schemes attract the better candidates.

Such training programs ease the transition from school to work. Well-planned use of time reduces the instruction period and minimizes waste of materials. A higher standard of work, increased production, lower turnover rate and improved morale bring further benefits to management.

The trainees themselves improve their earning capacity as a result of learning quick, safe and correct methods of work. Prospects of promotion are also greater for well-trained workers. And for young women who marry and later wish to return to work, proficiency gained when they were young should facilitate re-entry into the labour force.

The best training schemes combined on-the-job training with study at a technical college. They were based on a thorough study and analysis of the work to be done. Trainees were selected with full regard for aptitude and suitability, and well qualified instructors provided. Special induction programs and release during working hours for attendance at technical colleges eased the transition from school to work.

The second study, "the Education and Training of Girls"†, was undertaken by a working party of women versed in the needs of the community rather than being expert in the field of education. Their concern was with the total preparation of girls, testing its

adequacy for their future roles in a changing society—at home, at work and as citizens. Views were sought from school principals, teachers, employers, social workers and youth organizations as well as parents and girls themselves.

One headmistress of a grammar school described the expectations of her girls, aged 15 to 18, as: early marriage, a family, and work outside the home. She said that the girls were interested in housewifely arts but viewed them as a "co-operative enterprise" in which husbands and children would share.

Home economics teachers proposed a course on Preparation for Marriage and Home Life, to be followed by another on Preparation for the Community Life. They were of the opinion that every girl should have some knowledge of these wider aspects of living before leaving school, and that boys, too, would benefit from such courses.

Discussions with employers revealed frequent lack of preparation for first jobs. Girls whose standards were not high enough to enter clerical and secretarial work had been accepted because of desperate shortages of personnel. In the London area, it was found there were 30 such jobs for every girl applicant.

School girls themselves believed that education gave one greater scope in choosing a career and enabled one to earn a good living. Many of those who had recently left school had already realized that education does not end with school graduation—one must "go on learning all through life."

Although fewer girls than boys were receiving formal post high-school education, the numbers of women attending evening institutes, where they far outnumbered men, suggested eagerness to continue with further education if given the opportunity.

The women's group ruled out "soft options" for girls; they should have the best education they can get before marriage and have ready access to further education and training in later life. There should be equal opportunities for women in the universities and in the professions.

For girls, more and varied schemes of "day release" for further education were recommended. Also, the schools should give more attention to advising girls about careers and opportunities for employment.

* Set up by the British Employers' Confederation in 1958.

TEAMWORK in INDUSTRY

"It works. It fills a need. It's in its 20th year. We intend to keep it." Frank Gresty, personnel manager at the drug firm of John Wyeth & Brother (Canada) Limited, used this capsule comment recently to sum up the Windsor plant's assessment of its Employees' Operational Committee.

Union spokesman Roy Girard expressed similar sentiments. Mr. Girard is chairman of Local 9-368, Oil, Chemical and Atomic Workers' International Union (AFL-CIO/CLC). "Joint consultation has a definite place in industry", he declared. "It is good for the general welfare of the whole group. People need to be in contact with each other on the job."

Founded 1944

Founded in 1944, the EOC's main responsibility is to promote employee co-operation in production, efficiency, attendance, safety, good housekeeping and suggestions, and to sponsor sports, entertainment and a variety of special projects—one of which, by way of example, was an employee course in civic administration.

A true joint consultation committee in all its functions, the group is composed of 10 elected employee members, the company president, personnel manager, plant chairman and two department managers.

The committee convenes on two occasions each month. One of them is a dinner meeting featuring a banquet and floor show as a suitable aftermath to business.

In addition to the regular members of the Employees' Operational Committee, two guests are invited, one from among plant, the other from among office personnel. Priority is determined by the date on which an employee joined the company.

Eventually all personnel will have been guests of the committee. The plan is aimed primarily at the preservation and extension of the company's team spirit. At the same time, personnel are thereby introduced gradually to the responsibilities they will one day assume when their turn comes to serve on the committee.

There are special reasons behind the name for the committee. Its title, Employees' Operational Committee, represents an attempt to get away from what are described as "unnecessary distinctions" among employees.

As personnel manager Frank Fresty explained it recently: "We think that talk of 'labour' and of 'management' sets up barriers. It implies two factions. Our idea is to avoid distinctions between plant and clerical and supervisory personnel. What we have here is a team, and we want to keep it that way."

Team Concept

The Wyeth firm is solidly for this team concept. Management spokesmen point out that every member of the organization is essential—"otherwise he wouldn't be on our payroll." They emphasize that it is important that the good housekeeper and the chief chemist do their jobs equally well.

Consistent co-operation and stability are the keynote of employee-employer relations at John Wyeth, according to one management spokesman.

During a recent interview, Frank Gresty stated that the team spirit of the firm's 200 employees shines through, both on the job and off.

Of the roughly 150 suggestions and ideas submitted by personnel each year, 70 to 75 per cent receive some form of recognition or award for their utility. Practical suggestions take the major share, of course, but management believes that "good thinking" deserves encouragement too.

Teamwork among plant and office employees has also led to an impressive safety record. The first million hours of "no lost-time accidents" was passed in September 1962. The latest figure made public stands at close to 1,500,000 hours. Management says the credit belongs jointly to the committee's safety program and enthusiastic employee response to that program.

On the social side of life, it is not uncommon for Wyeth personnel, relatives and friends to show up at the annual "family Night" in numbers over 500 strong.

There is a similar keen participation in bowling, swimming and other sports and entertainment organized by the plant Employees' Operational Committee.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for three days during December. The Board issued four certifications designating bargaining agents, ordered one representation vote, rejected three applications for certification, and granted one application for revocation of certification. During the month the Board received 17 applications for certification and allowed the withdrawal of three applications for certification.

Applications for Certification Granted

1. National Association of Broadcast Employees and Technicians, on behalf of a unit of maintenance technicians and program operators at Radio Station CHML, Hamilton, Ont., employed by Maple Leaf Broadcasting Company Limited (L.G., Dec. 1963, p. 1109).

2. Canadian Brotherhood of Railway, Transport and General Workers, on behalf of a unit of bargemen employed by Vancouver Tug Boat Co. Ltd., Vancouver, B.C. (L.G., Dec. 1963, p. 1110).

3. District 50, United Mine Workers of America, Local Union 13946, on behalf of a unit of building cleaners and maintenance men employed by Central Mortgage and Housing Corporation at its Domaine Etria and Pavillon Mercier projects in Montreal, Que. The application had also included the Place Gouin project in Montreal, but the Board deemed that the appropriate unit should not include these employees (L.G., Dec. 1963, p. 1110).

4. Brotherhood of Locomotive Engineers, on behalf of a unit of locomotive engineers employed by The Algoma Central and Hudson Bay Railway Company, Sault Ste. Marie, Ont. (L.G., Dec. 1963, p. 1110).

Representation Vote Ordered

Brotherhood of Locomotive Engineers, applicant, The Algoma Central and Hudson Bay Railway Company, Sault Ste. Marie, respondent, and the Brotherhood of Locomotive Firemen and Enginemen, intervener. The Board directed that both the name of the applicant and the intervener appear on the ballot (L.G., Dec. 1963, p. 1110) (Returning Officer: A. B. Whitfield).

Applications for Certification Rejected

1. International Longshoremen's Association, Local 1657, applicant, and various companies as represented by The Shipping Federation of Canada, Incorporated, respondents (L.G., July 1963, p. 601) (see "Reasons for Judgment," below).

2. Transport Drivers, Warehousemen and Helpers' Union, Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Hubert Transport Inc., Ste. Thérèse, Que., respondent (L.G., Dec. 1963, p. 1109). The application was rejected for the reason that it was not supported by a majority of the employees affected in the representation vote conducted by the Board.

3. Teamsters, Chauffeurs, Warehousemen and Helpers, Local No. 91 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and John L. Bray, Ottawa, Ont., respondent (mail service) (L.G., Dec. 1963, p. 1109). The application was rejected for the reason that it was not supported by a majority of the employees affected in the representation vote conducted by the Board.

Application for Revocation Granted

The Board granted an application for revocation of certification affecting Tiger Transfer Ltd., Calgary, Alta., applicant, and Dairymen, Warehousemen, Cartagemen, Truckers and Helpers, Local Union No. 987, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, respondent (L.G., Dec. 1963, p. 1110). Local 987, the certified bargaining agent, did not contest the application.

Applications for Certification Received

1. United Steelworkers of America, Local 5115, on behalf of a unit of longshoremen employed by Kitimat Wharves Limited, Kitimat, B.C. (Investigating Officer: D. S. Tysoe).

2. National Syndicate of Employees of Ogilvie Flour Mills Co. Ltd., on behalf of a unit of employees of Ogilvie Flour Mills

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

Co. Ltd., Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

3. National Syndicate of Employees of Robin Hood Flour Mills Ltd., on behalf of a unit of employees of Robin Hood Flour Mills Ltd., Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

4. General Truck Drivers and Helpers' Union, Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Tourist Services Ltd., Whitehorse, Y.T. (see "Applications for Certification Withdrawn," below) (Investigating Officer: G. H. Purvis).

5. National Syndicate of Employees of Quebec Air Transport, on behalf of a unit of employees of Quebecair Inc., Rimouski East, Que., employed in its traffic, maintenance, and operations departments (Investigating Officer: R. L. Fournier).

6. National Union of Operating Engineers of Canada, Local 14850, District 50,

United Mine Workers of America, on behalf of a unit of operating engineers employed by Robin Hood Flour Mills Ltd., Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

7. Office Employees' International Union, Local 15, on behalf of a unit of office employees of Canadian Freightways Limited, Calgary, Alta., employed at its North Burnaby, B.C. terminal (Investigating Officer: G. H. Purvis).

8. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of Ogilvie Flour Mills Co. Ltd., Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

9. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of Robin Hood Flour Mills Limited, Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of four officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the province of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; five officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

10. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of Maple Leaf Mills Limited, Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

11. Brotherhood of Railroad Trainmen, on behalf of a unit of road conductors employed by Northern Alberta Railways Company, Edmonton, Alta. (Investigating Officer: D. S. Tysoe).

12. Brotherhood of Railroad Trainmen, on behalf of a unit of sleeping- and parlour-car conductors employed by the Canadian Pacific Railway Company, Montreal, Que. (Investigating Officer: R. L. Fournier).

13. Brotherhood of Railroad Trainmen, on behalf of a unit of road conductors employed by the Ontario Northland Railway, North Bay, Ont. (Investigating Officer: A. B. Whitfield).

14. National Association of Broadcast Employees and Technicians, on behalf of a unit of employees of Colonial Broadcasting Company, St. John's, Nfld., employed at Radio Station VOXM (Investigating Officer: D. T. Cochrane).

15. National Syndicate of Employees of Maple Leaf Mills Limited, on behalf of a unit of employees of Maple Leaf Mills Limited, Montreal, Que. (Investigating Officer: Miss M.-P. Bigras).

16. Canadian Air Line Dispatchers' Association, on behalf of a unit of flight dispatchers employed in Canada by Empresa Consolidada Cubana de Aviacion (ECCA) Cubana Airlines (Investigating Officer: Miss M.-P. Bigras).

17. National Syndicate of Employees of Quebec Air Transport, on behalf of a unit of hostesses and flight agents employed by Quebecair Inc., Rimouski, Que. (Investigating Officer: R. L. Fournier).

Applications for Certification Withdrawn

1. Miscellaneous workers, Wholesale and Retail Delivery Drivers and Helpers, Local 351, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and O'Connor Transport Limited, North Burnaby, B.C., respondent (L.G., Jan., p. 40).

2. Communications Workers of America, applicant, British Columbia Telephone Company, Vancouver, B.C., (traffic division), respondent, and Federation of Telephone Workers of British Columbia, intervener. (L.G., Jan., p. 40).

3. General Truck Drivers and Helpers' Union, Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Tourist Services Ltd., Whitehorse, Y.T., respondent (see "Applications for Certification Received," above).

Reasons for Judgment in application for certification affecting

*International Longshoremen's Association
and*

*12 Companies as Represented by The Shipping
Federation of Canada, Inc.*

Applicant

Respondents

This is an application for certification of the Applicant as bargaining agent for a unit of employees of the Respondents* engaged in the handling of ocean freight in and out of the port of Montreal and classified as checkers, coopers, timekeepers, manifest clerks and office clerks excluding supervisory and confidential employees—engaged on the docks in the port of Montreal.

* Empire Stevedoring Co. Ltd., Watts Watts Shipping Ltd., Kerr Steamship Limited, Brown & Ryan Limited, Wolfe Stevedores Limited, McLean Kennedy Limited, The Cunard Steamship Company Limited, The Robert Reford Co. Ltd., Eastern Canada Stevedoring Co. Ltd., Canadian Pacific Steamships Limited, Furness Withy & Company Limited, Montreal, Australia, New Zealand Line Limited.

The initial application covered the employees in these classifications of 35 companies, members of The Shipping Federation of Canada, engaged in shipping in and out of the port of Montreal. On July 9, 1963, the Applicant asked leave to submit, and submitted an amended application for certification, excluding therefrom such of the said companies named in the original application as did not have employees engaged on a regular basis in the classifications comprising the proposed bargaining unit. The effect of the amendment would be to reduce the number of companies to 12. These are the ones designated as the Respondents.

The Respondents oppose this amendment of the application but, subject to the Board's decision with respect thereto, gave consent to being joined in the application pursuant to and subject to the provisions of Section 9(3) of the Industrial Relations and Disputes Investigation Act.

In view of the circumstances and in the exercise of the discretion accorded to it under the aforesaid Act, the Board has granted leave to the Applicant to amend its application for certification as requested.

The basic issue between the parties concerns the appropriateness of the bargaining unit in respect of which certification is applied for.

The Applicant is and has been for a number of years the bargaining agent of employees of the Respondents and other member companies of The Shipping Federation of Canada, employed as checkers and coopers (cargo repairmen) at the port of Montreal under the terms of an existing collective agreement between them, as well as under preceding collective agreements.

The effect of the present application, if granted, would be to extend the scope of this existing bargaining unit in so far as it relates to the employees of the Respondents, by adding thereto timekeepers, manifest clerks and office clerks employed by them on the docks in the port of Montreal. The Applicant claims an over-all majority membership of employees in this proposed enlarged unit, but has not a majority membership of employees comprising the additional group whom it thus seeks to add to the existing unit.

According to the evidence given to the Board, checkers and coopers are hired by the Respondents on a day-to-day basis through the Applicant and are paid on an hourly basis. They are employed only during the open port season. On occasions, the services of checkers may be used as clerks on the docks to help clean up an accumulation of work on the docks. In such instances, under the existing collective agreement, they are to be paid an additional hourly rate while so employed.

After the port of Montreal is closed down in the winter, some checkers originally from Saint John may be sent down to the port of Saint John, N.B., to do similar work during the winter months when this port's activities increase, and they may in such event in some instances be employed as

clerks on the docks if the latter are in short supply.

The office personnel, including the clerks and timekeepers on the docks, are paid on a monthly-salary basis, are hired directly by the company, and are generally employed on a year-round basis. In the winter period, when the port of Montreal is closed, these employees are engaged in clerical work in the main offices of their company in Montreal or are transferred by their employer for similar employment in the Maritime ports to help look after the substantial increased shipping activities during that period. These office workers are accorded the same pension rights, medical benefits and vacation-with-pay rights as other clerical employees of their employer in the main office.

The Respondents contend that the work of the clerical staff on the wharves is simply an extension of the work done by the clerical staff in the main offices and that their functions are essentially the same, and that the timekeepers who keep the time of the longshoremen on the docks are a part of the company payroll department. The Respondents submit that their community of interests is with the office employees in the main office rather than with the checkers and coopers who it is claimed are in fact casual employees.

The applicant contends that though there is a clear line of demarcation between the work of the office clerks on the wharves and the checkers, the unit is appropriate in view of the homogeneity of their work and the common *situs* of their work.

The Board has reached the conclusion upon the facts as adduced in the evidence concerning the manner in which the work is carried on and in the disparate conditions of employment, that the unit applied for is not appropriate in this instance.

In the course of the hearing, some reference was made to a certification granted by the Board in 1950 to Local 1764, Steamship Checkers & Cargo Repairmen & Weighers & Samplers, ILA, as bargaining agent for employees of a number of shipping companies represented by The Shipping Federation of Canada, as employed in the port of Saint John, N.B., and described as steamship checkers, cargo repairmen, weighers and samplers, together with manifest clerks and office employees on the docks.

The Board consisted of A. H. Brown, Vice-Chairman and Acting Chairman, and A. H. Balch, E. R. Complin, J. A. D'Aoust, A. J. Hills, Donald MacDonald and A. C. Ross, members. The judgment of the Board was delivered by the Vice-Chairman and Acting Chairman.

A check of the record of that 1950 case indicates that the only classifications of employees shown on the companies' payroll records at that time were checkers and coopers. Such clerical employees as were employed on the docks were apparently included within the checker category and were employed and paid upon the same basis and at the same rates as checkers. The collective agreements entered into subsequently between the parties to the certification have apparently covered only checkers and cooper classifications of employees. In these circumstances, that decision has little relevance to the facts of the present application.

The application is rejected accordingly.

Conciliation and Other Proceedings before the Minister of Labour

Conciliation Officers Appointed

During December, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Asbestos-Eastern Transport Inc., Asbestos, Que., and Locals 106 and 938 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: C. E. Poirier).

2. Canadian Arsenals Limited (Small Arms Division), Long Branch, Ont., and United Steelworkers of America (Conciliation Officer: T. B. McRae).

3. Baton Broadcasting Limited, Agincourt, Ont., and National Association of Broadcast Employees and Technicians (Conciliation Officer: T. B. McRae).

4. Canadian Pacific Air Lines, Limited, Vancouver, and Canadian Air Line Pilots' Association (Conciliation Officer: G.R. Currie).

5. Soo-Security Motorways Ltd., Winnipeg, and Local 979 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: J. S. Gunn).

6. Kitchener-Waterloo Broadcasting Company Limited and National Association of Broadcast Employees and Technicians (Conciliation Officer: T. B. McRae).

7. National Harbours Board and Civil Service Association of Canada (Quebec Harbour Police) (Conciliation Officer: C. E. Poirier).

Settlements by Conciliation Officers

1. Canadian Arsenals Limited (Small Arms Division), Long Branch, Ont., and United Steelworkers of America (Conciliation Officer: T. B. McRae) (see above).

2. Pacific Western Airlines, Vancouver, (I.F.R. and V.F.R. Divisions), and Canadian Air Line Pilots' Association (Conciliation Officer: G. R. Currie) (L. G., Jan., p. 41).

3. The Toronto Harbour Commissioners and Local 1842 of the International Longshoremen's Association, Toronto (Conciliation Officer: T. B. McRae) (L.G., April 1963, p. 309).

Conciliation Boards Appointed

1. Radio Station CHRC Limitée, Quebec, and National Association of Broadcast Employees and Technicians (L.G., Nov. 1963, p. 1016).

2. Central Truck Lines Ltd., Val d'Or, Que., and Locals 938 and 106 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., Jan., p. 40). (Note: Local 106 has been added to the dispute at the request of the parties.)

Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in November to deal with a dispute between Robin Hood Flour Mills Limited (laboratory department employees), Humberstone, Ont., and United Packinghouse, Food and Allied Workers (L.G., Jan., p. 41), was fully constituted in December with the appointment of W. H.

Dickie of Toronto as Chairman. Mr. Dickie was appointed by the Minister on the joint recommendation of the other two members of the Board, Norman L. Mathews of Toronto and F. Stewart Cooke of Hamilton, who were previously appointed on the nomination of the company and union, respectively.

2. The Board of Conciliation and Investigation established in November to deal with a dispute between Robin Hood Flour Mills Limited (plant employees), Humberstone, Ont., and United Packinghouse, Food and Allied Workers (L.G., Jan., p. 41), was fully constituted in December with the appointment of W. H. Dickie of Toronto as Chairman. Mr. Dickie was appointed by the Minister on the joint recommendation of the other two members of the Board, Norman L. Mathews of Toronto and F. Stewart Cooke of Hamilton, who were previously appointed on the nomination of the company and union, respectively.

3. The Board of Conciliation and Investigation established in October to deal with a dispute between National Harbours Board, Montreal Harbour, and National Harbours Board Police Brotherhood (L.G., Dec. 1963, p. 1115), was fully constituted in December with the appointment of Frank Godine, Q.C., of Montreal, as Chairman. Mr. Godine was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Francis Eugene Carlin and Louis-Claude Trudel, both of Montreal, who were previously appointed on the nomination of the company and union, respectively.

Board Reports of Settlement Received

1. Denison Mines Limited, Elliot Lake, Ont., and District No. 6, United Steelworkers of America (L.G., Dec. 1963, p. 1115).

2. Trans-Canada Air Lines, Montreal, and Lodges 714 and 1751 of the International Association of Machinists (L.G., Nov. 1963, p. 1016).

Report of Board in Dispute between

Denison Mines Limited

and

United Steelworkers of America

Pursuant to the provisions of the Industrial Relations and Disputes Investigation Act, a Board of Conciliation and Investigation was established with His Worship, Magistrate J. A. Hanrahan, Chairman, G. B. S. Ferguson, Q.C., nominee of the Company, and Peter Podger, nominee of the Union.

The Board met with the parties in Toronto, Ont., on December 6, 1963.

There appeared for the Company:

- H. E. Houck, Consultant
- M. J. DeBastiani, Manager
- C. B. Banks, Superintendent.

There appeared for the Union:

- O. Mancini, Area Supervisor
- G. Gilchrist, Representative
- A. Brunet, Representative
- J. Norton, Representative

And members of a bargaining committee.

Comprehensive briefs were presented by the parties. From these, the Board learned the previous agreement had expired June 23, 1963. There are some 870 now employed in this mine. Despite lengthy meetings between the parties, assisted finally on two occasions by a conciliation officer, 19 items remained in dispute.

An exhaustive review of the difficulties facing the uranium industry in Canada was given by Mr. Houck. He stated only the Canadian Government's contract to stockpile, which is due to expire July 1964, keeps this mine in operation. There is hope for the future but no immediate prospects for an additional market.

Against that gloomy background, the Board commenced its efforts. Despite detailed information contained in the briefs concerning the non-monetary items remaining in dispute, the Board determined to direct its attention first to what appeared

During December, the Minister of Labour received the Report of the Board of Conciliation and Investigation established to deal with a dispute between Denison Mines Limited, Elliot Lake, and District No. 6, United Steelworkers of America.

The Board was under the Chairmanship of Magistrate J. A. Hanrahan of Windsor, Ont. He was appointed by the Minister on the joint recommendation of the other two members, George Ferguson, Q.C., of Toronto, and Peter Podger of Streetsville, Ont., nominees of the company and union, respectively. The report is reproduced *in part*.

to be four basic matters that would have to be favorably resolved if any progress were to be made at this level. These were: the term of the renewal, continuation of the separation provision that expired with the previous agreement, wages, and union security.

Although early in the negotiations it appeared the Company would renew the separation-allowance provision in its original terms, providing a complete agreement could be reached, this was not what the Union sought. It not only wanted the \$400 maximum changed to no limit to what the \$6.00 monthly contribution could produce, but also that its terms should apply to those on layoff at the time of closure.

The terms of the agreement varied as possible patterns were considered. While two years seemed a potential possibility, at one stage the Union changed its demands to cover a one-year agreement, based on a 5-cent-an-hour improvement as of this date, plus improvements in certain categories.

The question of union security proved troublesome to the end. Finally, the Union would have been content to agree to a voluntary irrevocable [checkoff], subject to an escape clause [applicable within] 30 days from the expiry date, but this was firmly rejected.

The major part of the day-long effort was spent trying to develop some suitable plan for renewal of the severance-allowance provision. The solution finally created was owing in no small measure to the valued contributions made by the Chairman's fellow-members, which he wishes to gratefully acknowledge.

The package design that finally evolved included the dropping of a number of items, and was only realized by pressure applied on both sides, upwards and downwards. This was the result—a memorandum of agreement—signed by the parties, as follows:

The parties hereto agree to renew their previous agreement for a period expiring August 31, 1965, with only the following changes:

1. To contain all matters previously resolved before the date of this hearing.

2. Wages: Effective September 1, 1964, an increase of five cents an hour; effective the same date, an additional two cents an hour for hoistmen with compressor's papers.

3. Upon execution of the proposed renewal, the Company undertakes to deliver to the Union a letter as to severance pay as per provision outlined in the document in the custody of the Chairman.

The signatories hereto agree to accept and recommend to their principals, the foregoing as a settlement of all matters in dispute.

Dated at Windsor, Ontario, this 10th day of December, 1963.

(Sgd.) J. A. Hanrahan,
Chairman.

Form of Letter referred to in Memorandum

Whereas at the time of these negotiations it appeared there was a possibility that the Company's operations at Elliot Lake might be shut down during the term of the collective agreement;

And whereas it is mutually agreed in such event the following provisions for severance pay should apply:

1. The continuity pay for employees in the hourly bargaining unit of Denison Mines Limited at the Elliot Lake property will be a maximum of \$450.00 per employee up to September 1, 1964 and \$500.00 per employee after September 1, 1964 and to the expiry date of the collective agreement, to be accumulated at the rate of \$6.00 per month of continuous employment since the last date of hiring; [and]

2. Continuity pay will be paid to those employees who have in excess of six months continuous service with the Company. A month's service for the purpose of continuity pay will be any money wherein the employee worked at least 75 per cent of his scheduled shifts for that month, unless he was prevented from doing so because he was on Workmen's Compensation as result of an occupational accident incurred working for Denison Mines Limited.

3. The Company agrees that it will pay the applicable severance allowance outlined above to all employees whose employment is permanently severed at the time of shutdown or prior to shutdown. However, no severance pay shall be granted unless the severance is directly due to a complete shutdown.

4. To obtain severance pay the employee must remain in the employ of the Company until his services are permanently severed for the above reasons.

5. The obligation of the Company to pay severance pay will cease at the termination of the collective agreement, August 30, 1965.

6. Any dispute arising from implementation of these provisions may be referred to an arbitration panel to be established by the parties.

Report of Board in Dispute between

Trans-Canada Air Lines

and

International Association of Machinists

The Board of Conciliation consisting of Mrs. Frances Bairstow, Union nominee; H. M. Sparks, Company nominee, and W. H. Dickie, Chairman, met with the parties at Montreal on October 10 and 11, November 1 and 2, and again on November 25, 26, and 27, 1963.

Appearing for the Company were:

- F. C. Eyre, Director Industrial Relations
- G. E. Bolton, Director Personnel and Industrial Relations
- A. D. Bertoit, Manager Labour Relations
- D. H. Gray, Director Maintenance and Overhaul
- G. R. McKillop, Supervisor of Labour Relations
- R. Peterson, Assistant General Superintendent of Overhaul Base
- S. Sheldrake, Supervisor Administration Services
- C. Hodgson, Supervisor of Training and Labour Relations
- B. Horan, Labour Relations Assistant
- A. Sadler, Vice-President Administration.

Appearing for the Union were:

- Mike Pitchford, Chairman Negotiating Committee
- Frank Heisler, Airline Co-ordinator IAM
- Don Wasserman, Research Dept. IAM
- M. Rygus, General Vice-President IAM
- Ed Smith, General Chairman Lodge 714 IAM
- J. King, Committee Member Lodge 714 IAM
- Ron Ulmer, Committee Member Lodge 714 IAM
- L. Foreman, Committee Member Lodge 714 IAM
- Ross Secord, Committee Member Lodge 714 IAM
- Frank Grennan, President Lodge 1751 IAM
- Wilf Bulger, Committee Member 1751 IAM
- Jean Bowles, Committee Member 1751 IAM
- John Farrell, Committee Member 1751 IAM
- R. N. Gray, Grand Lodge Representative.

The parties to the dispute are Trans-Canada Air Lines, and the International Association of Machinists as represented by Airline Lodge 714 and Trans-Oceanic Lodge 1751.

The Union represents certain classifications of employees in the maintenance and overhaul, station services and stores departments, of the Company. The total number of employees involved as of June 1, 1963 is 4,398, which constitutes 37.6 per cent of the total employees of the Company.

The collective agreement in question became effective July 1, 1962, and remained in effect until June 29, 1964, with the exception of the basic wage rates and the trade differentials, which were to remain in effect only until July 1, 1963, at which time the contract could be reopened for negotiation of these two items.

After a series of negotiating and conciliation meetings, which extended over the period from June 25, 1963 to August 13, 1963, the parties came to this Board with the same two issues unresolved.

The Company and Union both presented excellent briefs with exhibits that were supported by oral argument. The Board met with the parties collectively and separately, and examined in detail all of the aspects of this dispute.

It should be noted that this is the first time in their 14-year collective bargaining history that these two parties have been to a Conciliation Board. This speaks well of their relationship.

After our hearings on November 2, an executive meeting was held by the Board members on November 9, after which it was decided that we should try again to resolve the dispute. Accordingly, hearings were scheduled for November 25. As a result of long and arduous efforts made by all concerned, a memorandum of settlement was reached and has since been ratified by the Union membership. We are pleased to report the details as follows:

Memorandum of Settlement

The parties hereto agree to recommend to their principals the acceptance of the following terms as a settlement of all the items in dispute.

(Continued on page 161)

During December, the Minister of Labour received the Report of the Board of Conciliation and Investigation established to deal with a dispute between Trans-Canada Air Lines, Montreal, and Lodges 714 and 1751 of the International Association of Machinists.

The Board was under the Chairmanship of W. H. Dickie of Toronto. He was appointed by the Minister on the joint recommendation of the other two members, Mrs. Frances Bairstow of Beaconsfield, Que., and H. M. Sparks of Montreal, nominees of the union and company, respectively. The report is reproduced here.

Legal Decisions Affecting Labour

Quebec Court of Queen's Bench rules on validity of decree under province's Collective Agreement Act. B.C. Supreme Court enjoins picketing of trucks delivering to customers; in another decision rules that arbitration board should hear evidence regarding custom of honouring lawful picket lines

In Quebec, the Court of Queen's Bench, upholding a Superior Court judgment, ruled that a decree under the Quebec Collective Agreement Act establishing a five-day week and prescribing Sundays and Wednesdays of each week as non-working days for the distribution of bread in a specified area was constitutionally valid as being concerned with subject matters within provincial legislative competence, and did not trespass on federal jurisdiction respecting Sunday observance.

In British Columbia, the Supreme Court ruled that, under Section 3(2) of the Trade-unions Act, picketing of trucks making deliveries to customers is prohibited because the phrase "the employer's place of business, operations, or employment" in Section 3(1) of the Act does not include any place such as a street, lane or a parking area where an employer's driver stops his delivery truck to make a delivery to a customer.

In another decision, the British Columbia Supreme Court ruled that in arbitration proceedings under a collective agreement, the Board of Adjustment, before deciding whether the employer had reasonable cause in dismissing employees who refused to cross a picket line, should accept evidence regarding an alleged usage or custom whereby the employees may, without violating the terms of their collective agreement, properly refuse to cross a picket line set up in consequence of a lawful strike.

Quebec Court of Queen's Bench . . .

...rules that decree establishing hours of work is within provincial jurisdiction

On June 4, 1963, the Quebec Court of Queen's Bench, Appeal Side, dismissed an appeal from a judgment of the Quebec Superior Court and held that a decree under the Collective Agreement Act, approved as required by order in council, that established a five-day week and prescribed Sundays and Wednesdays of

each week as non-working days for the distribution of bread in a specified area did not trespass on federal power respecting Sunday observance.

The Court held that the object of the decree is not the observance of Sunday as a religious day but concerns the establishment of hours of labour and a five-day work week, which are subject matters within provincial legislative competence.

A company operating a bakery in Montreal was summoned in March 1961 to appear before a Judge in the Court of Sessions of the Peace, District of Montreal, to answer a complaint laid by the Parity Committee that on Wednesday, February 8, 1961, it had committed an offence by delivering bread and other similar products in Montreal in violation of Art. V of the decree issued under Section 9 of the Collective Agreement Act.

Article V of the decree, as approved by Order in Council 1639 dated October 5, 1960, amending No. 85, provides:

V. *Hours of work, working days and non-working days:* The standard work week shall consist of five (5) working days and there shall be no delivery on Sundays and Wednesdays of each week, and all Sundays and Wednesdays are specified as non-working days.

However, in any week where a holiday occurs other than on a Wednesday, the Wednesday shall become a working day.

Section 9 of the Collective Agreement Act (as amended in 1960) in part provides:

Without restricting the generality of the preceding paragraph, the decree shall render obligatory, with respect to hours of labour, among other provisions of the collective agreement those specifying working days and non-working days or parts thereof, as well as the time when a working day shall begin and end for each category of employees.

The company applied to the Superior Court for a writ of prohibition challenging constitutional validity of the decree in question, as well as the validity of Section 9 of the Act as amended in 1960.

On April 4, 1962, the Superior Court dismissed the application for a writ of

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

prohibition and declared constitutional, legal, valid and binding the decree and Section 9 of the Act.

On appeal, the company did not attack the enabling provisions of the Collective Agreement Act, but contended that Part V of the decree was *ultra vires* of that statute. In particular, the company argued that the decree, in prohibiting deliveries on Sunday, was trespassing in the field of criminal law, reserved by S. 91 of the B.N.A. Act to the Parliament of Canada. In this respect, the company relied on the decision of the Supreme Court of Canada in *Henry Birks & Sons (Montreal) Ltd. v. Montreal and A. G. Que.* (L.G. 1956, p. 417), which set aside a Quebec statute purporting to authorize municipal councils of cities and towns to pass by-laws for the closing of stores on certain religious holidays, and the by-law of the City of Montreal passed under that statute.

Mr. Justice Hyde, in his reasons for judgment, distinguished the *Birks* case from the decree in question. He held that, in the *Birks* case, the Court found that the legislation was concerned with the observance of certain days as Holy Days and not simply as holidays, whereas, in the situation at bar, as was held by the trial judge, the disputed enactment deals essentially with the labour agreement, does not provide a penalty for a crime, provides for a matter within provincial competence, and is therefore *intra vires* of the Legislature of Quebec.

Further, Mr. Justice Hyde added that the true character and object of the decree is not Sunday observance but hours of labour and the organization of a five-day working week, which is a subject within the legislative competence of the province as determined by the Supreme Court of Canada in the reference *Re Treaty of Versailles, The Hours of Labour* (L.G. 1925, p. 671); nor is the decree objectionable in specifying in Art. VI nine named days as "holidays" for its purposes merely because two of the days have religious significance.

The Court ruled that the Judge of the Court of Sessions of the Peace did not exceed his jurisdiction in dealing with the complaint brought against the company, and that the Judge did not err in declaring valid the two orders in council sanctioning a decree issued in accordance with the Collective Agreement Act, and prescribing non-working days for the distribution of bread in a specified area. *Regina v. Court of Sessions of the Peace, Ex parte Richstone Bakeries Inc.*, (1963) 40 D.L.R. (2d) Part 2, p. 246.

British Columbia Supreme Court . . .

...rules that the picketing of trucks making deliveries to customers is illegal

On July 23, 1963, Mr. Justice Aikins of the Supreme Court of British Columbia, dismissing an application to vary the terms of an injunction to restrain picketing, ruled that the phrase "the employer's place of business, operations, or employment" in Section 3 of the B.C. Trade-unions Act does not include any place where an employer's driver stops his delivery truck to make a delivery to a customer. Therefore, such a place may not be lawfully picketed under this section.

The plaintiffs were wholesale and retail dealers in meat, with business premises situated at 1811 Cook Street, Victoria, B.C. As part of their business, they used trucks to make both wholesale and retail deliveries to customers.

On June 28, 1963, Mr. Justice Wootton granted an *ex parte* injunction restraining Local 212 of the Amalgamated Meat Cutters and Butcher Workmen of North America from unlawfully picketing the plaintiff's place of business.

On July 4, the same judge, on a motion to continue the injunction, granted an injunction restraining the union until the trial or until further order from, *inter alia*, unlawfully watching or besetting or picketing the premises of any of the customers or suppliers of the plaintiffs, persuading anyone not to deal or handle the products of the plaintiffs or do business with the plaintiffs, and interfering with the contractual relations of the plaintiffs with any other person or corporation, except at the plaintiffs' place of business, situated at 1811 Cook Street in Victoria.

Further, the union was restrained from molesting or threatening the employees or customers of the plaintiffs, interfering with such employees or customers entering or leaving the plaintiffs' premises, and from interfering with the employees, agents or servants of the plaintiffs while they were engaged in delivering the merchandise of the plaintiffs or while otherwise engaged in the course of their employment.

The union applied for variations of the injunction order and, in particular, asked to have added as a separate paragraph of the order, the following:

Provided nothing herein shall prevent the defendants or any of them from lawfully watching or besetting or picketing the plaintiffs' place of business situate at 1811 Cook Street, Victoria, British Columbia, and the plaintiffs' trucks used in the business or operation or service of the plaintiffs.

The union's motion was dealt with by Mr. Justice Aikins of the British Columbia Supreme Court, who noted that the order made by Mr. Justice Wootton preserved the union's right to lawfully picket at the plaintiffs' place of business at 1811 Cook Street, Victoria. Consequently, the real substance of the union's application was to have the order varied so as to permit them to lawfully picket the plaintiffs' trucks used in the plaintiffs' business.

The union did not ask for permission to have mobile pickets in a vehicle which would move in close proximity of one of the plaintiffs' trucks as it proceeded from place to place on the plaintiffs' business, displaying signs or placards as the vehicle was in movement, but asked that the union should be allowed to picket wherever one of the plaintiffs' trucks stopped to make delivery and then only for so long as the truck stopped at the point of delivery and the driver or other workman was making a delivery of merchandise to a customer.

Apparently what the union proposed to do was follow a delivery truck belonging to the plaintiffs and, as soon as it stopped to make a delivery at a customer's place of business, either display a placard from the following vehicle, which would also come to a stop, or discharge picketers from the following vehicle with placards to picket the delivery vehicle so long as it remained stationary at the place of delivery and while the delivery was taking place.

Section 3 of the B.C. Trade-unions Act, relevant to the issue at bar, reads:

3(1) Where there is a strike that is not illegal under the Labour Relations Act or a lockout, a trade union, members of which are on strike or locked out, and anyone authorized by the trade-union may, at the employer's place of business, operations, or employment, and without acts that are otherwise unlawful, persuade or endeavour to persuade anyone not to

(a) enter the employer's place of business, operations, or employment; or

(b) deal in or handle the products of the employer; or

(c) do business with the employer.

(2) Except as provided in subsection (1), no trade union or other person shall persuade or endeavour to persuade anyone not to

(a) enter an employer's place of business, operations, or employment; or

(b) deal in or handle the products of any person; or

(c) do business with any person.

Under the provisions of Section 3(1) of the Act, where there is a legal strike (as was the case in the situation under review), a trade union may, at the employer's place of business, operations, or employment, without acts that are otherwise unlawful, persuade or endeavour to persuade anyone

not to do business with the employer or deal in or handle his produce. In Mr. Justice Aikins' opinion, the act of persuasion or endeavouring to persuade must be at the employer's place of business, place of operations or place of employment. The words "operations" and "employment" used must be read as if the words "place of" immediately preceded each word.

Further, Mr. Justice Aikens held that, unless the place where a delivery truck stops on a street, lane or in a parking area to make a delivery becomes, for the time that the truck is stopped and the delivery is being made, a place of business or a place of operations or a place of employment of the employer who owns the truck, then, for the union at that place to persuade or attempt to persuade any person not to do business with the employer or deal in or handle his produce is unlawful under subsection (2) of Section 3 of the Trade-unions Act.

Consequently, the question to be decided by the Court was whether the place where a delivery truck stops to deliver an employer's merchandise to a customer is to be regarded as either the employer's place of business, or the employer's place of operations, or the employer's place of employment. If such a place falls within either one or other of the three categories, then the union may lawfully picket at such place for the purpose of persuading or endeavouring to persuade persons not to deal in or handle the produce of the employer, provided that the picketing is done without acts that are otherwise unlawful.

Counsel for the union argued that the Trade-unions Act of 1959, having the effect of limiting previously enjoyed rights of picketing, should not be construed restrictively, but rather be given the broadest reasonable interpretation so as to preserve rather than eliminate a right to picket, which it was asserted was enjoyed without question prior to the passage of the present Act.

The union found support for giving the particular words a broad or liberal interpretation in the following principle expressed by Mr. Justice Rand in *Aristocratic Restaurants (1947) Ltd. v. Williams and Morrison* (L.G. 1951, p. 1553):

The fact that two of the restaurants were not within the unit of employees for which the union was authorized to act does not affect the question; the owners' economic strength is derived from his total business; and it is against that that the influence of information is being exerted.

The union argued that the Act should be interpreted so as to permit picketing at any place where the employers did anything to further their business so that the union could bring pressure to bear on the total economic strength of the employers.

Mr. Justice Aikens held that the union's argument might be of assistance if the relevant words of the statute did not have an easily ascertained plain or ordinary meaning. The words used in the statute "the employer's place of business, operations, or employment" do not seem to be ambiguous, nor does it seem that giving them their ordinary meaning in relation to the issue at bar would result in any absurdity or manifest injustice that might be presumed to be outside the intent of the legislative assembly.

In Maxwell *On Interpretations of Statutes*, 11th ed., at p. 6, a reference was made to what is called the "cardinal rule" or the "golden rule" of interpretation. In this respect, Mr. Justice Aikens referred to the following words of Chief Justice Jervis in *Mattison v. Hart* (1854), 14 CB 357, 23 LJCP 108, which seemed to him to be particularly relevant to the situation at bar:

We ought to apply to this case what has been called the golden rule of construction, namely, to give to an Act of parliament the plain, fair, literal meaning of its words, where we do not see from its scope that such meaning would be inconsistent, or would lead to manifest injustice.

Mr. Justice Aikens held that adopting the ordinary sense of the words "employer's place of business" or "employer's place of employment" does not mean any place at which an employer's delivery truck happened to stop momentarily to make delivery of merchandise to a customer. In his opinion, such a place cannot be held to be one of the employer's places of business or one of the employer's places of employment.

The union argued, however, that the plaintiffs' business is, in part, the delivery of meat to customers and that, therefore, the delivery of meat is an operation of the employer's business; that whenever a delivery takes place there is a business operation and that, therefore, the place where the delivery is consummated is one of the employer's places of operation for the length of time that the delivery is taking place.

Mr. Justice Aikens could not accept the contention that the particular place where a delivery truck stops on a street, lane, or parking area can be said to be one of the plaintiffs' places of operations. He added that the Act does not say "anywhere that

the employer operates, or does anything forming part of the operation of his business." The words are "the employer's place of . . . operations." The word "place" implies something rather less transitory and fortuitous than the place on street, lane or parking area selected by a driver to stop his vehicle and make a delivery. The word "operations" is in the plural and implies more than a single delivery of goods.

Mr. Justice Aikens concluded that, adopting the ordinary meaning of the words used, the phrase "the employer's place of . . . operations" does not mean any place that an employer's driver stops a delivery truck to make a delivery to a customer.

The application to vary the terms of the injunctions was dismissed. *Williams et al v. Local 212, Amalgamated Meat Cutters and Butcher Workmen of North America et al.*, (1963), 44 WWR, Part 8, p. 458.

British Columbia Supreme Court . . .

. . . rules arbitration board should hear evidence on honouring of picket lines

On June 19, 1963, the British Columbia Supreme Court ruled that, in arbitration proceedings under a collective agreement concerning dismissals of employees allegedly without reasonable cause, the Board of Adjustment should accept evidence regarding an alleged usage or custom that union members may properly refuse to cross a picket line set up in consequence of a lawful strike. The Court held that such evidence was relevant to the application of the collective agreement even when the agreement was silent on the question of picketing and also silent on the question of whether the employees have the right to refuse to cross lawful picket lines.

Further, the Court ruled that it was equally open to the employer to show that no such custom or usage existed, or, if such did in fact exist, it was not applicable in the particular circumstances of the case.

Then, it would be for the Adjustment Board to determine, in the light of all the evidence adduced on both sides, whether the employer had reasonable cause in dismissing employees who failed to carry out their duties under the collective agreement because of their refusal to cross a picket line, or whether the employees had, without violating the terms of their collective agreement, the right to honour picket lines where a lawful strike was in progress. *Re Canadian Air Line Pilots Association and Pacific Western Airlines Ltd., Ex parte Bray et al.*, (1963) 40 D.L.R. (2d), Part 1, p. 125.

Recent Regulations under Provincial Legislation

Ontario issues comprehensive foundry safety rules. Manitoba establishes five classes of gas fitters' licences. Quebec extends Workmen's Compensation Act coverage. Newfoundland replaces its regulations for boilers and pressure vessels

In Ontario, comprehensive safety regulations for foundries set out detailed requirements with respect to working spaces and working conditions, sanitation, ventilation, heating and personal protective equipment.

New regulations under the Manitoba Gas and Oil Burner Act provide for five classes of gas fitters' licences.

In Newfoundland, revised regulations for boilers and pressure vessels provide for 12 types of operators' certificates.

In Quebec, the coverage of the Workmen's Compensation Act has been extended, bringing under the Act many small establishments previously excluded because of the small size of the regular work force.

Manitoba Gas and Oil Burner Act

Manitoba has issued new regulations governing the installation and alteration of gas-burning devices which, among other matters, make major changes with respect to the licensing of gas fitters and, for the first time, impose on gas suppliers important obligations designed to ensure the safe operation of such equipment. Issued under the Gas and Oil Burner Act as Man. Reg. 100/63, gazetted November 23, they came into force on January 1, repealing Part II of Man. Reg. 9/57 (L.G. 1957, p. 469).

Classes of Gas Fitters' Licences. The new regulations replace the previous gas fitter's licence with the following five classes of licences: commercial and industrial gas fitter's licence; domestic gas fitter's licence; liquid petroleum gas fitter's licence; utility gas fitter's licence; and special gas fitter's licence.

There are important differences in the scope of the work that each of these licences authorizes into holder to perform. A person with a commercial and industrial gas fitter's licence may install any gas equipment. The holder of a domestic gas fitter's licence may install any gas equipment where the input of a single installation does not exceed 400,000 British Thermal Units per hour, as may a person holding a utility gas fitter's licence in the course of employment with a gas utility; the latter also is specifically authorized to inspect, service or repair any gas equipment.

The holder of a liquid petroleum gas fitter's licence is restricted to installing gas equipment using liquid petroleum gas where

the input to any single installation does not exceed 125,000 British Thermal Units per hour. A person holding a special gas fitter's licence may install, service and repair gas equipment manufactured by the firm specified on his licence.

Qualifications for Licences. There are three ways in which a person may qualify for a commercial and industrial gas fitter's licence. He may be issued such a licence if he has held continuously a gas fitter's licence, issued under the Act, during the two-year period immediately prior to January 1, 1964, and if, in addition, he satisfies the Board of Examiners that, within that period, he has had at least one year of experience in installing and servicing commercial and industrial gas-fired equipment with an input exceeding 400,000 British Thermal Units per hour, or equivalent experience.

Alternatively, an applicant must have at least four years of practical experience under the direct supervision of a person holding a commercial and industrial gas fitter's licence. Also acceptable is a plumber's or steamfitter's certificate and, in addition, two years of practical experience under the direct supervision of a person holding a commercial and industrial gas fitter's licence.

There are two ways in which a person may qualify for a domestic gas fitter's licence. He may do so if he has at least two years of practical experience as a steamfitter, or in related work acceptable to the Board, and has one year of practical experience under the direct supervision of a person holding a gas fitter's licence, and, in addition, has completed a study course acceptable to the Board. Alternatively, he must have held, for at least two years, a licence to install and service oil-burning equipment, and have had experience, acceptable to the Board, in connection with gas-burning equipment.

In order to qualify for a liquid petroleum gas fitter's licence, an applicant must have had at least one year of practical experience in a related trade acceptable to the Board. In addition, he must have completed a course relating to liquefied petroleum installation.

A utility gas fitter's licence may be issued to a person who has specialized knowledge, acceptable to the Board, of the installation, servicing and repair of a particular type of gas equipment.

A provision for recognizing licences of other jurisdictions authorizes the Minister of Labour, on the recommendation of the Board, to issue a licence to a person who holds one of a similar type issued by another licensing authority.

Issue and Control of Licences. A licence is valid for the period shown on it and must show the date of expiry. If a licensee does not renew his licence for three or more years, he may be required to pass a new examination before a new licence is issued to him.

There are several controls on licences, which are intended to ensure that gas fitters comply with the legislation and obey the orders of inspectors. If a gas fitter fails to do so, the chief inspector may suspend his licence for 30 days or recommend its cancellation by the Minister.

The licensee may appeal to the Minister the suspension of a licence or a recommendation for its cancellation. The Minister, at his absolute discretion, may confirm the suspension or cancel the licence, or vary the suspension or recommendation.

The chief inspector may recommend to the Minister the reinstatement of a licence, and the Minister is empowered to do so, when the cause of the suspension no longer exists.

The Minister may reinstate a licence that has been suspended for an unstated period or cancelled. A licence suspended for a definite period is automatically reinstated when the period of suspension expires.

Permits. No person may install, alter or make an addition to gas equipment unless he first submits to the chief inspector a written application for a permit, giving the location of the premises and of the gas equipment, and specified information concerning the equipment. Drawings and specifications, as required by the chief inspector, must also be submitted if the total input of gas equipment exceeds 400,000 British Thermal Units per hour.

The chief inspector may not issue a permit until he is satisfied that all matters in the application, and in drawings and specifications, are in accordance with the legislation.

CSA Standard B149-1962, Installation Code for Gas Burning Appliances and Equipment, is adopted as a minimum standard for the installation, alteration, or

addition to gas equipment. The chief inspector, however, may require higher safety standards, if necessary.

Gas Suppliers' Responsibilities. Gas utilities are prohibited from supplying gas or connecting gas equipment until the gas fitter produces a permit for the installation and a utility gas fitter has made a complete inspection of it.

Similarly, no person may connect a liquid petroleum gas container to a new gas installation unless an application for a permit has been made. If the gas equipment is not approved, or if the hourly input of the gas equipment exceeds 60,000 British Thermal Units, the application must be approved by the chief inspector and a permit issued before the installation may be connected. In addition, a licensed gas fitter must first make a complete inspection of the installation and verify that it complies with the regulations and the code.

In the case of both the gas utility and the person supplying liquid petroleum gas, a written report must be made to the chief inspector within seven days from the time gas is made available, showing: location of the premises, licence number of the gas fitter who made the installation, and serial number of the permit. The report must also state whether the gas fitter's tag was attached to the gas equipment, whether all appliances carried the seal of approval, and if the installation complied with the regulations and the code.

In addition, the gas utility's report must show whether the installation was checked for leaks with a dial test on the meter, and the report of the liquid petroleum gas supplier must state the name of the person who inspected the installation.

Gas Fitter's Responsibilities. In order to identify the person making a gas installation and place upon him responsibility for the standard of his work, each gas fitter has a tag bearing a number assigned to him by the Department of Labour. When he completes an installation, he must affix one of these tags to it.

He must also post in a visible location his name, address, telephone number, and the manufacturer's instructions for the operation of the gas equipment that he has installed.

When the oil storage tank is removed on conversion of oil-fired equipment to gas firing, the gas fitter must remove the fill and vent pipes. Certain responsibilities are also imposed upon him with respect to safety valves on hot water or steam boilers that have been fired by another fuel and converted to gas.

Powers of Inspectors. The chief inspector is required to have inspections of gas equipment made. He may approve or reject equipment conditionally or unconditionally.

An inspector has authority to enter premises to inspect gas equipment during reasonable hours. If equipment is improperly installed or altered, he may order the owner of the building or premises not to use it until the installation or alteration conforms with the regulations.

The owner may appeal to the chief inspector against such an order. The chief inspector must give written notice to the installer and to the owner of the equipment—who are required to comply with it—specifying any defects and the time allowed for their correction.

Provision is made, however, for an appeal to the Minister from an order of the chief inspector. The Minister has absolute discretion to confirm or vary an order, and his decision is final.

Other Safety Matters. The regulations provide that no person may weld or make a welded connection to any gas equipment unless he holds a welder's certificate issued under the Steam and Pressure Plants Act, and each weld must be stamped by his number.

Running repairs to gas-burning equipment may be made by the holder of a Third Class Operating Engineer's certificate, or higher, in the plant where he is employed, but not elsewhere.

No person may alter approved gas equipment unless he first obtains the chief inspector's approval to do so.

N.B. Workmen's Compensation Act

In New Brunswick, the operation of taverns was brought under Part I of the Workmen's Compensation Act, the collective liability section, by O.C. 63-845, gazetted December 11.

Newfoundland Boiler and Pressure Vessel Act, 1959

New Boiler and Pressure Vessel Regulations, 1963, in Newfoundland provide for 12 types of certificates of competency for operators and allow specified types of pressure plants of smaller capacity, equipped with automatic controls and safety devices, to be operated under certain conditions by uncertified personnel. These regulations, gazetted December 3, are the first to be issued under the Boiler and Pressure Vessel Act, 1959, which was proclaimed in force on December 2, 1963. The Boiler and Pressure Vessel Regulations, 1950, are revoked.

The regulations, which are in four parts, set out requirements for plant registration

and certification of operators, and lay down procedures for welding and the qualifications of welders.

Plant Registration. Pressure plants exceeding specified total horsepower ratings are governed by the legislation and must be registered. They are divided into seven classes as follows: stationary high-pressure heating plants; stationary low-pressure heating plants; stationary high-pressure heating and power plants; stationary refrigerating pressure plants; stationary compressed-gas pressure plants; stationary combined-pressure plants; and portable pressure plants.

The owner of a pressure plant, when applying for a plant registration certificate, must inform the Board of Examiners of the name and index number, class and year of issue of the certificate of competency held by each stationary engineer and every other operator engaged in the operation of the plant. He must also inform the Board of any subsequent changes in staff.

A certificate of plant registration must show the classification and total horsepower rating of the pressure plant concerned and the classes of personnel required to operate it.

Inspection. Most provisions relating to inspection are contained in the Act itself. The regulations, however, specify that all inspectors must be conversant with the CSA, ASME, and ASA codes applicable to the design, construction, maintenance, repair and inspection of all classifications of boilers, pressure vessels and pressure plants. The chief inspector or an assistant inspector must be a stationary engineer, first class, grade A or AB; an inspector must be a stationary engineer, second class, grade A or AB, or higher.

Certificates of Competency. The regulations provide for the following 12 types of certificates of competency, and specify the type of work the holder may do: stationary engineer, first class, grades A and AB; stationary engineer, second class, grades A and AB; stationary engineer, third class, grades A and AB; stationary engineer, fourth class, grades A and AB; fireman; compressor operator; and refrigeration operator, grades A and B.

The scope of responsibilities of the holder of a compressor operator's certificate or a refrigeration operator's certificate has been increased, eliminating the requirement to have an operating engineer in charge of plants of large capacities in these categories.

Board of Examiners. The regulations also contain directions for the Board of Examiners set up under the Act to appraise qualifications of candidates for certificates of competency and to appraise and deter-

mine the classification of pressure plants. The Board is required to meet at least four times a year on specified dates.

Operation of Automatic Plants. Special provisions now relax requirements for the supervision of certain automatically controlled pressure plants by certified personnel. Where specified types of pressure plants are equipped with automatic controls and safety devices, and production is normally curtailed at night, on Sundays and on holidays, the Board may allow an uncertified person to act as shift engineer or operator.

In such a case, however, a stationary engineer, fourth class, employed as chief engineer on a regular shift, would also assume responsibility for and supervision of the other shifts and be on call. Uncertified personnel would be responsible to him.

The types of plant to which the foregoing provisions apply are as follows: a stationary combined-pressure plant or a stationary high-pressure heating plant, not exceeding 50 horsepower; and a stationary low-pressure heating plant, a stationary refrigeration pressure plant or a stationary compressed-gas pressure plant, not exceeding 150 horsepower.

Adoption of Codes. The new Act authorizes the chief inspector, with the approval of the Minister of Labour, to adopt by reference, the ASA, CSA, or ASME codes, which will be enforced by inspectors. The chief inspector has now adopted two CSA codes, CSA B51-1960, Code for the Construction and Inspection of Boilers and Pressure Vessels, sixth edition, and CSA B52-1951, Mechanical Refrigeration Code, second edition.

Ontario Factory, Shop and Office Building Act

In Ontario, comprehensive new safety regulations for foundries, the first such regulations to be issued in the province, were gazetted as Ont. Reg. 332/63 on December 21 to go into force 10 days after publication.

The new regulations, which were issued under the Factory, Shop and Office Building Act, implement a recommendation of the Royal Commission on Industrial Safety. In its report the Commission stated that safety regulations for foundries had been prepared in 1955 but had never been promulgated, due principally to "certain objections relating to ventilation and sanitation raised by industry."

Inspectors of the Department of Labour, however, were said to be applying certain provisions without any defined authority to do so, and the Commission urged that the draft regulations be set out in a practicable form and implemented.

As recommended by the Commission, the regulations were rewritten and then reviewed by the Labour Safety Council, which received briefs from representatives of management and labour.

The regulations not only contain general safety rules for foundries, but also set out detailed requirements with respect to working spaces and working conditions, sanitation, ventilation, working temperatures and personal protective equipment.

Coverage. The new foundry regulations apply in premises where base metals or their alloys are cast in moulds or where dust-causing operations ancillary to the casting process are carried on. They do not, however, apply to places where steel ingots only are cast, or to metal refineries, nor do they cover die casting or the printing industry.

General Safety Rules. The regulations make it clear that, while the major responsibility for compliance rests with the employer, employees are obliged to use the personal protective equipment provided and to observe all applicable safety rules.

Any new foundry in which any part of the lowest floor level of any working space (this does not include offices, storage rooms, locker-rooms, etc.) is below the adjacent ground level, may not be put into operation without a written authorization from the chief inspector. Any existing foundry in which a similar condition prevails may not continue operating without the approval of the chief inspector.

No new foundry or addition to any existing foundry may be put into operation unless the ceiling height above the floor of every working space is at least 16 feet.

No parting material (a fine sand or other powdery substance used to prevent adhesion to the surfaces of the parts of a mould) may contain more than 2 per cent free silica unless approved in writing by the chief inspector.

All buildings, equipment and machinery must be maintained in safe working condition and must be regularly inspected by the employer or person designated by him to ensure the safety of persons in the foundry.

It is the employer's responsibility to see that certain precautions are taken with a cupola (the furnace used for melting iron or other metal in large quantities).

The bottom of every cupola must be supported by one or more adequate metal props with metal bases and wedges supported on concrete or other solid footing. The employer must provide shields or solid screens to protect employees at the slag-holes, spouts and tap holes of every cupola

or furnace. Every cupola with a closed top must have doors on the top of the cupola hinged to act as explosion vents to the outdoors.

When work is performed in a cupola or similar place, the employer must ensure that an approved overhead protective wooden or metal cover or screen supported by props or overhead slings is provided to protect persons from falling objects.

It is also his duty to see that every cupola is equipped with a blast gate or automatic damper in the air supply pipe to the cupola, or with other positive means of preventing the accumulation of combustible gases in the air supply system when the air supply fails.

To prevent explosions, the employer must ensure that a continuous open flame or other positive means of ignition is maintained above the charging level of the cupola while it is in operation and until all combustible material is consumed.

It is also the employer's duty to see that every wheel moving on tracks at floor level is shielded so as to prevent injury to the feet of employees. Every skylight must be fitted with wired or shatter-proof glass or non-shatterable translucent material, or with protective wire netting attached to its underside.

Where metal castings or scrap are broken by means of a dropping device, a permanent shield of wood planking two inches thick, or equivalent protection, adequately supported, must be provided by the employer to protect persons from flying metal fragments.

Every tumbling mill is to be equipped with a positive locking device to prevent any movement of the mill when being loaded or unloaded. The regulations further provide that the employer must ensure that every moving part of the mill is either fully enclosed or guarded to a height of six feet or more above the adjacent walking surface.

Some responsibility for compliance is also placed on employees. The regulations expressly state that foundry employees are equally responsible with the employer for seeing that the six following general safety rules are observed:

—The employer and the employees are responsible for ensuring that the legs and supports of every cupola are protected from damage by molten metal.

—It is their duty to see that any coke, slag and unmelted metal resulting from the dropping of the cupola bottoms is removed by a mechanical rake or other mechanical means as soon as practicable after the cupola is emptied.

—Before the bottom of a cupola is dropped, a visual and audible signal must be given for at least three minutes, after which the prop or

props must be removed by a winch or similar device operated from outside a wall or shield at the cupola or from another safe location.

—No material containing ice or moisture may be charged into any furnace containing molten metal except a cupola.

No completely enclosed vessel may knowingly be charged into any furnace without first being broken open.

—Finally, the employer and employees must ensure that sufficient care is taken of chains, slings, wire-ropes and other hoisting equipment to ensure the safety of persons, having regard to the temperatures to which such equipment is exposed and the uses to which it may be put.

General floor conditions. The floor and any water system immediately surrounding any melting unit are to be constructed so as to prevent any accumulation of moisture under or near the melting unit.

All moulding floors, gangways (defined passageways between a metal-melting unit and a metal-pouring area), passageways and aisles must have a firm surface without holes or depressions and without slopes having a gradient of more than one in sixteen.

All permanent gangways are to be clearly marked and gangways not used for carrying molten metal are to be at least three feet wide. The regulations also prescribe the minimum width of gangways used for carrying molten metal, taking into consideration the type of container, the number of workers conveying the metal, and the direction of the traffic.

In addition, they stipulate that, where any ladle is carried by an overhead crane, adequate warning must be given before it is moved, and all employees must immediately leave the area over which the ladle is to be transported.

If molten metal is handled on a gallery or other area having any working space below it, the gallery or area must have a solid floor that will prevent molten metal from leaking or burning through it. A gallery must also have a solid barrier at least three and one-half feet high on all exposed sides to prevent metal spillage.

The regulations specify the minimum width of pouring aisles, the width varying according to the type of ladle used.

Any pit more than 24 inches deep must have its inside walls reinforced with brick, concrete, steel plate or other non-combustible material that will not cave in.

When in use, every pit is to be securely protected with railings or chains secured to stanchions, or with a solid wall, the top of which must be at least three and one-half feet above the surrounding floor. Similar precautions must be taken when a pit is not in use or, alternatively, the pit may be covered with substantial material.

Housekeeping provisions. All equipment and material must be kept so that they will not interfere with free movement of persons or materials, and will not constitute a safety, health, fire or explosion hazard.

Any waste material is to be removed from the working space of a foundry at least once a day. Any sand that is of no further use must be removed at a time and in a manner so as not to create a hazard to employees.

Pouring aisles, cleaning-room floors or other areas where dust is likely to accumulate, and the surface of any sand pile, must be kept sufficiently damp at all times to prevent the dissemination of dust into the general air of the foundry. They must not, however, be dampened to such an extent that molten metal in contact with the dampened sand or water is a hazard to persons in the vicinity.

All gangways and pouring aisles must be kept clear of obstructions at all times.

Any accumulation of dust is to be removed from equipment, material, and the interior of the foundry, in such a way as not to create a hazard to employees.

Melting units and ladles. In every foundry, a clear space, adequate for safe operating and maintenance purposes, must be provided between the outer shell of any melting unit and any wall, structure, equipment or any operation. The firing portion and fuel supply controls of each melting unit must be accessible from an aisle or be in a location remote from the unit.

If a melting unit is installed after the regulations come into force, any passageway or aisle adjacent to the unit must be at least four feet wide. The dimensions of the working space at any newly installed melting unit are also prescribed.

Every ladle is to be dried before use and located in a place which is so ventilated that no smoke or gas will enter the working space.

Guards or other protective devices are prescribed for various types of ladles.

Ventilation. The provisions dealing with ventilation, which are very detailed, are designed to prevent silicosis. The regulations set out standards for general ventilation equipment and very detailed requirements for local exhaust systems. These last are intended to provide for the collection and disposal of process-created harmful dusts or substances at their source of production.

Every foundry must be ventilated by a local exhaust system or by a general ventilation system or both (see also "General Ventilation," below), but whatever the method used, the system must be designed,

fabricated, installed and maintained so as to remove, as far as practicable, every impurity in the air produced by the operations that might endanger the health or safety of persons in the foundry.

Every ventilation system must discharge the air to the outside so that it does not re-enter the building.

It is the employer's responsibility to ensure that adequate provision is made for the entry of air into the foundry to replace the air discharged from the building. He must see that this air is heated when necessary to maintain in each working area at least the minimum temperature required by the legislation. This air must not be taken from a region contaminated with silica or other noxious dust or substance, and must enter the foundry in such a manner as not to create a dusty condition in the atmosphere of the foundry.

This air must enter the working space through air inlets of sufficient number and area and so arranged, located and equipped, as to give a reasonably uniform air flow across the working space without subjecting workers to air velocities exceeding 200 feet per minute. The velocity of the incoming air, may exceed this limit if an inspector thinks it is adequately controlled so as not to affect the health or comfort of an employee.

General Ventilation. As has been indicated, a general ventilation system is permitted in a foundry provided it is used to supplement but not to replace any prescribed local exhaust ventilation.

Subject to certain exceptions, every foundry in which iron, steel or aluminum is cast into sand moulds or moulds using sand cores, must be provided with general ventilation equipment that will ventilate the foundry with a volume of at least 2,500 cubic feet of air per minute for each ton of the maximum number of tons of metal poured in an eight-hour period, and 500 cubic feet per minute of air for each person employed during that period in the working space of the foundry.

In a foundry where brass, bronze or magnesium is cast, the general ventilation equipment must ventilate at a rate of at least 5,000 cubic feet of air per minute for each ton and 1,000 cubic feet per minute for each person.

Additional requirements are set out for a foundry of the type described above that was operating when the regulations came into force and which has a ceiling height of less than 16 feet above the working space.

A foundry in which any other metal but iron, steel, aluminum, brass, bronze or magnesium is cast, or where any mould or core other than sand is used, must be ventilated at a rate satisfactory to the chief inspector.

Moulding material that adheres to any casting may not be removed by the use of compressed air or by other means whereby dust particles may be disseminated into the air of the working space and are not controlled by local exhaust ventilation.

Every exhaust or dust collection system, stack or outlet used for the discharge of contaminated air, is to be so located, designed and constructed as to prevent the entry or return of contaminated air into any building. If, however, dust or fumes of lead, cadmium or other toxic material, are exhausted from a foundry, an inspector may require that equipment be installed to remove the toxic material from the air that is being exhausted.

With certain exceptions, no part of any dust-collecting system, local exhaust or air-cleaning system within any building, except an air-tight discharge duct from a dust collector to the exterior of the building, may be under positive pressure.

Every collector that collects aluminum or magnesium dust (except one that uses water) must be located outside the foundry or any other building unless located in a room that meets the following requirements:

1. It is used solely for the housing of dust-collecting equipment.
2. It is separated from the rest of the foundry by a dust-tight partition so constructed that it is fire resistive for at least one hour.
3. It is constructed to provide adequate explosion relief to the outdoors.

The velocity of air in the ducts of every dust collection system must be at least 3,500 feet per minute, except where the air is leaving the dust collector.

While any process producing any noxious dust, fume, gas, smoke, vapour or heat is in progress, the exhaust system must be operated continuously.

The chief inspector has discretionary power to order modifications in any foundry ventilation system after it has been installed. If, upon being tested by a competent person, the atmosphere in any part of a foundry is found to contain dangerous amounts of dusts, gases or fumes, or to be unsatisfactory to the chief inspector in some other respect, the employer must make such changes as the chief inspector directs.

Local Exhaust Ventilation. Where any machine or process is operated so as to form a localized source of dust, fume, gas,

smoke or mist, a local exhaust must be provided, where practicable, so that the noxious material does not enter the general atmosphere of the building.

The rate of local exhaust of every power shake-out must conform with the regulations. Other provisions specify how flat-deck or cylindrical screens and bucket elevators are to be enclosed and exhausted.

Every conveyor belt must be provided with exhaust hoods, which must be ventilated in the manner prescribed. The regulations also set out ventilation requirements for sand mullers and sand storage bins, and for various types of tumbling mills.

Special requirements are laid down for places where dry, abrasive blasting is carried on, the standards to be observed depending on where the operation is performed. Any abrasive equipment not using compressed air must be enclosed with solid material and exhausted in the manner prescribed.

Other provisions prescribe the type of ventilation to be provided at every core and annealing oven, at places where annealing boxes are filled or dumped, and for shell-moulding and shell core machines.

Every power-driven hand tool for cleaning castings must have an adequate local exhaust system attached and may be used only in a booth or on a downdraft table or grille. Other precautions to be observed depend on where such tools are used.

Where practicable, a local exhaust system must be provided for any inoculation process or any process where magnesium is mixed with any other metal.

No stationary grinding wheel, abrasive cutting-off wheel or buffing or polishing wheel may be used unless it is enclosed and locally exhausted in accordance with the regulations. The enclosure for a stationary grinding wheel or abrasive cutting-off wheel must be of sufficient strength and so located as to prevent injury to any person in the immediate vicinity of the wheel.

Every grinding or polishing belt must be enclosed, except at the working area, and be locally exhausted in the manner prescribed so that the air movement is in the direction of belt travel at the working area.

Every swing grinder is to be provided with mechanical ventilation by means of an exhaust hood or an exhaust booth approved by an inspector.

Upon the direction of an inspector, an adequate system of local exhaust ventilation must be provided wherever brass or other metal with noxious fumes is poured, or when any metal is poured into shell moulds.

Every melting unit is to be provided with ventilation to remove from the working

space all dusts, fumes, etc., produced by the melting of the metal and the combustion of the fuel.

Where brass or other metals with noxious fumes are melted, an enclosure, canopy hood, or other means for the collection of fumes or other substances produced in the melting process is to be provided as directed by an inspector.

Additional precautions must be taken when lead, cadmium or alloys containing beryllium or other metals of similar or greater toxicity are melted. In such cases, the furnace must be as completely enclosed as is practicable and the tapping spout must be locally exhausted.

Heating. An inspector is empowered to require in writing a minimum temperature of 50 degrees Fahrenheit to be maintained in any working space in a foundry. If, however, the foundry is heated by means of the heat generated from any process, the temperature for one hour at the beginning of the main operating shift may be less than 50 deg. F. Every washroom, locker room, change room or shower room in a foundry is to be kept at a temperature of at least 70 deg. F.

Any product of combustion from any heating unit for a foundry building must be directly vented to the outside atmosphere unless the chief inspector or a departmental engineer has approved a different arrangement.

The regulations further provide that the flow of air from any unit heater or positive-pressure hot-air system that heats a foundry must be so directed as not to increase the concentration of dust in the breathing zone of any worker nor to re-circulate dust-laden air in the working space.

Heat shields, heat-absorbent or heat-reflecting panels, cooling coils, air cooling or other means must be used to eliminate or reduce the effects of radiant heat upon persons.

Approval of Plans and Changes. New air-handling or air replacement systems, local or general exhaust systems, or air-heating systems, must be installed in accordance with drawings and specifications previously approved by an engineer of the Department. The same rule applies to alterations of existing systems, except in the case of minor repairs or adjustments.

Any type or arrangement of equipment, method of operation or building construction that does not strictly comply with regulations, but which provides equivalent protection, may be used with the written approval of the chief inspector.

Where, under special circumstances, strict compliance with the provisions is not adequate for the protection of employees, the chief inspector may order such modifications as he considers necessary.

Sanitation. In every foundry there must be a shower room with at least one shower bath supplied with hot and cold water for every 10 employees engaged on any shift. Adjacent to the shower room or wash room, the employer is to provide one or more locker rooms equipped with lockers or other suitable facilities in which employees may keep their clothes. Adequate drying facilities are also to be provided for drying work clothing.

If, after the regulations come into force, a locker room, change room, washroom or shower room is established in a building separated from the foundry, the building must be connected to the foundry by an enclosed heated passageway. This passageway is to be maintained at a temperature not less than the minimum temperature required for the working spaces of the foundry.

The walls and ceiling of any such locker room, change room, washroom or shower room must be finished in a light colour; the floor must have a smooth, waterproof surface, and the room must be maintained by the employer in a clean and sanitary condition.

Personal Protective Equipment. It is mandatory for an employer to provide personal protective clothing or equipment for employees engaged in specified types of work and to make sure that they use it. He must also see that an employee is informed of the requirements before allowing him to engage in work where protective clothing or equipment is required.

The employer must provide every employee whose eyes are exposed to injury from dust, flying chips or molten metal with a protective device or equipment designed to prevent injuries to the eyes.

An employee who handles molten metal must be furnished with leggings or with more adequate protective clothing if required in writing by an inspector.

Especially designed stationary or movable guards, goggles or eye shields are to be provided by the employer for any employee who is subject to direct or reflected arcs or radiation from electric-arc furnaces, welding operations or similar sources of harmful radiation.

If employees are engaged in occasional or infrequent operations that produce noxious dusts, gases, vapours or fumes, and if an inspector is satisfied that the operations do not lend themselves to the installation

of permanent mechanical ventilation equipment, the employer is obliged to provide them with proper respiratory equipment.

The employer must also ensure that a person who normally works between a source of dust or fumes and the inlet of the local exhaust system wears at all times a suitable air-supplied breathing apparatus.

Some protective clothing must be provided by the employees themselves. Foundry employees who handle molten metal are required to wear gaiter-type boots designed to prevent injury from molten metal. Persons who handle heavy objects must wear boots or shoes with protective toe boxes or steel toes.

Ontario Power Commission

A new Ontario Electrical Code, applicable to all electrical equipment and electrical installations, has been approved by Ontario Regulation 304/63, issued under the Power Commission Act. Gazetted on November 23, it revokes R.R.O. 1960, Regulation 490, as amended by O. Reg. 200/62.

The term "electrical equipment" includes all equipment for the generation, transmission, distribution, supply or utilization of electric power or energy. "Electrical installation" includes the installation, maintenance, alteration, extension and repair of wiring and its connection with any electrical equipment or other part of the wiring system.

Quebec Workmen's Compensation Act

In Quebec, all regulations excluding from the coverage of the Workmen's Compensation Act industries in which not more than a stated number of workmen are usually employed, were repealed by Regulation 27, which was approved by O.C. 2160 gazetted on December 14 and in force on January 1, 1964.

The following industries, which were previously excluded if fewer than four workmen were regularly employed in the establishment, are now covered regardless of the size of the work force:

Repair shops, which are not garages; blacksmiths or joiners' shops; upholstering; framing; the maintaining and operating of waterworks systems; the manufacture of rubber stamps, writing pads and patterns; butchering; the cutting and storage of natural ice and the trade, transportation or delivery of natural or artificial ice; the coal and wood business, timber trade and the building materials business; planing mills and door and sash factories; and carpentry, joinery or cabinet-making work in a work shop.

Further, general transportation of any kind (except as provided for in Chapter I, par. i), including scavenging, street cleaning and removal of snow or ice; bricklaying, masonry or stone setting; plastering, concrete or cement work in connection with buildings; excavation

work connected with buildings; structural carpentry; lathing; installation of pipe organs; house wrecking or house moving; painting, decorating or renovating; glazing or installation of plate glass; sheetmetal work; roofing; the erection of lightning rods; electric wiring of buildings or installation of lighting fixtures; plumbing, heating or sanitary engineering; and gas or steam fitting.

Industries previously included only if six or more workers were regularly employed in an establishment are now covered regardless of the number of persons employed. These are:

The cutting or sawing of firewood; the manufacture of cheese and butter and the operation of a creamery or dairy; the construction and exploiting of telephone lines and works connected thereto; laundries operated by motive power, cleaning, dyeing and laundering establishments; quarrying of and prospecting for stones and metals; the manufacture of artificial plumes and flowers; confectionaries; bakeries; the cutting, felling, piling, transportation of logs, wood, or wood bark and the peeling of logs by hand; window-cleaning; the fishing industry; the sale, service or repair of motor vehicles; public or storage garages; the sale, storage, distribution and handling of gasoline, fuel oil, propane gas, the operation of pipe lines and similar undertakings; and the manufacturing of artificial limbs.

All sawmills are now covered regardless of size, whereas previously those with fewer than seven employees were excluded.

Coverage has also been extended to the following other industries previously excluded if fewer than seven persons were usually employed: milling; the manufacture of cereals or cattle foods; warehousing or handling of grain or operation of grain elevators, threshing machines, clover mills or ensilage cutters.

The repeal of these numerical exclusions means that many small establishments where dangerous operations are performed are now subject to the collective liability provisions of the Act. Previously, such places were covered only on the application of the employer, and unless he applied for coverage, an employee was not entitled to benefits.

Saskatchewan Radiological Health Act

In Saskatchewan, the Radiological Health Act, 1961, was brought into force on December 15, 1963, by a proclamation gazetted on December 13.

This Act provides for the registration of radiation installations and radiation equipment; prohibits the establishment of a radiation installation for industrial purposes without departmental approval of plans; and requires persons in control of the possession and use of radiation equipment to be qualified in accordance with the legislation.

Monthly Report on Operation of the Unemployment Insurance Act

*Total of claimants for unemployment insurance benefit at end
of November down 20 per cent from the number a year earlier*

Claimants for unemployment insurance benefit numbered 303,400 on November 29. This number was 40 per cent larger than the total of 218,900 on October 31 but 20 per cent smaller than the figure of 374,200 on November 30, 1962.

Between 85 and 90 per cent of the increase from October to November 1963 was made up of males, who comprised 72 per cent of the November 29 total compared with 66 per cent on October 31 and 74 per cent on November 30, 1962.

Persons who began to claim benefit during the month made up 60 per cent of the November 29 total and 66 per cent of them were males. Those who became claimants during the month made up 52 per cent of the October 31 total, of whom 57 per cent were males.

Most of the claimants on November 29 had been on claim from one to four weeks; 21 per cent of the males and 30 per cent of the females had been on claim five to thirteen weeks; 8 per cent of the males and 16 per cent of the female claimants, 14 to 26 weeks.

Initial and Renewal Claims

Initial and renewal claims filed during November numbered 189,400, an increase of 63,200, or 50 per cent, compared with the October total. Compared with the total of 243,600 in November 1962, however, it was a reduction of between 20 and 25 per cent.

Beneficiaries and Benefit Payments

The average weekly number of beneficiaries in November was estimated to be 161,200, compared with 148,800 in October and 189,000 in November 1962.

Payments during the month totalled \$15,500,000, which was 10 per cent more than the October total of \$14,000,000 but 20 per cent less than the figure of \$18,900,000 in November 1962.

The average weekly payment was \$23.98 in November, \$23.51 in October and \$23.85 in November 1962.

Insurance Registrations

On November 30, insurance books or contribution cards had been issued to 4,926,889 employees who had contributed to the Unemployment Insurance Fund at one time or another since April 1, 1963.

On the same date, registered employers numbered 336,871, a decrease of 1,214 since October 30.

Enforcement Statistics

During November, 11,879 investigations were conducted by enforcement officers across Canada. Of these, 7,515 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 381 were miscellaneous investigations. The remaining 3,983 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 302 cases, 121 against employers and 181 against claimants.* Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 1,658.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in November totalled \$30,336,617.41, compared with \$30,963,087.46 in October and \$29,588,260.44 in November 1962.

Benefits paid in November totalled \$15,467,325.53, compared with \$13,989,451.92 in October and \$18,933,672.63 in November 1962.

The balance of the Fund on November 30 was \$56,134,336.10; on October 31 it was \$41,265,044.22, and on November 30, 1962, it was \$100,583,175.19.

* These do not necessarily relate to the investigations conducted during this period.

In a comparison of current unemployment insurance statistics with those for a previous period, consideration should be given to relevant factors other than numbers, such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation. Claimants should not be interpreted either as "total number of beneficiaries" or "total job applicants."

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process.

Monthly Report of Placement Operations of the NES

Placements by National Employment Service local offices during December numbered 104,900, of which 65,900 were placements of men and 39,000 placements of women. This represented an increase of 7.9 per cent from December 1962, accounted for by a rise of 14.6 per cent in placements of men and a decline of 1.7 per cent in placements of women.

For the year 1963, placements totalled 1,178,100. This marked the third consecutive year in which well over a million persons were placed in employment by the NES. Of the total, male placements numbered 790,400 and female placements, 387,700, or 67.1 per cent and 32.9 per cent respectively.

Placements involving the movement of workers from one area to another comprised 2.6 per cent of December's placements, fractionally less than the 2.7 per cent in December 1962. Transfers during the whole of 1963 accounted for 5.3 per cent of all placements. This proportion was slightly

lower than 1962 but higher than any other year since 1946.

Regionally, placements during December and the year were as follows:

	December 1963	1963
Atlantic	8,400.....	84,100
Quebec	32,500.....	341,500
Ontario	33,600.....	407,800
Prairie	18,600.....	202,900
Pacific	11,800.....	141,900

Vacancies notified to NES offices during December numbered 106,900, a rise of 8.3 per cent over the number during the same month last year. As with placements, the increase was confined to vacancies for men, which at 67,700 were 16.3 per cent higher than in December 1962. Vacancies for women, numbering 39,200, decreased by 3.1 per cent.

The cumulative total of vacancies notified in 1963 was 1,446,000, comprising 938,100 (64.9 per cent) male vacancies and 507,900 (35.1 per cent) female vacancies.

Decisions of the Umpire under the Unemployment Insurance Act

Decision CUB 2270, Nov. 8, 1963

Summary of the Main Facts: The claimant, single, 21 years of age, who lived in a village in Nova Scotia about 25 miles from the nearest town, filed a postal application for unemployment insurance benefit dated January 22, 1963 and was registered for employment as a waitress. A benefit period was established effective January 6, 1963.

According to the application, she had worked as a waitress at a service station restaurant in her village from May 28, 1962, to January 5, 1963, when she was laid off temporarily. Her rate of pay was \$20.00 a week, plus.

In the Confirmation of Separation (Form UIC 479) the employer wrote: "Business Discontinued."

In a letter dated March 19, 1963, the local office of the Commission notified the claimant of an offer of continuing employment as a waitress in the nearest town at a starting wage of \$18 a week plus meals, which was in accordance with the prevailing rate of pay in the district for that type of work. The hours of work were eight a day and 48 a week, shift work. The restaurant was reported to be a distance of approximately 20 miles from her home and she

would have had to arrange for her transportation. The local office commented that the claimant's Postal Application for Employment stated that she would accept waitress work in that town.

The claimant wrote to the local office on March 20 that the offered employment was "not suitable for me as it is 25 miles from my home and I have no way of transportation to work there whatsoever." She explained that she had had a job that was seasonable and handy to her home, and that she would be returning to work in May. "I have to be home at night to stay with my mother as my father has got a bad heart condition and she can't stay alone at night," she added.

By letter dated March 25, the local office asked the claimant to state the employment opportunities in or near her village that would enable her to be home each night, and what efforts she had made to secure employment since January 6. In her reply, dated March 27, she wrote that:

The employment opportunities which enable me to be home each night is that I work day shift at the [service station] restaurant here from 11.00 a.m. to 7.00 p.m. and it is approximately a two-minute walk from my home.

I have made no efforts to secure employment as a waitress elsewhere because my job at the restaurant here is seasonable, . . . and there is no other restaurant in [the village] where I can secure work during the winter months as a waitress to enable me to be home each night . . .

The insurance officer disqualified the claimant and suspended benefit from March 17 to April 27, 1963 inclusive, on the ground that, after having become aware of a situation in suitable employment, she without good cause, refused to carry out written instructions for such situation when it was offered to her (Section 59(1)(a) of the Act).

The claimant's prospective employer wrote on March 31 that the claimant had been working at his restaurant under the previous owner for two years and that he expected to hire her in May, "as her job is seasonal here."

The claimant appealed to a board of referees in a letter dated April 2. She wrote:

I think I shouldn't have been disqualified on account of my job being seasonable here and I will be going back to work in May, and the two jobs as waitress in S— and A— are not suitable for me, as [one] is about 20 miles and the [other] about 27 miles from my home and I have no convenient transportation to work to either one . . . Furthermore, the only transportation of convenience to the two jobs would be by taxi, costing between \$5.00 to \$7.00 one way. Making \$18.00 per week as waitress, I really couldn't make any money at these two jobs. . .

A board of referees heard the case in New Glasgow on April 30, 1963. The claimant was neither present nor represented at the hearing. The unanimous decision of the board is as follows:

The Board finds that the claimant lives in an area in a small country district where employment opportunities are virtually non-existent and refused employment in the closest industrial centre where employment was available because of lack of transportation facilities. The Board has also taken into consideration that the claimant is single and 21 and if desirous of work should have obtained living accommodations near the proposed job opportunity, and does not consider lack of transportation facilities from her home just cause for refusing to apply for a situation in suitable employment.

The appeal is disallowed. . .

The claimant applied to the chairman of the board of referees for leave to appeal to the Umpire. After retelling the story of her previous employment and layoff, her expectation of being re-employed, her rejection of the job offer and her subsequent disqualification, she said she had looked for a boarding house near the offered job and had spoken with "some of the girls that work at the said restaurant." They told

her, she said, that the nearest boarding house was from 3½ to 4 miles away.

This would be quite a walk for me; also, if I had to work (which likely I would have) a 4 p.m. to 12 midnight shift and . . . a rain, snow or any other kind of a storm should arise, would anyone say that I should be expected to walk that distance?

" . . . checking on board prices, would cost me about \$2.50 to \$3.00 per day and for six days a week would be about \$18.00, and only offer \$18.00 per week; I would be wasting my time working for nothing, therefore I didn't accept the [two] waitress jobs . . . therefore I feel that I should be given my insurance benefits and not have been disqualified . . .

Leave to appeal to the Umpire was granted by the chairman of the board of referees on the ground of whether or not the claimant could refuse to accept a situation in suitable employment during a three- or four-month seasonal layoff in her regular employment.

On September 9, the claimant's representative addressed the following letter to the Chief of the Adjudication Division of the Unemployment Insurance Commission at Ottawa:

In a recent letter to [claimant], you stated your willingness to have statements of observations bearing on [her] case considered. Although I do not know [her] personally, I am very familiar with the circumstances on which she bases her appeal.

Her home is at L—, a village about twenty-five miles from the town of A—. When she became seasonally unemployed at L—, she applied at your New Glasgow office, and after a time was offered a job at [a drive-in] restaurant. This particular restaurant is not in the town of A—, but rather, is on the highway about three and one-half or four miles from A—.

The wages offered by the restaurant are such that any person taking employment there could anticipate a regular loss in the season when business (and therefore tips) is scarce, unless that person lived in his or her own home in A— or between A— and the restaurant. In other words, it seems very doubtful to me that any person who had to pay board, room rent, and transportation could "make ends meet" at the wages offered during the slow seasons. I do not wish to suggest that the wages are too low—the restaurant, presumably, can find persons so situated that they can afford to accept the employment. What I am suggesting [is] that the offer of employment would be considerable only to a person specially situated . . .

Considerations and Conclusions: The claimant, in effect, said in her appeal to the Umpire that she had been informed that no living accommodation was to be found near the prospective place of employment and that the nearest boarding house was in A—, a distance of "from 3½ to 4 miles away" which, in the absence of any means of transportation, she would have had to walk, sometimes after midnight, as the job called for shift work.

I consider that, under those circumstances and in the absence of any evidence to show that daily transportation between A— and S— or nearer living accommodation could have been found, the claimant has proved, as required by section 59(1) of the Act, that she had "good cause" for failing to carry out the written instructions which were sent to her on March 29, 1963.

I consequently decide to allow the claimant's appeal.

Decision CUB 2271, Nov. 8, 1963

(Translation)

The claimant filed an initial application for benefit on March 13, 1963. She had been employed as a day labourer by The Dominion — Co., W—, Que., from October 22, 1962, to February 26, 1963. She made the following statement:

I have been dismissed for lack of work. I am available for and capable of work only at The Dominion Co. I will not work at any other place. I was told it was only a temporary layoff. I will be called as soon as work is resumed.

The insurance officer disqualified the claimant and suspended benefit from March 10, 1963, on the ground that, in his opinion, the claimant had not established that she was available for work, as required by section 54(2)(a) of the Act, since she was restricting her availability to one employer only.

On April 3, 1963, the claimant signed the following statement:

I, —, do declare that I was not laid off permanently, but only for a limited period of time. I am not interested in working elsewhere.

I have undergone a heart operation in the past and I can perform only certain type of work, that is why I wish to stay with my former employer.

On April 26, the claimant appealed to a board of referees. Her appeal reads:

I have never refused to work in W—; . . . I am returning to work on Monday, but there seems to be some misunderstanding about the work; I wanted to work in W— and not in V— nor in any other place. I am returning to work on April 29, 1963.

The claimant did not appear herself nor was she represented when her case was heard by the board of referees in Drum-

mondville on May 23. The unanimous decision of the board reads in part as follows:

Each case of this nature must obviously be decided on its merits and in the present circumstances one must presume that no employer would have engaged the claimant knowing that she was to return to the Dominion Co. on April 29, 1963. Moreover, no position, not even a temporary one, was offered to the claimant.

Under the circumstances, the board of referees has given the claimant the benefit of the doubt without a dissenting voice, and decided to entertain her appeal and set aside the decision of the insurance officer.

On July 15 the insurance officer appealed to the Umpire and, on August 23, submitted the following reasons:

. . . We submit that the board of referees has erred in deciding that the claimant had established her availability for work as of March 13, 1963. The claimant has stated in non-equivocal terms on March 13, March 26 and April 3, 1963, that she was not available for work until she had returned to her former employer where no vacancies were reported at the time. Her late contradictory statement, made on April 26, 1963, does not carry much weight against her former statements and did not impress the board of referees.

A claimant who declares that he is not available for work during a period of temporary layoff certainly does not establish that he is available for work as required to do by the Act (CUBs 1956, 1969 and 2054). During a temporary lay-off, a claimant may prove his availability for work, only if he is willing to accept a short-term assignment pending his return to his regular work (CUB 2165).

We feel the decision of the board of referees must be reversed and the appeal of the insurance officer maintained.

Considerations and Conclusions: According to the established jurisprudence, a claimant who is unemployed for a short period of time is not relieved from proving his availability for work in accordance with section 54(2)(a) of the Act.

The statements made by the claimant are clearly to the effect that she was willing to accept work only with her regular employer and that the latter had none to offer during the period in question.

Therefore, and for the same reasons as those stated by the insurance officer in his appeal, I decided to reverse the decision of the board of referees.

I consequently decided to allow the insurance officer's appeal.

WAGE SCHEDULES

Wage Schedules Prepared and Contracts Awarded in December

Works of Construction, Remodelling, Repair or Demolition

During December the Department of Labour prepared 223 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, a total of 137 contracts in these categories was awarded. Particulars of these contracts appear below.

In addition, 121 contracts not listed in this report and which contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, Defence Construction (1951) Limited, The St Lawrence Seaway Authority and the Departments of Defence Production, Mines and Technical Surveys, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practices;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in December for the manufacture of supplies and equipment were as follows:

<i>Department</i>	<i>No. of Contracts</i>	<i>Aggregate Amount</i>
Defence Production	110	\$576,487.00
Post Office	6	368,466.50
Royal Canadian Mounted Police	2	8,361.75
Transport	1	7,425.00

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) The working hours shall be those fixed by the custom of the trade in the district, or if there be no such custom, then they shall be fair and reasonable hours;

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour showing the applicable wage deemed to be required in the execution of the work. These wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classification to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Wage Claims Received and Payments Made in December

During December the sum of \$3,748.61 was collected from seven contractors for wage arrears due their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 104 workers concerned.

Contracts Containing Fair Wage Schedules Awarded in December

DEPARTMENT OF AGRICULTURE

Near Outlook Sask: Cathodic Protection Service Ltd, construction of cathodic protection for tunnels, stage 1 (contract 39), South Saskatchewan River Project.

CENTRAL MORTGAGE AND HOUSING CORPORATION

Montreal Que: Belgo Construction Reg'd, replacement of stair hall windows, Le Domaine Apartment Project; Nazalpino Construction Ltd, repairs to wooden windows, Villeray Terrasse.

In addition, this Corporation awarded nine contracts containing the General Fair Wages Clause.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

Eskasoni Indian Agency N S: Stephens Construction Ltd, construction of school & recreation room addition to Eskasoni IDS, Eskasoni IR. *Pointe Bleue Indian Agency Que:* Andre Cloutier Ltd, installation of ventilating fans, Pointe Bleue IRS. *Clandeboye Indian Agency Man:* Sasaki & Associates Ltd, installation of dishwashing facilities, Assiniboine IRS.

DEFENCE CONSTRUCTION (1951) LIMITED

Summerside P E I: Universal Electric, Division of Univex Electrical, Construction & Engineering Ltd, installation of aerodrome lighting facilities, RCAF Station. *Cornwallis N S:* Planned Renovators Ltd, interior painting, bldgs No. 7 & No. 20, HMCS *Cornwall*; Eastern Contracting Ltd, replacing wood foundation walls with concrete in five bldgs, HMCS *Cornwallis*. *Dartmouth N S:* Parker Bros (1960) Ltd, plaster repairs & painting, Bldg No. 100, HMCS *Shearwater*. *Debert N S:* McDonald Construction Co Ltd, construction of reservoir & installation of sprinkler system in stores depot, Camp. *Halifax N S:* Parker Bros (1960) Ltd, interior painting of various bldgs, Windsor Park. *Chatham N B:* Cambrian Construction Ltd, modifications to hangar facilities & armament compound, RCAF Station. *Bagotville Que:* Frs Jobin Inc, modifications to hangar facilities & armament compound, RCAF Station; Atelier de Peinture Inc, fire retardant painting of two barrack blocks, RCAF Station; Krauspe & Krauspe, interior painting of 57 PMQs. *Valcartier Que:* Cardinal Painting & Decorating Co Ltd, interior painting of 200 PMQs, Camp. *Val d'Or Que:* Paquin Construction Co Ltd, modifications to hangar facilities & armament compound, RCAF Station. *Gloucester Ont:* Hansa Construction Ltd, construction of addition to administration bldg, HMCS *Gloucester*. *Leitrim Ont:* Roseboro Construction & Equipment Ltd, construction of antennae, Ottawa Wireless Station. *Calgary Alta:* Taylor Decorating Ltd, interior painting of four bldgs, Currie Barracks. *Comox B C:* Brockbank & Hemingway Ltd, modifications to hangar facilities & armament compound, RCAF Station.

In addition, Defence Construction (1951) Limited awarded one contract containing the General Fair Wages Clause.

DEPARTMENT OF DEFENCE PRODUCTION

Summerside P E I: Maritime Asphalt Products Ltd, repainting interior of various bldgs, RCAF Station. *Cornwallis N S:* D J Lowe Ltd, interior painting of 30 married quarters, HMCS *Cornwallis*; D J Lowe Ltd, construction of timber shore protection wall, HMCS *Cornwallis*. *Greenwood N S:* Hilchie Septic Tank Service Ltd, cleaning & interior painting of two fuel storage tanks, RCAF Station. *Halifax N S:* T Hogan & Co Ltd, boiler

repairs, central heating plant, HMCS *Stadacona*; James F Lahey Ltd, interior painting, bldg No. 61, Windsor Park. *Shearwater N S*: J L Nichols Contracting Ltd, installation of drainage system in PMQ area, RCN Air Station. *Sydney N S*: M R Chappell Ltd, replacement of canopies, Bldg No 17-4, 17-5 & 17-6, Point Edward Naval Base; Stephens Construction Ltd., repairs to deck, Seaward Defence Jetty, Point Edward Naval Base. *St Stephen N B*: Edward M DeLay, renovations to basement of Armoury. *Hull Que*: Robert Strang, painting & plaster repairs, Armouries. *Quebec Que*: Guard-X Inc, installation of fire alarm system, Grande Allee Armoury. *Westmount Que*: Atlas Mastic Asphalt Ltd, resurfacing of vehicles bay & drill hall floors, 3 Hillside Ave. *Clinton Ont*: W MacDonald Electric Co Ltd, installation of fire detection & alarm system in Bldgs No. 8 & No. 8, RCAF Station. *Guelph Ont*: Carere, Boles & Trimble Ltd, alterations to heating & stores accommodation, Armoury. *London Ont*: Tripod Construction Ltd, alterations to No. 27 COD, Highbury Ave. *Ottawa Ont*: Ottawa Painting & Decorating Reg'd, interior painting of Beach Bldg. *Picton Ont*: Arthur A Sills & Sons Ltd, replacement of drill hall floor. *Port Arthur Ont*: D R McCormick Electric Ltd, installation of fire detection system in Bldgs No 1 & No. 2, Armoury. *Suffield Alta*: McGregor Telephone & Power Construction Co Ltd, erection of power line & modification & repairs to existing power lines, Experimental Station. *Esquimalt B C*: K J Howe, interior painting of 22 residences, Belmont Park. *Masset B C*: Central Electric, removal & replacement of 56 power poles, RCN Naval Radio Station.

In addition, this Department awarded 47 contracts containing the General Fair Wages Clause.

DEPARTMENT OF MINES AND TECHNICAL SURVEYS

This Department awarded three contracts containing the General Fair Wages Clause.

DEPARTMENT OF NORTHERN AFFAIRS AND NATIONAL RESOURCES

Prince Edward Island National Park P E I: Williams & Murphy Ltd, construction of toilet bldgs & kitchen shelters, Rustico Island Campground.

PROJECTS ASSISTED BY FEDERAL LOAN OR GRANT

Elmira Ont: Dunker Construction Ltd, construction of sewage treatment plant. *Winnipeg Man*: Borger Bros (1963) Ltd, construction of St James interceptor, Sections A & B, St Charles Golf Course to Parkdale Blvd; Nelson River Construction, Section C, from Assiniboine River to Roblin Blvd; Nelson River Construction, construction of Charleswood lagoon sewage forcemain from Perimeter Road pumping station to Charleswood lagoon; Nelson River Construction, construction of Charleswood lagoon effluent pipeline from Charleswood lagoon to Assiniboine River.

DEPARTMENT OF PUBLIC WORKS

Cottrell's Cove Nfld: Gid Sacrey Ltd, wharf repairs. *Exploits Nfld*: Guy H Eveleigh, wharf repairs. *Lark Harbour Nfld*: Pelley Enterprises Ltd, wharf extension. *Marystown Nfld*: Spracklin & Reid Ltd, wharf reconstruction. *Point Lance Nfld*: Avalon Construction & Engineering Ltd., community stage repairs. *Point Leamington Nfld*: Gid Sacrey Ltd, wharf reconstruction. *Port Anson Nfld*: Pelley Enterprises Ltd, wharf repairs. *Port au Choix Nfld*: Pinsent Construction Co Ltd, wharf repairs. *St John's Nfld*: Avalon Construction & Engineering Ltd, harbour fender system improvements, north shore; Colonial Construction Co Ltd, harbour improvements (pumping station). *Woodstock Nfld*: Gid Sacrey Ltd, wharf extension. *Fisherman's Harbour N S*: Colin R MacDonald Ltd, reconstruction of groynes. *Halifax N S*: J E Mahar & Son Co Ltd, alterations to electrical system, federal bldg. *Maughers Beach N S*: Naugle's Sand & Gravel Co Ltd, construction of protection works for Department of Transport. *Parrsboro N S*: Joseph Almon, wharf repairs. *Pictou N S*: Universal Electric, installation of power outlets & lighting for warehouse, pier "C"; Ronald C Goodall & Alfred E MacMaster, construction of rock talus. *Poirierville N S*: Gerald J Forgeron, wharf repairs. *Port Maitland N S*: Clare Construction Co Ltd, harbour improvements (breakwater repairs). *St. Peters N S*: M R Chappell Ltd, construction of post office bldg. *Seal Island N S*: Shelburne Contracting Ltd, harbour improvements. *Tiverton N S*: E K Potter Ltd, wharf repairs. *Wedgeport N S*: Kenney Construction Co Ltd, breakwater repairs. *Fairhaven N B*: Fundy Contractors Ltd, wharf extension. *Little Cape N B*: Scott Wheaton Ltd, wharf repairs. *Port Elgin N B*: Price Construction Co, wharf repairs. *Albanel Que*: Louis Dallaire & Fils Ltee, construction of post office bldg. *Anse au Griffon Que*: Julien Synnott, harbour repairs. *Asbestos Que*: Laurier Vachon Ltee, alterations to federal bldg. *Cap St Ignace Que*: Henri Pelletier,

construction of post office bldg. *Jacques Cartier Que*: Prieur Entreprises Inc, alterations to post office. *La Sarre Que*: Gilles Mercier Enr, quay wall reconstruction. *Montreal Que*: St Lawrence Steeple Jacks Co Ltd, interior painting, Postal Station "H", 1420 Ste Catherine St. W. *Notre Dame de Pontmain Que*: Emilien Maille Inc, wharf reconstruction. *Sacre Cœur Que*: Maurice Roy, wharf repairs. *St Francois du Lac Que*: Wilson Jacob, construction of post office bldg. *Ste Genevieve de Pierrefonds (Roxboro) Que*: Arthur Bellefeuille, cleaning interior of new federal bldg. *St Prime Que*: Louis Dallaire et Fils Ltee, construction of post office bldg. *St Sulpice (Ile Bouchard) Que*: Turnbull Construction Inc, lengthening slips & landing facilities. *Sept Iles Que*: Landry Construction Inc, wharf repairs (Mgr Blanche St Wharf); Napoleon Brochu, construction of stone mound from Mgr Blanche St wharf toward the town wharf. *Beachburg Ont*: Peter E Sylvestre & Sons Ltd, construction of post office bldg. *Callander Ont*: Sted's Ltd, wharf repairs. *Cochonour Ont*: R B Rostek, construction of post office bldg. *Fort William Ont*: Bird Construction Co Ltd, construction of federal bldg. *Ivy Lea Ont*: Robert D Mackey Construction Co Ltd, reconstruction of wharf. *Kingston Ont*: James Kemp Construction Ltd, alterations & addition to cell block, Prison for Women; A Lanctot Construction Co, repairs to seawall, Royal Military College. *Ottawa Ont*: P E Brule Co Ltd, construction of apiculture processing & services bldg, CEF; A G Reed Ltd, installation of emergency lighting at 555, 556, 588, 615 Booth St; Dairy Technology Bldg, CEF; Justice Bldg, Wellington St; Hunter Bldg, O'Connor St; P O Finance Bldg, Confederation Heights. *Port Hope Ont*: B Zaitz Construction & Marine Ltd, renewal of waling, Queen's Wharf. *South Baymouth Ont*: G F Coles Construction Ltd, small boat harbour improvements. *Toronto Ont*: Price Air Conditioning Co Ltd, alterations & addition to ventilation of Queen's Printer accommodation, Dominion Public Bldg, 1 Front St. *Woodstock Ont*: Ellis-Don Ltd, construction of federal bldg. *Pilot Mound Man*: G L Holmes, construction of post office bldg. *Reston Man*: Gotthard Peterson Construction Co Ltd, construction of post office bldg. *Winnipeg Man*: Surety Construction Co Ltd, construction of cereal growth & service bldg, Research Station. *Craik Sask*: C W Hill Construction Ltd, construction of post office bldg. *Hafford Sask*: J G J Wolfe Construction Ltd, construction of post office bldg. *Lashburn Sask*: J G J Wolfe Construction Ltd, construction of post office bldg. *Pelly Sask*: Wm Slowski, construction of post office bldg. *Spalding Sask*: Wm Slowski, construction of post office bldg. *Blairmore Alta*: Glen Little, alterations to federal bldg for RCMP offices & living quarters. *Killam Alta*: D S Greenfield Construction Ltd, construction of post office bldg. *Picture Butte Alta*: Getkate Masonry Construction Ltd, construction of post office bldg. *Sangudo Alta*: D S Greenfield Construction Ltd, construction of post office bldg. *Sedgewick Alta*: D S Greenfield Construction Ltd, construction of post office bldg. *Trochu Alta*: Silisky Construction Ltd, construction of post office bldg. *Warner Alta*: Getkate Masonry Construction Ltd, construction of post office bldg. *near Chilliwack B C*: Cattermole Timber Ltd, improvements to bank protection, Big Eddy Area, Fraser River. *Kuper Island B C*: B C Pile Drivers Ltd, float construction. *Matsqui B C*: Commonwealth Construction Co Ltd, construction of bldg for Matsqui Institution (Contract No 2). *Skaha Lake (Penticton) B C*: Interior Contracting Co Ltd, breakwater construction.

In addition, this Department awarded 42 contracts containing the General Fair Wages Clause.

THE ST LAWRENCE SEAWAY AUTHORITY

Lachine Que: Daniels & Mannard Heating & Air Conditioning Ltd, installation of heating system for carpenter shop, Lachine Canal. *near St Catharines, Thorald & Port Coiborne Ont*: Beamer & Lathrop Ltd, reconditioning rotating bollards of safety fenders, Welland Canal.

In addition, the St Lawrence Seaway Authority awarded one contract containing the General Fair Wages Clause.

DEPARTMENT OF TRANSPORT

Port Blandford Nfld: M & T Construction Co Ltd, construction of two single dwellings, entrance road & related work. *Halifax N S*: E J Ludford Line Construction Ltd, installation of power distribution switch gear, International Airport. *Yarmouth N S*: Valley Services Ltd, installation of HI lighting on approach 24, MI lighting on runway 15-33 & LI lighting on approaches 15 & 33. *Dorval Que*: Inspiration Ltd, installation of cable tray & conduit system, air terminal bldg, Montreal International Airport. *Montreal Que*: Beaver Asphalt Co Ltd, paving of access road to landscaping maintenance bldg, International Airport. *near Campbellford Ont*: Intrusion-Prepakt Ltd, restoration of Dam No 8

(Continued on page 161)

PRICE INDEX

Consumer Price Index, January 1964

The consumer price index (1949=100) was 134.2, remaining unchanged between December and January. It was 1.7 per cent above the January 1963 index of 132.0.*

Indexes for the food, health and personal care, and tobacco and alcohol components were unchanged between December and January. Indexes were higher for housing, transportation, and recreation and reading, while the clothing index was lower.

The food index was unchanged from 131.4 in December. Foods with price increases included powdered skim milk, cheese, bread, cake, doughnuts, cake mix, coffee and margarine, also: bananas, apples, orange juice, most fresh and canned vegetables, chicken and a few cuts of meat. Lower prices were reported for evaporated milk, sugar, eggs, oranges, tomatoes, turkey, and most cuts of meat.

The housing index increased 0.2 per cent from 137.0 to 137.3. Increases in the home-ownership index moved the shelter component. In the household operation component, price increases for floor coverings and household supplies and services offset lower appliance prices.

The clothing index fell 1.0 per cent from 118.9 to 117.7, as a result of January sale prices. The index for men's wear was unchanged, but indexes for women's and children's wear, and for footwear, showed decreases.

The transportation index rose 0.4 per cent from 140.6 to 141.1, as a result of higher street car and bus fares in Toronto. The automobile operation component declined slightly. Lower prices for new cars and gasoline were partly offset by increases for motor oil.

The health and personal care index remained at its December level of 165.4. The recreation and reading index moved up 0.5 per cent from 151.4 to 152.1. Price increases occurred for radios and phonograph records in the recreation component, and for newspapers in the reading component. The tobacco and alcohol index was unchanged at 118.5.

Group indexes in January 1963 were: food 129.0, housing 135.9, clothing 114.7, transportation 139.8, health and personal care 159.8, recreation and reading 148.6 and tobacco and alcohol 117.8.

*See Table F-1, page 178.

City Consumer Price Indexes, Dec. 1963

Consumer price indexes (1949=100) for eight of the ten regional cities rose between November and December.* Indexes for St. John's, Nfld., and Winnipeg declined.

Movements ranged from a decline of 0.4 per cent in St. John's to increases of 0.4 per cent in Halifax and Saint John.

Food indexes rose in six cities and declined in four, the changes ranging from a drop of 0.8 per cent in Winnipeg to a rise of 1.3 per cent in Ottawa. Housing indexes increased in five cities, fell in two cities and were unchanged in three. Indexes for the clothing component increased in all but two cities, where there was no change. Mixed movements occurred in transportation indexes: five higher and five lower. Indexes for health and personal care were up in five cities, down in three and unchanged in two. There were five higher indexes for the recreation and reading component and five unchanged. Tobacco and alcohol indexes were steady in all cities.

Regional consumer price index point changes between November and December were: Halifax +0.5 to 131.9; Saint John +0.5 to 133.8; Montreal +0.4 to 134.4; Ottawa +0.3 to 134.8; Saskatoon-Regina +0.3 to 129.0; Edmonton-Calgary +0.3 to 128.0; Toronto +0.1 to 135.3; Vancouver +0.1 to 131.9; St. John's -0.5 to 120.3†; Winnipeg -0.1 to 131.1.

Wholesale Price Index, December 1963

Canada's general wholesale index (1935-39=100) declined 0.5 per cent in December to 245.7 from the index of 247.0 in November. The December index was 1.4 per cent above the index of 242.2 in December 1962.

Five major group indexes decreased from November, two advanced and one remained unchanged.

The vegetable products group index dropped 1.7 per cent to 233.6 from 237.6, and the animal products group index moved down 1.1 per cent to 247.6 from 250.3. The textile products group index declined 0.5 per cent to 248.4 from 249.7; the non-metallic minerals products group index edged downward to 254.2 from 254.5.

Advances of 0.3 per cent were recorded in both the wood products group index and the non-ferrous metals products group index. The wood products group rose to 327.3 from 326.4, and the non-ferrous metals group moved to 200.3 from 199.7.

* See Table F-2, page 178.

† On base June 1951=100.

The chemical products group index remained unchanged at 188.8.

The index of Canadian farm product prices at terminal markets (1935-39=100) advanced 0.1 per cent, from 215.8 to 216.0, in the four-week period ended Dec. 27. The field products index rose 1.2 per cent from 163.7 to 165.6, and the animal products index declined 0.5 per cent from 267.9 to 266.5.

The residential building material price index, on the base 1935-39=100, rose 0.3 per cent from 314.7 to 315.6 between November and December, and on the 1949=100 base, by 0.3 per cent also, from 138.0 to 138.4. The non-residential index (1949=100) edged up 0.1 per cent from 137.1 to 137.3.

U.S. Consumer Price Index, December 1963

The United States consumer price index (1957-59=100) rose by 0.2 per cent, from 107.4 to 107.6, between mid-November and mid-December. The increase during the year 1963 totalled 1.7 per cent, although the average for the year (the average of the 12 monthly indexes) rose only 1.2 per cent.

A substantial rise in prices of fruits and vegetables was the main single cause of the increases for both December and the year.

In December 1962 the index was 105.8.

British Index of Retail Prices, November

The British index of retail prices (Jan. 16, 1962=100) rose to 104.0 at mid-November from 103.7 at mid-October. The rise resulted chiefly from seasonal increases in the average prices of household coal and coke.

The index for November 1962 was 101.8.

Publications Recently Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the *LABOUR GAZETTE*.

List No. 184

Aged

1. CENTRE NATIONAL DE SOCIOLOGIE DU DROIT SOCIAL. *Cumul d'une pension de retraite et d'une activité lucrative; colloque des 16, 17 et 18 mars 1959*. Préface par L. E. Troclet. Bruxelles, Editions de l'Institut de sociologie Solvay, Université libre de Bruxelles, 1960. Pp. 224.

At head of title: Centre national de sociologie du droit social en collaboration avec l'Institut de sociologie Solvay de l'Université libre de Bruxelles.

Contains addresses presented at a conference on old-age pensions.

2. U.S. PRESIDENT, 1961-1963 (KENNEDY). *Elderly Citizens of our Nation; Message . . .* Washington, GPO, 1963. Pp. 16.

The late President spoke about what the American government is doing to help older people in 1963.

Conferences

3. ASSOCIATION INTERNATIONALE DES SOCIOLOGUES DE LANGUE FRANÇAISE. *3ième COLLOQUE, GENÈVE, 1960. Structures sociales et démocratie économique*. Bruxelles, Université libre de Bruxelles, Institut de sociologie Solvay, 1961. Pp. 280.

Conference held May 2, 3 and 4, 1960.

4. CANADIAN TAX FOUNDATION. *Corporate Management Conference*, Montreal, 1963. Toronto, 1963. Pp. 49.

Contents: Corporate Sales Tax Pitfalls, by Herbert O. Spindler. Permanent Establishment and Place of Business Tax Problems, by Claude Couture. Processing Income Tax Returns, by J. Gear McEntyre. Year-End Tax Considerations, by R. Alan Short. Recent Tax Cases on "Know-How", Forgiveness of Debts, Lease-Options and Lump Sum Contracts, by George T. Tamaki.

5. INDUSTRIAL RELATIONS RESEARCH ASSOCIATION. *Proceedings of the Fifteenth Annual Meeting, Pittsburgh, December 27 and 28, 1962*. Edited by Gerald G. Somers. [Madison, 1963]. Pp. 359.

Some of the topics discussed were: grievance procedures in Western Europe, the role of employers' associations in industrial relations, university industrial relations courses, older workers, the role of government in collective bargaining, and balanced and depressed labour markets.

6. NATIONAL OFFICE MANAGEMENT ASSOCIATION. *Impact of Automation on the Training of Present and Future Office Employees; Proceedings of a Problem-solving Seminar held at the Coliseum, New York, June 8, 1962*. Willow Grove, Pa., c1962. Pp. 68.

Some of the topics are: training the person who trains others for office automation, training for electronic data processing, electronic data processing in the field of education, and programmed instruction.

Disabled—Rehabilitation

7. BATON, PIERRE. *Inadaptés scolaires et enseignement spécial*. Préface du Professeur Sylvain DeCoster. Bruxelles, Université libre de Bruxelles, Les Editions de l'Institut de sociologie, c1962. Pp. 261.

Discusses the teaching of physically handicapped students in Belgium.

8. GRANT, W. RUSSELL. *Principles of Rehabilitation*. Foreword by Sir James Paterson Ross. Edinburgh, E. & S. Livingstone, 1963. Pp. 76.

9. U.S. PRESIDENT'S COMMITTEE ON EMPLOYMENT OF THE HANDICAPPED. *Guide to Job Placement of the Mentally Retarded*. Washington, GPO, 1963. Pp. 16.

A brief outline of the type of work that can be done by a mentally retarded person.

Education

10. COLEMAN, JAMES SAMUEL. *The Adolescent Society; the Social Life of the Teenager and its Impact on Education*, by James S. Coleman, with the assistance of John W. C. Johnstone and Kurt Jonasohn. New York, Free Press of Glencoe, 1961. Pp. 368.

A study of the character of the adolescent society in 10 American high schools in varying types of communities, of varying sizes. The author examines the inter-relationships between the adolescent and his family, school, and community.

11. HELY, ARNOLD S. M. *New Trends in Adult Education, from Elsinore to Montreal*. Paris, UNESCO, 1962. Pp. 136.

An account of changes in the adult education movement between the International Conference on Adult Education at Elsinore, Denmark, in 1949 and the World Conference on Adult Education at Montreal in 1960.

12. ORGANIZATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT. *Issues in Management Education*. Paris, 1963. Pp. 92.

An examination of the present situation and trends in Europe of management education, and of the qualities and skills expected in managers, the education and training of managers, etc.

13. U.S. INTERNATIONAL CO-OPERATION ADMINISTRATION. *Technical Cooperation in Education*. Washington, 1960. Pp. 31.

14. U.S. CONGRESS. SENATE. COMMITTEE ON LABOR AND PUBLIC WELFARE. *The National Defense Education Act of 1958; a Summary and Analysis of the Act prepared by the Staff*. Washington, GPO, 1958. Pp. 48.

At head of title: 85th Cong., 2nd sess. Committee Print.

15. U.S. OFFICE OF EDUCATION. *Curriculum Responsibilities of State Departments of Education*, by Howard H. Cummings [and] Helen K. Mackintosh. Washington, GPO, 1958, Pp. 76.

16. U.S. OFFICE OF EDUCATION. DIVISION OF VOCATIONAL EDUCATION. *Distributive Education; a Guide to Practical Research*, by Natalie Kneeland. Washington, GPO, 1963. Pp. 41.

Contents: Considering Practical Research. Answering Questions. Following Procedures. Handling Statistical Data. Writing the Report. Using Visual Aids. Do's and Dont's.

Education, Vocational

17. NORTH YORK (TOWNSHIP). BOARD OF EDUCATION. ADVISORY VOCATIONAL COMMITTEE. *A Study to determine the Need for Technical Education in North York Township*, prepared . . . by L. S. Beattie [and others], Willowdale, Ont., 1963. Pp. 70.

Report of a survey of business, industrial and commercial enterprises in North York Township to determine the need for training at all levels full-time, part-time or extension programs.

18. SHAPOVALENKO, S. G. Ed. *Polytechnical Education in the U.S.S.R.* Paris, UNESCO, 1963. Pp. 433.

A study of polytechnical education in the secondary-school system of Russia.

19. WARREN, HUGH A. *Technical Education in the U.S.A.* London, City and Guilds of London Institute, 1963. Pp. [52].

The author, principal of the South-East London Technical College, won a scholarship sponsored by the City and Guilds of London Institute in conjunction with the English Speaking Union to study technical education in the U.S.

20. WILLIAMS, GERTRUDE (ROSENBLUM). *Apprenticeship in Europe; the Lesson for Britain*. London, Chapman & Hall, 1963. Pp. 208.

An examination of training systems in West Germany, the Netherlands, France, Italy, Switzerland, Sweden, and Belgium.

Engineers

21. AMERICAN SOCIETY FOR ENGINEERING EDUCATION. TECHNICAL INSTITUTE EVALUATION WORKING COMMITTEE. *Characteristics of Excellence in Engineering Technology Education; Final Report of the Evaluation of Technical Institute Education*. Urbana, Ill., American Society for Engineering Education, 1962. Pp. 46.

22. COMMITTEE ON OBJECTIVE CRITERIA IN NUCLEAR ENGINEERING EDUCATION. *Report on Objective Criteria in Nuclear Engineering Education, 1960-1962*. Prepared by a Committee appointed by American Nuclear Society [and] American Society for Engineering Education. [Urbana, Ill., American Society for Engineering Education, 1963]. Pp. 34.

Labour Supply

23. ILLINOIS. DEPARTMENT OF LABOUR. *Illinois Labor Force Projections for 1970*. Springfield, 1963. Pp. 26.

At head of title: State of Illinois, Department of Labour, Division of Unemployment Compensation, Illinois State Employment Service affiliated with United States Employment Service.

24. U.S. BUREAU OF EMPLOYMENT SECURITY. *Missiles, Spacecraft, and Aircraft; Labor Market Developments*. Washington, 1963. Pp. 19.

25. U.S. BUREAU OF LABOR STATISTICS. *The Forecasting of Manpower Requirements*. Prepared for Agency for International Development. Washington, GPO, 1963. Pp. 96.

This handbook is designed to help economists and statisticians in economically developing countries to initiate and carry out studies in employment forecasting.

Labouring Classes

26. ROTHMAN, STUART. *Information for Employers and Unions entering into a Collective Bargaining Relationship for the First Time; an Address at the Information Program for Labor and Management at West Virginia University, April 18, 1963*. Washington, U.S. National Labor Relations Board, 1963. Pp. 23.

27. U.S. BUREAU OF LABOR-MANAGEMENT REPORTS. *BLMR Financial Reporting Guide*. Washington, 1963. Pp. 8.

Explains how to fill out the financial reporting form required under the Labor-Management Reporting and Disclosure Act of 1959.

28. U.S. BUREAU OF LABOR STATISTICS. *Labor in Cyprus*. Washington, 1963. Pp. 44.

Mathematics

29. U.S. OFFICE OF EDUCATION. *Analysis of Research in the Teaching of Mathematics, 1955 and 1956*, by Kenneth E. Brown. Washington, G.P.O., 1958. Pp. 73.

30. U.S. OFFICE OF EDUCATION. *Curriculum Materials in High-School Mathematics*, by Kenneth E. Brown. Washington, GPO, 1954. Pp. 40.

Occupations

31. BIEGELEISEN, JACOB ISRAEL. *Careers and Opportunities in Commercial Art*. New rev. ed. with added material. New York, Dutton, 1963. Pp. 244.

Some of the branches of commercial art discussed are: sign painting and gold-leaf lettering; showcard and reproduction lettering; typography; book jacket design; poster painting; fashion design and illustration; cartooning; industrial design; packaging; TV scenic and costume design; cartoon animation; lettering and titling. The author also provides information on job opportunities, educational requirements, and salaries.

32. CARROLL, JOHN MILLAR. *Careers and Opportunities in Electronics*. 1st ed. New York, Dutton, 1963. Pp. 191.

Provides information about working in the electronics industry as an electronics engineer, scientist, or technician, or in a career in military or industrial electronics. Includes a chapter on careers and opportunities for women in electronics.

33. KING, ALICE GORE. *Career Opportunities for Women in Business*. 1st ed. New York, Dutton, 1963. Pp. 212.

The author is executive director of the Alumnae Advisory Center, a counseling and placement service for women, located in New York City. As well as including a chapter on how to look for a job, the book has chapters on clerical and secretarial jobs, and on non-professional jobs within the professions. There is also a description of 19 specific businesses or pursuits. In conclusion, there is information for those women who are returning to work after having been at home for some years, and for those women who wish to change jobs.

Unemployed

34. WICKERSHAM, EDWARD DEAN. *Detroit's Insured Unemployed and Employable Welfare Recipients; Their Characteristics, Labor Market Experience, and Attitudes*. Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1963. Pp. 56.

A study of the characteristics and problems of insured unemployed who had been without work for over five weeks as of the week of January 9, 1961. The author supplies answers to four questions: "1. Who are the insured unemployed? 2. What are the problems of the insured unemployed? 3. What are the skills and

income sources of the insured unemployed? 4. How do the insured unemployed feel about their job hunt, relocation, and retraining?"

35. WILCOCK, RICHARD CARRINGTON. *Unwanted Workers; Permanent Lay-offs and Long-term Unemployment* [by] Richard C. Wilcock and Walter H. Franke. New York, Free Press of Glencoe, 1963. Pp. 340.

After presenting a general picture of unemployment in the U.S., the authors report the results of a survey of unemployed workers in four Armour and Company meat-packing plants and in a company manufacturing laundry equipment. The book examines the problem of "unwanted workers," men and women who are out of work a long time because their employers have transferred operations to other areas, or because technological changes and automation have eliminated their jobs.

Wages and Hours

36. NEW YORK (STATE). DEPARTMENT OF LABOR. DIVISION OF RESEARCH AND STATISTICS. *Severance Pay in Union-Management Agreements in New York State*. New York, 1962. Pp. 82.

"In this report, 'severance pay' refers to plans that provide money benefits to persons whose employment relation with the company is being severed, presumably permanently." The report is based on a study of 344 collectively-bargained severance-pay plans. Provides information about prevalence of plans, eligibility of the worker, benefit received and length of service required to be eligible, and other characteristics.

37. PATCHEN, MARTIN. *The Choice of Wage Comparisons*. Englewood Cliffs, N.J., Prentice-Hall, 1961. Pp. 123.

The author examines the factors that determine to whom a person will compare himself in the matter of wages.

38. WEBER, PHILIP H. *Salary Administration for Data Processing Personnel*. Rev. ed. Elmhurst, Ill., Business Press, OA Business Publications, Inc., 1963. 1 volume (looseleaf).

This manual was prepared to be used as an operating guide for administering a salary program. Includes job descriptions, position grades and salary ranges, together with forms and procedures necessary for the salary administration program.

Miscellaneous

39. BORETSKY, MICHAEL. *The Soviet Challenge to U.S. Machine Building; a Study in Production and Technological Policy*. Washington, U.S. Dept. of Commerce, 1963. Pp. 73.

"Essentially a reprint of a study included in the published 1962 hearings of the Joint Economic Committee, U.S. Congress, on the 'Dimensions of Soviet economic power.'"

"A comprehensive comparison of the economics and technology of machinery production in the United States and the Soviet Union."

40. CAINE, (Sir) SYDNEY. *The History of the Foundation of the London School of Economics and Political Science*. London, London School of Economics and Political Science, University of London [and] G. Bell and Sons Ltd., 1963. Pp. 103.

The story of the London School of Economics and Political Science, and the part played by Sidney and Beatrice Webb from its establishment in October 1895 up to 1901.

41. CANADIAN TAX FOUNDATION. *Oil and Gas Production and Taxes*, [by] R. A. Simpson [and others]. Edited by Jacques Barbeau. Toronto, 1963. Pp. 298.

42. FULLER, WALTER DEANE. *What an Office Supervisor should Know about Handling People*. Chicago, Dartnell Corporation, 1963. Pp. 23.

The author is former Chairman of the Board, the Curtis Publishing Company.

43. HARRINGTON, MICHAEL. *The Other America; Poverty in the United States*. New York, Macmillan, 1963. Pp. 191.

The author estimates that there are between 40 and 50 million "poor people" in the U.S. He describes the world in which these people live.

44. HEADY, EARL OREL. *Agricultural Policy under Economic Development*. Ames, Iowa State University Press, 1962. Pp. 682.

Concerns agriculture and its economic structure, research, education, and policy activities under economic development.

45. MCCONNELL, CAMPBELL ROBERTSON. *Economics: Principles, Problems, and Policies*. 2d ed. New York, McGraw-Hill, 1963. Pp. 773.

A textbook for beginning economics students.

46. SHANKS, MICHAEL, Ed. *The Lessons of Public Enterprise; a Fabian Society Study*. With a foreword by Roy Jenkins. London, Jonathan Cape, 1963. Pp. [314].

An analysis of the progress to date of the nationalized industries in Great Britain.

47. SUPER, DONALD EDWIN. *Vocational Development; a Framework for Research* [by] Donald E. Super [and others]. New York, Bureau of Publications, Teachers College, Columbia University, 1957. Pp. 142.

Contents: The Need for a Theory of Vocational Behavior. The Scientific Study of Vocational Behavior. Vocational Behavior and Vocational Development. Vocational Maturity and Vocational Adjustment. The Patterning of Careers. Implications for Further Research. The Career Pattern Study: Collecting the Basic Data.

48. U.S. NATIONAL SCIENCE FOUNDATION. *Scientific Research and Development in Colleges and Universities, Expenditures and Manpower, 1948*. Washington, GPO, 1963. Pp. 140.

49. SOUTH AFRICAN INSTITUTE OF RACE RELATIONS. *A Survey of Race Relations in South Africa, 1961*. Compiled

by Muriel Horrell. Johannesburg, 1962. Pp. 311.

50. U.S. BUREAU OF LABOR STATISTICS. *Seasonal Factors, Consumer Price Index: Selected Series, June 1953-May 1961*. Washington, GPO, 1963. Pp. 47.

"This bulletin supplies basic data with which [U.S.] Consumer Price Index series can be adjusted for seasonal variation."

Vocational Rehabilitation

(Continued from page 116)

Case 4—Mr. Z, aged 58, has Grades 5 to 8 educational standards. His disability was pulmonary tuberculosis and he had to be confined to light work only. He had once been a barber. After seven months of rehabilitation services, including medical and psychological services, physiotherapy, occupational therapy and counselling, refresher training and provision of barbering tools, he was able to resume barbering and earn \$180 a month.

The foregoing are just a few examples from among many, but they do indicate some of the possibilities for vocational rehabilitation among older persons.

The federal-provincial program of vocational rehabilitation services for disabled persons, which has been operating for many years, includes medical restoration, assessment, counselling, training and employment placement. Under the provisions of the Vocational Rehabilitation of Disabled Persons Act of 1961, the program was given impetus and statutory authority.

The legislation is administered federally by the Department of Labour through the office of the National Co-ordinator, Civilian Rehabilitation. Provincially, it is operated by Provincial Co-ordinators or Directors of Rehabilitation Services, under provincial departments of welfare or health.

Wage Schedules

at Lock 9, Trent Canal. *Fort William Ont*: Tallman Construction Co Ltd, paving of maintenance garage ramp & access road, Lakehead Airport. *London Ont*: M J Mol Construction Ltd, construction of drainage ditch for terminal bldg excavation, Airport. *Malton Ont*: J M Fuller Ltd, construction of foundation for precision approach radar, bldgs & services, Toronto International Airport. *North Bay Ont*: Steds Ltd, construction of guard rail, entrance road, Airport. *Toronto Ont*: Allied Building Services (1962) Ltd, cleaning of Air Terminal Bldg, International Airport. *Edmonton Alta*: Scandinavian Janitors Service Ltd, cleaning of Air Terminal Bldg, International Airport.

In addition, this Department awarded 18 contracts containing the General Fair Wages Clause.

Report of Board

(Continued from page 134)

1. The collective agreement, which expires June 29, 1964, shall be amended to provide:

2. A general wage increase of 4 per cent effective November 5, 1963.

3. Effective November 5, mechanics and above, both aircraft and non-aircraft, shall receive 4 cents per hour; in addition a 50 per cent lump sum adjustment from July 2, 1963 to November 4, 1963. (see below for proration).

4. A lump sum settlement in the amount of \$60.00 shall be paid to all employees on the payroll as of November 27, 1963 and on the payroll as of July 2, 1963. Those hired or in the service since July 2, 1963, shall be paid on a *pro rata* basis.

Dated this 27th day of November, 1963, at Montreal, Que.

⁽¹⁾Quarterly figures are entered opposite the middle month of the quarter but represent quarterly totals.

⁽²⁾Includes post office wages and salaries.

⁽³⁾Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

*Revised.

†Preliminary.

C—Employment, Hours and Earnings

Tables C-1 to C-3 are based on reports from employers having 15 or more employees; at November 1963 employers in the principal non-agricultural industries reported a total employment of 3,074,849. Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners in the reporting firms.

(1)Preliminary subject to revision.

(2)Includes 1094 registrations reported by the Magdalen Islands local office.

NOTE: Effective September 28, 1963 the area served by Princeton local office is served by the Kamloops and Penticton local offices.

Effective November 29, 1963 the Kitimat local office closed and the area served by this office was transferred to Prince Rupert local office.

E—Unemployment Insurance

Unemployment insurance statistics are concerned with numbers of persons covered by insurance and claimants for benefit at Unemployment Insurance Commission local offices. The data are compiled in the Unemployment Insurance Section, DBS from information supplied by the UIC. For further information regarding the nature of the data see Technical Note, page 86, January issue.

TABLE E-1—ESTIMATES OF THE INSURED POPULATION UNDER THE UNEMPLOYMENT INSURANCE ACT.

Saskatoon-Regina.....	128.3	128.7	129.0	127.3	126.9	130.2	137.0	147.3	148.4	119.4
Edmonton-Calgary.....	127.4	127.7	128.0	123.3	126.8	126.9	130.7	168.8	146.7	119.4
Vancouver.....	130.6	131.8	131.9	130.5	134.7	121.4	139.0	151.2	150.1	120.9

N.B. Indexes above measure percentage changes in prices over time in each city and should not be used to compare actual levels of prices as between cities.

⁽¹⁾St. John's index on the base June 1951 = 100.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Department of Labour on the basis of reports from the Unemployment Insurance Commission. The first three tables in this section cover strikes and lockouts involving six or more workers and lasting at least one working day, and strikes and lockouts lasting less than one day or involving fewer than six workers but exceeding a total of nine man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series see, page 954, October 1963 issue.

TABLE G-1—STRIKES AND LOCKOUTS, 1953-1963

Month or Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year			
		Strikes and Lockouts	Workers Involved	Duration in Man-Days	
				Man-Days	Per Cent of Estimated Working Time

Figures in parentheses indicate the number of workers indirectly affected.

Recent Regulations

(Continued from page 147)

It also authorized the establishment of a professional advisory committee to be known as the "Radiological Health Committee." Among other duties, this Committee is required to advise the Minister concerning all aspects of protection against the hazards of ionizing radiation, and to prepare a code of recommended practice for the guidance of persons in control of or using radiation equipment.

In November, after consultation with the Radiological Health Committee, regulations were issued defining the maximum permissible dose. In these regulations (O.C.

2003/63 gazetted November 15), the "maximum permissible dose" is defined as follows:

(a) the dose of X-radiation to the gonads, blood-forming organs or lens of the eye of any occupational worker equivalent to three rems in any period of 13 consecutive weeks; or

(b) in the case of an occupational worker of N years of age, the total accumulated exposure of X-radiation equivalent to 5(N-18) rems.

For purposes of these regulations, the dose in rems is to be considered numerically equal to the exposure in roentgens.

PUBLICATIONS OF THE DEPARTMENT OF LABOUR

Send remittance by cheque or post office money order, payable to the Receiver-General of Canada, to The Queen's Printer, % Superintendent of Government Publications, Ottawa. All subscriptions payable in advance.

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Catalogue No. L1-1963
Price 35 cents.

ECONOMICS AND RESEARCH BRANCH

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents. L2-2/1963

Industrial and Geographic Distribution of Union Membership in Canada, 1963 (English or French). Price 15 cents. L31-763

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 50 cents. L2-159

Wage Rates, Salaries and Hours of Labour. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance and service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. (Bilingual). L2-545

First year service including attractive binder with index tabs and paper-bound volume, \$9.50; service without indexed binder, \$7.00; individual tables, 15 cents. Paper-bound volume, \$1.30.

Group Hospitalization and Medical Insurance Plans in Canadian Manufacturing Industries (English or French). Price 35 cents. L36-558

Working Conditions in Canadian Industry, 1962. Price 35 cents. L2-1562

Social Insurance Number Project

At beginning of April, with Unemployment Insurance Commission as agent, federal government will begin registration of all employees preparatory to allotment of Social Insurance Number

At the beginning of April the federal Government, through the Unemployment Insurance Commission, will begin registering all Canadian employees except those in the armed forces, in private domestic service, agricultural workers, and members of the clergy and religious orders. Each person registered will be allotted a nine-digit Social Insurance Number.

The start of the registration was set for the beginning of April so that it can be completed before the end of June, when 1963-64 unemployment insurance books expire.

An estimated total of more than 6,000,000 employees across Canada will be required to register.

Reasons for System

In outlining to key personnel in the registration the reasons for introducing the new numbering system, the Minister of Labour said: "The present unemployment insurance numbering system has become obsolete because of the growth in the labour force and the fact that electronic data processing equipment is being used more and more in government record-keeping."

It therefore was opportune, he said, in line with the Glassco Commission suggestion, to introduce a new numbering system: a single number which is applicable to all employees—"those who are insured under the Unemployment Insurance Act and those who are not insured."

The numbering system, the Minister said, has been designed to be broad and flexible enough to be adapted to requirements of the proposed Canada Pension Plan and other social security measures.

The Social Insurance Number card will have three sections. The employee's part will contain only the employee's signature in addition to the nine-digit number. The second part, a duplicate, will be filed for safe keeping.

The third section will be retained by the employer. It will have, in addition to the Social Insurance Number, the name of the employee, the birth date (day and month only, not the year) and the former unemployment insurance number.

An employer—one who has one full-time or one part-time employee on payroll—will be required to deliver to each employee his Social Insurance Number card.

To allay fears of regimentation and loss of identity, the Minister of Labour pointed out that "identity will not be lost and regimentation will not be the end result." And the real purpose of the program was not to obtain an inventory of manpower.

Record-Keeping

"Essentially, the project is one to ensure better record-keeping," he explained. "There is nothing in additional information provided by the applicant for a Social Insurance Number that has not already been on record in the federal Government." The Minister pointed out also that much of the information that is requested for this registration was also asked for in the application for an unemployment insurance number for the past 22 years.

To illustrate the complexities of record-keeping on a large scale, the Minister said: "The need for more details of an individual for positive identification is appreciated when you realize there are now 50,000 Smiths in the Unemployment Insurance Commission's master index, and well over 10,000 Smiths have the initial 'J'."

It will not be necessary to carry the card with the Social Insurance Number on it. It has been suggested only that the card be carried so that it would be conveniently available, for example, for those who are seeking or changing employment from time to time. In this way, the new employer could be given the number immediately.

Another Misconception

Another misconception that appeared when the new registration system was first announced was the belief that the system was intended for use in extending coverage under unemployment insurance. "There is no consideration in the Social Insurance Number project of broadening the group who will pay unemployment insurance."

Another erroneous belief has been that there was a relationship with the work of the Emergency Measures Organization. "I can assure you there is absolutely no present relationship between the numbering project and organizing and implementing plans for survival in the event of atomic attack".

50 Years Ago This Month

Dispute between three unions and Quebec Shoe Manufacturers' Association that led to a strike at two establishments and a lockout elsewhere in the industry was settled in second month.

A dispute involving 3,000 employees in shoe manufacturing establishments operated by members of the Quebec Shoe Manufacturers' Association, which led to a strike in the latter part of December 1913, was settled in February 1914. The circumstances of the dispute and its settlement were described in the *LABOUR GAZETTE* of March 1914.

The employees involved were members of three unions: the Canadian Federation of Shoe Workers (leather cutters), the Federation of Boot and Shoe Workers (machinists), and the Boot and Shoe Workers' Union (shoe lasters).

"During October 1913, notices were posted in the various factories setting forth the working conditions under which such factories would be operated," the *GAZETTE*'s report said. "The conditions imposed, besides fixing the rate of wages and hours of employment, gave the employers the exclusive right of engaging, discharging or suspending employees, and established the employer, or his representative, as the sole judge of the competence and ability of an employee to do specified work.

"The terms of the employers were generally accepted at the time by the employees. In December, however, employees in two establishments objected to the employment of a non-unionist, and struck work." The two firms affected employed about 220 hands.

At the end of December, all the remaining members of the Shoe Manufacturers' Association decided to close down because their employees had refused to sign individually the agreement governing conditions of employment. The effect of this was an almost complete shutdown of the shoe-manufacturing industry in Quebec.

Finally, with the assistance of one of the conciliation officers of the Department of Labour, a settlement of the dispute was reached in February. The settlement was described as follows:

"By the terms of the agreement, the men were not required to sign individual contracts, but it was arranged that a committee of three representatives from each of the unions interested should sign for them. A monetary penalty was fixed for the fulfilment of the contract, the amount being \$600, or \$200 from each union. In case

of non-fulfilment of the terms of the contract the money will be confiscated for the use of the Shoe Manufacturers' Association.

"Provision was also made for cases of individual grievances. Any employee having such will be required to make a deposit of \$25 before the case is heard by the Board of Arbitration, and the party in default will have to bear the costs of the hearing. Another clause exacts that the union interested shall secure legal recognition by incorporation as soon as possible."

Wages in February 1914 were moving both up and down, the *LABOUR GAZETTE* reported.

"An important increase affecting 300 printers went into effect at Quebec. By this change the minimum weekly wages were raised from \$15 to \$16.50." This rate was to last for two years, when an additional increase of \$1.50 was to be granted.

"It was reported that the employees of the Canadian General Electric Company, who received an increase in wages last summer, had their wages reduced during February. Another reduction went into effect at Niagara Falls, where the Toronto Power Company reduced the wages of its labourers from 25 cents to 20 cents an hour.

"Policemen at Hamilton were given increases ranging from \$50 to \$100 a year; the minimum wage for civic labourers was raised from 22 to 25 cents an hour."

"The police commissioners increased the chief's salary from \$1,200 to \$1,350, one sergeant from \$1,000 to \$1,100, one sergeant from \$924 to \$1,050, four constables from \$864 to \$950, and one constable from \$720 to \$900," the Niagara Falls correspondent of the *GAZETTE* reported. "At the end of three years' service a constable will receive a service stripe, and for each additional five years an additional stripe, each stripe entitling him to 5 cents per day extra pay."

The Montreal correspondent said that there were many more men out of work in the city than there had been the year before. "The necessity of housing the increasing number of poor and homeless men who are continually asking for charity has been brought to the attention of the Board of Control, and a municipal boarding house has been projected.

NOTES OF CURRENT INTEREST

A. H. Brown Named Chairman of Canada Labour Relations Board

A. H. Brown, Deputy Minister of Labour from 1953 to 1961 and now Director of the Canada Branch of the International Labour Office, last month was appointed Chairman of the Canada Labour Relations Board. He succeeds Hon. C. Rhodes Smith, QC, Chairman since 1953, who has been appointed a member of the Manitoba Court of Queen's Bench.

Mr. Brown has been Vice-Chairman of the CLRB since its inception in 1948.

A member of the Department of Labour for almost 18 years, Mr. Brown came to Ottawa in 1929 to become Secretary-Treasurer and Legal Adviser to the Canadian Farm Loan Board.

From 1939 to 1942 he was a member of the Dependents' Allowance Board, Department of National Defence; he was

Chairman of the Board in 1941. During this period he also served as a member of the Dependents' Board of Trustees.

In January 1943 he became Chief Executive Officer and Legal Adviser of the Department of Labour, and also served as Vice-Chairman of the Wartime Labour Relations Board. On April 1, 1951 he was appointed Assistant Deputy Minister of Labour.

Mr. Brown was Canadian Government representative on the Governing Body of the International Labour Organization from 1953 to 1956 inclusive, and was elected to serve as the Chairman of the Governing Body for the 1955-56 term. He attended a number of International Labour Conferences at Geneva as leader of the Canadian Government delegation.

Department Prepares Purchasing Course for Small Manufacturers

A five-session course entitled "Purchasing for Small Manufacturers" is being made available by the Department of Labour to owners and operators of small manufacturing and processing firms across Canada. The course was "field tested" last fall in Etobicoke, Ont.

The course was prepared by the Department's Small Business Management Training Division of the Technical and Vocational Training Branch (L.G., Feb. p. 94), with the assistance of Prof. Michiel R. Leenders, School of Business Administration, University of Western Ontario; a committee of the Ottawa Chapter of the Canadian Association of Purchasing Agents;

and Rolf S. Lockeberg, a Hull, Que., manufacturer. Prof. Leenders is also educational adviser to the Canadian Association of Purchasing Agents.

The course, prepared specifically for owners and operators of small manufacturing and processing firms, is made available in local communities through provincial governments. Instructors are drawn from the ranks of business and professional men.

The purposes of the course are to assist the owner/manager to avoid problems and pitfalls frequently encountered in purchasing; to save time in carrying out the purchasing task; and to save money where it will do the businessman the most good.

UIC Appoints Kenneth Pankhurst to Head Economic Research Division

Kenneth Pankhurst, former Director of Economic and Social Research at the University College of Wales, Aberystwyth, Wales, was appointed last month as Chief of the Economic Research Division of the Unemployment Insurance Commission.

Mr. Pankhurst has been assigned to set up a research division to investigate the economic circumstances of the unemployed in Canada, and to ascertain the effects of unemployment insurance and the extent to which it is adequate.

Born in London, England, Mr. Pankhurst was graduated in 1952 from the London School of Economics, where he majored in economic history. From 1952 to 1954 he

was a Dean Research Scholar at Leeds University.

In 1954 he joined an industrial development council, the Cotton Board, and remained there as an economist until 1957, when he went to the National Institute of Economic and Social Research, London. There he was engaged in economic forecasting, and reporting what was happening to the British economy.

He was appointed Director of Economic and Social Research at University College, Wales, in 1959. For the past two years he also acted as a consultant to Britain's National Economic Development Council.

This Year's Winter Works Program Providing More Jobs Than 1963's

In the number of men to be hired, and the number of man-days work to be provided during the period of the program, the 1963-64 Municipal Winter Works Incentive Program by February 21 had substantially surpassed the previous year's program on the corresponding date in 1963.

This year's estimates were 136,952 men compared with 115,184 in 1963, and 6,018,449 man-days compared with 5,286,786 in 1964. At the end of the 1962-63 program, 145,202 men were estimated to have been hired during the whole period of the program, and 6,171,606 man-days of work to have been provided.

The 6,203 applications accepted on February 21 this year, however, fell a little below the number of 6,353 accepted on the corresponding date in 1963. But although the estimated cost of projects during the period of the program was only slightly higher at \$253,319,000 than the figure of \$251,771,000 last year, the estimated direct payroll cost was \$86,969,000 compared with \$77,449,000 in 1963. The percentage of payroll cost to total cost this year was 34.3, compared with 30.8 per cent last year.

The number of participating local authorities on February 21 this year was 2,525, and at the corresponding date last year it was 2,390.

Issue Report on Drop-Out Rates In University Engineering Courses

Bulletin No. 3 in the Professional Manpower Bulletin series presents information on drop-out rates in engineering courses in Canadian universities. The series provides preliminary or special statements on professional manpower topics.

The report shows that the average drop-out rate for engineering classes graduated from 1954 to 1963 inclusive was 44 per cent. The rate increased steadily from 31 per cent for the class of 1954 to 50 per cent for the classes of 1960 and 1961, then dropped to 46 per cent for the class of 1963.

For these engineering classes, 24 per cent, on the average, dropped out in the first year, 10 per cent in the second year, 6 per cent in the third and 4 per cent in the final year. For five-year engineering courses, in order to permit comparisons with four-year courses, the second year was considered the starting year.

The statistics indicate also that the engineering drop-out rate was higher than that for certain other faculties. For the

class of 1959, the estimated drop-out rates were: engineering 45 per cent, arts and science 41 per cent, commerce 32 per cent, law 29 per cent, agriculture 25 per cent, forestry 21 per cent, medicine 10 per cent, and dentistry 9 per cent.

In addition to giving statistics on drop-out rates, the report presents an analysis of the various influences that cause students to drop out of university, and examines the relationship between the drop-out rate and student potential.

Professional Manpower Bulletin No. 3, *Drop-out Rates in University Engineering Courses*, may be obtained without cost from the Economics and Research Branch, Department of Labour, Ottawa 4, Ontario.

Canada Proceeding to Ratify ILO Discrimination Convention

The Government is proceeding with the ratification of the Convention on Discrimination in Employment and Occupation, adopted by the International Labour Conference in 1958 (L.G., 1958, p. 874).

In announcing this in the House last month, Hon. Allan J. MacEachen, Minister of Labour, referred to the question sometimes asked as to why the Government had not been able to ratify more ILO Conventions. He explained that when Conventions fell partly within provincial jurisdiction, the Government had first to reach full agreement with the provincial authorities.

In this case, he said, the Government had consulted the provinces, and all had indicated that they were following a policy fully consistent with the objectives of the Convention. They had all, moreover, given full support and approval to the proposed ratification.

Department Supplies Information To OECD for Survey Report

A 290-page report, *Resources of Scientific and Technical Personnel in the OECD Area*, has been published by the Organization for Economic Co-operation and Development. The Report is based on the third international survey on the demand for and supply of scientific and technical personnel.

Canada was one of 18 OECD member countries who contributed information for the report. The Canadian contribution was prepared by the Economics and Research Branch of the Department of Labour from information gathered by it and by the Education Division of the Dominion Bureau of Statistics.

Copies of the report may be obtained from the Queen's Printer, Ottawa.

Construction Industry, Labour Join In Submission to Federal Cabinet

Research is the key to full employment and economic prosperity, it was stated in a joint brief presented last month to the federal Cabinet by representatives of management and labour in the construction industry.

The brief was presented by a delegation led by J. B. Mathias and C. C. Cooper, chairman and secretary respectively of the Association of International Representatives of the Building and Construction Trades; and Donald H. Jupp, President, and S. D. C. Chutter, General Manager, of the Canadian Construction Association.

Research steps so far taken by the Government, the delegation said, had been almost exclusively of a short-term nature or had been concerned with the supply of labour. They appeared to have prevented a further increase in unemployment, but to have done little so far in tackling the fundamental problems involved in developing policies aimed at creating a steadily growing demand for labour.

The brief went on to speak of the need for greater numbers of labour economists, and urged the Government to encourage the universities in their efforts to train more of such specialists.

The establishment of the Economic Council of Canada was commended, and the hope was expressed that the Council would be able to recommend long-term economic policies that would maintain "full" employment.

U.S. Labour, Business Advised To Avoid Wage and Price Rises

Business and labour were urged to avoid "inflationary" wage and price increases, and unqualified support was given to the wage-price guideposts of the Kennedy Administration, in President Johnson's first Economic Report to Congress.

The President predicted a faster rate of economic expansion in 1964 than last year as a result of the early passage of the tax-cut bill. The faster rate of expansion would lower unemployment "significantly," the report said.

But the favourable outlook depended on "swift" action by Congress on the tax reductions, on consumers' spending the extra money left in their hands, and on labour's and management's resisting the "temptation" to "exploit" the improved market and employment situations by "unneeded price boosts" and "excessive wage demands."

President Johnson gave warning that he would not hesitate to use the powerful weapon of "public attention" to prevent inflationary price and wage increases. Public attention was the method used by the late President Kennedy in forcing the steel companies in 1962 to cancel increases they had announced in the price of steel.

Immigration Higher in 1963

The total number of immigrants destined for the labour force who arrived in Canada in 1963 was 45,866, compared with a total of 36,748 in the preceding year, according to the Department of Citizenship and Immigration. Wives and children, and others not destined for the labour force, totalled 47,285, compared with 37,838 in 1962. Total immigration in 1963 was thus 93,151, compared with 74,586 in 1962.

In Parliament Last Month

Speech from the Throne—A measure to establish minimum wages, maximum working hours, statutory holidays and other labour standards for industries under federal jurisdiction will be introduced during the second session of the 26th Parliament, it was announced in the Speech from the Throne at the opening of the session on February 18.

"A variety of measures which will further increase employment and raise the standard of living by strengthening and expanding the primary and secondary industries of Canada" was also forecast.

Other legislation of interest to labour forecast in the Speech included:

—Establishment of a comprehensive system of contributory pensions.

—Reform of the public regulation of the railways so as to facilitate the adaption of the railway system to present and future needs.

—Arrangements to allow university students in need of such assistance to obtain loans without paying interest during the years of study.

—Major amendments to the National Housing Act.

—Establishment of a 12-mile limit for the use of Canadian fisheries.

—Measures to help in the improvement of farms and farm income, to strengthen the position of periodicals published in Canada, and to establish an age of retirement from the Senate.

The Speech said the Government will attempt to make its full contribution to fostering the full employment of the Canadian people and the efficient growth of the economy.

Pension Plans in Canadian Industry

Survey finds 72 per cent of non-office and 88 per cent of office employees surveyed were in plants with a pension plan

A substantial number of employees in Canadian industry work in establishments that have some kind of pension plan.

The annual survey of working conditions conducted each May by the Economics and Research Branch, Department of Labour, a report on which has just been released (see box), found that of the 1,541,163 non-office employees in the May 1963 survey, 72 per cent were in establishments reporting a pension plan; of the 681,658 office employees, 88 per cent were in establishments with a pension plan.

Eighteen per cent of the non-office employees covered by the survey did not have to contribute to the pension plan in their establishments; 54 per cent were in establishments with contributory plans.

In Ontario, a higher proportion of employees than in any other province were in plants where the employer pays the whole cost of the pension plan. Of the total non-office employees in Ontario covered by the survey, 27 per cent were in plants with a non-contributory plan; of office employees, 15 per cent.

A tabulation, by province, of the survey returns relating to pension plans, for office and non-office employees, appears on page 189.

Non-Office Employees

By Province. An analysis by province shows that Saskatchewan had the highest proportion—82 per cent—of non-office employees in plants where a plan was in effect; Manitoba came next with 77 per cent, and Ontario third with 76. New-

foundland, with 60 per cent, had the smallest proportion. Quebec had 65 per cent.

Regarding the contributory type of plan, in which the cost is shared by employer and employees, the proportion of the non-office employees in the survey who actually participated in such a plan was 36 per cent.*

By provinces, Saskatchewan again led in the proportion of non-office employees actually participating in contributory pension plans, with 61 per cent. Manitoba was second with 48 per cent, and New Brunswick came third with 46 per cent. Quebec had 36 per cent and Ontario 32 per cent.

But Ontario led in the proportion of employees in reporting units† with a non-contributory plan. Of the Ontario non-office employees covered by the survey, 27 per cent were in such plants; 49 per cent were in establishments with a contributory plan. In Saskatchewan, the percentages were 4 and 78; in Manitoba, 6 and 71; and in Quebec, 13 and 52, respectively.

Taking the country as a whole, the most common period of service required to become eligible to participate in a contributory plan was one year; 14 per cent of total

* Owing to service requirements, not all employees in an establishment where a pension plan is in force are eligible to benefit by the plan.

† The term "reporting unit" refers to an operating unit having an independent existence in the sense that it contains within itself all of the elements needed for the activities carried on. Thus the reporting unit is typically a factory, mine, store or similar unit; although in most cases it is a separate firm, it should be noted that the term "reporting unit" is not necessarily synonymous with "firm" or "company".

Working Conditions in Canadian Industry, 1963 has just been issued by the Economics and Research Branch, Department of Labour. The 220-page report contains information on such working conditions as the standard work week, vacations with pay, paid statutory holidays, pension plans, group life insurance, sickness and accident leave benefits, educational assistance and the proportion of employees covered by collective agreements.

The report is divided into two parts, one for non-office and one for office employees. Both parts are presented on an area basis and an industrial basis. For Canada and each of the provinces the information refers to the total industrial composite. In addition, data are presented for some 40 individual industrial divisions on a Canada basis.

The report presents information obtained in the Department's annual survey of working conditions conducted at May 1, 1963. The survey covered some 20,000 employers with a total of 2,222,821 employees, 1,541,163 non-office employees and 681,658 office employees.

The bilingual report is available from the Queen's Printer (Catalogue No. L2-1563) at 35 cents a copy.

non-office employees needed this length of service. The next most common period was three months or less (percentage of employees, 12). Only 1 per cent of the employees were in plants where the qualifying period was more than five years.

By Industry. Particulars of survey coverage are based on a wide range of non-agricultural industries, including 8,494 establishments in manufacturing, with 853,647 non-office employees. Forestry, construction, water transportation and government service (except municipal works departments) are not covered.

In manufacturing, the percentage of the total number of non-office workers in the survey who were employed in plants where a pension plan was in effect was 69 per cent, made up of 23 per cent under a non-contributory and 46 per cent under a contributory plan. Of the total number of employees in all establishments reporting a pension plan, 28 per cent actually participated in a contributory plan.

The most common length of service required for participation in a contributory pension plan, as shown by the number of employees in the units reporting as a percentage of the total number of employees in the survey, was one year (15 per cent), with two years the next most common (11 per cent).

The percentage of the total employees in establishments in the manufacturing industry that reported a pension plan ranged from 20 per cent in Sash and Doors to 100 per cent in Tires and Tubes. All the employees in the latter industry were under a non-contributory plan.

Office Employees

By Province. As was the case with non-office workers, Saskatchewan was the province with the highest percentage of office employees in establishments where a pension plan was in force, viz., 93 per cent. Manitoba was second with 91 per cent, and Alberta third with 90 per cent. Ontario had 89 per cent and Quebec 86. Newfoundland, with 76 per cent, had the lowest proportion.

Among establishments that had a pension plan, the country-wide proportion of 88 per cent was made up of 13 per cent in establishments where the employers paid the whole cost of the plan and 75 per cent in those where the cost was shared by employers and employees.

In Saskatchewan, only 4 per cent of the employees were in establishments where the employer pays the whole cost, and 89 per

cent in plants where the employee contributes. In Manitoba, the percentages were 5 and 86, and in Alberta, 5 and 85. In Ontario, 15 per cent were in establishments where the plan was non-contributory; 74 per cent, where the plan was contributory. In Quebec, the percentages were 14 and 72.

As a proportion of the total number of 681,658 office employees, those who were participants where a contributory plan existed amounted to 65 per cent in Saskatchewan, 58 per cent in Alberta, 57 per cent in Manitoba, 47 per cent in Quebec and Ontario, and 49 per cent in the whole country. The lowest percentage was 46 in Newfoundland.

Apart from the generally higher proportion of office employees who were in establishments where a pension plan was in effect, the most conspicuous difference between office and non-office employees was in the proportion employed in establishments where a non-contributory plan was in effect: 13 per cent of office employees, and 18 per cent of non-office employees.

In five provinces, the percentages for establishments where the plan was non-contributory were 5 per cent or less. The provinces in which the non-contributory percentages were highest were Ontario (15 per cent) and Quebec (14 per cent).

In Canada as a whole, three months or less was the most common qualifying period under contributory plans (24 per cent of employees), and one year was the next most common (23 per cent).

By Industry. The survey of office employees in manufacturing, covering a total of 263,814 workers in 8,213 reporting units, showed an aggregate of 85 per cent of the employees in the survey were in reporting units covered by a pension plan. This percentage was made up of 17 per cent in units with a non-contributory, and 68 per cent with a contributory plan. Employees actually participating in a contributory plan amounted to 46 per cent of the total.

The most common length of service required to qualify for participation in a contributory plan was one year (in plants with 27 per cent of the total employees), and the second most common period was two years (14 per cent).

The percentages for the various industries were similar to those for the non-office employees, except that all percentages were higher. The percentages of employees in units reporting a pension plan in the various industries ranged from 36 in Sash and Doors to 100 in Tires and Tubes.

46th Annual Meeting of the Canadian Construction Association

Committees report progress in labour-management relations, new approaches to apprenticeship training. Support is urged for Labour College of Canada and for study of welfare plans

Progress in labour-management relations and new approaches to apprenticeship training were reported to delegates attending the 46th annual meeting of the Canadian Construction Association, held in Toronto on February 2-5. Reports by the Labour Relations Committee and the Apprenticeship Training Committee were among those given by 13 standing committees of the Association. More than 900 delegates and guests attended.

Among recommendations of the Labour Relations Committee were that "sympathetic and if possible material support be given to the Labour College of Canada" and that Association affiliates carry out a careful study of welfare plans. The Apprenticeship Training Committee proposed the indenturing of apprentices to "Joint Committees" and recommended pre-employment training among its proposals.

William Ladyman of Toronto, Vice-President, International Brotherhood of Electrical Workers, speaking on "Multi-Trade Bargaining and Provincial Agreements," told delegates that from the union's point of view, multi-trade-union bargaining has many disadvantages, but that the craft unions in Canada are favourably inclined to agree with multiple-employer bargaining. Such approach, however, could not be developed overnight, he added.

T. C. Higginson, President, Engineering Institute of Canada, Saint John, N.B., speaking on the ties between the EIC and the CCA, emphasized the increasing importance of education.

Dr. J. A. Corry, Principal, Queen's University, Kingston, Ont., spoke on "The Nation and the Universities," and M. L. Baxter of M. L. Baxter Ltd., Toronto, addressed the delegates on university education for the construction industry, and described the curriculum of an industrial engineering course at the Nova Scotia Technical College, especially the option dealing with construction methods and materials.

Delegates approved changes in some 14 standing resolutions expressive of CCA policy and added two new ones. Among the total of 25 resolutions were recommendations that:

—Provincial Governments should introduce and enforce compulsory tradesmen's qualification legislation for the construction industry.

—Labour legislation should be revised by the federal Government, and by provincial Governments that have not yet done so, "to provide for conditions governing the construction industry."

—Wherever practicable, materials and equipment marked "Canadian-made" should be specified for construction by all concerned.

—Federal and provincial Governments should develop more effective incentive policies in order to encourage economic growth.

In the address by their President, delegates heard the federal Government criticized for its sales tax on many construction materials and equipment previously exempted. This could jeopardize the record capital expenditures that had been forecast for this year, he told them.

The Association elected Donald H. Jupp of Toronto as President for 1964, to succeed T. A. Somerville. Mr. Jupp is President, Pilkington Brothers (Canada) Ltd.

President's Address

In his address to the meeting, outgoing President T. A. Somerville said the construction industry had completed a record program in 1963—with a value in excess of \$7,600,000,000. He criticized the federal Government for its sales tax on many construction materials and equipment, saying it may affect the record capital expenditures projected for this year.

He was concerned about the future; some of the problems the industry and the country faced were: greater government control accompanied by increased spending and higher taxes, too much construction work being performed by government forces and forces of government agencies and commissions, and smaller profits ahead and more and larger bankruptcies. He also saw "greater and often irresponsible demands from labour," and lower standards of workmanship.

Mr. Somerville criticized the application of the federal sales tax to many construction materials and equipment previously exempted. "This federal sales tax policy was completely unexpected and at variance with stated government policy objectives designed to increase the rate of economic development, and is working against the efforts of some ministries endeavouring to expand trade," he asserted. He added that the record capital expenditure program for 1964 may be jeopardized by this sales tax.

He also criticized on several grounds the construction carried out by government departments or agencies in competition with private industry. They were exempt from many taxes, and could not deal with the problems of the changing conditions in the industry the way the construction industry could.

Referring to profits, he said that between 1951 and 1961, corporate sales increased 98 per cent but profits after taxes increased only by 4.3 per cent. Many concerns operating at too low a profit had disappeared, he pointed out.

He said there was an increasing amount of irresponsible competition within the industry; some operators declared one bankruptcy after another, he asserted, stating that our laws "are disgracefully lacking in this regard."

Another worry of the industry was the lower standard of workmanship, the President said. Everybody demanded excellence from everyone else, but it was necessary for all in the industry to live up to their responsibilities, he stressed.

Committee Reports

Labour Relations Committee—The Labour Relations Committee, among other recommendations in its report to the meeting, proposed that "sympathetic and if possible material support be given to the Labour College of Canada"; that undertaking closer contact with labour groups would result in a better understanding of problems, which in turn would create a mutual respect and provide more stable relations; and that affiliates carry out a careful study of welfare plans.

As to welfare and education assistance plans, the committee held up the Montreal district as a good example to follow. The 1964 budget for the Montreal construction industry included \$600,000 in apprenticeship grants and \$5,000 in scholarships for university courses.

The committee also pointed out its success in paving the way in Canada for joint (labour-management) presentations to governments. Three such briefs had been presented.

Support of research in construction labour relations had started to produce results, the committee reported. Part I of the first of three studies was published last November under the auspices of the National Research Council. It is entitled: "Manpower Utilization in the Canadian Construction Industry," and represents essential prerequisites for Part II, which deals with economic hours of work and work weeks, and which the committee expected would be published soon by the University of British Columbia.

In addition, the CCA has co-operated closely with the author of a McGill University Ph.D. study on the "Effects of the Quebec Collective Agreement Act in the Province's Construction Industry from 1935 to 1960." It is to be published this year, in English by McGill and in French by Laval University.

The committee reported also that Peter Stevens, the Association's Director of Labour Relations, had spent several weeks in Western Europe last summer to research construction labour relations in West Germany, Sweden, Belgium, France and the United Kingdom.

In addition, it reported that one-day locally conducted seminars at the invitation of affiliates took place at 22 centres and were attended by more than 500 construction executives. The offer is being repeated this year.

Apprenticeship Training Committee—Reporting on its activity for 1963, the Apprenticeship Training Committee offered the conclusions that:

1. The indenturing of apprentices to "Joint Committees" could help to create more employment opportunities for apprentices.
2. Compulsory tradesmen's qualification legislation is a highly desirable prerequisite for the required increased employment of indentured apprentices.
3. Financial incentives would likely encourage construction employers to employ greater numbers of indentured apprentices.
4. Pre-employment training of apprentices is highly desirable.
5. More publicity, guidance and counselling on the advantages of apprenticeship training in the construction industry are essential.
6. Care should be taken to attend to the need to up-grade the existing construction labour force before adding additional helpers to it through training programs for the unemployed.

Reviewing its work and developments during the past year, the committee pointed out that the Association had decided to accelerate its activities to promote apprenticeship training after having concluded that employment opportunity, increased production, and improved workmanship were becoming more and more dependent on the

education and trade training of the Canadian labour force. As a result, a nationally representative committee was appointed. It held three meetings during the year and issued four "Training Topics" bulletins, including two on recent apprenticeship and trade training developments in Western Europe.

Particular attention was paid to the development of supervisory training.

Assisted by the federal Department of Labour's Technical and Vocational Training Branch, a small CCA advisory committee had started to define and analyse the job of "construction superintendent." When completed this summer, this analysis will be made available to local advisory committees of affiliates for developing, in conjunction with their provincial or local education authorities, a syllabus suited to their needs.

Multi-Trade Bargaining and Provincial Agreements

Address by William Ladyman, I.B.E.W., to CCA Annual Meeting

From the union's point of view, "there seems to be little disadvantage to multi-employer bargaining" but multi-trade-union bargaining has numerous disadvantages, especially in the more highly skilled crafts, William Ladyman of Toronto, Vice-President, International Brotherhood of Electrical Workers, told the annual meeting of the Canadian Construction Association in an address on "Multi-Trade Bargaining and Provincial Agreements."

"There is a very real fear that the wage differentials between the trades will be reduced to the benefit of the less-skilled and less-highly paid craftsmen," he added.

Multiple bargaining is an involved concept, Mr. Ladyman said. His union has agreements that cover as many as four states in the United States. These agreements are between a number of employers, represented by an employers' association, and more than one local union. He stressed that the employers are specialized contractors, for the most part employing only electricians, and that the unions are all locals of the same international union representing only one craft. He continued:

These two points are extremely important, since the concept of multi-employer and multi-trade bargaining expressed in the Goldenberg Commission's Report [L.G. 1962, p. 778] deals with a much broader form of agreement. The multi-employer form of bargaining in Canada takes on a different form from that in the United States because of the wider use of general contractors. By this we mean contractors who bargain with a number of trade unions rather than one trade.

Eventually, multi-trade bargaining could create an industrial type of union in each bargaining situation, with the submersion of the crafts as has been found in the United States upon the emergence of District 50 of the United Mine Workers in the construction field, he said. "I would be less than honest with you, gentlemen, if I were to suggest the trade unions in Canada

are about to accept this concept at this time or in the foreseeable future," he declared.

And on multiple-employer bargaining the speaker explained his views thus:

... I will say this, the craft unions in Canada are very favourably inclined to agree with the idea of multiple bargaining. The entire question is being considered very carefully by the different organizations and I have no doubt that in the years to come, some workable arrangement will be devised. If it is good for the industry it will be done, but it is not going to be accomplished overnight, and it must be done on the basis of Canadian conditions.

There are actually many forms of multiple bargaining in Canada today, he asserted. The railway industry provides one example of what his union does not want in the construction trades—to have all mechanical tradesmen grouped in one classification, known as Mechanic, with the same wage rate and same conditions. He pointed out this had caused much resentment, as the identity of a craft was lost, and it had two other bad effects: difficulty in getting competent tradesmen and in holding apprentices in railway service once they finish their training.

As a completely different example of multiple bargaining in Canada the speaker listed the Allied Construction Council serving the construction workers employed by the Ontario-Hydro-Electric Commission. Here most of the railways' disadvantages from labour's standpoint are absent. The Pine Point Project in the Northwest Territories is also a good example.

The speaker asserted that it was a fallacy to approach multiple bargaining on the basis of equalization of working conditions, reducing higher rates to improve the lower ones, and so on, as this "very effectively will destroy the concept of multiple bargaining before it begins." Craftsmen are proud of their trade and their history, and do not want to sacrifice the gains they have made for this form of bargaining, he said.

As to bargaining on a province-wide basis, an important consideration is the independent character of local unions. The International Brotherhood of Electrical Workers has 18 local union areas in Ontario, he emphasized, and if a province-wide negotiating team were to be formed, all of them would want some representation on it. "Multiply this by all building trades

unions and I am sure you will agree negotiations could be very difficult."

Mr. Ladyman believed that most officers of building trades unions saw merit in provincial agreements, but union constitutions differ and memberships must be convinced of their value. In addition, he pointed out that the contractors themselves would have to be convinced, and that all these things would take time.

OFL Education Conference

Speakers advise union movement to be flexible and receptive to change, to subordinate own interests to welfare of society

Tradition, past practice and history may act as a dead weight on the labour movement unless the trade unions recognize the need for flexibility in a period of rapid change, Gower Markel, Education Director of the United Steelworkers, told an education conference in Niagara Falls last month sponsored by the Ontario Federation of Labour.

The labour movement, like other institutions, he said, must be flexible and receptive to change under the pressure of new developments. The problem was how to bridge the gap between the past and the present and future.

William Smith, President of the Canadian Brotherhood of Railway, Transport and General Workers, another speaker, said unions should start today on the path to subordinating their own interests to the welfare of society as a whole. He remarked that this was what they would have to do if they ever succeeded in building a political party that attained power on the strength of its promise to establish an equitable society.

Mr. Smith thought that unions should not reduce political pressure for desirable social legislation in favour of economic pressure at the bargaining table for welfare measures that would benefit union members only.

A similar view was expressed by Dr. John Rich, a Toronto psychiatrist and lecturer, when he said that the important question for unions to ask themselves was not what unions could best achieve for their members, but what was the best sort of society they could help to establish, "and then throw their full weight behind the necessary political and legislative changes."

Dr. Rich argued that trade unionists should be prepared to challenge the individualistic attitude in society. Corporations were not restricted in any move they made

toward specialization, but they accepted no obligation to retrain or replace workers who were thus made redundant, he said.

Although society demanded a high degree of skill, free education was provided for only a very limited range of persons. "Having made it impossible for the man who suffers from a low intelligence, or from skills which are no longer required, to gain an adequate income, we resentfully give him a minimum amount of welfare possible and blame him for being lazy," Dr. Rich asserted.

Automation

With reference to automation, Giles Endicott, Research Director of the United Packinghouse Workers, said: "Automation requires that we change the basic concept of no-work-no-pay. Seditious as it may seem, and however counter to Calvinistic ethics, we must accept the principle of income unrelated to work." Although shorter work weeks without loss of take-home pay have become an accepted form of income without work, he said, he proposed pay for "non-work" at the plant or community centre.

Company directors should be elected by employees as well as by shareholders, said Dr. Donald J. Clough, Secretary of the Ontario Foundation of Automation and Employment. He suggested that such joint elections would change the master-servant relationship and bridge the ever-present gap between management and labour. Saying that what he was advocating was "a rather drastic adjustment of the capitalist philosophy," he argued that corporate enterprise was one of the few undemocratic institutions remaining in the western world.

He suggested that in their bargaining, public relations and political activities, unions could aim at the achievement of true industrial democracy.

Industrial Safety

R. G. D. Anderson, General Manager of the Industrial Accident Prevention Association, Toronto, said that instead of encouraging union members to listen to the advice of employer-sponsored safety associations, unions had been "screaming from the sidelines" about not being represented on the Association's boards. He said that, except for executive committee and board meetings, IAPA meetings were open to the public. "Why haven't you taken advantage of these meetings?" he said.

Jack Cauley, Vice-Chairman of the Ontario Workmen's Compensation Board, said that some employers kept injured workers at full pay and then found an excuse to lay them off. This meant that the company's record of compensatable accidents was better than it otherwise would have been, and that its rate of assessment for workmen's compensation did not go up.

Organized labour had a commendable social record in fighting for national or provincial medical care plans, improved housing for low income groups, and for a contributory national plan, but it had done little to open the doors of the labour force for the handicapped, said David Archer, President of the OFL. The unions ought to consider revising seniority procedures to conform to conditions imposed by automation and relocation of plants, he contended.

"Disemployment Fund"

"Automation is inevitable . . . Yet such progress means fewer jobs," said M. J. Fenwick, an OFL vice-president and

Assistant to the Director of District 6 of the United Steelworkers. "Automation threatens our traditional work-for-pay relationship. A new means of distributing purchasing power must be found."

The speaker suggested that employers who introduced automation should be made to pay an automation disemployment tax, which would be used to form a fund that could be drawn on to help pay full wages to employees laid off work. "Permanent or temporary loss of jobs due to automation should be treated as a major industrial and occupational injury, and should be compensated accordingly by full wages for the full period of disemployment," he said.

Mr. Fenwick disagreed with the "misplaced impartiality" with which "we provide equal welfare benefits for the poor and the rich, despite the wide economic imbalance between the two groups." He argued that social security payments should be confined to Canadians earning up to \$6,000 a year, and those earning more should "pay their own way."

Among other proposals by Mr. Fenwick were:

—A plan to "build the nation" through an economic development plan.

—A manpower development agency that "would be charged with job placement authority, training and retraining manpower, research need for new jobs and developing new skills."

"The general public too must be re-educated to accept the proposition that vocational and technical education is not demeaning and does not represent a downgrading in social status," he said.

Second Nova Scotia Labour-Management Study Conference

Two recommendations regarding amendments to the Nova Scotia Trade Union Act made at the second Joint Labour-Management Study Conference at Dalhousie University in November (L.G., Dec. 1963, p. 1069) dealt with unfair labour practices and with voluntary conciliation boards.

The recommendation concerning unfair labour practices proposed that jurisdiction in such cases should be transferred from the courts to the Labour Relations Board. The Board would inquire into an alleged violation, and if unable to settle it, would issue an order; such an order would be filed with the Supreme Court of Nova Scotia and would become enforceable as an order of the court.

The recommendation regarding voluntary conciliation boards proposed that con-

ciliation boards should be appointed only if requested by both parties to a dispute. If both parties applied for a board, the Minister would be obliged to appoint one, but otherwise no board would be appointed. The Minister would cease to have the discretionary power he now has in the appointment of boards.

The recommendation that would increase from seven to twenty-one days the period that must elapse before a strike or lockout may be called would apply only in cases where a conciliation board was not appointed. When a board was appointed, the period would remain seven days after receipt of a conciliation board report. The December LABOUR GAZETTE, in describing this proposed amendment, did not make this distinction clear.

Trustees Plan to Establish Advisory Council of Seamen

The Board of Trustees of the Maritime Transportation Unions has issued two directives, one calling on the five unions under trusteeship to nominate members from which an advisory council of seamen will be established, the second telling the unions they are to keep the trustees informed on all developments leading to contract signing.

Until now, the five unions have bargained on their own. Under the new system, the unions will continue to formulate their demands but will require trustee authority before signing any contract.

Representation has been requested from the various unions on the basis of union strength. The trustees will then select from this delegation the members who will form the seamen's advisory council.

The seamen's council is designed, among other things, to create a more uniform approach to the problems of the industry and to the relationship between seamen—Great Lakes and coastal—on the one hand and management on the other.

In January, at the request of the Board of Trustees, a comparable body representing management met with the trustees. It was the largest and most representative delegation by ship management in Canada since the early 1930's.

The major contracts currently in force between management and the Seafarers' International Union and the Canadian Maritime Union, representing unlicensed deck and engineroom crews, terminate at the end of May.

The SIU, largest of the five unions under trustee management and control, has informed the trustees that 42 contracts could be opened this spring but that no decision to do so has yet been reached.

The directive concerning the seamen's council quotes the trustees' belief that the time has come when such a council to represent the unions in the industry could be most helpful to the trustees and to the unions' membership.

"You are requested to nominate members and submit their names to us without delay," the directive said. "Though frequent meetings of the council may not be necessary, such meetings are likely to be better attended if nominations are generally confined to the Great Lakes and Upper St. Lawrence-Quebec City area."

The second directive suggests that, where appropriate, "each union will give notice of 'agreement opening', prepare its program of negotiations and objectives and fulfil its collective bargaining procedures in the normal fashion.

"Copies of all notices and other documents prepared for these purposes are to be forwarded to the trustees on the date of preparation or issue. But no agreement is to be finally concluded and signed before it has been approved by the trustees." Furthermore:

"In order to provide sound advice, the trustees will need to be represented in many negotiations and should, therefore, be kept informed as to the place of meeting and progress with the management bodies directly concerned."

Trustee Judge René Lippé explained the steps are part of the over-all role of the trustees to restore democratic order in the nation's shipping industry. The manner of the action also is designed to follow the principle established by the trustees at the outset of their assignment: to interfere as little as is necessary in the day-to-day functions of the unions, he said.

Handicapped Businessmen Successful

Two Nova Scotia paraplegics succeed with bookbinding shop staffed by other handicapped, have now opened another branch

Ten years ago, two Montreal men, paraplegics as a result of war injuries, decided to settle in Port Joli, N.S., about 14 miles from Liverpool. This decision was to have far-reaching effects for the handicapped of the province and resulted in considerable savings for the Nova Scotia Government.

The two men, Charles Kelsey and George Whalley, about a year ago opened a bookbinding shop in an inconspicuous building next to a lumber yard in Liverpool. They started with three employees, all handicapped persons. The business expanded rapidly, until 12 persons were on the payroll in the Liverpool shop. A branch was opened in New Glasgow, where another 12 handicapped persons are employed.

Messrs. Kelsey and Whalley hope to expand to New Brunswick soon and have made inquiries in other areas with a view to further development.

Before opening the shop, the partners had obtained a concession from the provincial Department of Education to repair school text books, which, up to that time, had been thrown out. The Department estimates that rebinding prolongs the life of each text book at least two years.

With normal use, a hard-cover book will last for three or four years, and the cost of rebinding is considerably less than the cost of replacement. Both Department officials and school inspectors are extremely pleased with the work being done by K and W Enterprises, as the firm is called.

Although repair and binding of school texts constitute the bulk of work done by the shop, its services are being used by an increasing number of private concerns.

"This is no welfare organization," says Mr. Whalley. "We treat our employees like anyone else and we expect the same kind of treatment. There are no concessions, and if an employee doesn't measure up, he is fired."

Each person is placed on a two-week probation period at the beginning of employment, and if, at the end of that time, both employee and employer are satisfied, the person stays. This two-week trial period is essential, because many of the new employees have never worked before, and a period of assessment and adjustment is necessary. Included on the payroll are a

number of paraplegics, arthritics, retarded persons, polio cases, amputees, arrested tuberculosis cases, and others. They range in age from 19 to 57 years.

The staff works a full eight-hour day. The starting wage is 75 cents an hour, with a raise of 10 cents an hour at the end of three months, and a bonus arrangement based on total shop production.

In a sense, the shops of K and W Enterprises are training centres, as it is the aim of the managers to train workers qualified to compete for employment as book binders in any firm of this type. It was one of the first workers trained at the Liverpool shop who was placed as foreman when the branch was opened in New Glasgow.

A Successful Manitoba Placement

Rosaire Dufault, stricken with polio in his early teens and now confined to a wheelchair, is the first handicapped employee that Allied Farm Equipment, Ltd., has taken on its staff. Through efforts of a placement officer of the Society for Crippled Children and Adults of Manitoba, the accredited provincial government rehabilitation agency, Mr. Dufault secured a job with the firm as a Telex operator and stock record clerk in January 1963.

During his year of service, he has had two raises, and the management is so pleased with his work that four more handicapped persons have been added to the staff.

Other handicapped workers serving efficiently with the firm include a clerk-typist. A young man has been hired as inventory clerk by the associate firm of Alco Equipment, Ltd. The company as a whole is now considering the practicability of employing handicapped men and women.

Mr. Dufault had been placed in the workshop of the Society for Crippled Children and Adults of Manitoba and there received training in various phases of office routine and was given the opportunity to perfect his typing skill.

"He is very efficient," says the manager. "We had an unusually busy summer in 1963 and he worked early and late. He is cheerful and obliging and is well liked by his fellow workers."

Last spring, Mr. Dufault bought a car, specially fitted for him to operate, and is now able to drive himself to and from work.

EMPLOYMENT REVIEW

Employment and Unemployment, February

An estimated 6,223,000 persons were employed and 467,000 were unemployed in February, virtually the same as in January. During this period in previous years, employment has usually declined somewhat and unemployment has tended to rise.

Employment was up 272,000, or 4.6 per cent, from a year earlier, and unemployment was down 78,000. The labour force at 6,690,000 was 194,000, or 3.0 per cent, higher than in February 1963.

Unemployment in February represented 7.0 per cent of the labour force, compared with 8.4 per cent in February 1963 and 9.1 per cent in February 1962. In January the unemployment rate was 7.0 per cent.

Seasonally adjusted, the February unemployment rate was 4.7 per cent, down from 4.9 per cent in January and 5.7 in February 1963.

Employment

Between mid-January and mid-February, employment was well maintained in construction, forestry, transportation and agriculture. All these industries usually experience declines during this period.

The construction industry in particular registered a smaller-than-seasonal decrease, aided in part by unusually mild weather in most parts of the country. Stimulated by the government incentive program for winter house building, activity in residential construction remained at a very high level.

Compared with a year earlier, non-farm employment was up 234,000. The largest increases occurred in service, manufacturing and trade. Agricultural employment was 38,000 higher than in February 1963; most of the increase was in the Prairie Provinces.

The number of women employed increased by 138,000, or 8.2 per cent, over the year; almost three quarters of the increase was among married women. The number of employed men was higher by 134,000, or 3.1 per cent, from the total a year earlier; married men accounted for nearly two-thirds of the increase.

Employment was considerably higher than a year ago in all regions, except in the Atlantic region, where it showed little change. Particularly large gains, amounting to 6.4 per cent and 6.1 per cent respectively, took place in Quebec and British Columbia.

Unemployment

Unemployment was virtually unchanged between January and February; in most previous years it has increased during this period. The February estimate of 467,000 was 78,000 lower than a year earlier, almost all of the decrease being among men.

Of the 467,000 unemployed, some 328,000, or more than two-thirds of the total, had been unemployed for three months or less. An estimated 89,000 had been seeking work for four to six months, and 50,000 for seven months or more.

Unemployment rates were lower than a year ago in all regions.

Socio-Medical Problems of Working Women

As more and more women combine work outside home with family life, their social and medical problems demand special study

In most countries of the world, with the growth of industrialization, more and more women at various periods of their lives are being employed outside the home. Moreover, an increasing proportion of these women, especially those who are married, do a double job, combining the responsibilities of both family and work.

Although questions associated with the use of woman-power are primarily matters of labour policy, in the field of occupational medicine it is recognized that there are health and socio-medical problems involved in women's employment that require special study.

Many of these problems are associated with the strains and stresses arising from the combination of the two roles—home and work. Others relate to the nature of the job, the age of the worker and the conditions of employment. The purpose of studies in such problems is the practical one of recommending appropriate measures to prevent health hazards among women workers and to preserve their health.

So it was that Dr. Sven Forssman, a world-renowned Swedish expert in occupational medicine*, was invited to present current thinking on the subject at the 14th International Congress on Occupational Health, held in Madrid in September 1963.

Miss Mildred Walker, Nursing Consultant on Occupational Health in the Department of National Health and Welfare, who attended the Congress, has made Dr. Forssman's paper available to the Women's Bureau.

Physiological aspects—One of Dr. Forssman's basic assumptions was that there is a definite difference between men and women in respect to maximum working capacity. The maximum physical capacity of adult women was on the average 25 to 30 per cent lower than that of men, he said. Up to the age of 12 or 13 years, the maximum oxygen consumption of boys and girls was on the average the same, but in adolescence a difference gradually developed.

There might be a similar difference between the sexes in the strength of various groups of muscles, partly related to the smaller muscular mass of women. Also, the speaker pointed out, the total amount

of haemoglobin for women was 30 per cent less than for men, and haemoglobin in relation to body weight was about 20 per cent less for women.

This difference in working capacity had influenced legislation in many countries where limitations had been placed on permissible loads for women to lift.* In other countries, however, women performed heavy manual labour. Such variations underlined the fact that there was a wide range of distribution of physical capacity among individuals of both sexes. For example, one might find very strong women and very weak men. Also, from one age group to another, similar variations might occur among either men or women.

In respect to mental capacity, on the other hand, Dr. Forssman stressed that intelligence tests had revealed no differences between men and women. The range appeared to be about the same in both sexes.

Moreover the assumption that women were better qualified than men for certain occupations, such as nursing, or monotonous work at the assembly line in the factory, was without foundation. Factors of environment influenced people's attitudes toward the role expected of them at work and in society as a whole.

Special medical problems—For women, painful menstruation (dysmenorrhoea) might cause temporary reduction of working capacity and temporary absence from work, but its effect tended to be exaggerated. In a recent Swedish study, only six per cent of all the women examined suffered from dysmenorrhoea to the extent that their working capacity was affected. The incidence of painful menstruation was found to be higher among those who were from 14 to 29 years of age and was considerably reduced after a first pregnancy.

The working woman who is pregnant requires special medical attention. A pregnant woman, Dr. Forssman stated, should not be employed from four to six weeks before the birth of her child nor for at least the same period after delivery. Also, she should not engage in work that required continuous standing.

* Dr. Forssman is President of the Permanent Commission and International Association on Occupational Health.

† Weights that may be lifted by women workers are limited by law in two Canadian provinces, British Columbia and Manitoba.

He further cited a report from the United States that recommended the pregnant employee should have a rest period of at least 15 minutes during the first and second halves of her work shift, a mid-shift break long enough to allow for some rest and an unhurried meal, and a work week not exceeding five days or 40 hours.

It is essential, too, that pregnant women not be exposed to toxic substances that might damage the liver or kidneys, or cause anaemia. Dr. Forssman also stressed the necessity of drastically restricting the exposure of pregnant women to ionizing radiation.

At the same time, however, apart from pregnancy, medical research did not support the assumption that women were more sensitive to toxic substances than men. Consequently the same preventive measures against occupational hazards of this type should be applicable to men and women alike.

Since the manifestations of the menopause were more emotional and functional than physical, the reduction of working capacity at this time in a woman's life might be almost wholly prevented by health counselling, with medical treatment when necessary.

Legislation in many countries forbade the employment of women on night shifts or underground in mines. There was no scientific evidence, however, that women should be less resistant than men to shift work. Moreover, provided the working environment conformed to hygienic standards of ventilation and lighting, employment underground should not involve unique health hazards for women.

In the case of night work, it was important to distinguish between medical and social reasons for restrictive legislation.

Absenteeism—That women had a higher absentee rate than men as a result of illness had been confirmed by many scientific enquiries. Notable among these was a recently published study of men and women doing similar work in a telephone company in the United States.

Among these employees, whose work records had been studied over a period of 20 years, both the average number of days of absence and the average number of absences per individual had been found to be higher for women than for men. This study had also shown that women were more susceptible to mental and nervous disorders, high blood pressure, varicose veins, arthritis and rheumatism. On the other hand, tuberculosis, asthma, heart conditions and peptic ulcers had occurred more frequently among the men.

Dr. Forssman stated that absence not certified by doctors and not caused by sickness usually formed a considerable part of the total absence from work among both men and women. Two recent Swedish studies had shown absence for social reasons to be considerable, especially among married women who had children or other obligations at home.

In a study carried out in Yugoslavia, the highest average number of absences had been found to be among "women with the highest family responsibility." In this connection, Dr. Forssman pointed out that the care of a child of six months takes about four hours work a day for a mother.

He believed that the double burden of family obligations and job outside caused stress and fatigue that may require medical attention and might account at least in part for the considerable incidence of nervous diseases among women.

Further, he observed that, although the absence of women resulting from illness might increase with age, absence for other reasons tended to decrease with age, as family responsibilities are lessened.

Preventive aspects—Protection against the health hazards of employment—the chief purpose of occupational medicine—placed high premium on preventive measures. Regular and pre-employment health examinations had been found useful in discovering the early stages of physical ailments and in identifying the effects of psychological stress. Occupational health services, therefore, were of special value both to women workers and their employers.

With respect to the adjustment of women to work, Dr. Forssman strongly advocated that they should not be employed in very heavy manual labour, and during pregnancy, women should avoid too much standing, have several short rest periods during the working day, and should not be exposed to such occupational hazards as have already been mentioned. Apart from these, however, the occupational health problems of women were not different from those of men.

Finally, Dr. Forssman emphasized the need for broader perspective on the physical and mental health of women workers and the strengthening of their position in employment. Further, he was of the opinion that the usefulness of women at work would be greatly increased through more adequate opportunities for education and vocational training.

Part-time work for married women had proved very useful, he said, and of special value in preventing stress and overloading.

Early Returns on Results of Older Worker Employment and Training Incentive Program

In view of experimental nature of program, initial response has been good, Minister says, announcing program's results to end of January: 1,000 applications received, 700 approved

Initial response to the federal Government's Older Worker Employment and Training Incentive Program had been encouraging, in view of the experimental nature of the program and the new concepts involved, said Hon. Allan J. MacEachen, Minister of Labour, when announcing results to the end of January.

Under this program, which went into effect on November 1, 1963, the Department of Labour pays 50 per cent of monthly wages or \$75.00 a month, whichever is less, to employers for each eligible older worker hired by them for a new job between November 1, 1963 and March 31, 1964. Payments can be made for a total period up to 12 months.

Eligible older workers must be aged 45 or over and have been unemployed for at least six of the previous nine months. Local offices of the National Employment Service were empowered to receive applications and to approve the eligibility of both job vacancies and workers.

By the end of January 1964, approximately 1,000 applications had been received from employers. About 700 of these met the requirements and had been approved. About two-thirds of these jobs had been filled by January 31 and placements of eligible workers were continuing.

The Minister explained that it had become obvious that the number of applications received in the first three months of the program had been restricted by the original limitations governing the qualifications for employment of older workers. It had later been announced (L.G. Jan., p. 33) that the program had been extended to March 31, 1964, and the requirement that workers, to be eligible, must not be entitled to regular unemployment insurance benefits was eliminated. Furthermore, employers now were required only to give the older workers orientation training.

It was anticipated that the extension of time would give employers more time to consider fully their manpower requirements and make necessary adjustments in their employment practices in order to take advantage of the program. At the same time the changes would render more older workers eligible to benefit under the provisions of the program.

Mr. MacEachen pointed out in his announcement that there had not yet been time for the full effect of these changes to be felt. From the increasing number of enquiries being received by both the National Employment Service and the Department of Labour it was considered that the changes and extension of the hiring period had at least partially accomplished their objective of encouraging more employers to take advantage of the program.

It had been expected that the program would be slow in gaining momentum because of the new ideas involved and the fact that it was timed to encourage increased employment during the traditionally slacker winter season.

Reports from local employment offices now indicated an increasing number of enquiries and applications were being received and further increases were expected during February and March.

In addition to the benefits accruing to those older workers who obtained employment under the program it was hoped that information emerging from its ultimate evaluation would be helpful in planning future action to assist older workers.

The Older Worker Employment and Training Incentive Program had been introduced as a new and experimental approach to a continuing problem, with the intention of modifying it as more was learned of its effects. It was designed to assist long-term unemployed older workers to return to employment and to gain the up-to-date knowledge and experience required in today's jobs in modern industry.

Don't Judge a Man's Worth
By His Date of Birth

Duration of Negotiations, 1963

During 1963, collective bargaining in Canada lead to the conclusion of more than 200 major agreements in industries outside the construction sector. These agreements were negotiated for approximately 300,000 workers in bargaining units of 500 or more employees.

About six out of every ten of the new agreements were signed within six months from the opening of negotiations, and three out of ten were reached in seven to twelve months. Negotiations for close to 10 per cent of the new contracts extended beyond one year.

More than 60 per cent of the major settlements were arrived at without third-party assistance. The majority of the remaining settlements were reached at the conciliation officer or conciliation board stage,

or through direct bargaining after completion of conciliation proceedings. Some 6 per cent of the major agreements were concluded after recourse to arbitration.

Work stoppages preceded only about 4 per cent of the major settlements negotiated during the year. Strikes over issues in dispute occurred at Goodyear Tire and Rubber and Standard Tube & T. I. in Ontario, and at David & Frere, Dominion Rubber, Quebec Iron and Titanium, Regent Knitting Mills and Shawinigan Chemicals in Quebec.

In two other contract disputes, strikes were called against firms belonging to the Montreal Hat and Cap Manufacturers' Association, and by longshoremen in the ports of Montreal, Quebec and Trois Rivieres.

NEGOTIATIONS PRECEDING SETTLEMENTS REACHED DURING 1963

Collective agreements covering 500 or more employees concluded between January 1 and December 31, 1963 exclusive of agreements in the construction industry.

Part III—Settlements Reached During February 1964

(A summary of major terms on the basis of information immediately available. Figures on the number of employees covered are approximate.)

BOWATER'S NFLD. PULP & PAPER, CORNER BROOK, NFLD.—PAPERMAKERS (AFL-CIO/CLC), PULP & PAPER MILL WKRS. (AFL-CIO/CLC) & OTHERS: 2-yr. agreement covering 1,200 empl.—wage increase of 3¢ an hr. for tradesmen, retroactive to June 1, 1963; 4-wks. vacation after 20 yrs. of service (previously after 23 yrs.); major changes in pension plan; agreement to expire May 31, 1965.

CBC, COMPANY-WIDE—BROADCAST EMPL. (AFL-CIO/CLC): 33-mo. agreement covering 2,000 empl.—wage increases of 4% retroactive to April 1, 1963, 3% eff. April 1, 1964, and 3% eff. April 1, 1965; agreement to expire Dec. 31, 1965.

DOM. OILCLOTH & LINOLEUM, MONTREAL, QUE.—CNTU—CHARTERED LOCAL: 2-yr. agreement covering 650 empl.—wage increases of 7¢ an hr. retroactive to Aug. 28, 1963, and 7¢ an hr. eff. Feb. 10, 1965; 3-wk. vacation after 14 yrs. of service in 1964, and after 12 yrs. of service in 1965 (previously after 15 yrs.); rate for labourer on Feb. 10, 1965 will be \$1.76 an hr.; agreement to expire Feb. 10, 1966.

DOMIL LIMITED, SHERBROOKE, QUE.—TEXTILE FEDERATION (CNTU): 2-yr. agreement covering 700 empl.—wage increases of 9¢ an hr. eff. Feb. 17, 1964, and 5¢ an hr. eff. Feb. 15, 1965; annual vacation pay increased from 5 to 6 per cent of earnings for empls. with 20 to 25 yrs. of service, and from 6 to 7 per cent for empls. with more than 25 yrs. of service; agreement to expire Feb. 16, 1966.

DUPONT OF CAN., MAITLAND, ONT.—CHEMICAL WKRS. (AFL-CIO/CLC): 2-yr. agreement covering 740 empl.—settlement pay of \$60; wage increases of 6¢ to 8¢ an hr., depending on classification, eff. Feb. 24, 1964; 1¢ an hr. increase in differential for afternoon and evening shifts; premium for regularly scheduled Sunday work raised from 17¢ to 25¢ an hr.; rate for labourer \$1.95 an hr.; agreement to expire Feb. 23, 1966.

HAMILTON GENERAL HOSPITALS, HAMILTON, ONT.—PUBLIC EMPL. (CLC): 3-yr. agreement covering 1,350 empl.—wage increases of \$2.50 per wk. eff. Feb. 1, 1964, \$2 weekly eff. Feb. 1, 1965 and \$2 weekly eff. Feb. 1, 1966; other wage adjustments in addition to general increase for approx. 600 empl.; 3 wks. vacation after 10 yrs. of service (formerly after 15 yrs.); agreement to expire Jan. 31, 1967.

HANDBAG MFRS. COUNCIL, MONTREAL, QUE.—LEATHER & PLASTIC WKRS. (AFL-CIO/CLC): 3-yr. agreement covering 900 empl.—wage increases of 5¢ an hr. retroactive to Jan. 6, 1964, and 5¢ an hr. eff. Feb. 3, 1964; hours of work to be reduced from 40 per wk. to 38½ eff. Jan. 1, 1965, and to 37½ eff. Jan. 1, 1966, with same take-home pay; employer contribution to welfare to be raised from 2 to 3 per cent of payroll eff. July 1, 1964; agreement to expire Jan. 1, 1967.

SOO-SECURITY MOTORWAYS, ONT., MAN., SASK. & ALTA.—TEAMSTERS (IND.): 26-mo. agreement covering 500 empl.—for hourly paid empl., wage increases of 3¢ an hr. retroactive to Nov. 1, 1963, 3¢ an hr. eff. June 1, 1964, and 4¢ an hr. eff. May 1, 1965; for highway drivers, increases of 1/10¢ per mile retroactive to Nov. 1, 1963, and 1/10¢ per mile eff. May 1, 1965; improvements in welfare plans; rate for terminal empl. (Man.) on May 1, 1965, will be \$1.75 an hr.; rate for highway driver (Man.) on May 1, 1965, will be 6.35¢ per mile; agreement to expire Dec. 31, 1965.

TORONTO BOARD OF EDUCATION, TORONTO, ONT.—PUBLIC EMPL. (CLC) (CARETAKERS): 2-yr. agreement covering 520 empl.—wage increases of 10¢ an hr. eff. Jan. 1, 1964, and 10¢ an hr. eff. Jan. 1, 1965; 2¢ an hr. increase in shift premium; rate for male cleaner on Jan. 1, 1965, will be \$2.25 an hr.; agreement to expire Dec. 31, 1965.

UNIVERSITY HOSPITAL, SASKATOON, SASK.—BUILDING SERVICE EMPL. (AFL-CIO/CLC): 2-yr. agreement covering 630 empl.—2½ per cent increase on maximum of range of rates; increases in all classifications, minimum \$6 per mo.; special adjustments in some classifications; wages to be open for re-negotiation on Dec. 31, 1964; after the tenth year of service only, empl. to receive a special 1-wk. vacation bonus in addition to regular 3-wk. vacation; agreement to expire Dec. 31, 1965.

WINNIPEG CITY, MAN.—FIRE FIGHTERS (AFL-CIO/CLC): 1-yr. agreement covering 500 empl.—wage increases of 1 per cent retroactive to Jan. 1, 1964, and 1 per cent eff. April 1, 1964; existing "service pay" of \$9 per mo. after 15 yrs. of service raised to \$12 per mo.; 4-wk. vacation after 24 yrs. of service (previously after 29 yrs.); agreement to expire Dec. 31, 1964.

CORRECTION

In the January issue (p. 37) a settlement was reported between Maritime Tel. & Tel. & Eastern Electric, N.S., and the IBEW (AFL-CIO/CLC) (plant empl.). This report was inaccurate in part and should read as follows:

MARITIME TEL. & TEL., COMPANY-WIDE, N.S.—IBEW (AFL-CIO/CLC) (PLANT EMPL.): 1-yr. agreement covering 550 empl.—wage increases of \$1 to \$3.25 a wk.; 2 wks. vacation after 1 yr. of service, 3 wks. after 14 yrs. of service, and 4 wks. after 24 yrs. of service; winter vacation bonus of 2 to 5 days if one or more wks. of a 2 or 3 wks. vacation taken between Nov. 1 and April 30 (previously 5 days added if entire 2 or 3 wks. vacation taken during winter period, with no provision for bonus if only part of vacation taken in winter); agreement to expire Dec. 19, 1964. (Note: Eastern Electric was absorbed by Maritime Tel. & Tel. on Oct. 1, 1963.)

2.7 Million U.S. Workers Receive Increases in 1963 Negotiations

More than 2.7 million workers in the United States received wage increases averaging 3.4 per cent as a result of collective agreements signed in 1963, the U.S. Department of Labor has reported. The median increase in 1963 was 3.1 per cent.

Another 2.9 million received deferred wage increases under agreements negotiated in 1962. The report was by the Department's Bureau of Labor Statistics on a survey of collective agreements covering units of 1,000 or more workers.

Most of the workers receiving deferred wage increases in 1963 were in the auto, farm equipment and trucking industries.

The average wage increase negotiated in 1963 was less than that in 1962 but higher than those in 1961 or 1960.

Approximately 1.4 million workers were covered by agreements that did not provide for bargaining on wages in 1963 or were employed where negotiations had not been concluded by the end of the year.

For most of the workers who received no pay boost, supplementary benefits were liberalized, the Bureau reported. Most of the 1963 settlements changed one or more fringe benefits.

158th Session of ILO Governing Body

Decides to submit to 1964 Conference a proposed program for elimination of apartheid, along with two amendments to ILO constitution to expel countries that practise discrimination

During its 158th Session, held in Geneva from February 13 to 17, the ILO Governing Body decided without opposition to submit to the International Labour Conference a proposed program for the elimination of *apartheid*.

The program invites South Africa to live up to its obligation under the ILO Constitution to respect human freedom and dignity. It recommends a number of detailed measures to ensure the application of the fundamental principles of the ILO under three broad areas: (1) equality of opportunity in respect of admission to employment and training, (2) freedom from forced labour, and (3) freedom of association and the right to organize.

The Governing Body decided also to put two draft amendments to the ILO Con-

stitution on the agenda of the 1964 International Labour Conference.

These various proposals had been contained in a report submitted to the Governing Body by the special 13-member committee it had set up last November to examine questions concerning South Africa (see below).

The first proposed amendment was approved without opposition; the second, by a vote of 32 to 14 with 2 abstentions.

In addition, the Governing Body adopted without opposition a recommendation to the effect that, if the credentials of any South African delegates were contested at the International Labour Conference, the issue should be decided during the opening days of the session.

Proposed Program Against Apartheid

Proposals for an intensified ILO program for the elimination of South Africa's policy of *apartheid* were made on January 20 by a special 13-member committee of the ILO Governing Body. The Committee on Questions concerning South Africa was appointed last November at the Governing Body's 157th Session. The committee's proposals now go before the 158th Session and, if adopted there, before the International Labour Conference next June.

The spearhead of the proposed program is a Declaration summoning South Africa to live up to its obligation under the ILO Constitution to respect human freedom and dignity. In particular, the Declaration calls for the repeal of all statutory discrimination on grounds of race in employment and occupation. If the Declaration is adopted by the Conference, the whole weight of the ILO's supervisory machinery will be brought into play to see that South Africa complies with this injunction.

In its introductory paragraphs, the Declaration states that since South Africa continues to pursue a policy in clear violation of obligations explicitly and voluntarily assumed under the ILO Constitution, the question of *apartheid* has ceased to be solely the domestic concern of that country.

The committee's report also contains two proposed amendments to the ILO Con-

stitution. The first would empower the International Labour Conference to expel or suspend from membership any ILO member country having been expelled or suspended from membership of the United Nations. This was unanimously recommended by the committee subject to a reservation on the part of the Employers' members, who believed that the ground for exclusion or suspension should be clearly stated to be persistent and flagrant violation of the principles of the ILO Constitution and not merely expulsion or suspension by the United Nations.

The second proposed amendment would empower the International Labour Conference to suspend from participation in the Conference any member country having been found by the United Nations to be pursuing by its legislation a declared policy of racial discrimination. This was recommended by a majority of the Committee. One member, George L-P Weaver, United States Government member, dissented, and two members, K. J. Oksnes, Government member, Norway, and Chairman of the Committee, and Kalmen Kaplansky, Workers' member, Canada, reserved their position.

Mr. Weaver argued that since participation in the Conference was one of the fundamental rights of membership, suspen-

sion from participation would be tantamount to expulsion and should therefore be permitted only if the member country had been suspended or expelled from the United Nations under the relevant provisions of the United Nations Charter.

The committee was unanimous, however, in recommending that if the credentials of any South African delegates were contested at the International Labour Conference this year, the Conference should decide the issue during the opening days of the session.

Technical Meeting, Food and Drink Industries

The Tripartite Technical Meeting for the Food Products and Drink Industries convened by the ILO in Geneva last December 9 to 20 adopted two series of conclusions, on the social consequences of technological developments, and on health, hygiene and safety. Delegates also adopted a resolution on world food problems and technical assistance to developing countries. A total of 137 delegates and advisers attended.

Tripartite delegations attended from 19 countries: Argentina, Brazil, Canada, France, Federal Republic of Germany, India, Israel, Italy, Japan, New Zealand, Nigeria, Poland, Sweden, Switzerland, United Arab Republic, United Kingdom, United States, Uruguay and the U.S.S.R.

The Canadian delegation comprised:

Government delegates: S. J. Walton, Labour-Management Co-operation Service, Department of Labour, and P. J. O'Brien, Economics and Research Branch, Department of Labour.

Employer delegates: Herbert Hill, Director of Industrial Relations, Canada Packers Limited, Toronto; and Lloyd Leeming, Vice-President and Secretary, John Labatt Limited, London.

Worker delegates: John Lenglet, Assistant Director, United Packinghouse, Food and Allied Workers, Toronto; and David Wade, Canadian Co-ordinator, Retail Clerks' International Association.

Mr. Leeming was elected vice-chairman of the meeting.

In the first series of conclusions, the meeting found that the pace and type of technological change—mechanization, automation, introduction of new operations, improved utilization of materials, new methods of work or new ways of organizing work—“vary widely between countries, regions, branches of industries, undertakings, and between divisions of the same undertaking, and thus the impact of change produces a variety of social consequences.”

Introduction of technological change, delegates to the meeting said, should be done in a rational and orderly manner, and the resulting benefits should be “shared equitably among workers, undertakings and the community as a whole, and without

prejudicing the stability or the continuity of the undertaking.”

The workers' share of these benefits should take such forms as shorter hours, higher wages, improved working conditions, improved welfare benefits, and greater safety at work; the community at large should benefit through lower prices and higher-quality products.

“The importance of creating a good climate of labour-management relations can hardly be overemphasized,” these conclusions stated, “for it is essential in order to facilitate the required adaptations to technological change.” The conclusions contained a number of proposals relating to the impact of technological change on employment, education and training, conditions of work, hours of work, and wages.

In its second set of conclusions—dealing with health, hygiene and safety—the meeting pointed out that, despite the progress made in all fields of human endeavour, including that of health and safety, workers may find themselves constantly threatened by new risks. It was therefore essential never to relax the efforts to improve the lot of the worker. Recent developments in the food and drink industry confirm this necessity, the meeting asserted.

The delegates also adopted a resolution on world food problems and technical assistance to developing countries in the food and drink industries. They called to the attention of the ILO Governing Body a number of suggestions on international aid to the developing countries, including technical co-operation in such matters as vocational training, management development, and services to small-scale industry.

The resolution suggested also that the United Nations and other organizations concerned should be given the fullest possible support “to protect the balance of payments of the developing countries by means which may include a regularization of prices of raw materials on which the food-processing industries depend, mainly by means of international commodity agreements, and to encourage consideration of the consequences of international commodity agreements when they are drawn up.”

Technical Conference on Employment Policy

The ILO Preparatory Technical Conference on Employment Policy, held in Geneva from September 30 to October 18, adopted a series of conclusions incorporating proposed measures to combat unemployment and underemployment.

The conclusions fall under four main headings: general objectives and principles of employment policy; general and selective measures of employment policy; employment problems associated with economic underdevelopment; and international action and action of employers and workers and their organizations.

The conclusions include, in particular, two international labour instruments in draft form—a draft Convention and a draft Recommendation—on the objectives and principles of employment policy. They will be submitted to the next session of the International Labour Conference in June.

Fifty-six ILO member countries, including Canada, were represented at the conference. There were 56 Government delegates, 43 Employers' delegates and 44 workers' delegates.

The Canadian delegation consisted of F.V.S. Goodman, Economics and Research Branch, Department of Labour, government delegate and head of delegation; Kenneth Hallsworth, Director of Industrial Relations, Ford Motor Company of Canada, Limited, employer delegate; and Joe Miyazawa, Director of Research and Education, International Woodworkers of America, Vancouver.

The draft Convention, adopted by a vote of 77 to 0 with 39 abstentions, provides that each ratifying country shall undertake to declare and pursue, as a major goal, a policy designed to promote full, productive and freely chosen employment, with a view to raising levels of living, overcoming unemployment and underemployment, meeting

manpower requirements and stimulating economic growth.

The draft Convention states further that the aim of this policy is to ensure that:

—there shall be work for all who are available for and seeking work, it being understood that such work shall be as productive as possible and shall contribute to the maximum extent possible to economic expansion;

—there shall be freedom of choice of employment and the fullest possible opportunity for each worker to qualify for, and to use his acquired skills and actual endowments in a job for which he is well suited, and offers of employment shall be made irrespective of race, colour, sex, religion, political opinion, national extraction or social origin.

The draft Recommendation, adopted by a vote of 91 to 0 with 31 abstentions, restates the objectives contained in the draft Convention but, in the matter of general principles, goes into somewhat more detail.

It lays down that all member countries should have an active policy for the full and productive utilization, in freely chosen employment, of the capacities of their people.

The draft Recommendation says that, in the interest of effective employment policies, continuing studies should be made of the size of the labour force and its distribution, the volume of productive employment currently available and likely to be available in the future, the nature and extent of unemployment and underemployment and trends in this field. It invites all member countries to recognize the importance of developing to the full the capacity of human beings, notably through education, vocational guidance and training. It calls for continuing efforts to improve the assistance given by national employment services.

Head of Canadian Delegation

A suggestion that an agreed understanding should be arrived at regarding the respective roles of ILO Conventions and Recommendations was made at the 47th International Labour Conference by John Mainwaring, Government Delegate and Head of the Canadian delegation. A summary of Mr. Mainwaring's address to the conference was inadvertently omitted from the *LABOUR GAZETTE's* report.

Mr. Mainwaring said that experience on committees engaged in drawing up an international instrument showed that lack of any clear understanding of this point led

to much confusion among members of such committees. He thought that a future conference should try to agree on a statement that would clear up this confusion.

He also pointed out the need for committees engaged in drawing up instruments to make a sympathetic effort to take into account the differing requirements of the delegates from various countries.

"An instrument which is not based on thorough discussion leading to a real sense of participation by the delegates is not going to have enough of their support and loyalty when they return home; and after all it is

not the mere existence of an instrument that is important; it is the interest it commands in countries, and the action taken to implement it," Mr. Mainwaring said.

The head of the Canadian delegation devoted most of his address to discussing ways in which the ILO might be made to function more efficiently. His general suggestion was that individual problems should be grouped into "broad subject areas," which would make it easier to decide which groups should be given priority. This, he said, might facilitate agreement on the "general aims and objectives of a number of programs," and, within each program, enable the necessary methods of achieving practical results to be worked out.

These methods, he said, might include discussions at different levels by committees of experts, regional groups or other bodies; the adoption of new instruments when appropriate and the review of existing instruments; technical assistance; research; and the development of better methods for determining the value of what was being done. This would, in turn, help to show

what activities could be reduced or eliminated, so that efforts could be concentrated on what was of most importance.

Mr. Mainwaring touched on the Director-General's suggestion regarding the need for an assessment of the value of programs of technical assistance. Here, he said, was scope for the ILO to do fundamental research that would include not only ILO programs of that kind, but also those being carried out under other auspices.

Touching on another question, the speaker said in closing, "One of the striking aspects of the modern world is the way in which governments, workers and employers in particular countries are learning to consult together on economic and social problems, to set forth joint aims for their countries, and programs for the fulfilment of those aims. This spirit . . . is [one] we must foster internationally as well. The ILO can help to point the way, but only if all of us are prepared to work for peaceful and positive aims, and not for disruptive purposes."

NAM Decides Not to Resume ILO Participation

The United States National Association of Manufacturers will not resume participation in the International Labour Organization, the Association's Board decided last month. The NAM broke with the ILO in 1961, contending that it was dominated by left-wing representatives.

It was reported last year, on the strength of favourable recommendations by two of its committees, industrial relations and international affairs, that the NAM would probably resume its association with the ILO this year.

Since the NAM's withdrawal, the employer representatives in the American delegation to ILO conferences have been chosen by the United States Chamber of

Commerce. Both the Chamber and the AFL-CIO have taken the position that the ILO was an important world forum that should not be abandoned to the Communists.

The opinion of the NAM's Board, however, was reported to be that the ILO conferences were "just a forum for the Communist bloc" in which it was futile to take part.

ILO Membership Reaches 110

The number of ILO member states has risen to 110 with the admission of Uganda, Trinidad and Tobago, Kenya, and Laos. Kenya and Laos joined early this year, the other two became members last year.

TEAMWORK in INDUSTRY

Employees of the Dominion Road Machinery Company, Goderich, Ont., are regularly contributing ideas and suggestions to the firm's current expansion. DRMCO is in the midst of the largest construction program the company has every undertaken.

The new grader assembly building now going up will provide 16,000 square feet of additional space and the most modern and efficient facilities available for assembly of the firm's "Champion" line of heavy duty road graders and snow plows. It will be completed early in 1964.

In a series of labour-management luncheon parleys held early last year, president and general manager John Sully briefed employees on the company's proposed program and invited them to offer advice and suggestions during both planning and construction phases. According to personnel manager L. B. "Bucky" Graham, "response was terrific!"

"Partners in Progress" was the theme adopted for the close labour-management consultation and collaboration that has characterized the program since its inception.

Over-all planning for the new assembly area is in the hands of DRMCO's plant superintendent Jack Grace. He admits to plenty of co-operation from "the boys on the floor" regarding layout of equipment. "We've talked ourselves into some important changes," he said.

Working conditions for a number of employees will be pleasanter when the company opens its new building. Incorporated in its design is a feature that will eliminate the need for employees to work outdoors in inclement weather. There are three large doors in each end of the building. Through the centre door will go the finished "Champion" graders. The doors to left and right will admit trucks delivering shipments of raw materials and parts, which will be unloaded indoors at the appropriate location on the assembly line.

Employment at DRMCO has been expanded and job security greatly increased through the adoption of policies related to the "Buy Canadian" theme. Many parts

previously imported for use in the manufacture of the "Champion" road graders are now either being manufactured by DRMCO or purchased from other Canadian companies. Last year, in less than 12 months, the firm increased the value of Canadian-made parts by close to \$250,000.

According to president and general manager John Sully, the company's move is creating more jobs and strengthening DRMCO's position in the export field. "Our policy is not benevolence, but very realistic business practice," Mr. Sully said recently. "Delivery is faster and we get an assured source of supply, closer communication between buyer and seller, and in many cases, a better price."

Bargaining unit for DRMCO employees is Local 1863, International Association of Machinists (AFL-CIO/CLC).

A variety night involving 50 "stars" was staged recently by employees of Cooke Hospital, Trois Rivières, Que., to celebrate the seventh anniversary of the institution's Staff Co-operation Committee. The three-hour program included plays, sketches, short story readings and singing, and was attended by the entire staff of some 150.

The committee took advantage of the occasion to honour its six former presidents and Ephrem Dubé, who is retiring after 13 years as a hospital carpenter. Mr. Dubé was presented with a cheque by the hospital's director general, Gerald Marcoux, and a gift from the SCC. The six ex-presidents were: D. Boisvert, H. Côté, C. Hamelin, R. Milot, M. Hamelin and P. Juneau. Roger Milot is the committee's current president.

Personnel director Claude Lacerte stated that through the committee "the staff reveals the spirit of true co-operation and cordiality which prevails in Cooke Hospital." Bargaining unit for employees is the Confederation of National Trade Unions, Hospitalization Service Workers.

The \$2,000 maximum award presented under an employee suggestion plan at the Aluminum Company of Canada, Ltd., Kitimat, B.C., has been won by assistant furnace man George Barnes. He earned his award for suggesting a modification of the pouring method used in the firm's casting division.

Mr. Barnes has submitted six ideas in the past five years, and five of them have been but to use. His last award was for \$285.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for four days during January. The Board issued seven certificates designating bargaining agents, ordered three representation votes, and rejected two applications for certification. During the month the Board received five applications for certification, one application for revocation of certification, one request under Section 61(2) of the Act for review of an earlier decision, and allowed the withdrawal of two applications for certification.

Applications for Certification Granted

1. Association of Canadian Television and Radio Artists, on behalf of a unit of staff announcers and staff performers employed by Baton Broadcasting Limited at CFTO-TV, Agincourt, Ont. (L.G., Jan., p. 39).

2. Office Employees' International Union, Local 15, on behalf of a unit of clerical and other office employees of Canadian Freightways Limited, Calgary, Alta., employed at its North Burnaby, B.C. terminal. (L.G., Feb., p. 128).

3. Brotherhood of Railroad Trainmen, on behalf of a unit of road conductors employed in freight and passenger train service by the Northern Alberta Railways Company, Edmonton, Alta. (L.G., Feb., p. 129).

4. Brotherhood of Railroad Trainmen, on behalf of a unit of sleeping- and parlour-car conductors employed by the Canadian Pacific Railway Company, Montreal, Que. (L.G., Feb., p. 129).

5. Brotherhood of Railroad Trainmen, on behalf of a unit of road conductors employed by the Ontario Northland Railway, North Bay, Ont. (L.G., Feb., p. 129).

6. National Association of Broadcast Employees and Technicians, on behalf of a unit of employees of Colonial Broadcasting System Limited at Radio Station VPCM, St. John's, Nfld. (L.G., Feb., p. 129).

7. Canadian Air Line Dispatchers' Association, on behalf of a unit of flight dispatchers employed by Cubana Airlines Limited, Montreal, Que. (L.G., Feb., p. 129).

Representation Votes Ordered

1. Transport Drivers, Warehousemen and Helpers' Union, Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Transport D'Anjou Inc., Rivière-du-Loup, Que., respondent (L.G., Jan., p. 39) (Returning Officer: R. L. Fournier).

2. National Syndicate of Air Transport Employees of Quebec (CNTU), applicant, Quebecair Inc. (traffic, maintenance and operations departments), Rimouski, Que., respondent, and International Association of Machinists, intervener. The Board directed that both the names of the applicant and the intervener appear on the ballot (L.G., Feb., p. 128) (Returning Officer: R. L. Fournier).

3. National Syndicate of Air Transport Employees of Quebec (CNTU), applicant, Quebecair Inc. (stewardesses and flight agents), Rimouski, Que., respondent, and International Association of Machinists, intervener. The Board ordered that both the names of the applicant and the intervener appear on the ballot (L.G., Feb., p. 129) (Returning Officer: R. L. Fournier).

Applications for Certification Rejected

1. Brotherhood of Locomotive Engineers, applicant, The Algoma Central and Hudson Bay Railway Company, Sault Ste. Marie, Ont., respondent, and Brotherhood of Locomotive Firemen and Enginemen, intervener (L.G., Feb., p. 127). The application was rejected for the reason that it was not supported by a majority of the employees affected in the representation vote conducted by the Board.

2. Transport Drivers, Warehousemen and Helpers' Union, Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Martel Express Ltd., Farnham, Que., respondent (L.G., Jan., p. 39). The application was rejected for the reason that the applicant did not have a majority of the employees in the proposed bargaining unit as members in good standing on the date of the application, five of the employees claimed as members by the

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

applicant not having paid union dues or admission fee on their own behalf.

Applications for Certification Received

1. General Truck Drivers and Helpers Union, Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees engaged by Tourist Services Ltd., Whitehorse, Y.T. (Investigating Officer: G. H. Purvis).

2. Teamsters, Chauffeurs, Warehousemen and Helpers, Local Union 91 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Ottor Freightways Limited, Ottawa, Ont. (see "Applications for Certification Withdrawn," below) (Investigating Officer: G. A. Lane).

3. International Association of Machinists, on behalf of a unit of fueling and maintenance personnel employed by Con-

solidated Aviation Fueling of Toronto Limited, Toronto, Ont. (Investigating Officer: A. B. Whitfield).

4. Maritime Airline Pilots Association, on behalf of a unit of pilots and co-pilots employed by Eastern Provincial Airways (1963) Limited, Gander, Nfld. (Investigating Officer: H. R. Pettigrove).

5. Maritime Airline Pilots Association, on behalf of a unit of operations personnel employed by Eastern Provincial Airways (1963) Limited, Gander, Nfld. (Investigating Officer: H. R. Pettigrove).

Application for Revocation Received

Marc Charron, *et al.*, applicants, la Compagnie Nationale Air France (reservations section), Montreal, Que., respondent and the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW), Local 698, respondent. The application was for the revocation of the certification issued by the

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of four officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the province of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; five officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Board on January 30, 1963, to Local 698, in respect of a unit of reservation agents employed by the company at Place Ville Marie, Montreal, Que. (L.G., March 1963, p. 225).

Request for Review Received

Request for review of the certificate issued by the Board on September 27, 1961, affecting Cape Breton Projectionists Union of the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada, Local Union No. 848, Sydney, Glace Bay and New Glasgow, N.S., applicant, and Hector Broadcasting Co. Ltd. (Radio

Station CKEC), New Glasgow, N.S., respondent.

Applications for Certification Withdrawn

1. United Steelworkers of America, Local 5115, applicant, and Kitimat Wharves Limited, B.C., respondent (L.G., Feb., p. 127).

2. Teamsters, Chauffeurs, Warehousemen and Helpers, Local Union 91 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Ottor Freightways Limited, Ottawa, Ont., respondent (see "Applications for Certification Received," above).

Conciliation and Other Proceedings before the Minister of Labour

Conciliation Officers Appointed

During January, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Radio Station CJCH Limited, Halifax, N.S., and Local 1318 of the International Brotherhood of Electrical Workers (Conciliation Officer: D. T. Cochrane).

2. Algoma Central and Hudson Bay Railway Company and Brotherhood of Railroad Trainmen, Lodge No. 611 (Conciliation Officer: T. B. McRae).

3. Canadian Broadcasting Corporation and International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada (Conciliation Officer: C. E. Poirier).

4. Northern Telephone Company Limited, New Liskeard, Ont., and District 10, of the Communications Workers of America (Conciliation Officer: T. B. McRae).

5. Newfoundland Employers Association Limited, St. John's, Nfld., and The Longshoremens' Protective Union (Conciliation Officer: H. R. Pettigrove).

6. Hector Broadcasting Co. Ltd. (Radio Station CKEC), New Glasgow, N.S., and Cape Breton Projectionists Union, Local 848 of the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada (Conciliation Officer: D. T. Cochrane).

7. B.C. Air Lines Limited (Maintenance Department), Vancouver, B.C., and Canadian Brotherhood of Railway, Transport and General Workers (Conciliation Officer: D. S. Tysoe).

8. National Harbours Board (Port Colborne Grain Elevator) and Local 1015 of

the International Union of Mine, Mill and Smelter Workers (Conciliation Officer: T. B. McRae).

9. Radio Futura Ltd. (Radio Station CKVL, Verdun, Que., and National Association of Broadcast Employees and Technicians (Conciliation Officer: C. E. Poirier).

Settlements by Conciliation Officers

1. Denison Mines Limited, Elliot Lake, Ont., and Local 5980, Officer and Technical Unit, United Steelworkers of America (Conciliation Officer: T. B. McRae) (L.G., Dec. 1963, p. 1115).

2. Shipping Federation of Canada, Inc., and Local 1764, International Longshoremens' Association (checkers), Saint John, N.B. (Conciliation Officer: H. R. Pettigrove) (L.G., Oct. 1963, p. 899).

3. Radio Station CJCH Limited, Halifax, N.S., and Local 1318 of the International Brotherhood of Electrical Workers (Conciliation Officer: D. T. Cochrane) (see above).

4. Canadian Broadcasting Corporation and Association of Radio and Television Employees of Canada (Conciliation Officer: C. E. Poirier) (L.G., Nov. 1963, p. 1016).

Conciliation Board Appointed

Asbestos-Eastern Transport Inc., Asbestos, Que., and Locals 106 and 938 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., Feb. p. 131).

Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in December 1963 to deal with a dispute between Radio Station CHRC Limitée, Quebec, and National Association of Broadcast Employees

and Technicians (L.G., Feb. p. 131), was fully constituted in January with the appointment of Raymond Barakett of Montreal as Chairman. Mr. Barakett was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Raymond A. Crepault of Montreal and Gaston Blais of LaSalle, who were previously appointed on the nomination of the company and union, respectively.

2. The Board of Conciliation and Investigation established in December 1963 to deal with a dispute between Central Truck Lines, Ltd., Val d'Or, Que., and Locals 938 and 106 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and

Helpers of America (L.G., Feb. p. 131), was fully constituted in January with the appointment of His Honour Judge R. W. Reville of Brantford as Chairman. Judge Reville was appointed by the Minister on the joint recommendation of the other two members of the Board, Guy Guerin of Montreal and Paul Siren of Toronto, who were previously appointed on the nomination of the company and union, respectively.

Conciliation Board Report Received

Robin Hood Flour Mills Limited, Humberstone, Ont., and United Packinghouse, Food and Allied Workers (plant employees) (L.G., Feb. p. 131). The text of the report is reproduced below.

Report of Board in Dispute between

*Robin Hood Flour Mills Limited
and*

United Packinghouse, Food and Allied Workers

The Board of Conciliation consisting of Norman L. Mathews, Q.C., Company nominee; F. Stewart Cooke, Union nominee, and W. H. Dickie, Chairman, met with the parties at Toronto on Thursday, January 16, 1964.

Appearing for the Company were:

- W. G. Evans, Labour Relations Manager, Robin Hood Flour Mills Limited
- W. H. Lewis, Plant Manager—Humberstone
- S. E. Cely, Assistant Plant Manager
- S. T. Hadley, Plant Chemist.

Appearing for the Union were:

- J. Gillespie, President
- P. Soucie, Mill Committee
- D. Fournier, Mill Committee
- N. Marion, Mill Committee
- E. Harrison, Mill Committee
- C. Warner, Mill Committee
- Henry Bartenbach, Representative.

Matters in dispute and referred to the Board:

1. P.S.I.
2. Ontario Hospital
3. Sickness and Indemnity
4. One Statutory Holiday

5. Shift Premium
6. Improved Vacations
7. Job Rate Adjustments
8. Wages
9. Inclusion of Laboratory Employees.

The Board heard the submissions of the parties and reviewed collectively and separately all of the issues in dispute between them.

The parties are negotiating a renewal of their collective agreement that expired September 1, 1963. There are approximately 170 employees in this bargaining unit engaged at the Company's plant in Humberstone, Ont.

One of the obstacles impeding the progress of the parties was the Union's desire to include the employees of the laboratory who have been certified under a separate certification.

We do not wish to go into detail on each of the items in dispute, but rather state in a general way that the Union wished to improve the monetary items substantially, and in particular, the fringe benefits.

The Company, on the other hand, maintained and supported by its brief that it was the leader in its industry in payment of

(Continued on pag 222)

During January, the Minister of Labour received the unanimous Report of the Board of Conciliation and Investigation established to deal with a dispute between Robin Hood Flour Mills Limited, Humberstone, Ont., and District No. 8, United Packinghouse, Food and Allied Workers (plant employees).

The Board was under the Chairmanship of W. H. Dickie of Toronto. He was appointed by the Minister on the joint recommendation of the other two members, Norman L. Mathews, Q.C., of Toronto, and F. Stewart Cooke of Hamilton, nominees of the company and union, respectively. The report is reproduced here.

Legal Decisions Affecting Labour

Manitoba court refuses mandamus to compel arbitration board to hear a dispute on merits. Court in Saskatchewan enjoins picketing on unleased portions of shopping centre. Alberta court rules on position of employers' association in respect of conciliation award and strike vote. Ontario High Court rules on the power of the Jurisdictional Disputes Commission

In Manitoba, the Court of Queen's Bench, in a dispute under a collective agreement between an employer and a union in respect of discharge of an employee, ruled that once the arbitration board decided that the dispute was not a grievance within the meaning of the collective agreement, the Court had no jurisdiction to compel the arbitration board, by *mandamus* order, to hear the dispute on merits when there was no suggestion that the board was guilty of misconduct or bad faith.

In Saskatchewan, the Court of Queen's Bench enjoined picketing of the unleased portions of a shopping centre and held that picketing of such areas amounted to trespass of private property and might properly be restrained by injunction.

In Alberta, the Supreme Court ruled that when an employers' association bargains collectively on behalf of its members, the association does not form one unit for the purpose of accepting or rejecting a conciliation award or strike vote, but individual employers and their employees form separate units. Strikes in those units that either accepted the conciliation award or voted against a strike were illegal.

In Ontario, the High Court ruled that the Jurisdictional Disputes Commission has the power to issue an interim order assigning work on a specific project to union members who were employees of the company, although none of the employees belonging to the complaining union was actually working on the specific project in question.

Manitoba Court of Queen's Bench . . .

. . . refuses union application for *mandamus* to compel board to hear dispute on merits

On July 9, 1963, Chief Justice Tritschler of the Manitoba Court of Queen's Bench dismissed an application for *mandamus* to compel an arbitration board, after making what seemed to be an incorrect decision, to hear the merits of a dispute between a union

and an employer in respect of a discharged employee. There was no suggestion of misconduct or bad faith, and it was clear that the board studied the matter properly and gave its considered decision.

A collective agreement between the union and the employer provided in part:

If any question arises as to whether a particular dispute is or is not a grievance, within the meaning of these provisions, the question may be taken up through the grievance procedure and determined, if necessary, by arbitration.

A dispute arose over the discharge of an employee and the question arose whether the dispute was a grievance subject to determination by arbitration. This question was then put to the arbitration board. The Chief Justice noted that the merits of the dispute would have been dealt with by the board if the dispute was held to have been arbitrable.

The employer wrote a letter to the Canada Labour Relations Board stating that the company would co-operate fully in the arbitration board's settling the question of whether or not the alleged grievance was a subject for arbitration, and agreeing that the arbitration board would settle the alleged grievance if the question were decided against the employer.

The arbitration board met and considered the question, and the chairman and employer's appointee held that the discharge of the employee was not a "grievance" within the meaning of the collective agreement provisions and that the dispute was, therefore, not arbitrable. The union appointee reached the opposite conclusion.

It was argued for the union in the case at bar that the majority decision of the arbitration board was erroneous in law; that error was evident on the face of the reasons; and that in essence the majority, by misconstruing the provisions of the collective agreement, had refused to exercise its jurisdiction and duty to hear and determine the dispute on its merits.

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

Before the decision was made, the arbitration board heard argument on the question of whether the dispute was arbitrable. Chief Justice Tritschler commented that the employer's argument before the board had not been presented before him and that, if it had been, he might have been persuaded by it as the board was. He stated, however, that on the basis of material presented and submissions put to him, with due respect to the majority of the arbitration board, he was inclined to accept the minority opinion.

The union referred to and urged Chief Justice Tritschler to follow the decision made by him in *Creamette Co. of Canada Ltd. v. Retail Store Employees Local Union No. 830* (L.G. 1956, p. 727), and to remit the matter to the arbitration board to hear and determine the dispute on its merits. The Chief Justice ruled that the *Creamette* decision could be distinguished on the facts.

He stated that he felt that the arbitration board, in the case at bar, had entered upon an enquiry and, after consideration, had arrived at a decision. He quoted from his judgment in the *Creamette* case as follows:

This Court must be at pains to avoid by a pretext to review a decision by way of appeal or to act as though error always goes to jurisdiction, instead of rarely. The Board has the right to be wrong on questions of law or fact, save at least that it must not by error decline or exceed its jurisdiction.

He noted that if the Manitoba Labour Board, in that case, had inquired into the question submitted to it, the decision would not have been open to review.

The Chief Justice noted that it was immaterial that he did not agree with the majority decision of the arbitration board in the case at bar. Moreover, he stated that he had no appellate function to exercise. The arbitration board determined the question which arose and was presented to it by the parties for a decision. There was no suggestion that the board was guilty of misconduct or of not acting in good faith.

He held that if the majority of the arbitration board were wrong, and they had the right to be, the union must accept the result as final, as the employer would have been required to do if the arbitration board had come to the opposite conclusion. He, therefore, dismissed the application for *mandamus*. *Regina v. Norton et al., Ex Parte International Brotherhood of Teamsters* (1963), 40 D.L.R. (2d), Part 10, p. 1060.

Saskatchewan Court of Queen's Bench

... rules picketing on unleased portions of shopping centre may be restrained by owner

On September 16, 1963, Chief Justice Bence of the Saskatchewan Court of Queen's Bench, granting an interlocutory

injunction, held that picketing on the unleased portion of a shopping centre, during a labour dispute between a union and an employer that leased one of the shopping centre units, amounted to trespass and was within the exception of the immunity from action under Section 22 of the Saskatchewan Trade Union Act; that, according to Saskatchewan law, property is either public or private; and that there is no category of quasi-public property on which trade unionists may assert a right of access for the purpose of picketing.

The owner of the Grosvenor Park Shopping Centre had Loblaw Groceries Co. Ltd. as one of the tenants on his premises. The evidence showed that members of the Retail Clerks' International Association (AFL-CIO/CLC), Local 244, were picketing the Loblaw store by carrying placards on the parking area and sidewalk adjacent to the store.

An action was brought by the owner for an injunction restraining the picketers from trespassing on the unleased portion of the shopping centre. It was alleged for the owner that the picketers, by accosting persons lawfully using the shopping centre with verbal and written notice, advising them not to shop at Loblaws, and by carrying placards, were interfering with the intended use of the shopping centre.

It was argued for the union that the acts complained of were done in furtherance of a trade dispute within the meaning of Section 22 of the Saskatchewan Trade Union Act and were not actionable. Section 22 reads as follows:

S.22. Any act done by two or more members of a trade union, if done in contemplation or furtherance of a trade dispute, shall not be actionable unless the act would be actionable if done without any agreement or combination.

Chief Justice Bence stated that the action was one for trespass and that the union picketing on private property would, in his opinion, fall within the exception provided for in Section 22 of the Trade Union Act. The acts would be actionable if done without any agreement or combination.

The Chief Justice dealt with the union argument that the parking area and sidewalks of the shopping centre were quasi-public in nature and ones that had lost their identity as private property.

Counsel for the union referred to a case heard in the Michigan Circuit Court, which was upheld on appeal by a divided court in the Michigan Supreme Court. In that case, *Amalgamated Clothing Workers of America v. Wonderland Shopping Center Inc.*, (1962), 45 Lab. Cas. 62768, the trial judge, Chief Justice Bohn, held that shopping centre property loses its identity as

private property, even though it remains privately owned, and becomes *quasi*-public property in nature.

Chief Justice Bohn also held that the character of a shopping centre lends itself to a public function, as people drive through from one side to another, and the public has free access to come in and shop, or merely walk around. He stated that the owners took great pains to promote the shopping centre as a community centre. For these reasons, he ruled that the owners could no longer claim the rights of owners of property of purely private character.

Chief Justice Bence held that, regardless of the views of the courts in the United States, in Saskatchewan there was no such thing as *quasi*-public property. He stated that property was either public or private, and that in the case at bar it was "indisputably private." The Chief Justice ruled that the owner had the right to refuse access by persons to any property it owned and over which it retained control, and that would cover all of the unleased portion of the shopping centre. He therefore granted the injunction. *Grosvenor Park Shopping Centre Ltd. v. Cave et al.*, (1963), 40 D.L.R. (2d), Part 10, p. 1006.

Alberta Supreme Court . . .

. . . rules members of employers' association are separate units for conciliation award

On September 16, 1963, Mr. Justice Farthing of the Alberta Supreme Court ruled that an association of employers may bargain collectively on behalf of its members. However, as the Alberta Labour Act defines "employer" in terms that do not include an employers' association for the purpose of accepting or rejecting a conciliation award and for the purpose of strike vote, the decision rests with each individual employer and his employees.

Consequently, when a majority of all employees in the member shops of an association of employers vote in favour of a strike and the employees cease to work, it does not mean that there is one legal strike. Rather, there are as many strikes as there are shops whose employees are on strike, and in so far as employees of any shop accepted a conciliation award or voted against a strike, it is illegal for them subsequently to go on strike.

In January 1963, the Association of Calgary Electrical Contractors, representing a number of electrical contractors in Calgary, received a notice from Electrical Union 254, International Brotherhood of Electrical Workers, to negotiate a new contract. There were apparently 24 shops concerned. When collective bargaining failed,

a conciliator tried to bring about agreement in accordance with the provisions of the statute, but without success, whereupon a conciliation board was appointed. The board made an award decided by two of its members, the third member issuing a minority report.

The majority report was apparently accepted by the employers involved. As to the employees, in a supervised vote on July 31, 1963, seven shops out of twenty-four accepted the award.

The strike vote was held on August 14 only among the 17 shops that rejected the majority award; nine of them voted to strike and eight voted against striking. Eventually, all 24 shops went on strike.

The court action was brought by the Association of Electrical Contractors as such and by 15 electrical contractors individually against the Electrical Union 254, claiming damages for an illegal strike. As an immediate remedy, however, the plaintiffs asked, *inter alia*, for an interim injunction declaring that the employees of the 15 individual contractors were illegally on strike, and for an order requiring those on illegal strike to return to their employment.

The plaintiffs contended that the strikes in each of the nine shops which voted to strike were legal, but in the remaining 15 shops the strikes were illegal.

The union contended that there were, in effect, only two parties to the dispute, the association representing all the employers as, in effect, a single unit, on the one hand, and the union, representing all the employees, on the other, and that there was therefore only one strike.

The plaintiffs took the position that the association was simply a bargaining and negotiating agent for all of its members concerned in the matter, but that each shop and its employees were independent of the others when either an award or a strike was to be decided by vote. Therefore, they maintained that there were 24 strikes, not merely one, of which nine were legal and the other 15 illegal.

The crux of the whole matter was whether there was one strike or twenty-four.

In deciding the matter, Mr. Justice Farthing referred to the following definitions contained in Section 2 of the Alberta Labour Act:

2.(g) "employee" means a person engaged in an industry who is in receipt of or entitled to wages for labour or services performed wherever the labour or services are performed;

2.(h) "employer" means a person, corporation, partnership, firm, manager, representative, contractor or subcontractor having control and direction of or being responsible, directly or indirectly, for the employment of and the payment of wages to an employee.

In the opinion of Mr. Justice Farthing, the definition of "employer" is most precise in limiting its interpretation to the ordinary, primary meaning and does not include the association of employers. Consequently, considering the sections of the Act dealing with strikes, each employer in the 24 shops involved in the dispute bore individually the responsibilities placed upon him by the Act, and similarly enjoyed its benefits and advantages. Likewise, the rights and duties of employees were claimed from and owed to their own employer—not to the totality of employers who happened to be engaged in the same commercial activity.

Mr. Justice Farthing held that the strike of the employees in the seven shops who accepted the majority award and did not participate in the strike vote was in clear violation of the plain words of Section 94 of the Act, which provides, *inter alia*, that no employee shall go on strike until a vote has taken place under the supervision of the Board and a majority of the employees entitled to vote have voted in favour of the strike.

Mr. Justice Farthing was convinced that the plaintiff association of electrical contractors was the negotiating agent for the employers, just as the defendant union was for the employees but that, when it comes to accepting or rejecting a conciliation award, the decision rests with each individual employer and with his or its employees as respective units.

Similarly, when it comes to a strike vote, the employees of each individual employer comprise one voting unit, and a majority of them decide whether that particular shop shall or shall not be subject to a strike.

The association is not an employer of electrical tradesmen as such. Likewise, the union is not employed by any electrical contractor nor is it, as such, engaged in the work of electrical tradesmen.

In addition to the illegal strike in the seven shops that did not participate in the strike vote, the strike in eight shops that voted against the strike was held to be illegal. On the whole, Mr. Justice Farthing accepted the plaintiff's contention that the strike in the shops of the 15 contractors was clearly illegal and, in his ruling, made an interlocutory declaration that the employees of the 15 individual plaintiff contractors were illegally on strike. The Court, however, denied the request for an order directing employees on illegal strike to return to work.

In Mr. Justice Farthing's opinion, those taking part in an unlawful strike expose themselves to certain possible penalties under common law or statute, but he was not convinced that he could order them to

go back to work and to enforce it. *Association of Calgary Electrical Contractors et al., v. Electrical Union 254, International Brotherhood of Electrical Workers et al., (1963), 40 D.L.R. (2d), Part 9, p. 907.*

Ontario High Court . . .

. . . upholds power of Disputes Commission to award work to union not on project

On August 23, 1963, Mr. Justice Grant of the Ontario High Court, in *certiorari* proceedings, ruled that the Ontario Jurisdictional Disputes Commission acted within its jurisdiction when it assigned some work on a specific project to employees belonging to a complaining union, although none of them worked on that project.

In May 1963, the Wood, Wire and Metal Lathers' International Union, Local 97, filed a complaint with the Jurisdictional Disputes Commission pursuant to Section 66(1) of the Ontario Labour Relations Act* alleging that the Dominion Sound Equipments Limited was assigning work to employees who were members of the United Brotherhood of Carpenters and Joiners of America and not to employees belonging to the Lathers' Union. The work in question was the complete suspension of a grid ceiling on a project known as the State Rock Investment Building, Toronto.

On June 22, 1963, the Jurisdictional Disputes Commission issued an interim order which assigned the installation of the hangers and main-tees to members of the Lathers' Union and the installation of the cross-tees, wall moulding and pads to members of the Carpenters, which division apparently was satisfactory to both unions.

On July 4, 1963, the Commission issued a further interim order, which in fact quashed the assignment made by it in the first order. The reason for the second order was that, after the issuance of the

*Section 66(1) of the Labour Relations Act reads:

S.66(1) Upon complaint to the Board that a trade union or council of trade unions, or an officer, official, or agent of a trade union or council of trade unions, was or is requiring an employer or an employers' organization to assign particular work to employees in a particular trade union or in a particular trade, craft or class rather than to employees in another trade union or in another trade, craft or class, or that an employer was or is assigning particular work to employees in a particular trade union rather than to employees in another trade union, a jurisdictional disputes commission may, after consulting any person, employers' organization, trade union or council of trade unions that in its opinion may be affected by the complaint, make such interim order with respect to the assignment of the work as it in its discretion deems proper in the circumstances, and the employer, employers' organization, trade union, council of trade unions and the officers, officials or agents of any of them shall comply with the interim order.

first order, evidence was submitted that the employer had only carpenters in its employ on the project at the date of the assignment, did not have any lathers on the project at the date of the assignment and did not employ lathers at any time on this particular project.

The Commission decided to revise the first order in accordance with the decision of Chief Justice McRuer in a similar case, *Canadian Pittsburgh Industries Ltd.*, where the Chief Justice ruled that Section 66(1) contemplates only those disputes that arise with respect to the assignment of work by an employer among those that are engaged on the work over which he has direction. He did not think that the section had application where a trade union that has no members employed under the direction of the employer complains that work is assigned to employees that, in the opinion of that trade union, should be done by members of the complaining trade union.

Consequently, the Commission stated that, in the circumstances of the dispute under consideration, it had no jurisdiction to interfere with the assignment of work made by the employer, Dominion Sound Equipments Limited.

After the issuance of the second order, the Lathers' Union applied for *certiorari* to quash the second order of the Commission, and for *mandamus* directing the Commission to reaffirm its first order.

Dealing with the dispute at bar, Mr. Justice Grant noted that in the case *R.v. Orliffe, Ex p. Can. Pittsburgh Ind. Ltd.* (L.G. 1962, p. 77), referred to above, the

employer had no employees working for him on any project or in any capacity who were members of the complaining union, and the Chief Justice did not mean that the Commission had no jurisdiction to make an order where the union had members employed under the direction of the employer but engaged only in other enterprises.

In the case at bar, at all relevant times the employer had in its employ members of both the Lathers and the Carpenters. Mr. Justice Grant held that the language of Section 66(1) is quite clear that the Commission may make an interim order with respect to the assignment of the work where (among other cases) an employer is assigning particular work to *employees* of one trade union rather than to *employees* of another trade union. It is not a condition precedent to such jurisdiction of the Commission that the employees of the trade union discriminated against must be engaged on the work in question.

Further, Mr. Justice Grant added that, in making its second order, the Commission thought that it was without jurisdiction to make the first order by reason of the fact that members of the Lathers' Union were not employed to some extent on the job in question. In this conclusion, the Commission was wrong.

The Court quashed the second order and declared the first order dated June 22, 1963 to be valid and the subsisting interim order of the Commission. *Regina v. Jurisdictional Disputes Commission, Ex parte Wood, Wire and Metal Lathers' International Union*, (1963) 40 D.L.R. (2d), Part 9, p. 833.

Recent Regulations under Provincial Legislation

Manitoba issues new safety rules for elevators, adopting CSA Safety Code for Elevators, Dumbwaiters and Escalators
Ontario brings mail-carrying under Workmen's Compensation Act

Manitoba Elevator Act

Regulations have been issued under the new Manitoba Elevator Act (L.G., Dec. 1963, p. 1087), which was proclaimed in force January 1. The new regulations adopt CSA B44-1960, Safety Code for Elevators, Dumbwaiters and Escalators (Second Edition) as minimum standards for the design, construction and installation of new elevators, or for the re-installation or major alteration of elevators, and also set out rules with which existing elevator installations must comply.

No person may start a new installation, re-installation or major alteration of any elevator without first submitting drawings and specifications to the chief inspector. On completion of the work, the owner or contractor must apply to the Department of Labour for a permit to operate the elevator.

Before issuing or renewing a permit to operate an elevator, the Minister is required to have it inspected by a departmental inspector, and the owner or elevator contractor must test all safety apparatus in the inspector's presence. Alternatively, the

Minister may accept, on the recommendation of the chief inspector, an affidavit of the owner or elevator contractor that these tests have been made and that the safety apparatus is in good working order.

If possible, the chief inspector must have all elevators inspected every six months. A permit authorizes the operation of an elevator for 12 months, but becomes invalid if the chief inspector seals an elevator.

Rules applicable to existing elevator installations cover, among other matters, the guarding of hoistway openings, landing gates and safety devices for them, car "safeties" and terminal stopping devices. It is also provided that the owner of an

elevator must notify the chief inspector immediately of any elevator accident that causes injury or death.

The new regulations (Man. Reg. 105/63) were gazetted December 21, replacing Man. Reg. 62/45.

Ontario Workmen's Compensation Act

Mail-carrying under a contract with the Post Office, an industry previously excluded, was brought under the Ontario Workmen's Compensation Act by O. Reg. 34/763, gazetted January 4.

The operation of an apartment building was also added to Schedule I, which lists the industries subject to the collective liability provisions.

Report of Board

(Continued from page 216)

wages and fringe benefits, and should not be placed at a continuing disadvantage with its competitors.

The Board secured from each of the parties several exchanges of modifications of their positions on the various items. These were not sufficient however, to bring about agreement.

Very late in the proceedings, the Board, after giving careful thought and consideration to the submissions by each of the parties, and in the interests of reaching a settlement, recommended the following as a basis of settlement of all the issues in dispute:

1. The collective agreement should be for the period from September 1, 1963, to August 31, 1965.

2. Wages—effective September 1, 1963, wage rates should be increased 3 cents an hour; effective May 1, 1964, wage rates should be increased by another 3 cents an hour; and effective January 1, 1965, by 4 cents an hour.

3. Shift premium on the third shift to be increased to 9 cents an hour.

4. Vacations—three weeks with pay after 13 years service, effective in 1964.

5. All other matters agreed upon between the parties to be confirmed.

We regret that after all the intensive mediation efforts, the above recommendations were not acceptable, and the Board asked that the parties give further consideration to them.

This Board has had a further opportunity to reconsider the recommendations made to the parties, and by all the tests of comparison of wages and fringe benefits and general settlements, we can state that the above recommendations represent a fair and equitable settlement of their dispute. We therefore unanimously put forward the above recommendations and urge the parties to accept them.

All this respectfully submitted this 21st day of January, 1964, at Toronto, Ont.

Monthly Report on Operation of the Unemployment Insurance Act

Claimants for unemployment insurance benefit number 532,300 on December 31, a total of 75 per cent larger than that at end of previous month but 10 per cent smaller than year earlier

Claimants for unemployment insurance benefit numbered 532,300 on December 31. This total was about 75 per cent larger than the number of 303,400 on November 29, but 10 per cent smaller than the total of 592,000 on December 31, 1962.

All three totals comprised both regular and seasonal benefit claimants. The total on December 31, 1963 was made up of 451,400 regular and 80,900 seasonal benefit claimants; the December 1962 total, of 496,600 regular and 95,300 seasonal. The November 29 total included 3,000 seasonal benefit claimants.

Between 85 and 90 per cent of the increase during December 1963 was made up of males, who comprised 78 per cent of the total at the end of the month in comparison with 72 per cent on November 29. More than 90 per cent of the male claimants on December 31 began to claim benefit during the last quarter of the year, compared with 80 per cent of the females.

At the end of December, 89 per cent of the claimants—92 per cent of the males and 78 per cent of the females—had been on claim for 13 weeks or less; 8 per cent—6 per cent of the males and 15 per cent of the females—for 14 to 26 weeks, and 4 per cent—3 per cent of the males and 7 per cent of the females—for 27 weeks or more. These percentages were almost the same as those of December 1962.

Initial and Renewal Claims

Initial and renewal claims filed during December numbered 345,300, an increase of 155,900, or 82 per cent, over the November total of 189,400 but a rise of only 20,000, or about 6 per cent, over the total filed during December 1962.

The 82-per-cent November-to-December increase in 1963 compares with the rise of

only 33 per cent, or 80,000 claims, during the same period of 1962.

Beneficiaries and Benefit Payments

The average weekly number of beneficiaries in December was estimated to be 293,800, compared with 161,200 in November and 316,700 in December 1962.

Payments during the month totalled \$29,400,000, compared with \$15,500,000 in November and \$31,100,000 in December 1962.

The average weekly payment was \$24.99 in December, \$23.98 in November and \$24.54 in December 1962.

Insurance Registrations

On December 31, insurance books or contribution cards had been issued to 5,011,719 employees who had contributed to the Unemployment Insurance Fund at one time or another since April 1, 1963.

On the same date, registered employers numbered 337,363, an increase of 492 since November 30.

Enforcement Statistics

During December, 10,184 investigations were conducted by enforcement officers across Canada. Of these, 6,647 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 408 were miscellaneous investigations. The remaining 3,129 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 256 cases, 101 against employers and 155 against claimants.* Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 1,397.*

* These do not necessarily relate to the investigations conducted during this period.

In a comparison of current unemployment insurance statistics with those for a previous period, consideration should be given to relevant factors other than numbers, such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation. Claimants should not be interpreted either as "total number of beneficiaries" or "total job applicants."

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process.

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in December totalled \$31,750,618.75, compared with \$30,336,617.41 in November and \$29,478,741.19 in December 1962.

Benefits paid in December totalled \$29,360,515.60, compared with \$15,467,325.53 in November and \$31,086,590.36 in December 1962.

The balance of the Fund on December 31 was \$58,524,439.25; on November 30 it was \$56,134,336.10; and on December 31, 1962, it was \$98,975,326.02.

Monthly Report on Placement Operations of the NES

Placement operations in local offices of the National Employment Service during January reflected a strong demand for male workers. Of a total of 73,500 persons placed in employment in January, some 49,000 were males. This comprised 66.8 per cent of the total and reflected an increase of 5.0 per cent over the January 1963 total.

Placements of women workers in January numbered 24,500, a decrease of 13.0 per cent from January 1963.

Placements involving the movement of workers from one local office area to another numbered 3,000, or 4.0 per cent of the total. This proportion was higher than in the preceding month and only slightly below the 4.7 per cent recorded in January a year ago.

For Canada as a whole, January placements were 1.8 per cent lower than during the same month last year. The regional distribution of the month's placements, with percentage change from January 1963, was:

Atlantic	5,700	+13.2
Quebec	24,200	- 1.9
Ontario	25,100	- 7.0
Prairie	12,200	+ 2.7
Pacific	6,400	+ 0.8

Some 96,700 vacancies were notified by employers to local offices during January, 5.1 per cent more than in the same month in 1963 and the highest number in any January since 1947. Vacancies for men, at 61,900, increased by 10.3 per cent from January a year ago, but vacancies for women, numbering 34,800, recorded a decrease of 3.1 per cent.

Decisions of the Umpire under the Unemployment Insurance Act

Decision CUB 2278, December 2, 1963

Summary of the Main Facts: The claimant filed a renewal application for unemployment insurance benefit on August 8, 1963. He stated in the application that he had worked for a coal company as a labourer at a wage of \$10.58 a day from July 8, 1963, to August 6, 1963, when his employment terminated for the following reason: "Laid off—help no longer required."

In the Confirmation of Separation (Form UIC 479) the employer stated on August 12, 1963: "Employee was fired for cause." As the reasons for separation given by the claimant and the employer were at variance, the local office of the Unemployment Insurance Commission wrote to them on August 14 and requested their comments. The replies read:

CLAIMANT: I was driving a company truck at night and in using the dump the truck was damaged. The foreman laid me off for that reason. I understood it as a layoff as I believe that they will call me back as they

expect me to pay for the damage. I do not consider this as being fired but as laid off, as there is a possibility of them calling me to return to work at any time.

EMPLOYER: The former employee [claimant] was discharged due to being intoxicated on the job, damaging a company truck, not carrying out his work properly. The employee had been told before that his drinking on the job must cease or he would have to be discharged.

The insurance officer disqualified the claimant and suspended benefit from August 4, 1963, to September 14, 1963, inclusive, on the ground that the claimant had lost his employment by reason of his own misconduct (Section 60(1) of the Act).

The claimant appealed to a board of referees in a letter dated September 10, which reads:

I wish to appeal the decision on my claim. Evidently the company claims I was discharged for cause. Personally, I cannot see how it is a discharge, when the foreman told me that, if I would pay for the damage that was caused

to the truck, that I could continue working. I did not have the money to pay for the damage and was therefore laid off, actually for lack of money rather than for the damage itself. My family responsibility is such that I could not meet any further financial drain, therefore, the only reason I am not working right now is lack of capital.

The insurance officer reviewed the claim file but did not consider that any change in his decision was warranted. The case came before a board of referees at a session held September 30, 1963, in—. The claimant was neither present nor represented at the hearing. The board, in a brief decision, unanimously maintained the decision of the insurance officer.

The union of which the claimant is a member, appealed to the Umpire on October 7. The appeal reads:

That due consideration was not given by the insurance officer or the board of referees to the fact that [claimant] was laid off primarily to a lack of money, as he was definitely told that he could stay on the job provided he would pay for the damage caused to the company truck. In view of this lack of consideration, the union respectfully requests that, if possible, the Umpire return the claim to the board of referees, at which time the union will provide representation for [claimant].

In a statement of observations dated October 25, for consideration by the Umpire, the Chief of the Adjudication Division of the UIC said:

1. The union's grounds for appeal to the Umpire are the same as those contained in the claimant's appeal to the board of referees. Therefore, a rehearing by the board on the same grounds is unwarranted.

2. The notification of disqualification (exhibit No. 5) sent to the claimant contains instructions regarding an appeal. It suggests that he consult a member or officer of his union and also advises him to notify his local office of the name of his representative if he desires to be represented at the oral hearing before the board. The claimant was also sent a "notice of hearing re sitting of the board of referees" (exhibit No. 8). This latter notice invites him to make representation before the board and advises him of his privilege to attend the hearing. The claimant, therefore, was given ample opportunity to be heard and make representations on his appeal, as provided in Regulation 182(1).

3. The fact that the employer might have kept the claimant in his employment if he had paid the damages to the truck is immaterial. The claimant has not refuted the employer's allegations (exhibit No. 4) that the damage to the company truck was due to the claimant's gross negligence, and that his loss of employment resulted therefrom.

4. It is respectfully submitted that the unanimous decision of the board of referees should be maintained.

Considerations and Conclusions: The fact that the claimant's employer might have been prepared to retain him in his employment if he had paid for the damage caused to the company's vehicle is not a

material consideration in deciding whether or not the claimant lost his employment by reason of his own misconduct on August 6, 1963.

Therefore, as the union's appeal is based exclusively on that ground and as the employer's statement that the claimant was discharged "due to being intoxicated on the job" was at no time denied by the said claimant, a rehearing by the board of referees would, in my opinion, serve no useful purpose.

I consequently decide to dismiss the union's appeal.

Decision CUB 2280, December 2, 1963

(Translation)

Summary of the Main Facts: In his appeal to the Umpire, dated September 18, 1963, the insurance officer has summed up the main facts of this case as follows:

1. The claimant filed a claim effective October 28, 1962. She stated that she had last worked . . . as a seamstress, at 75 cents an hour, from February 1961 to October 31, 1962, when she was laid off for lack of work.

2. On May 21, 1963, the claimant failed to apply for, or to accept, a permanent job as a seamstress at 75 cents per hour . . . on the ground that "I cannot accept work at [the factory] since I must leave at 11:30 a.m. to prepare my lunch, and the employer will not accept those terms" . . . the prevailing rate of pay for that kind of employment is between 58 and 75 cents an hour.

3. In a statement dated May 27, 1963, the claimant said that the only limitation she was placing on her availability for work was that she had to have an hour and a half for lunch, i.e., from 11:30 a.m. to 1:00 p.m., as she had three children and had to prepare lunch. She added that her former employer . . . had granted her time from 11:30 a.m. to 1:00 p.m., for that meal.

4. On May 27, the local office got in touch with the manager of [previous employer] who declared that most of their employees were then out of work and that the claimant would be called back if her services were required. The local office also contacted the largest similar establishment in the area . . . and was informed that, with the exception of office workers, the company grants only one hour for lunch. As far as the local office could find out, [the previous employer] is the only factory granting a lunch period of an hour and a half.

5. The insurance officer disqualified the claimant from May 19, 1963, to June 29, 1963, under Section 59(1) of the Act, on the ground that she had, without good cause, refused or failed to apply for, or to accept, suitable employment. He also disqualified her from May 21, 1963, because she had failed to prove that she was available for work as required by Section 54(2)(a) of the Act.

6. The claimant appealed to the board of referees through her solicitor, who stated that the claimant only asked for working conditions similar to those that had been granted to her for more than 10 years, and that her request for an hour-and-a-half lunch period, instead of the hour generally applicable, was not that unusual, since she had then resumed working

at precisely those conditions. According to the information obtained from the claimant's employer, she worked on May 29, 30 and 31, and on June 3, 4 and 5, 1963, plus one day during the week beginning June 9, 1963, and worked on a full-time basis as of June 17, 1963.

7. The claimant and her solicitor were both present when the case was heard by the board of referees. The board allowed the appeal, and ruled that the claimant had a valid reason not to apply for the job offered and that she had proved her availability for work. The decision is based mostly, it seems, on the fact that the claimant had obtained an hour and a half for lunch during the last 11 years she had been working . . . that the claimant had alleged that similar factories let their staff off at 11:30 a.m., as she knew personally of three persons in the employ of [other establishments] who do so and that she had declared that she had resumed her work with her former employer about May 27, 1963.

The grounds on which the insurance officer based his appeal read:

8. We submit that the board of referees erred in deciding that the claimant had good cause for refusing to accept an offer of suitable employment and also erred in deciding that the claimant had proved her availability for work.

9. The work offered was in the usual occupation of the claimant, at the prevailing rate of pay in the district and at conditions similar to those recognized in the area for that type of work. Notwithstanding that a longer period of time may be granted to some employees for their lunch period in some factories, the evidence shows that such is a special privilege that is not granted to a new employee, and that the general practice is to grant an hour for lunch. It is therefore clearly established that the job offered was suitable according to Section 59(2)(b) of the Act.

10. The claimant refused the employment for purely personal reasons, and such reasons as a rule do not constitute good cause for refusing suitable employment, since a claimant must adapt his or her personal circumstances to the requirements of the labour market (CUB 1390 and CUB 1993). It surely cannot be held that the labour market should adapt itself to the particular circumstances of an individual case . . .

11. The fact that the claimant did obtain, shortly after having refused the employment, a few days of part-time employment from her former employer does not constitute good cause for refusing it, since the information supplied by her former employer a week later indicated that, even then, she did not have any assurance of being permanently employed by that employer. In fact, when she turned down the job which was offered to her, there was a lack of work at the plant of that employer and the claimant had not been called back nor advised of a date when she would be so called. Actually, the claimant was called back for full-time work only four weeks later. The fact that the claimant subsequently did obtain work that suited her particular requirements does not prove that she had good cause for refusing suitable employment, in the absence of evidence to show that she had a reasonable assurance, when she refused the job, that she would obtain such an employment in the very near future (CUB 520), especially after a long period of unemployment (CUB 1431).

12. . . . We submit that by restricting her availability to a job in a sewing establishment where she would be granted an extra half

hour at noon, the claimant did in fact reduce her availability to such an extent that she could be employed only by her former employer. Under the circumstances, she did not establish that she was available for immediate work on each day her former employer had no work to give her. . . . The fact that certain persons did get . . . the working conditions asked for by the claimant is not a determining factor, since it was a privilege that employers were not willing to give to the claimant, as a new employee, at that particular time.

13. For the above reasons, we respectfully submit that the appeal made by the insurance officer should be allowed.

On October 7, 1963, the claimant's counsel wrote a letter to the Unemployment Insurance Commission, in which he said, in part:

. . . [Claimant] has worked for more than 10 years for [the same firm] where she was called back on May 27 or 28, after an intermittent period of unemployment that lasted a few months.

[Claimant] lives some 500 feet away from her employer's factory and the job . . . which was offered to her would have required her to take a taxi during the lunch period, since this employer refused to give her an hour and a half for that purpose, a privilege always given her by [the company] ever since she had been employed there.

Furthermore, [claimant] is not the only one who is allowed an hour and a half to prepare her family's mid-day meal . . .

Moreover, the job that [claimant] was offered consisted in sewing children's dresses, work that she had never done before, and she had the assurance that her former employer would call her back and, rightly so, since she now works in her former job . . .

My client wished to preserve her seniority, and if she had worked for [another employer] she would have been unemployed during the summer season due to a slackening of the over-all activity of this firm.

In this whole affair, someone is acting out of revenge against [claimant], possibly through jealousy, by ill-natured gossip or otherwise. It must not be forgotten that the manager of the company had given [claimant] to understand that she would be taken back at her previous job any day and, in actual fact, she did get her job back. [Claimant] has received unemployment benefits for one period only, after having been in the employ of the same firm for 10 consecutive years, and I believe that she was fully justified to make every effort to keep her former job, instead of accepting a position that offered no security, was temporary, and carried a much lower salary than what she had earned . . .

Furthermore, as [claimant] has always or most of the time worked on a part-time basis for her former employer while she was unemployed, she was very anxious to resume her work with that employer.

The insurance officer made the following comments:

In his reply, the representative of the claimant stated that the latter has always, or almost always, worked for her employer while she was unemployed. The weekly reports submitted by [claimant] with respect to the claim referred to in the present appeal, show that she did not

(Continued on page 231)

WAGE SCHEDULES

Wage Schedules Prepared and Contracts Awarded in January

Works of Construction, Remodelling, Repair or Demolition

During January the Department of Labour prepared 268 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, a total of 154 contracts in these categories was awarded. Particulars of these contracts appear below.

In addition, 150 contracts not listed in this report and which contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, The St. Lawrence Seaway Authority and the Departments of Defence Production, Mines and Technical Surveys, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practices;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in January for the manufacture of supplies and equipment were as follows:

Department	No. of Contracts	Aggregate Amount
Defence Construction (1951) Limited	1	\$11,705.44
Defence Production	118	537,326.00
Post Office	21	424,889.14
Public Works	1	8,629.00
Royal Canadian Mounted Police	20	107,054.47
Transport	4	42,209.15

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour showing the applicable wage deemed to be required in the execution of the work. These wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classification to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(b) The working hours shall be those fixed by the custom of the trade in the district, or if there be no such custom, then they shall be fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Wage Claims Received and Payments Made in January

During January the sum of \$5,367.70 was collected from 11 contractors for wage arrears due their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 104 workers concerned.

Contracts Containing Fair Wage Schedules Awarded in January

DEPARTMENT OF AGRICULTURE

Near Russell Man: J S Quinn Construction Co Ltd, construction of Conjuring Creek Storage Project.

CENTRAL MORTGAGE AND HOUSING CORPORATION

Montreal Que: St Lawrence Steeplejacks, interior painting of apartment units & public areas of four apartment projects. *Pierrefonds Que:* Grand Royal Paving Reg'd, site improvements, Cloverdale Park Apartments. *Ville St Laurent Que:* Jos Malaket & Fils Inc, installation of gas ranges, Place Benoit Apartment Project; Jos Malaket & Fils Inc, installation of gas ranges, Parc Royal Apartment Project; Jos Malaket & Fils Inc, installation of refrigerators, Parc Royal Apartment Project. *Regina Sask:* G Barker Construction Ltd, construction of 141 row housing units & site works (FP 2/63).

In addition, this Corporation awarded 19 contracts containing the General Fair Wages Clause.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

Miramichi Indian Agency N B: Cardinal Construction Ltd, construction of school & residence, Big Cove IR. *Clandeboye Indian Agency Man:* Louis Ducharme & Associates Ltd, renovations to dormitory & washrooms, Assiniboia IRS. *Dauphin Indian Agency Man:* Dauphin Fixtures Ltd, renovations to fire protection system, McKay IRS & associated bldgs. *Carlton Indian Agency Sask:* Dashchuk Construction Ltd, construction of school & residence, Red Earth IDS. *Blackfoot Indian Agency Alta:* Borger Construction Ltd, installation of water supply system pipeline on Crowfoot Crescent, Blackfoot Reserve housing development (subdivision No 1).

DEFENCE CONSTRUCTION (1951) LIMITED

Gander Nfld: H & S Construction Ltd, interior painting of bldgs Nos 8 & 86, RCAF Station. *Halifax N S:* Central Electric, rewiring & relighting of bldg No 1, HQEC; L G & M H Smith Ltd, strengthening deck system, jetty No 5. *Camp Gagetown N B:* S R Shears & Sons Ltd, interior painting of 500 PMQs; St Lawrence Steeplejacks Co Ltd, interior painting of 649 PMQs. *St Jean Que:* P M Entreprises Inc, renovations to south block, CMR. *Barriefield Ont:* Lagendyk & Co Ltd, interior painting of nine bldgs, RCEME School; Donald M Hawkins Ltd, interior painting of 187 PMQs, Fort Henry Heights. *Camp Borden Ont:* Ontario Painting & Decorating, interior painting of 252 PMQs; Riverside Painting & Decorating Ltd, interior painting of 173 PMQs; Planned Renovators Ltd, interior painting of 20 permanent bldgs; Walker Painting & Decorating Co Ltd, interior painting of 42 temporary bldgs. *Clinton Ont:* International Painting & Decorating Co, interior painting of various bldgs, RCAF Station. *Downsview Ont:* C & K Steeplejack Co, interior painting of 58 PMQs, RCAF Station. *Hamilton Ont:* Mechanical Contracting Trades Ltd, replacement of boilers in heating plant for Bldgs 1, 2 & 5, HMCS Star. *Kingston Ont:* Cribb Construction Co Ltd, installation of standby sewage lift pump & related equipment, RMC; Riverside Painting & Decorating Ltd, interior painting of eight bldgs, RMC. *London Ont:* The Vipond Automatic Sprinkler Co Ltd, installation of sprinkler system, No 27 COD. *North Bay Ont:* Farquhar Construction Ltd, supply & installation of five electrically operated gates in security fence, RCAF Station. *Petawawa*

Ont: Ontario Painting & Decorating, interior painting of 250 PMQs; Pillar Construction Ltd, construction of two refrigerated garbage rooms; Planned Renovators Ltd, interior painting of 400 PMQs. *Trenton Ont:* Miron-Wiggers Construction Ltd, rehabilitation of bldg No 78, RCAF Station. *Camp Shilo Man:* Hay Decorating Co Ltd, interior painting of 192 PMQs. *Winnipeg Man:* North Star Decorating Co Ltd, fire retardant painting in hangar No 16, RCAF Station. *Moose Jaw Sask:* Conrad-Rawlinson Ltd, interior fire retardant painting of three hangars, RCAF Station. *Calgary Alta:* J Mason & Sons Ltd, interior painting of 219 PMQs, Currie Barracks. *Penhold Alta:* J Mason & Sons Ltd, interior painting of 70 PMQs, RCAF Station. *Muskwa (Fort Nelson) B C:* McGregor Telephone & Power Construction Co Ltd, construction of outdoor main transformer sub-station.

DEPARTMENT OF DEFENCE PRODUCTION

Charlottetown P E I: Fitzgerald & Snow Ltd, maintenance repairs to lecture rooms, offices, halls, etc, Armoury. *Halifax N S:* Wall & Woodworth Ltd, interior painting, bldg No. 41 (drill hall), Windsor Park. *Shelburne N S:* Atkinson & Bower Ltd, replacement of heating & cooling coils in ventilation & air conditioning systems, bldgs No. 35 & 36, HMCS Shelburne. *Longueuil Que:* National Blind & Window Co Ltd, installation of aluminum windows & sashes in bldg No 49, Jacques Cartier Barracks. *Montreal Que:* Roger Bisson Inc, renovations to shower rooms, No 25 COD. *Angus Ont:* R S C Bothwell Associates Ltd, supply & installation of electrically conductive vinyl flooring tile in bldgs Nos 152 & 153, No 13X Depot Detachment. *Barriefield Ont:* Foley Construction Ltd, construction of gatehouse. *Clinton Ont:* Atlas Aluminum Products, installation of metal combination storm & screen windows on barrack blocks Nos 72 & 74, RCAF Station. *Kingston Ont:* Irving-Harding Ltd, renovations to ventilation system. *London Ont:* Cardinal Painting & Decorating Co Ltd, interior painting of various bldgs, Wolseley Barracks; Ontario Painting & Decorating, painting interior of No 27 COD & No 204 Base Workshop. *Orangeville Ont:* Defo Construction Co, repairs to Armoury. *Ottawa Ont:* Alf Grodde Ltd, plastering & painting, Drill Hall; Alf Grodde Ltd, interior painting of Beach Bldg. *Trenton Ont:* Walter F MacCormack, interior painting of various bldgs, RCAF Station; Walter F MacCormack, interior painting of bldg No 38, RCAF Station. *Winnipeg Man:* Canadian Rogers Western Ltd, repairs to roof, Bldg A-2, Fort Osborne Barracks; North Star Decorating Co Ltd, interior painting of six bldgs, Fort Osborne Barracks; Oswald Decorating Co, interior painting of three bldgs, RCAF Station. *Moose Jaw Sask:* Island Construction Ltd, application of epoxy laminate to bathroom walls, RCAF Station; R S Klein Painters & Decorators Ltd, interior painting, Armoury. *Esquimalt B C:* Farmer Construction Ltd, construction of store room, bldg No 24 (Grant Block), Royal Roads; Farmer Construction Ltd, construction of battery charging shop, Bldg No 141, HMC Dockyard; Hume & Rumble Ltd, electrical alterations, bldg No 192, HMC Dockyard; C D Johnston, painting interiors of 25 residences, Belmont Park. *Matsqui B C:* J S Johnston Ltd, replacing water main, HMCS Aldergrove. *Aldergrove & Matsqui B C:* Trans-Power Construction Ltd, replacement of 41 power & antenna poles. *Vancouver B C:* Walker Construction, repairing trusses in hangar, 2nd & Discovery Streets.

In addition, this Department awarded 70 contracts containing the General Fair Wages Clause.

DEPARTMENT OF MINES AND TECHNICAL SURVEYS

This Department awarded seven contracts containing the General Fair Wages Clause.

NATIONAL HARBOURS BOARD

Quebec Que: Janin Construction Ltd, reconstruction of shed "A," Wolfe's Cove.

POST OFFICE DEPARTMENT

This Department awarded one contract containing the General Fair Wages Clause.

PROJECTS ASSISTED BY FEDERAL LOAN OR GRANT

New Liskeard Ont: Val d'Or Construction Co Ltd, construction of sewage disposal system.

DEPARTMENT OF PUBLIC WORKS

Carmanville Nfld: Wm A Trask Ltd, wharf extension. *Cox's Cove Nfld:* Avalon Construction & Engineering Ltd, wharf reconstruction. *Freshwater Nfld:* Wm Hynes, construction of post office bldg. *Placentia Nfld:* O'Reilley's Plumbing & Heating Supplies, construction of post office bldg. *Rose Blanche Nfld:* J J Hussey Ltd, construction of post

office bldg. *St John's Nfld*: Capital Office Cleaning Co Ltd, cleaning bldg No 3, Naval Dockyard, 191-193 Water St; Benson Builders Ltd, wharf repairs (site 15, southside). *Trepassey Nfld*: Davis Construction Ltd, construction of Fisheries Officer's residence. *Woody Point (Bonne Bay) Nfld*: James E Shears, construction of post office bldg. *Darnley Basin P E I*: Ralph Ford, construction of retaining wall. *Barrington N S*: Wm E Smith, construction of post office bldg. *Debert N S*: Ivan Archibald & Donald Fisher, construction of post office bldg. *Inverness N S*: MacDougall Construction Co Ltd, construction of federal bldg. *Main-a-Dieu N S*: MacDonald & MacKeigan, wharf improvements. *Pictou N S*: Ferguson Industries Ltd, installation of power outlets, quay wall. *Sydney N S*: Maritime Builders Ltd, wharf improvements. *Terence Bay N S*: Naugles Sand & Gravel Co Ltd, wharf repairs. *Butternut Ridge N B*: Cardinal Construction Ltd, construction of post office bldg. *Edmundston N B*: R E Stewart Construction Corporation, construction of federal bldg. *Head Harbour N B*: McNamara Construction of Nova Scotia Ltd, construction of wharf. *Leonardville N B*: Fluidy Contractors Ltd, wharf extension. *Richibucto N B*: Parsons Construction Co Ltd, construction of federal bldg. *St Edward N B*: Leo LeBlanc, breakwater repairs. *Saint John N B*: R A Corbett & Co Ltd, additions & alterations, Trade & Commerce Bldg. *Fort Chimo Que*: Ron Engineering & Construction (Quebec) Ltd, erection of school, garage & workshop. *Grandes Bergeronnes Que*: Francois Lapointe Inc, construction of post office bldg. *Isle Verte Que*: Paul Malenfant, construction of post office bldg. *Lavaltrie Que*: Lucien Pelletier, construction of post office bldg. *Quebec Que*: E M M Enr, moving of National Health & Welfare Dept from Temporary Bldg to Old Postal Terminal. *St Alexis des Monts Que*: Ronald Desrosiers, construction of post office bldg. *St Marc sur Richelieu Que*: Leopold Pigeon, repairs to wharf (VARY). *St Timothee Que*: Fernand Martel, construction of post office bldg. *St Vincent de Paul Que*: Secant Construction Co, alterations & repairs to penitentiary (reconstruction Phase V). *Bala Ont*: Alfred Haigh, reconstruction of timber trestle. *Burlington Ont*: John Cestnik Construction, alterations to federal bldg. *Fort William Ont*: Claydon Co Ltd, construction of implement & storage shed, Experimental Farm. *Hammer Ont*: V Dube Construction, addition to post office bldg. *Kingston Ont*: Joice-Sweaner Electric Ltd, alterations to UIC Bldg. *Little Current Ont*: Donald Eadie, wharf repairs. *London Ont*: Bennett & Wright Contractors Ltd, installation of fire alarm system, Dominion Public Bldg. *Macdiarmid Ont*: Hacquoil Construction Ltd, harbour repairs & improvements (repairs to rubble mound breakwater). *North Bay Ont*: Farquhar Construction Ltd, alterations to federal bldg. *Ottawa Ont*: Tippet-Richardson Ltd, moving of office furniture & equipment from Vimy Bldg, Sparks St & Radiation Laboratory, Caldwell Ave, to new Radiation Laboratory, Brookfield Ave, Confederation Heights; The Frost Steel & Wire Co Ltd, fencing of Manordale Subdivision (Department of Agriculture land); Dibblee Construction Co Ltd, grading & paving parking area, Office of British High Commissioner; Three Star Building Cleaners, cleaning interior, Beamish Bldg, 1501 Carling Ave; Three Star Building Cleaners, cleaning interior, Empire Bldg, O'Connor St & Laurier Ave; C P Construction Ltd, alterations to Dominion Bureau of Statistics Bldg, Tunney's Pasture; A Lanctot Construction Co, alterations to Centre Block, Parliament Bldgs; Hugh M Grant Ltd, foundation demolition & removal from Department of Agriculture Animal Research Institute land, Greenbelt area; Robert Construction Co, alterations, Connaught Bldg, Sussex Drive; K C Martin Construction Co, alterations to No 8 Temporary Bldg, Carling Ave; Gendron P & H Co, alterations & additions to heating & ventilating systems, RCMP Headquarters Bldg, Tremblay Road. *Sutton West (Black River) Ont*: Keene Construction Co Ltd, training wall decking. *Toronto Ont*: One Thirty One Bloor West Ltd, supply & installation of interior finishing, mechanical & electrical equipment & fixtures, National Design Centre, Colonnade Bldg; K Rustscheff, washroom addition & alterations, postal terminal "A." *Windsor Ont*: Herbert Winch & Son, alterations to federal bldg. *Ethelbert Man*: Nils A Anderson, concrete reservoir & water supply revisions, RCMP Detachment quarters. *Gainsborough Sask*: Gotthard Peterson Construction Co Ltd, construction of post office bldg. *Regina Sask*: Beattie Ramsay Construction Co Ltd, replacement of watermains from 10th Ave to RCMP barracks. *Saskatoon Sask*: Bird Construction Co Ltd, construction of veterans' home; Modern Building Cleaning Service of Canada Ltd, interior cleaning of old post office bldg. *Calgary Alta*: Pilkington Glass Co Ltd, re-glazing windows, public bldg. *Thorsby Alta*: D S Greenfield Construction Ltd, construction of post office bldg. *Vermilion Alta*: Silisky Construction Ltd, construction of RCMP detachment quarters. *Esquimalt B C*: Dave Cooper Ltd, installation of fire protection system, Esquimalt Graving Dock. *Penticton B C*: Interior Contracting Co Ltd, paving of access road, Astrophysical Observatory. *Fort St James B C*: Dezell Construction Co Ltd, construction of seismograph vault.

Vancouver B C: David Mitchell Co Ltd, supply & installation of partitions, reserve area, 2nd floor, Harry Stevens Bldg, 125 East 10th Ave. *Buffalo River to Pine Point & Buffalo River Bridge N W T*: Western Construction & Lumber Co Ltd, construction of development road. *Hay River—Pine Point Development Road N W T*: Poole Construction Co Ltd, construction of three bridges. *Yellowknife N W T*: Byrnes & Hall Construction Ltd, construction of underground seismic vault & control bldg alterations.

In addition, this Department awarded 37 contracts containing the General Fair Wages Clause.

THE ST. LAWRENCE SEAWAY AUTHORITY

Allanburg, Port Robinson, Welland & Dain City Ont: Dominion Bridge Co Ltd, restoration of profiles of grooves in journals of crown sheave bearings of vertical lift bridges 11, 12, 16 & 18, Welland Canal. *Sault Ste Marie Ont*: Annett Chemicals Ltd, pressure grouting of Sault Ste Marie Canal Lock. *Thorold Ont*: Jas A White, blocking of windows, valve machinery houses, weirs 6 & 7, Welland Canal.

In addition, The St Lawrence Seaway Authority awarded four contracts containing the General Fair Wages Clause.

DEPARTMENT OF TRANSPORT

Ecum Secum N S: Stevens & Fiske Construction Ltd, construction of two dwellings, entrance road & related work. *Moncton (Scoudouc) N B*: Caledonia Construction Ltd, extension & modifications to transmitter bldg. *London Ont*: Canadian Comstock Co Ltd, installation of power supply facilities, Airport. *Malton Ont*: Inspiration Ltd, installation of entrance road & car park lighting, Toronto International Airport; Delta Parking Systems Ltd, management of car parking structure in new terminal bldg, Toronto International Airport. *Swift Rapids Ont*: Canadian Vickers Ltd, supply & installation of lock gates, valves, operating machinery, etc, for lock on Severn River. *Edmonton Alta*: Hume & Rumble Ltd, installation of entrance road & car park lighting, International Airport. *Tofino B C*: Larry Rafter, interior painting of bldgs.

In addition, this Department awarded 12 contracts containing the General Fair Wages Clause.

Decisions of Umpire

(Continued from page 226)

perform any work during the period from the week beginning January 6, 1963, to the week beginning May 19, 1963, inclusive.

Considerations and Conclusions: The employment that the claimant refused or failed to apply for on May 21, 1963, was in her usual occupation and at the prevailing rate of pay for such type of work in the area, and it has not been established that the working conditions of that particular type of work were less favourable than those recognized by good employers in the area. The employment, therefore, was suitable within the meaning of Section 59(2)(b) of the Act.

On the other hand, the reason given by the claimant for refusing to apply for the employment offered was a purely personal one and, consequently, according to the established jurisprudence, did not constitute a "good cause," within the mean-

ing of that expression in Section 59(1) of the Act, and I so decide.

With respect to the claimant's availability for work, the evidence shows clearly that she did not have the assurance, at the time she refused the job, that she would be taken back by her former employer, and that it was impossible for her, otherwise than as a privilege, to have other employers agree to the working conditions she insisted on.

For those reasons, and as the grounds on which the insurance officer has based his appeal are in accordance with the jurisprudence established by the Umpire in similar cases, I consider that the claimant was rightly disqualified for having failed to prove that she was available for work as from May 21, 1963.

I consequently decide to allow the appeal made by the insurance officer.

PRICE INDEX

Consumer Price Index, February 1964

The consumer price index (1949=100) increased 0.2 per cent to 134.5 from 134.2 between January and February. The February index was 1.8 per cent above the February 1963 index of 132.1.

Most of the increase during the month resulted from a 1.1-per-cent rise in the transportation index; but indexes for recreation and reading, tobacco and alcohol, and clothing also were higher. The housing and the health and personal care indexes were unchanged; the food index declined slightly.

The food index eased 0.1 per cent to 131.3 in February from 131.4 in January. Prices were higher for a number of foods, including milk, flour, bread and other bakery products, coffee, most fresh fruits and vegetables and a few meats. Outweighing these increases were substantially lower prices for sugar, which declined for the third consecutive month, eggs, most cuts of beef and pork, and fats.

The housing index was unchanged at 137.3 as a slight increase in the shelter component was not sufficient to move the index. In shelter, rent was unchanged but the home-ownership index increased. In the household operation component lower prices for furniture and floor coverings balanced increases for textiles and some household supplies and services.

The clothing index increased 0.1 per cent to 117.8 from 117.7 as price increases for some items of women's clothing outweighed sale price reductions for men's suits and coats. Indexes for children's wear, footwear and clothing services were unchanged.

The transportation index advanced 1.1 per cent to 142.6 from 141.1 as a result of a sharp increase in insurance rates in the automobile operation component.

The health and personal care index remained at 165.4; both the health care and personal care components were unchanged. Lower prices for some pharmaceuticals were not sufficient to move the health care index and in personal care, price changes were moderate and offsetting.

The recreation and reading index moved up 0.1 per cent to 152.3 as both the recreation and reading components increased fractionally. In recreation, prices were higher for camera film and bicycles, and price increases for newspapers in Saint John and Halifax moved the reading index.

The tobacco and alcohol index advanced 0.8 per cent to 119.4 from 118.5 as both the tobacco and the alcoholic beverages components moved higher. Scattered increases in the price of cigarettes and

cigarette tobacco occurred in several cities and liquor prices increased in Ontario, Quebec and some Atlantic provinces.

Group indexes in February 1963 were: food 129.4, housing 135.9, clothing 114.8, transportation 139.6, health and personal care 159.9, recreation and reading 148.6, and tobacco and alcohol 118.0.

City Consumer Price Indexes, Jan. 1964

Consumer price indexes (1949=100) moved up in three of the ten regional cities, went down in five and remained unchanged in two cities between December and January. Movements ranged from a decline of 0.4 per cent in Edmonton-Calgary to a rise of 0.4 per cent in Toronto.

Food indexes rose in seven cities and declined in three, ranging from a drop of 0.7 per cent in Edmonton-Calgary to a rise of 0.8 per cent in Toronto. Indexes for housing rose in three cities, fell in four and remained unchanged in three. Clothing indexes were lower in seven cities and unchanged in three. Transportation indexes rose in two cities, dropped in seven, and were unchanged in one. Health and personal care indexes were higher in five cities, lower in one and unchanged in four. The recreation and reading indexes were lower in six cities, higher in one and unchanged in three. All tobacco and alcohol indexes were unchanged.

Regional consumer price index point changes between December and January were: Edmonton-Calgary -0.5 to 127.5; Montreal -0.4 to 133.9; Halifax -0.3 to 131.6; Ottawa -0.2 to 134.6; St. John's -0.1 to 120.2*; Toronto +0.6 to 135.9; Saint John +0.3 to 134.1; Winnipeg +0.3 to 131.4. Saskatoon-Regina and Vancouver remained unchanged at 129.0 and 131.9 respectively.

Wholesale Price Index, January 1964

Canada's general wholesale index (1935-39=100) rose 0.6 per cent in January to 247.1 from 245.7 a month earlier. It was 1.7 per cent above the January 1963 index of 242.9.

Of the eight major commodity group indexes comprising the general wholesale index, six increased and two declined from December.

The vegetable products group index advanced 1.3 per cent to 236.7 from 233.6 in December, the wood products group

*On base June 1951=100.

index rose 0.7 per cent to 329.7 from 327.3, and the non-metallic minerals group index moved up 0.7 per cent to 191.7 from 190.4. The textile products group index advanced 0.6 per cent to 250.0 from 248.4, the non-ferrous metals products index 0.4 per cent to 201.1 from 200.3, and the iron products group index 0.3 per cent to 255.0 from 254.2.

Decreases occurred in the chemical products group index and in the animal products group index. The chemical products index of 188.1 was 0.4 per cent below the December index of 188.8, and the animal products group index of 247.1 was 0.2 per cent below the 247.6 a month earlier.

The index of Canadian farm product prices at terminal markets (1935-39=100) advanced 0.3 per cent, from 214.8 to 215.5, in the three-week period ended January 24. The field products index rose 0.6 per cent, from 165.8 to 166.8, and the animal products index edged up 0.2 per cent, from 263.7 to 264.2.

U.S. Consumer Price Index, January 1964

The updated and revised United States consumer price index for January was 107.7. The unrevised index remained at the December level, 107.6. Both indexes are on the 1957-59=100 base; the revised index is 1960-61 weighted.

This is the first issue of the index since its revision (L.G., Dec. 1963, p. 1138).

The unrevised index one year earlier, January 1963, was 106.0.

The main reason for the December-to-January increase was a rise in food prices, although the cost of operating an automobile rose too, because of higher gasoline prices.

British Index of Retail Prices, Dec. 1963

The British index of retail prices (Jan. 16, 1962=100) rose to 104.2 in mid-December from 104.0 in mid-November. In mid-December 1962 it was 102.3. During the month, the food group index rose to 104.6 from 104.1. The other groups changed little.

Publications Recently Received in Department of Labour Library

Industrial Relations

18. GREAT BRITAIN. COURT OF INQUIRY INTO THE CAUSES AND CIRCUMSTANCES OF A DISPUTE BETWEEN THE FORD MOTOR COMPANY, LIMITED, DAGENHAM AND MEMBERS OF THE TRADE UNIONS REPRESENTED ON THE TRADE UNION SIDE OF THE FORD NATIONAL JOINT NEGOTIATING COMMITTEE. *Report.* London, HMSO, 1963. Pp. 58.

At head of title: Industrial courts act, 1919.

The present Court of Inquiry was set up to look into a dispute arising in October 1962 between the Ford Motor Company, Limited at Dagenham, England, and the Ford National Joint Negotiating Committee representing 21 unions. Some of the issues involved in the dispute were discharge of employees whom the company found unsatisfactory, wage claims by the employees, demands by the union for changes in negotiating procedure, militant shop stewards, work standards, etc.

19. INDUSTRIAL RELATIONS COUNSELLORS, INC. *White-Collar Restiveness—a Growing Challenge.* New York, 1963. Pp. 70.

Deals with grievance procedures for white-collar employees and the means used by companies to determine the causes of individual and group dissatisfaction among salaried employees.

20. NORTHRUP, HERBERT ROOF. *Government and Labor; the Role of Government in Union-Management Relations [by] Herbert R. Northrup [and] Gordon F. Bloom.* Homewood, Ill., R.D. Irwin, 1963. Pp. 507.

An analysis of American industrial relations laws and their effect on management, unions, and the public. Deals with such laws as the Taft-Hartley Act (Labor Management Relations

Act of 1947) and the Landrum-Griffin Act (Labor-Management Reporting and Disclosure Act of 1959) and their relationship to such topics as union security, strikes, boycotts and picketing.

21. SEMINAR [ON] EFFECTIVE LABOUR RELATIONS, ASSUMPTION UNIVERSITY OF WINDSOR. 1st, OCT. 20, 1960. [*Report of Proceedings*] October 20, 1960. Windsor, 1960. Pp. 64.

Symposium sponsored by the School of Business Administration, Essex College, Assumption University of Windsor.

Contents: Unionization of Hourly and/or Salary Personnel and Proceedings before the Ontario Labour Relations Board, by Norman L. Mathews. Negotiating or renewing a Collective Agreement, by J. C. Adams. Good Administration of a Labour Agreement, by George B. Norris, Jr.

22. SEMINAR ON EFFECTIVE LABOUR RELATIONS, ASSUMPTION UNIVERSITY OF WINDSOR. 3rd, OCTOBER 18, 1961. *Report of Proceedings, October 18, 1961*. Windsor, 1961. Pp. 83.

Seminar sponsored by the School of Business Administration, Essex College, Assumption University of Windsor.

Contains talk by Dr. Roger Chartier of Laval University entitled "Some Basic Issues in Labour-Management Arbitration."

Industry—Location

The following three surveys were prepared and issued by the Industrial Development Branch, Department of Industry and Development of the Province of Alberta in Edmonton in 1963.

23. *Town of Bow Island*. Rev. March 1963. Pp. 12.

24. *Town of Didsbury*. Rev. September 1962. Pp. 14.

25. *Town of Okotoks*. Rev. October 1962. Pp. 15.

Labour Laws and Legislation

26. SASKATCHEWAN. DEPARTMENT OF LABOUR. *Saskatchewan Labour Legislation, August 1963*. Regina, 1963. Pp. 110.

27. U.S. WOMEN'S BUREAU. *State Minimum-Wage Laws*. Rev. July 1, 1963. Washington, GPO, 1963. Folder.

Labour Organization

28. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Labour Organizations in Canada, 1963*. 52nd edition. Ottawa, Queen's Printer, 1963. Pp. 98.

29. INTERNATIONAL ASSOCIATION OF MACHINISTS. *Your Union today, 1963*. Washington, 1963. Pp. 96.

A booklet in the form of a magazine commemorating the 75th anniversary of the founding of the International Association of Machinists.

30. RASKIN, A. H. *The Obsolescent Unions*. (In *Commentary*, July 1963. Pp. 18-25).

The author is Labor Correspondent of the *New York Times*.

Labouring Classes

31. GITLOW, ABRAHAM LEO. *Labor and Industrial Society*. Rev. ed. Homewood, Ill., Richard D. Irwin, 1963. Pp. 773.

A textbook on labour economics dealing with the following topics: labour organization, wages and hours, collective bargaining, employment and unemployment, and labour legislation.

32. GREAT BRITAIN. BOARD OF TRADE. *Staggered Holidays*. London, HMSO, 1963. Pp. 11.

This White Paper points out the strain on accommodation and transportation facilities when nearly 6 million people in Great Britain take their holidays at the same time. It suggests that this strain could be decreased greatly if between 1 and 1½ million people would change their holiday habits.

33. INTERNATIONAL LABOUR OFFICE. *Benefits in the Case of Industrial Accidents and Occupational Diseases*. [Part 1] Fifth item on the agenda. Geneva, 1963. Pp. 58.

At head of title: Report 5(1). International Labour Conference. 48th session, 1964.

Part 1 contains proposed texts for a Convention and a Recommendation concerning benefits in the case of industrial accidents and occupational diseases for consideration and comments by member governments.

34. INTERNATIONAL LABOUR OFFICE. *Hygiene in Commerce and Offices*. Part 1. Fourth item on the agenda. Geneva, 1963. Pp. 68.

At head of title: Report 4(1). International Labour Conference. 48th session, 1964.

Part 1 contains proposed text of a Convention and a Recommendation concerning hygiene in commerce and offices for consideration and comments by member Governments.

35. INTERSTATE CONFERENCE ON LABOR STATISTICS. 20th, ATLANTIC CITY, N.J., 1962. *Proceedings, June 19-22, 1962, Atlantic City, New Jersey*. Washington, GPO, 1963. Pp. 316.

Co-sponsored by the New Jersey Department of Labor and Industry and the U.S. Bureau of Labor Statistics.

Partial Contents: Statistics and Research in Wage Rates and Earnings. Fringe Benefit Expenditure Studies. Interarea Differences in Wage Levels. Developments in Work Injury Statistics. Some Current Issues in the Measurement of Unemployment and Labor Force. Research and Statistical Needs of the Manpower Development and Training Act of 1962.

36. SASKATCHEWAN. DEPARTMENT OF LABOUR. RESEARCH AND PLANNING BRANCH. *Population and Estimated Labour Force by Residence (Rural and Urban), Sex, Industries, and Local Office Areas of the National Employment Service, 1961*. Regina, 1963. Pp. 21.

37. U.S. OFFICE OF MANPOWER, AUTOMATION AND TRAINING. *Mobility and Worker Adaptation to Economic Change in the United States*. Rev. ed. Washington, GPO, 1963. Pp. 77.

Discusses programs undertaken by the U.S. government to deal with unemployment.

38. U.S. PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY. *Government Contract Employment, Rules and Regulations . . . effective July 22, 1961 as amended September 7, 1963*. Washington, GPO, 1963. Pp. 22.

Contains Federal U.S. "regulations relating to the promotion and insurance of equal employment opportunity on public contracts for all qualified persons without regard to race, creed, color, or national origin."

Management

39. AMERICAN MANAGEMENT ASSOCIATION. *Computer-based Management for Information and Control*. New York, c1963. Pp. 52.

Partial Contents: Information Processing and Profit Survival. The Computer and Information Processing. Management Attitudes toward an Information System. Past Shortcomings in Computer Utilization. The Decision-making Potential of Computers.

40. JUSTIN, JULES JAY. *How to preserve Management's Rights under the Labor Contract*. Ann Arbor, Bureau of Industrial Relations, University of Michigan [c1959] Pp. 33.

Discusses the following rights of management: "(1) to direct and control its work force; (2) to determine the means, methods, processes, materials, and schedules of production; (3) to utilize fully its work force and machines; and (4) to maintain employee discipline and production efficiency."

41. ARGYRIS, CHRIS. *Interpersonal Competence and Organizational Effectiveness*. With a chapter by Roger Harrison. Homewood, Ill., Dorsey Press, 1962. Pp. 292.

This is an account of a program that the author carried out among executives in a large company at the request of the president of the company. By examining their mutual personal relationships and their administrative competence, the executives were able to develop insight and understanding necessary to increase their administrative competence.

Occupations

42. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Careers in Drafting*. Rev. ed. Ottawa, Queen's Printer, 1962. Pp. 36.

Contents: Nature of the Work. Personal Qualities needed. Preparation and Training. Advancement. Working Conditions. Salaries. Seeking Employment. Number in the Occupation. Organizations. Employment Outlook.

43. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Electrical and Electronic Occupations*. Rev. ed. Ottawa, Queen's Printer, 1962. Pp. 96.

44. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Technicians in Science and Engineering*. Ottawa, Queen's Printer, 1963. Pp. 81.

Professional Workers

45. BUREAU OF SOCIAL SCIENCE RESEARCH, WASHINGTON, D.C. *Two Years after the College Degree; Work and Further Study Patterns; Report on a 1960 Survey of 1958 College Graduates*. Prepared for the National Science Foundation. Washington, GPO, 1963. Pp. 335.

Deals with post-college careers of June 1958 college graduates, including their further studies, work activities, and the continuity between studies and work. Based on a mail questionnaire answered in the spring of 1960 by more than 40,000 graduates from about 1,200 degree-granting institutions.

46. CRAIG, CHRISTINE. *The Employment of Cambridge Graduates*. Cambridge, Eng., University Press, 1963. Pp. 102.

Prepared for Cambridge University Appointments Boards.

An inquiry "into the present occupation of Cambridge graduates of 1952 and 1953, the levels of responsibility and the salaries they have attained, the satisfaction they derive from their occupations, and how they have progressed to their present positions."

47. U.S. BUREAU OF FAMILY SERVICES. *Public Social Welfare Personnel, 1960*. Washington, GPO, 1963. Pp. 140.

Provides information about employment characteristics, education and experience, salaries, personnel practices for public social welfare personnel in 1960.

Wages and Hours

48. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Wages and Hours—Primary Textiles Industry, 1962*. *Salaires et heures—industrie textile primaire, 1962*. Report (Rapport) No. 20. Ottawa, Queen's Printer, 1963. Pp. 14. Text in English and French.

49. GREAT BRITAIN. NATIONAL INCOMES COMMISSION. *Report on the Agreements of February-March 1963 in Electrical Contracting, in Heating, Ventilating and Domestic Engineering, and in Exhibition Contracting*. London, HMSO, 1963. Pp. 70.

50. MEIJ, JACOB LOUIS, Ed. *Internal Wage Structure*. Amsterdam, North-Holland Publishing Co., 1963. Pp. 343.

Contents: Portrait of a Pay Structure, by M. P. Fogarty. Wage-Structure and Organization-Structure, by J. L. Meij. Theory of Wage

Forms, by E. Kosiol. The Impact of Trade Unionism on International Wage-Structure, by H. M. Douty. External Influences and the Determination of the Internal Wage Structure, by George H. Hildebrand. Wage Structure and Administration in Soviet Industry, by Walter Galenson.

51. MILLONS, JOHN. *The Measurement of Employer Expenditures on Wage and Salary Supplements*. Ottawa, Economics and Research Branch, Canada Dept. of Labour, 1963. Pp. 24.

At head of title: Canadian Political Science Association. Conference on Statistics, Laval University, Quebec, June 8-9, 1963.

Tells something about development work on the measurement of employer expenditures on wage and salary supplements, a project being carried out by the Canadian Department of Labour in co-operation with the Dominion Bureau of Statistics.

Women—Employment

52. CANADA. WOMEN'S BUREAU. *Vocational and Technical Training for Girls at High School, Post High School and Trade School Levels of Education in Canada* [Rev. ed. Ottawa, Queen's Printer, Reprinted 1963] Pp. 96.

Outlines suitable courses for girls in Arts, business and commercial education, health and hospital occupations, home economics, technician training, teacher training, certain service occupations, and training for women in the Armed Services.

53. COOPER, JOSEPH DAVID. *A Woman's Guide to Part-Time Jobs*. [1st ed.] Garden City, N.Y., Doubleday, 1963. Pp. 312.

Discusses how and where women can find part-time work; the kind of jobs best suited for women; how to develop job opportunities; how to apply for a job; how to write job resumé; how to handle employment interviews; work opportunities for the handicapped, etc.

Youth—Employment

54. U.S. PRESIDENT'S COMMITTEE ON YOUTH EMPLOYMENT. *The Challenge of Jobless Youth; [Report and Recommendations]*. Washington, GPO] 1963. Pp. 20.

Contains 14 recommendations of a U.S. Presidential committee set up to look into the problems of unemployed youth.

55. U.S. PRESIDENT'S COMMITTEE ON YOUTH EMPLOYMENT. *Reports of Subcommittees*. June 1963. Washington, U.S. Dept. of Labor, 1963. Pp. 94.

Contains six reports: 1. Private and Public Responsibility for Developing Job Opportunities for Youth; 2. Preparing In-School Youth for Work; 3. Role of Labor, Management, and Education in Training Out-of-School Youth; 4. Counseling, Guidance, and Motivation; 5. Laws affecting Employment of Youth; and 6. Problems of Youth in Large City Slums.

Miscellaneous

56. CONFERENCE ON RESEARCH IN STATE PROGRAM DEVELOPMENT, MIAMI BEACH, FLA., 1961. *The Development of Research in Vocational Rehabilitation; Proceedings of a Conference . . . held at . . . Miami Beach, Florida, June 8-9, 1961*. [Edited by Dean Darrel Mase, College of Health Related Services, University of Florida, Gainesville, Fla.] [Washington? U.S. Office of Vocational Rehabilitation? 1962?] Pp. 126.

Conference jointly sponsored by the College of Health Related Services, University of Florida; the U.S. Office of Vocational Rehabilitation; and the Committee on Program Development of the National Council of State Directors of Vocational Rehabilitation.

57. GREAT BRITAIN. JOINT SUBCOMMITTEE ON COMMUNICATION BETWEEN DOCTORS, NURSES AND PATIENTS. *Communication between Doctors, Nurses and Patients; an Aspect of Human Relations in the Hospital Service*, prepared by a joint subcommittee of the Standing Medical and Standing Nursing Advisory Committees for the Central Health Services Council and the Minister of Health. London, HMSO, 1963. Pp. 19.

Lord Cohen of Birkenhead, chairman.

The subcommittee looked into ways of providing hospital patients and their relatives with information on their diagnosis, prognosis, and treatment.

58. TROCLET, LEON ELI. *La sécurité sociale en Belgique. Tome 1. Problèmes généraux de la sécurité sociale*. Bruxelles, Université libre, Institut de sociologie Solvay, 1961. Pp. 399.

59. U.S. BUREAU OF LABOR STATISTICS. *Impact of Office Automation in the Internal Revenue Service; a Study of the Manpower Implications during the First Stages of the Changeover*. Washington, GPO, 1963. Pp. 74.

Describes the effect on the staff of the introduction of a large-scale electronic computer system in the Atlanta, Ga., region of the U.S. Internal Revenue Service.

60. U.S. BUREAU OF THE CENSUS. *Trends in the Income of Families and Persons in the United States: 1947 to 1960*, by Herman P. Miller. Washington, GPO, 1963. Pp. 349.

Summarizes the figures on income distribution published each year since 1947 by the [U.S.] Bureau of the Census. Includes data on the distribution of families and unrelated individuals by income levels cross-classified by various characteristics such as urban-rural residence, age, sex, color, employment status, occupation and industry of family head; size of family, number of related children, etc.

⁽¹⁾Quarterly figures are entered opposite the middle month of the quarter but represent quarterly totals.

⁽²⁾Includes post office wages and salaries.

⁽³⁾Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

*Revised.

†Preliminary.

C—Employment, Hours and Earnings

Tables C-1 to C-3 are based on reports from employers having 15 or more employees; at December 1963 employers in the principal non-agricultural industries reported a total employment of 2,995,689. Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners in the reporting firms.

Sheet metal products.....	36.9	40.6	36.3	2.15	2.16	2.05	79.32	87.58	74.52
Wire and wire products.....	41.1	43.3	37.6	2.20	2.21	2.18	90.33	95.55	81.91
*Transportation equipment.....	39.9	43.9	37.9	2.37	2.40	2.23	94.52	105.50	84.86
Aircraft and parts.....	40.2	42.5	38.0	2.28	2.30	2.17	91.52	97.91	82.28
Motor vehicles.....	42.2	48.5	39.2	2.67	2.73	2.50	112.59	132.49	97.83
Motor vehicle parts and accessories.....	39.7	44.0	36.0	2.31	2.35	2.16	91.73	103.25	77.56
Railroad and rolling stock equipment.....	40.1	40.3	40.5	2.19	2.19	2.12	87.74	88.36	85.77
Shipbuilding and repairing.....	35.6	40.9	35.1	2.24	2.26	2.17	79.70	92.55	76.25
*Non-ferrous metal products.....	39.8	41.2	39.5	2.31	2.22	2.28	91.95	92.02	90.04
Aluminum products.....	39.4	42.0	37.1	2.02	2.01	1.95	79.34	84.52	72.27
Brass and copper products.....	39.5	42.6	38.6	2.13	2.16	2.06	84.29	92.08	79.49
Smelting and refining.....	40.7	40.2	40.5	2.61	2.50	2.60	106.19	100.45	105.57
*Electrical apparatus and supplies.....	38.9	41.2	37.3	1.96	1.96	1.91	76.41	80.87	71.12
Heavy electrical machinery and equipment.....	39.6	41.5	37.7	2.20	2.22	2.12	87.28	92.06	79.80
Telecommunication equipment.....	38.3	40.3	36.6	1.76	1.76	1.72	67.34	70.81	63.02
Refrigerators, vacuum cleaners and appliances.....	37.7	40.9	38.6	2.03	2.00	2.01	76.67	81.88	77.60
Wire and cable.....	38.7	42.5	38.3	2.18	2.20	2.11	84.56	93.46	80.70
Miscellaneous electrical products.....	39.2	41.5	36.4	1.87	1.87	1.80	73.15	77.42	65.39
*Non-metallic mineral products.....	39.2	43.8	39.2	2.04	2.02	1.97	79.79	88.21	77.28
Clay products.....	38.4	42.8	40.8	1.79	1.80	1.76	68.75	76.79	71.83
Glass and glass products.....	40.1	42.1	40.0	2.07	2.06	1.97	83.06	86.57	73.93
Products of petroleum and coal.....	41.8	42.0	41.7	2.84	2.76	2.82	118.67	116.22	117.37
Chemical products.....	40.2	40.8	40.1	2.23	2.20	2.16	89.88	89.79	86.69
Medicinal and pharmaceutical preparations.....	38.8	40.2	38.8	1.72	1.72	1.64	66.54	69.01	63.65
Acids, alkalis and salts.....	40.6	40.4	40.1	2.62	2.54	2.57	106.31	102.67	102.90
Miscellaneous manufacturing industries.....	38.4	41.7	37.9	1.63	1.60	1.57	62.78	66.58	59.66
Professional and scientific equipment.....	39.0	41.3	38.5	2.00	2.00	1.90	77.96	82.82	73.07
Construction	33.2	40.8	33.1	2.17	2.16	2.09	72.10	88.34	69.25
Building and general engineering.....	31.1	40.8	30.7	2.40	2.36	2.30	74.45	96.07	70.60
Highways, bridges and streets.....	37.4	41.0	37.3	1.81	1.79	1.79	67.63	73.21	66.80
Electric and motor transportation	42.3	44.1	42.1	2.05	2.04	2.01	86.85	89.73	84.47
Service	36.5	37.3	37.0	1.18	1.18	1.13	43.11	43.81	41.71
Hotels and restaurants.....	36.6	36.7	37.4	1.15	1.15	1.09	42.26	42.20	40.75
Laundries and dry cleaning plants.....	37.4	39.9	37.3	1.10	1.10	1.06	41.27	44.02	39.73

* Durable manufactured goods industries.

D—National Employment Service Statistics

Statistics presented in the following tables relate to registrations for employment and vacancies notified by employers at NES offices. These data are derived from reports prepared in National Employment Service offices and processed in the Unemployment Insurance Section, DBS. See also Technical Note, page 91, January issue.

TABLE D-1—UNFILED VACANCIES AND REGISTRATIONS FOR EMPLOYMENT

E—Unemployment Insurance

Unemployment insurance statistics are concerned with numbers of persons covered by insurance and claimants for benefit at Unemployment Insurance Commission local offices. The data are compiled in the Unemployment Insurance Section, DBS from information supplied by the UIC. For further information regarding the nature of the data see Technical Note, page 86, January issue.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Department of Labour on the basis of reports from the Unemployment Insurance Commission. The first three tables in this section cover strikes and lockouts involving six or more workers and lasting at least one working day, and strikes and lockouts lasting less than one day or involving fewer than six workers but exceeding a total of nine man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series see, page 954, October 1963 issue.

Price 35 cents.

ECONOMICS AND RESEARCH BRANCH

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). L2-2/1963
Price 50 cents.

Industrial and Geographic Distribution of Union Membership in Canada, 1963 (English or French). L31-763
Price 15 cents.

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. L2-159
Price 35 cents.

Wage Rates, Salaries and Hours of Labour. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance and service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. (Bilingual). L2-545

First year service including attractive binder with index tabs and paper-bound volume, \$9.50; service without indexed binder, \$7.00; individual tables, 15 cents. Paper-bound volume, \$1.30.

Transfer of National Employment Service

Government decides to implement one of recommendations of Gill Committee of Inquiry and transfer administration of NES to Department. Committee named to effect the transfer

The administration of the National Employment Service is to be transferred from the Unemployment Insurance Commission to the Department of Labour. Hon. Allan J. MacEachen, Minister of Labour, announced in the House at the end of February that the Government had decided to implement this recommendation of the Gill Committee of Inquiry into the Unemployment Insurance Act.

"The primary reason for this transfer is to develop an integrated approach to implementing manpower policy and programs in Canada, and to correct the negative image from which the Employment Service suffers in the public mind from its close association with the payments of benefits to the unemployed," Mr. MacEachen said in making the announcement.

"In making this decision I want to say that there is no criticism of the present administration of the National Employment Service. The Unemployment Insurance Commission has applied its best efforts within the existing administrative organization and in the light of the limitations that have existed respecting staff and facilities," he continued.

"The decision has been made rather in order to co-ordinate in the Department of Labour, as the Gill Committee recommended, those services which are concerned with the development of manpower policy as well as those concerned with the organization of the labour market."

Impact on Economy

A strong employment service could have an important impact on the national economy, the Minister pointed out. Solutions to the problems of unemployment must be found, and these in turn might well remove some of the pressing problems facing the Unemployment Insurance Commission.

"The Gill Committee, I might add, in this connection recommended a strengthening of the Unemployment Insurance Branch as well as of the National Employment Service. The Committee recognized the complexity of unemployment insurance operations, and that the Commission had been hampered by lack of a staff establishment adequate in terms of both numbers and level of training and skill."

Mr. MacEachen recalled that in the past the Department of Labour and the National Employment Service had had a common interest in and responsibility for the development and implementation of manpower and labour market programs. The Employment Service Co-ordination Act of 1919 had in fact been administered by the Department of Labour until the UIC came into being in 1941.

"Since then an active working relationship has been maintained in such areas as labour mobility, manpower utilization and adjustment, training, vocational rehabilitation, winter employment and other employment programs.

More Positive Approach

"The merging of the National Employment Service with the Department of Labour will result in a stronger and more positive approach to the solution of manpower problems in Canada," he said.

Since his statement to the House last June, he had continued to stress the importance of co-ordinated and well-balanced manpower programs, in preference to a series of disconnected efforts. The development and administration of manpower policy through a single agency, which the transfer of the NES would make possible, was necessary to this end, the Minister said.

"A close link will, of course, continue to be maintained with the administration of unemployment insurance benefits to ensure that referrals to suitable employment are made for benefit recipients.

"I might add that the National Employment Committee, which has served in an advisory capacity to the Unemployment Insurance Commission, has unanimously recommended the implementation of this particular recommendation of the Gill Committee. Employer, union and other national associations in Canada have also endorsed the desirability of the transfer."

To effect the transfer, the Government has set up a committee consisting of George Davidson, head of the Bureau of Government Organization; George Haythorne, Deputy Minister of Labour; and Laval Fortier, Chief Commissioner of the UIC.

Mr. MacEachen said that the transfer would be made without interruption of service to the public.

50 Years Ago This Month

British Columbia Royal Commission recommends establishment of system of compulsory insurance for workmen's compensation and repeal of province's existing Workmen's Compensation Act

The establishment of a system of compulsory state insurance for workmen's compensation and repeal of the existing Workmen's Compensation Act was one of the most important recommendations of a Royal Commission appointed at the end of 1912 by the Government of British Columbia to inquire into labour conditions in the province.

The report of the Commission, which was summarized in the *LABOUR GAZETTE* for April 1914, advised that a workmen's compensation board should be established to initiate and control a state insurance scheme. Such a plan, according to the recommendation, would be limited to dangerous employments, but other employers might be included on request.

The report recommended that all actions at law be abolished, that the employer be taxed a percentage of his payroll, based on the risk of his particular business, and that an employee who was off work for two weeks as a result of an accident be paid compensation from the date of the accident. The scale of compensation was left for the Legislature to decide, but it was recommended that it should be based on the earning capacity of the employee. Workmen engaged on Sunday work, the report said, should not thereby be debarred from compensation.

Another recommendation declared that private employment agencies were unsatisfactory, and advised that municipal labour bureaus should be set up in all cities of more than 10,000 to provide free service, and private agencies should be abolished.

The Commission rejected a proposal by the Trades and Labour Council for a minimum wage of \$4 a day, on the ground that it would destroy industries in the province that were competing with industries in other parts of Canada or in foreign countries. It said that such a minimum wage would throw out of employment large numbers of young girls who obtained business experience and training while employed in stores.

The advantages and disadvantages of an eight-hour day were considered, but it was held that such a legal maximum would handicap the industries of the province in competing with outside industries, and that "a measure of this kind must be national in

character to give satisfaction." The hours of shop assistants were unduly long, the Commission said, and it recommended that Saturday afternoon should be a holiday.

The commission recommended the total exclusion of all Asiatics from Canada on the ground that all races or nationalities that could not be absorbed into Canadian citizenship should be refused permanent residence in the country. It also strongly recommended that Asiatics should be prohibited from employing white people.

Other recommendations were that free textbooks should be provided in public schools, that none but British labour should be employed on government or municipal work, and that mothers' pensions should be provided.

The Commission found that trade unionism was stronger in British Columbia than in any other part of Canada, and it rejected the allegations of employers that international unionism was hostile to the interests of Canadian workers. It recommended that any employer who discriminated against a workman because he belonged to a union should be penalized. It also said that men who worked during a strike should be "protected against the use of abusive epithets."

The Montreal correspondent reported that the International Ladies' Garment Workers' Union had held its quarterly executive session in Montreal, this being the first time the meeting had been held in Canada. He said that the union wanted a reduction in hours rather than increased wages.

The Moose Jaw correspondent said that there was very little improvement in the labour situation, except that farmers had been taking on men, offering them a six-month contract at wages running from \$25 to \$40 a month, and board.

"The city has been operating a relief station here this winter and have had an average of over 60 per day using same," he went on. "Their plan was to give each man about two days' work a week, which would enable him to pay for his support in the relief station. When work on the farms was offered the men at the station, nearly all refused to go to the country, and the relief station was closed."

Trustees Remove Hal Banks from SIU Presidency

The Board of Trustees of the Maritime Transportation Unions last month removed Hal C. Banks from the presidency of the Seafarers' International Union of Canada.

Charles Turner, a former officer and still a member of the Brotherhood of the Railway and Steamship Clerks, was appointed President of the SIU until further notice.

The Board at the same time removed Mr. Banks as President of the Canadian Seafarers' Building Corporation Limited.

Announced in Commons

A statement announcing these moves by the trustees was given to the House of Commons on March 18 by Hon. Allan J. MacEachen, Minister of Labour.

"I have been informed today by the Chairman of the Board of Trustees, Hon. Mr. Justice V. L. Dryer," the Minister told the House, "that after long consideration of the affairs and interests of the Seafarers' International Union of Canada and of the maritime industry, the trustees have determined that it is not in the interests of that union, of the shipping industry of Canada nor of the public at large that Mr. H. C. Banks remain in office."

He then said that the trustees would continue their over-all direction of all five unions under the trusteeship, and that Charles H. Millard, one of the trustees, had moved into an office in the SIU of Canada Building in Montreal and would have direct supervision over the administration of the union.

"Mr. Banks's removal should not be interpreted as a move against the union. On the contrary, it was made in the interest of the union and its rank-and-file members. Our purpose is to strengthen the union—not weaken it. The trustees will move as rapidly as possible to restore the SIU to the full control of its members," said Mr. Justice Dryer.

Two other acts of the Board of Trustees last month were to tell the five maritime transportation unions under trusteeship not to put a collective agreement before their memberships until it had received the Board's approval, and to order a joint union-trustee committee to study the constitutionality of certain of the SIU's National Shipping Rules.

An earlier directive had stipulated that "no agreement is to be finally concluded and signed before being approved by the trustees" (L.G., March, p. 195). Last month's directive pointed out that once

agreement was reached between the union negotiating committee and an employer, the draft collective agreement was to be submitted to the trustees.

In the directive instructing the SIU to recommend members for the union-trustee committee, the Board said the National Shipping Rules, "to some extent at least, are in violation of the union's constitution. The net effect is that a member who obeys the National Shipping Rules can be expelled for a violation of the constitution.

"In certain respects, the rules are in conflict with existing collective agreements negotiated by the SIU," the trustees said. "The conflict forces a member either to disobey the National Shipping Rules or act in breach of a collective agreement.

"The rules are unconstitutional in that they act to create offences for which members might be expelled without constitutional justification or authority."

The rules, which at the same time comprise certain basic disciplinary rules common to most trade unions and others "which operate to restrict the rights of union members without having received the approval of a majority of the members," will remain in force for the present but subject to appeal to the trustees.

Until such time as the committee has completed its study of the rules and made recommendations for constitutional amendments, which would then be presented to the membership, any member expelled or suspended as a result of the operation of the rules may appeal to the Board of Trustees for reinstatement.

Long-Range Program

On the day that he moved to an office in the SIU Building, Trustee Charles Millard issued a statement outlining the trustees' long-range program for the administration of the SIU. It calls for:

—Re-admission of the SIU to the Canadian Labour Congress and for "cementing of international affiliations" of the union.

—An early meeting of SIU officers, with no decision having been reached as to further dismissals.

—Administration of the union through the existing union structure, with collective bargaining and other proper union activities not to be affected by the removal of Mr. Banks as President.

—Continued publication of the *Canadian Sailor*, the union's newspaper.

Monthly Salary Rates in Hospitals Subject of Department's Bulletin

The average monthly salary of nurses in Canada in October 1962 was \$312; of female X-ray technicians, \$341.

Salary rates for 13 occupations in Canadian hospitals are given in a new bulletin, *Monthly Salary Rates in Hospitals*, just published by the Economics and Research Branch of the Department of Labour. About 90,000 hospital employees are included in the 13 occupations.

The information in the bulletin is taken from returns from 828 hospitals who participated in a survey on October 1, 1962. The survey covered all hospitals with 25 beds or more.

The bulletin gives rates for Canada as a whole, for each province separately, and for each of 25 cities across the country.

The occupations covered are: female staff nurse; certified nursing auxiliary, female; uncertified nursing auxiliary, female; male orderly; male psychiatric attendant; female psychiatric aide; male X-ray technician; female X-ray technician; male cook; female cook; heavy laundry operator, male; light laundry operator, female; hospital maid.

The information in the report, which is presented in 46 tables, consists of the number of employees, and the average rate and predominant range of salary rates by occupation for each geographical unit. The rates for Canada and for each of the provinces are analyzed by type and size of hospital. That is, they are given, first, for all hospitals; then for general hospitals and for hospitals other than general. They are also given for each of three different sizes of hospitals—from 25 to 99 beds, from 100 to 499 beds, and 500 beds or more.

The publication, Catalogue No. L2-25/1962, may be obtained from the Queen's Printer, Ottawa, price 35 cents.

Current Reports Now Available On Progress of Labour Bills

The first issue in the 1964 series of current reports on labour bills and other bills of general labour interest is now available. Prepared by the Department's Legislation Branch, the reports cover the provisions of each such bill introduced in Parliament and the provincial Legislatures at the 1964 sessions, and will follow its progress to the point where it receives Royal Assent or is dropped.

At the close of the sessions the major developments of the year will be reported

in the Labour Law section of the **LABOUR GAZETTE**.

Among the bills reviewed in the first report are the Quebec Labour Code, a Saskatchewan amendment raising the school-leaving age, and four Ontario bills—The Industrial Safety Act, 1964, The Apprenticeship and Tradesmen's Qualification Act, 1964, an Act to amend the Industrial Standards Act and an Act to amend the Hours of Work and Vacations with Pay Act.

Single copies of these mimeographed reports are available from the Legislation Branch.

Issue Revised Monograph On Mining Occupations

The revised edition of *Mining Occupations*, No. 14 in the "Canadian Occupations" series of vocational guidance booklets, has been released.

Mining Occupations is a 48-page booklet dealing with a wide group of occupations in the coal, metal and mineral mining industry. Originally issued in 1951 and revised in 1957, the monograph has again been considerably revised and the contents brought up to date. In addition, a new section dealing with well drilling (oil and natural gas) has been added.

Canadian Occupations booklets are available at 25 cents a copy from the Queen's Printer, Ottawa, and the Canadian Government bookshops in Montreal, Toronto and Ottawa. Deposit copies are also available for reference in public libraries across the country.

Issue Canada Year Book, 1963-64

The 1963-64 edition of the *Canada Year Book* was released last month by the Dominion Bureau of Statistics. It is the 57th edition in the present series.

The *Canada Year Book 1963-64* contains more than 1,200 pages of textual and statistical material dealing with the physical features of the country, the machinery of Government, vital statistics, public health and welfare, education, scientific, atomic, space and industrial research, the primary resources of agriculture, forestry, mining and fisheries, manufacturing, labour, transportation and communications, domestic and foreign trade, finance, and national income and expenditure.

Among the special feature articles in the 1963-64 issue is Recent Developments in Public Technical and Vocational Education in Canada.

Old Age Assistance Recipients Increase During Fourth Quarter

The number of persons in Canada receiving assistance under the Old Age Assistance Act, and the number receiving disabled persons' allowances both increased during the fourth quarter of 1963. The number receiving blind persons' allowances decreased.

Old Age Assistance—The number of persons in Canada receiving assistance under the Old Age Assistance Act increased from 103,890 at September 30 to 104,556 at December 31, 1963.

The federal Government's contributions under the federal-provincial scheme totalled \$9,728,413.00 for the quarter, compared with \$9,513,803.30 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$317,766,553.37.

At December 31, the average monthly assistance in the provinces ranged from \$59.04 to \$70.39. At that date two provinces had adjusted their payments to the maximum rate of \$75 a month. Payments in the other provinces were based on maximum assistance of \$65 a month.

Blind Persons' Allowances—The number of blind persons in Canada receiving allowances under the Blind Persons Act decreased from 8,582 at September 30 to 8,555 at December 31, 1963.

The federal Government's contributions under the federal-provincial scheme totalled \$1,226,847.71 for the quarter, compared with \$1,210,365.78 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$44,220,706.96.

At December 31, the average monthly allowance in the provinces ranged from \$62.21 to \$72.79. At that date two provinces had adjusted their payments to the maximum rate of \$75 a month. Payments in the other provinces were based on maximum allowance of \$65 a month.

Disabled Persons' Allowances—The number of persons in Canada receiving allowances under the Disabled Persons Act increased from 50,900 at September 30 to 51,333 at December 31.

The federal Government's contributions under the federal-provincial scheme totalled \$5,028,617.61 for the quarter, compared with \$4,884,548.47 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$122,977,123.52.

At December 31, the average monthly allowance in the provinces ranged from \$63.36 to \$74.14. At that date two provinces had adjusted their payments to the maximum rate of \$75 a month. Payments in the other provinces were based on maximum allowance of \$65 a month.

Merger of Seniority Groups on CNR Opens Way for Porters' Promotion

After long negotiation between the Canadian National Railways and the Canadian Brotherhood of Railway, Transport and General Workers, and the holding of a referendum by the union, it was announced at the end of February that sleeping car porters employed by the railway, most of whom are Negroes, are now eligible to become sleeping car conductors or dining car stewards.

Hitherto, the employees concerned have been divided into two groups for seniority purposes: Group 1 comprised sleeping car conductors, stewards, chefs and waiters; Group 2 comprised porters. These two groups have now been merged into a single seniority system.

The amalgamation of the two groups had been recommended by the Human Rights Committee of the Canadian Labour Congress after the matter had been placed in the hands of the federal Department of Labour under the Fair Employment Practices Act.

The union denied any intention of discriminating, and the Joint Protective Board of the Sleeping, Dining and Parlor Car section of the CBRT approved a merger of the two groups and a combining of seniority lists. Opponents of the merger, however, won the right to a referendum on the question.

The result of the referendum was an approval of the merger. Out of 843 eligible voters, 536 abstained from casting their ballots. Of the 307 who voted, 196 voted in favour of the proposition, which was negatively worded, i.e., "not in favour" of the merger, and 111 voted against.

Under the CBRT constitution, however, all abstentions were recorded as votes against the proposition, and the final count was: 196 for and 647 against. This made about 77 per cent in favour of the merger.

All four Group 2 locals had boycotted the referendum completely, returning no ballots. A spokesman for the Group 2 locals said that the decision to do this was due to a belief that the numerical superiority of Group 1 made the defeat of the proposal to merge a foregone conclusion, and the actual outcome was a surprise to the porters.

Statistics in House Show Loss Of Professionals by Emigration

The extent of the loss to Canada through emigration of professional persons to the United States was shown in statistics tabled last month in the House of Commons. The figures, which were supplied by the U.S. Department of Justice, Immigration and Naturalization Service, were for the three years 1961-63.

The totals of such persons who left for the United States were: 1963—1,583; 1962—1,295; 1961—1,280.

Engineers made up the largest group in each of the three years. In 1963, engineers totalled 894. Of these, 103 were civil engineers, 150 were electrical, 93 mechanical, 51 aeronautical, and a group of 370 whose specialty was not given.

The second largest professional group was physicians and surgeons, who numbered 467 in 1963. Professors and instructors totalled 117 in that year, and one was classified as a college president or dean. Other groups were: biological scientists, 81; geologists and geophysicists, 43; and physicists, 27.

In Parliament Last Month

(page numbers refer to Hansard)

In the period from February 24 to March 26, a bill to establish the Canada Pension Plan was given first reading, and the Budget was brought down. The Minister of Labour announced the transfer of the National Employment Service to the Department of Labour, the removal from office by the Board of Trustees of the Maritime Transportation Unions of the President of the Seafarers' International Union of Canada, and the postponement of the date for final inspections under the winter house building incentive program.

On March 17, the Minister of National Health and Welfare moved that the House go into committee to consider the introduction of a measure, to be known as the Canada Pension Plan, to establish a comprehensive program of old age pensions in Canada payable to contributors, and to provide for the co-ordination of pensions payable under the Old Age Security Act with pensions payable under the Canada Pension Plan (p. 1161).

After lengthy debate, the Minister moved the introduction of Bill C-75, to establish a comprehensive program of old age pensions in Canada payable to contributors and survivors. The motion was agreed to and the Bill given first reading (p. 1196).

Payment of family allowances for children aged 16 and 17 years who are attending full-time educational or training courses was proposed in the budget statement made by the Minister of Finance on March 16 (p. 981).

Other measures proposed included: reduction of income tax exemption in respect of a child of 16 or 17 years for whom family allowance is being paid, from \$550 to \$470 in 1964 and to \$300 in 1965 and subsequent years; deduction from taxable income of tuition fees in excess of \$25 a year paid by a taxpayer who is a student at an approved educational institution; and extension of the period during which new manufacturing and processing businesses must be established in designated areas of slow growth in order to be eligible for tax incentives.

On February 24, the Minister of Labour announced (p. 157) that the Government had decided to implement the recommendation of the Gill Committee of Inquiry into the Unemployment Insurance Act that the administration of the National Employment Service should be transferred from the Unemployment Insurance Commission to the Department of Labour (see page 258, this issue).

On March 18, the Minister of Labour announced that the board of trustees of the maritime transportation unions had removed Hal Banks from his post as president of the Seafarers' International Union of Canada and had named Charles Turner, a former officer and still a member of the Brotherhood of Railway and Steamship Clerks, as president in his place (p. 1203).

On March 26, the Minister of Labour announced that final inspections under the winter house building incentive program would take place on April 15 rather than on March 31 as previously planned (p. 1492.) He said that the extension was being made because of shortages of labour and materials "arising from the success of the program itself."

On February 27, the Minister of Labour confirmed a report that the Railway Association of Canada had given notice to terminate the Canadian Railway Board of Adjustment No. 1 (p. 288). He added, "The termination may have undesirable consequences if alternative procedures are not found, but I think the Railway Association of Canada is giving consideration to this question now."

On March 2, the Minister of Labour moved consideration in committee of the introduction of a measure to amend the Merchant Seamen Compensation Act respecting compensation on injury or death (p. 391).

Federal-Provincial Labour Conference

Minister of Labour invites provincial Ministers and Deputy Ministers of Labour to Conference—first like it since 1946—to discuss matters of both federal and provincial interest

For the first time since 1946, provincial Ministers and Deputy Ministers of Labour last month convened in Ottawa at the invitation of the federal Minister of Labour. Nine of the ten provincial Ministers and eight of the provincial Deputy Ministers were present.

The conference, on March 9 and 10, was called by Hon. Allan J. MacEachen, federal Minister of Labour, to acquaint the provincial Ministers with what the federal Government was doing or planning to do in the labour field and to obtain the provincial Ministers' thoughts on matters of mutual interest. It was not the purpose of the conference to come to any agreement or make any decisions.

The agenda comprised six items: apprenticeship, the Manpower Consultative Service, labour standards, labour-management co-operation, ILO Conventions, and emergency manpower planning.

The federal Department of Labour prepared a background paper on each item. These were sent to the provincial Ministers in advance of the conference. At the meeting, each item was introduced by the federal official having responsibility for the subject, after which there was a general discussion.

Mr. MacEachen presided throughout the conference, except for a short time on March 10 when George V. Haythorne, Deputy Minister, took the chair.

In his opening remarks, Mr. MacEachen recalled that the last such conference, in October 1946, was concerned with the War-time Relations Regulations, with means for continuing in peacetime the implementation of certain principles, such as union recognition, the right of employees to organize, the legal recognition of collective bargaining rights, and the prohibition of unfair practices by employers and unions.

The agenda for this year's conference, the Minister said, "covers only part of the functions and responsibilities of a department of labour today."

Then he said:

I should like to make it clear, at the outset, that the background papers we have prepared are intended to serve as a basis for discussion rather than as an indication of any final position as far as we are concerned in the federal Department of Labour.

In each case, we have attempted to give you the background of the problems, current developments and proposals for discussion.

Apprenticeship and Training in Industry

After the Minister's welcoming remarks, C. Ross Ford, Director of the Technical and Vocational Training Branch, introduced the first item on the agenda, "Apprenticeship and Training in Industry."

At the end of March, he pointed out, federal-provincial co-operation in the apprenticeship method of developing the occupational competence of the labour force will have been in existence for 20 years. It was in 1944 that the federal Government entered into the first apprenticeship agreements with the provinces. The first ten-year agreements were renewed for a second period of ten years.

A number of the Canadian programs developed during the 20 years "are second to none on this continent," Dr. Ford said. The development of interprovincial standards has been a most important achievement, and has "contributed materially to the mobility of our labour force, and to the development of acceptable devices for identifying those workers who have full occupational competence."

But probably the most far-reaching development has been the change of concepts: apprenticeship is no longer an isolated device for developing the productive capacities for the labour force; it is, instead, considered a device that must be inter-related with all the other manpower training programs.

During the period the concept of the Department of Labour, too, has changed.

It views the whole problem of manpower development as being one total problem involving the development of occupational competence, vertically from that of the operator to the technician and horizontally through all occupational fields where training services are required. In this total spectrum, apprenticeship has developed as one of the effective devices for developing competencies requiring high levels of manipulative skill.

In spite of these achievements and changes, Dr. Ford continued, there remain some unsolved problems:

—Inadequate numbers of skilled workers are being trained in Canada.

—The apprenticeship programs are inadequately co-ordinated and integrated with other manpower development and training programs.

—The apprenticeship program still lends itself to restrictions by vested interests.

—Dominion-Wide, Ottawa.

FEDERAL-PROVINCIAL LABOUR CONFERENCE, MARCH 1964

The federal and provincial Ministers of Labour: Seated (left to right): Hon. C. H. Ballam, Newfoundland; Hon. C. C. Williams, Saskatchewan; Hon. Allan J. MacEachen, the federal Minister; Hon. Carrier Fortin, Quebec; Hon. H. L. Rowntree, Ontario. Standing: Hon. Raymond Reiersen, Alberta; Hon. N. L. Ferguson, Nova Scotia; Hon. Obie Baizley, Manitoba; Hon. L. R. Peterson, British Columbia; Hon. K. J. Webber, New Brunswick. Hon. H. W. Wedge, Prince Edward Island, was not present at the conference.

—Unrealistic entrance requirements are imposed in a number of the designated trades.

—There continues to be an over-emphasis on controls, restrictions and regulations in the apprenticeship program.

—Apprenticeship programs have not been developed at anything like the rate at which industry is growing.

Then he turned to the second part of the topic: training in industry. On this subject the background paper said:

In spite of the great expansion in school facilities, it is considered important, if our manpower requirements are to be met, that industry becomes more involved in training and in providing facilities within industry for training. Provision for government assistance to industries providing such facilities is made in the proposed Apprenticeship Agreements and in amendments to Program 4 of the Technical and Vocational Training Agreements.

The federal Government is prepared to pay 75 per cent of any provincial contribution made to industry to reimburse industry for expenditures made on approved apprenticeship programs operated by industry in co-operation with the Province.

The federal Government is prepared also to extend this 75-per-cent contribution to two other areas of training which, together with the long-range supply of skilled craftsmen, are

considered to be critical to the development of a competent labour force: the academic upgrading of employed workers through our Basic Training for Skill Development Program and the retraining of workers in danger of layoff because of technological or other industrial or economic change.

Dr. Ford then commented on a draft of the proposed renewal of the Apprenticeship Training Agreement that had previously been distributed to the conference participants.

Manpower Consultative Service

Dr. W. R. Dymond, Assistant Deputy Minister of Labour, introduced the subject, "The Problem of Manpower Adaptation and the Establishment of a Manpower Consultative Service." This is a new field and one without guidelines, he said.

The problem is that while industry is laying off workers out the back door it is bringing in the front door a new work force with the qualifications, skills and training it needs, Dr. Dymond asserted. And all that some unions are trying to do is win severance pay and other concessions.

The Department's background paper declared that technological and other

Provincial Participants

The provincial Ministers of Labour who attended the federal-provincial labour conference were:

Hon. Raymond Reiersen, Alberta; Hon. L. R. Peterson, Q.C., British Columbia; Hon. Obie Baizley, Manitoba; Hon. K. J. Webber, New Brunswick; Hon. C. H. Ballam, Newfoundland; Hon. N. L. Ferguson, Q.C., Nova Scotia; Hon. H. L. Rowntree, Q.C., Ontario; Hon. Carrier Fortin, Quebec; Hon. C. C. Williams, Saskatchewan.

The Deputy Ministers were:

K. A. Pugh, Alberta; W. H. Sands, British Columbia; N. D. Cochrane, Manitoba; G. C. Duclos, New Brunswick; G. T. Dyer, Newfoundland; R. E. Anderson, Nova Scotia; Brig. W. W. Reid, Prince Edward Island; and H. S. Elkin, Saskatchewan. James B. Metzler, Ontario Deputy Minister and Gérard Tremblay, Quebec Deputy Minister, were unable to attend.

changes in industry, now a feature of economic growth in Canada, imposed on the worker a need to adjust. "Very few workers, in fact, escape making any work adjustments during their working lives."

But not all workers faced with recurring changes in their work are capable of making, or willing to make the appropriate adjustment without some form of assistance.

Dr. Dymond pointed out that trends in employment for some occupational groups can change direction over as short a period as a decade, e.g., mining and logging occupations, and that trends in requirements for specific occupations can change even more rapidly, e.g., machine operators.

"An even more volatile occupation has been that of electronic data processing programmer. In the short space of about five years, this occupation came into existence, grew rapidly, and is now declining."

It is at the plant or company level that these changes require work and staff adjustments, and can lead to major problems of manpower adjustment. There are three kinds of adjustment: (1) those resulting from changes that require only that workers be regrouped, shifted around or laid off; (2) those resulting from alterations so significant that the skills of most of the workers are no longer usable; and (3) those resulting from changes that occur slowly over time, so that after a period, it becomes obvious that the skills required of the workers exceed those which they have.

The various kinds of adjustments create many problems: the need to raise basic education levels, to provide retraining or

further training, to move workers to jobs elsewhere in the community or in another part of the country. In many cases the action required to deal with such problems is beyond the capability of the employer and the worker, and requires the assistance of government agencies such as the employment service, assistance in financing movement to other areas, and in retraining workers for new occupations.

It is to help cope with these problems at the plant or company level that the federal Department of Labour is establishing the Manpower Consultative Service.

The Service will follow these principles:

—Plans must be developed well in advance of a change; this requires advance assessment of the manpower consequences of industrial change.

—The adjustment process must be based on a foundation of facts, not emotion.

—Where there is a union, research and the plans that flow from it should be developed jointly by management and the union.

—The use of existing government services that can help with manpower adjustments should be co-ordinated at the plant level.

—There must be some unbiased group that industry can consult.

The Manpower Consultative Service will have at its disposal three financial incentives:

—A *research incentive* of one-half the costs incurred in assessing the manpower effects of technological changes and in the planning and development (but not the implementation) of a program of adjustment.

—A *mobility incentive* of one-half the costs incurred in moving workers displaced by industrial change—and their dependants—to other communities where employment is available.

—A *retraining incentive*. An amendment to the Technical and Vocational Training Assistance Act allows the federal Government to reimburse a province for 75 per cent of the costs that an employer incurs in retraining workers under a manpower adjustment program.

"We will try to achieve internal mobility, i.e., within a company or plant, before we move workers elsewhere," Dr. Dymond told the conference. "One of the benefits we hope to achieve is to get management and labour to think seriously about manpower planning and about what can be done to avoid layoffs."

In conclusion, the background paper stated:

The Manpower Consultative Service will seek to work closely with employers, unions and other federal and provincial government

agencies. Provincial Department of Labour conciliation and other officers may learn of situations in which the Manpower Consultative Service might assist in the development of plans to meet the adverse impact of technological change on manpower.

Provincial government training agencies will be able to play a significant role in assisting the development and financing of retraining programs for workers who would be laid off if retraining were not developed.

Sharing of the cost of transportation and moving expenses of workers laid off can be done under agreements with provincial governments or employers or both.

Labour Standards

The next agenda item, "Labour Standards," was introduced by Gordon G. Cushing, Assistant Deputy Minister of Labour.

The Speech from the Throne in February (L.G., March, p. 186) had said that the federal Government was considering new federal labour standards legislation to apply to industries in federal jurisdiction. The background paper said this proposal was a logical further step in the regulation of the working conditions of employees in federal industries that had begun with the enactment of legislation dealing with industrial disputes. The Industrial Relations and Disputes Investigation Act of 1948 had been followed by the Canada Fair Employment Practices Act of 1953, the Female Employees Equal Pay Act, 1956, and the Annual Vacations Act, 1958.

Every province has accepted as a principle that the government of the province has a responsibility to establish minimum conditions under which people will have to work: all have minimum wage laws, all have some legislation dealing with hours of work, most set standards for annual vacations, and most have regulated some aspects of pay practice in regard to public holidays.

"The activity in regard to labour standards legislation in all the provinces in the past two years indicates recognition of the need at the present time for appropriate minimum labour standards," the paper stated.

"It is now proposed to introduce federal legislation on the two fundamental conditions of employment, minimum wages and hours of work, to revise the annual vacation standard, and to establish the principle of paid statutory holidays and fix a rule regarding payment for work performed on such days.

"The absence of federal legislation in three of these fields has created problems for both the federal and provincial Departments of Labour because it has left an area of employment where neither federal nor provincial authorities were assuming responsibility."

Comparisons, 1946 and 1964

Hon. Allan MacEachen pointed out that three provincial deputy ministers who attended the 1946 federal-provincial labour conference were present at the 1964 conference: R. E. Anderson of Nova Scotia, N. D. Cochrane of Manitoba, and K. A. Pugh of Alberta. But only one Minister, Hon. C. C. Williams of Saskatchewan.

In 1946, he noted, Prince Edward Island did not have a department of labour and Newfoundland was not yet a "partner in Confederation." Alberta was represented at the 1946 conference but the Alberta Department of Labour was not established until 1948.

In October 1946, date of the previous conference, the civilian labour force was less than five million; today it was close to seven million, the Minister said. The Gross National Product was less than \$12 million in 1946, more than \$43 million today.

Standards have been established for many federal employees through collective bargaining, but other employees are not organized and some of these are not likely to be organized.

Mr. Cushing pointed out that in May 1963, there were about 556,000 employees—about 10 per cent of the non-agricultural labour force—under federal jurisdiction. This total was made up of about 359,000 employees of private industry, Crown corporations and other public agencies, and about 197,000 federal civil servants.

On minimum wages the background paper pointed out that the industries and classes of employment in federal jurisdiction are among the high-wage industries and classifications.

On hours of work, the conclusions reached from an examination of current practice in Canada conform closely to the ILO Recommendation of 1962.

On statutory holidays, the examination showed that 56 per cent of the employees now get eight or more each year, another 37 per cent get seven and the remainder, six days or less.

On vacations with pay, Mr. Cushing reported that 56 per cent of the employees in federal jurisdiction receive two weeks after one year of employment, and 37 per cent receive three weeks after one year. The present Annual Vacations Act provides for one week of paid vacation after the first year of employment and two weeks thereafter.

Labour-Management Co-operation

The subject of "Labour-Management Co-operation" was introduced by Bernard Wilson, Director of the Industrial Relations Branch. The federal Government's Labour-Management Co-operation Service is a unit of that Branch.

The Department's background paper reviewed early examples of labour-management consultation in Canada and the origins of the Labour-Management Co-operation Service, postwar evolution of labour-management committees, and recent developments.

Then it declared that "a more intensive effort is needed to bring together all parties and agencies interested in the development of labour-management co-operation—union groups at all levels, employers and management groups at all levels, provincial authorities, federal authorities, provincial and federal economic councils, and other bodies."

Some provincial Departments of Labour have expressed a desire to participate in the promotion of labour-management co-operation, the paper reported. At the 1963 conference of the Canadian Association of Administrators of Labour Legislation, the federal Department of Labour had raised the possibility of provincial departments taking an active part in this field. "It welcomes wider participation since it is clear that 11 government bodies plus active support from employer, union and other groups should be able to promote more intensive co-operation in the future."

Ratification of ILO Conventions

John Mainwaring, Director of the International Labour Affairs Branch, introduced "Ratification of ILO Conventions."

The background paper recalled that since its inception in 1919, the International Labour Organization has adopted 119 Conventions, of which Canada had ratified 20. "The ratification of ILO Conventions is a matter of increasing importance to countries such as Canada which have relatively high living standards and a high regard for human rights in the field of labour and employment. It demonstrates our support for an international system whose main object is to raise standards of living and to foster human freedom in all countries."

One reason Canada has not ratified more, although one of the founding members of the ILO and one of the ten states of chief industrial importance, is that the subject matter of many Conventions falls within both federal and provincial jurisdiction, and satisfactory arrangements have not yet been made in Canada for dealing with such Con-

ventions. It would help Canada improve its record internationally if a procedure could be developed for dealing with Conventions that fall partly within federal and partly within provincial jurisdiction, the paper stated.

The ratification of a Convention, like that of any treaty between states, is the exclusive function of the Government of Canada, but before ratifying, the government must assure itself that the obligation incurred in ratifying will in fact be performed. It must receive assurance from all provinces that each will perform the obligation so far as it falls within its authority.

The background paper recalled that the federal Government had recently consulted with the provinces with a view to ratifying the Convention on Discrimination in Employment, and that all provinces had expressed their full accord.

The paper then discussed ways in which the federal Department of Labour might in future seek the provinces' views in respect of both existing and new ILO Conventions. Annexed to the background paper was a "Possible Procedure for Dealing with ILO Conventions in Canada."

Emergency Manpower Planning

The last item on the agenda, "Emergency Manpower Planning," was introduced by George E. Simmons, in charge of emergency planning for the Department of Labour.

The emergence of nuclear capabilities does not permit the type of development of controls over manpower such as occurred in Canada during the Second World War, the background paper said.

The federal Minister of Labour has been assigned responsibility for the development of emergency plans for the mobilization and effective use of most civilian manpower.

The National Employment Service is responsible for developing an organization and system for the allocation of key manpower to employment and for the collection of information on the quantity and quality of other members of the labour force. The Department is required to develop programs for the control of labour-management relations and conditions of work and wages, and for the listing of essential activities and critical occupations.

The background paper contained a proposal that, during an emergency, administration of emergency programs in the areas of labour-management relations, conditions of work, and wages and salaries be shared by the provincial Departments of Labour.

(Continued on page 325)

Multiple Jobholding in Canada

Four surveys in 1960-61 found that "moonlighters" in Canada averaged 158,000, or 2.6 per cent of all employed persons

During the period covered by four different surveys, in October 1960 and January, April and July 1961, an average of 158,000 Canadians—2.6 per cent of all employed persons in the country—held two, or more, jobs at the same time.

The Department of Labour has published a report, *Multiple Jobholding in Canada*, based on information obtained at three-month intervals through the monthly Labour Force Survey conducted by the Dominion Bureau of Statistics. The information was collected by means of a special questionnaire attached to the regular one.

To minimize the effect of seasonal variations and to improve the reliability of the estimates, the data from the four surveys were averaged. The report was prepared by the Economics and Research Branch.

The percentage of Canadian multiple jobholders is low by comparison with figures issued during the past five years by the United States Bureau of Labor Statistics, which show that multiple jobholders in the United States constitute from 4 to 5 per cent of the working force.

Fewer than half—69,000, or 1.1 per cent of all employed persons—of the multiple jobholders in Canada held two or more jobs as a paid employee. The rest were engaged in some form of self-employment or unpaid family work in addition to their paid job. Included in the latter group were 15,000 persons who had no paid jobs at all.

Characteristics of Multiple Jobholders

The highest rate of multiple jobholding was found in agriculture. One out of every six "moonlighters" had his main occupation in farming.

The survey shows that besides farmers, more construction workers than workers in the other main industry groups hold more than one job.

"An average of about 4.1 per cent of farmers and 3.5 per cent of construction workers reported a second job during the survey weeks, compared with the over-all rate of 2.6 per cent."

The amount of time worked each week in the secondary job was generally not large. Fewer than 30 per cent of multiple jobholders worked as many as 15 hours a week in their secondary jobs, and the great majority of these worked less than 25 hours. Only an insignificant number were working at two full-time jobs, and about a quarter of the multiple jobholders had no full-time work at all.

About three quarters of multiple jobholders were married men, "indicating that a good deal of multiple jobholding is associated with financial responsibilities," the report says.

"Two postwar developments have facilitated the holding of more than one job at the same time. One is the increasing prevalence of shift work, and the other is the change in industrial distribution as a result of the rapid expansion of the service-producing industries."

One piece of information brought out by the survey showed that the word "moonlighting" to describe the practice of holding more than one job at a time was more picturesque than accurate. "One of the principal findings of the surveys was that, contrary to popular opinion, most multiple jobholders did not work at night on their secondary jobs," the report says. "In response to a question on whether the hours worked on secondary jobs were mostly at night (after supper) or during the day, only 36 per cent (44,000) reported that they worked mostly at night.

"Data on work schedules of secondary jobs revealed also that it was much more common to work at a secondary job on weekdays rather than on weekends. An estimated 100,000, or nearly 83 per cent of the multiple jobholders whose work patterns could be established, worked at their secondary jobs mostly on weekdays, compared with only 21,000 who worked mostly on weekends."

The number of persons engaged in "moonlighting" in the United States rose by 600,000 to a total of 3,900,000 between May 1962 and May 1963, the U.S. Bureau of Labor Statistics reports. This was the first increase of any importance since 1956, but the Bureau cannot explain the cause of the sudden increase.

The Bureau points out, however, that notwithstanding the rise, the number of persons with more than one job amounted to only 5.7 per cent of the total number employed.

Moonlighting is reported to be most common among those whose main jobs were in agriculture and public administration (especially among postal workers). But the largest numbers of moonlighters was found in manufacturing, and in the trade or service industries. About two thirds of the moonlighters had their second jobs in service and retail establishments, where part-time work is most common.

CNTU's Annual Brief to Cabinet

Suggests setting-up of permanent Commons committee to study question of Canada's relations with United States and urges Government to invest "huge amounts" in industrial development

The Confederation of National Trade Unions made its annual submission of legislative and administrative recommendations to the federal Cabinet on February 19. In the brief, the CNTU dealt with subjects ranging from Canada-United States relations to unemployment insurance.

On Canadian-American relations the memorandum declared that "all Canadians who want an independent Canada will agree with the CNTU that we must break free from a great number of economic, financial and social bonds before we can boast such a status.

"The problem is of such importance that the CNTU is suggesting the setting-up of a permanent committee of the House of Commons to study and follow closely the question of our relations with the United States."

The brief acknowledged that Canadian attitudes on this subject were contradictory.

While we would like to reduce the hold of the American economy upon our own, the requirements of our development tend toward the opposite direction. Our need for capital, our external trade, our balance of payments drive us into the arms of our neighbour to the south, thus breaking, right from their beginning, our efforts to ensure greater economic independence.

The CNTU was convinced, it said, that the attitude of Canadians could change provided the Government clearly stated the objectives at stake and fully accepted its role. The governments of the country, both federal and provincial, "must compensate for the deficiencies of private enterprise and invest huge amounts in the industrial development of the country."

The Canadian market could support a highly efficient industrial machine if it were not divided between many producers. It is not that the wages paid to Canadian workers are too high but that the anarchy of our industrial organization has an adverse effect on productivity and hence on costs, the CNTU said.

"Even if we have to revise our combines legislation to facilitate the integration of certain enterprises, we should not hesitate to do so, provided the consumer is well protected."

The brief was read by Vice-President Jean-Robert Gauthier, substituting for General Secretary Marcel Pepin, who was absent because of illness.

The Government's reply to the brief was made chiefly by Prime Minister Lester B. Pearson, and by Hon. Allan J. MacEachen, Minister of Labour. A brief reply in French was also given by Hon. Maurice Sauvé, Minister of Forestry.

Dependence on U.S.

We are too dependent on the United States in the development of industrial technology, the CNTU asserted, as the owners of subsidiaries in Canada have preferred to carry out the necessary research in their parent organizations. With regard to research, Canada fits into the category of the less industrially developed nations who spend less than 1 per cent of their gross national revenue on research.

Drawing attention to its own independent Canadian character, the CNTU asserted that this, and its growth in membership, "clearly indicates that an independent labour movement, entirely free to make its own decisions, is possible in Canada."

Unemployment

As in previous briefs, the CNTU urged the Government to take action on the unemployment problem. Winter works programs advertised by governments each fall created only a few thousand jobs, and this was not sufficient. "In Canada, for a great number of citizens, there is no such thing as the right to work," the CNTU asserted. "In some western countries, the social evil of unemployment is unknown," it added, declaring that full employment and social security should be a matter of top concern for the state.

Referring to the federal Government's Older Worker Employment and Training Incentive Program, the CNTU called it "another partial measure," but urged its support in the hope it may become part of a more inclusive program.

Cost of Living

Emphasizing that the consumer price index had "reached an unprecedented high of 134.2 (December 1963)," the CNTU again recommended the setting-up of a price arbitration system. This was not price control, the memorandum explained, but rather a procedure whereby producers of goods and services would, before making them, have to justify contemplated price increases "before public opinion."

The CNTU added that the report of the Royal Commission on Price Spreads of Food Products had shown that the cost of "a basket of provisions, including correlative services," had increased by 84 per cent between 1949 and 1958. If the cost for improvement in quality of products were deducted, an increase of 43 per cent would still remain, the CNTU asserted.

The Confederation suggested to the federal and provincial Governments that price arbitration courts be created that would judge the grounds on which price increases would be requested, and that would have wide powers of inquiry.

Housing

Pointing out the need for more adequate housing and the importance of spurring growth in home ownership, the Confederation urged that a "rational housing policy" be adopted, one providing for low-priced construction, urban renewal, and the elimination of land speculation. Describing the Winter House Building Incentive Program (L.G., Oct. 1963, p. 862) as a partial measure, it nevertheless recommended that the program should be repeated, and urged that the premium—now \$500—be raised.

The CNTU decried the 11-per-cent federal tax on building materials, stating that it is "a hard blow on the workers who constitute the majority of taxpayers"—it tends to increase the cost of living as well as the rate of unemployment.

Consumer Credit

Quoting usurious interest rates of 16 per cent to 58 per cent for consumer credit, the CNTU charged that the federal Small Loans Act, adopted in 1939 and revised in 1956, did not prevent money lenders from practising usury. It therefore proposed that the following measures be taken immediately:

1. The loan limit under the Act should be raised from \$1,500 to \$5,000, because many lenders are circumventing the intent of the Act by persuading borrowers to take amounts slightly over the maximum specified.

2. The rate of interest should be limited to a "reasonable level," and this should not exceed 8 per cent.

3. The Superintendent of Insurance should be provided with the required means of action to enforce respect of the law and impose penalties.

Economic Council of Canada

The CNTU expressed satisfaction with the formation of the Economic Council of Canada, a step that it had requested for a number of years. It declared its support for the Council "in all its attempts to correct the deficiencies of our economy in order to create and maintain full employment."

Co-operation should be established between the Council and the provincial and regional councils that are being set up, to avoid, duplication and financial waste, the brief recommended.

Unemployment Insurance

The CNTU referred to the brief it had presented to the Committee of Inquiry into the Unemployment Insurance Act, in which it had "suggested an original formula which would permit the Unemployment Insurance Fund to meet the needs." It said the basic principles inspiring the brief were:

—The present unemployment insurance law is based, to a great extent, on notions that may be valid for private insurance but which are deficient in the case of social insurance.

—The jobless are not responsible for unemployment; they are victims. Their plight is caused by the economy as a whole, and as a result, the whole population should assume the cost of their unemployment.

—The Unemployment Insurance Fund should therefore be replenished through a general tax. All categories of workers should be covered, and the "obligation to contribute would be universal."

—At present, the Fund does not provide sufficient guarantees of solvency.

—The law should provide the right to have stamps affixed in the unemployment insurance book of any building trade worker in the employ of some particular person.

—The boards of referees should be increased in number according to the needs of regions, to obviate costly journeys for appellants.

Other Recommendations

The Confederation also recommended "a drastic cut in our military budget" as the "only solution" to the financial difficulties of the federal and provincial Governments; it suggested an "initial phase of negotiation" between Ottawa and Quebec to define existing problems, chiefly as to fiscal powers and revenue-sharing; and, to provide the provinces with the revenue for education, which is a provincial responsibility, it requested that the federal Government "surrender the required sources of revenue to the provinces."

Among other proposals and requests were: Canada should negotiate a non-nuclear role in its defence commitments; the Royal Commission on Bilingualism and Biculturalism should be supported by all political parties and its task facilitated now that it has started to operate; and a "distinctive Canadian flag" should be adopted as soon as possible.

The CNTU declared its full support of assistance to developing countries.

The Government Reply

The Prime Minister was the first to reply to the CNTU submission. On the requests aimed at achieving greater Canadian independence in Canadian-United States economic relations, and at meeting the external pressures on Canada's economy, Mr. Pearson said that dealing with such pressures was all the more difficult when they were "friendly" pressures.

"We have had a very interesting illustration of the difficulty of dealing with it," he said, "when the United States Government, without Canada being very much in their mind, put into effect an interest equalization tax."

The Prime Minister agreed on the importance of research. He noted that in 1939 "we spent only \$800,000 on research. This year we will be spending \$150 million."

On unemployment he said "we have made some important progress in recent months in reducing unemployment but—as an instance of how difficult it is to keep Canada going ahead as a single country, economically—figures are down in some parts but not very far down in others." Mr. Pearson said some of the CNTU's proposals on the subject were "very much to the point."

On defence, the Prime Minister reminded the delegation that "we are part of a democratic coalition for collective defence." He believed that the United Nations should be the alliance for defence in the world but because at the moment it is not, Canada is a member of an Atlantic Alliance.

"I hope we will continue to play our part in that alliance," he said. "I would hate to see that alliance broken up; I would love to see the development of conditions in the world that would make that kind of alliance unnecessary, so that we can fall back on the world alliance at the United Nations."

Minister of Labour

When Hon. Allan MacEachen, Minister of Labour, spoke in reply to the brief, he began by complimenting the Confederation on its growth in membership. He said he hoped the Government could get unemployment down as fast as the CNTU was getting its membership up.

Since a year ago, there had been a significant change for the better in the unemployment situation, he went on. Unemployment was now, in large part, a regional and seasonal problem, and the reduction in unemployment has been due, in part, to seasonally directed programs, for example, the winter house building incentive program. The Minister then reviewed briefly some of the other programs administered by his department.

The response to the Older Worker Employment and Training Incentive Program had not been as great as he would have liked but he expected that by the end of the year the program would have yielded a great deal of information about an approach to the problem of the older worker.

The federal labour code, which had just been proposed in the Speech from the Throne (L.G., March, p. 186), he considered "quite an important step." Its effects would go beyond the relatively small number of employees in federal jurisdiction who would be most directly affected.

In connection with the membership of the Economic Council of Canada, the Minister stated that having labour representation on public bodies was a matter of Government policy, and that it would be continued.

Hon. Maurice Sauvé, recently appointed Minister of Forestry, who was at one time a member of a CNTU federation, also spoke briefly.

Accident Compensation Officer Goes to Africa in Aid Program

Stanley Leeson, Chief of the Accident Compensation Division, Accident Prevention and Compensation Branch, was sent to Basutoland and Swaziland last month as part of Canada's Special Commonwealth Africa Aid Program (SCAAP). His assignment from the External Aid Office was to conduct an on-the-spot review of workmen's compensation with the object of recommending improvements in it.

Basutoland and Swaziland are considering introducing a scheme of workmen's

compensation similar to those in force in various provinces of Canada, the External Aid Office explained.

In addition to sending Mr. Leeson, Canada has provided three Canadian instructors for the University of Basutoland, the Bechuanaland Protectorate and Swaziland, and has brought students from Basutoland and Swaziland to Canada. Sixteen students from these countries are currently in Canada.

Industrial Fatalities in Canada during Fourth Quarter of 1963

Deaths from industrial accidents during 1963's fourth quarter numbered 247, of which largest number were in transportation

Up to the end of February, the Department of Labour had received reports on 247* industrial fatalities that occurred in Canada during the fourth quarter of 1963.

During the previous quarter, 333 fatalities were recorded, including 51 in a supplementary list. In the fourth quarter of the previous year, 318 fatalities were recorded.

During the fourth quarter of 1963, there were three accidents that each resulted in the deaths of three or more persons. On November 29, seven crew members were killed in the crash of a TCA DC-8 north-west of Montreal. On December 20, six seamen aboard the 175-ton Newfoundland coastal freighter *Mary Pauline* were drowned when the vessel sank between Nova Scotia and Newfoundland. On December 8, four sailors went down with their ship, the *Fort Albany*, after a collision in thick fog with the Norwegian freighter *Procyon* five miles west of Sorel, Que.

The largest number of fatalities, 53, occurred in the transportation, storage and communication industry. Of the 53 fatalities, 17 were in local and highway transportation, 16 in water transportation, 9 in railway transportation, 8 in air transportation and 3 in storage industry.

In the construction industry, 22 of the 49 fatalities were in miscellaneous construction, 18 in buildings and structures and 9 in highways and bridges.

The 45 fatalities that were recorded in the manufacturing industry during the fourth quarter were distributed as follows: 13 in iron and steel products; 6 each in transportation equipment and miscellaneous

manufacturing industries; 5 in food and beverages; 4 each in wood products and in non-metallic mineral products; 2 each in paper products and chemical products; and 1 each in tobacco products, leather products and electrical apparatus and supplies.

In the mining and quarrying industry, 14 of the 30 fatalities were in metal mining, 13 in non-metal mining and quarrying and 3 in coal mining.

In the logging industry, 28 fatalities were recorded.

The remaining 42 fatalities that occurred during the quarter were distributed as follows: 20 in the service industry; 10 in trade; and 4 each in agriculture, fishing and trapping, and public utilities.

Analysis by Cause

An analysis of the 247 fatalities during the fourth quarter of 1963 shows that 66 (27 per cent) were the results of collisions, derailments, wrecks, etc.; 32 of these involved automobiles and trucks, 12 involved railways, 10 involved aircraft, and 6 each involved tractors and loadmobiles, and watercraft.

Fifty-seven fatalities were caused by falls and slips; all but nine were the result of falls from different levels.

Fifty fatalities were the result of being struck by different objects. Of these, 5 were caused by moving vehicles; 7 were the result of being struck by tools, machinery, cranes, etc.; and 38 were in the category "other objects" such as falling trees and limbs, and landslides or cave-ins.

Forty-two fatalities were the results of being caught in, on or between; most of them involved tractors, loadmobiles, and mine and quarry cars.

The remaining 32 fatalities were distributed as follows: 11 were caused by inhalations, asphyxations, asphyxiations and

(Continued on page 325)

* See tables H-1 and H-2 at back of this issue. The number of fatalities that occur during a quarter is usually greater than the figures quoted in the quarterly articles. Information on accidents that are not reported in time for inclusion is recorded in supplementary lists, and statistics are amended accordingly.

The industrial fatalities recorded in this quarterly article are fatal accidents that involved persons gainfully employed and that occurred during the course of, or arose out of, their employment, including deaths that resulted from industrial diseases. Statistics on industrial fatalities are compiled by the Economics and Research Branch from reports received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners and certain other official sources. Newspaper reports are used to supplement these. For industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible, therefore, that coverage in such industries as agriculture, fishing and trapping, and certain of the service groups is not as complete as in industries covered by compensation legislation. Similarly, a small number of traffic accidents that are in fact industrial may be omitted from the Department's records because of lack of information in press reports.

EMPLOYMENT REVIEW

Employment and Unemployment, March

Employment advanced 50,000 to a total of 6,273,000 in March. The increase was well above the average of the past several years.

The labour force rose by 39,000 to 6,729,000 in March.

Unemployment declined slightly during the month to 456,000.

Unemployment in March represented 6.8 per cent of the labour force, compared with 8.4 per cent in March 1963 and 8.7 per cent in March 1962. In February it was 7.0. Seasonally adjusted, the March unemployment rate was 4.6 per cent, down from 4.7 per cent in February and 5.8 per cent in March 1963.

Compared with a year earlier, employment was up by 310,000, or 5.2 per cent, and unemployment was down 93,000. The labour force was 217,000, or 3.3 per cent, higher than in March 1963.

Employment

Non-farm employment showed a strong improvement between February and March, rising by 63,000 to 5,716,000. In most previous years, non-farm employment has decreased slightly over this period. Farm employment declined by an estimated 13,000 during the month.

Compared with a year earlier, non-farm employment was up by 309,000, or 5.7 per cent. About two thirds of the total increase

occurred in manufacturing and service. Agricultural employment was unchanged from the year before.

In March 1964, an estimated 4,415,000 men were employed, some 149,000, or 3.5 per cent more than a year earlier. This compares with an average annual rate of increase of 1.4 per cent during the past five years. Employment of women continued at a high level.

Employment was higher than a year ago in all regions. The increases ranged from 2.1 per cent in the Prairies to 7.2 per cent in Quebec.

Unemployment

Unemployment declined slightly between February and March. A small change is usual at this period. The March estimate of 456,000 was 93,000 lower than a year earlier, almost all of the decrease being among men.

Of the 456,000 unemployed, some 277,000, or about 60 per cent of the total, had been unemployed for three months or less. An estimated 121,000 had been seeking work for four to six months, and 58,000 for seven months or more. Persons unemployed four months or more accounted for a somewhat smaller proportion of the total than a year earlier.

Unemployment rates were lower than a year earlier in all regions.

LABOUR MARKET CONDITIONS

Labour Market Areas	Labour Surplus				Approximate Balance		Labour Shortage

Rehabilitation Seminar for Social Workers

The Saskatchewan Co-ordinating Council on Rehabilitation sponsors and Federal-Provincial Vocational Rehabilitation Program finances seminar at University of Saskatchewan

A Rehabilitation and Social Work Seminar sponsored by the Saskatchewan Co-ordinating Council on Rehabilitation was held February 12 to 14 at the University of Saskatchewan, Saskatoon. Financed through the Federal-Provincial Vocational Rehabilitation Program, the seminar was designed to help the participants relate the principles and practices of rehabilitation to their work in the larger field of social welfare.

Vocational and occupational training and job placement formed an important part of the program. Sessions and papers on these subjects were given by R. J. Reynolds, Principal of the Saskatchewan Technical Institute at Moose Jaw, and C. Pepin of the Special Services Section of the National Employment Service. Miss Valerie Sims, Civilian Rehabilitation, Department of Labour, Ottawa, acted as discussion leader in one of the sessions.

One of the main points that recurred in discussion was the importance of adequate preparation of the disabled for employment. A wide variety of services, such as physical restoration, psychological testing, counselling, work evaluation, and vocational training, may have to be drawn upon before an individual is ready for work. The close co-operation of a number of disciplines—medicine, social work, education, employment placement and labour market specialists—is necessary if the disabled or handicapped person is to receive the services he requires in a co-ordinated manner. The participants at the conference were made aware of the very many factors which contribute to a person's employability and which determine whether he can be self-supporting.

ILO Sponsors Seminar

A three-week seminar that will have far-reaching effects on the future of rehabilitation in the countries of the Near and Middle East and North Africa was held recently in Athens. Organized by the International Labour Office on the general theme of "Vocational Rehabilitation of the Disabled," the training course was attended by representatives from Greece, Iran, Jordan, Kuwait, Lebanon, Libya, Malta, Saudi Arabia, Tunisia, Turkey, United Arab Republic and Algeria.

The program included lectures by international experts who demonstrated the need for and importance of vocational rehabilitation. Aspects of the subject covered included: teamwork in vocational rehabilitation, industrial rehabilitation, organization and work of rehabilitation centres, techniques of placement and locating employment opportunities, sheltered employment, and the special problems of the blind, deaf and tuberculous.

Another series of lectures dealt with the administrative and legal basis for vocational rehabilitation programs, the role to be played by non-governmental organizations, and the training of personnel.

Directing and organizing the seminar were A. A. Bennett, Director of the Vocational Rehabilitation Section of the Manpower Division of the ILO, Geneva; H. A. Jones, Employment Exchange Manager of the British Ministry of Labour; and T. O. Aaen, ILO expert, Director of the States Rehabilitation Institute, Oslo.

Spyros S. Theologos, Director General of the Institute for Research and Development of Vocational Rehabilitation of Athens, and liaison officer for the Greek Government in matters of rehabilitation, represented the World Veterans Federation, and was one of the lecturers.

Council on Social Work Education

The implications of social, economic and technological change for human well-being was the theme of the 12th annual meeting of the Council on Social Work Education, held in Toronto on January 29 to February 1. The Council is the planning and standard-setting body for social-work education in the United States and Canada.

Some 1,000 educators and other interested persons in the social welfare field attended, from schools, various organizations, and public and voluntary services throughout North America. The implications for the education of social workers of the rapid social changes taking place in the 1960s were reflected in such questions as, "To what purpose are we educating?"; "Who are we educating?"; and "How are we educating?"

The schools of social work are grappling with the problem of how best to prepare their students for work in a society where the impact of rapid change is being experienced to an unprecedented degree.

U.S. National Council on the Aging

Employment problems of older workers in age of automation and rapid technological change given attention at annual meeting

The employment problems of older workers in this age of automation and rapid technological advance received prominent attention at the 13th Annual Meeting of the National Council on the Aging, held in Chicago in February.

Hon. W. Willard Wirtz, United States Secretary of Labor, gave the key note address, "Technological Changes: Their Implications for the Aging." Mr. Wirtz urged the most rapid development of automation and technology as the ultimate means of producing jobs. He expressed the opinion that American society was dependent upon technology and automation for full employment and that they would create as many jobs as they destroyed. He warned, however, that there would be serious disruption unless full account was taken of the human problems that are presented as this process develops.

The Secretary of Labor pointed out that within 24 hours from the time that he was speaking at least 4,000 people in the United States would be pushed aside from their jobs by machines—that was how fast the disruption was taking place. He thought, however, there would be other jobs for virtually all these people if they were educated, if they had the kind of skill that could be transferred to another job or if they were retrained. He conceded that the new job may be in another place with a different employer and that a different skill may be involved.

The older worker was discussed by Leon Greenberg, Assistant Commissioner, Bureau of Labor Statistics, U.S. Department of Labor, in a talk on "Productivity and Technological Developments in the United States."

Mr. Greenberg stressed the ability of older workers to be successfully retrained and gave as an example the fact that 11 per cent of some 33,300 trainees enrolled under the U.S. Government Manpower Development and Training Act up to October 31, 1963, had been 45 years of age and over. He thought these 3,600 older trainees represented a brighter side of the older worker picture and stated there was no reason why this ratio could not be increased. He emphasized the fact that age, by itself, was neither a reliable nor useful

criterion for determining the suitability of workers for training or retraining.

Juanita M. Kreps, Ph.D., Associate Professor of Economics, Duke University, and Vice Chairman, Committee on Employment and Retirement, National Council on Aging, spoke on "Automation, Affluence and Poverty." Dr. Kreps stressed the need to focus attention directly on over-all solutions rather than on piecemeal measures.

Dr. Kreps pointed out that a service badly needed was education and training. She suggested that a willingness to buy this service on a broad scale would provide a stimulus to demand, which would give a tremendous boost to the economy. What would be equally important would be real hope that workers' skills would be upgraded in accordance with the demands of new technology.

Until the nation was prepared to buy such training and education, no amount of increased demand would eliminate unemployment for the simple reason that the untrained worker today was not only unemployed, but was unemployable, she believed.

A talk that attracted a great deal of comment was the proposal by Edwin F. Shelley, Vice-President, United States Industries, Inc., and Director, National Council on Aging, to create full employment in this age of automation. To meet national requirements of *full employment and lifelong education* Mr. Shelley proposed the establishment of a national system of earned educational leave. He pointed out that under the present five-per cent unemployment in the United States, one year of paid educational leave could be earned by every worker after 20 years of employment. This five per cent of the labor force would be transferred from employment to education. The transfer each year of five per cent of the employed from work to education would create a labor shortage throughout the economy, would encourage an upward movement of employed workers to fill the voids in their respective companies, and would open up a number of jobs for the presently unemployed. He suggested that it might be found that the retraining and mobility problems would melt away before the great pressure of a labour shortage and the motivation of an assured job.

Women in the Labour Force in 1963

Almost two million girls and women were in the labour force in 1963. This is 4 per cent more than there were in 1962. Women workers now form 28 per cent of the total labour force

There were an estimated 1,858,000 girls and women in the labour force in 1963, an increase of 69,000 (4 per cent) over the number in 1962. This increase reflected the trend of the last decade, during which time the female labour force increased 56 per cent. In 1953, the 1,191,000 women workers represented 22 per cent of the total labour force; in 1963, women comprised 28 per cent.

The labour force includes all persons 14 years of age and over who (1) did any work for pay, (2) were seeking work, or (3) were temporarily laid off or on holidays during the week of the labour force survey.

The statistics in this article are estimates taken from *The Labour Force: Special Tables*, a publication of the Dominion Bureau of Statistics, and the figures are 12-month averages.

Among the factors that appear to be responsible for the relative increase in women workers are the shift in labour demand from goods-producing to service industries and the increased demand for clerical workers. These are fields in which women traditionally outnumber men.

Furthermore, technological change and advancement have not been confined to the factory and office; many labour-saving devices have enabled the housewife to perform household tasks in a minimum of time. More married women are, therefore, entering the labour force.

Most women in the labour force were in two regions: Ontario had 38.6 per cent and Quebec 27.2; the Prairie region had 17.1 per cent, British Columbia 9.1 and the Atlantic region 8.0 per cent of the total.

Age distribution—Almost one-third of all the girls and women in the labour force were under 25 years of age; a larger proportion, 39 per cent, were between the ages of 25 and 44; and 29 per cent were 45 years of age or more.

Participation by age—Three of every ten women were in the labour force. The highest participation rate (the labour force as a percentage of the population in the age group) was in the 20- to 24-year range: fully half of those 20 to 24 years of age were in the labour force. Between the ages of 25 to 34 years, the rate dipped to 29.2 per cent.

Relatively higher proportions, 31.7 per cent and 34.7 per cent, represent respectively the women who were from 35 to 44 and 45 to 54 years of age. For those who were from 55 to 64, the participation rate dropped to about one in every four, 24.7 per cent; and for women 65 years and over, to 5.8 per cent. The participation rate for teen-agers was similar to that for the total female labour force: one in three.

Marital status—Almost half, 49.7 per cent, of all the women in the labour force were married; 40.2 per cent were single, and 10.1 per cent were widowed, separated or divorced.

Of all the married women in the population, 23 of every 100 were in the labour force; for the widowed, separated or divorced the ratio was 28 in 100. Of those who were single, 14 years of age and over, 49 of every 100 were in the labour force.

Hours of work—Most women, 59.2 per cent, worked between 35 and 44 hours a week. The average work week of the remainder of the employed women was as follows: 45 hours and more, 12.0 per cent; 25 to 34 hours, 10.3 per cent; 15 to 24 hours, 7.5 per cent; 1 to 14 hours, 5.7 per cent.

The percentage of women workers who state that they usually work less than 35 hours a week has been gradually increasing and reached 20 per cent of the total in 1963.

Occupational groups—The types of work that women do tend to be clustered in five broad occupational groups. Clerical work accounts for 30 per cent; personal services, 23 per cent; professional services, 15 per cent; manufacturing, 11 per cent; and commercial occupations, 10 per cent.

The concentration of women is further accentuated by the fact that more than half the persons employed in clerical and service occupations are women. In 1963, women made up 64.2 per cent of all clerical workers in comparison with 58.1 per cent in 1953. Of persons employed in the service occupations, 57.3 per cent were women, up from 52.3 per cent in 1963.

The proportion of employed women in professional services increased slightly over the past decade while that in manufacturing decreased. Commercial occupations, on the other hand, remained relatively stable.

COLLECTIVE BARGAINING REVIEW

Part III—Settlements Reached During March 1964

(A summary of major terms on the basis of information immediately available. Figures on the number of employees covered are approximate.)

ASSN. PATRONALE DES INSTITUTIONS RELIGIEUSES ET DES FABRIQUES PAROISSIALES DU DIOCESE DE ST-HYACINTHE, ST-HYACINTHE AND OTHER CENTRES, QUE.—SERVICE EMPLOYEES' FEDERATION (CNTU): 2-yr. agreement covering 1,000 empl.—new wage scale to be similar to new Montreal area rates (less \$1 a wk.) negotiated between Service Employees' Federation and several Montreal hospitals; as of Jan. 1, 1964 reduction in work week for office empl. from 40 to 37½ hrs., with same take-home pay; eff. Jan. 1, 1965 reduction in work week for certain occupations from 40 to 37½ hrs., with same take-home pay; 2 wks. vacation after 1 yr. (formerly after 3 yrs.), 3 wks. after 6 yrs. (formerly after 8 yrs.), 4 wks. after 8 yrs. (new provision); improvement in seniority provision; agreement to expire Dec. 31, 1965.

CDN. STEEL FOUNDRIES, MONTREAL, QUE.—STEEL AND FOUNDRY WKRS. (IND.): 2-yr. agreement covering 810 empl.—depending on classification, wage increases from 4¢ to 8¢ an hr. eff. March 28, 1964, and increases from 3¢ to 5¢ an hr. eff. Oct. 4, 1965; payment of lump sum of \$60 in lieu of retroactivity, prorated on number of wks. worked between Oct. 4, 1963 and March 28, 1964; increase in premium for hot and dirty work; agreement to expire Oct. 3, 1965.

CNR, EASTERN CANADA (EXCL. NFLD.)—LOCOMOTIVE ENGINEERS (IND.): 3-yr. agreement covering 1,600 empl.—yard engineers to receive increases of 1.5% eff. May 1, 1964, 3.5% eff. May 1, 1965, 7% eff. May 1, 1966; road engineers to receive increases of 3% eff. May 1, 1964, 0.5% eff. May 1, 1965; agreement to expire April 30, 1967.

CNR, SYSTEM-WIDE—LOCOMOTIVE FIREMEN AND ENGINEERS (AFL-CIO/CLC): 3-yr. agreement covering 2,700 empl.—empl. in passenger and hostling services to receive increases of 1% eff. May 1, 1964, 1% eff. Dec. 1, 1964, 1% eff. May 1, 1965, 2% eff. Dec. 1, 1965, 1½% eff. Dec. 1, 1966; empl. in freight and yard services to receive increases of 1% eff. May 1, 1964, 1% eff. Dec. 1, 1964, 1% eff. May 1, 1965, 1% eff. Dec. 1, 1965; agreement to expire April 30, 1967.

EMPLOYEURS FORESTIERS DE LA GATINEAU, QUE.—CARPENTERS (LUMBER AND SAWMILL WKRS.) (AFL-CIO/CLC): 2-yr. agreement covering 1,800 empl.—general wage increases of approximately 3% eff. May 1, 1964 and approximately 3% eff. May 1, 1965; in lieu of paid holidays empl. to receive 1½% of gross earnings (formerly 1%) for first yr. of agreement, and 2% for second yr.; agreement to expire March 31, 1966.

EMPLOYEURS FORESTIERS DE LA MAURICIE, QUE.—CARPENTERS (LUMBER AND SAWMILL WKRS.) (AFL-CIO/CLC): 2-yr. agreement covering 3,000 empl.—general wage increases of approximately 3% eff. May 1, 1964 and approximately 3% eff. May 1, 1965; in lieu of paid holidays empl. to receive 1½% of gross earnings (formerly 1%) for first yr. of agreement, and 2% for second yr.; agreement to expire March 14, 1966.

PAGE-HERSEY TUBES, WELLAND, ONT.—U.E. (IND.): 2-yr. agreement covering 850 empl.—wage increases of 6¢ an hr. retroactive to Nov. 1, 1963, 6¢ an hr. eff. Nov. 1, 1964; in 1964, 4 wks. vacation after 22 yrs. of service (formerly after 24 yrs.); in 1965, 4 wks. vacation after 20 yrs.; agreement to expire Oct. 31, 1965.

TORONTO WESTERN HOSPITAL, TORONTO, ONT.—BUILDING SERVICE EMPL. (AFL-CIO/CLC): 2-yr. agreement covering 700 employees.—wage increases of \$9 per mo. eff. March 1, 1964, \$9 per mo. eff. March 1, 1965; new union security provision; agreement to expire Feb. 28, 1966.

VANCOUVER GENERAL HOSPITAL, VANCOUVER, B.C.—PUBLIC EMPL. (CLC): 3-yr. agreement covering 1,700 empl.—wage increases of 3% retroactive to Jan. 6, 1964, 2½% eff. Jan. 5, 1965, 3% eff. Jan. 4, 1966; as of Jan. 6, 1964, 4 wks. vacation after 12 yrs. of service (formerly after 15 yrs.); commencing Jan. 4, 1965, 4 wks. after 11 yrs.; commencing Jan. 4, 1966, 4 wks. after 10 yrs.; agreement to expire Jan. 4, 1967.

Pay Increases in 1963 for 10 Million British Workers Average 4 Per Cent

More than 10,000,000 manual workers in Britain obtained an average increase of more than 4 per cent in their basic weekly wage rates last year, it was learned from a survey by the British Ministry of Labour of wage movements and hours of work during 1963.

The survey covered some 13,500,000 manual workers whose wages and working conditions are settled by collective bargaining, either through voluntary machinery or statutory bodies. Office employees and the like were not covered by the survey.

All told nearly 10,000,000 manual workers received an average increase of 4.3 per cent in weekly wage rates. But nearly 700,000 workers gained a reduction in the length of their standard work-week without a reduction in pay; the effect of this was to lift the average increase in hourly wage rates to 4.5 per cent.

The movement toward shorter hours slowed down somewhat when compared with earlier years. In 1962, nearly 1,400,000 workers won a shorter work-week; in 1961, nearly 5,750,000; and in 1960, more than 6,750,000.

A new feature in Britain's industrial negotiations last year was the development of long-term agreements extending over two years or more.

South Africa Withdraws from ILO

"Accumulation of hostile acts against South Africa" given as reason for voluntary and unilateral secession from world body

The Government of the Republic of South Africa last month sent to ILO Director-General David A. Morse a communication informing him of that country's intention to withdraw from the International Labour Organization.

The South African Minister of Labour, Senator E. E. Trollip, told Parliament that the Government had been influenced in its decision by "an accumulation of hostile acts against South Africa."

He cited the invalidation of the credentials of the South African Worker Delegates to the 1963 International Labour Conference, the subsequent exclusion by the ILO Governing Body of the South African worker delegation from certain industrial committees, and the adoption in February (L.G., March, p. 208) of Governing Body resolutions outlining a proposed program for the elimination of *apartheid*.

The Minister said that this latter action "represented a clear case of deliberate interference in South Africa's domestic affairs and a complete disregard of the benevolence of the Government's racial policies."

The South African note to the ILO Director-General said: "It has now become abundantly clear that the International Labour Organization will refuse to proceed with its proper task and duties, as a non-political international organization, while South Africa remains a member. It is obvious, also, that it is not intended to retain South Africa as a member functioning fully within its rights.

"The time has, therefore, come, more particularly as a result of the recent meeting of the Governing Body, for the Republic of South Africa to decide whether it should retire of its own free will or allow itself to be forced out with the resultant harm this will bring to an organization which has already lost so much of its status. The Republic has chosen to leave the Organization now so as to give it an opportunity of attempting to return to the objectives for which it was established, if that be possible after the unhappy and unnecessary incursion into political recrimination between, and persecution of, fellow members.

"In deciding to withdraw from the Organization, South Africa considers itself justified in acting on the same unilateral basis adopted by the Organization in its

attempts to curtail or terminate South Africa's membership. In view of the denial to South Africa of its basic rights as a member, the South African Government accordingly does not consider itself bound by the provisions of the Constitution in terms of which two years' notice of termination of membership must be given to the Organization, and as from the date of notification to the Director-General of South Africa's withdrawal, all obligations towards the Organization will be regarded as having been terminated, including the obligation with regard to South Africa's financial contribution to the Organization for the current year."

At the end of the month, David A. Morse, ILO Director-General, addressed a reply to the Minister of Foreign Affairs of the Republic of South Africa. In his letter Mr. Morse said that the ILO constitution provided:

No Member of the International Labour Organization may withdraw from the Organization without giving notice of its intention so to do to the Director-General of the International Labour Office. Such notice shall take effect two years after the date of its reception by the Director-General subject to the Member having at that time fulfilled all financial obligations arising out of its membership. When a Member has ratified any international labour Convention, such withdrawal shall not affect the continued validity for the period provided for in the Convention of all obligations arising thereunder or relating thereto.

"South Africa will accordingly," Mr. Morse wrote, "subject to having at that time fulfilled all financial obligations arising out of its membership, cease to be a Member of the International Labour Organization on 11 March 1966.

"Until that date the undertaking of the Government of South Africa, contained in the instrument of ratification of the constitution of the International Labour Organization . . . remains binding upon the Government of the Republic of South Africa.

"Your statement will be communicated, together with this reply, to the Members of the Organization and to the Governing Body of the International Labour Office, and it will be for the Governing Body and the Conference to determine what action they would now wish to take in respect of the proposals which are pending before the Conference and the terms of your communication"

TEAMWORK in INDUSTRY

Purchasing agents are usually thought of as people concerned with buying the wide variety of materials that industry needs to turn out a finished product. For R. H. "Bob" McGahey, purchasing agent for the Toronto, Ont., division of Weston Bakeries Limited, this is only half the job. The other half involves labour-management relations—for Mr. McGahey has been chairman of the plant's Labour-Management Co-operation Committee for the past six years. The LMCC was founded in April 1956.

During a recent interview with visitors from the federal Department of Labour, Mr. McGahey emphasized the importance of informality in the conduct of Labour-management relations at the plant level. "Our regular meetings are characterized by informality," he explained. "In eight years of getting together to discuss our everyday problems, we've learned that we get more information exchanged this way. A stiff, formal approach tends to bottle people up. A great deal more can be achieved if the atmosphere is relaxed and friendly."

He further emphasized that employee members—particularly new appointees to a committee—should periodically be reassured by management that their opinions will "not be taken down and used against them." Sure of where they stand, employees will feel free to be honestly critical about problems appearing on the agenda.

"These uninhibited exchanges have helped to promote trust and respect between labour and management in this plant," continued Mr. McGahey. "I wouldn't undersell the value of our LMCC to anyone. We haven't had a strike in the 12 or 13 years I've been here—and the record goes back before that. The spirit developed in our committee meetings deserves a share of the credit."

Mr. McGahey thinks that plant rumours can be treated more quickly and thoroughly by a labour-management committee than by any other means a company might devise. "You can have no idea how many rumours are circulating throughout your plant or office until you set up a committee," he said recently. "Until you provide the means for gathering them, and give employees the op-

portunity to report them, they will remain underground, damaging your relations in general and morale in particular."

Mr. McGahey reported that LMCC meetings at Weston's have been singularly successful at dispelling rumours and reducing wild talk. Once the subject began appearing regularly on the meeting agenda for discussion, rumours began declining rapidly in number and influence. "Don't underestimate their variety and subject matter," he warned. "We discovered our people discussing layoffs and the closing down of departments when there wasn't a shred of a reason for such talk."

Control of rumours alone makes a labour-management committee worth having, for an atmosphere of uncertainty in a plant can undermine employee morale and cut heavily into production efficiency, he added. "In our experience there is *nothing* as effective as a labour-management committee when it comes to dealing with the many problems that show up in the day-to-day manufacturing process. They are problems not covered by collective bargaining agreements. In its handling of these outside areas, our LMCC has become a useful and vital partner in production."

One of the Toronto plant's most irritating problems was language differences. There are many persons of Italian, Yugoslav and German descent among the 282-member staff, and until language difficulties were straightened out at LMCC meetings, the plant ran into obstacles almost daily. Today, employee representatives for the various ethnic groups attend LMCC meetings, whenever necessary, for briefing and active participation. "When they go back onto the plant floor," said Mr. McGahey, "they take L-M policy with them—and the right words to put it across."

Among the union representatives serving on the LMCC at Weston Bakeries is Cyril Roberts, shop steward for Local 461, Retail, Wholesale and Department Store Union (AFL-CIO/CLC). "We've been able to get a lot of things done on the job since we organized our committee in 1956," reported Mr. Roberts. "Most important, the Labour-Management Co-operation Committee has educated our people to come forward with their ideas. They have helped to improve things all around—working conditions, good housekeeping, waste, rumours, safety and other problems have all been brought home to each one of us."

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for three days during February. The Board issued seven certificates designating bargaining agents, granted one application for revocation of certification, ordered four representation votes, and rejected three applications for certification. During the month the Board received eight applications for certification, one application for revocation of certification, one request under Section 61(2) of the Act for review of an earlier decision, and allowed the withdrawal of one such request.

Applications for Certification Granted

1. The Order of Railroad Telegraphers, System Division No. 43, and System Division No. 1, on behalf of various system employees in Canada except Newfoundland employed by the Canadian National Railways (L.G., July 1963, p. 601). The Canadian Brotherhood of Railway, Transport and General Workers, and The Commercial Telegraphers' Union, had intervened.

2. The Order of Railroad Telegraphers, System Division No. 85, System Division No. 43, and System Division No. 1, on behalf of a unit of employees of the Canadian National Railways in its Telecommunications Department (L.G., July 1963, p. 601). The Commercial Telegraphers' Union had intervened.

3. The Order of Railroad Telegraphers, System Division No. 85, on behalf of a unit of agents, dispatchers, and operators, employed by the Canadian National Railways in Newfoundland (L.G., July 1963, p. 601). The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, and The Commercial Telegraphers' Union, had intervened.

4. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of the Canadian National Railways in Newfoundland in various clerical and other classifications (L.G., Aug. 1963, p. 693). The Order of Railroad Telegraphers had intervened.

5. Maritime Airline Pilots Association, on behalf of a unit of pilots and co-pilots employed by Eastern Provincial Airways (1963) Limited, Gander, Nfld. (L.G., Mar.,

p. 214). The Canadian Air Line Pilots' Association had intervened.

6. Maritime Airline Pilots Association on behalf of a unit of operations personnel employed by Eastern Provincial Airways (1963) Limited, Gander, Nfld. (L.G., Mar., p. 214).

7. Association of Radio and Television Employees of Canada, on behalf of a unit of employees of Western Manitoba Broadcasters Limited, Brandon, Man. (CKX, CKX-TV, CKX-FM) (see "Applications for Certification Received," below).

Representation Votes Ordered

1. National Syndicate of the Employees of Ogilvie Flour Mills Co. Ltd. (CNTU), applicant, The Ogilvie Flour Mills Company, Limited, Montreal, Que., respondent, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, intervener. The Board directed that the names of both the applicant and the intervener appear on the ballot (L.G., Feb., p. 127) (Returning Officer: Miss M.-P. Bigras) (one vote ordered, see item 4, below).

2. National Syndicate of the Employees of Robin Hood Flour Mills Ltd. (CNTU), applicant, Robin Hood Flour Mills Limited, Montreal, Que., respondent, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, intervener. The Board directed that the names of both the applicant and the intervener appear on the ballot (L.G., Feb., p. 128) (Returning Officer: Miss M.-P. Bigras) (one vote ordered, see item 5, below).

3. National Union of Operating Engineers of Canada, Local 14850, District 50, United Mine Workers of America, applicant, Robin Hood Flour Mills Limited, Montreal, Que., respondent (stationary engineers), and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, intervener. The Board directed that the names of both the applicant and the intervener appear on the ballot (L.G., Feb., p. 128) (Returning Officer: Miss M.-P. Bigras) (see item 5, below).

4. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, applicant, The Ogilvie

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

Flour Mills Company, Limited, Montreal, Que., respondent, and the National Syndicate of the Employees of Ogilvie Flour Mills Co. Ltd. (CNTU), intervener. The Board directed that the names of both the applicant and the intervener appear on the ballot (L.G., Feb., p. 128) (Returning Officer: Miss M.-P. Bigras) (one vote ordered, see item 1, above).

5. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, applicant, Robin Hood Flour Mills Limited, Montreal, Que., respondent, and the National Syndicate of the Employees of Robin Hood Flour Mills Ltd. (CNTU), intervener. The Board directed that the names of both the applicant and intervener appear on the ballot (L.G., Feb., p. 128) (Returning Officer: Miss M.-P. Bigras) (one vote ordered, see item 2, above). The National Union of Operating Engineers of Canada, Local 14850, District 50, United Mine Workers

of America, had intervened on behalf of the stationary engineers employed by the respondent. The Board excluded the stationary engineers from the voting unit in this case and ordered a separate vote in the application for certification made by Local 14850 on behalf of the stationary engineers (see item 3, above).

6. Ian Byers, *et al.*, applicants, Kitchener-Waterloo Broadcasting Company Limited, Kitchener, Ont., respondent, and the National Association of Broadcast Employees and Technicians, respondent. The Board ordered a vote following consideration of an application for revocation of certification (L.G., Jan. p. 39) (Returning Officer: A. B. Whitfield).

Applications for Certification Rejected

1. Transport Drivers, Warehousemen and Helpers' Union, Local 106, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of four officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the province of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; five officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

America, applicant, and Transport D'Anjou Inc., Rivière-du-Loup, Que., respondent (L.G., March, p. 213). The application was rejected for the reason that it was not supported by a majority of the employees affected in the representation vote conducted by the Board.

2 and 3. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, applicant and intervener, the National Syndicate of the Employees of Maple Leaf Mills Limited (CNTU), applicant and intervener, and Maple Leaf Mills Limited, Montreal, Que., respondent (Henri Julien Warehouse) (L.G., Feb., p. 129). The applications were rejected for the reason that the Board considered on the evidence that it lacks jurisdiction because the operations carried on by the company at its Henri Julien Warehouse are not such as to bring it within the scope of Section 53(g) of the Industrial Relations and Disputes Investigation Act, not being such as to be deemed to be "a work for the general advantage of Canada" within the meaning of Section 45 of the Canadian Wheat Board Act or Section 174 of the Canada Grain Act.

Applications for Certification Received

1. Association of Radio and Television Employees of Canada, on behalf of a unit of employees of Western Manitoba Broadcasters Limited, Brandon, Man. (see "Applications for Certification Granted," above) (Investigating Officer: J. S. Gunn).

2. National Association of Broadcast Employees and Technicians, on behalf of a unit of employees of Central Ontario Television Limited, Kitchener, Ont. (CKCO-TV and CKKW) (Investigating Officer: A. B. Whitfield).

3. International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers Local 938, General Truck Drivers, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of A and H Express Lines Ltd., Port Credit, Ont. (Investigating Officer: A. B. Whitfield).

4. International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 977, on behalf of a unit of grain handlers, employed by Cargill Grain Company Limited, Baie Comeau, Que. (Investigating Officer: R. L. Fournier).

5. International Longshoremen's Association Local 1842 and Local 1869, on behalf of a unit of stevedores and freight checkers employed at the port of Kingston, Ont., by Eastern Canada Stevedoring Company Limited, Toronto, Ont. (Investigating Officer: A. B. Whitfield).

6. The National Syndicate of the Employees of the Trucking Industry Saguenay Lake St. John Inc., Tremblay Express Section, applicant, on behalf of a unit of employees of Tremblay Express Limited, Jonquièrre, Que. (Investigating Officer: R. L. Fournier).

7. Local 501, International Longshoremen's and Warehousemen's Union, Canadian Area, on behalf of a unit of dock employees of the National Harbours Board, Vancouver, B.C. (Investigating Officer: D. S. Tysoe).

8. General Drivers, Warehousemen and Helpers Local Union No. 979, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers employed by Empire Freightways (Midland Superior) Limited, Winnipeg, Man. (Investigating Officer: J. S. Gunn).

Application for Revocation Received

Albert G. Chayer, applicant, Seafarers' International Union of North America, Canadian District, respondent, and National Harbours Board, Montreal, Que., respondent. The application was for the revocation of the certification issued by the Board on August 25, 1961 to the respondent union in respect of a unit of marine engineers employed aboard the tugs *Sir Hugh Allan* and *Glenkeen* by the National Harbours Board at Montreal, Que. (L.G. 1961, p. 1035).

Request for Review Received

Request for review of the certificate issued by the Board on November 3, 1961, affecting the National Association of Broadcast Employees and Technicians, applicant, and Canadian Marconi Company, Montreal, Que., respondent (CFCF and CFCF-TV) (L.G. 1962, p. 50).

Request for Review Withdrawn

Request for review of the certificate issued by the Board on September 27, 1961, affecting Cape Breton Projectionists Union of the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada, Local Union No. 848, Sydney, Glace Bay and New Glasgow, N.S., applicant, and Hector Broadcasting Co. Ltd. (Radio Station CKEC), New Glasgow, N.S., respondent (L.G., Mar., p. 215).

Application for Revocation Granted

Marc Charron, *et al*, applicants, La Compagnie Nationale au France (Reservations Section), Montreal, Que., respondent, and the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW). Local 698 respondent.

Conciliation and Other Proceedings before the Minister of Labour

Conciliation Officers Appointed

During February, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Canadian National Railways and Canadian National Railways Police Association (Conciliation Officer: C. E. Poirier).

2. Central Mortgage and Housing Corporation and Region 76, District 50, United Mine Workers of America (Conciliation Officer: C. E. Poirier).

3. Toronto Harbour Commissioners and Toronto Harbour Commissioners Employees' Union, Local 186 (Conciliation Officer: T. B. McRae).

4. North-American Elevators Limited and Syndicat Catholique et National des Débardeurs de Sorel Inc. (Conciliation Officer: C. E. Poirier).

5. Bell Telephone Company of Canada (Directory Sales Department, Eastern Region) and Local 57 of the Officer Employees' International Union (Conciliation Officer: C. E. Poirier).

6. Ottawa Transportation Commission and Division 279 of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (Conciliation Officer: T. B. McRae).

7. Cubana Airlines Limited, Montreal, and Canadian Air Line Dispatchers' Association (Conciliation Officer: C. E. Poirier).

8. St. Lawrence Seaway Authority and the Canadian Brotherhood of Railway, Transport and General Workers (Conciliation Officer: T. B. McRae).

9. Northwest Shipping (1962) Co. Ltd. and Northland Shipping (1962) Co. Ltd., Vancouver, and Local 400 of the Canadian Brotherhood of Railway, Transport and General Workers (Conciliation Officer: D. S. Tysoe).

Settlements by Conciliation Officers

1. Algoma Central and Hudson Bay Railway Company and Brotherhood of Railroad Trainmen, Lodge No. 611 (Conciliation Officer: T. B. McRae) (L.G., March, p. 215).

2. Northern Telephone Company Limited, New Liskeard, Ont., and District 10 of the Communications Workers of America (Conciliation Officer: T. B. McRae) (L.G., March, p. 215).

3. Soo-Security Motorways Ltd., Winnipeg, and Local 979 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America

(Conciliation Officer: J. S. Gunn) (L.G., Feb. p. 131).

4. TransAir Limited, Winnipeg, and Canadian Air Line Flight Attendants' Association (Conciliation Officer: J. S. Gunn) (L.G., Nov. 1963, p. 1016).

5. Toronto Harbour Commissioners and Toronto Harbour Commissioners Employees' Union, Local 186 (Conciliation Officer: T. B. McRae) (see above).

Conciliation Boards Appointed

1. Negotiating Committee representing the Associated Non-Operating Unions, and Canadian National Railways; Canadian Pacific Railway Company; Toronto, Hamilton and Buffalo Railway; Ontario Northland Railway; Algoma Central and Hudson Bay Railway Company; The Midland Railway Company of Manitoba; and The Cumberland Railway Company (Sydney and Louisburg Division) (no conciliation officer previously appointed.)

2. Newfoundland Employers Association Limited, St. John's, Nfld., and The Longshoremen's Protective Union (L.G., March, p. 215).

Conciliation Board Fully Constituted

The Board of Conciliation and Investigation established in January to deal with a dispute between Asbestos-Eastern Transport Inc., Asbestos, Que., and Locals 106 and 938 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., March, p. 215) was fully constituted in February with the appointment of the Honourable Mr. Justice Ouimet of Montreal as Chairman. Mr. Justice Ouimet was appointed by the Minister on the joint recommendation of the other two members of the Board, Camille Archambault and Reuben Spector, both of Montreal, who were previously appointed on the nomination of the company and union, respectively.

Conciliation Board Report Received

Canadian Broadcasting Corporation and National Association of Broadcast Employees and Technicians (L.G., Oct. 1963, p. 899). The text of the report is reproduced below.

Settlement Reached After Board Procedure

Canadian Broadcasting Corporation and National Association of Broadcast Employees and Technicians (see above).

Report of Board in Dispute between

*Canadian Broadcasting Corporation
and*

National Association of Broadcast Employees and Technicians

Your Board of Conciliation met the parties in Ottawa first on October 22 and 23, and again on November 2 and 3, and the Board met in executive session in Belleville on November 24, 1963.

There appeared before the Board of Conciliation on behalf of the Corporation:

John Brooke, Q.C., Counsel
Clive McKee, Director, Industrial and Talent Relations
Cliff Kelley, Assistant Director, Industrial and Talent Relations
Lloyd Langille, Senior Engineer, Montreal
Reg Horton, TV Technical Director, Toronto
Guy Fontaine, TV Technical Director, Montreal
Peter Burgess, TV Technical Director, Edmonton
D. J. Van Bommel, Supervisor, Personnel Relations
Derek Nelson, Manager, Industrial Relations
Jack MacDonnell, Salaries Research Officer
Harry O'Grady, Liaison Officer, Accounting and Industrial and Talent Relations
Ron Freeman, Supervisor, Industrial Relations, Toronto
Gerry Belisle, Supervisor, Industrial and Talent Relations, Montreal
Margaret Crombie, Secretary.

And on behalf of the union:

E. B. Jolliffe, Q.C., Counsel
T. J. O'Sullivan, Director for Network Affairs
R. B. Boyd, Committee Secretary
R. Manson, Representative, Toronto
J. Benoit, Representative, Montreal
P. Robillard, Representative, Montreal
I. Stephen, Representative, Vancouver
F. H. Wadsworth, Representative, Ottawa
B. Mather, Representative, Toronto
M. Jakymiw, Montreal (Observer)
J. Thibault, Ottawa (Observer)
P. Gauer, Ottawa, (Observer).

At these meetings, the Board heard the submissions and arguments of both parties, in which all matters in dispute were thoroughly explained to the Board. The Report of the conciliation officer advises that

all items are in dispute as reported to the Department of Labour on May 2, 1963. All items remained in dispute at the opening of the Board hearings. These items were numerous and the Board does not intend to list them.

After an exhaustive effort to settle the issues in dispute, the Board was not successful, and there then remained 12 items of dispute upon which the Board feels it necessary to report. These matters are:

1. Wages.
2. Request for premiums under Article 23 in certain film assignments.
3. Request that St. John Baptiste Day have the same status as a statutory holiday in the Province of Quebec.
4. Create a new group known as II—D as of April 1, 1964. (This is a request for a new group to be created of technicians performing combined functions, and the demand also includes a request for at least one further increment increase for this group.)
5. To have the French text of the collective agreement have equal force and recognition with the English text.
6. A clause relating to the operation by a film camera man of camera and sound on film equipment drawn [up] in such a way that the operation by a film camera man alone will be permitted, but that if the operation requires more than one man, a technician within the bargaining unit to be assigned.
7. NAGRA lists under Article 46.2.4. The union requests that these lists shall be continued. The Corporation, however, wants the list completely done away with or greatly enlarged, as to number, function, and location.
8. Tape-editing lists. The union wants these continued without further additions. The Corporation wants to be free from such lists.
9. Group III announcer-operators. The union wants a minimum of five to be promoted to this group during the year 1964. The Corporation is willing to open Group III to announcer-operators, but the promotion of technicians into this group to be entirely within the discretion of the Corporation.
10. The union requests certain protection against technological layoffs to be embodied in the agreement.

During December 1963, the Minister of Labour received the Report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Broadcasting Corporation and the National Association of Broadcast Employees and Technicians.

The Board was under the Chairmanship of His Honour Judge J. C. Anderson of Belleville, Ont. He was appointed by the Minister on the joint recommendation of the other two members, J. W. Healy of Toronto, and Prof. Charles Taylor of Montreal, nominees of the Corporation and Association respectively.

After giving consideration to the Report, the parties asked the Minister to reconvene the Board to reconsider, clarify or amplify certain recommendations in the Report. The Board met and submitted a clarification to the Minister on December 28, 1963. This clarification was released to the parties who, after studying it, again requested the Minister to have the Board meet. The Board issued a final clarification on January 27, 1964, and following further meetings between the parties, the dispute was settled in February. The Report and clarifications are reproduced here.

11. All items upon which understanding was reached during negotiations other than those mentioned herein to be embodied in the text of the agreement.

12. The term of the agreement is in dispute.

In dealing with the above-mentioned matters, the Board will deal with the matters set out in the order in which they are set out, *except as to wages and length of contract*, and these will be dealt with at the end of this report.

Item 2. Re Article 23.1.8—This is a request for increase in film assignment premiums under Article 23.1.8. During negotiations there was a tentative agreement on this request, and the Board therefore recommends that the tentative agreement be incorporated in the new contract. The result of this agreement will be that 23.1.8 shall, in the new contract, read as follows:

A differential of 15 (fifteen) per cent of the basic rate shall be paid for each hour worked on such assignments. This differential shall not be deemed overtime, or part of the base pay.

Item 3. St. John Baptiste Day—The union has requested that St. John Baptiste Day in Quebec be restored to the status of a statutory holiday and not simply a Corporation-declared holiday.

At present there are nine paid holidays, and in addition to that, the contract provides that any day duly proclaimed by federal, provincial or municipal authorities as a public holiday in the area in which the place of employment is located, shall also be considered a paid holiday. In 1953, which was the date of the signing of the first collective agreement, and until 1962, St. John Baptiste Day was treated as a paid statutory holiday, and work on this day was paid as provided in Article 24.1.1, that is, at the time-and-a-half rate computed separately from the work week.

In 1962, Management discontinued recognition of St. John Baptiste Day under said Article 24.1 and decided that this would be recognized as a Corporation-declared holiday under Article 24.2, and work on this day would be paid as provided in Article 24.2.1, that is, at the basic rate computed separately from the work week.

The Corporation submits that to make St. John Baptiste Day a statutory holiday is adding still another cost of operation, and that, as the broadcasting industry is a seven-day-a-week business, it does not by choice require its employees to work on holidays, and the Corporation says that since it already recognizes nine statutory holidays, plus any days duly declared by federal, provincial and municipal authorities as

public holidays, and since it is already willing to recognize other days not duly proclaimed as Corporation-declared holidays, that it should not now be expected to include St. John Baptiste Day as a statutory holiday unless this day is duly proclaimed such by federal, provincial or municipal authorities as a public holiday. The Corporation, however, is prepared to agree that, for the life of the agreement, St. John Baptiste Day will be treated as less than a Corporation holiday.

It would seem to your Board that St. John Baptiste Day is in a place somewhere between a recognized statutory holiday and one which is not officially proclaimed by federal, provincial or municipal authority as a public holiday. The employees of the Corporation in Quebec enjoyed the recognition of this day as a statutory holiday from 1953 until 1962, and it would be the view of the Board that this day should be restored to the status of a statutory holiday, and in so doing, it does not feel that this would create a precedent where in some provinces or in some municipalities some particular day is recognized as a holiday but without public proclamation of the same as being a holiday.

Item 4. New Classification—The Union has proposed a new classification to be called Technician II-D, to include those employees who perform a combination of job functions detailed separately under Paragraph 7 of the job specification of Technician (General, Sound), or Paragraph 8 of the job specification of Technician (General, TV).

It appears that as a result of recent technological changes in the broadcasting industry, newly designed electronic equipment allows one man to perform functions previously requiring two or three persons to perform. An example of new equipment includes TV cameras that are operated from a remote location, thus not requiring a camera man; and film projectors that, once loaded with film, are operated from a remote location, and automatically stop and reset for the next operation at the conclusion of the film showing. In some places, a control room technician, from his console position, can now perform a number of functions. That is, he can operate film projector video tape more or less from the camera, and select the picture to be broadcast from film tape or live studio.

The Corporation contends that the new functions that a man performs have so changed the work requirement that, as a result of the new equipment, the work requirement that formerly had to be performed by several men can easily be per-

formed by one man. So the Corporation feels that it is asking its employees to utilize equipment in a fashion consistent with the new designs, and is not asking one man to perform work that was previously done by several.

On the other hand, the union submits that when employees perform a combination of job functions detailed separately under Paragraph 7 of the specifications of Technician, or Paragraph 8 of the job specifications of Technician (General, TV), it requires greater skills, and in any event, the technician should be paid more for the combined operations, and that all the benefit of technological change should not accrue to management.

The parties have agreed to undertake a study of technological change, and the Board's recommendation is that problems arising out of the combining of job functions—whether or not there should be any recognition by upgrading the technicians who do the combined functions—should be referred to a joint study during the life of the forthcoming contract.

In the meantime, the Board is not prepared to recommend the changes sought by the union, namely, the setting up of a new group with a higher pay scale.

Item 5. Re Article 76.1—The union requests that Article 76.1 of the current agreement should read as follows:

Both the French and the English texts of this agreement shall be considered official texts having equal force, and either may be quoted or relied upon by either party.

During the efforts at conciliation, the Corporation advised that it was willing to concede this request.

The Board therefore recommends that the text of the agreement, both in English and French, shall be considered official texts having equal force.

It is, however, recognized that there may be some time lag before an official French text can be prepared and executed. The Board leaves it to the parties to work out the method of preparing the French text and making sure that it conforms in wording and intent to the English text, but it also suggests that as soon as the official English text has been executed, that the parties should then turn to the preparation of a French text, and that when this has been prepared, it should be executed, and then both the French and English texts will be considered official texts having equal force.

Item 6. Re Article 46—The Corporation has proposed a change in Article 46 that will permit the sound equipment associated

with film cameras to be operated by the film camera man.

The camera equipment that is now available is light and compact, and the sound-recording amplifier can be carried over the camera man's shoulder, or attached to the camera itself. Formerly, where a camera was operated, a technician was required to operate the sound equipment that went along with the operation of the film camera, and the difficulty in this area arises partly because the film camera men are not members of the NABET bargaining unit.

Your Board is of the opinion that with proper safeguards, the Corporation should be allowed to have sound-on-film assignments operated by a film camera man without requiring a technician to accompany the camera man, and Article 46.2.9, the Board recommends, should in the new contract read as follows:

Film camera men on one-man film assignments who may operate sound recording equipment as well as the camera (whether or not what is recommended has been existing practice).

It is understood, of course, that this relates only to situations that are known as one-man film assignments, or in other words, it restricts the film camera man's use of sound-recording equipment to those cases where the camera man can operate this equipment and the camera as well without additional help.

Item 7. NAGRA Lists under Article 46.2.4—Under the present contract, Article 46.2, the Corporation agrees not to assign to persons outside the bargaining unit duties performed by members of the bargaining unit, but it is agreed that the Corporation shall not be required to alter the existing practice with regard to the following. Then after certain exceptions, Article 46.2.4 goes on to say:

Program personnel engaged in areas of specialized broadcast activity who may be required to use one-man portable recorders in the performance of their normal duties, i.e., NAGRA, WIREK, or other comparable equipment, to record interviews, commentaries and related material. Such personnel are set forth under separate cover.

An Article 46.2.5 sets out a further exception as follows:

Program personnel engaged in areas of specialized broadcast activity who audition, time and mark tape in the performance of their normal duties on equipment specifically set aside for their own use who may also be required to splice tapes. Such personnel are set forth under separate cover.

The operation of recording equipment has been recognized as being within the union's jurisdiction since the first agreement, but, since the first agreement likewise, the Union has recognized that program personnel are

required to operate one-man portable recorders in the normal performance of their work. In the past, a good deal of the outside recording was done with bulky recording equipment fitted in cases, and required a technician for its operation. At present, however, the one-man portable recorder has greatly improved and become much smaller. Therefore its use by program personnel has become more frequent.

It is the Corporation's submission that live broadcasts have been replaced largely by a system of pre-recordings made at convenient times and places for broadcast at appropriate times, and that the time has come when this type of equipment, NAGRA and WIREK, etc., should be placed at the convenience of anybody so designated by the Corporation to operate it. The Corporation, as has been stated above, wants the jurisdiction by the union to be relaxed so that program personnel engaged in this program activity using portable recorders may be freely used as required.

Both the Corporation and the union are not satisfied with the present arrangement of naming persons to operate this equipment. The Corporation says that the arrangement is unsatisfactory in three ways:

First, it wants to add to the program people who operate this equipment, news men and announcers.

Second, even where the person named at a certain location is agreed on, that person in the past has not been able to operate the equipment in any other location. Management would like to have individuals on the list to have access to the equipment anywhere in the CBC system.

And third, there have been difficulties and disputes arising concerning the interpretation of the words "in the performance of their normal duties."

Item 8. Tape-Editing Lists— There is also a jurisdictional dispute over the editing of the tape material. The union wants all editing returned to the technicians, and the Corporation says that the editing required is simply cutting and splicing, and should be done by the person who operates the tape recorder and takes the interviews.

Board's Recommendation—7 and 8

The Board's recommendation is that personnel engaged in programming who are required to use NAGRA equipment or WIREK equipment, or similar equipment, and who are required to edit their own tapes, should be allowed to do so, and that the Corporation should draw up a list of such people, and that the list may be amended as changes occur. Further, that if one person is given as being at a certain location, he may use the equipment at another location, provided the Union is advised that such use is to take place, but

that such list should not be enlarged beyond that submitted by the Corporation to the Union during Conciliation Board hearings.

The Board should also state that this recommendation should be limited to the duration of the next contract and then should be open for renegotiation. In the meantime, a joint study committee of both Management and Union should be set up to study the question of jurisdiction over this equipment, with a view to finding a satisfactory solution to the jurisdictional problem and doing away with the lists during the period before referred to.

Item 9. Re Announcer-Operators—The Union requests that Group III be open to announcer-operators and that a minimum of five be promoted to this Group III during the year 1964.

There is a job classification in the NABET called announcer-operator. The latter performs a combined function of announcer and technician in some CBC centres. The wage range of announcer-operators is in Group II-C, and it is the union's submission that because these operations have been combined they have been down-graded to some extent. The Corporation is willing to concede that Group III be open on promotion by way of merit and under the terms of the Contract to announcer-operators, but it is not willing to contract that a certain number of the announcer-operators be promoted within a certain time to Group III.

Board's Recommendation

The Board recommends that Group III be open to announcer-operators, and the fact that this group is to be open to announcer-operators means that it is possible, and in the course of time there should be announcer-operators promoted to this group. The Board is satisfied that if the management opens Group III to announcer-operators, it will actually promote qualified people within the term of this agreement to Group III.

Item 10. Technological Lay-offs—It will be seen that if the recommendations above set out are carried out and a contract containing them, is entered into, there may be personnel who are now performing functions within the NABET unit who will no longer be performing the functions they are presently performing.

NABET is a technical unit, and the Board is of the opinion that NABET is just as anxious as the Corporation to enter into a collective agreement that will permit utilization of new equipment, taking advantage of technological changes in the industry, provided its unit is protected from layoff or from lack of job opportunity.

Board's Recommendation

The Board therefore recommends that there should be changes in the layoff provisions of the contract, particularly relating to layoffs occasioned by technological change combining the functions of technicians, or the loss of work that was formerly within the technical unit to personnel outside the unit, and that such improvements in the lay-off provision should contain as a minimum the following clause:

No present employee shall be laid off by reason of technological change. Such employees whose work is surplus by reason of technological change may be reassigned as a result of a particular change, but the Corporation agrees that no present employees will be laid off because of such change, and that no present employee re-assigned as a result of technological change will be re-assigned to a group or to a salary less than he is receiving at the time of such re-assignment, and that his position on the progressive groupings resulting from years of service shall not be detrimentally affected thereby.

*Item 11. Amendments to Collective Agreement as Agreed upon during Negotiations—*The Board recommends that all matters that have been agreed upon during negotiation up until the time of the meeting of the Board of Conciliation should be incorporated in the new agreement.

*Items 1 and 12. Premium paid for Sundays, and Wages—*The union proposed that all work performed on Sunday be compensated for at 10 per cent of the basic rate computed separately from the work week, and that such premium for Sunday work shall not be deemed overtime or part of the base pay and shall be in addition to any other premium paid. The union submits that there is little or no evidence that Sunday has been treated any differently from other days insofar as the assignment of work is concerned, and that the Corporation's undertaking to make every effort to schedule two days off on week-ends as frequently as possible without penalty for Sunday work is valueless. The union further submits that many programs are recorded on Sunday that could be recorded on other days of the week.

The Corporation in reply says that it has been the practice to schedule minimum crews on Sunday, and only operates on Sunday because it is the nature of the business, and as it has peak audiences on Sunday, it must provide service to the greatest possible number of Canadians on that day. It further states that all production groups recognize and accept the necessity of the broadcast industry's and the Corporation's requiring programming to take place on Sunday.

Board's Recommendation

The employees' desire to be free from work on Sunday is understandable. On the other hand, it is common knowledge that in an industry of this kind, programming, both live and taping, must be done on Sunday to some extent if it is to be done at all.

In view of the recommendations hereinafter made with respect to increase in wages, and in view of the recognition that the broadcasting business requires technicians to work on Sunday, the Board is not prepared to recommend that any premium pay be attached to Sunday work.

*Wage Increase—*Both the Corporation and the union spent a great deal of time presenting to the Board their view of the present wage structure, the Corporation arguing that there should be no increase and the union arguing that there should be very substantial increases. Each party was able to marshal certain statistical information and submitted argument to support its respective point of view. The present contract expired on March 31, 1962.

Board's Recommendation

Having as carefully as possible analysed the submissions of both parties with respect to wages, and having in mind that some considerable time has now elapsed since the expiry of the last contract, your Board of Conciliation recommends that there should be an increase in wages as follows:

An increase of 3 (three) per cent effective April 1, 1963, on wages being paid on March 31, 1963.

A further and additional increase of 4 (four) per cent on March 1, 1964, based on wages being paid on March 31, 1963.

A further and additional increase of 3 (three) per cent effective on February 1, 1965, based on wages paid on March 31, 1963.

The contract to expire on January 1, 1966.

This represents a 10 per cent increase on basic rates as in effect on March 31, 1963, over a 33-month period.

All of which is respectfully submitted.

(Sgd.) J. C. Anderson,
Chairman.

I concur, with some reservations on Items 3, and 1 and 12. See Addendum:

(Sgd.) J. W. Healy,
Member.

I concur, with some reservations on Recommendations 7 and 8. See Addendum:

(Sgd.) Charles Taylor,
Member.

Dated at Belleville, Ont., this 17th day of Dec., 1963.

Addendum by J. W. Healy

I have concurred in the Report of the learned Chairman with some reservations respecting his recommendations on Items 3 and 1-12.

Item 3—While it may be, as the Chairman finds, that St. John Baptiste Day should be restored to the status of a statutory holiday, I think the parties should continue to rely in the determination of the status of holidays on proclamation by the appropriate governmental authorities.

Items 1 and 12—It seems to me that the Chairman's recommendation of a 10 per cent increase in wages over a period of 33 months from the expiry date of the previous collective agreement is somewhat higher than can be justified. In my view, such a substantial increase on the present high level of wages should be apportioned over a period of at least three years from the said expiry date.

I raise one further point, solely for clarification. The Chairman states in his first paragraph under "Item 10—Technological Layoffs" that if the recommendation "above set out" (i.e., those relating to sound on film, NAGRA and WIREK equipment, and the editing of tape) "are carried out . . ., there may be personnel who are performing functions within the NABET unit who will no longer be performing the functions they are presently performing."

In its Brief, on page 32, within the section devoted to its submission on the sound-on-film issue, the Corporation indicated its willingness to ensure that there would be no layoffs. Whether or not the Corporation also had in mind changes occasioned by the use of NAGRA and WIREK and the editing of tape, I think the Board's recommendation on this issue is limited to the specific technological changes concerning which recommendations have been made, and is conditional upon their acceptance. (Obviously, no employer can guarantee permanent employment and this is particularly true of the changing broadcasting industry.) It is with this understanding that the recommendation of the Chairman on this item has my concurrence.

All of which is respectfully submitted.

(Sgd.) J. W. Healy,
Member.

Toronto, December 5, 1963.

Addendum by C. M. Taylor

I concur with the report in general, but I have some reservations regarding the recommendation on Items 7 and 8, touching the lists of names of Corporation personnel, outside the NABET bargaining unit,

who have access to portable sound-recording equipment and tape-editing equipment.

The claims of the Management and the union as to the facts of the case, and as to the experience they have had in the past, operating with these lists, are pretty far apart. Both sides seem agreed on one thing only, that this experience has been unpleasant.

It is very difficult for myself, as a layman, to judge the merits of this case without prolonged study, but I believe that there is some hope that after more careful study and consultation, the parties can come to a less cumbersome and more mutually satisfactory arrangement. Both sides are agreed that there must be some exceptions to the Unions' jurisdiction in this field; it is a matter of drawing a line and selecting the criteria.

I would therefore prefer to recommend on this point the status quo for the life of the agreement, pending consultation between the parties in the attempt to find a solution that would become an integral part of the next agreement.

(Sgd.) Charles M. Taylor,
Member.

Clarifications and Amendments

Your Board has been asked to clarify and amend, if necessary, to provide for such clarification of certain sections in its Report.

Therefore your Board now clarifies and recommends as follows:

The Board's Item 8 and the Board's Recommendations Nos. 7 and 8 on page 9 [of the original Report] should be deleted and the following substituted therefor.

Item 8—There is also a jurisdictional dispute over the editing of tape material. The union wants all editing returned to the technicians, and the Corporation maintains that editing must often be done by program personnel who are responsible for program value—either by the person who has recorded the tape or by another—and that such editing can be done without the assistance of a technician, and that the efficiency of the operation sometimes requires that it be done in this way.

Board's Recommendation—7 and 8

The Board's recommendation is that personnel engaged in programming who are required to use NAGRA equipment or WIREK equipment, or similar equipment, or who are required to edit tape, should be allowed to do so without the assistance of a technician, and that the Corporation should draw up a list of such people, and that the list may be amended as changes occur. [Further], that if one person is

given as being at a certain location, he may use the equipment at another location, provided the Union is advised that such use is to take place, but that such list should not be enlarged beyond that submitted by the Corporation to the Union during Conciliation Board hearings.

The Board should also state that this recommendation should be one limited to the duration of the next contract and then should be open for renegotiation. In the meantime, a joint study committee of both Management and Union should be set up to study the question of jurisdiction over this equipment, with a view to finding a satisfactory solution to the jurisdictional problem and doing away with the lists during the period before referred to.

All of which is respectfully submitted.

Dated at Belleville, Ont., this 27th day of December, 1963.

Reconsiderations, Clarifications and Amendments

Pursuant to the directions given to the Board by the Director of Industrial Relations, your Conciliation Board established to deal with the above-mentioned dispute reconvened in Belleville on Thursday, January 23, 1964, and heard the full submissions of both parties with respect to those sections of the Board Report that required to be reconsidered and clarified or amplified.

And in order to include in a Report to you, all matters in one document that the Board has, in the past or in the present sitting, found it necessary to reconsider, clarify or amplify, the Board now reports as follows:

Item 2. Re Article 23. 1.8—This deals with an increase in film assignment premiums and overtime pay under Article 23. During negotiations, there was a tentative agreement on the Union's request to alter this Article, and the Board therefore recommends that the tentative agreement be incorporated in the new contract. The result of this agreement will be that 23.1.8 shall, in the new contract, read as follows:

A differential of 15 per cent of the basic rate shall be paid for each hour worked on such assignments. This differential shall not be deemed overtime, or part of the base pay.

In addition, the Board recommends that weekly overtime be paid on days off and holidays worked by personnel on such film assignments as defined in Article 23.1.

Items 1 and 12—The Board's paragraph and recommendation on wage increase on pages Nos. 12 and 13 [of the original Report] should be deleted and the following substituted therefor.

Wage Increase—Both the Corporation and the Union spent a great deal of time presenting to the Board their view of the present wage structure, the Corporation arguing that there should be no increase and the Union arguing that there should be very substantial increases. Each party was able to marshal certain statistical information and submitted argument to support its respective point of view. The present contract expired on March 31st, 1963.

Board's Recommendation

Having as carefully as possible analysed the submissions of both parties with respect to wages, and having in mind that some considerable time has now elapsed since the expiry of the last contract, your Board of Conciliation recommends that there should be an increase in wages as follows:

An increase of 3 per cent (three per cent) effective April 1, 1963, on wages being paid on March 31, 1963.

A further and additional increase of 4 per cent (four per cent) on March 1, 1964, based on wages being paid on March 31, 1963.

A further and additional increase of 3 per cent (three per cent) effective on February 1, 1965, based on wages paid on March 31, 1963.

The contract to expire on January 1, 1966.

The increases recommended would apply to all remuneration based on wage rates. (The increases do not affect the flat-rate allowances—e.g., for meals.) The increases in the first increment would be fully retroactive to April 1, 1963.

This represents a 10 per cent increase on basic rates as in effect on March 31, 1963 over a 33-month period.

Mr. Healy declined to join in the original recommendation and likewise declines to join in this recommendation.

Items 7 and 8—The Board's recommendation on Items 7 and 8 as contained in the Clarifications and Amendments of the 27th of December, 1963, should be deleted and the following substituted therefor.

Board's Recommendation—7 and 8

The Board's recommendation is that personnel engaged in programming who are required to use NAGRA equipment, or WIREK equipment, or similar equipment, or who are required to edit tape, should be allowed to do so without the assistance of a technician, and that the Corporation should draw up a list of such people, and that the list may be amended as changes occur. [Further], that if one person is given as being at a certain location he may use

the equipment at another location, provided the union is advised that such use is to take place, but that such list should not be enlarged beyond that submitted by the Corporation to the Union during Conciliation Board hearings.

The Board should also state that this recommendation should be one limited to the duration of the next contract and then should be open for renegotiation. In the meantime, a joint study committee of both Management and union should be set up to study the question of jurisdiction over this equipment, with a view to finding a satisfactory solution to the jurisdictional problem and doing away with the lists during the period before referred to.

In order to make Section 46.2.4 and 46.2.5 of the present contract clear, a change will be necessitated in this wording that will have the affect of allowing the Corporation to use, under this Section, all personnel engaged in programming, instead of the limitation imposed by Section 46.2.4 and 46.2.5, which states that program personnel are to be allowed [to be used] only if they are engaged in areas of specialized broadcast activity.

The words the Board has used are "personnel engaged in programming," and the Management and the Union are best fitted to understand what is meant by this phrase, but it is obvious that there is no intention on the part of the Board to dilute the description of "personnel engaged in programming," so as to include people who are performing functions that are not being presently performed by the personnel who are named in the list above mentioned.

Mr. Taylor did not concur with the original recommendations on these items, and does not concur with the amplification. As to the question whether this represents the intention of the original Majority Report, Mr. Taylor concurs insofar as this incorporates the previous amplification on these Items of December 27th, 1963.

All of which is respectfully submitted.

(Sgd.) J. C. Anderson,
Chairman.

Canadian Railway Board of Adjustment No. 1 Releases Decisions in Six Recent Cases

The Canadian Railway Board of Adjustment No. 1 last month released decisions in six cases heard on February 11.

The first dispute was over the claim of a conductor and crew for 100 miles on each of four days when their assignment was cancelled, the third over the claim of conductor and crew for a day's pay for time held in service after they had completed work for the day, and the fourth over the claim of a conductor and a trainman for payment for time held away from home.

The second case concerned a yardmaster's appeal against suspension.

The fifth was over the claim of yard firemen for time lost when their assignment was reduced from six to five shifts a week. The sixth was over claims by three conductors and crews for payment as two separate trips when a turnaround combined deadheading and work service.

The Board did not sustain the employees contention in the first, fifth and sixth cases.

The contention of the employees was sustained in the second case to the extent that demerit marks were substituted for the suspension, in the third case to the extent that the crew was paid continuous time from

9.30 p.m. one day to midnight the following day, and in the fourth case to the extent that the claimants were paid at through straight rates for the run.

The six cases, Nos. 816 to 821, are summarized below.

Case No. 816.—*Dispute between Canadian National Railways (St. Lawrence Region) and Brotherhood of Railroad Trainmen over the claim of a conductor and crew for 100 miles for each of four days when their assignment was cancelled.*

A conductor and crew were assigned in through freight service to a train that left Montreal on Sunday, Tuesday and Thursday and returned the following days. In 1960, the December 25-26 runs were cancelled, as were the January 1-2, 1961 runs.

The conductor and crew claimed 100 miles each of the four days; the company declined the claims.

The union, in its contention, quoted an article in the trainmen's agreement that stated that trainmen would make their regularly assigned run "notwithstanding the trains may be late or running ahead of time." The union argued that when the run had been advertised trainmen who

applied for it had had reason to believe that their services would be used on the specified days, and that therefore certain minimum earnings were implied.

The union contended that, in accordance with the article it had quoted, the crews assigned to the service were entitled to be paid for the days in question, even though the runs had not been made.

The company contended that the bulletining of assignments did not establish entitlement to minimum earnings, except as provided under the guarantee rules of the agreement. The positions of the trainmen making the claim were subject to a monthly guarantee, and the Brotherhood was in fact trying to claim a daily guarantee in a class of service covered by a monthly guarantee, the company argued.

The cancellation of a trip in a month covered by a monthly guarantee was a thing that had been taking place for many years under the terms of the various running trades agreements, and this was the first time that the Brotherhood had tried to claim pay on a day-to-day basis under such circumstances, the company said. It argued that the clause quoted by the union applied only when a "regular assigned trip or run" was actually operating, and that it did not establish a right to either a monthly or daily guarantee when a trip was cancelled.

The Board said that it could find no rule to substantiate the employees' claim, and that the method to be used in cancelling through freight assignments should be arranged between the parties.

The contention of the employees was not sustained.

Case No. 817—*Dispute between Canadian National Railways (Mountain Region) and Brotherhood of Railroad Trainmen over the appeal of a yardmaster against a suspension.*

A yardmaster was charged with being inefficient in the performance of his duties in connection with the handling of a speed train through a terminal, and with insubordination to the general yardmaster when questioned as to the marshalling of the fill-out for the train. In consequence, he was suspended for 60 days.

The union appealed against the suspension, denying that the facts supported the general yardmaster's charges against the yardmaster. It asked for the man to be returned to service with pay for the time held out of service.

The company contended that according to the evidence the suspension was justified.

The Board found that although the evidence showed carelessness and indifference on the part of the yardmaster, the

discipline was too severe for the offence. It sustained the contention of the employees to the extent that assessment of demerit marks should be substituted for suspension and that the yardmaster should be compensated for loss of earnings.

Case No. 818—*Dispute between Canadian National Railways (Mountain Region) and Brotherhood of Railroad Trainmen over the claim of a conductor and crew for a day's pay for time they were held in assigned work train service after they had completed work for the day.*

After finishing work on Saturday, a conductor and crew in assigned work train service were run home from the unloading point and released. On Sunday they were ordered to report for work at 9:30 p.m. in order to be back at the loading point early enough on Monday morning; they began work 15 minutes after midnight and worked continuously until 7.45 p.m. that day. The crew were paid for 19 hours and 45 minutes but claimed a further 8 hours (or 100 miles) pay for the remaining 4 hours and 15 minutes not worked on Monday. The claim was declined.

In support of the claim, the union in its contention quoted an article of the agreement that, they said, entitled trainmen to one trip ticket each working day.

The company stated that for the 19 hours and 45 minutes service performed on Monday the men had been paid a total of 247 miles, which represented 2½ basic days. The company argued that for the men to claim an additional 8 hours pay for Monday was "unrealistic when it is realized that only 4 hours and 15 minutes of the 24-hour period was not worked." It denied that the claim of the agreement quoted by the union could reasonably be interpreted as entitling the crew to an extra day's pay; the rule contained no reference to trip tickets.

The contention of the employees was sustained to the extent that the train crew should be paid continuous time from 9:30 p.m. on Sunday to midnight on Monday.

Case No. 819—*Dispute between Canadian Pacific Railway Company (Atlantic Region) and the Brotherhood of Railroad Trainmen (ex parte) above the claim of a conductor and a trainman for payment for time held away from home while waiting to man their train that did not run on one day but ran the following day and for track miles at through freight rates instead of passenger rates for the run.*

In April 1963 the CPR advertised regular conductors' and trainmen's assignments to take effect at the change of timetable. One of the assignments was advertised "Sun-

day only except May 19, June 30, September 1 and October 13. Will operate Monday, May 20, July 1, September 2 and October 14."

A conductor and trainman who were the successful applicants for the assignment were held at the away-from-home terminal on May 19, when the train did not run, until May 20, when it did run. They claimed for the time held, for initial time at the terminal, and for payment at through freight rates for their tour of duty on May 20. The company declined the claims.

The union had disputed the right of the company to bulletin the assignment in the manner, they had; it had protested when the bulletin was issued. It quoted an article of the agreement, which it asserted gave the company the right to advertise regular assignments only. It contended that "the definition and intent of what constitutes a regular assignment does not give the company the right to include an extra or special train which operates only one day a year. Such trains belong to crews in unassigned service. In the event it is necessary to man such trains with regular assigned passenger crews, they are entitled to payment of through freight rates and under through freight conditions" as prescribed in certain articles of the agreement.

The company stated that the assignment had operated exactly as bulletined. It contended that the train in question was not an extra or special, but a regular passenger train and part of the assignment to which the conductor and the trainman had been assigned. It further argued that one of the articles cited by the union as authority for the claim for through freight rates applied only to unassigned and pool freight crews. As the service performed by the men was part of their regular passenger train assignment they had been properly compensated by payment of passenger rates, the company said.

The contention of the employees was sustained to the extent that the claimants should be paid at through freight rates for the run, the Board decided.

Case No. 820—Dispute between Canadian Pacific Railway Company (Prairie and Pacific Regions) and Brotherhood of Locomotive Firemen and Enginemen, ex parte, over claim of firemen on the Prairie and Pacific Regions for time lost when the company re-bulletined yard service assignments from a six-day week basis to five days.

On April 28, 1962, the CPR (Prairie Region) re-bulletined all yard assignments for firemen to work five days a week instead of a six-day week as previously. A dispute

arose over different interpretations of the collective agreement entered into by the company and the union after the company won the right not to employ firemen on diesel locomotives in freight and yard service.

A clause in the agreement, signed June 16, 1958, said that firemen with a seniority date prior to April 1, 1956 "will have the right to work in their turn as firemen up to 3,800 miles per month in freight service or six days per week in yard service . . ."

The employees contended that under the clause the firemen with a seniority date prior to April 1, 1956 should be reimbursed for time lost. The employees submitted a separate list of some 1,000 claims, which would "require screening with the company."

The employees further contended that the issues in the case were identical to those of Case No. 811 (L.G., Sept. 1963, p. 814), which was adjudicated by a referee, and in which their contention had been sustained.

The company contended that the article cited by the employees did not conflict with nor supersede the provisions of the agreement entered into after a Royal Commission found that firemen were not required on diesel locomotives in freight and yard service of the CPR and that the company's proposed terms and conditions would be fair to the firemen.

The Board did not sustain the contention of the employees.

Case No. 821—Dispute between Canadian Pacific Railway Company (Prairie Region) and Brotherhood of Railroad Trainmen over claims by three conductors and crews for payment as two separate trips when deadheaded to a terminal to return with a train.

Winnipeg and Emerson are terminals between which trains regularly run; they are 62 miles apart. On three occasions, three conductors and crews were ordered to deadhead from Winnipeg to Emerson and work the return trip to Winnipeg.

The conductor and crew in each instance submitted claims for a minimum day's pay for deadheading to Emerson, and payment for a separate trip for working the return trip. The company reduced the claims to payment on an hourly basis for deadheading and payment on the basis of a continuous trip in combined deadheading and working service for the actual miles run on the return trip.

The employees contended that, when ordered to deadhead from one terminal to another they were entitled to payment of not less than eight hours. And the return trip "from terminal to terminal in working

service" entitled them to payment of not less than a minimum day.

Both parties based their contentions on different clauses of the agreement. The employees cited the clause that detailed the basis of payment for deadheading and for combined deadheading and working service. The company cited in addition the clause that provided that an objective terminal less than 100 miles from the initial terminal may be regarded as a turnaround point and that trainmen may be run in and out of such a point on a continuous time basis.

The dispute was reheard in the presence of a referee for final and binding determination.

At the hearing before the referee, both parties agreed that if the trips in question had exceeded eight hours there would be no dispute between them as to the appropriate rate of pay. The company pointed out, and the Brotherhood agreed, that the employees' claim would mean paying more for combined deadheading and working than for working both ways.

In his decision, the referee stated that the resolution of the dispute depended in some measure on whether turnaround service maintains its character as such "notwithstanding that the outward or return trip to or from the turnaround point is a deadheading one." He pointed out that the Brotherhood based its contention on one article alone and the company on that article and one other.

The article cited by both parties was headed "Deadheading"; the additional one cited by the company, "Straightaway and Turnaround Service."

The Brotherhood argued that only the first clause of the "deadheading" article applied and that the "combination deadheading and working service" provisions in the second clause could not apply because the deadheading in this case was from one terminal to another and not from a terminal to an intermediate point. Although an objective terminal was a turnaround point under the article cited by the company, this did not mean that such a terminal can be regarded as an intermediate point within the provisions of the second clause of the deadheading article.

But the company argued that when a continuous tour of duty is involved by way of a turnaround, "it is wrong to call the turnaround point a terminal . . . but it is more properly an intermediate point, the mid-point in the total run." Thus, when the continuous tour combines deadheading and working service, which is permitted under

the article cited by the company, the company is entitled to invoke the second clause of the deadheading article for pay purposes.

The referee pointed out that one of the difficulties of the case resided in the meaning of the word "terminal." There was no doubt, he said, that the company regarded Emerson as a terminal for certain purposes, and the union called it such for all purposes. It could also be a turnaround point, as was clear from the agreement. The company had submitted that on a turnaround, the turnaround point and the intermediate point were one and the same, and if the turnaround point was a terminal, it nonetheless could equally be an intermediate point.

The Brotherhood, on the other hand, asserted that an acknowledged terminal (like Emerson) could be a turnaround point for the purposes of the article cited by the company but could not at the same time be an intermediate point for the purposes of the article on which the company was basing payment.

In the referee's opinion, the Brotherhood was correct in contending that under the article cited by the company a distinction is made between a turnaround point that is a terminal and a turnaround point that is an intermediate station. If the service involved in the case were working service both ways, there would be no need to argue about turnaround points being intermediate points; but because deadheading is involved, resort must be had to the article both parties had cited. And that article mentions "runaround" in a context that suggests that a runaround assignment may involve deadheading and hence be a type of combined operation to which the second clause of the deadheading article may apply.

Proceeding on the basis that the deadheading article "comprehends deadheading as part of a turnaround," the referee referred to a third article of the agreement that suggested to him that the initial terminal might be an intermediate point in a turnaround, "and there is hence no reason why a so-called objective terminal may not equally be such a point."

The referee said he conceived the deadheading article as covering deadheading from one terminal to another, deadheading from a terminal to some intermediate point and then to another point in work service, and deadheading and work service in turnaround between terminals.

"It follows from this view that the claims of the Brotherhood must be denied."

The referee's award became the decision of the Board of Adjustment.

Legal Decisions Affecting Labour

Supreme Court of Canada upholds constitutional validity of municipal by-law regarding closing hours on Sunday. British Columbia Court of Appeal sets aside conviction for breaching injunction regarding picketing in shopping centre. Supreme Court of Nova Scotia enjoins anticipated picketing of ship. Ontario High Court rules on way to enforce arbitration award.

The Supreme Court of Canada, in a unanimous decision, ruled that a municipal by-law enacted by the City of Saint John, N.B., providing for the licensing of public billiard or pool rooms and bowling alleys, the conducting of such businesses in an orderly way, and the hours of closing, including Sunday closing, is primarily concerned with matters of merely local or private nature within provincial jurisdiction and is not in conflict with the federal criminal law or the Lord's Day Act.

In British Columbia, the Court of Appeal ruled that picketing on sidewalks outside an employer's premises located in a shopping centre, over which the employer, with the owner and other leaseholders, had the right of easement for the passage of employees and customers, did not constitute a nuisance and was not enjoined, provided that such picketing was done without interrupting or obstructing in any substantial way the passage of people, and if it was carried on in conformity with Section 3(1) of the B.C. Trade-unions Act.

When the evidence indicated an intention on the part of the Seafarers' International Union to picket a ship in the future, the Nova Scotia Supreme Court ordered the continuation of an interim injunction against picketing that was originally granted to allow unloading of the ship on a specific occasion. The Court held that it was entitled to continue an injunction until the trial.

In Ontario, the High Court dismissed a union application for an injunction to restrain violation of an arbitration award on the ground that the Ontario Labour Relations Act provides, in Section 34(9), an effective remedy to enforce the arbitration award, by filing the award with the Registrar of the Supreme Court.

Supreme Court of Canada . . .

. . . rules municipal by-law covering Sunday closing not in conflict with federal law

On October 18, 1963, the Supreme Court of Canada held that the inclusion of Sunday in the hours of closing specified in a regulatory municipal by-law respecting certain businesses was not in conflict with the federal criminal law or the Lord's Day Act. The Court dismissed an appeal from a judgment of the Appeal Division of the New Brunswick Supreme Court that affirmed a conviction for keeping a bowling alley open on Sunday in violation of a municipal by-law.

Further, the Supreme Court held that such by-law does not necessarily carry with it any moral or religious significance but is primarily concerned with the licensing regulations governing closing hours, which are matters of merely local or private nature within provincial jurisdiction.

The licensed keepers of a bowling alley in Saint John, N.B., were convicted for keeping a bowling alley open on a Sunday in contravention of the provisions of a Saint John municipal by-law passed in 1908. The by-law requires, among other things, that bowling alley keepers must have a licence for operating; that bowling alleys must close between midnight and six o'clock in the morning on any week day, and all day on Sunday (Section 3); and that licensed persons were not to permit drunken or disorderly persons on their premises nor keep or permit any gambling device, or permit any disorderly conduct or breach of the peace to take place therein (Section 4). The by-law provided a penalty for a breach of any of the provisions.

It was argued for the licensed keepers that Section 3 was invalid as constituting an encroachment on the field of criminal law. This contention was accepted by the Police Magistrate before whom the information

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

was laid and who, in his reasons for dismissing the charge, stated:

. . . the by-law—if it were allowed to remain operative—would conflict with . . . the Lord's Day Act, in the penalty to be imposed; and the penalty is always considered as part of the statute. . . . I would rule that S.3 of the by-law before this Court . . . is invalid or inoperative with regard to the matter of Sunday.

On appeal, the County Court Judge before whom the appeal was taken convicted the licensed keepers and in his judgment held:

. . . that the relevant provision of the Lord's Day Act and the by-law differ in legislative purposes, legal effect and practical effect. The by-law imposes a duty, provides a regulation and control for purposes or objects whose nature and character *bona fide* fall within the field of provincial competence or authority.

The appeal to the New Brunswick Supreme Court, Appeal Division, was dismissed and Chief Justice McNair ruled as follows:

The restrictions in the by-law relating to Sunday operations, viewed in their context, appear intended for other purposes than to compel the observance or prevent the profanation of the Sabbath Day. Like their companion restrictions against night operations they seem in their true nature and character designed to promote purely secular purposes involving protection of the right of people in the community to rest and quiet during the prohibited periods. As such they are, we feel, within the legislative jurisdiction of the province and fit subject-matter for municipal legislation.

In the Supreme Court of Canada, Mr. Justice Ritchie commented that the city charter of Saint John of 1785 empowered the common council of the city to make by-laws for the good rule and government of the residents of the city and for the public good, common profit, trade and better government of the city provided that the by-laws were not repugnant to the laws of England or the province. After Confederation the conferred powers were confined to the sphere of authority allotted to the provinces under the B.N.A. Act.

Mr. Justice Ritchie noted that Section 15 of the federal Lord's Day Act provided that nothing in the Act shall be construed to repeal or in any way affect the provisions of any act or law relating to the observance of the Lord's Day in force in any of the provinces when it came into force. The Act was first passed in 1906 and the impugned by-law in 1908, and is therefore not a law that was in force at the time the Lord's Day Act came into force. The city charter was in force before the Act, but the power of the City of Saint John to make by-laws for the licensing of public billiard rooms, pool rooms and bowling alleys was not questioned by the licensed keepers.

Shop closing hours in particular areas in a province, Mr. Justice Ritchie ruled, are *prima facie* within provincial jurisdiction under Section 92(16) of the B.N.A. Act.

He noted that the precedents dealing with shop hours made them a matter of local interest in the province and not of any direct or substantial interest to the Dominion.

In the decision of Privy Council in *A.-G. Ont. v. Hamilton Street R. Co.*, [1903] A.C. 524, it was held that legislation intended to deal with Sunday observance was part of the criminal law and was reserved to the Parliament of Canada by Section 91(27) of the B.N.A. Act. Mr. Justice Ritchie stated the main question raised by the appeal in the case at bar was whether the impugned by-law had as its true object, purpose, nature and character the preservation of Sunday observance or whether it was merely the local matter of regulating the closing hours of licensed Saint John businesses.

It was submitted for the licensed keepers that the by-law was invalid on the ground that it purported to deal with matters of morals or religious observance that fell within the exclusive legislative jurisdiction of the Parliament of Canada. Mr. Justice Ritchie did not accept this argument and stated that the prohibition dealing with the closing hours of bowling alleys specified in Section 3 of the by-law cannot be isolated from the rest of the by-law. The impugned section, when the enactment is read as a whole, is only one of a number of regulations which the city council has imposed upon the operators of certain businesses in Saint John. He felt that the restrictions imposed by the council reflected only the manner in which the businesses were to be operated for the better government of the city.

He went on to say that it should not be lightly assumed that a part of a by-law is directed to a purpose beyond the legislative competence of the enacting authority and he did not feel that the inclusion of Sunday in the closing hours of the specified businesses carried any moral or religious significance.

Counsel for the licensed keepers referred to a number of judicial precedents involving provincial statutes designed to enforce the observance of days of religious obligation which were ruled *ultra vires*. Mr. Justice Ritchie noted that in each of these cases the legislation in question carried within itself clear evidence that it was directed to the observance of days of religious obligation. He went on to say that the *ratios* of these cases would not apply to the by-law in the case at bar. The

attack on the by-law was limited to the words, "or on Sunday", which were added to a list of other times when certain businesses were to close.

Mr. Justice Ritchie concluded that the language used in the title of and in the text of the by-law clearly indicated that the by-law was a law governing the regulation and licensing of, among other things, bowling alleys in Saint John. He ruled that it was primarily concerned with secular matters and that its true object, purpose, nature or character was the regulation of the closing hours of certain licensed establishments in Saint John, and that this was a matter of a merely private nature in the province. Moreover, he held that the addition of the word "Sunday" at the end of Section 3 would not justify an inference that the by-law was directed toward the observance of Sunday and therefore beyond the scope of provincial jurisdiction.

Section 3 of the by-law was not inoperative as being in conflict with the Lord's Day Act, Mr. Justice Ritchie ruled. He stated that provincial licensing power vested by Section 92(9) of the B.N.A. Act was not limited to the shop, saloon, tavern and auctioneer licences specified in that section and that, if the power was employed in a merely local matter and in a manner not repugnant to federal or provincial law, the provincial authority is entitled to make such conditions and penalties as it deems proper in respect to the manner in which licensed persons conduct their businesses. He added that the by-law was not invalidated by the fact that one or more of the conditions imposed was in conformity with valid federal legislation.

Mr. Justice Ritchie thought that the decision of Mr. Justice Judson in *O'Grady v. Sparling* (1960), 25 D.L.R. (2d) 145, was applicable to the alleged conflict in the case at bar between the by-law and the Lord's Day Act; he quoted from that decision as follows:

There is no conflict between these provisions in the sense that they are repugnant. The provisions deal with different subject matters; and are for different purposes . . . Even though the circumstances of a particular case may be within the scope of both provisions (and in that sense there may be an overlapping) that does not mean that there is conflict so that the Court must conclude that the provincial enactment is suspended or inoperative.

The doubts expressed as to the validity of Section 4 of the by-law in the Appeal Division of the New Brunswick Supreme Court by Chief Justice McNair were not shared by Mr. Justice Ritchie, and he held that this section and the penalty which accompanies its breach was nothing more than another condition imposed by the city

in the exercise of its right to control the manner in which these businesses shall be operated. He, therefore, dismissed the appeal. *Lieberman v. The Queen* (1963), 41 D.L.R. (2d), Part 2, p. 125.

British Columbia Court of Appeal . . . **. . . rules picketing on private land of a shopping centre is lawful, not a nuisance**

On October 24, 1963, the British Columbia Court of Appeal held that picketing on private land in the shopping centre over which the employer had an easement for the passage of its employees and customers was lawful, as the picketers were neither trespassing on said land nor interrupting or obstructing in any substantial way the passage of people. Consequently, such picketing did not constitute a nuisance.

On August 23, 1962, Mr. Justice Collins made an order enjoining Retail Food and Drug Clerks Union, Local 1518, from picketing the premises of Zeller's (Western) Ltd. at the Dell Shopping Centre, at 10642-46 Trans-Canada Highway, Whalley, B.C.; from watching or besetting the same employer upon the lands and premises such as sidewalks and parking lots over which the employer had an easement in the nature of a right of way; and from doing any act amounting to a nuisance.

The order added: "but nothing in this order shall be deemed to enjoin or restrain the defendant, Retail Food and Drug Clerks Union, Local 1518, its agents, servants, successors, or any one on its behalf, from doing the things set out in Section 3, subsection (1) of the Trade-unions Act, R.S.B.C. 1960, chapter 384." Section 3 reads as follows:

3(1) Where there is a strike that is not illegal under the Labour Relations Act or a lockout, a trade union, members of which are on strike or locked out, and any one authorized by the trade-union may, at the employer's place of business, operations, or employment, and without acts that are otherwise unlawful, persuade or endeavour to persuade anyone not to

- (a) enter an employer's place of business, operations, or employment; or
- (b) deal in or handle the products of the employer; or
- (c) do business with the employer.

(2) Except as provided in subsection (1) no trade-union or other person shall persuade or endeavour to persuade anyone not to

- (a) enter an employer's place of business, operations, or employment; or
- (b) deal in or handle the products of any person; or
- (c) do business with any person.

The strike was a legal one in which the union was entitled to exercise its rights under Section 3(1).

The injunction granted by Mr. Justice Collins was upheld by the Court of Appeal (L.G. 1963, p. 706).

Following the injunction order, on January 7, 1963, Mr. Justice Maclean held that some members of the union acting on behalf of the union had in violation of the injunction committed a nuisance on the premises by picketing on the sidewalk in front of the employer's store. He fined each of them \$100 for contempt. The union appealed the conviction.

Mr. Justice Davey rendered the judgment of the Court of Appeal. The issue before the Court of Appeal was whether the picketing was a nuisance in law. The injunction expressly forbade picketing the employer's premises, or watching or besetting them from the lands of the shopping centre; but it also reserved to the union the rights under Section 3 of the Trade-unions Act. According to Mr. Justice Davey, whether the union committed a nuisance depended on whether it substantially interfered with the employer's right of way and thereby caused him loss.

The evidence showed that picketing took place on December 7, 1962. Two men and two women picketed the employer's store, which had four entrances, walking back and forth on the sidewalk in front of the store, over which the employer held the right of way. They carried sandwich boards bearing the legends: "Support our strike. Don't shop at Zeller's"; and "Retail Clerks Union, Local 1518, on strike at Zeller's." The pickets handed out pamphlets to those who requested them; the pamphlets contained factual and argumentative material; there was no misrepresentation in the contents of the pamphlets or in the words on the sandwich boards.

Mr. Justice Davey accepted the employer's contention that the sales and revenue of the employer were substantially reduced by picketing. But he noted that there was no evidence that the pickets interfered with any person passing along the sidewalk, or in any way materially reduced the space of the sidewalk provided for the passage of shoppers, or in any other way interfered with or interrupted shoppers who desired to pass by. In the absence of evidence to the contrary, Mr. Justice Davey inferred that those who wanted to visit Zeller's were able to do so just as freely and conveniently as if the pickets had not been there. Further, the evidence showed that those who withheld their patronage did so freely from conviction because they did not choose to deal with a merchant whose premises were picketed in a labour dispute, and not because

of any obstruction, physical or otherwise, in getting to the store over the easement.

Mr. Justice Davey rejected the employer's contention that the presence of the pickets on the sidewalk over which the employer had the easement, and the loss of business that the employer suffered because of the moral suasion flowing from the presence of the pickets, constituted a substantial interference with the right of passage the employer enjoyed for himself and his customers over the passageways and walks, and with his right to carry on his business on the leasehold premises; that such picketing was therefore a private nuisance and consequently unlawful and that the union conduct did not fall within the saving clause of the injunction but, on the contrary, such picketing was forbidden under Section 3 of the Trade-unions Act.

Mr. Justice Davey pointed out that, following the decision of the Supreme Court of Canada in the case of *Aristocratic Restaurants Ltd. v. Williams* (L.G. 1951, p. 1553), if the pickets had been on a public street the union's conduct would not have constituted a nuisance. In his opinion, on the evidence before the court, there was no essential difference between a public road and the employer's private easement and consequently the principle established in the *Aristocratic* case was applicable to the situation at bar.

In the case at bar, the employer had an easement over common ground and such an easement was not exclusive to the employer at bar, and the owner and his other licensees had the right to use the land. The walks over which the pickets were passing were part of what appears to be a familiar type of shopping centre to which the public are invited. There was no evidence before the Court that the union, in picketing on the sidewalks, was exceeding the terms of the invitation to use the sidewalk held out to the public by the owner of the shopping centre.

The injunction issued by Mr. Justice Collins reserved to the union its lawful rights under Section 3 of the Trade-unions Act. In Mr. Justice Davey's opinion, there was no evidence that the union was doing anything not reserved to it by the injunction order. No significant distinction could be drawn in the case at bar between picketing on a public sidewalk and on the privately owned right of way. Accordingly, Mr. Justice Davey ruled that the *Aristocratic* case established that the conduct of the union in question was lawful, did not constitute a nuisance, and accordingly fell within the saving clause of the injunction.

The Court allowed the union's appeal and set aside the conviction for contempt of the injunction order. *Zeller's (Western) Ltd. v. Retail Food and Drug Clerks Union, Local 1518*, (1963) 45 W.W.R., Part 6, p. 337.

Nova Scotia Supreme Court . . .

... continues interim injunction against the anticipated picketing of a grain ship

On August 21, 1963, Mr. Justice Coffin of the Nova Scotia Supreme Court, dealing with a company motion to continue and a union motion to dissolve an interim injunction against the picketing of a ship, held that, although the affidavits supporting the interim injunction referred only to picketing preventing the unloading of the ship on a specific occasion, the injunction would not be dissolved when the ship had completed unloading and had sailed from the port. The Court is entitled to continue an injunction, he ruled, until the time of the trial, where evidence indicates an intention to picket the ship in the future, with the result that longshoremen would not cross the picket line to unload the ship; this would result in breaches of contract.

On May 21, 1963, Island Shipping Ltd. commenced an action for damages, for conspiracy to procure breaches of contract, and an injunction. The company claimed that certain members of the Seafarers' International Union of North America, Canadian District, by picketing, were wrongfully interfering or attempting to interfere with the performance of stevedoring contracts for the unloading of the *M. V. Wheat King* in Halifax. On May 21, an interim injunction, made returnable on May 24, 1963, was granted.

The injunction was designed to prevent the union from interfering, by picketing or other means, with the contracts between the company and the stevedoring contractors and stevedores or any other persons employed for unloading the ship. On May 24, the Seafarers' Union applied for dissolution of the interim injunction on the ground that the affidavits contained insufficient evidence. This application was refused and the matter was adjourned until the hearing of the company's application for the continuation of the injunction.

The *Wheat King* was unloaded and sailed from Halifax on May 23, and on these grounds the union applied, on June 7, for an order dissolving the interim restraining order. At the hearing of the applications to continue and to dissolve the injunction, affidavit evidence was submitted on behalf of the company setting forth facts indicating anticipatory picketing by the union, which

might have endangered the fulfilment by the company and other persons of future contracts with respect to delivery, loading, carrying and discharge of cargo.

It was argued for the union that the company was attempting to set forth new grounds not used in the original application for the restraining order. It was also submitted that the grounds for granting the injunction had ceased to exist after the ship was unloaded and sailed and that the company could not ask for a continuation of the restraining order on new grounds, that is, picketing in the future on return voyages of the *Wheat King*.

The union argument was based on the principle that where there is insufficient evidence in the statement of claim, or where there is sufficient answer to the charges, an injunction ought to be dissolved, even though the reply to the answers of the charges establishes a new fact, not in the statement of claim, that would be sufficient to entitle the Court to interfere if it had been included. The same principle appears in 21 Hals., 3rd ed., p. 417:

At the hearing, the case put forward must correspond with the case set out in the statement of claim, if any, and the plaintiff will not be allowed when he puts forward prominently and relies upon a given case, and fails upon that case, to spell out another and say he might have framed his case so as to show a title to the relief asked. A party who might have brought forward his whole case at once, but who brings forward a part only, when that fails, can not remodel his case and rely on a different equity.

Mr. Justice Coffin noted that the endorsement on the writ of summons issued on May 21 was in general terms, and in addition to the claim for damages, the claim for the injunction was framed in almost the exact terms used in the interim injunction.

The union alleged that the weight of the affidavits in support of the original application for the injunction was addressed to the unloading of the *Wheat King* in May only and the completion of the company's contract existing at that time. It was argued that the restraining order was granted on the grounds as set out in the application and that the company got the ship unloaded successfully, the prime purpose of its action. Therefore, the union submitted that the motion to continue the injunction was based on new grounds, that is, future breaches, and that it should not be granted.

Several precedents were referred to by counsel for the union. Mr. Justice Coffin questioned their applicability to the case at bar, however, and stated that the proceedings were commenced by a writ in general and that this did not limit the proceedings

to a specific event. He agreed that the affidavits referred to the events which happened in May, but the interim restraining order was made returnable for an order to continue the injunction until the final determination of this action. A special cause that would continue the injunction would be the probability of a recurrence of the picketing.

In Mr. Justice Coffin's opinion, the proceedings in the case at bar were instituted on a broad basis seeking an injunction against the picketing of the ship. He ruled that the affidavits should be read in light of the endorsement of the writ and that the application to continue was not an extension of the company's case.

Counsel for the union submitted that the ground for continuing the injunction had ceased before the hearing and that under such circumstances the Courts will not grant an injunction nor grant liberty to apply at a subsequent date. Mr. Justice Coffin studied the cases referred to on this point and noted that they were all cases in which the subject matter of the injunction had ceased to exist or the nuisance had ceased, leaving no evidence that it would recur. He stated, however, that the courts have granted injunctions in cases where the cause of complaint had disappeared at the time of the trial on the ground that the applicant's right must be tested as of the date of the commencement of the action.

Mr. Justice Coffin contended that there was no undertaking that the picketing would cease and would not recur when the ship returned. He felt that the problem to determine was whether a *prima facie* case had been made to support the interim injunction and its continuance.

It was submitted for the union that the depriving of an employer of the services of his employees resulting in a breach of contract is a wrongful act if done with the knowledge and intention to bring about the breach. In the case of *D. C. Thomson & Co. v. Deakin*, [1952] 1 Ch. 646, Lord Justice Jenkins stated that:

... While admitting this form of actionable interference in principle, I would hold it strictly confined to cases where it is clearly shown, first, that the person charged with actionable interference knew of the existence of the contract and intended to procure its breach; secondly, that the person so charged did definitely and unequivocally persuade, induce or procure the employees concerned to break their contracts of employment with the intent I have mentioned; thirdly, that the employees so persuaded, induced or procured did in fact break their contracts of employment; and, fourthly, that breach of the contract forming the alleged subject of interference ensued as a necessary consequence of the breaches by the employees concerned of their contracts of employment.

The union contended that the company did not establish the conspiracy with intention.

Mr. Justice Coffin referred to a case in which the rules set forth in *Thomson v. Deakin* were accepted and in that case, *Bennett & White Alta. Ltd. v. Van Reeder & International Union of Operating Engineers, Local 933*, (L.G. 1957, p. 340), Mr. Justice Johnson of the Alberta Supreme Court stated:

As to the intention of the appellants, the learned trial Judge says: "There can be no doubt whatsoever that the object of this so-called picket-line was not to obtain or impart information from or to anyone, but was to induce members of other Unions who were employed on this job to refuse to cross the picket-line and thereby bring the operation to a halt." This is an inference which was properly drawn from the evidence quite aside from the presumption that a person is presumed to intend the natural (and in this case the inevitable) consequences of his acts.

Evidence indicated that some of the placards carried by the pickets were worded "please respect our picket line." Mr. Justice Coffin accepted the explanation of the words "as being that if a person respects a picket line, he will not cross without the consent of the pickets." One of the union officials testified that he objected to the ship's operating in the manner in which it had been operating.

Mr. Justice Coffin ruled that there was *prima facie* evidence that the union directly intervened to picket the ship and would do so in the future, that they knew the members of the longshoremen's union would not cross the picket line, that the purpose of picketing was to prevent the ship from being unloaded, and that they knew the failure to unload would result in contract breaches. He held that the injunction should not be dissolved until all the issues have been heard at the trial.

Mr. Justice Coffin ruled that there was *prima facie* evidence that the picketing was to ensure that the Halifax longshoremen's union would respect the picket line and refuse to unload the ship, thus preventing the company from carrying out its contracts to discharge cargo at Halifax. He ordered the continuation of the interim injunction on the understanding that the company would proceed with its main case until a final determination or until a further order of the Court. He therefore dismissed the application to dissolve the injunction. *Island Shipping Ltd. v. Devine et al* (1963), 41 D.L.R. (2d), Parts 3 and 4, p. 226.

Ontario High Court . . .

. . . holds that means to enforce arbitration award are available, refuses injunction

On October 10, 1963, Mr. Justice Gale of the Ontario High Court dismissed a union application for an injunction to restrain violation of an arbitration award where the company refused to abide by it pending the outcome of an application for *certiorari* to quash the award. The Court held that Section 34(9) of the Labour Relations Act provided an effective and complete remedy to enforce the arbitration award, and consequently the Court should not give support to the idea that resort to other means of enforcement was available.

The Consumers' Gas Company attempted to adopt a new requirement that persons seeking employment as meter readers should own and be able to drive a motor vehicle. The union contended that this prerequisite had not been used in the past and that it should not now be a requirement. The union then filed a grievance in accordance with the terms of the collective agreement in force between the parties. The grievance was processed and the board of arbitration on May 31, 1963, by a majority decision, upheld the union contention.

In June 1963, the company made application for *certiorari* to quash the award of the arbitration board. The application was dismissed after the hearing. In August the company launched an appeal to the Court of Appeal from the order dismissing the *certiorari* application; the appeal was pending at the time of the application at bar.*

In July, a company official gave the union secretary written notice that an appeal was in prospect and that the requirements as terms of employment for new meter readers would remain unchanged. In August, the company posted a notice that it sought to hire new meter readers; the notice contained the protested requirements.

The union, in its application made on September 9, 1963, sought to restrain the company from imposing the requirement until the matter was finally disposed of and to have the court declare that the company was in contempt of court for failing to abide by the award. At the hearing, counsel for the union, however, did not press for the declaration but dealt only with the injunction application.

Mr. Justice Gale dismissed the application and held that his conclusion was based on the provisions of the Ontario Labour

Relations Act and the circumstances of the case. He ruled that the award was within the scope of the definition of Section 34(1) of the Act and that it was binding upon the parties in accordance with Section 34(8).

He then referred to Section 34(9) and stated that its provisions, as follows, were most important:

(9) Where a party, employer, trade union or employee has failed to comply with any of the terms of the decision of an arbitrator or arbitration board, any party, employer, trade union or employee affected by the decision may, after the expiration of fourteen days from the date of the release of the decision or the date provided in the decision for compliance, whichever is later, file in the office of the Registrar of the Supreme Court a copy of the decision, exclusive of the reasons therefor, in the prescribed form, whereupon the decision shall be entered in the same way as a judgment or order of that court and is enforceable as such.

He then noted that the union had filed a copy of the award in the office of the Registrar on September 11, 1963, and that filing followed the union application for the injunction.

It was contended for the union that the company had violated the terms of the award and that an injunction should be granted in order to give full and proper effect to the award at least until it was disturbed by the Court of Appeal. Mr. Justice Gale thought that the pending appeal did not create a stay of the operation of the award.

It was also contended by the union that the conduct of the company, after the granting of the award and the court decision dismissing the *certiorari* application, constituted a deprivation of the opportunity of employees to prospective jobs which cannot be measured or compensated for by damages.

Three points were raised by counsel for the company and Mr. Justice Gale believed that the right of the court to grant an injunction was answered in these arguments.

It was argued that the court will not grant an injunction where the applicant has an equally effective remedy elsewhere and that, since the Act under which the award was made provided such a remedy, an injunction should not be granted in the proceedings. Mr. Justice Gale agreed with this contention and went on to say that under Section 34(8) of the Act the award became binding upon the parties when it was handed down, and that it required each to abstain from doing anything prohibited by the decision. He stated that if the provisions of Section 34(9) did not exist then the union would have been entitled to an

*The appeal was dismissed on November 1, 1963

injunction. When the award was filed, however, it became enforceable in the same way as a judgment or order of the court.

Then he considered the remedies available to persons who have judgments or orders of the Supreme Court to see whether they rendered the award susceptible of enforcement. In this respect, Mr. Justice Gale thought that the provisions of Rules 552 and 560 were applicable:

552. A judgment requiring any person to do an act, other than the payment of money, or to abstain from doing anything, may be enforced by attachment or by committal.

560. Any judgment against a corporation wilfully disobeyed may be enforced by sequestration against the directors or other officers of the corporation.

He stated that he was quite satisfied that the two rules afforded adequate ways of compelling compliance with the arbitration award.

Mr. Justice Gale said that for the first 14 days after the award was handed down it was binding on the parties and morally it ought to have been observed by them. During that period the court would probably have compelled observance by injunction if it had been necessary.

At the end of the 14-day period, the right of enforcement under Section 34(9) of the Act became available to the union and he held that, thereafter, no court would grant an injunction in separate proceedings, whether or not the award had been filed. The 14-day period had elapsed long before the union instituted the action for injunction. Later, on September 11, the union filed the award, making it enforceable as a judgment or order of the court. He stated that the union had, at the expiration of the 14-day period, two extremely effective means of enforcement, and that being so, he would not grant an injunction.

Mr. Justice Gale ruled that the subsections and rules that he cited were to be honoured and that there was no need for relief by injunction. He felt that the court must discourage multiplicity of proceedings and he noted that the court will normally refuse to accept the idea that a subsequent action may properly be brought to enforce a prior judgment. He held that that was, in essence, the true effect of Section 34 of the Act.

Mr. Justice Gale stated that there was another reason why the injunction ought not to have been granted. The union failed

to make it plain as to how long the posted notice was displayed. It was alleged by counsel for the company that the notice was removed on August 28, and this was accepted by the court. For that reason he ruled that a foundation had not been shown for the issuing of an injunction.

Counsel for the company argued also that the Legislature, by enacting Section 34, created a new right and provided a special remedy of enforcement of that right. That being the case, it was submitted that the court should not support the idea that resort may be had to other means of enforcement. Mr. Justice Gale agreed that Section 34, with the remedies expressly incorporated into it, was to be a complete code in itself. But he did not deal with the company's submission that Section 34 of the Act has now deprived the court of any jurisdiction to entertain actions based upon awards made under the Act.

Counsel for the company referred also to Section 73 of the Act, which reads as follows:

S. 73. Proceedings to enforce a determination of the Board under Section 65, a decision of an arbitrator or arbitration board or an interim order or a direction of a jurisdictional disputes commission may be instituted in the Supreme Court by or against a trade union, a council of trade unions or an unincorporated employers' organization in the name of the trade union, council of trade unions or unincorporated employers' organization, as the case may be.

Mr. Justice Gale held that Section 73 neither advanced nor detracted the company arguments. In his opinion, the section in question does not provide substantive rights. All it does is to bestow upon certain groups or organizations the right to take proceedings which would not be available to them at common law.

Counsel for the union, in answering the contentions advanced by the company, argued that, quite apart from the Act, the court always gives aid in its own proceedings to the enforcement of awards. Mr. Justice Gale ruled that, although this contention might otherwise be sound, he was convinced that, since Section 34(9) provides the means of enforcing awards made under that section, the court should not intervene by permitting other and separate proceedings to be taken. For these reasons, he dismissed the application for injunction. *Tyrrell v. Consumers' Gas Company* (1963), 41 D.L.R. (2d), Part 2, p. 119.

Recent Regulations, Federal and Provincial

Saskatchewan raises minimum wage rates, British Columbia revises minimum wage orders for janitors and for the funeral service business. Three provinces issue apprenticeship rules

In a revision of its minimum wage orders, the Saskatchewan Minimum Wage Board increased full-time rates by \$2.50 a week and part-time rates by 10 cents an hour. The minimum now payable in most workplaces to full-time employees of 18 years and over is \$36.50 a week in 10 cities and \$34.50 a week in other areas. The minimum part-time rate for adult workers is \$1 an hour in the cities and 95 cents an hour elsewhere in the province. Lower rates are again set for employees under 18.

The Employee Pension Plans Registration and Disclosure Regulations, 1963, were brought into force in Saskatchewan on January 31, 1964. These set out the information to be included by trustees of employee pension plans in their annual reports to employee participants.

In British Columbia, a new minimum wage order for the funeral service business established a minimum wage of \$1.25 for male employees. Another new order applicable to both men and women set a minimum wage of \$1 an hour for janitors in buildings other than apartments and for resident janitors in small apartment buildings, and monthly minima ranging from \$72 to \$336 for resident janitors in larger apartment houses.

New trade rules were issued in three provinces. Newfoundland published apprenticeship training plans for the motor vehicle repairer and auto body repairer trades. In Ontario, new apprenticeship regulations extended compulsory certification to the air conditioning and refrigeration trade. In Saskatchewan, regulations respecting the cooking trade were issued under the Apprenticeship and Tradesmen's Qualification Act.

FEDERAL

Appropriation Act No. 5, 1963

The Winter House Building [Incentive] Program Regulations were published on February 26. These regulations (SOR/64-66) set out the conditions to be fulfilled by persons who wish to qualify for the \$500 incentive payment available under the federal winter house building incentive program. This program was described in the October 1963 issue of the *LABOUR GAZETTE* on page 862.

PROVINCIAL

British Columbia Minimum Wage Acts

A new male minimum wage order issued by the British Columbia Board of Industrial Relations established a minimum wage of \$1.25 an hour for male employees in the funeral service business, effective March 16, 1964. This order replaces a 1949 order that set a minimum wage of \$33 a week for employees who worked 40 or more hours a week and of 80 cents an hour for employees with a shorter work week.

Another new order applicable to both men and women set a minimum wage of \$1 an hour for janitors in buildings other than apartments, and for resident janitors in small apartment buildings, and monthly minima ranging from \$72 to \$336 for resident janitors in large apartment houses, effective March 1, 1964. This order supercedes an order issued last November and in force only from January 5 until February 29, which set a general minimum of \$1 an hour for all classes of janitors (L.G., Jan., p. 53.)

Funeral Service Business. The new order for the funeral service business (B.C. Reg. 18/64, gazetted February 6), has substantially the same coverage as the order it replaced. It applies to all male employees in the funeral service business, including funeral attendants and chauffeurs, in Vancouver and its environs, Burnaby, New Westminster, Victoria and the municipal districts of Oak Bay, Saanich and Esquimalt. The only exceptions are musicians and vocalists, employees subject to another order, and persons employed in a supervisory, managerial or confidential capacity.

As indicated above, the revised order sets only one minimum rate, \$1.25 an hour, which applies to all male employees regardless of experience or the length of the work week. The only exceptions are apprentices, handicapped workers and part-time employees with special authorizations from the Board to work for sub-minimum rates. Such employees must be paid the rate specified in the permit.

Time and one-half the regular rate is now payable after 40 hours in a week instead of after 44, and, as before, after 8 hours in a day. This brings the overtime requirement into line with the standard set in the majority of orders issued by the Board within the last year or so.

The daily-guarantee provision, which is unchanged, is similar to that in most other British Columbia minimum wage orders.

Hours are again limited to 8 in the day and 44 in the week, with the usual provision for extended hours in emergencies with the approval of the Board. When a split shift is worked, hours, as before, must be confined within a 12-hour period immediately following commencement of work.

The weekly-rest requirement is also unchanged, providing for a weekly rest of 32 consecutive hours unless the Board approves a different arrangement upon the joint application of the employer and employees concerned.

Where employees in the funeral service business reside on the employer's premises, an arrangement may again be made for such employees to answer emergency calls, subject to the approval of the Board. Time spent in answering emergency calls must not, however, be counted as hours of work for purposes of the overtime, daily guarantee, or split shift provisions.

Occupation of Janitor. As has been indicated, the Board, in this latest order for janitors (B.C. Reg. 9/64, gazetted January 23) has reverted to its former policy of laying down special provisions for resident janitors in apartment buildings.

Resident Janitors. In apartment buildings with four residential suites or less, the minimum wage payable to a resident janitor is \$1 an hour, regardless of experience. (The suite occupied by the resident janitor is not to be counted when computing the number of suites.)

Monthly minima are set for resident janitors in larger apartment buildings. These range from \$72 a month in buildings with five, six or seven residential suites, increasing by \$6 a month for each additional suite to \$336 a month in buildings with 50 suites or more.

In addition to his monthly minimum wage, a resident janitor in a large apartment building (five suites or more) must be paid at least \$1 an hour for time spent looking after single rooms, stores or other accommodation.

If two or more janitors are employed in an apartment building and reside on the premises, the employer must designate at least one as resident janitor and pay him the prescribed monthly rate. The other janitor or janitors residing on the premises must be paid at least \$1 an hour. The order does not impose any limitations on the hours worked by janitors in apartment buildings nor does it restrict shifts.

Every resident janitor and every other janitor employed in an apartment building must, however, be given a weekly rest of 32 consecutive hours. In exceptional cases this may be varied by the Board upon the joint application of the employer and the janitor concerned.

The order does not fix charges for accommodation, but the Board is again empowered to order adjustments made if it considers the accommodation is unsuitable or the charges unreasonable. Also, the employer is now required to post a notice showing the amount charged a resident janitor for the accommodation provided for him.

The maximum charge for gas or electricity remains \$4 a month unless a meter is installed, in which case the resident janitor will be charged according to the amount used.

Janitors. The provisions respecting janitors in other types of buildings are the same as in the order issued last November. The regular minimum for these janitors is \$1 an hour, with provision for lower rates during the first three months of employment. During the first month of employment, the minimum is 85 cents an hour, increasing to 90 cents the second month and to 95 cents the third. A month's employment is defined as 22 working shifts.

As before, janitors employed in buildings other than apartment houses are entitled to a premium rate for overtime. They must be paid time and one-half their regular rate for all hours worked in excess of 8 in the day and 44 in the week, with the usual exception where hours are averaged over a fixed period.

The daily-guarantee provision, which is similar to that in other British Columbia orders, is again restricted to janitors employed by an employer whose sole or principal business is that of providing janitor service. School students doing janitor work after school hours are again guaranteed a minimum of two hours pay at the regular rate for reporting for work in response to a call.

Newfoundland Apprenticeship Act

In Newfoundland, apprenticeship training plans for the motor vehicle repairer trade and for the auto body repairer trade were gazetted January 28 to take effect from January 21. The plans were prepared by the Apprenticeship Advisory Committee of the Motor Vehicle Repairer Trade and approved by the Provincial Apprenticeship Board. As specified in the Act, the minimum age for apprenticeship in either trade is 16 years.

The minimum educational requirement for apprentices in the motor vehicle repairer trade is Grade X or equivalent. In exceptional circumstances, however, applicants with Grade IX or equivalent may be accepted with the approval of the Provincial Apprenticeship Board.

Apprentices in the auto body repairer trade must have at least Grade VIII or its equivalent.

The term of apprenticeship is the same for both trades, four years or 8,000 hours of training, whichever is greater, including the probationary period and the required hours of related school instruction. As in most jurisdictions, time credits may be granted for previous experience or training in the trade.

Apprentices are to work the same hours as journeymen, provided they do not work more than nine hours in a day or more than five days in a week, except for normal overtime and in emergencies as provided for in a collective agreement.

In line with the usual practice, rates of pay for apprentices in these trades are expressed as a rising scale of percentages of the prevailing journeyman's rate. ("Journeyman's wage rate" is defined as the rate agreed to in a collective agreement for certified journeymen by the employer concerned or the rate fixed for a particular locality by a government agency.)

During the first period (six months or 1,000 hours of training, whichever is greater), the minimum payable to an apprentice is 40 per cent of the prevailing journeyman's rate. This rate must be increased by 5 per cent at the completion of every period, reaching 65 per cent during the sixth period. The rate must be increased to at least 75 per cent of the prevailing journeyman's wage during the seventh period and to 85 per cent during the eighth.

Normally there may be only one apprentice in a shop, except that an employer may hire an additional apprentice for every two additional qualified journeymen steadily employed.

Apprentices must be given practical training in the basic skills of the trade. The subjects to be taught are set out in the work schedule for each trade. Courses for apprentices in the motor vehicle repairer trade include instruction in the fundamentals of gas and electrical welding and of machine shop practice. Among other courses, apprentices in the auto body repairer trade must be given training in acetylene and electric welding.

In addition to their practical training, apprentices are required to attend the prescribed full-time educational classes

(eight weeks the first year, six weeks the second and third years and five weeks the fourth year of apprenticeship). An apprentice indentured following a pre-employment course will not, however, be required to attend full-time classes during his first year of apprenticeship. If an apprentice fails to attend the prescribed educational classes, the Board may suspend or revoke his contract of apprenticeship.

As in most jurisdictions, the subjects to be taught at the educational classes are mathematics, related science (physics and chemistry), drafting and trade theory. This last course includes instruction in safety and accident prevention.

Every apprentice must take the prescribed trade tests and examinations. If he fails, his wage increase may be withheld until his progress is satisfactory to the Director. Repeated failures may result in cancellation of his contract.

On successful completion of apprenticeship, the apprentice will be granted a certificate of apprenticeship by the Board.

If an employer engages apprentices, he must designate one person as the shop supervisor of apprenticeship who will be responsible for carrying out the training program for the shop.

Ontario Apprenticeship Act

In Ontario, new regulations under the Apprenticeship Act extended compulsory certification to the air conditioning and refrigeration trade and set out requirements for apprentices in this trade.

The new regulations are the first special rules to be issued for the air conditioning and refrigeration trade, which was declared an apprenticeable trade in 1947. Contracts of apprenticeship have been registered, however, and apprentices have, of course, been subject to the general apprenticeship regulations applicable to all designated trades. (Revised Regulations of 1960, Reg. 17).

For purposes of these regulations, the term "worker in servicing and installing air-conditioning or refrigerating equipment" covers any person who: (1) installs or assembles any component of a refrigerating or air-conditioning system; (2) assembles or connects any pipe or duct used in piping brine or conditioned air; (3) overhauls or repairs equipment used in such systems; and (4) tests, adjusts or instructs in the operation of such systems. It does not apply, however, to a person who repairs or installs hermetically sealed units made for refrigerators in domestic use.

It is now obligatory for a person engaged in the air conditioning and refrigeration trade, other than a registered apprentice

or a person employed for a probationary period, to hold a certificate of qualification, which must be renewed annually. In Ontario, certificates of qualification are compulsory in three other trades—motor vehicle repair, hairdressing and barbering.

Subjects for examination for a certificate of qualification are the same as for an apprenticeship certificate.

Except for setting a minimum age of 16, the regulations lay down no qualifications for apprentices in the air conditioning and refrigeration trade. The general apprenticeship regulations, however, stipulate that apprentices in the designated trades must have a high school entrance certificate or Grade 8 standing or its equivalent.

The term of apprenticeship in the air conditioning and refrigeration trade is five years, including the probationary period.

Each year an apprentice must be given at least 1,280 hours of practical training in the subjects listed in the schedule. These are: trade orientation, tools of the trade, basic principles, refrigeration systems, air conditioning, equipment installation, servicing and safety considerations. This last subject will include instruction in safety controls, guards for belts and couplings, fire precautions and codes and regulations.

An apprentice must also attend the full-time educational day classes in refrigeration at the Provincial Institute of Trades in Toronto.

The ratio of apprentices to journeymen in any shop is one to five. The new regulations were gazetted on February 15 as O. Reg. 27/64 and O. Reg. 28/64.

Saskatchewan Apprenticeship and Tradesmen's Qualification Act

In Saskatchewan, the cooking trade has been brought under the Apprenticeship and Tradesmen's Qualification Act and the first trade rules have been issued.

To qualify for a certificate of journeyman's status in the cooking trade, an applicant must have worked at least 10,000 hours in the trade, including time credits for appropriate trade training.

The ratio of apprentices to journeymen is one to one, except that an employer who does not employ any journeymen may engage one apprentice. A provincial quota is also set. The total number of registered apprentices may not exceed one third of the total number of journeymen in the province engaged in the cooking trade.

In line with the practice in some other trades, the regulations permit one person in any establishment who is engaged full time in the business of the cooking trade to enter

into a contract of apprenticeship with the Director of Apprenticeship.

The new regulations (Sask. Reg. 16/64) were gazetted January 21 and went into force on March 1.

Saskatchewan Employee Pension Plans Registration and Disclosure Act, 1961

The first regulations to be issued under the Saskatchewan Employee Pension Plans Registration and Disclosure Act, 1961, were gazetted on February 14, to take effect from January 31, 1964.

This Act, which is administered by the Registrar of Employee Pension Plans, Department of Labour, is designed to facilitate the collection of information on employee pension plans and to ensure that the participants in any plan are adequately informed of the details of the plan. It provides for the registration of employee pension plans with the Registrar by the trustees, for the publication of such details of the plan as may be required by the regulations, and for the filing of annual reports containing such information as may be prescribed.

The regulations (Sask. Reg. 78/64) stipulate that by April 30, 1964, every trustee of an employee pension plan must furnish the Registrar with a statement setting forth the particulars of the plan, together with a certified copy of the plan and a certified copy of every collective agreement, trust agreement, or any other agreement relating to the plan. When a new employee pension plan is established, the required statement and documents must be filed within 90 days. If a plan is amended, a certified copy of the amendments, together with a copy of any amendments to any pertinent agreement, must be submitted within 60 days. When an employee pension plan is terminated, the Registrar must be notified within 60 days.

The trustee must forward a copy of the pension plan to every employee participant by April 30, 1964. New members must be provided with a copy on enrolment.

The trustee must annually furnish every employee participant with a statement of the plan within 120 days after the end of the calendar year or the end of the policy or fiscal year, depending on how records are kept.

This annual statement must show:

(a) the employee participant's total accumulated contributions, including interest and the rate of interest earned for the year under review;

(b) the total equity the estate of the employee participant would have in the pension plan if he had died on the date of the statement;

(c) the amount the employee participant would receive if he had terminated his employment on the date of the statement; and

(d) the amount of pension accumulated for service by the employee participant up to the date of the statement.

It is also mandatory for a trustee to submit an annual report to the Registrar and, where applicable, to a union, giving the information indicated on the official form. A copy of this report must be sent to an employee participant upon request.

Saskatchewan Minimum Wage Act

In Saskatchewan, the two general minimum wage orders and the nine special orders for particular workplaces or occupations have been revised, following public hearings by the Minimum Wage Board. A twelfth order requiring employers to furnish employees with earnings statements every pay day and on termination of employment was re-issued without change.

In the two general orders and five special orders governing hotels, restaurants, educational institutions, hospitals, nursing homes and amusement places, full-time rates were increased by \$2.50 a week and part-time rates by 10 cents an hour. The minimum for full-time employees 18 years and over is now \$36.50 a week in 10 cities (all of the cities in the province except Lloydminster), and \$34.50 a week in other areas. The minimum part-time rate for adult workers is \$1 an hour in the cities and 95 cents elsewhere in the province.

Coverage. There has been no change in coverage. Together, the two general orders and the nine special orders cover all employees in the province except domestic servants in private homes, agricultural workers, and some minor occupational groups.

Minimum Rates. As well as retaining the regional differentials, the orders have continued the practice of setting weekly rates for full-time employees and hourly rates for part-time workers, with lower minima for employees under 18. Under the two general orders (Orders 1 and 4), and the four orders governing hotels, restaurants, educational institutions, hospitals and nursing homes (Orders 2, 3, 5 and 6), the full-time or weekly rates apply to persons who regularly work 36 or more hours a week, and the part-time or hourly rates apply to employees whose normal work week is less than 36 hours.

The order for amusement places (Order 10) defines "full-time" employees in the same manner as the orders referred to above, but classifies as "part-time" persons who work between 16 and 36 hours a week and as "casual" employees who normally work less than 16 hours a week.

The minimum for full-time employees 18 years and over employed in shops, offices, factories and other workplaces covered by the general orders and in hotels, restaurants, educational institutions, hospitals, nursing homes and amusement places, is now \$36.50 a week in the cities (and within a five-mile radius). In the smaller centres, the minimum wage payable to full-time adult workers is \$34.50 a week. Rates for full-time employees under 18 are \$2 less than the adult rates, \$34.50 a week in the cities and \$32.50 elsewhere in the province.

In the cities, the minimum now payable to workers 18 years and over employed on a part-time basis or as casual employees in amusement places is \$1 an hour. Elsewhere in the province the minimum wage for such employees is 95 cents an hour. Rates for part-time or casual employees under 18 years of age are five cents less than the rates for adults.

The general orders and the orders for hotels, restaurants, educational institutions, hospitals and nursing homes, again impose a quota on part-time employees, limiting the number of such workers to 25 per cent of the total number of full-time employees in an establishment. An employer who has fewer than four full-time employees is, however, allowed to hire one part-time worker. The order for amusement places does not, however, limit the number of part-time or casual workers employed in an establishment.

In addition to the rates described above, the general orders again fix special rates for certain occupations. The minimum for full-time drivers of motor vehicles of up to 7,500 pounds gross weight has been increased to \$39.50 a week in the cities and to \$37.50 in the smaller centres. The part-time rates for drivers in this category are now \$1.05 and \$1 an hour, respectively.

The minimum for full-time messengers is now \$26.50 or \$24.50 a week, depending on the location. The minimum hourly rates for part-time messengers are 80 cents and 75 cents. A messenger who provides his own bicycle must, as before, be paid an additional 50 cents a week, if full-time, and an additional 3 cents an hour, if part-time.

Minimum wage rates in the four special orders for janitors in residential blocks, truck drivers, logging and lumbering, and oil-well drilling, were also increased.

The revised order for janitors in residential blocks (No. 7) increased the rate of full-time janitors and caretakers (employees who work 48 hours a week or more) from \$44 to \$46.50 a week. Part-time employees must now be paid \$1.05 an hour instead of 95 cents.

Under the new trucking order (No. 8) the minimum for truck drivers who drive vehicles with a gross weight in excess of 7,500 pounds is now \$1.05 an hour or 3½ cents a mile, whichever is greater. The rate for helpers and swampers has been increased by 10 cents to \$1.05 an hour.

In logging and lumbering operations, the general minimum is now \$1 an hour, an increase of 10 cents over the previous rate. The minimum for cooks, "cookees", "bull cooks" and watchmen has been increased from \$150 to \$160 a month.

The revised order for oil-well drilling rigs (No. 11) raised the minimum wage from 85 cents to 95 cents an hour.

Three-Hour Minimum. The general orders and the special orders for hotels, restaurants, educational institutions, hospitals, nursing homes and amusement places, again provide for call-in pay. They stipulate that all part-time or casual workers except messengers, truck drivers, students employed outside of school hours, and janitors and caretakers, must receive a minimum of three hours pay at the applicable minimum rate for each occasion on which they are asked to report for duty, whether or not they work three hours.

Working Shifts. As formerly, the hours of employees in hotels, restaurants, educational institutions, hospitals and nursing homes, must be confined within a 12-hour period, and employees must not be required to report for duty more than twice during this period. Female employees in these workplaces who finish work between the hours of 12:30 a.m. and 7 a.m. must be provided with transportation to their places of residence at the employer's expense.

Deductions from Wages. The orders for hotels, restaurants, educational institutions, hospitals and nursing homes, contain substantially the same rules with respect to deductions as formerly. Employers who require their employees to wear uniforms or other special articles of clothing must provide them without cost to the employees and may not charge for repairs or laundering.

Deductions for board or lodging are again permitted, however, provided the employees agree to accept these facilities. In hotels and restaurants throughout the province, the maximum charge remains 25 cents for a night's lodging and 90 cents a day for meals or 30 cents for single meals. The same maxima apply in educational institutions, hospitals and nursing homes, except that they are limited to persons receiving \$37.50 a week or less (previously \$35 a week or less).

In all five types of workplaces, the minimum meal period is one half hour for meals consumed on the premises and one hour for meals eaten elsewhere.

In logging and lumbering operations the maximum charge for board and lodging remains \$2 a day.

Public Holidays. All employees subject to these orders except janitors and caretakers in residential blocks, employees in logging and lumbering, and casual workers in amusement places, are again entitled to eight holidays a year with wages at their regular daily rate (exclusive of overtime). The same eight days are specified: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Remembrance Day and Christmas Day.

As before, there is some variation in the orders as regards payment for time worked on a holiday. Employees in factories, shops, offices and other workplaces subject to the general orders who work on a holiday, must be paid their regular wages for the day plus time and one-half for every hour or part of an hour worked. A similar provision is contained in the order for truck drivers.

If employees in hotels, restaurants, educational institutions, hospitals and nursing homes, are required to work on any of the eight holidays specified, they must receive, in addition to their regular daily wages, payment at the regular rate for all time worked or, if full-time employees, equivalent time off with pay within the next four weeks.

Employees engaged in the operation of a drilling rig who are required to work on a holiday are to be paid their regular daily wages plus their regular rate of pay for all time worked.

In amusement places, full-time and part-time workers must be paid the same as persons subject to the general orders for time worked on a holiday. Casual employees in such places are not entitled to holidays with pay, however, but, if they do work, they must be paid one and one-half their regular rate.

If the wages of an employee (exclusive of overtime), vary from week to week, payment for a holiday must be computed on the basis of his average daily earnings (exclusive of overtime) for the four weeks immediately preceding the week in which the holiday occurs.

The orders again provide that, when Christmas Day or New Year's Day falls on a Sunday, the following Monday is to be counted as a holiday. Similarly, when the Monday after Remembrance Day is

(Continued on page 380)

Monthly Report on Operation of the Unemployment Insurance Act

Number of claimants on last day of January was 51 per cent below total on same date in 1963. Eighty-five per cent of decline from January 1963 figure was in male claimant total

Claimants for unemployment insurance benefit numbered 598,600 on January 31. This total was a little more than 10 per cent larger than the number of 532,600 on December 31, but nearly 15 per cent below the total of 703,600 on January 31, 1963.

Of the reduction of 105,000 from the previous January's total, 85 per cent were males; and males made up only 80 per cent of the increase of 66,000 since December 31. The decline from the year before in the number of unemployed male claimants, amounting to nearly 90,000, reflects the improved employment situation.

The total of 598,600 on January 31 was made up of 459,800 claimants for regular, and 138,800 claimants for seasonal benefit, making up 76.8 and 23.2 per cent of the total respectively, compared with corresponding percentages of 77.3 and 22.7 on January 31, 1963.

On December 31, seasonal claimants made up only 15.2 per cent of the total. The higher percentage increase in seasonal than in regular benefit claimants during January is characteristic of that season of the year. It is influenced by two things: (1) the heaviest seasonal benefit claim load occurs in December and January and (2) the fact that, due to the additional computations required during this season on cases ineligible for regular benefit, a significant proportion of the cases classed temporarily on December 31 as regular doubtless finally qualified only for seasonal benefit.

Initial and Renewal Claims

Initial and renewal claims filed during January numbered 258,600, a reduction of 25 per cent compared with December 31 and of 20 per cent compared with January 31 last year. The current total is the lowest for January for the past 10 years.

In a comparison of current unemployment insurance statistics with those for a previous period, consideration should be given to relevant factors other than numbers, such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation. Claimants should not be interpreted either as "total number of beneficiaries" or "total job applicants."

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process.

Beneficiaries and Benefit Payments

The average weekly number of beneficiaries in January was estimated to be 440,900, compared with 293,800 in December and 536,900 in January 1963.

Payments during the month totalled \$46,400,000, which was \$17,000,000 more than the total of \$29,400,000 in December but \$12,000,000 less than the January 1963 total of \$58,400,000.

The average weekly payment was \$25.07 in January, \$24.99 in December and \$24.79 in January 1963.

Insurance Registrations

On January 31, insurance books or contribution cards had been issued to 5,075,261 employees who had contributed to the Unemployment Insurance Fund at one time or another since April 1, 1963.

On the same date, registered employers numbered 337,806, an increase of 443 since December 31.

Enforcement Statistics

During January, 11,251 investigations were conducted by enforcement officers across Canada. Of these 7,113 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 783 were miscellaneous investigations. The remaining 3,355 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 250 cases, 129 against employers and 121 against claimants.* Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 1,445.*

* These do not necessarily relate to the investigations conducted during this period.

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in January totalled \$30,782,-410.60, compared with \$31,750,618.75 in December and \$31,387,634.93 in January 1963.

Benefits paid in January totalled \$46,411,-645.40, compared with \$29,360,515.60 in

December and \$58,559,875.69 in January 1963.

The balance of the Fund on January 31 was \$42,895,204.45; on December 31 it was \$58,524,439.25 and on January 31, 1963 it was \$71,803,065.26.

Monthly Report of Placement Operations of the NES

Placement activity in local offices of the National Employment Service was at a high level in February. Placements totalled some 66,700, the second highest February total since 1945.

The number also was 11.8 per cent higher than the average for the month during the previous five years, and 5.6 per cent higher than the total in February 1963. In contrast, placements in January were 1.8 per cent fewer than a year earlier.

The strong demand for male workers evidenced in the preceding months continued during February, and approximately 44,400 male placements were effected. This represented an increase of 12.7 per cent over the same month in 1963.

The placement of some 22,300 women workers during the month reflected a decrease of 6.1 per cent from the previous February. This, however, was less than half the percentage decrease recorded in January, and the February decrease from the previous year was concentrated in placements of casual workers.

About 2,700 of the placements made in February involved the movement of workers from one local office area to another. This was 4.0 per cent of all placements, a percentage unchanged from January and practically the same as in February 1963.

The cumulative total of placements for the first two months of 1964 was 140,100, an increase of 1.6 per cent over the corresponding total last year. Regional distributions and percentage increases or decreases were as follows:

	2 Months Ended			
	February 1964		February*	
Atlantic	4,800	- 1.2	10,500	+6.1
Quebec	21,400	+15.8	45,600	+5.7
Ontario	22,800	- 2.3	47,800	-4.8
Prairie	11,300	+ 5.4	23,500	+4.0
Pacific	6,400	+10.9	12,700	+5.6

Employers notified the Employment Service of some 87,400 vacancies during February, an increase of 10.4 per cent over the number in February 1963. As was the case in January, this was the largest number of vacancies notified in the corresponding month of any year since 1947.

Male vacancies accounted for some 55,000, or 62.9 per cent of the total, and showed an increase of 16.3 per cent over the total for the same month last year. This continued the pattern experienced in recent months.

Female vacancies amounted to 32,400, an increase of 1.6 per cent over February 1963. This was a reversal of the trend toward year-to-year decreases in vacancies for women workers that had been in evidence since the latter part of 1963.

Decisions of the Umpire under the Unemployment Insurance Act

Decision CUB 2299, Jan. 13, 1964

Summary of the Main Facts: The claimant is a member of a union and his case is to serve as a test case in respect of two other claimants.

He filed a renewal application for unemployment insurance benefit on May 22, 1963. He had been employed as an electrician at a rate of pay of \$2.65 an hour from April 11, 1963 to May 22, 1963, when he walked off the job on the advice of his union.

While on continuing claim, he had worked in another town as an electrician at an

hourly rate of pay of \$3.10 from July 22, 1963 to July 29, 1963, when he was laid off because of a shortage of work.

On August 21, 1963, the local office notified him of an offer of continuing employment as an electrician at an hourly rate of pay of \$2.65, which was reported to be the prevailing rate in the district for that occupation. The hours of work were eight a day and 40 a week, day work, and the place of employment was one mile distant from his home.

* Cumulative regional totals may contain minor variations due to rounding.

The claimant's reasons for non-acceptance of the offer were that the business agent of his local had told him that he could not accept the job, as "it is below the rate of pay they are fighting for." He was told also that if he accepted the job he would be fined.

The local office commented that the man appeared to be willing to accept this offer of work but he had been told by his business agent that if he did he would be fined by his union.

He appears to be genuinely anxious to work but will not (or cannot) go against his union. The employer, . . . does not have any agreement with the [union] and although the local union rate—to the best of our knowledge—is \$2.65 per hour, there has been controversy between the local union and contractors in this area. The union is holding out for \$3 per hour and at present they are being paid this rate by two contractors who are working in this area. They also state that if [proposed employer] is prepared to sign an agreement with the union and pay \$3 per hour they will then allow their members to go to work for him.

The insurance officer disqualified the claimant and suspended benefit from August 18, 1963 to September 28, 1963, inclusive, in accordance with section 59(1)(a) of the Act, on the ground that he had, without good cause, refused or failed to apply for such situation or failed to accept it when it was offered to him. The insurance officer notified the claimant of the disqualification in a letter dated August 26, 1963.

In regard to this decision, the insurance officer commented:

. . . The employment was considered suitable as it was at the prevailing rate in the claimant's registered occupation. The claimant's reason for not accepting the position cannot be considered just cause, as it is contrary to the principle set out in CUB 2022 [L.G. 1962, p. 1061], where the Umpire ruled the pressure which the association exerted on the claimant was, objectively speaking, a matter which had nothing to do with the contract of employment, the conditions of which he had freely accepted and, consequently, was a question of a purely personal nature between him and his association . . . the provisions of section 61 were made solely to protect the employee, as an individual, against an employer who might take the initiative to prevent him from becoming, from continuing to be, or from refraining to become a member of a workers' association and making him lose his unquestionable right in the matter.

The claimant appealed to a board of referees on August 29, 1963, and said he had refused the job offered to him on August 21 because the union advised him that he could not work for a non-union contractor. The business agent had told him, he said, that he would be fined and might lose his union membership if he accepted the work. "I do not think I should be forced to lose my union membership."

The majority decision of the board of referees, which heard the case on September 26, said that the board was given copies of the constitution and rules of the claimant's union as well as a copy of the standard agreement then in effect.

The union representative at the hearing referred to section 3(c) of the local agreement, which reads:

No member of the union shall be permitted to work at the electrical construction work as covered by this agreement, except for employers signatories to local or international agreements of the [union].

The representative further pointed out that if any member violated any of the rules in the constitution or in the local agreement, he would be subject to disciplinary action, which usually took the form of cancellation of the member's union card.

It was the majority decision of the board, the employee representative dissenting, that, in view of the Umpire's decision in CUB 2022, "the claimant without good cause refused or failed to apply for or failed to accept a situation in suitable employment notified to him on August 2, 1963." The board disallowed the appeal and upheld the insurance officer's decision.

The dissenting member of the board of referees stated:

. . . With all respect to other members of this board, I wish to dissent against the board's majority ruling. I believe the claimant had good cause not to apply or accept employment at the hourly rate quoted. He has a right to belong to the organization of which he is a member. By virtue of this membership he must conduct himself on majority rulings that are laid down by this association to continue his membership. The hourly rate for the organization is three dollars; therefore, he could be fined or expelled if he did not comply and took a job that paid \$2.65 per hour. There are also chances of intimidation that could bring physical or moral violence to himself, which has to be given some consideration. I think these points are basic and therefore, do not go along with the insurance officer's decision.

The union appealed to the Umpire. The appeal reads:

[The local union] has an agreement with electrical contractors working in the area that states: "Article 1(c) No member of the union shall be permitted to work at the electrical construction work as covered by this agreement except for employers signatories to local or international agreements of the [union]." The [employer] to whom this man was referred for employment has no contract with the Local or the International and to accept this job would have placed the man in contravention of the agreement and also contrary to the International constitution Article 27 Sec. 2(2), either of which could cause the member the loss of his card. The member at all times is required to be in good standing before he can obtain employment with employers who are signed to agreements with locals of the [union.] Section 61(b) of the U.I. Act clearly states that

he has the right to protect his membership in the union and he cannot be disqualified from payments by doing so.

The decision CUB 2022 referred to by the U.I. officer clearly outlines a case where the man had gone to work and then left the job on learning that he would face a fine or expulsion if he continued working there. Such is not the case here, the member knew that he would not be allowed to start to work for this employer as there was no agreement and the only way he could accept the job was to drop out of the union, which he did not choose to do. No other employment office that I have knowledge of directs a man to a non-union contractor with the threat that failure to take this employment would result on loss of benefits and I feel, therefore, that the decision of the board of referees (majority) should be reversed and the member granted benefits.

In a statement of observations dated November 15, 1963 for consideration by the Umpire, the Chief of the Adjudication Division of the Unemployment Insurance Commission said:

2. The claimant refused the prospective job because of the threat of a fine and possible loss of union membership if he accepted the employment. However, insofar as the prospective employer was concerned, the claimant could have continued to be a member of his union and to observe the lawful rules thereof. Consequently, it is submitted that this is not a case which gives rise to the application of section 61 of the Act and, therefore, it should be decided solely under section 59 of the Act.

3. The employment offered to the claimant, which was in his usual occupation, was not covered by agreement with this union and the determination for suitability as to rate of wages was based on the rate "recognized by good employers." According to the evidence before the insurance officer, the rate "recognized by good employers" is \$2.65 per hour and this evidence was also accepted at the hearing before the board of referees. It is therefore submitted that the employment offered was suitable within the meaning of section 59(2)(b) of the Act and that the claimant has not established good cause for refusing to apply for a situation in suitable employment when it was offered to him (section 59(1)(a) of the Act).

4. The Umpire in CUB 2022 and CUB 2181, which are cases similar in principle to the present one, decided that the claimant had not shown just cause for having voluntarily left his employment on the grounds that the union did not allow him to remain in the employment of his employer "under penalty of fine and even expulsion". The Umpire considered that the pressure exerted on the claimant by the union was a question of purely personal nature between him and his union. The Umpire also decided that section 61 did not apply in circumstances where the claimant took the initiative in separating from his employment at the request of, or because of, the pressure exerted by his union. It is submitted that this jurisprudence has equal application to the question of refusal to apply for a situation in suitable employment, which is involved in the present case.

5. As the union, and not the prospective employer, had imposed the condition whereby the claimant would allegedly lose the right to continue to be a member and to observe the

lawful rules of his union, it is submitted that section 61 of the Act does not apply in the present case.

6. It is respectfully submitted that the union's appeal be dismissed.

On behalf of the union, the Director of Legislation, Canadian Labour Congress, requested an oral hearing before the Umpire, which was held in Ottawa on December 17, 1963. The Director of Legislation argued, among other things, that, in view of the provisions of section 61 of the Act, the claimant could not be disqualified from receiving benefit under section 59(1)(a) of the Act. He based his contention on what he said was the jurisprudence established by the Umpire in decision CUB 644.

Considerations and Conclusions: Section 61 of the Act reads:

Notwithstanding anything in this Act, no insured person is disqualified from receiving benefit by reason only of his leaving or refusing to accept employment if by remaining in or accepting the employment he would lose the right

- (a) to become a member of,
- (b) to continue to be a member and to observe the lawful rules of, or
- (c) to refrain from becoming a member of any association, organization or union of workers.

In decision CUB 644, the Umpire dismissed the insurance officer's appeal on the ground that the employment which had been offered to a claimant was not suitable in that it was at a lower rate of earnings "than that paid in the district by agreement between employers and employees."

Consequently, the remarks made by the Umpire at the end of CUB 644 regarding the interpretation of the provisions contained in what is now section 61 of the Act would appear to be solely in the nature of an *obiter dictum* (incidental remark). Otherwise, it would be very difficult to explain the stand taken by the Umpire (a) in decision CUB 1331, wherein it was stated that "The rate of earnings recognized by good employers, as stipulated in section 59 of the Act, does not necessarily mean union rates," and (b) in several decisions dealing with participation in a labour dispute in which it was constantly held that the phrase "notwithstanding anything in the Act" does not have the effect of extending the application of the exceptional provisions of section 61 to labour dispute cases coming under section 63 of the Act.

In any event, and for the same reasons as those which I have clearly exposed in decision CUB 2022, I consider that the claimant was rightly disqualified from receiving benefit pursuant to section 59(1)(a) of the Act and that section 61 does not

apply in his case. In that decision I said, among other things:

(Translation) If it were recognized that, in a case of this kind, a claimant could avail himself of the exceptional provisions of section 61, this would be admitting that the Unemployment Insurance Act gives to others than insurance officers, boards of referees and the Umpire the power to decide the question of entitlement to benefit and to others than the Unemployment Insurance Commission, the power to make regulations, which seems to me to be an impossible thing. I believe, on the contrary, that the provisions of section 61 were made solely to protect the employee, as an individual, against an employer who might take the initiative in preventing him from becoming, from continuing to be, or from refraining from becoming a member of a workers' association and in making him lose his unquestionable right in this matter.

I consequently decide to dismiss the Brotherhood's appeal.

This decision shall apply *mutatis mutandis* (with necessary changes) in the case of the other two claimants.

Decision CUB 2303, Jan. 13, 1964

Summary of the Main Facts: The claimant, 24 years of age, filed an initial application for unemployment insurance benefit at the Vancouver local office on September 19, 1963. According to the application, he had worked for a forest products company at Powell River, B.C., as a general labourer (registered occupation—junior executive trainee) at a wage of \$2.23 an hour from August 15, 1963 to September 13, 1963.

His reason for separation from this employment reads:

I left voluntarily. I was doing labour work there but I have graduated BSc. from U.B.C. and wish to get work in my field. Capable and available for work in Vancouver as of 16 Sept. 63.

In the confirmation of separation (form UIC 479), the employer stated on September 25: "Reason given was that he was returning to U.B.C." In the same form, the employer indicated that the claimant began his employment on August 22, 1962 and that his rate of pay was \$2.18 an hour and up.

On September 27, the local office informed the claimant of the reason for separation given by the employer and asked him to comment. At the time of adjudication, no reply had been received.

On the information that had been presented, the insurance officer disqualified the claimant and suspended benefit from September 15 to October 26, 1963 on the ground that he had voluntarily left employment without just cause (section 60(1) of the Act). The insurance officer notified

the claimant of this disqualification in a letter dated October 4, 1963.

The claimant's reply, dated October 3, 1963, to the request of September 27 referred to above reads:

I left my job at Powell River with the idea of returning to University to take a one-year course in education, leading to a permanent teaching certificate. However, when I arrived in Vancouver I received word from the university that my scholastic average in one major was not high enough to gain admittance. Also I was lacking a biological science. In order to rectify this, I shall have to return to U.B.C. for one summer session. Also my job in Powell River was simply common labour and since I will be receiving my Bachelor of Science degree in a couple of weeks, and I'm sure you understand that this is not suitable for me.

Now that I am in Vancouver, I plan to find work which is more suitable for me. I am not at University.

The claimant appealed to a board of referees and said:

Sometime during this month of October 1963, I shall be receiving a Bachelor of Science degree from the University of British Columbia. Since my job in Powell River was simply a labouring job and there was nothing else available, I was forced to come to Vancouver to find something more suitable for my qualifications.

When university students work in Powell River during the summer, they must sign a statement to the effect that their work will be terminated on or about the middle of September, when they return to school. This is to protect the employer from having to hire the student on as a full-time employee if the student should decide to take a year out from school to finance his education. In May 1962, I signed such a statement.

In July 1962, I attended the summer school session at U.B.C. and then returned to Powell River to await my results. When I found that my results in one course were not sufficient to qualify for a pass mark, I was forced to rewrite this examination in August 1963. For this reason I worked in Powell River for that year on a casual basis, with the understanding that my work would terminate in Sept. 1963. Therefore, when I received my results in Sept. 1963, and realized that I had completed everything necessary for my degree, I found it necessary to come to Vancouver to find a suitable job.

I feel I was 100% justified in leaving a labouring job in Powell River, which was on a part-time or casual basis, so that I might have the opportunity of finding something in Vancouver which would justify spending 4½ years and \$6,000 attending university. . .

The unanimous decision of the board of referees which heard the case in Vancouver on October 30, 1963, reads:

The essential issue presented to this board is that the claimant separated from his employment voluntarily in which he could have remained, and he did so without a definite prospect of other employment, for personal reasons. These reasons would be entirely valid from the claimant's point of view, since obviously a claimant shortly to receive a B.A. Sc. degree would want to obtain employment commensurate with that qualification.

While the board has the utmost sympathy with the claimant's ambitions and would congratulate him upon his initiative and resourcefulness in taking a labouring job in order to accumulate funds to further his education, we find ourselves in exactly the same situation which faced the insurance officer. That situation is that the claimant's separation from employment was a voluntary action, and as we have stated, for personal reasons; and such reasons cannot be accepted as just cause within the meaning of the Act, however valid they may be from a claimant's point of view.

Consequently we find ourselves with no alternative but to sustain the insurance officer's ruling which has imposed a disqualification under section 60(1) of the Act from 18 [sic] September 1963 to 26 October 1963. We confirm this disqualification and the appeal is therefore disallowed.

The claimant applied to the chairman of the board of referees for leave to appeal to the Umpire on the following grounds:

I base my appeal on section 59(2)(c) of the Unemployment Insurance Act, which states "Employment of a kind . . . to be so employed".

As it was stated in my appeal to the board of referees, I was working as a manual labourer and feel that this type of work should be deemed not suitable for a person who has received a university education and has received a bachelor of science degree.

Leave to appeal to the Umpire was granted to the claimant on the following grounds:

In determining whether consent for leave to appeal to the Umpire should be granted, the chairman is governed by a directive from the Umpire himself, who is a Judge of the Exchequer Court of Canada and the final authority in the interpretation of the Act. That directive is that appeals should not be sent to him unless they embody some new principle for which no precedent exists. In evaluating this claimant's request I recognize that there are Umpire's decisions on record dealing with cases identical in principle. However, I respectfully suggest that there are some details in connection with this claimant's case which are essentially different to the precedents quoted by the insurance officer. It would seem to me to be in the best interests of all parties concerned to have the Umpire issue a ruling on this particular claimant's case and for that reason I am consenting to his request for leave to appeal to the Umpire.

Considerations and Conclusions: The claimant has adduced no convincing proof that he had been employed for a specified period of time by mutual agreement and that continuing work would no longer have been available for him after September 13, 1963, if he had desired to remain employed as a general labourer.

Since the claimant voluntarily chose to leave his employment, the burden was on him to prove, as required by section 60(1) of the Act, that he had "just cause" for leaving it.

Whether an individual has just cause for voluntarily leaving his employment must be measured by what an ordinary prudent person would have done under similar circumstances.

While it is understandable and commendable that the claimant should want to better himself by obtaining employment commensurate with his new qualifications, his decision to quit when he did is wholly a matter of personal choice with no element of urgency, necessity or compulsion. Furthermore, he made his decision to quit not only without having any definite prospect of other employment in the near future, but also even without having made any adequate enquiries as to the possibility of such prospects in the Vancouver area, where he subsequently registered for employment and said he was available for work.

As the claimant could have registered for other employment at any National Employment Office in British Columbia without quitting his job as a labourer, in quitting as and when he did he was, in a sense, requesting the Unemployment Insurance Fund to subsidize him during a period of purely voluntary unemployment.

As the Act does not envisage such use of the Fund, I consider that the claimant was rightly disqualified from receiving benefit pursuant to section 60(1) of the Act.

I consequently decide to affirm the unanimous decision of the board of referees and to dismiss the claimant's appeal.

Recent Regulations

(Continued from page 314)

proclaimed a public holiday, the holiday provisions apply to the Monday and not to November 11.

Minimum Age for Employment. In keeping with former practices, a minimum age of 16 is again fixed for employment in hotels, restaurants, educational institutions, hospitals and nursing homes, workplaces outside the minimum-age require-

ment of the Factories Act. The same age requirement applies in amusement places except that, as before, the Minimum Wage Board is authorized to grant exemptions.

Effective Dates. The new orders were gazetted on February 14 as Sask. Reg. 65/64 to 76/64, and went into force on March 1, replacing orders published in June 1962 (O.C. 941/62 to 952/62).

WAGE SCHEDULES

Wage Schedules Prepared and Contracts Awarded in February Works of Construction, Remodelling, Repair or Demolition

During February the Department of Labour prepared 224 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, a total of 162 contracts in these categories was awarded. Particulars of these contracts appear below.

In addition, 135 contracts not listed in this report and which contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation and the Departments of Defence Production, Post Office, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall discriminate against in regard to employment because of his race, national origin, colour or region, nor because he has made a complaint with respect to alleged discrimination.)

Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in February for the manufacture of supplies and equipment were as follows:

<i>Department</i>	<i>No. of Contracts</i>	<i>Aggregate Amount</i>
Defence Construction (1951) Limited	1	\$40,508.70
Defence Production	122	1,446,079.00
Post Office	21	179,872.10
Royal Canadian Mounted Police	20	730,589.19
Transport	3	32,553.90

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no even shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) The working hours shall be those fixed by the custom of the trade in the district, or if there be no such custom, then they shall be fair and reasonable hours;

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour showing the applicable wage deemed to be required in the execution of the work. These wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classification to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Wage Claims Received and Payments Made in February

During February the sum of \$1,783.84 was collected from four contractors for wage arrears due their employees as a result of the failure of the contractors, or their subcontractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 131 workers concerned.

Contracts Containing Fair Wage Schedules Awarded in February

DEPARTMENT OF AGRICULTURE

Harrow Ont: Parr Bros, installation of power distribution system for Research Branch Establishment. *Summerland B C:* Pacific Pipe & Flume Ltd, improvements to irrigation water supply system; W H Taylor Construction Ltd, construction of moth rearing room extension, Entomology Bldg, Research Station.

CENTRAL MORTGAGE AND HOUSING CORPORATION

Montreal Que: Sylvio Rodier, interior painting of apartments, St Georges Gardens; Tousignant Decorator Co, interior painting of apartments, Pie IX Blvd; Duke Industries Inc, interior painting of apartments, Place Benoit; Vallieres & Cusson Reg'd, interior painting of apartments, Cloverdale Park; Mauger & Perreault, interior painting of apartments, Le Domaine; Deschenes & Perreault, repairs to suite & public areas, Le Domaine. *Pointe Claire Que:* Vallieres & Cusson Reg'd, interior painting of apartments & public area, Delmar Court Apartments.

In addition this Corporation awarded 25 contracts containing the General Fair Wages Clause.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

Kootenay Indian Agency B C: C Hanemayer Construction Ltd, plumbing improvements & associated work, Kootenay IRS.

DEFENCE CONSTRUCTION (1951) LIMITED

Dartmouth N S: The J P Porter Co Ltd, demolition & removal of French Cable Wharf, RCN. *Halifax N S:* Froggett & van der Mout, interior painting of 94 apartments, Windsor Park. *Campagetown N B:* Simpson Construction Ltd, addition to officers' mess. *Chatham N B:* The Edward Milner Co Ltd, replacement of refrigeration units in Army Ration Depot, RCAF Station. *St Jean Que:* Legendyk & Co Ltd, fire retardant painting interior of four barrack blocks, RCAF Station. *Val d'Or Que:* Paquin Construction Co Ltd, construction of armament compound, RCAF Station. *Barriefield Ont:* D J Cox Painting & Decorating, interior painting of six bldgs, Vimy Barracks; Automatic Sprinkler Co of Canada Ltd installation of automatic sprinkler system in Bldg C-36. *Camp Borden Ont:* Planned Renovators Ltd interior painting of 21 bldgs. *Downsview Ont:* Frank Ignagni, interior painting, Bldg No. 17, RCAF Station. *Petawawa Ont:* Burnley Contracting Co Ltd, interior repainting of 26 bldgs, Camp. *Rockcliffe Ont:* Allan Stewart & Basil Broad Construction Co Ltd, replacement of sanitary sewers, RCAF Station; Planned Renovators Ltd, epoxy coating of bathrooms in 150 PMQs, RCAF Station. *Shirley Bay (Ottawa) Ont:* J G Bisson Construction Ltd, extension of water supply, DRB. *Shilo Man:* Western Asbestos (1963) Ltd, industrial reflooring of eight bldgs, Camp. *Winnipeg Man:* North Star Decorating Co Ltd, interior painting of 104 PMQs, Fort Osborne Barracks; Belco Building & Decorating Co Ltd, interior painting of four bldgs, RCAF Station. *Calgary Alta:* J Mason & Sons Ltd, interior painting of 10 bldgs, Currie Barracks. *Cold Lake Alta:* Fraser & Rice Construction Ltd, supply & erection of school (21 transportable units), RCAF Station. *Edmonton Alta:* Ernest Painting & Decorating Ltd, interior painting of 218 PMQs, Griesbach Barracks. *Comox B C:* Art Greenall Ltd, epoxy coating of bathrooms in 100 PMQs, RCAF Station. *Esquimalt B C:* Farmer Construction Ltd, alterations to bldg No. 210 & construction of offices in Bldg No. 109, HMC Dockyard; W R Menzies & Co Ltd, steam connection of bldg to central heating plant; Parfitt Construction Co Ltd, renovations to Bldgs Nos 91, 53 & 53A. *Vernon B C:* R E Postill & Sons Ltd, replacement of wood stove water line, Camp.

DEPARTMENT OF DEFENCE PRODUCTION

In addition, this Department awarded 56 contracts containing the General Fair Wages Clause.

NATIONAL HARBOURS BOARD

Halifax N S: J G Fitzpatrick Ltd, construction of truck loading facilities for grain elevator. *Montreal Que:* Leeds Bridge & Iron Works Ltd, construction of truck loading facilities on Jacques Cartier Pier, Section 18.

NORTHERN CANADA POWER COMMISSION

Fort Smith N W T: McNamara Construction Western Ltd, construction of power plant, dams, spillway & access roads, Taltson River Hydro Electric Development.

POST OFFICE DEPARTMENT

This Department awarded one contract containing the General Fair Wages Clause.

PROJECTS ASSISTED BY FEDERAL LOAN OR GRANT

Burlington Ont: Swansea Construction Co Ltd, construction of east end sanitary sewer (phase 2). *Waterloo Ont:* E & E Seegmiller Ltd, construction of trunk sanitary sewer from Glenridge Place to Marshall Street. *Edmonton Alta:* P Kiewit & Sons Ltd, construc- tion of sewage treatment lagoons—Contract No 271; McNamara Construction Western Ltd, construction of northeast interceptor sewer (42" pipe)—Contract No 273; A A Voice Construction, construction of northeast interceptor sewer (36" pipe)—Contract No 274; G C McLeod Co, construction of northeast interceptor sewer (33" pipe)—Contract No 275; Burns & Dutton Construction Co Ltd, construction of steel trestles—northeast interceptor sewer—Contract No 278.

DEPARTMENT OF PUBLIC WORKS

Arnold's Cove Nfld: Pelley Enterprises Ltd, wharf reconstruction. *Avondale Nfld:* J J Hussey Ltd, construction of post office bldg. *Campbellton Nfld:* Twyne, Potter & Co, construction of post office bldg. *Cape Broyle Nfld:* J J Hussey Ltd, construction of post office bldg. *Carmanville Nfld:* Wm A Trask Ltd, construction of post office bldg. *Con- ception Harbour Nfld:* J J Hussey Ltd, construction of post office bldg. *Elliston Nfld:* Bloomfield Building Supplies, construction of post office bldg. *Ferryland Nfld:* J J Hussey Ltd, construction of post office bldg. *Gambo Nfld:* Davis Construction Ltd, con- struction of post office bldg. *Herring Neck Nfld:* Twillingate Engineering & Construction Co Ltd, construction of post office bldg. *Lawn Nfld:* Aylwards Ltd, construction of post office bldg. *Lewisporte Nfld:* M & T Construction Co Ltd, construction of marine haulout. *Little Cataline Nfld:* Bloomfield Building Supplies, construction of post office bldg. *Norman's*

Cove Nfld: Elzear Crocker, construction of post office bldg. *Norris Point Nfld*: James E Shears, construction of post office bldg. *Point Leamington Nfld*: Gid Sacrey Ltd, construction of post office bldg. *Port Blandford Nfld*: Bloomfield Building Supplies, construction of post office bldg. *Roberts Arm Nfld*: Ryan Bros, construction of post office bldg. *Rocky Harbour Nfld*: James E Shears, construction of post office bldg. *St Bernard Nfld*: Kevin Power, construction of post office bldg. *St John's Nfld*: J J Hussey Ltd, alterations to biological laboratory & exterior fire escape, Fisheries Research Laboratory Bldg. *St Mary's Nfld*: Empire Plumbing, Heating & Construction Ltd, construction of post office bldg. *Summerford Nfld*: Twillingate Engineering & Construction Co Ltd, construction of post office bldg. *Topsail Nfld*: Aylward's Ltd, construction of post office bldg. *Trinity Nfld*: Benson Builders Ltd, construction of post office bldg. *Victoria Nfld*: Aylward's Ltd, construction of post office bldg. *Crapaud P E I*: Donald A MacPherson Construction, construction of post office bldg. *Wellington Station P E I*: Fitzgerald & Snow Building Contractors Ltd, construction of post office bldg. *Church Point N S*: Bernard & Gerard Lombard, reinforcing northern face of wharf. *Ingonish Beach N S*: E K Potter Ltd, wharf repairs. *Joggins N S*: K P Allen Ltd, construction of post office bldg. *Lower Wedgeport N S*: Austin J Cottreau, construction of post office bldg. *Margaree Forks N S*: McIsaac & McLennan, construction of post office bldg. *Margaree Harbour N S*: Duncan MacDonald, construction of post office bldg. *Musquodoboit Harbour N S*: Fisher & Miller Construction, construction of post office bldg. *Westchester Station N S*: MacBurnie Bros Ltd, construction of post office bldg. *Albert N B*: Gauvin Construction Ltd, construction of post office bldg. *Allardville N B*: Connolly Construction Ltd, construction of post office bldg. *Clair N B*: Ouellon Construction Ltd, construction of post office bldg. *Eel River Crossing N B*: Ouellon Construction Ltd, construction of post office bldg. *Grande Anse N B*: Ouellon Construction Ltd, construction of post office bldg. *Jacquet River N B*: Ouellon Construction Ltd, construction of post office bldg. *Memramcook N B*: Gauvin Construction Ltd, construction of post office bldg. *Fredericton N B*: R L Kilburn Ltd, interior painting, federal bldg. *Paquetville N B*: Ouellon Construction Ltd, construction of post office bldg. *Baie Comeau Que*: Manik Construction Ltd, wharf repairs. *Cacouna Que*: Joseph Boulay, construction of post office bldg. *La Tuque Que*: AlSCO Montreal Inc, aluminum windows replacement, federal bldg. *Montcerf Que*: R Martel & Fils Engg, construction of post office bldg. *Montreal Que*: Oscar Brault, interior cleaning of Charpentier Bldg; Beaver Master Services, cleaning interior, etc., Postal Station "H", 1420 Ste Catherine St West; Nation-Wide Interior Maintenance Co Ltd, interior cleaning, UIC Bldg, 1441 St Urbain St; Allied Building Services (1962) Ltd, interior cleaning, Packard Bldg, 729 St Antoine St. *St Charles de Caplan Que*: Eugene Beaulieu, wharf repairs. *Ste Florence Que*: Henri Dube, construction of post office bldg. *St Moise Que*: Robert Ducasse, construction of post office bldg. *Sept Iles Que*: Victor Gauthier, improvements to shed, Mgr Blanche St Wharf. *Sorel Que*: Raoul Aussant, interior painting, federal bldg. *Val d'Or Que*: G Mercier Engg, wharf construction. *Wotton Que*: Marquis & Freres Ltee, construction of post office bldg. *Arnprior Ont*: Pillar Construction Ltd, alterations to various bldg, Civil Defence College. *Avonmore Ont*: J A Sauve Construction Ltd, construction of post office bldg. *Bath Ont*: Carlo Sorensen, construction of post office bldg. *Bearskin Ont*: T Zelmer Construction Co Ltd, construction of school & residence & electrical alterations to pump & powerhouse, Sioux Lookout Indian Agency. *Britt Ont*: Gerard Builders of North Bay Ltd, construction of post office bldg. *Embrum Ont*: K C Martin Construction Co Ltd, construction of post office bldg. *Hepworth Ont*: Lexington Contracting Ltd, construction of post office bldg. *Kearney Ont*: Young's (Huntsville) Ltd, construction of post office bldg. *King City Ont*: Gorsline Construction Ltd, construction of post office bldg. *London Ont*: Putherbough Bros Construction Co, alterations to 1st & 2nd floors, Dominion Public Bldg. *Moose Creek Ont*: J A Sauve Construction Ltd, construction of post office bldg. *Ottawa Ont*: Allied Building Services (1962) Ltd, interior cleaning, Veterans' Affairs Bldg, Wellington St; Atlas Building Cleaning Co, interior cleaning, Insurance Bldg, Confederation Heights; Three Star Building Cleaners, interior cleaning, Colonel By Towers, Bronson Ave; J H Meilleur, repairs to roof, DVA Bldg; Atlas Building Cleaning Co, cleaning interior, Kent-Albert Bldg; Sanco Ltd, interior cleaning, Sir Charles Tupper Bldg, Confederation Heights; Andrews Bros Construction Ltd, general alterations, Kent-Albert Bldg. *Ottawa, Ont & Hull, Que*: Sanco Ltd, cleaning windows of federal bldgs. *Princeton Ont*: Vic Carter Ltd, construction of post office bldg. *Rosseau Ont*: Young's (Huntsville) Ltd, construction of post office bldg. *Shelburne Ont*: Willard N Hunt, construction of post office bldg. *Weston Ont*: G C Harris Construction Co, alterations to old federal bldg. *Whitney Ont*: P J Bordowitz, construction of launching ramp & wharf for small craft. *Marfeking Man*: S W Bates, construction of post

office bldg. *Fort MacLeod Alta*: Glenn Little, renovations to federal bldg. *Lacombe Alta*: Mr & Mrs R Keitel, interior cleaning of federal bldg. *Ladysmith B C*: Mark F Rukin, interior cleaning of federal bldg. *Richmond B C*: Vancouver Pile Driving & Contracting Co Ltd, renewal of seaplane ramp. *Vancouver B C*: American Building Maintenance Co Ltd, interior cleaning of Customs House, 1001 Pender Ave.

In addition, this Department awarded 45 contracts containing the General Fair Wages Clause.

THE ST LAWRENCE SEAWAY AUTHORITY

Welland Ont: Foley Foundry & Machine Co Ltd, modification of machinery on vertical lift bridges Nos 17 & 20 for standby power, Welland Canal.

DEPARTMENT OF TRANSPORT

Windsor Ont: Whelpton Electric Ltd, installation of power distribution switchboards, Airport. *Grande Prairie Alta*: Cookshaw Electric Ltd, rehabilitation of power distribution system & related work, Airport. *Victoria B C*: Peterson Electric Construction Co Ltd, installation of car park lighting, International Airport.

In addition, this Department awarded eight contracts containing the General Fair Wages Clause.

Federal-Provincial Labour Conference

(Continued from page 268) .

Concluding Statement

Summing up at the conclusion of the conference, Mr. MacEachen commented on each of the items discussed.

On apprenticeship he said that the new apprenticeship agreement that was discussed developed some new emphases in apprenticeship. It provides for a more flexible and less restrictive approach by providing, through greater federal support, for a greater emphasis on the role of industry in the development of apprenticeship.

On the Manpower Consultative Service he said there was agreement among the provinces that this was a useful and significant way to deal with manpower problems ensuing from automation and technological change. Assurances of provincial support in the development of the program had been given, Mr. MacEachen said.

There was general agreement on the need for progressive labour standards in Canada as a whole, he stated, and a recognition of the gap that existed in federal labour standards as compared with the usual coverage in provincial jurisdictions.

Industrial Fatalities

(Continued from page 273)

Industrial diseases, 10 were the result of conflagrations, temperature extremes and explosions, 10 were caused by electric current and 1 was the result of over-exertion.

On labour-management co-operation the Minister said that there was a growing necessity for co-ordination of activities, in view of the intense interest being shown in this subject by all levels of government, management and labour, and by university, church and other private agencies.

It was the general consensus that there should be co-operation of governments in developing good relations between labour and management, the Minister declared.

On the ILO, Mr. MacEachen reported agreement in principle that Canada should seek to ratify some of the existing ILO Conventions of which the subject matter falls partly within federal and partly within provincial jurisdiction. It will be necessary, he said, to work out appropriate procedures and this will be explored in consultations between the federal and provincial Departments of Labour.

Mr. MacEachen spoke of the brief discussion of the ways and means by which provincial Departments of Labour might integrate their work with that of the federal Department in meeting the manpower problems that would arise in a national emergency.

By province of occurrence, the largest number of fatalities, 79, was in Ontario. In British Columbia there were 44, in Quebec 33 and in Alberta 26.

During the quarter, there were 98 fatalities in October, 73 in November and 76 in December.

PRICE INDEX

Consumer Price Index, March 1964

The consumer price index (1949=100) increased 0.1 per cent to 134.6 at the beginning of March from 134.5 in February. The March index was 1.9 per cent above the March 1963 index of 132.1.

Four of the seven main component groups were unchanged but three were higher. The clothing index showed the largest increase.

The food index was unchanged from its February level of 131.3. Prices were higher for most fresh and canned fruits and vegetables, cookies and sweet biscuits, coffee, butter and shortening and some cuts of meat. Price decreases occurred for sugar—continuing a decline that began in December 1963—beef, pork chops, chicken and eggs.

The housing index increased 0.1 per cent to 137.5 from 137.3 as indexes for both the shelter and household operation components were higher. The shelter index rose 0.1 per cent; rent was unchanged but home-ownership prices increased. The household operation index increased 0.2 per cent, mainly as a result of higher prices for furniture, floor coverings and textiles. Prices for utensils and equipment were lower.

The clothing index advanced 0.7 per cent to 118.6 from 117.8. Higher prices for men's, women's and children's wear, footwear and clothing services outweighed decreases in prices for piece goods.

The transportation index at 143.0 was 0.3 per cent higher than the February index of 142.6. An increase in the Ontario gasoline tax from 13 to 15 cents a gallon, substantially higher license fees and increased prices for tires and batteries moved the automobile operation component. Local transportation increased as a result of higher bus fares in a few cities.

The health and personal care index was unchanged at 165.4. The health care component was unchanged and an increase in the personal care group was not sufficient to move the index.

The recreation and reading index remained at its February level of 152.3 as price increases for television repairs were offset by decreases for bicycles.

The index for tobacco and alcohol was unchanged at 119.4, despite a slight increase in prices of alcoholic beverages.

Group indexes in March 1963 were: food 128.9, housing 136.0, clothing 115.6, transportation 139.6, health and personal care 159.9, recreation and reading 148.6 and tobacco and alcohol 118.0.

City Consumer Price Indexes, February 1964

Consumer price indexes (1949=100) rose between January and February in six of the ten regional cities. Increases ranged from 0.1 per cent in Saint John and Toronto to 0.6 per cent in Montreal. The Vancouver index declined 0.2 per cent. The Halifax, Winnipeg and Saskatoon-Regina indexes were unchanged.

Food indexes fell in seven cities and rose in three; the decreases ranged from 0.2 per cent in Winnipeg, Saskatoon-Regina and Edmonton-Calgary to 0.6 per cent in Halifax, and the increases ranged from 0.5 per cent in Saint John to 0.9 per cent in Montreal.

Movements in the housing component were mixed: four cities had higher indexes, four lower, and two unchanged. Clothing indexes rose in four cities, declined in three, and were constant in three. Transportation indexes were higher in nine cities and unchanged in one. Indexes for health and personal care rose in three cities, fell in five, and remained unchanged in two. The recreation and reading index moved up in nine cities and down in one. The indexes for tobacco and alcohol were higher in six cities, unchanged in four.

Regional consumer price index point changes between January and February were: Montreal +0.8 to 134.7; St. John's +0.6 to 120.8*; Ottawa +0.4 to 135.0; Saint John +0.2 to 134.3; Edmonton-Calgary +0.2 to 127.7; Toronto +0.1 to 136.0; Vancouver -0.2 to 131.7. Halifax, Winnipeg and Saskatoon-Regina remained unchanged at 131.6, 131.4 and 129.0 respectively.

Wholesale Price Index, February 1964

Canada's general wholesale index (1935-39=100) declined 0.3 per cent to 246.1 in February from 246.9 in January but rose 1.4 per cent from the February 1963 index of 242.8.

Two major group indexes declined, five increased and one remained unchanged.

The vegetable products group index, which decreased 2.3 per cent to 231.2 in February from 236.7 in the preceding month, was the main cause of the decline in the index. The non-metallic minerals products group index of 191.6 dipped slightly from 191.7 in January.

The chemical products group index showed the greatest advance during February, moving up 0.9 per cent to 190.1 from 188.4. The animal products group index

*On base June 1951=100.

increased 0.6 per cent to 248.6 from 247.0. Other group indexes which advanced in February were textiles, up 0.4 per cent to 249.2 from 248.2, wood products up 0.2 per cent to 330.3 from 329.7, and non-ferrous metals, which rose less than 0.1 per cent to 201.2 from 201.1.

The iron products group index of 255.0 remained unchanged from January.

The index of Canadian farm product prices at terminal markets (1935-39=100) advanced 0.6 per cent, from 215.0 to 216.3, in the three weeks ended February 21. The field products index declined 0.5 per cent, from 166.4 to 165.5, and the animal products index rose 1.3 per cent, from 263.6 to 267.1.

U.S. Consumer Price Index, February 1964

For the first time since December 1962, the United States consumer price index

(1957-59=100) has declined. In February it moved from 107.7 to 107.6.

About two thirds of the drop in the index was caused by refunds on gas utility bills and lower prices for gasoline. Food prices, rents, home ownership costs, medical costs and health and recreation services costs were higher.

British Index of Retail Prices, January 1964

The British index of retail prices (Jan. 16, 1962=100) rose to 104.7 at mid-January from 104.2 at mid-December 1963. The January 1963 index was 102.7.

The food index rose to 105.4 from 104.6 as a result of higher prices for many items, particularly fresh vegetables, partially offset by reductions in the price of eggs.

Publications Recently Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE. List No. 186

Aged

1. U.S. PRESIDENT'S COUNCIL ON AGING. *The Older American; [1st Report, 1962/3]* Washington, GPO, 1963. Pp. 73.

This first annual report of the U.S., President's Council on Aging tells something about the older citizens' income, health, employment, housing, and their place in the community, etc.

2. WORKSHOP [ON] EDUCATION FOR AGING, TORONTO, 1962. *Proceedings.* Toronto, Ontario Society on Aging, 1962. Pp. 78.

Workshop held October 26, 1962.

Contains discussions by a panel and by workshop groups which dealt with such topics as health, retirement, the family, and leisure as they pertained to older workers.

Automation

3. *Focus on Automation the Management View, the Labor View, the International Questions* [by] John I. Snyder, Jr.,

A. J. Hayes [and] David A. Morse. [New York, American Foundation on Automation and Employment, inc., 1963] Pp. [18].

Talks presented at a dinner given on December 13, 1962 by David A. Morse, Director General of the International Labour Office, in honor of John I. Snyder, Jr. and Albert J. Hayes, co-chairman of the American Foundation on Automation and Employment, Inc., jointly set up by U.S. Industries, Inc., a manufacturer of automation machinery (of which Mr. Snyder is chairman and president) and by the International Association of Machinists (of which Mr. Hayes is international president). These talks tell something of the American Foundation on Automation and Employment, Inc. and about its research into the problems caused by automation.

4. NEW SOUTH WALES. DEPARTMENT OF LABOUR AND INDUSTRY. *Notes on Report and Recommendations of the Honourable Mr. Justice Jack Richards on the Inquiry into Recent Mechanization and Other Technological Changes in Industry.* [Sydney] Government Printer [1963?] Pp. 61.

A summary of the report of a New South Wales Industrial Inquiry Commission into the effects of mechanization and other technological changes in industry.

Business

5. U.S. OFFICE OF EDUCATION. DIVISION OF VOCATIONAL EDUCATION. *Planning and Organizing an Export Trade Education Program*, by Willem Winkel. Washington, GPO, 1963. Pp. 42.

A suggested curriculum for a course to teach the small businessman about the operation of foreign trade.

6. WATERLOO LUTHERAN UNIVERSITY. WATERLOO UNIVERSITY COLLEGE. DEPARTMENT OF ECONOMICS AND BUSINESS ADMINISTRATION. *International Business Management Lectures, 1962*, [Waterloo, 1963?] Pp. 70.

Sponsored in co-operation with the Canada Department of Trade and Commerce.

Partial Contents: The Export Potential for Canada, by George H. Hees. New Frontiers in Financing Canadian Export Trade, by Hugh Aitken and H. Duke Scott. Labour Costs as a Factor in Import Competition, by Robert M. Adams. Labour's Viewpoint of Imports and Exports—Are we pricing ourselves out of the Foreign Markets? By Russell Bell. The Position of the Secondary Industry in Canada's Foreign Trade, by John D. Campbell.

Collective Bargaining

7. BEAL, EDWIN, F. *The Practice of Collective Bargaining*, by Edwin F. Beal and Edward D. Wickersham. Rev. ed. Homewood, Ill., R. D. Irwin, 1963. Pp. 772.

The subject matter is under four headings: The study of collective bargaining; the practice of collective bargaining; the issues in collective bargaining; and cases in collective bargaining.

8. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Collective Agreement Provisions in Major Manufacturing Establishments, 1963*. Ottawa, 1963. Pp. 31.

A review, in tabular form, of a number of provisions of collective agreements in 361 establishments employing about 275,000 people. Some of the topics are union security, seniority, hours of work, premium pay for time worked, pay for time not worked, pay guarantees, grievances and arbitration, special provisions for women, and older and/or handicapped workers.

Disabled—Rehabilitation

9. CANADIAN CONFERENCE ON SHELTERED EMPLOYMENT, STE. ADELE, QUEBEC, 1962. [*Proceedings*] Toronto, Canadian Rehabilitation Council for the Disabled [1963?] Pp. 104.

Conference held October 1962 and sponsored by Canadian Rehabilitation Council for the Disabled.

"Sheltered employment" is a term used for employment provided for physically, mentally, emotionally and socially handicapped persons whether provided in a "workshop" or elsewhere in the community. This volume contains six papers presented at the Conference, dealing with the provision of employment opportunities for the disabled.

10. NATIONAL INSTITUTE ON REHABILITATION AND WORKMEN'S COMPENSATION, UNIVERSITY OF MICHIGAN, 1962. *Rehabilitating the Disabled Worker, a Platform for Action; Report*. Monroe Berkowitz editor. Conducted by the National Institutes on Rehabilitation

and Health Services, Inc., in co-operation with the University of Michigan and the Vocational Rehabilitation Administration. Washington, U.S. Dept. of Health, Education, and Welfare, Vocational Rehabilitation Administration, 1963. Pp. 180.

Contents: Summary Recommendations of the Institute. An Overview of Workmen's Compensation. Administrative Responsibilities of the Workmen's Compensation Agency. Litigation as a Barrier to Rehabilitation. Structuring Cash Benefits to provide Incentives for Rehabilitation. Statutory Limitations as a Barrier to Rehabilitation. Supervision of Medical Care and Rehabilitation Services. Rehabilitation Facilities and Personnel.

Economic Conditions

11. UNITED NATIONS. DEPARTMENT OF ECONOMIC AND SOCIAL AFFAIRS. *A Study of Industrial Growth*. New York, 1963. Pp. 55.

An "approach to the study of the structure of manufacturing industry in developing countries and a means of projection of the general trends in this sector of the economy."

12. UNITED NATIONS. DEPARTMENT OF ECONOMIC AND SOCIAL AFFAIRS. *World Economic Survey, 1962*. New York, United Nations, 1963. 2 volumes.

Contents: 1. *The Developing Countries in World Trade*. 2. *Current Economic Developments*.

Education

23. BROTHERHOOD OF LOCOMOTIVE ENGINEERS. [*A Century of Service*] *Souvenir Program, BLE Centennial/GIA Diamond Jubilee, Detroit, Michigan, May 5-8, 1963.* [Cleveland, 1963] Pp. 68.

An illustrated booklet about the Brotherhood of Locomotive Engineers.

24. HOFFMAN, MILES E. *A Contemporary Analysis of a Labor Union: Development, Structure, Functions; Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (AFL-CIO-CLC)* [Philadelphia?] 1962. Pp. [35].

A brief look at the history and present administration of the union.

25. HOFFMAN, MILES E. *A Contemporary Analysis of a Labor Union: Development, Structure, Functions; Grand International Brotherhood of Locomotive Engineers.* [Philadelphia?] 1963. Pp. 32.

Pamphlet dealing with the history of the union and its present administration.

26. HOFFMAN, MILES E. *A Contemporary Analysis of a Labor Union: Development, Structure, Functions; National Association of Letter Carriers of the United States of America, AFL-CIO.* [Philadelphia?] 1963. Pp. 46.

27. SEAFARERS' INTERNATIONAL UNION OF CANADA. *Statement relative to the Report of the Industrial Inquiry Commission on the Disruption of Shipping.* Montreal, 1963. Pp. 108.

28. U.S. BUREAU OF LABOR STATISTICS. *Disciplinary Powers and Procedures in Union Constitutions.* Washington, GPO, 1963. Pp. 202.

A study of the formal rules of discipline in the constitutions of 158 national and international unions in the U.S.

Labour Supply

29. INTERNATIONAL LABOUR OFFICE. *Employment Objectives and Policies.* Geneva, 1963. Pp. 232.

At head of title: PTCE/1 (1963). Report 1. International Labour Organization. Preparatory Technical Conference on Employment, Geneva, 1963.

An analysis of the major employment problems existing in the world at the present time and some suggestions for dealing with these problems.

30. INTERNATIONAL LABOUR OFFICE. *Employment Promotion with Special Reference to Rural Areas and with Due Regard to I.L.O. Social Objectives and Standards*. Second item on the agenda. Geneva, 1962. Pp. 117.

At head of title: Report 2. International Labour Organization. Fifth Asian Regional Conference, Melbourne, 1962.

Labouring Classes

31. ADELAIDE. UNIVERSITY. SUMMER SCHOOL OF BUSINESS ADMINISTRATION. *Labour Problems in the Australian Economy*. Adelaide, Hyde Park Press, Ltd., 1963. Pp. 54.

At head of title: Eighth Summer School of Business Administration, 1963.

Contents: Wages Policy [in Australia.] Conciliation and Industrial Peace. Unemployment in Australia.

32. CANADA. DEPARTMENT OF LABOUR. *Protection under Law against Employment Discrimination*. Ottawa, Queen's Printer, 1963. Pp. 22.

Explains parts of federal and provincial legislation pertaining to employment discrimination.

33. INTERNATIONAL CONFEDERATION OF FREE TRADE UNIONS. *Check-off*. Brussels, 1963. Pp. 10.

A brief examination of the pros and cons of the check-off system.

34. LABOUR ADMINISTRATION SEMINAR FOR ENGLISH-SPEAKING PARTICIPANTS FROM AFRICAN COUNTRIES, FREETOWN, SIERRA LEONE, 1962. *Practical Problems of Labour Inspection; Report*. Geneva, International Labour Office, 1963. Pp. 297.

At head of title: ILO/TAP/AFR/R. 2. International Labour Office. Expanded programme of technical assistance.

Seminar held Freetown, Sierra Leone, November 2-15, 1962.

Discussion at the Seminar dealt with the organization, working and practical problems of services involving the inspection of labour, factories, mines, wages, etc.

35. NOVA SCOTIA. FACT-FINDING BODY RE LABOUR LEGISLATION. *Report*. [Halifax?] 1962. Pp. 163.

Judge Alexander H. McKinnon, Fact-finding Body.

The Fact-finding Body was set up to study labour legislation in Nova Scotia and in other provinces; to obtain the opinions of experts regarding the effectiveness of this legislation in protecting the interests of the employer, employee, unions, and the public; and to consider just how much industrial peace was promoted by the labour legislation.

Noise

36. GREAT BRITAIN. COMMITTEE ON THE PROBLEM OF NOISE. *Noise; Final Report*. London, HMSO, 1963. Pp. 235.

Sir Alan Wilson, chairman.

The Committee's assignment was "to examine the nature, sources and effects of the problem of noise and to advise what further measures can be taken to mitigate it." The Committee examined the general effects of noise, the laws relating to it in Great Britain, and different types of noises, such as noise in towns, in buildings, from motor vehicles, trains, aircraft, building construction, etc.

37. GREAT BRITAIN. MINISTRY OF LABOUR. *Noise and the Worker*. London, HMSO, 1963. Pp. 19.

About noise and its reduction.

Occupations

38. ASSOCIATION OF PART-TIME SOCIAL WORKERS. *Part-time Employment, and Some Aspects of Recruitment and Training in Social Work, an Enquiry in London* [by] Helene Curtis [and] Phyllis Willmott. London [1962] Pp. 18.

A report of interviews with 39 people in voluntary agencies, government departments, professional associations, universities and employment agencies in the London area to determine the need for part-time social workers. Examines such questions as the employer and the part-time worker, recruitment and training requirements, and the need for a Social Work Advisory Centre.

39. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Technicians in Science and Engineering*. Ottawa, Queen's Printer, 1963. Pp. 81.

Contents: Nature of the Work. Fields of Work. Preparation and Training. Personal Qualities Needed. Advancement. Earnings. Organizations. Employment Outlook. Seeking Employment. Includes a list of educational establishments and of typical occupations.

40. U.S. BUREAU OF LABOUR STATISTICS. *Occupational Outlook Handbook; Employment Information on Major Occupations for Use in Guidance*. [6th ed.] Washington, GPO, 1963. Pp. 792.

Contains brief descriptions of almost 700 occupations. Information is provided for each one on the nature of work, where employed, training and other qualifications, employment outlook, earnings and working conditions, and where to go for more information.

Unemployment

41. HABER, WILLIAM. *The Impact of Technological Change, the American Experience*, by William Haber, Louis A. Ferman [and] James R. Hudson. Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1963. Pp. 62.

A summary and appraisal of the findings of 17 studies dealing with the adjustment to job displacement in the U.S. between 1929 and 1961.

42. ILLINOIS. GOVERNOR'S COMMITTEE ON UNEMPLOYMENT. *Report*. Springfield, 1963. 1 volume (various pagings).

Contents: The Unemployed. Manpower and Natural Resources. Economic Growth and the Demand for Labour. Education and Training. Cornerstone. Guidance and Counseling. Bringing Worker and Job together. The Unequal Job Opportunity. The Communication Gap. Income for the Unemployed. Work Programs. Recommendations.

Wages and Hours

43. THOLE, HENRY C. *Are Wages High in Detroit?* By Henry C. Thole and Harold C. Taylor. Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1963. Pp. 86.

A comparison of wages by industry and occupation between Detroit and New York, Los Angeles, Chicago, and Cleveland.

44. U.S. BUREAU OF LABOR STATISTICS. *Employment and Earnings Statistics for the United States, 1909-62. Based on the 1957 Standard Industrial* Pp. 632.

Women

45. CANADA. WOMEN'S BUREAU. *Day Care Services for Children of Working Mothers*. [Ottawa] 1964. Pp. 11, 2.

Women's Bureau Bulletin No. 11, January 1964.

46. EYDE, LORRAINE DITTRICH. *Work Values and Background Factors as Predictors of Women's Desire to work*. Columbus, Bureau of Business Research, College of Commerce and Administration, Ohio State University, 1962. Pp. 88.

The information in this report is based on a study of students and alumnae of Jackson College, a division of Tufts University in Medford, Mass., of the classes of 1953 and 1958. The study looked into the family backgrounds, work motivations, and some of the attitudes of these women.

47. STERN, MADELEINE BETTINA. *We the Women; Career Firsts of Nineteenth-Century America*. Wood engravings by John Depol. New York, Schulte Pub. Co., 1963 [i.e. 1962] Pp. 403.

Contains 14 short biographies of women who were pioneers in their fields: the arts, science and technology, the professions and trades, and business and industry.

Miscellaneous

48. ALBERTA. INDUSTRIAL DEVELOPMENT BRANCH. *Survey of Drayton Valley*. Rev. September 1963. Edmon-

ton, Dept. of Industry and Development, 1963. Pp. 12.

49. *The Atlantic Provinces Statistical Review*. 3d ed. [Halifax] Atlantic Provinces Economic Council, 1963. Pp. 90.

50. DAWSON, ROBERT MacGREGOR. *The Government of Canada*. 4th ed. revised by Norman Ward. Toronto, University of Toronto Press, 1963. Pp. 610.

This book consists of seven parts: 1. Constitutional Development. 2. The Constitution. 3. The Executive. 4. The Administration. 5. The Legislature. 6. The Judiciary. 7. Political Parties.

51. *Mathematics and the Social Sciences; the Utility and Inutility of Mathematics in the Study of Economics, Political Science, and Sociology*. A Symposium, sponsored by the American Academy of Political and Social Science. Edited by James C. Charlesworth. Philadelphia, American Academy of Political and Social Science, 1963. Pp. 121.

52. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Pretesting Advertising*, by Harry Deane Wolfe [and others] New York, 1963. Pp. 212.

Presents the results of a two-year study of the pre-testing practices of many American and Canadian advertisers, advertising agencies, and research firms. Describes and evaluates the basic methods used to determine the probable effectiveness of advertising before money is spent on media. Includes case studies.

53. UNITED NATIONS. ECONOMIC COMMISSION FOR EUROPE. *Production and Export of Mechanical and Electrical Engineering Goods*. Geneva, United Nations, 1963. Pp. 175, 17.

Contents: Mechanical and Electrical Engineering within the Framework of an Industrial Economy. Production and Imports of Machinery in Non-European Countries. General Aspects of World Trade in Machinery. The Product Pattern of Machinery Exports by Main Suppliers, 1957 to 1959. Geographical Distribution of Machinery Exports, 1957 to Broad Outline of International Trade in Machinery in 1960.

54. U.S. BUREAU OF LABOR STATISTICS. *Injuries and Accident Causes in Sawmills*. Washington, GPO, 1963. Pp. 90.

55. U.S. BUREAU OF LABOR STATISTICS. *Prices: a Chartbook, 1953-62*. Supplement September 1963. Bulletin no. 1351-1. Washington, GPO, 1963. Pp. 60.

56. U.S. CONGRESS. HOUSE. COMMITTEE ON POST OFFICE AND CIVIL SERVICE. *Manpower Utilization in the Federal Government. Hearings before the Subcommittee on Manpower Utilization of the Committee on Post Office and Civil Service, House of Representatives, Eighty-*

seventh Congress, Second Session . . .
Washington, GPO, 1962. Pp. 450.

Hearings held Feb. 6-Apr. 11, 1962.

These hearings dealt with manpower programs and management improvement projects of the departments and agencies of the U.S. Federal Government.

57. U.S. INTERNAL REVENUE SERVICE. DATA PROCESSING SYSTEMS DIVISION. *Systems and Procedures, a Notebook for the Systems Man.* Washington, GPO, 1963. Pp. 42.

Outlines a "plan of action for carrying out the basic objectives of the organization."

McGill's Industrial Relations Conference Coming June 8 and 9

The McGill University's 16th annual Industrial Relations Conference will be held in Montreal on June 8 and 9.

Hon. Allan J. MacEachen, Minister of Labour, will be the speaker at the conference dinner, and J. P. Francis, Director of the Economics and Research Branch, will address the opening session.

Mr. MacEachen's topic will be "Government Manpower and Employment Policy in Canada." Mr. Francis's will be "The Unemployment Problem."

The afternoon session on the first day will be addressed by Pierre-Paul Proulx, McGill University, whose subject will be "The Structural Controversy in the Canadian Context," and by Dr. John H. G. Crispo, School of Business, University of Toronto, will speak on "Manpower Implications."

On the second day, Dr. Harry G. Johnson, University of Chicago, will give an address in the morning on "Employment Theory and Public Policy in the North American Context." The afternoon session will be occupied with a symposium in which three speakers—labour, management and government—will take part under the chairmanship of Hon. Eric Kierans, Quebec Minister of Revenue.

The labour view will be presented by Harry Crowe, Canadian Brotherhood of Railway, Transport and General Workers; the management view by Robert Moyses, Aluminum Company of Canada; and the government view by Dr. John J. Deutsch, Chairman of the Economy Council of Canada.

After the symposium, those who have presented papers during the conference will join in a discussion.

Kaiser Long-Range Sharing Plan

Parties to the Kaiser Steel Long-Range Sharing Plan (L.G., Feb., p. 101) are well pleased with its first year of operation, it has been reported.

Cost reductions for the period March 1963 to February 1964 came to more than \$10.5 million, of which \$3.8 million was passed along to the employees.

Average payments ranged from a high of 66 cents an hour in April 1963, the plan's first month, to a low of 20 cents an hour in January and February 1964. They added up to a total for the year of \$775 per employee, or approximately 16 per cent of base pay.

The Kaiser plan provides that 32½ per cent of any savings effected in the use of materials and supplies, and from increased labour productivity, goes to employees on incentive who voluntarily switch to the new arrangement. The number of participating employees has grown from 3,930 in February 1963 to 5,000 in February 1964.

Miss Dora Edith Cross, who served with the Department of Labour from 1928 until her retirement in 1959, died on February 2 at the age of 70 years, the LABOUR GAZETTE has learned. On joining the Department as a Junior Industrial Research Clerk in 1928, Miss Cross became responsible for developing the Press Clipping Service of the Department. She later became supervisor of the service, the position she held until her retirement. Miss Cross was a graduate of Queen's University, Kingston.

C—Employment, Hours and Earnings

Tables C-1 to C-3 are based on reports from employers having 15 or more employees; at January 1964 employers in the principal non-agricultural industries reported a total employment of 2,947,132. Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners in the reporting firms.

Railroad and rolling stock equipment.....	40.4	40.1	39.2	2.20	2.19	2.13	88.91	87.74	83.57
Shipbuilding and repairing.....	39.9	35.4	39.7	2.24	2.24	2.19	89.53	79.37	86.97
*Non-ferrous metal products.....	41.3	39.8	40.7	2.26	2.31	2.18	93.44	91.90	88.78
Aluminum products.....	42.0	39.4	40.9	2.05	2.02	1.98	86.20	79.34	81.17
Brass and copper products.....	43.2	39.3	41.5	2.20	2.13	2.10	94.94	83.87	87.02
Smelting and refining.....	40.5	40.6	40.2	2.52	2.61	2.43	102.21	106.14	97.70
*Electrical apparatus and supplies.....	40.7	38.8	40.9	1.98	1.97	1.93	80.54	76.54	78.91
Heavy electrical machinery and equipment.....	40.8	39.5	41.2	2.19	2.20	2.15	89.57	86.95	88.67
Telecommunication equipment.....	39.4	38.0	40.1	1.80	1.78	1.73	70.71	67.66	69.50
Refrigerators, vacuum cleaners and appliances.....	40.5	37.8	40.7	2.01	2.03	2.00	81.32	76.62	81.35
Wire and cable.....	42.4	39.3	42.7	2.20	2.18	2.16	93.33	85.91	92.45
Miscellaneous electrical products.....	41.3	39.2	40.7	1.89	1.86	1.83	77.93	73.10	74.30
*Non-metallic mineral products.....	42.5	39.1	41.7	2.03	2.04	1.97	86.55	79.74	82.28
Clay products.....	41.9	38.4	41.8	1.82	1.80	1.81	76.36	68.95	75.41
Glass and glass products.....	41.7	39.9	41.2	2.07	2.07	1.99	86.44	82.64	81.93
Products of petroleum and coal.....	41.5	41.8	41.7	2.78	2.84	2.72	115.16	118.67	113.36
Petroleum refining and products.....	41.5	41.8	41.7	2.80	2.87	2.74	116.20	119.89	114.49
Chemical products.....	40.9	40.2	40.9	2.22	2.23	2.13	90.97	89.74	87.34
Medicinal and pharmaceutical preparations.....	40.0	38.8	39.8	1.74	1.72	1.67	69.64	66.54	66.24
Acids, alkalis and salts.....	40.9	40.6	41.3	2.54	2.62	2.45	103.87	106.31	101.00
Miscellaneous manufacturing industries.....	41.5	38.4	41.4	1.64	1.64	1.58	68.15	62.95	65.60
Professional and scientific equipment.....	41.6	39.0	40.9	2.00	2.00	1.91	83.32	77.96	77.93
Construction	40.0	32.8	39.1	2.23	2.17	2.14	89.31	71.19	83.56
Building and general engineering.....	39.4	30.6	38.6	2.41	2.40	2.32	95.22	73.29	89.66
Highways, bridges and streets.....	41.3	37.1	40.1	1.85	1.81	1.79	76.27	67.09	71.60
Electric and motor transportation	43.6	42.2	43.2	2.06	2.05	1.99	89.68	86.55	85.99
Service	37.0	36.5	37.5	1.18	1.18	1.13	43.72	43.17	42.40
Hotels and restaurants.....	36.6	36.6	37.4	1.15	1.16	1.09	42.19	42.29	40.62
Laundries and dry cleaning plants.....	39.4	37.3	39.2	1.11	1.10	1.06	43.57	41.22	41.75

*Durable manufactured goods industries.

D—National Employment Service Statistics

Statistics presented in the following tables relate to registrations for employment and vacancies notified by employers at NES offices. These data are derived from reports prepared in National Employment Service offices and processed in the Unemployment Insurance Section, DBS. See also Technical Note, page 91, January issue.

(1)Preliminary subject to revision.

(2)Includes 1,560 registrations reported by the Magdalen Islands local office.

E—Unemployment Insurance

Unemployment insurance statistics are concerned with numbers of persons covered by insurance and claimants for benefit at Unemployment Insurance Commission local offices. The data are compiled in the Unemployment Insurance Section, DBS from information supplied by the UIC. For further information regarding the nature of the data see Technical Note, page 86, January issue.

TABLE E-1—ESTIMATES OF THE INSURED POPULATION UNDER THE UNEMPLOYMENT INSURANCE ACT

⁽¹⁾St. John's index on the base June 1951=100.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Department of Labour on the basis of reports from the Unemployment Insurance Commission. The first three tables in this section cover strikes and lockouts which amount to ten or more man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series see, page 954, October 1963 issue.

TABLE G-1—STRIKES AND LOCKOUTS, 1959-1964

Month of Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year			
		Strikes and Lockouts	Workers Involved	Duration in Man-Days	
				Man-Days	Per Cent of Estimated Working Time
1959.....	201	216	95,120	2,226,890	0.19

THE ABOUT AZETTE

Collective Action by Nurses to Improve Their Salaries (p. 360)

Published Monthly by the
DEPARTMENT OF LABOUR
CANADA

Vol. LXIV No. 5

MAY 29, 1964

PUBLICATIONS OF THE DEPARTMENT OF LABOUR

Send remittance by cheque or post office money order, payable to the Receiver-General of Canada, to The Queen's Printer, % Superintendent of Government Publications, Ottawa. All subscriptions payable in advance.

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Catalogue No. L1-1963
Price 35 cents.

ECONOMICS AND RESEARCH BRANCH

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents. L2-2/1963

Industrial and Geographic Distribution of Union Membership in Canada, 1963 (English or French). Price 15 cents. L31-763

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 35 cents. L2-159

Wage Rates, Salaries and Hours of Labour. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance and service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. (Bilingual). L2-545

First year service including attractive binder with index tabs and paper-bound volume, \$9.50; service without indexed binder, \$7.00; individual tables, 15 cents. Paper-bound volume, \$1.30.

Group Hospitalization and Medical Insurance Plans in Canadian Manufacturing Industries (English or French). Price 35 cents. L36-558

Working Conditions in Canadian Industry, 1963. Price 35 cents. L2-15/1963

Training in Industry Program

The rapid pace of technological change has created need for co-operation of management, labour and government in training workers, who face retraining at least once in working career

Because mechanization, automation and other technological advances have altered the pattern of occupations—now almost 70 per cent of all employment is in professional, skilled or white-collar jobs—the average Canadian worker will have to be retrained at least once during his working career.

And the rapid pace of technological change has created an urgent need for co-operation among management, labour and government in dealing with the problems of training and retraining.

It is vital today for workers to have broadly based training that makes them flexible and mobile as well as competent in their particular trade or occupation.

In the past, many on-the-job training programs were specially designed to meet the immediate needs of the individual employer who gave the training, but today the trend is toward a broader form of training that goes beyond merely cultivating the particular kinds of skill needed by the employer, and looks to the long-range needs of the worker and of the economy.

This trend has been matched by increasing government assistance for training-in-industry programs. The Technical and Vocational Training Agreement provides for federal contributions toward a province's costs in undertaking a training program.

Although this co-operative training program is still in the early stages of development, it provides technical and other assistance to companies, businesses or industrial groups that wish to establish broader training programs.

The co-operative training method embraces many types of training, in which are included the following:

Basic training for skill development—The upgrading of a worker's skill in mathematics, science and communications sufficiently to enable him to take more advanced training.

Upgrading courses to keep workers abreast of new techniques in their trades or occupations.

Retraining workers whose occupations have become obsolete, to enable them to transfer to a new or related trade or occupation.

Apprenticeship training under an approved program involving a minimum of 4,000 hours of reasonably continuous train-

ing in prescribed proportions of training in class and training on the job.

Technician training at post-high school level.

Supervisory and management training.

In one example of basic training for skill development, three companies in co-operation with local school board and provincial officials, established a program to raise the knowledge of 30 employees in English, mathematics and science by two or three grades, starting at Grade 8. The employees are released from work at three o'clock every day for six months to attend a three-hour class.

In this program, the local school board supplied laboratories, and the companies rented quarters, hired a co-ordinator and two instructors, and paid the costs of the program. The companies, however, will be reimbursed by the province, which in turn will be reimbursed by the federal Government to the extent of 50 per cent of the costs.

In this form of training, technical assistance may be obtained in the form of sample course outlines, trade analyses, information sheets and other training aids. Studies of training needs and advice on setting up programs are often given to companies or businesses that ask for such help. The extent of assistance supplied varies from one province to another.

The expansion of technical and vocational training facilities and programs in Canada has meant an increase in the number of part-time, full-time and evening courses in many communities, and officials of local schools or provincial Departments of Education are willing to consider establishing new courses to suit particular needs.

Many companies are today encouraging their employees to take evening courses and are offering incentives in the form of reimbursement of fees or the cost of books. Other firms are allowing their employees to take full-time and part-time courses through day-release arrangements, and in some cases are helping financially.

Government assistance for training in industry is offered under one of the programs established by agreement between the federal and the provincial governments under the Technical and Vocational Training Assistance Act.

50 Years Ago This Month

Act to prohibit manufacture, importation and sale of matches containing phosphorus enacted and its administration placed under Minister of Labour. Immigration in 1913-14 down 17,500

An act to prohibit the manufacture, importation and sale of matches made with white phosphorus was passed by Parliament in May 1914, and the administration of the act placed under the Minister of Labour. The law was to come into effect on Jan. 1, 1916.

A resume and the text of the act were published in the May 1914 number of the **LABOUR GAZETTE**.

This journal's article stated that poisonous phosphorus was not essential to the manufacture of matches, and that its use in such manufacture had been prohibited by law in some parts of Europe for 30 years, and was then prohibited by law and international treaty in nearly every civilized country in the world.

The Minister of Labour, speaking in the Commons in support of the bill, explained that the use of white phosphorus (the act included yellow phosphorus) was liable to induce in those who worked with it a particularly loathsome disease known as phosphorus necrosis, which attacked the jawbone and the teeth, and which was sometimes fatal. The Minister referred to cases of the disease that occurred in Canada.

The article added that "apart from the not infrequent cases of infantile poisoning caused by little ones sucking the highly coloured heads of white phosphorus matches, the latter present also a convenient and inexpensive means of criminal poisoning, and were employed in this way by a brutal parent in Prince Edward Island a little over a year ago for the destruction of her entire family."

Immigration to Canada during the year ending March 31, 1914 reached a total of 384,867, compared with a total of 402,432 for the previous year, according to official figures supplied by the Department of the Interior. Of the 1913-14 total, 142,622 of the immigrants were classed as British, 107,530 were from the United States and 134,715 from "Other Countries."

The decrease from the total the previous year was only 4 per cent, but the drop did not begin until August 1913. During the April-to-July period, immigration was higher than it had been the year before. But from August 1913 until March 1914, it declined at an increasing rate, beginning with a 3-per-cent drop in August and ending with a drop of 52 per cent in March 1914,

compared with the figures for the previous year. A considerable amount of unemployment, especially in the western provinces, and a "financial stringency" were apparently the causes of the decline.

The same causes were probably at work in the reduction in the number of strikes in April 1914 from the number the previous April. Only four new work stoppages occurred in April 1914, compared with 25 in April 1913. "It is a noteworthy fact that only 12 disputes had been reported to the Department up to the end of April, as compared with 46 last year."

Reporting on the progress of railway construction, this journal said that the building of the Port Arthur division of the Canadian Northern Railway was giving employment to more than 200 labourers, and that nearly 2,000 men were working on the Kettle Valley Railway.

It was estimated that 700 miles of railway would be built in Alberta during the year. Besides work on the Peace River branch of the Canadian Northern Railway; the Edmonton, Dunvegan and British Columbia Railway; the Alberta and Great Waterways Railway; and the Calgary-to-Pincher Creek line of the Canadian Northern, it had recently been announced that during the coming summer about 3,000 men would be employed on the Alberta and Great Waterways Railway from Edmonton to Fort McMurray. About 1,000 men were also working in Alberta on Canadian Pacific construction.

"A feature of the month was the arrival at Prince Rupert of the first Grand Trunk Pacific train from Winnipeg. It is stated that the Canadian Northern Railway will enter Weyburn this summer by building a spur from their line running from the country south of Weyburn."

The Montreal correspondent said that about 4,000 men had been given employment by the city at \$2.25 a day. Private contractors were paying \$1.75 and \$2, and they feared that they would be deserted by their "cheap" labour. Some labourers did leave their jobs and get work with the city, and the railways received fewer applications than usual for work on construction gangs; instead of looking for railway work, the men were seeking jobs with the city.

Report on Employment and Manpower in New Brunswick

Publication of a report entitled "Employment and Manpower Utilization in New Brunswick 1950 to 1960" was announced jointly last month by the federal and New Brunswick Departments of Labour.

The report is the result of a study by a federal-provincial research committee under the chairmanship of Dr. W. R. Dymond, Assistant Deputy Minister of the federal Department of Labour. The Deputy Ministers of the New Brunswick Departments of Labour, and Finance and Industry were on the Committee.

Labour Force Analyzed

The main body of the report is organized around the analysis of the supply of, and the demand for labour. Characteristics of the population from which the labour force is drawn, including age and sex distribution, growth and migration, are examined. The labour force itself is analyzed as to structure, educational achievement, skills and adaptability.

In analyzing the demand for labour in the province, a study was made of the employment and output trends in the New Brunswick economy as a whole over the period 1950 to 1960, and for the individual industry sectors.

Sample Survey

A special sample survey also was made of households in Gloucester County in order to obtain detailed information on the characteristics of employed and unemployed persons in the area. From this survey, much new and useful data are presented, not only on certain aspects of unemployment, but also of underemployment.

A final chapter on seasonal unemployment analyzes the seasonal variations in employment, the extent and duration of seasonal unemployment, and the industries affected. Those persons who become seasonally unemployed were also examined as to their occupations, skills and age.

The study noted that although total employment increased during the period 1950 to 1960, the entire increase was made up of women. Male employment was no higher at the end of the decade than it was at the beginning. A substantial decline in employment took place in the goods-producing sector—primary, manufacturing and construction industries—which largely employs male

workers. In contrast, there was a notable increase in the service-producing sector, especially in the trade and service industries, which has a large component of women workers.

This marked shift in industrial employment over the decade from the primary to the service industries resulted in serious problems of labour market adjustment. Workers displaced from the primary sector were seldom able to take advantage of the expanding job opportunities in the service industries. Most of the new jobs were dissimilar to those that disappeared, particularly as to the degree of skill and preparatory education required.

Jobs That Disappeared

Many of the jobs that disappeared were those traditionally filled by males, involving mainly manual work and requiring little education or training. In contrast, the new jobs were frequently of the type regarded as appropriate for women, such as the white-collar clerical, sales, teaching and health occupations, and which usually require more education and training.

Moreover, many of the declining occupations were based in the rural areas, and the expanding ones were in urban centres. Consequently, many of the young men who were new entrants to the labour force were unable to find jobs, and emigrated from the province.

Projections

Population projections indicated that increases in the New Brunswick labour force in the next few years would be substantially greater than in the decade of the fifties. Unless there is an increase in the employment of male workers in the future, the report points out, there is likely to be more migration out of the province, lower labour force participation rates among men, and a higher incidence of unemployment and underemployment among men.

Some concluding observations on the imbalances in the New Brunswick economy are set out, and three major areas in which constructive action might be taken are noted: (1) industrial development, including the expansion of existing industry as well as the introduction of new industry; (2) the training, retraining and adaptation of the labour force; and (3) the reduction of seasonal and general unemployment.

Conference on Divisions Between Men's and Women's Work

The traditional divisions between men's work and women's work in our society, and the social and economic effects of these divisions, were discussed at a one-day round-table conference last month in Ottawa, sponsored by the Women's Bureau of the Department of Labour. About 50 persons from federal and provincial departments and agencies, universities, secondary schools and national organizations participated.

In welcoming the conference participants, Dr. G. V. Haythorne, Deputy Minister of Labour, said that we had tended to become creatures of tradition in regard to the division of work between men and women. The Department of Labour was concerned with improving manpower development and manpower utilization, and was examining traditional ways of using manpower in the light of technological and other changes in industry and business, and the changing roles of men and women in our society.

Dr. Oswald Hall, Professor of Sociology, University of Toronto, said that societies were almost infinitely variable in the sense that almost any kind of work could be considered as either masculine or feminine. Within a specific society, however, and ours was no exception, the division of work between the sexes was likely to be very rigid, and there were mechanisms at work that drastically limited a person's freedom of choice of occupation.

In our society the main model for organizing work was the bureaucratic corporation, in which each member either gave or received orders. This system worked well when there were no serious differences in status between those in the two groups.

It was highly acceptable for men to have authority over women; it was acceptable for men to have authority over men, and somewhat less acceptable for women to have authority over women. For women to have authority over men, however, was likely to be regarded as "disagreeable." Therefore, he said, "women hesitate to strive for jobs that place them in anomalous positions, and men hesitate to place women in such positions."

A second limitation on occupational choice for women arose as a result of the family structure. What the husband did determined the ranking of the family. If part of the income came from the wife, these earnings were, in many cases, viewed as an indication of inability on the part of the husband to support his family adequately.

Another type of limitation of occupational choice occurred where the wife moved

ahead until her occupational status and income exceeded that of her husband. For the wife this meant, in effect, that she was constrained to refrain from seeking the sorts of occupational niches that would place the prestige of her husband in jeopardy.

Dr. W. R. Dymond, Assistant Deputy Minister of Labour, spoke on the economic aspects of the problem. He said that the occupations in which so-called women's work is concentrated are predominantly those in the service-producing industries; men's occupations tend to be concentrated in the goods-producing industries. He pointed out also that women were heavily concentrated in the white-collar occupations, which often cut across industry boundaries.

Over the last 30 years the proportion of workers in the goods-producing industries had dropped from 60 to 46 per cent of the total labour force, while the proportion of workers in service-producing industries had expanded from 40 to 54 per cent.

Dr. Dymond said that the participation rate of women in the labour force was increasing, while the rate for men was actually dropping. This was partly the result of differing employment trends in the industries in which men's and women's jobs predominate.

Although some of the jobs in the expanding service industries were traditionally more suited to women, there was a vast number of jobs that could be done equally well by either sex. In these industries, however, employers preferred to hire women, mainly because women were willing to work at lower wage rates than men of equivalent skill and experience, and because women appeared to be less concerned with the fringe benefits which men found important because of the male role in our society.

It was probably considered morally wrong to pay a man less than he required to support his family at a reasonably decent standard of living but the same scruples do not apply to women, since employers assumed that young girls and married women usually lived at home.

Another factor was that women had traditionally been more difficult to organize into trade unions and in consequence were more "tractable" from the employer's point of view.

All these factors made it difficult for men displaced from jobs in the highly-unionized goods-producing industries to move to the expanding service industries. This problem of mobility was going to require more and more attention in the future, Dr. Dymond said.

43 Chicago Businessmen Complete Canadian Course

Forty-three Chicago businessmen last month received certificates marking the completion of two courses in small business management prepared by the Canadian government. This is the first time Canada's small business management courses, which are in regular use in various Canadian communities, have been used outside this country.

The course entitled "Management Accounting" was prepared by the Small Business Management Training Division, Department of Labour, for owners and managers of small businesses in Canada. The

Florists' Telegraph Delivery Association was given permission to adopt the course to the specific needs of florists and is now conducting the course in the United States and Canada.

Management Accounting is one of five courses prepared by the federal Departments of Trade and Commerce and of Labour and made available to Canadian businessmen through provincial departments of education or the departments of trade and industry. Other courses in this series include Retailing, Marketing for Manufacturers, Bookkeeping and Purchasing.

New Construction Technician Course to Begin in September

A new two-year "Construction Technician Course" is to begin in September in Toronto. The course is designed to give to students interested in making a career in the construction industry a broad background in construction principles and techniques and to fit them for a variety of positions in the industry. If possible, the same course will be conducted in London and Ottawa.

Apprentices and journeymen will also be given an opportunity to advance beyond their present status by taking the course.

The classes will terminate at the end of April in order that first-year students can obtain practical experience on the job from May to August.

The program of studies includes building construction and drafting, quantity surveying, materials, theory of structures, mechanical installations, mathematics, science, economics and construction business practice. The prerequisite for the Course is Grade XII or equivalent.

In 1963, the Ontario General Contractors Association became aware of an acute shortage of qualified personnel of a junior age trained in construction practices and techniques. The OGCA expanded its Apprenticeship Committee to explore the possibility of setting up educational programs to fill the void between apprenticeship training for journeymen status and university training for graduate civil engineers.

The OGCA committee held a meeting last August with officials of the Technological and Trades Training Branch of the Ontario Department of Education to explore the possibility of setting up a course of training in construction. A joint conference prepared a syllabus. The Construction Technician Course is the result of these joint efforts.

This new approach to a career in construction has been necessitated by technological changes in the industry, which have made it essential to have a broad knowledge, a combination of theory and practice.

British Economic Council Surveys Construction Industry

Output in the construction industry in Britain must increase by 13 per cent over that of 1963 if this year's estimated demand is to be met, the National Economic Development Council states in its latest report, "The Construction Industry." In order to achieve this increase, the industry will have to recruit at least 2 per cent more labour, a high proportion of which must be skilled.

A summary of the report in the *Ministry of Labour Gazette* for March says that even if the extra labour can be obtained and if an effort is made to increase productivity in all sectors, the industry will still be operating "at full stretch" and there will probably be overloading in some regions and in some types of work.

Looking ahead to 1966, a further increase of 10 per cent over 1964 will be needed, and if the required level is not reached this year it will probably fall short in 1966 also. A failure of the industry to meet the growing demand might be a serious brake on expansion, and it was because of the importance of the construction industry at this time that it was chosen for detailed study by the Council.

The periodical shortages of skilled men in the industry are likely to continue, the report concludes. The supply of apprentices is well below what is required to make up for wastage at the present rate, and many more adult trainees could be absorbed than can be trained under present plans.

1963 Edition of "Provincial Labour Standards" Available

A new edition of the Department of Labour's annual bulletin "Provincial Labour Standards" is now available. It sets out the standards in force in December 1963 under various provincial labour laws.

Subjects covered include child labour, holidays, hours of work, minimum wages, equal pay, fair employment practices, weekly rest-day and workmen's compensation.

The more important changes in 1963 concerned the school-leaving age, minimum wage rates and workmen's compensation.

A school-leaving age of 15 years went into force in Manitoba, to be raised to 16 years on July 1, 1965.

Increases in minimum wage rates were brought into effect in almost all provinces. Developments in this field included the setting of rates for men for the first time in Ontario and Prince Edward Island. Rates under general orders were raised in Manitoba and Newfoundland.

As the first stage of a new minimum wage program applying to both sexes in Ontario, wage scales were set for the Toronto-Hamilton-Oshawa area. These orders set a minimum rate of \$1.25 an hour for construction workers, \$1 an hour for male workers in other industries, and a rate of 85 cents an hour, escalating to \$1 on March 31, 1964, for women.

In Parliament Last Month

(page numbers refer to Hansard)

An important modification of the proposed Canada Pension Plan and a substantial increase in the rebate of federal income tax to compensate for provincial income tax was announced by the Prime Minister on April 20 (p. 2331). These changes were also described in a letter sent to the provincial premiers, which was tabled by the Prime Minister in the House (p. 2388).

The federal rebate of income tax, he said, would rise next year to 21 per cent instead of the existing 19 per cent and in 1966 to 24 per cent. The increased rebate and higher equalization payments by the federal Government would mean a reduction of some \$60,000,000 in net federal revenue next year, "which will have to be recouped from some other source of taxation."

The Canada Pension Plan under the new proposal would provide a pension of 25 per cent of earnings up to \$5,000 a year on retirement at age 65. Pensions would reach their full rate in 10 years' time. Contribution rates would average 1½ per cent for both the employer and the employee at the average level of earnings. Self-employed

The new general order for men in Prince Edward Island set a minimum wage of 90 cents an hour, increasing in two stages to \$1 an hour on May 1, 1964. The new general rates in Manitoba are 75 cents an hour in urban centres and 70 cents in rural areas.

In Newfoundland, new rates of 70 cents an hour for men and 50 cents an hour for women went into effect. In British Columbia, revised orders for offices and laundries set a minimum rate of \$1 an hour, the minimum rate in effect for the majority of workers in the province.

Benefits under workmen's compensation laws were increased in several provinces. Of special importance were changes with regard to the age to which children's allowances are payable. In Quebec, a child is now eligible for an allowance as long as he is in regular attendance at school. A child not attending school receives compensation to the age of 18. In Prince Edward Island, payments may now be made, in the Workmen's Compensation Board's discretion, to a child who is continuing his studies up to the age of 21.

Copies of the bulletin (Catalogue No. L2-7/1963) may be obtained from the Queen's Printer, Ottawa, at 35 cents each.

people would contribute 3 per cent—the combined employer-employee rate.

The Canada Pension Plan would not place private pension plans in an invidious position, and there would be discussions with private plan organizations with a view to integration as soon as possible, the Prime Minister said on April 23 in answer to questions (p. 2488).

The Government did not intend to extend the operation of the municipal winter works incentive program beyond the date originally set, the Minister of Labour said on April 6 in answer to a question (p. 1828).

The Government had decided not to extend the municipal winter works program beyond April 30 in designated areas of slow growth or in areas of high winter unemployment, the Minister of Labour announced on April 22 (p. 2456).

Bill C-28, to amend the Canada Fair Employment Practices Act to prohibit discrimination in employment on account of age, was "talked out" on April 24 during the debate on second reading (p. 2578).

On April 6, Royal Assent was given to an act enabling the Unemployment Insurance Fund to be replenished (p. 1842).

Collective Action by Nurses to Improve Their Salaries and Working Conditions

Until recently nurses have avoided collective action but more and more, nurses' organizations are negotiating with employers as low salaries recognized as part of cause of nurse shortage

An insufficient supply of nurses and the high wastage in the profession are increasingly recognized as attributable in large part to low salaries and unsatisfactory working conditions. The conditions of service are

determined in various ways, but more and more by negotiation between the employing agency and representatives of the nurses' organizations.

THE LEGAL BASES OF COLLECTIVE BARGAINING

Sometimes collective action as practised by nurses is governed by the labour relations laws. More often, however, the process is "voluntary" in nature.

In the traditional and legal sense, collective bargaining means the negotiation between an employer and a bargaining agent of his employees with the view to concluding a collective agreement containing provisions regarding rates of pay, hours of work and other conditions of employment. Under the labour relations legislation existing in Canada, employees have the right to organize without interference from their employer. The employer is required to recognize and negotiate with the bargaining agent who represents a majority of employees in a unit appropriate for collective bargaining. Questions of representation are determined by government-appointed Labour Relations Boards.

After a bargaining agent is certified, the employer and the bargaining agent representing his employees are required to meet within a specified period and make every

reasonable effort to conclude a collective agreement. Procedures are laid down for conciliation in the event of an impasse. In most provinces, strikes and lockouts are prohibited until the conciliation procedure has been carried out and also during the life of the collective agreement.

In Newfoundland, Prince Edward Island, Quebec and Alberta, to prevent the interruption of essential services, including hospital services, disputes affecting hospital employees are subject to compulsory arbitration.

The fact that the majority of nurses in Canada are not covered by labour relations legislation in no way precludes them from entering into collective negotiation with their employers. In doing so, however, such nurses do not have the protection of the labour relations laws, the employer is under no obligation to recognize any group of nurses as being representative of all nurses in his employ, nor is he compelled to listen to representations from them.

PROFESSIONAL ASSOCIATIONS AND LABOUR UNIONS

Registered nurses associations exist in all ten provinces and, in all except Ontario, nurses are required by law to belong to the professional association in order to practise.* The ten provincial nurses associations are federated into the Canadian Nurses' Association.

The prime objective of the CNA is "to dignify the profession of nursing by maintaining and improving the ethical and professional standards of nursing education and

service".† It should be noted that the function of a professional association in maintaining and improving professional standards is quite different from the chief purpose of the labour union, which is to regulate relations between employers and employees.

There is also a significant difference in the personnel of the two types of organization. The professional association is comprised of members from all ranks. Nurses associations include head nurses, supervisors, instructors and administrators, as well

*Registration with the Registered Nurses' Association of Ontario is voluntary but, in order to practise, nurses in Ontario are required to belong to the Ontario College of Nurses.

† From An Act to Incorporate the Canadian Nurses' Association, Statutes of Canada, 1947, C. 88, S. 3(a).

From the days of Jeanne Mance and the later Florence Nightingale, the training of nurses has stressed dedication to service, self-sacrifice, loyalty to the hospital and unquestioned obedience to those in authority. This tradition of service is strengthened by the public's expectation of the nurse. As a result, the profession itself and the public also have tended to view as somewhat unethical any forthright effort on the part of nurses to improve their working lot. Until recently, therefore, nurses have avoided any form of collective action directed to this end.

But the yeast of change is at work. Social emphasis on health and welfare is multiplying the calls on the profession. Efficient nursing service has come to be recognized as an essential of present-day society. Few people in the course of their lives have no occasion to avail themselves of the ministrations of the nurse.

Throughout the world a steadily increasing demand for nurses requires more effective methods of recruitment, better use of available nursing staff, and more effective retention of trained nursing personnel. To facilitate these goals has become a major concern of the International Council of Nurses. Moreover, as long ago as 1960 the International Labour Office held a Conference on the Employment and Working Conditions of Nurses. In Canada the subject, already an issue in many other countries, has taken on urgent importance and wide interest.*

The more than 75,000† registered nurses in Canada today are employed by public authorities at the municipal, provincial and federal levels of administration, by public and private institutions and agencies of all kinds, and by private individuals. The majority (about 72 per cent) are employed by hospitals, an estimated 10 per cent are in public health nursing, and about 7 per cent are in private practice. A further 10 per cent are in "other fields, serving, for example, as nurses in doctors' offices, in the Armed Forces and in occupational health units in industry.

as staff nurses. The labour union, on the other hand, excludes managers, superintendents, foremen or others who exercise managerial functions.

At its biennial meeting in 1944 the CNA for the first time approved the principle of collective action for registered nurses and recommended that the principle be carried out through the provincial registered nurses associations. It has also encouraged provincial associations to set up employment relations committees and to concern themselves with counselling their members and providing them with assistance in matters relating to conditions of employment.

Since 1944 each of the provincial nurses associations has set up a committee, usually called the Employment Relations Committee, which makes recommendations regarding salaries, hours of work, pensions, holidays with pay, sick leave and other matters relating to the social and economic welfare of its members. These are published as recommended minimum standards for personnel policies relating to nurses employed in hospitals and other health agencies. They are based on research into wages and working conditions both in the profession and in related occupations.

* *Employment and Working Conditions of Nurses*, International Labour Office, Geneva, 1960, page 57.

† Figures provided by the Canadian Nurses' Association, 74 Stanley Avenue, Ottawa.

The recommendations are revised periodically, in some provinces annually. In accordance with prevailing economic conditions and the cost of living, recommended salaries vary from province to province. They are highest in Western and Central Canada and lowest in the Atlantic Provinces. A recommended minimum salary rate is usually set for four classes of nursing staff—general staff nurse, head nurse, supervisor and instructor.

The recommendations are circulated to all members of the provincial nurses association and sent also to administrators of hospitals and other health agencies before hospital budgets for the coming year are drawn up. The associations are prepared to interpret and promote their recommended personnel policies, and several give advice to nurses and employers, by correspondence and personal interview, concerning salaries and working conditions.

Joint meetings with the provincial hospital associations may be held with a view to mutual agreement on basic minimum salaries and working conditions. In some provinces a direct channel of communication with the hospital services commission has been developed through a nursing advisory committee. One of the functions of such a committee is to discuss salaries and employment conditions with the commission's chairman, executive director, and director of hospital standards.

Most of the provincial associations do not favour their members' joining a trade union, and have put this opinion on record. Some associations have not made a definite statement on this subject but have advocated that nurses seek association support in preference to union membership. For example, the Registered Nurses' Association of Ontario, in its Brief to the Ontario Government Select Committee on Labour Relations in 1957, repudiated union membership because nurses, belonging to a service profession, must be prepared to render service sometimes beyond the normal hours of duty. They also thought that policies governing the practice of their profession should not be subject to the control of bodies outside the profession.

For its part, the trade union movement, although vitally interested in the organization of white-collar workers, has not as yet made any concerted effort to organize nurses. How many do belong to trade

unions is unknown, but the number is not large.

The pattern of collective negotiation varies from province to province. In one province, British Columbia, the nurses association is the legally established bargaining agent for nurses under the Labour Relations Act. In another province, Ontario, the professional association has initiated a voluntary negotiation scheme whereby a nurse negotiator employed by the association will be sent to assist a group of nurses in negotiations with the employer. Trade union affiliation provides the instrument of negotiation for a considerable number of hospital nurses in Quebec and for public health nurses in various centres across the country. A group of nurses employed by the federal Government is organized within the Professional Institute of the Public Service of Canada to participate in consultations with the appropriate officials in order to obtain higher salary schedules and improved working conditions.

THE SITUATION IN BRITISH COLUMBIA

A program of collective bargaining through the professional association, which is certified as a bargaining agent under the provincial Labour Relations Act, has been developed by the nurses in British Columbia.* As a result of this certification, the professional association has the status of an independent trade union.

In 1942 the Registered Nurses Association of British Columbia (RNABC) set up a committee on labour relations. This committee conducted an extensive study of the field of employer-employee relations; its members reviewed material about the trade union movement and became familiar with federal and provincial labour legislation.

They also considered the implications of joining trade unions, which various groups of nurses were being urged to do. Conferences were held with many other groups and professional organizations to discuss what would be involved in union membership, whether it could offer nurses anything that membership in their professional association could not, whether union membership would lower professional prestige or affect the quality of nursing care, and, finally, the mechanics by which the association itself could bargain for its members.

* Material for this section derived from two articles by Evelyn E. Hood, Director of Personnel Services, Registered Nurses Association of British Columbia: "Economic Security in British Columbia," *The American Journal of Nursing*, May 1956; "Collective Bargaining for Nurses in British Columbia," *The Canadian Nurse*, November 1962, and from correspondence with Miss Hood.

At the annual meeting of RNABC in 1944, the committee recommended to the general membership "that the council of the nurses' association be authorized to take whatever steps may be necessary in order to ensure that the council or its nominees may be appointed bargaining representatives for any of its members or groups of members, in any proceedings under the existing labour legislation of the Provincial Government."

The ensuing discussion showed that the general membership was not ready for formal collective bargaining and the resolution was not adopted.

During the two ensuing years, however, the committee continued its study and carried on an intensive educational campaign among the members of the RNABC. At the annual meeting in 1946 it recommended that a Select Committee on Labour Relations be formed in the Association to carry out the following functions:

1. To serve on request, in an advisory capacity, individual nurses or groups of nurse employees on matters related to employment conditions, with the objective of assisting nurse employees to prevent or overcome difficulties by democratic and business-like procedure.
2. In situations where nurse employees have been unable to effect an agreement with their employer, to arrange conferences with the employer at which nurse employees would be represented.
3. In situations where all other measures have failed, and upon the request of the majority of the affected employee group of nurses, to set up a bargaining group (representative of the affected nurse employee group

and the Select Committee) which would obtain certification and proceed with negotiations.*

Largely as a result of the educational campaign, this recommendation was accepted unanimously, and the program was inaugurated.

During the early years of the program there were many problems. The procedure for setting up a bargaining unit was cumbersome. Bargaining was complicated by the fact that the members of the Select Committee and not the RNABC itself constituted the bargaining authority. Some employers were opposed to any organization of their nursing staff and made it uncomfortable for staff members who took the lead. Many nurses, believing it to be unprofessional to be concerned with such matters as wages and working conditions, were reluctant to take part in the program.

Gradually, however, these initial doubts diminished as a result of the educational activities of the Association. The Select Committee ceased to exist; in 1956 the RNABC itself became the bargaining authority, and the program became the responsibility of the Director of Personnel Services, who is an employee of the RNABC. Collective bargaining within the framework of the Labour Relations Act came to be accepted by the nurses, their employers, and the public as a proper function of the RNABC.

The RNABC must apply for separate certification for each group of nurses (that is, nurses employed by the same employer) that it seeks to represent. The certification continues indefinitely, unless it can be proved that the Association no longer represents the nurses. The RNABC is now certified to bargain for the nurses employed by 50 hospitals.

With the exception of nurses employed by the federal and provincial governments, who, as civil servants, are excluded from the Labour Relations Act, all nurses in the province may avail themselves of this channel of negotiation with their employer.

When the RNABC is certified as the bargaining authority for a group of nurses, the employer is required by the provisions of the Act to bargain collectively and to conclude an agreement with the nurses. Where an agreement cannot be reached by direct negotiations, assistance may be given by the provincial Department of Labour, first through the appointment of a conciliation officer and secondly, if the officer fails to bring about agreement, through the appointment of a conciliation board, which hands

down a decision in the case. This decision, however, is not final and binding unless both parties to the dispute agree to accept the award.

The tight budgets within which a number of hospitals were operating curtailed plans for salary adjustments. For this reason it was difficult for some hospitals to come to terms with the nurses. As many as 21 disputes were referred to conciliation in 1957 and 1958.

In July 1957, some 500 nurses in three hospitals in the province threatened to go on strike. A conciliation board had handed down a decision awarding the nursing staffs in the three hospitals an increase in salary. The nurses had agreed in advance to accept the findings of the conciliation board but the hospital boards had not. When the award was handed down the hospital boards said that, although they supported the award, they did not receive enough money from the British Columbia Hospital Insurance Service to pay the increases.

In this threatened strike the nurses were supported by the medical staff of the three hospitals, and the general public also took a favourable attitude. As the strike deadline approached, the provincial Government provided the Hospital Insurance Service with sufficient additional funds to enable the hospital boards to pay the increased salaries, thus averting the strike.

Both the hospitals and the nurses felt, however, that a method should be sought to facilitate settlements in the future. In the fall of 1959 representatives of the British Columbia Hospital Association asked for an opportunity to discuss a plan for province-wide bargaining with the RNABC. The plan was outlined as follows:

1. Each association would name a bargaining committee.
2. These two committees would endeavour to reach an agreement on certain terms of the nurses' agreements in hospitals where the RNABC had bargaining authority.
3. Decisions of this joint committee would have to be ratified by the individual hospitals and the individual nursing staffs. There would continue to be separate agreements between the RNABC and each of the hospitals.
4. There would continue to be opportunity for individual staff representatives and the Director of Personnel Services of the RNABC to meet with representatives of the boards of each of the hospitals.*

To the Council of the RNABC, this plan seemed to offer a means of avoiding delays and stalemates. By unanimous decision, it was decided to recommend to the members that the RNABC participate in the

* "Economic Security in British Columbia," Evelyn E. Hood, *American Journal of Nursing*, May 1956.

* "Collective Bargaining for Nurses in British Columbia," Evelyn E. Hood, *The Canadian Nurse*, November 1952.

plan, on the understanding that bargaining would be with a committee of the Hospital Association rather than with a professional negotiator and that the RNABC would be free to dissociate itself from the plan if it was found not to be in the best interests of the Association and the nurses concerned.

In November 1959 a committee appointed by the RNABC met for two days with a committee from the British Columbia Hospital Association and they agreed upon certain terms to be incorporated in a new collective agreement. Before the agreement

became effective in any hospital, individual contracts were completed, binding the hospital's board on the one hand and its nursing staff on the other. The agreement provided for a two-year contract and a new salary scale, with larger differentials between positions.

Since the inception of province-wide bargaining in 1959 the hospitals in British Columbia that do not have a formal contract with the RNABC also have based their employment practices on the recommendations of the RNABC.

THE SITUATION IN ONTARIO

The Registered Nurses' Association of Ontario has evolved a scheme of assistance to nurses who are making representations to their employer for improved salaries or other working conditions.*

The Registered Nurses' Association of Ontario (RNAO) first set up a Committee on Labour Relations in 1943. Although the Committee was opposed to affiliation with trade unions by members of the nursing profession, it subscribed to the principle of collective bargaining as being compatible with professional ethics. The Committee provided informal assistance to nurses who sought its help in solving employment problems.

In 1957, when the province's Labour Relations Act was under review by the Select Committee of the Ontario Legislature on Labour Relations, a special meeting of the Board of Directors of the RNAO was called to study the whole question; the presidents of all districts of the Association were asked to come to the meeting.

After detailed discussion, the Board decided to present a brief to the Select Committee asking that registered nurses be exempted from the Act and so be automatically excluded from any bargaining unit for which a bargaining agent might be certified for employees in any institution where nurses were working. Exclusion from the Act would also preclude the possibility of certification as a bargaining agent of the RNAO itself. Nevertheless, the Board of Directors believed that such exemption would be in the best interests of registered nurses. So far, however, the Ontario Legislature has not acted upon the nurses' request.

*Information for this section derived from various articles by Mary F. Strong, Nursing Consultant, Personnel Relations, Registered Nurses' Association of Ontario, printed in the Association's *News Bulletin*, Summer 1958 to November-December 1962, and from correspondence with Mrs. Strong.

Meanwhile, the RNAO had been undertaking a comprehensive, province-wide survey of employment conditions in all branches of nursing and in comparable occupational groups such as school teachers, librarians, physiotherapists, occupational therapists, dietitians, social workers, secretaries and stenographers. The study showed nurses' salaries to be considerably lower than those of the other groups and as a result the minimum salary for general duty nurses recommended by the RNAO was substantially raised.

At the same time the Association carried out an investigation of the various methods of collective bargaining that could be used for nurses. At the 1958 annual meeting, the three methods that had been found most suitable were presented for consideration: certification under the Labour Relations Act of the Association as the bargaining agent for nurses, legislation providing for compulsory arbitration such as was in effect for policemen and firemen in the province, and a system of voluntary negotiation patterned somewhat on the method used by teachers.*

In the discussion that ensued there was some support for a system of compulsory arbitration for disputes between nurses and their employers. Under such a system employers and employees would be compelled, if necessary, to submit their dispute for settlement by an arbitration board whose decision would be final and binding on both parties. It was thought that this type of bargaining had some value for a group offering essential services which, for the safety of the community, should never be interrupted because of differences between employer and employees. Nurses were concerned, however, about the length of time that arbitration might take, during which

* "Steps to Security," panel discussion, *News Bulletin* of the Registered Nurses' Association of Ontario, midsummer 1958.

time working conditions remained unchanged. They also believed they would have to accept what might be unsatisfactory decisions made by persons outside the nursing profession.

The eventual decision was that the Association adopt a system of voluntary negotiation "with the ultimate aim of securing legislation for compulsory arbitration if necessary." The Association was to review the new program after it had been in operation for five years.

This plan of personnel relations is essentially an enlargement and extension of what the RNAO had been doing all along. A new feature was the appointment of an Association representative (Nursing Consultant in Personnel Relations) to assist nurses with their employment problems. Her duties are:

1. to give assistance, on request, to individual registered nurses or groups of registered nurses in dealing with problems arising out of their employment;
2. to act as negotiating agent with employers when necessary;
3. wherever possible to help further the general adoption of the Association's personnel policies, and
4. to promote the economic welfare of nurses.

The plan embraces all registered nurses in the province, irrespective of rank or area of employment. The RNAO is prepared to support nurses whose requests "are fair and reasonable and in line with the personnel policies of the Association." Nurses are requested to notify the Nursing Con-

sultant in Personnel Relations before asking for changes in their employment conditions, although they are free to make the first approach to their employer themselves and to conduct their own negotiations if they wish to do so. Nurses are encouraged to ask for help from the RNAO as soon as it becomes apparent that local efforts are not succeeding and before relationships become strained or matters reach a crisis.

The aim of the RNAO is to help nurses to handle their own employment problems as far as possible.* Advice is given, when needed, on the actual procedure for initiating a request through a proper business-like approach to the employer. It is expected that the individual or group concerned will participate actively throughout the proceedings, unless otherwise indicated, even when the RNAO has entered the picture and is carrying on negotiations.

The Male Nurses' Committee of the RNAO, however, in its report to the annual convention of the Association in 1962 stated that voluntary methods of negotiation are not effective and that many agencies do not honour the RNAO standards. The Committee urged the Association to seek certification as bargaining agent under the Ontario Labour Relations Act. Thereupon the convention unanimously adopted a resolution calling for a special committee to review the RNAO's program of voluntary negotiation and to investigate further the various other possible methods of collective bargaining and dispute settlement for nurses.†

THE SITUATION IN QUEBEC

About the same time as the Registered Nurses Association of British Columbia was entering the collective bargaining field, the Association of Nurses of the Province of Quebec (ANPQ) made an abortive attempt to become the legal bargaining agent for a group of nurses in that province.*

Local associations of the ANPQ have, in principle, the legal right to negotiate collective agreements for nurses. Article 17 of the Quebec Nurses' Act†, which incorporates the Association and sets out its powers, states:

Each local association may negotiate, conclude and sign as agent and proxy in the name of any group of members of the local association residing and practising in the territorial

*Our Personnel Relations Program, *News Bulletin* of the Registered Nurses' Association of Ontario, January-February 1960.

† At the request of the special committee, the Board of Directors engaged an industrial relations specialist to investigate the feasibility of the RNAO's seeking legislation for collective bargaining backed up by compulsory arbitration. The resulting report having been studied by members of the Association, the 1964 annual meeting, held April 30-May 2, voted to seek provincial legislation to provide the right of registered nurses in Ontario to bargain collectively with their employers on all matters involving salaries and working conditions, the RNAO to be recognized as bargaining agency. The desired legislation would provide also the legal obligation for employers of registered nurses to bargain collectively in good faith with representatives of the RNAO; the right of either party to apply for the assistance of a government conciliation officer or an independent mediator; the right of either party, as a last resort, to request and obtain final and binding arbitration of matters in dispute, by an impartial third party or three-part board; and the legal obligation of both parties to be firmly bound by the results of these negotiations.

*Information for this section provided by officers of the Association of Nurses of the Province of Quebec, notably Miss Eileen C. Flanagan, Co-chairman, Committee of Labour Relations of the Association.

† Statutes of Quebec, 1946, chapter 88.

jurisdiction of the said local association who shall have requested them to do so, collective contracts or agreements with any category of employers.

Acting under this section, the ANPQ in 1947 sought to become the recognized bargaining agent for the nurses at the *Hôpital du Sacré-Cœur* in Cartierville: Their application was opposed by the *Syndicat des Gardes-malades de Montréal*, which also wished to be the bargaining agent for the nurses. The dispute therefore came before the Quebec Labour Relations Board.

The *Syndicat* maintained that the ANPQ was not a proper 'association' within the meaning of the Labour Relations Act. All nurses in the province must be members of the ANPQ before they may practise and as a result the ANPQ has within its membership nurses who are employees of an institution and nurses who are on the administrative staff and therefore are essentially employers. The Act requires that an "association" be composed either of employees or of employers; both groups can not be included in the same unit.

The Labour Relations Board decided in favour of the *Syndicat*, rejected the application of the ANPQ and certified the *Syndicat* as bargaining agent for the nurses.

Since this attempt at certification the Association has not sought to bargain directly on behalf of nurses in the province.

In the province of Quebec trade unionism among hospital nurses is stronger than in any other part of Canada.* It is found predominantly among nurses in French Roman Catholic hospitals. Non-professional staff have been organized in the French-language hospitals for many years and in the past few years unions have also been gaining strength among non-professional workers in English-language hospitals. The success of these non-professional workers' unions in raising the wages and improving working conditions of their members has, among other factors, influenced some professional nurses to join the labour movement.

The nurses are members of unions affiliated with either *la Fédération nationale catholique des services* (FNCS) or with *la Fédération des syndicats professionnels d'infirmières catholiques* (FSPIC).† The former is affiliated with the Confederation of National Trade Unions and includes nurses' unions in the regions of Montreal,

* "Le syndicalisme chez les infirmières", *Les hôpitaux dans la province de Québec*. Documentation sociale, série hôpitaux, conférence catholique canadienne, Ottawa, 1962, p. 66.

† *Les effectifs des syndicats d'employés et d'infirmières*, *Les hôpitaux dans la province de Québec*, op. cit. pp. 64-65.

Sherbrooke, St.-Hyacinthe, Hull and several other areas in the province. The latter federation, on the other hand, is an independent association located mainly in Quebec City, Chicoutimi, Trois Rivières and the lower St. Lawrence Valley.

The Quebec Labour Relations Board has certified these nurses' *syndicats* as bargaining agents under the Quebec Labour Relations Act. The *syndicats* are subject to the provisions of the Act with respect to negotiation of wages and working conditions, but special legislation‡ applies to disputes settlement. Disputes between hospital authorities and nurses must be referred to arbitration either under the terms of a collective agreement or under the Quebec Trade Disputes Act, which provides that the provincial Minister of Labour appoint an *ad hoc* board of three members, one representing employers, one employees and an impartial chairman. Strikes or lockouts are prohibited in all circumstances.

There have, however, been occasions in which unionized nurses in Quebec have withheld their services in order to obtain better working conditions. One of the more widely publicized examples of such action involved 35 nurses at the *Hôpital du Sacré-Cœur* in Hull who, in May 1958, "resigned" their positions in protest because the hospital authorities would not agree to their salary demands. They decided on this course rather than submitting their case to arbitration.

After the resignations, the Quebec Labour Relations Board decertified the union as bargaining agent for the hospital's nurses on the grounds that the mass resignations constituted an illegal strike. In June, however, the hospital authorities resumed negotiations with the nurses, although no longer legally obliged to do so. As a result, the nurses and the hospital authorities signed a collective agreement embodying the main demands for which the nurses had resigned. It is interesting to note that throughout this dispute, public opinion was in favour of the nurses and a "citizens committee" marched to the hospital in their support.

More recently, in October 1963, some 250 nurses at the *Hôpital Ste-Justine* stopped work and began a "study session" in protest against a decrease in nursing staff at the hospital and an increase in their work load. The nurses had been organized in June by the Montreal Nurses' Alliance CNTU (*l'Alliance des infirmières*) and were in the process of negotiating a collective agreement. The nurses returned to work after

‡ The Public Services Employees Disputes Act, Statutes of Quebec, 1944, chapter 31.

the Quebec Deputy Ministers of Health and of Labour met with their representatives and with representatives of the hospital authorities. Both Ministers assured the nurses that justice would be done.

In Quebec, under the Collective Agreement Act, certain provisions in an agreement may be made legally binding by order in council on all employers and employees in an industry in a specified area. The provision of an agreement entered into by *l'Association des infirmières catholiques du diocèse de St.-Hyacinthe* and a hospital in that city have been legally extended to apply to all nurses in hospitals, sanatoria and convalescent homes in a region embracing the electoral districts of St. Hyacinthe, Iberville, Missisquoi, Richelieu and Rouville, the city of Granby and the town of Beloeil.

There is some tendency toward "group bargaining" which, if it continues, will lead to more uniform salaries throughout the province for nurses in hospitals where unions exist.* Nurses' unions are already organized on a regional basis. In the eastern section of the province, the majority of larger hospitals are members of *l'Association patronale des services hospitaliers* (APSH), formed in 1944, which negotiates for a group of hospitals in a given region collective agreements with the representatives of the nurses' unions. The APSH represents 56 hospitals in the regions of Quebec City, Saguenay, lower St. Lawrence River, Nicolet and Trois-Rivières. In the diocese of St.

Hyacinthe, the hospitals negotiate jointly through a representative of a diocesan association which includes all religious institutions.

In Montreal the hospitals belonging to the Sisters of Providence are the only ones that negotiate collective agreements jointly with representatives of the nurses' unions. Most of the other hospitals in the Montreal area negotiate on an individual basis. These hospitals, however, are considering the possibility of forming an association for the purpose of joint negotiations or of joining the ranks of the APSH.

The policy of the ANPQ today is to assist nurses with collective bargaining. The *syndicats* bargain on the basis of the recommended salary schedule of the ANPQ, and the chairman of the labour relations committee of the Association attends the bargaining sessions. She is also a member of the parity committee set up by the Quebec Department of Labour to administer the terms of the decree under the Quebec Collective Agreement Act applying to nurses in the District of St. Hyacinthe.

The ANPQ continues to study ways and means, including possible methods for obtaining certification as bargaining agent for Quebec nurses, by which it may help its members obtain better salaries and working conditions. The Association is studying the British Columbia program of collective bargaining in order to assist it in arriving at a decision.

THE SITUATION IN SASKATCHEWAN

The Saskatchewan Registered Nurses' Association, like the other provincial associations, makes periodic recommendations regarding salaries and other working conditions for nurses in the province. Generally speaking, these recommendations are observed in most private and municipal hospitals.

Nurses in the Saskatchewan Civil Service and in three provincial mental hospitals, in addition to belonging to the professional association, are also members of trade unions.

The Saskatchewan Trade Union Act, unlike the other provincial labour relations legislation and unlike the federal Act, includes employees of the Crown. The Act specifically provides that Her Majesty in right of the province of Saskatchewan is regarded as an employer within the meaning of the Act.†

The Public Service Act of the province provides further that "Such members of the Executive Council as may be designated by the Lieutenant-Governor in Council for the purpose may . . . on behalf of the Crown enter into a collective bargaining agreement, within the meaning of the Trade Union Act, with a trade union representing a majority of employees in the public service which has been determined under the provisions of the said Act to be an appropriate unit for the purpose of bargaining collectively."*

Under these provisions the National Union of Public Service Employees† and the United Civil Servants of Canada have negotiated an agreement with the Government of Saskatchewan covering employees in mental hospitals operated by the Government in three centres, North Battleford, Weyburn and Moose Jaw. This agreement

* "Tendances actuelles en regard des négociations sous le nouveau régime d'assurance-hospitalisation." *Les hôpitaux dans la province de Québec op. cit.* pp. 6566.

* Public Service Act, RSS 1953, C. 7, S.59.

† The National Union of Public Service Employees and the National Union of Public Employees amalgamated in September 1963, becoming the Canadian Union of Public Employees.

is unlike others so far described in that it covers many types of hospital workers in addition to registered nurses.

About 200 nurses are covered, including ward supervisors, registered psychiatric nurses and "psychiatric nurse graduates."* Head nurses are not covered. The nurses took no active part in the organization of the employees in the three hospitals but they did not oppose their inclusion in the bargaining unit.

Apart from nurses in the three provincial mental hospitals, the nurses employed by the Government of Saskatchewan belong, with other civil servants, to the Saskatchewan Government Employees' Association and are covered by a collective agreement between the Association and the Government.†

More than 200 registered nurses are covered by the agreement, the majority of whom are public health nurses employed

in Saskatchewan Health Regions. The agreement excludes from coverage the Director of Public Health Nursing and the Public Health Nursing Supervisors. The nurses generally take no active part in the Association. On occasion, however, representatives of the public health nurses have submitted briefs for pay adjustments to the Association Negotiating Committee and have served as members of a Committee on Pay Adjustments. The nurses have the right to strike but have never done so nor threatened to do so.

The Executive Secretary of the Association has stated, "The experience with collective bargaining of nurses, as with other professional employees in the Saskatchewan Government Employees' Association, has been a good one. The nurses appear to be satisfied and our rates of pay stand up very well with other provincial governments."

NURSES EMPLOYED BY MUNICIPALITIES

In several of the larger centres across Canada, public health nurses and other nurses employed by the city are members of a trade union (a local of the Canadian Union of Public Employees) and their wages and working conditions are determined by collective agreements covering city employees generally. This is the case in Vancouver, Victoria, Burnaby, North Vancouver, Edmonton, Regina, Saskatoon, Winnipeg, Toronto, Ottawa, London and Montreal.

In Calgary, public health employees, including nurses, are organized separately from other city employees. The City Health Department Employees' Association includes both city public health nurses and school nurses as well as other employees in the health fields, such as dental assistants and hygienists, sanitary inspectors, food laboratory technicians and stenographers and clerks working in the city health department.

Apart from the health local in Calgary, public health nurses are only a small proportion of the wide variety of employees included in agreements negotiated with municipal governments.

The experience of collective bargaining of the nurses employed by the City of Toronto may be cited as typical of nurses

employed by a municipality whose employees are organized.‡

In the mid-1940's, the National Union of Public Employees organized the employees of the City of Toronto. There are two locals, one comprising outside workers, the other inside workers, the latter being the one to which nurses belong. The agreement at first provided for the Rand Formula, i.e., compulsory check-off of union dues from the wages of all employees under the agreement whether or not employees are union members. In 1947 this provision was replaced by a union shop provision, i.e., compulsory union membership. The agreement requires that all employees, including nurses, become members of the union within 110 days from the date of appointment.

The nurses belonging to the union have never taken any part in union activities. Some nursing staff have on occasion been actively hostile to the union. An example of this hostility occurred in 1956 when the Greenacres Home for the Aged was opened in Newmarket under the jurisdiction of the Municipality of Metropolitan Toronto. The nurses who accepted staff appointments at Greenacres were united in their strong desire not to join the union. Their own efforts to avoid union membership and the representations of the Association were unsuccessful. In April 1957 the nurses were advised by letter that they must complete the necessary documents and return them

* A graduate of a 3-year diploma course, given only in Saskatchewan.

† Information for this section was provided by William Leonard, Executive Secretary of Saskatchewan Government Employees' Association.

within fourteen days, otherwise action would be taken for their dismissal from the service. As a result, six of those employed at April 15 left the staff, giving personal reasons or stating that they did not wish to join the union.

Nurses employed by the Municipality of Metropolitan Toronto obtain through the collective agreement approximately the same salary rates as are paid in the majority of hospitals in the Toronto area.

The collective bargaining experience of the nurses employed by the city has influenced the position of other public health nursing groups in the community. From the standpoint of the employer, however, there are obvious difficulties in dealing with

unions representing many different groups or classes of employees.*

For example, the majority of hospitals in the Metropolitan Toronto area, paying approximately the same salary rates, grant nurses four weeks vacation after one year of service whereas the municipality grants the nurses in its employ only two weeks, the same length of vacation as for other municipal employees. Municipal councils are generally in favour of giving all municipal employees the same fringe benefits, and conciliation and arbitration boards are inclined to grant the fringe benefits currently provided in the trades rather than in the professions.

THE POSITION OF OCCUPATIONAL HEALTH NURSES

Very few occupational health nurses, even among those working in highly organized industries, belong to a union. At an extension course for occupational health nurses held recently at the University of Toronto School of Nursing, nurses were told: "The nurse must remain neutral in any industrial relations controversy. Nurses are not experts in industrial relations, yet in service to the employees, in her communications with management and in her nursing intuition she learns to be astute in giving good nursing care, yet remain neutral in relationships which are outside her role as a nurse in industry."*

The Canadian Manufacturers' Association in its brief to the Ontario Select Committee on Labour Relations recommended that nurses be excluded from the Labour Relations Act—but for a different reason. The Association pointed out that a large number of firms have nurses on their payroll and the function of an occupational health nurse is in a supervisory capacity of interpreting management policy to a group of employees.

The labour movement has, generally speaking, respected the wishes of the nurses to remain neutral between management and labour and in only a few instances have unions pressed nurses to join a trade union.

COLLECTIVE ACTION BY NURSES EMPLOYED BY THE FEDERAL CIVIL SERVICE

Recently a group of registered nurses within the Civil Service of Canada, by taking collective action, has had a measure of success in improving salaries for nurses in the employment of the Government of Canada.

The federal Government is the largest single employer of nurses in Canada. Approximately 2,400 registered nurses are required to staff DVA and other federal hospitals and health services. Only 5 per cent of these nurses are in senior administrative positions; the others are engaged chiefly in bedside nursing, public health or occupational health nursing or as head nurses in hospitals.

For several years there has been a Registered Nurses' Group within the Professional Institute of the Public Service of Canada. In keeping with the over-all ob-

jectives of the Institute, this group's primary purpose is "to ensure satisfactory employment conditions for its members while maintaining a high quality of nursing services within government employment."†

Leaders of this group had been concerned because of the number of vacancies and the rate of turn-over of nursing staff in government hospitals. The leaders of the group believed that this situation could be attributed to the low salaries that nurses were receiving. At the request of the Registered Nurses' Group, a Special Committee on the Status and Remuneration of Registered Nurses was set up in 1960 within the Professional Institute. The Committee consisted of two members of the Registered Nurses' Group and several members from the Economists and Statisticians' group of the Institute.

* Mildred I. Walker, *What the Nurse Expects of the Doctor and Management in an Occupational Health Nursing Service*, Special Extension Course for Occupational Health Nurses, University of Toronto, November 13, 1961.

* *Hospital Administration in Canada*, August 1961, page 18.

† "Status and Remuneration of Federally Employed Nurses," *Professional Public Service*, October 1961, p. 17.

Soon thereafter, the Civil Service Commission, with the assistance of a working party consisting of seven nurses from the Department of Veterans Affairs and National Health and Welfare drew up detailed specifications for each class of nurses in the employment of the federal Government and a scale of salary adjustments for the new classes. These were announced in May 1961. As a result there was a considerable increase in the salaries of nurses in the senior and administrative classes. The new

regulations also provided additional remuneration for specialty training to nurses in the lower grades.

In March 1963, officials of the Treasury Board invited the Professional Institute and other staff associations representing nurses within the federal Government to consult with them concerning nurses' salaries. Further increases in the salaries of all classes of federally employed nurses were announced September 1963.

CONCLUSION

Although active support of programs of collective action among professional nurses has been slow in developing, it is clear that nurses are taking more initiative with respect to decisions regarding their salaries and working conditions than they did in the past. How far this initiative will result in the extension of collective bargaining within the profession in the future and what form such bargaining will take depends on many factors.

One of these factors is the extent to which new public awareness of the high responsibilities carried by the nursing profession will contribute to increasing nurses' salaries and improving their working conditions. The importance of health services in the community and the demand for health personnel have led to greater recognition of the role of the nursing profession. The provincial nurses associations report that the salaries paid by the larger hospitals and those in urban areas are generally in line with their recommendations. This trend, if it continues, may have some influence on the extent to which nurses will resort to collective bargaining.

On the other hand, these same developments are making nurses themselves more aware that dedication to service does not obviate their right to salaries and working conditions consistent with the importance of their contribution to the welfare of the community. Such consciousness might bind them together to demand more vigorously what they feel to be their legitimate rights. If such is the case, it appears likely that leadership might come from the nurses in the West, who have had the experience of collective bargaining, and from younger nurses, who have grown up in a world in which trade unions have an accepted role in the normal pattern of industrial relations.

All the provincial nurses associations have grown in membership, gained in experience and widened their range of activities to include the determination of conditions of service. The British Columbia experiment of collective bargaining through certification of the provincial association as

bargaining agent has been followed with deep interest by the other nine associations. Several have sent representatives to British Columbia to study the program at first hand.

The trade union movement, too, may have a part to play. As more non-professional workers in hospitals are becoming organized and obtaining better wages and working conditions through collective bargaining, it is possible that nurses may follow suit. Such developments seem to have been a factor in the organization of nurses in several hospitals of Quebec. On the other hand, there are nurses who feel that to identify themselves with the labour movement might detract from their professional status.

Hitherto, except in the province of Quebec, the labour movement in Canada has not been active in recruiting nurses to its ranks. More recently, however, the Canadian Labour Congress has set up a committee to determine ways and means of attracting various "white collar" groups to its membership. Whether it will be successful in developing a white collar psychology that will attract nurses in any number into its ranks remains an unresolved question.*

It is apparent that in Canada collective action on the part of nurses to improve their salaries and working conditions is in a stage of experiment and change. At the same time such developments have their counterpart in many countries. In 1961 the International Council of Nurses† set up a section on economic welfare. Further, at the ICN Congress‡ held that year it was agreed that "economic rewards parallel status in most countries." The report of the Congress states, "the professional organization has a definite responsibility to look after the economic aspects of the nursing profession." Further it adds: "trade unionism has much to offer in experience and knowledge of collective bargaining, sometimes lacked by the professional association."

Canadian Railway Board of Adjustment No. 1 Has Gone Out of Existence, After 45 Years

In operation since August 1918, joint board for arbitration of grievances lodged by unions of operating employees ceased to function February 29 after railways' notice of termination

The Canadian Railway Board of Adjustment No. 1, which had been in operation since August 7, 1918 under an agreement between Canadian railways and six unions representing their operating employees, went out of existence on February 29 after notice of termination of the agreement had been given by the railways.

The Board, which was set up as a wartime measure during World War I, was patterned after the United States Railway Board of Adjustment No. 1, established in Washington on July 27, 1918. Its purpose, as stated in the original agreement, was "to avoid disputes or misunderstandings which would tend to lessen the efficiency of transportation service in Canada during the War."

On July 26, 1918, at the invitation of Senator G. D. Robertson, then acting Minister of Labour for Canada, a conference was held in Montreal between representatives of the Dominion Government, the Canadian Railway War Board, the railways of Canada, and the train service, telegraphers and trackmen's labour organizations on those railways. Some 43 representatives of the Canadian railways and 76 representatives of the railway employees' organizations attended this meeting, which was under the chairmanship of Senator Robertson.

The acting Minister explained that he had called the meeting to devise and put into effect a method of equitably adjusting disputes under the changed conditions of employment arising from the adoption by the Canadian railways of General Order No. 27* of the Director General of the United States railways.

"The Government approves of the idea for one purpose only," Senator Robertson said, "and that is for the maintaining of

industrial peace on the railways, and to have the transportation of the country carried on without interruption."

The agreement between the railways and the employees that resulted from this meeting provided for the setting up of a board consisting of 12 members, six chosen and paid by the railway companies and six chosen and paid by the employees' organizations. The Board was to elect a chairman and a vice-chairman from among its members, and was to meet regularly at stated times each month, and to continue in session until all matters before it had been considered.

The Board was instructed to decide all matters of controversy arising from interpretation of wage agreements and other matters in dispute when these matters were properly submitted to it. Personal grievances arising out of the interpretation of wage agreements, and all other matters in dispute, were to be handled by general committees of the employees in the usual manner up to and including the chief operating officer of the railway.

If an agreement was not reached, the chairman of the general committee might refer the matter to the executive officer of the organization concerned, and if this officer approved of the contention of the employees' committee, he and the chief operating officer of the railway were to refer the matter to the Board of Adjustment. The Board was then "promptly" to hear and decide the case.

All decisions were to be approved by a majority vote of the Board, and if a majority vote could not be obtained, any six members of the Board might elect to refer the matter to a referee, who was to be chosen unanimously by the Board. If a referee could not be agreed upon, application was to be made to the Governor-General-in-Council for the appointment of a referee, whose decision was to be final.

All clerical and office expenses of the Board were to be borne equally by the Canadian Railway War Board and the labour organizations.

The agreement was to remain in effect for the period of the war and thereafter, unless terminated on 30 days' notice by

* General Order No. 27 (the McAdoo Award), issued in the United States on May 25, 1918 by Director General of Railroads W. G. McAdoo, fixed the wages of American railway employees. It put into effect, with modifications, the recommendations of the Railroad Wage Commission that had been appointed by Director General McAdoo to study and report on wages and hours of work in railroad service. It established the basic eight-hour day as a basis for further wage adjustments, although it did not reduce the hours actually in effect at the time. It originally applied to 165 railroads (L.G., Vol. 18, p. 432).

the Canadian Railway War Board representing the railways, or by a majority of the executive officers of the organizations representing the employees.

The agreement was signed by the chairman of the Canadian Railway War Board as the representative of the companies, and by representatives of the following railway unions: Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Enginemen, Order of Railway Conductors, Brotherhood of Railroad Trainmen, Order of Railroad Telegraphers, and International Brotherhood of Maintenance of Way Employees.

Each of the following companies appointed members to the Board: Canadian National Railways, Grand Trunk Railway System, and Canadian Pacific Railway Company. By the time the Board issued its first report in October 1920 the Canadian Railway War Board had become the Railway Association of Canada.

On April 15, 1921, the original agreement was superseded by another, the preamble to which stated that the parties were "guided by a desire to aid in the preservation of industrial peace in the Dominion of Canada." It differed little from the original agreement, two minor changes being that the tenure of office of the chairman and vice-chairman was to be one year, and that if the parties could not agree on the appointment of a referee, the Minister of Labour, instead of the Governor-in-Council, was to be asked to appoint one.

The same six unions signed the 1921 agreement, and an appendix listed the 11 railways represented by the Railway Association of Canada. These included the Canadian National Railways, the Canadian Pacific Railway, the Grand Trunk and the Grand Trunk Pacific Railways.

Like the previous one, the new agreement provided for its amendment or termination at any time on 30 days' notice by either party. But the agreement of April 15, 1921 remained in effect until February 29 this year.

Summaries of cases decided by the Board of Adjustment have been published in the *LABOUR GAZETTE* since the Board's establishment. The latest summary, of Case No. 823, appears in this issue, page 407.

On February 27, two days before the agreement terminated, the Minister of Labour said in the House of Commons in reply to a question: "This termination may have undesirable consequences if alternative procedures are not found, but I think the Railway Association of Canada is giving consideration to this question now."

The Industrial Relations and Disputes Investigation Act, applying to industries under federal jurisdiction, provides that every collective agreement shall contain a provision for the final settlement, without a work stoppage, by arbitration or otherwise, of disputes over the meaning or concerning a violation of the agreement.

On March 17, the Brotherhood of Locomotive Firemen and Enginemen, one of the unions affected by the termination of the Board of Adjustment, signed an agreement with the Canadian Pacific Railway Company by which the Board was replaced by a one-man arbitration procedure for final settlement of disputes after the usual grievance procedure had failed. The party requesting arbitration is to submit the names of three arbitrators, and if the other party does not accept any of them, the Minister of Labour is to be asked to appoint an arbitrator. It was reported that the union had signed a similar agreement with the Canadian National Railways.

Submission to Federal Government, Canadian Construction Association

Annual brief asserts that to impose increases in labour costs by enacting legislation affecting minimum wages, maximum hours, vacations and holidays will create economic hardships

To impose an increase in labour costs over and above those set by collective bargaining by enacting legislation affecting a whole series of items simultaneously will create serious economic hardships, the Canadian Construction Association warned the federal Government in its annual submission, presented this year on April 13.

The CCA was referring to the announced intention of the Government to establish labour standards for industries under federal jurisdiction affecting minimum wages, maximum hours, vacation pay and statutory holidays (L.G., Apr., p. 267).

The Association said that it viewed the proposed changes with "considerable concern" and suggested that before such changes were made, sufficient notice should be given to allow for the statutory increases in labour costs to be given "due consideration in employer-employee negotiations."

Moreover, such standards should be set, as is the case in most provinces, by tripartite boards. This practice facilitates broad consultations and flexibility. Full attention should be given to the conditions in the various regions of Canada and the effect such legislation will have on provincial statutes and economies.

Fair Wage Schedules

Conflicts with collective agreements or provincial legislation should be avoided in setting working conditions for employees of contractors working on federal Government projects and for prevailing rate employees of the Government, the Association said.

"The construction industry has had long experience with the disruptive effect of the federal Fair Wages and Hours of Labour Act" when it led to such conflict, it added. The main need at present regarding the Act was for more flexibility in the application of the limitations on daily hours of work.

Industry conditions related to weather and topography are such that statutory daily limits should be eliminated entirely. Such a step would equally benefit labour, contractors and taxpayers. Employees would have a greatly improved opportunity to earn a steadier and larger income. Costly delays could be caught up with without penalty within the hours of work limitations based on a period of a week or more.

Alberta's statutory limit for roadbuilding of 208 hours in a four-week period and the limit of 120 hours in a two-week period set by the Manitoba Fair Wage Act were cited

as examples of this desirable flexibility. "Unions have accepted these provisions and readily incorporated them in collective agreements," the CCA said.

It also urged that care be taken to avoid disruptive effects in the introduction of collective bargaining for prevailing rate employees in the public service, many of whom were in the construction trades. "In the past, these personnel have followed the wage patterns locally established by collective bargaining in our industry. It is most desirable that this practice be maintained in order that conflicts will continue to be avoided."

Unemployment Insurance

The brief urged the amendment of the Unemployment Insurance Act to prevent the "now still possible misuse" of the Unemployment Insurance Fund as a union "strike fund." It urged also that special care should be taken in transferring the National Employment Service to the Department of Labour.

It drew attention to the recommendation of the Gill Committee report that the cost of seasonal benefits should be borne by the Consolidated Revenue Fund.

Training Programs

The brief commended the Government for giving additional financial support to a number of training programs during 1963. The help being given by the Department of Labour in the preparation of an outline for the training of construction superintendents, and the revising of the Department's booklet, *Careers in Construction*, were mentioned with special appreciation.

The Association has come to the conclusion that the effective promotion of apprenticeship training in the construction industry requires a system of compulsory tradesmen's qualifications. The possibility of promoting this view in joint labour-management briefs to the various provinces is now being explored.

The high degree of mobility in the construction labour force places additional importance on the establishment of national trade standards. It is hoped that the present series may be expanded before long to include all construction trades not yet covered.

Finally, the Association would warn against any extensive attempts to include "designated" construction trades in short-term programs for the training of the unemployed unless they are in the form of upgrading courses for construction tradesmen.

Labour Research

Regarding labour research, the CCA deplored the lack of "depth studies" of employment. The main obstacle to such work was doubtless the shortage of persons qualified to undertake it; and the Association reiterated its earlier recommendations that more labour economists should be recruited or obtained on loan, that "tangible encouragement" should be given to the training of such people, that the number of labour attaches should be increased, and that maximum use of those already at

work should be obtained by greater co-ordination between the Economic Council of Canada, the Departments of Trade and Commerce, Labour, Industry, and Finance, and the Dominion Bureau of Statistics and the provincial governments.

Canada Pension Plan

The Association repeated the suggestion made in its previous interview with the federal Cabinet that the Canada Pension Plan should provide for the protection of existing negotiated pension plans.

Industrial Fatalities in Canada, 1963

Fatalities from industrial accidents during 1963 numbered 1,147, early reports show. Revised total for 1962 was 1,135

Up to the end of March, the Department of Labour had received reports on a total of 1,147 industrial fatalities* that occurred in Canada during 1963. The revised total for 1962 was 1,135, or approximately 7 per cent higher than the preliminary total for that year reported in the previous annual review (L.G., May 1963, p. 371).

Of the 1,147 fatalities in 1963, 887 were reported by the provincial Workmen's Compensation Boards and the Board of Transport Commissioners. Information on the remaining 260 fatalities was obtained from other sources.

The preliminary fatality rate (number of fatalities per 10,000 workers employed) was 1.8 in 1963. Fatality rates for the past five years were:

Year	Fatalities	Workers employed (000)	Rate
1959	1,326	5,856	2.3
1960	1,134	5,955	1.9
1961	1,086	6,049	1.8
1962	1,135	6,217	1.8
1963	1,147	6,364	1.8

For 1963, preliminary fatality rates by industry were as follows (figures for 1962 in parentheses): agriculture 0.8 (0.9); logging 14.8 (17.2); fishing and trapping 13.1 (5.2); mining and quarrying 21.0 (18.6); manufacturing 1.2 (1.4); construction 4.9 (4.8); transportation, storage and communication 3.7 (3.7); public utilities 3.2 (5.6); trade 0.5 (0.6); finance 0.4 (0.8); service 0.7 (0.6).

Multi-Fatality Accidents

During 1963 there were 12 multi-fatality accidents that in each case brought death to three or more workmen. In total they resulted in fatal injuries to 52 persons.

* See Tables H-1 to H-4, pages 448 to 455.

Twenty of these were drowned in five accidents on seas or rivers. On February 20, three members of the crew of the *Janet Irene* died when the fishing vessel sank during a storm while en route from Shelburne to her home at Liverpool, N.S. Three fishermen were lost on March 12, some 20 miles southwest of Prince Rupert, B.C., after they abandoned their fishing vessel *Ingred H.* On April 9, four fishermen were drowned when the Louisburg, N.S., fishing vessel *Elizabeth and Leonard* disappeared during a storm in the Gulf of St. Lawrence. On December 8, four sailors went down with their ship, the *Fort Albany*, after a collision in thick fog with the Norwegian freighter *Procyon* five miles west of Sorel, Que. On December 20, six seamen aboard the 175-ton Newfoundland coastal freighter *Mary Pauline* were lost when the vessel sank between Nova Scotia and Newfoundland.

Eighteen persons were killed in four aircraft accidents. On February 25, four men of a CBC television crew that was photographing an elk herd, and the pilot, died in the wreckage of a light aircraft that crashed 18 miles west of Claresholm, Alta. On June 7, three men were killed when their aircraft crashed near Princeton, B.C. Four RCMP officers died on July 13 when a float-equipped aircraft crashed and burned on the outskirts of Carmack, Y.T. On November 29, seven crew members were killed in the TCA DC-8 crash northwest of Montreal, Que.

Eleven persons died in explosions in two different plants. On January 23, four workmen were killed when a coke oven exploded at the Algoma Steel Corporation plant, Sault Ste. Marie, Ont. On August 18, seven employees died when a boiler and furnace exploded at a pulp and paper mill in Woodfibre, B.C.

The fatalities covered in this review are those that involved persons gainfully employed and that occurred during the course of, or arose out of their employment, including deaths resulting from industrial diseases.

Statistics on industrial fatalities are compiled by the Economics and Research Branch from reports received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners and certain other official sources. Newspaper reports are used to supplement these. For industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible, therefore, that coverage in such industries as agriculture, fishing and trapping, and certain of the service groups, is not as complete as in industries covered by workmen's compensation legislation. Similarly, a small number of traffic accidents that are in fact industrial may be omitted from the Department's records because of lack of information in press reports.

The number of fatalities that occur during the year under review is usually greater than indicated in the annual article and tables. However, fatalities that were not reported in time for inclusion are recorded in supplementary lists and the statistics revised accordingly in the next annual review.

Finally, on April 6, three firemen were crushed to death, or died later of injuries received, when a burned-out building in Montreal collapsed on them.

Classification by Cause

Of the 1,147 fatalities in 1963, 263 were the result of being "struck by tools, machinery, moving vehicles and other objects." Within this group 55 fatalities were caused by falling trees or limbs. Landslides or cave-ins caused 41; materials falling from stockpiles and loads, 39; and automobiles and trucks, 18. Most of these accidents occurred in the logging or construction industries.

In the classification "collisions, derailments, wrecks, etc." 252 fatalities were recorded. Within this group 128 involved automobiles and trucks, 50 aircraft, 32 trains, and 27 tractors and loadmobiles.

There were 240 fatalities caused by "falls and slips"; of these 205 were the result of falls to different levels. Within this group 59 fatalities were caused by falls into rivers, lakes, sea or harbours, 33 by falls from buildings, roofs and towers, 23 by falls from scaffolds and stagings; and 17 by falls into shafts, pits, excavations etc. Most of these accidents occurred in the transportation, storage and communication, fishing and trapping or construction industries.

Among Canada's provinces, Ontario had the largest number of fatalities, 387. Of these, 87 occurred in manufacturing, 70 in construction, 51 in transportation, storage and communication, and 47 in mining and quarrying.

British Columbia followed with 229 fatalities, of which 50 occurred in logging, 37 in manufacturing, 34 each in mining and quarrying and in construction, and 30 in the service industry.

In Quebec 203 fatalities were recorded. These included 51 in construction, 44 in transportation, storage and communication, and 35 in manufacturing.

During 1963, the greatest number of fatalities occurred in the construction industry, in which there were 221 deaths. In manufacturing 200 fatalities were recorded, and transportation, storage and communication accounted for 168. Fatalities in mining and quarrying numbered 151 during the year, and in the service industry there were 123 fatalities.

Quarterly reviews of industrial fatalities were published in the July 1963 issue, p. 596; October 1963 issue, p. 884; January 1964 issue, p. 28; and April 1964 issue, p. 273.

Table H-5, on p. 456 of this issue, shows the number of industrial injuries, both fatal and non-fatal, reported by the Workmen's Compensation Boards of the ten provinces over the past five years.

The Ontario Industrial Accident Prevention Associations report a sharp increase in industrial injuries during 1963. The number of compensation cases reported to the Associations during 1963 was 32,388, compared with 26,104 for 1962. Most injuries resulted from equipment being handled by the worker, machines in operation, and falls on level working surfaces.

(a) Estimates of the labour force, the employed and the unemployed, are from *The Labour Force* a monthly publication of the Dominion Bureau of Statistics which also contains additional details of the characteristics of the labour force, together with definitions and explanatory notes.

(b) Centres of 5,000 population or more.

Manpower Situation, First Quarter, 1964

In the first quarter of 1964, the Canadian economy showed a further strong advance. As in the two preceding quarters, output and employment increased sharply, discounting seasonal variations. The factory work week, at 41.2 hours in February, was maintained at the high plateau reached last October.

One of the more striking features of the current business upturn is the breadth of the expansion. All of the major industrial divisions have contributed to the advances in output and employment, and in such key industries as manufacturing the gains have been widespread. Regionally, the job picture brightened most noticeably over the quarter in Ontario and Quebec. Smaller employment gains, seasonally adjusted, occurred in the other three regions.

The expansion, which got under way some 38 months ago, has already lasted longer than any of the business upturns since the Korean War. Equally important, there has been a noticeable pickup in the tempo in recent months. Since the cyclical trough three years ago, the index of industrial production has increased by 26 per cent; about one third of the advance has taken place since the middle of 1963.

Employment (seasonally adjusted) increased by 4.8 per cent since the middle of 1963. Over the past 38 months, the increase in employment amounted to 10.7 per cent.

Most of the indicators that tend to foreshadow coming events have shown continuing strength during recent months. This was especially true of new orders in manufacturing, which have been running well ahead of last year. Contract awards were higher, in value, in the first quarter of 1964 than in the same quarter of any previous year. In the business sector, construction contract awards were about one fourth higher, in value, than in the same quarter last year.

This year's capital investment program is expected to exert an important expansionary influence on the economy. The investment outlook, as compiled by the Dominion Bureau of Statistics and the Department of Trade and Commerce, indicates planned outlays amounting to \$10.1 billion. This level of spending—anticipated to be 8 per cent higher than last year—is the largest increase since 1957.

Despite the strong performance of the economy during the past year, and almost three years of continuous employment expansion, evidence of idle labour resources still persists. The seasonally adjusted unemployment rate in March was 4.6 per cent. Although this is a sharp decrease from the beginning of 1963, when the rate stood at 5.9 per cent, it is still considerably higher than in the early 1950's, when labour shortages became widespread.

The increase in employment during the opening quarter of this year amounted to 1.5 per cent. This was the third consecutive quarter in which an increase of this order was recorded.

The upward trend in employment has helped to boost the annual rate of labour income. Personal disposable income has increased substantially over the year, providing a solid backing for the rise in consumer expenditures. Retail sales in the January-February period were some 11 per cent higher than in the same two months of last year.

Employment

Employment in the first quarter of 1964 averaged 285,000 higher than in the corresponding period last year. This gain of 4.8 per cent represents a substantially faster rate of advance than in any recent year. Almost all of the increase was in non-farm industries.

The largest advance, in both relative and actual terms, was in manufacturing. Total manufacturing employment was up over the year by an estimated 100,000, a gain well above the advance for any previous year since World War II. The service and trade industries together accounted for an increase of some 150,000, approximately one half of the entire advance. In the remaining industries, employment levels were much the same as in the early part of 1963.

The employment expansion in manufacturing picked up considerable momentum during the past few months. More than two thirds of the over-the-year increase took place in the fall and winter months. During the first year of the upturn, manufacturing employment increased by some 70,000, and in the following 12 months, by some 35,000.

Judged by the two previous expansions, the record for the current one is very impressive. In the 1954-1957 capital spending boom, manufacturing employment advanced

The review is prepared by the Employment and Labour Market Division of the Economics and Research Branch.

by some 180,000, and in the short-lived 1958-1960 upswing, it increased by approximately 50,000. In the current (1961-64) expansion, the net gain has been in excess of 200,000, and almost all indicators point to continuing improvement in the months ahead.

Almost all parts of manufacturing have contributed to the recent advances in output and employment. Durable goods industries continued to show the most marked improvement. Above-average increases were recorded in wood products, iron and steel and transportation equipment. The motor vehicle and motor vehicle accessories industries experienced large staff increases during a period in which they usually show little change. Compared with a year ago, employment in the motor vehicle and parts industries was up by one fifth.

Although the automotive industry continued to be the pace-setter, other parts of transportation equipment have shared in the improvement. Above-average gains were reported in aircraft, railroad and rolling stock equipment, and shipbuilding and repairing. In non-durable goods industries, activity increased most noticeably in rubber, textiles and clothing.

After having contributed little to the employment expansion during much of last year, during recent months the construction industry has been very active for the season. Housing construction has shown a marked increase as a result of special government measures to stimulate the housing market. In the first quarter of 1964, housing starts were up over the same time last year by some 39 per cent. Activity in non-residential construction (allowing for seasonal movements) has been rising more slowly than had been expected. In each major category of non-residential construction, the value of contracts awarded has been running well above last year, but there has been little evidence as yet of any noticeable strengthening of construction employment in this sector.

Railway Workers Considering Co-operative Housing Project

Railway employees in Toronto are studying the feasibility of a large co-operative housing project. It would provide housing for Canadian National Railways employees who are to be dislocated by reorganization of CNR operations in Toronto and the opening of a multi-million dollar hump yard miles from the city and the workers' present housing.

Last month 20 delegates of locals of the Canadian Brotherhood of Railway, Transport and General Workers (CLC) attended a co-operative housing seminar in Toronto as a result of which, the possibility of a major project is to be given close study.

Speakers at the seminar included Dr. A. F. Laidlaw, national secretary of the Co-operative Union of Canada, and James MacDonald, secretary of the National Labour-Cooperative Committee.

Employment in the service-producing industries continued to increase during the early part of 1964, though at a considerably slower pace than in earlier months. As indicated above, the most noticeable strengthening during the quarter has been in manufacturing. The improvement in this industry has caused a strong advance in the number of employed men.

Reports from across the country indicate that shortages of particular skills are becoming more pronounced. Among the skills most frequently in short supply were machinists, machine operators, tool makers, fitters, welders, moulders and sheetmetal workers. There were also outstanding shortages in such occupations as auto mechanics and bodymen, maintenance mechanics, sewing machine operators, spinners and weavers, and loom fixers. Among the areas that reported outstanding job vacancies for a variety of skills were Toronto, Montreal, Oshawa, Peterborough, Kitchener, St. Thomas, London, Sherbrooke and Joliette.

Unemployment

Unemployment (seasonally adjusted) declined noticeably in the period under review. The unemployment rate, seasonally adjusted, has been falling steadily since last summer. In March it was 4.6 per cent, down sharply from last summer, when it was 5.9 per cent.

In the first quarter of 1964, unemployment averaged 82,000 lower than in the same quarter of 1963. Most of the decline was among men, and there were 54,000 fewer married men unemployed than a year earlier.

Unemployment rates were lower than in the first quarter of 1963 in all regions. The unemployed as a percentage of the labour force remained substantially lower in Ontario and the Prairie region than the Canadian average.

Regional Manpower Situation

ATLANTIC

In the Atlantic region, employment edged up slightly during the first quarter of this year, after discounting for seasonal factors. In March, employment in the region was estimated at 508,00, an increase of 17,000 from the year before. The relatively slow rate of advance during the quarter was a continuation of a trend that was in evidence during much of last year.

Manufacturing employment has shown signs of strengthening since the turn of the year, after remaining on a high plateau during the latter part of 1963. Increased activity was apparent in the shipbuilding and iron and steel products industries. Railway rolling stock, a persistent source of weakness during recent years, is the only manufacturing industry that has failed, so far, to share in the current business upturn. Indications point to some improvement in this industry, however, as the major railways have announced increased requirements of rolling stock equipment.

The Sydney Steel Works has been considerably busier than at the same time last year. Over the year, there was a substantial increase in export sales of billets and rails. Export business accounted for approximately one fourth of total sales in 1963.

Employment in coal mining continued to be well maintained; all major collieries were operating on a full-time basis. Activity in metal mining has declined during recent months as a result of curtailed production of iron ore at the Bell Island mines. Forestry employment showed a larger-than-seasonal increase during the quarter and was substantially higher than last year.

Construction employment (seasonally adjusted) has edged up slightly during recent months after remaining at a relatively low level during much of last year. The

winter house-building program was less effective in stimulating activity in this region than in other parts of the country. As a result, total construction employment in the region showed little improvement from last year.

Present indications point to a more-than-seasonal pick-up in construction activity this summer. The investment survey conducted at the beginning of the year indicates a rise of 7 per cent in new capital investment expenditures in the Atlantic provinces during 1964.

New Brunswick is expected to show the largest increase. Substantial additions are being made to the province's productive capacity, and total capital expenditures are expected to rise by 22 per cent over those in 1963. Figuring prominently in this year's capital investment program are such large projects as the continuation of construction on the New Rothesay Paper Corporation mill near Saint John and the development of the base metal complex in the Bathurst area.

In the service-producing industries, employment developments during the first quarter of 1964 were mainly seasonal. As in the previous quarter, there were small year-to-year gains in services and trade.

Unemployment in the Atlantic region during the first quarter of 1964 averaged 74,000, or 12.8 per cent of the labour force. In the first quarter of 1963, the unemployment rate was 15.0 per cent; in 1962 it was 15.9 per cent.

In March, the classification of the 21 labour market areas in the region (last year's figures in brackets) was as follows: in substantial surplus 19 (20); in moderate surplus 2 (1).

QUEBEC

In the Quebec region, the underlying employment trend continued to rise during the early part of 1964. The gain during the first quarter, after seasonal adjustment, amounted to 2.0 per cent, the sharpest rate of advance registered so far during the current business upturn. This was the third consecutive quarter in which the economy of the region showed a marked improvement.

Estimated employment in the first three months of 1964 averaged 1,733,000. This represents a gain of 102,000, or 6.2 per cent, over the first quarter of 1963. Virtually all of the advance has taken place since mid-summer.

Unemployment, seasonally adjusted, has shown a noticeable decrease during recent months, reaching the lowest level for the season in the past seven years.

Employment in manufacturing continued to increase from the high levels reached in 1963. Sharing in the improvement were pulp and paper, food and beverages, rubber and leather products and transportation equipment. In textiles and clothing, production and employment showed little change from the high levels recorded in the closing quarters of last year. The paper products industry has been experiencing a remarkably good year. In the first two months of 1964,

production of paperboard was up over the year by some 19 per cent. Over the same period, production of wood pulp and fine paper increased by 14 per cent and 13 per cent respectively.

Construction activities throughout the region were generally higher than a year ago. Residential construction was maintained at a very high level, a major stimulus being provided by the winter house-building incentive program. In the first two months of 1964, housing starts were 55 per cent higher than in the corresponding period last year.

Non-residential construction showed a somewhat larger-than-seasonal decrease during the winter but prospects for the year ahead are generally encouraging. Investment plans, as indicated at the beginning of the year, call for sharply increased outlays for utilities and social capital.

The service-producing industries continued to expand during the first quarter of 1964 and sizable gains were recorded by all major components. The transportation industry has been busier than at any time in recent years, and there has been no indication as yet of a slowdown in the months ahead. Bookings have been good and freight car loadings have been steady.

ONTARIO

The favourable economic environment that prevailed in the last half of 1963 continued into 1964. Seasonally adjusted, employment increased by 1.4 per cent during the first quarter of this year.

Since the current expansion began three years ago, total employment in the region has increased by 8.8 per cent. The largest gains occurred in manufacturing, service, forestry and trade. The only noticeable decline over the period was in mining, in which employment decreased by 15 per cent.

During the first quarter, the main strengthening was in manufacturing, construction, trade and finance. Some improvement was reported also in mining.

Better-than-seasonal employment gains were reported in most sectors of manufacturing during the first quarter of 1964 as the volume of retail sales, new construction and unfilled domestic and export orders combined to raise the demand for finished and semi-finished goods. Both durable and non-durable goods industries shared in the increase.

The construction, automotive, sheet metal and tube industries have been placing heavy orders with primary steel producers. As a result, steel delivery dates have been lengthening and the steel-consuming industries have been on virtual allocation.

Employment advances in trade have accompanied an upward trend in sales.

Employment developments in mining have been mainly seasonal. With the usual stockpiling taking place, some temporary layoffs occurred in the smaller mines. In base metals and gold mining, output and employment remained steady, with little labour turnover. The primary aluminum industry had a good year in 1963: production was 10 per cent higher than a year earlier and showed a further increase during the first quarter of 1964.

With newsprint and craft mills operating close to capacity and orders for furniture increasing, forestry operations have been very active. Even though the industry has become increasingly mechanized, forestry employment reached the highest level for the period in the past three years.

Unemployment in the first quarter of 1964 averaged 173,000, or 9.1 per cent of the labour force. In the first quarter of 1963, it was 10.7 per cent, the same as it averaged in 1962.

In March, the classification of the 24 labour market areas in Quebec (last year's figures in brackets) was as follows: in moderate surplus 7 (1); in substantial surplus 17 (23).

Exports remained strong and steel mills operated above rated capacity. The employment picture was particularly bright during the quarter in primary steel mills, foundries and sheet metal shops.

In the transportation equipment industry, employment in the first quarter of 1964 was some 17 per cent higher than the year before. The largest gains were in the automotive and automotive parts industries.

The trend in new car sales continued to rise, and measures that were introduced to encourage greater domestic production of automobiles and parts has resulted in an increase in exports.

There was also a substantial over-the-year increase in aircraft employment. Aircraft plants were busy on U.S. orders for the Caribou aircraft and on production engineering work in connection with the DC 9.

Sawmills, furniture and other woodworking plants operated at much higher levels than usual for the time of year. Pulp and paper mills were also expanding their operations. Employment in textile factories continued to rise during the quarter. An upward trend in this industry was due to increased production of synthetic textiles and to some replacement of imported products by domestic goods. The over-all domestic demand

for primary textiles continued to expand during the quarter.

In the construction industry, employment was higher in the first quarter of 1964 than in any comparable period in the past three years. Much of the improvement was associated with the incentive stimulus to house-building. In non-residential construction, the commercial sector appeared to be more active than a year ago, but the volume of engineering construction was down over the year. Little change appears to have taken place in the volume of industrial and institutional construction.

In the quarter under review, employment changes followed the customary seasonal patterns in both forestry and agriculture. In mining, the employment picture brightened during the quarter with the recall of several hundred nickel workers. Reflecting the continuing high level of business activity in the country as a whole, employment in the transportation industry declined less than seasonally during the quarter.

PRAIRIE

In the Prairie region, the basic employment trend remained firm during the first quarter of 1964, after showing a strong advance during the closing quarter of 1963. Construction, manufacturing, public utilities, trade and transportation remained very active for the season.

Since the current expansion got under way three years ago, total employment in the region has increased by 7.9 per cent. The March estimate of 1,063,000 was 22,000 higher than a year earlier.

Farm employment declined during the first quarter of 1964, but remained high for the time of year. There were shortages of experienced dairy hands and stockmen. Soil conditions appeared promising, March snowstorms providing adequate moisture for spring seeding. The acreage to be seeded was expected to be somewhat greater than in 1963.

Employment in the construction industry was at an all-time high for the winter months. Compared with a year ago, there were gains in residential, industrial and engineering construction. Pipelines, hydro dams and a chemical plant were among the major projects that were under way during the quarter.

An underlying current of expansion was apparent during the quarter in manufacturing though the improvement was less marked than in construction. In most sectors, seasonal layoffs either failed to take place or were on a reduced scale. The volume of winter activity was particularly high among fabricators of iron and steel and

The cyclical and secular rise of trade, finance and service employment continued during the first quarter of 1964. Wholesale and retail trade was still expanding, and banks and finance companies indicated a continuing demand for small loans for automobile purchases and home improvements. To meet the demand, additional branches of banks and credit institutions were opening up throughout Ontario. The employment expansion in services was widespread as increases took place in personal, business, community and government services.

Unemployment increased less than seasonally in the quarter: it averaged 113,000, or 4.6 per cent of the labour force, compared with 134,000, or 5.6 per cent of the labour force, a year earlier. In March, the classification of the 34 labour market areas in the region (last year's figures in brackets) was as follows: in balance 7 (2); in moderate surplus 23 (20); in substantial labour surplus 4 (12).

non-metallic mineral products. Activity was well maintained in the wood, paper, and food products industries. Among the skills reported to be in short supply were sheet-metal workers, machinists, welders, tannery workers and sewing machine operators.

In mining, the employment picture showed little change for the second consecutive quarter. Oil, natural gas and metallurgical coal and potash were being produced in greater volume than last year. Some shaft sinking and rebuilding programs were under way in potash mines during the quarter under review. Coal mines producing for the domestic market curtailed their operations in March.

With grain shipments to the West Coast continuing at a brisk pace, elevators and railroads were quite active during the quarter. Communication systems and public utilities operated with the largest work force on record for the time of year.

Reflecting the high levels of personal disposable income in the Prairies after the record wheat crop and sales of the last year, retail trade continued to rise. Retail sales in the January-February period were 15 per cent higher than a year earlier. Farm machinery, motor vehicles, building materials, furniture and appliances, clothing and jewellery registered substantial gains. After a period of relative stability, employment in trade establishments increased for the third consecutive quarter.

Unemployment in the Prairie region increased seasonally in the first quarter of

1964, when it averaged 56,000, or 5.0 per cent of the labour force, compared with 71,000, or 6.5 per cent of the labour force, a year earlier.

In March, the classification of the 19 labour market areas in the region (last year's figures in brackets) was as follows: in moderate surplus 12 (9); in substantial labour surplus 7 (10).

PACIFIC

The upward trend that was characteristic of employment in the Pacific region during 1963 gained momentum during the first quarter of 1964. Total employment (seasonally adjusted) increased by 2.0 per cent between the fourth quarter of 1963 and the first quarter of 1964. The increase in unemployment was about normal for the period.

Over the three-year expansionary period that began in the first quarter of 1961, total employment in the region increased by 15 per cent. This represents an increase of some 75,000 new jobs. In March, employment was estimated at 581,000, some 30,000 higher than a year earlier.

Manufacturing and construction continued to the most expansive segments of the economy of the region. Output in manufacturing in the first quarter of 1964 was noticeably higher than in the corresponding period in 1963. The wood products industry has been a major source of strength. Smaller gains occurred during recent months in the steel and paper products industries. Export demand for wood products strengthened

during the past year, giving rise to a substantial increase in output. Steel fabricating plants have maintained a high level of activity during recent months. In the steel and wood products industries alike, shortages of qualified workers were reported.

The high level of economic activity in the goods-producing industries has aided the service industries, particularly transportation. Employment in transportation, storage and communications increased by 4.7 per cent during the past year. Shipments for the current year from British Columbia ports were up over the same time in 1963 by some 26½ million bushels. The volume of general cargo moving in and out of the various ports was reported to be above average.

During the first quarter of 1964, unemployment in the region averaged 46,000, or 7.5 per cent of the labour force. In the first quarter of 1963, it averaged 54,000, or 9.0 per cent of the labour force. In March, the 11 labour market areas in the region (last year's figures in brackets) were classified as follows: in moderate surplus 3 (5); in substantial surplus 8 (6).

In 1962-63, a total of 6,858 Canadians were enrolled in undergraduate and postgraduate courses at universities and colleges in the United States, an increase of nearly 40 per cent since 1956-57. Enrolment in Canadian universities totalled 141,388.

These statistics come from a *Survey of Canadians Enrolled at American Universities and Colleges, 1962-63*, just published by the Economics and Research Branch of the Department of Labour as Professional Manpower Bulletin No. 4.

While the number of Canadian students at U.S. universities and colleges increased by 40 per cent in the seven-year period from 1956-57 to 1962-63, enrolment in Canadian universities expanded by 80 per cent. The increase in Canadian students in the United States was from 4,947 to 6,858; in Canada enrolment rose from 78,504 to 141,388.

Although their percentage is declining annually, a high proportion of Canadian students do their postgraduate work in the United States. In 1962-63, there were 2,519 Canadian postgraduate students at American universities; in Canada, there were 8,436 postgraduate students, including foreign citizens.

A majority of the Canadians who were studying in the United States reported that they were influenced to attend an American university by financial or scholastic reasons, e.g., larger and more readily obtainable scholarships and assistantships, a wider choice of specialized courses, and better facilities for advanced study.

Among undergraduates, the proportion of students in the United States was much smaller. There were 4,339 undergraduate Canadian students at American universities and colleges in 1962-63, and 132,952 in higher institutions in Canada.

The survey revealed that lack of qualifications for admission to a Canadian university was the principal reason for studying in the United States. Some students had moved to the United States permanently, others preferred to study in a college of their own faith and none was available in Canada, and in some cases there was no Canadian university close to their home.

A breakdown by course of registrations of Canadians at American universities shows: humanities, 1,515; social sciences, 1,086; natural sciences, 971; engineering, 831; business, 722; education, 713; health sciences, 568; and others, 452.

Employment and Unemployment, April

An estimated 6,360,000 persons were employed in April, an increase of 87,000 from March. The advance, following an unusually large increase between February and March, was somewhat below average for the month.

Unemployment declined by 53,000 to 403,000, which was a drop of 53,000 from March, and of 59,000 from April 1963.

The estimated labour force, at 6,763,000 in April, was 204,000 more than a year earlier. Employment was 263,000 higher and unemployment 59,000 lower than in April 1963.

Employment

The greater part of the month's employment gain was in outdoor activities. Almost one half of the increase was in agriculture.

In non-farm industries, total employment showed a somewhat smaller-than-seasonal improvement. The spring advance in construction employment was not as marked as in previous years because employment was already at a relatively high level as a result of government measures to maintain housebuilding activity during the winter.

Non-farm employment was up over April 1963 by 277,000, or 5.0 per cent. The largest year-to-year gains were in manufacturing, service and trade. In all other non-farm

industries, employment levels were either unchanged or slightly higher than in the previous year.

The employment expansion in services has been mainly in community and personal services.

Employment was considerably higher than a year ago in all regions except the Prairies, where it showed little change. The increases ranged from 4.3 per cent in Ontario to 6.2 per cent in British Columbia.

Unemployment

Unemployment, at 403,000, was 53,000 below March and 59,000 fewer than in April 1963. Of the 403,000 unemployed, 345,000 were men and 58,000 were women.

Of the unemployed, some 218,000, or about 55 per cent of the total, had been unemployed for three months or less. An estimated 123,000 had been seeking work for four to six months, and 62,000 for seven months or more.

Unemployment in April represented 6.0 per cent of the labour force, compared with 6.8 per cent in March, 7.0 per cent in April 1963 and 7.5 per cent in April 1962.

Seasonally adjusted, the April unemployment rate was 4.7 per cent; in March it was 4.6 per cent, and in April 1963 it was 5.5 per cent.

LABOUR MARKET CONDITIONS

Labour Market Areas	Labour Surplus				Approximate Balance		Labour Shortage	
	1		2		3		4	
	April 1964	April 1963	April 1964	April 1963	April 1964	April 1963	April 1964	April 1963
Metropolitan	4	6	8	6
Major Industrial	12	13	11	10	3	3
Major Agricultural	3	5	10	9	1
Minor	27	29	20	20	10	8
Total	46	53	49	45	14	11

U.S. Employment in April

Employment in the United States rose 1,360,000 from March to April, reaching 69,877,000, the U.S. Department of Labor reports. The rise was about 750,000 more than expected for the month, according to officials of the Bureau of Labor Statistics, and has been surpassed in only one month during the postwar period.

Unemployment, on a seasonally adjusted basis, stayed about the same, however. The gain in the number working failed to lower the unemployment rate from 5.4 per cent, where it has remained since February.

The number of unemployed in April was 3,921,000, a decline of 372,000. The drop was 72,000 less than expected.

The fact that the large gain in employment failed to reduce unemployment after allowance for seasonal factors would seem to lend weight to a view held by some economists. They feel that an improving job picture brings many thousands of additional workers into the labour force in search of work, thereby making it difficult to reduce unemployment.

CLASSIFICATION OF LABOUR MARKET AREAS—APRIL

	Substantial Labour Surplus	Moderate Labour Surplus	Approximate Balance	Labour Shortage
	Group 1	Group 2	Group 3	Group 4
METROPOLITAN AREAS (labour force 75,000 or more)	Quebec-Levis St. John's Vancouver-New Westminster Winnipeg	→ CALGARY → EDMONTON Halifax Hamilton Montreal Ottawa-Hull Toronto Windsor

International Seminar on Sheltered Employment

Sweden's co-operation in sponsorship of seminar in September this year is indicative of international interest and concern

The development of rehabilitation programs has revealed a need for sheltered employment facilities and has demonstrated the vital part that this type of service can play in the adjustment of disabled persons to the world of work and to a life of independence and self respect.

In Canada the National Advisory Council on the Rehabilitation of Disabled Persons has a special committee set up to consider this matter, and the Canadian Rehabilitation Council for the Disabled, which sponsored the Conference on Sheltered Employment held at Ste. Adele in 1962 (L.G. 1962, p. 1270), is continuing its efforts to encourage the provision of such facilities.

Indicative of international interest and concern is the Swedish Government's co-operation, through its Department of Labour, with the World Commission on Vocational Rehabilitation of the International Society for Rehabilitation of the Disabled in the convening of an "International Seminar on Sheltered Employment" in Stockholm, September 21-30.

This Seminar will be an extension and follow-up of the European Seminar on Sheltered Employment held in 1959 at the Hague, the Netherlands, and will again have the fullest co-operation of the ILO.

The Seminar will investigate all phases of sheltered employment and will provide an opportunity for the pooling of international knowledge and experience in this field to stimulate sheltered employment as a means of improving socio-economic conditions for the handicapped. Programs being carried out in all parts of the world will be reviewed and evaluated.

The four paragraphs of ILO Recommendation No. 99 headed "Sheltered Employment" will be discussed. These paragraphs read:

"32. (1) Measures should be taken by the competent authority or authorities, in co-operation, as appropriate, with private organizations, to organize and develop arrangements for training and employment under sheltered conditions for those disabled persons who cannot be made fit for ordinary competitive employment.

"(2) Such arrangements should include the establishment of sheltered workshops and special measures for those disabled persons who, for physical, psychological or

geographical reasons, cannot travel regularly to and from work.

"33. Sheltered workshops should provide, under effective medical and vocational supervision, not only useful and remunerative work, but opportunities for vocational adjustment and advancement with, whenever possible, transfer to open employment.

"34. Special programs for the homebound should be so organized and developed as to provide, under effective medical and vocational supervision, useful and remunerative work in their own homes.

"35. Where and to the extent to which statutory regulations of wages and conditions of employment applying to workers generally is in operation, it should apply to disabled persons employed under sheltered conditions."

50 Participants

The seminar will be by invitation, and it is anticipated that there will be approximately 50 participants. Participants will have a high level of experience and background in sheltered employment or related vocational rehabilitation work and should be in a position to influence future development of sheltered employment in their respective countries. A limited number of fellowships will be available, but they will not include transportation to and from Stockholm. An invitation committee will be responsible for final screening to select the participants.

Major subjects to be considered are: The Role of Sheltered Employment in Society; What is Sheltered Employment and What Are its Objectives; Who Needs Sheltered Employment; Sheltered Employment and Rehabilitation; Responsibilities for Sheltered Employment; Responsibilities of Public Authorities—Voluntary Organizations, Trade Unions, Employers Confederations, The General Public; Types of Sheltered Employment; Workshops, Open Air Projects, Cottage Industries, Projects for Non-Manual Workers; Employment for the Homebound; Business Operations and Marketing; Management and Staff in Sheltered Employment Projects; Selection of Workers and Conditions of Work; Wages and Remuneration; Selecting Procedures; Training; and Conditions of Work.

Results to Expiry Date of Older Worker Employment and Training Incentive Program

During period of program, November 1 to March 31, total of 1,811 workers over 45 years of age were hired, all of whom had been unemployed for six months or more, Minister reports

By March 31, 1964, expiry date for hiring under the program, 1,811 workers aged 45 or over had been hired under the Older Worker Employment and Training Incentive Program, it was announced last month.

It is likely that this figure will be increased by the addition of some workers who had been hired during the period November 1, 1963 to March 31, 1964, but whose employers had not yet taken steps to have them qualified under the program.

Under the provisions of this program, the Department of Labour pays 50 per cent of monthly wages or \$75.00 a month to employers hiring eligible workers, aged 45 or older, for new jobs in employment which is insurable under the Unemployment Insurance Act. Payments can be made for a total period up to 12 months.

In recent years a growing number of employers have been utilizing the services of older workers and recognizing their special qualities, such as mature judgment, knowledge gained from experience, stability, and lower absentee, turnover and accident rates.

The duration of unemployment for workers over 45 is usually much longer than for younger workers, however. In many cases their skill, or part of it, has become obsolescent, and they suffer prolonged unemployment because their age and lack of modern industrial experience make it difficult for them to re-enter the world of work.

The Older Worker Employment and Training Incentive Program was introduced, on an experimental basis, to assist long-term unemployed mature men and women to re-enter employment and to obtain the skills and work experience needed to remain in the labour market.

In announcing the latest figures, Hon. Allan J. MacEachen, Minister of Labour, pointed, out that all the mature workers who had obtained jobs under the program had been unemployed for six months or longer.

The experimental program had provided further evidence of the need for workers to make every effort to raise their skills and educational standards in order to meet the demands of today's jobs, the Minister said.

He stated that an evaluation of the program would be made and the information

obtained, he hoped, would be helpful in planning future action on behalf of older workers. This evaluation is expected to take several months.

In his announcement, Mr. MacEachen also revealed that employer interest in the program gained considerable momentum during February and March. A total of 2,347 applications from employers for workers had been approved by March 31.

In discussing the fact that there were more job vacancies under the program than workers actually hired, the Minister explained that the National Employment Service had been unable to locate suitable applicants to fill many of the vacancies. In some instances, this was because employers' specifications could not be met by the available applicants. In other cases the low wages offered had posed a problem, and in some areas it had been difficult to fill certain jobs because of inadequate transportation facilities. Another factor contributing to the imbalance between vacancies and workers was that applicants with a specific skill were frequently reluctant to consider employment outside of their usual occupation.

The National Employment Service reported that another major reason that jobs were not filled was that numerous employers sought approval for jobs because they had a specific applicant in mind. If their chosen applicant was unable to qualify under the terms of the program they were often not interested in hiring another worker.

A breakdown by provinces of the 1,811 workers hired under the program was as follows:

Newfoundland	1
Prince Edward Island	23
Nova Scotia	58
New Brunswick	42
Quebec	407
Ontario	493
Manitoba	99
Saskatchewan	99
Alberta	240
British Columbia	349
Total	1,811

Women Workers in a Changing World . . .

. . . is one of items for consideration by delegates to the 1964 International Labour Conference, who will examine ILO member countries' administrative arrangements for women with jobs

One of the items for consideration by the International Labour Conference in June deals with the present situation and trend in employment and conditions of work for women. Administrative arrangements by the governments of the various member countries will be examined; particular attention will be directed to the problems relating to the employment of women with family responsibilities.

The history of the International Labour Conference, since its first session in 1919, has been marked by concern for the problems of women workers. It has established standards to provide maternity protection, regulate night work, and prevent the employment of women in occupations where they would be subject to health hazards.

Now, new problems require attention. Technological change in the work world, on the one hand, and a greater participation in economic activity by women on the other have combined to present grounds for an intensive examination of the situation in regard to women workers. As a preparation for the Conference, the International Labour Office prepared a report* as a basis for discussion.

The basic assumption of the Report is that the status of women within a country is a sure sign of the measure of the country's development. Their status in terms of employment opportunities is determined by what they have to offer in training and ability. It is in the light of this thesis that the chief issues have been selected.

The vocational preparation of girls and women determines, to a great extent, the level and character of their employment. UNESCO data show, however, that in most countries girls have fewer educational opportunities than boys; girls do not go as far in their studies; and homemaking studies have a much higher priority than science studies. In countries where co-education exists, girls have a much better opportunity to acquire vocational and technical training otherwise available only to boys.

Training for adult women has become increasingly important but remains a somewhat knotty problem, especially in the case of married women. In many cases, their

initial training and experience occurred some years ago and has meanwhile been forgotten or has grown out of date. Now with grown families, these women could be an asset to the economic life of a country if proper training or retraining could be devised. More thought and imagination must be devoted to the planning of adult training programs.

Equality of opportunity and treatment for women has been receiving a major emphasis in the work of the ILO since the Second World War. A number of legal, administrative and educational measures have been adopted and much progress has been made.

Some countries have not yet adopted the equal pay principle; in others, the difficulty is how to measure work to determine if it is of equal value.

Conditions of work have been changing: through technological progress many kinds of work have been made easier physically but now have elements that may impose mental strain leading to nervous troubles.

The Report indicates the risk faced by women in agriculture in handling chemicals for which they have had no instruction or training.

Radiation exposure is a problem of modern times and is especially hazardous for women of child-bearing age. (Men also are exposed to many health hazards and eventually benefit by welfare provisions originally intended for women because, in time, the provisions are extended to them.)

Maternity protection schemes have become general only since the Second World War but today there are very few countries that do not have some such provision. Social security schemes and employer-financed schemes have been set up which usually guarantee employment security and a definite period of maternity leave.

Some highlights of the Report dealing specifically with working women who have family responsibilities will be presented in the next issue.

* * *

The Confederation of National Trade Unions has appointed Miss Gabrielle Hotte as Director of Education for the Western Quebec region. She will be the first woman union member on the headquarters staff.

COLLECTIVE BARGAINING REVIEW

Collective Bargaining, First Quarter, 1964

During the first quarter of 1964, collective bargaining in Canada went forward in a wide range of industries. Among the key sectors engaged in contract negotiations were the aluminum industry, meat packing, electrical products manufacturing, shipbuilding and repairs, and railway transportation.

In the course of negotiations during the first three months of the year, 28 major settlements covering more than 46,000 workers were concluded. Foremost among these settlements were new agreements applying to railway running trades.

During the quarter, five major settlements covering more than 20,000 railway workers were concluded by the CNR and the CPR. Two of the new agreements, superseding contracts that had expired at the end of December, were signed by the companies and the **Brotherhood of Railway Trainmen**. These contracts give wage increases totalling 5 per cent over a period of two years to such employees as conductors, baggagemen, brakemen, car retarder operators, yardmen and switch tenders.

The companies also signed new three-year agreements with the **Brotherhood of Locomotive Engineers** before the previous contracts expired in March and April. The new agreements give wage increases of 3½ per cent to road engineers and of 12 per cent to engineers in yard service.

Another settlement in the railway industry was negotiated by the CNR and the **Brotherhood of Firemen and Enginemen** before expiry of the previous agreement. Under the new contract, of three years duration, workers engaged in freight and yard service are to receive wage increases of 4 per cent; those in passenger and hosting services, a total wage increase of 6½ per cent.

Negotiations between seven railway companies* and the unions† representing close to 100,000 non-operating employees, which began in November, continued in the new year. The unions were requesting wage parity

with the durable goods industries but the companies rejected wages in these industries as a standard for setting wage rates.

Conciliation services were requested, and in March a conciliation board was appointed, composed of Hon. Mr. Justice F. Craig Monroe, chairman, A. G. Cooper, nominee of the companies, and David Lewis, nominee of the unions' negotiating committee. Mr. Justice Munroe, of the Supreme Court of British Columbia, was chairman of the conciliation board that brought the same parties to agreement in 1962.

During the quarter, contract negotiations were opened in the aluminum industry when the **Metal Trades' Federation (CNTU)** began bargaining with **Canadian British Aluminum** and the **Aluminum Company of Canada** in Quebec, and the **United Steelworkers** presented bargaining proposals to the Kingston Works of the Aluminum Company of Canada in Ontario.

In the meat packing industry, the **Packinghouse Workers** submitted their proposals for new contracts to **Burns and Company**, **Canada Packers**, **Swift Canadian**, **Legrade Incorporated**, and **Eastern Abattoirs**; approximately 15,000 workers in this industry will be affected by these negotiations.

In the electrical products sector, the **IUE** was conducting negotiations with **Automatic Electric**, various plants of **Canadian General Electric**, with **RCA Victor** and **Tamper Limited**. Negotiations were also in progress between the **UE** and **Canadian General Electric** and **Canadian Westinghouse**, and between the **IBEW** and **Philips Electronics**. About 11,700 workers were covered by the contracts being renegotiated.

A number of major contracts applying to nearly 8,000 employees were under negotiation in the shipbuilding industry in Nova Scotia, Quebec, Ontario and British Columbia. In Nova Scotia, the **Marine Workers' Federation** opened negotiations with **Dominion Steel and Coal** (Halifax Shipyards). In Quebec, bargaining for new contracts

* Canadian National Railways; Canadian Pacific Railway Company; Toronto, Hamilton and Buffalo Railway Company; Ontario Northland Railway; Algoma Central and Hudson Bay Railway; Midland Railway Company of Manitoba; and Cumberland Railway Company (Sydney and Louisburg Division).

† Brotherhood of Maintenance of Way Employees; Brotherhood of Railway and Steamship Clerks; Division No. 4, Railway Employees' Department, AFL-CIO; Canadian National Railway System Federation No. 11; Brotherhood of Railway Carmen; Brotherhood of Railroad Signalmen; Brotherhood of Sleeping Car Porters; the Commercial Telegraphers' Union; the Order of Railroad Telegraphers; Brotherhood of Firemen and Oilers; International Association of Machinists; Boilermakers; I.B.E.W.; Plumbers; Moulders; Sheet Metal Workers; and the Canadian Brotherhood of Railway, Transport and General Workers, which withdrew from the joint negotiating committee in November but returned in January.

This review is prepared by the Collective Bargaining Section, Labour-Management Division, of the Economics and Research Branch.

went forward between the **Metal Trades' Federation (CNTU)** and **Canadian Vickers, George T. Davie and Sons, Davie Shipbuilding, and Marine Industries**. At Canadian Vickers, negotiations were also in progress with the **Boilermakers, Machinists, Plumbers and Sheet Metal Workers**. In Ontario, the **Steelworkers and Collingwood Shipyards** opened negotiations in March.

In the shipbuilding industry in British Columbia, about 2,000 employees of **Yarrows Limited** and **Victoria Machinery Depot** in Victoria and **Burrard Dry Dock** in North Vancouver went on strike the first week in February. The workers at these plants are represented by a number of unions*, which, through one committee, had been bargaining for a new contract since August 1963.

Initially, the unions' proposals had included wage increases amounting to 40 cents an hour over two years and three

weeks vacation after five years of service. In December, members of the unions rejected the unanimous report of a conciliation board which recommended a three-year agreement that would provide for wage increases of 28 cents an hour for journeymen, 19 cents an hour for other classifications, three weeks vacation after 12 years of service instead of the current requirement of 15 years, and a company contribution of 2 cents an hour toward a welfare plan. In a government-supervised strike vote in January, the union members authorized strike action against the companies.

During the strike, a compromise recommended by the Deputy Minister of Labour of British Columbia was turned down by the unions and the companies. Another proposal subsequently made by the companies in March was rejected by the unions. At the end of March the dispute remained unresolved.

(CLC): 2-yr. agreement covering 500 empl.—wage increase of 5% to 5½%; night shift differential increased to 10¢ an hr. from 8¢ an hr.; 3 wks. vacation after 8 yrs. of service (formerly after 10 yrs.); 4 wks. vacation after 25 or more yrs. of service (formerly 4 wks. in 25th yr. and 30th yr.); rate for labourer \$73.91 a wk.; agreement to expire June 26, 1965.

WINNIPEG METRO (TRANSIT DEPT.), MAN.—STREET RAILWAY EMPL. (AFL-CIO/CLC): 27-mo. agreement covering 950 empl.—wage increases of 6¢ an hr. retroactive to Sept. 22, 1963, 6¢ an hr. eff. June 28, 1964 and 5¢ an hr. eff. March 21, 1965; new contributory group insurance plan to be adopted July 1, 1964; rate for janitor on March 21, 1965 to be \$1.79 an hr.; agreement to expire Dec. 25, 1965.

CCA Lauds Government Measures to Encourage Training, Winter Work

Government measures to solve two problems in the construction field, the need for skilled workers, and seasonal unemployment, were lauded last month by the President of the Canadian Construction Association, Donald H. Jupp, O.B.E., during a tour of Western Canada.

Speaking in Port Arthur, Mr. Jupp said, "Within the construction industry, the experience of the past decade or so in particular has proved that a combination of new techniques, incentives and publicity can do a great deal to increase the volume of winter operations."

Pointing out that the past winter had seen "the largest wintertime housebuilding program in Canada on record," Mr. Jupp said "the experience demonstrated dramatically the effectiveness of incentives in influencing decisions to go ahead with wintertime building operations."

At the same time Mr. Jupp urged that the incentives offered by the federal Government to public bodies to encourage winter work be extended to private buyers of construction services. "The offering of a \$500 bonus for winter-built houses was welcomed as a most important precedent in this field," he said.

To meet the need for skilled and experienced workers in the construction industry, Mr. Jupp called for the expansion to all construction trades of the series of National Trade Standards.

In an address in Dawson Creek, B.C., he said: "Governments at all levels have been active in promoting apprenticeship training in the construction trades. The industry is most appreciative of this fact and believes that the string of new technical schools built recently across the nation will help greatly in producing the skilled workmen that Canada needs and will continue to need as the country progresses and prospers."

But, he added, "The CCA has come to the conclusion that the effective promotion of apprenticeship training in the construction industry requires a system of compulsory tradesmen qualifications."

TEAMWORK in INDUSTRY

Unemployment problems in Collingwood, Ont., are "getting both barrels" these days. Management of Collingwood Shipyards and union representatives of the firm's 900 employees are jointly determined to eliminate the slack periods that put ship finishers on the lists of unemployed for as long as nine months out of every year.

Employees engaged in the steel trades can expect to work for 10 months on the basic construction of a new ship. But the "finishers"—the electricians, joiners, sheet metal workers, pipefitters and plumbers—who swarm on to a vessel after the launching to complete the work generally have it ready to sail in three months. When that period ends, they are forced to seek employment elsewhere, and their search may take them right out of the Collingwood area altogether. Every year the shipyards thus face the prospect of losing these employees—and the skill and experience that they bring to the job.

"Company and union alike have decided to end 'the feast or famine' situation that has afflicted us for so long," says personnel manager Gordon Braniff. The immediate goal of the shipyards' Labour-Management Production Committee is to help give the finishers a second trade—in layout, welding, burners, steel erecting and assembling, for example. This will enable them to swing over to other work in the slack period that follows the end of each ship-finishing job.

To achieve their goal, union and management personnel are striving for fuller use of the new million-dollar vocational wing of the Collingwood Collegiate Institute. They are also collaborating with the Ontario Department of Education to set up a Mayor's Committee whose membership will comprise representatives from industry, unions, the community welfare committee and the National Employment Service local office.

Shipyards management at the same time is exploring the possibilities of diversification—the introduction of new lines of products—and communication between company and

union is being maintained at a peak in order to keep personnel fully informed on progress and developments. John Bonwick, president of Steelworkers Local 6320, reports that union members of the shipyards' Labour-Management Production Committee are keeping the Local's membership fully briefed on all parleys between company and employee spokesmen.

* * *

"Happy Family" may sound like too rosy a title for a miscellaneous assortment of union and management people, but it happens to be the way members of a City of Edmonton labour-management committee refer to their organization. The Labour-Management Production Committee serves the city's electrical distribution system. Superintendent Cecil Monaghan recently confirmed the story.

"It happened a number of years ago," he explained. "One of our members dubbed the committee 'Happy Family'. The name caught on and is more familiar to our 80 employees than any other method of describing the committee."

Ask him how the "happy family" relationship was born, and Mr. Monaghan will tell you that it developed out of a regular association between employer and employee in the system's labour-management meetings. Speaking for management, Mr. Monaghan reports that the committee's eight meetings a year give management "almost its only opportunity to sit at the same meeting table with employees representing all segments of the operation."

Employees are members of Local B-1007, International Brotherhood of Electrical Workers (AFL-CIO/CLC) and Local 52, Civic Service Union (CLC). Local presidents are John Heck and Alec Josey, respectively.

* * *

Labour-management dinner meetings have "a very good impact on relations," asserts Reg Facey, retail sales manager of Union Milk Company Limited in Calgary, Alta.

Mr. Facey ought to know. The firm's Labour-Management Production Committee, of which he is a member, has just held its third annual "wind-up dinner." Wives (or husbands) of committee members were invited. Both company and union officials want to see the event continued.

Labour representatives serving on the LMPC are members of Teamsters' Local 987, whose chairman is Bob Perdue.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for three days during March. The Board issued six certificates designating bargaining agents, ordered one representation vote, rejected three applications for certification, granted one application for revocation of certification and granted one request for review under Section 61(2) of the Act. During the month the Board received nine applications for certification and one application for revocation of certification, and allowed the withdrawal of two applications for certification.

Applications for Certification Granted

1. National Syndicate of the Employees of Robin Hood Flour Mills Ltd. (CNTU), on behalf of a unit of employees of Robin Hood Flour Mills Limited, Montreal, (L.G., Apr., p. 286). The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees had intervened.

2. National Union of Operating Engineers of Canada, Local 14850, District 50, United Mine Workers of America, on behalf of a unit of firemen employed by Robin Hood Flour Mills Limited, Montreal (L.G., Apr., p. 286). The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees had intervened.

3. International Association of Machinists, on behalf of a unit of fueling and maintenance personnel employed by Consolidated Aviation Fueling of Toronto Limited, Malton, Ont. (L.G., Mar., p. 214).

4. National Association of Broadcast Employees and Technicians, on behalf of a unit of employees of Central Ontario Television Limited employed at CKCO-TV and CKKW, Kitchener, Ont. (L.G., Apr., p. 288).

5. General Truck Drivers Union, Local 938, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers and mechanics employed in Metropolitan Toronto by A & H Express Lines Ltd., Sarnia, Ont. (L.G., Apr., p. 288).

6. International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Baie Comeau Elevator and Dock Workers Local Union No. 977, on behalf of a unit of grain

handlers employed by Cargill Grain Company Limited, Baie Comeau, Que. (L.G., Apr., p. 288).

Representation Vote Ordered

General Truck Drivers and Helpers Union, Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Tourists Services Ltd., Whitehorse, Y.T., respondent (L.G., Mar., p. 214) (Returning Officer G. R. Currie).

Applications for Certification Rejected

1. National Syndicate of Air Transport Employees of Quebec (CNTU), applicant, Quebecair Inc., Rimouski, Que., respondent (traffic, maintenance and operations departments) and the International Association of Machinists, intervener. (L.G., Mar., p. 213). The application was rejected for the reason that it was not supported by a majority of employees affected in the representation vote conducted by the Board.

2. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, applicant, Robin Hood Flour Mills Limited, Montreal, Que., respondent, National Syndicate of the Employees of Robin Hood Flour Mills Ltd. (CNTU), intervener, and the National Union of Operating Engineers of Canada, Local 14850, District 50, United Mine Workers of America, intervener (L.G., Apr., p. 287). The application was rejected for the reason that it was not supported by a majority of employees affected in the representation vote conducted by the Board.

3. National Syndicate of Air Transport Employees of Quebec (CNTU), applicant, Quebecair Inc., Rimouski, Que., respondent (stewardesses and flight agents) and the International Association of Machinists, intervener (L.G., Mar., p. 213). The application was rejected for the reason that it was not supported by a majority of employees affected in the representation vote conducted by the Board.

Application for Revocation Granted

Albert G. Chayer, and Jos. Beaucage, applicants, Seafarers' International Union of North America, Canadian District, respondent, and National Harbours Board, Montreal, Que., respondent (L.G., Apr., p. 288).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

Request for Review Granted

The Board granted the request for review made by the National Association of Broadcast Employees and Technicians affecting employees in the Broadcasting Division of the Canadian Marconi Company, Montreal, and an amending certificate was issued (CFCF and CFCF-TV) (L.G., Apr., p. 288).

Applications for Certification Received

1. National Syndicate of Employees of Aluminium of Baie Comeau, on behalf of a unit of longshoremen employed by Canadian British Aluminium Company Limited, Baie Comeau, Que. (Investigating Officer: R. L. Fournier).

2. General Truck Drivers' Union, Local 879, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Cronkwright Transport Limited, Simcoe, Ont. (Investigating Officer: A. B. Whitfield).

3. International Association of Machinists on behalf of a unit of employees of Allied Building Service Limited, Montreal, employed at the Toronto International Airport (Investigating Officer: A. B. Whitfield).

4. International Brotherhood of Electrical Workers, Local 213, on behalf of a unit of employees of the National Harbours Board, Vancouver (Investigating Officer: D. S. Tysoe).

5. The Brotherhood of Locomotive Firemen and Enginemen, on behalf of a unit of locomotive engineers employed by the New York Central Railroad Company, as Lessee of the Michigan Central Railroad and Sub-lessee of the Canadian Southern Railway, St. Thomas, Ont. (Investigating Officer: A. B. Whitfield).

6. Teamsters, Chauffeurs, Warehousemen and Helpers, Local Union 91; General Truck Drivers Local 938; Transport Drivers, Warehousemen and Helpers Local 106; of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of

Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for controlling applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents; the writing of provisions—for incorporation into collective agreements—that fix a procedure for the final settlement of disputes concerning the meaning or violation of such agreements; and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported here under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of four officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the province of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario; five officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

America on behalf of a unit of drivers, dockmen, mechanics and maintenance men employed by Taggart Service Limited, Ottawa, Ont. (Investigating Officers: G. A. Lane and G. E. Plant).

7. International Union of Operating Engineers, Local 882, on behalf of a unit of employees of the National Harbours Board, Vancouver (Investigating Officer: D. S. Tysoe).

8. General Truck Drivers and Helpers Union, Local 31, and General Teamsters Union Local 181, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Van Kam Freightways Ltd., Vancouver (Investigating Officer: G. H. Purvis).

9. General Truck Drivers and Helpers Union, Local 31, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Reid's Moving and Storage Co. Ltd., Vancouver. (Investigating Officer: G. H. Purvis).

Application for Revocation Received

Board of Employees of John Kron & Son Limited, applicant, John Kron & Son

Limited, Winnipeg, Man., respondent, and General Drivers, Warehousemen and Helpers, Local 979, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, respondent. The application was for the revocation of the certification issued by the Board on November 8, 1957 to the respondent union in respect of a unit of drivers and loaders employed by the company at its Winnipeg Terminal (L.G. 1958, p. 65).

Applications for Certification Withdrawn

1. The National Syndicate of the Employees of the Trucking Industry Saguenay Lake St. John Inc., Tremblay Express Section, applicant, and Tremblay Express Limited, Jonquiere, Que., respondent (L.G., Apr., p. 288).

2. General Drivers, Warehousemen and Helpers Local Union No. 979 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, Empire Freightways (Midland Superior) Limited, Winnipeg, Man., respondent and Canadian Brotherhood of Railway, Transport and General Workers, intervener (L.G., Apr., p. 288).

Conciliation and Other Proceedings before the Minister of Labour

Conciliation Officers Appointed

During March, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Radio Saguenay Limitee (CKRS-CKRS-TV) and National Association of Broadcast Employees and Technicians (Conciliation Officer: C. E. Poirier).

2. North-American Elevators Limited, Sorel, and Syndicat Catholique et National des Debardeurs de Sorel Inc. (maintenance employees). (Conciliation Officer: C. E. Poirier).

3. Piette Transport Inc., Joliette, Que., and Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: C. E. Poirier).

4. Maple Leaf Broadcasting Company Limited (Radio Station CHML, Hamilton) and National Association of Broadcast Employees and Technicians (Conciliation Officer: T. B. McRae).

5. J. C. Malone and Company (1959) Limited and Three Rivers Shipping Company Limited, Three Rivers, Que., and

Local 1846 of the International Longshoremen's Association (Conciliation Officer: C. E. Poirier).

6. Canadian Pacific Railway Company (British Columbia Coast Steamship Service) and Seafarers' International Union of Canada (Conciliation Officer: G. R. Currie).

7. Canadian Arsenals Limited (Small Arms Division) Long Branch, Ont., and Canadian Guards Association (Conciliation Officer: T. B. McRae).

Settlements by Conciliation Officers

1. Central Mortgage and Housing Corporation and Region 76, District 50, United Mine Workers of America (Conciliation Officer: C. E. Poirier) (L.G., April, p. 289).

2. Cubana Airlines Limited, Montreal, and Canadian Air Line Dispatchers Association (Conciliation Officer: C. E. Poirier) (L.G., April, p. 289).

3. Hector Broadcasting Co. Ltd. (Radio Station CKEC), New Glasgow, N.S., and Cape Breton Projectionists Union, Local 848 of the International Alliance of

Theatrical Stage Employees and Moving Picture Machine Operators of the United States and Canada (Conciliation Officer: D. T. Cochrane) (L.G., March, p. 215).

4. B.C. Air Lines Limited (Maintenance Department), Vancouver, and Canadian Brotherhood of Railway, Transport and General Workers (Conciliation Officer: D. S. Tysoe) (L.G., March, p. 215).

5. National Harbours Board (Port Colborne Grain Elevator) and Local 1015 of the International Union of Mine, Mill and Smelter Workers (Conciliation Officer: T. B. McRae) (L.G., March, p. 215).

Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in February to deal with a dispute between the Negotiating Committee representing the Associated Non-Operating Unions, and the Canadian National Railways; Canadian Pacific Railway Company; Toronto, Hamilton and Buffalo Railway; Ontario Northland Railway; Algoma Central and Hudson Bay Railway Company; The Midland Railway Company of Manitoba, and The Cumberland Railway Company (Sydney and Louisburg Division) (L.G., April, p. 289) was

fully constituted in March with the appointment of Hon. Mr. Justice F. Craig Munroe of Vancouver as Chairman. Mr. Justice Munroe was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, A. G. Cooper, Q.C., of Halifax, and David Lewis, Q.C., of Toronto, who were previously appointed on the nomination of the companies and unions, respectively.

2. The Board of Conciliation and Investigation established in February to deal with a dispute between the Newfoundland Employers Association Limited, St. John's, Nfld., and The Longshoremen's Protective Union (L.G., April, p. 289) was fully constituted in March with the appointment of Prof. Parzival Copes of St. John's, Nfld., as Chairman. Prof. Copes was appointed by the Minister on the joint recommendation of the other two members of the Board, F. J. Elliott of Boston, Mass., and Lawrence Dobbin of St. John's, who were previously appointed on the nomination of the Association and Union, respectively.

Conciliation Board Report Received

Newfoundland Employers Association Limited, St. John's, Nfld., and The Longshoremen's Protective Union (see above).

Report of Board in Dispute between

Newfoundland Employers' Association Limited and Longshoremen's Protective Union

The Chairman of the Board was appointed on March 3, 1964. The Board met the same day to consider the matter placed before it and met again on March 5 to be sworn in and to discuss material received concerning the dispute.

During the period March 6-14, the Board met five times with representatives of the Employers and, separately, five times with representatives of the Employers, also, separately, five times with representatives of the Union. On the final day of this period, a meeting was held at which representatives of both parties were present.

The representatives of the Newfoundland Employers' Association (NEA) were:

R. M. Clancy, Managing Director, Blue Peter Steamships Ltd.

A. H. Crosbie, Manager of Terminal Operations, Furness Withy Co. Ltd.

James Hutcheson, General Manager, Clarke Steamship Co. Ltd.

H. J. Murphy, Terminals Manager, Clarke Steamship Co. Ltd.

D. C. Hunt, Counsel.

The representatives of the Longshoremen's Protective Union (LSPU) were:

Norman Donovan, Vice-President and Acting President

John Power, Financial Secretary

Wilfred Atkinson, Acting Recording Secretary

Peter Whitten, Business Agent.

During March, the Minister of Labour received the unanimous Report of the Board of Conciliation and Investigation established to deal with a dispute between the Newfoundland Employers' Association Limited, St. John's, Nfld., and The Longshoremen's Protective Union.

The Board was under the Chairmanship of Prof. Parzival Copes of St. John's. He was appointed by the Minister on the joint recommendation of the other two members, F. J. Elliott of Boston, Mass., and Lawrence Dobbin of St. John's, nominees of the Association and Union, respectively. The report is reproduced here.

At the initial meeting with the Union representatives, the LSPU objected to F. J. Elliott's membership on the Board, referring to Section 28(8) of the Industrial Relations and Disputes Investigation Act. The Union contended that Mr. Elliott had a pecuniary interest in the matters referred to the Board, insofar as he was President of the Elliott Stevedoring Co. Inc. of Boston, which carried on business with Blue Peter Steamships Ltd., while the latter company was a member of the Newfoundland Employers' Association.

The Chairman of the Board referred to Section 28(7) of the Act, pointing out that the Board must be presumed to have been duly established and ruling that the Board would proceed forthwith with the matters laid before it. The Union was given the assurance, however, that its protest would be communicated to the Department of Labour for any consideration deemed appropriate. Subsequently, it was established that W. J. Gillies of the St. John's office of the Department of Labour had already communicated the Union's objection to the Department's Director of Industrial Relations. Later communications by the Director to the parties concerned confirmed Mr. Elliott's eligibility to sit as member of the Board.

Conduct of Negotiations

The background to the dispute and the stage of negotiations reached at the time of the appointment of the Board are well described in the Report of the Conciliation Officer, H. R. Pettigrove, dated February 6, 1964. One note should perhaps be added. During meetings with Union representatives, the Board was given to understand that the Union Negotiating Committee, which agreed to recommend acceptance of the Employers' proposals submitted on January 30, did so without enthusiasm. It reported that the sentiment of the LSPU membership was overwhelmingly against acceptance of these proposals.

Both parties were evidently anxious to secure a long-term working agreement that would set a new pattern. Both appeared to be thinking in terms of an initial three-year duration for the new agreement. Many changes from the old agreement were proposed by each side, some of them of great importance in their potential effect.

Changes proposed by the NEA were designed to reduce the cost per ton of freight handled by more efficient use of manpower—confirming a reduced gang size, increasing the sling load, abolishing "restrictive practices," and introducing new equipment and methods (in particular, introducing a "side-port" vessel). Most important was the Employers' desire to see

a reduction of the longshore labour force to a smaller number of men that could be offered substantially full-time employment. In return, the Employers were prepared to offer some increase in wages (an increase of four cents per hour three times in successive years) and a doubling of their contribution (from 16 cents to 32 cents an hour) to the Union Welfare Fund, with all of the increase going towards pensions that would allow an accelerated retirement of longshoremen.

The concern of the LSPU was centered on maintaining as large a number of hours of work for its membership as possible. While conceding the inevitability of modernization and mechanization in the industry, the Union was desirous of slowing the pace of change so that the rate of reduction in the number of hours of work available would not outrun too rapidly the rate of decline (through attrition) in the labour force.

To assist in the process of reducing the labour force, the Union had closed its books to new members since 1954 (except for a few new members allowed to join in 1957).

The Union strenuously opposed the introduction of a side-port vessel, which would require far less labour to unload than a conventional vessel. The Union's desire to maintain many "restrictive practices" was evidently also a matter of resisting labour-saving changes in work methods, though it was partly a question of maintaining safeguards against possible discriminatory practices by work supervisors.

Another crucial concern of the Union was to spread the available work as evenly as possible among all Union members who wished to make longshoring their main vocation. To this end, the Union sought the introduction of a port-wide gang rotation system. As a measure of security, the Union wished to control the rotation system through a Union dispatch office.

From the outset, the Board concentrated on trying to bring the parties together on the three major areas of disagreement, viz.:

1. The introduction of side-port vessels (proposed by the Employers).
2. The insertion of "flexibility of operations" clauses in the working agreement that would substantially eliminate restrictive practices (proposed by the Employers).
3. The introduction of port-wide gang rotation (proposed by the Union).

In respect of the side-port vessel issue, both sides commenced with an inflexible attitude. One of the members of the NEA, viz., Clarke Steamship Co., was planning to introduce a side-port vessel on its

Montreal-St. John's service with the beginning of the shipping season in 1965. The vessel intended for the service is under construction. Another side-port vessel of the company that was initially intended for this service had been put on the Great Lakes instead, because of the LSPU's objection to its introduction. The company reported that it was now operating the Montreal-St. John's service at a loss (see Exhibit E-1, p. 5 of original report) and had to cut costs and increase freight volume to be able to maintain the service. To this end, it insisted that a side-port vessel had to be introduced in 1965. The side-port vessel would be supplemented by one, or possibly two, conventional vessels on the same service. There was a prospect also of an additional side-port vessel, but this would not be introduced before 1967.

The Union representatives reported to the Board that a membership meeting had declared the introduction of a side-port vessel unacceptable and that it could not negotiate the issue unless this decision were reversed. A meeting was called by the LSPU on March 11 to place the matter once more before the membership, but the decision remained unchanged. The deadlock was partially resolved the next day when the Employers offered to negotiate separate agreements for conventional vessels and side-port vessels. This would allow the immediate conclusion of an agreement to cover current operations on the waterfront, leaving further time to negotiate on the issue of the side-port vessel, which was not to be introduced until 1965 in any case.

The "flexibility of operations" and other clauses concerned with the restrictive practices that were proposed by the Employers, are shown in Exhibit E-2 and listed in Addendum "A" to that exhibit. The Board pressed the Union to indicate the maximum extent to which it would go in meeting the demands of the Employers in this respect if the Union obtained concessions on other issues. The Union's summary of the NEA proposals and its own counter concessions are shown in Exhibits U-4 and U-5 respectively. While a substantial gap remained between the positions of the two parties, the Board had hopes that it might be closed if agreement were reached on other major questions.

The issue on which negotiations finally foundered was that of gang rotation and the size and composition of the longshore labour force. The Employers wanted to limit the longshore labour force to those men who had earned \$1,250 or more at longshoring during 1963. According to their records, this

would involve 373 men out of a total of 842 who had some earnings at longshoring (Exhibit E-3). The Employers felt that men earning less than that amount could not be considered as regular longshoremen, though they might serve as stand-ins to replace absentees on regular gangs.

The Union countered that the low earnings of some longshoremen were a result of discrimination inherent in the current system of hiring gangs—the "shape-up" in which company-appointed foremen personally selected their gangs for each operation. The Union brought out a list of 524 members who had registered their desire to share in the longshore work available. The Union allowed that a few men absent through illness might still be added to this list. In comparing the list with company records, it was found that it included 54 foremen and checkers (who are not included in the gang work force proper), so that the Union list in effect proposed 470 men to be part of the longshore labour force as against 373 proposed by the Employers. (According to an NEA check, the Union list contained the names of 136 men earning less than \$1,250 in 1963 but omitted names of 30 men earning that amount or more.)

The Union was quite adamant in insisting that all its members who had registered for the purpose should be included in the longshore labour force. In fact, the Union was determined to go further in insisting that all these men should be given an approximately equal share of the available work. To this end, the Union proposed that the men be divided into gangs of fixed membership (the size of 21 men to a gang was agreed upon with the Employers) and that a port-wide rotation of these gangs should take place.

The Employers maintained that the Union-proposed system would lead to gross inefficiency. Sharing the work equally among such a large number of men, they believed, would mean that no man would have an adequate income, and that good men would not be prepared to remain longshoremen under these conditions. They also opposed port-wide rotation, though they agreed to a "parent gang" system, which would allow for rotation of gangs on individual premises or groups of premises. This would allow each major employer or group of employers to work with a labour force accustomed to the peculiarities of operations on their respective premises. The principal employers—Furness Withy and Clarke/CSL—agreed each to accommodate seven gangs of 21 men. The remaining gangs (employed principally by CNR and Harvey's) would be rotated in one group.

The Board wished to achieve a compromise on this question, suggesting that rotation might be maintained within three groups, rather than port-wide, but that the total number of gangs should be allocated in proportion to the amount of work offered by each group and that a periodic review should be made to re-allocate gangs to maintain balance. In respect of the total number of men (and therefore of gangs), the Board felt that the positions of the two parties in practice would be found to be much closer together than might at first appear to be the case.

Although the Union insisted that it could never agree to splitting its members between those who would be admitted to the gangs and those who would not, it did concede that among the 524 who registered (470 after subtracting foremen and checkers), there could be several who put down their names as a matter of "insurance," but who would probably not turn out for work regularly. The Union was agreeable to the proposition that men who were frequently absent (except through illness or for compassionate reasons) should be dropped from the regular gangs, but should be allowed to function as "floaters" to fill in for temporary absentees on the gangs.

The question of how many gangs could be made up was discussed at length. The Union mentioned a total of 18 gangs having been employed at a period of peak activity in the summer of 1963. The gang size then was 26, so that at the new gang size of 21, at least 22 gangs could be put together. This corresponded closely to the Union's figure of 470 men being available. The Employers resisted so large a number of gangs, and were considering a maximum to be 18 gangs (seven for Furness Withy, seven for Clark/CSL and four for the remaining operations). At 21 men to a gang, this would come close to the 373 men considered acceptable as longshoremen by the Employers.

The Employers complained that as it was, it sometimes happened that not enough men could be found readily available for the work at hand. The Union contended that this happened only with the smaller ships when larger ships were about to be discharged at the same time. Men would avoid being mustered for gangs that would have a short job unloading a small ship, for fear of losing out on a gang that would have a longer job unloading a large ship. A gang rotation system would eliminate this.

The Board felt that the question of the number of gangs would take care of itself

within a reasonably short period of time—allowing the Union's initial number of 22 gangs to be cut back to the Employers' number of 18 through retirement and other normal attrition. The bolstering of the Union pension fund that would result from the increased contributions offered by the Employers should allow for the retirement of 32 longshoremen who would be 65 or older within the coming year (Exhibit U-6). Weeding out of "non-reporters" from the gangs after they were in operation for a while, would undoubtedly reduce the numbers further.

The question of the pension fund was discussed at length. The parties both agreed that a major share of any increased payments made by the Employers should go to the pension fund rather than to wages. The Employers, in their offer of January 30, agreed to an extra 16 cents a man-hour to be devoted to pensions. They estimated that this would amount to a total of \$312,000 for a three-year period—or \$104,000 a year. According to data supplied by the Employers, however, the number of man-hours worked during 1963 (excluding salt and coal operations not coming under the working agreement being negotiated) was 541,886, which at 16 cents an hour, would amount to about \$86,700 a year.

The total amount of work available has been steadily declining in recent years (Exhibit E-5), and the Employers expect a considerable decrease in the number of hours worked with the introduction in 1964 of a 21-man gang (instead of a 26-man gang), and elimination of some restrictive practices. Therefore, it seems highly likely that the man-hour total will be markedly lower than in 1963, so that the total additional contributions of the pension fund would probably be in a range of \$60,000-\$75,000 a year. Even this amount, however, could allow for very worthwhile pensions for the presently active longshoremen who will be 65 or older in 1964.

Negotiations finally foundered on the question of gang rotation and composition. The Union insisted on port-wide rotation, while the companies were prepared to consider only rotation separately on three groups of premises. The Union also insisted that all its members who had registered for the purpose should be allocated to gangs, whereas the Employers were still not reconciled to going beyond 18 gangs.

In a last minute effort to secure at least a temporary agreement, the Board suggested a one-year contract with a minimum of change from the previous agreement. This would give time for a further effort, to

assess the effect of the introduction of side-port vessels and the possibilities of accelerated retirement in the light of the Canada Pension Plan and increased resources of the Union Pension Fund. Both sides responded to this suggestion.

The Union offered to sign a one-year agreement on the basis of current conditions, but with the use of a 26-man gang instead of the 21-man gang, the introduction of which had already been agreed upon earlier. Alternatively, they offered a one-year contract with a 21-man gang and port-wide rotation. The Employers offered a one-year contract with a five-cent-an-hour wage increase for a 21-man gang and introduction of management rights (flexibility of operation) clauses. Neither side responded to the offer of the other party. At this, the Board declared that it had exhausted the possibilities of negotiation and would process to draft a report for submission to the Minister of Labour.

Findings of the Board

In the Board's opinion, the difficulties in finding a satisfactory solution to the employment problems of the longshore labour force in St. John's can be traced to basic underlying weaknesses in the Newfoundland economy, exacerbated by the effects of public policy in respect of transportation. (Various aspects of the problem are discussed in P. Copes, *St. John's and Newfoundland*, Ch. VII, published in 1961 by the Newfoundland Board of Trade.)

The labour requirements for longshore work in St. John's have diminished considerably during the past decade, because of a decline in traffic and advances in mechanization and modernization. However, the transfer of longshoremen to other lines of work has been hampered by the lack of alternative skills of most of the men concerned, and the extraordinarily high levels of unemployment prevailing in Newfoundland. According to the Canadian *Labour Force Survey*, the average annual rate of unemployment in the province varied from 17.9 to 20.5 per cent during the years 1958-62, declining to 14.6 per cent in 1963. For many longshoremen alternative work opportunities for practical purposes are non-existent. While new entrants have been barred from the longshore labour force, the slow rate of attrition, in combination with the reduction in work offered, has meant a low and declining income for the longshoremen. The bulk of the men earn less than \$2,500 per year (Exhibit E-3).

Low earnings and lack of alternative work have given the longshoremen no incentive towards productive effort. On the

contrary, it is only by stretching the work and resisting the introduction of labour-saving techniques that the longshoreman—who is paid by the hour—can hope to keep up his income in the short run. Under these circumstances, the St. John's longshoreman is under great pressure to keep his productivity low.

The decline of port traffic in St. John's stems partly from a reorientation of Newfoundland's trade since Confederation, with more of the inflow coming from mainland Canada. A public policy of heavily subsidizing the CNR to route traffic across the Cabot Strait and by rail across the island has harmed St. John's, depriving it of its natural advantage as the port of entry for eastern Newfoundland, utilizing basically cheap tidewater transportation.

Low productivity and the decreasing volume of traffic have made St. John's a high-cost port (Exhibit E-1), which, in turn, has discouraged the use of the port for operators and further reduced traffic. Many shipping lines have dropped St. John's from their service during the past 15 years. There is a legitimate concern on the part of the remaining operators that a failure to reduce the relative costs of operation in St. John's will force further reductions in traffic.

The question of cost reduction in port operations is evidently most important in respect of the Montreal-St. John's shipping service, which must compete directly with the rail-water-rail service of the CNR. The Clarke Steamship Co. Ltd., operating the Montreal-St. John's service, however, does see an opportunity to expand traffic. New through-rate and division arrangements were worked out with the CNR in 1963, which could facilitate a greater volume of through traffic using direct water transportation from Montreal to St. John's. In conjunction with this, Clarke Steamship plans to introduce a side-port vessel that would allow highly mechanized cargo handling and thereby reduce costs.

This type of operation would require a much-reduced labour content in a ton of freight handled, and the immediate effect of the introduction of a side-port vessel would be a significant drop in the amount of work available to longshoremen. It is a matter of speculation to what extent this would be offset—or more than offset—in the long run by the increased volume of traffic generated. Clarke Steamship maintains that, in any case, the introduction of a side-port vessel will be necessary to allow the Montreal-St. John's service to operate with a profit.

For the Union, the prospects of further mechanization are discouraging. Its experience in recent years has been that the

reduction in work available has outrun the reduction in the labour force. In an effort to minimize the effect on longshoremen's incomes, the union is bound to attempt to slow the rate of displacement of labour by equipment. From the standpoint of the overall effect on the income of the community, the introduction of new capital investment, such as the side-port vessel, is open to question. This type of operation could reduce the amount of work available both to railwaymen and longshoremen. As the local economy does not offer alternative work opportunities, the introduction of advanced equipment could mean simply the substitution of outside capital for local labour, with a net decrease in local income and a further increase in local unemployment.

The Employers have made the point that a modernized and mechanized operation could offer a much-improved income to a limited number of men working full time. From the standpoint of efficiency and cost reduction, they consider it important that they should operate this way, and they believe that this type of operation should appeal to the more-skilled men who would remain in the longshore labour force. The Union made it clear, however, that its membership was adamant in demanding that the work should be shared among all men desiring to remain longshoremen. Union representatives maintained that votes among the membership had showed unanimity on this issue.

Not only did the Union demand that none of its members be dismissed from the longshore labour force, it also demanded an advance towards equalizing wages by means of the gang rotation system. There was evident resentment against the present "shape-up" system (where foremen pick their men for each job), with its opportunities for favouritism and other possible abuses. The Employers, on the other hand, feared that a levelling out of wages at a low average would be discouraging to the better men who are now drawing above-average pay.

In attempting to maintain maximum effective income for the longshore force as a whole, another consideration is the amount of unemployment insurance that can be collected. With even sharing of the work, a maximum of unemployment benefits could be obtained, as all men would earn enough credits to qualify and still be sufficiently short of full employment to draw full benefits. Men dismissed from longshore work or obtaining only occasional employment may not earn enough credits to qualify for unemployment insurance,

while fully employed men are not entitled to benefits. Reorganizing the longshore labour force into a fully employed and a (mostly) unemployed group would reduce the total income available to longshoremen.

The prospects of port operations in St. John's are greatly affected by certain aspects of public policy. Most notable in this respect is government subsidization of CNR services across the Cabot Strait and by rail across Newfoundland. This has syphoned off traffic that would naturally have flowed through the port of St. John's. This diversion will be strengthened by the new ferry that will be put on a service to Argentea, and by the new rail ferry for the North Sydney-Port aux Basques service. On the other hand, a government subsidy is assisting in the construction of a side-port vessel for the Clarke Steamship Co. Ltd. that is intended for the Montreal-St. John's service, while government funds have also been spent on the modernization of St. John's harbour that will further facilitate this service. It is not apparent that various government efforts to improve transportation services into Newfoundland have been co-ordinated. In the absence of a stated policy in respect of the incidence of government support to rival means of transportation, it is difficult to foresee what their relative prospects will be in the future.

There is no doubt that the long-run solution to the problems of operation in the port of St. John's requires a small but efficient and well-paid force of longshoremen using the most modern equipment and techniques. The process of adjustment is a painful one, however, and the legitimate claims of the men presently occupied in the industry involve concessions that retard the pace of modernization.

Anything that can be done to draw men out of the industry will help in the adjustment. Acceleration of pensioning is one means. At present, men with 25 years of membership in the LSPU (which means almost every member close to retirement age) can draw a pension of \$40 a month on retirement, which is optional after 65 and compulsory after 70. This arrangement does not induce many men to retire before 70, as they are not yet entitled to the Government's old-age pension of \$75 a month.

The proposed Canada Pension Plan could make a difference, as there is apparently an option planned that would allow men to start drawing a government pension at 65. If this materializes, a moderate pension from the LSPU pension fund should justify compulsory retirement of longshoremen at 65. Failing such arrangements under the proposed Canada Pension Plan, it may prove

possible to offer retiring longshoremen a pension at 65 that is \$75 higher than the pension the Union gives at 70. The extra \$75 could then be withdrawn at age 70 when the government old-age pension comes into effect. There appear to be 32 longshoremen ready for retirement at 65 within the coming year (Exhibit U-6). Unfortunately only another 42 will be ready for retirement within the succeeding four years.

Several longshoremen pursue more than one occupation and work on the waterfront on a casual basis only. Among the 470 men that the LSPU wishes to include in the gang system there are undoubtedly many men in this category. It seemed agreeable to Union representatives that such men would be struck from the roll if they failed to appear regularly when their gang was called out. In view of the large number of men of these 470 who did little work as longshoremen in 1963, it is likely that a significant number would not show up regularly, and could therefore be struck from the roll fairly soon after the introduction of a regular gang system. There is also the possibility of offering a severance bonus to men with some alternative occupational opportunity who would voluntarily withdraw their name from the regular gang rolls.

The NEA complained before the Board about the many restrictive practices (Exhibit E-6) and the generally low level of work output. Where the danger of a longshoreman "working himself out of a job" is so acute on the St. John's waterfront this is hardly surprising. What seems much needed is an incentive for men to raise their productivity. This suggestion did not receive a very eager response from either side. There are obvious difficulties in measuring productivity—the amount of freight handled per man-hour will naturally vary for different types of cargo and different kinds of operation. It should not be too difficult, however, to get a general measure of productivity for the port as a whole or for individual premises, based on total tonnages handled and total man-hours worked. On a collective basis, at least, advances in productivity could then be ascertained.

It might be profitable to employers to offer a wage bonus in proportion to gains in productivity. That is, with each 1-per-cent gain in tonnage handled per man-hour, a 1-per-cent increase in the hourly wage might be offered. The effect would be that the total take-home pay of men would be the same, while working time would be reduced by 1 per cent. The employers would have the same total wage bill for

longshore work, but they would gain from the faster turnaround of ships and greater economy in the use of equipment and plant. Regular posting of the results of productivity measurements might make the men productivity conscious and the payment of a few bonuses might awaken an incentive towards greater productivity.

Recommendations of the Board

The Board recommends that the parties conclude a working agreement modelled on that previously in operation, but incorporating all changes on which mutual agreement was reached before the conciliation officer, plus the following items:

1. The agreement initially should run for three years, viz., from January 1, 1964, until December 31, 1966, with provision for year-to-year extension in the usual manner.

2. The agreement should cover all relevant operations other than those pertaining to side-port vessels.

3. The agreement should provide for a system of rotation of regular gangs, each of 21 men. All LSPU members declaring their intention to become regular gang members should be given a place on a gang initially. Names should be struck off on retirement, voluntary withdrawal, and for repeated failure to report for work (except in case of illness or absence on compassionate grounds). The gangs should be arranged in three groups (Furness Withy, Clarke/CSL, and the remainder), and rotation should take place within each group. The number of hours worked by each gang should be posted, and the gang with the lowest number of hours in each group should have first call on the next assignment. The number of gangs in each of the various groups should be kept in proportion to the amount of work offered by the respective groups. The companies should operate dispatch offices for the gangs in their groups. The Union should operate a dispatch office for floaters available for casual work to stand in where gangs are under strength. A joint Consultation Committee of the NEA and LSPU should supervise the operation of the rotation system under agreed rules. The Committee should deal with the composition of gangs (allowing the employers to exercise their preferences for particular men), the periodic reduction of gangs with attrition of the labour force, the re-allocation of gangs among the three groups to equalize gang earnings, and other relevant matters.

4. The flexibility of operation and related clauses proposed by the NEA should be incorporated in the agreement, with some amendments to satisfy the strongest objections of the LSPU. The version suggested by the Board is attached as Appendix "A."

5. The wage raises offered by the Employers of three successive increases of 4 cents plus 16 cents per man-hour towards the pension fund, should be introduced and made retroactive to January 1, 1964.

The Board further recommends that an immediate enquiry be instituted by the Department of Labour to ascertain as far as possible the short-run and long-run implications for waterfront operations in St. John's of the introduction of side-port vessels. Consideration should be given to the following factors:

Increases in the volume of cargo handled by the port, possible reductions in freight charges, in the volume of longshore work offered, the extent of redundancy caused in the longshore labour force, the possibilities of compensating for redundancy through accelerated retirement or severance incentives, the changes in work methods involved and their effects on the operation of the gang system, and the implications of various government policies in the field of transportation in their effect on the prospects for an increased share of traffic from the mainland to be routed through the port of St. John's.

It is recommended that the results of the analysis of these factors be made available at the earliest possible date to the NEA and LSPU, so that the parties will soon be able to resume negotiations concerning the proposed introduction of side-port vessels in St. John's, with more adequate information at their disposal.

Member.

Appendix "A"

Clauses proposed for inclusion in the agreement under recommendation No. 4:

Item 19

(a) Men may be ordered to work for 8 a.m., 1 p.m., 6 p.m., and midnight.

(b) Men ordered for work or back to work at night shall be paid at the prevailing rate for the full period—except where weather or mechanical breakdown on shipboard or Employers' premises does not permit work to be carried on, or in the event of a ship finishing up, in which case each gang will be paid until its hatch is finished, but in no event shall

they receive less than two (2) hours pay at the prevailing rate. When men refuse to work because of weather conditions, the above minimums will not apply.

Item 23

The basic gang to be employed when loading and unloading vessels shall consist of 21 men, excluding foremen.

When employing such a gang for the handling of cargo from the hold of a vessel to the place of rest in the said shed and/or from the shed to the place of rest in the vessel, the sling load will be 2,000 pounds, 5% more or less, except in the case of a single piece or package. In the case of palletized cargo, strapped and carried as a unit load, there shall be no lift restrictions, except that imposed by the capacity of ships' gear, lift-trucks, or other mechanical equipment.

Item 26

A hatch may be started with a minimum of eighteen (18) men, provided that the Union dispatch office is immediately requested to send stand-ins. When men present themselves to complete the gang, they shall be paid from the time they are actually put to work.

Item 37

(a) The Employers will be the sole judge in determining when work on any vessel will begin. The Employers reserve the right to begin work on their vessels, stop work, and resume work as required. The Employers will decide the number of gangs they may require to be employed on any vessel at any time to handle the loading or discharge of cargo. The Employer may put gangs to work, transfer gangs from hatch to hatch or vessel to vessel, whether the work on hatch or vessel has been completed or not.

(b) The Employer reserves the right to decide how all men in the gang will be distributed to perform the work and to work vessels in any manner deemed necessary by the Employer, provided the number of hatches worked does not exceed the number of gangs employed on hatches.

(c) The Employer reserves the right to choose his shedmen, that is, checkers-sorters-lift-truck operators, from among the Union members, subject to their meeting the required qualifications.

(d) The Employer shall be the sole judge of how all men in the gang will be deployed and how all work will be performed in connection with the loading and unloading of vessels, railway cars and trucks; the receiving and delivery of cargo; and the handling of all freight on the terminals, including allocation of men to sort cargo, irrespective of their gang attachment or hold from which cargo is discharged.

Article 1—"and Customs" to be retained.

A record number of complaints was again lodged with the United States National Labor Relations Board in 1963, according to the Board's annual report. The large number of complaints was attributed to the effect of the 1959 Landrum-Griffin Act, and to national economic growth, geographic shifts in industry, and automation.

Of the 25,371 cases filed, 14,166 were complaints about unfair labour practices—an increase of 5 per cent over the number filed in 1962 and a record for one year.

Canadian Railway Board of Adjustment No. 1 Releases Decisions in Two Recent Cases

The Canadian Railway Board of Adjustment No. 1 last month released its decisions in two cases heard in March. These cases, both of which had been submitted to a referee, are the last two decided by the Board, which ceased to exist on February 29 (See page 371).

The first dispute was over the disciplining of a train crew in connection with delays to work trains, and the second involved a claim by the Telegraphers union that the work of transmitting certain reports by means of integrated data processing (IDP) equipment, which had been given to members of another union, should properly belong to its members.

In the first case, the contention of the employees was partly sustained; in the second, their grievance was dismissed.

The two cases, Nos. 822 and 823, are summarized below.

Case No. 822—*Dispute between Algoma Central and Hudson Bay Railway Company and Brotherhood of Railroad Trainmen over the company's conduct of an investigation into delays to work trains and the disciplining of a train crew as a result thereof.*

On two occasions there were delays to trains operated by the same crew. Three days after the second incident the company held an investigation, after which it assessed discipline to all members of the crew. The conductor was suspended for 30 days and demoted to brakeman for six months, the engineer was suspended for 30 days and demoted to engine helper for six months, and the other two, brakemen, were each suspended for two weeks.

The union protested against the disciplining of the crew, contending that according to an article of the agreement the accused were entitled to be given an opportunity to question the witnesses about their evidence, and that they had not been given this opportunity.

The company contended that the investigation had been properly conducted, and that it had shown that unwarranted delays had occurred, which fully justified the assessment of discipline against the crew members.

This case was submitted to a referee, whose award constituted the decision of the Board.

The referee rejected a plea by counsel for the company that, since the Canadian Railway Board of Adjustment No. 1 had

ceased to exist after February 29, 1964, he could not properly function as referee. "I am of opinion that a regular submission of a dispute to a referee who is regularly appointed invests him with jurisdiction to complete his assignment notwithstanding that the actual hearing and disposition take place after the machinery has been dismantled. The effect of the dismantling is prospective and does not affect what has regularly been done and authorized under a subsisting agreement" the referee contended.

The referee in his award said it was clear that the union was protesting the propriety and conduct of the investigation held by the railway into the alleged delays to the trains and was denying the validity of the discipline imposed and was also asking that the discipline be set aside and a proper investigation held.

"An examination of the transcript of the investigation does not disclose any irregularity in its conduct of which the Brotherhood can complain. The fact that the railway did not bring the accusers forward or did not disclose to the train crew any statements made adverse to them is not a matter for objection now, when the train crew made no request for such confrontation or disclosure at the time the investigation was held. They knew the purpose of the investigation and had the opportunity of representation by a fellow employee if they so desired," the referee said.

The referee went on to say that "the concern of the Board of Adjustment and of the referee is not so much with the scope of the investigation (so long as one is held before discipline is imposed . . .) as it is with the justness of the discipline."

He said that the union could not properly claim a right to a second investigation "merely because it was dissatisfied with the first one." The Brotherhood had not put before him any evidence sufficient to destroy any conclusions to be drawn from the investigation relating to the charges.

Of the three men involved in the appeal, the conductor, who had been suspended for 30 days and demoted to brakeman for six months, had been disciplined for "gross neglect of duty resulting in extensive and costly train delays," the referee pointed out; and, without going into the facts, he could not say that the charges made against the man were not justified.

The other two men, however, were in a different position, having been disciplined for "providing false and evasive answers at

investigation concerning train delays." This conclusion had nothing to do with the charges that were being investigated, and the discipline in this case was not warranted, the referee said.

The railway did not, and apparently could not reasonably find that [the two men] were implicated in the alleged train delays. The two brakemen may have been unsatisfactory witnesses from the railway's point of view, but surely it reaches the height of arbitrariness to punish them because their answers were evasive or even false. The character of their evidence at the investigation may have justified an adverse finding on the charges, but it could not itself become a matter for which discipline could be meted out.

The railway has established out of its own mouth that neither [of the men] was guilty of the alleged train delays, and to punish them because they did not condemn themselves when, apparently, there was no other evidence to condemn them, is a flagrant abuse of elementary principles of justice.

The referee declared that the discipline imposed upon the two brakemen was completely unjust, and he directed the railway to compensate them at proper rates of pay for their two weeks' loss of work.

Case No. 823—Dispute between Canadian Pacific Railway Company (Pacific Region) and Order of Railroad Telegraphers about the union's claim that its members had an exclusive right to perform the work of transmitting certain daily train and car report forms, which was being done at South Edmonton on integrated data processing equipment by clerks who were not members of the Telegraphers' union.

Before June 1, 1962, daily train and car report forms and operating report forms were prepared in skeleton form by the dispatcher on duty and completed by the operator on duty, who then transmitted them by telegraph to regional headquarters.

On June 1, however, two new forms were introduced at South Edmonton and during that month the reporting of train and car movements was done on both old and new forms. The new forms were designed for use on integrated data processing (IDP) machines.

On July 1, the use of the old forms was discontinued and thereafter the reports were transmitted exclusively on the new forms by the yard office clerical employees.

The Order of Railroad Telegraphers contended that the company had violated the agreement in assigning the work of transmitting the reports to employees outside the scope of the agreement, and asked that the company be required to restore the work at the South Edmonton office to the telegraphers.

The union cited this article in the agreement:

All employees assigned by proper authority to railway telegraph or telephone service of any character or duration, also station agents incorporated within the accompanying schedule of rules and wages, will be considered as telegraphers within the meaning of this schedule and are so called herein.

The union contended that the original of this rule, as it appeared in the 1902 agreement, "did not contemplate that employees other than telegraphers would be required or permitted to handle the railway's communication work, regardless of its character or duration." The phrase "railway telephone service" was added in the 1912 agreement after telephones had come into use and had gradually displaced the telegraph.

The union quoted also a clause in the agreement of February 1923: "Employees at any station other than where telegraphers or station agents are in charge will not be permitted, nor given facilities for doing the company's telegraph or telephone work."

The union argued that the telegraph referred to in the agreement did not mean only the Morse telegraph, but should be taken to include the various types of telegraph printing machines in use today, of which the IDP automatic or printing telegraph was one of the more recent developments.

The company, in its contention, argued that "work associated with teletype and integrated data processing procedures is not and never has been the exclusive right of any particular classification. Since the very inception of these systems, the company has installed machines where they can most satisfactorily and efficiently meet the requirements of the service. It has, of course, been the general practice to have the work related to this equipment performed by the employees located in the offices where the machines are installed . . ."

The company said that such machines were in use in 71 offices. In 20 of them they were operated by employees represented by the ORT, in 46 by employees represented by the Brotherhood of Railway and Steamship Clerks. In two offices the machines were operated by employees represented by both unions, and in three cases by non-union employees.

The principle involved in the assignment of this work, the company continued, had been challenged by the ORT before the Board in 1956. The Board had referred the case back to the parties for further negotiation and as a result, a joint study had been undertaken that had culminated in an agreement effective April 1, 1960. This agreement

was patterned after a similar agreement with the Brotherhood of Railway and Steamship Clerks effective July 1, 1957.

"Neither of these agreements makes any reference to where IDP equipment will be installed or by whom it will be operated," the company said. It contended that both unions, by signing these agreements, had accepted the principle that "neither had any claim as to where such equipment would be installed or by whom it would be operated; and, in fact, the right of the company to withdraw such equipment from any office at any time was . . . fully recognized."

The company contended that the reference to railway telegraph or telephone service in the article quoted by the union "does not, and never has, included teletype or IDP equipment which, of course, were unknown media when the rule in question was negotiated."

The obvious purpose of the inclusion of the word "railway" in the phrase "railway telegraph" was to make it clear that the rule in the agreement had reference only to telegraph circuits when used specifically for railway service, the company asserted. "The schedule rule in question, therefore, accorded railway telegraphers the exclusive right to the use of the telegraph circuits for railway operating purposes . . . but nothing more."

This case was submitted to a referee whose award constituted the decision of the Board.

In his award the referee described the work that was the subject of the dispute. Under the new system, he wrote, the train dispatcher prepares the IDP form just as he prepared the old ones, "but instead of going to an operator for completion and

subsequent transmission by Morse telegraph, the form goes to a machine clerk who prepares a tape and a page copy of the form on a flexowriter, then feeds the tape into a transmitter, and then presses a button on the transmitter to activate it so that it processes the tape by automatic action thereafter."

There is no doubt that the operation of the IDP equipment involves functions akin to those formerly performed by ORT men on the Morse telegraph, "but there is equally no doubt that it involves functions, added elements such as the production of the tape, which were not present before, and which the CPR alleges to be purely clerical.

"For the ORT, these added elements are subsidiary to the transmission, as in a sense they are; for the CPR, they are the dominant features of the total operation, because the transmission occurs by merely the press of a button and depends squarely on the insertion of the tape into the equipment for that purpose."

Were it not for the agreements of 1957 (with the Railway Clerks) and 1960 (with the Telegraphers), "I would be hard put to deny the cogency of the ORT arguments. But the agreements represent an acknowledgement of a fact, namely, that the CPR's assignment of work on the IDP equipment had been made . . . as operating convenience dictated in particular locations . . ."

"I cannot sensibly make a finding that will place the disputed work in ORT hands," the referee concluded.

"The parties, have, in effect, rested on an empirical approach, and I cannot find any collective agreement ground on which I can impeach the CPR's conduct in the present case. In the result, the grievance is dismissed"

An average increase of 3.1 per cent in straight-time hourly pay was provided by the main collective agreements negotiated in the United States in 1963, according to the United States Bureau of Labor Statistics. Of the 3,600,000 workers affected by these contracts, only 2,700,000 actually received increases; and for them the average increase was 3.4 per cent. The average for all employees, including those who received no increase, was 3.1 per cent. This compares with an average of 3.0 in 1962.

According to a survey conducted by the Bureau of National Affairs, the median wage increase in 1963 amounted to about 2.7 per cent, or 7.6 cents an hour compared with an increase of 7.4 cents in 1962. It was partly offset, however, by a rise in the cost of living of 1.5 per cent.

Again, as in other recent years, the gains were substantially greater in the non-manufacturing group of industries (10.1 cents) than in the manufacturing (7.0 cents). The construction industry led with a gain of 14.9 cents an hour. In the petroleum industry the gain was 13.0 cents, in shipping 11.0 cents, and in trucking 10.2 cents.

A larger proportion of the agreements than ever before, namely 53 per cent, provided for deferred wage increases. In 1961 and 1962 the percentage was 51, and in 1960 it was 47.

There were also substantial gains in fringe benefits in 1963.

Legal Decisions Affecting Labour

*British Columbia Supreme Court quashes certification order
Ontario High Court dismisses motion to quash certification*

In British Columbia, the Supreme Court held that, although the Labour Relations Board under various provisions of the Labour Relations Act is bound in certification proceedings to give to all interested parties an opportunity to present evidence and make representations, the Board is not obligated to grant an oral hearing. However, when the Board certified a union without giving the company an opportunity to know or answer the union's reply to the company's written submissions, the Board's conduct was a failure to act judicially and the certification order had to be quashed.

In Ontario, the High Court refused to quash a Labour Relations Board order on the ground that the Court has no power to review the Board's ruling on the ground of an alleged error on the part of the Board. The order certified the United Steelworkers of America as the bargaining agent of the employees of the International Nickel Company of Canada Ltd.

In addition, the Court upheld constitutional validity of Ss. 79(1) and 80 of the Ontario Labour Relations Act, which, respectively, confer on the Labour Relations Board exclusive jurisdiction to determine all questions of fact or law that arise in any matter before it and preclude judicial review of the Board's decision, except on the ground that the Board acted outside its jurisdiction.

British Columbia Supreme Court . . .

. . . quashes certification order because of Labour Board's failure to act judicially

On October 9, 1963, Mr. Justice Lord of the British Columbia Supreme Court, in *certiorari* proceedings, quashed an order of the Labour Relations Board on the ground that the Board failed to act judicially when in certification proceedings: the Board gave the company no opportunity to know or answer the union's reply to the company's written submissions.

The order certified Local 351 of the Miscellaneous Workers, Wholesale and Retail Delivery and Helpers Union as bargaining agent for the employees of Loomis

Armored Car Service Ltd. After the certification, the company applied to the Court by way of *certiorari* to quash the certification order.

The first ground upon which the company relied in its application was that the Board exceeded its jurisdiction by failing to give the company any, or, alternatively, adequate opportunity to give evidence on two questions: (a) whether the employees constituted a unit appropriate for certification; (b) whether "guards" are employees as defined by the British Columbia Labour Relations Act.

Under Section 62 of the Act, subsections (7) and (8) provide that the Board may receive and accept such evidence which, in its discretion, may be deemed fit and proper, and that it must give an opportunity to all interested parties to present evidence and make representations. Regulations made under the Act set out procedures for the sending of notice of application, the submitting of observations, the requesting and the granting of a hearing.

Solicitors for the company sent a letter to the Registrar of the Board requesting a hearing. They enclosed a written submission and detailed the nature of further evidence to be presented. The Registrar answered the letter and stated that the Board had considered the submissions and would consider any further evidence tendered by the Company. The letter made no mention of the request for a hearing.

The company's solicitors wrote another letter containing a written submission and renewed the request for the hearing and gave reasons for the request. The hearing was not granted and the union was subsequently certified by the Board.

Before Mr. Justice Lord, the company relied on the decision of Mr. Justice Wilson in *The Martin & Robertson Ltd. and Labour Relations Board (B.C.)* (L.G. 1954, p. 1155), where the company wrote the Board and requested a hearing in order to present certain evidence, and the Board ignored the request and certified the union. Mr. Justice Wilson ruled that the Board's refusal to entertain the evidence, without knowing

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

something about its relevance or admissibility, was a refusal of jurisdiction.

Mr. Justice Lord distinguished the *Martin & Robertson* case from the situation under review. In the *Martin & Robertson* case the Court dealt with a request to present evidence. In the case at bar, the company made a written submission in which they set out the type of employees involved and their duties, and which it invited the Board to consider before certifying the union. Although under various provisions of the Act and regulations the Board is bound to give to all interested parties an opportunity to present evidence and make representations, there is no obligation to grant an oral hearing.

In these circumstances, Mr. Justice Lord held that the Loomis Company had not been denied an opportunity to present evidence. It made two submissions, the latter a lengthy one that stated facts that the Board might very well have accepted as evidence. The Board exercised its discretion by not granting a hearing and that discretion should not be interfered with.

The second ground upon which the company challenged the certification order was that the Board acted contrary to the established principles of justice and therefore in abuse and in excess of its jurisdiction by: (i) failing to inform the company of the nature of the representations made by the union after the union had been informed of the nature of the company representations and had been supplied with a copy of the company's written submissions; (ii) inviting the company to make further representations without informing the company that the union had made representations to the Board and without disclosing to the company the nature of the representations.

Mr. Justice Lord stated that the evidence before him confirmed the company's contention. He held that such procedure violated the principles established in *Board of Education v. Rice* [1911] A.C. 179. The Board, in arriving at a certification decision, acts in a judicial capacity and the principles that govern the Board were outlined in the *Rice* case by Lord Loreburn when he stated that:

[a Board] must act in good faith and fairly listen to both sides, for that is a duty lying upon everyone who decides anything . . . They can obtain information in any way they think best, always giving a fair opportunity to those who are parties in the controversy for correcting or contradicting any relevant statement prejudicial to their view . . .

But if the Court is satisfied either that the Board have not acted judicially in the way I have described, or have not determined the question which they are required by the Act to determine, then there is a remedy by *mandamus* and *certiorari*.

Mr. Justice Lord stated that in the case at bar there was nothing resembling a debate. The union was allowed to see the submissions of the company and to reply to them. But that reply was not shown to the officials of the company, who knew nothing of its existence until the union was certified. The union representations were prejudicial to the company and the company had no opportunity of correcting or contradicting them.

Therefore, he ruled that the Board did not act judicially under the circumstances and he granted a *certiorari* to quash the certification order. *Re Labour Relations Act; Re Loomis Armored Car Service Ltd's Certiorari Application*, (1963), 45 WWR, Part 6, p. 349.

Ontario High Court . . .

. . . upholds certification order on ground that Court has no power to review decision

On November 1, 1963, Chief Justice McRuer of the Ontario High Court dismissed a motion to quash a certification order of the Ontario Labour Relations Board. The motion was made on behalf of the members of Local 598 of the Sudbury Mine, Mill and Smelter Workers' Union, by way of *certiorari*, for an order to quash the certification of the United Steelworkers of America as the bargaining agent of the employees of the International Nickel Company of Canada Limited, or, in the alternative, that the Ontario Labour Relations Board be directed to hold a proper hearing and reconsider its decision leading up to and including the order for certification.

In dismissing the motion, the Court held that, under the provisions of the Ontario Labour Relations Act, the Ontario Labour Relations Board is created for the purpose of an orderly regulation of labour relations and not for the purpose of keeping labour relations in a perpetual state of turmoil by multitudinous applications for the reconsideration of its decisions from time to time.

The Board certified the Steelworkers union as a bargaining agent on October 15, 1962. An application for reconsideration of this order was made on October 17, and this application was disposed of on the merits and on the basis of the submissions made to the Board.

In the opinion of Chief Justice McRuer, the provisions of Section 79(1)* of the Act do not contemplate an infinite number of applications for reconsideration of the decisions of the Board. The Act provides that, when the Board makes a decision, any of the parties may apply to have that decision reconsidered; however, the Chief Justice expressed doubts that the Legislature intended that when the Board has once reconsidered a decision it might be asked to reconsider the decision not to reconsider its decision and that this could go on *ad infinitum*. Once the Board has considered an application for reconsideration of a decision in an orderly way and refused the application, it ought not to be asked to reconsider its decision not to reconsider the substantive decision, except in the most unusual circumstances, and those circumstances did not exist in the case at bar.

Dealing with the jurisdiction of the Labour Relations Board in matters of law and fact as contained in Section 79(1) and the privative enactment of Section 80† precluding judicial review of the Board's orders, the Chief Justice held that the Labour Relations Act, as amended, confers on the Board exclusive jurisdiction to determine all questions of law and fact leading up to certification of a trade union and this jurisdiction covers the sufficiency and

reliability of the evidence of employee membership presented by the applicant union. So long as the Board has not acted arbitrarily but has operated within the jurisdiction conferred upon it according to the scheme and purposes of the Act, the Court is precluded by Ss. 79(1) and 80 from reviewing the Board's decisions on the ground of error on the part of the Board. Under the privative clause of Section 80, the review by the Court is open only to determine whether or not the Board acted within the limits of its jurisdiction.

Also, the Court dealt with the questions raised regarding the constitutionality of Ss. 79(1) and 80 of the Ontario Labour Relations Act. The union referred to the decision of the Ontario Court of Appeal in *R. v. Ontario Labour Relations Board, Ex p. Ontario Food Terminal Board* (L.G. 1963, p. 909), where the court held that the Board had no power to decide the questions of law, and where Mr. Justice Laidlaw said "that the Legislature could not give the Ontario Labour Relations Board exclusive jurisdiction to determine any question of law within the competence and jurisdiction only of a validly constituted court."

Chief Justice McRuer, relying on the judgments of the Supreme Court of Canada and the Judicial Committee, held that Ss. 79(1) and 80 are constitutional and do not offend S. 96 of the B.N.A. Act, and that it was not beyond the powers of the Legislature to clothe the Labour Relations Board with jurisdiction to make decisions of law incidental to its administrative duties. Obviously the Board must decide many incidental questions of law in the performance of its administrative functions.

Whether the Board may make decisions in law on matters collateral to its jurisdiction and be immune from judicial review is another matter, however. In other words, the Board cannot give itself jurisdiction by wrong decisions in law.

The motion to quash a certification order was dismissed. *Regina v. Ontario Labour Relations Board, Ex parte Taylor*, (1964), 41 DLR (2d), Parts 7 & 8, p. 456.

*Section 79(1) reads as follows:

79(1). The Board has exclusive jurisdiction to exercise the powers conferred upon it by or under this Act and to determine all questions of fact or law that arise in any matter before it, and the action or decision of the Board thereon is final and conclusive for all purposes, but nevertheless the Board may at any time, if it considers it advisable to do so, reconsider any decision, order, direction, declaration or ruling made by it and vary or revoke any such decision, order, direction, declaration or ruling.

†Section 80 of the Labour Relations Act reads: 80. No decision, order, direction, declaration or ruling of the Board shall be questioned or reviewed in any court, and no order shall be made or process entered, or proceedings taken in any court, whether by way of injunction, declaratory judgment, certiorari, mandamus, prohibition, quo warranto, or otherwise, to question, review, prohibit or restrain the Board or any of its proceedings.

The United States Supreme Court has ruled that a union's breach of its no-strike agreement does not relieve management of its duty to arbitrate. The unanimous decision was based on an earlier ruling that "there is no inflexible rule rigidly linking no-strike and arbitration clauses of every collective bargaining contract in every situation." The company involved took the position that by violating their contract's no-strike agreement, the union repudiated it.

Recent Regulations under Provincial Legislation

Ontario sets time limit for creditors' claims against public works contractors. Saskatchewan provides for recognition of tradesmen with certificates bearing the Interprovincial Seal

Ontario Public Works Creditors Payment Act

The first regulations to be issued under the Ontario Public Works Creditors Payment Act, 1962-63, were gazetted on March 4 as O. Reg. 45/64.

The Act, which is designed to ensure that persons who supply labour, materials or services to a contractor with a provincial government contract are paid in full, permits the Ontario Government to pay any creditors and deduct the amount paid from money due the contractor.

The regulations provide that, in the case of a contract for the Department of Public Works, a claim must be filed within 37 days after the last day on which the labour, materials or services were provided. In other cases, the time limit for filing claims remains 90 days as provided in the Act.

Saskatchewan Apprenticeship and Tradesmen's Qualification Act

A new regulation under the Saskatchewan Apprenticeship and Tradesmen's Qualifica-

tion Act (Sask. Reg. 109/64, gazetted February 28) extended recognition to persons from other provinces who have passed the Canadian Interprovincial Standards Examination.

It states that a person with a completion of apprenticeship certificate in a designated trade issued by another province which bears the Interprovincial Seal is entitled to be recognized under the Saskatchewan legislation as a journeyman in that trade.

At present, interprovincial standards examinations are being used in examining for seven trades—carpentry, motor vehicle repair (mechanical), electrical construction, plumbing, sheet metal, heavy duty repair and auto body repair.

This year interprovincial standards examinations are being conducted on a trial basis for four other trades—bricklaying, painting and decorating, radio and television repair and refrigeration and air conditioning. If these examinations prove valid, interprovincial seals (Red Seals) will be issued in 1965.

Monthly Report on Operation of the Unemployment Insurance Act

Number of claimants for unemployment insurance benefit at end of February was about 8,000 higher than total at end of January but 15 per cent lower than at end of February 1963

Claimants for unemployment insurance benefit numbered 607,100 on February 28. This total was about 8,000 higher than the January 31 total of 598,600 but 113,400, or about 15 per cent, lower than the total of 720,500 on February 28, 1963.

The general improvement in employment conditions compared with last year was reflected in lower totals of both regular and seasonal claimants of both sexes. The number of males was lower by 17 per cent and that of females by 19 per cent.

Seasonal benefit claimants made up between 25 and 30 per cent of the total on February 28, the same proportion as in February 1963.

Initial and Renewal Claims

Initial and renewal claims filed during February numbered 171,600, a reduction of 34 per cent compared with January and about 9 per cent compared with February 28 last year.

Beneficiaries and Benefit Payments

The average weekly number of beneficiaries in February was estimated to be 503,500, compared with 440,900 in January and 591,900 in February 1963.

Payments during the month totalled \$50,100,000, which was \$3,700,000 more than in January but nearly \$9,000,000 less than the February 1963 total of \$58,700,000.

The average weekly payment was \$24.89 in February, \$25.07 in January and \$24.81 in February 1963.

Insurance Registrations

On February 29, insurance books or contribution cards had been issued to 5,135,733

employees who had contributed to the Unemployment Insurance Fund at one time or another since April 1, 1963.

On the same date, registered employers numbered 338,120, an increase of 314 since January 31.

Enforcement Statistics

During February, 12,186 investigations were conducted by enforcement officers across Canada. Of these, 8,737 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 418 were miscellaneous investigations. The remaining 3,031 were investigations in connection with claimants suspected of making false statements to obtain benefits.

Prosecutions were begun in 239 cases, 113 against employers and 126 against claimants.* Punitive disqualifications as a result of false statements or misrepresentations by claimants numbered 1,521.*

Unemployment Insurance Fund

Revenue received by the Unemployment Insurance Fund in February totalled \$28,923,696.56, compared with \$30,782,410.60 in January and \$26,381,492.32 in February 1963.

Benefits paid in February totalled \$50,127,421.02, compared with \$46,411,645.40 in January and \$58,741,718.11 in February 1963.

The balance of the Fund on February 29 was \$21,691,479.99; on January 31 it was \$42,895,204.45 and on February 28, 1963 it was \$39,442,839.47.

* These do not necessarily relate to the investigations conducted during this period.

In a comparison of current unemployment insurance statistics with those for a previous period, consideration should be given to relevant factors other than numbers, such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation. Claimants should not be interpreted either as "total number of beneficiaries" or "total job applicants."

A claimant's unemployment register is placed in the "live file" at the local office as soon as the claim is made. As a result, the count of claimants at any given time inevitably includes some whose claims are in process.

Monthly Report on Placement Operations of the NES

Local offices of the National Employment Service reported 74,800 placements during March. This was the largest number of placements during that month in any postwar year except 1962 and was 14.0 per cent above the average for the month in the preceding five years. Compared with March 1963, placements increased by 10.0 per cent.

The demand for male workers continued to account for the rising number of placements. Men placed in employment in March numbered 50,200, an increase of almost 17.0 per cent over the number in March last year. Most regions participated in the increase, but the largest increase was made in Quebec, where there was a marked rise in activity on projects under the Municipal Winter Works Incentive Program.

The number of female placements was 24,600, a decrease of 1.6 per cent from March 1963. This, however, was the smallest percentage decrease reported thus far in 1964 and, once again, reflected a reduction in the number of women placed in casual employment.

Placements that required the movement of workers between local office areas amounted to about 2,700. This total was some 700 smaller than in March 1963 and represented only 3.7 per cent of all placements, compared with 5.1 per cent in the same month last year.

Cumulative placements for the first quarter of the current calendar year amounted to close to 215,000, or 4.4 per cent above the total for the same period in 1963. Regional distributions and percentage of change were as follows:

	March 1964*	3 Months Ended March 1964*
Atlantic	4,800 + 2.8	15,300 + 5.1
Quebec	23,300 + 23.6	68,900 + 11.2
Ontario	26,800 + 1.9	74,700 - 2.5
Prairie	12,500 + 9.3	36,000 + 5.8
Pacific	7,300 + 10.4	20,100 + 7.3
Canada	74,800 + 10.0	215,000 + 4.4

* Totals may contain minor variations due to rounding.

The National Employment Service was notified by employers during the month of some 101,400 vacancies. This was an increase of 13.3 per cent over March 1963, and brought the cumulative total of vacancies notified during the first three months of 1964 to about 285,500. This figure has not been exceeded in any first quarter since 1947.

As might be expected from the placement figures, the increase in vacancies notified was concentrated among positions for male workers. There was a total of 66,600 male vacancies, up 22.3 per cent from March last year, and 34,800 female vacancies, a decrease of 0.8 per cent from the corresponding period in 1963.

Decisions of the Umpire under the Unemployment Insurance Act

Decision CUB 2316, Feb. 26, 1964

Summary of the Main Facts: The claimant filed a renewal application for unemployment insurance benefit dated September 17, 1963. He had worked as a labourer for a construction company at a wage of \$1.50 an hour from September 6, 1963 to September 10, 1963, when he was laid off as the project was completed. Previous to this employment, he had worked as a carpenter for another construction company at a wage of \$2.25 an hour from March 1963 to August 17, 1963, when he was laid off because of lack of work.

On September 17 also, he applied to have his claim antedated to August 18 and said he had failed to make application for benefit at an earlier date because his employer had told him his insurance book was in

the employment office and was "held up because the plate was wrong."

"I didn't know I could file a claim without my insurance book. I have claimed benefits for three years, 1957, 1959, 1962. I was always given my book when I was laid off and I filed my claim immediately," the claimant said.

In a letter dated September 21, 1963, the claimant stated that he had contacted his former employer who maintained the reason his book was not given to him until September 17 was that it was "held up in your office due to the name plate being improperly stamped. . ."

The insurance officer did not allow the antedate of the claim because the claimant had not established good cause for delay in making his claim (Regulation 150 and section 46(3) of the Act).

The claimant appealed to a board of referees in a letter dated October 2, 1963. The letter reads:

Enclosed is my insurance book, plus my new claim. My previous claim, according to your information, expired September 21. Therefore, I appeal your decision in not paying my post-dated claim, on the grounds that my employer would not supply my book because of an error in your office of being improperly stamped. I have always been informed that in order to make a claim I must supply my insurance book. During this time I have been available for suitable employment in this area, of which at the present time there doesn't seem to be any.

However, I appeal my postdated claim in the event it is again denied

In a further letter on October 27, 1963, the claimant said he was unable to attend the appeal hearing on October 31 "for the main reason I haven't any money."

My reasons for asking for this appeal are as before stated: I was informed that you must present your insurance book when making a claim As I have stated, I was informed by my employer that the reason he did not produce my insurance book at the time I was laid off was due to an error in your department, namely that the book name plate had the improper number stamped on the plate

The unanimous decision of the board of referees, which heard the case on October 31, 1963, reads:

. . . The claimant did not appear nor was he represented

It appears that he failed to make application for benefit before 17 September 1963 because, as he says, of the misplacement of his insurance book which, his employer told him, was held up at the employment office, and the claimant adds that he did not know he could file a claim without the book In fact, a claim could have been made in the absence of the book, and the book supplied at a later date, and we are not satisfied that the claimant has discharged the onus on him showing good cause why he did not file his claim on the date to which he now asks this board to antedate his claim, namely, 18 August 1963.

The appeal is dismissed.

The claimant wrote again on December 7, 1963 and mentioned, among other things, the inconvenience and hardship he had been caused by the disallowance of the antedate of his claim. On December 7, 1963 also, the claimant applied to the chairman of the board of referees for leave to appeal to the Umpire on the following grounds:

My appeal concerns the period I was unemployed, namely August 17 to November 18, 1963 I was unemployed during the fore-mentioned period and have been denied unemployment benefit; the reasons given me for this decision are unfounded. [My employer] maintains the book was mislaid by the Commission and when finally [he] presented the book one month later, it was improperly stamped. I think it is your responsibility to see employers stamp the employees' books during the period of employment.

Leave to appeal to the Umpire was granted to the claimant for the following reasons:

There appears to be some doubt in this case as to the circumstances surrounding the appellant's failure to apply for benefits at the earlier date in respect of which his claim is made. I allow his appeal to the Umpire because in my view this amounts to a special circumstance.

In a statement of observations for consideration by the Umpire, the Chief of the Adjudication Division of the Unemployment Insurance Commission said:

1. The reasons alleged by the claimant to explain why he was not in possession of his insurance book are not a relevant factor in this case.

2. The relevant factor, which is the claimant's alleged reason for his delay in making a claim, is that he thought he could not make a claim without having his insurance book. The claimant's lack of knowledge on this point could have been rectified by enquiring at the local office. The previous jurisprudence has held that this is the course which should be followed by a claimant under these circumstances and that his lack of knowledge, his indifference in this respect and his failure to make proper enquiries do not constitute good cause for a delay in filing his claim (CUBs 283, 508).

Considerations and Conclusions: The essential facts of this case are not in dispute and, as stated in effect in the above statement of observations, the unanimous decision of the board of referees, which is based on those facts, is also in accordance with the jurisprudence established by the Umpire in similar cases.

In view of the foregoing, I decide to confirm the decision of the board of referees and to dismiss the claimant's appeal.

Decision CUB 2318, Feb. 26, 1964

Summary of the Main Facts: The claimant filed an initial application (postal) for unemployment insurance benefit, dated May 21, 1963. According to the application, she had worked as a payroll clerk in Toronto from September 16, 1940 to May 3, 1963, when she separated from this employment to be married. In the confirmation of separation (Form UIC 479) the employer stated, in regard to the claimant's severance from employment: "Married and moved to Manitoba."

On June 27, the local office of the Commission wrote to the claimant and requested the following information:

- (a) Name the type of work for which you are applying.
- (b) Name the locality where you prefer to work.

Also, on your application you have indicated you are available for temporary or part-time work. Would you advise for what period of

time you are available for work, and how long you would work if you were offered suitable full-time employment. Are you available for work on the basis of a full working week. If not, on what days are you available for work. Also, would you advise the reason you are only available for temporary or part-time employment . . .

In her reply, dated June 29, the claimant said the type of work for which she was applying was "payroll clerk or clerical duties." For the locality where she would prefer to work she named the village where she was living. "I would prefer temporary or part-time work as my husband is on shift work until October and it would be more convenient to work 3 or 4 hours per day, any days of the week or every day. If I were offered full-time employment in this locality I may be able to work for any length of time," she wrote.

The insurance officer disqualified the claimant and suspended benefit from June 30, on the ground that she had failed to prove she was available for work, as required by section 54(2)(a) of the Act, inasmuch as she was restricting her acceptance of employment to an area where employment opportunities were so remote that her availability for employment was too limited to meet the requirements of the Act. The insurance officer notified the claimant of the disqualification in a letter dated July 8, 1963.

The claimant appealed to a board of referees on the following grounds:

1. I am available for work at any location including [two villages] and the general area in this region.
2. I am prepared to accept any general clerical work although my previous employment was as a payroll clerk.
3. I am available for part-time or full-time employment if either is available.
4. I have not refused to accept work at any location although my first preference would be [her village].
5. I have been employed for 22½ years with [previous employer] of Toronto and Montreal and have made unemployment insurance contributions during this period. The fact that my married residence in some way restricts the availability of work in comparison to the Toronto area should not be a detriment because I am prepared to travel a reasonable distance if work is available . . .

The insurance officer commented that the November 1962 edition of the Canada Railway Guide shows the population of [the two villages] as 222 and 564 respectively. The insurance officer did not remove the disqualification, as he thought the claimant had had a reasonable period of time to explore the limited employment opportunities for her in the area where she now resides.

A board of referees heard the case in Winnipeg on August 14, 1963. The claimant was neither present nor represented at the hearing. The unanimous decision of the board, dated August 19, 1963, reads:

. . . The board has considered the well-established jurisprudence of the Umpire which holds that under normal circumstances a claimant moving from a larger centre to a smaller centre is entitled to a period of time equal to one week for each previous year of employment. Under the particular circumstances of this case, the board is of the opinion that allowing a claimant twenty-three weeks to explore the possibilities of obtaining employment in her new area would be unreasonable. However, the board is of the opinion that the claimant should have been allowed a total period of time equal to ten weeks from the date on which she applied for benefit.

Accordingly the board holds that the claimant has proved that she was available for work as required by the Act from 30 June 1963. Therefore, the indefinite disqualification from receipt of benefit commencing 30 June 1963 is rescinded.

As above stated, the appeal is therefore allowed.

As the board of referees stated that the claimant should have been allowed a period of 10 weeks from the date on which she applied for benefit to explore the possibilities of obtaining employment in her area before being disqualified, the insurance officer rescinded the indefinite disqualification but re-imposed it effective July 28, 1963, the termination of the 10-week period.

The claimant applied to the chairman of the board of referees for leave to appeal to the Umpire on the following grounds:

I feel that the decision of the board of referees was unreasonable in only allowing me 10 weeks to find employment from the time I made application for benefit. Regarding grounds justifying leave to appeal to the Umpire they are as follows: (1) I have not refused to accept any type of work in the general area of [villages named in first appeal] and (2) Considering the fact that I did contribute to the Unemployment Insurance Fund since its existence or roughly for a period of 23 years, I feel that I should be entitled to more benefit than I have received to date, which is only nine weeks' benefit (3) If the jurisprudence of the Umpire holds that normally a claimant moving from a larger centre to a smaller centre is entitled to a period of time equal to one week for each previous year of employment, then I strongly feel that the decision of the board of referees in my particular case has been unfairly decided upon.

Leave to appeal to the Umpire was granted for the following reasons:

In my opinion this is a matter which might more properly be resolved by the Umpire. The reasoning of the board was that 23 weeks for a town the size of . . . was unreasonable because of the size of that town. However, the established jurisprudence is there and perhaps a clarification should be obtained. Accordingly, in view of the above, I feel that leave to appeal should be granted.

The employment branch supervisor of the local office, in a memorandum to the insurance branch supervisor dated October 22, stated that employment opportunities for a payroll clerk in the two villages were very limited. The largest industry in the area is a turkey eviscerating plant employing 40 to 60 workers, and this work is seasonal. Twenty-seven miles northwest is situated a pulp and paper mill that employs 385 male and 5 female workers. Any other existing employment opportunities for this occupation are situated 35 miles away or farther.

"It would be difficult for this applicant to find employment in this area under the registered occupation of payroll clerk. This difficulty would be compounded by the oncoming winter season," the memorandum stated.

In a memorandum dated November 7 to the regional claims officer, the employment branch supervisor of the local office said there was no record of vacancies in this office regarding this occupation of recent date. There were two firms where potential vacancies for this occupation might occur, but the records show very little staff turnover among female workers, and "from this we conclude that employment possibilities in these areas for a general clerk are quite limited."

The insurance branch supervisor wrote to the claimant on November 13 and requested the following information:

1. In what specific areas are you prepared to work?
2. Give the distance of each town from your home.
3. What transportation arrangements have you made to allow you to commute daily?

The claimant's reply dated November 15, 1963, reads:

1. I am prepared to work in the area of [her village and two others].
2. The distances from my home are 29 miles and roughly 35 miles.
3. If suitable employment is available, I could arrange transportation.

In the "Submission to Board of Referees" (Form UIC 571A) dated December 19, the insurance officer commented:

In deciding the claimant's appeal on the 14 August 1963, the board stated that the claimant should have been allowed a period of 10 weeks from the date on which she filed her claim for benefits to explore the possibilities of obtaining employment in her area. The insurance officer considered that the board's decision contained the implication that the disqualification under section 54(2)(a) of the Act for failure to prove her availability should be re-imposed from 28 July 1963. However, the conclusion of the board did not expressly re-impose the disqualification and clarification of this point is required as the claimant is

contesting the disqualification as amended to commence 28 July 1963, and has appealed to the Umpire on this point.

In considering this case the board is also asked to consider the additional material submitted to the insurance officer after the date of the board's previous decision . . .

The case was reheard by a board of referees in Winnipeg on January 15, 1964. The claimant was neither present nor represented at the rehearing. The unanimous decision of the board reads:

The questions before the board are as follows:

1. Was the board's decision that the claimant should have been allowed a period of 10 weeks from the date on which she applied for benefit to explore the possibilities of obtaining employment in her area before being disqualified correctly interpreted by the insurance officer by re-imposing the indefinite disqualification from 28 July 1963, the termination of the 10-week period?

2. Does the information received subsequent to the board of referees' decision contain new facts? If so, what is their effect, if any, on the board's previous decision regarding the claimant's availability for work?

This matter had previously been before a board of referees composed of the same chairman but two different representatives. At that time the board held in essence that the claimant had only received six weeks in which to explore the possibilities of finding employment in the . . . area. The original board was of the opinion that a six-week period was not enough in view of the claimant's lengthy record of employment, that is, twenty-three years. However, it was also felt that the usual period of twenty-three weeks, that is, one week for each previous year of employment, would be unreasonable in view of the population of the area in which the claimant was now seeking work. Accordingly the first board held that the claimant should have been allowed a period of ten weeks. The board accordingly allowed the appeal but did not specifically advise that the disqualification was to be re-imposed after ten weeks had expired from the date of the claimant establishing a benefit period.

1. This board is of the opinion that the decision of the first board was correct, and that the interpretation of same by the insurance officer was also correct in that he re-imposed the indefinite disqualification as and from 28 July 1963, which was the termination of the ten-week period.

The board therefore holds, with respect to the first question, that the insurance officer's decision was correct.

2. The second question before the board is as stated in (2) above.

Since the date of the first board's decision, Exhibits 8, 9, 10 11 and 12 have been placed in the submission. The board has reviewed these exhibits, and it would appear that no new evidence has been presented.

There has been some more detailed evidence as to the employers in the area; and in Exhibit 12 the claimant has specified in slightly more detail the areas in which she would work However, the board notes that the same information was available to the first board in Exhibit 5

(Continued on page 422)

WAGE SCHEDULES

Wage Schedules Prepared and Contracts Awarded in March

Works of Construction, Remodelling, Repair or Demolition

During March the Department of Labour prepared 215 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition, and certain services. In the same period, a total of 154 contracts in these categories was awarded. Particulars of these contracts appear below.

In addition, 135 contracts not listed in this report and which contained the General Fair Wages Clause were awarded by Central Mortgage and Housing Corporation, Defence Construction (1951) Limited and the Departments of Defence Production, Northern Affairs and National Resources, Public Works and Transport.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practices;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in March for the manufacture of supplies and equipment were as follows:

<i>Department</i>	<i>No. of Contracts</i>	<i>Aggregate Amount</i>
Defence Production	133	\$455,458.00
Post Office	3	22,708.50
Public Works	1	9,225.00
Royal Canadian Mounted Police	4	2,586.84
Transport	8	50,045.10

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour showing the applicable wage deemed to be required in the execution of the work. These wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classification to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(b) The working hours shall be those fixed by the custom of the trade in the district, or if there be no such custom, then they shall be fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

Wage Claims Received and Payments Made in March

During March the sum of \$12,304.18 was collected from 23 contractors for wage arrears due their employees as a result of the failure of the contractors, or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contract. This amount is for distribution to the 131 workers concerned.

Contracts Containing Fair Wage Schedules Awarded in March

ATOMIC ENERGY OF CANADA LIMITED

Pinawa Man: Bird Construction Co Ltd, construction of hot cell facility bldg 300, Whiteshell NRE.

CENTRAL MORTGAGE AND HOUSING CORPORATION

Montreal Que: Alaska Painters Reg'd, redecoration of suites & public areas, Pavillon Mercier; Alaska Painters Reg'd, redecoration of suites, Villeray Terrace; Vallieres & Cusson Reg'd, redecoration of public areas, Place Gouin; Vallieres & Cusson Reg'd, redecoration of suites & public areas, St Georges Gardens; AlSCO Montreal Inc, supply & installation of metal storm windows, Villeray Terrace; AlSCO Montreal Inc, supply & installation of metal storm windows, Rosemount Apts; Sestock Construction Ltd, replacement of countertops & sinks, Benny Farm; Sestock Construction Ltd, replacement of countertops, sinks & kitchen & bathroom floor tiles, Villeray Terrace. *Ville St Laurent Que:* Duke Industries Inc, painting of suites & public areas, Park Royal Apts; AlSCO Montreal Inc, supply & installation of metal storm windows, Park Royal Apts. *Ville St Michel Que:* Theo Mosselaer, tiling bathroom walls of Pie IX Boulevard Apartment Project. *Ottawa Ont:* Vroom Construction Ltd, construction of 72 housing units, site works & landscaping (FP 3/63). *Port Arthur Ont:* Noren Construction Ltd, construction of 32 semi-detached units, site works & landscaping (FP 2/63).

In addition, this Corporation awarded six contracts containing the General Fair Wages Clause.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

James Bay Indian Agency Ont: A W Huffey, construction of underwater pipeline extension, Fort George C of E IRS. *Dauphin Indian Agency Man:* Inspiration Ltd, installation of water intake & pumphouse, Sandy Bay IRS. *Norway House Indian Agency Man:* F W Sawatzky Ltd, relocation of one-classroom school from The Pas to Cross Lake IR, Cross Lake IDS.

DEFENCE CONSTRUCTION (1951) LIMITED

Cornwallis N S: Fundy Construction Co Ltd, construction of additions to Bldgs Nos 34-8 & 34-13, HMCS *Cornwallis*. *Dartmouth N S:* Stuart Industries Ltd, repairs to doors of hangars & bldg, HMCS *Shearwater*. *Halifax NS:* Universal Electric, Division of Univex Electrical & Construction Engineering Ltd, installation of mechanical & electrical services, jetty No 1, HMC Dockyard. *Newport Corners N S:* Ruston & Hornsby Ltd, installation of diesel generator, RCNRS. *Camp Gagetown N B:* Roland E Delong, interior painting of barrack blocks. *Chatham N B:* Malach Roofing & Flooring Ltd, replacement of concrete floor in No 1 hangar, RCAF Station. *Bagotville Que:* J Euclide Perron Ltee, construction of classroom extensions to schools, RCAF Station; Planned Renovators Ltd, fire retardant painting, hangar No 6, RCAF Station; Lagendyk & Co Ltd, interior painting of bldgs, RCAF Station. *Longue Pointe Que:* Real Galarneau Inc, installation of electrical fire alarm system; Sestock Construction Ltd, alterations to Bldg No 7.

retardant painting of barrack blocks. RCAF Station. *Meaford Ont*: Graham & Graham Ltd, construction of sewage lagoon. *Cold Lake Alta*: Peterson & Cowan, Division of Montgomery Elevator Co Ltd, repairs to passenger elevator in hangar No 1, RCAF Station. *Edmonton Alta*: Alph's Decorating Ltd, interior painting of various bldgs, Griesbach Barracks. *Aldergrove B C*: Canada Iron Foundries Ltd, installation of water tank, HMCS *Aldergrove*. *Chilliwack B C*: Hume & Rumble Ltd, supply & installation of electrical grounding system, Camp. *Esquimalt B C*: Luney Bros & Hamilton Ltd, replacement of roof & trusses, P & R T Bldg.

In addition, Defence Construction (1951) Limited awarded one contract containing the General Fair Wages Clause.

DEPARTMENT OF DEFENCE PRODUCTION

Dartmouth N S: Harrison Bros, interior painting, Bldg No D10A, RCN Armament Depot. *Halifax N S*: Charles W Marriott, restoration of Naval Cemetery, HMCS *Stadacona*. *Shannon Park N S*: Banfield & Miles Ltd, interior painting in married quarters. *Shearwater N S*: Tasco Sheet Metal & Roofing Co Ltd, repairs to flashings, etc, hangars "A", "B", & "C", RCN Air Station. *Centralia Ont*: Redburd Paint Contractors, interior fire retardant coating, barrack block No. 9, RCAF Station. *Downsview Ont*: Alexander & Son Ltd, fire retardant painting of air cargo facility bldg No. 3, plant 1, RCAF Station. *Port Arthur Ont*: Turcotte Painting Ltd, interior painting, Armoury. *Edmonton Alta*: Parkins Construction Ltd, general repairs & renovations to washrooms, etc, Prince of Wales Armouries. *Esquimalt B C*: Victoria Pile Driving Co Ltd, repairs to various jetties, harbour. *Vancouver B C*: Vancouver Pile Driving & Contracting Co Ltd, repairing jetty, 2nd & Discovery Streets.

In addition, this Department awarded 51 contracts containing the General Fair Wages Clause.

DEPARTMENT OF NORTHERN AFFAIRS AND NATIONAL RESOURCES

This Department awarded one contract containing the General Fair Wages Clause.

PROJECTS ASSISTED BY FEDERAL LOAN OR GRANT

Essex Ont: Keystone Contractors Ltd, construction of trunk sewer, pumping station, etc. *Port Arthur Ont*: Matthews Construction Co Ltd, construction of sewer. *Vaughan Township Ont*: Cafagna Bros Construction Ltd, construction of trunk sewer & water service to sewage treatment plant (West Don Sewer Area—No 1); James P Morgan Ltd, construction of pumping station & sewage treatment plant (West Don Sewer Area—No 1). *Brandon Man*: Pearson Construction Co Ltd, construction of pump lift stations; Patrick Construction Co Ltd, construction of sewer & water systems.

DEPARTMENT OF PUBLIC WORKS

Brig Bay Nfld: James E Shears, construction of post office bldg. *Clarke's Beach Nfld*: Saunders, Howell & Co Ltd, construction of post office bldg. *Creston Nfld*: Davis Construction Ltd, construction of post office bldg. *Grey River Nfld*: Roberts Bros, wharf extension. *Hampden Nfld*: Benson Builders Ltd, construction of post office bldg. *Hickman's Harbour Nfld*: Estate of A R Vardy, construction of post office bldg. *Isle-aux-Morts Nfld*: Beauchamp Hardware Ltd, construction of post office bldg. *King's Point Nfld*: Benson Builders Ltd, construction of post office bldg. *Manuels Nfld*: Empire Plumbing Heating & Construction Ltd, construction of post office bldg. *Musgravetown Nfld*: H Drover & Co Ltd, construction of post office bldg.

St Vincents Nfld: Wm A Trask Ltd, construction of wharf. *Seldom-Come-By Nfld*: Kevin Power, construction of post office bldg. *Trepassey Nfld*: Max Benson, construction of post office bldg. *Upper Island Cove Nfld*: Empire Plumbing Heating & Construction Ltd, construction of post office bldg. *Albany P E I*: Donald A MacPherson Construction, construction of post office bldg. *Souris P E I*: Maritime Dredging Ltd, harbour improvements. *Arichat N S*: Gerald J Forgeron, wharf repairs. *Aspen N S*: Fisher & Miller Construction, construction of post office bldg. *Belliveau's Cove N S*: Albert J LeBlanc, construction of post office bldg. *Blue Rocks (Sandy Cove) N S*: Mosher & Rawding Ltd, breakwater repairs. *Freeport N S*: E K Potter Ltd, construction of post office bldg.

Halifax N S: Mucon Cleaning Services Ltd, cleaning interior, Queen's Printer Bldg. *Havre Boucher N S*: Fisher & Miller Construction, construction of post office bldg. *Margaree Valley N S*: Gaudet & Chaisson, construction of post office bldg. *Merigomish N S*: Fraser, Mason & Fraser, construction of post office bldg. *Parrsboro N S*: R A Douglas

Ltd, breakwater repairs. *Port Maitland N S*: Jacob LeBlanc, construction of post office bldg. *Saulnierville N S*: T C Gorman (Nova Scotia) Ltd, harbour improvements. *Smith's Cove N S*: B A Alcorn, construction of post office bldg. *Grand Harbour N B*: McDowell & Cook, construction of post office bldg. *Juniper N B*: Clumac Construction Ltd, construction of post office bldg. *Riviere Verte N B*: Conturier Construction Ltd, construction of post office bldg.

Ste Anne de Madawaska N B: Ouellon Construction Ltd, construction of post office bldg. *St Antoine de Kent N B*: John Cormier & Son, construction of post office bldg. *St Jacques N B*: Conturier Construction Ltd, construction of post office bldg. *Seal Cove N B*: McDowell & Cook, construction of post office bldg. *Welshpool N B*: Cardinal Construction Ltd, construction of post office bldg. *Wilson's Beach N B*: Cardinal Construction Ltd, construction of post office bldg. *Youngs Cove Road N B*: Fowler Bros Building Contractors Ltd, construction of post office bldg. *Anse-au-Portage Que*: Georges Cauchon, modification to hoisting apparatus. *Baie Comeau Que*: Manik Construction Co Ltd, wharf improvement (ferry facilities). *Cadillac Que*: Guertin & Fils Ltee, construction of post office bldg.

Canton Tessier Que: Damase Gauthier, construction of post office bldg. *Chibougamau Que*: E R Ross Inc, addition & alterations to post office. *Guigues Que*: Napoleon Marseille, construction of post office bldg. *Grosses Roches Que*: Gerard Gauthier & Roger Gagne, construction of post office bldg. *Lac Coulonge (Davidson) Que*: Von Utilities Co, wharf construction. *Lac Mercier Que*: J M Cote, construction of wharf. *Montreal Que*: Nation-Wide Interior Maintenance Co Ltd, cleaning interior, Customs Examining Warehouse; Nation-Wide Interior Maintenance Co Ltd, cleaning windows of federal bldgs; Elite Entretien Enrg, cleaning interior, Post Station; Allied Building Services (1962) Ltd, cleaning interior, etc, Converters Bldg, 470 Legachetiere Street West.

Mont St Gregoire Que: Omer Brault, construction of post office bldg. *Nouvelle Ouest Que*: A A Geraghty & Sons, construction of post office bldg. *Pointe au Pere Que*: McMullen & Gagnon Inc, harbour improvements for ferry terminal. *Quebec Que*: Entretiens Industriels & Sanitaires "Orleans" Enr, cleaning interior, Pollack Bldg. *Riviere-au-Dore Que*: Louis Dallaire & Fils Ltee, construction of post office bldg. *Ste Angele de Merici Que*: C Maurice Ross, construction of post office bldg. *Ste Anne du Lac Que*: La Cie de Construction "La Lievre Inc", construction of post office bldg. *St Fulgence Que*: Simon Gravel, construction of post office bldg. *St Leon de Chicoutimi Que*: Louis Dallaire & Fils Ltee, construction of post office bldg.

St Noel Que: Henri Dube, construction of post office bldg. *South Durham Que*: Jean Courchesne, construction of post office bldg. *Val Barette Que*: La Cie de Construction "La Lievre Inc", construction of post office bldg. *Apple Hill Ont*: J A Sauve Construction Ltd, construction of post office bldg. *Field Ont*: Boulanger & Tremblay Construction & Supply Ltd, construction of post office bldg. *Comber Ont*: Truax Bros, Ltd, construction of post office bldg. *Grand Bend Ont*: Eagleson Construction Co, construction of post office bldg. *Lancaster Ont*: Charles Nadeau, construction of post office bldg. *Martintown Ont*: J A Sauve Construction Ltd, construction of post office bldg.

Ottawa Ont: J R Statham Construction Ltd, general alterations to 2nd, 1st & basement floors, No 2 Temporary Bldg; Three-Star Cleaners, cleaning interior, Postal Station "E", (Glebe); Bedard Girard Ltd, improvements to wiring for outdoor lighting, Parliament Hill; Pillar Construction Ltd, alterations to Sir A Campbell Bldg, Confederation Heights. *Toronto Ont*: Taymac Building Services Ltd, cleaning interior, Mackenzie Bldg. *Fork River Man*: Freiheit Construction Ltd, construction of post office bldg. *Ochre River Man*: Freiheit Construction Ltd, construction of post office bldg. *Winnipeg Man*: Allied Building Services (1962) Ltd, cleaning interior, etc, Immigration Hall, 83 Maple Street; A E Johnson Cartage Ltd, removal of garbage, etc, from federal bldgs. *Banff Alta*: Wm Lange Construction Ltd, construction of public convenience station.

Glenwood Alta: Jason Construction Ltd, construction of school & motel teacherage. *New Denver B C*: F J McLeod Ltd, construction of post office bldg. *Radium Junction B C*: A E Jones Co Ltd, construction of post office bldg. *Vancouver B C*: Modern Building Cleaning Service of Canada Ltd, cleaning interior, General Post Office; Modern Building Cleaning Service of Canada Ltd, cleaning windows of federal bldgs. *Pine Point Road N W T*: B G Linton Construction Ltd, right-of-way clearing, Little Buffalo River to Hay River. *Yellowknife N W T*: Solar Construction Co Ltd, construction of classroom addition & mining shop, Sir John Franklin School.

In addition, this Department awarded 49 contracts containing the General Fair Wages Clause.

THE ST LAWRENCE SEAWAY AUTHORITY

Beauharnois Que: Annett Chemicals Ltd, grouting at Beauharnois Locks, near Montreal
Que: Charles Duranceau Ltee, placing riprap along canal banks between St Lambert & Cote Ste Catherine & reclamation fill on south shore properties, Brossardville. *St Catharines Ont:* Peel Construction Co Ltd, construction of east side haulage road, section 3 (Read Road to Eastchester Avenue); Peel Construction Co Ltd, construction of east side haulage road, section 2 (Lakeshore Road to Read Road); Nadeco Ltd, pressure grouting, Pond Bridge "A", Welland Canal; The George Campbell Co Ltd, construction of east side haulage road, section 5 (Dorr Road to Glendale Avenue). *St Catharines, Thorold & Port Colborne Ont:* Cem-Chem Grouting Ltd, grouting Locks 4, 5 & 8, Welland Canal.

DEPARTMENT OF TRANSPORT

Deer Lake Nfld: Nordbec Construction Inc, construction of non directional beacon bldg, entrance road & related work. *Mill Village N S:* Diamond Construction (1961) Ltd, site preparation & road construction for satellite communication earth station. *Moncton (Scoudouc) N B:* Industrial Construction Co Ltd, extensions & modifications to VOR Bldg for TACAN installation. *Sept Iles Que:* Amos Electric Enrg, installation of emergency power unit & related work, transmitter bldg. *Saskatoon Sask:* Modern Building Cleaning Service of Canada Ltd, cleaning Air Terminal Bldg, Airport. *Fort Nelson B C:* Byrnes & Hall Construction Ltd, construction of Operations Bldg & related work.

In addition, this Department awarded 27 contracts containing the General Fair Wages Clause.

Well-Known Canadian Geologist, Dr. Alice Wilson Dead at 83

Dr. Alice Wilson, noted geologist, died in Ottawa on April 15 at the age of 83.

At the turn of the century, geology was considered a "male" occupation. By dint of perseverance in study and work, Dr. Wilson proved that women also had a claim to the profession.

In 1909 she became the first woman to be hired in a professional capacity by the Geological Survey of Canada. In 1938 she was the first woman to be named Fellow of the Royal Society of Canada. And in 1960 she was the first woman to receive an honorary Doctor of Laws degree from Carleton University.

Dr. Wilson had taken her Ph.D. at the University of Chicago on a Canadian Federation of University Women scholarship. The honour of Member of the British Empire was conferred upon her in 1934.

Dr. Wilson was born at Cobourg, Ont., and studied at the universities of Toronto and Chicago. She was on the staff of the Geological Survey of Canada from 1909 to 1946, and lectured at Carleton University from 1948 to 1958.

Decisions of Umpire

(Continued from 417)

In view of the above, the board is of the opinion that the information received subsequent to the first decision does not contain any new facts.

It is the board's opinion that this matter should still be adjudicated on by the Umpire insofar as it relates to the period of time in which the claimant should have been allowed an opportunity to find work in her new location.

The case was placed before the Umpire for a decision.

Considerations and Conclusions: Availability for work is a question of fact which must be examined in the light of the particular circumstances of each case, and I consider that, in view of the very small size of the localities involved in the present case, a period of ten weeks from the date on which the claimant had applied for benefit constituted a reasonable period in which to explore the labour market of the area in question.

I consequently decide to confirm the unanimous decision of the board of referees and to dismiss the claimant's appeal.

PRICE INDEX

Consumer Price Index, April 1964

The consumer price index (1949=100) rose 0.3 per cent to 135.0 in April from 134.6 in March and thus was 2.0 per cent above the April 1963 index of 132.3. Higher prices in five of the seven main component groups exceeded declines in the transportation, and recreation and reading components.

The food index advanced 0.4 per cent to 131.8 from 131.3. Higher prices were reported for a variety of items, including fruits, beef, poultry, coffee, milk, ice cream, flour, soda crackers, macaroni, shortening and some vegetables. Prices were lower for sugar, bread, cookies, eggs, a few vegetables and some cuts of meat.

The housing index increased 0.2 per cent to 137.8 from 137.5. The shelter index was up 0.2 per cent on higher prices for repairs. The household operation component rose 0.3 per cent because of higher prices for furniture, appliances, utensils and equipment. Prices were down slightly for floor coverings and household supplies.

The clothing index advanced 0.4 per cent to 119.1 from 118.6. Higher prices were reported for men's and women's wear, piece goods, footwear and jewellery. Prices for children's wear were lower.

The transportation index eased down 0.1 per cent to 142.8 from 143.0. Prices were higher for motor oil in some cities but the increases were outweighed by lower prices for new cars.

The health and personal care index rose 0.7 per cent to 166.5 from 165.4. The health care component advanced 0.9 per cent as doctors' and dentists' fees and optical care costs were generally higher.

The recreation and reading index decreased 0.9 per cent to 151.0 from 152.3. Higher prices for newspapers in some cities were outweighed by lower subscription rates for certain magazines.

The tobacco and alcohol index edged up 0.1 per cent to 119.5 from 119.4 as a result of higher liquor prices in Western Canada and New Brunswick.

In April 1963 group indexes were: food 128.9, housing 136.0, clothing 115.7, transportation 139.2, health and personal care 162.1, recreation and reading 148.0, and tobacco and alcohol 117.9.

City Consumer Price Indexes, March 1964

Between February and March consumer price indexes (1949=100) rose in five of the ten regional cities, fell in three, and remained unchanged in two.

Food indexes fell in six cities and rose in four; the changes ranged from a drop of

1.0 per cent in St. John's to a rise of 0.6 per cent in Edmonton-Calgary. Housing indexes increased in eight cities, declined in one, and remained constant in one. Nine cities experienced higher indexes for clothing; the remaining one was unchanged. In the transportation component there were two cities with higher indexes, seven with lower indexes, and one with no change. Health and personal care indexes were higher in four cities, lower in two, and unchanged in four. The indexes for recreation and reading were unchanged in eight cities; in the other two they increased fractionally. The tobacco and alcohol index rose in Winnipeg; in all other cities it was unchanged.

Regional consumer price index point changes between February and March were: Ottawa +0.5 to 135.5; Toronto +0.4 to 136.4; Vancouver +0.4 to 132.1; Winnipeg +0.3 to 131.7; Edmonton-Calgary +0.1 to 127.8; St. John's -0.4 to 120.4†+5 Montreal -0.2 to 134.5; Saskatoon-Regina -0.1 to 128.9. Halifax and Saint John remained unchanged at 131.6 and 134.3 respectively.

Wholesale Price Index, March 1964

In March, Canada's general wholesale index (1935-39=100) declined 0.2 per cent to 245.6 from 246.1 in February but was 1.3 per cent above the March 1963 index of 242.4.

Four major commodity group indexes increased, two decreased and two were unchanged.

The vegetable products group index of 227.7 in March was 1.5 per cent below the February index of 231.2. The non-metallic minerals products group index was 191.5, practically unchanged from 191.6 a month earlier.

Increases in four of the major commodity group indexes were not sufficient to offset these two declines. The animal products group index moved up 0.3 per cent to 249.3 from 248.6 in February, the textiles products group index rose 0.2 per cent to 249.6 from 249.2, the wood products group index increased 0.2 per cent to 330.9 from 330.3, and the non-ferrous metals products group index was up 0.1 per cent to 201.5 from 201.2.

The iron products group index remained at 255.0, and the chemical products group index at 190.1.

The index of Canadian farm product prices at terminal markets (1935-39=100) eased 0.05 per cent, from 214.6 to 214.5, in the four weeks ended March 26. The field products index rose 0.4 per cent, from

† On base June 1951=100.

165.0 to 165.7, and the animal products index declined 0.4 per cent, from 264.3 to 263.3.

U.S. Consumer Price Index, March 1964

The United States consumer price index (1957-59=100) rose slightly in March, recovering the decline in February. The March index was 107.7, the same as January's.

Increases in the prices of gasoline and women's clothing offset small declines in the prices of some foods, notably meat and eggs.

Since March 1963, the index has risen from 106.2, a rise of 1.4 points.

British Index of Retail Prices, Feb. 1964

The British index of retail prices (Jan. 16, 1962=100) rose to 104.8 in mid-February from 104.7 in mid-January. In February 1963 it was 103.6.

The food index remained unchanged during the month.

In 1963, the average level of retail prices rose by nearly 2 per cent, compared with rises of more than 2.5 per cent in 1962, about 4.5 per cent in 1961, and just over 2 per cent in 1960. The average index for the 12 months ended in January 1964 was 2 per cent higher than the average for the previous 12 months.

The following 19 Surveys were issued in 1963 in Edmonton by the Industrial Development Branch of the Department of Industry and Development of the Province of Alberta.

25. *Town of Bassano*. Rev. October 1963. Pp. 13.

26. *Town of Beaverlodge*. Rev. December 1963. Pp. 12.

27. *Village of Berwyn*. Rev. August 1963. Pp. 9.

28. *Village of Bowden*. Rev. October 1963. Pp. 12.

29. *Town of Cardston*. Rev. August 1963. Pp. 13.

30. *Town of Claresholm*. Rev. November 1963. Pp. 14.

31. *Town of Daysland*. Rev. October 1963. Pp. 11.

32. *Town of Elk Point*. Rev. October 1963. Pp. 14.

33. *Town of Falker*. Rev. August 1963. Pp. 9.

34. *Village of Hythe*. Rev. October 1963. Pp. 10.

35. *Town of Manning*. Rev. October 1963. Pp. 11.

36. *City of Medicine Hat*. Rev. September 1963. Pp. 16.

37. *Town of Raymond*. Rev. October 1963. Pp. 14.

38. *Town of Redcliffe*. Rev. November 1963. Pp. 10.

39. *Town of Taber*. Rev. May 1963. Pp. 19.

40. *Town of Vauxhall*. Rev. August 1962. Pp. 12.

41. *Town of Vegreville*. Rev. October 1963. Pp. 12.

42. *Town of Vermilion*. Rev. October 1963. Pp. 16.

43. *Village of Warspite*. Rev. February 1963. Pp. 8.

44. BRITISH COLUMBIA. BUREAU OF ECONOMICS AND STATISTICS. *Fernie and District; an Economic Survey, August 1963*. Victoria, 1963. Pp. 57.

Contains an inventory of resources of Fernie District, market research into potential manufacturing industries, and a sampling survey of businesses in the district.

45. ONTARIO. DEPARTMENT OF ECONOMICS AND DEVELOPMENT. *Georgian Bay Region; Economic Survey*. Rev. ed. Toronto, 1963. Pp. 132.

LABOUR SUPPLY

46. BUREAU OF NATIONAL AFFAIRS, WASHINGTON, D.C. *Effective Utilization of Manpower*. Washington, 1963. Pp. 13.

Personnel and industrial relations executives tell how their firms are making effective use of manpower. They also express opinions on the chief causes of manpower waste.

47. U.S. CONGRESS. JOINT ECONOMIC COMMITTEE. *Measuring Employment and Unemployment, Hearings before the Subcommittee on Economic Statistics of the Joint Economic Committee, Congress of the United States, Eighty-eighth Congress, First Session, pursuant to Sec. 5(a)*

of Public Law 304, 79th Congress. Washington, GPO, 1963. Pp. 129.

Hearings held June 6-7, 1963. These hearings were held to consider the Report of the President's Committee to Appraise Employment and Unemployment Statistics. The title of the report was, *Measuring Employment and Unemployment*.

LABOURING CLASSES

48. BARBASH, JACK. *Prospects for Future Union Growth, the Union Leadership Factor*. [Madison, Wisc., University of Wisconsin, Industrial Relations Research Center, 1963?] Pp. 11.

The author suggests changes in the thinking of union leaders if they wish to maintain and increase the membership of their unions.

49. BELBIN, R. M. *Inspection and Human Efficiency*. London, Information Division, Dept. of Scientific and Industrial Research, 1963. Pp. 12.

50. CLAGUE, EWAN. *The Shorter Workweek—Factual Background. [Address] before the Second Annual Labour-Management Conference, Minneapolis, Minnesota, May 10, 1963*. [Washington, U.S. Bureau of Labor Statistics, 1963] Pp. 11.

The Commissioner of Labor Statistics, U.S. Department of Labor, examines the workweek which prevails today and concludes that it will decline slowly in the next decade.

51. CONFERENCE ON AUTOMATION AND SOCIAL CHANGE, TORONTO, 1963. *Automation and Social Change; [Proceedings. Toronto, n.p., 1963]* Pp. 244.

Conference held September 17, 18, and 19 and sponsored by the Ontario Departments of Economics and Development, Education, Labour and the Ontario Economic Council.

The conference dealt with the impact of automation on technological change in Canada, on labour-management relations, and on manpower training. One result of the conference was the establishment of the Foundation on Automation and Employment by the Ontario Government.

52. FERMAN, LOUIS ABBOTT. *Death of a Newspaper: the Story of the Detroit Times; a Study of Job Dislocation Among Newspaper Workers in a Depressed Labor Market*. Kalamazoo, Mich., W. E. Upjohn Institute for Employment Research, 1963. Pp. 63.

The employees of the *Detroit Times* newspaper were notified of their discharge and of the newspaper's shutdown when they received a telegram around 3 o'clock on the morning of November 7, 1960. This study reports the re-employment and unemployment experiences of some of the ex-Times workers.

53. GILADI, ISRAEL. *Labour Laws in Israel*. Tel-Aviv, Afro-Asian Institute for Labour Studies and Co-operation, 1962. Pp. 125.

54. U.S. BUREAU OF LABOR STANDARDS. . . . *A Guide to Community Efforts to improve Conditions for Agricultural Migrants* Washington, GPO, 1963. Pp. 14.

55. U.S. BUREAU OF LABOR STATISTICS. *Employee Earnings in Retail Trade, June 1962*. Washington, GPO, 1963. Pp. 69.

56. U.S. BUREAU OF LABOR STATISTICS. *Injuries and Accident Causes in Logging Operations*. Washington, GPO, 1963. Pp. 147.

OCCUPATIONS

57. U.S. NATIONAL PARK SERVICE. *A Plan for the Man: a Tool to Unleash Creativity and Potential in the National Park Service*; [Management Development Program. Washington, GPO, 1963] Pp. 71.

Outlines a management development program.

58. WORLD CONFEDERATION OF ORGANIZATIONS OF THE TEACHING PROFESSION. *Conditions of Work for Quality Teaching; 1963 WCOTP Theme Study developed by Member Organizations and presented to the 12th Assembly of Delegates, Rio de Janeiro, August 1963*. Washington, 1963. Pp. 149.

A questionnaire on conditions of work for quality teaching was submitted to member countries of WCOTP. This study contains a synthesis of reports of national members as well as reports from individual member associations.

WOMEN

59. PENNEY, (MRS.) R. J. *The Rural Woman and Continuing Education*. Ottawa, Canada, Dept. of Labour, Women's Bureau, 1963. Pp. 3.

60. WRIGHT, FRANCES L. *The Personnel Supervisor of a Large Insurance Company speaks to Girls*. Ottawa, Canada Dept. of Labour, Women's Bureau, 1964. Pp. 4. (Women's Bureau Bulletin No. 12, March 1964).

The author, Supervisor of the Personnel Department, Sun Life Assurance Company of Canada, gave this talk at a Careers Conference for McGill University co-eds sponsored by the University's Alumnae Society.

61. ZAPOLEON, MARGUERITE (WYKOFF). *Girls and their Futures*. Chicago, Science Research Associates, 1962. Pp. 48.

The author advises girls how to plan for their futures while they are still in high school.

MISCELLANEOUS

62. AUSTRALIA. DEPARTMENT OF LABOUR AND NATIONAL SERVICE. INDUSTRIAL SERVICES DIVISION. *Colour in Factory and Office*. Rev. ed. Sydney, 1963. 1 volume (unpaged).

63. CANADA. NATIONAL ENERGY BOARD. *Short-Term Energy Forecast, 1960-1966*. Ottawa, Queen's Printer, 1963. Pp. 16.

Contains a brief history of Canadian energy consumption and fuel summaries of petroleum, natural gas, coal and coke, and electrical energy.

64. CANADIAN BAR ASSOCIATION. *Papers presented at the Annual Meeting, Banff, 1963*. [Toronto, CCH Canadian Limited, 1963] Pp. 12, 535.

"Consolidated index to papers presented at annual meetings, 1954-1963." 12p. at beginning of book.

Some of the topics discussed at this meeting were: anti-discrimination legislation, methods of compensation used in the English nationalization statutes, diminished responsibility, law schools and legal ethics, etc.

65. CORNING, MARY E. *Country Reports on the Organization of Scientific Research: United States*. Paris, Organization for Economic Cooperation and Development, 1963. Pp. [96]

66. GALBRAITH, JOHN ALEXANDER. *The Economics of Banking Operations; A Canadian Study*. Montreal, McGill University Press, 1963. Pp. 510.

Contents: The Nature and Consequences of Domestic Banking Operations. The Economics of Banking "Output". Competition, Profits, and the Capital Accounts. Interregional Banking Transactions and Operations. International Banking Transactions and Operations. Government Financial Operations. Central Banking.

67. INTERNATIONAL SEMINAR ON EMPLOYMENT OF THE DISABLED, ZAGREB AND DUBROVNIK, YUGOSLAVIA, 1960. [Proceedings. Paris, World Veterans Federation, 1962] Pp. 115.

Seminar held in Yugoslavia, May 16-24, 1960 and organized by the World Veterans Federation in co-operation with the Government of Yugoslavia and with the participation of the International Labour Office.

68. U.S. DEPARTMENT OF THE ARMY. *Carpentry and Building Construction*. Washington, GPO, 1960 [i.e. 1961] Pp. 198.

Provides information for maintaining, repairing, and constructing buildings and other wooden structures. Includes information on prefabricated buildings, such as the proper erection, organization of the building crew, time ratio, and recommended procedures.

69. VORONITSIN, K. I. *Noise, Vibration and Escape of Exhaust Gases in Power Saws*, by K. I. Voronitsin [and others] Geneva, United Nations, 1962. Pp. 19.

At head of title: Economic Commission for Europe. Timber Committee, Food and Agriculture Organization. European Forestry Commission, Joint Committee on Forest Working Techniques and Training of Forest Workers (in collaboration with the ILO).

" . . . Analyzes present vibration and noise levels and suggests various measures to reduce harmful effects on power saw operators."

⁽¹⁾Quarterly figures are entered opposite the middle month of the quarter but represent quarterly totals.

⁽²⁾Includes post office wages and salaries.

⁽³⁾Figures in this column are for total labour income, Canada, but are not totals of the figures in the remaining columns of this table, as figures for labour income in Agriculture, Fishing and Trapping are not shown.

*Revised

†Preliminary.

C—Employment, Hours and Earnings

Tables C-1 to C-3 are based on reports from employers having 15 or more employees; at February 1964 employers in the principal non-agricultural industries reported a total employment of 2,939,919. Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners in the reporting firms.

(1) Preliminary subject to revision.

(2) Includes 1458 registrations reported by the Magdalen Islands local office.

E—Unemployment Insurance

Unemployment insurance statistics are concerned with numbers of persons covered by insurance and claimants for benefit at Unemployment Insurance Commission local offices. The data are compiled in the Unemployment Insurance Section, DBS from information supplied by the UIC. For further information regarding the nature of the data see Technical Note, page 86, January issue.

TABLE E-1—ESTIMATES OF THE INSURED POPULATION UNDER THE UNEMPLOYMENT INSURANCE ACT

Toronto.....	133.7	136.0	136.4	129.3	140.2	124.6	141.4	163.7	189.9	123.3
Winnipeg.....	129.8	131.4	131.7	130.1	128.5	124.7	136.2	179.1	140.9	127.2
Saskatoon—Regina	128.3	129.0	128.9	127.3	126.8	130.8	135.7	147.1	148.9	119.4
Edmonton—										
Calgary.....	127.2	127.7	127.8	122.8	126.6	127.4	130.4	168.9	146.8	119.5
Vancouver.....	131.7	131.7	132.1	130.3	135.2	120.9	139.2	151.1	150.4	120.9

N.B.—Indexed above measure percentage changes in prices over time in each city and should not be used to compare actual levels of prices as between cities.

⊙ St. John's index on the base June 1951=100.

G—Strikes and Lockouts

Statistical information on work stoppages in Canada is compiled by the Economics and Research Branch of the Department of Labour on the basis of reports from the Unemployment Insurance Commission. The first three tables in this section cover strikes and lockouts which amount to ten or more man-days. The number of workers involved includes all workers reported on strike or locked out, whether or not they all belonged to the union directly involved in the disputes leading to the work stoppages. Workers indirectly affected, such as those laid off as a result of a work stoppage, are not included. For further notes on the series, see page 954, October 1963 issue.

TABLE G-1—STRIKES AND LOCKOUTS, 1959-1964

Month of Year	Strikes and Lockouts Beginning During Month or Year	Strikes and Lockouts in Existence During Month or Year			
		Strikes and Lockouts	Workers Involved	Duration in Man-Days	
				Man-Days	Per Cent of Estimated Working Time

**TABLE G-4—STRIKES AND LOCKOUTS INVOLVING 100 OR MORE WORKERS,
MARCH 1964**

(Preliminary)

Industry — Employer — Location	Union	Workers Involved	Duration in Man-Days		Starting Date — Termination Date	Major Issues ~ Result
			March	Accu- mulated		
<i>MINES</i> <i>Metal</i> Manitou Barvue Mines, Val d'Or, Que.	Steelworkers Loc. 4653 (AFL-CIO/CLC)	300	6,300	8,700	Feb. 20	Wages, hours, holidays, wel- fare benefits, vacations~
<i>MANUFACTURING</i> <i>Clothing</i> Fashion Craft, Victoriaville, Que.	Clothing Workers' Federation (CNTU)	242	360	360	Mar. 30	Lay-off of one employee~
<i>Wood</i> Weyerhaeuser Canada, Sault Ste. Marie, Ont.	Woodworkers Loc. 2-1000 (AFL-CIO/CLC)	390	8,190	8,580	Feb. 28	Wages, group insurance, pen- sion plan~
Geo. Burchill & Sons, South Nelson, N.B.	Woodworkers Loc. 2-306 (AFL-CIO/CLC)	127	1,020	1,020	Mar. 19	Union shop, dues check-off promotional and lay-off policy~
<i>Metal Fabricating</i> American Standard Products, Toronto, Ont.	Potters Loc. 231 (AFL-CIO/CLC)	177	3,720	9,420	Jan. 16	Production standards, wages, fringe benefits~
<i>Transportation Equipment</i> Victoria Machinery Depot and Yarrows Ltd. Victoria, B.C.	Boilermakers Loc. 191 (AFL-CIO/CLC) and var- ious other unions	1,555 (46)	32,660	60,560	Feb. 5	Wages, fringe benefits~
Burrard Dry Dock, North Vancouver, B.C.	Various unions	487 (87)	10,230	19,050	Feb. 6	Wages, holidays, duration of contract~
<i>Electrical Products</i> Canadian General Electric, Guelph, Ont.	U.E. Loc. 541 (Ind.)	377	1,700	1,700	Mar. 2 Mar. 9	Wages as affected by re-class- ification of workers, discip- linary suspension of workers ~Return of workers.
Canadian Westinghouse, Hamilton, Ont.	U.E. Loc. 504 (Ind.)	333	330	330	Mar. 18 Mar. 19	Objection to working along- side former supervisor~Re- turn of workers.

**TABLE G-4—STRIKES AND LOCKOUTS INVOLVING 100 OR MORE WORKERS,
MARCH 1964**

(Preliminary)

Industry Employer Location	Union	Workers Involved	Duration in Man-Days		Starting Date — Termination Date	Major Issues ~ Result
			March	Accu- mulated		
CONSTRUCTION Janin Construction, St. Hyacinthe, Que.	Building Workers' Feder- ation (CNTU)	155	2,250	8,760	Dec. 4	Wages, seniority, grievance committee~
English & Mould, Sudbury, Ont.	Plumbers Loc. 800 (AFL- CIO/CLC)	181	770	950	Feb. 28 Mar. 10	Wages~15¢ an hr. increase.
Metropolitan Toronto Sewer and Watermain Contractors Assoc., Toronto, Ont.	Various unions	600	9,600	9,600	Mar. 9	Wages~
Acton Excavating & Contract- ing, Toronto, Ont.	Teamsters Loc. 675 (Ind.)	189	130	130	Mar. 11 Mar. 13	Wages for truckers~Return of workers when interim in- junction issued.
Grand Rapids Constructors, Grand Rapids, Man.	Various unions	133	1,330	1,330	Mar. 17	Wages~
Lake Ontario Steel, Whitby, Ont.	International Operating Engineers Loc. 793 (AFL- CIO)	194	290	290	Mar. 24 Mar. 26	Alleged violation of agree- ment~Return of workers following a meeting of both parties.
TRADE Irving Refining, East Saint John, N.B.	Oil Workers Loc. 9-691 (AFL-CIO/CLC)	135	680	6,460	Sep. 16 Mar. 9	Wages~7-15¢ an hr. increase depending on classification retroactive to April 1, 1963.
Irving Oil, Various centres, Que.	Oil Workers Loc. 9-703 (AFL-CIO/CLC)	118	120	5,150	Jan. 4 Mar. 3	Contracting out delivery function~Return of workers further negotiations.
SERVICE <i>Education</i> Assoc. des Commissions Sco- laires Catholique du Diocese de Sherbrooke, Various centres Eastern Town- ships, Que.	Assoc. des Professeurs des Ecoles Catholique de la Region d'Asbestos	514	1,800	9,510	Feb. 7 Mar. 5	Salaries~Return of teachers, further negotiations.

Figures in parentheses indicate the number of workers indirectly affected.

H—Industrial Accidents

1963 ⁽²⁾	49	118	34	151	200	221	168	27	55	1	123		1,147

⁽¹⁾The data for years up to and including 1948 cover also deaths that occurred at the place of work of the deceased person even though such deaths were not the result of a condition or event connected with the employment of the person concerned.

⁽²⁾These figures are preliminary. They include 887 fatalities reported by the Workmen's Compensation Boards and the Board of Transport Commissioners and 260 on which information was obtained from other sources. The 260 fatalities reported from other sources were distributed as follows: Agriculture 48; Logging 14; Fishing and Trapping 32; Mining and Quarrying 5; Manufacturing 21; Construction 24; Transportation, Storage and Communication 64; Public Utilities 5; Trade 13; Service 34.

PUBLICATIONS OF THE DEPARTMENT OF LABOUR

Send remittance by cheque or post office money order, payable to the Receiver-General of Canada, to The Queen's Printer, % Superintendent of Government Publications, Ottawa. All subscriptions payable in advance.

Annual Report of the Department of Labour (Covers fiscal year ending March 31). (English or French). Price 35 cents. Catalogue No. L1-1963

ECONOMICS AND RESEARCH BRANCH

Labour Organizations in Canada (annual). Contains a brief commentary, the latest statistical data on union membership, and a directory of labour organizations with names of their principal officers, publications, and the geographic distribution of their local branches in Canada. (English or French). Price 50 cents. L2-2/1963

Industrial and Geographic Distribution of Union Membership in Canada, 1963 (English or French). Price 15 cents. L31-763

Strikes and Lockouts in Canada (annual). Furnishes a record of strikes and lockouts occurring in Canada during a year. Tables and related texts showing strikes and lockouts by years, by areas, by industries, including time lost, number of workers involved, duration, etc. Price 35 cents. L2-1/1962

Wage Rates, Salaries and Hours of Labour. An annual report published in loose-leaf form and followed later by a paper-bound volume. Contains the results of an annual survey at October 1 of occupational wage rates and standard hours of work in most industries. Averages and predominant ranges of wage rates for selected occupations are tabulated separately on a regional basis for some 90 industries including logging, mining, manufacturing, construction, transportation, trade and service groups. Weekly salaries for office occupations and hourly wage rates for maintenance and service occupations and for labourer for several broad industry groups are shown, on a community basis, in 52 communities. Trends in wage rates are included in tables of index numbers by industry. (Bilingual). L2-545

First year service including attractive binder with index tabs and paper-bound volume, \$9.50; service without indexed binder, \$7.00; individual tables, 15 cents. Paper-bound volume, \$1.30.

Group Hospitalization and Medical Insurance Plans in Canadian Manufacturing Industries (English or French). Price 35 cents. L36-558

Working Conditions in Canadian Industry, 1963. Price 35 cents. L2-15/1963

Municipal Winter Works Incentive Program

Program for 1963-64 winter was most successful since scheme's introduction: more jobs created in six-month program than in previous years, when incentive program was of longer duration

The past winter's Municipal Winter Works Incentive Program was the most successful since the program was introduced six years ago. More jobs were provided under the program than in previous years when it was of longer duration.

The program was shortened to cover a six-month period, from November 1, 1963 to April 30, 1964, to ensure that its maximum effectiveness in providing employment would be concentrated during the winter months.

The 1963-64 program provided on-site jobs for 163,583 men, 12.7 per cent more than the previous year, when the number was 145,025. These jobs created a total of 6,790,603 man-days of work. The 1962-63 program created 6,164,298 man-days of work.

In addition to the jobs provided on-site, it is estimated that at least an equal number of jobs were created off site in the industries that manufacture, sell and transport the materials used on these projects.

Under this year's program, 7,306 projects were approved by provincial Governments and accepted by the federal Government.

The estimated expenditure on these projects during the period of the program was \$277,579,000, of which \$97,608,000 was direct payroll costs. The estimated federal contribution to the direct payroll costs was \$51,741,000.

In addition, many of the provinces contributed toward payroll costs of the projects in their municipalities.

Under the 1962-63 Municipal Winter Works Incentive Program, 8,075 projects were accepted by the federal Government after being approved by the provincial governments. The estimated cost of these projects was \$291,817,000, of which the direct payroll cost was \$91,392,000. The percentage of payroll cost to total cost during the period of the program was thus 31.3.

The federal Government's share of direct payroll costs in 1962-63 was approximately \$45,294,000.

Several innovations were introduced in this year's program to encourage municipalities to carry out more work under the program:

—The maximum federal incentive payment on new municipal buildings was increased from \$50,000 to \$100,000.

—In the case of municipalities located in Designated Development Areas (L.G., Oct. 1963, p. 864) and areas of high winter unemployment (L.G., Nov. 1963, p. 958), the federal share of direct payroll costs was increased to 60 per cent.

A breakdown of the figures for the Municipal Winter Works Incentive Program by provinces is:

	Accepted Projects No.	Men Employed No.	Man-days of Work Provided No.	Federal Share of Direct Payroll Costs \$
British Columbia	644	7,822	499,486	4,842,000
Alberta	753	11,124	453,843	3,435,000

50 Years Ago This Month

Unemployment, especially of unskilled labourers and building tradesmen, remains heavy in most parts of Canada, although coming of warm weather brings some improvement, in May 1914

Unemployment in Montreal, which had been serious during the winter of 1913-14, had diminished considerably by May 1914, the LABOUR GAZETTE's correspondent in that city reported in the June 1914 issue.

"Reports from the Charity Organization Society, the Meurling Night Refuge, the Salvation Army Hotel Metropole, and other free or cheap refuges in Montreal, indicate that the destitution and unemployment so pronounced during the winter has been relieved to a great extent since the warm weather," he said. The Meurling refuge, which had been filled to capacity every night and had been obliged, up to the middle of May, to turn people away, at the end of the month had between 100 and 150 vacant beds.

In a number of the larger centres across Canada, however, unemployment was still heavy. In Ottawa, it was reported that at the end of May at least 1,000 unskilled labourers were idle.

"Slackness in railroad construction work throughout the district, and an impression that lumbering positions could be secured in the city, have, it is said, resulted in a large number of unskilled labourers invading Ottawa," the Ottawa correspondent said.

The Toronto correspondent referred to delay in starting important civic works that were expected to furnish employment for several thousand men during the summer. "Some 5,000 men are now employed by the city works department and contractors on the construction of sidewalks, street pavements and sewers, and routine work of similar character," he said.

The report from Brantford was: "Labour was only partially employed during the month. In every line the supply exceeded the demand, and in all trades some men were out of work, while others were working short time."

The Berlin, Ont., correspondent said: "Outside labourers on sewer work and water works, as well as gas and corporation labourers, were well employed though there were still a lot of foreign labourers out of work, with very little demand for them."

In Hamilton, "labourers had a better month than in April, but there were still many out of employment."

Reports from some of the other eastern centres were more favourable, but in the

Prairie Provinces unemployment was still heavy. The Winnipeg correspondent reported, "Distress amongst unskilled labour was particularly acute. An unemployment parade, composed mainly of foreigners, to the number of about 2,000, ended in a disturbance, which had to be quelled by the police."

The Regina correspondent said that "a large amount of unemployment continued to exist. The civic authorities were endeavouring to minimize the amount of unemployment prevailing in unskilled labour in civic works. It is probable that hand labour will take the place of machines on some work. Work for the most part will likely be done by day labour, thus making provision for the employment of more men. This however, . . . will not help out the large number of skilled mechanics in the building trades."

From Moose Jaw the report was: "There was very little improvement in the labour situation over April. A good number were able to secure odd days' work throughout the month, but not more than 50 per cent were steadily employed. There does not appear much chance for steady work or much demand for labour until the harvest season."

The Saskatoon correspondent said that there was "a large surplus of labour still on the market." From Prince Albert the report was: "The labour barometer during May was stationary, with supply in excess of demand, and no immediate prospect of any great improvement." The report from Calgary said: "No improvement was shown in the building trades over the previous month, the majority of the men in the different trades being unable to find employment."

The Edmonton correspondent said: "While the demand for labour was greater than in the previous month, there were probably more men idle during May, owing to the fact that large numbers of men came into the city from construction and tie camps, and from homesteads, looking for employment."

From Vancouver, the report was that the opening up of logging and other industries in the interior had "in a slight measure absorbed a part of the unskilled unemployed".

NOTES OF CURRENT INTEREST

Appoint Four Officials of Manpower Consultative Service

The appointment of the Director and three key members of the staff of the Department's new Manpower Consultative Service was announced last month.

The Director is G. G. Brooks, and the three staff members are Deryck Adamson, John Drew and A. M. Sargent.

The Manpower Consultative Service was conceived as a response to human problems of dislocation and unemployment caused by technological and other economic changes.

Hon. Allan J. MacEachen, Minister of Labour, said that the Government recognized that the primary responsibility for dealing with technological change rested with management and labour. But it recognized also that the Government had a vital part to play in helping management and labour to develop effective ways of dealing with the effects of these changes, by providing technical assistance and appropriate financial incentives.

The Minister said that he was authorized to enter into agreements with employers, or jointly with employers and unions, to provide incentives amounting to one-half the cost of research into the manpower effects of industrial changes in a plant or business, and one-half the cost of development of a program of adjustment. The incentive payment, however, will not cover the cost of putting the program into effect.

The Minister, through the Manpower Consultative Service, must receive reasonably early notice of industrial changes that will have an adverse effect on employment. Also, where there is a recognized union, there must be agreement that management and the union will participate jointly in the research and development phases of their manpower adjustment program.

Where it is not possible to avoid the displacement of workers, the Minister can enter into agreements to provide re-employment incentives to a province or employers, or both, of one-half the cost of moving workers and their dependents to other communities where employment is available.

Mr. MacEachen pointed out that, by an agreement under the Technical and Vocational Training Assistance Act, the federal Government may reimburse a province for 75 per cent of the cost an employer undertakes in retraining workers under a manpower adjustment program.

George Gordon Brooks

G. G. Brooks was born in Toronto and educated in Toronto public and secondary schools. He received a B.A. (Honours)

degree from the University of Toronto in 1932 and an M.A. in history in 1936.

He obtained a Specialist Certificate from the Ontario College of Education in 1934 and from 1933 to 1942 taught in secondary schools in the Toronto area. During the last six years of that period he was head of the English Department at Weston Collegiate and Vocational School.

In 1942 he took a special course in personnel administration from McMaster University, and that same year he took the first of a series of positions in personnel administration in industry. Mr. Brooks has worked in this broad area with companies in the steel, household appliance, meat packing and agricultural implement industries.

Most recently, he was vice-president and director of personnel of United Aircraft of Canada (formerly Canadian Pratt and Whitney Aircraft), Montreal.

During his years in industry, he was a sessional lecturer in personnel administration and administrative practices at the University of Western Ontario, from 1946 to 1948, and from 1954 to 1956, he lectured on personnel administration in the extension department of McGill University.

Mr. Brooks served on the National and the Quebec Regional Industrial Relations Committees of the Canadian Manufacturers' Association and has held many other public and semi-public appointments.

Deryck Adamson

Deryck Adamson was born and educated in Toronto. He has a diploma in electrical engineering, and studied liberal arts at Sir George Williams University, Montreal.

He joined the Canadian Merchant Service as an apprentice seaman at the age of 15, and during his years at sea obtained his Master's papers for foreign-going steamships.

While still in his twenties, he retired from the Service as a Chief Mate to join the personnel department of Shawinigan Water and Power Ltd., where he became Supervisor of Personnel Research in Montreal and Shawinigan, Que.

During World War II he served as Lieutenant, R.C.N.R., on corvettes and destroyers.

Since then, Mr. Adamson has had extensive experience in manpower development in industry in the personnel and employee relations fields, and as an independent consultant.

John David Drew

John Drew was born in Oshawa, Ont., and attended schools in Ontario and Quebec. He was graduated from the University of British Columbia in 1956 with a degree in economics, and obtained a master's degree in economics from Stanford University in 1957.

From 1957 to 1962, Mr. Drew was Research Director of the British Columbia Federation of Labour.

Since 1962, he has carried on research work in economics and industrial relations for management and labour in British Columbia.

A. M. Sargent

A. M. Sargent was born in Westmount, Que., and received his early education there.

He interrupted a course at McGill University for three years of service with the Armed Forces in World War II. On his return he was graduated in Arts and Honours Economics. He has also done post-graduate work in economics at the University of Toronto.

Immediately after graduation he joined the federal Department of Reconstruction and Supply, where he was working in research relating to the changeover of industry from a wartime to a peacetime basis.

In 1950, Mr. Sargent joined the Economics and Research Branch of the Department of Labour, and since then has been engaged in a number of research projects that have provided him with a wide knowledge of Canadian industry and manpower problems. His last major project was with the Canadian aspects of an international study, conducted by the Organization for Economic Co-operation and Development, on the effects of technological change on manpower and on manpower adjustment policies.

"Skilled Manpower More Important" Than Wealth of Natural Resources

"Highly skilled manpower today and in the future will be perhaps even more important than an abundance of natural resources to the economic growth of Canada," W. R. Dymond, Assistant Deputy Minister of Labour, predicted in an address to the first national convention of the Canadian Vocational Association.

National President Arnold Doyle, Director of Technical and Vocational Education for Saskatchewan, said he hoped the Association's aim, developing Canadian manpower by promoting vocational education, could be realized by bringing together representatives of government, education,

business, labour and management to unify their approach to the problem.

One of the suggestions put forth at the meeting was that teachers training students for work in industry should themselves return to industrial jobs once every two years to bring their knowledge up to date in the face of rapid technological change.

Announce Change in Interest Rate On Certain Government Annuities

The interest rates on certain types of Canadian Government Annuities have been raised. This, the first change in interest rates since 1957, has been done in order to bring the price of immediate and group annuities more in line with present-day yields on good long-term investments.

The interest rate on new group contracts and on existing group contracts that become effective on and after April 1, 1953 has been raised to 5 per cent. The rate on new immediate annuities at age 55 and older has been raised to 5½ per cent. The interest rate on individual deferred annuities remains at 4 per cent, except for annuities maturing at age 55 and older that are deferred five years or less. In this case the premiums have been reduced to make them consistent with the price of immediate annuities.

These changes will mean that purchasers of these types of annuity will get a greater return for their money, the Minister of Labour said when announcing the increase. The cost of immediate annuities will be reduced by up to 12 per cent. The premiums under group contracts will also be reduced.

Immediate annuities are usually purchased by persons who have reached retirement age and who pay a lump sum in return for a regular monthly income starting immediately. Group annuities are used to provide retirement pensions for groups of employees. Deferred annuities are purchased by regular instalment payments over a period of years during a person's working life.

Prof. H. D. Woods Chairs Group Reviewing Manitoba Labour Acts

Prof. H. D. Woods, Director of the Industrial Relations Centre of McGill University, has been appointed chairman of a committee, composed of members named by labour and management groups, that will review Manitoba's Labour Relations and Employment Standards Acts.

G. Campbell McLean, Q.C., Chairman of the Manitoba Minimum Wage Board and of the Fair Wage Board, will be vice-chairman.

White House Negotiators Produce Settlement of U.S. Rail Dispute

A basic agreement on the terms of a new collective bargaining contract between five operating railway unions and 200 United States railroads was reached in Washington on April 22 after 13 days of intensive negotiations under White House auspices. The agreement came in time to prevent a country-wide railroad strike set for midnight on April 24.

The settlement concerned the working rules and wage adjustments involved in the work rules dispute that were not covered by the compulsory arbitration law, known as Public Law 88-108, which dealt with the question of the employment of firemen in freight and yard service (L.G., Dec. 1963, p. 1070).

The settlement was announced by President Johnson, who called it "a victory for collective bargaining."

In general terms, the agreement provides:

—Seven paid holidays a year for practically all hourly paid employees belonging to the five unions.

—Wage increases providing a new flat rate of \$3.10 an hour for yard foremen (conductors) and \$2.90 for yard helpers (switchmen), with commensurate increases that the unions say will mean a 4-per-cent increase for engineers and firemen-helpers on the basis of a five-day week.

—"Suitable lodging" or an "equitable allowance" for all road employees, except those in commuter service, who must lay over away from their home terminals for more than four hours between runs. One \$1.50 meal allowance per layover will be given.

—That, with certain exceptions, no operating employees are to be used on self-propelled equipment. Any employee displaced by this change will be given severance pay and job retraining.

—Withdrawal by the railways of their proposal to change the present basic wage structure, which provided a daily rate of pay for either eight hours of work, or up to 150 miles, for employees who are paid on a combined time and mileage basis. Any wage increases paid up to Jan. 1, 1968 will be limited to basic hourly rates and will not apply to existing mileage rates.

—Withdrawal by the unions of requests for overtime pay for road employees after eight hours, and for a night shift pay differential. (Yard service workers now receive overtime after eight hours.)

—Withdrawal by the carriers of the main portion of their request involving the combining of road and yard crews (but pro-

cedures were laid down for applying a new rule in taking off the last engine in a yard).

—Referral of the railways' proposal to combine some divisional train runs, thus lengthening the runs before crews are changed, to a study committee composed of representatives of the parties and the two private mediators who had been helping in the final negotiations. Findings of the study would not be binding on either side—the only issue so exempt.

On the diesel firemen issue, the attempt by four of the unions to avert the operation of the compulsory arbitration law by appealing its constitutionality in the United States Supreme Court was defeated when the Court on April 27 refused to review the constitutional questions raised by the unions.

After the Supreme Court's refusal, President H. E. Gilbert of the Brotherhood of Locomotive Firemen and Enginemen announced the union's determination to insist, on the expiration of the award in March 1966, that firemen should be reinstated in all jobs now requiring their services.

The Brotherhood of Locomotive Firemen and Enginemen and the carriers had agreed to allow a 10-day postponement of the application of the compulsory arbitration award, and in consequence, its provisions did not begin to take effect until May 7, and by the terms of the law they cease to apply after the end of March 1966.
