This day is Published, No. VI., New Series, Price 8d and 81d, THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for June, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capi-tal Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Com-panies and New Capital. Prices made up to June 28.

Advertisements for next Number, to be published on July 29, must be sent to insure insertion on or before July 27. OFFICE-340 Strand.

THE FRENCH LOAN AND FRENCH FINANCE AS THEY WILL AFFECT US.

THE success of the French loan is due of course partly to the hoarded wealth and partly to the patriotism of the French nation. They are, as is well known, of a most saving, often even of a most penurious, disposition; and now they are making their country better for the fruits of it. They have money, and they are ready to lend it to their Government. Some persons imagined that the mischievous policy and the financial errors of M. Thiers' last speech would have alienated subscribers. But in no country do such persons scrutinise

18/ 41d 4/2 spirits of 1s 10d, making the whole charge 72. The wine duties, therefore, on the whole are moderate as compared with ours; the spirit duties only half what we pay, and the tobacco duty is nearly the same as ours. The duty on sugar is heavy, and Still, there is eviwill, if really imposed, be sensibly felt. dently here a clear margin of taxation, out of which much may be gained. Much also may be expected from the stamps and the registration duties, though probably not all the 3,600,0002 which the estimators set down. On the whole a large sum will be obtained, though it will not probably be enough to meet the deficit; a country in such singular calamities as France, and having on a sudden to add so largely to her expenditure, can scarcely expect to be without a considerable annual deficit for years. Still, enough will be obtained for all necessary purposes; and if there is an annual deficit of some millions to be met by borrowing, it will not be fatal to France. In time things will right themselves.

24/

...

Sugar (best quality)per cwt

Two consequences, however, of considerable importance may be expected to occur to England from the present state of things. First, in the money market we can no longer anticipate a rise in the value of money from the French loan ; on the contrary, new money which has never been on the market before will be extracted from the French provincial hoards, and this will tend to reduce the rate of interest. And the Germans are using the money to pay off their debt, which takes a security out of the market, and again tends by lessening the demand to augment the value of money.

Secondly,-what is a much more novel subject,-the whole stipulations of our French Treaty, and of the corresponding treaties of France with other countries, are vitally affected by the new proposals.

THE ECONOMIST.

By the English treaty, the import duty on the most important materials of textile manufacture stands thus :---

| | where the second s | 6 6 |
|------|--|-------|
| Flax | | 2 1 |
| Jute | *************************************** | Free. |
| | rom India) | Free. |
| | w, Australian) | Free. |

but now all these articles are to be subject to 20 per cent. The Treaty with England therefore must be modified, and the treaties with other powers likewise. We have a right to require the full twelvemonth's notice before any duty inconsistent with the Treaty is imposed; and no doubt, in justice to our own manufacturers, we shall require full notice, and the delay will prevent many of the taxes on which French financiers are calculating from coming into operation so soon as they appear to estimate.

With respect to a great many of our manufactured goods there will also be a most important change. One rule of the Treaty is as follows :- " It is further " understood that if drawbacks are granted to other articles "of French manufacture, the duties of Customs which are "imposed upon similar articles of British origin in manu-"facture shall be augmented by a surtax equal to the amount "of the drawbacks."—(Supplementary Convention, Nov. 16, 1860, Art. 3.) Consequently if the principle of the Treaty is adhered to (as nominally at least it probably will) our manufacturers will be subjected to a duty equal to a drawback allowed to the French manufacturers. But how difficult it will allowed to the French manufacturers. be to settle what that drawback shall be. Take the case of a silk dress. France has silk of her own. Who is to settle whether the dress has been made of silk which has paid duty or silk which has not paid it? And in the case of mixed fabrics extreme difficulties will arise. As soon as an attempt is made to have a high and complex tariff a hundred unexpected difficulties arise. That attempt France is now making, nor can she escape those difficulties, and we who trade with her shall in a certain degree feel them too.

THE FOREIGN SPEECHES AT THE COBDEN CLUB ME COBDEN would not be always particularly well pleased at the speeches which are made in the name of Free-trade at the Cobden Club, but it would, we are sure, have given him the liveliest pleasure to hear the vigorous protest of M. Arles Dufour against the revival of a Protectionist system in France. M. Arles Dufour well understands what we ventured to point out a week ago, that the expedient of raising a vast additional revenue by Customs' duties cannot, at least in the hands of such Protectionists as M. Thiers and M. Pouyer-Quertier, issue in anything but a highly protective system for France. What France needs in her distress—distress both moral and physical —distress arising as much from the restlessness of the political working men as from the exhaustion and suffering of a long and calamitous struggle-is the fullest development for her manufacturing and commercial energies, and this Free-trade alone can ensure her. As it is, M. Thiers appears to be intending to drain her resources at the very time he is throwing new burdens upon these resources — to interpose artificial obstructions to the development of her industries just when he needs to reap the greatest harvest from those industries. If he could not have covered the necessary increase in the interest of the debt by reductions in expenditure,—an attempt which he not only did not choose to make, but even did not wish to seem to make,—M. Thiers should, at least, in common prudence, have striven to impose such new taxes as would not drain the springs of French wealth ; and perhaps, in his Protectionist infatuation, this is precisely what he thinks he can do by the liberal increase of Customs' duties. As M. Arles Dufour very justly says, the statesmen at the head of affairs in France seem determined to learn nothing from the most striking lesson France has had. If one lesson has been more striking than another, it is that the policy initiated by the Emperor in the Cobden Treaty, whatever else it did, caused almost incredible additions to the wealth of France, and gave her, as far as mere riches are concerned, the means of meeting the mighty reverses which the political imprudence and folly of the Empire brought upon her. But M. Thiers will not learn either from the folly or the wisdom of the Emperor. The folly he imitates, by preparing for war before he has even paid

the penalty of defeat; the wisdom he neglects. If he is so eager to launch France again on the reckless career to which the immediate strengthening of both army and navy point, why not at least adopt M. Arles Dufour's wise recommendation of attempting to raise the bulk of the new taxation from direct imposts ? Is he afraid that that would cause a reaction against the military policy? Or does he in his miserable economical blindness really believe that he can add more to the wealth of France by reversing the policy of Free-trade than the Empire added by adopting it ? Whatever be the answer to this question, it may at least be safely asserted that M. Arles Dufour is a true pupil of Mr Cobden's, -that however little he may share that eminent man's strangely credulous belief that the self-interest of the world is always stronger than its passions, he knows thoroughly where that self-interest lies, how national resources are best replenished, and how nations are most surely impoverished. Mr Cobden did not convert France either to peace or to Freetrade; but he did at least leave behind him there some who had grasped thoroughly the principles of his teaching, and who can utter a protest against the views now in the ascendant, of which he would not have been ashamed.

If the representative of German economy, M. George von Bunsen, has been correctly reported, we can hardly compliment him on having an equal right to speak as a true member of the Cobden Club, and as having mastered the simple economical principles of the great evangelist of Free-trade. The close of his speech exhibits a singularly distorted conception of what the real meaning of Free-trade as distinguished from Protection is. After stating what no one will be surprised, but everyone will be glad, to hear, that Prince Bismarck is eager for economic progress, he went on to hope that the day might soon come, eventually, he said, it must come, when "America and Europe (that vast empire of Russia, I hope, in-" cluded), on their triumphal march towards no tariff at all, " shall take a firm stand on the first great step towards it, an " equal world-tariff." Now it is impossible to imagine a step which leads more completely out of the way towards "no tariff "at all" than an "equal world-tariff." "No tariff at all" of course means supplying all the wants of Government by direct taxation, and leaving therefore the various natural advantages of various countries to work without obstruction or impediment We say nothing of this as a practical from Customs duties. We admit of course that it does realise perfectly suggestion. the ideal of Free-trade, though we are by no means prepared to admit that the various and great inconveniences involved in raising your whole revenue by other taxation--while nations are no richer than they are-are not more than a set-off to the advantages of such a system. But since M. George von Bunsen must be well aware that "an equal world-tariff" is not only not an advance towards no tariff at all, but in the case of very many countries would be a great retrogression from it, unless indeed he means to propose that wherever any country puts on a customs' duty on any home-product for the sake of conforming to the wishes of the rest of the world—a very difficult sort of thing, one would suppose, to interpret—it should also put on an equal Excise duty to prevent that Customs' duty from "protecting" the home-product. He can hardly mean this, for a more absurd suggestion can hardly be imagined than that countries which import hundreds of thousands of articles free of duty—perhaps manu-facturing like articles also at home—should deliberately adopt the clumsy machinery of a Customs' duty, and (wherever like articles are manufactured at home) an equivalent Excise duty in order to meet the views of a majority of other countries which happen to wish to tax those articles. The notion of a World-Congress to determine what articles shall be equally taxed all over the world,-the countries which produce those articles being bound to put on an Excise duty ns well as the Customs' duty,—is one of the wildest flights of fancy of which an economist was ever guilty. It is hardly possible to suppose that any man ever deliberately contem-plated such a watto of work and have and have a continuous plated such a waste of wealth and labour, and such a gratuitous invention of superfluous restrictions as is involved in the conception of equalising the various tariffs all over the world,in proposing, for instance, that because we must raise money by sugar and teaduties, tea and sugar-producing countries should impose an equal duty, and then impose an Excise on the home culture in order to prevent the duty from acting as a pro-tection against competition. Such a wonderful suggestion as that can hardly have been in M. George von Bunsen's head. Yet

[July 1, 1871.

THE ECONOMIST.

if he did not mean that-he can hardly have meant anything. If the doctrines of Free-trade be true, Customs' duties, while they continue to be raised at all, should not only not be equal all over the world but should be different. The teaching of Free-trade is that the natural advantages of various countries should never be interfered with by the tariff. As a rule each country should by preference raise its Customs' revenue by duties on articles which it does not produce, in order to avoid any influence which such duties have in protecting the home-When, as in the case of the spirit and malt duties in product. When, as in the case of the spirit and malt duties in England, this is not possible, an Excise duty should be put on to balance the Customs' duty, and to prevent the producers of the importing country from reaping any advantage by the tax. But this of course implies that quite different articles should be taxed in different countries, those being always selected in preference which the countries do not produce. Farther, economical doctrine teaches that the fewer and simpler your revenue-raising expedients, the less obstruction is there to trade, and the nearer we attain to real freedom of trade. Even pure revenue duties, if they are very numerous and very complex, become a serious obstacle to the exchange of commodities between different lands. If China and England had equal tea-duties, the tea-duties in China would operate to prevent Assam teas coming in to compete with China teas, while the tea-duties in England would have no such effect. But if to prevent this China were to impose an Excise duty on the growth of tea, or cause it to be grown and prepared "in bond," the whole industry would be fearfully hampered, and its development most seriously obstructed. So again if England and America were to impose equal duties on manufactured cottons, the industries in both countries would be mischievously "protected," and there would be nothing whatever in the equality of the duty to secure that both countries would even be equally protected. For in whatever country the conditions of the productive industry are the least advantageous, the protective duty would of course operate with most mischievous effect. England has nothing to fear from American cottons, and the duty therefore at present would not operate protectively as against America, though it would operate protectively as against France. But America has everything to fear from English cottons, and the American duty would therefore operate protectively as against England. In short, it is not easy to conceive how any thinking Free-trader could talk for a moment of an equal world-tariff as a step towards no tariff. If the advantages of all nations for all sorts of products were the same, why then no doubt an equal world-tariff would be a step towards no tariff. But as in fact they are very different, and as the whole drift of the teaching of economy is to teach us how to utilise the difference, how to economise and utilise the labour of each by devoting it to what it can do best, and allowing it to exchange its surplus for the surplus of countries which can produce other articles better,-there can hardly be conceived any more ill-judged and oppressive system of tariff than an equal world-tariff, however that may be interpreted. Mr Cobden has still to make posthumous converts to his principles from amongst the members of the Club that bears his name.

THE HALF-YEAR'S RAILWAY TRAFFICS, AND PROBABLE DIVIDENDS.

It is now quite evident that the increase of railway traffic during the present half-year is quite as remarkable as the increase in the two previous half-years, if not more remarkable. We are still without returns of the last week of the half-year in the case of most companies, and of the last five weeks in the case of a few companies which do not close their accounts till the end of July, but the increase already shown places the nature of the current half-year beyond a doubt. The war has left no apparent mark on the growth of our national prosperity. Like the increase of the revenue, the increase of railway traffic tells of nothing but extending business, increasing employment for the masses, and the increasing consumption of common articles. So far as the railway shareholder is concerned, his half-year's increase of traffic is likely to be even more satisfactory than those which have lately done so much to improve the

selling value of his property. It is always the last ad-ditions which are the most profitable, and this maxim is now especially true as regards railway property, since the depression of previous years had left some traces of injury which it required the first improvements of traffic to remove, and it is only now that some companies will come into the unencumbered enjoyment of their new profit. Another cause of satisfaction to the shareholder is the large part which is due to passenger traffic in the increase which has taken place. A passenger increase is more favourable to the shareholder than a goods increase, as it requires a slighter increase of working expenses to earn it. The two should go together in the most prosperous state of railway property, but a revival is usually commenced by an increase of goods traffic, and the increase of passenge.s is a sign of an advanced stage of improvement. This portion of the increase has not been so great as was at one time anticipated, the recent weather having been very unfavourable to passenger traffic; but it is still rather more than was the case in previous half-years, when the increase was almost wholly in goods. The increase of traffic is thus a subject for congratulation both by the whole community and by the railway shareholder, and may be viewed with the more satisfaction as likely to be of some duration. The revival of trade which is in progress can hardly in any event meet with a check for some time, and a good harvest this year would insure its long continuance.

We subjoin two tables, which we hope will throw some light on the increase of traffic and the improvement of railway property which it indicates. The first is a statement relating to the increase of traffic, showing the percentage of that increase, first, upon the traffic of the corresponding halfyear of 1870, and next, upon the amount available for ordinary dividend in that half-year. The figures of the increase are partly estimated, but we have simply assumed that the average weekly increase to June 17 will be maintained to the end of the half-year, and this will leave but a small margin for error. The second statement carries out the first, and shows the probable effect on the half-year's dividend, making allowances for working expenses in earning the additional capital and for new interest and preference charges. It is difficult to make these estimates exact, but we have endeavoured to underestimate the probable gain to the companies.

The results shown by the first statement are at least unquestionable. The broad fact is that the gross increase of traffic on eighteen lines, including all the principal railways, will be about 1,048,000*l*, or $5\frac{*}{3}$ per cent. on 18,540,000*l*, the total traffic of the corresponding half-year of 1870. This increase includes no doubt one or two items like that of the Metropolitan District Railway, which are due to the opening of new mileage; but these are too small to affect the aggregate materially. On the other hand, the increase on some of the great lines is very striking indeed—in the North-Eastern, 8 per cent.; in the London and North-Western, 5 per cent.; in the Lancashire and Yorkshire, 9 per cent.; Great Western, 7 per cent. When it is considered that it is the last additions which tell in the matter of profit, there is plainly a large margin for improvement in such figures.

But this is looking to the gross traffic merely. The real comparison, as we have often insisted, has to be made between this increase and the net dividend formerly available for the ordinary shareholder. On the average, the ordinary capital is only about a third of the whole capital of a company; in many cases it is much less. Consequently a sum which is equal to from 5 to 10 per cent. on the gross traffic will be sometimes equal to 50 per cent. or more on the sum available for dividend. Reckoning in this way, we find that the gross increase of traffic looks very large in many cases when compared with the sum divided; among the ordinary shareholders for the corresponding half-year of 1870. In one or two cases, such as the Great Eastern, this arises from the smallness of the amount formerly d.vided ; but in cases where the former dividends were respectable, we find that the gross increase of traffic, calculated on the net revenue of the corresponding half of last year, is as follows :—Great Northern, 17 per cent.; Lancashire and Yorkshire, $25\frac{1}{2}$; London and North-Western, 20; Caledonian, $65\frac{1}{2}$; Great Western, 82; and North-Eastern, 29. Of course the whole increase of traffic is never a pure gain, but a very large part of it should be so, and in the present state of most companies is likely to be so.

775

THE ECONOMIST.

[July 1, 1871.

We come then to the more exact comparison, which is the object of our second table, and the results here shown, which we believe to be not very improbable, are equally striking. In many companies it is all but certain that the addition to the dividends will be at least what is stated, and the amounts will probably be exceeded. The influence of the circumstances, which we referred to at the outset, is very conspicuous. The fact that the companies have, to a large extent, got free of old difficulties is shown by the comparatively slight increase of preference and debenture charges. The closing of capital accounts will this year be more felt than ever. Railway companies are also benefiting largely by the continuation of the process of substituting debenture stocks, often at a lower rate of interest, for the debenture loans falling due. The actual gain in a particular half-year may not be much, but it assists other gains, and neutralises the effect on the dividend of a moderate increase of capital, which is all but imperative when companies have a growing business. In one or two cases also, such as the Brighton Railway, there are other old difficulties which are coming to end. For these reasons the margin of profit is very little encroached upon by new preference and debenture charges. As regards working expenses again, it may be assumed, with tolerable certainty, that in the case of some companies the new traffic will not have been earned at the same cost as the whole traffic of the corresponding half-year of 1870, which we have made the basis of our calculations. We calculate in this way in order to make sure of underestimating. In some cases there may be little room for error, the increase of traffic having been in goods, and having been earned perhaps by a keen competition ; but in the case of one or two passenger or mixed lines, such as the southern lines out of London, or the Great Western, the allowance for working expenses is probably much too high. Notwithstanding this unfavourable mode of putting the case, however, the probable increase of dividends is most remark-If railway property were to progress at this rate for a able. year or two longer, the ordinary shareholder would in all cases be in a better position than he has ever been. Assuming that the improvement in the second half of the

| | 000 | | - | ****** | * | | . 3 |

These dividends, compared with those of last year, show no small improvement of railway property, and we must again repeat that our mode of calculation rather tends to an under estimate. Thus, in Great Western it is almost certain that the new traffic will be earned not at the old rate of working expenses, but at a very much less rate. If we calculated the new working expenses at 30 per cent. of the new traffic instead of 47 per cent .- as we might fairly do-the dividend for the year would be 5 and not $4\frac{1}{2}$ per cent. Similar remarks would apply to the London and Brighton and South-Eastern lines, with perhaps even more force, the increase in these cases being still more largely in passengers. It would be tolerably safe to calculate that the addition to each half year's dividend would in the case of the Brighton be nearer $\frac{1}{2}$ than $\frac{1}{4}$ per cent., as we have reckoned it above, and in the case of the South-Eastern nearer 1 per cent. than $\frac{1}{2}$ per cent. There are also special circumstances affecting one or two lines which it is difficult to estimate-the Metropolitan, for instance, as we have been informed, having made some progress in diminishing its dead capital by the sale of surplus lands. But, even without reckoning these causes of improvement, the apparent im-provement which is taking place this year in English railway property is most striking. And in general the improvement is genuine. There are one or two cases which we need no specify where the lines we fear are not properly equipped, and too little has been deducted for working; but these cases appear to be exceptional.

BUSINESS NOTES.

GERMANY AFTER THE WAR.—The following description, extracted from the Volkszeitung, of the effect of the late war on German industry cannot but be interesting to our readers. It is only in such descriptions that we can perceive the full loss to Germany from her military system, which in time of war withdraws the strength of the nation from industrial pursuits:—

The war has not only interrupted work, but has destroyed thousands of places of work. The four million thalers, which are to be spent for the assistance of those who have suffered loss, are as a drop on a hot stone which, hissing, drops on to it, and in an instant disappears in moke. Thousands of men of the Landwehr and Reserve return to their homes crowned with victory and covered with wreaths, but they find their dwellings destitute, their wives in want, their children neglected, their workshops destroyed, their customers dispersed, their credit shaken, and the want of their manufacture lessened. Their rent is still due, which has accumulated for a year. New tools have to be bought, which their wives in time of distress have either pawned or sold. Materials have to be laid in stock, to enable them, in case of an order being given, to begin work. Repairs and clothes are necessary. The bakers, butchers, and retailers have got to be paid. If work is not begun at once, the cry of distress will soon be distinctly heard as the ech of rejoicing.....Allour small trades are founded on the credit allowed them by the great dealers. They never pay ready money but by a Bill of Exchange, which delays the payment until their goods are sold. The diminished supplies of the War year have increased the small bills to enormous sums. As long as the owner of the business was in the field the bills were prolonged. When they return home the bills have to be taken up if they wish to begin again, and their distress becomes greater as they are obliged to begin again, with renewed vigour. The payment of it will impoverish the customers of Germany, and German industry will gain nothing directly, because the money will be largely used in replacing munitions of war, and otherwise assisting warlike operations. The German triumph is thus far from unalloyed, and as France has suffered far more it would be difficult indged to measure the net suffering of the two belligerents.

THE CALCULATIONS OF FOREIGN DEBTS .- In a note to a second edition of his book on National Debts, Mr R. Dudley Baxter calls attention to a substantial difficulty in reckoning the amount of foreign debts, and in comparing the debts of the same nation at different times. This is the difficulty caused by the existence of a depreciated currency of changing value. Mr E. Plener, he states, had maintained with reference to the Austrian debt that in converting it into English money the rate of exchange on London at 125 should be considered, and that this would show the capital to be 253,000,000l, instead of 283,000,000%, the sum arrived at taking the florin at 2s. Mr Baxter however thinks that the practical difficulties in the way of computing the amounts of foreign debts at anything but the nominal par value, especially when the object is to compare debts at different periods, are so great that the attempt would introduce great confusion and uncertainty. "Their amounts " would vary with every variation of exchange, and be different " according to the place of exchange selected." All this is very true; but great as the difficulties are, we are not sure but that it would be best, where it is possible at all, to make the statements of national debts conform to some less fluctuating standard than that of a depreciated paper currency. The confusion and uncertainty are not caused simply by the attempt to translate the debt into foreign money, but exist in the home statements of the debt. It is only one more of the evils of depreciated paper that it makes the real burden of the debts and taxes change with every fluctuation of the gold premium. But that changes in the indebtedness of a nation are thus effected is a fact which ought to be recognised as well as any other, and whenever accordingly a State has a depreciated currency, it becomes desirable, if possible, to distinguish between the nominal and the actual amounts of its debt. This may very easily be done by allowing for the gold premium at the financial capital of the State, or the rate of the short exchange upon some adjacent country which happens to have a gold standard. Minute accuracy is not necessary, but changes of 10 or 20 per cent. in the premium would always be worth showing. In some cases there would be a peculiar difficulty, owing to a doubt whether the debt is payable in gold or paper; but that doubt, as far as we know, only existed in the case of America, and is a fundamental difficulty as to the amount of the debt itself.

A SHIPMASTER'S DISCRETION .- A cas -Evans v. M. Le Blanc-has just been tried at the Guildhall by the Lord Chief Justice and a jury, illustrating very well the difficulty of the points about which a master must exercise his discretion, and the serious consequences of mistakes. The defendant, a ship broker, had chartered a ship of the plaintiffs from the Thames to Montevideo for a lump sum of 6401, and "the " captain was to receive such freight as the charterers might " have payable abroad." Part of the cargo taken was 80 tons of coals, which lay at the bottom of the vessel, and were to be discharged at the risk and expense of the consignees, and the dispute arose in respect of this part of the cargo. The ship arrived in the middle of January, 1870, at Montevideo, but there was no one to receive the coals, although advertisements were put in the papers ; ultimately the captain applied to the Tribunal of Commerce, and received authority to sell the coals for payment of the freight. The freight however was 108l, and the coals only realised 30l, leaving a balance of 78l, which was now claimed from the charterers, besides 372l for demurrage at the rate of 4l a day, and 75l 10s for law and other expenses. To this claim part of the defence was that the cause of the delay was the fault of the master, who was not bound to apply to the Tribunal of Commerce, and ought to have acted on his own discretion. In charging the jury the Lord Chief Justice adopted this view. He also ruled in favour of the defendant on the point that the charterers were only bound to pay a lump sum, and held that as the demur-rage was the master's own fault, the only charge that could be made for it was 4l a day during the fortnight it would have taken to discharge the coals. The items of law expenses were 55l, out of the above sum of 72l 10s.

REASONS FOR WINDING-UP .- The Master of the Rolls has had just before him, in the case of the Ickles Rolling Mill Company, a question as to when an order can be made for winding-up a company on the ground of its being "just and "equitable" so to do. The petition was presented by two out of eleven shareholders, holding 283 shares, including the vendor of the business, about whose right to vote in respect of the fully-paid shares allotted to him for the purchase there was however a dispute, and it was also supported by all the unsecured creditors. On the other hand, it was opposed by the holders of 155 shares. Notwithstanding this support of the petition, the Master of the Rolls held that as the company was not actually insolvent, though it had made losses, nor a bubble company, nor had the members passed a resolution requiring the company to be wound-up, he could not order it to be wound up under the "just and equitable" clause. He could not assume that a company with only two years' ex-perience would not be ultimately successful. His Lordship at the same time refrained from pursuing the usual course of ordering a meeting to be held for the purpose of considering a resolution to wind-up, "as there apparently was a squabble "among the shareholders, which his Lordship could not "decide."

" UNCONSCIONABLE INTEREST."-We regret to see that the Lord Chancellor has affirmed on appeal the decisions of the Vice-Chancellor in the cases of Tyler v. Dicker and Tyler v. Yates, releasing the estates of Lord Arthur Clinton from the "excessive and unconscionable" interests and discounts included in the loans for which a charge was given upon the estates-holding that the charge was good only for the sum actually advanced, with 5 per cent. interest. We suppose the law must be considered well settled ; but its mischief in point of policy is so glaring, so contrary to the recent aim of legislation and judge made law about the enforcement of clear and distinct contracts, that we can hardly doubt the ruling of the Judges will have to be corrected just as the usury laws had to altered. If the Judges, when a contract for a loan comes before them, are to decide what charge for interest is unconscionable or not, no lending contract is really safe. There is no distinct line to be drawn, and the most innocent bargains may be upset. The Judges are shocked at 60 per cent. now, but there is nothing to hinder them from being shocked at 16 or 6 in future. In trath no contract will be safe, for by the same rule of interpretation, the Judges may object to excessive and unconscionable prices or stipulations. There is no saying what will happen if the simplicity of the rale of enforcing There is no saying plain contracts between people who are competent to contract is once departed from. It is a different matter where there is

777

THE ECONOMIST.

[July 1, 1871.

frand or undue influence, but the charges of fraud in the present case had to be withdrawn. And as to the hardship of dissipating estates and ruining men of good family, we confess we rather think it is good for the community that large property should pass very quickly out of the hands of people who make such contracts as those which the Lord Chancellor has just upset.

DISTINCTIONS WITHOUT A DIFFEBENCE .- A good deal of the unpopularity of the income tax undoubtedly arises from the roughness of its assessment. We do not think that this roughness, as a rule, is inexpedient. A tax must before all things be intelligible, and if over refinement were attempted, its value as a means of raising money would disappear. But where obvious injustice is perpetrated by the working of an arbitrary rule, which is not a whit more plain and intelligible than a juster rule would be, there is a clear case for the income tax authorities modifying their procedure. Such a case is apparently shown in the grievance of the officers of the navy in regard to their travelling expenses, which has formed the subject of recent questions by Mr Bentinck to the First Lord of the Admiralty. According to Mr Goschen's replies, income tax is not charged on the amount allowed for the travelling expenses of officers when they state the amount of them in detail; but it is charged when the officers claim the maximum rate allowed, without showing the details. But this is surely a distinction without a difference. The maximum allowance, it is to be assumed, would not be made by the spending depart-ment without some computation of the cost, and for all the money the tax on the allowance would bring in it is not worth while putting it on a different footing from the allowance of expenses exhibited in a detailed account. In any case the officers should be allowed to deduct the actual cost of their travelling in such cases from the gross allowance in calculating the addition made by it to their income. Very probably the grievance is a sentimental one-the officers in question probably gaining by taking the gross allowance, even after the deduction of the income tax from it; but it is this sort of grievance nevertheless which is apt to make people angry with the tax. There are many other cases in which the income tax authorities are stingy about deductions with very little cause, and we fancy that somewhat more care would pay. A taxpayer under Schedule D will always be specially annoyed by having to pay on a gross income which he knows to be not really available to him—which, on the contrary, is earned at an expense the authorities will not allow for.

A CENTRAL METROPOLITAN STATION .- There ought to be some provision for printing and distributing in the usual way so-called private bills, which are really of great public interest, along with the report and evidence given before the select committee which inquires into them. Last week it is reported, the select committee had passed the preamble of a Bill for creating a Central Metropolitan Bailway Ter-minus—a measure which has a double interest for the inha-bitants of the Metropolis, in one way as increasing or altering their facilities for travelling, and in another as occupying a large part of the business area to which they are confined. Strictly speaking too the whole country has an interest only second to that of the inhabitants of the Metropolis in both these objects, the efficiency of the business arrangements of the metropolis being a matter of concern to everyone. But of this great scheme, just as in the case of similar schemes which have been dealt with in late years, the public hear too little. The usual notices were no doubt given last November to private owners, and the public could gather from them in a general way what property was to be taken and what com-panies were interested; but this is a different thing from a complete discussion of the nature of the concession required, and the advantages offered to the public. So little is known of these affairs that the short announcement of the proceedings of the select committee, sanctioning the "principle" of a Central Railway Terminus between Holborn Viaduct and Farringdon street Station would probably excite some surprise. It would certainly be most interesting if the select committee would publish their evidence, showing in detail the nature of the proposed junctions, the contemplated expendi-ture, and the degree of use which would probably be made of the Central Terminus.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, June 29. The new loan of two milliards (80,000,000l) in 5 per cent The new loan of two maturus (co, oo, oot) in 5 per cent, stock has been brought out more quickly than was expected. A public subscription was opened on Tuesday, the price fixed being 82f 50c, payable 12f down, the rest in sixteen monthly instalments from the 21st of August, 1871, to 21st November, Instalments from the 21st of August, 1871, to 21st November, 1872, with 6 per cent. discount on those paid in advance. The subscription, it was intimated, would be closed as soon as the amount required was offered, but in no case would be kept open later than the 30th. In reality, a single day sufficed for it, and early yesterday (Wednesday) morning placards on the walls made known that it was closed. In the offeen on M. Pouver Operator approximate to the Assertion placards on the walls made known that it was chosenably at afternoon M. Pouyer-Quertier announced to the Assembly at afternoon M. Pouyer-Quertier announced to the success of the operation. "The sub-Versailles the complete success of the operation. "The sub-scription commenced," said he, "at ten o'clock in the morn. ing all over France, in all the offices of tax-gatherers, and in all the banks of Europe; even also in Bombay, Calcutta, and the towns of India." [This mention of India is represented in the Parliamentary report to have caused "prolonged sensation" --it was occasioned by telegrams having been received from the agencies of the Comptoir d'Escompte at Bombay and Calcutta, stating that subscriptions had been made there.] "The success of the loan proves," continued the Minister, "how much abroad as at home immense confidence is felt in our unfortunate country, which successive and unmerited catastrophes have plunged into the most deplorable disasters. The figures, gentlemen, are eloquent in themselves; yesterday, in the space of six hours, we united in the name of France a sum of 4,500,000,000f (180,000,000l). Yes, four and a half milliards, that is double the sum that we asked for." This drew forth loud expressions of enthusiasm. The Minister then declared that the result had been obtained without the Government "having employed any factitious means, or spent a penny on the Bourse," and that it was owing to the patriotic co-operation of the press, to the all-powerfulness of the credit of France, to the confidence she inspires to all Europe, and to her honesty, known in every part of the globe." At this there was more enthusiastic applause. The Minister then gave these details :- At Paris the subscription amounted to 2,500,000,000f; in the country to more than 1,000,000,000f; foreign countries to a little less than 1,000,000,000f. He re-marked with pride that France had "the greater part in the honour of the loan," and declared that the greater part in the honour of the loan," and declared that the success of it "ex-ceeded the hopes of the Government, and would permit it to fulfil more rapidly than it had expected its engagements to Germany—to, in fact, do so much before the time imposed on it." The Chamber expressed its approbation in a most heighter the superset of t boisterous manner.

boisterous manner. The triumph of the loan is certainly great, but not more so than might have been counted on after the prodigious results obtained by public subscriptions to the borrowings of the Empire. In saying that the Government did not employ factitious means, the Minister was not quite correct, for it not only made newspapers preach up the loan, but communicated to them strings of telegrams from London, Madrid, Vienna, Turin, and other towns, representing that foreign bankers were going wild about it, and that foreign journals vied with each other in vaunting it as the best and most profitable investment ever offered to the world. In stating, too, that in six hours the Government had "united" 4,500,000,000f (the word is *reuni*, and might in this case be translated "cellected"), he decidedly exaggerated a good deal. What is true is that $4\frac{1}{2}$ milliards were "demanded," which is very different, and moreover the greater part of the sum was asked for without the slightest desire to get it, and without the means to pay for it if granted—with, too, the intention to sell on the Bourse the portions obtained without delay, in order to profit by the premium to which the loan had been driven.

At one time the general expectation was that the greater part of the loan would be subscribed abroad; and strange tales were told of the enormous amounts Rothschild, Baring, Coutts, and other magnates of London had ready to invest—40,000,000! sterling by one, 12,000,000! by another, and so on; also of incalculable millions that were waiting to come from Berlin and Frankfort. It ought to be gratifying to the French to see that foreign capitalists care less and their own countrymen more for the *affaire* than was stated. In the French subscription the stockbrokers of Paris took a large part—66,000,000f reate (not capital) it is said. The Société Générale and other credit companies, also the principal assurance companies, and the leading bankers of Paris, likewise liberally aided the Government.

Government. The establishment of a French Financial Commission at London in connction with the loan occasioned some surprise. The surprise was not unmixed with pleasure, for it was said that in paying English holders at a fixed rate, and in English money they would be more favoured than French, if by chance the

Bank of France notes, in which the Government will probably pay dividends, should become depreciated. But in answer to this, it was represented that the commission would perhaps be able to bring the new stock into favour in England, which would be an advantage for all. Apropos to this matter, it would perhaps have been desirable that the French Govern-ment should have taken an engagement not to tax the dividends hereafter. From what we have witnessed in Austria and Italy such a promise would be useful.

The Government, for some unexplained reason, was desirous to keep secret for awhile its new plan of taxation, but a jour-nal obtained a copy of it, and printed it. It is one of the most astonishing measures ever presented to a Parliament. Not a new "idea" in it—not even the adoption of the "ideas" Not a new "idea" in it—not even the adoption of the "ideas that other countries have supplied with success; nothing but the aggravation of what existed previously, though it was radically bad, and the resuscitation of what, being absolutely intolerable and absurd, was put to death years ago. If the statesmen of France are capable of producing nothing better,

we really must despair of this country. Taking in the project what is of special interest to England, we find that the duties on iron and coal are to remain unchanged, but that everything else is to be taxed. "Whilst maintaining the necessity of a great metallurgic industry in France," says the report that precedes the scheme, we think that the suppression of the abuses of the Customhouse bonds (acquits de caution), will be sufficient to maintain prosperity, which, whilst preserving the interests of iron-masters, will protect sufficiently consumers against exagge-rated prices." These acquits de caution have several times been mentioned in your Paris correspondence: they permit iron to be introduced free of duty on condition of being worked are introduced free of duty on condition of being worked up into machinery and implements, and re-exported. But ironmasters have constantly complained that under cover of these, engine-builders, and others to whom iron is the raw material, have contrived, by skilfully trans-ferring them from one market to another, to lower prices permanently. The remedy the masters saw for this was that the *identical* iron bought in should be exported of another of the second secon in the form in which it had been worked up, instead of an equivalent quantity which the workers had been allowed to contribute. In undertaking to suppress the "abuses" of the system the Government decides for iron masters against con-sumers, and the practical result will no doubt be to reduce the import from abroad. The maintenance of the existing duties import from abroad. The maintenance of the existing duties is therefore not so generous as at first aspect appears. With respect to coal it is said:—"Our coal pits remain in the situation in which they previously were, and no aggravation of tariff appears necessary on an article which is of the first necessity to agriculture and manufacturers." Perhaps it may not be out of place to note that the Minister of Finance who writes this, M. Pouyer-Quertier, has for many years been one of the principal cotton memory for many years been one of the principal cotton manufacturers of Rouen, and as such is a great consumer of English coal. He must, we may imagine, have felt great satisfaction at finding that his duty as Minister did not require him to augment the price of an article he uses largely in his private capacity.

Apart from coal and iron, the new project taxes mercilessly. The existing duties on sugar, "of all kinds and all origins," are to be increased by three-tenths; coffee is to pay from 150f to 200f the 100 kilogs (calculating 25f to the \pounds , and 100 kilogs as 2 cwts, this makes 60l to 80l the ton); petroleum is to pay 40f and 45f, and more if refined. Almost all other articles, from the most important to the most insignificant, are subjected to duties of 20, 10, or 2 per cent. on the value. In the 20 per cent. category are hides, skins, furs, wool, silk, cotton, oleaginous grain, opium, flax, hemp, jute, hops. There are also in this category umbrellas, parasols, sealing wax, and gingerbread. In the 10 per cent. department are rice, dye woods, madder, in the loper cent. department are rice, dye woods, madder, tin, zinc, copper, lead, bark for tanning, indigo, cashoo, cochineal; also ink, lead pencil, and paste. In addition, all ships, whether French or foreign, bringing goods from foreign countries or the French colonies, are to pay If the ton on their measurement.

Two other points call for special attention in England : "Drawbacks," says the project, "may be accorded on the pro-ducts made of the raw materials to which the duties applyForeign products, similar to those which profit by the drawback, shall pay duties equivalent to the amount of drawback." In other "Drawbacks, words, as cotton, silk, wool, &c., are to pay, articles fabricated of those materials in foreign countries are to be taxed more heavily than they have hitherto been. These enactments are accompanied by the extraordinary stipulation that the said drawback and duties shall be fixed by the Chief of the Executive Gon

In domestic taxation the changes are these :--On native sugar the same extra duty as on foreign and colonial; re-establish-ment of the second decime (tenth part of a franc) on certain stamp and registration duties, which was abolished some time ago, and the imposition of new stamp duties on railway receipts, and on receipts given by public officials; the extension to all foreign securities, of whatever kind, bequeathed or given to a

Frenchman of the duty heretofore paid only by certain of them, and subjection to legacy duty of foreign securities possessed by foreigners dying in France; a tax on maritime and fire assurance, varying according to the amount thereof, and one on such assurances effected abroad on property in France on belowing to Franchman. a tax on unwritten agree France or belonging to Frenchmen; a tax on unwritten agree-ments for letting, selling, and exchanging houses and lands;

ments for letting, selling, and exchanging houses and lands; the re-establishment of stamp duty on newspapers as in 1850; an augmentation of the duty on wine, cider, perry, alcohol, beer, and of the licence duty paid by public-house keepers, dis-llers, brewers, wholesale wine and spirit dealers, makers of playing cards, of sugar, chemical matches, chicory, and paper; an augmentation of duty on playing cards, and of the selling price of tobacco (the latter is a Government monopoly); a tax on chemical matches and chicory; a tax of from 6f to 25f the 100 kilogs on paper, and the addition of it to the existing duties on the import of foreign paper, but French paper exported to be exempt; postage of letters in towns increased from 10c to 15c, and in the country from 20c to 25c, with increased charges for letters weighing more than 10 grammes, for unpaid and registered letters, samples, prospectuses, articles of value, also for money-orders, samples, prospectuses, &c. Nor is this all: export duties are to be imposed on whes &c. Nor is this all: *export* duties are to be imposed on wines of 1f the hectolitre, or about 22 gallons, if in casks, 20c the bottle of champagne, 5c the bottle other sorts; and on alcohols at the rate of 2f the hectolitre in cask, 20c in bottle, and liqueurs 25c the bottle. Eggs, of which the export amounts to millions annually, are to pay 3f the 100 kilogs; and table fruits, of which also the export is large, are to pay 2f. Oil-Oilcake, too, which has latterly been in great demand abroad, is to be taxed 2f. Even certain sort of dogs are to pay, and the duty put on them is 5f per head.

The details of the measure are not yet widely known through-out France, but when they are they will doubtless produce great perturbation. Affecting every branch of commerce and industry, we may expect everyone to cry out against them. Already has the Chamber of Commerce of Havre protested Already has the Chamber of Commerce of Havre protested against them generally, and particularly against the power of taxing awarded to the head of the Government. This last power the Chamber regards as arbitrary, and as a violation of the special privilege of the Assembly. The workmen of Roubaix, on their part, have signed an address which, regard being had to the part their class play in politics, is significant just now:

"We, the undersigned, having learned that the Government intends to tax raw materials, declare that this measure appears to us to be fatal to industry, to commerce, and in particular to labour. The tax on raw materials will make the workman suffer. His days of work will be diminished, and at the same time he will pay dearer for articles of consumption. The poor and laborious classes will be more unequally burdened than and laborious classes will be more unequality burdened than any others, particularly as regards clothing.......We are of opinion that fortunes ought to be taxed, not the labour which makes the country live and prosper. We think that when a tax is established it ought to be equitable, and not make those

who possess the least pay the most." The Committee of the National Assembly charged to inquire into the purchases of arms, ammunition, and stores made for the army under the Government of National Defence, has re ported that gross abuses were committed at New York by M. Place, the French Consul-general. Credits, it said, amount-ing to 34,000,000f were granted to him, and he appropriated on pretext of commission, by overcharges for purchases effected and by falsified accounts sums of 600,000f, 360,000f, and 312,000f; also charged for some carbines and mitrail-leuses 35 per cent. more than he paid, and bought 6,000 carbines that were of no use. These revelations, as may be imagined, have created great sensation. Others almost as startling are expected.

The financial situation of the city of Lyons is so embarrassed that one of its deputies a few days ago announced that it would be bankrupt on 30th June. The Municipal Council, has however, re-established the octroi dues, producing about 7,000,000f, which were abolished by the Commune (Lyons had a Commune even before Paris), and the Government has advanced 2,000,000f. By this means it is hoped the town will

a Commune even before Paris), and the Government has ad-vanced 2,000,000f. By this means it is hoped the town will be able to avoid the disgrace with which it was threatened. The Prefecture of the Seine (Paris) began paying on Monday the coupon of interest, the bonds drawn, and the lottery prizes that were overdue. The coupons of the 1869 loan will, how-ever, only be paid on paid-up obligations. The Bank of France announces from the 1st the payment of 100f per share, of which 30f to complete the dividend of the second half of 1870, and 70f for dividend of first half of 1871.

1871.

Payment of coupons falling due 1st July is announced by the Orleans, the Southern, the North-East, the Treport, the Herault, the Bordeaux to Salve, and the Rouen railway companies.

It is announced that the dividend of the Northern Railway for 1870 is to be 42f, including 8f paid in January as interest.

In the annual meeting of the Madrid to Saragossa and Alicant Railway the gross receipts of 1870 were stated to be 27,042,698f; the working expenses and repairs, 10,737,757f; the interest on debentures, &c., 15,016,983f. The balance was added to the reserve of undistributed profits, and made them 4,823,084f.

The Bank de Credit Italien of Florence, represented at Paris by the Credit Industrial, announces a dividend of 12 *lire* for 1870, half payable at once, the other half on 1st January. The meeting of the Messageries Maritimes is fixed for the

1st August.

In 1861, there was a good demand for money, owing to the preparations for the end of the month, but business continued to be greatly restricted. The Bank of France was causing considerable perturbations in the money market in consequence of their choosing to pay in silver very soon after they had been anxious to pay in gold, instead of raising their rate of interest to meet an outward drain of bullion.

In 1868, the approach of the 4th of the month caused no appreciable difference in the demand for money—the 2 per cent. period continuing. The revenue returns of the quarter were unsatisfactory, but it was pointed out that a falling off was quite to be expected after the bad harvest of 1867. An agreement had just been concluded between the Government and the Telegraph Companies as to the terms of purchase.

In 1869, there had been a great demand for short money just at the end of the half-year, but it had subsided at the close of the week. The expense of a gold coinage was being discussed with reference to suggestions of Mr Lowe for an international coinage.

In 1870, there was an improved trade demand, and the commitments on foreign loans were also large, but there was a large supply of money, and no immediate advance in the rate was looked for. The death of Lord Clarendon had just occurred, and there was no sign of the Hohenzollern incident, in which the war of last year, which was declared on the 15th of July, originated.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 9,309,178*l*; in 1868, an excess of 1,045,631*l*; in 1869, a deficiency of 1,402,483*l*; and in 1870, a deficiency of 5,028,259*l*. In 1871, there is an excess of 2,477,958*l*.

DISCOUNT AND MONEY MARKET .- Owing to the pressure for money customary at the close of the half-year, assisted in some degree by the requirements for the deposits on applications for the new French loan, there has been a very active demand for money during the week until to-day. The Stock Exchange settlement also contributed to the pressure. In consequence, both at the Bank and in the open market, there was a very firm demand, and the minimum open market rate instead of being $2\frac{1}{8}$, as was the case last week, was steady at $2\frac{1}{4}$, the rates for long-dated paper having also risen in proportion. To-day the demand has somewhat slackened at the banks and discount houses, and though the quoted rates are what have been current during the week, it will be understood that for the moment the market is rather unsettled, and the quotations are a little wide, there being numerous exceptional transactions. There is likewise less pressure at the Bank than there has been during the week.

The uncertainty in the market is very natural in consequence of the large subscription for the French loan in France, and the evident sposition of the French public to take up their own securities. If the loan had been principally subscribed abroad the effect on the money market, it is thought, would have been greater than it is now likely to be. The restoration of order in France is apparently bringing out money which has been hoarded during the war, so that if the French loan demands are great there is a large supply of new money to meet them, and less will accordingly be taken from the superabundance in the European money markets. The large accumulation in Lombard street again will be increased in a THE ECONOMIST.

few days by the payment of the dividends, while the great prosperity of trade continues a permanent cause of accumulation. The great confidence which the French have so unexpectedly shown in their own Government has thus changed materially one of the principal conditions upon which it was reckoned that the French requirements would cause an important monetary disturbance. For the moment, however, it is possible some movement will be felt, remittances on a considerable scale from London to Paris being already in progress; but, in the face of the large subscriptions in France, this movement will probably not enhance the value of money, except to a most limited extent.

With regard to the return to the money market of France of the money which has lately been hoarded, we are informed that not only has gold been brought out to pay deposits on the loan, but that it is also being used in the payment of taxes, which are being got in with surprising facility. In this giving up of hoarded money, however, there is an element of danger. It may soon be discovered that the recent large addition to the circulation is in excess of the normal requirements of the country, and the inconvertible paper may fall to a discount. There is much good authority in France for the opinion that such an event is not likely to happen; but according to all experience, it is at least possible, and any signs of depreciation should be carefully watched. Of course, should the Bank of France contract its issue so as to avert depreciation and provide for an easy return to cash payments, the addition to the general money supply which is expected from the giving up of hoarded money would not take place.

The changes in the Bank account for the week are principally an increase of 3,844,000*l* in the private securities, and of 3,882,000*l* in the private deposits, the two almost balancing each other, and indicating that the money borrowed has immediately come back to the Bank as deposits. The amount however will probably be drawn upon to some extent on account of the French loan, and to meet bills coming due on the 4th. Bullion has increased 201,000*l*, compared with the preceding return.

We subjoin our usual quotations for mercantile paper having various periods to ran :--

THE STOCK MARKETS.—The week has been one of more than the average activity on the Stock Exchange, and the movement is the more noticeable from the dulness and suspense which have now prevailed, more or less, for many months, and at the very last amounted very nearly to a suspension of business. The change is caused by the introduction of the French loan of 80,000,000/. The financial arrangements of the French Government for the gradual payment of the instalments, the success of the loan itself, and the extent to which it has been applied for and subscribed in France, have all contributed to impart some degree of cheerfulness to every department. In the actual circumstances, it is believed the disturbance which such a financial operation was likely to cause, will be reduced to a minimum. It appears also that the preparations for the loan by French bankers and others by the sale of other securities in preparation for the loan had been pretty well completed, and their effect on the

market felt before the issue. The markets, which remained dull up to the issue, have therefore all at once become buoyant. In the leading departments of English and Foreign Government securities and English railways, the improvement has been very conspicuous.

The week has also been marked by continued applications for subscriptions on behalf of new undertakings—another indication of the remarkable abundance of money in Lombard street and on the Stock Exchange. The Turkish loan has not yet been brought out; but it is now spoken of as imminent, and to all appearance applications from other Powers will be encouraged by the present aspect of the markets.

In the French loan itself, as will be seen from the details which we give below, a great deal of business has been done, and the premium rose rapidly in the dealings on Thursday on the news of the large amount of French subscriptions.

ENGLISH GOVEENMENT SECURITIES.—As we have stated, this department shared in the buoyancy of the week, consequent on the subscription of the French loan. The continuous prosperity of the country and the steady accumulation of money, notwithstanding all the recent demands, have also had some effect, while the anticipations respecting the harvest have once more become sanguine. To all appearance, however, there will now be a rush of new loans and enterprises, which must at an early date absorb the present surplus money, and cause a withdrawal of temporary investments from English stocks. To-day the upward movement has been steady, and the closing price, both for money and the account, is $92\frac{1}{8}\frac{1}{4}$, or $\frac{3}{8}$ above last week.

FOREIGN GOVERNMENT SECURITIES .- The event of the week, as we have stated, was the issue on Tuesday morning-simultaneously in London and other European cities, as well as Paris-of the new French loan of 80,000,000l effective. The interest, as was known beforehand, was 5 per cent., and the price of issue $82\frac{1}{2}$ per cent. The English prospectas was issued by Messrs Baring and Messrs Bothschild, and stated that deposits and subscriptions would be received at the fixed exchange of 25f 30c per £-the deposit on application being, as in Paris, 12 per cent., and the remainder being payable in 16 monthly instalments, with a discount of 6 per cent. for payments in full at once. The loan, as we stated last week, was dealt in at a premium even before its issue, and since the issue the premium has steadily advanced. This is hardly to be wondered at considering the rapidity with which the subscription was filled up. According to the usual practice in France, the loan was to be closed as soon as filled up, but so rapid were the applications that at the closing of the loan on the morning of the second day the offers amounted to 180,000.0001--more than twice the amount required. The offer of the combination of bankers, to which we referred last week, was, we are informed, accepted, and 40,000,000l of the total at least will thus be in the hands of agents who mean to sell again at a sufficient premium ; but such is the success of the loan that it seems doubtful whether this circumstance will retard for any length of time the satural rise in French securities, which may now be looked forward to. On the Stock Exchange here the loan was received with no marked favour, owing to the difference

THE ECONOMIST.

in the Paris practice as to closing, to which we referred last week; but the applications even on Tuesday morning were understood to be large, and, as we have stated, there has since been a large amount of dealing. To-day the market has since tinued buoyant, the premium rising rapidly from $2\frac{1}{4}$ to $2\frac{3}{4}$ 3, and the closing quotation being $2\frac{1}{2}\frac{1}{5}$. In almost all descriptions of foreign securities, including

French Rentes, and the National Defence loan, there has been a rise, and we note improvements especially in Russian, Tarkish, Egyptian, Italian, and Spanish stocks. The improvements in some of these indicate with tolerable certainty the previous completion of the arrangements for taking part in the French loan, and it is even stated that a partial reinvestment has commenced. To-day there was another rise in most of these securities, which show, as will be seen from our usual list, a marked improvement for the week. It is probable that they will continue to advance, and in some quarters even a considerable general advance is talked of; but it may be doubted whether there is room for any great improvement, especially as the new demands will probably be somewhat heavy.

The change in the week in French Rentes is from $52\frac{5}{16}\frac{7}{16}$ to $52\frac{9}{16}\frac{11}{16}$; and in the National Defence loan from $95\frac{3}{4}\frac{7}{28}$ to 96# 1.

The other new loans have cloeed as follows :-- Costa Rica, 1⁴/₄ to 2¹/₄ prem. ; Russian, 1871, 3¹/₅ to 3⁴/₅ prem. ; Spanish Land Certificates, ¹/₈ dis. to ¹/₅ prem.

The following are the changes for the week, taking the latest unofficial prices for quotation :---

ENGLISH RAILWAYS .- Now that the suspense caused by the apprehensions about the French loan is over, the steady improvement which was the feature in this market about two months ago appears to be resumed. A distinct start was made in the middle of the week, especially in Lancashire and Yorkshire, where there was a very good traffic return, and in North-Eastern, where a scarcity of stock was discovered at the settlement, and the improvement, which extended to nearly all the principal railways, was maintained almost to the very close to-day. The exceptions have principally been Sheffield and Brighton, but any downward tendency even in these exceptional cases has been rapidly checked, although it appears the contangoes in Sheffield were very heavy. In present circumstances-though investors should only act with great caution, and with a knowledge that they can hold for a good while-we should think it not unlikely that another material rise in English railway shares is approaching. The improvement in traffic in the second half of the year may fairly be expected to exceed what has occurred in the first half of the year, the second half being usually the most active. The first half, however, has been the most prosperous since the revival of railway prosperity began, so that the improvement to be looked forward

to will be on a considerable scale. The general circumstances of the money market also favour the principal companies very much. They have no difficulty in substituting debenture stock for debenture loans, usually at a lower rate of interest ; and the increased profitableness and stability thus acquired add greatly to the value of the ordinary stock of railways. It is hardly possible that the financial collapse of 1866, which was so much aggravated by the discredit of debentures in a time of panic, can again recur. These are all reasons why in the present abundance of money ordinary stocks should be more and more sought after, even though the average dividend yielded to the investor should hardly be enough to compensate any risk in consequence of the high price he is called on to pay. The ordinary natural growth of the property more than compensates any little risk.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending June 24 to 775,8801, being an increase of 37,4391 on the corresponding week of last year. The aggregate receipts of the half-year to the same date were 17,423,005*l*, being an increase of 959,185*l* on the corresponding period of last year. The cases of most marked increase for the week are-Great Northern, 3,3751; Lancashire and Yorkshire, 5,7421; London and North-Western, 5,8191; Midland, 4,6051; and North-Eastern, 3,3961. The following shows the details of the increase or decrease in each

AMERICAN SECURITIES .- A steady demand has prevailed for United States bonds, and a farther rise of 3 has taken place in the value of the 1862 issue. American railways close without much change. A fresh attempt is apparently about to be made to float the New Funding loan in Europe, and according to the New York *Tribune*—"Judge William A. Richardson, assistant-secretary of the Treasury, sailed for Europe yesterday in the Java. He was accompanied by Messrs Bigelow and Prentiss, of the Treasury Depart-He was accompanied ment. Judge Richardson's mission is to place the new Government loan upon the market. He is clothed with full power. The party have in charge an iron safe, manufactured expressly for the occasion at the Treasury Department, con-taining several millions of the new bonds." The vessel has now arrived, and immediate action may be looked for. The following shows the change for the week :-

++ 10 1 -+ ł + 1

BANKS .- The movements in this department have been favourable on the whole, though not numerous. English and Scottish Chartered and Bank of Australasia have risen 1, and Bank of New Zealand $\frac{1}{2}$. On the other hand, there is a decline of $\frac{1}{4}$ in Agra, and $\frac{1}{2}$ in Chartered Mercantile.

TELEGRAPHS.-A steady demand has prevailed for cable shares, and the upward movement has made farther progress. Anglo-American have risen 3; Great Northern Extension, 1; French Cables, $\frac{1}{2}$; British Indian Extension, $\frac{1}{4}$; Falmouth and British Indian Submarine, $\frac{1}{8}$. Submarine stock is nominally 5 lower. Silver's India Rubber Works shares have risen 4, and Telegraph Construction 1 on the week, but Hooper's have given way 1.

MINES .- A fair amount of business has been transacted in British mining' shares, and the result of the week's operations upon prices have been favourable. North Roskear have advanced 8; Devon Great Consols, 5; West Seton, 3; Tan-kerville, $2\frac{1}{2}$; Wheal Grenville, $1\frac{1}{2}$; Great Wheal Vor, $\frac{1}{2}$. Wheal Trelawny shares have given way $2\frac{1}{2}$; East Lovell, 2; and Bronflyd, $\frac{1}{2}$. In the foreign market the only changes worth recording are a rise of $1\frac{1}{2}$ in Cape Copper, and 1 in Eberhardts.

The letters of allotment in respect of the recent issue of Debentures for 300,000l by the Mineral Hill Silver Mines Company (Limited) were delivered on Thursday. It is stated that the total amount applied for was 1,201,800%, or four times the sum required. The debentures are $6\frac{1}{2}$ to $7\frac{1}{2}$ prem. A prospectus has been issued this evening of the Swansea

Smelting and Silver Mining Company (Limited), capital, 60,000l, in 20,000 shares of 3l each. The object of the company is to purchase and work the Swansea Smelting Works and Silver Mines in Clear Creek County, Colorado, United States, and the following profits are calculated upon : 20,000l from mining, 10,000l from buying ores, and 10,000l from smelting, making 40,000l per annum, or 66 per cent. upon the capital. The prospectus states that the purchase has been agreed upon for 35,000l—27,000l to be paid in fully paid-up shares—but the property will not be transferred unless upon confirmation of the vendors' statements. In the meantime 3s per share only is to be paid on application to supply a fund for the preliminary expenses of inquiry, and it is stated that all applications for shares are to be in a form "making it optional to the applicant to complete on the scrip being called in for registration." This last feature appears to be a novelty in such prospectuses, and if it is found that people can become "optional shareholders" it is likely to be largely imitated.

MISCELLANEOUS .- The shares of the asphalte companies have been in demand, though Val de Travers closed to-day rather lower, at 18 to 181. Hungarian Land Credit, 1 dis. to rather lower, at 10 to 10_{5} . Integration hand Great, $\frac{1}{4}$ dis. to $\frac{1}{4}$ prem.; Mexican Bailway debentures, $1\frac{3}{4}$ to $1\frac{1}{4}$ dis.; Sub-marine Cables Trust, 3 to 2 dis.; and Berlin Cattle Market, $2\frac{1}{4}$ to $2\frac{3}{4}$ prem. Among the leading changes are a decline of $1\frac{1}{4}$ in London and $\frac{1}{4}$ in North Metropolitan Tranways; 2 in Linking Entrance. Liebig's Extract; 1 in Peninsular and Oriental. Foreign and

Colonial Trust have risen 1: London Financial and London General Omnibus, 1; Berlin Waterworks, 1. A prospectus has been issued of the Kirkstall Brewery Company, Limited (late Benjamin Dawson and Co.), capital, 110,000*l*, in 8,000 ordinary shares of 10*l* each, and 3,000 6 per cent, preference shares also of 10*l* each. The company is cent. preference shares also of 10l each. The company is formed to purchase and work the Kirkstall Brewery, and the price to be paid is 47,500l for plant, machinery, and good-will-the other assets to be taken at a valuation. An under-An undertaking for the same purpose was brought out last autumn, but was withdrawn on account of the war. Messrs Seymour and Co., who introduce this affair, refer to the success of the brewery companies which they have introduced.

BULLION .- The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :-

In bullion during the week : — Gold.—A slight demand for gold exists to-day, sufficient to absorb the amounts now on hand; it is, however, expected that the sums now on the way, from America and elsewhere, will be more than sufficient to supply all immediate orders. We have received during the week about 245,000 ℓ , chiefly from New York. The Bank has purchased 134,000 ℓ , and sovereigns to the value of 60,000 ℓ have been withdrawn for transmission to the Cape and Brazils. Silver.—About 80,000 ℓ has been received from New York and the West Indies. The market remains firm, and the price may be quoted as 60 $\frac{1}{2}$ d to 60 $\frac{1}{2}$ d per or standard.

Silver.—About 80,000 has been received from New Fork and the West Indies. The market remains firm, and the price may be quoted as 60_{2}^{1} d to 60_{76}^{10} d per or standard. Mexican Dollars.—Owing to the scarcity of this coin prices have slightly improved, and may now be quoted as 58_{2}^{1} d for new, and 60_{4}^{1} d per oz for the old coinage. The receipts from all quarters during the week do not amount to much more than about 40,006. The Candia has have taken 27 00014 to the Straits and China

has taken 37,000/ to the Straits and China. Exchange on India for Banks' drafts at 60 days' sight is $1 \pm 10\frac{3}{2}$ d to

Exchange on India for Banks' urates at 60 anys ingentified by the second second

The sum of 61,000l was withdrawn from the Bank of England to-day.

According to the Gazette return, the import of the precious metals during the week ended June 28, were :-Gold, 349,104l; silver, 258,630l. The exports were :-Gold, 123,526l; silver, 88,484l.

NOTICES AND REPORTS.

STOCKS.

French National 5 per Cent. Loan for Two Milliards of Francs (80,000,000l).—At the nominal price of 82½ per cent., reduced however to below 80 per cent., by instalments being deferred, the whole of this great loan has been eagerly subscribed for. The interest is payable quarterly in France, and the deposit upon application was 12 per cent. Messrs Barings and Messrs Rothschilds received applications here at the exchange of 25.30 frances (1/ sterling).

25.30 frances (1l sterling). North German 5 per Cent. Loan.—The Times states :— A further contribution to the prospective abundance of money is to be found in the fact that the London Joint-Stock Bank have announced that the first five series-numbered 1 to 5—of the North German Con-federation 5 per cent Transport Bank and 51 0000 thelers. that the first five series--numbered 1 to 5--of the North German Con-federation 5 per cent. Treasury Bonds, amounting to 51,000,000 thalers, or 7,500,000/ sterling, will be paid off on the 1st of January, 1872, with interest to that date, ofter which time all interest thereon will cease. The numbers of the sterling bonds to be so paid are as follows:--100/ each, Nos. A 1 to 7,170, inclusive; 500/ each, Nos. B 1 to 2,071, inclu-sive; 1,000/ each, Nos. C 1 to 2,000, inclusive. Of this loan 3,000,000/ was subscribed in London in December last at the price of about 95/ 8s, reckoning allowances. The bonds were for five years, but with right reserved to the German Government to pay them off at six months' notice. notice.

RAILWAY COMPANIES.

RAILWAY COMPANIES. East Indian. — Capital expended, 28,995,2101. The gross receipts for the half-year ended December last were 1,193,414/, against 1,125,7191 in the corresponding half of 1869; and the net earnings were 666,1361, against 613,8411 in the correspond-ing half-year. The gross receipts for the year 1870 were 2,631,4691, against 2,475, 5401 for 1869; and the net earnings, [CONTINUED ON PAGE 787.]

THE ECONOMIST.

[CONTINUED FROM PAGE 784.]

[CONTINUED FROM PAGE 784.] 1,532,010/, against 1,446,322/ in 1869. The guaranteed interest for the half-year amounted to 672,200/, and would have been more than provided for by the net earnings but for the large charge of Indian income tax (22,461/). The Indian income tax has now been reduced from 3¦d to about 1 per cent. The traffic receipts for the first 15 weeks of the current half-year have fallen off 80,313/ as compared with the corresponding period of 1870. The agency, notwithstanding, encourage the board to expect a financially good half-year. The gross receipts on the Jubbulpore line for the half-year amounted to 53,000/, against 53,790/ in the corresponding period; and the net earnings amounted to 9,036/, against 1,713/. The Chord line was opened on the 1st January, which completes the whole was opened undertaking. ened on the 1st January, which completes the whole

Mexican .- The net receipts on the two sections for the year 1870 amounted to 63,294/, and the payments from the Govern-ment in respect of their subventions have continued to be made With reference to the recent issue of first with regularity. mortgage bonds by Messrs Bischoffsheim and Goldschmidt, the directors express a hope that the great object of all their efforts—the completion of the entire line—will be satisfactorily accomplished.

Wellington, Grey, and Bruce Railway-7 per Cent. Sterling Bonds. -Messrs Field, Wood, and Haynes have received subscriptions for 71,000l, the balance of 118,300l sterling mortgage bond, issued for the Guelph and Harriston section of the above lines the construction of which is considerably advanced. The issue price is 90l per 100l bond, and both interest and principal are payable in London or Canada, the principal not later than 1891. But the Great Western Company of Canada, which undertakes to work the line, has agreed to apply 20 per cent. of the traffic interchanged towards the redemption of the bonds by half-yearly drawings, by which it is expected they will be paid off in fourteen years. The line runs from Guelph to Southampton on Lake Huron.

BANKS.

BANKS. Alliance.—The reconstruction has been carried out, and the capital will henceforth be 2,000,000l, divided into 8,000 shares of 25l each, and 10l paid, instead of 4,000,000l, divided into 40,000 shares of 100l each, 25l paid. The holder of each old share is entitled to two new ones, nearly the whole of which have been already accepted in exchange. The hability is thus reduced from 75l on the one old share to 30l on the two new ones. The helpence of the old raid, un capital namely 5l ner ones. The balance of the old paid-up capital-namely, 5/ per share-goes to form a reserve fund.

Bank of New South Wales.—The adopted half-yearly report showed as available 56,122*l*, including a previous balance of 2,431*l*. A dividend was declared at the rate of 10 per cent. per annum, 3,000l was added to the reserve fund, and a balance of 3,122/ carried forward.

Bank of South Australia .- At the annual meeting a dividend of 10 per cent., free of income tax, was declared.

ASSURANCE COMPANIES.

Marine Insurance.-At the annual meeting a dividend of 12 per share and a bonus of 62 per share were declared.

MISCELLANEOUS COMPANIES.

Assam Company.— The report estimates the probable net profit for the year 1870 at 43,3421, out of which the directors recommend the payment of a dividend of 10 per cent., making, with the interim dividend already paid, a total distribution of 15 per cent. for the twelvemonths. The proceeds of the tea sold amounted to 116,8341.

Berlin Cattle Market, Limited.—Capital, 400,000l, in 20l shares. The purchase of the new cattle market of Berlin, covering 80 acres, and fitted with slaughter-houses, railway junctions, and all necessary appliances, has been effected by this new com-pany for the sum of 375,000*l*, and 150,000*l* in debentures. It is described as "one of the most extensive and complete esta-blishments of the kind in Europe," and already possesses virtually the whole of this class of business for the city. Dividends of 10 per cent. are calculated upon, irrespective of profits from the horse fairs and meat markets which are in contemplation. contemplation. Subscriptions are opened both in London and Berlin.

Canada Company.-At the meeting it was decided to distri-bute 21 per share, free of income tax, out of the assets in hand, as well as a farther sum of 2l per share as a sixth instalment towards the repayment of the paid-up capital.

Emmerson, Murgatroyd, and Co., Limited.—Capital, 50,0001. The shares of this new company have all been privately taken up. The business acquired is that of Messrs Emmerson and up. The business acquired is that the Murgatroyd, of Stockport and Liverpool.

Hanover and Brunswick Rock Asphalte, Limited.—Capital, 100,000l, in 10l shares. This company has been established to purchase the lease for 30 years of the well-known Limmer and Brunswick asphalte quarries, which, with the Val de Travers, have a monopoly of the supply. The Limmer produce has

been found to be most durable, and readily saleable at a good profit. Gold medals were obtained for it at the London exhi-bitions. Further particulars will be found in our advertisement columns.

Hooper's Telegraph .- Interim dividend declared at the rate of 10 per cent.

Hudson's Bay .- The meeting has been postponed till the 12th of July.

South Australian Company.-Year's profit 30,690%. A dividend at the rate of 8 per cent. per annum has been declared.

COMMERCIAL EPITOME. FRIDAY NIGHT.

The grain trade at Mark-lane to-day ruled dull and depressed, owing to the more favourable harvest prospects, and to the liberal imports of foreign produce. The tendency of values for wheat and flour was downwards, and very little of either article changed hands. There was more disposition shown to sell, but buyers were very reticent. Spring corn was inactive. Barley, beans, and peas, were drooping in price, while maize and oats sold slowly at the late decline. This week's imports of foreign and colonial cereal produce into London have amounted to 16,580 qrs of wheat, 11,120 barley, 55,460 oats, 3,380 sacks and 720 barrels of flour.

At Liverpool and Wakefield this morning factors were compelled to accept less money to effect sales

period to accept less money to effect sales. The Liverpool cotton market opened on Friday last with a good demand, and rather higher prices were paid. On Monday till Wednesday the market was quieter, and a decline of $\frac{1}{2}$ d to $\frac{1}{2}$ d per lb was submitted to. Since then the tone has again become strong, and the decline has been entirely re-covered, closing prices being $\frac{1}{16}$ d per lb above last Friday's rates. The total sales for the week are 98,010 bales, of which the trade have taken 71,380 bales; speculators and exporters, 26,630 bales. The imports have been 28,358 bales; the actual exports, 18,648 bales; and to-day's stock (official return) is 713,320 bales. To-day, upon the announcement of the actual stock, there was considerable excitement, and an advance of $\frac{1}{2}$ d per lb upon yesterday's prices has been freely paid; sales per lb upon 20,000 bales. upon yesterday's prices has been freely paid; sales

The following return shows the quantities of cotton im-ported and exported at the various ports of the United Kingdom during the week ended June 29, 1871:-

30.230 At New York, on June 29, middling Upland cotton was quoted at 19% cents per lb. Bombay telegrams to June 26 report the cotton market quiet at 217 rupees for Dhollerah. The shipments of the week had amounted to 62,625 bales.

In their circular of May 30, Messrs Nicol and Co., of Bombay, observe :-During the two business days which have clapsed since the issue of our last circular no change of importance has taken place in the cotton market. The late favourable winds have brought in increased supplies of Dhollerah, but not more than serve to meet existing contracts, consequently prices remain firm. On the whole, however, the tone of matters is quieter, and if home prices do not show signs of renewed activity shortly, we think it extremely probable that a lower level of quotations will be apparent here during the next fortnight. Shipping operations are progressing rapidly, and we look for heavy clearances before the 10th proximo. The following report, dated Alexandria, June 17, has been forwarded by the Imperial Ottoman Bank:-A continued active and advancing market throughout the week, with a In their circular of May 30, Messrs Nicol and Co., of Bombay,

good demand for both England and the continent. Stock very small, and little or no selection. Prices fully 4d higher. We quote—Fair open, with staple, 84d to 84d per lb, f.o.b.; good fair, with staple, 9d to 94d ditto; fully good fair, with staple, 94d ditto. Weekly arrivals, from June 10 to June 16, 9,270 crs.; weekly sales, ditto, 7,300 ditto. Shipments from June 9 to June 15—England, 4,394; France, 570; Italy, 153; Austria, 413—total, 5,530 bales.

The colonial produce markets have been well attended throughout the week, and full prices have generally been realised. The stock of sugar in the four chief British ports now shows a reduction of 47,000 tons as compared with last year. The demand for floating cargoes has accordingly been reating but the market on the spot though firm has been been active, but the market on the spot, though firm, has been less animated. The demand for coffee on French account has continued, though there has been little inquiry for cargoes on passage. Prices have been well maintained for all descriptions. Transactions in rice have been much restricted.

The annexed is dated Havana, June 6 :- We issued our last review on the 6th ultimo. Since then the sugar market, stimulated by a steady demand from speculators, remained active up to about the middle of the past month, and prices gradually advanced to 11½ rs to 11½ rs for No 12. During the gradually advanced to 11½ rs to 11½ rs for No 12. During the last fortnight, however, less encouraging advices from the United States, although counterbalanced in some measure by the advance of prices in London, produced a quieter feeling in the market, which still continues to prevail. Planters and holders remain exceedingly firm in their pretensions, keeping almost entirely aloof, in the expectation of being able to do better later on in the season, and prices are thus firmly sus-tained at the above-named figures. Bright yellows, Nos. 15 to 18, and Nos. 13 to 14, of common process, and the lower grades, Nos. 8 to 10, of greyish colour and strong grain, are all scarce in the market, commanding a fraction above the cur-rent prices. Our general quotations, being based on the last sales effected, must be placed as follows:—Nos. 7 to 10, 9½ rs to 10¾ rs, equal to 26s 5¾ d to 29s 3d, at 19½ per cent. premium, f.o.b., per cwt; Nos. 11 to 12, 11 rs to 11½ rs, equal to 29s 9¾ to $10\frac{3}{4}$ rs, equal to $265 5\frac{3}{4}$ dto 29s 3d, at $19\frac{1}{2}$ per cent. premium, f.o.b., per cwt; Nos. 11 to 12, 11 rs to $11\frac{1}{4}$ rs, equal to $29s 9\frac{3}{4}$ to $30s 11\frac{1}{4}d$, ditto, ditto; Nos. 13 to 14, 11 $\frac{3}{4}$ rs to 12 rs, equal to 31s 6d to $32s 0\frac{1}{4}d$, ditto, ditto; Nos. 15 to 17, $12\frac{1}{4}$ rs to $12\frac{3}{4}$ rs, equal to 32s 7d to $33s 8\frac{1}{2}d$, ditto, ditto; Nos. 18 to 20, 13 rs to 14 rs, equal to $36s 5\frac{1}{2}d$ to $40s 10\frac{1}{2}d$, ditto, ditto; whites, inferior to superior, 14 rs to 16 rs, equal to $36s 5\frac{1}{2}d$ to $40s 10\frac{1}{2}d$, ditto, ditto. The stock here and at Matanzas amounts to 480,198 boxes, against 519,622 boxes in 1870. Molasses sugars have been in fair demand for shipment to the United States, at from $8\frac{1}{2}$ rs to $9\frac{1}{2}$ rs for Nos. 8 to 11 in hhds Molasses sugars have been in fair demand for shipment to the United States, at from $8\frac{1}{2}$ rs to $9\frac{1}{2}$ rs for Nos. 8 to 11 in hhds and boxes, equal to 21s 11d to 24s $1\frac{1}{4}$ d in hhds, and 24s $3\frac{1}{2}$ d to 26s $5\frac{3}{4}$ d in boxes. Since receipt of unfavourable news from the United States there is less inquiry perceptible for this kind of sugar. Muscovado sugars—The excitement noticed in our last report somewhat abated during the latter part of last month; the demand, however, continues to be fair here as well as at outports, at 10 rs to $10\frac{1}{2}$ rs for fair to good refining grades, equal to $25s 2\frac{1}{2}$ d to $26s 3\frac{1}{2}$ d. The disposable stock is very small considering the season; at our near outports there is hardly any stock left in first hands. The deficiency of our crop has thus affected this class of sugar to a far greater exrop has thus affected this class of sugar to the super-tent than at first anticipated. The exports from here, Matanzas, Cardenas, and Sagna la Grande during the last month, were distributed as follows :-To the United States, 86,566 boxes 96,576 hhds; Great Britain and a market, 50,879 boxes 897 hhds; Copenhagen, 5,092 boxes; Antwerp, 1,080 boxes; Marseilles, 1,300 boxes; Spain, 34,244 boxes 92 hhds Helsingfors, 3,100 boxes; South and Central boxes; Marseilles, 1,300 boxes; Spain, 34,244 boxes 83 hhds; Helsingfors, 3,100 boxes; South and Central America and other parts, 2,267 boxes 30 hhds—total, 184,528 boxes 97,586 hhds, against 280,253 boxes 58,261 hhds same month last year. And the aggregate of exports from the above-mentioned ports sum up to 566,713 boxes 194,405 hhds, against 924,714 boxes 250,608 hhds in 1870. The rainy season having begun in earnest, the crop must now be considered as finished. It is as yet impossible to give anything like a correct estimate of the deficiency of the yield, which, varying from 10 to 40 per cent. in the various districts of the island, will probably amount to 25 per cent. on the average as compared with last year's crop. The weather continues to be very favourable to the growing cane. The following report, dated May 27, has been forwarded by

The following report, dated May 27, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo :--Although we have had a good deal of broken weather, it has been only at intervals that subjoint of order weather, it has been a good deal of produce has gone forward, whilst as regards coffee the greater portion of the season's crop is now afloat, showing the distribution as below :--

The position of coffee has not undergone any change in our market, the little remaining for sale has consequently found but few offers, and business has languished. The arrivals from the producing districts have fallen to a very low figure,

from the producing districts have fallen to a very low figure, and practically we may say that there is now only the Ouvah coffee to come in. The transactions in clean native have been on a very small scale, at unchanged rates. The following is dated Akyab, May 23:--In our rice market there has been almost nothing doing. The demand for pro-duce is gradually dying out, as shippers secured all their re-quirements in the interior, and under these circumstances any motation would be quite nominal. Of real market rice nome quirements in the interior, and under these circumstances any quotation would be quite nominal. Of real market rice none is coming in anymore, and the little that arrives now and then consists of contract grain, which stands in equal to 51 rs to 52 rs per 100 baskets, good 3 parts rice, quite ready for shipment. At these figures a quantity of about 1,600 tons, which is offered on the spot, could probably be secured, but the offers that are being made do not come up thereto, and sellers have so far not succeeded to dispose of their stock. There are still about 6,000 tons burthen shipping in port, but the cargoes for this tonnage have been all secured, whilst new arrivals have been very limited of late, and our season is thus arrivals have been very limited of late, and our season is thus fast drawing to its close. The rains have been pretty heavy already, and for several days the weather was altogether boisterous, so we must prepare for an early south-west mon-soon. Exports of rice to Europe up to date—1871, 98,900 tons; 1870, 40,000 tons; 1869, 51,700 tons. Tonnage loading -1871, 6,000 tons burthen; 1870, 8,300 tons burthen; 1869, 4,700 tons burthen. Annexed is Messrs Durant and Co.'s circular: - The

Annexed is Messrs Durant and Co.'s circular: — The periodical public sales of silk have been held. The quantity offered was about 1,600 bales Bengal silk, 1,800 bales China, 700 bales Japan, and 1,300 bales Canton silk. Sundry parcels were withdrawn having been sold by private contract; the residue was allowed to pass as usual without biddings. In the general market we have had very large business since Thursday last, with gradually improving prices; in most classes this may now be quoted 1s per lb. The immediate cause of the movement was the purchasing and forwarding large parcels of various classes to France in anticipation of the contemplated duty on importation; but some little may be attributed to an idea that the European crop is likely to prove less favourable in quantity than was recently expected. These shipments to France have swollen our deliveries to very large figures especially in Canton silk; but this class has not

prove less favourable in quantity than was recently expected. These shipments to France have swollen our deliveries to very large figures especially in Canton silk; but this class has not at present shared to the full extent in the advance of prices. In Japan silk, on the other hand, the advance may be quoted ls to 2s upon the lowest moment. Bengal silk has shared to some extent in the general activity, but the business done has been chiefly confined to the best filatures. Mr Helmuth Schwartze observes :—The rise established at the colonial wool sales on the opening night has, during the last three or four days, assumed increased proportions, and extends now to all descriptions. A detailed statement of the present prices of the various descriptions, as compared with the rates of the preceding series, will best show the changed aspect of the market. Australian combing grease, 1½d higher and occasionally 2d; Port Phillip washed fleece, 1d to 1½d higher; Port Phillip scoured, 1½d to 2d, especially in the medium sorts; Sydney scoured, 1d to 1½d, the best kinds comparatively cheapest; Cape snow-white, 1d to 1½d, the best kinds comparatively cheapest; Cape fleece and grease, 1d to 1¼d. In the average this advance amounts to about 10 per cent, but in some instances, as in Sydney medium fleece, or low Port Phillips scoured, it is still greater, and in Australian combing grease it fully reaches 15 per cent. Two circum-stances account in a certain measure for this rapid rise. First, the presence of a vigorous American competition, felt prin-cipally during the last few days, and then the dread on the the presence of a vigorous American competition, felt prin-cipally during the last few days, and then the dread on the

cipally during the last few days, and then the dread on the part of the French buyers of an early impost of a duty on the raw material. Further, and beyond these external and excep-tional circumstances, is the more enduring cause of an un-doubtedly healthy position of the woollen industry, and a return of the confidence which political apprehensions had paralysed for years. The following is from Messrs William Moran and Co.'s indigo report, dated Calcutta, May 26:—Since the date of our last circular we have experienced very unusual weather; instead of the fierce dry heat that is generally characteristic of this month, scarcely a day has passed without one or more good falls of rain, which have been most favourable for the rapid growth of the plant, and the accounts from the various districts of lower Bengal, as well as from Tirhoot, Chumparun, and Chuprah are consequently very good. The plant is every-

where in a more advanced state than it generally is at this date, and if we are fortunate enough to escape any heavy gales or excessive rain, manufacturing will probably commence in another fortnight or three weeks. In Eastern Bengal the rivers are still too low to admit of the factories being at full work, but the yield from the plant has somewhat improved. In the Benares province and the Doab the Khoontees are well reported on, and advantage has been taken of the late falls of rain to sow down a good deal of land that is generally left until the rainy season sets in about the middle of June. Ex-ports of indigo from November 1, 1870, to May 22nd, 1871 :---To Great Britain, 16,581 chests; France, 513; Trieste, 2,790; foreign Europe, 250; America, 2,424; Gulfs and Levante, 1,764---total, 24,322 chests.

789

10 Great Britain, 10,581 chests; France, 513; Trieste, 2,790; foreign Europe, 250; America, 2,424; Gulfs and Levante, 1,764—total, 24,322 chests. The annexed is dated New York, June 16:—There has been less activity in dry goods during the past week, although the market has been excited in first hands, and sales have been heavier than is usual so early. The advance in prices checked trade somewhat, but the market has been well cleared of goods, and the agents' quotitions in some lines one activity nominal and the agents' quotations in some lines are entirely nominal. Jobbers have already laid in very fair supplies of domestics for the fall trade, and since the advance have held off until their wants required their purchasing more liberally. The retail trade is fair for this season of the year, and retail dealers are purchasing moderate amounts to maintain assortments, but are of course not buying any amounts to maintain assortments, but are of course not buying any amounts beyond their actual wants. The demand for commercial paper has not been quite as active as last week, though rates are not quotably higher. Lenders are able to obtain better rates for money in this way than they can obtain on call loans, and the expectation that money will continue easy for some time to come, encourages them in purchasing first class paper. Outcome, are as fol them in purchasing first-class paper. Quotations are as follow :-

THE ECONOMIST.

[July 1, 1871.

SATURDAY, July 7. Pontgibaud Silver-Lead Mining, general, Paris.

THE COTTON TRADE.

LIVERPOOL JUNE 29.

The cotton market was quiet in the early part of this week, and prices generally were slightly lower; yesterday afternoon a firmer tone set in, and to-day the business has been large at advancing prices. For Sea Island there has been again a good demand, chiefly for the better qualities, for which full prices have been paid. American, after giving way nearly ad per lb, has rallied, and to-day quotations are nearly $\frac{1}{16}$ d per lb, has rallied, and to-day quotations are advanced $\frac{1}{16}$ d per lb in the middling descriptions upon last week's rates. New York advices to the 29th instant quote middling upland 20 $\frac{3}{6}$ cents, costing to sell in Liverpool 10 $\frac{10}{10}$ per lb, by steamer. Brazil, after some heaviness, is again firm, and, with a more general demand, the full rates of last Thursday are maintained. In Egyptian during the early part of the week there was less activity, and some decline was submitted to; but yesterday and to-day, with more inquiry, prices have fully recovered. East Indian has been in fair request, and prices, after a partial decline, close rather equest, and prices, after a partial decline, close rather dearer.

dearer. In cotton "to arrive" the transactions were comparatively small in the early part of the week and at easier prices, but to-day have been numerous, the latest quotations being—Ameri-can, basis of middling, Mobile, not below good ordinary, May shipment, $\$_{12}^+d$ from any port, May shipment, $\$_{12}^-d$; New Orleans, August-September delivery, not below good ordinary, $\$_{13}^+d$; at sea, $\$_{13}^+d$; low middling, Texas load-ing, $\$_{13}^+d$; at sea, $\$_{13}^+d$; low middling, Texas load-ing, $\$_{13}^+d$; at sea, $\$_{13}^+d$; low middling, Texas load-ing, $\$_{13}^+d$; at sea, $\$_{13}^+d$; low strict ordinary, $\$_{23}^+d$; good ordinary, Texas, ship named, $\$_{24}^+d$; Bahia, fair, ship named, mutual allowances, $\$_{14}^+d$; Broach, steamer, Canal, $7\frac{1}{2}d$; steamer, at sea, $7\frac{n}{16}d$; Broach, steamer named, Canal, fair new merchants, June sailing steamer, Canal, $7\frac{1}{2}d$; good fair new merchants, $7\frac{1}{16}d$; good fair merchants, April sailing, $6\frac{3}{7}d$; ship named, $6\frac{7}{7}d$; due, $6\frac{7}{5}d$; fair new mer-chants, ship named, $7\frac{3}{7}d$; Dhollerah, Cape, fair merchants, April sailing, $6\frac{3}{7}d$; ship named, $6\frac{7}{7}d$; Comptah, fair new merchants, steamer named, Canal, $6\frac{5}{7}d$; Comptah, fair new merchants, steamer named, Canal, $6\frac{5}{7}d$ per lb. The sales of the week, including forwarded, amount to 80016 holes of the week, including forwarded, amount to

The sales of the week, including forwarded, amount to 98,010 bales, of which 15,010 are on speculation, and 11,620 declared for export, leaving 71,380 bales to the trade.

JUNE 30.—The sales to-day will probably amount to about 20,000 bales, at fully ¹/₄d per lb advance.

The actual stock of cotton, declared this morning, amounts to 713,320 bales, which proves to be 135,760 bales less than the estimate, showing a decrease of 122,760 American, 23,240 Egyptian, and 12,950 East India, and an increase of 16,690 Brazil, 270 Smyrna, and 6,230 West India.

LONDON .- JUNE 29.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :-

On Friday there was an active demand, at a farther advance of ad per lb; the market then continued steady until Tuesday, when it became dull, and prices slightly gave way, but yesterday there was a revival in the demand, and quotations are id to id above those of last week.

NEW YORK .- JUNE 16.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 16. From the figures thus obtained it appears that the total receipts for the seven days have reached 24,046 bales, against 28,136 bales last week, 36,402 bales the previous week, and 40,178 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,845,176 bales, against 2,800,478 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,044,698 bales. The exports for the week ending this evening reach a total of 20,970 bales, of which 12,755 were to Great Britain, 5,948 to France, and 2,267 to rest of the continent, while the stocks as made up this evening are now 224,851 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :-

| State She Taken Land | Expor | rted to | Total | Same | Stock. | | |
|----------------------|--------------------------------|---------|------------|---------------|--------|--------|--|

| Total since Sent 1 | 9946950 | 757999 | 9009739 | 2022924 | | | |

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 19,362 bales, while the stocks to-night are 4,462 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 9, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

The market the past week has continued its upward course without interruption, prices having advanced almost daily. No new influences have been apparent; the little surplus we have of the present crop is the basis of the movement, and the decreased acreage of cotton, together with the unfavourable weather which has prevailed, have served to stimulate the speculative feeling. Liverpool also has added strength to the market by her quick response to the rise here; last Friday the cable quoted middling Uplands at 8thd, while to-day the quotation is 8thd to 8thd. The principal purchasers have been the spinners, with very little doing for export (except in transit), as our prices are above the parity of Liverpool. To-day the influence upon the market, containing, as it does, confirmation of our figures published several weeks since with regard to the decreased land under cotton this year, and also some statements showing the unfavourable condition of the crop. These

facts, however, have been made known to the trade some weeks previously through our columns, had been mostly discounted, and yet about ‡e advance was established to-day, middling Uplands closing at 20% against 19% clast Friday. For future delivery (this crop) prices have also advanced to about the same extent, but for the next crop there is comparatively little doing. Low middling closed to-night at 19% for June, 20% for July, 20% for August, 19% for September, 18% for November, and 17% for December. The total sales of this description for the week are 74,700 bales, including—, free on board. For immediate delivery the total sales foot up this week 20,832 bales, including 764 for export, 9,712 for consumption, 3,147 for speculation, and 7,209 in transit. Of the above — bales were to arrive. The following are the closing quotations:—

| a she within the | | nd and rida. | Mo | bile. | Ne Orie | | T | 8X.88. |
|---------------------------|-------|-----------------|------|-------|------------|---|-----|--------|
| and the second periods of | c | C | e | e | C | e | e | . 0 |
| Irdinaryper lb | 151 (| @ | 16 @ | | 101 (| | 161 | A |
| lood ordinary | 184 | | 18 | | 18 | | 18 | |
| low middling | 194 | | 192 | | 20 | | 201 | |
| Middling | 204 | | 20 | | 21 | | 214 | |
| Good middling | 214 | | 21 | | 122 | | 221 | |

For forward delivery the sales have reached during the week 74,700 bales (all low middling or on the basis of low middling). Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and

receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :--

| | Weekend | ling June | 16,1871. | Week end | ling June | 16, 1870. |
|------------|----------|-----------------|----------|----------|-----------------|-----------|
| | Receipts | Ship- ments. | Stock. | Receipts | Ship- ments. | Stock. |
| Augusta | 419 | 840 | 3913 | 332 | 1471 | 10416 |
| Columbus | 246 | 831 | 2011 | 159 | 790 | 4985 |
| Macon | 145 | 185 | 2484 | 206 | 563 | 6268 |
| Montgomery | 214 | 1706 | 2307 | 127 | 268 | 4315 |
| Selma | 206 | 428 | 979 | 186 | 196 | 3190 |
| Memphis | | 1925 | 5871 | 1900 | 1907 | 12837 . |
| Nashville | | 897 | 659 | 298 | 383 | 4605 |
| | 3821 | 6912 | 18224 | 3208 | 4978 | 46506 |

The above totals show that the interior stocks have decreased during the week 3,287 bales, and are to-night 28,282 bales *less* than at the same period last year. The receipts, however, have been 613 bales in excess of same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 2,727 bales, against 5,781 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year :--

| Exports of | COTTON | (bales) | from | New | YORK | since | Sept. | 1, | 187 | e. |

THE ECONOMIST.

[July 1, 1871.

NEW YOEK, June 23. — According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 24,000 bales, ditto, since the 1st September 3,870,000 bales. Shipments to England, 31,000 bales; and to France, 8,000 bales; total since the 1st September, 3,052,000 bales. Stock at all ports, 206,000 bales. Middling Upland, 9[±]/₈d, cost and freight, per steamer.

NEW YORK, June 27.—The receipts of cotton at all United States' ports for the last four days have been 10,000 bales. Shipments to England, 6,000 bales; to France, none; and to the continent, 2,000 bales. Middling Upland, 9⁺/₅d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 29.—A dragging business only has been done during the past week, as buyers have not felt inclined to purchase at the advanced prices now asked, as the various large foreign markets have not as yet responded, Prices here seemed to give way a little since Tuesday last; but they are now very strong in sympathy with the tone of the cotton market. In yarns the business has been small. Cop yarns have not had a large sale, but have continued steady. Bundle yarns slightly declined in value, but close very firm. The cloth market is sluggish as regards demand, but prices are now strong, and as manufacturers are still in order they will now only sell at extreme rates. The market closes firm, but little doing.

Messrs Alexander Collie and Co. have received the following telegram from Manchester yesterday :—An advance on Tuesday's rates of fully one farthing per pound on yarns, and cloth is asked to-day. This checks operations, but at Tuesday's prices considerable business could be done.

BRADFORD.—There has been a fair inquiry in most classes of wool, though operations are made with great caution, and solely to cover pressing wants. Staplers are asking higher prices, and though'a slight advance upon late rates is obtained in most cases, it is quite impossible to realise the high prices current in the country. Noils and brokes are in good request, at stiff rates. There is a fair amount of business doing in the yarn market. The advancing tendency of the prices of the raw material has caused spinners this morning to advance their quotations. There is little change in the piece market. Prices are very firm.

LEEDS.—The woollen market has been visited by London, Manchester, Bradford, and Glasgow buyers. The demand for tweeds was as strong as ever until checked by the makers showing a determination to raise their prices 1d per yard. In the fancy coating department there were only small sales, but the orders in hand at the mills were numerous.

ROCHDALE.—There has been about an average market for flannels of all descriptions. Buyers are becoming more and more reconciled to the higher prices now certainly established. Hence the purchase of goods has been much larger than on this day week. In the wool market the finer qualities are in good demand at higher rates. The advance in price now applies to the best as well as to the lowest qualities.

NOTTINGHAM.—The lace trade is in a very satisfactory state, and future prospects are cheering. Buyers purchase freely, both for the home market and for shipping. In the silk branch laces are selling, and there is a fair inquiry for sprigged nets. The raw material is firm for superior qualities. The hosiery trade is healthy, and the workpeople are well employed. Hosiery yarns are firm at late rates.

BIRMINGHAM.—The preliminary meeting of the South Staffordshire ironmasters has been held. As had been generally foreseen, no change was made in the official price list, which remains, consequently, as fixed in November, 1869, on the basis of 8^l per ton for common marked bars. At the sub-

sequent open meeting in the Exchange there was a numerous and influential attendance, and, in addition to current transactions, negotiations were opened in several instances for the new quarter. The general condition of the trade is quite as good as lately reported. On all sides very favourable anticipations of the new quarter are expressed.

BELFAST.—Flax—In our markets supplies were almost nil during the past week. Prices ruled steady, with a slightly upward tendency. Yarns—The demand during the past week was scarcely so active as that existing during the week preceding. Linens (brown handloom)—Demand steady for almost all descriptions. Power-loom—A fair amount of business has generally been transacted. Bleached and finished linens— Home demand continues very good.

DUNDEE.—Our flax market continues very strong, and the general tendency is still rather upwards. Spot goods are very firmly held, holders being rather disposed to withhold their stocks from the market, in expectation of higher prices later on. Tows continue in moderate demand, and prices are maintained. The jute market continues very firm, with a moderate demand from consumers. The yarn market has continued very firm throughout the week and a business is doing at fully former prices. Tow and jute kinds are in particularly good demand and prices are again slightlyhigher. The linen trade, especially in the lighter fabrics, continues very good, and manufacturers are in many cases largely foresold. Jute goods are also in extensive demand, and prices are now higher than for a considerable time back.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK.-JUNE 16.

The market the past week has been variable, and closes with a very unsettled tone. Flour has arrived less freely, and in view of this fact, as well as the high cost of production, holders have been very firm, but with a decline of 6d in Liverpool the demand has been limited, both for export and home use, and for two or three days the common brands, including low extras, have had a downward tendency, and prices have given way 5c to 10c per barrel, especially in flour, from spring wheat; that from winter wheat has been comparatively firm, though there has been very little doing. The close was depressed, and prices somewhat nominal. Wheat has been in limited supply, and ocean freights have declined, but the shipments eastward have been materially increased, and the receipts at the western markets have continued to exceed 25,000 quarters, or 200,000 bushels per day, while Liverpool has declined 4d under liberal arrivals from all quarters. The demand in this market from the continent has been materially curtailed, though still continued to some extent. Under these circumstances prices have given way, with sales to-day of No. 2 spring at \$1.51 to \$1.521, closing at the lower figure, with amber winter nominal. Corn has been scarce, while the home demand has been large. Shippers have been favoured with a decline in ocean freights, but have been met with a decline in Liverpool. Prices have advanced about 3c. The receipts at Chicago are liberal, but at other western markets the quantity coming forward is comparatively small, so that there is very little more than is required for home use, and if any considerable export is to be kept up, prices must be paid that will bring supplies from the hands of the farmer. The movement in breadstuffs at this market has been as follows :-

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

At length a return of warm weather has set in, accompanied by slight showers, under whose influences the crops have benefited considerably. The accounts of the young wheats are more favourable generally, and there is no doubt that much improvement has taken place since we last wrote. The crop however is still backward, having only just passed into bloom. The season has not been unfavourable, and if the present fine weather holds on a fair crop may be looked for. It is not probable that the harvest will fall early, but it cannot apparently be long delayed, though a short postponement could not seriously affect prices in the face of the extensive imports now coming to hand. There is little of interest to notice in the trade which has been much depressed throughout the past se'nnight. At the opening of the week neither fac-tors nor millers seemed disposed to operate, but to-day there

was a disposition on the part of sellers to give way. Notwithstanding the disappointing nature of the hay crop, spring corn has ruled very inactive, and barley, maize, and oats are 1s per quarter lower on the week. The imports of oats have been very heavy, but the Russian corn comes to hand in inferior condition. Beans and peas are again easier to purchase.

Mr George Dornbusch thus reports the state of the floating grain and seed trade -- During the last eight days 21 grain grain and seed trade:—During the last eight days 21 grain and seed-laden cargoes have arrived at ports-of-call, viz.:— 7 wheat, 6 maize, 2 rye, 1 beans, 1 beans and canary-seed, 1 millet-seed, 1 palm-nut kernels, 1 oilcake, and 1 flour. The floating grain trade has at first been firm in tone, but during the last few days quiet. Wheat at first 1s to 1s 6d dearer, but later the demand fell off, and the advance was lost. Maize has been in slow demand at prices in buyers' favour. Barley —Fine cargoes would have been sold at late prices. Rye has been in slow demand, and prices tending downwards. The reported sales are as follows:—Wheat—10 arrived cargoes: hard Marianopoli, 46s 6d per 492 lbs; Ghirka Odessa, 49s 6d and 51s; ditto Galatz, 50s; ditto Nicolaieff, 51s 6d; Nicopoli Ghirka, 50s per 492 lbs; Sandomirca, 54s; No. 1 spring, 54s 6d; and New York prime No. 1 Milwaukee and Montreal, at 54s 6d per 480 lbs. Maize—2 arrived cargoes: Odessa, 34s 6d; Galatz, 34s 9d per 492 lbs. Barley—3 arrived cargoes: Bulgarian, from Sulina, 27s 6d; ditto from Kustendje, 23s per 400 lbs. Rye—2 arrived cargoes, at Rotterdam, at 32s 6d and 32s 4d per 480 lbs. Cotton-seed unaltered in price—quiet.

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK. For Report of this Day's Markets see "Postscript." Mincing Lane, Friday Morning.

MINCING LANE, FRIDAY MORNING. SUGAR.—The business in floating cargoes has again been the leading feature of the week. Rather more demand prevails for West India by the refiners, who have taken moderate supplies at about last Friday's quotations. Sales to yesterday amounted to 2,373 casks. Part of the Barbadoes by auction was bought in. 1,534 bags grainy sold at 30s to 32s 6d for brown and low syrupy yellow. Grainy Berbice sold at 31s to 36s 6d for grey. Most of the cargoes disposed of were for the United Kingdom, and upon former terms. A few parcels of low brown sorts have changed hands. The landings last week were rather heavy, chiefly consisting of West India. According to latest returns the stock in the consisting of West India. According to latest returns the stock in the four ports of the kingdom was about 48,000 tons less than in 1870 at same date. The decrease in this port amounted to 33,000 tons on the 24th instant.

Mauritius.—There have not been any public sales. Madras.—1,000 bags Jaggery have sold at 20s 9d. Bengal.—255 bags low brown realised 20s 6d per cwt.

Natal -281 bags brown sold at 24s 6d to 29s 6d.

particulars.

Java.-1,479 baskets by auction were bought in above the value. Java.-1,479 baskets grey sold at 31s 9d. Foreign Cargoes.-The following have sold for the United Kingdom: four of Porto Rico at 28s to 28s 3d; one of Cuba at 27s 9a; one Havana, No. 123, at 31s; and one Bahia at 22s 9d. For the continent one of Bahia at 22s 9d. Referd. The market is rather opict but former prices are point.

Refined .- The market is rather quiet, but former prices are main-

Ketned.—Ine markey is rather quiet, but former prices are main-tained, with a moderate business. MoLASES.—About 570 puncheons West India have sold: Berbice and St Kitt's at 10s 6d to 11s 6d; Antigua at 12s 6d per cwt. RUM.—Sales have been of very moderate extent this week, in-cluding Demerara at 1s %d to 1s 10d proof, in puncheons. Business is reported in Jamaica at 3s 7d to 3s 9d per gallon. The deliveries con-tinue large

reported in Jamaica at 3s 7d to 3s 9d per gallon. The deliveries con-tinue large. COFFEE.—A firm tone pervades this market, the export clearances being very large, and the demand from the shippers continues good. The Dutch sale on Wednesday went $\frac{3}{4}$ to 1 $\frac{1}{2}$ cents over valuations, which also has a favourable influence. By private contract several parzels of native Ceylon have sold chiefly at 55s to 56s for good ordinary up to 60s for boid. 1,663 bags by auction were only partly disposed of at 55s 6d for good ordinary, and 57s to 57s 6d rather bold. 1,281 casks 777 barrels and bags plantation chiefly sold at full prices: grey, 59s to 70s; colory, small berry and low middling to middling, 62s to 71s 6d; good mid-dling to fine, including bold, 72s to 84s 6d. 52 casks 7 barrels Jamaica sold at 56s to 63s for ordinary pale and mixed, and 65s to 76s for low middling to middling colory. 70 bales Mocha were chiefly taken in.

THE ECONOMIST.

[July 1, 1871.

596 bags East India found buyers: Coorg, 66s 6d to 73s 6d for middling to bold. Of 465 bags Singapore the damaged portion only sold. 4,641 bags foreign were partly disposed of, including Costa Rica at 56s to 65s 6d; Guatemala, 56s 6d to 65s 6d; Rio, 49s to 56s; ordinary Santos, 52s. A floating cargo of Rio has been sold at 52s for the Mediterranean; four for near ports at 50s to 53s 6d per cwt. There were delivered last week, viz., 3,262 tons, 2,660 tons being for export; and the stock on the 24th instant showed 6,070 tons decrease when compared with the pp

COCOA.—There is still a good demand, the business including some par-cels of Guayaquil partly for exportation at 49s to 55s. Trinidad supports the late advance. By auction 1,172 bags Trinidad about half-sold : grey to good ordinary mixed, 57s to 63s 6d; middling greyish to fine, 65s to 93s. 66 bags ordinary St Lucis, 47s to 47s 6d. 343 bags Grenada sold to 10 to 575 for large to good 121 bags Surinary mars bound in

at 49s to 57s for low to good. 121 bags Surinam were bought in. TEA.—The market has been quiet, but there is no change in prices TEA.—The market has been quiet, but there is no change in prices. Speculative demand for common grades of congon has not continued. Indian teas are dull, with large supplies offering. 4,800 packages were printed for sale on Wednesday, but part had sold previously, and at easier rates. The portion by auction was chiefly bought in, and a few parcels since placed.

arrival. 171 bags pearl tapioca were bought in above the value. BLACK PHPPER.—A continuance of speculative demand has caused a fresh rise of fully ½d per lb. The latest sales on the spot includo Penang at 5§d; Singspore, 5§d to 5§d; old Aleppy, 6d cash. Of Penang several sales made aflout at 5½d to 5§d, including Trang, Mala-bar, &c., 5½d. 1,975 bags Singapore by auction sold at 5½d to 5¾d for low to fair quality. WHITE PEPPER.—Sales have been made at advancing prices, closing at 9¾d to 9½d per lb for Singapore. The stock is gradually decreasing, and the market shows an upward tendency. OTHER SPICES.—At auction 289 bales Zanzibar cloves sold at 2¼d to 3d for fair quality. 160 bags pimento were taken in at 1¼d to 2d. 22 cases wild mace withdrawn. 22 packages West India nutmegs sold at 1s 9d to 2s 5d for brown sorts. 38 bales cinnamon, of mixed and coarse quality, realised prices varying from 5d to 2s 1d. 429 bags

at 1s 9d to 2s 5d for brown sorts. 38 bales cinnamon, of mixed and coarse quality, realised prices varying from 5d to 2s 1d. 429 bags chips, 33d; bark, 13d to 23d per lb. 97 bales cassia vera were taken in at 46s. 216 bags rough Bengal ginger at 28s. 178 cases Cochin sold: ordinary to middling, 40s to 52s; bold, 90s. Jamaica ginger is again rather dearer for common sorts. 375 barrels by auction sold: low to good ordinary, 40s to 48s. Other qualities went easier in some instances: middling to good bold, 50s to 90s per cwt. SALTPETRE.—The market is rather firmer, and the sales reported to yesterday amounted to about 5,000 bags on the spot: refraction, 4 to 32,28s to 28s 6d; 61 to 51, 27s to 27s 9d; 17 to 112,26s to 26s 3d per cwt. CocHINEAL.—At the public sales on Wednesday 1,407 bags Teneriffe went at full prices: silvers, 2s 3d to 2s 5d; blacks, 2s 3d to 2s 8d; very good to fine, 3s 3d to 3s 5d. 35 bags Mexican silvers at previous rates to 1d less, viz., 2s 2d to 2s 3d. 187 bags Honduras: silver, 2s 2d to 2s 9d being steady prices. Blacks however declined 2d to 3d, selling at 2s 5d to 2s 11d per lb.

DRYSALTERY GOODS.—Gambier continues steady. Fair block has sold at 15s 101 dto 16s. 1,200 packages cubes part sold at 19s 6d. Cutch remains quiet. Fine qualities firm. Turmeric steady. Bengal, 19s 6d per cwt. 63 bales Bengal safflower were bought in at 9/ to

12. China galls part sold at 49s 6d to 52s 6d per cwt. SHELLAC. — 561 cases about two-thirds part sold: native liver, 5l 12s 6d to 5l 17s 6d; reddish orange, 6l 10s to 6l 12s 6d; livery orange, 6l 2s 6d to 6l 5s: garnet, 5l 12s 6d; dark button, 4l 17s 6d to 4/ 18s per cwt.

-The quantity of East India for sale on the 10th inst. will be INDI 30.about 10,500 chests. There has not been any change in the market

about 10,000 clests. There has since last week. METALS.—There has been a steady business, and the advance last quoted is generally maintained. Scotch pig iron has met with a good demand. The last sales were at 57s 3d cash. Rails are without change. demand. The last sales were at 57s 3d cash. Rails are without change. English tin is rather dearer, and supplies very moderate, consequently foreign remains firm. Straits, 131/10s to 132l on the spot and afloat. Banca, 132l/10s to 133l. Soft English lead, 18l to 18l/5s for the best brands, with a quiet market. Most kinds of copper are again rather dearer, the last sales being as follows:—Chili, &c., 67l to 67l/10s; and the finest qualities up to 68l. English in better demand. A large business in Australian at higher prices. Sales have been made in Sile-sian spelter at last week's rates, but the market is now less firm, 18l/5spar ton about the value. on about the value. per

per ton about the value. JUTE.—The market continues strong, the sales of the week being chiefly for arrival, including parcels of the new crop at fully last week's rates, ranging from 18/ 7s 6d to 25/ 15s. On the spot a limited quantity sold privately. The public sales on Wednesday comprised 6,083 bales, and nearly two-thirds sold at full rates. Low to fine, 19/ 5s

to 27*l* per ton. <u>HEMP</u>—Manila steady. A few sales are reported, chiefly at 46*l* per ton for fair roping quality.

HIDES .- At the sales of East India, 172,960 hides, &c., went at pre-

HIDES.—At the sales of Lass links, frageton lades and a pre-vious rates to 4d per lb advance. LINSEED.—A good business has been done in Calcutta to arrive at 61s to 61s 6d. Black Sea now loading has been sold at 59s 3d c.f. and i., to a direct continental port. Only small sales on the spot,

c.f. and h, to a direct continental port. Only similar sates on the spot, including Calcutta, at 63s per quarter. OLS.—Sperm is held at 81/10s to 82%. Small sales of cod are re-ported at 35/10s per tun. Olive is steady in price, but the business is small. Nothing done for arrival. Fine palm is rather scarce, and worth 37/ to 37/10s for Lagos. Coccoa-nut dull. Ceylon, 39/10s to 40%, and 10s more for arrival.

LINSEED OIL is in fair demand at 32/ 10s on the spot, 32/ 10s to 32/15s for delivery last four months. English brown rape advanced at one period to 43/10s, but now the market rules quiet at 42/15s to 43/

one period to 101 105, but now the market rates quiet at 22 135 to 432 per cwt, both on the spot and for delivery to end of year. PEROLEUM dull at Is 53d on the spot; Is 63d for the last four months. Petroleum spirit 9d per gallon. TURPENTINE.—American, 40s 6d to 41s; French, 40s 6d. The former

TORPENTINE.—American, 408 od to 418; French, 408 od. The former to arrive, 37s per cwt, and less for later shipment. TALLOW.—Quotations of foreign are steady, although supplies of Australian continue large, and the production of home tallow will probably be good. This morning's quotations for Petersburg are 43s 9d to 44s on the spot, and 45s 9d to 46s per cwt for the last three months. The market is firm.

POSTSCRIPT. FRIDAY EVENING. SUGAR.—A good business was done in West India, viz., 1,049 casks, making 3,422 casks for the week. The Barbadoes by auction was chiefly taken in. Crystallised Demerara sold at high prices from 36s 6d to 38s 6d. 1,056 bags Penang soft grey and white, 32s 6d to 36s. 425 bags Natal, 26s 6d to 32s. Privately business has been done in Porto Rico at 34s.

COFFEE.—The public sales of plantation Ceylon went with spirit, 1,653 casks 106 barrels 966 bags being sold at full prices. 339 bags native 317 cases East India went at about former quotations; also part of 189 packages Mocha.

PEPPER firm. Penang on the spot, 5³/₂d; afloat, 5⁴/₂d to 5⁴/₂d. WHITE PEPPER.—Farther business at 9⁴/₂d per lb for Singapore. SHELLAC.—90 chests sold at about previous quotations: native, 6l to

od quality. TIN.—Straits dearer, 1221 to 1231.

ORS.—No material change occurred. TALLOW.—1,812 casks Australian by auction sold at higher rates: mutton, 42s 6d to 43s 9d; beef, 38s to 43s. 120 casks American sold at 40s to 42s 6d per cwt for mutton. No change in town tallow.

ADDITIONAL NOTICES. FLAX.—Market very firm. HEMP.—Market for Russian is steady. More inquiry and business deing in Manila hemp; good quality scarce, and 48l paid for good fair quality.

TOBACCO.—There has been but a quiet market during the past week, although the total sales sum up rather above the preceding. North American tobacco of old import continues in request, with buyers; but the stock is now neglected. Prices continue without alteration. In other growths termed substitutes and segar tobacco there has been but little done. Good useful descriptions are in demand.

LEATHER.—The leather trade has not shown any change during the ast week. A good steady demand continues for most descriptions of goods.

METALS.—Some considerable business has been doing daily. Copper is well maintained by demand for all kinds of raw, and moderate inquiry for manufactured. Tin has advanced rather suddenly, about 2l per ton, on announcement of very heavy deliveries of all kinds during the month. Iron is steady. Spelter rather firmer. Lead continues quiet. month. Iron is steady. S Tin plates in good request.

METROPOLITAN CATTLE MARKET.

MONDAY, June 26.—The total imports of foreign stock into London ast week amounted to 21,226 head. In the corresponding week in 1870, we received 8,376; in 1869, 12,865; in 1868, 6,146; and in 1867, 9.057 head 9,057 head.

The cattle trade to-day has been characterised by firmness. supplies of beasts from our own grazing districts have been tolerably good. A few Lincolnshire beasts of fair quality have been offered, and Norfolk has also forwarded a good supply; but the receipts from Scotland have been limited. Foreign stock has been well represented so far as number is concerned, but the condition has not been prime. Owing to the high primes descended begins have been prime. So far as number is concerned, but the condition has not been primes Owing to the high prices demanded business has been restricted. The best Scots and crosses have made 5s 10d to 6s per 81bs, being an advance of 4d per 81bs. The supply of sheep has been less extensive, but the quality has been good. The inquiry has been firm, and 4d per 81bs more money has been obtained. The best Downs and half-breds have changed hands at from 6s 4d to 6s 6d per 81bs. For lambe there has been more inquiry, at from 6s to 7s 4d per 81bs. Calves have been steady in value and inquiry. Pigs have realised former quotations.

HOP MARKET.

BOROUGH, Friday, June 30.-The unfavourable accounts from the plantations have imparted renewed firmness to this market. Sales have been effected freely, and prices have had an upward tendency. Mid and East Kent, 56s to 147s; Weald of Kent, 56s to 90s; Sussex, 50s to 80s; Farnham and country, 75s to 112s; olds, 20s to 35s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 30.—Full average supplies are on sale. The trade is quiet, at about late rates. Flukes, old, 50s to 80; regents, 50s to 60s; rocks, 40s to 55s per ton; kidneys, new, 9s to 12s; Jerseys, 8s to 10s; French, 6s to 7s per cwt.

LIVERPOOL MARKETS. WOOL

(PEON OUR OWN COERESPONDENT.) FRIDAY, June 30.—The inquiry continues active, but our market does not offer much choice, and any fresh arrivals of current qualities meet with ready sale either by private contract or at auction.

CORN. (FROM OUE OWS CORRESPONDENT.) FRIDAY, June 30.—There was only a small attendance, and a quiet market to-day. Wheat was slow, at 1d to 2d reduction. The flour trade was equally dull, at a proportionate reduction. Maize was rather freely taken, at 3d reduction since Tuesday. Beans, 33s 6d to 35s. All other articles unchanged. WAKEFIELD, Friday, June 20. The

other articles unchanged. WAREFIELD, Friday, June 30.—The wheat trade, influenced by the more genial weather, ruled dull at this market to-day, and although factors would make a little concession in prices, millers confined their purchases to a few fine parcels. In all other articles there was no alteration.

The Gazette.

TUESDAY, June 27.

BANKRUPTS. William Thomas Wootton, United States, late innkeeper, Cleobury Mortimer, Shropshire. George Bennett, Hibaldstowe, Lincolnshire, innkeeper. THE ECONOMIST.

HUBBUCK'S PATENT WHITE ZINC PAINT Is the most durable and beautiful paint known, does not stain or discolour with the atmos-phere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting ircn, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron

incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water. ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The remark of the vident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

SAUCE.-LEA & PERRINS. CARSON'S PAINT, THE "WORCESTERSHIRE. Pronounced by Connoisseurs, "TH ONLY GCOD SAUCE," Improves the appetite, and aids digestion. Unrivalled for piquas y and flavour. Ask for LEA & PERRINS' SAUCE. BEWARE OF IMITATIONS PATEONISED BY THE QUEEN,

Age

Is extensively used for all kinds of

This Company has been formed to purchase, as a working concern, carry on, and develop the Brewery known as the Kirkstall Brewery, (hitherto the property of Mesars. Benjamin Dawson and Co.), which with the other assets of that firm is now sold under the scanction of the Court of Chancery, owing to the death of Mr. Benjamin Dawson and the consequent dissolution of the partnership.

Benjamin Dawson and the consequent dissolution of the partnership. Last autumn an undertaking was introduced to the public under the title of "Benjamin Dawson and Co.'s Brewery Company, Limited." A large proportion of the capital was subscribed, but the Company was with-drawn, owing partly to the financial disorganization caused by the Franco-German war, and also because, on consideration, it appeared more advisable to sepa-rate the Brewery from the various enterprises, such as the steamships plying between Goole and London, the maltings in Suffolk, &c., &c., with which it had for years been associated under the private management of Mesars. Dawson. The object of the present Company is to work the local, London, and export trade of the Brewery exclu-tively.

Interpret of the present Company is to work the local, London, and export trade of the Brewery exclusively.
For this purpose a contract has been made by which the Company will purchase the Brewery solely (with a plant, in first-rate condition, capable of converting 50,000 quarters of mait annually), and held at ground rents amounting in the aggregate to only £59 168 a year for very long terms, of which one of 222 years is the shortest. The contract also secures the rolling stock, together with the valuable machinery by which the cashs of the firm are made and repaired, the necessary quantity of mait, hops, and beer, for the current trade, as well as the London stores, wharf, and offices of the late firm. The Company will further take over such of the loans and book debts of the firm as may be considered advantageous for the purpose of securing the inde to an amount not exceeding £25,000.
For the Brewery, including all machinery, fixed plant and good-will, and the existing interests in the London stores, wharf and offices, £47,500 will be given, while the other assets above mentioned are to be purchased by valuation, to be professionally made between the vendors and the Ompany.
The average annual returns from the brewing business only of the late firm amount to the sum of £14,990 17 a 9d for the years 1865, 1869, and 1870, notwithstanding that the operations of the last year were menting for the transfer of the business to a Joint-Stock Company.

much restricted in consequence of the negotiations then preding for the transfer of the business to a Joint-Stock Company. These totals have been ascertained from the books of the firm by Messrs. Moore and Wallis, Public Ac-dountants, and are certified by them as correct. Owing the admirable situation of the Brewery for traffic arguments,—the local advantages in lowness of wages, cheapness of coal, and facilities for disposing of the admirable situation of the Brewery for traffic arguments,—the local advantages in lowness of wages, cheapness of coal, and facilities for disposing of the admirable situation of the Brewery for traffic arguments,—the local advantages in lowness of wages, cheapness of coal, and facilities for disposing of the admirable situation of the Brewery for traffic arguments,—the local advantages in lowness of wages, cheapness of coal, and facilities for disposing of the admirable situation of the Brewery for traffic arguments, and are certified by them as correct. Will be the argument of the concern ; but should only the the argument after payment for the purchase of the formany after payment for the purchase of trade. The Company has been fortunate in rescent of the acut 50,000 for working capital and increase of trade. The of the Albion Brewery, Mile End, who, having been for some years the principal Brewer at one of the and acuceasful London breweries, is by his special inter of the London trade, which it will be one of the and the the company to foster and extend. ABRIDGED PROSPECTUS.

The Company is formed to purchase and work the Swamea Smelting Works, and certain valuable silver mines in Clear Creek County, Colorado, U.S.A.

Hitherto, owing to the want of facilities for selling and smelting the area on the spot, those mines alone possessing very rich ores, or having their own smelting works, have been profitably worked by their proprietors. The functions of the Company are, therefore, intended be threefold. Ist.-To raise ores from their own mines. 2nd.-To purchase ores from the mines in the district. to be

2nd.-To purchase ores from the mines in the district.
3rd.-To reduce and smelt these ores, as well as gold and silver ores which may be sent to the Comsany's smelting works by their owners.
The works, comprising watercourse, with ample water wheels, buildings, and dr-ssing-floors, have been fitte up with furnaces, plant, machinery, and apparatus, specially designed for treating the ares of the district by the proprietor, Mr John Collom, one of the bestricours. The works will require to be enlarged, and for this object a sum of £5,500 will require to be spent on them. The profits from these smelting operations have been carefully estimated to yield an annual minimum of £13,000. The profit from the three sources, after making every reasonable deduction, may be taken as follows:-

-Profit from mines (per annum' £25,000, 1st. 20,000

2nd. 10,000 10.000 (88y)

40.000

40,000 Or a total clear annual profit of 65 per cent. upon the whole capital of the Company. The Clear Creek Mining Company, the owners of these mines and works, have entered into an agreement to sell to this Company, conditionally upon the state-ments as to value and title being fully corroborated. For this purpose the Directors of this Company will dispatch a trastworthy authority to Colorado, and if his report be satisfactory, the agreement will be con-firmed and completed. Subject to the confirmation of the vendors' state-ments, the property will be transferred to the Company for the saun of £35,000; and the vendors agree, if so re-quired, to accept £27,000 in fully paid-up shares of the Company, and the balance of £8,000 onl. In cash, that sum being required to pay out several existing small joint proprietors. It will be evident that the success of the Company of the Manager of the Works. Mr Collom, who has had the management of some of the larges, and most successful mining and smelting works in America, has sonsented to give his services to the Company to a me years at a remuneration largely depending upon the profits of the Company. It is proposed that £1 per share shall be paid up an

h nse, old Broad street. The prosperity of the province of Ontario is well ex-emplified by the fact that its Legislature, in February, 1874, was enabled out of its surplus revenue to set part one million five hundred thousand dollars as a raitway fund to be distributed as free gifts in aid of the construction of railways in that , rovince. The Wellington, Grey, and Brace Railway issituated in throspectus, isconnected with the Great Western Kailway system at Guelph, an i when completed to Lake Huron with be 100 miles long. Through its entire length it inverses a country rich in agricultural produce and integer increased yearly by emigration. Out of 18,630 emigrants who entered the Dominou of Canada in 1869, 17.201 settled in the Province of Ontario. The various municipalities through which the line passes have granted free gifts or bonuses in aid of its construction to the amount of 525,000 dols, or (say) 20,000 sterling. By greements confirmed by the Legi-latures of Canada and the Province of Ontario the Great Western Railway Canada have undertaken. Ist. To work the line in sergetury. 3rd. To repair and maintain the line.

- The machinery is capable of turning out from 70,000 to 80,000 pieces per annum, and this can be doubled at a triffing expenditure; but taking the annual produce of 80,000 pieces at the moderate profit of 2s per piece, a net income of £8,000 can be realised. It will thus be seen that a net return of at least 16 per cent. will arise, even supposing that the whole capital be paid up; whilst, on half the nominal capital (which will pro-bably be sufficient for permanent operations), 32 per cent. would result. For full prospectuses and forms of application apply at the Offices of the Company, 24 Gresham street.
- 2nd. To provide locality engines and rowing stock.
 3rd. To repair and maintain the line.
 4th. To pay over 30 per cent. of the gross traffic receipts to the Wellington, Grey, and Bruce Railway of Canada.
 5th. To set aside 20 per cent. of the gross traffic receipts interchanged with the Wellington, Grey, and Bruce Railway for the acquisi ion at par of the mortgage bonds by semi-annual drawing until the whole are acquired and redeemed by the Great Western Company.
 Ender the agreements the total issue of mortgage dis cannot exceed 12 000 dols. or £2,465 15s per mile, sey constitute a first charge upon the line, and no

PROSPECTUS. PROSPECTUS. This Company is established for the purpose of pur-chasing the lease, for 30 years, of the well-known Limmer Asphalte Quartics, situate near the city of Hanover, together with those situate in Branawick, formerly belonging to H. D. Henning, and for working the same.

the same. A contract has been entered into with the lessee for the parchase of the lease, and also for the goodwill of the business now carried on by Mrs Geffers, for the sum of £2,500 in cash, and 2,500 fully paid-up shares. The Company to take upon itself the payments in the shape of rent reserved by the original lease from Mrs Geffers, which amounts in the aggregate to the sum of £55,000 payable by Instalments, as follows:-£15,000 on the 15th July, 1871, £15,000 on the 1st July, 1872, and £5,000 per annum for five years. The stock of amplify and herees weachers

The stock of asphalto in hand, and herses, waggons, &c, have to be taken at a valuation. All fixed plant, steam engines, and other machinery are included in the purchase-money.

The purchase-money and valuations will clear the quarries of all rents and royalties for 30 years, ex-cepting a small payment to the farmers whose lands may be injured by the taking away the surface soil to quarry the asphalte, the scale for which has been already determined.

<text><text><text><text><text><text><text><text><text><text><text>

THE ECONOMIST.

COPY REPORT of ALEXANDER MAGRATH, E.q., C.E., an the LIMMER ASPHALTE QUARRIES. The district over which Mr.H. D. Henning's tille to dig for asphalte extends comprises 500 German acres, or about 375 English acres, and is about one mile in length by somewhat more than haif a mile in breach. The quarries have been worked for some 30 years, the quantity taken out up to recently was compar-tively small, but latterly there have been 5,000 or 6,000 tons per annum obtained. Defines have been made in various places along the fine of greatest length, showing a bed of asphalte of apits dug at various openings indicate that it extends throughout the whole length of the property, and that the amount of asphalte obtainable from this vein may be estimated at over a million tone, or precidenly inex-nostible.

The divide at over a million tone, or practically inex-haustible. The divide at over a million tone, or practically inex-matrix and a provide the set of a sphalte is about 30 degrees, discovering at the greatest depths yet reached a face of solid asphalte rock, varying from 20 to 30 feet in thickness, increasing with the forward progress, and comparatively limited area has as yet been broken, and not more than 2,000 superficial yards have been worked to the depth referred to. The manufactory is a cout two miles from Hanover and to miles from the mines, on the banks of the triver Leine, a tributary of the Weser, by which the avesdes to Bremmer Haven, Bremen. A new 25-horse power engine has recently been pressed to Bremmer Haven, Bremen. A new 25-horse power engine has recently been delivered is 165 per ton, and the manufactored asphalte to sper ton, free in the Thanes or at Full. A MAGRATH. Langbourn chambers, Fenchurob street, London, 24th Aprin, 1871. The following a e a few testimonials showing the

The following a e a few testimonials showing the value and durability of the Limmer asphalte :--After a five years' use of the asphalte pavement in the streets have, laid with Limmer asphalte, they have proved faultless up till to-day, and have required no repair whatever yet. The same must be said of those pavements of Limmer asphalte which have been laid within the last uve years. (Signed)

pavemes is of Limmer asphalts which have been laid within the last aveyears. BYIES, for the Metropolitan Board of Works. Hanever, 6th March, 1865. Thereby certify, on the part of the Metropolitan Board of Works, that a space of 15,000 square feet of pavement have been laid here with asphalte from the Limmer mines, and that it was of great durability. I can confi-dently recommend it for works of like description. (Signed) L SPIES, Building Inspector for the Metropolitan Board of Works. Hanver, 31st July, 1861. We testify with pleasure that the asphalte platforms haid by Mr H. D. Henning at our railway stations have settly with pleasure that the asphalte platforms for work done at the great number of buildings belong-ing to our railways with the Limmer asphalte rever to use any other material than Limmer asphalte racks through great cold, nor do they get softened by heat. A swelling, of the asphalte herver have hold of the schelter of Railways in the Kingdom. Hanover, 9th November, 1854.
