make up well over half the unplaced applicants. Demand for female domestics and restaurant workers exceeds supply by over four to one. The shortage of restaurant help continues to be acute and the alleviation resulting from summer resorts closing down will be partially offset by student workers returning to school. Dry cleaning establishments are experiencing difficulty in obtaining suitable help. The demand for farm domestics has increased as the harvesting season progresses. At August 22, applicants seeking service positions numbered 11,520 as compared with 12,288 four weeks earlier. Vacancies on file at the August date totalled 15,534.

Skilled and Semi-Skilled Workers

Industrial expansion is being held back by the wide-spread strikes and resulting material shortages. The steel strike in particular, is having a crippling effect on heavy manufacturing industries as well as construction and many firms have been forced to close down or lay off workers as stocks dwindled. In spite of the retarding effect of current strikes, the employment opportunities in this occupational group continued to expand and for the first time in several months demand for skilled and semi-skilled workers exceeded supply. The increased demand for loggers as the autumn season approaches accounted for most of the increase in requirements. However, the number of male unplaced workers continues to exceed the jobs available while the demand for female workers outnumbers supply by almost five to three. At August 22, there were 46,784 positions available for skilled and semi-skilled workers compared with 43,690 the previous month. In this four week period the number of unplaced applicants in this group declined by 5,224 to total 44,611 at August 22. Ontario was the only region which showed an increase in the number of unplaced applicants at this time.

Textile Workers—The great need for experienced textile workers continues, with demand exceeding supply by over two to one. As the industry is centred in Ontario and Quebec, these regions accounted for 91 per cent of the demand and 89 per cent of the supply. Housing accommodation is limited in some areas with the result that firms are having difficulty in attracting outside workers. At August 22, there were 8,251 unfilled vacancies, a decline of 236 from the previous month as male vacancies fell. Seven vacancies out of eight were for women textile workers. Women sewing machine operators are in general demand constituting over half of the total

demand for female workers. At August 22, 4,691 female sewing machine operators were required while only 907 were available. The number of unplaced applicants at the August date numbered 3,968 (male 1,146, female 2,822) compared with 4,342 at July 25.

Lumber and Woods Products Workers—The increased demand for loggers during August was one of the main contributors to the overall increase in labour requirements in all occupations. As a result of the serious shortage of lumber and pulp and paper, a heavy cutting program is being planned for the coming year and operators are already beginning to press for men. It is expected that by September men in some areas will be returning to the bush. However, in the Prairies and North-Western Ontario little movement into the woods can be expected until the harvest operations are completed. There were 19,302 vacancies on file for lumber and woods products workers at August 22, compared with 16,315 at July 25. The demand for loggers alone increased by 2,753 during this period. The number of lumber and woods products workers seeking positions numbered 1,420 at August 22.

Miners—The need for labour in the mining industry continued to expand during the month of August. There is a general demand for first class miners and progress in many mines, particularly in coal areas, is being hindered by the tight labour supply situation as few applicants meet the required physical standards. Demand for coal miners exceeds supply by eight to one. Forty per cent of the demand for miners is in the Prairie region. Family quarters in some mining areas are practically non-existent and accommodation for single men is limited to bunk houses and hotels. In some cases, lack of necessary mining machinery has held up expansion. Demand for miners totalled 1,820 at August 22 with coal miners accounting for 58 per cent. The supply of miners fell by 116 during the four week period.

Construction Workers—The continued lack of material is seriously affecting the employment of labour in the construction industry and it may result in tradesmen being forced back into the labour market. In some areas construction cannot be carried beyond the framing stage. The nail and pipe shortage is very critical while the lack of cement has held up highway and street construction. Demand for construction workers has been declining in the eastern regions and increasing in the west, although the shortage of first class carpenters, bricklayers and plasterers persists in all regions. At August 22, there were 5,838 con-

struction workers needed compared with 6,093 at July 25. A drop in the demand for painters accounted for most of this decline. The number of unplaced workers totalled 4,419 compared with 4,988 at July 25.

Miscellaneous Workers — Unemployment among applicants registered as metalworkers continued to decline during August although supply exceeds demand by four to one. There has been a general upswing in labour requirements and employers are demanding men with high physical standards. At August 22, there were 2,608 unfilled vacancies for metalworkers compared with 9,829 unplaced applicants. Electricians have been held up by a shortage of wiring and pipe. Demand for these tradesmen remained almost stable in the period while unplaced applicants declined by over 200. Motor vehicle mechanics and repairmen continue to be in great demand in Quebec and Ontario while the supply exceeds the demand in the other three regions. In all regions qualified mechanics are difficult to find. At August 22, 1,449 motor vehicle mechanics and repair-

men were required while 1,284 were registered as unplaced. The acute shortage of female finishers and workers for laundries and cleaning establishments continues with demand exceeding supply by three to one.

Unskilled Workers

Unemployment among unskilled workers declined sharply during August as demand for heavy labour increased. While most of this decrease was confined to males, unemployment among female unskilled workers declined by 1,282. This latter drop and the increase of over 2,487 in the number of unfilled vacancies for female unskilled labour is the result of the increased demand for workers in food processing establishments. Substantial additional requirements were registered for unskilled mine and quarry workers as well as construction workers. At August 22, 36,351 unskilled workers were required; 22,451 of these were males. Unplaced applicants at the same date numbered 53,896 compared with 64,028 at July 25.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment Offices across Canada. The report covers employment conditions during the month ended August 22, 1946.

Maritime Region

Agriculture. Recent surveys of available manpower indicate that the farm labour supply will be adequate to meet peak harvest requirements. Grain crops now are being harvested, but yields are poor because of continued dry weather.

Good progress has been made in the interviewing of prospective applicants for apple picking and processing in the Annapolis Valley. Picking will probably become general about September 10.

Logging. Heavy shipments to overseas markets more than offset the slackening in local demand for lumber which has resulted from curtailment of construction. Woods labour is required for both pulp and long lumber operations. Sawmills are operating at full capacity and orders for mill workers will increase as more mills will open shortly.

Fishing. Fish packing plants are in full-scale operation. The shortage of skilled cut-

ters and filleters persists. The lobster season has opened along the Northumberland Strait. Good catches are reported. In the Bay of Fundy area, sardine herring catches are exceptionally heavy.

Coal Mining. Mines in the Cape Breton area have resumed production following the annual vacation period. Output remains low in comparison with pre-war levels. Absenteeism rather than a shortage of miners is the chief cause of the slump. Approximately 150 first-class miners are required in this district. The Dominion Coal Company has recently hired 30 veterans as apprentices to take the six months' course for their first-class miners' papers. More apprentices will be taken on as the classes progress.

In the Minto area, strip mining output is forging ahead—now about 10 per cent above any period in the past ten years. Although average wage rates are fairly high, there are 100 vacancies for qualified miners in the shaft mines of this area.

Manufacturing. The serious effect of the steel strike on manufacturing employment throughout the region is adding further to the existing burden of unemployment. Lay-offs, plant shut-downs, and fast-dwindling stocks are reported from all industrial centres.

Heavy industries in the New Glasgow area have been forced to reduce employment substantially. At Trenton, material shortages have caused 500 men to lose their jobs, and further plant closures are expected shortly if the supply situation does not improve.

Employment expansion in other manufacturing industries such as paint, leather goods, bread, biscuits and candy is also curtailed by material shortages.

Specially skilled men are required but other male labour demand is light. Women workers are needed in the textile and fruit canning plants.

Construction. Continued lack of materials is seriously affecting the employment of construction labour and lay-offs are general. Although brick and tile now are available to high priority projects, a shortage of skilled bricklayers is delaying progress. Wartime Housing contracts are progressing well but construction on private homes is at a very reduced level.

Transportation. Freight and passenger traffic on rail lines continues heavy. Ex-servicemen's dependents have been arriving at Halifax in thousands. Coastwise shipping has been fairly brisk. Ample labour has been available. Air lines, buses and trains have been filled to capacity with tourist traffic.

Quebec Region

Agriculture. Crop yields are considerably below normal in most sections. General farm labour demand has been met with fair success, but good experienced agricultural labour is still very difficult to find.

The movement of harvesters to the Prairies has been confined to the western section of the region, where the supply of farm workers exceeds demand.

Logging. Drives are almost completed and many men have shifted to "improvement" work. Cutting will commence in September and present crews will have been doubled by the end of that month. Indications are that output will expand by 15 per cent this year, but that the labour supply will not improve greatly over the past.

Mining. Repercussions of the downward movement in the price of gold, due to the establishment of dollar parity, are occurring. About 15 diamond drill operations have been suspended in northwestern Quebec. Prospecting companies are reluctant to risk capital under prevailing conditions. Some labour may be available from this source for the hard-pressed producing mines, but when conditions improve these men will probably return to their former employment.

Manufacturing. A decline in industrial activity, the effect of labour disturbances over the past few months, has characterized the Quebec economy during August. Labour unrest is affecting heavy industry. A sympathy strike of 275 steel workers at Lachine is blocking production. The aluminum industry has been adversely affected by both the steel and soda ash strikes; temporary lay-offs have taken place. The textile industry remains desperately in need of workers, although normal activity has been disrupted by the current labour dispute. Expansion planned in the food industry and in the electrical goods field will create additional jobs.

Construction. The lack of building materials is limiting residential, commercial and industrial construction.

The housing shortage, particularly in Montreal, is very serious. One of the great difficulties is that the average man cannot afford to build because of the high cost of materials. Therefore, greatest construction activity is centred in the erection of new plants and better-class homes.

Transportation. Industrial relations in the transportation field have been greatly eased by the recent wage increase for C.N.R. workers. Montreal Tramways announced a coincident wage boost for its employees, which will replace the former bonus system.

Colonial Air Lines is expanding its staff and requires engineers, technicians and clerical workers.

Ontario Region

Agriculture. The grain harvest has been practically completed throughout the region and in most instances a good yield is reported. Applications for work on Prairie harvest fields are numerous. To date more than 1,000 workers have been sent to the Prairies and immediate needs are filled; additional workers will be required when western harvesting becomes more general. The increase in the number of applicants this year is due to two factors: strikes and subsequent lay-offs have made labour available for seasonal farm work, and the earlier harvest in Ontario has enabled farmers to move to the western harvest.

Canning crops in the Niagara Peninsula are not yet being picked; yield prospects are smaller than last year's crops. The local supply of labour, plus female workers imported from the Winnipeg area, will be sufficient to meet requirements.

Logging. Lumber operators are planning a heavy cutting program for the coming year. Few men are yet available, as bushmen do not apply for work in great numbers until the fly season is over. In September the supply of

labour will probably increase. At the end of the August period, orders in clearance totalled almost 2,500 for bushmen, 600 for pulpcutters and 100 for pulpcutter beginners. River drivers are also needed.

Mining. Base metal operations are expanding. At Sudbury, 200 smelter workers and about 200 additional miners are in demand. By October, these needs will have increased to 400 and 800 respectively.

Experienced miners are required at Timmins, as well as some physically-fit inexperienced men for underground work. Gold mines in the Kirkland Lake area are placing orders for 100 trained miners and 200 beginners.

Manufacturing. Labour disputes in the steel, automobile, electrical, rubber, and chemical industries remain unsettled and are holding up production in associated industries. Material shortages have become more acute as a result of these widespread strikes, and consequent lay-offs have increased the number of unplaced applicants during the month. Many firms are closing down or operating only on a part-time basis. However, in firms where the supply situation is steady, demand for light and heavy labour continues; men are being recruited from the surplus centres of eastern Ontario for jobs in central and western Ontario plants. The farm implement industry requires heavy workers for foundry and forge, as well as for assembly work.

The textile industry remains in dire need of labour, but plant expansion nevertheless continues. Qualified tradesmen, particularly cabinet makers and woodworkers, are in demand in the furniture industry. Plant extensions which will provide further employment are planned in the paper box, printing, food processing and automobile industries.

Construction. The heavy demand for skilled tradesmen has not lessened, and the small supply of available workers has not increased. Semi-skilled and unskilled workers are needed for housing and industrial building, and for highway and bridge construction work.

The steel strike is affecting large construction projects, but small home construction has not been as badly hindered. However, the growing shortage of cement, nails, gyproc, electrical supplies, and plumbing fixtures will soon block progress if improvement does not occur shortly.

Transportation. Labour turnover has declined in the lake shipping business, as crews are apparently settling down since the recent strike.

The railway companies require only a few track maintenance and section hands at various northern points.

Prairie Region

Agriculture. Seasonal expansion in agriculture has caused a marked decline in unemployment throughout the region. Harvest requirements have increased sharply, but no shortage of workers has yet developed. The movement of eastern harvesters to centres where sufficient local labour was not available has been adequate to meet farm needs. About 500 easterners are working in Manitoba and about 1,500 in Saskatchewan.

Wet weather has delayed harvesting in some areas; farmers tend to avoid hiring labour during wet spells. As a result, a number of workers have been moved within the region, in order to prevent local surpluses.

German prisoners of war are relieving seasonal shortages in the eastern section of the region.

Harvest wages for stooking and threshing average \$5.50 and \$6.50 per day respectively, and are attracting workers from other industries.

Logging. The logging industry is at a low level of activity. Operators are planning the production program for the fall and winter seasons, preparing for a heavy cut. New camps are being built in some areas and road construction is under way. Demand for loggers is very heavy, but until harvesting is over, bushworkers will be scarce. River driving is almost completed; the 500 men in the Fort William district now working on the final stages of the drive will soon be available for timber and pulp-wood cutting. Orders for 3,000 bushmen now are on file at Port Arthur, but about 10,000 will be needed when operations are in full swing.

Hardrock Mining. Exploration work in the Flin Flon gold area has been curtailed because of financial set-backs connected with the drop in the price of gold. One operator is closing for the year. Lack of experienced men is holding up expansion in the Red Lake and Port Arthur districts.

Skilled and semi-skilled miners are still required in Atikokan iron mines.

Coal Mining. Miners are needed in almost all Alberta coal fields. The expected scarcity of coal for the coming winter has stimulated activity. Labour shortages have been increased by a movement to seasonal farm work in some districts. Lack of housing prevents placements in the Edson area where demand is heavy for all types of workers.

Manufacturing. Employment in meatpacking plants is on the upswing. The supply of workers is sufficient, although physical specifications are high. Glass shortages still hamper sash-and-door production. Building supply

firms—brick yards, soil pipe and wall board plants—are operating at capacity. Demand for workers in the clay products industry is keen because of abnormal labour turnover.

The steel strike has affected employment in bus production at Fort William; temporary layoffs of 250 workers have occurred. Labour unrest and low wages as well as steel shortages are retarding placements in the foundry trades.

Construction. Construction activity varies throughout the region. Despite supply shortages, workers are required at Winnipeg, Regina, Brandon and Port Arthur; carpenters, bricklayers, cement finishers and husky labourers are the greatest need. Severe scarcity of materials is holding up work in other areas.

Transportation. The railways are expanding employment in order to cope with the movement of this year's crop. It is difficult to fill their orders because of harvest wage competition.

Pacific Region

Agriculture. The farm labour situation is satisfactory. No shortage of workers exists at the present time, apart from the continued scarcity of dairy workers which is due chiefly to lack of housing for married men. In the fruit belt the surplus of labour has disappeared as picking now is in full swing. Fruit crop prospects indicate a record year.

Logging. The great scarcity of skilled men persists in the lumber industry, although there is no shortage of unskilled labour. Engineers and rigging men are needed most urgently.

Higher wage rates make the industry more attractive than before, and it is noticeable that miners are now drifting to the woods.

Operations may be limited shortly, as the present dry weather may create a fire hazard dangerous enough to bring about the seasonal shutdown on the mainland. Some lumber camps on Vancouver Island are already closing because of the fire hazard. This may relieve the labour shortage for those still operating.

All sawmills in the Vancouver area are at peak production. Sawyers, setters, and doggers are scarce, and larger mills are training young men for these jobs. Demand for mill

labourers is general, as labour turnover still presents a replacement problem.

Gold Mining. In the Whitehorse area, lack of necessary mining machinery prevents employment expansion. The steel strike will further delay delivery of this equipment. The Alaska highway will contribute to development of Yukon gold properties. Strikes in the industry at Wells have not affected placer or dredging operations; no labour shortage is expected until after the strike is settled.

Base Metal Mining. At Trail, employment is rapidly expanding. About 150 men are being placed monthly by the local employment office. Orders in clearance at Calgary and Regina total 100. Medical standards are very rigid.

Coal Mining. Underground labour and certified coal miners are still in demand. Some coal miners in the Crow's Nest area have left for Alberta coal fields where contract work gives greater remuneration.

Manufacturing. Foundries are re-staffing now that the strike is over, but are not yet back to full production. Fish canneries are currently at a low level of activity, but a sudden rush of fish is expected shortly and will result in a simultaneous demand for labour from all canneries. Food processing plants are well supplied with female workers. The shipbuilding employment situation remains critical in the Victoria area. Progressive lay-offs are planned, and have begun with the release of over 200 men.

Construction. Construction throughout the region is on the upward trend, despite material shortages. First-class carpenters are very hard to find, and bricklayers, plasterers and lathers are almost as difficult to obtain. However, if building materials do not become available within a short period, a considerable number of tradesmen and labourers will be forced back into the labour market.

Transportation. Marine engineers—steam and diesel—firemen, seamen, and cooks are urgently required and are in short supply.

Workers are not interested in railway maintenance jobs, but will accept work with the B.C. Electric Railway as wage rates are higher.

Truck drivers are needed in the coal business; labour turnover is high.

Applications for Employment; Vacancies and Placements; July, 1946

DURING the five-week period June 28 to August 1, 1946, reports received from the National Employment Service Offices of the Unemployment Insurance Commission showed a decrease of .5 per cent in the average daily placements effected when compared with the previous four weeks May 31 to June 27, and a loss of 34.6 per cent in comparison with the five weeks June 29 to August 2, 1945. Under the first comparison agriculture showed a moderate gain and forestry and logging, public utilities operation and finance and insurance slight increases but all other industrial divisions recorded declines, the greatest being in manufacturing. In comparison with the five-week period ending August 2, 1945, apart from an increase in agriculture, all industrial divisions showed decreases the most pronounced being a substantial decline in manufacturing and moderate losses in public utilities operation, trade, forestry and logging and services.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the National Employment Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies in relation to applications remained about the same while that of placements took an upward course. The ratio of vacancies to each 100 applications was 101.1 during the five weeks ending August 1, 1946, in contrast with 101.5 in the previous period, and 106.4 during the five weeks June 29 to August 2, 1945. The ratio of placements to each 100 applications during the period under review was 50.2 compared with 46.8 in the preceding four weeks and 63.9 during the corresponding period ending August 2, last year.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the five weeks June 28 to August 1, 1946, was 6,239 in comparison with 6,745 in the preceding period and 7,893 during the five weeks ending August 2, 1945. The average number of applications for employment received daily during the period under review was 6,173 compared with 6,644 in the previous period and 7,416 during the five weeks June 29 to August 2, 1945. The average number of placements made daily by the offices during the period under review was 3,101 of which 2,845 were in regular employment and 256 in work of one week's duration or less in comparison with a daily average of 3,117 during the previous period. Placements during the five weeks June 29 to August 2, 1945,

averaged 4,742 daily consisting of 4,592 in regular employment and 150 in casual work.

During the five weeks June 28 to August 1, 1946, the offices referred 136,678 persons to vacancies and effected a total of 89,919 placements. Of these the placements in regular employment were 82,504 of which 62,732 were of males and 19,772 of females, while placements in casual work totalled 7,415. The number of vacancies reported by employers was 128,291 for males and 52,635 for females, a total of 180,926, while applications for work numbered 179,011 of which 134,510 were from males and 44,501 from females. Reports for the four weeks May 31 to June 27, 1946, showed 155,144 positions available, 152,822 applications made and 71,702 placements effected, while in the five weeks June 29 to August 2, 1945, there were recorded 228,890 vacancies, 215,073 applications for work and 137,510 placements in regular and casual employment.

The following table gives placements effected by the offices, each year, from January, 1936, to date:—

PLACEMENTS

Year	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (31 weeks).....	448,722	41,262	489,984

Nova Scotia and Prince Edward Island

Orders received at National Employment Service Offices in Nova Scotia and Prince Edward Island during the five weeks ending August 1, 1946, called for an average of 232 workers daily in contrast with 260 in the preceding period and 290 during the five weeks ending August 2, 1945. There was a daily average of 145 placements in comparison with 169 in the previous period and 206 during the five weeks June 29 to August 2 last year. Fairly large decreases in manufacturing and public utilities operation together with a moderate loss in trade accounted for the decline in placements from the corresponding period a year ago. In the remaining groups, a moderate advance was reported in construction. Placements by industrial divisions num-

bered: services 1,198; construction 945; manufacturing 883; trade 547; public utilities operation 231; agriculture 139, and forestry and logging 101. Regular placements totalled 2,930 of men and 1,080 of women.

New Brunswick

The demand for workers on a daily average as indicated by orders listed at Employment Offices in New Brunswick during the period under review was 168, as compared with 192 in the previous four weeks and 217 during the period terminating August 2 last year. Placements showed a daily average of 93, in comparison with 95 in the preceding four weeks and 147 during the corresponding period of 1945. The decrease in placements from the period terminating August 2 a year ago was almost entirely due to reductions in manufacturing, public utilities operation, trade and services. Except for a moderate gain in construction, the changes in all other groups were negligible. Placements by industries included: construction 801; services 588; manufacturing 523; trade 269; public utilities operation 183, and forestry and logging 117. There were 2,078 men and 453 women placed in regular employment.

Quebec

Opportunities for employment at Employment Offices in the province of Quebec during the five weeks ending August 1, 1946, numbered 1,273 daily in comparison with 1,343 in the preceding period and 2,195 during the five weeks June 29 to August 2, 1945. The average number of placements effected daily was 441 during the period under review, as compared with 493 in the previous four weeks and 1,191 during the corresponding period of last year. With the exception of a moderate gain in agriculture, placements were less numerous in all industrial groups than during the five weeks ending August 2 a year ago. The most noteworthy loss occurred in manufacturing followed by fairly substantial declines in forestry and logging, construction, services, public utilities operation and trade, and moderate decreases in mining, and finance and insurance. Industries in which employment was secured for more than 500 workers included: manufacturing 4,419; services 2,425; construction 2,355; forestry and logging 975; trade 935; public utilities operation 797 and mining 504. Placements in regular employment totalled 9,963 of men and 2,652 of women.

Ontario

There was a decrease in the average number of positions available daily at Employment Offices in Ontario during the period terminating August 1, 1946; there being 2,717 in contrast with 3,194 in the previous four weeks and 3,255 during the period terminating August 2 last year. Placements were fewer under both comparisons, the daily average being 1,370 as compared with 1,407 in the preceding four weeks and 1,879 during the five weeks June 29 to August 2, 1945. A pronounced decrease in manufacturing supplemented by fairly substantial losses in public utilities operation, services and trade and moderate losses in forestry and logging, and finance and insurance were responsible for the reduction in placements from the corresponding period a year ago. Agriculture and construction were the only groups to show improvements, these being moderate in volume. Industrial divisions in which the majority of placements were effected were: manufacturing 12,996; services 8,724; construction 6,739; trade 3,762; public utilities operation 2,884; agriculture 2,357; mining 1,044; forestry and logging 660, and finance and insurance 567. There were 29,372 men and 8,290 women placed in regular employment.

Manitoba

Positions offered through Employment Offices in Manitoba during the five weeks under review, averaged 360 daily compared with 390 in the period ending June 27, and 371 during the corresponding five weeks of last year. There was a daily average of 208 placements in comparison with 217 in the preceding period and 236 during the five weeks ending August 2 a year ago. When comparing placements by industrial divisions with the period June 29 to August 2, 1945, there were moderate declines in public utilities operation, manufacturing and trade, and gains in agriculture and services. Placements by industries included: services 1,793; manufacturing 1,375; trade 988; construction 741; public utilities operation 468; agriculture 330; mining 207, and finance and insurance 119. Regular placements numbered 3,112 of men and 1,518 of women.

Saskatchewan

Employment opportunities as indicated by orders received at Offices in Saskatchewan during the period terminating August 1, 1946, showed a daily average of 226 workers in contrast with 218 in the preceding four weeks and 186 during the period June 29 to August 2 a year ago. The average number of placements registered daily was 129, in comparison with 133 in the previous four weeks and 131 during

the period terminating August 2, 1945. The reduction in placements from the corresponding five weeks of last year, was small for the province as a whole under this comparison. The most significant changes were losses in public utilities operation, trade and manufacturing and gains in services and agriculture. Industrial divisions in which most of the placements were effected were: services 1,536; trade 643; construction 506; manufacturing 393; agriculture 324 and public utilities operation 273. Placements in regular employment totalled 2,165 of men and 790 of women.

Alberta

Orders listed at Employment Offices in Alberta during the five weeks under review, called for a daily average of 411 workers compared with 407 in the previous period and 408 during the corresponding five weeks of 1945. Placements recorded a daily average of 253 in contrast with 243 in the preceding period and 291 during the five weeks ending August 2 last year. The largest decline in placements from the period June 29 to August 2 a year ago took place in public utilities operation. Losses smaller in volume were recorded in trade and manufacturing but were partly offset by moderate gains in services and agriculture. Placements by industries included: services 2,642; construction 1,094; manufacturing 1,045; trade 852; agriculture 621; mining 492; public utilities operation 374, and forestry and logging 131. There were 4,355 men and 1,582 women placed in regular employment.

British Columbia

During the period terminating August 1, 1946, the daily average of vacancies offered through Employment Offices in the province of British Columbia was 852, as compared with 742 in the preceding four weeks and 971 during the period terminating August 2 last year. There was a daily average of 462 placements in comparison with 361 in the previous four weeks and 660 during the period terminating August 2, 1945. An appreciable decrease in manufacturing augmented by losses somewhat smaller in volume in public utilities operation, and forestry and logging were chiefly responsible for the reduction in placements from the corresponding five weeks a year ago. Moderate declines were registered in trade and mining but these contractions were entirely offset by increases in agriculture and construction. Industrial groups in which the majority of placements were effected were: services 3,398; manufacturing 2,600; construction 2,221; forestry and logging 1,607; trade 1,589; agriculture 770; public utilities operation 724 and mining 276. Regular placements totalled 8,757 of men and 3,407 of women.

Strikes and Lockouts

Strikes and Lockouts in Canada During August, 1946

DURING August, 1946, less time was lost due to strike idleness than in the previous month but for the fourth consecutive month strike activity in Canada continued at a high level. As compared with July, 1946, one more strike was recorded, the number of

workers involved decreased by 7,000 and the time loss showed a drop of 50,000 days. Preliminary figures show 43 strikes and lockouts in existence during August, 1946, involving 42,407 workers, with a time loss of 867,252 man-working days, as compared with 42

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

strikes in July, 1946, with 49,752 workers involved and a time loss of 918,285 days. In August, 1945, there were 27 strikes, involving 13,190 workers, with a time loss of 41,122 days.

Preliminary figures for the first eight months of this year show 165 strikes, involving 124,774 workers, with a time loss of 3,411,833 man-working days. For the same period last year there were 139 strikes, with 46,118 workers involved and a time loss of 169,330 days.

Of the 43 strikes recorded for August, four were settled in favour of the workers, six in favour of the employers, seven were compromise settlements, one was partially successful, and five were indefinite in result, work being resumed pending final settlement. At the end of the month 20 strikes were recorded as untrminated, namely: metal miners in British Columbia; rubber factory workers at Bowmanville, Hamilton, Kitchener, New Toronto and Toronto, Ont.; textile factory workers at Valleyfield, P.Q.; composers, etc., at Winnipeg, Man.; composers, etc., at Ottawa and Hamilton, Ont., Edmonton,

Alta., and Vancouver, B.C.; brass factory workers at New Toronto, Ont.; motor vehicle factory workers at Chatham and Windsor, Ont.; foundry workers at Calgary, Alta.; steel products factory workers at Windsor, Ont.; electrical apparatus factory workers at Hamilton, Ont.; metal factory workers at Welland, Ont.; electrical apparatus and wire factory workers at Toronto, Ont.; steel mill workers at Hamilton, Sault Ste. Marie, Ont., and Sydney, N.S.; chemical factory workers at Windsor, Ont.; chemical factory workers at Amherstburg, Ont.; clothing factory workers at St. Hyacinthe, P.Q.; silverware factory workers at Toronto, Ont.; steel products factory workers at Lachine, P.Q.; steel products factory workers at Hamilton, Ont.; and plastic factory workers at Oshawa, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1946(1)

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars(2)
	Estab-lishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1946				
MINING—				
Metal miners, British Columbia.	12	1,900	45,000	Commenced July 3; for increased wages, reduced hours and other conditions; untrminated.
MANUFACTURING—				
<i>Vegetable Products—</i>				
Bakery workers, Halifax, N.S.	1	4	10	Commenced February 11; for a union agreement; strike not declared terminated but employment conditions no longer affected by August 3; indefinite.
Bakery workers, Winnipeg, Man.	6	62	400	Commenced July 14; for new agreements providing for increased wages and changes in working conditions; terminated August 8; conciliation, provincial; compromise.
<i>Rubber and Its Products—</i>				
Rubber factory workers, Bowmanville, Hamilton, Kitchener, New Toronto, Oakville and Toronto, Ont.	10	9,000	200,000	Commenced June 23; for increased wages, reduced hours, overtime rates for Saturdays, Sundays and holidays, etc; untrminated (plant at Oakville resumed operations August 23).
<i>Fur and Leather Products—</i>				
Glove factory workers, Waterloo, Ont.	1	10	110	Commenced July 12; for a union agreement providing for preferential shop, check-off, etc.; terminated August 14; conciliation, provincial; compromise.
<i>Textiles, Clothing, etc.—</i>				
Knitting factory workers, Toronto, Ont.	2	500	4,000	Commenced June 25; for increased wages, reduced hours check-off, etc.; terminated August 10; conciliation, provincial; compromise.
Textile factory workers, Valleyfield, P.Q.	1	2,750	70,000	Commenced June 1; for increased wages, reduced hours, two weeks' vacation with pay, etc.; untrminated.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1946⁽¹⁾—Continued

Industry, Occupation and Locality	Number Involved		Time Loss in Man- working Days	Particulars ⁽²⁾
	Estab- lishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1946—Continued				
MANUFACTURING— <i>Con.</i> <i>Printing and Publishing—</i> Compositors, etc., Winnipeg, Man.	2	88	1,750	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; untermi- nated.
Compositors, etc., Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.	5	125	2,500	Commenced May 30; in sympathy with strike of compositors at Winnipeg, Man., commencing November 8, 1945; untermi- nated.
<i>Metal Products—</i> Foundry workers, Vancouver and New Westminster, B.C.	35	500	1,500	Commenced May 17; for increased wages and reduced hours; terminated August 6; conciliation, provincial, and return of workers pending reference to a Commissioner; indefinite; (work resumed at majority of foundries by August 5).
Brass factory workers, New Toronto, Ont.	1	800	17,000	Commenced May 18; for increased wages, reduced hours, union shop, seniority in lay-offs, etc.; untermi- nated.
Motor vehicle factory workers, Chatham and Windsor, Ont.	2	3,000	70,000	Commenced June 18; for increased wages, reduced hours, two weeks' vacations with pay, etc; untermi- nated.
Foundry workers, Calgary, Alta.	3	180	4,000	Commenced June 20; for new agreements providing for increased wages, reduced hours, closed shop, check-off, two weeks' vacations with pay, etc.; untermi- nated. (work resumed at one foundry, August 27).
Steel products factory workers, Windsor, Ont.	1	190	3,000	Commenced June 27; for a new agreement providing for increased wages, reduced hours, two weeks' vacations with pay, etc.; untermi- nated.
Electrical apparatus factory workers, Hamilton, Ont.	2	4,000	90,000	Commenced July 5; for increased wages, reduced hours, two weeks' vacations with pay, payment for statutory holidays, etc.; untermi- nated.
Metal factory workers, Welland, Ont.	1	1,000	24,000	Commenced July 8; for increased wages and reduced hours; untermi- nated.
Electrical apparatus and wire factory workers, Toronto, Ont.	3	1,500	30,000	Commenced July 8; for a new agreement providing for increased wages, reduced hours, two weeks' vacations with pay, etc.; untermi- nated.
Steel mill workers, Hamilton, Sault Ste. Marie, Ont., Sydney, N.S.	5	10,000	255,000	Commenced July 14; for increased wages, reduced hours, union security, two weeks' vacations with pay, etc.; untermi- nated.
Storage battery factory workers, Kingston, Ont.	1	41	140	Commenced July 15; for increased wages, reduced hours, two weeks' vacations with pay, union shop, check-off, etc.; terminated August 6; negotiations and reference to RWLB (3); in favour of workers (draft agreement signed).
Steel products factory workers, Montreal, P.Q.	1	850 ⁽⁴⁾	12,000	Commenced July 25; for a new agreement providing for increased wages, reduced hours, two weeks' vacations with pay, union security, etc.; terminated August 17; conciliation, provincial, and return of workers pending signing of agreement; indefinite.

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾
	Estab-lishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1946—Concluded				
MANUFACTURING—<i>Conc. Non-Metallic Minerals, Chemicals, etc.—</i>				
Chemical factory workers, Windsor, Ont.	1	400 ⁽⁵⁾	9,500	Commenced June 27; for a new agreement providing for increased wages, reduced hours, union shop, check-off, two weeks' vacations with pay, etc.; un-terminated.
Chemical factory workers, Amherstburg, Ont.	1	400 ⁽⁶⁾	9,000	Commenced July 12; for a new agreement providing for increased wages, reduced hours, union security, etc.; un-terminated.
CONSTRUCTION—<i>Canal, Harbour and Waterways—</i>				
Labourers, Glace Bay, N.S.	1	12 ⁽⁷⁾	12	Commenced July 31; for increased wages; terminated August 1; return of workers pending decision of RWLB; indefinite.
Strikes and Lockouts Commencing During August, 1946				
MINING—				
Coal miners, Florence, N.S.	1	700	700	Commenced August 1; protest against sending home eight surplus workers; terminated August 1; return of workers; in favour of employer.
Coal miners, Florence, N.S.	1	700	700	Commenced August 7; protest against sending home seven surplus workers; terminated August 7; return of workers; in favour of employer.
Coal miners, surface workers, Glace Bay, N.S.	2	30 ⁽⁸⁾	30	Commenced August 10; protest against failure to hoist coal on Friday night due to absenteeism; terminated August 10; return of workers; in favour of employer.
Coal miners, Stellarton, N.S.	1	444	520	Commenced August 13; because night watchman requested union Board Member to leave mine property when he could not produce a pass; terminated August 14; return of workers; in favour of employer.
Coal miners, Florence, N.S.	1	700	2,100	Commenced August 13; protest against sending home seven surplus workers; terminated August 15; return of workers in favour of employer.
MANUFACTURING—<i>Vegetable Foods, etc.—</i>				
Bakery workers, Prince Albert, Sask.	1	20	200	Commenced August 21; for a union agreement providing for increased wages, grievance procedure and other conditions; terminated August 31; conciliation, provincial, and reference to RWLB; compromise.
Canning factory workers, St. Catharines, Ont.	1	230	175	Commenced August 29; for increased wages and time and one-half for overtime; terminated August 29; negotiations; compromise.
<i>Fur and Leather Products—</i>				
Leather factory workers, London, Ont.	2	200	200	Commenced August 12; for a new agreement providing for increased wages, reduced hours, union security, etc.; terminated August 12; conciliation, provincial, and return of workers pending reference to RWLB; indefinite.
<i>Textiles, Clothing, etc.—</i>				
Clothing factory workers, Montreal, P.Q.	1	35	700	Commenced August 9; for a union agreement providing for increased wages, reduced hours, union shop, etc.; terminated August 31; conciliation, provincial; compromise.
Clothing factory workers, St. Hyacinthe, P.Q.	1	165 ⁽⁹⁾	2,750	Commenced August 12; against refusal to implement Arbitration Board's decision that three union workers, allegedly dismissed for infraction of rules, should be reinstated; un-terminated.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1946⁽¹⁾—*Concluded*

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾
	Estab-lishments	Workers		
Strikes and Lockouts Commencing During August, 1946—Concluded				
MANUFACTURING—<i>Conc.</i>				
<i>Textile, lothing, etc.—Conc.</i> Textile factory workers, Lachute Mills, P.Q.	1	540	800	Commenced August 12; against dismissal of a worker for refusal to obey foreman's order; terminated August 14; conciliation, provincial; in favour of employer.
<i>Miscellaneous Wood Products—</i> Planing mill workers, Swastika, Ont.	1	15	30	Commenced August 29; against dismissal of a worker for alleged incompetence; terminated August 31; conciliation, provincial; in favour of workers.
<i>Metal Products—</i> Silverware factory workers, Toronto, Ont.	1	33	210	Commenced August 20; protest against alleged failure to negotiate a union agreement; un-terminated.
Steel products factory workers, Lachine, P.Q.	1	250	2,500	Commenced August 20; protest against using steel made in strike-bound Hamilton plant (see strike commencing July 14); un-terminated.
Steel products factory workers, Hamilton, Ont.	5	515	2,500	Commenced August 24; protest against bringing in Dominion and Provincial police in connection with steel strike commencing July 14; un-terminated (one plant resumed operations August 28).
Foundry workers, London, Ont.	1	21 ⁽¹⁰⁾	35	Commenced August 27; against dismissal of two workers for alleged union activities during working hours; terminated August 28; conciliation, provincial; in favour of workers.
<i>Non-Metallic Minerals, Chemicals, etc.—</i> Plastic factory workers, Oshawa, Ont.	1	315	3,250	Commenced August 20; for a new agreement providing for increased wages, reduced hours, union security, two weeks' vacations with pay, etc.; un-terminated.
CONSTRUCTION—				
<i>Highway—</i> Road construction workers, Boulevardier Island, Judique, Port Hawkesbury, Port Hastings, N.S.	4	81 ⁽¹¹⁾	420	Commenced August 6; for increased wages; terminated August 17; negotiations; partially successful.
TRANSPORTATION—				
<i>Water—</i> Freight handlers, North Sydney, N.S.	1	55	50	Commenced August 1; for two weeks' vacations with pay; terminated August 1; negotiations; in favour of workers.
SERVICE—				
<i>Public Administration—</i> Civic workers, Penticton, B.C.	1	46	460	Commenced August 6; for implementation of unanimous report of Conciliation Board recommending maintenance-of-membership and check-off in new agreement; terminated August 17; negotiations; compromise, maintenance-of-membership incorporated in new agreement.

(1) Preliminary data based where possible on direct reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) RWLB—Regional War Labour Board.

(4) 167 indirectly affected; (5) 146 indirectly affected; (6) 75 indirectly affected; (7) 13 indirectly affected; (8) 750 indirectly affected; (9) 85 indirectly affected; (10) 17 indirectly affected; (11) 118 indirectly affected.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The *British Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in June, 1946, was 186, and 23 were still in progress from the previous month, making a total of 209 during the month. There were

51,200 workers involved and a time loss of 224,000 working-days was caused.

Of the 186 stoppages which began during June, 13 arose out of demands for advances in wages; 75 over other wage questions; four on questions as to working hours; 26 on questions respecting the employment of particular classes or persons; 65 on other questions respecting working arrangements; and three were on questions of trade union principle.

New Zealand

For the first three months of 1946, figures show 34 strikes involving 5,992 workers, with a time loss of 10,209 working-days.

United States

Preliminary figures for July, 1946, show 480 strikes and lockouts beginning in the month, in which 185,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 3,300,000 man-days. Corresponding figures for June, 1946, are 350 strikes and lockouts, involving 150,000 workers, with a time loss of 3,800,000 man-days.

Prices

Prices, Retail and Wholesale, in Canada, August, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THERE was a further increase in the cost-of-living index between July 2 and August 1, the composite advancing 0.5 to 125.6. Four groups were higher, foods moving up 0.5 to 144.7 due to higher prices for eggs, meats and butter, which outweighed seasonal declines for fruits and vegetables. The clothing index increased 1.2 points to 127.6 mainly reflecting firmer prices for men's wear while the homefurnishings and services series registered a gain of 1.9 to 127.0 due principally to furniture and chinaware. The miscellaneous items index rose 0.1 to 113.8 during the month while two groups continued unchanged, rentals at 112.6 and fuel and light at 107.2.

Bi-monthly cost-of-living indexes for eight regional cities moved up substantially between

June and August due mainly to higher prices for foods, clothing and homefurnishings and services. In addition, prices for miscellaneous items were higher at certain centres. Halifax, with a gain of 2.6 points to 125.0 registered the sharpest advance followed by the Montreal index up 2.5 points to 128.3. Saint John at 124.6 and Edmonton at 122.5 were each up 2.1 points while the Toronto series rose 1.6 to 123.5; Winnipeg 1.2 to 122.1. Vancouver 1.1 to 123.6 and Saskatoon 0.8 to 126.1.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943
BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

† Commodities in the cost-of-living excluding rents and services.

commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably

complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement

TABLE II.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF AUGUST, 1946

(a) The basis of these figures is the record of rents collected in the 1941 Census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

(c) New descriptions.

of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941

census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

TABLE V--INDEX NUMBERS OF WHOLESALE PRICES IN CANADA CALCULATED BY THE DOMINION BUREAU OF STATISTICS

(f) Yearly averages are for period from July of preceding year to June of year specified. (g) July. (h) June. (i) Revised.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.59; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, homefurnishings, etc., with their weight, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control

policy are summarized from time to time in the LABOUR GAZETTE under the title *Price Control in Canada*.

Wholesale Prices, July, 1946

Wholesale prices moved higher again in July as indicated by the composite index which rose 0.4 points over the June level to 109.5. Among the groups non-ferrous metals registered the sharpest advance with a gain of 2.4 points to 89.3 due to a substantial increase in the price of silver. Animal products rose 1.5 points to 115.7 reflecting advances in canned lobster, butter and eggs which outweighed weakness in livestock and raw furs. Firmer quotations for potatoes, canned fruit and lemons over-balanced decreases in rye, hay, oranges and bananas to move vegetable products up 0.5 to 99.2. On the other hand, four groups were lower; wood products and paper dropped 0.6 to 130.5 following a decline in the export price of cedar shingles while losses of 0.1 each were registered for iron products at 128.3, non-metallic mineral at 102.6 and chemical products at 94.4.

Canadian farm products prices moved up 1.1 points to an index level of 113.8 in July. In the same interval field products recorded an increase of 1.5 points to 103.7 due to firmer prices for potatoes and Ontario winter wheat which outweighed easier quotations for hay and rye. Animal products moved up 0.5 to 130.6, reflecting a firmer tone for eggs. Live-stock, however, was lower in this section.

CHANGES IN COST-OF-LIVING INDEX NUMBERS SECOND QUARTER OF 1946

Country	Percentage Change		Principal Group Changes March 1946-June 1946
	June 1946 August 1939	June 1946 March 1946	
Canada.....	+ 22.6	+ 2.9	Increases: food, homefurnishings, and services.

Peru.....	121.4	+ 3.5	Increases: textiles, miscellaneous, foods. Decreases: metals.
Sweden.....	+ 67.6	+ 1.1	Increases: vegetable products, animal pro- ducts. Decreases: fuel and lubricating oils, rubber goods.
Switzerland.....	+ 98.3	- 0.3	Increases: fuel, animal products. Decreases: fertilizers, carbons and chemical products, metals.
Union of South Africa.....	+ 63.0	+ 2.1	Increases: grains, etc., groceries. Decreases: fuel and light.
United Kingdom.....	+ 75.8	+ 0.3	Increases: non-ferrous metals.
United States.....	+ 50.5	+ 3.7	Increases: farm products, textile products, building materials.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at June 30, 1946

N the accompanying tables, which have been prepared by the Department of National Health and Welfare, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating. Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

The administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935. By a second Order in Council, P.C. 5942, dated September 7, 1945, the administration was transferred from the Department of Finance to the Department of National Health and Welfare from September 1, 1945.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

* Amended by Orders in Council P.C. 6367, August 10, 1943, P.C. 3376 and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

House of Commons Committee on Industrial Relations

Parliamentary Committee Inquires into Causes of Industrial Unrest in Canada

IN a series of meetings during July and August a special committee of the House of Commons undertook an intensive inquiry into labour relations in Canada, with particular reference to the strike in the steel industry.

The Industrial Relations Committee had been established in March, but had held no meetings until, during the course of a debate in the House on July 16, the member for Calgary West, Mr. A. L. Smith, suggested that owing to the effect on the country's economy of the steel strike, the Committee be instructed to sit immediately and attempt to devise machinery of procedure for preventing strikes. With this suggestion the Prime Minister, Right Hon. W. L. Mackenzie King, immediately agreed, and the Committee held its first meeting the same evening.

The Committee's terms of reference empowered it to investigate "all issues connected with and appertaining to the present industrial unrest in Canada, with power to call and examine witnesses under oath, and with power to call persons, papers and records and take all essential evidence, and to report their findings and conclusions to the House."

It was composed as follows: Hon. Humphrey Mitchell, Minister of Labour, Right Hon. C. D. Howe, Minister of Reconstruction and Supply, and Messrs: Adamson, Archibald, Beaudoin, Belzile, Bentley, Black (Cumberland), Blackmore, Case, Charlton, Cote (Verdun), Croll, Dechene, Gauthier (Nipissing), Gillis, Gibson (Comox-Alberni), Gingues, Homuth, Johnston, Lalonde, Lapalme, Lockhart, Maybank, Merritt, MacInnis, McIvor, Pouliot, Raymond, Ross (Hamilton East), Sinclair (Vancouver North), Skey, Smith, (Calgary West), Viau. Messrs. J. J. Robinette of Toronto and A. H. Lief of Ottawa were appointed Counsel and Junior Counsel respectively, for the Committee.

The Committee held sittings daily for a period of a month, meeting two and sometimes three times a day. Witnesses were heard and closely examined representing employers and workers in the steel industry. Subsequently representatives of the Wartime Prices and Trade Board, the National War Labour Board, the Department of Labour, and various labour organizations also presented evidence.

At the conclusion of its sittings, the Committee presented to the House of Commons a report containing a number of recommendations designed to contribute to the easing of industrial unrest.

The more important proposals were: the calling of a Dominion-provincial labour conference to draft a labour code; for closer contact between the Wartime Prices and Trade Board and the Regional and National War Labour Boards; that a measure of union security should follow certification of a union; and that the Minister of Labour be empowered, at the request of either party to a dispute, either before or after a strike is in progress, to direct a strike vote under Government supervision.

The report was accepted by the House on August 22 by a vote of 129 to 28.

It would be impossible in this space to give a full synopsis of the proceedings of the Committee. The day-to-day verbatim record of the evidence and discussion (which is obtainable from the King's Printer, Ottawa, at a price of \$1.00) runs to twenty-one numbers and occupies 1,100 pages.

The following summary gives some of the highlights of the more important testimony. It opens with a brief narrative of the proceedings, and then deals in turn with the various subjects that were discussed, including wages and hours, union security, vacations with pay, industrial councils, and national standards, giving the viewpoints of the various witnesses.

Some of the briefs covered similar ground, and certain points were made repeatedly in the evidence. In the present summary an attempt has been made to avoid unnecessary duplication, and also to give less attention to the evidence bearing directly on the steel case than to that which is of more general interest. (A summary of the events leading up to the steel strike appeared in the July issue of the *LABOUR GAZETTE*, pp. 915-6.)

Included also, are the full text of the Committee's report and appendices containing the factual statements presented by some of the Government officials outlining the machinery for handling industrial disputes.

Narrative of Proceedings

At its first meeting, on the evening of July 16, the Committee resolved that consideration of the steel strike should be the first order of business. Accordingly telegrams were despatched to Mr. C. H. Millard, Canadian Director of the United Steelworkers of America, and to Mr. H. G. Hilton, President of the Steel Company of Canada, Limited, inviting them to appear before the Committee.

Mr. Millard appeared on July 18 and read a prepared statement outlining the steelworkers' demands for higher wages, shorter hours, vacations with pay, union security, national recognition of the industry, and establishment of a national tripartite council. The Committee questioned Mr. Millard during the next two day's sittings, and then examined Mr. Hilton in order to learn the company's position in the dispute. The other companies involved in the strike, Algoma Steel Corporation, Limited, Sault Ste. Marie, and Dominion Steel and Coal Corporation, Sydney, were represented by Mr. Gordon MacMillan and Mr. Clement Anson, who made statements and submitted to questioning.

The next witness was the Commissioner who had been appointed by the Minister of Labour before the strike took place in an attempt to settle the dispute, Mr. Justice W. D. Roach. Mr. Justice Roach reported on his efforts at conciliation, and presented his recommendation for a settlement.

The effect of the proposed wage increases on the national economy was dealt with by Mr. Donald Gordon, Chairman of the Wartime Prices and Trade Board.

The Committee then heard a summary of the wage stabilization program from the Alternate Chairman of the National War Labour Board, Mr. C. A. L. Murchison, following which Mr. Arthur MacNamara, Deputy Minister of Labour, gave evidence.

On August 1 Mr. Millard presented on behalf of the union a new plan for settlement of the dispute. Mr. Millard was again closely examined by the Committee.

Two days later the Committee appointed Mr. L. W. Brockington in an attempt to bring the parties to the dispute together and effect a settlement. Mr. Brockington's efforts were unsuccessful, but he subsequently submitted a report containing his recommendations.

Two witnesses from the Department of Labour, Mr. A. H. Brown, Vice-Chairman of the Wartime Labour Relations Board (National) and Mr. M. M. Maclean, Director of Industrial Relations, outlined for the Committee the conciliation machinery administered by the Department.

Further information on the Government's anti-inflation program was given by Hon. D. C. Abbott, Acting Minister of Finance.

Mr. Pat Conroy, in his capacity as Chairman of the Wage Co-ordinating Committee of the Canadian Congress of Labour, then presented a brief giving a broad picture of wages and industrial relations in Canada, and making recommendations for a program to establish industrial peace.

Hon. Humphrey Mitchell, Minister of Labour, who was a member of the Committee, appeared as a witness and made a statement dealing with wage stabilization generally and with the demands of the steelworkers specifically. He also dealt with some of the points raised by Mr. Conroy.

The Committee then heard from the heads of three other unions having locals on strike, Mr. Joseph Mackenzie of the United Rubber Workers of America, Mr. George Burt, United Automobile Workers, and Mr. C. S. Jackson, United Electrical Workers of America.

Finally the Committee held a number of private sittings during the course of which its report to the House of Commons was prepared.

Wages and Hours

Perhaps the most important subject dealt with by the Industrial Relations Committee was that of wages. The Committee heard the wage demands of the United Steelworkers and the replies of the employers, also the point of view of Government officials in regard to the inflationary effects of wage rises. Witnesses were closely questioned as to their views on wage theory by members of the Committee.

MR. PAT CONROY:¹

The attitude of the Canadian Congress of Labour, as expressed by Mr. Pat Conroy, Chairman of the organization's Wage Co-ordinating Committee, was that wage increases need not necessarily be inflationary.

"All during the war," Mr. Conroy said, "there was conflict between labour and the Government on wage policies. The program of the Government was that with a shortage of goods price levels had to be maintained, and since that was so, wages had to be rigorously controlled in order to maintain the price levels. The theory of the Government and its advisers was that if there was any flexibility in wage adjustments, prices would automatically rise, and we should be subjected to varying degrees of inflation.

"Our Congress has never agreed to this contention of the Government or its advisers. We agree that wages are an element in the final cost of any commodity; but we do contend that they are not, as the Government theorizes.

¹ Mr. Conroy's evidence, although it was presented at one of the later sessions of the Committee, is summarized at this place since it gives a general outline of labour's wage demands.

the only element, and hence we do not hold that a general wage adjustment would render price increases either inevitable or automatic."

The Congress had asked for a general investigation into wages and wage stabilization, having particularly in mind that "there were many black spots throughout the nation where wages were particularly low," and that these might effectively be obliterated during the wartime period of Government control.

The Congress felt that the "hard and fast attitude towards wages" taken by the National War Labour Board was a barrier to better production during the war years. "The time arrived when most unions completely lost confidence in the personnel of the Board and in the wage regulations themselves."

Dealing with the Congress' demands in the post-war period, Mr. Conroy said: "Shortly after the end of the war, our Congress made representations to the Government to the end that wage regulations be liberalized as a preventive of further aggravation of unrest in the trade unions throughout the nation. The lid had, figuratively, been put on wages for a period of nearly six years, and it was inevitable that, unless the pressure was eased, the lid would blow off. This was pointed out to the Government, and before Christmas of last year the Government decided to change the wage regulations. At the same time it suggested that employers and trade unions might be empowered to negotiate wage increases to the extent of five cents an hour, as well as providing for freedom of negotiations covering vacations with pay, premium pay for off-shift work and other incidental matters. The Government asked our Congress for its opinion of its proposals, and after several weeks of consideration, we wrote to the Deputy Minister of Labour, late in January last, making the following suggestions:

1. There should be a free range for negotiation between employers and unions of at least ten cents an hour, with a further proviso that, where reduction in hours of work is agreed upon, or has been effected, provision should be made for a larger amount than ten cents an hour.

2. The National and Regional War Labour Boards should have authority to increase wages to such levels as are deemed fair and reasonable, thus eliminating the provision for the same or comparable work in the same or similar localities. In short, in order to meet the need of constant production and of a high living standard the use of obscure language and equally obscure interpretations should be discontinued.

When the wage regulations were amended, at the end of January, (1) the proposal of the Government to allow negotiation to the extent of five cents an hour was withdrawn, and the Congress proposals were not accepted.

"Recently," Mr. Conroy continued, "the Minister of Labour announced that anything over ten cents an hour would cause inflation."⁽²⁾ He said that the reason for setting the figure at ten cents was not made clear, and referred to the award of Mr. Chief Justice Sloan in the British Columbia logging industry⁽³⁾ which was for an increase of fifteen cents an hour, and which the Minister had termed "fair and reasonable."

"It might well be asked," Mr. Conroy said, "why labour will not accept ten cents an hour now as its maximum figure. The Congress submitted the figure of ten cents an hour in the month of January as the amount which would carry the country through the difficult transitional period. The answer to that is very obvious: the cost of living has gone up roughly five points since the time the officers of the Congress suggested the figure of ten cents an hour, which would now be the equivalent of slightly over five cents per hour, and is, therefore, no longer valid.

"The idea of the Congress in submitting a figure of ten cents an hour increase, in January, was that prices could be held. Had the Government come out and voluntarily offered to adjust wages to this extent at that time, this gesture of the Government would have been well received by the vast majority of trade unionists throughout the country, and would have tided us over the difficult period until greater production was achieved, and until trade unionists could have considered their ultimate wage program.

"We believe that action which would have prevented the present crisis was not taken by the Government, and that its continuance of its rigid wartime control of wages is responsible for the present deplorable situation."

Wages and Hours in Steel Industry

The demands of the United Steelworkers in regard to wages, as outlined by Mr. C. H. Millard at an early session of the Committee, were closely related to the question of hours of work.

The union asked for a "national minimum guaranteed annual wage" of \$1,750, corresponding to a weekly rate of \$33.60. The union also asked for a reduction in working hours from 48 to 40 a week. On this basis, the hourly rate of wages necessary to bring in \$33.60 a week would be 84 cents. Since the existing rate was 64½ cents at Stelco and Algoma, and 59½ cents at Dosco, the amount

¹L.G., Feb., 1946, p. 140.

²L.G., July, 1946, p. 871.

³L.G., July, 1946, p. 918.

of increase required was 19½ cents at the first two plants, and 24½ at the third plant.

In their counter-proposals the companies were unwilling to grant any reduction in hours, but two of them offered increases in hourly rates of 10 and 8 cents respectively which, with a 48-hour week, would bring the workers' minimum weekly earnings to a figure in excess of the \$33.60 requested by the union, although the hourly rate would be less than that requested by the union. The third company made no offer.

The union subsequently modified its demand to a 44-hour week and a wage increase of 15½ cents an hour at two plants and 19½ cents at the third. This proposal would maintain, and in fact somewhat better, the weekly wage of \$33.60 requested by the union.

MR. C. H. MILLARD

Mr. C. H. Millard, Canadian Director of the Steelworkers, gave evidence in support of the objective of shorter hours coupled with increased wages.

"The annual minimum of \$1,750," he said, "was the result of investigations into the available statistics on the cost of living in Canada. It was adopted as the objective of the union at its last National Policy Conference held in Quebec City, October, 1944." Mr. Millard said that it represented the minimum amount of money necessary for a "health and decency standard of living" for an average Canadian family.

He also quoted figures prepared by the Toronto Welfare Council indicating that, as a result of increases in the cost of living, the minimum "health and decency" standard for a family of five had risen from \$28.35 in 1939, to \$35.85 in 1944, and further to about \$38 at the present time.

On the question of hours Mr. Millard said: "We do not believe that steelworkers or other workers can work more than 40 hours and provide the amount of employment that these industries should provide for the returning personnel from the services or from displaced war work."

He also cited the effects of long working hours in bringing about workers' fatigue and lessened efficiency of production. "A reasonable amount of leisure time," he said, "to allow for social, cultural and recreational activities is the right of the worker as a person and a citizen."

Questioned as to whether, with a 40-hour week, some workers might not seek part-time employment after their regular hours, and thus deprive other persons of employment, Mr. Millard expressed the view that if adequate

wages were paid for the 40 hours the men would not want to take further work. "The penalty," he said, "would be to the employer who employs an employee who works in a steel mill for 40 hours. If he does that, he certainly would not get much labour from him outside of that."

Questioned on the subject of the companies' ability to implement a 40-hour five-day week, Mr. Millard said that he did not believe this would be difficult to do. He admitted that it would cost more money, "for a time at least," until "the increased efficiency brought about by shorter hours becomes effective."

Queried as to where the workers' demands for shorter hours would end, and as to the union's ultimate objective, Mr. Millard said: "They are going to end with as low a number of hours as we can possibly work to produce what we need for the nation, and maybe for ourselves, by developing all our natural resources with a developing standard of living."

Members of the Committee questioned Mr. Millard on the subject of the ability of the steel companies to pay increased wages. Mr. Millard quoted figures as to the companies' financial standing which indicated that in his opinion they could afford to pay. Further questioning elicited the view that regardless of whether the companies could afford it or not, it was essential that workers should receive an adequate wage. Even if a company was having difficulty selling its products in a competitive market it should not be permitted to use lower wages as a competitive factor. This point was brought out in a discussion of the union demand that the 5-cent wage differential between employees at Dosco and the other two companies be eliminated:—

By Mr. Smith

Q. I suppose your position is that persons engaged in the same industry—two Ontario plants and one in Nova Scotia—could compete by efficiency and salesmanship any way they wished but you do not want them to compete with the differential in labour; is that your attitude?—A. It is one of the principles of our union organization that wages must not be a competitive factor.

Q. Perhaps I did not put it correctly. You do not mind competing in the manufacture but not with the wages of the workers?

—A. That is correct.

Discussing further the question of ability or inability to pay, the witness said:

"I cannot see why the employees should be victims of inefficiency, lack of capitalization, lack of modernization, lack of being competitive in an industry. I cannot see why that should be visited upon those who are doing their best and making their contribution to industry on the same scale as workers elsewhere."

The point was raised that if a company engaged in an essential industry could not pay good wages and remain in the competitive market it might be desirable for the Government to pay it a subsidy to keep it operating. On this point Mr. Millard said:

"Our viewpoint, Mr. Smith and members of the committee, is this, that a man should be paid a proper wage. That is the first consideration. That is the human element and it should be compensated. The human investment of Canadian life in the industry should be paid for. If the company finds that in paying a decent wage it cannot operate efficiently and develop the natural resources of our country, then it seems to me they should come to the Government and prove their point and have the subsidy based on the fact that they have paid decent wages and are not able to pay a decent return on their invested capital. That is the only excuse I can see for a subsidy."

Mr. Millard further said that if there were to be subsidies, conceding the necessity for maintaining the industry in operation, it might be well for the Government to "take over the operation and see if it could not be made more efficient."

Although stressing the desirability of a uniform wage pattern for the steel industry, the witness said that he would not object to workers in a profitably operated company receiving a higher income as part of a profit-sharing plan "because to that extent the employee would be taken into partnership, and if he could make the business more profitable, then he would share in those profits. We would object, however, if the lowest paid worker is not receiving sufficient income to provide himself and his family with a decent standard of living. What they could do above that figure would seem to me to be all to the good."

Relating the question of wage increases to the question of purchasing power throughout the country, Mr. Millard said: "Purchasing power must be spread in a way that will make effective the present potential demand. Thus the nation will achieve a more balanced economy and the dangers of depression be lessened."

Viewpoint of Employees

The arguments of the employers in regard to the union demands for higher wage rates and shorter hours were in general that the companies were not prepared or could not afford to meet them and that in any case the demands could not be justified by increased productivity. The three companies deposited with the Committee statements of their financial position in support of their arguments.

Speaking for the Steel Company of Canada, Mr. H. S. Hilton stated that although the company's present minimum weekly rate (\$30.98) was below the union's demand (\$33.60) the average weekly earnings in the company were higher (\$38.32 in April). He also pointed out that the minimum rate was received only by unskilled labour "from whose ranks men are promoted to more skilled and better-paid jobs as there are openings and as they gain the necessary experience and knowledge for these better jobs." The company's offer of an increase of 10 cents an hour without a reduction in hours would bring the minimum wage rate to \$35.76 for a 48-hour week, and this, Mr. Hilton pointed out, constituted higher take-home pay than the \$33.60 demanded by the union for a shorter week.

"Since the outbreak of war," Mr. Hilton said, "our basic or minimum hourly rate has increased by 39 per cent. If the union's demand were granted in full, it would result in an increase of 80 per cent above the pre-war figure. The company's offer of 10 cents an hour would result in an increase of 60 per cent during the same time. When this offer is compared with a rise in the cost of living index of approximately 22 per cent, surely it cannot be claimed that it does not keep pace with this index even after ample allowance for the union's claim that the Government index is not truly representative of conditions, for which claim there is probably justification.

"If organized labour in industry is going to force costs of production to such a point that the 75 per cent of our people earning their livelihood in other ways cannot buy the products of manufacturers, the net result can only be diminishing employment. Nothing could be more inconsistent than the condition reported in the United States where, on the one hand, costs and prices are being forced upward by heavy wage increases and, at the same time, certain unions are advocating buyers' strikes which will reduce production and cause unemployment. The importance of hourly wage rates paid is entirely secondary to the amount earned annually by steady work.

"Labour must realize that it can price itself out of a market and that the best wages are not necessarily the highest wages but the wages which will result in maximum continuous employment."

Questioned as to his company's ability to pay an increase of more than 10 cents an hour Mr. Hilton said that this could not be done unless the basic price of steel were raised, if the company were to maintain "our

earnings and financial position in the condition it should be kept in." He said also that business conditions were uncertain at the present time. Mr. Hilton urged that a vote be taken by secret ballot of all employees affected to determine whether they would accept the company's offer.

In a written statement presented to the Committee at a later date he commented in more detail on the principle of "ability to pay":

"There has been some discussion before the Committee hinging upon so-called ability to pay. If this principle were accepted, where does ability to pay cease? In one of its statements the Union makes the statement that it has no reason to believe that Stelco has been 'squeezed' anywhere near the limit. Is the limit reached when there are no more profits left or is this idea to be carried to such a point that resultant deficits are to be made up by the taxpayers, and, if the latter practice should become general, from whom would the taxes be collected? There is only one source and that is the general public. Moreover, if this principle of ability to pay is to be accepted while profits are increasing due to rising business activity, will it be applied in reverse when profits decrease due to a decline in general business conditions beyond the control of managers of industry? If this principle is to be accepted, does it mean that a prosperous, well-conducted business employing efficient machinery and equipment is to be expected to pay out all the returns from such management in wages and, if so, what would become of the incentive to invest money in improved machinery and equipment? The record of our Company will demonstrate that, for many years, it has made a practice of sharing the results of improved productivity resultant from heavy investments in plant with its employees, but this process cannot be carried to such a point that it becomes confiscation rather than sharing."

Speaking for Algoma, Mr. Gordon Mac-Millan stated that his company's offer of an 8-cent increase on the basis of a 48-hour week was as far as it could go, and "was made by us taking the most hopeful view of the general economy of Canada and its anticipated future." He said that his company was less advantageously situated than Stelco, and that, taking into consideration lower living costs in Sault Ste. Marie than in Hamilton, he did not agree with the union demands that wage rates should be the same at all three of the basic steel plants.

The offer of an 8-cent increase would bring about a higher weekly rate (\$34.80) than the

minimum demanded by the union, he pointed out. Moreover the union's argument in justification of the amount of \$33.60, namely that such an amount was necessary for the maintenance of a family of five, applied only to a limited extent at Algoma where out of a total of more than 3,600 men represented by the union only 170 were married men with a family of three children or more and earning \$33.60 a week or less.

Mr. C. ANSON

The position of Dosco, as outlined by Mr. Clement Anson, was that the steel plant at Sydney was already operating at a loss and that the demands of the union for increased wages, shorter hours and additional vacations with pay would add over \$3,000,000 to the existing yearly wage bill of \$9,234,480. The company claimed that there could be no justification for granting any demands which would add to the cost of operations.

Mr. Anson said that in the 14 years since 1930, the Sydney steelworkers had bettered their hourly wage by 70½ per cent, while the average Canadian worker had bettered his position by only 37½ per cent. Over the same period the cost-of-living index had actually shown a slight decline.

"It is respectfully submitted that there is no economic justification to warrant such wage increase as is demanded under threat of strike action.

"If, for increased wages, only the same amount of work is produced, then it is axiomatic that the resulting goods will cost more to produce. That cost must be passed on to the consumer by means of increased prices, and, if prices go up each time wages are increased, then the employee at the end is no better off than he was at the beginning.

"Notwithstanding all theories to the contrary, it is still a proven fact that one cannot, over a period, pay out more than it earns. The proverb of 'The Goose that laid the Golden Egg' is still as true to-day as it was when it was first heard. The Sydney plant can be just as surely wrecked by insistence on payment of labour rates in excess of its capacity to pay as it can by any other means."

Dealing with the union's claim that there should be uniformity in the common labour rate throughout the primary steel industry, Mr. Anson stated that uniformity of wage rates could be achieved only if other conditions were uniform; i.e. if:—

1. The raw materials used by each company were identical in chemical and physical characteristics.
2. The prices paid for materials and supplies used in the production of steel were identical.

3. The equipment used to make steel was identical throughout the three plants.
4. The tons produced per man-hour worked were identical in all plants.
5. The products produced were the same in all cases.
6. The products were sold in the same markets and the prices realized for the sale of such products were identical in all cases.

Mr. Anson gave detailed evidence in support of his claim that such uniformity did not in fact exist. He argued that the raw materials used at Sydney were inferior, that the prices paid were higher, that the equipment used was necessarily different and more expensive owing to the inferior raw materials, and that production per man-hour was in consequence less than in the other plants. Moreover the products of the three companies were in some respects widely different, and the average price per ton received by Sydney was less than that received by its competitors.

To insist that the Sydney steel plant pay the same scale of wages as its competitors "could only add to the difficult competitive position that the plant always has faced, and still faces. In the long run, such a policy would mean less business available to that plant and therefore less work for the men employed thereon."

On the question of hours the three company spokesmen were just as vigorously opposed to the union's demands. They took the position that since continuous operations 24 hours a day were necessary at a steel mill, therefore the most convenient hours of work were 48 a week with a three-shift 8-hour day. All three referred to the fact that hours had originally been considerably higher in the steel industry, with a 12-hour day and a 7-day week once the standard.

Mr. MacMillan made particular reference to the fact that a reduction in hours would entail the necessity of hiring more men. He said there was no unemployment in Sault Ste. Marie, and no source from which the company could draw the additional employees.

Mr. Anson stated that on previous occasions the men at his plant had gone on strike rather than work a shorter week. He disagreed with the union's argument that increased production might compensate for the reduced hours, claiming that the rate of production was governed by the type of machinery, and that the institution of the shorter week could not be compensated for by any effort on the men's part to increase production.

MR. DONALD GORDON

Having heard the arguments of labour and management, the Committee examined Mr. Donald Gordon, Chairman of the Wartime Prices and Trade Board.

Mr. Gordon's evidence was of particular importance because the Committee depended on it for an authoritative analysis of the effect that the steelworkers' demands would have, if granted, on the efforts to maintain price stabilization in Canada; in other words for an answer to the question of whether a 15½-cent increase could be allowed and the cost of living still held at a reasonable level.

Mr. Gordon's evidence was to the effect that a 15½-cent increase could not be granted within the framework of the Government's stabilization program. He expressed the view that the settlement in the steel industry would establish a pattern in wage disputes across the country, and that "a wage increase of the magnitude suggested by the union is bound to have an effect of such character that I question very much if it is worthwhile for the Wartime Prices and Trade Board to struggle any further to maintain the price ceiling we have achieved."

Mr. Gordon was closely questioned by Committee members in regard to the price increase, averaging about \$5 per ingot ton of steel, which the Prices Board had allowed the steel companies in April, 1946. He said that the Companies had presented information in regard to their costs of operation, including wages, materials, transportation and other matters, in addition to historical information affecting the profit condition of the companies and capital investment. Thereupon the Board, keeping in mind the effect of price increases in steel on the country's economy, reached the conclusion that price increases were nevertheless necessary, and permitted increases of varying amounts for various individual items, the average increase being approximately \$5 an ingot ton.

The Committee wanted to know what proportion of the \$5 price increase was intended to cover a rise in labour costs. Mr. Gordon said that the Board had deliberately refrained from indicating this to the companies. He pointed out that conditions varied between the three steel plants. The Board had asked the Companies to give an estimate of what the cost to them would be of various adjustments in wages at various levels. "We at no time told anybody as to what figure we selected in our judgment as the most likely point of settlement."

In further explanation of the method used in determining the price increase, Mr. Gordon said: "Labour was not the only cost factor we had in mind. Therefore, in exercising our judgment we took a range of costs as they affect labour; a range of costs as they affect materials; a range of costs as they affect transportation, and a range of costs that affected

other things and then considered in our mind the average price. We said that we could give that price as likely to be the range of the profit to the mills of the company, taking into consideration the volume. As I said before, we took what we thought represented the balance of probabilities and if I were pressed, I could not say to you specifically that we selected a figure for wages. We selected a range as to where negotiations might take place, and then the companies were in a position that with this price increase before them, they would then be able to exercise their own judgment in regard to all costs, not only labour, but all the costs I have referred to. Then they would be in a position to exercise their judgment as to what wage settlement they could afford to make and still maintain their position of production, having in mind the competitive factors of foreign markets."

The decision as to the amount of wage increase, if any, that should be granted was thus left to the companies (subject, of course, to approval by the War Labour Board); and with reference to the Steel Company Mr. Gordon said: "I have already told you that the Steel Company had reached a production of 2½ times their pre-war volume." He felt quite certain that with a wage increase above ten cents, Stelco would be back looking for a further price increase.

On the relationship between wage control and price control, Mr. Gordon said that the latter would be impossible to enforce without some measure of wage stabilization. In regard to the two Government bodies responsible for these two types of control, the Prices Board, and the Regional and National War Labour Boards, he believed that their administration should be separate. He said that the two organizations had separate functions and that it would be quite impossible for the Prices Board to "operate on a basis where it would be drawn into disputes or wage relations between labour and management." The Prices Board was not consulted by the War Labour Boards in regard to specific wage applications, although in matters of broad policy, such as the adoption of a new wage control order, consultation took place. There was also consultation on an informal level; moreover the Deputy Minister of Labour was a member of the Prices Board.

Asked specifically about the effect of a wage increase of ten cents an hour, Mr. Gordon said that he could not give the assurance that ten cents could be absorbed into the price structure, but that "at ten cents we still have a fighting chance of trying to prevent a whole series of price increases." His concern was over the effect of the steel settlement on wages and prices in other industries. "We are in a

position, or have been in a position in this country for some time where any increased cost of any kind is bound to result in higher prices." He said that he did not know precisely where the breaking point would be reached, and that a large wage increase might evoke such a flood of applications for price increases that administratively the Board could not tackle the problem. Moreover a price increase in one industry would frequently become a cost increase in another industry. "We have, over the last six or seven months since VJ day, adjusted a great number of costs. One is on farm implements. Then there have been many other price increases, which are in the process of adjustment by reason of our dealing with the fact that we switched over from wartime economy, and then we were faced with the fact that costs of production have become inflationary during the war. We have tried to make these adjustments. If we have to start all over again that is where I question whether we have the capacity or the intelligence or the stamina to do it."

In the case of anything substantially in excess of ten cents, Mr. Gordon said: "It would be my duty to say to the government it is no use, if the workers of this country are determined to have their own way in this respect and do not recognize their real interest—and their real interest lies in the value of their money wages—then there is only one way for them to learn. And it would be dishonest, in my opinion, for me to go on and try to neutralize the effect of that action."

Mr. Gordon eventually summed up his position in a letter to Mr. Maurice Lalonde, Chairman of the Committee, which went into the minutes a fortnight after his original presentation, and the text of which is printed further on in this article.

REVISED CLAIM OF STEELWORKERS

Following Mr. Gordon's appearance before the Committee, Mr. Millard presented on behalf of the United Steelworkers a revised plan of settlement.

"The Committee," he said, "has heard the case for the steelworkers. We believe it is a very strong case, so strong that it has the sympathy and support of many Canadians in all walks of life.

"The Committee has also heard what might be called the case for economic stabilization, presented with great ability and distinction by Mr. Donald Gordon. The gist of his case is that however just may be the claims of the steelworkers and other workers, they must, in large part, be postponed or deferred until such time as production overtakes demand. Mr. Gordon reinforces his case with the threat

that if wage increases go beyond a certain point, the effort to hold the price line will be abandoned.

"Now if there is real substance in the steelworkers' case (as there is) and if there is real substance in Mr. Gordon's case (as there is), then the national interests require us to find a reconciliation between the two—there must be a synthesis."

While agreeing with Mr. Gordon as to the necessity for maintaining price stability, he declared that in fact the price line was not at present being held. The Prices Board had authorized a large number of important price increases in steel, farm implements, milk, fruit, and other items. The cost-of-living index had risen by over five points in recent months.

"In view of the fact that the cost-of-living index remained almost stationary for over two years in wartime, when there was less production of consumer goods than there is to-day, it is submitted that the recent swift rise in the index could have been prevented. There is only one possible explanation for what has happened since April 1. The Wartime Prices and Trade Board has yielded too much.

"Mr. Gordon admitted that there is little or no co-ordination between price control administration and wage control administration.

"It now appears that the price control administration has yielded a great deal to demands for price increases, but the wage control administration, in steel at least, has yielded nothing at all for over two years."

Mr. Millard reasserted his view that wage increases in steel would not necessitate any further price increases and could thus be granted without danger of inflation.

He then outlined his plan of settlement. This included a 44-hour week effective April 1, 1947; and in order to give industry "a breathing-spell in which to get ahead with production" he offered to postpone part of the wage increase of 15½ cents an hour requested by the union, and make it come due in instalments between April 1 and December 1, 1946.

He further proposed, as a means of protecting labour's real wage, that commencing in January, 1947, steelworkers' wage rates be adjusted upward from month to month by one cent an hour for each rise of one full point in the cost-of-living index above the index figure for July 1, 1946. This proposal, he thought, would also provide "an incentive for industry to accept its responsibility of preventing further price increases." It would create a penalty for failure to hold the price line, in that an employer would find that if his price increase resulted in an increase in the cost-of-living index it would be taken up

by the increased payment he would have to make to labour.

REPLY TO MR. GORDON'S EVIDENCE

In rebuttal of Mr. Gordon's evidence Mr. Conroy, in the brief of the Wage Co-ordinating Committee (part of which has already been summarized) argued that an increase in wages did not necessarily mean an increase in costs, nor did every cost increase mean an increase in prices. He thought that Mr. Gordon had underestimated the factor of the increased productivity that would probably result from a wage increase. Moreover increased labour costs might be absorbed out of profits, rather than being reflected in price increases; the ability to absorb an increase would vary from industry to industry, but it was "manifestly unwarranted and unsound" to set "a rigid limit of approximately ten cents for all industries."

Furthermore Mr. Conroy objected that Mr. Gordon had given the Steel Company "absolute freedom to decide for itself" how much of the \$5 price increase would be allotted to labour as a wage increase.

"Our Congress", he continued, ". . . cannot agree that profits should take priority over wages, still less that employers alone should determine how high profits should be. It contends that the primary purpose of production is consumption. In accordance with Mr. Gordon's theory, this primary purpose will be almost wholly set aside, and the profits and welfare of a master class will be the first and last consideration of the whole economic system.

"If profit, not consumption, is made the be-all and end-all of production, the result can only be another depression, and in the not too distant future. Full employment demands high, steady, and steadily increasing consumption. An important factor, and, in a highly industrialized country like Canada, possibly the most important factor in such consumption, is high, steady, and steadily increasing wages. Wages must at least keep pace with productivity. . . .

"Our Congress recognizes that stability of prices is necessary, that it is a major interest of the working class. We have consistently supported price-control and we support it now. We recognize also that excessive and unreasonable wage demands can destroy price stability. But we are not prepared to accept the judgment of the employers, even when endorsed by the Chairman of the Wartime Prices and Trade Board and the Minister of Labour as to what is 'unreasonable' and 'excessive.' Labour is prepared to accept the responsibility of framing its demands in accordance

with the facts of the situation and the requirements of the public interest. But it can do so only if the facts are made available to it, and if employers accept the same responsibility. At present in this country, the facts are either not available or are deliberately withheld, as Mr Gordon's evidence shows; labour is called on to frame its policy without the knowledge to which it is entitled; and employers enjoy the privileged position of being allowed to determine their share of the proceeds of industry at their own sweet will, without responsibility and without control.

"Mr. Gordon told the committee repeatedly that he had expected the steel workers to be 'reasonable' in their demands, to show the 'restraint' which the maintenance of price stability calls for. He has 'no cure for this particular strike except a reasonable attitude on the part of the applicants to accept the wage increases which can be paid within reason.' But, as already noted, at the time the price increase was granted, he gave the workers no information as to what he considered reasonable. . . .

The companies had first to decide what they considered a reasonable profit, and then how much was left for wage increases, and those, by definition, were 'the wage increases which could be paid within reason.' Even now, Mr. Gordon shies away from a direct answer to the question, 'What would the amount be?' 'I cannot say; I am not the arbitrator', though in fact he has pronounced judgment in emphatic and dogmatic terms."

MR. GORDON'S POSITION

The text of Mr. Gordon's letter, in which he restates his position, is as follows:

MR. MAURICE LALONDE, M.P.

Chairman of the Standing Committee on
Industrial Relations

House of Commons,
Ottawa.

DEAR MR. LALONDE,—I am glad to have the opportunity of making a further statement to the Standing Committee on Industrial Relations. Some of my statements before the committee have been seriously misinterpreted and misunderstood in some quarters, particularly by the Wage Co-ordinating Committee of the Canadian Congress of Labour. While there is nothing in my previous statements before the committee that I would

wish to change, I think I can clear up the misunderstanding that has occurred and I am particularly anxious to correct the misinterpretation which has arisen from picking individual comments out of their context. As you are aware, I delivered no prepared statement before this committee. Had I done so I would have emphasized and developed some points much more, and others much less, than I was required to do under questioning.

My remarks concerning the relation between wage increases and price increases have been oversimplified and misinterpreted. While I emphasized that there is a very important relationship between wage increases and price increases, I did not state that the relationship was fixed or immutable. No person with any knowledge of the facts would deny that wages can and do increase in relation to prices. The whole past record going back for many years shows that wages do in fact increase more than prices. Such a tendency was quite apparent for a generation before the war. It was apparent during the war. Wages have gone up considerably more than 40 per cent since before the war and the cost of living has increased by 24 per cent. That has occurred already and if wages could be held at this sort of increase there would be much less difficulty about price control. But that is not the point under discussion. Wage control has been recently revised and made more flexible—and in my opinion properly so. Further wage increases over a wide field are being discussed. I do not say and have not said that further wage increases of reasonable proportions and within the purview of the revised system of wage control will wreck the price ceiling. What I have said is that if they are large and widespread they will make price control impracticable. It is a question of degree, of how much more and how fast. If you get widespread large wage increases (and under continuous questioning I did express the opinion that increases in excess of 10 cents would make the task impossible) prices will have to go up substantially. Productivity certainly tends to increase but it is a gradual process. It obviously does not increase at the rate of 20 per cent or of 10 per cent per annum or anything like that. If wages had been held steady throughout the war, we would certainly stand substantial increases in wages now. But they were not held steady—it was not a practicable

or desirable proposition—they went up over 40 per cent. It is a question of how much can be put on top of that now and in the near future when prices are pressing against ceilings, when margins are squeezed, when production has not yet begun to catch up with demand, and when we have not yet got into large volume output in many lines.

It is quite proper to point out that rising productivity permits higher wages over a period of time and in this regard I am far from pessimistic about the future. It is proper to point out that higher wages may stimulate greater efficiency—as a general proposition I go along with that. It is also proper to suggest that in some cases rates of profit may be reduced—the Prices Board has had a good deal to do with squeezing margins over the last four and a half years. But there must be some balance, some sense of perspective. All these things are true to a degree and in the passage of time. But they become ridiculous when pushed to extremes. Perhaps some industries can absorb wage increases of 7 cents or 8 cents or even conceivably 10 cents. Others perhaps could manage 2 cents or 3 cents without price increases. Yet others could not manage any wage increase at all without price advances—there are many of them on our doorstep now and others will be there tomorrow. Under some probing, I suggested that a pattern of increases of more than 10 cents per hour would create great difficulty and probably break down price control. And I stand by that statement. If a pattern of wage increases of that order is attempted, it is just too much—too much to be absorbed now or soon. There is not the capacity to absorb that sort of increase and maintain anything approaching current price levels. The exact breaking point in a given case is, of course, debatable. As I have said, it would vary between industries. In a lot of cases there is no absorptive capacity.

And let me add a very important point—which I did not have the opportunity to develop before—on the general effect of large and widespread wage increases. If a pattern of large wage increases gets established, it will do a lot more than raise prices of a wide range of manufactured goods. It is not just the immediate price increases that would worry me, though they would be widespread and important. It is the effect on the public, on the farmer, on the businessman, on the landlord. The public—and by the public I mean the housewife, the worker, the farmer, all consumers—is going to lose its faith in price control if prices are going up sharply all over the place and when that happens we would not have any control at all. The whole program

has been based and must be based on public support and acceptance. Without that it is impossible. If farmers, businessmen, labour, landlords want to go their own sweet way, if the public loses faith, we would not have any control whatsoever—no matter what laws might be passed.

I hope that clarifies my position on the broad issue. I do not think it is difficult to understand and I regret it has been so gravely misinterpreted by witnesses before you. Again I emphasize that I cannot say that 10 cents is the exact breaking point—that is a matter of judgment and in my opinion even a 10 cent pattern would make matters extremely difficult. But we must preserve some balance if we want price control. Business has to exercise restraint and believe me we are not giving it any unreasonable latitude as some of the witnesses before you have appeared to suggest. The Prices Board is very definitely controlling prices—we do not say to businessmen, go ahead and raise your prices within reason. On the very large list of items under price control, we say you cannot raise your prices unless the board is satisfied it is really necessary and I do not think we have the reputation of being easily satisfied. Labour, too, has to exercise restraint—labour has some reasonable latitude under the revised wage control order, but if that latitude is abused the whole program of price control cracks up. The same goes for farmers, for landlords and for other producer groups. It is all one program. It all hangs together. If one part breaks down, you cannot hold the rest.

Now let me deal with one further point which has been much discussed before you and in which the position of the Prices Board has also been seriously misinterpreted, i.e. the action of the board in authorizing an increase in steel prices which took some account of the fact that wage negotiations were pending. As I said before, that was a departure from our usual practice. In considering every other application for a price increase, we have not taken into account the possibility of future wage increases. This steel case was an exception and the decision was made, as I have stated in previous evidence, in the expectation that settlement of the price application would enable pending wage negotiations to be completed quickly. Furthermore, it certainly increased labour's chances of getting a reasonable and prompt increase in wages. It was an honest decision most carefully considered in the light of the facts before us and I must strongly object to the tone of the submission made to you by the Wage Co-ordinating Committee of the Canadian Congress of Labour

which carries the plain inference that the Prices Board was a pawn in the hands of the steel companies. That is the sort of obviously silly accusation that I should have thought would have no place in a serious inquiry of this kind. We authorized this increase in good faith and for good reasons and in the belief that an increase in wage rates was a certainty.

To sum up, this is the position we were in. We had to permit an increase in steel prices—whether there was a wage increase or whether there was not. Our investigations over a considerable period satisfied us as to that. There was no alternative. But we were faced with a further question. If we authorized the smallest increase that we believed could be managed, taking wages as they were, and shortly thereafter wages were increased, we should have had to authorize another general increase in steel prices. One increase was bad enough. It is a terrific job to deal with all consequences of higher steel prices and we are not through with that job yet. It is not only a big job but it is disturbing to all the users of steel and it has widespread ramifications. It was bad enough to have to go through it once—twice might have produced an administrative load that could not be handled and an enormous amount of confusion.

Now I have been criticized a good deal on the grounds that I should have announced that there was room for a wage increase. If we are open to criticism it must be for letting the wage question enter our thinking in the first place. Nevertheless, it would have been improper for the Prices Board to express its opinion of what constituted a reasonable wage increase, because that is a matter for collective bargaining subject to the provisions of the wage control order. Our job was and is to keep prices in hand and we could not get in the position of influencing wage matters by setting a pattern. I must say I was most definitely of the opinion that a wage increase would be forthcoming which would take up any slack and more in the price adjustment that had been permitted. While it is most unfortunate that the negotiations for a wage increase have in fact broken down and have been followed by a strike, it would be quite inappropriate for me to express any opinion as to the manner in which they have been handled by the parties to the dispute.

So that is the story. You have heard some of it before but I hope this will clear up the position of the Board.

Yours very truly,

D. GORDON,
Chairman.

MR. C. A. L. MURCHISON

The Alternate Chairman of the National War Labour Board, Mr. C. A. L. Murchison, read a brief outlining the history of wage stabilization in Canada, the text of which appears below (p. 1356). He also gave a chronological statement of wage development, in the steel industry, in which he pointed out that the steelworkers had made no application to any war labour board in regard to their demands in the present dispute.

Replying to a question as to whether the Board had "had any instruction or advice or suggestion from anyone that not more than ten cents an hour should be granted or permitted" in wage disputes, Mr. Murchison said. "From my own personal knowledge, Mr. Chairman, I can say that the Government has not interfered with the National Board or regional boards in the administration of the orders. We have not been told by the Honourable the Minister of Labour or by any other minister of the Crown that we should limit our orders, our direction, to 10 cents or less. Now, if there is to be any stability in wage structure of this country boards must see to it that there is uniformity in their decisions. It so happens that a large number of cases have recently been settled by awarding increases of ten cents an hour or in the case of cut-back in hours, ten per cent."

He listed a number of recent decisions in which a settlement had been made on this basis. "Combined", he said, "they constitute a fairly definite pattern. In saying this, I am not unmindful of the cases involving the coast region operators in British Columbia's logging and lumbering industry and the pulp and paper industry. I suggest to you that these two cases can hardly be regarded as being sufficient to overcome or destroy what appears to be the prevailing pattern set by management and labour. The operators and the International Woodworkers of America in the interior region of British Columbia did not accept the coast region rate increases as their pattern.

"The National Board assumed that it might be called upon to answer for these increases. Therefore, and in order that it might place itself in the position whereby it might justify them, the whole problem was carefully studied.

"The study revealed that in a large number of the cases to which I have referred, collective agreements were concluded on a basis which, in the view of management, at least, reflected the trend in the United States.

"You are fully cognizant of the large number of settlements made between management and labour in the United States, which settlements call for wage increases of 18½ cents an hour. You are, therefore, entitled to ask why it may be contended that a 10 cent increase in Canada.

can be regarded as a true reflection of the trend in the United States. To seek the answer, it is necessary to examine the history of wages and hours of work in the United States.

- (1) The Hours of Work Act in the United States was a pre-war measure which applied to companies under federal jurisdiction. It required a 40 hour week and provided that overtime at the rate of time and one-half would be paid for hours required to be worked in excess of 40 per week.
- (2) Under war conditions it applied to companies engaged in the production of war materials, including automobiles, steel, etc. Employers were given authority in the war emergency under what was known as an 'extended work week' to work 48 hours per week, but the time and one-half rule continued to apply. Consequently, the employees concerned throughout the war, received 52 hours' pay for 48 hours of actual work, that is to say, they received time and one-half for the 8 hours over 40. In Canada, generally speaking, the normal work week consisted of 48 hours, with overtime pay becoming effective only after the 48 hours.
- (3) It follows that American labour costs per man-hour actually worked were 108.33 per cent, relative to an employer's equivalent cost in Canada. This is not a wage rates comparison, but a comparison of relative labour costs.
- (4) With the war emergency over, hours were reduced to 40 in the United States. Assuming that the same hourly wage rate was paid on a 40 hour basis, as was paid on the previous basis, the employer would find that he was no longer faced with a 'premium payment' for overtime. This is to say that the employer's cost per unit of work for 40 hours was reduced to 100 per cent, and the employer saved 8.33 per cent of his previous overall wage cost.
- (5) Such a situation did not continue for long. Hourly wage rates for many of the major industries in the United States were increased by 18½ cents coincident with a reduction or return to a 40 hour week. The United States employer, therefore did not save the 8.33 per cent, but he was in a position of having to that extent, 'prepaid' a portion of the 18½ cent per hour increase.
- (6) As an illustration, let us take the case of a workman whose hourly rate was \$1 in the United States during the war. Because of the overtime premium for the

8 hours' work performed in excess of 40 per week, he actually earned \$1.08½ per hour. That was the cost of his labour to his employer. With an 18½ cent increase in the United States, for the 40 hours actually worked, the employer's actual labour cost was only increased by roughly 10 cents an hour, that is, 18½ cents less 8½ cents. It follows that in like circumstances a 10 cent per hour increase in Canada would be the equivalent of 18½ cents in the United States in terms of an employer's unit cost of production. This equation would, of course, be different at each wage rate level.

- (7) It should be noted, too, that in both Canada and the United States, improved efficiency of the worker, in machinery and in production methods would be a variable tending to off-set such increase to a greater or lesser degree. My own view is that an employer, whether he is in the United States or Canada, who reduces hours of work and increases wages to maintain take-home pay, does not thereby increase his labour unit cost to the full extent of the increase in wage rates. Time studies would indicate that in many operations, (it does not apply to all, however), production is higher on a 40 hour week than it is on a 48 hour week. Lessening of fatigue is the dominant factor in this contention.
- (8) It should be understood that in the United States, the wage adjustments made, do not mean full maintenance of take-home pay. In the cases to which I have referred, the workers, on a 40 hour week, with an 18½ cent increase, by and large, take less money home now than they did under the plan wherein they received 52 hours' pay for 48 hours' work. The only employees whose weekly take-home pay would remain the same are those whose rates were not more than 60 cents and have now been increased to 78½ cents. An employee whose wartime rate was \$1.00 and a weekly pay of \$52.00, i.e. \$1.00 x 52 hours for 48 hours' work. If he now works 40 hours and his pay is \$1.18½, he will receive \$47.40-\$4.60 less than during war time.

MR. ARTHUR MACNAMARA

The testimony of Mr. Arthur MacNamara, Deputy Minister of Labour, which was concerned mainly with the events leading up to the steel strike, contained a number of

references to wages. On June 27, he said, he had made a proposal to Mr. Cotterill, who was representing the United Steelworkers, that "the Department under a plan in mind, could arrange for the appropriate Regional War Labour Boards to issue a directive for a rate increase equal to 10 cents per hour, the increase to be worked out in a manner found desirable and reasonable by the union. One method suggested was that an increase of 8 cents per hour be granted all around, and in addition that overtime rates of time and one half be paid after 44 hours per week on the understanding that the plants would operate 48 hours per week for the present. The Deputy Minister gave a firm commitment that he would request the wage boards to issue the directive and also that, if an appeal was taken to the National Board, he was quite convinced the latter would not upset the decision." This commitment Mr. MacNamara later explained, was made at a time when an amendment had just been made to the Wage Control Order giving wage boards greater power to grant increases, and following consultation with the Chairman of the National War Labour Board, who had given his opinion that the increase would meet the approval of the regional board. It was the practice of the Department of Labour to leave the boards alone to make their own decisions in accordance with the provisions of the wage orders.

On July 11, following the appointment of a controller and prior to the outbreak of the strike, the Deputy Minister notified the union and local unions "that the Minister of Labour had already arranged with the controller that an application be made to the appropriate regional boards for an increase of 10 cents per hour effective immediately in the three plants. This would leave for discussion with the commissioner the question of retroactivity of wage increases. If the commissioner so recommends, the controller would make further application. The commissioner would also have to make recommendations on matters of union security, hours of work and other issues in dispute. The question of the differential at Sydney was in the hands of the National Board, which was giving it sympathetic consideration."

In regard to the 15-cent increase in British Columbia, Mr. MacNamara said that the settlement had been proposed by Commissioner Sloan and passed by the Regional Board after some hesitation. "I must say," he continued, "that we made no attempt to interfere with the Regional Board in the matter. We did not, for example, say to them that they must not grant this increase of 15 cents, nor is it our practice at any time to do that.

These boards are not put in a straightjacket. They are there and have to make their own decisions. I must admit that we would have felt much happier if that had been disposed of at something less than 15 cents." He pointed out that a large percentage of the products of the industry were exported, which meant that there was less pressure on the Canadian price ceiling than if a similar settlement were made in steel.

Mr. MacNamara held the view that liaison between the War Labour Boards and the War-time Prices and Trade Board was sufficiently effective in its present form.

HONOURABLE DOUGLAS C. ABBOTT

The Honourable Douglas C. Abbott, Acting Minister of Finance, presented a statement putting forward the Government's views in regard to the stabilization program.

He supported the general attitude expressed by Mr. Donald Gordon in regard to price control, stating that Mr. Gordon had "amply demonstrated his ability and his integrity," and that his opinion represented "an expert and unbiased view on a problem where such views are most difficult to obtain".

The increase in the cost-of-living index of about 5 points since the end of the war had been, he said, not unexpected. "Some readjustment in prices was inevitable following the conclusion of hostilities. Increased costs which had been carried by war business had, in part, to be recognized in peacetime. A start had to be made in removing subsidies and in facing up to the higher costs which were temporarily absorbed by these wartime payments. We could not entirely insulate ourselves from the effects of higher prices in other countries and this factor, too, has had some impact on our prices. Finally, some prices had to be adjusted upward if we were to obtain the necessary volume of certain essential commodities, such as butter and pork. Some readjustment was unavoidable. Every effort has been made to limit it to the smallest practicable amount. The War-time Prices and Trade Board has done everything feasible to minimize the price advance. It has carried on its fight for the consumer, that is, for all Canadians, questioning and investigating applications for higher prices, turning down many and paring down most of the remainder. It has been a difficult and harassing task, for the applicants seldom, if ever, got what they wanted and Canadian labour and the public generally have bitterly complained about those increases which could not be avoided. Nevertheless, it was a job that had to be done—the alternative was runaway inflation. There was no possibility, as some people appear to think, of holding prices absolutely stable.

"The readjustment in prices, to which I refer, has been necessitated by increased costs which gradually worked themselves into our economic system going back in some cases as long as three or four years ago. While the readjustment has not been fully completed, and while we cannot look forward to entirely stable prices, it is the government's belief that much of the readjustment to immediate post-war conditions has now occurred.

"The breakdown of O.P.A. in the United States admittedly added greatly to the potential menace of inflation. Less than a month ago, however, the Government took vigorous steps to adapt price control to meet this and other changes in conditions. It introduced somewhat more flexibility, particularly in regard to wage control since that was necessary and appropriate to the development of a healthy peacetime economy, and to our traditions and basic rights. At the same time, it concentrated the price control machinery, which was heavily overburdened, upon the more essential items in family expenditure, and as a further major step in combating inflationary pressures from abroad it raised the Canadian dollar to parity with the United States dollar.

"The Government believes that this program makes it possible to maintain effective price control and to maintain orderly economic conditions while production expands and gradually overcomes the widespread shortages. This vital objective can and will be achieved provided always that we have the good sense not to embark upon a new cycle of cost-price increases. Price control has still to contend with the very serious pressure of cost increases which are already present in our economic system. It has still to contend with inflationary pressures from abroad. It has still to contend with the pressure of excess buying power—excess in the sense that sufficient goods have not yet been produced to meet the demands of buyers. If on top of these pressures it had to contend with the effects of widespread and large wage increases, together with the industrial disputes and the major interruptions to production which they involve, it is my opinion that price control cannot stand the strain. At any event, it is a certainty that we should soon find ourselves in a new and more severe cycle of price increases, even if we succeeded in maintaining some semblance of price control.

"We simply cannot dodge the fact that wage increases have the immediate effect of raising costs—of raising costs in an economy where prices are pressing hard against their ceilings. Of course, I do not say that all wage increases mean higher prices. In some cases, business

can absorb increased wage costs within reasonable bounds. In some other instance, there may be a good case for moderate adjustments even when some price increase is involved. And given time, wage increases may be followed by a gradual increase in productivity which may ultimately offset the effect of those very increases on costs.

"What I do say is that we must guard against too rapid and too large an upward adjustment in wage rates, that is, if we want to maintain price control . . .

"With restraint on the part of business and labour, with industrial peace, we can accomplish wonders in the next twelve months. Without such restraint, we shall get a cumulative and mounting increase in prices all along the line and we shall get widespread industrial disputes which will further postpone our progress toward higher production and toward a satisfactory and sustained level of peace time employment and real earnings."

HONOURABLE HUMPHREY MITCHELL

The Minister of Labour, Honourable Humphrey Mitchell, also gave evidence in support of the Government's stabilization policy.

The steel dispute, he said, "hinges on the question of how much increase may be granted without creating a situation which would bring about inflation. This committee has heard from Mr. Donald Gordon that there would be reasonable hope of success if the general wage increase pattern does not exceed 10 cents per hour. But he was very definitely of the opinion that anything higher than 10 cents would create such a great pressure on the price ceiling that it would be his duty to tell the Government and the people of Canada that it would be hopeless to make any further attempt to control the situation.

"That is the carefully considered opinion of Mr. Gordon based on years of experience. But the opinion of officials of the union, as expressed in the evidence, is that Mr. Gordon is wrong. They maintain that it would be possible to grant an increase of 15½ cents without breaking through the price ceiling.

"It seems to me, gentlemen, that the question resolves itself into one of deciding who is best qualified to judge. I for one am of the opinion that the judgment of the man whose responsibility it has been to control the price ceiling through the difficult years of the war should be followed rather than the judgment of others who certainly cannot be said to be disinterested.

"The price of failure is far too great for any chance-taking."

Referring to his appointment of a controller prior to the outbreak of the strike, which action he had taken in the hope of providing a "breathing spell" during which the commissioner, Mr. Justice Roach, might work out a settlement of the dispute, the Minister said: "I believe it was an error of judgment on the part of the Steelworkers' Union Committee that it did not accept the controllership and the breathing space during which a peaceful settlement might have been effected.

"I believe also that the union leaders were wrong in deciding as they did to bypass the War Labour Boards provided for by law and to take direct action, particularly when labour is equally represented on these boards with employers.

"However, it may end, a strike means a loss to the worker.

"The steel strike began on July 15. At the end of next week, August 17, it will have lasted for five weeks. At the beginning of the strike the offer was made of an immediate 10 cent increase. If the offer of a 10 cent an hour increase had been accepted and the individual worker had remained at work, he would have, over the five-week period earned, at the basic rate including 10 cent increase, a total of \$178.80. If he now goes back to work and does not get any further increase, this money is entirely lost."

The Minister pointed out further that "even if the present demand of labour for a 5½ cent increase were granted the situation would still be that, on the basis of a five weeks' strike it would be about 1 year and 4 months or about the end of 1947 before the worker would have recouped his salary losses; while if the strike went on for seven weeks he would have to work for 1 year and 10 months or until July, 1948, before he would have caught up with his losses."

Referring to Mr. Conroy's evidence, and to the difference of opinion that existed between the Government and the Canadian Congress of Labour over wage control policy, the Minister emphasized that "as the policy of the Government and the Department of Labour is concerned, and my own convictions too, we have steadily maintained that there could be no effective price control without a measure of wage control." He stated: "I would like to say that the Government has never said or implied that wages are the only cost of any commodity and I challenge Mr. Conroy to show that the Government has ever so stated."

He disagreed with Mr. Conroy's describing Government wage control "rigid", stating: "There has been no rigid control of wages and

evidence given by the Chairman of the National War Labour Board is quite sufficient without any further statement from me to disprove the idea that there was rigid control of wages."

He continued: "On page 9 of the brief of the Congress reference is made to a suggestion made in January, 1946, to the effect that the Government should encourage the granting of an increase of 10 cents per hour all across the board and it is stated that the Government did nothing about it.

"The answer is quite obvious and it is that, had an increase of 10 cents per hour been arranged in January, 1946, the Government believed that an increase of 10 cents per hour across the board on January 1, 1946, would have broken the price ceilings.

"Mr. Donald Gordon has given evidence to the effect that even to-day in the eighth month of the year it is very risky to concede a 10 cent increase. The risk would have been very, very much greater in January.

"To infer that the Government did nothing about the matter, however, is simply not true, because since that time the Government made two amendments to the Wage Control Order, one effective in February and one in June. Both of these amendments gave the War Labour Boards much wider power and did exactly what the Congress requested the Government to do, namely, 'liberalize wage regulations'.

"A good deal of the discussion of the Congress brief is taken up in condemning Mr. Gordon's expert evidence. Anyone who heard Mr. Gordon's evidence could not be, I feel sure, other than impressed by it and form the opinion that they were hearing the honest view of a man who was putting all he had into his job of doing something which the Canadian people want done, namely, preventing inflation.

"In conclusion let me say that it is not for me to tell this committee what to do; however, I will take the liberty of giving it as my opinion that the Committee will be doing what the vast majority of citizens of Canada wish done if it gives its influence in support of the efforts of the Wartime Prices and Trade Board to maintain prices and prevent inflation rather than lend its support to the Canadian Congress' policy of abolition of wage control and the consequent wrecking of price control."

COMMITTEE'S VIEW ON WAGES

In its final report the Committee said very little on wages, merely stating its conviction that continued price control was only possible with a reasonable measure of wage control.

It urged that much closer contact be established between the Wartime Prices and Trade Board and the Regional and National War Labour Boards, and that matters coming before the Regional and National War Labour Boards be handled expeditiously.

Appended to the report was a statement of the results of Mr. Brockington's unsuccessful attempt to settle the dispute, indicating that the respective positions of the union and the companies remained substantially unchanged.

Mr. Brockington's proposal was that a ten cent increase be granted retroactive to April 1, 1946, and that the question of any further adjustment be submitted to arbitration. Mr. Brockington further suggested: "In considering wages the arbitrators shall take into account the following factors, not however, excluding in any way any submission on other material factors advanced by either party:—

- (a) Advances in the cost of living.
- (b) State of steel production.
- (c) Price control in general and in particular as applied or applicable to the steel industry.
- (d) Patterns of wages and conditions applied to other comparable industries."

Union Security

The issue of union security engendered much testimony and discussion during the course of the sessions and culminated in the recommendation contained in the report of the Committee to the House of Commons "that a measure of union security should follow certification" of a union as a bargaining agent.

The general contention of the labour spokesmen was that the history and continuing development of industrial relations in Canada provided cogent evidence for the acceptance of the principle of union security by management.

MR. C. H. MILLARD

Mr. Millard in his testimony declared that this demand by organized labour was not new.

"In Great Britain, after the repeal in 1824 of the anti-combination laws of 1799 and 1800, trade unions began to enforce their own form of security with increasing effectiveness. In many cases union men refused, and still refuse, to work with non-unionists. It was common practice by the middle of the 19th century. One employer could not even employ his own relatives unless they became members of the appropriate union.

"A modern writer on the history of union security, Dr. Jerome Toner, states: 'In a trade under the influence of a union in the second half of the 19th century, an employer had to

choose between unionists and non-unionists. If he admitted any of the latter, the former left him in a body. That method was legally upheld in *Allen v. Flood* in 1898.'

"Numerous writers on the subject have emphasized that union security is a logical development of collective bargaining. However, quite apart from theoretical considerations, the feeling of organized workers almost invariably supports the thesis.

"Unfortunately", he continued, "it must be recognized that there are some individuals, always a minority, who lack any sense of responsibility. Such people are only too willing to let others shoulder the burdens even when they share the gains. In union language they are known as 'hitch-hikers'. We, of course, want to eliminate those from our ranks."

The union shop, which generally prescribes that an employee must become and remain a member in good standing of the union as a condition of employment, was held by Mr. Millard to be "the most logical form of union security in the iron and steel industry, and it is the form sought by the United Steelworkers of America in contracts to be made with Algoma, Stelco and Dosco.

"The union shop is sometimes confused with the closed shop, which represents a different type of union security. A worker must belong to the appropriate union before becoming eligible for employment in a closed shop. On the other hand, an applicant for employment in a union shop need not be a union member to qualify; he is required, as a condition of employment, to become a member within a specified period, usually 30 days, after being hired. Thus, in the union shop, the employer retains the exclusive and unfettered prerogative of hiring anybody; once hired, however, the worker must accept the responsibilities of union membership as well as the benefits gained for him by the union.

"What has become widely known as 'the Rand formula' is a third form of union security. The leading principle of the Rand formula is that all workers in the bargaining unit are required, by compulsory dues check-off, to support their bargaining agency, but membership in the union continues to be voluntary. It is an attempt to assure that all who benefit will share in the cost of obtaining such benefits, at the same time preserving their freedom of choice as to membership."

He described the Rand formula¹ as a revolutionary development which was being studied with great interest both in Canada and in the United States and presented a detailed

¹L.G. Jan. 1946 p. 123

account of the penalties provided therein for participation by either a union or individuals in unauthorized strikes.

"I want to say now that our steelworkers' union is quite prepared to accept all the responsibilities that go with the Rand formula if we can be assured of the degree of union security the Rand formula provides."

In the establishment of genuine labour-management co-operation, Mr. Millard contended, the primary step was for the employer to grant union security as an indication of his confidence in the agency chosen to represent his workers. Too many employers, he said undertook to initiate "ill-considered schemes for co-operation" which circumvented the chosen bargaining agency through appeals direct to the employees. Such approaches "naturally aroused suspicion among union-conscious workers and discouraged co-operation." The next stage, he said, was for union representatives to reciprocate by assuring and convincing the workers that they could have confidence in the good faith of their employer, and that they should act accordingly. When a facility for practical organizational co-operation in the day-to-day problems of production and efficiency was cultivated, remarkable improvements in safety, efficiency and productivity could be achieved.

At present, he averred, the issue of union security prevents unions from submitting the settlement of disputes to arbitration and discarding the resort to strike action. He said that he believed when the issue was determined and unions were accepted in good faith by employers, as they were in Britain, "labour would very seriously consider the substituting, in practically every case, of arbitration rather than strike."

In reply to a query as to how far the union was prepared to go in the dispute with the three steel companies on the question of union security Mr. Millard stated that he felt that it was in issue only in respect to Stelco.

Union security in the form of a revocable check-off existed at both Algoma and Doseco and these companies "have shown no desire or intention of trying to destroy the union" he said. He added that he did not believe that these companies "would have any great objection" to adopting the same thing, being asked of Stelco (the Rand formula) for the sake of uniformity throughout the industry. Stelco, he said, "has refused to accept the recommendations of the conciliation board" for revocable check-off.

"The union desires to establish union-management relations in the Stelco plants on a constructive basis. This turn for the better can be made possible only by a complete

change of policy on the part of the company. If Stelco were to adopt the union shop, without reservation or qualification, it would go far towards convincing union members that a new era of co-operation and progress is about to begin. In view of past and present experience, the very least the Union could accept in Stelco plants is the Rand formula.

"The Rand formula, with variations, has recently received further recognition. It has been accepted by the International Nickel Company and the International Union of Mine, Mill and Smelter Workers for operations of that company at Sudbury and Port Colborne, after a Board of Conciliation headed by Mr. Justice Roach. It also appears in three agreements lately concluded between the United Steelworkers of America and the Ontario Malleable Iron Co., Oshawa, Fittings Limited, also of Oshawa, and the Grinnell Company of Canada, Toronto.

"In these four instances the principle of the Rand formula was adopted without penalty clauses. No doubt such clauses were considered unnecessary because of the proven responsibility of the unions concerned.

"Since the Ford settlement, a number of other companies in the Windsor area have signed agreements with the United Automobile Workers of America embodying the Rand formula.

"The deduction of union dues by the employer does not, of itself, constitute union security; in conjunction with other provisions, it is one aspect of union security. It is a significant gesture of good-will by a company towards the union. It is also a convenience for the union in that it relieves union stewards of their time-consuming task of collecting dues from individuals."

MR. PAT CONROY

During Mr. Conroy's appearance before the committee he was asked why there was any need for compulsory union membership such as resulted under a union shop. He replied that "a man who refuses to join a union and pay dues is pretty much the same as a man refusing to pay his taxes. He gets the benefit of all the community services and protection. In an industry wage increases apply to all whether they are union members or not. Those benefits apply to every employee regardless of whether or not he is in the union or out of it. We think that the man who is getting the benefit should also pay a share of the load to carry those benefits; and, despite the bogey attached to unions, as a general proposition they are not very prosperous corporations, they take a lot of money to administer, their service has to go on twenty-four hours a day."

Furthermore, he said, in order to establish the best co-operation between the employees and the employer it was imperative that a contract was not qualified by a minority of employees willing to set aside the provisions of the contract itself. "I would say that if the employees on the one hand and the employers on the other are going to do business in a businesslike way then the union that speaks for the employee must, to ensure that businesslike relationship, be able to speak for all the men employed in the plant and affected by the company."

Mr. Conroy said that he regarded the Rand formula as an instrument "which might be successful in a given set of circumstances and might not be successful in others. I would say that in the Ford case so far as the history of that development has come to my knowledge, it has been a distinct help to both the employer and the union; at least, the reports I have received since the Rand formula came into being indicate that the relationship between the Ford Motor Company and the union has never been better than it is since the Rand formula went into effect. My personal opinion of the Rand formula on general principles, while I say it has done apparently a very good job at Windsor, is that in some respects I think that penalties applied against labour are not balanced in relation to the responsibilities of labour; but where it can be fitted into a given situation it is probably first class as a mechanism for establishing good relations. Going on to the history of Windsor, it seems to have worked out all right there."

MR. H. S. HILTON

Opposition to any form of union security in so far as Stelco was concerned was voiced by Mr. Hilton, the company's president. He said that the union argument that union security makes for improved employer-employee relations was not borne out by the experience of the steel companies which have conceded the union this demand. "As a matter of fact", he claimed, "the companies have had the reverse of this experience."

Furthermore, he said, "we maintain our right to hire and retain in our employ any law-abiding resident of Canada who performs his duties satisfactorily. We do not admit the principle that a man should be taxed to secure and hold a job unless he himself so elects. We have a very large number of employees who are not union members. The sentiment of many of them may accurately be described as strongly opposed to the United Steelworkers and their policies. We believe that a union will be supported to the extent that it merits support; that, if it merits support, there would

be no reluctance to pay union dues, and the check-off would be unnecessary. We believe our employees should not be obligated to support any union or organization, but should be free to do so if and when they so desire. The fact that other companies producing basic steel in Canada had granted measures of union security to the United Steelworkers did not prevent strikes during wartime and union security has not prevented numerous work stoppages in other industries."

When interrogated on his opposition to the granting of a revocable check-off, which it was claimed cost the company very little to carry out, Mr. Hilton said that one objection was that the concession was always followed in the following year by a demand for something more: "It all leads up to a closed shop, which I do not approve of either." Another objection was that although there was no formal compulsion involved in the revocable check-off, "there is usually a certain amount of undercurrent of pressure. The fellow who does not sign a ticket has plenty of pressure on him."

The institution of the Rand formula in the Hamilton works would foment acute disturbances by the employees "who would be expected to pay money for something they didn't want," Mr. Hilton claimed. "Much has been said in the testimony about the Rand formula and the union's recent proposal for settlement demands that this be included as one of the terms of settlement of the present strike. This so-called formula, first applied in settlement of the Ford strike, stipulates, in part, that every employee of the company must contribute monthly dues to the union, whether they belong to the union or not, as a condition of employment. In plain English, this means a tax of \$18.00 per year, or possibly more in the future, shall be assessed upon every employee, collected by the company, and turned over to the union in monthly instalments for the privilege of earning a living by working at Hamilton Works. The formula provides specifically that it must be collected from every employee eligible to join the union, whether he wishes to belong to it or not, or whether he wants to pay this tax or not. He either pays or the company must fire him, no matter how industrious, conscientious or efficient he may be. This portion of the Rand formula infringes the civil right of employees to pay toward the support of an organization or not as they see fit."

MR. GORDON MACMILLAN

Little extra cost was experienced by the Algoma Steel Corporation in implementing the revocable check-off, Mr. MacMillan stated. He

characterized it as being merely "another column on the books". He said there was no problem in carrying on the check-off because of the company's very full union membership but that he thought the problem at Stelco differed with the divided situation as between union and non-union employees.

The check-off clause in the Algoma contract reads:

The company agrees to continue the practice of deducting union dues on a voluntary basis and upon receipt of signed authorizations from new employees or those not now members of the union, agrees to deduct monthly from the earnings of such employees, the regular union membership dues and to remit regularly each month the full amount of dues so collected to the financial secretary of the union. Having signed an authorization no employee shall be entitled to cancel the same except on giving sixty (60) days notice in writing to the union.

Mr. C. ANSON

The views of management on union security were further expanded by Mr. Anson who said that "in accordance with the Trade Union Act of Nova Scotia his company has been collecting dues for the union by means of the check-off." This was introduced at Dosco in 1937 and has continued up to the present. The management, he stated, fully recognizes the right of its employees to belong to a union of their choice and continues, as in the past, to enlist the co-operation of the union in solving its problems and in striving for better and still better employer-employee relations.

"However, the management does not subscribe as to the principles of the union shop suggested by the union. The management believes that every employee should have assured to him absolute independence of thought and action in matters purely personal to himself. Every person now in the employ of the company entered its service enjoying the unrestricted right, so far as the company is concerned, of associating himself with a union or not, as seemed best to him, and of ceasing to be a member of such a body when, in his judgment, it was in his interest to do so. The company then had, and now has, no intention of interfering with its employees in their exercise of this right.

"It is our belief that if the company, by agreement with any union, commits itself to the proposition that it will discharge from its service any member of a union who, for reasons which he considers sound, elects to disassociate himself from the union, then the company is lending itself to a coercive and intimidatory policy which is entirely at variance with the essential principle of the democratic way of life which assures to each individual citizen

unfettered liberty of action in purely personal matters.

"We believe that the union shop proposed offends against the primary principle of individual liberty inherent in democracy. It is our view that, if a union gives useful service to its members, and this one may well do so, it will have no difficulty in securing and retaining a membership who will contribute dues proportionate to the benefits received from its activities, and we approve in principle of such associations. The membership in such a union voluntarily sought and willingly continued by individual workers should make for improved relations with employees and a finer and more useful concept of the mutual obligations which are involved, but we cannot believe that the same results will follow in the case where the employee who has justifiably lost faith in his union or its directors is compelled to continue as a member of it and to contribute to its activities or lose his right to work.

"And now, a union which commands the respect and enjoys the confidence of its members does not require anything else to build itself into a strong entity. In Great Britain, where perhaps it will be granted that unions have grown far stronger than in any other country, those unions have not needed the closed shop and the check-off, they have reached that point by wise leadership, interest on the part of members in union affairs, instilling pride of craft in the members, and by enabling employer and public, generally speaking, to look upon them as bodies who live up to their obligations.

"The management of the Sydney steel plant has already suggested to the commission now sitting on the steel dispute that the findings of that commission should contain some recommendation to bind the union to fulfill the obligations of any contract it signs and make mandatory the imposition of penalties for the breaking of such contract. The application of penalties should not be left to the discretion of either management or union. They should be mandatory.

"Several ways of attaining this end might well be suggested, such as:—

- (a) The stoppage of the check-off for union dues for the balance of any contract in the event of that contract being broken by the union or by any of its members.
- (b) The imposition of fines on members of the union taking part in any stoppage of work or slowdown in violation of the contract. The automatic discharge from employment without recourse of any employee taking part in stoppage of

work or slowdown in violation of the contract.

- (c) The requirement of the union to be incorporated so that it can be brought under the jurisdiction of the courts and held liable for damages arising out of a violation of the contract.

and perhaps:

- (d) The loss of seniority rights of any employee taking part in the strike or slowdown in violation of the contract.

or perhaps:

- (e) Loss of vacation privileges which he might otherwise enjoy for taking part in a strike or slowdown in violation of the contract."

MR. L. W. BROCKINGTON

In his unsuccessful attempt to effect a settlement in the steel dispute, Mr. Brockington proposed that the matter of union security at Stelco be resolved by a secret vote of all employees supervised by the Dominion Department of Labour on the question of irrevocable check-off of dues from union members during the bargaining period. In regard to Algoma and Dosco he proposed submitting the form of union security to arbitration.

Vacations with Pay

The original demand of the union in regard to vacations with pay was that the three companies grant two weeks' vacations with pay for each individual. This was subsequently modified to a demand for one week's vacation with pay for employees with more than one year's service with their respective company, two weeks for employees with five years of service and three weeks for employees with twenty-five years. These demands met with varied response on the part of the companies.

MR. C. H. MILLARD

The views of the steel union concerning the need for vacations were outlined to the Committee by Mr. Millard. He stated that, "workers who have toiled long hours for six years and more to provide the materials of war are entitled to more consideration than they have been receiving. There has never been any justification for the denial of vacations; indeed, they have always been in the best interests of the nation. The partial recognition recently given the workers' rights through legislation in no way invalidates their claim to equality of treatment with other groups, more fortunate but certainly no more deserving.

"Absenteeism could be reduced considerably by the establishment of adequate vacation plans. Workers who, after labouring long hours for many months, are denied a rest period sufficient to rebuild their wasted energies become worn out and indifferent. Their morale falls to a low ebb and production schedules suffer.

"All workers in heavy, arduous, health-impairing jobs are entitled to at least two weeks' annual vacation with pay. We would go farther and claim that in the smelters, steel mills, foundries and mines, two weeks' vacation every six months is the minimum required to enable a worker to give efficient production day in and day out.

"Health records and insurance statistics in regard to these industries give proof of our claim. Rare indeed is the man who can perform a normal day's work when he reaches pensionable age. Usually he is either out of work altogether or working at some poorly-paid job awaiting his retirement. Such a situation is not in keeping with present day trends toward more equitable treatment of all groups in society.

"But there is another side to the question.

"Magazines and newspapers are carrying a variety of advertisements extolling Canada as a vacation paradise. Much of this advertising is aimed at the foreign trade; the rest of it concerns only those whose bankbooks and leisure time permit them to visit holiday resorts for several weeks.

"Few, if any, steelworkers have either the time or the money to enjoy such vacations. They will remain at home in the steel towns while others more privileged enjoy the pleasures Canada offers to vacationists.

"Canada's steelworkers want a real annual vacation, too. They want to enjoy the country they have helped to build, to ride in the automobiles made of the steel they have produced, to travel along the railway tracks forged in their smoky shops.

"At present Algoma gives its employees one week's vacation for one full year of employment and two weeks' vacation after fifteen years' employment. Stelco gives two weeks' vacation after twenty-five years' service, in addition to one week after one year. Dosco allows one week after one year's employment.

"Many Canadians make their living out of the tourist trade. Authorities inform us that a number of veterans are hoping to earn their livelihood at this business. It is an enterprise that has opened up thousands of square miles of Canadian territory which would otherwise still be uninhabited.

"Canadian steelworkers should have the opportunity of turning over part of their earn-

ings to these other Canadians. For in the process they would not only be enjoying their own country in the company of their families, but they would be assisting their fellow countrymen to gain a livelihood.

"For these reasons Canadian steelworkers believe it is time for the introduction in the Canadian steel industry for two weeks' annual vacation with pay after five years' service and three weeks' annual vacation with pay after twenty-five years' service."

Employers' Attitude

During his early testimony Mr. Hilton stated his company was prepared to concede the union its original demand for two weeks' vacation although the increased cost accruing to the company in hiring substitutes during vacation periods to maintain full production was four per cent of the pay-roll.

Mr. Anson opposed the vacation demand on the basis that the financial deficit that resulted from the company's operations prevented it granting a condition which would further add to that loss.

"On the question of vacations with pay, the management of the Sydney steel plant is not opposed to the principle of vacations with pay. It now gives its employees one week's vacation with pay, providing they have lived up to the agreement with the union covering same, which requires certain attendance at work to qualify for such vacation.

"It is presently costing the company \$112,000 per year to pay for the one week's vacation now enjoyed by its employees.

"The present request of the union at the Sydney steel plant is for two weeks' vacation with pay for each individual. To this the company does not subscribe. If any industry could afford to grant more than one week's vacation with pay, it is our contention that only employees of long standing employment with the company should be entitled to same.

"However, the management is obliged at this time to oppose the granting of additional vacations, even to such employees. To do so would add considerably to the production costs and, inasmuch as the Sydney steel plant is now operating at a loss, it fails to see how anybody can recommend anything which will add to that loss.

MR. BROCKINGTON

The proposal proffered by Mr. Brockington in his attempted settlement was that the companies grant the union's new vacation demands for one week's vacation with pay after one year's service, two weeks after five years' service, and three weeks after twenty-five years' service. He also proposed the

substitution of pay for holidays over one week if production efficiency made it desirable and the paying of time and one half for statutory holidays if worked.

Industrial Councils

The establishment of tri-partite industrial councils composed of representatives of labour, management and the public possessing wide jurisdiction over decisive industrial matters, was extensively endorsed by labour representatives as a constructive step in fashioning a formula for the prevention of labour disputes.

This contention was disputed by Mr. Hilton who said that the management of his company failed to see how such a council could make a worth-while contribution to the iron and steel industry and to industry in Canada generally.

MR. C. M. MILLARD

Mr. Millard described the council proposed by the union for the iron and steel industry as being patterned upon the international committees, established by the International Labour Organization in certain basic industries such as iron and steel, mining and transportation.¹

"Those committees are being established for the purpose of finding out what are the world's markets, and trying to apportion the world's business in iron and steel so that it can be operated on an equitable and some kind of planned basis throughout the world.

"It has been our hope that in Canada we could have a corresponding national committee made up of representatives of labour, the appropriate union or unions—in this case there is only one union operating in basic iron and steel,—and the employers representative of the various divisions of the industry such as primary iron and steel making, fabricating and foundries, and representatives of the public and government in order that we could sit down and arrange the industry in such a way that it could operate efficiently to take care of our export and domestic needs. We have been attempting for some years, through direct negotiations with the government, to have such a committee established. We have through the Canadian Congress of Labour since 1940 been attempting to have such a committee or council established in the steel industry. But so far our attempts in this regard have been unsuccessful. Under the regulations under which we operated during the war there was opportunity for designation

¹L.G., June, 1946, p. 729.

of certain industries as national employers; and we have attempted on several occasions through the Department of Labour and by direct application to the War Labour Board, and subsequent to the steel strike in 1943, to be so designated for the steel industry in Canada. I say that all our attempts in that regard have been fruitless up to the present time. We have no hard and fast rules or ideas regarding such a council. We believe that such a council should be established and that it should work out the manner in which it can function in the best public interest in Canada.

"We have in mind by way of a national council one that would be representative of the employees in industry, of the employers in industry and representatives of the public or government so that the public interest can be ascertained and safeguarded, and also so that the industry can develop on some kind of a planned basis having regard of what our domestic requirements are as well as for our export trade. As to what the exact power or authority of the council would be I think, as I said before, that should be determined after the council was established, and the production and importance of the industry would be considered. They would have to do a certain amount of planning and regulation of the industry such as was done during the war to meet the national emergency; in other words, they should have some control over the placement of orders and in the development of the industry generally. I would say here that I regard with some misgiving that we are developing reserves of iron ore in this country and shipping it abroad when it seems to me it might be processed at least to some extent in this country and provide a much better industry than we now have. This country now purchases from 20 to 25 per cent of steel from the United States and other places, and while there may be special types of steel, and special shapes and sizes and so on, nevertheless it seems to me more could be done in Canada by way of the development of the steel industry; and I think that should be undertaken under the auspices or control of some kind of an industrial council such as I have indicated."

MR. PAT CONROY

Mr. Conroy recommended the constitution of such councils for each industry as a helpful means in "laying a foundation for the prevention of industrial disputes in the future. These councils", he said in his recommendation "would have jurisdiction over every problem of each industry including profits, prices, production and wages." He held that they

should function "under some form of social control through the government to maintain full production and consumption and to secure a proper balance of profits, prices and wages for continuous maximum production and consumption..."

"During the war our congress said to the government, 'now is the time to lay a foundation for industrial peace in the years ahead.' We asked the government of the day to sponsor a program of industrial councils. In each industry the council would be formed on a tripartite basis of representatives of industry, labour and the public. These industrial councils would be, in effect, boards of management in their respective industries and would have the right to discuss all matters relative to maintaining peace in each industry. In short, the jurisdiction of each council would be all-embracing, and take in production, wages, practices, and anything and everything that would have to do with the welfare of the industry and in developing and maintaining good relationships."

The realization of industrial peace and the achievement of full employment could not be attained by employers alone, Mr. Conroy claimed, but necessitated granting to labour a status commensurate with its investment. "Labour has to be accorded a status representing one-half of the investment in the enterprise. The surrender of the right to strike and the assumption of a full measure of responsibility in the economy's operation could be realized only if the country extended to labour a status of equality with industry merited by its investment." He felt that the proposed industrial councils provided labour with the means of making a contribution to the establishment of good industrial relations. "First of all, it will bring more parties together, a thing that is very sorely needed. And I think there is a very great need of getting people together, and in that way it can play a very important part, a getting together on public forums such as this. The present basis of contribution seems to be for both parties to try to make peace with a sling shot in each pocket and then they proceed to fire rocks at one another to maintain their good relations. I say you cannot agree with a man you do not see. You have got to know him. You have got to sit around the same table and find out what is going on in his mind, to find out his problems and let him find out your problems; and when they are found out on both sides with development of mutual respect, both employers and in the unions, a sure foundation will I think be laid for trust instead of suspicion by the elimination of the agitative status of the unions

on the one hand and the employer on the other. Well, here at the present time, the contribution to peace by the employer for instance, will be that he will say that the union leader is a communist. And your employer is quite surprised, in fact many times amazed, when you say to him, 'do you know what this union leader says about you?' 'No', he says. He says, 'you are a fascist'. There are problems on both sides. First of all you bring both parties together in an atmosphere of mutual respect. Secondly, you delve into the other parts of industry, and on the theory that labour is at least equal to capital—because investment in labour is at least equal to money invested—the problems are mutual.

"The outcome of a badly developed industry or a good developed industry is going to have an impact on both parties. I think that all the problems of industry are the problems of both parties. There cannot be reservations on either side. And in our economy as soon as we bring commodities into being they are for only one purpose, to consume them; because there is no other purpose in making shoes, washing machines, or anything else, they must be consumed. We say that industrial councils planning the production in industry—if we must have profits let us relate profits to wages in their proper perspective, get a balance in the industry; and, having done that by popular, and social control or the government—have a supervisory voice over these councils in the interest of the public and lay a foundation for maximum production and maximum consumption."

Mr. Conroy described the proposed councils as closely resembling in principle the working parties constituted in several British industries.¹ These working parties, composed essentially of labour and management are conducting investigations into the methods of organization, production and distribution in their respective industries in order to report what measures should be taken to improve the stability of operations and increase efficiency generally.

MR. H. S. HILTON

The claims of labour regarding the contributions that the establishment of such a committee would make in the iron and steel industry were contested by Mr. Hilton.

"It is difficult to see," he said, "wherein such a committee is necessary or even likely to further these admittedly desirable ends to any extent." He held that the fields of activity of

the proposed councils were already amply taken care of by departments of the Provincial and Federal governments.

"If such a Committee as that suggested is to be established under government auspices in the steel industry, where will the example thus established stop? It is important, in making a first step, to attempt to foresee what the succeeding steps which will unavoidably follow will be. Will we have such committees for all industries in Canada? If so, who will be responsible for their co-ordination and relationship? Where would suitable and competent representatives of the public be found to sit on all these committees? The cost of administration, etc., would be substantial and would constitute another burden on the taxpayer."

MR. JUSTICE ROACH

In response to a request for some suggestions or ideas as to the improvement of the machinery presently operating for the settlement of labour disputes Mr. Justice W. D. Roach suggested the establishment of industrial councils. He said he thought such councils "possessed considerable merit." He testified that during his discussions with the union and the management of the steel companies he had received some favourable reaction from both sides on this question.

"With the greatest humility, gentlemen, and again stressing the fact that I am not an expert, I suggest this for the consideration of the committee that there should be set up a steel industrial council of five men, one nominated by labour, one nominated by the industry and three chosen from the public as representatives of the public; one from the Maritimes, one from Quebec and one from Ontario.

"The three public men should not, in any way, be associated with the industry, or in any way associated with the union, and they should be divorced from politics. They should be men chosen from the public who are outstanding men, whose judgment will find favour with the public, and who will be regarded by the public as the ultimate of unbiased judgment."

Justice Roach held the power of such a council would lie, not in any decisive power, but, in its ability to submit a dispute to the "bar of public opinion". The council would be an unbiased body capable of conducting an investigation into an impending dispute and submitting the results to the management, the union, to every employee and to the public, before a stalemate has occurred which

¹L.G. June 1946, pp. 721-32.

could foment strike action. "I suggest that no company and no union can stand up against adverse public opinion."

National Standards

Opposition was registered by the management witnesses to the demand of the steel union, that the industry be designated as a national employer and national labour standards established for it. The company representatives disputed the union claim that a similarity of operations between the three companies, which during the war was subject to national control of production, priorities and prices, demanded national recognition in the interests of the nation.

They claimed that different operating costs and variations in the type of products produced would make such an arrangement unsuccessful.

MR. C. H. MILLARD

In outlining the basis for the union demand, Mr. Millard stated that during the war years, and since the end of the war, steel has been recognized as a national industry for all practical purposes except in labour relations.

"For example, the industry was subject to national control of production, priorities and prices. It was obvious that an industry so essential to the war effort, an industry without which the unprecedented growth of manufacturing generally would not have been possible, deserved the fullest national recognition, assistance and control.

"Unfortunately, in the field of labour relations and collective bargaining, the industry was dealt with on a local or regional basis, resulting in a chaotic patchwork system of wage rates and working conditions which caused endless friction and misunderstanding among the workers employed in the industry, their employers and Government agencies.

"Although mining and shipbuilding had national recognition for collective bargaining purposes, workers in steel were obliged to seek redress before provincial tribunals. Such was Government policy, and also the policy of the companies, except for a few days in 1943, when a spontaneous strike closed the plants at Sydney, Sault Ste. Marie and Trenton. Then, for a few days, and a few days only, until the men were persuaded to return to work, the industry and its problems were dealt with as they ought to be dealt with, on a national basis.

"Ever since December, 1941, the Union has asked for national recognition, so that collective bargaining and other proceedings in labour

relations could be conducted on an orderly national basis and not in piecemeal fashion.

"The steelworkers' claim for national wage standards in the industry is reasonable and well-founded. It would be unrealistic and illogical for the Wartime Prices and Trade Board to discriminate between different companies in the matter of price increases. It is equally unjustifiable to discriminate between their workers in the matter of wage standards."

MR. H. S. HILTON

"This policy of national recognition was without any sound reason", Mr. Hilton contended. "The three primary Canadian producers are widely separated geographically; the products produced by them differ considerably; raw materials, which have an important effect on the cost of steel production, differ in quality and in cost of assembly; availability to points of consumption and cost of delivery to such points also vary; equipment in use differs in efficiency as well. Without the slightest desire to make comparisons which might be construed as unfavourable to the other two companies, it is nevertheless a fact that the employees of our company enjoy advantages, already enumerated, not available to the employees of the other two companies. Furthermore, our company has a history, also previously stated, of consistently paying higher wages than they do. It is our firm conviction that the destiny of our employees has nothing to gain by being linked with the employees of the other two companies involved in this present steel strike.

"We have stated that our employees have been consistently better off than those of the other two companies, and there is no reason why the destiny of our employees should be linked with that of employees of any other company. There is no reason why they should be limited to conditions determined by local situations prevailing elsewhere in the country and determined by the fortunes of other companies. Our Hamilton situation differs from that of the other two companies in a most important respect—namely, that a very large proportion of our employees are out of sympathy with this strike and are in our plant working in conformity with the Government's order in council. This condition alone, which must be taken into consideration in any strike settlement, is sufficient to put the Hamilton works' situation in a different category from the others.

"I am firmly of the opinion that any settlement reached by the Steel Company of Canada should be based upon its own circumstances and conditions and that any attempt to reach a settlement dictated or affected by

conditions prevailing elsewhere will only result in further confusing a situation which is already sufficiently difficult."

Neither Mr. MacMillan nor Mr. Anson expanded the views voiced by Mr. Hilton on this aspect of the union's policy. Their statements, however, reiterated Mr. Hilton's claim that the many phases of dissimilarity which existed in the organization and operations of the three steel companies precluded success of any such plan.

MR. PAT CONROY

Mr. Conroy stated that "so far as the needs of the nation are concerned, the function of

industry should be dedicated to producing the maximum of the people's requirements. To that end—since production serves in no sense, no matter what the political theory may be, unless there is an end to the production and unless the end to production is consumption—I would say to maintain full employment, continuous production and consumption, we must have mechanism in each industry and overall mechanism on top of it to ensure that breakdowns may be avoided, for equating the consuming power of those who have it and need it with the money that it produced in the sum total of all our individual industries."

Report to House of Commons

Following the completion of the taking of evidence the committee met in camera to compose the report which it presented to the House of Commons. Concurrence in the report was subsequently recorded by a vote of 129 to 28.

The text of the recommendations follows: "Your Committee, in the light of the evidence heard makes the following recommendations:

1. (a) That the proposed Dominion-Provincial Labour Conference be called at the earliest possible moment to draft a labour code within the limits of the Canadian constitution and with a view to establishing machinery for the prevention of dislocations in industry;
 - (b) That in the interval much closer contact be established between the Wartime Prices and Trade Board and the Regional and National War Labour Boards.
 - (c) That matters coming before the Regional and National War Labour Boards be handled expeditiously.
2. Your Committee is convinced that continued price control is only possible with a reasonable measure of wage control.

3. Your Committee recommends that a measure of union security should follow certification.

4. Law being the basis of our society, your Committee condemns:—

- (a) the policy adopted by some unions and some employers of disregarding the legal machinery provided for adjusting wages and settling disputes;
- (b) breaches of the Law of Canada by the use of physical force or otherwise either by employer or Union.

5. Your Committee recommends that the law of picketing be studied with a view to its modernization and clarification and for the purpose of making it more effective for the protection of the rights of all elements in the community.

6. Your Committee recommends that the Minister of Labour may, at the request of either party to an industrial dispute, and if he deems fit, either before or after a strike is in progress, direct that a strike vote be taken under Government supervision, to determine the wishes of the men affected as to whether a strike will take place or otherwise.

7. Your Committee recommends that the controllers appointed by Order in Council P.C. 2901 be instructed to implement the terms of such Order with such modifications as the Government may determine."

Appendix I—Statement of Mr. C. A. L. Murchison, K.C., on Wage Stabilization¹

1. Wage stabilization as a part of the overall effort to hold price ceilings against the threat of inflation first became mandatory on November 15, 1941, with the coming into effect on that date of the Wartime Wages and Cost of Living Bonus Order, P.C. 8253.

The following appendices contain the factual statements made by the representatives of the Department of Labour, outlining the established machinery for handling industrial disputes.

Order in Council P.C. 8253 provided that an employer's wage scale established as of that date was to be stabilized. Thereafter, he could make no wage increase in a single rate or in the maximum of a range of wage rates except upon application to and receipt of authority from a war labour board.

Such boards were empowered to prescribe wage increases only when they found an employer's existing wage rates to be low as compared with rates generally prevailing for the same or substantially similar occupations

in the locality or in a locality which in the opinion of the board was comparable.

The Order also provided that cost of living bonuses would be paid according to a formula therein laid down, which bonuses would be increased or decreased as might be directed by general orders of the National War Labour Board in accordance with the rise or fall of the Cost of Living Index for succeeding months above or below the index number for October, 1941 (114.6). Actually only two such general orders were issued, one calling for the commencement of payment of a mandatory cost of living bonus or increase in existing bonus as from August 15, 1942, and one calling for an upward adjustment in such bonuses as from November 15, 1943. The total Cost of Living Bonus so ordered was ninety-five cents per week or 3.8 per cent of the wage rate whichever might be applicable to particular employees under the formula.

It will be remembered that the cost of living bonus principle to meet increases in living costs as reflected by changes in the Cost of Living Index of the Dominion Bureau of Statistics was first introduced by Order in Council P.C. 7440, of December 16, 1940. This Order in Council was not mandatory, however, it being merely a recommendation to Boards of Conciliation established under the Industrial Disputes Investigation Act.

The effect of this earlier Order in Council had been that some groups of workers were in receipt of cost of living bonuses based on the rise in the Cost of Living Index number from August, 1939, just before the start of the war, which was being paid to them in lieu of wage increases, while other groups of workers had received wage increases since the outbreak of hostilities and so received lesser amounts of cost of living bonus. To equalize such situations, war labour boards were empowered by Order in Council, P.C. 8253, to approve payment of cost of living bonuses, on application, based on the rise from the Cost of Living Index of an earlier date than that for October, 1941, but not in any event earlier from the index for the month subsequent to August 1939, in which the employees concerned had last received a general wage increase. The theory being of course that an employee's increased compensation whether from an upward adjustment in his actual wage rate or by way of cost of living bonus would reflect any increase in living costs during the war period.

The Wartime Wages and Cost of Living Bonus Order, P.C. 8253, as first introduced, applied only to employers having fifty or more employees but by Order in Council, P.C. 9514, of December 5, 1941, it was made to apply to all employers in Canada except those of the Government of Canada or of any province or municipality. Later Crown Companies or agencies of the Government were brought within the scope of the Order. It did not apply to agriculture, horticulture, fishing, hunting or trapping, nor to hospitals, religious, charitable or educational institutions operated on a non-profit basis.

To administer Order in Council P.C. 8253, a National War Labour Board was established with Regional War Labour Boards in each Province. Labour and industry were equally represented in the membership of all these boards and generally the Chairman of these boards were the Ministers of Labour of the respective provinces.

At this point it should be explained that Order in Council, P.C. 8253, and the Orders which succeeded it, only apply to employees who were not "above the rank of foreman or comparable rank" or who receive less than a certain designated wage or salary. Employees above the rank of foreman are subject to The Wartime Salaries Order, administered by the Department of National Revenue.

2. As the result of experience gained in the administration of the Wartime Wages and Cost of Living Bonus Order, P.C. 8253, the National War Labour Board found that certain of its clauses required clarification.

On the Board's recommendation, and to facilitate administration, the original Order was, therefore, replaced by the Wartime Wages Control Order, P.C. 5963, of July 10, 1942, which became effective by publication in the *Canada Gazette* on July 14, 1942. No change was made in the basic circumstances under which War Labour Boards were empowered to approve increases in wage rates, nor in the basic conditions concerning cost of living bonuses. Definitions were included as to what constituted a basic scale of wage rates and on certain other pertinent matters upon which the original Order in Council had been silent.

One of the matters clarified was as to the authority which an employer would have to adjust wage rates for any particular classification within the limits of the range of rates for such job or position. Order in Council, P.C. 5963, provided, as did its predecessor Order, that its provisions would supersede any inconsistent provisions of any Dominion or Provincial Law, Order or Regulations.

There was no appeal provision, but the by-laws of the National War Labour Board required that when the membership of a Regional Board were not unanimous in any decision, such application should be referred to the National Board for guidance before a Finding and Direction was issued to the parties, but this did not give authority to the National Board to vary or rescind Regional Boards' decisions so referred to it.

In February, 1943, the composition of the National War Labour Board was changed—the Board being reduced to three Members, one of whom represented employers, another, employees the third Member being a Chairman selected from the judiciary. The constitution of the Regional Boards remained the same as formerly.

Early in 1943 it became apparent that there were inequalities, real or fancied, in the amounts of cost of living bonus paid by different employers often within the same industry. This, of course, came about through the provision that when a general increase had taken place since August, 1939, calculation of cost of living bonus could only be based on the rise in the cost of living index above the index number for the month in which the general wage increase had been granted. To give the Boards power to equalize this type of situation, Order in Council, P.C. 2370, was passed on March 23, 1943, under which a War Labour Board could use an earlier index number than that for the month in which a general increase had been granted when they found such a course warranted in deciding on applications involving cost of living bonuses within an industry. In other words, the Boards were given power to award a full cost of living bonus when considered justifiable.

On March 23, 1943, was also passed Order in Council, P.C. 2320, which provided for a right of appeal which might be carried by interested

parties to the National War Labour Board from a Finding and Direction of a Regional Board. Since that time there have been 681 such appeals.

The National War Labour Board, which had been reconstituted as mentioned under authority of Order in Council, P.C. 1141, of February 11, 1943, held public hearings as therein authorized regarding industrial relations in Canada. Many briefs were presented from organizations, representative of employees, employers and the public generally. As a result of these representations and its conclusions thereon, the Board made certain recommendations in August, 1943, by way of Majority and Minority Reports.

These recommendations, or many of them, and in particular their suggestion that cost of living bonuses should be incorporated into wage rates were made effective by the Wartime Wages Control Order, 1943, P.C. 9384, which on December 9, 1943, replaced Order in Council, P.C. 5963.

3. The Wartime Wages Control Order, 1943, P.C. 9384, required employers to incorporate previous authorized cost of living bonuses into basic wage rates from February 15, 1944, and that type of employee compensation by employers subject to the Order thereafter disappeared.

The powers of a War Labour Board relating to the conditions upon which wage increases could be prescribed were materially changed, it being now provided that a Board could authorize or direct an employer to increase a single wage rate or the rates within a range only if and to the extent that the Board found that such increased rate or range was necessary to rectify a "gross inequality or gross injustice".

In addition to appeals from decisions of Regional Boards by the interested parties themselves, the new Order provided that the National Board should itself review all decisions made by Regional Boards and the National Board could on its own motion, after due procedure, upset a Regional Board's decision if in the opinion of the National Board, such decision was not in accordance with the purposes or provisions of the Order or was otherwise inconsistent. Up to June 30, 1946, 71,858 decisions of Regional Boards have been examined, of these 5,079 have been placed on review by the National Board but after investigation only 442 such decisions have been varied or rescinded.

There have been a number of amendments from time to time to Order in Council, P.C. 9384, found necessary in the light of experience in administering that Order. It was not, however, until Order in Council, P.C. 348, was passed that the powers of the Boards as to the circumstances under which wage increases might be approved were materially altered.

Order in Council, P.C. 348, which came into force on February 15 of this year, abandoned the "gross inequality or gross injustice" formula and instead gave the Boards power to authorize or direct an employer to increase a single rate or the rates of a range to the extent that the Board found such rates low in comparison with the rate or rates generally prevailing for the same or comparable occupational classifications in the same locality or, if no such occupational classifications existed there, then in some other locality which in the opinion of the Board would

be comparable. It will be noted that this is a return to the principle which had been in effect from November 15, 1941, to December 9, 1943, under the then governing Wages Orders.

In addition to being empowered to authorize or direct increases found low by comparison War Labour Boards, under Order in Council, P.C. 348, might authorize an employer to vary a single rate or the rates of a range "on such other basis and to the extent as in the opinion of the Board is reasonable in the circumstances and consistent with the maintenance of existing prices of the goods and services which the employer sells".

In administering the Order on those applications made under the alternative power as quoted in the paragraph last above, the various War Labour Boards considered that a responsibility devolved upon them to ascertain that the added labour costs resulting from any wage increase so authorized would not be used as an argument, in applying for or in making price increases.

The Wartime Wages Control Order, P.C. 9384, was again amended on June 20, 1946, by Order

in Council, P.C. 2432. The important change which the amending Order brought in was to rescind these powers as given under Order in Council, P.C. 348, and under which the War Labour Boards had operated from February 15 to June 20, last.

The new provision under Order in Council, P.C. 2432, now empowers War Labour Boards to authorize or direct an employer to increase a single rate or the rates of a range if and to the extent that the Board finds that such increased rate or range is "just and reasonable" and is consistent with and will give effect to the purposes of the Order having regard to all the circumstances deemed by the Board in its discretion to be material.

It should be realized that War Labour Boards are now given a much wider discretion in the matter of directing wage increases, than they have previously had. That discretion is, however, governed to some extent by the paramount principle of maintaining stability in prices. The Order is now broad enough to enable Boards to deal with every known type of case involving wage rates.

Appendix II—Statement of Mr. A. H. Brown on Wartime Labour Relations Regulations

Background of the Regulations

Following a public inquiry into labour relations and wage conditions undertaken by the National War Labour Board in the Spring of 1943, the Board in its report following thereon made recommendations which included a recommendation for the introduction of legislation to provide for compulsory collective bargaining between employers and employees in industry.

Subsequently in November, 1943, the Minister of Labour arranged a conference at Ottawa of the Dominion and Provincial Ministers of Labour to discuss proposals for a wartime labour code to provide for compulsory collective bargaining between employers and employees in war industry and defining and prohibiting unfair labour practices on the part of employers and employees.

Those attending the conference were agreed on the general desirability of the proposals but provincial authorities were not unanimous with regard to the coverage of the proposed legislation. Some provinces favoured the view that all industry should be declared to be war industry and covered by the legislation. Others favoured the application of the legislation only to important industries engaged in war production and leaving with each province the decision as to whether or not the legislation should be extended to apply to other industries under provincial jurisdiction. Almost all provinces favoured the establishment of Provincial Boards by the Dominion in co-operation with the provincial authorities to administer the legislation so that the experience gained in wartime administration would be available in the enactment and administration of like provincial legislation in the post-war period.

Legislation was drafted after the conference, and forwarded to the provinces and to leading labour and employer organizations for critical comment and suggestion prior to the final settling of the legislation. The legislation was settled in final form after replies from the foregoing were received and was passed in February, 1944, under the title of the Wartime Labour Relations Regulations.

Scope of Legislation

The Regulations apply to employers and employees

- (a) in industries normally under Dominion jurisdiction; (Sec. 3 (1) (a))
- (b) in certain specified industries designated as war industries; Sec. 3 (1) (b) and Sec. 3 (2) and (3)
- (c) in industries under provincial jurisdiction where the province by legislation applies the Regulations to such industries. Sec. 3 (1) (c)

All provinces except Alberta, P.E.I., and Quebec passed legislation making the provisions of the Regulations applicable to employers and employees in industries under provincial jurisdiction.

Saskatchewan subsequently in the Fall of 1944 repealed its legislation bringing provincial industries within the scope of the Regulations and enacted its own collective bargaining act covering such industries.

Administration

In all provinces except the Province of Alberta and P.E.I., pursuant to individual agreements entered into between the Province and the Dominion, the Regulations as applicable to the industries specified as war industries in the Regulations are administered by a Provincial Board appointed after consultation with the Province and consisting of a chairman and representative of employers and employees. The Provincial Board also has jurisdiction with respect to provincial industries in the provinces where the Regulations have been made applicable thereto. In British Columbia, the Provincial Minister of Labour acts in place of a Provincial Board. (Sec. 36)

A National Board consisting of a Chairman, and a Vice-Chairman acting in the absence of the Chairman, and four representatives each of employer and employee administers the Regulations with respect to industries normally under Dominion jurisdiction and this Board also acts

as an Appeal Board to dispose of appeals from decisions of Provincial Boards. (Sec. 23)

These provisions for the application of the Dominion Regulations to industries under provincial jurisdiction at the instance of the province and for the establishment of provincial administrative agencies by agreement between the Dominion and the Province will no doubt be of particular interest to the Committee at a later stage in considering problems involved in labour administration arising out of divided Dominion-Provincial jurisdiction in labour matters.

I come now to the particulars of the legislation and its operation.

Certification of Bargaining Representatives (Sections 5-8)

The legislation provides an orderly procedure for the settlement of disputes between rival union organizations or between an employer and a union as to the right of a union or other labour organization to represent employees in any particular establishment for collective bargaining purposes.

A union claiming to represent the majority of employees in an employer's establishment may apply to the appropriate Board established under the legislation for certification of its bargaining representatives. The Board investigates the application, notifies the employer and all other interested unions and holds a hearing if necessary in cases where the application is contested. The Board determines whether the unit of employees which the union seeks to represent and which may comprise all or part only of the employees of an employer is an appropriate unit for collective bargaining purposes and satisfies itself either by vote or otherwise as to whether the applicant has the support of the majority of employees in the bargaining unit. If so satisfied, the Board issues a certificate which has the effect of giving to the bargaining representatives so certified the exclusive right to represent the employees comprising the bargaining unit for collective bargaining purposes.

The employees are bound by the terms of any collective agreement negotiated by these bargaining representatives.

Upon due notice given by either party, the employer and the bargaining representatives so certified are required to negotiate in good faith with one another for the purpose of completing a collective agreement.

A procedure is also provided to enable new bargaining representatives to be certified in substitution of those certified at an earlier date upon application to the Board for such purpose. (Sec. 9)

The procedure to determine representation outlined above is similar in many respects to that provided in the United States under the U.S. National Labour Relations Act.

Of course where the claim of union or employees' organization to represent employees is not questioned by the employer or another organization, it is not essential to obtain certification in order to negotiate an agreement.

Negotiation of Collective Agreement (Sections 10-14)

Following upon the certification of bargaining representatives, negotiations for an agreement may be initiated by either party on ten days' notice to the other. Either party after negotia-

tions have continued for thirty days may apply to the Board for the services of a Conciliation Officer. This request is transmitted by the Board to the Minister of Labour, who makes available the conciliation services of the Department of Labour to assist the parties in negotiations. In event of continued lack of progress by the parties, a Conciliation Board may be appointed by the Minister of Labour on the recommendation of the Conciliation Officer assigned to the negotiations. A Conciliation Board consists of a representative nominated by the union, a representative nominated by the employer and a chairman selected by the two other members or in event of their failure to agree, by the Minister of Labour. It is the duty of the Conciliation Board to endeavour to effect an agreement between the parties but in any event whether or not agreement is reached the Board is required to report its findings and recommendations to the Minister of Labour who sends a copy of the report to the parties and may give it such publicity as he sees fit.

Where wage provisions are involved in the negotiation of a collective agreement, any change in wage rates requires the approval of a War Labour Board under the Wages Control Order before the provisions of the agreement with respect to wage increase may be executed by the parties. (Sec. 10, Subsection 4)

Stoppage of work whether by way of strike or lockout is prohibited during the course of negotiations to effect an agreement and until fourteen days after the Conciliation Board reports to the Minister.

Stoppage of work with a view to obtaining a wage increase or in protest against a decision of a War Labour Board is prohibited by the Wage Control Order.

In effect these provisions bringing into operation conciliation machinery and prescribing a waiting period prior to strike action or lockout are similar to the conciliation procedures prescribed in the Dominion Industrial Disputes Investigation Act which was in effect prior to the enactment of the present Regulations and the operation of which is suspended during the period of operation of these Regulations. (Sections 10 to 14). These provisions also apply in the negotiation of renewal agreements. (Sec. 16)

Term of Agreement

Where a collective agreement has been entered into, it is not capable of cancellation by the parties, without the consent of the Board within less than a year after its effective date but after that time it may be terminated by either party on two months' notice. The purpose of this is to afford an opportunity for revision of the terms of an agreement after the same has run for a reasonable time and at the same time to ensure that an employer and a bargaining agency presently claiming to represent the employees shall not, by joint action, prevent another union having the actual majority support of the employees from obtaining proper recognition. (Section 15)

Arbitration of Disputes in Connection with Collective Agreements

All disputes between parties to a collective agreement arising out of the alleged misinterpretation or violation of the terms of a collective

agreement are required to be arbitrated in accordance with the procedure for final settlement of such disputes contained in the agreement. It is obligatory on the parties to include such a procedure in the agreement. Where this has not been done the Board is empowered to establish such procedure on application of either party to the agreement. The procedure so established becomes a part of the agreement and is binding upon the parties. (Sections 17 and 18)

Unfair Labour Practices

The Regulations also define and prohibit certain actions on the part of employees, unions, employers and employers' organizations commonly known as 'unfair labour practices'. These provisions are designed for the protection of the employer or the employee or the union as the case may be. (Sec. 19 & 20).

Prosecutions under the Regulations may be undertaken by or with the consent of the Board. (Sec. 45)

Appendix III—Statement of Mr. M. M. Maclean on Conciliation Services under the Wartime Labour Relations Regulations, P.C. 1003

Mr. Brown has explained generally the principles of P.C. 1003 and the procedures followed in implementing the Regulations upon application. I shall now give the Committee some additional information concerning the manner in which conciliation services are made available under the Regulations and under other legislation or Regulations having the force of legislation.

After a trade union or an employees' organization has been certified in accordance with the provisions of Section 5-8 of the Regulations the certified bargaining representatives may give the employer notice of their desire to enter into collective bargaining negotiations, or the employers may give such notice to the bargaining representatives. The Regulations require that the parties must bargain in good faith with each other.

When the parties have continued negotiations for a period of thirty days and an agreement has not been completed, either party may request the intervention of either the Wartime Labour Relations Board (National) or its associated provincial Boards, depending upon the jurisdiction sphere wherein the request for assistance originates. The Section of the Regulations providing for this intervention reads as follows:

"If negotiations for an agreement have continued for thirty days and either party to the negotiations believes that an agreement will not be completed in a reasonable time, it may so advise the Board indicating the difficulties encountered and may ask the Board to intervene with a view to the completion of an agreement".

Where certification proceedings have not been instituted for the reason that the employer and the trade union or employees' organization are already dealing with each other under a collective agreement, the intervention of the National Board or its associated provincial Boards may also be requested under Section 11 of the Regulations (which I have

Summary of Regulations

In summary, the Regulations provide

- (1) an orderly procedure for determining the bargaining representatives to represent the employees in an establishment for purpose of collective bargaining, for defining the bargaining unit, for change in the bargaining representatives in accordance with the wish of the majority of employees, and for the negotiation of agreements;
- (2) for compulsory collective bargaining between an employer and the certified bargaining representatives of the employees and for bargaining in good faith by both parties;
- (3) an orderly procedure for conduct of collective bargaining and conciliation measures with a view to reaching an agreement.
- (4) Compulsory Arbitration of Disputes arising out of the administration of subsisting collective agreements;
- (5) Definition and Prohibition of Unfair Labour Practices.

just read) following compliance with Section 16, as amended, which reads:

(1) "Either party to a collective agreement may, on ten clear days' notice, require the other party to enter into negotiations for the renewal of the agreement within the period of two months prior to the expiry date, and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such a renewal.

(2) Where either party to a collective agreement has required the other, pursuant to subsection one, to enter into negotiations for the renewal of the agreement, sections eleven, twelve, thirteen and fourteen shall apply to such negotiations for the renewal of the agreement as in the case of negotiations for a collective agreement."

It will thus be seen that where the parties are having difficulty in renewing or renegotiating an already existing collective agreement provision is made for conciliation assistance in the same manner as following certification of bargaining representatives.

The procedure followed in order to obtain conciliation services depends upon whether the business or undertaking affected is one which comes under the jurisdiction of the National Board or its provincial Boards. In five provinces; namely, British Columbia, Manitoba, Ontario, New Brunswick and Nova Scotia, the Regulations have been applied to businesses and undertakings ordinarily within provincial jurisdiction. In the Provinces of Saskatchewan and Quebec, the Regulations apply only to businesses and undertakings enumerated under Schedule A of the Regulations.

When an application is made for assistance in negotiating a collective agreement in any of the provinces I have mentioned, it is made through the provincial Board established by agreement between the Dominion and the various provinces. Upon receipt of the request for intervention or assistance, the Board con-

cerned makes an inquiry to ascertain if the provisions of the Regulations regarding negotiations between the parties have been complied with. This inquiry is not extensive. Generally the Board must ascertain:

- (1) Has the applicant been certified, or is it a party to an existing collective agreement if the latter, is it a bona fide agreement?
- (2) Has the proper notice been given by and to the parties?
- (3) Have negotiations between the parties been carried on for the period of time required by the Regulations?

The request is then referred to the Dominion Minister of Labour.

With respect to works and undertakings that are within the initial jurisdiction of the National Board and works and undertakings in Alberta enumerated under Schedule A of the Regulations, the application for intervention comes direct to the National Board.

However, whether the request for assistance reaches the Dominion Minister of Labour through the National Board or a Provincial Board a Conciliation Officer is appointed either from the staff of the Dominion Department of Labour or the staff of the Provincial Department of Labour in the Province where the

request originates. The Department has arrangements for joint use of conciliation staffs with the Labour Departments of Ontario, Manitoba and British Columbia, and it also has satisfactory relations of the same kind with the Labour Department of the Province of Quebec. The Dominion Department of Labour maintains a staff of Conciliation Officers at Ottawa, Montreal, Toronto, Winnipeg, Vancouver and in the Maritimes.

Appointment of Conciliation Boards

The Sections of the Regulations dealing with the establishment of Conciliation Boards follow closely the procedures laid down in the Industrial Disputes Investigation Act, 1907, which Act was suspended when the Wartime Labour Relations Regulations P.C. 1003, became effective. The Conciliation Board is appointed under Section 13 of the Regulations and the manner of constitution etc., is set forth under Sections 29-35. I may point out, however, that the Regulations provide time limits within which the Conciliation Officer must be appointed, must deliver his report, and also within which a Board must be established and deliver its report, subject of course to extension by joint consent of the parties or by the Minister of Labour.

Safety Rules Where Sulphuric Acid is Used

Rules for the safe handling and storing of sulphuric acid and first aid and safety measures in connection with its use have recently been issued by the Division of Labour Standards of the U.S. Department of Labour. The leaflet is one of a series entitled "Controlling Chemical Hazards."

Sulphuric acid is one of the most widely used chemicals in industry, being employed in the manufacture of fertilizers, chemicals, iron and steel, coal products, explosives, paints, rayon, textiles, in petroleum refining and in metallurgical industries. It is capable of dissolving most metals, of penetrating ordinary clothing, of charring wood and causing painful flesh burns. If large areas of the skin are involved, injuries may prove fatal. Injury or blindness may result from burns of the eye. Mixed acid (sulphuric and nitric) offers the additional risk of nitrous fumes which if inhaled may cause acute lung inflammation with possibly fatal consequences.

Detailed instructions and precautions are set down for handling and storing the acid in the usual shipping containers, boxed glass carboys and steel drums. Since there is danger of ignition by contact with certain combustible materials, and of explosion through the liberation of hydrogen gas from the action of the acid on metals, there should be no exposed lights, fire, sparks or smoking in the vicinity of such containers. Workers should

wear proper protective clothing, that is, felt hats, face shields or goggles, and boots, aprons and gloves of rubber. Storage in sheltered buildings with concrete floors and with adequate drainage facilities is recommended. Filled boxed carboys should not be piled more than three tiers high. They should not be stored where the temperature may drop below freezing point lest bottles break. Drums should be stored with plug upward to prevent leakage.

Containers of sulphuric acid should be kept out of direct sunlight and away from heat. Stoppers of bottles and plugs of drums should be loosened during hot weather, drums at least weekly, to relieve internal pressure. After venting, they should be resealed before moving. Carboys and drums must be emptied by gravity only, never by pressure. All empty boxed carboys must be completely drained before return and drums always returned without washing.

Safety equipment for protection of employees includes approved respirators and masks. Instructions furnished with masks should be followed and drills in the use of masks carried out. Every worker should have his splash-proof goggles with him at all times and wear them wherever there is a possibility of acid burns. Few workers are called upon to wear continuously all the pro-

protective clothing specified. Safety requirements may vary with the amount of exposure. Responsibility for instruction in safe practices and use of equipment rests with each department supervisor. Warning notices printed in languages understood by the workers should be posted in all acid-handling departments.

It is recommended that all employees be given basic first-aid training. In case of accident, at least two workers to a shift should be responsible for notifying a doctor and nurse and for the use of first-aid remedies.

W.E.A. Conducts Summer School in Vancouver

The British Columbia branch of the Workers' Educational Association held its annual Summer School at Acadia Camp, in the grounds of the University of British Columbia, from August 17 to 31.

Instruction differed from that of former years, when labour and government officials lectured to the students on various topics of general interest to workers, in that only one trade union official was on the teaching staff, all the others being well-known labour educators or outstanding guest lecturers.

Attendance at the Summer School numbered 115, all but fifteen of whom came from various part of British Columbia—Cranbrook, Premier, Trail, Pioneer, Ocean Falls, Britannia, Nanaimo, Victoria, Duncan, Alberni and the Queen Charlotte Islands—and the neighbouring States of Washington, Oregon, California, and Arizona. A falling-off in the attendance of Vancouver workers was considered to be due to the recent strikes there, and the closeness of the school to the City.

Mr. Claude Donald, B.C. Representative of the W.E.A., directed the program of the school, assisted by Mr. Leo Huberman of New York, Mr. Bert McLeach of Boston, Mr. Watson Thomson and Mr. G. S. Culhane, both of Vancouver, and Mr. Harry Fugl, Director of the Seattle Labour School.

Mr. Huberman is well known to the labour movement as the author of several books on labour problems and also for his early leadership in the field of workers' education as Educational Director of the National Maritime Union, New York. He required written examinations of all regular students, awarding them diplomas. Such complete participation of all the students had been attained, coupled with intensive "homework" studies, that there were no failures in the examinations.

Classes were held in the Arts building of the University every morning, with Mr. Huberman taking the first class in theoretical trade

unionism, and Mr. Culhane, General Secretary of the General Shipyard Workers' Federation, dealing with the practical application of these. Mr. Huberman used a method combining a factual presentation of material with complete participation by the class. Emphasizing that only facts count, he would call for a show of hands on agreement. Any disagreement would be thoroughly threshed out before proceeding further. Mr. Culhane, who received much training and coaching from Mr. Huberman, followed the same pattern in his classes which included such topics as, shop stewards, how to organize a union, union legislation, P.C.'s 9384 and 1003, and various specific union problems.

It is strongly emphasized that the outstanding remedy for acid burns is the immediate use of water in quantity. Every wasted second adds to the seriousness of the burns. For this reason safety showers should be provided and tested daily, and for eye injuries a foot-operated bubbler fountain should be immediately available. Treatment should be continued from 10 to 15 minutes. Immediately after even minor exposure to the acid a worker should be required to take a shower and change his clothing.

Mr. Huberman's classes were based on his book "The Truth About Unions", a copy of which was given to each student. Using simple direct language, and with constant reference to the everyday experience of the students, he demonstrated the connection between "pork chops" and union organization. He dealt with Unions and Political Action, claiming that union agitation and "pressure" had resulted in workmen's compensation laws, social security laws, laws like the Wagner Act in the U.S.A., universal suffrage, and many others.

Mr. Huberman devoted considerable time to techniques for educational committees in unions, as well as training in some basic educational methods. He considered that, "since so many workers have to leave school early and go to work, their education is often abandoned, which tends to give many workers with splendid minds and good ideas, a kind of inferiority complex." He believed that workers can best teach themselves and each other, and spared no effort to help the students to become more articulate.

Mr. Harry Fugl conducted a class on elementary economics every afternoon, demonstrating the tie-up between organized labour and the national well-being. The course, of necessity, was basic and rudimentary, Mr. Fugl

stressed the necessity for intelligent understanding of current issues through continued study of fundamental economic laws.

Mr. McLeach, instructor in "The Science of Social Change", lectured each week-end on economic history. He discussed the economies of remote times, through feudalism, to the Guilds, the industrial revolution, and those of the present time.

Mr. Watson Thomson gave a series of six lectures on "Fascism, Yesterday, To-day, and To-morrow". He warned the students of the dangers of mass suggestion and the misuse of propaganda.

Mrs. Hallie Donaldson, of Seattle Labour School, gave a series of demonstrations on how to do effective mimeographing, using simple illustration and simple layout. Other

visitors who lectured included; Mr. E. Alexander, ex-editor of the American army newspaper "Stars and Stripes" in the Pacific area, who dealt with the labour movement in India and Indonesia; Dr. Joseph Lane of Seattle, who spoke on Socialized Medicine and Elmore Philpott, radio commentator and journalist.

Mr. Melnikow, Director of the National Labour Bureau, San Francisco, visited the school several times and led in a two-hour session on "The Essentials of the Bargaining Procedure".

The social side of the school was conducted by Mrs. Ruth McLeach, a graduate of the Highlander Folk School and Columbia University.

Manpower and national requirements for housing

The manpower and materials required to construct 50,000 new homes in Canada, together with an analysis of the effect of such a construction job on the economy of the nation is revealed in a detailed report entitled "Manpower and Materials Requirements for a Housing Program in Canada" prepared by the Economic Research Branch of the Department of Reconstruction and Supply and made public recently by the Right Honourable C. D. Howe.

The study is confined to the demand side for manpower and materials, with the supply side being the subject of another inquiry.

"The present inquiry brings out the fact that a housing target of 60,000 units during 1946-1947 is well within the productive capacity of this country," said Mr. Howe. "In the years to come even larger housing programs should be within our reach.

"The success of a housing program in the transition period depends in the main on the co-ordinated effort of management and labour in the construction industry and the industries that supply needed building materials," Mr. Howe continued. "It is primarily for the guidance of industry that the results of this research study are published—to assist it in the responsible task of providing the tools needed to accomplish a desirable housing target in 1946-1947 and the years that follow."

Briefly, here is what the construction of 50,000 housing units means to the Canadian economy according to the report:

- (1) New homes for about 200,000 people.
- (2) Jobs for one year for between 134,000 and 162,000 men. Of these, 62,000 to 75,000 men would be working directly on the building sites while between 72,000 and 87,000 persons would be working in the industries supplying building materials and transportation services.
- (3) A total annual payroll to construction workers varying between \$103 million and \$125 million.
- (4) Orders for building materials to manufacturers and distributors, including transportation costs to the site, varying between \$144 million and \$175 million.
- (5) Earnings by contractors and builders (overhead and profits) varying between \$28 million and \$33 million.
- (6) Total construction expenditures varying between \$275 million and \$334 million, close to the expenditure for Canada's shipbuilding program (merchant marine and navy) during 1943, the year of peak production, when the program involved over a million tons of shipping.
- (7) Real estate transactions ranging from \$27 million to \$33 million.
- (8) Added incomes to professional people such as architects, lawyers, surveyors.
- (9) Improvement of the fiscal position of many municipalities because of increased revenues and the spreading of the burden of maintaining and expanding public facilities among a larger number of home owners.

(10) Substantially expanded business activity among lending institutions which are responsible for financing a major part of the housing program in Canada.

The above figures have to be raised by 20 per cent for every additional 10,000 houses built in the country. Apart from the direct effects of the housing program enumerated above, very substantial indirect effects will result from large-scale house building contributing to increased economic activity among a great number of trades and businesses in practically every part of the country.

The report points out that shortages of certain building materials and lack of sufficient skilled construction workers are great obstacles to be overcome in the execution of a large-scale housing program in the transition period. High construction costs is another obstacle, particularly to a large housing program on a continuing basis.

Construction costs have risen since the outbreak of the war, mainly for two reasons the report finds. They are:

(1) Increase of prices of building materials and of hourly wage rates paid to construction workers. From 1939 to 1945, the former increased by 42 per cent and the latter by 31 per cent. For the cost of an individual housing unit, this means an increase of about 37 per cent (weighted average). This rise in cost is substantially in line with the increases in earnings and the general increase of prices and wages in other sectors of the Canadian economy and is, therefore, likely to be maintained for some time to come.

(2) Lowering of efficiency in the house-building industry owing to special conditions arising out of the war. This decline in efficiency was mainly due to the dilution of the skilled working force by untrained or partly trained men and delays on the building site due to shortages of building materials. Contingencies of this sort have caused a rise in construction costs varying, in most cases, between 10 and 25 per cent. This additional increase is considerably out of line with increases in costs of other products.

Taking all factors into account, total building costs have risen between 47 and 62 per cent from 1939 to 1945, and a further rise is indicated.

The report draws attention to the fact that the key to success of a national housing program lies in regional and local co-operation.

According to the study, the difficulties which a large-scale housing program faces in the immediate future and for some years to come are formidable. Canada's population of twelve million lives in some two and three-quarter million dwellings, but several hundred thousand more homes are required to meet the

most pressing housing needs of the country.

The housing shortage of today, the report finds, is due to a number of reasons: the small volume of new residential construction during the prolonged depressed conditions of the 'thirties, curtailment of house-building activity during the war years due to the need for directing large segments of manpower and industrial resources towards the full prosecution of the war, the concentration of war workers in the larger industrial centres, the return of war veterans endeavoring to establish new households, the natural increase in population and high marriage rate during the war years. Another important factor is the high level of national income. As a result, many families, formerly sharing housing accommodation with other families, are endeavoring to obtain separate dwellings.

An account of the housing program for 1947 appeared in last month's *LABOUR GAZETTE* (p. 1207).

Employment and industrial statistics

The accompanying table contains the latest statistics available reflecting industrial activity in Canada.

Figures are shown for certain months in the current year as compared with the corresponding period in 1945.

The index of industrial employment published by the Dominion Bureau of Statistics declined from 173.6 in July to 172.6 in August. The index of the cost-of-living, declining 0.1 points, was 125.1 at the beginning of September.

Employment and Earnings.—Industrial employment in Canada showed a recession at the beginning of August due mainly to the existence of wide-spread industrial disputes. In its latest survey of employment and pay-rolls the Bureau of Statistics reports curtailment of operations in manufacturing and mining while logging and trade showed seasonal declines. Considerable improvement, however, was reported in transportation, communications, services and construction and maintenance.

Reports from 16,000 employers indicated combined staffs of 1,765,105 at August 1, a reduction of 10,423 workers from the level of the previous month. Based on the 1926 average as 100, the index of industrial employment was 172.6, as compared with 173.6 in the preceding month and 175.0 at August 1, 1945. A decrease of 16,510 workers was recorded in the manufacturing industries at August 1. This decline, as well as that at August 1, 1945, which resulted from curtailment of war work, was contrary to the usual movement in each year since 1920. The prevalence of strikes was an important factor in the curtailment of operations in the rubber, textile, electrical

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

⁵ Adjusted, where

necessary, for seasonal variation. ⁶ Notes in the hands of the public at the end of the month. ⁷ Figures for four weeks ended September 28, 1946, and corresponding previous periods.

apparatus, iron and steel, non-ferrous metal, non-metallic mineral products and chemical industries.

Among the non-manufacturing industries, improvement was shown in communications, transportation, construction, services and finance. Seasonal decreases were noted in logging and trade. Strikes among metal miners in British Columbia were a factor in the reduction of employment in metallic ore mining.

Weekly payrolls of eight leading industries rose from \$57,257,646 at July 1 to \$57,620,485 at August 1. The weekly average per employee was \$32.64 at August 1 as compared with \$32.25 at July 1. Per capita figures at August 1 in previous years were: 1945, \$32.09; 1944, \$31.63 and 1943, \$31.06.

Prices—The general index of wholesale prices (base 1926 = 100) was 109.2 in August as compared with 109.5 in July and 104.0 in August, 1945. The indexes for vegetable and animal products decreased 1.4 and 0.3 points respectively. No changes were noted in textile products, non-metallic minerals and chemical products whose indexes were respectively 98.2, 102.6 and 94.4. Increases were indicated in wood products, from 130.5 to 131.0, iron products, from 128.3 to 128.5, and non-ferrous metals, from 89.3 to 89.7. The index of consumers' goods declined from 102.0 to 101.5 and of producers' goods, from 106.0 to 105.8. The index of Canadian farm products also declined, from 113.8 to 111.1.

The cost-of-living index, on the base of prices in the years 1935 to 1939 as 100, declined from 125.6 on August 1 to 125.5 on September 3, 1946. Seasonal declines in fresh vegetable prices during August served to check an advance in the cost-of-living index dating from February, 1946. The food group fell from 144.7 to 143.2, due mainly to lower quotations for vegetables; fruits were also slightly lower but eggs recorded further moderate increases. Continued gains, almost balancing the decline in foods, were registered in clothing, from 127.6 to 129.6, and homefurnishings and service, from 127.0 to 128.4. The miscellaneous items series changed slightly from 113.8 to 113.9, while no changes were noted in the indexes for rentals and fuel and light which remained at 112.6 and 107.2 respectively. The advance in the general index since August, 1939, was 24.5 per cent.

Veterans' housing survey

Returns from a survey of veterans' housing conducted by the Rehabilitation Branch of the Department of Veterans Affairs across Canada show about 22,000 veterans have "really bad" accommodation, Hon. Ian A. Mackenzie, Minister of

Veterans Affairs, reported recently. The limited number of answers from veterans questioned in the survey shows that the veterans' housing problem is of smaller dimensions than expected, the Minister said.

"I must point out," the Minister observed, "that less than a third of the veterans to whom questionnaire cards were mailed returned the cards, which were stamped for reply. All of those questioned were veterans listed in their communities as having housing problems."

Mr. Mackenzie said the replies showed specific factors making for bad housing conditions. In 47 per cent of the responses the accommodation involved more than one person per room; 31 per cent of them were from veterans paying more than 20 per cent of their income for rent; 55 per cent of those replying were sharing bathroom or toilet facilities.

"Sixty per cent of the veterans replying want to rent, and state they can afford to pay \$30.60 per month," the Minister stated. "Forty per cent want to buy homes, and state they can make a down payment of \$1,028."

More than half of the veterans replying were living in housekeeping rooms, Mr. Mackenzie said. The average monthly rental per room was \$14.57.

Minister of Labour anticipates record production of lumber and pulp

Canadian forest industries have laid plans for a substantial increase in logging activity this winter in anticipation of reaching an all-time high in the production of lumber and pulp products in 1947, it was announced recently by Hon. Humphrey Mitchell, Minister of Labour, in reviewing the general woods labour situation throughout the country.

The Minister stated that to obtain this increased production, forest operators expected to employ well over 200,000 men in the bush at the peak of the cutting season this coming winter. At the present time applications for woodworkers throughout the country exceed 35,000, and local National Employment Service officers report demands are increasing steadily.

In view of the tremendous demand for forest products and the large number of unfilled vacancies for woodworkers, the Department of Labour in co-operation with the provinces and forest industries has begun an active woods labour campaign to encourage all suitable, available men to accept woods employment, the Minister said.

In British Columbia the number of openings for bushmen, especially skilled workers, is the highest it has been for some time. Lumber operators in Eastern Canada are now just

starting winter operations and it is expected that the demands in Ontario, Quebec and the Maritimes will be even higher than last year. Due to the withdrawal of German prisoners of war from the forest labour supply, operators in Alberta and Northwestern Ontario will be looking to the Prairies for an increased number of woodworkers as soon as the harvesting has been completed.

The Minister stated that operators in all parts of Canada, realizing that there is a definite limit to the number of experienced lumbermen available, are now making special efforts to aid new men to get into efficient production as quickly as possible. Many operators are providing a practical form of training to teach the newcomer, and others, general logging practice and skill in the care and use of tools.

"I am convinced," the Minister said, "that any man who is physically fit and willing to work can, with short experience, make worthwhile wages in this healthy, outdoor work." He pointed out the advisability of the newcomer to the woods getting started during the fall.

On October 10 the Deputy Minister of Labour, Mr. Arthur MacNamara, issued a special appeal to operators to keep local employment offices fully informed of their needs, as a means of assisting in the Dominion-wide campaign to obtain volunteers for lumber camps.

Disposal of National Registration records

Decision has not yet been taken on what disposal will be made of the National Registration records, following termination of the Registration, according to a

statement issued by Mr. Arthur MacNamara, Deputy Minister of Labour.

"I have noticed a statement being made in one or two quarters that a decision had been made to microfilm all the records, and preserve the films", Mr. MacNamara said. "No such decision has yet been taken, and the matter of disposal of the records is still under consideration. Several Government offices have expressed interest in the records for statistical use, but nothing definite has been decided."

The records consist mainly of over 9,000,000 cards in twelve-inch by ten-inch size, which, it will be recalled, were the cards on which the registration was originally made in 1940.

Alternative suggestions are under discussion in the Labour Department. One suggestion is to preserve the original records for about twelve months against their possible use, and

then give them to salvage. The second suggestion is that of microfilming, if considerable use appears likely.

The final decision must depend upon whether the records are of statistical worth as they now stand, or whether it is just a matter of following the usual Government practice of keeping records for a sufficient length of time that it can be determined that they are of no further value.

Farm wage rates higher in August

Average wage rates paid to male farm help in Canada were higher in August this year than a year ago, increases being shown both in

day help and month help in most provinces, according to the mid-August survey by the Dominion Bureau of Statistics.

The average rates for Canada were \$4.04 per day and \$75.28 per month with board as compared with rates of \$3.55 per day and \$71.68 per month reported at August 15, 1945. Without board, the average rates were \$4.95 per day and \$100.62 per month as against \$4.50 and \$97.22, respectively, last year. The average rates are calculated using a relative weighting for the provinces.

In the case of day help, there were increases in all provinces except Nova Scotia, the most pronounced increases being in the western provinces. Saskatchewan had the highest rate of all provinces for help without board at \$5.69, followed by Manitoba at \$5.66, British Columbia at \$5.26, and Alberta at \$5.17. Rates in the eastern provinces ranged down from \$4.55 in Ontario to \$3.38 in Prince Edward Island. Highest rates for help with board were \$4.71 in Manitoba and Saskatchewan, followed by \$4.42 in British Columbia, \$4.37 in Alberta, \$3.62 in Ontario, \$3.56 in New Brunswick, \$3.46 in Quebec, \$3.24 in Nova Scotia and \$2.62 in Prince Edward Island.

Wage rates per month by provinces ranged from a high of \$82.99 to a low of \$55.76 for help with board, and from \$111.12 to \$77.96 for help without board in Saskatchewan and Prince Edward Island, respectively.

Further repatriation of Japanese

A party of 523 Japanese, who have been living in Canada, sailed for Japan on October 1, Mr. Arthur Mac-

Namara, Deputy Minister of Labour, announced recently. This is the fourth sailing of this type and brings to approximately 3,723 the number who have left Canada under the Japanese repatriation scheme.

J. F. MacKinnon appointed Japanese Commissioner Late in September, Hon. Humphrey Mitchell, Minister of Labour, announced the appointment of Mr. J. F. MacKinnon as Commissioner of Japanese Placement at Vancouver, B.C. The appointment of Mr. MacKinnon, who had previously been acting as Assistant Commissioner of Japanese Placement, was made necessary by the resignation of his predecessor Mr. T. B. Pickersgill.

Appointment of Mr. A. C. Macphail to Nova Scotia labour boards Appointment of Mr. A. C. Macphail of Ottawa as Acting Chairman of the Nova Scotia Regional War Labour Board and as Acting Chairman of the Nova Scotia Wartime Labour Relations Board has been formally proclaimed under Order in Council P.C. 3628 dated the 27th day of August, 1946.

The appointment, recommended by the Minister of Labour, was occasioned by the resignation of Mr. V. C. MacDonald, K.C. of Halifax from the chairmanship of the two Nova Scotia Regional Boards.

Retirement of veteran officials of Department of Labour Two veteran officials of the Dominion Department of Labour retired on superannuation on October 1, Mr. E. G. Blackadar, of Ottawa, Director, Canadian Government Annuities and Mr. F. E. Harrison, M.B.E., of Vancouver, Departmental Representative for Western Canada.

Mr. Blackadar, who is a graduate of McMaster University, joined the Annuities Branch as actuary, 37 years ago. He became Superintendent of the Branch in 1927, the title being changed to Director in April, 1946. He was thus a senior official of the Branch practically from its inception in 1908 to the time of his retirement, and consequently exercised an important influence on its steady, consistent growth.

As a mark of esteem, Mr. Arthur MacNamara, on behalf of officials of the Department, and the staff of the Branch made a suitable presentation to Mr. Blackadar on the occasion of his retirement.

Mr. Harrison was western representative of the Department for 30 years, and had charge of conciliation work from the Great Lakes to the Pacific coast. He was singularly successful in the settlement of labour disputes before they resulted in work stoppages. It is recorded of him that 150 disputes in the British Columbia and Alberta coal industry between 1917 and 1919, were mediated suc-

cessfully by Mr. Harrison before strike action was taken. He was named an Industrial Disputes Inquiry Commissioner in 1942 and was prominent as Dominion Government representative at labour-management-government conferences in the implementation of the Richards shipyard report in the same year. In 1943 he was made a Member of the Order of the British Empire (M.B.E.)

Prior to 1923, Mr. Harrison resided in Saskatoon and was Mayor of that city from 1913 to 1915. For the past 23 years he has lived in Vancouver.

Lieut. Col. J. G. Bisson appointed Chief Commissioner of U.I.C. The appointment of Lt. Col. J. G. Bisson, O.B.E., of Montreal, as Chief Commissioner of the Unemployment Insurance Commission, was announced late in Sep-

tember by Hon. Humphrey Mitchell, Minister of Labour. The appointment is for a ten-year period, and the salary rate is \$9,000 per year.

Col. Bisson will assume his new position in Ottawa on September 30, the date on which the resignation of J. L. Trottier as Chief Commissioner becomes effective.

Despite his youth—he is only 32—the new Chief Commissioner has had wide business experience as well as war service. He was born at Black Lake in Quebec's Eastern Townships, and graduated from McGill University in 1936 with the degree of Bachelor of Science; he received the Licentiate in Accountancy (McGill), and became a Chartered Accountant in 1938. He joined the Montreal firm of P. S. Ross and Sons, Chartered Accountants, in 1937, and in 1939, went to Canadian Industries Limited, with whom he was employed as accountant and internal auditor.

Lt.-Col. Bisson's connection with C.I.L. was broken by his war service. He was mobilized on September 1, 1939, with the rank of captain, having held that appointment in the Non-Permanent Active Militia. He was first commissioned in the Royal Canadian Army Service Corps (N.P.A.M.) in 1934. Proceeding overseas with the R.C.A.S.C. in January, 1940 Lt.-Col. Bisson rose to his present rank. In that rank he held the appointment of Assistant Director of Supplies and Transport (supplies), First Canadian Army, in pre-invasion days in Britain, as well as on the Continent.

Lt.-Col. Bisson returned to Canada in June, 1945, and, upon demobilization in January, 1946, he rejoined Canadian Industries Limited where he has served until now. He is at present a lieutenant-colonel in the Reserve Army, commanding the 3rd Div. R.C.A.S.C., with headquarters in Montreal.

Appointment of Mr. Rene Gravel to Quebec W.L.R.B. Board under Order in Council P.C. 4002 to fill the vacancy that resulted from the resignation of Mr. G. Ledoux.

Mr. Rene Gravel, upon recommendation by the Minister of Labour, was appointed as employee representative of the Quebec Wartime Labour Relations

Provincial Institute of Textiles established

Following representations of the Royal Commission on Education (Ontario) by the Federal Textile Technical Associations of Canada and by educational authorities

in the city of Hamilton, the Provincial Institute of Textiles was established during the past summer. It is located in the building formerly occupied by the Ontario Training College for Technical Teachers in Hamilton, the chief centre of the primary textile industry in Ontario.

The purpose of the Institute is to "provide a service to persons already employed in the industry and to give specialized technical training to young people who plan to find their life vocations in the technical occupations in the industry."

Evening, "part-time" and "short-unit" courses, offered during the first year, are being limited to those courses for which suitable equipment can be made available. As equipment is added more advanced and additional courses will be offered as required by the industry.

Full-time day school courses for youths looking forward to employment in technical and junior executive positions in the textile industries are being planned to commence in September, 1947.

The evening and part-time classes for the current session opened on September 30 and will continue until March 28, 1947, with the exception of statutory holidays and nine days Christmas vacation. The schedule includes studies in cotton manufacture, the technology of textile fibres, woollen manufacture, elementary textile mathematics and introduction to textile chemistry and dyeing. "Short-unit" courses in phases of machine fixing will be announced as soon as satisfactory arrangements can be completed.

Applicants for admission must satisfy the Institute authorities that they are competent to undertake the work of the course to which they seek admission and students who do not make satisfactory progress may be required to withdraw at any time. Except in special cases, such as the chemistry courses, the tuition fee is five dollars for each subject to be paid at the time of application. It is returned to the

student at the end of the course if he attends 85 per cent of the class sessions.

Students who attend regularly and who satisfactorily complete the class work and the final examinations of any course will be awarded a certificate of standing in the course.

Joint board to control British iron and steel industry

The recent controversy over the intended nationalization of the British steel industry has been resolved by the decision to constitute a joint National Steel Board

for the purpose of controlling and supervising the industry, a United Kingdom Information Office bulletin reports.

Ownership will remain unchanged but the supervision of development and reconstruction and control of production, distribution and prices will be brought under the aegis of the proposed Steel Board composed of Government and industry representatives headed by a Cabinet Minister.

This represents a change in the earlier stated intention of the Government, to bring "important sections" of the industry under public ownership during the life of the present Parliament.

The bulletin quotes comments of two British publications on the most recent decision.

According to the *Financial Times* "the present statement does not greatly clarify the position State ownership in some form is still part of the ultimate plan the time and manner of its accomplishment are left indefinite."

The *Daily Herald* on the other hand greets the announcement as "one step forward on the road to public ownership of iron and steel"

Expansion of vocational training in Britain

The August issue of *The Ministry of Labour Gazette* states that at July 1, 1946 there were 51 vocational training centres in operation in Britain providing training

for 16,657 persons. This compared with 17 centres and 3,616 training places available in July, 1945.

It is stated that "the existing expansion program aims at the provision of 28,500 training places by the end of December, 1946, and the introduction of two-shift systems in government training centres will further increase the number of trainees who can be accommodated." On July 1, 1946, 1,200 places had been made available by double-shift working.

An additional means of increasing the number of trainees who can be accommodated has been "the arrangement whereby trainees during the last two months of their six months' train-

ing at government training centres are put on to permanent building work on outside sites, under the guidance of their instructors." In this way trainees will be enabled to apply their training in work of permanent value and, at the same time, make room for other trainees in the centres they vacate.

During the 12 months ended July 1, 1946, 7,265 men and 849 women were placed in employment after completion of training. It was expected that the output of trained workers will increase as the greater numbers of persons now in training complete their courses.

The additional training facilities have been devoted mainly to the needs of the building and civil engineering industries. However, arrangements have also been made for a wide variety of other trades, such as paving and flag dressing, timbermen, brick-making, commercial art and industrial design, comptometer operating, cotton weaving, dress making, pottery, spray painting, leather production and agricultural blacksmith-farriers.

U.K. employers must employ higher quota of disabled persons Under the Disabled Persons (Employment) Act, 1944 (L.G., July, 1946, p. 864) the Minister of Labour and National Service in Great Britain has made two Orders, effective September 1, 1946, applying to disabled persons who are registered under the Act.

The first Order relates to the compulsory quota system which began on March 1, 1946. It raises from two to three per cent the standard percentage of disabled persons which employers with 20 or more workers are required to employ. The effects of the new percentage will be carefully noted and if it is considered necessary a further increase will be made. The Act stipulates that there shall be a standard percentage, and if the Minister thinks fit, he may by order, after consultation with employers' and workers' organizations, assign a special percentage, other than the standard percentage, for any employment which is deemed particularly suitable for disabled persons. The new standard percentage will apply to all industries and occupations for which no special percentage is fixed.

In deciding to increase the quota, the Minister took into account the fact that the total number of persons in the field of employment covered by the quota is estimated as 15,000,000. About 600,000 disabled persons have registered to date. The latter figure includes, however, (1) those with or likely to go to the smaller employers, (2) those employed in excess of their quota by the larger employers, and (3) the most severely disabled who need

employment under sheltered conditions. The number of registered disabled unemployed in mid-June was about 50,000 excluding those who required sheltered employment.

The second Order "designates" work as a car park attendant or as a passenger electric lift attendant as employment under the Act so that future openings in these two occupations are reserved for the registered disabled. Other employments may be designated under the Act from time to time.

The Order prohibits any person not registered as disabled being engaged in these two occupations except under permit from the Ministry of Labour, and except in the case of a former employee entitled to reinstatement under the Reinstatement in Civil Employment Act or under an agreement made before June 1, 1945. The Order does not affect the continued employment with the same employer of non-disabled persons who were engaged in these occupations before September 1, 1946. A person who ordinarily spends less than half his total weekly working hours in a designated occupation and is employed by the same employer in some other work will not be regarded as in designated employment.

The scheme affects all employers who have car park attendants or passenger electric lift attendants in their business, including employers of less than 20 workers. Employers with 20 or more workers may not count towards their quota any of their registered disabled employees who are in the designated occupations.

Increased minimum wages for farm workers in Great Britain The Agricultural Wages Board for England and Wales, by Orders effective July 14, 1946, under the authority of the Agricultural Wages (Regulation) Acts, 1924 and 1940, has raised the statutory minimum and overtime rates of wages for both male and female farm workers from the levels established in 1945 and 1946. (L.G., 1945, p. 613; 1946, p. 138.)

For males 21 years and over minimum rates have been increased in all districts from 70s., the rate in effect from March 4, 1945, to 80s. for a 48-hour week. Special rates applying to a few districts for workers engaged in tending live stock and in other specialized occupations now range from 94s. to 107s. 6d., according to occupation and district, an increase of from 11s. 6d. to 14s. 6d. a week.

For women in all but a few areas the minimum for a 48-hour week is now to be 60s. for those 21 years and over instead of 50s. for those 18 and over, the minimum from April 7, 1946. In the few areas to which the 60s. rate does not apply, the Orders

fix a minimum of 55s. for a 44-hour week. For women between 18 and 21 the minimum has been fixed at 56s. instead of 50s.

Part-time or casual workers' rates for both men and adult women have been raised 2d. an hour, to 1s. 8d. for men and to 1s. 3d. for women. For women 18 to 21, the rate is now 1s. 2d. an hour. The minimum differentials payable for overtime for men and women have been increased by 3d. an hour on ordinary weekdays, bringing the overtime rate for men up to 2s. 1d. an hour and that for adult women to 1s. 7d., and by 4d. an hour on the weekly short day, on certain specified public holidays and Sundays, and for employment beginning on a Sunday and continuing into the following Monday morning the men's hourly rate on such days is now 2s. 6d. and the women's, 1s. 11d. For women 18 to 21, the overtime rate has been increased 2d. an hour.

Rates for youths under 21 and for girls under 18 have been advanced by varying amounts according to age.

Proposal to revise U.K. fair wages policy

A proposal to revise the Government's policy in relation to wages on government contracts has been laid before Parliament for purposes of discussion by the Minister of Labour and National Service. Agreed on in 1942 by the British Employers' Confederation, the Trades Union Congress and the Government and published by the Government, the draft Fair Wages Resolution would not only require contractors with government departments to pay "fair" wages and observe "fair" hours and conditions of labour as regards their workpeople who are employed on government contracts but would require them to have observed such conditions in relation to all their employees for at least three months before their names are placed on the government list of firms to be invited to tender for contracts.

"Fair" wages and conditions means wages and conditions not less favourable than those established for the trade or industry in the district by negotiation or arbitration between employers' associations and trade unions representing substantial proportions of the employers and workers in the industry in the district. In the absence of such wages and conditions, the contractor must observe conditions not less favourable than the general level in the district in the industry concerned.

Questions as to whether the requirements of the Resolution are being observed are to be referred, if not otherwise settled, to an independent tribunal.

A contractor is to be required to recognize the freedom of his workpeople to be members

of trade unions; he is to be responsible for the observance of the Resolution by sub-contractors, and must post in the workplace a copy of the Resolution.

Britain's mobile squad building workers

A special drive in Britain's temporary housing program includes the expansion of the Mobile Labour Force from some 2,500 to 6,000 men.

This team of men directly employed by the Ministry of Works tackles urgent building jobs which might otherwise be left undone, an extension of work done by the Special Repair Service—a famous organization of the blitz period. The men must be "tough", ready to travel anywhere in Britain at short notice and be able to work on any kind of building or civil engineering project and adapt themselves to the job in hand. They are guaranteed at least twelve months' work at the "inner London rate"—the highest in Britain—plus lodging allowances, holidays with pay and free facilities for travel home. They also get a yearly free issue of protective clothing and overalls and special facilities for buying tools.

U.S. Employment Offices to revert to States

Pursuant to legislation promulgated during the last days of the past Congress, the United States Secretary of Labour, Mr. L. B. Schwellenbach recently announced plans to restore the administration of the United States Employment Service to the States. In accordance with the law restoration will be effected on November 16. During the war period the administration was placed in the hands of the Federal Government.

The Federal Government will continue to completely finance the Service and assume responsibility for the implementation of certain conditions with authority to deny funds to States for failure to do so.

Some of these conditions are the maintenance of adequate services as required by Congress and the prevention of referral of any person to a vacancy occasioned by the engagement of a previous occupant in a strike or lockout, or where the filling of the position is an issue in a labour dispute.

The States will be called upon to co-operate in the establishment of an inter-state recruitment and transfer plan and in maintaining an adequate system for recruitment and transfer of workers between areas within the state.

Another requirement is that each State agency must keep a current file of information on local labour market conditions.

There are 1,800 local employment offices in operation at the present time in the United States.

New law governing apprentice training in U.S.

Disclosure by General Bradley, Veterans' Administrator, of wide-spread abuses under the veterans' on-the-job training program in the United States resulted in the passing of corrective legislation during the closing days of the last Congress.

Under the old program subsistence allowances of \$65 per month for veterans without dependents and \$90 for those with dependents were provided to supplement normal apprentice wages paid to non-veterans. The combined total was not to exceed the amount the veteran would receive as a fully trained employee.

The main abuses, it was reported, were the utilization of the supplementary grant by certain employers to decrease payroll charges by reducing the normal apprentice wage and by extending the period of training beyond the time necessary and conspiracies between veterans and employers to fraudulently receive the supplementary payments.

The revised law sets national standards which must be met before an employer can be accredited under the scheme. It requires adequate training and reasonable assurance of employment upon completion of training. Wages are specifically established at levels customarily paid in the plant and the community to a non-veteran learner and the job must ordinarily necessitate not less than three months and not more than two years of full time training conditioned by extensions necessary to fit state or federal requirements for apprentice training.

Downward movement of real wages in United States

In its issues of September 19 and 20 the *New York Journal of Commerce* presents a brief analysis of figures released by the Department of Labour at Washington, with respect to "real wages" in the United States during the past year or so.

It is pointed out that "while the hourly wage rate of factory workers reached a record high of \$1.09 in July, weekly earnings slumped to \$43, with the average work week only 39.4 hours. From July to September, 1945, real wages declined eight per cent, but by June of this year so-called first-round rate increases had made up over half this loss. This gain was completely erased by price advances after June 30. The decline in real wages has been most marked in the durable goods industries, where real earnings in July were at the lowest level since 1941. Only about one-fourth of factory workers have received hourly increases of 18½ cents or more; one-fifth of the group did not get any raise. Gains of workers in service and

white collar occupations who were granted raises averaged little more than eight cents per hour."

Restriction on employment of school children in U.S.A.

In calling the attention of employers to the provisions of the Fair Labour Standards Act and the rules made under them, the United States Department of Labour emphasizes the rules applying to school children, that is, those under 16 years of age. The Act fixes a minimum age of 16 years for employment in establishments producing goods for interstate commerce but permits a higher minimum to be fixed by regulation for dangerous occupations and a lower one for certain other occupations.

The Regulations permit children between 14 and 16 to be employed in certain non-manufacturing or non-processing occupations for not more than three hours a day or 18 hours a week during the school term and eight hours a day or 40 hours a week during school holidays. No children may be employed before 7 a.m. or after 7 p.m. except in the distribution of newspapers. No person under 16 may be employed at any time in manufacturing, mining or processing occupations, in the operation or tending of hoisting apparatus or of any power-driven machine except office machines, or in a public messenger service.

The dangerous trades in which no person under 18 may be employed are any occupations in manufacturing explosives, motor vehicle drivers or helpers, any occupations about coal mines except certain specified surface work, any occupations in logging or sawmilling with certain exceptions, the operation of woodworking machines, occupations involving exposure to radio-active substances, or those involving the operation of power-driven hoisting apparatus.

Chief U.S. Conciliation Officer urges publicizing agreements

The publicizing of successfully concluded collective agreements was urged by Edgar L. Warren, director of the Conciliation Service of the United States Department of Labour, in order to offset the "warped idea about the real relationship between American management and American labour" held by a great many people.

In a speech before the Pittsburg Personnel Association Mr. Warren said that disputes and strikes are accorded banner headlines in the press, "but when peaceful negotiations succeed the public seldom hears a word.

"I recommend that the next time your company signs a contract with the union you advertise it. Let the contract signing be the

occasion for a real ceremony, with speeches, handshakes and pleasant pictures for the papers.

"Cheer as loudly about the peaceful settlement as you would cry 'strike'. Make an event of the agreement and the newspapers will make it a headline."

He alleged that, contrary to the impression created by newspaper concentration upon the sensational, the extent of industrial disturbance during reconversion was less than might have been expected. The salient feature was that "there has been practically no violence or disorder, unlike past periods in United States labour history," Mr. Warren declared.

He absolved workers from total blame in prolonging strikes and scored the preoccupation of some employers with solving price problems and securing tax rebates from the treasury to absorb some of the financial loss rather than pursuing a course of action which would facilitate swift determination of a strike.

The Executive Bureau of the World Federation of Trade Unions, meeting in Washington during the week commencing September 23, announced the election of Arthur Deacon of the British Trades Union Congress

**WFTU Executive
Bureau meets in
Washington**

The Executive Bureau of the World Federation of Trade Unions, meeting in Washington during the week commencing September 23, announced the election of Arthur Deacon of the British Trades Union Congress

as interim president of the Federation, to succeed Sir Walter Citrine, who has retired from active participation in union affairs to head the British Labour Government's agency established to implement nationalization plans for the British coal mines.

Other statements which emanated from the meeting dealt with the calling to workers in every land to oppose preparations for another war; condemnation of the present Greek government for what was termed suppression of the "democratic liberties of the workers freely to exercise their trade union rights"; demand for quick replacement of UNRRA with an appropriate international agency when the former body ceases operations; and the continuation of efforts to acquire "effective representation on the United Nations Economic and Social Council."

The next meeting of the Bureau is to be held in Paris on December 13 to 15. It was also decided to convene the General Council at Prague in June 1947.

Attending the Washington meeting were: President Deakin; Secretary Louis Saillant, France; M. P. Tarasov, Russia; Frank Rosenbloom, United States; E. Kupers, Netherlands; Lombardo Toledano, Latin America; Leon Jouhaux, France, and G. Di Vittorio, Italy.

Publications on Provincial Labour Standards

Workmen's Compensation in Canada—A Comparison of Provincial Laws, is the title of an annual mimeographed pamphlet of some 30 pages issued in August by the Department of Labour. As revised for the 1946 edition, the pamphlet shows the amendments made in the provincial compensation Acts since July, 1945, notably the abolition in British Columbia of workmen's contributions to medical aid and the reduction of the waiting period in the same province. A large number of businesses not previously included were brought within the scope of the British Columbia and Saskatchewan Acts. The list of industrial diseases to be compensated was greatly extended in Saskatchewan and minor additions made in British Columbia and Nova Scotia.

The Merchant Seamen Compensation Act is summarized. Along the same lines as the Regulations of 1945, the Act was passed by the Dominion Parliament this year.

In general, the arrangement of the material in the pamphlet is similar to that of earlier editions but the section has been completely revised which sets out the Conventions and Recommendations of the International Labour Conference in order to permit a comparison between the International Labour standards and the provincial statutes.

The 1946 edition of the publication, *Provincial Labour Standards Concerning Child Labour, Hours of Work, Minimum Wages and Workmen's Compensation* was issued recently by the Department of Labour, with the addition of a new section relating to annual holidays.

This bulletin sets out the higher minimum wage-rates now in effect in British Columbia Nova Scotia, Quebec and Saskatchewan. Other important changes since June, 1945, include in New Brunswick the raising to 16 of the school-leaving age except where otherwise provided by local authorities and the establishment of a minimum age of 14 for shops, hotels and restaurants, raising in Saskatchewan the minimum age for employment in factories to 16, and in British Columbia introducing a maximum week of 44 instead of 48 hours in industrial undertakings.

Appended to the statement of the legislation regarding annual holidays with pay in Alberta, British Columbia, Ontario, Quebec and Saskatchewan is a table showing the length of holiday and the holiday pay allowed in each of these provinces.

Copies of the above pamphlets are obtainable from the Legislation Branch, Department of Labour, Ottawa.

Conventions of Labour Organizations

CANADA'S major labour organizations recently held their annual conventions, during the course of which delegates discussed affairs of interest to labour and adopted resolutions some of which made reference to Dominion legislation and Orders in Council.

The three organizations, the Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour, held their meetings at Windsor, Toronto and Quebec, respectively.

Summaries of the proceedings of the three meetings follow.

Trades and Labour Congress of Canada

THE Sixty-first Annual Convention of the Trades and Labour Congress of Canada, was held in the Armouries, Windsor, Ontario, commencing Wednesday, September 18, 1946. Credentials were received from 638 delegates representing approximately 330,000 members organized in 21,191 local unions. The Chairman of the Credentials Committee reported that the registered delegates represented 51 international and national unions, 64 federations, provincial organizations, trades and labour councils, and divisions of telegraphers and 521 local unions. There were two fraternal delegates present representing the British Trades Union Congress and the American Federation of Labour as well as a representative from the International Labour Organization.

The opening ceremonies included invocation by Rev. H. R. Nobles and Rev. Father G. L. Blonde.

The delegates were welcomed on behalf of the Windsor Trades and Labour Council by its President, Mr. M. F. Wigle. His Worship Mayor Arthur J. Reaume, in extending a civic welcome, informed the delegates that Windsor knew something of the problems of organized labour and recognized collective bargaining and labour's fight for its rights as part of their every day existence. He deplored what he termed "antiquated legislation" both federal and provincial in the field of labour laws and asked for their withdrawal. He described Windsor as the "capital seat of the working people for the whole of Canada."

Address of President Bengough

Mr. Percy Bengough, in his presidential address, expressed the sincere appreciation of the Executive Council of the Congress for

the example of solidarity and loyalty shown by the membership during the war period, in carrying out the policies of the Congress, particularly in the way they "hued to the line" of no strikes in wartime, remaining with the job at times under objectionable circumstances, with the result that there was a great and steady flow of the needed materials and supplies from Canada that materially assisted, not only Canada's fighting forces, but also the forces of our allies in bringing the war to a successful conclusion.

In referring to the situation arising out of the instructions from the American Federation of Labour to its affiliated organizations in Canada connected with the Trades and Labour Congress, that the unions of the International Association of Machinists be dropped from membership in the Congress, President Bengough declared that "the Trades and Labour Congress of Canada will resist to the utmost any interference with its sovereign autonomy as a Canadian organization and while we do not look or hope for any ill feeling from any of our affiliated unions, we feel it is our duty to protect our sovereign rights and we will resist to the utmost any usurpation of our constituted authority." The President further drew attention to the fact that 21,000 mine workers in Canada were affiliated to the American Federation of Labor in the United States, but are part of the Canadian Congress of Labour in Canada, and are therefore not affiliated to the Trades and Labour Congress. It can be taken for granted, he stated, "that the per capita tax of these members is paid to the A.F. of L." Reference was also made to the eleven international unions who were affiliated with the American Federation of Labour but not connected with the Trades and Labour Congress of Canada.

President Bengough contended that "although many thousands of workers affiliated to the Congress have materially improved their wages and working conditions during the past year, there is yet a great deal needed to be accomplished toward the establishment of full employment and social security. Money cannot be found," he stated, "to afford a decent pension to our aged citizens or to protect the most of the people from the dangers of ill health. There is a fear," contended the President, "that too high a standard of wages will cause a demand for goods and create inflation."

In referring to the deceased members of the Congress, President Bengough paid tribute to the outstanding services rendered by the late Tom Moore, who as President guided the destiny of the Congress for so many years.

Telegram Received from Prime Minister

The President then read a telegram which he had received from the Right Honourable W. L. Mackenzie King, conveying cordial greetings and best wishes for a successful meeting and expressing sincere regrets that other commitments made it impossible for him to be present at the convention.

Address of Honourable Humphrey Mitchell

Honourable Humphrey Mitchell, Federal Minister of Labour, in addressing the delegates, referred to the serious national problems, the legacy of the war, which had confronted the country since the conclusion of hostilities. "We have been travelling along the rough road of reconversion and have not yet reached smooth pavement," he stated. "Your Congress, your affiliated bodies and chartered unions are vitally concerned with these problems; therefore, I anticipate that this Convention will reach decisions which will help your Federal Government to overcome the existing difficulties to clear the way towards the high industrial activity and general national progress we all desire."

The nation's outstanding problem is the maintenance of stabilized price levels and the purchasing power of the peoples' dollar, Mr. Mitchell stressed. Despite opinions to the contrary, he pointed out, the Government has striven with all its power to effect this stabilization but the difficulties have been great. "There is nothing more devastating to national morale than a continued rise in prices," he stated. "I am convinced that unless self-discipline exerts itself in every walk of life, the burden of the Government will become increasingly difficult and many

will regret the actions of some of our people during this reconversion period. I believe that our future employment opportunities, the maintenance of our expanded industrial structure and our ability to compete successfully, not only in the home market, but also abroad, is wholly dependent on our ability to maintain our price stabilization policy.

"I should like to re-emphasize my belief," continued the Minister, "that labour and capital will get further by conciliation, accepting decisions reached in good spirit, adhering to the full letter of contractual undertakings and, above all, by proceeding within the framework of our laws, rather than by defiance of those laws."

"The conciliation machinery of our Federal Government has been developed to the highest degree in our history, but even the excellence of this service does not take the place of mutual understandings and mutual regard for contractual obligations. I would much rather see labour and management iron out their own differences, understand their respective rights, and agree on conditions of employment without the assistance of any governmental agency."

The Minister paid tribute to the leadership and members of the Trades and Labour Congress of Canada. "The leaders of Congress unions deserve a great deal of credit, for having led their members wisely." He voiced his confidence in Percy R. Bengough, President of the Congress and considered him a suitable successor to the late Tom Moore. Mr. Mitchell described the late Congress President as one of the most eminent labour leaders Canada had produced.

"One of the most important events ahead," the Minister stated, "is the conference of the Dominion Minister of Labour with the Provincial Ministers of Labour, which has been set for October 7 in Ottawa, to deal with the broad question of labour relations legislation. I am hopeful that arising out of our conversations at that time, with due regard to the constitutional implications of our federal system, the basic principle of labour's right to organize and bargain collectively will be recognized in all parts of the Dominion."

Address of Right Hon. C. D. Howe

Right Hon. C. D. Howe, Minister of Reconstruction, praised the membership of the Trades and Labour Congress of Canada for taking no part in recent work stoppages. "There has been full co-operation between your membership and the Government throughout the reconstruction period for which I am duly thankful. Strikes have not dealt a knock-out blow to our economic system," Mr. Howe

stated, "but make no mistake, the strikes have shaken our system for the moment. Nearly every strike has hit some nerve centre,—some key industry. These strikes do more than cut supplies," the Minister stated, "they affect the cost of production and selling prices, they lose markets for Canada and frighten off any investment. Every month consumer goods are not on the market in abundant supply makes the price ceiling harder to maintain."

Mr. Howe declared he was not discussing the rights and wrongs of the strikes. He was dealing only in their effect. Bargaining over the share of the product to go to labour and to capital was bringing conditions where there was little to be shared. "If we produce a smaller cake, everyone will get a smaller piece," he said.

The Minister emphasized that he did not wish to suggest that the reconstruction program was wrecked. Lost ground might be recovered if industrial peace was restored without too much delay into balance."

"Canada stands at the crossroads," Mr. Howe declared, "either our price stabilization will fall, and the boom and bust periods that we had planned to avoid will take place, or stability will win out and enable the 'ship-of-state' to ride through on an even keel until demand and supply can be brought into balance."

Address of Mr. R. J. Tallon

Mr. R. J. Tallon, Labour Representative on the Unemployment Insurance Commission, delivered an address before the convention in which he attested to the difficulty experienced by the Commission in getting local unions throughout the country to take full advantage of the services being offered by the Commission. "We have even to argue and coax union members to serve on local employment advisory commissions."

Address of Jan Schuil of the International Labour Office

Mr. Jan Schuil, who succeeded Mr. Ad. Staal as Chief of the Workers' Organization Services of the International Labour Office, on the latter's retirement, spoke of the progress made by the International Labour Organization in recent years. He informed the delegates that the ILO had not the power to impose its recommendations in the various affiliated countries but what it attempts to do, is to hold up before the government of each country, the minimum which it believes the working men should have. Mr. Schuil regretted his inability to remain during the sessions of the conven-

tion due to the fact that the ILO was in session in Montreal and his presence was required there.

Address of Matthew Woll

After extending greetings from the American Federation of Labour, Mr. Woll, Vice-president of the Federation, informed the delegates that he was attending the Convention on a "mission of fraternity, not paternity. A slight misunderstanding has crept into the relationship of the two groups," the Vice-president stated "but the difference was one of procedure not objective. The American Federation of Labour feels it must enforce laws requiring unions to pay dues. The machinists withheld their per capita tax for a year and other unions began to question how they got away with it. As a result," he declared, "the American Federation of Labor was compelled to expel them."

Mr. Woll declared that "no one in the Council of the American Federation of Labour has ever questioned the autonomy of the Trades and Labour Congress of Canada. You are a separate, I won't say independent, for we are inter-dependent organizations, but autonomous." The delegates were informed that of the three points preventing the machinists from rejoining the American Federation of Labour, two had been resolved and conferences on the remaining issue were expected to start next month. He expressed the hope that the International Association of Machinists would once more take their place in the American Federation of Labour and leave unchallenged the status of the Trades and Labour Congress of Canada.

Turning to broader labour questions, Vice-president Woll envisaged an international labour organization, possibly affiliated with the United Nations Organization dealing with the problems of workers of the world. He outlined the problems the labour movement had faced in the past and faces "today." In spite of them, he stated, "the American Federation of Labour has a paid up membership of over 7,000,000—the C.I.O. has 5,000,000 and independent unions 2,000,000."

The fraternal delegate suggested the formation of a council of labour composed of an equal number of members from the American Federation of Labour and the Trades and Labour Congress of Canada which would meet from time to time for the purpose of co-operating and co-ordinating the activities of the two labour bodies.

During his address, Vice-president Woll criticized various countries for their use of prisoners-of-war as he feared it would undermine labour standards.

Report of Executive Council

In the report of the Executive Council, the members were informed that since the last convention, there had arisen questions affecting the policies of the Congress on which the Executive had to decide to act. While these matters were of a character on which differences of opinion could easily have arisen, the report stated, all decisions and recommendations were arrived at unanimously. The attention of the delegates was particularly directed to the memorandum presented to the Dominion Government on April 4, 1946 (L.G. April 1946, p. 440).

The Executive in referring to the appointment and services of the late Tom Moore as one of the labour representatives on the Governing Body of the International Labour Office at Geneva, stated that "he had established an international reputation as one of the authentic voices of organized labour throughout the world." As President of the Trades and Labour Congress of Canada, the report continued, he had seen established such social legislation as old age pensions, unemployment insurance and workmen's compensation which were among some of the measures that formed part of the policy of the organized labour movement in Canada.

In the loss of Tom Moore, labour in this country has lost a staunch friend, the report stated. "However, his life's work will stand as a monument to his memory and an inspiration to those who follow in his footsteps."

The Executive referred to the presentation to the Standing Committee on Immigration and Labour of the Senate of Canada in which was presented the views of organized labour, as expressed at the Annual Conventions of the Congress from 1886 to 1944 (L.G. Aug., 1946, p. 1036). It was pointed out that the brief contained no change in the view which is contained in the platform of principles of the Congress which states, "exclusion of all races that cannot be properly assimilated into the national life of Canada."

In dealing with the subject of Income Tax, the Executive, while admitting that direct taxation on incomes is the fairest method of raising the necessary moneys for the reason it is in conformity with the ability of the citizen to pay, recommended that exemptions should be raised to \$2,400 per year for married persons and \$1,000 per year for single persons. It was contended that incomes below these amounts were fully required by the workers in order to meet financial obligations and maintain themselves and their families in balance with present day standards of living in Canada, and, therefore, should not be taxable.

Among other questions dealt with in the report of the Executive were: The St. Jerome

situation; Suspension of Montreal Trades and Labour Council; Aluminum Defence Fund; Cigarette Fund; Publicity, and Trades and Labour Congress Journal; together with a review of provincial legislative reports.

Address of Hon. Paul Martin

In addressing the Convention, Hon. Paul Martin, Secretary of State for Canada, informed the delegates that from the ranks of labour have come many who can be called "labour statesmen." These are men, he stated, "who think outward from trade union organizations toward the world community and clearly see the part labour must play in the new world security organization."

Among these he mentioned Ernest Bevin, Keir Hardy, Philip Murray and Percy Benough and the late Tom Moore.

Hon. Paul Martin, recently returned from the Third Session of the Economic and Social Council of the United Nations Organization, stated, "that the main objectives of this council were:

- (1) Opening up the channels of trade by general reduction of tariff barriers and by establishing certain advisory bodies to work toward general co-operation in trade matters.
- (2) Improvement of labour conditions and social standards throughout the world.
- (3) Control of international commodity agreements and cartels.
- (4) Providing the means for developing the backward areas.
- (5) Through specialized agencies like the Food and Agriculture Organization and the World Health Organization, to seek to improve the production and distribution of the food resources of the world and raise the health standards of all countries.
- (6) To provide for the resettlement of refugees and displaced persons as soon as possible and to explore opportunities for the migration of peoples in congested areas to more sparsely populated places.

One of the special organs of the Economic and Social Council, stated Mr. Martin, "is the International Labour Organization, the oldest in point of service of any of the agencies which will work with the Council. Since its establishment in 1919, as an organ of the old League, the ILO has been continuously at work improving the conditions of the working people all over the world. We have at hand the basic tools for peace," asserted the Minister, "and if we use these tools wisely, with prudence and foresight, we can re-create the world. Canadian labour should be marshalled on the side of these positive forces."

Address of Charles Jarman

Mr. Charles Jarman, Secretary of the National Seamen's Union, fraternal delegate

from the British Trades Union Congress, stated that, "the exchange of fraternal delegates not only provides an opportunity for friendly messages, but also for giving Congress delegates in one country some up-to-date and useful information about the state of affairs from the trade union viewpoint in the other country." Mr. Jarman reviewed the legislation already enacted by the Labour Government in Great Britain and gave in broad outline a description of the government's program which he stated fell into two parts, namely—socialist legislation and social legislation. Under the second heading, he discussed the principle and purposes of five acts of parliament or parliamentary measures on their way to becoming acts of parliament. These were: Family Allowance Act; Industrial Injuries Act; National Insurance Act; National Health Service Act; and Disabled Persons Act.

Coming under the first heading, Mr. Jarman stated was the socialization of basic industries and vital services, such as mines, transport, electrical power, iron and steel manufacture. Mr. Jarman informed the delegates that a bill to transfer the mining industry from private hands to public control was now practically through all its parliamentary stages. This is one instalment of comprehensive legislation which will bring under national ownership the electricity supply industry and the gas industry, transport, steel, civil aviation and cable and wireless.

Departing from his outline of accomplishment of the British Labour Party, Mr. Jarman defended the use of enemy war prisoners in labour gangs, stating "there is no slave labour in Britain today," and asking "is there any reason why these people who tried to destroy everything progressive in Europe should not do something to repair the damage? We are not desirous of holding any Germans in thralldom but we want to be sure it doesn't happen again."

Report on Standing Committee on Reconstruction

Mr. John Bruce, Chairman of the Standing Committee on Reconstruction presented his report. Among the pertinent questions raised in this report were: Are essential products being denied Canadians at home while those who can pay the price outside the country are getting ample supplies of Canadian made articles? Are supplies being held for higher prices?

"The workers are seriously alarmed at their inability to secure the necessities of life, while reports of the productivity of our industries, still demonstrate that we can produce what

we require, but goods are not on the domestic market," the report declared. "It would appear evident that these goods are finding outlets through foreign markets or being withheld from distribution in the hope of receiving higher prices and we should demand of the government that our national requirements be first met before goods are released for export."

The report emphasized that the housing problem in Canada was one of equal emergency with the war years. "The situation is one that should cause alarm and requires the earnest consideration of the Convention," the report stated. The committee was of the opinion that provided the means and materials can be produced, "homes fit for heroes to live in," can be built if the same incentive and objective are set forth as during the war. The committee suggested subsidizing industry and stabilizing costs by government control. It also suggested removing from banks, insurance companies and private loan agencies, the financing of homes.

The report recommended the establishment of a government-formed immigration committee, comprising members of all parties to "thoroughly study a plan of selective immigration."

The report further recommended the nationalization and control of the nation's financial institutions and credit machinery.

In concluding, the committee requested that Congress representatives be invited to sit on all bodies having to do with the problem of peace.

Financial Report

The report of the secretary-treasurer, Mr. J. A. Sullivan, showed total receipts from all sources for the period ending July 31, 1946, amounted to \$117,202.05, expenditures of \$107,438.55, leaving a net balance for the year of \$9,763.50. Total assets over liabilities amounted to \$114,497.84. The total paid-up membership as at July 31, 1946, was approximately 330,000.

Report of Committee on Education

A report on education was submitted by Mr. C. J. Oakes, Vancouver, B.C., a member of the British Columbia Teachers' Federation.

The report called for the establishment of a federal department of education which would work in support of all progressive education problems such as a national minimum standard of education for all.

Officers' Salaries Increased

The delegates voted to increase the President's pay from \$6,000 to \$6,500, and his daily incidental expense allowance from \$3

to \$7: The secretary-treasurer will also receive \$500 more, bringing his income to \$4,500, with the same expense allowance as the president.

T. and L. C. Jurisdiction

Six resolutions dealing with the jurisdictional rights of the Trades and Labour Congress of Canada were referred to the Committee on Resolutions. These resolutions upheld the stand taken by the Executive of the Congress in regard to certain differences which had arisen between that body and the American Federation of Labour over the request of the latter organization for the expulsion of the Canadian membership of the International Association of Machinists, an affiliate of the Congress. After some discussion on the subject the Convention endorsed an amended resolution which read as follows:

That this Sixty-first Convention of the Trades and Labour Congress of Canada, while expressing its most sincere desire for continuance of its close fraternal relationship of long standing with the American Federation of Labour, reaffirms its independent status as an independent Canadian trade union centre, with full autonomous rights within the borders of Canada. That this Convention expresses its appreciation to President Bengough and Executive Officers of the Congress for the firm stand they have taken on behalf of the independence and autonomous rights of this Congress and for the honest manner in which they have brought the situation to the attention of the membership.

Four resolutions were referred to the Committee on Constitution and Laws requesting changes in certain sections of the Constitution governing the action to be taken by the Trades and Labour Congress of Canada in cases where the American Federation of Labour had expelled international unions with Canadian membership in affiliation with the former organization. The Convention adopted a recommendation of the Committee whereby the subject matter of these resolutions was to be referred to the Executive with instructions to bring forward, after study, such changes in the constitution as were necessary.

Foreign Affairs

Eight resolutions were referred to the Committee on Resolutions dealing with Foreign Affairs. A number of these resolutions called for closer relationship with the USSR while others urged the removal of the Franco dictatorship in Spain. The Committee submitted the following substitute which was adopted by the convention:

That this Congress express alarm over the dangerous, divisive and war-menacing trend which is apparent at the present Paris Peace Conference and undertakes, therefore, to play an active and constructive role in influencing and shaping our country's foreign policy to the end that the voice and influence of Canada shall be exercised for the democratic solution of all outstanding problems on the basis of the Atlantic Charter and the agreements arrived at, at Yalta, Teheran and Potsdam, by the Big Three;

That we demand of the Canadian Government that in the current peace and other United Nations' Conferences, Canada shall champion policies that will completely destroy the last remnants of fascism and colonial oppression; that Canada shall support the inalienable right of all people and nations to independence and self-determination; that Canada shall oppose every and all efforts to again divide the world into hostile blocks; that Canada shall strive relentlessly to retain the unity of the Big Three for such unity is indispensable to lasting peace; and Canada shall withhold economic and political support from Governments who seek to perpetuate feudal and colonial oppression.

That our Government be asked to speedily improve its relations with our Allies and other democratic countries who are willing to co-operate with us. Our Government shall also be asked to establish favourable trade relations with those countries. They are in need of the products of our farms, factories and mines; they represent the biggest potential market for Canadian exports and they can thus help to provide employment and economic expansion for our country and cement a firmer, peaceful and economic relationship between us and the hundreds of millions of their people.

Political Action

On the question of political action seven resolutions were considered by the Committee on Resolutions. The Convention approved an amended resolution submitted by the committee which read:

That this Convention enlarge upon the scope and function of the non-partisan political work of this Congress to make it more effective and dynamic in the service of all the common people of this land by:

(1) Appointment of non-partisan National Political, or Legislative Action Committees,

(2) The Committee elected for this purpose at this Convention to be charged with the responsibility of helping in the election of provincial and municipal committees in every community and union to explain their public activity on behalf of the Congress principles and program and all public issues affecting labour and the people from day to day;

(3) These Committees to be charged with the task of advising all workers on public questions to take part in matters of public life and responsibility, and to work untringly and unceasingly in a non-partisan way for the defeat of reaction in administrative bodies and governments of this country and for the election of genuine and sincere working class representation in all types of government throughout the nation;

Cost of Living

On the subject of cost of living, eighteen resolutions were considered by the Resolutions Committee and on its recommendation the Convention adopted the following substitute:

That this Convention of The Trades and Labour Congress of Canada make known its belief that:

(1) The present situation is brought about by the selfish policies of big business and by the wage, price, and taxation policies of the government.

(2) Prices have risen sharply, not because of the workers' demand for higher pay, but because the Government scuttled price ceilings, eliminated subsidies from essential commodities and based its whole price policy on the assumption that the high profits of industry must be protected and maintained.

(3) The Government has insisted on keeping wages frozen. Only when the inevitable strike movement got under way did the government agree to some wage increases, and even then it tried to keep these at a 10c. hourly maximum.

In the light of these experiences this Convention goes on record for:

- (a) Immediate government action to roll back prices to the level of January, 1946, and the strict enforcement of price controls;
- (b) The independent development of a public campaign by this Congress, its affiliated unions, and other bodies, such as consumers' leagues, housewives' associations, farmers' organizations, etc., against unwarranted profiteering and price increases;
- (c) The elimination of wage controls with the exception of minimum wage standards and the institution of profit control with permission of price increases only after a reasonable profit margin has been established and only when proven that profits are not hidden in the countless reserve funds which big business established during the war to conceal the real profits;
- (d) Government action to end the slow-down strike of industrialists in their effort to boost prices to gain further concessions from the Government and to squeeze labour, as demonstrated in the recent shutting down of production by management for many months in textile, rubber, steel, etc.;
- (e) Speedy action by the Government is necessary to cause the speediest attainment of full production to remove the inflationary threat and to return to normal conditions.

Failure on the part of the Government to adopt such a policy will compel labour to ignore the existing government agencies and seek other ways to achieve conditions that will assure the Canadian workers and the majority of people a sufficient income to protect and raise their living standard and to increase the peoples' purchasing power so that they may be able to buy the things they produce.

Other Resolutions

Many other resolutions were adopted by the Convention, among which were the following:—

That in future a fee of \$1 be charged for each resolution submitted;

Urging that government employees be granted the right of collective bargaining as set forth by Orders in Council governing employees of private industries, crown companies and the National Harbours Board;

Abolition of all home work where such work, by common practice, has been done in factories for that purpose;

Seeking legislation, making it illegal to employ children under 16 years of age in Canada;

Advocating government financial assistance to promising students to complete their education;

Requiring that all school curricula throughout the Dominion of Canada include a study of the organized labour movement;

Establishment of a national health insurance scheme to provide cash benefits to maintain income during illness;

The integration of curative and preventive work and the provision of necessary personnel to guarantee to every person the maximum medical and dental benefits;

Labour representations on all administrative bodies;

That all persons shall have free choice of any professional curative service;

Recommending the setting-up of committees to compile a true cost of living index based upon commodities purchased by the workers that will be a guide for negotiating increased wages and reduction of hours to maintain decent living standards;

Pressing for the nationalization of basic industries and the transportation systems of Canada;

Demanding changes in the criminal code of Canada, which will prevent the use of the courts to restrain legitimate trade unions from strike action and picketing;

Favouring a national labour code;

Demanding that Order in Council P.C. 3689 be rescinded;

Endorsing the principle of recognition of all statutory holidays with pay and the establishment, through negotiation, of proper compensation for work performed on any statutory holiday;

Urging amendments to the Canada Shipping Act;

Favouring close co-operation between the Congress and its provincial bodies and the national and provincial farm organizations;

Calling for united action on a national scale on behalf of all organized works in Canada;

Condemning the use of police in labour disputes and demanding the release on bail of Miss Madeline Parent, Organizer of the United Textile Workers of America.

Election of Officers

The election of officers resulted as follows:—

President, Percy Bengough, C.B.E., Ottawa; Vice-Presidents: Maritimes—J. A. Whitebone, M.B.E., Saint John, N.B.; Quebec—Arthur D'Acoust, O.B.E., Hull, P.Q.; Ontario—J. W. Buckley, Toronto, Ontario; Prairie Provinces—Carl E. Berg, M.B.E., Edmonton, Alta; British Columbia—Birt Showler, M.B.E., Vancouver, B.C.; Secretary-Treasurer, J. A. Sullivan, Ottawa.

The following are the Provincial Executive Committees:—

Nova Scotia—G. A. Smith (Chairman), Halifax; J. J. Campbell, Halifax; Ben McKenzie, Lunenburg and Nevin Cameron, Sydney.

Manitoba—Gordon Wilkinson (Chairman), Winnipeg; T. B. Ward, Flin Flon; James McDuffe, Brandon; Chester King, Winnipeg.

Saskatchewan—S. J. Tabbut (Chairman), Prince Albert; J. Griffith, Saskatoon, P. Mikelson, Regina; F. Ingram, Moose Jaw.

British Columbia—R. K. Gervin (Chairman), Vancouver; G. A. Wilkinson, Victoria; H. A. Webster, Ocean Falls; William Rigby, Vancouver, B.C.

(The Provinces of Alberta, New Brunswick, Ontario and Quebec having provincial federations of labour chartered by the Congress, the executive officers carry on the legislative work of these provinces.)

Fraternal delegate to the British Trades Union Congress, D. A. Dunlop, International Association of Firefighters, Toronto, Ontario.

Fraternal delegate to the American Federation of Labour, Percy R. Bengough, C.B.E., President, Trades and Labour Congress of Canada, Ottawa, Ontario.

Hamilton was chosen convention city for 1947.

Canadian Congress of Labour

WITH 754 accredited delegates in attendance, which President A. R. Mosher held to be the largest number recorded for any labour convention in Canada, the Canadian Congress of Labour held its sixth annual Convention in the Royal York Hotel, Toronto, during the week commencing Monday, September 23.

The number of attendant delegates represented an increase of 260 over the number present at the Congress' previous convention held in Quebec City in 1944. In the period between the two conventions the Congress recorded the affiliation and establishment of 2 new provincial federations, 7 district councils, 78 directly chartered unions, 4 international unions and 2 national unions. The total membership of the Congress was reported as now being approximately 350,000.

Some 270 resolutions were placed before the Convention embracing the views of a large segment of organized labour on questions both national and international in scope.

Greetings were extended to the delegates by Monseigneur E. M. Brennan, Rev. Dr. W. W. Judd and Rabbi Abel Feinberg, all of whom referred to the interest of the church in the affairs and problems of organized labour. Mr. Elroy Robson, President of the Toronto Labour Council, expressed the Council's pleasure at being host to the out-of-town delegates. Controller David Balfour extended the civic welcome to the Convention on behalf of Mayor Saunders. He stated that he believed the future of Canada was in the hands of labour and voiced the desire of the civic administration to co-operate with the Congress.

Fraternal greetings from the CIO were conveyed to the delegates by Mr. Hugh Thompson, Buffalo regional director of the

CIO, on behalf of President Phillip Murray. He told the Convention "not to let anything create an impression of disunity. You must go forward united to win the battles for higher wages and better conditions."

Address of Mr. A. R. Mosher

"One of the most decisive factors in the present situation is the willingness of a considerable number of workers to place political considerations ahead of their loyalty to the labour movement," Mr. A. R. Mosher said in his presidential address.

"It must always be kept in mind that politics are simply a means to be used by labour in attaining the kind of government it wants," said Mr. Mosher.

"If politics become the master labour is enslaved. Labour must lay down the policies relating to matters of direct concern to it and insist that these be followed by the political party to which it gives support. Labour must never be subservient to any political party, even its own.

"On the other hand, it is becoming more and more evident that the labour movement dare not confine itself wholly to its activities in the economic field. There has been a growing tendency toward intervention of government in industry and in some respects toward complete control of industry by government. This was accentuated during the war, because when a nation is threatened with the loss of its freedom and its very existence it cannot afford the luxury of a competitive economy system."

Mr. Mosher said that although one political party, the C.C.F., is endorsed by the Congress, there is no affiliation. The C.C.F., he stated, "represents, in my opinion, a closer approach to the principles and policies of Canadian labour than any other. I believe, further, that

it holds out greater promise of industrial peace, economic security and human happiness than any other party in Canada and that it wholly deserves the support of Canadian workers."

"While our political system in Canada is referred to as a democracy, labour never has been adequately represented in the past and I believe it can obtain adequate representation only through a political party founded upon the principles which labour has adopted and which it would apply to the management of social and economic activities."

Pointing out that the Congress is only six years old, Mr. Mosher said it is now "unquestionably the largest, the most progressive and the most militant labour organization in Canada.

"Much of labour's weakness in Canada as in other countries," he stated, "is due to the existence of more than one central labour body and this division in labour's ranks not only weakens the movement but requires endless explanations, since such divisions are wholly unwarranted."

Mr. Mosher stated that, in his opinion, the much-needed unity of labour will be forthcoming, along with increased and intensified organization of workers still unorganized.

He paid tribute to the work of the World Federation of Trade Unions established since the Congress' last convention, and said it was a "source of great satisfaction" that Pat Conroy, Congress secretary-treasurer, is a member of the executive of the W.F.T.U.

The failure of nations to reach agreement on world peace, he added, "may be due to the fact that labour as such has not so far been permitted to participate in the deliberations regarding these matters. Labour is a great unifying force. Labour provides a basis of association for workers in every land and in every occupation."

He stressed the importance of the principle of public ownership "which involves the reconstruction of the present competitive profit system and its development into a system in which the natural resources, the technical skill and the productive machinery of the nation will be fully utilized to provide the highest possible standard of living for all the people.

"The inability of the present system to meet the demands made upon it was demonstrated recently by the statements of the representatives of government and industry before the House of Commons Industrial Relations Committee to the effect that the increase in wage-rates of more than 10 cents an hour would make price control impossible and cause disastrous inflation.

"There are hundreds of thousands of workers in Canada whose wages, even with a 10-cent-

per-hour increase, would still be wholly inadequate to provide decent standards of living."

Mr. Mosher emphasized there must be unity within the Congress, pointing out that the Congress' policies have been attacked by leaders of C.C.L. unions and adding: "It appears obvious to me that any union which is not prepared to respect such policies (those adopted by the Congress) has no right to participate through its representatives in the deliberations of the executive council of the Canadian Congress of Labour."

Address of Mr. Pat Conroy

Secretary-Treasurer Pat Conroy, who is a member of the executive of the World Federation of Trade Unions, reported the proceedings of the first Congress of that organization held in Paris from September 25 to October 13, 1945. (L.G. Jan. 1946 p. 26).

He stated that the Federation dedicated itself to the task of preserving and strengthening the unity displayed by the peoples of the United Nations in their successful efforts against the common enemy on the battlefield. "The only guarantee of stable and lasting peace lies in continued co-operation and friendship among the peoples of the United Nations and the unshakable unity of their governments.

"What we have done in Paris in establishing a mighty organization of the working people of the world, is the best assurance that this great objective shall be accomplished."

Of more practical consideration were the plans adopted for the establishment of International Trade Departments for each separate industry in every country affiliated with the W.F.T.U.

"The work of organizing Trades Departments within the Federation is in its infancy and presents problems of great magnitude but it is proceeding apace under a separate department. The day is not far distant when each industry will have its own International Trade Department, within which the problems of each industry the world over will be attacked on a world basis, with a view to bringing about levels and objectives for each industry on a world scale."

Mr. Conroy stated that it would be wrong to expect great immediate benefits from the Federation, and that for considerable time the effect would be psychological.

"It will be some time before the world body will be able to develop a working mechanism that will be an effective instrument for the attainment of its objectives. The new world centre starts off with tremendous work to do, and to accomplish that work great resources,

both human and financial, will have to be built up.

"It does, however, provide a promise of greater things for labour in all countries. The greatest contribution that can be made to the effectiveness of the Federation is by a growing and developing movement, not only in our country but in all countries. The unification of the forces of labour in Canada is the primary interest of Canadian workers. When such unification is developed, then Canada can make a much more effective contribution all round, both at home and abroad."

Address of Mr. Rhys J. Davies

Mr. Rhys J. Davies, British Labour Member of Parliament for Lancashire, addressed the Convention following an extensive debate on political action which he said demonstrated the immaturity of the Canadian labour movement. "You were debating what we debated more than 40 years ago," he said, "and I have seen our party grow from small numbers to where it now governs the biggest empire in the world.

"British labour has been disillusioned about Communism. Our chaps used to believe that Communism was a march to the left, but they don't any more.

"No Socialist can possibly level any criticism against the economics of the Soviets, especially in relation to public ownership, but when the issue is elevated to a plane where it belongs, into the realm of intangible things of the spirit, then our quarrel is as much against Communism as against any other authoritarian proposition."

He said that the British Labour Party was opposed to the authoritarian concept of government where a relatively few people retain permanent control.

Referring to the situation in the British coal mines, he said that private enterprise had failed. "We have nationalized the mines, determined that the lot of the miner will be better under the state.

"We are determined that everything in the state will be nationalized for the good of the people.

"Our party is a clean party; there is no graft in our politics. Fundamentally the most important thing is to have clean men in politics."

Address of Mr. Herbert A. Spence

Mr. Herbert A. Spence, Regional Supervisor for Ontario of the Industrial Production Co-operation Board, congratulated the Congress and affiliated unions on the "splendid

contribution made in raising the living standards of the workers in this Dominion and for the parts they have played in the enactment of legislation designed to advance their social welfare."

He stated that the growth and development of unions is exemplified by the three stages of warfare, truce and co-operation that usually characterize union-management relations. The chief reason that many have failed to experience the co-operation is inertia. "It has seemed to me that almost all these efforts could have been successful had help been available. Apparently others thought the same thing because the Government of Canada, through the Industrial Production Co-operation Board, is now making help available to those who will accept it."

In presenting a short historical account of labour-management production committees, Mr. Spence gave several specific examples of benefits that have resulted both in co-operation and production from such activity. He stressed the importance of divorcing the problems of production from collective bargaining issues; "experience has shown that there should be a separation between bargaining and co-operation and it is for this reason also that we recommend separate committees."

The subjects for discussion by labour-management production committees, he said, "are many and, as long as they avoid collective bargaining issues, any problem or suggestion may be considered. There is for instance the important problem of the handling, care and conservation of tools and maintenance of equipment. Then there is safety and good housekeeping, reduction of absenteeism, curbing shortages of critical materials, scrap reduction drives, improved handling of goods and materials and the introduction of various labour-saving devices which will come to your notice. Management must be prepared to speedily accept or reject Committee recommendations with reasons. If they neglect to take action they should be called to account for the delay, on the grounds that this is a two-way effort."

Report of Executive Council

Eleven meetings were held in the two-year period under review, the report of the Executive Council stated. Most of these meetings were preceded by meetings of the Executive Committee.

The report reaffirmed the Congress policy of favouring seniority for veterans; and described the failure experienced in the attempts to establish closer co-operation with the Trades and Labour Congress.

The report reviewed in detail the presentation of the Congress' memoranda to the Federal Government on April 24, 1945 and on April 5, 1946. (L.G., April, 1946, p. 443).

The objectives of the wage-policy formulated in February, 1946, were described as follows:

1. A general increase in wages, in order to provide an adequate wage-income to ensure every worker a higher standard of living;
2. A reduction in working hours to forty hours or less per week with the same or higher "take home" pay;
3. The increase in production of consumer goods to the utmost possible extent, with a view to preventing increases in prices;
4. The maintenance of a policy of price-control and subsidy of agricultural and other necessities of life, in the belief that if Canadian industry is properly organized and co-ordinated, no general increases in prices are necessary to meet increased wage-rates.

Other matters dealt with in the report were the World Federation of Trade Unions; the activities of the Council in the Ford strike; policy regarding chartered unions, and the service provided by the Congress officers and staff to Congress unions.

In February the Executive Council adopted a resolution urging the Dominion Government to undertake an investigation of the housing situation in Canada and to take emergency powers, where necessary, to bring about the greatest possible construction of low cost homes as expeditiously as possible.

Political Action

An eight hour debate occurred on the Resolution Committee's recommendation that the Convention adopt a substitute resolution reaffirming the political action program of the Congress. The debate was precipitated when C. S. Jackson, Canadian Director of the United Electrical Workers, moved that this substitute resolution be referred back to committee and an amended resolution calling for non-partisan, independent, political action be returned.

Much of the controversy centred around the contention that the previous policy endorsed the C.C.F. party as the political arm of the Congress and that no one party should represent the trade union movement. Supporters of the substitute resolution generally claimed that it did not rigidly bind C.C.L. affiliates to support the C.C.F. and characterized the opposition as being motivated by

the desire to establish a non-partisan program in order to secure control for the Labour Progressive Party.

Mr. Pat Conroy, the last speaker in the debate, said that "the issue at this Convention is whether the L.P.P. will dominate this Convention or whether it will remain in the hands of its members."

The amendment was defeated by nearly a 3 to 1 majority and concurrence in the Committee's recommendation was carried by a slightly larger majority.

As adopted, the resolution was as follows:

Be it resolved this Convention of the Canadian Congress of Labour re-affirms the Political Action Program of the Congress and urges that the Political Action Committee undertake to make whatever constructive amendments are necessary to advance this program.

Strike Vote

An appeal by Mr. Pat Conroy that the Convention express its dissatisfaction with Order in Council P.C. 3689 (L.G. Sept., 1946, p. 1187) embodying the House of Commons Industrial Relations Committee recommendation for the taking of a secret Government-conducted strike-vote in industrial disputes (L.G. Sept., 1946, p. 1331) resulted in extensive discussion. An amendment to refer an original resolution, calling for emphatic protest and resistance to the Order's application, back to committee for strengthening and "putting some teeth into it" was carried by a standing vote. The substitute resolution brought back was as follows:

Resolved that this Canadian Congress of Labour emphatically protest and denounce the infamous clause six of the Industrial Relations Committee report now embodied in Order in Council P.C. 3689 and be it further resolved that this Convention instruct the incoming council and executive to resist the application of this Order in Council and to have it repealed and to this end we urge that they call upon all affiliated unions, Congress councils and provincial federations and also seek joint action with the Trades and Labour Congress of Canada.

Housing

A substitute resolution recommended by the Resolutions Committee, in place of 14 others submitted on the subject of housing, was adopted as follows:

Be it resolved that this Sixth Convention of the Canadian Congress of Labour demand that the Government of Canada amend the National Housing Act to provide for Government-subsidized, low-rental housing to meet the needs of one-third of our population at present living in overcrowded, condemned, unsanitary dwellings, due to their economic conditions, and,

Be it further resolved that, Crown companies be established to manufacture the

component parts of houses, and that low-cost housing loans be made available so that any worker may be able to acquire a home for himself and his family, and,

Be it further resolved, that the Executive of this Congress institute a nation-wide campaign, in co-operation with affiliated unions, to persuade the Federal Government to provide such legislation and funds.

National Labour Code

The Convention adopted the following resolution in place of numerous others dealing with a National Labour Code:

Be it resolved that this Congress Convention most strongly and urgently requests that the Federal Government immediately enact a National Collective Bargaining Act, which will guarantee to Canada's workers the legal right to organize into trade unions, and bargain collectively with their employers; outlaw company unions and blacklisting; provide guarantees for union security, and make it a federal offence for employers or associated interests, by any means, to dissuade or discourage the formation of trade unions, or to dictate the form of association which workers adopt, or to refuse to negotiate in good faith with the trade union of the employees' choice.

And be it further resolved that this Convention endorse the actions and proposals of the Congress Executive to the Dominion Government for a National Labour Code, and we urge that they continue to press for this legislation.

Foreign Policy

On the question of foreign policy the Convention adopted the following resolutions:

Whereas there can be no denial that the world today is threatened with the possibility of a catastrophic war, that selfishness of nations, strident nationalism, arrogant imperialism, large standing armies, is the order of the day. It is with this in mind that this Convention urges upon all governments to uphold and promote policies which will give the world a just and lasting peace. Peace in our opinion can be maintained if all nations would:—

1. Renounce all claims to territories arising out of the recent conflict.
2. Provide for free elections that would permit peoples to choose freely and democratically their respective governments under the supervision of the United Nations Organization.
3. Progressive disarmament.
4. Promotion of international co-operation economic and otherwise with provision for free trade and commerce.
5. Making available free access to the resources of the world that they may be enjoyed by all peoples.
6. Strengthen the United Nations Organization to make it an effective instrument of peace and social justice.
7. Renounce spheres of influence and the evils flowing therefrom.
8. Practice freedom of speech, press and religion.

We sincerely feel that any nation which pursues policies contrary to these stated

principles is directly contributing to war. We condemn such nations and pledge all our efforts to resist any onslaught against the peace of the world towards the end that we shall obtain a world of plenty, of justice and of democracy—economic and political.

A resolution urging the immediate breaking off of diplomatic relations with Spain and formal recognition of the Spanish Republican Government in exile was adopted.

The convention also adopted a resolution urging the Labour Government of Britain to allow free Jewish immigration into Palestine.

Other Resolutions

A large number of other resolutions were adopted, some of which were as follows:

That the Executive of this Congress intensify its efforts, in co-operation with affiliated and chartered unions, to achieve legislation enforcing the 40-hour week and accompanying wage-legislation guaranteeing maintenance of the same "take home" pay and the provision of adequate overtime penalty rates.

Urging the Provincial and Federal Governments to enact legislation making compulsory the granting of a minimum of two weeks' annual vacation, with pay, to all Canadian workers.

Calling upon the Federal Government to see to it that the function of the Department of Labour is returned to a basis of impartiality and objectivity.

That representations be made to the Government to amend the Veterans' Land Act to enable any veteran to secure land for a homestead within or adjacent to an urban centre wherever he may so choose without limitations as to size or location.

Commending the efforts and work of Congress officers in the establishment of World Federation of Trade Unions and pledging continued affiliation of the Canadian Congress of Labour and effective implementation of the decisions and policies of the W.F.T.U., particularly the demand of the W.F.T.U. that it be admitted to the United Nations, its commissions and councils, especially those related to peace, social and economic problems.

Urging the Dominion Government to change its present method of compiling the cost-of-living index by a more balanced breakdown of the various items, so that it may more truthfully represent rising costs.

Protesting against the methods employed by the Dominion Government in setting up a Commission in the recent espionage charges and the holding of persons incommunicado without proper trial or right of defence by reversing the established principle of the innocence of the accused, until guilt has been proven in the traditional practice of British Justice.

Approving permission to refugees and displaced persons to immigrate who can contribute to the welfare of our people and the building of a greater Canada, consistent with Canada's ability to absorb these people.

That, as a pre-requisite to achieving social security measures, unity of farmers and industrial workers is a prime essential, therefore the Congress places itself on record as supporting the struggle of the farmers of Canada in their efforts to achieve economic security, as

exemplified in the present non-delivery strike, and suggests that a conference between Labour Organizations and the official spokesmen of the farmers of Canada be arranged for the purpose of working toward complete unity between both groups in our demands for social security.

Urging upon the Federal Government immediate action to effect passage of a National Minimum Wage Act, with a minimum rate of at least 75 cents per hour, and that this Convention authorize its Executive to make such representations as it may see fit in this regard.

That representations be made to the appropriate Governments in an endeavour to have legislation enacted to provide that all workers who may be required to work on statutory holidays be paid penalty overtime wage rates for such work.

That in view of Canada's growing interest in external affairs and the part she is destined to play in the settlement of European problems, the Federal Government be requested to give serious consideration to the appointment of Labour attachés, to be selected from recommended lists prepared by the major Labour bodies in Canada.

Pressing upon the Federal Government to adopt protective legislation ensuring the maintenance of the shipbuilding and ship repairing industry and providing for the highest employment level possible within the industry.

Giving full support to the principle of guaranteed annual wages. The creation of a Dominion Liaison Committee, formed of Farm, Labour and certain professional groups, to the end that the objectives of all such groups may be co-ordinated, and the viewpoint of organized Labour placed clearly before such organizations.

Pledging full support to the efforts of the United Nations Relief and Rehabilitation Agency for relief and rehabilitation in war-devastated areas, and asserting that assistance must be extended to the hungry and homeless of every land without discrimination.

Urging petitioning the Provincial and Federal Governments to inaugurate a system of regional safety boards, representative of Labour, Management, and Government.

Requesting the Government of Ontario to make a complete study of industrial diseases with a view to having any new diseases to which workers are liable covered by the Workmen's Compensation Act.

That representations be made to the Federal Government to have legislation enacted to provide for a National Health Insurance Act to cover all citizens in Canada.

That the Canadian Congress of Labour go on record as supporting the Women's International Democratic Federation and call upon all Women's Auxiliaries of the Congress and all local unions to lend their assistance with all other organizations toward the establishment of a Women's Congress for Peace in Canada.

That the teachers of this country, through their respective provincial federations, would materially improve their economic status by close co-operation and affiliation with the Canadian Congress of Labour.

Demanding that the Dominion Government assume a greater financial responsibility in regard to the needs of education, and that to begin with, they make special grants to the provinces and school districts for such items as libraries, visual education, health and health education, buildings, equipment, etc.

Recording opposition to removal of any government subsidy from the sale of fluid milk.

That any government-owned vessel sold to Canadian shipping interests at a reduced price valuation be retained under Canadian ownership as a condition of sale.

Urging that all sea associations co-operate with ship-repair unions in Canada to prevent shipping companies from again reviving a policy whereby ships' crews are obliged to perform ship repair work which has been performed by shore workers during the past six years.

Instructing its members on the National Film Board Advisory Committee to protest to the Government the change in Government policy curtailing the budget of the National Film Board, which has the effect of prohibiting it from providing operators on the Trade Union Circuit.

Requesting the Federal Government not to reopen the Winnipeg Grain Exchange, but to keep it closed permanently in the interests of the farmers of Western Canada in particular, and the Canadian public as a whole.

That the Federal Government be urged to abolish the Canadian Senate as an undemocratic body, being neither elective nor representative, and utterly antiquated and outmoded in this day and generation.

Making all radio broadcasting a public utility, and thus doing away with the many obnoxious practices which have grown up under private ownership, and which do not contribute to the best interests of the people.

Setting aside sufficient funds to continue the investigation into the existence of cartels and monopolies in Canada with a view to fully exposing the operations thereof to the Canadian people. Urging action to provide for the manufacture and supplying of oleomargarine in sufficient quantity to take care of the need occasioned by the shortage of butter, and to continue to do so until butter is again in full supply at a reasonable price within the resources of low-paid workers and their families.

That the Canadian Congress of Labour reiterate its former decisions condemning anti-Semitism and other forms of religious and racial discrimination and call upon the Canadian Government to declare anti-Semitism and religious and racial discriminations a criminal offence.

Calling upon the Federal Government to utilize the services of the Tree Fruit Board and the Vegetable Marketing Board, to purchase the surplus crops of fruits and vegetables, making the same available to UNRRA for distribution.

Setting up of co-operatives in Canada, and, inasmuch as these enterprises are non-profit organizations, petitioning the Federal Government to continue to exclude them from income taxes.

Referred to Incoming Executive

Many resolutions, dealing primarily with local conditions, were referred to the incoming executive for study and disposition.

Among these were recommendations relating to: organization of delegations to visit trade union movements in other countries; establishment of a Canadian Coast Guard; veto power of Controller for Yukon Territory; establishment of an Organization Fund; organizing staffs of all Canadian Universities; wage-policy for Crown Company employees.

Constitutional Amendments

A number of constitutional amendments were adopted by the Convention. One was that a new section be included stating: "The Canadian Congress of Labour stands unequivocally for equality of treatment regardless of race, creed or colour, and recommends to all affiliated organizations that they oppose discrimination on these grounds wherever they occur."

Election of Officers

The election of officers resulted as follows: President, A. R. Mosher; first vice-president, Alex McAuslane; second vice-president, Sol Spivak; secretary-treasurer, Pat Conroy; executive committee—George Burt, Paul Bedard, C. H. Millard, S. Barrett, J. E. McGuire. There were elections for all offices except those of first and second vice-president.

Canadian and Catholic Confederation of Labour

THE first post-war convention of the Canadian and Catholic Confederation of Labour was held in Quebec City from the 15th to the 19th of September inclusive. The sessions, which were all held at the *Académie Commerciale*, were preceded on Sunday, September 15, by a rally at the Louis Hébert monument, City Hall, where President Alfred Charpentier and Mayor Lucien Borne exchanged greetings, and a Pontifical mass at the Basilica, where the sermon was given by Rev. Gustave Sauvé, O.M.I., professor at Ottawa University.

Hon. Humphrey Mitchell, federal Minister of Labour, and Hon. Antonio Barrette, provincial Minister of Labour, attended the opening banquet at the *Académie*. Both congratulated the CCCL upon the 25th anniversary of its foundation on behalf of their respective governments. Both also availed themselves of the opportunity to condemn Communism, to advocate Democracy as the bulwark of Trade Unionism, and to point out the tremendous progress achieved in Labour legislation and Social welfare in the past quarter-century. Most Reverend Georges-Léon Pelletier, Auxiliary to Cardinal Villeneuve and Mayor Borne were among distinguished speakers who added their felicitations and good wishes. A cable from Pope Pius XII was among the many congratulatory messages received.

Mr. Gérard Picard, O.B.E., general secretary since 1937, who has sat on the National War Labour Board, the National Selective Service Advisory Board, the Wartime Labour Relations Board, and other boards, defeated Mr. Alfred Charpentier, Montreal, as President of the CCCL, and Mr. André Roy, a former Quebec newspaperman, was elected to succeed Mr. Picard. All four former vice-presidents and the treasurer were re-elected and two new vice-presidencies were filled by veteran CCCL leaders. It was the first presidential election since 1935. The convention was also the best attended one in the 25 years of the organization. There were 392 official delegates and 8 fraternal delegates.

Following an address by Mr. Gaston Tessier of Paris, general secretary of the *Confédération française des Travailleurs chrétiens* and vice president of the International Confederation of Christian Workers, the Convention endorsed the affiliation of the CCCL to the ICCW.

Mr. Tessier emphasized the cordial and strong relations established between his Confederation and the *Congrès Général du Travail*. The Quebec Convention voted congratulations to Delegate Armand Morin of Ottawa who, as Business Agent of the CCCL Printing Trade Federation, prevented his tradesmen from breaking the International Typographical Union strike at Ottawa, a notable gesture of Union solidarity.

At May 31, 1946, the CCCL had a paid membership of 62,960, as compared with 61,723 at the same date in 1945. There are 15 Federations comprising 224 local unions with total membership of 49,429 and 85 unions with direct CCCL affiliation and 13,531 members.

Among the 175 resolutions passed upon there were eight dealing with unemployment insurance, sixteen with taxation, three with compulsory voting, two with family allowances, ten with labour relations act, as many with arbitration and collective agreements, one urging a National Labour Code to be adopted by the Dominion-Provincial Conference, etc.

Address of Hon. H. Mitchell

The Dominion Minister of Labour pointed out that the Labour Department, whether federal or provincial, has the same difficulties "that you and I experience in raising a family, only on a much larger scale" and that the driving forces of the destiny of nations are built around very simple things: sanctity of contracts, the rights to express an opinion and to worship at your own church and obedience to the law.

Mr. Mitchell paid a tribute to Messrs. Charpentier and Picard who "during the whole course of the war, were closely associated with

myself in fashioning or helping to fashion the labour and social legislation of this Dominion under wartime conditions."

He continued: "Let me pay a tribute, on behalf of the Canadian people, expressed through the Canadian Government, to your organization for the contribution it made during the war and the good sense it has shown since its conclusion. Twenty-five years is not a very long time in the life of a nation or civilization but it is sometimes a long time in the life of an organization. Many organizations flourish and decay in a much shorter period than that, but it is a tribute to the stability, philosophy, and driving force of the Confederation that a gathering of this description has been made possible, in which tributes are being paid to it by the Church and the State.

"I want to congratulate you on the part you have played in the development of social legislation and sound trade-union principles in the province of Quebec. Let our minds go back just twenty-five years ago. There was no Workmen's Compensation, there were no Old Age Pensions, there were no Mothers' Allowances, there was no Unemployment Insurance, there were no Collective Labour Agreements as we understand them to-day and the principle of the right to organize by law had not been laid down. I think Mr. Chairman, the development of the all-important public opinion that made all these great advances possible rests largely upon the intelligent leadership given by your organization and other organizations in the Dominion of Canada."

Mr. Mitchell warned trade union men against Communism. "To those people who would have us adopt another kind of philosophy, a philosophy where the individual is a mere tool of the State, let me say this to them, that had it not been for free enterprise, free institutions, yes, and free trade unions and free employers' organizations, freedom as we understand it would have perished from the earth. And let me say this to my Communist friends, those who believe in the philosophy of Communism—if they can call it a philosophy—that had it not been for the free peoples, Communism as they understand it would have disappeared from the face of the earth and Fascism and Nazism would have reigned supreme."

The Minister of Labour added: "Always remember this, my trade union friends, that with dictatorship, irrespective of its colour or policy, once it is enthroned, the first organizations to disappear, the first individuals if you will, to disappear are the trade union leaders and the trade unions themselves. Ever remember this, when these creatures of these,

I would say, false doctrines, come amongst your midst, ever remember that, were it not for the basic principles of freedom as we understand it, this meeting could not be held to-day and your organization would be non-existent."

Mr. Mitchell recalled that it was his responsible during the war to have as much power over the average Canadian as any man had ever possessed in our history. "I was charged with the responsibility of Selective Service, with Mobilization and Registration, and I oft-time repeated to myself when we were laying down that very necessary policy at that time, that I hoped that nothing I would do or might do would impair the basic principles of freedom as we understand it and that as soon as the war was over these controls on the free movement of men and women in this Dominion would quickly come to an end. The record bears out that policy was carried out.

"A country cannot have price control without a measure of wage control. Given common sense and conciliation, there is no reason why we should not have the greatest period of prosperity in the history of this nation," continued the Minister, "but you must adapt those basic principles to the problems of the day, conciliation, common sense and honesty."

In connection with the Dominion-Provincial meeting of Ministers of Labour, Mr. Mitchell asserted that he did not think it possible that the Canadian people could be carved in one mould. "The strength of the democratic element is in diversity and in freedom," he said, "and I hope that when we meet in Ottawa, in a not very distant future, we will have the good sense, Mr. Barrette, to see one another's problems, whether one comes from the Atlantic, the central regions, the Prairies, or the Pacific, having due regard to understand the problems and difficulties in each great sphere which forms this vast Dominion. And given that, given the kind of co-operation that I have enjoyed with every Provincial Government in this country, I have no doubt that we can fashion a policy that will function for good in this country."

Reiterating a warning against "the forces that are let loose not only in this democratic country but in every other democratic country" and asserting that "it is the duty of all of us to see to it that, after this terrible war, our institutions will remain unimpaired", Mr. Mitchell concluded by urging a high level of social security in Canada, a high level of continued employment, and by wishing to the CCCL stability, steady growth and influence built upon the Christian principles

and traditions that have served it at its present and respected place in the life of the Canadian people.

Address of Hon. A. Barrette

After congratulating the CCCL, the Quebec Minister of Labour warned delegates against paid agitators and asserted that the Government was determined to have the law respected and enforced in his province.

In greeting the pioneers of the Catholic Confederation, Mr. Barrette paid a tribute to their vision, courage and enthusiasm. Labour achievements have been tremendous in the past 25 years. Comparing the CCCL of 1921 "to a frail reed that has grown into the mighty oak of 1946" with Federations as branches and local unions as leaves, the speaker said that fortunate indeed were those who lived under its shelter. He lauded Mr. Charpentier for his enlightened leadership.

Quebec owes its industrial stability to its labour leaders, he said. Democracy should be on the alert against paid agents of Communism, said Mr. Barrette as he denounced Fred Rose, M.P. "as a traitor to his adopted land."

"I solemnly pledge myself to wage the fight against all those who, paid by Moscow, are attempting to betray the nation," asserted the Provincial Minister. If Communist agitators are not numerous they are well-trained, well-disciplined and well paid. In the United States as well as in Canada, they have organized or have encouraged strikes everywhere for the purpose of propaganda in war-torn Europe, where Moscow tells starving populations not to expect relief from America as we are headed for a revolution.

Mr. Barrette stated the CCCL was a real school to develop leaders. Workers trained by that school have become leaders in trades, commerce, industry and public life and have been a credit to the country.

Supporting Hon. Mr. Mitchell's remarks, the speaker pledged his co-operation toward harmonious relations between Capital and Labour. Capital and Labour have to co-operate for the general welfare of future generations.

"Our legislation may be improved but we will insist that our laws be respected," concluded Mr. Barrette as he pledged Quebec's support to the Dominion and to sister provinces to maintain order and insure prosperity.

Report of Mr. Charpentier

In a 15-page annual report, Mr. Alfred Charpentier dealt with new problems which challenge the CCCL in its new phase of maturity.

The report observed that the tendency was towards the establishment of national standards and the formulation of national industrial councils through collective bargaining. Labour problems of to-morrow will have to be faced on a world-wide scale as well as from a national angle.

Mr. Charpentier felt that conferences between the CCCL and other Labour bodies were needed for the solution of national problems. In his opinion the most important of the recent trends in organized labour, concerning contractual relations, has been the tendency to replace negotiations with each individual enterprise by nation-wide, blanket agreements with all similar industries in the country. Three solutions might be offered: establishment of national criteria applied by the provinces; establishment of national standards by the Dominion for Canada as a whole or the division of responsibility so that essentially national industries would come under a federal labour code as in the actual case of public utility services.

In the sphere of the workers' material interests, Mr. Charpentier also noted that Ottawa and Quebec had enacted only minor portions of the total legislation requested by the CCCL. He favoured the replacement of the Labour Disputes Act by a Conciliation and Arbitration Act; the adoption of provincial legislation replacing P.C. 9384; the establishment of a Labour Tribunal for appeals from Labour Boards, Workmen's Compensation Boards and other similar Boards' decisions; the establishment of a legal 48-hour week at minimum rates of 65 cents an hour, with hours being eventually brought down to 40 without a decrease in wages; enactment of a Labour Credit Act which the CCCL has advocated for the past five years in Quebec. Mr. Charpentier expressed gratification at the fact that the Dominion Government had modified P.C. 9384 to such an extent that provincial autonomy has been restored.

Mr. Charpentier also noted that the CCCL had been represented at the Paris ILO Conference last fall, at the Pan-American Catholic Social Conference held in January last at Havana, Cuba, and at the International Commission of mechanical industries which was held last April at Toledo, Ohio. New trends and needs have required appointment of technical advisers, labour organizers and new methods.

Other Speakers

Mr. Gerard Tremblay, Provincial Deputy Minister of Labour, addressed the convention during the five-hour election. He thanked the CCCL for its co-operation and then enumerated the many measures enacted in labour legislation, above all the Collective Agreement

Act which sanctions the right of professional association and renders negotiations compulsory. Mr. Tremblay is a former General Secretary of the CCCL.

Mr. Leonard Prefontaine, Regional Superintendent at Montreal, addressed the 400 delegates on Unemployment Insurance and the National Employment Service.

Field Representative Maurice Doran, Montreal, who attended the sessions with Supervisor P. A. Masson, Montreal, and Field Representative Henry St. Onge, Quebec City, spoke on behalf of the Industrial Production Co-operation Board and reported progress achieved through Labour-Management Committees.

Main Resolutions

Resolutions dealing with matters of federal interest recommended:

Increased Unemployment Insurance Benefits without increased premiums; inclusion of hospital employees for U.I. benefits; a receipt for the worker each time an employer hands his book to U.I.C.; unemployment insurance benefits to workers involved in legal strikes.

That the Canadian Government provide funds for peacetime undertakings that would create jobs.

That black market operations in building materials be stopped.

That Government milk subsidies be retained.

That in anticipation of the next Dominion-Provincial Conference, in regard to the proposed National Labour Code, an agreement be reached for uniform minimum wages, regular hours of work per day and per week; for overtime wage rates for all additional hours of work, but that provinces legislate on holidays with pay.

That concrete proposals be submitted to the Dominion and Provincial governments on Health Insurance.

That a priority should be given to Canadian contractors over foreign purchasers of building materials; that the quota of products exported should be restricted in order to meet domestic or home requirements.

That there be no immigration until all Canadians are suitably employed.

Tax exemption on all incomes of less than \$3,000 a year, regardless of family allowances, for married persons and of less than \$1,500 for single persons.

Tax exemption for overtime wages and union dues.

Increasing family allowances in proportion of increasing cost of living.

That both Dominion and Provincial governments oblige pulp and paper mills to be

closed on Sunday, and to close early enough on Saturday to enable maintenance and repair crews to be free on Sunday.

That voting be made compulsory and that voting privileges be extended to workers employed outside of their constituency as enjoyed by commercial travellers and railway employees.

Income tax exemption for Co-operatives.

That the Communist Party be outlawed.

That a Canadian Ambassador be appointed to the Vatican.

That a distinctive Canadian flag be approved.

That the Dominion Government improve the cost of living index.

That married women be encouraged to remain at home instead of earning wages in factories.

Matters of Provincial and Local Interest

Among the recommendations contained in a large number of other adopted resolutions dealing with essentially provincial and local matters were the following:

Recognizing that only legally certified unions benefit from existing provincial legislation; that the Labour Relations Commission state the reasons for accepting or refusing certification; that agreements passed between employers and employees within a particular industry be published; that employers be forced to receive authorized negotiators or be liable to severe sanctions; that Section 49 be amended to allow the Commission to take criminal proceedings for violation of the Act; that in the case of dismissal for union activities the Commission oblige the employer to re-employ such an employee with wages retroactive and if necessary, that said employer may be prosecuted.

Inserting a clause in the Collective Agreement Act obliging public and political bodies to come under the Act; that paragraph (a) of section 20 be amended so that Joint Committees have the power to prosecute; that the Act be amended in such a way to give priority to opening and closing time provided for by Collective agreements over municipal bylaws; exempting barbers—hairdressers from WPTB control.

Imposing drastic sanctions for violations of work on Sunday regulations; double-time for those obliged to work on Sunday; forcing paper plants to close soon enough on Saturday to allow repair crews to complete their work before midnight.

That workers on 8-hour shifts benefit from a minimum 30-minute meal period with pay.

That holidays with pay be given in all Quebec business and industrial establishments

on New Year, Epiphany, Ascension, All Saints, Immaculate Conception and Christmas.

That section 18, para. 2 of the Labour Disputes Act be amended to include a time limit in appointing referees; that the Minister himself appoint the conciliators within ten days of the limit if the parties cannot reach an agreement; that unless the parties have agreed on a locality, that arbitration courts should sit according to judicial districts.

That section 59 of the Workmen's Compensation Act be amended to allow claimants to appeal the Commission's decision; that section 51 be amended to cover workers affected by industrial diseases as well as other casualties; that modifications and changes be made in regard to injured and sick personnel and their dependents etc; and that the Province be requested to study the causes, symptoms and prevention of industrial diseases and enforcement of sanitation and hygiene in industrial plants.

Provision of a minimum wage of 65 cents per hour and a maximum working week of 48 hours.

Establishing a system of cost of living statistics relating to the family.

Establishing scholarships for workers who wish to study social sciences.

Government subsidizing apprenticeship training.

Making automobile insurance compulsory.

Establishing superannuation fund for municipal and school employees.

Fixing standard weights and qualities and prices in the sale of bread in order to abolish unfair competition between bakeries.

Abolishing toll bridges.

Abolishing taxes on pharmaceutical products.

Readjusting the cost of living bonus.

Establishing a line of credit for workers in the construction of homes.

Making compulsory one-week holidays with pay for any industrial worker after one year's service and 15 days after five years.

That a survey be undertaken by a competent committee into monetary and banking reforms for the purpose of laying down a policy that would benefit the working classes.

Increasing the scope of trade union education;

Affiliating with the International Confederation of Christian Unions (Europe).

Election of Officers

At the closing session, the following officers were elected: honorary president, Mr. Alfred Charpentier, Montreal; President, Mr. Gerard Picard, OBE, Quebec City; first vice-president, Mr. Emile Tellier, Three Rivers; second vice-president, Mr. Osias Fillion, Montreal; third vice-president, Mr. Alphonse Roberge, Quebec City; fourth vice-president, Mr. Louise-Philippe Boily, Jonquiere; fifth vice-president, Mr. Laureat Morency, Quebec City; sixth vice-president, Mr. F. X. Legare, Rimouski; secretary, Mr. Andre Roy, Quebec City; treasurer, Mr. Bruno Ethier, Montreal.

International Labour Organization

Twenty-ninth Session of International Labour Conference

THE first session of the International Labour Conference ever to be held in Canada took place at the University of Montreal between September 19 and October 9, 1946.

Delegations totalling approximately 425 persons, representing workers, employers and governments from 46 countries, took part in the work of the Conference, which was the 29th since the inception of the International Labour Organization in 1919.

The Conference was presided over by the Hon. Humphrey Mitchell, Canadian Minister of Labour, who was elected President at the first sitting.

The principal achievements of the Conference may be briefly summarized as follows:

1. The amendment of the constitution of the ILO. This item was of particular importance to Canada since, among other things, it resulted in imposing additional obligations on federal states in regard to their manner of dealing with international labour conventions where the subject matter falls within provincial jurisdiction.

2. Approval of the draft agreement between the ILO and the United Nations bringing the two institutions into relationship. The agreement still requires approval by the latter organization.

3. The enactment of three international labour conventions dealing with the protection of children and young workers. Supplementing the various conventions for the protection of youth adopted by the ILO in previous years, these provide for medical examination for fitness of employment of children and young workers in both industrial and non-industrial occupations; and the restriction of night work in non-industrial employment.

4. A preliminary discussion of aspects of social policy in non-self-governing territories suitable for inclusion in international labour conventions.

5. A partial resumption of the practice of pre-war years of examining reports on the application of conventions in member countries.

6. A debate on the Director's Report in which 65 delegates participated and inter-

changed information and views on the work of the ILO and on social and economic conditions in their respective countries.

7. The adoption of the budget of the Organization for the calendar year 1947; and the adoption provisionally of amended Financial Regulations.

Canadian Delegation

Canada was represented by a tripartite delegation, the Government members of which were headed by Mr. Mitchell and Mr. Arthur MacNamara, Deputy Minister of Labour as delegates; and Mr. Paul Goulet, Special Assistant to the Deputy Minister of Labour in charge of relations with the ILO, and Mr. Paul Renaud, Counsellor, Department of External Affairs, as alternate delegates. The other members of the Government group, all from the Department of Labour, included Messrs. V. C. Phelan, A. H. Brown, M. M. Maclean, S. H. McLaren, H. C. Hudson, Eric Stangroom and C. R. McCord, and Miss Margaret Mackintosh, as technical advisers, and Mr. John Mainwaring as secretary.

Since a considerable number of the subjects dealt with by the ILO fall within provincial jurisdiction it was noteworthy that five provincial Ministers of Labour attended the Conference. The Provincial Government representatives included: Hon. L. D. Currie, Minister of Labour, Nova Scotia; Hon. Walter E. Mooers, Minister of Labour, New Brunswick; Mr. Douglas Cochrane, Deputy Minister of Labour, New Brunswick; Hon. Antonio Barrette, Minister of Labour, Quebec; Mr. Gerard Tremblay, Deputy Minister of Labour, Quebec; Mr. J. P. Despres, Director of Services, Department of Labour, Quebec; Hon. Charles Daley, Minister of Labour, Ontario; Hon. C. R. Smith, Minister of Labour, Manitoba; and Hon. C. C. Williams, Minister of Labour, Saskatchewan.

The Employers' Delegate was Mr. Harry Taylor, Canadian National Carbon Co. Ltd., Toronto. His advisers were: Mr. E. R. Complin, Canadian Industries, Ltd., Montreal; Mr. C. E. Shumaker, Goodyear Tire and Rubber Co. of Canada, Ltd., New Toronto; Mr. H. W. Macdonnell, Canadian Manufacturers' Association, Toronto; Mr. Allan C. Ross,

Vice-President, Canadian Construction Association, Ottawa; Mr. C. Niderost, K.C., Assistant Manager, Department of Personnel, Canadian Pacific Railway, Montreal; and Mr. George V. V. Nicholls, Manager, Business Research Department, Canadian Chamber of Commerce, Montreal.

Heading the Workers' Delegation was Mr. Gustave Francq, Secretary, Quebec Federation of Labour, Montreal. His advisers were: Mr. Hugh Henderson, Vice-President, Halifax District Trades and Labour Council, Halifax, N.S.; Mr. Victor Anderson, Secretary, Winnipeg Trades and Labour Council, Winnipeg, Man.; Mr. Eugene A. Forsey, Director of Research, Canadian Congress of Labour, Ottawa; Mr. A. Andras, Assistant Editor, Canadian Railway Employees Monthly, Canadian Brotherhood of Railway Employees and other Transport Workers, Ottawa; Mr. Gerard Picard, General Secretary, Canadian and Catholic Confederation of Labour, Quebec; and Mr. W. L. Best, Secretary, Dominion Joint Legislative Committee, Railway Transportation Brotherhoods, Ottawa.

International Labour Organization

The International Labour Organization was established in 1919 as part of the machinery for international co-operation set up by the Treaty of Versailles following the first world war.

Its primary purpose was to raise labour standards throughout the world by means of international agreement. Conferences were held annually, at which draft legislation was worked out covering such subjects as hours of work, protection of women and children in employment, unemployment and social insurance, workmen's compensation, protection against accidents and occupational diseases, holidays with pay, and other matters.

It was the intention that, having agreed on desirable labour standards at the Conferences, member nations would enact legislation at home to bring the agreements into effect. Decisions taken at the Conferences may be embodied in the form of either international labour conventions or recommendations. A convention is considered as similar to a draft international treaty. Member nations are obligated under the terms of the ILO constitution to bring conventions to the attention of the "competent authorities" with a view to "the enactment of legislation or other action". If the convention is ratified, the country is expected to comply with its provisions, and to report annually to the ILO on the measures which it has taken in this respect. Recommendations impose a lesser obligation on member states.

Between the two world wars twenty-five sessions of the International Labour Conference were held, at which sixty-seven conventions were adopted. Up to the present time over 900 ratifications of these conventions have been made by member countries.

Canada, in common with other member nations of the ILO which have a federal system of government is faced with difficulties in regard to the ratification of conventions the subject matter of which falls within provincial jurisdiction, which include, in Canada's case, the great majority of conventions.

The special problems of federal states in this respect were considered at the 29th Session of the Conference, and formed the basis for some of the changes which were made in the ILO constitution.

Constitutional Changes in Regard to Federal States

The constitution of the ILO, as adopted in 1919, makes special provision for federal states by permitting them to treat conventions as though they were recommendations, thus relieving them of the heavier obligations that fall on unitary states.

Under the constitutional amendments agreed to at the Montreal Conference, federal states will be required to seek the co-operation of provincial governments in regard to conventions and recommendations whose subject matter falls within provincial jurisdiction, in an attempt to bring their provisions into effect.

Federal governments will be required:

(1) to refer such conventions or recommendations, within eighteen months from the close of the Conference, to the appropriate provincial authorities;

(2) to arrange, subject to the concurrence of the provincial governments, for periodical consultations between the federal and provincial authorities, "with a view to promoting within the federal state co-ordinated action to give effect to the provisions of such conventions and recommendations";

(3) to inform the Director-General of the International Labour Office of the measures taken;

(4) if a convention is not ratified, to report at intervals showing the extent to which effect has been given to its provisions.

In regard to conventions falling within federal jurisdiction, federal governments are to be considered as under the same obligations as unitary states.

The Canadian Government Delegates took an active part in the discussions leading up to the adoption of this formula. Mr. Paul

Renaud, assisted by Messrs. Brown and Stan-
groom, represented the Canadian Government
on the Constitutional Committee of the
Conference.

As a matter for future consideration by the
ILO, Mr. V. C. Phelan suggested in plenary
session that provision be made for the device
of fractional ratification of conventions. This
device would apply to conventions the sub-
ject matter of which had been put into effect
by a number of provincial governments, so
that perhaps 65 or 70 per cent of the popula-
tion of the entire country was covered. Mr.
Phelan also suggested that the device of
ratification of conventions on the basis of
collective agreements instead of legislation
might make it possible for federal states to
secure a greater number of ratifications.

Other Constitutional Amendments

The Conference approved a number of
other amendments to the constitution, includ-
ing one which was proposed by the Canadian
Government Delegate, Mr. Renaud. This
amendment has to do with the determination
of the eight states of chief industrial import-
ance entitled to so-called permanent seats on
the Governing Body of the ILO. It provides
that an appeal may be made to the Conference
from any decision of the Governing Body on
the matter. (Canada at present holds one of
the eight permanent seats.)

As a result of another amendment having
to do with conventions and recommendations,
member states will in future be called upon to
report to the ILO not only on those which
they have ratified, but also on those which
they have failed to ratify, stating the position
of their law and practice and the extent to
which the matters dealt with have been put
into effect by legislation, administrative action,
collective agreements or otherwise. Countries
will also be called upon to state the difficulties
which prevent or delay the ratification of such
conventions.

Other amendments have the effect of omit-
ting references to the League of Nations in
the constitution, providing for increased
co-operation between the ILO and the United
Nations, changing the title of the Director
of the International Labour Office to Director-
General, including the Declaration of Phila-
delphia (L.G., 1944, p. 714) as an annex to
the constitution, and making a number of
other changes, most of them technical.

An important proposal, made by the French
Government, provided that the International
Labour Conference should consist of six
representatives of each member state instead
of four as at present. Government representa-
tion would remain unchanged at two, but the
number of workers' and employers' delegates

would be increased from one each to two
each, with the proviso that one of the
employers' delegates be chosen from among
the managers of socialized undertakings where
such exist. The weight of opinion in the
Constitutional Committee being against this
proposal, it was eventually withdrawn after
two days' debate.

The various constitutional amendments
adopted by the Conference will come into
effect only after the Instrument of Amendment
has been ratified by two-thirds of the member
countries, including 5 of the 8 states of chief
industrial importance.

Agreement with United Nations

Members of the Conference expressed
approval of the Draft Agreement with the
United Nations, negotiated with the Economic
and Social Council last May. It was felt that
the agreement safeguards the autonomy of
the ILO with reasonable care and reserves to
the ILO its proper field of action. When the
agreement has been ratified by the United
Nations the ILO will become the first of the
specialized international agencies to be asso-
ciated with the Economic and Social Council
of the United Nations.

Protection of Young Workers

A preliminary discussion on the protection
of children and young workers had taken
place at the 27th Session of the Conference in
Paris in 1945.

At the Montreal Conference three conven-
tions and two recommendations were adopted,
the subject matter of which appears to fall
almost entirely within provincial jurisdiction.

Medical Examination

Provision that children and young workers
shall receive a medical examination before
entering employment forms the subject of the
first two conventions, one of which applies to
industry, and the other to non-industrial
occupations. The two conventions are almost
identical in content.

They provide that persons under 18 years of
age shall not be admitted to employment
unless they have been found fit for the work
on which they are to be employed by a
thorough medical examination. The examina-
tion is to be carried out by a qualified
physician approved by the competent
authority, without charge to the child or his
parents.

Re-examination is to take place at least
annually until the age of 18 is reached, and
until the age of 21 in occupations which involve
high health risks.

Vocational guidance and physical and vocational rehabilitation is to be afforded to those found by medical examination to be unsuited to certain types of work, or to have disabilities.

A member country which has at present no laws or regulations permitting the ratification of these conventions may substitute the age of 16 for the age of 18, as a preliminary step towards the full application of the provisions of the conventions. A country may also exempt from coverage areas where by reason of the sparseness of the population or the stage of development of the area enforcement would not be feasible.

The recommendation which supplements the two conventions on medical examination of young persons, suggests in detail methods for their application and enforcement.

Night Work

A convention concerning the night work of young persons employed in industry was among those adopted at the 1st Session of the Conference, in 1919. Supplementing this convention, the text adopted at Montreal applies to young workers in non-industrial occupations.

The first part of the convention applies to children under 19 years of age, and also to children over 14 who are still subject to full-time compulsory school attendance. With certain exceptions, to meet conditions of climate and other circumstances in individual countries, it provides that such children shall not be employed at night during a period of at least 14 consecutive hours, including the interval between 8 o'clock in the evening and 8 o'clock in the morning.

The period of 14 consecutive hours is reduced to 12 in the case of children over 14 years of age who are no longer subject to compulsory school attendance and to young persons under 18.

The Canadian Government was represented on the Young Workers' Committee by Miss Margaret Mackintosh and Mr. H. C. Hudson, with Mr. M. M. Maclean as substitute.

Application of Conventions

An important feature of the Conference was the partial resumption of the practice of pre-war years of examining the manner in which conventions are being applied in the various member countries.

The committee set up by the Conference to study this matter expressed the view that in order not to impair confidence in the legislative work of the ILO, the supervision of the application of past decisions of the ILO should be

considered as at least of equal importance to the preparation of new decisions.

The constitution of the ILO requires member states to report annually on the manner in which they are applying the conventions they have ratified. For the year 1944-45 a total of 725 such reports had been requested by the ILO in regard to the 52 conventions which are in force. A total of 523 reports was received, failure to supply reports being due in the case of many countries to the disturbed conditions arising out of the war.

Mr. Paul Goulet, assisted by Mr. V. C. Phelan, represented the Canadian Government on the Committee on the Application of Conventions.

Social Policy in Non-Self-Governing Territories

As a result of its discussion of social policy in non-self-governing territories, the Conference decided to place the matter on the agenda of the next general session with a view to the adoption of three conventions.

Director's Report

The debate on the Director's Report furnished an opportunity for a discussion of the work of the ILO and conditions in the various member countries. It is hoped to publish in a future issue of the *LABOUR GAZETTE* extracts from the speeches of some of the delegates from foreign countries giving summaries of their social legislation, employment conditions, and the various problems with which they are dealing.

Speaking in the debate Mr. V. C. Phelan outlined recent legislation in Canada, paid tribute to the work of the ILO, and suggested that the subjects of industrial relations and employment policy be given top priority in the future program of the Organization.

Finance

In accordance with the report of its Finance Committee of Government Representatives, on which Canada was represented by Mr. Renaud and Mr. McCord, the Conference unanimously agreed that the budget estimates for 1947 as voted by the Governing Body should constitute the expenditure budget of the Organization. This budget amounts to 11,354,378 gold francs or approximately 3,733,000 United States dollars.

It is the first budget to be adopted autonomously by the ILO following the dissolution of the League of Nations.

The budget shows two main increases, one necessitated by the development of the new system of industrial committees, the other to provide an increase in staff from 297 to 457 posts.

The Conference also adopted provisionally amended Financial Regulations of the Organization submitted by the Governing Body, it being understood that they would be referred to the Governing Body for further consideration during the interval preceding the next session of the Conference.

Presidential Addresses

In his Presidential Address at the opening of the Conference, the Hon. Humphrey Mitchell welcomed the delegates to Canada, and said in part:

"More than at any time since the inception of the International Labour Organization, its principles of social justice and the progressive improvement of living standards must be held high as a beacon light to the citizens of war-ravaged countries and to the peoples of all nations.

"The principles of social justice must be applied to our economic and social life, finding ultimate expression in their respective legislative decisions. To the extent that the International Labour Organization may help in the realization of this objective, its work must be worth while as essential to human progress."

He concluded: "In my opinion, the establishment of liberty and justice all over the world can only come about by giving voice to the simple aspirations of the great mass of the people. They must be left in peace to work out their lives so that they may establish security for themselves and families and not be the pawns in any game being played by persons bent upon satisfying their own plans for world domination.

"Unless we make social justice the cornerstone of our respective national lives and the basis of international policies, devastation and destruction must by the very nature of things be the lot of mankind. Let us see to it at this Conference that we issue a challenge to the nations of the world, that we return to the true paths of peace, and that our energies be centred upon the age-old wish that we be our brother's keeper."

In closing the Conference, Mr. Mitchell as President followed the precedent of other ILO Conferences by reviewing the work accomplished during its three weeks of activity. He declared:

"As in all gatherings of this kind, we have had our differences of opinion. One expects those differences among men and women who are experts in the highly technical fields of labour and social affairs.

"On every major point before it, the Conference reached agreement. If at times it was not found possible to compose conflicting opinions, then the democratic method of a vote was adopted, and in good democratic fashion, was accepted by all.

"I wish to emphasize this highly significant point in the procedure of this ILO Conference, for I think the good faith with which all delegations have entered into the proceedings and have accepted the decisions, whether unanimous or by majority, might well serve as a model in other fields."

Thanking the delegates for kindness shown to the chair, he said: "I have regarded the responsibility which you gave me as one of the highest honours in my life.

"Let us," he concluded, "depart from this Conference filled with the high purpose of social justice for all which is the objective of the International Labour Organization."

Appointment of E. J. Phelan as Director of International Labour Office

THE Governing Body of the ILO, at the opening of its 99th Session in Montreal on September 16, appointed Mr. Edward J. Phelan as the Director of the International Labour Office.

Since the resignation of Mr. John G. Winant as Director in February, 1941, Mr. Phelan had directed the Office with the title of Acting Director. A native of Ireland, he joined the staff of the ILO in 1919 as Chief of Division. He later became Assistant Director, and held the rank of Deputy Director under Mr. Winant.

Mr. Phelan was a member of the British delegation to the Paris Peace Conference in 1919, where as a secretary of the Labour Commission he participated in the drafting of the Constitution of the International Labour Organization.

Born in 1887 in Waterford, Ireland, he was graduated from Liverpool University, and entered the British Civil Service, serving successively in the Board of Trade, the National Health Insurance Commission, the Ministry of Labour, and the Foreign Office. In 1918, he was a member of the British mission to Russia headed by Sir Robert Bruce Lockhart. He was the principal secretary of the first International Labour Conference at Washington, D.C., in 1919.

In 1919, he was appointed to the permanent staff of the Office by its first Director, Albert

Thomas of France. Mr. Albert Thomas held the directorship until his death in 1932, and was succeeded by Sir Harold Butler, who resigned in 1938, Mr. Winant succeeding him. Mr. Phelan thus becomes the fourth Director of the Office since its establishment 27 years ago.

The International Labour Office is the permanent secretariat of the International Labour Organization. It had its headquarters in Geneva from 1920 until 1940 when the threatened isolation of Switzerland by the Germans made it necessary to seek a centre of operations where it could communicate freely with the ILO's member countries. At the invitation of the Canadian Government, this centre was established in Montreal where McGill University provided a building for use as an office.

During Mr. Phelan's tenure as Acting Director, the Office has been rebuilt from the small, nuclear organization to which it was reduced in 1940 into an establishment of proportions similar to those it enjoyed in the pre-war years in Geneva. A sharp reduction in the budget and other exigencies of the war made it necessary to cut down the staff from more than 500 to less than 50 when the Office was transferred to Montreal. This has now been expanded to more than 230, and the proposed 1947 budget calls for personnel totalling 457.

Rehabilitation

Parliamentary Committee on Veterans' Affairs Submits Final Report*

THE Parliamentary Committee on Veterans' Affairs set up on October 9, 1945, shortly after the commencement of the first session of Canada's twentieth Parliament, submitted its final report to the House of Commons on July 25, 1946. The committee began its second series of Hearings on March 26, 1946, under an Order of Reference issued March 22, which read as follows:

Resolved, that a Select Committee be appointed:—

1. To consider all legislation passed since the commencement of the war with the German Reich relating to the pensions, treatment and re-establishment of former members of His Majesty's Armed Forces and of other persons who have otherwise engaged in pursuits closely related to war;

2. To prepare and bring in one or more Bills to clarify, amend or supplement the above legislation;

With power to send for persons, papers and records; to print its proceedings, and to report from time to time to the House:

That the provisions of Section 1, Standing Order 65, be waived in respect to this Committee.

And that the said Committee shall consist of the following members:— Messrs. Abbott, Adamson, Archibald, Ashby, Baker, Belzile, Bendickson, Bentley, Blair, Blanchette, Bridges, Brooks, Bruce, Claxton, Cleaver, Cockeram, Croll, Cruickshank, Dion (Lake St. John-Roberval), Dorion, Drope, Emmerson, Fulton, Gauthier (Portneuf), Gibson (Hamilton West), Gillis, Green, Halle, Harkness, Harris (Grey-Bruce), Herridge, Isnor, Jutras, Kidd, Langlois, Lapointe, Lennard, Marshall, Mackenzie, Macdonald (Halifax), MacNaught, Merritt, Mitchell, Moore, Mutch, Parkes, Power, Probe, Quelch, Ross (Souris), Sinclair (Vancouver North), Skey, Tremblay, Tucker, Viau, White (Hastings-Peterborough), Whitman, Winkler, Winters, Wright.

During its initial sessions the Committee drafted and reported three Bills to the House of Commons. These bills included amendments to the War Service Grants Act, amendments to the Veterans' Land Act, and the consolidation and amendment of Orders-in-Council under the act known as the "Veterans' Rehabilitation Act". (L.G., April 1946, p. 450).

During its second series of Hearings, the Committee held 52 meetings and heard 57 witnesses, including representatives of veterans'

organizations, the Canadian Red Cross Society, and other civilian organizations as well as members of the Armed Services and officials of various departments of government. In all, 13 bills were reported to the House of Commons as listed hereunder:

1. Bill: An Act respecting benefits for persons who served in the Women's Royal Naval Services and the South African Military Nursing Service, known as Women's Royal Naval Services and the South African Military Nursing Service (Benefits) Act;

2. Bill: An Act to amend the Soldier Settlement Act;

3. Bill: An Act to amend The Veterans Rehabilitation Act;

4. Bill: An Act to amend The Veterans Rehabilitation Act (University grants);

5. Bill: An Act to amend the Pensions Act;

6. Bill: An Act to amend The War Service Grants Act, 1944;

7. Bill: An Act respecting benefits to certain persons who were recruited in Canada by United Kingdom authorities for special duties in war areas, known as Special Operators War Service Benefits Act;

8. Bill: An Act to provide for the Reinstatement in Civil Employment of discharged members of His Majesty's Forces and other designated classes of persons, known as The Reinstatement in Civil Employment Act, 1946;

9. Bill: An Act respecting loans to veterans to assist in their establishment in business or professionally, known as The Veterans Business and Professional Loans Act;

10. Bill: An Act respecting veterans of forces allied with Canada, known as The Allied Veterans Benefits Act;

11. Bill: An Act respecting allowances for war veterans and dependents, known as The War Veterans' Allowance Act, 1946;

12. Bill: An Act respecting civilian war pensions and allowances, known as The Civilian War Pensions and Allowances Act;

13. Bill: An Act to amend The Veterans' Land Act.

In addition, the Committee also made the following recommendations to the House:

1. That the period in which application may be made by soldier settlers for reduction in the amount of their indebtedness to the Director, Soldier Settlement Act, under the provisions of Orders in Council P.C. 10472, dated November 19, 1942, and P.C. 191/6282, dated September 28, 1945, be extended to the first day of September, 1946;

*For a review of the first session of this Committee see LABOUR GAZETTE April, 1946, p. 450.

2. That the Government give consideration to the introduction of a Bill to amend The Veterans' Land Act, 1942, to provide that the total cost of all homes over six thousand dollars presently constructed, or in actual process of construction under the Small Holdings Scheme, be subsidized twenty-three and one-third per cent.

3. That the Government take the appropriate action to insure that all departments and agencies of the Dominion Government comply fully with the provisions of the Reinstatement in Civil Employment Act;

4. That income tax be remitted in respect of detention allowances payable to merchant seamen under the provisions of Order in Council P.C. 12/4209 dated 12th June, 1941, as amended by P.C. 87/5204 dated 16th July 1941.

5. That the Government consider the advisability of introducing a Bill providing that:—

(1) the supervisors of the auxiliary services and fire fighters of the Corps of Canadian Fire Fighters dispatched overseas, and members of the Canadian Red Cross Society and St. John's Ambulance Brigade who served in an actual theatre of war, be accorded all benefits, pensions, rehabilitation rights and income tax exemption as members of the Armed Forces;

(2) the V.A.D.'s who served with the Canadian Army under the provisions of Order in Council P.C. 49/3546 of April 30, 1942, be granted

(a) eligibility for Class III treatment as provided for veterans under the veterans Affairs' Act, and

(b) if pensionable, eligibility for vocational training as provided for veterans, or equivalent educational training;

(3) the orthopaedic nurses who were selected by the Canadian Red Cross Society for employment by the Scottish Ministry of Health be granted

(a) eligibility for Class III treatment as provided for veterans under the Veterans Affairs' Act;

(b) if pensionable, eligibility for vocational training as provided for veterans, or equivalent educational training, and

(c) a gratuity of fifteen dollars for every thirty days of service in an actual theatre of war as defined in The War Service Grants' Act, 1944; and that

(4) former civilian flying personnel of No. 45 Group, Ferry Command, Royal Air Force, be granted

(a) vocational and educational training as for veterans;

(b) benefits under The Veterans' Land Act, 1942;

(c) a gratuity of fifteen dollars for every thirty days of service;

(d) a re-establishment credit of fifteen dollars for every thirty days of service;

(e) eligibility for Class III treatment as provided for veterans under the Veterans Affairs' Act;

(f) eligibility under The Veterans' Insurance Act, and

(g) income tax exemption as great as that granted any other civilian group.

(6) That the present civil service preference for disabled veterans and veterans who served overseas be extended to cover all employment, both temporary and permanent, by the House of Commons and by Dominion Government agencies, inclusive of Crown companies.

Further recommendations were:

1. That the Government consider the extension of priorities in the purchase of surplus war assets to veterans on certification by the Department of Veterans Affairs;

2. That the Government consider the remission of income tax in respect of the earnings of Canadian War Correspondents while assigned to duty in an actual theatre of war.

In addition to the foregoing, a subcommittee was appointed to study a proposal presented to the Committee that the conditional grant under the provisions of The Veterans' Land Act be made available to veteran members of co-operative farm associations. The sub-committee heard representations from the Hon. John H. Sturdy, Minister of Reconstruction for the Province of Saskatchewan, and sought the advice of the Director, The Veterans' Land Act, Mr. G. A. Murchison. The Committee, while sympathetic to any suggestion which might contribute to the successful rehabilitation of veterans, was unable to find a solution to the administrative problems inherent in Mr. Sturdy's proposal, and concurred in the subcommittee's recommendation that the facilities offered under existing legislation for land settlement on a co-operative basis be further explored, and that the departmental officers continue negotiations with that Province in an endeavour to formulate some mutually satisfactory scheme.

Various proposals were examined for extension or curtailment of the veteran preference for employment in the Civil Service. The Committee did not recommend any change in the existing legislation at the present time.

As a result of this report 12 Bills were passed by the House of Commons on August 8, 1946. Previously four other Bills had been given third reading and passed by the House. Royal assent was given to these 16 Acts on August 31, 1946. As announced by the Minister of Veterans Affairs, this new legislation is being incorporated into the "Veterans' Charter", which it is planned to publish later in the year.

A summary of the legislation recommended by the Special Committee on Veterans' Affairs and given approval by the House of Commons during the recent session follows:

Summary of Legislation

Allied Veterans' Benefits Act

This is designed to ratify an Order in Council passed early in 1946, and it goes a little farther. By the Order in Council and by this Act, Canadians who served in the Allied

Forces, upon returning to Canada, are eligible for benefits under the Veterans Rehabilitation Act, the Veterans Land Act, the War Service Grants Act and the Department of Veterans Affairs Act. The language of the Act has been

sufficiently broadened in comparison with the Order in Council to insure that Canadians in the Forces of these countries that were overrun by Germany in 1940 shall not be excluded from these benefits by reason of the fact that they were unable to return to Canada within two years of their discharge. The Act provides that any similar benefits received from the country in whose forces beneficiaries under the Act may have served shall be deducted from the Canadian benefits.

Civilian War Pensions and Allowances Act

The purpose of this Act is to confer the right to pension upon certain groups of persons who rendered valiant service in the war but who were not attested as members of His Majesty's forces. All the civilian groups covered were previously covered by Order in Council, and the Act follows the terms of the Orders in Council, with exceedingly minor variations.

These groups include: merchant seamen, commercial fishermen, auxiliary service personnel, Canadian overseas firefighters, special constable guards, R.C.M.P., air raid precaution workers, volunteer aid detachments with Royal Canadian Army Medical Corps in Canada, overseas welfare workers, orthopaedic nurses employed with the Scottish Ministry of Health, civilian aircrew of Royal Air Force Transport Command and potential recruits sustaining disability while undergoing treatment in care of D.V.A. for purposes of removing disability which debarred them from enlistment.

Fire Fighters War Service Benefits Act

This Act confirms the following benefits already granted by Order in Council: gratuity on the same basis as veterans with regard to overseas service, rehabilitation grant, and the Veterans Land Act with respect to pensioners. Additional to the benefits conferred by Order in Council the Act grants all former members of the Corps (civilian) of Canadian Fire Fighters for service in the United Kingdom, who served overseas, the right to vocational training, and will allow their overseas time to be calculated under the Unemployment Insurance Act, the same as for veterans.

Pensions Act

These amendments comprise thirty-two sections affecting all veterans of every war in which Canada has participated. The principal features are restoration of the insurance principle for those serving in Canada only in World War II, and extending the benefits of the Canadian pensions scale to all Canadians

who served in the forces of the British Commonwealth or of allied nations. The principle of equal pensions for women as for men is adopted.

Reinstatement in Civil Employment Act, 1946

This statute consolidates the provisions of the Reinstatement in Civil Employment Act, 1942, and later supplementary orders in council thereto.

Soldier Settlement Act

This amendment reduced the interest rate for certain soldier settlers under the 1919 scheme who also served in World War II.

Special Operators War Service Benefits Act

The purpose of this Act is to confer all rehabilitation, pension and other veteran legislation upon approximately sixty Canadians who entered enemy-occupied countries to assist and encourage the forces of resistance. The persons coming under this Act are to be treated in all respects as if they had been members of the Canadian armed forces. This puts into statutory form the provisions of Order in Council P.C. 988 of March 19, 1946.

Supervisors War Service Benefits Act

This Act provides that auxiliary services supervisors shall be, with respect to their overseas service, on a par with former members of the forces, with the single exception of income tax exemption. This is statutory authority for Order in Council P.C. 3228 of 3 May, 1944 conferring certain rehabilitation benefits on auxiliary services supervisors, in addition, it extends to them the benefits of certain other acts.

Veterans' Business and Professional Loans Act

The purpose of this legislation is to enable a veteran to borrow from a chartered bank a sum up to \$3,000 at five per cent interest in order to purchase a business, an interest in a business, or the tools, implements or equipment of a trade, business or profession. A guarantee is extended to each individual bank at the rate of 25 per cent on any loss incurred on the first million dollar loan by such bank, and at the rate of 15 per cent on loans in excess of a million dollars by any bank.

War Veterans' Allowance Act, 1946

This measure, while essentially an amending enactment, takes the form of a completely

new, revised and consolidated act. It is, for the most part, composed of amendments adopted during the war by Order in Council. Its principal features are that women veterans are made eligible at the age of 55 the same as widows; the basic allowances are increased, thereby permitting the allowable income to be calculated on the higher figure. The small pensioner eligible for the allowance is thus permitted a materially improved standard of living. The value of the veteran's home allowable without deduction from allowances is raised from \$2,000 to \$4,000.

Veterans' Land Act, 1942

The amended Act provides that assistance under the Veterans Land Act may be given to tenant farmers, and to farmers holding land under agreement for sale. Former soldier settlers, in default of their contracts, are permitted to qualify under the Veterans' Land Act if they have served in World War II. The administration of the Act is integrated more closely with other departmental activities administered by the Minister of Veterans Affairs.

Veterans' Rehabilitation Act

There are two amendments to this Act. The first authorizes the Government to make grants to universities to enable them to provide the additional premises, equipment, staffs and services required to meet the extraordinary increases in enrolment arising out of educational benefits provided for veterans under this Act. The second amendment contains a number of provisions, including authority for the Government to advance money to universities for the purpose of making loans to student veterans under the regulations.

Veterans' Rehabilitation Regulations

These regulations cover the provision of benefits to veterans under the Veteran's Rehabilitation Act, with respect to temporary incapacity, out-of-work allowances, awaiting

returns, vocational training, university and post graduate training and the payment of fees, grants and expenses incidental to such benefits.

Amendment to Veterans' Rehabilitation Regulations

This Order in Council makes a single amendment (correction) to the above regulations (P.C. 3244, August 1, 1946).

War Service Grants' Act, 1944

This amendment to the War Service Grants' Act, 1944 provides that a supplementary gratuity payable to a veteran who upon joining the permanent force, reverts to a lower rank, shall be calculated on the basis of the higher rank that he held before reverting. Another provision states that widows and dependent mothers of veterans who die subsequent to discharge without having exercised all of their re-establishment credit rights, may receive the balance of the re-establishment credit to which the veteran was entitled, subject to the provisions of the Act. The uses to which re-establishment credit may be put are expanded in relation to the building of a home under the National Housing Act, and in relation to the retirement of debt arising out of encumbrances on the veteran's home.

Women's Royal Naval Services' and South African Military Nursing Services' (Benefits) Act

This is an Act embodying the provision of Order in Council P.C. 6938 of November 15, 1945, conferring veterans' benefits on Canadian members of the South African Nursing Services, and providing also what certain Canadian women who served in the Women's Royal Naval Services will secure the same benefits as other Canadians serving in His Majesty's forces other than the Canadian forces.

Grievance Procedure under Collective Bargaining in United States

THE characteristics of successfully operating grievance procedures are good faith and confidence rather than any precise provisions, a study conducted by the United States Bureau of Labour Statistics into functioning grievance procedure in 101 plants, found.

It states that this view is shared by unions and management in almost every case where the procedures are considered successful and in the majority of cases where the procedure has proven unsuccessful.

Over four-fifths of the unions and companies conduct training programs in labour relations, but in only five cases do stewards and foremen receive joint instruction. The training usually deals with the provisions of the union agreement and basic union and company policy.

The study found that certain basic principles apply to every effectively functioning procedure:

- (a) Settlement should be effected solely upon the merit principle and at the point of origin in order to obviate the entrance of personal prestige and magnification of importance which occurs when settlement is achieved at higher levels.
- (b) Evidence of good faith requires prompt adjustment at the earliest possible stage. Protracted settlement produces an ever mounting strain on the confidence of the employees in the procedure.
- (c) The extent of authority granted to representatives at each level should be defined and made known to all parties. Failure to do so encourages "buck passing" and misuse of the procedure, leading to suspicions and distrust.
- (d) Stewards and foremen should possess the proper training. The more capable they are in resolving cases the fewer will be the cases reaching higher levels and the more efficient the procedure becomes. Training facilitates grievance settlement and contributes to better relations.
- (e) Responsibility for seeing that only grievances possessing real merit are presented must be accepted by the union. It must use its judgment in presenting and appealing cases to avoid inundating the grievance procedure and

thus gain management's respect for its representatives and the grievances it presents.

Grievance procedure is distinct from collective bargaining; it aims at the resolution of differences arising out of and under the terms of the collective agreement as well as the adjustment of grievances or complaints of individual workers.

In 58 of the 101 plants studied, the first step in the procedure is for an employee to present his complaint to his foreman; in all but 9 of these plants he may be accompanied by his union representative. Aggrieved employees may take part in the discussion of their complaints beyond the first step in less than one-third of the cases and, usually, only to the second step.

Unions and management differ most sharply over the employee's right to initiate his complaint personally, without union intervention at the first step. For the most part, however, they agree that the union should handle negotiations or any grievance beyond the first step.

The unions almost uniformly stress that union representatives should handle grievances from the start. They reason that the latter are better qualified to process complaints and therefore better able to obtain a favourable settlement. The union will be protected since personal favouritism and bargaining on an individual basis between employee and foreman will be discouraged and settlements will be uniform throughout the plant. Management will benefit by the union's screening of complaints without merit, thus saving time.

Generally speaking, management contends that there should be direct contact between worker and foreman and that, therefore, the union should not be present at the first step of the procedure. Some management officials claim settlement is more expeditious, more satisfactory, and involves fewer people, if complaints are handled by the worker himself with the foreman.

In nearly all cases the employee's immediate foreman or supervisor handles employee complaints at the first step in the procedure. Less than 10 per cent bypass the foreman officially.

It found that about one fifth of the plants failed to accord adequate authority to their foremen, or maintained that they "passed the buck" to higher officials, incurring adverse

delay. Unions in these cases invariably attempted to circumvent the foreman and proceed to higher levels. This has led several unions to urge complete removal of foremen in the formal procedure.

Many unions desire more authority for foremen because they feel better settlements are procured than at higher levels; that foremen are often more reasonable, anxious to maintain production, and often understand shop problems more than those above them.

Appeals Procedure

Three and four-step procedures (excluding arbitration) are most common, representing slightly over two-thirds of the 101 plants studied. Six plants have 2-step procedures; 20 plants, 5-step procedures; and 5 plants, 6-step procedures.

Five and six-step procedures occur most frequently in plants which are units of a multiplant company; otherwise there is generally no correlation between the number of steps and the size of the plant, the scope of the agreement (whether single plant or multiplant) or the industry. Although extensive variation exists in the type of representation, and the sequence and frequency in which they appear, nevertheless some common characteristics are shared by the different types. On the union side, a committee of in-plant union representatives is used most frequently at the intermediate steps; local outside union representatives (such as the business agent) generally enter the procedure after the second step; and international union officials do not participate until the next to last step. On the company side, management officials of the rank of plant manager usually represent the company, and in relatively few cases production officials below the rank of plant manager participate, at the next to last step.

If the plant manager represents the company prior to the last step in the procedure, he almost always deals only with the union grievance committee or with outside local or international union representatives.

There is considerable duplication of personnel from one step to the next, no higher authority succeeding the representative at the previous step. Duplication is most common on both sides in plants with 5 and 6-step procedures.

Final Step (Excluding Arbitration)

At the last step, prior to arbitration, the union is represented in 70 per cent of the cases by an international union representative. The remaining plants, in almost equal proportion, have either a plant union repre-

sentative or a local outside representative such as a paid business agent. Business agents are relatively more common at the last step in single plant than in multiplant companies, while the reverse is true in the case of international union representatives.

Management is represented at the last step by a company official or executive in 70 per cent of the cases and by a plant official in the others. In all but one of the cases in which plant officials represent management at the last step, there were four or less steps in the procedure. In slightly over one-fourth of the 101 cases the industrial relations department acts as management's agent at the final step.

Of the 60 multiplant companies studied, slightly over two-thirds call for the direct participation of a central office representative at the last step. Such participation is required to a greater extent in plants under a master agreement than in those covered by individual agreements.

Written and Oral Presentation

The study reports written complaints being used in four-fifths of the plants studied with about half of these introducing it only at the second level.

When written presentation is required the practice is favoured by the parties since it discourages superficial complaints and expedites settlement. For the most part, both parties consider written statements of grievances best suited to latter stages in the procedure, as oral presentation does not magnify importance or consume time in disposing of grievances. It is also claimed that early-stage written presentation unduly encumbers the procedure and impedes expeditious determination by compelling foremen to put decisions in writing. Written presentation is generally preferred in later stages as a basis for discussion and to prevent misinterpretation or changes.

Time limits on the company's answer are provided in three-fifths of the cases. About one-third of the plants set time limits on the union appeal. Fifteen plants have no time limits included in the procedure. In general, time limits to expedite the handling of complaints appear to be effective in plants with poor relations. Where relations are relatively good time limits serve as a guide and as a spur to prompt settlement, although by virtue of the relationship they appear to be unnecessary. In the latter group, time limits delay rather than expedite settlement because the maximum time allowed for an answer becomes the average time. Nearly all of the plants without time limits are characterized

by good relations and the absence of delay in company action on grievances.

Three out of five plants hold regularly scheduled meetings at specified intervals to negotiate appealed grievances. Such meetings, which are generally scheduled at the next to last step of the procedure, are usually held weekly during working hours. Notice of the agenda to be discussed is required in about one-third of these plants.

Over four-fifths of the unions and companies conduct training programs in labour relations, but in only five cases do stewards and foremen receive joint instruction. The training usually deals with the provisions of the union agreement and basic union and company policy.

Almost 90 per cent of the plants have industrial relations departments or officials to handle labour relations. In the other plants, industrial relations work is a part-time activity of a production official.

The role of the industrial relations department in the settlement of grievances appears to be wholly an individual plant matter, and therefore, only minor generalizations are possible. The authority of this department varies widely among the plants, and the results insofar as plant labour relations are concerned differ even where the authority is comparable.

In some plants with no industrial relations department, the unions feel that a full-time

person in industrial relations work is desirable because of the difficulty of meeting busy company executives.

Generally speaking, industrial relations appear to be better in plants where the industrial relations department stresses a human approach to the union agreement and to problems arising under it, than where it stresses a legalistic and formal approach and procedure.

Time and Pay for Grievance Work

In four out of five plants, management compensates union representatives for time spent in handling grievances during working hours. In the remaining plants, the union representatives are not paid for such time. In about one-fifth of the plants, after-hours grievance activity is compensated by the company.

Two-thirds of the firms which compensate for grievance work set no specific limit on the time so spent. The remaining third limit either the amount or type of grievance activity.

Grievance-pay practices are very often more liberal than, and sometimes quite contrary to, the agreements. In 40 plants, some compensation is provided, but management is more liberal than the agreements specify; in 19, no reference to pay is made but wages are paid nonetheless.

Wages Under National and Regional Collective Bargaining in United States

A research report recently released by the Industrial Relations Department of Princeton University concluded "tentatively" that national or regional bargaining wages offered a productive means for reducing labour unrest and curtailing strikes. It reported that within the seven United States industries used as the field of study generally favourable economic results were recorded. Extension of the practice was regarded as possible.

In its introduction the report states that "extension of industry-wide bargaining to other sections of American industry is being pressed by unions affiliated with both the Congress of Industrial Organizations and the American Federation of Labour, and is also suggested by experts, such as the Labour Committee of the Twentieth Century Fund. The Automobile Workers (CIO), for example, are taking preparatory steps looking toward 'an industry-wide wage agreement covering the entire membership', and the Rubber Workers (CIO) recently negotiated a uniform wage increase in conference with the four large rubber companies. Further spread of nation-wide bargain-

ing appears logical, judging from experience in democratic countries at a later stage in labour-relations evolution, like Sweden and England.

"In national or regional collective bargaining, wages are the central element. A crucial issue in multi-company agreements is whether the wage scale shall be uniform for all companies or differentiated on the basis of a firm's ability to pay, its distance from the market, or local costs of living. The problems that this issue poses for a union may be illustrated by statements of the Automobile Workers' Union in the spring of 1946. The union argued for a 30 per cent increase at General Motors on the basis of the company's ability to pay, and insisted that Ford's wage differential above the industry should be maintained. Shortly thereafter, however, President Walter P. Reuther reaffirmed one of the Union's 1943 resolutions in announcing that 'the most important economic objective of our Union is the establishment of an industry-wide wage agreement based on the principle of equal pay for equal work without regard to the geographic location of the plant'. Most national

unions in industries producing for a national market favour country-wide uniformity in wage scales to take labour out of competition".

Dr. J. Douglas Brown, who directed the research held that the improvement in wage-fixing system presently in operation was essential to sustain national prosperity and prevent the waste, friction and depression that unsound ones produced.

The report found that when wages were determined on an industry-wide basis strikes that usually accompanied differences in timing on wage changes due to competition and from rival unions demanding concessions, were avoided.

The seven industries, covered by industry-wide collective bargaining in operation for several years recorded no authorized strikes in the stove, hosiery or West Coast pulp and paper industries, only one each in pottery and pressed and blown glassware and only two each in flat glass and silk and rayon and dyeing and finishing, since regional or national bargaining was instituted.

Other effects of industry-wide bargaining are summarized as follows:

Wage decisions are likely to be more sensible and farsighted, taking into con-

sideration the economic interests of the industry as a whole, than is the case where the wage pattern is established by a "leader" or by local bargaining, with the union playing one concern against another.

Generally speaking, wage and earning levels do not seem to have risen more rapidly than for manufacturing as a whole.

Wage patterns have not served to place any additional restraint on technological improvement and new investment.

Monopolistic or collusive practices with regard to wages or economic change have not characterized any of the seven industries. Elimination of wage-cutting has tended to stress efficiency of management as the most important factor in competition. In adopting a policy of uniform wage scales, the union gives up the possibility of monopolistic price discrimination—fixing wages according to each employer's ability to pay.

Wages tend to become more stable and rigid. Group agreements may serve as a brake on wage movements both upward and downward.

The tendency is for unions to show more responsibility and restraint.

The report finds that wage uniformity is not essential to industry-wide bargaining.

Co-operative Movement in Britain

BASED fundamentally for over one hundred years on retail societies, the British co-operative movement has experienced considerable expansion in relatively recent years through the development of wholesale societies possessing extensive manufacturing and various other facilities, according to a recent article in *Labour and Industry in Britain*.

The principle underlying the entire movement, the article states, is the return of a small rate of interest on share capital supplied by the members of a co-operative society, supplemented by a yearly distribution of surplus profits proportionate to the members' annual purchases from the society.

Under British law individuals may not own more than £200 of share capital in one society, though no limitation is placed upon loan capital. However, no limitation is placed on the amount of share capital when the members in a society are other co-operatives. In Britain surplus profit allocated for distribution as dividends on past purchases is not subject to taxation: these patronage dividends are regarded as a "refund" to members of their original expenditure rather than profit. Other-

wise, the co-operatives are governed by the same tax conditions that apply to non-co-operative business.

The aggregate holdings for the entire co-operative movement in Britain in 1944 approximated 684 million pounds, an increase of some 200 million pounds over 1941.

Retail Societies

In 1944 there were more than "one thousand retail co-operative societies in Britain with a membership of more than 9½ millions, assets of more than \$1¼ billion and annual sales of nearly \$1½ billion. All are conducted on the Rochdale principle, namely that every retail society is controlled by its own members; and that voting is always on the principle of "one member—one vote", no matter what the size of the shareholding. Loan capital can be held in addition.

It has been estimated that in 1932 the trade of the retail stores (which are open to purchases by non-members as well as members) was equivalent to 8.8 per cent of the country's total retail trade, or 10.7 per cent if expenditure on drink and automobiles is eliminated. Food was the largest constituent.

Sales of food by retail co-operative shops rose from 12.3 per cent of national sales of food in 1925 to 20 per cent in 1940. In the same period, however, sales of footwear rose from 4.4 per cent of national sales to 10 per cent; and coal from 7.7 per cent to 20 per cent.

Wartime figures show the strength of retail co-operative stores in the sale of food. In 1943, 25-27 per cent of the entire population registered at these stores for sugar, butter and margarine, bacon and ham, cooking fats, preserves, and cheese; 18 per cent registered for eggs and 15 per cent for meat. One-third of all milk consumed was sold by co-operatives. Though co-operative societies closed 380 shops (up to May, 1944) owing to bombing, changes of population, etc., they opened 692, showing a net gain of 312.

The retail co-operative stores obtain their supplies partly from the co-operative wholesale societies and partly from non-co-operative sources. Prices tend to be about the same as in non-co-operative stores, the policy usually being to make the return to members not through "cut prices" but through the dividend on purchases at the end of the year. In 1935, 74 per cent of retail societies, containing 80 per cent of total co-operative membership, paid a dividend of between 5 and 12½ per cent on purchases; 11 per cent of co-operative membership received a smaller dividend, and 9 per cent a larger one.

Wholesale Co-operative Societies

The two main wholesale co-operative societies—the Co-operative Wholesale Society (CWS) and the Scottish Co-operative Wholesale Society (SCWS)—are owned almost entirely by the retail societies, who are its members in the same way as individuals are members of the retail societies. Membership is open, also, to other co-operative organizations. There is no restriction on the amount of share capital that each member organization can hold, but otherwise the Rochdale principles operate, with a profit surplus of each society being returned to members as a dividend in proportion to purchases.

In 1941, the CWS had net sales of £142.9 million and a net surplus of £3.9 million; the SCWS figures were £32.1 million net sales and almost £1 million net surplus, giving total wholesale sales of approximately £175 million and a surplus of £4.8 million.

The wholesale societies have four main fields of activity: importing, manufacturing, merchandising and finance. It has been estimated that in 1935 they supplied retail co-operatives with "70 per cent of the goods sold".

Although most of the business of the CWS and SCWS is conducted independently, the two organizations jointly run an "English and Scottish Joint Co-operative Society" which is primarily engaged in the production and marketing of tea. These operations recorded a £9,000,000 volume in 1944. In addition they operate a co-operative insurance society.

"The CWS has its own Banking Department which acts as a banker for co-operative societies, trade unions and friendly societies, as well as for individuals. Its assets are over £155,000,000, and its annual turnover more than one billion pounds. The SCWS has an interesting international link with *Kooperativa Forbundet* (CWS) of Sweden in the British Luma Cooperative Electric Lamp Society, opened in September, 1939, in which two-thirds of the share capital is held by the Scottish and one-third by the Swedish society."

Other Co-operative Undertakings

District organizations formed by a number of retail societies for special purposes, such as baking, dairying and laundering, etc., reported sales of about £2,500,000 in 1935. There exist also a number of national federal societies such as the Co-operative Printing Society and the Co-operative Press which publishes a national Sunday paper, *Reynold's News*, and other publications.

Productive societies, distinct from the wholesale organizations, engaged mainly in the manufacture of clothing and footwear, carried on trade in 1944 amounting to about £9,300,000. Agricultural societies "have not made great progress" in Britain the article claims. In 1943 there were in England 85 societies with 84,549 members and a total share capital of £1,369,904. They have no close affiliation with the remainder of the co-operative movement.

The article predicts that the co-operative movement in Britain, possessing ample funds, will "expand rapidly in the post war period" both along traditional lines and along lines hitherto not engaged in.

"All branches of Britain's co-operative movement belong to the Co-operative Union, a national body which strives both to develop advanced methods and efficiency in all co-operative enterprise and, at the same time, to uphold the social objectives on which the movement is based".

In politics, the co-operative movement has its own Co-operative Party which maintains its identity, even though in most respects it follows the Labour Party. In the General Election of 1945 it secured 23 seats (the largest number previously held was 10), and two leading co-operators—Mr. A. V. Alexander and Mr. A. Barnes—were given Cabinet rank in the new Government.

Control of Inflation in Britain

A description of the measures utilized to curb inflation in Britain during the war and in the critical reconversion period is contained in the June issue of *Labour and Industry in Britain*. The article states that inflationary pressure in Britain has emanated from two sides; long working hours and increased pay rates which swelled the income and hence purchasing power of a distended working force; and a greatly decreased volume of goods which resulted from the country's mobilization for war purposes.

The pattern of control during the war was to contain personal expenditure within rigid bounds, and to vastly increase taxation and savings. This, the article states, constitutes the same method which will be pursued as long as the threat of inflation exists, subject to modifications necessitated by factors inherent in peace-time production. For example, rigidly high taxation proved a constructive inflation curb during the period when civilian production was reduced to the barest essentials but in so far as tax relief can induce increased civilian production in the reconversion period (by increasing incentive) a flexible taxation policy relieves inflationary pressures. However, the equalizing of domestic supply and demand can only be approached at a moderate rate due to Britain's need to earmark for export a large part of her production, the article contends.

"The use of direct taxation and the strong encouragement of saving as anti-inflation weapons are relatively easy to follow. Much more complicated have been the methods used, and still being used, to control the use of the funds left with the consumer." This has involved strict price control on essential commodities applied conjunctly with a strict rationing program and heavy indirect taxation penalties on non-essentials like tobacco and alcoholic beverages. Inessential, difficult-to-control goods have been permitted to reach steep price levels in order to sop up a certain amount of loose cash. "Peaches selling for \$3.00 each off a barrow in a London street are an example of this."

"Clearly the key to the success of the whole program lies in the ability to control the basic cost of living." Failure would introduce an inflationary wage-price spiral incapable of being arrested before irreparable damage had been committed. The exercise of restraint in wage demands by trade unions during the war has been reduced to some extent during the

transition period, due largely to the demand for compensation for diminished earnings as a result of the curtailment of consistent overtime. Average weekly wage rates rose to 58 per cent above the 1939 level by April 1946 as a result of the movement for wage increases. To a limited extent the effects of the increase in average wages, the article estimates, will be attenuated by improved domestic supply and the pledge by labour to "do its utmost in the new production drive." Price control, however, is being maintained "in every particular."

Supply and Distribution of Consumers' Goods

"Until the supply of consumers' goods in Britain is adequate for current needs and satisfies the backlog demand created by seven years of drastic shortages, the task of ensuring essential supplies at controlled prices and spreading them fairly over the whole community will remain a central point of the anti-inflation program. Without such action, shortages would lead to hardship and runaway prices. Even given price control, an absence at the same time of effective control over supply and distribution might lead to an uncontrollable black market."

In some cases the Government acts as the primary purchaser, of all domestic production and imports, selling them to commercial distributors. In other cases control over supply is maintained by a system of licensing for manufacture or import or by specification of the types of products which may be produced. Strict rationing of basic foods, clothes and utility furniture, "as severe as during the war," is maintained, weekly quantities under the ration being governed by changes in the availability or scarcity of the goods. Less urgent goods are placed freely on the market as they become more available but can be sold only under controlled prices.

Price Control

Wartime control over raw materials still continues in existence for the most part, the article states. Maximum prices are sometimes set at or below cost where the Government is the sole purchaser or importer for re-issue to users. Above cost prices are set in cases where provision of a common selling price for home and foreign production is desired.

Almost all foodstuffs are subject to price control, mostly by the setting of specific

maximum prices for each stage of distribution. Where the final distribution of foodstuffs is not automatically controlled through rationing, the Ministry of Food itself accepts the responsibility for distribution from the point of production or importation to distribution centres at which the goods are released to traders.

"The problem of price control (and of distribution) is relatively simple in the many cases where the Ministry of Food is the sole first-hand purchaser or importer of all stocks. This applies to cheese, butter, most canned goods, meat and milk. For manufactured foods, a good deal of simplification (and even pooling) of products was necessary to make a uniform maximum price list possible. All manufactured foods must be labelled with the approved maximum retail price. Fish maximum prices are fixed at four stages of sale, and in order to keep prices uniform throughout the country the Ministry pays the transport charge from the port to inland traders, recouping itself by a small levy on first-hand sales. The most difficult foods to control in price have been fresh fruits and vegetables, but the difficulties have largely been met in an elaborate price schedule."

Extensive use of subsidies is made in curbing inflation through the maintenance of stable price levels. The continued use of these subsidies will be contingent upon the cost to the Government. The Chancellor of the Exchequer has stated that although the holding of the cost of living steady was a wise policy "we cannot go on doing this indefinitely regardless of cost." However, no immediate change is being contemplated. The estimated total cost of subsidies for 1946-47 is \$1,340,000,000.

For consumer goods other than food, control is vested in the Board of Trade which in 1941 was granted authority to set maximum charges and similarly for any services in relation to goods. Administration is carried out by setting a specific maximum price, or by relating a maximum price to the price on a particular day or by setting a permitted margin to be added to cost.

A new wartime development, "utility production, may possibly become a permanent element in the British economy", the article contends. This production is carried out

under the supervision of the Board of Trade which ensures that an adequate proportion of the nation's productive capacity is devoted to the fabrication of goods produced in the most economical manner possible under Government specifications. "From the beginning a high standard of quality has been set." The cost of living is kept down by concentrating demand upon utility goods through the fixing of lower prices than for comparable non-utility articles and the removal of the purchase tax on them. "Within six months after its introduction in 1941 70-80 per cent of civilian clothing was utility." It has since spread to many other fields.

Rent has been fixed at the 1939 level with no increase allowed except for improvements.

Taxation

One of the most remarkable features of Britain's war finance was the success in meeting a very high proportion of internal war costs through taxation. Despite the huge increase in central government expenditure, taxation, at very steep rates met more than half of it in the later war years, and thus reduced to a very considerable degree its inflationary effects.

In 1938, central government expenditure on goods and services totalled \$3.2 billions and central government taxes \$3.4 billions. By 1945, expenditure had risen to \$22.4 billions and taxes to \$12.6 billions or 56 per cent of expenditure. Over the six years 1940-45, central government expenditure totalled \$115 billions, and central government taxes \$57 billions, or almost 50 per cent.

Savings

The article concludes with a reference to the success of the savings campaign which increased private savings from 6 per cent of private income in 1938 to about 16 per cent in 1945. An important aspect of inflation control, it states, is the quantity of small savings in the economy. Special small savings certificates and deposits accounted for about 40 per cent of the total savings recorded between September 1939 and the end of 1945. The Government has repeatedly emphasized the continuing need to maintain small savings at a high level.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases.

International Business Machines Company, Limited, Toronto, Ont. (Correction).

L'Association des Constructeurs de Quebec et autres entrepreneurs du District de Quebec and La Conseil des Metiers de la Construction des Syndicats Nationaux Catholiques de Quebec.

Pacific Coyle Navigation Company, Limited, Marpole Towing Company Limited, Van-

couver Barge Transportation Limited, Victoria Tug Company, Limited, M.R. Cliff and B.C. Mills Towing Company, Limited, Young and Gore Tugboat Company, Limited, and Canadian Seamen's Union.

Grand and Toy Limited, Toronto, Ont.

Ingersoll Machine and Tool Company, Limited, and United Steelworkers of America, Local 2918.

Canadian Merchant Service Guild, Inc., and B.C. Tugboat Owners' Association.

Re: International Business Machines Company, Limited, Toronto, Ont.

Reasons for Decision¹

This is an appeal which concerns a Decision of the Regional War Labour Board for Ontario, dated February 21, 1946. The Company had asked the Regional Board to approve a general increase in wage rates for the classifications concerned. The Regional Board approved the increases requested for some occupational classifications, but denied the requests made in respect of other classifications.

Prior to November 1939, the Company's regular work week was one of 42½ hours. At the commencement of the war, the work week was increased to 55 hours, and there it remained until January, 1944, when it was reduced to 50 hours. In January, 1944, the wage rates of the employees were increased by amounts equal to 10 per cent of their previous rates. Outside of this adjustment the only addition to the 1939 rates of these employees came about through incorporating therewith the cost-of-living bonus.

The Company wishes to revert to its original regular work week of 42½ hours, but says that it is not practical to do so under the Regional Board's Decision. That Decision

adjusted the rates of only 55 per cent of the employees concerned, and in the opinion of management would be unfair to the remaining 45 per cent to revert to the Company's original work week.

We have examined the schedule of wage rates in effect prior to the Regional Board's Decision under appeal. Some indication of the level of those rates may be obtained when it is known that the weighted average thereof is 85½ cents an hour. While that figure may be regarded as being above the average, it must be realized that most of the employees concerned are engaged in operations requiring much experience and a high degree of skill.

To approve the Company's request in this case, however, would enable the Company to establish a schedule of wage rates which would, undoubtedly, have a disturbing effect upon the rates paid in other establishments in the Toronto area.

Having regard to all the circumstances in this case, we have come to the conclusion that it would be just and reasonable to authorize the Company to increase its ranges of rates by 10 cents an hour. We allow the appeal and revoke the Decision of the Regional War Labour Board. There will be a Finding and Direction accordingly.

July 26, 1946.

¹Above decision as originally issued read (last paragraph) "to increase its ranges of rates by 19 cents an hour". As now indicated this should have read "10 cents an hour".

Re: L'Association des Constructeurs de Quebec et autres entrepreneurs du District de Quebec and Le Conseil des Metiers de la Construction des Syndicats Nationaux Catholiques de Quebec

Reasons for Decision

With leave of the Regional War Labour Board for Quebec, the Association appeals from a decision of that Board, dated May 7, 1946, and the Building Trades Council cross appeal.

The Regional War Labour Board's decision was made as a result of an application by the Council for a direction to increase wage rates for labourers in the construction industry by five cents an hour and for all other tradesmen in the industry by ten cents an hour. The Regional Board's decision was to increase the wage rates for labourers by 5 cents an hour, for painters, enginemen-mixers, enginemen-compressors, pipe mechanics, ornamental iron and bronze mechanics, floor scrapers, polishers and sanders, by six cents an hour, and for bricklayers, plasterers, masons, carpenters, electricians and tinsmith roofers, by ten cents an hour and for certain weekly rated employees, by \$2 per week.

The employers represented by the Association carry on their respective businesses in the judicial district of Quebec (excluding the county of Lavolette), and the counties of Beauce, Dorchester, Megantic, Bellechasse, Montmagny, l'Islet, Kamouraska, Temiscouata, Riviere-du-Loup, Rimouski and Matane. By decree number 1653, published by the Department of Labour for Quebec, under the authority of the Collective Agreement Act of that Province, the said judicial district and counties are divided into four zones. There are differentials in wage rates for each classification as between zones. The increases in rates awarded by the Regional Board apply to the said occupational classifications in each zone.

It was argued on behalf of the Appellant Association that the Regional Board erred in granting the increases since it was not shown and could not be shown that the rates were low in comparison with the rates generally prevailing in the locality for the same occupational classifications. According to the evidence and the record, the Regional Board's decision is intended to affect every contractor in the areas above named. This being so, it was not possible for the Regional Board to limit comparisons to the said areas. It was necessary in the circumstances for the Regional Board to look elsewhere for comparisons, and this is precisely what the Regional Board did.

It is clear to us that the Regional Board, while making comparisons with the rates prevailing in other localities, did not order that the rates in question be increased to the level in effect in the other localities. What

the Regional Board apparently did was to take into account the increases which had been granted from time to time to employees in the same occupational classifications in the other localities and endeavour to make corresponding adjustments in the rates involved in this appeal.

We have analysed the schedule of rates fixed by the Regional Board and we approve of all of them with the exception of the rates for pipe mechanics (journeymen and junior journeymen), ornamental iron and bronze mechanics (journeymen fitters and blacksmiths) and floor scrapers, polishers and sanders. For employees in these classifications, the rates should be as requested by the Council. Such adjustment would maintain proper differentials as between the several classifications in the said areas and would also substantially maintain the differentials previously existing for the same classifications in the other localities used for purposes of comparison.

The Regional Board authorized the employers concerned to adjust the rates with effect from February 23, 1946, and ordered the employer to pay such rates as and from the date of the publication of the adjusted rates in the Quebec *Official Gazette*. As for the last provision, it is presumed that the Regional Board anticipated that the Provincial Department would amend its decree to give effect to the Regional Board's decision. With much respect we are of the opinion that the effective date of the Regional Board's direction should not have been made dependent upon any such action by the Provincial Department. We are assured that the said decree has not been amended. As a consequence, the Regional Board's decision has no effect other than to authorize.

Having regard to all the circumstances in this case, we consider that it would be fair and reasonable to fix October 1, 1946, as the date from which all employers must pay the increased rates.

The result of this decision is to allow the appeal in so far as it concerns the effective date of the Regional Board's decision, and to allow the cross appeal to the extent that the wage rates for pipe mechanics, ornamental iron and bronze mechanics and floor scrapers, polishers and sanders shall have their rates increased by ten cents an hour in place of six cents as previously awarded by the Regional Board.

This decision will be confirmed by a Finding and Direction. The Finding and Direction will have attached thereto a schedule of the rates as adjusted.

September 13, 1946.

Re: Pacific Coyle Navigation Company, Limited, Marpole Towing Company, Limited, Vancouver Barge Transportation Limited, Victoria Tug Company, Limited, M. R. Cliff and B.C. Mills Towing Company, Limited, Young and Gore Tugboat Company, Limited, and Canadian Seamen's Union

Reasons for Decision

This is an application by the Union on behalf of unlicensed personnel comprising deckhands, firemen, oilers and cooks employed on the tug boats of various types owned and operated by the six companies. The Union asks this Board to direct the companies to increase wage rates, pay overtime and to establish an eight hour day for the employees. In detail the Union requests:

- (a) an increase in wage rates to One Hundred (\$100) Dollars per month for deckhands and firemen and to One Hundred and Fifteen (\$115) Dollars per month for cooks;
- (b) a differential over the above rates for service on tow boats while operating north of the southern entrance of Queen Charlotte Sound and/or on the West Coast of Vancouver Island;
- (c) overtime at the rate of Seventy-five cents (75c) per hour;
- (d) establishment of an 8-hour day "equivalent", i.e. on the basis of twenty (20) 12-hour days and ten (10) days off per calendar month.

At the hearing, representatives of the Union asked leave to amend the application by deleting that part thereof which is contained in clause (a) above and substituting therefor a request for an increase of 15 cents per hour on the basis of a 240 hour month. The Union did not give the Companies any notice that it was seeking such amendment. Counsel for the Companies opposed the motion to amend on the ground of lack of notice. He also reminded the Board that his clients were not present and accordingly he could not receive any direct instructions.

This Board has never considered it necessary to provide any specific rule on the point mentioned in the last above paragraph. Nevertheless, it should be obvious that any party opposing an application must be given reasonable notice before hearing of any change proposed for the application in order that he may have an opportunity to meet the change if he is so advised.

However, we have come to the conclusion that it would not be reasonable to fix one rate for an occupational classification and apply it regardless of the type or size of tugboat on which a person in that occupational classification may be employed. Therefore, the Union's request made in the original application can-

not be approved. On the other hand, we see merit in the request for a uniform increase. That would maintain differentials which presently exist and for good reason.

The Companies allege that the proposed increases in wage rates and changes in working conditions will be beyond their means to pay without an increase in their present tariffs for towing and freight handling. It is also alleged that it would be difficult to secure enough personnel to man the vessels if the "20-10" proposal of the Union is approved. A study of the financial statements of the several companies makes it appear that the companies cannot pay additional labour costs without obtaining some relief by way of adjustments in towing and freight charges.

Notwithstanding the foregoing, we are of the opinion that the present wage rates should be adjusted. These rates are low in comparison with the rates which comparable employers in the same locality are paying to employees in the same occupational classifications. In the circumstances we consider it just and reasonable to direct a wage increase of \$20 per month to employees in each of the occupational classifications covered by the application. The increases will have effect on and after October 1, 1946. Our reason for post dating the increase is that the Companies should be given time in which to seek and obtain such adjustments in their tariffs as may be required.

It was developed at the hearing that ranges of rates presently exist for each such occupational classification based generally on the type of vessel and the area in which service is performed. Normally it is only the larger boats which operate in the more exposed waters for service in which a rate differential is asked. A differential is already allowed for such service through the range of rates for each classification, the higher wage rates in the range being those paid on the sea-going vessels. That part of the application must therefore be denied.

While expressing its agreement with the general principle of an 8-hour day where that term of employment is practicable, the National Board considers that in the present case the exigencies of service inherent in the towboat industry on the British Columbia Coast are so unusual, but so well known to all

who accept employment in that industry, that the question of what shall constitute a working day or month as the case may be, can best be left to the good sense of the parties immediately concerned.

Therefore, the Board refers that phase of the application back to Canadian Seamen's Union and the employing Companies with the recommendation that they enter into negotiations. The Board hopes that mutual agreement may result on such basis that upon joint applica-

tion approval can be given to the settlement consistently with the provisions and purposes of the Wage Control Order.

As the question of overtime conditions is bound up with agreement as to working hours, decision on that point also is deferred pending result of the negotiations.

Finding and Direction will issue accordingly in respect of wage rates.

September 16, 1946.

Re: Grand and Toy Limited, Toronto, Ont.

Reasons for Decision

The Company applied to the Regional War Labour Board for Ontario for approval of the Company's reclassification of their "Outside Salesmen". The Company wishes to reclassify its salesmen into three categories, Junior, Intermediate and Senior. The Ontario Board authorized such reclassification but the Company takes exception to the maximum rate which that Board authorized the Company to pay to its "Senior Salesmen", and, aside from the question as to the date on which the decision will become effective, this constitutes the only point under appeal.

The evidence in this case indicates that until recently, the Company's salesmen were paid on a salary basis (time rate). The complex nature of the Company's business, with widely varying mark-ups prevailing in the several major classifications of the business, put certain obstacles in the way of establishing the commission basis of remuneration. It is stated that the Company has now evolved a means of determining accurately the value to the Company of an individual salesman's efforts. The new method is related to gross profit produced through the salesman's activities.

In most cases of this kind, it would be sufficient to approve the plan without reference to a range of rates. In this case, it is appropriate to fix a range of rates and permit the Company to apply its method of remuneration so that the actual earnings of each senior salesman will be within the range.

We have compared the proposed range of rates for the Company's Senior Salesmen with those established by comparable employers for their employees in the same occupational classification. Such comparison reveals that the range of rates now requested is fair and reasonable and we approve the same.

There remains the question of retroactivity of this Board's decision. The Company made its original application on February 13, 1946, at which time they requested the Regional Board to make its decision effective as from April 1, 1945. The Regional Board declared its decision to be effective as from April 1, 1946. A study of this case reveals that the Company's fiscal year is from April 1 to March 31. Presumably, therefore, it would be desirable to have the new rates become effective with the commencement of a new fiscal year. In order for the Regional Board to satisfy the request of the Company, it would have been necessary to make its Order retroactive approximately 10½ months before the date of the Company's application. We feel that this would have been unreasonable. The question of retroactivity involves a matter of discretion by the Regional Board and in our opinion the Regional Board has exercised its discretion in a proper manner. The effective date of the decision should be April 1, 1946, which is the commencement of the Company's current fiscal year.

Finding and Direction will be issued accordingly.

September 27, 1946.

Re: Ingersoll Machine and Tool Company, Limited, and United Steelworkers of America, Local 2918

Reasons for Decision

This is an appeal by the Company from a Decision of the Regional War Labour Board for Ontario, dated June 24, 1946. In and by that decision, the Company was directed to adjust *ranges of rates* for the several occupational classifications of its employees, and in

addition, and notwithstanding the fixing of ranges of rates, to increase by five cents an hour, the wage rates of each employee. This appeal concerns only the direction to increase rates within the ranges.

By the first part of the Regional Board's decision, ranges of rates were adjusted. That

having been done, it seems to us that the Regional Board's wage-adjusting powers had been exhausted for the time being. With much respect we are of the opinion that the Board entered a field which, by the terms of the Order, is left to the employer. Even if the second part of the Regional Board's decision was allowed to stand, it would have little or no effect because the employer, by his own act, could undo all that had been done by the Regional Board. The freedom of discretion and action which is reserved to the employer in respect of this issue, is expressed in Section 25 (1) (a) of Wartime Wages Control Order, 1943. The provision is as follows:—

Nothing contained in this Order shall be deemed in any way to prohibit an employer (a) from increasing or decreasing the rate paid to an individual employee within the

limits of a range established by him under this Order, or by or pursuant to a direction of the National Board for the occupational classification in which the employee is employed . . .

Views in line with the foregoing were announced in this Board's decision in the Imperial Optical Company case (L.G. August, 1946, pp. 1044-5).

While the law provides that the employer, by his own act, may adjust rates of individual employees within the range of rates in effect for that employee's occupational classification, it is only right to assume that the Union, through negotiation, can exert some influence upon the employer.

The appeal is allowed. Finding and Direction accordingly.

October 1, 1946.

Re: Canadian Merchant Service Guild, Inc., and B.C. Tugboat Owners' Association

Reasons for Decision

The Canadian Merchant Service Guild Inc., represents the Masters and Mates employed on tugboats owned and operated by 40 employers who are members of the B.C. Tugboat Owners' Association. There are approximately 228 Masters and 194 Mates now in the employ of the members of the Association.

The Guild filed with this Board, an application for an order, directing the employers

- (a) to increase by thirty (\$30.00) dollars, monthly rates for Masters and Mates;
- (b) to establish an 8-hour day equivalent, i.e. on the basis of twenty (20) 12-hour days with ten (10) days off per month;
- (c) to pay overtime at the rate of \$1.50 per hour for Masters and \$1.10 per hour for Mates;
- (d) to grant two weeks vacation with pay, and time off in lieu of statutory holidays worked; and
- (e) to pay a differential of \$20.00 per month to all Masters and Mates on tugboats operating on the West Coast of Vancouver Island, Queen Charlotte Island Sound west of 128th meridian and north of 51° north latitude, Hecate Straits.

We shall deal with each of the issues above-mentioned in the order stated.

In this Board's decision, dated September 16, 1946, made in the case of the Pacific Coyle Navigation Co. Ltd., and five other employers, and Canadian Seamen's Union, the Companies were directed to increase the wage rates of the unlicensed personnel on tugboats, by \$20.00 per month with effect from October 1, 1946. That increase has also been granted to the unlicensed personnel employed by other tugboat operators on the west coast. The Masters and Mates concerned in this case and the said unlicensed personnel are employed on the

same group of vessels. In view of the foregoing, we have decided to direct the employers to increase the monthly rates of their Masters and Mates by the same amount, namely, \$20.00, and with effect from October 1, 1946.

We now consider the Guild's request for an order or declaration that twenty days shall constitute a calendar month's work for the Masters and Mates on tugboats. It appears that the parties negotiated on this issue but were unable to agree upon terms of settlement. The parties ask us to determine the issue. To provide a solution it is necessary for us to chart a new route on the sea of industrial relations.

On the previous occasions we have expressed agreement with the general principle of an eight-hour day where that term of employment is practicable. In this case, however, it would be impossible to implement such a term of employment. Extra officers and crew members would be necessary under such conditions. The vessels could not be made to accommodate additional personnel. Both parties agree on this point.

An effective alternative is that of allowing time off in port. Indeed the employees concerned are now allowed time off on the basis of one day per week. One week's vacation with pay is also granted to the employees. The normal duty time for Masters and Mates comprises 306 days per year. The Guild wants the duty time reduced to 240 days per year, sixty-six days less than at present. The plan we are about to propose will permit the employees to have several consecutive days ashore each month. The benefits which will accrue from such a plan will far out-weigh those which might be available under con-

ditions where the employee would have time off duty while aboard ship. It is difficult to measure the difference in benefits but it seems reasonable to us to assess the benefits to be obtained under the proposed plan at double the value of the benefits resulting from time off aboard ship. On that basis we are of the opinion that it would be just and reasonable to increase time off by 33 days per year. This number of days (33) when added to the 51 days now taken off duty by the employees equals 84 days per year or 7 days per month.

The Finding and Direction of this Board will provide that days off for Masters and Mates on harbour boats shall be allowed within the calendar month and at least 3 days of which will be taken consecutively. As for the outside boat crews, days off must be allowed within a three-months' period. For the purpose of this provision the three-months' periods shall terminate on March 31, June 30, September 30 and December 31. Masters and Mates on outside boats should have at least 5 consecutive days off in each three-months' period.

We hold that the Guild has failed to produce any sound reasons why the Masters and Mates should be paid punitive rates for overtime, and we accordingly dismiss that part of the application which affects such issue.

In view of our decision to allow the employees additional time ashore, we do not consider that it would be reasonable to change the existing vacation-with-pay plan or to make any direction respecting statutory holidays.

In the Pacific Coyle, et al, and the Canadian Seamen's Union case consideration was given to the C.S.U. request for a wage differential for employees on vessels operating in the areas described in (d) above. In that case we had this to say on the point:—

It was developed at the hearing that ranges of rates presently exist for each such occupational classification based generally on the type of vessel and the area in which service is performed. Normally it is only the larger boats which operate in the more exposed waters for service in which a rate differential is asked. A differential is already allowed for such service through the range of rates for each classification, the higher wage rates in the range being those paid on the sea-going vessels. That part of the application must therefore be denied.

The above-quoted reasons apply with equal force to this case, and we dismiss that part of the application now before us.

Finding and Direction accordingly.

October 4, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decisions as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for two days during the month of September. During this period the Board received nineteen applications, held five hearings, issued five certificates designating bargaining representatives, rejected four applications, ordered five representation votes and gave decisions in three appeal cases.

Certificates Issued

Five applications for certification of bargaining representatives were approved by the Board and certificates issued as below:

1. Messrs. J. L. Pateman and A. Mose and the *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees*, for the clerks employed in the superintendent's office of the *Canadian Pacific Railway Company, Saskatoon, Sask.* The assistant-chief clerk and the superintendent's stenographer were excluded from the bargaining unit.*

2. Messrs. J. A. Sullivan, H. Davis and T. G. McManus and the *Canadian Seamen's*

*Union for the Unlicensed Personnel on vessels operated by the Gulf and Lake Navigation Company Limited, Montreal, P.Q.**

3. Messrs. Austin Smith, Edward Wennerlow and William Foster and *Local 507, International Longshoremen's and Warehousemen's Union*, for employees of the *Canadian Stevedoring Company Limited, Vancouver, B.C.*, engaged in operations for scaling, washing, cleaning, sweeping, chipping and painting of ships and ship's parts; cleaning of deep tanks, lining and fitting of ships for grain; fitting of ships for livestock and other commodities; shoring-up of cargoes; and operators of gear and equipment aboard ship only, including the storekeeper-gearman. The foreman was excluded from the bargaining unit.*

4. Messrs. Austin Smith, Edward Wennerlow and William Foster, and *Local 507, International Longshoremen's and Warehousemen's Union*, for the employees of *Louis Wolfe & Sons (Vancouver), Limited, Vancouver, B.C.*, engaged in operations of scaling, washing, cleaning, sweeping, chipping and painting of

ships and ship's parts; cleaning of deep tanks, lining and fitting of ships for grain; fitting ships for livestock and other commodities; shoring-up of cargo; and operators of gear and equipment aboard ship only, including the truck driver: The foreman was excluded from the bargaining unit.*

5. Messrs. J. Clazier, W. E. Sykes, R. C. Harvey-Jellie and A. L. Fleming and the *Quebec Federation of Professional Employees, Unit No. 3*, for the following employees of the *Bell Telephone Company of Canada, Montreal, P.Q.*: In the *Department of the Vice-President, Engineering*: vice-president, inventory and cost engineer, architect, general plant extension engineer, transmission and foreign wire relations engineer, staff engineer, toll plans engineer, equipment standards and maintenance engineer, outside plant standards and maintenance engineer, supervising engineer (dial, power and test-room operation), supervising engineer (Stations and P.B.X.), architectural draughtsman; in the *Engineering Department, Eastern Area*: chief engineer, plant extension engineer, transmission engineer, buildings engineer, equipment engineer, outside plant engineer, program and cost studies engineer, budget and records supervisor, foreign wire relations engineer, toll plans engineer, transmission practices engineer, radio telephone engineer, toll equipment engineer, power engineer, local equipment engineer, exchange plant engineer, toll plant engineer; in the *Eastern Area, Plant Department, Montreal Division, Engineering*: division plant engineer, right of way supervisor, district plant engineers, transmission engineer, equipment engineer, special studies engineer; in the *Eastern Area, Plant Department, Eastern Division, Construction and Plant Engineering*: superintendent of construction and plant engineering, division plant engineer, district plant engineers, special studies engineer, transmission engineer, equipment engineer, division superintendent of toll cable plant, toll cable engineer.

Applications for Certification Rejected

1. "*Eldorado Section*" *Yellowknife District Miners' Union, International Union of Mine, Mill and Smelter Workers and Eldorado Mining and Refining (1944) Limited, Port Radium, N.W.T.* (L.G. May 1946, p. 607). Following an investigation of the application, the Board reached the decision to reject the application for the reason that it did not have the support of a majority of the employees affected.

*Following investigation of the application and a representation vote.

2. *International Longshoremen's and Warehousemen's Union, Local 507, and Searle Grain Company Limited, New Westminster, B.C.* (L.G. July 1946, p. 902). The Board reached the decision to reject the application following a representation vote, as the applicant union failed to obtain the support of a majority of the employees affected.

3. *National Seamen's Association of Canada and Canada Steamship Lines, Limited, Montreal, P.Q.* (L.G. August 1946, p. 1051). Following an investigation of the application, the Board reached the decision to reject the application for the reason that it did not have the support of the majority of the employees affected.

4. *Canadian Seamen's Union and Saguenay Terminals Limited, Montreal, P.Q.* (L.G. September 1946, p. 1221). Following an investigation of the application and a public hearing, the Board decided to reject the application for the reason that the employees affected did not come within the jurisdiction of the Board.

Representation Votes Ordered

1. *Order of Railway Conductors and Canadian Pacific Railway Company, Eastern and Western Lines, Montreal, P.Q.*, (L.G. July 1946, p. 902). Mr. C. W. Rump, Industrial Relations Officer, Ottawa, Ontario, was appointed by the Board to act as Returning Officer in votes of road train conductors, employed on Eastern and Western lines of the Canadian Pacific Railway Company, Montreal, P.Q.

2. *Brotherhood of Railroad Trainmen and Canadian Pacific Railway Company, Western Lines, Montreal, P.Q.* (L.G. July 1946, p. 902). Following an investigation of the application, the Board ordered a representation vote of the road train conductors, employed on Western Lines of the Canadian Pacific Railway Company, Montreal, P.Q. Mr. C. W. Rump, Industrial Relations Officer, Ottawa, Ontario, was appointed by the Board to conduct the vote.

3. *Canadian Seamen's Union and Pacific Great Eastern Railway Company, Vancouver, B.C.* (L.G. August 1946, p. 1051). Following consideration of the application, the Board appointed Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., to conduct a vote of the unlicensed personnel, employed on tugs and barges of the Pacific Great Eastern Railway Company, Vancouver, B.C.

4. *Canadian Seamen's Union and British Columbia Steamships Limited, Vancouver, B.C.* (L.G. August 1946, p. 1051). Mr. G. R. Currie,

Industrial Relations Officer, Vancouver, B.C., was appointed by the Board to act as Returning Officer in a vote of the unlicensed personnel, employed in the deck, engine-room and steward's departments of vessels operated by the British Columbia Steamships Limited, Vancouver, B.C.

Applications for Certification Received During the Month of September, 1946

1. *International Brotherhood of Electrical Workers, N.B. 1538*, on behalf of employees of *Central Broadcasting System, Prince Albert, Sask.*

2. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees*, on behalf of clerks and stenographers in the superintendent's office of the *Canadian Pacific Railway Company, Medicine Hat, Alta.*

3. *Canadian Transport Workers' Union*, on behalf of employees of *Norman's Transfer Limited, Cornwall, Ont.*

4. *Canadian Transport Workers' Union*, on behalf of employees of *Taggarts Service Limited, Montreal, P.Q.*

5. *The Saskatchewan Wheat Pool Employees' Association*, on behalf of employees of the *Saskatchewan Pool Elevators Limited, Regina, Sask.*

6. *The Saskatchewan Wheat Pool Employees' Association*, on behalf of employees of the *Saskatchewan Pool Terminals Limited, Fort William, Ontario.*

7. *The Saskatchewan Wheat Pool Employees' Association*, on behalf of employees of the *Saskatchewan Co-operative Producers Limited, Regina, Sask.*

8. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of *Shell Canadian Tankers Limited, Toronto, Ont.*

9. *Canadian Transport Workers' Union*, on behalf of chauffeurs and chauffeurs' helpers employed by *McNeil Transport Limited, Montreal, P.Q.*

10. *Commercial Telegraphers' Union, Marconi System Division No. 59*, on behalf of Radio Telegraphers at Coastal stations and radio offices in the *Marine Service of Canadian-Marconi Company, Limited, Montreal, P.Q.*

11. *Canadian Air Line Dispatchers' Association*, on behalf of station chief dispatchers, dispatchers, dispatcher-operator and dispatcher clerks, employed by *Canadian Pacific Air Lines, Montreal, P.Q.*

12. *The Saskatchewan Wheat Pool Employees' Association*, on behalf of employees of the *Saskatchewan Co-operative Livestock Producers Limited, Regina, Sask.*

13. *The Commercial Telegraphers' Union, Trans-Canada Air Lines Division*, on behalf of employees of *Trans-Canada Air Lines*, assigned to radio operation in the ground radio stations.

14. *Commercial Telegraphers' Union, Western Union Division*, on behalf of employees in the provinces of *New Brunswick and Nova Scotia*, of the *Western Union Telegraph Company, New York, N.Y.*

15. *Canadian Seamen's Union*, on behalf of the unlicensed personnel employed on vessels of *Canadian Gypsum Company Limited, Windsor, N.S.*

16. *Western Canada Firebosses Association, Sub-district No. 2*, on behalf of firebosses employed by *McLeod River Hard Coal Company, 1941, Mercoal, Alta.*

17. *Western Canada Firebosses Association, Sub-district No. 2*, on behalf of firebosses, employed by *Foothills Collieries Limited, Foothills, Alta.*

18. *Canadian Transport Workers' Union*, on behalf of chauffeurs and chauffeurs' helpers of *Smith Transport Limited, Montreal, P.Q.*

19. *Canadian Transport Workers' Union*, on behalf of chauffeurs and chauffeurs' helpers of *Kingsway Transports Limited, Montreal, P.Q.*

Decisions of Board in Appeal Cases

1. Following a hearing, the Board granted leave to appeal to the *Fahralloy Employees' Association* from a decision of the Ontario Labour Relations Board, rejecting an application of the Association for certification of bargaining representatives; but dismissed the appeal. At the same time, the Board refused leave to appeal to the employer, *Fahralloy (Canada) Limited, Orillia, Ont.*

Reasons for judgment are to be given later.

2. On September 10, the Board dismissed the appeal of the *Industrial Council of the employees of Canada Electric Castings Limited, Orillia, Ont.*, from a decision of the Ontario Labour Relations Board, rejecting the petitioner's application for certification of bargaining representatives.

Reasons for judgment are to be given later.

3. Following a hearing, the Board dismissed the appeal of *Local 251, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO)* from a decision of the Ontario Labour Relations Board, rejecting the application of *Local*

70, Glass Bottle Blowers' Association of the United States and Canada, for certification of bargaining representatives, without prejudice to the right of that union to make a new application.

Reasons for judgment are to be given later.

Between: Halifax Civic Employees' Federal Union No. 143, Appellant (Applicant), and Corporation of the City of Halifax, Halifax, N.S., Respondent.

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills, Mosher and Picard.

Reasons for Judgment

This is an appeal from the decision of the Nova Scotia Wartime Labour Relations Board excluding from a bargaining unit comprising all administrative employees of the Corporation of the City of Halifax, N.S., the employees in the following occupational classifications:

Solicitor's Department:

City Solicitor
Assistants to Solicitor (Barristers)

City Clerk's Department:

City Clerk
Deputy City Clerk

City Civil and Police Court:

Bailiff

Department of Finance and Accounts:

Commissioner of Finance
Deputy Commissioner of Finance
Chief Accountant
Deputy Chief Accountant
Internal Auditor
City Treasurer
City Collector
Deputy City Collector

Works Department:

Commissioner of Works
Deputy Commissioner of Works
Superintendent of Streets

Department of Public Health and Welfare:

Commissioner of Public Health and Welfare
Superintendent of Health
Field Director Communicable Diseases
Medical Superintendent Tuberculosis Hospital and Director of T.B. Control
Medical Director, Maternal, Infant, Child and Dental Service
Dentists
Assistant Dentists
Supervisor of Nurses

Reasons for Judgment in Other Appeal Cases

Reasons for judgment in four cases dealt with by the Board at its August sittings and summarized in the September 1946 issue of the LABOUR GAZETTE, are given below:

City Home:

Superintendent
Assistant Superintendent

City Prison:

Governor
Deputy Governor

Assessor's Department:

City Assessor
Deputy City Assessor

The dentists and dental assistants are employed by the City in their professional capacity and have, in the opinion of this Board, been properly excluded as not appropriate for inclusion in a bargaining unit comprising administrative employees.

The bailiff has been excluded from the bargaining unit by the Nova Scotia Board for the apparent reason that though paid by the City, he is, according to the evidence, attached for duty and discipline to the City Magistrate's Court and is under the direction of the Clerk of that Court which is an agency whose employees are not within the bargaining unit.

This Board is of opinion that the reason cited warranted the exclusion of the bailiff from the bargaining unit.

The City Solicitor and his assistants (barristers) are clearly confidential employees, in view of the nature of their duties and responsibilities towards the Corporation. The duties of the City Solicitor in relation to the City are well illustrated by his appearance on behalf of the City on the application for certification and before this Board in this appeal and his duties would undoubtedly extend to the use of his services by the City as required in the negotiation of any collective agreement between the City and the bargaining representatives of the employees and in matters arising subsequently in the administration of the agreement. The duties of his legal assistants are obviously in the same category.

All other classifications involved are positions whose duties clearly involve the discharge of management functions including disciplinary duties in relation to employees under their

supervision and as such are not appropriate for inclusion in the proposed bargaining unit consisting of employees under their supervision. Moreover, in the administration of any collective agreement between the City and the appellant Union representing the employees in the bargaining unit, the supervisory employees in question would undoubtedly represent the Corporation in respect of employees within the units under their supervision and direction in dealing with grievances and other matters arising out of the application of the collective agreement.

Between: Sylvia Hotel Limited, Vancouver, B.C. Appellant (Respondent), and Sylvia Hotel Employees Organization, Appellant (Intervener), and Local 224, Building Service Employees Union and Local 28, Hotel and Restaurant Employees Union, Respondents (Applicants).

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills, Mosher and Picard.

Reasons for Judgment

This is a joint appeal from the decision of the Minister of Labour for British Columbia certifying bargaining representatives jointly selected by Local 224, Building Service Employees Union, and Local 28, Hotel and Restaurant Employees Union, for a bargaining unit comprising employees of Sylvia Hotel Limited, Vancouver, B.C.

The appellants allege

(1) that subsequent to the filing of the application for certification by the respondents, a substantial number of employees have changed their minds and no longer wish to be represented by the respondents.

(2) that the employees were organized by the respondents during working hours contrary to the provisions of the Wartime Labour Relations Regulations and by the use of coercion and misrepresentation.

The appellants accordingly ask that the National Board revoke the certification and order a vote.

On the other hand, the respondents allege the use of unfair pressure on the part of the employer upon the employees in an attempt to influence them against the respondent unions and further claim that the Employees' Organization involved in this appeal was organized

Between: Local 1-217, International Woodworkers of America, Appellant, and British Columbia Forest Products Limited, Vancouver, B.C., Respondent, and Local 2968, United Brotherhood of Carpenters and Joiners of America, Respondent (Applicant).

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills, Mosher and Picard.

Reasons for Judgment

This is an appeal from the decision of the Minister of Labour for British Columbia certifying bargaining representatives selected

For the above reasons, the appeal is dismissed.

(Sgd.) G. B. O'CONNOR,

Chairman
for the Board.

A. J. Murphy, Esq.,
P. R. Bengough, Esq.,
A. E. Hemming, Esq.,
for Appellant (Applicant).

C. P. Bethune, Esq., K.C.,
for Respondent.

Dated at Ottawa, September 10, 1946.

at the instigation of and under pressure of the employer.

This Board finds that there was sufficient evidence upon which the Minister of Labour for British Columbia was warranted in finding that a majority of employees in the bargaining unit were members of the respondent unions within the meaning of Section 5 (2) of the Regulations. The allegations made by the appellants to this Board with respect to coercion and misrepresentation and the changed attitude of employees in the bargaining unit were also made to the Provincial Minister of Labour prior to certification and were evidently weighed by him before arriving at his decision to certify the respondent unions.

In all the circumstances, the Board is of the opinion that the discretion exercised by the Minister of Labour for British Columbia in deciding to certify the bargaining representatives of the respondent unions without ordering a vote should not be disturbed.

The appeal is accordingly dismissed.

(Sgd.) G. B. O'CONNOR,

Chairman.

for the Board

R. E. Brocklesby, Esq.,
for Appellant (Respondent).

Emil Bjarnason, Esq.,
for Respondents (Applicants).

Dated at Ottawa, September 10, 1946.

by Local 2968, United Brotherhood of Carpenters and Joiners, for a bargaining unit consisting of employees of British Columbia Forest Products Limited.

The appellant bases its appeal on the ground that it was not given proper notification of the application for certification and though

an interested party, was not given an opportunity to give evidence and make representations in the matter as provided for by Section 24, Subsection 7 of the Wartime Labour Relations Regulations which reads:

(7) The Board shall determine its own procedure but shall, in every case, give an opportunity to all interested parties to present evidence and make representations.

The employees affected were, at an earlier date, employees of Sitka Spruce Lumber Company Limited and bargaining representatives selected by the appellant union had been certified to represent the employees of that Company in collective bargaining with the Company but no collective agreement had been entered into between such bargaining representatives and that Company. In the early part of 1946, the business and assets of that Company were acquired as a going concern by a new Company, Vancouver Cedar and Spruce Limited. Subsequently the name of this latter Company was changed to that of British Columbia Forest Products Limited.

The application of the respondent union for certification was made in April, 1946, following the date of the disposition of the business and property of Sitka Spruce Lumber Company Limited to Vancouver Cedar and Spruce Limited and in its application, the respondent union gave to the Minister the following information:

The I.W.A. were certified in 1944 to Sitka Spruce Lumber Company Limited but held no agreement. Since that time the Company has changed hands and is now Vancouver Cedar and Spruce, Limited.

Moreover, the appellant union, on February 23, 1946, had written to the Registrar under the Wartime Labour Relations Regulations Act in the Province on February 23, 1946, asking whether it would be necessary for the union to seek recertification in view of the change of ownership, thus conveying to the Minister notice that the organization was still interested in this group of employees.

In reply the Minister stated:

There is not sufficient information contained in your letter for us to properly answer the question you put to us. From what we can ascertain there has been no change in the status of the Sitka Spruce Lumber Company Limited. However the Vancouver Cedar and Spruce Limited has been recently incorporated. It is quite probable that the newly incorporated company has purchased the equipment and plant of the old. If this assumption is correct, the Minister is of

opinion that you would be well advised to apply for certification anew.

In correspondence with the appellant union subsequent to certification of the respondent union, the Minister stated:

Our inspector's report indicates that the I.W.A. officers who previously held certification were aware of the new application but no protest had been received and no application had been received.

On the other hand, the appellant union in sworn statements made by its officers states that the union had no knowledge of the application for certification, that they inferred from the earlier correspondence in February with the Registrar that the transaction involving change of ownership did not require them to make a new application nor protect their previous certification.

The failure of the appellant union to apply for certification after the change in ownership did not, in the opinion of the Board, relieve the Minister of the necessity of giving to the appellant, as an interested party, appropriate notice of the respondent union's application for certification in compliance with Section 24 (7) of the Wartime Labour Relations Regulations and this Board's own regulations (see Reg. 3 (1) which would apply in the absence of any regulation governing the method of giving notice made by the Provincial Minister). Moreover, the evidence available to this Board does not satisfy the Board that adequate notice was given to the appellant union of the application for certification so as to give it a reasonable opportunity of presenting evidence and making representations even though the appellant may have been careless in not following up on its inquiry to the Minister in February, 1946.

In earlier decisions this Board has held that a party standing in a position similar to the appellant must be given the opportunity to present evidence and make representations—see International Association of Machinists, United Steel Workers, and Vivian Diesels and Munitions Limited, D.L.S. 7-501; Canadian Fish Handlers Union, Employees Mutual Benefit Association and National Fish Company Limited, D.L.S. 7-531.

Both appellant and respondent unions claim as members a majority of employees in the bargaining unit.

The appeal is allowed and the certification granted to the bargaining representatives selected by the respondent (applicant) is set aside. The appellant may apply to the

Minister of Labour for British Columbia for the certification of its bargaining representatives on the basis of the recent vote taken on the order of this Board which resulted as follows:

No. of eligible voters	164
No. of votes cast	150
No. voting for International Woodworkers of America, Local 1-217	90

No. voting for United Brotherhood of Carpenters & Joiners of America, Local 2968	52
No. of spoiled ballots	8

(Sgd.) G. B. O'CONNOR,
Chairman

EMIL BJARNASON, Esq. for the Board.
for Appellant

Dated at Ottawa, September 10, 1946.

Between: Canadian Seamen's Union, Applicant, and Gulf and Lake Navigation Company, Limited, Montreal, Quebec, Keystone Transports Limited Montreal, Quebec, respondents, and National Seamen's Association of Canada Intervener.

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills, Mosher and Picard.

Reasons for Judgment

These are two applications made by the Canadian Seamen's Union for certification of bargaining representatives for unlicensed personnel employed respectively by Keystone Transports Limited and Gulf & Lake Navigation Company Limited, on vessels operated by each of the two Companies. In each case, the National Seamen's Association of Canada has intervened to oppose the application on the ground that it represents the majority of employees in the proposed bargaining unit.

In each case, both the applicant and the intervener have produced to the Board's investigating officer, membership records and authorizations showing that the majority of employees in the bargaining unit are members of its organization within the meaning of Section 5 (2) of the Regulations.

In each case, there has been and still is in effect a collective agreement between the Company and the Intervener covering employees in the proposed bargaining unit. In the case of Keystone Transports Limited, the agreement is dated March 3, 1941, and has been continued in effect since that time under the provisions of a clause in the agreement which reads as follows:

12. This agreement shall remain in force for a period of two years, or for the duration of the war and shall be considered as renewed from year to year thereafter between the parties hereto unless any party to the agreement shall give notice to the other of its desire to modify, change, amend, or cancel or revise such agreement. Any such notice shall be given at least sixty days prior to the expiration date of this Agreement, and if such notice shall not be given, the Agreement shall be deemed renewed for the successive year.

In the case of the Gulf & Lake Navigation Company Limited, a similar agreement with the intervener has been in effect since March 3, 1941, in virtue of a clause identical in form to that contained in the agreement between the intervener and Keystone Transports Limited and recited above.

In opposing the applications for certification, the Company and the Intervener, in each case, have claimed that the provisions of the clause in the existing collective agreement, which has been recited above, operate as a bar to the appointment of new bargaining representatives on the ground that the effect of the clause is to provide a new term of agreement commencing, in each case, on the third day of March, 1946, and running for one year from that date.

In view of this and applying the provisions of Section 9 of the Wartime Labour Relations Regulations, it is claimed that new bargaining representatives may not be elected or substituted until after the expiration of ten months from March 3, 1946, and that, therefore, the present applications are premature.

In the opinion of the Board, the provisions of the clause in question do not establish a new term of agreement within the meaning of Section 9 of the Regulations but simply mean that after the first two-year term of the agreement has elapsed they should be interpreted, for the purposes of Section 9, as providing for a term of agreement of indefinite duration subject to termination or negotiation for amendment, revision or cancellation upon notice and in the manner prescribed in the clause or as otherwise provided for in the Regulations. Applying the foregoing to the agreements under consideration, the Board is of opinion that the existing term commenced on the third day of March 3, 1943, and, more than ten months having elapsed, the applications for

certification of new bargaining representatives are in order in point of time.

The Board, accordingly, directs that in the case of each application, a representation vote shall be taken of the employees in the bargaining unit comprising firemen, oilers, wheelmen, deckhands, watchmen, first and second cooks and porters employed on the vessels operated by the Company. The names of both the applicant and intervener will be placed on the ballot.

(Sgd.) G. B. O'CONNOR,
Chairman.
for the Board.

for Intervener.

Dated at Ottawa, September 10, 1946.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During September, 1946, Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

British American Oil Company Limited, Moose Jaw, Sask. and Local No. 5, National Union of Petroleum Workers (CCL). Mr. H. R. Johnstone, Conciliation Officer.

Canadian Line Materials Limited, Scarborough Junction, Ont. Pattern Makers' Association of Toronto (AFL-TLC). Mr. F. J. Ainsborough, Conciliation Officer.

Duplicate Canada Limited, Oshawa, Ont. and Local 222 International Union, United Auto-

mobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO). Mr. Louis Fine, Conciliation Officer.

Gelling Engineering Limited, Welland, Ontario, and Local 523, United Electrical, Radio and Machine Workers of America (CIO-CCL). Mr. F. J. Ainsborough, Conciliation Officer.

Joseph Stokes Rubber Company Limited, Welland, Ont. and Local 523, United Electrical, Radio and Machine Workers of America, (CIO-CCL). Mr. H. Perkins, Conciliation Officer.

Massey-Harris Company Limited (Toronto), Verity and Market St. plant, (Brantford, Ont.) and Locals 439 and 458, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO). Mr. H. Perkins, Conciliation Officer.

Metropolitan Stores Limited, Winnipeg, Man. and Local 286, Retail Clerks International Protective Association (AFL-TLC). Mr. T. J. Williams, Conciliation Officer.

Moffats Limited, Weston, Ontario and Local 3129, United Steelworkers of America (CIO-CCL). Mr. William Dunn, Conciliation Officer.

Silverware Products Limited, Toronto, Ont. and Local 514, United Electrical, Radio and Machine Workers of America (CIO-CCL). Mr. George Fenwick, Conciliation Officer.

Seven Taxi-Cab Companies (Emile Lanthier, etc.) Montreal, P.Q. and Local 4, Taxi-Cab Drivers' Union (AFL-TLC). Mr. L. Pepin, Conciliation Officer.

The Toronto Hospital for the Treatment of Tuberculosis (operated by the National Sanitarium Assoc.) and Local 204, Building Service Employees International Union. (AFL-TLC) Mr. H. Perkins, Conciliation Officer.

Western Canadian Greyhound Lines Limited, Calgary, Alta. and Division 1374 Amalgamated Assn. of Street Electric Railway & Motor Coach Employees of America (AFL-TLC). Mr. H. S. Johnstone, Conciliation Officer.

Wool Combing Corporation of Canada Limited, Acton, Ont. and Local 721, Textile Workers Union of America (CIO-CCL). Mr. Wm. Dunn, Conciliation Officer.

Agreements Facilitated by Conciliation Officers and Cases Withdrawn

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:

Davie Shipbuilding & Repairing Company, Lauzon, P.Q. and Local No. 3, Marine and Shipbuilding Workers of Canada (CCL). Mr. L. Pepin, Conciliation Officer.

Eastern Coal Company Limited, Saint John, N.B., and Local No. 1, National Union of Coal Distributors (CCL). Mr. H. R. Pettigrove, Conciliation Officer.

Falconbridge Nickel Mines Limited, Falconbridge, Ont., and Local 598, International Union of Mine, Mill and Smelter Workers (CIO-CCL). Mr. G. Fenwick, Conciliation Officer.

Hilton Bros., Ltd., Winnipeg, Manitoba, and Local No. 87, Printing Pressmen's and Assistants' Union (AFL-TLC). Mr. H. S. Johnstone, Conciliation Officer.

Parker D. Mitchell Limited, Saint John, N.B., and Local No. 1, National Union of Coal Distributors (CCL). Mr. H. R. Pettigrove, Conciliation Officer.

Sudbury Construction & Machinery Company Limited, Sudbury, Ont., and Local 598, International Union of Mine, Mill and Smelter Workers. (CIO-CCL). Mr. G. Fenwick, Conciliation Officer.

Boards Established

During the month, Boards of Conciliation were established but not fully constituted as follows:

Donnell and Mudge Limited, New Toronto Ont., and Local 330, International Fur and Leather Workers Union (CIO-CCL).

East Malartic Mines Limited, Halet, P.Q. and Local 696, Malartic Mine and Mill Workers' Union. (CIO-CCL).

Ingersoll Machine & Tool Company, Ingersoll, Ont. and Local 2918, United Steelworkers of America (CIO-CCL).

Malartic Gold Fields Mine Limited, Halet, P.Q. and Local 696, Malartic Mine and

Mill Workers Union (International Union M.M.S.W.) (CIO-CCL).

A. E. McKenzie Company Limited, Brandon, Man. and Local No. 1, Canadian Bakery Workers' Union (CCL).

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:

Canadian Industries Limited.—The Board of Conciliation established to deal with a dispute between Canadian Industries Limited (Copper Cliff Plant) Copper Cliff, Ontario, and Local 598, International Union of Mine, Mill and Smelter Workers (CIO-CCL) was fully constituted on September 14, 1946, with the appointment of Dr. A. Brady, Toronto, Ont., as Chairman of the Board who was appointed on the joint recommendation from the other two members of the Board. Mr. G. H. Brown, Ottawa, Ont., and Mr. E. B. Jolliffe, Toronto, Ont. were appointed on the recommendation of the employer and employees respectively.

Ottawa Electric Railway Company.—The Board of Conciliation established to deal with a dispute between Ottawa Electric Railway Company and Division 279, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (AFL-TLC) was fully constituted on September 18, 1946, with the appointment of Mr. James H. Stitt, Ottawa, Ont. as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Col. Livius P. Sherwood, Ottawa, Ont. and Mr. A. H. Liefie, Ottawa, Ont. were appointed on the recommendation of the employer and employees respectively.

Ottawa Car and Aircraft Limited.—The Board of Conciliation established to deal with a dispute between the Ottawa Car and Aircraft Limited and Local 641, International Union, United Automobile Aircraft and Agricultural Implement Workers of America (UAW-CIO) was fully constituted on September 4, 1946, with the appointment of His Honour Judge A. G. McDougall, Ottawa, Ont., as Chairman of the Board who was appointed on the joint recommendation from the other two members of the Board. Mr. J. J. Connolly, Ottawa, and Mr. Norman Levy, Toronto, were appointed on the recommendation of the employer and employees respectively.

Searle Grain Company, Limited.—The Board of Conciliation established to deal with a dispute between the Searle Grain Company, Limited and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (AFL-TLC) was fully

constituted on September 17, 1946, with the appointment of Judge W. J. Lindall, Winnipeg, Manitoba, as Chairman of the Board who was appointed on the joint recommendation from the other two members of the Board. Mr. W. A. Johnson, K.C., Winnipeg and Mr. A. J. Wickens, K.C., Moose Jaw, were appointed on the recommendation of the employer and employees respectively.

W. C. Edwards Co. Ltd.—The Board of Conciliation established to deal with a dispute

between W. C. Edwards Co. Ltd., and Local No. 6, National Union of Woodworkers (CCL) was fully constituted on September 24, 1946, with the appointment of Mr. Duncan MacTavish, K.C., Ottawa, as Chairman of the Board who was appointed on the joint recommendation from the other two members of the Board. Mr. W. J. LeClair, Ottawa, and Dr. Eugene Forsey, Ottawa, were appointed on the recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during September:—

Report of Board in Dispute Between Vancouver Block (Mrs. L. Manford) Vancouver, B.C., and Local 244, Building Service Employees Union.

On September 18, the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Vancouver Block (Mrs. L. Manford), Vancouver, B.C., and Local 244, Building Service Employees Union.

The Board was under the Chairmanship of Mr. J. P. Keen, Vancouver, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Mr. D. McKenzie, Vancouver, and Mr. R. K. Gervin, Vancouver, appointed on the nomination of the employer and employees respectively.

Report of Board

HON. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Dear Sir:

The members of the Board of Conciliation appointed by you in the above matter now beg to report: Further to our last (interim) report, several meetings of the Board were held in a further endeavour to bring about an agreement between the parties to the dispute but have found that it is impossible to find sufficient common ground upon which an agreement could be based. The question of wages is a minor factor. In the opinion of the Board there seems no doubt that Mrs. Manford was at the first very hostile to the union and this attitude was sustained by her solicitor.

The whole set-up of the Vancouver Block has changed considerably since the union was certified as bargaining agent. The adminis-

trator died. Mrs. Manford, who has consistently stated she had no authority to enter into any agreement binding on the owner, has resigned through ill health. New administrators have been appointed by the Court and are now represented by Mr. Farrell who expresses the willingness of the administrators to negotiate and enter into an agreement if it is the wish of the majority of the present employees, many of whom have been employed at the Vancouver Block for over a year. The Board is satisfied that there is not now a majority of the employees who are members of the union and have carefully investigated the suggestion by the union of unfair influence or discrimination within the meaning of Section 19 of P.C. 1003 and are of the opinion that this cannot be sustained, evidence on this point being not at all conclusive.

We enclose for your information a transcript in duplicate of the evidence taken at the last two meetings held on the 8th and 28th of August respectively.

Therefore with the present circumstances in view as well as events leading up to them, the Board feels that it cannot draft an agreement which would be signed or satisfactory to both parties but do feel that the "atmosphere" has been cleared and cleansed and that in the near future it will be possible for the parties to come to an amicable understanding.

Respectfully submitted,

(Sgd.) J. F. KEEN,
Chairman.

(Sgd.) D. MCKENZIE,
(Sgd.) R. K. GERVIN,

Report of Board in Dispute Between Lamaque Mining Co. Ltd., Bourlamaque, Quebec, and Local 654, Val D'Or Mine, and Mill Workers, Int. Union M.M. and Smelter Workers (CIO-CCL)

On September 18 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Lamaque Mining Co. Ltd., Bourlamaque, Quebec, and Local 654, Val d'Or Mine, and Mill Workers, Int. Union M.M. and Smelter Workers (CIO-CCL).

The Board was under the Chairmanship of Mr. R. T. Ferguson, Montreal, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Mr. A. Harris, Kirkland Lake, and Mr. G. M. Desaulniers, Montreal, appointed on the nomination of the employer and employees, respectively.

Report of Board

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,

Ottawa, Ont.

SIR.—The Board of Conciliation appointed by you in the above matter has completed its sittings and now submits its report. Hearings were held in Montreal at which the Company was represented by Mr. P. N. Tapley and Mr. J. C. Perry, while the Union representatives were Mr. F. T. McGuire and Mr. R. A. Lachance. Private sessions of the Board were also held.

At the first hearing the Company representatives took exception to the presence, as representatives, of Messrs. McGuire and Lachance, their contention being that as these gentlemen were not members of the Union Local 654 they were disqualified. As, however, the Union had been notified by registered letter of the hearings and as these gentlemen had personal credentials, the objection was overruled and the Company agreed to continue with the hearings.

The parties had entered into a collective agreement dated 28th March, 1945. This agreement was for one year but by mutual consent was extended. A new agreement was under discussion and it was because the parties could not agree to its terms that the present Board of Conciliation was established.

When the Board commenced its sittings there were several points in dispute but these were, in the course of proceedings, reduced to four which will be hereinafter dealt with. The matter of hours of work and pay was withdrawn from the Board's decision and it is understood that this will be taken up with the Regional War Labour Board.

The four matters left in dispute referred to (1) Check-off; (2) Statutory Holidays; (3) Qualifications of Union Stewards; and (4) the insertion of the words "physical capability" in a clause dealing with seniority.

The Company provided a brief stating its position and appended to this copies of the expired agreement, the proposed changes to this agreement made by the Union with the counter-proposal of the Company, and a draft agreement which the Company was prepared to execute. The Board found this written material very helpful. No written representations were submitted by the Union.

The following is my report and recommendations:—

1. CHECK-OFF

In the majority of cases where check-off forms an obstacle to the completion of an agreement it is tied to or forms part of some proposal for maintenance of Union membership. This was not so here. While I understand that in the early stages of the negotiations between the parties the Union had asked for a clause compelling all eligible workmen to join the Union as a condition of their employment this request was later abandoned, and when the matter came before the Board the position was that the Union was content to leave it to the voluntary action of the workers themselves whether they joined the Union or, having joined, wished to remain members. No question of Union membership affected their employment. The matter for the consideration of the parties and the Board was therefore one of comparative simplicity, devoid of the complicating factors which usually are present when a check-off clause is proposed for insertion in a collective agreement.

The Union proposed that there should be inserted in the agreement a provision that the Company would deduct from each employee's pay the sum of \$1.00 per month and remit the amount so deducted to the Union on or before the 10th day of the month following the deduction; acquiescence of the employees, whether Union members or not, to be a condition of their employment, and of course this provision only to be applicable to those employees who occupationally were eligible for Union membership. This is similar to what is known as the "Rand" plan of check-off.

The Union's proposal was immediately and flatly rejected by the Company, and it was

apparent that further consideration would not induce it to modify its attitude.

As a means of bridging the gulf which separated the parties it was then suggested that they should consider a proposal that the Company would, on receiving a properly and voluntarily executed request from a Union employee, deduct from his wages each month the Union dues undertaken to be paid by him, this to continue during the life of the agreement or so long as the employee was employed, and transmit these deducted sums to the Union; it being understood that while he retained the right to resign his Union membership at any time this deduction from his wages would continue until the end of the term of the collective bargain or his ceasing to be employed by the Company. There was considerable discussion of this proposal and the Union representatives said they would agree to it provided the other parts of the contract were also agreed to. The Company's representatives were unable to accept the proposal, but promised to take it up with the Company Directorate and let the Board know its decision. In due course a letter was received from the Company in which it declined the proposal.

It seems to me clear that an undertaking by any person of legal capacity to pay dues for the privilege of membership in an organization, whether social club or trade union, becomes a valid legal contract on his being accepted as a member and that his subsequent resignation from membership, unless a fraud has been perpetrated (which has no bearing here) does not affect his legal liability to pay what he has undertaken to pay. Payment of union dues therefore is in my opinion in exactly the same position as payment of other legal liabilities. The form of check-off under consideration is not a matter of whether the employer thinks that the workman might have made a wiser disposition of his wages. The important point is that the workman has exercised his undoubted right to join a union and has incurred a legally enforceable obligation in so doing. It appears to me to be highly desirable from every point of view that all persons, and especially employees, should be encouraged to discharge their legal obligations. So widespread is the recognition of this that deductions from pay for various purposes—not all of them legal obligations—are a regular procedure in industry. The Company have the bookkeeping and other facilities and since in this case only one final recipient is involved not much time or labour is required. To me it gets down to being a simple request by a workman to his employer to make it easy for him to discharge an

obligation which he has undertaken with his eyes wide open, and I think that unless the granting of this request imposed unreasonable burdens on the employer he should do all he can to assist his employee to pay his lawful debts. That seems to me in accordance with ordinary commercial morality and good feeling between an employer and an employee. The position of the Union is to me a matter of minor importance in this particular case. The right of the employer to hire or keep in his employment any workman he desires, and the right of a workman to offer his services for wages are in no way involved. Each remains as free in matters of employment with this form of check-off as he would be without it. I therefore recommend that the new collective bargain should contain a clause to the effect above outlined. In this recommendation my colleague, Mr. Desaulniers concurs, and so it becomes a recommendation of this Board.

2. STATUTORY HOLIDAYS

Under the expired agreement it was provided that there would be three statutory holidays, New Year's Day, Dominion Day, and Christmas Day, and those workmen who were required to work on these days would be paid for time and one-half provided that they worked the shift preceding and following the holiday; the other workers would not be employed on these days and would receive no pay for them. The Company proposed to continue this arrangement in the agreement under discussion.

The Union, on the other hand, proposed that the new agreement should contain a provision for six statutory holidays, three being added to those above mentioned, and that employees working on these days be paid for double time, while the others not working be paid at their regular rate. During the proceedings which took place before Mr. R. Trepanier, Department of Labour Conciliation Officer, the Union indicated a favourable attitude towards accepting pay at time and one-half for workers employed on any of the six statutory holidays and one-half pay for those not so employed. This was further modified before the Board, the Union agreeing that if the other points in the agreement were accepted they would approve of the three statutory holidays named by the Company on condition that time and one-half be paid to employees engaged on essential work during these days and straight time to those not employed. The Union further stressed its desire that on these holidays as few employees as possible, even at the time and one-half rate, be employed.

The final issue between the parties therefore became one of whether employees should be

paid their regular rate of pay for three specified holidays per annum on which they did not work. In the Company's brief statutory holidays are included among the subjects which the Company claims are within the sole jurisdiction of the Regional War Labour Board. As I cannot, because of the wage aspect, say that it is wrong in this, it is only fair to make the reservation here that in discussing the matter before this Board the Company's rights, and of course also those of the Union, are not affected when the subject comes before the Regional Board, the object of our discussion being to find agreement if possible between the parties themselves before they went elsewhere.

As it happened, however, the Company could not see its way to accept the Union's proposal, nor the Union its way to accept the Company's refusal. It therefore devolves on this Board to make a recommendation.

In considering this matter it seems to me that what has been done with respect to vacations has more than a little relevancy. The Company, voluntarily and very commendably, has adopted and put into effect a policy of giving full pay to those employees during their vacation who have qualified for it. Personally I see no difference in principle between what is called a holiday (even with the prefix statutory) and what is called a vacation, and the argument for full pay to workers who are free from their labours when these occasions occur has in my opinion equal cogency in both cases. I readily grant that the cost of paying wages in these circumstances is a matter of economic importance to the Company, and I am fully prepared to believe that with its splendid record of practical solicitude for the physical well-being and safety of its employees it is only because of this economic consideration that it takes the position it does. But, after all, three days pay in each year to an employee who gets these days off work does not create a very serious increase to the total wage bill, and considering the arduous and exhausting nature of continuous mine work it might well be compensated for by improved health and enhanced efficiency as a result of these short and infrequent periods of relaxation. It would probably also be beneficial to the Company in attracting suitable workers to its service, and so to that extent relieving it of the present generally prevalent shortage of help in the mining industry.

It will be conceded I think that public opinion, generally speaking, favours pay being granted during vacations and holidays, and more and more this policy is being adopted throughout industry. This applies to em-

ployees who are engaged at hourly rates of pay equally to those other employees who receive annual salaries and is in line with the modern objective of putting all those who work for a living on a secure and continuous basis of employment where this is feasible. In an industry which normally operates all the year round this long range view rather than a day to day or a week to week one seems particularly appropriate and desirable. I am not of course suggesting that the Company before us has not taken these considerations into account, but I think an ordinary person like myself must feel that a statutory holiday on the basis proposed by the Company is, for the employee who does not work, less an occasion for carefree recreation and health-giving relaxation than a temporary and perhaps unwelcome "lay-off" from his job, carrying disturbing consequences to his domestic budget. Further, the disparity in financial returns which is created between those who get time and a half for their day's work and those who, because it is a statutory holiday, receive nothing can only be expected to cause discontent.

I have already expressed my view that it is the economic implications which stand in the Company's way but notwithstanding this I am of the opinion that the underlying principle should be accepted by the Company, and if this were now done and the matter became of sufficient importance to lay before the Regional War Labour Board later I am sure that Board would give it full weight.

Mr. Desaulniers joins with me in this conclusion and it will therefore be the recommendation of this Board that the proposed collective agreement should contain a provision that on the three statutory holidays, New Year's Day, Dominion Day and Christmas Day pay at the rate of one and one-half will be paid to those employees who for essential purposes are required to work on these days, and that other employees will receive a holiday from work on these days with full pay according to the regular scale of wages. It is further respectfully requested of the Regional War Labour Board that, if this matter is brought before it, cognizance will be taken of this recommendation.

3. QUALIFICATIONS OF UNION STEWARDS

The Company desired it to be made a part of the proposed agreement that no employee would be eligible to act as a steward unless he had been in the continuous employment of the Company for a period of not less than two years, giving as reason that the underground workings of the mine are so extensive that no employee can acquire a proper knowledge of these in less than that time, and

that it was not prepared to deal with any steward who was not thoroughly familiar with the mine and the men he represented. Against this the Union contended that six months' employment at the mine would provide sufficient experience to enable an employee who was otherwise qualified to become an efficient steward. Ultimately the Company was willing to make the probationary period twelve months instead of two years, but the Union would not recede from its position that a six months' period was adequate. While personally I was considerably impressed with the Company's contention, I cannot say that it proved its case, and I think the fact that on this matter the other two members of the Board are in agreement will have more influence than anything I can say. The unanimous recommendation of the Board is that the proposed agreement should contain a clause to the effect that an employee who has been in the continuous service of the Company for not less than six months is eligible to act as steward, and, if appointed to that position, will be recognized as a steward by the Company.

4. "PHYSICAL CAPABILITY" IN SENIORITY CLAUSE

In the draft agreement prepared by the Company there appeared a paragraph under the heading of seniority that the Company shall consider in determining which employees are to be laid off or promoted "the requirements and efficiency of operation and the ability, knowledge, training, skill and physical capability of the individual to do the job." The words "physical capability" of the individual did not appear in the expired agreement, and the Union objected to their inclusion. It seemed to me that these particular words neither added to nor subtracted very much from the original paragraph and I think that if they were deleted the meaning would remain substantially the same, especially in view of the clause which follows in the proposed agreement and is accepted by both parties. On this matter there is no difference of opinion between the members of the Board, and it is the Board's unanimous recommendation that the words "physical capability" be omitted from the proposed collective agreement.

The proceedings throughout were characterized by moderation and sincerity, and the Board expresses its appreciation for the help and information provided by the parties.

Dated at Montreal the 7th day of September, 1946, and respectfully submitted by

(Sgd.) R. T. FERGUSON,
Chairman.

I concur in the recommendation made by the Chairman.

(Sgd.) GUY MERRILL DESAULNIERS,
Member.

I concur in the recommendations made by the Chairman and concurred in by Mr. Desaulniers regarding Qualifications of Union Steward and the omission of the words "Physical Capability" in the Seniority Clause. I dissent from the recommendations regarding check-off and statutory holidays and am submitting a minority report.

(Sgd.) ALEX. HARRIS,
Member.

Minority Report

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

SIR,—At the time the parties first appeared before this Board of Conciliation, no Collective Bargaining Agreement existed as the first agreement and subsequent extension had expired. However, as a result of suggestions by the Board and readiness on the part of the Company and the Union, a great number of clauses were mutually agreed upon. These are available for inclusion in an agreement. The items which, in the final analysis, delayed the completion of this agreement, were as follows:

1. Voluntary non-revocable check-off.
2. Statutory Holidays—three at time and one-half if worked and at straight time if not worked, with the proviso that only essential maintenance employees work on these holidays.
3. Seniority status as a qualification for stewards.
4. Physical fitness as a factor in promotions, demotions, and lay-offs.

With regard to Items 3 and 4, above, I have concurred in the recommendations of the Chairman, Mr. R. T. Ferguson and Board Member, Mr. G. Desaulniers. These were that seniority status (six months) be provided as a qualification for a steward rather than two years as proposed by the Company, and that "physical fitness" be removed as a specific qualification in the seniority clause. It is felt by the writer that sufficient coverage in regard to the latter is provided by the proposed clause under the generic term "ability".

I am, however, unable to agree with the majority recommendations of the Board respecting Items 1 and 2, Check-Off and Statutory Holidays and submit, as follows, my reasons against the inclusion of these items in the proposed agreement;

1. CHECK-OFF

As events transpired, it became increasingly apparent to the writer that the Check-Off or some form of "Union Security" higher in the graduated scale of clauses involving "Union Security" was the real obstacle in the way of an agreement between the parties. With the exception of the other item mentioned above, all matters in dispute resolved themselves either by mutual agreement or by decision of the Union to refer them to the National War Labour Board.

Originally the question before the Board was "Union Security" involving Check-Off and Maintenance of Membership. The Union later advised that it was prepared to accept the equivalent of the so-called Rand Formula. This also was rejected by the Company. The Chairman then suggested a Voluntary Non-Revocable Check-Off which the Union agreed to accept. This then became the final form for consideration of the Board.

The main purpose of my colleagues in recommending the Check-Off, it would appear from their recommendations and our discussions, was to give a measure of stability to the Union. It is my contention that the provision of check-off and other so-called "Union Security" clauses, have not served this purpose. I regard the check-off as the first step in the process of unions' attempts to attain the ultimate goal, the "closed shop". In the process of collective bargaining at the termination of each year's contract, experience shows that the higher forms of "Union Security" progressively form a part of the unions' proposals. It therefore becomes essential to consider seriously the ultimate effect of the indiscriminate granting of check-off, a relatively mild and innocuous appearing form of "Union Security".

The record shows that the greatest amount of industrial unrest has been in those unions which possess "Union Security" clauses in various forms. The employers may have been under the impression that the granting of these clauses to the unions involved would have meant industrial peace by giving the unions "stability". It appears actually that "instability" followed in the wake of mutual agreement on "Union Security" clauses.

The Company in its presentation before the Board, had no fault to find with the relationship existing between the parties during the term of the collective bargaining agreement. It appeared to be cordial in every way. There was no evidence that stability was lacking on part of the Union and I cannot see any reason for the recommendation of a check-off on the grounds that the Union should be given

"stability". Certainly, Order in Council P.C. 1003 gives not the slightest hint that its framers ever intended that there should be an obligation on the part of the Union or of the Company to agree to any proposal which would lend a measure of support to either party.

Section 19, in fact, seems to actually prohibit such support.

Unions, as a result perhaps of a more highly commercialized attitude in North America, have become, in many cases, monopolistic organizations as far removed from the original conception of a union of employees for employees as cartels are from ordinary competitive business and equally iniquitous. Mr. Justice Roach, recently, before the Industrial Relations Committee of the House of Commons, is reported to have said of one union that "it had become the master of the employees rather than their servant" and, in his opinion, "constituted a dictatorship". He further said, "there is a concentration of power in a group of men which makes them an oligarchy". It is the duty of any governmental agency, including conciliation boards, to protect the rights of employees and the rest of the public and guard against the formation of any monopoly.

Through the creation of a monopoly, often unobtrusively initiated as a result of the kindly granting of a check-off of union dues, the right of free association of employees is seriously interfered with if not effectively checked. Any employee should have the inalienable right to join a union and to pay dues, and to leave a union and cease payment when he has the inclination. If there is compulsion and an employee pays whether he wishes to or not, he loses his power as an individual in the organization.

If the Union continues to exert its influence for the benefit of its members it should be able to conduct its affairs on a sound financial basis without the artificial aid provided by a check-off of dues. It is a well known fact that in England, Australia and New Zealand, Labour Unions have the equivalent of a closed shop without a check-off or compulsion of any kind. In these countries it would appear that workmen join the Unions of their own free will and continue their membership similarly. It must be that the members have a strong desire for membership not only because of the benefits obtained but because of the sound leadership provided. There is no need in these countries to include Check-Off in a Collective Bargaining Agreement, and I can see no need for its inclusion in agreements in this country.

As added proof of the assertion herein that there is a tendency on the part of unions to

become monopolistic, is the creation by certain unions of "committees for political action." This is contrary to the ordinary concepts of the aims and objects of a union and could tie an employee to politics in which he has no belief. It can be extremely disadvantageous to industry and our general economy. The avowed intention of one or more political parties is the eventual control by the state of all industry. Private competitive industry would cease to exist under the type of economy propounded by such groups. One of these parties assumes the position of champion of labour unions and, therefore, could conceivably receive the support of unions. This particular Union's constitution carries the following which indicates the nature of the political action it desires to foster:

Preamble.

1. We hold that there is a class struggle in Society, and that this struggle is caused by economic conditions.

2. We affirm the economic condition of the producer to be that he is exploited of the wealth which he produces, being allowed to retain barely sufficient for his elementary necessities.

3. We hold that the class struggle will continue until the producer is recognized as the sole master of his product.

4. We assert that the working class, and it alone, can and must achieve its own emancipation.

5. We hold that an industrial union and the concerted political action of all wage workers is the only method of attaining this end.

6. An injury to one is an injury to all.

7. Therefore, we, the wage workers employed in and around the mines, mills and smelters, tunnels, open pits, open cuts and dredges, of the Western Hemisphere, unite under the following Constitution.

In the first place it is inexplicable how a union which adheres to tenets of this nature ever expects to merit and obtain the complete confidence of any company. Here is a union which boldly sets out in its printed constitution a definite objective—an objective which can only be interpreted as the removal of our economy as we presently know it with the

consequent elimination of this Company. The Union now demands co-operation of the Company in obtaining its income and thereby assuring the Union of the necessary financial assistance required to carry out its political and other aims. It would be difficult to find a more anomalous situation.

It is unreasonable to expect the Company to indirectly support intentions of the kind set out in the Union's Preamble, and for this reason as well as the others set out herein, I sincerely disagree with the majority recommendation and I cannot conscientiously recommend the granting of any form of Check-off.

2. STATUTORY HOLIDAYS

The Company proposed a clause which would pay time and one-half for time worked on three statutory holidays, Christmas Day, New Year's Day and Dominion Day, and I would recommend acceptance of this clause. The payment for time not worked involves additional compensation and is a matter for the consideration of the National War Labour Board. The proposed principle of payment for time not worked is new to the gold mining industry, an industry which has always paid the highest annual wage in industry.

The original request of the Union was for six statutory holidays at time and one-half if worked and straight time if not worked. This would have been equivalent to an additional annual vacation of one week. It was drawn to the attention of the Board by the Company that it had just announced an additional week's vacation for all employees with seniority of five years or more to take effect January 1, 1947. This will apply to the greater majority of the Company's employees and represents a concession which, in my opinion, automatically eliminates the Union's demand for payment for any statutory holidays not worked.

Dated at Kirkland Lake, Ontario the 10th day of September, 1946, and respectfully submitted by

(Sgd.) ALEX HARRIS,
Member.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020

Officers of the Industrial Relations Branch dealt with 27 industrial disputes during the month of September, involving 62,445 workpeople employed in 178 separate establishments. Of these, 3 were new disputes which originated during the month and 24 were situations which had been underminated as of August 31, and received further attention in

September. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, and Fredericton, N.B. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and the officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Coal Miners, Alberta and British Columbia.

—During the months of August and September officers of the Department of Labour kept closely in touch with the development of negotiations on wages and other matters between District No. 18 of the United Mine Workers of America and the Western Canada Bituminous Coal Operators' Association and the Domestic Coal Operators' Association of Western Canada. Both Associations had been notified in July that the union was to hold a "Wage Scale Convention" at Calgary commencing on August 5, and the operators had been asked to agree to re-open the existing collective agreements with a view to entering into negotiations after August 12th. In due course, both Associations of operators agreed to meet the union's executive to discuss the proposals for the amendment of the collective agreements. The requests of the union as formulated by the District Convention and presented to the operators were for an upward adjustment of wages of \$2.50 per day for all day wage workers and contract miners; the establishment of a Welfare Fund by the payment of a royalty of 5 cents per ton on all coal produced for use or sale, the Fund to be administered "similar to the Fund recently inaugurated in the coal mines of the United States"; the establishment of a 40-hour week, with all work performed on Saturdays to be paid for on the basis of time-and-one-half or rate-and-one-half, and with double time rates for work performed on Sundays or on holidays recognized under the agreement; revision of conditions governing holidays with pay to "conform with the 40-hour week," and other adjustments; substitution of a board of three, instead of a single independent chairman, for the arbitration of differences arising out of the collective agreements; reclassification of present "data" classifications to bring them up to date and to include types of employment resulting from the use of modernized machinery; upward revision of rates for mechanized mining to conform with rates being paid for similar work in neighbouring districts; and "the adjustment of local and general inequalities."

Numerous conferences took place between the mine workers' Policy Committee and each of the operators' associations. On September 18 it was reported that the negotiat-

ing committees had reached an agreement upon an increase in the wage structure amounting to \$1.40 per day for all employees. The operators also accepted the 40-hour work week as a standard and agreed to make a contribution of 3 cents per ton of coal towards the proposed Welfare Fund.

A joint committee representing the union and all operators will later "bring in a recommendation as to the character and purpose of the Fund and a form and rules governing its administration". The clause relating to "new work" was amended to provide that when the decision of the Committee is not unanimous with regard to the "price" to be set for a new seam or a new mine, either party shall have the right to resort to an Appeal Board comprising representatives of the union and the operators and a chairman appointed by the federal Minister of Labour. A new body was also created to be known as the Mechanized Mining Commission. It will be fully constituted within 60 days and have power to hire such employees as may be agreed upon. Tentatively, the Commission shall consist of six union representatives, two representatives appointed by the Western Canada Bituminous Coal Operators' Association, two appointed by the Domestic Coal Operators' Association of Western Canada, one appointed by operators in British Columbia and one appointed by Saskatchewan coal operators. The Commission will make a study of problems arising from the mechanization of coal production, including the displacement of workers, and make recommendations as to methods by which production may be improved.

Later, some difference of opinion arose between the parties as to the date on which the new arrangements would come into effect. It was decided that the "amending agreement" would be signed on October 1 upon the understanding that it would be jointly referred to the National War Labour Board for approval and that its effectiveness would be contingent upon such approval being received. It was further agreed that the increases in wage rates and the contribution to the Welfare Fund would be deferred until after the Wartime Prices and Trade Board granted authorization satisfactory to the companies involved for the "recovery" of amounts sufficient to reimburse them for the increased costs through an adjustment in the selling price of coal or by subsidies. After the receipt of such authorization, the wage increases would be made retroactive to the date of the signing of the agreement, but if authorization were not issued by October 31, 1946, the companies would not be held responsible for retroactive payments at that

time, nor would the union be bound by the terms of the amended agreement.

The amendments to the existing collective agreements were submitted to a referendum vote of the employees of about 65 coal mines on October 6. They were endorsed by a substantial majority.

As revised, the collective agreements will remain in effect until March 31, 1948. They provide that no notice of termination shall be given or accepted by either party until that time.

Foundry Workers, British Columbia.—The August and September issues of the LABOUR GAZETTE contained accounts of a dispute affecting 29 foundries in the Vancouver area. The report of the Commissioner, Mr. David Whiteside, K.C., was received during September. It recommended that, subject to the approval of the Regional War Labour Board for British Columbia, there should be a general wage increase of 15c per hour to all employees of the foundries and that a 40-hour week should be established with time-and-one-half rates for work on Saturday mornings and double time for work performed on Saturday afternoons. The Commissioner did not recommend the compulsory check-off of union dues, but stated that this question should remain as a matter of agreement between the employers and their employees.

Metal Products Workers, Leaside, Ontario.—It was reported in the September issue of the LABOUR GAZETTE that the Minister of Labour had appointed Judge Samuel Factor, of Toronto, as an Industrial Disputes Inquiry Commissioner to deal with a dispute between the Canada Wire and Cable Company, Limited, Leaside, Ontario, and its employees represented by Local 514, United Electrical, Radio and Machine Workers of America, as a result of which a strike of some 1,166 employees had occurred on July 8.

An interim report made by the Commissioner on September 16 stated that after many meetings with the parties, agreement had been reached on 14 of the issues in dispute. However, it had not been possible to secure agreement on the questions of wages and hours of work, vacations and pay for holidays, union security, a "no cessation of work" clause, special seniority for stewards, or guaranteed earnings for persons transferred from one job to another.

At the end of the period under review, a stalemate existed between the parties and the strike was still in progress.

Plastics Workers, Toronto, Ontario.—Reference was made in the August issue of the LABOUR GAZETTE to the appointment of Judge J. Ambrose Shea, of Toronto, as an Industrial Disputes Inquiry Commission to investi-

gate a complaint that a member of the International Chemical Workers' Union had been dismissed by the Reliable Toy Company, of Toronto, because of union activity. The report of the Commissioner was received early in September. It stated that the employee in question had not substantiated his claim that he was discharged or discriminated against on account of his union activities. The conclusion of the Commissioner was that he had been dismissed for cause.

Foundry Workers, London, Ontario.—A request was received on September 5 from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commission under Section 5 of Order in Council P.C. 4020 to investigate a charge that two employees of Wells Foundry Limited, London, Ontario, had been dismissed because of their membership in or activity on behalf of Local 3313 of the United Steelworkers of America. In compliance with this request, the Federal Minister of Labour on September 15 appointed Judge E. W. Cross, of Woodstock, Ont., as a Commissioner to deal with the allegations of the union. At the end of the month the report of the Commissioner had not been received.

Newspaper Compositors, Ottawa, Ont.—Pursuant to a request by the Minister of Labour for Ontario, the Federal Minister of Labour on September 24 appointed Judge G. E. Brennan, of Cornwall, Ontario, as an Industrial Disputes Inquiry Commission to investigate a charge that the publishers of the *Ottawa Citizen* had dismissed an employee for the reason that he was a member of or working on behalf of the International Typographical Union. The case was still being investigated at the end of the month.

Public Utilities Workers, Toronto, Ont.—On September 9 the Federal Minister of Labour appointed His Honour Judge James Parker, of Toronto, as an Industrial Disputes Inquiry Commission under Section 5 of Order in Council P.C. 4020 to investigate allegations that the Toronto Hydro Electric Commission had dismissed three employees who were members of the International Brotherhood of Electrical Workers for the reason that they refused to join the National Organization of Civic, Utility and Electrical Workers, Branch No. 1. The appointment was made upon the request of the provincial Minister of Labour. At the request of one of the parties to the dispute, the case was postponed to the end of the month of September.

Transport Workers, Shawinigan Falls, P.Q.—Following a preliminary investigation by provincial Conciliation Officers, the Minister of Labour on September 20 appointed the Hon. Mr. Justice Alfred Savard, of Quebec City,

P.Q., as an Industrial Disputes Inquiry Commission to investigate a complaint that Carier et Frere, Ltee., Shawinigan Falls, P.Q., had dismissed one of its employees because of membership in and activity on behalf of the National Syndicate of Transport Employees and Others. The appointment was made with the concurrence of the Wartime Labour Relations Board for Quebec. Decision in the matter was still pending at the end of the period under review.

Rubber Workers, Acton Vale, P.Q.—During the latter part of August, a complaint was received that the Acton Rubber Company, Acton Vale, P.Q., had dismissed an employee because of activity on behalf of Local 236, Rubber Workers' Federal Union (T.L.C.C.). A preliminary investigation was conducted by an Industrial Relations Officer, of Montreal, who recommended that a formal investigation be conducted by an Industrial Disputes Inquiry Commission under the provisions of Section 5 of Order in Council P.C. 4020. The Wartime Labour Relations Board for Quebec concurred in this recommendation and on September 7, the Federal Minister of Labour appointed Judge Honoré Achim, of Montreal, to deal with the situation. The inquiry of the Commissioner had not been concluded at the end of September.

Retail Coal Distributors, Ottawa, Ont.—It was reported in the August issue of the *LABOUR GAZETTE* that the Minister of Labour had appointed Judge J. P. Madden, of Ottawa, as an Industrial Disputes Inquiry Commission to investigate the circumstances surrounding the dismissal of an employee by John Heney and Son, Limited, of Ottawa. In his report, which was received on September 21, the Commissioner found that the employee in question had not been discharged because of his union membership or activity. The union involved was Local No. 458, United Distribution Workers (C.I.O.).

Electrical Apparatus Workers, Hamilton, Ont.—Brief reports of efforts to solve the dispute between the Canadian Westinghouse Company, Ltd., Hamilton, Ontario, and Local 504, United Electrical, Radio and Machine Workers of America, which gave rise to a strike affecting about 4,000 employees of the Company on July 5, were contained in the August and September issues of the *LABOUR GAZETTE*.

Early in September the Industrial Disputes Inquiry Commissioner, Judge J. C. Reynolds, of Kingston, Ontario, resumed his efforts to secure a settlement upon the request of the Minister of Labour. A joint conference of the parties was convened by the Commissioner on September 7, at which the principal demands of the Union with the exception of

wages were discussed. The parties were at the time holding uncompromisingly to their respective positions, which were a union demand for a minimum wage increase of 18½c per hour and a Company offer of 8c per hour.

On the question of the union's demand for two weeks' vacation with pay for employees with five years of service and three weeks for ten years of service, the Company took the position that it had already agreed to extend its present policy of two weeks' vacation with pay for employees with ten years' service by making it effective after five years' service. It refused to grant vacations with pay of three weeks for employees with ten years or more of service for the reason that this was not the common practice in industry.

The Company renewed its offer to recognize two statutory holidays in each year and to pay for them when not worked, while the union adhered to its demand for payment of eight statutory holidays when not worked. Both parties recognized that the question of the 40-hour week could not be solved apart from the wage problem. The Company has observed a standard 44-hour week since 1937 with overtime wages of time-and-one-half for work performed in excess thereof. It proposed to continue the 44-hour week but stated its willingness, if the majority of the employees so desired, to grant a five-day week with a standard work-day of 8.8 hours. The union demanded double time for all work performed on Sundays and statutory holidays, to which the Company refused to agree.

On the question of union security, officials of the union demanded that all present members must as a condition of employment maintain their membership, and that all new employees must become and remain union members. They also proposed a compulsory check-off of union dues and initiation fees. The Company turned down the maintenance of membership demands and renewed its offer to accept a voluntary check-off of dues provided that 50 per cent of the employees indicated their desire for same, and provided that authorizations be capable of cancellation on sixty days' notice. There was also disagreement as to whether check-off authorization cards should be signed in the presence of union representatives only, or in the presence of a Company timekeeper as well.

The Company rejected a union proposal that all time consumed by union stewards and witnesses in the settlement of grievances on Company property should be paid for by the Company. Under the present arrangement, only time spent on grievances originated by the management are paid for by the Company.

The parties were asked by the Commissioner if they would be willing to submit the issues

in dispute to arbitration. The union stated its willingness to submit all questions other than wages to impartial arbitration. The Company took the position that it was impossible to separate these closely related matters, and that until the question of the wage increase was settled, it could not consent to arbitrate the other issues.

Later, it was reported that a meeting of the membership of the local union was held on September 26 at which the negotiating committee was instructed in an open vote to hold out for a general increase of 15c per hour. The situation was still deadlocked at the end of the month, with no indication as to how soon the dispute might be resolved.

Steelworkers, Ontario and Nova Scotia.—The September issue of the LABOUR GAZETTE outlined the details of a plan proposed by the Government for the settlement of the steel strike, which included provisions for wage increases of from 11 cents to 12½ cents per hour staggered between various levels of existing rates of pay. The plan was rejected in open votes conducted at meetings of the local unions of the United Steelworkers of America at Hamilton, Sault Ste. Marie and Sydney. Immediately following the rejection of the Government's proposals, representations were made by the National Director of the union that it would have been possible to secure acceptance and to end the strike if they had contained provision for statutory holidays with pay if not worked and with double pay if worked; for the removal of the 5-cent differential existing between the wage rates of production workers in Ontario and Sydney, N.S. (the Government had proposed that this be decided by the National War Labour Board; and for prior acceptance by the employers of the Government's "recommendation and request" that the issue of union security and other remaining matters be arbitrated.

The reply of the Minister of Labour to the union's suggestions was that since the local unions had refused to accept the proposals of the Government, the three steel companies had not been asked for a definite decision with regard to the arbitration of issues other than wages, and that the Government would not attempt to make arbitration compulsory upon either side. On the question of a more generous provision for statutory holidays with pay, the Minister reiterated that the Government had gone as far as it was prepared to go, and that any improvement in the offer for a settlement must come from the employers.

On September 17 the union announced that its National Advisory Committee was prepared to recommend to the members acceptance of a settlement on the following terms:

(1) a general wage increase of 15½ cents per hour, of which 10 cents would be retroactive to April 1, 1946, and 5½ cents would be payable as from the date of settlement (the "form" which the 5½-cent increase would take was to be the subject of negotiations, and a union spokesman said that the door was not being closed to an increase of 12½ cents plus eight statutory holidays with pay and with double time rates when worked—which would yield the equivalent of a 15½ cent total over a year's time); (2) "adequate assurance that the Sydney differential" would be removed "with retroactive effect"; (3) a vacation-with-pay plan as proposed by the Government, i.e., a minimum of six statutory holidays to be paid for, if worked, at time and one-half rates, and vacations with pay of one week after a year's service, two weeks after five years' service, and three weeks after twenty-five years' service; (4) final and binding arbitration on questions of union security, hours of work, and compensation for increases in the cost of living during the life of the collective agreement.

On September 26, as the result of an approach made by one of the parties, the good offices of the Government's Controller over the three steel companies were utilized for an exchange of views as to the possibility of a compromise solution. Direct conversations took place in Montreal between the Controller, Mr. F. B. Kilbourn, and the National Director of the union, Mr. C. H. Millard, as the result of which the Controller notified the union on September 27 that, provided the strikers returned to work immediately, he would in his capacity as Controller make an application to the Regional War Labour Boards for the authorization of an increase in wages of 10 cents per hour effective as from April 1, 1946, and a further increase of 3 cents per hour effective from the date on which work was resumed. It was also promised that Mr. T. H. Rahilly, general manager of the Toronto Iron Works, Ltd., who was a war-time official of the steel division of the Department of Munitions and Supply and a former manager of the Algoma Steel Corporation, would be appointed immediately to assist the parties in negotiations. All contentious matters would be dealt with by Mr. Rahilly with a view to reaching a final settlement as to the terms of an agreement within six weeks. There would be no discrimination against the men for having participated in the strike. A request by the union that the Canada Works of The Steel Company of Canada at Hamilton be included in the terms of the settlement was refused, and the Controller made it plain that only the Hamilton and Ontario Works of the Company were involved in the proposal.

No commitment was made in respect of the elimination of the wage differential at Sydney. The understanding regarding other matters such as holidays and union security was that they would be left for direct negotiation with the assistance of the mediator, but would not be arbitrated.

Secret ballots were conducted by the local unions on October 2 and 3 which resulted in favour of acceptance of the compromise solution by a gross margin of 7169 to 789 votes. As soon as the strike was declared officially to be terminated on October 4, picket lines were withdrawn from the struck plants. The employees were instructed to report to their respective employers for advice as to when to report for work. At the plants of the Steel Company of Canada, where some 2,000 employees had remained at work throughout the 81-day strike, resumption of work proceeded rapidly, a considerable number being taken on by October 7. At Sault Ste. Marie plans for a return to full production proceeded more gradually owing to the necessity of re-heating the furnaces. At Sydney, N.S., a temporary delay in the reopening of the steel plant occurred when the management of the Dominion Steel and Coal Corporation, Ltd., claimed that it had not been consulted with regard to the settlement and, that it was financially unable to pay the proposed increases in wage rates. Instructions were given by the Controller that the plant be reopened promptly and assurance was given to the Company that with respect to the balance of the year, the Government would recognize as a cost increase to be offset through subsidy payment the actual labour-cost increases resulting from the adjustments in wage rates for steel production. This subsidy would be adjusted to a new rate of payment per ingot ton produced, using the same estimates of sales and other operating factors as applied in determining the previous subsidy as adjusted following the selling price increase which came into effect on April 1, 1946.

Newspaper Compositors, Various Provinces.—Previous issues of the LABOUR GAZETTE have contained references to a continuing dispute between the International Typographical Union and the Southam Company, Limited, among other newspaper publishing companies. A three-man Commission under the chairmanship of Brig. Sherwood Lett which investigated matters in dispute between the Vancouver Province Division of the Southam Company and the Vancouver Typographical Union No. 226 reported that the dispute was national in scope and recommended that the Minister of Labour take steps to bring together the principal officers of the Company

and the Union for the purpose of reconciling their respective policies. As reported in the August issue of the *LABOUR GAZETTE* (p. 1087), the Minister of Labour arranged that the Honourable Mr. Justice S. E. Richards, of Winnipeg, should act as a conciliator to this end. During September it was decided to give Mr. Justice Richards a more official status, and on the 24th he was appointed by the Minister of Labour as an Industrial Disputes Inquiry Commissioner under Section 8 of Order in Council P.C. 4020. His instructions were to confer with the interested parties in an endeavour to secure a mutually satisfactory settlement of the dispute, and if his efforts should not succeed, to report to the Minister of Labour, within thirty days setting out his recommendations as to the manner in which the differences between the parties should be settled. Daily newspapers published by the Southam Company, Limited, in Winnipeg, Edmonton, Vancouver, Hamilton and Ottawa have been affected by the dispute.

Chemical Products Workers, Amherstburg, Ont.—Discussions between the Minister and officers of the Department of Labour and representatives of Brunner Mond Canada, Limited, and of Local 89, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, were conducted in mid-September in an effort to solve the dispute which had precipitated a strike of some 400 employees of the Company on July 12 (see *LABOUR GAZETTE*, August and September). As a result the parties agreed to resume negotiations at once and, as the *LABOUR GAZETTE* went to press, there was optimism on both sides as to an early solution.

Packinghouse Workers, Various Provinces.—It was reported in the September issue of the *LABOUR GAZETTE* that the Honourable Mr. Justice S. E. Richards, of Winnipeg, had been appointed as an Industrial Disputes Inquiry Commission to deal with disputes between the United Packinghouse Workers of America on the one hand and Canada Packers Limited, Burns and Company, Limited, and the Swift Canadian Company, Limited, on the other. The controversy was chiefly over union demands for increased wage rates to be embodied in collective agreements which were being renewed between the parties. It involved workers employed in meat packing and processing plants located in six different provinces.

Following a number of separate and joint conferences the Commissioner reported that the union and two of the Companies had signed agreements providing for an increase of 10c per hour for all employees represented

by the union. Negotiations between the third Company and the Union continued for another day or two and resulted in a similar agreement being consummated. The representatives of the union then submitted the agreements to each local union for its endorsement.

Brass Factory Workers, New Toronto, Ont.—Unremitting attention continued to be given during September by Mr. L. W. Brockington, K.C., C.M.G., as Industrial Disputes Inquiry Commissioner, and by departmental officials to the dispute between Anaconda American Brass Limited, New Toronto, Ont., and its employees as represented by the New Toronto Brass and Copper Workers' Union, No. 811, a local of the International Union of Mine, Mill and Smelter Workers. The differences between the parties over wage rates, hours of labour, union security and other matters had resulted in one of the country's most prolonged and troublesome work stoppages, a strike by some 1,000 employees having continued since May 18, 1946.

A "final proposal" for settling the strike was made by the Company on September 17. It called for an immediate resumption of work on the understanding that a collective bargaining agreement would be entered into with such union as might secure certification of bargaining representatives under the provisions of P.C. 1003, based upon the following strike settlement terms. All basic wage rates would be increased 10c per hour and the payment of bonuses for increased production would be continued on the same scale as existed prior to the strike. If after six months from the effective date of the new agreement, the cost of living had risen by five points over the index figure for October 19, 1946, the Company would increase the basic wage rates of all employees by 3c per hour for the balance of the term of the collective agreement. There would be no change in the work-week or in the scale of overtime payments. Time-and-one-half rates would be paid for seven statutory holidays if worked. Two weeks' vacation with pay would be granted to employees with five years' service, effective in 1947. Plant-wide seniority would apply to all employees with five years' or more of service, and departmental seniority to all other employees, with reservations as to the lay-off or hiring of 2 per cent of the personnel so affected. Strikers and union members would be reinstated without discrimination and their seniority and other rights would not be affected. The Company would grant a voluntary check-off of union dues upon written authority which would be irrevocable during the term of the agreement.

The Company's offer was thoroughly discussed at a meeting between the negotiating

committee of the union and officers of the Department of Labour in Ottawa. Later, the union presented what it described as its final counter-proposal. This called for a general wage increase of 11½c per hour, with a provision for reopening the collective agreement if and when the cost-of-living index showed an increase of four points, and if and when the Company increased the price of its product. The union also insisted upon plant-wide security for all employees, rather than those with five or more years of service. Maintenance of membership provisions were demanded in addition to the Company's offer of an irrevocable check-off. Finally, the union demanded provisions for a sickness and accident insurance plan with equal contributions from the Company and the employees.

The Company declined to agree to union's settlement plan or to make any variation in its own offer.

A "mass meeting" of the local union's membership was then held at which not only the Company's proposals were rejected but also the proposals of the union's negotiating committee. A resolution was adopted instructing the executive not to enter into any settlement which did not provide for a wage increase of 12½c per hour. The union also declared that it would have nothing to do with any secret vote conducted under the supervision of the Company or any party other than the union itself.

It was claimed by the union that 386 members attended the meeting at which the Company's offer was rejected. The Company maintained that it had reliable information that only 165 persons attended the meeting, of whom only 89 were known to be Anaconda employees while 76 were believed to be employees of a rubber company who were also on strike at the time.

On September 27, the Commissioner proposed to the union's officers a formula which he felt would form a fair basis of settlement and which the Company might be persuaded to accept provided that it was first endorsed by a vote of the employees. The Commissioner proposed the retention of the existing provisions in respect of union security. The main points on which his suggestions differed from the Company's offer were in advancing the proposed wage increase to 11c per hour; in providing for a single reopening of the contract in the event of an increase in the cost of living, without setting any fixed amount by which basic wages should be increased as a result thereof; and in specifying that the settlement terms would be embodied in a new agreement with Local 811 upon certification of its bargaining representatives, and that it would continue in effect until February 1, 1948.

The Commissioner's proposals were rejected by an open vote of union members at a meeting on September 29. A few days later the international president of the union reported to the Department that the Commissioner's proposals would be recommended to the members for acceptance provided the Company would contribute 1c per hour per employee to the union's proposed insurance fund. The response of the Company to this proposal was that it was unfair at that stage to interject a new feature into the discussion, but that it would not be opposed to consideration of such a scheme at some future date, particularly if there seemed to be a trend in that direction.

A report was made to the Minister of Labour by the Commissioner on October 3 in which it was stated that an extensive vote of all the employees based upon the Commissioner's proposals appeared to be the only solution presently available for the settlement of the dispute unless the departmental officers could obtain some further offer from the Company. As the *LABOUR GAZETTE* went to press, the Commissioner's suggestion of a vote among all of the employees was being given consideration.

Chemical Products Workers, Windsor, Ontario.—The strike of employees of Canadian Industries, Limited, Windsor Works, Windsor, Ontario, which commenced on June 27 and affected some 400 employees, continued throughout the month of September. Following the receipt of the report of Judge A. Cochran as Industrial Disputes Inquiry Commissioner, a summary of which appeared in the September issue of the *LABOUR GAZETTE*, officials of the Department of Labour consulted on several occasions with representatives of the company and the union arising out of which direct negotiations between the parties were resumed. The Company announced early in September that the only issue remaining in dispute between itself and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, concerned the amount of the wage increase to be granted to the employees. Following rejection of the Company's offer of selective increases averaging 10c per hour, the management proposed a general increase of 10c per hour retroactive to June 3, to be followed by a wage survey before October 15. If the survey revealed any rate to be below the average paid in thirty other industries, the rate would be increased up to the average, with such adjustments being made retroactive to the date on which operations were resumed. The union was reported to be willing to settle immediately for a retroactive flat increase of 15c per hour. Subsequently the Company sub-

mitted a new proposal calling for wage increases ranging from 5c to 14c per hour based on a job evaluation plan, but this was also rejected by the union. The strike situation was continuing as the LABOUR GAZETTE went to press.

Rubber Products Workers, Province of Ontario.—No settlement was reached during September in the strikes involving some 10,000 employees of nine rubber products plants located in various cities of the Province of Ontario. (See LABOUR GAZETTE for July, August and September). The strikes began on June 24.

In mid-September the Minister of Labour and officers of the Department of Labour met with a delegation representing the union, accompanied by an officer of the Canadian Congress of Labour, and discussed at length what steps might be taken to bring about further negotiations with a view to settling the matters in dispute between the different companies affected and their employees as represented by various locals of the United Rubber Workers of America. Later a lengthy conference took place between departmental officials and a representative of the Dominion Rubber Company, Ltd. Resulting from these talks, the Department conveyed to the union a proposal to which the Dominion Rubber Company was prepared to agree as a basis for the settlement of its dispute with Local Union No. 80 and an immediate return to work of the employees in its Tire Factory and Rubber Machinery Shops at Kitchener. The proposed plan offered a wage increase of 10 cents per hour "across the board" and off-shift bonuses of two cents per hour; straight time payment for three statutory holidays when not worked; and a provision that if the company should reduce hours of work the employees would be compensated for the loss of overtime premium pay by a corresponding adjustment in basic wage rates or in the payment of wages for unworked statutory holidays, or both, on the understanding that the arrangement would

apply only to a reduction of the work-week down to 44 hours. It was further proposed that the terms of settlement would be incorporated in a collective agreement to remain in effect for one year, and that the parties would make a joint application to the Regional War Labour Board for approval of the terms of settlement.

The proposed formula was rejected by the union.

Further conferences commenced at Toronto early in October between representatives of the Dominion Rubber Company and Local Union No. 80, U.R.W.A., with officials of the provincial and federal Departments of Labour in attendance. The outcome of these negotiations was not known as this issue of the LABOUR GAZETTE went to press, but it was hoped that they would result in a resumption of the work by Dominion Rubber employees, and set the stage for a settlement of the strikes in the remaining plants.

Metalliferous Miners, British Columbia.—Negotiations between individual operators of metalliferous mining companies in British Columbia and representatives of the British Columbia District Union of the International Union of Mine, Mill and Smelter Workers were conducted during August and September by the Industrial Disputes Inquiry Commissioner, the Honourable Mr. Justice G. McG. Sloan, Chief Justice of British Columbia, assisted by Mr. G. R. Currie, Industrial Relations Officer, of Vancouver. Because of the wide variations in the circumstances affecting copper mines and gold mines and in the position of individual companies within each group, no over-all settlement could be reached. The report of the Commissioner had not been received at the end of the period under review.

Twelve mining companies are directly involved in the dispute which gave rise to a strike on July 3, 1946. Approximately 2,100 mine workers were at first involved in the strike action, but latest reports from union sources indicated that at least 900 of the strikers have since found other employment.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying: Non-Metallic Mineral Mining and Quarrying

THETFORD MINES, P.Q.—BELL ASBESTOS MINES LIMITED AND LA FRATERNITE CANADIENNE DES OUVRIERS DE L'AMIANTE (CANADIAN BROTHERHOOD OF ASBESTOS WORKERS), LOCAL 1. INC.

Agreement to be in effect from January 2, 1946, to January 2, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole bargaining agency for all eligible employees. Check-off: the company agrees to deduct union dues monthly from the pay of employees who so authorize and remit same to the union. This authorization may be revoked by the employee.

Hours of work: 8 per day, a 48-hour week. Overtime: time and one half for work in excess of 8 hours, except when overtime is less than 15 minutes, when it will be paid for at regular rates, time and one half for all work on Sundays and 8 specified holidays, except for employees engaged on continuous operations, such as boiler firemen, watchmen, etc. Vacation: one week with pay for employees who have worked 300 days or more during the previous year, those working less than 300 days to receive one half-day with pay for each 25 days worked.

Hourly wage rates: drilling and blasting, pit—drillers 68 and 73 cents, helpers 65 cents; ore moving pit—shovel runner 76 cents, shovel fireman 66 cents, shovel greaser 65 cents, bulldozer operator 72 cents; miscellaneous pit—machine maintenance 67 to 78 cents, tractor operator 66 cents; mining underground—cageman 65 cents, lumberman 73 to 79 cents, helper 66 cents, labourer 62½ cents; mining surface—dry house attendant and labourer 59 cents; crushing and drying—crusher feeder 63 cents, mill hand 59 cents; milling operations—millwrights 68 and 73 cents, oiler 61½ cents, fibre controller 76 cents, fibre tester 69 cents; milling maintenance—tin-

smiths 62 to 73 cents, masons, painters 67 to 72 cents; bagging and storing—truckmen and shedmen 62 cents; electrical—electricians 63 to 77 cents; machine shop—machinists 61 to 76 cents, welders 70 to 78 cents, blacksmiths 67 to 73 cents, drill sharpeners 67 to 72 cents; carpenter shop—carpenters 61 to 73 cents; garage—mechanics 63 to 73 cents; yard—locomotive engineers 74 cents, firemen 65 cents, brakemen 62 cents; all labourers (except underground), millhands and helpers other than those specified above, 59 cents.

Provision is made for an apprenticeship plan, seniority rights and grievance procedure.

Metal Mining

CORRECTION

KIMBERLEY AND CHAPMAN CAMP, B.C.—THE CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA, LTD. AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 651.

In the agreement which was summarized in the *LABOUR GAZETTE*, August, 1946, p. 1089, the third paragraph dealing with wages states "The Company also agrees to pay each employee an 'interim adjustment' not to exceed 40 cents per hour". This should read 40 cents per shift (5 cents per hour).

Manufacturing: Printing and Publishing

VANCOUVER, B.C.—THE SUN PUBLISHING COMPANY LIMITED, SUN DIRECTORIES LIMITED, VANCOUVER ENGRAVERS LIMITED AND VANCOUVER NEWSPAPER GUILD, LOCAL 1.

Agreement to be in effect from January 15, 1946, to January 15, 1947, and thereafter from year to year subject to notice. The company recognizes the Guild as the sole collective bargaining agency for all eligible employees. Maintenance of membership; all present members of the Guild shall remain in good standing during the term of the agreement.

Hours: 8 per day (falling within a period of 9 hours), five days a week, a 40-hour week. Overtime: time and one-half for all work performed in excess of 8 hours per day, provided that employees may, and may be required to, take equivalent time off on another day during the same payroll period at the discretion of the manager of the department, the above does not apply to employees in the Editorial department whose hours of work are for reporters with 2 years' service—7 hours within 7½ hours, evening assignments first hour of which is without extra pay, remainder at time and one half, no overtime on the night prior to weekly day off (this applies to first and second year reporters also), may be required to report for duty 1½ hours

late on day following night assignment if net overtime amounts to $1\frac{1}{2}$ hours or more, this to be credited to time worked during day and deducted from night overtime: all classifications on the news desk and all copy runners shall work 8 hours within a period of 9 hours: during first 2 years reporters are to work 40 hours within a 5-day week, time worked in excess of 40 hours per week to be paid for at time and one-half. For work on Sundays and 8 specified holidays double time shall be paid. Vacation with pay of one week for employees with 6 months' service, two weeks for those with one year's service.

Minimum weekly wage rates: editorial department—desk editors \$55, buff edition editor \$47.50, deskmen, after one year \$35, after 2 years \$42.50, editors \$40 to \$50, reporters after 18 months \$25 to \$40, reporters (society club news) \$17.50 with an increase of \$2.50 per year up to \$30, photographer \$42.50, assistant \$30, dark room assistants \$17 to \$25, librarian \$32.50, assistant \$21, copy runners \$13 during first year to \$17 in fourth year; circulation department—managers \$50, promotion and sales crew managers \$40 to \$45, district managers \$25 to \$40, country road men \$25 to \$35; business departments—assistant accountant \$35, senior clerks, male \$27.50, counter supervisors \$23.50, switch-board operators \$16.50 and \$21, collectors \$22.50 to \$27.50, cashier \$25, general office workers, stenographers etc., \$16.50 to \$23.50, display advertising salesmen \$22.50 to \$50, promotion men \$35, artists \$25 during first 3 years, \$35 during fourth year and \$41.25 in fifth year; maintenance and operating—night foreman \$27, night engineer \$26, general maintenance men \$24.45, elevator operators, female \$18.50.

Provision is made for sick leave with pay and settling of disputes.

Manufacturing: Metal Products

OSHAWA, ONT.—THE PEDLAR PEOPLE LIMITED AND UNITED STEELWORKERS OF AMERICA, LOCAL 2784.

Agreement to be in effect from June 19, 1946, to April 30, 1947. Negotiations to take place in April, 1947. The company recognizes the union as the sole and exclusive bargaining agent for all eligible employees. There will be no discrimination, intimidation or coercion by the company or the employees. Check-off: employees who so authorize may have their union dues deducted monthly from their pay by the company who shall remit same to the union.

Hours of work: day shift—9 per day Monday through Friday, a 45-hour week; night shift as mutually arranged. Overtime: time and one half for work performed in excess of assigned working hours or on Saturdays and Sundays and 8 specified holidays for hourly and piece workers. Double time to be paid for any work in excess of 14 hours in any one day. Two 10-minute rest periods will be granted each shift and 5 minutes wash-up time at the end of shifts. Vacation: one week with pay for all employees with one year's continuous service and additional week with pay for all employees with 5 years' continuous service.

Hourly wage rates: base rate of 69 cents paid to machine helpers; machine operators and spot welders, production workers, shippers, stock-keepers and clerks 79 to 74 cents; inspectors, die setters 74 to 84 cents, specialized workers (sheet metal etc.), welders (gas and arc) 74

to 99 cents; electricians, plumbers 69 to 99 cents; carpenters 69 to 94 cents; millwrights 79 to 99 cents; toolmakers \$1.04 to \$1.19; tool makers' apprentices 54 cents and up to journeyman rate. Five cents per hour extra shall be paid for work on night shift. Lead hands receive 5 cents per hour above the top rate of group being led; charge hands receive 5 cents per hour above the lead hands for same type of work. Female workers' and boys' base rate 54 cents, welders (gas and arc) 64 cents.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Non-metallic Minerals and Chemicals

MONTREAL, P.Q.—THE SHERWIN-WILLIAMS COMPANY OF CANADA LIMITED AND INTERNATIONAL CHEMICAL WORKERS UNION, LOCAL 240.

Agreement to be in effect from March 9, 1946, to March 9, 1947, and thereafter from year to year subject to notice. The company recognizes the union as the sole and exclusive bargaining agent for all eligible employees. There shall be no discrimination, intimidation or coercion either by the company or the employees. Check-off: upon an employee's authorization the company will deduct semi-monthly union dues and remit same to the union.

Hours of work: 9 per day Monday through Friday, 3 on Saturday, a 48-hour week, except Linseed Oil mill (8 hours, 6 days) Dehydrol department (8 hours, 7 days) and Stationary Engineers and Firemen (8 hours, 7 days) where work is continuous. Overtime: time and one half for work in excess of the above hours, double time for all work on Sundays and 7 specified holidays, 4 of which are paid holidays providing the employee works full time on the day following the holiday unless prevented from so doing by sickness. Vacation: one week with pay to employees with one year's continuous service, 2 weeks with pay for those with 5 or more years continuous service, 3 weeks with pay to those with 25 years' continuous service. Ten minute rest periods will be granted employees during morning and afternoon, except in the Linseed Oil mill. Ten minute wash-up time will be allowed at noon and at quitting time except in the colour works, Linseed Oil mill and the P. and A. department. In the Linseed Oil mill, on shift work a 20 minute period will be allowed for lunch and a 20 minute wash-up period at quitting time, on the daytime shift one 10-minute rest period, either morning or afternoon, one 10-minute period allowed for the noon wash-up and one 20-minute period for wash-up at quitting time. In the colour works 10 minutes will be allowed at noon and 20 minutes at quitting time to wash. In the P. and A. department 5 minutes wash-up time will be allowed both at noon and at quitting time.

Minimum hourly wage rates: subject to the approval of the Regional War Labour Board and effective February 27, 1946, paint works—tank washers 57 cents, fillers 59 cents, material chaser 60 cents, mixers, millmen second class 61 cents, millmen first class, stamping machine operators, shaders 65 cents, mill dresser 67 cents, shaders first class 70 cents; varnish factory—fillers 59 cents, blenders 62 cents, thinning men 63 cents, cookers 67 and 73 cents; lacquer department—fillers 59 cents, mixers, millmen 61 cents, shaders 65 and 70 cents; re-

ceiving department—checkers and elevator operators, warehousemen 60 cents, pumpmen 62 cents; packing and shipping—stockhandlers 55 cents, packers 59 cents, checkers and elevator operators 60 cents, layout man 61 cents; colour works—millmen, elevator operators, pressmen, kiln men 60 cents, colour strikers 63 and 68 cents, charge hands 70 cents; maintenance department—helpers 60 cents during first year, thereafter 65 cents, skilled helpers 65 and 70 cents, oilers 65 cents, improvers 70 and 75 cents, electricians, steamfitters, mechanics, millwrights, blacksmiths, carpenters 80 cents; upkeep department—helpers 58 cents, spray and brush hands 65 cents; drum cleaning department—drum washers 57 cents, inspector 60 cents, cooper 67 cents, stationary engineers—fourth class 60 cents, third class 70 cents, second class 82½ cents; dehydrol department—helpers 60 cents, operators 67 cents, youths 17 years and under minimum 38 cents; labelling and paint filling departments, females—labellers 38 cents, capper 40 cents, labelling machine operator, filler third class 43 cents, filler second class, charge hand, 48 cents, filler first class 59 cents; P and A department, females—table hands 38 cents, machine operator 43 cents, charge hands 48 cents; males—press feeders 75 cents; linseed oil mill—drum painters, filter pressmen, woodworkers 58 cents, oil fillers 59 cents, soap makers, seed cleaners, meal packers, seed rolls and drier attendants, oil refiners, expeller attendants 60 cents, maintenance men 70 cents, labourers 55 cents, helpers 57 cents and charge hands 68 cents in all departments except as otherwise noted. On shift work an off shift premium of 5 cents per hour shall be paid for work performed between the hours of 7 p.m. and 7 a.m., except for engineers and firemen.

Provision is made for seniority rights, grievance procedure, group insurance plan, and a Labour-Management Production Committee.

Transportation and Public Utilities: Water Transportation

GREAT LAKES, ST. LAWRENCE AND ATLANTIC COAST—CANADA STEAMSHIP LINES LIMITED, PATERSON STEAMSHIP COMPANY LTD., COLONIAL STEAMSHIP COMPANY LTD. AND SARNIA STEAMSHIP COMPANY LTD. AND CANADIAN SEAMEN'S UNION.

Agreement to be in effect from August 1, 1946, to December 31, 1947, and thereafter from year to year unless 60 days' notice is given. The companies recognize the union as the sole collective bargaining agency for all unlicensed personnel. Maintenance of membership: all employees who are now or later become union members must remain members in good standing during the term of the agreement. The company also agrees that all unlicensed personnel to be hired shall be requested through the union and through the seamen's section of the National Employment Service, the actual selection, hiring and dismissal of seamen to be at the discretion of the Master and/or chief engineer of the vessel. No discrimination or intimidation by either the companies or the union.

Hours of work: 8 hours per day, 4 hours on watch, 8 hours off watch or 8 continuous hours on duty in any 24.

Monthly wage rates—1946 rate given first and 1947 rate after, bosun \$140.60, \$150, wheels-

man \$126.10, \$134.50, watchman, lookout or patrol \$109.25, \$116.50, deckhand \$100.80, \$107.50, first cook (canaller) \$162.70, \$173.50, first cook (upper lakes) \$173.95, \$185.50, second cook \$103.60, \$110.50 messman \$100.80, \$107.50, porter \$90, \$96, oiler \$126.10, \$134.50, fireman \$120.50, \$128.50, operator \$131.74, \$140.50. For self-unloaders the wages for each rating shall be \$10 per month extra. If any member of the unlicensed personnel is required to do longshoremen's work he shall be paid in addition to regular wages, the longshoremen's rate. If longshore work is performed on Sundays or holidays the rate shall be time and one half, as is the rate for the cleaning of holds or parts thereof in which penalty cargoes (such as sulphur, cement) have been carried. On vessels carrying explosives in 10-ton lots or over the crew will be paid on the basis of 25 per cent of monthly wage rates in addition to regular wages, while such cargo is on board the vessel or is being loaded or unloaded, when the unlicensed personnel are required to work explosives (sporting ammunition excepted) they shall be paid \$2.50 per hour in addition to their regular wages.

Vacation: all members of crew who have served continuously aboard their ships from the time of fitting out in the Spring to the completion of laying up in the Fall, shall have accruing to them and payable at the end of the season 2 days per month for their period of service, not exceeding 10 days in all. Transportation from and to their homes at the beginning and end of the season up to a distance of 500 miles is provided by the company. Provision is made for the settling of grievances and seniority rights.

Transportation and Public Utilities: Air Transportation

CANADA-TRANS-CANADA AIR LINES AND THE CANADIAN AIR LINE PILOTS ASSOCIATION.

Agreement to be in effect from August 1, 1946, to July 31, 1947, and thereafter from year to year subject to 60 days' notice. This agreement is similar to the one previously in effect and summarized in the *Labour Gazette* for September, 1945, p. 1340.

By the addition of 7 cents all minimum monthly salary rates are now multiples of \$10, thus the rates formerly ranging from \$269.93 to \$769.93, now range from \$270 to \$770.

Service: Business and Personal

QUEBEC, P.Q.—CANADIAN PACIFIC RAILWAY COMPANY (CHATEAU FRONTENAC HOTEL) AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS

Agreement to be in effect from June 1, 1946, to May 31, 1947, and thereafter subject to 30 days' notice.

Hours of work: 8 per day, a 48-hour week, except where it has been the practice to work less than 8 hours per day or 48 hours per week the practice shall be continued, if practicable. Where the work is of an intermittent nature, there being no work for periods of more than one hour's duration, trick split assignments may be established only by mutual agreement between the accredited representatives of the union and the company. This rule may be applied only to the staffs of the service department, chef's department, steward's department, catering depart-

ment and housekeeping department. Split trick assignments in the service department will be confined to not more than 2 tours of duty on alternate days within a spread of 16 consecutive hours in any such day, while in the chef's department (except for terrace cafe cooks and stillroom girls) to not more than 2 tours of duty a total of not more than 8 hours work within a spread of 14 consecutive hours in any day; while for terrace cafe cooks and stillroom girls to not more than 3 tours of duty, a total of 8 hours' work within a spread of 14 consecutive hours in any day; in the catering department (except for cashiers) and for staff waiters to not more than 3 tours of duty a total of 8 hours' work within a spread of 15 consecutive hours in any day; for dining room cashiers and terrace cafe cashiers to not more than 2 tours of duty on alternate days within a spread of 16 consecutive hours in any such day; in the housekeeping department to not more than 2 tours of duty a total of 8 hours' work within a spread of 14 consecutive hours in any day.

Overtime: time worked by employees on regular assignments, continuous with, before or after the regularly assigned hours of duty shall be considered overtime and shall be paid for, on the actual minute basis, at one and one half times the pro rata rate. Regularly assigned employees shall be assigned a regular seventh day off duty each week, preferably Sunday. Employees required to work on their assigned day off duty shall be paid at one and one half times the pro rata rate with a minimum of two hours for which two hours' service may be required. Vacation: existing practice of annual vacation with pay in the various classifications covered in the agreement will be continued.

Regularly assigned employees temporarily assigned to duties as waiters on special functions during their regular working hours will be paid in addition to their regular rate of pay as follows—for breakfast and luncheon functions 75 cents, for dinner functions \$1.

Provision is made for seniority rights, free transportation in accordance with the standard regulations of the company, leave of absence, a training for promotion plan and grievance procedure.

Collective Agreements Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the amendment of fifteen agreements and the correction of three others, all of which are noted below. Requests for the amendment of the agreements for building trades at Quebec, barbers and hairdressers at Montreal, wholesale food stores at Quebec and building trades at Sherbrooke were gazetted August 24. Re-

quests for amendments to the agreements covering railway car and bus manufacturing at Montreal, building trades at Sorel, printing trades at Montreal and building materials industry for the province were published August 31. A request for a new agreement for garages and service stations at Mégantic was also published August 31. Requests for amendments to the building trades' agreement at Montreal, barbers' and hairdressers' agreement at St. Hyacinthe, agreements covering the sheet metal industry at Montreal and building trades at Joliette were all published September 14.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

WHOLESALE FUR INDUSTRY, MONTREAL

An Order in Council, dated August 15, and gazetted August 24, extends the term of the previous Orders in Council for this industry (L.G., Nov., 1944, p. 1368; April, 1945, p. 517, Aug. p. 1197, Oct., p. 1520; June, 1946, p. 783, Aug., p. 1092) to September 30, 1946.

FINE GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated September 6 and gazetted September 14, amends the previous Orders in Council for this industry (L.G., July, 1944, p. 867, Sept., p. 1141; Aug., 1945, p. 1197, Oct., p. 1520; Aug., 1946, p. 1093, and previous issues) by making a slight change in the schedule for piece work rates.

WORK GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated September 6, and gazetted September 14, amends the previous Orders in Council for this industry (L.G., Oct., 1945, p. 1520; May, 1946, p. 627; Aug., p. 1093, and previous issues) by adding one new operation to the schedule for piece work rates.

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated August 21, and gazetted August 24, amends the previous Orders in Council for this industry (L.G., Mar., 1945, p. 349, April, p. 517; May, 1946, p. 627, June, p. 782, Aug., p. 1092, Sept., p. 1247). Except for stationary enginemen, maintenance men (millwrights) and watchmen, at least 60 per cent of all male employees are to receive 58 cents per hour in zone I, 54 cents in zone II and 48 cents in zone III; not more than 25 per cent to receive 46 cents in zone I, 43 cents in zone II and 37 cents in zone III; not more than 15 per cent to receive 34 cents in zones I and II and 29 cents in zone III.

Manufacturing: Pulp, Paper and Paper Products**UNCORRUGATED PAPER BOX INDUSTRY, PROVINCE OF QUEBEC**

A correction of an Order in Council relating to this industry (L.G., Sept., 1946, p. 1249) was published in the August 31, issue of the *Quebec Official Gazette*. This correction does not affect the summary already given.

Manufacturing: Printing and Publishing**LITHOGRAPHING INDUSTRY, PROVINCE OF QUEBEC**

An Order in Council, dated August 21, and gazetted August 24, amends the previous Orders in Council for this industry (L.G., Dec., 1945, p. 1824; Feb., 1946, p. 187). In all departments, wage rates are increased by 3 cents per hour over the rates previously in effect.

Manufacturing: Metal Products**CLOCKMAKERS, MONTREAL**

An Order in Council, dated September 6, and gazetted September 14, amends the previous Orders in Council for this industry (L.G., Nov., 1943, p. 1530; Aug., 1944, p. 1007, Dec., p. 1515; May, 1946, p. 628, Sept., p. 1252). Senior clockmakers receive a minimum rate of \$35 and junior clockmakers \$25 for each week of 54 hours of work. Supernumerary senior clockmakers are to be paid a minimum of 80 cents per hour and supernumerary junior clockmakers 65 cents per hour. Apprentice-clockmakers shall be paid from \$8 per week during first 6 months to \$20 per week during tenth 6 months.

ORNAMENTAL IRON AND BRONZE INDUSTRY, MONTREAL

An Order in Council, dated September 6, and gazetted September 14, extends the term of the previous Order in Council for this industry (L.G., Oct., 1945, p. 1520) to October 8, 1946.

GARAGES AND SERVICE STATIONS, SHERBROOKE

A correction of an Order in Council relating to this industry (L.G., Sept., 1946, p. 1250) was published in the *Quebec Official Gazette* of August 24. Territorial jurisdiction is corrected

to read "the city of Sherbrooke and all municipalities within a radius of 15 miles from its limits".

Construction**BUILDING TRADES, THREE RIVERS**

An Order in Council, dated August 15, and gazetted August 24, amends the previous Orders in Council for this industry (L.G., Mar., 1944, p. 359; Aug., 1945, p. 1198; Mar., 1946, p. 317, and previous issues). Wage rates are increased by 15 cents per hour over the December, 1943 scale for most of the trades. The new wage scale is given in the accompanying table.

For the municipalities of Saint-Hilaire, Saint-Hilaire East and Parc Otterburn, the minimum wage rates are 5 cents per hour less than zone I. Wage-earners doing cellar digging shall be paid 55 cents per hour in zone I and 45 cents in zone II. There may be one apprentice to each journeyman electrician, plumber, tinsmith, pipe mechanic and one apprentice to each 3 journeymen carpenters-joiners, painters, masons, plasterers and bricklayers. Apprentices to be paid from 35 cents per hour during first year to 55 cents during fourth year in zone I and from 30 cents during first year to 45 cents during fourth year in zone II. For maintenance work tradesmen to be paid a minimum

of \$23 per week in zone I and \$25 in zone II; labourers to be paid \$23 in zone I and \$20 in zone II. Employees who have not worked 48 hours during the week may work on Saturday afternoon until 6 p.m. at the rate of time and one half.

BUILDING TRADES, MONTREAL

An Order in Council, dated August 21, and gazetted August 24, amends the previous Order in Council for this industry (L.G., Sept., 1946, p. 1252). The Master Plumbers' Association of Montreal and Vicinity and "La Section des Entrepreneurs en Plomberie-Chauffage de l'Association des Marchands détaillants du Canada, Inc." are added as contracting parties of the first part. The United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, local number 144 and "L'Association des Plombiers, Soudeurs et Poseurs d'Appareils de Chauffage inc." are added as contracting parties of the second part. Territorial jurisdiction includes the Island of Montreal and within a radius of 15 miles from its limits. This section of the agreement applies to all pipe mechanics engaged in all work whether inside or outside the shop, and to all pipe installations, whether movable or immovable, within or outside a building, requiring the ability and skill of a pipe mechanic, including the installation, repair, maintenance or renovation of any new or existing plumbing or heating system and the assembling and erecting of furnaces, boilers and equipment in connection with same.

Hours: 8 per day, 4 on Saturday, a 44-hour week.

Overtime: time and one-half until midnight and on Saturday afternoon; work performed after midnight and all work on Sundays and 11 specified holidays is payable at double time. For employees working outside the city limits, the time needed to travel from the city limits to the job, and vice versa, shall be paid at single time, the cost of such transportation to be paid by employer. For work outside the city limits, hours may be varied to suit the time of leaving and returning of public transportation, but must not exceed 44 hours per week.

Minimum hourly wage rates: master plumber or heating contractor \$2 per hour; journeyman in plumbing, heating and pipe work, pipe welder \$1.11; junior mechanic 78 cents; apprentices

from 45 cents in first year to 65 cents in fourth year.

Apprenticeship: one apprentice to each journeyman or junior journeyman and not more than one junior journeyman to each 3 senior journeymen per shop. Apprentice pipe mechanics to serve 4 years of 2,000 hours each.

Trade

RETAIL FOOD STORES, QUEBEC

An Order in Council, dated September 6, and gazetted September 14, amends the previous Orders in Council for this industry (L.G., June, 1944, p. 754; July, 1945, p. 996, Aug., p. 1198). The number of specified paid holidays is increased by one. Vacation: after one year's service in zone I and after 2 years' service in zone II, every employee is entitled to one week's vacation with pay.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, CHICOUTIMI

An Order in Council, dated August 28, and gazetted September 7, amends the previous Orders in Council for this industry (L.G., Nov., 1941, p. 1425; Aug., 1942, p. 978; Nov., 1944, p. 1369). Hours for barbers are reduced from 61 to 59 per week; hours for ladies' male and female hairdressers remain unchanged at 57 per week. Minimum wages: journeyman \$20 per week plus 40 per cent of his proceeds in excess of \$35; ladies' female hairdresser \$13 per week plus 10 per cent of her proceeds during any one week. Apprentices are to be paid from \$2 per week during first 3 months to \$14 per week during second half of third year.

BARBERS AND HAIRDRESSERS, SHERBROOKE

A correction of an Order in Council relating to this industry (L.G., April, 1946, p. 499, July, p. 931) was published in the August 24 issue of the *Quebec Official Gazette*. This correction does not affect the summary already given.

BARBERS AND HAIRDRESSERS, ST. HYACINTHE

An Order in Council, dated August 28, and gazetted September 7, amends the previous Orders in Council for this industry (L.G., Jan., 1945, p. 71; Jan., 1946, p. 52, June, p. 784, and previous issues). This amendment does not affect the summary already given.

Fair Wage Conditions in Dominion Government Contracts

THE Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classes

of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are covered by the general provision that rates must equal those current in the district, and in addition, by the requirement that the rates must not be less than 35 cents an hour for male workers 18 years of age and over, 25 cents for female workers 18 years of age and over, and 20 cents for beginners and for workers under 18.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During August

During the month of August the Department of Labour prepared, on request, 60 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into during this period by the various Government departments appear hereunder:—

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "minimum rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation or by direction of a War Labour Board."

Department of Fisheries

Construction of a dwelling and a concrete seawall at the Fisheries Experimental Station, Grande Riviere, Gaspé County, P.Q. Name of contractor, Mr. James S. Watt, Little River West, Gaspé County, P.Q. Date of contract, August 30, 1946. Amount of contract, \$17,320. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Brick and hollow tile layers	\$.85
Brick and hollow tile layers' helpers50
(mixing and tempering mortar)	
Carpenters and joiners65
Cement finishers60
Cement and concrete mixer operators	
Steam70
Gas or electric55
Compressor operators (gas or elec.)55
Drivers45
Driver, team and wagon70
Drill runners55
Electricians (inside wiremen)70
Engineers, operating, steam75
Engineers, crane (steam, gas or elec.)75
Enginemen, stationary55
Hoist operators—tower (gas or elec.)55
Labourers45
Motor truck drivers50
Motor truck driver and truck	1.50
Ornamental iron workers65
Painters (spray)75
Painters and glaziers65
Plasterers85
Plasterers' helpers50
(mixing and tempering material)	
Plumbers and steamfitters70
Riggers (general)60
Rodmen, reinforced steel55

	<i>Per Hour</i>
Roofers:	
Felt and gravel: patent: composition—	.50
Sheet metal	.70
Sheet metal workers	.70
Shinglers (wood, asbestos)	.65
Steam shovel engineers	.95
Steam shovel firemen	.65
Steam shovel oilers	.60
Shovel operators (gas)	.95
Watchmen	.40
Welders and burners	
Acetylene or elec.	.65

	<i>Per Hour</i>
Tractor operators— <i>Con.</i>	
Small	.85
Bulldozer	.85
Elevating grader	1.05

Construction of a classroom building, Alberni Indian Residential School, British Columbia. Name of contractor, Mr. W. O. Brown, Port Alberni, B.C. Amount of contract, \$32,347.20. A fair wages schedule was included in the contract as follows:—

Department of Mines and Resources

First course gravel surfacing on the Grimshaw-Great Slave Lake Highway Dominion-Provincial Section, Mile 69.36 to Mile 124.51. Name of contractors, Standard Gravel and Surfacing Company, Limited, and Fred Manix and Company, Limited, Calgary, Alta. Date of contract, August 8, 1946. Amount of contract, \$100,249.74. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Axemen	\$.65
Bridgemen (steel workers)	1.24
Blacksmiths	.90
Blacksmiths' helpers	.81
Carpenters and joiners	1.10
Cement finishers	1.10
Concrete mixer operators:	
Steam	1.00
Gas or electric	.85
Compressor operators (gas or electric)	.85
Dragline operators (steam or gas)	1.25
Dragline firemen	.70
Dragline oilers	.70
Drivers (teamsters)	.65
Drill runners	.85
Electricians (inside wiremen)	1.15
Electricians' helpers	.81
Engineers, crane (steam, gas, elec.)	1.25
Hoist operators—tower (gas or elec.)	
—(under 12 H.P.)	.81
—(12 H.P. and over)	1.12
Labourers	.65
Motor truck drivers	.65
Pipefitters (surface—temp. work)	1.16
Pipefitters' helpers	.81
Machinists	1.00
Machinists' helpers	.81
Mechanics—gasoline equipment	.92
Mechanics—diesel equipment	1.02
Powdermen	.85
Road grader operators:	
Horse-drawn—	.75
Motor driven—	1.00
Road roller operators (steam or gas)	1.00
Steam shovel engineers	1.25
Steam shovel cranemen	1.25
Steam shovel firemen	.70
Steam shovel oilers	.70
Shovel operators (gas or diesel)	1.25
Watchmen	.60
Welders and burners:	
On steel erection	1.25
Riveters—(steel workers structural)	1.10
Rock muckers	.80
Steel sharpener	.90
Tractor operators:	
Letourneau, etc.	1.05

	<i>Per Hour</i>
Asbestos insulation workers	1.06
Blacksmiths	1.00
Blacksmiths' helpers	.81
Brick and hollow tile layers	1.28½
Brick and hollow tile layers' helpers	.81
(mixing and tempering mortar)	
Carpenters and joiners	1.10
Cement finishers	1.00
Cement and concrete mixer operators:	
Gas or electric	.81
Compressor operators (gas or electric)	.81
Drivers (teamsters)	.65
Drill runners	.81
Electricians (inside wiremen)	1.18½
Engineers, operating steam:	
Single or double drums	1.10
Three or more drums	1.22½
Engineers on steel erection	1.22½
Engineers, crane (steam, gas, electric)	1.22½
Enginemen stationary	.79
Hoist operators—tower (gas or electric)	
under 12 H.P.	.81
Hoist operators—tower (gas or electric)	
12 H.P. and over	1.10
Labourers	.65
Lathers:	
Metal on metal	1.19
Wood	1.06
Linoleum layers	.81
Mastic floor layers	1.06
Mastic floor rubbers and finishers	.81
Mastic floor kettlemen	.71
Mastic floor labourers	.65
Motor truck drivers (under 5 ton)	.65
Motor truck drivers (5 ton and over)	.75
Ornamental iron workers	1.12
Painters (spray)	1.05
Painters and glaziers	.96
Pipelayers, caulkers and solderers (iron pipe)	.73
Plasterers	1.06
Plasterers' helpers (mixing and tempering material)	.81
Plumbers and steamfitters	1.19
Plumbers and steamfitters' helpers (all men as-signed to help tradesmen)	.69
Powdermen	.96
Pumpmen	.71
Riggers (general)	.81
Rodmen (reinforced steel)	.81
Roofers:	
Felt and gravel; patents; composition	.66
Sheet metal	1.18
Sheet metal workers	1.18
Shinglers (wood, asbestos)	1.10
Steam shovel engineers	1.22½
Steam shovel cranemen	1.22½
Steam shovel oilers	.79
Shovel operators (gas)	1.22½
Tractor operators:	
Letourneau, etc.	1.05
Small	.80

	<i>Per Hour</i>
Watchmen60
Waxers and polishers (floor)71
Welders and burners:	
Acetylene or electric	1.00
Stonecutters	1.07
Stonemasons	1.28½
Stonemasons' helpers (mixing and tempering mortar)81
Terrazzo layers	1.32
Terrazzo finishers and helpers81

	<i>Per Hour</i>
Motor truck drivers65
Motor truck driver and truck	1.65
Ornamental iron workers75
Painters and glaziers86
Plasterers—till July 31, 1946	1.06
—on and after August 1, 1946	1.16
Plasterers' helpers (mixing and tempering material)65
Plumbers and steamfitters	1.12
Sheet metal workers	1.10
Watchman56
Waxers and polishers (floor)65

National Harbours Board

Installation of floodlights at Sections 11, 12 and 14, Three Rivers Harbour, P.Q. Name of contractor, Mr. Henri P. Mongrain, Three Rivers, P.Q. Date of contract, July 17, 1946. Amount of Contract, \$2,238.90. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Carpenters and joiners	\$.75
Electricians (inside wiremen)70
Labourers55
Motor truck drivers55
Motor truck driver and truck	1.55
Riggers (general)65
Watchman50

Repairs to roofs of sheds Nos. 13 and 16, Three Rivers Harbour, P.Q. Name of contractor, Germain and Frere, Ltee., Three Rivers, P.Q. Date of contract, August 1, 1946. Amount of contract, \$1,100. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Labourers	\$.55
Motor truck drivers55
Motor truck driver and truck	1.55
Roofers:	
Felt and gravel: patent: composition—65
Sheet metal—75
Sheet metal workers75

Department of Public Works

Alterations to Jackson Building (third, fourth and fifth floors), Ottawa, Ont. Name of contractor, The Geo. C. Graves Construction Company, Limited, Ottawa, Ont. Date of contract, August 8, 1946. Amount of contract, \$35,968. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Carpenters and joiners	\$1.05
Drivers61
Driver, team and wagon95
Electricians (inside wiremen)96
Labourers61
Lathers:	
Metal—	1.00
Wood—90
Linoleum layers75

Repairs to the north pier, Grand Bend, Ont. Name of contractor, Detroit River Construction Limited, Blenheim, Ont. Date of contract, August 16, 1946. Amount of contract, unit prices—approximate expenditure, \$54,617. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Axemen	\$.55
Blacksmiths70
Blacksmiths' helpers55
Boatmen51
Carpenters and joiners86
Cement finishers70
Cement and concrete mixer operators:	
Steam—75
Gas or electric—65
Compressor operators (gas or electric)65
Divers per day } Full day's pay allowed	14.48
Divers' tender } whether employed full or	
per day } part time.	5.48
Drivers51
Driver, team and wagon85
Drill runners60
Engineers, operating, steam81
Engineers, crane (steam, gas or elec.)85
Enginemen, stationary60
Hoist operator—tower (gas or elec.)60
Labourers51
Motor boat operator55
Motor truck driver55
Motor truck driver and truck	1.55
Pile driver and derrick foreman	1.00
Pile driver and derrick engineers90
Pile driver and derrick men (rigging, setting and signalling)65
Pile driver and derrick firemen60
Pile driver and derrick labourers55
Powdermen56
Rodmen—reinforced steel56
Shovel operators (gas)	1.06
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)56
Watchmen46
Welders and burners:	
Acetylene or electric—80

Construction of a storage building, Physical Metallurgy Research Laboratories, Ottawa, Ont. Name of contractor, Messrs. Alex. I. Garvock, Limited, Ottawa, Ont. Date of contract, June 6, 1946. Amount of contract, \$74,772.00 and unit prices. A fair wages

schedule was included in the contract as follows:—

	<i>Per Hour</i>
Asbestos insulation workers	\$. 80
Blacksmiths86
Blacksmiths' helpers60
Brick and hollow tile layers	1.16
Brick and hollow tile layers' helpers60
(mixing and tempering mortar)	
Carpenters and joiners96
Cement finishers75
Cement and concrete mixer operators:	
Steam80
Gas or electric65
Compressor operators (gas or electric)65
Drill runners65
Drivers56
Driver, team and wagon90
Electricians (inside wiremen)96
Engineers, operating, steam86
Engineers, crane (steam, gas, electric)90
Engineers on steel erection	1.00
Enginemen, stationary65
Hoist operators—tower (gas or electric)65
Labourers56
Motor truck drivers60
Motor truck driver and truck	1.60
Ornamental iron workers75
Painters and glaziers86
Plumbers and steamfitters	1.12
Rodmen (reinforcing steel)65
Roofers:	
Felt and gravel: patent: composition60
Sheet metal workers	1.01
Watchman51
Welders on steel erection	1.00

Reconstruction of wharf, Blind River, Ont. Name of contractor, Richardson Construction Company, Limited, Toronto, Ont. Date of contract, August 12, 1946. Amount of contract unit prices—approximate expenditure, \$17,884.80. A fair wages schedule was included in the contract as follows:—

	<i>Per Hour</i>
Blacksmiths	\$. 66
Blacksmiths' helpers56
Carpenters and joiners90
Cement and concrete mixer operators:	
Steam76
Gas or electric66

Labour Law

Recent Regulations Under Provincial Legislation

ORDERS in Alberta bring a branch of the printing trade within the Apprenticeship Act and amend the regulations governing electrical installations in coal mines. In British Columbia, "mercantile industry" in the Control of Employment of Children Act now includes businesses as well as establishments operated for the purpose of wholesale or retail trade. Rules for certain apprenticeship trades under the Manitoba Apprenticeship Act have been amended. New Brunswick has made new regulations regarding the examination and licensing of journeymen plumbers. In Quebec there has been a clarification of the new Minimum Wage Order providing for payment of overtime at the rate of time and one-half the regular rate. The Order under the same Act providing for annual holidays with pay has been revised to allow employers in certain cases to pay a compensating indemnity in lieu of a 1946 holiday with pay.

Alberta Apprenticeship Act

The branch of the printing trade engaged in publishing weekly newspapers and in job printing done in addition to the publication of the newspaper was designated as a trade under the above Act by an Order made August 27, 1946, and gazetted September 14.

Alberta Amusements Act

Regulations under this Act governing, among other things, the licensing of projectionists were amended by Order in Council of August 6, gazetted August 15, to provide that persons operating motion picture machines of the narrow gauge type as itinerant exhibitors or giving public exhibitions of narrow gauge films supplied by a commercial exchange must hold a narrow gauge commercial certificate. Provisions regarding provisory permits and the application and renewal fees thereof have been revoked.

Alberta Coal Mines Regulation Act

An Order in Council made August 20 and gazetted August 31 amends the regulations made under the Coal Mines Regulation Act (L.G. 1945, p.1531) in respect to electrical

installations and appliances in coal mines. New subsections require a person in charge of electrical operations in mines which have high tension power plants and utilization plants of 200 kilowatts or more (connected load) to hold a first-class mine electrician's certificate of competency, and in plants of less than 200 kilowatts a second-class certificate, provided in the latter case that the Chief Inspector may require a first-class certificate if high voltage equipment is used. Where the services of a first-class electrician are not available, a second-class electrician may, with the Chief Inspector's written permission, take charge of operations for such time and under such conditions as are laid down in the permit.

Alberta Male Minimum Wage Act

An Order in Council made September 3 and gazetted September 14 rescinds as obsolete Order No. 9 of November 25, 1939 (L.G. 1940, p.20) which required every employer under the Act to pay wages within five days after the expiration of each period of employment which might not be greater than one calendar month. Since the Labour Welfare Act, 1943, requires wages to be paid within 10 days of the expiration of the period of employment, Order 9 was no longer necessary.

British Columbia Control of Employment of Children Act

By a slight amendment in the schedule of industries in which employment of children under 15 is forbidden except on written permission from the Minister, which was approved by Order in Council of August 30, and gazetted September 12, the words "and businesses" are inserted, so that the definition of "mercantile industry" to which the Act applies now reads "which means all establishments and businesses operated for the purpose of wholesale and (or) retail trade".

Manitoba Apprenticeship Act

Rules made under this Act relating to apprenticeship in certain trades (L.G. 1945, p. 768) have been amended. These now permit a certificate of qualification to be granted, on

the recommendation of the trade advisory committee, and on payment of a fee of \$1.00, to any person who before April 16, 1945, has engaged in painting and decorating for 3½ years or more, and in the carpentry and wood-working (factory) trades or in the plastering and lathing trade for 4 years or more.

With regard to the automobile repair mechanics' and internal combustion engine mechanics' trades, the provisions concerning eligibility for apprenticeship were changed to include all persons who: (1) are (a) between 16 and 25 years of age, or (b) over 25 and whose applications are, on the recommendation of the trade advisory committee, approved by the Apprenticeship Board, or (c) over 25 and who have been honourably discharged after service in the Armed Forces; and (2) have completed Grade IX or its equivalent. By the regulations of November, 1945, any person over 16 who had not been engaged in the trade for at least five years was eligible to become an apprentice.

The provision regarding the ratio of apprentices to journeymen in the automobile repair trade was also amended to provide that, on the recommendation of the trade advisory committee, an additional apprentice may be employed when the senior apprentice has passed his third year of apprenticeship.

Amendments relating to painting and decorating were gazetted August 31, those relating to the automobile repair and carpentry and woodworking trades on July 27, and those relating to the plastering and lathing trade on September 21.

New Brunswick Health Act

New regulations respecting the examination and licensing of journeymen plumbers, gazetted August 28 and effective September 1, 1946, replace regulations issued under the Public Health Act, 1918 (L.G. 1924, p. 843). The new regulations provide that no person without a plumber's licence may engage in plumbing, except under the direct and immediate supervision of a licensed plumber, in which case such person must first have his name and address registered with the Plumbers' Examining Board. Applicants are to be examined and licences issued by a four-member Board, to be appointed by the Minister of Health and Social Services, of which the chairman is to be a member of the Department of Health and Social Services, the secretary a member of the Department of Labour, and the other two members licensed plumbers, representing employers and employees, respectively. Members are to serve without salary but are to

receive travelling expenses and a per diem allowance of \$15 when in attendance at Board meetings.

An applicant for a licence must be at least 18, have completed the prescribed application form and must satisfy the Board that he has had five years practical experience in the plumbing trade or hold a valid journeyman plumber's certificate issued by the Provincial Apprenticeship Committee.

As in the earlier regulations, the initial fee for examination for a licence is \$5. Licences expire yearly on December 31, and they may, upon application and in the discretion of the Board, be renewed from year to year, with examination, for which the fee is \$1.50. A qualified plumber holding a valid licence from another Province may be granted a New Brunswick licence, with or without examination, for such period as the Board may determine, on payment of a fee of \$5. Licences may be suspended or cancelled and a penalty of a fine not exceeding \$100, and in default, imprisonment for not more than one month is provided for violation of any provision of these regulations.

Quebec Minimum Wage Act

OVERTIME RATES

Payment for overtime at the rate of time and one-half the regular rate was provided for by Order 2 of July 16, issued under this Act, approved by Order in Council of July 31 and gazetted August 3. The Order applied to hourly-paid employees who are governed by a minimum wage order and not by a collective labour agreement. It prohibited any overtime rate inconsistent with that laid down by the Order. A new Order, approved by Order in Council of August 15, gazetted and effective August 31, changes the clause prohibiting agreed overtime rates varying from that in the Order to stipulate that no lower overtime rate than time and one-half may be paid.

HOLIDAYS

Order 3 providing annual holidays with pay for most workers in Quebec (L.G. 1946, p. 1105) has been revised by an Order in Council of September 6, gazetted and effective September 14. Workers in seasonal industries, watchmen of apartment houses, and janitors and watchmen of office buildings or of any immovable property are no longer among those excluded from the holidays Order.

A change was made in the definition of "duration of continuous service". In the periods of time listed as not interrupting the

duration of continuous service "days on which the establishment remains closed" is substituted for "days of unemployment".

The revised Order also requires an employer to pay a compensating indemnity, equal at least to the holiday pay prescribed, in lieu of a 1946 holiday to workers who, since January 1, 1946, have taken a holiday without pay equivalent in length to that stipulated in the Order and to those who were not entitled to a paid holiday under any scheme established for

1946 and carried out by the employer before July 27, 1946, when the holidays Order went into effect. With these exceptions, payment in lieu of the annual holiday with pay is forbidden. The Order prohibits any agreement providing for a shorter annual holiday with pay or one under less advantageous conditions than those fixed by it, or providing for the payment of less than the holiday pay prescribed for a worker who leaves his employment.

Canadian Vocational Training

CANADIAN Vocational Training is sponsored jointly by the Dominion Department of Labour and the Provincial Governments. Hitherto, the *LABOUR GAZETTE* has published each month both textual and tabular reports of the various types of training and projects directed by the Vocational Training Branch. In subsequent issues the tabular reports will not be a regular monthly feature, but will appear periodically only.

From the inception of C.V.T. up to August 31, 1946, the gross enrolment in all types of projects has been 527,329 which is made up as follows:

Discharged Members of the Forces..	86,101
Industrial Supervisors and Foremen	
Training	125,891
War Industry and Service Tradesmen.	315,337

Training of Discharged Members of Armed Forces

The number of new trainees enrolled during the month of August in all branches of training was—(3,902 men, 376 women). The peak enrolment to date was during the month of January when the total was 10,750 (10,028 men, 722 women).

The total number under training at the end of August, 1946 was 36,476 (33,684 men, and 2,792 women) with a break-down as listed below:

	Men	Women
Training in C.V.T. Schools..	11,173	1,113
Training in Private Schools..	2,898	1,184
Training in Industry.....	11,117	154
Training in Pre-Matriculation	7,565	335
Training in Correspondence..	932	5

The peak in training to date was reached July 1946, when the total was 38,777 (35,921 men, and 2,856 women). A point to note in the August Report is the fact that the number of men in training has decreased over 2,000 from the previous month's figures. In the case of Women's Training it has not changed appreciably since March when an increase has been noted of approximately 550. It is felt that the training in the C.V.T. schools will continue to decrease during the month of September also. The chief reason being seasonal employment for the veterans.

Training for 11,271 in industry this month shows an approximate increase of 4,000 since

March. This type of training does not require C.V.T. to provide an Instructional Staff nor equipment which has so often been the cause of delay in opening of Training Centres with a resultant backlog. However, an increased Supervisory Staff is carrying out field work in a satisfactory manner.

Since March 1946, training in C.V.T. Schools and Private Schools shows a decrease of approximately 2,000 and 600 respectively. Pre-matriculation Training also shows an approximate 2,000 decrease since this date. It is felt that the Special Summer Pre-matriculation Classes held this year have been most effective in clearing away a backlog in this type of training.

C.V.T. has set up training in various trades as requested by the veterans through D.V.A. There are, however, some types of training more in demand. It might be of interest to note here an outline of Trade Classification (CVT) since this has not been done previously.

Trade Classification for C.V.T. Schools (Effective September 1, 1946)

- A. *Agricultural Trades*
 - 1. Agriculture
 - 2. Farm Mechanics
 - 3. Rural Repair Shop
- B. *Building Trades*
 - 1. Bricklaying
 - 2. Carpentry
 - 3. Electricity (Construction)
 - 4. Electricity (Maintenance)
 - 5. Painting and Decorating
 - 6. Plastering
 - 7. Plumbing
 - 8. Sheet Metal Work
 - 9. Steamfitting
- C. *Commercial*
- D. *Drafting Trades*
 - 1. Drafting (Architectural)
 - 2. Drafting (Mechanical)
- E. *Electronic Trades and Radio*
- F. *Forestry and Lumbering Trades*
 - Furniture Trades*
 - 1. Cabinet Making
 - 2. Upholstering
 - 3. Woodworking (General)
- H. *Handicrafts Trades*
 - Hotel, Restaurant and Bakery Trades*
 - 1. Bakers and Chefs
 - 2. Hotel Housekeepers, Waiters, Etc.
 - 3. Hotel Management and Administration
- J. *Jewellery Trades*
 - 1. Jewellery Repair and Jewel Setting
 - 2. Watch Repairing (Horology)

M. Marine Trades*Metal Working Trades*

1. Blacksmithing and Forging
2. Machine Tool Operation (Machine Operators, Machinists)
3. Tool Making
4. Welding

*Mining Trades**Miscellaneous Trades*

1. Air Conditioning
2. Piano Tuning
3. Refrigeration
4. Sign Painting
5. Surveying
6. Telegraphy
7. Sanitary Inspector

Motor Vehicle Repair Trades

1. Body and Fender Repair
2. Diesel Engine Operation
3. Motor Mechanics

N. Needle Trades**P. Pre-Matriculation***Personal Service Trades*

1. Barbering
2. Hairdressing
3. Merchandising and Salesmanship
4. Photography
5. Shoe Making and Repairing

*Printing Trades***W. Women's Occupational Trades**

1. Dressmaking and Designing
2. Home Making
3. Millinery
4. Nurses (Practical)

During August, a Cooking and Bakery School was opened at Vancouver. The Advisory Committee to this School has accepted the Course of Study from the Edison School, Seattle, Washington. Only a few amendments to this Course have been necessary to make it applicable to the requirements in the C.V.T. School.

Watch Repair classes opened at Nova Scotia Technical School, Halifax and M.T.R.I., Winnipeg. Delay in organizing this training has been caused by inability to secure the special type equipment necessary and, also, competent instructors.

Designated Building Trades Centre was opened at Sherbrooke. This new School will absorb a number of those previously reported as "Awaiting Training". Instruction is being given in Carpentry, Bricklaying and Painting.

North Sydney opened a new Barber School.

In addition to the training of discharged members of the Armed Services in vocational skills and pre-matriculation, the Training Branch is responsible for:

1. Apprenticeship Training
2. Training of Workers released from Employment
3. Training of Foremen and Supervisors
4. Youth Training and Student Aid
5. Financial Assistance by the Federal Government, through the Training Branch of the Department of Labour, to the Provincial Vocational Schools.

Comments on the Training in these projects will be submitted in a subsequent issue of the *LABOUR GAZETTE* following the Conference of the C.V.T. Advisory Committee, which will be held in the Senate Railway Committee Room, at Ottawa, commencing October 21. The C.V.T. Regional Directors will attend the Advisory Council Meeting, and after its adjournment a short Joint Conference of the Regional Directors and Directors of Apprenticeship will be held.

Although provision is made for training in approximately 100 trades, the "in training" survey shows that most of the enrolment was being done in the designated trades in Construction; Motor Mechanics; Horology; Restaurant Trades; Graphic Arts; Photography; Radio and Electronics; and Hairdressing and Barbering. While 70 C.V.T. Schools and 40 Provincial and Municipal Schools were engaged in training war veterans, there was a waiting list of 3,500 on August 31. It is noteworthy, however, that this backlog has decreased by approximately 5,500 since March 1946. Motor Mechanics, Barbering and Hairdressing, Horology, Graphic Arts, Hotel Restaurant Trades, Electronics and Photography, make up a total of over 1,400 alone.

Unemployment Insurance

Coverage Regulations Modified to Conform with Amended Act Benefit Extended to Seamen—Certain Officers of Corporations Excluded

UNEMPLOYMENT insurance coverage has been extended to employment in transportation by water as a result of amendments to the Unemployment Insurance Act passed at the last session of Parliament. The extension became effective on October 1, 1946.

Several important amendments were made to the Unemployment Insurance Act, and the Regulations issued under this Act by the Unemployment Insurance Commission have also been amended. Not only has provision been made for extension of coverage, but certain additional employments have been excepted.

Changes have been made in the regulations respecting payment of benefit, notably one which provides that in inland navigation, which has been declared a seasonal occupation, benefit shall be payable only during periods of unemployment occurring in the active season of operations.

The main changes in the Unemployment Insurance Act and Regulations, applicable to coverage and benefit and effective October 1, are dealt with below:—

A. Extension of Coverage

1. *Seamen.*—Until October 1, 1946, employment in transportation by water was excluded from the coverage of the Act. This exclusion has now been removed and all employment in Canadian vessels engaged in inland navigation or deep-sea navigation is insured. Certain vessels other than Canadian vessels are also subject to the Act. The following is a description of the various types of vessels in which employment is now insurable:

- (a) Vessels of Canadian registry or licence, except those which have been chartered by demise to persons resident outside of Canada and which are regularly employed in voyages from a port outside of Canada.
- (b) Vessels registered or licensed in other countries which have been chartered by demise to a person resident in Canada and which are regularly employed in voyages from a port in Canada.
- (c) Any vessel of foreign registry or licence over which jurisdiction has been ceded to Canada in matters relating to unemployment insurance by agreement between Canada and the country in which such vessel is registered or licensed.

In all vessels subject to the Act, persons resident or domiciled in Canada are insured. Non-Canadians employed in such vessels are exempted. That is to say, they are not insured persons and they do not pay any contributions to the Unemployment Insurance fund. However, the employer is required to pay a contribution in respect of each such person at a flat weekly rate of 24 cents. One exception is made to this, namely, in the case of persons resident in the United States. That country has a reciprocal agreement with Canada for the taking and payment of claims for unemployment insurance benefit. Therefore, any United States resident employed in a Canadian vessel will be insured, since he will be able, if unemployed, to file a claim for benefit through a Local Office in the United States.

Since some vessels of Canadian registry are regularly employed in voyages from a port outside of Canada and their crews are wholly or mainly domiciled or resident outside of Canada, provision is made whereby the Commission may by special order in the case of any such vessel declare that the provisions of the Act will not apply.

The effect of the legislation is to insure crews of Canadian vessels operating out of Canadian ports and employing Canadian residents as crews, but to exclude non-Canadian residents except where these are persons whose home country has entered into a reciprocal agreement with Canada for taking and payment of claims.

2. *Election to Continue as an Insured Person.*—Previous to October 1, 1946, the Act provided that any person in respect of whom contributions had been made as an insured person for not less than 260 weeks might elect to continue as an insured person even though his earnings had increased to a point where his rate was in excess of the insurable limit of \$2,400 a year. This provision has now been amended so as to reduce the number of weekly contributions required from 260 to 200. These contributions must have been made within the period of five years immediately prior to the date on which the employment became excepted by reason of the rate of earnings. In order to exercise his right the employee

must make his election within six months after the employment becomes so excepted. In this way it will be possible for a considerable number of employees to benefit from the protection of unemployment insurance who would otherwise be excluded.

B. Employments Excluded from Coverage

1. *Certain Shareholders and Officers of Corporations.*—A further paragraph has been added to the excepted employments listed in Part II of the First Schedule to the Act. This paragraph excludes any person employed by a corporation (limited liability company) who is either (i) the registered owner of more than 50 per cent of the voting stock (whether or not he is an officer of the company), or (ii) a director holding a position as an officer of the company.

provided that

(a) he is the bona fide registered owner of more than the mere minimum number of shares necessary to qualify him as a director, and that

(b) he actually performs the managerial duties of an officer of the company. For this purpose "officer" means the president, vice-president, secretary, treasurer, secretary-treasurer, chairman of the executive committee, general manager or managing director.

2. *Weekly Rate Employees Excluded if Earning \$60 or over.*—A new regulation effective October 1, 1946, reads as follows:

"Every person employed in insurable employment, whose rate of remuneration is weekly and whose earnings thereunder amount in value to \$3,120 or more a year, shall, in respect of such employment, be included among the classes of persons employed in excepted employment."

In other words any employee paid at a weekly rate of \$60 or more and whose total earnings amount to \$3,120 or more a year becomes non-insurable. This applies only to employees on weekly rates. It does not apply to employees on hourly, daily or piece rates. Such employees remain insurable regardless of the total amount of earnings. For employees on monthly rates the insurable limit of \$2,400 a year remains unchanged.

C. Benefit Provisions

1. *Seasonal Regulations.*—Provision has always existed in the Unemployment Insurance Act to apply certain seasonal restrictions to the payment of benefit where it was found that this was necessary for the protection of the fund. The object was to see that where employees are employed in occupations which

are seasonal and which have a definite shut-down during a portion of the year, benefit should be payable only during periods of unemployment occurring during the active season of operations. In other words, it was the object to avoid insuring against a certainty, which would be the result of paying benefit to persons whose employment was known to terminate at a certain date every year and who had no real desire to work during the off-season.

This provision had not been invoked prior to October 1, 1946. With the extension of coverage to employment in inland navigation, however, the application of seasonal regulations to the payment of benefit became necessary, since there is a regular seasonal shut-down in inland navigation in most parts of Canada for a period of between three and four months. Accordingly the following Regulation, which is Section 12 of the Unemployment Insurance Benefit Regulations, 1946, has been passed:

12. (1) The Commission hereby declares that transportation by water on any of the inland waters of Canada, as defined in the Canada Shipping Act, 1934, is a seasonal industry.

(2) Notwithstanding the provisions of the Unemployment Insurance Act 1940, as amended, an insured person who has been employed in the industry described in subsection one of this section and who is unemployed and fulfils all the other conditions of entitlement to benefit under the Act, shall not be entitled to receive benefit in respect of periods of unemployment occurring during the period commencing January first and ending March thirty-first in any year, (hereinafter referred to as the off-season), unless

(a) of the contributions paid in respect of him under the Act, for the forty-eight days of insurable employment immediately prior to the day on which the benefit commences, not less than twelve were made in respect of employment in an industry which is not seasonal; or

(b) contributions have been paid in respect of him under the Act for not less than four hundred and twenty days during the two years immediately preceding the day on which the benefit year commences; or

(c) contributions have been paid in respect of him under the Act for not less than forty days during the period comprising the two off-seasons immediately prior to the day on which the benefit year commences.

2. *Supplementary Earnings.*—No other changes have been made in the essential

features regarding rates of benefit, eligibility or reasons for disqualifications. However, by an amendment effective October 1, 1946, an unemployed person who is in receipt of benefit

is permitted to earn up to \$1.50 a day in supplementary earnings without becoming disqualified. Previously, the limit permitted was \$1.00 a day.

Statistical Report on Operation of Unemployment Insurance, August, 1946

IT is reported by the Dominion Bureau of Statistics that during August, 25,115 claims for Unemployment Insurance benefit were filed in local offices of the Unemployment Insurance Commission across Canada. This is a further decline in the monthly claims registered compared with preceding months and reflects a continued decrease in the number of cases of recorded unemployment occurring within a period. Total claims filed numbered 27,576 in July and 20,557 during August of last year.

There were 73,138 beneficiaries during August who were paid a total of \$2,861,278 for 1,448,399 compensated unemployed days. During July, 83,838 beneficiaries were paid \$3,304,896 for 1,670,652 compensated days, while during August last year 19,521 beneficiaries were paid \$685,571 for 358,360 compensated days.

The average duration of the unemployment compensated was, then, 19.8 days in August, 19.9 days in July and 18.4 days in August, 1945. The average amount of benefit paid per beneficiary was \$39.12 in August, \$39.42 in July and \$35.12 in August last year. The average amount of benefit paid per compensated day of unemployment was \$1.98 in August, \$1.98 in July and \$1.91 in August, 1945.

Table 1 shows the number of employers and insured persons registered with the Unemployment Insurance Commission across Canada at August 31, 1946. Tables 2, 3, 4 and 5 give data concerning the number of claims for unemployment insurance benefit and their disposal, including the number of persons receiving benefit, the number of days benefit was paid and the amount of benefit paid, by provinces, during August. Table 8 summarizes the growth of the unemployment insurance fund from 1941 to the end of August, 1946. Tables 6 and

7, designed to show active claimants for benefit by occupations and by age groups will not appear in this issue.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at August 31, 1946, 2,679,951 employees were issued with Insurance Books and had made contributions to the Fund at one time or another since April 1, 1946—an increase of 119,743 since July 31, 1946.

As at August 31, 1946, 171,116 employers were registered as having insurable employees, an increase of 2,991 since July 31, 1946.

Unemployment Insurance Fund

Employer-employee contributions for August amounting to \$6,158,315.63 were the highest for any August to date, and were 15 per cent higher than the corresponding figure for August last year. This increase is particularly significant in view of the fact that during the month many contribution days were lost due to strikes.

Benefit payments for August amounting to \$2,858,005.66 showed a decrease for the third consecutive month, although still higher than the figure of \$684,878.97 for the corresponding month last year.

The fact that contributions this year are at a higher level than last year in spite of greater benefit payments, would seem to indicate that the total labour force of the Dominion has increased during the past year, this increase being due no doubt to the return of veterans to civilian life.

The increase to the Fund during August was \$5,119,778.15.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the LABOUR GAZETTE and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU.-B 62

(Jan. 21, 1946)

The claimant, who had separated from his employment, made an application for benefit. Labour Day and Thanksgiving Day were among the days on which he was unemployed, but the Insurance Officers ruled that they were "holidays" within the meaning of Section 33(c) of the Unemployment Insurance Act, 1940, and were therefore non-compensable days. The Court of Referees sustained the Insurance Officers ruling—HELD: These two days are compensable, as Section 33(c) of the Act applies only to claimants who are still employed and not to claimants who have actually separated from their employment.

The material facts of the case are as follows:

The claimant, a married man, aged 55 years, was employed by a government department from May 3, 1940 until June 30, 1945, when he was laid off due to lack of work. He applied for benefit on July 4, 1945 and the application was allowed. He signed the Unemployment Register thereafter but the Insurance Officer decided that benefit be not paid for Labour Day (September 3, 1945) and Thanksgiving Day (October 8, 1945), on the ground that they were non-compensable days by reason of paragraph (c) of Section 33 of the Act.

From this decision the claimant appealed to the Court of Referees, which unanimously sustained the decision of the Insurance Officer, but the Chairman granted the claimant leave

to appeal to the Umpire in order to obtain a final interpretation of the Act in view of the importance of the question involved.

DECISION

The Umpire's decision was that the claim should be allowed and gave as his reasons:

The Court referred, in its decision, to Order in Council P.C. 4671 dated January 2, 1943, which determines the wartime statutory holidays for the Civil Service and wartime holidays to be observed by employers and employees generally.

The question before me therefore is whether in view of the provisions of Section 33(c) of the Act, the claimant shall not be deemed to be unemployed on Labour Day and Thanksgiving Day.

Paragraph (c) of Section 33 of the Act reads as follows:

An insured person shall not be deemed to be unemployed—

- (c) on any day which is recognized as a holiday for his grade or class or shift in the occupation or at the factory, workshop or other premises at which he is employed unless otherwise prescribed;

It is my opinion that the words "at which he is employed" in Section 33(c) clearly indicate that reference is made to holidays at a factory where a claimant is actually employed. Their effect is to prevent claimants who are still employed at a factory from obtaining benefit on days which are holidays at that factory.

If this paragraph were to be interpreted otherwise it would have the effect of depriving a claimant forever of benefit on any day which was recognized as a holiday at a factory where he had worked, although he has completely separated from that factory.

A close study of the text of the whole of Section 33 shows quite clearly that whereas paragraphs (a) and (b) deal with periods where the claimant's employment has *terminated*, paragraphs (c) and (d) deal with periods during which the claimant *is* employed. The words used in paragraph (c) are clear and unambiguous and I do not see how they can possibly be extended to cover also the case of a claimant who has actually separated from his employment.

It may be contended from the very last words of paragraph (c): "unless otherwise prescribed", that the Commission has the right to prescribe that certain holidays are applicable to all claimants, whether or not they have

completely separated from their last employment. I do not think that this argument can succeed. The only effect that these words could have, in my opinion, would be to authorize the Commission to make Regulations allowing claimants, who have not completely separated from their employment, to claim benefit on days which are recognized as holidays by their employers. In other words, the right to benefit of claimants for a holiday can be enlarged but not restricted.

It is my opinion that paragraph (c) of Section 33 of the Act must be interpreted as applying only to claimants who are actually employed but who are laid off for a day or more and who claim benefit for a holiday. In the present case the claimant was completely separated from his employment and is not affected by any holiday or holidays which occurred at the factory where he was last employed.

The Order in Council referred to by the Court of Referees also does not have any application in this case, as it refers to employers and employees and the same comments made concerning Section 33 (c) of the Act are applicable to the Order in Council.

CU.-B 63

(Jan. 21, 1946)

The claimant, a single woman, was employed as a nurse by a textile company for a period of ten years. The company refused her an increase in salary and she left her employment in order to better her position. The Insurance Officer disqualified her for six weeks under Section 43(c) of the Unemployment Insurance Act, 1940, on the ground that she left her employment voluntarily without just cause. The Court of Referees reversed the decision of the Insurance Officer—HELD: The claimant should be disqualified for six weeks, as refusal of an increase, alone, does not constitute just cause for leaving her employment voluntarily; she should have obtained the assurance of another position before terminating her present employment.

The material facts of the case are as follows:

The claimant, a single woman, was employed as a nurse by a textile company at a rate of remuneration of \$22.00 per week from January 7, 1935 until July 14, 1945, when she left her employment voluntarily in order to better her position.

It appears from the record that after she left her employment her former employer placed an order with the local office of the Commission for a nurse, at a rate of remuneration of \$25.00 per week, although she had been refused any raise in salary.

The Insurance Officer disallowed the claim and disqualified the claimant for six weeks under the provisions of Section 43(c) of the Act on the grounds that she left her employment voluntarily without just cause, being of the opinion that she should have obtained the assurance of some other employment before leaving.

The claimant appealed to the Court of Referees which unanimously reversed the decision of the Insurance Officer as, in its opinion, she was not receiving a salary compatible with her qualifications.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons:

It would appear that the decision of the Court of Referees was influenced by the fact that the employer had refused an increase in salary to the claimant and then immediately after she left offered a higher salary for another nurse.

The Act provides that a claimant shall be disqualified if he voluntarily leaves his employment without just cause. The question to decide is, therefore, whether the claimant had just cause for leaving her employment voluntarily.

She had been employed for ten years in the same employment at a rate of remuneration which was the prevailing rate in the district and in my opinion refusal of an increase, alone, does not constitute just cause for leaving. The claimant's desire to better her position was understandable but, in the absence of any reason which would compel her to leave her employment, she should have obtained assurance of another position before terminating her present employment.

There appears to be nothing which would have prevented the claimant from making inquiries from various nurses' associations and registries in order to obtain suitable employment as a nurse. She possessed the requisite qualifications and if, for example, she had obtained the assurance of another situation and left her employment and if that situation had not materialized, it would be probable, in that case, that the claimant would have qualified for the receipt of benefit. But in the present instance the claimant chose to leave her employment without taking these most elementary precautions against the event of her unemployment. I therefore find that the claimant voluntarily left her employment without just cause and that she should be disqualified for a period of six weeks from the date on which my decision is communicated to her.

Employment, Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment in Canada.

Employment and payrolls at the beginning of August, 1946.—Industrial employment generally in the Dominion showed an important recession at the beginning of August, which was caused in the main, by the existence of wide-spread industrial disputes, according to the monthly report on the employment situation and payrolls, issued by the Dominion Bureau of Statistics.

The 16,000 establishments that participated in the survey reported the release of 10,243 workers, reducing their staffs by 0.6 per cent to 1,765,105 at the beginning of August. The curtailment occurred largely in manufacturing, but there was also a falling off in mining and logging, and trade showed seasonal declines. There was, however, considerable improvement reported in transportation, communications, services, and construction and maintenance.

Based on the 1926 average as 100, the index of employment at August 1 was 172.6 as compared with 173.6 at July 1, 1946, 175.0 at August 1, 1945, and 184.3 at August 1, 1944.

Weekly salaries and wages distributed in the eight leading industries at August 1, aggregated \$57,620,485, giving a weekly average of \$32.64 per employee. At July 1, the sum of \$57,257,646 had been disbursed by these employers, a per capita figure of \$32.25. The average at August 1, 1945, was \$32.09.

Employment conditions as reported by Employment Offices, September, 1946.—Employment prospects brightened considerably during September, despite prolonged strike activity and subsequent shortage of materials. The increase in employment opportunities was confined largely to men, reflecting the heavy labour needs of the logging industry. Labour demand, exclusive of agriculture, totalled 135,603 at September 19, representing an increase of 23,138 during the past four weeks.

Absorption of unplaced applicants into industry slackened during September. The Ontario and Maritime Regions which have been

seriously affected by the steel strike reported an increase in persons seeking employment. Lay-offs, necessitated by the throttling of vital supplies, resulted in a substantial influx of applicants. Unplaced applicants in non-agricultural occupations totalled 141,975 at September 19 as compared with 145,541 four weeks earlier.

Unemployment insurance statistics, August, 1946.—During August 25,115 claims for unemployment insurance benefit were filed in local offices across Canada, as compared with 27,576 in July. In August, 1945, there were 20,557 claims filed. There were 73,138 beneficiaries during August, 1946, who were paid a total of \$2,861,278 for 1,448,399 compensated days. During July, 83,838 beneficiaries were paid, \$3,304,896 for 1,670,652 days; while during August, 1945, 19,521 beneficiaries were paid \$685,571 for 358,360 compensated days.

Average weekly hours and earnings, August 1, 1946.—The average hours worked per week by hourly-rated wage earners, employed in manufacturing was 43 in the week of August 1, as compared with 42.4 in the week of July 1 and 42 in the week of June 1, 1946. There was no general change in the average hourly earnings in manufacturing. Standing at 70 cents for both the week of August 1 and the week of July 1, 1946, it exceeded by half a cent the average at August 1, 1945.

Applications for employment, vacancies and placements, August, 1946.—Reports received from the National Employment Service Offices of the Unemployment Insurance Commission during the four weeks August 2, to August 29, 1946, showed declines in the average number of placements made daily both when compared with the previous five weeks and with the four-week period August 3 to August 30, 1945. Under the first comparison agriculture and trade showed gains but all other industrial groups recorded losses the most noteworthy being in services and construction. In comparison with the four weeks ending August 30, last year, all industrial divisions registered declines the most pro-

nounced being a substantial loss in manufacturing, and moderate decreases in public utilities operation, construction, forestry and logging, trade and services. During the period under review there were 162,487 vacancies reported, 145,482 applications for employment and 70,193 placements effected in regular and casual employment.

Unemployment in trade unions, June 30, 1946—Trade union unemployment for the

quarter ending June 30, 1946, recorded a decrease of approximately 1.4 per cent over the first quarter of the year. The percentage of unemployed union members, within a unit of 414,150 members of 2,238 locals, was 0.5 in the period under review.

The improvement resulted from better conditions for employment in manufacturing, transportation, building and construction, services, and wholesale and retail trade.

Employment and Payrolls at the Beginning of August, 1946

INDUSTRIAL employment generally in the Dominion showed an important recession at the beginning of August which was caused, in the main, by the existence of wide-spread industrial disputes. A general contraction had also been indicated at August 1 of 1945, due to the curtailment in war work. In the experience of the years since 1920, the movement at mid-summer has usually, though not invariably, been upward; had it not been for the losses in employment directly resulting from the strikes, the trend at the date under review would have been decidedly favourable. The 16,000 establishments participating in the Dominion Bureau of Statistics' latest survey of employment and payrolls reported the release of 10,243 workers, reducing their staffs by 0.6 per cent to 1,765,105 at the beginning of August. The curtailment

in operations took place very largely in manufacturing; also chiefly as a result of strikes, there was a falling-off in mining, while employment in logging and trade showed seasonal declines. On the other hand, considerable improvement was reported in transportation, communications, services and construction and maintenance. The most noteworthy expansion was in the last-named, in which over 8,300 persons were added to the staffs of the co-operating employers. This advance, though important, represented a percentage gain which was not equal to that indicated as normal in the experience of the last 25 years.

Within the manufacturing division, there were considerable increases in the food and lumber groups, but strikes in the iron and steel, non-ferrous metal, electrical apparatus, rubber and

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

other industries resulted in substantial losses in employment.

Based on the 1926 average as 100, the index of employment at August 1 was 172.6, as compared with 173.6 at July 1, 1946, 175.0 at August 1, 1945, and 184.3 at August 1, 1944; in 1943, the August 1 figure was 185.9, the all-time maximum for that date in the years since 1920. In 1939, the index at the first of August had stood at 117.5. Since a general recession at midsummer is contra-seasonal, the index after adjustment for seasonal variation, also showed a decline, falling from 170.3 at July 1, to 167.9 at the date under review.

Payrolls

The amounts expended in salaries and wages by the establishments furnishing statistics in the eight leading industries at August 1 aggregated \$57,620,485, giving an average of \$32.64 per employee. At July 1, the sum of \$57,257,646 had been disbursed by these employers, a per capita figure of \$32.25. The average at August 1, 1945, had been \$32.09, while the earnings at August 1 in 1944, 1943 and 1942 had averaged \$31.63, \$31.06 and \$28.62, respectively. In the last 12 months, there has been a reduction of 0.1 per cent in the general index of payrolls,

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

and of 1.4 per cent in the index of employment, but the average weekly earnings of the persons in recorded employment have risen by 1.7 per cent.

If the statistics for financial institutions are added to those given above for the eight leading industries, the latest survey indicated a total of 1,840,172 persons in recorded employment, as compared with 1,850,180 at the beginning of July. The aggregate weekly payrolls in the nine leading industries, (namely, manufacturing, logging, mining, communications, transportation, construction and maintenance, services, trade and finance), amounted to \$60,221,380, as compared with \$59,851,649 in the preceding period of observation. The average earnings rose from \$32.35 at July 1 to \$32.73 at the date under review, as compared with \$32.14 at August 1, 1945, and \$31.66 at August 1, 1944.

Table 11 summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons as at July 1, 1946, and August 1, 1945. Table 1 contains a monthly record for

the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1942. The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926 = 100, to June 1, 1941, as 100.

Table 1 indicates that since June 1, 1941, when the current record of payrolls first became available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 13 per cent, while the aggregate weekly payrolls of those workers are higher by 42.9 per cent. Including finance, the gain in employment from June 1, 1941, to August 1, 1946, amounted to 13.5 per cent, and that in payrolls, to 43.2 per cent. The explanation given in earlier reports for the much greater rise in the salaries and wages than in the numbers employed may again be stated: (1) the concentration of workers still existing in the heavy manufacturing industries, in spite of the declines which

¹The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

preceded and followed the cessation of hostilities, and also in spite of the existing industrial disputes; in this category, the rates of pay are above the average and there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944, (3) the progressive up-grading of

employees as they gained experience in their work and (4) the payment of higher wage-rates in a great many cases.

It is interesting to note that, despite the falling-off in the production of munitions since the cessation of hostilities, and the serious losses due to the many important strikes recently in effect, employment in manufacturing showed an increase of 9½ per cent at August 1, 1946, as compared with June 1, 1941, since when the reported payrolls have risen by 37·3

TABLE V.—THE SEX DISTRIBUTION OF WORKERS IN RECORDED EMPLOYMENT IN THE PROVINCES, THE LEADING INDUSTRIAL CITIES, AND THE NINE MAJOR INDUSTRIAL GROUPS, AS AT AUGUST 1, JULY 1, JUNE 1, AND APRIL 1, 1946, WITH COMPARATIVE FIGURES FOR APRIL 1, 1945

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. ² The August data are subject to revision.

per cent. In the non-manufacturing industries taken as a unit, the advance in employment since the commencement of the record of payrolls amounted at August 1 to 17.6 per cent, and that in the aggregate weekly salaries and wages, to 50.3 per cent. The higher proportions of increase in the non-manufacturing classes generally, which reflect a situation differing from that existing during the war, result partly from curtailment in the production of munitions, and more recently, from losses in manufacturing due to industrial disputes, as well as to a considerable revival of activity in the non-manufacturing industries.

Another fact worthy of note is that in the last 12 months, there has been a decline of 9.8 per cent in employment and of 10.2 per cent in the payrolls disbursed by leading manufacturers, while the reported staffs of employers in the various non-manufacturing industries have risen by 11.4 per cent, accompanied by a gain of 16 per cent in the salaries and wages. The disparity is of course due in large part to the strikes.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of paramount importance.

Sex Distribution of Persons in Recorded Employment

Employment for workers of both sexes was seriously affected by the industrial disputes in effect at the beginning of August, when establishments in the eight leading industries reported a staff of 1,378,979 men and 386,126 women, a total of 1,765,105, there being 781 of the former sex and 219 of the latter in each

1,000 persons in recorded employment. The number of male employees declined by 4,560, or 0.3 per cent, as compared with July 1, while there was a loss of 5,683, or 1.5 per cent, in the reported women workers in the same comparison. The ratios a month ago were 779 men and 221 women per 1,000 employees.

In the nine leading industries, a reduction of 10,008 persons was indicated as compared with July 1; of this number, 4,348 were men and 5,660 were women, the loss among the former amounting to 0.3 per cent, and that among the latter, to 1.3 per cent. The proportion of women in this group of industries was 230 per 1,000, as compared with 231 at July 1. This ratio, like that in the eight major industrial groups, was the smallest indicated in any of the enquiries into sex distribution made since 1942. The proportion of women per 1,000 persons in recorded employment had reached its highest point at October 1, 1944, when the number of women reported in the eight industries was 261 per 1,000, and in the nine major industrial divisions, 271 per 1,000. The completion or the curtailment of war work is obviously a factor of very great importance in the declines recently indicated in the numbers and the proportions of women workers, but the seasonal element and the existence of widespread industrial disputes at the date under review also substantially affected the situation. The last two factors lower the value of comparisons of the latest data with those obtained in the earlier surveys into sex distribution, made as at October 1 in 1942-45 and at April 1 in 1944, 1945 and 1946.

There were important seasonal increases in the employment of men in communications, transportation and construction; the trend in logging was seasonally downward, while strikes in mining and manufacturing considerably reduced the number of male employees therein. The latter group of industries reported fewer female employees on account of labour-management disputes, while curtailment was also shown in the number of women reported in trade and certain other divisions. As already indicated the losses in some cases were seasonal in character.

Report on Employment Conditions, September, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by region.

THE employment situation during September continued to be clouded by work stoppages in basic manufacturing industries. The subsequent shortage of supplies retarded the normal employment expansion in practically all industries while the more closely related industries were forced to lay-off substantial numbers of workers. Expansion of employment opportunities in seasonal industries, however, progressed rapidly during September, due in a large part to the heavy demands of the food processing and logging industries. The demand for skilled and semi-skilled loggers increased by over 15,000 during the four weeks, August 25 to September 19. Placements in logging camps, however, will not gain momentum until the release of agricultural workers at the end of the harvest season.

Unfilled vacancies,¹ in occupations other than agriculture, totalled 135,603 at September 19 as compared with 112,465, four weeks earlier. The increase, although common to all regions was particularly pronounced in Quebec. Unplaced applicants,² on the other hand, showed little change over the period, and at the September date totalled 141,975. The dropping off of applicants in the Prairie and Pacific Regions was offset by a noticeable increase in applicants in the Ontario Region.

¹Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

²Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

Table I shows labour demand and supply by main occupational group and by sex as at September 19, 1946. Table II presents a monthly comparison of total labour demand and supply. Table III shows unfilled vacancies classified by main industry group and by sex, as at September 19, 1946, with absolute and percentage changes in total demand during the last month.

Clerical Workers:—The withdrawal of the temporarily employed students from the labour market resulted in an influx of orders

for clerical help during August. As these orders were met by greatly augmented placement activity in this field, vacancies on file dropped markedly during September. Employment offices report that prospects for youth placements in clerical positions, particularly for male applicants, are not encouraging. A preliminary knowledge of typing and bookkeeping is essential in many cases before employers will accept persons to be trained in clerical work. The low salaries offered continue to be a deterrent factor in placement activity. Lack of competent applicants to fill responsible positions remains the most serious complaint of employers. Since efficiency in stenographic and secretarial positions requires several years experience, many of the suitably qualified applicants now are married and can accept only part-time work. Encouragement of refresher courses, and providing of diversified experience for new entrants in the clerical field, must be emphasized if the shortage of qualified help is to be met. Vacancies for clerical workers totalled 7,133 at September 19 while available supply in this occupational group, numbered 19,022. The shortage of female stenographers and typists at that date was 2,668, with applicants registering for this type of work approximately numerically equal to the demand.

Sales Workers:—Industrial activity in retail establishments increased sharply during September as a result of school opening and additional demands during the harvest season. Adequate staff was available in most areas for the temporary expansion of employment. Employment offices, however, encounter serious difficulty in supplying suitable applicants for permanent staffs. Many sales clerks who are sufficiently experienced have either withdrawn from the labour market or are presently employed. The low wage scale of available positions generally deters placement activity among the limited competent help available. There continues to be a demand for real estate and insurance agents on a commission basis, but this type of work meets with little response. Wholesale firms report an active season but expansion in employment has been negligible. Vacancies for sales clerks totalled 4,192 at September 19, while available supply numbered 9,432.

Service Workers:—The shortage of service workers now is reaching its most acute period. The fall conventions and activities have resulted in urgent requests for additional help in hotels. At the same time, restaurants are short-handed as a result of the withdrawal of

students temporarily employed during the summer months. In addition, householders returning to the city following their summer vacations are again attempting to secure domestic help. These pressing demands will probably continue without relief so long as alternative employment opportunities for women remain high. There has been a fairly heavy demand for clerical and sales workers during the past few months. A lull in seasonal activity may release some of the presently enlarged staffs and thus augment the sources of labour supply for service work. On the other hand, male service workers, largely representing elderly and handicapped persons, remain in surplus supply. At September 19, there were 12,528 female service workers required while available supply numbered 4,365. Approximately one-third of the vacancies were for domestic service work.

Skilled and Semi-skilled Workers

Employment opportunities in skilled and semi-skilled occupations expanded appreciably

during September, as logging operators increased their orders to exceed even the high demands at the comparative date in 1945. In occupations other than logging, strikes in the heavy steel plants and the chemical plant manufacturing soda ash adversely affected employment opportunities. The sharp reduction evident during the past few months in the number of unplaced tradesmen levelled off during September. With placement activity greatly impaired by labour unrest, and lay-offs a steadily recurrent feature, absorption of workers into industry has been retarded. There was, however, a considerable expansion of employment in food processing and textile plants. Vacancies in skilled and semi-skilled occupations totalled 63,321 (53,317 male and 10,004 female) at September 19. Unplaced applicants, numbering 40,747, fell far below the number required. When loggers are excluded, however, unplaced applicants are well in excess of demand. The labour situation for female workers remained relatively unchanged, with approximately two positions available for every applicant registered.

Textile Workers:—The slump in employment expansion evident in textile firms during August was offset somewhat in September. The flow of vacancies into employment offices increased during the period, while the number of unplaced applicants declined by almost 30 per cent in the four weeks ending September 19. With the settlement of major strike issues, and the steady supply of raw materials now available, expansion in the textile industry will be handicapped only by shortage of help.

The employment offices continue to encounter serious difficulty in attracting women to textile trades. Improved wage rates and working conditions due to settlement of strikes should ease the situation considerably. There were 8,469 textile workers required at September 19, while unplaced applicants numbered 2,825. The shortage is most critical for female workers, with demand for sewing machine operators alone totalling 4,626. As in the service trades, few women are interested in factory and

manual work, while alternative opportunities are available in "white-collar" jobs.

Lumber and Woods Products Workers:—Employment forecasts indicate that employers are endeavouring to double the employment record of 1945. Vacancies on file at September 19, exceed requirements at the comparative dates of both 1944 and 1945. Increased employment goals will undoubtedly aggravate the shortage of skilled help. Although the movement of workers to the woods has commenced in some areas, the bulk of migration will take place at the end of the harvest season. The much improved financial position of agricultural workers during the past few years and the higher wages offered by United States logging camps increase the difficulty of obtaining the number of loggers required at employment offices. The generally improved wage scale evident this season, however, may induce applicants to accept woods labour. At September 19, there were 36,091 lumber and woods products workers required of which over 90 per cent were loggers. Applicants registered as loggers at that date numbered only 697.

Miners:—Labour unrest is evident throughout the mining industry. As a result, labour turnover continues high, with workers leaving to accept employment in the agricultural and logging industries. Opening of employment opportunities to unplaced workers in other localities continues to be hampered by the acute shortage of housing accommodation. In addition, shortage of skilled miners limits the extent to which unskilled labour can be effectively utilized. Some mining companies report that expansion of employment has been prevented by lack of mining machinery. There were 1,729 skilled and semi-skilled miners required at September 19 while unplaced applicants registered in this occupational group totalled 515. The number of coal miners required accounted for 60 per cent of the demand.

Construction Workers:—Vital supplies for practically all construction activities have been gravely affected by strike action. Shortages of nails, pipe-lines, and cement have hindered construction at its most critical stage. Lay-offs have been necessary in some areas, while other centres report a continual rotating of workers between unfinished projects, pending the receipt of supplies. The acute supply situation, coupled with the advent of colder weather have necessitated the release of unskilled help in some districts. Construction tradesmen, however, continue in demand throughout the country; in Ontario it is felt that the demand will persist into the winter months. Demand for bricklayers, plasterers,

and cement finishers remains urgent but suitable applicants are practically non-existent. Little change was evident in the labour demand and supply situation during September. There were 5,813 construction workers required at September 19, while applicants in this group numbered 4,224. Carpenters accounted for almost 60 per cent of the demand.

Miscellaneous Workers:—The effects of the current strikes are particularly noticeable in the vacancies available for metalworkers. Available employment opportunities dropped 26 per cent in the four-week period ending September 19. On the other hand, the available supply of metalworkers continued to decline. Labour shortages persist in foundries although the supply of applicants registering for this work has been increasing. At September 19, vacancies in metalworking trades totalled 1,942 while unplaced applicants at that time numbered 9,095. Demand for qualified mechanics throughout the Dominion remains unsatisfied, although the shortage has been relieved by graduates from Canadian Vocational Training schools. At September 19, there were 1,276 auto mechanics and repairmen required with available supply numbering 1,122 at that date. The labour shortages in laundry and dry cleaning establishments have been intensified by the pre-winter rush and the withdrawal of temporarily employed students. There were 734 finishers, spotters and dry cleaners required at September 19, with available supply meeting only one-third of the demand.

Unskilled Workers:—A sharp upturn in available employment opportunities for unskilled labour took place during September, although no reduction was evident in the number of unplaced applicants registered at employment offices. The labour needs of food processing and transportation industries are particularly marked this season. Labour shortages in food processing plants have been greatly eased by the temporary employment of workers on strike and the substitution of male labour in jobs previously held by women. When settlements of labour disputes have been reached, and those on strike rehired, serious shortages in food manufacturing plants may again appear. A considerable expansion of employment in meat packing plants should occur shortly. Activity in these plants at the present time has been adversely affected by the non-delivery strike of agriculturalists in Alberta and Saskatchewan. The overall demand for unskilled construction and mining labour also showed a marked improvement during the month. Available employment opportunities for unskilled labour totalled 43,047 at September 19 as compared with

36,351 four weeks earlier. Unplaced applicants, numbering 54,881 at the September date, showed little overall change in the four-week

period. There was, however, a considerable drop in female unplaced applicants, while male applicants increased somewhat.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from National Employment Service Offices across Canada. The report covers employment conditions during the month ended September 22, 1946

Maritime Region

In the Maritime Region, layoffs through material shortages offset expanding employment in agriculture and the volume of unplaced applicants remained steady. Employment conditions for men are serious, but for women there are more jobs than applicants.

Agriculture:—Grain crops throughout the region have been harvested in good condition and without any labour difficulties. Potato digging is well under way in New Brunswick; the labour supply is plentiful. Transfers of 400 men from Cape Breton, Pictou, and Amherst will meet peak requirements for the potato harvest in Prince Edward Island.

Apple harvesting is progressing well in the Annapolis Valley, with no shortage of labour. About 500 girls have been transferred to this area to work in canning and processing plants or to pick cranberries.

It is estimated that Maritime farmers will request approximately 200 Polish veterans for permanent help.

Logging:—Orders are steady for pulp and pitprop cutters, but unseasonably warm weather has stifled demand for woodsmen in the long lumber industry. When winter operations start, however, experienced woodsmen will be in heavy demand. Operators fear a scarcity of skilled men for the coming season and are planning to begin a high-powered recruiting campaign shortly.

Fishing:—All-out efforts are being made to speed up training of workers for the skilled fish-cutting trades, experienced help being in very scarce supply. Some firms have applied for experienced men from Newfoundland. Fish cutters and filleters are being trained under Canadian Vocational Training, and many plants have started on-the-job training plans to relieve the present shortage.

Coal Mining:—All mines in the Cape Breton area are working steadily. Output is still low, representing about two-thirds of normal production. There are openings for 100 first class miners.

A new colliery has opened in the Inverness area and employment will expand as conditions warrant. The local labour supply will be adequate.

Strip mines in the Minto area are operating at capacity, but shaft mines require 115 licensed coal miners.

Manufacturing:—The steel plant at Sydney is strike-bound and the effects of its blocked production are spreading widely. Employment is falling off rapidly in dependent industries as stock supplies dwindle.

The shortage of bottles as a result of the soda ash strike has reduced output at breweries, soft drink and milk plants.

Planing mills and door factories are very busy, under the pressure of urgent demand for their products. Shipbuilding activity is increasing. Repair work will lead to the rehiring of 100 men in Halifax yards. Apprenticeship training plans will be set up in various Nova Scotia shipyards to provide ships carpenters and joiners for the wooden shipbuilding industry.

Construction:—Building construction is virtually at a standstill because of supply shortages. Some contractors are releasing carpenters and labourers, while others are holding their men on the payroll in expectation of supplies. With increasing demands for housing accommodation by organized bodies, especially veterans, a serious situation is fast developing. The outlook for employment in the construction industry is rather serious unless immediate improvement in the material situation occurs.

Transportation:—Railway ballasting operations are almost finished for this year. The pits have been closed and extra gang labour is being laid off gradually. About 1,500 men will be affected.

There will be 30,000 barrels of apples for the United Kingdom, moved through Halifax this week. The ports of Halifax and Saint John report that shipping is at a very low ebb, with little demand for waterfront labour.

Quebec Region

General labour market conditions improved slightly but industrial employment slumped as a result of strike-bound production in key industries.

Agriculture:—The acute shortage of farm labour formerly anticipated has not materialized. Reports throughout the region indicate

that full crops have been harvested in most areas. Hay, grain, and tobacco crops are completed and the corn crop is now ready for harvest.

Recruiting of harvesters for potato and apple picking in the United States has temporarily absorbed some of the surplus workers in the south-eastern section of the region.

Logging:—Fall cutting has already started. Men are leaving for the woods in increasing numbers. A heavy program is planned for the winter, but the problem will be to find enough woods labour.

Mining:—The mining situation at the present time is still somewhat obscure. Employment of unskilled mining labour is held up by both the lack of key skilled men and housing. Some 2,000 workers and their families could find permanent employment in northern Quebec mining areas and in the Eastern Township industrial area, if suitable housing were available.

Manufacturing:—Prolonged strikes have intensified the already serious shortage of materials and have led to substantial lay-offs. Heavy manufacturing is slack at present—foundries, car shops, shipbuilding, electrical manufacturing, machine shops, are all hard hit by the strike repercussions. Textile production is again under way at Valleyfield now that the dispute is settled. A new \$4 million plant is being built to manufacture a wide variety of asbestos products.

The annual increase in the staff of packing houses is now well under way. Sugar and salt shortages are hampering soft drink production, canning, etc.

Construction:—Despite the many material shortages that are curtailing full construction activity, particularly home building, it is worthy of note that construction tradesmen are not out of work. The whole building expansion is so great that construction tradesmen move back and forth between jobs, as the material becomes available at each project. If materials were available for all projects, there would be a tremendous shortage of tradesmen.

The worst situation now is that brought about by the shortage of steel, and it is expected that the most serious effects will be felt in about two months' time. Lumber is short, not so much because of production bottlenecks, as because of price. Suppliers are holding stocks in expectation of a ceiling change.

Ontario Region

Employment sagged again in the Ontario region as strike-bound industries brought greater supply shortages. Production of steel,

chemicals, rubber, copper wire and glass is still affected by labour unrest.

Agriculture:—Fruit picking and the harvesting of canning crops are in full swing, but labour needs are being met adequately. Canning factories have presented the greatest difficulty. The crops are irregular in ripening because of abnormal changes in the weather, and sudden surges in delivery to the factories have resulted. The consequent irregular demand for extra labour, has been difficult to deal with. Strike-idle workers and prisoners-of-war have relieved this situation somewhat in several areas.

The completion of much of the harvest has reduced the demand for farm help, but there still remains a strong need for year-round workers which is difficult to meet. The interest in Polish veterans is quite strong and daily shows an increase.

Logging:—By mid-October the logging industry will require about 8,000 workers. Prospects of meeting this need are remote. As harvesting tapers off, seasonal farm workers may turn to woods employment.

Mining:—In the Kirkland Lake and Timmins areas, both experienced and inexperienced miners are required. However, it is difficult to recruit men from outside areas because of the housing shortage.

Base metal operations at Sudbury report vacancies for about 800 physically-fit men, as beginners and process labourers.

Manufacturing:—Now in their ninth week, the basic steel strikes at Hamilton and Sault Ste. Marie are yet unsettled and are causing further shutdowns. Grey iron foundries, producing soil pipe, are particularly affected; soil pipe was already a scarce item and in great demand by home builders. Strikes in the automobile parts, rubber products, chemical, basic brass and electrical products industry are also currently disrupting production. At Windsor alone, 4,500 persons are on strike in four plants and an additional 10,450 are suffering temporary lay-offs or are working on short time; another 875 persons have been laid-off indefinitely.

Lack of workers for the textile trade is still a problem. Female textile workers are unobtainable, although materials are in good supply. Demand continues in the furniture industry for cabinet makers, wood machinists and finishers.

Requirements for semi-skilled and unskilled men specify a sturdy type of worker. Employers apparently have raised their standards since the end of the war, hence the excess of light factory workers.

Construction:—Building construction is progressing in considerable volume, despite shortages of material and labour. Finishing carpenters, plumbers, bricklayers, cement finishers, plasterers and labourers are greatly needed, and this condition will probably persist throughout the winter months in spite of weather conditions.

Transportation:—A few of the passenger vessels on the Great Lakes are being tied up for the winter season. There is no great demand for seamen—experienced wheelmen and firemen are the only requirements.

Prairie Region

Currently, total labour demand exceeds supply. Much of the demand is centred in the logging industry, however, and few applicants are interested in such work.

Agriculture:—Harvesting has been completed in the eastern section of the region. Surplus workers are moving westward to Saskatchewan and Alberta where work still remains to be done. The southern Alberta harvest has about three weeks to go, and the territory north of Edmonton perhaps a little longer. About 300 harvesters have been sent from southern and western Saskatchewan to Alberta.

There is a small demand for winter or year-round labour in all provinces and applications for Polish veterans are arriving at nearly all local offices.

Logging:—Operators in northwestern Ontario have steadily been placing additional orders for winter requirements. Already, 8,000 vacancies have been listed but heavy movement of labour to the woods is not expected until harvesting is further advanced.

Plans are afoot to co-ordinate the recruiting activity of employers and N.E.S. The Farm Labour Services will also co-operate in referring off-season farm workers to woods employment.

Fishing:—Fall fishing is well under way in Lake Winnipeg and good catches of pickerel are reported. Filleters and labourers for packing plants are in short supply.

Mining:—Gold mines in the Port Arthur zone are in dire need of physically-fit miners and muckers. About 400 are required according to reports, but it is doubtful whether sufficient housing is available.

Base metal production at the Steep Rock mines is at a record level, in spite of excessive labour turnover. Many experienced workers are required, such as diesel and motor mechanics, riggers, electricians, and husky labourers.

The coal mining industry reports an increasing need for certificated miners, surface and underground labourers. The problem is in replacing workers who have left for harvest jobs. Housing accommodation is very limited in all coal mining areas. At Blairmore, mine operators are consulting with the Central Mortgage and Housing Corporation in an attempt to relieve the housing shortage. Wage negotiations are still under way in the coal industry.

Manufacturing:—General activity is on the upgrade, except where strike action blocks supply lines. The strike involving foundry workers at Calgary has ended and over 100 men will resume work. Heavy industries in Saskatoon and Fort William are operating with skeleton staffs because of steel shortages. The building materials industry is maintaining output, but demand for workers is very urgent because of heavy labour turnover. Drastic glass shortages are holding up sash-and-door production; scarcity of scrap iron and labour turnover are crippling production in the soil pipe industry. The farmers' non-delivery strike has caused substantial lay-offs in the meatpacking industry in Alberta, and to a lesser extent, in Saskatchewan.

Construction:—Material shortages are blocking normal construction progress in many areas, but qualified tradesmen can still find employment. There is a serious scarcity of cement, nails, and other building materials, throughout the region. However, the supply of carpenters, tinsmiths and bricklayers is inadequate to meet demand at Winnipeg, and husky labourers are required in almost all areas.

Transportation:—Track maintenance workers are needed at various points; a particularly heavy demand is reported at Winnipeg. Men returning from harvest work are being referred and it is hoped that the requirements may be completely filled shortly.

Grain shipments at Churchill have stimulated urgent orders in clearance for shovellers; the situation is well in hand.

Pacific Region

The general labour situation in the Pacific region has improved further. Unplaced applicants have declined, although about 60 per cent are still centred in Vancouver alone.

Agriculture:—The farm labour situation is well under control. Weather conditions in the Fraser Valley have been conducive to early completion of the total harvest. Apple pickers are still required in the Okanagan valley but the Farm Labour Service has been able to meet needs in most cases.

The first contingent of Polish veterans will arrive in mid-October. It is hoped that these men will relieve the shortage of dairy workers, and a campaign to interest farmers in them will start soon.

Logging.—The industry presents a serious problem in the provision of suitable labour. Currently the applicants listed are only 12 per cent of the total number required. Turnover is very heavy. Applicants must be single and in excellent physical condition, which limits placements considerably.

Engineers, high riggers, hook tenders, riggers and foremen are in great demand in all areas. Fallers and buckers are also in short supply. Weather conditions have been favourable for logging operations, but the labour shortage is a bottleneck to maximum output.

Experienced sawmill labour is limited. Skilled men—edgers, doggers, setters, re-saw men—required to form skeleton crews for extra shifts, are unobtainable. On-the-job training is difficult to establish in larger mills because of the pressure for maximum production. The New Westminster area, however, reports an adequate supply of sawmill labour, turnover replacements being the only need.

Fishing.—Seasonal salmon fishing is drawing to a close, with canneries running at full capacity. The tapering-off of employment in fish processing plants will release large numbers of men and women within the next few weeks.

Coal Mining.—The coal mining industry continues to lose certified miners to other industries, chiefly logging. Higher wage scales in woods employment and the open-air work are great attractions. The development of intensified short-course apprenticeship training plans is expected soon. Coal output is meanwhile declining gradually as labour drifts away from the industry.

Precious Metals Mining.—Major producers are still idle in the hardrock industry. The current dispute has not affected the placer or dredging operations and these continue in full swing. No shortage of labour is anticipated in this industry until after the strike is settled.

Approximately 2,800 miners are dislocated because of the strike and many now are work-

ing at logging or construction jobs.

If the present price of gold remains steady and the Alaska highway does not deteriorate into a second-class road, there is every possibility that gold quartz mining will develop in the Yukon. Lack of mining machinery in the Whitehorse silver area is holding up expansion.

Base Metal Mining.—Conditions are stable in the industry at present. The strike is still affecting established producers, and no settlement is in sight. Development work is progressing on several projects.

Manufacturing.—Foundry production is returning to normal after the recent wage settlement, and employment in dependent industries is on the upgrade. Many skilled engineers and machinists who were formerly unemployed because of material shortages, have now returned to work. The return of students to school has aggravated the employment situation in canneries. Plywood factories at New Westminster are placing orders for women workers, but shift work and transportation difficulties impede placement.

Activity is rising in the shipbuilding industry, with several major contracts on hand. At Victoria, contracts worth \$4,500,000 have been acquired by the two main yards.

Construction.—Construction progress is patchy because of material bottlenecks and workers drift from one project to another according to the supply situation. Road construction firms are increasing orders for skilled workmen such as bulldozers and cat operators, for out-of-town jobs. The rapidly expanding demand for carpenters, cement finishers and axemen is partly due to the Bridge River Power Project.

Transportation.—The newly-established Merchant Seamen's Section of the Vancouver Employment Service is functioning well, and several hundred persons are registered. Operators have been most cooperative, and union agencies have established a close liaison to preserve seniority rights in signing-on. In Victoria, orders and registrations have been evenly balanced and only a small pool of labour is available.

Applications for Employment; Vacancies and Placements; August, 1946

DURING the four-week period August 2 to August 29, 1946, reports received from the National Employment Service Offices of the Unemployment Insurance Commission showed a decrease of 5.7 per cent in business transacted when compared with the preceding five weeks June 28 to August 1, and a loss

of 38.6 per cent in comparison with the four weeks August 3 to August 30, 1945, this computation being based on the average number of placements recorded daily. Under the first comparison, except for increases in agriculture and trade all industrial divisions recorded losses, the most noteworthy being a moderate

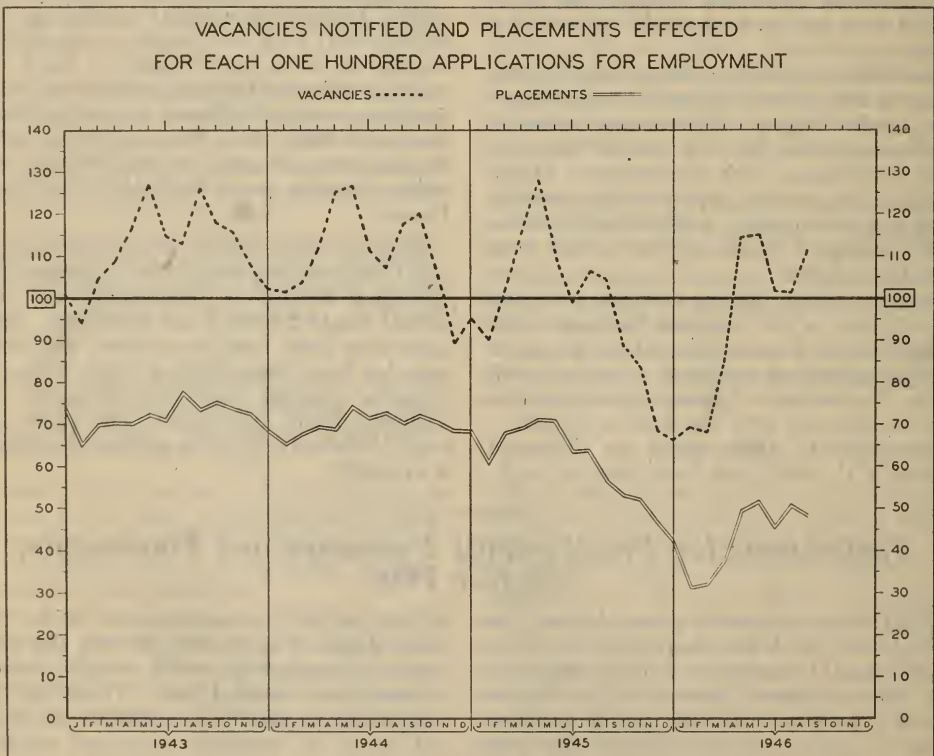

decrease in services. When compared with the four weeks ending August 30, 1945, all industrial divisions registered declines the most pronounced being a substantial loss in manufacturing, and moderate decreases in public utilities operation, construction, forestry and logging, trade and services.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the National Employment Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies in relation to applications took an upward course while that of placements followed a downward trend. The ratio of vacancies to each 100 applications was 111.7 during the four weeks ending August 29, 1946, in contrast with 101.1 in the previous five weeks, and 104.5 during the four weeks August 3 to August 30, 1945. The ratio of placements to each 100 applications during the period under review was 48.2 as compared with 50.2 in the previous period and 56.3 at the close of August, 1945.

The average number of vacancies reported daily by employers to the Employment Offices

throughout Canada during the four weeks August 2 to August 29, 1946, was 6,770 in comparison with 6,239 in the preceding five weeks, and 8,841 during the corresponding period a year ago. The average number of applications for employment received daily during the period under review was 6,062 in contrast with 6,173 in the previous five-week period and with 8,460 during the four weeks ending August 30, 1945. The average number of placements made daily by the offices during the period ending August 29, was 2,925 of which 2,706 were in regular employment and 219 in work of one week's duration or less in comparison with a daily average of 3,101 during the previous period. Placements during the four weeks August 3 to August 30, 1945 averaged 4,764 daily consisting of 4,620 in regular employment and 144 in casual work.

During the four weeks August 2 to August 29, 1946, the offices referred 108,263 persons to vacancies and effected a total of 70,193 placements. Of these, the placements in regular employment were 64,927 of which 49,065 were of males and 15,862 of females, while placements in casual work totalled 5,266. The number of vacancies reported by employers was 114,250 for males and 48,237 for females, a

total of 162,487, while applications for work numbered 145,482 of which 108,736 were from males and 36,746 from females. Reports for the five-week period June 28 to August 1, 1946, showed 180,926 positions available, 179,011 applications made and 89,919 placements effected, while in the four weeks August 3 to August 30, 1945, there were recorded 203,348 vacancies, 194,587 applications for work and 109,564 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year, from January 1936, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,819	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (35 weeks).....	513,649	46,528	560,177

Nova Scotia and Prince Edward Island,

During the four weeks ending August 29, 1946, the daily average of vacancies offered through National Employment Service Offices in Nova Scotia and Prince Edward Island was 260, as compared with 232 in the previous period and 282 during the four weeks August 3 to August 30, 1945. The average number of placements effected daily was 117, in comparison with 145 in the preceding period and 183 during the corresponding four weeks a year ago. The largest decreases in placements from the period ending August 30 last year were in manufacturing and public utilities operation. A moderate loss was reported in trade but this was partly offset by a gain in services. Placements by industrial divisions numbered: services 945; construction 646; trade 426; manufacturing 387 and public utilities operation 187. Regular placements totalled 1,886 of men and 786 of women.

New Brunswick

Opportunities for employment at Employment Offices in New Brunswick during the period under review, numbered 154 daily in comparison with 168 in the preceding five weeks and 219 during the period terminating August 30 last year. Placements were fewer under both comparisons, the daily average being 78 in contrast with 93 in the previous

five weeks and 124 during the period August 3 to August 30, 1945. When comparing placements by industrial groups with the corresponding four weeks a year ago, the most important changes were moderate decreases in manufacturing, public utilities operation and trade. Placements by industries included: construction 510; services 492; manufacturing 316; trade 239 and public utilities operation 103. There were 1,421 men and 385 women placed in regular employment.

Quebec

Orders received at Employment Offices in the province of Quebec during the four weeks ending August 29, 1946, called for an average of 1,519 workers daily in contrast with 1,273 in the previous five weeks and 2,199 during the four weeks ending August 30 a year ago. There was a daily average of 507 placements as compared with 441 in the preceding period and 1,138 during the corresponding four weeks of last year. The most pronounced loss in placements from the period ending August 30, 1945, occurred in manufacturing. Fairly substantial decreases were reported in forestry and logging, and construction and declines somewhat smaller in volume in public utilities operation, services, trade and mining. A moderate loss was noted in finance and insurance but was almost entirely offset by a gain in agriculture. Industries in which employment was secured for more than 300 workers included: manufacturing 4,553; construction 2,206; services 2,096; public utilities operation 1,003; trade 957; forestry and logging 667, and mining 363. Placements in regular employment numbered 9,074 of men and 2,710 of women.

Ontario

Positions offered through Employment Offices in Ontario during the period terminating August 29, 1946, averaged 2,786 daily in comparison with 2,717 in the preceding five weeks and 3,647 during the period August 3 to August 30, 1945. The average number of placements registered daily was 1,167, as compared with 1,370 in the previous period and 1,869 during the four weeks terminating August 30, last year. All industrial groups participated in the reduction in placements when compared with the corresponding period a year ago, the most noticeable decrease being in manufacturing followed by fairly substantial losses in agriculture, public utilities operation, services, trade and construction and moderate declines in forestry and logging, and finance and insurance. Industrial divisions in which the

majority of placements were effected were: manufacturing 10,079; services 5,273; construction 4,927; trade 2,862; public utilities operation 1,863; agriculture 1,189; forestry and logging 751, and mining 736. There were 20,200 men and 6,413 women placed in regular employment.

Manitoba

There was an increase in the average number of positions available daily at Employment Offices in Manitoba during the four weeks under review; there being 470 in contrast with 360 in the previous period and 415 during the

four weeks ending August 30, a year ago. Placements, likewise, increased under both comparisons, the daily average being 245 during the period under review, in comparison with 208 in the preceding five weeks and 233 during the period ending August 30, 1945. A fairly large increase in agriculture together with a moderate advance in services and a small gain in mining accounted for the increase over the four weeks August 3 to August 30, last year. These improvements were somewhat modified by moderate losses in manufacturing, public utilities operation and construction. Placements by industrial divisions numbered: agriculture 1,558; services 1,394; manufacturing 1,008; trade 855; construction 456; public utilities operation 376 and mining 153. Regular placements totalled 3,598 of men and 1,200 of women.

Saskatchewan

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Saskatchewan during the period terminating August 29, 1946, was 265 as compared with 226 in the previous five weeks and 247 during the period August 3 to August 30 last year. Placements recorded a daily average of 151, in contrast with 129 in the preceding five weeks and 139 during the corresponding period a year ago. The gain in placements over the four weeks terminating August 30, 1945, was due to moderate increases in services and agriculture. Of the changes in the remaining groups, the losses exceeded the gains. Placements by industries included: services 974; trade 764; agriculture 745; manufacturing 413; construction 410 and public utilities operation 245. There were 2,253 men and 889 women placed in regular employment.

Alberta

Employment opportunities as indicated by orders received at Offices in Alberta during the

four weeks ending August 29, 1946, showed a daily average of 376 workers in comparison with 411 in the preceding period and 414 during the four weeks August 3 to August 30, 1945. There was a daily average of 215 placements in contrast with 253 in the previous period and 249 during the four weeks ending August 30 last year. Significant changes in placements when compared with the corresponding period a year ago, consisted of moderate losses in public utilities operation, construction, trade and manufacturing and gains in services and agriculture. Placements by industrial groups included: services 1,611; manufacturing 789; trade 717; agriculture 712; construction 593; mining 377 and public utilities operation 270. Regular placements totalled 3,221 of men and 1,157 of women.

British Columbia

Orders listed at Employment Offices in the Province of British Columbia during the period under review, called for an average of 940 workers daily as compared with 852 in the previous five weeks and 1,052 during the period terminating August 30 a year ago. Placements showed a lower average during the four weeks under review, being 445 daily in contrast with 462 in the preceding period and 629 during the corresponding four weeks of last year. Placements under manufacturing, public utilities operation, and forestry and logging were considerably fewer than during the period August 3 to August 30, 1945, and moderate declines were registered in trade and services. Except for a moderate improvement in agriculture, the changes in all other groups were small. Industrial divisions in which most of the placements were effected were: manufacturing 2,420; services 2,397; construction 1,945; trade 1,442; forestry and logging 1,054; public utilities operation 680; mining 292; agriculture 280, and finance and insurance 157. Placements in regular employment numbered 7,412 of men and 2,322 of women.

Strikes and Lockouts

Strikes and Lockouts in Canada During September, 1946

DURING September, 1946, less time was lost due to strike idleness in Canada than in the previous month but the figures still remain at a high level as compared with the same period a year ago. As compared

with August, 1946, there were 10 fewer strikes on record, the number of workers involved decreased by more than 9,000, and the time loss showed a substantial drop of more than 200,000 days. For the first nine months of this

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to September, 1946				
MINING—				
Metal miners, British Columbia.	12	1,500	30,000	Commenced July 3; for increased wages, reduced hours and other conditions; untermiated.
MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Rubber factory workers, Bowmanville, Hamilton, Kitchener, New Toronto, and Toronto, Ont.	9	8,000	180,000	Commenced June 23; for increased wages reduced hours, overtime rates for Saturdays, Sundays and holidays, etc.; untermiated.
<i>Textiles, Clothing, etc.—</i>				
Textile factory workers, Valleyfield, P.Q.	1	2,300	12,500	Commenced June 1; for increased wages reduced hours, two weeks' vacations with pay, etc.; terminated September 7; conciliation, provincial, and return of workers pending further negotiations; indefinite.
Clothing factory workers, St. Hyacinthe, P.Q.	1	165 ⁽⁴⁾	3,750	Commenced August 12; against refusal to implement Arbitration Board's decision that three union workers, allegedly dismissed for infraction of rules, should be reinstated; terminated September 30; conciliation, provincial, and return of workers pending negotiations for a union agreement; indefinite.
<i>Printing and Publishing—</i>				
Compositors, etc., Winnipeg, Man.	2	85	1,750	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; untermiated.
Compositors, etc., Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.	5	110	2,000	Commenced May 30; in sympathy with strike of compositors at Winnipeg, Man., commencing November 8, 1945; untermiated.
<i>Metal Products—</i>				
Brass factory workers, New Toronto, Ont.	1	500	10,000	Commenced May 18; for increased wages, reduced hours, union shop, seniority in lay-offs, etc.; untermiated.
Motor vehicle factory workers, Chatham and Windsor, Ont	2	2,500	50,000	Commenced June 18; for increased wages, reduced hours, two weeks' vacations with pay, etc.; untermiated.
Foundry workers, Calgary, Alta.	2	130	1,600	Commenced June 20; for new agreements providing for increased wages, reduced hours, closed shop, check-off, two weeks' vacations with pay, etc.; terminated September 18; negotiations; compromise.
Steel products factory workers, Windsor, Ont.	1	150	3,000	Commenced June 27; for a new agreement providing for increased wages, reduced hours, two weeks' vacations with pay, etc.; untermiated.
Electrical apparatus factory workers, Hamilton, Ont.	2	3,500	80,000	Commenced July 5; for increased wages, reduced hours, two weeks' vacations with pay, payment for statutory holidays, etc.; untermiated.
Metal factory workers, Welland, Ont.	1	900	20,000	Commenced July 8; for a new agreement providing for increased wages and reduced hours; untermiated.
Electrical apparatus and wire factory workers, Toronto, Ont.	3	1,300	27,500	Commenced July 8; for new agreements providing for increased wages, reduced hours, two weeks' vacations with pay, etc.; untermiated.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1946⁽¹⁾—Continued

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾

Strikes and Lockouts in Progress Prior to September, 1946—Concluded				
MANUFACTURING—				
<i>Metal Products—Conc.</i>				
Steel mill workers, Hamilton, Sault Ste. Marie, Ont., Sydney, N.S.	5	8,500	200,000	Commenced July 14; for increased wages, reduced hours, union security, two weeks' vacations with pay, etc.; untermi- nated.
Silverware factory workers, Toronto, Ont.	1	33	690	Commenced August 20; protest against alleged failure to negotiate a union agree- ment; untermi- nated.
Steel products factory workers, Lachine, P.Q.	1	250	2,750	Commenced August 20; for a union agreement providing for increased wages, reduced hours, two weeks' vacations with pay, etc.; terminated September 14; concilia- tion, provincial, and reference to NWLB ⁽³⁾ ; compromise.
Steel products factory workers, Hamilton, Ont.	4	415	5,500	Commenced August 24; protest against bringing in Dominion and Provincial police in connection with steel strike commencing July 14; untermi- nated (three plants resumed operations during the month).
<i>Non-Metallic Minerals, Chemicals, etc.—</i>				
Chemical factory workers, Windsor, Ont.	1	375 ⁽²⁾	8,500	Commenced June 27; for a new agreement providing for increased wages, reduced hours, union shop, check-off, two weeks' vacations with pay, etc.; untermi- nated.
Chemical factory workers, Amherstburg, Ont.	1	360	8,500	Commenced July 12; for a new agreement providing for increased wages, reduced hours, union security, etc.; untermi- nated.
Plastic factory workers, Oshawa, Ont.	1	295	6,800	Commenced August 20; for a new agreement providing for increased wages, reduced hours, union security, two weeks' vacations with pay, etc.; untermi- nated.
Strikes and Lockouts Commencing During September, 1946				
MINING—				
Coal miners, Glace Bay, N.S.	1	45 ⁽²⁾	90	Commenced September 10; protest against sending home surplus workers; terminated September 12; return of workers; in favour of employer (miners elected to divide available work with temporary employ- ees).
Coal miners, Cambria, Alta.	1	120	120	Commenced September 12; against drivers being kept overtime because of man-trip coming out of mine late; terminated Septem- ber 12; return of workers; in favour of workers.
Coal miners, Drumheller, Alta.	1	96	384	Commenced September 16; against penalty deductions from wages for quitting work before end of shift; terminated September 19; return of workers; in favour of employer.
Coal miners, Glace Bay, N.S.	1	849	849	Commenced September 19; against hiring seven replacements for miners dismissed for unsatisfactory work; terminated Septem- ber 19; return of workers; in favour of employer.
Coal miners, surface workers, Glace Bay, N.S.	1	73 ⁽⁷⁾	73	Commenced September 24; protest against failure to hoist coal on Friday night due to absenteeism; terminated September 24; return of workers; in favour of employer.
Coal miners, Cambria, Alta.	1	120	120	Commenced September 26; re working con- ditions; terminated September 26; return of workers; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1946⁽¹⁾—*Concluded*

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾
	Establishments	Workers		
Strikes and Lockouts Commencing During September, 1946—Concluded				
MANUFACTURING—				
<i>Animal Foods—</i>				
Meat packing plant workers, St. Boniface, Man.	1	43 ⁽⁹⁾	43	Commenced September 30; for adjustment of piece-work occupational classification; untermiated.
<i>Textiles, Clothing, etc.—</i>				
Glove factory workers, Thetford Mines, P.Q.	1	50 ⁽⁹⁾	75	Commenced September 20; against dismissal of two workers allegedly for union activity; terminated September 21; negotiations; in favour of workers.
CONSTRUCTION—				
<i>Buildings and Structures—</i>				
Carpenters, Toronto, Ont.	1	41 ⁽¹⁰⁾	123	Commenced September 16; jurisdictional dispute as to whether carpenters or lathers should apply gyproc board, and for transportation allowance for foreman; terminated September 19; negotiations; in favour of workers.
Carpenters, Saskatoon, Sask.	3	20	90	Commenced September 20; for application of Saskatoon agreement to jobs in North Battleford; terminated September 26; negotiations; in favour of workers.
TRANSPORTATION—				
<i>Electric Railways and Local Bus Lines—</i>				
Bus and street car operators, Kitchener, Ont.	1	80 ⁽¹¹⁾	240	Commenced September 9; against working with bus dispatcher because of testimony given in investigation of dismissal of union officer; terminated September 12; return of workers; in favour of employer.
<i>Electricity and Gas—</i>				
Hydro electric distribution workers, Township of York, Ont.	1	81	526	Commenced September 10; for a new agreement providing for increased wages, reduced hours, three weeks' vacations with pay for senior employees, etc.; terminated September 18; return of workers pending further negotiations; indefinite.
<i>Miscellaneous—</i>				
Cold storage plant workers, Winnipeg, Man.	1	44	28	Commenced September 13; for greater increase in wages than approved by RWLB and NWLB ⁽³⁾ ; terminated September 13; conciliation, federal, and further reference to RWLB; indefinite.

(1) Preliminary data based where possible on direct reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) RWLB—Regional War Labour Board; NWLB—National War Labour Board.

(4) 85 indirectly affected; (5) 146 indirectly affected; (6) 350 indirectly affected; (7) 1,020 indirectly affected; (8) 300 indirectly affected; (9) 100 indirectly affected; (10) 20 indirectly affected; (11) 51 indirectly affected.

year the time loss due to strikes and lockouts has been greater than during any similar period since the record was begun in 1901. The most important single cause has been the almost general demand for increased wages. Preliminary figures show 33 strikes and lockouts in existence during September, 1946, involving 33,030 workers, with a time loss of 657,601 man-working days, as compared with 43 strikes in August, with 42,407 workers involved and a time loss of 867,252 days. In September,

1945, there were 17 strikes, involving 19,819 workers, with a time loss of 184,556 days.

Preliminary figures for the first nine months of this year show 178 strikes, involving 126,436 workers, with a time loss of 4,069,434 man-working days. For the same period last year there were 155 strikes, with 65,753 workers involved and a time loss of 353,886 days.

Of the 33 strikes recorded for September, four were settled in favour of the workers, six in favour of the employers, two were

compromise settlements and four were indefinite in result, work being resumed pending final settlement. At the end of the month 17 strikes were recorded as unterminated, namely: metal miners in British Columbia; rubber factory workers in Bowmanville, Hamilton, Kitchener, New Toronto and Toronto, Ont.; compositors, etc., at Winnipeg, Man.; compositors, etc., at Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.; brass factory workers at New Toronto, Ont.; motor vehicle factory workers at Windsor, Ont.; steel products factory workers at Windsor, Ont.; electrical apparatus factory workers at Hamilton, Ont.; metal factory workers at Welland, Ont.; electrical apparatus and wire factory workers at Toronto, Ont.; steel mill

workers at Hamilton, Sault Ste. Marie, Ont., and Sydney, N.S.; silverware factory workers at Toronto, Ont.; steel products factory workers at Hamilton, Ont.; chemical factory workers at Windsor, Ont.; chemical factory workers at Amherstburg, Ont.; plastic factory workers at Oshawa, Ont., and meat packing plant workers at St. Boniface, Man.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. A strike of bakery workers at Halifax, N.S., which commenced on February 11, 1946, has not been declared terminated.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in July 1946, was 155, and 13 were still in progress from the previous month, making a total of 168 during the month. There were 45,600 workers involved and a time loss of 162,000 working-days was caused.

Of the 155 stoppages which began during July, 18 arose out of demands for advances in wages; 59 over other wage questions; three on questions as to working hours; 21 on questions respecting the employment of particular classes or persons; 50 on other questions respecting working arrangements; three over questions of trade union principle; and one was in support of workers involved in other disputes.

Australia

Figures now available for 1945 show 945 industrial disputes. The number of workers directly involved was 326,641 and the time loss for workers directly and indirectly involved was 2,119,641 days.

United States

Preliminary figures for August, 1946, show 500 strikes and lockouts beginning in the month, in which 235,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 3,425,000 man-days. Corresponding figures for July, 1946, are 480 strikes and lockouts, involving 185,000 workers, with a time loss of 3,300,000 man-days.

Prices

Prices, Retail and Wholesale, in Canada, September, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE cost-of-living index recorded a decline of 0.1 to 125.5 between August 1 and September 3, 1946, for the first recession since February. Seasonal factors, which were mainly responsible, were reflected in a drop of 1.5 points to 143.2 in the food products series. In this group lower quotations were noted for vegetables and fruits while eggs moved slightly higher. Further price advances were reflected in the clothing index which moved 2.0 points higher to 129.6 in September, while home-furnishings and services were up 1.4 points to 128.4. In the miscellaneous series a gain of 0.1 to 113.9 was registered. Two groups continued unchanged: fuel and light at 107.2 and rentals at 112.6.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by

† Commodities in the cost-of-living excluding rents and services.

independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the province of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked

for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

TABLE III.—DOMINION AVERAGE RETAIL PRICE RELATIVES FOR STAPLE FOODS, AUGUST, 1939—SEPTEMBER, 1946, WITH DOMINION AVERAGES OF ACTUAL RETAIL PRICES FOR SEPTEMBER, 1946

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.
 (b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90 divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.59; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, homefurnishings,

etc., with their weight, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527 became effective on December 1, 1941, (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Price Control in Canada*.

Wholesale Prices, August, 1946

The general wholesale price index for August was 109.2. This was actually lower by 0.3 from the preceding month, a seeming contradiction of the general upward trend. But this interruption is a seasonal phenomenon. The same thing happened in August in four of the past five years. The halt is largely due to the usual seasonal dip in certain farm products. Vegetable products showed a temporary dip in August every year during the past five years.

(a) First of month. (b) Middle of month. (c) Last week of month. (d) Quarterly. (e) New wartime price series on base December 1942 = 1000, computed quarterly beginning March, 1943. (f) Yearly averages are for period from July of preceding year to June of year specified. (g) July. (h) June. (i) Revised.

This month, vegetable products receded 1.4 points. This was due to lower prices for potatoes, onions, rye, oranges and lemons, which out-weighed the strength in linseed oil, turpentine, canned peaches and canned tomatoes. A decline of 0.3 to 115.4 for animal products was due to lower quotations for livestock, fresh meats and fowl, overbalancing increases for canned salmon, footwear, butter and eggs. Wood, wood products and paper advanced 0.5 to 131.0 due to higher furniture prices. Non-ferrous metals moved up 0.4 to 89.7 due to an increase in the average price of silver. A higher quotation for steel pipe supported a gain of 0.2 to 128.5 in the iron and steel group. Steel plates, cold rolled sheets

and wire were lower in this series. Textile products at 98.2, non-metallic minerals at 102.6 and chemical products at 94.4 were unchanged in August.

Canadian farm products weakened 2.7 points to 111.1 between July and August. The main reasons for this have been stated above. Field products dropped 3.4 points to 100.3 due to lower quotations for potatoes, onions, rye and barley which outweighed a minor increase in hay. In the animal products section, lower livestock and fowl prices overbalanced an advance in eggs, with the result that the August animal products index dropped 1.3 points to 129.3.

Publications Received Recently in Library of Department of Labour, Ottawa

THE following publications may be obtained on loan, without charge, from the Library, Department of Labour. Future lists will be published quarterly commencing January, 1947.

Labour and employment conditions in Canada

Total employment in Canada of persons over fourteen years of age reached a level of 4,860,000 during the last week in August compared to 4,366,000 in mid-November of 1945, according to the fourth of the quarterly labour force surveys undertaken by the Dominion Bureau of Statistics.

This increase of approximately one-half million in the volume of employment was confined to men. Female employment during the same period dropped slightly. At the same time unemployment fell from 177,000 to 117,000. (Sss p. 1614).

Commenting on these figures recently, the Minister of Labour, Hon. Humphrey Mitchell, said that he considered conditions in Canada to be extraordinarily good in the matter of remunerative employment, and that Canada was not far from the peak point of her history in regard to total employment.

He also expressed satisfaction with the success of commissioners appointed by the Dominion Government and conciliation officers of both the Dominion and Provincial Governments in bringing about settlements of strikes.

Of about 26,000 workers who were on strike at the beginning of October only about 700 were still out at the end of the month.

Among the important strikes settled recently were those of employees of steel companies at Hamilton, Sault Ste. Marie and Sydney, rubber companies in several Ontario centres, lumber companies in northern Ontario,

electrical companies at Hamilton and Toronto, motor vehicle manufacturers at Windsor, and Chatham, copper mining companies in British Columbia, metal factories at Toronto and Welland, and chemical companies at Windsor and Amherstburg.

The Minister expressed the belief that the country may now look forward to a peaceful and constructive period of industrial relations since almost without exception the announcement of recent strike settlements had been accompanied by expressions of mutual satisfaction on the part of both employers and employees. This renewed harmony and willingness to bury the hatchet of industrial warfare, the Minister said, should and no doubt will make for full co-operation between management and organized labour, and result in increased production as speedily as stock-piles of materials can be built up.

C. A. L. Murchison appointed Chairman of National War Labour Board

The Honourable Humphrey Mitchell, Minister of Labour, announced on October 29 that Mr. Clifford A. L. Murchison, K.C., had been appointed Chairman of the National War Labour Board vice the Honourable Mr. Justice M. B. Archibald, resigned.

Mr. Murchison was formerly Secretary of the Board and had been an Alternate Chairman since last June.

He is a former resident of Winnipeg where he had practiced law since graduation from

the University of Manitoba in 1922 and where he sat on the City Council as an alderman for ten years.

Mr. Murchison has been a resident of Ottawa since 1941, in which year he became associated with the Legal Division of the Wartime Prices and Trade Board, of which Board he later was appointed Supervisor of Legal Offices. He transferred to the National War Labour Board in April, 1944, as Executive Assistant in Charge of Reviews and was appointed Secretary in June, 1945.

Design in industry An exhibition established for the purpose of precipitating wider interest in original Canadian industrial design was recently put on display at the National Gallery in Ottawa. Following its Ottawa showing the exhibition, entitled "Design in Industry", will tour many Canadian cities from coast to coast.

Produced by the National Film Board in collaboration with the Department of Reconstruction, the National Research Council and the National Gallery, it contains a wide variety of articles, ranging from plastic playthings to plywood furniture.

The display was officially opened by Rt. Hon. C. D. Howe, Minister of Reconstruction who stressed the importance of industrial design and stated that, the exhibition presented representative samples of well-designed goods produced in Canada and demonstrated the availability of talent in the country.

The work of assembling, selecting and putting the display together was directed by Mr. Donald Buchanan, Supervisor of Special Projects at the National Film Board. For the purpose of establishing a basis for his selections Mr. Buchanan previously described good design in manufactured articles as a combination "of simplicity, fine proportions and functional utility. It is not," he said, "a question of ornamentation, but of the design of ordinary objects for everyday use."

The necessary talent to expand and improve the industrial design of domestic manufacture is abundantly available in Canada, Mr. Buchanan states in a brochure accompanying the display, but indicates that manufacturers encounter difficulty in locating it. The brochure proposes resolving the problem through the establishment of an Industrial Council of Design, along the lines of the one recently constituted in Great Britain, which would include representatives from the Canadian Manufacturers' Association, the National Research Council and the Royal Society of Architects of Canada. It suggests that such a council would be ex-

tremely helpful in maintaining Canada's position in the competitive market, when the present excessive post-war demand recedes and a buyers' market is again the general rule.

The case of selling under present conditions has resulted in lesser attention being paid to the question of design, but with the return of competition the attractive appearance of Canadian articles can be an important factor in maintaining the high level of demand for this country's products.

A photographic comparison of domestically designed products, with those of other countries, attests to the existence of designing talent in Canada. The exhibit implies that the development and protection of Canada's export and domestic market can be successfully achieved by uniting industry, talent and research in a common effort.

Employment and industrial statistics The accompanying table contains the latest statistics available reflecting industrial activity in Canada.

Figures are shown for certain months in the current year as compared with the corresponding period in 1945.

Employment and Earnings—The index of industrial employment published by the Dominion Bureau of Statistics advanced from 172.8 in August to 175.4 in September. Comparative figures for certain previous dates are 172.8 for September, 1945; 185.5 for September, 1944; and 119.6 for September, 1939. This substantial increase while seasonal in character was due in part also to increased employment resulting from the settlement of certain strikes. Expansion in all provinces was recorded at the date under review while gains were noted also in most of the industries, both manufacturing and non-manufacturing.

Reports from 16,087 employers indicated combined staffs of 1,793,875 at September 1, an increase of 25,874 workers from the level of the previous month. This increase was larger than at September 1 in any year since 1940 and also exceeded the average increase at that date since 1920. The latest index of employment (base 1926=100) at 175.4 was the highest for September in the last 26 years with the exception of the period 1942-44.

There was a general improvement in manufacturing, although many important strikes were still in existence. The largest gains occurred in the vegetable food, textile, lumber and electrical apparatus groups. This increase in manufacturing was in contrast to the curtailment one year earlier following the ending of the war. Among the non-manufacturing

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

† Week ended October 31, 1946.

¹ Base 1926=100.² Daily averages.³ Base June, 1941=100.⁴ Base 1935-1939=100.⁵ Adjusted, where necessary, for seasonal variation.⁶ Notes in the hands of the public at the end of the month.⁷ Figures for four weeks ended October 26, 1946, and corresponding previous periods.

industries, improvement was shown in logging, transportation, communications, construction and trade. The considerable addition of 5,200 persons to the working forces in construction was contra-seasonal. Moderate declines were noted in mining and in the service industries.

Weekly payrolls of eight leading industries rose 1.7 per cent to \$58,713,734 at September 1. The weekly average per employee was \$32.73 at September 1, as compared with \$32.64 at August 1. Per capita figures at the beginning of September in previous years were: 1945, \$32.06 and 1944, \$31.69. Factors contributing to the higher average figure at September 1, 1946, were the declining number of women workers and the payment of higher wage-rates in numerous industries.

Prices—Based on the 1926 average as 100, the general index of wholesale prices was 109.1 in September as compared with 109.2 in August and 103.3 in September, 1945. The indexes for vegetable and animal products decreased 0.4 and 0.1 points respectively. Increases were noted in wood products, from 131.0 to 131.2 and iron products from 128.5 to 128.6. Unchanged were textile products, non-ferrous metals, non-metallic minerals and chemical products whose indexes were respectively 98.2, 89.7, 102.6 and 94.4. The index of consumers goods declined from 101.5 to 101.4 and of producers' goods from 105.8 to 105.7. The index of Canadian farm products declined 0.6 points, from 111.1 to 110.5.

The cost-of-living index, based on prices in the years 1935 to 1939 as 100, advanced from 125.5 on September 3 to 126.8 on October 1. Increases in consumer milk prices accounted for the major part of the October advance. The food index moved up from 143.2 to 146.5. Results from an October survey of rentals increased the index for this group from 112.6 to 113.4. The fuel and light index changed from 107.2 to 107.3, clothing from 129.6 to 130.2, and homefurnishings and services from 128.4 to 128.8. The miscellaneous items remained at 113.9. The advance in the general index since August, 1939, was 25.8 per cent.

Labour-management production committees

The Industrial Production Co-operation Board had record of 468 labour-management production committees in Canada at September 30, 1946.

The Board pointed out that while various forms of joint consultative committees operate in Canadian industry, only those which conform to the formula of a labour-management production committee laid down in Order in Council P.C. 162 (L.G., 1944, p. 144) are included in its list.

According to the formula the committees must be composed of representatives from labour and management directly engaged in production in the plant where the committee operates. The number of labour representatives, to be chosen in a democratic manner, should be at least equal to the number of management representatives. Committees are advisory and consultative only, and not executive. They should concern themselves exclusively with problems of production, while problems relating to wages, working conditions, and similar matters, including grievances, should be left to the appropriate collective bargaining procedure.

Foremen and production committees

A four-page folder, the first in a series of information bulletins, has been issued by the Industrial Production Co-operation Board on the relationship between the foremen and the labour-management production committee.

The publication says that one of the first moves in establishing a committee should be to enlist the full co-operation and support of the foreman. It points out that if the foreman finds labour and top management meeting on matters closely concerning him and yet completely ignoring him he is likely to develop an active antagonism to the committee.

Eight steps to ensure the support of foremen are listed, among which are the following:—

Top management should give the foremen full details of the plan prior to the committee being set up, and should let foremen see that it is fully behind the plan.

Foremen should be invited to name one or more of their number to represent management on the committee; or alternatively should serve in rotation.

When the suggestion committee receives a suggestion affecting a particular department, it should be discussed with the foreman of the department before being considered by the committee as a whole.

The foreman should be invited to attend the LMPC meeting at which a suggestion affecting his department is considered, with voice but no vote. (In the foreman's own interest he should not have authority to veto any suggestion—the right to recommend acceptance or rejection must remain with the committee.)

Some recognition should be given the foreman when a worker in his department presents an acceptable suggestion. This may take the form of a small token award or it may simply be a note of congratulation from

the committee. The important thing is that the foreman should be made to feel that a good suggestion from someone in his department is counted to his credit.

Benefits accrue to foremen from a properly functioning committee, the publication states. The foreman gains along with everyone else from working in an efficient, highly productive plant. Job security, higher earnings and better opportunities for upgrading are a few of the more obvious results. Moreover, the foreman's work is made easier and less nerve-racking where co-operative attitudes have replaced labour-management strife. He becomes the leader of a team, instead of driving the workers. And finally, through foreman participation on the LMPC new lines of communication are established between top management and the foreman, and a new prestige is given the foreman's position. This helps to give him a greater feeling of security and responsibility.

"Where management gives the foreman his proper role in the LMPC," the folder concludes, "it can be a tremendous boon to the foreman and he in turn can make a major contribution. Where he is ignored the foreman will be disgruntled and the success of the LMPC endangered."

First year of operation of Family Allowances Act

During the first year of operations of the Family Allowances Act, from July, 1945, to the end of June, 1946, a total of \$232,735,314 was paid in respect of children under the Act.

By the end of June allowances were being paid for 3,335,582 children in 1,423,159 families. The average allowance per family was \$13.97, varying from \$11.52 in British Columbia to \$16.53 in Quebec. The average number of children per family was 2.34, the extremes in the same two provinces being 1.91 and 2.81.

Termination of service of Mr. George Hodge with Department of Labour

The retirement of Mr. George Hodge on October 31 marks the termination of the wartime government service of a prominent executive of the Canadian Pacific Railway Company.

Mr. Hodge's services were made available to the Department of Labour early in the war by the Canadian Pacific Railway where he was manager of the Department of Personnel.

For his duties in the Department of Labour Mr. Hodge came particularly well equipped.

He had joined the Canadian Pacific in 1890 under Lord Shaughnessy, only a few years after the first Canadian railway train had

crossed the continent. In the course of a few years he became secretary to that noted administrator. After handling a number of superintendencies, he became general superintendent of the Quebec district in 1912. In 1922 he was promoted to assistant general manager of Eastern Lines.

In 1931 he was made manager of the Department of Personnel in charge of labour relationships. Upon the formation of the Canadian Railway Board of Adjustment in 1918 he served as board member, then as assistant chairman, and latterly as chairman until 1941.

These last two posts gave him a wide experience in labour relations.

In 1940 he was appointed a member of the National Labour Supply Council, and in 1941 he commenced his duties as a member of the Industrial Disputes Inquiries Commission on which his two colleagues were the Hon. Humphrey Mitchell, (now Minister of Labour, but at that time head of the Commission), and Mr. Gilbert Jackson. In its first four months of activity this Commission settled over 50 disputes.

With the formation of the National War Labour Board in 1941 he served as board member with Mr. J. A. McClelland under the chairmanship of Hon. Humphrey Mitchell. When the Board was given judicial status in February 1943, he continued as technical adviser. During the war years, this board handled approximately 3,500 cases.

Mr. Hodge retired from the service of the Government on October 31. That date also marked his retirement from the Canadian Pacific Railway which he had served for 56 years.

C. W. Rump goes to Board of Transport Commissioners

Following a promotional competition, the Civil Service Commission announced recently that Mr. C. W. Rump had been transferred from the Department of

Labour to the position of Assistant Secretary to the Board of Transport Commissioners.

Mr. Rump graduated from the University of Toronto in 1934 and joined the staff of the Department of Labour where he became Assistant Editor of the *LABOUR GAZETTE*, and subsequently served as Industrial Relations Officer.

Mr. Rump is General Secretary of the National Joint Council of the Public Service of Canada, First Vice-President of the Civil Service Association of Ottawa and a member of the National Executive of the Civil Service Federation of Canada.

**Record number
of union
elections in
United States**

previous month in its eleven years of authority.

Efforts to organize employees in the smaller plants were indicated by the fact that 82 per cent of the elections did not involve more than one union. The average number of eligible voters per election was 175.

The figures for September also showed that 89 per cent of those who were eligible to do so cast their votes. This proportion was unprecedented in NLRB history.

A total of 684 elections was conducted. During the month the Board received 1,399 new cases, of which 72 per cent were petitions for elections. Only 28 per cent involved allegations of unfair labour practices, which formerly had been the principal cause of applications.

The AFL and CIO unions fared about equally in the elections in which they participated, winning 64 and 65 per cent of them, respectively. The AFL unions participated in 250, and the CIO in 229. Unaffiliated unions won thirty-nine elections, or 68 per cent of those in which they participated. "No union" won a majority of the votes in 148 elections, or 22 per cent of all elections conducted. The results of eighteen elections were indeterminate and run-offs were necessary. Of the 105,975 votes cast, 80 per cent supported collective bargaining by some labour organization.

**Strike
situation in
United States**

A summary of some of the most recent developments in the strike situation in the United States is presented below.

Shipping—A maritime strike, which effectively tied up a total of 1,495 vessels operated by 45 shipping lines for four weeks, was resolved late in October with the ratification of new agreements by the Masters, Mates and Pilots (AFL) and the Maritime Engineers Beneficial Association (CIO) and the lines' operators.

The issue of union security, which blocked early settlement in the Masters, Mates and Pilots dispute, arose over the union demand that captains, as other deck officers, be covered by both preferential hiring and maintenance-of-membership clauses. It was concluded by an agreement to grant preferential hiring to union captains. Maintenance of membership is to be applied to all deck officers other than captains.

Both contracts provide for a 15 per cent wage increase; overtime rates were raised from a flat \$1.25 an hour to \$1.60 an hour. The Maritime Engineers settlement terms includes provision for union preference with respect to newly hired engineers and maintenance of membership for engineers who are or become union members.

Another maritime strike was concluded earlier in the month with the signing of an agreement between the Seafarers International Union (AFL) and nine Atlantic and Gulf coast steamship companies. The strike, which occurred when the United States Wage Stabilization Board refused to authorize agreed-upon wage increases, on the grounds that they were inflationary, was ended when an approval of the new rates was received from Stabilization Director John R. Steelman.

Trucking—An eight week general trucking strike in New York which at its peak virtually halted the flow of goods into the city was terminated late in October when operators, who had held out against terms accepted by others earlier in the dispute, accepted the "Bohack formula". The formula provides for a 31 cent hourly wage increase for New York truck drivers.

Air Transportation—An agreement between Transcontinental and Western Air, Inc., (Trans World Airline) and Airline Pilots Association (AFL) to submit matters in dispute to arbitration, terminated a strike by 1,400 pilots which grounded all aircraft on the company's 23,270-mile national and international system for two weeks. The chief matter in dispute was a union demand for higher pay. During the course of the strike the company ordered an indefinite furlough without pay for its 15,000 other employees, maintaining only a skeleton force for maintenance and essential business.

Coal-Mining—Secretary of the Interior J. A. Krug and John L. Lewis, President of the United Mine Workers (AFL) have been meeting to discuss charges made by Mr. Lewis of misrepresentations of contract provisions concerning pro rata vacation payments and methods of calculating tonnage of coal mined for purposes of royalty payments to the miners health and welfare fund.

The control of the mines was taken over by the Government during a previous strike. (L.G., June 1946, p. 720) Captain N. H. Collison, who succeeded Admiral Moreel as Mines Administrator, denied any contract violations by the Government.

Automobile Workers—The United Automobile Workers (CIO) has voted to file a thirty-days' strike notice against the Ford

Motor Company which may eventuate in a walkout of 68,000 employees at the River Rouge plant. The union is demanding:

- (1) revocation of the penalties imposed on eighteen strikers who recently refused to work in the Company's open-hearth department because of unhealthy conditions;
- (2) prompt elimination of the plant's safety and health hazards; and
- (3) cancellation of no-strike clauses in the contract which, the union charges, are used by the company as weapons to force employees to accept conditions that imperil their health.

The present dispute arose when the company, invoking the company security provision, regarding wildcat strikes in the union contract (L.G., March 1946, p. 266) recently discharged one employee and suspended seventeen others for two to three weeks for participating in a wildcat strike in the open-hearth department.

Labour turnover in United States

For every 1,000 employees on United States factory payrolls, 68 were hired and 68 left during August 1946.

The labour turnover rate, according to the Bureau of Labour Statistics, resembled war times more than it did the pre-war period when the rate had been much lower.

Of the 68 per 1,000 who were separated from employment during the month, 51 quit, 11 were laid off, 4 were discharged, and 2 left for other reasons.

The separation rate in August, 1945, the month during which V-J day occurred, was 179 per 1,000; in August, 1943 it was 83; and in August, 1939 it was 30.

The hiring rate in August, 1945, was 59 per 1,000; while during the same month in 1943 and 1939 it was 76 and 51 respectively.

Trends in hours and earnings in United States

Average hourly earnings continue to rise in the United States; but owing to shorter hours, average weekly earnings are less than they were a year ago,

according to the U.S. Bureau of Labour Statistics.

For all manufacturing industries, average hourly pay in July, 1946, was \$1.09 per hour, an increase of 6 per cent over the figure for July, 1945. Average weekly hours, however, at 39.6, showed a drop of 10 per cent from the 44-hour week of July, 1945, the last full wartime month. As a result, average weekly earnings declined from \$45.42 to \$43.35, a drop

of 4.5 per cent. The decline in weekly earnings was especially marked in the durable goods group, where earnings dropped from \$50.60 to \$46.15. In non-durable goods, on the other hand, weekly earnings increased during the first post-war year from an average of \$36.61 to \$40.49.

Preliminary estimates for the month of August, 1946, indicated a rise in average hourly earnings to \$1.11 an hour, accompanied by a fractional rise in the average work week, resulting in an increase in weekly earnings to \$44.61.

The cost of living index in the United States stood at 143.7 in August, 1946, compared with 129.3 in August, 1945.

Comparable figures for Canada may be found elsewhere in this issue, (pp. 1632, 1660).

Standards recommended for women's employment in United States

Minimum standards recommended for female industrial and office workers relating to hours of work, wages, safety and health are set forth in a recent pamphlet of the Women's

Bureau of the U.S. Department of Labour, entitled "Standards for Employment of Women".

Certain standards, it is pointed out, should be maintained for all workers regardless of sex but while legislation in many States has established higher standards for women than for men with respect to hours, rest and lunch periods and seating facilities, discrimination exists against women especially with regard to wages.

As regards working time the Bureau recommends as minimum standards: (1) Not more than an eight-hour day and a 48-hour week, with all work over 40 hours payable at time and one-half the regular rate; (2) A weekly rest-day; (3) A 30-minute meal period, and no work-period exceeding five hours without a break for meal or rest; (4) A 10-minute rest-period in the middle of each half-day in addition to the lunch period and without lengthening the work day; (5) A holiday with pay after six months' service and a longer holiday after longer service; (6) Sick leave and maternity leave without loss of job or seniority rights, maternity leave to cover at least six weeks before and two months after confinement with extension of either period on medical advice; (7) Time off with pay on the principal legal holidays. Night work, the Bureau urges, should be kept to a minimum except in continuous-process industries and in essential services.

Recommended wage standards include: (1) Equal pay for equal work, that is, a wage-rate

based on the job; (2) Minimum rates established through legislation with tips not considered as wages; (3) Protective clothing, safety equipment and uniforms to be supplied and cared for entirely at the employer's expense; (4) wages to be paid regularly and in full on a fixed day, weekly or semi-monthly.

Health and safety standards advocated include the following:

(1) Adequate ventilation, lighting and heating; (2) Washroom, toilet, rest and dressing room, lunchroom and drinking facilities conforming to high standards of health and sanitation; (3) Adequate medical services; (4) A program of industrial hygiene as a protection against occupational hazards arising from the

use of dangerous substances or processes; (5) Heavy lifting and undue physical strain to be eliminated to the fullest extent possible; (6) Suitable seats and freedom for workers to use them when not engaged in work which requires a standing position.

Safe working conditions require:

(1) Equipment and machinery adequately guarded against injury and in good working condition; (2) Safety equipment and clothing (goggles, shoes, gloves, etc.) maintained in good condition; (3) Safe, uncrowded and well-lighted workspace, stairways, floors, halls, rooms and passageways; (4) Instruction and training in safety on the job for all workers.

International Co-operative Alliance Convenes in Switzerland

Four hundred delegates from 24 countries attended the 16th World Co-operative Congress at Zurich, Switzerland, October 7 to 10, 1946. It was the first World Co-operative Congress since 1937 and the Co-operative Union of Switzerland collaborated with Consumers' Co-operative Society of Zurich, as hosts.

Mr. A. B. MacDonald, General Secretary of the Co-operative Union of Canada, was the official Canadian delegate.

The governments of Great Britain, United States, Belgium, Sweden, Italy, Ceylon and Switzerland sent official representatives and fraternal delegates were present from the United Nations Organization; United Nations Economic, Social and Cultural Organization; International Federation of Agricultural Organizations; World Federation of Trade Unions; New Zealand Producers' Association; International Labour Office and the International Women's Guild.

Lord Rusholme, in his presidential address stated that "the principles of co-operation must pervade the life of every nation and the challenge of the future is for the movement to expand international trade and production". He called upon the delegates to exert worldwide influence for peace and the curbing of international monopolies through development of international co-operative trade.

Among the definite actions taken by the Congress was the organization of an Interna-

tional Petroleum Association, which had been advocated at the Congress of 1937. Pledges were given by 22 national organizations to provide the initial capital necessary for launching the project, which will be capitalized at \$15,000,000.

A committee comprised of representatives of 20 countries was set up to study ways and means of organizing an international news agency. Approval was given to the creation of a foundation for the establishment of a centre devoted to the study of international co-operation, and the executive of the I.C.A. was instructed to send a delegation to Germany to study and assist the rehabilitation of the co-operative movement in that country.

Although the I.C.A. has been named as a consultant on the Economic and Social Council, it was decided to work for a "more effective collaboration", so that the I.C.A. might obtain a direct voice and vote in the Council. The executive was instructed to work for closer understanding and collaboration with the F.A.O.; U.N.E.S.C.O.; the W.F.T.U.; and co-operative organizations of agricultural production.

Lord Rusholme was re-elected president and A. Khokhlov of Russia and Murray D. Lincoln of the United States, were elected vice-presidents. Other members of the new executive were two representatives from Great Britain, and one each from France, Switzerland, Belgium, Holland, Denmark and Sweden.

Dominion-Provincial Conference of Labour Ministers

A DOMINION-PROVINCIAL Conference of Labour Ministers was convened in the Railway Committee Room of the House of Commons on October 15, 16 and 17. Constituting the agenda were certain written proposals on Dominion and Provincial labour legislation in regard to collective bargaining and conciliation which were presented at the opening session by the Dominion Government.

These proposals outlined to the Provincial Ministers the view of the Dominion that the principles of union recognition, the right of employees to organize, the legal recognition of collective bargaining rights, and the prohibition of unfair practices by employers and unions, which have been recognized and effectuated under the Wartime Labour Relations Regulations, P.C. 1003 of February, 1944, as a war measure, should be continued in the post-war period. In so far as the Dominion is concerned, it would be proposed to revive the Industrial Disputes Investigation Act, and by amending it, to carry forward the principles used in P.C. 1003 in regard to industries under Dominion jurisdiction.

The proposals also embodied the idea that by agreement between the Dominion and the Provinces, ways and means might be found to bring about uniformity of legislation in this field and a broad adherence to the principles to be added to the I.D.I. Act. This, it was suggested by the Dominion, might be achieved by concurrent Dominion-Provincial legislation, or by the Provinces agreeing to Dominion administration in some important areas within Provincial jurisdiction, or by voluntary action by the Provinces in line with what the Dominion proposes in its own field.

The Provincial Ministers, commenting in detail on the Dominion proposals, all agreed that they would carry the proposals back to their Cabinets, and that consideration would be given to the problem of developing uniform legislation among the Provinces and the Dominion.

It was decided that a draft bill should be prepared by the Dominion Department of Labour, which would be submitted to the Provincial Ministers of Labour for their consideration and advice.

Finally the Conference suggested that Dominion-Provincial Labour Conferences should be convened at Ottawa annually by the Dominion Minister of Labour.

The Dominion proposals as presented read in part as follows:—

Dominion Proposals Submitted by the Minister of Labour for Discussion by the Conference of Dominion and Provincial Ministers of Labour

SUMMARY OF EXISTING LEGISLATION

P.C. 1003 was enacted in February, 1944, under the War Measures Act following upon the decisions made at the Conference of Labour Ministers of the Dominion and Provinces held in November, 1943, and subsequent consultations between the Dominion and Provincial labour authorities on the content and form of the legislation. This legislation has been continued in effect under the National Emergency Transitional Powers Act, 1945. The Regulations apply to industries ordinarily under Dominion jurisdiction and to certain other industries specified therein which are ordinarily under provincial jurisdiction. The legislation has been further applied, by provincial legislation, to all provincial industries in the Provinces of British Columbia, Manitoba, Ontario, New Brunswick* and Nova Scotia. Provincial boards established pursuant to agreement between the Dominion and the Province administer the legislation in its application to provincial industries in the Provinces of Manitoba, Ontario, New Brunswick and Nova Scotia. The Minister of Labour for British Columbia acts in the same capacity in that Province.

A Provincial board established pursuant to Dominion-Provincial agreement administers P.C. 1003 in its application to war industries in the Provinces of Quebec and Saskatchewan although the legislation has not been extended by provincial enactment to other provincial industries. It is of interest to note that in the Province of Quebec, the chairman of the provincial board established under P.C. 1003 is the same person who is chairman of the provincial board which administers the provincial collective bargaining legislation.

The administration of P.C. 1003 in Alberta and Prince Edward Island with respect to industries covered thereby has been handled from Ottawa by the National Board and Dominion Department of Labour.

Each provincial board or agency established as aforesaid has vested in it the powers of the National Board under P.C. 1003 in respect to the industries designated as war industries and which are normally under provincial jurisdiction as well as such other provincial industries to which the province has made applicable the provisions of the legislation.

Provincial boards' decisions are subject to appeal by leave to the National Board.

The conciliation services of the Dominion and the Province have been jointly utilized in the administration of the legislation in a number of the provinces.

Where provincial boards or agencies have been established by agreement to administer the legislation in the province, the costs involved in provincial administration have, in general, been shared between the Dominion and the Province on the basis of one-third by the Province and two-thirds by the Dominion.

P.C. 4020 of 1941 which makes provision for the appointment and use of an Industrial Disputes Inquiry Commission has been used extensively in conciliation in connection with war industries and other industries covered by P.C. 1003. Even in the case of industries under provincial jurisdiction in the Provinces of Alberta, Saskatchewan and Quebec, a number of difficult situations in such provinces, notably in the meat-packing industry, have been settled in a very satisfactory manner by Commissioners appointed under P.C. 4020 after consultation with the province concerned.

PROPOSALS FOR NEW LEGISLATION

With the lapse of the National Emergency Transitional Powers Act, 1945, on or before March 31, 1947, P.C. 1003 and P.C. 4020 will likewise lapse at that time and it is proposed that jurisdiction over labour matters normally falling to the provinces but assumed by the Dominion during the war will be returned to the provinces by April, 1947.

In consequence of the foregoing, the Dominion Government proposes at the next session of Parliament, to propose amendment and revision of the Industrial Disputes Investigation Act by including the substantive provisions of P.C. 1003 and P.C. 4020. Such legislation will be applicable to industries which are under Dominion jurisdiction under the provisions of the British North America Act or which have been subsequently declared by Parliament to be a work for the general advantage of Canada or of two or more provinces. The legislation proposed will incorporate the main provisions of P.C. 1003 with appropriate changes based upon the experience gained by the Dominion and the Provinces in the administration of P.C. 1003 or like provincial legislation.

No field of Dominion and Provincial administration is more fluid than that of labour relations. Collective bargaining practices in industry are changing rapidly without regard for provincial boundaries or limitations of provincial jurisdiction.

In recognition of this situation, it seems advisable, in the interests of labour and management and in the national interest, to consider, as far as reasonably possible, uniformity of legislation and a standard pattern of administration of Dominion and Provincial legislation to deal effectively with difficulties arising in labour-management relations.

The legislation enacted during the war by the Dominion with the concurrence of the provinces in matters affecting labour, and administered by Dominion and Provincial authorities on a uniform basis, has operated on the whole in a very satisfactory manner and with beneficial results.

Moreover, it is probably not going too far to say that failure on the part of the Dominion and the Provinces to develop uniformity in legislation and a standard pattern in the administration of labour relations legislation will be criticized by labour, management and the public. Both labour and management organizations have advocated the same.

The Dominion Minister, therefore, is very desirous of obtaining the views of all provinces on the proposed legislation.

If the Dominion legislation can be so framed that it meets the views of all provinces, it may quite well develop that Provincial Governments would see fit to adopt the same provisions in provincial enactments to apply to all industries which fall under provincial jurisdiction. In this way uniformity would be attained.

The views of the Provincial Ministers as to the extent to which the proposals outlined will be acceptable to their respective governments are invited.

If the proposals outlined are acceptable in whole or in part by any province, it is proposed that the pattern of administration of the legislation enacted by the Dominion and made applicable to any provincial industries should be as follows:—

- (a) The National Board established under Dominion legislation will deal with all Dominion Industries.
- (b) In the case of a province which makes the Dominion legislation applicable to specifically designated provincial industries, the National Labour Relations Board and the Dominion Minister will administer the legislation.
- (c) In the case of a province which applies Dominion legislation to all industries, the province would administer the legislation through its own agency for all provincial industries except those which were specified in the provincial legislation as being of a national or inter-provincial character, which would

be handled by the National Board and the Dominion Minister.

- (d) The Dominion does not propose at present that there should be any right of appeal from provincial bodies to a National Board; on the other hand when provincial labour policies have been determined and if requested such provision will be considered.

Even if the decision of some provinces is not to apply the Dominion legislation to provincial industries, the opinion of those provinces on the legislation is sought in order that the provisions thereof and procedure thereunder should be substantially in accord with the views of provincial governments in so far as this proves practicable so as to provide a uniform pattern across Canada.

Resolution Adopted by Conference

The Conference considered details of proposals for amendment to the Dominion legislation, and the Provincial Ministers made certain comments and suggestions which the Dominion undertook to consider carefully in connection with its proposed new legislation.

The Conference agreed to the principle of holding annual similar conferences in the future, to consider matters of joint interest to the Dominion and the Provinces.

At its conclusion the Conference adopted unanimously the following resolution:—

"This Conference wishes to express the view that the statement of the Federal Government as presented by Mr. MacNamara on Tuesday, October 15, is generally acceptable in that—

"(a) it recognizes the responsibility and jurisdiction of the Provinces in the matter of collective bargaining legislation, with the exception of coverage of those industries which come within Federal jurisdiction;

"(b) it recommends the adoption as far as practicable of uniform collective bargaining legislation by the Provinces and the Dominion;

"Therefore, the Conference recommends that, following adjournment of this meeting, a draft bill be prepared by the Dominion Department of Labour, covering the matters referred to in the memorandum submitted to the Conference, in so far as they are within Federal jurisdiction, and that such draft bill be submitted to the Ministers of Labour for the Provinces for their consideration and advice;

"Also the Conference suggests the desirability of annual conferences of Provincial Ministers of Labour and their officials, to be participated in as well by officials of the Dominion Department of Labour, being con-

vened at Ottawa by the Dominion Minister of Labour at the intervals indicated."

Commenting upon the Conference after its close the Hon. Humphrey Mitchell, Dominion Minister of Labour, stated that the Conference had been most harmonious in relation to its objective, and had benefited by the very helpful presentation of the views of the various Provinces in regard to desirable labour legislation on conciliation and collective bargaining. The Minister of Labour expressed himself as thoroughly satisfied with the meeting.

Persons in Attendance

The following persons attended the Conference as representatives of the Dominion or of the Provinces:—

Nova Scotia

Honourable L. D. Currie, Minister
Mr. D. D. Boyd, Solicitor for Department
Mr. R. E. Anderson
Miss L. Dumaresq

New Brunswick

Honourable S. E. Mooers, Minister
Mr. N. D. Cochrane, Deputy Minister
Mr. J. Edward Hughes, Counsel

Quebec

Honourable Antonio Barrette, Minister
Honourable Justice Eudore Boivin
Mr. Gerard Tremblay, Deputy Minister
Mr. J. O'Connell-Maher
Mr. Cyprien Miron

Ontario

Honourable Charles Daley, Minister
Mr. J. B. Metzler
Prof. J. Finkelman

Manitoba

Honourable C. Rhodes Smith, Minister
Honourable J. O. McLenaghan
Mr. W. Elliott Wilson

Saskatchewan

Honourable C. C. Williams, Minister
Mr. W. K. Bryden, Deputy Minister

Alberta

Honourable C. E. Gerhart, Minister
Mr. K. A. Pugh

British Columbia

Honourable George S. Pearson, Minister
Mr. James Thomson, Deputy Minister

Dominion Representatives

Honourable Humphrey Mitchell
Mr. A. MacNamara
Mr. M. M. Maclean
Mr. C. A. L. Murchison
Mr. D. H. W. Henry
Mr. A. H. Brown

Also Present

Miss M. Mackintosh, Labour Legislation Branch
Mr. V. C. Phelan, Publicity
Mr. Harry J. Walker, *LABOUR GAZETTE*
Mr. G. M. Ingersoll, Secretary

Reconversion in Canadian Industry

Minister of Reconstruction Outlines Progress during First Year of Peace

IN an address delivered before the Winnipeg Board of Trade, Right Hon. C. D. Howe, Minister of Reconstruction and Supply, outlined the progress of reconversion in Canadian industry during the first year of peace. Referring to the present period as one of "high employment and income," the minister stated that the existent national income was double that recorded in 1939 and the present working force of 4.8 millions exceeded the 1939 total by one million.

He warned, however, that too many people were commencing to regard full employment as an end in itself and ignoring its necessary concomitant, improved standards of living. The result of the recent period of high employment and income had not placed a satisfying amount of houses and other commodities in the hands of consumers, he said. "In effect, present conditions remind us that full employment alone is not enough: full employment that carries with it low productivity per man-hour, or any restrictive or 'feather-bedding' practices, whether by management or labour, cannot yield high living standards at the same time."

Reconversion had proved remarkably smooth and rapid and compared favourably with the country's recognized wartime production accomplishment, the minister continued. He said that the very speed of reconversion tended to obscure the magnitude of the accomplishment. Since V-J Day re-establishment of almost one-third of the nation's labour force had had to be effected as a result of an enormous contraction in the munitions industry, and demobilization of the armed forces. Demobilization was now completed, however, and war industries were on a peacetime basis.

"The consequent redistribution of the working force between industries has been the striking feature of the past twelve months," he said. "There has been a major switch of the labour force away from the armed services and war manufacturing. During the year, they moved to other industries, so that today, as against a year ago, there are almost 30 per cent more people in the construction industry—a figure that gives you a notion of the pace of its expansion; in mining, finance and agriculture, there are increases of 10 per cent above last year; in the retail trades and transport, increases between 5 and 10 per cent; among the self-employed (those working on their own account), there has been an increase of almost 5 per cent. The logging industry continues to require more workers than it can obtain. Likewise the construction

industry (including housing) is limited only by material and skill shortages. Mining, the only major industry whose employment is below pre-war levels, is beginning to resume activities suspended during the war, and is clamouring for workers. Not only was it necessary to make a major shift in the distribution of labour, but the labour force itself grew by almost 6 per cent in the year, so that jobs had to be found for additional labour of that amount."

Mr. Howe described the difficulty in meeting the vastly expanded demand for construction materials despite the improved capacity of the construction industry. The composite demand for housing and industrial expansion exceeded the possible supply. Also, he said, critical production units which supplied end industries had to be supplied in order to prevent large scale production from being arrested by the scarcity of one or two parts.

"My department has watched the reconversion process closely. By March the war production had been virtually disbanded, demobilization was well on its way, and many firms had already switched to peacetime production. Other war industries required time to make re-adaptations. But by March the physical reconversion of productive facilities was about half completed: and by August reconversion was approaching 75 per cent completion. This was a creditable performance on the part of industry, especially as it was hampered by shortages and difficulties in getting co-ordinated flows of necessary materials. Nevertheless it was expected that reconversion would be 90 per cent completed by the end of the present year and fully accomplished by the Spring of 1947. The strikes, however, have created a barrier to this progress also.

"While firms were engaged on reconversion, they were also proceeding with modernization. Of the 650 major plants engaged on war production, we found that no less than half of them had programs of expansion and modernization. Most of these firms expected to complete their programs by the end of the year, while others expected to complete theirs in 1947, or in the case of big projects by 1948 or 1949. In short, conditions became increasingly favourable after March.

Record in Various Industries

"In agriculture the field crops (except hay and clover) are above last year's level, as are the fruit crops. Dairy production and live-stock are down, however. But prices on the whole have been higher, so that by the year's

end, farm income in the nation as a whole should not be much below that of 1945.

"In the pulp and paper industry, the trend has been upward and output is at a record level; it should continue so for some time, since there is likely to be a market for all that industry can produce.

"The mining industry reached a peak in 1943, but suffered a 37 per cent decline with the fall in war demands; the potential demand is still strong and will become more effective as the hard consumer goods industries get back to capacity operations. Coal production in the first six months was higher than last year, the present acute shortage being due to the U.S. coal strikes, and the lake shipping strike.

"Steel ingot production declined moderately with the fall in war demand, but the industry had almost completely recovered by May of this year. Steel production was affected by shortages of scrap and coal, but since June has been completely disorganized by the steel strike. In result, the steel supply-demand situation will remain precarious into 1947 and will hamper production in the durable goods industries.

"In textiles there have been manpower shortages for some time, and progress was being made towards remedying this until the upward trend was interrupted in the summer by the labour disputes in that industry.

"In durable consumer goods, the shortages are still acute. But it is often forgotten that in many of these trades, output by May had reached, and exceeded, the pre-war level. Factory shipments of radios, for example during the first half of the year, amounted to 225,000 sets, and was in fact slightly higher than in the same months of the record year of 1940. The June production of electric refrigerators (5,670 units) was also above the 1941 average. Similarly the output of washing machines and others compared favourably with pre-war years. Over 32,000 trucks were produced during the first five months of 1946, and the 13,000 passenger cars manufactured in May were only slightly below the output of the peak years of peace."

Need for Co-operation Between Economic Groups

The Minister said that strikes in Canada and the United States had impeded the expansion progress, which started to falter in May and has since produced declines in many industries. "The effects of this summer's strikes are far-reaching and some of these effects will persist long after the strike settlement." He said that the recent sharp declines in the Canadian and American stock markets, while not necessarily indicative of industrial recession, did illustrate the change in the outlook for the future on the part of many observers.

He stated that the degree of co-operation that existed between the groups comprising the economic system was less than was requisite for the maintenance of high and stable levels of employment with good standards of living. The job of government, he contended, was the establishment of conditions which would promote high living standards and still be compatible with the freedom of action desired by households, firms and labour. "Government, as it were, has to create a favourable climate for such growth.

"Thus, for example, to aid the transition from war to peace, the federal government has been modifying restrictive regulations as fast as conditions would permit: surplus war materials and equipment were speedily removed from war plants, and about 60 per cent of these are in peacetime production, with 10 million square feet of industrial floor space delivered to industry: fiscal, price and wage policies were modified during the year, and special measures taken to maintain and if possible expand the level of exports. We contributed to UNRRA, took a leading part in establishing the Food and Agriculture Organization, and had a share in shaping the World Bank and Monetary Fund. To ease the transition and as an investment in the future of our trade, we extended export credits on a great scale (\$1,250,000,000 to the United Kingdom and \$650,000,000 to other countries). By these measures we have generally put relatively great energy into the re-establishment of world trade on which we so much depend. Other measures were taken to help to stabilize the flow of consumer expenditures. This is what I mean by saying we have tried to create a favourable climate.

"A certain minimum of economic co-operation between Dominion and provincial governments is necessary if we together are to provide a favourable climate for the development of industry and enterprise. That minimum of co-operation has not yet been accomplished.

"The households, firms and labour are the repositories of energy and enterprise," he said, and a "certain minimum degree of co-operation on their part is therefore also necessary if efficiency is to be achieved."

He attested to the need for efficiency if prices are to be maintained low enough to hold and expand the market for Canadian products and provide the sought-after increasing standards of living.

"I repeat, government at its best can only provide the good climate for economic growth. The growth itself depends on the efficiency of labour, and management, on their willingness to work together for higher standards of living, and on their mutual determination to give value for costs."

Cost-of-Living Index: its Purpose and Construction

THE Dominion Bureau of Statistics cost-of-living index is a measurement of price change. It is constructed to measure the influence of price changes upon the living costs of urban wage-earner families of average size, whose pre-war earnings could be considered as average in amount for the year ending September, 1938. The typical families of this group had two or three children, and total annual earnings running close to \$1,500. They had been entirely self-supporting throughout the survey year.

The objective of the index should be kept clearly in mind. It was not designed to measure changes resulting from shifts to higher or lower levels of living, and was not constructed to take account of the effect of buying more goods or better goods. It is concerned with the influence of price changes upon many families who live in urban areas extending from Halifax to Victoria.

For this reason it may show fluctuations which do not conform closely to the experience of minority groups or particular areas.

Meaning of a Cost-of-Living Index Number

Index numbers are expressed customarily as percentages. The figure of 126.8 for October, 1946, means that the cost of the budget forming the basis of the Dominion Bureau of Statistics cost-of-living index has risen 26.8 per cent above the corresponding cost in the reference period. This reference, or base period, as it is more commonly called, is a five-year interval covering the years 1935 to 1939 inclusive. The average cost of the index budget in this period becomes 100.0 in relation to the October, 1946, index of 126.8. It is often convenient to consider budget costs in other periods as equal to 100.0, in order to show percentage changes covering some interval of special significance. August, 1939, has become a special reference period because of the demand for measurements of cost-of-living increases since the outbreak of the war. The cost-of-living index of 100.8 in August, 1939, was slightly above the 1935-39 average level, and when the August, 1939, budget cost is taken as equal to 100.0, the October, 1946, index becomes

$$125.8 \left\{ \frac{126.8}{100.8} \times 100.0 \right\}$$

Cost-of-Living Index Budget

The cost-of-living index budget has been constructed from detailed records of purchases and expenditures of 1,439 typical urban wage-

earner families in the year ending September, 1938. These families were located in the following twelve cities: Charlottetown, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. The selection of the cities and the location of the typical families was almost as difficult and laborious a task as the collection of the budget records. It was based upon a very careful study of 1931 population census material to determine the principal characteristics of wage-earner families and the most logical centres in which to sample them. The final expenditure survey in 1938 was preceded by a preliminary investigation of approximately 50,000 families, in order to make sure that expenditure records actually obtained would be typical of the wage-earner family group.

Two points were of major concern in collecting these records: (1) to obtain the total expenditure of each family upon food, shelter, fuel and light, clothing, homefurnishings and services, and a residual group including all other living requirements (referred to in the index as "miscellaneous items"); (2) to obtain the physical quantities, wherever possible, of individual items purchased. It required an average of four hours to obtain this information from each family.

There were two stages in constructing the index budget from the expenditure and purchase records collected. The first was an analysis of family expenditures to determine the breakdown of each dollar spent, into the amounts paid for food, shelter, clothing, etc. It was found that for each dollar spent by the 1,439 families, the division between budget groups was as follows:

<i>Budget Group</i>	<i>Cents</i>
Food	31
Shelter	19
Fuel and light	6
Clothing	12
Homefurnishings and Services...	9
Miscellaneous items	23
Total (Consumer Dollar)....	100

The second stage involved the selection of individual items to be included in the index budget, and the determination of the average quantities purchased. This selection was based upon (1) a careful study of the comparative amounts of individual items purchased by survey families, and (2) the knowledge that

prices for a comparatively small number of items will measure accurately the changes in price levels of a larger number of items of the same type of materials. It is reasonable that this should be so, and it has been verified many times by actual test. Price series for a few representative cuts of beef, for example, will record accurately the change in prices for the whole carcass; similarly, prices for a few items of rayon, wool, or cotton apparel will measure price changes for similar garments of these materials. This is a fundamental point in price index number construction, and one which is not well understood.

Its application to index number construction can be illustrated by showing in outline, how the October, 1946, cost-of-living index of 126.8 is calculated. The starting point is the "consumer dollar" breakdown already shown above. It will be recalled that this included *all expenditure*, not simply the expenditure upon 150 specially selected budget items. This breakdown is shown again below, in column 2, recording the number of cents from each dollar of living expenses which went for food, shelter, fuel and light, clothing, home-furnishings and services, and miscellaneous items. Column 3 shows corresponding price index numbers for each budget group. The food figure of 146.5 indicates that the level of food prices had risen 46.5 per cent above the 1935-1939 average level by October, 1946. This measurement is based upon Dominion average prices for a list of 46 food items, taking into account their importance in actual family purchases. For example, the food index is not an average for prices for one quart of milk, one dozen eggs, one pound of butter, etc., but of 10.5 quarts of milk, 1.4 dozen eggs, 2.8 pounds of butter, etc. These are the amounts of actual average weekly purchases reported. The increase of 46.5 per cent for the index list of foods is then taken to represent the rise in all food prices. Thus, the food figure of 45.4 in column 4 is obtained by multiplying 31.0 (col 2) and 146.5 (col.

3). When similar calculations have been completed for other budget groups, the figures in column 4 add up to a total which is the actual cost-of-living index for October, 1946.

Detailed comment upon the choice of the 150 budget items would require considerable space and would add very little to an understanding of the index. The complete list can be obtained upon request from the Dominion Bureau of Statistics. The principal considerations which governed the selection of budget items was briefly as follows: Each budget group has been represented by a list of items sufficiently large to make accurate measurements of price changes in the merchandise or service field covered. It would be possible to add many more minor items without affecting the movements of the composite cost-of-living index by any significant amount. These additions would lengthen the time required to calculate the index and would impose a greater burden upon firms making price reports without improving the accuracy of the index. In some cases accuracy actually might be reduced, since comparisons on a quality, or specific quantity basis are not possible over a long period. This would be true of style merchandise such as women's hats. However, the cost of these omitted items has been included in group percentage weights, which represent all expenditures falling within the "consumer dollar" groups noted above. The base period food weight of 31 per cent, for example, was calculated from total food costs reported by survey families, although the food index includes only 46 items representing about 75 per cent of a representative family's food expenditure.

Cost-of-Living Group Index Numbers

Group index number construction follows a pattern somewhat similar to that in the illustration just given as to the method of arriving at the October, 1946, total cost-of-living index. The October, 1946, food index represents

Column 1	Column 2	Column 3	Column 4
Budget Group	Pre-war "Consumer Dollar" (cents)	October, 1946, Cost-of-Living Index Numbers	October, 1946, Cost of Purchases represented in Col. 2 (cents)
Food.....	31.0	146.5	45.4
Shelter.....	19.0	113.4	21.5
Fuel and light.....	6.0	107.3	6.4
Clothing.....	12.0	130.2	15.6
Home furnishings and services.....	9.0	128.8	11.6
Miscellaneous items.....	23.0	113.9	26.2
Total.....	100.0	126.7

the percentage relationship between total costs of a food budget at base period average prices, and at October, 1946 prices. The quantities of foods in the budget have a very important influence upon this result. The following illustration should help to make this point clear.

From August, 1939 to October, 1946, a Dominion average of retail bacon prices rose 70.1 per cent. Lard rose during the same period 87.0 per cent, bread rose 10.3 per cent; and milk rose 38.5 per cent. Now a simple average of these price changes shows an increase of 51.7 per cent, but that does not give a true picture of what these changes mean in terms of a food budget, because the average family spends more money per week on milk and bread than it does on bacon and lard.

The following table shows how much these price changes meant in the family budget.

Item	Amount in Weekly Budget	Average Price		Budget Cost		Percentage Change
		August, 1939	October, 1946	August, 1939	October, 1946	
		cts.	cts.	cts.	cts.	
Bacon.....	.7 pounds	31.1	52.9	21.8	37.0	+70.1
Lard.....	.2 "	10.8	20.2	2.2	4.0	+87.0
Bread.....	12.1 "	5.8	6.4	70.2	77.4	+10.3
Milk.....	10.5 quarts	10.9	15.1	114.5	158.5	+38.5
Total.....				208.7	276.9	+32.7

The increase in the *weekly cost* of these four items was 32.7 per cent, a very different figure from the straight average of the four percentage changes—51.5 per cent.

Prices used in Compiling the Index

Once a cost-of-living budget has been established, it continues to serve as the basis of index calculations for a period of years, requiring only minor occasional modifications to take account of special factors such as rationing and other unusual changes in consumption. The task of pricing the budget, on the other hand, must be repeated on a routine basis. Approximately 65,000 individual price quotations are collected each month for this purpose. They are secured from merchants, business agents, professional men such as doctors and dentists, and organizations and institutions such as newspaper publishing companies, hospitals, etc., in all provinces of the Dominion. Every possible care is taken to insure the accuracy of these price records. Field representatives regularly check prices in 13 major distributing points across the Dominion. Prices from other centres are carefully scrutinized and verified when apparent inconsistencies are observed.

The Bureau of Statistics is concerned not only with the accuracy of prices reported, but also with the comparative quality of goods priced from month to month. It considers a decline in quality to have the same effect upon living costs as a rise in price. Field representatives have been given special instructions and training regarding this matter, and price schedules for clothing and homefurnishings have been specially designed for the reporting of quality changes in addition to the recording of comparative prices. This type of reporting form has been used since the early 1930's.

Scarcities of inexpensive grades of goods have presented a special wartime pricing problem. Goods such as chinaware, furniture and hardware have been treated in the following manner. When a cheap set of dishes which sold for perhaps \$6.95 runs out of stock, the price is compared in the next month with the

price of the most closely comparable set of the same size in the same store. If the new set should sell for \$8.95, a \$2 increase will be reflected in the index, even though the new set may be considered more desirable from a merchandise point of view. Utility is held to be the basic consideration in such price comparisons. Following the same reasoning, a price comparison involving two different qualities of clothing, such as a man's shirt, leads to a slightly modified procedure. If the price of the new shirt is higher by 50 per cent than the old one, but the estimated length of wear has increased by only 25 per cent, one-half of the price increase is reflected in the cost-of-living index. Similarly, if the price paid for a certain brand of shirt remains unchanged, but the estimated length of wear drops 25 per cent, a price increase of 25 per cent is recorded in the index.

Cost-of-Living Budget Adjustments

Important changes in buying habits make budget adjustments advisable, although their importance upon cost-of-living index movements has been greatly exaggerated in the public mind. One of the most difficult problems of this type has been to distinguish

between supply shortages due to greater consumer buying, and shortages due to actual declines in supply. Within the past year, for example, many lines of clothing have been very scarce, although production records have continued to run well above pre-war levels. Scarcity due to heavier buying has not been considered a reasonable basis for removing an item from the index budget, or even for reducing its importance.

All budget adjustments have been recorded and described in periodic appendices to "Prices and Price Indexes," a monthly bulletin of the Dominion Bureau of Statistics in which the cost-of-living index is published. The most important of these resulted from the rationing of gasoline and the rationing or temporary disappearance of certain foods, including butter, canned vegetables and bananas. In all cases where conditions warranted reduced budget quantities for certain items, comparable quantities were added to other items. Fresh vegetables were added to compensate for the shortage of canned vegetables; reduced opera-

tion of motorcars was balanced by increased allowances for carfare and theatre admissions.

Summary

The official cost-of-living index measures the influence of price changes upon a wage-earner family budget. This is a pre-war budget which has been adjusted in detail on several occasions as major changes have occurred in the supply of certain commodities. The index is a percentage figure which shows the cost of the family budget at monthly intervals relative to the average cost in the five-year period 1935-1939. The comparative importance of different budget groups and different individual commodities is considered in making these calculations. Each month approximately 50,000 individual price quotations are obtained from all parts of Canada in order to calculate the monthly cost-of-living index. A field staff of fifteen cost-of-living representatives is maintained to check prices and also the quality of merchandise which is priced in representative distributing centres across the Dominion.

*Institute of Industrial Relations**

University of Toronto Provides Advanced Courses for Students of Labour-Management Problems

THE functions of the Institute of Industrial Relations in the University of Toronto are:—

- (1) to promote the study of industrial relations in the Graduate School of the University and in particular to promote interdepartmental co-operation and cross fertilization of disciplines;
- (2) to promote and assist research in this general field;
- (3) to develop more intimate relations between the University and business on the one hand, and trade unions on the other, in order to facilitate such research and to promote joint study of the problems of industrial relations by University scholars and men actively engaged in the field.

Methods to implement these objectives will be devised by the Director slowly and experimentally. The advice of a strong University committee is available. The Director will consult with representatives of management, labour, and government, and will study what is being done in American and English Universities.

Graduate Study

The Institute is not a new teaching department within the University. Candidates for degrees who want to work in the field of industrial relations enrol in the Graduate School under the sponsorship of one of the departments, schools, or faculties, which have offered, and will continue to offer, courses in various aspects of industrial relations, for example, Business Administration, Economics, Engineering, Law, Political Science, Psychology, Sociology, Social Work. Generally such a student's program, while predominantly in one department, will include some work in one or more other departments. The Director of the Institute will be glad to discuss proposed programs with prospective students, but the final approval of any program lies with the sponsoring department.

* Statement by Professor V. W. Bladen, Director, Institute of Industrial Relations.

Fellowships

The Institute will offer junior fellowships to graduate students undertaking a program of courses leading to the master's degree, and senior fellowships to more mature students engaged on research leading to the Ph.D. Mr. G. L. Greenaway of the Directorate of Civilian Personnel, Naval Service Headquarters, has been awarded a fellowship for the current session. Application for fellowships for the session 1947-48 should be made to the Director on or before March 1, 1947.

Research

The Institute will attempt to assist scholars engaged in research in this field and to initiate new studies of its own. It has been able to be of some assistance to Dr. H. A. Logan in the final stages of the production of a revised edition of his *History of Trade Union Organization in Canada*. Mr. W. R. Dymond was appointed a Research Assistant during the past summer in order that he might study Union-Management Co-operation at Lever Brothers Limited. The Institute hopes to arrange for the publication of his study. Mr. Farrell Toombs of the University of Chicago has been appointed a Research Associate. He will continue his researches on human behaviour in industry. He will also conduct a seminar on Human Relations in Industry in the Graduate School, and will try to arrange for a series of discussions on related topics with representatives of management and labour.

Contact with Management and Union Leaders

The mere establishment of the Institute has already led to many personal contacts. These will be fostered and extended. A number of personnel administrators and union officials spoke at the Summer School in Industrial Relations and it is hoped that many more such visitors will speak at seminars and classes in industrial relations in the University during this winter. Plans for conferences on particular topics with representatives of management and unions are under consideration.

Hours of Labour and Overtime Rates of Wages in Great Britain

IN most of the important industries in Great Britain the normal weekly hours of work and the rates of overtime pay are determined by collective agreements between organizations of employers and workpeople or by statutory orders under the Wages Councils Act and other legislation. An article in the September issue of the *Ministry of Labour Gazette* summarizes available information on this subject.

Normal Hours of Labour

In the majority of industries and services, the normal weekly hours are 47 or 48, according to the article. There are, however, numerous exceptions ranging down to 44 hours or less, and a few relatively unimportant cases of hours in excess of 48.

Although the hours in most cases are fixed without qualification, there are instances in which a degree of flexibility is permitted or implied. Thus in the building industry there are provisions for shorter hours during the winter period than in the summer and in some cases for still shorter hours in midwinter in cases where artificial light cannot be provided.

Collective agreements do not, in the majority of cases, specify the normal hours per day or the number of days to be worked in a week, the arrangements for distribution of the agreed normal weekly hours being usually left to individual employers. The weekly hours agreed upon are usually exclusive of the time spent on meals.

The minimum time allowed to elapse between two spells of work is sometimes specified, particularly in the railway service. In some of the transport trades the question of "spreadover" of hours also arises, when the day's work is split up into two or more spells of work apart from necessary stoppage for meals. The form of control consists mainly in fixing a maximum period over which the hours are allowed to be spread, or requiring special allowances to be paid where the spreadover extends beyond a certain length of time.

In a few industries the normal weekly hours of labour fixed for nightworkers are less than those fixed for day workers. This is the case in the general printing industry in which the weekly hours on nightwork are 42½ to 44 for different classes of workpeople as compared with 45 on day work. On the other hand the agreements in some other industries (e.g., engineering, shipbuilding, electrical contracting

in England and Wales and the wool textile industry) provide that the weekly hours on night work shall be the same as those on day work. In most of the agreements which deal with this subject the full week of nightworkers is stated to consist of 5 nights, and in a few agreements the number of hours per night is specified, e.g., 9 hours 36 minutes in the wool textile industry in Yorkshire.

Overtime Rates of Wages

In most of the British industries in which normal working hours are determined by collective agreements, provision is also made with regard to the rates of remuneration for work done outside the normal hours, and in many cases with regard to the conditions under which such work is to be done. In some instances the agreements limit the amount of overtime that may be worked or make stipulations as to breaks for refreshment or rest. Rates of payment for overtime are also fixed by the orders under the Wages Councils Act and other legislation.

The rate of payment for overtime usually takes the form of a specified fractional addition to the rate of pay for work done in the normal hours. The rates most frequently fixed are "time and a quarter" (i.e., 25 per cent above the ordinary rate), "time and a half" (50 per cent above the ordinary rate), and "double time" (twice the ordinary rate). In most cases the rate progresses according to the duration of the overtime worked. Thus, overtime pay often begins at the rate of time and a quarter and after two hours' work rises to time and a half, and may, in some cases, further rise to double time after four hours' work. Less frequently the rate does not vary with the duration of the overtime or does not rise until work is prolonged after midnight. In place of a fraction, the overtime rate sometimes takes the form of specified rates of time-wages higher than the ordinary rates, but examples of such rates are not frequent.

Overtime performed on Saturday afternoon frequently entitled the workpeople to a higher rate than that paid for overtime worked on other week-days. For instance, all overtime worked on Saturday afternoon is paid for at a rate of time and a half in many industries in which some of the overtime on other days is paid for at time and a quarter. For Sunday work, when performed by operatives who are not normally required to work during the

week-end, the agreed rate is, with a few exceptions, double time. It may be observed that in certain of the continuous process trades in which week-end work forms part of the normal week for workers in rotation, payment for such work is usually at an enhanced rate, e.g., time and a half. For all work performed on public holidays, both national and local, the rate is generally either time and a half or double time, the latter rate being very frequent in the case of Christmas Day.

The enhanced rates of wages for overtime may be payable for time worked in excess of the normal hours on each day, or in respect of time worked beyond the normal weekly hours. Where overtime payment is on a daily basis, the worker becomes entitled to the higher rate of pay as soon as the normal daily hours of labour have been performed, irrespective of the aggregate number of hours worked in the week in which the overtime occurs. Where the payment is on a weekly basis, the worker is not entitled to the enhanced rate until after the full number of hours constituting the normal week have been completed. The majority of agreements fall into the former class, but there are a number of important agreements (including, *inter alia*, those relating to hosiery manufacture, leather tanning and currying, boot and shoe manufacture, flour milling, vehicle building in Scotland, the retail distributive trades, and the non-trading services of Local Authorities in many areas), which are in the latter class.

Orders made in respect of various industries under the Wages Council Act specify the normal number of weekly hours in respect of which the minimum rates are payable and beyond which overtime rates have to be paid, and most of the councils have also declared the daily hours beyond which the overtime rates apply. Since the total of the normal daily hours (usually 4 to 5 on the weekly short day and 9 on other week-days) exceeds the normal weekly hours, overtime rates may be payable in respect of excess hours worked during the week, even though the time worked on any day may not have exceeded the declared normal daily hours.

In many agreements provision is made that time lost for various reasons shall be made up before the overtime rate becomes payable. Thus, the national engineering agreement states that a full day is to be worked before overtime is reckoned except for time lost through sickness certified to the satisfaction of the employer, lying-off on account of working all the previous night, absence with leave, or enforced idleness. Where works are on short time "no overtime shall be paid for work done between the full-time starting hours and the full-time stopping hour, but work beyond

these limits shall be paid for as overtime provided the full shortened day has been worked."

Some agreements make special provision to meet the case when an interval elapses between the close of the working day and the commencement of overtime working. National agreements for the engineering industry, for example, stipulate that when a man is called back to work after having ceased work and gone home the overtime payment should commence from the hour of re-starting work but should be at the rate payable as though the work had been continuous. In agreements in the printing trade a common provision is that when overtime is not continuous from the time of stopping work an additional hour's overtime, designated "call money", shall be paid over and above the hours actually worked. Other agreements require that workers recalled should have a minimum number of hours paid for (in some cases even though no work is found to be necessary); a few agreements fix overtime rates, when overtime is not continuous, which are higher than the normal overtime rate.

Other matters connected with the question of overtime payment which are dealt with in some of the agreements, include payments for working through mealtimes; notice required from the employer before instituting a period of overtime; interval for rest and refreshment during a prolonged spell of overtime work; the grant of an allowance towards the expenses of mealtimes taken during overtime; the payment or non-payment, according to circumstances, of overtime to a shift worker continuing to work after the termination of his proper shift as a substitute for another workman who has failed to turn up; and the calculation of the payment due in respect of fractions of hours.

In some agreements special provision is made in regard to the overtime rates for piece-workers.

In a few cases the additional payment in respect of overtime work is expressed as a fraction of the ordinary piece rates, or the earnings thereon.

In some other cases the ordinary piece-work rates are paid for work done in overtime, but the workpeople receive in addition to their piece-work earnings a supplementary flat-rate payment for each hour of overtime.

The third method of payment, which is by far the most general, consists in a payment additional to piece-work earnings, which is a fraction of the ordinary time rate to which the workers would be considered as entitled if not working by the piece. Thus, in the national agreement for the engineering industry it is stated that "the recognized overtime allowances calculated on day work time

rates shall be paid in addition to earnings under any system of payment by results."

The collective agreements in some industries contain provisions imposing restrictions on the amount of overtime that may be worked. These industries include building, engineering, shipbuilding, electrical contracting and printing, as well as a number of smaller industries or sections of industries in particular localities. The type of restriction imposed may be exemplified by the national agreement for the engineering industry, which, after enunciating the general principle that systematic overtime is deprecated as a method of production, provides that when overtime is necessary "no union workman shall be

required to work more than 30 hours' overtime in any four weeks after full shop hours have been worked, allowances being made for time lost through sickness, absence with leave or enforced idleness", but that in cases of breakdowns, repairs, replacements and alterations (whether for the employers or their customers) and in certain other emergencies, overtime is not to be restricted.

As regards the decision to work overtime, an agreement in the engineering industry provides that the right to decide when overtime working is necessary should reside with the employers, the workpeople or their representatives being entitled to bring forward any cases of overtime they desire to have discussed.

International Labour Organization

Women's Employment in Post-War Period

Report of ILO Committee

EIGHT expert members of the Committee on Women's Work of the International Labour Organization met in Montreal from July 8 to 13 to study the problems of women's employment in the post-war period. Mrs. Rex Eaton, Associate Director, National Employment Service, Canada, was among the experts in attendance.

In its report, which was submitted in October to the 99th Session of the Governing Body of the ILO, the Committee pointed out that the war gave large numbers of women an opportunity to prove that their aptitudes could be adapted to a great variety of skilled occupations, and urged that opportunities should be kept open for them.

"Owing to improvements in technique which have brought about the substitution of mechanical processes for the muscular effort required in certain occupations, female labour can be used on a much wider scale, especially in industry," the report stated. "In a word, the technical differences between traditional men's occupations and traditional women's occupations have disappeared to a large extent. Customary approaches to the problem of women's labour have changed less than mechanical processes. However, women to-day are much more conscious of the fact that they are active members of the labour force.

"In the interests of the human community and in the interests of the women workers to whom the ILO has pledged its protection, policy for women's employment should necessarily open to them prospects on a level with the capabilities which they demonstrate. Moreover, the administrative machinery for integrating workers in the national economy should, if necessary, be readapted in the light of these new concepts."

Placement of Women

In regard to the placement of women, the Committee considered it of basic importance that employment services should be expected to place in a vacant job the person best qualified to fill the job.

The experts agreed that an employment service should not be organized wholly on the

basis of sex; but certain of them expressed the view that separate sections for the placement of women and men give good results, provided they work along the same lines and in close collaboration.

The usefulness of vocational guidance was stressed. Guidance of individuals might be supplemented by methods of providing collective information, such as pamphlets, radio talks, films, etc., on careers and occupations, training facilities open to women, time needed for preparation, current wages, and prospects of success and promotion.

The need of trained personnel both for guidance and placement services was recognized by all the experts.

As regards both the placement of women and the granting of insurance benefits or assistance allowances during unemployment, the interpretation of the term "suitable employment", refusal of which entails suspension or loss of the benefits or allowances, was considered to be of primary importance. It was agreed that, for both men and women, the general standards for suitable employment, with revision in appropriate cases as to a reasonable period of time which may vary with individual circumstances, are: (1) skill qualifications comparable to those of the most recent employment, or of the highest skill used by the applicant; (2) wages comparable to those paid on the last job or to those established within the district offering the job; (3) suitability of experience; (4) convenience of location; (5) appropriateness of the applicant's physical condition to physical requirements of the job; and (6) absence of disqualifying circumstances in the job (such as trade disputes, wages below those provided by union contracts, or an unreasonable requirement of geographical shift).

It was pointed out that some of these requirements should be studied with particular care in the case of a woman worker, especially the location of the work place when a woman worker has a family or household responsibilities. Furthermore current interpretations of the term have often revealed a lack of understanding of women's capabilities, par-

vice is considered "suitable employment" for particularly in such cases as where domestic ser-
 women with high technical qualifications.

In regard to vocational training it was felt that effort should be made by education, dissemination of information and other means, to overcome the indifference to training frequently displayed by women.

Equal Remuneration for Work of Equal Value

The experts noted with satisfaction that the ILO recognizes in its constitution and elsewhere the principle that men and women should receive equal remuneration for work of equal value.

They reviewed the methods utilized in certain countries for analyzing the characteristic elements of each job and for furnishing in this way definite standards for fixing wages according to job content, and noted that, especially for mass production, these methods have been found effective.

The experts considered that, either by collective agreements or by legislation, measures should be taken for applying in a practical way the principle of equality which the ILO has affirmed and reaffirmed on various occasions. In particular, they requested the International Labour Office to follow carefully the development of methods for achieving this result.

Domestic Employment

After an extensive discussion of the problems of the low standard and traditionally female occupations, it was agreed that domestic service was the least well organized, oldest, and most widespread of these occupations.

There was also general agreement that domestic service in the household was by its nature one of the most socially important of all occupations. Since, however, a widespread scarcity of domestic workers had arisen in many countries, it had become apparent that it was necessary to improve the standards of work, remuneration and skill of the workers in this field. Standards of employment and of skill must be lifted to be comparable to those in well organized lines of work, it was felt.

Towards this end, the experts recommended that living conditions, leisure time and holidays with pay should be defined. Clear definitions of duties, either by means of a written contract as provided for in some countries, or by other means of defining the work, should be developed in all countries. Furthermore social security measures (including unemployment, accident, old age and survivor, invalidity, health and maternity insurance) should be extended to cover domestic workers.

It was pointed out that the introduction of mechanical processes and electric power into

homes is bringing into domestic employment the possibility of standards comparable to those of industrial occupations. Regulation heretofore suitable only to industrial work might, therefore, become adaptable to domestic employment, it was suggested.

In addition, it was suggested that this new development calls for vocational training to provide the worker with adequate skills.

The experts asked that the question of the status of domestic workers be placed on the agenda of the Conference at a forthcoming session in order to determine by a recommendation minimum standards which should protect domestic workers. It was also suggested that the International Labour Office undertake a study of the legislation and institutions providing for Home Aides as a basis for possible action.

Special Problems of Employed Married Women

There was general agreement that married women must have the right themselves to choose whether or not they should undertake work outside the home, and that legal hindrances to their employment should therefore be removed or their enactment avoided. Services such as the care of children, and the provision of prepared meals and shopping services should be encouraged.

Problems for Further Study

The experts agreed that studies were needed regarding changing aspects of women's work. In particular they called attention to an international aspect of the problem of industrial home work, namely that, with the improvement of transport facilities, employers were able to seek new sources of cheap labour across national boundaries.

Action Taken by Governing Body

On consideration of the report of the Committee on Women's Work, the Governing Body adopted the following conclusions:

(a) The Office should make special studies of legislation and institutions in various countries relating to a Home Aide Service, and of the new international aspects of industrial home work.

(b) The question of the status of domestic workers might be placed on the agenda of the Conference at a forthcoming session.

(c) The Office is authorized to present the report to the Employment Committee of the ILO, drawing attention to the suggestions relating to the employment of women in the post-war period.

(d) The Office is authorized, when extending invitations to committee meetings in

which women are interested, to draw the attention of the governments concerned to the importance of including experts on women's problems among the delegates and advisers.

(e) The Governing Body should designate a representative from each group to take part in future meetings of the Committee on Women's Work.

First Meeting of Metal Trades Committee, Toledo, Ohio, May, 1946

THE Metal Trades Committee of the International Labour Organization, held its first session at Toledo, Ohio, from May 2 to 10, 1946, in the auditorium of the Toledo Public Library.

Delegations in attendance consisted of eighty delegates and advisers, sixty-seven being full members of the Committee and thirteen being present in the capacity of adviser.

Thirteen countries were represented, namely, the United States of America, Australia, Belgium, Canada, Denmark, France, United Kingdom, India, Mexico, Netherlands, Norway, Sweden and Switzerland.

As with other ILO industrial committees, the basis of representation was two from government, two from employers, and two from workers, from each of the countries holding membership in the Committee. All countries represented at the first meeting had tripartite delegations in attendance, except for the Mexican delegation which did not include workers' delegates.

Czechoslovakia was to have been represented on the Committee, and Finland and Italy were to have been represented by observers, but in no one of these three cases was it found possible to have representatives present.

The Chairman throughout the sessions was Mr. V. Cyril Phelan, Canadian Government representative, who had been chosen as Chairman by the Governing Body of the ILO at its 97th Session in Paris, held in November, 1945. The three representatives of the Governing Body appointed to attend the meeting of the Committee, were Mr. V. Cyril Phelan (Canada) for the Government Group, Mr. Jules Lecocq (Belgium) for the Employers' Group, and Mr. Gunnar Anderson (Sweden) for the Workers' Group.

The Vice-Chairmen elected by the Committee were Mr. Romney, United States Employers' member, and Mr. Ilg, Swiss Workers' member.

Canadian Delegation

The Canadian members, appointed to the Committee by Order in Council, were as follows:—

Representing the Government: Mr. R. J. Tallon, Unemployment Insurance Commis-

sion, Ottawa; Mr. V. C. Phelan, Department of Labour Ottawa. (Technical Adviser to Canadian Government Members—Mr. William Duncan, National Employment Service, Winnipeg.)

Representing Canadian Employers: Mr. S. C. Evans, Taylor Forbes Ltd., Guelph; Mr. A. B. Lawrason, Eureka Foundry and Manufacturing Co. Ltd., Woodstock, Ont.

Representing Canadian Workers: Mr. G. P. Schollie, International Association of Machinists, Montreal; Mr. Lucien Lavallée, National Metal Trades' Federation, Montreal.

As Mr. Phelan was also Chairman of the Committee, Mr. Duncan substituted as Committee member in his stead for this first meeting.

Proceedings of the Committee

The Committee appointed a Steering Committee to make proposals for the organization of its work from day to day, and Mr. Phelan was selected as Chairman and Reporter for this Committee.

The earlier sessions of the first meeting were given over to a general discussion of the problems before the Committee, and of labour and social conditions in the metal trades industry in the various countries represented. A good deal of valuable data was laid before the Committee, and a general disposition was in evidence to endeavour to work out principles on an international basis which might succeed in promoting the welfare of those engaged in the industry in each of the several countries, while at the same time conducing to improved relations between management and labour, and the improvement of the industry as a whole.

Arising out of the general discussion, the Steering Committee recommended that three sub-committees be established, to report back at the same meeting on the main parts of the problem before the conference. Consequently, three sub-committees were set up, as follows:—

- Sub-committee on Employment and Production;
- Sub-committee on Industrial Relations;
- Sub-committee on Safety and Health.

The Sub-committee on Employment and Production consisted of twenty-five members—8 Government, 8 Employers' and 9 Workers'. That on Industrial Relations consisted of twenty-eight members—9 Government, 8 Employers' and 11 Workers'. The Sub-committee on Safety and Health was made up of fourteen members—4 Government, 4 Employers' and 6 Workers'. Provision was made so that the voting strength of each of the three groups would be equal on each of the sub-committees, in spite of the slight variation in the number of members available from each of the groups.

Mr. Tallon served actively on the Sub-committee on Industrial Relations, while Mr. Duncan was a member of that dealing with Safety and Health.

In view of the sub-committee procedure, the main business of the Committee as a whole, following the general discussion, became the adoption (frequently with some amendment) of the sub-committees' recommendations. A summary of the decisions of the Committee, based upon the sub-committees' reports, will now be given.

Safety and Health

Under this heading it was agreed to request the International Labour Office to undertake the preparation of a factual survey of the various measures taken in the different countries for the prevention of accidents and the protection of health in the metal trades. It was suggested that the ILO should act in collaboration with its Correspondence Committees on Accident Prevention and Industrial Hygiene and with the Metal Trades Committee itself.

Several resolutions on safety and health were also adopted, as follows:

First, that the Governing Body consider convening an international conference of labour statisticians, looking to an eventual international convention on standardization of statistics of industrial accidents and occupational diseases.

Second, that the Governing Body consider placing on the agenda of an early International Labour Conference the question of standardization of warning signs in industry.

Third, favouring the setting up of joint committees of employers' and workers' representatives in industry to promote the prevention of accidents and to protect health.

Fourth, advocating use by the different countries of all means of publicity to encourage accident prevention and to protect health.

Industrial Relations

The Committee, adopting the Sub-committee's recommendation, passed a resolution asserting the free right of employers and workers to join organizations of their own choice, and recommending that the govern-

ments of member states of the ILO should be asked to consider the repeal of any existing legislation which might prejudice the right of association, and to consider guaranteeing this right either by legislation or otherwise.

On the subject of promotion of the welfare of the industry and its workers, through the development of closer relations between management and labour, a lengthy resolution was adopted in which the Committee recommended the setting up in each country of machinery as follows:

"A. *In the social field*, the establishment of bargaining units, units responsible for interpreting agreements and supervising their application, and units for mediation and arbitration in case of disputes arising either before or during negotiations or again during the validity of collective agreements binding on the parties; According to the functions which they would be required to perform, these units might be national or regional or at factory level, it being understood that the latter would in no way take the place of the organizations parties to the collective agreements;

"B. *In the economic and technical field*, (a) the establishment of joint national committees for the metal trades, the object of which would be to assist the industry in maintaining its maximum efficiency by a full use of its economic, human and technical resources, should be taken into consideration; (b) the establishment of joint committees on the factory level with the object of maintaining and developing production without restricting the prerogatives of management should also be taken into consideration."

A third resolution affirmed the necessity for strict observance of collective labour agreements, as well as the amicable solution of difficulties while an agreement is in force.

Continuance of ILO studies on current legislation and practice, in regard to labour relations, was urged in a fourth resolution.

A fifth resolution recommended that the ILO study particularly wage conditions in underdeveloped regions, with a view to formulating recommendations for securing for workers in such areas adequate standards of living and social progress, together with freedom of association and the right to collective bargaining.

Production and Employment

The chief resolution on Production and Employment suggested:

(a) that high production is essential to high wages, full employment and a high level of consumption;

(b) that governments concerned should study their existing policies relating particularly to taxation, industrial relations,

government expenditure and foreign trade with the object of encouraging efficient production and expanding employment;

(c) that the ILO should continue studies bearing on maximum production and employment;

(d) that the ILO should inquire into schemes in existence in different countries, for a guaranteed wage to workers.

Looking to the immediate post-war shortages in European countries, the Committee sought by resolution to promote consideration by interested international bodies and governments, of ways and means of relieving these shortages.

Planning of government expenditures on products of the industry, to assist in stabilizing conditions, was proposed in a further resolution.

Study of extension of schemes of social security among metal trades workers by governments, was recommended.

The ILO was further recommended to study the effects on employment and production of:

- (a) technological improvements in industry;
- (b) various forms of reduced weekly hours.

The final resolution under this heading suggests that the attention of the Economic and Social Council of the United Nations be drawn to the advisability of capital equipment and technical assistance being made available for underdeveloped regions, to promote the prosperity of the industry.

Definition of "Metal Trades"

There being some difference of opinion in regard to the scope of the Committee's work, the question of a definition of "Metal Trades" was referred to the Steering Committee. Through adoption of the Steering Committee's

report, the Metal Trades Committee declared as follows:

"1. That the following definition of "metal trades" should be adopted as a provisional definition:

"Whereas it appears that there are necessary variations in the field referred to as the "metal trades" in the several countries belonging to the ILO; and

Whereas the Metal Trades Committee of the ILO considers that it is necessary that the Office be provided with some description of the field within which the Committee's interest lies; and

Whereas it is believed that any description of the Metal Trades now approved by the Committee, while useful in the pursuit of studies on an international basis through the ILO, would still not disturb practices in effect for strictly national purposes:

Therefore be it resolved that for the purposes of the Metal Trades Committee the term "metal trades" shall include the processing of either base or precious metals, or the fabrication or manufacture of articles of commerce of which the metallic content requires the major portion of the application of labour in its manufacture."

"2. That the International Labour Office should be requested to make such inquiries as may be necessary among the Member States of the International Labour Organization with a view to providing the next meeting of the Metal Trades Committee with data upon which a permanent definition might be based;

"3. That the International Labour Office should be asked to consult with Governments from time to time, until the next meeting of the Metal Trades Committee, on the variations of national definitions from that given in paragraph (1) of this resolution, and also on the extent to which the several reports received at the request of the Metal Trades Committee may be influenced by the provisional definition."

Next Meeting

It is planned to hold the second meeting of the Metal Trades Committee at Stockholm, Sweden, some time after the middle of 1947.

Textile and Building Committees of the ILO

MEETINGS of two of the industrial committees of the International Labour Organization were scheduled to be held at Brussels, Belgium during November. The committees are those which were set up for the textile industry and for building, civil engineering and public works.

The committees are composed of two representatives of employers, workers, and governments from the participating countries, the representatives of employers and workers being nominated by the principal organizations having a substantial membership in the industries in question.

The agenda of each of the two committees consisted of the following items: (a) social problems in the industry during the period of

transition from war to peace; and (b) future international co-operation concerning social policy and its economic foundations in the industry.

Canada's representatives on the Textiles Committee, which met from November 14 to 22, were as follows:—

Government Members: Mr. Raymond Ranger, Assistant to the Deputy Minister, Department of Labour, Ottawa, Ont.; Mr. F. J. Ainsborough, Industrial Relations Officer, Department of Labour, Toronto, Ont.

Employer Members: Mr. Harold G. Smith, President, Mohawk Mills Limited, Hamilton, Ont.; Mr. W. A. Kennedy, Director of Aberfoyle Manufacturing Co., Guelph, Ont.

Worker Members: Mr. Arthur Spivey, Vice-President, Local 147, United Textile Workers of America, Huntingdon, P.Q.; Mr. Maurice Leger, President, Local 779, Textile Workers' Union of America, Cornwall, Ont.

On the Building Committee, meeting between Nov. 25 and Dec. 3, Canada was represented as follows:—

Government Members: Mr. Paul E. Renaud, Chief of Treaty Division, Department of External Affairs; Mr. Joseph A. Meindl, Employment Adviser, Unemployment Insurance Commission, St. Boniface, Man.

Employer Members: Mr. J. Clark Reilly, General Manager, Canadian Construction Association, Mansonville, Brome Co., P.Q.; Mr. John N. Flood, Flood Construction Company Limited, Saint John, N.B. (substitute for Mr. Allan C. Ross, Ross-Meagher Ltd., Vice-President of Canadian Construction Association, Ottawa, Ont.).

Worker Members: Mr. Ernest Ingles, Vice-President, International Brotherhood of Electrical Workers, London, Ont.; M. Osias Filion, President, Building Trades Federation, 7996 Boyer Street, Montreal, P.Q.

Of the seven industrial committees that have been established by the ILO, six will now have

held their first meetings. Accounts of opening meetings of the Committees on Coal Mining and Inland Transport appeared in a supplement to the December, 1945 issue of the *LABOUR GAZETTE*; of the Iron and Steel Committee in the June, 1946 issue (p. 729); and of the Metal Trades Committee elsewhere in this issue. The Petroleum Committee, the last of the seven, is to hold its first meeting at Lima, Peru, in February, 1947.

At its 99th Session, held recently in Montreal, the Governing Body of the ILO decided that the second meetings of the Committees on Coal Mining and Inland Transport would be held in April or May, 1947, at Geneva, Switzerland; and that the second meetings of the Committees on Iron and Steel and the Metal Trades would be held in August, at Stockholm, Sweden.

Committee on Chemical Industry

The Governing Body further decided in principle upon the establishment of a committee for the chemical industry, the committee to hold its first session when provision could be made for it. This committee will be the eighth such international industrial committee to be set up.

99th and 100th Sessions of Governing Body

THE 99th and 100th Sessions of the Governing Body of the ILO took place prior to, and during the course of the Montreal Session of the International Labour Conference. (The proceedings of the Conference were summarized in last month's issue of the *LABOUR GAZETTE*, p. 1394).

99th Session

Canada was represented at the 99th Session by Mr. Arthur MacNamara, Deputy Minister of Labour, and Mr. Paul E. Renaud, Counselor, Department of External Affairs, assisted by Mr. Paul Goulet, Mr. A. H. Brown, Mr. E. Stangroom, Mr. V. C. Phelan and Mr. C. McCord, all of the Department of Labour.

Reference has already been made to action taken by the Governing Body at its 99th Session in appointing Mr. Edward J. Phelan as Director of the International Labour Office (L.G., Oct., 1946, p. 1399); implementing certain of the recommendations of the Committee on Women's Work (p. 1536 above); and setting dates for future meetings of industrial committees (p. 1540). Some of the other work of this Session was preparatory to the Montreal Conference, and its outcome has thus already been described.

In the course of this Session the Governing Body also approved a progress report of the ILO Committee on Accident Prevention, which met in San Francisco in July to consider a draft model safety code for factories.

A Preparatory Asiatic Regional Conference, which had been scheduled to meet at New Delhi, India, next January, was postponed until October, 1947.

The Governing Body decided to refer resolutions adopted by the Iron and Steel and Metal Trades Committees to governments or to the Economic and Social Council of the United Nations, as would be appropriate.

The Director's Report contained an obituary respecting Mr. Tom Moore, who for many years was President of the Trades and Labour Congress of Canada, and who was associated with the ILO from its earliest days, having attended the first session of the Conference at Washington in 1919, and having been a workers' member of the Governing Body.

100th Session

At the 100th Session of the Governing Body, the Canadian Government was represented by Mr. Renaud, assisted by Messrs. Goulet, Stangroom and Phelan.

Mr. Guildhaume Myrddin-Evans, Government Member from the United Kingdom, was re-elected as Chairman of the Governing Body. Mr. J. D. Zellerback, United States Employers' Member, and Mr. Leon Jouhaux, French Workers' Member, were re-elected as Vice-Presidents for the coming year.

The Governing Body appointed the members of a Committee on Juvenile Work, among whom are to be two Canadians, Mr. H. C. Hudson, Supervisor of Special Placements, and Miss Ruth Hamilton, Supervisor, Women's Division, both of the National Employment Service.

With a view to improving and standardizing the compilation of statistics in various

countries, particularly those which are needed as a basis for planning policies designed to maintain full employment, it was decided to convene a Conference of Labour Statisticians in Montreal in August, 1947. Invitations will be sent to all members of the ILO.

On the proposal of the World Health Organization, the Governing Body agreed to the establishment of two joint technical commissions, one on Industrial Hygiene, and the other on Provision for Medical Care and Health Services. The purpose of the Commissions will be to formulate means of avoiding duplication of efforts between the ILO and the Health Organization, and to recommend such common action as may be considered advisable.

Rehabilitation

Progress in Placement of Veterans

INFORMATION available indicates that rehabilitation has been proceeding successfully, in so far as absorption of veterans into civilian employment is concerned.

Statistics show that since early last Spring the total number of unemployed veterans has decreased rapidly. Month by month, since the end of the fairly difficult period of employment last winter, the numbers of veterans receiving out-of-work allowances and the numbers of unplaced veteran applicants at the National Employment Service offices have been reduced. At the same time demobilization has been all but completed.

When it is remembered that up to the end of August this year almost three quarters of a million men and women who were with the Armed Forces had been returned to civilian life during the past year and a half, it would seem that rehabilitation is now in its final stages—that the task of re-establishment is well on its way to completion.

But actually a good deal of work remains to be done before the veterans have all been translated into civilian workers—and the last part of the project, no less than the earlier phases, requires the full co-operation of all industrial employers.

First of all, most of a group of 100,000 veterans not yet placed in employment will go out in search of industrial employment in the next several months. These comprise veterans still to be discharged from the Forces, those now at universities, those taking trades training under Canadian Vocational Training, as well as those seeking work opportunities at the moment.

In addition to the hundred thousand or so veterans already referred to, an important but unestimated percentage of ex-servicemen, although presently working, have not been permanently re-established. Immediately upon discharge these veterans found that the work which they had planned to do was not available, or there were urgent manpower needs in important lines, so that men took temporary employment then offering. Rehabilitation will not be complete until as many as possible of this group have found suitable regular occupations.

During the period from May 1, 1945 to September 30, 1946, more than 375,000 jobs were found for veterans of World War II through the offices of National Employment Service. This figure does not represent the total number of veterans who obtained jobs through the Employment Service, but rather the total number of jobs found and filled. In many cases, because of the temporary nature of the employment, a single veteran may have had to be placed two or more times. Included in this total are 5,297 jobs found for veterans with service in both world wars.

Placement Briefs

From December 14, 1944, to September 30, 1946, a total of 7,398 handicapped veterans were placed in employment through the Special Placement Sections of the National Employment Service.

* * *

Between August 1, 1945 (when comprehensive records on reinstatement were first started) and October 2, 1946, at least 161,227 veterans returned to their pre-enlistment employment—a right safeguarded under the Reinstatement in Civil Employment Act. Of this number, 1,928 were women.

* * *

Almost 36,000 veterans are now taking training under the Canadian Vocational Training plan, to prepare themselves for future employment, while about 35,000 are being assisted in taking full time university courses.

* * *

At the end of March this year a total of 43,500 veterans were receiving out-of-work allowances, but by the end of September this figure had been reduced to about 20,000. The number of unplaced veteran applicants registered with the National Employment Service at the end of September totalled about 45,000 compared to 71,000 at the beginning of June—four months earlier.

* * *

At the end of September around 27,000 veterans were receiving temporary allowances

to assist them while awaiting returns from their own farms, or from business or professional ventures. Many others who had started their own businesses during the past year have since become self-sustaining.

* * *

It has been estimated that there are only about 17,000 members of the wartime Armed Forces still to obtain discharge under the general demobilization plan.

Uncovering Training-on-the-Job Opportunities

CONDUCTED by the National Employment Service in co-operation with Canadian Vocational Training and the Department of Veterans Affairs, the campaign to obtain training-on-the-job opportunities for discharged war veterans has brought a varied response. Among the somewhat unusual training-on-the-job employment opportunities offered were those in such occupations as grain buyers, seismograph helpers, social workers, station agents, reporters and diamond cutters.

The campaign has been given wide publicity in the newspapers, on the radio and by direct mail to employers. Those who could offer training-on-the-job opportunities were requested to inform the National Employment Service, or the Canadian Vocational Training Branch of the Department of Labour, or the Department of Veterans Affairs. Opportunities were uncovered in over 135 different occupations, but the greatest demand was for automotive mechanics, carpenters, and textile machine operators.

Numerous opportunities have been reported where the employer offered a high enough

wage to the trainee to make it unnecessary for the veteran to use all of his re-establishment credit to supplement his "learning income". In such cases the veteran can use his surplus credit for the purchase of tools, household goods, or for other re-establishment purposes.

On the other hand, some of the opportunities were found unsuitable for veterans because of the long period of apprenticeship, or the low starting wage. Consequently, some of them have been turned over to the Youth Training Division of the National Employment Service, which was set up within the past year to take care of "first jobbers".

Between May 1, when records were commenced, and September 30, 1946, 1,864 training-on-the-job opportunities were submitted to Canadian Vocational Training, divided by regions as follows: Maritime, 611; Quebec, 576; Ontario, 412; Prairie, 187; and Pacific, 78. Many others were submitted to C.V.T. and to the Department of Veterans Affairs prior to May 1, 1946. The campaign is still in operation and it is hoped that many more training-on-the-job opportunities will be revealed.

Booklets on Employment of Handicapped Persons

A SERIES of booklets entitled "Employment of Canada's Disabled—Veterans and Others" is being published under the authority of the Departments of Veterans Affairs and Labour. Their purpose is to explain the problems of employment of physically handicapped persons.

The first two booklets are entitled "Basic Considerations" and "Selective Placement" and have been given general distribution to all persons and agencies connected with re-establishment of the handicapped. The third booklet will deal with assessment of capabilities.

The booklets represent an effort on the part of the government to set forth the basic considerations involved and certain suggestions in the approach to the employment of disabled persons.

It is pointed out that, while the series refers particularly to the rehabilitation and

employment of disabled veterans, the principles of rehabilitation of the disabled upon which the booklets are based are applicable to all persons.

As explained in the preface, the booklets emphasize the fact that a physical disability is but one of a wide range of factors which differentiate the working potential of one man from that of another.

In speaking of the technique involved in the placement of persons suffering from physical incapacity, the introduction to the series explains that "the proper placement of disabled persons is neither difficult nor complex."

It calls only for "the application of good common sense, understanding and intelligence," and goes on to say that "it has been amply demonstrated that the disabled make good employees, with their productivity and

loyalty undiminished, and frequently enhanced."

The requisites of the employer in the matter of the physically handicapped are that disabled workers be "fully efficient" and that, if a disabled worker is employed, there be no increase in the accident risks and also that medical opinion will guarantee that the disabled worker's disability will not be aggravated by his work.

The initial booklet, *Basic Considerations* is designed to give Canada's employers an opportunity to study the problems involved in placement of the physically handicapped.

The fundamentals of this specialized field of employment are explained in broad, simple terms and the object of the first of these booklets is to provide employers with an appreciation of the problems of the disabled. The second booklet, *Selective Placement* gives the details of the selective placement procedure, and it is intended that the third booklet shall deal with assessment of the capabilities of the physically disabled.

The booklets are being widely distributed among employers. Single copies may be obtained from the Superintendents of D.V.A. Casualty Rehabilitation centres.

Hospitalization of Veterans

The number of patients in Department of Veterans Affairs hospitals and homes and in other hospitals under contract to D.V.A. has increased by 48 per cent since V-J Day, Hon. Ian A. Mackenzie, Minister of Veterans Affairs, announced at the end of October.

The total number of patients on August 11, 1945, was 8,805 and this has now increased to 13,020 as of October 12, 1946.

During the same period the normal bed space in Departmental installations increased from 9,416 to 15,223, an increase of 61 per cent, and the number of patients in hospitals under contract to D.V.A. increased from 2,265 to 2,658 an increase of less than 17 per cent.

"The largest increase noted has been for veterans of World War II, being 135 per cent, whilst the number of veterans of World War I receiving treatment increased by 25 per cent," the Minister said.

The number of outpatients increased over this period from 3,625 to 6,147 or approximately 70 per cent. At the present time some 33,000 outpatient treatments per week are provided under D.V.A. arrangements; of these treatments approximately one-third are carried out by family doctors and the remainder are provided at Departmental installations.

D.V.A. is operating 44 hospitals, homes, and wings of hospitals across Canada and is providing treatment facilities for veterans of World War I, World War II, members of the Armed Forces at the request of Department of National Defence, and for certain civilians, including Merchant Marine pensioners. Of the 44 units now operated by D.V.A., 16 were previously operated by the Armed Forces.

Films to Assist in Rehabilitation

All citizens' organizations that are actively interested in the successful re-establishment of Canada's veterans may have the assistance of the National Film Board. The Board has produced a series of films designed to convey the importance of the national rehabilitation program to the individual veteran, to industry and to citizens in general. It is hoped also by visual methods to increase public understanding of veterans' problems and the machinery that has been set up to aid in their solution.

In more than 75 Canadian urban centres community film councils have been organized and are ready to give every co-operation to groups wishing to arrange film programs. In

each of these centres the local volunteer projection service can provide the necessary facilities for showing the films.

Film libraries have been set up at several points in each of the provinces where a majority of the films may be secured. The others may be obtained from the National Film Society, 172 Wellington Street, Ottawa, Ontario. With few exceptions, the films are 16mm sound productions in English. The titles have been arranged under the following headings:

- (1) Machinery of Rehabilitation;

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

Winnipeg Printing Pressmen and Assistants' Union, Local No. 87, Winnipeg Typographical Union, No. 191, and International Brotherhood of Bookbinders and Binderywomen's Union No. 160, and certain employing printers in Winnipeg.

Hall Company Limited, Vancouver Properties Limited, Pemberton Realty Corporation Limited, Stock Exchange Building Corporation Limited, Yorkshire and Pacific Securities Limited, and Building Service Employees' International Union, Local 244.

Various railway companies and Brotherhood of Railroad Trainmen.

Canadian Pacific Railway Company, Lake Erie and Northern Railway, Grand River Railway, Napierville Junction Railway, Dominion Atlantic Railway, Quebec Central Railway, Toronto, Hamilton and Buffalo Railroad,

Toronto Terminal Railway, Public Markets Limited, Northern Alberta Railways, Esquimalt and Nanaimo Railway and Railway Association of Canada, and employees.

Johnson Matthey and Mallory Limited, Toronto, Ont.

Blue Cabs Limited, Vancouver, B.C., and Taxicab, Stage and Bus Drivers' Local Union No. 151.

Ferguson Atlantic Underwear Limited, Moncton, N.B., and United Textile Workers, of Canada, Local 17.

Canadian International Paper Company.

International Woodworkers of America, Local 1-71, and J. R. Morgan Logging Company, Limited, Pacific Mills Limited and Kelley Logging Company, Limited.

St. Charles Hotel, Limited, Winnipeg, Man.

Brown's Bread Limited, Toronto, and Bakery Wagon Drivers and Warehousemen's Union, Local 647.

Re: Winnipeg Printing Pressmen and Assistants' Union, Local No. 87, Winnipeg Typographical Union, No. 191, and International Brotherhood of Bookbinders and Binderywomen's Union No. 160, and certain employing printers in Winnipeg.

Reasons for Decision

With leave of the Regional War Labour Board for Manitoba the Unions mentioned above appeal to this Board from a Finding and Direction of the Regional Board, dated July 10, 1946.

The Unions' requests may be summarized as follows:—

1. A reduction in the normal work-week from forty-four (44) hours to forty (40) hours; and

2. Certain adjustments in wage rates.

We have considered carefully the arguments of the representatives of the Unions and of the employers. We have had an opportunity of reviewing the records of the Regional War Labour Board for Manitoba. The Regional Board obviously gave most careful thought to this question and that Board concluded that local conditions in Winnipeg are such as to render it inadvisable to reduce the normal work-week to less than forty-four (44) hours. Our investigation leads us to conclude that it

would not be feasible at the present time, to reduce the normal work-week from forty-four (44) hours to forty (40) hours. It has been demonstrated to us that the labour supply in the printing industry in Winnipeg is not sufficiently adequate to enable the Company to obtain the additional labour which would be required to augment the working force if the work-week is reduced to forty (40) hours. In addition, printing equipment is not available to make the necessary machinery replacements in the plants affected by this application. Under the circumstances, therefore, we agree with the decision of the Regional War Labour Board for Manitoba and dismiss this portion of the Union's appeal.

On the question of wage rates, we agree with the rates set by the Manitoba Board for journeymen excepting for the rate pertaining to the occupational classification "Two Colour and Rotary Pressmen". We are of the opinion that there is merit in the Union's contention that the occupational classification "Two

Colour and Rotary Pressmen" should enjoy a differential over and above the rates paid to Journeymen Compositors, Bookbinders and Pressmen (Single Colour). We find that due to the additional skill and requirements of this occupational classification there is a practice in the industry to pay to Two Colour and Rotary Pressmen a differential of ten (10c) cents per hour over and above the wage rates paid to Journeymen Compositors, Bookbinders and Pressmen (Single Colour). We consider that this practice should be followed in Winnipeg. We are not disposed to disturb the rates set by the Regional Board for Journeymen Compositors, Bookbinders and Single Colour Pressmen. We feel that it is fair to point out that in a previous appeal before this Board the officials of some of the same Unions interested in the present case argued that certain differentials have always existed between the wage rates paid in the newspaper industry and those paid in the job printing

industry. If we were to apply to this case the arguments advanced by them in the previous appeal we would have to reduce the rates granted in the present case by the Regional Board.

The Regional Board directed an upward revision of 7.7 per cent in the wage rates for the other occupational classifications. This Board has on many previous occasions indicated that, as a rule, it does not approve of general increases calculated on a percentage basis by reason of the fact that such a practice tends to destroy existing wage rate differentials. We believe that it would be just and reasonable to grant to the employees in the lower paid occupational classifications a general increase of seven (7c) cents per hour.

Finding and Direction will be issued giving formal effect to the above and varying the decision of the Regional War Labour Board for Manitoba accordingly.

October 10, 1946.

Re: Hall Company Limited, Vancouver Properties Limited, Pemberton Realty Corporation Limited, Stock Exchange Building Corporation Limited, Yorkshire and Pacific Securities Limited, and Building Service Employees' International Union, Local 244.

Reasons for Decision

The Companies own and operate office buildings in the City of Vancouver. The Union represents the Janitors, Elevator Operators and other employees in similar occupational classifications in the employ of the first four named Companies.

The Union asked the Regional War Labour Board for British Columbia to direct the said four Companies to increase the wage rates of those employees. In and by decision of May 6, 1946, the Companies were so directed. The Companies protested against the action taken by the Regional Board in disposing of the applications without first hearing the parties. A hearing was thereupon granted, and on July 15, 1946, new decisions were made. The original decisions directed the payment of single rates. The second group of decisions provided ranges of rates, the high of each being the same as the single rate previously directed.

Yorkshire and Pacific Securities Limited, applied to the Regional Board for permission to increase the wage rate for its employees in the occupational classification of Janitoress. The Regional Board directed the Company to pay higher rates than those requested.

All employers asked leave to appeal from those decisions. The Regional Board refused to grant such leave. The Companies applied to this Board for leave to appeal and after leave was granted to appeal.

The first four Companies plead inability to pay the increased rates. Counsel for the Companies assured us that such plea was made before the Regional Board, and that the plea was supported by evidence. The evidence in each case being a certified copy of the financial statements (balance sheet and profit and loss account).

It would appear that the Regional Board paid scant attention to the evidence in support of the plea of inability to pay. In our opinion the evidence is conclusive. Each of the four Companies shows a loss on operations. No provision is made or could possibly be made to retire any part of secured obligations, and in case there might be doubt in the minds of some, it should be made clear that shareholders do not receive any dividends.

We find that Hall Company Limited, Vancouver Properties Limited, Pemberton Realty Corporation Limited and Stock Exchange Building Corporation Limited, have shown inability to pay the increased wage rates, and because of this, the appeal taken by those Companies is allowed.

The Yorkshire and Pacific Securities Limited does not say that it is unable to pay the increased wage rates. The Company rests its appeal on the ground that the wage rates fixed are higher than those prevailing in other office buildings of comparable class and location, and are therefore discriminatory. The Company filed a statement (Appendix

F), showing the rates paid to employees in several office buildings in the same area of the City of Vancouver. The statement shows a wide variation in the rates paid, but it also indicates that in some instances the rates presently paid are as high as those directed by the Regional Board. In the case of the Janitoress, the rates directed are above the highest rates shown for that classification in Appendix F. The low of the range, however, is only 3 cents above the previous high rate.

We are entitled to assume, and do assume, that the Regional Board, in dealing with the Yorkshire and Pacific Securities Limited, case, proceeded on proper principles with full realization of the purposes and intent of the said Order. We must recognize the fact that the Regional Board has full knowledge of local conditions as the same apply to office buildings generally. The submissions in this case fall short of indicating that the Regional Board committed any fundamental error in its decision in question.

We allow the appeals of Hall Company Limited, Vancouver Properties Limited, Pemberton Realty Corporation Limited, Stock Exchange Building Corporation Limited, and we dismiss the appeal of Yorkshire and Pacific Securities Limited. Finding and Direction accordingly.

October 11, 1946.

Supplementary Reasons for Decision

We have just noticed that in that portion of our Reasons for Decision, dated October 11,

1946, which deals with the appeal of the Yorkshire and Pacific Securities Limited, we proceeded upon a fundamental misconception. Unfortunately, we mistook the case of the Yorkshire and Pacific Securities Limited for one of the other cases dealt with in the same Reasons for Decision. We were under the impression that the Regional War Labour Board for British Columbia had directed a range of rates for the occupational classification of "Janitoress". Actually the Regional Board directed the Company to pay a single rate.

Under these circumstances, therefore, we hereby amend our said Reasons for Decision by deleting therefrom the last three paragraphs and substituting therefor the following:—

The Yorkshire and Pacific Limited does not say that it is not able to pay the increased wage rates. The Company rests its appeal on the ground that the wage rate which was fixed by the Regional War Labour Board for British Columbia is higher than that prevailing in other office buildings of comparable class and location and are therefore discriminatory. We have examined the wage rates paid for the occupational classification of "Janitoress" in office buildings in Vancouver and we are of the opinion that it would be just and reasonable to direct the Company to pay a range of rates rather than to pay a single wage rate.

The nature of the range of rates to be paid will be indicated in this Board's Finding and Direction.

The appeals of the Companies are allowed. Findings and Directions accordingly.

October 18, 1946.

Re: Canadian National Railways, Canadian Pacific Railway, Dominion Atlantic Railway, Grand River Railway Company, Lake Erie and Northern Railway Company, Montreal and Southern Counties Railway Company, Niagara, St. Catharines and Toronto Railway, Northern Alberta Railways Company, Oshawa Railway, Quebec Central Railway Company, Temiscouata Railway Company, Toronto, Hamilton and Buffalo Railway Company, Toronto Terminals Railway, Temiskaming and Northern Ontario Railway (Ontario Northland Railway) and Winnipeg Public Market (Union Stock Yards), and Brotherhood of Railroad Trainmen.

Reasons for Decision

This application was originally submitted to the National War Labour Board under date of March 30, 1946. The Brotherhood asked the National War Labour Board to direct the Companies to increase by 25 per cent, the wage rates presently in effect for the employees concerned and to implement certain changes in rules which would affect compensation. The Board was also asked to direct that the said increases and changes be made effective on August 6, 1945.

On July 16, 1946, the National Board returned the issues to the parties and suggested that negotiations be undertaken with a view to presentation, if agreement could be reached, of a joint application on such basis as might consistently be approved by us within the governing provisions of P.C. 9384, as amended.

Similar action was taken concurrently by the Board with a number of other applications then before it which involved other groups of railway employees, as well as in

other cases in respect of which the Board has received notices that applications were pending. One of the applications returned for further negotiations had been filed with the Board prior to that of the Brotherhood of Railroad Trainmen.

Pursuant to our suggestion, the several organizations representing railroad employees and representatives of the railway companies concerned, entered into negotiations and agreement was reached between all Brotherhoods, except the Trainmen, and Canadian National Railways and Ontario Northland Railway (formerly the Temiskaming and Northern Ontario Railway Company). However, previous to the agreement having been reached, the Brotherhood of Railroad Trainmen and certain of the railway companies, including Canadian Pacific Railway Company and its subsidiaries, had withdrawn from the negotiations.

The agreement as concluded between the Canadian National and Ontario Northland Railways and railway labour organizations provided for a wage increase of 10 cents per hour or its equivalent effective from June 1, 1946, without regard to the dates upon which the applications or notices of application of any of the labour organizations had been filed. The agreement further provided that consideration of any rule changes would be deferred until February 1, 1947. Application for permission to implement the agreement was made jointly to the National War Labour Board by the signatory parties and authority was given to make its terms effective by our Finding and Direction of August 26, 1946.

As stated, neither the Brotherhood of Railroad Trainmen nor those railway companies which had withdrawn from the negotiations, subscribed to the agreement and we are now asked by the Brotherhood to consider their application on the original basis except that portion of the application which concerns changes of rules.

One of the Brotherhood's contentions is that we are now empowered to accept for comparative purposes the wage rates of American railroads operating in Canada as paid to their Canadian employees, which rates conform to wage scales paid to similar occupational classifications in the service of the said American railroads outside Canada. This contention is not well founded inasmuch as Section 22 of the Wartime Wages Control Order, P.C. 9384, still expressly stipulates that wage rates of employees engaged in international railway service, and established accordingly, shall not be taken into account by the National Board in considering any other application for changes in wage rates.

The submissions as presented on behalf of

the major railway companies do not dispute the entitlement of the workers represented by the Brotherhood of Railroad Trainmen to a wage increase in the same amount and subject to the terms as granted to other classes of railway employees though certain of the railway companies do plead inability to pay under present downward trends of railway earnings. Our views on the pleas of inability to pay the proposed wage increases in this case are the same as those set forth in our Reasons for Decision in the case of Canadian Pacific Railway, et al, and the Negotiating Committee of Employees.

It has been a long established principle that for similar work under similar conditions there should be parity of wage rates for railway workers on Canadian lines and certainly this has been largely true on the major systems. In this connection it must be remembered that the membership of the respective Brotherhoods comprises employees of all Canadian railways.

By Section 20 of P.C. 9384, as amended by P.C. 2432 of June 20, 1946, we are empowered to authorize or direct an employer to increase wage rates if and to the extent that we find such increased rates to be just and reasonable having regard to the purposes of the Order and to all circumstances deemed by us in our discretion to be material. Approximately 17,000 employees in railroad trainmen classifications across Canada are covered by this application and as stated, we have already authorized an increase in wage rates with effect from June 1, 1946, for approximately 115,000 employees (other than railroad trainmen) on the Canadian National and Ontario Northland systems.

Having regard to all the circumstances which we find to be material in this case, we must conclude that the achievement of uniform wage adjustments for equivalent service on all Canadian railways under our jurisdiction outweighs other considerations. We have decided to direct a wage increase of 10 cents per hour or its equivalent to have effect from June 1, 1946, for the employees represented by the Brotherhood of Railway Trainmen, in the service of the Canadian Railway Companies covered by the application, with the exception of: Algoma Central and Hudson Bay Railway Company, Essex Terminal Railway, Pacific Great Eastern Railway, Sydney and Louisburg Railway Company.

Because the four last named Companies are "Regional" employers, within the meaning of the by-laws of the National War Labour Board, applications concerning those Companies should be made to the Regional War Labour Boards having jurisdiction. Incidentally, the parties have already been

advised on this point. Decision in respect of Temiscouata Railway Company is reserved.

The National Board will direct all parties that any proposals for changes in rules governing working conditions affecting compensa-

tion shall be reserved until after February 1, 1947.

There will be Finding and Direction accordingly.

October 16, 1946.

Re: Canadian Pacific Railway Company, Lake Erie and Northern Railway, Grand River Railway, Napierville Junction Railway, Dominion Atlantic Railway, Quebec Central Railway, Toronto, Hamilton and Buffalo Railroad, Toronto Terminal Railway, Public Markets Limited, Northern Alberta Railways, Esquimalt and Nanaimo Railway and Railway Association of Canada, and employees.

Reasons for Decision

This is an application by the Brotherhood for an order, directing the Companies to increase wage rates by 10 cents per hour or its equivalent, to all classes of the Companies' employees, subject to Wartime Wages Control Order, 1943, with the exception of those employees who are represented by the Brotherhood of Railroad Trainmen. The Brotherhood also request us to fix June 1, 1946 as the date when the increases shall come into effect.

It will be recalled that in July of this year, the National War Labour Board requested all Canadian Railways and Brotherhoods representing the employees of those Railways, to negotiate on wages. All parties entered into such negotiations, but during the course of those negotiations, the Brotherhood of Railroad Trainmen retired as did the Railway Companies concerned in this case. The remaining employees' organizations and Canadian National and Ontario Northland Railways finally concluded an agreement, and in due course, we were asked to approve the agreement. Such approval was given on August 26, 1946.

The applicants now seek the same wage adjustments as were provided in our August 26 decision.

The Railway Companies and the Brotherhoods concerned, presented their arguments to this Board on September 25, 1946. The Companies did not oppose the wage increases requested. Indeed, their representatives recognized the long established practice of Canadian Railways to maintain parity of wage rates for the same or comparable occupational classifications of employees throughout the principal steam railway transportation systems. The issues in this case are confined to the pleas of inability to pay the increased rates without compensating increases in the prices of the services which they render.

The Companies presented their financial statements covering operations during the years 1939 to 1945 inclusive, together with an

estimate concerning the operations for the year 1946. On the basis of those statements they argued that it would be impossible for them to assume greater labour costs in the face of declining revenues.

The statements of the Canadian Pacific Railway show enormous increases in gross earnings from 1939 to the peak year 1944, \$151,280,700 to \$318,871,034. In 1945, gross earnings amounted to \$316,109,358 and it is estimated that the 1946 earnings will amount to approximately \$278,409,000. Thus a downward trend in earnings is indicated.

On the other side of the Canadian Pacific ledger, it is shown that the working expenses were \$122,756,880 in 1939. Substantial increases in such expenses were assumed in each year following until in 1945 the sum total of working expenses amounted to \$280,055,024.

The statements on operating expenses were not in detail, and we are, therefore, unable to ascertain whether the Canadian Pacific took any advantage of its favourable revenue position to "write off" on a basis which would not be possible in more difficult times. Nevertheless, we do know that such is good business practice, and we are also aware of the Company's reputation for efficient management and the maintenance of sound business practices.

During the years 1939-1945 inclusive, the total assets of the Canadian Pacific increased considerably as have reserve and profit and loss balances. The liquid position of the Company has been maintained and, indeed, improved. Funded indebtedness is down substantially thereby and to a commensurate extent, freeing the Company from certain recurring fixed charges. Of course, share capital and consolidated debenture stock remain unchanged. It was also shown that during the said period provision was made for dividends.

In cases of this kind, it has been the practice of the Board to consider a Company's overall financial position, rather than the financial position of a part only of an employer's undertaking. In this case regard must be had for a substantial item shown as "other in-

come" in the Company's financial statements. Such item is not included in the operating revenues above referred to.

In the case of the Toronto, Hamilton and Buffalo Railway, we find that the pleas of inability to pay has not been supported by the evidence presented to us.

All concerned must realize that the unprecedented volume of traffic handled by steam railways during the years under review, was attained in consequence of Canada's participation in World War II. It would be idle to assume that anything like that volume will be maintained in the subsequent years at least for some time. The present trend supports such view.

Wartime Wages Control Order, 1943, does not impose upon us the task of estimating the future earnings of the Companies concerned in this case. We need only consider the presently existing circumstances in and surrounding the case. In this connection we must take cognizance of the fact that Canadian National Railways and Ontario Northland Railways have agreed to adjust the wage rates of their employees to the same extent as requested in this case. We must also take into account the long established practice of maintaining parity in wage rates for employees of all major Canadian railroads. Finally, we hold that the Companies, respondents in this

case, are able financially to pay the increased rates for the time being at any rate.

In view of the foregoing we propose to direct the Railway Companies covered by this application, excepting those named below, to increase by 10 cents per hour or its equivalent, the basic wage rates of all employees covered by the application in this case. Such increase shall have effect from June 1, 1946.

As stated in another decision, the cases concerning Algoma Central and Hudson's Bay Railway, Essex Terminal Railway, Pacific Great Eastern Railway and Sydney and Louisburg Railway, must be referred to the Regional War Labour Boards having jurisdiction.

The National Board will also direct all parties that proposals for changes in rules governing working conditions affecting compensation shall be reserved until after February 1, 1947.

The National War Labour Board further rules that for the purpose of this application the Canadian Pacific Airlines Limited should not be considered as being one of the subsidiaries of the Canadian Pacific Railway Company. Therefore, it is not a party to these proceedings.

Findings and Directions will issue accordingly.

October 16, 1946.

Re: Johnson Matthey and Mallory Limited, Toronto, Ont.

Reasons for Decision

The Company appeals to this Board from a Finding and Direction of the Regional War Labour Board for Ontario, dated September 6, 1946. Leave to appeal was granted by the said Regional Board. By its Finding and Direction, the Regional Board declined to authorize the Company to pay the wage rates which it requests for the various occupational classifications of its employees.

The Company is engaged in the manufacture of goods in which precious metals are used. Its business is the only one of its kind in Canada. The Company has described to us the nature of its business and operations and has shown why it is necessary that all its employees be highly skilled and reliable in every respect. Moreover, we are satisfied that it would be improper to compare the wage

rates for the production workers concerned in this case with the wage rates for occupational classifications having similar nomenclatures in other industries in the city of Toronto.

The growth of the Company's business during the last few years has been such as to bring added duties and responsibilities to its technical, supervisory and clerical employees. The Company states that it has expanded its operations to include the manufacture of goods the like of which were previously produced only in foreign countries.

Having regard for all the circumstances of this case, we consider that it would be just and reasonable to authorize the Company to adjust wage rates of its employees as requested.

The appeal is allowed. Finding and Direction accordingly.

October 19, 1946.

Re: Blue Cabs Limited, Vancouver, B.C., and Taxicab, Stage and Bus Drivers' Local Union No. 151

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for British Columbia, dated May 9, 1946. In

and by that decision the Regional Board directed the Company to pay its taxicab and limousine operators \$5.12 per eight hour shift and to pay spare operators 64 cents an hour

with the guaranteed minimum of 4 hours' work. The Regional Board further directed the Company to pay one and one-half times the regular rate for hours worked in excess of 8 in any one day provided, however, that if such overtime did not exceed fifteen minutes the rule would not apply.

Prior to the decision under appeal, the operators were paid \$3.65 per day or 35 per cent of their gross earnings whichever was the greater. The employer states that for the twelve months period ending May 31, 1946, the earnings of his operators averaged \$6.04 per day. The employer filed statements showing the earnings of each operator for the months of June, July and August, 1946. Those statements are intended to show that practically all of the operators would stand to lose if the data rate of \$5.12 was confirmed. It is argued that the Regional Board's decision has the effect of reducing wages and, therefore, is not in accordance with the provisions of War-time Wages Control Order, 1943.

The employer contends that the payment of a commission on the gross income of each taxicab is the only sound basis for remunerating the operators because the operator is to some considerable extent left on his own resources in getting business. On the other hand, it is said that a per diem rate would tend to dull the will to produce.

The Union takes the position that the employees would prefer a fixed rate rather than one calculated on fares received. Certain evidence was tendered which, if accepted, would indicate that the Union has not correctly expressed the views of the employees

concerned. We do not know how that evidence was obtained. We suggest, however, that the employees who produced the evidence for the employer, might have been better advised to have instructed the officers of their Union.

The Union representing the employees of other taxicab owners in Vancouver, has signed collective agreements with those owners. From information available to us it would appear that three of those agreements provide for the payment of \$5.12 per 8 hour day and one of the three is with a Company owning a large number of vehicles. The vast majority of the agreements, however, completed by the same Union, call for the payment of a guaranteed rate or a commission, whichever is the greater. In the latter group is one with a Company carrying on extensive operations in the said city.

Having regard for the number of employees engaged in taxicab service in Vancouver, it seems that the prevailing practice is to pay the employees a guaranteed rate or a commission, whichever is the greater. We find nothing in the submissions filed herein to justify our disturbing that practice in this case.

It is our view that the guaranteed rate should be adjusted. We find that it would be just and reasonable to increase the guaranteed rate of \$4.35 per day. The commission rate should remain as at present.

The appeal is allowed to the extent indicated above. Finding and Direction accordingly.

October 18, 1946.

Re: Ferguson Atlantic Underwear Limited, Moncton, N.B., and United Textile Workers, of Canada, Local 17

Reasons for Decision

This is an appeal by the Company from a Finding and Direction of the Regional War Labour Board for New Brunswick dated May 3, 1946, wherein the Board, upon an application by the Union, directed the Company to increase the wage rates of certain of the Company's employees.

The Company takes objection to the fact that the Regional Board based its decision on a comparison of wage rates as between those paid by the appellant Company and those paid by other employers for comparable occupational classifications in the Company's locality. The Company contends that since the Union's application was made prior to Order-in-Council P.C. 348 of February 15, 1946, which amended the Wartime Wages Control Order 1943, the Regional Board should have based its decision on the law as it was at the time of the

application. Prior to P.C. 348, a War Labour Board could direct increases in wage rates only if it were proven that a "gross inequality or a gross injustice" existed in respect of wage rates; whereas under P.C. 348 War Labour Boards were empowered to direct increases if it was shown that the wage rates were low in comparison with the wage rates paid to similar occupational classifications in a similar locality.

We cannot accept the Company's contention. P.C. 348 came into force on February 15, 1946. The decision of the Regional Board was made on May 3, 1946, at which time P.C. 348 was in effect and the Board was correct in making its decision according to the formula established by that Order-in-Council. It might be said, however, that regardless of which formula is applied to this case, whether it be that of "gross inequality or gross in-

justice or that of "comparability", our decision would be the same.

We have reviewed the case carefully and we are of the opinion that the Regional Board proceeded upon a proper appreciation of the

facts. We are in full agreement with the decision of the Regional Board.

In the circumstances, the appeal is dismissed. Finding and Direction accordingly.

October 25, 1946.

Re: Canadian International Paper Company

Reasons for Decision

On May 1, 1946, the hourly rated employees of the Company at Hawkesbury, Ontario, were granted a wage increase of 10 cents an hour. Subsequently the Company applied to the Regional War Labour Board for Ontario for permission to increase the ranges of rates for its employees in the occupational classifications of Chemist, Librarian, Secretary, Secretary to Executive, Shipping Room Clerk and Sulphite Foreman and others employed at Hawkesbury.

The Regional Board dismissed that part of the Company's application which concerns the above-named classifications. With leave of the Regional Board the Company now appeals from that decision.

The Company requests permission to make substantial increases in the said ranges of rates. From the material filed herein it would appear that the Company wishes to provide the employees concerned with approximately the same percentage increase as that resulting from the increase which was awarded to the hourly rated employees on May 1, 1946. In effect the Company contends that if an hourly rated employee in an establishment has had his wages increased from 74 to 84 cents an hour, the percentage increase being 13.5, other employees in the same establishment should have their wages increased by approximately the same percentage. To accept that contention and give effect to it would mean that the high of the range of rates for at least one of the above-named classifications would be increased by as much as \$94.31 per month, others would have their wages increased by

lesser amounts but all in excess of \$20.80 per month which is the equivalent of 10 cents an hour.

We cannot accept that contention because of the provisions of Section 21 of Wartime Wages Control Order, 1943. That Section is as follows:

Where the National Board authorizes or directs an employer to increase a single rate or the rates within the range for an occupational classification of his employees, the Board may authorize or direct the employer to increase single rates or rate within ranges for other occupational classifications of his employees, in order to maintain differentials in relation to the rates so increased, only if and to the extent that the Board finds that the conditions prescribed by paragraph (a) of section 20 of this Order to the powers of the Board to authorize or direct increases in such single rates or the rates within such ranges, exist, and only in smaller amounts where the rates are higher than the rates so increased.

Inasmuch as the wage rates of the employees concerned in this appeal are higher than those prevailing for the hourly rated employees in the same establishment, we are obliged to limit the increases in this case to *amounts* which are smaller than those given the hourly rated employees on May 1, 1946. In view of all the circumstances of this case we have come to the conclusion that it would be appropriate to authorize the Company to increase by \$20.00 per month the range of rates of each occupational classification concerned in this appeal.

The appeal is allowed to the extent indicated above. Finding and Direction accordingly.

October 28, 1946.

Re: International Woodworkers of America, Local 1-71, and J. R. Morgan Logging Company, Limited, Pacific Mills Limited and Kelley Logging Company Limited.

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for British Columbia, dated September 4, 1946, in which that Board has disallowed the Union's request for an increase of 10c per hour for all employees of various timber operators in the Queen Charlotte Islands. The Companies support the appeal though only to the extent of 5c per hour.

It is unnecessary for us to go into great detail in this case. All circumstances in this case are identical with those in a previous appeal which was heard by this Board and which was disposed of by this Board on November 13, 1945, in *Re Pacific Mills Limited, et al and International Woodworkers of America, Local 1-71*. In the latter case the same Companies and the same Union raised the same arguments which are being pleaded at the present time in support of the appeal.

In this Board's Reasons for Decision of November 13, 1945, (LABOUR GAZETTE, December 1945, pp. 1779-1780) there is set out in detail the facts involved in that appeal and the Board's reasons for dismissing the same. In effect, the parties are asking this Board to establish a differential in favour of employees employed on the Queen Charlotte Islands. In its Reasons for Decision of November 13, 1945, this Board pointed out that while a temporary higher rate was paid to loggers on the Queen Charlotte Islands during the war emergency the higher rate was precipitated by a situation which no longer exists and, in any event, had never been approved by a War Labour Board.

Re: St. Charles Hotel, Limited, Winnipeg, Man.

Reasons for Decision

This is an appeal from a Finding and Direction of the Regional War Labour Board for Manitoba, dated July 24, 1946, whereby the employer was directed to pay increased wage rates for certain occupational classifications of his employees. Leave to appeal was granted by the Regional Board on September 14, 1946.

The employer objects to the wage rates set by the Regional Board in respect of the occupational classifications "Night Watchman", "Tray Boys", "Dishwashers" and "Chambermaids", contending that the wage rates for these occupational classifications have been set at too high a level.

We have considered carefully the arguments of the employer and of the union and we have also examined the records of the Regional Board in this case. It appears from the record

Re: Browns' Bread Limited, Toronto, and Bakery Wagon Drivers and Warehousemen's Union, Local 847

Reasons for Decision

An appeal by the Company from a decision of the Regional War Labour Board for Ontario, dated August 6, 1946. In and by that decision, the Regional Board directed the Company to increase the base rate and commission rates for its Bakery Wagon Salesmen. The base rate was increased from \$9.95 to \$11 per week, the commission on sales at retail from 15 per cent to 16.5 per cent, and the commission on sales at wholesale from 7 per cent to 8 per cent.

The grounds of the appeal are:—

- (1) That there was no evidence adduced by the Union upon which the Regional Board could properly find it just and reasonable to direct the Company to pay the increased rates.
- (2) That the implementation of the new rates will make it necessary for the Company to seek permission to increase the price of the bread it sells.

The parties have not produced any new evidence which would lead us to deviate from our previous decision. Since the previous appeal was heard by this Board the employees in question have received an increase in wage rates amounting to 15c per hour. We do not think that it would be just and reasonable, having regard to the purposes of this Order to allow an additional increase in wage rates. The reasons given by this Board in its Decision of November 13, 1945, apply *mutatis mutandis* to the present appeal.

The appeal is, therefore, dismissed. Finding and Direction accordingly.

October 31, 1946.

that the Regional Board had before it evidence pertaining to the wage rates generally being paid in the hotel and restaurant industries in the City of Winnipeg. The Regional Board apparently was satisfied that the wage rates directed by them to be paid to the employees in the said occupational classifications were just and reasonable. In so doing they appear to have exercised their discretion in a proper manner. We cannot find that they were guided by other than reasonable considerations and, indeed, find that the wage rates set by the Regional Board are just and reasonable within the meaning of the Wartime Wages Control Order, 1943, P.C. 9384, as amended.

Under the circumstances, therefore, the appeal is dismissed. Finding and Direction accordingly.

November 2, 1946.

- (3) That the increased rates would widen the differentials existing between the rates for the Wagon Salesmen and its bakery production workers, which fact would be a ground in support of further wage increases for production workers.
- (4) That the decision fixes the rates for the life of the current collective agreement and does not take into account the possible effect on the weekly earnings of the Drivers in the event that subsidies now paid by the Government of Canada on materials used in the manufacture of bakery products are withdrawn and the price of bread is increased to compensate the bakers for the loss accruing through the withdrawal of the subsidy.

The first question to determine is whether the rates directed by the Regional Board are just and reasonable. We are of the opinion that the proper way by which this specific question can be determined is to compare

the rates with those in effect in comparable establishments. The use of the old rule comparing wage rates does not necessarily mean that the rule can or should be applied in all cases. It is particularly appropriate for this case because both parties agree that the Company's operations are substantially comparable with those of Canada Bread Company, Limited, and George Weston Bread and Cake Limited. All three Companies sell the same ranges of products to the same classes of customers in the same locality.

On or about June 10, 1946, the Union entered into a collective agreement with Canada Bread. That agreement provided that Canada Bread's Wagon Salesmen would be paid a fixed allowance of \$10.95 per week and a commission of 15 per cent on sales at retail and 7 per cent on sales at wholesale.

On or about June 13, 1946, the same Union entered into a collective agreement with George Weston Bread and Cake Limited. That agreement provided that the Wagon Salesmen concerned would be paid a fixed allowance of \$10.95 per week, a commission of 15 per cent on sales at retail, 9 per cent on sales at wholesale and 5 per cent on special account sales. The special account sale refers to the sales to chain stores and large wholesale deliveries. The fact that the larger wholesale accounts are included in the group for which a commission of 5 per cent is paid, may be the reason why Weston pays 9 per cent commission on the balance of sales at wholesale as compared with the 7 per cent over-all commission paid by Canada Bread.

The two agreements above referred to seem to us to offer proof abundant that the Union regarded the base rate and the commission rates mentioned therein as being proper bases for obtaining just and reasonable earnings. At any rate those agreements represent the results of collective bargaining. In view of the foregoing we can find no sound ground upon which to support the Regional Board's decision as rendered.

In passing, it should be noted that the average weekly earnings of the Wagon Salesmen of each of the three Companies are substantially the same, even though the averages result from the rates agreed to in the cases of Canada Bread and Weston and from the rates in effect in Browns' prior to the Regional Board's decision.

Having regard to all the circumstances of this case, we have concluded that it would be proper to fix the base rate at \$10.95 per week for the Wagon Salesmen. The commission rates shall continue to be 15 per cent on retail sales and 7 per cent on wholesales.

Our decision affecting rates in this case is such as to make it unnecessary to consider items 2 and 3 of the appellant's grounds of appeal.

Item 4 of the said grounds presents a problem which we have not heretofore been called upon to consider. In simple language the appellant's argument is to the effect that if subsidies were removed, the price of bread would be increased, and if the price was increased the earnings of the Wagon Salesmen would be enhanced and the relationship between the wages for the Salesmen and the production workers would be disturbed.

The Union denies the conclusions of the Company and says that an increase in the price of bread would bring about a reduction in the consumption of that food and, therefore, the sales volume would be lower. Reference was made to the experience of milk Wagon Salesmen following the recent increase in the price of milk.

Statistics covering the years 1925-1943, inclusive, compiled by Dominion Bureau of Statistics, show that the per capita consumption of bread did not drop following any appreciable rise in price, nor did it increase after a lowering of the price. Past experience would tend to indicate that there would be little, if any, change in the consumption of bakery products even if the prices of those products were increased.

Fortunately it is not necessary for us to rest our conclusions upon conjecture. We think that we are entitled to, and that we should, accept as being reasonable the relevant terms of the collective agreements above referred to. The rates set forth in those agreements are predicated upon presently existing prices of bakery products. Moreover, it is provided in the Canada Bread agreement that "any increase in the selling price of bread shall result in decrease in the above commission rates and any decrease in the selling price of bread shall result in an increase in the commission rates above. Such decreases or increases to be a matter for negotiation between the Company and the Union, and if necessary, either party may go to the War Labour Board for a decision". A similar provision is contained in the Weston agreement.

We doubt whether we would have the power under Wartime Wages Control Order, 1943, to reduce rates. We can say that the commission rates in effect shall continue as long as the price of bread is 10 cents per 24 ounce loaf and we recommend to the parties that they incorporate into their collective agreement a provision which will have the same effect as that of the provision quoted in the last above paragraph.

The appeal is allowed subject to the increase in base rate as above indicated. Finding and Direction accordingly.

November 6, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decisions as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The Work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of October. During this period the Board received twenty applications, held eight hearings, issued 13 certificates designating bargaining representatives, rejected three applications, ordered six representation votes, allowed the withdrawal of eleven applications and rendered decisions in four appeal cases.

Certificates Issued

Thirteen applications for certification of bargaining representatives were approved by the Board and certificates issued as below:

Messrs. F. Brusatore and F. Dixon and the Canadian Flight Radio Officers' Association for the Flight Radio Officers employed by Trans-Canada Air Lines, Winnipeg, Manitoba.*

Messrs. J. A. Sullivan, H. Davis, T. G. McManus and Conrad Sauras and the Canadian Seamen's Union for the unlicensed personnel in the employ of Lakes and St. Lawrence Navigation Company, Cardinal Ontario and Powell Transports Limited, Winnipeg, Manitoba.*

Messrs. H. McKenna and P. Carty and Western Canada Firebosses Association, Sub District No. 2, for the Firebosses in the employ of Cadomin Coal Company, Limited, Cadomin, Alberta.*

Messrs. R. Mitchel and R. Baker and Western Canada Firebosses Association, Sub District No. 2, for Firebosses in the employ of Luscar Coals Limited, Luscar, Alberta.*

Messrs. J. Herman and R. Roome and Western Canada Firebosses Association, Sub District No. 2, for Firebosses in the employ of Mountain Park Coals Limited, Mountain Park, Alberta.*

Messrs. A. R. Johnstone, J. S. Smith, R. G. McRae and Miss Thelma Cameron and Local 662, Hotel and Restaurant Employees International Alliance and Bartenders International League of America for the telephone operators, night telephone operator, relief telephone operator and cashier, room clerk, front office cashiers, and relief day/night clerk and cashier employed by the Canadian National Railways in its Nova Scotian Hotel, Halifax, N.S.*

*Following investigation of the application.

Messrs. Joseph J. Lenahan and J. A. Payne and the Commercial Telegraphers Union, Western Union Division, for assistant wire chiefs, all men in migratory gangs and section linemen and all assistant repeater chiefs employed by the Western Union Telegraph Company, New York City, New York, in the provinces of Nova Scotia and New Brunswick. The district plant superintendent, chief clerk and cashier, confidential stenographer and line gang foreman in the plant department, Truro, N.S. and the chief operator at Fairville, N.B. and New Glasgow, N.S. in the traffic department, were excluded from the bargaining unit.*

Messrs. W. V. McEwen, F. H. Matthews, J. B. Ashby and W. L. Allen and the Commercial Telegraphers Union, Trans-Canada Air Lines Division, for the employees of Trans-Canada Air Lines assigned to radio operation for domestic service and such personnel in Canada assigned to the Canadian Government Trans-Atlantic Air Service in the ground radio stations whether operated by voice, hand key, vibroplex or other semi-automatic key, or radar. Radio operators in charge and such personnel employed outside of Canada were excluded from the bargaining unit.*

Messrs. J. S. Thompson, J. M. Smith and J. Sipes and the Canadian Seamen's Union for the unlicensed personnel employed on the tugs and barges of the Pacific Great Eastern Railway Company, Vancouver, B.C.**

Messrs. J. A. Sullivan, H. Davis, T. G. McManus and Conrad Sauras and the Canadian Seamen's Union for the employees of the Shell Canadian Tankers Limited, Toronto, Ontario, employed as unlicensed personnel on the Company's vessels. Unlicensed personnel performing duties as licensed officers were excluded from the bargaining unit.**

- (1) Messrs. F. J. Hall and J. O. Clarke and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees for employees of the Toronto, Hamilton and Buffalo Railway Company, Hamilton, Ontario, classified as agent at Port Colbourne, clerks and other clerical workers in freight and yard offices at Hamilton, Brantford, Dunnville, Port Colbourne, Welland (Coyle Yard) including chief clerks, accountants, cashiers, assistant accountants, assistant cashiers, stenographers, typists, yard clerks, car checkers, call boys, messenger boys and office boys, employees of the stores and purchasing departments at Hamilton,

baggage men, foreman janitor, janitor and cleaners at Hamilton, freight shed forces, including foremen, assistant foremen, checkers, sealers, coopers and truckers at Hamilton, Brantford and Dunnville, employees of the master mechanics office at Hamilton including the chief clerk, timekeeper, stenographer, clerks and call boys, employees of the car foreman's office at Hamilton including the chief clerk and work checkers etc., and ticket clerks in the Hamilton ticket office. Excluded from the bargaining unit were storekeepers and the purchasing agent, in the Stores and Purchasing Departments, Hamilton, the general foreman at the Hamilton freight shed and the ticket agent at Hamilton, agents at Aberdeen Yard, Fisher Yard and Dunnville, the general foreman at the Hamilton freight shed and red caps.***

- (2) Messrs. J. A. Sullivan, J. Davis, T. G. McManus and Conrad Sauras and the Canadian Seamen's Union for the unlicensed personnel employed on vessels of Keystone Transports Limited, Montreal, P.Q. and Lakes and St. Lawrence Navigation Co., Ltd., Cardinal, Ontario.***

Applications for Certification Rejected

1. *Canadian Seamen's Union and Union Steamships Limited, Vancouver, B.C.*, (L.G. July 1946, p. 902). Following the taking of a representation vote of the employees affected, the Board rejected the application for the reason that it was not supported by a majority of the employees as required by the Wartime Labour Relations Regulations, P.C. 1003.

2. *International Longshoremen's Association, Local 1696, and J. C. E. Malone Company Limited, Three Rivers, P.Q.*, (L.G. September 1946, p. 1221). The Board, following an investigation of the application and a public hearing, rejected the application for the reason that the bargaining unit was not appropriate as confined only to the pulpwood unloading operations of the company.

3. *Canadian Seamen's Union and British Columbia Steamships Limited, Vancouver, B.C.*, (L.G. August 1946, p. 1051). Following the taking of a representation vote of the employees affected, the Board rejected the application for the reason that it was not supported by a majority of the employees as required by the Wartime Labour Relations Regulations, P.C. 1003.

*Following investigation of the application.

**Following investigation of the application and a representation vote.

***Following an investigation of the application, a public hearing and a representation vote.

Representation Votes Ordered

1. *Canadian Seamen's Union and Transit Tankers and Terminals Limited, Montreal, P.Q.* (L.G. August 1946, p. 1051). Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q. was appointed by the Board to act as Returning Officer in a vote among the unlicensed personnel employed on vessels operated by the Transit Tankers and Terminals Limited, Montreal, P.Q.

2. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Canadian Pacific Railway Company, Farnham, P.Q.* (L.G. September 1946, p. 1221). Following an investigation of the application, Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q., was appointed by the Board to act as Returning Officer in a vote of the clerks, excluding chief clerk, assistant chief clerk and the superintendent's stenographer, in the superintendent's office of the Canadian Pacific Railway Company at Farnham, P.Q.

3. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees of the Canadian Pacific Railway Company, Brandon, Manitoba and Nelson, B.C.* (L.G. September 1946, p. 1221). Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Manitoba, was appointed Returning Officer by the Board to conduct votes of the clerks, excluding the chief clerk, assistant chief clerk, and the superintendent's stenographer in the superintendent's offices of the Canadian Pacific Railway Company at Brandon, Man., and Nelson, B.C.

4. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Dominion Atlantic Railway Company (Subsidiary of the Canadian Pacific Railway Company) Kentville, N.S.* (L.G. September 1946, p. 1221). A vote of the employees affected was ordered by the Board following an investigation of the application. Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q., was appointed Returning Officer to conduct the vote.

5. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company, Medicine Hat, Alberta.* (L.G. October 1946, p. 1419). Following an investigation of the application the Board appointed Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Man., to conduct a vote of the clerks, excluding chief clerk, assistant chief clerk and superintendent's stenographer, in the superintendent's office of the Canadian Pacific Railway Company, Medicine Hat, Alberta.

Applications for Certification Withdrawn

1. *Canadian Seamen's Union and Owen Sound Transportation Company Limited, Owen Sound, Ontario; North American Transports Limited, Montreal, P.Q.; Hall Corporation of Canada, Montreal, P.Q.; Foote Transit Company Limited, Toronto, Ontario; and Provincial Paper Limited, Port Arthur, Ontario* (L.G. August 1946, p. 1051). On the request of the National Secretary of the Canadian Seamen's Union, the applications for certification of bargaining representatives on behalf of employees of each of the Companies were withdrawn.

2. *Yellowknife District Miners' Union, Local 802, International Union of Mine, Mill and Smelter Workers and Giant Yellowknife Mines Limited, Yellowknife, N.W.T.* (L.G. September 1946, p. 1221). On the request of the International Representative of the Union the application for certification of bargaining representatives on behalf of the employees of the Company was withdrawn.

3. *International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (formerly the Canadian Transports Workers' Union) and Norman's Transfer Limited, Cornwall, Ont.; Taggarts Service Limited, Montreal, P.Q.; McNeil Transport Limited, Montreal, P.Q.; Smith Transport Limited, Montreal, P.Q. and Kingsway Transports Limited, Montreal, P.Q.* On the request of the representative of Local 968 International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (formerly the Canadian Transport Workers' Union) the applications for certification of bargaining representatives on behalf of employees of each of the Companies were withdrawn.

Applications for Certification Under Investigation

1. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of certain employees of *Midland Railway Company, Winnipeg, Manitoba.*

2. *Canadian Brotherhood of Railway Employees and Other Transport Workers* on behalf of hourly prevailing rates employees of the *National Harbours Board, Montreal, P.Q.*

3. *Canadian Seamen's Union* on behalf of the unlicensed personnel in deck, engine room and steward's departments on tugs and barges of *Coastal Towing Company Limited, Vancouver, B.C.*

4. *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division*

297, on behalf of certain employees of the *Canadian National Railways* employed in the *Charlottetown Hotel, Charlottetown, P.E.I.*

5. *Canadian Seamen's Union* on behalf of the unlicensed personnel on vessels of the *Mohawk Navigation Company Limited, Montreal, P.Q.*

6. *Canadian Seamen's Union* on behalf of the unlicensed personnel on vessels of *Northern Paper Mills Limited, Hansen, Ont.*

7. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of pursers, assistant pursers, and freight clerks employed in the *British Columbia Coast Steamship Service of the Canadian Pacific Railway Company, Victoria, B.C.*

8. *International Woodworkers of America (CIO), Local No. 1—425* on behalf of the members of the crew operating tugboat "ELCO 11" of *William Waldie and Sons Limited, Castlegar, B.C.*

9. *Association of Port Colborne Harbour Employees* on behalf of the employees of the *Grain Storage Elevator of the National Harbours Board, Port Colborne, Ont.*

10. *Western Association of Mechanical and Electrical Engineers, Local No. 7*, on behalf of certain employees of *Sterling Collieries Company Limited, Edmonton, Alberta.*

11. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees*, on behalf of the clerks in the superintendent's office of the *Canadian Pacific Railway Company, Revelstoke, B.C.*

12. *National Harbours Board Employees' Association* on behalf of toll collectors, *Jacques Cartier Bridge*, employed by *National Harbours Board, Montreal, P.Q.*

13. *Commercial Employees' Organization* on behalf of employees in the commercial department of the *Bell Telephone Company of Canada, Montreal, P.Q.*, engaged in clerical, technical or sales work.

14. *Yellowknife District Miners Union, Local 802, International Union of Mine, Mill and Smelter Workers* on behalf of total employees of *Forsberg, Finney and Swanson, Yellowknife, N.W.T.*

15. *Canadian Brotherhood of Railway Employees and Other Transport Workers* on behalf of employees of the *Canadian Pacific Railway Company in its Cornwallis Inn Hotel, Kentville, N.S.*

16. *Transport Drivers, Warehousemen and Helpers, Local Union 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers* on behalf of certain employees of *Norman's Transfer Limited,*

Cornwall, Ontario, engaged as city pickup and delivery, warehousemen and helpers.

17. *Transport Drivers, Warehousemen and Helpers, Local Union 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers* on behalf of certain employees of *Kingsway Transport Limited, Montreal, P.Q.*, engaged as city pickup and delivery, warehousemen and helpers.

18. *Transport Drivers, Warehousemen and Helpers, Local Union 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers* on behalf of certain employees of *McNeil Transport Limited, Montreal, P.Q.*, engaged as city pickup and delivery, warehousemen and helpers.

19. *Transport Drivers, Warehousemen and Helpers, Local Union 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers* on behalf of certain employees of *Smith Transport Limited, Montreal, P.Q.*, engaged as city pickup and delivery, warehousemen and helpers.

20. *Transport Drivers, Warehousemen and Helpers, Local Union 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers* on behalf of certain employees of *Taggarts Service Limited, Montreal, P.Q.*, engaged as city pickup and delivery, warehousemen and helpers.

Decisions in Appeal Cases

1. Following a hearing, the Board dismissed the appeal of *Local 466, International Printing Pressmen and Assistant Union* from a decision of the Ontario Labour Relations Board to take a vote of the employees of *Stauntons Limited, Leaside, Ont.*

Reasons for Judgment will be released at a later date.

2. On October 24, the Board dismissed the appeal of *Cosmos Imperial Mills Limited (Cosmos Division), Yarmouth, N.S.*, from a decision of the Nova Scotia Wartime Labour Relations Board in certifying *Lodge 152, United Textile Workers of America.*

Reasons for Judgment will be given later.

3. Following a hearing, the Board dismissed the appeal of the *Glass Bottle Blowers' Association of the United States and Canada* from a decision of the Ontario Labour Relations Board in refusing to place the name of the *Glass Bottle Blowers' Association* on the ballot in a vote of the employees of *Anchor Cap and Enclosure Corporation of Canada Limited, Toronto, Ont.*

The Board also dealt with the appeal of the same Company seeking to have nine employees excluded from the voting unit determined by the Ontario Board. The appeal was allowed only to the extent that one employee classified as "general inspector" will be so excluded.

Reasons for Judgment covering both appeals will be released at a later date.

4. On October 23, the Board allowed the appeal of *Local No. 1, Industrial Union of Veneer Workers (CCL)* from a decision of the New Brunswick Wartime Labour Relations Board which excluded persons classified

as "lathe foremen" and "boilerhouse foremen" from the bargaining unit affecting *Canadian Veneers Limited, Saint John, N.B.* The National Board directed that such persons be included in the bargaining unit.

Reasons for Judgment will be released at a later date.

Reasons for Judgment in Other Appeal Cases

Reasons for Judgment in three cases dealt with by the Board at its September sittings and summarized in the October, 1946, issue of the LABOUR GAZETTE are given below:—

Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO), Local 251, Appellant (Intervener) and Dominion Glass Company Limited, Wallaceburg, Ontario, Respondent and Glass Bottle Blowers' Association of the United States and Canada, Local 70 (AFL), Respondent (Petitioner)

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills, Mosher and Picard.

Reasons for Judgment

This is an application for leave to appeal and an appeal by Local 251 (UAW-CIO), from a decision of the Ontario Labour Relations Board dismissing the application of Local 70 of the Glass Bottle Blowers' Association for certification of bargaining representatives without prejudice to the right of that Union to make a new application.

A representative of the intervening Union contended that the Board should add a new rule to those suggested in its Judgment in the Wright-Hargreaves case which would prevent a petitioner from filing a new petition for certification during a period of six months after a dismissal of a former application on any ground in cases where the petitioner had contested the authority of officers of a bargaining agency previously certified. The intervening Union was certified by the Ontario Labour Court and its officers are the present bargaining representatives of the employees.

The Ontario Labour Relations Board dismissed the application because in electing officers the Glass Bottle Blowers' Association had not specified these officers as bargaining representatives. The officers of the inter-

vening union are now, and will continue to be, the bargaining representatives of the employees until new bargaining representatives are properly elected and duly certified.

The omission of the Glass Bottle Blowers' Union to pass the necessary resolution appointing bargaining representatives was a fatal defect in the application of the petitioner, but there was no test of strength between the two unions; that is, either one of them may have a very substantial majority of the employees affected. Under these circumstances, the Ontario Board was quite correct in rejecting the petition of the Glass Bottle Blowers' Association with leave to apply again, rather than to dismiss the application outright, in accordance with the appellant's contention.

The appellant (Intervener) union will have leave to appeal but the appeal is dismissed.

(Sgd.) A. H. BROWN,
*Vice-Chairman,
for the Board.*

JOHN ELDON, Esq.,
ROY BROWN, Esq.,

For Appellant (Intervener).

H. A. F. BOYDE, Esq., K.C.,
for Respondent (Petitioner).

Dated at Ottawa, October 22, 1946.

Between: The Industrial Council of the Employees of Canada Electric Castings Limited, Appellant (Petitioner) and Canada Electric Castings Limited, Orillia, Ontario, Respondent and United Electrical, Radio Machine Workers of America, Local 511, Respondent (Intervener)

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills, Mosher and Picard.

Reasons for Judgment

This is an appeal by the petitioner, an employees organization, from a decision of the Ontario Labour Relations Board rejecting the petitioner's application for certification and permitting the intervening union to withdraw its application for certification. A vote directed by the Ontario Board resulted as follows:—

Number of eligible voters.....	49
Number of votes cast.....	39
Number voting for the Industrial Council	23
Number voting for the United Electrical, Radio and Machine Workers	16

As the petitioner failed to obtain a majority of the votes of the employees affected, the petition was dismissed by the Ontario Board.

The counsel for the petitioner contends that the words "by a majority vote of the employees affected" in subsection 1 of Section 5 of the Regulations mean that if a majority of the employees affected vote, then a majority of those voting is sufficient to elect bargaining representatives. The Board declines to accept this interpretation

and holds that the words in question require that a majority of the employees affected must vote for the bargaining representatives in order to elect them.

The Intervener was certified as a bargaining agency in the Ontario Labour Court and its officers are, and will continue to be, the bargaining representatives of the employees until new bargaining representatives are properly elected and duly certified under the Regulations.

The intervening union filed a petition for certification. The Ontario Board rejected the petition of the Industrial Council but permitted the intervening union to withdraw its application. As it was unnecessary for the Intervener to apply for recertification its petition for this purpose is dismissed without prejudice, however, to the existing certification granted to it by the Ontario Labour Court. With this variation, the appeal is dismissed.

(Sgd.) A. H. BROWN,
*Vice-Chairman,
for the Board.*

J. J. ROBINETTE, Esq., K.C.,
for Appellant (Petitioner).

D. G. C. MENZEL, Esq.,
for Respondent.

Dated at Ottawa, October 22, 1946.

Between: Fahralloy Employees' Association, Appellant (Petitioner) and Fahralloy (Canada) Limited, Welland, Ontario, Appellant (Respondent) and United Electrical, Radio and Machine Workers of America, Local 511, Respondent (Intervener)

The Board consisted of the Chairman and Messrs. Best, Deschamps, Hills and Mosher.

Reasons for Judgment

These are two applications for leave to appeal and appeals, one by the employer, Fahralloy (Canada) Limited, the other by Fahralloy Employees' Association, from a decision of the Ontario Labour Relations Board refusing a petition of the Association for the certification of bargaining representatives.

The bargaining representatives were elected at a meeting of the employees. Out of 86 employees eligible to vote, 39 were present and voted for the election of bargaining representatives. Twelve additional employees

were represented by proxies. The successful candidates hold respectively 49, 48, and 48 votes, including, in each case, 11 proxy votes, or 38, 37 and 37 votes, if proxy votes are not included. It will be seen that the bargaining representatives were not elected by a majority vote of the employees affected unless the proxy votes are included.

The Board is of opinion that the employer is without status to appeal the refusal of the Ontario Board to certify the bargaining representatives of his employees. However, the appeal of the Association, which has now been heard, raises the same issue, namely, the question as to the validity of the proxy votes.

For the Association, it is contended that subsection one of Section 5 of the Regula-

tions does not prohibit proxy votes and that bargaining representatives may therefore be elected by a majority vote, either by proxy or otherwise.

However, if the appellants' contention is correct, there would in fact be no such exception since there would be nothing to prevent members of an employees' association from giving similar written authorizations in favour of the employees' association to select bargaining representatives. Such an interpretation would in fact defeat the apparent intent of subsection two of Section 5.

In the absence of specific provisions, therefore, for the use of proxies, the Board is of opinion that it is not warranted in giving recognition to the same in the election of

bargaining representatives under Section 5 (1) of the Regulations.

The Association will have leave to appeal but the application of the employer for leave to appeal and the appeal of the Association will be dismissed.

(Sgd.) A. H. BROWN,
Vice-Chairman,
for the majority of the Board.

I dissent:

(Sgd.) A. J. HILLS.

A. M. FORBES, Esq.,
for Appellant (Petitioner).

G. E. BEAMENT, Esq.,
for Appellant (Respondent).

Dated at Ottawa, October 22, 1946.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During October, 1946, a Conciliation Officer was assigned to confer with the parties in an attempt to effect an agreement in the following case:—

Garment Manufacturers Association of Western Canada, Winnipeg, Man., and Local 459, Amalgamated Clothing Workers of America (CIO-CCL). Mr. H. S. Johnstone, Conciliation Officer.

Agreements Facilitated by Conciliation Officers and Cases Withdrawn

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:—

Duplicate Canada Limited, Oshawa, Ontario, and Local 222, International Union, United Automobile, Aircraft and Agricultural Implementation Workers of America (UAW-CIO). Mr. Louis Fine, Conciliation Officer.

Garment Manufacturers Association of Western Canada, Winnipeg, Man., and Local 459, Amalgamated Clothing Workers of America (CIO-CCL). Mr. H. S. Johnstone, Conciliation Officer.

Lunenburg Sea Products Limited, Lunenburg, N.S., and Local No. 2, Canadian Fish Handlers' Union. Mr. H. R. Pettigrove, Conciliation Officer.

Metropolitan Stores Limited, Winnipeg, Man., and Local 286, Retail Clerks International Protective Association (AFL-TLC). Mr. T. J. Williams, Conciliation Officer.

Five Motor Companies (Carter Motors Limited, Western Canada Motors Limited, Inman Motors Limited, Wright Motors Limited, Leonard & McLaughlin Motors Ltd.), Winnipeg, Man., and International Association of Machinists. Mr. T. J. Williams, Conciliation Officer.

The Toronto Hospital for the Treatment of Tuberculosis (operated by the National Sanatorium Association), Toronto, Ont., and Local 204, Building Service Employees Inter-

national Union (AFL-TLC). Mr. H. Perkins, Conciliation Officer.

Wool Combing Corporation of Canada, Limited, Acton, Ont., and Local 721, Textile Workers Union of America (CIO-CCL). Mr. William Dunn, Conciliation Officer.

Boards Established

During the month, Boards of Conciliation were established but not fully constituted as follows:—

C. S. Hyman Company Limited, and Hyman Leathers Limited, London, Ont., and Local 25, International Union of Shoe & Leather Workers (CCL). (This case was later withdrawn.)

Link-Belt, Limited, Toronto, Ont., and Local 3394, United Steelworkers of America (CIO-CCL).

Massey Harris Company Limited (Toronto, Verity and Market St. plant, Brantford) and Locals 439 and 458, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

Moffats Limited, Weston, Ontario, and Local 3129, United Steelworkers of America (CIO-CCL).

Seven Taxicab Companies (Emile Lanthier, etc.), Montreal, P.Q., and Local No. 4, Taxicab Drivers' Union (AFL-TLC).

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:—

Donnell & Mudge Limited.—The Board of Conciliation established to deal with a dispute between Donnell & Mudge Limited, New Toronto, Ont., and Local 330, International Fur and Leather Workers Union (CIO-CCL) was fully constituted on October 5, 1946, with the appointment of His Honour Judge H. E. Fuller, Welland, Ont., as Chairman of the Board who was appointed in the absence of a recommendation from the other two members of the Board. Mr. R. R. Evans, K.C., Hamilton, Ont., and Mr. Norman Levy, Toronto, Ont., were appointed on the recom-

mendation of the employer and employees respectively.

Hamilton Chapter of the Canadian Association of Master Painters and Decorators.—The Board of Conciliation established to deal with a dispute between Hamilton Chapter of the Canadian Association of Master Painters and Decorators, Hamilton, Ont., and Local 205, International Brotherhood of Painters, Decorators and Paperhangers of America (AFL-TLC) was fully constituted on October 10, 1946, with the appointment of His Honour Judge Samuel Factor, Toronto, Ont., as Chairman of the Board who was appointed in the absence of a recommendation from the other two members of the Board. Mr. R. H. Yeates, Hamilton, Ont., and Mr. N. W. Linington, Hamilton, Ont., were appointed on the recommendation of the employer and employees respectively.

Ingersoll Machine & Tool Company.—The Board of Conciliation established to deal with a dispute between Ingersoll Machine & Tool Company, Ingersoll, Ont., and Local 2918, United Steelworkers of America (CIO-CCL) was fully constituted on October 18, 1946, with the appointment of Dr. A. Brady, Toronto, Ont., as Chairman of the Board who was appointed on the joint recommendation from the other two members of the Board. Mr. E. M. Dillon, K.C., Toronto, and Mr. Oliver Hodges, London, Ont., were appointed on the recommendation of the employer and employees respectively.

A. E. McKenzie Company Limited.—The Board of Conciliation established to deal with a dispute between A. E. McKenzie Company Limited, Brandon, Man., and Local No. 1, Canadian Bakery Workers' Union (CCL) was fully constituted on October 28, 1946, with the appointment of His Honour Judge Milton George, Morden, Man., as Chairman of the Board who was appointed on the joint recommendation from the other two members of the Board. Mr. T. W. Laidlaw, K.C., Winnipeg, Man., and Mr. J. Silver, Brandon, Man., were appointed on the joint recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during October:—

Report of Board in Dispute Between British American Motors, Ltd., Toronto; General Motors Products of Canada (Truck Retail Branch), Toronto; Beattie Cadillac, Chevrolet, Oldsmobile Company, Ltd., Toronto; Giles, Rice and Peters, Limited, Toronto, and Local No. 1, Industrial Union of Automotive Employees (CCL).

On October 17, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge Egerton Lovering, Chairman, appointed on the joint recommendation of the other two members of the Board, Mr. Macaulay Dillon of Toronto, and Mr. Herbert Orllife of Toronto, appointed on the nomination of the employers and employees, respectively.

Report of Board

To the Honourable HUMPHREY MITCHELL
Minister of Labour,
Ottawa, Canada.

Your Board of Conciliation consists of His Honour Judge Egerton Lovering as Chairman, Herbert Orllife as the nominee of the employees and E. Macaulay Dillon, K.C. as nominee of the employers. The employees were represented from time to time by Mr. G. H. Ironside, general representative of the Canadian Congress of Labour, Mr. Harry Lenmann, the President of the Local and Mr. Elroy Robson, Regional Director of the Canadian Congress of Labour. Mr. F. G. Gardiner, K.C. appeared for the four employing companies who were also represented by Mr. A. E. MacPherson for Beattie Cadillac, Chevrolet, Oldsmobile Company, Ltd., Mr. H. C. Doughty for the British American Motors Ltd., Mr. A. W. Housie for General Motors Products of Canada (Truck Retail Branch) and Mr. W. A. Mellow for Giles, Rice and Peters, Limited.

Your Board begs to report that agreement was reached on a large number of matters and such agreement is evidenced in the schedule to this report. This schedule is basically the agreement submitted on behalf of the Companies and marked as Exhibit "C" in these proceedings, following prolonged negotiations, and agreements and compromises by both parties at the instance of the Board. Where the clauses in the schedule to this report are blank the parties were not wholly agreed and it falls to this Board to make such recommendations as it sees fit. Accordingly, we

proceed to make such recommendations seriatim under the proper paragraph numbers.

PARAGRAPH 2, FIRST CLAUSE

The Union desired the employees to be defined as those in the Bargaining Unit, although in the agreement submitted by the Companies these words were omitted. Your Board feels that they should be inserted in the agreement, so that the first clause of paragraph 2 should read as follows:

Paragraph 2. The Company recognizes the Union as the exclusive bargaining agency for collective bargaining purposes for its employees in the Bargaining Unit in its Spadina Avenue, Toronto, Ontario Branch, (or as the case may be).

PARAGRAPH 6

The Companies proposed that the Negotiation Committee should consist of three members who shall be employees of the Companies, etc., and the employees desired to add to this Committee a representative of the Canadian Congress of Labour. In as much as in all four Companies the individuals certified as the bargaining agents included such representatives, your Board feels that the Union's suggestion should be adopted and accordingly recommends that paragraph 6 should read as follows:

Paragraph 6. The Union may elect, and the Company shall recognize three (3) committee men as members of the Negotiation Committee who shall be employees of the Company with at least one year's service and a representative of the Canadian Congress of Labour. The Union shall notify the Company in writing of the names of the committee men.

PARAGRAPH 8 (b)

The Union suggested that when a grievance was first taken up with the foreman the employee concerned should have the right to be accompanied by a local committee man, if he so desired. Your Board agrees with this suggestion and accordingly recommends that paragraph 8(b) should read as follows:

Paragraph 8(b). Any employee having a grievance which he wishes to discuss with the Company shall take the matter up with his foreman. He may be accompanied by a local committee man if he so desires. The foreman shall deal with the grievance and render his decision not later than twenty-four hours following the day upon which he received the grievance.

PARAGRAPHS 8 (c) AND 9

There was some divergence of views in respect to the time between steps in the grievance procedure. This matter of time applies also to Paragraph 9 and your Board accordingly recommends that paragraphs 8(c) and 9 should read as follows:

Paragraph 8(c). Any employee not satisfied with the decision of the foreman may, within five (5) days appeal through the Committee in writing to the Superintendent. The Superintendent shall deal with the appeal and render his decision in writing to the employee not later than five (5) days following the day upon which the appeal is received.

Paragraph 9. If the decision of the Superintendent is not satisfactory to the employee concerned, he may within five (5) days thereafter appeal in writing to the Management before whom he may be represented by the Negotiating Committee. The appeal shall be dealt with at the next meeting between the Management and the Negotiating Committee and such meeting shall be held three (3) days after the agenda for such meeting has been submitted by the Committee unless otherwise agreed upon.

PARAGRAPHS 11 AND 14

There was some variance between the views expressed as to who the final arbitrator should be and by whom he should be appointed. Apart from this, the Companies submitted a clause which together with paragraph 14, as submitted by the Companies, would leave either party free to accept or reject the award of the arbitrator. In view of the provisions of P.C. 1003, Section 18, subsections 1 and 2, the arbitration proceedings in respect to grievances must provide for final disposition of such grievances without recourse to stoppage of work, and therefore your Board recommends that Paragraphs 11 and 14 should read as follows:

Paragraph 11. If the decision of the Management is not satisfactory to the employee concerned, the parties to the grievance shall agree upon an arbitrator to whom the matter will be immediately referred for arbitration forthwith. Failing agreement of all parties to the selection of an arbitrator the matter will then be referred to the Provincial Minister of Labour to appoint an impartial arbitrator whose decision shall be final and binding.

Paragraph 14. Both parties agree to settle grievances under the foregoing pro-

cedure as speedily and effectively as possible. The Union agrees that it will not cause or permit its members to cause, nor will any member of the Union take part in, any strike or stoppage of any of the Company's operations nor will the Union cause or permit its members to cause any curtailment of work, or restriction of, or interference with, production of the Company. The Company reserves the right to discipline any employee who violates any provision of this clause. The Company will not cause or sanction a lockout of any of its employees.

PARAGRAPH 16

The only difference between the parties in respect to this paragraph had to do with the preservation of the employees' right to any wage scales determined under pending applications by the employees to the War Labour Board. Your Board sees no reason why the paragraph should not preserve any rights that may arise by reason of any wage decision on a pending application to the War Labour Board by either party and accordingly recommends that paragraph 16 should read as follows:

Paragraph 16. Pending the establishment of an appropriate standard of job classifications and wage rates as a result of survey at present being undertaken by the Toronto Automotive Trade Association and which is to be completed on October 1st, 1946, the scale of wage rates now in effect or which may become effective by any order of the War Labour Board will be paid. In the event that the job classifications and wage survey of the Toronto Automotive Trade Association is not mutually acceptable as a substitute for the rates of pay as herein provided, the rates of pay as established in this agreement or which may become effective by any Order of the War Labour Board will continue for the unexpired portion of the agreement.

PARAGRAPH 17

In regard to the matter of seniority, the parties were quite far apart. The Companies took the position that they are at present cluttered up with a lot of inexperienced mechanics as a result of having to take what was offered in the current labour market and that to adopt the principle of seniority subject to the grievance procedure, if there were disputes, would be to perpetuate inefficiency and make it exceedingly difficult to obtain competent working forces. Your Board has some sympathy with this view. On the other hand, your Board is of the opinion that properly safeguarded seniority provisions, all other things being equal, are essential to the well-being of competent employees of any concern. There is, however, a real difficulty in the case of this particular industry and these particular Companies to be considered. Your

Board felt that some provision for seniority should be made, but that so far as this first agreement is concerned, the Companies should have an absolute and unfettered right to determine the physical fitness and ability of the employees concerned before the principle of seniority should apply. Accordingly, your Board recommends that paragraph 17 (which was entirely omitted from Exhibit "C" as originally filed) should read as follows:

Paragraph 17. Seniority shall govern lay-off, re-employment and promotion of employees where ability and physical fitness are sufficient as to which the decision of the Company (employer) shall be final.

PARAGRAPHS 18 AND 19

In the draft agreement Exhibit "C" submitted by the Companies, there was only one provision in respect to the matter of job classifications, hours, wages and vacations with pay. This submission is subsequently discussed under the heading of paragraph 20. As there is no fixed pattern in these matters applicable to all the Companies concerned and as this Board probably lacks jurisdiction to determine all of them and has not sufficient evidence before it to make an intelligent finding, your Board felt that they could not make any recommendation as to these matters and accordingly we do not adopt any phraseology for these two paragraphs, nor make any recommendation in respect thereto.

PARAGRAPH 20

In paragraph 20 in Exhibit "C" as originally filed, the Companies proposed a joint application to the Minister of Labour for the Province of Ontario to convene a conference under the Industrial Standards Act to stabilize conditions in this industry. To this the Union had no objection except that the Companies wanted the Union to agree to make this joint application whenever the Companies saw fit and the Union wanted to have the timing of the application to be mutually agreeable to both parties. As your Board feels that unless the timing were mutually agreeable, no joint application would be made, we accordingly have adopted the Union's view in respect to that and we recommend that paragraph 20 should read as follows:

Paragraph 20. The Union agrees that it will at such date during the currency of this agreement as may be mutually agreed on behalf of its members jointly with the Company petition the Minister of Labour for the convening of a conference under the Industrial Standards Act for the purpose of investigating and considering the conditions of labour and practices prevailing in the garage industry and for the establishment of a mutually agreed upon industrial standards

schedule governing hours of work, rates of pay and job classifications of employees.

PARAGRAPH 21

There was no clause covering general matters in Exhibit "C", but this clause was presented by the employees and the Companies appeared to have no serious objection to it. Your Board therefore recommends that paragraph 21 dealing with general matters should be included in the agreement and should read as follows:

Paragraph 21. (a) It is mutually agreed that both parties hereto will co-operate to the fullest possible extent for the prevention of accidents and the promotion of safety and health.

(b) The Company will continue to make reasonable provisions for the safety, sanitation and health of the employees.

(c) Protecting devices and other equipment for the purpose of protecting employees from injury shall be provided by the Company in sufficient quantity.

(d) The matter of safety, sanitation and health is recognized to be dependent to some extent in the manner the employees use the facilities of the Company. Therefore, the full co-operation of the employees is required in fulfilling rules and regulations concerning lunch room, lockers and washroom facilities, etc.

(e) All uniforms and overalls to be supplied by the Company and to be laundered at the expense of the Company.

(f) There shall be no wage deductions or other charges against an employee for defective work or damage of tools or equipment unless such damage shall be proven due to negligence. Such proof to be determined by the Grievance Committee of the Union and the Management who shall assess damages which in no case shall exceed the actual cost of repair or replacement.

(g) Employees will be paid on Friday of each week.

PARAGRAPH 22

In respect to the duration of the agreement, the Companies proposed a fixed term of one year and the employees proposed a continuous term, subject to amendment or cancellation on thirty (30) days' notice. There is much to be said for having the provisions of a collective bargaining agreement extend beyond the statutory period of one year and therefore continue while negotiations for amendments are in progress, provided always that either party can cancel the whole agreement on reasonable notice. Your Board therefore recommends that paragraph 22 should read as follows:

Paragraph 22. For the purpose of negotiating a new agreement to take effect upon expiration of this agreement, conferences between representatives of Management and the Union shall commence not less than thirty days and not more than sixty days before the termination date of the agreement.

This agreement shall remain in force for one year from the date hereof and thereafter until amended or terminated by thirty days' notice by either party to the other. Any notice by either party to the other may be given by registered mail and addressed in the case of the Company to _____ and in the case of the Union to _____

The parties agreed on the principle of voluntary revocable check-off and there were only slight differences in the form of phraesology desired. Your Board recommends that the provisions in respect to this matter should read as set out hereunder and these provisions should be inserted in the final agreement under the heading of paragraph 22, thus leaving the provisions in respect to duration to be numbered as paragraph 23.

Paragraph No. 23. The Company will during the life of this agreement if and to the extent authorized by each employee covered by this agreement, in the manner hereinafter set out, but not otherwise, deduct from the pay, payable to each such employee, in the Company's first pay in each calendar month while such authority is in effect, the sum of \$— and remit the same prior to the tenth day of the month following the month in which the deduction is made, to the Financial Secretary of the Union. Any such authority shall be given in writing on the form set out in this paragraph, shall be revocable at any time on thirty days' notice in writing to the Company and shall be signed by the employee concerned in the presence of a witness. Any such authority shall take effect on the fifteenth day following the date of its receipt by the Company.

The Company will at the time of making such payment to the Financial Secretary of the Union, name the employees from whose pay such payment has been deducted.

The Company and the Union agree that they will not at any time coerce or intimidate or discriminate against any employee to induce him either to authorize or refuse to authorize the deduction of union dues. They agree further that they will not coerce, or intimidate or discriminate against any employee because he authorizes, revokes or refuses to authorize or revoke his deduction of union dues.

The following form shall be used by employees:—

Report of Board in Dispute Between Noranda Mines, Limited, Noranda, P.Q., and Local 688, Int. Union of Mine, Mill and Smelter Workers (CIO-CCL)

On October 22, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge C. E. Guerin, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members of the Board, Mr. T. R. Ker, K.C., of Montreal, and Mr. C. M. Desaulniers of Montreal, appointed on the nomination of the employer and employees respectively.

Before the Board the Union was represented by Thomas F. McGuire, International

Date.....

To—General Motors Products of Canada Ltd.
Retail Factory Branch,
210 Spadina Avenue,
Toronto, Ontario.
(or as the case may be)

You are authorized and requested to deduct from the pay hereinafter payable to me in the Company's first pay in each calendar month during the life of a collective bargaining agreement between you and the Industrial Union of Automotive Employees, Local 1, Toronto, Ontario, dated the first day of.....1946, the sum of \$..... and remit the amount so deducted to the Financial Secretary of the Union at Toronto, prior to the tenth day of the month following that in which such deduction is made.

This authorization shall become effective fifteen (15) days after it is received by the Company and shall remain in effect until thirty (30) days after notice in writing revoking the same shall have been signed by me and shall have been received by the Company.

Signed

Employee

Witness

Clock No.

Your Board feels that its specific recommendations on the disputed matters are reasonable and proper compromises, and expresses the hope that all parties to this dispute will in the end accept them.

All of which is respectfully submitted.

Dated at Toronto this 15th day of, October, 1946.

(Sgd.) EGERTON LOVERING
Chairman

(Sgd.) HERBERT ORLIFFE
Employees' Nominee

(Sgd.) E. MACAULAY DILLON
Employers' Nominee

Appended to the report was the text of the proposed collective agreement. When this is signed, it will be summarized in the *Collective Agreements* section of the *LABOUR GAZETTE*.

Representative and Mr. Breton, Local Representative, and the Company was represented by William S. Walton, K.C., of Toronto, Gustave Monette, K.C. of Montreal, and Mr. R. V. Porritt, an executive officer of the Company.

Report of Board

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

The above-mentioned Board of Conciliation, appointed by the Minister of Labour to act

in respect of disputes between the above parties, held its first sitting in Montreal, on August 1, 1946, and again sat at Montreal on August 16, 1946, and, after representations had been made that the Board should sit at Noranda, P.Q., sessions of the Board took place there on September 3, 4 and 5, 1946. The Board had several further sessions at Montreal to discuss the matters which had been brought before it, and to prepare its report thereon.

As there was some doubt on the subject of the actual differences between the parties, the Company and the Union submitted a joint memorandum, Exhibit 2, to the Board, indicating that a collective agreement could be reached between them on the basis of a draft which had already been formulated and was filed as Exhibit F, with the Company's brief, Exhibit 1, save and except as regards the following matters:—

- (1) Vacations with pay
- (2) Hours of work
- (3) Overtime
- (4) Statutory Holidays
- (5) Wages and Bonuses
- (6) Union security provisions

With regards to items 2 and 5 respectively, namely hours of work, wages and bonuses, the parties came to agreement in the presence of the Board, on the following basis:—

Hours of work.—Hitherto the hours of work have been: for Underground Workers, 8 hours per day, 48 hours per week, and for Surface Workers, 9 hours per day, 54 hours per week. The Union had contended for a 40-hour week for both classes of workers, but agreed to withdraw their demand for a 40-hour week and agreed to leave the 48 and 54 hour week undisturbed.

Wages and Bonuses.—The Board has no recommendations to make on Wages and Bonuses. The Company and the Union having agreed that these matters should not be made the subject of discussion before this Board.

Overtime.—As mentioned in a letter (see page 3 of annex "A") addressed to Judge C. E. Guerin, the 30th of July, 1946, by Mr. M. M. McLean, Director of Industrial Relations, the Board "may report to the Minister and make recommendations with respect to wage rates or other wage provisions, as well as on other matters before it". Therefore, our Board recommends that the parties agree on the adoption of daily as well as weekly overtime. The weekly overtime is actually paid by the Company.

The Board feels that the system of weekly overtime may, in some instances, work an injustice to the employee. An employee who

has worked faithfully for several days in the week, including considerable overtime, and who was later taken ill, or required to be absent for a perfectly justified reason, would thereby be deprived of his extra work because, by reason of his absence, he had not finished the work.

The Company contended that the daily overtime would bring a tendency amongst the workers to absenteeism, but there is no evidence to support such a contention at the moment—if such evidence had been made, the Board would not have recommended the system of daily overtime.

Vacations With Pay.—At the present time, the Company grants six days' vacation with pay, after one year of service. The Union requests twelve days' vacation with pay, after two years of service. At the hearing, the Board was unable to bring the parties to an agreement on this difference.

After carefully considering the matter, and having in mind the practice of numerous other Mining Companies, the Board is of the unanimous opinion that it is equitable to recommend that the Company favourably consider granting 6 days' vacation, with pay, to employees with one year's service, and 12 days' vacation, with pay, to employees with five years' service.

Statutory Holidays.—The Board believes that the present system of considering only Christmas Day as a Holiday without pay, but with double time if worked on, may appropriately be changed to provide for four statutory holidays during the year, namely: Christmas, New Year's, without pay if not worked on, but with pay at double time if worked on, and Dominion Day and Thanksgiving Day without pay if not worked on, but with pay at time and one-half, if worked.

Off-shift Differentials.—The Board has come to the conclusion that this matter should be referred to the National Labour Board.

Union Security.—Under this heading, the demands of the Union, primarily submitted to the Board, were as follows:—

Union Shop.—That all employees now members of the Union, as a condition of their employment, remain members in good standing for the duration of the agreement, and that all employees hired, during the life of the agreement between the Company and the Union, shall become members of the Union within one month from the date on which they are hired.

Check-off.—That the Company upon receipt of signed authorization from the employees concerned, shall deduct monthly from the earnings of such employees, the sum of \$1,

being the regular Union Membership dues, and transmit regularly, each month, the amount of dues so collected to the Financial Secretary of the Union.

The Company was quite definite in their statement that, under no circumstances, would either of these clauses be accepted.

The Union later stated that, in lieu of the two clauses above, they would be prepared to accept one clause, to read as follows:—

Union Security.—The Company shall, during the life of this agreement, as a condition of each employee's continued employment, deduct the sum of one dollar (\$1.00) from the first pay-cheque due in each calendar month to each such employee, and remit the same prior to the 10th day of the month following the month in which such deduction is made, to the Financial Secretary of the Union.

The Company emphatically stated its refusal to accept such a clause, and it was evident to the Board that it would be impossible to effect conciliation between the parties on this issue.

The Chairman of the Board, in an endeavour to find a solution which would bring the parties to an agreement, finally proposed a new clause, which was accepted by the Union but refused by the Company, the clause reading as follows:—

As a measure of co-operation, and with a view to the improvement of harmonious relations between the parties, upon request in writing by individual employees, which request shall be in the form indicated below, the Company undertakes to deduct from the pay of such employees the sum of one dollar (\$1.00) per month, and to remit the sum thus deducted to the Union.

FORM

I, the undersigned, badge No.
Department No. hereby authorize the NORANDA MINES LIMITED to deduct from my wages the sum of one dollar (\$1.00) per month (being the amount of my monthly dues), and to remit same to the Local No. 688 INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS; such deductions to continue until the expiry of the present contract between NORANDA MINES LIMITED and Local 688 INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, unless the present authorization is cancelled by me giving to the Company and the Union one month's notice in writing.

The above-mentioned clause is recommended to the parties by the majority of the Board (Mr. Thomas R. Ker, K.C. dissenting).

This clause does not come into conflict with either Provincial or Federal Laws. The workers do not waive any of their rights, but simply ask their employers to pay over part of their salaries to the Union. The workers reserve their right to cancel the authorization, and thus withdraw from the Union.

It is not a matter of the Union forcing the members to pay their dues through the Company, but rather the workers themselves who ask the Company to make the payments for them. The voluntary check-off is only a question of administration for the Company. Our Board recommends to the parties that they get together and fix a suitable remuneration to cover the cost of accounting.

The Board wishes to unanimously put on record its appreciation of the assistance given to it by both parties, and the able and courteous manner in which the representatives of both the Company and the Union have presented their cases and the way in which they have conducted themselves before the Board.

Montreal, October 21, 1946.

(Sgd.) C. E. GUERIN,
Chairman.

GUY MERRILL DESAULNIERS,
Employees' nominee.

T. R. KER,
Employer's nominee.

Minority Report

I regret that I am unable to agree with the findings of the majority of the Board as set forth in the Board's report under the heading of "Union Security".

Order in Council P.C. 1003 provides for compulsory collective bargaining between employers and employees with a view to arriving at a collective agreement, which under the Regulations means an agreement containing provisions with reference to rates of pay, hours of work or other working conditions. These three subjects relate directly to the contract of lease and hire of services, which is a purely bilateral contract between the employer and the employee.

It is true that employees may join any Union which they desire and if such Union secures the necessary majority and becomes certified according to the regulations, it may represent the employees for purposes of collective negotiation but the Union is only acting as the representative of the employees and not as a third party in the negotiations and its so acting does not broaden the field of subjects upon which negotiation may take place nor permit the Union to force the employer into negotiation upon a subject which does not fall within the intended meaning of "working conditions" and if it did so fall, it does not touch upon "working conditions" of all the employees, but concerns a matter strictly between the employees and the Union itself.

Under the Regulations, when the parties fail to reach an agreement, a Conciliation Board such as the present one may be set up whose duty it is to endeavour to bring the parties into agreement on the subjects in dispute, but these subjects must be within the ambit of those to which compulsory bargaining applies. If the Board is unable to bring the parties into agreement it makes a report, usually embodying suggestions of its own, upon the points which still remain in dispute. No legal strike may take place until the Board has reported.

If an employer willingly undertakes to make stipulations in favour of the Union (which is a third party) in respect of matters which do not flow naturally from the contract of lease and hire of services as affecting all employees and which do not fall within the three classes of subjects upon which compulsory negotiation may take place under the Regulations, then it appears to be the accepted view that there is no particular objection to the matter being dealt with in the contract, but where, as in the present instance, the employer has most definitely stated that as a matter of Company policy and for reasons which appear to it proper it will not accept Union Security provisions in any form either as regards compulsory Union membership, check-off or otherwise, then in my view it is not the function of a Board of this character to make a recommendation on a subject which I conceive to be outside of the subjects provided by law for collective bargaining.

While I am aware that many Boards of Conciliation have made recommendations on matters of Union Security, I am nevertheless of opinion that they have gone beyond their powers inasmuch as such recommendations, if in favour of something which the employer definitely refuses to accept, may conceivably place the Union in the position of bringing about a so-called legal strike which would in reality be illegal inasmuch as the employer

had never under existing rules been obliged to negotiate on the subject of Union Security.

It is a principle of the collective agreement that it should govern the relations between the employer and all employees in respect of the classes of subjects set forth in the Act as being those upon which compulsory bargaining shall take place, but it is evident that the adoption of the voluntary and revocable check-off provision suggested by the majority of this Board is a recommendation for the inclusion of a clause which clearly would not apply to non-members of the Union and possibly would not be acceptable even to many of its members and is not one which can logically find any place in a collective agreement covering working conditions applicable to all employees.

If any employees desire to have the Company pay their Union dues direct to the Union out of their wages, such an arrangement would in my opinion be one which the employee or employees concerned may take up individually with the Company as a purely business matter and should not be made part of a contract which at law is intended to apply to all employees. If the Company declined to consent to such an arrangement, it would have a perfectly good right to do so and the employee is left with his common law rights as regards assignment or otherwise of his dues. The rights of the employer in this connection should not be prejudiced by recommendations made by a Board of Conciliation, the result of which may give a colour of right to a Union in calling a strike in a case such as the present one where the recommendation is outside the classes of bargaining subjects and is definitely not acceptable to the employer.

Respectfully submitted.

(Sgd.) T. R. KER,
Employer's nominee.

Montreal, October 21, 1946.

Report of Board in Dispute Between Snyder's Limited, Waterloo, Ontario, and The National Union of Furniture Workers and Allied Crafts (CCL) Local No. 13.

On October 17, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: His Honour Judge A. Cochrane, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members of the Board, Mr. James E. Ferguson of Toronto, and Dr. Eugene Forsey of Ottawa, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:

The Board of Conciliation, appointed by you in this matter, begs to report as follows: The Board held meetings on the 29th of August and on the 14th and 23rd days of September and again on the 5th day of

October, 1946. The meetings held on the 29th of August and the 23rd of September were held at Waterloo, and the other two meetings were held in Toronto. At the two meetings in Waterloo the Company was represented by Mr. J. K. Sims, solicitor, and Mr. L. C. Ruby, Plant Manager, while the Union was represented by H. Erstad, National Secretary-Treasurer for the Union, Walter Loos, President of Local 13, and other members of the Union. The Board appreciates the manner in which representations were made to them by both parties and discussions and negotiations were conducted by all present on a very high plane.

At the first meeting of the Board it was suggested that briefs be filed by both parties and these briefs are now made a part of this report.

1. There appears to be very little dispute as to the facts and reference to the two briefs, which were filed by the parties, discloses that the parties are fairly well agreed as to what has transpired in the past and has led up to the unusual situation which now exists. There is nothing now before us which would indicate that there is now or has been in the immediate past serious trouble between the workmen and the employers.

2. The position taken by the respective parties is fully set out in their briefs which are, as has been stated, filed with this interim report.

3. The Union takes the position that the Company is under a legal obligation to bargain with the certified Bargaining Committee and that the Committee could negotiate an agreement even although only three of the original certified representatives now remain.

4. On the other hand the Company takes this position,—

- (a) That the Committee, as at present constituted, contains only a minority of the original certified representatives.
- (b) That it contains no representatives from what is known as factory "A".
- (c) That the Committee does not now represent the majority of the workers in the employ of the Company.
- (d) That the Company will meet only with properly certified bargaining representatives.

The Company takes the position that for these reasons it is possible that any agreement which might be concluded as between the present members of the Bargaining Committee and the Company might not be acceptable to the majority of the employees.

5. The Company stressed the fact that only three of the original Bargaining Committee

are now available for negotiations and placed strong emphasis on the fact that none of the employees in what is referred to as factory "A" are among the original remaining members of the Committee or those elected on the 27th of May, 1946.

6. The position at the present time is not satisfactory and while we make no attempt to analyse the merits of the contentions of the parties with respect to the legal position of the Bargaining Committee or to make any decision with regard thereto, we feel under the circumstances steps should be taken to properly constitute the Committee and bring it up to its original number of members.

7. We believe that it is possible that because of the difference in the type of work carried on in the two factories operated by the Company, there could be real difficulties in the way of concluding a satisfactory agreement if the employees of both factories are not represented.

We recommend,—

1. That as a preliminary step to further negotiations the Union proceed forthwith to have membership of the Bargaining Committee brought up to its original number of 11, in accordance with the procedure set forth in the Rules and Procedure of the Wartime Labour Relations Board (National), Sec. 3, sub-section 7.

2. That this should be done by the Union without prejudice to the rights of either party.

3. That when this has been accomplished the Union and the Company should re-open negotiations for an agreement.

It will be observed that no attempt has been made to deal with or discuss the merits as between the Union and the Company. We feel that it might be unwise to do so because of the position in which the matter now stands. If our recommendations are carried out and the parties are unable to agree, this Board might then be re-convened for the purpose of dealing with the matter further.

All of which is respectfully submitted.

(Sgd.) JAS. E. FERGUSON,
Employer Nominee.

(Sgd.) EUGENE A. FORSEY,
Employees' Nominee.

(Sgd.) A. COCHRANE,
Chairman.

Report of Board in Dispute Between Weston Dairy Limited, Weston, Ontario, and Local 647, Milk Drivers and Dairy Employees (AFL-TLC).

On October 10, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge Samuel Factor, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members of the Board, John J. Robinette, K.C., of Toronto, and Mr. G. Russell Harvey of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

SIR:

In a letter dated August 30 last from Mr. M. M. Maclean, he informed us of your request to reconvene this Board of Conciliation in order to clarify that portion of the Board's report dated April 29, 1946, reading as follows:—

Your Board recommends that the provision for a closed shop be modified to permit the employer to employ residents in the delivery area only who are not Union members.

Pursuant to your request, the Board reconvened and two meetings were held, one on

September 11 last and one on October 2, 1946.

After full consideration of the point involved, the Board unanimously recommends that the following be added to the last paragraph of the Board's report dated April 29:—

on the condition that such persons must join and become members of the Union within thirty days from the date of their employment.

Therefore, the last paragraph of the Board's report, dated as aforesaid, will read as follows:—

Your Board recommends that the provision for a closed shop be modified to permit the employer to employ residents in the delivery area only who are not Union members, on the condition that such persons must join and become members of the Union within thirty days from the date of their employment.

Yours truly,

SAMUEL FACTOR,
Chairman.

JOHN J. ROBINETTE,
Employer's nominee.

G. RUSSELL HARVEY,
Employees' nominee.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020

OFFICERS of the Industrial Relations Branch dealt with 31 industrial disputes during the month of October, involving 40,658 workpeople employed in 97 separate establishments. Of these, 14 were new disputes which originated during the month and 17 were situations which had been untermiated as of September 30, and received further attention in October. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, and Fredericton, N.B. The territory of the two officers resident in Vancouver comprises

British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and the officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—	
<i>Insulating Products Workers, Hamilton, Ont.</i> —It was reported in the September issue	

of the *LABOUR GAZETTE* (Page 1238) that His Honour Judge Samuel Factor, of Toronto, had been appointed as an Industrial Disputes Inquiry Commissioner under Section 5 of Order in Council P.C. 4020 to investigate charges that the Canadian Porcelain Company, Limited, Hamilton, Ont., had dismissed an employee because of union membership and activity. The report of the Commissioner was received during October. Its findings were that the employee in question was not dismissed or discriminated against for the reason that he was a member of or working on behalf of the Canadian Chemical Division of District No. 50, United Mine Workers of America, and that the Company was justified in discharging the man.

Metal Products Workers, Toronto, Ont.—The appointment of His Honour Judge Egerton Lovering, of Toronto, as an Industrial Disputes Inquiry Commissioner to investigate charges that Silverware Products (Canada) Limited, Toronto, Ontario, had dismissed 33 employees because of union membership and activity on behalf of the United Electrical, Radio and Machine Workers of America was reported in the September issue of the *LABOUR GAZETTE* (Pg. 1238). During October the Commissioner reported to the Minister of Labour that, after careful consideration, he found that 34 employees had been dismissed by the Company because they refused to work, and that they were discharged because of such refusal and not because they were union members.

Transport Workers, Shawinigan Falls, P.Q.—The October issue of the *LABOUR GAZETTE* (p. 1435) contained a report that the Minister of Labour had appointed the Honourable Mr. Justice Alfred Savard, of Quebec City, P.Q., as an Industrial Disputes Inquiry Commissioner to investigate a complaint that Carrier et Frere, Ltee., Shawinigan Falls, P.Q., had dismissed one of its employees because of union activity on behalf of the National Syndicate of Transport Employees and Others. In a report received in the latter part of October, the Commissioner found that the employee in question had been dismissed for cause and that the charge brought against the Company was not proven.

Public Utilities Workers, Toronto, Ont.—Reference was made in the October issue of the *LABOUR GAZETTE* (p. 1435) to the appointment of His Honour James Parker, of Toronto, by the Minister of Labour as an Industrial Disputes Inquiry Commissioner under the provisions of Section 5 of Order in Council P.C. 4020 for the purpose of investigating allegations that the Toronto Hydro Electric Commission had dismissed three employees

for the reason that they had refused to join the National Organization of Civic, Utility and Electrical Workers, Branch No. 1. In his report, the Commissioner stated that he accepted the finding of a judgment of the Ontario Labour Relations Board to the effect that there was no collective agreement in existence between the Toronto Hydro Electric Commission and the National Organization of Civic, Utility and Electrical Workers, with which decision he was in accord. There being no such collective agreement within the contemplation of Order in Council P.C. 1003, the Commissioner found that the three employees in question, having been dismissed because of their failure to join the National Organization of Civic, Utility and Electrical Workers, Branch No. 1, were improperly dismissed in contravention of Section 20 (1) of Order in Council P.C. 1003. He therefore recommended the reinstatement of the three employees forthwith and their reimbursement for lost wages from the date of their dismissal up to the time of their reinstatement, less any money earned by them in the meantime.

Pursuant to the recommendation of the Commissioner, the Minister of Labour on October 11 ordered the Toronto Hydro Electric Commission to reinstate the three men and to comply with the recommendation of the Commissioner in respect of back pay.

Newspaper Compositors, Ottawa, Ont.—The appointment of His Honour Judge G. E. Brennan, of Cornwall, Ont., as an Industrial Disputes Inquiry Commissioner to investigate a charge that the publishers of the Ottawa "Citizen" had dismissed an employee for the reason that he was a member of or working on behalf of the International Typographical Union was reported in the LABOUR GAZETTE for October (p. 1435). The Commissioner found that the discharged employee, contrary to the provisions of the Wartime Labour Relations Regulations, P.C. 1003, had on the premises of his employer and during the hours of his employment attempted to persuade employees of the Ottawa "Citizen" to leave their present employment and to join the International Typographical Union. In the circumstances, the Commissioner recommended that the dismissed employee should not be reinstated.

Foundry Workers, London, Ont.—During September, the Minister of Labour appointed His Honour Judge E. W. Cross, of Woodstock, Ont., as an Industrial Disputes Inquiry Commissioner to investigate charges that two employees of Wells Foundry Limited, London, Ont., had been dismissed because of union activity, as reported in the LABOUR GAZETTE for October (p. 1435). The union involved

was Local 3313, United Steelworkers' of America. In the case of one employee, the Commissioner found that his dismissal was justified as the evidence was clear that he had left his machine in order to canvass employees in another part of the plant during working hours in connection with joining the union. He found that the discharge of the second employee was not completely justified and that the man should have been disciplined by some other means than dismissal. However, his conclusion was that the cause of the employee's dismissal was his unwarranted physical interference with a fellow employee, rather than union activity.

Subsequently, the Company made a monetary settlement in connection with wages lost by the employee whose discharge the Commissioner found not to be completely justified, but allowed his dismissal to stand.

Advertising Workers, Toronto, Ontario.—The Minister of Labour, in compliance with a request by the Minister of Labour for Ontario, appointed His Honour Judge Samuel Factor, of Toronto, to investigate the dismissal of an employee by the E. L. Ruddy Sign Company, Toronto, Ont., allegedly on account of his membership in or activity on behalf of the United Retail, Wholesale and Department Store Employees of America. Judge Factor was appointed as an Industrial Disputes Inquiry Commissioner under the provisions of Section 5 of Order in Council P.C. 4020. His inquiry had not taken place at the end of the period under review.

Wood Products Workers, Grimsby, Ont.—A request was received in the latter part of October from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commissioner under P.C. 4020 to investigate a complaint that two employees had been dismissed by Merritt Brothers, Grimsby, Ont., allegedly on account of their membership in or activity on behalf of the United Automobile, Aircraft and Agricultural Implement Workers of America. On October 31, the Minister of Labour appointed His Honour Judge H. E. Fuller, of Woodstock, Ont., for the purpose of conducting an inquiry.

Brass Factory Workers, New Toronto, Ont.—Following the union membership's rejection of the proposals made by the Industrial Disputes Inquiry Commissioner, Mr. L. W. Brockington, K.C., C.M.G., for the settlement of the dispute between Anaconda American Brass, Ltd., New Toronto, and its employees represented by Local 811, International Union of Mine, Mill and Smelter Workers (see LABOUR GAZETTE for October, page 1438), officers of the Department of Labour assisted in bringing about a conference in

Toronto between officials of the American Brass Company, Waterbury, Conn., and the Superintendent of the Canadian plant, on the one hand, and the International President, a Canadian International Representative, and the Local Committee of the Union, on the other hand. An Industrial Relations Officer of the Department of Labour participated in the meetings, which took place on October 16 and 17.

As a result of these conversations, an agreement was reached which was satisfactory to the representatives of the parties, and which was ratified at a general meeting of the local union's members held on October 20. The agreement provided for an increase "across the board" in the wage rates of employees, amounting to 12½ cents per hour, with the understanding that if at the end of six months after September, 1946, the Index of the Cost of Living shall have risen by four points, the wage question may be re-opened for further negotiations. Such re-opening may take place only once during the life of the agreement. The agreement also provided for vacations with pay of two weeks' duration for employees with five or more years of actual service. No provision was made for the payment of wages for statutory holidays upon which no work was performed, but the Company undertook to pay wages at time-and-one-half rates for seven statutory holidays, if worked. Plant-wide seniority was established, but the Company was given discretion to disregard seniority in respect of 5 per cent of the skilled personnel affected in lay-offs or re-hiring. The voluntary check-off of union dues would remain in effect, with employees having an "escape period" from December 8 to 15. The Company agreed not to require the union to be re-certified, but would abide by the decision of the Ontario Labour Relations Board in respect of the application for certification made by a rival organization, which was pending at the time. Minor revisions were also agreed to in other conditions governing arbitration, grievance procedure, and the termination of the collective agreement.

Maintenance men began returning to the plant on the night of October 17 and production workers began reporting on October 21, thus terminating the strike which commenced on May 18 and involved some 1,000 employees. Full operations were restored in about two weeks' time.

Steel Workers, Ontario and Nova Scotia.—In accordance with the terms of settlement summarized in the October issue of the *LABOUR GAZETTE* (page 1436), work was gradually restored to normal during October in

the steel plants of Algoma Steel Corporation, Ltd., Sault Ste. Marie, Ont., Dominion Steel and Coal Corporation, Ltd., Sydney, N.S., and The Steel Company of Canada, Hamilton, Ont. Negotiations also proceeded under the guidance of Mr. T. H. Rahilly, as mediator, between representatives of the United Steelworkers of America and the three companies with a view to the determination of matters left unsettled at the time the strike was terminated. Hearings were arranged by the National War Labour Board with regard to the proposed elimination of the 5-cent differential between the wages of production workers at Sydney and those in the Ontario plants, and a decision was expected to be reached during November.

A complaint was made to the Department of Labour during the month that The Steel Company of Canada had violated the terms of the strike settlement relating to the reinstatement of employees without discrimination against them for having participated in the strike. This was occasioned by the Company having refused to re-employ some 24 men who had been convicted in the courts of various offences connected in some way with the strike. The matter was referred to the Government Controller of the steel plants, Mr. F. B. Kilburn, and to the mediator, Mr. Rahilly.

Metalliferous Miners, British Columbia.—The Industrial Disputes Inquiry Commissioner appointed to deal with the dispute between twelve metalliferous mining companies in British Columbia and their employees as represented by the International Union of Mine, Mill and Smelter Workers, the Hon. Mr. Justice Gordon McG. Sloan, Chief Justice of British Columbia, made two sets of recommendations during October to the interested parties. One related solely to the copper producing companies, and resulted in a settlement; the other related to the gold producing companies, and while it narrowed the differences between the parties to a considerable degree, was still the subject of local negotiations at a number of the gold mines as this issue of the *LABOUR GAZETTE* went to press.

In respect of the copper producers, the Commissioner recommended that the wages of miners and timbermen be increased by 64 cents per shift, while those of other employees be increased by 48 cents per shift. He also made various recommendations with respect to the "copper bonuses" payable to employees, which are based on the average monthly price of export refinery copper at New York, as quoted in American currency in the *Engineering and Mining Journal*. If the average export price of copper at New York hereafter

exceeds 14½ cents per pound, for a calendar month, the Commissioner recommended that the companies should thereafter, so long as the price exceeded 14½ cents per pound, pay a copper bonus of 25 cents per shift to each employee. If the New York export price should exceed 16 cents per pound, the companies should pay a further copper bonus of 25 cents per shift so long as the price should exceed that figure; and similarly a further bonus of 25 cents per shift should be paid if and so long as the export price should exceed 17½ cents. In addition, the Commissioner recommended that the amount of the June copper bonus (25 cents per shift) should be absorbed into the basic wage rates, along with the shift increases mentioned above; and that payment of the August and September copper bonuses, totaling 50 cents per shift, be guaranteed for the first nine months of the collective agreement regardless of the export price of copper, provided the companies' concentrates were being produced, shipped and smelted without interference.

Other recommendations of the Commissioner in respect of the copper producers were that shift differentials of 3 cents and 5 cents per hour should be paid in the second and third shifts respectively when such shifts were instituted; that hours worked in excess of 44 in any one work-week should be paid for at the rate of time and one-half; and for the voluntary revocable check-off of union dues under covenants similar to those adopted in the 1946 collective agreement affecting Coastal loggers in British Columbia.

The effect of the recommendations was to raise the wages of miners and timbermen by 14½ cents per hour on the basis of a 48 hour week, at least for the nine-month period of the guaranteed bonuses; and by 12½ cents for others than miners and timbermen. Increased earnings due to shift differentials and overtime payments not hitherto in force were estimated to involve approximately an additional 6.3 cents per hour.

At meetings of the local unions, employees of the two copper producing companies involved in the strike voted by substantial majorities to accept the Commissioner's recommendations and to return to work. After some difficulty in reaching agreement in local negotiations on the question of hours of work, a collective agreement was signed on October 21 between Local 663 of the union and the Britannia Mining and Smelting Co., Limited, Britannia Beach, B.C., incorporating the proposals of the Commissioner and providing for operations on the basis of alternating 40-hour and 48-hour working weeks. To overcome a "mine production emergency" it was provided

that not more than once in a calendar month underground drawing crews might by mutual agreement work 48 hours during the short (40-hour) week. The new agreement was subject, of course, to approval of the Regional War Labour Board in respect of increased wages, but work began again on the date of signing, for the first time since the commencement of the strike on July 3.

Local negotiations became deadlocked over hours of work at the second copper producing company when the Granby Consolidated Mining, Smelting and Power Co., Ltd., at Copper Mountain, B.C. insisted upon a normal working week of 48 hours, with overtime after 44 hours. It was finally agreed that the employees would work 48 hours per week for the first six months of the new agreement and then negotiate further on the question. A memorandum of understanding was signed on November 6, after which work was speedily resumed.

The Commissioner's recommendations relating to the gold producing companies were for wage increases of 64 cents per shift for miners and timbermen, and 48 cents per shift for other employees. His proposals in respect of shift differentials, hours of work and overtime, and check-off provisions were the same as those put forward to the copper producers. No recommendation was made with regard to bonuses, and the Commissioner pointed out that it must be borne in mind that the gold producing companies were at present facing difficult economic conditions due to a decrease in the price of gold on the one hand and to rising costs of production on the other.

When these recommendations were put before the workers at meetings of the local unions, the employees of only one mine voted in favour of their outright acceptance. The employees of the other mine gold producing companies affected followed the advice of the District Policy Committee of the union and rejected the recommended increases in wages as being inadequate, while endorsing the other proposals.

The representatives of the mine operators advised the Commissioner that his recommendations were acceptable, subject to certain reservations to the effect that individual agreements were acceptable, subject to certain agreements be negotiated and entered into within a reasonable time; that the employees undertake to work 44 hours when so requested; that the new wage rates apply from the date of signing of new agreements; that overtime rates be computed upon the base rate only; that concentrates be produced, shipped and smelted without union interference; and that

the method of check-off be the subject of negotiations between the employers and authorized representatives.

The differences between the union and the gold producers having been reduced materially, the Commissioner then proposed that work be resumed at all mines, and that the matters still in dispute be referred to negotiations to be carried on between each individual company and the local bargaining agency of the union. He suggested that if agreement were reached on the wage issue, the increases should be made retroactive to the date of the resumption of work, but that if no agreement were reached within thirty days, the matter should be referred back to him for further consideration. This procedure was agreed to by union officials, but rejected by the operators on the ground that it would give rise to false hopes among the employees, since the companies could not afford wage increases higher than those contemplated in the Commissioner's recommendations.

As the *LABOUR GAZETTE* went to press, it was reported that a tentative settlement had been reached between the management of Hedley Mascot Gold Mines, Ltd., Hedley, B.C., and the local union, subject to ratification by the employees. The understanding was said to involve the adoption of the Commissioner's recommendations together with the elimination of a differential applying to miners and timbermen which had been in effect in that locality. Conversations were also taking place on a local basis at other points, and it was hoped that an early resumption of work would result.

Chemical Products Workers, Windsor, Ont.—An agreement was reached on October 14 for the settlement of the strike of some 400 employees of Canadian Industries Limited, Windsor Works, Windsor, Ont., which had been called on June 27 by Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America. (See *LABOUR GAZETTE* for October, page 1439, and previous issues.) The main features of the settlement were unofficially reported to be wage increases ranging from 10 to 14 cents per hour; elimination of a job evaluation plan; and two weeks' vacation with pay, as already instituted, being written into the collective agreement. No concessions were reported with regard to "union security".

Certain maintenance workers returned to the plant on October 15 and all employees reported for work on October 18, after which a few were laid off temporarily and others given vacation with pay pending the resumption of full operations.

Electrical Apparatus Workers, Hamilton, Ont.—Renewed efforts by the Industrial Disputes Inquiry Commissioner, His Honour Judge J. C. Reynolds, of Kingston, assisted by a senior Industrial Relations Officer of the Department of Labour, resulted in a settlement on October 24 of the dispute between the Canadian Westinghouse Company, Ltd., Hamilton, Ont., and Local 504, United Electrical, Radio and Machine Workers of America (October *LABOUR GAZETTE*, page 1435). Following four days of intensive negotiations, a memorandum of settlement was signed by the parties providing among other things for an increase in the earnings of all employees equivalent to 13 cents per hour, and payment for three statutory holidays on which work would not be required, such holidays to be chosen by the union. The new collective agreement would be effective for one year from the date of the re-opening of the plant, but negotiations with respect to wages might be re-opened if at the end of nine months the cost-of-living index had risen by more than four points over the index figure for September 1, 1946. The Company agreed to institute a voluntary irrevocable check-off to become effective when authorizations were received from 51 per cent of the employees within the bargaining unit. The agreement also included a no-strike and no-lockout clause, and miscellaneous provisions concerning overtime, off-shift bonuses, payment for time spent on grievance procedure, and vacations with pay. As an alternative to the demand of the union that the wage increases be given retroactive effect, the Company agreed to assume the cost of the group insurance and employees' benefit plans during the period of the strike.

Chemical Products Workers, Amherstburg, Ont.—Direct negotiations between the parties resulted in a settlement on October 10 of the dispute between Brunner Mond, Canada, Limited, Amherstburg, Ont., and Local 89 of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, which led to a strike of some 400 employees on July 12. The final negotiations followed the intervention of an Industrial Disputes Inquiry Commissioner, Magistrate J. A. Hanrahan, of Windsor, and discussions between the parties at Ottawa under the guidance of the Minister of Labour and officers of his Department (See October *LABOUR GAZETTE*, page 1438).

The strike settlement under which all employees returned to work without discrimination, provided for an irrevocable check-off of union dues with an annual escape period of two weeks during which individual employees might discontinue their authoriza-

tions of same. It also provided for a new basic wage of 77 cents per hour. Employees receiving 61 cents per hour were granted an hourly increase of 16 cents, with staggered adjustments down to 13 cents per hour for those receiving 64 and 65 cents per hour, and 12 cents for those receiving 66 cents per hour or more.

Maintenance men reported for work on October 11th and production was restored to normal in about two weeks.

Metal Products Workers, Leaside, Ont.—Following long and patient negotiations which were renewed late in October under the guidance of His Honour Judge Samuel Factor, of Toronto, acting as Industrial Disputes Inquiry Commissioner, a settlement was reached on October 28 in the dispute involving a strike by some 1,166 employees of the Canada Wire and Cable Company, Limited, Leaside, Ont. The workers were represented by Local 514, United Electrical, Radio and Machine Workers of America. (See LABOUR GAZETTE for October, page 1434).

The settlement provided for wage increases of 14½ to 24 cents per hour, which included or absorbed an 8 per cent premium which had been granted by the Company in 1945. It also included a schedule of working hours based upon a standard 8-hour day and a 40-hour week except in the case of a day shift on which a standard 44-hour week was to be used for the purpose of calculating overtime payments. Conditions under which Saturday mornings would be worked were also set out in the schedule. Two weeks' vacations with pay were granted to employees after three years of service in addition to vacations of one week with pay after one year's service. Payment was provided for three statutory holidays when not worked. A bonus of 5 cents per hour was granted to workers employed on the second shift of a three-shift arrangement, in addition to the existing premium payment for the last shift of a two-shift or three-shift arrangement. The Company agreed to a voluntary revocable check-off of union dues. Conditions governing the amount and duration of guaranteed earnings for employees transferred from one job to another were adopted, and it was agreed to submit the question to top seniority for union stewards to a vote of the employees to be held under Government supervision. An open-end wage clause was adopted to become effective in April, 1947, or later, if the cost-of-living index should rise by four points or more over the index figure for October, 1946. A clause providing for no strikes and no lockouts will also be incorporated in the new agreement.

Automobile Workers, Windsor and Chatham, Ont.—The September issue of the LABOUR GAZETTE (page 1238) reported the appointment by the Minister of Labour of Mr. L. W. Brockington, K.C., C.M.G., of Ottawa, as Industrial Disputes Inquiry Commissioner to investigate and report upon the dispute between the Chrysler Corporation of Canada, Ltd., and the employees of its plants at Windsor and Chatham, Ont., members of Locals 195 and 127, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, which had precipitated strikes by some 3,440 employees on June 18. The Commissioner was unable to continue his mediation efforts because of prior engagements in the United Kingdom but in the early part of October representatives of the company and the union were invited to Ottawa for conversations under the guidance of the Minister of Labour and officers of the Department. As a result of these talks the parties were able to compose their differences and terms were agreed upon which were duly ratified by votes of the union members. The strike settlement provided among other things that the Department of Labour should supervise a vote among all of the employees of the two plants who came within the bargaining units for which the local unions were the bargaining agents in order to determine the wishes of the employees with regard to the adoption of the "Rand Formula" of union security. It was agreed in advance that the Rand Formula would be put into effect if a majority of those voting were in favour of it.

The votes upon the union security measure were conducted on October 16 and 17 under the supervision of an Industrial Relations Officer assisted by officers of the National Employment Service. Out of 3,229 eligible to vote at the Windsor plant, a total of 1,385 cast their ballots in favour of the Rand Formula while 651 voted in opposition to it. At Chatham, there were 122 in favour of the plan and 38 against, out of an eligible list of 234.

Other main features of the strike settlement consisted of wage increases of 12 cents per hour for hourly-rated workers, and an additional three cents per hour for minimum rated employees, and revision of the company's vacations-with-pay plan. Resumption of work commenced on October 23.

Rubber Products Workers, Province of Ontario.—By the end of October work had been resumed at all rubber products factories in Ontario affected by strikes called on June 24. Conferences between management and union representatives and government officials held in Toronto (see LABOUR GAZETTE, October, 1946) resulted in a settlement of matters in

dispute between the Dominion Rubber Company, Limited, and Local 80, United Rubber Workers of America, being reached on October 16. The principal provisions of the settlement were as follows: a general wage increase of 13 cents per hour to all male and female workers in the bargaining unit, retroactive to May 19, 1946; off-shift premiums of 3 cents per hour for work performed on the second shift and 5 cents per hour for work performed on the third shift of a three-shift system, and 4 cents per hour for work performed on the second shift of a two-shift system; payment of straight time if not worked, and of double time if worked, for three statutory holidays to be designated by mutual agreement; no change in existing arrangements with respect to hours of work and vacations with pay. It was agreed that the settlement would be effective for a period of one year, but the management signified its willingness to re-open negotiations with respect to wages at any time during the period if the general economic situation in Canada should warrant such action. The pattern of this settlement was observed in the ensuing

settlement of all other strikes in the rubber products industry in Ontario.

Metal Products Workers, Toronto, Ont.—Early in October the Minister of Labour for Ontario requested the Federal Minister of Labour to appoint an Industrial Disputes Inquiry Commission under Section 5 of Order in Council P.C. 4020 to investigate charges that the Canadian Laundry Machinery Company, Limited, Toronto, Ontario, dismissed two employees because of union activity on behalf of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America. On October 10, His Honour Judge Egerton Lovering, of Toronto, was appointed to conduct a formal investigation into the allegations. The Commissioner found that the complainants had magnified their grievances and interpreted their lay-off due to shortage of materials as a dismissal. The men had good records and their jobs were still available to them as soon as increased production warranted their re-employment. On the evidence there could be no finding of discrimination on the part of the Company.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-ferrous Smelting and Quarrying: Metal Mining

DAWSON, Y.T. — THE YUKON CONSOLIDATED GOLD CORPORATION, LIMITED AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 564.

Agreement to be in effect from September 1, 1946, to August 31, 1949, and for a further 30 days if not renewed by then. The company recognizes the union as the sole collective bargaining agency for all eligible employees. Maintenance of membership: all employees who are union members must maintain union membership in good standing as a condition of employment and all new employees must join the union. There shall be no discrimination or intimidation by the company or the workers because of union or non-union membership.

Hours of work: 8 per day, 48 per week; overtime: time and one half for work in excess of these hours and for first 8 hours worked on any of 7 specified holidays and double time for work on these holidays in excess of 8 hours. Vacation: two weeks pay to all employees, who work as long during the season as they are required by the company, to be paid when their service is terminated for the season. Employees who work throughout the year shall be entitled to a two weeks' vacation with pay.

Hourly wage rates: grade one, including drillers, dragline and bulldozer operators, electricians, carpenters, machinists, blacksmiths \$1.30; grade two (bearcat shovel operator, painters, welders, cooks) \$1.25; grade three (linemen, machine shop mechanics, bakers) \$1.20; grade four, including dredge oilers, power plant and main pump shift operators \$1.15; grade five, including garage servicemen, truck drivers, field blacksmiths and shovel and power plant shift oilers \$1.10; grade six, including nozzle men, prospect drill helpers, washing plant sluice operators \$1.05; grade seven, including swamper, labourers, waiters and bull cooks \$1. All of the above rates are subject to

a deduction of \$2.25 per day for employees boarding at company camps.

Provision is made for seniority rights, sick leave with pay, a labour-management committee and grievance procedure.

Manufacturing: Vegetable Foods

CHATHAM, ONT.—LIBBY, McNEILL AND LIBBY OF CANADA, LIMITED, AND THE INTERNATIONAL UNION UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 127.

Agreement to be in effect from March 1, 1946, to February 28, 1947, and a further two months for the purpose of negotiating a new agreement and thereafter by mutual agreement. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, Sept. 1945, p. 1338 with the following changes—Hours of work and overtime: time and one half shall be paid for all hours worked in excess of 9 per day or 45 in any one week and for all work on Sundays (except regular shift operations) and on 8 specified holidays. Minimum hourly wage rates: starting rate—men 58 cents, women 42½ cents, within 60 days a 5 cents per hour increase; for work between 6 p.m. and 7 a.m. an extra 5 cents per hour; for seasonal workers the rates shall be for men 58 cents, for women 42½ cents with an extra 3 cents per hour for night work (6 p.m. to 7 a.m.).

KELOWNA, B.C.—MEMBERS OF THE OKANAGAN FEDERATED SHIPPERS ASSOCIATION INC. AND FRUIT AND VEGETABLE WORKERS' UNION.

Agreement to be in effect from May 1, 1946, to May 1, 1947, and thereafter until 60 days' notice with supplementary agreement effective September 1, 1946 to August 31, 1947. This agreement and supplement is similar to the one previously in effect and summarized in the LABOUR GAZETTE for July 1945, p. 993, with the following changes—overtime: time and one half after 9 hours and double time for all work in excess of 11 hours per day between June 1 and November 30 inclusive of each year; the remainder of the year no employee shall work more than 8 hours per day without a special permit from the Board of Industrial Relations; employees working in excess of 8 hours with a special permit shall be paid time and one half and double time for work in excess of 10 hours. Vacation: provisions of the Annual Holidays Act (1946) to replace the existing provisions for vacation. Hours of work: between June 1 and November 30 of each year shall be any 8 or any 9 consecutive hours between 7 a.m. and 6 p.m. for a day shift and between 7 p.m. and 5 a.m. for a night shift. Check-off: the "Rand Award" for the Ford Motor Company of Canada Ltd. to apply re check-off as well as in other respects except where reference is made to the Ontario government or Provincial

government or officials, the British Columbia government or officials will be intended. A recess of 10 minutes, optionally at the request of the employees, morning and afternoon for all workers except those engaged on piece work shall be allowed.

Wage rates: an increase of 5 cents per hour shall be in force subject to the approval of the War Labour Board.

Manufacturing: Pulp, Paper and Paper Products

CHANDLER, P.Q.—THE GASPESIA SULPHITE COMPANY, LTD., AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 455.

Agreement to be in effect from July 1, 1946, to June 30, 1947, and thereafter from year to year subject to 30 days' notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, September 1943, p. 1241 with the following changes—hourly wage rates: yard labourers 70 cents, head locomotive engineers 90 cents, crane operators 85 cents, wood handling 70 cents; digesters and acid plant—cooks \$1.09, helpers 72 and 79 cents, acid makers 85 cents; stock preparation—blowpit men, wet machine operators 72 cents; dryers and storage—machine tenders \$1.15, back tenders 88 cents, third hands 78 cents, beatermen 70 cents; shift electricians 93 cents, electricians' helpers 75 cents, pulp testers 73 cents, millwrights 88 cents, machinists, welders 93 cents, painters 75 cents, casual labourers 65 cents.

QUEBEC, P.Q.—ANGLO-CANADIAN PULP AND PAPER MILLS, LTD., AND THE QUEBEC PROVINCIAL COUNCIL OF PAPER MILL UNIONS, THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 250) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 137).

Agreement to be in effect from May 1, 1946, to April 30, 1947, and thereafter from year to year subject to notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE Dec. 1945, p. 1821, with the following additions:

Hourly wage rates for certain classes: paper machines department—machine tenders \$1.98, backtenders \$1.80, third hands \$1.40, fourth hands \$1.01, fifth hands 96 cents, sixth hands 78 cents; control department—paper testers 84 cents, pulp testers 77 cents; stores department—truck drivers \$50 weekly, general helpers 74 cents; mixing room department—metermen 82 cents, beatermen, wet machine operators 74 cents, colour man 65 cents; steam plant department—72 cents to \$1; cutter room department—cutter operators 85 cents, scale and press operators 75 cents, others 73 cents; electrical department—electricians 94 cents to \$1.14, sub-station operators 96 cents, metermen 87 cents; woodhandling department—70 to 78 cents; sulphite department—cooks \$1.21, helpers 74 to 97 cents, sulphite testers 84 cents, chipper men 74 cents, others 70 to 95 cents; yard department—locomotive engineers 95 cents, locomotive firemen 78 cents, brakemen 82 cents, labourers 70 cents; mechanical departments—machinists 87 cents to \$1.02, welders, tinsmiths, blacksmiths, pipefitters and millwrights 87 to 97 cents, carpenters, riggers 87 to 95 cents, painters 74 to 82 cents, oiler millwrights 82 to 95 cents, labourers 72 cents.

POWELL RIVER, STILLWATER, OCEAN FALLS, PORT MELLON, WOODFIBRE AND PORT ALICE, B.C.—POWELL RIVER COMPANY LTD., PACIFIC MILLS LTD., SORG PULP COMPANY LTD., AND BRITISH COLUMBIA PULP AND PAPER COMPANY LTD. AND INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (POWELL RIVER LOCAL 142 AND OCEAN FALLS LOCAL 360) AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (POWELL RIVER LOCAL 76, OCEAN FALLS LOCAL 312, PORT MELLON LOCAL 297, WOODFIBRE LOCAL 494 AND PORT ALICE LOCAL 514).

Agreement to be in effect from May 1, 1946, to May 1, 1947, and thereafter from year to year subject to notice prior to March 1 in any year. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, January 1946, p. 49, with the following exceptions:

Hours of work effective June 1, 1946, to be 44 per week, (additional time may be worked to permit operation or protection of the mill at overtime rates as the following): time and one half for work in excess of 44 hours average per week. By average is meant the number of weeks mutually agreed upon in advance as the correct schedule.

Wage rates effective May 1, 1946, as follows—base rate for all male common labour 82 cents per hour, an increase of 15 cents per hour over the rate previously in effect, mechanics from 86 cents to \$1.18 per hour.

Manufacturing: Metal Products

TORONTO, ONT.—CANADIAN GENERAL ELECTRIC COMPANY LTD. (DAVENPORT WORKS) AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 507.

Agreement to be in effect from April 29, 1946, to April 28, 1947, and thereafter from year to year subject to notice. The Company recognizes the union as the sole collective bargaining agency for all eligible employees. There shall be no discrimination or coercion either by the company or the workers because of membership or non-membership in the union. Check-off: provided that a majority of the eligible employees are in favour the company will deduct union dues monthly from the pay of the employees who so authorize and remit same to the union.

Hours of work: 8-8 hours Monday through Friday, a 44-hour week during the summer, advisability of spreading the 44 hours on a 5½ day week during the winter months to be decided upon mutually. Overtime: time and one half for work in excess of 44 hours per week to be paid on a daily basis for time worked in excess of the standard daily hours, for all work on Saturday during summer schedule, and on Saturday afternoons when working 5½ day week schedule, Sundays and 6 specified holidays, two of which are paid holidays. Vacation: one week with pay for employees with one year of continuous service and two weeks with pay for those with 5 or more years' continuous service.

Wage rates—minimum starting rate for men 60 cents per hour to be increased by 2 cents per hour within 30 days and by at least another 2 cents within a further 30 days. The minimum starting rate for boys and female employees will be 44 cents per hour, to be increased to 47 cents within 30 days. The company is prepared

to increase job rates presently in effect 9.1 per cent plus 3 cents per hour subject to approval by the Ontario Regional War Labour Board. A bonus of 5 cents per hour will be paid for recognized second and third shifts.

Provision is made for seniority rights and grievance procedure.

HAMILTON, ONT.—CANADA IRON FOUNDRIES, LIMITED AND THE UNITED STEELWORKERS OF AMERICA, LOCAL 2940.

Agreement to be in effect from July 17, 1946, to July 16, 1947, and thereafter from year to year subject to notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. Maintenance of union membership; all employees now members of the union shall maintain union memberships in good standing as a condition of employment for the duration of the agreement (except for the last 15 days when members may resign from the union) and all new employees must join the union. Check-off: the company will deduct monthly union dues from the pay of employees who so authorize and remit same to the union. No discrimination or intimidation by either the company or the employees, because of union or non-union membership.

Hours of work: 8 per day Monday through Saturday a 48-hour week; overtime at time and one half for work in excess of 8 hours per day and for all work on Sundays (except for plant watchmen and firemen working Sunday as part of regular shift) and all recognized legal holidays. Vacation with pay of 6 days for employees with one year's service and 12 days for those with 5 years' service.

Provision is made for seniority rights and grievance procedure.

Construction: Buildings and Structures

VANCOUVER AND NEW WESTMINSTER, B.C.—THE GENERAL CONTRACTORS' ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCALS 452 AND 1251.

Agreement to be in effect from July 1, 1946, to June 30, 1947, and thereafter from year to year subject to notice.

Hours of work: 8 per day Monday through Friday, a 40-hour week. Overtime: time and

one half for first 4 hours in excess of 8 hours per day and for work on Saturday mornings, double time for work over 4 hours overtime, and for all work on Saturday afternoons, Sundays and 9 specified holidays. Vacation: one week with pay will be allowed as and when provided by Provincial law.

Wage rates: minimum shall be \$1.25 per hour, all foremen shall be paid not less than \$1.28 per day of 8 hours over the minimum rate. In case of necessity shift work may be allowed, provided shifts continue for 3 consecutive nights and are run in addition to the regular day shifts. Seven hours shall constitute a night shift, for which 8 hours pay must be allowed. Provision is made for an apprenticeship plan.

Service: Business and Personal

CALGARY, ALBERTA—VARIOUS HOTELS, MEMBERS OF THE HOTELMEN'S ASSOCIATION AND HOTEL AND RESTAURANT EMPLOYEES' INTERNATIONAL ALLIANCE (BEVERAGE DISPENSERS LOCAL 265).

Agreement and amendment in settlement of strike LABOUR GAZETTE July, p. 981 and August p. 1158, to be in effect from July 2, 1946, to November 1, 1947, and thereafter from year to year subject to notice. All beer parlor employees such as tapmen, floormen, shall be members in good standing of union local and any person starting to work not a union member shall become a member of the union within 15 days of starting work. However, if an unemployed member of the union is available and satisfactory to the employer he shall be given preference in hiring.

Hours of work: 8 per day, 6 days per week for waiters, tapmen shall not average more than 48 hours per week. During exceptionally heavy business, such as Stampede, Christmas and Convention weeks, the regular staff may work overtime, and shall receive payment for such overtime on the basis of actual wages. Vacation: one week with pay for all beverage dispensers who have worked a year or more for their present employers. All beer parlor employees shall be paid for Christmas Day and Good Friday at their regular rates of pay.

Minimum Wage rates: tapmen \$35 per week, waiters \$32 per week, extra men \$5.50 per day.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order

in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, p. 86. Proceedings under this act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the repeal of one agreement, the correction of another and the amendment of twelve

others, all of which are noted below. Requests for the amendment of the agreements for the cloak and suit industry for the province and for building trades at Montreal were gazetted September 21. A request for a new agreement for retail stores at Granby was also published September 21. Requests for amendments to the agreements for building trades at St. John, the hardware and paint trade at Quebec, building trades at Montreal, garages and service stations at Montreal and tannery employees for the province were all gazetted September 28. Requests for the amendment of the agreements covering building trades at Quebec, the furniture industry for the province, barbers and hairdressers at St. Hyacinthe and at Hull and the embroidery industry at Montreal were published October 12.

Orders in Council were also published approving the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties. An Order in Council was published repealing the constitution and by-laws and the levy by-law of a parity committee.

Manufacturing: Fur and Leather Products

FUR INDUSTRY, QUEBEC CITY

An Order in Council, dated September 25, and gazetted October 5, amends the previous Orders in Council for this industry (L.G., Nov., 1940, p. 1201; Dec., 1941, p. 1572; May, 1942, p. 630; Sept., 1943, p. 1253; May, 1944, p. 637; June, 1945, p. 873). The number of specified paid holidays is increased by the addition of Dominion Day, which, if worked, is to be paid for at double time. Minimum weekly wage rates: shop foreman \$44; cutter and tailor from \$27.50 for third class to \$41 for first class; pattern maker (male) \$47, (female) \$42; hide sorter \$26; blocker \$28.50; operator, first class \$21.50, second class \$19; female operator and finisher, first class \$21.50, second class \$19; apprentices (male) from \$8.50 per week during first year to \$22 per week during sixth year; apprentices (female) from \$8.50 per week during first year to \$13.50 per week during third year. Vacation: any employee having five or more years' continuous service with the same employer is to receive an additional week's vacation with pay consisting of 7 consecutive days to be taken between the first day of March of one year and the last day of February of the following year.

WHOLESALE FUR INDUSTRY, MONTREAL

An Order in Council, dated September 18, and gazetted September 28, amends the previous Orders in Council for this industry (L.G., Nov., 1944, p. 1368; April, 1945, p. 517, Aug., p. 1197, Oct., p. 1520; June, 1946, p. 783, Aug., p. 1092, Oct., p. 1444). Present agreement to remain in effect to April 30, 1948, and thereafter from year to year, subject to notice. Minimum weekly wage rates are as follows: cutters \$45 and \$53, operators (male) \$35 and \$45, operators (female) \$27 and \$33.50, finishers (male) \$33 and \$40, finishers

(female) \$26 and \$32, blockers and trimmers \$26 and \$35, apprentice-cutters \$35, trimmers, second class, female lining cutters \$30, examiners \$28 and \$33, female lining operators \$25, employees engaged in trimming and padding collars \$26, apprentices from \$12 during first 6 months to \$18 during fourth 6 months. Vacation: for the year 1947, any employee with 3 years' continuous employment with the same employer shall be entitled to a second week's vacation with pay.

Manufacturing: Textiles and Clothing

CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated October 3, and gazetted October 12, extends the term of the previous Orders in Council for this industry (L.G., July, 1943, p. 989; May, 1944, p. 637; Aug., 1946, p. 1093, Sept., p. 1249, and previous issues) to December 1, 1946.

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated September 18, and gazetted September 28, amends the previous Orders in Council for this industry (L.G., April, 1945, p. 517; May, 1946, p. 627, July, p. 930, Sept., p. 1249, and previous issues). Present agreement to remain in effect to July 31, 1947, and thereafter from year to year, subject to notice. Hours: 44 per week; however, in shops where the 40-hour week is in effect by special agreement, these hours may not be increased. Overtime: 2 hours' overtime shall be permitted on each of the first 4 working days of the week. In shops in which the 40-hour week is in force, the first hour of overtime each day is payable at regular rates. All other overtime is payable at time and one-half. All work is prohibited on Saturday, Sunday and during the lunch hour interval of each working day.

Minimum weekly wage rates for a 44-hour week: skilled cutters \$34.95 and \$25.45; spreaders, examiners \$12.97, drapers \$14.53, operators, sample makers \$15.05, finishers \$13.23, folders, pressers' assistants, general hands \$11.42, pressers (male) \$23.60, pressers (female) \$14.53. No piece work prices may be fixed which do not yield pay equal to the above minimum rates. A scale of minimum weekly rates higher than the above rates is included. This scale would come into effect on condition that similar minimum rates and hours be established by law for the same industry in the Province of Ontario. Apprentice-cutters are to be paid from \$7.27 per week during the first 6 months to \$25.45 per week at the end of 36 months. All other apprentices to be paid from \$7.27 per week during first 6 months to \$11.42 per week during fourth 6 months.

MEN'S AND BOYS' HAT AND CAP INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated September 18, and gazetted September 28, amends the previous Orders in Council for this industry (L.G., April, 1940, p. 389; Oct., 1941, p. 1314; April, 1943, p. 489; July, 1944, p. 867; Aug., 1945, p. 1197). Hours: from July 1, 1946, to December 31, 1946, 42 per week, 8½ per day from Monday to Friday; from January 1, 1947, to December 31, 1947, 40 per week, 8 per day from Monday to Friday. Overtime is limited to 10 hours per week and is pay-

able at regular rates. If necessary, employees shall be obliged to work 4 hours on Saturday morning which shall be part of the ten hours' overtime per week. No work is allowed on Saturday afternoon or Sunday.

EMBROIDERY INDUSTRY, MONTREAL

An Order in Council, dated October 3, and gazetted October 12, extends the term of the previous Orders in Council for this industry (L.G., Dec., 1944, p. 1514; Sept., 1946, p. 1249) to December 1, 1946.

Manufacturing: Pulp, Paper and Paper Products

CORRUGATED PAPER BOX INDUSTRY, PROVINCE OF QUEBEC

An Order in Council dated September 25, and gazetted October 5, amends the previous

Orders in Council for this industry (L.G., April, 1942, p. 483. Sept., p. 1097; Jan., 1943, p. 88, April, p. 490, Nov., p. 1529; Feb., 1944, p. 198, Sept., p. 1141; June, 1945, p. 873, Aug., p. 1198; April, 1946, p. 499, May, p. 628). Hours of work for all employees are reduced to 50 per week. Overtime and all work performed on Sundays and holidays is payable at time and one-half. The minimum hourly wage rates for both male and female employees are shown in the accompanying table. The minimum average wage for male employees is 55 cents per hour and for female employees 36 cents per hour. (For the first 3 months of employment, the minimum wages for male and female employees shall not be more than 5 cents below the rates listed in the table.) Vacation: one week of 50 hours with pay after one year's service.

*Manufacturing: Metal Products*ORNAMENTAL IRON AND BRONZE INDUSTRY,
MONTREAL

An Order in Council, dated October 3, and gazetted October 12, extends the term of the previous Orders in Council for this industry (L.G., Oct., 1945, p. 1520; Oct., 1946, p. 1445) to December 1, 1946.

CLOCKMAKERS, MONTREAL

An Order in Council, dated October 3, and gazetted October 12, extends the term of the previous Orders in Council for this industry (L.G. Nov., 1943, p. 1530; Aug., 1944, p. 1007, Dec., p. 1515; May, 1946, p. 628, Sept., p. 1252, Oct., p. 1445) to October 9, 1947.

Construction

BUILDING TRADES, ST. HYACINTHE

A correction of an Order in Council relating to this industry (L.G., Oct., 1946, p. 1446) was published in the *Quebec Official Gazette* of September 21. This correction does not affect the summary already given.

BUILDING TRADES, ST. JEROME

An Order in Council, dated September 18, and gazetted September 28, amends the previous Orders in Council for this industry (L.G., Feb., 1943, p. 220, April, p. 490; Feb., 1945, p. 182, Oct., p. 1520, and previous issues). The United Brotherhood of Carpenters and Joiners of America, local 1001, of Ste. Thérèse de Blainville is accepted as co-contracting party.

Another Order in Council, dated September 25, and gazetted October 5, also amends the

previous Orders in Council for this industry. Territorial jurisdiction comprises the county of Terrebonne and is no longer divided into zones. The new minimum hourly wage rates are as follows: carpenter-joiner, millwright, weather-stripper, roofer (asbestos, slate, tile and composition), cement finisher, decorator, wall-paper hanger, sprayer, lather, sheet metal worker (shop or job), blacksmith, driller (Jack hammer man), steam, electric or gas mixer operator, engineman, steam, gasoline or electric shovels, stationary or portable boiler engineman 85 cents; tile setter, painter, glazier, floor finisher (shop or job), tinsmith-roofer, fireman (construction) 80 cents; plasterer, mason (including cutter on the job), bricklayer, electrical contractor (personal services) \$1.05; journeyman electrician, floor finisher (hand or machine) 90 cents; pipe mechanic, plumber and steamfitter — contractor (personal services) \$1.05, journeyman 90 cents, junior journeyman 80 cents; painter (structural iron) \$1; structural iron worker (all categories) \$1.11; boiler-maker, erector, steam generator mechanic and welder \$1.11, helper 84 cents; blacksmith, plasterer, bricklayer and mason's helper 65 cents; common labourer 60 cents; waterman 55 cents. Foremen supervising a shift of 4 or more men shall be paid 10 cents per hour more than the rates established for their trade. For the installation of portable tanks and boilers under 2 tons in weight, employees are to be paid 78 cents per hour. Workers installing stokers in furnaces with horizontal heating surface of 20 feet and less shall be paid 89 cents per hour and their helpers 67 cents per hour. With the exception of those mentioned above, the mini-

mum wage rates for apprentices in trades requiring 4 years' apprenticeship are from 40 cents per hour during first year to 65 cents per hour in fourth year, for trades requiring 3 years' apprenticeship from 40 cents during first year to 55 cents during third year. However, the minimum wage rates for carpenters-joiners' apprentices are from 45 cents during first year to 70 cents during fourth year. For employees engaged in maintenance work, the minimum rates are \$30 per week for journeymen, \$15 for apprentices and \$22 for common labourers. Employers may deduct \$5 per month per room if maintenance man lodges in the establishment and a maximum of 35 cents per meal if he boards in the establishment.

Trade

TRADE AND OFFICE EMPLOYEES, ARVIDA, JON-QUIERE AND ST. JOSEPH D'ALMA

An Order in Council, dated September 25, and gazetted October 5, amends the previous

Orders in Council for this industry (L.G., April, 1945, p. 518, Aug., p. 1199; July, 1946, p. 931). "L'Association des Marchands détaillants de St. Joseph d'Alma" is accepted as co-contracting party.

WHOLESALE TRADE, SHERBROOKE

An Order in Council, dated September 18, and gazetted October 5, repeals the Order in Council of June, 1945, relating to this industry. (L.G., Aug., 1945, p. 1198).

Service: Business and Personal

BARBERS AND HAIRDRESSERS, ROUYN AND NORANDA

An Order in Council, dated September 25, and gazetted October 5, amends the previous Orders in Council for this industry (L.G., April, 1942, p. 484, July, p. 857; June, 1944, p. 754, Sept., p. 1143) by providing for a reduction in the hours of work performed on Saturdays and days before holidays.

Fair Wage Conditions in Dominion Government Contracts

THE Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classes

of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are covered by the general provision that rates must equal those current in the district, and in addition, by the requirement that the rates must not be less than 35 cents an hour for male workers 18 years of age and over, 25 cents for female workers 18 years of age and over, and 20 cents for beginners and for workers under 18.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During September

During the month of September the Department of Labour prepared, on request, 35 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into during this period by the various Government departments appear hereunder:—

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum rates only*" and that "nothing herein contained shall be considered as exempting contractors for the payment of higher rates in any instance where such higher rates are fixed by provincial legislation or by direction of a War Labour Board".

National Harbours Board

Dredging deep water berths and centre of slips, Saint John Harbour, Saint John, N.B. Name of contractor, Saint John Dry Dock and Shipbuilding Company, Limited, Saint John, N.B. Date of contract, September 10, 1946. Amount of contract, schedule rates, approximately \$248,500. This contract contained both the "A2" Labour Conditions, applicable to dredging operations, and the "A1" Labour Conditions, applicable to building construction work, of which the following fair wages schedule formed a part:—

	Per Hour
Boatmen (rowboats)	\$.51
Electricians (inside wiremen)85
Labourers51
Motor boat operators55
Motor truck drivers55
Motor truck driver and truck	1.55
Machinists85
Machinists' helpers56
Pipefitters (surface—temp. work)61
Plumbers and steamfitters90
Welders and burners:	
Acetylene or elec.80
Watchmen45

Department of Public Works

Repairs to armoury, Beauport, P.Q. Name of contractor, Emile Cote, Eng., Quebec, P.Q. Date of contract, September 17, 1946. Amount of contract, \$18,798.80. A fair wages schedule was included in the contract as follows:—

	Per Hour
Brick and hollow tile layers.....	\$1.00
Brick and hollow tile layers' helpers.....	.65
(mixing and tempering mortar)	

	Per Hour
Carpenters and joiners80
Cement finishers80
Cement and concrete mixer operators:	
Steam75
Gas. or Elec.75
Drivers60
Driver, team and wagon90
Electricians (inside wiremen)80
Labourers60

Stonemasons' helpers65
(mixing and tempering mortar)	
Watchmen55
Waxers and polishers (floor)70

Additions to heating system at the Veterans' Care Hospital, Saint John, N.B. Name of contractor, Messrs. W. E. Emerson and Sons, Limited, West Saint John, N.B. Date of contract, September 23, 1946. Amount of contract, \$6,350. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos insulation workers	\$.70
Brick and hollow tile layers.....	1.21
Brick and hollow tile layers' helpers.....	.55
(mixing and tempering mortar)	
Carpenters and joiners88
Cement finishers	1.11
Cement and concrete mixer operators:	
Steam75
Gas. or elec.60
Drivers51
Driver, team and wagon85
Electricians (inside wiremen)85
Labourers51
Motor truck drivers55
Motor truck driver and truck.....	1.55
Painters and glaziers81
Plasterers	1.21
Plasterers' helpers55
(mixing and tempering material)	
Plumbers and steamfitters90
Roofers, felt and gravel: patent: comp.....	.55
Sheet metal workers.....	.76
Watchmen45

Installation of oil burning equipment in eight pavilions at the Diversional Occupation Centre, London, Ont. Name of contractor, Mr. Fred R. Hoffman, London, Ont. Date of contract, September 24, 1946. Amount of contract, \$5,912.50. A fair wages schedule was included in the contract as follows:—

	Per Hour
Brick and hollow tile layers	\$1.20
Brick and hollow tile layers' helpers.....	.55
(mixing and tempering mortar)	
Drivers51
Driver, team and wagon90
Electricians (inside wiremen)	1.10
Labourers51
Motor truck drivers55
Motor truck driver and truck	1.55

	Per Hour
Painters and glaziers70
Plumbers and steamfitters	1.06½
Watchmen46

Alterations to stable building at Rideau Hall, Ottawa, Ont. Name of contractor, Mr. H. Dagenais, Ottawa, Ont. Date of contract, September 12, 1946. Amount of contract, \$7,100. A fair wages schedule was included in the contract as follows:—

	Per Hour
Carpenters and joiners	\$1.05
Cement finishers75
Cement and concrete mixer operators:	
Steam80
Gas. or elec.70
Drivers61
Driver, team and wagon95
Electricians (inside wiremen)96
Labourers61
Lathers:	
Metal	1.00
Wood90
Linoleum layers75
Motor truck drivers65
Motor truck driver and truck.....	1.65
Painters and glaziers86
Plasterers	1.16
Plasterers' helpers65
(mixing and tempering material)	
Plumbers and steamfitters	1.12
Watchmen56

Construction of an approach and float, Brunette River, New Westminster, B.C. Name of contractor, Fraser River Pile Driving Company, Limited, New Westminster, B.C. Date of contract, September 12, 1946. Amount of contract, approximately \$5,233.13. A fair wages schedule was included in the contract as follows:—

	Per Hour
Pile driver and derrick foreman.....	\$1.37
Pile driver and derrick engineer.....	1.24
Pile driver and derrick men.....	1.12
Pile driver and derrick bridgemen.....	1.12
Pile driver and derrick boommen.....	1.12
Pile driver and derrick firemen.....	.80
Labourers65
Watchmen60

Reconstruction of wharf, Lockeport, N.S. Name of contractors, Messrs. A. J. Campbell, J. A. Campbell and Alex. J. McIsaac, Inverness, N.S. Date of contract, September 17, 1946. Amount of contract, approximately \$19,396.95. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.65
Blacksmiths' helpers50
Boatmen (rowboats)45
Divers (full day's pay allowed whether employed full or part time) per day	14.18
Divers' tenders (full day's pay allowed whether employed full or part time) per day	5.43

	Per Hour
Drivers45
Driver, horse and cart60
Driver, team and wagon75
Engineers, operating, steam80
Engineers, crane (steam, gas., elec.).....	.80
Firemen, stationary60
Hoist operators—tower (gas. or elec.).....	.60
Labourers45
Motor boat operators50
Motor truck drivers50
Motor truck driver and truck	1.50
Pile driver and derrick foremen.....	.85
Pile driver and derrick engineers75
Pile driver and derrick men (rigging, setting, signalling)60
Pile driver and derrick firemen60
Pile driver and derrick labourers50
Timbermen and cribmen (measuring, scribing, and, by the use of the axe, adze, etc., cutting and fitting timber)55
Watchmen40

Construction of rock rip-rap bank protection works on Kirkland Island, Fraser River, B.C. Name of contractor, Messrs. Gilley Brothers, Limited, New Westminster, B.C. Date of contract, September 17, 1946. Amount of contract, approximately \$57,710. This contract contained both the "A2" Labour Conditions applicable to dredging operations, and the "A1" Labour Conditions applicable to building construction work, of which the following fair wages schedule formed a part:—

	Per Hour
Quarrymen	\$.81
Labourers:	
Common65
Experienced building71
Pile driver and derrick foremen.....	1.37
Pile driver and derrick engineers	1.24
Pile driver and derrick firemen80
Pile driver and derrick men (rigging, setting and signalling)	1.12
Pile driver and derrick bridgemen.....	1.12
Watchmen60

Extension to groyne at Griffith's Island, Grey County, Ont. Name of contractor, the McNamara Construction Company, Limited, Toronto, Ont. Date of contract, September 17, 1946. Amount of contract, approximately \$3,560. A fair wages schedule was included in the contract as follows:—

	Per Hour
Engineers, crane (steam, gas., elec.).....	\$.85
Labourers51
Motor truck drivers55
Motor truck driver and truck	1.55
Pile driver and derrick foremen	1.00
Pile driver and derrick engineers90
Pile driver and derrick men (rigging setting and signalling)65
Pile driver and derrick firemen60
Pile driver and derrick labourers55
Timbermen and cribmen (measuring, scribing and, by the use of the axe, adze, etc., cutting and fitting timber)56
Watchmen46

Alterations and addition to public building, Valleyfield, P.Q. Name of contractor, Alphonse Gratton Inc., Montreal, P.Q. Date of contract, September 17, 1946. Amount of contract, \$83,000. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos insulation workers	\$.65
Blacksmiths80
Blacksmiths' helpers50
Brick and hollow tile layers85
Brick and hollow tile layers' helpers.....	.50
(mixing and tempering mortar)	
Carpenters and joiners65
Cement finishers60
Cement and concrete mixer operators:	
Steam70
Gas. or elec.55
Compressor operators (gas. or elec.)55
Drivers45
Driver, team and wagon70
Drill runners55
Electricians (inside wiremen)70
Elevator constructors	1.00
Elevator constructors' helpers70
Engineers on steel erection	1.00
Engineers, crane (steam, gas., elec.).....	.75
Enginemn, stationary55
Hoist operators—tower (gas. or elec.)55
Labourers45
Lathers:	
Metal65

Canadian Vocational Training

Conference of Vocational Training Advisory Council

THE seventh meeting of the Vocational Training Advisory Council was held in Room 262, Centre Block, Parliament Buildings, Ottawa, October 21-23, 1946. Dr. G. Fred McNally, Chancellor, University of Alberta, Chairman of the Advisory Council, presided. Other members of the Council present were:—

Dr. Jean Bruchesi, Deputy Provincial Secretary, Quebec; Lt.-Col. F. T. Fairey, Deputy Minister of Education, British Columbia; Mr. N. C. MacKay, Director of Extension, Department of Agriculture, Manitoba; Dr. Fletcher Peacock, Director of Educational Services, New Brunswick; Dr. F. H. Sexton, Director of Technical Education, Nova Scotia; Mr. J. G. Herwig, General Secretary, The Canadian Legion of the B.E.S.L., Ottawa; Mr. D. S. Lyons, Vice-President, International Association of Machinists, Montreal; Mr. C. B. C. Scott, Personnel Manager, Massey-Harris Company, Toronto; Mrs. E. D. Hardy, Vice-President, International Council of Women, Ottawa, and Mr. R. Seasons of the W. G. Edge Company, Ottawa, Mr. L. S. Beattie, Director of Vocational Education, Ontario, represented Mr. F. S. Rutherford, Deputy Minister of Education.

In addition, the following Regional Directors of Vocational Education attended the conference:—

Mr. L. W. Shaw, Prince Edward Island; Mr. J. W. McNutt, New Brunswick; Mr. H. H. Kerr, Ontario; Colonel J. Neish, Manitoba; Mr. W. A. Ross, Saskatchewan; Mr. J. H. Ross, Alberta; Mr. Henry Hill, British Columbia.

Other officials in attendance were:—

Mr. R. F. Thompson, Director of Training, Department of Labour, Brig. J. Lyon, Assistant Director of Training (Secretary); Miss M. M. Graham, Supervisor, Women's Training, Department of Labour, and representatives of the Department of Veterans Affairs and the Unemployment Insurance Commission.

In opening the Conference, Dr. McNally sketched briefly the vocational training policy and procedure since the Council held its previous meeting in January, 1946. (LG., Feb., 1946, p. 192.)

Deputy Minister's Address

Dr. Arthur MacNamara, Deputy Minister of Labour, welcomed the members on behalf of the Minister of Labour, Honourable Humphrey Mitchell, who was unable to be present. Viewing the year's work of the Vocational Training Branch in retrospect, he said that in spite of difficulties it had handled successfully the task it had been given. He pointed out that in September, 35,800 were undergoing vocational training "which is no mean accomplishment", when it is recalled that the organization had facilities at the beginning of the year for training only about 20,000. Turning to financial aspects of the work, Dr. MacNamara said that Parliament had voted \$12,300,000 but the cost would exceed that amount. He expressed appreciation and thanks "for the very splendid co-operation we have had from the provinces, from the Director, Mr. R. F. Thompson and from the members of the Council". He anticipated that the training of veterans would probably be about completed in another year and the C.V.T. Branch "could then swing the organization into the training of civilians many of whom had been in war work." He urged that this changeover should be planned for carefully. Plans should be co-ordinated with those of the provinces and also with the employment service, "to the extent that we can tell what types of occupations for which to provide training."

Director's Report

Mr. R. F. Thompson, Director of the Vocational Training Branch, in his report stated that "the same general plan of decentralized administration that has been in operation, has been continued, with the Department of Labour working through, and in co-operation with, the provincial governments—mainly with the provincial Departments of Education and Labour."

Continuing, he pointed out that the Re-establishment Training Agreement comprised two schedules—schedule "L" for the training of veterans and schedule "M" for the training of civilians released from gainful employment. The agreement itself, effective from April 1,

1946, for a three-year period, had, at the time of the Conference, been signed by all the provinces, except Quebec, with respect to schedule "L". Schedule "M" of the agreement had only been approved by the provinces of Nova Scotia, New Brunswick, Saskatchewan, Alberta and British Columbia.

The Youth Training Agreement, effective for a three-year period from April 1, 1946, was in operation in all of the provinces. In addition to the regular youth training projects, it included provision for the continuation of supervisory or foremanship training in Quebec, Ontario, Alberta and British Columbia.

The Apprenticeship Agreement, effective for a ten-year period from April 1, 1944, was operating in all provinces except Quebec and Prince Edward Island.

The Vocational Schools Assistance Agreement, effective for a ten-year period from April 1, 1945 was operating in all the provinces.

The War Emergency Training Agreement, and the special Dominion fund for assistance to students and to the Universities in meeting the cost of accelerated courses in medicine and dentistry, had expired on March 31, 1946.

Training of Former Members of Armed Forces.—Mr. Thompson drew attention to the rapid increase in recent months, in the numbers enrolled and in the types of training provided in this category. On January 1, 1946, there were 20,166 veterans under training. On September 1 there were 36,476. In the early months of the year a critical situation had arisen owing to the rapid increase in the number of applicants for training, Mr. Thompson said. This had made it imperative to provide additional training facilities throughout the country. It was accomplished without undue delay except in one or two specialized trades, in spite of the difficulties encountered in finding buildings and equipment and in making necessary alterations. In some instances too, it devolved upon C.V.T. to provide students with accommodation for board and lodging.

Training Facilities.—By September, 1946, C.V.T. centres had a potential capacity of over 23,000 for vocational classes, over 4,000 for commercial classes and about 13,000 for pre-matriculation classes, apart from training on the job and training in privately owned schools, Mr. Thompson said. During the year, C.V.T. had made use of approximately 106 private trade schools, 200 private business colleges, 48 municipal or provincial schools and 68 special C.V.T. centres. These special C.V.T. centres provide training for roughly 100 different occupations. Attention was

drawn to the fact that C.V.T. publicly owned schools have been made available in Canada for the first time in a number of occupations, including barbering, watch repairing, jewellery repairing, photography, radio broadcasting, upholstering and hotel and restaurant trades.

Training on the Job.—By means of an extensive campaign of publicity special efforts were made last spring to promote training on the job. The object was two-fold: (1) to open up a wider range of training opportunities to veterans and (2) to relieve the strain on some of C.V.T.'s training facilities. Those efforts were "most successful and a substantial increase has been recorded in the numbers training-on-the-job", Mr. Thompson said. Concern has been felt, however, both by the Department of Veterans Affairs and by C.V.T., over the large number of training-on-the-job contracts which cover periods in excess of 12 months. These number roughly 30 per cent of the total. In order to check unwise provision for long-term contracts, except in designated trades requiring more than 12 months subsidized training, cases must be reviewed by responsible officers of D.V.A. and C.V.T. before recognition can be given.

Training Civilian Workers.—Mr. Thompson reported that training of civilian workers had been agreed to only by provinces of Nova Scotia, New Brunswick, Saskatchewan, Alberta and British Columbia. He stated that the other provinces felt that the present was not an opportune time to inaugurate such work, especially as the training of discharged members of the Armed Forces was placing considerable strain on available training facilities. It was pointed out that eligibility for civilian training was not confined to workers from war industries, or to workers in receipt of unemployment insurance benefit. However, those who apply must have been gainfully employed and released from such employment and they must be over 16 years of age. The cost of capital equipment for training was being shared on a 50-50 basis between the Dominion and the province concerned. The cost of training allowances was borne solely by the Dominion while other approved costs were paid, 60 per cent by the Dominion and 40 per cent by the province.

Apprentice Training.—Every province except Prince Edward Island has a provincial Apprenticeship Act and Mr. Thompson reported a great increase in the number of apprentices registered, notably in the construction industry, Class training, either full-time or part time was provided for practically all apprentices in designated trades and steps were being taken to provide a greater

measure of uniformity in training among the several provinces.

Youth Training.—It was indicated by the Director that schedules embodying various youth training projects had been agreed upon in all the provinces for the current fiscal year. For the most part these comprise training classes for rural young people, assistance to university students and to nurses-in-training.

C.V.T. Women's Survey

There were at the end of September, 1946, approximately 1,000 women still in the Armed Services. This figure indicated that some 44,000 of the Service women were now veterans. Of these, 6,811 have enrolled under the C.V.T. program between April 1, 1945 and September 30, 1946, divided as follows: training-on-the-job, 361; training in school, 5,682; pre-matriculation or correspondence, 768. By the end of September, 2,178 women had graduated and have been placed in employment. Another 1,580 had discontinued training for a variety of reasons, some of them personal and others because of changes in circumstances. The remainder, 3,053 women were engaged in Canadian Vocational Training at September 30, 1946. Of the total number of women discharged

up to that time, roughly 15½ per cent had received C.V.T. training. About 88 per cent of those taking the C.V.T. training had selected one of the following four courses: commercial, 46 per cent; hairdressing, 16 per cent; dressmaking, 14 per cent, and pre-matriculation, 11 per cent. Courses in practical nursing were popular also, there being 159 in training at September 30. All the provinces, with the exception of Quebec, had set up courses approved by the provincial Registered Nurses' Associations.

Progress had been made by the half dozen Home Service Training Centres, but the enrolments had been relatively small. The demand for domestic help in the interval between November, 1945 and March, 1946, was approximately 5,000. To meet this there had been about 700 applicants. It was felt that until some of the principal drawbacks to domestic employment had been removed, the demand for training in such occupations will "be stalemated".

It was reported that many interesting positions had resulted from training-on-the-job organization. Among 35 different trades for which women were being trained, were: moulding, glazing, and painting employment at the Royal Petrick factory at Woodstock; journalists; dental technicians; fur finishers; poultry farmers; floral designers; equitation, and jewellery manufacturing.

Conference of Regional Directors

The seventh conference of the Regional Directors was held in Room 262, Centre Block, Parliament Buildings, Ottawa, on October 23, 1946. All the Regional Directors were present. Among others who attended were:—

Mr. R. F. Thompson, Director of Vocational Training, Department of Labour (Chairman), Dr. G. F. McNally, Chairman of the Advisory Committee on Vocational Training; Lt.-Col. F. T. Fairey, Deputy Minister of Education, Victoria, B.C.; Mr. A. W. Crawford, Director of Training, D.V.A.; Mr. H. W. Jamieson, Superintendent of Educational Training, D.V.A.; Mr. B. G. Pentland, Assistant Superintendent of Vocational Training, D.V.A.; Mr. W. K. Tibert, Director of Vocational Education, Fredericton, N.B.; Major L. Brown, Superintendent of Rehabilitation Training, C.V.T., Quebec; Mr. E. N. Mitchell, Vocational Training Division, U.I.C.; Mr. W. J. Gough, Procurement Officer, C.V.T., Ottawa; Brig. J. E. Lyon, Assistant Director of Training, Department of Labour; Miss Marion Graham, Supervisor of Women's Training, Department of Labour (Secretary).

The Conference discussed at some length the problems of accommodation and facilities for training. It was reported that "it might soon be necessary to reduce the accommodation and scale down the classes". Some of the smaller centres would be discontinued first, unless they were schools of a special nature. Other schools would close because of staff shortages and in some instances because the leases for the buildings would terminate. As this might result in complications in the way of transferring trainees and in the matter of local opposition to closing certain schools, it was stated by the Chairman that C.V.T. and D.V.A. would co-operate and provide any needed head-office support to the decisions of the Regional and local officials in such instances.

The creation and allocation of quotas, of admissions in the several regions was discussed in some detail in their application to admissions for a few specific trades, such as jewellery repairing, watch repairing, photography, cooking and baking, barbering, and air conditioning and refrigeration. The Chairman suggested by way of illustration, quotas for certain trades applicable to the several

regions. By this means it was intended that by mutual agreement the available equipment could be used to the best advantage possible, without placing undue burdens on any one region.

Newfoundland veterans who had served in Canadian Forces were, for vocational training purposes, to be treated as if they were Canadians. As far as possible training would be given to them in the Maritimes and if that failed, Quebec and Ontario facilities would be used.

Provincial Directors of Apprenticeship Confer

The second meeting of the Provincial Directors of Apprenticeship was held in the Senate Railway Committee Room, Parliament Buildings, Ottawa, October 24-25, 1946.

With the exception of Mr. H. Crisford of Vancouver, all Provincial Directors of Apprenticeship were present, as follows:—

Messrs. H. M. Beaton, Halifax; B. W. Kelly, Fredericton; C. Rosseau, Montreal; F. J. Hawes, Toronto; J. Aiken, Winnipeg; J. S. Dornan, Regina; J. White, Edmonton.

Also present were the following Regional Directors, Canadian Vocational Training:—

Mr. L. W. Shaw, Charlottetown; Dr. F. H. Sexton, Halifax; Mr. J. W. McNutt, Fredericton; Lt.-Col. M. Archambault, Montreal; Mr. H. H. Kerr, Toronto; Col. J. Neish, Winnipeg; Mr. W. A. Ross, Regina; Mr. J. H. Ross, Calgary; Mr. H. Hill, Vancouver.

Others who attended were:—

Messrs. J. Pigott, Pigott Construction Co., Hamilton; W. K. Tibert, Department of Education, Fredericton; K. A. Pugh, Member, Apprenticeship Board, Edmonton; Major L. Brown, Superintendent, Rehabilitation Training for Quebec, Montreal; Messrs. A. W. Crawford and B. G. Pentland, Department of Veterans Affairs, Ottawa; Mr. E. N. Mitchell, Unemployment Insurance Commission, Ottawa; Mr. D. C. Hicks, Ottawa; Mr. R. F. Thompson, Director, Canadian Vocational Training, Ottawa; Brig. J. E. Lyon, Assistant Director of Training, Department of Labour, Ottawa.

The Chairman, Mr. R. F. Thompson, outlined the two-fold purpose of the meeting: (1) to exchange information pertinent to apprenticeship as it applied both to veteran and civilian apprentices; (2) to discuss the desirability of arriving at reasonable uniformity in the several provinces with regard to the length of training, basic content of training and Dominion-wide recognition of certificates issued for the various trades by the provinces.

Other matters discussed by the Conference were: (1) the problems of providing instructors for evening classes; (2) improving the liaison between the National Employment Service and D.V.A. training and counselling centres; (3) the procurement and allocation of training equipment; (4) the provision of recreation, accommodation and medical care for trainees at training centres; (5) training-on-the-job contracts; (6) staff problems of the Regional offices; (7) advantages to be obtained from periodical Regional and Inter-regional conferences.

At the request of the Chairman, each of the Directors of Apprenticeship presented brief reports with respect to apprenticeship training in their respective provinces. These reports provided background material for the subsequent discussions.

Speaking as a representative of the construction industry, Mr. J. Pigott, observed that the training of veteran apprentices differed somewhat from the training of civilian apprentices. In the first case the trainees were adults and in the second case they were adolescents. He claimed that, while more satisfactory results might be obtained from training adolescents, apprenticeship training of veterans would not be curtailed in any way. He referred to a conference of government officials, management and organized labour, at which it was agreed that there was a definite shortage of trained men in the building trades, not only in numbers, but in skills, and asserted that the target for a four-year program should be the training of some 20,000 tradesmen.

The Chairman emphasized that C.V.T., as the government agency responsible for training veterans, would not deny training to any veteran approved for training by D.V.A., who still demand such training after being informed that employment prospects were not promising. He agreed that there was need for permanent training centres and suggested that some of the buildings now used for rehabilitation training might become available to the provinces at reasonable prices when declared surplus by War Assets Corporation.

Standardization of Apprenticeship Requirements.—Considerable discussion took place as to the standardization of apprenticeship requirements for all the provinces. The following resolution was unanimously adopted:

Inasmuch as we now have Apprenticeship Departments in every province of the Dominion, it is considered desirable that uniformity, where

possible, be established in terms of length of apprenticeship, content of training syllabus and a wage scale predicated upon the prevailing rate of pay received by journeymen, so that the final certificate of qualification in any designated trade may be accepted by all apprenticeship authorities.

It is also considered advisable that trade tests be established in each province with a view to equalizing the standards of achievement throughout the Dominion for each trade.

It was agreed that a copy of the resolution and the minutes of the meeting be sent to the National Joint Conference Board of the Construction Industry, and that the Minister of Labour be requested to inform the provincial Ministers of Labour of the action taken.

Uniform Syllabi of Training.—It was ascertained that there were considerable variations in the methods followed by the different provinces in providing syllabi for apprenticeship training.

With a view to creating a measure of uniformity the following resolution was unanimously endorsed:—

. . . that the necessary steps be taken to develop syllabi of training that will meet the needs of the various provinces, and that this be accomplished by allotting one trade to each province; and further that the syllabi thus drawn up be submitted to the other provinces for criticism and comment and when these have been received, that someone be appointed to organize and co-ordinate the opinions expressed and compile final syllabi in a form that will be acceptable to all provinces of the Dominion.

It was agreed that for the present, assignments be confined mainly to the building and construction trades as follows: Nova Scotia, plumbing; New Brunswick, carpentry; Quebec, plastering; Ontario, electrical and painting and decorating; Manitoba, bricklaying and tile setting; Saskatchewan, motor vehicle repair; Alberta, sheet metal; British Columbia, steam-fitting and stone masonry.

Other phases of apprenticeship in the construction and building trades that were discussed by the Conference were: (1) the organization of class training; (2) the payment of weekly allowances for full-time training; (3) supervision accorded to apprentices on the job in the various provinces; (4) trade tests for apprentices; (5) the operation of trade committees and apprenticeship boards.

Apprenticeship in Coal Mining.—The question of apprentice training for coal miners was brought up. It was revealed that while C.V.T. had not made any provision for such training, attempts had been made in Nova Scotia and Alberta to establish short courses. Such short courses, it was agreed, could not be considered apprenticeship training, and the consensus of opinion was that it was not feasible to train apprentices for coal mining.

Apprenticeship in Barbering.—The training provided for barbers and hairdressers came in for considerable discussion. Mr. Thompson informed the meeting that C.V.T. was operating barbering schools for veterans in all the provinces except Prince Edward Island and Manitoba; but that when the rehabilitation program was completed it was planned to close the schools. If, however, the provinces wanted to continue them, some of the C.V.T. premises would probably be available for purchase. The "self styled Barber Colleges that charged from \$100 to \$150 for a six-month course of inadequate training" had vanished, but in some provinces at least, the supply of barbers was dwindling, it was claimed.

It was pointed out that the establishment of government schools for barbers would be costly, but from the standpoint of health and hygiene barbers and beauticians should be subject to provincial licence and inspection. It was agreed that examining boards, with authority to certify, license, and inspect graduates of private schools were essential.

Unemployment Insurance

Special Placement Service for Executive and Professional Workers

FOLLOWING the lead of Great Britain in providing special placement facilities for workers in the higher-earning brackets, Canada's National Employment Service started its "Executive and Professional Division" a little more than a year ago. At the outset, this development was in the nature of an experiment made with a view to determining the probable value of such a special service. It soon became evident that the plan had sufficient merit to warrant setting up fully staffed E. and P. offices in all Regional headquarters of the National Employment Service and the stationing of liaison officers in every local office.

The Executive and Professional Division deals with all applicants for employment who are in the following categories:—

(1) All men whose earnings exceed \$2,400 per annum and who are not covered by Unemployment Insurance;

(2) Women whose earnings are \$1,800 per annum or over;

(3) Discharged personnel from the Armed Forces whose incomes before or during the period they were in the service have been in excess of \$2,400, if male veterans, and \$1,800 if female;

(4) All persons with professional degrees from a recognized institute of higher learning;

(5) All other graduates of recognized institutes of higher learning who have received a salary equivalent to the rate of \$1,800 per annum;

(6) All those who have technical or professional training and have formerly earned \$1,800 or over.

The establishment of the Executive and Professional Division is designed to relieve the employer of highly paid executive and professional workers of a great deal of the unproductive interviewing and correspondence which he formerly found necessary, by providing him with the advice and assistance of specialized placement personnel for the necessary "screening" of applicants. Moreover, the inter-regional clearance system of the National Employment offices puts him in contact quickly with prospective workers in every part of the country.

The E. and P. Division has passed the experimental stage. During the past year, a total of 4,156 persons in the Executive and Professional category were placed through this new Division. Placements are continuing at a rate rapidly approaching 100 a week. Formerly dealing largely with veterans just out of the Armed Forces, the Division is now placing an increasing number of civilians.

As might be anticipated, the E. and P. Division works in close co-operation with colleges and universities, and with associations such as the Engineering Institute of Canada, the Underwriters Associations, the Service Clubs, and the Canadian Legion.

Unemployment Insurance Statistics, September, 1946

Analysis of Claims for Benefit—Standing of Fund

IN September, a total of 28,555 claims for Unemployment Insurance benefit was filed in local offices in Canada. This represents an increase of 3,440 over the 25,115 claims filed during August. The province of Ontario accounted for 3,001 of this increase. Claims filed during September, 1945, totalled 40,473. This is the first time since the inception of Unemployment Insurance that the

claims filed in the corresponding month of the preceding year have greatly exceeded the number filed in the current year. Current claims figures do not, then, indicate a return this Fall to the tremendous increase following the cessation of hostilities in 1945.

During September, 74,762 persons received one or more benefit payments totalling \$3,402,460 for 1,725,426 compensated unem-

ployed days compared with (1) 73,138 persons paid \$2,861,278 as compensation for 1,448,399 unemployed days in August and 25,952 persons paid \$882,634 for 452,433 days in September, 1945.

(1) The figures of persons paid benefit, benefit days paid and amount of benefit paid in September, 1946 are not strictly comparable with those of other months. This occurs because the Unemployment Insurance Commission Treasury office has customarily closed its books in the field at the 20th of each month in order to produce monthly totals by the end of the month. On the basis of a new ruling, effective in September, the books are now closed at the end of the calendar month. As a result, the totals for September actually cover the period August 21 to September 30. From now on, however, these data will present actual monthly totals.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission showed that as at September 30, 1946, 2,781,229 employees were issued with insurance books and had made contributions to the Unemployment Insurance Fund at one time or

another since April 1, 1946, an increase of 101,278 since August 31, 1946.

As at September 30, 1946, 173,826 employers were registered as having insurable employees, representing an increase of 2,710 since August 31, 1946.

Registrations to September 30, 1946 by regions are shown in Table 1.

Unemployment Insurance Fund

Employer-employee contributions for September amounting to \$5,994,253.84 were the highest for any September to date, and were \$1,101,820.90 higher than in the corresponding month last year and \$453,875.70 higher than the average of the previous eight months.

Benefit payments during the month amounted to \$3,398,101.44 compared with \$2,858,005.66 in the previous month. This apparent increase is due to the adoption of a new policy of closing expenditure figures at the end of the month instead of on the 20th of the month as formerly, resulting in an extra ten days benefits being reported for September.

The net increase to the Fund during September was \$4,395,061.71.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the *LABOUR GAZETTE* and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU.-B 64

(Jan. 21, 1946)

The claimant, a woman aged 43, married but separated from her husband, was employed as a riveter when she was laid off because of a shortage of work. More than three months after she applied for benefit she was notified by the Local Office of employment on bench work at a lower rate of wages. She refused to apply claiming that the wages were too low and that the hours of work were unsuitable as she had to be at home in order to prepare meals for her two school-age sons. She was disqualified but the Court of Referees allowed her appeal. The Insurance Officer appealed to the Umpire—HELD: Since the claimant had been unemployed for over three months, sufficient time had elapsed, under the proviso to sub-paragraph (iii) of Section 31 of the Unemployment Insurance Act, 1940, for the employment to be considered not unsuitable by reason that it was employment other than her usual occupation and at wages lower than she previously received. The domestic circumstances of the claimant were not such as to render the employment unsuitable.

The material facts of the case are as follows:

The claimant, a woman aged 43 years, married but separated from her husband, was last employed as a riveter by an aircraft company from September 24, 1941 until May 18, 1945, at 59 cents per hour. She was laid off because of a shortage of work and filed an application for benefit which was allowed.

On August 28, 1945, she was notified by the Local Office of the Commission of employment on bench work at 41 cents per hour. She refused to apply for the employment notified to her, mainly on the ground that she had to be at home in order to prepare meals for her two school-age sons.

The Insurance Officer disallowed the claim and disqualified the claimant for the receipt of benefit for six weeks under the provisions of Section 43(b) (i) of the Act for having refused, without good cause to apply for suitable employment.

From this decision the claimant appealed to the Court of Referees, which unanimously allowed her appeal.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and the claimant disqualified for a period of six weeks from the date on which his decision was communicated to her, and gave as his reasons:

The claimant in this case contended that the wages offered were too low and she stated that owing to her domestic circumstances the employment offered was not suitable. The question before me is to determine whether the employment offered to the claimant was suitable in the circumstances and whether she has refused, without good cause, to apply for the employment offered.

Various factors must be taken into consideration in order to determine suitability of employment, such as the nature of the claimant's usual occupation, the rate of wages previously obtained, the rate of wages offered, the degree of skill and experience acquired and required.

The proviso to sub-paragraph (iii) of Section 31 of the Act is particularly relevant in this case. The effect of this proviso is that, after the lapse of such an interval of time from the date on which a claimant becomes unemployed as is reasonable in each case, employment shall not be deemed to be unsuitable by reason only that it is employment of a kind other than employment in the usual occupation of the claimant, if it is at the prevailing wages of the district.

In this case, since the claimant had been unemployed for over three months when the offer of employment was made, I find that sufficient time had elapsed and the employ-

ment offered was, in view of the circumstances, not unsuitable by reason that it was employment other than her usual occupation and at wages lower than she previously received.

I agree with the Insurance Officer that boys of 12 and 15 could have carried their lunch to school. The circumstances of the claimant are therefore not such as to render the employment offered unsuitable.

I therefore find that the employment offered was suitable and that she did not have good cause for refusing to apply for the employment offered.

CU.-B 65

(Jan. 21, 1946)

The claimant, a single man aged 28, was employed as a welder when he was laid off on August 16, 1945. On August 22 he registered for employment at the Local Office but it was not until October 10 that he filed his claim for benefit, and only seven days later that he applied to have his claim antedated back to August 22, stating that he thought he filed an application for benefit when he completed forms in regard to registration for employment on August 22. The Insurance Officer ruled that he had not shown good cause for his delay, and the claimant appealed to the Court of Referees. Although he was advised of his right to appear in person, he did not avail himself of that opportunity. His application was disallowed but leave to appeal to the Umpire was granted—HELD: This request for antedating should not be approved. The claimant was offered the opportunity of appearing before the Court of Referees but did not choose to do so, and as the Court, on the evidence before it, unanimously disallowed his request, there is no reason to disturb its unanimous decision.

The material facts of the case are as follows:

The claimant, a single man, aged 28 years, was employed as a welder in an aircraft plant

from March 1, 1945 to August 16, 1945, when he was laid off.

On August 22 he registered for employment at the Local Office of the Commission and it was not until October 10 that he filed his claim for benefit. Seven days later he filed an application to antedate his claim back to August 22.

In support of his application, he stated that he understood that he filed a claim for benefit when he completed forms in regard to registration for employment on August 22.

The Insurance Officer refused the request for antedating on the grounds that the claimant had not shown good cause for delay in applying for benefit.

From this decision the claimant appealed to the Court of Referees and, although he was advised of his right to appear in person, he did not avail himself of that opportunity. The Court of Referees unanimously disallowed his application for antedating, on the strength of the evidence given by the Employment Officer, who produced a Registration for Employment form on which a notation appeared initialled by himself, to the effect that the claimant was notified of the nature of his benefit rights. The Court of Referees was of the opinion that the evidence of the Employment Officer, corroborated in writing, outweighed the claimant's unsupported statement.

The Chairman granted the claimant leave to appeal to the Umpire.

DECISION

The Umpire's decision was that the request for antedating should be not approved and gave as his reasons:

The claimant was offered the opportunity of appearing before the Court of Referees but did not choose to do so. The Court of Referees, on the evidence before it, disallowed his appeal. I find no reason to disturb the unanimous decision of the Court of Referees.

Employment Facilities for Seamen

A MENDMENTS to the Unemployment Insurance Act, 1940, which were given Royal assent on August 31, 1946, came into force on October 1, in accordance with a Proclamation of the Deputy Governor General, dated September 26. Reference was made in the October issue of the *LABOUR GAZETTE* (p. 1468) to changes made in the unemployment insurance Coverage Regulations, especially those dealing with persons employed in transportation by water. These changes, coupled with the termination of Merchant Seamen's

manning pools on July 31, 1946, made it necessary to provide facilities through the National Employment Service for employment of deep sea, coastwise and lake seamen. Because of the peculiarities of the shipping industry it was found necessary to establish special seamen's sections in the National Employment Offices in certain designated ports, rather than to handle these seafarers in the sections of the offices dealing with tradesmen. These special sections have now been established and are operating in the ports of Halifax,

Saint John, Montreal, Toronto and Vancouver. In smaller ports this employment function is handled by a suitable employment officer usually possessing marine experience.

Close contact is maintained between the employment offices dealing with seamen and the trades unions who have bargaining agreements with the ships' operators. The unions most concerned are the Canadian Seamen's Union, with a charter from the Trades and Labour Congress of Canada, and the Seafarers' International Union affiliated with the A.F. of L.

The procedure established for the referral of seamen who are members of either of these unions provides for the registration of all seamen with the appropriate section of the National Employment Service. Referral of seamen against orders obtained from the shipping companies with which either of the unions has a collective bargaining agreement, are checked with that union so as to conform to the union practices as well as the practices of the Employment Service.

The referral of seamen who are not members of a union to a ship where no agreement is in effect is conducted in accordance with established employment procedures.

The Dominion-wide clearance machinery of the National Employment Service is available to any seamen's section. This machinery

allows any number of the more than 200 National Employment Offices across the country to be contacted in order to secure suitable applicants when qualified seamen are not available locally.

When the shipping industry is inactive due to seasonal fluctuations or other reasons, any unemployed seaman has access to the other departments of the National Employment Offices, so as to obtain temporary alternative employment in a job for which he is suitably qualified, and for which he indicates a preference.

These special seamen's sections are under the direct supervision of experienced mariners who have served in either or both the Navy or Merchant Service for lengthy periods, and generally hold a Department of Transport Certificate of Competency.

By arrangement with the Department of Transport the services of three senior officers with many years of experience in marine employment have been secured on a loan basis to assist in the establishment of the seamen's sections and to give advice on the many difficult situations which arise from day to day in the operation of these sections.

In the short time that these special seamen's sections have been established a total of 2,704 seamen have been referred to marine employment.

Disability and Unemployment Benefits in California

IT is reported in the August issue of *Monthly Labour Review*, published by the Bureau of Labor Statistics at Washington, that California has amended its unemployment insurance law to provide cash benefits for work-time lost by workers as a result of sickness or injury. The new disability insurance feature became effective in May, 1946, and will be financed primarily from the one per cent payroll tax (up to \$3,000), assessed on employees in the State, as contributions to the unemployment compensation fund. Benefits will range from ten dollars to twenty dollars a week for a period of from nine to twenty-three weeks with duration depending on previous earnings.

The amendment was, in a measure, the culmination of several years' agitation to set up legislation for compulsory health insurance or disability-unemployment insurance and was based on a report made by the State Senate Interim Committee on Unemployment Insurance in 1945. The report recommended the adoption of a system of temporary disability benefits to be operated in connection with un-

employment insurance. It also outlined basic provisions for safeguarding the proposed system and suggested other amendments designed to strengthen the unemployment insurance system in the State. The Committee also made a study of the solvency of the unemployment-compensation fund, taking into account the considerable size of the fund, the decline in employment since the war-time peak of 1943 and the probable severity of postwar unemployment. For purposes of guidance, the Committee made a study of the Rhode Island Cash Sickness compensation plan and was convinced that, with modifications, it could be made to apply to conditions in California.

Provisions of Amendments

Under the legislation finally adopted "provision is made for payments to 'eligibly' employed workers to compensate them for the wage losses incurred by being unavailable for, or unable to work, because of illness or injury. Thus, an injured individual, who cannot qualify

under workmen's compensation, may receive disability benefits if he is in a covered employment and is otherwise eligible. The disability may be mental or physical. The work referred to must be the person's regular or customary pursuit . . ."

Safeguards are provided against a worker receiving full-time benefits from more than one source. However, in the same benefit year, he may draw both disability and unemployment benefits (for different periods) "up to 1½ times the total yearly amount of single-type benefits allowed."

In order to qualify, it is stated that "an eligible claimant must (1) have earned \$300 in wages in covered employment during his base year; (2) observe a waiting period of seven consecutive days for each continuous period of disability; (3) file a claim in the prescribed manner; and (4) with the first claim for each continuous period of disability, file a

physician's certificate as to the disability and its estimated duration."

Voluntary Plans Permitted

A special feature of the amended act permits employers to operate their own private systems of disability benefits within the State program. It is pointed out that "California's long experience with pre-payment medical-care plans, on a voluntary basis, and their large-scale extension, during wartime, in the industries of the State—especially in ship-building—may have been an influencing factor . . ." in permitting the inclusion of private systems of disability benefits. However, a company plan must offer more liberal provisions than those of the State plan and must remain in effect for at least two years. Where voluntary plans are set up, the employees' payroll taxes cease to go to the State fund and are paid into the individual fund.

Special "Week" for Handicapped in United States

Observing "special days" and "special weeks", as a means of stressing the importance of particular issues or movements has become almost a trite custom in Canada and the United States. This year the week of October 6 to 12 was recognized in both countries as National Fire Prevention Week. In addition, it was established by Congress and proclaimed by the President of the United States as "National 'Employ the Physically Handicapped' Week".

That there is need for a campaign for the employment of handicapped persons in the United States is indicated in comments in the *New York Times* of October 6. It is stated that "an overwhelming majority of the men disabled in military service seeking jobs through the United States Employment Service cannot find jobs." It continues: "As late as last June only one out of every 21 applying for positions was placed, whereas about one in five of the able-bodied was successful. More than a quarter of a million of the war disabled are looking for places."

At the same time, it is asserted that "individually, and as a group, the handicapped workers, both former service men and civilians, have demonstrated their ability to work." Quoting the Bureau of Labor Statistics at Washington it is stated that "impaired workers actually produce 3.6 per cent more than their unimpaired fellow-workers on the same job. Blind men can see with their fingers, men with other disabilities have demonstrated their usefulness under exacting factory conditions. In other trades and professions they have similar possibilities."

Summing up the disabled person's position, *The Times* points out that what he wants is not charity or coddling, but he "is entitled to the privilege given without question to the able-bodied, to demonstrate what he can do. With training he can overcome his disadvantage. With opportunity he can assume his honourable place in society. In battle the veteran took his fighting chance. In peace he deserves a fighting chance to . . . This is the moral of this important 'week'."

Employment, Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment, hours and earnings in Canada.

Labour Force Survey.—Total employment in Canada reached an estimated 4,860,000 on August 31, a gain of 158,000 since June 1, according to the fourth quarterly labour force survey of the Dominion Bureau of Statistics, based on a sampling of about 25,000 persons. The number of persons unemployed declined from 126,000 to 117,000 during the same period.

Employment and Payrolls, September 1, 1946.—A substantial increase in industrial employment at the beginning of September was also indicated in the Bureau of Statistics' monthly review, based on returns from firms employing 15 or more persons. The latest index of employment was 175.4 as compared with 172.8 at August 1 and also at September 1, 1945.

The staffs of the 16,087 reporting firms totalled 1,793,875, as compared with 1,768,001 at the beginning of August.

Average weekly earnings were \$32.73 at September 1, as compared with \$32.64 at the beginning of August and \$32.06 at September 1, 1945. Aggregate payrolls of the reporting firms were \$58,713,734.

Employment Conditions as Reported by Employment Offices, October, 1946.—Absorption of job seekers into the employment stream gained momentum during October as strikes were settled in rapid succession. For the first time in over a year the number of vacancies on file at employment offices exceeded the number of applicants for employment. The number of unplaced applicants dropped by 7,401 during the five weeks ended October 24, to total 134,574 at the end of the period.

The number of vacancies on file at employment offices showed little change over the period. The seasonal slackening in labour requirements in the food processing, transportation, and service industries was offset by the greatly augmented demand for loggers which has now reached the highest level yet recorded. Labour demand, exclusive of agri-

culture, totalled 136,106 (94,550 male and 41,556 female) at October 24.

Claims for Unemployment Insurance Benefit, September, 1946.—Claims for unemployment insurance benefit in September totalled 28,555, an increase of 3,440 over the preceding month. For the first time since the inception of unemployment insurance in Canada, however, the number of claims were considerably less than in the corresponding month of the previous year. In September, 1945, the number of claims filed was 40,473.

During the month a total of 74,762 persons received benefit, and at the end of the month the number of live claims was 57,682.

Hours and Earnings, September 1, 1946.—Average hours worked by hourly-rated wage-earners employed in manufacturing industries were 42.7 a week at September 1, according to the Dominion Bureau of Statistics. At August 1, average hours were 43.0, while at September 1, 1945, they were 44.1.

Average hourly earnings were 70.6 cents at September 1, 1946, 70.0 cents at August 1, 1946, and 69.2 cents at September 1, 1945.

Placements Effected by Employment Offices, September, 1946.—During the four weeks August 30 to September 26 there was a gain of 7.7 per cent in the daily average of placements effected by employment offices when compared with the preceding four-week period, but a loss of 42.4 per cent in comparison with the corresponding period in 1945.

During the period under review the average number of vacancies reported daily by employers was 7,750; the average number of applications for employment was 6,502; and the average number of placements was 3,149.

Unemployment in Trade Unions, September 30, 1946.—The percentage of trade union unemployment showed a decline for the third consecutive quarter. Returns from 2,378 local unions in Canada with a combined membership of 425,899, indicated 4,169 unemployed or a percentage of 1.0 at September 30. At the end of June the percentage of unemployment had been 1.3.

(x) Not available.
 (1) Estimates based on sample Labour Force Survey of the Dominion Bureau of Statistics. All figures represent persons 14 years of age and over.
 (2) Statistics are based on the nine leading industries except average hourly earnings and man-hours which apply to manufacturing only. Data are compiled from monthly reports from firms with 15 or more employees.
 (3) Weekly average for month in non-agricultural industries reporting to National Employment Service.
 (4) During the month.

Canadian Labour Force

EMPLOYMENT in Canada climbed 158,000 over the June 1 figure to reach the 4,860,000 mark at August 31, according to the estimate of the fourth quarterly labour force survey of the Dominion Bureau of Statistics. The survey results reflect the upward seasonal trend. Agricultural employment showed a rise of 43,000 between June 1 and August 31, and non-agricultural employment a gain of 115,000 in the same period. The volume of female employment in agriculture expanded 16,000 against a rise of 27,000 for males. The most substantial rise in agricultural employment was in the paid worker category. The employment gain in non-agricultural industry centred on men, who accounted for 96,000 of the increase, while female employment made up the remaining 19,000 rise, above the June 1 estimate.

Manufacturing employment dipped 27,000, and employment in mining tapered off 1,000, against gains in all other industries. The substantial gain in agricultural employment mirrors the upward swing of seasonal harvest activity, and the expansion in the service industry reflects the increased tourist trade during the summer months. Construction employment climbed 26,000 in the three month period, also reflecting a seasonal upswing.

The classification of employed persons in this survey included those who worked one hour or more in the survey week for pay or profit or who did unpaid work which contributed to the running of a farm or business operated by a relative, as well as those who had jobs but did not work at them during the survey week because of illness, bad weather, vacation, labour disputes or temporary lay-offs with definite instructions to return within 30 days of the time of being laid-off. Female unpaid family workers on farms are not included in the employed group unless they worked 20 hours or more in the survey week on the farm, as distinct from the home.

Regionally, an overall employment gain took place between June 1 and August 31. The Ontario region showed the sharpest climb—a 55,000 gain over the June 1 esti-

mate; employment in the Maritimes showed the smallest rise—9,000 above the figure estimated in the third survey.

The survey points to the withdrawal of married women from the labour market—a decrease of 2,000 took place in this group compared with a 34,000 gain of employed single women in the labour force. The age composition of the labour force shows that the most substantial employment gain took place in the 14-24, 25-44 age groups, although all other age categories reflected the upward trend.

Total unemployment in Canada dropped 9,000 from the June 1 survey estimate, to reach the 117,000 low at August 31. According to the survey, therefore, the unemployed form 2·3 per cent of the total labour force.

The number of unplaced applicants registered at National Employment Service Offices is a higher estimate of unemployment (145,000 at August 29). However, a substantial proportion of the casual workers and workers on temporary lay-off, defined as employed by the labour force surveys, were registered as unplaced applicants at National Employment Service Offices.

Unemployment in British Columbia, as shown by the survey, is almost negligible, while the sharpest employment drop took place in the Prairie region. The Maritimes have the largest percentage of the labour force unemployed. The following table shows the comparative results of the four labour force surveys to date. The total labour force, including employed and unemployed, showed a gain of 158,000 over June 1. The rise reflects the entrance of students into the labour market seeking temporary summer employment, as well as the inflow of discharges from the armed forces.

The labour force surveys of the Dominion Bureau of Statistics are based on a sample of 25,000 households, in nearly 100 different areas across the country. The labour force classification is based on activity or status during the survey periods. The purpose of these quarterly surveys is to provide breakdowns of the labour market status of the civilian non-institutional population, 14 years of age and over.

Employment and Payrolls at the Beginning of September, 1946

THERE was a substantial increase in industrial employment generally in the Dominion at the beginning of September; although industrial disputes continued to be an exceedingly important factor in some cases, the settlement of strikes in certain establishments contributed to the upward movement, which was also seasonal in character. Expansion took place at the date under review in all provinces, and very generally in manufacturing, as well as in most of the non-manufacturing industries. Within the manufacturing group, there were also widely-distributed gains.

The staffs of the 16,087 establishments in the eight leading industries participating in the monthly survey of the Dominion Bureau of Statistics aggregated 1,793,875, as compared with 1,768,001 at the beginning of August. The increase of 25,874 workers, or 1.5 per cent was larger than at September 1 in any other year since 1940, and also considerably exceeded the average increase at that date in the period since 1920.

Based on the 1926 average as 100, the latest index of employment was 175.4, as compared with 172.8 at August 1, and also at September 1, 1945. This is the first occasion in a lengthy period in which the monthly index number has been higher than at the same date a year earlier. The most recent index, however, was

lower than at September 1 in 1942, 1943 or 1944, although with these exceptions, it was the highest for September in the record of 26 years.

Since the increase as compared with August 1 was above normal, the seasonally-adjusted index also showed an advance, rising from 168.1 at August 1, to 168.6 at the beginning of September.

As already stated, there was improvement of a general character in manufacturing, notwithstanding the existence of many important strikes. The largest gains took place in the vegetable food, textile, lumber and electrical apparatus groups, but many other industries shared in the upward movement. The advance at the date under review is in striking contrast to the extremely pronounced curtailment which had been indicated in manufacturing a year earlier, following the cessation of hostilities in the European and Japanese wars.

Among the non-manufacturing industries, there were moderate declines in mining, and also in the service industries taken as a whole. On the other hand, the trend was upward in logging, transportation, communications, construction and trade. The most noteworthy additions to the working forces were those of nearly 5,200 persons in construction, in which the increase was contra-seasonal in character.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

It also considerably exceeded the advance which had been noted in that industry at September 1, 1945.

Payrolls

The general improvement in industrial employment at the beginning of September was accompanied by a relatively larger gain in the amount of the weekly payrolls. These aggregated \$58,713,734, as compared with \$57,707,650 at the first of August. There was thus an increase of 1.7 per cent in this comparison, while that in employment amounted to 1.5 per cent. The average earnings per employee stood at \$32.73 at September 1, as

compared with \$32.64 at the beginning of August, and of \$32.06 at September 1, 1945. The latest figure is the highest in the record of 64 months, with the exception of that of \$32.81 reported at March 1, 1945. The increase as compared with September of earlier years, and also in comparison with immediately preceding months, is particularly interesting in view of the changes in the industrial distribution of workers which took place as a result of the conclusion of the War, and those of a seasonal nature more recently indicated. One of the factors contributing to the higher figure at the date under review, is the decline in the number and the proportion of women

¹This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

workers which has taken place over a period of some months, but a more important reason is of course the payment of higher wage-rates in numerous industries and establishments. As compared with September 1, 1945, there was an increase of 1.5 per cent in the total number of persons in recorded employment in the eight leading industries of 3.2 per cent in the index of aggregate payrolls, and of 2.1 per cent in the per capita weekly earnings.

If the statistics for the finance group are included with those just given for the eight leading industries, the survey shows that the number in recorded employment at September 1 was 1,870,576, as compared with 1,843,068 at August 1. The latest aggregate of weekly payrolls was \$61,394,735, considerably exceeding the total of \$60,308,545 disbursed at August 1. The average earnings in the nine leading industries were \$32.82, as compared with \$32.72 at August 1, 1946, and \$32.11 at September 1, 1945.

Table 11 summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic

areas, and the 20 leading industrial cities, and gives comparisons as at August 1, 1946, and September 1, 1945. Table 1 contains a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1942. The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100.

Table 1 indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 14.9 per cent, while the aggregate weekly payrolls of these workers are higher by 45.6 per cent. Including finance, the gain in employment from June 1, 1941, to September 1, 1946, amounted to 15.3 per cent, and that in payrolls, to 45.9 per cent. The explanation given in preceding reports for the relatively greater rise in the salaries and wages than in the num-

¹ The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

bers employed may again be stated:—(1) the concentration of workers still existing in the more highly paid heavy manufacturing industries, in spite of the declines which preceded and followed the cessation of hostilities, and also in spite of continued industrial disputes, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944, (3) the progressive up-grading of employees as they gained experience in their work, (4) the granting of higher wage-rates in numerous cases, and (5) reductions in the numbers and proportions of women workers.

In spite of the recession in employment in munitions plants following the cessation of hostilities, and the serious losses resulting from the many important strikes recently in effect, employment in manufacturing as a whole showed an increase of 11·4 per cent at September 1 as compared with June 1, 1941, since when the reported payrolls have risen by 40·1 per cent. In the non-manufacturing industries taken as a unit, the advance in employment since the commencement of the record of payrolls amounted at September 1 to 19·3 per cent, and that in the aggregate weekly salaries and wages, to 52·9 per cent. The relatively greater gains in the non-manufacturing classes generally reflect a situation differing markedly from that existing during the war.

It may also be noted that in the last 12 months, there has been a reduction of 5·8 per cent in employment, and of 5·4 per cent in the payrolls disbursed by the co-operating manufacturers, while the reported staffs of employers in the various non-manufacturing industries taken as a unit have risen by 12·2 per cent, and there has been an increase of 16·5 per cent in their salaries and wages.

In regard to the considerable variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with differences in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of outstanding importance.

Sex Distribution of Persons in Recorded Employment

Increased employment was indicated for workers of both sexes at September 1 as compared with a month earlier, according to the information furnished by firms in the eight leading industries; of the total indicated staff of 1,793,875 persons, 1,398,508 were men and 395,367 were women. The advance as compared with August 1 among workers of the former sex amounted to 1·3 per cent, and that among women, to 2·2 per cent; the increase among the latter was to a considerable extent seasonal in character, taking place largely in the food-processing industries. In each 1,000 persons in recorded employment at September 1, 780 were men and 220 were women. At August 1, the distribution was 781 men and 219 women per 1,000 employees.

In the nine leading industries, there was as compared with August 1 an increase of 27,508 workers, of whom 19,662 were men, and 7,846 were women. The gain among the former amounted to 1·4 per cent, and that among the latter, to 1·9 per cent. The proportions in this group of industries were 770 men and 230 women per 1,000; these ratios, which were the same as those at August 1, were smaller than those indicated in any of the earlier enquiries into sex distribution which have been made since 1942. The ratios of women per 1,000 persons in recorded employment had reached its highest point at October 1, 1944, when the proportion in the eight industries was 261, and in the nine major industrial divisions, 271 per 1,000. The completion or the curtailment of war work is obviously a factor of very great importance in the declines recently indicated in the numbers and the ratio of women workers, but the seasonal element and the existence of widespread industrial disputes at the date under review also substantially affected the situation. The last two factors lower the value of comparisons of the latest data with those obtained in the earlier surveys into sex distribution, made as at October 1 in 1942-45, and at April 1 in 1944, 1945 and 1946.

Increases in the number of men were reported in manufacturing, logging, communications, transportation, construction, services and trade, those in manufacturing and construction being most noteworthy. Among women, the gains took place largely in manufacturing, and as already stated, mainly in food-processing factories. Communications, transportation and trade also provided work for greater numbers of female employees than had been the case at August 1.

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries with the exception of electric light and power. ² The August data are subject to revision.

Report on Employment Conditions, October, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

SETTLEMENT of major strike issues during October greatly eased the employment situation, as reported by National Employment Service offices. The vast majority of strikers have returned to work while persons temporarily laid-off are being recalled as the free flow of vital raw materials is resumed. Employment prospects in manufacturing firms will continue at a high level due to the present overwhelming demand for consumer and producer goods. Another levelling factor is that an "all-time" high has been reached in labour needs of the logging camps. These two factors will offset the normal slackening in seasonal activity. Pockets of unemployment are commencing to appear in the Prairie and Pacific regions which are particularly sensitive to seasonal fluctuations in industrial activity. The shortages of women in the labour market continue although this situation eased slightly during October.

Unfilled vacancies¹ in occupations other than agriculture totalled 136,106 at October 24, an approximately equal number to those reported five weeks earlier. Unplaced applicants,² on the other hand, dropped by 7,401 during the period and at the October date numbered 134,574. The labour demand and supply situation shows relatively little change from that reported one year previous. At October 19, 1945, unfilled vacancies numbered 136,806 while unplaced applicants at that date totalled 140,147.

Table I shows labour demand and supply by main occupational group and by sex as at October 24, 1946. Table II presents a monthly comparison of total labour demand and supply. Table III shows unfilled vacancies classified by main industry group and by sex, as at October 24, 1946, with absolute and percentage changes in total demand during the last month.

¹Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

²Unplaced applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

Clerical Workers—The contraction of vacancies in clerical occupations continued during October. Placements in this field, however, showed substantial gains during the past few months as employers replaced the temporarily employed students who withdrew at the commencement of the school term. A surplus of married women has persisted in this line of work since the end of the war. The income tax regulations scheduled to come into force in 1947 will tend to force many of these job-seekers out of the labour market. In addition, many of the married women who are now employed are expected to withdraw from the labour force. This action will greatly intensify the already serious shortage of qualified help. The prevailing surplus supply situation in British Columbia has been further aggravated by the arrival of many job-seekers from the Prairie provinces. Acute shortages of clerical help continue to exist in Montreal and Toronto. At October 24, there were 6,579 clerical workers required while the available supply numbered 19,049 (8,211 male and 10,838 female). The number of female stenographers and typists required totalled 2,295 with applicants registered in this group slightly in excess of demand.

Sales Workers—Placing of orders for Christmas help will commence shortly. Similar arrangements to those successfully implemented during 1945 will be undertaken, including the recruiting of school students for temporary help. Although temporary labour needs are usually easily met, the shortage of experienced help continues to thwart seriously expansion of retail trade establishments. It is extremely doubtful that employment offices could cope with any mass withdrawal of married women at the beginning of 1947. Employers may be forced to accept inexperienced help and conduct specialized courses to train their employees. At October 24, vacancies totalled 4,089 while unplaced applicants at that date numbered 9,400. Surpluses of sales clerks are especially pronounced in the Maritime, Quebec, and Prairie regions.

Service Workers—A slight improvement in the overall labour situation for service workers was evident in October. Many of the long under-staffed hotels and restaurants have been relieved by the influx of workers released at the termination of the summer tourist traffic. With alternative positions in clerical work declining, applicants are accepting this type of service work more readily. Demand for domestic servants, however, remains unsatisfied, although the available labour supply increased somewhat during October. Recruit-

ing campaigns for securing "Home-Aides" from among high school students have been launched in some of the larger centres. It is hoped that this appeal will be successful in obtaining labour to meet the most urgent demand for household help. A surplus of hairdressers has recently developed with a group of ex-service women having graduated from Vocational Training schools unable to secure positions. A surplus of male service workers persists, many of whom are elderly or physically handicapped. At October 24, the demand and supply of male service workers were 2,306 and 7,082 respectively. The situation for female workers, however, presented a demand for slightly more than 10,000 persons while available supply was fewer than half the number required. More than one-third of the female labour needs were in the domestic field.

Skilled and Semi-skilled Workers

The severe set-back suffered by industry due to the prolonged strike action continues to hamper industrial activity. However, the recent settlement of major strike issues has already resulted in thousands of strikers returning to their jobs. In addition, many of those temporarily laid off due to stoppages in material supply lines have been recalled to work. Reporting of vacancies for skilled industrial help receded during October but this was more than offset by an influx of orders for loggers. Similarly, vacancies dropped in the construction industry while jobs available in the mining camps showed an upward movement. The overall demand for skilled and semi-skilled workers was nearly double the available supply. At October 24, demand totalled 71,795 while the number available at

October 24, 1946.....	94,550	41,556	136,106	102,596	31,978	134,574

that date was 39,410. Loggers comprised 63 per cent of demand but only 3 per cent of these applicants were seeking this type of work.

Textile Workers—Expansion in the textile industry continues to be hampered by the lack of labour, both skilled and unskilled. To relieve the shortage of skilled help, the Ontario Board of Education, in close collaboration with the Federation of Textile Technical Associations has opened a textile school offering short-term courses, night classes and eventually

a course giving a recognized academic degree. Some local employment offices have eased the tight labour situation by arranging for married women to have textile machines installed in their homes. Other local offices report that applicants are reluctant to accept textile work despite the improved wages rates, hours of pay, and working conditions conceded in recent labour-management negotiations. There were 8,279 textile workers required at October 24 while unplaced applicants numbered 2,858. Demand for women out-

numbered supply by 3 to 1. The most pressing need was reported for female sewing machine operators which totalled 4,818 at that date.

Loggers—Demand for loggers has currently reached the highest point yet recorded. Labour requirements totalling more than 45,000 now are on file at employment offices. Expansion of employment has been gaining momentum, with workers recruited from food processing plants and farms where seasonal activity has slackened. The current labour unrest in the Ontario lumber camps however, has forced many workers to return to their homes and an early return of these workers to the camps appears doubtful. The number of skilled woods labour secured will largely determine the extent to which unskilled help may be effectively utilized. Vacancies at October 24, numbering 45,508 increased by more than 30 per cent during the five-week period. Available supply, although increasing during the month, totalled only 1,120 at that date.

Miners—With the settlement of labour disputes in many of the mining camps, employers are renewing their attempts to expand employment. Transfer of skilled miners from the depressed Cape Breton areas to the labour-starved hard-rock mines in Quebec and Ontario is to commence shortly. Similarly labour needs of the coal mines in British Columbia have been met by the movement of labour from Manitoba. The apprenticeship school set up in Nova Scotia to give intensified training courses has eased the shortage of certified coal miners greatly. The number of skilled and semi-skilled miners required at October 24 totalled 2,005, an increase of 16 per cent over the number reported five weeks earlier. Demand for coal miners at the October date numbered 1,203. The supply of available miners was small, meeting only one-quarter of the number required.

Construction Workers—The continuing shortages of cement, nails, electrical supplies, and soil pipe resulted in a marked contraction in available employment opportunities for construction tradesmen. However, with the rapid succession of settlements of labour disputes, the flow of vital raw materials should be improved shortly. Some areas report that inclement weather conditions have already hindered activity considerably. Vigorous attempts now are being made throughout the country to close in buildings in order that finishing work may be continued during

the winter months. At October 24, demand for skilled and semi-skilled construction workers numbered 5,323 while available supply totalled 4,145 at that date. Persistent shortages continue particularly among skilled carpenters, bricklayers, and plasterers.

Miscellaneous Workers—The absorption of war workers into peace-time industry has been progressing satisfactorily during the past six months. Since the end of April, the number of workers registering for metal-working jobs has been reduced by 52 per cent. At October 24, there were 8,664 seeking this type of work. Expansion of employment opportunities in this occupation has been limited with many of the vacancies on file requiring persons who have a thorough knowledge of the trade. Improvement in the labour situation for laundries has been evident during October although the high labour turnover in this industry has kept demand relatively high. At October 24, there were 522 female spotters and finishers required with only a limited supply presently available at employment offices. Demand for qualified auto mechanics continues active but few applicants now available can meet the strict requirements specified by employers.

Unskilled Workers

Absorption of unskilled labour progressed rapidly during October due to settlements reached in major strike actions. However, a decline in seasonal activity was reflected in a noticeable drop in jobs available for untrained help. Employment of manual labour in the construction industry will recede shortly as winter weather commences. Activity in food processing plants now has passed its peak and workers are gradually being released into the labour market. The meat packing industry, however, continues to offer numerous employment opportunities. A marked decline in vacancies available in the transportation industry followed the substantial gain in placements effected during September. In industries such as logging, mining, and textile, expansion of employment for unskilled labour depends largely on the availability of skilled workmen. A persistent demand for unskilled women continues and at the October date, vacancies outnumbered applicants by almost 3 to 1. Total vacancies for unskilled labour were 39,245 at October 24 while unplaced applicants numbered 48,617.

Regional Analysis

The Regional Analysis which follows is based on semi-monthly reports received from National Employment Service Offices across Canada. The report covers employment conditions during the month ended October 22, 1946.

Maritime Region

The Maritime labour market has gained little strength during the summer months in spite of seasonal expansion of employment in agriculture, fishing, transportation and general construction. The region now has a smaller percentage of the over-all unfilled vacancies and a greater percentage of the unplaced applicants than it had at the beginning of May. The completion of the summer seasonal employment now pushes the unemployment problem to the fore.

Agriculture.—Plans to meet the heavy demand for farm labour during the harvest season were carried out successfully, and adequate labour was made available to all areas when required. Excellent weather prevailed during the picking, which greatly assisted handling of the crops.

The potato harvest in New Brunswick has been completed. Seventy per cent of the potato crop in Prince Edward Island is harvested. Approximately 1,200 men have been sent there on clearance orders. A record crop is reported, but lack of shipping facilities is hampering its disposal.

Lumbering.—The logging industry expects to use 20,000 men in the 1946-47 season. However, 95 per cent of these must be experienced woodsmen. A few men are now in the woods but the greatest activity will be between November and January. All indications point to a heavy cut this year.

Fishing.—Fishing in the coastal waters of New Brunswick has practically ceased for the season. Good catches and high prices have been reported.

Training schools for fish cutters and filleters will alleviate the shortage of help in the cutting trades.

Coal Mining.—Daily output has risen slightly in the Nova Scotia fields, where almost all mines are working steadily. The supply of first-class miners is gradually increasing, and so the improvement in output is expected to continue.

Reports show that the apprenticeship school of the Dominion Coal Company is operating most satisfactorily. From 150 to 200 men will qualify as first-class miners within the next few months.

Strip mining in the Minto area is at 100 per cent capacity, but production is dropping slightly in some mines. First-class miners are difficult to obtain, while some underground men are taking advantage of the fine weather for hunting and woods work.

Manufacturing.—The steel strike settlement will materially improve the general employment situation, particularly in Cape Breton. About 5,000 workers are being reinstated at the steel plant and in related employment. Other Maritime employers are rebuilding their staffs in anticipation of orders and supplies as a result of the settlement. Manufacturing is not likely to be a reception industry for the unemployed, however, as no great expansion is expected for the winter other than the return to normal.

Construction.—The acute shortage of building material, especially cement, and the nearness of winter, have caused many prospective builders to cancel their projects temporarily. A scarcity of bricklayers is delaying a number of high priority jobs, and available apprentices cannot be employed without a nucleus of skilled men.

Transportation.—The export of apples and other farm products has stimulated waterfront activity at Halifax and Saint John. The supply of labour is adequate.

Bus lines are operating to capacity, but rail passenger traffic has dropped off considerably. Air lines are well patronized. Fine weather has enabled railway track maintenance work and ballasting to continue, thus providing employment for numerous men.

Quebec Region

The Quebec labour picture has brightened steadily during the past few months. At the end of October, 38 per cent of the unfilled vacancies in Canada and only 25 per cent of the unplaced applicants were located in this region. The increase in orders for labour is attributable chiefly to seasonal expansion in the logging industry. Two-thirds of the male vacancies are for loggers.

Agriculture.—Harvesting is over except for late root crops. The only existing farm labour demand is for permanent winter workers. The logging industry, however, is a strong competitor for such labour. The movement of Polish veterans to agriculture will probably fill the gap.

American farmers report that they were able to save their crops with the assistance of workers transferred from this region. The youth labour movement to farms this year

was very successful; most of the picking of beans, peas, small fruits, corn, etc., was handled by student workers.

Logging.—The early harvesting of farm crops has released thousands of men for woods employment, and the number of men on the job has been mounting steadily. The present level of employment is 6,000 higher than at any comparable time since 1940. Indications are that the supply of manpower this season will be 10 per cent greater than last year, and owing to the early start operators may better their production objective.

Small sawmill activity has largely been completed, and men are leaving mill work for the bush.

Mining.—A mining labour pool has been established to supply the Northwestern Quebec Mining Association of Val d'Or. The medical examination and the housing situation limit the number of suitable applicants.

Asbestos mining is quite active. One mine at Asbestos will require 300 men shortly. In the Thetford area the management of a mine, long-idle, has changed and production will soon begin again.

Manufacturing.—Material shortages are still impeding output in many plants. However, the end of lengthy strikes in the steel, electrical apparatus and soda ash industries will improve the supply situation in a few weeks. An upward trend in industrial activity is indicated in the near future. Many companies are re-calling employees now that supply lines are intact again. Glass manufacturers will re-hire 1,000 workers; the aluminium industry will add 1,000 workers to its payroll over the next ten months. In spite of the production obstacle of supply shortages the electrical goods industry needs an additional 500 workers immediately with its recent 5-day week agreement. The textile industry continues to expand although the lack of female workers is a great handicap. Plywood manufacturing throughout the province is progressing at full speed; the production of all wooden articles, clothes-pins, etc., is at a high level.

Some plants in the southeastern townships closed earlier in the month because of a reduced supply of power.

Montreal is suffering from an acute scarcity of womenpower—there are six jobs to every applicant. A surplus of 4,000 women workers exists throughout the rest of the province.

Construction.—All kinds of projects, commercial, industrial and residential, are under-way but critical shortages of building materials and skilled tradesmen block progress. Many new plants and additions to old ones, are under construction, also

churches, schools and hospitals. Several large companies are building houses for their workers in areas where lack of housing prevents employment expansion.

Activity on road construction reached its peak at the beginning of October, when weather was most favourable.

Transportation.—Montreal will be firmly established as a base for heavy air-freight transportation within the next few months, as a result of arrangements with the International Air Transportation Association. About 2,000 agencies in Canada, the United States, Newfoundland and Bermuda will be set up to arrange travel, shipping and cargo forwarding by air to almost every part of the world.

Ontario Region

The end of October saw the settlement of many strikes which have fettered manufacturing during the summer. In the steel, rubber, chemicals and automobile industries, workers have returned to their jobs. These settlements will stimulate industrial expansion, once production gets under way again.

Agriculture.—Demand for farm workers naturally is decreasing, although the turnip, grape and sugar beet crops are still being harvested and fall ploughing has begun.

The sugar beet harvest is more than half completed; the sugar content is quite high but the tonnage is lighter than last year. Prisoners of war are being used extensively, and mechanical loaders are proving a definite labour-saving device. Strike-bound workers employed temporarily in agriculture, now are returning to industry. The interest in Polish veterans continues; applications to date total over 1,000.

Lumbering.—Labour demand in the lumber and pulpwood industry amounts to more than 10,000, the highest ever recorded. This is in addition to the 10,000 men who have already been provided for the lumber camps of the region. Demand will probably increase with the withdrawal of prisoner of war labour. A regional advertising campaign will start at the beginning of November, and it is hoped that this will relieve the situation.

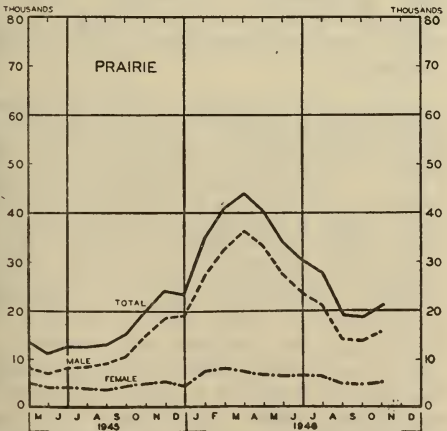

Labour unrest in the industry has affected the Ontario region only slightly, at Timmins and in the Hearst area. The bulk of logging and pulpwood camps operated normally.

Sawmill output throughout the region is progressing satisfactorily. The seasonal cut of lumber and timber in the mills should approach a new high in production.

Mining.—Demand has slackened slightly but several hundred experienced men are still required. Physically fit, heavy labourers are

REGIONAL UNPLACED APPLICANTS

AS REPORTED BY THE
NATIONAL EMPLOYMENT SERVICE

SOURCE: UIC 7518 AT MONTH'S END

RESEARCH AND STATISTICS BRANCH - DEPT. OF LABOUR - CHART M-1-C-3

needed urgently. Lack of provision for medical examination at the local level, as well as the shortage of transportation facilities, handicap placement operation.

Mine beginners and process labourers are most urgently needed at Sudbury, where the nickel industry would expand its output if sufficient labour were available. Approximately 500 men could be absorbed in that area alone.

Manufacturing.—The steel strike settlement at the beginning of October paved the way for a series of settlements through which some 24,000 workers returned to their jobs. Among these were 7,000 steelworkers, 7,500 rubber workers, 4,000 electrical apparatus workers and 3,500 automobile workers. Now that industrial strife has been settled, plans for expansion point to an all-time high in peacetime production during the winter. A lag in activity may exist for some time, however, until production again gets underway.

Foundry help heads the list of labour shortages. Forge machine operators, boiler-makers, blacksmiths, and sheet metal workers are some of the many types of tradesmen needed. Those industries producing consumer goods, which have not felt the effects of strikes as much as the producer goods industries, in general suffer a lack of unskilled, as well as skilled labour. The textile mills, food processing plants, biscuit and candy firms are among those seeking labour. In all industrial centres there is a steady demand for unskilled factory workers.

Construction.—Construction tradesmen of all types are still scarce, but employers do not seem to be pressing their labour demands as formerly, because of the short supply of many materials. Scarcities of structural steel, nails, soil pipe, and electrical fittings are the chief bottlenecks. It is doubtful whether the available supply of skilled tradesmen will improve, however, because of the tremendous program of construction both underway and in blueprint form.

Transportation.—The Great Lakes shipping season is drawing to a close, and orders for seamen are few. The railroads require husky men for unskilled labouring jobs.

Prairie Region

Labour demand has slackened in the Prairie region with the close of harvesting and other seasonal activity. The prospects of any major change in the demand for labour in any industry other than logging, are small. Unfilled vacancies in logging have been growing steadily and will rise sharply

when the labour unrest in the Thunder Bay area dies down.

Agriculture.—Farm labour requirements now are only for year-round workers; almost 900 orders have been received for Polish veterans.

Heavy rain and snow delayed harvesting in some parts of Alberta at the beginning of October, and operations are still in full swing in such areas. In Manitoba and Saskatchewan, however, farmers are now preparing for fall and winter conditions.

The sugar beet harvest is nearing completion. Prisoner of war labour is being shifted to the more backward areas. The shortage of workers in Lethbridge beet fields is serious; high-school students are being granted leave to supplement the available supply of civilian and prisoner of war labour.

Logging.—The strike in the Thunder Bay district is blocking seasonal expansion in the logging industry of the Fort William and Port Arthur areas. Some of the strike-bound workers have returned to their homes on the Prairies and in the East, and will not be available for work in this district when the strike is settled.

The Thunder Bay strike does not affect operations in the Fort Frances and Kenora districts. A strong demand continues in these areas for both experienced and inexperienced help, but the news of labour unrest discourages applicants and hinders placements.

In Saskatchewan, the Provincial Government's conservation program will curtail logging operations to some extent. In Alberta, demand for loggers is very heavy, but workers are accepting employment in the lumber industry of the Pacific region instead.

Fishing.—A heavy catch of pickerel is reported on Lake Winnipeg, and this has been accompanied by steady orders for filleters and loaders. Fall fishing on Lake Winnipegosis will commence in the middle of November.

Mining.—Gold mines in the Beardmore district have benefited from the labour unrest in the lumber industry, as some of the bush-workers on strike have accepted temporary mining employment as unskilled workers. There is still a shortage of experienced miners.

The base metal industry requires labourers, carpenters, mechanics and other skilled workers. Production will be maintained throughout the winter, but it is hoped that the demand for manpower will decrease.

The coal mining labour situation remains the same. There is a general demand for certificated miners; the lack of housing accommodation continues to be a major problem.

Manufacturing.—Food processing industries which were somewhat hampered by the farmers' delivery strike have now returned to normal production. The meat packing industry recovered rapidly. About 300 men are needed at Edmonton alone, and similar conditions exist at other packing house centres although demand is not as heavy. Canning plants will shut down shortly, releasing their seasonal staffs.

The sash-and-door industry is coping with bottlenecks of lumber and glass supplies. The textile industry in Winnipeg is making a substantial effort to obtain women workers by raising wage standards.

Construction.—Conditions in construction remain stable. Building materials are still in short supply. First-class tradesmen are scarce in many areas, particularly in Winnipeg, Edmonton and Red Deer.

Transportation.—Boat traffic at the head of the Lakes is not large in comparison with other years. However, ships will be transferred shortly from the ore and coal carrying trade to grain shipping.

In northern areas, all planes are grounded until sufficient ice forms for operations on skis. Railways require track maintenance men at various points.

Pacific Region

Indications are that the yearly peak in employment was reached early in October, as latest reports show a growing labour surplus and a reduction in job vacancies. Labour demand and supply are becoming stable, except in the logging industry, and turnover is declining. The seasonal trek of farm workers to off-season employment has begun, accompanied by a modest influx of persons from the Prairie provinces.

Agriculture.—Most crops have been harvested in the Fraser Valley area, and the chief demand now is for permanent labour. Many of the temporary harvest workers are accepting such employment.

Orders for orchard workers in the Okanagan district are dwindling. The largest apple crop yet recorded was handled this year—9,000,000 boxes, requiring 20,000 railway cars.

Applications for Polish farm workers have increased to 84. Farmers are hesitant about applying, as they are uncertain about the adaptability of the Polish workers especially when they must live in the farmer's home.

Lumbering.—The lack of suitable labour continues to present a serious problem for the logging industry. There are fewer men in the camps than there were in 1939, despite the fact that the current demand for lumber is three times what it was then. Higher wage

rates have not attracted the additional workers to the extent expected. Most operators will hire unskilled men for various occupations, but the need for key men is still the controlling factor.

The annual influx of workers from the Prairies, seeking off-season employment in British Columbia, has partially relieved the situation. Most of these have had previous experience in winter logging in B.C. camps.

Fishing.—Fall salmon fishing continues on a reduced scale as the majority of canneries have closed for the winter. The salmon season was disappointing, as catches were small.

Mining.—The gold mining industry is still beset with labour unrest. A heavy demand for all types of mine workers will result with the settlement of the dispute. The expansion planned will absorb several hundred men in addition to the pre-strike labour force. Gold placer mining in the Whitehorse and Dawson areas now is drawing to a close and many men are being laid-off.

The base metal industry at Trail requires at least 150 labourers. Specifications are for physically fit men between 18 and 40 years of age.

Coal mines report the continuing scarcity of certificated coal miners and unskilled underground labourers. Placements at Nanaimo cannot keep pace with separations from the industry.

Manufacturing.—The metal shortage continues to prevent expansion in the metal working industry. No shutdowns have occurred but many companies have reduced operations to some extent. A heavy backlog of orders is accumulating, and will maintain employment at a high level when the supply situation improves. The shipbuilding industry anticipates greater activity when steel shipments are resumed. Vancouver shipyards are fairly busy at present; shipwrights and joiners are needed at Victoria.

In the Fraser Valley, all food processing plants are closed for the season, and milk plants are slowly releasing workers.

Construction.—Construction is on the upswing in the Vancouver area, and carpenters and bricklayers are in great demand. Elsewhere, the supply situation handicaps building progress.

Transportation.—The season for navigation has closed in the north, and lay-offs are resulting. Marine diesel engineers are in short supply.

It is difficult to supply workers for railway maintenance work. Wages are low and living conditions unfavourable in comparison with other labouring jobs offered.

Man-Hours and Hourly Earnings, September 1, 1946

Manufacturing

INFORMATION received by the Dominion Bureau of Statistics from 6,176 manufacturers at September 1 showed an increase over August 1 in the total of hours worked and in the aggregate hourly wages. The advances in some cases resulted from the settlement of industrial disputes, but continued strikes in other industries and establishments directly and indirectly affected the situation to an important extent. The hourly-rated personnel rose from 702,485 in the last return, to 714,239 at the date under review, or by 1·7 per cent.

The aggregate hours were given as 30,490,055, exceeding by 0·9 per cent the total of 30,204,796 recorded for the week of August 1, while the wages advanced from \$21,139,093 at that date, to \$21,523,882 in the week of September 1, or by 1·8 per cent. The average hours fell from 43·0 in the preceding period of observation, to 42·7 in the week of September 1, but the average hourly rate increased from 70 cents in the week of August 1, to 70·6 cents in that ending September 1; the latter is the highest indicated in the record of 23 months. Previously, the maximum figure was that of 70·5 cents shown at Dec. 1, 1944, and again at May 1, 1945. The payment of higher wage rates in several industries was an important factor contributing to the increase in the average at the date under review. The

decline in the average time worked was due in part to recently-arranged reductions in the number of hours in the standard working week, but short time in certain establishments as a result of strikes also had an effect.

As compared with the week of September 1, 1945, there was a falling-off of 1·4 in the average hours worked by hourly-rated employees, in manufacturing as a whole, accompanied by an increase of 1·4 cents in the average hourly rate, which a year ago had been given at 69·2 cents. The reported earnings had then included a higher proportion of overtime work at premium rates than in the period under review, which was the second in succession in which the general average of earnings per hour in manufacturing has exceeded that indicated 12 months earlier. This result largely reflects the influence of widespread wage increases recently authorized, which now appear sufficient to offset the effect of the important changes in the industrial distribution of wage-earners associated with the curtailment in war production which hitherto have resulted in a generally lower level of hourly earnings than was the case during the war.

The weekly wages stood at \$30.15 at the date under review, as compared with \$30.10 in the week of August 1, 1946, and \$30.52 at September 1, 1945, when as already stated,

*The averages at these dates were affected by loss of working time at the year-end holidays in the case of Jan. 1, and by the Easter holidays in the case of Apr. 1, 1945 and May 1, 1946.

the average hours per week were longer than at the beginning of September, 1946, a circumstance which counteracted the increase of 1.4 cents in the average hourly rate in the 12 months.

Hours Worked.—The aggregate hours worked in the co-operating manufacturing establishments at September 1 were reported as 30,490,055, being greater by 0.9 per cent than the total in the week of August 1. In both cases, these figures were affected by labour-management disputes. The aggregate hours in the production of durable manufactured goods, at 14,779,562, were lower by 0.9 per cent than was the case a month earlier, but

there was an increase of 2.7 per cent in the hours indicated in the light manufacturing industries, in which the weekly total was given as 15,710,493.

The statistics of average hours worked and average hourly earnings in manufacturing in the period for which data are available are summarized in Table 1.

The average hours recorded in manufacturing as a whole fell from 43.0 in the preceding period of observation, to 42.7 in the week of September 1, when it was lower than the mean of 44.1 hours indicated in the same week in 1945. In the heavy manufacturing industries, the average time worked declined from 43.2

*The industries classed in the durable manufactured industries are indicated by an asterisk.

(1) Since 1941, the Dominion Bureau of Statistics has prepared current indexes of average hourly earnings of the employees of eight establishments producing heavy electrical apparatus. Based upon the hourly earnings at June 1, 1941, as 100 p.c., the latest figures are as follows: July 1, 1946, 141.2; Aug. 1, 1946, 135.9; Sept. 1, 1946, 141.6; Sept. 1, 1945, the index was 142.3. (2) Chiefly street and electric railways. (3) For information respecting the sex distribution of the persons in recorded employment, see monthly reports on employment and payrolls.

hours in the week ending August 1, to 42.7 at September 1, 1946, as compared with 44.2 at the same date last year. The weekly hours reported in the non-durable goods industries averaged 42.8 and 42.7 at August 1 and September 1, 1946, respectively, and 44.0 at September 1, 1945. The reductions more recently noted were due in part to the effect of strikes and holidays, but also reflected a lowering of the standard hours worked per week in many establishments and industries in accordance with newly-signed agreements. Curtailment of overtime was also a factor in the comparison with September 1 of last year.

Hourly Earnings.—The total weekly wages disbursed to the hourly-rated personnel in the co-operating manufacturing establishments increased by 1.8 per cent, to \$21,523,882 at September 1 as compared with \$21,139,093 in the week of Aug. 1. In the production of durable manufactured goods, the aggregate wages reported declined by an insignificant percentage, partly as a result of strikes, but the disbursements in the non-durable manufactured goods industries rose by 3.9 per cent, the gain resulted in part from the payment of higher wage-rates in certain industries, but was also due to heightened employment.

The average earnings per hour in manufacturing as a whole reached a new high of 70.6 cents at September 1, as compared with 70.0 cents at Aug. 1, and 69.2 cents at Sept. 1, 1945. The increase at the date under review in the latter comparison is not large, but its significance is emphasized by the fact that the industrial distribution of the wage-earners at September 1 of last year had favoured a higher hourly average in manufacturing as a whole than is now the case.

In the heavy manufactured goods industries, the latest average hourly earnings were 76.4 cents, as compared with 75.8 at August 1, 1946, and 76.5 cents at September 1, 1945, when overtime work at premium rates had been a factor of greater importance than in the period under review. In the non-durable manufactured goods industries, the hourly earnings averaged 65.1 cents an hour, as compared with 64.4 cents a month earlier, and 60.9 cents at the same date a year ago. The latest mean in this category is the highest in the record of 23 months.

Average Weekly Wages.—As has previously been pointed out, statistics of man-hours and hourly earnings are not available for all classes of wage-earners, but only for those workers for whom employers keep accurate time records, being, in the main, those who are paid by the hour; in general, this restriction also results in the exclusion of salaried personnel from the data of the present bulletin. Among the classes of wage-earners for whom satisfactory records of hours worked are frequently not available are piece-workers in some but not all establishments, route-drivers, delivery men, etc. It will be noted that many firms state that the earnings of their wage-earners paid at other than hourly rates exceed those of the hourly-rated personnel; this is particularly the case among piece-workers. In general, however, the wage-earners for whom statistics are given in the present report constitute a large proportion of the total employees of the co-operating firms; at September 1, the wage-earners for whom data on man-hours and hourly earnings were available formed 74.6 per cent of the total number of persons of all categories on

the payrolls of the larger manufacturers¹ furnishing monthly statistics on employment and payrolls at the same date; in the heavy manufactured goods industries, the proportion was 78 per cent, while that in the light manufactured goods division was 71.6 per cent.

The high proportions which the hourly-rated wage-earners constitute of the total employees of the co-operating establishments lend interest to the comparisons in Table II, which shows the variations in the combined weekly salaries and wages reported by the co-operating manufacturers in the last 23 months and these in the weekly earnings of hourly-rated wage-earners; the latter figures are obtained by multiplying the average hourly earnings in the week of observation by the average hours worked in the same week. The weekly salaries-and-wages figure at Sept. 1 was higher by 10 cents than that at Aug. 1; since then, the weekly earnings of hourly-rated personnel have risen by five cents. In the durable manufactured goods industries, the co-operating employers also indicated a rise of 10 cents in the salaries-and-wages figure, but in this category, there was a decline of 13 cents in the weekly earnings of the hourly-rated wage-earners. The loss was largely due to strikes which directly and indirectly affected the situation in this group of industries. In the light manufactured goods industries, the average weekly earnings of the persons on salaries and wages advanced by 14 cents as compared with August 1 while the average sum paid hourly-rated personnel rose by 24 cents. In both classes, the payment of higher wage rates in several industries and establishments was a factor in the increases.

In the last 12 months, the weekly earnings of all persons in recorded employment in manufacturing as a whole have advanced by 12 cents, while those of hourly-rated wage-earners have fallen by 37 cents. In the durable manufactured goods industries, the indicated salaries and wages have been reduced by 86 cents since Sept. 1, 1945, while the wages of hourly-rated workers have declined by \$1.19. In the non-durable manufactured goods industries, on the other hand, there has been an advance of \$1.22 in the combined salaries-and-wages figure in this

comparison, and the weekly earnings of hourly-rated wage-earners have increased by \$1.00.

Non-Manufacturing Industries

Firms in the non-manufacturing industries pay smaller proportions of their employees by the hour, so that they frequently do not keep accurate records of the hours worked. Accordingly, the representation of the non-manufacturing industries in the monthly statistics of man-hours and hourly earnings is smaller than that in manufacturing.

In mining as a whole, the aggregate hours worked in the week of Sept. 1 were higher by 0.7 per cent than in the week of Aug. 1, but the average hours per man were fractionally lower, at 42.8 in the week of Sept. 1, as compared with 42.9 at Aug. 1; the mean at Sept. 1 of last year had been 43.0 hours. The hourly earnings had then averaged 85.2 cents, being lower than the latest hourly rate of 87.6 cents. The earnings in the metallic ore and the miscellaneous non-metallic mineral groups were higher at the date under review than was the case a month and a year earlier. In coal mining, however, the average hourly rate was less by one-tenth of a cent than at Aug. 1, although it was higher by 1.5 cents than at Sept. 1 of last year. The hours reorted in building were lower than in the preceding report, being also below the average at Sept. 1 of last year, but the latest average hourly rate, at 83.6 cents, was the highest yet recorded, exceeding by four cents the mean indicated at the same date in 1945. In highway construction, the time worked at the date under review averaged rather less than at Aug. 1, but was the same as in the week of Sept. 1, 1945. The average earnings were 66.1 cents per hour at Sept. 1 and 65.8 cents at Aug. 1, 1946, as compared with 65.1 cents at Sept. 1 of last year. In the service division, the average of hours worked was a little higher than at Aug. 1, but was lower than in the week of Sept. 1, 1945; the average earnings gained very slightly in the month, while the latest hourly rate of 45.7 cents was higher by 2.5 cents than the average indicated a year ago in this group.

Provinces and Cities

Statistics of hours and average hourly earnings in manufacturing in the various provinces and in the larger cities are contained in Table III.

¹This is, of the personnel of establishments ordinarily employing 15 persons and over. See the monthly reports on employment and payrolls.

Applications for Employment; Vacancies and Placements; September, 1946

REPORTS received from the National Employment Service Offices of the Unemployment Insurance Commission for the four weeks August 30 to September 26, 1946, showed a gain of 7.7 per cent in the daily average of placements effected when compared with the preceding four-week period August 2 to August 29, and a loss of 42.4 per cent in comparison with the four weeks August 31 to September 27, 1945. All industrial divisions excepting construction and mining, showed gains in the daily average of placements effected in comparison with the previous four weeks, August 2 to August 29, the most noteworthy being in manufacturing, agriculture, public utilities operation and trade. In comparison with the four weeks August 31 to September 27 last year, except for a gain in agriculture all groups registered decreases, the most pronounced being a substantial loss in manufacturing and moderate declines in construction, forestry and logging, trade, public utilities operation and services.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and

of placements effected for each 100 applications for work registered at the National Employment Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies in relation to applications took an upward course while that of placements remained about the same. The ratio of vacancies to each 100 applications was 119.2 during the four weeks ending September 26, 1946, in contrast with 111.7 during the previous period and 89.2 during the four weeks August 31 to September 27, 1945. The ratio of placements to each 100 applications during the period under review was 48.4 as compared with 48.2 in the preceding four weeks and 53.1 at the close of September, 1945.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the four weeks August 30 to September 26, 1946 was 7,750 in comparison with 6,770 in the preceding four weeks and 9,180 during the corresponding period a year ago. The average number of applications for employment received daily during the period under review was 6,502 in

contrast with 6,062 in the previous period and 10,292 during the four weeks ending September 27, 1945. The average number of placements made daily by the offices during the period ending September 26, 1946 was 3,149 of which 2,891 were in regular employment and 258 in work of one week's duration or less in comparison with a daily average of 2,925 during the previous period. Placements during the four weeks August 31 to September 27, 1945, averaged 5,471 consisting of 5,322 in regular employment and 149 in casual work.

During the four weeks August 30 to September 26, 1946, the offices referred 112,443 persons to vacancies and effected a total of 72,431 placements. Of these, the placements in regular employment were 66,504 of which 49,924 were of males and 16,580 of females, while placements in casual work totalled 5,927. The number of vacancies reported by employers was 130,690 for males and 47,556 for females, a total of 178,246 while applications for work numbered 149,554 of which 108,174 were from males and 41,380 from females. Reports for the four-week period August 2 to August 29, 1946 showed 162,487 positions available, 145,482 applications made and 70,193 placements effected, while in the four weeks ending September 27, 1945, there were recorded 211,149 vacancies, 236,712 applications for work and 125,833 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year, from January 1936, to date:—

PLACEMENTS

Year	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (39 weeks).....	580,153	52,455	632,608

Nova Scotia and Prince Edward Island

Opportunities for employment at National Employment Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending September 26, 1946, numbered 233 daily in comparison with 260 in the preceding period and 342 during the corresponding four weeks of last year. There was a daily average of 149 placements in contrast with 117 in the previous four weeks and 193 during the period ending September 27, 1945. The decrease in placements from the four weeks August 31 to September 27 a year ago was almost entirely due to moderate losses in manufacturing, public utilities operation, ser-

vices and trade. Except for a moderate gain in agriculture, the changes in all other groups were small. Placements by industries included: services 738; manufacturing 701; construction 691; trade 494; agriculture 406 and public utilities operation 213. Regular placements totalled 2,393 of men and 877 of women.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the period under review, called for an average of 195 workers daily as compared with 154 in the previous four weeks and 322 during the period terminating September 27, 1945. Placements recorded a daily average of 89, in contrast with 78 in the preceding four weeks and 161 during the period terminating September 27 last year. A fairly large reduction in manufacturing together with moderate losses in public utilities operation, construction and trade accounted for the decrease in placements from the corresponding four weeks a year ago. The only improvement noted was a small gain in agriculture. Placements by industrial divisions numbered: services 463; agriculture 413; construction 367; manufacturing 259; trade 258, and forestry and logging 124. There were 1,540 men and 332 women placed in regular employment.

Quebec

Positions offered through Employment Offices in the province of Quebec during the four weeks ending September 26, 1946, averaged 1,955 daily in comparison with 1,519 in the preceding period and 2,680 during the four weeks ending September 27 last year. The average number of placements registered daily was 598, as compared with 507 in the previous period and 1,367 during the four weeks August 31 to September 27 a year ago. Substantial declines in forestry and logging, manufacturing and construction augmented by decreases somewhat smaller in volume in services, trade and mining were chiefly responsible for the reduction in placements from the corresponding period of 1945. Moderate losses were reported in agriculture, and finance and insurance but these were partly offset by a gain in public utilities operation. Industrial groups in which the majority of placements were effected were: manufacturing 4,394; services 2,101; construction 1,945; public utilities operation 1,762; agriculture 1,391; trade 995; forestry and logging 722, and mining 320. Placements in regular employment numbered 10,693 of men and 2,597 of women.

Ontario

The demand for workers on a daily average as indicated by vacancies listed at Employment Offices in Ontario during the period

terminating September 26, 1946, was 3,284 as compared with 2,736 in the previous four weeks and 3,795 during the corresponding period a year ago. Placements showed a daily average of 1,251 in comparison with 1,167 in the preceding four weeks and 2,311 during the period terminating September 27, 1945. With the exception of fishing and hunting in which there was no change, placements were less numerous in all industrial divisions than during the four weeks August 31 to September 27 last year. The most marked reduction occurred in manufacturing, while substantial losses were reported in construction, public utilities operation, services and trade, and a decline much smaller in volume in forestry and logging. In addition, moderate decreases were shown in mining, and finance and insurance. Industries in which employment was secured for more than 500 workers included: manufacturing 11,211; services 5,364; construction 4,554; trade 3,197; public utilities operation 1,801; forestry and logging 897; agriculture 715 and mining 646. There were 19,845 men and 7,257 women placed in regular employment.

Manitoba

Employment opportunities as indicated by orders listed at Offices in Manitoba during the period under review, showed a daily average of 427 workers in contrast with 470 in the preceding four weeks and 372 during the period ending September 27 last year. Placements were fewer under both comparisons, the daily average being 214 as compared with 245 in the previous period and 269 during the four weeks ending September 27, 1945. The largest decline in placements from the period August 31 to September 27 a year ago took place in manufacturing. Reductions of more moderate proportions were recorded in trade, construction and public utilities operation but these contractions were offset in part by gains in agriculture and services. Placements by industries included: services 1,339; trade 901; manufacturing 856; agriculture 718; public utilities operation 449; construction 372 and mining 153. Regular placements totalled 2,684 of men and 1,180 of women.

Saskatchewan

Orders received at Employment Offices in Saskatchewan during the four weeks terminating September 26, 1946, called for an average of 247 workers daily in comparison with 265 in the previous period and 242 during the four weeks terminating September 27 a year ago. Placements decreased under both comparisons, the daily average being 120 in contrast with 151 in the preceding period and 174 during the corresponding four weeks of last year. When

comparing placements by industrial divisions with the period terminating September 27, 1945, the most significant changes were losses in agriculture, manufacturing, construction, trade and public utilities operation, and a gain in services. Placements by industrial groups numbered: services 920; trade 623; construction 363; agriculture 288; manufacturing 279 and public utilities operation 221. There were 1,550 men and 723 women placed in regular employment.

Alberta

There was an increase in the average number of vacancies available daily at Employment Offices in Alberta during the period under review; there being 460 in contrast with 376 in the preceding four weeks and 418 during the period ending September 27 last year. The average number of placements effected daily was 269 during the period under review, as compared with 215 in the previous four weeks and 279 during the period August 31 to September 27 a year ago. Moderate decreases in public utilities operation, manufacturing, trade and construction accounted for the small decline in placements from the corresponding four weeks of 1945, although these losses were almost entirely offset by a fairly substantial gain in agriculture and a moderate increase in services. Placements by industries included: agriculture 1,891; services 1,468; trade 728; construction 694; manufacturing 686; mining 355 and public utilities operations 264. Placements in regular employment numbered 4,259 of men and 1,144 of women.

British Columbia

During the four weeks terminating September 26, 1946, the daily average of positions offered through Employment Offices in British Columbia was 949, as compared with 940 in the previous period and 1,009 during the corresponding four weeks of 1945. There was a daily average of 459 placements in comparison with 445 in the preceding period and 717 during the four weeks August 31 to September 27 last year. Fairly substantial reductions in manufacturing, and forestry and logging were mainly responsible for the loss in placements from the period terminating September 27 a year ago, although all other groups, except fishing and hunting, showed declines under this comparison, the most important of which were in public utilities operation, construction, trade, services and mining. Industrial divisions in which most of the placements were effected were: manufacturing 2,577; services 2,434; construction 1,739; trade 1,613; public utilities operation 871; forestry and logging 833, and agriculture 210. Regular placements totalled 6,960 of men and 2,420 of women.

Unemployment in Trade Unions at the Close of the Quarter Ending September 30, 1946

THE percentage of trade union unemployment showed a decline for the third consecutive quarter. Returns from 2,378 local unions in Canada with a combined membership of 425,899 indicated 4,169 unemployed or a percentage of 1.0 at September 30. At the end of June, 2,326 locals with a total of 408,002 members reported 1.3 per cent unemployed, while in September, 1945, the percentage of unemployed was 1.4 for 2,307 locals representing 377,495 members.

In the following report unemployment refers only to involuntary idleness due to economic causes. Persons who are without work because of illness, a strike or a lockout, or who are engaged in work outside their own trade are not considered as unemployed. As returns from unions reporting vary from quarter to quarter with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that the figures refer only to organizations reporting. Improvement in employment was indicated by the information for lumbering and logging, mining, manufacturing, transportation, communication and services. The percentage of unemployment was unchanged in building and construction.

Table I contains the percentages of trade union unemployment, at certain dates, in each province. When compared with the previous quarter slight increases in the percentage were shown in Ontario, from 0.8 to 1.0 and in Alberta, from 0.4 to 0.5. The other provinces with the exception of Quebec, which was un-

changed at 1.0 per cent, indicated decreases: Nova Scotia, from 3.6 to 0.9; New Brunswick, from 3.7 to 1.0; Manitoba, from 1.5 to 0.5; Saskatchewan, from 0.7 to 0.4; and British Columbia, from 2.3 to 1.5. In comparison to September, 1945, the percentage of trade union unemployment increased in New Brunswick, Ontario, Manitoba and Alberta; the percentage was unchanged in Saskatchewan and decreased in Nova Scotia, Quebec and British Columbia.

A separate compilation is made each quarter of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. For the quarter under review as compared with the previous quarter, improvement was recorded in Saint John, from 12.3 to 4.0, in Winnipeg, from 1.5 to 0.3, and in Vancouver, from 3.0 to 2.1. The percentage was unchanged in Halifax and Regina where it remained at 0.1 and 0.2 respectively. Increases in the percentage were noted in Montreal from 0.4 to 1.1, Toronto from 0.6 to 1.0, and Edmonton, from 0.2 to 1.2. A comparison with September, 1945, indicates lower employment levels in all but Winnipeg and Vancouver.

Returns were tabulated from 896 local union organizations in the manufacturing industries. These reported a combined membership of 207,660 of whom 2,823 or 1.4 per cent were unemployed at September 30. At the end of the previous quarter 1.6 per cent of 185,865 members reported were without work. In September, 1945, 2.5 per cent of 174,633

PERCENTAGE OF UNEMPLOYMENT AS REPORTED
BY TRADE UNIONS

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1933.....	16.0	13.0	25.2	24.4	20.3	17.2	21.7	20.8	22.3

June 1945.....	1.2	1.1	.6	.7	.2	.9	.3	.2	.5
September 1945...	2.0	.5	2.4	.5	.4	.4	.3	2.4	1.4
December 1945...	4.6	4.7	1.8	4.0	1.2	1.3	.9	3.5	3.0
March 1946.....	4.0	1.8	1.4	1.7	1.6	2.1	1.0	3.0	1.9
June 1946.....	3.6	3.7	1.0	.8	1.5	.7	.4	2.3	1.3
September 1946...	.9	1.0	1.0	1.0	.5	.4	.5	1.5	1.0

members were unemployed. In comparison with the previous quarter (Table II), the employment situation was more favourable among union members engaged in the manufacture of vegetable products, clothing, wood products, iron and its products, non-ferrous metals, electric current, cap and glove manufacture, and in printing and publishing. Increases in trade union unemployment were indicated in pulp and paper products, textiles and textile products, animal products, clay and glass products, and miscellaneous manufacturing. A comparison with September of the previous year indicates a decrease in unemployment in the manufacture of clothing, iron and its products and non-ferrous metals.

In the transportation industries, reports were received from 862 local unions with a membership of 96,603 of whom 728 (0.8 per cent) were without work on the reporting date. In comparison 1.5 per cent were unemployed at the end of the previous quarter and 0.4 at the end of September, 1945. In steam railway operations the percentage for the same period declined from 1.6 at the end of June, 1946, to 0.5 at the date under review.

Unemployment in the mining group at the end of September was 0.5 per cent compared with 0.8 for the previous quarter and 0.4 per cent recorded at September 30, 1945. In coal mining the percentage of trade union unemployment was 0.2 in comparison with 0.6 at the end of June and 0.1 in the third quarter of 1945.

No unemployment at the reporting date was recorded for metallic ore miners. Unions of non-metallic miners other than coal miners, reported 2.7 per cent of 3,663 members unemployed. The percentage for the previous quarter and at September 30, 1945, was 2.8.

The Department received reports from 203 locals in the building and construction trades. These reported a combined membership of 37,805 of whom 0.8 per cent were unemployed at the end of September, which was unchanged from the figure recorded in the previous quarter. It was, however, substantially lower than the 1.5 per cent recorded at September 30, 1945. Decreased employment for bricklayers, masons and plasterers, painters, decorators and paper hangers, and electrical workers were offset by improvement for carpenters and joiners, granite and stonecutters, plumbers and steamfitters and miscellaneous building workers.

Unemployment among trade union members in public and personal services was 0.3 per cent at the end of the quarter under review. The percentage was 0.4 both at the end of June, 1946, and at the end of the third quarter in 1945.

The communications group registered a considerable decrease of unemployment: from 1.4 per cent at the end of June to 0.2 at the date

under review. At the end of September last year the percentage was 0.1.

There was no unemployment reported in logging. This was similar to the situation reported for the corresponding quarter last year but was an improvement over the 0.8 per cent unemployed recorded at the end of June, 1946. The information on trade union membership in fishing is small and the figure obtained is considered unrepresentative of the industry as a whole.

Table I shows by provinces the average percentage of union members who were unemployed in each year from 1933 to 1945 inclusive. It also indicates the percentage of those without work for June of each year since 1932 and for each quarter since 1943 to date. Table II indicates the percentage of unemployment in the various groups of industries at certain dates since 1932.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

NOTE.—In percentages shown below, "0" indicates no unemployment. Where ".0" is used, negligible unemployment (less than .05 per cent) is indicated.

Month	Fishing*	Lumbering and Logging	Mining	Manufacturing	Industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Electric current, etc.	Wood products	Fibres, textiles and textile products	Garment workers	Hat, cap and glove workers	Animal products	Rubber workers	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Chemical and allied products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping	Steam railway operation	Local transportation	Communication	Telephone operation	Trade (retail and wholesale clerks)	Services	Governmental (civil)	Miscellaneous	All occupations

* Few unions of fishermen report on unemployment among their members and these percentages should not be considered as representative.

Quarterly Report of the National Employment Service Offices June 28 to September 26, 1946

EMPLOYMENT conditions, as indicated by the work of the National Employment Service Offices of Canada during the quarter June 28 to September 26, 1946 showed losses in both vacancies and placements, there being reductions of 18.9 per cent in vacancies offered and 37.6 per cent in placements effected when compared with those reported during the corresponding quarter of 1945. Agriculture showed increases in both instances and forestry and logging advanced in vacancies but all other industrial divisions recorded losses, the greatest reduction in vacancies being in manu-

facturing, public utilities operation, construction, trade, services and mining. The heaviest losses in placements were in manufacturing, public utilities operation, forestry and logging, construction, trade and services. All provinces except Prince Edward Island, Manitoba, Saskatchewan and Alberta reported fewer vacancies and all recorded reductions in placements, the greatest decline in vacancies being in Quebec and Ontario and that of placements in Ontario, Quebec and British Columbia.

The accompanying table gives the vacancies and placements of the National Employment

Offices by industrial groups in the various provinces during the period June 28 to September 26, 1946.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of the National Employment Service Offices during September 1946, it will be seen that the curve of vacancies in relation to applications took a slightly lower course in July and an upward trend in August and September. The curve of placements in relation to applications rose slightly in July and dropped during August and September. During the thirteen-week period there was a ratio of 110.0 vacancies and 49.1 placements for each 100 applications for employment as compared

with 99.5 vacancies and 57.7 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 6,864, of applicants registered 6,237 and of placements effected 3,060 in contrast with a daily average of 8,579 vacancies, 8,618 applications and 4,972 placements during the same quarter of 1945.

During the three months July to September, 1946, the offices reported that they had referred 357,384 persons to positions and had effected a total of 232,543 placements, of which 213,935 were in regular employment and 18,608 in casual work. Of the placements in regular

employment, 161,721 were of males and 52,214 of females. A comparison with the corresponding period in 1945 shows that 372,907 placements were then made, of which 361,832 were in regular employment and 11,075 in casual work. Applications for employment during the period under review were received from 351,420 males and 122,627 females, a total of

474,047 in contrast with the registration of 646,372 applicants during the same period last year. Employers notified the offices during the quarter July to September, 1946 of 521,659 vacancies of which 373,231 were for males and 148,428 for females, as compared with 643,387 opportunities for work offered during the same quarter of 1945.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation

THE only important Orders noted this month were those made under the Alberta Hours of Work Act and the Quebec Minimum Wage Act. Alberta has rescinded the wartime Order which permitted a 10-hour day in sawmills and wood-working plants in rural districts or small towns, but has made new regulations

applying only to sawmills which allow employees to work a 10-hour day and a 60-hour week. In Quebec, the Minimum Wage Order covering the silk textile industry has been amended to exempt yarn-manufacturing from the Order.

Dominion

Surcharge on Pilotage Dues

Orders in Council of October 11, 1946, gazetted October 26, restore from 15 to 25 per cent the surcharge on all dues, except moorage, detention and minimum charges, for the period from October 15, 1946, to March 31, 1947, in

the St. Lawrence-Kingston-Ottawa, Quebec, Montreal and British Columbia pilotage districts. The reduction to 15 per cent for the 1946 navigation season was made by Order in Council in the British Columbia pilotage district on June 18, and in the other three districts on April 16, 1946. (L.G. 1946, p. 1275).

Provincial

Alberta Hours of Work Act

The wartime Order of November 12, 1940 (L.G. 1940, p. 1257) which permitted a 10 hour day in sawmills, planing mills, box factories and woodworking plants in rural districts more than 10 miles from any city or in small towns of less than 1,000 people has been rescinded by an Order in Council of September 17, gazetted September 30.

On October 9, however, a new Order applying only to workers in sawmills in such districts or small towns, permits them, from November 1, 1946, to work a 10-hour day and a 60-hour week. The new regulations were approved by Order in Council on October 22 and gazetted October 31.

New Brunswick Health Act

Regulations governing the examination and licensing of journeymen plumbers (L.G. 1946, p. 1464) have been amended from September 17, 1946, by an Order gazetted October 9, to raise from \$5 to \$10 the fee for examination for a licence and to fix a \$2 fee for any re-examination; permitted only after 90 days. An examiner deputed by the Plumbers' Examining Board may be paid \$5 for each candidate but the maximum in respect of all candidates is \$15.

Quebec Industrial and Commercial Establishments Act Correction

The statement made in the June issue of the LABOUR GAZETTE (p. 832) concerning the employment of women and boys under 18 on

night shifts in Quebec was incorrect. Under the Quebec Industrial and Commercial Establishments Act women and boys under 18 may be employed only on a single shift between 6 a.m. and 9 p.m. or on one of two shifts between 6 a.m. and 11 p.m.

The error was made in connection with Order in Council No. 1640 of May 10, 1946, gazetted May 18, the purpose of which was to permit the Minister of Labour to direct how much time should be allowed for meals when work was arranged in shifts. The Act stipulates that women and boys under 18 on either of the two day shifts must be allowed an hour for a meal between 10 a.m. and noon, or between 6 p.m. and 8 p.m. A more flexible system is authorized by the Order in Council. It permits the Minister, after consulting an industrial physician, to fix the length of the lunch period in each of the two day shifts on which women and boys may be employed and in any night shift when only adult men may be employed.

Quebec Minimum Wage Act

Order 5 applying to the silk textile industry was amended by an Order in Council of September 18, gazetted and effective September 23. Now specifically excluded from the Order, in addition to establishments making fabrics 12 inches or less in width, are establishments making only yarn and the yarn-manufacturing departments of establishments governed by Order 5, except that of the Canadian Celanese Company which continues to be under the Order.

Strikes and Lockouts

Strikes and Lockouts in Canada During October, 1946

DURING October, 1946, the time loss due to strike idleness in Canada declined by more than 260,000 days as compared with the previous month and by more than 25,000 days as compared with the same period a year ago.

During the month settlement was reached of 14 strikes, which had been in existence in some cases since May, 1946, and which still affected about 26,000 workers at the beginning of October. As the plants were made ready for

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

operations, the workers were re-employed and by the end of the month most of these plants were approaching full production.

Preliminary figures show 27 strikes and lockouts in existence during October, 1946, involving 32,919 workers, with a time loss of 393,296 man-working days, as compared with 33 strikes in September, 1946, with 33,030 workers involved and a time loss of 657,601 days. In October, 1945, there were 18 strikes, involving 25,868 workers, with a time loss of 419,242 days.

The figures for the first ten months of this year are affected by a number of strikes involving an unusually large number of workers for considerable periods. While the number of strikes during this period is not materially higher than last year, the total of the workers involved and the time loss show great increases. Preliminary figures for the first ten months of 1946 show 188 strikes, involving 133,317 workers, with a time loss of 4,462,730 man-working days. For the same period last year there were 169 strikes, involving 72,490 workers, with a time loss of 773,128 days.

Of the 27 strikes recorded for October, one was settled in favour of the workers, four in favour of the employers, 13 were compromise settlements and two were indefinite in result, work being resumed pending final settlement. At the end of the month seven strikes were recorded as unterminated, namely: metal miners in British Columbia, compositors, etc., at Winnipeg, Man., compositors, etc., at Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C., silverware factory workers at Toronto, Ont., logging and lumber camp workers at Timmins and the Lakehead, Northern Ontario, wood veneer factory workers at Saint John, N.B., and fish handlers at North Sydney, N.S.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. A strike of bakery workers at Halifax, N.S., which commenced on February 11, 1946, has not been declared terminated.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars(?)
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to October, 1946				
MINING—				
Metal miners, British Columbia	12	1,200	18,000	Commenced July 3; for increased wages, reduced hours and other conditions; un-terminated (work resumed at one copper mine October 21, 1946).
MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Rubber factory workers, Bowmanville, Hamilton, Kitchener, New Toronto and Toronto, Ont.	9	7,500	113,000	Commenced June 23; for increased wages, reduced hours, overtime rates for Saturdays, Sundays and holidays, etc.; terminated October 18 to 29; conciliation, federal and provincial, followed by negotiations; compromise.
<i>Animal Foods—</i>				
Meat packing plant workers, St. Boniface, Man.	1	43 ^(*)	43	Commenced September 30; for adjustment of piece-work occupational classification; terminated October 1; return of workers pending reference to RWLB ^(*) ; indefinite.
<i>Printing and Publishing—</i>				
Compositors, etc., Winnipeg, Man.	2	75	1,500	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; unterminated.
Compositors, etc., Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.	5	100	1,800	Commenced May 30; in sympathy with strike of compositors at Winnipeg, Man., commencing November 8, 1945; un-terminated.
<i>Metal Products—</i>				
Brass factory workers, New Toronto, Ont.	1	500	8,000	Commenced May 18; for increased wages, reduced hours, union shop, seniority in lay-offs, etc.; terminated October 26; conciliation, federal and provincial; com- promise.

(5) 300 indirectly affected; (6) 146 indirectly affected; (7) 572 indirectly affected; (8) 100 indirectly affected; (9) 58 indirectly affected.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in August, 1946, was 145, and 23 were still in progress from the previous month, making a total of 168 during the month. There were 42,700 workers involved and a time loss of 167,000 working-days was caused.

Of the 145 stoppages which began during August, 19 arose out of demands for advances in wages; 46 over other wage questions; two on questions as to working hours; 29 on questions respecting the employment of particular classes or persons; 43 on other questions respecting working arrangements; and six were over questions of trade union principle.

New Zealand

Figures for the first six months of 1946, show 62 strikes, involving 10,534 workers, with a time loss of 17,413 working-days.

India

Statistics received from Indian give the following revised figures: February, 1946, 130 work stoppages, involving 144,803 workers, with a time loss of 403,956 man-days; March, 1946, 160 work stoppages, with 238,742 workers involved, and a time loss of 1,036,875 man-days; April, 1946, 185 work stoppages, involving 313,083 workers, with a time loss of 1,374,482 man-days.

Preliminary figures for May, 1946, show 180 work stoppages, involving 246,381 workers, with a time loss of \$1,241,703 man-days. For June, 1946, the figures are 145 work stoppages with 157,977 workers involved, and a time loss of 807,952 man-days.

United States

Preliminary figures for September, 1946, show 450 strikes and lockouts beginning in the month, in which 380,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 5,000,000 man-days. Corresponding figures for August, 1946, are 500 strikes and lockouts, involving 235,000 workers, with a time loss of 3,425,000 man-days.

Labour Organization in Canada

TRADE union membership in Canada decreased slightly during 1945, but was still larger than in any year with the exception of 1944. According to the *Thirty-Fifth Annual Report on Labour Organization in Canada* for the year ending December 31, 1945, which will soon be released, there were approximately 711,000 members at the end of 1945. This is a decrease of about 13,000 or 1.8 per cent from the 724,000 recorded in the previous year and almost twice the membership of 359,000 in 1939. Of an estimated 2,843,400 non-agricultural wage and salary workers, 14 years of age and over, 25.0 per cent were members of trade unions in Canada at the end of 1945.

While there was a slight decrease in members during 1945, according to the figures reported to the Department of Labour, it is worthy of note that the estimates of total membership given by the two large Congresses of Labour, at their conventions in 1946, are somewhat higher than the total of reports from affiliated unions.

The figures contained in this statement are published with the realization that it is not possible to guarantee 100 per cent accuracy.

The slight decrease in members which occurred during the year 1945 was due mainly to the reduction of employment in certain highly concentrated large scale manufacturing projects for the production of material for the prosecution of the war, with a resultant loss in membership in some of the largest local unions. The number of local unions in Canada increased by 206 from 4,123 in 1944 to 4,329 in 1945. During the year 261 local unions were dissolved while 467 new local unions were formed. The largest number of new locals formed was in the "services" industrial group, where there were 106 new unions formed in comparison to 63 dissolved, accounting for a net increase of 43. In "transportation other than steam railways" there were 49 new locals formed as against 12 dissolutions, a net gain of 37.

The analysis of trade union membership by industrial groups shows that the metal industries had 20.8 per cent of Canadian trade union members. Although the number in this group declined by 45,000 to 148,000, due largely to the cessation of the manufacture of war materials mentioned above, it was still the group with the largest number of trade union members. The next largest group was "steam railway transportation" with 128,000 members.

Changes in the geographical distribution of trade union membership were comparatively small during 1945. Membership figures by province and city, being based on reports from local branches all of which do not always report, are not complete. The information available indicates, however, that 62 per cent of union membership was concentrated in the industrial provinces of Ontario and Quebec, this being within one-quarter of one per cent of the percentage recorded for these provinces in 1944. Of the 4,329 locals known to be in existence in 1945 more than half or 2,549 were in these two provinces. The largest decrease in any province was in British Columbia where union membership declined from about 91,000 to 84,000; this decrease was due in a large measure to a decrease in employment in shipyards.

In 1945 there were 46 urban centres with 20 or more local branches as compared with 44 such centres in 1944. While the union membership in the 46 centres decreased from 433,000 to 418,000 or 3.4 per cent, there were increases in 24 of them. Montreal and Toronto, the two leading centres of industry and population, together had 571 or 13.2 per cent of all local unions in Canada, representing 155,000 or 25.9 per cent of the members of local unions reported in 1945.

Accompanying this article are three tables which will appear in the Report.

Table I shows the total number of local unions, the total membership of all unions from year to year since 1911 as well as the annual percentage increase or decrease in membership.

Table II shows the membership as of December 31, 1945 classified according to affiliation. These figures are compiled from figures furnished the Department by the constituent national, international and directly chartered unions.

Table III shows the distribution of membership by industrial groupings in 1944 and 1945 and the percentage increase or decrease in 1945 over 1944.

The Report on Labour Organization contains a brief historical statement and shows the membership, the names of the officers, and the affiliated unions of the Trades and Labour Congress of Canada, the Canadian Congress of Labour and the Canadian and Catholic Confederation of Labour.

For each national and international union are shown the membership, the number and

location of their branches and the name and address of the secretary. In the case of an international union, the names and addresses of the Canadian officers are given.

In addition, there are included lists of provincial federations, local labour councils, federations of unions in allied trades or industries, district union councils, and railroad brotherhood committees, with the names and addresses of their presidents and secretaries. Some notes are included concerning the nature, functions, and interrelationships of

the constituent parts of the framework of labour organizations. A section of the Report deals with the labour press.

The Report also gives information concerning female membership in unions; benefits paid by headquarters of national and international unions on behalf of Canadian members; teachers' associations; and other organizations of public employees, including those employed by the Dominion, provincial and municipal governments.

TABLE I—LOCAL UNIONS AND UNION MEMBERSHIP IN CANADA, 1911-1945

Unaffiliated National and International Unions.....	197	34,559
Unaffiliated Local Unions.....	55	7,356
Total.....	4,329	711,117

(1) These comprise international unions affiliated with the A.F. of L. in the United States, the Canadian branches of which are not affiliated with the Trades and Labour Congress of Canada. The 39 local or federal unions with 2,460 members which received their charters directly from the A.F. of L. have been included under the Trades and Labour Congress in this table as they are affiliated with that body.

(2) These comprise international unions affiliated with the C.I.O. in the United States, the Canadian branches of which are not affiliated with the Canadian Congress of Labour.

(3) The membership shown is for the affiliated unions which reported their membership to the Department.

Prices

Prices, Retail and Wholesale, in Canada, October, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index rose 1.3 points (to 126.8) between September 3 and October 1, 1946, reflecting increases in five of the six family budget groups. The food series advanced from 143.2 to 146.5 due to a substantially higher price for fluid milk which was only partially offset by seasonably lower prices for fresh vegetables. Following results of the semi-annual survey rentals moved up from 112.6 to 113.4 while fuel and lighting costs advanced from 107.2 to 107.3, clothing from 129.6 to 130.2 and homefurnishings and services from 128.4 to 128.8. The miscellaneous items series remained unchanged at an index level of 113.9.

With the exception of the Halifax index which remained unchanged at 125.0, bi-monthly cost-of-living indexes for eight regional cities all moved higher between August and October. Advances ranged from 1.4 points for Toronto to 0.3 for Saint John.

Gains for other cities were as follows: Montreal 1.2 (to 129.5), Winnipeg 0.6 (to 122.7), Saskatoon 1.1 (to 127.2), Edmonton 0.7 (to 123.9), and Vancouver 1.2 (to 125.9). Higher prices for foods followed by clothing and homefurnishings and services were mainly responsible for these index advances. In addition rentals and fuel and lighting costs were higher in a few centres.

Rent Indexes Revised

Rent indexes for Vancouver and Edmonton have been revised back for a period of five years on the basis of results from a special inquiry. This same information has been used in the cost-of-living index for Canada, but changes have not been sufficient to affect the level of the Canada index by one-tenth of one per cent. Revised rent and total cost-of-living index numbers for Vancouver and Edmonton are as follows:

	EDMONTON		VANCOUVER	
	Rent	Cost of Living	Rent	Cost of Living
1942—June.....	100.5	112.1	100.7	113.3
August.....	100.5	114.2	100.7	115.3
October.....	101.0	113.8	101.4	115.8

August.....	104.5	123.2	106.3	124.7

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

(Concluded on p. 1666).

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1946

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.
 (b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses. (c) Revised.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90 divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.59; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30;

recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, its purpose and construction, appears elsewhere in this issue, on page 1528.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527 became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Price Control in Canada*.

Wholesale Prices, September, 1946

The monthly composite index of wholesale prices showed a further seasonal drop of 0.1 (to 109.1) between August and September, due entirely to declines for vegetable and animal products. The former group index dropped 0.4 (to 97.4) in the same interval, reflecting lower quotations for potatoes, onions and lemons which overbalanced increases for rye, hay, rosin, oranges and canned corn. A decrease of 0.1 (to 115.3) for animal products was due to losses in live stock, fresh meat and raw furs. Shoes and eggs, on the other hand, were firmer. Wood, wood products and paper advanced 0.2 (to 131.2), supported by firmer prices for furniture and wood-pulp

while the iron and steel group rose 0.1 (to 128.6) due to increases in hardware. Other groups were unchanged: textile products at 98.2; non-ferrous metals at 89.7; non-metallic minerals at 102.6; and chemicals and allied products at 94.4.

Due to decreases for both field and animal products the index of Canadian farm product prices dropped 0.6 (to 110.5). Field products moved down 0.9 (to 99.4) with losses for potatoes and onions outweighing gains in rye and hay. In the animal products section, lower live stock quotations overbalanced a seasonal upturn in eggs to reduce the index 0.1 to 129.2.

Industrial Accidents

Fatal Industrial Accidents in Canada During the Third Quarter of 1946

THERE were 345 industrial fatalities in the third quarter of 1946 according to the latest reports received by the Department of Labour. In the previous three months there were 299 including 28 in a supplementary list. The accidents recorded are those occurring to persons gainfully employed during the course of, or arising out of their employment, as well as fatalities from industrial diseases reported chiefly by the Provincial Workmen's Compensation Boards.

The statistics are compiled from reports received from Provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, and from *LABOUR GAZETTE* correspondents. Newspaper reports are also used to supplement these data.

Six industrial accidents were recorded each of which resulted in the deaths of three or more persons, as follows. An explosion on July 5 in a doughnut factory at Les Saules, Quebec, caused the deaths of three men. Four miners lost their lives at Duparquet, Quebec, when a heavy rush of clay broke through the level on July 19. Three diamond drill runners passengers in a truck, were killed in a collision with another truck on July 8 in the same province. On August 31, the four members of an airplane crew, engaged in a mercy flight, were killed when their craft crashed in the Prince Rupert area of British Columbia. An explosion of unknown origin in an explosives plant on James Island, British Columbia, caused the deaths of three men on September 26. Three men engaged in railway transportation were killed at Carberry, Manitoba, on September 21, when one freight train plowed into another.

Grouped by industries the largest number of fatalities, 80, was recorded in manufacturing. Of these, 2 were in iron, steel and products, 15 in saw and planing-mill products, and 14 in pulp, paper and paper products. The remainder were distributed among the other manufacturing sub-groups. In the previous quarter 66 industrial deaths were recorded in manufacturing.

Industrial fatalities in transportation increased to 57 from 44 recorded for the previous quarter. There were 32 in steam railways, a marked increase from 16 in the previous three months. Fatalities in local and highway transportation numbered 12 while four occurred in water transportation.

Of the 43 deaths in the mining group 30 were in metalliferous mining, 11 in coal mining, and 2 in other non-metallic mineral mining and quarrying. In the previous quarter 40 fatalities were recorded in mining, 25 being in metalliferous mining.

The number of fatalities in logging was 31 and in trade, 8, as compared with 22 and 14 respectively in the previous quarter. The number of fatalities in agriculture increased from 24 to 38 but was unchanged at 25 in service.

In the construction group were recorded 41 fatalities, of which 33 were in buildings and structures, 4 in highway and bridge construction, and 4 in miscellaneous construction. In the previous quarter 32 occurred in this group, 20 of which were in construction of buildings and structures.

More fatal accidents, 109 in number, were caused during the quarter by moving trains and other vehicles than by any other cause. Falls of persons resulted in 59 deaths while 54 were caused by industrial diseases, infections, etc. Dangerous substances caused 43 fatalities and falling objects, 40.

The largest number of industrial accidents, 133, was recorded for Ontario. Of these, 30 were in manufacturing, 25 in transportation, 19 in construction, and 17 in agriculture. In Quebec there were 66 industrial deaths including 17 in manufacturing and 12 in construction. Reports indicated 64 fatal accidents in British Columbia, 22 of which were in logging and 17 in manufacturing. For Alberta and Nova Scotia 26 and 20 fatalities respectively were recorded.

Of the total of 345 deaths, 117 occurred in July, 116 in August, and 112 in September.

Workmen's Compensation in British Columbia, Alberta, Saskatchewan and Ontario British Columbia

THE twenty-ninth Annual Report of the Workmen's Compensation Board of British Columbia for the year 1945 states that the termination of hostilities resulted in a shut-down or curtailment in many branches of industry, with a resultant reduction in gross pay-rolls in 1945. An appreciable number of smaller operators discontinued their own businesses for the war years. On the other hand, many of these former employers have resumed business for themselves and many new enterprises have been commenced by men released from the Armed Forces. In all, 2,005 firms commenced

or resumed business in 1945, to replace 821 others which discontinued employing labour in industries under the Act. During the year 173 additional employers who were not required to protect their workmen under the Act voluntarily purchased optional protection for their workmen, while 111 others discontinued such protection. The net increase in total number of employers at the end of 1945 over 1944 was 1,246.

The number of accidents reported in 1945 was 55,854, of which 213 were fatal. Of those meeting with time-loss accidents, 2,414 were

women. There was a decrease of 4,609 accidents in 1945 as compared with 1944. The total (estimated) payrolls of employers engaged in industry covered by the Act for 1945 was \$368,000,000, as compared with audited payrolls for 1944 amounting to \$388,102,590.

The report contains a tabular analysis of 29,307 claims on which time-loss payments were made in 1945. Of these claims, 17,859 were made by married persons, 10,623 by single persons and in 825 cases the conjugal state was unknown. The average daily wage, all classes, was \$5.27 and the total wage-loss sustained by the 29,307 claimants was \$6,112,901.61. The average length of disability, all classes, was 39 days, and the total number of work-days lost was 1,152,208. Of this number, 797,799 days were the result of accidents that occurred in 1945; 281,527 resulted from accidents occurring in 1944 and the remainder from accidents in earlier years, mainly from reopened cases; one with a loss of 20 work-days arising from an accident in 1917 and a total of 1,970 others from accidents occurring from 1920 to 1945. Of the 29,307 cases receiving compensation benefits, 2,437 received "other benefits."

A vigorous educational campaign in accident prevention was maintained throughout the year. Inspections were increased by 20 per cent over 1944; educative material issued by the Board each year was revised and some 300,000 pieces of literature were sent out to employers, workmen and other bodies. As an incentive to employers to prevent accidents, the system of experience-rating, first introduced in the lumber industry of the province 1932, has been extended from time to time and, it is claimed, that it has resulted in plants being conducted with an ever-increasing measure of safety. Similarly, a continuous campaign was conducted during the year to convince employers of the merits of an efficient industrial first-aid service and to induce workmen to avail themselves of such service for all injuries, however trifling.

The total number of accidents reported to the Workmen's Compensation Board of Alberta in 1945 was 19,154, as compared with 19,286 in 1944, a decrease of 132 accidents. There were 80 fatal cases reported in 1945, including six resulting from accidents in earlier years. The total revenue for the year was \$4,439,010.08. From this is deducted \$168,756.22 for estimated or adjusted merit rates, making a net total of \$4,270,253.86. The total expenditure amounted to \$3,215,334.43, leaving a provisional surplus of \$1,054,919.43. The largest revenue item was that of assessments amounting to \$4,254,416.95, followed by interest of \$167,494.64 and penalties totalling \$17,098.49.

The rehabilitation department completed three years of operation on October 1, 1945. Diathermy-hydrotherapy, massage and remedial exercises were administered to 3,333 workmen who were given 136,681 treatments during 1945.

The percentage of accidents resulting in three or more days loss of time arose out of the various industries as follows: lumber industry, 33 per cent; general manufacturing and delivery 16 per cent; construction (excluding steel shipbuilding) 15 per cent; steel shipbuilding, 12 per cent; metal mining and smelting; five per cent; railroading groups, four per cent; navigation and wharf operations, four per cent; coal mining, three per cent; all other classes, eight per cent.

Revenue of the Board's accident fund during 1945 amounted to \$12,985,380.38 of which \$8,724,879.37 was obtained from 1945 assessments; \$813,516.44 from assessments for 1944 and prior years; \$45,623.61 from penalties, interest, etc.; \$1,081,579 from medical aid contributions; and \$1,778,026.64 from investments, bank interest, exchange, etc. Disbursements by the Board through its accident fund totalled \$11,246,213.37 in 1945, the major component items being compensation to workmen, \$4,045,336.49; medical aid, less credit, approved medical schemes, \$1,208,503.22; pension payments, \$2,105,540.89; general and administrative expenses, \$317,112.05.

Total receipts for the silicosis fund for 1945, were \$604,163.86, of which \$345,277.21 was obtained from assessments from employers and the balance from investments, interest, and profits realized from sales. The disbursements from the silicosis fund amounted to \$244,166.57, of which amount, \$208,674.96 was for pension payments, and the balance for hospital expenses, medical aid, time-loss payments, funeral expenses and general and administrative expenses.

Alberta

Compensation payments amounted to \$828,231.69; cost of medical services, \$420,922.76; provision for distasters, \$193,244; provision for silicosis reserve, \$96,871; provision for claims pending \$413,122; administrative and general expenses, including mine rescue stations, \$259,864.24. The capitalized cost of pension awards amounted to \$796,299.43.

Statistics for the year 1945 may be summarized as follows: number of employers within the scope of the Act as at December 31, 1945, 7,438; accidents reported during 1945, 19,154; accidents and claims not finally disposed of at December 31, 1945, 1,843; claims disposed of by award of pension or payment

of compensation, 8,891; claims disposed of by payment only of account for medical aid, 6,171; accidents disposed of for which no application for compensation was received, 241; claims disposed of on which no compen-

sation was due, 2,123; claims disposed of by other means, 1,284; claims on which further payments have to be made, 1,315; accidents awaiting further reports and on which no payments have been made, 972.

Saskatchewan

The sixteenth annual report of the Workmen's Compensation Board of Saskatchewan for the calendar year 1945, states that while the number of claims reported to the Board in 1945 was 203 less than for 1944, the number of employers and the total pay-roll covered, increased.

During 1945, the total number of claims was 8,415 as compared with 8,618 in 1944. On account of the 1944 claims a total of \$1,009,616.95 was paid in benefits, made up as follows: compensation, \$420,258.68; pension awards, \$432,763.77 (including \$109,100.97 adjustments for awards made between 1930 and 1943); and hospital and medical aid, \$156,594.50. The total receipts for the calendar year were \$821,622.19, and the total expenditure including estimates for outstanding claims amounted to \$826,904.28, leaving an estimated deficit (provisional) of \$5,282.09.

In the final figures for the calendar year 1944, it is stated that the increase in total compensation paid and pension awards is due

to some extent to the high volume of claims reported in that year and also because of the increase in compensation from 66½ per cent to 75 per cent by 1945 amendment to the Act.

The average assessment rate for 1945 was \$1.31 per \$100 of payroll, the same as in 1943 and six cents lower than in 1944.

The number of employers who reported to the Board in 1945 was 4,963 as compared with 4,658 in 1944. The amount of payroll reported in 1945, exclusive of Dominion and Saskatchewan governments (which are not asked to estimate their payrolls) totalled \$58,440,724, an increase of \$4,917,837, over 1944.

Accidents during 1944 were classified as follows: prime movers, 154; working machines, 359; hoisting apparatus, 78; dangerous substances, 282; stepping on or striking against objects, 846; falling objects, 942; handling objects, 1,196; tools, 754; runaways and animals, 78; moving trains and vehicles, 176; falls of persons, 1,425; all other causes, 1,412. Of all classes a total of 24 accidents were fatal.

Ontario

The report of the Workmen's Compensation Board of Ontario for 1945 states that there was a decrease in payrolls and accidents throughout the province in 1945. The payrolls for Schedule 1 (the collective liability part of the Workmen's Compensation Act) declined from \$1,169,052,000 to \$1,167,802,000, a decrease of less than one per cent.

There were 118,220 accidents reported during 1945, a decrease of 4.5 per cent when compared with the 123,820 reported during 1944. During 1945 the benefits (compensation, medical aid, rehabilitation, etc.) amounted to \$13,135,938.38, as compared with \$12,485,599.95 awarded during 1944. The average rate of assessment increased from \$1.02 for each \$100 of payroll to \$1.12. At the end of 1945, there were 29,039 employers under Schedule 1, as compared with 25,001 at December 31, 1944.

The compensation and medical aid for Schedule 1 industries, including estimates for what is still to be awarded for accidents happening during the year, and for prior years' accidents amounted to \$11,615,923.80. There were other outlays of \$1,216,927.39, being \$352,856.82 charged for administration (including \$1,224 credit adjustment of prior years' expenses); \$169,261.38 for other expenses of non-administrative character; \$40,872.83 for mine

rescue work; \$317,870.20, grants to accident prevention associations organized under the Act; \$123,367.28 for the Board's clinic; \$11,122 for the special arrangements with the Toronto General Hospital; and \$1,576.88 for outlays under Section 8 of the Act. The total expenditures and charges for the year, including liability for pneumoconiosis of \$2,311,484.43, were \$12,832,851.19.

The total amount of compensation awarded in Schedule 2 industries (those in which the employer is individually liable for accidents to his workmen) and Crown cases during 1945 was \$2,555,764.16, as compared with \$2,278,793 during 1944. Of the 1945 total, \$1,445,194.99 was for Dominion Crown cases and \$77,394.80 was for Provincial Crown cases.

The gross administrative expenses were \$682,271.80 of which \$554,080.82 was charged to Schedule 1 and constituted 4.7 per cent of the benefits awarded in Schedule 1.

The balance in the Pension fund at the commencement of 1945, was \$34,822,620.99. During the year \$3,902,566.96 was transferred for pension awards; \$1,781,748.88 interest was added and \$3,211,351.78 was paid for pensions. The balance in the fund at the end of 1945 was \$37,295,585.05.

Labour and Industry in Ontario

Factory Inspection—Decline in Accident Toll—Control of Health and Safety Hazards—Conciliation and Arbitration—Apprenticeship

THE twenty-seventh annual report of the Department of Labour for Ontario for the fiscal year ending March 31, 1946, presents summaries of the activities of the several Branches and Boards that are under the administrative jurisdiction of the Department.

Factory Inspection Branch:—The annual report of the Factory Inspection Branch points out that the cessation of hostilities in 1945 resulted in a lay-off of large numbers of workers who had been employed in the production of war materials. It is asserted, however, that many of these released workers were later absorbed in peace time production and, as a result, "a great improvement in the employment situation was noted for the last four months of the year."

Coincident with this transition from war-time to peacetime industry, there was a notable change in the industrial accident toll. "The heavy accident toll, always present in the metal trades and particularly so in war-time industries, dropped approximately 25 per cent during the year." Similar reductions in the number of accidents reported were noted in the chemical industry and conveyances and rubber groups. On the other hand, increases in accidents were recorded in the pulp and paper trades, wood-working, leather goods and wearing apparel industries, all of which increased production in the reconversion period.

The report states that there was a general reduction in daily and weekly working hours and a decided decrease in the numbers of women working under overtime permits later than 6.30 p.m. However, during the year overtime permits were issued to 530 firms for overtime work for 6,320 women on 8,094 occasions, as compared with 509 firms affecting 14,898 women on 10,516 occasions a year earlier.

There was "a great decrease in the number of violations of sections of the Act prohibiting child labour." Most of the violations occurred during the summer recess from school and in practically every instance incorrect ages were given by the children in order to obtain employment and proof of age was not required by employers.

The Examiner of Reports and Designs approved the plans of 913 new factory, shop and office buildings, or additions and alterations to such buildings, during the fiscal year. Their

total estimated construction cost was \$33,151,685. In the previous fiscal year 735 projects costing \$17,607,685 had been approved. The increase was attributed to the cessation of hostilities and the relaxation of building restrictions.

The report notes that employers who operated a factory comprising both old and new buildings during the war "were able to measure the benefits in increased production and to observe that employees were attracted by buildings of recent design. Many such employers are now endeavouring to replace the old inefficient buildings as soon as practicable. Some foundry employers have undertaken extensive improvement of working conditions to attract better types of employees, and the Department has provided a great deal of assistance in the design of ventilation systems."

Some of the large single-occupancy war plants have been converted to multiple-occupancy plants with many varied types of factories under one roof. As preference was given to those which would not create nuisances, no ill-effects have been observed and many small firms obtained modern work-rooms which would otherwise not have been available to them.

The Department "has followed a policy of refusing to approve the plans of windowless buildings unless the applicants can prove sufficient necessity for that type of building due to the nature of the proposed operations. The majority of employees definitely prefer to work where it is possible for them to view the outdoors, even if very remotely, from their work benches."

Advance discussion of the designs of proposed buildings and suitable equipment to safeguard the safety, health and welfare of employees took place in 1,003 office interviews with owners, engineers and architects. "This number represents a gain of 368 over last year and is an all-time maximum. The advantages resulting from preliminary discussions of proposed projects are now well-known to designers and management and the arrangements for the majority of interviews no longer need originate within the Department. The use of well-designed mechanical ventilation to control industrial health and safety hazards, particularly in the chemical industry, has shown a steady increase. The Industrial

Hygiene Division has assisted greatly in the examination of drawings, particularly those of ventilation systems.

"A total of 101 field inspections were made by the Examiner of Reports and Designs, chiefly to facilitate the approval of plans and to investigate special hazards due to lack of exits, particularly in grain elevators, ventilation floor overloads and dangerous processes reported by the inspectors. The number of such field inspections was curtailed due to pressure of office-work but the recent appointment of a professional engineer as Assistant Examiner will permit the making of more frequent visits with the district inspectors."

Inspection Statistics:—The number of inspections made in fiscal year 1946 showed an increase over the previous year's total.

Factory Inspection Branch:	1945	1946
First inspections	15,359	17,070
Second inspections	4,031	5,604
Visits re fruit camps....	43	42
	<hr/>	<hr/>
	19,433	22,716
Apprenticeship Branch....	1,377	1,158
Industrial Standards Branch	266	361
Main Office	740	1,169
Minimum Wage Branch....	406	384
Operating Engineers' Branch	146	773
Steam Boiler Branch.....	2,246	2,346
	<hr/>	<hr/>
	5,181	6,191
	<hr/>	<hr/>
TOTALS	24,614	28,907

In addition there were investigations of accidents and the usual visits, office calls and conferences incidental to inspections.

The number of orders issued relating to various requirements of the Factory, Shop and Office Buildings Act, totalled 17,017 as compared with 14,282 during the previous year.

Employees in the above-visited industries, mercantile establishments and office buildings numbered 622,380.

Violations and Complaints.—Violations of the Acts in the enforcement of which the inspectors have a responsibility, totalled 2,588, a decrease of 91 from the previous year. Most of these were violations of the Minimum Wage Act, and were, according to the Report, "cases of carelessness on the part of employers in neglecting to keep minimum wage cards posted in their establishments."

Complaints received during the fiscal year numbered 146. Upon investigation, sufficient grounds for complaint were found in 91 cases, insufficient grounds in 39 cases and 16 cases concerned matters not under the jurisdiction of the Factory Inspection Branch. Some

investigations covered more than one complaint. Subjects of complaint were as follows:—

	1945	1946
Adolescents	10	8
Child labour	31	14
Dust	5	3
Elevators	9	6
Fire hazards	13	6
Fumes	13	9
Guarding machinery	—	6
Lack of heat.....	7	13
Long hours	29	15
Lunch period	2	3
Lunch and dressing rooms	2	2
Miscellaneous	33	23
Multiple	19	5
One Day's Rest in Seven Act	2	—
Exits	1	3
Sanitation	7	11
Toilet accommodation	13	16
Ventilation	5	3
	<hr/>	<hr/>
Totals	201	146

Proceedings were taken against two firms for violations of the Factory, Shop and Office Building Act. Conviction was recorded in one case under section 26, employment of adolescents; and in the other case, which was adjourned, the charge was laid under section 29, hours for youths, young girls and women.

Board of Examiners of Operating Engineers.—The Board issued 17,718 certificates of all grades during the year. Of these 16,163 were renewal certificates; 939 on examination; 272 on re-examination; 43 were provisional and 16 were duplicate. A total of 1,263 in all classes was refused. There were 2,482 candidates examined at 53 centres.

Boiler Inspection.—During the fiscal year, 681 drawings and specifications were surveyed, registered and re-registered; 2,762 new boilers and pressure vessels, and 932 used boilers and pressure vessels were inspected. A total of 7,182 annual inspections was made of uninsured boilers and unfired pressure vessels, under the provisions of the Factory, Shop and Office Building Act, as compared with 6,319 such inspections the preceding fiscal year. The number of certificates issued by the Branch totalled 4,526.

Conciliation and Arbitration.—The Conciliation Staff of Ontario consists of the Chief Conciliation Officer and two conciliation officers. During the year three federal labour relations officers co-operated with the provincial conciliation branch in carrying out the greatly increased work coming under its jurisdiction. There were 138 conciliation cases considered in the fiscal year ending March 31, 1946. In 88 of these the unions were certified as collective bargaining agents, but were unable to reach agreements with

the companies concerned within the stipulated thirty-one day period as provided in P.C. 1003. In 38 cases the conciliation officer was able to bring about mutually satisfactory agreements between the parties concerned. In the other 50 cases the conciliation officers were able to effect agreements on many points in dispute, prior to reference to Boards of Conciliation. Twenty-eight cases were handled by arbitration during the fiscal year and in almost all of these a conciliation officer was the arbitrator.

There was renewed activity during the fiscal year under the Industrial Standards Act. In all, 23 conferences were held throughout the province and a schedule was agreed to and approved by the Minister of Labour in each case. The industries covered by schedules included the following: barbering, bricklaying and stonemasonry, carpentry, hard furniture, painting and decorating, plumbing and heating, retail gasoline and taxicab. There were 229 investigations conducted during the year, of which 220 were assignments from the Regional War Labour Board, to investigate and report on wages, working hours, etc., in several places throughout the province. Officers of the conciliation branch were requested to assist in the settlement of 24 strikes during the year, involving 5,931 employees.

Apprenticeship.—The fiscal year 1946 was the year of greatest responsibility for the Apprenticeship Branch since the Apprenticeship Act was passed in 1928. Opportunities for boys to learn trades were found in far greater numbers than for many years and more boys were anxious to become indentured in the designated trades. At March 31, 1946 there were 2,040 actively registered apprentices, as compared with 1,631 the previous year. Of these, 1,063 were in the various building trades, 706 in motor vehicle repairing, 252 in hairdressing, and 14 in barbering.

The training program established by the Provincial Advisory Committee for building trades at the request and approval of the Department of Veterans Affairs was in full operation and 403 trainees finished their school training, preliminary to training on the job. In addition to school graduates, many ex-service men with some experience in the building trades were placed in jobs for further training.

There were 12,520 certificates of qualification issued during the year for proficiency in the motor vehicle repair trade. Of these, 616 were issued upon examination, 2,722 were issued without examination to those who satisfied the Provincial Advisory Committee of their ability to continue in the trade as competent mechanics, and 9,182 were renewal certificates. The rehabilitation plan drawn up in co-operation with the federal Departments of Labour and Veterans Affairs was put into effect in May, 1945 and a rehabilitation division established in the Apprenticeship Branch. Large numbers of discharged personnel made use of the division. Many of them attended trade training schools and upon completion of their school training, 997 of them were placed in jobs for further training.

Ontario Regional War Labour Board.—The Board continued its functions in connection with wage control. The power to grant increases in wages was extended toward the end of the fiscal year. In addition, other matters such as pension schemes, vacations with pay, off-shift differentials, hospitalization plans and group insurance were released and returned to the field of collective bargaining. It was anticipated that the movement towards complete removal of wartime wage control would be speeded up and that the final report of the war activities of the Board could be given in the next Annual Report of the provincial Department of Labour.

Bulletin on Australian Meat-Works

A BULLETIN entitled *Australian Meat-Works* outlining some aspects of personnel practices and working conditions existing in the Australian meat industry has been prepared by the Industrial Welfare Division of the Australian Department of Labour and National Service for the purpose of making known the better practices functioning in the industry.

The survey was undertaken amongst nineteen of the major Australian meat-works employing more than half of the industry's 20,000 people.

It stresses, at the outset, the need to reduce the irregularity of employment in this highly seasonable industry. Greater stability in this respect would not only reduce operating expenses and overhead but would be instrumental in creating a stable and efficient labour force whose members could develop settled industrial and social habits, and an interest in the success of the industry to which they belong, the bulletin claims.

Efficient, well integrated employment procedures, records and training and supervisory programs are held highly important in the

development of a sound labour policy. Development of a labour pool of competently trained persons which would operate under conditions of flexible inter-section transfer is suggested as a means of avoiding short-term lay-offs. Existing methods of training manual labourers are mainly haphazard, the bulletin reports, and states that there is a need for the evolution of better methods in the industry.

The establishment of labour-management committees is recommended as a constructive means of developing effective co-operation between management and employees and increasing responsibility on the part of both.

"It is becoming generally accepted that all related aspects of employment and welfare can best be carried out by being brought together in an integrated personnel department which is primarily concerned with the human relations within the organization. In one company controlling meat-works in several States, the importance of a constructive labour policy has resulted in the appointment of a trained personnel officer in each one of its works to advise management on personnel problems and to carry out in detail the personnel policies decided upon."

Physical Working Conditions

The location of a factory should be such as to make it reasonably accessible to workers, but although modern equipment obviates the necessity for the presence of offensive odours it is usually considered that it should be not too close to residential areas.

The bulletin contains a comprehensive account of the importance of lay-out and planning in providing physical surroundings most beneficial to the health and efficiency of employees.

"Experience shows that a determined effort to reduce accidents will succeed if well established methods are used. The prerequisite is that management gives its whole-hearted support and encouragement to the effort. It is also essential that safety work be directed by one man who should rank as a senior member of the staff.

"The available information shows that a fairly high accident rate exists in the meat industry. Precise figures are not available but injury compensation claims paid by insurance companies are relatively high."

Factory hygiene is of particular importance in this industry in relation both to employee health and to quality of production. It has frequently been found that apparent clean-

liness in working areas does not necessarily mean complete freedom from bacterial infections. Work-room cleanliness is generally the responsibility of a foreman, but the means for ensuring it involve a number of factors that need consideration at a higher level. It is recommended that a person of authority, such as the safety officer or the bacteriologist, where there is one, should be made responsible for the setting of a standard of hygiene throughout the factory, whose maintenance will be observed by the foremen and the employees.

The provision of first-aid posts or casualty rooms, with trained persons in charge, capable of giving prompt attention to injuries and illness, is recognized as essential in all industries. A small casualty room is recommended for plants where there are about 100 employees, and when numbers rise over 250 a trained person is usually needed to be in charge of it full time. Particularly where women are employed it is an advantage for this person to be a trained nurse. It is a growing practice in large industries to appoint a part-time medical officer in addition, and to give attention to the general health of all those employed rather than to deal only with casualties as they occur.

The bulletin states that much of the strain formerly associated with meat-works labour has disappeared with the development of mechanical handling methods but there still remain surprising instances where primitive methods persist alongside modern ones.

Where it is possible to install mechanical equipment, such as conveyor systems, to eliminate manual lifting and carrying of weights, this should be done, both to obtain maximum productive efficiency and to limit accident liability. Investigations show that an appreciable percentage of accidents is caused by bad lighting practice, and by lifting and carrying under congested conditions, or with unsuitable footwear. Good supervision as well as good planning is essential if such accidents are to be avoided.

A method sometimes used to reduce fatigue and to cheer flagging spirits is the broadcasting of music.¹ This is not confined to canneries; in some works, exclusively male, boners and slaughter-men work to music. It is of fundamental importance that it should not be overdone. It has been found best to limit the music to quarter- or half-hour periods, not more than 4 or 5 to the working day.

Notes of Current Interest

Minister of Justice reports on maritime conventions

national Labour Conference, held in Seattle June 6-29, 1946.

In accordance with Canadian practice, these conventions and recommendations had been submitted to the Minister of Justice to determine whether they fell within Dominion or Provincial jurisdiction. The Minister had reported that they could be given effect to by the Parliament of Canada or pursuant to authority conferred by Parliament.

Accordingly the Committee of the Privy Council recommended that authenticated copies of the conventions and recommendations be laid before Parliament at its next session, together with a copy of P.C. 4760.

(The Report of the Canadian Government Delegates to the Seattle Conference, containing the texts of these conventions and recommendations, was published as a supplement to the September issue of the LABOUR GAZETTE. The Report on the 29th Session, held in Montreal during September and October, will appear as a supplement to the present issue.)

The text of P.C. 4760 is as follows:

The Committee of the Privy Council have had before them a report dated 14th November, 1946, from the Minister of Justice with reference to the Order in Council (P.C. 507) of March 7, 1939, approving the report of the Minister of Justice, dated February 11, 1939, upon the Draft Conventions and Recommendations adopted by the International Labour Conference at its nineteenth, twentieth, twenty-first, twenty-second, twenty-third and twenty-fourth sessions, in which report the Minister of Justice

advised that the obligation of Canada under the Treaties of Peace in relation to the said Draft Conventions and Recommendations is to bring them before the authority or authorities in Canada within whose competence the enactment of legislation or other action in each case lies.

The Minister observes that at the twenty-eighth session of the International Labour Conference held at Seattle from June 6 to June 29, 1946, the Conference adopted the following Conventions and Recommendations:

Convention (No. 68) concerning food and catering for crews on board ship.

Convention (No. 69) concerning the certification of ships' cooks.

Convention (No. 70) concerning social security for seafarers.

Recommendation (No. 75) concerning agreements relating to the social security of seafarers.

Recommendation (No. 76) concerning medical care for seafarers' dependents.

Convention (No. 71) concerning seafarers' pensions.

Convention (No. 72) concerning the vacation holidays with pay for seafarers.

Convention (No. 73) concerning the medical examination of seafarers.

Convention (No. 74) concerning the certification of able seamen.

Recommendation (No. 77) concerning the organization of training of sea service.

Convention (No. 75) concerning crew accommodation on board ship.

Recommendation (No. 78) concerning the provision to crews by shipowners of bedding, mess utensils and other articles.

Convention (No. 76) concerning wages, hours of work and manning.

The Minister advises that the said Conventions and Recommendations can be given effect to by Parliament or pursuant to authority conferred by Parliament.

The Committee, therefore, on the recommendation of the Minister of Justice, advise that a copy hereof, together with authenticated copies of the said Conventions and Recommendations be laid before Parliament at its next session.

Orders in Council concerning deportation of Japanese declared valid

On December 1, 1946, the Judicial Committee of the Privy Council in Great Britain handed down a decision declaring the Canadian Government Orders in Council of December, 1945, concerning Japanese deportation, to be within the powers of the federal Government in their entirety.

The Privy Council decision upheld the views of a minority of the Supreme Court of Canada, which had declared the Orders in Council valid in full (L.G., April, 1946, p. 429).

The fifth group of approximately 300 repatriates was scheduled to leave on December 23. This was expected to be the last group of voluntary repatriates from Canada, and brings the total up to nearly 4,000.

Activities of Bureau of Technical Personnel

The Bureau of Technical Personnel has reported that for the quarter ending September 30, 1946, the number of new inquiries for the services of technically trained persons was 345, as against 348 in the preceding quarter. During the same period the number of technical persons recorded as being available for employment continued to decline. As a result, at the end of September there were 1,118 vacancies with only 345 technical persons available. The most significant shortages were reported in the following fields: veterinary science, architecture, forestry, civil engineering, mechanical engineering, household science and chemistry.

This continuing shortage, it is stated, is causing many employers to make long-range plans with a view to recruiting for their staffs from the graduate classes of 1947. It is pointed out that this is apart altogether from the survey that has been continuing for several months to ascertain potential openings for some 15,000 professional persons who are expected to graduate from the universities in the years 1947-1951 inclusive.

The Bureau reports that "there is no slackening in the volume of requests for information regarding technical personnel". It is stated that "various government agencies and professional bodies have recently approached the Bureau for assistance in gathering data on groups of engineers or scientists in which they may be interested. Several specific projects are under way in addition to the routine exchange of information . . ."

While the setting of salaries is not a function of the Bureau, it is pointed out that a considerable volume of material which lends itself to statistical analysis has been brought

together in the course of employment operations, both during the period when manpower controls required applications for permits and during the current year. Progress is being made in arranging this material to make it suitable for reference purposes.

Employment and industrial statistics

The accompanying table contains the latest statistics available reflecting industrial conditions in Canada.

Figures are shown for certain months in the current year as compared with the corresponding period in 1945.

Employment and Earnings—Industrial employment showed further important expansion on October 1, according to the monthly report on employment and payrolls issued by the Dominion Bureau of Statistics. Reports from 16,190 establishments indicated combined staffs of 1,820,673 at October 1, an increase of 24,184 workers from the level of the previous month.

The general index of employment (base 1926=100) stood at 177.9 in October as compared with 175.5 in September. Comparative figures for certain previous dates are 168.7 for October, 1945; 183.3 for October, 1944; and 121.7 for October, 1939. The latest index, while lower than the indexes noted at October 1 in 1944, 1943 and 1942, was higher than in any earlier year for which data are available.

Weekly payrolls of eight leading industries rose 2.6 per cent to \$60,326,538 at October 1. The weekly average per employee was \$33.13 at October 1, as compared with \$32.72 at September 1. Per capita figures at the beginning of October in previous years were: 1945, \$32.08; 1944, \$32.36; 1943, \$31.53; 1942, \$29.51 and 1941, \$26.37. The latest figure therefore is the highest in the record of over five years.

By industries, the greatest increase was that of 13,634 workers in logging. Manufacturing, transportation and trade showed considerable improvement, while declines were noted in mining, communications, construction and service. To some extent, these losses were seasonal. An addition of 5,500 workers was reported in manufacturing; in spite of continued losses due directly and indirectly to strikes, the gain in manufacturing was above normal according to the experience of the pre-war period. A pronounced seasonal advance took place in vegetable food processing, but there were also important increases in the textile and textile-using industries. On the other hand, the farmers' strike caused a substantial reduction in animal food factories, and iron and steel plants continued to release employees, also partly as a result of strikes.

Prices—Based on the 1926 average as 100, the general index of wholesale prices was 110.8 in October as compared with 109.1 in Septem-

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

Note.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

ber and 103.6 in October, 1945. The index for vegetable products decreased from 97.4 to 97.1. Due to increases in the wholesale prices for newsprint and shingles the wood products index rose 7.1 points to stand at 133.3 in October. The index for animal products rose from 115.3 to 119.6, due to increases in the prices of fluid milk, canned milk and eggs. The indexes for non-metallic minerals and chemical products advanced respectively 1.2 and 0.3 points. No changes were noted in the indexes for textile products at 98.2, iron products at 128.6, and non-ferrous metals at 89.7. The index of consumers' goods rose from 101.4 to 103.0 and of producers goods from 105.7 to 107.5. The index of Canadian farm products moved 2.3 points, from 110.5 to 112.8.

The cost-of-living index, based on prices in the years 1935 to 1939 as 100, advanced from 126.8 on October 1 to 127.1 on November 1, 1946. The food series moved from 146.5 to 146.6 on small increases for eggs, meats and fish, and fruits. Vegetables averaged slightly lower. The fuel and light index rose from 107.3 to 108.6 as western coal prices moved higher. Clothing increased from 130.2 to 131.1, and home furnishings from 128.8 to 129.2. Rents remained at 113.4 while the miscellaneous index moved from 113.9 to 114.1. The advance in the general index since August, 1939, was 26.1 per cent.

American and Canadian Government labour officials confer in Milwaukee

The International Association of Government Labour Officials of the United States and Canada held its annual meeting at Milwaukee, Wisconsin, from September 30 to October 2. This was the

first Conference since 1943. Representatives were present from a considerable number of the State Labour Departments, from the British Columbia and Quebec Departments of Labour and from the United States Department of Labour and the Department of Labour of Canada.

The IAGLO, which adopted its present name in 1928, began in 1883 as an association of chiefs and officials of Bureaus of Labour of the United States. From 1887 to 1909 an Association of American and Canadian factory inspectors met annually. Joint meetings of the two organizations were held from 1910 to 1913 when they united to form the International Association of Government Officials in Industry.

The International Association of Factory Inspectors met in Toronto in 1896, in Quebec in 1899 and in Montreal in 1903. The International Association of Government Labour

Officials held its annual meeting in Toronto in 1929 and in 1937. It is proposed to meet in Montreal in the near future.

The State and Provincial Departments which are members of the Association pay an annual fee of \$25. The U.S. Department of Labour bears the cost of printing the proceedings. The Secretary-Treasurer is Mrs. Clara M. Beyer, Assistant Director of the Division of Labour Standards, U.S. Department of Labour. Among the other officers elected at Milwaukee are, President, Forrest H. Shuford, Commissioner of Labour of North Carolina; First Vice-President, Mrs. Nellie Kennedy, Director Women's and Children's Division, Labour Department of Kansas; Second Vice-President, Hon. L. D. Currie, Minister of Labour of Nova Scotia.

The Milwaukee conference was devoted to a discussion of post-war labour standards. There were short addresses and general discussion on the standards that should be aimed at in school attendance and child labour laws; in apprenticeship and on-the-job training; for the employment of disabled workers; in employment opportunities and the problems of unemployment of women, including questions of equal pay and hours of work; in providing for safety and health on the job through adequate appropriations for Departments of Labour, through training of factory inspectors and safety codes; and in supervising conditions of migratory workers, particularly agricultural workers who follow the crops from one region to another. There were also interesting papers and helpful discussion on legislation concerning labour relations, on the federal Fair Labour Standards Act applying to establishments producing goods for shipment across State boundaries and on new developments in wage-and-hour laws.

Mrs. Rex Eaton, representing the British Columbia Department of Labour, presided at the session on Women's Employment, Miss Margaret Mackintosh, of the Department of Labour of Canada, summarized briefly the laws governing the hours of women's work, and Mr. J. O'Connell-Maher, Associate Deputy Minister of Labour of Quebec, described the Quebec legislation regulating collective agreements, wages and hours. Mr. C. Miron, Conciliation Officer of the Quebec Department was also present.

At the banquet, where the members of the Association were guests of the Industrial Commission of Wisconsin, Mr. J. W. Gibson, Assistant Secretary of Labour of the United States, spoke on the means and value of co-operation between the Federal and State Governments in improving labour conditions and Professor E. E. Witte of the University

of Wisconsin gave a very thoughtful and inspiring address on the future of labour legislation.

Career of John Moffat linked with N.S. Trade Union Movement Mr. John Moffat, Correspondent for the *LABOUR GAZETTE* in Cape Breton from 1902-1932, and for many years prominent in the coal miners' union in Nova Scotia, died in Glace Bay on November 12. In recent years he had been fire inspector for the Dominion Coal Company in Cape Breton and later was employed in the Company's Safety Department.

Born in 1864 in Ayrshire, Scotland, Mr. Moffat came to Cape Breton in 1883 just before the end of the 13-months-long strike of the miners at Lingan. Joining the Provincial Workmen's Association of Nova Scotia, formed by the coal miners in 1879 (see p. 1692) Mr. Moffat became in 1898 its Grand Secretary, succeeding the Honourable Robert Drummond who had held the post since 1879. Mr. Drummond, editor of the *Maritime Mining Record*, became a member of the Legislative Council of Nova Scotia.

Some twenty years ago, Mr. Moffat made available to the Department of Labour of Canada and so to all students of the Canadian labour movement, the Minutes of the Proceedings of the P.W.A., 1879-1917, and other documents.

The conflict between the P.W.A. and the United Mine Workers of America, which entered Nova Scotia about 1908 and gradually extended its membership, ended in 1917 when the P.W.A. agreed to amalgamate with the United Mine Workers of America to form the Amalgamated Mine Workers of Nova Scotia. In Mr. Moffat's valedictory to the P.W.A. members he showed a breadth of vision and lack of self interest which had stood the miners in good stead for 19 years:

The time has come to put an end to all internal strife, and fuse our forces for concentrated effort in the great work that lies before the miners of Canada. To us as members of a most successful labour organization the call of our country has come, bidding us fall into line, close up our ranks and join forces with our brothers for the common good of all. . . . Believing it to be in the best interests of the workmen whom we represent, and of our beloved country, we have decided to carry out the wishes of the Royal Commission, which met in Glace Bay early in May, and issued an appeal to all mine workers to unite in one union, and bury the differences of the past. We trust that time will prove that the Commission were wise in their counsel and that the expected results will be fully realized. . . .

It is interesting to note Mr. Moffat's statement on the achievements of the P.W.A.—

The P.W.A. has made the position of the workmen at the collieries more comfortable. Conditions underground in the way of good

ventilation and good methods of mining have been much improved. The workmen are not subject to the whims and caprices of every petty boss, as they were before the union was formed. Men are not discharged for simply asking for their rights, as was too frequently the case in ante-union days. Employers manifest no objection to conferring with committees over alleged grievances and instead of "spotting" them for acting on the committee, they welcome them and discuss matters freely with them. The social condition of miners has been raised. The very spirit of independence the P.W.A. has fostered has conduced to imparting to its members a better tone and a desire to improve their condition. With a desire to be respected, came the necessary effort to command respect; and a real determination to seek after material, social and moral improvement and advancement. In short, the Association has secured for its members and for workmen generally at the coal mines, better legislation, better wages and fairer treatment from employers, and greater respect from the public at large.

The life of the miner has been entirely changed since pre-union days. His work, while at all times hard, is not as laborious as it was thirty years ago. When we look back to the time that coal was riddled in the pit, and every pound of it had to be mined and sheared by hand; when we remember the winter reductions imposed for coal banked in the heaps and the scarcity of employment under those conditions, we get a new view of the coal industry, and the conditions under which the miner worked. The success of the industry has been largely due to the co-operation of the workman with the employer, and while every inch of the ground has been contested in trying to obtain fair wages and good working conditions, the rights of the operators to fair profits have been freely conceded by the P.W.A. The coal industry of this Province will continue to be just what the workmen through their unions make it. If common sense co-operation is given, the industry will continue to be a success. If stubborn and unbending methods are to be used and grudging service only rendered, then there can be neither peace nor prosperity, much less progress, under such unyielding attitude.

On the policy of "no contract, no work," the following comment is made:

The practice of suspending work pending the drawing up of an agreement was one of the strongest reasons of the P.W.A. against becoming connected with the United Mine Workers of America. The United Mine Workers themselves, following the example of the P.W.A., gave up this practice two years ago, and advised their members to remain at work while negotiations towards an agreement were being made.

Chamber of Commerce resolution on labour relations The Canadian Chamber of Commerce held its 17th annual meeting in Winnipeg during October. Among the many items of business dealt with was a resolution, drafted by the Chamber's Labour Relations Committee and adopted by the Convention, which stated the organization's policy on labour relations.

The resolution declared that the principle of collective bargaining was just and equit-

able, subject to the condition that where an agreement is reached, both parties must be equally responsible for observance of its terms. It also endorsed a recommendation of the committee "that a secret and properly supervised ballot amongst all employees of a bargaining unit who would be affected by strike action, as provided in a recent order in council (L.G., Sept., 1946, p. 1187) would be in the best interest of employer, employee, and the committee as a whole."

Community Planning Association of Canada

The Community Planning Association of Canada is an organization initiated by a number of public-spirited citizens interested in community welfare, "to

foster public understanding of, and participation in, community planning in Canada". It is a wholly autonomous association, holding letters patent under the Canada Companies Act.

With a view to determining the extent of the public interest, a conference was held in Ottawa in June, 1946, under the auspices of the Central Mortgage and Housing Corporation (L.G., July 1946, p. 1000). While the conference was sponsored by a government agency and many of the delegates who attended were officials of the Dominion and Provincial governments, the control and direction of the Association was, and is, in the hands of interested private citizens.

The membership is available to individuals as active members at \$3 per year and to larger groups requiring informational material in bulk as sustaining members at \$25 per year. The only other requirement for membership is "an unselfish interest in the object of the Association". The management of the Association is in the hands of a Council of 13 active members and an Executive Committee consisting of a President, Vice-President and one other Councillor, elected by the Council. Mr. R. E. G. Davis, Executive Director of the Canadian Welfare Council and Mr. John M. Kitchen of the National Capital Planning Office are the provisional President and Vice-President, respectively, and Mr. N. B. MacRostie, civil engineer, is the third member of the Executive. The Association's Secretary-Treasurer is Mr. Alan H. Armstrong, Room 414, 56 Lyon Street, Ottawa.

Provision has been made for electing 12 of the 13 Councillors by the membership; up to nine of these, by provincial divisions of the Association and the others by the membership at large. The other Councillor will be appointed by the Central Mortgage and Housing Corporation, as it is the agency responsible to the people of Canada for the

encouragement and study of community planning. The present provisional Council is made up of architects, engineers, provincial and municipal officials, representatives of welfare agencies, trades unions, contractors, etc. It is expected that permanent officers will be elected formally at a meeting of the Association next year.

Credit Union National Association sets up office in Canada

Late in October the Credit Union National Association, Inc. (CUNA), opened a Canadian Branch office at Hamilton, Ontario, with Mr. Gordon Smith in charge. Mr. Smith was formerly a paymaster employed by the city of Hamilton and for many years has taken an active part in organizing credit unions in Ontario. He was the first President of the Ontario Credit Union League and for the past four years has been a chief agent of the CUNA Mutual Insurance Society, which is licensed to carry on the business of life insurance in Canada.

The credit union movement in North America had its origin at Levis, Quebec, in 1900. Since that date, some 2,300 new Canadian credit unions have been formed, with about 600,000 members and assets in excess of \$100,000,000. There are more than 9,000 credit unions in the United States having a total membership of approximately 3,000,000 and total assets of roughly \$398,000,000.

In Canada, the most notable expansion has taken place in the Province of Quebec where there are now in the neighbourhood of 1,000 credit unions. But substantial progress has also been made in the other provinces, especially in the Maritimes, Ontario and portions of the Prairie region.

Credit unions are associations of people having a common bond (community, church, industry, etc.) who organize in groups for the practising of thrift by regular savings of small amounts of money. With the accumulated savings, the credit union makes loans to its members for provident or productive purposes. At the end of each year, the income, after operating expenses and provision for bad loans are met, is divided among the members in the form of dividends on savings and patronage refunds of interest charged. Control is vested in the membership who have one vote each regardless of their savings. Management is by a five-man Board of Directors. Loans must be approved by a credit committee of three and auditing is provided by the supervisory committee, who check the records at least monthly.

Individual members are trained in handling their own resources for the mutual benefit of

all members. Agencies have been created for the bonding of officers, providing group and individual life insurance and to supply necessary printed forms and other office materials.

Departments of the provincial and state governments issue charters and inspect the affairs of each credit union annually. In those communities where more than one union has been established, they are organized in chapters for the exchange of ideas and operating practices. Provincial and state leagues are created to take care of legislative problems, handle supplies and literature and to maintain a central credit union to accept surplus funds for investment, or for loans to member credit unions when the need arises. At present, 51 provincial and state leagues form CUNA with headquarters at Madison, Wisconsin.

**Report on
labour
legislation
in 1945**

The report on "Labour Legislation in Canada" covering the year 1945 is now available. Containing the text or a summary of the labour laws enacted last year by the Parliament of Canada, the Provincial Legislatures and the Council of the Yukon, this report, published in booklet form, is the seventh supplement to "Labour Legislation in Canada, 1937".

The summary includes data concerning international labour conventions, employment of children, trade unions and collective bargaining, wages and hours of labour, workmen's compensation, safety and health, vocational education and apprenticeship, licensing of workmen, seamen, unemployment, family allowances, pensions and mothers' allowances, housing, and post-war reconstruction and veterans affairs.

**Pamphlet
on safety
in building**

"Safety in Building", a printed pamphlet of 32 pages, has been published recently by the Department of Labour. It contains the text of the Convention and four Recommendations concerning safety in the building industry which were approved by the International Labour Conference in 1937. The subjects covered include provisions for inspection, safety equipment and first-aid, co-operation in accident prevention, and vocational education, as well as the construction of scaffolds of different kinds, working platforms, gangways, runs and stairways, the construction and maintenance of hoisting appliances, ladders, the fencing of openings, roof work and others.

The same material was issued in January, 1946, in mimeographed form. By resolution of the National Joint Conference Board of the Construction Industry on June 4, 1946,

the Department was requested to print the decisions of the International Labour Conference concerning safety in the building industry. The Joint Board asked, however, that metric measurements should be converted into their Canadian equivalents, with some modification in order to conform with Canadian commercial usage.

Copies in French or English are obtainable at ten cents each from the Legislation Branch, Department of Labour, Ottawa.

**Canada Year
Book, 1946
available for
distribution**

The 1946 edition of the *Canada Year Book*, published by authorization of Hon. James A. MacKinnon, Minister of Trade and Commerce and prepared by the Dominion Bureau of Statistics, was issued at the end of November.

It is a volume of 1,224 pages and in addition to valuable reference material on Canadian resources, industry, trade and finance it contains numerous special articles, among them being two which have reference to wartime accomplishments, data for which were not previously available. These are: "The Relation of Hydrography to Navigation and the War Record of the Hydrographic and Map Service" and the "British Commonwealth Air Training Plan."

Among the articles dealing with the transition from war to peace are the following: Canadian Agriculture During the Transition Period; The Outlook for the Mineral Industry in Relation to the Economic Development of Canada; and the Report of the Royal Commission on Co-operatives.

Because of public interest in articles published in former editions of the *Canada Year Book*, the policy of reprinting such articles as are of continuing value has been approved and in future a number of these will be available each year.

Other new features of the edition of 1946 are: (1) a section explaining the Vocational Training Organization, included in the chapter on Labour; (2) a new chapter on National Defence; (3) a summary of discharge gratuities and rehabilitation allowances, together with a short synopsis of the pension system, war veterans' allowances and other post-war legislation of the Federal Government; (4) a digest of Canada's part in the United Nations Food and Agriculture Organization (FAO). The edition also contains a number of additional maps and charts.

Cloth bound copies may be obtained from the King's Printer, Ottawa, at \$2 per copy. This merely covers the cost of paper, press work and binding. A limited number of paper-bound copies have been set aside for

ministers of religion, bona fide students and school teachers, who may obtain such copies at the nominal price of \$1 per copy. Application for paper-bound copies must be forwarded with remittance to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

**Brochure
on housing
in Canada**

the publication will be issued quarterly and will make available current factual information "designed to afford as complete a picture of the housing situation as possible".

The first number presents a factual summary of population trends and residential construction during the inter-war years. Statistical details are presented on an annual basis for the years 1919 to 1946 and on a monthly basis for 1945 and 1946. Information is included on many phases of the housing problem, including publicly-assisted house-building; real estate lending and loans for building purposes; building materials; building labour; building costs; rents and cost of living; and operations under the Wartime Housing Act and other legislation.

**Catalogue of
vocational
guidance
materials**

refined to published materials that refer especially to Canadian conditions, inasmuch as much vocational guidance data compiled in other countries requires considerable adaptation to make them applicable to the situation in Canada. It is asserted that "the volume of guidance materials published in Canada has become very considerable in the last few years and in no other place is as comprehensive and helpful a listing of it available". The price of the catalogue is 25 cents per copy, with special rates for orders in quantity. It may be obtained from the Canadian Council of Education for Citizenship, 166 Marlborough Avenue, Ottawa.

**United Kingdom
amends fair
wage policy
for government
contracts**

inserted in Government contracts whether for construction or for equipment and supplies.

The first issue of *Housing in Canada* has been published by the Central Mortgage and Housing Corporation. Commencing in 1947

The Fair Wages Resolution originally adopted in 1891 was passed in its recent form by the House of Commons in 1909. Proposals for amendments were made from time to time, and in 1937 the Minister of Labour appointed a Committee representing Government departments, trade unions and employers' organizations to advise concerning desirable changes. The Committee had not finished its work when war came.

In 1942, after further discussions between the Government, the British Employers' Confederation and the Trades Union Congress, agreement was reached on the draft of a new Resolution. A statement of its intention to submit to Parliament the draft Resolution, unless amendments were mutually agreed to in the meantime, was issued by the Government in November, 1942, but as the Conditions of Employment and National Arbitration Order, 1940, applied during the war to wages and conditions in Government contract establishments, it was not considered necessary to do this until after the lapse of the Order. It was considered desirable, too, to have further experience of the administration of the Order, one section of which required the observance by all employers of rates of wages, hours and conditions of employment not less favourable than those established for the trade or industry by agreement between employers and trade unions.

The principal changes made by the Resolution as adopted by the House were summarized in the *Ministry of Labour Gazette*, in November, 1942, as follows:

(1) The standard of fair wages will no longer be solely the practice of "good employers" in the district. The employer will be required to observe such conditions as have been established for the trade or industry in the district by representative joint machinery of negotiation or by arbitration.

(2) The new Resolution specifically requires the contractor to observe "fair" conditions of labour as well as "fair" wages and to apply them to all persons employed by him in every factory, workshop or place where the contract is being executed. Contracting Departments will require an assurance from a new contractor that to the best of his knowledge and belief he has complied with the general conditions of the Resolution for at least the previous three months.

(3) Under the old Resolution the Minister of the Contracting Department had, if called upon, to decide whether or not fair wages were being paid. Under the new Resolution any such questions will be reported to the Ministry of Labour and National Service and,

if not disposed of by negotiation, will be referred to an independent tribunal.

(4) The contractor shall recognize the freedom of his workpeople to be members of Trade Unions.

British Health Services Act receives royal assent

Providing for a comprehensive health service open to everyone in the United Kingdom without limitation, the National Health Services Act received royal assent on November 6. The Act does not differ in any major respect from the bill as originally introduced (L.G., April, 1946, p. 437).

Closed shop outlawed in three states in U.S.A.

Constitutional amendments banning the closed shop were adopted, during the November elections in the United States, in Arizona, Nebraska and South Dakota.

In addition Massachusetts voters approved a proposal requiring labour unions to issue public financial statements at regular intervals, and in California a proposal for a Fair Employment Practice Act was rejected. State constitutional amendments forbidding the requirement of union membership as a condition of employment were adopted by Florida and Arkansas in 1944. The Arkansas measure failed to receive legislative support and has not been implemented. The Florida amendment, while finalized by enabling legislation, is at present being challenged in the lower courts and its ultimate disposition may await review by the United States Supreme Court.

The New York *Times* recently reported that a federal measure to outlaw the closed shop is being readied by some Senators for presentation to the new Congress when it convenes.

Union discharge request under closed shop agreement

In a recent decision, the United States Labour Relations Board described some of the conditions which should govern the dismissal of employees when requested by a union with a closed shop agreement. The question arose over the dismissal by the Colgate-Palmolive-Peet Company of 37 employees who were accused by the certified CIO union of engaging in activity on behalf of an AFL union that was campaigning among the employees at the time.

The Board decided that the company had violated the Wagner Act in acceding to the discharge request of the union.

It contended that the dismissal represented a violation in view of the fact, of which the management was aware, that the employees in question had been previously refused per-

mission to withdraw from the union. This was held to be evidence that the union demand was not based on proper grounds. In this case the dual-union activities were found permissible, since the closed shop agreement was of indefinite duration and had been in effect about a year, thus not serving as a bar to an election.

Standards which an employer is obligated to apply to determine whether he is justified in acceding to union requests for discharge under a closed shop, have been held by the board to include the time the agreement has run and how much knowledge the employer possesses of the facts in the case.

Ban on jurisdictional work stoppages

The Metal Trades Department of the American Federation of Labour has announced the establishment of a procedure for eliminating work stoppages due to jurisdictional disputes among its affiliated unions, and the consummation of an agreement with the Building and Constructive Trades Department defining more clearly the respective areas of jurisdiction in the manufacture of prefabricated housing.

Contained in the procedure were the following stages of negotiation to be pursued in resolving a jurisdictional dispute.

1. Local officials of unions involved must meet and make a serious attempt to agree.
2. If that fails, presidents of the international unions must designate representatives to meet and attempt to determine the dispute.
3. The next step provides that International Presidents shall personally meet on the questions involved.
4. In the event of inability to resolve the dispute during the latter three stages, provision is made for the dispositions of the issues in dispute by an impartial umpire whose rulings are to be binding on the parties.

The agreement with the Constructive Trades Department of the Federation, it was reported, granted jurisdiction of assemblage of prefabricated housing units to the Building Trade locals. Kitchen and bathroom units, the agreement concluded, were within the Building Trades jurisdiction irrespective of whether they were put together in factories or in buildings which were to be dwellings.

Penalty strike clause in a United States collective agreement

The November 16th issue of *Business Week* reports the signing of a precedent-making collective agreement by a local of the United Steelworkers of America (CIO) and the Murray Co. of Dallas Texas. The company, engaged principally in the production of cotton-mill ma-

chinery, employs about 320 workers; 150 of these are represented, for bargaining purposes, by the International Association of Machinists (AFL) and the remainder by the CIO union.

The precedent established by the contract is its mutual-responsibility clause which provides for financial compensation for losses incurred by either party as a result of a strike, work-stoppage, or lockout of any description which are contractually forbidden during the life of the agreement. Should a violation of this article occur either party is specifically entitled to demand a hearing before arbitration to determine the immediate responsibility for the cessation of work and to assess fair and reasonable damages against the culpable party or parties. Arbitration findings are to be final and binding.

Only the local can be found responsible under the article and then only if it sanctions the stoppage or it is participated in by a majority of the union's members employed by the company. "In no event shall the arbitration make a finding of responsibility and assessment of damages against the international union."

The article states that any inclination to regard the contract as the first step towards a general pattern must be conditioned by the special circumstances which obtained in the situation. It further states that management security was ceded to the Murray Co. by the local union because of a weak bargaining position; because principal production, which is seasonal, was over for the year; and as a result of the jurisdictional opposition of the functioning AFL union in the plant.

Social security provisions were continued from a previous contract in the form of maintenance-of-membership and check-off of union dues. "Reasoning was that maintenance-of-membership and the check-off would be necessary if the union should be called upon to enforce its responsibility to management by disciplining contract-breakers."

Changes in status of soft-coal miners in U.S.

The United States Bureau of Labour Statistics has published a report on the change that has occurred in the status of bituminous-coal miners in the United States from 1937 to 1946.

Although only two advances in general wage rates occurred after 1937 (1941 and 1946), each averaging 17 per cent, average earnings and hours of work increased considerably more. Important supplemental gains were also achieved through the institution of paid vacations, pay for travel time in mines at established rates, and improved standards of safety, health, and welfare. Increased hourly

earnings caused a relatively small increase in wages per ton because of the rise in the output of coal per hour.

The workers suffered from part-time employment and relatively low weekly earnings between the two World Wars due to a decline in the relative importance of coal, the bulletin states; important wage rate gains which were made in 1932 were nullified by the depressed average earnings as a result of part-time operation of the mines, averaging less than 200 days per year.

As an indication of the increases in general wage rates for the industry as a whole up to 1941, the bulletin compares pertinent statistics for the years 1936 and 1940 which showed a marked degree of similarity in employment and production. Average hourly earnings rose from 79.4 cents in 1936 to 88.3 cents in 1940, an increase of 11.2 per cent. In 1941 a general 17 per cent basic rate increase was gained in the industry.

The increase in productivity which occurred during the recent war was one of the period's outstanding industrial achievements, the bulletin states. Production increased from 394,855,325 tons in 1939 to 576 millions in 1945, an increase of about 43 per cent, while the average number of wage earners declined from 371,000 to 322,000 during the same period, a decrease of about 13 per cent. The cause was attributed partly to a lengthened work-week and partly to a rise in man-hour productivity. Excluding minor wage-rate adjustments the 1941 increase was the only general change made in wages during the recent war period.

Between 1938 and 1945 output per man-hour rose 29 per cent. The amount of wages per ton rose about 22 per cent. The bulletin points out also that the value of coal per ton at the mines increased by 58 per cent.

The bulletin states that a general improvement in the efficiency of production is to be expected. A greater intensity of work occasioned by the return of the normal work-week, removal of overtime premiums as well as a rise in man-hour output, replacement of worn equipment and possible elimination of some high-cost mines, were given as some of the outstanding factors which will probably contribute to rising productivity.

Average weekly earnings which rose from \$23.88 in 1939 to \$54.84 in 1945 were increased by 17 per cent in March of this year as a result of an agreement signed by the United Mine Workers (AFL) and the Government which provided for a basic hourly increase of 18.5 cents. Operation of the mines was taken over by the Government during

the strike which followed unsuccessful negotiation of a new agreement by the Union and the mine operators (L.G., June, p. 721).

Assuming a continuation of working time and other conditions affecting earnings, the bulletin estimates, that this new agreement will provide weekly earnings averaging about \$66.50. In regard to future opportunities for employment and earnings in coal mining, a lot will depend upon the success of coal in competing with other fuels, the course of labour productivity and the general level of business activity. The report contends that "substantially constant levels of production, increases in average man-hour output, will entail displacement of labour." However, increased efficiency in production may possibly enlarge the demand by permitting price reductions and thus expanding, or at least checking the decline in, production.

**Wartime
premium pay
for foremen
in U.S.A.**

An article in the November 16th issue of *Business Week* reports that a United States federal court in Detroit has awarded a group of 478 foremen \$355,000 for work performed between the beginning of 1941 and August 1, 1945, in plants of the Continental Motors Corporation. The decision was based on a ruling under the Fair Labour Standards Act that a foreman on straight time who spent more than 20 per cent of his time doing the work performed by the men he supervised was entitled to overtime pay. The report pointed out that many foremen during the war years were in this category and are now being urged by the Foremen's Association of America to file claims for wartime overtime pay. The Continental Motors Corporation ruling has been followed by suits filed in Detroit against the Bohn Aluminum and Brass Corporation, Ex-Cell-O Corporation, Hudson Motor Car Company, Republic Aircraft Products Company, and Westinghouse Electric and Manufacturing Company.

**Settlement
of disputes
over wage
incentive plans
in U.S.A.**

An article in the November 23 issue of *Business Week* describes the work of the Technical Service Branch of the United States Conciliation Service in helping to settle disputes relating to wage incentive systems.

The services of the branch are available to management and unions on questions of wage incentives and intra-plant inequities.

For instance, there may be a dispute over a work-load, with the employee complaining that he cannot, at normal speed, produce the

number of pieces required for him to earn what it may have been agreed would be a fair wage. By studying the worker on the job and making the necessary allowances for variable factors, the investigator will determine the number of pieces that normally should be produced in a specified time. Adjustments to be made, if any, are then determined by the disputants, using the facts presented.

The technical service treats its reports as confidential. They are not permitted to be used either as arbitration awards or for the setting of industry-wide standards.

Figures on the extent of **Group insurance coverage in U.S.** employees' group life, illness and accident insurance in private insurance companies, in the United States, were released recently by the Life Insurance Association of America.

The figures showed that at the end of 1945 over 5,920,000 persons carried group accident and health insurance providing for an average weekly benefit of about \$17 for wage loss during disability; group hospital insurance covered over 7,800,000 employees and their families; and group life insurance, the most widespread type of group coverage, was in effect for nearly 11,400,000 with insurance totalling \$22,426,725,000.

Group annuities supplementary to the retirement provision of the Government Social Security Act, were in force for 1,275,566 persons.

**Veterans'
seniority
in U.S.A.**

The Justice Department of the United States has declared for company-wide interpretation of the "like-seniority" clause in the country's veterans' rehabilitation regulations. The regulations hold that upon return to his job the veteran must be granted the seniority status, or its equivalent, that he held when he left to enter the forces. In the case of multi-plant companies, the Department's opinion held that, the veteran, previous to his joining the service, was an employee of the company and not of any particular plant and in consequence, "like seniority made reinstatement obligatory, even when the plant or agency has been abolished during the period of the veteran's absence." The opinion held that, "the company should reinstate the veteran anywhere he can be placed in a job of like status and pay plus his accrued seniority from the date he was first employed."

Calendar Reform Bill in U.S. Congress A Bill introduced in the House of Representatives of the United States last July, focuses attention on the age-old question of reforming the calendar. The Bill is designed to give official sanction to improving the calendar "by making it perpetual, by equalizing the quarters of the year, and fixing holidays."

The preamble of the Bill outlines the history of calendar reform from the adoption of the sun calendar by the ancient Egyptians to the present time, pointing out that "despite the tremendous advances of scientific knowledge since the Middle Ages," the so-called Gregorian calendar, ratified in 1582, "is still in general use by most nations".

Reference is made to the extensive study and research carried out by the World Calendar Association as well as by many other experts on time measurements and standards. As a result, states the Bill, "public and private opinion in the United States and the other nations of the world. . . now demand governmental action to revise the calendar in such a way that, retaining astronomical accuracy, it will be mathematically and otherwise scientifically correct" It is also stated that "transportation companies, communications, advertising, public and private statisticians, accountants, economists, manufacturers, labour, financial institutions, heads of educational, scientific, social and fraternal organizations" in many nations have gone on record as favouring specifically the adoption of the "World Calendar".

The Bill, therefore, would give authority to the President of the United States "to take appropriate administrative action within a reasonable time prior to January 1, 1950, to facilitate the change by the Government and by the public. . . ." It also authorizes him to promote the adoption of the World Calendar by other countries, through the United Nations or other international bodies to become effective January 1, 1950.

Agreement in road transport in South Africa An interesting example of an agreement under the South African Industrial Conciliation Act, 1937, is one for the road passenger transport industry in the magisterial district of Port Elizabeth.

Under the Act, where an organized industry, by agreement, provides machinery for settling disputes and determining working conditions through an industrial council, the collective agreement may be legalized as between the parties at their request and, as under the

Quebec Collective Agreement Act, may be made binding also on other employers and employees in the industry. A summary of the legislation regulating industrial relations in South Africa appeared in the LABOUR GAZETTE for July, 1938, (pp. 755-762).

The agreement for the road passenger transport industry was entered into by the Port Elizabeth Electric Tramway Company Limited, and the Port Elizabeth Tramway and Bus Workers' Union, the parties to the Industrial Council for the industry. It is to be binding on the parties for two years from March 18, 1946, and also upon other employers and employees in the industry in the district. The Council is responsible for its administration and empowered to grant exemption from any of its provisions.

Expenses of the Council are to be met by a deduction from weekly wages of twopence where workers receive less than £2, and of fourpence where workers earn £2 or more. To this deduction the employer must add an equal amount.

The agreement covers minimum wages, hours of work, spreadover, overtime rates, annual and public holiday provisions, uniforms and so forth.

The minimum rates for drivers, conductors, and other classes of employees apply to a maximum work-week of 48 hours and six days. Minimum hourly rates are also set for semi-skilled and unskilled labourers, depending on the operation performed, and for casual labourers who are defined as those engaged for not more than four days in a week. An additional cost-of-living allowance, graded with respect to wages received, is also provided for.

In the case of a rotation of shifts over two or more weeks, the average number of hours worked per week must be calculated. If less than 48, the worker is to be regarded for purposes of payment as working 48 hours; if more than 48, he must be paid for such excess hours at time and one-half.

All drivers and conductors must complete their day's work within a spreadover of 12 hours in a day from Sunday to Thursday, and within 13 hours on Friday and Saturday.

Overtime rates after 48 hours in a week are set at one and one-half times the ordinary hourly rate. A driver or conductor whose hours exceed $8\frac{1}{2}$ in any day from Sundays to Thursdays or 9 hours on Fridays or Saturdays must be paid time and one-half for extra time. When overtime calculated on a daily basis differs from overtime calculated on a weekly basis the higher remuneration must be paid.

For each hour or part of an hour worked on an employee's "day off" he is entitled to twice his hourly rate with a minimum of eight hours' pay. The same rate of payment must be made for work done on four statutory public holidays. All employees not working on such public holidays are to receive eight hours' pay at their ordinary rate for each such day.

Every employee must be granted an annual holiday on full pay after 12 months' service with the same employer. The scale of paid holidays is as follows: After 14 years' service, 18 working days; after 9 years, 16 days; after 6 years, 14 days; for 6 years' service and under, 12 days.

Where uniforms are required to be worn, a free uniform must be supplied every nine months, and a free overcoat every three years.

Not less than a week's notice of intention to terminate the contract of service must be given by either an employer or an employee.

Except for temporary employees hired to meet seasonal or other conditions, no employee may be engaged who is not a member of a trade union after a six-months' probationary period during which time his fitness or otherwise is to be determined.

Wage stabilization in Netherlands

reports that the Dutch Government has pre-

The November issue of the *Commercial Intelligence Journal*, published by the Dominion Department of Trade and Commerce

pared a plan to stabilize wages in order to ensure the competitive position of the country's exports in the world market.

This program is part of a general scheme to increase the availability and saleability of goods for export which are necessary to pay for imports essential to the country's reconversion. It will be instituted concomitantly with a drive to increase the nation's productive capacity.

To further assure competitive market prices, profit margins in certain branches of industry are being reduced, the report states.

Although no wage increase may be granted until the transition to full peacetime levels of production is effected, the Government has declared that the wage control order does not preclude the payment of higher wages commensurate with higher labour productivity.

The article states that the Dutch Government, realizing the undue hardship that may devolve upon certain people from the freezing of wages, has proposed legislation to ease the affects upon families with young children.

This bill is to provide special allowances, now granted for the third and subsequent children, to the first two. There is also a new law governing consumers' credits. This, it is expected, will enable the lower income groups to acquire essential goods. The law will become effective shortly and allow the government to grant credits which are to be repaid in small weekly instalments, depending on the amount of the worker's wages and the size of his family.

Charters of Our Freedom

"Charters of our Freedom" is the title of a well-timed book published by Ginn and Company late in November. Freedom, especially in relation to government and law, has long held a central place in the thought and lives of men and nations, and because many peoples almost lost it during the two world wars, it is being debated more earnestly than ever.

As the title suggests, the book brings together the principal documents that supplied the basic materials upon which the Canadian system of democratic government was built. Beginning with Magna Charta and ending with the Atlantic Charter, the author traces the successive steps by which our freedom has been achieved, emphasizing the great movements, but so linking them together by concise narrative that the unity of the whole is unmistakable, even though the events treated cover a period of more than 700 years.

The method of treating the subject is of especial value to all students of our governmental institutions, including workers' and adult education groups. Taking each of the historical charters and acts in turn, the author discusses their origins and implications and

then gives lengthy transcriptions from the documents themselves. In this way the reader is led step by step from one great issue to the next: Magna Charta, the Bill of Rights, Ordinances of Virginia, the Mayflower Compact, Lord Durham's Report, the British North America Act, the Statute of Westminster, the Declaration of Commonwealth Prime Ministers and the Atlantic Charter. The Canadian Council of Education for Citizenship collaborated in the preparation of the book and has endorsed it fully.

The author, Dr. R. G. Trotter is one of Canada's best-known historians and constitutional authorities. Since 1934 he has been head of the Department of History at Queen's University. He is a Fellow of the Royal Historical Society and a member of the Canada-United States Committee on Education. In 1945 he went as a Canadian delegate to the British Commonwealth Relations Conference in London. His long experience as a student and teacher of history, qualifies him to write with authority concerning the great landmarks in the evolution of Canadian civil and political freedom.

Termination of Wartime Wage and Salary Control in Canada

Announcement Made by Prime Minister

ON November 29 the Prime Minister, Rt. Hon. W. L. Mackenzie King, announced that effective midnight, November 30, wartime controls over wages and salaries, which had been instituted on December 9, 1943, were to be removed and their determination returned to the processes of collective bargaining. The removal was subject to the exception that applications and appeals for wage and salary increases pending before Regional and National War Labour Boards on November 30 would be heard and expeditiously disposed of.

In making the announcement, the Prime Minister stated: "The stabilization of wages and salaries was an essential element in the wartime anti-inflation program of the government, which included the establishment of the price ceiling, heavy taxation of the incomes of individuals and corporations and intensive Victory Loan and war savings campaigns. By what it accomplished to prevent inflation the government kept down the monetary cost of the war effort, and distributed the burden more equitably among all the people of Canada.

"Since the close of hostilities, the battle against inflation has been continued with unabated vigour. Wartime methods were, however, too rigid for the period of transition, when the objective was no longer the reduction, but once more, the expansion of normal peacetime production. To that end, it has been the policy of the government to remove wartime controls as rapidly as the need for them disappeared. With the gradual increase in production, the need for limitations on the expansion of purchasing power has decreased. Certain inevitable increases in costs made some increases in prices unavoidable. The pressure for wage adjustments has grown. It was only a matter of time until there would no longer be a need for wage and salary control in the battle against inflation. The government believes that time has now arrived.

"The removal of wage and salary control involves no change in the government's policy respecting price control and the control of rentals. It is the policy of the government to maintain these controls as long as they may be required to protect the people from a sudden and drastic rise in the cost of living. The experience of other countries has increased the determination to see that the removal of controls shall take place in a gradual and orderly

manner so as to protect the standard of living and the value of the war savings of the people."

Mr. King added: "On this occasion, the government desires publicly to record its appreciation of the services rendered to Canada by past and present members of the National and Regional War Labour Boards. The Boards themselves were representative of labour, management and the community. Notwithstanding their differing points of view the vast majority of the decisions were unanimous. Such unanimity bodes well for the future of employer-employee relationships when entrusted to men of good-will representative of all three partners in industry."

Mr. King concluded his statement by expressing warm appreciation of the administration of the Salary Control.

Text of Order in Council P.C. 4904

The text of Order in Council P.C. 4904 which revokes the relevant section of the Wartime Wages Control Order follows below:

Whereas it is considered advisable to terminate the existing controls which are contained in the Wartime Wages Control Order, 1943, established by Order in Council P.C. 9384 of December 9, 1943, as amended, by revoking the relevant provisions of the said Order while, at the same time, making provision for the disposition of applications presently pending before War Labour Boards;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Acting Minister of Labour and under the authority of The National Emergency Transitional Powers Act, 1945, is pleased to order as follows:

ORDER

1. Subject to this Order, Part II of the Wartime Wages Control Order, 1943, established by Order in Council P.C. 9384 of December 9, 1943, as amended, is hereby revoked.

2. Where, at the date this Order comes into force, any application or appeal is pending before a War Labour Board under the Wartime Wages Control Order, 1943, the said Board shall have authority to continue all proceedings pursuant to such application or appeal, and Part II of the Wartime Wages Control Order, 1943, shall continue in full force and effect in relation to the employer in respect of the occupational classifications of employees with regard to whom such application or appeal was made, and the Board may make such order or give such direction pursuant to such application or appeal as it might have made while the said Part II continued in full force and effect prior to the date of the coming into force of this Order.

3. Where the Board makes any order or gives any direction pursuant to section two of this Order, Part II of the Wartime Wages Control Order, 1943, shall be deemed to have been revoked in respect of the employer in relation to the occupational classification of

employees with regard to whom the said order or direction is made on the day following the day on which such order or direction is made.

4. This Order shall come into force on the first day of December, 1946.

Removal of Price Control in U.S.A.

ALL Government control in the United States over wages, salaries and prices except on rents and that necessary to implement the rationing and allocation program of sugar and rice were removed by President Truman early in November. In a statement announcing the general abandonment of restrictions, the President said that he was convinced that controls were no longer effective instruments in curbing inflation and that their further continuation would do the nation's economy more harm than good.

Mr. Truman stated that the last price control act passed by the Congress (L.G. August, 1946, p. 1026) was "unworkable and inadequate" and had not possessed the necessary public support to make its administration effective. The major difficulty encountered, he said, was "the withholding of goods from the market. As price controls are dropped one by one, many sellers naturally hold on to their goods in the hope that their turn will come next and they can obtain a higher price."

In addition to those withholding goods in "expectation of decontrol", there were others whose motive was "deliberately to force decontrol" by depriving consumers of essential goods or manufacturers of essential materials. The President reported that this withholding had become so serious that it threatened "key segments of the economy with paralysis."

The President, however, reported that a more favourable situation existed in regard to shortages than when the badly weakened stabilization law was enacted by the Congress. "Nevertheless" he warned, "some shortages remain and some prices will advance sharply when controls are removed."

The danger of losses in the accumulation of high price inventories, which would make manufacturers hesitate to raise prices unreasonably, and the threat of consumer resistance to excessive prices were described as factors making a return to the market of supply and demand more beneficial in curbing

inflation than continued Government control of prices.

The reasons which impelled the removal of prices were not applicable in the case of rents, the President stated, because of the expected long continuation of the housing shortage and the inability of tenants to resist "extortionate demands" of landlords.

Responsibility for removing the hazards of inflation through high production rested squarely upon the shoulders of labour and management as a consequence of the general removal of controls Mr. Truman concluded.

Canadian Policy

This summary abolition of control in the United States will not effect the existing general policy of the Government in its fight to combat inflation, Mr. Donald Gordon, Chairman of the Wartime Prices and Trade Board, told the people of Canada in a series of radio addresses on the subject of price control.

However, he predicted that eventually it was bound to have a marked influence upon Canada due to the increased cost of imports, the necessity of preventing an exodus of Canadian produced goods from the domestic markets to the higher priced American market and the psychological effects high American prices would have on Canadian producers. "Rigid stability of prices is beyond achievement" he said.

The choice before the Canadian people at this time, Mr. Gordon stated, was between controlled and uncontrolled readjustment, and the ability of the Government to successfully pursue the former course was directly related to the degree of public support it received. Continuing, Mr. Gordon said that Canada now had an excellent opportunity to study the effects of general control removal in the United States before following a similar path. If the results were not as onerous as anticipated, and the dislocation of the economy caused by decontrol was short-lived, Canada could expeditiously readjust her policy.

*Collective Agreements in the Coal Mining Industry in Canada, September, 1946**

A file of collective agreements has been maintained in the Department of Labour for many years and summaries of representative agreements have been published each month in the *LABOUR GAZETTE*. The Research and Statistics Branch has undertaken to make analytical studies of current agreements on file, by industry and by topic. The first, covering the *Pulp and Paper Industry*, was published in the *LABOUR GAZETTE* for April, 1945 (p. 539); the second on *Union Status in the Manufacture of Iron and Steel and their Products* in the issue of October, 1945 (p. 1426) with revisions in the November issue (p. 1613); the third, covering union status in agreements in the *Manufacture of Non-Ferrous Metal Products, Non-Metallic Mineral Products and Chemical Products*, in the issue of March, 1946, (p. 268). The fourth, covering agreements in the *Coal Mining Industry*, is given below.†

Summary

The total number of workers covered by agreements in the coal mining industry is 22,821. Of these, 9,376 workers, or 41 per cent of the total under agreement, are covered by agreements providing for union shop conditions, under which all employees eligible for membership must be union members. The other 59 per cent are covered by agreements

in which there is no obligation on employees to be union members. Every current agreement on file in the Department for this industry has a "check-off" provision, by which the employer deducts union dues and assessments from the wages of union members and pays these over to the union.

Introduction

The coal mining industry is one of the oldest industries in Canada. The Dominion Bureau of Statistics has estimated the output of coal in Canada as from the year 1785. For the year 1867 the estimate is 631,320 tons mined in Canada. Canada normally produces somewhat less than half of its total require-

and lignite coal mainly in Saskatchewan. For the year 1945, the average number of employees in the industry was 24,706 and the output of coal for the year 16,456,943 short tons. Imports were 2,473,137 short tons, while 840,708 short tons were exported. The above information and that in the following

TABLE 1.—COAL STATISTICS FOR CANADA, 1945

Province	Output Bituminous (Short tons)‡	Output Sub- Bituminous (Short tons)	Output Lignite (Short tons)‡	Average Number of Employees

ments of coal. No anthracite coal is mined; bituminous coal is mined in Nova Scotia, New Brunswick, Alberta and British Columbia; sub-bituminous coal mainly in Alberta,

table is taken from the Dominion Bureau of Statistics Monthly Report on Coal and Coke Statistics for Canada, December 1945.

Early collective agreements in the industry

The history of unionization in the coal mining industry goes back to September, 1879, when the Provincial Workmen's Association was organized in Nova Scotia, and a few

*This study was made prior to the new agreements made in October, 1946, in the western provinces. A summary of the new conditions is given in the Appendix.

†Reprints of each of these three articles are available on request.

months later secured from one company recognition of its committees. The first reference found to any agreement is of one between this Association and the Dominion Coal Company in 1899, but this may possibly have been only a verbal agreement.

The first report on record of a signed agreement in Nova Scotia is one between these same two parties, which went into effect in 1905. The first local in Nova Scotia of the United Mine Workers of America was organized in 1908 and District 26 was chartered in 1909. They did not, however, obtain an agreement at this time. The charter was withdrawn in 1915.

A year or two later a new union was formed, the United Mine Workers of Nova Scotia, which merged with the Provincial Workmen's Association to form the Amalgamated Mine Workers of Nova Scotia in May, 1917. The Provincial Workmen's Association continued to be the bargaining agent recognized by the Dominion Coal Company and other coal operators in Nova Scotia between 1905 and 1917, when the newly formed Amalgamated Mine Workers of Nova Scotia obtained the agreements which they continued to hold until this union was merged with the United Mine Workers of America in 1919. Since then, the U.M.W.A. has represented miners employed by all the major coal operators in the province.

In Alberta and British Columbia, an agreement is on record between the Crow's Nest Pass Coal Company and the Western Federation of Miners effective from 1903. This union was superseded in the same year by the United Mine Workers of America, and District 18 was formed and is reported to have secured agreements with operators in the Crow's Nest district during the succeeding two years. There is a record of an agreement effective from June 1, 1905, with the Crow's Nest Pass Coal Company and at the same time or shortly afterwards with other coal operators in Alberta. From 1905 to 1925 this

union remained the principal bargaining agency of the miners in these two provinces. In 1925 the U.M.W.A. lost ground and during the next ten years, the miners were represented in some cases by the U.M.W.A., in others by the Mine Workers' Union of Canada, or by unaffiliated local unions, while others were unorganized. By 1936, however, the U.M.W.A. had again attained a predominant position which it has maintained.

General statistics

The study of collective agreements in the coal mining industry which follows is made from current agreements on file in the Department of Labour in September, 1946. The figures as to the number of workers affected are the latest available. For the most part they are those reported by the companies late in the year 1945. However, where new agreements were made in 1946, the figures as to the number of employees affected at the time the new agreement was made are substituted for the 1945 information.

Employers

All the agreements in Nova Scotia and New Brunswick are made between individual companies and the union. In Western Canada some agreements are between individual companies and the union; others are joint agreements between two or more companies in the same locality and the union; two are agreements between associations of operators and the union. These last two are: the Drumheller Coal Operators Association, covering 12 companies and about 1,500 employees in Alberta; and the Western Canada Bituminous Coal Operators Association, covering 10 companies and 4,000 employees, in Alberta and British Columbia.

Unions

The United Mine Workers of America represent 96.3 per cent of all workers covered by

TABLE 2.—UNION STATUS IN COLLECTIVE AGREEMENTS IN THE COAL MINING INDUSTRY

union insofar as the coal mining industry is agreements in the coal mining industry. This concerned is divided into two districts: District 26 covers Nova Scotia and New Brunswick; District 18, Saskatchewan, Alberta and British Columbia. Agreements are made between the companies and the district of the union. The remaining 3.7 per cent of the workers are represented by: the Co-operative Protective Association at Westville, N.S. (affiliated with the Canadian Congress of Labour), the Rothwell Mine Workers Union (affiliated with the New Brunswick Federation of Labour), the Saskatchewan Coal Miners' Union at Taylorton (affiliated with the Canadian Federation of Labour), the Western Association of Mechanical and Elec-

trical Engineers at Coal Valley and Sterco, Alberta, the International Brotherhood of Electrical Workers (A.F. of L.) at Cumberland, etc., B.C., the National Union of Firebosses (C.C.L.) at Drumheller, Alberta, and the Western Canada Firebosses Association (T. & L.C.) at Coleman, Bellevue and Blairmore, Alberta. Firebosses (shotfirers) are not included in the jurisdiction of the U.M.W.A. and the above mentioned firebosses' unions have agreements with companies whose main body of workers are covered by agreements with the U.M.W.A. The agreement of the International Brotherhood of Electrical Workers is also with a company which has an agreement with the U.M.W.A.

Summary of Provisions of Agreements and Sample Clauses

Duration, Renewal and Termination

With the exception of one coal mine in New Brunswick and all the coal mines in Saskatchewan whose agreements are for a definite period (made for from one to two years), all agreements are continuous, running on from year to year until either party gives notice of termination. All the agreements for Nova Scotia mines and all but one in New Brunswick are for an initial period of from 6 months to three years and are to continue thereafter from year to year subject to notice from either party of a desire to negotiate amendments or new agreements. The following is an extract from a Nova Scotia agreement.

*This contract is in effect from February 1, 1945, and will continue in full force and effect until January 31, 1947, and from year to year thereafter unless notification to re-open contract is served by either of the parties thereto, such notification to be served in writing not later than October 1 in any year later than the year 1945.

The current agreements in Alberta and British Columbia (many of which were made in 1938) provide or were amended to provide that they remain in effect for the duration of the war and one year thereafter and then to the following March 31.†

One agreement, to which the Rothwell Mine Workers Union is a party, contains a provision whereby the agreement may be cancelled by either party on one month's notice if the employer ceases to be an independent operator

or if the union ceases to be affiliated with the New Brunswick Federation of Labour.

Three of the New Brunswick agreements have a clause under which the Company may cancel the agreement if the union breaks it.

If the union deliberately breaks this agreement, the Company reserves the right to cancel same and discontinue the check-off.

On the other hand, the agreements for Alberta and British Columbia provide that a breach of the agreement by either party will not cancel the agreement.

Any breach of this agreement by any of the parties hereto is not to void the said agreement, but the same is to be continued in full force and effect.

Conflict between the terms of the agreement and laws of the union is prevented by two types of clauses. The following or a similar provision is found in the Nova Scotia and New Brunswick agreements.

No laws or rules shall be made by any local union or group of local unions in violation of this contract, joint agreement to have precedence over national, district and local constitutions.

The Alberta and British Columbia agreements have clauses the same or similar to the following:

This contract is in no case to be set aside because of any rule of the United Mine Workers of America now in force or which may hereafter be adopted; nor is this contract to be set aside by reason of any provisions in national, district or local constitutions.

Union Status

APPLICATION

The agreements do not apply to all classes of persons employed by coal mining operators. The Nova Scotia agreements and two of the

*The following extract and those used throughout this study are quotations from agreements on file in the Department of Labour for this industry. All such quotations are printed in the smaller size type.

†Although under this clause the agreements were to run to March 31, 1947, they were re-opened for negotiations in August, 1946.

New Brunswick agreements confine the application to members of the union and those eligible to join the union.

The terms of this agreement apply only to men who are members of the United Mine Workers of America working in and around the mines, and all who are eligible to membership in the United Mine Workers of America, as set forth in the constitution of the International union.

Two of the New Brunswick agreements state that the agreement applies only to union members.

The terms of this agreement apply only to men who are members of the U.M.W. of A. working in and around the mines.

The Alberta agreements and agreements for all except one of the British Columbia mines list the classes of employees which are excluded from the provisions of the agreement. This list varies to some extent, but the following clause is a typical example:

All employees connected with the management of the mine are not to be under the jurisdiction of the United Mine Workers of America or be members thereof, and shall include the following: Mine manager or superintendent, overman or assistant overman, pit bosses, fire bosses, boss driver, stable boss, master mechanic, electricians, weighman, head carpenter, head blacksmith, tippie or breaker foreman, loader boss, night watchman, coke oven foreman, outside foremen, wet and dry washery foreman and all technicians, office staff, timekeepers, coal inspectors and head lampman.

The question of men working on construction, improvements and extensive repairs is dealt with in most of the agreements in Alberta and British Columbia. Under agreements covering over half of the total number of workers under agreement in these two provinces, such employees must be union members.

All men working on construction, improvements, and extensive repairs shall be members of the United Mine Workers of America, except skilled workers and members of recognized unions.

The erection of head frames, tipples, breakers, washers, buildings, coke ovens, scales, machinery, railroad tracks and switches, etc., necessary for the completion of a plant, all being in the nature of construction work and extensive repairs or rebuilding of the same class of work, are to be considered as improvements and extensive repairs.

Under agreements covering about a quarter of the workers covered by agreements in these two provinces, men on extensive repairs, etc., are not union members.

It is agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the U.M.W. of A. The erection of head frames, tipples, breakers, washers, buildings, coke ovens, scales, machinery, railroad tracks and switches, etc., necessary for the completion of

a plant, all being in the nature of construction work and extensive repairs or rebuilding of the same class of work, are to be considered as improvements and extensive repairs, and the employees thereon are to be excluded as above when employed on such work only.

With reference to Company officials doing work usually performed by union members, agreements covering over half of the employees under agreements in Alberta and British Columbia have a clause by which such company officials must pay union dues while so engaged.

Where company officials do the work usually performed by union members, except in cases of temporary employment, he or they shall automatically become members of the union. This has reference to any work set out in the contract. Where such official has been so employed for twelve days or more, in any thirty-day period, he shall be deemed to have exceeded his temporary employment and shall pay union dues in any succeeding month wherein he has done similar work for five days.

UNION MEMBERSHIP REQUIREMENTS AND CHECK-OFF

Union shop provisions under which all eligible employees must be members of the union are found in agreements covering 77 mines and 9,376 workers, which is 41 per cent of the total number of workers under agreement in the industry. These mines include all those under agreement in Saskatchewan, Alberta and British Columbia as well as three mines in Nova Scotia and one in New Brunswick. The remaining 59 per cent of all workers under agreement in Canada, are covered by agreements in which there is no obligation on workers to be members of a union; this includes the great majority of workers under agreement in Nova Scotia and New Brunswick. No agreements provide for the closed shop, that is, there is no obligation on employers when hiring new employees to choose union members. There is no provision in any agreement as to preference to union members as such when hiring new employees.

Check-off: Every agreement in this industry has provision for the check-off by which the employer agrees to deduct union dues and assessments from wages of certain employees and turn them over to the union. In those agreements providing for union shop, the check-off is obligatory on all employees who are eligible for membership; in those agreements without compulsory union membership it is obligatory on union members only.

An example of a clause with union shop and compulsory check-off is:

All men who work in and around the mines who are eligible to become members of the

United Mine Workers of America shall join that organization and agree to sign the check-off for all dues, assessments and fines, and the managements of the mines agree to make deductions for the same without charge, from the pay due to the members of the United Mine Workers of America, and to forward deductions made to the acting secretary of the District, or such other person as that official may designate.

An example of a clause with no compulsory union membership but with the check-off is:

The Company agrees to check-off all dues, fines and initiation fees from all members of the United Mine Workers of America employed in and around the collieries. The Company also agrees to check-off for assessments or levies for strictly U.M.W. purposes. Authority to make such deductions shall be given to the Company by the president and secretary of District No. 26, United Mine Workers of America, such authorities to state the purpose for which the assessment or levy is to be made.

Under all the United Mine Workers of America agreements, the maximum amount of the check-off in any one month may never exceed \$5.

The maximum amount to be deducted for U.M.W. purposes in any one month shall not exceed five dollars.

A number of the Alberta and British Columbia agreements have a further restriction on the amount which may be levied by local unions.

All amounts over one dollar and a half (\$1.50) per month shall be approved by the District organization, and in the case of fines the nature and amount thereof shall be specified and approved.

UNION STATUS IN HIRING

No agreements have provisions for preference to union members in hiring. On the contrary, the management retains exclusive rights as to hiring in almost all of the agreements.

The right to hire and discharge, the management of the mine, and the direction of the working forces are vested exclusively in the Company.

This right of the employers as to hiring and discharging is qualified by prohibiting discrimination against employees because of their union connections, under almost all the agreements. An example from one of the Nova Scotia agreements covering employment is as follows:

No member of the United Mine Workers of America shall be denied employment, except for sufficient cause, other than personal prejudice or activity in matters affecting the United Mine Workers of America, and when an applicant for work is denied employment and it is claimed by him an injustice has been done, investigation shall be conducted by

the tribunals and in the manner set forth in Section 4 for the adjustment of grievances and shall be taken up promptly. If it is proved an injustice has been done, the mine management shall give employment to said applicant. The reasons assigned for not employing said applicant shall be set forth during the investigation.

It is understood and agreed that the taking up and investigation of such refused applications will take precedence over all other cases except shutdowns. It is further understood and agreed that no list shall be kept for the purpose of regulating the employment of applicants in violation of this contract.

The above provisions of this section shall not apply to a man who is a menace to the safety of the lives of himself or other employees. Neither shall the above provisions apply to an applicant who is incompetent to perform the required labour nor to men who habitually neglect their work. It is understood and agreed that there may be other justifiable causes for the refusal of employment. It is further understood and agreed that no man shall be considered as coming under the provisions of the above paragraphs who, when making application for work, is at the time employed elsewhere or who has an application for work pending at another mine.

It is understood and agreed that the Company shall select its day and monthly men, based upon their qualifications and fitness for the work to be performed, provided, however, an applicant claiming he has been discriminated against shall have the right of appeal as provided for in paragraph (g)* of this section, and a hearing and final disposition of said appeal shall be made in conformity with paragraphs (g)* and (h)* of this section. . . .

An example of the prohibition of discrimination on account of union connections in case of discharges, from the same agreement is:

. . . . no man shall be discharged except for sufficient cause, other than personal prejudice or activity in matters relating to the United Mine Workers of America.

The agreements which the United Mine Workers of America have with New Brunswick coal operators extend the "no discrimination" clause to cover discrimination by the unions against non-members.

employees into its membership. . . .

RE-EMPLOYMENT OF UNION OFFICERS

The agreements of the United Mine Workers of America in Nova Scotia, Alberta and British Columbia have a guarantee that employees who leave their employment with the company to accept full time positions as union officers will be re-employed by the Company at the conclusion of their term of office. In

**(g)* and *(h)* are the two preceding paragraphs.

There shall be no discrimination, interference, restraint or coercion by the Company or any of its agents against any worker because of membership in the union, and the union agrees not to intimidate or coerce

the Alberta and two of the British Columbia agreements this privilege is for mines where this practice existed at the time the agreement was made, and it concerns local union officers. In the other agreements with this provision there is no such limitation of the privilege.

The Company agrees that all men leaving their employment to accept elected or appointed positions with the United Mine Workers of America, will at the expiration of their official duties be given employment at the mine.

UNION RESPONSIBILITY

Most of the Nova Scotia and New Brunswick agreements include a clause by which both the union and the operators guarantee the carrying out of the terms of the agreement.

Obligations:

. . . That the fulfilment of this agreement and that of any subsequent joint agreements entered into, be guaranteed by the International Union, the officers of District No. 26, U.M.W. of A. and the operators; and it is their duty to see that all such agreements are carried out both in the letter and in the spirit.

In the Alberta and British Columbia agreements, the union undertakes that they will not interfere with the marketing of coal.

It is agreed that District No. 18, U.M.W. of A. will not in any way restrict or interfere with the marketing of coal or coke to any person, firm or corporation.

PREFERENCE IN HIRING

As stated above under "Union Status in Hiring" no agreements have provision for preference to union members in hiring, but applicants for employment are protected from discrimination because of their union connections and also because of personal prejudice, under almost all agreements.

Under some of the Alberta agreements and one of the British Columbia agreements, preference in employment is to be given to sons of employees.

Employees' sons shall be given preference over other new men. This preference is in all cases subject to the ability and competency of the employee to perform the work required which shall be decided by the management, with the proviso that the employee shall have a right of appeal where the employee feels that such decision has been made fraudulently, wilfully or otherwise from improper motives.

Two of the above agreements extend this preference to local residents as well.

Employees' sons and residents shall be given preference of employment over other new men.

Men partially disabled as a result of accidents in the mine area are to be given preference of employment, according to the agreements in Alberta and British Columbia.

Men having permanent partial disability or partial disability received in and around the mine, shall be given preference in the class of work they can perform, over other workmen out of employment in the camp. This clause takes precedence over the seniority clause in the agreement. The competency of the applicant to perform the labour in question shall be decided by the mine manager or overman whose decision shall be final.

The question of rehiring former employees is dealt with under "Seniority".

Seniority

Seniority provisions under which certain preferences are given based on length of service, are found in the agreements for all Alberta and British Columbia mines, but only for five mines out of 29 in Nova Scotia and two out of 9 in Saskatchewan.

LAY-OFFS AND REHIRING

Almost all the agreements with seniority provisions have one or the other of the following two types of clauses.

An example of one is:

In case of a lay-off or in the taking on of men, the seniority or term of service of employees shall be considered, and the employee with the longest continual term of service with the mine shall be given preference within the classification wherein he is employed.

An example of the other is:

In case an employee is thrown out of employment unless discharged, he shall be given preference over new men in other mines in the same camp operated by the same company. . . . Seniority rights to prevail in all cases; seniority to start from date of last employment. The foregoing understanding shall be subject in all cases to the ability of the employees to do the work required.

PROMOTIONS

More than half of the workers covered by agreement in Alberta and British Columbia have an additional seniority feature granting preference in the type of work to employees.

The Company agrees to give company men having miner's certificates preference over new men as miners. However, such company men shall allow the management a reasonable time to secure the men for their positions. All outside workers shall be given preference over new men seeking employment underground. . . . Seniority rights to prevail in all cases; seniority to start from date of last employment. The foregoing understanding shall be subject in all cases to the ability of the employees to do the work required.

Hours

The regulation of hours of work for employees of coal mines is to a large extent covered by provincial legislation: In Nova Scotia and New Brunswick any employee working underground is not to be employed at his working place below ground in a mine for more than 8 hours per day; the hours for surface workers are not governed by legislation in these two provinces. In Saskatchewan, underground workers are limited to 8 per day at the regular working place, exclusive of the time taken in going to and from the said place and lunch time; surface workers are also limited to 8 hours per day; for both underground and surface workers this limit may be exceeded by mutual consent. In Alberta, an underground worker is not to be allowed to be below ground for the purpose of his work or of going to and from his work for more than 8 hours a day; workers above ground are also limited to 8 hours per day with a 48 hour week. In British Columbia, no person is to remain underground for purpose of employment for more than 8 hours from "bank to bank"; surface workers are also limited to 8 hours per day; weekly hours for industries in British Columbia including mining are limited to 44 per week by the Hours of Work Act.

Because of the above legislation the question of hours is dealt with only in some of the agreements, apparently to supplement the legislation. Most of the Nova Scotia and New Brunswick agreements fix the exact hour of commencing and ending work for both underground and surface workers. The following is from a Nova Scotia agreement:

The collieries will commence to hoist coal at 7 a.m., at which time the men must be in the mine. The day's work will cease at 3 o'clock, when all arrangements will be available for conveying men to the surface. The surface men around the bankhead and screens, associated with the handling of coal, are to be on duty between the hours of 7 a.m. and 3 p.m. and for a short time after, if necessary, for the purpose of attending to such duties as will facilitate their own work, such time not to exceed a half hour. The standard of other surface labour around the collieries to be from 7 a.m. to 3.30 p.m. with half an hour for dinner, and for such time thereafter as may be necessary to facilitate the work of the next shift or day, such time not to exceed one half hour. Where continuous attendance is required, the shifts will be eight hours, both surface and underground.

One of the New Brunswick agreements with reference to underground workers has the following provisions as to hours:

The collieries will commence to hoist coal at 7 a.m., at which time the men must be in the mine. The day's work will cease at 4 o'clock. . . . The working time will be

8 hours at the working face with the shift finishing at 4 p.m. This allows for time taken to get to working place and one-half hour for lunch.

This same agreement with reference to surface workers contains the following provision:

The surface men around the bankhead and screens and at—shaft, associated with the handling of coal, are to be on duty between the hours of 7 a.m. and 4 p.m. with half an hour for dinner, and for such time thereafter as may be necessary to facilitate the work of the next shift or day.

Agreements for three of the smaller mining companies in New Brunswick definitely provide for a 9-hour day for surface men.

The question of single shifts or continuous shifts is not specifically dealt with in the Nova Scotia, New Brunswick and Saskatchewan agreements. The majority of the Nova Scotia and New Brunswick agreements, however, mention the work day as beginning at 7 a.m. or 8 a.m., and ending at 3 p.m. or 4 p.m., with a further proviso in most of them that where continuous attendance is required the shifts will be 8 hours both surface and underground. One New Brunswick agreement states that the cycle of operations is continuous. Agreements for all Alberta mines and about half of the British Columbia mines under agreement state that the single shift system in rooms and pillars is to be adhered to as far as practicable.

Overtime

In Nova Scotia the agreements show considerable variation in their provisions for overtime work and work on Sundays and holidays. Mines employing 11,000 workers have agreements which provide for certain skilled tradesmen time and one half for overtime work and double time for Sundays; for some of these, double time is payable for work on legal holidays, while in others work on legal holidays is at regular rates. An example of the latter case is:

Surface—

Mechanics, blacksmiths, boilermakers, carpenters and electricians will be paid time and one half for overtime and double time for Sundays. On legal holidays straight time will be paid to the above mentioned classes for work performed during regular shift and time and one half for overtime, the same as on a regular working day.

Surface workers other than these tradesmen are not mentioned in connection with overtime. For underground workers, only rope splicers are mentioned as being paid higher rates for overtime. Other than these, underground workers have no higher overtime rates on regular working days nor on holidays. One

Nova Scotia agreement provides for time and one-half for Sunday work underground.

Underground employees working overtime will only be paid for the actual time worked except on Sundays, when they will be paid time and one half for the entire time worked Rope splicers who work less than four hours overtime will be paid a half shift and if over four hours will be paid a full shift. Men employed on legal holidays will only be paid for the actual time worked.

Another Nova Scotia agreement has only the following reference to overtime:

It is mutually agreed that during the life of this contract, no change will be made in the special privileges enjoyed by the employees of _____, in the matters of overtime, double time for Sundays and the holidays of New Year's Day, Good Friday, Empire Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day. . . .

Agreements covering three of the smaller mines in Nova Scotia have this provision:

Overtime payments: It is agreed that datal hands working 15 minutes or under shall be paid half hour, over 15 minutes one hour.

None of the New Brunswick agreements has any reference to overtime nor to work on Sundays or holidays.

In Saskatchewan, all agreements have provision for time and one half for overtime work. One agreement does not mention Sunday work but states that work on statutory holidays will be paid as authorized by orders of the National War Labour Board. The agreement covering all other mines under agreement provides that all overtime for datal workers and contract workers be paid at time and one half and rate and one half respectively for all work in excess of the normal working hours; similarly work on Sundays and holidays is payable at time and one half for datal workers or rate and one half for contract workers. For overtime work, up to 30 minutes is allowed at straight time for cleaning up coal which may be in transit.

In Alberta and British Columbia many of the agreements now in effect were originally made in 1938. The conditions as to overtime for all mines under agreement in these two provinces were changed by a Finding and Direction of the National War Labour Board, dated July 2, 1943, providing for the payment of time and one half for overtime work to surface (outside) workers, and for time and one half (rate and one half for contract workers) for all employees for work on Sundays and holidays. For most of the agreements these new conditions were not incorporated into the existing agreements by amendments.

In one case where this was done, the new clause reads:

The Company agrees to eliminate overtime and Sunday work as far as possible. In accordance with the National War Labour Board finding, Case file N. 700 of July 2, 1943, with effect from the first payroll period beginning after July 2, 1943, the companies will pay to their outside workers covered by agreements with District 18, United Mine Workers of America, the rate of time and one half for time required to be worked in excess of the normal working hours per day, and pay to such employees, and to all other datal workers and to those employees engaged on contract rates, at the rate of time and one half and rate and one half respectively for all work required to be performed on Sundays, and holidays as specified in collective agreements, except that where employees are allowed a regularly assigned seventh day off duty other than Sunday, the time and one half pay condition shall only apply when such employees are required to work on their regularly assigned seventh day off duty.

As to the days which are to be observed as holidays, some agreements refer to "legal holidays", others list seven or eight such days. In nearly all the Alberta and British Columbia agreements, eleven holidays are listed.

Vacations

In the Nova Scotia agreements made effective since the beginning of 1945, there is a clause providing that vacations shall be granted in accordance with the Supplementary Findings and Directions of the National War Labour Board of January 20, 1944, and October 12, 1945. The Nova Scotia agreements made earlier and all the New Brunswick agreements do not include any reference to vacations.

The first of these Supplementary Findings and Directions sets forth the conditions under which one week's vacation with pay for the employees of the companies concerned who have had one year's service, is to be granted. The second Supplementary Finding and Direction, which was dated October 12, 1945, directs the companies concerned (whose agreements affect 12,000 employees) to set aside as a fund on behalf of their workers covered by the application, 33 cents per ton of coal sold between August 15, 1945, and January 31, 1947. (This 33 cents is the increase in price authorized by the Wartime Prices and Trade Board for this purpose). This fund is to be used for additional compensation to the workers and for the payment of wages for a second week's vacation with pay in 1945 and 1946. These provisions for vacations with pay of two weeks for workers with at least one year's service were subsequently extended by Findings and Directions of the National War

Labour Board to apply to all coal mines in Nova Scotia and New Brunswick.

For Alberta and British Columbia coal mines, a Royal Commission, under the chairmanship of Mr. Justice G. B. O'Connor, inquired into wage rates and relevant matters and was subsequently given the powers of a Regional War Labour Board under the provisions of the Wartime Wages Control Order. This commission then issued a Finding and Direction, dated November 18, 1943, directing that any person employed in the operation of coal mines in these two provinces be granted a two weeks' vacation with pay at the basic daily wage rate, between April 1 and September 30, if he has been employed by one employer for at least twelve consecutive months and has not been absent from employment for more than 90 days (including Sundays, holidays and vacation) during such twelve month period, except through causes beyond his control.

Some time after the above Finding and Direction was issued, the United Mine Workers of America made agreements with the Western Canada Bituminous Coal Operators Association and certain other coal operators which were supplementary to their existing agreements and which implemented this Finding and Direction by establishing a working procedure. These supplementary agreements provide: that vacation be granted on the basis of one day for 23 days worked in any calendar month (22 days in February) for employees who have been employed by the company for 12 consecutive months, that the basic period be twelve months ending March 31 in any year; rates of vacation pay are the normal daily rate for the worker's classification, less the cost of living bonus, and for contract miners a daily rate is set; causes of absence considered to be beyond the control of the employee are set out; preference of taking vacation during any specific period is to be given in the order applications are received by arrangement with the colliery manager; vacation may be accumulated for a two year period if the employee so desires.

Wages

Agreements include detailed wage schedules for each company or in some cases each mine. The scales for surface or outside workers are usually scales of daily wage rates for each occupational classification. For certain underground classes daily rates are set, but most of the underground workers who are classed as miners work on contract rates which are also set by the agreements at rates per ton, per lineal yard, per set for timbering, per car for loading rock and refuse, etc. The wage rates

in many of the existing agreements have been increased by various Findings and Directions of the National War Labour Board. The average wage rates and ranges of rates for certain classes of daily paid workers in this industry as well as the average earnings and ranges of earnings for contract miners, by provinces, are given in "Wage Rates and Hours of Labour in Canada, 1944, Report No. 27", issued as a supplement to the *LABOUR GAZETTE*, October, 1946. These are the rates in 1944. Preliminary information for 1945 indicates that the changes as compared with 1944 will be slight. Since nearly all of the eligible employees in this industry are covered by agreement, it may therefore be assumed that the wage rates in the 1944 wage report are very close to the rates provided in the existing agreements as modified by Findings and Directions of the National War Labour Board, with the exception of rates in Nova Scotia which (for the great majority of the mines) were increased by 17 cents per day early in 1946, with retroactive pay back to February 1, 1945.

In addition to the scale of daily wage rates and contract rates, the agreements contain certain other conditions relating to wages.

Almost all the Alberta and British Columbia agreements specifically prohibit sub-contracting.

In most of the Nova Scotia, Alberta and British Columbia agreements, a daily wage rate is set for contract miners who are taken from this work to do company work. (Many of these same agreements state as part of the clause in which the Company retains the right to the direction of the working forces, that it is not the intention of this clause that miners working under contract will be taken from their working place indefinitely to perform company work.)

When a miner is taken to do Company work, he shall be paid the base rate of seven dollars and fifty-five cents (\$7.55) per shift.

When new work arises a price for which has not been fixed, the Alberta and British Columbia agreements have provision for fixing such prices and for the rates to be paid pending such decision.

Whenever any new work arises a price for which has not been provided, either party may ask a price on this work, and in fixing a price for this work both parties will be guided by existing prices and the effect on the earnings of the men. In case of dispute, the matter to be decided in a similar manner to the "Settlement of Local and General Disputes" clause of this agreement. Meantime, if the work is continued until such price has been arranged all men shall be paid on the day wage scale.

Whenever any new system is inaugurated or radical change in the present system is made in any mine where there is a contract price fixed thereon, the Company or employee may ask for a price to be fixed on the work as "New Work" as for example, a change from "long wall" to "pillar and stall", or vice versa, shall be considered "New Work".

The corresponding clause in the Nova Scotia agreements read:

When the development of a new mine is begun during the period of this agreement, or new machinery is installed, or new methods of handling the product are adopted, then the scale of wages covering the labour at such new mines under such changed conditions will be the same as in other mines in the neighbourhood where similar conditions exist. Where no similar conditions exist, a scale of wages and conditions will be made by the district executive and the representatives of the company.

For contract miners, special arrangements are made in the Nova Scotia, Alberta and British Columbia agreements to compensate such miners should their working place become deficient.

When a miner's working place becomes deficient owing to any abnormal conditions, or where coal in any district becomes too hard, preventing him from earning the minimum wage of \$6.78 per shift, the Company shall pay him a sufficient amount to secure him the said minimum provided he has done a fair day's work.

Similarly, most of the Nova Scotia and New Brunswick agreements have a clause protecting contract miners who are prevented from earning their contract pay because of a fall of rock.

When a fall occurs in any working place, and which prevents the miner or miners from working at the face, the official in charge of the section, on being notified by the workmen, will immediately make arrangements to have the same cleared up, providing he deems it advisable to do so. This work, when done by the miner, to be paid at the rate of \$6.05 per shift.

Extra compensation is granted to men working in wet places, under the Alberta and British Columbia agreements.

A working place in the mine where water drops from the roof in quantities sufficient to wet a man's clothing or where standing water is over 4½ inches average depth shall be considered a wet place. The rate for wet places shall be 50 cents per day extra for all inside men.

The method of payment of wages is mentioned in Alberta and British Columbia agreements as being in accordance with the Coal Mines Regulation Acts of these provinces.

Working Conditions

STANDARDS OF PRODUCTION

Almost all the agreements have provisions insuring that miners will produce coal as free as possible from impurities. The Alberta agreements and one or two of the agreements in British Columbia, in Nova Scotia and in New Brunswick specify varying penalties for non-compliance with this regulation.

The miners are to deliver their coal as free from rock and other impurities as is practicable, and in case of a miner failing to do so, he shall be warned for the first offence, and for continued cases may be discharged.

The great majority of Nova Scotia and New Brunswick agreements do not specify any penalty for this offence.

The ability of the Company to sell coal and to pay wages being recognized as largely dependent upon the coal being clean and marketable, it is mutually agreed and understood that the miners will produce their coal in such manner as not to increase the percentage of fine coal, either by carelessness or the use of unnecessarily large quantities of powder and will load coal free as possible from all impurities.

CHECKWEIGHMEN AND CHECKMEASURERS

The right of the contract miners to employ checkweighmen and checkmeasurers to check the amount of coal loaded by them (on which their earnings are calculated) is granted under the terms of almost all the agreements for Nova Scotia, Alberta and British Columbia mines. In all cases the Companies agree to deduct from the earnings of the contract miners the amounts required to pay such checkweighmen and checkmeasurers.

The Company will grant the right to the miners to employ checkweighers and checkmeasurers, and will grant the said checkweighers or checkmeasurers every facility, including weigh sheets free of charge to enable them to render a correct account of all coal checked or weighed and will allow the cars to be tared from time to time, the machinery to be properly tested from time to time, and will deduct from the wages of all contract miners such amount as may be designated from time to time, and will pay over the sum to the checkweigher or checkweighers or checkmeasurer or checkmeasurers.

Since these checkweighmen and checkmeasurers are apparently employees of the mine when they are offered these positions, arrangements are made in most of the agreements under which they are to be guaranteed their re-employment by the company when they discontinue their work as checkweighmen or checkmeasurers.

The Alberta agreements guarantee this insofar as the practice existed at the time the agreement was made, while the Nova Scotia agreements grant this in all cases.

TOOLS, SUPPLIES, LAMPS

In the agreements in eastern Canada no arrangements are included for the purchase of tools or explosives by miners. Under nearly all the Alberta agreements and one in British Columbia, contract miners are to purchase their tools from the company.

Tools to be sold to contract miners by Company, and if returned to the Company, shall be accepted by Company at 10 per cent reduction off original cost. All tools broken or damaged to be paid for by miners. Company men to be supplied with free tools.

The majority of the miners in British Columbia and a small number in Alberta are covered by agreements under which the Company supplies the tools.

The Company will supply picks and shovels and make repairs and replacements to same with the understanding that the tools are not abused. In the case of proven neglect the men will pay for damage or loss. . . .

The Alberta and British Columbia agreements govern the sale of explosive supplies to miners.

Where explosive supplies are being sold to the miners, they shall be furnished at cost price, which shall include handling, transportation and insurance. In the event of a dispute arising over the price of powder, the men shall have the right to examine the invoices.

Arrangement is made by almost all the agreements in Alberta and British Columbia by which the company undertakes to deliver an adequate supply of suitable timber, rails, ties, planks and sheet iron to specified convenient places in the mines.

Similar arrangements are made in a number of the agreements in these two provinces, whereby all cars are to be delivered to and taken from the working face.

Under agreements covering some of the employees in Alberta and British Columbia, it is provided that where mine operators furnish electric safety lamps, a charge (usually of 5 cents per shift) may be deducted from employees' pay.

WORKING PARTNERS

Most of the Alberta and British Columbia agreements contain a clause similar to the following, although some omit the qualification "from men already registered. . . ."

Contract miners may, with the consent of the management choose their own working partners from men already registered as employees of the company in the same classification.

ACCIDENTAL DEATHS AND FUNERALS

The agreements in Nova Scotia, Alberta and British Columbia have provision under which a mine may be closed for the rest of the day

in the event of an instantaneous death by an accident at the mine, for the resumption of work the next day and for the closing of the mine on the day of the funeral. Under the Nova Scotia agreements, however, the mine may work on the day of the funeral, if the operator so elects, and contributions will be made by both parties for the benefit of the family of the deceased man, as in the following clause:

In the event of an instantaneous death by accident in the mine, the employees in and around that mine shall have the privilege of discontinuing work for the remainder of that day only. Work, at the option of the operator, shall be resumed the day following and continue thereafter.

In case the operator elects to work the mine on the day of the funeral of the deceased, as above, or where death has resulted from an accident in the mine, individual employees may, at their option, absent themselves from work for the purpose of attending such funeral, but not otherwise. In such case, every member of the United Mine Workers of America employed at the mine at which the deceased member was employed shall contribute fifty cents (50c) and the operator fifty dollars (\$50) for the benefit of the family of the deceased or his legal representatives. These moneys to be collected through the office of the Company.

DIVISION OF WORK

Almost all agreements have some provision under which work is divided among the employees when there is not sufficient work for full employment. In Nova Scotia and New Brunswick agreements, this is a guarantee that when any section of a mine is shut down indefinitely "the opportunity of a division of the work will be given to each and every man thrown out of employment", the method to be agreed upon. In Alberta and British Columbia almost all agreements provide that the operators will as far as possible supply each miner with an equal turn of cars, and in addition, agreements covering about one third of the employees under agreement in Alberta and all in British Columbia have a clause in which the companies agree insofar as reasonably practicable to an equal division of work in their respective mines. One British Columbia agreement allows the pit committee to check the company records for this purpose.

The Companies agree to equalization of work as far as practicable, and to permit the pit committee to check up the companies' records to insure all workmen receiving their correct share of work. This will apply in all cases where the workman is able and competent to do the work required.

WASH HOUSES

The Alberta and British Columbia agreements provide that the companies may charge approximately \$1 per month for the use of

the wash house; miners' effects left there are insured against loss by fire in most cases.

HOUSE RENTS, LIGHTING, HOUSE COAL,

COMPANY STORES

A few of the Alberta agreements mention rents which may be charged for company owned houses, some of which are rented at approximately \$10 per month. The charge for house lighting is mentioned in some of these same agreements.

The prices which the companies may charge their employees for household coal are governed by the majority of agreements in Nova Scotia, Alberta and British Columbia, the prices specified varying from \$2 to \$5 per ton.

With reference to company stores, the Alberta agreements and one in British Columbia specifically state that employees are at liberty to purchase goods wherever they may choose to do so.

SAFETY AND HEALTH

Provisions for safety and accident prevention are covered by provincial legislation and are not, therefore, generally a subject covered by agreements. Only three agreements (all in New Brunswick) have any special reference to safety precautions.

It should be the duty of all employees who observe any dangerous condition, or anything which might be liable to cause breakdowns, delays or damage to equipment in or about the mine, to report immediately to officials in charge in the interests of safety.

The Alberta and some of the British Columbia agreements mention that doctors and hospital arrangements are to be as provided by the Workmen's Compensation Act of Alberta or British Columbia, respectively.

One of the fire bosses' agreements affecting about 100 fire bosses in certain Alberta and British Columbia mines has provision for sick leave with pay up to 14 days in a year.

ABSENTEEISM

Almost every agreement, both in eastern and western Canada, has some provision regulating absenteeism. There is some variation as to the penalties which may be imposed. One example from a Nova Scotia agreement is as follows:

When any employee absents himself from his work for a period of two (2) days without the consent of the Company, other than because of proven sickness, he may be penalized for the first offence by suspension from work for a period not to exceed four (4) days of mining operation if same does not exceed fifteen (15) days calendar time, and for a second offence he may be penalized by suspension from work for a period not to exceed six (6) days of mining operation if same does not exceed thirty (30) days calendar time, and for a

third offence he may be discharged. In the case of an absence for a period in excess of one (1) month, other than because of an accident or proven sickness, the employee shall be considered discharged.

Another example, from a British Columbia agreement, is:

When an employee absents himself from his work for a period of more than two (2) consecutive days, unless through sickness or by first having properly arranged with the pit boss or foreman and obtained his consent, he may be discharged. All employees whose absence from work would cause any stoppage must, before absenting themselves, properly arrange with or notify the pit boss or foreman for their absence, otherwise they may be discharged. Any employee who habitually, to the extent of five (5) days per month, absents himself from work may be discharged. To enable idle men to obtain work available, working employees shall, if possible, arrange with the management when they contemplate a lay off.

Adjustment of Disputes

STRIKES AND LOCKOUTS

Except for a very small number of the smaller mines, all agreements in both eastern and western Canada provide that while disputes are being investigated and settled work is to continue, pending final decision.

It is distinctly understood and agreed that in case of all disputes and grievances of every nature arising under this contract, the mines shall continue to work, pending settlement.

Most of the Nova Scotia and New Brunswick agreements provide, in addition, that grievances are not to be considered while a strike or lockout is in progress.

Under no circumstances shall a grievance be taken up for adjustment during a suspension of work in violation of this contract.

Practically all agreements in the industry have provision for the maintenance of the mine property in case of suspension of work for any cause. In the agreements in Alberta and British Columbia, only engineers, firemen and pumpmen are mentioned, while in Nova Scotia and New Brunswick, other maintenance men are included. The following example is from a New Brunswick agreement:

In case of either local or general suspension of mining, either at the expiration of this contract, or otherwise, the engineers, firemen, pumpmen, fanmen, and such other maintenance men necessary to protect the mines shall not suspend work except at the option of the operator, but shall fully protect all the Company's property under their care and operate fans and pumps and lower and hoist such men or supplies as may be required to protect the Company's property and any and all coal necessary to keep up steam at the Company's coal plants. But, it is understood and agreed that the operator will not ask them to hoist any coal produced by non-union labour for

sale in the market. The operator, at his option, to retain only such engineers, firemen, pumpmen, fanmen, and such other maintenance men necessary to protect the mines as are required, but with the understanding that all of the engineers, firemen, pumpmen, fanmen and such other maintenance men shall be those regularly engaged at maintenance work, the operator will not employ officials on continuous service positions.

Should the interest of the engineers, firemen, pumpmen and such other maintenance men necessary to protect the mine be directly involved in any issue at the expiration of this contract, and any engineers, firemen, and pumpmen and such other maintenance men necessary to protect the mines cease work, the United Mine Workers of America will provide competent men to perform the emergency work above recited at the scale price in effect at the time of the suspensions, subject to any subsequent settlement.

PIT COMMITTEE

The pit committee (sometimes called mine committee) is a feature of agreements covering all except a few of the small mines. The duties of this committee are in all cases confined to the settlement of disputes. The pit committee consists of three men at each mine, two of whom must be present employees.

The pit committee shall be a committee of three (3) in each mine or other plant covered by this agreement, selected by the employees working at such mine or other plant from among their own number, except that one (1) member may be a checkweighman or an officer of the local union, not necessarily an employee, but he must previously have been selected as checkweighman or officer from amongst the employees of such mine or plant. Due notice of such selection, properly certified in writing shall be given to the Company.

Where more than one mine is included in a local union the preceding paragraph shall be interpreted to mean that the secretary of the local union may act on the pit committee provided, however, that he must previously have been selected as secretary from amongst the employees of one of the mines over which the local union has jurisdiction.

It is understood and agreed that at all times two members of the pit committee shall be employees of the mine concerned.

The duties of the pit committee shall be confined to the settlement of disputes as set out in the preceding clause covering "Settlement of Local and General Disputes" and they shall under no circumstances go around the mines unless by permission of the management in the discharge of their duties.

DISCHARGES

Any claim that an employee has been unjustly discharged is to be dealt with according to the method of handling all grievances provided in the agreement concerned. This is provided in every agreement (except one in which the question of discharges is not mentioned). Under all the Nova Scotia agree-

ments any employee found by this means to have been unjustly discharged will be reinstated and paid for the full time lost.

If any employee shall be discharged or suspended by the management and it is claimed that an injustice has been done him, an investigation to be conducted by the parties in the manner set forth in Section 4*, shall be taken up promptly; and if it is proved an injustice has been done, the management shall reinstate said employee and pay him full compensation for the time he has been suspended and out of employment.

If, at the end of five days, following the discharge of an employee who claims an injustice has been done him, an investigation has not been completed and a final decision reached, then such discharged employee shall be given employment pending the final disposition of the case. . . .

The New Brunswick agreements simply state that any employee found to have been unjustly discharged will be reinstated. One Saskatchewan agreement makes no special regulation on this point except that cases of discharge are subject to the regular grievance procedure. Agreements for the other mines in Saskatchewan and all agreements in Alberta and British Columbia state that the compensation of an employee so reinstated is to be decided by the joint committee.

If a claim be made within five (5) days where a man or men has or have been unjustly discharged, the case shall be dealt with according to this Article*, and if it is proven that he or they has or have been unjustly dealt with, he or they shall be reinstated. If a claim is made for compensation for time lost, in cases where reinstatement has followed, it shall be left to the Joint Committee as provided for in Sub-Section (c)* to decide what amount (if any) is to be paid.

GRIEVANCE PROCEDURE AND ARBITRATION

All agreements include a method of settling disputes arising under the agreement, and except for agreements covering three or four of the smaller mines, arrangements are included for final reference to arbitration should the first steps fail.

In certain Nova Scotia agreements which cover over half of the total number of employees affected by agreements in Canada, the procedure includes reference to a joint board of adjustment if a dispute is not settled by the first methods tried.

When any grievance or grievances shall arise between the Mine Manager and the miners or mine labourers and they fail to reach an agreement, the miners or mine labourers shall refer the grievance or grievances to the Mine Committee, and should the Mine Committee fail to reach an agreement with the Mine Manager then the Mine Committee, with a representative or representatives of the District Executive, shall carry the grievance or grievances to the Local

*The clause in this agreement dealing with method of settling disputes.

Superintendent. Should they still fail to reach an agreement, the grievance or grievances shall be referred to the General Superintendent and the District Executive. It is agreed that the time allowed for the settlement of disputes through the foregoing procedure shall not exceed 30 days. Should, however, any strike, lockout or other cessation of work arise through a grievance such period of strike, lockout or cessation of work shall not be considered as part of the 30-day period referred to immediately above.

Joint Board of Adjustment. Should the above method of settling disputes end in failure, the grievance or grievances shall be referred to the Joint Board of Adjustment as set up and agreed to at the Joint Labour Conference held in Halifax on December 12, 1940, under the chairmanship of the Hon. L. D. Currie, Minister of Mines and Labour for the Province of Nova Scotia.

According to the recommendations made at the above meeting this Board shall be composed of one member appointed by the Company from the Management of one of the Companies operating in District No. 26, United Mine Workers of America, and a representative appointed by and from the District Executive Board of District No. 26, United Mine Workers of America, and a Chairman selected by the two aforesaid members. If the two representatives of the Management and the Union fail to agree upon a Chairman, the Chairman shall be named by the Minister of Labour of Canada.

The Chairman and members of the Board shall serve for the term of this agreement. The Board shall render its decision in any case within 15 days after its submission to the Board. If the majority of the Board agree, their decision shall be final. In case of disagreement, the decision of the Chairman shall be the decision of the Board and shall be equally final and binding on the respective parties.

The Board shall have power to consider, deal with, or examine all disputes or grievances existing or which may hereafter exist between any operator and the union in District 26, United Mine Workers of America, provided that this power shall not extend so as to authorize the Board to consider, deal with or examine any dispute or question involving rates of pay, working conditions, or other matters being subject of an agreement between the operator and the union. Provided, however, that this power shall extend to grievances arising as a result of abnormal conditions.

Certain other Nova Scotia agreements have provision for the selection of an umpire instead of board of adjustment, the decision of this umpire to be final. In one case if the parties cannot agree on an umpire they will request the Chief Justice of the Supreme Court of Nova Scotia to name one.

Of the New Brunswick agreements, one has provision for a joint board of adjustment, one for reference to the federal Department of Labour, and three for the appointment of an umpire. The chairman of the board of adjustment in one agreement and the umpire in two other agreements, are to be chosen by the

Chief Justice of the Supreme Court of New Brunswick if the parties fail to agree on a choice.

The agreements in Saskatchewan, Alberta and British Columbia generally follow two patterns. For those which are made between individual companies and the union, they are similar to the following:

In case any dispute or grievances arise under this agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the companies or any person or persons employed or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievances or disputes shall be submitted to the Pit Committee, the person or persons affected shall endeavour, by personal application, or with the Secretary or workmen's agent, to the Pit Boss, Overman or Foreman in charge of the work where the dispute arises, to settle the matter, and in the event of them agreeing, their decision shall be final.

In case any local dispute arises in any mine and the failure to agree between the Pit Boss, Overman or Foreman in charge of the work where the dispute arises and any employee, the Pit Committee and the Mine Superintendent or the Mine Manager shall endeavour to settle the matter and if they agree, their decision shall be final.

In the event of the failure of the Pit Committee and the mine management to settle any dispute so referred to them, the matter in dispute shall be referred to the mine management and one or more District Officers of the U.M.W. of A., District 18, who shall endeavour to settle the dispute as speedily as possible. In the event of their failure to agree, they shall endeavour to select an independent chairman, and failing to agree upon an independent chairman shall ask the Minister of Labour to select such chairman, whose decision shall be final and binding on both parties.

The two agreements in Alberta and British Columbia made between associations of employers and the union have procedures similar to each other. The following extract is from the agreement of the Western Canada Bituminous Coal Operators' Association.

In case any disputes or grievances arise under this agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company, or by any person or persons employed, or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievances or disputes shall be submitted to the Pit Committee, the person or persons affected shall endeavour by personal application to the Pit Boss, Overman or Foreman in charge of the work where the dispute arises, to settle the matter, and in the event of them agreeing, their decision shall be final.

In case where a workman is making personal application as referred to above, and wishes to be accompanied by one member of the Pit Committee or by a member of the Local Executive, he shall be permitted to do so.

In case of any local dispute arising in any mine and failure to agree between the Pit Boss, Overman or Foreman in charge of the work where the dispute arises and any employee, the Pit Committee and Mine Superintendent or Mine Manager shall endeavour to settle the matter, and if they agree, their decision shall be final.

In the event of the failure of the Pit Committee and the Mine Superintendent or Mine Manager to settle any dispute so referred to them, as well as in the event of other disputes arising, the matter in dispute shall be referred in writing to the Commissioner of The Western Canada Bituminous Coal Operators' Association and the President of District 18, United Mine Workers of America, who shall meet as soon as practicable, and not in any

event later than fourteen (14) days, with a joint Committee of six (6) composed of the Commissioner of the Association, the General Manager or General Superintendent of the mine where the dispute arose and another appointed by him, the President of District 18, the President or Secretary of the Local where the dispute arose and one other District officer. If they agree, their decision shall be binding on both parties. In the event of the failure to agree, they shall endeavour to select an Independent Chairman, and failing to agree upon one, the Commissioner of the Association and the President of the District shall ask the Federal Minister of Labour to appoint such Chairman. The decision of the Committee thus constituted shall be binding on both parties.

Appendix

Since the completion of the above study, new agreements have been made between the Western Canada Bituminous Coal Operators' Association and District 18 of the United Mine Workers of America and between the Domestic Coal Operators' Association and the same union, which together affect nearly all the coal miners in Alberta and the Crow's Nest Pass district of British Columbia, for the period October 1, 1946 to March 31, 1948, during which period no notice of termination is to be given or accepted by either party.

The new agreements are similar to those previously in effect for these mines with the following changes:

The new agreements provide for the creation of a joint Commission to be known as the Mechanized Mining Commission, which shall consist of six representatives of District 18 of the union and six representatives of the employers (two appointed by each of the above-mentioned associations and one each by operators in British Columbia and Saskatchewan respectively). This joint commission is to meet to organize within 60 days after the signing of the agreements and its duty is "to make a joint study of the problems arising from mechanization of coal production by the use of conveyors, mobile loading machines and such other mechanical equipment as may be introduced, for the area covered by District 18, United Mine Workers of America, including the problem of displacement of employees." This Commission is also to consider methods by which production may be improved and to report its findings and recommendations to the respective wage conferences in March, 1948.

Hours and overtime: the normal work week is reduced to five days from Monday to Friday inclusive and any time worked over 8 hours per day or 40 per week in any one week is to be paid at time and one half and rate and one half respectively. Certain provisos are added to this clause, including: provisions

for repair and maintenance men working on the sixth day when required; if the mine is idle on any day from Monday to Friday in any week due to circumstances beyond the control of the company, Saturday is to be considered a regular day; men on repairs to mine or machinery and underground supply men may, if required, start their week on Tuesday instead of Monday; on all continuous employment swing shifts may be employed and arrangements made between the company and the local union to keep an orderly change of shifts without application of time and one half rates, but in no case shall the additional time exceed on the average two hours per week.

The list of holidays to be observed is reduced to ten (New Year's Day, Good Friday, May 1, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Remembrance Day, Christmas Day and Boxing Day) and men required to work on any of these holidays are to be paid at the rate of time and one half and rate and one half.

Vacation: one day's credit will be granted any employee who has not lost more than one working day during the month, but if any employee averages 20 working shifts per month during the year he will be entitled to the maximum which is 12 days vacation with pay annually. The basic period for vacation computation is the 12 months ending March 31 of any year. Pay for vacation is at the normal daily rate for the classification in which the man is employed in the case of employees on a day wage basis, and datal rates for contract miners. Regulations are included under which employees absent from work for a limited time due to sickness, leaves of absence and other specified circumstances will nevertheless be credited with vacation time. Preference of time of taking vacations is to be according to the order applications are received, subject to arrangement with the Colliery manager and employees may accum-

ulate their vacation for two years if they wish. The companies, however, reserve the right to close down the mine for a two weeks' period for vacations.

Wages: New wage scales embodying wage increases are provided by the agreements and have been approved by the National War Labour Board. Wage rates have been increased from time to time since 1938, and in the case of the Western Canada Bituminous Coal Operators' Association, these increases plus the latest increase under this agreement amount to \$3.17 per day over the 1938 rates for contract miners.

Welfare Fund: A fund is to be established by the payment of 3 cents per ton on all coal

sold or used by the operators to be known as the Welfare Fund of District 18, United Mine Workers of America which will be administered solely for the use of the members of the union. This money is to be paid into the fund from the time of the signing of the agreements and is to be held in trust until such time as the joint committee of the operators and the district of the union bring in a recommendation to the parties as to the character and purpose of the fund and the form and rules governing its administration. When such report is adopted by the parties, three trustees will be appointed, one by District 18, United Mine Workers of America and one by the coal operators, these two to choose a third trustee.

The Closed Shop in Britain

THE question of the "closed shop" has recently evoked considerable discussion in Great Britain. The controversy was precipitated late in August by a decision of the London Passenger Transport Board, a public corporation, to employ in future, in grades covered by its agreements with the Transport and General Workers' Union, only members of that union.

The issues involved in this decision were debated in the House of Commons on October 14 and again on November 19; while consideration of the matter at the annual convention of the Trades Union Congress led to the adoption of a special report setting forth the policy of the T.U.C. on the closed shop.

A careful distinction should be made between the different circumstances under which the term "closed shop" is used in Canada and the United States on the one hand and in Great Britain on the other. On both sides of the Atlantic labour's objective has been the same, i.e. to achieve 100 per cent trade union membership.

In seeking the "closed shop" or "union shop" on this continent, however, labour has generally had as its objective the embodiment in a collective agreement between union and management of a formal clause providing for the employment of union members only. (A "closed shop" proper means that all employees must be paid-up members of the appropriate union when taken on, and must continue so while employed; a "union shop" requires all employees to join up after a limited period on the job, and to continue as members.)

In Great Britain, on the other hand, the objective of 100 per cent trade unionism has not generally been sought through a closed or union shop clause embodied in a formal contract. This, according to an article in the October issue of *Labour and Industry in Britain*, is because "in a great many occupations it is completely taken for granted, without being put in writing, that the employer will not hire non-union labour. Where the unions are still not strong enough to secure this, there is still no dominant feeling that it could be secured by an official closed shop policy. Such growth, it is felt, must come freely through better union organization. Nor do British unions use the check-off as a means towards strengthening their hold on members. Here too they have maintained that voluntary payment direct to the union officials and not through the employer produces greater union cohesion and loyalty."

A different problem is at the root of the present controversy in Britain, however, which

arises not from the normal efforts by unions to secure 100 per cent membership in a plant, but over the question of breakaway or dissident unions.

British legislation, unlike that existing in Canada and the United States, governing the certification of trade unions, does not provide for the official selection of a single union by workers in a plant; thus permitting the simultaneous existence of two or more unions within an industrial grouping. Where such a condition exists, many unions contend, it tends to obstruct the implementation of planned policies and efficient operation of collective agreements. "In practice overlapping is preventable if the unions concerned are affiliated to the Trades Union Congress, for jurisdictional and demarcational questions can be arbitrated if necessary by that body. Where, however, union members are faced with what they consider to be a non-bona fide union, or a company union, or a splinter group that has broken away from the parent body, members are inclined to be resentful, and if they are strong enough they take direct action.

"The case from which the present closed shop question arose falls into this last category. Following a strike in 1937 by London transport workers, a section of the workers who were not satisfied with the decision to return to work formed a dissident union which the main body of workers, members of the Transport and General Workers' Union, have strongly resented. The Board made its decision not to employ in future (in these grades) any but members of the T.G.W.U. in order to avoid a threatened stoppage."

An application by the dissident union for an injunction to prevent the dismissal of non-members of the T.G.W.U. was refused by a British court and 12 non-conforming employees were ultimately dismissed (see elsewhere in this issue, p. . . .).

This L.P.T.B. decision is described as being of prime importance as it is the first case where a public utility undertaking has agreed to make union membership a condition of employment. Discussion has centred over the question of whether this will be regarded as a precedent for the establishment of the closed shop in public corporations or Government-established boards such as are being set up in nationalized industries.

The various other cases which have arisen in connection with the closed shop question appear to be related to the same basic problem although differing in detail.

Members of the T.G.W.U. employed at the Smithfield meat market in London went on strike against the presence of the "Guild of Clerks and Salesmen" an independent splinter group not affiliated to the T.U.C. The main objection appeared to be that the Guild was a company union and the strike was settled when an understanding was reached that there would be a public inquiry into the general unrest in this market.

Several British civil service unions have claimed, not the closed shop, but exclusive bargaining rights in certain grades where they possess a majority of membership. This has the effect of asking the Treasury to withdraw the limited recognition it gives a breakaway group at present.

The Union of Post Office Workers similarly has asked withdrawal of recognition from three small breakaway organizations in the Post Office.

The National Union of Mineworkers has made public its intention to demand that membership in a recognized union be made a condition of employment in the nationalized coal industry. In addition to the formal closed shop, the mineworkers will also seek the check-off, it was announced.

Repeal of the Trades Disputes Act has made it legal for local governments to impose union membership as a condition of employment, according to the article. T.U.C. executives have stated that many local authorities will shortly be approached on this question.

By contrast, in the British Overseas Airways Corporation, one of the breakaway groups has struck because of the Corporation's refusal to extend recognition to it.

Annual Meeting of T.U.C.

At the annual meeting of the T.U.C. a special report on the closed shop was issued by the Executive Council and approved by the meeting.

This report declared that "closed shop" was an inaccurate term to describe the aim of the T.U.C.

"The closed shop in the sense of an establishment in which only members of a particular union can be employed to the exclusion of members of other unions, is alien to British trade-union practice and theory. The Congress has never consented to recognition of an exclusive right to organize by one union where other unions have built up their organization side by side."

However, the statement emphasized that the T.U.C. would not recognize a new union that tried to invade a field already occupied by a single national union. Moreover, the T.U.C.

would refuse to recognize so-called break-away unions; and above all it would refuse to admit the claim that a workman ought to be free to join a union or not as he pleased. In regard to this latter issue the General Council explained that its claim was based on the fact that "the consequences of non-unionism cannot be limited to the individual non-unionist. Where the common experience of workpeople concerns the need of trade unionism," it stated, "and where their sense of justice is against non-unionism, the non-unionist contributes to instability and irregularity in the conduct of industry and his position is plainly untenable. A union which has the responsibility of maintaining fair wages and working conditions must also have the right to determine, according to the circumstances in the particular case, whether or not it is wise or safe to tolerate non-unionism and thereby permit the presence of actual or potential blacklegs, in industries where union rates and conditions have been established."

House of Commons Debates

On October 14 the Opposition in the House of Commons moved an amendment, which was in effect a condemnation of the closed shop, to a Government resolution amending the fair wages clauses in Government contracts. The mover, Mr. H. Strauss, termed the closed shop a "great threat to human liberty," and pointed to the danger of one great union or labour front becoming either a power ruling the House or a power in alliance with or subservient to the Government.

Speaking for the Government, the Parliamentary Secretary to the Minister of Labour, Mr. Ness Edwards, said it was vital to the maintenance of the system of collective bargaining that nothing should be done to weaken the authority of the organizations of workers and employers who were parties to the machinery of negotiation. Minorities must accept the will of the majority, and no encouragement should be given to those who disliked decisions to form dissident unions.

The Opposition amendment was rejected by 266 votes to 126.

On November 19 the issue was raised again in the House when Mr. F. C. Byers, Liberal, moved an amendment to the King's Speech deploring enforcement of the closed shop in industry. He asked for the appointment of a Royal Commission to examine the closed shop in its relation to modern economic and industrial life. Supporters of the Government again argued that the policy of the trade union movement was to prevent the formation of "splinter" unions. The amendment was defeated by 316 votes to 155.

Polish Veterans for Farm Work in Canada

IT became apparent in the early months of 1946 that there would be a continued shortage of experienced farm workers in most parts of Canada during the year. This shortage resulted in part from increased requirements of food to meet ever-increasing world demands, and in part from the fact that many former farm workers who had been in the Armed Forces and war industries were not returning to agricultural employment. It was also realized that the removal of manpower controls and the return of prisoners of war tended to decrease the supply of workers available to agriculture.

As one means of meeting this shortage, plans were developed between the Canadian and British Governments to obtain the services of members of the 2nd Polish Corps at present in Italy, where they had fought valiantly alongside Canadians of the 8th Mediterranean Army.

A mission was sent to Italy by the Federal Department of Labour to select up to 4,000 single veterans from among those who volunteered to work on Canadian farms. It was understood that the veterans, who would all have had farm experience, would sign an undertaking to work in agriculture in Canada for a minimum period of two years, and that after arrival in Canada they would sign an agreement with farm operators to whom they were referred, setting forth the conditions of employment.

The members of the Canadian mission who went to Italy were:

H. R. Hare, National Employment Service, Department of Labour (head of mission); Dr. F. S. Parney, Department of National Health and Welfare; Dr. G. Audet, Department of National Health and Welfare; Staff Sergeant K. Shakespeare, R.C.M.P.; Sergeant J. Stevenson, R.C.M.P.; J. A. Meindl, National Employment Service, Department of Labour; F. A. Dubenski, National Employment Service, Department of Labour.

The mission reached Italy during the latter part of August. The selection work was begun on August 28th, after preliminary arrangements were made with the General Headquarters of the Central Mediterranean Forces and the Headquarters of the Polish Corps. In the Mission's activities, much assistance was received from these Headquarters in providing interpreters and clerical staff, and in arranging for transportation and accommodation.

The selection work was undertaken over a period of approximately six weeks at three centres where members of the Polish Corps were stationed. Those who volunteered to come to Canada at each of these points were as follows:

Porto Recanati	1,200
Falconara	1,300
Cesena	2,000

Each of these 4,500 members of the Polish Corps filled out an application form. On the basis of these and Army records, an initial screening was made. Out of the total number, some 3,475 were interviewed individually, from whom 2,902 were finally selected as having suitable farm experience and satisfactory physical and other qualifications. It was not possible to secure a larger number of suitable Polish veterans from the members of the Polish Corps remaining in Italy.

The Polish veterans were organized into groups of fifty, with an English-speaking leader in charge of each group. These groups were dispatched to Lamay Camp near Naples, where they remained until they left for Canada on two ships, the *Sea Robin* and the *Sea Snipe*, early in November.

The British Government assumed responsibility for transportation to Canada, as well as providing a clothing allowance and Army gratuities, to be paid to the men later. Before disembarking at Halifax, the veterans received their Army discharge.

Through the co-operation of officials of the Departments of Immigration, National Defence, Justice, and Labour, the veterans were quickly cleared on arrival at Halifax and despatched on special troop trains to distribution centres across Canada. Arrangements for transportation and accommodation at the distribution centres were made by the Department of National Defence. At each centre the veterans were given an issue of work clothes, and a final medical examination before being referred to farm employment. Expenses for transportation from Halifax to the distribution centres, and for accommodation at these centres were borne by the Department of Labour. Subsequent transportation to farms, clothing and other expenses were shared under the Dominion-Provincial Farm Labour Agreements.

Applications from farmers for the services of the veterans were made in advance through

the National Employment offices and the Provincial Agricultural Services. These applications, which considerably exceeded the number of veterans available, were carefully screened prior to the arrival of the veterans by the Dominion-Provincial Farm Labour Committees in each province. On the basis of these approved applications, the 2,902 veterans were allocated approximately as follows:

P.E.I.	20
Nova Scotia	122
New Brunswick	60
Quebec	250
Ontario	1,350
Manitoba	225
Saskatchewan	275
Alberta	500
British Columbia	100

In most cases the veterans were sent from the distribution centres to Local Employment and Provincial Agricultural offices for placement. At these offices the farm employers and the Polish veterans met and signed their farm labour agreements. These agreements set forth the conditions of employment. The farmer undertakes to provide year-round employment, at the going farm wages of not less than \$45 per month and satisfactory living and working conditions. The veteran, on the other hand, undertakes to perform the duties of employment faithfully under the conditions set forth.

Reports received to date indicate that the veterans are adapting themselves quickly to life on Canadian farms. The fact that they are proving to be satisfactory workers is borne out by the continued applications being received for the services of these veterans from farmers in all parts of Canada.

Conventions of Labour Organizations

SHORT accounts of the 1946 annual conventions of the British Trades Union Congress, and the two major labour organiza-

tions in the United States, the American Federation of Labour and the Congress of Industrial Organizations, are presented below:

Seventy-Eighth Trades Union Congress

Meeting in Brighton for five days during October, the British Trades Union Congress, which now has a membership of nearly 6,700,000 in 192 unions, held its 78th annual conference. This latest membership figure, it was reported, represented an increase of nearly 100,000 over the previous year's total.

An agenda of 83 resolutions were dealt with by the 800 delegates attending the conference, embracing many aspects of nationalization, the Government's foreign policy, and hours and working conditions. Among the numerous speakers to address the meeting were Prime Minister Attlee, Emanuel Shinwell, Minister of Fuel and Power, Mr. George Noble, fraternal delegate of the Canadian Trades and Labour Congress, George Meany, fraternal delegate of the American Federation of Labour, Louis Saillant, General Secretary of the World Federation of Trade Unions and M. P. Tarasor representing the All-Union Central Council of the Trade Unions of the U.S.S.R.

Address of Prime Minister Clement Attlee

In an address, preceding a scheduled debate on a resolution scoring the Government's policy in Greece, Spain and Germany and condemning "the policy of Anglo-American domination and the isolation of the Soviet Union", Prime Minister Attlee strongly defended his Government's foreign policy. He stated that the resolution was filled "with the kind of misrepresentation to which we have become accustomed from members of the Communist Party, their dupes and fellow-travellers...."

"I claim that we are carrying out the principles of labour's international policy. That policy is based on our belief in freedom and democracy and the right of nations to decide freely for themselves the kind of government and society they desire.

"Let me say democracy is becoming a much abused word. It is often used by those who have never understood or practised democratic principles, to mean the achievement of power, by hook or by crook, by the Communist party, while freedom means the denial of liberty to all those who refuse to accept the Communist philosophy."

The Prime Minister asked for a basic reorientation in trade union thinking concerning traditional restrictive practices. He held that the advent to power of labour's own political party imposed changed conditions which the unions must meet by abandoning restrictive practices and aiming at vastly increased production.

"Workers must realize that, whether they work for the State or for a private employer, they are producing the stock of goods and services from which we all derive the necessities and amenities of life. Restrictive practices on either side, which often had a justification in the conditions of a past economy, are out of place today.

"The provision of houses, coal, capital and consumer goods to the extent which the nation requires depends on the earnest efforts of those engaged in production and distribution. Unless they give of their best, the nation will go short.

"It is therefore natural that I, as the head of the Government should ask all of you, as leaders of labour, to do your utmost to impress on all the simple truth that every worker is concerned, not just with his own wage, still less with somebody's profit, but with the standard of life of the nation, indeed, the very life of our country."

He told the delegates that the future legislation would steadily implement labour's program.

Foreign Policy

In the debate over foreign policy the Government's actions were upheld by a substantial majority. However a separate resolution devoted to a condemnation of Generalissimo Franco and recommending the severance of economic and diplomatic relations with Spain was passed by a majority of 4 to 1.

Much ill-will was manifested towards the Poles, previously in the armed forces, who have been settled in Britain. A resolution strongly denunciatory of the resettlement scheme precipitated many excoriating addresses by delegates alleging that amongst the great majority of these Poles undemocratic ideology prevailed. The resolution was defeated by a narrow margin after the General Council had

preferred the assurance that it would "in no circumstances countenance the employment of any known Fascist" in the country.

Closed Shop

The Conference popularly accepted a resolution embodying the position of Congress leaders on the controversial question of the status of the closed shop within the T.U.C. (see p. 1708 in this issue). It opposed the closed shop but emphasized the continued pursuit of the aim for the 100 per cent union shop. A summation of the attitude of the officers constituting the General Council was presented in a statement made by Mr. Charles Dukes, Chairman of the T.U.C. He said that the "closed shop in the sense of an establishment in which only members of a particular union can be employed to the exclusion of members of other unions, is alien to British trade-union practice and theory.

Mr. Dukes in his speech asked the Congress to recognize that organizations exist outside the affiliation of TUC which have a right to continue.

"I believe that the principle of voluntary association is valid in its application to every activity of citizenship," he said. "It is a guarantee against class tyranny, government dictatorship and the servile state."

Hours of Work

Resolutions calling for a 40-hour week and two weeks vacation with pay for all employees were passed without dissent. The delegates accepted a report of the General Council that there was "no industry in which the principle of a forty-hour work-week could not be accepted and implemented."

Other Resolutions

Other resolutions adopted by the Congress recommended:

The strengthening and expansion of Joint Production Committees;

The establishment of a guaranteed weekly wage in all industries in Britain;

The establishment of a Council for Consumer Research for the purpose of publishing findings of investigations into the utility, efficiency, cost, and standard of commodities for the protection of consumers;

Equation of the wages and working conditions of farm workers to those obtaining in other skilled industries;

Amelioration of conditions and opportunities in industry and commerce for young people;

That the Congress call upon the Government to stand firm for implementation of the proposal for a National Health Service, and to include in it an Industrial Health Service;

Retention of control by the Government of factories erected during the war;

That permission be granted to the Trade Union movement to take a responsible share in the deliberations of the United Nations.

Sixty-Fifth Convention of American Federation of Labour

The sixty-fifth annual convention of the American Federation of Labour was held in Chicago between the dates of October 7 and October 17. Nearly 650 delegates representing some 7,100,000 AFL members passed resolutions on a large number of important issues which composed the meeting's agenda. Among these were resolutions calling for liberalization of the United States Social Security Act, raising of the minimum wage, shortening the work week, maintenance of free collective bargaining, and reduction of federal income taxes on workers' incomes.

Among the numerous speakers who addressed the delegates were Percy Bengough, President of the Trades and Labour Congress of Canada, United States Secretary of War, Robert P. Patterson, Attorney General Tom Clark, General Omar Bradley, General Carl Spaatz

and fraternal delegates from the British Trades Union Congress and a number of Latin American countries. During the proceedings honours were conferred on President William Green and Vice-Presidents Mathew Woll and Harry Dubinsky by the British Government for their wartime efforts on behalf of the British people.

Address of President William Green

President William Green in his keynote address invited all workers opposed to ideologies inimical to the American way of life to stand with the Federation "in defence of Americanism."

Mr. Green opened his speech with a testimonial to the part labour played in producing the vast amount of materials of war, which he

alleged was decisive in the recent defeat of Fascism and Nazism. He said he resented the attacks being made upon organized labour by those whose malevolence was fundamental, and who would always hate labour no matter what the justification. "We challenge one of them to point to a single instance where our people failed to respond to the call of the Government during all of those trying years."

President Green refuted the allegation that labour was limiting production. He said that such an accusation was the result of a lack of thought because the application of new means and new methods were constantly improving the productive capacity of the individual. Now, "fewer workers are producing more." However, he warned that the membership of the Federation would not tolerate the benefits of this increased efficiency being received solely by capital. "We are determined," he said, "to mobilize our economic strength and to force from unwilling employers, if necessary, that wage standard to which we are entitled under this modern development situation."

Continuing, he praised John L. Lewis of the United Mine Workers for the successful struggle he waged for the creation of a welfare fund for the mine workers and stated that henceforth all affiliates of the AFL would make it their policy to demand the establishment of similar funds for their members.

Resentment was expressed against attempts being made "to utilize any branch of organized labour for the purpose of imposing" upon the nation, "a form of foreign conceived ideology, totally unsuited to our American way of life."

In his peroration, Mr. Green stated that the American Federation of Labour had passed from the point where it served as a mere organization. "It is now part of the institutional life of our nation. It is an institution in itself."

In answer to a suggestion, proffered by Mr. Tom O'Brien, a Fraternal Delegate from the British Trades Union Congress, during an address made later in the proceedings, that the Federation should enter the World Federation of Trade Unions, Mr. Green stated that this latter body was undemocratic and that decisions within the organization could not be made "without first ascertaining what the dictator in Moscow shall say to them....." He made the observation that British labour's co-operation with Russia in the World Federation of Trade Unions and its refusal to accept the Communist Party in the British Labour Party made the position of the British labour movement "contradictory."

Address of Mr. Percy Bengough

In opening his address, Mr. Percy Bengough, Fraternal Delegate from the Trades and Labour Congress of Canada, spoke of the formation and early history of the Congress—a history which he said proved conclusively that, with a few minor exceptions, every piece of labour and social legislation on the statute books of Canada had its inception in the conventions of the Trades and Labour Congress. This Congress, he said had continued as the driving force for the introduction of social improvements and better lives for Canadians inside and outside of the affiliated membership.

Citing the record of labour in Canada during the war Mr. Bengough said: "Our policy of no strikes in wartime was adhered to almost one hundred per cent. The affiliated membership of our Congress hewed to that line and stayed on the job, oftimes under objectionable circumstances. The result, as is well known, was a great and steady flow of the urgently needed war materials and supplies from Canada, not only to Canada's fighting forces but also to the forces of our allies."

Referring to wages and conditions of employment Mr. Bengough said: "There is still strong opposition to the urgent need of Canadians having a buying power in balance with their increased productive ability. Even manufacturers and merchants whose business life is at stake unless there is a sound and thriving home market are often found with the opposition. Fear is expressed that too high a standard of living will cause a demand for goods and cause inflation. Yet, without criticism, Canada has advanced enormous sums of money to other countries—twelve hundred and fifty million dollars being advanced to Great Britain alone in the hope and expectation that this will be used for the purchase of Canadian goods, without any suggestion that this demand for our goods will cause inflation."

Resolutions

Among the many resolutions which were passed were those calling for:

Support of the five-day thirty-hour week in American industry;

Increased social security benefits and coverage and the enactment of health insurance legislation;

Upholding of the right to strike and assailing efforts to erase this right;

Raising the minimum wage;

Opposition to anti-labour legislation;

Construction of more apartment units for rent to alleviate the severe housing shortage instead of concentration on the erection of one-family homes;

More labour education in schools and condemnation of the use of big-business propaganda in schools;

Strong condemnation and prosecution by the Department of Justice of the Klu Klux Klan;

No relaxation of immigration laws; but urging use of unfilled quotas;

Support of the demands of public school teachers for better salaries;

Denouncement of the World Federation of Trade Unions as a "reactionary development";

Establishment of a permanent Fair Employment Practices' Commission to end dis-

crimination because of race, colour or religion, in hiring; and

Opposition to compulsory military training in peacetime.

A proposal calling for the nationalization of mines, transportation facilities and public utilities was defeated. President Green and all other members of the Executive Council were re-elected.

Eighth Annual Convention of Congress of Industrial Organizations

With 600 delegates in attendance the Eighth Annual Convention of the United States Congress of Industrial Organizations was held in Atlantic City during the week of November 18.

Among the numerous matters dealt with by the delegates the most important consideration was reserved for the economic and wage aspects of collective bargaining which, it was stated by President Phillip Murray, were bound to be discussed in conferences of many affiliated unions following the close of the convention.

Many noted personalities addressed the delegates. General Dwight D. Eisenhower told the assemblage that he deplored the talk about the inevitability of war but warned that the United States "must maintain a protective shield adequate to our needs" until nations abandon the use of force. The Secretary of Labour, Mr. Lewis Schwellenbach hailed the part played by the CIO in establishing the democratic procedures of collective bargaining in many industries holding the key to the nation's welfare. Rabbi Stephen S. Wise, President of the American Jewish Congress, recalled Hitler's use of anti-semitism in destroying trade unions and other democratic groups in Germany. He told the delegates that the real and ultimate objective of anti-semitism and all racism was the destruction of all that political and economic democracy means.

Address of President Phillip Murray

In his keynote speech President Phillip Murray reviewed the circumstances which precipitated the series of CIO strikes during the early part of 1946. He stated that during the period, reduced take-home pay, which resulted from a shortening of the work week and the elimination of overtime payments, together with rapidly increasing prices made wage increases imperative if workers were to be able to procure the necessities of life and provide the purchasing power essential to the acceleration of speedy reconversion and full employment.

The formulation of wage programs, Mr. Murray stated, was based upon the contention that the profits of American industry made absorption of substantial wage increases feasible without compensating price adjustments. Despite this, he alleged, "OPA acceded to the demands of the employers in elevating the prices of particular commodities until these prices reached almost unbelievable inflationary trends."

Mr. Murray then proceeded to adduce certain facts which he claimed illustrated the "diabolical slander and misrepresentation" which occurred in many sections of the public press in charging the CIO with sole responsibility for strike action.

"No organization affiliated with the Congress of Industrial Organizations in the early part of 1946, whilst the nation was undergoing the rigors of its wage struggles, precipitated a strike. Not a single solitary organization affiliated with this CIO movement in the early part of 1946, of its own volition, precipitated a strike. I have but to point to the record. The record speaks for itself."

He said that the United Steelworkers of America had responded to the request of the President of the United States to delay the calling of the steel strike for one week to permit him to conciliate the dispute. The decision subsequently rendered by President Truman was accepted by the Union but "definitely and very arrogantly" rejected by the steel industry he said. "It was the heart and core of big business striking against its government, striking against a decision made by the President of the United States." Wage increases amounting to approximately \$165 millions for all employees in basic steel were agreed to by the industry only after it had been accorded price increases amounting to approximately \$300 millions, he stated.

In the automobile industry, he said, the findings and recommendations of a Government fact-finding board had been similarly accepted by United Automobile Workers Union and rejected by the industry previous to the calling

of a strike. Continuing, he cited disputes in the electrical, oil and packing-house industries as further examples of refusal by industry to accept recommendations of Government boards.

Government economists, in a factual report submitted to the President, claimed "as early as September, 1945, that American business by and large could afford to make possible the payment of 24 per cent in wage increases without necessarily disturbing or agitating any inflationary spirals in this country," Mr. Murray said. He claimed that the wage increases received by labour "have been completely wiped out" in the ensuing period through price rises, despite these findings, while business profits on the other hand which were 5 billions of dollars after taxes in 1939, have risen to an indicated level of 15 billions for 1946.

"This is an unprecedented profit, a higher profit than ever experienced at any time in the history of American business. I say that a 15 billion dollar profit for American industry represents a threat to our national economy, and a graver threat to the maintenance of our system of free enterprise."

He concluded his address with a warning that it would be a mistake to regard the Republican victory in the November 5th elections as a mandate to introduce repressive measures against labour, and a reference to the suspicions which, he alleged, were held in many other lands of the motives underlying the distribution of relief and the lending of money by the United States. "It would indeed be regrettable and most unfortunate if the lending, and gift-giving propensities of the American Government should be utilized for the purpose of forcing our way of thinking down the throats of many people all over the world."

Wages and Welfare

The convention adopted a report on wages and welfare which stated that the present soaring of industrial profits and the accompanying decline in the workers' share of national income made the granting of substantial wage increases imperative. It stated that "our people must have sustained purchasing power and a decent wage to avert the swift economic tragedy which now confronts us."

Foreign Policy

Resolutions were adopted on United States foreign policy which recommended: the

severing of all political and economic relations with Spain and Argentina, which were accused of being breeding places "of world fascism"; the granting of unstinted support to the United Nations; the ceasing of intervention in Chinese affairs and the ending of military aid to any faction; that under no circumstances should food or any other aid given to other countries be used as a means of coercing or influencing free but needy people in the exercise of their rights of self-government.

Other Resolutions

Among the great number of other resolutions adopted were those recommending:

Establishment through collective bargaining of adequate pension plans, health insurance plans, group hospitalization programs, and a guaranteed minimum annual wage in American industry;

Denouncement of the United States National Labour Relations Board for a "demonstrated bias against CIO unions";

Continuation of the CIO Political Action Committee in its present form and a strengthening and intensification of its activity;

Intensification of campaigns to organize in areas where employers have manifested violent opposition against the right of self-organization;

Granting full support to agricultural workers who are "denied the basic rights guaranteed by law to other workers";

Opening the doors of the United States to the thousands of homeless Jews in Europe and bringing "pressure upon Great Britain for the immediate admission of 100,000 Jews to Palestine";

Enactment of permanent federal, state and municipal legislation to establish Fair Employment Practice Committees and outlaw discrimination against Negroes;

Erection of 2,000,000 housing units a year, limitation of profiteering in housing, and elimination of non-essential building;

Opposition to peacetime conscription; and

Improvement in the benefit rates and provisions of the Veterans' Rehabilitation Regulations.

A new preamble to the constitution was adopted which voiced the organization's opposition to all those who would seek to undermine Americans' love for human dignity and exploit the people in the interest of alien loyalties.

President Phillip Murray and other members of the executive council were re-elected. Walter Reuther, President of the United Automobile Workers, was elected as a new vice-president.

Royal Commission on Equal Pay in United Kingdom

Report Distinguishes Between Effects in Public Services and Private Industry

THE Royal Commission on Equal Pay appointed by the Coalition Government in Great Britain in October, 1944, with Lord Justice Asquith as chairman, made its report on November 6. The Commission was precluded by its terms of reference from making any direct recommendations either for or against equal pay. It was directed to:

examine the existing relationship between the remuneration of men and women in the public services, in industry and in other fields of employment; to consider the social, economic and financial implications of the claim of equal pay for equal work; and to report.

Its purpose was, therefore, as stated by the then Prime Minister, Mr. Churchill, in the House of Commons in February, 1945, to provide an analysis from which those responsible for policy would draw their own conclusions.

The Commission sharply distinguishes between the effects of the adoption of the principle of equal pay in non-industrial occupations, such as teaching and the Civil Service, and of its introduction into the field of private industry and commerce. In general, it finds that the removal of sex-differentiation in pay in teaching, local government and the public service would involve little difficulty. In industry, however, the Commission concludes that, if equal time-rates were given, many employers would replace female by male labour whenever possible, and over a larger field the gradual entry of women into new occupations would be made difficult and even checked. The Commission emphasizes that the alternative to an equal pay policy is not necessarily the absence of any policy with regard to women's wages. The effects of the war in breaking down prejudice against women's employment and the breaking down of men's resistance through a successful policy of high employment are important. If these favourable influences are stimulated, much can be done in the near future towards at least a narrowing of the gap between men's and women's rates.

The report is not unanimous on all points. Three of the four women members of the nine-member Commission disagree with the majority concerning the explanation for the prevailing differences between the remuneration of men and women and concerning the economic and social consequences of equal pay in private industry. Subject to this dissent, however, they sign the main report. Three other mem-

bers append a note of reservation on paragraphs concerning overstrain among women workers.

The report, a volume of 220 pages, including four appendices, is divided into two main parts corresponding to the Commission's terms of reference. The first part is a factual survey of the existing relationship between men's and women's pay in the non-industrial Civil Service, the Post Office, the Armed Forces, police, teaching, nursing, other professions, private commerce and industry including agriculture, and an examination of comparable practice in certain other countries. Part II is devoted to an examination of the probable social and economic effects of introducing equal pay. The Commission, at the outset, stresses the complexity of the problem and the difficulty of deciding what is "equal work." They have interpreted the term in the sense of "the rate for the job" which they consider to be the meaning attached to it by most of those who urge "equal pay for equal work." Any inequality in overall value to the employer is left out of account and to that extent "equal pay for equal work" does not, in the report, have the same meaning as "equal pay for equal value to the employer."

In its factual survey the Commission presents much comprehensive information on numbers employed, proportions of men and women, overlap areas (jobs where men and women work together interchangeably), and the existing differential between men's and women's wages. It finds a wide gap between men's and women's rates, varying from 12 per cent in the police force and 20 per cent in comparable grades in teaching and the public service to 53 per cent in manufacturing. In the Armed Forces a woman receives approximately four-fifths of the remuneration of a single man. In the professions, evidence showed that recognized scales provided for the charging of identical fees by men and women.

In Part II the Commission discusses the main reasons alleged for the "less intense" demand for women's labour as a whole than for men's under the headings, legal, natural and conventional factors.

Legal factors include the statutory prohibition of women in all occupations underground in mines and in certain injurious occupations, the restrictions on the employment of women at night and on Sundays, and the limitations

on their hours of work. On this last point, the Commission points out that under modern conditions, the legal limitations on the hours of women's work may render

them less useful to the employer in those occupations in which both sexes are employed and limit the extent to which female can be substituted for male labour in circumstances in which substitution would otherwise be profitable. In this connection we are disposed to draw a distinction between restrictions on (a) normal hours on the one hand and (b) night-work and overtime on the other. As regards (a), the results of collective bargaining have in general overtaken those of legislation so that the latter is no longer an operative factor in rendering women's services of less value than men's. As regards (b), however, the fact that work organized on a basis of continuous shifts cannot be assigned wholly to women, and the fact that they are not available to work overtime beyond a certain limit in times of pressure, do appear to us to be operative factors, both in reducing somewhat the value of their services relatively to those of men at certain points of common employment, and in altering somewhat the balance of supply and demand to their disadvantage over the field of industry as a whole.

As regards natural factors, evidence was given of men being more adaptable and versatile than women, more resourceful in dealing with surprise situations, and therefore worth a higher retaining wage. The Commission emphasized the difficulty of determining with certainty how closely the facts conform to the allegation that "the average man is more efficient than the average woman." The British Employers' Confederation and the Trades Union Congress disagreed on the point. The employers asserted that:

where women are employed on the same work as men, their output is in general lower than that of the men, thereby increasing the number of workers required for a given amount of production and the overhead costs involved in respect of accommodation, machinery, supervision, inspection and administration of labour generally." In support of this assertion they maintain that where men and women are employed at identical piece-rates, the earnings of men are in general greater than those of women. Such enquiries as we have been able to make seem to confirm that this latter contention is true in the case of most though not all of the overlap areas concerned. . . . There are difficulties, partly connected with the matter of the allocation of better-paying work . . . in arguing directly from what happens under time-work.

On the other hand, the Trades Union Congress seem to be more concerned to deny any universal "inferiority" of women to men than to dispute the claim that their efficiency is normally less in the actual areas of common employment. They do, however, appeal as other witnesses have done, to certain statements made by Mr. Bevin, when Minister of Labour, to the effect that in war it had proved possible to substitute women for men in industry on a basis of one for one, instead of, as expected, on a basis

of three for two. It is important, therefore, to remember that Mr. Bevin emphasized that this result was only attained thanks to the special efforts of "managements, production engineers, designers, craftsmen, machine-men, and all the rest", the trade unions having been asked to "break down their operations to the finest point" in order to achieve it. Evidently great care must be exercised in drawing inferences for normal times from this special wartime effort.

Another factor stressed by many witnesses was the shorter industrial life of women which in the words of the Employers' Confederation, means that in general women do not undergo the same degree of training or acquire the same breadth of experience. The result is that women tend to be employed on those tasks which can be more readily learnt and [on] work of a repetitive character. Further the more rapid turnover of female labour, through their shorter industrial life, involves additional overhead costs in respect of the recruitment, training and administration of labour generally.

Less validity was considered by the Commission to attach to the employers' argument that as women do not fill the higher and more responsible posts necessary to the efficient conduct of industry they have a lower "career value" than men. This appeared to have little bearing on the existence of a sex differential in the rates of the great mass of adults who are not so selected and still less relevance to sex differentiation in the higher scales which are reached only by women who have been in continuing employment for a considerable time.

On the question of the higher absence rate of women, which is said to be an important factor in causing differences in overall value, the Commission concluded, after making allowance for the variation from factory to factory and occupation to occupation, for wartime conditions and the employment of a high proportion of married women, that

the higher sickness rate among women is attributed to two factors, first, fatigue dependent on the fact that the woman is doing two jobs, viz. (a) in paid employment and (b) in running a home, and secondly to poor nutrition. A considerable body of statistical evidence is available which shows that gynaecological disturbances are in no way responsible for the rates noted. The evidence that fatigue due to additional home duties is an important factor we accept. The importance of poor nutrition is less easy to determine . . .

The reasons for the lower level in women are complex and not for discussion here, though it should be stated that it has been suggested that since women are paid less than men they have less to spend on necessities, among them food. This low level may well account in part for the higher sickness rate in women. Increased fatigue due to the dual role of home-keeper and wage-earner is to some extent open to correction by provision of home help, industrial nurseries and other social services. The lower nutritional level

should also be open to correction by the provision of adequate meals in places of work, by education in food values and by improvement in shopping and cooking facilities. . . .

We believe that by a reduction in fatigue and an improved nutritional level a decrease in the high sickness rate of women might be brought about. We are unable to say whether the rate could be reduced to the same level as for men by the means suggested. In fact we doubt if the devolution of the additional duties involved in the care of young children could ever be completely brought about, even if it should be thought socially desirable to make the attempt. We doubt, therefore, if it will ever be possible to reduce the sickness absence rates of young married women to that of men. In the case of single women it appears theoretically possible that relief from home duties and improved nutrition might at least considerably reduce their sickness rate. . . .

The Trades Union Congress maintain that the amount of dislocation caused by absenteeism is too slight to be a significant factor in determining wage rates—the employers consider it of material importance. On the statistical evidence as to sickness rates available, which we admit is not altogether satisfactory, we would agree that in present circumstances it must be a factor in reducing the overall efficiency of women and we doubt whether, especially in the case of young married women, it is likely ever to be altogether eliminated, though we expect it may be greatly reduced.

Summing up its conclusions on these natural factors, the Commission states:

We think that the inferior physical strength of women, coupled with their shorter industrial life, their greater tendency to absenteeism, and a certain relative lack of flexibility in response to rapidly changing or abnormal situations, are still important influences tending to depress the general demand for their labour as compared with men's, and so to establish their general weekly wage-rate at a lower level. It does not follow that any one of these factors, e.g. physical strength, will be found to be of importance in every one of the occupations which for the time being are overlap areas. But we think there is a strong underlying tendency towards the overlap areas being established at points at which the relative efficiency of men and women, account being taken of all the factors which we have enumerated, is roughly proportionate to their relative weekly wage-rates as determined by the general forces of demand and supply—this situation being compatible with a much closer approximation to equality of piece-rates, where work is rewarded on that basis. This tendency is, however, in our view qualified and thwarted by certain forces requiring further discussion, so that in certain overlap areas the gap in time-rates, whether those rates are actually paid or are used as a basis for the calculation of piece-rates, is probably greater than the gap in efficiency (even in the comprehensive sense just explained)—one special class of cases of this divergence being that in which there is no clearly demonstrable gap in efficiency at all.

In considering the factors labelled "conventional" the Commission was concerned more with the *indirect* effect of custom in lowering the value of women's work through excluding

them wholly or partially from certain occupations than with the *direct* effect in keeping women's wages lower.

If a wage, low because of custom, is raised, the custom may be destroyed once for all, but, the Commission points out, if the low wage is due directly to customary restrictions on opportunities for jobs, it may be that raising the wage will leave these restrictions unimpaired and free to exercise their influence in some other way. The dividing line between "men's jobs" and "women's jobs" appeared to the Commission to be sometimes a highly artificial one depending on the general social attitude regarding women's "proper" position which prevailed at some previous date, and this has been gradually breaking down.

A more effective restriction is that imposed on the employer by his male employees on the theory that only men should be allowed to do certain jobs. Thus, the *proportion* of women to men employed on what may be described as the same jobs is often limited.

The effect of many women's willingness to accept lower wages in view of their short-term employment and, often, only partial dependence on their earnings, is to divert attention from the majority of women who are dependent on their own earnings and from those who in addition support others, entirely or in part. The Commission, however, found that the relative pay of men and women was affected comparatively little by consideration of family needs.

Similarly, the Commission considered the fact that women were less organized and therefore inferior in bargaining strength to be a factor in the gap between the general levels of men's and women's wages but a secondary factor to the relative intensity of demand—

this latter in turn being determined partly by natural causes and partly by the conventions and pressures of various kinds which, both generally and in particular overlap areas, hinder the extension of the opportunities for the employment of women.

Domestic servants, it is stated, afford an example of unorganized workers whose wages respond fairly freely to supply and demand.

The Commission asserts that the introduction of equal pay would have an important and beneficial effect on the happiness of women, and "far and away the most important result," would remove from men the widespread fear of undercutting.

On the health and efficiency of women as workers, the effects of equal pay seemed less certain. Greater spending power would enable many women, through some domestic help and a more nutritious diet, to increase their efficiency by reducing their sickness absence.

On the other hand, medical testimony differed as to the danger to women's health of competition with men in borderline occupations taxing their nervous and muscular energy. The Commission concluded, on this point:

It seems probable that over a wide range of occupations the woman is as efficient as the man as a physiological machine. In those cases where there is a definite competition between men and women a process of selection would operate so that only the more capable women (and more capable men) would be retained—competition would result in the displacement of the less efficient women as of the less efficient men, but would not affect adversely those who are retained.

As regards the responsibility for dependents, the majority of the Commission hold that the responsibility for dependents of a married man with a family is considerably greater than that of most women.

It is manifest that the welfare of many more persons depends on the level of the man's rate of pay than on that of the woman's rate and in any estimate of the consequence of equal pay this numerical fact must be given due weight.

From a purely economic angle, and ignoring the effects of family allowances and income tax rebates, the Commission concludes that equal pay would result in

a greater divergence between the standards of living of men as a whole and women as a whole than there is at present.

The relief afforded by the present scheme of family allowances is "small" and as regards tax rebates it was felt impossible to make any proper assessment.

Concerning the effects on marriage and the birth rate and the argument that equal pay might tend to discourage parenthood, the Commission considered that the number of marriages would not

likely be affected by the grant of equal pay. Any adverse effect on the size of families would probably occur to a marked extent only if equal pay brought about an absolute and not merely a relative worsening of the economic position of the married man.

In the latter case the married man with a family would press for more than a single person of either sex.

In industry and commerce, therefore, the Commission believed that equal pay would tend to a considerable displacement of women's labour from occupations which they at present share with men.

In the case of private industry and commerce there stand in the way of an immediate, and perhaps also of an eventual, application of an equal pay policy, difficulties of a nature and magnitude not paralleled in the case of the non-industrial sections of the public services, whether national or local. These difficulties arise from doubts as to the precise

extent to which men and women are employed on what is substantially the same work, from differences of opinion as to how, when so employed, the efficiency, in the broadest sense, of the women compares with that of the men, and from the fact that not even the representatives of organized labour desire to see the principle of equal pay introduced in the industrial field by direct government action.

Public Services and the Professions

In teaching, the Civil Service, local government and the professions generally, however, the Commission regards the probable effects of equal pay as likely to be different. There would probably be no change in policy designed to restrict the employment of women; there would be more women in higher posts and to the extent that a higher proportion of women were employed, there would be an improvement in the quality of the persons recruited, the additional women being in lieu of inferior men. In the Commission's opinion, the consequences of equal pay in the Civil Service would be important—

and adverse—only if the resulting common rate were not held at a level at which it competed effectively with the rates payable outside the service to men of the type and quality which the service required. We cannot believe, notwithstanding what was said to us by the Treasury witnesses, that such a situation would be allowed to develop; but if it were to be it could, we think, be remedied, within the framework of an equal pay policy only by re-establishing the common rate on that higher level.

As regards financial consequences in the non-industrial Service, the report tentatively estimates the cost on the basis of an expected peace-time strength of 500,000 employees, as between £5,000,000 and £10,000,000 annually.

In the Post Office the fact that women do not perform night work raises more complicated questions than in the rest of the Civil Service.

With regard to teaching, all witnesses were agreed that any change calculated to result in giving either sex a monopoly would be "not merely undesirable but calamitous." The Commission feels that the natural effect of equal pay would be to attract more and better women to the teaching profession. The effect on men is more "debatable" men might (for good or bad reasons but as a matter of psychological fact) be "discouraged" from becoming teachers partly because equal pay would create a higher standard of living for the women or enhance an existing one. Further, if equal pay results in a dragging down of the pay, unless there is a parallel fall in outside comparable employments, a material drop in the number or quality of male teachers is a possibility which cannot be ignored.

The memorandum of dissent is concerned with the majority view that differences in pay must in part be due to differences in efficiency. Admitting women's lesser physical strength, it points out that this is mainly a disadvantage of the past since the trend in modern production methods is towards the substitution of mechanical for muscular power.

While the evidence does not clearly show that women are always equally efficient with men in the overlap occupations, it does support the view that any difference in efficiency is considerably less than the difference in wage-rates, which often amounts to women being paid about 60 per cent of the men's rate.

As regards the majority view that women are less efficient than men in considerably more than a quarter of all occupations (while women provide roughly a quarter of the labour force), the minority point out that if the rate for the job were everywhere enforced, men would become a "good bargain" to employers—

In times of general unemployment it would follow that women would be unemployed rather than men. This consequence is surely not undesirable? The question of family needs is here of great importance, since, speaking broadly, there is less human suffering caused when a million women are unemployed than a million men.

The dissenting members base their explanation of the causes for the lower rates of pay for women on the relative weakness of union organization among women, long-standing convention and custom, and the prejudice of employers and male workers against the employment of women. The majority feel that unequal pay is an important element in maintaining unequal opportunity. While they concede that equal pay might, from a short-term point of view, lead to the dismissal of women where men are available to replace them, and especially of the least productive women workers, the minority would expect that in the long run it would widen the sphere of women's employment and set up a tendency to scarcity of labour in occupations formerly filled exclusively by women; this would lead to a rise in wages and improvement of conditions in those occupations, and so tend to level up the earnings of women as a whole. With respect to the argument advanced by the majority report that the policy of "full employment" is likely to be jeopardized by any general rise in money wage-rates, the minority "dissent strongly from the view that the fear of inflation should be allowed to prevent changes in relative wage rates which are economically desirable on their own merits."

Dust Control in Cotton Industry

United Kingdom Committee Recommends Welfare Provisions

METHODS of controlling and minimizing the evolution of dust during the carding process in the cotton industry and the proper standards for sanitary accommodation, washing facilities, accommodation for clothing, medical and welfare services, and vacuum cleaning of machinery and floors in the cotton industry in the United Kingdom, are described in Interim Reports of the Joint Advisory Committee of the Cotton Industry.

The Committee was set up by the Chief Inspector of Factories in November, 1944, to enquire into practical methods of improving conditions in the cotton industry. It comprised four representatives each of employers and workers and three of the Factory Department of the Ministry of Labour and National Service. Immediately on its appointment, the Committee named four sub-committees which co-opted technical members to deal with (a) ventilation, humidity, lighting and general amenities; (b) dust in card rooms; (c) spacing and layout of machinery and noise; (d) prevention of mule spinners' cancer and the provision of mechanical methods of wiping-down the carriage tops and roller beams of mules so as to eliminate the manual methods which necessitate entry between the fixed and traversing parts.

Mule Spinners' Cancer

On mule spinners' cancer and automatic wiping-down motions, the Committee's first Interim Report in June, 1945, recommended that, in view of the incidence of epitheliomatous ulceration among mule spinners, regulations should be made to deal with the standardization of mule spindle oil, provision of non-splash devices, and periodical medical examinations of mule spinners. Mechanical wiping-down motions should be provided on all spinning mules where it was necessary to go between the carriage and roller beam for the purpose of manual wiping, except that where paste continued to be used some latitude should be given for experiment as to the type of wiper most suitable. The Committee recommended further that a permanent committee, representing employers, operatives and the Factory Department, should be formed to consider and approve the various methods of carrying out the recommendations and to approve the suppliers of the devices concerned.

Amenities

The Interim Reports of March, 1946, on amenities and the control of dust stress the importance of improving the sanitary accommodation in many mills by providing adequate, up-to-date conveniences and maintaining under close supervision a high standard of order and cleanliness.

Washing accommodation, it is considered, should include one wash basin for each 20 persons on the average, but consideration would have to be given to the mill as a whole. Foot baths and shower baths should be provided for mule spinners, and showers also for any persons doing work under high temperature or humidity. Separate changing rooms should be provided for men and women in the mule rooms, and individual lockers, wherever possible, either in the workroom or in the changing room.

The value of first aid and medical services appropriate to the size of the mill is emphasized and, also, the importance of a satisfactory canteen or other place where meals can be taken comfortably. A Welfare Supervisor is considered necessary in a large mill. For smaller mills, it is suggested, a trained Welfare Supervisor could serve several factories in the same way as is done by Accident Prevention Inspectors. Research to develop a more satisfactory system of vacuum cleaning the mill machinery and floors is urged so that vacuum cleaning devices can be redesigned for the textile industry.

Dust Hazard and Control

Methods of preventing the emission of dust into the air of cotton cardrooms were considered by earlier Committees. In 1931, a Departmental Committee recommended the adoption of improved methods of extracting dust from raw cotton in the machines used in mixing and blowing rooms thus contributing to a solution of the dust problem in card rooms. In addition to several technical recommendations, the 1931 Committee suggested that there should be medical examinations in order to prevent (a) persons already suffering from any respiratory abnormalities from being accepted for employment in the carding process; and (b) persons susceptible to the action of cardroom dust from being so employed for a prolonged period. This Com-

mittee decided that there was no evidence of a fibrosis similar in character to that produced by silica dust or of similar disease. Medical authorities disagreed as to how far small fragments of cotton fibre contributed to trouble in the bronchi, and the Committee recommended further exploration of the effect of histamine which had been found to be present in cotton dust.

Following up this last recommendation, the Medical Research Council secured the services of an investigator in industrial medicine, Professor Carl Prausnitz, formerly of the University of Breslau. Professor Prausnitz in 1936 established that cardroom dust is rich in particles under 2 microns in size and comparatively richer in ultramicroscopic particles which can easily penetrate into the deeper air passages but he considered it doubtful whether the substance

resembling histamine and possibly identical with it . . . plays a pronounced role in causing the respiratory disease of cotton workers.

He stated, however, that experiment showed that another substance or group of substances in the dust is

primarily toxic. . . . In all probability . . . is responsible for the changes occurring in the lung after the prolonged inhalation of the dust.

Medical aspects of the dust problem and the determination of the precise constituent of cotton dust which causes byssinosis (cotton workers' pneumoconiosis) were not within the scope of the advisory committee of 1945-46 but the ultramicroscopic nature of the injurious particles adds to the complexity of the problem of how to maintain such an atmosphere in the cardroom as the Factories Act requires—

to protect the persons employed against inhalation of the dust . . . and prevent its accumulating in any workroom, and in particular, where the nature of the process makes it practicable (to provide and maintain) exhaust appliances . . . as near as possible to the point of origin of the dust or fume or other impurity, so as to prevent it entering the air of any workroom.

Dust Removal

On four points, the Committee made definite recommendations: the removal of dust in preliminary processes, dust released during stripping, dust released by the removal and collection of waste and fly, and dust removal by localized methods at the card.

As regards the preliminary processes, the Committee recommended that blowing room

machinery should be overhauled and made more efficient, that effective measures should be taken to prevent leakage of dust from the opening machinery. They commend the use of the "Shirley Cage" in contributing to removing dust from the blowing room, and expressed the opinion that

by application of suitable enclosure, exhaust and self-clearing interceptor plates (to prevent opened cotton from being drawn to the settling chamber), not only are better conditions obtained in the cotton chamber and the blowing room but a considerably greater quantity of dust is removed at this early stage than would otherwise be the case. Such improvements are not difficult to make, are relatively inexpensive, and in the view of the Committee these, or similarly effective methods, should be adopted forthwith.

The dust released during stripping, as distinct from the dust continuously given off during normal carding, can be dealt with as suggested by the 1931 Committee: when a vacuum stripper is used to strip the cylinder and doffer, a stripping brush must be used occasionally; this brush should have a cover connected to an exhaust; an efficient exhaust should be provided to remove the dust at, or as near as practicable, to the point where it is given off. Stress was laid on the importance of maintaining the stripping plants in most efficient condition.

Dust during such operations as the removal and collection of waste and fly can be eliminated by conveying "under card and blowing room waste" to the waste bag by pneumatic arrangements. Pneumatic systems should be installed for the removal of card under-cylinder and taker-in fly, for the removal of blowing room droppings and for the clearance of dust trunk boxes. This elimination of many manual operations in handling dusty material in the card and blowing room would effect considerable improvement both for those handling such materials and, indirectly, for others employed in these rooms.

As to localized removal of dust, the Committee recommended that experiments on a small scale and under suitable direction should be undertaken and should be financed by the industry. Although very creditable attempts have been made by ventilation engineers and individual firms at their own expense, the Committee believe that there is at present no proved satisfactory solution. The essentials of the problem are to remove the dust generated at the upper end of the card, that generated at the doffer, and the dust and fly from the lower part of the card by methods which will prevent the inhalation of dust.

Rehabilitation

Progress in Reinstatement of Veterans

IN a statement issued on December 1, Dr. Arthur MacNamara, Deputy Minister of Labour, stated that demobilization has now reached its final stage. Since reinstatement under the Reinstatement in Civil Employment Act is limited in point of time in the general case, it would appear that not a great many veterans are still eligible to apply for their pre-enlistment employment under authority of the Act.

However, the Act, because of the protection it affords the veteran in connection with terms of reinstatement, will be of some continuing consequence in the case of many who returned to their former employ under its protective provisions, he said. Further, it will still come into play for those eligible to claim reinstatement, or yet to be discharged, or for those who may have secured an extension of time during which they may report back to their employer, after a delay caused by physical or mental incapacity to perform work available.

Dr. MacNamara referred to the Reinstatement in Civil Employment Act, 1946, which was passed by Parliament at its last session, to consolidate the Reinstatement in Civil Employment Act adopted in 1942, together with the subsequent regulations which supplemented the provisions of the Act. He pointed out that no major changes were made in the consolidation, for none seemed necessary as the conditions set forth in the original Act and Regulations had proven sufficiently adequate and practical during a period when demobilization of the Armed Forces was heavy, when a peak number of reinstatement cases were taking place.

Many Return to old Employment

Between August 1, 1945 (when comprehensive records on reinstatement were first started), and September 30, 1946, at least 164,961 veterans returned to their old employment. (Of this number 2,036 were women.) It is estimated that more than 200,000 ex-service personnel have returned to their pre-enlistment employment, and of course all of them share the protection of the Act, Dr. MacNamara said.

He quoted the Minister of Labour as having frequently expressed the opinion that the suc-

cess of this legislation is due as much to the sincere desire on the part of Canadian employers to see their veteran employees successfully re-established, as it has been due to the requirements of the Act. Field officers tell us that employers, with few exceptions, have continued to carry out the spirit and intention of reinstatement—in numerous instances far exceeding the legal requirements of the Act when it came to the terms under which they have taken their employee veterans back.

About one per cent of all veterans applying for reinstatement have needed the assistance of the Reinstatement Officers in the National Employment Offices. In practically every instance where veterans have approached these officers, inquiry has developed that it has been merely a case of misunderstanding on the part of the veteran or the employer as to the requirements of the Act. As a result only four prosecutions have been entered under the Act up to date—a very gratifying showing indeed.

Dr. MacNamara stated that there is evidence that some veterans are becoming re-established in civilian employment other than that which they held previous to enlistment but without notifying their pre-enlistment employers of this fact. As a result the Labour Department has been advising every employer who is holding open a job for a veteran employe with whom he has lost touch, to make inquiries to find out if the former employe has been discharged from the Armed Forces, and whether the man will be back. Otherwise, jobs available to other veterans may be tied up.

He pointed out that the reinstatement period for a member of the Interim Force by authority of the Act automatically commenced on April 30, 1946, unless he or she had applied for discharge prior to that date. The records of the Interim Forces indicate that practically all of those who applied for discharge prior to the end of April, have now been released.

Deadline for Seamen

Referring to merchant seamen, Dr. MacNamara said that December 31, 1946, is the latest date upon which the service of a merchant seaman will be deemed to have termin-

ated for purposes of reinstatement. However, if the seaman is on a voyage in coastwise waters or in waters outside the territorial limits of Canada on this date, his service will not be considered to have terminated until the voyage is concluded.

Although small in number—only 60 are affected—an important group of persons, who served the Allied cause out of uniform and

out of the ordinary way, now are entitled to reinstatement under the Act, through the adoption of the Special Operators War Service Benefits Act. Included among these men are several who parachuted behind the enemy lines during the war to carry out special work. As they were not members of the regular Allied Forces, special legislation was necessary before they could benefit from rehabilitation legislation.

Finding Employment for Older Veterans

REPRESENTATIVES of the Departments of Veterans Affairs and Labour, in a series of recent meetings, have evolved plans to facilitate the placement of dual war veterans. This problem, one of the phases of re-establishing veterans in civilian employment, arises out of the fact that a considerable number of men were on active service with the Armed Forces during the two world wars. These men—officially known as “Dual War Veterans”—number about 50,000. However, half of this number have become re-established without difficulty since they were able to return to their own businesses or firms, to their professions or their pre-enlistment employment.

This task is being carried out on a co-operative basis between both departments. Colonel P. T. Philpott, a veteran of both wars, has been appointed as Adviser to the Deputy Minister of Veterans Affairs on matters concerning veterans of both wars. The Veterans Placement Division of the National Employment Service is giving special attention to the problem and a Veterans Employment Adviser has been delegated in each of the five Regions across Canada to carry out organization of placement of dual war veterans.

During the past six months employment statistics gathered by National Employment Service have shown that through their offices, upwards of 5,000 of these dual veterans have been placed with employers. It is considered now that it will be necessary to launch an

educational campaign to inform employers of the capabilities of these older workers. The basis of this appeal is that the older veteran is highly suitable for jobs which demand a low degree of physical exertion, but in which the chief prerequisites are loyalty, experience and trustworthiness. Officials of both departments feel that the employment of a person, other than an older worker is jobs described as “sedentary” and “dead end” is contrary to the best principles of selective placement.

To open this educational campaign Colonel Philpott has prepared a report explaining the background of the problem of dual war veterans, and outlining the suggestions which in the opinion of his department will provide a solution. In his report Colonel Philpott drew attention to the employment difficulties encountered by the “dual veterans” arising from the bugbear—“too old.” He emphasized the need for machinery to assist such men in obtaining light manual jobs. To do this, the National Employment Service is providing an intensified service through their regional executive and professional divisions to step up employer relations activities with a view to giving each veteran personal service assistance in obtaining employment. The report states, also, that the Civil Service Commission has agreed not to discriminate on the ground of age in civil service competitions, so that the older veteran will be graded solely on his qualifications and suitability for the work to be done.

Findings of Sample Survey of Veterans

SOME of the findings of a Dominion-wide sample survey of veterans conducted on behalf of the Department of Veterans Affairs were announced by the Minister, Hon. Ian Mackenzie, late in November. He explained the purpose of the survey was to obtain information needed to guide the future progress of the Canadian rehabilitation program.

This information, the Minister said, was

not available to the department through its normal channels of administration. To obtain it, the Dominion Bureau of Statistics interviewed between 5,000 and 6,000 representative veterans last July, and a variety of data has now been tabulated from the completed questionnaires.

The sample was small compared to the country's veteran population, but the veterans

chosen for interview were selected with great care in order to achieve a minimum of error in the survey.

The following are some of its findings:

Thirty-one per cent of Canada's veterans were from 25 to 29 years of age. More than 28 per cent were from 20 to 24, and 18 per cent were from 30 to 34. More than 60 per cent of veterans were married. Of the married ex-service men and women, more than half were married during their service or after discharge. About 18,000 service men married service women while both were in the forces. About 12 per cent of veterans were living on farms.

More veterans were living in British Columbia, Ontario, Quebec and Nova Scotia than had enlisted from those provinces. Prince Edward Island's veteran population was the same as its enlistment figure, while the remaining provinces of Canada showed a decrease of veterans as compared to enlistments. British Columbia itself showed an increase of more than 16 per cent in veterans as compared to enlistments from that province.

In 1944 the average waiting period between the time of discharge and arrival of the veteran's first gratuity cheque was three months. In 1945 this delay lessened to two months, and in 1946 to one month.

Veterans questioned on their intended use of re-establishment credit indicated that present trends towards purchase of furniture and homes will continue to constitute the major use of this form of rehabilitation assistance.

Thirty-one per cent of veterans were engaged in manufacturing, according to the estimated industrial distribution of employed veterans, prepared from the survey. Seventeen per cent were in trade, finance and insurance, and the same percentage in service employment—laundries, garages, et cetera. Eleven per cent were in agriculture and the same proportion in transportation and communication work. Nine per cent were in construction employment, two per cent in mining. Two per cent in all were engaged in forestry, fishing and trapping. About 82 per cent of veterans were in paid employment, while some 15 per cent were self-employed. The remainder were unpaid family workers on a farm or in business. About half of all unemployed veterans have no occupation or trade.

Hardly any unemployed women veterans were seeking permanent jobs; nearly all wanted jobs that would last less than a year.

Seventy-six per cent of veterans obtain a job within a month after discharge or completion of training. Eighty-six per cent get a job within two months, it was reported.

Settlement of Veterans on Small Holdings

THE speed of settlement under the Veterans Land Act has been accelerated greatly during the last six months, Honourable Ian A. Mackenzie, Minister of Veterans Affairs, stated recently in releasing figures on operations of the Veterans Land Act during the month of October. During the last month, he said, the Veterans Land Act Administration approved 2,217 settlements of all types. This, he said, compared with a total approved in the month of April of 1,164.

Leading the October figures was a total of 1,096 approved for full-time farming. During the same month a total of 1,190 applications were received. Small holdings were almost as popular as full-time farming, with a total of 948 applications from veterans for financial assistance being approved. During the month there was a total of 786 applications for assistance received. "At the present time, as these figures indicate, we are keeping up with the applications and eating into the backlog", Mr. Mackenzie stated.

The average size of the small holdings approved during the month of October, Mr.

Mackenzie said, was 4.4 acres. The total expenditure approved for land and existing permanent improvements in the small holding division during the month was \$2,942,226. An additional amount of \$1,794,765 was approved for permanent improvements to be effected, while \$314,078 was approved for stock and equipment.

The average size of the 1,096 full-time farming units approved in October is 220 acres. The amount approved for expenditure was \$4,013,699 for land and existing improvements plus \$367,918 for additional improvements. Under the heading of stock and equipment approvals totalled \$1,235,276. In addition to full-time farming and small holdings, settlement of 44 commercial fishermen was approved during the month, while 123 were settled on Provincial Crown Lands, and 8 were settled on small holdings on Dominion lands.

October settlements brought the total of approved settlements to 21,702. Of this total 12,592 have been approved for full-time farming, 8,796 for small holdings, and 314 for commercial fishing.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

White Circle Limited, Sydney, N.S., and Sydney Dry Cleaning and Laundry Workers' Union.

Leek and Company, Limited, *et al* and United Association of Plumbers and Steamfitters, Local 170.

Shipping Federation of British Columbia and International Longshoremen's Association, Local No. 38-163.

Saskatchewan Co-operative Producers Limited, Saskatchewan Co-operative Livestock Producers Limited, Saskatchewan Pool Elevators Limited, Regina, Sask., Modern Press Limited, Saskatoon, Sask.

United Brotherhood of Carpenters and Joiners, Local 1386, Saint John, N.B., and certain building contractors in Saint John, N.B.

The Toronto Transportation Commission.
Dominion Steel and Coal Corporation Limited, and United Steelworkers of America, Local 1064, Sydney, N.S.

Standard Clay Products, Limited, and Canadian Union of Clay Products Workers, Local No. 1.

Standard Chemical Company, Limited, Toronto, Ont.

Trent Cotton Company, Limited, Hamilton, Ont.

Aluminum Company of Canada, Limited, Windsor, Ont.

Re: White Circle Limited, Sydney, N.S., and Sydney Dry Cleaning and Laundry Workers Union

Reasons for Decision

This is an application for leave to appeal and an appeal from a Finding and Direction of the Regional War Labour Board for Nova Scotia, dated July 11, 1946. In and by that decision, the Nova Scotia Board directed the Company to pay certain increased wage rates to its employees.

The Company does not object to payment of increased wage rates but states that it is financially unable to absorb the increased cost which the directed wage increase would entail. We have examined carefully the financial statements which the Company has filed with us and, while we appreciate the fact that payment of the increased wage rates may exercise some hardship on the employer, we do not find that the employer has discharged the onus of proof which is incumbent upon him for the purposes of the Wartime Wages Control Order, 1943, when raising the plea of inability to pay.

The Company objects to having to pay the increased wage rates retroactively. The application by the Union to the Regional Board was made on May 27, 1946. The Board issued its decision on July 11, 1946, and directed the Company to pay the increased wage rates retroactively to April 1, 1946, at which time negotiations for increased wage rates commenced between the parties. With much respect, we cannot agree with the Regional Board's decision to make its decision effective retroactively to April 1. Having regard for the nature of the Company's business and the effect of retroactivity, we are of the opinion that the decision of the Regional War Labour Board for Nova Scotia should become effective on July 11, 1946, the day on which the Finding and Direction was issued.

Finding and Direction will be issued accordingly.

November 9, 1946.

Re: Leek and Company, Limited, *et al*, and United Association of Plumbers and Steamfitters, Local 170

Reasons for Decision

This is an appeal made by some thirty-three (33) employers of Journeymen Plumbers and Helpers in the Vancouver area from two Findings and Directions issued by the Regional War Labour Board for British Columbia,

dated August 5, 1946, and August 19, 1946, by which Findings and Directions the said Regional Board directed the employers to pay certain increased wage rates to "Journeymen Plumbers" and "Helpers". Leave to appeal was granted by the Regional Board.

The effect of the Regional Board's two Findings and Directions is to increase wage rates for the occupational classifications of Journeymen Plumbers and Plumbers' Helpers by sixteen (16c.) cents per hour. While the increases are substantial we cannot be unmindful of the recent trend in increases of wage rates in the construction industry in the Vancouver area. Journeymen Plumbers and their Helpers have always enjoyed certain wage rates in a fairly definite relationship to the rates of other trades in the construction industry. We are familiar with the construction rates in the Vancouver area generally and it is clear that the wage rates directed by the Regional Board for Journeymen Plumbers and their Helpers are in the proper proportion with other construction rates. In view of the wage level currently existing in the construction industry in Greater Vancouver it would be manifestly unfair and discriminatory not to allow wage rates for Journeymen Plumbers and their Helpers to hold their same relative position.

There is merit to the employers' contention that increased wage rates for the plumbing trades should not have retroactive effect. Both of the Regional Board's Findings and Directions provided for retroactivity. In directing retroactivity in the implementation of increased wage rates it is imperative that

due regard should be had for the nature of the trade or industry and the effect of retroactivity in the employer's operations. It was represented to this Board by the employers that a good deal of the employers' operations are based on contracts obtainable by tender. It is obvious that tenders for contracts are made on the basis of ascertainable costs, including labour costs. An increase in labour costs places an employer on his guard in planning his operations; retroactivity in increased costs places the matter entirely beyond the employer's control. In addition, a fair portion of the employers' operations consists of repair work involving a "charge-out" rate by the employer for work done by his Journeymen Plumbers and Helpers. In such circumstances, it is unfair to impose retroactivity upon an employer as he cannot possibly recoup himself in connection with past business where the repair services have been performed and the "charge-out" rate paid. Under the circumstances, therefore, we think it would be just and reasonable to render the two Findings and Directions effective as of the dates of their making by the Regional Board.

Finding and Direction will be issued accordingly.

November 12, 1946.

Re: Leek and Company, Limited, et al., and United Association of Plumbers and Steamfitters, Local 170

Reasons for Decision

The employers' appeal from a decision of the Regional War Labour Board for British Columbia, dated September 16, 1946, in which the employers were directed to pay certain increased wage rates to the occupational classifications of "Oil Burner Mechanic" and "Stoker Mechanic."

Our decision in this case is based upon the same principle as is indicated in our Reasons for Decision dated November 12, 1946, Leek and Company Limited, and United Association of Plumbers and Steamfitters, Local 170. For the same reasons as we expressed in our said Reasons for Decision, we confirm the increased wage rates directed by the Regional Board.

In this case, as in the case of the other appeal, the Regional Board directed the increased wage rates to become effective retroactively. The Finding and Direction though dated September 16, 1946, is stated to be effective as of August 13, 1946. In our Reasons for Decision in the previous decision we indicated our reason for refusal to direct retroactivity. Those reasons apply with equal force to the present appeal and for the same reasons we hold that the effective date should have been the date of the Finding and Direction, namely, September 16, 1946.

Finding and Direction will be issued accordingly.

November 13, 1946.

Re: Shipping Federation of British Columbia and International Longshoremen's Association Local No. 38-163

Reasons for Decision

This is a joint application by the Federation on behalf of its member Companies, and the Longshoremen's Association representing the employees of those Companies, for permission

to increase by 7 cents an hour the basic straight time rate paid to occupational classifications of longshore labour engaged in loading and discharging coastwise vessels at the Port of Vancouver and to increase proportionately

wage rates applicable to work done during overtime hours and meal periods.

On May 28 of this year, the Federation and the Association made a joint application to this Board for permission to increase wage rates and to adjust working conditions for members of the Association employed by the members of the Federation. By that application the Board was requested to approve an increase of 10 cents an hour in the basic wage rate and to approve several changes in working conditions. The National Board by Finding and Direction dated June 4, 1946, approved the application.

A collective agreement dated June 8, 1946, was entered into between the Federation and the Association. Forming part of the agreement is Schedule A which sets forth the wage rates and working conditions which were approved in the decision of June 4, 1946.

The agreement also contains the following paragraph:

12. This agreement, including Schedules "A" and "B" hereof, shall become effective as from the date hereof and shall remain in effect to and including 7th day of June, 1947, and shall be considered as renewed from year to year thereafter by the respective parties unless either party shall give written notice to the other of its desire to modify or terminate the same; said notice to be given at least sixty (60) days prior to any expiration date, and if such notice is not given, the agreement

shall be deemed to be renewed for the succeeding year.

While the agreement is dated subsequent to our June Decision, we were aware of its terms at the time of that Decision. There is nothing ambiguous about the above-quoted paragraph. It means that the wage rates approved on June 4 shall continue undisturbed until June 7, 1947. We recognize that any contract may be modified if all parties to the contract agree to such modification. It should be pointed out, however, that the National Board, when approving the application, relied upon the terms of that agreement, including the term relating to duration, as providing some stability in wage rates and working conditions for longshore work on coastwise vessels.

It is our understanding that if wage rates were increased the employers concerned would recover the increased labour cost by increasing the charges for the services rendered. Such increase in service charges might be countenanced if the men who provide those services were not receiving just and reasonable wages. In this case the basic straight time rate (the lowest rate paid) is \$1.10 per hour. In our view that is a reasonable rate for the work performed.

In the circumstances we are not prepared to approve the application.

December 2, 1946.

Re: Saskatchewan Co-operative Producers Limited, Saskatchewan Co-operative Livestock Producers Limited, Saskatchewan Pool Elevators Limited, Regina, Sask., Modern Press Limited, Saskatoon, Sask.

Reasons for Decision

The above Companies appeal to this Board from decisions of the Regional War Labour Board for Saskatchewan, dated September 19 and October 10, 1946.

The question involved in this case is that of adjustment of wage rates. The Saskatchewan Co-operative Producers Limited and its subsidiaries carry on operations in the provinces of Saskatchewan, Manitoba and Ontario. The Companies recently applied simultaneously to the Regional War Labour Boards in each of these three provinces requesting the same amount of increase for their employees. The Companies' applications were granted by the Manitoba and Ontario Boards but only partially granted by the Saskatchewan Board. Speaking in general terms, the Manitoba and Ontario Boards granted increases amounting to Fifteen (\$15.00) dollars per month while the Saskatchewan Board allowed increases of only Ten (\$10.00) dollars per month. The Companies contend that, in the interest of uniformity, their employees in Saskatchewan

should receive the same quantum increase as was given to the Manitoba and Ontario employees. The Company argues that it has always applied the same treatment to its employees in the three provinces with respect to adjustment of wage rates. We cannot overlook the fact that the Regional War Labour Boards for Ontario and Manitoba allowed the same quantum increase which the Company requested in respect of their employees in Saskatchewan. In addition, head offices for the Company's operations are located in Saskatchewan and the bulk of the staff is there employed. We have examined the wage rates requested by the Company and consider them to be fair and reasonable.

Having regard for the desirability of providing for uniformity in the administration of the Wartime Wages Control Order, 1943, P.C. 9384, as amended, and for the other reasons herein stated above we are of the opinion that the appeal should be allowed.

Finding and Direction accordingly.

November 29, 1946.

Re: United Brotherhood of Carpenters and Joiners Local 1386, Saint John, N.B., and certain building contractors in Saint John, N.B.

Reasons for Decision

The Union appeals from a finding and Direction of the Regional War Labour Board for New Brunswick, dated June 27, 1946. By that Finding and Direction the Regional Board directed the building contractors to increase their wage rate for carpenters. The Union, however, contends that the wage rate directed by the Board is not high enough.

It is unnecessary for us to consider this matter at very great length. The Regional War Labour Board for New Brunswick had at its disposal information concerning the overall wage structure in the construction industry in Saint John, N.B. Having regard for the wage adjustments which had been made in the

industry in Saint John the Regional Board was in a position to decide the general relationship to the wage structure of those engaged in the carpenters trade. The rate set by the Regional Board is in itself reasonable and appears to have a proper relationship to prevailing rates in the construction industry. We are of the opinion that the Regional Board applied the proper principles in their consideration of this case and we believe that the rate set by them for carpenters in Saint John is just and reasonable within the meaning of the Wartime Wages Control Order 1943, P.C. 9384, as amended.

The appeal is, therefore, dismissed. Finding and Direction accordingly.

November 18, 1946.

Re: The Toronto Transportation Commission

Reasons for Decision

This is an appeal by The Toronto Transportation Commission from a Finding and Direction of the Regional War Labour Board for Ontario, dated September 6, 1946, by which Finding and Direction the Commission was authorized to pay certain single wage rates for various monthly rated supervisory personnel in its Operating and Maintenance Departments.

The Commission submitted to the Regional Board an application requesting approval of certain ranges of wage rates. At the same time, the Commission indicated to the Regional Board the proposed rates within each range which it intended to implement immediately if its application were approved. The Regional Board authorized the Company to increase its wage rates but limited the increases only to the rates which the Company proposed to implement immediately and specified them as single wage rates. The Commission contends that the Regional Board's disposition of their application is not adequate for their purposes. In support of its appeal, the Commission has brought certain relevant information to the attention of this Board. It appears that the Commission engaged a firm of qualified industrial engineers to conduct a detailed job analysis and job evaluation. On the basis of this job evaluation, the Commission first applied to the Regional Board for approval of certain ranges of rates for hourly-rated occupations of employees who come under the jurisdiction of the supervisory positions covered by this appeal. The said application was approved by the Regional Board. The Commission then submitted a second applica-

tion in connection with the supervisory employees which application is merely a projection of the job analysis and which is intended to round out the job structure of the Company. It is contended by the Commission that the failure to approve of its application, as submitted, frustrates the full effect of its job evaluation plan. Further, it is stated that the Regional Board's authorization of payment of a single wage rate for each occupational classification instead of a range of rates, as requested, removes the incentive for the supervisory employee.

We are favourably impressed with the Commission's arguments. The job evaluation which was undertaken in this case appears to have been carefully conducted. Having regard for the fact that the Company's proposal in respect of its hourly-rated employees was approved by the Regional Board and that the inherent principle in the job analysis was the same in the case of the supervisory employees, we are of the opinion that if the rates are in themselves reasonable we should not do anything which might obstruct the general workings of the job evaluation plan.

We have investigated the wage rates for the employees affected by this appeal and we have noted that the increases in their wage rates from August 1939 up to the present time have been modest. We believe that it would be consistent with the provisions of the Wartime Wages Control Order, 1943, P.C. 9384, as amended, to allow the Company to implement the ranges of rates which it requests.

The appeal is, therefore, allowed. Finding and Direction will be issued accordingly.

November 19, 1946.

Re: Dominion Steel and Coal Corporation Limited, and United Steelworkers of America, Local 1064, Sydney, N.S.

Reasons for Decision

On May 30, 1946, the National War Labour Board as then constituted, dismissed the Union's appeal from a Decision of the Regional War Labour Board for Nova Scotia, dated January 8, 1946. The Union had asked the Regional Board to direct the Company to establish a minimum earning rate of 64½ cents an hour for all 8-hour employees over 18 years of age being paid hourly, tonnage or piece work rates or a combination of such rates which resulted in earnings of 59½ cents to 60½ cents an hour. The Regional Board was also asked to direct increases of 4 cents an hour for all 8-hour employees over 18 years of age, excepting those employees who were affected by the Direction of the National War Labour Board, dated May 4, 1945 (L.G. June, 1945, p. 820). Corresponding increases were requested for all other employees working on shifts of more than 8 hours' duration.

At the time of the hearing the Regional Board comprised four members. They divided equally on the Decision and the application failed. It is also of interest to note that the members of the National Board were not unanimous in their Decision (L.G. June, 1946, p. 746).

On July 8, 1946, Counsel for the United Steelworkers of America, made application for reconsideration by the National Board of its May 30 decision. A day or two later, the employees of the Company went on strike. It is the established practice of this Board to decline to deal with any case whenever the employees concerned in that case are on strike. In keeping with that practice, the Board deferred consideration of the case pending the settlement of the issues involved in the strike, and the return to work by the employees. Immediately after the end of the strike, the National Board requested Counsel for the Union to file material in support of the motion. Copy of that material was also served on Counsel for the Company and the Company replied. The motion was set down for hearing and the parties appeared.

Counsel for the Company opposed the motion for reconsideration. He argued that the Board could not now exercise the power to rescind, revoke, amend or vary its previous Direction because the conditions which existed at the time when the Direction was made are not extant.

The power to rescind, revoke, amend or vary, is set out in Sub-section 1 of Section 30 of Wartime Wages Control Order, 1943. That Section reads as follows:

Where any power is conferred on the National Board under this Order to give any direction or order the power shall be construed as including a power exercisable in the like manner and subject to the like consent and conditions, if any, to rescind, revoke, amend or vary the direction or order.

The power to make the direction which followed the National Board's Decision of May 30, 1946, is set forth in Sub-section (2) of Section 11 of the Order, the appeal section. By Sub-section (3) of Section 11 the word "direction" as used in Sub-section (2) is given the same meaning as in Part II of the Order, which Part includes Section 30.

Section 30 purports to prescribe a form of procedure to be followed when a direction is being reviewed or reconsidered. We do not regard the Section as being mandatory, rather do we incline to the view that it is directory. However and in any event, the procedure followed on the motion for reconsideration is the same as that which was followed when the appeal was developed and heard. In this case the power to reconsider has been exercised in the same manner as were the Board's powers exercised on the appeal.

Section 30 proceeds to provide that the power should be exercised "subject to like consent and condition, if any . . ." We must confess that we are unable to ascribe any definite or clear-cut meaning to the last quoted expression. However, we believe it to be safe to say that if the Board found it appropriate in a case to approve a joint application, one made with the consent of all parties concerned, it would only be right to require those parties to give their consent before such approval was rescinded, revoked, varied or amended. In this case the element of consent has not been present in any form or at any time. It is also our view that a revocation, rescission, variation or amendment should not be made without taking into account and giving due weight to the law as it stood at the time when the Regional Board made its decision. This we believe is what is meant by "like conditions."

We hold that it is within the powers of this Board to reconsider its Decision of May 30, 1946.

We assume the responsibility of review of this case with utmost humility and with much respect for the members of the National Board who rendered the decision in question.

We have perused the evidence and written arguments submitted to the Board on appeal and on this motion. That perusal makes it apparent that reconsideration of the May 30 Decision involves a careful and detailed

review of all the disputes over wages and changes in wage rates which have taken place in the basic steel industry since the outbreak of World War II.

For the purposes of this Decision, the basic steel industry is intended to include Dominion Steel and Coal Corporation Limited, in respect of its steel plant at Sydney; Algoma Steel Corporation Limited, in respect of its steel plant at Sault Ste. Marie; and Steel Company of Canada, in respect of its plant at Hamilton.

At the outbreak of war the basic wage rate for unskilled labour at the Dominion Steel and Coal Corporation was 43½ cents an hour; at Algoma Steel Corporation 41½ cents an hour, and at Steel Company of Canada 46½ cents an hour.

On March 18, 1942, Local 2251, United Steelworkers of America, on behalf of the employees of Algoma Steel Corporation Limited, made application to the Ontario Regional Board for an increase in the basic wage rate for unskilled labour to 55 cents an hour. On March 31, 1942, Local 1064 of the same Union, representing the employees of Dominion Steel and Coal Corporation Limited, made application to the Regional War Labour Board for Nova Scotia for an increase in the basic wage rate for unskilled labour to 55 cents an hour.

The Nova Scotia Board dismissed the application made to it. The Ontario Board requested Algoma Steel and Local 2251 to negotiate with a view to reaching an agreement and, if possible, to present a joint application to the Board. Algoma and Local 2251 failed to reach an agreement.

On September 14, 1942, by Order in Council P.C. 8267, there was appointed a Royal Commission which later became known as the Barlow Commission. That Commission was charged with the duty of finding a solution for the problems concerning wage rates and working conditions at Algoma and Dominion Steel.

Early in January 1943, a majority report of the Commission and a minority report were filed with the Minister of Labour for Canada. That report contained certain recommendations, reference to which is not necessary at this time.

A few days after the publication of the report, the employees of Dominion Steel and of Algoma went on strike. The parties to the dispute met the Government and conferences were held as a result of which a "Memorandum of Understanding" was signed. The Memorandum became part of Order in Council P.C. 689, dated January 26, 1943. Upon passage of that Order in Council, the employees of both Companies returned to work.

Order in Council P.C. 689 and the Memorandum of Understanding are important for

two reasons. In the first place, it seems proper to assume that the employees concerned and the officers of their Unions relied upon those documents as providing the relief which they sought. The men returned to work. In the second place, the documents had the effect of placing Algoma and Dosco in a class by themselves so far as wage control is concerned. At least the Companies were in that class long enough to make it most difficult to apply the provisions of the Wages Orders from time to time in effect, in precisely the same manner as those provisions were applied to other industries operating in different provinces.

P.C. 689 superseded the Wages Order then in force. The operative part of the Order in Council reads as follows:—

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under authority of the War Measures Act, Chapter 206 of the Revised Statutes of Canada, 1927, and notwithstanding the provisions of any other law, order or regulation, is pleased to authorize and doth hereby authorize the Minister of Labour and the National War Labour Board to implement the proposed terms of settlement as set forth in the Memorandum of Understanding dated January 22, 1943, a copy of which is attached hereto.

The Memorandum of Understanding occupies an important position in this case. Indeed we regard it of such importance as to warrant its inclusion at this point of our Reasons for Decision.

January 22, 1943.

Memorandum of Understanding with Respect to the Settlement of the Dispute in the Steel Industry of Canada

The decision, as clarified, is as follows:

(1) That in the event of the steel workers now on strike returning immediately to work the Government will take immediate steps to implement the majority report of the Barlow Commission, namely:

1. That the management and the maintenance men enter into negotiations and that an application be made to the National War Labour Board for such increased wage rates or range of wage rates with respect to such maintenance men as pipe fitters, steamfitters, millwrights, electricians and carpenters as will bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications.

2. That time and a half be paid for the seventh consecutive day worked by any employee.

3. That arrangements be made for the making of a careful study having in view a reclassification and an evaluation of jobs.

4. That management-union-employee committees be appointed in the different departments of each Company.

The foregoing recommendations were also included in the minority report.

(2) The Government would be prepared to recommend that the Dominion Steel and Coal

Corporation in respect of its steel plant at Sydney, Nova Scotia, and the Algoma Steel Corporation in respect of its steel plant at Sault Ste. Marie, Ontario, be designated as national employers.

(3) If, as belonging to a national industry, the steel workers desire to present a new case to the National War Labour Board, they shall be free to do so.

(4) The Minister of Labour desires to be relieved of his duties as Chairman of the National War Labour Board, and therefore any new application by the steel workers will be considered by the National War Labour Board, headed by a Chairman who has not previously had the matter before him.

(5) The Government will undertake to recommend in the event of the steel workers desiring, as members of a national industry, to present a new submission to the National War Labour Board, that the Board be convened at the earliest opportunity.

(6) If the men return to work immediately the Government will immediately pass an order in council fixing 55 cents an hour as a minimum rate of earnings, effective from November 1, 1942, in the Sydney and Algoma Steel plants, the same rate to apply to its operations in the Trenton plant which are involved in the production of basic steel, the minimum rate of earnings of 55 cents an hour to be understood as including the cost of living bonus as of the present date. However, this provision shall not prejudice the right of the employees from making representations in respect to the cost of living bonus to the National War Labour Board and such representations may be considered by the Board on their merits and the Board may make such orders thereon as in its judgment are warranted. However, for the duration of the war, should the cost of living bonus be reduced the 55 cent minimum earning rate shall not be reduced, but should the cost of living bonus be increased as from the present time the earning rate of 55 cents shall be likewise increased, thus establishing a guaranteed minimum earning rate of 55 cents.

(7) The steel workers at Trenton may apply to the National War Labour Board to determine how far operations at Trenton are to be regarded as basic steel production.

It is understood that the Government will adhere to its price ceiling and wage stabilization policy.

Nothing in these terms of settlement shall decrease the previous earnings of any employee.

Pursuant to Order in Council P.C. 689, application was made to the National War Labour Board by United Steelworkers of America, acting on behalf of the workers represented by them and employed by Algoma and Dosco. The application specifically asked:

- (a) that the said firms be designated national employers under the terms of the by-laws of the National War Labour Board;
- (b) that the 55 cent minimum rate of earnings established by P.C. 689 and by the Memorandum of Understanding be

declared to be the minimum or base wage at each of the said plants; and

- (c) for payment, in addition to the said 55 cents, of a full cost of living bonus calculated on the rise in the cost of living since August, 1939.

The National Board's Reasons for Decision dated March 31, 1943 (L.G., April, 1942, p. 439 et sequi), in that case may be summarized as follows:

- (1) The Wage Control Order having been amended in the meantime to provide for appeals to the National Board from Regional Board decisions there was no longer need to declare the basic steel industry "national employers."
- (2) A minimum basic wage rate of 50 cents an hour was established for both Algoma and Dosco, plus a cost of living bonus of 9 cents an hour at both plants, with provision that despite any future decline in the cost of living index number the combined earnings should not drop below 55 cents an hour.

Thus we find His Excellency the Governor in Council, with the advice and consent of the Ministers of the Crown responsible to the Parliament of Canada giving an undertaking to fix a common guaranteed minimum earning rate at Algoma and Dosco. Further, we find the National War Labour Board implementing that undertaking. It is interesting to note what the National Board had to say on this point. At page 443 the following was said:

As to whether there should or should not be uniform minimum rate of earnings at both plants, we are not called upon to decide. P.C. 689 has decided that for us. This becomes more apparent when it is remembered that prior to P.C. 689 the minimum rate of earnings at Sydney was 52½ cents an hour and at Algoma 50½ cents an hour. Having in mind that the principle of uniformity appears to be undoubtedly established by P.C. 689, it appears to us that it should apply to the cost of living bonus as well.

The National Board's Decision of March 31, 1943, exhausted the Board's jurisdiction under P.C. 689, in so far as it was intended to govern the base rates at Algoma and Dosco. Another Decision of the National Board, dated September 9, 1943 (L.G., October, 1943, p. 1346), restored differentials which obtained prior to the March 31 Decision, between the base rates and the rates for semi-skilled and skilled employees at Algoma and Dosco. In deciding the question the Board had this to say in part:

We can understand and sympathize fully with the position of the more skilled workers whose differential was taken away when the base rate was increased to 50 cents per hour.

There has been no valid reason why their case should not have been dealt with long ago.

Accordingly, in the case of Dominion Steel and Coal Corporation Limited, we have reached the conclusion that in the case of workers receiving more than the former base rate of 43½ cents per hour as at March 23, 1943, there should be a general increase of 6½ cents per hour. In the case of Algoma Steel Corporation Limited, workers receiving more than the former base rate of 45½ cents per hour as at March 23, 1943, should be entitled to a general increase of 4½ cents per hour. It should be understood that the increases hereby directed apply to maintenance men as well as to production workers.

It will thus be seen that at least a substantial measure of uniformity in wage rates at Algoma and Dosco had been established. Except in the case of the wage rates for maintenance workers hereinafter referred to, all further adjustments in wages once more became subject to the provisions of the Wages Order. The important fact is that the National Board, acting under P.C. 689, recognized the principle of uniformity contemplated by that Order in Council and adjusted the wage rates at both plants accordingly. Thereafter all Boards concerned were obliged to recognize those rates, adjusted though they were under P.C. 689, as being the lawfully established rates for the purposes of the Wages Order. In these circumstances it is not surprising to find the steelworkers at one of the plants claiming an injustice or inequality in their rates whenever wage rates were adjusted at the other plant.

On May 31, 1943, the Ontario Regional Board approved a new base rate of 50 cents an hour excluding cost of living bonus of 9 cents for common labour employed by Steel Company of Canada Limited. This decision equalized the common labour or base rate at Algoma, Dosco and Stelco.

In July of 1943, the Regional Board for Ontario, on a further application by Stelco, approved the rate of 55 cents an hour for unskilled labour at the Hamilton plant of Stelco. This rate along with 9 cents cost of living bonus gave the employees total earnings of 64 cents an hour, later 64½ cents when cost of living bonus was further adjusted. Certain increases were awarded to employees in receipt of higher wage rates.

In March 1944, the Ontario Board directed Algoma to increase the base rate from 50 to 55 cents an hour. The adjusted rate, plus the cost of living bonus, gave Algoma's base rated employees 64 cents an hour, the same as at Stelco. The application in the case included a request for graduated increases for the more highly paid employees. This part of the application was rejected by the Regional Board. After the time for appealing the

direction had expired, the Union applied to the Regional Board for the restoration of differentials which it alleged had been disturbed by previous Findings and Directions of the Ontario Board. The Regional Board dismissed the application and the Union appealed to the National Board. The National Board allowed the appeal in part. (See Reasons for Decision, L.G., April, 1945, p. 467.)

The activities of Local 2251 of United Steelworkers of America, in respect of certain employees of Algoma, were duplicated by Local 1064 of the same Union at Sydney, but with different results. The first application made by Local 1064 to the Nova Scotia Board was rejected and on appeal the Regional Board's Decision was confirmed. Subsequently Local 1064 made a further and similar application to the Nova Scotia Board. The Regional Board dismissed the second application and from that dismissal the Union appealed. The National Board's Decision on appeal is the one now under review.

The Memorandum of Understanding made reference to wage rates for maintenance groups at Algoma and Sydney. Applications were made by the United Steelworkers of America to the National Board for adjustments in wage rates for those groups. Other requests were included in the applications. The National Board proceeded to consider the applications under and in pursuance of P.C. 689. It was found necessary to appoint an officer of the Board, Mr. W. H. Ley, to make a factual study of the problems. In due course, Mr. Ley made his report. This report was afterwards approved by the National Board and wage rates for maintenance men at both plants were adjusted. We have been assured that the wage rates at Algoma were adjusted without regard for the rates at Sydney, and that the Sydney rates were not adjusted in the light of what had taken place at Algoma. Nevertheless, this much is significant, namely, that the rates fixed for the several grades of maintenance employees at Algoma bear such close resemblance to those at Sydney as to suggest a likeness in work performed and skill required.

In our view the action taken by the National Board in respect of maintenance workers at both plants constituted a further step along the road to uniformity. Admittedly that decision was made under P.C. 689, but the rates thereby established thereafter became and have continued to be a factor in any case where adjustment of wage rates for production workers in the plant in question was being considered under the Wages Order.

Having in mind the working and intent of P.C. 689 and the Memorandum of Understanding which have created factors peculiar to this situation, and with due regard to the sequence of events summarized herein, it is our view, with much respect, that the evidence and the weight of evidence supports the Union's contention that a gross inequality existed in the wage rates of the production workers at Sydney. In order to rectify that condition, certain wage adjustments are necessary. Those production workers whose hourly wage rates prior to January 8, 1946, were within a range shown in the first column hereunder, should receive the increase mentioned in the second column opposite that range as follows:

First Column (per hour)	Second Column (per hour)
(a) less than 61c.	5c.
(b) 61 to 64½c.	4c.
(c) 65 to 67c.	3½c.
(d) 67½ to 69½c.	3c.
(e) 70 to 72c.	2½c.
(f) 72½ to 74½c.	2c.
(g) 75 to 77c.	1½c.
(h) 77½ to 79½c.	1c.
(i) 80 to 89½c.	½c.
(j) 90c. or more.....	No increase

After considering all the factors involved in and peculiar to this case, we have come to the conclusion that it would not be appropriate to provide any retroactive effect to this decision. The increases shall come into effect commencing with the pay period which begins next after the date of this decision.

Finding and Direction accordingly.

November 26, 1946.

Dissenting Opinion

I regret not being able to concur with the opinion of the majority and with due deference I have endeavoured to summarize as shortly as possible the reasons for my dissenting opinion as follows:

This is an appeal from a decision of the Regional Board for Nova Scotia.

In order to succeed, the appellant had to show before this Board that the Regional Board either acted on a wrong principle or misinterpreted the evidence. In my opinion he failed in his efforts to do so. In the present case, the Regional Board dismissed the application on the ground that the wages at Dosco were not low in comparison with the prevailing rates in the Sydney district. This is true in fact and also consistent with the practice of all the Labour Boards acting under the provisions of the Wages Order.

But the appellant rests his case on P.C. 689 Does P.C. 689 disturb the principles to be followed in the administration of the Wages Control Act? P.C. 689 does not declare that "parity should exist and be maintained in the future." It only declares that in order to settle a strike and to resume production of steel needed for the war, the *basic* wage shall be 50c. an hour at Dosco and also at Algoma.

I respectfully submit that P.C. 689 could not mean that if due to local conditions a Regional Board directs or authorizes an increase in wages at Sydney or at Algoma, the same increase must necessarily be given to the workers of the other place.

The Ontario Board on a joint application authorized an increase of 5c. at Hamilton either because there existed before the war a differential of 5c. in favour of Steel Company of Canada or that the wages paid at the time of the application were low in comparison with the prevailing rates in the Hamilton district. Later the same Board authorized the same basic increase at Algoma.

The Government fixed the basic wages to be paid from January, 1943, but left the door open for future adjustments under the Wages Control Order. The Regional Board gave an increase to Algoma based on local conditions. I am of the opinion that local conditions only could justify the Regional Board for Nova Scotia to authorize or direct an increase. The material filed does not show that such circumstances existed and consequently it is my opinion that the appeal should be dismissed.

(Signed) LUCIEN DUGAS,

Member.

Re: Standard Clay Products, Limited, and Canadian Union of Clay Products Workers, Local No. 1

Reasons for Decision

This is an application for leave to appeal and an appeal by the Company from a Finding and Direction of the Regional War Labour Board for Quebec dated July 9, 1946.

The only question involved in the present appeal is with respect to the date upon which

the decision of the Regional Board is to become effective. A brief recital of the facts will indicate the nature of the dispute between the parties.

On December 15, 1945, the Union applied to the Regional War Labour Board for Quebec for certain adjustments in wage rates. The

Regional Board issued its Findings and Direction dated April 23, 1946, dismissing the Union's application on the sole ground that the Company had proven that it was financially unable to absorb the increases in wage rates. The Finding and Direction says, in part:

The Regional War Labour Board, after having consulted the Company and requested a financial statement, has carefully studied such statement and has found that the Company is financially unable to pay the new proposed wage rates and consequently cannot grant the application submitted by Local No. 1 of Canadian Union of Clay Products Workers.

Subsequently, upon the request of the Union, the case was reconsidered, at which time evidence was adduced to the effect that the Company had made application to and had received authority from the Wartime Prices and Trade Board for certain increases in the selling prices of its products, such increases to become effective as from July 1, 1946. The Regional Board apparently was satisfied that the price relief thus obtained by the Company placed it in a position where it could absorb the requested wage increases and by Finding and Direction dated July 9, 1946, the said Regional Board directed the Company to implement the increased wage rates requested by the Union. The Regional Board, however, declared that the wage increase was to become effective as from December 15, 1945, the date on which the Union first filed its application.

The Company contends that the effective date should not be December 15, 1945, but July 1, 1946, so that the wage increase will coincide with the date of the price increase granted by the Wartime Prices and Trade Board. The Union, on the other hand, urges that the price relief granted by the Prices Board enables the Company to absorb the

wage increases retroactive to December 15, 1945.

This Board has always been very reluctant to interfere with the discretion which is vested in a Regional Board with respect to the question of retroactivity. We have sought to make it clear that we would interfere with a Board's discretion on this score only if it could be shown that the Regional Board, in deciding upon the effective date, proceeded upon an improper or fallacious principle. With much respect, we feel that we must alter the Board's decision with respect to the effective date of its Finding and Direction of July 9.

Obviously, the Regional Board at the time that it first heard this application found, as a fact, that the Company had substantiated its plea of inability to pay. In view of the fact that the price relief was not obtained by the Company until July 1, 1946, it would follow that the Company's financial inability persisted up to the date on which it received price relief. It seems to us, therefore, that the Company should not be called upon to pay the increased wage rates for any period prior to the date on which its predicament of financial inability was dispelled. To require the Company to pay the increased wages retroactively to December 15, 1945, would be inconsistent with the First Finding and Direction of the Regional Board concerning the Company's financial inability.

For the reasons stated above, we are of the opinion that the effective date of the Regional Board's Finding and Direction should be July 1 1946, and not December 15, 1945.

The application for leave to appeal is granted and the appeal is allowed. Finding and Direction will be issued accordingly.

November 22, 1946.

Re: Standard Chemical Company Limited, Toronto, Ont.

Reasons for Decision

The Company applied to the Regional War Labour Board for Ontario for permission to establish occupational classifications and certain ranges of wage rates therefor covering several senior technical personnel. The Regional Board in two decisions, dated the 5th of September, 1946, granted the Company's request, in part, and reduced the maxima of the ranges requested. Leave to appeal was granted by the Regional Board.

The Company, in its appeal, submitted the statement to us that for the past two years it has been carrying out an extensive expansion program and, as a consequence, it required a greatly enlarged staff. The request

to establish the new classifications under consideration was made in order to obtain approval of wage rates for the key men who would implement this plan. It is obvious to us after consideration of the briefs submitted in this appeal that the exact position of the Company was not made sufficiently clear to the Regional Board.

Dealing with the classification "Research Engineer" it would appear that the particular individual concerned was the author of a special chemical process. The Company found it promising enough to employ this individual and to finance the necessary experiments required to complete the work and to apply the knowledge gained into a large scale pro-

ductive operation. The statement that such technician might require additional staff and hence the necessity of a range of rates in order to employ such staff seems to us to be reasonable. It also appears to us that the technical skill and experience, together with the special circumstances under which this man was employed make it not unreasonable to grant the wage rate requested. We, therefore, allow the appeal in this regard.

The Company in its statement covering the appeal of the classifications dealt with in the other decision issued on the same day by

the Regional Board, outlined the work content of these positions in detail. We have examined this statement and have come to the conclusion that in order to enable the Company to attract the type of individual required to fill such position calls for a rather more generous range of wage rates than those permitted by the Regional Board but not quite to the extent originally requested. We therefore allow the appeal, in part, in regard to these positions, the newly-authorized rates to be shown in our Finding and Direction.

November 25, 1946.

Re: Trent Cotton Company Limited, Hamilton, Ont.

Reasons for Decision

With leave of the Regional War Labour Board for Ontario the Company appeals from a decision of that Board dated August 16, 1946.

A brief recital of the facts of this case will be helpful to a clear understanding of the appeal. The Company applied to the Regional War Labour Board for Ontario simultaneously for an eight and one-half (8½%) per cent increase in wage rates for (1) its hourly-rated and piece-work employees and (2) its supervisory and clerical employees. The Regional Board approved the application in respect of the first group of employees but denied the application concerning the supervisory and clerical employees. The Company contends that the same treatment should be given to the supervisory and clerical employees as was given to the production employees.

Generally speaking, it is not the policy of this Board to apply percentage increases to

various types of employees since the higher-rated employee benefits to a greater extent than does the lower-rated employee. In the present case, however, it has not been necessary for us to decide the case on the principle of the application of a uniform percentage increase; rather have we been able to arrive at a decision on the basis of the level of the wage rates involved. We have had an opportunity of comparing the wage rates requested by the Company for the employees affected with those paid by a similar company to similar occupational classifications in a similar locality. Our investigation has led us to the conclusion that the rates requested by the Company are just and reasonable within the meaning of Section 21 (a) of the Wartime Wages Control Order, 1943, P.C. 9384, as amended.

Under the circumstances, therefore, the appeal is allowed and the wage rates requested are approved. Finding and Direction will be issued accordingly.

November 28, 1946.

Re: Aluminum Company of Canada, Limited, Windsor, Ont.

Reasons for Decision

This is an appeal by the Company from a Finding and Direction of the Regional War Labour Board for Ontario, dated September, 1946, in which the Regional Board allowed only, in part, the Company's application for an increase in the range of wage rates in respect of the occupational classification of "Secretary". Leave to appeal was granted by the Regional Board.

The Company has a sales office in Windsor, Ontario, which is staffed with five employees and which is considered by the Company as an important outlet in that it services a considerable number of industries in the Windsor area. The Company has represented to us

that the employee concerned in this appeal is required to perform secretarial work of a specialized and confidential nature, supervise the office, interview clients, make reports and institute correspondence. On occasion he performs the duties of a salesman. It is apparent from the Company's submission to this Board that the employee herein concerned is called upon to perform duties far beyond those generally attributed to the occupational classification of "Secretary".

In our view the range of wage rates suggested by the Company for its "Secretary" is reasonable. In the circumstances, the appeal is allowed and Finding and Direction will be issued accordingly.

November 28, 1946.

Re: S. C. Johnson & Son, Limited, Brantford, Ont.

Reasons for Decision

This is an application by the Company for leave to appeal and an appeal from a Finding and Direction of the Regional War Labour Board for Ontario, dated September 6, 1946.

The Company requests authority to reduce its normal working week from forty-five (45) hours to forty (40) hours and to seek approval for certain increases in respect of various occupational classifications with effect as from June 20, 1946. The increase herein requested is made as the result of a job evaluation which was recently conducted by the Company and which had as its object the establishment of wage rates for the various occupational classifications which would have a proper relationship to each other.

We have examined into the wage rates requested by the Company and consider them to be just and reasonable within the meaning of Section 20 (1) (a) of the Wartime Wages Control Order, 1943, P.C. 9384, as amended. We have had an opportunity of comparing the wage rates in this plant with those paid for the same occupational classifications in other plants in the same locality or similar localities. Our investigation has borne out our opinion that it would be just and reasonable to allow the rates requested by the Company.

The application for leave to appeal and the appeal are allowed. Finding and Direction accordingly.

December 2, 1946.

Re: The Ottawa Electric Railway Company and Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Division 279

Reasons for Decision

An application by the Association for an order directing the Company to increase wages by 20 cents an hour for employees in the occupational classifications covered by collective agreement made between the Company and the Association. The Association also requests the Board to order certain changes in working conditions affecting pay for work performed on statutory holidays.

The Association alleges that the current wage rates of the employees concerned are not just and reasonable because they are low in comparison with the wage rates paid to employees of comparable street railway systems.

The Company opposes the application. Its argument is that previous increases in wage rates directed by the National War Labour Board for the employees concerned have established a fair and reasonable scale of wage rates for the services performed, and that no further increase is warranted in the light of the Company's earnings and profit history in pre-war years, which history, the Company says, might repeat itself.

Most of the 750 employees covered by the collective agreement are tram and bus operators. Employees in the Company's car shop and barn, bus garage, power plants and line and track departments are also interested in the application.

The evidence submitted supports the Association's allegation, but it falls far short of proving that the wage rates should be increased by 20 cents an hour.

There are four hourly rates presently in effect for tram and bus operators. Those rates are 68 cents for the first six months of service, 70 cents for the second six months, 71 cents for the third six months and 73 cents an hour thereafter. Thus we find a spread of only 5 cents an hour between the rates for the beginner and the fully qualified and experienced operators. Such is not the prevailing condition in other street railway systems. In the circumstances it would not be proper to grant a general increase to all operators. From the information we have on hand, it would appear that the following hourly rates would be reasonable, namely: 70 cents an hour for the first six months, 74 cents for the second six months, 78 cents for the third six months and 80 cents thereafter.

An analysis of the wage schedule in effect for the shop trades and employees in the power plant and line and track departments reveals, for the most part, reasonably accurate differentials between occupational classifications and between grades within the classifications. Possibly a job evaluation would disclose some inequities, but at this time we need not concern ourselves with such a possibility.

After taking into account all the circumstances of this case, and after noting the wage rates that are paid by comparable employers to employees in the same or substantially similar occupational classifications, we have come to the conclusion that the wage rates for the several occupational classifications of employees in the car shop and barn, bus garage, power plant, line department and track

department, should be increased by 6 cents an hour. The car changer (operator), however, should have 7 cents added to his present rate.

The adjustments aforementioned would, in our opinion, provide just and reasonable rates for the employees concerned.

The Company's financial position, as we see it, does not reveal inability to pay the wage increases proposed. Evidence was tendered to show that the Company must carry at least thirty-five million passengers per annum in order that it might operate on a fair and reasonable basis. In 1939, the Ottawa Electric carried 21,593,758 passengers. In 1945, it carried 60,376,356 passengers. According to the Company's statement showing the passenger traffic during 1946 to November 20, the Company will, this year, handle the greatest volume of traffic in its history.

Reference was made to the possible effect that greater use of automobiles would have on the number of passengers carried by the Company. There is no doubt but that greater use of automobiles by people going to and from the business sections of the city would reduce the Company's earnings. Such greater use does not appear to be the case. The withdrawal of gasoline rationing, for example, has not caused the Company's traffic volume to diminish. Moreover, it would appear that parking facilities in the business sections are

such as to preclude the possibility of any untoward increase in the use of the automobile as a direct competitor of the Company's street railway system.

On March 25, 1946, the Association served notice on the Company that it desired changes in wage rates and working conditions with effect of May 1, 1946, the expiry date of the collective agreement. Negotiations were undertaken by the parties. The issues involved were not settled by or through those negotiations. The application in this case was filed by the Association in September. In the application we were requested to provide that any increases we might find appropriate should be paid from May 1, 1946. As a rule we do not provide retroactive effect for any decision beyond the date of application. The facts of this case, however, make it appear that it would be just to require the Company to pay the increased rates from May 1, 1946.

At the hearing the parties filed with this Board, a joint request for an authorization to the Company to pay overtime and a special rate of pay for work performed on certain days and under certain conditions. The request seems reasonable and we approve same with effect from November 21, 1946.

Finding and Direction accordingly.

December 3, 1946.

Re: Gatineau Bus Company Limited, and Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Division No. 591

Reasons for Decision

The Association applied for an order directing the Company to increase wage rates by 15 cents an hour for bus drivers and garage employees. The Company opposed the application.

At the hearing the Association argued that because of an increase in passenger traffic on the Company's bus lines added responsibility and effort had to be assumed and made by the bus operators. Additional argument presented was to the effect that the wage rates paid the employees concerned are lower than those in effect for similar classifications in other comparable transportation systems.

The Company took issue with both arguments.

We are not impressed with the Association's argument that the wage rates should be increased because of increased traffic. In any event the Association failed to present any evidence on this point. However, we find that certain increases are necessary to provide just and reasonable wage rates for the employees concerned. The increases are as follows: for chauffeur, carpenter, blacksmith and greaser, 7 cents an hour; for mechanics, 9 cents an hour; and for the bus washer, gas boy and gas boy (tire repairer) 5 cents an hour or its equivalent to the monthly rated employees.

The increases should come into effect on September 1, 1946.

Finding and Direction accordingly.

December 4, 1946.

Re: North American Lumber and Supply Company Limited, Winnipeg, Man.

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for Ontario, dated June 20, 1946, wherein the Board declined to permit the Company to increase from 25 per cent to 33½ per cent the com-

mission on contract profit payable to the Company's managers in Ontario. Leave to appeal was granted by the Regional Board.

The Company defines "contract profit" as a supervision charge for a complete job of repairing or building. The amount of profit is

determined by subtracting from the contract price the total expenses including the selling price of all materials, the cost of labour and Workmen's Compensation. The difference is contract profit or loss.

Representations have been made to us by the Company that a commission of 33½ per cent on contract profits is quite common with respect to its managers in Manitoba and that it would be only fair to pay to its Ontario managers a similar commission. We have examined into the effect of such commission on actual earnings and we are of the opinion

that having regard to the degree of supervision which is required and the general effect of the increase of such commission, it would be just and reasonable to authorize the Company to increase its commission in respect of its Ontario managers from 25 per cent to 33½ per cent. The decision will be effective as from the date of the Company's application to the Regional Board.

Finding and Direction will be issued accordingly.

December 6, 1946.

Re: Windsor Plumbing and Heating Contractors Association and United Association of Plumbers and Steamfitters, Local Union No. 552, Windsor, Ont.

Reasons for Decision

This is a joint appeal by the above parties from a Finding and Direction of the Regional War Labour Board for Ontario, dated October 21, 1946. Leave to appeal was granted by the Regional Board.

A joint application was made to the Regional War Labour Board for Ontario requesting an increase in the wage rate for journeymen plumbers and steamfitters in the Windsor area. The Regional Board granted the application, in part. The parties contend, on appeal, that the request should have been granted in full and ask us to give effect to their original application.

On May 4, 1946, the Regional War Labour Board for Ontario authorized an increase in wage rates for the employees affected. The Regional Board has now authorized a second

increase within a period of a few months. To allow the appellants' claim would result in the establishment of the highest known rate for this trade in the Province of Ontario. Having regard to the increases granted by the Regional War Labour Board for Ontario to the employees affected by this application during the last few years and to the adequacy of the rate now authorized by the Regional Board, we are of the opinion that it would not be just and reasonable within the meaning of the Wartime Wages Control Order, 1943, to allow this appeal. We consider that it would have an unstabilizing effect upon the construction industry generally in the Windsor area.

For the reasons above stated, we are of the opinion that the appeal should be dismissed.

Finding and Direction will be issued accordingly.

December 6, 1946.

Re: Imperial Oil Limited, Calgary Refinery.

Reasons for Decision

This is an appeal by the Joint Industrial Council, representing both management and employees at the Calgary Refinery of Imperial Oil Limited. The Joint Industrial Council appeals from a Finding and Direction of the Regional War Labour Board for Alberta, dated August 21, 1946, whereby that Board declined the Council's application for permission to pay to wage earning employees (exclusive of those assigned to regular shift work) the equivalent of one day's pay for a statutory holiday when not worked.

The Regional Board refused to approve the application on the ground that "the custom of paying hourly or daily paid workers for statutory holidays not worked does not prevail in the province".

The Company operates refineries in several provinces. The condition of employment involved in this appeal has been approved by War Labour Boards having jurisdiction over

the Company's refineries in Nova Scotia, Quebec, Ontario and Saskatchewan. The Company has undertaken that the cost of implementing the said condition of employment will not result in any application for an increase in the prices of its petroleum products.

In view of the general adoption of the plan requested by the Company in its other refineries and the desirability of attaining uniformity of administration of the Wartime Wages Control Order, 1943, we are of the opinion that it would be just and reasonable for us to grant the Company's request. The appeal is allowed. The Board's approval will be confined to the six statutory holidays generally recognized, namely, New Years' Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.

Finding and Direction will be issued accordingly.

December 9, 1946.

Re: Canadian Vickers Limited, Montreal, and International Brotherhood of Boilermakers and Iron Shipbuilders and Helpers of America, Lodges 271 and 373, Sheet Metal Workers' International Association, Local Union 116, International Brotherhood of Electrical Workers, Local 568, United Brotherhood of Carpenters and Joiners of America, Local 1558, Brotherhood of Painters and Decorators of America, Local 349, and United Association of Plumbers and Steamfitters, Local 144.

Reasons for Decision

This is an application by the Unions for an order directing Canadian Vickers Limited, to increase wage rates by 10 cents an hour. The application affects those employees of the Company who are covered in collective agreements with the applicant Unions and employed in the Company's shipyard and Engineering Department in Montreal. The Unions also request this Board to direct the Company to establish a 40 hour week, a reduction of 7½ hours in the present normal work week.

The Company opposes the application on the ground that the wage rates in effect for its employees are already higher than those paid by its principal competitors, Marine Industries Limited at Sorel, and Davie Shipbuilding Company at Lauzon. The Company alleges that any additional labour costs would materially affect its competitive position.

According to the record, Canadian Vickers Limited paid much higher wage rates than did Marine Industries or Davie Shipbuilding at the outbreak of World War II. As a result of the recommendation of the Gouin Royal Commission, an Order in Council P.C. 629, dated January 12, 1942, was passed. That Order in Council narrowed the differentials which had previously existed between the wage rates at Vickers and at Marine Industries. Again those differentials were narrowed when the National War Labour Board by Finding and Direction dated January 5, 1944, established two scales of wage rates for the several occupational classifications in the employ of the shipyards in Quebec and Ontario. One of those scales was for Zone I (designated in the Finding and Direction) in which Vickers is located; the other was for Zone II in which the above named competitors are located. The wage rates are now 5 cents an hour higher in Zone I than in Zone II. Thus we find a smaller differential now existing than when the parties were free to negotiate and establish wage rates by means of collective bargaining and without a direction of this Board.

It should be pointed out that the Union representing the employees of Marine Industries applied to this Board for an increase in wage rates for those employees and this Board heard argument in that case on the same day as the parties to this application appeared

before us. We are accordingly in position to examine the issues involved in both cases at the same time.

The Company's representative informed us that a substantial shipbuilding program is under way at its Montreal shipyard. It was said that this program was developed despite the competition of foreign shipbuilding establishments. Such information was no doubt divulged to support the Company's contention that any increase in labour costs would put its competitive position in jeopardy. Having in mind the relevant provisions of Wartime Wages Control Order, 1943, we regard the contention as tantamount to a plea of inability to pay without first increasing its contract prices for the construction of ships. No evidence was presented to support such a plea. Accordingly we are unable to give effect to it.

The rates established in this Board's Finding and Direction of January 5, 1944, are still in effect at the Company's shipyard. Of course, the Cost-of-Living Bonus was merged with those rates on February 15, 1944. Since the date of the said Finding and Direction, changes have taken place in wage rates for employees in heavy industry in the Montreal area. Moreover, certain increases in wage rates have been granted to employees of other shipyards affected by the said Finding and Direction.

After considering all the factors involved in this case, we have reached the conclusion that it would be just and reasonable to direct the Company to increase by 10 cents an hour the wage rates of its employees represented by the applicant Unions.

The Unions failed to show cause why the normal work week of the Company should be reduced to 40 hours. The Company, on the other hand, gave what appears to be substantial reasons why such reduction would not be appropriate at this time. We dismiss that branch of the Union's application.

In view of all the circumstances of this case, we are not prepared to give any retroactive effect to this decision and will provide in our Finding and Direction that the increases hereby awarded shall come into effect on the date of this decision.

November 26, 1946.

Re: Marine Industries Limited, Sorel, P.Q., and Metal Trades Council of Sorel

Reasons for Decision

The Metal Trades Council of Sorel, applied to the National Board for an order directing the Company to increase wage rates for its shipyard occupational classifications. The Council on behalf of the Unions first asked for an increase of 15 cents an hour. At the hearing they amended their application and asked for a direction increasing wage rates by 10 cents an hour for all hourly rated employees except those in the occupational classification of slab helper for whom the rate of 90 cents an hour was requested.

The current wage rates in the shipyard in question are those established by this Board in its Finding and Direction of January 5, 1944, with the addition of the cost-of-living bonus which was incorporated with those rates on February 15, 1944.

The Unions' argument in support of the application may be summarized as follows:

1. Because of reduction in staff, many of the employees have been reclassified and placed in occupational classifications for which are paid lower rates than those previously received.
2. The Company has reduced its regular working hours from 48 to 40 per week.
3. Wage rates have been increased in other establishments since April 1943, (the effective date of the Finding and Direction of January 5, 1944), and because of

this and of changed conditions generally, the requested increase is just and reasonable.

The modification of the Unions' request had the effect of removing the major part of the Company's opposition to the application.

The Company says that it was obliged to establish a 40 hour week when, due to the steel strike, supplies fell short of their requirements. Now, however, the employees are working 44 hours per week. When the supply situation improves, the normal work week of 48 hours may be re-established. The Company has a large shipbuilding program in front of it. In the circumstances it is reasonable to assume that employment will continue at a high level at Marine Industries for some time.

The Company offered no effective argument in opposition to the Unions' request for a wage increase. On the other hand, we are satisfied that the applicants have made out a good case. We have decided to direct the Company to increase by 10 cents an hour the wage rates of the employees affected by the application, excepting the slab helper whose rate we fix at 85 cents an hour.

The increases shall come into effect on the date of this decision.

Finding and Direction accordingly.

November 26, 1946.

Re: Canadian Business Machine Workers' Union, C.F. of L., and National Cash Register Company of Canada, Limited, Toronto, Ont.

Reasons for Decision

This is an application for leave to appeal and an appeal by the Union from Findings and Directions of the Regional War Labour Board for Ontario, dated September 23 and 24, 1946. The Company concurs in the Union's appeal and has filed with this Board a letter indicating its support of the appeal.

The Company and Union applied jointly to the Regional War Labour Board for Ontario for approval of certain increases in wage rates. The Regional Board only approved the application in part, the present appeal seeks to obtain approval in toto of the original application.

Several cogent reasons have been advanced in support of the appeal. In the first place, the increased wage rates herein requested were settled by the Company and the Union as the result of collective bargaining. It represents the mutual desire of both employer and employee. The parties have also agreed that

in the event of approval of the increased wage rates certain changes would be made respecting rest periods which might be calculated to increase productivity. There is a factor of this case which we find it difficult to overlook namely, that with the exception of the application of the cost of living bonus there have not been any general wage increases in this plant since 1941. We believe that this factor commends this case for sympathetic consideration. In addition, the Company gave the Regional Board its written assurance that it is not the Company's intention to use the wage increase as the basis of an application for an increase in the selling price of its goods or services. We have ascertained from the Company that it will continue in effect its present normal working week of forty-four (44) hours and that the increased wage rates sought, if obtained, would not result in a reduction of the working week thereby involving a further indirect increase in the wage rate.

We have investigated into the propriety of the requested wage rates. In so doing we have had an opportunity of comparing the wage rates with those existing in other companies in the same industry, and we are of the opinion that the wage rates requested are just and reasonable and should be approved. This Board approves a general increase of five (5) cents per hour to the employees affected by

this application over and above the increase granted by the Regional War Labour Board for Ontario. In accordance with the Union's request, the additional increase of five (5) cents per hour will become effective as of the date of its appeal, namely, October 10, 1946.

Finding and Direction will be issued accordingly.

November 27, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decisions as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The Work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

The Wartime Labour Relations Board (National) met for two days during the month of November. During this period the Board received three applications, held six hearings, issued five certificates designating bargaining representatives, ordered three representation votes and gave decisions in two appeal cases.

Certificates Issued

Five applications for certification of bargaining representatives were approved by the Board and certificates issued as below:

1. Messrs. Donald Stewart, Reginald C. Harvey-Jellie, P. R. G. Leger, James Carlisle and W. G. Richardson and the *Quebec Federation of Professional Employees in Applied Science and Research, Unit No. 4*, for employees, employed by the *Canadian Broadcasting Corporation, Montreal, P.Q.*, as engineers or architects, professionally qualified or otherwise in the classifications of senior engineer, senior architect, supervising engineer, supervising architect, supervising engineer

(mechanical), supervising engineer (network), supervising engineer (Toronto), engineer, architect, assistant engineer, assistant architect, and junior engineer. The chief engineer, the assistant chief engineer, and the divisional heads classified as the projects engineer, chief architect, plant engineer, operations engineer, and transmission and development engineer were excluded from the bargaining unit.

2. Messrs. W. A. Rose and E. Dagenais and the *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees*, for employees of the superintendent's office of the *Canadian Pacific Railway Company at Farnham, P.Q.*, classified as clerk, maintenance-of-way clerk and clerk stenographer. The chief clerk, the assistant chief clerk and the superintendent's secretary were excluded from the bargaining unit.

3. Messrs. W. A. Rowe and G. H. Hamlin and the *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees*, for checkers and freight

handlers, employed on the waterfront at Halifax, N.S. by the *Dominion Atlantic Railway Company, Kentville, N.S.*

4. Messrs. J. L. Pateman & A. Mose and the *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees*, for the employees in the superintendent's office of the *Canadian Pacific Railway Company at Brandon, Manitoba*, classified as clerk, stenographer and clerk-stenographer. The chief clerk, the assistant chief clerk and the superintendent's secretary were excluded from the bargaining unit.

5. Messrs. J. N. A. Blouin and A. Gosse and the *Commercial Telegraphers' Union, Marconi System, Division No. 59*, for the radio telegraphers at coastal stations operated by the *Canadian Marconi Company Limited and Radio Officers in the Marine Service of the Canadian Marconi Company Limited, Montreal, P.Q.*

Error in Reporting Bargaining Unit for Certain Employees of the Bell Telephone Company.

Quebec Federation of Professional Employees Unit No. 3, and the *Bell Telephone Company of Canada, Montreal, P.Q.*, (L.G. Oct. 1946, p. 1418). In the October issue of the *LABOUR GAZETTE*, an error was made in reporting the classifications covered in the bargaining unit in the above noted matter. The item should have read: "Messrs. J. Clazie, W. E. Sykes, R. C. Harvey-Jellie and A. L. Fleming and the *Quebec Federation of Professional Employees, Unit No. 3*, for certain employees of the *Bell Telephone Company of Canada*, performing the duties of engineering assistant, technical assistant, student engineer, assistant engineer and engineers below the rank of division plant engineer, employed in the department of the Vice-president (engineering), in the engineering department, Eastern area and in the division plant engineering groups of the Eastern area plant department."

Representation Votes Ordered

1. *Canadian Association of Maritime Transport Workers, Local No. 1, Incorporated*, and *Lower St. Lawrence Transport Company Limited, Rimouski, P.Q.*, (L.G. Aug. 1946, p. 1051) Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q., was appointed by the Board to act as Returning Officer in a vote of the employees of the *Lower St. Lawrence Transport Company Limited, Rimouski, P.Q.*

The second engineers, third engineers and chief stewards were excluded from the eligible voters list while the votes of pursers are to be segregated pending a decision of the Board with regard to their eligibility for inclusion in the proposed bargaining unit.

2. *Canadian National Telegraph Unit No. 1, Federation of Employee-Professional Engineers and Assistants and the Canadian National Telegraph Company, Toronto, Ont.*, (L.G. Sept. 1946, p. 1221).

Following consideration of the application, the Board appointed Mr. H. Perkins, Industrial Relations Officer, Toronto, Ontario, Returning Officer, to conduct a vote of the employees of the *Canadian National Telegraph Company, Toronto, Ontario*. The eligible employees to vote will be—professional engineers below the rank of chief engineer and group head together with draftsmen and technical assistants in the engineering department of the company. The transmission engineer, outside plant engineer and equipment engineer were excluded from the eligible voters' lists.

3. *Canadian Seamen's Union and Coastal Towing Company, Limited, Vancouver, B.C.*, (L.G., Nov. 1946, p. 1558). Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., was appointed by the Board to act as Returning Officer in a vote of the unlicensed personnel in deck engine-room and stewards' departments on tugs and towboats operated by the *Coastal Towing Company, Limited, Vancouver, B.C.*

Applications for Certification Withdrawn

1. *Canadian Seamen's Union and Mohawk Navigation Company, Montreal, P.Q.* (L.G. Nov. 1946, p. 1559). On the request of the National Secretary of the Canadian Seamen's Union, the application for certification of bargaining representatives, on behalf of the unlicensed personnel employed on the company's vessels, was withdrawn.

2. *Canadian Seamen's Union and Northern Paper Mills, Limited, Hansen, Ont.* (L.G. Nov. 1946, p. 1559). The application for certification of bargaining representatives for the unlicensed personnel employed on the company's vessels was withdrawn on the request of the National Secretary of the Canadian Seamen's Union.

Applications for Certification Received During the Month of November, 1946

1. *Gayport Employees Association* on behalf of the unlicensed personnel employed on ships of the *Gayport Shipping Limited, Toronto, Ontario*.

2. *Canadian Navigators Federation* on behalf of deck officers on the SS. *Fleurus* of the *Anticosti Shipping Company, Montreal, P.Q.*

3. *Beverage Dispensers, Local 676, Hotel and Restaurant International Alliance and Bartenders International League of America*, on behalf of certain employees of the *Vancouver Hotel Company, Vancouver, B.C.*

Decisions of Board in Appeal Cases

1. Following a hearing the Board dismissed the appeal of *Le Syndicat des Chantiers Maritimes de Sorel* from a decision of the Quebec Wartime Labour Relations Board in rejecting the Syndicat's application for certification of bargaining representatives for employees of *Marine Industries Limited, Sorel, P.Q.* The Board reached the decision to dismiss the appeal for the reason that the application made to the Quebec Wartime Labour Relations Board for certification of bargaining representatives did not have the support of a majority of the employees affected.

Reasons for judgment will be issued at a later date.

2. On November 14, the Board allowed the appeal of the *Lockport Company, Division of National Sea Products Limited, Lockport,*

N.S., from a decision of the Nova Scotia Wartime Labour Relations Board, certifying bargaining representatives of the *Canadian Fish Handlers' Union, Local No. 7*, for the employees of the company. The Board reached the decision to allow the appeal and set aside the certification granted by the Nova Scotia Wartime Labour Relations Board without prejudice to the right of the union to make a further application to the Nova Scotia Board for certification of bargaining representatives.

Reasons for judgment will be issued at a later date.

Reasons for Judgment in Other Appeal Cases

Reasons for judgment in four cases dealt with by the Board at its October sittings and summarized in the November 1946 issue of the LABOUR GAZETTE are given below:

Between: Canadian National Telegraph Unit No. 1, Federation of Employee-Professional Engineers and Assistants, Applicant, and Canadian National Telegraph Company, Toronto, Respondent.

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Hills and Taylor.

Reasons for Judgment

This is an application for the certification of bargaining representatives for all professional engineers, below the rank of chief engineer, and their draftsmen and technical assistants in the Engineering Department, Canadian National Telegraph Company, Toronto. Bargaining representatives have been properly selected. There are 21 employees in the proposed bargaining unit of whom 9 are members in good standing of the Federation and 7 have signed authorizations in favour of the applicant.

The Company opposes the application with respect to the inclusion of the equipment engineer, transmission engineer and outside plant engineer on the grounds of their supervisory duties and responsibilities.

The Engineering Department of the Canadian National Telegraph Company consists of four divisions:—the equipment group, the transmission group, the outside plant group and the office services or clerical group. The latter group is not concerned in this application and it is the heads of each of these remaining three groups for which exclusion is asked. The Company points out that the group supervisor reports directly to the Chief Engineer and is responsible for assigning the work in his group and for seeing that it is carried out and he is responsible for the group results. The Company states that in the normal course of events, about 60 per cent of the time of the group heads is given to

direction of their employees; the balance of time being presumably devoted to engineering work.

The Board recognizes that in dealing with engineering groups of this nature where all employees involved are working in common on engineering projects and where, even in the case of senior men, a considerable portion of time is devoted to the development of engineering projects rather than to supervisory work, the usual criteria applicable to distinguish supervisory employees from employees working under their supervision and direction are more difficult to apply. However, having regard for all the information available, the Board is of opinion that the challenged classifications are not appropriate for inclusion in the unit for which certification is sought and should be excluded therefrom. Subject to these exclusions, the unit with respect to which certification is requested is an appropriate one in the circumstances. A representation vote is directed of the employees in the bargaining unit and will be taken under the direction of the Chief Executive Officer of the Board.

(Sgd.) A. H. BROWN,
Vice-Chairman for the Board.

M. FLEMING, Esq.,
for the Applicant.

F. E. JONES, Esq.,

R. B. STEELE, Esq.,

P. E. SHANTZ, Esq.,

for the Respondent.

Dated at Ottawa, November 14, 1946.

Between: Quebec Federation of Professional Employees in Applied Science and Research, Unit No. 4, Applicant, and Canadian Broadcasting Corporation, Respondent.

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, Hills and Taylor.

Reasons for Judgment

This is an application for certification of bargaining representatives for employees of the Canadian Broadcasting Corporation engaged in a professional capacity as engineers or architects below the rank of Assistant Chief Engineer and designated as follows: Project Engineer, Operations Engineer, Plant Engineer, Transmission and Development Engineer, Chief Architect, Senior Engineer, Assistant Operations Engineer, Assistant Plant Engineer, Assistant Transmission and Development Engineer, Assistant Chief Architect, Regional Engineer, Supervising Architect, Supervising Mechanical Engineer, Supervising Engineer, Architect, Engineer, Assistant Architect, Assistant Engineer and Junior Engineer.

The majority of employees in the proposed bargaining unit are members in good standing of the Quebec Federation of Professional Employees. Bargaining representatives have been duly selected. The application is not opposed by the Corporation. Two questions arise for consideration—firstly, the question of what employees, if any, in the proposed unit should be excluded on account of their confidential or supervisory duties and, secondly, the status of those employees who are doing engineering work but are not professionally-qualified engineers. In regard to the second question, counsel for the applicant advised that the Federation was interested primarily in bargaining for professionally-qualified employees in applied research and science but was prepared to act for other non-professionally-qualified engineers, if desired by such employees.

In the Bell Telephone Case, D.L.S. 7-634, this Board stated that "like considerations apply in general in determining an appropriate bargaining unit comprising or including occupational classifications requiring professional skills as apply in determining an appropriate craft unit comprising or including occupational classifications requiring particular

artisan skills. An appropriate unit should include the occupational classifications engaged in common employment in the same line of skilled work and in which there is by reason of training or experience and established practice the normal opportunity for promotion from the lowest to the highest occupational classifications comprising the professional or professional and technical group."

The Board does not consider that for the purpose of collective bargaining, there is any important difference in interest between a professionally-qualified engineer and an engineer who has not such professional qualifications provided both are carrying on work of the same or similar nature and under similar conditions. Academic attainment cannot by itself determine the community of interest. Therefore the Board is not disposed to consider as appropriate a bargaining unit which seeks to distinguish between employee solely on the basis of professional qualifications. In the present case the non-professionally-qualified engineers will, therefore, be included in the bargaining unit subject to the decision of the Board as to exclusion of any of them on other grounds.

There will be excluded from the bargaining unit the employees shown in Group 11 of the Corporation's classification, consisting of the projects engineer, chief architect, plant engineer, operations engineer, transmission and development engineer, who are divisional heads, in view of the senior supervisory functions they discharge in relation to other employees in the bargaining unit.

Subject to the foregoing, certification will be granted.

(Sgd.) A. H. BROWN,
Vice-Chairman for the Board.

R. C. HARVEY-JELLIE, Esq.

J. CARLISLE, Esq.,

for the Applicant.

B. W. RICHARDSON, Esq.,

J. A. OUMET, Esq.,

for the Respondent.

Dated at Ottawa, Nov. 14, 1946.

Between: Glass Bottle Blowers' Association of the United States and Canada, Appellant (Intervener), and Anchor Cap & Closure Corporation of Canada, Ltd., Toronto, Ontario, Appellant (Respondent), and United Electrical, Radio and Machine Workers of America Local 512, Respondent (Petitioner).

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal from the decision of the Ontario Labour Relations Board ordering a vote of employees in an application for certification made by the respondent union. The appellant union had intervened to oppose the application and had filed a counter-application for certification.

In ordering a vote the Ontario Board did not include the name of the appellant union on the ballot. The failure of that Board to do so is the ground of this appeal.

In the course of the proceedings before the Ontario Board, three checks of union membership cards and written authorizations of employees in favour of the appellant and respondent unions were made against company payroll records by the Board, the last one being of a date immediately prior to the date of the hearing of the applications by that Board. On each such check a majority of employees were members of the respondent union. On each such check the number of employees who had signed authorization cards, or were members of the appellant union, comprised less than a majority of the employees in the bargaining unit.

On each check, a considerable number of employees who were shown as members of the respondent union had also signed authorizations in favour of the appellant union. As stated, even with the inclusion of the authorizations from employees who were members of the respondent union, the number of employees who *prima facie* desired to be represented by

the appellant union was considerably less than fifty per cent.

The Ontario Board in deciding not to include the name of the appellant union on the ballot followed the rule established by this Board in the Wright Hargreaves case, D.L.S. 7-542.

Nothing in the circumstances of this case warranted a departure from that rule by the placing of the name of the appellant union on the ballot along with that of the respondent union.

Leave to appeal is granted but the appeal is dismissed.

The Company asks for leave to appeal and appeals against the decision of the Ontario Board on the ground that a number of employees included in the voting unit should have been excluded therefrom on account of supervisory or confidential duties.

Leave to appeal is granted. The appeal is allowed in respect of General Inspectors, who will be excluded from the bargaining unit on the ground that in view of the nature of their work it is not appropriate to include them in the bargaining unit.

The appeal as to the other employees is dismissed.

(Sgd.) A. H. BROWN,
Vice-Chairman.

for the Majority of the Board

Messrs. Complin and Taylor dissented from the composition of the bargaining unit.

H. A. F. BOYDE, Esq. K.C., for Appellant (Intervener).

G. A. GALE, Esq. }
J. O. DEEGAN, Esq. } for Appellant (Respondent).
C. GEDDES, Esq. }

W. E. BLAIR, Esq. for Respondent (Petitioner).

Dated at Ottawa, November 14, 1946.

Between: Local No. 1, Industrial Union of Veneer Workers (CCL), Appellant (Petitioner), and Canada Veneers Limited, Saint John, N.B., Respondent.

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

Leave having been granted by the New Brunswick Wartime Labour Relations Board, this is an appeal by the Union from a decision of that Board excluding certain "lathe foremen and boilerhouse foremen" from the bargaining

unit determined by the Board in certifying bargaining representatives appointed or elected by the Union. In the certificates given by the New Brunswick Board on June 28, 1946, the designated bargaining representatives were certified for the employees of the Company "except office staff and foremen including lathe foremen and boilerhouse foremen". Some eight employees comprise the two excluded classifications.

The appellant contends that the employees designated as "lathe foremen" and "boilerhouse foremen" have been wrongly classified and that their limited supervisory duties and responsibilities are such as to bring them properly within the bargaining unit and, as formerly, within the scope of the collective agreement with the employer.

The employer takes the position that the lathe and boilerhouse personnel involved in these proceedings are foremen with full authority in the direction of persons working with them and, in the case of lathe personnel, with full responsibility in matters of production and in care and maintenance of their machines.

This Board has heard the arguments advanced by the parties and has had its officers investigate the actual circumstances of employment affecting such personnel not only at the plant of the employer concerned herein but at various other plants in Canada doing similar or related work. As a result of this investigation, the Board finds that persons having the status of the lathe and boilerhouse personnel involved in these proceedings are not ordinarily considered to be foremen or to have the degree of supervisory duties and responsibilities commonly devolving upon that classification.

The investigation at the plant of the employer reveals that the "lathe foremen" are skilled lathe operators working with and having some supervision over lathe crews consisting

of five men. All "lathe foremen" and crews are under the supervision of a foreman. The "boilerhouse foremen" are stationary engineers with third-class certificates. The duties are the usual ones of supervision of firing and regulation of gauges. They are assisted by one and three helpers, depending on shifts.

The facts disclosed by the investigation at the plant of the employer warrant the conclusion that the lathe and boilerhouse personnel have not the status of foremen for the purposes of P.C. 1003 and therefore should be included in the bargaining unit established by the New Brunswick Board.

Accordingly, the appeal is allowed. The certificate given by the New Brunswick Board on June 28, 1946, is amended to read that the designated bargaining representatives are certified to act for "the employees of Canada Veneers Limited including 'lathe foremen' and 'boilerhouse foremen' but not including office staff or other foremen;....."

(Sgd.) A. H. BROWN,

Vice-Chairman for the Board.

E. A. FORSEY, Esq., Ph. D.,

A. ANDRAS, Esq.,

A. LIEFF, Esq.,

for the Respondent.

Dated at Ottawa, November 13, 1946.

**Between: Local 466, International Printing Pressmen and Assistants' Union,
Appellant (Petitioner), and Stauntons Limited, Leaside, Ontario,
Respondent.**

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Mosher, Hills, Picard and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal from a decision of the Ontario Labour Relations Board ordering a vote of employees of Stauntons Limited, Leaside, Ontario, on whose behalf the appellant had made application for certification of bargaining representatives.

The appellant union claims that the majority of the employees in the bargaining unit are members in good standing of the union and that this claim was substantiated by the report

of the Investigating Officer assigned by the Ontario Board to investigate this matter.

The ground of appeal is that the Ontario Board should have granted certification without ordering a vote in accordance with the usual practice followed, it is claimed, by that Board under similar circumstances.

Section 7 of P.C. 1003 gives the Board discretionary power to satisfy itself by examination of records, by vote or otherwise that in the case of a trade union, the trade union is acting with the authority of the majority of the employees affected in the appointment of bargaining representatives. The Ontario Board exercised this discretion, as it had a right to do, in ordering a vote of employees

in order to satisfy itself that the union in this case had the support of the majority of employees in the bargaining unit.

While it may have been within the authority of the Ontario Board to grant certification without ordering a vote in the circumstances, on the other hand it was equally a matter within the discretion of the Board to order a vote as it did.

Leave to appeal is granted but appeal is dismissed.

Between: Cosmos Imperial Mills Limited (Cosmos Division), Yarmouth, N.S., Appellant (Respondent), and United Textile Workers of America (AFL), Lodge 152, Respondent (Applicant).

The Board consisted of the Vice-Chairman, Messrs. Best, Complin, D'Aoust, Hills, Mosher, Picard and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal by the Cosmos Imperial Mills Limited against the decisions of the Nova Scotia Wartime Labour Relations Board certifying bargaining representatives for employees of the Company comprising an appropriate bargaining unit.

The grounds of appeal are as follows:

1. That the Provincial Board erred in being satisfied on the evidence before it, and without sufficient evidence, that the election of bargaining representatives was regularly and properly made.
2. That the Provincial Board erred in being satisfied on the evidence before it, and without sufficient evidence, that the Trade Union (United Textile Workers of America, Lodge No. 152) acted with the authority of the employees affected as prescribed by section two sub-section five of P.C. 1003.
3. That the Provincial Board in purporting to proceed under section seven of P.C. 1003 did not comply with the requirements of subsection two of section five thereof, but on the contrary deemed a large number of employees to be members of the said Trade Union without having before it any evidence that the said employees, or any of them, had in writing requested the said Trade Union to elect or appoint bargaining representatives on their behalf.
4. That the Provincial Board acted upon information or evidence that was not disclosed or made accessible to the present Appellant, and consequently the Appellant had no opportunity to check or cross-examine upon such evidence.
5. That the Provincial Board erred in rejecting evidence as to statements made by

(Sgd.) A. H. BROWN,
Vice-Chairman,
for the majority of the Board.

I dissent:

(Sgd.) J. A. D'Aoust

W. F. BREEN, Esq.
for the Appellant (Petitioner)

J. C. ADAMS, Esq., K.C.
for the Respondent

Dated at Ottawa, November 13, 1946.

certain employees that they had been made members of the Union without their knowledge or consent.

6. That in the circumstances disclosed by the evidence the Provincial Board should have directed that a vote be taken.

It is the duty of the Board under the Regulations to satisfy itself that in appointing bargaining representatives the applicant union acted with the authority of the majority of employees in the bargaining unit. In the present case, the investigating officer of the Nova Scotia Board reported to that Board, following his check of the Company payrolls and the Union records, that out of 477 employees in the proposed bargaining unit 241 were members of the Union, while 11 additional names of Union members were doubtful as to identity or were not on the Company payroll. As this represented a majority of the employees comprising the bargaining unit, it was within the authority and discretion of the Nova Scotia Board to certify without ordering a vote, if satisfied to accept the investigating officer's report.

The Nova Scotia Board accepted the investigating officer's report and proceeded to certify the bargaining representatives accordingly.

In the absence of evidence that the Nova Scotia Board was mistaken in its findings that the majority of employees were members of the respondent union, there are no grounds upon which this Board would be warranted in interfering with the discretion exercised by the Nova Scotia Board in certifying without a vote.

The Appellant Company claims that they should have been given the opportunity to cross-examine the investigating officer and examine the Union records. The position of the Company on an application for certification is not, however, the same as that of a litigant in court proceedings. Upon an application for certification, the Company as an

interested party is entitled to give evidence and to make representation to the Board, but it does not follow that it also has the right to check Union membership records or to cross-examine the Board's investigating officers with respect thereto. It is the duty of the Board to satisfy itself as to the strength of the union in the employee unit.

Moreover, apart from the foregoing, the record of proceedings before the Nova Scotia Board shows that the report of the investigating officer, Mr. Bell, was not challenged by the Company representative at the hearing before that Board.

According to the record of proceedings, the following transpired in this connection:

CHAIRMAN: Unless it is contested, we must accept the result of Mr. Bell's scrutiny of the records, that 241 Union members are on the payroll.

Mr. C. B. SMITH: We are not questioning that. We have nothing to say on that except that we have every confidence that Mr. Bell would do the job properly. We have no question on that.

Coming now to paragraph No. 5 of the grounds of appeal, and referring again to the record of proceedings before the Nova Scotia Board, the Appellant had no evidence to present to the Nova Scotia Board at the time of the hearing to support any allegation that employees had been made members of the Union without their knowledge and consent. The Appellant did request an adjournment in order, in the words of the Appellant's representative, "that we could produce witnesses here for testimony if they are prepared to give evidence to substantiate what they said." As there was no evidence tendered at the hearing, and no assurance that in the event of an adjournment of the hearing the Appellant could produce such evidence, we cannot agree

that the Appellant was deprived of the opportunity to present evidence on this matter or that the Nova Scotia Board acted unjustly in not granting an adjournment of the hearing. No new evidence was presented to this Board which would warrant the Board disturbing the finding of the Nova Scotia Board as to the majority support of the respondent union among the employees comprising the bargaining unit.

The final point raised by the Appellant is that bargaining representatives were not properly selected by the Respondent Union for the reason that at the time bargaining representatives were appointed by the Union and the application made to the Board for certification, the charter of the Local Union, although applied for, had not been received from the headquarters of the International Union. The charter was, however, issued prior to the date of certification by that Board. In view of this, the Board is of opinion that the Nova Scotia Board had authority to certify the bargaining representatives selected by the Union pursuant to the provisions of Section 5 (2) of the Regulations (See U.E.R. & M. Workers, Local 529, and Packard Electric Company Limited, D.L.S. 7-511).

Leave to appeal is granted but the appeal is dismissed.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

The Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with

the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During November, 1946, Conciliation Officers were assigned to confer with the parties in an attempt to effect an agreement in the following cases:

The John Bertram & Sons Co. Ltd., Dundas, Ont., and Local 1740, International Association of Machinists (TLC). Mr. William Dunn, Conciliation Officer.

British Columbia Motor Transportation Limited, Vancouver, B.C., and Division 101, Amalgamated Association of Street, Electric and Motor Coach Employees (AFL-TLC). Mr. J. E. Eades, Conciliation Officer.

Claratel Cafes, Winnipeg, Manitoba, and Local 171, Hotel and Restaurant Employees (AFL-TLC). Mr. R. H. Hooper, Conciliation Officer.

John Duff & Sons, Ltd., Hamilton, Ontario, and Local 320, United Packinghouse Workers of America, (CIO-CCL). Mr. G. R. Fenwick, Conciliation Officer.

Insulation Products Limited, Toronto, and Local 265, International Chemical Workers Union (AFL-TLC). Mr. James Hutcheon, Conciliation Officer.

Lake Shore Mines, Limited, Kirkland Lake, Ontario, and Local 240, International Union of Mine, Mill and Smelter Workers (CIO-CCL). Mr. Harold Perkins, Conciliation Officer.

Marvens Limited, Moncton, N.B., and Local 302, United Packinghouse Workers of America (CIO-CCL). Mr. H. R. Pettigrove, Conciliation Officer.

Municipality of St. Clements, Manitoba, and Municipal Employees of St. Clements (OBU). Mr. T. J. Williams, Conciliation Officer.

Welland Vale Manufacturing Company, St. Catharines, Ont., and Local 199, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO). Mr. Harold Perkins, Conciliation Officer.

Western Rawhide and Harness Manufacturing Company, St. Boniface, Man., and Local 430, International Fur and Leather Workers' Union (CIO-CCL). Mr. T. J. Williams, Conciliation Officer.

Weidman Brothers Limited, Winnipeg, Manitoba, and Local 286, Retail Clerks International Protective Association (AFL-TLC). Mr. T. J. Williams, Conciliation Officer.

Agreements Facilitated by Conciliation Officers and Cases Withdrawn

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:

Bishopric & National Sodium Products, Ltd., Bishopric, Sask., and Sodium Sulphate Workers' Union. Mr. H. S. Johnstone, Conciliation Officer.

Dominion Wheel & Foundries Ltd., Toronto, and Pattern Makers Association of Toronto (AFL-TLC). Mr. William Dunn, Conciliation Officer.

Public Markets Ltd., St. Boniface, Manitoba, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (AFL-TLC). Mr. J. S. McCullagh, Conciliation Officer.

Silverware Products Limited, Toronto, Ontario, and Local 514, United Electrical, Radio and Machine Workers of America (CIO-CCL). Mr. G. R. Fenwick, Conciliation Officer.

Boards Established

During the month, Boards of Conciliation were established but not fully constituted as follows:

Canadian Line Materials Limited, Scarborough Junction, Ont., and Pattern Makers' Association of Toronto (AFL-TLC). Mr. William Dunn, Conciliation Officer.

Gelling Engineering Limited, Welland, Ontario, and Local 523, United Electrical Radio and Machine Workers of America (CIO-CCL). Mr. James Hutcheon, Conciliation Officer.

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:

East Malartic Mines. The Board of Conciliation established to deal with a dispute between East Malartic Mines, Halet, P.Q., and Local 696, Malartic Mine & Mill Workers' Union (CIO-CCL) was fully constituted on November 4, 1946, with the appointment of Mr. R. T. Ferguson, Montreal, P.Q. as Chairman of the Board who was appointed in the absence of a recommendation from the other two members of the Board. Mr. R. R. Evans, K.C., Hamilton, Ont., and Mr. G. M. Desaulniers, Montreal, P.Q., were appointed on the recommendation of the employer and employees respectively.

Link-Belt, Limited. The Board of Conciliation established to deal with a dispute between Link-Belt Limited, Toronto, Ontario, and Local 3394, United Steelworkers of America (CIO-CCL) was fully constituted on November 22, 1946, with the appointment of Mr. A. C. MacDonald, K.C., Toronto, as Chairman of the Board who was appointed on the joint recommendation of the other two members of the

Board. Mr. N. L. Mathews, K.C., Toronto, and Mr. A. Berwin, Toronto, were appointed on the recommendation of the employer and employees respectively.

Malartic Gold Fields Mine Ltd. The Board of Conciliation established to deal with a dispute between Malartic Gold Fields Mine Ltd., and Local 696, Malartic Mine & Mill Workers Union (International Union M.M.S.W. CIO-CCL) was fully constituted on November 4, 1946, with the appointment of Mr. R. T. Ferguson, Montreal, P.Q., as Chairman of the Board who was appointed in the absence of a recommendation from the other two members of the Board. Mr. R. R. Evans, K.C., Hamilton, Ont., and Mr. G. M. Desaulniers, Montreal, were appointed on the recommendation of the employer and employees respectively.

Massey Harris Company Limited (Toronto, Verity and Market St. Plant, Brantford). The Board of Conciliation established to deal with a dispute between Massey Harris Company Limited (Toronto, Verity and Market St. Plant, Brantford), and Locals 439 and 458, International Union, United Automobile, Aircraft & Agricultural Implement Workers of America (UAW-CIO) was fully constituted on November 22, 1946, with the appointment of His Honour Judge A. Cochrane, Brampton, Ont., as Chairman of the Board who was appointed in the absence of a recommendation from the other two members of the Board.

Mr. J. J. Robinette, K.C., Toronto, and Mr. C. L. Dubin, Toronto, were appointed on the recommendation of the employer and employees respectively.

Moffats Limited. The Board of Conciliation established to deal with a dispute between Moffats Limited, Weston, Ontario, and Local 3129, United Steelworkers of America (CIO-CCL) was fully constituted on November 9, 1946, with the appointment of His Honour Judge Samuel Factor, as Chairman of the Board who was appointed in the absence of a recommendation from the other two members of the Board. Mr. E. Macauley Dillon, Toronto, Ont., and Mr. David Archer, Toronto, Ont., were appointed on the recommendation of the employer and employees respectively.

Joseph Stokes Rubber Company Limited. The Board of Conciliation established to deal with a dispute between Joseph Stokes Rubber Company, Limited, Welland, Ontario, and Local 523, United Electrical Radio and Machine Workers of America, (CIO-CCL) was fully constituted on November 29, 1946 with the appointment of Dr. Alexander Brady, Toronto, as Chairman of the Board who was appointed on the joint recommendation of the other two members of the Board. Mr. M. A. Seymour, K.C., St. Catharines, Ont., and Dr. H. G. Forster, Welland, Ont., were appointed on the recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during November:—

Report of Board in Dispute Between W. C. Edwards Co. Limited, Ottawa, Ontario, and Local 6, National Union of Woodworkers (CCL).

On November 12, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Mr. Duncan MacTavish, K.C., Chairman, appointed by the Minister of Labour on the joint recommendation of the other two members of the Board, Mr. W. J. LeClair of Ottawa, and Dr. Eugene Forsey of Ottawa, appointed on the nomination of the employer and employees, respectively.

Report of Board

The Board had the advantage of representations made on behalf of the National Union of Woodworkers, Local No. 6, by Mr. Chap-

man, and on behalf of W. C. Edwards Co., Limited by Mr. E. R. Bremner and Mr. F. Willard Cleary. The question for decision and recommendation by this Board of Conciliation is the narrow one of union security. All parties made it clear that agreement had been reached on all other matters in dispute between the employer and the employees. The question for decision became even narrower in the light of the representations made by all parties concerned when it became apparent that the Union requested the application of the Rand formula and the Company rejected the Union's request in this respect.

On behalf of the Union it was urged that the employer should undertake the obligation of collecting dues by way of check-off in order to prevent certain employees getting what the Union representative referred to as a "free ride". The Union was naturally desirous of preventing certain of the employees enjoying the fruits of union activity without contributing by way of union dues.

On the other hand, the Company took the stand that it was unreasonable to impose upon it the obligation of collecting dues to maintain union membership.

The evidence adduced before the Board fully satisfied me that the relations between the Edwards Company and its employees have been good over the years and the Union representative admitted this. Had such relations been otherwise and had I been satisfied that there were abuses of such a nature that they could only be corrected by the intervention of a Union, my view might have been different. I am of the opinion, however, that there is nothing which would justify the Board in recommending that the employer should be obliged to accept the Rand formula and the check-off system. As indicated above, the employer's representatives as they are entitled to do, took a determined attitude against the imposition of the check-off. I am not satisfied that the Union has made a case for the application of the Rand formula to this Company, nor has the Union convinced me that there is justification even for a voluntary check-off.

In the result, my recommendation is that in this case the Union is not entitled to the application of the Rand formula and the agreement should be signed without the inclusion of the union security clause.

Respectfully submitted,

(sgd.) DUNCAN K. MACTAVISH,
Chairman of the Conciliation Board.

Ottawa,
November 12, 1946.

Mr. D. K. MacTavish,
Barrister,
56 Sparks Street,
Ottawa, Canada.

Dear Mr. MacTavish:—

I concur in your findings in this case. As I understand this matter, there are no issues in dispute except the matter of Union security. I cannot find that Local No. 6 National Union of Woodworkers (CCL), has submitted any evidence which would support its claim for an irrevocable check-off and accordingly I must decide against such claim.

I can find no evidence of any antipathy on the part of this employer to the existence or

functioning of the Union. In fact the evidence submitted fully supported the employer's claim that the firm had facilitated the formation of the union and accepted it as the bargaining agent for the employees.

The firm's stand on the matter of both union shop and check-off has been consistent from the inception of the Union, and I believe is justified. It is that these principles are undemocratic and would constitute an unjust interference with the liberty of employees. It is further held by the employer that it is the only firm in its classification (wholesale lumber dealers) organized by the union and that any action on its part in this matter might be calculated to embarrass its retailer customers.

In this connection it should be borne in mind that the three firms named as being also organized under the Union are not competitors but rather customers of W. C. Edwards & Co. Limited; also that out of these three, one has not any form of check-off, one has a voluntary check-off and the third has just agreed to a check-off, but has had no time to observe its effect. There exist numerous other lumber retailers and customers of W. C. Edwards & Co. Limited still unorganized.

On the instructions of this Conciliation Board, I made a personal visit to the Employer's office for the purpose of clarifying the attitude towards a check-off and with a view to definitely ascertaining whether or not such attitude applied to the principle of a voluntary check-off.

I found that it did. I was permitted to view the Company's books and afforded proof of the statements made to the Board as to Company-Employee relations. I found that some twenty-eight employees were currently enjoying financial assistance well outside the terms of their wage contract and that it has always been the practice of the firm to financially assist worthy and needy employees in the matter of home purchase, sickness, etc., etc. I also checked on the firm's statements to the Board as to employer's record of employment. I found the following to be the exact percentages in this case—

Employees under 1 year service....	13%
Employees serving 1 to 5 years.....	30%
“ “ 5 to 10 years	28%
“ “ 10 to 20 years	22%
“ “ over 25 years	7%
	100%

I found further that it had been and continued to be a practice and custom of the firm to afford financial assistance to invalid

employees of long standing and to afford financial assistance in many cases to the dependents of deceased employees.

All in all, I could find no evidence that the union had in any way bettered the employees' position and believe that no proof has been shown by the union that it is providing any so-called "free-ride" to any employees. In this connection the Union representative submitted the claim that Union action had resulted in an increase in employees' wages. I would point out that resistance to wage increase at that time was not on the part of the employer but on the part of Government policy which had frozen wages.

In his plea, the union representative submitted to the members of the Board copies of Mr. Justice Rand's "Award on Issue of Union Security in Ford Dispute". May I point out that on page 6 of that leaflet, Mr. Justice Rand states "*I do not for a moment suggest that this is a device of general applicability. Its object is primarily to enable the union to function properly. In other cases it might defeat that object by lessening the necessity for self-development. In dealing with each labour situation, we must pay regard to its special features and circumstances.*" I submit that the last two sentences of this statement have direct application to this case.

I repeat I must find against the union application and support the employer's refusal to grant a check-off.

Yours very truly,

(sgd.) W. J. LECLAIR,
Employer's Nominee.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

I regret that I am unable to concur in the views of my colleagues on the Board.

Minority Report

The sole issue in this case is union security. The Union, which is not certified, was recognized by the company in August 1944, as a result of a secret ballot supervised by members of the company's own staff. The vote for the union was 87 to 15, and the union says that it has at present the support of about 75 per cent of the employees, though the company challenges this statement. The first agreement did not contain any union security provisions. In December, 1945, the Union took a vote of its members on whether they wanted a union shop and check-off included in the next agreement. The vote was 101 for, 1 against and 2 spoiled ballots.

The Union accordingly asked the company to agree to a union shop and check-off. The

company refused. The Union then asked for the Rand formula. The company refused. The Conciliation Officer suggested a voluntary sixty-day revocable check-off. The company refused. Members of this Board suggested the possibility of an irrevocable check-off for union members for the term of the agreement, or a sixty-day voluntary revocable check-off. The company again refused. The company throughout has been absolutely adamant, has refused to make any concession or counter-proposals. It has not even been willing to let the union set up a dues collection table near the pay office. The most it would consider at all was letting a union officer off five minutes early on pay day to help collect the dues.

The union, on the other hand, not only abandoned its original demand for the union shop and offered to accept instead the Rand formula, including the "company security" clauses, but also offered, before this Board, to accept the results of a Government-supervised vote on the Rand formula. It is therefore clear that the union, in marked contrast to the company, has shown a willingness to accept conciliation and compromise.

Before this Board, the company took the position that its employees must be free to spend their wages as they saw fit, and that it would not interfere by deducting union dues. When I pointed out that this objection was relevant to the irrevocable check-off and the Rand formula, but not to the voluntary revocable check-off, where the individual employee signs a specific document requesting and authorizing the company to make the deductions, the company's representative at first tried to make out that it was the same thing. Forced, finally, to admit that it was not, he took refuge in another blank refusal: "All right then, I just refuse without reasons, if you like."

It is hardly necessary to point out that such an attitude makes conciliation impossible. Conciliation demands some give and take on both sides, not concessions on one side and a demand for unconditional surrender on the other. In these circumstances, in my opinion, the members of the board have no choice but to set forth the facts as they see them and to make such recommendations as they think proper in the light of those facts.

I have already set forth the facts as I see them. My recommendation is that the company agree to a Government-supervised vote on the Rand formula and agree to be bound by the result.

It may be argued that, if the Union has really accomplished something for the employees, and really has the support it says it has, it does not need any check-off; that if it

does need a check-off, that fact shows that it has failed to "sell itself" to the employees, and that there is no reason why the company should do the job for it.

In my opinion, there can be no doubt that the Union has accomplished a great deal for the employees. The Company admitted that substantial wage increases had followed union organization, though it emphasized that these had come through joint application to the Regional War Labour Board, and that the men "could have had them anyway, through a committee; they didn't need a union." The fact remains that the wage increases were not forthcoming till the union appeared on the scene; and no great knowledge of industrial history is required to convince one that this is something more than a coincidence. The company also admitted that the union agreement gave the employees, as definite rights, certain advantages which they had previously enjoyed only by grace of the company, though it emphasized that the company was prepared to do, and actually had done, far more for the employees than the agreement bound it to do.

The argument that difficulty in collecting dues shows a lack of support for the Union completely overlooks the main point of the Union's case before the Board. If the employees are under no obligation to pay dues, then those who do pay bear the whole burden of maintaining the agreement and the Union, and those who do not pay get all the benefits without contributing a copper. In the phraseology used by workers, those who don't pay get a "free ride". In these circumstances, it is hardly surprising that loyal supporters of the Union may take the position: "I'm willing to pay my dues if the others do; but I'm hanged if I'm going to pay the whole shot for them and myself as well." Union supporters want to be something more than what the French call, "les pauvres cochons de payants". They want to see the same principle applied in industry as in the political community: Where all benefit, all should pay. In the more formal language of Mr. Justice Rand: "It would not then as a general proposition be inequitable to require of all employees a contribution towards the expense of maintaining the administration of employee interests, of administering the law of their employment. . . . I consider it entirely equitable then that all employees should be required to shoulder their portion of the burden of expense for administering the law of their employment, the union contract; that they must take the burden along with the benefit."

It may be pointed out that the principle that it is the organization's own business to

"sell itself" to its members or potential members is not applied to the Law Societies, or to the teaching profession generally throughout Canada. It may be taken for granted that the Law Societies and the teachers' organizations confer substantial benefits on their members. It is surely not being too cynical to suggest that if the members were under no obligation to pay their dues a certain proportion, perhaps a large proportion, would shirk their responsibilities and blandly accept the fruit of other men's labours, making no attempt to bear one another's burdens. At any rate, the Law Societies and the teachers' organizations have not cared to take the risk. The payment of dues to the former is, I understand, compulsory; and in most provinces of Canada acts of the legislatures have established a union shop (sometimes with a provision for contracting out within a limited period) and a check-off. If I may say so without invidious intent, what is sauce for the professional goose should be sauce for the working-class gander.

It should not be forgotten, also, that there is always the possibility that if the employee is under no obligation to pay dues the employer may take the opportunity to drop hints that the man who pays is a fool for his pains; that he can get the same benefits without paying and even without the existence of a union at all. In this case, the Union admitted that the company had made no attempt to interfere with organization, and had, indeed, dismissed a foreman who made such an attempt. But I was struck by the fact that at least once (as already noted) the company's representative said that the men didn't need a union, that they could have got the same things through a "committee", and, in my opinion, the general demeanour of the company's representative before the Board did not suggest ungrudging acceptance of the union, and was not such as to inspire confidence by the union in the company.

I think I should also point out that the Union, in asking for union security, is not asking for something unique, extraordinary, or even unusual. In the United States, according to the *Monthly Labour Review* (issued by the U.S. Department of Labour), April 1946, pp. 567-572, well over six million workers were covered by union shop or closed shop contracts, nearly four millions were under maintenance of membership contracts, and well over five millions under contracts providing for the check-off. Closed shop and union shop contracts accounted for 45 per cent of all workers under agreement, the total number under agreement being about 48 per cent of the total number of workers eligible. In Canada, practically the whole coal mining

industry has the check-off, and the whole Alberta coal industry the union shop as well. In the pulp and paper industry, 50 plants, with 19,350 workers, have the union shop; 48, with 20,340 workers, have maintenance of membership; in short, some form of union security is almost universal. (See LABOUR GAZETTE, April 1945 supplement on *Collective Agreements in the Pulp and Paper Industry, 1944*, pp. 3-5). In the iron and steel group of industries (including aircraft, automobiles and parts, farm implements, shipbuilding, etc., as well as iron and steel proper), there were, before the adoption of the Rand formula in the Ford plant at Windsor, over 5,000 workers under union shop contracts, nearly 20,000 under the closed shop, and over 45,000 under the check-off. (See LABOUR GAZETTE, October 1945, supplement on *Union Status in Collective Agreements in the Iron and Steel Industry in Canada, 1945*, p. 3.) In the nine months since the Rand formula was enunciated, fifteen other plants besides Ford have embodied it in their contracts with the United Automobile Workers (see the *United Automobile Worker*, Canadian edition, September, 1946, vol. 10, no. 9, p. 1); three iron and steel products plants have included a modified form of it (minus the company security provisions) in their contracts with the United Steelworkers (see *Steel Labor*, Canadian edition, September 1946, vol. xi, no. 9, p. 3); and the International Nickel Company has also written a modified form of it into its contract with the International Union of Mine, Mill and Smelter Workers. In the group of industries comprising non-ferrous metal products, non-metallic mineral products, and chemical products, in 1945, over 3,500 workers were covered by union shop or closed shop contracts, over 3,000 by maintenance of membership, and nearly 15,000 by the check-off (see LABOUR GAZETTE, March 1946, supplement on *Union Status in Collective Agreements in the Manufacture of Non-Ferrous Metal Products, Non-Metallic Mineral Products, and Chemical*

Products, Canada, 1945). In the woodworking industry in Ottawa itself, two firms under contract with this same local union have the irrevocable check-off for the term of the agreement, and a third has the sixty-day revocable check-off. Of nearly 400 agreements between CCL unions and various employers all across the country, 67 have the union shop or a slightly modified form of it (making union membership compulsory for all new employees), 7 have the closed shop, 73 have maintenance of membership, and 167 have the check-off.

Hundreds of other Canadian employers, many of them very large, and some of the most important until recently fiercely opposed to trade unionism itself, have accepted some form of union security; several large firms, and a considerable number of small ones, have accepted precisely the form, or an even more drastic form (compulsory check-off for all employees for the term of the agreement, but without company security provisions), which the union in this case is asking. But this company refuses to budge one inch from a flat refusal to consider even so modest a proposal as the sixty-day revocable check-off. It is apparently unaware that the whole pattern of industrial relations is changing, that unions are a permanent and important part of our social institutions, and its contribution to progress is to stand pat. If it had been willing to make any concession to secure agreement, I should have been prepared to consider embodying it in this report. In the circumstances, however, I see no reason at all for modifying my view that the union is entitled to ask for a Government-supervised vote on the Rand formula and that both parties should agree to be bound by the results.

Respectfully submitted,

(Sgd.) EUGENE FORSEY,

Employees' Nominee of the Board.

Ottawa, November 6, 1946.

Report of Board in Dispute Between Ingersoll Machine & Tool Co., Ingersoll, Ontario, and Local 2918, United Steelworkers of America (CIO-CCL)

On November 22, 1946, the Minister of Labour received the Report of the Board of Conciliation the personnel of which was as follows: Dr. Alexander Brady, Chairman, appointed by the Minister of Labour on the recommendation of the other two members of the Board, Mr. E. Macauley Dillon, K.C. of Toronto, and Mr. Oliver Hodges of London, appointed on the nomination of the employer and employees respectively.

Report of Board

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

SIR:

The Board of Conciliation appointed by you to deal with the above dispute begs to submit its report.

The Board met representatives of the parties on November 6. Messrs. A. G. Warden, H. A. Wilson, and S. T. Garside represented the Company. Messrs. Frank Quaife and W. H. Hipperson represented the Union.

It appeared that the sole issue dividing the parties concerned the request of the Union for a union-shop on the ground that some employees did not join the Union because they thought that the Company did not wish them to join. The members of the Board of Conciliation are familiar with this type of situation, and their efforts are directed, both in discussions with the parties and in the present report, to persuade the Company and the Union to agree upon some simple provisions that would help to reduce the fears of the Union.

The Board would, therefore, recommend:

(i) That the Company send a letter to every employee stating that it recognizes without question the free right of every employee to join the Union and that any rumours which may have circulated among the employees to the effect that the Company was hostile to the Union were entirely groundless. Such a letter would have a declaratory and symbolic value; it would testify to the genuine desire of the company to remove in the mind of the employees any misunderstandings that some may have entertained.

(ii) That the Union withdraw its request for a Union shop and that the Company concede a voluntary check-off provision irrevocable for the duration of the agreement. At present there is a voluntary check-off recognized outside the Agreement. In this recommendation the Board is solely concerned with the circumstances that it believes the irrevocable element in the check-off protects the Union in the occasional or odd instance. The Company emphasized before the Board that it disapproves of exerting any compulsion on its employees in the matter of the check-off. The Board is, therefore, asking the Company in this matter to abridge its scruples to a small extent in order to meet the claims of the Union.

These recommendations are submitted by the Board in the behalf that they do not require extravagant concessions by either party, but that they strike the median point in a bargaining situation where agreement between the parties may reasonably be expected. The Board would urge their acceptance upon both Company and Union.

All of which is respectfully submitted.

Dated at Toronto this 19th day of November, 1946.

(Sgd.) ALEXANDER BRADY,
Chairman.

(Sgd.) OLIVER HODGES,
Employee Nominee.

Minority Report

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

SIR:

I have had the privilege of reading the majority report of the Board in this matter. I agree with its recommendations except the one recommending an irrevocable check-off. The latest figures on the employees and their membership as presented to the Board were as follows:

Employees in the bargaining unit..	211
Members of the union.....	184
On check-off	175

The check-off is at present operating notwithstanding the fact that the agreement itself has expired. Both the employer and the representatives of the Union agree that experience of the immediately preceding period was such as to show practically no net change in the number of employees on the check-off during the period.

At the hearing the employees expressed a feeling that the Company was hostile to the union and that that air of hostility was being communicated throughout the plant. The Company denied that it was hostile to the union and it was my suggestion at the hearing that the type of letter which the majority of the Board had recommended should be written by the Company to dispel that feeling if it existed among the employees. At the hearing the Company agreed to do this if the employees would accept a check-off in substantially its present form. However, the representatives of the employees refused to accept anything less than an irrevocable check-off.

The Company refused to concede this on the ground that it was not willing to impose this element of compulsion on its employees and it was made abundantly clear to me at the hearing that there is not the slightest possibility of the Company ever agreeing to an irrevocable check-off. I am of the opinion, therefore, that to recommend either an irrevocable check-off or the closed shop (to which original demand the Union returned when conciliation failed) would antagonize and tend to postpone the ultimate agreement

of the parties. Consequently, I do not feel disposed to recommend this device as have the majority of the Board. Furthermore, past experience has demonstrated that practically none of the employees revoked their check-off and therefore I see no practical advantage to be gained by recommending it at the expense of the employee's freedom and right to change his mind.

All of which is respectfully submitted.

Dated at Toronto this 25th day of November, 1946.

(Sgd.) E. MACAULEY DILLON,

Employer Nominee.

Member of Board.

Report of Board in Dispute Between Canada Electric Castings Limited, Orillia, Ontario, and United Electrical, Radio and Machine Workers of America, Local 511.

On November 26, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Mr. Justice W. D. Roach, Chairman, appointed on the recommendation of the other two members of the Board, Mr. M. J. Fenwick of Oshawa and Mr. J. L. Ross of Toronto, appointed on the nomination of the employees and employer respectively.

Report of Board

To the Honourable
The Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation established by you in this matter hereby respectfully submits its report as follows:

The Board held a preliminary meeting at the City of Toronto on October 30, 1945, and concluded that in the light of the number and character of the disputes between the parties, as they appeared in the report of Mr. Perkins, the conciliation officer, dated the 28th day of September, 1945, it would be helpful if the parties would file briefs with your Board before we met with them. Pursuant to our request, briefs were filed by the parties promptly, and your Board held its first meeting with the parties at the City of Toronto on November 10, 1945. At that meeting the parties were represented as follows:—

For the Employer—Mr. W. H. R. Burrows, President; Mr. C. C. Calvin, K.C., Counsel.

For the Union—Mr. W. E. Blair, District Representative.

As a result of the brief submitted by the company and the representations made to us on behalf of the company at that meeting, it appeared that the company found itself in a most embarrassing position due to dissension, not between the company and its employees, but among the employees themselves. A substantial number of the employees were apparently dissatisfied with the Union and had organized themselves into a body called The

Industrial Council of the Employees of Canada Electric Castings Limited and had applied to the Ontario Labour Relations Board in October for certification as the collective bargaining agency of all the employees. The Union had intervened in those proceedings. The application was due to be dealt with by the Board on November 13. In these circumstances it was felt that our Board should defer our discussions with the parties until after the application of the Industrial Council had been dealt with by the Ontario Labour Relations Board. Accordingly our meeting with the parties was adjourned until November 14, and our Board at once advised the Ontario Labour Relations Board of our position.

We again met with the parties at Toronto on November 14. The Ontario Labour Relations Board had reserved its decision on November 13. As a result of the discussions at that meeting, our Board decided that we should meet with the parties at Orillia and invite representatives of the Industrial Council to appear before us. Our purpose was to attempt a reconciliation between the opposing groups of the employees as a preliminary step towards a solution of any differences between the employer and its employees.

It should be here stated that the Union had been certified as the bargaining agent of the employees by the Ontario Labour Court in the autumn of 1943. A collective bargaining agreement had been entered into between it and the company dated June 7, 1944. On April 5, 1945, the company served notice terminating that agreement on June 6, 1945.

We next met with the parties and representatives of the Industrial Council at Orillia on November 21. At that time the parties were represented as follows:—

For the Company—Mr. Burrows and Mr. Calvin, as previously;

For the Union—Mr. Blair, Mr. William Jones, member of the negotiating committee, and Mr. Clarence Johnson, Financial Secretary of Local 511.

We heard representations from the representatives of both the Union and the Industrial Council. The friction between these opposing groups of employees was greater than we had anticipated and there was no possibility of bringing about a reconciliation between them. Each of those bodies claimed to represent a substantial majority of all the employees. The position of the company became more apparent as a result of that meeting. It insisted that it was willing to negotiate an agreement, but it was manifest that if it then negotiated with the Union, before the application of the Industrial Council for certification had been decided, there would be an avalanche of resentment against the company by the members of the Industrial Council. It was evident that your Board could not bring about harmonious industrial relations in this plant until the dispute between the opposing groups of employees had been officially concluded. All parties concurred in this opinion and, accordingly, the meeting was adjourned sine die to await the decision of the Ontario Labour Relations Board.

On January 9, 1946, the Ontario Labour Relations Board directed that a vote be taken among the employees. That vote was taken on February 18, 1946. The ballot submitted was as follows:—

In your dealings with Canada Electric Castings Limited do you wish to bargain collectively through

United Electrical, Radio and Machine Workers of America, Local 511;

The Industrial Council of the Employees of Canada Electric Castings Limited.

The result of the ballot was as follows:—

Number of names on eligibility list...	49
Number of ballots cast.....	42
Number of ballots spoiled.....	1
Number of ballots segregated (not counted)	2

Report of Board in Dispute Between Hamilton Chapter of the Canadian Association of Master Painters and Decorators, Hamilton, Ontario, and the Brotherhood of Painters, Decorators and Paperhangers of America, Local 205 (AFL-TLC).

On November 2, 1946, the Minister of Labour received the Report of the Board of Conciliation the personnel of which was as follows: His Honour Judge Samuel Factor, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members of the Board, Mr. R. H. Yeates, of Hamilton, and Mr. N. W. Linington, of Hamilton, appointed on the nomination of the employer and employees respectively.

Number of ballots in favour of Industrial Council	23
Number of ballots in favour of Union..	16
	42

On June 11, 1946, the Ontario Labour Relations Board issued its decision dismissing the application of the Industrial Council.

From that decision the Industrial Council appealed to the National Wartime Labour Relations Board. That Board issued its decision on October 22, 1946, dismissing the appeal.

In the result the Union is still the certified bargaining agent of all the employees.

That issue having been thus terminated, the Chairman of your Board wrote to both the Company and the Union under date October 4, pointing out that your Board was anxious to complete its duties and that we were at the services of the parties if they required our services further. We have received no reply from the Union. The company replied under date October 7 stating that it had not received any communication from the Union relevant to further negotiations.

In view of the lapse of time since October 4 when your Board thus communicated with the parties, it is felt that this report should not be longer delayed.

All of which is respectfully submitted.

Dated this 23rd day of November, 1946.

(Sgd.) W. D. ROACH,
Chairman

(Sgd.) M. J. FENWICK,
Employees' Nominee

(Sgd.) J. L. ROSS,
Employer Nominee

Report of Board

The Honourable HUMPHREY MITCHELL,
P.C., M.P.,
Minister of Labour,
Ottawa, Ont.

SIR:

The Board of Conciliation established by you in the above matter hereby reports as follows:

The Board held sittings at the City of Hamilton on October 16, and at the City of

Toronto on October 30 and November 2.

At the hearing on October 30, the employer (Hamilton Chapter of the Canadian Association of Master Painters and Decorators) was represented by Mr. E. Lock, the Vice-President of the Chapter, Mr. Charles Kermath, Secretary, and Mr. H. A. Boyd, Counsel for the Chapter. The employees (Brotherhood of Painters, Decorators and Paperhangers of America, Local 205) were represented by Mr. Fred Molineaux and Mr. George Wallace, two members of the Bargaining Committee.

Local 205 of the Union is negotiating a collective bargaining agreement with the employer, the aforesaid Chapter, and all matters have been agreed to with the exception of union security, the matter of wages having been decided by the Regional War Labour Board.

The union has submitted the following proposal on union security:

"All employees, members of Local 205 at the date of the agreement, shall continue their membership as a condition of employment, and all who are not then members shall become members within twenty-one days after employment and continue their membership as a condition of employment."

In other words, the union proposes a union shop.

It is interesting to note the background of this local union, which has a history of co-operation for many years since it was chartered by the Brotherhood on June 26, 1900, and is affiliated with the American Federation of Labour and the Trades and Labour Congress of Canada.

The relation between the Chapter and the Union has been very co-operative, and a minimum of interruptions has been caused by strikes during the past thirty odd years. Agreements have been executed between these parties; the most recent one in 1944, which was renewed by mutual consent in 1945, and expired March 28, 1946. In that agreement the following clause was contained:

"Union shop conditions will prevail and preference given to union men."

It is contended by the Union that such clause is a union shop clause, and that the intention was that any non-union men could be hired but that they would become members of the Union within a specified time, and it emphasizes the words "union shop conditions" as bearing the meaning of a union shop, and that its present proposal, as above contained, is merely a re-drafting or clarification of the old clause.

The Chapter is composed of thirty-eight painting and decorating contractors who belong to the Chapter, out of a total of one

hundred and twenty master painter contractors in the City of Hamilton, so that eighty-two painting and decorating contractors are independent and obtain a good percentage of the business in Hamilton and vicinity, although it seems that the dollar volume of business is in the hands of this Chapter.

The Chapter vigorously opposes the imposition of a union shop on several grounds. In the first place, the business is seasonal, and they usually work under pressure of completing a job, which makes it necessary for them to obtain extra men who are not union members, and that it will be impractical to ask these temporary employees to join the union, and that they would rather not take the job. The Chapter contends that this equally applies to permanent employees; that the better workmen would not submit to being compelled to join the Union within a limited time, with the result that the business of the contractors would be curtailed if such employees would have to be dismissed because of their refusal to join the Union.

It is further contended by the Chapter that although they control the dollar volume of business, they are in the minority so far as numbers are concerned, and that any employee who refuses to join the union or maintain his union membership as a condition of employment would merely leave their employment and go to one of the other eighty-two independent contractors, and that it is not a case of imposing this union security clause on a single employer, but rather on a fluctuating body of employers, and it could not be practically enforced.

There was also quite a difference of opinion as to the number who are presently union men, the Chapter contending that only 20 or 25 per cent are, whereas the union representatives stated about 75 per cent are union men. From the evidence it seems that the total number of employees is between 300 and 375, and that only 160 are union members, which includes about 60 working for contractors not belonging to the Chapter.

Your Board is of the opinion that some form of maintenance of membership should be provided, qualified to enable a member of the Chapter to retain a valuable employee, or an employee possessing outstanding ability, or one who is employed under other circumstances which would adversely affect the business of the employer if he were dismissed for not joining the Union. The Board is also of the opinion that without compelling new men that are hired to join the union, that preference should be given to union men if they are available, but no non-union men should be hired in order to displace union men.
