1. Why use Categories

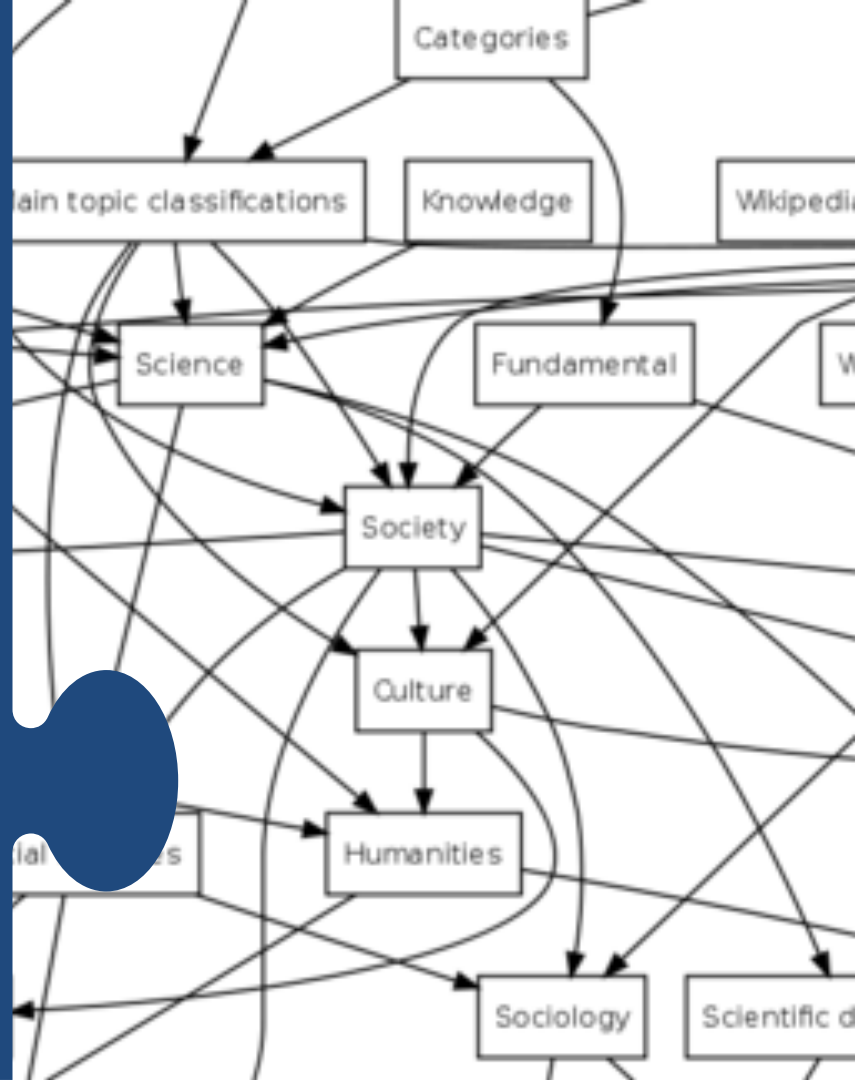

Wiki
Loves
Africa

Use Categories!

Finding stuff!

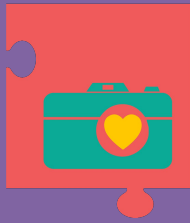

- Categories group related pages and media
- The category structure is the main way to organise and find files
- Categories are arranged in hierarchies from general to specific
 - e.g. Category:Weaving
- Each category should itself be in more general categories, forming a hierarchical structure.
- **ALWAYS** put your uploads into categories

2. Finding Categories

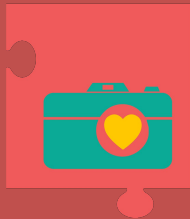

Wiki
Loves
Africa

Searching Categories

- Find categories with the search engine (see [#Categorization tips](#))
- or
- check how similar files are categorised (some may not be categorised though)
- or
- start from the main topical category ([Category:Topics](#))

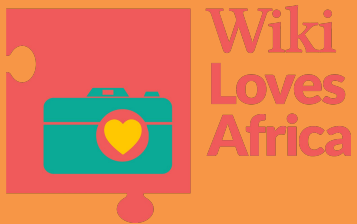

Wiki

Africa

3. Using Categories

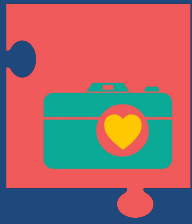

When to Use Categories

1. **When you upload!!**
(research categories before upload)
2. **Naming Categories**
 - Category names should be obvious enough to guess the subject
 - Make sure it is very specific
 - Not **Weaving**, but **Table Loom**
 - Not **Weaving**, but **Weaving machines by [country]**, etc.
 - Unidentified building in [Country]
3. **Add them after ... how do you do that?**

4. Category Tips & Tricks

Wiki
Loves
Africa

Use more than 1 Category

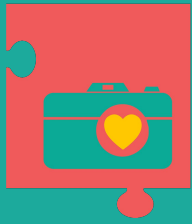

Every file should be able to be found by browsing a category structure.

Place each file directly into a category when uploading!

5. Tips & Tricks

Tips & Tricks

1. Turn on Tools

Preferences > Gadgets > Tools for categories

HotCat: easily add, remove, or change a category on a page, with name suggestions.

Cat-a-lot: helps with moving multiple files between categories or adding categories to search results

Add a link to category pages to **search for the category name with the option "-incategory"**

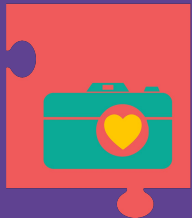

2. Show hidden categories

Preferences > Appearance > Advanced options
