He also states about the study of Nippon, which centers around the Emperor as concrete and universal being. Name - Attitude of Great Britain and the United States towards Tripartite Treaty (Leading article of the Gaiko Jiho Sha)

Gist - The principle of international peace possessed by the United States is the camouflage for the oppression of the other nation's progress. The steps taken by the United States prior to the Manchurian Incident were the denial of the equality of races and oppression in the Disarmament Conference, etc. Complicity in the East Asia resulted from the self righteousness on the part of Great Britain and the United States. The Tripartite Treaty does not aim at antagonism against Great Britain and the United States, but its purpose is to prevent a third country from participating in the War. Therefore the United States should not stand in with Great Britain.

Name of Publishing Company — The Gakko Kyoyuku Kenkyukai

One Example

Date -- February number 1940. (Responsible publisher -- FUJIMI, Yutaka)

Name -- The mission of the Imperial nation and renovation of education.

Writer -- ARAMI, Yoshiji

Gist -- Divinity of the Emperor is quite different from the admiration of king. Japan is a divine country. It is an ideal form having the unique character, which all the other countries desired to possess in vain. The mission of the Imperial nation is to raise (aufheben) the exclusive nationalism and manifest the Imperial way to the world. Nipponism which aims at the clarification of the national polity is nothing but universalism. Standing on the basis of Nipponism, we deny all the other national form, including democracy. The most important problem of renovation of education in our country is to exclude democracy, just like spiritual movement of Nazis does, and to establish the policy of nationalistic education.

Title - Throughgoing Realization of Japonism.

Writer - KITA, Reikichi, Chief Editor.

Gist - Japan has two external missions. One is the reconciliation and unification of the Oriental and Occidental cultures. The other is the emancipation of Asia. The emancipation of Asia means the emancipation of Japan. If Japan could keep and protect her racial freedom and prestige, being freed from inimical influence and obsession of European and American countries, the creative nature of the spirit of Japan could awake dormant spirit of the Asiatic races, stimulate self-consciousness and self-autonomy of these suppressed races, thereby making their real emancipation possible. By the realization of Japan's political and military influences in the Orient and the South Seas Region, the emancipation of Asia will realize itself. In order to achieve this objective, there is no other way than the complete substantiation of Japonism.
