\* Production is for calendar year preceding the fiscal year. † Export statistics for the fiscal years ending June 30. ‡ Residuum—tar, pitch, and all other from which the light bodies have been distilled. In 1898 this amounted to 19,973,604 gallons, in 1899 to 30,668,958 gallons, in 1900 to 16,629,186 gallons, in 1901 to 25,696,596 gallons, in 1902 to 30,309,510 gallons.

The above is compiled from the Report of the Bureau of Statistics of the Treasury Department.

Over 5,000,000,000 gallons of petroleum, according to the office of the Geological Survey, are now produced annually in the world. Of this amount 2,500,000,000 are produced in the United States, 2,250,000,000 in Russia, and the remainder is distributed among a dozen countries, Austria producing 87,000,000; Sumatra, 72,000,000; Java, 30,000,000; Canada, 29,000,000; Germany, 15,000,000. The United States exported \$75,612,000 and Russia \$23,670,000 worth of mineral oil in 1900.

## Production of Copper, Tin, and Zinc.

THE production of copper in the world in 1901, stated in long tons, was as follows: United States, 270,998; Spain and Portugal, 54,482; Chile, 31,299; Japan, 27,916; Germany, 22,069; Mexico, 33,943; Australasia, 31,371; South Africa, 6,503; other countries, 53,567; total, 532,148 tons.

The copper production of the United States in 1900, in pounds, was distributed as follows: Arizona, 115,403,846; California, 29,639,987; Colorado, 7,826,949; Michigan, 144,227,340; Montana, 254,460,713; Utah, 18,504,726; Eastern and Southern States, 6,918,122; all others, 12,536,850; copper in sulphate (a), 11,313,962. (a) Including only the copper in sulphate obtained as a by-product.

The production of tin in the world in 1901, in long tons, was as follows: England, 4,125; Straits Settlements, 49,925; Australasia, 3,345; Banka, Billiton, and Singkep, 19,365; Bolivia, 9,670; India and China, 2,650; United States, none; total, 89,080.

The production of zinc in the world in 1900, in metric tons, was as follows: Austria, 6,836; Belgium, Holland, and the Rhine district of Germany, 189,301; Upper Silesia, 102,316; France, 38,000; Spain, 6,200; United Kingdom, 30,307; Russia, 5,969; United States, 111,794; total, 490,973. The production in the United States in 1901 was 127,751 metric tons, or 140,822 short tons; the distribution being: Kansas, 74,270 tons; Illinois and Indiana, 44,896 tons; Missouri, 13,083 tons; South and East, 8,603 tons.

The statistics of Production of Copper, Tin, and Zinc, and those of Pig Iron and Steel, which follow, were compiled for THE WORLD ALMANAC by Joseph Struthers, editor of "The Mineral Industry."

(a) Except where otherwise specified. (c) Amount or value of crude mineral. (d) Partly estimated. (e) Estimated. (f) Includes by-product production. (g) Barrels of 300 lbs. (h) Barrels of 400 lbs. (i) Includes manganese iron ore; this is not duplicated in the report of iron ore. (j) Value per square, i. e. 100 sq. ft., lapped and laid; the weights are calculated on the basis 3 squares = 2,000 lbs., but these figures are only approximately correct. (k) Kilograms or per kilogram. (l) Reduced to a basis of 66° B. (m) Average market price at New York. (n) Nominal. (o) Value before grinding. (p) Includes ochre, umber, sienna, and oxide of iron. (q) Includes salt used for the manufacture of alkali; the barrel of salt weighs 280 lbs. (r) Reduced to a basis of 58 per cent ash. (s) Includes a small amount made from spelter. (t) Average value of lake copper at New York, less 0.25c. per lb. (u) Includes spiegelstein, though the total value is reckoned as if the whole product were ferromanganese. (v) Average market price at Pittsburgh. (w) Troy oz. (x) Slabs of 76.5 lbs. (y) Barrels of 42 gals. (z) Includes a comparatively small amount made directly from ores. (aa) Not included in the preceding tables. (bb) Does not include 40,930 picos of unspecified weight. (cc) Included with common talc. (dd) Includes Tripoli. (ee) Included with diatomaceous earth. (ff) Included with bituminous.

Sh. T., short tons (2,000 lbs.); L. T., long tons (2,240 lbs.); M. T., metric tons (2,204.6 lbs.).

The foregoing statistics of "Mineral Products of the United States" were compiled by Joseph Struthers, editor of "The Mineral Industry."

\* There were 91,212 acres resurveyed in Cheyenne and Cherry Counties, Nebraska, not counted in this column.

† This estimate is of a very general nature, and affords no index to the disposable volume of land remaining nor the amount available for agricultural purposes. It includes Indian and other public reservations, unsurveyed private land claims, as well as surveyed private land claims, in the districts of Arizona, California, Colorado, and New Mexico; the sixteenth and thirty-sixth sections reserved for common schools; unsurveyed lands embraced in railroad, swamp land, and other grants; the great mountain areas; the areas of unsurveyed rivers and lakes, and large areas wholly unproductive and unavailable for ordinary purposes.

## The Submarine Cables of the World.

(From report issued by the International Bureau of Telegraph Administrations.)

THE following table sets forth the entire system of submarine cables of the world, including those along the shores and in the bays, gulfs, and estuaries of rivers but excepting those in lakes and the interior watercourses of continents. The list includes all cables operated by private companies, and in addition thereto under the name of each nation is given the list of cables operated by the government of that nation.

| COMPANIES.                                                                                                                              | Number of Cables. | Length of Cables in Nautical Miles. | COMPANIES.                                                         | Number of Cables. | Length of Cables in Nautical Miles. |

In June, 1902, the New York Central R. R. began running the "20th Century Limited" between New York and Chicago (964.82 miles) in 20 hours, or 48.24 miles an hour. The Pennsylvania R. R. also put into operation "The Pennsylvania Special," between New York and Chicago (906.8 miles from Jersey City to Chicago, in 19 hours 42 minutes, or 20 hours from New York), or 46.1 miles an hour. The fastest time on record for a distance of over 440 miles was made by the Lake Shore and Michigan Southern R. R. from Chicago to Buffalo, in October, 1895. The fastest long-distance run less than 440 miles was on the New York Central R. R. September 11, 1895, from New York to Buffalo, 436 1-2 miles, in 407 minutes actual time. Average speed, 64 1-3 miles an hour, with two stops and 28 slow-ups.

The fastest regular trains in the United States, for a shorter distance, are believed to be the New York Central "Empire State Express," between New York and Albany, 143 miles in 160 minutes, and those between Washington and Baltimore, on the Baltimore and Ohio Railroad, 40 miles in 45 minutes, a speed of 33.33 miles an hour. The run from Washington to New York, 225.3 miles, is made in 5 hours. Deducting 12 minutes for the Jersey City Ferry and 10 minutes for the Canton Ferry, the rate of speed is 48.6 miles per hour. The "Congressional Limited," on the Pennsylvania Railroad, makes the run from Jersey City to Washington in 4 hours 46 minutes, and the distance is 227 miles.

Fast running train on Philadelphia and Reading route (in Summer)—Camden to Atlantic City, 55.5 miles, in 44 $\frac{1}{2}$  minutes; average daily speed, 71.2 miles per hour. On August 15, 1898, on P. & R. and C. R. R. of N. J., "Royal Blue Line," between Elizabeth, N. J., and Jenkintown, a distance of 69 miles, in 61 minutes, including 2 "slow-ups," some of the miles being traversed in 38 seconds.

The quickest run between Jersey City and Washington, 231 miles, was made on the Central Railroad of New Jersey, March 2, 1897 (by a special train, bearing Vice-President-elect Hobart and party), in 4 hours 8 minutes, making the running time, including "slow-ups" for taking water, changing engines, etc., 60 miles an hour. This beat the time of the "Aunt Jack" train, made by the Madison Square Theatre Company March 10, 1890, which was 4 hours 18 minutes, each way, going and returning.

The fastest long-distance trains of the world, including all stops and slacks, are, according to the "Railroad Gazette," as follows:

Of long-distance runs in France one is made on the Northern Railway of France by the Paris-Calais express, which runs 185 miles in 184 $\frac{1}{2}$  minutes, or a fraction over a mile a minute, allowing for a stoppage of 2 $\frac{1}{2}$  minutes at Amiens.

Other notable long-distance fast runs: March 27-29, 1900—Atchison, Topeka and Santa Fe Railway, Los Angeles, Cal., to Chicago, Ill., 2,236 miles, in 58 hours, including stops, or 38.55 miles per hour. February 14-15, 1897—Pennsylvania Railroad and C., B. and Q., Jersey City to Denver, 1,937 miles, in 48 hours; average speed, 4.3 miles per hour. August 29-31, 1891—Canadian Pacific, Vancouver to Brockville, 2,802 miles, in 77 hours 9 minutes; average speed, 36.32 miles per hour.

A mail and newspaper train on the Pennsylvania covers the 1,058 miles between New York and St. Louis in 20 hours, an average running time of 52.9 miles an hour.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, made the fastest time between the oceans—83 hours 45 minutes, average speed, 39.53 miles per hour.

American sailing ship A. G. Ropes arrived off Sandy Hook March 21, 1898, in 19 days from Liverpool, Eng., having made the trip from Cape Clear (Irish coast) to Sandy Hook (2,700 knots) in 17 days, an average of nearly 160 knots a day. Most transatlantic records of sailing vessels are from New York to Liverpool or Queenstown. There is no record on file from Liverpool to New York, excepting that of the Young America, which made the trip to Liverpool in 18 days and came back in 23 days. The famous Dreadnaught once sailed to Liverpool from New York in 13 days 8 hours, and the Red Jacket in 13 days 11 hours 25 minutes.

## Course of Relative Prices 1890 to 1901 Inclusive.

In the following table, prepared by the United States Department of Labor, similar commodities have been grouped, and the average of the relative prices shown for the commodities in each subgroup and in each of the nine general groups. The averages in all cases were found by dividing the sum of the relative prices by the number of commodities in the group under consideration. It should be borne constantly in mind that the term commodity is used here and elsewhere in a specific sense, "native" and "Western" sheep, for example, being considered different commodities. The method of securing average relative prices was as follows: The average relative price of cattle was found by adding the relative prices of the two grades of cattle and dividing the sum by two. The average for hogs was found in the same manner, and also the average for sheep. The average for live stock was found by dividing the sum of the relative prices of the two grades of cattle, the two grades of hogs, and the two grades of sheep by six, the total number of different descriptions of commodities or series of quotations in the live stock group. The average relative prices of each of the nine general groups were found by dividing the sum of the relative prices of the different descriptions of commodities for each year by the number of these commodities or series of quotations considered in that year. The sum of the relative prices in 1890 of the commodities shown under the general group, "Food, etc.," for example, is 5,958.2, which amount divided by fifty-three, the number of different descriptions of commodities or series of quotations considered that year, gives 112.4 as the average for the group "Food, etc.," for 1890. For 1893 to 1901, fifty-four commodities are quoted in this group, and that number is accordingly the divisor for each of those years. The average relative prices of each of the nine general groups for each year of the period, and the average relative prices of all commodities (261) for each year, are shown in the following summary:

## CENSUS REPORT OF 1900.

Tobacco was grown in the United States in 1899 by 308,317 farmers. The total area devoted to the crop was 1,101,483 acres, and the total production was 868,163,275 pounds, an increase in area since 1889 of 406,182 acres, or 58.4 per cent, and a gain in production of 379,906,629 pounds, or 77.8 per cent. Of the entire area devoted to tobacco, 465,754 acres, or 42.3 per cent, were in the South Atlantic division. Of this amount North Carolina contributed 43.6 per cent and Virginia 39.6 per cent. The South Central division contained 461,855 acres, or 41.9 per cent of the entire acreage, and of this amount Kentucky, which leads the country in tobacco production, contributed 83.3 per cent. The North Atlantic division contained 4.8 per cent of the entire acreage, and the North Central 10.9 per cent, with only 54 acres reported from the Western division. The total value of the crop, in 1899, was \$56,993,003, or an average of \$184.85 for each farm reporting. The average yield per acre was 788 pounds, and the average value per pound to the producer 7 cents.

The imports of tobacco, fiscal year 1902, were 29,829,512 pounds, valued at \$17,708,189. The exports were 315,575,309 pounds, valued at \$32,772,849.

Dairy Products.

The following table, prepared by the Department of Agriculture, gives approximately an exhibit of the quantity and value of the dairy products of the United States in the year 1899:

| Cows.      | Product.    | Rate of Product per Cow. | Total Product.         | Rate of Value. | Total Value.  |
|------------|-------------|--------------------------|------------------------|----------------|---------------|
| 11,009,000 | Butter..... | 130 pounds.              | 1,430,000,000 pounds.  | 18 cents.      | \$257,400,000 |
| 1,000,000  | Cheese..... | 300 pounds.              | 300,000,000 pounds.    | 9 cents.       | 27,000,000    |
| 5,500,000  | Milk.....   | 380 gallons.             | 2,090,000,000 gallons. | 8 cents.       | 167,200,000   |

This gives the grand total of the dairy products of the country a value of \$451,600,000. If to this be added the skim milk, butter-milk, and whey, at their proper feeding value, and the calves dropped yearly, the annual aggregate value of the product of the dairy cows exceeds \$500,000,000.

The exports of butter, fiscal year ending June 30, 1902, were: United Kingdom, pounds, 10,333,007; value, \$1,924,408. Germany, pounds, 206,582; value, \$32,080. The census year ended May 31, 1900.

In the summaries of the results the data are classed as "registration" and "non-registration," according to the source from which the original returns were obtained. The non-registration class includes the areas in which the deaths were reported by the enumerators, and those areas in which registration was too defective to be accepted.

The registration area has been increased almost 50 per cent over 1890, and now comprehends nearly 29,000,000 population. The minimum limit of population of places included among the "cities" in 1890 was 5,000. This was raised to 8,000 for the present census, and therefore represents, to that extent, a more distinctively urban population than before.

The most important feature of the results presented is found in the decrease in the general death rate in the registration area of 1.8 per 1,000 of population, a decrease of nearly 10 per cent, and the decrease in the rates from the particular diseases to which the general decrease is due.

The effect of the advances made in medical science and sanitation and in the preventive and restrictive measures enforced by the health authorities is still more strikingly shown in the comparative rate for the registration cities of the country taken together. In 1890 the death rate in 271 registration cities of 5,000 or more population was 21 per 1,000; in 1900 the rate was 18.6 per 1,000

\* The above comprises the latest statistics published by the United States Government and appeared in the census reports of 1890. The report on crime and pauperism according to the census of 1900 has not yet been issued by the Census Office, but is expected to be ready in 1903.

† Statistics of pauperism apply only to inmates of almshouses. Outdoor paupers are not considered and there is no way of ascertaining their number in the United States, but it is comparatively small compared with that of European countries.

Of the 114,620 parents of the white prisoners 45,732 were native, 60,153 were foreign born, and the birthplaces of 8,735 were reported as unknown. Omitting the unknown, the percentage of prisoners of the native element was 43.19 and of the foreign element 56.81.

As to nationalities of the 60,153 foreign parents of American prisoners 29,184 were Irish, 9,987 German, 5,997 English, 4,064 English Canadian, 1,996 Scotch, 1,483 Mexican, 1,209 Italian, and 1,036 French. Other nationalities were below 1,000.

Of the 133,156 parents of the white paupers 45,215 were native, 63,587 were foreign born, and 24,354 unknown as to birthplace. Omitting the unknown, as in the case of prisoners, 41.56 per cent of the paupers were of native and 58.44 per cent of foreign extraction.

As to nationalities of 63,587 foreign parents of American paupers 32,421 were Irish, 15,629 German, 4,688 English, 2,012 English Canadians, 1,392 Scotch, and 1,368 Swedish. Other nationalities were below 1,000. Statistics of crime and pauperism by the census of 1900 were not ready for publication when this edition went to press.

## Homicide in the United States.

THE statistics of the United States Census for 1900 had not been published by the Census Office when THE WORLD ALMANAC for 1903 was ready for the press. The special report of the Census Office is expected in 1903. The latest official statistics, therefore, are of 1890.

The census bulletin presenting statistics of homicide in the United States in 1890 was prepared by Frederick H. Wines, special agent on pauperism and crime. The following is the summing up of the results of his investigations:

Of 82,329 prisoners in the United States June 1, 1890, the number charged with homicide was 7,386, or 8.97 per cent.

Omitting 35 who were charged with double crimes, 6,958 of them (or 94.65 per cent) were men, and 393 (or 5.35 per cent) were women.

As to color, 4,425 were white, 2,739 negroes, 94 Chinese, 1 Japanese, and 92 Indians.

As to the nativity of the 4,425 whites, 3,157 were born in the United States, 1,213 were foreign born, and the birthplace of 55 is unknown.

A careful and accurate inquiry into the parentage of those born in the United States results in the mathematical conclusion that 56.14 per cent of homicides committed by white men and women is chargeable to the native white element of the population, and 43.86 per cent to the foreign element. On the same scale of 4,614 to 3,605, the negro contribution to homicide is represented by 5.478.

The number employed at the time of their arrest was 5,659; unemployed, 1,225; unknown, 467. The habits of 973, in respect of use of intoxicating liquors, are not stated. The remaining 6,378 are classed as follows: Total abstainers, 1,282; occasional or moderate drinkers, 3,829; drunkards, 1,267.

As to their physical condition, 6,149 were in good health, 600 ill, 283 insane, 24 blind, 14 deaf and dumb, 18 idiots, and 263 crippled.

According to the Chicago Tribune there were 5,956 homicides in the United States in 1901 to December 6; 6,285 in 1900; 6,225 in 1899; 7,840 in 1898; 9,520 in 1897, and 10,652 in 1896. Total five years: 46,478.

## CAPITAL PUNISHMENT.

The States in which the death penalty is forbidden by law are Rhode Island, Maine, Michigan, and Wisconsin. It was abolished in Iowa in 1872 and restored in 1878. It was also abolished by Colorado, but restored in 1901. In Rhode Island the only alternative is imprisonment for life. In Kansas the signature of the Governor is necessary to an execution. The death penalty is inflicted in all the States for murder, except the four above named; and in addition, in Louisiana, for rape, assault with intent to kill, administering poison, arson, and burglary; in Delaware and North Carolina, for rape, arson, and burglary; in Alabama, for rape, arson, robbery, treason, immoral relations with female under ten years of age, or married woman by falsely personating her husband; in Georgia, for rape, mayhem, and arson; in Missouri, for perjury and rape; in Virginia, West Virginia, South Carolina, and Mississippi, for rape and arson; in Florida, Kentucky, Tennessee, Texas, and Arkansas, for rape; in Montana, for arson of dwelling by night; in Maryland, for any variety of arson; in Texas, for perjury to a material fact in a capital case; in Connecticut, for causing death by putting obstructions on railroad. In some of these instances the court may, in its discretion, substitute imprisonment. States in which the judge may substitute life imprisonment for the death penalty on the recommendation of the jury are: Alabama, Arizona, California, South Dakota, Georgia, Illinois, Indiana, Iowa, Kentucky, Mississippi, Nebraska, Ohio, Oklahoma, and South Carolina, and those in which alike discretion is given to the trial court are: Minnesota, New Mexico, North Dakota, and Texas. In Utah the court may exercise the discretion if the jury so recommends. In New York and Ohio, the death penalty is now inflicted by the means of electricity.

## Suicides.

In European cities the number of suicides per 100,000 inhabitants is as follows: Paris, 42; Lyons, 29; St. Petersburg, 7; Moscow, 11; Berlin, 36; Vienna, 28; London, 23; Rome, 8; Milan, 6; Madrid, 3; Genoa, 31; Brussels, 15; Amsterdam, 14; Lisbon, 2; Christiania, 25; Stockholm, 27; Constantinople, 12; Geneva, 11; Dresden, 51. Madrid and Lisbon show the lowest, Dresden the highest figure.

The average annual suicide rate in countries of the world per 100,000 persons living is given by Barker as follows: Saxony, 31.1; Denmark, 25.8; Schleswig-Holstein, 24.0; Austria, 21.2; Switzerland, 20.2; France, 15.7; German Empire, 14.3; Hanover, 14.0; Queensland, 13.5; Prussia, 13.3; Victoria, 11.5; New South Wales, 9.3; Bavaria, 9.1; New Zealand, 9.0; South Australia, 8.9; Sweden, 8.1; Norway, 7.5; Belgium, 6.9; England and Wales, 6.9; Tasmania, 5.3; Hungary, 5.2; Scotland, 4.0; Italy, 3.7; Netherlands, 3.6; United States, 3.5; Russia, 2.9; Ireland, 1.7; Spauu, 1.4. A later enumeration of suicides in France gives 8.926 as the number in 1900, or 23.6 per cent.

The causes of suicide in European countries are reported as follows: Of 100 suicides: Madness, delirium, 18 per cent; alcoholism, 11; vice, crime, 19; different diseases, 2; moral sufferings, 6; family matters, 4; poverty, want, 4; loss of intellect, 14; consequence of crimes, 3; unknown reasons, 19.

The number of suicides in the United States, six years, 1882-87, was 8,226. Insanity was the principal cause, shooting the favorite method; 5,386 acts of suicide were committed in the day, and 2,419 in the night. Summer was the favorite season, June the favorite month, and the 11th the favorite day of the month. The month in which the largest number of suicides occur is July.

The number of suicides in 50 American cities in the twelve years 1890 to 1901, inclusive, according to the enumeration prepared by Professor Frederick L. Hoffman, statistician of the Prudential Insurance Company, was 22,397, being a rate per 100,000 of the population from 1890 to 1895 of 14.4, and from 1896 to 1901 of 16.5. The ten cities included in the enumeration having the highest rate, 1891-1900, were: St. Louis, 1,327 suicides, rate per 100,000 population, 25.7; Chicago, suicides, 3,282, rate 23.3; Hoboken, suicides, 122, rate 23.0; Oakland, Cal., suicides, 125, rate 21.5; New York City (Manhattan and Bronx), suicides, 3,769, rate 20.9; Milwaukee, suicides, 495, rate 19.8; Cincinnati, suicides, 562, rate 18.0; Newark, N. J., suicides, 353, rate 16.2; New Orleans, suicides, 422, rate 15.9; Brooklyn, suicides, 1,557, rate 15.7. The lowest rate was Fall River, Mass., 2.9.

## The Defective Classes.

THE census returns of 1900 of defective classes have not yet been published by the United States Census Office, but are expected to appear in 1903.

**The Insane.**—The total number of insane in the United States on June 1, 1890 (census of the United States), was 106,485—whites, 99,719; negroes, 6,535; Chinese, Japanese, and civilized Indians, 231. The number of insane males was 53,473, and of insane females 53,012. The total number of insane reported in 1880 was 91,959. The number of insane in each 100,000 of the population in 1890 was 387.0 for the foreign whites, 140.5 for the native whites, and 88.6 for the colored. In 1880 the corresponding figures were 398.8, 161.9, and 91.2.

The proportion of insanity was much greater among the whites than among the negroes, and very much greater among the foreign born than among the native born.

The number of insane in asylums in 1890 was 74,028—whites, 69,729; negroes, 4,299. The number of insane in asylums in each 1,000 of insane was: Whites, 699; negroes, 658.

The number of insane admitted to public institutions from 1881 to 1889, inclusive, was 190,458. The number admitted to private institutions in the same period, 13,833.

Reports from thirty States to the Committee on States of the National Conference of Charities and Correction showed 102,000 insane persons in 1896. At this rate the whole United States would have 145,000 insane.

**The Feeble-Minded.**—The total number of feeble-minded in the United States on June 1, 1890, was 95,609—whites, 84,997; negroes, 10,574; males, 52,962; females, 42,647; native-born whites, 75,910; foreign-born whites, 9,087.

**The Deaf and Dumb.**—The total number of deaf mutes in the United States on June 1, 1890, was 40,592—whites, 37,447; negroes, 3,115; others, 30; males, 22,429; females, 18,163; native-born whites, 33,278; foreign-born whites, 4,169.

The number of persons so deaf as to be unable to hear loud conversation on June 1, 1890, was 121,178, of whom 80,611 were able to speak. The latter were 49,278 males, 31,338 females, 77,308 whites, 3,308 negroes.

**The Blind.**—The total number of blind in the United States on June 1, 1890, was 50,568—whites, 43,351; negroes, 7,060; others, 157; males, 28,080; females, 22,488; native-born whites, 34,205; foreign-born whites, 9,146. The number of blind in one eye only was 93,988.

The number of insane persons in Great Britain and Ireland in 1896, according to Mulhall, was 128,896, or 32.8 per 100,000 population; Austria (1890), 51,880; Hungary (1890), 28,158. The number of insane in Germany in 1884 was 108,100; France, 93,900; Russia, 80,000.

## Statistics of Births.

THE Statesman's Year Book gives the following returns of births in 1900, in principal European countries. The birth registration, except in Germany, is not full. The census returns of the United States for 1900 have not yet been published.

| COUNTRIES.        | Total Number of Births. | Number of Illegitimate Births. | COUNTRIES.    | Total Number of Births. | Number of Illegitimate Births. |

In "Statistique Humaine de la France," M. J. Bertillon presents the following table, showing that the French are the least prolific and the Germans the most prolific people of Europe: Number of children born alive annually per 1,000 women of 15 to 50 years: France, 102; Ireland, 114; Belgium, 127; England, 133; Netherlands, 137; Spain, 141; Prussia, 150; Bavaria, 156.

(Revised to December 1, 1902.)

**Marriage Licenses.**—Required in all the States and Territories except Alaska, New Jersey (if residents, otherwise required), New Mexico, New York, and South Carolina.

**Marriage, Prohibition of.**—Marriages between whites and persons of negro descent are prohibited and punishable in Alabama, Arizona, Arkansas, California, Colorado, Delaware, Florida, Georgia, Idaho, Indiana, Indian Territory, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Nebraska, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia, and West Virginia.

Marriages between whites and Indians are void in Arizona, North Carolina, Oregon, and South Carolina.

Marriages between whites and Chinese are void in Arizona, California, Mississippi, Oregon, and Utah.

Marriage between first cousins is forbidden in Alaska, Arizona, Arkansas, Illinois, Indiana, Indian Territory, Kansas, Missouri, Nevada, New Hampshire, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Washington, and Wyoming, and in some of them is declared incestuous and void, and marriage with step-relatives is forbidden in all the States except Florida, Hawaiian Islands, Iowa, Kentucky, Minnesota, New York, Tennessee, Wisconsin.

Connecticut and Minnesota prohibit the marriage of an epileptic, imbecile, or feeble-minded woman under 45 years of age, or cohabitation by any male of this description with a woman under 45 years of age, and marriage of lunatics is void in the District of Columbia, Kentucky, Maine, Massachusetts, Nebraska; persons having sexual diseases in Michigan.

**Marriage, Age to Contract, Without Consent of Parents.**—In most of the States which have laws on this subject 21 years is the age for males; in California and Idaho, 18; in Tennessee, 16; and for females 21 years in Florida, Illinois, Iowa, Kentucky, Louisiana, Minnesota, Montana, Nebraska, North Carolina, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Virginia, West Virginia, Wisconsin, and Wyoming, and 18 in all the other States having laws, except District of Columbia, Idaho, Maryland, and Tennessee, in which it is 16 years, and California 15.

**Marriages, Voidable.**—Marriages are voidable in nearly all the States when contracted under the age of consent to cohabit, through fraud, or if one of the parties is suffering from insanity.

**Divorce, Previous Residence Required.**—*Six months* in Idaho, Nebraska, Nevada, South Dakota, and Texas; *one year* in Alabama, Alaska, Arizona, Arkansas, California, Colorado, Georgia, Illinois, Indian Territory, Iowa, Kansas, Kentucky, Maine, Michigan, Minnesota, Mississippi, Missouri, Montana, New Hampshire, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming; *two years* in District of Columbia, Florida, Indiana, Maryland, North Carolina, and Tennessee; *three years* in Alaska, Connecticut, New Jersey, and Massachusetts (if when married both parties were residents; otherwise five years); no statutory provision in Delaware and Louisiana.

**Divorce, Absolute, Causes for.**—The violation of the marriage vow is cause for absolute divorce in all the States and Territories, except South Carolina, which has no divorce laws.

The living of husband and wife at the time of the second marriage is a cause in most States, and physical incapacity in all the States except California, Connecticut, Idaho, Iowa, Louisiana, New Jersey, New York, South Carolina, South Dakota, and Vermont. In most of these States it renders marriage voidable.

Failure by the husband to provide, one year in California, Colorado, Idaho, Montana, Nevada, North Dakota, and Wyoming; two years in Arizona, Indiana, and Nebraska; three years in Delaware and New Hampshire; no time specified in Maine, Massachusetts, Michigan, Nebraska, New Mexico, Rhode Island, Utah, Vermont, and Washington.

Fraud and fraudulent contract, in Connecticut, Delaware, Georgia, Kansas, Kentucky, Ohio, Oklahoma, Pennsylvania, Vermont, and Washington.

Absence without being heard from, three years in New Hampshire and Ohio; seven years in Connecticut and Vermont; voluntary separation, five years, in Wisconsin. When reasonably presumed dead by the court, in Rhode Island.

"Ungovernable temper," in Kentucky; "habitual indulgence in violent and ungovernable temper," in Florida; "cruel treatment, outrages, or excesses as to render their living together insupportable," in Arkansas, Kentucky, Louisiana, Missouri, and Texas; "indignities as render life burdensome," in Missouri, Oregon, Pennsylvania, Washington, and Wyoming; attempt to murder the other party, in Illinois, Louisiana, and Tennessee; "pregnancy at the time of marriage without husband's knowledge or agency," in Alabama, Arizona, Georgia, Kansas, Kentucky, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, Tennessee, Virginia, West Virginia, and Wyoming.

Insanity or idiocy at time of marriage, in Colorado, District of Columbia, Georgia, Mississippi, and Virginia; insanity lasting ten years, in Washington; incurable insanity and two years' confinement in an asylum, in North Dakota; in Florida, four years; insanity and six years' confinement in an asylum, on six years' residence, in Idaho; permanent insanity in the Indian Territory.

Other causes in different States are as follows: "Commission of the crime against nature," in Alabama; "husband notoriously immoral before marriage, unknown to wife," in West Virginia; "fugitive from justice," in Louisiana, North Carolina, and Virginia; "gross misbehavior or wickedness," in Rhode Island; "any gross neglect of duty," in Kansas, Ohio, and Oklahoma;

## MARRIAGE AND DIVORCE LAWS—Continued.

"refusal of wife to remove into the State," in Tennessee; "joining any religious sect that believes marriage unlawful, and refusing to cohabit," in Kentucky and New Hampshire; "vagrancy of the husband," in Missouri and Wyoming; "refusal of wife to cohabit for twelve months," in North Carolina; "excesses," in Texas; "where wife by cruel and barbarous treatment renders condition of husband intolerable," in Pennsylvania; "carnal knowledge of wife before marriage," in Maryland; "concealment of sexual disease," in Kentucky; obtaining divorce in another State, in Michigan and Ohio; "conviction of a felony prior to marriage," in Arizona; "incurable Chinese leprosy," in Hawaiian Islands; "offering indignities, rendering conditions intolerable," in the Indian Territory; voluntary separation for five years, in Wisconsin.

In Georgia an absolute divorce is granted only after the concurrent verdict of two juries, at different terms of the court. In New York absolute divorce is granted for but one cause, adultery.

Collusion and connivance bar a divorce, also any condonation of a violation of the marriage vow.

## Acknowledgment of Deeds.

AN ACKNOWLEDGMENT is the act of declaring the execution of an instrument, but the word also denotes the official certificate of such declaration. All deeds and conveyances of land to be effectual as to third parties must be recorded upon previous proof or acknowledgment of their execution. Erasures and interlineations should be noted previous to the execution, or referred to in the certificate of the officer taking the acknowledgment. It is advisable to comply with the form of acknowledgment prescribed by the statutes of the various States.

WITHIN THE SEVERAL STATES acknowledgments may be taken in general before the following officers: Notaries Public and Justices of the Peace generally within their territorial jurisdiction, and in any place of the State usually before Judges and Clerks of the Supreme, Circuit, Probate, and County Courts, Judges of the United States Courts, Chancellors, Registers, Masters in Chancery, and Court Commissioners. County Surveyors, County Auditors, Registers of Deeds, Mayors, and Clerks of incorporated cities may take acknowledgments within their jurisdiction; besides the foregoing, in several States also the deputies of the enumerated officers, and in Connecticut, Commissioners of the School Fund; in Louisiana, Parish Recorders and their deputies; in Maine, women appointed by the Governor for that purpose; in Michigan, members of the Legislature; in Mississippi, members of County Board of Supervisors; in Nebraska, the Secretary of State; in New York, Recorders of cities and Commissioners of Deeds; in Pennsylvania, Mayors, Recorders, and Aldermen of Philadelphia, Pittsburgh, Allegheny, and Carbondale; in Rhode Island, State Senators; in Vermont, Registers of Probate; in West Virginia, Prothonotaries; in Wisconsin, Police Justices.

WITHOUT THE STATE AND WITHIN THE UNITED STATES, the following officers are authorized to take acknowledgment: Judges and Clerks of Courts of Record, Notaries Public, Commissioners appointed for that purpose by the Governors, and officers authorized to take acknowledgments within their respective States. Besides the foregoing, also, in Colorado, Secretaries of State; in Delaware, Mayors of cities; in Illinois, Justices of the Peace, Commissioners of Deeds, and Mayors of cities; in Kentucky, Secretaries of State; in Michigan and Wisconsin, Master in Chancery; in New Jersey, New York, North Carolina, Pennsylvania, and Rhode Island, Mayors and Chief Magistrates of cities.

WITHOUT THE UNITED STATES.—Judges of Courts of Record, Mayors or Chief Magistrates of cities, towns, boroughs, counties, Notaries Public, Diplomatic, Consular, or Commercial Agents of the United States resident and accredited in the country where the acknowledgment is taken.

The forms of DEEDS conveying land are prescribed by several States, and such forms should be generally used. The requisites of a valid deed are: 1. Competent parties. 2. Consideration. 3. The deed must be reduced to writing. 4. It must be duly executed and delivered. The mode and effect of an acknowledgment or of a deed is governed by the law of the State where the land lies, and not by that of the place where the acknowledgment is taken. Where the deed is executed by an attorney in fact, it is customary to have the power of attorney acknowledged by the principal and the deed acknowledged by the attorney. A deed executed by several grantors should be acknowledged by each of them.

SEALS or their equivalent (or whatever is intended as such) are necessary in Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Vermont, Virginia, West Virginia, Wisconsin, Wyoming.

FORMS are prescribed or indicated by the statutes of most of the States except Connecticut, Florida, Louisiana.

SEPARATE acknowledgment by wife is required in Arkansas, Delaware, District of Columbia, Florida, Georgia, Idaho, Kentucky, Louisiana, Montana, Nevada, New Jersey, North Carolina, Oregon, South Carolina, Tennessee, Texas.

ONE WITNESS to the execution of deeds is required in District of Columbia, Maine (customary), Maryland, Nebraska, New Jersey (usual), Oklahoma Territory, Wyoming.

TWO WITNESSES to the execution of deeds are required in Arkansas, Connecticut, Florida, Georgia, Louisiana, Michigan, Minnesota, New Hampshire, Ohio, Oregon, South Carolina, Texas, Vermont, Wisconsin.

## Wills.

A WILL OR TESTAMENT is a final disposition of a person's property to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the presence of the testator. The form of wording a will is immaterial as long as its intent is clear.

AGE at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Hawaiian Islands, Idaho, Montana, Nevada, North Dakota, Oklahoma Territory, South Dakota, Utah; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama,

## WILLS—Continued.

Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia any one over 14 years and in Louisiana any one over 16 years is competent to make a will.

In Colorado persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personality.

**WITNESSES.**—Most of the States require two witnesses, except in Connecticut (3), District of Columbia (3 or 4), Maine (3), Maryland and Massachusetts (3), Mississippi and New Hampshire (3), Rhode Island and South Carolina (3), Vermont (3).

## The Law of Inheritance.

WHO MAY ADMINISTER UPON ESTATES AND WHO MAY SUCCEED TO ESTATES IN THE VARIOUS STATES.

(Specially compiled for THE WORLD ALMANAC. Copyrighted.)

A PERSON'S property is distributed after his death either according to his will or, if he dies intestate, according to law, among his heirs and next of kin.

To be appointed an executor or administrator a person must, in most of the States, be of full age, never have been convicted of a felony, nor have been a habitual drunkard, and otherwise must be physically and mentally competent.

As a general rule aliens cannot be executors or administrators, except in very few States.

Non-residents cannot be executors or administrators in Alaska, Illinois, Kansas, Kentucky, Missouri, North Dakota, Oregon, Washington, and administrators in California, Colorado, Montana, North Carolina, Utah, and Wyoming.

In all States administrators have to file a bond, which is usually in double the amount of the personal property coming into their hands. As to executors, bonds seem to be required from them in Alabama, Alaska, California, Connecticut, District of Columbia, Illinois, Iowa, Maine, Maryland, Massachusetts, Michigan, Missouri, Nebraska, North Dakota, Ohio, Oklahoma Territory, Oregon, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, but even in these States they may be exempt from giving bond by a provision in the will waiving security.

Claims against the estates of decedents ought to be presented to executors or administrators. They must be verified and presented within a certain time after the executor or administrator qualifies, or after the first publication of notices to present claims. The periods for such presentation vary, and are as follows:

Three months in Connecticut and Minnesota. Six to eighteen months in Nebraska. Nine months in New Jersey. In North Dakota, Oklahoma, and South Dakota, six months if the estate is \$5,000, otherwise four months. Ten months in California, Montana, and Utah if the estate is over \$10,000; in Arizona if the estate is over \$5,000; in Idaho if the estate is over \$1,500, otherwise in all these last mentioned States four months. Six months in Alaska, Illinois, Kentucky, Maine, Maryland, New York, Oregon, Rhode Island, Vermont, Wisconsin, Wyoming. One year in Alabama, Colorado, Delaware, District of Columbia, Georgia, Indiana, Iowa, Massachusetts, Mississippi, Missouri, New Hampshire, New Mexico, North Carolina, Pennsylvania, South Carolina, Texas, Washington, West Virginia. Eighteen months in Michigan. Two years in Arkansas, Florida, Ohio, Tennessee. Three years in Kansas. No statutory time in Virginia.

## ADMINISTRATION OF PERSONAL PROPERTY.

Relatives and next of kin are entitled to letters of administration in the order below indicated. The order is generally determined by their right to share in the estate, which right varies greatly in the different States, but is generally similar to the right of descent (next page).

In most States males are preferred to females, the whole blood to the half blood, and unmarried to married women. In most of the States a public administrator has a right after the creditors to letters of administration. The order as to persons who may administer is as follows, according to law, in the several States:

**ALABAMA**—Husband or widow, next of kin, largest resident creditor, person appointed by court.

**ALASKA**—Widow or next of kin, or both, a principal creditor, person selected by court; same rule in Oregon.

**ARIZONA**—Husband or wife, children, father or mother, brother, sister, grandchildren, next of kin, creditor, any competent person.

**ARKANSAS**—Husband or wife or next of kin, creditor, person appointed by court.

**CALIFORNIA**—Husband or wife, or person requested to be appointed, children, father, mother, brother, sister, grandchildren, next of kin, public administrator, creditor, any competent person; with the exception of the public administrator, same rule applies in North Dakota and Oklahoma Territory.

**COLORADO**—Same as in Arkansas.

**CONNECTICUT**—Husband, wife, or next of kin, or both, person appointed by court.

**DELAWARE**—Next of kin, creditor, any suitable person.

**DISTRICT OF COLUMBIA**—Husband or wife, next of kin, creditor.

**FLORIDA**—Husband or wife, next of kin, creditor, any suitable person, or sheriff.

**GEORGIA**—Husband or wife, next of kin, principal creditor.

**IDAHO**—Husband or wife, children, parents, brothers, sisters, grandchildren, next of kin, public administrator, creditor, any competent person.

**ILLINOIS**—Husband or wife, next of kin, cred-

itor, person appointed by court; in case of non-resident, public administrator.

**INDIAN TERRITORY**—Same as in Arkansas.

**INDIANA**—Husband or wife, next of kin, largest creditor, person appointed by court.

**IOWA**—Same as in Arkansas.

**KANSAS**—Husband, wife, or next of kin, or both, principal creditor, any proper person.

**KENTUCKY**—Same as in Arkansas.

**LOUISIANA**—Beneficiary heir, his tutor (guardian) or attorney in fact, creditor.

**MAINE**—Husband or wife, next of kin, or husband of the daughter of deceased, person appointed by court.

**MARYLAND**—Husband, wife, child, grandchild, father, brothers and sisters, mother, next of kin.

**MASSACHUSETTS**—Husband, widow, or next of kin, or both, or person designated by them, public administrator, principal creditor, person appointed by court.

**MICHIGAN**—Widow, or next of kin, or both, or person designated by them, principal creditor, or person appointed by court.

**MINNESOTA**—Widow, husband, or next of kin, or both, or persons designated by them, to Consul if foreigners, principal creditor, any suitable person.

**MISSISSIPPI**—Husband, wife, children, grandchildren, brothers or sisters, nephews or nieces, father, mother, next of kin, creditor, or suitable person.

**MISSOURI**—Husband or wife, next of kin.

WYOMING—Husband or wife, or person designated by them, children, father, mother, brothers, sisters, grandchildren, next of kin, creditor, any competent person.

## SUCCESSION TO ESTATES IN ABSENCE OF WILL.

Real property subject to the dower or courtesy rights of or special privileges granted to a surviving consort descends to the descendants in all States, except that

A.—In Florida, Georgia, and Mississippi a surviving husband or wife receives a child's share.

B.—In Maine, South Carolina, Vermont, and Texas one-third goes to surviving consort, two-thirds to descendants.

C.—In California, Idaho, Montana, Nevada, North Dakota, Oklahoma Territory, and Washington a surviving consort and one descendant divide the estate equally; or if there be more than one descendant, the consort receives one-third, the descendants two-thirds.

D.—In Colorado, Kansas, Utah, and Wyoming one-half goes to descendants and one-half to consort.

These rules do not apply to the succession to personal estate, although in many States the rules of succession to the two classes of property do not greatly differ.

## GROUP A.

Of those States in Group A, as above, if there are no descendants or surviving consort the property goes

In Florida to the father; if none, to the mother, brothers, and sisters; if none, one-half to the paternal ancestors and one-half to the maternal ancestors; or in default of either branch, all to the surviving branch; if none, to the kin of consort.

In Georgia to the father, or if dead, to the mother, brothers, and sisters; if none, to the cousins, uncles, and aunts; in default of these, to the next of kin.

In Mississippi to the brothers and sisters; if none, to the parents or the survivors; in default of these, to the next of kin.

## GROUP B.

Of those States in Group B, if there are no descendants the property descends

In Maine and South Carolina one-half to surviving consort; and in the former one-half to the parents or the survivor; in the latter one-quarter to parents or survivor, and one-quarter to brothers and sisters, or if none, one-half to parents or survivor, or if parents dead in both States, one-half to brothers and sisters. In the former, in absence of brothers or sisters or parents, one-half to next of kin, or if no next of kin, consort takes all. In the latter, in absence of brothers and sisters, one-half ascends to lineal ancestors; or if none, one-third goes to next of kin and two-thirds to consort; or if no next of kin, consort takes all.

In Vermont consort takes entire estate up to \$2,000 and one-half excess, one-half excess going to parents or survivor; or if no consort or parents, estate descends to brothers and sisters; then to next of kin.

In Texas consort takes one-half and one-half to parents; or if either dead, one-quarter to the survivor and one-quarter to brother and sister; or if none, one-half to parents or survivor and one-half to brothers and sisters; or if none, all to parents; or if no parents, all to brothers and sisters; or if none, one-half to paternal ancestors and one-half to maternal ancestors; or in default of either, all to the surviving heir.

## GROUP C.

Of those States in Group C, if there are no descendants

In California, Idaho, Montana, and Washington one-half goes to the consort; remaining half to parents or the survivor of them; if no parents, one-half goes to brothers or sisters, or if none, consort takes entire estate. If no descendants or consort, parents or survivor of them takes entire estate; or if none, all to brothers and sisters; or if none, to next of kin.

In Nevada and Oklahoma Territory one-half goes to the consort, remaining half to the father; or if dead, to the mother in the former; to the mother, brothers, and sisters in the latter; if none of these, the consort takes entire estate in both. If no descendants or consort entire estate goes to father. In Nevada if no father, to the mother; or if dead, to the brothers and sisters; or if none, to the next of kin. In Oklahoma Territory if no father, to the mother, brothers, and sisters; or if none, to the next of kin.

In North Dakota consort takes entire estate up to \$5,000 and one-half excess; one-half excess goes to father; or if dead, to the mother, and if dead, consort takes all. In absence of descendants or

THE LAW OF INHERITANCE—Continued.

consort, father takes entire estate, or if dead, it goes to the mother; or if dead, to brothers and sisters; or if none of these, to the next of kin.

GROUP D.

Of those States in Group D, if there are no descendants

In Colorado the consort takes entire estate; if none, the father; if none, the mother; if none, the brothers and sisters; if none, the lineal grandparents, uncles, and aunts; if none, nearest lineal ancestor.

In Kansas the consort takes entire estate; if none, the parents or the survivor; if none, the heirs of the parents.

In Utah consort takes entire estate up to \$5,000 and one-half excess; one-half excess goes to parents or the survivor; or if none, to brothers and sisters; or if none, consort takes entire estate. If no descendants and consort, parents, or the survivor, take estate; or if none, brothers and sisters; if none, to next of kin.

In Wyoming three-quarters of the estate goes to the consort and one-quarter to the parents or survivor; if no parents, all to consort; or if no consort, all to parents.

OTHER STATES.

Of those States not mentioned above, if there are no descendants

No descendants, to father. In Arkansas, Indian Territory, Nebraska, New Hampshire, New York, Rhode Island, Virginia, West Virginia the father takes entire estate. If no father in Arkansas and Indian Territory, it goes to the mother; or if none, to brothers and sisters; or if none, to lineal grandparents, uncles, and aunts. If no father in Nebraska and New Hampshire, it goes to mother, brothers, and sisters; or if none, to the next of kin. If no father in Rhode Island, Virginia, and West Virginia, estate goes to mother, brothers, and sisters; if none, one-half to paternal kindred and one-half to maternal kindred, or all to the survivor if none of one branch; and in the two last States, if none, to the husband or wife. If no father in New York, estate goes to mother for life, reversion to brothers and sisters; or if none, to mother; if no mother, or brothers and sisters, to paternal uncles and aunts; or if none, to maternal uncles and aunts; or if none, more remote collateral relatives.

If there are no descendants

No descendants, to parents or the survivors. In Connecticut, Kentucky, and Massachusetts the entire estate goes to the parents or the survivor; or if none, to the brothers and sisters. In Connecticut and Massachusetts, if no brothers or sisters, to the next of kin. In Kentucky, if there are no brothers or sisters, one-half estate goes to lineal paternal ancestors, or uncles or aunts, and one-half to lineal maternal ancestors, or uncles or aunts; or in default of either, all to the other; in default of both, to the consort; or if none, to his or her heirs; or if none, consort's brothers and sisters.

If there are no descendants

No descendants, to parents; or if either dead, his or her share transferred. In Alabama estate goes to the parents; or if either dead, one-half to survivor and one-half to brothers and sisters; or if none, all to surviving parent. If no parents, all to brothers and sisters; if none, to next of kin; or if none, to consort.

In Louisiana one-half to parents or survivor, and one-half to brothers and sisters; or if none, all to parents; if no parents, all to brothers and sisters; if none, to lineal ascendants; or if none, to collateral relatives.

In Iowa one-half to parents and one-half to consort; if none, all to parents; if no parents, all to wife; if none, to heirs of parents.

If there are no descendants

No descendants, to brothers and sisters. In Delaware, District of Columbia, Maryland, New Jersey, Pennsylvania, and Tennessee estate goes to brothers and sisters; if none in all but last three, to father; or if none, to mother; or if none in Delaware, to next of kin; if none in District of Columbia and Maryland, to grandfather on paternal side; if none, to grandfather on maternal side; if none, to husband or wife.

In New Jersey if no brothers or sisters, to father; if none, to mother for life, and reversion to brothers and sisters of half blood; if none, to next of kin; if none, to consort.

In Tennessee if no brothers or sisters, to parents; if none, to heirs of parents; if none, to consort.

In Pennsylvania to brothers and sisters, subject to life estate of parents; then to next of kin; if none, to consort.

If there are no descendants

No descendants, to wife. In Alaska, Minnesota, Oregon, Ohio, and Wisconsin estate goes to consort; if no father in first three States, to mother, brothers and sisters; or if none, to next of kin.

In Ohio if no consort, to brothers and sisters; if none, to ancestor from whom estate came; if none, brothers and sisters of half blood; if none, to next of kin.

In Wisconsin if no consort, to parents or survivor; if none, to brothers and sisters; if none, to next of kin.

If there are no descendants

No descendants, to consort and parents. In Michigan one-half estate goes to consort, and one-half to parents or the survivor of them; or if no parents, one-half to brothers and sisters; or if none, all to consort; if no consort, all to parents; if none, to brothers and sisters; if none, to next of kin.

If there are no descendants

No descendants, to parents, and brothers and sisters. In Illinois and Missouri estate goes to parents and brothers and sisters; if one parent dead, one-half to the surviving one. In Illinois, if no parents, one-half to consort; if none, all to brothers and sisters. In Missouri, if no brothers or sisters, and parents, all to consort; if none, to grandparents, uncles and aunts. In Illinois, if no consort, parents, brothers or sisters, to next of kin.

In North Carolina, if no descendants, to collateral relatives of blood of first purchaser; if none, to collateral relatives; if none, to father; if none, to mother.

In all States, if none of above are alive, the property escheats to the State. Indiana and New Mexico are not included in above table. Their laws of descent are extremely complicated and impossible to condense.

In many States—Arkansas, Indian Territory, Connecticut, District of Columbia, Kentucky, Maryland, New Jersey, New York, and Rhode Island—if estate was inherited in certain instances, persons of blood from whom estate came are preferred to the exclusion of others.

## Game Laws of New York State.

*Synopsis of Game Laws revised to January 1, 1903. Changes are liable to occur.*

**Deer.**—Open season in Kings, Queens, Nassau, and Suffolk Counties and Long Island Sound first two Wednesdays and the first two Fridays after first Tuesday in November; elsewhere from September 1 to November 15; but absolutely prohibited in Ulster, Greene, Delaware, and Putnam Counties prior to year 1907. Open season in Sullivan County November 1 to 15 inclusive. Wild deer or venison shall not be possessed or sold from November 21 to August 31, both inclusive. Only two can be taken or transported by anybody each season. Fawns in the spotted or red coat must not be killed or caught. No traps, salt licks, or other devices shall be used. No jacklight or other artificial light shall be used. Dogs must not be used for hounding purposes, nor be permitted to run at large in forests where deer inhabit, by owner or persons having charge of same. This prohibition as to dogs does not apply to Long Island. Dogs while chasing deer in violation of law may be killed by any person. Deer shall not be taken by crusting (so called), or while they are yarded. Only one carcass may be transported from county where killed, when accompanied by the owner.

**Moose, Elk, Caribou, and Antelope.**—No open season, but they may be brought into the State for breeding purposes.

**Beaver.**—No open season.

**Black and Gray Squirrels** shall not be killed, except from September 16 to December 15 inclusive, but in Greene County the close season shall be from December 16 to September 30, and in Rensselaer County from December 1 to September 30, both inclusive; on Long Island and Long Island Sound, open season from November 1 to December 31 inclusive.

**Hares and Rabbits.**—Shall not be killed, nor (except in that portion of Long Island which is embraced in the City of New York) shall they be possessed in Long Island and Long Island Sound, except from November 1 to December 31, both inclusive. Use of ferrets is prohibited. In counties of Livingston, Wyoming, Erie, Orange, Schoharie, Monroe, Orleans, Steuben, Albany, Ulster, Dutchess and Columbia, hares and rabbits shall not be killed except from September 1 to December 15. In Richmond and Rockland Counties, open season November 1 to December 30, both inclusive; in Oneida and Sullivan Counties, open season September 16 to February 14, both inclusive; in Greene County from October 1 to December 15, and in Fulton County from November 1 to January 31. The owner of any inclosed or occupied farm lands may, of himself or by any member of his household, kill rabbits and English hares on his own premises at any time.

**Web-footed Wild Fowl.**—Open season is from September 1 to April 29. (Open season in Kings, Queens, Nassau, and Suffolk Counties and Long Island Sound from October 1 to April 30.) Must not be taken in Jefferson County from February 1 to August 31. Must not be fired at from a boat propelled otherwise than by hand, or from any bough house or floating device used to conceal the hunter if more than 50 feet from shore, or a natural growth of grass or flags. Must not be taken save with gun raised at arm's length, and fired from the shoulder without other rest. Floating devices may be used in Long Island Sound, Shinnecock, Gardiner, and Peconic Bays, and, except from September 30 to October 19, both inclusive, in Great South Bay, west of Smith's Point. Sailboats may be used in Long Island Sound, Gardiner and Peconic Bays. Hours limited between sunrise and sunset.

**Quail.**—Open season from November 1 to December 15. Must not be taken on Long Island from January 1 to October 31, both inclusive.

**Partridge or Grouse and Woodcock.**—Open season for grouse in Long Island and Long Island Sound from November 1 to December 31; elsewhere, September 16 to November 30; open season for woodcock, August 1 to December 31. Such birds shall not be possessed in their close season except in the City of New York, where they may be possessed during the open season in the State at large. Open season for woodcock in Rensselaer County from October 1 to November 30. Open season elsewhere from September 16 to November 30; in Ulster and Greene Counties from October 1 to December 15. Not more than thirty-six of above-named birds to be taken by any person in any open season. Grouse must not be taken in Ulster, Greene, and Sullivan Counties from December 16 to September 30, both inclusive. No open season in Westchester County prior to 1905. Cannot be sold or possessed during the close season, except in December. Transportation (not more than twelve at any one time) allowed only when with owner.

**English Snipe, Plover, Rail, Bay Snipe, or Shore Bird.**—Must not be killed or possessed during May, June, July, and August. Open season in Long Island and Long Island Sound July 1 to December 31.

**Meadow Hens.**—Meadow hens, mud hens, gallinule or water chicken, or grebe shall not be killed or possessed from December 31 to August 15 in Long Island and Long Island Sound.

**Wild Birds.**—Must never be killed, caught, or possessed, living or dead, nor nests robbed or needlessly destroyed, except English sparrow, crane, hawk, crow, crow-blackbird, snow owl, and great horned owl. No part of the plumage, skin, or body of any bird protected by this section shall be sold or had in possession for sale.

**Mongolian Pheasant.**—No open season prior to 1905. This prohibition does not apply to Suffolk County, where they may be killed from November 1 to December 31.

**Mink, Skunk, Muskrat, and Fox.**—The close season for mink, skunk, and muskrat in the counties of Cattaraugus, Chautauqua, Oneida, Madison, Otsego, Wayne, Cayuga, Livingston, Jefferson, Chemung, Chenango, Genesee, and Wyoming shall be from May 1 to October 31, both inclusive. Muskrat houses shall not be injured or destroyed at any time. The close season for foxes in said counties, except Cayuga, shall be from May 1 to September 30, both inclusive. Does not apply to the acts of an owner or possessor of lands thereon, or to the territory of a city or incorporated village.

The road racing of rapid automobiles which made the year 1901 memorable, and the still further capabilities of the motor as a means of road locomotion, led to so general an adoption of restrictive ordinances that the organizations having the automobile interests in charge found it more desirable to restrict its contests in 1902 to tests of endurance and reliability, rather than the exhibition of speed on the highways.

The records of 1901 are still, however, of historical interest: The distance from New Haven to New York, 82 miles, was covered in 3h. 10m.; Newport and Boston, 70 miles, in 4h. 18m.; New York and Boston, 225 miles, in 15h. 11m., and Toledo, O., and New York, 825 miles, in 16 1/2 days.

| New York   | 302,875 | Brooklyn         | 199,863   |
| Chicago    | 263,700 | Boston           | 116,960   |
| Pittsburgh | 243,826 | Philadelphia     | 112,066   |
| St. Louis  | 226,417 | Total            | 1,683,012 |
| Cincinnati | 217,300 | Attendance, 1901 | 1,920,031 |

From the above table it will be seen that the American League this year reversed the 1901 results and outdrew the National League by 523,445 on the whole season—a result not so surprising considering the wonderful race of the American League and the professional character of the National League race.

The less important leagues of the National Association Leagues are the New York League, consisting of the clubs at Albany, Binghamton, Iliou, Schenectady, Syracuse, Johnstown, Troy, and Utica; the New England League, of clubs at Concord, Dover, Manchester, and Nashua, N. H.; Haverhill, Fall River, Lowell, and Lawrence, Mass.

The independent leagues in the American Association are clubs at Columbus, O.; Indianapolis, Ind.; Kansas City, Mo.; Louisville, Ky.; Milwaukee, Wis.; Minneapolis, Minn.; St. Paul, Minn., and Toledo, O.

THE COLLEGE CHAMPIONSHIPS.

There is no intercollegiate championship in any proper sense of the word. Each college plays a number of games in the early part of the season, mostly with weaker colleges, using the process for tuning up their teams for later matches with rivals nearer their calibre. No figures, therefore, of games won and lost give such a measure of the teams' relative values as those of organized and permanent leagues do in other games. The principal eastern teams were Yale, Princeton, Harvard, and the University of Pennsylvania. Of their most notable matches with various college opponents, Princeton won 10 and lost 3; Harvard won 9, lost 2; Yale won 11, lost 4; University of Pennsylvania won 6, lost 4.

The most notable event of the college season was the appearance in the East of a Western team representing the University of Illinois, which beat the University of Pennsylvania 11-3, West Point 6-5, Yale 10-4, Princeton 3-1, and lost to Harvard 1-2.

## Trap-Shooting.

THERE were no international American-European trap-shooting events in 1902.

The Grand Prix de Casino, the next nearest to an international event, being the world's championship at live birds, was shot for January 30 and 31 and February 1, at Monte Carlo, and was won by Signor J. Grasselli, after a three days' contest, by 12 straight in the finals.

The tenth Grand American Handicap at live birds was shot for between 456 competitors, at Kansas City, March 31 to April 5. When the contestants had been reduced to thirty-three, who had shot straight twenty-fives, the shooting was "miss and go out." The championship was won in the twenty-second round of the miss and go out series by H. C. Hirschy, of Minneapolis; C. G. Spencer was second, and E. O. Heikes third.

The Grand American Handicap at targets (clay birds) was shot from May 6 to 9, at Interstate Park, Long Island, and won by C. W. Floyd, with 94 hits out of a possible 100.

The Nebraska State Individual Championship was won at Omaha, April 24, by D. T. Morrill, after two ties, with a score of 24 out of a possible 25.

The thirteenth Kansas State Championship was won at Olathe on a tie on April 13, by G. Templin and H. E. Cawley, with scores of 27 out of a possible 30.

The Boston Gun Club single championship was won on the Wellington grounds April 30 by "Leroy" (B. Leroy Woodward), with a score of 25 straight.

The New Jersey State individual championship was won at the Freehold Gun Club grounds, May 20 to 22, by Neal Apgar, with a score of 46 out of a possible 50.

At the twenty-eighth Illinois State tournament, June 3 to 6, the L. C. Smith cup was won, for the second time, by Harvey Sconce, with a score of 25 straight.

The intercollegiate trap-shooting championship at 30 clay targets, in sets of 5 released at unknown angles, was contested May 3, resulting as follows: Harvard, first, with 210 points; Yale, second, 195; Princeton, third, 178; and University of Pennsylvania, fourth, 154.

INTERCOLLEGIATE MATCHES.

The Intercollegiate championship for 1902 was won by Yale, whose four players won 7½ games and lost 4½; Columbia finished second, with 6½ games won and 5½ lost; Harvard third, 5½ won and 6½ lost, and Princeton fourth, with 4½ won and 7½ lost.

Brown failed to send any representative to the annual tournament of the Triangular Chess League, and Cornell and University of Pennsylvania played it out alone. Cornell won by 4½ games to 1½. Columbia afterward beat Cornell by 8 games to 4; Williams also beat Amherst by 4½ to 3½; Columbia beat Princeton by 6½ to 2½. The annual match between Oxford and Cambridge resulted in a draw, each side winning 3½ games.

## Golf.

THE amateur championship (United States Golf Association) was played over the course of the Glenview Golf Club, Chicago, Ill., July 15 to 19, 1902. There were 160 entries, as compared with 143 in 1901, and 137 started for the qualifying round at medal play, once round the eighteen holes. The course was 6,266 yards long. Longer by 387 yards than the Atlantic City course over which the championship of 1901 was played.

The following summary embraces the whole contest, in which the championship was won by Louis Napoleon James, of the Glenview Club, Chicago:

James, 4 up, 2 to play.

An entire revolution in the method of playing the championship games was effected at the annual meeting of the United States Golf Association, February 27, 1902, when it was enacted "IV. That the manner of conducting the amateur championship be altered. That the qualifying round (hitherto thirty-six holes) be confined to eighteen holes, with sixty-four to qualify (hitherto thirty-two), and the match play rounds be at eighteen holes, except the final, which shall be at thirty-six holes (hitherto every match-round had been at thirty-six holes)."

The method of pairing was also altered. Hitherto it had been the result of draws, ostensibly entirely chance, but in practice slightly controlled or salted, so that the best players were not likely to meet each other until the last two days. The new substitute for old Section XIV. of the by-laws enacts that "The pairing for the preliminary round at match play shall be determined as follows: The

first sixty-four players shall be ranked in accordance with the scores made by them in the medal-play round—equal scores to be numbered as they stand on the score-sheet. Player No. 1 shall be paired with player No. 33 and shall constitute pair No. 1. Player No. 2 shall be paired with player No. 34, and shall constitute pair No. 2. Odd numbered players shall be placed in the first half and even numbered players in the second half. According to this method, pair No. 1 shall be placed at the head of the first half; pair No. 2 shall be placed at the head of the second half; pair No. 3 at the foot of the first half; and pair No. 4 at the foot of the second half; and so on, alternately. Winners to play winners.

The open (professional) championship for 1902, held under the auspices of the U. S. G. A., was contested over the Garden City links, Long Island, October 10 and 11. There were 96 entries, of which 16 were amateurs. Lawrence Auchterlonie, the professional of Glen View, Chicago, won, making the four rounds of 18 holes each in 307 strokes. [The championship of 1901, over the Myopia (Mass.) links, required 331 strokes.] Second place was a tie between W. J. Travis (amateur) and Stewart Gardner (professional), both playing on their home club links the four rounds in 313. The scores of the leading players follow:

In the play-off of the tie, Clearwater beat Weston.

Grant Eby, of Springfield, Mass., challenged W. H. Clearwater, the champion, and the two met in a three nights' match for the title in Brooklyn, May 8, 9, and 10. Eby won the championship by a score of 600 to 448.

## Polo.

The extension of polo in 1902 was remarkable. Among the principal contests were those played at Hurlingham, England, for the International Polo Challenge Cup, which was won in America by an English team in 1876. The award was to follow the best two matches out of three. The American four players, in the first and second matches, consisted of Messrs. R. L. Agassiz, John E. Cowdin, Foxhall Keene, and Lawrence Waterbury. In the third match James M. Waterbury, Jr., replaced Mr. Cowdin. The English team in the first match consisted of Messrs. Cecil Nickalls, Charles D. Miller, Walter F. Buckmaster, and Frank Freake. In the second match Patterson Nickalls played instead of Freake and in the third George Miller. The Americans won the first match 2 goals to 1. The English team won the second by 6 goals to 1, and the third by 7 goals to 1.

In the eighth annual Senior American Championship for the Astor Cup played at Saratoga, Lakewood beat Bryn Mawr in the finals 5½ to 3¾ goals. The Lakewood team consisted of F. H. A. Lyle, J. E. Cowdin, J. M. Waterbury, Jr., and Lawrence Waterbury.

The previous senior champions were in 1895, Myopia; in 1896, Rockaway; in 1897, Meadow Brook; in 1898, Meadow Brook; in 1899, Westchester; in 1900, Dedham; in 1901, Lakewood.

For the Junior Championship Cup, Rockaway beat Westchester in the finals 12½ to 9 goals, having previously beaten Lakewood. The Rockaway team consisted of A. Alexander, R. La Montagne, F. S. Conover, and P. F. Collier.

Minor series of games and cup contests were played:

April 28 to May 10, at the Lakewood Polo Club.

May 15 to May 31, at the Country Club of Westchester.

May 15 to May 31, at the Meadow Brook Hunt Club.

June 2 to June 7, at the Devon Club of Pennsylvania.

## Lawn Tennis.

### NATIONAL CHAMPIONSHIPS FOR 1902.

The annual championship tournament of the United States National Lawn Tennis Association was held as usual at the Casino, Newport, R. I., August 19 to 27, 1902.

All three of the visiting British players were entered for the singles, but Dr. J. Pim was beaten in the fourth round by L. E. Ware.

The two Doherty brothers came together in the semi-final round, and H. L. Doherty defaulted to his older brother. R. F. Doherty then met M. D. Whitman in the final round and won 't all-comers', beating the former American champion by 6-1, 3-6, 6-4, 6-0. In he challenger round, R. F. Doherty met W. A. Larned, last year's champion, and was beaten by 4-6, 6-2, 6-4, 8-6.

The championship in doubles was divided as usual into two sectional tournaments, the Eastern championship being held at Boston, July 28 and following days, and the Western championship at Chicago, July 14 and following days. At Boston, R. F. Doherty and H. L. Doherty won the Eastern title, beating R. D. Wrenn and G. L. Wrenn, Jr., in the finals by 4-6, 7-5, 6-2, 6-2. The Western title was won by Krieh Collins and L. H. Waidner, who beat R. D. Little and F. B. Alexander in the final round by 6-1, 6-0, 6-2.

In the final round of doubles at Newport, the Doherty brothers beat Collins and Waidner by 2-6, 6-3, 4-6, 6-3, 6-3.

The English winners then challenged D. F. Davis and Holcombe Ward, last year's champions, and won the American championship from them by 11-9, 12-10, 6-4.

H. H. Whitman (representing the Harvard preparatory schools) won the national interscholastic championship at Newport, beating F. R. Smith (representing Columbia preparatory schools) by 6-1, 6-3, 6-1.

The championship tournament for women was held at Philadelphia, beginning June 24, 1902.

In the singles, Miss Marion Jones, of California, won the all-comers', beating Miss Carrie Neely, of Chicago, in the finals by 8-6, 6-4. She then challenged Miss Elizabeth H. Moore, of Brooklyn, last year's champion, and won the championship title from her by 6-1, 1-0 (defaulted). Miss Moore was taken sick on the court and could not finish the match. Miss Marion Jones and Miss Juliette P. Atkinson won the championship for women's doubles, and Miss Elizabeth H. Moore and Wylie C. Grant won the championship for mixed doubles.

The national indoor championship tournament was held in the Seventh Regiment Armory, New York, during the week of February 19, 1902. The championship in singles was won by J. Parny Fort, of New York, who beat Wylie C. Grant, of New York, in the finals by 4-6, 9-7, 1-6, 8-6, 6-4. W. C. Grant and Robert Le Roy won the championship in doubles.

### INTERNATIONAL MATCHES.

## Rifle and Revolver Shooting.

## PAST INTERNATIONAL RIFLE MATCHES.

THE National Rifle Association of America was formed in the year 1873. In the following year, 1874, the Irish team, which had won the Elcho Shield at the National Rifle Association of Great Britain's meet at Wimbledon, challenged America to a competition. This was accepted by the Amateur Rifle Club, a subsidiary organization to the National Rifle Association. The Irish team was beaten on the last shot by a bull's-eye fired by "Old Reliable" Col John Bodine. The distances fired over were 800, 900, and 1,000 yards. The total scores were respectively America 931, Ireland 930.

Next year (1875) at the National Rifle Association of America's meet, the American team won the Palma Trophy over teams from Ireland, Scotland, Canada, and Australia.

In 1877 another British team came over, and was beaten at Creedmore by an aggregate score of 3,334 to 3,242.

In 1880 an American team shot in Ireland, and won by a score of 1,292 to 1,280.

International contests were in abeyance from 1880 to 1891, when another Irish team came over and won at Sea Girt by 1,620 to 1,558, fifteen shots being fired by each man at 800, 900, and 1,000 yards, rendering a score of 1,800 points possible.

Over the same range, September 5, 1901, the Centennial or Palma Trophy was won by a Canadian team, over a team of the United States, by 1,522 points against 1,491.

On September 13, 1902, a selected team of Americans contested for the cup again, on the Rockcliffe Rifle Range, Ottawa, Canada. The contest resulted: British team, 1,459; American team, 1,447; Canadian team, 1,373.

## THE THIRTEENTH AMERICAN RIFLE-SHOOTING CHAMPIONSHIPS FOR 1902.

The Hilton Trophy, donated by the late Judge Henry Hilton for interstate competition, and won in 1878, 1879, 1881, and 1891 by a New York team, and 1901 by Washington, D. C., was won by a team recruited from the various National Guard regiments of New York over those of New Jersey, by the following scores:

|                | 200 yds. | 500 yds. | 600 yds. | Total. |                  | 200 yds. | 500 yds. | 600 yds. | Total. |
|----------------|----------|----------|----------|--------|------------------|----------|----------|----------|--------|
| New York ..... | 362      | 397      | 379      | 1,138  | New Jersey ..... | 364      | 384      | 375      | 1,123  |

The Columbian Trophy at 200 and 500 yards was won by the team of the 2d Regiment of New Jersey, with a score of 257 points.

The Jersey National Guard match, at the same ranges, was won by the 1st Regiment, of Newark, with a score of 512 points.

The Inspector of Rifle Practice match was won by Major James E. Bell, Inspector-General, D. C., with the remarkable score of 96 out of a possible 100 points.

The Wimbledon Cup, thirty shots at 1,000 yards, for which there were 50 entries, was won by Corporal K. K. V. Casey, Company B, 71st Regiment, New York, with a score of 128—handicap for bullet of 18.

The Interstate Schuetzen team match at the German ring target at 200 yards, was won by the first team of New Jersey, with a total of 1,046 points.

The Carbine Team match of teams of 5 at 200 yards was won, over seven other teams, by Squadron A, of New York, with 208 points.

The Company match was won by Company A, Sixth Battalion of the District of Columbia, with a score of 312 points, against sixteen other squads.

The Regimental match went to the team representing the 4th New Jersey Regiment, with a score of 545 points, against twenty other teams.

The Soldier of Marathon Trophy and Interstate Military Championship, which go together, were won for the second consecutive time by the militiamen of New Jersey, with 1,074 points (8 more than they made in 1901), against, in the finals, teams from New York and District of Columbia.

The Tyros' match contest between fifteen teams of three, none of whom had been on victorious teams, each firing 5 shots at 200 and 500 yards, was won by Company C, 4th New Jersey, with 134 points.

The Skirmish team match, at silhouette targets, at 100, 200, 300, 400, and 500 yards, each squad containing six sharpshooters, and each man firing fifteen shots, was won by the team of Washington, D. C., over eight other teams, with 280 points.

The Leech Cup at 800, 900, and 1,000 yards, was won by Ordnance Sergt. F. Leushner, of the 74th New York Regiment, with 59 points, over forty-one competitors.

The Interclub match, or the team championship, 10 shots at 200 yards range, Standard American target, was won by the Cottage Rifle and Revolver Association, with a score of 342, over ten other competing teams.

The Individual Military championship, or President's match, was won over 44 competitors by George H. Cooke, of the 1st District of Columbia, by 189 out of a possible 210. Seven shots at 200, 300, 500, 600, 800, and 1,000 yards.

## AMERICAN REVOLVER AND PISTOL CHAMPIONSHIPS FOR 1902.

Scholes had defeated Titus in the Harlem Regatta in May, and had been defeated by Titus at Henley in the Diamond Sculls contest in July.

## The Oxford-Cambridge Boat Races.

THE first of these races was in 1829 over the present Henley course on the upper Thames. There were no more interuniversity contests until 1836. From that year till 1842 the races were rowed from Westminster Bridge, in London, up the river to Putney. Then there were two blank years, 1843-44. In 1845 the course from Putney Bridge to Mortlake was chosen, and is still retained. Since 1856 these races have been continuous, and in the whole series Oxford has won 33, Cambridge 25. The Putney-Mortlake course is 4 $\frac{1}{4}$  miles on a tidal river; but the race is so timed that it is always as near "dead water" during it, as can be.

## Fencing.

THE progress of fencing was marked in 1902 by, among other events, the re-establishment of the American Intercollegiate Fencing Association of Harvard, Yale, West Point, University of Pennsylvania, Naval Academy, Cornell, and Columbia.

The contests were numerous, the most important being the National Fencing Championships, in which the Duelling Sword Championship was won by Charles Tatham with 5 victories to 1 defeat; Fitzhugh Townsend second, 5 victories, 2 defeats; Wood third, 4 victories, 3 defeats.

The Sabre Championship by A. V. Z. Post; second, A. C. Bothner; third, J. L. Erving.

The Intercollegiate Championship of teams of three resulted in the following percentages: West Point, .741; Annapolis, .629; Columbia, .646; Cornell, .593; Harvard, .482; Yale, .288; University of Pennsylvania, .149.

In the Junior competition for foils Davis, of Cornell, won the gold medal; Cabot, of Boston A. C., the silver medal; Queneau, of Columbia, the bronze medal.

For the Newbold Morris Championship Columbia defeated Yale in the finals 5 bouts to 4.

The following matches took place during the season: Cornell beat Pennsylvania 8 bouts to 1; Harvard beat Yale 5 bouts to 4; Cornell beat Columbia 7 bouts to 2; Columbia beat Yale 5 bouts to 4; Yale beat Fencers' Club, of New York, 7 bouts to 2; Fencers' Club beat Naval Academy 9 bouts to 7.

A team of Annapolis girls defeated a women's team from the Fencers' Club, of New York, March 4.

The Fencers' Club Cup was won by the Fencers' Club, of New York, in a contest of three teams of three each, *i. e.*, one with sabre, one with foil, and one with duelling sword: Fencers' Club, 5 bouts; New York A. C., 3 bouts; Boston A. C., 1 bout.

**Three-Ball Straight Rail.**—Highest run on record, 1,531, on a 5x10 table, by Maurice Vignaux, at Paris, France, April 10-14, 1880, against George F. Slosson. Harvey McKenna, the celebrated rail player, in an exhibition game on a 5x10 table scored a run of 2,572, and an average of 416%, at Boston, Mass., December 21, 1887; and Jacob Schaefer, in a match game played at San Francisco, Cal., in 1890, scored a run of 3,000 points on a 4½x9 table. His average was 750. The best average at the three-ball straight-rail game, on a 5x10 table, is 333½, by Jacob Schaefer, at Central Music Hall, Chicago, May 15, 1879.

**Cushion Caroms.**—Highest run, 77, on a 5x10 table, by William Sexton, at Tammany Hall, New York, December 19, 1881, against Jacob Schaefer. Best tournament average, 10 in 200 points, on a 5x10 table, by Jacob Schaefer, at Chicago, November 10, 1887. Best match average, 4 7/6-106 in 500 points, on a 5x10 table, by George F. Slosson, at Chicago, April 4, 1887.

Frank C. Ives made a run of 85 in exhibition tournament play for an announced purse of money, Bumstead Hall, Boston, Mass. There was no award of prize money.

**Balk-Line Game.**—Highest run at 8-inch balk-line game, 329, on a 5x10 table; the highest average is 44 5/2-67; both by Maurice Vignaux, at Paris, January, 1884.

Highest run at 14-inch balk-line game, anchor nurse permitted, 566, by Jacob Schaefer, New York, December 16, 1893. At anchor nurse barred, Frank C. Ives made 359, at Chicago, December 6, 1894.

Jacob Schaefer made a run of 111 in exhibition tournament play at 18-inch balk-line game, with one carom permitted when object balls were within the balk-line or anchor-box space. Central Music Hall, Chicago, Ill., May 22, 1896.

With anchor nurse allowed, in tournament play, Jacob Schaefer made an average of 100 at 14-inch balk-line game, New York, December, 1893, and Frank C. Ives made an average of 100, Chicago, January, 1894. Ives made an average of 63 2-10 at anchor barred, New York, November 13, 1894.

Frank C. Ives made a single game average of 50 at 18-inch balk-line game, in exhibition tournament play, with but five caroms permitted when object balls were within the anchor-box space. Madison Square Garden Concert Hall, New York, April 2, 1896.

Frank C. Ives made a single game average of 19 21-24 at 18-inch balk-line game, with but one carom permitted when object balls were within any balk-line or anchor-box space, in exhibition tournament play. Central Music Hall, Chicago, Ill., May 21, 1896.

George Sutton made a run of 215 at 14-inch balk-line game, a record for players below the first grade (known as "short-stops"), Chicago, June, 1897. W. A. Spinks made an average of 40 at 14-inch balk-line game, a record for "short-stops," Pittsburgh, Pa., March, 1897.

The best amateur records for 14-inch balk-line made in competition are held by Wayman C. McCreery, of St. Louis, Mo. His highest run was 139, made in the Class A amateur championship tournament in New York, February, 1899, and his best single average (for 400 points) was 14 22-27, in the Class A championship tournament in New York, February, 1900.

The highest run at 14-inch balk-line made in competition by a Class B amateur was 97, by J. Byron Stark, of New York, in November, 1898, and the best single average was 11 3-27 (for 300 points), made by J. DeMun Smith, of St. Louis, Mo., in the Class B championship tournament, in New York, December, 1899.

**English Game.**—John Roberts, of London, England, holds the record for the highest run, 1,392, scored at English "spot-barred" billiards (the recognized game in England now), 1894. W. J. Peall, of London, England, holds the record for the highest run, 1,888, with "spot-stroke" permitted, scored in a match game, 1890; in an exhibition game he scored 3,304 at the same style of play.

## BILLIARD EVENTS IN 1901-02.

A tournament was held for the professional championship of the world at 18-inch balk-line, in New York, December, 1901, which included the leading American experts and Barutel, from Paris. The result was as follows:

| PLAYER.                | Won. | Lost. | High Run. | Best Average. | Grand Average. |
|------------------------|------|-------|-----------|---------------|----------------|
| Jacob Schaefer.....    | 5    | 0     | 68        | 12 16-32      | 8.89           |

| J. A. Hendrick, New York.....       | 1    | 5     | 34        | 7.84          | 4.62           |

In the play-off of the tie for first honors Norris beat Sigourney in a close game, and then challenged Wilson P. Foss, of Haverstraw, N. Y., the previous holder of the amateur championship. This challenge match for the title was played February 19, and was won by Foss by 500 to 464.

No new records were made in 1902 up to December 1.

## Yachting.

THERE were no international races for the America's Cup in 1902. A challenge was received by the New York Yacht Club, however, for another series of races for the America's Cup, to be sailed in 1903, and it was promptly accepted, October 16. The Royal Ulster Yacht Club, of Cork, Ireland, is the challenger, and the yacht to be sent will be named Shamrock III.; owner, Sir Thomas J. Lipton; water-line length, ninety feet, and with cutter rig. The dates selected are August 20, 22, 25, and following Thursdays, Saturdays, and Tuesdays, if necessary.

A series of races for the Canada Cup was arranged for last season, between the Royal Canadian Yacht Club, of Toronto (defender), and the Rochester Yacht Club (challenger), but this was postponed until summer of 1903 by mutual consent.

A series of international races for the Seawanhaka-Corinthian Yacht Club's International Challenge Cup for small yachts, which has been held by the Canadians since 1895, was sailed on Lake Saint Louis, off Montreal, August 7, 8, 9, and 11, 1902. The cup was defended by the Trident, and the Tecumseh represented the Bridgeport (Ct.) Yacht Club, the challengers. Four races were sailed, the first and third over a windward and leeward course, and the second and fourth over a triangular course, each of twelve miles distance.

The Trident won the first race by 14 minutes and 53 seconds; Tecumseh won the second by 1 minute and 22 seconds; Trident the third by 4 minutes and 11 seconds, and Trident the fourth by 5 minutes and 27 seconds. Result—Trident, the Canadian defender, won by three races to one for the Tecumseh.

A challenge for another series of races for the Seawanhaka-Corinthian International Cup for small yachts has already been accepted for season of 1903 by the Royal St. Lawrence Yacht Club, and the next challenger will represent the Manchester (Mass.) Yacht Club.

## FAMOUS TRANSATLANTIC RACES.

In 1851 the schooner America crossed the ocean in 21 days. In 1866 the schooners Henrietta, Fleetwing, and Vesta raced from Sandy Hook to the Needles, Isle of Wight, for stakes amounting to \$90,000. The Henrietta won in 13 days 21 hours 55 minutes, averaging 9½ knots for 3,106 miles. The Fleetwing sailed 3,005 miles and the Vesta 3,046 miles.

On July 4, 1890, the schooners Cambria and Dauntless raced from Old Kinsale Head, Ireland, to Sandy Hook. The Cambria won. She sailed 2,881 miles in 23 days 5 hours 17 minutes. The Dauntless sailed 2,783 miles in 25 days 7 hours.

The schooners Coronet and Dauntless sailed a match race for \$10,000 a side in 1887. The start was made off Bay Ridge on March 12, and the race ended at Queenstown. The Coronet won. She sailed 2,949 miles in 14 days 23 hours 30 minutes. The Dauntless sailed 2,947 miles in 16 days 1 hour 43 minutes.

## Curling.

ALTHOUGH curling as a pastime can be indulged in over several weeks each winter, the records of curling contests, which have to be played or not on certain dates, are very uncertain, depending on the continuance over a protracted period of uniform frost. In the tournament for the Gordon medal, which is practically emblematic of the American championship, the Utica team on February 9 scored 188 points, and the Thistle of Manhattan 51. "The Dawson Cup" was won at Van Cortlandt Park, on February 14, by Utica, with a score of 21 over the Empire City Rink 10. The Dalrymple medal was won by the South of Scotland over the North by 57 to 50.

## INTERCOLLEGIATE GAMES OF 1902.

IN the absence of any recognized Intercollegiate Football Association the championship cannot always be unerringly fixed; but in 1902 there is no difficulty in allotting the honor to Yale, inasmuch as she won every one of her games. Harvard came next, for she won all but one, and Princeton ranks third. After this point the ranking depends on other factors than the mere recital of the number of games won or lost. Such general averages as are deduced therefrom and decimal points of percentages are often misleading, for a technical defeat by a narrow margin is often a real victory for the loser; the respective general qualities of the two teams must be weighed in the balance.

The following statement in detail of the principal games played during the season beginning September 28, and ending November 30, affords the fairest basis for a judgment of the respective performances of the season of 1902:

| COLLEGE.           | Won.                                                                                                                                                     | Won.                                                                                                                                                  | Lost.                                                                                                                    |

## Boxing.

BOXING, popularly interpreted to-day, means an exhibition of skill in attack and defence with the gloved hand, in contradistinction to contests with the bare fists, which in most States are unlawful. Aforetime these contests were denominated as pugilism, or prize fights. The prize most desired, however, was, and is still, that of the honor of "the championship of the world," and this title has descended in an unbroken series of contests from the year 1719 until to-day, when it is held by James Jeffries as a result of his contest with Robert Fitzsimmons, at San Francisco, on July 25, 1902, whom he knocked out in the eighth round.

The line of champions begins in 1719 with the time-honored father of pugilism Figg, but may be better taken up in 1808 when Gulley, the grandfather of the present Speaker of the British House of Commons, won, but declined, the championship. After that a number of successes and defeats carried the title down to 1860, when it became international by the meeting of Tom Sayers, the British holder, with the American Heenan. Neither can be truly said to have conquered, for both did. After this fight Sayers left the belt, the championship of the world, open for competition. Jim Mace, of England, by a series of contests became entitled ultimately to meet F. Allen for that honor in America in 1870, and he beat him. James Smith next became the champion of England in 1885, and he was beaten by Jake Kilrain, of Boston, Mass., in 1887. Thereby Kilrain became the world's heavy-weight champion. In 1889 John L. Sullivan, of Boston, beat Kilrain. Sullivan was defeated in 1892 by James J. Corbett, who in turn was defeated in 1897 by Robert Fitzsimmons. Fitzsimmons lost the championship in 1900, and again in 1902, to James Jeffries.

The present rules governing the boxing of the world are known all the world over as the "Queensberry Rules." Under them wrestling and hugging are forbidden, the weight of the glove is defined, each round is limited to three minutes, and one minute interval, and the time allowed for a fallen man to get up is ten seconds. The following are

A Shakespearian Table.

PROFESSOR ROLFE, the Shakespearian scholar, has counted the lines which the principal characters in Shakespeare's plays have to speak. His rule was to consider parts of lines, beginnings and endings of speeches as full lines. This is the result:

|                           | Lines to Speak. |                           | Lines to Speak. |                                 | Lines to Speak. |

## The British Academy.

KING EDWARD VII. in 1902 granted a charter to "The British Academy for the Promotion of Historical, Philosophical, and Philological Studies." Lord Reay (Chairman of the London School Board, former Governor of Bombay, President of the Royal Asiatic Society and of University College) is the first President.

The fellows are: Lord Reay, the Earl of Rosebery, Viscount Dillon, President of the Society of Antiquaries; Arthur Balfour, M. P.; John Morley, M. P.; James Bryce, M. P.; W. E. H. Lecky, M. P.; Sir William Anson, Warden of All Souls' College, Oxford; Sir Frederick Pollock, Corpus Professor of Jurisprudence, University of Oxford; Sir Edward Maunde Thompson, Director and Principal Librarian, British Museum; Sir Henry Maxwell-Lyte, Deputy Keeper of the Public Records; Sir Courtenay Ilbert, Parliamentary Counsel to the Treasury; Sir Richard Jebb, M. P., Regius Professor of Greek, University of Cambridge; Dr. Monro, Provost of Oriel College and Vice-Chancellor of the University of Oxford; Dr. A. W. Ward, Vice-Chancellor of the University of Cambridge; Dr. Edward Caird, Master of Balliol College, Oxford; Dr. H. F. Pelham, President of Trinity College, University of Oxford; Dr. John Rhys, Principal of Jesus College and Professor of Celtic, University of Oxford; Rev. George Salmon, D. D., Provost of Trinity College, Dublin; Dr. J. B. Bury, Regius Professor of Greek, University of Dublin; S. H. Butcher, Professor of Greek in the University of Edinburgh; Ingram Bywater, Regius Professor of Greek, University of Oxford; E. B. Cowell, Professor of Sanskrit, University of Cambridge; Rev. William Cunningham, D. D.; Rhys Davids, Professor of Pali, University College, London; Albert Dicey, K. C., Vinerian Professor of English Law, University of Oxford; Rev. Canon S. R. Driver, D. D., Regius Professor of Hebrew, University of Oxford; Robinson Ellis, Corpus Professor of Latin, University of Oxford; Arthur John Evans, Keeper of the Ashmolean Museum, Oxford; Rev. A. M. Fairbairn, D. D., Principal of Mansfield College, Oxford; Rev. Robert Flint, D. D., Professor of Divinity, University of Edinburgh; J. G. Frazer, Fellow of Trinity College, Cambridge; Israel Gollancz, University Lecturer in English, University of Cambridge; Thomas Hodgkin, S. H. Hodgson (metaphysician), T. E. Holland, Professor of International Law and Diplomacy, University of Oxford; F. W. Maitland, Downing Professor of English Law, University of Cambridge; Alfred Marshall, Professor of Political Economy, University of Cambridge; Rev. J. E. B. Mayor, Professor of Latin, University of Cambridge; Dr. J. A. H. Murray, editor of Oxford English Dictionary; W. M. Ramsay, Professor of Humanity, University of Aberdeen; Rev. Canon William Sanday, D. D., Lady Margaret Professor of Divinity, University of Oxford; Rev. W. W. Skeat, Elrington and Bosworth Professor of Anglo-Saxon (celtic scholar), University of Cambridge; Leslie Stephen, Whitley Stokes, Rev. H. B. Swete, D. D., Regius Professor of Divinity, University of Cambridge; Henry Fanshawe, Rev. H. F. Tozer, Robert Yelverton Tyrrell, University of Dublin, and James Ward, University of Cambridge.

The Academy aims at the promotion of the study of moral and political sciences, including history, philosophy, law, politics and economics, archæology, and philology.

### ASTRONOMY.

DURING the year 1902 thirty-six asteroids were discovered, some of which may however turn out to be only the rediscovery of old ones.

Several series of observations were made of the very diminutive planet Eros with the view of determining the sun's distance. These observations have not yet been discussed, but they have disclosed the fact that the brilliancy of this body is variable, and has a period of 5 hours 16 minutes. Three theories have been advanced to account for this singular phenomenon: First, that the planet is double, consisting of two bodies almost in contact, and revolving around their common centre of gravity in a period of 5 hours 16 minutes, mutual occultations taking place whenever the plane of motion passes through the earth; second, that it is shaped like a dumb-bell or two spherical bodies collided and adhered together, mutual occultations taking place as before, and third, that the variation is due to a large difference in the brightness of various parts of the surface. These are all open to objection, but the first theory would appear to be the most probable.

Two telescopic comets were discovered, both apparently strangers to our solar system, but possessing no special interest.

A huge reflecting telescope for the use of the Mills expedition which is to be sent out from the Lick Observatory to Chile was recently completed at the Allegheny (Pa.) Optical Works. The glass for the mirror was cast in Paris, but the work of grinding, polishing, silvering, and mounting was done by the Allegheny firm. The instrument will be mounted on a high mountain peak in the vicinity of Valparaiso, Chile. The object of the expedition is to observe spectroscopically the brighter stars in the Southern Hemisphere which are not visible in this latitude, and to determine, if practicable, the motive of the solar system through space.

A huge meteor belonging to the August group fell on August 24, in the Sierra Madre Mountains, about fifteen miles from Fillmore, Cal. It was visible for more than a hundred miles as it shot across the sky. A loud, hissing sound emanated from the huge body, and the report when it struck the earth was not unlike distant thunder, but much louder, having been heard at a distance of thirty miles from the scene of the terrible collision.

Another prodigious meteor belonging to the November group passed over Kentucky for some one hundred and twenty miles, and then exploded. These bodies are now known to be simply small masses of mineral matter—chiefly iron, nickel, manganese, etc.—which move in independent orbits around the sun with planetary velocity; and were it not for the protecting ægis of our atmosphere, they would strike the earth with prodigious force and be a constant menace to life and property.

### CHEMISTRY.

Some advance was made in chemical science, especially in verifying the atomic weights of some of the more important elements.

A new determination of the atomic weight of uranium has been made by analyzing bromide of uranium,  $U Br_4$ ; the method is more reliable than that previously employed. The result is 238.5, about a unit lower than the value hitherto accepted.

New atomic weights were also deduced for iron and copper; the former 127.6, and the latter 40.1, both, however, in close agreement with those previously found.

Lithium silicide,  $Si Li_3$ , has been formed by heating silicon with lithium in a nickel boat placed in an exhausted tube. The compound is in the form of bright indigo blue crystals, very hygroscopic and violently decomposed by water, acids, and the halogens. It possesses great reducing properties. When heated with the oxides of iron, manganese, copper, etc., the metals are at once set free; it does not, however, decompose alumina.

For a long time the intense black color of the rocks in the Nile rapids at Wady Halfa and Assouan remained unexplained. Recent investigations show that the black color is not due to the color of the rocks themselves, which are eruptive rocks and sandstones of various colors, but to the presence of manganese, which absorbs oxygen, thereby giving the polished surface a deep black coating of manganese dioxide,  $Mn O_2$ .

### GEOLOGY.

Several valuable contributions were made to geological science both in Europe and America, among which may be mentioned a description of the oil and gas fields of Western and Northern Texas, the tin deposits ten miles north of El Paso, and the deposits of sulphur and mercury in the same State; the coal measures of the Upper Cretaceous and Tertiary group of the western gulf coast; the geology of the Maldivæ and Laccadive Archipelagoes, in the Indian Ocean; the geology of the Berkeley Hills, in California, and of the entire coast range of mountains of the Pacific coast. The geological survey of Cape Colony and adjacent territories and of Western Australia was recently begun, and so far promises to be the most fruitful field for geologic exploration on the globe.

In the geologic survey of Canada, the copper regions of the White Horse District, the coal basins in the Rocky Mountains, the Sudbury nickel and copper districts, and the western shore of Hudson Bay received more than ordinary attention, and much valuable information in regard to their mineral deposits was obtained. The very rare mineral chrocoite was found in British Columbia, the only other place being Dun Mountain, New Zealand. It is of a fine emerald-green color and of very great value to the lapidary.

An exceedingly valuable deposit of the mineral molybdenite was discovered in Haliburton District, Ontario. This mineral is so rare that in the raw state it is worth \$400 per ton and in the refined state it is valued at about \$2 per pound. It finds an extensive application in the production and tempering of the finer qualities of steel and as a delicate test in analytical chemistry.

The geology of the Black Hills and adjoining regions in South Dakota and Wyoming was very carefully studied. This interesting region promises more fruitful results and is destined to occupy a larger research than any other region in America of similar size.

The world's largest diamond was found at Jagersfontein, in South Africa, and weighed in the rough 971 $\frac{3}{4}$  carats. It was originally called the Excelsior, but now the Jubilee diamond, in honor of the celebration of the sixtieth anniversary of the accession of the late Queen Victoria. It surpasses any other diamond known in size, color, and lustre; it is, in fact, an absolutely peerless gem. It was lately cut as a brilliant with the most skilful appliances, weighs 239 carats, and is valued at \$2,000,000. The Orloff diamond of Russia weighs 194 $\frac{1}{2}$  carats, the Regent of France 136 $\frac{3}{4}$  carats, the Imperial 180 carats, and the Kohinoor 102 $\frac{3}{4}$  carats.

## ENGINEERING.

A range of submarine mountains was discovered in the South Pacific Ocean by the British cable steamer *Britannia*, while employed in marking out a track for the British Trans-Pacific cable—the longest ever laid. About 100 miles east of Brisbane, Australia, an obstruction was met with lying directly in the track and a deviation to the south had to be made in order to clear it. The greatest depth in this course lies between Brisbane and Norfolk Island, 2,800 fathoms, but on the crest of the mountain side it was only 237 fathoms.

This great engineering feat was completed on October 30, 1902, at the joint expense of Great Britain, Canada, and Australia. The cable is about 7,755 miles long, and consists of four sections, viz.:

- 1st. From Vancouver, British Columbia, to Fanning Island, 3,455 miles;
- 2d. From Fanning Island to Suva in the Fiji Islands, 2,100 miles;
- 3d. From the Fiji Islands to Norfolk Island, about 1,200 miles; and
- 4th. From Norfolk Island to Brisbane, Australia, about 1,000 miles.

Its successful completion puts all parts of the widely scattered British Empire into direct telegraphic intercommunication, and the islands of the Pacific Ocean into closer relations with the rest of the world.

An engineering feat of great magnitude has been undertaken by the United States Geological Survey, viz., the reclaiming by artificial irrigation of immense tracts of desert and arid land in the South-western States and Territories, Congress having appropriated several millions of dollars for the purpose. The object to be attained in this work is to divert from their natural channel, mountain streams to localities now too arid for agricultural purposes.

A new rifle has been invented by a Mr. McLean, of Cleveland, Ohio, which removes some of the defects of the ordinary gun. It does not differ greatly in outward appearance from the ordinary rifle, but on the upper side of the barrel is a long cylinder which ends in a gas nozzle about four or five inches from the front. This device, whose action is not very apparent, catches part of the escaping gas which follows the explosion, and the force thus brought into action drives back a piston which ejects the exploded cartridge, throws a new one into its place and fires it, while at the same time it exerts a forward pressure sufficient to counteract the shock of the recoil. The four actions just mentioned continue automatically so long as there are cartridges in the magazine. There is no complicated mechanism, the operations follow one another almost instantaneously without the jar or recoil which always interferes with accurate aim and demoralizes the marksman.

## SURGERY AND MEDICINE.

Several heroic and successful surgical operations were performed for the first time, among which may be mentioned the cutting away of a part of the skull to give the brain room for development; suturing or sewing up incised wounds of the heart; the remedying congenital deformities of the hip joint; operations for fracture and dislocation of the cervical portion of the spinal column; abdominal sections for the removal of pus in chronic peritonitis, besides many other minor operations which have contributed not a little to the saving of human life.

A few new remedies were added to the *materia medica*, and many new lines of treatment were discovered, not only for preventing disease but also for aborting it in its incipency.

## ARCHÆOLOGY AND EXPLORATION.

The excavations made under the direction of Professor Hilprecht, of the University of Pennsylvania, in ancient Nippur, show that the Babylonians were far more advanced in science than is commonly supposed. When the 23,000 tablets found by him are deciphered, it is believed that their contents will altogether change the opinion hitherto entertained regarding the state of civilization of that ancient people. The ruins of Nippur are found to be a collection of some twelve or more cities built one above the other. The deciphering of the tablets will be a very difficult task. One tablet shows a minute astronomical calculation in regard to the constellation Scorpion, and the places and movements of the stars were so accurately described that the astronomers of that time, 2,300 B. C., were in some respects as proficient as those of the present day.

Remarkable discoveries were made by Baron Von Oppenheim in Upper Mesopotamia, where a supposed desert was thought to exist, but now found to be teeming with archæological remains.

Ruins of a large town were unearthed, the lower stories of whose houses were cut in the solid rock. A palace of the King of the ancient Hittites was uncovered, with perhaps the first veiled statue ever constructed.

In the Tektok Mountains, between the head waters of the Tigris and Euphrates Rivers, the ruins of a large town or city were discovered. The city was partially excavated out of the solid rock, and partly built of stone above the surface. The subterranean sections of these abodes, as well as the parts above ground, were adorned with elaborate sculpture of a high development. Nothing like it was ever before discovered anywhere on the earth. The population was probably twenty or thirty thousand. Throughout the entire region were found wonderful architectural remains of mediæval and ancient art, such as the remains of castles, churches, and houses, some of which were standing as if abandoned but a year or so ago. Basilicas were so well preserved that nave and aisles were easily distinguishable. Arches standing amid fields of debris proved to be remains of early Christian churches, some of them marked with the cross. Great castles built by the Crusaders were found standing almost intact, but the remains of still earlier times were equally abundant, as shown by an advanced state of dilapidation.

Here we have witnesses to the occupation of this land by different races extending back to the remote past. It is the opinion of German archæologists who have carefully studied the numerous inscriptions and other remains of art found here, that this interesting region was inhabited up to the close of the fourteenth century, when the Tartar hordes from the North came down upon the land like an avalanche, overwhelming and extinguishing the nations that occupied it before sweeping on to follow their conquests in Europe and leaving this now desolate area to the wolf, the hyena, and jackal.

Before the arrival of the savage Tartar the region had been governed by Caliphs, descendants of the famous Haroun al Raschid, of Bagdad; then for a period the Crusaders held sway over it; before Islamism was born Byzantine and Roman emperors were its masters; still earlier the land was governed by the Greeks, descendants of the generals of Alexander the Great, and prior to the Grecian Era its history stretched back through Persian, Babylonian, and Assyrian culture to that of the ancient Hittites—that primitive race whose home and civilization constitute one of the chief difficulties in ancient historical research, but undoubted traces of them have at last been prominently brought to light. There is, therefore, in this wonderful region a series of records of successive stages of history and of civilizations reaching back to a remote antiquity.

**The Seismic Disturbances of 1902.**

THE year 1902 will long be remembered in the annals of our race as the year of extraordinary seismic convulsions. Never in historic times has there been such a terrible series of disturbances of the earth's crust as have occurred during the whole year and over an area covering almost the entire surface of the globe. The destruction of Herculaneum and Pompeii in A. D. 69 by an eruption of Mount Vesuvius was a great catastrophe, although attended with a comparatively small loss of life, yet it sinks into insignificance compared with the appalling calamity which overtook the city of St. Pierre, in the island of Martinique, in the West Indies, where over 30,000 people perished instantly by one of the most extraordinary volcanic eruptions recorded in history.

The only other catastrophes at all comparable with it were the earthquake of Lisbon, November 1, 1755, when between 30,000 and 40,000 people perished; that of Calabria, Italy, and one in the East Indian Archipelago, in both of which many thousands perished, but the approximate number is unknown.

To give a complete list of all the earthquake shocks, volcanic explosions, tidal waves, and other seismic commotions would be perhaps impossible, for scarcely a day passed without the announcement of some such disturbance in some part of the earth, and many have doubtless been unrecorded, especially those occurring in the ocean bed.

Early in April, 1902, the first news of volcanic activity was received from the Aleutian Islands, Alaska, where several volcanoes were in active eruption. About a week later, on April 18, a severe earthquake shock was felt in Southern Mexico, Central America, and a portion of the West Indies, when 1,000 persons were killed, over 3,000 injured, and more than 50,000 rendered homeless. On May 3 the Volcano Redoubt, in Alaska, burst forth in violent eruption. And on May 7 Mont Soufrière, in the island of St. Vincent, first gave indications of activity after a long interval of repose.

On May 8 the most appalling catastrophe of its kind on record occurred, the instantaneous destruction of St. Pierre with its 30,000 people by the first eruption of Mont Pelée.

**THE MARTINIQUE DISASTER.**

A few days afterward Monts Colima and Soconusco, in Mexico, erupted, causing great loss of property. Then followed earthquake shocks in St. Thomas, W. I., and in Southern Portugal.

May 18 occurred the second eruption of Soufrière, and on the 20th a great tidal wave—the result of a submarine eruption somewhere—destroyed a portion of the village of La Carbet and a torrent of mud inundated Basse Pointe, in Martinique.

From May 24 to 31 Mont Pelée was in violent eruption; May 30 another tremendous eruption of Soufrière took place, accompanied by a severe earthquake which was felt far and wide, earth tremors having registered at Bayonne, N. J., and at Chattanooga, Tenn. About the same time sulphurous exhalations were emitted from Mont Trabochetto, on the shore of the Mediterranean, near Nice.

June 2. Mont Blackburn, in Southeastern Alaska, erupted, and on the following day Mont Gusty-grau, in Caucasia, Southern Russia, sent forth a torrent of mud, killing several persons, and on the same day a great landslide occurred in Switzerland, killing two noted scientists.

June 8. There was another violent eruption of Mont Pelée and another severe earthquake in Guatemala, Central America, destroying several towns and killing more than a thousand persons and injuring many more.

June 14. There was a discovery of slight elevations of localities in Pennsylvania and on the same day Mont Pelée burst forth in violent eruption. On the following day, June 15, a strong earthquake shock was felt in Sicily.

June 19. Mont Pelée poured forth a tremendous torrent of boiling mud, which overwhelmed the town of Basse Pointe, and on the next day disastrous earthquake shocks were felt throughout the Tyrol, in Southern Austria.

June 21. The great Volcano Pichincha, in Ecuador, became active after having lain dormant for more than a century, and on the following day several earthquake shocks were felt in Calabria, in the south of Italy.

During this month all the volcanoes of the Sandwich Islands were unusually active, especially Kilauea, one of the most terrible in the world.

July 7. European Turkey was visited by an earthquake partially destroying two towns.

July 8. A tidal wave at New Orleans, La., forced the sea water up the Mississippi and other rivers, doing much damage to property and killing millions of fish, while simultaneously two volcanoes in Costa Rica burst out in active eruption.

July 9. A severe earthquake shock at Bundas Abbas, Persia, did much damage, and on the same day three severe shocks were felt at St. Vincent and the neighboring islands, and this was followed for several days by loud detonations from Soufrière and another eruption from Mont Pelée, accompanied by violent earthquake shocks throughout Venezuela, damaging many towns, especially Valencia, La Guayra, and Guvenas. Toward the close of the month quite severe shocks were felt in California, causing considerable damage to property in Las Alamas, San Maria, and Santa Barbara, and simultaneously shocks occurred in Nebraska, the Dakotas, and Iowa.

From far away Japan and the Philippine Islands came tidings that during the month of August the small island of Torishima, on the coast of the former, containing 150 inhabitants, disappeared, and an earthquake in the latter killed sixty natives, besides injuring many more.

August 30. Venezuela was again visited by an earthquake, accompanied by a tremendous noise, which was heard along the whole shore of the Caribbean Sea, and at the same time Mont Pelée was in violent eruption, during which over 2,000 people perished.

September 7 four large craters formed on the north side of Mont Izalco, in Salvador, Central America, and poured forth torrents of lava, which flowed several miles from the craters. Lake Coatepequa, which lies at the foot of the mountain, was flooded with boiling sulphur. The volcano was still in eruption October 22. October 9 slight earthquake shocks were felt near Austin, Texas.

September 8. It was announced that Vesuvius had begun to vomit flames of fire, and its companion Stromboli, on one of the Lipari Islands, was in active and violent eruption, and on the same day earthquake shocks were felt in France and India.

September 17. The Philippine volcanoes Macou Taal and Batusau became unusually active.

September 23. Soufrière again erupted very violently, so that a cable-repairing ship, which was some five or six miles off the shore, was obliged to steam away at full speed, thereby narrowly effecting her escape, while simultaneously earthquake shocks of great violence were experienced in Jamaica and Ecuador.

News also came from Sicily to the effect that Mont Aetna, which has been sleeping for more than a century, showed signs of again becoming active.

The island of Guam experienced no less than 180 shocks, doing much damage to lives and property, and Japan experienced a tidal wave which swept the northern part of that country, causing terrible

## THE SEISMIC DISTURBANCES OF 1902—Continued.

destruction. It was also ascertained that the bottom of the sea in the neighborhood of Martinique and St. Vincent had gone down to the extent of a mile or more.

October 15. A terrific eruption of Soufrière began at 8 o'clock P. M. on October 15 and continued until 4 A. M., followed by a brief interval of rest; after which slight earth tremors, roaring noises like incessant cannonading, and outpourings of lava, ashes, and sand continued into the following day. The noise of the two boiling cauldrons was heard all over the island. Sand having a sulphurous smell fell to the depth of two inches, and volcanic dust fell so thickly in Bridgetown, Barbados, at 10 A. M. as to cause lamps to be lighted. Several earthquake shocks were felt at the same time in Les Saintes Islands, off the southern extremity of Guadeloupe, and at Marie Galante Island.

October 26. The Volcano Santa Maria, in the province of Quezaltenango, Guatemala, after being quiet many years burst forth in eruption, laying waste the country for a radius of twenty miles, destroying villages and coffee plantations. The loss of life was estimated at 7,000, most of the victims being Indians. The eruption continued to November 9.

November 11. The Volcano Kilauea, Hawaii, broke out in the most violent eruption in twenty years.

November 26. A fifth violent eruption of Soufrière took place.

While all these subterranean disturbances were going on, the meteorological conditions were of an extraordinary character. Cyclones, tornadoes, and excessive rainfalls were startling in their magnitude and frequency. Unusually cool weather immediately followed the St. Pierre disaster of May 8, and was felt most severely in both Europe and America.

## THE GEOLOGICAL INTERPRETATION.

These seismic disturbances may continue for a long time, and no one can predict when or what the end will be. In order to explain the origin or cause of these tremendous forces at work beneath our feet, we must go back to the remote past and trace very briefly the origin and early history of our planet so far as geology is able to interpret the records engraved on the rocky pages of the earth's crust.

Assuming that the Nebular Hypothesis is true—and no reason can be given for rejecting it—the matter composing our earth and moon once existed in a gaseous condition and formed a part of the sun. When this luminary filled the earth's orbit, a huge mass of vaporous matter was abandoned or set free by reason of the superior centrifugal force in the equatorial regions of the contracting mass or sun. This mass of vapor assumed a globular or spherical figure by reason of the mutual attraction of its own particles, and in this condition it threw off a mass of vapor which subsequently became the moon.

As the cooling proceeded, contraction of volume took place and the surface soon became too rigid to repeat the process. After the lapse of an immensely long interval, to be counted only by millions of years, a solid crust was formed on the surface, while within was a molten mass having an inconceivably high temperature. The free oxygen, hydrogen, nitrogen, etc., united to form water and an atmosphere both highly charged with carbonic acid gas.

As the crust became thicker by the cooling of the mass below and by the deposition of sediment from the almost universal ocean whose carbonated waters held carbonate of lime or limestone in solution, tremendous forces were called into existence. The elastic force of the pent-up gases beneath was opposed by the weight of the crust and its superincumbent ocean, but at last the strain became so great that it could no longer be borne. One mighty convulsion after another heaved up from beneath the bottom of the ocean the numerous chains of mountains that now exist on the globe, such for instance as the Laurentian Mountains in Northern Canada, the Appalachian extending from the mouth of the St. Lawrence to Northern Alabama, and at a subsequent date the Rocky and Andes mountains extending from the Arctic Sea to Cape Horn.

Enormous cracks or fissures must have been made in the crust during these mighty upheavals. Some of these cracks or fissures may have been permanently closed by the subsequent contraction and shrinkage of the crust, but many of them have remained partially open and give out hot gases or warm water such as may be found in the Yellowstone region, in the Hot Springs of Arkansas, and numerous other localities.

One of these cracks, or "faults," as they are technically called, extends along the Atlantic coast of the United States from Connecticut to the West Indies and probably on into South America. Another such "fault" no doubt extends through Kamtschatka, the Kurile Islands, Japan, Sumatra, and Java. Weak places also exist in Southern Italy, Asia Minor, and Portugal. The entire western coast of Mexico, Central and South America abounds with numerous active volcanoes, many of which are the loftiest and most violent on the globe.

The subterranean fires also find outlets in Jan Mayen on the east coast of Greenland, in Iceland, the Sandwich Islands, New Zealand, and Terra del Fuego. So far as known no active volcano exists on the Continent of Africa or in Australia. Several extinct volcanoes are found in the United States. In Oregon and Washington there are hundreds of square miles covered with lava which at a remote period flowed out of the craters of the numerous lofty peaks found in that region.

When these cracks or faults are near or under the ocean, water easily finds its way to the heated rocks, where it is converted into steam at enormously high pressure, which will, of course, find an outlet at the point of least resistance. The eruption of Mont Pelée was mainly due to oxy-hydrogen and other gases formed by the decomposition of sea water in contact with the intensely heated lava deep within the volcano. At a temperature of 2,500°C. fully 50 per cent of the steam would be converted into explosive gases at ordinary pressure, but under the enormous pressure that must exist in volcanoes temperatures of 3,000° to 4,000°C. would probably be required to effect this. The chlorine of the common salt, which exists in sea water, would at this temperature become dissociated from the sodium, and during the course of eruption, when the temperature would become lower, it would unite with the free hydrogen and form hydrochloric acid gas, one of the most irritating, poisonous, and suffocating gases known, and quite powerful enough to destroy life even when present in minute quantities.

In St. Pierre the people were instantly killed by the oxy-hydrogen gas explosion, which scorched and burnt everything, even the ships in the harbor. The crater of Mont Pelée is an oblique pit or opening in the side of the mountain, with several tunnel-shaped openings, all pointing directly toward the city, which was thus swept by a nearly horizontal tornado of fire.

Had the crater opening been directed upward, as is usually the case, the destructive energy would have been expended in the upper regions of the air, and with little or no loss of life. The crater of Soufrière is directed upward, and therefore the loss of life has been not from the explosive or poisonous gas, but from the outpour of ashes, lava, mud, etc., which deluged the immediate vicinity.

The eruption of Mont Pelée, though comparatively small in volume, is of great scientific interest by reason of its rare and exceptional character. It is in fact the only one of the kind that has occurred in historic times under circumstances that permitted accurate scientific observation. The more common form of eruption is that of superheated steam under great pressure; such probably was Krakatoa, the most extraordinary of its kind in modern times.

**Electrical Progress in 1902.****IN GENERAL.**

THE year 1902 witnessed remarkable development in all branches of electrical industry. Broadly speaking, a conservative estimate of the increase in the volume of business in this field would be at least 20 per cent, while some branches, particularly telephony, showed even greater improvement. This gratifying condition was not confined to the demands of the home market, but extended through all the channels of foreign trade which have been opened to American electrical manufacturers. There have been a number of very large undertakings intrusted to American engineers and manufacturers during the last year, not the least important of which were contracts for building electric railway, light, and power plants in the British domains, including the notable underground electric railway system of London. Both English and Continental engineers have been amazed by the boldness of American manufacturers and the magnitude of their undertakings. The success which has attended these efforts has had a salutary effect upon European critics who were inclined to be skeptical, but it has not lessened the jealousy of American enterprise, especially in Great Britain.

**ELECTROCHEMISTRY.**

Cheap electric current generated by water power has done much toward developing the electrochemical and electrometallurgical industries in this country of late years. At the present time the value of the output in the United States alone is \$100,000,000 per year. This may almost be considered a new industry—at least new in the sense of being one of the first magnitude—for it is only since cheap power was made available at Niagara that the present development was possible. Now it is proposed to repeat the experience of Niagara at Sault Ste. Marie, where cheap power and other excellent facilities are offered by the opening of the big power plants which will be referred to more particularly under another title. This industry has attained prominence and standing before the public by the organization of an electrochemical society six months ago, in which more than 400 members are already enrolled.

**TELEGRAPHY.**

Undoubtedly the accomplishment of greatest commercial importance in this department during the year was the completion of the British Pacific cable, by the laying of the last section at the Fiji Islands, October 30. This formed the last link between Australia and Vancouver, British Columbia, and of itself was an engineering feat of the first magnitude. But by far the most important feature of the construction work was the section between Bamfield Creek and Fanning Island, which is the longest in the world. It has already undergone a series of tests, and proved entirely equal to expectations. The great question in the success of the cable was over this enormous stretch; but it was found by test to give a speed of over 100 words a minute with the Deerlove transmitter. The actual time occupied in the transmission of a message from Victoria, British Columbia, to Sydney, Australia, will be less than five minutes in the case of a short commercial message.

Marconi continues to surprise and startle the public—and the scientific public, too—by the rapidity with which he has overcome every obstacle in the development of the system of space telegraphy with which his name has become associated. His achievements are certainly marvellous, and his reticence about giving publicity to any of his projects until they have been fully demonstrated lends credence to the belief that he has already established communication over far greater distances than have as yet been announced. It is now accepted as a fact in scientific circles that wireless messages have been transmitted from Cornwall, England, and received at Sydney, Nova Scotia, on the Italian warship Carlo Alberto, which is used by the inventor for his experimental station. There are now in regular service thirty-seven fully-equipped Marconi stations in this country, Europe, East Indian Islands, and Japan, and a large number of vessels crossing the Atlantic utilize this system to advantage.

Further improvements have been made in the system of rapid telegraphy in service between Budapest and Presburg, and telegrams are now transmitted over one wire at the rate of 50,000 to 70,000 words an hour, under ordinary commercial conditions. In this country the system developed by Professor Rowland is being adapted to commercial service; and the results recorded in the tests on a German line, where it has just been introduced, more than meet the expectations of the admirers of the late physicist.

One of the most interesting extensions of telegraphic service was the work accomplished by the United States Signal Corps in 1902, especially in Alaska. This was not confined to the establishment of the military line, as was first contemplated, but comprised an extensive commercial system, connecting Dawson with Fort Egbert, and placing the American territory on the Upper Yukon in direct telegraphic communication with Skagway, so that telegrams can reach Washington in four days. More recently the Canadian line between Dawson and Ashcroft was completed, thus bringing the Upper Yukon region of the United States in direct telegraphic communication with Washington and the commercial world. The completed lines connect Fort Egbert at Eagle City with Dawson; Fort Davis, near Nome City, with Fort St. Michael; Fort Lisicum, at Valdes, on Prince William Sound, with Fort Egbert, over what is popularly known as the all-American route to the Klondike; Fort St. Michael with Fort Gibbon, at the mouth of the Tanana River; the military post at Skagway with Juneau, the capital of Alaska, and Fort Gibbon with Fort Egbert, via Rampart.

The system of telegraph lines and cables in the Philippines has also been increased by 2,600 miles, and there are thirty-one submarine cables 1,326 miles long, and land lines 5,108 miles long; making an aggregate of 6,434 miles.

**TELEPHONY.**

The year witnessed an almost unprecedented growth in this department, and it is safe to say that the percentage of increase in volume of business was greater than in any other branch of the electric industry. The independent companies seem to have recovered from the effects of the set-back which they experienced through the failure of the Everett-Moore syndicate, and they are now devoting most of their attention to the development of business in the smaller cities with the idea of combining these exchanges into a great system. The Bell people have experienced practically no serious opposition in the larger cities, and the much-talked-of independent movements in New York and Chicago seem to have been almost entirely forgotten. The independent movement has really gained strength as a result of this change, and all efforts have been directed toward development in places where better results could naturally be looked for. In New York it is estimated that there are now in actual service in the neighborhood of 90,000 stations. The entire capital invested in telephone systems at the present time in this country is in the neighborhood of \$350,000,000.

## ELECTRICAL PROGRESS IN 1902—Continued.

## ELECTRIC LIGHTING.

The experience of the New York Edison Company, the largest central station corporation of the country, may be accepted as a fair indication of prevailing conditions in all large cities. In spite of the great increase in the capacity of the company's generating plant by the addition of the Waterside station, the demand is so great that it has been obliged to purchase current in large quantities from other plants to meet its customers' wants. The Waterside station, which was opened early in the year, contains the largest steam engines utilized for electric lighting in the world. They are of an entirely new type in American practice, being fitted with poppet valves and designed for using superheated steam. The station is, moreover, the largest of the kind in the world.

The turbo-generator which was put in service in Hartford early in the year probably attracted more attention than any innovation that has been made in central station practice in a decade. This machine is of about 2,500 horse-power capacity, the largest ever built up to the present time, and its performance is being watched very closely. Similar equipments are now being built for lighting the tunnels and stations of the subway in New York.

At the present time it is estimated that there are in the neighborhood of 3,500 central stations throughout the country, supplying current for lighting and power purposes aggregating nearly 2,000,000 horse-power. More than 500,000 arc lamps and fully 3,500,000 incandescents are in regular service.

## ELECTRIC POWER.

The most notable event in the field was the opening of the American Soo plant, October 25—the second largest water power utilized for generating electric current in the United States. Provision has been made for furnishing 50,000 horse-power. The plant is located on the American Sault Ste. Marie, and is practically a duplicate of the plant on the Canadian side. Cheap power, plenty of space for building, and excellent facilities for shipping are offered large manufacturers, and it is expected that they will increase the popularity of electric operation of industrial enterprises.

Some very interesting statistics have been collected upon the amount of electric power used, but it has been found difficult to determine accurately what percentage is used for lighting and what for manufacturing purposes. One company alone in New York City operates several central stations, aggregating 250,000 horse-power, while the isolated electrical plants in the city represent over 100,000 horse-power. The modern office building and the power required in these great structures form a large item when their number is taken into consideration, as about 1,000 horse-power is required to operate the lighting plant, elevators, pumps, and ventilators in a sixteen-story modern building containing 500 offices. New York heads the list of States in the use of water power, and the most notable phase of the application of power to industrial uses has been in the use of the electric current for the transmission and sub-division of power. In New York City the Edison company already alluded to reported upward of 65,000 horse-power of motors connected to its circuits, showing a motor capacity more than thirty times as great as ten years ago, considering only the figures of one company. A corresponding increase is observable elsewhere.

## ELECTRIC RAILWAY.

The electric railway industry has broadened greatly, and is no longer confined to street railways, but includes suburban and interurban service, and even the operation of steam roads through cities. Still greater expansion is promised through the adaptation of the alternating current to the operation of railway motors on long lines. Up to the present time street railway practice in this country has been restricted to the use of direct-current motors, and this type has also been adopted for elevated and other systems, even where there is heavy traffic, although alternating current is generated at the central power station and transmitted at high potential to various points of distribution throughout the system. This necessitates the establishment of sub-stations containing transformers which reduce the voltage, and converters which change the character of the current from alternating to direct, with elaborate switching and controlling systems, so that the power may be used ultimately in operating the car motors. Complicated and expensive apparatus is required at these distributing points, and the cost of attendance and interest on the investment are heavy items in the charges against electric operation.

It has long been the aim of engineers to dispense with these complications. Indeed, on several European roads three-phase alternating current motors have been employed, but, according to American ideas, the results thus far have been on the whole unsatisfactory. During the last year, however, responsible American engineers made great progress. Bion J. Arnold, at the annual meeting of the American Institute of Electrical Engineers, announced that he had succeeded in building a single-phase motor capable of adaptation to railway service. This system is now in operation under commercial conditions, and may therefore be considered an accomplished fact. The Lammé single-phase railway motor system, which was announced later, is along entirely distinct lines from those followed by Arnold, but although experience with this system has been restricted to an experimental shop road, the high standing of the inventor and the facilities at his command warrant the assumption that he has made a valuable contribution to the knowledge of the art. The importance of these discoveries or developments, whichever they may be called, lies in the fact that they insure a greater expansion of the electric railway field than would be possible under present conditions, as they open up the field now occupied exclusively by the steam lines, and permit electricity to compete on a favorable footing with steam for the handling of heavy traffic and the operation of long lines.

Interurban roads are being established in every part of the country, and several fine examples have been opened during the last year. The most prominent of these is the Chicago, Aurora and Elgin line, a high-speed road capable of competing with the best steam lines of the country. This class of road is developing a large freight, express, and parcel delivery business in conjunction with the passenger traffic. There are several interurban systems to-day 100 miles in length.

Among the most striking features in electric railway accomplishment in New York during the year were the opening of the Manhattan electric service, the completion of the construction work on the greater part of the New York subway, and the beginning of work on the building of the tunnel under the East River to connect Brooklyn and Manhattan. The New York Central Railroad determined to adopt electricity for the operation of its trains through the tunnel, and on its suburban lines, and the Pennsylvania Company also decided to build a tunnel under the North River, establish a "terminal" in New York, and extend its lines under the East River into Long Island. These lines will be operated by electricity, and the work on the Pennsylvania improvement alone will involve the expenditure of \$50,000,000.

**Polar Exploration in 1902.**

(Prepared for THE WORLD ALMANAC by Walter Wellman.)

THE last was an unusually interesting year in polar exploration. All three of the expeditions which were at work in the Arctic field returned to civilization during the Summer and early Autumn—Peary, Sverdrup, and Baldwin—and there is not now left in the Arctic a single explorer. It has been a good many years since this has happened. The general public was a good deal puzzled by the return of so many expeditions within a few weeks, but the explanation is very simple. It is only in August or early September that ships can make their way through the belt of floating ice that lies between the northern headquarters of the explorers and the nearest port in a civilized country. At all other seasons of the year the voyage is impossible. It was only a coincidence that brought all three explorers back the same year.

Although all three of the returning expeditions had set out with hopes of reaching the North Pole, or at least of beating all records in the approach thereto, the Pole is still undiscovered, and latitude 86° 33', attained by Captain Cagni, of the Abruzzi (Italian) expedition in 1900, still marks the most northerly march of human feet.

**RESULTS OF PEARY'S EXPLORATION.**

Lieutenant (now Commander) Peary did the most important Arctic work of the year. He attained the farthest north in the western hemisphere, latitude 84° 17', 156 statute miles short of Abruzzi's record, and 404 statute miles from the Pole. He pushed the advance on the American side thirty miles beyond his own best record (established in 1901) and sixty miles beyond the point reached by Lockwood and Brainard, of the Greely expedition in 1882, which had stood as the American record for nineteen years. For his work of a dozen years in the Arctic field Commander Peary has to show a most enviable record. In addition to establishing the American record in approach to the Pole, he has fixed the northern termination of Greenland; he has defined and mapped the islands lying to the north of that great glaciated continent, known as the Greenland Archipelago, the most northerly land known in the world. He has shown by fair inference that from the north of Greenland an ice-covered sea sweeps unbroken to and far beyond the Pole. He has added a good deal of geographical knowledge of the coasts of Greenland and Grinnell Land, and in his earlier sledge trips he gave science its first satisfactory glimpse of the extent and nature of the great ice-cap of Greenland.

Last year Lieutenant Peary had promised his wife should be his last in the Arctic field, and he prepared himself for a final effort to add the North Pole to the list of his achievements. March 6 he left his Winter quarters at Cape Sabine, Grinnell Land (latitude 78° 45'), with his faithful colored assistant, Matt Henson, a number of Eskimo, and eighteen sledges. At his outpost, Ft. Conger (latitude 81° 44'), old headquarters of the Greely expedition, he overtook, March 18, an advance party which had left Cape Sabine March 3. After a rest of a few days Peary started northward along the Grinnell Land coast, reaching Cape Hekla (latitude 82° 55') March 31. He was surprised to find the north end of Robeson Channel all open water to the Greenland coast, and many lanes of water appearing in the ice to the northward. Nevertheless, Peary started, April 1, to cross this treacherous ice-sheet on his journey toward the Pole. He was accompanied by Henson and four Eskimo and the cavalcade consisted of six sledges. Almost from the first unfavorable ice was encountered—old floes covered deep with snow and intersected with rubble ridges and lanes of young ice. This sort of surface was very difficult for the sledge party to make any progress over. The heavy sledges had to be lifted over the ridges, care being exercised not to break them. Here and there a road had to be cut with axes. The lanes of open water, covered over with a thin sheet of young ice, also gave trouble, as the ice was not always strong enough to bear the weight of the men and the sledges.

These conditions grew worse instead of better. April 8 open leads and floes in motion were encountered, and the floes became smaller and the pressure ridges more formidable. "Each day's march was very tortuous," says Lieutenant Peary, "and our general course was deflected west by the character of the ice." The difficulties proved so great that about April 10 Lieutenant Peary found it imprudent to attempt any further advance. He had marched something like ninety-five statute miles upon this rugged, uncertain, and shifting surface, and now he turned his face homeward. This must have been one of the most bitter moments in his career, for when he started southward it was with the knowledge that he had left behind him, probably forever, his ambition to attain the Pole. This was Lieutenant Peary's third effort to cross the sea-ice to the north of Greenland and Grinnell Land. The first time, in 1900, he advanced only eleven miles from the coast, and was compelled to return because the snow was too soft and slushy. That was in May, and it thus became evident that so late in the year the weather is too warm to permit the ice conditions favorable to rapid travel upon the frozen surface of the Arctic Sea. Early in April, 1901, he tried it again, but after a ten days' march found men and dogs out of condition and was compelled to retreat. His third effort, in April of 1902, ended as hereinbefore described.

Lieutenant Peary's experiences and failures have led Arctic men to the conclusion that the Greenland route is not as favorable as the Franz Josef Land route for an advance upon the Pole. Peary might have had a chance to eclipse the record had he wintered at Fort Conger and set out upon his march over the ice-sheet March 1 instead of April 1. Peary had to travel from Cape Sabine to Cape Hekla, a distance of about 330 statute miles, measured by the route actually followed, before he could begin his real "dash for the Pole," over the difficult sea ice. The month of March is invaluable for over-sea sledging, for then the temperatures are low, the snow is hard, the floes show but little movement, and the lanes are covered with strong ice. Notwithstanding the great cold and the scant light of early March, all of that month can be employed by the hardy sledger. Nansen left the Fram at 84° N. latitude March 14, Peary himself has travelled between Sabine and Conger in February, and the Wellman expedition in Franz Josef Land left its headquarters February 18, the earliest known sledging start in high latitudes.

Lieutenant Peary's ship, the *Windward*, arrived at the headquarters at Cape Sabine August 5, Mrs. Peary and young daughter aboard, and left the same day for the south, arriving at St. John's, Newfoundland, in September. Although Lieutenant Peary came back from the north determined not to resume exploration, and to return to his profession of civil engineer in the United States Navy, as this review is written there are rumors that he may lead next year the second expedition in search of the Pole to be sent out by William Ziegler, of Brooklyn.

**SVERDRUP.**

Second in importance in the Arctic field during 1902 was the work of the Norwegian expedition led by Captain Otto Sverdrup, the veteran explorer who was master of Dr. Nansen's *Fram* during the famous drift-voyage through the Arctic Ocean. Sverdrup in the *Fram* entered the Baffin's Bay waters in the Sum-

mer of 1898, and emerged during the Summer of 1902. He had hoped to push his ship through Kennedy Channel, Kane Sea, and Robeson Channel to the northern part of Greenland, and then to circumnavigate Greenland and come out through the Spitzbergen Channel to the east. He publicly disclaimed an intention to seek the Pole, but it was well known to his friends in Norway that he meant to make a "dash for the Pole" could he secure with his ship a favorable base from which to start. But he was unable to force the Fram more than a few miles north of Cape Sabine, and there she lay, virtually imprisoned in the ice, for one year. This period of enforced waiting was utilized in exploration of the interior of Ellesmere Land, adding much to the map of that hitherto little known region.

In August, 1899, Sverdrup took his ship some distance into Jones Sound, where she was again imprisoned in the ice, this time for three years. Sledging parties explored Jones Sound and the surrounding islands and lands quite thoroughly. On the west coast of Ellesmere Land a large system of fiords was discovered. In about 78° north latitude a sound was found separating North Cornwall from a tract of new lands situated to the north. These lands are about 130 miles north of the Parry Islands, the most northern land previously discovered in this part of the polar sea. On the west coast of one of the islands the explorers looked out far to the west without seeing any more islands. They reached the northern coast, and here also, looking to the north, they could see nothing but the rough polar ice.

The mapping of the southwest and the western coasts of Ellesmere Land, and the discovery of these islands to the north of the Parry Archipelago, are the main fruits of the Sverdrup Expedition. Throughout their work the explorers were able to capture sufficient walrus for dog meat, and a considerable number of musk oxen provided the explorers with plenty of fresh food. A sledge expedition was sent down Wellington Channel to Beechey Island in order to secure certain supplies, of which they were very much in need, from the cache of the English expedition, planted there many years ago. The supply depot, however, was found to have been destroyed, probably by polar bears, and only a part of the house remained standing.

When Sverdrup returned from one of his sledging expeditions, in May, 1900, he learned the very exciting news that the Fram had been in the greatest danger of being wholly destroyed by fire. The awning had been ignited by a spark from the funnel, and was soon entirely enveloped in flames. The kayaks, or sealskin boats, stored under the awning, as well as other inflammable material, burned fiercely. An iron tank containing about 200 litres of spirits stood in the middle of the fire. The main rigging and the mast caught fire. Fortunately this accident, which might easily have involved a great tragedy, occurred in the middle of the day when there were plenty of men about on the deck, and the flames were extinguished without serious damage to the ship.

Captain Sverdrup returned to Norway in the Autumn of 1902, and was received with much enthusiasm by his countrymen.

## THE BALDWIN-ZIEGLER EXPEDITION.

The Baldwin-Ziegler expedition unexpectedly returned from Franz Josef Land in August, after an absence of but one year. This effort to reach the Pole had been so lavishly equipped, and so well advertised as sure of success, that great things were expected of it. On the return of Mr. Baldwin the disappointing news was learned that he had accomplished almost nothing at all, and that for all this expenditure of money he had to show only the establishment of a depot of supplies about 100 miles north of his headquarters on Algar Island (latitude 80° 25' N.), but still south of the spot at which the expedition of the Duke of Abruzzi wintered 1899-1900, and from which Captain Cagni set forth when he established the record of nearest approach to the Pole—86° 33'. In his depot of supplies at the southern end of Prince Rudolph Land, near the site of the Abruzzi headquarters, Mr. Baldwin planted a large quantity of provisions for dogs and men, intending to make use of them on a future dash for the Pole. Inasmuch as the expedition was fitted out with supplies ample for a sojourn of three or four years, and had left America with the intention of remaining as long as might be necessary to achieve important results, much surprise was expressed at the return of the entire party after an absence of but a single year. Mr. Baldwin says that many of his dogs had perished, though the number surviving was greater than any previous expedition had employed. He also says many of his sledges were broken up in the work of establishing the depot, and that the coal supply of his ship, the *America*, was running short.

Upon his return to the United States Mr. Baldwin was forced to meet various charges against the efficiency of his leadership and management, preferred by members of his party. It thus became apparent that dissensions in the expedition had had much to do with its complete failure and its early abandonment of the field. William Ziegler, of Brooklyn, the financial backer of the expedition, carefully investigated the charges made against Mr. Baldwin, and finally announced that while he intended to send out another expedition in 1903, following the Franz Josef Land route, Mr. Baldwin was not to be in charge of it. Mr. Ziegler's experiment in Arctic exploration has so far cost him about \$350,000, a far greater sum than was ever spent on any other polar expedition, excepting only the three-year effort made by Sir George Nares under the auspices of the Royal Navy and at the expense of the British Government. Mr. Ziegler declares he will continue the search for the Pole regardless of expense.

## THE ANTARCTIC.

During the year no news of importance has come from the Antarctic region, where two well-equipped scientific parties—one English and the other German—have been at work for a year. Some tidings of them may be received during the Winter, which is the Summer or open season in the South Polar area. The German expedition, in the polar ship *Gauss*, left Kiel August 11, 1901, and arrived at Cape Town November 23, the same year, after a voyage of such unexpected duration as to give rise to considerable anxiety. The ship proceeded on her way to the Kerguelen Islands, which lie in latitude 50° south, midway between Cape Good Hope and Australia, and was expected to arrive there in December, 1901. The *Gauss* was specially built for polar work, and carries a large party of scientific men. The British expedition, in the *Discovery*, also built for polar work, left Southampton in August, 1901, for Victoria Land, directly south of New Zealand. There, in about latitude 75° south, it was hoped safe Winter quarters for the ship might be found, and that thence exploration of the great continental glaciated lands of the interior, of which so little is known, could be successfully carried on by means of sledge parties. The German and English expeditions expected to carry on simultaneous scientific observations according to a prearranged plan. A third Antarctic expedition, of Scottish organization, sailed from Edinburgh late in October, 1902, under the command of Professor Bruce.

Comparatively little is as yet known of the vast glaciated continent which it is believed covers the South Pole, and for purely scientific investigation it is now the most promising field of geographic

exploration upon the earth's surface. The North Polar Zone, on the other hand, has been so fully explored that there remains to be accomplished in it little beside the sensational feat of attaining the Pole itself.

## Statistics of the Press.

ROWELL'S American Newspaper Directory for 1902 reports the number of newspapers published in the United States and Canada as 21,305. Of these, 975 were Canadian publications. The following was the frequency of issue: Weekly, 15,104; monthly, 2,777; daily, 2,285; semi-monthly, 277; semi-weekly, 515; quarterly, 159; bi-weekly, 58; bi-monthly, 70; tri-weekly, 55—total, 21,305.

The following table exhibits the number of papers printed in the several States and Canada in 1902:

## Literature in 1902.

## NOTABLE BOOKS OF THE YEAR.

It was a year of marked contrasts in national histories—in our own country a period of unexampled prosperity interrupted by a five months' coal strike affecting all classes; in England coronation festivities stopped before begun by the King's illness; in South Africa a three years' fierce war ended by peace terms extraordinarily magnanimous; in the West Indies flourishing islands suddenly made desolate by volcanic irruptions. As usual these world happenings materially affected the character of the year's literary product. Continued prosperity accompanied the publishing trade, with a welcome decrease in "book booming." In round numbers the new books aggregated about 3,500 titles, not including new editions of standard works, which would swell the total output to over 7,000.

## FICTION.

The great "sellers" of the year included "Audrey," by Mary Johnston (story of Colonial Virginia, concerning a beautiful, untaught, friendless orphan girl; also introducing historical characters, like Evelyn Byrd, etc.); "The Virginian," by Owen Wister (a vivid portrayal of the cowboy); "The Mississippi Bubble," by Emerson Hough (action revolving around John Law, the Pierpont Morgan of his time); "Dorothy Vernon of Haddon Hall," by Charles Major (romance of Elizabethan days); "The Fortunes of Oliver Horn," by F. Hopkinson Smith (artist life in New York forty years ago, with glimpses of the old South); "Temporal Power," by Marie Corelli (dealing with the power of princes, the church, and the people); "The Conqueror," by Gertrude Atherton (biography in fiction form of Alexander Hamilton); "The Hound of the Baskervilles," by Conan Doyle ("Sherlock Holmes" detective story), and "The Story of Mary MacLans" (a true and unpleasant human document of a Western girl).

America, its problems and varying life, bulked large in last year's fiction, the West claiming special attention. "The Captain of the Gray Horse Troop," by Hamlin Garland, is a plea for the reservation Indian; "Red Saunders," by Henry W. Phillips; "The Rustler," by Francis McElrath, and "Buell Hampton," by Willis G. Emerson, deal with cowboys and cattle herding; "The Blazed Trail," by Stewart Edward White, is a study of Michigan lumber camps, and Alfred Henry Lewis added two more volumes of "Wolfville" tales. Other American stories were "Philip Longstreth," by Marie Van Vorst (factory life near New York); "Aliens," by Mary T. Wright (present-day South); "Leopard's Spots," by Thomas Dixon, Jr. (discussing the negro problem and reconstruction from a Southern point of view); "The Spenders," by Harry Leon Wilson (tracing the history of the newly rich through three generations); "Morchester," by Charles Datchet (Middle States city life); "The Thirteenth District," by Brand Whitlock; "Marion Manning," by Edith Eustis; "The Henchman," by Mark Lee Luther, and "The Opponents," by Harrison Robertson, all having politics as their motive; "Those Black Diamond Men," by William F. Gibbons (graphically depicting the life of the coal miners); "The Little Brother," by Josiah Flynt (study of child tramp life); "The Climax," by Charles Felton Pidgin (what might have been Aaron Burr's history); "The Pastebord Crown," by Clara Morris (portrays life on the stage); "The Strollers," by Frederick S. Isham (theatrical life of sixty years ago), and "The Minority," by Frank Trevor Hill (trust methods in dealing with manufacturers). Newspaper work in New York enters into James Creelman's "Eagle Blood" and Robert Shackleton's "Many Waters," and an abolition of rents in New York sixty years ago into Ruth Hall's "The Downreter's Son." "Whom the Gods Destroyed," by Josephine Dodge Daskam, and "Melomaniacs," by James Huneker, cleverly present the dangers of the artistic temperament; "The Right Princess," by Clara Louise Burnham, pleads the cause of Christian Science; "Captain Jinks," by Ernest Crosby, protests in satirical form against militarism; "Things that Are Caesar's," by Reginald W. Kauffman, and "The Story of a Strange Career," edited by Stanley Waterloo, and said to be a veritable autobiography, are interesting studies in crime and punishment.

The Civil War was the subject of numerous tales, notably "The Battleground," by Ellen Glasgow, while the Revolution figures in Chambers' "The Maid-at-Arms," J. A. Altsheuler's "My Captive," and Rives' "Hearts Courageous." Martinique is the scene of Mrs. Latimer's "The Prince Inocognito" (cousin of Louis XV.), and "Daniel Everton," by Israel Putnam, shows the United States forces in the Philippines. Omission must not be made of Ottilie A. Liljencrantz's excellent story of the Norsemen's discovery of the New World, called "The Thrall of Lief the Lucky." From a literary viewpoint, "The House with the Green Shutters," by George Douglas (Brown), published late last year, was especially noteworthy. It is a forbidding but powerful story, laid in Scotland, of a hard, sordid man and his family cursed by their own characters. In "The Valley of Decision," Mrs. Edith Wharton wrote a scholarly if somewhat unconvincing story of Italy at the end of the eighteenth century. Special commendation may also be given to "Oldfield," by Nancy Huston Banks (described as the Kentucky "Cranford"); "Typhoon," by Joseph Conrad (storm at sea); "The Lady Paramount," by Henry Harland (idyllic romance); "The Confessions of a Wife," by Mary Adams, an evident pen-name (being a study in morbid femininity); "The Little White Bird," by James M. Barrie (whimsical glimpse into fairy land); "The Rescue," by Anne D. Sedgwick (man marries woman twenty years his elder); "The Two Vanrevels," by Booth Tarkington (an Indiana "comedy of errors" in the '40s), and "The Winding Road," by Elizabeth Godfrey (idyll of the open air). The recent novels by well-known authors were Henry James' "The Wings of the Dove," William D. Howells' "The Kentons," Eden Philpotts' "The River," Bret Harte's "Condensed Novels" (second series), Herbert G. Wells' "The Sea Lady," Sir Gilbert Parker's "Donovan Pasha," Henry Seton Merriman's "The Vultures," John Oliver Hobbes' "Love and the Soul Hunters," Anthony Hope's "The Intrusions of Peggy," Quiller-Couch's "The Westcotes," Marion Crawford's "Cecilia," Frank R. Stockton's "Kate Bonnet," and George W. Cable's "Bylow Hill."

## BIOGRAPHY AND HISTORY.

Biographies of especial merit issued in 1902 were Belloc's "Robespierre," Davidson's "Dumas," Leslie Stephen's "George Eliot," Cary's "William Morris," Mrs. Max Muller's biography of her husband, and Hensman's "Cecil Rhodes," while Herbert Spencer, Charlotte Yonge, Chamberlain, Matthew Arnold, William Black, Chatham, Charles V., and Jane Austen were all accorded creditable treatment. Morley's "Life of Gladstone" was announced but has not yet been published. Darwin's "Letters," Besant's "Autobiography," "Letters Between Bismarck and Kaiser Wilhelm I.," Bank's "Autobiography of a Newspaper Girl," and Mme. Adam's "Recollections" furnish examples of the personal outlook. There were eight works on Napoleon, the most important being Watson's, Rose's, and Dr. Stokoe's, with further light thrown by Napoleon himself in his "Letters to Josephine."

## LITERATURE IN 1902—Continued.

Thirteen books dealt with Shakespeare, including two by Lounsbury, one by Lanier, and a "Shakespeare Cyclopaedia" by Phin, aside from the discussion in books and magazines aroused by the publication of Mrs. Gallup's amazing "Bi-literal Cipher of Sir Francis Bacon." Admirable studies of Ruskin, Tennyson, and Browning were also written. America's great names, historical and literary, were represented by Eggleston's "American Immortals," Pemberton's "Bret Harte," McCall's "Webster" and "Webster's Letters" (hitherto unpublished), Woodberry's "Hawthorne," Thwaites' "Father Marquette" and "Daniel Boone," Riley's "Founder of Mormonism," Sedgwick's "De Champlain," Alderson's "Carnegie," and Barrett's and Smith's "Lincoln," with four books on McKinley, three on Washington, two on Aaron Burr, four on Roosevelt, and two on Longfellow. Of special present-day interest were Edward Everett Hale's "Memories of One Hundred Years," John Russell Young's "Men and Memories," Dr. Cuyler's "Recollections," George Francis Train's "My Life in Many States," Stoddard's "Recollections of a Player," and ex-Secretary Boutwell's "Reminiscences."

From an American point of view President Woodrow Wilson's "History of the American People" was of first importance. In wider field the "History of the World," edited by Helmholt, of which two volumes have appeared, is a monumental historical enterprise. "The Cambridge Modern History," under the editorship of A. W. Ward, with one volume out, may also be commended; likewise John Fiske's posthumous works, "Historical and Literary Essays" and "New France and New England," Traill's "Social England" (vol. 3), McCarthy's "Reign of Queen Anne," and Besant's "London in the Eighteenth Century" were distinct contributions to English history, while ten books were given up to South Africa, nine to China, and six to the Martinique disaster. Over eighty works of American history were published, including seven on the Indians and five on the Philippines. New York City, historically and politically considered, was the subject of twelve books, the best being Hemstreet's, Innes', Wilson's, Singleton's ("Social Life under the First Georges") and Riis' "Battle with the Slum."

## POLITICAL AND SOCIAL.

Territorial expansion, with its resulting colonization problems, and the related questions of trusts and labor and capital were exhaustively treated in 1902. Of special significance were Kidd's masterly work on "Principles of Western Civilization," Colquhoun's "Mastery of the Pacific," and Goldwin Smith's "Commonwealth or Empire;" while Reinsch, Snow, and Schurman discussed colonial administration. Flint's "The Trust," Meade's "Trust Finance," and Bolen's "Plain Facts" are perhaps of most importance in their line. The relation between labor and capital found exceptional treatment in "Labor and Capital" (a discussion of the relation of employer and employed), edited by J. J. Peters; Bishop Spalding's "Socialism and Labor," and Howells' "Labor Legislation," and from its sociological aspect Mrs. Bosanquet's "The Strength of the People," Gladden's "Social Salvation," Casson's "Organized Self Help," Adams' "Democracy and Social Ethics," and Bishop Potter's "The Citizen in His Relation to the Industrial Situation" were full of helpful suggestions. Politics was variously dealt with in Ostrogorski's "Democracy and the Organization of Political Parties," Wood's "Government and the State," and Dunning's "History of Political Theories," and in more specialized works on American affairs like Woodburn's "American Politics," Hart's "Actual Government as Applied Under American Conditions," Salmon's "History of the Appointing Power," and Meyer's "Nominating System." On finance there were Carnegie's "Empire of Business," Lorimer's "Letters of a Self-Made Merchant to His Son" (epitome of modern business life), and Burton's "Financial Crises," with Pratt's interesting description of "The Work of Wall Street." Zeublin wrote comprehensively on "American Municipal Affairs," with a kindred book by Fairlie, and one by Clow on "City Finances in the United States." Of great interest were H. G. Wells' "Anticipations" (clever forecast of future development), Lyman Abbott's "Rights of Man," Mahan's "Retrospect and Prospect" (essays of international relations), Adams' "New Empire" (United States, the fulfilment of the world's history, with its possible future), and Betts' "Leaven in a Great City" (New York's philanthropic and religious activities); and relating especially to England, "Liberalism and Empire" (essays), and "The Onlooker's Notebook" (brilliant comments on public questions).

## LITERATURE.

The year brought seven new editions of Shakespeare, two of Scott, two of Hawthorne, two of Byron, two of Tennyson, and one each of Thackeray, Carlyle, George Eliot, Jane Austen, Poe, Fielding, Fitzgerald, Samuel Lover, Charles Lever, Trollope, Bret Harte, Hazlitt, Hamilton Mabie, and Guizot's "France." A comprehensive survey of English literature was well begun in the first volume of Garnett and Gosse's "Illustrated History of English Literature," and other special literatures were treated in Einstein's "Italian Renaissance in England," Saintsbury's "History of Criticism" (vol. 2), and in Professor Sears' and Professor Trent's books on American literature. Wiener's "Anthology of Russian Literature" and Robertson's "German Literature" must also be noted. Among excellent works of literary criticism were Howells' "Literature and Life," Matthews' "Aspects of Fiction," Brandes' "Main Currents in Nineteenth Century Literature" (vol. 2), Perry's "Study in Prose Fiction," Burton's "Forces in Fiction," Warner's "Fashions in Literature," Halsey's "Our Literary Deluge," and Fisk's "Historical and Literary Essays." New books, prose and poetry, by Materlinck, Stephen Phillips, and Alfred Austin appeared, and coronation odes galore, notably Watson's and Bliss Carman's. Books of reference included a seventeen-volume "New International Encyclopedia," with three volumes published; three volumes of the "Jewish Encyclopedia," Larned's most useful bibliography; "The Literature of American History," and a "Concordance to Milton," taking rank with Skeat's "Concordance to Shakespeare."

## MISCELLANEOUS.

The year's records of exploration departed from main-travelled roads, notably in Norman's "All the Russias" (showing acute, well-trained powers of observation); in Capt. Wellby's "Twixt Sirdar and Menelik" (Abyssinia), in Sir Harry Johnston's "The Uganda Protectorate," in Lumholtz's "Unknown Mexico," and Bishop Potter's "The East of To-Day and To-Morrow," while Belloc's "Path to Rome" was a charming account of a walking tour through rural France and Italy; and Oxford, past and present, was described in John Richard Green's "Oxford Studies" and Corbin's "An American at Oxford." Christian Science, pro and con, was the subject of six books, and the "New Thought" movement also found extended treatment. Podmore's "Modern Spiritualism" and Savage's "Spiritism and Telepathy" best represent the occult sciences. Motor cars were variously written of by five experts. Other books of special interest were Tolstoy's "What Is Religion?" Herbert Spencer's "Facts and Comments" (present-day topics), Henderson's "Education and the Larger Life" (protest against forcing in education, with alternative plan outlined), Crossland's "The Unspeakable Scot," Hapgood's "Spirit of the Ghetto," and Newell's "Irrigation in the United States."

## Copyright Law of the United States.

DIRECTIONS FOR SECURING COPYRIGHT UNDER THE REVISED ACTS OF CONGRESS, INCLUDING THE PROVISIONS FOR FOREIGN COPYRIGHT, BY ACT OF MARCH 3, 1891.

SECTION 4,952 of the Revised Statutes of the United States, in force December 1, 1873, as amended by the act of June 18, 1874, as amended by the act of March 3, 1891, provides that the author, inventor, designer, or proprietor of any book, map, chart, dramatic or musical composition, engraving, cut, print, or photograph or negative thereof, or of a painting, drawing, chromo, statuary, and of models or designs intended to be perfected as works of the fine arts, and the executors, administrators, or assigns of any such person, shall, upon complying with the provisions of this chapter, have the sole liberty of printing, reprinting, publishing, completing, copying, executing, finishing, and vending the same; and, in the case of a dramatic composition, of publicly performing or representing it, or causing it to be performed or represented by others. And authors or their assigns shall have exclusive right to dramatize or translate any of their works for which copyright shall have been obtained under the laws of the United States.

### PRINTED TITLE REQUIRED.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print, photograph, or chromo, or a description of the painting, drawing, statue, statuary, or model or design for a work of the fine arts, for which copyright is desired, must be delivered to the Librarian of Congress, or deposited in the mail, within the United States, *prepaid*, addressed "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." This must be done on or before day of publication in this or any foreign country.

The printed title required may be a copy of the title-page of such publications as have title-pages. In other cases, the title must be printed expressly for copyright entry, with name of claimant of copyright. The style of type is immaterial, and the print of a typewriter will be accepted. But a separate title is required for each entry. The title of a periodical must include the date and number; and each number of a periodical requires a separate entry of copyright. Blank forms of application are furnished.

### FEE.

The legal fee for recording each copyright claim is 50 cents, and for a copy of this record (or certificate of copyright) under the seal of the office an additional fee of 50 cents is required, making \$1, if certificate is wanted, which will be mailed as soon as reached in the records. No money is to be placed in any package of books, music, or other publications. A money order or express order avoids all risk. In the case of publications which are the production of persons not citizens or residents of the United States, but who are citizens or subjects of any country with which the United States has copyright agreement, the fee for recording title is \$1, and 50 cents additional for a copy of the record. Certificates covering more than one entry in one certificate are not issued. Express orders, money orders, and currency only taken for fees. No postage stamps received.

### DEPOSIT OF COPIES.

Not later than the day of publication in this country or abroad, two complete copies of the best edition of each book or other article must be delivered at the office of the Librarian of Congress, or deposited in the mail within the United States, addressed "LIBRARIAN OF CONGRESS, WASHINGTON, D. C.," to perfect the copyright.

The freight or postage must be prepaid, or the publications inclosed in parcels covered by printed penalty-labels, furnished by the Librarian, in which case they will come FREE by mail (*not express*), without limit of weight, according to rulings of the Post-Office Department. Books must be printed from type set in the United States or plates made therefrom; photographs from negatives made in the United States; chromos and lithographs from drawings on stone or transfers therefrom made in the United States. In the case of paintings, drawings, statuary, or models or designs for works of art, a photograph of the article is to be sent in lieu of the two copies. Without the deposit of copies required the copyright is void, and a penalty of \$25 is incurred. No copy is required to be deposited elsewhere.

The law requires one copy of each new edition wherein any substantial changes are made to be deposited with the Librarian of Congress.

### NOTICE OF COPYRIGHT.

No copyright is valid unless notice is given by inserting in every copy published, on the title-page or the page following, if it be a book; or if a map, chart, musical composition, print, cut, engraving, photograph, painting, drawing, chromo, statue, statuary, or model or design intended to be perfected as a work of the fine arts, by inscribing upon some visible portion thereof, or on the substance on which the same is mounted, the following words, viz.: "Entered according to act of Congress, in the year —, by —, in the office of the Librarian of Congress, at Washington," or at the option of the person entering the copyright, the words: "Copyright, 19—, by —."

The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice, "Entered according to act of Congress," or "Copyright," etc., or words of the same import, in or upon any book or other article, whether such article be subject to copyright or not.

### TRANSLATIONS.

The copyright law secures to authors and their assigns the exclusive right to translate or to dramatize any of their works; no notice is required to enforce this right.

### DURATION OF COPYRIGHT.

The original term of copyright runs for twenty-eight years. Within six months before the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two in all.

### RENEWALS.

Application for renewal must be accompanied by printed title and fee; and by explicit statement of ownership, in the case of the author, or of relationship, in the case of his widow or children, and must state definitely the date and place of entry of the original copyright. Within two months from date of renewal the record thereof must be advertised in an American newspaper for four weeks.

### TIME OF PUBLICATION.

The time of publication is not limited by any law or regulation, but the courts have held that it should take place "within a reasonable time." A copyright may be secured for a projected as well as for a completed work. But the law provides for no caveat or notice of interference—only for actual entry of title.

### ASSIGNMENTS.

Copyrights are assignable by any instrument of writing. Such assignment is to be recorded in the office of the Librarian of Congress within sixty days from execution, "in default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice." The fee for this record and certificate is \$1, and for a certified copy of any record of assignment \$1. A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal of the office, at the rate of 50 cents each.

## The Hall of Fame.

MARCH 5, 1900, the Council of New York University accepted a gift of \$100,000 from a donor, whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was accordingly built in the form of a semi-circle, 506 feet long, 15 feet wide, and 170 feet high, connecting the University Hall of Philosophy with the Hall of Languages. Within the colonnade 150 panels, each 2 by 8 feet, are to be placed, to bear the names of Americans deemed the greatest in their respective fields. Under the rules adopted only persons born on what is now United States territory and who shall have been dead ten or more years are eligible to be chosen, and they must be selected from fifteen classes of citizens, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. Should there be a failure to select the entire fifty names at the beginning the vacancies shall be filled in a following year.

The rules prescribed that the Council should invite nominations from the public. Every nomination seconded by a member of the University Senate should be submitted to an electorate of one hundred eminent citizens selected by the Council, each of whom must vote for fifty of the candidates.

In October, 1900, the University Senate received the ballots of the judges. Of the one hundred judges selected ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart, Asa Gray.

It was decided to select the remaining twenty-one names of the first fifty in 1902, under the same rules, but as the official book was not ready until late in 1901, the Senate reconsidered its action and decided to do no more than it was required to do by the deed of gift, namely, to fill the vacant panels in 1905. At that time, therefore, twenty-six panels will be filled. All names which received as many as ten votes in the first trial can be voted for. The same judges will act. Provision will be made for an additional wall having thirty panels, to contain the names of foreign-born Americans.

## The Carnegie Institution,

OF WASHINGTON, D. C.

ANDREW CARNEGIE on January 28, 1902, by a deed created a trust for the benefit of the Carnegie Institution, of Washington, D. C., the introductory part of said deed being in these terms:

I, Andrew Carnegie, of New York, having retired from active business, and deeming it to be my duty and one of my highest privileges to administer the wealth which has come to me as a trustee in behalf of others; and entertaining the confident belief that one of the best means of discharging that trust is by providing funds for improving and extending the opportunities for study and research in our country; and having full confidence in the gentlemen aforementioned, who have at my request signified their willingness to carry out the trust which I have confided to them; therefore I have transferred to these, the Trustees of the Carnegie Institution, of Washington, ten millions of registered five per cent bonds of the United States Steel Corporation.

The Trustees include the President of the United States and other eminent citizens.

The Carnegie Institution will undertake:

First—To promote original research by systematically sustaining projects of broad scope that may lead to the discovery and utilization of new forces for the benefit of man, pursuing each with the greatest possible thoroughness.

Second—Projects of universal scope that fill in gaps of knowledge of particular things or restricted fields of research.

Fifth—The administration of a department of scientific research under a single director of competent methods.

Sixth—The appointment of research assistants.

Seventh—To increase the facilities for higher education by (a) original research in universities and institutions of learning; (b) by such means as may be practicable and advisable.

The selection of a site for a home for the Institution in Washington is under consideration.

The officers of the Carnegie Institution are:

President of the Institution—Dr. Daniel C. Gilman.

Officers of the Board of Trustees—Abram S. Hewitt, Chairman; Dr. John S. Billings, Vice-Chairman; Dr. Charles D. Walcott, Secretary.

Executive Committee—Abram S. Hewitt, Charles D. Walcott, John S. Billings, Daniel C. Gilman, S. Weir Mitchell, Elihu Root, Carroll D. Wright.

Assistant Secretary—Marcus Baker.

The office of the Institution is at 1439 K Street, Washington, D. C.

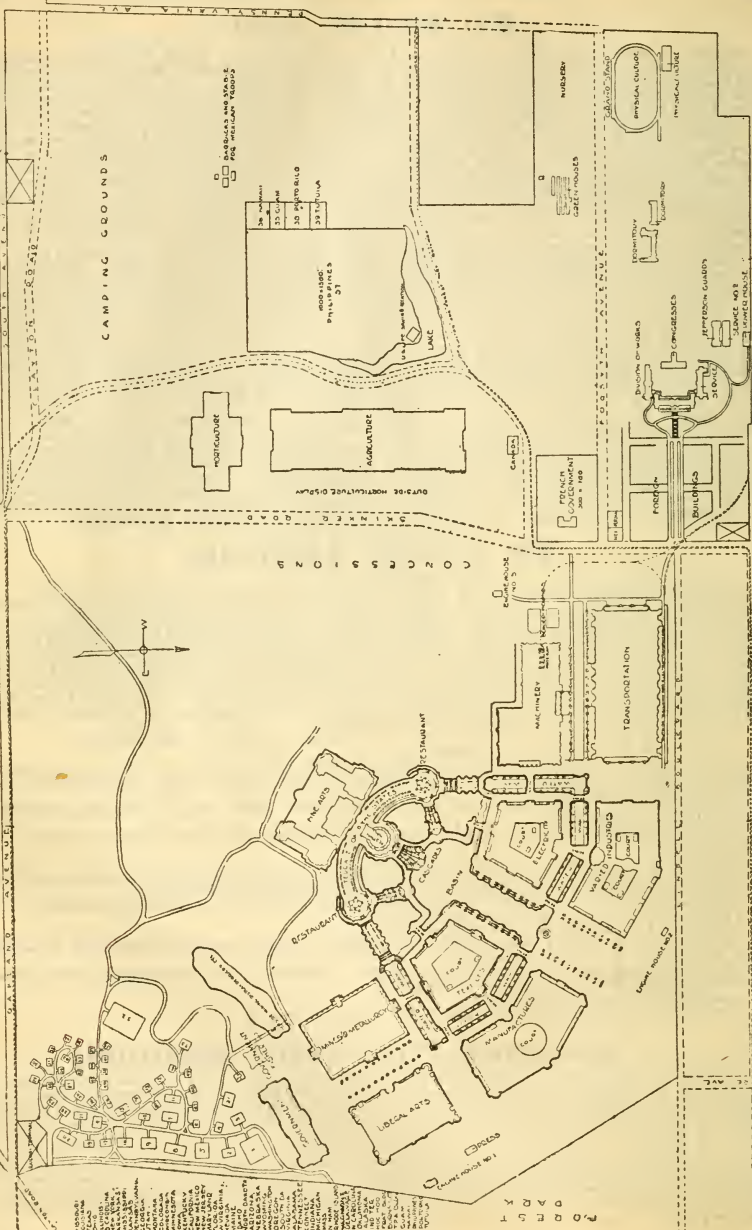

## Jamestown Tercentennial Exposition.

ON May 13, 1907, will occur the three hundredth anniversary of the settlement at Jamestown, Virginia, by the English. It will be commemorated by an international exposition. The Virginia Legislature has chartered the Jamestown Exposition Company, which has been organized with General Fitzhugh Lee as President. The incorporators number 100 of the leading citizens of Virginia. The act of incorporation provides that the organizers shall have subscribed by January 1, 1907, the sum of \$1,000,000. A site for the exposition has been selected at Sewall's Point, a sandy spot projecting into Hampton Roads about six miles directly north of Norfolk, and, therefore, close also to Newport News, Hampton, and Old Point Comfort. The magnificent harbor at the disposal of the exposition enterprise will afford a means for display on original lines, and which will be of surpassing beauty and accessibility at a smaller financial expenditure than expositions of similar importance have required.

## The World's Fair at St. Louis in 1904.

### PRELIMINARY WORK—FINANCES.

THE year 1903 will see the construction of what is intended to be the greatest exposition in all history, to celebrate in 1904 the centennial of the Louisiana Purchase. By act of Congress June 30, 1902, the Exposition was postponed from 1903 to 1904. While the official title is the "Louisiana Purchase Exposition," the shorter name "World's Fair," is preferred by the public and used by the Exposition in its literature. Agitation looking to the celebration of the Louisiana Purchase centennial Stephens of Missouri, in response to a popular sentiment, called a convention of the twelve States and two Territories in the Purchase for January 10, 1899. The States and Territories concerned were Montana, Wyoming, North Dakota, South Dakota, Minnesota, Iowa, Nebraska, Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Louisiana. This convention met at the Southern Hotel, in St. Louis, all of these States and Territories being represented and the convention consisting of ninety-three delegates.

Up to this time the building of some sort of memorial structure had been talked of, one suggestion being that of a great museum, but with the meeting of the convention the broader idea of a great international exposition was evolved. St. Louis, the metropolis of the Purchase, was unanimously chosen as the city in which the Exposition should be held, and the responsibility was promptly accepted by her representatives. The sum of \$5,000,000 was raised by private subscription, and the city of St. Louis issued \$5,000,000 in bonds in the furtherance of the enterprise. The United States Government added \$5,000,000 to this fund by act of Congress March 4, 1901. The appropriation bill provided for a government commission of nine members, who were at once appointed by President McKinley. A board of lady managers was also authorized.

### CONSTRUCTION WORK.

Seven sites were offered in and about St. Louis and a choice made on June 25, 1901, when the western half of Forest Park with adjacent lands was agreed upon by the Board of Directors. The total area taken is 1,180 acres, the site being in the form of a parallelogram approximately one mile wide by two miles long. The grounds are in the western part of St. Louis, six miles from the Mississippi River, and lying partly in St. Louis County. The land is hilly, and for that reason will give to the World's Fair an aspect widely different from that of any former exposition. About half the land is covered with forest trees, which have been removed only when necessary to make room for a building. This abundance of shade will also add immeasurably to the beauty of the completed Exposition. The clearing of the site was begun in August, 1901, and on September 3 the first stake was driven. The first shovelful of earth, marking the beginning of building construction, was lifted by President Francis December 20, 1901, the mercury registering ten degrees below zero. First contracts for exhibit buildings were let in February, 1902. The Textiles building was completed in 1902, and the construction of nearly all the other large buildings was well advanced.

### THE IMPORTANT BUILDINGS.

A total of fifteen great exhibit buildings is provided for in the general plan. These buildings, dimensions, and cost are as follows: United States Government, 800 by 200 feet, cost, \$400,000; Education, 400 by 600, cost, \$350,000; Art, 836 by 451, cost, \$1,000,000; Liberal Arts, 525 by 750, cost, \$475,000; Manufactures, 525 by 1,200, cost, \$719,399; Varied Industries, 525 by 1,200, cost, \$604,000; Textiles, 525 by 750, cost, \$319,399; Machinery, 525 by 1,000, cost, \$496,957; Electricity, 525 by 750, cost, \$399,940; Transportation, 525 by 1,300, cost, \$700,000; Agriculture, 600 by 1,600, cost, \$800,000; Horticulture, 400 by 800, cost, \$200,000; Forestry and Fisheries, 400 by 600, cost, \$350,000; Ordnance building, dimensions to be determined. In the "main picture" eight buildings are grouped in the northeastern part of the grounds upon a nearly level portion of the site. These are the Manufactures, Liberal Arts, Mines, and Textiles, which lie east of a broad central avenue; Varied Industries, Transportation, Electricity, and Machinery, which are west of the avenue. A highly ornate festival hall and curved screen crown the hill southwest of the group, and the three palaces of Art are a few rods further south on the hill. The magnificent building of the United States Government is on the hill southeast of the group. The arrangement is fan-shaped the Art group being at the apex and the avenues forming the ribs. The Agriculture, Horticulture, and other buildings are on high ground to the westward. Contracts call for the completion of all buildings and all important features during the season of 1903.

### LANDSCAPE FEATURES, ELECTRICAL EFFECTS, SCULPTURE.

Avenues between the buildings in the "main picture" are 300 to 600 feet wide. They will be enriched with flowers and shrubs in formal array. Sculpture will be placed at salient points and the history and progress of the Louisiana Purchase will be told in the sculptured figures and groups. Practically all the noted sculptors of the United States are engaged upon this work. About 250 original groups, containing 1,650 figures, will make up this feature of the Exposition. These groups will adorn entrances to buildings, gateways, bridges, balconies, gardens, and fountains. A most picturesque feature is arranged in a natural amphitheatre between the Art buildings and the others of the group. Three great cascades will tumble down the slope, discharging into the grand basin. This lively picture will be made brilliant at night with a flood of electric light.

The most extraordinary electrical display ever undertaken is promised for this Exposition. The grand basin is a part of a lagoon system, more than a mile in extent, the waterways encircling the Electricity and Textile buildings. The Festival Hall, the lofty feature of this central picture, will cover two acres. The design is rich in festive detail, and the proportions imposing and graceful.

### SCOPE OF THE EXPOSITION.

The Exposition aims to cover every important activity of the human hand and mind. The fifteen exhibit departments are as follows: Education, Liberal Arts, Manufactures, Machinery, Electricity, Transportation, Agriculture, Horticulture, Forestry, Mines and Metallurgy, Fish and Game, Anthropology, Social Economy, Physical Culture. A series of International Congresses will be held, bringing together famous scholars from every part of the world. These congresses will cover a wide range of

## THE WORLD'S FAIR AT ST. LOUIS IN 1904—Continued.

thought in law, medicine, religion, engineering, economics, philosophy, &c. In all its features, where practicable, the Exposition will show methods, processes, appliances, and machinery in active use. The production of articles of usefulness and value will be carried on to an extent never before attempted at an Exposition. Electric current to the amount of more than 20,000 horse-power will be supplied to turn the wheels of the Exposition, drive the intra-mural railway, nearly ten miles in length, and to supply electric lights and the water service for cascades and fire protection.

## STATE AND FOREIGN PARTICIPATION.

Indications point to an almost complete representation at the Exposition on the part of States of the Union and the governments of the world. Up to November 1, 1902, acceptances had been received from twenty-three foreign governments, while the Governors of thirty-four States and Territories of the United States had appointed commissions to prepare and install exhibits at the Exposition. Many of the States have made large appropriations for this purpose, notably: Missouri, \$1,000,000; Illinois, \$250,000; Iowa, \$125,000; New York, \$100,000; Louisiana, \$100,000; Philippine Islands, \$500,000; Kansas, \$75,000; Ohio, \$75,000; Colorado, \$50,000; Minnesota, \$50,000; Arkansas, \$30,000; Maryland, \$25,000; Wisconsin, \$25,000; Porto Rico, \$20,000; New Mexico, \$20,000. Texas is raising a fund of \$300,000. Counties of California have made appropriations ranging from \$2,000 to \$20,000 each. Appropriations and increases of those already made will be made by many States during 1903. France has made a preliminary appropriation of \$125,000; Canada, \$120,000; Japan, \$250,000. China will be represented by an Imperial Commission.

## AIRSHIP CONTESTS.

The Board of Directors has set aside \$200,000 to be offered as prizes and to defray the expenses of a tournament of airships. The grand prize for the most successful dirigible airship is \$100,000, lesser prizes being offered for special work. Information from all parts of the world indicates a large number of entries. The course is ell-shaped and the entire flight of ships in the contest less than fifteen miles. The starting point and finish are at the angle in the ell, the ships being required to make a turn at the two extremes.

Other important features of the Exposition will be a horse show upon fashionable lines, a live stock show covering twenty-five acres, the Philippine exhibit covering forty acres, special exhibits from Hawaii, Guam, and Porto Rico.

**Organizations for the Promotion of Education.****THE PEABODY EDUCATION FUND.**

IN 1867 and 1869 George Peabody established a fund of \$3,500,000, to be devoted to education in the Southern States of the Union. Of this amount \$1,380,000 being in Mississippi and Florida bonds was not available, those of Mississippi having been repudiated and those of Florida issued while it was a territory, never having been recognized as legal by its authorities. The fund was placed in the charge and control of fifteen trustees, of whom Mr. Robert C. Winthrop, of Massachusetts, was the chairman. Mr. Peabody died in London in 1869. The trustees hold meetings annually, usually in New York. They fill vacancies caused by death or resignation. The present trustees are: Chief Justice Fuller, President of the board; Joseph Choate, First Vice-President; D. C. Gilman, Second Vice-President; Jabez L. M. Curry, LL.D., General Agent; J. Pierpont Morgan, M. K. Jesup, of New York; President Theodore Roosevelt, of New York; Samuel A. Green, Richard Olney, and George F. Hoar, of Massachusetts; ex-Mayor William A. Courtenay, of South Carolina; James D. Porter, of Tennessee; Henderson M. Somerville, of New York; George Peabody Wetmore, of Rhode Island; Charles E. Fenner, of Louisiana; Hoke Smith, of Georgia, and Right Rev. William C. Doane, Dr. Curry is general agent of the fund, with headquarters at Washington, D. C., and has charge of the distribution of the fund in the several Southern States. In its earlier history the chief aim of the fund was to encourage and secure the establishment of public school systems for the free education of all children. That having been accomplished, the income of the fund is now used for the training of teachers through Normal Schools and Teachers' Institutes.

**THE JOHN F. SLATER FUND.**

IN 1882 Mr. John F. Slater, of Connecticut, placed in the hands of trustees the sum of \$1,000,000, for the purpose of "uplifting the lately emancipated population of the Southern States and their posterity." For this patriotic and munificent gift the thanks of Congress were voted, and a medal was presented. Neither principal nor income is expended for land or buildings. Education in industries and the preparation of teachers are promoted in institutions believed to be on a permanent basis. The board consists of D. C. Gilman, of Johns Hopkins University, as President; Chief Justice Fuller, as Vice-President; Morris K. Jesup, as Treasurer; J. L. M. Curry, as Secretary and General Manager, and Dishops Potter and Galloway, and Messrs. William E. Dodge, William A. Slater, John A. Stewart, Alexander E. Orr, and William H. Baldwin, Jr. The fund is a potential agency in working out the problem of the education of the negro, and over half a million of dollars has already been expended. By the extraordinary fidelity and financial ability of the treasurer, the fund, while keeping up annual appropriations, has increased to \$1,500,000. Schools established by States, denominations, and individuals are helped by annual donations. Among the most prominent are the Hampton Normal and Industrial, the Spelman, the Tuskegee, and schools at Orangeburg, S. C.; Tougaloo, Miss.; Marshall, Tex.; Raleigh, N. C.; New Orleans, the Meharry Medical College at Nashville, etc.

**THE SOUTHERN EDUCATION BOARD.**

The Southern Education Board of the Conference for Education in the South—the outcome of the Capon Springs and Winston-Salem Conferences—has been organized with these officers and members: *Chairman*, Robert C. Ogden, New York; *Secretary*, C. D. McIver, Greensboro, N. C.; *Treasurer*, George Foster Peabody, New York; *Supervising Director*, J. L. M. Curry, Washington, D. C.; *Director of Bureau of Investigation, Information, and Literature*, C. W. Dabney, Knoxville, Tenn. The object of this organization is to awaken and inform public opinion and secure additional legislation and revenues for the betterment of the public schools, "the supreme public need of our time."

**THE GENERAL EDUCATION BOARD.**

The General Education Board was organized in New York February 27, 1902, with William H. Baldwin, Jr., as Chairman; George Peabody Foster, Treasurer; Wallace Buttrick, Secretary, and Dr. J. L. M. Curry, F. G. Gates, D. C. Gilman, Morris K. Jesup, R. C. Ogden, Walter H. Page, and Albert Shaw as members. The purposes of the Board are to promote education in the United States, without distinction of race, sex, or color; to develop the public school system, especially in rural districts; to further the establishment of training schools for teachers, and generally to promote by all suitable means every form of valuable educational work.

**CATHOLIC SUMMER SCHOOL OF AMERICA.**

A Roman Catholic Chautauqua or Summer School was opened at New London, Ct., in the Summer of 1892 under the auspices of distinguished clergymen and laymen, and the first meetings were held from July 30 to August 14. The association has since acquired a site at Cliff Haven, near Plattsburg, N. Y., on Lake Champlain, upon which the necessary buildings have been erected, and here the Summer School is held annually in July and August. The work of the institution is continued throughout the year by means of reading circles and study clubs on the University Extension plan. The President is the Rev. Michael J. Lavelle, LL.D., New York, and the Secretary, Warren E. Mosher, A. M., 39 East Forty-second Street, New York.

\* The difference between the cheers of Harvard and Yale lies in the length of time it takes to give them. Harvard's cheer is long and deep; Yale's quick and sharp.

## University Extension.

THE American Society for the Extension of University Teaching was founded at Philadelphia in June, 1890, and incorporated in March, 1892. The present officers of the Society are: *President*—Charles A. Brinley. *Treasurer*—Frederick B. Miles. *Secretary*—John Nolen. The office is in Philadelphia, Pa. The aim of University Extension is:

First—To extend higher education to all classes of people.

Second—To extend education through the whole of adult life.

Third—To extend thorough methods of study to subjects of everyday interest.

The work of the Society is carried on through lecture courses in a large number of centres in Pennsylvania, New York, New Jersey, Maryland, Connecticut, and other States. The subjects treated are history, literature, music and art, ethics and philosophy, economics, political economy and sociology, and science.

From Philadelphia the movement has extended into many sections of the country, being established mainly, however, in connection with colleges and universities. The most important work, outside of that of the general Society in Philadelphia, is carried on under the auspices of the University of Chicago, the Regents of the University of the State of New York, Rutgers College, New Brunswick; the University of Wisconsin, and in California.

The various University Extension Societies all publish syllabi in connection with their courses. These contain suggestive outlines of lectures, lists of books, and other matter of interest, and are of value for guiding home reading and study. Sample syllabi and circulars descriptive of University Extension can be obtained by addressing John Nolen, Secretary, 111 South Fifteenth Street, Philadelphia, Pa.

## Chautauqua.

### AN INSTITUTION FOR POPULAR EDUCATION.

*Chancellor*—John H. Vincent. *First Vice-President*—Wilson M. Day. *Treasurer*—Warren F. Walworth. *Chairman of the Executive Board*—Joseph C. Neville. *Executive Secretary*—Kate C. Kimball. *General Director*—Scott Brown. *Secretary*—Ira M. Miller. *Director of Extension*—Frank A. Catteru. *Principal of Instruction*, Chicago—George E. Vincent. The headquarters are at Chautauqua, N. Y.

The *Chautauqua Assembly* was organized in 1874 as the result of a joint plan of Lewis Miller and John H. Vincent. It holds annual sessions during July and August at Chautauqua, N. Y. The plan includes courses of instruction in language, literature, science, and art, lecture courses, musicales, recitals, and concerts, and various forms of entertainment and recreation. The local assemblies, which convene in different places through the Summer throughout the United States, number 156.

The *Chautauqua Literary and Scientific Circle*, Kate F. Kimball, Chautauqua, N. Y., Executive Secretary, was organized at Chautauqua in 1878, with the aim of continuing the influence of the Assembly throughout the year in all parts of the country. Since that time more than two hundred and fifty thousand members have been enrolled. The Circle aims to promote habits of reading and study in history, literature, science, and art, in connection with the routine of daily life. The course seeks to give "the college outlook" on the world and life. The essentials of the plan are: A definite course covering four years, each year's course complete in itself; specified volumes approved by the counselors, allotment of time by the week and month, a monthly magazine with additional readings and notes, a membership book with review outlines, and other aid. Individual readers may have all the privileges, and local circles may be formed by three or four members. The time required is about one hour daily for nine months. Certificates are granted to all who complete the course. Seals are affixed to the certificates which are granted for collateral and advanced reading. Any one may become a member of the C. L. S. C. by sending an application, together with 50 cents (the annual fee), to Chautauqua Institute, Chautauqua, N. Y.

## National Educational Association.

*President*—Charles W. Elliot, of Harvard University. *First Vice-President*—W. M. Beardshear, Iowa. *Permanent Secretary*—Irvin Shepard, Winona, Minn. *Treasurer*—W. N. Davidson, Kansas. Business office of the Association at Winona, Minn. Depository of Association at 450 Pennsylvania Avenue, Washington, D. C. Object—To elevate the character and advance the interests of the profession of teaching, and to promote the cause of public education in the United States. Annual dues for active members and for associate members, \$2. Annual meetings of the General Association are held in July. There are about 2,800 active, and an average of 10,000 associate members. The Association has a permanent invested fund of about \$90,000.

## The United Chapters of Phi Beta Kappa.

THE National Council, Phi Beta Kappa, is composed of fifty-three different college chapters. At the triennial session at Saratoga Springs, N. Y., September 12, 1901, the following officers and Senators were elected: *President*—J. A. De Remer, Schenectady, N. Y. *Vice-President*—Prof. J. C. Van Benschoten, Middletown, Ct. *Secretary and Treasurer*—Rev. O. M. Voorhees, Three Bridges, N. J. *Senators*—Joseph H. Choate, New York City; J. A. De Remer, Schenectady, N. Y.; T. E. Hancock, Syracuse, N. Y.; Prof. Samuel Hart, D. D., Hartford, Ct.; Col. T. W. Higginson, Cambridge, Mass.; Seth Low, New York City; H. W. Mabie, New York City; Prof. F. A. March, Easton, Pa.; H. E. Scudder, Cambridge, Mass.; Prof. J. C. Van Benschoten, Middletown, Ct.; Prof. H. L. Chapman, Brunswick, Me.; Rev. E. E. Hale, Roxbury, Mass.; Col. William Lamb, Norfolk, Va.; Rev. E. B. Parsons, Williamstown, Mass.; President C. F. Thwing, Cleveland, O.; Prof. Adolph Werner, New York City; Prof. E. A. Grosvenor, Amherst, Mass.; President Ira Remsen, Baltimore, Md.; Rev. O. M. Voorhees, Three Bridges, N. J.; President B. I. Wheeler, Berkeley, Cal.

The original chapter was organized December 5, 1776, at Williamsburg, Va., in connection with William and Mary College, and the organization has had ever since a continuous existence. There are at present over 11,000 living members. Five presidents have been Phi Beta Kappa men: J. Q. Adams, Pierce, Garfield, Arthur, and Roosevelt. A badge of the Society was presented the President December, 1901, the one hundred and twenty-fifth anniversary of the organization.

The returns of the Grand Lodges of the United States and British America for 1901-1902 were as follows: Whole number of members, 901,968; raised, 57,793; admissions and restorations, 23,675; withdrawals, 19,668; expulsions and suspensions, 5-42; suspensions for non-payment of dues, 14,293; deaths, 14,400. Gain in membership over preceding year, 24,206.

These Grand Lodges are in full affiliation with the English Grand Lodge, of which the Duke of Connaught is Grand Master, and the Grand Lodges of Ireland, Scotland, Cuba, Peru, South Australia, New South Wales, Victoria, and also with the Masons of Germany and Austria. They are not in affiliation and do not correspond with the Masons under the jurisdiction of the Grand Orient of France; they, however, affiliate with and recognize Masons under the jurisdiction of the Supreme Council. Freemasonry is under the ban of the Church in Spain, Italy, and other Catholic countries, and the membership is small and scattered.

SUPREME COUNCIL OF SOVEREIGN GRAND INSPECTORS-GENERAL OF THE THIRTY-THIRD AND LAST DEGREE OF THE ANCIENT AND ACCEPTED SCOTTISH RITE, AS ORGANIZED BY

JOSEPH CERNEAU, THIRTY-THIRD DEGREE, IN THE YEAR 1807.

- M. P. Sovereign Grand Commander*..... Max Scheuer, N. Y.
- Grand Secretary-General*..... Judah Moses, N. Y.

The Sovereign Grand Consistory has had a continuous existence of ninety-five years, with its Grand Orient at New York, where, under the aegis of the Grand Orient of France, it was organized by M. J. Joseph Cerneau, thirty-third degree. The Supreme Council has fraternal relations with the Supreme Councils of Great Britain and Ireland, Canada, Italy, Egypt, Cuba, Argentina, Australia, New Zealand, Mexico, Belgium, Germany, and Switzerland, and other Grand Orients. It has jurisdiction over seventy subordinate Consistories of Sublime Princes of the Royal Secret, which are subdivided into Lodges of Perfection, Councils of Princes of Jerusalem, Chapters of Rose Croix, and Consistories, with a membership of many thousands. The two Consistories in the Borough of Manhattan are Cerneau, No. 1, with over a thousand Sublime Princes, and Giordano Bruno, No. 66, working in the Italian language. The official address of the Supreme Council is No. 320 Temple Court, Beekman Street, New York City.

Christian Science.

THE Christian Scientists reported in May, 1900, that there were 377 churches of the faith in the United States and 90,000 adherents. It is claimed that since that date additional churches have been built and the number of adherents has largely increased. There are flourishing churches in London, England; Paris, France; Dresden, Berlin, and Hanover, Germany, and in Canada, Brazil, and Scotland. The mother church is located in Boston, Mass., and those all over the country are its branches. Their services are uniform, consisting of two meetings on Sunday and one on Wednesday evening. No sermons are preached by a personal pastor, but a sermon made up of selections from the Bible and "Science and Health," with key to the Scriptures, is read by two readers, called the first and second readers.

Mrs. Laura Lathrop, C. S. D., of New York, has made the following statement of the claims made in behalf of Christian Science: This church is emphatically a healing church, and many cases of restoration to health have been testified to during the past few years, brought about by attendance on one of these meetings. Christian Science is demonstrable Christianity. Through the spiritual understanding of the teachings of Christ Jesus, its followers are enabled to obey His command to "heal the sick" and do the works He and His disciples did. The omnipotence, omnipresence, and omniscience of God are proved to be true. Christian Science is not mind-cure, as that is popularly understood, because it recognizes but one mind, God. It is not faith-cure, because it does not perform its wonderful works through blind faith in a personal god, but through the understanding of man's relation to God. It is not mesmerism or hypnotism, because it denies absolutely the power of the human mind and human will, and claims no will but God's. Through recognizing the one mind and the man as the reflection of that mind, it forever establishes the brotherhood of man. It is the perfect salvation from sin, disease, and death Christ Jesus came to bring. In "Rudimental Divine Science," Mrs. Eddy defines Christian Science "as the law of God, the law of good, interpreting and demonstrating the principle and rule of eternal harmony."

**Theosophy.****THE UNIVERSAL BROTHERHOOD.**

THE Universal Brotherhood for the benefit of the people of the earth and all creatures was founded by Katherine A. Tingley, January 13, 1898, at New York City. This organization is the outgrowth and expansion of the Theosophical Society founded by H. P. Blavatsky, W. Q. Judge, and others at New York in 1875 and reorganized under William Q. Judge at its annual convention at Boston, Mass., in 1895. The constitution of the Universal Brotherhood was adopted by the Theosophical Society in America at its annual convention held in Chicago February 18, 1898, by which act the Theosophical Society in America became the Literary Department of the Universal Brotherhood.

The Universal Brotherhood, or the Brotherhood of Humanity, declares that brotherhood is a fact in nature. The principal purpose of the organization is to teach brotherhood, demonstrate that it is a fact in nature, and make it a living power in the life of humanity. Its subsidiary purpose is to study ancient and modern religion, science, philosophy, and art, to investigate the laws of nature and the divine powers in man. It declares in its constitution that every member has a right to believe or disbelieve in any religious system or philosophy, each being required to show that tolerance for the opinions of others which he expects for his own.

There are over 150 lodges of the Universal Brotherhood in the United States and Canada, also lodges in England, Ireland, Sweden, Holland, France, Germany, Greece, India, Australia, and New Zealand. The central office of the organization is at Point Loma, San Diego, Cal.

The officers are: Katherine A. Tingley, *Leader and Official Head*; Frank M. Pierce, *Secretary General*; E. Aug. Neresheimer, *Treasurer*.

**THE THEOSOPHICAL SOCIETY IN AMERICA.**

The Theosophical Society in America is the Literary Department of the Universal Brotherhood. Its principal purpose is to publish and disseminate literature relating to Theosophy, brotherhood, ancient and modern religions, philosophies, sciences, and arts. Its subsidiary purpose is to establish and build up a great library in which shall be gathered ancient and modern literature of value to the great cause of universal brotherhood.

The headquarters of the Theosophical Society in America are at Point Loma, San Diego, Cal. *President*, E. Aug. Neresheimer.

**The Salvation Army.**

This is a body of men and women organized in the form of a military force, its object being the evangelization of the unchurched masses. It has its International Headquarters at 101 Queen Victoria Street, London, E. C., England, and the headquarters for the United States at 120 West Fourteenth Street, New York City. Its officers are: General, chief-of-staff, commissioner, or commander, colonel, brigadier, major, staff captain, adjutant, ensign, captain, and lieutenant.

The Salvation Army, known originally as the Christian Mission, was created at Mile End, London, July 5, 1865, by the Rev. William Booth, a minister of the "Methodist New Connection." The present name was adopted in 1878. At first treated with a good deal of derision and occasionally with violence from the classes among which it worked, its earnestness and remarkable achievements have gradually won the respect and encouragement of many of the most prominent divines and laymen of the evangelical denominations.

William Booth is the general and commander-in-chief of the forces throughout the world. His headquarters are at London. He was born in Nottingham, England, April 10, 1829, and became an evangelist at fifteen years of age. He entered the ministry in 1852. He is the author of a number of books, the most celebrated being "In Darkest England and the Way Out." The United States commanders are Commander and Consul Booth-Tucker.

The army numbers, according to the last reports, 1,338 corps and 4,306 officers in Great Britain; 831 corps and 1,527 officers in Australia, and 735 corps and 2,709 officers in the United States. The organization extends to nearly all the countries of the world. The number of periodicals printed or published is 55, with a combined weekly circulation of over a million. The annual rental roll is over \$1,000,000. The amount of property owned by this organization now exceeds \$4,000,000, and the annual income is more than \$5,000,000. The organization also has in the United States cavalry brigades, out-riders' circuits, maternity homes, labor bureaus, women's shelters, and an inquiry department, which looks up missing friends and relatives.

**The Volunteers of America.**

THE Volunteers of America is a philanthropic and religious organization, inaugurated in March, 1896, by Commander and Mrs. Ballington Booth in response to numerous requests on the part of American citizens. It is organized in military style, having as its model the United States Army, but in conjunction with military discipline and methods of work it possesses a thoroughly democratic form of government, having as its ideal the Constitution of the United States of America.

The Volunteers have four branches of philanthropic work:

1. The Sociological Branch, or that which embraces the homes that are provided for destitute men and workmen. The homes or hotels for workmen are furnished and rooms are let for \$1 per week. There are four of these homes in Chicago, one in Joliet, one in Kansas City, one in Brooklyn, and one in Philadelphia.

2. The Home of Mercy Branch. These homes are open to any young woman who comes there and asks for admission, and no questions are asked. Over 2,000 beds have been provided for young women in the homes in Newark, N. J., and Boston, Mass.

3. The Volunteer Tenement Work among the deserving poor.

4. The Philanthropic Branch is the work among the poor children.

The Volunteers have an unparalleled work in their Volunteer Prison League. Mrs. Ballington Booth's most recent report sets forth that the organization has now Leagues formed in 13 State prisons, embracing 7,500 prisoners who are living reformed and subordinate lives within the prison precincts. A correspondence for the moral elevation and benefit of their families is carried on with some 19,000 men. There are two large homes known as Hope Halls, one leased in Chicago, accommodating 40 men, another owned by the Volunteers in Flushing, which, with the new wing, is expected to accommodate 50 men, surrounded by 10 acres of ground, one leased in Chicago, expected to accommodate 50 men, surrounded by 10 acres of ground, over 70 per cent of these men have given satisfaction in the places of occupation and trust in which they have been placed. The headquarters of the Volunteers are at No. 38 Cooper Square, nearly opposite the Cooper Institute, New York.

The estimates in the last table are from Whitaker's (London) Almanack, 1895.

The "Encyclopedia Britannica," last edition, makes a rough estimate of numbers of Protestants in the world speaking all civilized languages, and places the Lutherans at the head, with over 42,000,000 members mostly in Germany and Scandinavia), and the Anglican Church second, with about 20,000,000 members. \* United States census of 1890. The American Jewish Year Book for 1900 estimated the number of Jews in the United States at 1,058,135 and in the world at 11,723,947 in 1900.

The aggregate of about 28,000,000 represents actual church membership, and includes all Catholics, but not all persons affiliated by family ties to Protestant bodies. The larger of the Protestant bodies may claim twice the number of their communicants as nominal adherents.—EDITOR OF THE ALMANAC.

A special census of religious bodies is being taken and will be published in 1903 by the United States Census Office.

## Universalist General Convention.

THE Universalist General Convention has jurisdiction over the ecclesiastical organizations of the Universalist Church in the United States and Canadian provinces. It meets biennially, the next meeting being ordered for October, 1903. The Convention is composed of the presidents, vice-presidents, and secretaries of the State conventions, and of clerical and lay delegates from the State conventions. All laws relating to fellowship, ordination, and discipline originate in the General Convention, and it is the final court of appeal in all cases of dispute or difficulty between State conventions. It has funds to the amount of over \$350,000, the income of which, with the contributions of its constituency, is used for missionary and educational objects. The officers of the Convention are: *President*, W. D. Washburn, Minneapolis, Minn.; *Vice-President*, Hosea M. Knowlton, New Bedford, Mass.; *Secretary*, Rev. G. L. Demarest, D. D., Manchester, N. H.; *Treasurer*, Frank W. Wise, Boston, Mass.

The Young People's Christian Union of the Universalist Church was organized October 22, 1889, "to foster the religious life among the young people, to stimulate to all worthy endeavor, to train the young in the work of the Universalist Church, in the promulgation of its truth, and the increase of its power and influence." It has nearly 12,000 members, and its general officers and executive board are: *President*, Louis Annin Ames, 99 Fulton Street, New York; *Secretary*, C. N. Barney, 30 West Street, Boston, Mass.; *Treasurer*, George F. Sears, Chicago, Ill.; Rev. J. M. Atwood, Portland, Me.; Miss Elizabeth Bacon, Wyoming, O.; Miss H. Ida Curry, Washington, D. C., and W. V. Alexander, Stamford, Ct.

## The Congregational National Council

is composed of delegates from Congregational conferences and associations, and was organized November 17, 1871. It meets once in three years, and the next triennial meeting will be held in Des Moines, Ia., October, 1904. The officers are: *Moderator*, Rev. Amory H. Bradford, D. D., of Montclair, N. J.; *Secretary*, Rev. Asher Anderson, 410 Congregational House, Boston, Mass.; *Treasurer*, Rev. S. B. Forbes, of Hartford, Ct.; *Registrar*, Rev. Joel S. Ives, of Hartford, Ct.

D.; education, Rev. John G. Gebhard; publication, Rev. Isaac W. Gowen, D. D. Denominational headquarters, 25 East Twenty-second Street, New York City.

\* Known formerly as the Reformed Dutch Church.

## Luther League of America.

*President*—William C. Stoever, Philadelphia, Pa. *General Secretary*—C. G. Graner, Buffalo, N. Y. *Treasurer*—Charles F. Dinkey, Rochester, N. Y.

The first National Convention of the Luther League of America was held at Pittsburgh, Pa., October 30 and 31, 1895. The League is a Lutheran organization, linking together the Lutheran young people who are laboring for the good of the Church by means of many individual societies of various names and styles of organization, each within its own immediate church. The constitution declares that its objects shall be "to encourage the formation of the young people's societies in all Lutheran congregations in America, to urge their affiliation with their respective State or Territorial leagues, and with this league to stimulate the various young people's societies to greater Christian activity and to foster the spirit of loyalty to the Church." The aggregate enrolled membership of the various local organizations represented in the national organization is over 70,000. These are comprised in twenty States, fourteen of which already have permanent State organizations. The first local organization adopting the title of "The Luther League" was organized by delegates of six Lutheran Church societies in the City of New York, April 19, 1888.

## Woman's Christian Temperance Union.

THE following statement of the purposes of the society was prepared for THE WORLD ALMANAC by an officer of the Union:

The National W. C. T. U. was organized in Cleveland, Ohio, in 1874, and is the sober second thought of the great woman's crusade. It is now regularly organized in every State of the Union.

There are about 10,000 local unions, with a membership and following, including the children's societies, of about half a million. The W. C. T. U. has forty distinct departments of work, presided over by as many women experts, in the National Society, and in nearly every State. All the States in the Republic have laws requiring the study of scientific temperance in the public schools, and all these laws were secured by the W. C. T. U.; also the laws forbidding the sale of tobacco to minors. The first police matrons and most industrial homes for girls were secured through the efforts of this society, as were the refuges for erring women. Laws raising the age of consent and providing for better protection for women and girls have been enacted by many Legislatures through the influence of the Union.

The World's W. C. T. U. was founded through the influence of Frances E. Willard in 1883, and already has auxiliaries in more than fifty countries and provinces. The white ribbon is the badge of all the W. C. T. U. members, and is now a familiar emblem in every civilized country.

The headquarters of the National organization is Rest Cottage, Evanston, Ill. The following are the officers: *President*, Mrs. Lillian M. N. Stevens, of Maine; *Vice-President-at-Large*, Miss Anna A. Gordon; *Corresponding Secretary*, Mrs. Susanna M. D. Fry; *Recording Secretary*, Mrs. Clara C. Hoffman; *Assistant Recording Secretary*, Mrs. F. E. Beauchamp; *Treasurer*, Mrs. Helen M. Barker.

## Church Temperance Society.

**GENERAL OFFICERS.**—*President*, Rt. Rev. Thomas Clark, D. D., Bishop of Rhode Island; *Vice-Presidents*, sixty Bishops of the Protestant Episcopal Church; *Chairman*, Rt. Rev. Leighton Coleman, D. D., Bishop of Delaware; *Vice-Chairman*, Rev. W. R. Huntington, D. D., of New York; *Treasurer*, Irving Grinnell; *General Secretary*, Robert Graham. The Society was organized within the Protestant Episcopal Church in 1881. Its adult membership combines those who temperately use and those who totally abstain from intoxicating liquors as beverages. It works on the lines of moral as well as of legal suasion, and its practical objects are: 1. Training the young in habits of temperance. 2. Rescue of the drunkard. 3. Restriction of the saloon by legislation. 4. Counteractive agencies, such as coffee-houses, workingmen's clubs, reading-rooms, and other attractive wholesome resorts. The Church Temperance Legion (comprising the Knights of Temperance, Young Crusaders, and Veteran Knights) deals with boys, seeking to induce them to keep sober, pure, and reverent from the earliest years of manhood, and it endeavors to perpetuate those habits in men. Headquarters, the Church Mission House, New York. The officers of the Women's Auxiliary are: *President*, Mrs. George S. Bowdoin; *Vice-President*, Mrs. Irving Grinnell; *Corresponding Secretary*, Miss H. D. Fellows; *Recording Secretary*, Miss H. K. Graham.

## Society of St. Vincent de Paul.

THIS great Roman Catholic organization, founded in Paris, France, in which its head office is located, has branches in every part of the civilized world. Its principal mission is the care of the poor in their homes to the end that the unity of the family may be preserved, but it conducts many other works of charity, such as free employment bureaus, Summer homes, boys' clubs, hospital and prison visitation committees, etc.

The local or parish branches of the Society are known as conferences; these conferences are grouped in sections under the jurisdiction of Particular and Central Councils, and the latter, in the United States, are under the jurisdiction of the Superior Council, which is located in New York City, with its office at No. 2 Lafayette Place.

The officers of the Superior Council are as follows: *Spiritual Director*, The Most Rev. Archbishop John M. Farley; *President*, Jeremiah Fitzpatrick; *Vice-Presidents*, Joseph A. Kernan, James E. Dougherty, and Thomas M. Mulry; *Secretary*, John J. Pulley; *Treasurer*, Michael J. Scanlan.

## Catholic Total Abstinence Union of America.

FOUNDED 1872. Subordinate unions, 30 (embracing 1,038 societies); members, 85,729. *President*, Rev. W. J. Shanley, Hartford, Ct.; *Secretary*, Rev. A. P. Doyle, New York City; *Treasurer*, Rev. J. J. Curran, Wilkes-Barre, Pa.

## Christian and Missionary Alliance.

**OFFICERS.**—*President and General Superintendent*, Rev. A. B. Simpson, 692 Eighth Avenue, New York City; *Secretary*, A. E. Funk; *Treasurer*, David Crear.

The Christian Alliance was founded in 1887. It combined with the International Missionary Alliance in 1897, and the present title was adopted. Membership consists of all professing Christians who shall subscribe to the principles of the order and enroll their names. The objects of the Alliance are stated to be "Wide diffusion of the Gospel in its fulness, the promotion of a deeper and higher Christian life, and the work of evangelization, especially among the neglected classes in distant and especially in heathen countries." State auxiliary and local branches are being rapidly formed. Connected with the Alliance are the Missionary Training Institute, Institute for the Training of Home Workers, Berachah Home, and Berachah Orphanage. The headquarters of the Alliance are in New York, but some of its buildings are located at Nyack, N. Y.

## The Young People's Christian Union.

THE Young People's Christian Union of the United Brethren in Christ was organized June 5, 1890. It is a union of all forms of young people's societies within the Church, uniting them for the purpose of denominational direction. There are now in this Union 2,135 societies, of which 446 are junior societies. The total membership is over 80,000. A mission church has been built in Los Angeles, Cal., to which over \$5,000 has been paid. The *Watchword* is the organ of the Union. H. F. Shupe, Dayton, Ohio, is editor. The principal officers are: *President*, Rev. J. G. Huber, Dayton, Ohio; *Corresponding Secretary*, Rev. C. W. Brewbaker, Canton, Ohio; *Recording Secretary*, Miss Lizzie Sheets, Vermillion, Ill.; *Treasurer*, E. Jay Rogers, Dayton, Ohio.

## Young Men's Christian Associations.

**OFFICERS OF THE INTERNATIONAL COMMITTEE.**—Office, No. 3 West Twenty-ninth Street, New York. *Chairman*, Lucien C. Warner; *Treasurer*, Frederick B. Schenck; *General Secretary*, Richard C. Morse. *Board of Trustees*—*Treasurer*, Jas. G. Cannon, New York City. The International Committee is the general executive of the Associations of North America. It consists of 45 representative Christian laymen, and employs a force of 48 secretaries in the home and 31 in the foreign fields.

**OFFICERS OF THE CENTRAL INTERNATIONAL COMMITTEE.**—Headquarters, No. 3 Général Dufour, Geneva, Switzerland. *Chairman*, Edouard Barde; *Secretary*, Louis Perrot; *Treasurer*, Henry Fatio; *General Secretaries*, Charles Fermaud and Christian Philidius. The committee is composed of members representing America, Australia, Austria-Hungary, Belgium, Denmark, Great Britain, France, Germany, Italy, Netherlands, Norway, Portugal, Russia, Spain, South Africa, Sweden, Switzerland, Japan, and India.

**OFFICERS OF THE STATE EXECUTIVE COMMITTEE OF THE YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF THE STATE OF NEW YORK.**—General office, No. 156 Fifth Avenue, New York. *Chairman*, Edmund P. Platt; *Treasurer*, Samuel Woolverton; *General Secretaries*, John W. Cook and George A. Hall. This committee was incorporated under the laws of New York April 14, 1886, having for its object, "the establishing and assisting Young Men's Christian Associations, and generally to provide for the spiritual, intellectual, physical, and social well-being of young men in accordance with the aims and methods of Young Men's Christian Associations of the State of New York." The membership in the State is 43,639, divided as follows: General, 24,772; Railroad, 9,925; Student, 2,583; French and German, 473; Boys' Departments, 5,442; "Sections" and county work, 444. A biennial meeting of the State Association, comprising the 144 Associations and 10 "Sections," etc., in the State, is held in February, the even years.

**OFFICERS OF THE YOUNG MEN'S CHRISTIAN ASSOCIATION OF THE CITY OF NEW YORK.**—General office, No. 156 Fifth Avenue, New York. *President*, Cleveland H. Dodge; *Treasurer*, Samuel Sloan, Jr.; *General Secretary*, Henry M. Orne.

There are 6,335 associations in the world, of which 1,575 are in North America. The total membership of these American associations is 323,224; they occupy 414 buildings of their own, valued at \$22,803,030, and have 736 libraries, containing 544,275 volumes. They have 29,132 young men as students in evening educational classes, and 89,960 in their physical departments. They employ 1,612 general secretaries and other paid officials, and expended last year for current expenses—local, State, and international—\$3,535,783.

## The World's Young Women's Christian Association.

The World's Young Women's Christian Association was formed in 1894. Nine national associations are now affiliated: Great Britain, United States, Canada, Germany, Italy, France, Norway, Sweden, and India. The headquarters are in London. Office, 26 George Street, Hanover Square, West. The Executive Committee is composed of a resident membership in London and two representatives from America. Mrs. George W. Campbell is Chairman, Miss Annie M. Reynolds, General Secretary. The second World's Conference was held in Geneva, Switzerland, July, 1902.

The American Committee was formed in 1886. General office, 1312 Champlain Building, 126 State Street, Chicago, Ill.; Eastern office, 421 United Charities Building, New York City. There are now associations affiliated with the American Committee in 420 colleges and 75 cities, with 22 State organizations. Each State holds an annual convention. The national convention occurs biennially, and will meet in April, 1903, at Wilkes-Barre, Pa. Each year four conferences are held to train volunteer workers in Bible study and association work. These meet at Capitola, Cal.; Asheville, N. C.; Lake George, N. Y., and Lake Geneva, Wis. Attendance in 1902, 2,025. Training institutes are conducted to prepare young women for positions as secretaries. *The Evangelist*, the official organ of the Association, is published monthly at Chicago. America joins with the World's Association in observing the second week in November as a week of prayer for young women. The Student Department of the American Committee is one of the members of the World's Student Christian Federation, and the Student Volunteer Movement for Foreign Missions is also connected directly with the Student Department. Mrs. J. S. Griffith is Chairman, Miss Harriet Taylor is General Secretary of the American Committee. Membership of local associations connected with the American Committee, 52,000.

## American Tract Society.

This Society was founded in 1825. During seventy-seven years it has been publishing books, tracts, and periodicals, representing the best Christian literature approved by all Evangelical Christians, and is the almoner of their gifts to the destitute. Its total issues at home, in twenty languages, number 480,860,000 copies. It has helped Foreign Missions, in one hundred languages, to many millions of copies. Its colporteurs have visited over 15,000,000 families. Offices, 150 Nassau Street, New York. *President*, Major-General O. O. Howard; *Secretaries*, William W. Rand, D. D., George L. Shearer, D. D., and John H. Kerr, D. D.

## American Bible Society.

The American Bible Society was founded in 1816. It is a charitable institution, whose sole object is to encourage a wider circulation of the Scriptures without note or comment. It invites the contribution and cooperation of "all who accept the Bible as their rule of life and believe that every human being is entitled to know what it teaches concerning truth and duty." The officers are a president and twenty-six vice-presidents, headed by the Hon. J. L. Chamberlain, Maine. Among the others are General O. O. Howard, Vt.; Cortlandt Parker, N. J.; Hon. Frank M. Cockrell, Mo.; Hon. John W. Foster, D. C.; T. A. Brouwer, N. Y.; Cyrus Northrop, Minn.; James H. Carlisle, S. C.; Hon. Howard Van Epps, Ga.; James H. Taft, N. Y.; Annis Merrill, Cal.; Hon. W. P. Dillingham, Vt.; Hon. David J. Brewer, D. C.; Hon. James A. Beaver, Pa.; D. C. Gilman, Md., and Elbert A. Brinckerhoff, N. J., and John N. Stearns, N. Y., Y. P. There are thirty-six managers, divided into four classes as to terms of office. The Secretaries are: Rev. John Fox, D. D., Rev. W. L. Haven, D. D., and Rev. E. P. Ingersoll, D. D. The Treasurer is William Foulke. The issues for the years 1901-1902 were 1,723,791 copies, and for the eighty-six years of the existence of the Society, 70,677,225 copies. This includes Bibles in many foreign tongues, and the languages of several American Indian tribes. (The British and Foreign Bible Society, established in 1804, has distributed to March 31, 1902, 175,038,965 copies.) The offices of the Society are at the Bible House, Fourth Avenue, New York.

## Young People's Society of Christian Endeavor.

OFFICERS OF THE UNITED SOCIETY OF CHRISTIAN ENDEAVOR.—Office, Tremont Temple, Boston, Mass. *President*, Rev. Francis E. Clark, D. D.; *Treasurer*, Wm. Shaw; *Field Secretary*, Rev. Clarence E. Eberman.

Each society is in some local church, and in no sense outside. It exists simply to make the young people loyal and efficient members of the Church of Christ. It is the Church training the young. Its motto is, "For Christ and the Church." In November, 1902, there were 62,194 societies, with a membership of 3,700,000, chiefly in the United States and Canada, and in Australia, Great Britain, China, India, Japan, and in all missionary lands. It is found in about the same proportions in all the great evangelical denominations and in all their subdivisions.

The United Society is simply the bureau of information for all the societies. It prints the literature, supports one general secretary, and is the general headquarters of the work. It levies no taxes, however, and assumes no authority, but every society manages its own affairs in its own way. It is supported by the sales of its literature, badges, etc. It is managed by a board of trustees, representing the great evangelical denominations, the President being Francis E. Clark, D. D., the founder of the society; Field Secretary, Rev. Clarence E. Eberman; Treasurer, William Shaw. The executive committee of the board of trustees meets quarterly to consult concerning the best interests of the society. The next international convention will be held in Denver, July 9-13, 1903.

## American Board of Commissioners for Foreign Missions.

THE head office of the American Board of Commissioners for Foreign Missions is at the Congregational House, 14 Beacon Street, Boston, Mass. There are two district offices, at the United Charities Building, Twenty-second Street and Fourth Avenue, New York City, Rev. C. C. Creelan, D. D., District Secretary, and at 153 La Salle Street, Chicago, Ill., Rev. A. N. Hitchcock, Ph. D., District Secretary. The following is a list of the officers of the Board elected at the last annual meeting: *President*, Samuel B. Capen, L. D., Boston, Mass.; *Vice-President*, Rev. Henry Hopkins, D. D., Williamstown, Mass.; *Prudential Committee*, W. H. Davis, D. D., Albert H. Plumb, D. D., Wm. F. Ellison, G. Henry Whitcomb, Elijah Horr, D. D., Col. C. A. Hopkins, Rev. William W. Jordan, Edward C. Moore, D. D., J. M. W. Hall, Samuel C. Darling, Edward Whitin, Rev. F. E. Clark, D. D.; *Corresponding Secretaries*, Judson Smith, D. D., Charles H. Daniels, D. D., James L. Barton, D. D.; *Assistant Corresponding Secretary*, Henry W. Hicks; *Editorial Secretary*, F. E. Strong, D. D.; *Recording Secretary*, Henry A. Stimson, D. D.; *Assistant Recording Secretary*, Edward N. Packard, D. D.; *Treasurer*, Frank H. Wiggin.

The American Board, which is the oldest foreign missionary society in the United States, was organized June 29, 1810. During the past ninety-one years of its history it has sent out over 2,300 missionaries, of whom 540 are now in service. Into the more than 500 churches which have been organized by these missionaries there have been received from the first 157,658 members. The total receipts from the beginning have been about \$30,000,000.

The mission fields now occupied by the Board are: Mexico; the Hawaiian and Micronesian Islands; Japan; North China; Shansi, in Northwestern China; Foochow and Hong Kong, in Southern China; Ceylon; Madura, in Southern India; the Marathi field of Western India; East Central Africa; Southern Africa; West Central Africa; European and Asiatic Turkey; Austria, and Spain.

## United Society of Free Baptist Young People.

A GENERAL society representing the local societies of young people of the Free Baptist Denomination. The officers are as follows: *President*, E. P. Metcalf, Providence, R. I.; *Vice-President*, Rev. T. J. Mawhorter, Wawaka, Ind.; *Recording Secretary*, Miss Bertha F. Files, Lewiston, Me.; *General Secretary*, Harry S. Myers, Hillsdale, Mich.; *General Treasurer*, Rev. Arthur Given, D. D., Auburn, R. I.; *Junior Superintendent*, Mrs. Harry S. Myers, Hillsdale, Mich.; *Council*, Rev. J. H. Wolfe, Lincoln, Neb.; Miss Agnes H. Collins, South Danville, N. H.; Prof. H. T. McDonald, Harper's Ferry, W. Va.; Miss Alice Andrews, South Wayne, Wis.; Rev. R. R. Kennan, Minneapolis, Minn.; Mrs. Iva House, Lawrenceburg, Ind.; Rev. R. E. Benjamin, Farnham, Ohio; M. E. Ricker, Lewiston, Me.; Miss Lora A. Marsh, Keuka Park, N. Y.

## Baptist Young People's Union of America.

THE Union represents young people's societies connected with Baptist churches in all the States and Canada. The following are the International officers: *President*, John H. Chapman, Chicago, Ill.; *Vice-Presidents*, George Miller, Baltimore, Md.; Thomas Trotter, D. D., Wolfeville, N. S.; Samuel Seeman, Sharpsburg, Pa. *General Secretary*, Rev. Walter Calley, 324 Dearborn Street, Chicago, Ill.; *Recording Secretary*, Rev. H. W. Reed, Ph. D., Rock Island, Ill.; *Treasurer*, H. B. Osgood, Chicago, Ill. The Union was organized July 7 and 8, 1891. It holds annual meetings.

## The Brotherhood of Andrew and Philip.

THIS organization, founded in 1888, held its first federal convention in the City of New York in 1893. It is composed of members of twenty-one evangelical denominations—the Reformed Church in America, the Reformed Church in the United States, the Congregational, Presbyterian (North, South, Canadian, and United), Methodist Episcopal, Methodist Protestant, Baptist, United Brethren, Lutheran, Reformed Episcopal, Church of Christ, Progressive Brethren, Friends, United Evangelical, Free Baptist, Federal, African Methodist Episcopal, and Evangelical Association. Its objects are embodied in the statement that "Any man can belong to the Brotherhood who will promise to pray daily for the spread of the kingdom of Christ among men, and to make an earnest effort each week to bring at least one man within the hearing of the Gospel." The number of chapters of the Brotherhood in the United States is 550, and the membership 15,000 in 35 States. The Rev. Dr. Rufus W. Miller, the founder, Reading, Pa., is President of the Federal Council, and Rev. C. E. Wyckoff, Irvington, N. J., General Secretary and Treasurer. *The Brotherhood Star*, the organ of this order, is published monthly at 25 East Twenty-second Street, New York City.

## The Brotherhood of St. Andrew.

THE following was prepared for THE WORLD ALMANAC by the General Secretary:

"The Brotherhood of St. Andrew is an organization of men in the Protestant Episcopal Church. Its sole object is the spread of Christ's kingdom among men. It works under two rules, known as (1) The Rule of Prayer: To pray daily for the spread of Christ's kingdom among men, and that Christ's blessing may be upon the labors of the Brotherhood, and (2) The Rule of Service: To make at least one effort each week to bring some man nearer to Christ through His church."

There are now 1,173 active chapters, with a membership of about twelve thousand men. The Brotherhood idea has also taken root in Canada, and the Brotherhood of St. Andrew in the Church of England in the Dominion of Canada has been formed, with one hundred and eighty chapters and twelve thousand men. A similar organization has been formed in the Scottish Episcopal Church. Forty chapters have also been formed in Australia, and have been organized into a Brotherhood of St. Andrew in the Church of England in Australia. June 12, 1896, the Brotherhood of St. Andrew in the Church of England was formed.

The officers are: *President*, H. D. W. English, Editor of *St. Andrew's Cross and General Secretary*, Hubert Carleton, 341 Fourth Avenue, Pittsburgh, Pa. The Secretary will furnish information and literature to any one who may be interested in the work.

## The Daughters of the King.

The Order of the Daughters of the King was organized on Easter Evening, 1885. It is desired by its promoters that a careful distinction shall be made between the Daughters of the King and The King's Daughters. This is the older society, and differs from The King's Daughters in many important particulars. In the first place, it is more of an order than a society, and is distinctively Episcopal. Its work is definite, and is "for the spread of Christ's kingdom among young women," and the "active support of the rector's plans in the parish in which the particular chapter may be located." Its badge is a cross of silver, a Greek cross fleury, and its mottoes are "Magnanimiter Crucem Sustine" and "For His Sake." Its colors are white and blue—white, the old royal color of Israel, and blue, the color of the Virgin Mary, the "blessed daughter of Israel's King, the Mother of the King of Kings." Its constitution is framed, as far as is possible, in the terms of that of the Brotherhood of St. Andrew, the work of the two organizations being similar. The officers of the Council are: *President*, Mrs. E. A. Bradley; *Vice-President*, Mrs. E. J. Warner; *Secretary*, Miss Elizabeth L. Ryerson; *Treasurer*, Mrs. E. R. Leonard. Office of the Council, Church Missions House, 281 Fourth Avenue, New York.

## International Order of the King's Daughters and Sons.

OFFICERS OF THE CENTRAL COUNCIL.—Office, No. 156 Fifth Avenue, New York City. *President*, Mrs. F. Bottoime; *Vice-President*, Miss Kate Bond; *General Secretary*, Mrs. Mary Lowe Dickenson; *Treasurer*, Mrs. J. C. Davis; *Recording Secretary*, Mrs. Isabella Charles Davis.

The Order of The King's Daughters and Sons is a religious order of service, composed of thousands of small circles of men, women, and children united in one great organization, that is estimated now to number over half a million members. It is an inter-denominational order, and its members may be found in all churches and in almost all nations.

The badge is a small cross of silver, bearing the letters I. H. N. on one side and the date 1886 on the other, often worn with a knot of purple ribbon. The Order is an incorporated society, of which this little cross is the seal. Its headquarters are at No. 156 Fifth Avenue, New York City.

## The Epworth League.

OFFICERS OF THE EPWORTH LEAGUE.—*President*, Bishop Isaac W. Joyce, Minneapolis, Minn.; *Vice-Presidents*: Department of Spiritual Work, W. W. Cooper, Chicago, Ill.; Department of Mercy and Help, Rev. W. H. Jordan, D. D., Sioux Falls, S. Dak.; Department of Literary Work, Rev. R. J. Cook, D. D., Chattanooga, Tenn.; Department of Social Work, F. W. Tunnell, Philadelphia, Pa.; *General Secretary*, Rev. Joseph F. Berry, D. D., 57 Washington Street, Chicago, Ill.; *General Treasurer*, R. S. Copeland, M. D., Ann Arbor, Mich. The Central Office of the Epworth League is located at 57 Washington Street, Chicago, Ill.

The Epworth League was formed in May, 1889, by the union of five societies then existing in the Methodist Episcopal Church, which had under their united jurisdiction about 1,500 local societies, or "chapters," and about 6,000 members. On October 1, 1902, the Epworth League in the Methodist Episcopal Church numbered 29,600 chapters, with a membership of 2,000,000.

The Epworth League of the Methodist Episcopal Church, South, was organized at Memphis, Tenn., January, 1891. There are 5,838 chapters, with a membership of 306,580. The headquarters are at Nashville, Tenn. *President*, Bishop A. W. Candler, Atlanta, Ga.; *General Secretary*, Rev. H. M. Du Bose, D. D., Nashville, Tenn.

## National Spiritualists' Association.

THE National Spiritualists' Association of the United States of America and Dominion of Canada was organized September 29, 1893, in Chicago, Ill., and incorporated November 1, 1893, under the laws of the District of Columbia, where its permanent headquarters were established. Its objects are: "The organization of the various Spiritualist societies of the United States and Canada into one general association, for the purpose of mutual aid and cooperation in benevolent, charitable, educational, literary, musical, scientific, religious, and missionary purposes, and enterprises germane to the phenomena, science, philosophy, and religion of Spiritualism." There are 670 local associations of Spiritualists in the United States and Canada, 20 State associations, and 55 camp-meeting associations devoted to the interests of Spiritualism. The bona fide membership of these associations is 250,000, while the total number interested in Spiritualism in the United States and Canada is 1,500,000. Three hundred and fifty lecturers, ministers, and platform mediums are now actively engaged in promulgating the doctrines of Spiritualism. The number of psychics now before the public for various phases of phenomenal manifestations is 1,500, while some 10,000 persons utilize their mediumistic gifts in their homes. The Spiritualists have 96 churches, temples, auditoriums, etc., in the United States. The valuation of their public buildings, camp-meeting property, and real estate is \$1,250,000.

*President*, Harrison D. Barrett, Needham, Mass.; *Secretary*, Mrs. Mary T. Longley, 600 Pennsylvania Avenue, S. E., Washington, D. C. The eleventh annual convention will be held in Washington, D. C., October 20-23, 1903.

## Society of Mayflower Descendants.

THE Society of Mayflower Descendants was organized in the City of New York December 22, 1894, by lineal descendants of the Mayflower pilgrims, "to preserve their memory, their records, their history, and all facts relating to them, their ancestors, and their posterity." Every lineal descendant over eighteen years of age, male or female, of any passenger of the voyage of the Mayflower, which terminated at Plymouth, Mass., December, 1620, including all signers of "The Compact," are eligible to membership. The initiation fee is ten dollars and the annual dues are five dollars. The annual meeting is held November 21, the anniversary of the signing of "The Compact." Societies are organized in New York, Massachusetts, Pennsylvania, Connecticut, Ohio, Illinois, New Jersey, Michigan, Minnesota, Wisconsin, Rhode Island, and the District of Columbia, with a membership of 3,000. The officers of the National Society are: *Governor-General*, Henry E. Howland; *Deputy Governors-General*, Winslow Warren, Francis O. Allen, Josiah L. Lounbard, William L. Marsh, Herbert Jenney, Rev. Daniel F. Warren, D. D.; *Secretary-General*, Richard Henry Greene, 235 Central Park West; *Treasurer-General*, James M. Rhodes; *Elder-General*, Rev. Edward L. Clark, D. D.; *Captain-General*, Myles Standish, M. D.; *Surgeon-General*, Orlando Brown, M. D.; *Historian-General*, Theodore S. Lazell. The Governor of the New York Society is William W. Goodrich, Brooklyn, and the Secretary Ashbel P. Fitch, Jr., 32 Nassau Street, New York.

## The Huguenot Society of America.

THIS Society was organized April 13, 1883, and has its office in New York at No. 105 East Twenty-second Street. *President*, Frederic J. De Peyster; *Vice-Presidents*, William Jay, Rev. Lea Luquer, Henry M. Lester, A. T. Clearwater, Nathaniel Thayer, Richard Olney, William Ely, Col. R. L. Maury, Herbert Du Puy, Prof. Allan Marquand, Col. Henry A. Dupont, Rev. Robert Wilson; *Treasurer*, T. J. Oakley Rhineland; *Secretary*, Mrs. James M. Lawton; *Executive Committee*, the officers of the society, the chairmen of the committees on pedigrees, publication, library, and finance, and John K. Rees, Rev. A. V. Wittmeyer, C. F. Darlington, Alden Freeman, Cornelius B. Mitchell. Descent from Huguenot ancestors is the qualification necessary for membership.

## The American-Irish Historical Society.

*President-General*—John D. Crimmins, New York City. *Vice-President-General*—Morgan J. O'Brien, New York City. *Secretary-General*—Thomas Hamilton Murray, 34 Newbury Street, Boston, Mass. *Treasurer-General*—John C. Linehan, Concord, N. H. *Librarian and Archivist*—Thomas B. Lawler, New York City.

The Society was organized at Boston, Mass., January 20, 1897, for the special study of the Irish element in the composition of the American people; to investigate and record the influence of this element in the upbuilding of the nation, and to collect and publish facts relating to and illustrating that influence. The Society draws no creed lines, and is non-political. Being an American organization in spirit and principle, it greets and welcomes to its ranks Americans of whatever race descent and of whatever creed who take an interest in the special line of work for which the Society is organized. The membership roll contains the names of gentlemen of the seventh, eighth, and ninth American generations. The membership is about 1,000. The Society issues an annual bound volume called the "Journal." The annual meeting is held in New York City.

## Society of Tammany, or Columbian Order.

*Grand Sachem*—James A. O'Gorman. *Sachems*—Patrick Keenan, John F. Carroll, Daniel F. McMahon, John W. Keller, John J. Scannell, Charles F. Murphy, Randolph Guggenheimer, Maurice Featherson, Asa Bird Gardiner, George W. Plunkitt, George C. Clausen, John Fox, Thomas J. Dunn. *Secretary*—Thomas F. Smith. *Treasurer*—Peter F. Meyer. *Sagamore*—Bryan P. Henry. *Wiskinkie*—John A. Boyle.

This organization was formed in 1789, being the effect of a popular movement in New York, having primarily in view a counterweight to the so-called "aristocratic" Society of the Cincinnati. It was essentially anti-Federalist or democratic in its character, and its chief founder was William Mooney, an upholsterer and a native-born American of Irish extraction. It took its first title from a noted ancient wise and friendly chief of the Delaware tribe of Indians, named Tammany, who had, for the want of a better subject, been canonized by the soldiers of the Revolution as the American patron saint. The first meeting was held May 12, 1789. The act of incorporation was passed in 1805. The Grand Sachem and thirteen Sachems were designed to typify the President and the Governors of the thirteen original States. William Mooney was the first Grand Sachem. The Society is nominally a charitable and social organization, and is distinct from the General Committee of the Tammany Democracy, which is a political organization and cannot use Tammany Hall without the consent of the Society.

## Order of the Founders and Patriots of America.

*Governor-General*—Col. Ralph E. Prime, Yonkers, N. Y. *Deputy Governor-General*—Gen. William F. Draper, Massachusetts; *Chaplain-General*—Rev. Dryden William Phelps, Connecticut. *Secretary-General*—Gen. Ferdinand P. Earle, New York. *Treasurer-General*—George Clinton Batcheller, New York. *Attorney-General*—Edward Lang Perkins, Pennsylvania. *Registrars-General*—Tennis D. Huntting, New York. *Genealogist-General*—James Jerome Belden, New York. *Historian-General*—Franklin W. Hopkins, New Jersey. The Order was founded in 1896, its object being "to bring together and associate congenial men, whose ancestors struggled together for life and liberty, home and happiness, in the land when it was a new and unknown country, and whose line of descent from them comes through patriots who sustained the Colonies in the struggle for independence in the Revolutionary War; to teach reverent regard for the names and history, character and perseverance, deeds and heroism of the founders of this country and their patriot descendants; to teach that the purpose of the founders could have had no lasting result but for their patriot sons; to inculcate patriotism; to discover, collect, and preserve records, documents, manuscripts, monuments, and history relating to the first colonists and their ancestors and their descendants, and to commemorate and celebrate events in the history of the Colonies and the Republic." Eligibility—Any man above the age of twenty-one years, of good moral character and reputation, and a citizen of the United States, who is lineally descended, in the male line of either parent, from an ancestor who settled in any of the Colonies now included in the United States of America prior to May 13, 1657, and whose intermediate ancestors in the same line during the Revolutionary period adhered as patriots to the cause of the Colonies, shall be eligible for membership.

## Society of Colonial Wars.

*Governor-General*—Frederic J. De Peyster, New York. *Vice-Governor-General*—Howland Pell, New York. *Deputy Governors-General*—For New York, Walter L. Snydam; Pennsylvania, Richard M. Cadwalader; Maryland, Gen. Joseph L. Brent; Massachusetts, Arthur J. C. Sowdon; Connecticut, Charles E. Gross; District of Columbia, William Thompson; New Jersey, Gen. E. Burd Grubb; New Hampshire, Prof. Charles L. Parsons; Vermont, Robert Noble; Ohio, Achilles C. Fugh; California, Spencer R. Thorpe; Iowa, Samuel F. Smith; Michigan, Samuel T. Douglas; Delaware, George Gray; Rhode Island, Hunter C. White; Maine, Col. John M. Glidden. *Secretary-General*—Sammel V. Hoffman. *Deputy Secretary-General*—William B. Seaman, 45 Nassau Street, New York. *Treasurer-General*—Edward Shippen, Philadelphia. *Registrar-General*—George Norbury Mackenzie, Baltimore. *Historian-General*—Rev. Charles E. Stevens, Philadelphia. *Chaplain-General*—Rt. Rev. William Lawrence, Boston. *Surgeon-General*—V. Mott Francis, M. D., Newport, R.I. *Chancellor-General*—Prof. Theodore S. Woolsey, New Haven.

The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defence, and preservation of the American Colonies, and were in truth the founders of this nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Lieutenant-Governor, Member of the Council, or as a military, naval, or marine officer in the service of the Colonies, or under the banner of Great Britain, or was conspicuous in military, official, or legislative life during that period.

## The Settlers and Defenders of America.

A NEW hereditary-patriotic order, incorporated in 1899. *President-General*—Walter S. Carter, New York. *Vice-President-General*—Robert D. Benedict, New York. *Secretary-General*—Grenville B. Winthrop, New York. *Treasurer-General*—Rodney S. Dennis, New York. *Registrar-General*—Everett V. Abbot, New York. *President of Executive Council*—Ralph E. Prime, Yonkers. Its objects are: "To stimulate genealogical, biographical, and historical research, to publish patriotic manuscripts and records, to collect colonial and revolutionary relics, to preserve traditions, to mark patriotic graves, to locate and protect historic sites, to erect tablets and monuments, to aid in founding and erecting libraries, museums, and memorial buildings; and in all other fitting ways, through broad fellowship and coöperation, to perpetuate the memory of the Settlers and Defenders of the nation, and to exemplify and teach in all later generations their spirit of wise patriotism, to the end that we may loyally advance the purpose for which they struggled."

To be eligible, a person must be eighteen years of age, and have lineally descended (1) from a settler in one of the thirteen original Colonies, during the first thirty-three years of its settlement; (2) from one who is also lineally descended from an ancestor who, between May 13, 1607, and April 19, 1775, inclusive, rendered civil or military service in the general government of such colony; and (3) who is likewise lineally descended from an ancestor who, between April 19, 1775, and September 13, 1783, inclusive, rendered actual service to the cause of American Independence, either as a military or naval officer, soldier, seaman, privateer, militia or minute man, associator, signer of the Declaration of Independence, member of a Continental, Provincial, or Colonial Congress, or Colonial or State Legislature, or as a recognized patriot who performed or actually counselled or abetted acts of resistance to the authority of Great Britain; but no claim of eligibility through descent from a settler or from an ancestor who rendered colonial service to be valid unless the descendants of such ancestor in the line of descent of the applicant were patriots in the War of the Revolution. Women are eligible to admission, and junior chapters of the order are to be established.

## Military Order of Foreign Wars.

THE Military Order of Foreign Wars of the United States was instituted in the City of New York, December 27, 1894, by veterans and descendants of veterans of one or more of the five foreign wars which the United States had been engaged in, to wit: The War of the Revolution, the War with Tripoli, the War of 1812, the Mexican War, and the War with Spain, "to perpetuate the names and memory of brave and loyal men who took part in establishing and maintaining the principles of the Government" in said wars, and "to preserve records and documents relating to said wars, and to celebrate the anniversaries of historic events connected therewith." Since the establishment of the order the United States has fought its fifth foreign war. By an amendment to the constitution all American officers who participated in the War with Spain are rendered eligible to membership as veteran companions.

Members are entitled "companions," and are either "veteran companions" or "hereditary companions." The former are commissioned officers of the army, navy, or marine corps of the United States who participated in any of the foreign wars of the United States. The latter are direct lineal descendants, in the male line only, of commissioned officers who served honorably in any of the said wars. Commanderies may be established in each of the States, and State commanderies now exist in the States of New York, Pennsylvania, Connecticut, Illinois, California, Massachusetts, Florida, Maryland, District of Columbia, Ohio, Missouri, Vermont, Virginia, Rhode Island, Louisiana, Indiana, and Wisconsin.

The National Commandery was instituted March 11, 1896, by the officers of the New York, Pennsylvania, and Connecticut commanderies. The following are the officers of the National Commandery: *Commander-General*—Major-General Alexander S. Webb, U. S. A. *Secretary-General*—James H. Morgan, St. Paul Building, New York City. *Treasurer-General*—Edward S. Sayres. *Registrar-General*—Rev. Henry N. Wayne. *Historian-General*—Captain Samuel E. Gross, U. S. V. *Judge-Advocate-General*—Frank Montgomery Avery. *Chaplain-General*—Rev. C. Ellis Stevens. *Recorder-General*—Charles D. Walcott. There are Vice-Presidents-General representing each State society.

| Treasurer-General.....           | Hon. Frederick Wolcott Jackson, N. J.          |
| Assistant Treasurer-General..... | Hon. John Cropper, Va.                         |

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the Continental army on the Hudson at the close of hostilities in the War of the Revolution for American Independence May 10, 1783.

In forming the society it was declared that, "To perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute, and combine themselves into one Society of Friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen State societies were formed, and one in France, under the direct patronage of Louis XVI. Upon the roll of original members appeared the names of all the great historic military and naval characters of the Revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the Declaration of Independence.

## THE RIGHT TO MEMBERSHIP.

All Continental officers who had served with honor and resigned after three years' service as officers, or who had been rendered supernumerary and honorably discharged, in one of the several reductions of the American army, or who had continued to the end of the war, and all French officers who had served in the coöperating army under Count d'Estaing, or auxiliary army under Count de Rochambeau, and held or attained the rank of colonel for such services, or who had commanded a French fleet or ship of war on the American coast, were entitled to become original members, and upon doing so were required to contribute a month's pay.

## STATE SOCIETIES.

The Cincinnati is organically one society in membership, but for convenience in admission of members and in its charitable and patriotic objects is subdivided into State societies, there being thirteen, and the one in France, which was dispersed at the Reign of Terror in 1793, but is being re-established. Four dormant societies were restored to membership at the Triennial meeting of 1902. Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society when legislating for the good of the Order is composed of the general officers and five delegates from each State society, and meets triennially. In 1854 it ruled that proper descendants of Revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

## GENERAL OFFICERS SINCE ORGANIZATION.

The following have been the principal general officers:

## PRESIDENTS-GENERAL.

The society of the "Sons of the Revolution" was organized in New York in 1875 by John Austin Stevens, in conjunction with other patriotic gentlemen of Revolutionary ancestry. The New York Society was instituted February 22, 1876; reorganized December 3, 1883, and incorporated May 3, 1884, to "keep alive among ourselves and our descendants the patriotic spirit of the men who, in military, naval, or civil service, by their acts or counsel, achieved American independence; to collect and secure for preservation the manuscript rolls, records, and other documents relating to the War of the Revolution, and to promote intercourse and good feeling among its members now and hereafter." Eligibility to membership is confined to male descendants, above the age of twenty-one years, from an ancestor who as either a military, naval, or marine officer, soldier, sailor, or marine, or official in the service of any one of the thirteen original Colonies or States, or of the National Government, representing or composed of those Colonies or States, assisted in establishing American independence during the War of the Revolution between the 19th day of April, 1775, when hostilities commenced, and the 19th day of April, 1783, when they were ordered to cease. The last triennial meeting of the general society was held at Washington, D. C., beginning April 19, 1902. The next triennial meeting of the general society will be held in the City of Washington April 19, 1905.

The officers of the New York Society Sons of the Revolution are as follows: *President*—Frederick Samuel Tallmadge. *Vice-President*—Alexander R. Thompson. *Secretary*—Morris P. The National Society of "Sons of the American Revolution" was organized in New York April 30, 1889, and chartered in Connecticut in 1890. Its purposes are the same as those of the older organization, the "Sons of the Revolution." State societies exist in thirty-eight States, the District of Columbia, and Hawaii. A California society of descendants of Revolutionary patriots, entitled "Sons of Revolutionary Sires," organized July 4, 1875, having reorganized and changed its name in 1889, has been admitted to membership. A formal movement by this society and the "Sons of the Revolution" toward a union was attempted in 1892, and again in 1897, but was not successful. The total membership of the organization, according to the report of the Registrar-General made at the annual congress of the general society at New York City, April 30, 1902, was 10,351. The Massachusetts Society has 1,424, the New York Society 1,295, and the Connecticut Society 977 members.

The New York or Empire State Society was organized February 11, 1870. The following are the officers: *President*—Walter S. Logan. *Secretary*—Louis H. Cornish, 239 Broadway, New York. *Registrar*—Teunis D. Hunting. *Historian*—Gen. Horatio King, Brooklyn, N. Y.

## Aztec Club of 1847.

*President*—Dr. J. W. Brannan, New York. *Vice-President*—Gen. Francis E. Pinto, Brooklyn, N. Y. *Secretary*—Macrae Sykes, Kingsbridge, New York City. *Treasurer*—William Turnbull, New York. *Vice-Treasurer*—E. H. Floyd-Jones, New York.

This society, originally composed of officers of the United States army who served in the war with Mexico, was formed in the City of Mexico in 1847, and has been continued, "with a view to cherish the memories and keep alive the traditions that cluster about the names of those officers who took part in the Mexican War." Membership is confined to officers of the army, navy, and marine corps who served in the war or their blood relatives. Each primary member may nominate as his successor his son or a blood relative, who during the life of the primary member is known as an associate member, and on the death of the former is entitled, as his representative, to full membership. There are 221 members.

**Societies of the War of 1812.****SOCIETY OF THE WAR OF 1812 AND VETERAN CORPS OF ARTILLERY IN THE STATE OF NEW YORK.**

INSTITUTED as a military society by the veterans of the War of 1812, on January 3, 1826, in the City of New York, and incorporated under the laws of the State of New York by the surviving veteran members, January 8, 1892.

The officers are: *President*—Rev. Morgan Dix, D. D., D. C. L. *Vice-President*—Asa Bird Gardiner, LL. D., L. H. D. *Secretary*—Howland Pell, 27 William Street, New York. *Assistant Secretary*—Charles Isham. *Treasurer*—Charles Augustus Schermerhorn.

The original members comprise those who actually served in the military or naval forces of the United States during the War of 1812, or on vessels other than merchant ships which sailed under commissions of letters of marque and reprisal from the United States in that war.

Eligibility to hereditary membership is confined to descendants of commissioned officers who actually served in the War of 1812, and descendants of former members of the Society in the State of New York, and of other military societies of 1812.

The purposes of the order are to inspire among the members and among the American people the patriotic spirit of the men who, during the War of 1812, defended their country against hostile encroachments on its rights and interests and caused its sovereignty and independence to be respected; to inculcate and maintain the great principles of the laws of nations for which they contended; to collect and preserve the manuscript rolls, records, and other documents relating to that war, and to commemorate the land and naval victories of the American arms in that war; to undertake and assist in the erection of proper memorials thereof; to perpetuate the mutual friendships formed in that war under the pressure of common danger, and to promote fellowship among the members of every degree.

**THE GENERAL SOCIETY OF THE WAR OF 1812.**

Composed of federated State societies, in Pennsylvania, Maryland, Massachusetts, Connecticut, Ohio, Illinois, District of Columbia, New York, New Jersey, and Delaware, the members of each of which State Societies are borne upon the membership roll of the General Society. Any male person above the age of twenty-one years who participated in, or who is a lineal descendant of one who served during the War of 1812-14 in the army, navy, revenue-marine, or privateer service of the United States, offering satisfactory proof to the State Society to which he makes application, and is of good moral character and reputation, may become a member. In case of failure of lineal descendants of an actual participant in said war, one collateral representative who is deemed worthy may be admitted to membership. The officers are: *President-General*—John Cadwalader, Philadelphia, Pa. *Secretary-General*—Henry Randall Webb, 727 Nineteenth Street, N. W., Washington, D. C. *Assistant Secretary-General*—Henry Harmon Noble, Albany, N. Y. *Treasurer-General*—Frederick Bacon Philbrook, Boston, Mass. *Registrar-General*—Albert K. Hadck, M. D., Baltimore, Md. *Captain-General*—Rt. Rev. Leighton Coleman, S. T. D., LL. D., Bishop of Delaware.

**Naval Order of the United States.**

THE Naval Order of the United States is composed of a General Commandery and commanderies in the States of Massachusetts, Pennsylvania, New York, California, and Illinois, and in the District of Columbia. The General Commandery meets triennially on October 5, and the State Commanderies meet annually in the month of November. The Massachusetts Commandery is the parent Commandery, and was organized at Boston on July 4, 1890. The General Commandery was established three years later, on June 19, 1893. The Companions of the Order are officers and the descendants of officers who served in the navy and marine corps in any war or in any battle in which the said naval forces of the United States have participated. The membership clause, as adopted at the triennial congress held at Boston October 5, 1895, provides for two classes of members: First, veteran officers and their male descendants, and, second, enlisted men who have received the United States naval medal of honor for bravery in the face of the enemy.

The officers of the General Commandery are: *General Commander*—Rear-Admiral John G. Walker. *Vice-General Commanders*—Admiral George Dewey, Rear-Admiral George E. Belknap, Real-Admiral Albert S. Barker. *General Recorder*—Lieutenant-Commander S. Hubbard, 108 Fifth Avenue, New York. *Assistant General Recorder*—Rodney Macdonough. *General Treasurer*—Jarvis B. Edson, late U. S. N. *General Registrar*—J. V. P. Turner, late U. S. N. *General Historian*—Capt. R. S. Collum, U. S. M. C. *General Chaplain*—Rev. George Williamson Smith, D. D.

**Medal of Honor Legion.**

THE Legion is composed of officers and enlisted men of the Union Army who, during the Civil War, were awarded Medals of Honor for special acts of bravery and devotion. Fifteen hundred of these medals are worn by veterans of the army, and 600 by naval veterans, of which 69 have been awarded on account of the War with Spain. At the last annual convention the following officers were elected: *Commander*—Daniel E. Sickles, New York. *Senior Vice-Commander*—Llewellyn G. Estes, Washington, D. C. *Junior Vice-Commander*—Joseph O. Gregg, Great Falls, Mont. *Chaplain*—James Miller, Philadelphia. *Adjutant*—W. J. Wray, Philadelphia. *Quartermaster*—Noble D. Preston, Philadelphia. *Judge-Advocate*—Charles A. Clark, Cedar Rapids, Ia. *Inspector*—W. L. Hill, Portsmouth, N. H. *Historian*—J. Madison Drake, Elizabeth, N. J. *Executive Committee*—Stephen B. Corliss, Chairman, Albany, N. Y.; M. Emmett Urell, Washington; John C. Hunterson, Philadelphia; Sylvester H. Martin, Philadelphia; John F. Mackie, Philadelphia.

**Order of Veterans of Indian Wars of the United States.**

*Commander*—Brig.-Gen. Judson D. Bingham. *Vice-Commander*—Col. John V. Purey. *Recorder and Treasurer*—Capt. Henry Hobart Bellas, 421 South Forty-fourth Street, Philadelphia. *Assistant Recorder*—Lieut. George R. Burnett. *Historian*—Brig.-Gen. Charles King. *Council*—Col. John A. Wilcox, Capt. J. M. Walton, Major G. S. Bingham, Major H. E. Smith.

This order was instituted by officers of the United States Army in Philadelphia April 23, 1896. The objects are "to perpetuate the faithful services, heroisms, and privations of the officers and soldiers of the Army of the United States of America, as well as of the auxiliary forces of the several States of the Union, in their successive campaigns conducted against a savage foe on our frontiers, in the interests of civilization and for the settlement and defence of our territories, at different periods in the history of our common country since the close of the War of the Revolution and also to collect and preserve for publication a record of these services and other historical data relating thereto, as well as to unite in a fraternal bond of union all those who are entitled to membership therein."

## Military Order of the Loyal Legion.

*Commander-in-Chief*—Lieut.-Gen. John M. Schofield. *Senior Vice-Commander-in-Chief*—Rear-Admiral George Brown. *Junior Vice-Commander-in-Chief*—Brevet Col. Horatio C. King. *Recorder-in-Chief*—Brevet Lieut.-Col. John P. Nicholson. *Registrar-in-Chief*—Brevet Major William F. Huxford. *Treasurer-in-Chief*—Paymaster George De F. Barton. *Chancellor-in-Chief*—Brevet Brig.-Gen. William L. James. *Chaplain-in-Chief*—Brevet Major Henry S. Burrage, D. D. *Council-in-Chief*—Brevet Major George W. Chandler, Col. Henry L. Swords, Capt. Roswell H. Mason, Brevet Major A. M. Van Dyke, First Lieut. W. L. Greenleaf.

The Military Order of the Loyal Legion of the United States was organized by officers and ex-officers of the army, navy, and marine corps of the United States who took part in the Civil War of 1861-65. Membership descends to the eldest direct male lineal descendant, according to the rules of primogeniture. There are 20 commanderies, each representing a State, and one commandery representing the District of Columbia. The total membership of the Loyal Legion is about 10,000.

## Woman's Relief Corps.

### AUXILIARY TO THE GRAND ARMY OF THE REPUBLIC.

*National President*—Lodusky J. Taylor, Le Seur, Minn. *National Secretary*—Ada E. May, Stillwater, Minn.

This organization was created by the mothers, wives, daughters, and sisters of Union soldiers of the Civil War of 1861-65, for the purpose of aiding and assisting the Grand Army of the Republic, and to "perpetuate the memory of their heroic dead," to "extend needful aid to the widows and orphans," to "cherish and emulate the deeds of our army nurses," and to "inculcate lessons of patriotism and love of country among our children and in the communities in which we live." The organization is composed of departments, which are subdivided into corps, as well as detached corps in several States where no departments exist. The year ending June 30, 1902, there were 3,017 corps and 143,428 members.

## Association of Graduates of U. S. Military Academy.

The Association, in which all graduates of the Academy in good standing are eligible for membership, has for its object the cherishing of the memories of the Military Academy at West Point and the promotion of social intercourse and fraternal fellowship among its graduates. Its work has been largely historical and it attempts to keep the history of every graduate of the Academy, both in the army and in civil life. General George W. Cullum, on his death, gave to it its home in the magnificent Memorial Hall at West Point, and charged it with the perpetuation of his Biographical History of the Graduates of the Academy.

The Association was formed as a result of a meeting called May 22, 1869, by General Robert Anderson, of Sumter fame, in the office of Dr. Horace Webster, West Point, 1818, President of the College of the City of New York. General Sylvanus Thayer, "the Father of the Military Academy," was its first President.

Officers for the year 1902-03: *President*—Lieutenant-General J. M. Schofield. *Treasurer*—Prof. Charles P. Echols. *Secretary*—Captain W. C. Kivers. Annual meeting in June, at West Point.

## The American Flag Association.

*President*—Col. Ralph E. Prime, Yonkers, N. Y. *Secretary*—Theodore Fitch, 120 Broadway, New York. The American Flag Association was organized February 17, 1898, its motto being, "One Flag, One Country, God over all." Its object is to secure national and State legislation for the protection of the flag from degrading and desecrating uses, and to secure a general observance of June 14 as "Flag Day," because on that day in 1777 Congress adopted the United States flag. The Association is composed of individual members and also the members of the Flag Committees of patriotic societies for the purpose of fostering public sentiment in favor of honoring the flag of our country and preserving it from desecration. It aims to co-ordinate the efforts of all flag committees in the common cause. All patriotic societies not already represented are invited to appoint flag committees of thirteen members each, and accredit them to this Association. Fifty-seven patriotic societies are now represented in this Association by their flag committees.

### COLONIAL DAMES OF AMERICA.

#### OFFICERS.

*President*—Mrs. John Lyon Gardiner. *First Vice-President*—Mrs. Thomas Wren Ward. *Second Vice-President*—Mrs. James W. Gerard. *Treasurer*—Miss Helen Van C. De Peyster. *Secretary*—Mrs. Timothy Matlack Cheesman, 109 University Place, New York City. *Historian*—Miss Julia Livingston Delafield. *Advisory Council*—Henry E. Howland, Franklin Bartlett, Louis V. Bright.

The Society of the Colonial Dames of America was organized in the City of New York May 23, 1890, and was the first society of women for this patriotic purpose founded in this country. It was incorporated April 23, 1891. The Society is purely patriotic and educational in its objects, which are: (1) To collect and preserve relics, manuscripts, traditions, and mementoes of the founders and builders of the thirteen original States of the Union, and of the heroes of the War of Independence, that the memory of their deeds and achievements may be perpetuated. (2) To promote celebrations of great historic events of national importance, to diffuse information on all subjects concerning American history, particularly among the young, and to cultivate the spirit of patriotism and reverence for the founders of American constitutional history.

This Society has already a large membership and chapters in many States. It is a distinct organization from that which follows.

### COLONIAL DAMES OF AMERICA.

#### OFFICERS OF THE NATIONAL SOCIETY.

*Honorary President*—Mrs. Justine Van Rensselaer Townsend. *President*—Mrs. Herbert A. Claborn. *Vice-Presidents*—Mrs. Samuel Colt, Connecticut; Mrs. Henry F. L. Lyster, Michigan; Mrs. William Reed, Maryland. *Secretary*—Mrs. Joseph Lamar, Georgia. *Assistant Secretary*—Mrs. Rosa Wright Smith, District of Columbia. *Treasurer*—Mrs. Alexander J. Cassatt, Philadelphia, Pa. *Registrar*—Mrs. Emil Richter, Portsmouth, N. H. *Historian*—Miss Anne Hollingsworth Wharton.

This society is a distinct organization from the one described in the first paragraph. The National Society is composed of delegates from the State societies. These exist in the thirteen original States and in twenty-one other States and the District of Columbia, and are all incorporated. The aggregate membership is over 5,000. The President of the New York State Society is Mrs. Anson P. Atterbury. It is the sole custodian of the Colonial Museum in New York.

Under the constitution of the National Society it is prescribed that the members shall be women "who are descended in their own right from some ancestor of worthy life who came to reside in an American Colony prior to 1750, which ancestor, or some one of his descendants, being a lineal ascendant of the applicant, shall have rendered efficient service to his country during the Colonial period, either in the founding of a commonwealth or of an institution which has survived and developed into importance, or who shall have held an important position in the Colonial Government, and who, by distinguished services, shall have contributed to the founding of this great and powerful nation." Services rendered after 1776 do not entitle to membership, but are accepted for supplemental applications. There is no admission except through Colonial ancestry.

C. Goodlett, of Nashville, Tenn.; Mrs. Clement C. Clopton, of Alabama, and Mrs. Albert Sidney Johnston Pritchard, of California, are honorary presidents for life.

The United Daughters of the Confederacy was organized at Nashville, Tenn., September 10, 1894. It is composed of the widows, wives, mothers, sisters, and lineal female descendants of men who served honorably in the army and navy of the Confederate States, or who served in the civil service of the Confederate States or one of the Southern States, or who gave personal service to the Confederate cause. There are local federations, governed by State divisions, which in turn are subordinate to the general organization. The objects of the United Daughters of the Confederacy, as stated in the constitution of the Society, are "social, literary, historical, monumental, benevolent, and honorable in every degree, without any political signification whatever." It will endeavor: (1) To unite in the federation all bodies of Southern women now organized or that may hereafter be formed. (2) To cultivate ties of friendship among our women whose fathers, brothers, sons, and, in numberless cases, mothers, shared common dangers, sufferings, and privations; and to perpetuate honor, integrity, valor, and other noble attributes of true Southern character. (3) To instruct and instill into the descendants of the people of the South a proper respect for and pride in the glorious war history, with a veneration and love for the deeds of their forefathers which have created such a monument of military renown, and to perpetuate a truthful record of the noble and chivalric achievements of their ancestors. All with the view of furnishing authentic information from which a conscientious historian will be enabled to write a correct and impartial history of the Confederate side during the struggle for Southern independence. The organization now has over 599 chapters in the United States, North and South, with about 30,000 members. The next annual reunion will be at Charleston, S. C., in November, 1903.

## COST OF THE BRITISH ROYAL FAMILY.

The annuities paid by the British people to the royal family for its support are as follows: The King and Queen, \$2,350,000; Prince of Wales, \$100,000; Princess of Wales, \$50,000; Princess Louise (Duchess of Fife), Princess Victoria, and Princess Maud, the daughters of the King, \$30,000 each; Princess Christian, \$30,000; Princess Louise (Duchess of Argyll), \$30,000; Duke of Connaught, \$125,000; Princess Beatrice, \$30,000; Duke of Cambridge, \$60,000; Duchess of Albany, \$30,000; Duchess of Mecklenburg-Strelitz, \$15,000. Total, \$2,820,000. The King also receives the revenues of the Duchy of Lancaster. During recent years these have amounted to about \$500,000 per annum. The Prince of Wales has an income also from the revenues of the Duchy of Cornwall amounting to about \$300,000 per annum. When the royal children marry dowries are usually provided for them. The last of the children of the late Queen Victoria to marry, Princess Beatrice, received \$150,000 as dowry from the British people by Parliamentary grant.

## Reigning Families

## OF THE PRINCIPAL EUROPEAN COUNTRIES.

## AUSTRIA-HUNGARY.

**Francis Joseph I.**, the Emperor of Austria and King of Hungary, was born August 18, 1830, and was proclaimed Emperor of Austria after the abdication of his uncle, Ferdinand I., on December 2, 1848. He was crowned King of Hungary June 8, 1867. He married, in 1854, Elizabeth, a daughter of Duke Maximilian of Bavaria. She died by the hand of an Anarchist in Geneva, September 10, 1898. They had issue:

1. Archduchess Gisela, born 1856; married to Leopold, son of the Regent Luitpold of Bavaria. Issue, two daughters and two sons.

2. Archduke Rudolph, late heir apparent, born 1858; died by suicide 1889. He married, 1881, Stephanie, daughter of the present King of the Belgians, and had issue one daughter, the Archduchess Elizabeth, born 1883; married, 1902, Count Otto Windischgrath. The widowed Crown Princess Stephanie married, March, 1900, Count Elémér Lonyay.

3. Archduchess Marie Valerie, born 1868; married, 1890, Archduke Francis-Salvator of Tuscany.

On the death of the Crown Prince, in 1889, the right of succession to the throne passed to the Emperor's eldest brother, the Archduke Charles Louis, who was born 1833, and died 1896; he married, 1862 (second marriage), the Princess Annunziata, daughter of King Ferdinand II. of Naples, and had issue the Archduke Francis Ferdinand, born 1863, who is the heir presumptive to the throne (married, morganatically, 1900, Countess Sophie Chotek, and renounced the claim of his issue by her to the throne); the Archduke Otto, born 1865, and married to the Princess Marie Josefa of Saxony, and has two sons (Archdukes Charles, born 1887, and Maximilian, born 1895); the Archduke Ferdinand, born 1868, and unmarried, and the Archduchess Margaret Sophia, born 1870, died 1902; she married in 1893 Albert, Duke of Württemberg. By a third marriage, the Archduke Charles Louis had two daughters.

The Emperor has a second brother, the Archduke Louis Victor, born 1842, who is unmarried.

There are over seventy other archdukes and archduchesses of Austria, cousins of the Emperor, collateral relatives of the reigning house and members of the formerly reigning branches of Tuscany and Modena. The family is descended from Count Rudolph of Hapsburg, who was elected Emperor of Germany in 1273.

## BAVARIA.

**Otto**, King of Bavaria, was born April 27, 1848, and succeeded his brother, Ludwig II., June 13, 1886, when that mad monarch committed suicide by drowning himself in the Starnberg Lake. Otto is also crazy, and is shut up in one of his châteaux, and the kingdom is governed by Prince Luitpold, his uncle, as regent. The latter is also the heir apparent to the throne; was born in 1821; married, 1844, the Austrian Archduchess Augusta of Tuscany, who is dead, and has four children:

1. Prince Louis, born 1845; married the Austrian Archduchess Maria Theresa, and has six daughters and four sons, the eldest of the latter being Prince Rupert, born 1869, and married, 1900, his cousin, Princess Marie Gabrielle of Bavaria.

2. Prince Leopold, born 1846; married to the Austrian Archduchess Gisela, daughter of the Emperor Francis Joseph I. There are two daughters and two sons.

3. Princess Theresa, born 1850; Prioress of a Convent in Munich.

4. Prince Arnulf, married, and has a son.

King Otto has five cousins who bear princely titles, children of his dead uncle, Adalbert.

The royal house of Bavaria comes from the Counts of Wittelsbach of the twelfth century, one of whose descendants was elevated to the rank of Elector, and a later one made King by Napoleon I.

## BELGIUM.

**Leopold II.**, King of the Belgians, was born April 9, 1835, and was a son of Leopold I., Prince of Saxe-Coburg-Gotha (uncle of Queen Victoria), who was elected King of the Belgians in 1831, and Princess Louise, daughter of King Louis Philippe of France. The present King, who ascended the throne in 1865, was married, in 1853, to the Austrian Archduchess Marie Henriette (died 1902), and has the following children:

1. Princess Louise, born 1858; married to Prince Philippe of Saxe-Coburg-Gotha.

2. Princess Stephanie, born 1864; married, 1881, to the late Crown Prince Rudolph of Austria, and has one daughter, Princess Stephanie married, 1900, Elémér, Count Lonyay of Nagy-Lonya and Vasoras-Nameny; Chamberlain to the Emperor of Austria.

3. Princess Clementine, born 1872.

The King's brother is Prince Philippe, Count of Flanders, born in 1837; married to the Hohenzollern Princess Marie. He has renounced his right to the throne in favor of his son, Prince Albert, who is, therefore, the present heir apparent. He had two sons, the eldest being Baldwin, who died in 1891, and the other Albert, born in 1875, and married, in 1900, the Princess Elizabeth of Bavaria (daughter of Prince Charles of Bavaria). They have one son, Prince Leopold, born in 1901. Prince Philippe has also two daughters, Henriette, born 1870, and Josephine, born 1872; married, 1894, to Prince Charles of Hohenzollern-Sigmaringen.

The sister of the King is the hapless ex-Empress Carlotta of Mexico, widow of Maximilian. She was born in 1840, widowed in 1867, has no children, and is now insane.

## DENMARK.

**Christian IX.**, King of Denmark, born April 8, 1818, was Duke of Schleswig-Holstein-Sonderburg-Glücksburg, and succeeded to the throne of Denmark by virtue of treaty and the law of the Danish succession on the death of his kinsman, Frederick VII., in 1863. He married the Princess Louise of Hesse-Cassel, who died September 29, 1898, and has had the following offspring:

1. Prince Royal Frederick, born 1843; married to the Princess Louise of Sweden in 1869 and has four daughters and four sons, the eldest of the latter being Prince Christian, born in 1870, and married, 1898, Princess Alexandrina of Mecklenburg, and has two sons, and the second, Prince Charles, born 1872, and married, 1896, Princess Maud, third daughter of King Edward VII. The eldest daughter is married to Prince Frederic of Schaumburg-Lippe, the second son of Prince Charles of Sweden and Norway.

2. The Queen of Great Britain and Ireland (Alexandra), born 1844; married 1863, and has four living children.

3. The King of the Hellenes (George I.), born 1845; married to the Grand Duchess Olga of Russia, and has one daughter and five sons, the eldest of the latter being Prince Constantine.

4. The Dowager Empress of Russia (Dagmar), born 1847; married the late Czar Alexander III. in 1866, and has five children, one being the present Czar.

5. The Duchess of Cumberland (Thyra), born 1853; married the present Duke of Cumberland (English title), son of the ex-King of Hanover, in 1878, and has three sons and three daughters,

REIGNING FAMILIES—*Continued.*

6. Prince Waldemar, born 1858; married, 1885, the Princess Marie of Orleans, daughter of the Duke of Chartres, and has four sons and a daughter. He was elected reigning Prince of Bulgaria in 1886, but declined.

## GERMANY.

**William II.**, German Emperor and King of Prussia, was born January 27, 1859; succeeded his father, the Emperor Frederick III., June 15, 1888. He married the Princess Victoria of Schleswig-Holstein-Sonderburg-Augustenburg (born 1838), and has had issue:

1. Frederick William, Crown Prince, born 1882; 2. William Eitel-Frederick, born 1883; 3. Adalbert, born 1884; 4. August, born 1887; 5. Oscar, born 1888; 6. Joachim, born 1890; 7. Victoria Louise, born 1892.

The Emperor's brother is Prince Henry, born 1862, and married, 1888, to his cousin, Princess Irene of Hesse, daughter of the late Princess Alice of England, and has three sons; and the Emperor has four sisters, all the children of the late Emperor Frederick and the Princess Victoria of England (the Dowager Empress Frederick, who died in 1901). The sisters are:

1. Princess Charlotte, born 1860; married, 1878, to George, hereditary Prince of Saxe-Meiningen, and has one daughter.

2. Princess Victoria, born 1866; married, 1890, to Prince Adolph of Schaumburg-Lippe (Regent of Lippe-Detmold).

3. Princess Sophia, born 1870; married, 1889, to Constantine, Crown Prince of Greece, and has two sons and a daughter.

4. Princess Margaret, born 1872; married, 1893, to Prince Frederick Charles of Hesse, and has five sons.

The Emperor has an aunt, the Princess Louise, born 1838, married to the present Grand Duke of Baden; and he has a number of cousins, descendants of the brothers and sisters of the Emperor William I. One of these, Prince Albert, born 1837, is a field marshal in the German Army, and another, Princess Margaret, daughter of the late Prince Frederick Charles, is the wife of the British Duke of Connaught, son of Queen Victoria. The reigning family is descended from Frederick of Hohenzollern, a German count in 980, and Frederick William, the Elector of Brandenburg, 1640-88, whose son became King of Prussia.

## GREECE.

**George I.**, King of the Hellenes, born December 24, 1845, elected King in 1863. He is the son of the present King of Denmark, Christian IX., and brother of the Queen of Great Britain and the Dowager Empress of Russia. He married, 1867, the Grand Duchess Olga, eldest daughter of the Grand Duke Constantine of Russia, grand uncle to the present Emperor. They have had six living children, five sons and one daughter. The eldest son is:

Prince Constantine, born 1868; married, 1889, the Princess Sophia, sister of the present German Emperor, and has two sons, Prince George, born 1890, and Prince Alexander, born 1893, and a daughter, Princess Helen, born 1896.

The King's eldest daughter, Alexandra, married, in 1889, the Grand Duke Paul, uncle of the present Emperor of Russia, and died September 24, 1891, leaving a daughter and a son.

## ITALY.

**Victor Emmanuel III.**, King of Italy, was born November 11, 1869, and is the only son of Humbert I., second King of United Italy, murdered by the Anarchist Bresci at Monza, July 29, 1900. He married, in 1896, Princess Helene, daughter of Nicholas, Prince of Montenegro, and has two daughters, Princess Iolande, born June 1, 1901, and Princess Matalda, born November 19, 1902.

His apparent, Emmanuel, Duke of Aosta, born 1869; eldest son of the late Prince Amadeus, brother of King Humbert and ex-King of Spain; married, 1895, Princess Helene of Orleans, daughter of the late Count of Paris, and they have had issue two children, Amadeus, born 1898, and Aimon, born 1900. The three remaining sons of the late Prince Amadeus are Victor, Count of Turin, born 1870; Louis, Duke of Abruzzi, born 1873, and Humbert, Count of Salemi, born in 1889 of his second marriage with his niece, Princess Letitia, daughter of Prince Napoleon Bonaparte and the Princess Clotilde.

The mother of the King is Queen Margherita, daughter of the late Prince Ferdinand of Savoy. She was born 1851, and married the late King 1868.

The following are the aunts of the King:

1. Princess Clotilde, born 1843; married, 1859, to Prince Napoleon Jerome Bonaparte, the late head of the Bonaparte family, and has issue two sons and a daughter, Letitia. (See "Bonapartists.")

2. Dowager Queen Maria Pia of Portugal, born 1847, and married, 1862, to the late King Louis of Portugal, and has two sons.

The King's great aunt by marriage, the Princess Elizabeth, widow of the Duke of Genoa, has a son (Prince Thomas, Duke of Genoa, married, 1883, Princess Isabella, daughter of Prince Adelbert of Bavaria, and has one son) and a daughter, the latter being the late King Humbert's wife. The family is descended from the Counts of Savoy, who flourished in the eleventh century.

## NETHERLANDS.

**Wilhelmina**, Queen of the Netherlands and Princess of Orange-Nassau, born August 31, 1880, daughter of the late King William III. and Emma, daughter of Prince George Victor of Waldeck. She married, February 7, 1901, Duke Henry of Mecklenburg-Schwerin.

The Queen's mother is the late Regent Queen Emma, whose regency lasted from the death of the late King, her husband, November 23, 1890, until the end of the minority of her daughter, August 31, 1898. The Queen's aunt is the Princess Sophia, married to the Grand Duke of Saxe-Weimar. She has a son, Prince Charles, born 1844, and two daughters. This family, known as the House of Orange, is descended from the Princes of Orange, stadtholders during the Dutch Republic.

## PORTUGAL.

**Charles I.**, King of Portugal, born September 28, 1863, son of the late King Louis and his spouse, the Princess Pia, daughter of King Victor Emmanuel of Italy. He succeeded to the throne October 19, 1889. He married, 1886, the Princess Amelie of Orleans, daughter of the Count of Paris, and has two sons, Prince Louis Philippe, Duke of Braganza, born 1887, and Prince Manuel, Duke of Beja, born 1889.

The King has a brother, Prince Alphonse, Duke of Oporto, born 1865, and unmarried; and an aunt married to the Prince of Hohenzollern-Sigmaringen, and has three sons.

The reigning family belongs to the House of Braganza, whose founder was an illegitimate son of King John I. (A. D. 1400) of the old line of Portuguese kings.

## REIGNING FAMILIES—Continued.

## ROUMANIA.

**Charles I.**, King of Roumania, born April 30, 1839, is a son of the late Prince Charles of Hohenzollern-Sigmaringen, and was elected "Lord of Roumania" by the nobles thereof in 1866. He was proclaimed King in 1881. He married, 1869, Elizabeth, a daughter of the princely German House of Wied. He has no children.

The succession to the throne, in the event of his being childless, has been settled by the constitution of the kingdom upon his elder brother, Prince Leopold of Hohenzollern-Sigmaringen; but he has renounced his right to the throne in favor of his son, Prince Ferdinand, born 1865, who is, therefore, the heir presumptive. He married the Princess Marie, eldest daughter of the late Duke of Saxe-Coburg-Gotha (the British Duke of Edinburgh), January 10, 1893, and has two sons and a daughter.

## RUSSIA.

**Nicholas II.**, Emperor of Russia, was born May 18, 1868, and succeeded his father, the late Emperor Alexander III., November 1, 1894. He is married to the Princess Alice (Alix) of Hesse-Darmstadt, daughter of the Princess Alice of Great Britain, and has four daughters, Olga, born in 1895; Tatiana, born in 1897; Marie, born in 1899, and Anastasia, born in 1901.

The late Emperor Alexander III., born in 1845, married, in 1866, the Princess Dagmar, daughter of the present King of Denmark, had issue three sons: 1. Nicholas, the present Emperor; 2. Grand Duke George (the late Czarevitch), born 1871, died 1899; 3. Grand Duke Michael (the present Czarevitch), born December 4, 1878, and heir apparent since the death of his elder brother, and two daughters: 1. Grand Duchess Xenia, born April 6, 1875; married, August 6, 1894, her cousin, the Grand Duke Alexander, and has two sons and a daughter, and 2. Grand Duchess Olga, born June 13, 1882, married to Prince Peter of Oldenburg. The uncles and aunts of the Emperor are:

1. Grand Duke Vladimir, born 1847; married, 1874, the Princess Marie of Mecklenburg-Schwerin, and has three sons and one daughter. Grand Duke Boris, who was in America in 1902, is the second son and was born in 1877. In the event that the Emperor and his invalid brother Michael die without male issue, Vladimir is next in succession to the throne.

2. Grand Duke Alexis, High Admiral, born 1850. He is unmarried.

3. Grand Duchess Marie, born 1853; married to the Duke of Edinburgh, and has had one son (deceased) and four daughters.

4. Grand Duke Sergius, born 1857; married, 1884, Princess Elizabeth of Hesse-Darmstadt, daughter of Princess Alice of England, and has no issue.

5. Grand Duke Paul, born 1860; married, 1889, Princess Alexandra, daughter of the King of the Hellenes. She died September 24, 1891, leaving a son, the Grand Duke Demetrius, and a daughter.

The Emperor has one grand uncle (son of the Emperor Nicholas I.), Grand Duke Michael, born 1832, field marshal in the Russian Army; married, 1857, Princess Cecelia of Baden, and has issue six living children, the eldest daughter, Anastasia, born 1860, being the wife of the late Grand Duke of Mecklenburg-Schwerin.

A grand uncle, the Grand Duke Constantine, born 1827; died January 12, 1892; married, 1848, Princess Alexandra of Saxe-Altenburg, and had issue five children, the Grand Duke Nicholas, born 1850, being the eldest, and the Grand Duchess Olga, born 1851, the eldest daughter, being married to the King of the Hellenes.

A third grand uncle, the Grand Duke Nicholas, born 1831, field marshal in the Russian Army, died in 1891; married, in 1856, the Princess Alexandra of Oldenburg, and had issue two sons, the youngest of whom, the Grand Duke Peter, married, in 1889, Militsa, daughter of the present Prince of Montenegro and sister of Queen Helene of Italy.

The Russian reigning family is descended from Michael Romanoff, elected Czar in 1613. The members of the family for over two centuries, however, have married so generally into the German royal houses that the present Romanoffs are practically, by blood, Germans; as much so as their kinsman, the head of the German Empire.

## SAXONY.

**George**, King of Saxony, born August 8, 1832, succeeded to the throne on the death of his brother Albert, 1902; married, 1851, the Infanta Maria, daughter of the late King Ferdinand of Portugal, and has issue Princess Mathilde, born 1863; Prince Frederick August, born 1865; married, 1891, Archduchess Louise of Austria, and has one daughter and three sons (the eldest being Prince George, born 1893); Princess Maria Josepha, born 1867, married to the Archduke Otto of Austria; Prince John, born 1869, married to the Duchess Maria Isabella of Wurtemberg; Prince Max, born 1870, a priest.

The King has an aunt, Princess Elizabeth, born 1830, who married Prince Ferdinand of Sardinia, and is a widow. The widow of the late King Albert, Queen Carola, is also living.

The royal house of Saxony is one of the oldest in Europe, having given an emperor to Germany as early as the beginning of the tenth century. The Elector of Saxony assumed the title of King in 1806, and was confirmed therein in 1815.

## SPAIN.

**Alphonso XIII.**, King of Spain, born May 17, 1886, nearly six months after the death of his father, Alphonso XII. His mother, Maria Christina, an Austrian princess, is the Queen Regent during his minority. He has two sisters, the Princess of Asturias, Maria-de-las-Mercedes, born 1880, wedded in 1901 to Prince Charles of Bourbon, and the Infanta Maria Theresa, born 1882.

The King's aunts are the Infantas Isabella, widow of the Count de Girgenti; Maria, wife of Prince Louis of Bavaria, and Eulalie, divorced wife of Prince Antonio of Orleans, who visited the United States and the World's Fair in 1893.

The King's grandmother is ex-Queen Isabella, born in 1830, crowned 1833, abdicated 1870. Her husband, the Infant Francis d'Assisi, born 1822, died in 1902.

The King's grand aunt, the Infanta Louisa, widow of the Duke of Montpensier (son of King Louis Philippe of France), now dead, was the mother of a son and three daughters: 1. The wife of the late Count of Paris, and mother of the French pretender, the Duke of Orleans; 2. The late Marie Mercedes, wife of Alphonso XII., deceased; 3. The Infanta Christina, also deceased.

A second cousin of the King is Don Carlos, born in 1848, and a pretender to the Spanish throne, who is married, and has four daughters and a son, Prince Jaime, born in 1870.

The Spanish reigning family are Bourbons, descendants of King Louis XIV. of France.

## REIGNING FAMILIES—Continued.

## SERVIA.

**Alexander I.**, King of Servia born August 14, 1876, son of King Milan I. (died at Vienna in 1901), who abdicated in 1889, and Natalie, daughter of Colonel Keschko, of the Russian Imperial Guard. Alexander was proclaimed King in 1889, on the abdication of his father. He is the only child of his parents. He married August 5, 1900, Madame Draga Maschin, a widow, who has the title Queen Draga. The ex-King obtained a divorce from Queen Natalie in 1888.

The present reigning house was founded by Milos Todorovic Obrenovic, leader of the insurrection against the yoke of Turkey in 1815-29. The Turkish Government recognized the quasi-independence of Servia in 1829, and confirmed the title of Obrenovic as reigning prince. The present King is the fifth of his dynasty, being descended from a brother of the founder.

## SWEDEN AND NORWAY.

**Oscar II.**, King of Sweden and Norway, born January 21, 1829; son of Oscar I., and grandson of Marshal Bernadotte. He married, 1857, the Princess Sophia of Nassau, and has had four sons, the eldest of whom is the Crown Prince Gustavus, born 1858; married, 1881, to the Princess Victoria of Baden, and has three sons, born in 1882, 1884, and 1889 respectively. The King's other sons are: Prince Oscar, born 1859, married to Lady Ebba Munck, one of his mother's maids of honor, and relinquished his rights to the throne; Prince Carl, born 1861, and married, 1897, Princess Ingeborg, a second daughter of the Crown Prince of Denmark, and Prince Eugene, born 1865. The King has a niece, Louise, married to the Crown Prince of Denmark. The royal family comes from Napoleon's Marshal Bernadotte, a Frenchman, who was elected heir apparent to the crown of Sweden in 1810, and became King in 1818.

## WÜRTTEMBERG.

**William II.**, King of Württemberg, born February 25, 1848, succeeded his uncle, King Charles I., October 6, 1891. He married, 1877, Princess Marie of Waldeck, who died, leaving a daughter, Pauline, born 1877. The King married, second, Princess Charlotte of Schaumburg-Lippe, by whom he has no children.

The King's mother, Princess Catherine, is living, and he has an aunt, Princess Augusta, married to Prince Herman of Saxe-Weimar, with issue of four sons and two daughters. He has a number of cousins, one of them being the late Duke of Teck, who was married to the English Princess Mary of Cambridge, who died in 1897.

## The French Pretenders.

## BONAPARTIST.

Of the Emperor Napoleon I. and his brothers Joseph and Louis, male issue is now extinct. The Emperor's brothers Lucien and Jérôme are represented by the following living descendants, and they constitute the present Imperialist house of France:

Prince Victor Napoleon (of the house of Jérôme), born July 18, 1862, is the son of the late Prince Napoleon (who died March 18, 1891) and the Princess Clotilde, sister of the late King Humbert of Italy. The Prince has been recognized by his party as the undisputed head of the Bonaparte family. He lives in Brussels and is unmarried. His only brother, Prince Louis Napoleon, born 1864, is a general in the Russian Army and is unmarried. His sister, Princess Letitia, born 1866, is the widow of Prince Amadeus of Italy, her own uncle, by whom she had a son, Prince Humbert, born 1889.

The living aunt of Prince Victor Napoleon is the Princess Mathilde, born 1820; married, 1840, Prince Demidoff of Russia; now a widow without children.

Prince Charles Napoleon, brother of the late Cardinal Bonaparte, who died February 12, 1899, was the last representative of the eldest son of Napoleon's brother Lucien, in the male line. He was born 1839; was married and had two daughters—Marie, wife of Lieutenant Gotti, of the Italian Army, and Eugénie, unmarried. He had three sisters, married respectively to the Marquis of Roccagiovine, Count Primoli, and Prince Gabrelli, who have descendants.

Prince Roland Bonaparte is the only living male cousin of Prince Charles Napoleon. He is a son of the late Prince Pierre Napoleon Bonaparte; was born 1858; married, 1880, the daughter of Blanc, one of the proprietors of the Monte Carlo gambling-hell. His wife died in 1882, leaving him a daughter and a fortune. He has one sister, Jeanne, born 1861, and married to the Marquis de Villeneuve.

Ex-Empress Eugénie, widow of Emperor Napoleon III., was a daughter of Count Cyprien de Montijo, a Spanish grandee, and was born May 5, 1826. She married 1853. Became a widow 1873. Her only son, Prince Louis Napoleon, was killed in Zululand in 1879.

## BOURBON—ORLEANIST.

Robert, Duke of Orleans, born 1869, succeeded his father, the late Count of Paris, in 1894 as the head of the royal family of France. He married, in 1896, the Archduchess Marie-Dorothea, daughter of the Archduke Joseph, cousin of the Emperor of Austria. His mother (still living) was the Spanish Infanta Louise of Montpensier, and he has one brother, the Duke of Montpensier, and four sisters, the eldest of the latter being the Princess Amélie, who is married to the King of Portugal, and the second Helena, who is married to the Duke of Aosta, nephew of the late King Humbert of Italy and heir presumptive to the throne, and the third Isabel, married to the Duke of Guise, son of the Duke of Chartres.

The only uncle of the Duke of Orleans is the Duke of Chartres, born 1840, and married to a daughter of the Prince of Joinville. The issue are two daughters and two sons, the eldest son being Prince Henry, born 1867 (died at Saigon, Cochinchina, in 1901); the second the Duke of Guise; the eldest daughter, Princess Marie, being married to Prince Waldemar of Denmark, and the second daughter, Princess Marguerite, being married (in 1896) to Patrice MacMahon, Duke of Magenta.

The grand uncles of the Duke of Orleans (who were the sons of King Louis Philippe) are all dead. They were the Prince of Joinville, born 1818, died 1900, married to a daughter of Pedro I. of Brazil, and had one daughter and one son, the Duke of Penthièvre, born 1845; Henry, Duke of Aumale, born 1822, died (childless) 1897; Anthony, Duke of Montpensier, born 1824, died 1890 (married, 1852, a sister of Queen Isabella of Spain, and had a daughter, the wife of the Count of Paris, and a son, Prince Anthony, born 1866, who married, 1888, his cousin, the Infanta Eulalie of Spain), and Louis, Duke of Nemours, born 1814, died 1896. He was the father of two daughters, the Princess Cratortorska, deceased, and Princess Blanche of Orleans, and two sons, the eldest being the Count of Eu, born 1842, married to a daughter of Pedro II. of Brazil, and having three children, and the second the Duke of Alençon, born 1844, and married to a Bavarian princess (who was burned in the Paris bazaar fire in 1897), and having two children.

By the death of the Count of Chambord, in 1883, the elder line of the Bourbons of France became extinct, and the right of succession merged in the Count of Paris, grandson of King Louis Philippe, representative of the younger, or Orleans line.

Estimates of area and present population are by Whitaker, and in some cases by the "Statesman's Year-Book," except for British Africa and the late accessions there, which are corrected by Ravenstein's figures. The entire population of the empire, according to the estimates of the "Statesman's Year-Book," is 396,105,693, and the total area, 11,157,213. To this should be added the recent conquests in South Africa. (See Transvaal and Orange River Colonies above.) The East Indian possessions extend over a territory larger than the continent of Europe without Russia; but the North American possessions are greater still, and, inclusive of Hudson's Bay and the great lakes, have a larger area than the whole of Europe. British Africa and Australasia are the next possessions in size.
