In order to achieve both of the above-mentioned objectives, your Board recommends the following union security clause being inserted in the agreement;

All employees who, at the date of this agreement, are members in good standing of the union, shall remain members of the union as a condition of their employment; subject, however, that the Chapter or any member thereof, on the ground that an employee possesses such outstanding ability is so valuable to his employer; or is employed under such other circumstances that the business of the employer will be adversely affected by his dismissal, may retain in his employment such employee, although he has resigned or has been suspended or expelled from the union. If any dispute arises as to the aforesaid grounds, it shall be referred

to arbitration as provided in Clause 11 of the agreement.

In the hiring of new employees, preference shall be given to union men; if no union men are available, the employer may hire non-union men, but such non-union men shall not be hired to replace a union man unless the union man has been dismissed or discharged for cause.

All of which is respectfully submitted.

Dated at Toronto this 2nd day of November, 1946.

Report of Board in Dispute Between Cannery Machinery, Limited, Simcoe, Ontario, and Local 257, (UAW-CIO)

On November 29, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: The Honourable Mr. Justice W. D. Roach, Chairman, appointed by the Minister of Labour on the recommendation of the other two members of the Board, Mr. John Sheppard of Toronto, and Mr. Bora Laskin, also of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable
The Minister of Labour
Ottawa, Ontario.

The undersigned Chairman and Members of the Board of Conciliation established by you in this matter hereby submits its report as follows.

Through the whole-hearted and sincere cooperation of the parties with your Board all disputes between the parties have been completely settled and they have entered into a collective bargaining agreement.

The parties were represented before us as follows:—

For the Company: Mr. J. B. Doyle—President
Mr. W. S. Bryan—Accountant

For the Union: Mr. Robert Stacey—District Representative
Mr. L. E. Exelby—President, Local 257
Mr. G. R. Munn—Financial Secretary, Local 257

Your Board cannot speak too highly of the generous assistance given them by these representatives who throughout the entire proceedings demonstrated their anxiety to have harmonious industrial relations in this plant.

This is the second collective bargaining agreement between the parties. The earlier one expired on February 28th of this year. It contained a maintenance of membership clause which has been also embodied in this second agreement. As between the parties it has proved quite satisfactory, but as between the local officers of the union and the members difficulties have arisen. Frequently some of the members have been inexcusably dilatory or negligent in the matter of payment of their union dues. Had the local officers of the union applied the maintenance of membership provision of the agreement strictly, it would have meant that those delinquent members would have lost their employment with the company. The fact that the local officers refrained from doing so was due to an all too generous attitude toward the delinquents. This situation was explained to your Board by the representatives of the Union and we felt that it was of such importance that we should record our unanimous views on it in this report.

We believe, because it was so reported to us, that the members of this local are fundamentally loyal to it. It apparently functions along democratic lines without any undue pressure from officials whose jurisdiction is either local or extends throughout the district. So long as it does operate in a democratic manner the members should give it more than mere lip service. If it is to be healthy and virile, as it should be, then it deserves the whole-hearted support of its members including their financial support. It is entitled to all that or nothing. The secretary or treasurer or other officers of a local union should not be mere collection agents for the collection of dues and it savours of selfishness and unfairness if and when the members so regard

them. It is more selfish and more unfair when the rank and file of a local union, having once been assured the benefits that have come to them through the agency of the union, should continue to reap those benefits and at the same time become indifferent in their support of the union. We feel reasonably certain that in this particular local there has not been any intended or studied indifference by the members toward it and that delinquency in the matter of dues payment has been due to carelessness. That is a condition which it behooves the members to remedy forthwith and to be on guard against its recurrence.

Report of the Board in Dispute Between A. E. McKenzie Company Limited, Brandon, Manitoba, and Local 1, Canadian Bakery Workers' Union (CCL)

On November 26, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: His Honour Judge Milton George of Morden, Manitoba, Chairman, appointed by the Minister of Labour on the recommendation of the other two members of the Board, Mr. T. W. Laidlaw of Brandon and Mr. J. Silver of Brandon, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

DEAR SIR:

In the matter of the Wartime Labour Relations Regulations P.C. 1003, and of a dispute between A. E. McKenzie Co. Ltd., Brandon, Man., and Canadian Bakery Workers' Union (CCL).

We wish to report that the Conciliation Board, authorized by your Order dated September 20, 1946, met at Brandon, Man., on Tuesday, November 19, and continued its sessions throughout November 20 and 21.

During such sessions representations were made to the Board by Mr. A. E. McKenzie, on behalf of the employer, and by Mr. T. W. White, on behalf of the employees.

All terms of the Agreement, formerly agreed upon by the parties before Mr. Williams, the Conciliation Officer, were reconsidered and discussed and necessary amendments made

Report of the Board in Dispute Between Donnell and Mudge Ltd., New Toronto, Ontario and Local 330, International Fur and Leather Workers Union (CIO-CCL)

On November 28, 1946, the Minister of Labour received the report of the Board of Conciliation, the personnel of which was as follows: His Honour Judge H. E. Fuller,

We draw your attention to the provisions in the agreement regarding preferential seniority for veterans, and the fact that it has received the unqualified endorsement of the Provincial Command of the Canadian Legion.

All of which is respectfully submitted.

Dated at Toronto, this 27th day of November, 1946.

(Sgd.) W. D. ROACH,

Chairman.

(Sgd.) JOHN W. SHEPPARD,

Employer's Nominee.

(Sgd.) BORA LASKIN,

Employee's Nominee.

satisfactory to both parties concerned. The other terms, on which agreement could not be reached with the assistance of the Conciliation Officer, were the subject of lengthy discussion before this Board. We are pleased to report that, with the assistance of the Board, perfect agreement was reached on these points as well and a final collective agreement agreed upon by both parties. Such Agreement will be drawn up, setting forth all the terms agreed upon and executed in due course.

We are further pleased to report that the antagonistic feeling existing between the parties, that was so apparent during the first day's sessions, appeared to be entirely dissipated before the conclusion of the hearings and both parties showed a ready willingness to co-operate to the fullest extent in carrying out the terms of the Agreement.

In closing the hearing, this Board recommended that a notice, signed by both parties, stating that a satisfactory Agreement between employer and employee had been reached, be immediately posted up in a conspicuous place in the office of the plant.

Yours truly,

(Sgd.) J. M. GEORGE,

Chairman.

(Sgd.) J. W. SILVER,

Employee Member.

(Sgd.) T. W. LAIDLAW,

Employer Member.

Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members of the Board, Mr. R. R. Evans, K.C. of Hamilton, and Mr.

Norman Levy of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable
The Minister of Labour,
Department of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you in this matter held a number of meetings with the parties. For the Company there appeared Mr. N. L. Mathews, Solicitor, Mr. P. J. Duggan, General Manager, Mr. Walter Dudley, Factory Manager, and Mr. William Ridout, Superintendent. The Union was represented by Mr. F. Collins, International Representative, Mr. Murdock, Mr. Segar, President of the Local Union, and a number of the Committeemen of the Union.

After several meetings, a number of the matters in dispute were settled and it was agreed that on those matters still outstanding the Chairman of the Board should make suggestions for settlement directly to the Company and to the Union. This was done and there followed a meeting between Mr.

Collins, representing the Union, and Mr. Mathews, representing the Company, at which time a settlement was arrived at in all matters then outstanding.

It is therefore with some satisfaction that the Board are able to report to you that an Agreement has been arrived at between the parties on all matters in dispute and a new collective bargaining agreement, the terms of which have been agreed upon, is now being drawn up for signature by the parties.

The Board wish to acknowledge the assistance and co-operation by Mr. Mathews and Mr. Collins and the willingness to co-operate for the purpose of arriving at a settlement by all parties concerned.

All of which is respectfully submitted.

Dated at Welland, Ontario, this 22nd day of November, A.D. 1946.

(Sgd.) HAROLD E. FULLER,
Chairman.

(Sgd.) NORMAN LEVY,
Member of Board (Employees).

(Sgd.) R. R. EVANS,
Member of Board (Employer).

Report of Board in Dispute Between Moffats Limited, Weston, Ontario, and Local 3129, United Steelworkers of America (CIO-CCL)

On November 30th, 1946, the Minister of Labour received the Report of the Board of Conciliation, the personnel of which was as follows: His Honour Judge Samuel Factor, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other two members of the Board, Mr. E. Macaulay Dillon of Toronto, and Mr. David Archer, also of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

Sir:

The Board in this matter consisted of David Archer, the nominee of the employees, E. Macaulay Dillon, K.C., the nominee of the employer, with His Honour Judge Samuel Factor as chairman appointed by the Minister of Labour.

The Board had three sessions. The employees were represented by P. G. O'Donovan, Regional Officer of United Steelworkers of America, Cleve Kidd, Research Director of United Steelworkers of America, Keith Ross,

President of Local 3129 and John Noble, James Mair and Frank Ditta, members of the bargaining committee of the Local. Mr. D. G. Pyle of the Central Ontario Industrial Relations Institute appeared for the Company which was also represented by Mr. Norman Moffat, one of the directors, Walter S. Miller, works manager, and Mr. James L. Ross, secretary and solicitor for the Company.

Your Board is very pleased to report that after discussion of the matters still at issue between the parties and a full exploration of what the Board felt were reasonable compromise proposals, this dispute has been fully conciliated and the parties have executed a collective bargaining agreement.

All of which is respectfully submitted.

Dated at Toronto this 28th day of November, 1946.

(Sgd.) S. FACTOR
Chairman.

(Sgd.) D. B. ARCHER,
Member of the Board.

(Sgd.) E. MACAULEY DILLON,
Member of the Board.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020

OFFICERS of the Industrial Relations Branch dealt with 14 industrial disputes during the month of November, involving 21,249 workpeople employed in 34 separate establishments. Of these, 6 were new disputes which originated during the month and 8 were situations which had been untermiated as of October 31, and received further attention in November. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, and Fredericton, N.B. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and the officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Wood Products Workers, Grimsby, Ontario.—It was reported in the November issue of the *LABOUR GAZETTE* (p. 1574) that the Minister of Labour had appointed His Honour Judge H. E. Fuller, of Woodstock, Ontario, to investigate charges that Merritt Brothers, of Grimsby, Ontario, had dismissed two employees allegedly on account of union activity on behalf of the United Automobile, Aircraft and Agricultural Implement Workers of America. A hearing of the case took place at Grimsby on November 18, following which the Commissioner reported that, upon the evidence, he found that the two employees were dismissed for breach of plant rules, and that there was no evidence that they were dismissed on account of their membership in or activity on behalf of the union concerned.

Advertising Workers, Toronto, Ont.—The November issue of the *LABOUR GAZETTE* (p. 1574) contained a report of the appointment by the Minister of Labour of His Honour Judge Samuel Factor, of Toronto, to investigate a complaint that the E. L. Ruddy Sign Company, Limited, of Toronto, had dismissed an employee because of his membership or

activity on behalf of the United Retail, Wholesale and Department Store Employees of America. The Commissioner found upon the evidence that the man in question was dismissed by the Company for the reason that he attended a union meeting and was working on behalf of the union. Pursuant to a recommendation of the Commissioner, the Acting Minister of Labour ordered the Company to reinstate the dismissed employee in his former position and to reimburse him for lost wages.

Rubber Workers, Acton Vale, P.Q.—During November, a report was received from Judge Honoré Achim, of Montreal, P.Q., in connection with his investigation as Industrial Disputes Inquiry Commissioner of a charge that Acton Rubber Limited, Acton Vale, P.Q., had dismissed an employee because of activity on behalf of Local 236, Rubber Workers Federal Union (T.L.C.C.). (See October LABOUR GAZETTE, p. 1435.) The report indicated that the union had withdrawn its complaint for lack of evidence.

Rubber Workers, Welland, Ont.—In the latter part of November a request was received from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commission to investigate a charge that the Joseph Stokes Rubber Company, Limited, Welland, Ont., had dismissed or discriminated against two employees for the reason that they were working on behalf of the United Electrical, Radio and Machine Workers of America. In compliance with this request, the Acting Minister of Labour on November 29 appointed His Honour J. G. S. Stanbury, of St. Catharines, Ontario, for the purpose of conducting an investigation under the provisions of Section 5 of Order in Council P.C. 4020.

Jewellery Products Workers, Toronto, Ont.—Pursuant to a request by the Minister of Labour for Ontario, the Acting Minister of Labour on November 9 appointed His Honour Judge A. Cochrane, of Brampton, Ontario, as an Industrial Disputes Inquiry Commissioner under the provisions of Section 5 of Order in Council P.C. 4020 to investigate a charge that Coro (Canada) Limited, of Toronto, had dismissed two employees because of union membership or activity. The union involved was the Metal Polishers', Buffers', Platers' and Helpers' International Union. The report of the Commissioner had not been received at the end of the period under review.

Newspaper Compositors, Various Provinces.—Reference was made in the October issue of the LABOUR GAZETTE (p. 1437) to the appointment of the Honourable Mr. Justice

S. E. Richards, of Winnipeg, Man., as an Industrial Disputes Inquiry Commissioner to investigate matters in dispute between the Southam Company, Limited, and the International Typographical Union, involving daily newspapers published by the Company in Winnipeg, Edmonton, Vancouver, Hamilton and Ottawa.

During November, the Commissioner reported the results of his separate and joint meetings with officials of the Company and the Union. He stated that the president of the Company had taken the position that it was the traditional policy of the Company that the local publisher of each newspaper should negotiate independently any collective agreement in respect of the newspaper published by him. The Company president would not negotiate for the local publisher.

The international president of the Union took the position that he represented all the local unions involved in the dispute and was ready to enter into negotiations towards a settlement of the issues in dispute. He stated, further, that the Union had no objection to local negotiations and separate collective agreements for each newspaper, but that each agreement must be approved by the executive council of the Union and by himself. The Union also claimed that the agreements must be entered into at the same time by all the publishers of the Southam Company's newspapers.

The Commissioner stated that the parties refused to change their respective positions and that he was unable to bring about a settlement of the issues in dispute between them.

Ammunition Workers, Renous, N.B.—On November 7, 1946, some 133 prevailing rates employees of the Department of National Defence (Naval Services) employed at the Royal Canadian Armament Depot, Renous, N.B., went on strike in support of demands that they be paid wage rates equal to those in effect at the Naval Ammunition Depot at Halifax, N.S. The employees were for the most part members of the Magazine Workers' Federal Union, No. 239 (T.L.C.C.).

Various conferences were held between representatives of the Department of National Defence (Naval Services), the Department of Labour and the employees of the Armament Depot, as a result of which the employees resumed work on December 3 under wage rates which had been fixed previously by the Treasury Board. The Acting Minister of Labour early in December appointed Mr. C. J. A. Hughes, of Fredericton, N.B., as an Industrial Disputes Inquiry Commissioner to

make an investigation of the rates of wages which would be appropriate for the work involved in the light of prevailing conditions.

Metalliferous Miners, British Columbia.—In a summary of developments in the strike affecting some 12 metalliferous mining companies in British Columbia, which appeared in the November issue of the *LABOUR GAZETTE* (p. 1575), it was reported that the employees of the two copper producing companies involved had resumed work following the acceptance of recommendations made by the Industrial Disputes Inquiry Commissioner, the Hon. Gordon McG. Sloan, Chief Justice of British Columbia.

Further negotiations then took place on a local basis between various gold producers and representatives of the International Union of Mine, Mill and Smelter Workers. Hedley Mascot Gold Mines, Ltd., Hedley, B.C., was the first company to reach an agreement with the union. A tentative understanding was arrived at on November 7 providing for wage increases of 12 cents per hour for miners and timbermen, 14½ cents per hour for surface labourers and 10 cents per hour for other employees. The company also agreed to pay shift differentials of 3 cents and 5 cents per hour for the second and third shifts respectively, when worked. Hours of work were fixed at 48 hours per week for the first six months of the new agreement, with overtime after 44 hours, upon the understanding that the question of hours would be the subject of further negotiations thereafter. In addition, the company agreed to the same check-off provisions as had been adopted earlier in the copper producing companies and the coastal logging industry, and to pay a service bonus of \$12.00 per year after one year of service increasing annually to a maximum of \$108.00 per year after nine years of service. (The service bonus feature was new at Hedley but had been in existence previously in the Bridge River area.) The employees of the Hedley Mascot Company, on the recommendation of the District Policy Committee of the union, voted on November 10 to accept the tentative agreement and work was resumed promptly afterwards.

Other gold producing companies maintained that they could not follow the lead given by the Hedley Mascot management, claiming that payment of such increases would mean that a large proportion of their ore would not be profitable. The union, for its part, held to the position that it was prepared to accept the recommendations made by the Commissioner on October 15, except for the proposed wage increases of 8 and 6 cents per hour, which it held to be inadequate.

On November 15 the employees of Taku River Gold Mines Limited, near Atlin, B.C., resumed work, the operating company, Polaris-Taku Mining Company, Ltd., having reached an agreement with the union. It was reported that the agreement provided for a general increase of 12 cents per hour for miners and timbermen, and 10 cents per hour for other classifications, in addition to the provision of a bonus based upon length of service. Approximately 120 employees of this company had been on strike since October 31, in contrast to the other companies' employees who had been on strike since July 3.

Chief Justice Sloan then resumed conversations with the parties in an effort to find a formula which would be satisfactory to the union and to the eight remaining companies whose employees continued on strike. Spokesmen for the parties came to a tentative agreement which would involve the payment of over-all wage increases of 10½ cents per hour, together with the same concessions in regard to shift differentials, overtime and check-off provisions which had already been granted by the copper producers. Subsequently a representative of the companies added a number of stipulations, including a declaration that all bonuses would be eliminated, but the union's Policy Committee decided to recommend acceptance of the tentative agreement to the union membership, leaving other details for later negotiations. Approval of the tentative arrangement was given by five of the companies—Bralorne Mines Limited, Pioneer Gold Mines of B.C., Ltd., Cariboo Gold Quartz Mining Co., Ltd., Island Mountain Mines Co., Ltd., and Silbak Premier Mines, Ltd.—and the managements of Sheep Creek Gold Mines, Ltd., and Kelowna Exploration Co., Ltd. (Nickle Plate Mine) were reported to have agreed to recommend acceptance to their head offices.

Over the week-end of November 24 the employees of all mines still on strike voted in favour of the adoption of the tentative agreement.

At the time of going to press, it was reported that preliminary work in preparation for the full resumption of operations was under way at the Silbak-Premier, Bralorne, Pioneer, Cariboo Gold Quartz and Island Mountain properties. No information was available as to when the managements of Sheep Creek and Kelowna Exploration (Nickle Plate Mine) would resume operations at their properties, and there were indications that the mine of the Base Metals Mining Corporation, Ltd., at Field, B.C., would not be reopened.

Collective Agreements and Wage Schedules

Recent Collective Agreements

Collective agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts are summarized in separate articles following this.

Logging

WESTERN AND NORTHERN ONTARIO—VARIOUS COMPANIES AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, WOODLANDS DIVISION, LOCALS 2786 AND 2995.

Agreement reached following strike, *LABOUR GAZETTE*, Nov. p. 1653, to be in effect from October 30, 1946, to August 31, 1947, and thereafter from year to year subject to 30 days' notice. The companies recognize the union as the sole bargaining agency for all eligible employees. Vacation: one week with pay for permanent employees with one year's service, 2 weeks with pay for those with 5 years' continuous service.

Daily wage rates for certain classes: apprentices \$4.65, cookees, camp watchmen, dam and storage ground watchman \$5.20, bull cooks, chore boy, night watchman \$5.45, cooks \$6 to \$7.75, general labour \$6.20, skidders and rollers \$6.25, loaders and unloaders, teamsters (less than 4 horses) \$6.40, teamsters (4 horses or more) \$6.65, tractor drivers (using scrapers, graders) \$7 to \$8.25, others \$6.40 to \$7.40, truck drivers \$6 to \$7.40, drillers \$6.40 and \$6.50, river drivers \$6.75 and \$7, blacksmiths \$6.50 to \$7.50, saw filers \$6.40 to \$7.40. Charge for board and lodging shall be \$1.20 per calendar day.

Provision is made for the adjustment of disputes.

Manufacturing: Tobacco and Liquors

MONTREAL, P.Q.—IMPERIAL TOBACCO COMPANY OF CANADA, LIMITED AND TOBACCO WORKERS INTERNATIONAL UNION, LOCAL 234.

Agreement to be in effect from September 12, 1946, to September 11, 1947, and thereafter from year to year subject to notice.

Maintenance of membership: all employees who are members of the union, or hereafter

become members, shall remain members during the life of the agreement. All new employees hereafter employed shall become and remain members upon completion of the 2 months' probationary period. Provided however that any employee shall have the right to resign his membership in the union within 10 days prior to the expiration of the agreement. Check-off: the company agrees to deduct monthly from the employee's pay the union dues upon the employee's authorization and remit same, less 2 per cent, to the union.

Hours of work: day workers—9 per day Monday through Friday, a 45-hour week, shift workers—8 per day Monday through Friday, a 40-hour week, (watchmen, firemen, cigarette paper processors, furniture polisher and janitors average from 48 to 54 hours per week). Overtime: time and one-half for work in excess of the above hours and for all work (except watchmen, etc.) on Saturdays, Sundays and 8 specified holidays, 3 of which are paid holidays for those working on the days immediately preceding and following such holidays. On 4 church holy days the plant will not open until 8 o'clock but the workers working the balance of the day or shift will be paid for full time. Vacation: in accordance with the provisions of Ordinance No. 3 of the Quebec Minimum Wage Commission and in addition one week with pay to all hourly or piece-work employees who have completed 7 years' continuous service with the company. Employees on a salary basis will be given 2 weeks with pay upon completion of one year's service, upon completion of ten years' continuous service 2 additional days' vacation, upon completion of 15 years' continuous service 4 additional days and upon completion of 20 years' continuous service one week extra.

Provision is made for seniority rights and grievance procedure.

WINDSOR, ONT.—CANADIAN BREWERIES TRANSPORT LIMITED AND THE BRITISH AMERICAN BREWING COMPANY LIMITED AND THE INTERNATIONAL UNION OF UNITED BREWERS, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, LOCAL 232.

Agreement to be in effect from January 7, 1946, to March 31, 1947, and thereafter from year to year subject to notice. Supplementary agreement effective August 1, 1946, to March 31, 1948. The company shall employ only union members in good standing, if none available then competent workers may be hired and these shall be allowed to join the union.

Hours of work and overtime: 40 hours per week (for inside men) excluding engineers, firemen and watchmen, time and one-half for work in excess of these hours and for all work on Sundays. Double time for work on any of 6 specified paid holidays. The employer will endeavour to adhere to the 5-day week of approximately 45 hours for drivers and helpers

who shall be paid an additional day's pay if they work on any of the specified holidays. Vacation: two weeks with pay for employees with one year's service with the company, those with but six months' service, one week with pay.

Hourly wage rates effective August 1, 1946: bottlers operating machines, fermenting room and cold storage workers, kettlemen, wash house employees 97 cents; other bottlers, maintenance men (minimum rate) 91 cents; coopers \$1.09½; watchmen 70 to 73 cents; drivers (after 6 months) \$40.75 per week; helpers \$37.50 per week; garage mechanics and assistants \$37.50 to \$47.80 per week.

Manufacturing: Animal Foods

LUNENBURG, N.S.—LUNENBURG SEA PRODUCTS LIMITED AND THE CANADIAN FISH HANDLER'S UNION, LOCAL 2.

Agreement to be in effect from October 4, 1946, to October 3, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agency for its employees. Check-off: the company agrees, upon employee's authorization, to deduct union dues from their pay and remit same to the union.

Hours of work and overtime: time and one-half for work in excess of 8 hours per day and for all work on Sundays, double time for work on any of 8 specified statutory holidays. Vacation: one week with pay for all employees with one year's service with the company. Two weeks with pay for those with 3 years' service.

Wage rates: company agrees to make joint application with the union to the Regional War Labour Board for permission to institute, effective October 1, 1946, a wage increase of 10 cents per hour to each employee, and also to pay 3 cents per hour extra to charge or leading hands and also to employees while working in the cold storage rooms. The 5 per cent bonus paid employees, however, will be discontinued from October 1, 1946.

Provision is made for seniority rights, a life, sickness and accident plan and grievance procedure.

MONCTON, N.B., TORONTO, ONT., ST. BONIFACE, MAN., MOOSE JAW, SASK., EDMONTON, ALTA., AND NEW WESTMINSTER, B.C.—SWIFT CANADIAN COMPANY LIMITED AND THE UNITED PACKINGHOUSE WORKERS OF AMERICA, (LOCALS 244, 208, 219, 177, 280 AND 180 RESPECTIVELY).

Agreement to be in effect from August 1, 1946, to August 1, 1947, and thereafter from year to year subject to 30 days' notice. Maintenance of membership: all employees who are now or later become union members in good standing must as a condition of employment maintain such membership during the life of the agreement, except that during the last 15 days of the term of the agreement, members may resign their membership in the union without affecting their employment. Check-off: the company agrees to deduct monthly from the pay of employees who so authorize the union dues and to remit same to the union.

Hours of work: 8 per day Monday through Friday, 5 on Saturday, a 45-hour week. Overtime: time and one-half for work in excess of the above hours, double time for all work on Sundays or assigned day off duty. Eight specified

statutory holidays shall be paid holidays and employees shall receive their regular rate of pay in addition for any work performed on these days. Vacation: one week with pay after one year's service with the company, 2 weeks with pay after 5 years' continuous service and 3 weeks with pay after 15 years' service for females and after 20 years' service for males.

Wage rates to be increased 5 cents per hour from August 1, 1946, and an additional 5 cents per hour from October 1, 1946, subject to the approval of the Regional War Labour Board a premium of 5 cents per hour will be paid for night work between 6 p.m. and 6 a.m. Gang leaders are to receive 5 cents per hour more than the rate of the highest paid member of the gang. The company guarantees to each full-time hourly-paid employee, pay equivalent to 37½ hours of work at his regular rate of pay for each week at work for the company, subject to certain rules of eligibility.

Provision is made for seniority rights and grievance procedure.

MONTRÉAL, P.Q.—WILSIL LIMITED AND THE UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCAL 358.

Agreement to be in effect from November 7, 1946, to July 31, 1947, and thereafter from year to year subject to 2 months' notice. The company recognizes the union as the exclusive bargaining agency for its plant. Maintenance of membership: all employees who are now or later become union members must as a condition of employment maintain such membership in good standing during the term of the agreement, except that during the last 2 weeks of the term of the agreement members may resign from the union without affecting their employment. Check-off: the company agrees to deduct union dues monthly from the pay of employees who so authorize and to remit same to the union.

Hours of work: the regular work week shall be considered to be 48 hours. In no case shall the prescribed hours exceed 9 in one day or 48 in one week. The company agrees to guarantee a minimum work-week of 40 hours at regular rates of pay subject to certain provisions. Overtime: time and one-half for all work in excess of the prescribed hours or, when by reason of a late start it is necessary to work more than one hour beyond scheduled quitting time, or any hours worked before the scheduled starting time for hourly-rated employees. Double time shall be paid for all work on Sundays (or assigned day off, if regular shift falls on Sunday) and 8 specified paid holidays. Vacation: one week with pay after one year's service, 2 weeks after 5 years' service, 3 weeks after 15 years for females and after 20 years for males. A 10-minute rest period shall be allowed during morning and afternoon shifts provided the working time of the shift exceeds 2½ hours.

Wage rates: it is mutually agreed by the company and the union to make application within 10 days to the Regional War Labour Board for approval of a 10 cents per hour increase for all workers presently employed by the company to be retroactive from October 1, 1946. A night premium of 5 cents per hour will be paid for work performed between the hours of 6 p.m. and 6 a.m.

Provision is made for seniority rights and grievance procedure.

MONTREAL AND HULL, P.Q., PETERBOROUGH AND TORONTO, ONT., WINNIPEG, MAN., EDMONTON, ALBERTA, AND VANCOUVER, B.C.—CANADA PACKERS LIMITED AND THE UNITED PACKINGHOUSE WORKERS OF AMERICA (LOCALS 357, 314, 210, 114, 216, 243 AND 162 RESPECTIVELY).

Agreement to be in effect from August 1, 1946, to July 31, 1947, and thereafter from year to year subject to 2 months' notice. The company recognizes the union as the exclusive bargaining agency for all eligible employees in the above plants. Maintenance of membership: any employee who is now or later becomes a member of the union in good standing shall, as a condition of employment, maintain such membership during the term of the agreement, except that during the last 2 weeks of the term when members may resign from the union without their employment status being affected. Check-off: the company agrees, upon an employee's authorization, to deduct monthly from the employee's pay his union dues and to remit same to the union. There shall be no intimidation or coercion because of membership or non-membership in the union.

Hours of work and overtime: regular work-week to be 45 hours (except at Montreal and Hull where it is 48 hours), consisting of days of varying lengths as presently in effect. In no case shall the prescribed hours exceed 9 in one day or above weekly totals. In consideration of the foregoing the Company guarantees a minimum work week of 37½ hours (40 at Montreal and Hull) at regular rates of pay subject to certain conditions. Time and one-half will be paid for work in excess of the prescribed hours and double time for all work on Sundays. Eight paid holidays will be observed and employees will be paid at regular rate in addition for any work performed on these days. Rest periods of 10 minutes will be allowed during morning and afternoon shifts. A night premium of 5 cents per hour will be paid to all regular hourly-rated employees for work between 6 p.m. and 6 a.m. Vacation: one half day with pay for every month's service and after one year's service, one week with pay, after 5 years' service 2 weeks, after 15 years' service (by females) 3 weeks and after 20 years' service (by males) 3 weeks.

Wages: a retroactive increase of 5 cents per hour from August 1, 1946, and an additional 5 cents per hour increase from October 1, 1946, if approved by the War Labour Board, will be granted.

Provision is made for seniority rights and grievance procedure.

WINNIPEG, MAN., REGINA AND PRINCE ALBERT, SASK., CALGARY AND EDMONTON, ALBERTA, AND VANCOUVER, B.C.—BURNS AND COMPANY LIMITED, AND THE UNITED PACKINGHOUSE WORKERS OF AMERICA. (LOCALS 224, 226, 234, —, 233 AND 249 RESPECTIVELY).

Agreement to be in effect from August 1, 1946, to July 31, 1947, and thereafter from year to year subject to 60 days' notice. There shall be no discrimination or coercion by the company or the union because of membership or non-membership in the union. Maintenance of membership: any employee who is now or later becomes a union member shall as a condition of employment maintain such membership dur-

ing the term of the agreement, except that during the last 2 weeks of the term, when members may resign from the union without impairing their employment with the company. Check-off: The company agrees, upon an employee's authorization, to deduct union dues monthly from the employees pay and remit same to the union.

Hours of work: 9 per day Monday through Friday or 8 per day Monday through Friday and 5 on Saturday for single and double shifts or 7½ hours 6 days a week for triple shifts, a 45 hour week. Overtime: time and one half for work in excess of the above hours and double time for all work on Sunday or assigned day off duty. There are 8 specified paid statutory holidays on which workers will be paid their regular rate in addition for any time worked. Vacation: one week with pay for those with one year's service with the company, 2 weeks with pay for those with 5 years' service and 3 weeks for females with 15 years' service and to males with 20 years' service.

Wage rates: subject to the approval of the Regional War Labour Board a 5 cents an hour increase effective August 1, 1946, and an additional 5 cents an hour effective October 1, 1946, shall be paid. While the present schedule of hours is in force the company guarantees the workers a minimum 37½ hours pay for a full week's work. A premium of 5 cents per hour will be paid for night work (work between 6 p.m. and 6 a.m.) and gang leaders will receive 5 cents per hour more than the highest paid member of the gang.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Fur and Leather Products

TORONTO, ONT.—ASSOCIATED FUR MANUFACTURERS OF TORONTO AND THE FUR WORKERS' UNION, LOCALS 21,479, 21,480, AND 21,481.

Agreement to be in effect from April 15, 1946, to April 15, 1948, and thereafter from year to year subject to 60 days' notice. All employees must be in good standing with the union. New help to be secured through the union if available. If the union is unable to furnish the desired help the employer may secure help wherever possible but the latter must join the union within 2 weeks. Check-off: the employers agree to deduct 2 per cent of their employees' regular wages excluding overtime pay, as well as all other duly levied assessment and to remit same to the union weekly.

Hours of work: 8 per day Monday through Friday, a 40-hour week. Overtime: time and one half for work in excess of the above hours and for all work performed on any of 7 specified paid holidays. This is in addition to regular pay which employees receive for these holidays when not worked. Vacation: one week with pay for employees with 4 months' service in the fur trade, 2 weeks with pay for those with one or more years' service.

Minimum weekly wages—cutters \$60, operators \$43.95, finishers \$41, blockers and squarers \$39, tapers, underliners and lining makers \$30, apprentices, starting rate, male \$20, female \$18 with an increase of \$3 every 3 months.

Provision is made for an apprenticeship plan, sick benefit and hospitalization fund, and grievance procedure.

Manufacturing: Metal Products

PORT ARTHUR, ONT.—PORT ARTHUR SHIPBUILDING COMPANY, LIMITED AND INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS, LOCAL 11.

Agreement to be in effect from November 1, 1946, to November 1, 1947, and may be renewed from year to year upon approval of both parties. This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, August, 1946, p. 1091, with the following changes—Maintenance of membership: all employees who are now or later become union members shall, as a condition of employment, remain union members in good standing except that during the last 2 weeks of the term of the agreement members may resign from the union without affecting their employment status. New employees shall become members of the union within 30 days of the date of their employment. Check-off: the company will deduct union dues monthly from all union members and remit same to the union. One additional holiday will be observed, making 9 in all during the year. Hours of work: 8 per day Monday through Friday, 4 on Saturday, a 44-hour week. Overtime at time and one half for work in excess of the above hours. Wage rates to be increased to allow the same take home pay for 44 hours as formerly paid for 48 hours. In addition the labourers' rate will be increased by a further 2 cents per hour. The new hours and wage rates to become effective December 2, 1946, or sooner, if satisfactory arrangements can be made.

Construction

VANCOUVER, B.C.—THE GENERAL CONTRACTORS ASSOCIATION OF VANCOUVER, B.C. AND THE INTERNATIONAL HOD CARRIERS, BUILDING AND COMMON LABOURERS UNION, LOCAL 602.

Agreement to be in effect from September 4, 1946, to September 3, 1947, and thereafter from year to year subject to 60 days' notice.

Hours of work: 8 per day, 40 per week, excepting when required to work Saturday morning then 44 hours shall constitute a week's work. No work shall be performed between 12 noon on Saturday and 8 a.m. on Monday except where safety to life and property make it necessary. Overtime: time and one half for work in excess of 8 per day up to 4 hours and for work on Saturday afternoons, double time for overtime in excess of 4 hours and for all work on Sundays and 8 specified holidays. No work to be performed on Labour Day. Vacation: one week with pay will be allowed as provided by provincial law. In cases of necessity shift work may be allowed, provided shifts continue for 3 consecutive nights and are run in addition to the regular day shifts. Seven hours shall constitute a night shift for which 8 hours' pay must be allowed.

Hourly wage rates; common labourers 80 cents, general building, concrete and cement labourers 86 cents, jackhammer and breakermen \$1, powdermen \$1.15.

Employers, when requiring men, shall give preference to union men if available.

*Collective Agreement Act, Quebec**Recent Proceedings Under the Act*

In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement, the amendment of twenty-three others and the correction of two agreements, all of which are noted below. A request for the amendment of the agreement covering barbers at Rouyn and Noranda was gazetted October 19. Requests for the amendment of the agreements for building trades at Hull, the uncorrugated paper box industry for the province, garages and service stations at Sherbrooke, hospital and charitable institution employees at Quebec and barbers and hairdressers at Quebec were gazetted October 26. Requests for amendments to the agreements for railway car and bus manufacturing at Montreal and building trades at Chicoutimi, as well as a request for a new agreement for barbers at Sherbrooke, were all published November 2. A request for an amendment of the agreement covering building trades at Hull was gazetted November 9. Requests for amendments to the agreements for the corrugated paper box industry for the province, wholesale fur industry at Montreal and printing trades at Montreal and requests for new agreements for policemen in

Quebec City and garages and service stations at Montreal were all published November 16.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Mining: Non-Ferrous Smelting and Quarrying

BUILDING MATERIALS, PROVINCE OF QUEBEC

See below under "Manufacturing: Non-metallic Minerals, Chemicals, etc."

Manufacturing: Fur and Leather Products

FUR INDUSTRY, QUEBEC CITY

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., Nov., 1940, p. 1201; Dec., 1941, p. 1572; May, 1942, p. 630; Sept., 1943, p. 1253; May, 1944, p. 637; June, 1945, p. 873; Nov., 1946, p. 1583). This amendment does not affect the summary already given.

WHOLESALE FUR TRADE, MONTREAL

A correction of an Order in Council relating to this industry (L.G., Nov., 1946, p. 1583) was published in the *Quebec Official Gazette* of October 19. This correction does not affect the summary already given.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

An Order in Council, dated October 10, and gazetted October 19, amends the previous Order in Council for this industry (L.G., Sept., 1946, p. 1250) by providing that those who were permanent employees on January 11, 1945, when the policy of vacation with pay was introduced, and who are still employed by the same employer in 1947, must be given holidays in 1947 on the basis of one-half day for every 25 days worked between January 11, 1946, and the time their holidays are taken in 1947.

A correction of an Order in Council relating to this industry (L.G., Sept., 1946, p. 1250) was published in the *Quebec Official Gazette* of November 9. Holidays with pay: there shall be 2 such holidays for the year 1946, 3 for the year 1947, and 7 for the year 1948 and thereafter.

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, MEGANTIC

An Order in Council, dated October 10, and gazetted October 19, makes obligatory on this industry the terms of a new agreement between certain garages and service stations in the Mégantic district and "L'Association des Employés de l'Auto-Voiture de Mégantic". Agreement to be in effect from October 19, 1946, to October 18, 1947, and thereafter from year to year, subject to notice. Territorial jurisdiction comprises the city of Mégantic and all municipalities within 15 miles from its limits. The agreement governs professional employers, artisans and wage-earners in garages, gasoline stations, service stations, parking grounds, scrapping yards and machine shops accessorially operated.

Hours: in garages, a 9-hour day, 5 on Saturday; in gas stations, an 11-hour day from May 1 to October 31, 9 hours during the rest of the year. Overtime is payable at time and one-half, double time on Sundays and 12 specified holidays, except for service men.

Minimum wage rates: journeymen wheelwrights, machinists, electricians, mechanics, glaziers, painters, upholstery cleaners, dyers, vulcanizers, bodymen, blacksmiths, upholstery makers, and testers from 52 to 67 cents per hour; apprentices to above trades from 20 cents to 40 cents in fourth year; journeymen radiator repairers and welders 67 cents, apprentices 35 cents first year, 45 cents second year, greasers 45 and 50 cents; journeymen vulcanizers 67 cents, apprentices 35 cents first year and 45 cents second year; stock room clerks in garages \$27 and \$35 per week, apprentices from \$12 per week in first year to \$20 per week in fourth year; day service men 45 cents per hour; night service men 38 cents; gas stations—head clerk \$35 per week, clerks from \$16 to \$22 during third year. Vacation: one week with pay after one year's service.

Provisions are made for apprenticeship regulations, uniforms and tools. No home work may be performed.

RAILWAY CAR AND BUS MANUFACTURING, MONTREAL.

An Order in Council, dated October 19, and gazetted October 19, amends the previous Orders in Council for this industry (L.G., July 1945, p. 995, Sept., p. 1341) by providing for an increase of 10 cents in all the hourly rates of 80 cents or less, and 8 cents in all rates higher than 80 cents.

SHEET METAL MANUFACTURING INDUSTRY, MONTREAL.

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., Sept., 1944, p. 1141; Sept., 1945, p. 1341).

Minimum hourly wage rates: journeymen sheet metal mechanics \$1; sub-foremen \$1.12; leading-hand (in charge of 4 or more journeymen mechanics) \$1.07; welders—class A \$1.07, class B 96 cents, class C 85 cents; production welders from 63 cents in first 6 months to 79 cents in fourth 6 months; machinists, assemblers and specialists 85 cents; toolmakers \$1.01; painters 94 cents; blacksmiths 96 cents; machine operators 79 cents; production workers 63 cents; helpers 57 cents; apprentices and boys under 21 years start at 41 cents with an increase of 5 cents an hour every 6 months; routine inspectors, truck drivers, store keepers, shipping and receiving 63 cents; female workers 43 cents to 52 cents after 6 months. Employees working on night shifts receive 5 cents an hour in excess of above rates.

Manufacturing: Non-Metallic Minerals, Chemicals, Etc.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated October 10, and gazetted October 19, amends the previous Orders in Council for this industry (L.G., Sept. 1944, p. 1141; July, 1946, p. 930). The minimum hourly wage rates for the granite industry are as follows: granite cutters, letterers and designers on composition, journeymen granite cutters on surfacing or sandblast-

ing machines \$1 in zone I, 90 cents in zone II; surfacing machine operators, sandblast operators, stationary enginemen 61 cents; blacksmiths 70 cents; machine polishers 65 cents; hand polishers, quarry men, stationary enginemen's assistants, firemen 51 cents; hoist and crane operators, gang saw operators, carbondum machine operators 60 cents; boxers 55 cents; labourers and helpers 45 cents; apprentice polishers (one year) 40 cents; apprentice granite cutters from 40 cents during first year to 60 cents during third year; watchmen \$18.20 per week.

Overtime in the granite industry is payable at time and one quarter the actual rates paid; all work on Sundays is paid at one and one-half times the actual rates.

The number of years' apprenticeship in the granite cutting trade and for blacksmiths is reduced from 4 to 3 years. No more than 2 apprentice granite cutters to each 8 granite cutters. However, one extra apprentice may be hired if he is a discharged veteran and provided his apprenticeship starts within one year of his date of discharge. Vacation: one week's vacation with pay after one year's service with the same employer; one-half day's vacation-pay per month after 3 months' service. PAINT MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., July, 1942, p. 856, Sept., p. 1097; Nov., 1943, p. 1530; Sept., 1944, p. 1141; July, 1945, p. 996). This amendment does not affect the summary already given.

Construction

BUILDING TRADES, SOREL.

An Order in Council, dated October 10, and gazetted October 19, amends the previous Orders in Council for this industry (L.G., Feb., 1943, p. 220; Sept., 1944, p. 1142; Oct., 1946, p. 1446, and previous issues). Watchmen employed on a weekly basis, 12 hours per day, 7 days per week, are to be paid at the rate of 35 cents per hour. Two holidays are deleted from the list of specified holidays on which double time is payable when worked.

The minimum wage rates for apprentices are as follows: bricklayer from 45 cents per hour during first year to 75 cents during fourth year; plasterer, mason, marble, tile and terrazzo layer from 45 cents per hour during first year to 65 cents during fourth year; carpenter-joiner from 40 cents per hour during first year to 70 cents during fourth year; painter and electrician from 40 cents during first year to 65 cents during fourth year; pipe mechanic from 45 cents during first year to 70 cents during fourth year; paper hanger, tinsmith-roofer, carpenter-joiner (employed by door and window-frame manufacturers) from 35 cents during first year to 50 cents during fourth year.

Maintenance men employed in churches, schools, colleges, hospitals, etc. are to be paid as follows: journeymen \$27.40 per week in the town of Sorel and \$19.40 in all other municipalities; non-qualified labourers \$22.40 in the town of Sorel, \$17.40 in the municipality of the village of St. Joseph and \$15.40 in all other municipalities. Maintenance men employed in public or office buildings, in apartment or dwelling houses, in hotels, manu-

facturing establishments and stores shall be paid the following minimum weekly wage rates: in the town of Sorel \$32 for journeymen, \$24.40 for non-qualified workers; in the municipality of the village of St. Joseph \$22.40 for journeymen, \$19.40 for non-qualified workers; in all other municipalities \$19.40 for journeymen, \$17.40 for non-qualified workers. Vacation: one week with pay after one year's service for the same employer.

BUILDING TRADES, SHERBROOKE.

An Order in Council, dated October 24, and gazetted November 2, amends the previous Orders in Council for this industry (L.G., Oct., 1942, p. 1209; Feb., 1943, p. 220, Aug., p. 1131, Nov., 1944, p. 1368; July, 1946, p. 930). Zones I and II are replaced by the following: zone I—the cities of Sherbrooke and Granby, the towns of Farnham and Cowansville and within 5 miles from their limits; zone II—the city of Drummondville and within 5 miles from its limits.

Another Order in Council, dated October 24, and gazetted November 2, amends the previous Orders in Council for this industry by adding special provisions for plumbers, steamfitters, tinsmiths and roofers:

Hours: 8 per day, a 48-hour week. Overtime is payable at time and one-half. Work performed on Sundays and 11 specified holidays is payable at double time. The shop employee governed by this agreement may work 4 hours on Saturday. In excess of regular wages, the employer shall pay for all boarding and traveling expenses of plumbers, steamfitters or tinsmiths performing work outside their respective localities.

Minimum hourly wage rates: journeyman plumber and steamfitter, pipe welder, tinsmith or sheet metal worker and roofer 90 cents in zone I, 85 cents in zone II, 80 cents in zone III and 75 cents in zone IV; junior journeyman (first year) 75 cents in zone I, 70 cents in zone II, 65 cents in zone III and 60 cents in zone IV; apprentices from 40 cents in first year to 55 cents in fourth year in zone I, from 37½ cents to 52½ cents in zone II, from 35 cents to 50 cents in zone III and from 32½ cents to 47½ cents in zone IV.

Apprenticeship: apprentices are governed by the apprenticeship by-laws established in the Pipe Mechanics Act. One year of apprenticeship consists of 2,200 hours of work. In the tinsmith and roofer trades only one apprentice is allowed for each journeyman.

BUILDING TRADES, JOLIETTE

An Order in Council, dated October 24, and gazetted November 2, amends the previous Orders in Council for this industry (L.G., May, 1940, p. 498; Mar., 1941, p. 334; June, 1942, p. 738, Sept. p. 1097; Feb., 1943, p. 220; July, 1944, p. 867; June, 1945, p. 873; Sept., 1946, p. 1252).

Minimum hourly wage rates: plasterers, bricklayers, masons and stone cutters on field, screen, sash, window, partition and steel door erectors, weatherstrippers, marble setters, tile and terrazzo layers, steam, gasoline or electric shovel operators, 85 cents in zones I and II; carpenters-joiners, painters-guilders, stationary or portable enginemen, saw filers, tinsmiths-roofers, plumbers and steamfitters 85 cents in zone I, 75 cents in zone II; painters 70 cents in zone I, 60 cents in zone II; commercial letterers 95 cents in zones I and II; cement finishers 80 cents in zone I, 75 cents in zone II; electricians 85 cents in zone

I, 80 cents in zone II; brick, mortar, terra-cotta and block carriers, celanite mixers, mortar mixers, caulkers 65 cents in zone I, 60 cents in zone II; lathers (wood) 70 cents in zone I, 65 cents in zone II; lathers (metal), iron brace workers 80 cents in both zones, drillers 75 cents in both zones; compressor operators, firemen (construction) 75 cents in zone I, 65 cents in zone II; pile workers, wood or concrete, 80 cents in zone I, 70 cents in zone II; common labourers 55 cents in zone I, 50 cents in zone II; painters (structural iron) \$1 in both zones; structural iron erectors and welders (all categories), boiler-makers, erectors and steam generator mechanics and welders \$1.11; boiler-maker's, erector's and steam generator mechanic's and welder's helpers 84 cents; maintenance men—journeymen \$25 per week, labourers (common workers) \$20. The installation of portable tanks and boilers under 2 tons in weight is to be paid at not less than 78 cents per hour. Workers installing stokers in furnaces with a heating surface of 20 feet and less, shall be paid 89 cents per hour and their helpers 67 cents.

BUILDING TRADES, MONTREAL

An Order in Council, dated October 24, and gazetted November 2, amends the previous Orders in Council for this industry (L.G., Sept., 1946, p. 1252, Oct., p. 1447). Outside the Island of Montreal, the present agreement applies only to construction operations amounting to \$25,000 or more, including wages and material. The amendment also provides for a change in the distribution of the weekly hours of work from May 1 to October 1, 1947, in the roofing and sheet metal trades.

PLUMBERS, HULL

An Order in Council, dated October 31, and gazetted November 9, extends the term of the previous Orders in Council for this industry (L.G., April, 1936, p. 371; June, 1937, p. 696; Aug., 1939, p. 862) to March 31, 1947, and thereafter from year to year, subject to notice.

Trade

WHOLESALE FOOD STORES, QUEBEC

An Order in Council, dated October 10, and gazetted October 19, amends the previous Orders in Council for this industry (L.G., July, 1944, p. 868; July, 1946, p. 930, Aug., p. 1094). In establishments making meat mashers, the working hours for stationary enginemen and firemen other than first-class chief enginemen are increased from 53 to 59 hours per week.

Minimum wage rates in zone I: foreman or head-shipper \$29.50 per week, assistant foreman or assistant head-shipper, departmental manager (except departmental managers in packing houses) \$27.50, departmental manager in packing houses \$45, departmental managers in packing houses (small goods department) \$38, stationary enginemen from 54 cents per hour to \$53.50 per week, firemen (enginemen's helpers) 44 cents per hour, common labourers and boiler firemen 40 cents, night watchmen 30 cents, order employees and receiving clerks \$25.50 per week, butter and cheese conditioners \$28.50; men employed in the dry-curing department—foremen \$35, others from \$25 after 2 years' apprenticeship to \$30, apprentices \$15 in first year and \$20 in second year; butchers and boners—foremen \$35, others from \$25 after 2 years' apprenticeship to \$30, apprentices \$15 in first

year and \$20 in second year; pork butchers—foremen \$35, assistant foremen \$33, others from \$25 after 2 years' apprenticeship to \$32, apprentices from \$15 to \$20 in second year, butter wrappers and cutters \$22, egg graders from \$18 to \$26 after fourth year, general hands in packing houses 54 cents per hour, female employees in packing houses other than office staff from 30 cents during first year to 37 cents after two years, miller or man in charge of mixers \$27.50 per week, cooks and pressers of feeding stuffs \$28, slaughterers and boners \$26, truck drivers \$25.50, general hands (other than in packing houses) \$23.50, general hands under 17 years of age \$19, boys \$13, female employees other than office staff and those in packing houses \$13 and \$15, occasional hands 55 cents per hour, personnel and administration employees \$40 per week, accountants \$33.50, assistant accountant \$30.50, accountants—cashiers \$28.50, book-keepers and clerks from \$14 to \$27 after seven years, female office help from \$14 to \$18 after two years, office messengers \$9 and \$12, shorthand typists from \$14 to \$18. Minimum wage rates in zone II are the same as zone I less 10 per cent.

RETAIL STORES, MEGANTIC

An Order in Council, dated October 31, and gazetted November 9, amends the previous Order in Council for this industry (L.G., Dec., 1945, p. 1826). This amendment does not affect the summary already given.

GROCERS AND BUTCHERS, SHERBROOKE

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., July, 1940, p. 734, Aug., p. 868; June, 1941, p. 706; Oct., 1943, p. 1332; Nov., 1945, p. 1679; Jan., 1946, p. 52). This amendment does not affect the summary already given.

RETAIL STORES, WINDSOR

An Order in Council, dated October 31, and gazetted November 9, amends the previous Order in Council for this industry (L.G., Oct., 1944, p. 1247). This amendment does not affect the summary already given.

RETAIL STORES, FARNHAM

An Order in Council, dated October 31, and gazetted November 9, amends the previous Order in Council for this industry (L.G., Mar., 1946, p. 317). This amendment does not affect the summary already given.

Service: Business and Personal

TAVERN EMPLOYEES, QUEBEC CITY

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., June, 1938, p. 698, July, p. 800; Jan., 1940, p. 69; May, 1942, p. 631). Present agreement to remain in effect to May 1, 1947, and thereafter from year to year, subject to notice.

BARBERS AND HAIRDRESSERS, MISSISQUOI COUNTY

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., Nov., 1941, p. 1425; Mar., 1945, p. 351; Mar., 1946, p. 318). This amendment does not affect the summary already given.

BARBERS AND HAIRDRESSERS, JOLIETTE

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., Jan., 1944, p. 70; Sept., p. 1143; Jan., 1945, p. 71; Feb., 1946, p. 187; Mar., p. 318; July, p. 931). This amendment does not affect the summary already given.

BARBERS, MONTREAL

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., Oct., 1941, p. 1315, Dec., p. 1573; July, 1942, p. 857; Nov., 1943, p. 1530; May, 1944, p. 637; May, 1945, p. 721, June, p. 874). This amendment does not affect the summary already given.

Another Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry. Hours of work for journeymen-barber-hairdressers, and apprentices are reduced to 51 per week. A supernumerary journeyman-barber is to be paid 45 cents per hour plus 10 per cent of the proceeds from his work. However, when the receipts of his work equal or exceed \$27 and when he has worked at least 30 hours during the week, he shall receive the same rates as a regular journeyman-barber-hairdresser.

FUNERAL UNDERTAKERS, MONTREAL

An Order in Council, dated October 31, and gazetted November 9, amends the previous Order in Council for this industry (L.G., Mar., 1946, p. 317). This amendment does not affect the summary already given.

BARBERS AND HAIRDRESSERS, VALLEYFIELD

An Order in Council, dated October 10, and gazetted October 19, amends the previous Orders in Council for this industry (L.G., Aug., 1943, p. 1131; Mar., 1945, p. 351, Oct., p. 1521; July, 1946, p. 931). Territorial jurisdiction in zone II now comprises the town of Beauharnois and within five miles from its limits. The hours in hairdressing and beauty parlors are reduced to 49 hours per week in zone I and 50 hours in zone II. Minimum wage rates in barber shops in the 4 zones are \$21 per week for regular journeymen barbers plus 50 per cent of their proceeds in excess of \$30 and 35 cents per hour for supernumerary journeymen barbers plus 10 per cent of their proceeds. In hairdressing and beauty parlors in the 4 zones \$21 per week for regular journeymen hairdressers (male or female) plus 20 per cent of their proceeds in excess of \$30 and 35 cents per hour for supernumerary male and female journeymen hairdressers plus 10 per cent of their proceeds. Minimum wage rates for apprentices (barbers and hairdressers) from \$4 per week during first 6 months to \$15 per week during fourth 6 months.

BARBERS AND HAIRDRESSERS, HULL

An Order in Council, dated October 31, and gazetted November 9, amends the previous Orders in Council for this industry (L.G., Mar., 1943, p. 341, Oct., p. 1382, Nov., p. 1530; Sept., 1946, p. 1255). This amendment does not affect the summary already given.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Alberta

In six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act, may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the

Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the *LABOUR GAZETTE*, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF ONTARIO

An Order in Council, dated July 4, and gazetted September 21, amends the previous Order in Council for this industry (L.G., May, 1939, p. 530).

Hours: effective October 1, 1946, a 40-hour week in the counties of Ontario, York, Peel,

Halton and Wentworth and 44 hours in the rest of the province. Overtime and work performed on 7 specified holidays is payable at time and one-half.

Minimum hourly wage rates in counties of Ontario, York, Peel, Halton and Wentworth: class A (cutter or marker) \$1.04½; class B (head operator on coats and first operator on vests) 98 cents; class C (trimmer) 96½ cents; class D (pocket maker on coats, edge taper,

Minimum hourly wage rates for odd pants employees in counties of Ontario, York, Peel, Halton and Wentworth: class A (cutter or marker) 93½ cents; class B (trimmer or lining marker on odd pants, pocket maker, inside and crotch seamer, outside seamer) 85 cents; class C (leg presser, lining or top stitcher) 79 cents; class D (top presser, lining sewer, hip pocket cutter) 69 cents; class E (chopper) 62½ cents; class F (pocket maker on boys' longs, shorts and bloomers, lining sewer and stitcher on boys' longs, shorts and bloomers, finish presser on boys' longs, shorts and bloomers) 57 cents; class G (layer-up, fly sewer) 52 cents; class H (fitter, seam presser, facing operator, curtain maker, button-hole maker, seamer on boys' longs, shorts and bloomers) 46 cents; class I (assistant trimmer, cuff presser, waist band operator) 45 cents; class J (pocket serger, bar-tacker, fly maker, button sewer, loop maker, button-hole tacker, cuff machine operator, ticket sewer, examiner, cleaner) 40 cents; class K (pant-crease felling machine operator) 39 cents.

The minimum wage rates for the remaining part of the province of Ontario are 12½ per cent lower than the above minimum rates.

The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

Manufacturing: Miscellaneous Wood Products

HARD FURNITURE INDUSTRY, PROVINCE OF ONTARIO

An Order in Council, dated August 2, and gazetted August 24, amends the previous Order

in Council for this industry (L.G., June, 1946, p. 784). Effective September 3, minimum wage rates for classes A and C are amended as follows: class A 55 cents per hour minimum and 65 cents minimum average for classes A and C combined in certain specified sections of the province, and 53 cents minimum and 65 cents minimum average in the rest of the province.

Construction

CARPENTERS, ST. CATHARINES

An Order in Council, dated September 17, and gazetted October 5, makes binding the terms of a new schedule for the carpentry industry in the St. Catharines zone, to be in effect from October 15, 1946, "during pleasure".

Hours: 8 per day, Monday to Friday, a 40-hour week. Ordinary overtime work performed on Saturday before 5 p.m. or during a three-hour period immediately following a regular working day is payable at \$1.65 per hour; work performed at night, which cannot be performed during regular working periods, is payable at the regular rate; all other overtime and work on Saturdays, Sundays and six specified holidays is payable at \$2.20 per hour, unless advisory committee issues a special permit authorizing performance of the work at a lower rate.

Minimum wage rate: \$1.10 per hour. The advisory committee may fix a lower rate for handicapped workers.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

CARPENTERS, ORILLIA

An Order in Council, dated August 6, and gazetted August 24, makes binding the terms of a new schedule for the carpentry industry in the Orillia zone, to be in effect from September 3, 1946, "during pleasure".

Hours: 8 per day Monday to Friday and 4 on Saturday, a 44-hour week from November to March inclusive; 9 per day Monday to Friday, a 45-hour week during the rest of the year. Overtime: time and one-half for the first 4 hours of overtime in any one day, double time thereafter. Overtime on Saturday for the pouring of concrete after 12 noon during November to March inclusive and any time on Saturday during the rest of the year is payable at regular rates.

Minimum wage rates: 90 cents per hour. Employees required to work on night shifts shall receive 8 hours' pay for 7 hours' work during November to March inclusive and 9 hours' pay for 8 hours' work during the rest of the year.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

CARPENTERS, WINDSOR

An Order in Council, dated October 2, and gazetted November 9, amends the previous Order in Council for this industry (L.G., June 12, 1946, p. 785). Effective November 19, 1946, the minimum wage rate is \$1.23 per hour. Employees required to work on night shifts shall be paid \$1.28 per hour or shall receive 8 hours' regular pay for 7 hours' work.

Service: Business and Personal

Minimum rate for temporary or part-time employees employed on an hourly or daily basis shall be 10 cents per hour over the regular single hourly rate of weekly employees. In shops where there are 2 employees or less including owners and/or partners, the minimum wage rate may be 20 per cent below the above rates. Apprenticeship regulations are set forth.

BAKERY SALESMEN, CALGARY

An Order in Council, dated August 10, and gazetted August 15, makes binding the terms of a new schedule for bakery salesmen in

Calgary, to be in effect from August 25, 1946, to August 24, 1947, or thereafter "during pleasure".

Hours: salesmen and service men a 52-hour week, stablemen and assistant stablemen a 48-hour week. Overtime is payable at \$1 per hour. Work on a statutory holiday, where one day in lieu thereof is not allowed within 30 days, shall be paid for at double time.

Minimum weekly wage rates: salesmen a minimum guarantee of \$35, servicemen and stablemen \$31.50, assistant stablemen, inexperienced salesmen (first two months) \$28.

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, EDMONTON.

An Order in Council, dated September 10, and gazetted September 14, makes binding the terms of a new schedule for the automotive repair and gasoline service station industry in Edmonton, effective September 24, 1946, to September 23, 1947, or thereafter "during pleasure".

Hours: 46½-hour week of 5½ days. All overtime work, as well as work performed on Sundays and 7 statutory holidays is payable at time and one-half. However, front end men, floor service men, night watchmen, storage attendants and/or gas service men working on their regular shifts on Sundays and/or statutory holidays, will receive a day in lieu thereof within the ensuing 7 days, or be paid at time and one-half.

Minimum wage rates: mechanics from 85 cents to \$1 per hour, washmen and greasemen 65 cents per hour, non-mechanical employees permitted to do washing and/or greasing work provided such work does not take more than one-half their total time are to receive not less

than the minimum wage established by an Order pursuant to the male Minimum Wage Act.

Vacation: with seniority determining the choice of dates, to be granted to all employees in accordance with Order No. 3 of the Board of Industrial Relations issued by authority of the Labour Welfare Act. Apprentices are governed by the terms of The Apprenticeship Act.

GARAGES AND SERVICE STATIONS, LETHBRIDGE

An Order in Council, dated September 10, and gazetted September 14, amended in the September 30 issue, makes binding the terms of a new schedule for the automotive repair and gasoline service station industry in Lethbridge, to be in effect from September 24, 1946, to September 23, 1947, or thereafter "during pleasure."

Hours: 48-hour week of 5½ days. Overtime is payable at time and one-half. Double time is to be paid for work performed on statutory holidays to all employees except front end men, floor service men, night watchmen, storage attendants, and/or gas service men working their usual shifts on Sundays and/or statutory or public holidays or Remembrance Day.

Minimum wage rates: mechanics from 80 to 90 cents per hour, washmen and greasemen 50 cents per hour, night watchmen and non-mechanical employees other than washmen or greasemen are to be paid not less than minimum male wage rate as established by the Provincial Government.

Vacation: with seniority determining time of vacation period, automotive mechanics, washmen, greasemen, helpers and yardmen are to receive 2 weeks' vacation with pay after one year's continuous service with same employer. Apprentices are governed by the terms of The Apprenticeship Act.

Correction

Wage Rates and Hours of Labour in Canada, 1944

(Supplement to LABOUR GAZETTE, 1946)

The column headings in Table IIA page 10, "Steam Railways" and "Electric Railways" should be interchanged. "Electric Railways" should head the column of which the first figure is 33.7 and "Steam Railways" should head the column of which the first figure is 35.4.

Fair Wage Conditions in Dominion Government Contracts

THE Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the

work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are covered by the general provision that rates must equal those current in the district, and in addition, by the requirement that the rates must not be less than 35 cents an hour for male workers 18 years of age and over, 25 cents for female workers 18 years of age and over, and 20 cents for beginners and for workers under 18.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During October

During the month of October the Department of Labour prepared, on request, 35 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into during this period by the various Government departments appear hereunder:—

(1) Works of Construction, Remodelling, Repair or Demolition

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "minimum rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation or by direction of a War Labour Board".

Department of Public Works

Repairs to Alexander Avenue Wharf, Winnipeg, Man. Name of contractor, Wm. Newman Company, Limited, Winnipeg, Man. Date of contract, October 17, 1946. Amount of contract, \$4,808.50. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.80
Blacksmiths' helpers68
Carpenters and joiners	1.15
Drivers60
Driver, team and wagon	1.00
Labourers:	
Skilled68

Vocational Training

Training of Discharged Members of Armed Forces

THE number of new trainees enrolled during the month of October in all branches of vocational training was 7,137 (6,292 men, 845 women).

The peak enrolment to date was during the month of January, 1946, when the total was 10,750 (10,028 men, 722 women). However, it is interesting to note that the enrolment has increased by 2,859 or, has approximately doubled since the August report. It is felt that seasonal employment has influenced the enrolment during the summer months.

The total number under training at the end of October 1946 was 36,998 (33,636 men, 3,362 women) with a breakdown as listed below:—

	Men	Women
Training-on-the-Job in Industry	11,283	185
Training in Correspondence and Pre-matriculation Classes...	7,044	392
Training in C.V.T. Schools and Private Schools.....	15,309	2,785

The peak in training to date was reached in July 1946 when the total was 38,777 (35,921 men, 2,856 women). A point to note in the October report is the fact that the number of men in training has increased approximately a thousand over the previous month's report. In the case of women's training, it has increased approximately 300.

Training in industry has shown a steady increase in enrolment since March. This type of training has been given special attention by Canadian Vocational Training, National Employment Service and Department of Veterans Affairs, since it more or less assures definite employment for the trainee upon completion of the training period. Long term contracts in Training-on-the-Job have also been given special consideration as a result of a lengthy discussion at the Regional Director's Conference held in Ottawa in October. (L.G. Nov. 1946, p. 1599.)

Recent amended instructions regarding Training-on-the-Job contracts of over 52 weeks have been issued in a directive of the Department of Veterans Affairs.

Since September 1946, training in the Canadian Vocational Training Schools and Private Schools shows an increase of approximately

1,000. The pre-matriculation training and correspondence courses are approximately the same as reported in the penultimate month.

The backlog for October has been decreased by approximately 900 since September. It is noteworthy that of this backlog of approximately 3,000 for October, that approximately 2,000 are shown as "awaiting training in eight trades" namely:—

Pre-matriculation.....	561
Barbering.....	406
Watch Repair.....	318
Motor Mechanics.....	270
Graphic Arts.....	161
Photography.....	140
Hotel and Restaurant.....	124
Plumbing and Steam Fitting..	102

This leaves approximately 1,000 veterans awaiting training in all other trades in the various schools across Canada. This number is to be viewed in a most flexible manner, since classes have no fixed date of admission, therefore, by the time that "Awaiting Training" reports arrive at Head office certain numbers of those who have been reported will have been absorbed in classes.

During October, Canadian Vocational Training opened a course for Laboratory Technicians and X-Ray Operators at Regina. This course is sponsored by the Department of Health, Saskatchewan. It is hoped that ultimate arrangements can be made with the Canadian Society of Radiological Technicians and the Canadian Society of Laboratory Technicians to recognize the training time provided, and that provision can be made to take necessary additional training to write certification examinations.

A dress designing class was opened in Toronto during September. Graduates of the dressmaking classes will be examined for this class by the Rehabilitation Boards concerned—if trainees elect this advance training. It is felt this C.V.T. class in dress designing will eliminate many of the difficulties that have arisen as a result of transfers to private schools.

It is interesting to note at this time that dressmaking and designing are second in choice of trade training by women veterans, since 13.2 per cent have chosen into this field.

Women's Training

Of the 44,600 women veterans, 7,656 have enrolled under the C.V.T. program for training. Eight hundred and forty-five of this number enrolled during October 1946. There has been an increase in enrolment in all three phases of training as indicated by the approximate 1,100 increase in numbers in training in October over the numbers in training as of April 1946.

Listed below are four of the most popular courses chosen by women veterans which indicate that approximately 82 per cent of those taking C.V.T. classes have chosen into these fields:—

Commercial	46 per cent
Hairdressing	11.5 per cent
Dressmaking	13.2 per cent
Pre-matriculation	11 per cent

In reviewing the Women's Training picture, it is noted that numbers have increased steadily with an increase in training at the end of October 1946, of approximately 300 over the previous month's report. There has been no falling off in interest at district and regional levels of supervisory efforts.

Cumulative Enrolment

From its inception up to October 31, 1946, the gross enrolment in all types of projects has been 542,998 made up as follows:

Discharged Members of the Forces	98,831
Industrial Supervisors and Foremen	128,830

There have been no further classes for War Industry or Service Tradesmen since the previous report—therefore, the balance of 315,337 comes under those projects.

Vocational Training Projects

The following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments:

- (1) The vocational and prematriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Retraining of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the provinces for vocational schools.

SUMMARY OF CANADIAN VOCATIONAL TRAINING, OCTOBER 31, 1946

Type of Training	No's. who have received training from Commencement of Program to Oct. 31, 1946	No's. who have been placed in employment to Oct. 31, 1946	No's. leaving voluntarily or released to Oct. 31, 1946	No's. who received training in fiscal year 1945-46	No's. who received training April 1, 1946 to Oct. 31, 1946*	No's. under training Oct. 31, 1946

Private Schools.....	13,158	3,721	3,478	9,773	5,129
C.V.T.....	39,802	12,732	11,889	29,630	12,965
Total.....	542,998	146,999	48,353	97,140	91,230	36,998

* Includes those carried over from end of previous year.

† Already employed.

NOTE.—Numbers that had completed training but had not been placed in employment to October 31, 1946: from private schools, 839; from C.V.T., 2,226; a total of 3,065.

Western Vocational Training Conference

THE second meeting of Canadian Vocational Training officials in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia was held in the Palliser Hotel, Calgary, on November 22-24. There were about 50 present representing vocational training units in each of the four provinces. Brigadier J. E. Lyon of Ottawa, Assistant Director of Canadian Vocational Training attended in a consultative capacity.

In a brief address of welcome the Hon. R. E. Ansley, Minister of Education for Alberta, drew attention to the division of responsibility for policy and administration in rehabilitation work and the co-operative responsibilities in connection with certain other phases of the work of vocational training. He also emphasized the advantages to be obtained from full co-operation by all departments and branches concerned.

Inter-Regional Procedure

Much of the conference agenda was concerned with inter-regional procedure and technical aspects of administration. The chairman at the opening session, Mr. J. H. Ross of Calgary, outlined procedures laid down in federal directives concerning the registration of trainees in the several training centres.

Problems arising in connection with trainees from the prairie provinces who wanted to train in British Columbia during the winter months were carefully considered.

Brigadier J. E. Lyon urged that employers should be made aware "by all available means" of the superior type of craftsmen that are graduating from the vocational training schools. He was of the opinion too much of the time of supervisors was spent in administrative work, rather than with matters directly related to training.

It was announced that student councils had been organized in the schools in all areas. These were made up of representatives from each shop and acted through their executive committees with the school directors and, in some instances, with the recreational directors.

The functions of the councils were to provide a channel for complaints, to assume responsibility for recreation and other matters that would otherwise claim the time of school directors.

The second session of the Conference was under the Chairmanship of Col. J. Neish of Winnipeg. The necessity for close liaison with D.V.A. rehabilitation centres and the National Employment offices of the Unemployment Insurance Commission was stressed, in order to make better arrangements for the placement of trainees in employment, after they had completed their training.

It was announced that there was no "back-log" of women applicants awaiting training and that twice as many women as men, proportionately, were given training. It was reported also, that in the three prairie provinces the peak enrolment of trainees had been passed. After dropping sharply through the summer and fall months "enrolment levelled off in October".

Apprenticeship

Under the chairmanship of Mr. W. A. Ross of Regina, the question of apprenticeship was discussed in detail. It was agreed that while a flat trade credit was desirable for school training, it was not always possible to get an assessment of two years for six months' school training. Representatives from Saskatchewan stated that there was a slowing up in the number of apprentices because of the high initial wage that had been set recently—50 per cent of the journeyman's rate. The wage rates for apprentices in Manitoba, Alberta and British Columbia were reported to be "fairly uniform". In British Columbia the trend was stated to be away from evening classes to full-day classes of one or two days a week.

Reports were received from each of the four provinces with respect to the training of civilians. In each case there was stated to be a tendency toward "marking time" until it was assured that the training of veterans had been adequately cared for.

Unemployment Insurance

*Placing Veterans in Employment**

THE National Employment Service of the Unemployment Insurance Commission has played an essential rôle in the re-establishment of men and women discharged from the Armed Forces.

To deal with the problem of finding suitable employment for close to a million ex-service personnel required expanded and specialized staffs in the employment offices. Supervisors of Veterans' Placements and Assistant Supervisors (the latter all ex-service women) were appointed for each of the five Regional Offices of the Commission. These officials were given the responsibility of insuring that the policy of providing preference for veterans in referral to suitable employment was carried out consistently and efficiently. In addition, National Employment Service officials were stationed in all of the Armed Services discharge centres. It was the duty of these officials to interview all dischargees with respect to veterans' rights under the Reinstatement Act and also the Unemployment Insurance Act and to explain fully the placement procedure followed by the employment offices. If, at the time of the interviews, veterans were seeking new employment, the interviewing officials made the necessary arrangements for registration at the appropriate local employment office. As the flow of ex-service personnel through the Discharge Centres decreased, the number of these special employment service officers has been correspondingly reduced, and there are now only a few of them employed in this work.

Thus, it will be seen that the Unemployment Insurance Commission has been dealing with all matters related to the administration of the Re-instatement in Civil Employment Act and, through its employment Division, the problem of placing veterans in employment, including graduates of the Canadian Vocational Training schools. In addition, through the operations of its veterans' officers, it has been handling a considerable amount of detail connected with Department of Veterans Affairs

benefits, such as re-establishment credits, veteran's land grants, pensions, applications for training, medical attention, etc. Furthermore, in February, 1946, the Unemployment Insurance Commission undertook the handling and payment of D.V.A. out-of-work allowances on behalf of that Department. This facilitated and standardized payments of this benefit, inasmuch as there are more employment offices than there are D.V.A. rehabilitation centres and the requisite machinery parallels in many respects, that used for the payment of unemployment insurance benefits.

The nature of the work done by the Armed Forces Registration units set up in each local employment office has altered during recent months. Whereas during the peak period of discharges, they were employed mainly in registering and counselling applicants for employment, the emphasis now is on the follow-up phases of the work, as well as the placement of the comparatively small number of veterans still seeking employment.

Duties of Employment Advisers Modified

The work of the Veterans Employment Advisers operating at Department of Veterans Affairs Rehabilitation Centres, under the immediate direction of the Regional Supervisors of Veterans Placements, has also changed somewhat. These officials, together with D.V.A. officials, have recently surveyed all cases of veteran applicants who have been in receipt of out-of-work allowances for an unduly long period. They have been successful in effecting satisfactory rehabilitation in many cases. They have also given special attention to the placement of older veterans.

Employers Co-operate

Re-instatement Officers of the National Employment Service are of the opinion that the success of the Re-establishment and Civilian Employment Act is due as much to the desire on the part of Canadian employers to see their veteran employees successfully re-established, as it has been due to the requirements of the Act. Employers, with few exceptions, have

* The functions of the Department of Labour in connection with the rehabilitation of ex-service personnel were outlined in the *LABOUR GAZETTE*, December, 1945, p. 1771.

continued to carry out the spirit and intention of re-instatement, in numerous instances, exceeding the requirements of the Act. It is estimated that more than 200,000 ex-service personnel have returned to their pre-enlistment employment, in accordance with the terms of the Act. Between August 1, 1945 (when comprehensive records of re-instatement were first started), and September 30, 1946, at least 164,961 veterans returned to their old employment. Of this number 2,036 were women. Only a small percentage of all veterans applying for re-instatement have needed the assistance of re-instatement authorities. In practically every instance where veterans requested assistance, it has been merely a case of misunderstanding, either on the part of the veteran or of the employer, as to the requirements of the Act. As a result, only four prosecutions have been necessary under the Act.

The facilities provided for male veterans have been duplicated for ex-members of the

women's Services, although, generally speaking, there have been very few problems. At October 31, 1946, only 1,138 ex-service women were registered for employment in National Employment Service Offices. It is probable that a large percentage of these comprised the personnel released by the Navy and Army when the W.R.C.N.S. and C.W.A.C. were finally demobilized at the end of August and September, respectively.

The results of the Labour Department's work on behalf of veterans is shown, to some extent, in the following figures:

Total Discharges to October 31, 1946	938,731
*Total Placements to October 31, 1946	718,335
Peak of Unplaced Applicants (including Veterans of 1914 War)	
March 31, 1946	83,029
Unplaced Applicants as at September 30, 1946	46,147

* This figure includes multiple placements.

Unemployment Insurance Statistics, October, 1946

Analysis of Claims for Benefit—Claims of "Short-time" and "Casual" Workers—Status of Fund

A TOTAL of 34,891 claims for Unemployment Insurance benefit was filed in local offices across Canada during October. This represents an increase over the 28,555 registered in September but is slightly less than the 36,717 recorded during October, 1945.

As at October 31, live-Unemployment Insurance claims (ordinary) totalled 57,036 (39,957 males and 17,079 females) compared with 57,682 (41,022 males and 16,660 females) at September 30 and 61,565 (43,638 males and 17,927 females) at October 31, 1945. In addition, at the end of October this year, there were 6,439 (5,907 males and 532 females) other active claimants. Ordinary claimants are those who have separated from their last previous employment and are available for other employment. Other claimants include "short-time" and "casual" claimants. Short-time claimants are those employed less than the usual number of working days because of a partial shut-down of a plant. They claim benefit for the days of employment lost, but are usually not available for other employment, since the arrangement is commonly a temporary one. Casual claimants are those defined as such by the local office concerned. They are workers whose past employment history is such as to place them in the category of casual workers. When such a person has satisfied the minimum contribution requirements, his claim may be taken

and he can qualify for benefit for days of unemployment. At the present time casual claimants are few in number, being only 110 of those included in the category "other claimants" (Table 4) at October 31. Both short-time and casual claimants must, of course, satisfy the conditions laid down in the Unemployment Insurance Act for all claimants, including those governing "waiting days" and "first days in the week".

During October, 33,197 claims were forwarded to Insurance offices for adjudication and of these (along with some pending at September 30), 31,589 were adjudicated, 24,404 being considered entitled to benefit and 7,185 not entitled to benefit.

In previous reports, the chief reasons for disallowance have been given only for the disallowances and disqualifications arising out of initial and renewal claims for benefit. There have always been, however, disallowances arising from subsequent adjudications such as those based upon a subsequent refusal of an offer of suitable employment. Beginning with this report, subsequent disallowances and disqualifications are included in Table 4.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission showed that as at October 31, 1946, 2,875,954 employees

were issued with insurance books and had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1946, an increase of 94,725 since September 30, 1946.

As at October 31, 1946, 176,354 employers were registered as having insurable employees representing an increase of 2,528 since September 30, 1946.

Registrations to October 31, 1946, by regions are shown in Table 1.

Unemployment Insurance Fund

Employer-Employee contributions for October amounting to \$6,585,574.37 reached an all-time monthly high. This figure is also \$1,265,891.85, greater than that of the corre-

sponding month last year. This increase is made up as follows: Stamps \$798,856.74, Meter \$112,837.71, Bulk \$354,127.13 and Miscellaneous \$70.27. In comparing Employer-Employee contributions for October with the corresponding month last year, it should be pointed out that during the past year coverage of the Act was extended to include lumbering and logging in British Columbia and employment in transportation by water.

Benefit payments dropped from \$3,398,101.44 in September to \$2,459,480.38 in October.

After deducting Benefit Payments from the total revenue, the net increase to the Fund during October was \$6,049,337.99.

The balance in the Unemployment Insurance Fund amounting to \$343,868,572.69 as at October 31, 1946 is \$33,956,610.67 more than at the same time last year.

The Column "Interest on Investments and Profit on Sale of Securities" represents—
(a) The exact amount of interest earned for each year; the approximate amount for each month in 1946, calculations being made on the basis of the "average Weighted Yield" of 2.26%
(b) Profit on sales of securities taken into account at the end of each year only.

The "Miscellaneous" column includes the following—
Fines..... \$ 8,769 36
Miscellaneous..... 3,330 98
\$12,100 34

The "Bulk" column includes Contributions for Armed Service \$4,638,151 23

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945, number of the *LABOUR GAZETTE* and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU-B. 67

(Jan. 21, 1946)

The claimant, a married woman separated from her husband, became unemployed, received benefit for 38 days and then moved to her parents' home in another town. She was notified of a permanent position 35 miles from her parents' home. She refused the employment stating that on account of her domestic circumstances the wages were too low. The Insurance Officer disqualified her. The Court of Referees reversed the Insurance Officer's decision. HELD: The domestic circumstances of the claimant were not such as to render the employment offered unsuitable. The claimant therefore had, without good cause, refused an offer of suitable employment.

The material facts of the case are as follows:

The claimant, a married woman, separated, aged 23 years, was employed as a clerk in a grocery store from March 1, 1945 to April 27, 1945. She became unemployed and filed an application for benefit on May 16, 1945; it was allowed and she received benefit for 38 days. She and her child of 10 months were then living at her sister's home.

The claimant moved to her parents' home in another town and her claim was transferred to the nearest local office. On the 24th of August, 1945, the local office notified her by letter of a permanent position as sales clerk at an initial rate of wages of \$60 per month. She had been receiving in her previous position \$17.65 per week, which amounted to \$76.40 per month.

The employment offered was 35 miles from her parents' home.

Five days later she wrote to the local office refusing the employment offered because the wages were not satisfactory and she contended that, as she had a child, if she accepted the position in question she would have to pay practically all her salary for room and board and the upkeep of her child.

The Insurance Officer disallowed the claim and disqualified her on the ground that she had, without good cause, refused to apply for employment which was suitable.

From this decision the claimant appealed to the Court of Referees which unanimously allowed her appeal, on account of the domestic circumstances outlined by the claimant. She stated that she could not have left her child with her parents during the busiest month of the farming season but would have been able to do so at the end of the current month.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and the claimant disqualified for six weeks from the date on which his decision is communicated to her and gave as his reasons:

The Insurance Officer's ground of appeal is that the failure of the claimant to make appropriate arrangements for the care of her child is no justification for her refusal of the employment. He contended that it was her responsibility to arrange her domestic affairs so as to enable her to accept suitable work when it is offered.

He further stated that, as she moved from her original location where there were prospects of work to a place where the opportunities were practically non-existent, she should have been prepared to move away, since she had had a reasonable time to find suitable employment near her place of residence.

The question I have to decide is whether the claimant had good cause for refusing an offer of suitable employment. Her domestic circumstances must be taken into consideration when determining the suitability of employment offered but there does not appear to have been any serious obstacle to her accepting the work offered. As she stated herself, she could have taken her child with her and placed it in a day nursery until the end of the month and at that time she could have left it with her parents.

In my opinion, the domestic circumstances of the claimant were not such as to render the employment offered unsuitable. I therefore find that the claimant has, without good cause, refused an offer of suitable employment.

CU-B. 68

(Jan. 21, 1946)

The claimant, a married man, was employed as a mucker at a gold mine; he was declared medically unfit for underground work and left his employment. When filing his claim for benefit he declared that his occupation was "farming." He was offered employment as a surface labourer, and refused to apply, stating that the work was too far away from his home. The Insurance Officer disqualified him. The Court of Referees reversed the Insurance Officer's decision. HELD: The employment offered was suitable as the record discloses that this claimant's previous occupation was that of an underground worker in a gold mine. Also, the claimant was, for all practical purposes, not available for work, inasmuch as he restricted his sphere of availability in refusing to accept employment which would interfere with the operation of his farm.

The material facts of the case are as follows:

The claimant, a married man, aged 44 years, was last employed as a mucker at a gold mine at \$6.27 per day from February 20, 1942 to April 13, 1945. He was declared medically unfit for underground work and left his employment. On April 20, 1945 he filed a claim for benefit which was allowed and he received benefit for 62 days. When filing his claim he declared that his occupation was "farming."

On the 27th day of July, 1945 he was offered employment as a surface labourer at a mine at \$5.27 for eight hours per day. The employment was permanent in nature but was at a distance of 26 miles from his new residence where he moved after his separation from his former employment, and where he established a farm. He refused to apply for the employment offered but did not give any reason for his refusal and the local office made the following comments on the occasion of his refusal:

"Married—must have work where could get home every day—take care of stock, etc., as family very young. If had to accept work away from home would have to dispose of farm. Willing accept work near home."

The Insurance Officer disallowed the claim and disqualified the claimant for six weeks under Section 43 (b) (i) of the Act.

From this decision the claimant appealed to the Court of Referees and stated that he left mine work on account of health and that he was willing to take work which would not take him far away from his new home as he was putting his newly acquired farm into production. It would appear from the record that the claimant obtained casual work around home.

The claimant did not appear personally but the Court of Referees unanimously allowed his appeal on two grounds; first that: "owing to the domestic circumstances outlined in the appeal, the employment offered was not suitable," and second that: "while it appears that the appellant was limited in the employment he could take while residing at his farm, nevertheless, we cannot conclude that, in so doing, his employment was so restricted that it could be said that he was "not available for work."

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and the claimant disqualified for six weeks from the date on which his decision is communicated to him and gave as his reasons:

The questions for me to decide are whether the employment offered was suitable and whether the claimant was available for work. The record discloses that the previous occupation of the claimant was that of underground worker in a gold mine. It was only on the occasion of his claim for benefit that he stated that he was a farmer. I have no doubt that the employment offered was well within his usual range of activities and, insofar as the occupation is concerned, I am of the opinion that the employment offered to him was not unsuitable.

The second question concerns the availability for work of the claimant. It would appear that there is little, if any, prospect of employment in the district to which he moved. Had he remained in his former location his chances of employment would have been greater. It would also appear that he has so restricted his sphere of availability in refusing to take employment which would interfere with the operation of his farm that, for all practical purposes, he was not available for work.

Employment, Hours and Earnings

Introduction

EMPLOYMENT conditions at the end of October were largely the result of two developments, the settlement of labour disputes and the slackening of activity in seasonal industries. Of the 26,000 workers involved in disputes at the beginning of the month, all except about 700 had returned to work under negotiated settlements by the month's end. Output in the vital steel, electrical apparatus, automobile, rubber, chemical, and brass industries had begun to forge ahead and it appeared likely that general production increases would soon be stimulated. It was expected, therefore, that an extensive flow of goods would commence to narrow the general demand-supply gap. The continuing heavy consumer demand for all types of goods will probably maintain manufacturing employment during the next few months, thus offsetting to some extent its normal seasonal decline. Accordingly, the number of unplaced

applicants registered at the offices of the National Employment Service had declined another 8,000 during the month to stand at about 134,000 at October 31, 1946. At the same time, the number of workers signing the live unemployment register during the last six working days of October dropped to 57,036 compared with 57,682 at the end of September.

At the beginning of October, 1946, average hourly earnings of hourly-rated wage earners in manufacturing were continuing the upward movement began in December of 1945. At October 1, 1946, they were five per cent above the level of one year earlier. Average weekly hours worked by the same group, on the other hand, had dropped four per cent during the same period.

One year ago the outlook was very different. War industries were closing down with the end of the war, creating pools of unemployment in many areas, while the demobilization

of ex-servicemen was just getting under way. Since that time, the economy has completed most of the physical reconversion necessary for peace-time production, absorbing thousands of war workers and more than 600,000 ex-servicemen. Unemployment now is less than three per cent of the labour force. In the industrial regions of Quebec and Ontario, employment conditions showed a marked improvement over October, 1945. The trend of activity in the seasonally affected Prairie and Pacific regions has shown a steady recovery from the post-war low in the spring of 1946 to a level slightly above that of October, 1945. The Maritime region, however, has not yet regained its position of a year ago.

In the Maritime region, the steel strike settlement materially improved the general employment situation during October. Approximately 5,000 workers were re-employed at the steel plant and in related employment. Other Maritime employers have been rebuilding their staffs in anticipation of orders and supplies as a result of the settlement. Absorption of experienced coal miners and loggers

will tend to ease the unemployment situation during the coming months. Little activity was evident in the primary industries and construction employment was commencing to taper off.

In the Quebec region, the employment picture brightened considerably with the settlement of the numerous lengthy strikes. Many industries were re-calling employees now that supply lines were again intact. Montreal was suffering an acute scarcity of womanpower, while persistent surpluses existed elsewhere in the region. Recruiting of bushmen for the logging industry was going forward on schedule. Commercial, industrial, and residential construction was under way, but critical shortages of building materials and skilled tradesmen both persisted.

In the Ontario region, the steel strike settlement at the beginning of October paved the way for a series of settlements through which some 24,000 workers returned to their jobs. Among these were 7,000 steel workers, 7,500 rubber workers, 4,000 electrical apparatus workers, and 3,500 automobile workers. Plans for expansion pointed to an all-time high in

(†) Not available.

(1) Estimates based on sample Labour Force Survey of the Dominion Bureau of Statistics. All figures represent persons 14 years of age and over.

(2) Statistics are based on the nine leading industries except average hourly earnings and man-hours which apply to manufacturing only. Data are compiled from monthly reports of firms with 15 or more employees.

(3) Weekly average for month in non-agricultural industries reporting to National Employment Service.

(4) Number of persons signing the Live Unemployment Register during the last six working days of the preceding month.

(5) During the month.

peace-time production during the winter. Labour was very scarce in the foundry, textile, furniture, and leather industries.

In the Prairie region, the seasonal-slackening in employment commenced with the close of harvest activity. Expansion in the logging industry was beginning in various sections of the country. The base metal industry still required labourers, carpenters, mechanics, and other skilled workers. The meat packing industry was rapidly recovering from the farmers' delivery strikes with labour needs heavy, especially in Edmonton. Canning plants were expected to shut down shortly. Conditions in the construction industry remained stable with persistent shortages of

building materials and skilled tradesmen continuing.

In the Pacific region, the yearly peak in employment was probably reached early in the month as latest reports indicate a growing surplus of labour. Labour turnover was declining in all industries except logging. The need for key men in the logging industry was being partially met by the movement of off-season Prairie workers. A heavy demand for all types of mine workers will likely result when the dispute in this industry is settled. Construction continued active in Vancouver, while elsewhere it was curbed by supply shortages.

Survey of Canadian Labour Force

THE fourth quarterly labour force survey of the Dominion Bureau of Statistics, based on a sampling technique involving interviews with some 25,000 households across the country, presents an estimate of population characteristics as well as indicating short-term changes in the labour force. The survey week covered the period August 25-31. Table 1 shows a summary of the national estimates of the civilian non-institutional population, 14 years of age and over, with comparable figures for the second and third survey dates.

The civilian non-institutional population climbed 74,000 over the June 1 estimate to reach the 8,792,000 mark at August 31. Some 65,000 ex-servicemen entered the labour market between the third and fourth survey dates, accounting for the major part of the rise. The present survey should mark the end of direct demobilization influences on the growth of the civilian population.

of ex-service personnel to civilian life. Estimated employment in Canada rose seasonally to total 4,860,000 at the fourth survey date, 158,000 over the June 1 figure. Unemployment fell to the 117,000 low, a drop of 9,000 from the June 1 figure.

The non-working part of the population totalled 3,815,000 at August 31, 75,000 below June 1. This group, 14 years of age and over, are classified as not in the labour force in the sense that they do not work for pay or profit or as unpaid workers in family enterprises, such as farms or businesses.

Industrial Employment

Between the third and fourth survey dates the upward trend in manufacturing industries was interrupted, as employment fell 27,000. Two major bottlenecks were the chief causes of the reversal of the previous trend. The

TABLE I—SUMMARY OF NATIONAL ESTIMATES
(Persons 14 Years of Age and Over)

	Feb. 23/46	June 1/46	Aug. 31/46	Net Change June 1- Aug. 31
Total noninstitutional civilian population.....	8,538,000	8,718,000	8,792,000	+ 74,000
Civilian Labour Force.....	4,525,000	4,828,000	4,977,000	+149,000
Employed.....	4,312,000	4,702,000	4,860,000	+158,000
At Work.....	4,207,000	4,581,000	4,656,000	+ 75,000
With a job but not at work.....	105,000	121,000	204,000	+ 83,000
Unemployed.....	213,000	126,000	117,000	- 9,000
Not in the Labour Force.....	4,013,000	3,890,000	3,815,000	- 75,000

Maintaining its upward trend, the civilian labour force reached 4,977,000 at August 31. This marks an increase of 149,000 over June. The gain may be traced chiefly to the influx of teachers and students into the labour market during the summer, as well as the return

tightened material supply situation, an aftermath of the strategic strikes which temporarily cut into employment expansion in the basic steel, rubber, electrical apparatus, brass, automobile, chemical, and non-ferrous metals industries across the country was the major

limiting factor. The second bottleneck was the shortage of skilled workmen. Table II shows the industrial distribution of employment with comparable figures for the third survey.

unemployment in construction is negligible. The indirect effects of strikes have caused only a slight proportionate increase of unemployment in manufacturing industries. Some cyclical lessening of activity in transportation

(a) Includes milling, quarrying, oil wells.

(b) Fewer than 10,000.

(c) Includes production and supply of electricity, gas and water.

Employment in mining dipped 1,000 in the three month period, against rises in all other industries except manufacturing. Employment in the service industry rose seasonally to register a 30,000 gain over the June figure. Material bottlenecks and the shortage of skilled workmen curbed an even sharper employment gain in the construction industry, which showed a rise of 26,000 from June, another illustration of the response of the labour market to the normal seasonal upswing of activity. The construction industry employed 5.4 per cent of all employed workers in Canada at August—substantially unchanged from the 5.2 per cent in June. Employment in transportation and communication, also reflecting the seasonal upswing, rose 18,000 over the third survey estimate. Agricultural industry exceeded the June figure by 43,000, reflecting the seasonal upward trend of harvest activity.

Table III shows the industrial distribution of unemployment. Relative to other industries,

has increased unemployment among its workers as compared with other industries.

Hours Worked Per Week

Table IV shows the percentage distribution of employed persons by hours worked per week, in agricultural and non-agricultural industries. Employed persons temporarily absent from their jobs are classed as working zero hours. The number of persons employed in agriculture, working over 55 hours per week, rose 53,000 over the June 1 figure. Approximately 70 per cent of agricultural employment is in the group working 55 hours or more per week, against 14 per cent in industries other than agriculture. In non-agricultural industry, 76 per cent of the employed are in the 35-54 hours per week group. This distribution throws into sharp relief the longer hours worked by those employed in agriculture.

Total.....	100.0	100.0	100.0	100.0

(1) Included in the employed are those classified as working zero hours per week as they had a job at which they did not work during the survey week.

Unemployment

Table V presents the estimated distribution of unemployed by number of months looking for work. This classification is of particular value in distinguishing between frictional unemployment and unemployment of a more permanent character. According to the estimates for February, June, and August, approximately 60-70 per cent of the unemployment is of less than three months duration. Relative to other groups, the number unemployed from

13-18 months, and for 19 months or over is negligible.

The definition of unemployment for the purpose of this survey includes only those persons who were looking for work in the week August 25-31, but who did no work at all. Those who were laid off during the survey week with definite instructions to return to work within 30 days of being laid off are not classed as unemployed unless, in addition, they were looking for work.

(a) Fewer than 10,000.

Employment and Payrolls at the Beginning of October, 1946

THE monthly survey of employment and payrolls made by the Dominion Bureau of Statistics at October 1, showed further important expansion in industrial activity; this was seasonal in character, but considerably exceeded the average gain at the time of year in the period since 1920. The general improvement compares favourably with the sharp declines which had been indicated at the beginning of October in 1945 and 1944. The staffs of the 16,190 establishments furnishing data in the eight leading industries rose from 1,796,489 at September 1, to 1,820,673 at October 1. The increase amounted to 24,184 persons, or 1.3 per cent.

The general index of employment, based on the 1926 average, stood at 177.9, as compared with 175.5 at September 1, 1946, and 168.7 at October 1, 1945, when losses resulting from curtailment in the production of munitions had greatly affected the situation. The latest index was lower than those of 183.3, 187.5 and 181.3 at October 1 in 1944, 1943 and 1942, respectively, but was higher than in any earlier year for which data are available.

Since the advance in employment in the eight leading industries at the date under review was above-average in scale, the seasonally-corrected index moved upward, rising

from 168.7 at the first of September, to 169.2 at the beginning of October.

Industrially, the greatest increase at the date under review was that of 13,634 workers in logging, in which the number taken on was larger than usual for the time of year. Manufacturing, transportation and trade showed considerable improvement, while there were declines in mining, communications, construction and hotels and restaurants. To some extent, these losses were of a seasonal nature. The co-operating manufacturers added over 5,500 persons to their working forces; in spite of continued losses due directly and indirectly to industrial disputes, the gain in this group of industries was above normal according to the experience of the pre-war period. As is usual at the time of year, the most pronounced advance in manufacturing at October 1 took place in vegetable food processing, but there were also important increases in the textile and textile-using industries. On the other hand, the farmers' strike brought about a substantial reduction in animal food factories, and iron and steel plants continued to release employees, also partly as a result of strikes. Lumber mills reported a seasonal shrinkage in employment.

It is interesting to note that the index of employment in manufacturing at the date under review coincided with that indicated at October 1, 1945, when important curtailment had been shown following the completion or

cancellation of war contracts. Activity in this important group of industries was at a lower level at the date under review than at the beginning of October in 1944, 1943 or 1942, but was higher than in the autumn of any preceding year. As compared with October 1, 1939, there was an increase of 57.3 per cent in the index of employment in manufacturing, while that in the eight leading industries showed a gain of 46.2 per cent in this comparison.

Payrolls

The salaries and wages disbursed at October 1, by the firms in the eight leading industries furnishing statistics at the beginning of October, aggregated \$60,326,538. This total was greater by 2.6 per cent than that of \$58,775,022 indicated at the first of September. The reported increase in employment in the same comparison had amounted to 1.3 per cent. The relatively greater gain in the payrolls, (which is particularly interesting in view of the fact that much of the expansion in employment at the date under review took place in industries in which earnings tend generally to be below-average), resulted largely from the payment of higher wage-rates in a considerable number of establishments. The average earnings of the typical worker in recorded employment in the eight leading industries amounted to \$33.13 at October 1, as compared with \$32.72 at September 1, 1946, and \$32.08 at

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

October 1 of last year. The latest figure is the highest in the record of over five years. In earlier years for which data are available, the October 1 per capita figures were as follows: 1944, \$32.36; 1943, \$31.53; 1942, \$29.51 and 1941, \$26.37.

Including the statistics for financial institutions, the latest survey shows a total of 1,897,951 men and women in recorded employment at the beginning of October, when their weekly earnings amounted to \$63,076,692. At September 1, the employees of the same firms had numbered 1,873,190, while the payrolls were given at \$61,456,023. The average per employee advanced from \$32.81 at that date, to \$33.23 at the beginning of October, as compared with \$32.16 at October 1, 1945.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the 20 leading industrial cities, and gives comparisons as at September 1, 1946, and October 1, 1945. Table I contains a monthly record of the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls since 1942. The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100.

Table I indicates that in the period for which data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 16½ per cent, while the aggregate weekly payrolls of those workers are higher by 49½

per cent. Including finance, the gain in employment from June 1, 1941, to October 1, 1946, amounted to 17 per cent, and that in payrolls, to 49.9 per cent. The explanation given in earlier reports for the much greater rise in the reported salaries and wages than in the numbers employed may again be stated.—(1) the concentration of workers still existing in the more highly paid heavy manufacturing industries, in spite of the declines which preceded and followed the cessation of hostilities, and also in spite of continued industrial disputes, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944, (3) the progressive up-grading of employees as they gained experience in their work, (4) the granting of higher wage-rates in numerous cases, and (5) reductions in the numbers and proportions of women workers. As a result of these various factors, the average weekly earnings have advanced by over 31 per cent in the case of those reported in the eight leading industries, and by 30.4 per cent in the case of the nine major industrial divisions.

It is worthy of note that despite the recession in employment in the production of munitions which followed the cessation of hostilities, and the serious losses resulting from the many important strikes recently in effect, employment in manufacturing as a whole showed a rise of 12.1 per cent at October 1 as compared with June 1, 1941, since when the reported payrolls have risen by 42.8 per cent. In the non-manufacturing industries taken as a unit, the increase in employment from the com-

¹This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments, and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, with the exception of electric light and power.

mencement of the record of payrolls to October 1 amounted to 15.9 per cent and that in the aggregate weekly salaries and wages, to 58.3 per cent. The relatively larger gains in the non-manufacturing classes generally reflect a situation greatly at variance with that existing during the war.

A comparison with the data reported a year ago shows no general change at the date under review in the level of employment in manufacturing, in which, however, there was an increase of 1.7 per cent in the aggregate salaries and wages, and of two per cent in the average earnings. Among the non-manufacturing industries taken as a unit, there has been a gain of 7.1 per cent in employment in the 12 months, accompanied by that of 17.9 per cent in the indicated weekly payrolls. The average earnings of the persons reported in this category have risen by 5.1 per cent.

In regard to the marked variations in the average earnings of workers in the different

industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of outstanding importance.

Sex Distribution of Persons in Recorded Employment

There was a substantial increase in employment for workers of both sexes at October 1, as compared with September 1, according to data compiled from 16,190 employers in the eight leading industries. The gain among men

¹ The relative weight shows the proportion of employees reported in the indicated industry, to the total number of employees reported in Canada by the firms making returns at the date under review.

amounted to 16,276, or 1.2 per cent and that among women, to 7,908, or two percent. The general increase was 24,184, or 1.3 per cent. As already stated, the expansion was seasonal in character, heightened activity in logging and transportation accounting for most of the advance among men, while that among women took place to a considerable extent in vegetable food and textile factories. Employment for workers of both sexes in trade was decidedly higher, the gain likewise being seasonal.

Firms in the nine leading industries reported the addition of 24,761 workers to their forces since September 1; of these, 16,490 were men, and 8,271 were women, there being an increase of 1.1 per cent among the former sex, and of 1.9 per cent among women. The ratios in this group of industries were 768 men and 232 women per 1,000 employees as compared with 770 and 230 per 1,000, respectively, a month earlier.

As compared with October 1, 1945, there was a reduction of 15,200, or 3.3 per cent, in the

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries with the exception of electric light and power. ² The October data are subject to revision.

reported number of women in the nine major industrial divisions, together with an increase of 117,200, or 8.7 per cent, in the number of men. The ratios per 1,000 persons in recorded employment had then been 747 in the case of men, and 253 in the case of women. The employment of women had reached its highest point at October 1, 1944, when such workers had constituted 261 per 1,000 persons reported in the eight leading industries, and 271 per 1,000 in the nine major industrial divisions. The completion or the curtailment of war

work has obviously been of the greatest importance in the declines since indicated in the numbers and the ratios of women workers, and this factor, together with the marked expansion in the non-manufacturing industries which followed the termination of the war, has resulted in a lower proportion of women in recorded employment at October 1, 1946, than at that date in any other of the five years in which periodical surveys of sex distribution have been made.

Report on Employment Conditions, November, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian Labour Market by occupational group, while the second section gives a more detailed analysis of employment conditions by region.

EMPLOYMENT prospects pointed decidedly downward during November. Further slackening of seasonal industries resulted in a steady influx of unskilled and semi-skilled workers into employment offices. Recruits for woods labour were obtained with comparatively little difficulty. Pent-up consumer demand will continue to add buoyancy to employment opportunities in manufacturing firms but prolongation of the United States coal strike may severely affect production. The accelerated activity of the Christmas season will alleviate the immediate unemployment problem. Positions available at National Employment Service dropped 12 per cent during the four-week period and at November 21 there were 119,256 unfilled vacancies¹ available in non-agricultural occupations. Unplaced applicants², on the other hand, moved upward and at the November date numbered 141,256. By region, the brunt of unemployment is falling most heavily in the Pacific, Maritime, and Prairie regions where industrial activity depends largely upon the seasonal industries.

Table I shows labour demand and supply by main occupational group and by sex as at November 21, 1946. Table II presents a

monthly comparison of total labour demand and supply. Table III shows unfilled vacancies classified by main industry group and by sex, as at November 21, 1946, with absolute and percentage changes in total demand during the last month.

Clerical Workers—The existing shortage of qualified help may be seriously aggravated by the withdrawal of married women when the 1947 income tax regulations come into force. One employment office deterred the proposed withdrawal of several married women by showing the slight difference in payments which would result in their respective cases. Labour needs for clerical help rose during November due to the pending replacement requirements, additional help for the year-end closing of books, and the heightened Christmas activity. For the employer's part, the chief obstacles deterring placements are that applicants are married, in the older-age bracket, and lack sufficient experience. On the other hand, many applicants feel that the salary range is too low for the qualifications requested. There were 6,648 clerical workers required at November 21, while unplaced applicants numbered 19,137 (8,597 male and 10,540 female). Stenographers and typists required totalled 2,240 with available supply slightly in excess of this number. Vacancies are centred largely in Quebec and Ontario while elsewhere there has been a growing unemployment problem.

Sales Workers—Activity in retail stores should reach an all-time high during the Christmas season with the more plentiful supply of consumer goods available at this time. Employment offices report that the pressure of labour requirements is considerably less than in the past few years due to the general staff expansion of retail establishments during 1946. Temporary needs are being met by the absorption of married women and high-school students on a part-time basis. Permanent sales positions in rural areas are difficult to fill as applicants are reluctant to leave the larger

¹ *Unfilled Vacancies* are the number of unfilled jobs on file in employment offices as at the date indicated.

² *Unplaced Applicants* are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. *Unconfirmed Referrals* are applicants who have been referred but whose placement has not been confirmed.

centres. Sales work on commission is obtainable but applicants generally prefer a stated salary basis. Orders for sales workers increased by almost one-third during the four-week period ending November 21 to total 5,371 at that date. Available labour supply continues to exceed vacancies with the number of unplaced applicants totalling 9,613 at Nov. 21.

Service Workers—A gradual improvement in the labour-tight service trades has been evident during November. With fewer jobs available for women, applicants are more readily accepting waitress, char service, and household work. An influx of farm help following the completion of the harvest season has somewhat eased the domestic situation. Placing of these workers, however, is largely on a short-time basis. The training of "Home-Aides" is continually advocated by the Employment Service but the response received by applicants has been limited. A persistent core of applications from elderly and handicapped persons

continues among the male applicants with proportionately few suitable jobs available. At November 21, there were 11,661 service positions on file with available supply numbering 13,195. Women workers, however, accounted for almost 80 per cent of demand but only 40 per cent of the unplaced applicants.

Skilled and Semi-Skilled Workers

With the slump in seasonal activity during the winter months, a greater proportion of the labour needs tends to be concentrated in skilled and semi-skilled occupations. The availability of skilled tradesmen in many cases determines the extent to which unskilled jobs are placed on the labour market. The current consumer's resistance to certain high-priced classes of goods may result in production set-backs shortly. Practically all occupational groups reported a contraction of vacancies with pronounced declines evident in construc-

tion, mining, and seasonal unskilled work. Vacancies for loggers were cancelled as employment quotas were unexpectedly filled. The number of skilled and semi-skilled workers required at November 21 was 61,200 with applicants registered totalling 41,551.

Textile Workers—A current "buyers' strike" against certain types of high-priced clothing apparel may result in a considerable contraction of employment in textile plants during the next few months. Lack of orders together with persistent material shortages are currently obstructing activity in this industry. Orders

for skilled textile workers dropped during November while unplaced applicants remained practically unchanged in number. Demand for textile help totalled 7,753 with 2,773 applicants available. Over 50 per cent of demand was in Quebec.

Lumber and Woods Products Workers—A large supply of woods workers has been obtained with surprisingly little difficulty. Estimates indicate that the present level of woods employment is well above that attained at this time last year. Demand will remain relatively high, however, due to

the normal heavy labour turnover and the opening up of camps now inaccessible. Employment offices report that some employers are becoming more selective in their demands and consequently vacancies are more difficult to fill. Vacancy reporting on the Western coast slackened somewhat due to the approaching Christmas shut-down. Saw-mill activity is experiencing its usual seasonal decline and in some cases workers are being absorbed into the logging industry. There were 38,183 vacancies for skilled and semi-skilled loggers at November 21 as compared with 45,508, four weeks earlier.

Miners—Employment prospects in the mining industry contracted sharply during November. Labour disputes continue to disrupt activity in British Columbia and strike action is pending in Quebec. Exploration work has largely ceased for the year involving a considerable decline in job opportunities. In addition, vacancies were cancelled as workers who had accepted seasonal agricultural and construction work returned to the mines for the winter season. The apprenticeship classes to train coal miners have been very satisfactorily meeting the needs for certificated coal miners. At November 21, there were 1,487 skilled and semi-skilled miners required while unplaced applicants numbered 572. Demand for coal miners accounted for almost 60 per cent of the number needed.

Construction Workers—Although construction activity in many sections of the country is continuing at a fair rate of progress, demand for additional construction workers took a sharp fall. Material shortages and inclement weather conditions are the main problems presently confronting the construction industry. However, winter activity will continue in buildings closed in before the setting in of severe winter weather. Lay-offs to date have been largely in the unskilled

class. Vacancies available for skilled and semi-skilled construction workers numbered 4,316. For the first time in several months, available labour supply exceeded the number required. At November 21, unplaced construction workers totalled 5,571.

Miscellaneous Workers—A further scaling down in applications for metal-work was evident in November with the ratio of applications to vacancies now approximating four to one. Unplaced metal-workers at November 21 totalled 7,613. Qualified automobile mechanics and bodymen remain in short supply. The employment situation in laundries eased somewhat due in some cases to an improved wage scale. Demand for female spotters and finishers totalled 476 at November 21 with available supply at that date numbering 329.

Unskilled Workers

The impact of seasonal slackening fell to a greater extent on job openings for unskilled workers than on skilled tradesmen. Employment prospects in canning factories receded sharply in November. Winter weather conditions impeded activity in the transportation industry, resulting in a sharp drop in vacancies. The result of seasonal influences in the mining and construction industries has been a growing emphasis on skilled workers, with relatively few openings for unskilled labour. However, vacancies continue plentiful for unskilled women workers. There is an urgent need for female factory workers, packers, wrappers, and messenger girls. Total demand for unskilled labour dropped from 39,245 to 32,003 during the four weeks, while unplaced applicants increased by 7 per cent to total 52,111 at November 21. The situation for women alone presents a decidedly different picture with labour needs totalling approximately 15,000, exceeding available supply by 8,000.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from National Employment Service Offices across Canada. The report covers employment conditions during the month ended November 22, 1946.

Maritime Region

The winter lull in employment is commencing. Labour demand has fallen steadily during November in every industrial classification except trade, which is showing the usual seasonal stimulation. The lumber industry is the chief outlet for workers from

temporary summer employment in agriculture and fishing. The burden of chronic unemployment remains relatively the heaviest of all regional unemployment.

Agriculture—All fall farm work has been completed. More land than in previous years has been turned in fall ploughing, pointing to greater production next fall.

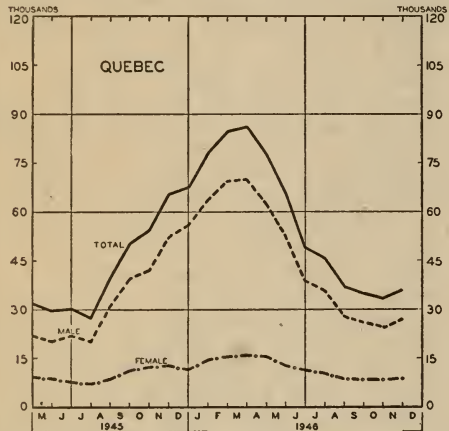

Many farmers and farm workers have found employment in woods work for the winter months.

The transfer of Polish war veterans to Maritime farms has proven very satisfactory; 199 Poles were allotted to the region.

REGIONAL UNPLACED APPLICANTS

AS REPORTED BY THE

NATIONAL EMPLOYMENT SERVICE

SOURCE: C.I.C. 7518 AT MONTH'S END

RESEARCH AND STATISTICS BRANCH - DEPT. OF LABOUR - CHART M.I.C.2

Logging—Reports indicate increased activity in the logging industry. Local labour supply is meeting demand in most places at present, but movement of workers through clearance will start on a large scale shortly.

Experienced woodsmen can be placed with no difficulty, but some operators hesitate to hire inexperienced men. Undoubtedly a larger number of men will be absorbed in this industry as more camps will open soon and the usual labour turnover will begin. The supply of woodsmen appears far greater than was expected and should enable a record cut this season.

Mining—The coal industry reports a slight gain in production. First-class miners are still required. Operations in New Brunswick strip mines continue at 100 per cent capacity. Output will probably exceed that of 1945.

New apprenticeship classes at the Dominion Coal Co. will begin within the next few weeks, absorbing 150 men. The progress of the classes now in training is very encouraging.

Manufacturing—A serious shortage of electrical power is affecting manufacturing at Campbellton and Yarmouth, and heavy rains are needed urgently. The Dominion Steel & Coal Corporation at Sydney has released 100 men on superannuation. It is reported that an additional 200 men will be laid off shortly, affecting workers who were hired as wartime replacements. The Pictou foundry is reducing employment because of a lack of orders. Wooden shipbuilding yards have a large backlog of orders on hand, and require ship's carpenters and shipwrights. Labour turnover is heavy in fish packing plants.

Construction—Building construction has progressed where materials and skilled labour have been available. Recent weather has been favourable, but winter conditions will soon restrict activity. A shortage of bricklayers in the Halifax area has caused the lay-off of carpenters and labourers.

Transportation—The ports of Halifax and Saint John are preparing for a busy season as shipments of ocean-going freight, particularly grain, will be heavy. Sufficient manpower will be available to handle the traffic.

Quebec Region

Unplaced applicants took a slight upward turn at the end of November for the first time since March. However, Quebec remains the only region where vacancies exceed applicants in both male and female categories. The chief problem is one of fitting workers and jobs together.

Agriculture—Farming in the region now is on a winter basis. Fall ploughing is almost

over, and farmers are leaving for work in the woods in increasing numbers.

The first draft of Polish veterans has been placed. The second draft has arrived and will be cleared shortly. Orders exceed the men available.

Logging—The cutting season has been excellent so far, not much rain and very little snow. However, in the swamps and low lands little cutting can be done until frost sets in.

The industry has passed the 25 per cent mark of its production objective. The supply of manpower for bushwork has exceeded all expectations this year. Employment now totals about 80,000, which is a marked increase over previous years.

Mining—At this time of year it is customary for miners to return from temporary summer outdoor jobs to their former employment in the mines. Thus the labour supply should improve shortly for this industry.

No settlement has as yet been reached in the strike in the Noranda mines. Until further developments only experienced miners are being referred to mining areas. Housing accommodation remains a problem.

Manufacturing—The employment situation is not bright as many industries are slowing down because of a lack of orders or lack of materials. However, firms dependent on steel and its products are gradually returning to normal. In the radio field, shortage of parts is blocking production and temporary lay-offs may become necessary. The general scarcity of electrical supplies is also an impediment in many other fields such as engine manufacturing.

While primary textiles show an increase in production and employment, there is evidence that the secondary textile industry has passed its peak of activity, and a recession may be expected. Buyers are cancelling orders for the first time in a long period. This is especially marked in the higher-price dress trade. The fur industry has also run into a totally unexpected period of slackness and some firms may close between December and February.

Plywood manufacturing is rapidly growing in importance and new plants have been established in several districts.

Construction—Construction activity continues unabated. All construction tradesmen are fully employed with the exception of painters, who are affected by seasonal conditions. Unskilled labourers are in great demand and numerous orders remain unfilled. Many important new projects, chiefly industrial, are contracted and under way.

Transportation—Port activity is tremendous as the seasonal closing of navigation is imminent. More freight handlers and stevedores are currently employed than is normal for this time of year.

Labourers on railway maintenance work are being released.

Ontario Region

As materials flow to industry with the resumption of strike-bound production, demand for labour should increase. Firms are re-calling staff previously laid off but it will be January before full recovery is evident. Currently, there is a general shortage of women workers, the situation being most acute in Toronto (12,000 vacancies, 600 applicants), Kitchener and Galt.

Agriculture—Mild weather this year has enabled farmers to accomplish more fall work than usual. Almost 700 Polish veterans have been placed in Ontario farms. Applications continue to pour in, far outnumbering the men available. The immigrants appear to be a very good type and are meeting with general approval. They show anxiety to learn the language and the ways of the country, and a great deal of favourable comment about them has been received.

There is still a demand for married couples, and this would be much larger if better housing accommodation existed on the farms.

Logging—The continuous good weather has given timber operators an excellent start in production and the logging industry is nearing its employment peak. The supply of manpower improved greatly this year and the number of loggers is almost sufficient to meet requirements. The demand for pulpwood cutters is very great, however. Large-scale operators still need men to fill their original orders as well as to cover the tremendous turnover of labour.

Sawmill activity has ceased and sawmill workers have gone into bushwork for the winter.

Mining—Labour demand in the gold mining industry is restricted to the local supply of workers; miners and mine beginners are needed.

In the base metal industry an order for 300 process labourers has been filled, but miners or physically-fit men willing to become miners can still be placed in large numbers.

Exploration work has in general ended until spring, but shaft sinking and substantial trench work is anticipated early next year.

Manufacturing—The ending of seasonal activity has released additional labour with the result that demand for factory workers has declined noticeably over the past month.

Vacancies for heavy labour also have decreased sharply. Production in previously strike-bound plants is getting back to normal, although some plants indirectly affected have yet to regain full production. Shortages of basic materials are causing serious bottlenecks in some areas and it is estimated that capacity production will not be reached until January.

Small lay-offs in the paint industry have resulted from the lack of oils and pigments essential to production. Shortage of cotton yarn is curtailing textile output in some areas, accordingly easing the acute scarcity of workers. The furniture industry, however, is expanding with the improvement in local lumber supplies.

Construction—While residential and industrial construction work is slackening in the northern section, there is every indication that demand for bricklayers, carpenters and construction labourers will continue in the remainder of the region. Work on numerous projects now under way will be in progress throughout the winter. The limited supply of certain building materials is interfering with construction schedules. Principal shortages are brass pipe, soil pipe fittings, hardware and window sash.

Prairie Region

The Prairie region registered the sharpest jump in unplaced applicants of all regions during November. Its seasonal fluctuations are naturally wider because the economy depends so heavily on primary industry. Substantial migration of seasonal workers to other regions occurs at this time of year.

Agriculture—The demand for farm labour is fairly light throughout the region. Most applicants are in the older age brackets and are thus often not acceptable to employers. Younger farm workers prefer employment in the woods or other industries for the winter. However, vacancies are usually filled with no great difficulty.

The first group of Polish veterans has reached the distribution centres at Winnipeg and Lethbridge. The men are creating a most favourable impression.

Logging—There has been a very brisk movement of men to logging camps in the eastern section of the region, the high wages being a great attraction. Several operators report that employment is well above the level of last year, and a sharp downward revision in orders has occurred in some areas. The industry still needs a great number of workers, however, to take care of replacements and to supply camps which will open shortly, having been inaccessible during the freeze-up period.

Logging in Alberta districts is in full swing, and favourable weather conditions will result in the prompt absorption of any surplus workers.

Mining—Gold mines at present require only experienced miners, but once transportation by air is resumed to northern areas mine labourers will be in demand.

The base metal mining industry needs workers in several skilled and semi-skilled classifications. Labour turnover has fallen off markedly. The base metal industry of British Columbia was actively recruiting workers in Alberta during the recent period, but their orders now have been filled.

Alberta coal mines still report vacancies for certificated miners. Lack of housing is a great barrier to placements. Mines in the Estevan area are fully staffed, however; present wage rates start at 92 cents per hour for common labour.

Manufacturing—Some meatpacking plants have begun seasonal lay-offs earlier than in previous years, because of the shortage of cattle and hog shipments. Larger sash and door factories report an improvement in the glass supply situation, as shipments are being received in small quantities. At Regina the glass shortage is still serious, but now that construction is almost at a standstill, manufacturers will be able to accumulate a reserve of supplies before spring.

Construction—Despite lay-offs because of seasonal inactivity, employment in private, industrial and public construction still remains at a reasonably high level. Work is continuing in places where weather permits and the supply of building materials, although not ample, will suffice. Otherwise, structures are being housed in and there will be no work done on them until spring. Municipal public works are at a standstill and will remain so until spring.

Transportation—There is a growing activity along the waterfront at the Lakehead. Arrivals of package freight and the departure of flour have added to the grain traffic.

At several regional points track maintenance workers have been released but at other centres demand continues. Aeroplane service to the north has been suspended until the winter flying season commences.

Pacific Region

The dependence of the Pacific region on industry which has a marked seasonal movement in employment is especially noticeable in November. Immigrants from the Prairies swell the labour force most importunately during the winter, which is the period of

inactivity. This has a deadening influence on any buoyancy in the labour market, and a marked increase in the regional labour surplus is apparent.

Agriculture—The placement of Polish veterans has greatly relieved the demand for dairy workers throughout the region. These men, being a very desirable type, were well received and should give satisfaction to the farmers employing them.

Harvesting throughout the region now is over after a very heavy season. Good weather and sufficient labour enabled the harvesting of the large crop without loss.

Logging—Labour demand in the logging industry is slackening, in view of the approaching Christmas shutdown. Most companies will endeavour to maintain their present crews, thus avoiding the expense of bringing new men into the woods. There are still orders for highly-skilled men on hand, which it is impossible to fill at the present time. Labour turnover is decreasing.

In the Duncan area heavy snows have blocked operations, but camps expect to re-open soon. Loggers have transferred to sawmill work for the present.

Mining—The coal mining industry continues to report a shortage of certificated miners. In the Nanaimo area, a tight housing situation retards placement progress. In general, the coal mining labour situation is gradually improving.

Only a few gold producers have completed negotiations for wage adjustments and there is little indication of any immediate settlement of the dispute. In the Whitehorse district, claim purchases in a recently-discovered area are causing great activity. All seasonal placer operations in this territory have closed until spring.

The base metal industry at Trail has cancelled all its orders in clearance at Prairie points and will not require any more unskilled labour for the rest of the winter.

Manufacturing—Metal and engineering plants are gaining activity as steel supplies improve. They are starting the production of new equipment for the lumber industry. Several New Westminster companies are developing export markets for lumber and logging machinery. As materials become more plentiful, these plants will increase their demands for machinists and unskilled workers.

Shipbuilding employment in Vancouver is gradually mounting with the improvement in steel supplies. Approximately 1,900 men are now working at Burrard Drydock as compared with 1,500 at the steel strike low point. In Victoria, the industry is slack. Reports forecast a lay-off of 150 men.

Construction—Construction work still is seriously hampered because of material shortages. Adverse weather conditions have also slowed up progress. However, first-class tradesmen such as carpenters, bricklayers, and cement finishers continue to be in short supply.

Transportation—Orders for railroad section hands can be filled without difficulty as other employment is not available. This is also true of labour for the Alaska Highway.

Crews for three ships were supplied at Vancouver recently. Towboat masters and mates are not readily available, and certified diesel engineers are still in demand.

Applications for Employment; Vacancies and Placements; October, 1946

DURING the five-week period September 27 to October 31, 1946, reports received from the National Employment Service Offices of the Unemployment Insurance Commission showed a gain of 1.8 per cent in the daily average of placements effected when compared with the preceding four-week period and a loss of 36.8 per cent in comparison with the five weeks September 28 to November 1, 1945. Under the first comparison except for declines in agriculture, public utilities operation, trade and fishing, all industrial groups recorded increases, the greatest being in forestry and logging. When compared with the corresponding period a year ago, except for a gain in agriculture all industrial groups recorded losses, the most pronounced being a substantial decline in manufacturing and moderate decreases in forestry and logging, construction, public utilities operation, trade and services.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the National Employment Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies in relation to applications took a downward trend while that of placements followed an upward course. The ratio of vacancies to each 100 applications was 111.3 during the five weeks ending October 31, 1946, in contrast with 119.2 in the previous four weeks and 83.9 during the corresponding five weeks a year ago.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the period September 27 to October 31, 1946, was 7,149 in comparison with 7,750 in the preceding four weeks and 8,189 during the five weeks September 28 to November 1, 1945. The average number of applications for employment received daily during the period under review was 6,426 in contrast with 6,502 in the previous four weeks and 9,754 during the same period last year. The average number of placements made daily by the offices during the period ending

October 31, 1946, was 3,207, of which 2,947 were in regular employment and 260 in work of one week's duration or less in comparison with a daily average of 3,149 during the previous period. Placements during the five weeks September 28 to November 1, 1945, averaged 5,076 daily consisting of 4,894 in regular employment and 182 in casual work.

During the five weeks September 27 to October 31, 1946, the offices referred 145,207 persons to vacancies and effected a total of 92,992 placements. Of these the placements in regular employment were 85,464 of which 65,393 were of males and 20,071 of females, while placements in casual work totalled 7,528. The number of vacancies reported by employers was 150,505 for males and 56,823 for females, a total of 207,328, while applications for work numbered 186,357 of which 134,543 were from males and 51,814 from females. Reports for the five weeks September 27 to October 31, 1946, showed 207,328 positions available, 186,357 applications made and 92,992 placements effected, while in the five weeks September 28 to November 1, 1945, there were recorded 237,505 vacancies, 282,877 applications for work and 147,197 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year, from January 1936, to date.

Year	PLACEMENTS		
	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (44 weeks).....	665,617	59,983	725,600

Nova Scotia and Prince Edward Island

Positions offered through National Employment Service Offices in Nova Scotia and Prince Edward Island during the five weeks ending

October 31, 1946, numbered 258 daily compared with 233 in the previous period and 311 during the five weeks ending November 1, 1945. The average number of placements registered daily was 171 in comparison with 149 in the preceding period and 213 during the corresponding five weeks of last year. A fairly substantial reduction in manufacturing together with moderate losses in public utilities operation, trade, services and mining accounted for the decline in placements from the period ending November 1 a year ago. These decreases were somewhat modified by an appreciable gain in agriculture. Placements by industries included: agriculture 1,552; services 919; construction 822; manufacturing 763; trade 510; public utilities operation 187, and forestry and logging 134. There were 3,750 men and 1,013 women placed in regular employment.

New Brunswick

Employment opportunities as indicated by orders listed at Employment Offices in New Brunswick during the period under review, showed a daily average of 213 in contrast with 195 in the preceding four weeks and 317 during the period terminating November 1 a year ago. There was a daily average of 91 placements in comparison with 89 in the previous four weeks and 148 during the period September 28 to November 1, 1945. Placements were fewer than those during the five weeks terminating November 1 last year, the largest decrease being in manufacturing followed by moderate losses in trade services, public utilities operation, construction, and forestry and logging. In the remaining groups, a moderate improvement in agriculture was the most significant. Placements by industrial divisions numbered: services 528; construction 510; trade 399; agriculture 356; manufacturing 346; public utilities operation 295 and forestry and logging 157. Regular placements totalled 1,941 of men and 496 of women.

Quebec

Orders received at Employment Offices in the province of Quebec during the five weeks ending October 31, 1946, called for an average of 1,738 workers daily as compared with 1,955 in the preceding period and 2,150 during the corresponding five weeks a year ago. Placements recorded a daily average of 614, in contrast with 598 in the previous period and 990 during the five weeks ending November 1 last year. The reduction in placements from the period ending November 1, 1945, was chiefly attributable to a pronounced decrease in forestry and logging supplemented by fairly

substantial declines in manufacturing and construction and a loss much smaller in volume in mining. In addition, a moderate decrease was shown in trade but was partly offset by gains in public utilities operation and agriculture. Industries in which employment was secured for more than 500 workers included: manufacturing 5,973; services 3,145; construction 2,909; forestry and logging 1,738; public utilities operation 1,724; trade 1,288 and mining 592. Placements in regular employment numbered 13,597 of men and 3,565 of women.

Ontario

There was a decrease in the average number of positions available daily at Employment Offices in Ontario during the period terminating October 31, 1946; there being 3,127 in comparison with 3,284 in the preceding four weeks and 3,498 during the period September 28 to November 1, a year ago. The average number of placements effected daily was 1,256 during the five weeks under review, as compared with 1,251 in the previous period and 2,322 during the corresponding five weeks of 1945. All industrial groups showed reductions in placements when compared with the period terminating November 1 last year, the most outstanding loss being in manufacturing followed by substantial declines in services, public utilities operation, construction and trade and a fairly substantial decrease in forestry and logging, and moderate losses in finance and insurance, mining and agriculture. Industrial divisions in which most of the placements were effected were: manufacturing 13,418; services 7,085; construction 5,604; trade 4,065; public utilities operation 2,236; forestry and logging 2,002; mining 1,121; finance and insurance 465, and agriculture 428. There were 25,854 men and 8,506 women placed in regular employment.

Manitoba

The demand for workers on a daily average as indicated by vacancies listed at Employment Offices in Manitoba during the five weeks under review, was 375 as compared with 427 in the previous period and 364 during the five weeks September 28 to November 1, 1945. There was a daily average of 219 placements in contrast with 214 in the preceding period and 268 during the five weeks ending November 1 last year. The loss in placements from the corresponding period a year ago, was mainly due to a fairly large decrease in manufacturing augmented by moderate declines in public utilities operation, construction and trade. Of the changes in all other groups, a moderate gain in mining was the most important.

ant. Placements by industrial groups numbered: services 1,788; manufacturing 1,502; trade 1,029; construction 901; public utilities operation 501; mining 334 and agriculture 162. Regular placements totalled 3,472 of men and 1,388 of women.

Saskatchewan

Opportunities for employment as reported at Employment Offices in Saskatchewan during the period ending October 31, 1946, numbered 238 daily as compared with 247 in the preced-

ing four weeks and 214 during the corresponding period of 1945. Placements showed a daily average of 134, in comparison with 120 in the previous four weeks and 162 during the period September 28 to November 1 a year ago. Placements by industrial groups showed small variation from the five weeks ending November 1 last year, the most significant changes being moderate declines in manufacturing, construction, public utilities operation, agriculture and trade and a gain in services. Placements by industries included: services 1,288; trade 878; construction 631; manufacturing 541; public utilities operation 231 and agriculture 181. Placements in regular employment totalled 2,174 of men and 1,011 of women.

Alberta

Vacancies listed at Employment Offices in Alberta during the five weeks terminating October 31, 1946, called for a daily average of 464 workers, as compared with 460 in the previous period and 417 during the five weeks September 28 to November 1 a year ago. The average number of placements recorded daily was 280 during the period under review, in contrast with 269 in the preceding four weeks and 286 during the period terminating November 1 last year. When comparing placements by industrial groups with the corresponding five weeks of 1945, the most favourable change was a fairly substantial increase in agriculture, but this was largely

offset by decreases in construction, public utilities operation, manufacturing and trade. Placements by industries included: agriculture 2,016; services 1,898; manufacturing 1,353; trade 820; construction 815; mining 539; public utilities operation 327, and forestry and logging 288. There were 5,723 men and 1,401 women placed in regular employment.

British Columbia

During the period under review, the daily average of positions offered through employment offices in British Columbia was 736, in comparison with 949 in the four weeks ending September 26, and 919 during the corresponding period of 1945. Placements, likewise, decreased under both comparisons, the daily average being 441, in contrast with 459 in the previous four weeks and 687 during the period ending November 1 a year ago. Manufacturing and forestry and logging were largely responsible for the total reduction in placements from the five weeks ending November 1 last year, although fairly large declines were reported in public utilities operation and construction and moderate decreases in mining, trade and services. Industrial divisions in which the majority of placements were effected were: manufacturing 3,129; services 2,945; construction 2,246; trade 1,679; public utilities operation 1,202; forestry and logging 1,103; finance and insurance 190; mining 155 and agriculture 136. Regular placements totalled 8882 of men and 2,691 of women.

Labour Law

Labour Legislation in New Brunswick and Prince Edward Island in 1946

New Brunswick

THE New Brunswick Legislature in 1946 enacted new laws governing factories, and stationary engineers and steam boilers, and amended acts relating to workmen's compensation, early closing of shops and vocational education. The legislative session lasted from March 5 to April 17 when it was adjourned. It was formally prorogued on November 12,

Factories and Mercantile Establishments

The new Factories Act applies to "factories", which includes laundries and dry cleaning establishments, as formerly, and also, except for the purpose of certain sections which will be noted later, hotels, restaurants, mercantile establishments, places of amusement and office buildings. The Act does not apply to any premises or place where one or more persons are employed in mining.

Every operator of a factory is responsible for the observance of the Act. One or more factory inspectors must be appointed, one of whom is to be designated Chief Inspector.

Children and Young Persons

The minimum age of 14 applied to factories in 1943, now applies to any establishment covered by the Act. The Minister of Labour may, however, give written permission for employment below 14. The section was revised which provided for the individual liability of the employer in case of injury or death caused by accident in a factory to a person unlawfully employed to restrict the application of the section to a child unlawfully employed, and to stipulate that the compensation payable in such a case is to be reckoned as to an adult.

A new section requires every operator, when requested by the Chief Inspector, to produce a birth certificate or affidavit of age of any child or young person employed. The provision was dropped which made liable to a penalty the parent of a child or young person employed in contravention of the Act unless such employment was without the consent, connivance or wilful default of the parent.

The Minister may prohibit the employment of young persons under 18 where he deems it

dangerous or injurious to their health or welfare. Previously, he could prohibit their employment if he considered the work dangerous or unwholesome.

Hours of Work

Maximum hours of work are unchanged from the Act of 1943. Women and young persons in factories, laundries and dry cleaning establishments may not be employed more than nine hours in a day and 54 in a week except with the written authority of the Minister. However, a different apportionment may now be made of daily hours in order to secure a shorter day on Saturday. These hours provisions do not apply to hotels, restaurants, shops, places of amusement or office buildings.

Another section, applying to all establishments under the Act, forbids the employer, as before, to cause or permit an employee to work longer than six hours without an interval for food and rest, except a shift worker employed on a shift of eight hours or less. Formerly, this section required a full hour's interval to be given but as revised it requires a "suitable period". In case of dispute as to a suitable period the Minister may fix the duration of such period and the time at which it is to be taken.

Health and Safety

Rules for health which apply to all establishments under the Act require, as previously, cleanliness, and 300 cu. ft. of air space for each employee. The section requiring employers to provide chairs or seats now applies to all employees and not only to women as before. The type of seat is to be determined by the Chief Inspector. New sections require provision of toilet rooms of a type approved by the Chief Inspector, and a supply of safe drinking water. Where the Minister considers it necessary, there must also be properly equipped wash-rooms, and accommodation for street clothing, and for work clothes which must be dried or kept separate from street clothes owing to the presence of poisonous, infectious or irritating materials.

The following new sections apply to fac-

tories, laundries and dry cleaning establishments only. Where the inspector finds a factory to be heated, lighted or ventilated in a manner which he believes injurious to the health, welfare or convenience of employees, or finds there a condition which he considers is causing or may tend to cause any disease among the employees, he may recommend remedial measures to the operator. If such measures are not taken within 30 days, the Minister may order the operator to give effect to the inspector's recommendations in whole or in part or to take any further action he considers necessary. Where the Minister considers that the health of employees may be endangered by poisonous, irritating or infectious materials or gases or by extremes of temperature or humidity, shower baths and wash basins must be provided and sufficient hot and cold water.

Safety rules applying to all establishments under the Act require, as formerly, that all openings of hoistways, hatchways and well holes shall be protected, and elevator cabs or cars provided with covering and with holding devices, satisfactory to the Chief Inspector, that explosives shall be stored in a separate building and that employees shall not be allowed to clean mill-gearing in motion. Dangerous structures and places must be guarded and those specified in the Act now include electrical apparatus, steam piping and belts. The employer must provide a room, equipped, in a manner satisfactory to the Minister, as an eating and rest room for employees and no part of the expense may be charged to the workers.

New rules applying only in factories, laundries and dry cleaning establishments provide: (1) that if the Minister so directs in writing the employer must forbid employees to take food into a room where a manufacturing process is being carried on; (2) that an employer must not allow an employee to enter a tank, chamber, pit, pipe, flue, or other confined space unless such space has a manhole or other means of easy egress and has been ventilated and tested and unless the employee is wearing suitable breathing apparatus and a belt to which is securely attached a rope, the free end of which is held by a person outside such confined space; and (3) that an employer must not permit a workman to enter a coal, sulphur, or grain bunker or like dangerous structure unless he wears a belt and rope similar to that described.

Accidents

The following new provisions relate to all places covered by the Act. Where an employee is required by the Act to wear safety equipment, it must be provided by the employer

without cost to the employee. An inspector may make such investigation as he considers necessary into any accident. When a worker is injured in a manner which causes or may cause death or the loss of a limb, the employer must immediately notify the Chief Inspector stating the probable cause of the accident. An employer, when directed in writing by the Chief Inspector, must designate one of his employees as accident prevention officer. Such person must: acquaint himself with the Act and Regulations; advise the employer of any suspected violation of them; advise the employer of any recommendation made by an inspector and endeavour to have it carried out; and generally familiarize himself with matters relating to accident prevention.

Penalty

Any person guilty of an offence under the Act is liable to a maximum penalty of \$100 or three months' imprisonment.

Steam Boilers

The Stationary Engineers Act, 1946, in force July 1, 1946, repeals an Act of 1937 but continues in effect all valid licences issued under it. The new Act applies to "boilers", i.e., vessels or structures where steam is generated for any purpose, and to "pressure vessels", i.e., tanks, vessels and refrigeration plants and their accessories, containing gas, air, or liquid under pressure. It does not apply to boilers and pressure vessels where the pressure is 15 lbs. to the sq. in. or less nor to railway locomotives or those in private residences.

The Lieutenant-Governor in Council is to appoint a Board of Examiners of three stationary engineers, holding first-class licences, and one or more boiler inspectors.

No person may operate or have charge of a boiler plant or steam plant unless such person holds the appropriate licence but in an emergency the holder of a licence one class lower may be authorized by the Chief Inspector to act temporarily.

A candidate for any licence must be at least 18 years of age, satisfy the Board as to character and sobriety, and furnish references and information as to experience and qualifications. In addition, a candidate for a stationary boilerman's licence must have had three months', and a candidate for a third-class stationary engineer's licence one year's experience in the operation of a steam power or boiler plant. A candidate for a first or second-class licence must have held a licence of the grade immediately below for at least a year.

Special provision is made for war veterans and merchant seamen who held a stationary engineer's licence before entering the Services,

and men who have acquired certain certificates in the Armed Forces are to be deemed qualified candidates for the corresponding licences specified in the Act. A person with special engineering training in a recognized university or practical experience in the construction or repair of boilers may be accepted as a candidate for any licence which the Board considers advisable.

The causes for which licences may be suspended or cancelled are set out in the Act.

No person may use a boiler or pressure vessel unless he has an inspection certificate under this Act or unless the boiler is insured in a licensed company. Every inspector employed by an insurance company must have a certificate from the Chief Inspector of Boilers for the Province, who must be furnished with a copy of such inspectors' reports and also, if he requests it, with the names of persons carrying, contracting for, and cancelling, insurance, and a description of each insured boiler and pressure vessel.

Regulations may be made for the administration of the Act and must be published in the *Royal Gazette*. A maximum penalty of \$100 or three months' imprisonment may be imposed for violation of the Act or Regulations.

Workmen's Compensation

An amendment in the Workmen's Compensation Act provides that no fees or charges for medical aid rendered on or after May 1, 1946, are payable by or recoverable from the Board unless written application for payment is made within three months after such medical aid has been completely rendered.

Early Closing of Shops

Under a section added to the Early Closing Act, a by-law requiring a class of shops to close for any period may permit one or more of such shops, when designated by an official named by the municipal council, to remain open for the convenience of the public on such days and for such hours as may be specified.

Vocational Education

The Vocational Education Act was amended to provide that the Province must reimburse vocational committees in respect to expenditures on buildings approved by the Minister of Education, Federal and Municipal Relations, for 60 per cent of the first \$100,000 or portion of it, 50 per cent of the amount between \$100,000 and \$200,000, 40 per cent of the amount between \$200,000 and \$300,000 and 30 per cent of amounts over \$300,000. Such payments are to be made in lieu of payments

authorized by the Rural Schools Assistance Act, 1943, with respect to the parts of buildings to be used for vocational education.

School Attendance

The minimum school-leaving age is raised to 16 years by an amendment in the School Attendance Act but ratepayers of any school district, with certain exceptions, may determine by resolution that the school-leaving age shall remain at 14. Excepted are cities and incorporated towns to which Section 105 of the Schools Act applies, that is those with school boards appointed in part by the town council and in part by the Governor in Council.

In a district where the age of 14 is fixed by resolution, a child may, as formerly, be exempted from school attendance if he has passed Grade 8; in other districts he may be exempted if he has passed Grade 11. A new provision enables exemption on certificate from the County Superintendent stating that a child should be exempt from further attendance.

Mothers' Allowances

Several changes were made in the Mothers' Allowances Act. A "foster-mother" may include a person under 21 years of age. From May 1, 1945, where an allowance is being paid because the father or mother is a patient in the Provincial Hospital or in a sanatorium for the treatment of tuberculosis and such parent is discharged from the institution with a written recommendation from the Medical Superintendent for further treatment at home, the allowance may be continued during such further treatment. The residence qualification was amended to authorize an allowance for the child of a member of the Armed Forces during the last war if the latter resided in the Province when he enlisted and the child is resident there.

Chauffeurs

An amendment in the Motor Vehicle Act extends for an indefinite period, the provision, enacted in 1943 for the duration of the war, authorizing the issue of a special driver's licence to any male person between 16 and 18 years of age who is engaged in an occupation requiring him to operate a motor vehicle and whose competence is certified by a qualified person. The licence may only be issued with the consent of the young person's parent or guardian and on application of his employer who must furnish proof of financial responsibility. The licence is valid only for operation of vehicles weighing 10,000 lbs. gross or less,

which belong to the employer and are specified in the licence.

Housing

An Act to authorize the Municipality of the City and County of Saint John to make Expenditures for Emergency Housing, enables the Municipal Council to acquire lands, buildings and premises and to borrow money for the purpose of providing such housing. The Municipality may also make agreements with the Government of Canada for the same purpose.

Co-operative Associations

The Co-operative Associations Act was revised. New sections provide for representation of an association at meetings of another association of which it is a member, lay down rules regarding payment of dividends, and enable the Lieutenant-Governor in Council to make regulations for carrying out the Act.

Prince Edward Island

A section added to the Trade Union Act, 1945, enables the Lieutenant-Governor in Council to make regulations, not inconsistent with the Act and having the force of law from the date of publication in the *Royal Gazette*, prescribing the manner in which a trade union may be formed and the method of election of officers, governing the recognition of trade unions by employers, and, generally, for carrying out the Act.

The Credit Union Societies Act was revised with a few changes. A federation of credit unions may now, in addition to its former powers, inquire into and report to the Provincial Secretary on the affairs of credit unions,

Credit Unions

The Credit Union Federations Act enables any ten or more credit unions to apply to be incorporated as a Federation to: carry on and assist educational and advisory work relating to credit unions; assist in improving their methods of management and standardizing their bookkeeping; reduce operating costs by group bonding of employees and purchase of bookkeeping and other supplies for resale to members and to other credit unions; encourage organization of district chapters among member credit unions, receive moneys which may be deposited with it by member credit unions, invest such moneys or loan them to credit unions borrowing under the Credit Union Societies Act; and to render to its members other services incidental to its objects. Consequential amendments were made in the Credit Union Societies Act. An Act repealing the Act to incorporate the N.B. Credit Union League will come into force on Proclamation.

and perform at a reasonable charge for credit unions not members of the federation such services as it may render to members. A member of a credit union over 16 years of age may nominate some person to whom his shares are to pass at his death, and an officer or servant of the union may not be nominated unless he is a near relative of the nominator.

Sections added to the Co-operative Associations Act enable any five or more associations to form a federation for purposes similar to those of federations formed under the New Brunswick Credit Union Federations Act, above.

Recent Regulations under Dominion and Provincial Legislation

Dominion

THE Wartime Wages Control Order and the Wartime Salaries Order were revoked on November 28 by Orders in Council P.C.

4904 and P.C. 4937. Fuller information is given on page 1690 of this issue.

Provincial

In Quebec, General Order 4 under the Minimum Wage Act has been amended to raise the minimum rates for workers in hotels, taverns and restaurants and in some miscellaneous occupations, and to revise in certain particulars the provisions concerning overtime. Several minimum wage orders have been renewed until January 1, 1948.

In Alberta, the exemption has been continued of certain workers in the lumbering industry from the hours and weekly rest-day provisions of the Hours of Work Act.

In Manitoba, full-time technical classes may now be attended by third, fourth and fifth-year apprentices, in addition to or as an alternate to evening classes.

Alberta Hours of Work Act

Regulation 28A approved by an Order in Council of November 19, gazetted November 30, extends to October 31, 1947, the exemption from the eight-hour day and 48-hour week of cooks, cookees, bull cooks, night watchmen, barn bosses and blacksmiths employed in the lumbering, logging and railway tie industries in rural districts more than 10 miles from any city or in places with less than 1,000 people (L.G. 1945, p. 1843.)

Order 28 issued on October 31 and gazetted November 15 continues from November 1, 1946, the exemption of these employees from the provisions of the Act requiring a weekly rest-day.

Manitoba Apprenticeship Act

Rules for apprenticeship in the trades brought within the Act (L.G. 1945, p. 768) have been amended to provide that, in addition or as an alternate to the evening classes provided for in the rules, third, fourth and fifth-year apprentices must be given the option of attending full-time classes under the conditions laid down in the Rules for first and second-year apprentices and in accordance with the Dominion-Provincial agreement on apprentice training.

Requirements concerning attendance at technical schools vary with the trade. In bricklaying, electrical work, plastering and plumbing, full-time classes must be attended for two months during the winter season for the first two years and part-time classes for not less than 140 hours during each year thereafter. Carpenters' and woodworkers' apprentices must attend as above for similar periods except that the former must attend part-time classes between December and March and the woodworkers between February and April. Painters' apprentices must attend full-time classes for two months during the winter for the first two years, part-time classes for not less than 140 hours during the third year and 70 hours during the last six months. Automobile-repair apprentices must attend full-time classes for at least six weeks in each year of the first four years of apprenticeship.

Quebec Minimum Wage Act

GENERAL ORDER 4

General Order 4 of 1942 (L.G. 1942, p. 586), governing all workers under the Act who are not covered by special Orders, which has been amended from time to time, was again amended by an Order in Council of September 25, 1946, gazetted and effective November 9.

The revised Order adds to the classes exempted from its operation: (1) the employer's consort; (2) the partner of a partnership as set forth in the Civil Code (with the exception of joint-stock companies) who works for the partnership to which he belongs; and (3) except for hours worked in their employer's establishment, salesmen, agents or employees who are paid wholly or partly by commission, bonus or shares, and whose hours of work cannot be controlled by the employer.

The minimum rates for most workers in commercial and industrial establishments, offices and road transport were raised and a new yearly minimum for teachers of \$600 instead of \$300 was established by amendments made to Order 4 by Orders in Council gazetted on August 10, 1946. (L.G. 1946, p. 1275.) The latest amendment raises the minima of workers in hotels, taverns and lodging-houses and in the miscellaneous occupations included in Category VI. By Order 2, of July 31, time and one-half the regular rate must be paid for overtime worked beyond "the regular workweek" stipulated by Order 4 for the occupation. This provision supersedes that in Order 4 requiring the payment of time and one-half the *minimum* rate (L.G. 1946, p. 1275.)

HOURS OF WORK

Mining operations are added to the undertakings in which the minimum rate applies to a 48-hour workweek, but it is stipulated that the regular workweek of surface workers is 54 hours and of employees working at continuous work 56 hours. Work after these limits must be paid for at the rate of time and one-half the regular hourly rate. To the establishments in which the "regular workweek" is 54 hours are added spinning mills, knitting mills, weaving or other textile mills, and those making electric appliances in zones III and IV. A 60-hour workweek applies to hotels in municipalities in the districts of Montreal, Quebec and in places over 2,000 in population, to restaurants throughout the Province, and to all wool-carding and spinning mills.

A new section provides that the regular workweek of maintenance and servicemen in industrial or commercial establishments is to be the one fixed for the establishment in which they work plus six hours, but not more than 60 hours.

Workers in post offices who sell stamps and money orders and classify mail are classed as office-employees for whom the regular workweek is that of the establishment in which they are employed or, if no workweek is fixed, 48 hours.

OVERTIME

For workers hired otherwise than by the month or half-month "overtime" is work beyond 12 hours in a day and beyond the "regular workweek". For those on a monthly basis overtime is work done at the employer's request beyond 12 hours in a day and beyond the number of hours obtained by multiplying the hours of the regular workweek by $4\frac{1}{2}$; for those paid semi-monthly, overtime is work done after 12 hours in a day and after the hours of the regular workweek multiplied by $2\frac{1}{2}$. In months of 31 days, however, of which four are legal holidays, the regular workweek is increased by $\frac{1}{4}$.

Order 2 applies to workers hired and paid by the hour if they are not within the scope of a collective agreement.

By Order 4 as amended, workers not within Order 2 but entitled to a special overtime rate under Order 4 must be paid for overtime as defined by that order, time and one-half the *minimum* rate.

The special overtime rate does not need to be paid to employees paid on a yearly, monthly or weekly basis at least \$50 per week in zone I, \$45 in zones II and III and \$40 in zone IV, whether or not they work a full week. This provision applied previously to minimum rates of \$30, \$25 and \$20.

MINIMUM RATES

Hotels, Restaurants, etc.

The higher minima fixed for workers in hotels, cafés and restaurants and the miscellaneous occupations in Category VI represent an increase of at least 10 cents an hour.

For waiters, waitresses, room-maids, elevator operators, etc., the minimum hourly rates are raised to 30, 28, 24 and 20 cents from 20, 16, 13 and 10 cents respectively in the four zones. For head waiters and hostesses, minimum hourly rates are set for the first time at 35, 32, 28 and 25 cents. Kitchen helpers' rates are increased to 35, 32, 28 and 25 cents from 25, 20, 14 and 12 cents; the new rates for cooks are 40, 37, 33 and 30 cents instead of 30, 25, 15 and 12 cents. Bartenders in taverns whether in hotels or restaurants have a minimum of 35, 32, 28 or 25 cents according to the zone. For these workers the regular workweek continues to be 60 hours, except in hotels in places of less than 2,000 people.

The new rates for domestic servants in lodging-houses or institutions of hospitalization (excluding boarding houses with less than five rooms to let, and where meals are served) are 25, 23, 20 and 18, replacing the old rates of 15, 13, 12 and 10 cents an hour. The Order

establishes no regular workweek for this class of workers.

For commissary clerks, chief cooks and bakers employed by caterers contracting to house and board workpeople in staff-houses or work-camps employed directly by the operator of the undertaking, the minimum monthly rate is raised to \$70 from \$35; for commissary clerk's and baker's assistants, assistant cooks, and house-keepers to \$50 from \$25; and for kitchen helpers, dishwashers, etc., to \$40 from \$20. These rates applying only to workers hired by the month are in addition to lodging and meals. No regular workweek is established.

For bell boys, porters, messengers and check-room clerks hourly rates in all zones are raised from 10 to 15 cents for a workweek of 60 hours. Uniforms, where required, must be supplied, and if not kept in good condition at the employer's expense a worker's wage at whatever rate must be increased by 60 cents a week. The employer must record this separate payment in his register and on the pay envelope.

An employee acting both as watchman and janitor but only at odd jobs who may be also employed regularly by another employer must be paid as a watchman with a minimum of three hours per day.

Municipal office workers whose time is controlled by the employer must be paid the rates for Category II. Persons employed by municipal corporations but working generally at home or not directly under the control of the employer are to be paid, from January 1, 1947, according to the size of the municipality, at monthly minima ranging from \$25 instead of \$17 for county municipalities and from \$25 for local municipalities of less than 1,500 people to \$75 in cities of 10,000 or more, instead of \$8.50 and \$50. For persons working under the same conditions for school corporations, rates vary from \$10 monthly in places of 500 people or less to \$55 where the population is over 10,000.

Workers in churches (sacristans, sextons, etc.) who work a full day are entitled to weekly wage rates according to the population of the parish. These vary from \$20 in zone I, \$18 in zone II and \$15 in zones III and IV in places of 1,000 people or less to \$35, \$33 and \$30 in congregations of more than 5,000 people. There is no regular workweek. Previously, the regular workweek was 70 hours and monthly rates were \$75 in zones I and II, \$60 in zone III and \$50 in zone IV. If such persons spent half the day at other occupations they were entitled to \$40, \$35 and \$30.

For certain seasonal industries, minimum rates have been raised to 20 cents an hour in any zone: in fruit and vegetable canneries from

June 15 to October 15; in the maple sugar industry; in handling and stemming leaf tobacco from November 1 to March 15; and in handling and stemming Canadian tobacco from June 15 to October 15 in zones III and IV. The old rates for the first three categories were 14, 15 and 16 cents per hour and for handling Canadian tobacco in zones III and IV, 14 cents for 50 per cent of employees and 16 cents for the rest.

Bootblacks must now be paid at least 20 cents an hour in zones I and II and 15 cents in the other two zones instead of 10 cents in any zone. For pin boys the new rates are also 20 and 15 cents instead of 15 and 10 cents according to the zone.

New sections added to the Order stipulate that for certain classes of workers falling in the miscellaneous group, Category VI, the minimum rates do not apply to any specific workweek except in the case of stationary enginemen outside the Montreal district and workers in power houses and electric stations whose minimum rate applies to a 60-hour week. The workers for whom no workweek is fixed include those employed in navigation, in loading and unloading ships and in unloading, cleaning and storing fish.

The only workers who may be classified as apprentices are those in industrial and commercial establishments, other classes of workers who are by order subject to the same wages and working conditions, and inexperienced workers in garages. As before not more than 10 per cent of the total number of employees of any one employer may be classed as apprentices but this restriction does not apply to inexperienced garage employees nor to office workers. Temporary employees, those employed to do home work, or salesmen, etc., paid on a commission basis, however, must not be included in the total from which the number of apprentices is to be determined.

Employers are required to keep and to retain for five years, registers giving the name and address of workers, competency, category and class, date of entry into employer's service, hour of beginning and finishing work each day, hours worked in a week, or in a month or half-month if paid monthly or semi-monthly, overtime, pay frequency, wage rate, total wage earned and paid, deductions, and any other information required by the Commission.

Special provisions are made for determining the appropriate rate, regular workweek and overtime rate of a workman who is employed

in occupations falling within two or more categories of Order 4 or under two or more Minimum Wage Orders.

FOREST OPERATIONS

Order 39 governing forest operations was amended by an Order in Council of October 31, gazetted and effective November 16, to provide that wages of forest workers working at piece-rates must be calculated according to the units of measurement and the official scaling system established by regulations of the Provincial Department of Lands and Forests.

Pieceworkers on pulpwood operations are to be paid, according to length of logs felled, per 100 solid cubic feet, and those cutting and making saw-logs per 1,000 feet F.B.M. Formerly, both classes of pieceworkers might be paid either at the rates set per 100 solid cubic feet or per 1,000 feet F.B.M.

MISCELLANEOUS

The following Ordinances have been renewed until January 1, 1948, by an Order in Council of November 21, 1946, gazetted November 30: General Ordinance No. 4; No. 5, governing the silk textile industry; No. 6, stationary enginemen and firemen in the Montreal district; No. 7, shoe-counter industry; No. 8, cotton textile industry; No. 10, pasteurizing, processing and distribution of milk; No. 11, charitable institutions, hospitals and homes; No. 13, match industry; No. 14, real estate undertakings; No. 15, waste paper industry; No. 16, butter and cheese wholesale and export establishments; No. 17, laundry, dry cleaning and dyeing; No. 19, hosiery mills; No. 22, manufacture of bricks and building blocks; No. 23, taverns in the Montreal district; No. 25, waste materials industry; No. 26-A, taxicabs and automobiles for hire in Montreal and district; No. 27, canning industry; No. 28, dyeworks and laundries in Quebec and Quebec West; No. 29, taxicabs and automobiles for hire in Quebec and Levis; No. 30, manufacture of wooden boxes; No. 31, tailors and dressmakers of Quebec City; No. 32, mattress and upholstery industry in Quebec, Quebec West and Levis; No. 33, wholesale foodstuffs in the Quebec City district; No. 34, ice-industry and ice-trading in Quebec and district; No. 36, foundries in Hull; No. 37, establishments making glass containers; No. 39, forest operations; No. 40, cinemas and theatres of the Island of Montreal; No. 42, peat-bog industry; No. 45, glaziers.

Legal Decisions Affecting Labour

Injunction Restrains Vancouver Typographical Union

An injunction granted on July 15, 1946, by Mr. Justice Harper in the British Columbia Supreme Court to prohibit members of the Vancouver Typographical Union, Local 226, or officers of the International Typographical Union, watching or besetting or procuring to be watched or beset the premises of the Vancouver Daily Province and from other acts, was continued on July 30 until the trial of the action, in a form modified in accordance with the wording of Sec. 501 of the Criminal Code and the provisions of the British Columbia Trade Unions Act of 1902.

To the words of the original injunction restraining the defendants from "watching or besetting or procuring to be watched or beset" the premises of the Vancouver Province, were added other phrases from Sec 501 of the Criminal Code: "with a view to compel the Plaintiff to abstain from doing anything which it has a lawful right to do, or to do anything from which it has a lawful right to abstain". In addition, the amended injunction made it clear that it did not purport to restrain defendants from doing those things which are permitted by Sections 3 and 4 of the B.C. Trade Unions Act, except in so far as the provincial Act may be overridden by any Dominion Regulations.

Sec. 3 of the Trade Unions Act provides that no trade union nor its officers, members or any other person shall be enjoined, nor its funds nor its officers or members be made liable in damages for communicating to any workman or employee or other person facts respecting employment or hiring by any employer or from persuading or trying to persuade, by fair or reasonable argument, without unlawful threats, intimidation, or other unlawful acts, such person not to make or renew any contract. Sec 4 stipulates that no trade union nor its officers or members shall be enjoined or be liable for publishing information with regard to a strike or lockout or labour dispute or for warning workmen or others not to seek employment in the locality affected by the dispute nor to purchase or consume products produced by the plant during the dispute.

Other acts restrained by both injunctions were causing a nuisance adjacent to or in the vicinity of the said premises, and in particular from conduct likely to attract groups of persons adjacent to the said premises or likely to deter persons with peaceful objects from approaching, viewing or entering the said premises of the Plaintiff, and from molesting, threatening or intimidating

the Plaintiff's patrons, tenants, officers, servants or agents or members of the public in general, and from discouraging or preventing the members of the public patronizing the business of the Plaintiff carried on on the said premises. . . . and from in any manner deterring or attempting to deter persons with peaceful objects from approaching, viewing or entering the said premises of the Plaintiff.

Southam Publishing Company Ltd. v. Vancouver Typographical Union Local No. 226 et al. Supreme Court of British Columbia, July 30, 1946.

Ontario Court Allows Appeal from Damages Award to Tenant for Injuries Sustained While Assisting Landlord's Agent in Construction

On October 10, 1946, the Ontario Court of Appeal allowed with costs the defendants' appeal from a judgment of Wilson J. after a trial without a jury, awarding the plaintiff damages for injuries sustained while assisting in construction work on rented premises.

The defendants were husband and wife, the wife being the owner of the premises rented to the plaintiff. The wife agreed to the plaintiff's request that an addition be built to the dwelling and put her husband who had had experience in construction in charge of the work. On one occasion, at the husband's request, the plaintiff left his factory work to help in constructing the roof. While descending, he stepped on a board which had been insecurely nailed to the rafters by the husband, and fell to the ground. The trial judge found the husband guilty of negligence and held him liable as agent and the wife as principal, awarding damages of \$5,271.75 and costs.

On appeal, Mr. Justice Hogg held that the relationship of master and servant did not exist between either of the defendants and the plaintiff at the time of the accident. That being the case, the Workmen's Compensation Act did not apply nor the common law governing master and servant. A contract of hiring could not be presumed where the circumstances tended to rebut such a presumption. Among such circumstances in the present case were the facts that the plaintiff lived in the house and there was no evidence of any payment to be made for his services. His Lordship did not think that it was open to the Court to speculate as to the relationship between the parties in respect of the job or to assume that remuneration of any kind was to be given to the plaintiff.

As regards negligence, he considered that, while the premises as a whole were occupied

by the tenant, for the purposes of repairs to the roof that particular part of the premises was at the time of the accident in the possession and under the control of the husband. The plaintiff might therefore be regarded as having the same relationship to the husband as an invitee to an occupier. He would not be entitled to find a state of positive safety but would be entitled to warning of any unusual danger. The evidence showed that the plaintiff had some knowledge of carpentry. The board in question was in plain and open view. There was evidence that a person could get down safely by other means. His Lordship thought that the appeal should be allowed and the action dismissed, with costs of the trial and the appeal.

Mr. Justice Roach, dissenting, would have dismissed the appeal with costs. He considered that the trial judge was right in finding that the husband was the agent of the wife. He further thought that the wife, through the agency of her husband, had employed the plaintiff under an express contract of hiring although the amount of wages to be paid was not expressly stated. On other occasions the plaintiff had been paid for casual work done for one or other of the defendants. He was losing wages he would otherwise be earning and it would be unreasonable to assume that in this case he was to do the work without being paid.

Part I of the Ontario Workmen's Compensation Act did not apply since it does not apply to a casual worker employed otherwise than for the purposes of the employer's trade or business, but Mr. Justice Roach was of the opinion that Part II was applicable and the plaintiff, by virtue of Sec. 121, had a right of action against the wife as his employer. As His Lordship interpreted Sec. 120, casual workers employed for the purposes of the employer's trade or business were not within Part II but those employed otherwise who were excluded from Part I were under Part II. The plaintiff's employment at the time was of a casual nature and his employer was merely a housewife, having no trade or business. On the assumption that there was negligence on the part of the husband, Mr. Justice Roach considered that the plaintiff, in addition to his right under the Workmen's Compensation Act, Part II, had also a cause of action at common law against the husband. *Kent v. Bell and Bell* (1946) Ontario Weekly Notes 794.

*Order to Prohibit Magistrate Hearing
Picketing Charges Denied by
Ontario Court*

On July 25, 1946, Mr. Justice Wells in the Ontario High Court of Justice dismissed an

application for a writ prohibiting a magistrate from proceeding with the prosecution of two men charged with picketing illegally.

The accused, officials of Local 811 of the International Union of Mine, Mill and Smelter Workers, were charged with "watching and besetting", contrary to Section 501 of the Criminal Code, the premises of the Anaconda American Brass Company in North Toronto. The information was laid by an officer of the Ontario Provincial Police and proceedings instituted by the Ontario Attorney General as a test case. The Crown elected to proceed summarily.

On July 15, when the accused appeared in magistrate's court, their counsel gave notice of a motion in the Supreme Court of Ontario for an order prohibiting the magistrate from proceeding with the hearing on the ground that the information was bad in form and failed to comply with the provisions of the Criminal Code. The magistrate adjourned proceedings until the motion for a writ of prohibition had been disposed of by the Supreme Court.

Mr. Justice Wells overruled three objections advanced on behalf of the applicants, namely; (a) that the information was not suitably specific and did not disclose or allege any conduct which made besetting or watching an illegal offence, (b) that it contravened the provisions of the Criminal Code in that it alleged more than one offence, and (c) the magistrate was disqualified because of an observation made by him in an earlier picketing case arising out of the same dispute which indicated a bias which would preclude a proper trial. The defence objected also to the propriety of having the information laid by an inspector of the Ontario Provincial Police and prosecution, in effect ordered by the Attorney General while at the same time having the case tried by a Crown official in the person of a magistrate.

In rejecting these arguments, the Court held that the charge as laid was clearly within the jurisdiction of the magistrate and that prohibition is only available if the lower court is exceeding or acting outside its jurisdiction or to compel it to exercise its true functions. If the magistrate makes a wrong decision there is a right of appeal from him, but his error is not a ground for granting a writ of prohibition. In the Court's opinion there was nothing illegal in the laying of an information by a police officer in the course of his duty. As to the form of the information, that is within the jurisdiction of the magistrate's court before which it was brought. The remarks of the magistrate in a previous case had nothing to do with the case under consideration nor did the Court find anything

contained in them which would justify any allegations of bias. As regards the criticism by defence counsel of the Crown's election of summary proceedings instead of proceeding by way of indictment before a judge and jury, Mr. Justice Wells pointed out that it was quite clear from Section 501 of the Criminal Code that the Crown was entitled to proceed summarily.

It might be noted that in 1934 Sec. 501 was amended to omit the words, "at the option of the accused", which were inserted in 1905 to ensure that the accused had the option of trial before a magistrate or before a judge and jury.

On resumption of the case in the magistrate's court, the accused were found guilty on August 12 and the maximum penalty of \$100 fine or three months' imprisonment was imposed. *Rex v. Doherty and Stewart*. (1946) Ontario Weekly Notes 752.

Supreme Court of Canada Rejects Appeal of Longshoremen's Union Local Against Damages Award

On October 22, 1946, the Supreme Court of Canada dismissed with costs, in an unanimous judgment, the appeal of Montreal Local 375 of the International Association of Longshoremen against the award of damages to three of their former members who were expelled in 1939 for belonging to a rival union, the National Independent Union of Longshoremen.

The respondents' action for damages against the Local was based on the allegation that they had been illegally expelled and therefore unable to obtain work during the 1939 navigation season. The trial judge, Mr. Justice Cousineau of the Montreal Superior Court, dismissed the action on December 20, 1943, but the Court of King's Bench on May 31, 1945, reversed his decision and awarded damages of \$1,200 (L.G. 1945, p. 1536).

The Supreme Court, in examining the by-law of the Local on which the resolution of expulsion was based,

Any member who without permission from the Association becomes a member of another Association of Longshoremen in the Port of Montreal will be expelled from this Association,

pointed out that the words "fera partie" in the French text and the English "becomes" both imply future action. The by-law, therefore, threatened with expulsion only those who in the future became members of another association. The prohibition was evidently intended to prevent members of Local 375 joining another association, but, in the Court's opinion, did not apply to workers who, when

the by-law was passed, were already members of the National Independent Union. The Supreme Court agreed with the view of the Court of King's Bench that the by-law "merely prohibits any person joining any rival association after the coming into force of the by-law."

As regards the argument of the appellant union that the respondents should have submitted their case to the union in accordance with the union's procedure for dealing with aggrieved members the Court stated that the plaintiffs had not brought an action for reinstatement in the Association but for damages resulting from an illegal act on the part of the union, one contrary to the union's constitution. *Association Internationale des Débardeurs, Local 375, v. Dussault and Others*, Supreme Court of Canada, October 22, 1946.

House of Lords Upholds Decision that Damages not Recoverable from Firm for Injury to Non-Employee without Negligence

On October 19, 1946, the House of Lords unanimously dismissed an appeal of a plaintiff who had been awarded damages for personal injury sustained in an explosion in a factory. The Court of Appeal, whose decision was confirmed, had reversed that of the lower Court and allowed the appeal of the defendants.

The plaintiff-appellant was an employee of the Ministry of Supply in an ordnance factory in which the respondent firm as agents for the Ministry carried on the business of filling shell-cases with high explosives. The appellant's duty was to inspect the filling of the cases and her work required her (although she would have preferred and had applied for other employment) to be present in the shell-filling shop. On August 31, 1942, an explosion occurred in which she was injured. The question was whether the respondent firm, by whom the appellant was not employed, were liable to the appellant in damages even though no negligence was averred or proved against them.

Lord Simon, in his opinion, said the trial judge considered that the case was governed by *Rylands v. Fletcher* (1866) and had held that the respondent firm were liable on the ground that they were carrying on an ultra-hazardous activity and so were under a "strict liability" to take successful care to avoid causing harm to any persons on or off the premises. The Appeal Court, on the other hand, held that a person on the premises, not an employee, had no cause of action where there was no proof of negligence. Further the Court contended that the doctrine of *Rylands*

v. Fletcher did not apply unless there was an escape of a damage-causing thing from the premises and damage was caused outside. "Escape" meant escape from a place where the defendant had occupation of, or control over, land to a place outside his occupation or control. "Keeping a thing in" did not mean preventing an explosive substance from exploding but preventing a mischievous thing from escaping from the area occupied or controlled by the defendant. In the present case, there was no "escape".

With this interpretation Lord Simon agreed. However, the appellant, who was in the factory in pursuance of a public duty, was in the same position as an invitee. The respondent-firm, managers of the factory as agents of the Ministry, had the same responsibility to an invitee as an ordinary occupier in control of the premises. That the work required special care was a reason why the standard of care should be high, but it was no reason for saying that the occupier was liable for resulting damage to an invitee without any proof of negligence. *Read v. J. Lyons and Co., Limited*, *The Times*, October 19, 1946.

Action for Damages for Injury Barred when Employer is the Crown

On November 12 the English Court of Appeal dismissed an appeal by a woman who was injured on the premises of a Royal ordnance factory where she was employed. The County Court judge had decided that the plaintiff had failed to prove the defendant guilty of the common-law duty of an occupier to keep his premises in a safe condition or, alternatively, of a breach of statutory duty under the Factories Act, 1937.

The merits of the action were not considered by the Court of Appeal. The appeal was dismissed on the ground that the superintendent of the Royal ordnance factory was merely a defendant nominated to appear on behalf of the real occupier of the factory, the Ministry of Supply.

The question of defendants nominated to represent the Crown came before the House of Lords in May, 1946, in *Adams v. Naylor*, an action for damages for "war injuries". The action was dismissed, being barred by the Personal Injuries (Emergency Provisions) Act, 1939, but in this case the House of Lords expressed disapproval of the practice which had grown up over many years by which Government Departments allowed actions to proceed against some person named as their representative, although that named person was not in any way concerned in causing the injuries complained of. The practice was

common in the Common Law Courts and also in the Admiralty Division. The decision of the House of Lords was given after the proceedings in the case involving the Royal ordnance factory had been started but the Court of Appeal considered themselves bound by the principles laid down by the House of Lords.

In *Adams v. Naylor*, Viscount Simon had observed:

The claim is a claim in tort, and since such a claim cannot be made directly against the Crown it is customary to make it against the servant of the Crown whose fault will justify a personal action against him, in the hope, or with the promise, that, if the action succeeds, public funds will be used to pay the damages and costs awarded against the defendant The Courts before whom such a case as this comes have to decide it as between the parties before them, and have nothing to do with the fact that the Crown stands behind the defendant. For the plaintiffs to succeed, apart from the statute, they must prove that the defendant himself owes a duty of care to the plaintiffs and has failed in discharging that duty.

On the same point, Lord Thankerton emphasized the need for legislation concerning proceedings against the Crown:

No one who has experience of these matters will doubt that legislation on the subject of proceedings against the Crown and particularly with regard to tortious acts committed by its servants is long overdue. It is nearly 20 years ago that the protracted labours of a committee appointed by Lord Birkenhead, whose terms of reference were modified by his successor Lord Haldane, resulted in the production of a draft Bill covering the whole field. Its provisions may not be in all respects satisfactory; at least, they would form the basis of discussion.

The Court of Appeal, through Lord Justice Scott, also pointed out the need for legislation on this matter:

There was, therefore, a very strong reason for legislation allowing actions of tort against the Crown. With the complexity of modern business carried on by Government departments and the great increase in commercial concerns owned by the Government, it was a crying evil that legislation to remedy the position should not be passed by Parliament. He wished to express his opinion as strongly as possible that it would be a crying wrong if the necessary legislation was not introduced at an early date. *Royston v. Camvey*, *The Times*, London.—November 12, 1946.

English Court Refuses Interim Injunction Restraining London Passenger Transport Board from Applying "Closed Shop" Principle

An application of five employees of the London Passenger Transport Board, a public corporation, for an interim injunction, restraining the Board from making it a condi-

tion of their employment that they should join the Transport and General Workers' Union was refused by Mr. Justice Wynn-Parry in the High Court on September 19, with costs. The motion was made in an action for such an injunction, also for injunctions ordering the defendant to withdraw any such condition and restraining them from dismissing the plaintiffs, as well as for a declaration that any such condition of employment was void and of no effect. As the defendants would not agree to postpone giving effect to the notices of dismissal to enable the plaintiffs to prepare their case, the plaintiffs found it necessary to apply for the interim injunction to prevent such dismissal.

The applicants' case was that before they were employed by the Board, it was either a term of their contract with their previous employers, whose undertakings were transferred to the Board, or a recognized practice, that an employee should not be required to join a trade union, and that he should not be liable to be discharged except for misconduct, age, ill-health or reduction of staff. The plaintiffs contended that these terms had become terms of their employment with the Board.

As regards the granting of an interim injunction before the trial the plaintiffs' counsel argued that he was not attempting to set up a general legal principle applicable to all employers and employees but that in this case it should be granted since the plaintiffs were threatened with dismissal and, even if they agreed to join the union, there was no assurance that the union would accept them as members.

The Court agreed that it had not formed any part of the plaintiffs' contracts with their previous employers or with the Board that they should be required to join a union. It followed that if the Board wished to insist that every employee should join a particular union, they must first terminate the employment of those who were not willing to do so and find others to take their places. This was what the defendants had stated that they intended to do. With the question of the ethics of the defendants' policy, the Court had nothing to do. With the plaintiffs' contention that it would involve a breach of contract, the Court considered it undesirable to deal since this would be the main question at the trial and on the answer would depend whether or not the plaintiffs were entitled to damages.

There was a well-established principle that the Court would not enforce specifically a contract for personal service. It appeared from the observations of Lord Lindley in *Whitwood Chemical Company v. Hardman* (1891) that for such an extraordinary remedy

as an injunction to be granted in a case of an agreement for personal service, which was assumed had been or was to be broken, the onus was on the plaintiff to show that his case fell within some recognized exception to the general rule that the Court would not decree specific performance of a contract for personal service. A recognized exception must be one in which the Court could effect some substantial result by giving the party claiming it some substantial relief. In this case any injunction granted could at the most be only of a very limited nature as regards the period during which it would be effective. If giving effect to the notices of dismissal constituted a breach of contract, the remedy was in damages. *Keetch and others v. London Passenger Transport Board*. The Times Law Report, September 19, 1946.

U.S. Supreme Court Refuses to Review Decision that Hours Worked Include Time Spent in Preparation

The United States Supreme Court has denied a petition for a rehearing of the Mt. Clemens Pottery case (L.G. 1946, p. 999) in which the Court ruled that time spent in walking to work-benches after punching the time-clock and in other preliminary activities at the work-place such as putting on work-clothes and preparing equipment and tools should be counted as hours worked for overtime purposes under the Fair Labor Standards Act. In so ruling the Court held that "work" within the meaning of the Act.

involves exertion of a physical nature, controlled or required by the employer and pursued necessarily and primarily for the employer's benefit.

Anderson et al v. Mt. Clemens Pottery Co., 18 Labor Relations Reporter, 1395.

Texas Supreme Court Awards Damages for Contract Breach by Wrongful Expulsion from Union

In an action against the International Printing Pressmen and Assistants' Union of North America in the Texas Supreme Court on July 17, 1946, a union member was awarded damages for wrongful expulsion from a local. A majority decision, four justices dissenting, reversed the judgment both of the trial Court and of the Court of Civil Appeals. The jury had been in favour of awarding the plaintiff actual damages but not exemplary damages but the trial Court, notwithstanding the jury's verdict, gave judgment for the defendant union. The Appeal Court reversed the judgment of the trial Court but remanded the cause with

instructions to enter judgment for the plaintiff on the verdict, and to proceed thereafter as though judgment had not been entered for the defendant. The Supreme Court held that the Appeal Court, after properly reversing the trial Court's judgment without a verdict, should have disposed of the whole matter.

The plaintiff was an experienced pressman who had been a member of the local union for over 10 years. The International Union's constitution requires charges against a member to be presented to the local in writing with proper details and to be heard by a trial committee of five members which has to give the accused five days' notice. The committee's report as to the guilt or innocence of the accused must be presented at a regular meeting of the local and voted on in the manner set out in the constitution. If the accused is found guilty, the punishment must be decided by vote. Further, the constitution provided for an appeal to the president, the officers of the union, and then to the next convention of the union. Resort to the courts was prohibited until the right of appeal had been exhausted.

On June 26, 1940, the accused was notified verbally that he had been charged with slandering the union. No written charges were laid. He failed to appear at the trial which was held on one day's notice. The trial committee recommended that the plaintiff be suspended for 30 days and fined \$25. Thereupon the union, without a vote, treated the plaintiff as a suspended and fined member. Since there was an agreement between the union and the *Fort Worth Press*, the plaintiff was notified that he could no longer hold his job.

The plaintiff was finally expelled in October, 1940, after the local's secretary had refused to accept the arrears of dues and to give a union card unless he paid the fine assessed by the trial committee. From that time he had not been able to secure a job as an experienced pressman and at the time of the trial was acting as a night watchman at low pay. The Supreme Court held that the plaintiff's expulsion was illegal and void.

As regards the appeal to the Courts before exhausting the machinery provided by the union, it was pointed out that Texas Courts had settled that in such circumstances an action could be maintained for damages for wrongfully depriving a union member of his rights.

The Court rejected the defendant's main argument that the International Union was not responsible for the acts of the subordinate

union in expelling the plaintiff nor for that of the secretary in refusing to recognize him as a member. It pointed out that the constitution of the International required all locals to obey the directions of the International, its constitution and by-laws take precedence over regulations of the local unions and lay down the mode of trial and the manner in which a member may be fined or expelled. Thus the local union is the agent or representative of the International and the International is liable for its actions even though it had no actual knowledge of them, did not direct them or thereafter ratify them. In this case, ratification was to be found in a letter of the International president to the plaintiff refusing any further consideration of the case.

In regard to the trial Court's opinion that the action, based on an act of October 15, 1940, was barred after two years, this was founded on the view that the action was one in tort. If the action arose out of contract, it was barred only after four years. Generally speaking:

actions in contract and actions in tort are to be distinguished in that an action in contract is for the breach of a duty arising out of a contract either express or implied, while an action in tort is for a breach of a duty imposed by law.

In the opinion of the Appeal Court the action arose out of the contract between the union and its members which its constitution and by-laws constitute.

With respect to the International Union's contention that even though the constitution and by-laws constituted a written contract, they did not contain any promise to do the things for the non-performance of which the suit was brought, and therefore the suit was not within the statute of limitation, the Court ruled that it was sufficient

if the obligation or liability grows out of a written instrument, not remotely but immediately, or if the written instrument acknowledges a state of facts from which, by fair implication, the obligation or liability arises.

Although no express promise is contained in union laws, there is an implied obligation to allow members to remain as such and to enjoy union benefits so long as they meet their obligations.

The Court therefore ruled that the international union was liable for damages arising from a breach of contract.

The Justices who dissented from the majority opinion, believing that the action was one in tort and not contract, set out their views:

A person's right to use his own labor in any lawful employment is described by an eminent authority as one of the first and highest of civil rights. "It is a part of every man's civil rights that he be left at liberty to refuse business relations with any person whomsoever. . . . It is also his right to have business relations with anyone with whom he can make contracts, and if he is wrongfully deprived of this right by others, he is entitled to redress." . . . It follows therefore that any violation of that right is a breach of a legal duty rather than a breach of contract. . . . If he elects, he may contract with others that as a member with them of a labor union he will work only under the terms and conditions prescribed in the constitution and bylaws of the union and that if, in the manner therein prescribed, he is adjudged guilty of violating that constitution and bylaws, he will thereby circumscribe or forfeit altogether his right to dispose of his own labor as he chooses. . . . It

follows that so long as the union acts under that contract in limiting the right of a member to work, it is guilty of no breach of legal duty, because he has contracted the right away; but if it steps outside the bounds of the constitution and bylaws to interfere with his common-law, natural or civil right to work it is guilty of a breach of legal duty rather than a breach of contract, because he has not contracted that right away. . . . In this case everything the trial committee did was void because they were acting wholly without the constitution and bylaws of the union, hence it offered no limitation arose by virtue of the agreement of the whatever on Smith's right to work; so the majority opinion is patently wrong in stating that "all the rights for which he seeks redress parties." . . . *International Printing Pressmen and Assistants' Union of North America v. Smith*, July 17, 1946, 18 Labor Relations Reporter 2345.

Strikes and Lockouts

Strikes and Lockouts in Canada During November, 1946

DURING November, 1946, the time loss due to strike activity in Canada declined by more than 360,000 days as compared with the previous month and by more than 388,000 days as compared with the same period a year ago.

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

Preliminary figures show 18 strikes in existence during November, 1946, involving 8,166 workers, with a time loss of 33,890 man-working days, as compared with 27 strikes in October, 1946, with 32,919 workers involved and a time loss of 393,296 days. In November, 1945, there were 24 strikes, involving 31,054 workers, with a time loss of 422,673 days.

Preliminary figures for the first eleven months of 1946 show 200 strikes and lockouts, involving 135,538 workers, with a time loss of 4,496,620 man-working days. For the same period last year there were 190 strikes, with 93,414 workers involved and a time loss of 1,195,801 days.

Of the 18 strikes recorded for November, three were settled in favour of the employers, four were compromise settlements and six were indefinite in result, work being resumed

pending final settlement. At the end of the month five strikes were recorded as un-terminated, namely metal miners in British Columbia, compositors, etc., at Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C., gold and copper miners and smelter workers at Noranda, P.Q., wood products factory workers at Prince Albert, Sask., and ammunition depot workers at Renous, N.B.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. A strike of bakery workers at Halifax, N.S., which commenced on February 11, 1946, has not been declared terminated.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Establishments	Workers		

Strikes and Lockouts in Progress Prior to November, 1946.

LOGGING— Logging and lumber camp workers, Timmins and the Lakehead; Northern Ontario.	18	5,000	10,000	Commenced October 11; for a union agreement providing for increased wages and improved camp conditions; terminated November 2; conciliation, provincial; compromise.
MINING— Metal miners, British Columbia.	11	500	5,000	Commenced July 3; for increased wages, reduced hours and other conditions; un-terminated, partial return of workers.
MANUFACTURING— <i>Printing and Publishing—</i> Compositors, etc., Winnipeg, Man.	2	70	800	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; employment conditions no longer seriously affected by November 30; indefinite.
Compositors, etc., Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.	5	75	800	Commenced May 30; in sympathy with strike of compositors at Winnipeg, Man., commencing November 8, 1945; un-terminated.
<i>Miscellaneous Wood Products—</i> Wood veneer factory workers, Saint John, N.B.	1	250	2,500	Commenced October 16; for a greater increase in wages than approved by RWLB (3); terminated November 12; return of workers pending reference to NWLB (3); indefinite.
<i>Metal Products—</i> Silverware factory workers, Toronto, Ont.	Commenced August 20; protest against alleged failure to negotiate a union agreement; terminated August 20; IDI Commissioner ruled that dismissal of the 33 workers involved did not show evidence of union discrimination; in favour of employer.
TRADE— Fish handlers, North Sydney, N.S.	1	(4)50	425	Commenced October 23; for increased wages; terminated November 15; return of workers pending further negotiations; indefinite.

Gypsum plant workers, Hillsborough, N.B.	1	130	900	Commenced November 12; for increased wages; terminated November 19; negotiations; compromise.
CONSTRUCTION—				
<i>Buildings and Structures—</i>				
Construction workers, Toronto, Ont.	1	70	70	Commenced November 18; inter-union dispute over working with members of another union; terminated November 18; return of workers pending further negotiations; indefinite.
Steel erectors, Toronto, Ont.	1	7	7	Commenced November 22; inter-union dispute over working with members of another union; terminated November 22; return of workers pending further negotiations; indefinite.
SERVICE—				
<i>Public Administration,—</i>				
Ammunition depot workers, Renous, N.B.	1	124	2,480	Commenced November 7; for the same wage rates as paid at Bedford Basin, Halifax; un-terminated.
Town labourers, Lunenburg, N.S.	1	13	26	Commenced November 13; for a union agreement providing for increased wages, reduced hours, vacations with pay, etc.; terminated November 14; return of workers pending certification of bargaining agency; in favour of employer.

(1) Preliminary data based where possible on direct reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) RWLB—Regional War Labour Board; NWLB—National War Labour Board.

(4) 58 indirectly affected; (5) 204 indirectly affected; (6) 170 indirectly affected.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The *British Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in September, 1946, was 177, and 14 were still in progress from the previous month, making a total of 191 during the month. There were 41,500 workers involved and a time loss of 188,000 working-days was caused.

Of the 177 stoppages which began during September, 17 arose out of demands for advances in wages; 48 over other wage questions; four on questions as to working hours; 28 on questions respecting the employment of particular classes or persons; 70 on other questions respecting working arrangements; and 10 were over questions of trade union principle.

Australia

Figures for the first three months of 1946 show 195 industrial disputes which directly involved 40,208 workers. The time loss for workers directly and indirectly involved was 170,964 days.

United States

Preliminary figures for October, 1946, show 450 strikes and lockouts beginning in the month, in which 290,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 4,500,000 man-days. Corresponding figures for September, 1946, are 450 strikes and lockouts, involving 380,000 workers, with a time loss of 5,000,000 man-days.

Prices

Prices, Retail and Wholesale, in Canada, November, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

WITH reference to the chart appearing on page 1847 of this issue, it is interesting to compare the behaviour of the cost-of-living index during the recent wartime period with that of 1914 to 1918. In 1918, the index was 50 points above its pre-war standing, while in 1945, the index was less than 20 points above its pre-war standing. The index is constructed upon the same principle for both dates, so that it reflects the greater incidence of price changes in the first war, as compared with the resistance to change in the more recent period. It also affords a measure of the success of recent wartime price control. In the past, the greatest upward pressure in prices has occurred not during wars, but during the first year after them. The chart shows that the cost-of-living index rose a further 40 points from early in 1919 to mid-1920. The effects of this inflation upon fixed income recipients and upon the real value of Victory bonds were serious. This inflation also created numerous maladjustments in the structure of prices, not to mention a retardation of consumer purchases of end products, which contributed to the ensuing depression.

The recent period of reconversion and reconstruction has presented a quite different picture. Price control has to a large extent withstood the extra strains of the first post-war year. But various pressures have been working themselves out, mainly without showing themselves in inflated or maladjusted prices. The index charted on the cover, as well as the subsequent detail with respect to individual prices and group indexes, will show whether or not this continues to be the case during the next six months.

Cost of Living

The Dominion Bureau of Statistics cost-of-living index advanced from 126.8 on October 1 to 127.1 on November 1, 1946. Moderate price increases were widely scattered, with five of the six budget group indexes recording gains. The food series moved from 146.5 to 146.6 on small increases for eggs, meats and

fish, and fruits. Vegetables averaged slightly lower. The fuel and light index rose from 107.3 to 108.6 as western coal prices moved higher. Clothing increased from 130.2 to 131.1, and home furnishings from 128.8 to 129.2. Advances in the hospital and periodical sub-groups changed the miscellaneous index from 113.9 to 114.1. Rents remained at 113.4.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted, although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these

figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between

\$600 and \$2,800 in 1938. The average expenditure was \$1,413.90 divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.59; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527 became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Price Control in Canada*.

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.
 (b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses. (c) Revised.

Wholesale Prices

Table V represents several comparisons. During the recent war period, the rate of increase in the general wholesale price index was much less rapid than in the same period of World War I. In the rapid inflation following World War I, prices continued to advance, with the result that they were two and one-half times their pre-war level by May, 1920. By contrast, they have risen less than one-half, from 1939 to date. Moreover, the slow rate of increase has continued during the difficult period of reconversion, so that the general index is now only 6 per cent higher than it was a year ago.

Among the various components of the general index at the present time, the leaders consist of Animal Products, Wood Products and Iron and Steel Products. They are leaders with respect to a 1926 base. But if 1939 is taken as base, Iron and Steel Products drop out,

being replaced by Vegetable Products. Thus, the farm group and the lumber group are the two that have shown the largest increases during the past seven years. Their pre-war standings may have been unduly low, so that large increases may have been necessary to restore their proper position. But on the other hand, restoration may have been considerably exceeded, no matter what base in the past is chosen from which to start. These two groups have never been as well off in the past twenty years as they are now. At the present time their relative well-being could not be considered as a maladjustment in the price structure, in the sense that this leads to inability of purchasers to take the available output at existing prices. It is more of the nature of an inducement to expanded output, to meet the known shortages that exist in these fields at the present time.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at September 30, 1946

IN the accompanying tables, which have been prepared by the Department of National Health and Welfare, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating. Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

The administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935. By a second Order in Council, P.C. 5942, dated September 7, 1945, the administration was transferred from the Department of Finance to the Department of National Health and Welfare from September 1, 1945.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

* Amended by Orders in Council P.C. 6367, August 10, 1943, P.C. 3376 and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

Labour and Industry in New Brunswick and British Columbia

New Brunswick

THE second annual report of the New Brunswick Department of Labour covers the fiscal year ending October 31, 1945. It is stated that the Department "endeavoured to render utmost possible assistance" in the rehabilitation of former members of the Armed Forces. This was evident especially in the matter of apprenticeship training. Other services administered by the Department included factory inspection, boiler inspection, examination and classification of stationary engineers, and conciliation and arbitration in labour disputes. Tribute was paid to labour and employers of the province for "the continuation of harmonious labour relations and for the consideration which each has shown for the other's problems".

New Labour legislation.—Legislative changes made during the year ending October 31, 1945 (to which reference was made in the November, 1945, issue of the *LABOUR GAZETTE*, pp. 1694-6) were:

(1) *An Act to Amend the Steam Boiler and Pressure Vessel Act.* Upon proclamation, this Act will provide for the appointment of boiler inspectors who will be under Departmental supervision and all fees paid to the Provincial Secretary-Treasurer. Previously boiler inspectors were licensed by the Board of Examiners and their licenses entitled them to inspect and certify uninsured boilers without supervision.

(2) *The Labour Relations Act, 1945.* This Act was designed to take the place of the Wartime Labour Regulations (P.C. 1003) when the latter became ineffective at the end of the war emergency period.

(3) *The Minimum Wage Act, 1945.* It is intended mainly to clarify the authority of the Minimum Wage Board to establish minimum rates of wages for both men and women employed in various industries.

(4) *An Act to Repeal the Labour and Industrial Relations Act.* When the Labour Relations Act, 1945 and the Minimum Wage Act, 1945, have been proclaimed they will take the place of the Labour and Industrial Relations Act (1938) which will be repealed by proclamation of *An Act to Repeal the Labour and Industrial Relations Act.*

Labour Relations.—In the administration of P.C. 1003 close co-operation was maintained between the Dominion and Provincial officials.

Before bargaining representatives were certified by the Board care was taken by the Provincial Board to see that they were properly elected by a majority of the employees affected and, in the case of a trade union, that the union acted with the authority of the majority of the employees affected and that the unit of employees concerned was one which was appropriate for collective bargaining. In cases where the parties, after bargaining in good faith, failed to agree, either might ask the Provincial Wartime Labour Relations Board to intervene. In such instances the matter was referred to the Dominion Minister of Labour for the appointment of a Conciliation Officer and, if necessary a Conciliation Board. In all, 13 cases of that nature are listed in the report as having been referred to a Conciliation Officer. In four of these, agreements were reached among the parties during the year; negotiations were continuing in three cases at the end of the fiscal year and in the other six a Conciliation Board had been appointed.

During the fiscal year 37 certifications were granted by the Provincial Wartime Labour Relations Board; two applications were withdrawn; there were 13 applications for intervention and conciliation; grievance procedure was prescribed by the Board in two cases; and 18 applications were dismissed.

Factory Inspection.—The Department's factory inspection services were extended during the fiscal year by the appointment of an additional factory and boiler inspector. This inspector is available to boiler operators in any portion of the province "at a reasonable fee payable to the Provincial Secretary-Treasurer". Practically all plants in the province were inspected at least once during the year and some were inspected several times. It is stated that conditions in the plants inspected were improving steadily with respect to proper safety-guards on machines, lighting, heating, ventilation and other similar matters; also, that much better attention was being given to the employment of properly licensed engineers and to annual boiler inspections. These improvements were reflected in improved employer-employee relations, in increased production, and in reduced accident rates—particularly in plants where safety committees had been established.

In plants in which the employees are organized into unions the factory inspectors were instructed to consult union committees as well as the employers. The provisions of the Factories Act were reviewed with them and any infringements of the Act respecting plant conditions were indicated. Wherever possible, a workers' and a company representative accompanied the inspector during the inspection of a plant and this was found to be an effective way to get practical results. For their part, the inspectors welcomed, and acted upon, practical suggestions.

During the year a total of 652 plants were inspected and 228 re-inspections were made. These plants employed 28,585 workers, of whom 20,143 were males and 8,442 were females.

There were 311 recommendations made by the factory inspectors as follows: to provide improved safety measures, 156; to have boilers inspected, 54; to have engineers procure proper licences, 48; to provide proper lunch rooms, 13; to instal seats for females, 11; to remove young people from hazardous occupations, 8; to reduce hours of labour for young people, 8; to dismiss children, 4; to improve ventilation, 4; to require females to wear proper hair guards, 3; to procure proper first aid kits, 2.

In the main, employers were found to be "very co-operative", but a few persisted in refusing to act upon the inspectors' recommendations. It is stated that a continuance of this unyielding attitude would leave no alternative but prosecution.

Steam Boiler Regulations and Inspection.—As of January 1, 1945 the New Brunswick steam boiler regulations were amended to provide that every person operating or having charge of a steam plant must have a valid first, second or third class stationary engineer's licence, according to his occupation and the boiler horsepower of the plant in which he was employed. Previously only one class of licence was issued regardless of the occupation of the holder or the boiler horsepower of the plant in which he was employed. Under the amended regulations, the holder of a first class licence may operate or have charge of a steam plant of any boiler horsepower. A second class stationary engineer shall be granted a second class stationary engineer's licence which shall authorize such person to have charge of a steam plant, the boiler horsepower of which is less than 600 and which shall authorize such person to operate a steam plant of any boiler horsepower. A third class engineer shall be granted a third class stationary engineer's licence which shall authorize such

person to operate a steam plant the boiler horsepower of which is less than 600.

During the year 1,338 stationary engineers' licences were issued by the Board of Examiners, as follows: first class licences without examination of candidates, 29; first class licences by examination, 10; second class licences without examination, 91; second class licences by examination, 34; third class licences without examination, 1,056; third class licences by examination, 118. The Board also issued 342 boilermen's licences—259 without examination of candidates and 83 after examination.

The number of licensed boiler inspectors in the province was increased to 12 during the year, two candidates having successfully passed the boiler inspector's examinations. A total of 195 uninsured boilers were inspected by licensed boiler inspectors during the fiscal year.

Apprenticeship Training.—Several conferences were held with representatives of the Canadian Construction Association and of the Trades Unions in Saint John with respect to apprenticeship in the several building trades. As a result the unanimous co-operation of all parties was obtained and a local Advisory Committee was set up for each trade. Each of these committees is composed of two members representing employers and two representing employees. The committees prepare local standards of apprenticeship, approve local candidates and local contracts of apprenticeship in the respective trades, assess and grant credits for trade experience gained by workmen in the Armed Forces, decide on the ratio of apprentices to journeymen, provide periodic trade tests and final examinations of apprentices and endeavour to enlist the co-operation of any other agencies in the province that might assist in a consultative capacity. The standards set up are subject to the approval of the provincial apprenticeship committee.

An agreement was completed with the Canadian Vocational Training Branch of the Federal Department of Labour and the Department of Veterans Affairs, regarding the acceptance of ex-members of the Armed Forces as apprentices and the granting of credits to them for previous training or experience. A large number of ex-service men were, it is stated, in training in the various trades, including the construction trades, at the Canadian Vocational Training Centres and, it was expected, would be available for employment early in the Spring of 1946.

Similar co-operative action had been commenced with the New Brunswick Automobile Dealers Association; also with management

and unions in certain pulp and paper establishments and in the textile industry.

Dominion-Provincial Matters.—The report states that relations between the Dominion and the Province in labour matters were conducted "with a high degree of co-operation and mutual understanding". The activities of the Regional War Labour Board, which administers the Wartime Wages Control

Order within the province is summarized as follows: total cases dealt with, 1,363. Mainly, these cases were applications submitted either by employees, employers, or both for wage increases to relieve gross inequalities or gross injustices. Other matters dealt with by the Board include: vacations with pay; overtime rates; pension and insurance plans; and night shift premiums.

British Columbia

With the cessation of hostilities in 1945, marked variations were prevalent in the trends of production and payrolls in British Columbia, according to the twenty-eighth annual report of the provincial Department of Labour covering the year 1945. Curtailment in many industries that had been geared to war production resulted in the 1945 estimated payroll total declining to \$371,625,927, "an apparent decrease of \$16,474,073 over the final estimated total of \$388,100,000 for 1944." However payrolls remained over double the pre-war total of \$165,683,460 in 1939.

The average weekly wage for all adult male wage-earners was recorded as \$38.50 for 1945, representing only a slight recession from the all-time high of \$38.70 established during the previous year. Eighteen of the twenty-five industrial groups showed increases in the payroll totals for 1945. The greatest increase was in the public utility group (up \$2,000,000), followed by food products manufacturing (up over \$1,500,000) and coast shipping (up \$1,000,000).

Conversion to peace-time requirements brought the greatest decrease in the shipbuilding industry (down over \$10,000,000), followed by miscellaneous trades and industries (decreased by over \$9,500,000), and metal trades (down almost \$2,000,000). Decreases were also noted in the construction industry (down over \$1,800,000), and coal mining (off \$400,000), while minor recessions occurred in paint manufacturing and cigar and tobacco manufacturing. The transitional shift from wartime employment to other fields of endeavour brought decreasing totals of both male and female workers in metal trades, shipbuilding, and other similar industries. On the other hand, increased employment totals were general in those industries progressing normally under more peaceful conditions. The average monthly employment high for all industries in 1945 was 132,220 in July of that year, compared with a high of 138,911 recorded in August of 1944. Average weekly hours of work continued to decrease throughout the year in most industries, the average for all employees dropping to 45.59 as against 46.02 for the preceding year.

Statistics of Trades and Industries.—The total number of firms reporting in time for tabulation in the annual report was 5,687 as compared with 5,044 in 1944, an increase of 643. These returns showed a total industrial payroll of \$276,336,872 for the year 1945. To this should be added returns received too late to be included in the above summary amounting to \$541,794; transcontinental railways (ascertained payroll) \$21,297,261; payrolls of additional services not included in the industrial survey (governmental workers, wholesale and retail firms etc.) \$73,450,000; making a total provincial payroll of \$371,625,927.

A comparison of payrolls for the years 1944 and 1945 by industrial classification follows:

	1944	1945
Breweries	\$ 2,214,874	\$ 2,789,221
Builders' materials	2,342,180	2,883,098
Cigar and tobacco manufacturing	12,474	12,325
Coal mining.....	5,330,371	4,904,871
Coast shipping.....	10,987,169	12,040,142
Construction	26,473,970	24,604,052
Explosives and Chemicals.....	4,019,643	4,047,719
Food Products.....	21,321,132	23,114,617
Garment-making	1,587,579	1,644,656
House furnishings.....	1,911,175	2,480,693
Jewellery manufacturing.....	364,625	419,776
Laundries, dyeing, etc.	2,732,092	3,107,163
Leather and furs, Manufacture of	1,051,061	1,168,011
Lumber industries.....	48,588,954	49,074,693
Metal trades.....	24,644,374	22,746,651
Metal mining.....	9,367,532	9,580,047
Miscellaneous	28,122,805	18,467,001
Oil refining.....	3,040,979	3,941,603
Paint Manufacturing.....	510,521	507,707
Printing and publishing.....	4,653,479	5,356,035
Pulp and paper mills.....	9,449,766	9,880,380
Ship building.....	52,618,098	42,370,186
Smelting and concentrating.....	6,444,645	6,596,640
Street railways, gas, water, power, etc	14,485,994	16,657,271
Wood manufacturing (N.E.S.)....	7,524,236	7,942,314

New Laws Affecting Labour.—Summaries of the following new provincial labour legislation are included in the report: (1) Annual Holidays Act; (2) Hours of Work Amendment Act, 1946; (3) Factories Act Amendment Act, 1946; (4) Male Minimum Wage Amendment Act, 1946; (5) Female Minimum Wage Act Amendment Act, 1946; (6) Shops Regulation and Weekly Half-holiday Act Amendment Act, 1946; (7) Workmen's Compensation Act

Amendment Act, 1946. (L.G., July, 1946, pp. 983-985).

Apprenticeship—The Director of Apprenticeship in his report stated that there were 1,794 apprenticeship contracts in force at the close of 1945. In addition, 68 youths were working as probationary apprentices on preliminary contracts. The Dominion and Provincial governments co-operated in the establishment in trades of ex-service personnel who had had little or no previous trade experience. Reference is made in the report to the apprenticeship contracts entered into in co-operation with the Canadian Vocational Training Branch of the Dominion Department of Labour, and employers who were willing to provide the necessary training facilities. During the few months in 1945 in which this arrangement was in effect, 110 ex-service men took advantage of it, and it was expected that the plan would become increasingly popular as the number of discharges from the Armed Forces increased.

Factory Inspection—During 1945, 2,500 inspections and re-inspections of factories were made. The Inspector of Factories noted the improvement that had been achieved in the matter of accident-prevention, attributing this to the advent of Workmen's Compensation legislation. "To-day, management of industry generally, regardless, of their classification realize that accident-prevention measures are necessary from a monetary as well as humanitarian point of view." It is stated that the Employees' Safety Committee is responsible for maintaining interest in accident-prevention. Periodical inspections are made of entire plant operations and measures are suggested to eliminate occupational hazards. As a result, the Inspector was able to report that "never in the history of this Department has there been such an acceptance of accident-prevention devices as in the past five years . . ."

Referring to conditions in factories, it is stated in the report that considerable advancement has been made. Mechanical exhaust systems for the removal of injurious dusts and gases have not only contributed to the better health of workers, but have been an important factor in good factory housekeeping. More attention was being given to designating by means of brightly coloured factory floor lines the areas which must at all times be kept clear for the free passage of materials produced in manufacturing. Requests for approval of the use of basement premises to house new or expanding industries had been received. It was felt however, that the expenditure for artificial lighting, air conditioning and sanitary conveniences would not be warranted, unless such premises were to be used more or less

permanently. For that reason, and also because of the probable ill-effects on the health of employees, these requests were not considered favourably.

Women and Children in Industry—Following the cessation of hostilities there was a marked falling off in the employment of women in both light and heavy industry. It was felt that some of the specialized wartime plants might be adapted for the production of consumer commodities in which women "will again form a large part of the personnel". It was pointed out that progressive management was introducing ten- to fifteen-minute rest periods morning and afternoon for their female workers. In addition, in order to relieve the monotony in the performance of repetitive mechanical tasks, employers were adopting some form of rotation, particularly for their female workers, so as to diversify employment.

The importance of women workers in the business and industrial life of the province was evident in the statistics for 1945. Returns were received from 8,061 employers of women and girls as compared with 7,289 in 1944. In the case of the former, 56,705 were over 18 years of age, or experienced and 2,471 were under 18 years or inexperienced. The corresponding figures for 1944 were 57,537 and 2,873. The total weekly wages paid women workers over 18 years, or experienced, in 1945, was \$1,169,916.37 as compared with \$1,234,084.11 in 1944, and the total paid women workers under 18, or inexperienced was \$27,971.96 in 1945 and \$33,618.20 in 1944. Average weekly wages paid the older, or experienced group in 1945 was \$20.63 and in 1944, \$21.45. The average weekly wage paid the younger, or inexperienced group was \$11.32 in 1945 and \$11.70 in 1944. The average hours worked per week was 39.94 in 1945 and 40.84 in 1944.

In considering requests for the employment of children in industry, attention was given to reports of probation officers, as well as to careful interviews with other school authorities and the parents concerned. Permits were issued subject to the conditions of the "Control of Employment of Children Act".

Welfare Equipment in Factories—It was reported that "each succeeding year has witnessed voluntary (employer) improvement" in the provision of sanitary conveniences, individual lockers, shower baths, dining rooms, etc. in industrial plants. It was stated also that employee retirement plans had been made effective in a number of plants during the year and others expected to complete provisions for them "in the near future".

Additional modern passenger and freight elevator equipment was installed in a number of plants throughout the province during the year. These complied with government standards with respect to safety devices and provided employment for several disabled war veterans as licensed elevator operators. During the year 1945, 1,007 licences were renewed and 475 temporary and 406 permanent licences were issued. A total of 1,522 inspections and re-inspections of freight and passenger elevators was made, and 28 plans and specifications of modern elevator equipment were approved.

Labour Disputes and Conciliation—During 1945, officials of the Industrial Conciliation and Arbitration Branch dealt with 737 cases. There were 651 applications for certification. Of these, 469 were granted and 81 rejected; applications withdrawn numbered 44. In all, 56 applications were being investigated at the close of the year. Six representation votes were ordered and taken. There were 49 investigations by

conciliation officers and 15 Conciliation Boards established.

There were 18 strikes during the year, which affected 6,810 employees with a total time loss of 69,595 working days. Of these strikes, seven were in the coal mining industry, which involved 3,089 employees with a time loss of 35,348 working days. Five strikes occurred in transportation, affecting 2,594 workers and a time loss of 25,044 working days. There were two strikes in the manufacturing industry, two in shipbuilding and one each in the construction and lumber industries. These affected a total of 1,127 workers and resulted in a total time loss of 9,206 working days.

Employees' Organizations—The Report shows a slight decline in the membership of employees' organizations from 110,045 in 1944 to 108,125 in 1945, but an increase from 617 to 636 in the number of organizations. In 1939 membership was 44,867, and the number of organizations was 380.

Co-operative Development in Saskatchewan

THE first annual report of the Department of Co-operation and Co-operative Development of the Province of Saskatchewan, reviews the work carried on by the divisions and sub-divisions of the Department for the twelve months ended April 30, 1945.

The Department was set up by an Act of the provincial legislature which was assented to November 2, 1944. From May 1, 1944, until November 2 of that year the Department had functioned as the Co-operation and Markets Branch of the provincial Department of Agriculture. On the latter date, the functions of the Branch, together with its staff, were transferred to the new Department. It is a natural development and an extension of the principles and practices laid down in the first Agricultural Co-operative Associations Act of Saskatchewan, passed by the legislature in 1913. That Act was based on the recommendations of the Agricultural Credits Commission of 1913. In 1914, the Co-operative Organization Branch was established as a Division of the Department of Agriculture. During the period from 1914 to 1944 the co-operative movement expanded steadily in Saskatchewan and, it is stated that the practices and principles followed by the Co-operation and Markets Branch, over a period of some 30 years, have been accepted by members and officials of co-operative organizations.

The report enumerates the duties and powers of the Department as provided by the Act (chap. 6, 1944) as follows:

5. The Department shall take such measures as the Minister deems advisable or as may be required by the Lieutenant Governor in Council for the encouragement generally of co-operation and co-operative development in the Province and in particular, but without limiting the generality of the foregoing, shall:

- (a) encourage and assist in the organization of co-operative enterprises among persons or groups who desire to provide themselves with or to market commodities or services or both on a non-profit co-operative self-help basis;
- (b) provide for such inspection and examination of the affairs of co-operative bodies as may be necessary to secure the due observance of and compliance with the requirements of all Acts relating to co-operation and co-operative development and any regulations thereunder;
- (c) institute inquiry into and collect, assort and systemize information and statistics relating to co-operation and co-operative development;
- (d) establish a research service for inquiry generally into the operation of co-operative enterprises and for the making of such investigation and analysis of economic, social and other problems as may be deemed advisable for the encouragement of new or improved methods or means of co-operative organization and development and, in particular, to study and report upon questions relating to:
 - (i) agricultural production and the processing and marketing of agricultural products;
 - (ii) industrial development, manufacturing and sale by wholesale;
 - (iii) credit, investment and business finance generally;
 - (iv) retailing of goods and services;
 - (v) community and other services;

- (e) disseminate information relating to co-operation and co-operative development in such manner and form as may be found best suited to encourage interest in the principles and practices of co-operation on a non-profit self-help basis;
- (f) issue from time to time such reports, circulars and other publications relating to co-operation and co-operative development as may be deemed advisable;
- (g) perform such other duties and provide such other services as may be designated by the Lieutenant Governor in Council.

Administration Services

It is reported that the co-operative movement in Saskatchewan continued to make steady progress during the fiscal year ending April 30, 1945. Returns were received from 876 co-operative organizations, with 2,109 places of business, having a total membership of 299,686 and total assets of \$71,114,544. The members' equity or net worth was \$34,275,037, while the total business done amounted to \$199,408,589.

It is stated that progress was particularly in evidence in connection with marketing associations, retail purchasing associations and credit unions. In 1944-45 the 514 marketing and purchasing co-operatives which reported in Saskatchewan had a combined membership of 241,444, the total assets were \$67,351,182 and the volume of business done by marketing, wholesaling and retail purchasing associations was \$197,997,712, although this includes a duplication of \$2,261,111 of livestock and forage crop sales. At the end of 1944, Saskatchewan had 163 credit unions with a membership of 20,988. The first credit union in the province was organized in 1937.

Steady progress was reported in all fields of the co-operative movement during the fiscal year. Reference is made in the report to the action of the Saskatchewan Co-operative Producers, Limited in collaboration with the two other Wheat Pools in lowering handling charges of grain by two cents per bushel. In the field of dairying, noteworthy progress was made in re-organizing the Saskatchewan Co-operative Creamery Association as a producer-owned co-operative, which when completed in 1946, is expected to be the largest dairy co-operative in Canada. The Saskatchewan Poultry Pool, Limited and the R.O.P. Co-operative Hatchery Marketing Association, Limited increased their volumes of business and it was expected that the Poultry Pool would soon be handling the greater portion of the poultry products marketed in the province. A new venture during the year was represented by plans of the Horse Co-operative Marketing Association, Limited to set up a plant for processing horse-meat to be shipped to the European

market. Similarly, progress was reported by the Saskatchewan Forage Crop Growers' Co-operative Marketing Association; the Saskatchewan Co-operating Honey Producers' Marketing Association; and the Saskatchewan Beekeepers' Co-operative Association.

The Saskatchewan Federated Co-operatives Limited, an amalgamation of Consumers' Co-operative Refineries and the Saskatchewan Co-operative Wholesale Society, served to consolidate co-operative wholesaling and manufacturing in the province. Progress was reported also in consolidating the position of Inter-provincial Co-operatives, Limited, as a buying agency for provincial co-operative wholesale organizations.

Other Co-operative Activities

Among other phases of co-operative activities mentioned in the report are (1) the revived enterprise of Canadian Co-operative Implements, Limited, following three years of inactivity during the war; (2) the expansion of the services made by retail co-operative purchasing associations; (3) the co-operative use of farm machinery to provide more complete co-operative farming services; (4) the development of co-operative community pastures and stock breeding associations; (5) the evolution of co-operative community centres as a means of providing facilities for public meetings, recreation, and other services in rural districts; (6) planning for the establishment of co-operative enterprises of special interest to women, such as community canneries etc.; (7) a growing interest in the establishment of cold storage locker plants; (8) the Co-operative Life Insurance Company established under the Saskatchewan Life Insurance Act and the Co-operative Mutual Benefit Association; (9) the development of trade on interprovincial and international bases; (10) the continuance of co-operative study groups and educational work carried on by the Extension Department of the University of Saskatchewan.

Included in the report is a summary of the findings of the Royal Commission on Co-operatives, appointed by the Dominion Government in November 1944, with Hon. Errol M. W. McDougall, a Judge of the Court of King's Bench of Quebec as Chairman. (L.G. January, 1946, p. 53).

Organization and Inspection Services

It is stated in the report that "it is the policy of the Government of Saskatchewan to provide from time to time such comprehensive legislation as may be needed by those who desire to organize in order to provide them-

selves with services of various kinds on a co-operative basis."

There are three general co-operative acts on the statute books of the province.

(1) The Co-operative Associations Act, which provides for the organization of associations for the purchase of goods and services. This provides for the organization of retail purchasing associations, rural electrification housing co-operatives, agricultural production services, etc., but does not provide authority for co-operative wholesale societies.

(2) The Co-operative Marketing Associations Act, which makes provision for the organization of associations for assembling, processing and marketing agricultural products and other natural resources. It also provides for marketing contracts, as well as organization with share capital or with membership fees and the creation of capital by means of deductions from the sale or resale price of products delivered to the association.

(3) The Credit Union Act, which provides for the organization of local co-operative savings and credit societies.

A number of co-operatives which are province-wide in their scope have been organized under special Acts of the Legislature. In addition, three co-operatives that are inter-provincial in their objectives have been incorporated under Dominion legislation. During the fiscal year ending April 30, 1945, 47 new co-operatives were incorporated under the Co-operative Associations Act and six were dissolved.

Research Services

The broad outlines of the research functions of the Department of Co-operation and Co-operative Development are listed in the report as follows:

1. To assist or conduct fundamental or basic research which will usually be of longer duration, and will likely involve co-operation with other Government Departments, both Provincial and Dominion, as well as with the University and other agencies.

2. To undertake specific research to assist in the legislative administration of various co-operative Acts and regulations.

3. To undertake specific research to assist groups of existing co-operatives, such as credit unions, marketing and purchasing co-operatives, or other service types.

4. To undertake specific advisory or exploratory research for individual co-operatives or groups of co-operatives when they are planning expansion, or when some new type of service is to be developed co-operatively.

5. To undertake to give a general advisory service, based on our own research, or that of other agencies, or based on published information.

6. To undertake the analysis of secondary data, based on figures and information compiled by others.

Numerous studies were undertaken during the fiscal year on various phases of co-operative production, marketing, purchasing and services, many of them involving much technical and analytical research. The results were being published as the individual studies were completed. In addition to research work carried out by officials of the Department, it was planned to offer prizes for these based on studies of co-operative problems, prepared by students at the University of Saskatchewan. Then too, the larger co-operatives were encouraged to perform research of a more general type in collaboration with the Department as well as joint studies with other government, university or independent agencies.

Business Transacted by Co-operatives

The total assets of all co-operative marketing organizations in 1944-45 amounted to \$58,539,333 and commodities having a value of \$174,197,051 were sold or marketed during the year. This does not include the operations of the Saskatchewan Co-operative Creamery Association, Limited, which was in process of re-organization as a co-operative. It is pointed out, however, that this association operated 25 branches and the volume of business done during the year exceeded eleven million dollars.

The financial results of co-operative wholesaling and manufacturing associations showed returns for a seven-month period in the fiscal year under review of \$6,838,629 from the sale or marketing of commodities. The total assets of these associations amounted to \$3,218,015.

Co-operative associations operating stores reported assets valued at \$3,769,519 and the returns from sales during the fiscal year amounted to \$11,045,445.

Co-operative associations handling farm supplies had total assets of \$1,824,315 and reported sales of a total value of \$5,503,938 for the fiscal year. Community Service Associations which included such services as community halls, club rooms, rest rooms, curling rinks and two theatres, were not permitted to pay patronage dividends or interest on shares. Any surplus of revenue over expenditure in the operations of these associations is used either for improving the facilities or in reducing the cost of services in subsequent years. A growing interest was reported in this type of co-operative activity, especially in the direction of organizing community centres in rural areas.

Report of the Canadian Government Delegates to the Twenty-eighth (Maritime) Session of the International Labour Conference, Seattle, June 6-29, 1946

OTTAWA, August 14, 1946.

The Honourable HUMPHREY MITCHELL, P.C.,
M.P.,
Minister of Labour,
Ottawa, Ont.,

SIR.—We, the undersigned, as delegates representing the Government of Canada at the Twenty-eighth (Maritime) Session of the International Labour Conference have the honour to submit our report on the proceedings of the Conference, in the following terms.

1. Location of the Conference

The Twenty-eighth Session of the International Labour Conference (Maritime Session) was held in the City of Seattle, State of Washington, United States of America.

2. Duration of the Conference

The meetings opened on Thursday, June 6, 1946, and concluded on Saturday, June 29, 1946. Plenary sittings were held to the number of nineteen, while a large number of committee meetings also were held. In the concluding week night sessions were resorted to, in order to expedite business.

3. Purpose and Scope

The general purpose of the Conference was to deal only with the social and employment conditions of seafarers, and to consider for approval certain proposed international instruments in relation to the said matters.

In general the instruments referred to seek to set up international minimum standards in regard to the condition of seamen, proposed for implementation by all maritime nations.

The establishment of these international minimums is desirable from two viewpoints: first, to raise living standards for seafarers, particularly in backward states, and second, to more nearly level international competition.

This point is important to Canada: the term "seafarer" or "seaman" for the purposes of this Conference relates only to sailors on ocean-going vessels. At no time was it proposed to include also the seamen on inland vessels, such as ply our Great Lakes waterway.

4. Composition of the Conference

It was open to all Member-States of the I.L.O. to send tripartite delegations, and invitations had been issued accordingly. The basis of representation was that usual for an I.L.O.

Conference, viz., four delegates, being two from Government, one from Employers and one from Workers. In addition it was open to each Government sending a delegation to provide advisers for each item on the Agenda, on the following basis: two from Government and one each from Employers and Workers.

Delegations attended the Seattle Conference from 32 countries, viz.: United States of America, Argentine Republic, Australia, Belgium, Canada, Chile, China, Cuba, Denmark Dominican Republic, Ecuador, Egypt, Finland, France, United Kingdom, Greece, India, Ireland, Italy, Liberia, Mexico, Netherlands, New Zealand, Norway, Panama, Peru, Poland, Portugal, Sweden, Turkey, Venezuela, Yugoslavia.

Except for a few of the smaller nations with a lesser interest in maritime affairs, those countries represented sent complete delegations—and in the case of the more important maritime nations the total delegation in each case reached rather imposing numbers. Thus, in addition to its two Government delegates, the Government of the United States sent two substitute delegates and 12 Government advisers; the United States' shipowners' delegate was supported by 11 advisers, while the United States' workers' delegate was supported by 8 advisers, bringing the total of the United States' delegation (without secretarial assistants) to 38. Britain, in addition to the four delegates, included in her delegation one substitute Government delegate, 8 Government advisers; 11 shipowners' advisers and 11 seafarers' advisers—giving a total delegation (exclusive of secretarial assistants) of 35.

In fact in the case of even the smaller maritime nations, the delegations were sizable; for example in the case of the Scandinavian countries the total of the different delegations ranged from 10 to 15.

Even though some few countries are not I.L.O. members, it is still true that all leading maritime nations sent delegations, a fact strikingly illustrated by the statement that over 98 per cent of the world's tonnage of ocean-going vessels was represented by the nations present.

5. Voting System

At Plenary Sessions each delegate was entitled to the usual one vote—giving two for Government and one each for employers and workers in the case of a full delegation.

A substitute, chosen from among advisers, might vote in the absence of a delegate.

In Committee the Riddell system of voting was used, this being designed to equalize the voting strength of the groups.

6. Canada's Delegation

Canada's delegation, named by P.C. 2138 of May 30, 1946, was as follows:

Government Delegates

Mr. Arthur MACNAMARA, C.M.G., LL.D., Deputy Minister of Labour, Ottawa, Ontario.

Captain G. L. C. JOHNSON, O.B.E., Director of Merchant Seamen, Department of Transport, Ottawa, Ontario.

*Technical Advisers to Government Delegates**

Mr. V. C. PHELAN, Department of Labour, Ottawa, Ontario.

Captain J. W. KERR, M.B.E., Superintendent of Nautical Services, Department of Transport, Ottawa, Ontario.

Mr. J. FORTIER, Departmental Solicitor, Department of Transport, Ottawa, Ontario.

Dr. C. P. BROWN, Chief of Division of Quarantine, Medical Immigration and Sick Mariners, Department of National Health and Welfare, Ottawa, Ontario.

Shipowners' Delegate

Mr. A. L. W. MACCALLUM, C.B.E., Manager, The Shipping Federation of Canada, Inc., 218 Board of Trade Building, Montreal, P.Q.

Technical Advisers to Shipowners' Delegate

Capt. J. S. THOMSON, O.B.E., D.S.C., Atlantic Shipping Agencies Ltd., 275 Sherbrooke East, Montreal, P.Q.

Mr. H. L. HURFORD, Chairman, Shipowners' Assoc'n (Deep Sea) of British Columbia, c/o Seaboard Shipping Co., Marine Building, Vancouver, B.C.

Seafarers' Delegate

Mr. J. A. SULLIVAN, President, Canadian Seamen's Union, and Legislative Representative of Marine Joint Council, 172 MacLaren Street, Ottawa, Ontario.

Technical Advisers to Seafarers' Delegate

Mr. J. M. SMITH, Business Agent, Canadian Seamen's Union, 405 Holden Building, Vancouver, B.C.

*Mr. M. L. O'Gorman, Supervisor of Coverage, Unemployment Insurance Commission, Ottawa, and Dr. R. B. Jenkins, Quarantine Officer, Department of National Health and Welfare, Victoria, also attended several of the sessions as observers for their respective departments.

Capt. J. S. DENNIS, President, Canadian Merchant Service Guild, Imperial Bank Chambers, Vancouver, B.C.

Mr. Alex MOFFAT, National Association of Marine Engineers of Canada, 319 Pender Street, Vancouver, B.C.

Owing to the fact that Mr. Arthur MacNamara was unable to attend, Mr. V. C. Phelan acted in his stead as one of the two Government Delegates.

Owing to the fact that Mr. J. A. Sullivan was unable to attend, Capt. J. S. Dennis acted in his stead as Seafarers' Delegate.

Owing to the fact that Captain J. S. Thomson was unable to attend, Captain L. C. Barry, Maritime Superintendent, Canadian Pacific Steamships Limited, Vancouver, B.C., was authorized by Order-in-Council P.C. 2359 to act as an Adviser to the Shipowners' Delegate.

7. Agenda

The International Maritime Preparatory Technical Conference, held at Copenhagen, Denmark, in November-December, 1945, had prepared certain draft Recommendations and Conventions for consideration at the final Maritime Conference to be convened by the I.L.O., i.e., at the Seattle meeting. As the Copenhagen Conference had the status of a full conference, it was open therefore to the Conference at Seattle to give final consideration to the drafts, and to approve either Recommendations or Conventions growing out of the Copenhagen meeting, as it might see fit.

In addition it was open to the Seattle meeting to consider Resolutions which might be submitted, on the understanding that the purview of the meeting was restricted in its character to maritime affairs, as referred to in Section 3 above.

In these circumstances it was to be expected that the Agenda of the Conference would follow in main outline that laid before the Copenhagen meeting, and this was the case. As submitted to the delegates the Agenda prepared by the Office read as follows:—

1. Director's Report.
2. Social security for seafarers.
3. Crew accommodation on board ship.
4. Food and catering on board ship.
5. Entry, training and promotion of seafarers.
6. Holidays with pay for seafarers.
7. Continuous employment for seafarers.
8. Recognition of seafarers' organizations.
9. Wages; hours of work on board ship; manning.

The Office had prepared a report on each item on the Agenda, and these reports con-

tained the several tentative instruments drafted at Copenhagen. Further, the Office submitted information on particular aspects of the questions under study, usually on the request of the Preparatory Conference.

8. Chairman of the Conference

At its first session the Conference elected Mr. Henry Jackson, Congressman of the United States from the State of Washington, as the Conference Chairman.

9. Vice-Presidents and Secretary-General

Vice-Presidents chosen one from each of the three groups were as follows:

Mr. George Strauss, Government Delegate (United Kingdom).

Mr. Emile Deckers, Employers' Delegate (Belgium).

Mr. Eugene Ehlers, Workers' Delegate (France).

Mr. E. J. Phelan, Acting Director of the I.L.O., was Secretary-General of the Conference.

10. Conference Procedure

At the First Sitting of the Conference it was decided to set up a Selection Committee, to recommend from time to time on the procedures to be followed. This Committee consisted of 16 Government Members, 8 Employers' Members, and 8 Workers' Members.

At the Third Sitting on June 7 the Selection Committee's recommendation in regard to the composition of committees was adopted, as follows:

Credentials Committee: 3 members (one for each group).

Resolution Committee: 16 members: Government representatives, 8; Employers' representatives, 4; workers' representatives, 4.

Committee on social security: 32 members: Government representatives, 16; Employers' representatives, 8; Workers' representatives, 8.

Committee on accommodation: 42 members: Government representatives, 18; Employers' representatives, 12; Workers' representatives, 12.

Committee on food and catering: 32 members: Government representatives, 16; Employers' representatives, 8; Workers' representatives, 8.

Committee on entry, training and promotion: 28 members: Government representatives, 12; Employers' representatives, 8; Workers' representatives, 8.

Committee on holidays with pay: 28 members: Government representatives, 12; Employers' representatives, 8; Workers' representatives, 8.

Committee on wages, hours, and manning: 56 members: Government representatives, 24; Employers' representatives, 16; Workers' representatives, 16.

The relevant sections of the Agenda were then referred to the respective committee set up to deal with the particular subject.

11. Activities of Canadian Government Delegates and Advisers

All members of the Government delegation were very active in connection with committee work, and regular in their attendance at the Plenary Sessions and Committee meetings.

Government delegates and advisers served on committees as follows:

Selection Committee—Captain G. L. C. Johnson.

Committee on Social Security—Mr. J. Fortier.

Committee on Accommodation—Captain G. L. C. Johnson.

Committee on Food and Catering—Mr. J. Fortier.

Committee on Entry, Training and Promotion—Capt. J. W. Kerr.

Committee on Wages, Hours and Manning—Mr. V. C. Phelan.

As Plenary Sessions and Committee meetings were held simultaneously and as frequently two or more committees met at the same time, it was necessary for members of the delegation to act as substitutes for one another at the various meetings.

At the first meeting of the Committee on Social Security Mr. V. C. Phelan was elected Chairman and Reporter of this Committee.

Throughout the several meetings, as issues arose, the Canadian Government delegates regularly conferred with their advisers and sought to pursue such a course, consistent with instructions previously furnished, as would be applicable to conditions in Canada and consistent with our interests and the welfare of our seafarers, while bearing in mind that the international minimum standards to be adopted must necessarily be of a character which would make their adoption practical throughout the world.

It is desired to record the fact that the members of the Canadian delegation representing Employers and Workers all took a very active part in the proceedings of the Conference, of the Committees and of their respective groups.

12. General Observations

Shortly after the opening of the Conference it became evident that two schools of thought existed amongst the representatives of the several governments, in regard to the main objectives to be attained.

The one school, led by the representatives of the Government of the United States of America, held that the duty of the Conference

was to set up standards somewhat in accordance with the high standards prevailing for seafarers of the United States itself. It was contended that whatever standards were established would prove a guide, and would direct national action in the course of the next few years. Therefore it was desirable to have the standards as high as possible, in order to effect improvements around the world to a very high level.

The contrary school of thought, led by the representatives of Great Britain, contended that if the standards fixed were too high, they would depart from reality in the case of a great many States, with the result that the Conference would defeat its own purposes for the backward nations would fail to ratify the Recommendations and Conventions adopted, in consequence of which the work of the Conference would be nullified. If it were proposed to move too much ahead of general working conditions in a particular country when dealing with seamen, there would be little hope of adopting the final proposals in enough countries to make the international minimums effective.

Generally speaking, the governments of Central and South America and of Australia favoured the view set forth by the United States. On the other hand, the Governments of Europe, and usually those from Asiatic countries, favoured the British contention.

In the main the decisions adopted eventually tended to favour the position taken by the delegates from Great Britain, but not without some degree of concession to the alternative viewpoint in some details.

A not unusual tendency at I.L.O. Conferences was again in evidence, viz., that the Workers' group and the Shipowners' group operated almost uniformly as two cohesive units. That the tendency was more pronounced than is customary at these conferences was probably due to the identity of interest within each group, inasmuch as the Conference was dealing with a single industry, facing similar conditions, even if varying in degree, in all nations represented.

Again not unusual at I.L.O. Conferences, the Workers and Employers not infrequently clashed sharply over the content of the proposed international instruments, but there was this difference from the typical I.L.O. Conference, that the clashes were more frequent and usually more sharp.

In the main the decisions arrived at finally followed the principles contained in the instruments drafted at the Copenhagen Technical Conference, although there were many changes of detail, some of which were important.

Perhaps the three most important changes were these:

(a) The international minimum wage was reduced from the Copenhagen figure.

(b) The international maximum hours of work decided at Seattle were a reduction from the Copenhagen figure.

(c) The Conference showed a tendency to extend the principle incorporated in the more important draft Conventions worked out at Copenhagen, of requiring a minimum number of national ratifications before any ratifications would become binding.

At times the debates at the Conference, both in the Committee and at the Plenary Sessions, were somewhat acrimonious—perhaps needlessly so. Nevertheless, a fair degree of general agreement was reached eventually, but usually the area of agreement extended to government and worker delegates rather than to employer representatives. It was seldom that the majority were prepared to meet the shipowners' viewpoint, and very frequently the shipowners proposed only very minor adjustments in existing arrangements.

The shipowners were particularly fixed in their ideas in regard to hours of work, social security, and rates of pay.

One issue which came up in connection with several phases of the general problems before the Conference, was the treatment to be accorded Asiatic seamen when engaged on ships of non-Asiatic registry. Specifically this point came up repeatedly in connection with the employment of seamen of Indian nationality on boats of British registry. Here again the cleavage of opinion on a national basis as already referred to was quite in evidence, and in fact the attitude of representatives from the Americas frequently suggested going further in raising standards for Asiatic seamen than the representatives from India themselves had suggested. Every effort was made to develop formulas to accommodate the peculiarities associated with the engagement of Indian seamen, and it would seem that in the eventual outcome the formulas adopted were reasonably satisfactory.

13. Attitude of Canadian Government Delegates

Speaking at the Plenary Session on June 13 for the Canadian Government delegation, Mr. V. C. Phelan made the point that although Canada regards the arrangements under which Canadian seafarers are now employed as measuring up to reasonably high standards in most particulars, nevertheless the Canadian Government welcomed the opportunity of being represented at Seattle: members of its

delegation would endeavour to be as helpful as possible in assisting the Conference to realize its objectives.

Consistent with this statement of policy, the Government members from Canada usually adopted a position somewhere between the extremes. While emphasizing the desirability of ideals and favouring high standards, the Canadian delegates made it clear that they felt it highly important to fix such standards as would be adopted by the more backward countries, but which when adopted would move those nations forward. In the course of two or three years these standards might be reviewed again, with a view to their progressive betterment and improvement. Eventually the I.L.O. would work toward the high standard level, but it seemed to the Canadian delegates that that level could be attained only by stages. These views were expressed in Committee and before the Conference. For instance, it was made clear that the wage proposed as a minimum would be far below any suitable standard for Canada.

Arising out of sharp differences between Employers and Workers, and seeking support for their respective positions, not infrequently Employer spokesmen charged the Government Group with the adoption of a faltering attitude: sometimes they alleged anxiety on the part of Government representatives to support proposals of the Workers. Similarly, the Workers charged Government delegates with hesitancy and with lack of leadership.

Speaking for the Canadian delegates before the Committee on Wages, Hours and Manning, in response to these charges, Mr. V. C. Phelan made it clear that in so far as Canadian Government delegates were concerned the accusations could not be substantiated. He pointed out that Government delegates had their instructions, which they must adhere to. He further pointed out that the purposes of the Conference could not be met by the chronic assumption that on each issue which arose there was a "workers' side" and an "employers' side". Government spokesmen had to speak as for all their country, and while bearing in mind that the main purpose of the Conference was improvement in the welfare of seafarers, at the same time they must remember that the welfare of the maritime industry had to be taken into account. It is noteworthy that this statement met with general applause from Government delegates, many of whom subsequently expressed their complete agreement with the sentiments set forth. It is not an exaggeration to say that the statement of the Canadian Government members' position thus set forth had some influence later in lessening the

accusations previously heard at the Committee.

At one stage before the Committee on Wages, Hours and Manning, the Workers proposed halting proceedings until Government members would disclose whether or not their governments proposed to put into force the Recommendations and Conventions adopted by the Conference, even suggesting that to make the Conference meaningful it would be necessary to promise ratification by a fixed date a few months hence.

Mr. V. C. Phelan took occasion to set forth the Canadian position. He pointed out that in Canada by law and practice instruments of the I.L.O. have not the status of international treaties. He pointed out that under a federal system of Government it might well be that not only the Federal Government but the Provincial Governments would require to take action to implement certain of the instruments. In the circumstances it could not be expected that Canadian Government delegates would have plenary powers to agree to documents which would be ratified automatically. The usual law-making bodies, on the recommendation of those responsible, would have to consider the documents and take appropriate action. Moreover, in democratic countries binding undertakings could not be given where freely elected bodies must finally give assent in order to make the laws required to implement the instruments.

At the same time the Canadian Government had acted in good faith upon the invitation to be represented, and it would be the duty of the Canadian Government delegates to co-operate with other delegates to produce documents which it was believed would be acceptable at home. He suggested that the position of many other States would be the same, particularly in the case of federal states—although he recognized that in the case of the United States, for example, and perhaps in some other countries, I.L.O. instruments were looked upon as treaties. Many Government delegates stated subsequently that they agreed entirely with this statement of the Canadian position, that it represented as well their own home situation. The workers did not press further on this matter of securing an undertaking as to ratification.

Reference has already been made to an address before the Plenary Session on June 13, when the Canadian position was set out. In this address there was outlined the development of merchant shipping in Canada, with stress on the fact that this development arose out of the exigencies of war. While Canada would find it necessary to continue a much

larger merchant marine than in pre-war days, she would still welcome ships of all nations trading in and out of her ports.

On more than one occasion the members of the Canadian Delegation acted to conciliate differences in viewpoints which had arisen among representatives at the meeting. It might be well to mention outstanding instances.

On June 27 Mr. Richard Snedden of Great Britain, leader of the Shipowners' group, asked for a brief adjournment at one point, to give the shipowners an opportunity of considering whether or not they would continue at the Conference: this followed adoption of a resolution to which the Employers took strong exception. Mr. V. C. Phelan asked for the floor, and appealed to the shipowners to continue on, even though decisions taken might not in all cases be to their liking. No group, he explained, could hope to have its opinion prevail in full measure, and any group now leaving would endanger the Conference. This was the only appeal made to the Shipowners from the floor, and after the adjournment was given, several Shipowners expressed appreciation of Mr. Phelan's statement. The Shipowners did not leave the Conference.

Early in the Conference a situation developed between the Indian Shipowners' representatives and the British Workers' delegate, which resulted in the withdrawal of the Indian Shipowners' delegate half way through the meetings. Both before and after the withdrawal, members of the Canadian delegation had associated themselves with others in seeking to effect conciliation. The efforts were not successful, but later in the sessions the British Workers' delegate delivered a brief conciliatory address which went very far in effacing the effects of the incident.

Progress in the Committee on Accommodation was very difficult at times, due to the sharply contrasting views of the members. Capt. G. L. C. Johnson frequently took a lead in conciliating differences, with the result that compromise solutions were arrived at and the work of the Committee proceeded to a satisfactory conclusion.

The Canadian delegates also sought to assist in effecting an understanding between the different attitudes which developed in respect of the treatment of Indian seamen on boats of British registry.

In general the Canadian Government delegates supported the tentative decisions reached at the Copenhagen Conference, although in Committee they suggested modifications on particular points. Having worked actively on the more important Committees, and having kept in touch with the work of the Committees on which they were not represented, when

the Committee's reports were returned to the Conference the Canadian Government delegation supported these reports, with a fairly few exceptions, the more important of which are noted later in this report.

14. *Résumé of Recommendations and Conventions*

As there are attached the text in extenso of the Recommendations and Conventions adopted, for the purposes of this report it will suffice to include a brief résumé of the different instruments approved.

As it is necessary under I.L.O. rules that Recommendations and Conventions be voted by a two-thirds majority, it will be appreciated that the majority was substantial in the case of each of the instruments of either of these two types which was adopted. Usually, where it is noted that an instrument was adopted on division, the opposition came from the Employers' group mainly, but not exclusively. Frequently, some Governments voted in opposition while others abstained. Less often some workers voted in opposition.

As every Recommendation or Convention was the subject of a formal vote, there were not always contrary votes registered on a particular instrument. In the résumé where this situation arose it is indicated that the instrument was adopted unanimously.

Social Security.—The Conference adopted a Convention providing for the following among other matters: care and wages of seafarers taken sick abroad; shipowners' liability; old age benefits; workmen's compensation; unemployment insurance, and medical benefit for the seafarer and his family. The Convention was adopted on division.

Two Recommendations were adopted unanimously. The first provides for international agreements relating to the social security of seafarers belonging to one country and employed on board or in the service of vessels of another country.

The second Recommendation deals with the provision of proper and sufficient medical care for the dependents of seafarers, pending the development of such a scheme for workers generally.

A second Convention under this heading proposes a state system of retirement pensions for seafarers. The Canadian Government delegates opposed adoption of this Convention, but as an alternative offered to support a Recommendation on the same subject. Speaking for Canada Mr. V. C. Phelan said that the Government of Canada was not opposed to a system of pensions for seafarers, but doubted its probability unless provided by the industry or unless similar provision were made for workers in other industries. In

Canada the pension question impinged upon the respective responsibilities of the federal and provincial governments, and while the whole question of a contributory pension scheme for the population had been mooted in some quarters, no action had been taken. He argued that a Recommendation would serve the same purpose as a Convention, in that it would call attention to the problem and should assist in securing earlier consideration for workers' pension schemes in general. In view of the fact that it was very doubtful that the Canadian Government could give favourable consideration to this Convention at an early date, the Canadian Government members had decided that they must vote in opposition to the Convention for the reasons given, although they would support the document as a Recommendation.

In line with this statement the two Canadian Government delegates voted in opposition. It may be noted that the delegates from the Government of the United States and of the United Kingdom abstained. Upon first consideration the Convention carried by a vote of 55 to 17. On final consideration, following the Drafting Committee's report, the Convention carried by a vote of 56 to 16. On the second vote the Canadian Government members abstained, as did a large number of other Government delegates.

Crew Accommodation on Board Ship.—The Conference adopted a Convention setting minimum standards for crew accommodation on board ocean-going ships of at least 500 gross register tons. (Smaller ships might be included by national action.) The Convention would require the Competent Authority to pass upon crew accommodation when a vessel is to be built, or when a vessel is registered or re-registered, or when substantially altered or reconstructed. The Convention applies to ships where the keel is laid down after the coming into force of the instrument; vessels already built which are below standard shall be subject to a ruling by the Competent Authority, after consultation with shipowners and seafarers. This Convention was carried on division.

A Recommendation was also adopted, providing that crews be given clean bed linen, mess utensils, towels, soap and other sanitary articles, by the ship; this item had been reserved for treatment separate from the Convention. The Recommendation was adopted on division.

Food and Catering.—A Convention was adopted, proposing standards for food and catering on board ocean-going ships, and for inspection by the Competent Authority of food and water supplies. Training courses for employment in the catering department are also required. The Convention was adopted

on division, just failing of unanimous adoption.

Under the same heading a second Convention was also adopted, requiring that no person shall be employed as a ship's cook unless he holds a certificate of qualifications from the Competent Authority. On division this Convention was approved, with only one contrary vote.

Entry, Training and Promotion.—The Conference adopted a Recommendation concerning the organization of training for sea service, under Government leadership and assistance. This was adopted unanimously.

A Convention concerning the periodical medical examination of seafarers was adopted on division.

The third instrument adopted under this heading is a Convention concerning the certification of able seamen, specifying standards as to qualifications in this regard. This Convention was adopted on division.

Vacations with Pay.—A Convention adopted recommends annual vacations with pay of 18 days in the case of ships' officers and of 12 days in the case of other members of the crew. This Convention was adopted on division.

The Canadian Government delegates supported an amendment (which carried) that service to count for holidays should be with the same company, but opposed an amendment (which was defeated) which would have eliminated the provision that some allowance for subsistence when off ship board on holiday leave, should be granted.

Wages, Hours and Manning.—On no other topic was the same divergence of view in evidence as was demonstrated, both in the Committee and at the Plenary Session, in relation to wages and hours. This is not unexpected when it is remembered that wages and hours are the two fundamental conditions of employment, and effect all else in the relations of management and workers. No decision of any consequence was taken in Committee without a vote being necessary. The schools of thought, as well as the contrasts of economic interest, referred to elsewhere in this report, were clearly evident throughout the discussions, and in reaching decisions.

Definitions and coverage gave rise to heated argument. Almost in the dying hours of the Conference a proposal to exempt coastal shipping was voted down, but only following a vote for re-consideration which re-opened the question after the amendment had first carried. This amendment would have eliminated a large part of the world's tonnage from the operation of the Convention. Finally, it was decided to cover ships over 500 gross register tons, whether deep sea or coastwise.

On wages, the decision taken was to adopt as an international minimum wage £16 in British currency, or \$64 in American currency. This wage was a concession to the point already dealt with, namely, that minimums had to be fixed below standards already in effect in the higher standard nations, in an effort to try to bring forward the backward nations. It was made clear that Canada, in supporting this wage rate, and already having exceeded this rate, was not suggesting that it would be an adequate rate to meet Canadian conditions, but supported it only for the general good.

In regard to hours of work, the tentative decision at Copenhagen looked to a forty-eight hour week for seafarers. This decision was altered materially at Seattle—altered in the final outcome—although as the hours question proceeded through the Committee stage and even at the Plenary session, several changes were made until the final decision was evolved. It will be observed from the text of the Convention itself that the question of hours of work is a rather involved one. There is a distinction between hours ashore and hours afloat. Another distinction is made between "near trade ships" and "distant trade ships". Some hours of work above the regular hours are not to be regarded as overtime: usually these are hours worked in the face of an emergency. Some overtime is to be paid for in cash, some is to be liquidated by time off.

Bearing in mind the many qualifications, the Seattle decision on maximum hours of work may be generalized in this fashion: the Conference decided upon a forty-eight hour week in port, and a fifty-six hour week afloat, with the provision that routine and sanitary duties called for on the weekly day of rest might be required (but are not to exceed two hours), where a weekly day of rest is provided. The schedule of hours of work decided upon was again a concession to several of the nations in an effort to secure a document that would be ratifiable.

The formula adopted in regard to manning is admittedly general, and by providing only in this respect that manning schedules should be ample to take care of duties aboard and safety at sea, the Conference really decided to leave the manning problem to national governments—or for future consideration.

15. *Comments on Recommendations and Conventions*

It might be helpful to an understanding of the several documents to call attention to certain key points, viz:—

1. Only ocean-going ships are covered—not engaged exclusively in inland transport.
2. Coastwise, as well as deep sea vessels, are included in the coverage.

3. Only commercial vessels—carrying passengers and freight—are covered.

4. Ships of war and ships on special government work are regularly excluded, while pleasure vessels are almost universally excluded.

5. Although there is some variation in this respect, vessels of the smallest tonnage are usually excluded from coverage.

6. There is some variation from one document to another in point of the crew members included, and in the case of some of the documents there is a variation from item to item as to the coverage of certain types of crew members, notably the officers.

7. Some of the documents carry a clause requiring ratifications by a minimum number of nations, with a minimum of tonnage, before any ratification becomes effective.

8. A new principle of ratification is introduced in some of the instruments. Where the subject matter is usually dealt with by collective labour agreement between employers and employees, rather than by law, it is regularly provided that a nation may ratify when it is in a position to certify that the proposals of the instrument are in operation through a collective labour agreement.

9. The standards suggested are minima throughout. There is no thought nor intention that better standards already existing in any nation should be reduced.

16. *Resolutions*

The Conference adopted resolutions providing as follows:—

(a) That the nations should endeavour to provide continuous employment for seamen, following the lines of schemes operated by several countries during the war.

(b) For the free right of shipowners and of seafarers to form their respective associations, and to bargain collectively.

(c) That the Governing Body be requested to study the welfare of seamen visiting in ports away from home, as well as the promotion of their welfare in such circumstances.

(d) That the I.L.O., in consultation with affected interests consider the possibility of furthering a project to adopt an International Fishermen's Charter.

(e) That the International Joint Maritime Commission (of the I.L.O.) should be expanded to include government representatives, as well as the employer and employee representatives, now serving on the Commission; and that the respective groups on the Commission should appoint group substitutes.

(f) For the endorsement of the proposal to call the International Diplomatic Conference on Safety of Life at Sea, and suggesting that representatives of the International Joint Maritime Commission be present in a consultative capacity.

(g) That delegates urge their respective governments to take speedy action in ratifying the instruments adopted at the Conference.

(h) That special consideration be given to compensation claims of allied merchant seamen arising out of the hazards of the late war.

(i) For thanks to the City of Seattle for the many kindnesses shown during the Conference.

Several of these resolutions were adopted without division, and those adopted on division were adopted usually by large majorities. The Canadian Government members voted in opposition to resolution (e) above, which proposes Government representation on the Joint Maritime Commission, feeling that the present bipartite character of the Commission is satisfactory.

17. Ratification by Canada

As delegates to the Seattle Conference the undersigned would recommend that early consideration and study be given to the several instruments adopted by the Conference, looking to their implementation and final ratification.

One cannot overlook, of course, the fact that in some particulars (notably in the Convention on Social Security for Seafarers) provincial jurisdiction may be involved in certain of the instruments. This factor was made clear to the Conference by the Canadian delegates.

On the Convention regarding seafarers' pensions and on the Resolution regarding inclusion of government members on the International Joint Maritime Commission, we have already set forth our views. Nevertheless, we would recommend study of these documents along with the rest, except that for the reasons given we would exclude these from our more general recommendation regarding ratification.

Our existing standards of working conditions for seafarers in Canada at the present time in many of their aspects compare most favourably with standards prevailing in other maritime nations, and with the minima set forth in these documents. This has practical significance as far as implementing these instruments is concerned, because it narrows the field in which action must be taken before ratifications by Canada are possible.

18. Canada's Prestige

As has been evidenced at other international gatherings, the prestige of Canada's position was emphasized at the Seattle Conference by the warm manner in which the Canadian delegation was welcomed by the delegations from other nations, as well as by the weight which the Canadian viewpoint obviously carried. Without exception the attitude of other delegations indicated a warmth of friendship which must be attributed to the general high regard in which this country is held abroad.

19. Closing Remarks

Before closing this report there are a few general remarks which we feel it necessary to make.

First of all, a personal word: we felt privileged and honoured to be selected for this mission. Attendance at the Conference abounded in interest, and although the task was not without its responsibilities, participation was very much worthwhile.

Of Captain J. W. Kerr and Mr. J. Fortier, Government Advisers, we wish to say that they could not have been more helpful nor interested in their tasks throughout the entire Conference. Dr. C. P. Brown, during the period he was able to attend the Conference also gave valuable assistance.

Of Mr. A. W. L. MacCallum, Employers' Delegate, we wish to record the fact that he showed a full degree of co-operation with the Government Delegates on every occasion, as did also the Employers' Advisers, Captain L. C. Barry and Mr. W. H. Hurford.

Of Captain J. S. Dennis, substitute Workers' Delegate, we wish to remark upon the co-operative spirit shown, and in this he was aided by Mr. J. M. Smith and Mr. Alec Moffat.

The Host Committee, of the City of Seattle, provided admirably for the welfare and comfort of all the delegations. Their generosity in all respects could not have been improved upon.

On June 15, through the courtesy of the Host Committee, the two Canadian Government Delegates were invited to attend the ceremonies on the international boundary between Blaine, State of Washington, and White Rock, B.C. These ceremonies were held jointly by citizens and representatives of the United States and Canada, to celebrate the 100th anniversary of the signing of the treaty between Great Britain and the United States, which fixed the 49th parallel as the dividing line between the two countries. The invitation was accepted, and the Canadian Delegates were accorded a place of honour throughout the ceremony.

At the concluding session of the Conference a word of thanks on behalf of the Canadian Delegation was voiced, while Mr. V. C. Phelan, speaking for the Minister of Labour, expressed the hope that many of those then at the Seattle Conference would likewise attend the I.L.O. Conference in Montreal, opening on September 19, when the Government of Canada will be in the role of the host government.

V. C. PHELAN,
Director of Information,
Department of Labour.

G. L. C. JOHNSON,
Director of Merchant Seamen,
Department of Transport.

Annex 1—Statement by Mr. V. C. Phelan

Just as the Government of Canada was pleased to be able to participate in this Maritime Session of the International Labour Organization, so it was the feeling of the Canadian delegation that we ought not to let pass this discussion on the Director's Report without taking some active part in it. The statement which I have to make will, in accordance with the President's request, be quite brief, but there are a few points we would like to bring to the attention of the Conference.

First of all, I should like to offer our felicitations to Congressman Henry Jackson on his selection as President of the Conference. As neighbours—neighbours, I might remark, along an undefended border of four thousand miles—Canadians are always happy to see any distinction visited upon any of their American friends, and those of us who had the opportunity of meeting Congressman Jackson at the Copenhagen Conference last fall, and seeing the work he did on that occasion, rather took it for granted that the Conference would select him as President, and when that turned out to be the case, we were very pleased indeed.

Also at this time, I should like to say on behalf of the Canadian delegation how grateful we are to the Host Committee here at Seattle and to the people of Seattle for the kind and generous way in which we have all been received.

Next, I should like to pay a word of tribute to the International Labour Office for the reports which were prepared and presented to this Conference. I am sure that those of us who have made a careful study of the reports will all agree that, with the time at the disposal of the Office, a magnificent job has been done and the Office deserves every commendation for its work in that regard.

To us, in Canada, international shipping, ocean-going shipping, was not a pursuit which we followed in pre-war days up to 1939 except on a very limited basis. However, through the exigencies of war, Canada found it necessary, in the common cause of the Allied nations, to develop rapidly a merchant marine of some size. To-day, following the termination of hostilities, we find ourselves with approximately one-and-a-half million deadweight tons of shipping under our own registry and, as well, we have bareboated a total of about one million tons to Allied nations. It is perhaps remarkable that a country like Canada, with extended coastlines on two of the great oceans, a country which has an economy the nature of which is such that we must, in order to live, buy and sell abroad in large volume—it is rather remarkable that we have not developed a merchant fleet in peace time, but we were content that our products should be removed from our shores in the main by boats of other nations and that the commodities we had to import should be brought into our ports and up our rivers by nations flying almost every flag which is seen on the Seven Seas.

Deriving our population and our traditions mainly from the British Isles and from France, two countries which have contributed so much to maritime history, it should rather have been expected that we would have been somewhat jealous about the carriage of our commodities, the carriage of our exports, and that we would have gone into the merchant navy business, if

not on a grand scale, at least on an ample scale. This, the war has rather forced upon us, and it is to be expected that from now on, the Canadian flag will be seen around the seas carrying Canadian goods abroad and bringing home the commodities we must have.

However, I should like to emphasize this point, that it is with no desire, no conscious desire, of engaging in competition with other maritime nations that we have developed a merchant marine. It was due, as I said, to the exigencies of war and now, confronted with the situation, we find it necessary to continue. But I do want to let representatives of the other nations who are here present know that we harbour nothing but the best of good will towards all nations, towards all maritime nations as well, of course, and that we will still welcome ships of all nations into our ports to trade with us.

Our merchant seamen during the war gave a splendid account of themselves. I do not need to emphasize that side of the case. We in Canada are extremely proud of their accomplishments, proud of their valour, proud of the persistency which they showed in the dark days which preceded the final victory. Building up our merchant navy during the war, even in spite of the restrictions placed upon us by hostilities, we nevertheless did endeavour to provide working conditions for our seafarers which would be equivalent to a high standard. This we did succeed in doing. As I remarked at the Copenhagen Conference, the wage rates mentioned as suitable for international minima, wage rates which may be approved by this Conference, still fall well below the Canadian standard. I do not make that statement with any intention of causing any dissatisfaction in any quarter, because I think in no field of human activity is it quite so inevitable that there shall be widespread variations around the world as in the matter of wage rates, but nevertheless, Canada is, of course, thoroughly agreeable to participating in this Conference and to endeavouring to fix a minimum wage rate which would have for its effect levelling up competition to some extent, but more important, bringing up to a higher standard the welfare of the seafarers in those nations where conditions have been somewhat backward. And if we subscribe to a wage rate which is less than our own, substantially less than our own, we do want it understood that that is not indicative at all of policy in Canada; that there is no thought of bringing back the Canadian rate to the international minimum, but that we are only fixing a minimum to be of assistance to seafarers in those countries where rates have lagged behind.

I do agree with the statement which has been made so often by the workers that conditions of employment of seafarers in ages now past have never been remarkable for their attractiveness, and that perhaps the spirit of adventure, which may be some compensation psychologically but economically is no compensation, was allowed to suffice for the inadequacy of health conditions and other conditions.

I think, however, attending this Conference, one would fail in observation if one failed to see an anxiety on the part of ship-owners to bring about conditions which will be more clearly in line with conditions of employment

in other industries. The Canadian Government delegation at this Conference wishes only to be of assistance, both to seafarers and shipowners, to try to bring about a new day, to try to improve the condition of the seafarers, while at the same time bearing in mind the economic position, the economic necessities, of the shipping industry, and bearing in mind that while the Conventions you may adopt, if carried into effect, will be of immediate benefit to the seafarers, in the long run they will also be of benefit to the industry, to the shipowners, and will pay dividends in improved working relationships, in improved efficiency, and in the elimination of certain types of undesirable competition.

In phases of industrial relations, apart from wages, we in Canada have endeavoured to give our seafarers a good standard of conditions. We have provided for a system of workmen's compensation which I think will bear comparison with that of any other country. We have provided for other amenities in the way of accommodation and catering which I think will be pretty well up to the standard of the Conventions which we hope will be adopted here. In all ways, we have endeavoured to treat our seafarers fairly, because that is the minimum requirement of justice, but also because of the

record they developed for themselves during the conflict now happily ended.

I do want to emphasize that Canada holds nothing but good will for all nations, that we are happy as a Government and a people to be participating in this Maritime Session of the International Labour Conference, that we want to make a maximum contribution, that seeing that we are in the shipping business to stay, we wish to get to know the conditions, the problems, of other maritime nations better, and therefore that we are happy to be here as representing the Government of Canada, which in turn was happy to avail itself of the opportunity of sending representation of this Conference.

And just one other point: We cannot build a new world overnight. It requires time. We may here at this Conference accomplish a very great deal. We will not, however, even given the best of good will and the best of conditions, particularly in a world where conditions are fluctuating so rapidly, we will not, for all time, have disposed of industrial relations in the maritime sphere at the conclusion of this Conference. Therefore, we feel that at a later stage, say, two or three years hence, this Maritime Session should be reconvened and that an opportunity should be given to review the work of this Conference and then bring it up to date.

Annex 2—Convention (No. 70) Concerning Social Security for Seafarers

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June, 1946, and

Having decided upon the adoption of certain proposals with regard to social security for seafarers, which is the second item on the agenda of the Session, and

Having determined that these proposals shall take the form of an International Convention

adopts this 28th day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Social Security (Seafarers) Convention, 1946:—

Article 1

1. In this Convention—

- (a) the term "seafarer" includes every person employed on board or in the service of any sea-going vessel, other than a ship of war, which is registered in a territory for which this Convention is in force;
- (b) the term "dependant" shall have the meaning assigned to it by national laws or regulations; and
- (c) the term "repatriation" means transportation to a port to which a seafarer is entitled to be returned in accordance with national laws or regulations.

2. Any Member may in its national laws or regulations make such exceptions as it deems necessary in respect of—

- (a) persons employed on board or in the service of
 - (i) vessels of public authorities when such vessels are not engaged in trade;
 - (ii) coastwise fishing boats;
 - (iii) boats of less than twenty-five tons gross register tonnage;
 - (iv) wooden ships of primitive build such as dhows and junks; and

(v) in so far as ships registered in India are concerned and for a period not exceeding five years from the date of registration of the ratification of this Convention by India, home trade vessels of a gross register tonnage not exceeding 300 tons;

- (b) members of the shipowner's family;
- (c) pilots not members of the crew;
- (d) persons employed on board or in the service of the ship by an employer other than the shipowner, except radio officers or operators and catering staff;
- (e) persons employed in port who are not ordinarily employed at sea;
- (f) salaried employees in the service of a national public authority who are entitled to benefits at least equivalent on the whole to those provided for in this Convention;
- (g) persons not remunerated for their services or remunerated only by a nominal salary or wage;
- (h) persons working exclusively on their own account.

3. Where any benefit provided for in this Convention is furnished otherwise than in virtue of national laws or regulations relating to the liability of the shipowner in respect of sickness, injury or death of seafarers, such further exceptions as are deemed necessary may be made in national laws, regulations or collective agreements in respect of the right to such benefit and any obligation to contribute of—

- (a) persons remunerated exclusively by a share of profits;
- (b) persons employed on board or in the service of fishing vessels for whom an exception is not already permitted under paragraph 2 (a) (ii) of this Article or on board or in the service of vessels engaged in hunting seals;
- (c) persons employed on board or in the service of whale catching, floating factory or transport vessels or otherwise for the

purpose of whaling or similar operations under conditions regulated by the provisions of a special collective whaling or similar agreement determining the rates of pay, hours of work and other conditions of service concluded by an organization of seafarers concerned;

- (d) persons employed on board or in the service of vessels which are not engaged in the transport of cargo or passengers for the purposes of trade; and
- (e) persons employed on board or in the service of vessels of less than 200 gross register tons.

Article 2

1. Seafarers and their dependants who are resident and present in the territory of a Member shall be entitled in virtue of the seafarer's employment on board or in the service of vessels registered in the territory of that Member to the following benefits:—

- (a) seafarers shall be entitled to medical benefit not less favourable in respect of conditions of award, extent and duration than that to which industrial workers are entitled; in so far as industrial workers are not entitled to medical benefit, seafarers shall be entitled to proper and sufficient medical care;
- (b) seafarers shall be entitled in respect of incapacity for work (whether due to employment injury or not) and in respect of unemployment and old age to cash benefits not less favourable in respect of conditions of award, amount and duration than those to which industrial workers are entitled; in so far as industrial workers are not entitled to cash benefits in respect of incapacity for work (whether due to employment injury or not) seafarers shall be entitled to such benefits at rates commensurate, having regard to the standard of living in the territory, with their needs and those of their dependants;
- (c) the dependants of a seafarer shall be entitled to medical benefit not less favourable in respect of conditions of award, extent and duration than that to which the dependants of industrial workers are entitled;
- (d) on the death of a seafarer his dependants shall be entitled to cash benefits not less favourable in respect of conditions of award, amount and duration than those to which the dependants of industrial workers are entitled; in so far as the dependants of industrial workers are not entitled to cash benefits in the event of the death of the worker, the dependants of seafarers shall be entitled to such benefits at a rate commensurate, having regard to the standard of living in the territory, with their needs.

2. Where medical or cash benefits for seafarers and their dependants are provided under any special scheme, such special provisions (other than those resulting from shipowners' liability) shall be appropriately co-ordinated or integrated with any scheme which applies to industrial workers and their dependants and provides corresponding benefits not less favourable in respect of conditions of award, extent or amount, and duration.

Article 3

A seafarer resident in the territory in which the vessel is registered who is left behind in another territory by reason of injury in the service of the ship or sickness not due to his own wilful act shall be entitled to—

- (a) proper and sufficient medical care until he is cured or repatriated, whichever first occurs;
- (b) board and lodging until he is able to obtain suitable employment or is repatriated, whichever first occurs; and
- (c) repatriation.

2. Such a seafarer shall also be entitled to an allowance equal to 100 per cent of his wages (exclusive of bonuses) until he is able to obtain suitable employment, or until he is repatriated, or until the expiry of a period of a length prescribed by national laws or regulations or by collective agreement, which period shall not be less than twelve weeks, whichever event first occurs. If the prescribed period expires before the seafarer is able to obtain suitable employment or is repatriated, he or his dependants shall be entitled to any benefit under a scheme of compulsory social insurance or workmen's compensation which would be payable if the seafarer were present in the territory of registration. Any benefit payable to the seafarer or his dependants under such a scheme prior to the expiry of the prescribed period may be deducted from the allowance.

Article 4

Arrangements for the maintenance of rights in course of acquisition by a person who, having ceased to be subject to a scheme of compulsory social insurance for seafarers, becomes subject to such a scheme for shoreworkers, or, having ceased to be subject to such a scheme for shoreworkers, becomes subject to such a scheme for seafarers, shall be made between the schemes concerned.

Article 5

National laws and regulations relating to the liability of the shipowner in respect of sickness, injury or death of seafarers, compulsory insurance against employment injury or workmen's compensation, compulsory sickness insurance and compulsory unemployment insurance shall ensure equality of treatment to seafarers and their dependants irrespective of nationality or race.

Article 6

1. National laws and regulations relating to the liability of the shipowner in respect of sickness, injury or death of seafarers shall ensure equality of treatment to seafarers and their dependants whether or not they reside in the territory in which the vessel is registered.

2. Where the laws or regulations of a Member relating to the liability of shipowners do not entitle seafarers resident outside its territory to the benefits prescribed in paragraph 1 of Article 3, the Member shall provide these benefits by other laws or regulations.

Article 7

1. The laws and regulations of a Member relating to medical and cash benefits in case of employment injury shall not impose on seafarers or their dependants resident in the territory of any other Member for which this Convention is

in effective operation any condition or limitation which does not apply equally to seafarers and their dependants resident in the territory of the first Member.

2. Provided that no such benefits and no contributions towards the cost of such benefits shall be payable under the scheme in force in the territory of the first Member if they are payable in respect of such seafarers under any scheme in force in the territory of the second Member.

Article 8

In order to facilitate continuity of insurance and to eliminate double contributions and double benefits, Members may enter into agreements providing that nationals or residents of one Member employed on board or in the service of a vessel registered in the territory of another Member shall be subject to an insurance or compensation scheme of the first Member and therefore excluded from the corresponding scheme of the second Member.

Article 9

Nothing in this Convention shall affect any law, award, custom or agreement between shipowners and seafarers which ensures to the seafarers conditions more favourable than those provided for by this Convention.

Article 10

1. Effect may be given to paragraph 2 of Article 3 of this Convention by (a) laws or regulations; (b) collective agreements between recognized associations of shipowners or shipowners and recognized associations of seafarers which cover all seafarers to whom the said paragraph applies; or (c) a combination of laws or regulations and collective agreements between recognized associations of shipowners or shipowners and recognized associations of seafarers which cover all seafarers to whom the said paragraph applies. Except as may be otherwise provided herein, the provisions of this Convention shall be made applicable to every vessel registered in the territory of the ratifying Member and to every person engaged on any such vessel.

2. Each Member ratifying this Convention shall supply to the Director of the International Labour Office information on the measures by which the Convention is applied, including particulars of any collective agreements which give effect to any of its provisions and are in force at the date when the Member ratifies the Convention.

3. Each Member ratifying the Convention undertakes to take part, by means of a tripartite delegation, in any committee representative of Governments and shipowners' and seafarers' organizations and including in an advisory capacity representatives of the Joint Maritime Commission of the International Labour Office which may be set up for the purpose of examining the measures taken to give effect to the Convention.

4. The Director will lay before the said committee a summary of the information received by him under paragraph 3 above.

5. The Committee shall consider whether the collective agreements reported to it give effect to the provisions of the Convention. Each Member ratifying the Convention undertakes to give consideration to any observations or sug-

gestions concerning the application of the Convention made by the Committee and further undertakes to bring to the notice of the organizations of employers and of workers who are parties to any of the collective agreements mentioned in paragraph 1 any observations or suggestions of the aforesaid committee concerning the degree to which such agreements give full effect to the provisions of the Convention.

Article 11

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 12

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by seven of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least four countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 13

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this article.

Article 14

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 15

The Director of the International Labour Office shall communicate to the Secretary-Gen-

eral of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding articles.

Article 16

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 17

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides—

(a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 13 above, if and when the new revising Convention shall have come into force.

(b) as from the date when the new revising Convention shall come into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 18

The English and French versions of the text of the Convention are equally authoritative.

Annex 3—Recommendation (No. 75) Concerning Agreements Relating to the Social Security of Seafarers

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to agreements relating to social security for seafarers, which is included in the second item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

adopts this 28th day of June of the year one thousand nine hundred and forty-six the following Recommendation, which may be cited as the Seafarers' Social Security (Agreements) Recommendation, 1946:

The Conference recommends the Members of the Organization to apply the following principles and to inform the International Labour Office, as requested by the Governing Body, concerning the measures taken to give effect to these principles:

1. Members should enter into agreements so as to ensure that seafarers belonging to one country and employed on board or in the service of a vessel of another country either remain subject to the schemes of compulsory social insurance or workmen's compensation of their

own country or are subject to the corresponding schemes of the other country.

2. Such agreements might provide, for example, for Members to act as agents for one another in taking claims, obtaining necessary evidence and making payments or providing services as benefits to seafarers or dependants of seafarers entitled to benefit under the social insurance laws of one Member but present in the territory of another Member; or for the transfer of contributions; or for the application of the provisions of the Maintenance of Migrants' Pension Rights Convention, 1935; or for a combination of such methods.

3. Where seafarers residing in the territory of one Member and employed on board or in the service of vessels registered in the territory of another Member, suffer employment injuries and are not protected either by a workmen's compensation scheme or by any alternative scheme, the second Member should take steps to secure that they are fully protected, either by entering into agreements with the first Member, or otherwise.

4. Where the shipowners of a Member enter into collective agreements providing for seafarers residing in its territory benefits supplementary to those prescribed by its laws or regulations and employ seafarers residing in the territory of another Member, the same supplementary benefits should be extended to such non-resident seafarers.

Annex 4—Recommendation (No. 76) Concerning Medical Care for Seafarers' Dependants

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to medical care for seafarers' dependants which is included in the second item on the agenda of the Session, and

Having adopted the Social Security (Seafarers) Convention, 1946, and having decided to supplement the provisions of this Convention by a Recommendation,

adopts this 28th day of June of the year one thousand nine hundred and forty-six the following Recommendation, which may be cited as the Seafarers (Medical Care for Dependants) Recommendation, 1946:

The Conference recommends that Members of the Organization should endeavour to provide

proper and sufficient medical care for the dependants of seafarers pending the development of a medical care service which would include within its scope workers generally and their

dependants and should inform the International Labour Office, as requested by the Governing Body, concerning the measures taken for this purpose.

Annex 5—Convention (No. 71) Concerning Seafarers' Pensions, Submitted by the Drafting Committee

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6th June 1946, and

Having decided upon the adoption of certain proposals with regard to seafarers' pensions, which included in the second item on the agenda of the Session and

Having determined that these proposals shall take the form of an International Convention,

adopts this 28th day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Seafarers' Pensions Convention, 1946:

Article 1

In this Convention the term "seafarer" includes every person employed on board or in the service of any sea-going vessel, other than a ship of war, which is registered in a territory for which the Convention is in force.

Article 2

1. Each Member of the International Labour Organization for which this Convention is in force shall, in accordance with national laws or regulations, establish or secure the establishment of a scheme for the payment of pensions to seafarers on retirement from sea service.

2. The scheme may embody such exceptions as the Member deems necessary in respect of—

(a) persons employed on board or in the service of

(i) vessels of public authorities when such vessels are not engaged in trade;

(ii) vessels which are not engaged in the transport of cargo or passengers for the purpose of trade;

(iii) fishing vessels;

(iv) vessels engaged in hunting seals;

(v) vessels of less than 200 gross register tons;

(vi) wooden ships of primitive build such as dhows and junks;

(vii) in so far as ships registered in India are concerned and for a period not exceeding five years from the date of the registration of the ratification of the Convention by India, home-trade vessels of a gross register tonnage not exceeding 300 tons.

(b) members of the shipowner's family;

(c) pilots not members of the crew;

(d) persons employed on board or in the service of the ship by an employer other than the shipowner, except radio officers or operators and catering staff;

(e) persons employed in port who are not ordinarily employed at sea;

(f) salaried employees in the service of a national public authority who are entitled to benefits at least equivalent on the whole to those provided for in this Convention;

(g) persons not remunerated for their services or remunerated only by a nominal salary or wage, or remunerated exclusively by a share of profits;

(h) persons working exclusively on their own account;

(i) persons employed on board or in the service of whale catching, floating factory or transport vessels or otherwise for the purpose of whaling or similar operations under conditions regulated by the provisions of a special collective whaling or similar agreement determining the rates of pay, hours of work and other conditions of service concluded by an organization of seafarers concerned;

(j) persons not resident in the territory of the Member;

(k) persons not nationals of the Member.

Article 3

1. The scheme shall comply with one of the following conditions:

(a) the pensions provided by the scheme—

(i) shall be payable to seafarers having completed a prescribed period of sea service on attaining the age of fifty-five or sixty years as may be prescribed by the scheme; and

(ii) shall, together with any other social security pension payable simultaneously to the pensioner, be at a rate not less than the total obtained by computing for each year of his sea service one and a half per cent of the remuneration on the basis of which contributions were paid in respect of him for that year if the scheme provides pensions on attaining the age of fifty-five years or two per cent of such remuneration if the scheme provides pensions at the age of sixty years; or

(b) the scheme shall provide pensions the financing of which, together with the financing of any other social security pension payable simultaneously to the pensioner and any social security benefits payable to the dependants (as defined by national laws or regulations) of deceased pensioners, requires a premium income from all sources which is not less than 10 per cent of the total remuneration on the basis of which contributions are paid to the scheme.

2. Seafarers collectively shall not contribute more than half the cost of the pensions payable under the scheme.

Article 4

1. The scheme shall make appropriate provision for the maintenance of rights in course of acquisition by persons ceasing to be subject thereto or for the payment to such persons of a benefit representing a return for the contributions credited to their account.

2. The scheme shall grant a right of appeal in any dispute arising thereunder.

3. The scheme may provide for the forfeiture or suspension of the right to a pension in whole or in part if the person concerned has acted fraudulently.

4. The shipowners and the seafarers who contribute to the cost of the pensions payable under the scheme shall be entitled to participate through representatives in the management of the scheme.

Article 5

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 6

1. This Convention shall be binding only upon those members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by five of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least three countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 7

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Annex 6—Convention (No. 75) Concerning Crew Accommodation on Board Ship

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to crew accommodation on board ship, which is the third item on the agenda of the session, and

Having determined that these proposals should take the form of an International Convention,

Article 8

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 9

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 10

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 11

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

(a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 7 above, if and when the new revising Convention shall have come into force;

(b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 12

The English and French versions of the text of this Convention are equally authoritative.

adopts this 29th day of June of the year one thousand nine hundred and forty-six the following Convention, which may be cited as the Accommodation of Crews Convention, 1946:

PART I. GENERAL PROVISIONS

Article 1

1. This Convention applies to every sea-going mechanically propelled vessel, whether publicly or privately owned, which is engaged in the transport of cargo or passengers for the purpose

of trade and is registered in a territory for which this Convention is in force.

2. National laws or regulations shall determine when vessels are to be regarded as sea-going vessels for the purpose of this Convention.

3. This Convention does not apply to—

- (a) vessels of less than 500 tons;
- (b) vessels primarily propelled by sail but having auxiliary engines;
- (c) vessels engaged in fishing or in whaling or in similar pursuits;
- (d) tugs.

4. Provided that the Convention shall be applied where reasonable and practicable to:

- (a) vessels between 200 and 500 tons; and
- (b) the accommodation of persons engaged in usual sea-going routine in vessels engaged in whaling or in similar pursuits.

Article 2

In this Convention—

- (a) the term “ship” means a vessel to which the Convention applies;
- (b) the term “tons” means gross register tons;
- (c) the term “passenger ship” means a ship in respect of which there is in force either (i) a safety certificate issued in accordance with the provisions of the International Convention for the Safety of Life at Sea for the time being in force or (ii) a passenger certificate;
- (d) the term “officer” means a person other than a master ranked as an officer by national laws or regulations, or, in the absence of any relevant laws or regulations, by collective agreement or custom;
- (e) the term “rating” means a member of the crew other than an officer;
- (f) the term “petty officer” means a rating serving in a supervisory position or position of special responsibility who is classed as petty officer by national laws or regulations, or, in the absence of any relevant laws or regulations, by collective agreement or custom;
- (g) the term “crew accommodation” includes such sleeping rooms, mess rooms, sanitary accommodation, hospital accommodation and recreation accommodation as are provided for the use of the crew;
- (h) the term “prescribed” means prescribed by national laws or regulations or by the competent authority;
- (i) the term “approved” means approved by the competent authority;
- (j) the term “reregistered” means reregistered on the occasion of a simultaneous change in the territory of registration and ownership of the vessel.

Article 3

1. Each Member for which this Convention is in force undertakes to maintain in force laws or regulations which ensure the application of the provisions of Parts II, III and IV of this Convention.

2. The laws or regulations shall—

- (a) require the competent authority to bring them to the notice of all persons concerned;
- (b) define the persons responsible for compliance therewith;
- (c) prescribe adequate penalties for any violation thereof;

(d) provide for the maintenance of a system of inspection adequate to ensure effective enforcement;

(e) require the competent authority to consult the organizations of shipowners and/or the shipowners and the recognized *bona fide* trade unions of seafarers in regard to the framing of regulations, and to collaborate so far as practicable with such parties in the administration thereof.

PART II. PLANNING AND CONTROL OF CREW ACCOMMODATION

Article 4

1. Before the construction of a ship is begun a plan of the ship, showing on a prescribed scale the location and general arrangement of the crew accommodation, shall be submitted for approval to the competent authority.

2. Before the construction of the crew accommodation is begun and before the crew accommodation in an existing ship is altered or reconstructed, detailed plans of, and information concerning, the accommodation, showing on a prescribed scale and in prescribed detail the allocation of each space, the disposition of furniture and fittings, the means and arrangement of ventilation, lighting and heating, and the sanitary arrangements, shall be submitted for approval to the competent authority: Provided that in the case of emergency or temporary alterations or reconstruction effected outside the territory of registration it shall be sufficient compliance with this provision if the plans are subsequently submitted for approval to the competent authority.

Article 5

On every occasion when—

- (a) a ship is registered or reregistered,
- (b) the crew accommodation of a ship has been substantially altered or reconstructed, or
- (c) complaint has been made to the competent authority in the prescribed manner and in time to prevent any delay to the vessel by a recognized *bona fide* trade union of seafarers representing all or part of the crew or by a prescribed number or proportion of the members of the crew of the ship that the crew accommodation is not in compliance with the terms of this Convention.

the competent authority shall inspect the ship and satisfy itself that the crew accommodation complies with the requirements of the laws and regulations.

PART III. CREW ACCOMMODATION REQUIREMENTS

Article 6

1. The location, means of access, structure and arrangement in relation to other spaces of crew accommodation shall be such as to ensure adequate security, protection against weather and sea, and insulation from heat or cold, undue noise of effluvia from the spaces.

2. There shall be no direct openings into sleeping rooms from spaces for cargo and machinery or from galleys, lamp and paint rooms or from engine, deck and other bulk storerooms, drying rooms, communal wash places or water closets. That part of the bulkhead separating such places from sleeping rooms and

external bulkheads shall be efficiently constructed of steel or other approved substance and shall be watertight and gas-tight.

3. External bulkheads of sleeping rooms and mess rooms shall be adequately insulated. All machinery casings and all boundary bulkheads of galleys and other spaces in which heat is produced shall be adequately insulated where there is a possibility of resulting heat effects in adjoining accommodation or passageways. Care shall also be taken to provide protection from heat effects of steam and /or hot-water service pipes.

4. Internal bulkheads shall be of approved material which is not likely to harbour vermin.

5. Sleeping rooms, messrooms, recreation rooms and alley-ways in the crew accommodation space shall be adequately insulated to prevent condensation or overheating.

6. Main steam and exhaust pipes for winches and similar gear shall not pass through crew accommodation nor, whenever technically possible, through alley-ways leading to crew accommodation; where they do pass through such alley-ways they shall be adequately insulated and encased.

7. Inside panelling or sheeting shall be of material with a surface easily kept clean. Tongued and grooved boarding or any other form of construction likely to harbour vermin shall not be used.

8. The competent authority shall decide to what extent fire-prevention or fire-retarding measures shall be required to be taken in the construction of the accommodation.

9. The wall surface and deckheads in sleeping rooms and mess rooms shall be capable of being easily kept clean, and, if painted, shall be light in colour; lime wash must not be used.

10. The wall surfaces shall be renewed or restored as necessary.

11. The decks in all crew accommodation shall be of approved material and construction and shall provide a surface impervious to damp and easily kept clean.

12. Where the floorings are of composition, the joinings with sides shall be rounded to avoid crevices.

13. Sufficient drainage shall be provided.

Article 7

1. Sleeping rooms and mess rooms shall be adequately ventilated.

2. The system of ventilation shall be controlled so as to maintain the air in a satisfactory condition and to ensure a sufficiency of air movement in all conditions of weather and climate.

3. Ships regularly engaged on voyages in the tropics and the Persian Gulf shall be equipped with mechanical means of ventilation.

4. Ships engaged outside the tropics shall be equipped with either mechanical means of ventilation or electric fans. The competent authority may exempt ships normally employed in the cold waters of the northern or southern hemispheres from this requirement.

5. Power for the operation of the aids to ventilation required by paragraphs 3 and 4 shall, when practicable, be available at all times when the crew is living or working on board and conditions so require.

Article 8

1. An adequate system of heating the crew accommodation shall be provided except in ships engaged exclusively in voyages in the tropics and the Persian Gulf.

2. The heating system shall, when practicable, be in operation at all times when the crew is living or working on board and conditions require its use.

3. In all ships in which a heating system is required, the heating shall be by means of steam, hot water, warm air or electricity.

4. In any ships in which heating is provided by a stove, measures shall be taken to ensure that the stove is of sufficient size and is properly installed and guarded and that the air is not fouled.

5. The heating system shall be capable of maintaining the temperature in crew accommodation at a satisfactory level under normal conditions of weather and climate likely to be met with on service; the competent authority shall prescribe the standard to be provided.

6. Radiators and other heating apparatus shall be so placed and, where necessary, shielded, as to avoid risk of fire or danger or discomfort to the occupants.

Article 9

1. Subject to such special arrangements as may be permitted in passenger ships, sleeping rooms and mess rooms shall be properly lighted by natural light and shall be provided with adequate artificial light.

2. All crew spaces shall be adequately lighted. The minimum standard for natural lighting in living rooms shall be such as to permit a person with normal vision to read on a clear day an ordinary newspaper in any part of the space available for free movement. When it is not possible to provide adequate natural lighting, artificial lighting of the above minimum standard shall be provided.

3. In all ships electric lights shall be provided in the crew accommodation. If there are not two independent sources of electricity for lighting, additional lighting shall be provided by properly constructed lamps or lighting apparatus for emergency use.

4. Artificial lighting shall be so disposed as to give the maximum benefit to the occupants of the room.

5. In sleeping rooms an electric reading lamp shall be installed at the head of each berth.

Article 10

1. Sleeping rooms shall be situated above the load line amidships or aft.

2. In exceptional cases the competent authority may, if the size, type or intended service of the ship render any other location unreasonable or impracticable, permit the location of sleeping rooms in the fore part of the ship, but in no case forward of the collision bulkhead.

3. In passenger ships the competent authority may on condition that satisfactory arrangements are made for lighting and ventilation permit the location of sleeping rooms below the load line, but in no case immediately beneath working alley-ways.

4. The floor area per person of sleeping rooms intended for ratings shall be not less than—

- (a) 20 sq. ft. or 1.85 sq. m. in vessels under 800 tons;
- (b) 25 sq. ft. or 2.35 sq. m. in vessels of 800 tons or over, but under 3,000 tons;
- (c) 30 sq. ft. or 2.78 sq. m. in vessels of 3,000 tons or over;

Provided that, in the case of passenger ships in which more than four ratings are berthed in one room, the minimum per person may be 24 sq. ft. (2.22 sq. m.).

5. In the case of ships in which are employed such groups of ratings as necessitate the employment of a substantially larger number of ratings than would otherwise be employed, the competent authority may, in respect of such groups, reduce the minimum floor area of sleeping rooms per person, subject to the conditions that—

- (a) the total sleeping space allotted to the group or groups is not less than would have been allotted had the numbers not been so increased, and
- (b) the minimum floor area of sleeping rooms is not less than—
 - (i) 18 sq. ft. per person in ships under 3,000 tons;
 - (ii) 20 sq. ft. per person in ships of 3,000 tons or over.

6. Space occupied by berths and lockers, chests of drawers and seats shall be included in the measurement of the floor area. Small or irregularly shaped spaces which do not add effectively to the space available for free movement and cannot be used for installing furniture shall be excluded.

7. The clear head room in crew sleeping rooms shall not be less than 6 feet 3 inches (190 cm.).

8. There shall be a sufficient number of sleeping rooms to provide a separate room or rooms for each department: Provided that the competent authority may relax this requirement in the case of small ships.

9. The number of persons allowed to occupy sleeping rooms shall not exceed the following maxima:—

- (a) officers in charge of a department, navigating and engineer officers in charge of a watch and senior radio officers or operators: one person per room;
- (b) other officers: one person per room wherever possible, and in no case more than two;
- (c) petty officers: one or two persons per room, and in no case more than two;
- (d) other ratings: two or three persons per room wherever possible, and in no case more than four.

10. In passenger ships, permission may be given to accommodate not more than ten ratings belonging to the catering department per sleeping room.

11. The maximum number of persons to be accommodated in any sleeping room shall be indelibly and legibly marked in some place in the room where it can conveniently be seen.

12. Members of the crew shall be provided with individual berths.

13. Berths shall not be placed side by side in such a way that access to one berth can be obtained only over another.

14. Berths shall not be arranged in tiers of more than two; in the case of berths placed along the ship's side there shall be only a single tier.

15. The lower berth in a double tier shall be not less than 12 inches (30 cm.) above the floor; the upper berth shall be placed approximately midway between the bottom of the lower berth and the lower side of the deckhead beams.

16. The minimum inside dimensions of a berth shall be 6 feet 3 inches by 2 feet 3 inches (190 cm. by 68 cm.).

17. The framework and the lee-board, if any, of a berth shall be of approved material, hard, smooth, and not likely to corrode or to harbour vermin.

18. If tubular frames are used for the construction of berths, they shall be completely sealed and without perforations which would give access to vermin.

19. Each berth shall be fitted with a spring bottom or a spring mattress and with a mattress of approved material. Stuffing of straw or other material likely to harbour vermin shall not be used.

20. When one berth is placed over another a dust-proof bottom of wood, canvas or other suitable material shall be fitted beneath the spring bottom of the upper berth.

21. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness.

22. The furniture shall include a clothes locker for each occupant. The clothes lockers shall be not less than 5 ft. (152 cm.) in height and of a cross-section area of 300 square inches (19.30 square decimetres) and shall be fitted with a shelf and a hasp for a padlock. The padlock shall be provided by the occupant.

23. Each sleeping room shall be provided with a table or desk, which may be of the fixed, drop-leaf or slide-out type, and with comfortable seating accommodation as necessary.

24. The furniture shall be of smooth, hard material not liable to warp or corrode.

25. The drawer or equivalent space for each occupant shall be not less than 2 cubic feet (.056 cubic metres).

26. Sleeping rooms shall be fitted with curtains for the sidelights.

27. Sleeping rooms shall be fitted with a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

28. As far as practicable berthing of crew members shall be so arranged that watches are separated and that no daymen share a room with watch-keepers.

Article 11

1. Sufficient mess room accommodation shall be provided in all ships.

2. In ships of less than 1,000 tons separate mess room accommodation shall be provided for—

- (a) master and officers;
- (b) petty officers and other ratings.

3. In ships of 1,000 tons and over, separate mess room accommodation shall be provided for—

- (a) master and officers;
- (b) deck department petty officers and other ratings;
- (c) engine department petty officers and other ratings.

Provided that—

- (i) one of the two mess rooms for the petty officers and other ratings may be allotted to the petty officers and the other to the other ratings;

- (ii) a single mess room may be provided for deck and engine department petty officers and other ratings in cases in which the organizations of shipowners and/or shipowners and the recognized *bona fide* trade unions of seafarers concerned have expressed a preference for such an arrangement.

4. Adequate mess room accommodation shall be provided for the catering department, either by the provision of a separate mess room or by giving them the right to the use of the mess rooms assigned to other groups; in the case of ships of 5,000 tons or over with more than five persons in the catering department consideration shall be given to the provision of a separate mess room.

5. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

6. Mess rooms shall be equipped with tables and approved seats sufficient for the number of persons likely to use them at any one time.

7. The competent authority may permit such exceptions to the foregoing rules concerning mess room accommodation as may be necessary to meet the special conditions in passenger ships.

8. Mess rooms shall be located apart from the sleeping rooms and as close as practicable to the galley.

9. Where available pantries are not accessible to mess rooms, adequate lockers for mess utensils and proper facilities for washing utensils shall be provided.

10. The tops of tables and seats shall be of damp-resisting material, without cracks and capable of being easily cleaned.

Article 12

1. In all ships a space or spaces to which the crew can have access when off duty shall be provided on an open deck; the space or spaces shall be of adequate area, having regard to the size of the ship and the crew.

2. Recreation accommodation, conveniently situated and appropriately furnished, shall be provided for officers and for ratings. Where this is not provided separately from the mess rooms the latter shall be planned, furnished, and equipped to give recreational facilities.

Article 13

1. Sufficient sanitary accommodation, including wash basins and tub and/or shower baths, shall be provided in all ships.

2. The following minimum number of separate water closets shall be provided:—

- (a) in ships of under 800 tons: three;
- (b) in ships of 800 tons or over, but under 3,000 tons: four;
- (c) in ships of 3,000 tons or over: six;
- (d) in ships where the radio officers or operators are accommodated in an isolated position, sanitary facilities near or adjacent thereto shall be provided.

3. National laws or regulations shall prescribe the allocation of water closets to various groups, subject to the provisions of paragraph 4 of this Article.

4. Sanitary facilities for all members of the crew who do not occupy rooms to which private facilities are attached shall be provided for each group of the crew on the following scale:

- (a) one tub and/or shower bath for every eight persons or less;

- (b) one water closet for every eight persons or less;
- (c) one wash basin for every six persons or less:

Provided that when the number of persons in a group exceeds an even multiple of the specified number by less than one half of the specified number this surplus may be ignored for the purpose of this paragraph.

5. When the total number of the crew exceeds 100 and in passenger vessels normally engaged on voyages of not more than four hours' duration, consideration may be given by the competent authority to special arrangements or a reduction in the number of facilities required.

6. Cold fresh water and hot fresh water or means of heating water shall be available in all communal wash places. The competent authority, in consultation with the organizations of shipowners and/or the shipowners and with the recognized *bona fide* trade unions of seafarers, may fix the maximum amount of fresh water which the shipowner may be required to supply per man per day.

7. Wash basins and tub baths shall be of adequate size and constructed of approved material with a smooth surface not liable to crack, flake or corrode.

8. All water closets shall have ventilation to the open air, independently of any other part of the accommodation.

9. All water closets shall be of an approved pattern and provided with an ample flush of water, available at all times and independently controllable.

10. Soil pipes and waste pipes shall be of adequate dimensions and shall be so constructed as to minimize the risk of obstruction and to facilitate cleaning.

11. Sanitary accommodation intended for the use of more than one person shall comply with the following requirements:

- (a) floors shall be of approved durable material, easily cleaned and impervious to damp, and shall be properly drained;
- (b) bulkheads shall be of steel or other approved material and shall be watertight up to at least nine inches above the level of the deck;
- (c) the accommodation shall be sufficiently lighted, heated and ventilated;
- (d) water closets shall be situated convenient to, but separate from, sleeping rooms and wash rooms, without direct access from the sleeping rooms or from a passage between sleeping rooms and water closets to which there is no other access: Provided that this requirement shall not apply where a water closet is located in a compartment between two sleeping rooms having a total of not more than four persons;
- (e) where there is more than one water closet in a compartment, they shall be sufficiently screened to ensure privacy.

12. In all ships facilities for washing and drying clothes shall be provided on a scale appropriate to the size of the crew and the normal duration of the voyage.

13. The facilities for washing clothes shall include suitable sinks, which may be installed in wash rooms, if separate laundry accommodation is not reasonably practicable, with an

adequate supply of cold fresh water and hot fresh water or means of heating water.

14. The facilities for drying clothes shall be provided in a compartment separate from sleeping rooms and mess rooms, adequately ventilated and heated and equipped with lines or other fittings for hanging clothes.

Article 14

1. In any ship carrying a crew of fifteen or more and engaged in a voyage of more than three days duration, separate hospital accommodation shall be provided. The competent authority may relax this requirement in respect of vessels engaged in coastal trade.

2. The hospital accommodation shall be suitably situated, so that it is easy of access and so that the occupants may be comfortably housed and may receive proper attention in all weathers.

3. The arrangement of the entrance, berths, lighting, ventilation, heating and water supply shall be designed to ensure the comfort and facilitate the treatment of the occupants.

4. The number of hospital berths required shall be prescribed by the competent authority.

5. Water closet accommodation shall be provided for the exclusive use of the occupants of the hospital accommodation, either as part of the accommodation or in close proximity thereto.

6. Hospital accommodation shall not be used for other than medical purposes.

7. An approved medicine chest with readily understandable instructions shall be carried in every ship which does not carry a doctor.

Article 15

1. Sufficiently and adequately ventilated accommodation for the hanging of oilskins shall be provided outside but convenient to the sleeping rooms.

2. In ships of over 3,000 tons one room for the deck department and one room for the engine department shall be provided and equipped for use as an office.

3. In ships regularly trading to mosquito infested ports provision shall be made to protect the crews' quarters against the admission of mosquitoes by fitting of suitable screens to side scuttles, ventilators and doors to the open deck.

4. All ships trading regularly to or in the tropics and the Persian Gulf shall be equipped with awnings for use over exposed decks above crew accommodation and over recreation deck space or spaces.

Article 16

1. In the case of the ships mentioned in paragraph 5 of Article 10 the competent authority may, in respect of the members of the crew there referred to, modify the requirements laid down in the foregoing Articles as far as may be necessary to take account of their distinctive national habits and customs and in particular may make special arrangements concerning the number of persons occupying sleeping rooms and concerning mess room and sanitary facilities.

2. In modifying the said requirements the competent authority shall be bound by the specifications set forth in paragraphs 1 and 2 of Article 10 and by the minimum sleeping space requirements prescribed for such groups or ratings in paragraph 5 of Article 10.

3. In ships in which the crew in any department are persons of widely different national habits and customs, separate and appropriate sleeping and living accommodation shall be provided as may be necessary to meet the requirements of the different groups.

4. In the case of the ships mentioned in paragraph 5 of Article 10 the hospital, dining, bathing and sanitary facilities shall be provided and maintained on a standard, in regard to their quantity and practical usefulness, equal or comparable to that which obtains aboard all other ships of similar type and belonging to the same registry.

5. The competent authority shall, when framing special regulations under this Article, consult the recognized *bona fide* trade unions of seafarers concerned and the organizations of shipowners and/or the shipowners employing them.

Article 17

1. Crew accommodation shall be maintained in a clean and decently habitable condition and shall be kept free of goods and stores not the personal property of the occupants.

2. The master, or an officer specially deputed for the purpose by him, accompanied by one or more members of the crew, shall inspect all crew accommodation at intervals of not more than one week. The results of each such inspection shall be recorded.

PART IV—APPLICATION OF CONVENTION TO EXISTING SHIPS

Article 18

1. Subject to the provisions of paragraphs 2 and 3 of this Article, this Convention applies to ships the keels of which are laid down subsequent to the coming into force of the Convention for the territory of registration.

2. In the case of a ship which is fully complete on the date of the coming into force of this Convention for the territory of registration and which is below the standard set by Part III of this Convention, the competent authority may, after consultation with the organizations of shipowners and/or the shipowners and with the *bona fide* trade unions of seafarers, require such alterations for the purpose of bringing the ship into conformity with the requirements of the Convention as it deems possible, having regard to the practical problems involved, to be made when—

- (a) the ship is registered;
- (b) substantial structural alterations or major repairs are made to the vessel as a result of long-range plans and not as a result of an accident or emergency.

3. In the case of a ship in the process of building and/or reconversion on the date of the coming into force of this Convention for the territory of registration, the competent authority may, after consultation with the organizations of shipowners and/or the shipowners and with the *bona fide* trade unions of seafarers require such alterations for the purpose of bringing the ship into conformity with the requirements of the Convention as it deems possible having regard to the practical problems involved; such alterations shall constitute final compliance with the terms of this Convention, unless and until the ship be re-registered.

PART V—FINAL PROVISIONS

Article 19

Nothing in this Convention shall affect any law, award, custom or agreement between ship-owners and seafarers which ensures more favourable conditions than those provided for by this Convention.

Article 20

The formal ratification of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 21

1. This Convention shall be binding only upon those members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by seven of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least four countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 22

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Annex 7—Recommendation (No. 78) Concerning the Provision to Crews by Shipowners of Bedding, Mess Utensils and Other Articles

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to the provision to crews of shipowners of bedding, mess utensils and other articles, which is included in the third item on the agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation,

Article 23

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 24

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 25

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 26

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 22 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 27

The English and French versions of the text of this Convention are equally authoritative.

adopts this 29th day of June of the year one thousand nine hundred and forty-six, the following Recommendation which may be cited as the Bedding, Mess Utensils and Miscellaneous Provisions (Ships' Crews) Recommendation, 1946:

The Conference recommends that each Member of the International Labour Organization should apply the following principles and should inform the International Labour Office, as requested by the Governing Body, of the measures taken to give effect thereto:

1. (1) Clean bed linen, blankets, bedspreads and mess utensils should be supplied to the members of the crew by the shipowner for use

on board during service on the ship, and such members should be responsible for their return at times specified by the master and on completion of service in the ship.

(2) In the event of any article not being returned in good condition, fair wear and tear excepted, the member of the crew concerned should pay cost price.

Annex 8—Convention (No. 68) Concerning Food and Catering for Crews on Board Ship

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to food and catering for crews on board ship, which is the fourth item on the agenda of the Session, and

Having determined that these proposals shall take the form of an International Convention

adopts this 27th day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Food and Catering (Ships' Crews) Convention, 1946:

Article 1

1. Every Member of the International Labour Organization for which this Convention is in force is responsible for the promotion of a proper standard of food supply and catering service for the crews of its sea-going vessels, whether publicly or privately owned, which are engaged in the transport of cargo or passengers for the purpose of trade and registered in a territory for which this Convention is in force.

2. National laws or regulations or, in the absence of such laws or regulations, collective agreements between employers and workers, shall determine the vessels or classes of vessels which are to be regarded as sea-going vessels for the purpose of this Convention.

Article 2

The following functions shall be discharged by the competent authority, except in so far as these functions are adequately discharged in virtue of collective agreements:

- (a) the framing and enforcement of regulations concerning food and water supplies, catering, and the construction, location, ventilation, heating, lighting, water system and equipment of galleys and other catering department spaces on board ship including store rooms and refrigerated chambers;
- (b) the inspection of food and water supplies and of the accommodation arrangements and equipment on board ship for the storage, handling and preparation of food;
- (c) the certification of such members of the catering department staff as are required to possess prescribed qualifications;
- (d) research into, and educational and propaganda work concerning methods of ensuring proper food supply and catering service.

Article 3

1. The competent authority shall work in close co-operation with the organizations of ship-owners and seafarers and with national or local

2. Bed linen, blankets and bedspreads should be of good quality and plates, cups and other mess utensils should be of approved material which can be easily cleaned.

3. Towels, soap and toilet paper for the members of the crew should be provided by the shipowner.

authorities concerned with questions of food and health, and may where necessary utilize the services of such authorities.

2. The activities of the various authorities shall be duly co-ordinated so as to avoid overlapping or uncertainty of jurisdiction.

Article 4

The competent authority shall have a permanent staff of qualified persons, including inspectors.

Article 5

1. Each Member shall maintain in force laws or regulations concerning food supply and catering arrangements designed to secure the health and well-being of the crews of the vessels mentioned in Article 1.

2. These laws or regulations shall require—
- (a) the provision of food and water supplies which, having regard to the size of the crew and the duration and nature of the voyage, are suitable in respect of quantity, nutritive value, quality and variety;
 - (b) the arrangement and equipment of the catering department in every vessel in such a manner as to permit of the service of proper meals to the members of the crew.

Article 6

National laws or regulations shall provide for a system of inspection by the competent authority of—

- (a) supplies of food and water;
- (b) all spaces and equipment used for the storage and handling of food and water;
- (c) galley and other equipment for the preparation and service of meals; and
- (d) the qualification of such members of the catering department of the crew as are required by such laws or regulations to possess prescribed qualifications.

Article 7

1. National laws or regulations or, in the absence of such laws or regulations, collective agreements between employers and workers shall provide for inspection at sea at prescribed intervals by the master, or an officer specially deputed for the purpose by him, together with a responsible member of the catering department of—

- (a) supplies of food and water;
- (b) all spaces and equipment used for the storage and handling of food and water, and galley and other equipment for the preparation and service of meals.

2. The results of each such inspection shall be recorded.

Article 8

A special inspection shall be made by the representatives of the competent authority of the territory of registration on written com-

plaint made by a number or proportion of the crew prescribed by national laws or regulations or on behalf of a recognized organization of shipowners or seafarers. In order to avoid delay in sailing, such complaints should be submitted as soon as possible but at least twenty-four hours before the scheduled time of departure from port.

Article 9

1. Inspectors shall have authority to make recommendations to the owner of a ship, or to the master or other person responsible, with a view to the improvement of the standard of catering.

2. National laws or regulations shall prescribe penalties for—

- (a) failure by an owner, master, member of the crew, or other person responsible to comply with requirements of the national laws or regulations in force; and
- (b) any attempts to obstruct an inspector in the discharge of his duties.

3. Inspectors shall submit regularly to the competent authority reports framed on uniform lines dealing with their work and its results.

Article 10

1. The competent authority shall prepare an annual report.

2. The annual report shall be issued as soon as practicable after the end of the year to which it relates and shall be made readily available to all bodies and persons concerned.

3. Copies of the annual report shall be transmitted to the International Labour Office.

Article 11

1. Courses of training for employment in the catering department of sea-going ships shall be organized either in approved schools or by means of other arrangements acceptable to both shipowners' and seafarers' organizations.

2. Facilities shall be provided for refresher courses to enable persons already trained to bring their knowledge and skill up to date.

Article 12

1. The competent authority shall collect up-to-date information on nutrition and on methods of purchasing, storing, preserving, cooking and serving food, with special reference to the requirements of catering on board ship.

2. This information shall be made available, free of charge or at reasonable cost, to manufacturers of and traders in ships' food supplies and equipment, ships' masters, stewards and cooks, and shipowners and seafarers and their organizations generally; appropriate forms of publicity, such as manuals, brochures, posters, charts or advertisements in trade journals shall be used for this purpose.

3. The competent authority shall issue recommendations to avoid wastage of food, facilitate the maintenance of a proper standard of cleanliness, and ensure the maximum practicable convenience in working.

Article 13

Any of the functions of the competent authority in respect of the certification of catering department staff and the collection and distribution of information may be discharged by delegating the work, or part of it, to a central organization or authority exercising similar functions in respect of seafarers generally.

Article 14

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 15

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by nine of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least five countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 16

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 17

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 18

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 19

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour

Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 20

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides—

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation by this Convention, notwithstanding the provisions of

Article 16 above, if and when the new revising Convention shall have come into force;

- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 21

The English and French versions of the text of this Convention are equally authoritative.

Annex 9—Convention (No. 69) Concerning the Certification of Ships' Cooks

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-Eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to the certification of ships' cooks, which is included in the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of an International Convention

adopts this 27th day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Certification of Ships' Cooks Convention, 1946:

Article 1

1. This Convention applies to sea-going vessels, whether publicly or privately owned, which are engaged in the transport of cargo or passengers for the purpose of trade and registered in a territory for which this Convention is in force.

2. National laws or regulations or, in the absence of such laws or regulations, collective agreements between employers and workers, shall determine the vessels or classes of vessels which are to be regarded as sea-going vessels for the purpose of this Convention.

Article 2

For the purpose of this Convention the term "ship's cook" means the person directly responsible for the preparation of meals for the crew of the ship.

Article 3

1. No person shall be engaged as ship's cook on board any vessel to which this Convention applies unless he holds a certificate of qualification as ship's cook granted in accordance with the provisions of the following articles.

2. Provided that the competent authority may grant exemptions from the provisions of this article if in its opinion there is an inadequate supply of certificated ships' cooks.

Article 4

1. The competent authority shall make arrangements for the holding of examinations and for the granting of certificates of qualification.

2. No person shall be granted a certificate of qualification unless—

- (a) he has reached a minimum age to be prescribed by the competent authority;
- (b) he has served at sea for a minimum period to be prescribed by the competent authority; and

- (c) he has passed an examination to be prescribed by the competent authority.

3. The prescribed examination shall provide a practical test of the candidate's ability to prepare meals; it shall also include a test of his knowledge of food values, the drawing up of varied and properly balanced menus, and the handling and storage of food on board ship.

4. The prescribed examination may be conducted and certificates granted either directly by the competent authority or, subject to its control, by an approved school for the training of cooks or other approved body.

Article 5

Article 3 of this Convention shall apply after the expiration of a period not exceeding three years from the date of entry into force of the Convention for the territory where the vessel is registered: Provided that, in the case of a seaman who has had a satisfactory record of two years' service as cook before the expiration of the aforesaid period, national laws or regulations may provide for the acceptance of a certificate of such service as equivalent to a certificate of qualification.

Article 6

The competent authority may provide for the recognition of certificates of qualification issued in other territories.

Article 7

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 8

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by nine of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least five countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 9

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this article, will be bound for another period of ten years and, hereafter may denounce this Convention at the expiration of each period of ten years under the terms provided for in this article.

Article 10

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 11

The Director of the International Labour Office shall communicate to the Secretary-Gen-

eral of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding articles.

Article 12

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 13

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides—

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 9 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 14

The English and French versions of the text of this Convention are equally authoritative.

Annex 10—Convention (No. 73) Concerning the Medical Examination of Seafarers

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to the medical examination of seafarers, which is included in the fifth item on the agenda of the Session, and

Having determined that these proposals shall take the form of an International Convention.

adopts this 29th day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Medical Examination (Seafarers) Convention, 1946:

Article 1

1. This Convention applies to every sea-going vessel, whether publicly or privately owned, which is engaged in the transport of cargo or passengers for the purpose of trade and is registered in a territory for which this Convention is in force.

2. National laws or regulations shall determine when vessels are to be regarded as sea-going.

3. This Convention does not apply to—

- (a) vessels of less than 200 tons gross register tonnage;
- (b) wooden vessels of primitive build such as dhows and junks;
- (c) fishing vessels;
- (d) estuarial craft.

Article 2

Without prejudice to the steps which should be taken to ensure that the persons mentioned below are in good health and not likely to endanger the health of other persons on board, this Convention applies to every person who is engaged in any capacity on board a vessel except—

- (a) a pilot (not a member of the crew);
- (b) persons employed on board by an employer other than the shipowner, except radio officers or operators in the service of a wireless telegraphy company;
- (c) travelling dockers (longshoremen) not members of the crew;
- (d) persons employed in ports who are not ordinarily employed at sea.

Article 3

1. No person to whom this Convention applies shall be engaged for employment in a vessel to

which this Convention applies unless he produces a certificate attesting to his fitness for the work for which he is to be employed at sea signed by a medical practitioner or, in the case of a certificate solely concerning his sight, by a person authorized by the competent authority to issue such a certificate.

2. Provided that, for a period of two years from the date of the entry into force of this Convention for the territory concerned, a person may be so engaged if he produces evidence that he has been employed in a sea-going vessel to which this Convention applies for a substantial period during the previous two years.

Article 4

1. The competent authority shall, after consultation with the shipowners' and seafarers' organizations concerned, prescribe the nature of the medical examination to be made and the particulars to be included in the medical certificate.

2. When prescribing the nature of the examination, due regard shall be had to the age of the person to be examined and the nature of the duties to be performed.

3. In particular, the medical certificate shall attest:

- (a) that the hearing and sight of the person and, in the case of a person to be employed in the deck department (except for certain specialist personnel, whose fitness for the work which they are to perform is not likely to be affected by defective colour vision) his colour vision, are all satisfactory; and
- (b) that he is not suffering from any disease likely to be aggravated by, or to render him unfit for, service at sea or likely to endanger the health of other persons on board.

Article 5

1. The medical certificate shall remain in force for a period not exceeding two years from the date on which it was granted.

2. In so far as a medical certificate relates to colour vision it shall remain in force for a period not exceeding six years from the date on which it was granted.

3. If the period of validity of a certificate expires in the course of a voyage the certificate shall continue in force until the end of that voyage.

Article 6

1. In urgent cases the competent authority may allow a person to be employed for a single voyage without having satisfied the requirements of the preceding Articles.

2. In such cases the terms and conditions of employment shall be the same as those of seafarers in the same category holding a medical certificate.

3. Employment in virtue of this Article shall not be deemed on any subsequent occasion to be previous employment for the purpose of Article 3.

Article 7

The competent authority may provide for the acceptance in substitution for a medical certificate of evidence in a prescribed form that the required certificate has been given.

Article 8

Arrangements shall be made to enable a person who, after examination, has been refused a certificate to apply for a further examination by a medical referee or referees who shall be independent of any shipowner or of any organization of shipowners or seafarers.

Article 9

Any of the functions of the competent authority under this Convention may, after consultation with the organizations of shipowners and seafarers, be discharged on delegating the work, or part of it, to an organization or authority exercising similar functions in respect of seafarers generally.

Article 10

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 11

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by seven of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least four countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 12

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 13

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention

into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 14

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 15

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Annex 11—Convention (No. 74) Concerning the Certification of Able Seamen

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to the certification of able seamen, which is included in the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of an International Convention,

adopts this 29th day of June of the year one thousand nine hundred and forty-six the following Draft Convention which may be cited as the Certification of Able Seamen Convention, 1946:

Article 1

No person shall be engaged on any vessel as an able seaman unless he is a person who by national laws or regulations is deemed to be competent to perform any duty which may be required of a member of the crew serving in the deck department (other than an officer or leading or specialist rating) and unless he holds a certificate of qualification as an able seaman granted in accordance with the provisions of the following Articles.

Article 2

1. The competent authority shall make arrangements for the holding of examinations and for the granting of certificates of qualification.

2. No person shall be granted a certificate of qualification unless—

- (a) he has reached a minimum age to be prescribed by the competent authority;
- (b) he has served at sea in the deck department for a minimum period to be prescribed by the competent authority; and
- (c) he has passed an examination of proficiency to be prescribed by the competent authority.

3. The prescribed minimum age shall not be less than eighteen years.

Article 16

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 12 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 17

The English and French versions of the text of this Convention are equally authoritative.

4. The prescribed minimum period of service at sea shall not be less than thirty-six months: Provided that the competent authority may—

- (a) permit persons with a period of actual service at sea of not less than twenty-four months who have successfully passed through a course of training in an approved training school to reckon the time spent in such training, or part thereof, as sea service; and
- (b) permit persons trained in approved sea-going training ships who have served eighteen months in such ships to be certificated as able seamen upon leaving in good standing.

5. The prescribed examination shall provide a practical test of the candidate's knowledge of seamanship and of his ability to carry out effectively all the duties that may be required of an able seaman, including those of a lifeboatman: it shall be such as to qualify a successful candidate to hold the special lifeboatman's certificate provided for in Article 22 of the International Convention for the Safety of Life at Sea, 1929, or in the corresponding provision of any subsequent Convention revising or replacing that Convention for the time being in force for the territory concerned.

Article 3

A certificate of qualification may be granted to any person who, at the time of the entry into force of this Convention for the territory concerned, is performing the full duties of an able seaman or leading deck rating or has performed such duties.

Article 4

The competent authority may provide for the recognition of certificates of qualification issued in other territories.

Article 5

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 6

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Director.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

Article 7

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 8

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the second ratification communicated to him, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 9

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 10

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 11

1. Should the Conference adopt a new Convention revising this Convention in whole or in part then, unless the new Convention otherwise provides,

(a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 7 above, if and when the new revising Convention shall have come into force;

(b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 12

The English and French versions of the text of this Convention are equally authoritative.

Annex 12—Recommendation (No. 77) Concerning the Organization of Training for Sea Service

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eight Session on 6 June, and

Having decided upon the adoption of certain proposals with regard to the organization of training for sea service, which is included in the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation, adopts this 29th day of June of the year one thousand nine hundred and forty-six the following Recommendation which may be cited as the Vocational Training (Seafarers) Recommendation, 1946:

The Conference recommends that each maritime Member of the International Labour Organization should take the following principles and rules into consideration in connection with the organization of training for sea service and should report to the International Labour Office as requested by the Governing Body concerning the measures taken to give effect thereto:

1. The work of the various official and private institutions in each country which deal with vocational training for service at sea should, while ensuring free play to initiative and adaptability to the varying requirements of the shipping industry and to local conditions in the country, be co-ordinated and developed on the basis of a general program which will provide adequate incentives to attract men to the maritime industry and to make seafaring their occupation in life.

2. This program should take account of—

- (a) the occupational interests and cultural and moral requirements of the seafarer;
- (b) the labour requirements of the shipping industry, with special regard to changes in technique and methods of organization of work and to the trend of development in the labour market;
- (c) the economic and social interests of the community.

3. The co-ordination and development of the work of training institutions should be undertaken on a national scale with the systematic collaboration of the national and local authori-

ties concerned with the matters mentioned in the preceding paragraph and with the organization of shipowners and seafarers concerned

4. (1) Where the program of training includes training for young persons in shore establishments and/or training vessels before they are first employed at sea, facilities for such training should be available for those who intend to serve as ratings as well as for those training to become officers.

(2) The age of entry and other conditions of admission and the curriculum in institutions for pre-sea training should be related to the age of leaving and the curriculum of the schools of the country.

(3) The curriculum of institutions for pre-sea training should so far as practicable include subjects of general educational value, and special attention should be paid to the health and physical training of the students.

5. (1) Provision should be made for the organization of courses of training for persons who wish to improve and refresh their technical skill and knowledge, to acquire a special skill or to qualify for promotion to a higher grade or rank.

(2) These courses should include correspondence courses specially adapted to the needs of persons already serving at sea.

6. (1) Systematic efforts should be made to ensure that so far as practicable no person who wishes to enter sea service or to rise to the highest rank therein for which his natural abilities qualify him shall be debarred from so

doing by reason of his own or his parents' financial circumstances.

(2) To assist in carrying out this principle, the award of scholarships and allowances, the adjustment of fees, the granting of paid study leave, the provision of facilities for the borrowing or purchase of books and instruments, and correspondence courses should be encouraged.

7. (1) Measures should be taken to supply parents, schools, vocational guidance institutions, employment exchanges and other bodies concerned and seafarers with information concerning the conditions upon which training for sea service can be obtained, the facilities that are available and the benefits to be derived from taking advantage of such facilities, including employment opportunities which may be available within successive periods.

(2) In particular, authorized lists of private institutions which are considered satisfactory in respect of the efficiency of their equipment, the quality of the tuition and training and general administration, and the fees charged should be published.

8. Encouragement should be given to the extension of facilities for the continuance of vocational and general education at sea by—

- (a) the provision of ships' libraries and cinema films of educational as well as recreational value;
- (b) the organization of correspondence courses;
- (c) the broadcasting of special radio programs.

Annex 13—Convention (No. 72) Concerning Vacation Holidays With Pay for Seafarers

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals with regard to holidays with pay for seafarers, which is the sixth item on the agenda of the Session, and

Considering that these proposals involve the total revision of the Holidays with Pay (Sea) Convention, 1936, and must take the form of an International Convention,

adopts this 28th day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Paid Vacations (Seafarers) Convention, 1946.

Article 1

1. This Convention applies to every sea-going mechanically propelled vessel, whether publicly or privately owned, engaged in the transport of cargo or passengers for the purpose of trade and registered in a territory for which this Convention is in force.

2. National laws or regulations or, in the absence of such laws or regulations, collective agreements shall determine when vessels are to be regarded as sea-going vessels for the purpose of this Convention.

3. This Convention does not apply to—

- (a) wooden vessels of primitive build such as dhows and junks;

- (b) vessels engaged in fishing or in operations directly connected therewith; or in sealing or similar pursuits;
- (c) estuarial craft.

4. National laws or regulations or collective agreements may provide for the exemption from the provisions of this Convention of Vessels of less than 200 gross register tons.

Article 2

1. This Convention applies to every person who is engaged in any capacity on board a vessel except—

- (a) a pilot not a member of the crew;
- (b) a doctor not a member of the crew;
- (c) nursing staff engaged exclusively on nursing duties and hospital staff not members of the crew;
- (d) persons working exclusively on their own account or remunerated exclusively by a share of profits or earnings;
- (e) persons not remunerated for their services or remunerated only by a nominal salary or wage;
- (f) persons employed on board by an employer other than the shipowner except radio officers or operators in the service of a wireless telegraphy company;
- (g) travelling dockers (longshoremen) not members of the crew;
- (h) persons employed in whale-catching, in floating factories or otherwise, for the purpose of whaling or similar operations under conditions regulated by the provisions of a special collective whaling or

similar agreement determining the rates of pay, hours of work and other conditions of service concluded by an organization of seafarers.

- (i) persons employed in port who are not ordinarily employed at sea.

2. The competent authority may, after consultation with the organizations of shipowners and seafarers concerned, exempt from the application of the Convention masters, chief navigating officers and chief engineers who by virtue of national laws or regulations or collective agreements enjoy conditions of service which are not less favourable in respect of annual leave than those required by the Convention.

Article 3

1. Every person to whom this Convention applies shall be entitled after twelve months of continuous service to an annual vacation holiday with pay, the duration of which shall be—

- (a) in the case of masters, officers and radio officers or operators, not less than eighteen working days of each year of service;
(b) in the case of other members of the crew, not less than twelve working days for each year of service.

2. A person with not less than six months of continuous service shall on leaving such service be entitled in respect of each complete month of service to one and a half working days' leave in the case of a master, officer, or radio officer or operator, and one working day's leave in the case of another member of the crew.

3. A person who is discharged through no fault of his own before he has completed six months of continuous service shall on leaving such service be entitled in respect of each complete month of service to one and a half working days' leave in the case of a master, officer, or radio officer or operator, and one working day's leave in the case of another member of the crew.

4. For the purpose of calculating when a vacation holiday is due—

- (a) service off articles shall be included in the reckoning of continuous service;
(b) short interruptions of service not due to the act or fault of the employee and not exceeding a total of six weeks in any twelve months shall not be deemed to break the continuity of the periods of service which precede and follow them;
(c) continuity of service shall not be deemed to be interrupted by any change in the management or ownership of the vessel or vessels in which the person concerned has served.

5. The following shall not be included in the annual vacation holiday with pay:

- (a) public and customary holidays;
(b) interruptions of service due to sickness or injury.

6. National laws or regulations or collective agreements may provide for the division into parts of an annual vacation holiday due in virtue of this Convention or for the accumulation of such a vacation holiday due in respect of one year with a subsequent vacation holiday.

7. National laws or regulations or collective agreements may in very exceptional circumstances when the service so requires, provide for the substitution of an annual vacation holiday due in virtue of this Convention of a cash pay-

ment at least equivalent to the remuneration provided for in Article 5.

Article 4

1. When an annual vacation holiday is due it shall be given by mutual agreement at the first opportunity as the requirements of the service allow.

2. No person may be required without his consent to take the annual vacation holiday due to him at a port other than a port in the territory of engagement or a port in his home territory. Subject to this requirement, the vacation holiday shall be given at a port permitted by national laws or regulations or collective agreement.

Article 5

1. Every person taking a vacation holiday in virtue of Article 3 of this Convention shall receive in respect of the full period of the vacation holiday his usual remuneration.

2. The usual remuneration payable in virtue of the preceding paragraph shall include a suitable subsistence allowance and shall be calculated in a manner which shall be prescribed by national laws or regulations or fixed by collective agreement.

Article 6

Subject to the provisions of paragraph 7 of Article 3 any agreement to relinquish the right to an annual vacation holiday with pay, or to forgo such a vacation holiday, shall be void.

Article 7

A person who leaves or is discharged from the service of his employer before he has taken a vacation holiday due to him shall receive in respect of every day of vacation holiday due to him in virtue of this Convention the remuneration provided for in Article 5.

Article 8

Each Member which ratifies this Convention shall ensure the effective application of its provisions.

Article 9

Nothing in this Convention shall affect any law, award, custom or agreement between shipowners and seamen which ensures more favourable conditions than those provided by this Convention.

Article 10

1. Effect may be given to this Convention by (a) laws or regulations; (b) collective agreements between employers and workers; or (c) a combination of laws or regulations and collective agreements between employers and workers. Except as may be otherwise provided herein, the provisions of this Convention shall be made applicable to every vessel registered in the territory of the ratifying Member and to every person engaged on any such vessel.

2. Where effect has been given to any provision of this Convention by a collective agreement in pursuance of paragraph 1 of this Article, then, notwithstanding anything contained in Article 8 of this Convention, the Member in whose territory the agreement is in force shall not be required to take any measures in pursuance of Article 8 in respect of the provisions of the Convention to which effect has been given by collective agreement.

3. Each Member ratifying this Convention shall supply to the Director of the International Labour Office information on the measures by which the Convention is applied, including particulars of any collective agreements which give effect to any of its provisions and are in force at the date when the Member ratifies the Convention.

4. Each Member ratifying this Convention undertakes to take part, by means of a tripartite delegation, in any committee representative of governments and shipowners' and seafarers' organizations and including in an advisory capacity representatives of the Joint Maritime Commission of the International Labour Office which may be set up for the purpose of examining the measures taken to give effect to the Convention.

5. The Director will lay before the said committee a summary of the information received by him under paragraph 3 above.

6. The committee shall consider whether the collective agreements reported to it give full effect to the provisions of this Convention. Each Member ratifying the Convention undertakes to give consideration to any observations or suggestions concerning the application of the Convention made by the committee and further undertakes to bring to the notice of the organizations of employers and of workers who are parties to any of the collective agreements mentioned in paragraph 1 any observations or suggestions of the aforesaid committee concerning the degree to which such agreements give full effect to the provisions of the Convention.

Article 11

For the purpose of Article 17 of the Holidays with Pay (Sea) Convention, 1936, the present Convention shall be regarded as a Convention revising that Convention.

Article 12

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 13

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall come into force six months after the date on which there have been registered ratifications by nine of the following countries: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey and Yugoslavia, including at least five countries each of which has at least one million gross register tons of shipping. This provision is included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

3. Thereafter, this Convention shall come into force for any Member six months after the date on which its ratification has been registered.

Article 14

1. A Member which has ratified this Convention may denounce it after the expiration of

ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this article.

Article 15

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 16

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding articles.

Article 17

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 18

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 14 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 19

The English and French versions of the text of this Convention are equally authoritative.

Annex 14—Convention (No. 76) Concerning Wages, Hours of Work on Board Ship and Manning

The General Conference of the International Labour Organization,

Having been convened at Seattle by the Governing Body of the International Labour Office, and having met in its Twenty-eighth Session on 6 June 1946, and

Having decided upon the adoption of certain proposals concerning wages, hours of work on board ship and manning, which is the ninth item on the agenda of the Session, and Considering that these proposals involve a complete revision of the Hours of Work and Manning (Sea) Convention, 1936, and must take the form of an International Convention,

adopts this twenty-ninth day of June of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Wages, Hours of Work and Manning (Sea) Convention, 1946:

PART I. GENERAL PROVISIONS

Article 1

Nothing in this Convention shall be deemed to prejudice any provision concerning wages, hours of work on board ship, or manning, by law, award, custom or agreement between shipowners and seafarers, which ensures the seafarers conditions more favourable than those provided for by this Convention.

Article 2

1. The Convention applies to every vessel, whether publicly or privately owned, which is—

- (a) mechanically propelled;
- (b) registered in a territory for which the Convention is in force;
- (c) engaged in the transport of cargo or passengers for the purpose of trade; and
- (d) engaged in a voyage by sea.

2. This Convention does not apply to—

- (a) vessels of less than 500 gross register tons;
- (b) wooden vessels of primitive build such as dhows and junks;
- (c) vessels engaged in fishing or in operations directly connected therewith;
- (d) estuarial craft.

Article 3

This Convention applies to every person who is engaged in any capacity on board a vessel except—

- (a) a master;
- (b) a pilot not a member of the crew;
- (c) a doctor;
- (d) nursing staff engaged exclusively on nursing duties and hospital staff;
- (e) persons whose duties are connected solely with the cargo on board;
- (f) persons working exclusively on their own account or remunerated exclusively by a share of profits or earnings;
- (g) persons not remunerated for their services or remunerated only by a nominal salary or wage;
- (h) persons, excluding those in the service of a wireless telegraphy company, who are employed on board by an employer other than the shipowner;

- (i) travelling dockers (longshoremen) not members of the crew;
- (j) persons employed in whale-catching, floating factory or transport vessels or otherwise for the purpose of whaling or similar operations under conditions regulated by the provisions of a special collective whaling or similar agreement determining the rates of pay, hours of work and other conditions of service concluded by an organization of seafarers;
- (k) persons who are not members of the crew (whether working on or off articles) but are employed while the vessel is in port on repairing, cleaning, loading or unloading the vessel or similar work or on port relief, maintenance, watch or caretaking duties.

Article 4

In this Convention—

- (a) the term "officer" means a person other than a master who is described in the ship's articles as an officer or who is serving in a capacity which by law, collective agreement or custom is recognized as that of an officer;
- (b) the term "rating" means a member of the crew other than a master or officer and includes a certified seaman;
- (c) the term "able seaman" means any person who by national laws or regulations, or in the absence of such laws or regulations by collective agreement, is deemed to be competent to perform any duty which may be required of a rating serving in the deck department other than the duties of a leading or specialist rating;
- (d) the term "basic pay or wages" means the remuneration of an officer or rating in cash, exclusive of overtime, premiums or any other allowances either in cash or in kind.

PART II. WAGES

Article 5

1. The basic pay or wages for a calendar month of service of an able seaman employed in a vessel to which this Convention applies shall not be less than sixteen pounds in currency of the United Kingdom of Great Britain and Northern Ireland or sixty-four dollars in currency of the United States of America or the equivalent thereof in other currency.

2. In the event of a change in the par value of the pound or the dollar being notified to the International Monetary Fund—

- (a) the minimum basic wage prescribed in paragraph 1 of this Article in terms of the currency in respect of which such notification has been made shall be adjusted so as to maintain equivalence with the other currency;
- (b) the adjustment shall be notified by the Director of the International Labour Office to the Members of the International Labour Organization; and
- (c) the minimum basic wage so adjusted shall be binding upon Members which have ratified the Convention in the same manner as the wage prescribed in para-

graph 1 of this Article, and shall take effect for each such Member not later than the beginning of the second calendar month following that in which the Director communicates the change to Members.

Article 6

1. In the case of ships in which are employed such groups of ratings as necessitate the employment of larger groups of ratings than would otherwise be employed the minimum basic pay or wages of an able seaman shall be an amount fixed as the adjusted equivalent of the minimum basic pay or wages stipulated in the preceding article.

2. The adjusted equivalent shall be fixed in accordance with the principle of equal pay for equal work and due allowance shall be made for—

- (a) the extra number of ratings of such groups who are employed; and
- (b) any increase or decrease in cost to the shipowner consequent on the employment of such groups of ratings.

3. The adjusted equivalent shall be determined by collective agreement between the organizations of shipowners and seafarers concerned or, failing such agreement and subject to both countries concerned having ratified the Convention, by the competent authority of the territory of the group of seafarers concerned.

Article 7

If meals are not provided free of charge, the minimum basic pay or wages shall be increased by an amount to be determined by collective agreement between the organization of shipowners and seafarers concerned or, failing such agreement, by the competent authority.

Article 8

1. The rate to be used for determining the equivalent in other currency of the minimum basic pay or wages prescribed in Article 5 shall be the ratio between the par value of that currency and the par value of the pound of the United Kingdom of Great Britain and Northern Ireland or of the dollar of the United States of America.

2. In the case of the currency of a Member of the International Labour Organization which is a Member of the International Monetary Fund the par value shall be that currently in effect under the Articles of Agreement of the International Monetary Fund.

3. In the case of the currency of a Member of the International Labour Organization which is not a Member of the International Monetary Fund, the par value shall be the official rate of exchange, in terms of gold or of the dollar of the United States of America of the weight and fineness in effect on 1 July 1944, currently in effect for payments and transfers for current international transactions.

4. In the case of any currency which cannot be dealt with under the provisions of either of the two preceding paragraphs—

- (a) the rate to be adopted for the purpose of this Article shall be determined by the Member of the International Labour Organization concerned;
- (b) the Member concerned shall notify its decision to the Director of the Interna-

tional Labour Office, who shall forthwith inform the other Members which have ratified this Convention;

(c) within a period of six months from the date on which the information is communicated by the Director, any other Member which has ratified the Convention may inform the Director of the International Labour Office that it objects to the decision, and the Director shall thereupon inform the Member concerned and the other Members which have ratified the Convention and shall report the matter to the Committee provided for in Article 21;

(d) the foregoing provisions shall apply in the event of any change in the decision of the Member concerned.

5. A change in basic pay or wages as a result of a change in the rate for determining the equivalent in other currency shall take effect not later than the beginning of the second calendar month following that in which the change in the relative par values of the currencies concerned becomes effective.

Article 9

Each Member shall take the necessary measures—

- (a) to ensure, by way of a system of supervision and sanctions, that remuneration is paid at not less than the rate required by this Convention; and
- (b) to ensure that any person who has been paid at a rate less than that required by this Convention is enabled to recover, by an inexpensive and expeditious judicial or other procedure, the amount by which he has been underpaid.

PART III. HOURS OF WORK ON BOARD SHIP

Article 10

This Part of this Convention does not apply to—

- (a) a chief officer or chief engineer;
- (b) a purser;
- (c) any other officer in charge of a department who does not keep watch;
- (d) a person employed in the clerical or catering department of a vessel who is
 - (i) serving in a superior grade as defined by a collective agreement between the organizations of shipowners and seafarers concerned; or
 - (ii) working chiefly on his own account; or
 - (iii) remunerated solely on a commission basis or chiefly by a share of profits or earnings.

Article 11

In this Part of this Convention—

- (a) the term "near trade ship" means a vessel exclusively engaged in voyages upon which it does not proceed farther from the country from which it trades than the near-by ports of neighbouring countries within geographical limits which—
 - (i) are clearly specified by national laws, regulations or by collective agreement between organizations of shipowners and seafarers;

- (ii) are uniform in respect of the application of all the provisions of this Part of the Convention;
 - (iii) have been notified by the Member when registering its ratification by a declaration annexed thereto; and
 - (iv) have been fixed after consultation with the other Members concerned;
- (b) the term "distant trade ship" means a vessel other than a near-trade ship;
 - (c) the term "passenger ship" means a vessel licensed to carry more than twelve passengers;
 - (d) the term "hours of work" means time during which a person is required by the orders of a superior to do work on account of the vessel or the owner.

Article 12

1. This Article applies to officers and ratings employed in the deck, engine-room and radio departments of near-trade ships.

2. The normal hours of work of an officer or rating shall not exceed—

- (a) when the vessel is at sea twenty-four hours in any period of two consecutive days;
- (b) when the vessel is in port—
 - (i) on the weekly day of rest, such time not exceeding two hours as is necessary for ordinary routine and sanitary duties;
 - (ii) on other days, eight hours except where a collective agreement provides for less on any day;
- (c) one hundred and twelve hours in a period of two consecutive weeks.

3. Time worked in excess of the limits prescribed in subparagraphs (a) and (b) of paragraph 2 shall be regarded as overtime for which the officer or rating concerned shall be entitled to compensation in accordance with the provisions of Article 17 of this Convention.

4. When the total number of hours worked in a period of two consecutive weeks, excluding hours regarded as overtime, exceeds one hundred and twelve, the officer or rating concerned shall be compensated by time off in port or otherwise as may be determined by collective agreement between the organizations of ship-owners and seafarers concerned.

5. National laws or regulations or collective agreements shall determine when a ship is to be regarded as being at sea and when it is to be regarded as being in port for the purposes of this Article.

Article 13

1. This Article applies to officers and ratings employed in the deck, engine-room and radio departments of distant-trade ships.

2. When the vessel is at sea and on days of sailing and arrival, the normal hours of work of an officer or rating shall not exceed eight hours in any one day.

3. When the vessel is in port, the normal hours of work of an officer or rating shall not exceed—

- (a) on the weekly day of rest: such time not exceeding two hours as is necessary for ordinary routine and sanitary duties;
- (b) on other days: eight hours except where a collective agreement provides for less on any day.

4. Time worked in excess of the daily limits prescribed in the preceding paragraphs shall be regarded as overtime for which the officer or rating shall be entitled to compensation in accordance with the provisions of Article 17 of this Convention.

5. When the total number of hours worked in a period of one week, excluding hours regarded as overtime, exceeds forty-eight, the officer or rating shall be compensated by time off in port or otherwise as may be determined by collective agreement between the organizations of shipowners and seafarers concerned.

6. National laws or regulations or collective agreements shall determine when a ship is to be regarded as being at sea and when it is to be regarded as being in port for the purposes of this Article.

Article 14

1. This Article applies to persons employed in the catering department of a vessel.

2. In the case of a passenger ship normal hours of work shall not exceed—

- (a) when the vessel is at sea, and on days of sailing and arrival, ten hours in any consecutive period of fourteen hours;
- (b) when the vessel is in port—
 - (i) when passengers are on board, ten hours in any period of fourteen hours;
 - (ii) in other cases—
 - on the day preceding the weekly day of rest, five hours;
 - on the weekly day of rest, five hours for persons engaged in messing duties and such time not exceeding two hours as is necessary for ordinary routine and sanitary duties in the case of other persons; on any other day, eight hours.

3. In the case of a vessel not a passenger ship, normal hours of work shall not exceed—

- (a) when the vessel is at sea and on days of sailing and arrival, nine hours in any period of thirteen hours;
- (b) when the vessel is in port—
 - on the weekly day of rest, five hours;
 - on the day preceding the weekly day of rest, six hours;
 - on any other days, eight hours in any period of twelve hours.

4. When the total number of hours worked in a period of two consecutive weeks exceeds one hundred and twelve the person concerned shall be compensated by time off in port or otherwise as may be determined by collective agreement between the organizations of ship-owners and seafarers concerned.

5. National laws or regulations or collective agreements between the organizations of ship-owners and seafarers concerned may make special arrangements for the regulation of the hours of work of night watchmen.

Article 15

1. This Article applies to officers and ratings employed in near and distant trade ships.

2. Time off in port should be the subject of negotiations between the organizations of ship-owners and seafarers concerned on the basis that officers and ratings should receive the maximum time off in port that is practicable and that such time off should not count as leave.

Article 16

1. The competent authority may exempt from the application of this Part of this Convention officers not already excluded therefrom by virtue of Article 10, subject to the following conditions:

- (a) the officers must be entitled in virtue of a collective agreement to conditions of employment which the competent authority certifies constitute full compensation for the non-application of this part of the Convention;
- (b) the collective agreement must have been originally concluded before 30 June, 1946, and the agreement or a renewal thereof must be still in force.

2. A Member having recourse to the provisions of paragraph 1 shall supply to the Director of the International Labour Office full particulars of any such collective agreement and the Director shall lay a summary of the information received by him before the Committee referred to in Article 21.

3. The said Committee shall consider whether the collective agreements reported to it provide for conditions of employment which constitute full compensation for the non-application of this Part of this Convention. Each Member ratifying the Convention undertakes to give consideration to any observations or suggestions made by the Committee concerning such agreements and further undertakes to bring any such observations or suggests to the notice of the organizations of shipowners and officers who are parties to such agreements.

Article 17

1. The rate or rates of compensation for overtime shall be prescribed by national laws or regulations or be fixed by collective agreement, but in no case shall the hourly rate of payment for overtime be less than one and a quarter times the basic pay or wages per hour.

2. Collective agreements may provide for compensation by equivalent time off duty and off the vessel in lieu of cash payment or for any other method of compensation.

Article 18

1. There shall be no consistent working of overtime.

2. Time spent in the following work shall not be included in normal hours of work or be regarded as overtime for the purposes of this Part of this Convention:

- (a) work that the master deems to be necessary and urgent for the safety of the vessel, cargo or persons on board;
- (b) work required by the master for the purpose of giving assistance to other vessels or persons in distress;
- (c) musters, fire, lifeboat and similar drills of the kind prescribed by the International Convention for the Safety of Life at Sea for the time being in force;
- (d) extra work for the purposes of customs or quarantine or other health formalities;
- (e) normal and necessary work by officers for the determination of the position of the ship and for making meteorological observations;
- (f) extra time required for the normal relieving of watches.

3. Nothing in this Convention shall be deemed to impair the right and duty of the master of a vessel to require, or the duty

of an officer or rating to perform, any work deemed by the master to be necessary for the safe and efficient operation of the vessel.

Article 19

1. No person under the age of sixteen years shall work at night.

2. For the purpose of this Article, "night" means a period of at least nine consecutive hours between times before and after midnight to be prescribed by national laws or regulations or collective agreements.

PART IV. MANNING

Article 20

1. Every vessel to which this Convention applies shall be sufficiently and efficiently manned for the purposes of—

- (a) ensuring the safety of life at sea;
- (b) giving effect to the provisions of Part III of this Convention; and
- (c) preventing excessive strain upon the crew and avoiding or minimizing as far as practicable the working of overtime.

2. Each Member undertakes to maintain, or to satisfy itself that there is maintained efficient machinery for the investigation and settlement of any complaint or dispute concerning the manning of a vessel.

3. Representatives of the organizations of shipowners and seafarers shall participate, with or without other persons or authorities, in the operation of such machinery.

PART V. APPLICATION OF THE CONVENTION

Article 21

1. Effect may be given to this Convention by (a) laws or regulations; (b) collective agreements between shipowners and seafarers (except as regards paragraph 2 of Article 20); or (c) a combination of laws or regulations and collective agreements between shipowners and seafarers. Except as may be otherwise provided herein, the provisions of this Convention shall be made applicable to every vessel registered in the territory of the ratifying Member and to every person engaged on any such vessel.

2. Where effect has been given to any provision of this Convention by a collective agreement in pursuance of paragraph 1 of this Article, then notwithstanding anything contained in Article 9 of this Convention the Member shall not be required to take any measures in pursuance of Article 9 of this Convention in respect of the provisions of the Convention to which effect has been so given by collective agreement.

3. Each Member ratifying this Convention shall supply to the Director of the International Labour Office information on the measures by which the Convention is applied, including particulars of any collective agreement in force which give effect to any of its provisions.

4. Each Member ratifying this Convention undertakes to take part, by means of a tripartite delegation, in any Committee representative of Governments and shipowners' and seafarers' organizations, and including, in an advisory capacity, representatives of the Joint Maritime Commission of the International Labour Office, which may be set up for the purpose of examining the measures taken to give effect to the Convention.

5. The Director shall lay before the said Committee a summary of the information received by him under paragraph 3 above.

6. The Committee shall consider whether the collective agreements reported to it give full effect to the provisions of the Convention. Each Member ratifying the Convention undertakes to give consideration to any observations or suggestions concerning the application of the Convention made by the Committee, and further undertakes to bring to the notice of the organizations of shipowners and of seafarers who are parties to any of the collective agreements mentioned in paragraph 1 any observations or suggestions of the aforesaid Committee concerning the degree to which such agreements give effect to the provisions of the Convention.

Article 22

1. Each Member which ratifies this Convention shall be responsible for the application of its provisions to vessels registered in its territory and shall, except where effect is given to the Convention by collective agreements, maintain in force laws or regulations which—

- (a) determine the respective responsibilities of the shipowner and the master for ensuring compliance therewith;
- (b) prescribe adequate penalties for any violation thereof;
- (c) provide for adequate public supervision of compliance with Part IV of the Convention;
- (d) require the keeping of the records of hours worked necessary for the purposes of Part III of the Convention and of the compensation granted in respect of overtime and of excess hours of work;
- (e) ensure to seafarers the same remedies for recovering payments due to them in respect of compensation for overtime and for excess hours of work as they have for recovering other arrears of pay.

2. The organizations of shipowners and seafarers concerned shall, so far as is reasonable and practicable, be consulted in the framing of all laws or regulations for giving effect to the provisions of this Convention.

Article 23

For the purpose of giving mutual assistance in the enforcement of this Convention every Member which ratifies the Convention undertakes to require the competent authority in every port in its territory to inform the consular or other appropriate authority of any other such Member of any case in which it comes to the notice of such authority that the requirements of the Convention are not being complied with in a vessel registered in the territory of that other Member.

PART VI. FINAL PROVISIONS

Article 24

For the purpose of Article 28 of the Hours of Work and Manning (Sea) Convention, 1936, the present Convention shall be regarded as a Convention revising that Convention.

Article 25

The formal ratifications of this Convention shall be communicated to the Director of the International Labour Office for registration.

Article 26

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director.

2. It shall first come into force six months after the date at which the following conditions have been fulfilled:

- (a) the ratifications of nine of the following Members have been registered: United States of America, Argentine Republic, Australia, Belgium, Brazil, Canada, Chile, China, Denmark, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, India, Ireland, Italy, Netherlands, Norway, Poland, Portugal, Sweden, Turkey, Yugoslavia;
- (b) at least five of the Members whose ratifications have been registered have at the date of registration each not less than one million gross register tons of shipping;
- (c) the aggregate tonnage of shipping possessed at the time of registration by the Members whose ratifications have been registered is not less than fifteen million gross register tons.

3. The provisions of the preceding paragraph are included for the purpose of facilitating and encouraging early ratification of the Convention by Member States.

4. After the Convention has first come into force, it shall come into force for any Member six months after the date on which its ratification has been registered.

Article 27

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention comes into force, by an act communicated to the Director of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not within the year following the expiration of the period of ten years mentioned in the preceding paragraph exercise the right of denunciation provided for in this Article will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 28

1. The Director of the International Labour Office shall notify all the Members of the International Labour Organization of the registration of all ratifications, declarations and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 29

The Director of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter

of the United Nations full particulars of all ratifications, declarations and acts of denunciation registered by him in accordance with the provisions of the preceding articles.

Article 30

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 31

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides—

(a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 27 above, if and when the new revising Convention shall have come into force;

(b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 32

The English and French versions of the text of this Convention are equally authoritative.

WAGE RATES AND HOURS OF LABOUR IN CANADA, 1944

SUMMARY

THE general level of wage rates in Canada was higher in 1944 than in any previous year in the record; the index covering six main industrial groups being 37.5 per cent higher than in 1939, and 28.5 per cent higher than in 1920 which was the peak of the inflationary movement following World War I. For the period August 1939 to December 1944 the index number of the cost of living advanced 17.6 per cent.

During this period considerable increase in wage rates in all main industry groups was recorded, year by year, continuing the advance from the low levels of the depression reached in 1933. From 1939 to 1940 the general index number of wage rates advanced 3.9 per cent; from 1940 to 1941, 8.8 per cent; 1941 to 1942, 8.3 per cent; from 1942 to 1943, 8.4 per cent; and from 1943 to 1944, 3.5 per cent. The percentage increase in 1944 was much less therefore than in any of the three preceding years and slightly less than between 1939 and 1940.

Wage rates in the logging groups were 46.1 per cent higher in 1944 than in 1939, the increase since 1943 being 2.1 per cent. In mining the increase since 1939 was 34.8 per cent and since 1943, was 9.0 per cent. The manufacturing groups showed a wartime increase down to 1944 of 41.1 per cent, the advance since 1943 being 4.1 per cent. Construction recorded an increase in 1944 over 1943 of 1.5 per cent, and transportation, 0.8 per cent. The former advanced 29.6 per cent over 1939 and the latter 28.0 per cent. The services groups, including rates in laundries only, was 1.3 per cent higher in 1944 than in 1943 and 28.9 per cent higher than in 1939. While these indexes indicate the changes in wage rates in the various industries and groups of industries they do not of course afford any comparison of the rates from one industry to another or of the wage levels in one industry compared to another. Increases in wage rates since 1939 tended to be greater than the average in those industries in which per capita weekly earnings were less than the average.

INTRODUCTORY NOTES

Average wage rates in this report represent the payments for a unit of labour, usually one hour, on the basis of straight time rates or average piece work straight time earnings. For convenience they are referred to as average wage rates though average straight time hourly earnings is a more precise designation. In some cases they are average straight time weekly or monthly earnings. These averages* are shown for selected occupations in many industries for Canada and by province or region and in some cases by cities.

The index numbers of wage rates shown in the first tables in this report reflect therefore the changes in average straight time earnings.

The average wage rates shown for 1943 and 1944 were compiled from the statistics reported to the Department of Labour from about 15,000 establishments supplemented in some cases by information from trade union returns and from collective agreements. Most of the establishments with 15 or more employees were included in the survey with a representative number of smaller firms in certain industries, such as garages, machine shops, sawmills, in retail and wholesale trade and in the construction industry.

*The rates do not include the value of any allowances to employees such as, free transportation, uniforms, reporting times, group insurance, sick benefits, etc.

Employers were asked to report their straight time wage or salary rates as well as their average piece work straight time earnings in each occupation. Information was also obtained as to the numbers on the pay roll at each rate in each occupation.

The average rates or straight time earnings computed for each occupation from year to year are affected therefore by changes in the numbers of workers included at each rate as well as by changes in rates or earnings. Changes in rates reflect not only general wage rate and piece rate changes but also changes for individuals and small groups of employees and likewise changes in grade up or down within an occupational rate range. As the rates published are for day shift workers only, they are not affected by changes in shift differentials nor do they reflect any changes in overtime or other premium payments.

Predominant ranges of rates are also shown. These ranges include approximately the middle 80 per cent of the workers covered in each occupation. The purpose of this was to eliminate extremely high and extremely low wages but at the same time to show the ranges between which are included the great majority of the workers in each occupation. The rates for all workers in each occupation are included however in the average wages. The data apply to 1944 but for many industries comparative figures are shown for 1943 and in some cases for earlier years.

The statistics of rates by industries are shown in Tables III to X inclusive, while Table XI contains information on straight time or standard hours of work by industries.

The index number calculated for the period 1939 to 1944 on the base of rates in 1939, the last prewar year as 100, is shown for a fairly detailed industrial breakdown and by main industry groups in Table I, a continuation of the series first published in the preceding Report No. 26. For the period 1901 to 1939 the index is shown in Table II for the main groups of industries only, and in Table IIA for these groups on the base of rates in 1935 to 1939 as 100.

An appendix to the report gives data regarding wages paid to farm labour in 1944 and 1945, as published by the Dominion Bureau of Statistics.

Statistics of rates of wages and hours of labour have been collected by the Department since it began to function in 1900 and were published from time to time in the *Labour Gazette*. A separate report on wages was issued in 1921 as a supplement to the *Labour Gazette*. This was the first report in the series and contained statistics for certain trades and industries in various cities in Canada from 1901 to 1920 with index numbers based on rates in 1913 as 100. The information was obtained mainly from employers and trade unions but data from collective agreements and from Departmental officers and correspondents were also used.

In subsequent reports the scope of the statistics has been gradually broadened to include a representative list of occupations in most industries and additional groups were added from time to time to the table of index numbers.

In Report No. 24, containing statistics for 1940 and previous years, the index number was converted to the base 1935-1939 as 100 following the publication by the Dominion Bureau of Statistics of a new official index number of the cost of living on that base. Report No. 25 covered the years 1929, 1940 and 1941. No report was published covering the year 1942, but a table of index numbers appeared in the *Labour Gazette* for December, 1943.

INDEX NUMBERS

In Table I an index number of wage rates covering the period 1939 to 1943 is shown for each of six main industrial groups and for each of the industries included therein.

The index number was calculated by the use of weighted aggregates. The weighted average wage rate was obtained for each of a representative list of occupations in an industry. Each such average was multiplied by the number of workers in the occupation used as a weight for that occupation. For the index number for the industry the sum of these products was expressed as a percentage of the corresponding sum in the base year.

To obtain each main industrial group index, the indexes for the various industries included were weighted by the number of workers in each industry based on census data. The general index was computed from the main industrial groups by similar weighting procedure.

For the period 1901 to 1939 the index numbers were calculated by the use of link relatives. For this period the percentage change from year to year for each occupation was calculated. The simple arithmetic average of these percentages was obtained and the average increase or decrease applied to the index for the industry for the preceding year. To obtain the general index the main group indexes were weighted in proportion to the number of workers in each group based on data from the decennial census.

WAGE CONTROL AND THE COST OF LIVING BONUS

Much of the wartime increase in wage rates was due to the payment of a cost of living bonus provided for under the wages control policy of the Government. All such bonuses have been included in the rates for these years throughout this Report.

The first order relating to the control of wages and the payment of a bonus to cover increases in the cost of living was Order in Council P.C. 7440 of December 16, 1940, for the guidance of Boards of Conciliation and Investigation in their recommendations in dealing with disputes over wages for mining, some public utilities and war industries under the Industrial Disputes Investigation Act. The policy was recommended also for the adjustment of wages generally.

This Order was replaced by the Wartime Wages and Costs of Living Bonus Order P.C. 8253 of October 24, 1941, which stabilized all wage rates at the level in effect on November 15, 1941. No change in basic rates was permitted without the approval of The National War Labour Board or a Regional Board which were set up under the Order.

This Order in turn was replaced by the Wartime Wages Control Order P.C. 5963 of July 10, 1942, which was a consolidation of previous orders and amendments thereto.

A cost of living bonus was payable under both the above Orders and adjusted quarterly in accordance with orders issued by the National Board. For each rise of one point in the cost of living index of the Dominion Bureau of Statistics, adjusted to the base of August 1939 as 100, the bonus must be increased by 25 cents a week in the case of adult male employees and all other employees receiving \$25.00 a week or more, and by one per cent of the basic weekly wage rate in the case of men under 21 years of age and women who receive less than \$25.00 per week.

Following the establishment of the ceiling on prices effective December 1, 1941, increases in the cost of living were slight with the result that no general adjustment in the bonus was ordered until the summer of 1942. The first adjustment was 60 cents per week for those on the flat rate or 2.4 per cent for those on a percentage basis as from August 15, 1942. This was later increased to 95 cents per week or 3.8 per cent as the case may be as from November 15, 1943.

The maximum bonus payable under these orders was \$4.60 per week for those on the flat rate bonus and 18.4 per cent of the basic wages for those on a per-

centage bonus both based on an increase in the cost of living since August 1939 of 18.4 points.

Under Order in Council P.C. 9384 of December 9, 1943, effective February 15, 1944, provision was made for the establishment of wage rates incorporating therein cost of living bonuses payable in respect of the rise in the cost of living, to stabilize the wage structure established in this manner, and to provide machinery for rectification of any gross inequalities and injustices in wage rates so established.

For details of the Orders in Council dealing with wage control and cost of living bonus, see the *Labour Gazette*; a bulletin issued by the Department of Labour, *Wartime Orders in Council Affecting Labour* (Revised Edition June 1943); and bulletins issued by the National War Labour Board.

Pulp.....	100	108.1	114.4	124.0	128.6	137.0
Newsprint.....	100	103.7	107.7	109.6	115.4	119.6
Paper other than newsprint.....	100	103.4	107.5	113.2	120.1	124.7
Paper boxes.....	100	102.9	115.5	123.9	128.9	133.1
Printing and publishing.....	100	101.7	105.8	110.0	113.6	115.9
Newspaper printing.....	100	101.3	105.5	108.3	111.6	115.8
Job printing and publishing.....	100	101.4	105.9	110.6	113.8	114.9
Lithographing, photo-engraving, stereo- typing and electrotyping.....	100	103.5	106.4	114.6	117.8	118.6
Lumber and its products.....	100	104.4	117.7	131.0	141.9	147.2
Sawmill products.....	100	105.0	115.0	130.7	143.8	148.7
Planing mills, sash, doors, etc.....	100	105.0	120.0	123.7	128.7	133.2
Furniture.....	100	101.7	125.0	139.0	147.6	154.8
Edible plant products.....	100	102.9	115.0	122.5	129.4	133.7
Flour.....	100	103.1	113.9	121.5	128.7	130.3
Bread and cake.....	100	102.9	115.5	123.9	128.9	134.3
Biscuits.....	100	103.5	114.4	121.8	131.9	135.8
Confectionery.....	100	101.9	114.5	118.2	130.0	131.8
Fur products.....	100	105.3	113.7	121.7	127.3	130.5
Leather and its products.....	100	105.9	122.5	134.8	142.9	145.4
Leather (tanning).....	100	104.5	119.5	133.9	148.9	156.8
Boots and shoes.....	100	106.2	123.2	135.0	141.7	142.6
Edible animal products (meat products).....	100	103.2	112.7	119.0	135.1*	137.3*
Iron and its products.....	100	102.7	112.9	125.6	138.8	142.6
Crude, rolled and forged products.....	100	101.5	108.1	122.2	135.5	143.5
Foundry and machine shop products.....	100	104.5	116.0	120.9	137.0	140.8
Machinery, engines, boilers, tanks, etc.....	100	105.0	116.2	129.7	141.7	147.9

Table I—INDEX NUMBERS OF WAGE RATES IN CANADA, BY INDUSTRY,
1939-1944—Concluded

(Rates in 1939=100)

INDUSTRY	1939	1940	1941	1942	1943	1944
Manufacturing—Concluded						
Iron and its Products—Concluded						
Aircraft.....	100	99.0	109.5	122.7	134.0	138.7
Shipbuilding (steel ships).....	100	104.9	121.2	132.2	144.4	145.3
Automobiles, trucks, etc.....	100	100.6	108.6	115.8	122.7	126.3
Automobile and truck equipment and parts...	100	103.4	110.2	127.0	145.7	147.1
Stoves, furnaces, etc.....	100	104.5	115.6	131.0	143.5	149.5
Agricultural implements.....	100	105.1	117.6	136.7	151.9	155.8
Sheet metal products.....	100	103.9	114.1	126.4	138.2	142.8
Tobacco products.....	100	102.8	113.0	120.4	131.5	140.3
Tobacco and cigarettes.....	100	102.5	113.4	119.9	130.8	139.7
Cigars.....	100	104.1	110.8	124.5	135.1	143.0
Beverages (brewery products).....	100	103.9	113.3	117.1	121.9	123.5
Electric current production and distribution.....	100	103.3	112.0	120.2	129.6	132.5
Electrical apparatus and supplies.....	100	105.6	123.2	133.7	146.4	146.5
Radio sets and parts.....	100	105.5	125.5	138.1	151.3	157.3
Electrical machinery, etc.....	100	105.7	118.8	129.9	137.0	141.0

Table III—WAGE RATES IN LOGGING INDUSTRY, 1943 AND 1944

EASTERN CANADA

NOTE.—Rates with board and lodging except in case of pulpwood cutters (pieceworkers) whose rates are without board.

Standard hours per week: 48-60, with most firms reporting 60. In Nova Scotia 54 is most common except for cooks. Daily hours 8-10.

Occupation and Locality	1943 Average Wage Rate per Day	1944	
		Average Wage Rate per Day	Range of Rates per Day
	\$	\$	\$
<i>Blacksmiths—</i>			
New Brunswick.....		3.64	3.38-5.00
Quebec.....	3.80	3.98	3.28-4.70
Ontario.....	4.08	4.63	3.65-6.00
<i>Choppers, Cutters and Sawyers—</i>			
Nova Scotia.....	3.06	4.08	3.66-4.60
New Brunswick.....	3.01	2.98	2.50-3.85
Quebec.....	2.76	2.74	2.31-3.58

Sectionmen.....	5.84	5.76	5.60- 6.00
Signalmen.....	5.84	5.99	5.46- 6.56

*With board.

†Mostly piece-work earnings.

Table IV—WAGE RATES IN MINING INDUSTRY, 1943 AND 1944

1. COAL MINING

NOTE.—Rates shown for 1943 do not include an increase of \$1.00 per day awarded toward the end of 1943 to coal mine employees in Alberta, British Columbia, Nova Scotia and New Brunswick, and an average increase of 16 per cent to employees in Saskatchewan. In Alberta and British Columbia and for Dominion Coal Company employees in Nova Scotia, the award was made retroactive to November 1, 1943, and for the remainder to December 20, 1943.

STANDARD HOURS

	<i>Per Day</i>	<i>Per Week</i>
Nova Scotia.....	8 (Sat. 7 and 8)	47 and 48

Table V—WAGE RATES IN MANUFACTURING INDUSTRIES
1943 AND 1944

(1) PRIMARY TEXTILE PRODUCTS

NOTE.—For more detailed information see report "Wages and Hours in the Primary Textiles Industry in Canada, 1944", issued as a supplement to the LABOUR GAZETTE for February, 1946. The rates shown are average straight time wages or earnings per hour. Most of the employees in this industry are on piece work.

Table VII—WAGE RATES IN TRANSPORTATION AND STORAGE, 1943 AND 1944

(1) WATER TRANSPORTATION (INLAND AND COASTAL)

NOTE.—Rates include board and lodging and vary to a great extent according to size or type of vessel. Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day (watches—six hours on, six hours off) seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight-hour day.

(a) Deductions from each employee's earnings on basic rates effective as follows. Train, engine and telegraph service, 10 per cent Dec. 1, 1931; 20 per cent May 1, 1933; 15 per cent Nov. 1, 1933; Maintenance of way and bridge and building, 10 per cent May 1, 1932; 15 per cent Dec. 1, 1933; Locomotive and car shops, 10 per cent April 1, 1932; 15 per cent Dec. 16, 1933, with certain exceptions. Deductions amended for all classes effective as follows: Jan. 1, 1935, 12 per cent; May 1, 1935, 10 per cent; in 1937, between February and December reduced to 4 per cent; in 1938, eliminated by April 1.

(b) Cost of living bonus per week: \$1.93—June 1, 1941; \$2.75—Sept. 1, 1941; \$3.65—Nov. 15, 1941; \$4.25—Aug. 15, 1942; \$4.60—Nov. 15, 1943, this amount being incorporated in basic rates Feb. 15, 1944.

(c) Basic rates increased from September 15, 1943, by 6 cents per hour, as the result of a retroactive award by the National War Labour Board, Dated July 31, 1944.

(d) These rates are allowed approximately one per cent per hour extra for checking in and out.

(e) Machinists, boiler makers, blacksmiths, plumbers, etc., sheet metal workers, cabinet makers, carpenters—coach, locomotive and bench, welders, etc.

(f) Freight car carpenters, freight car painters, car inspectors, car repairers, etc.

* The wage rates are straight time hourly rates only and do not include the value of various allowances to employees such as, free transportation, uniforms, reporting times, group insurance, sick benefits, etc. These vary from city to city.

** Maximum rates based on length of service.

† Including troublemen and, in some cases, groundmen; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities, rates for which are included here.

‡ Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

(*) Including armature winders, wiremen, etc.

(§) Rate applies also to bus operators.

(††) Bus operators: 1943—68, 1944—73 cents per hour.

<i>Transportation, Storage and Communication</i> Transportation and Storage Water Transportation (Inland and Coastal).	Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day (watches—six hours on, six hours off) seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight-hour day.

APPENDIX—WAGES IN AGRICULTURE, 1944—Concluded

The information given below has been reproduced from a bulletin on "Farm Wages in Canada", issued September 29, 1945, by the Dominion Bureau of Statistics—Agricultural Branch. The figures were compiled from reports made by farm correspondents in all provinces.

Farm Wage Rates August 15, 1943, 1944 and 1945.

The general trend in farm wages continues up with wages by the day in only Manitoba and Saskatchewan showing decreases at August 15, 1945, as compared with August, 1944. The average wages per day of male farm help showed decreases of from 50 cents to 60 cents in Manitoba and Saskatchewan. The wages per day in these two provinces, though lower than the high wages occasioned by the heavy crops of 1944, were still considerably higher than the wages paid in 1943. The demand for day help in the west was moderated by the smaller harvests of 1945, while the assistance from eastern help, military leaves, etc., helped fill the demand. All other provinces showed moderate increases in the average wages per day of male farm help.

The average wages per month of male farm help showed substantial increases over August, 1944, in all provinces indicating the continued demand for steady help. The largest increases occurred in Nova Scotia and New Brunswick. New Brunswick also had the highest average wage with board at \$80.63 per month. Saskatchewan and Alberta followed while Prince Edward Island at \$52.59 had the lowest. The highest average wage at \$111.00 per month without board occurred in Alberta with New Brunswick next, followed closely by British Columbia and Saskatchewan and with Prince Edward Island again lowest with a wage rate of \$76.25.

The Canada average wage rates are calculated using a relative weighting for the provinces. These provincial weightings have been revised this year and the revisions have been carried back to previous years on a comparable basis.

Introduction

Canada and the International Labour Organization

The recent session of the International Labour Conference, the first to be held in Canada, has focussed attention on the work of an Organization which has been carrying on a task intimately related to the objectives of world peace and social advancement.

The International Labour Organization was established in 1919 as part of the machinery for international co-operation set up within the framework of the League of Nations following the first world war.

Its purposes are to raise world labour conditions through the fixing of international minimum standards, to equalize international competition, and by promoting social justice in all countries to help to secure universal and lasting peace.

The I.L.O. is financed by governments, but is democratically controlled by representatives of organized employers and organized workers of the member states as well as by representatives of governments.

The machinery of the Organization consists of: (1) the International Labour Office, which acts as the secretariat of the Organization, maintaining a permanent staff of international civil servants and providing a world centre for information, research and advice on labour matters; (2) the Governing Body, composed of 16 government representatives, 8 employers' and 8 workers' members, which acts as the executive council of the Organization, exercising supervision over the work of the Office, and framing the annual budget of the I.L.O.; and (3) the International Labour Conference.

The Conference, which normally meets once a year, is a world assembly for the consideration of labour and social questions. Each national delegation to the Conference comprises four delegates, two representing government, one representing organized employers, and one representing organized workers; each of these three sections speaks and votes independently of the others, so that all points of view find free expression.

At the Conference minimum standards are worked out in regard to hours of work, holidays with pay, protection of women and

children in employment, prevention and compensation of industrial accidents and diseases, unemployment and social insurance, and kindred subjects.

It is the object of the Organization that member nations, having agreed on desirable labour standards at the Conferences, will enact legislation at home to bring the agreements into effect. The principal decisions taken at the Conference are embodied in the form of Conventions, the adoption of which requires a two-thirds majority of the delegates present and voting. A Convention does not automatically become binding when it has been adopted by the Conference. A member nation is, however, obligated under the terms of the I.L.O. Constitution to give each Convention consideration with a view to the enactment of legislation, and if the Convention is ratified the nation is bound to comply with its provisions, and to report annually to the I.L.O. on the measures which it has taken in this respect.

Decisions of a less formal nature are embodied in the form of Recommendations, which impose a lesser obligation on member states. The Conference also adopts resolutions where this form of procedure is appropriate.

Between the two world wars twenty-five sessions of the International Labour Conference were held, at which sixty-seven Conventions were adopted. Up to the present time over 900 ratifications of these Conventions have been made by member countries.

Until 1940 the headquarters of the I.L.O. were at Geneva. When Germany invaded France and the Low Countries, however, the I.L.O. did not remain in neutral Switzerland, but took the decision to move to Allied territory. At the invitation of the Canadian Government the Office established itself at Montreal, where it has since remained.

At a special Conference held in New York in 1941 it was decided that the I.L.O. should play a part in the planning of the measures of post-war reconstruction.

For a while there were no further Conferences, but the Office continued its work of collecting and disseminating information and providing technical assistance to governments in the drafting of national legislation.

Problems of post-war employment and social security formed the chief basis of discussion when regular annual meetings of the Conference were resumed* with the 26th Session, which met in Philadelphia in 1944, and also at the 27th Session, which took place in Paris, in

* Reports on these three sessions of the Conference were published as supplements to the *Labour Gazette* for June, 1944, December, 1945 and September, 1946.

October, 1945. The 28th Session, which dealt entirely with maritime questions, was held at Seattle in June, 1946, and the Montreal Conference, the subject of the present report, was thus the 29th since the inception of the I.L.O.

A question which arose as the I.L.O. resumed a full program of activity, was the position that it would occupy in the framework of post-war international organization. This question has been prominent on the agenda of recent Conferences, but following the emergence of the United Nations Organization as the successor to the League of Nations it has been determined that the I.L.O. shall bear a relationship to the United Nations somewhat similar to that which it bore to the League. To this end, changes have been made in the Constitution of the I.L.O., and an agreement was negotiated last May with the United Nations through the Economic and Social Council. This agreement was ratified by the I.L.O. at the Montreal Conference.*

As one of the consequences of the dissolution of the League, and pending the negotiation of financial arrangements with the United Nations, the Conference was for the first time called upon to adopt its own budget, covering the year 1947.

Further significant action taken at the Montreal meeting, which was described by the Director of the I.L.O. as the most important session the Conference has ever held, involved the adoption of a number of constitutional changes designed to equip the I.L.O. better for its role in the post-war world. The most important of these will have the effect of strengthening the obligations of member states in regard to Conventions and Recommendations. Of particular interest to Canadians are those provisions which apply to federal states, since Canada, in common with other member nations of the I.L.O. which have a federal system of government, is faced with difficulties in regard to the ratification of Conventions the subject matter of which falls within provincial jurisdiction. These include, in Canada's case, the great majority of Conventions.

In addition to improving the mechanism of the I.L.O. through constitutional amendment, the Montreal Conference also added to its structure of standards for labour and social legislation by adopting three Conventions and two Recommendations having to do with the protection of children in employment.

Among the other achievements of the Conference were a preliminary discussion of aspects of social policy in non-self-governing

* On December 14 the agreement was also approved by the United Nations Assembly and has thus become effective.

territories suitable for inclusion in International Labour Conventions; and a partial resumption of the practice of pre-war years of examining reports on the application of Conventions in member countries.

Canada has been an active member of the I.L.O. since its inception in 1919. Canada has also, with the exception of a brief period in 1935, held a government seat on the Governing Body as one of the 8 members of chief industrial importance which are constitutionally entitled to non-elective seats.

Canada's practice in regard to Conventions and Recommendations has been to submit them to the Department of Justice to determine whether they fall within Dominion or Provincial jurisdiction. Those found to be within the latter category have been brought officially to the attention of the provincial authorities by the Secretary of State.

The Honourable Humphrey Mitchell, Canadian Minister of Labour, President of the Twenty-Ninth Session of the International Labour Conference, and Mr. Trygve Lie, Secretary-General of the United Nations. Mr. Lie addressed the Conference on September 25.

The Honourable Humphrey Mitchell and Mr. E. J. Phelan, Director-General of the International Labour Office, authenticate with their signatures the seven international instruments adopted by the Montreal Conference.

Report of the Canadian Government Delegates to the
Twenty-Ninth Session of the International Labour
Conference, Montreal, September 19 to
October 9, 1946

To HIS EXCELLENCY

THE GOVERNOR GENERAL IN COUNCIL

Your Excellency: We, the undersigned delegates appointed to represent the Government of Canada at the Twenty-Ninth Session of the International Labour Conference, have the honour to submit the following report.

At the invitation of the Canadian Government, which had been submitted to the Governing Body of the I.L.O. at Paris in November, 1945, the Conference was held at the City of Montreal from September 19 to October 9, 1946. Through the kind assistance of the University of Montreal, accommodation, including the use of an assembly hall, committee rooms and office space, was provided on the premises of the University.

Forty-six member states of the International Labour Organization were represented at the Conference, of which thirty-five sent complete delegations, consisting of two government delegates, one employers' delegate and one workers' delegate. The delegates in attendance numbered 159, and were accompanied by 241 advisers. In addition, 14 representatives of provincial governments (all from Canada), 8 representatives of the United Nations, 5 representatives of other official specialized agencies (U.N.R.R.A., U.N.E.S.C.O., P.I.C.A.O., and the Intergovernmental Committee on Refugees), and 2 representatives accredited by non-member states were present, making a total of 429 persons taking part in the Conference.

In addition to Canada, the following countries sent delegations: United States of America, Argentine Republic, Australia, Belgium, Bolivia, Brazil, Bulgaria, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, Finland, France, United Kingdom of Great Britain and Northern Ireland, Greece, Haiti, Hungary, Iceland, India, Iraq, Ireland, Italy, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Panama,

Peru, Poland, Portugal, Siam, Union of South Africa, Sweden, Switzerland, Turkey, Uruguay, Venezuela, Yugoslavia. Countries represented by observers were the Republic of the Philippines and El Salvador.

Canadian Delegation

The Canadian delegation named to attend the Conference was as follows:—

Government Delegates:

Hon. HUMPHREY MITCHELL, Minister of Labour.

Mr. ARTHUR MACNAMARA, Deputy Minister of Labour, Member of the Governing Body of the International Labour Office.

Advisers and Substitute Delegates:

Mr. PAUL GOULET, Assistant to the Deputy Minister in charge of relations with the I.L.O., Department of Labour.

Mr. PAUL RENAUD, Counsellor, Department of External Affairs.

Advisers:

Mr. A. H. BROWN, Assistant to the Deputy Minister and Departmental Solicitor, Department of Labour.

Mr. M. M. MACLEAN, Assistant to the Deputy Minister and Director of Industrial Relations, Department of Labour.

Mr. S. H. McLAREN, Chief Executive Officer, National Employment Service.

Mr. V. C. PHELAN, Director, Information and Publicity, Department of Labour.

Mr. ERIC STANGROOM, Special Assistant to the Deputy Minister, Department of Labour.

Mr. C. R. McCORD, Director, Administrative Services, Department of Labour.

Miss MARGARET MACKINTOSH, Chief, Legislation Branch, Department of Labour.

Mr. H. C. HUDSON, Supervisor of Special Placements, National Employment Service.

Provincial Government Representatives accompanying Government Delegates:

Hon. L. D. CURRIE, Minister of Labour, Nova Scotia.

Hon. WALTER E. MOOERS, Minister of Labour, New Brunswick.

Mr. DOUGLAS COCHRANE, Deputy Minister of Labour, New Brunswick.

Hon. ANTONIO BARRETTE, Minister of Labour, Quebec.

- Mr. GÉRARD TREMBLAY, Deputy Minister of Labour, Quebec.
 Mr. J. O'CONNELL-MAHER, Associate Deputy Minister of Labour, Quebec.
 Mr. J. P. DESPRÉS, Director of Services, Department of Labour, Quebec.
 Hon. CHARLES DALEY, Minister of Labour, Ontario.
 Mr. LOUIS FINE, Industrial Relations Officer, Department of Labour, Ontario.
 Mr. J. R. PRAIN, Chief Inspector, Department of Labour, Ontario.
 Hon. C. R. SMITH, Minister of Labour, Manitoba.
 Hon. C. C. WILLIAMS, Minister of Labour, Saskatchewan.
 Hon. C. E. GERHART, Minister of Trade and Industry, Alberta.
 Mr. W. D. KING, Deputy Minister of Labour, Alberta.

Secretary to the Government Delegation:

- Mr. JOHN MAINWARING, Assistant Editor, *Labour Gazette*, Department of Labour, Ottawa.

Employers' Delegate:

- Mr. HARRY TAYLOR, Member, Industrial Relations Committee, Canadian Manufacturers' Association; Industrial Relations Representative, Canadian National Carbon Co. Ltd., Toronto.

Advisers:

- Mr. E. R. COMPLIN, Chairman, Industrial Relations Committee, Canadian Manufacturers' Association; Canadian Industries Limited, Montreal.
 Mr. C. E. SHUMAKER, Industrial Relations Committee, Canadian Manufacturers' Association; Goodyear Tire and Rubber Company of Canada, Ltd., New Toronto.
 Mr. H. W. MACDONNELL, Legal Secretary Canadian Manufacturers' Association, Toronto.
 Mr. ALLAN C. ROSS, Vice-President, Canadian Construction Association, Ottawa.
 Mr. C. NIDEROST, K.C., Assistant Manager, Department of Personnel, Canadian Pacific Railway, Montreal.
 Mr. GEORGE V. V. NICHOLLS, Manager, Business Research Department, Canadian Chamber of Commerce, Montreal.

Workers' Delegate:

- Mr. GUSTAVE FRANCO, Secretary, Quebec Federation of Labour, Montreal.

Advisers:

- Mr. HUGH HENDERSON, Vice-President, Halifax District Trades and Labour Council, Halifax.
- Mr. VICTOR ANDERSON, Secretary, Winnipeg Trades and Labour Council, Winnipeg.
- Mr. EUGENE A. FORSEY, Director of Research, Canadian Congress of Labour, Ottawa.
- Mr. A. ANDRAS, Assistant Editor, Canadian Railway Employees Monthly; Canadian Brotherhood of Railway Employees and other Transport Workers, Ottawa.
- Mr. GÉRARD PICARD, President, Canadian and Catholic Confederation of Labour.
- Mr. W. L. BEST, Vice-President, National Legislative Representative, Brotherhood of Locomotive Firemen and Engineers; Secretary, Dominion Joint Legislative Committee of Railway Transportation Brotherhoods.

Agenda

The agenda of the Conference comprised the following items:

1. Director's Report;
2. Constitutional Questions;
3. Protection of Children and Young Workers:
 - (a) Medical examination for fitness for employment of young workers (second discussion);
 - (b) Restriction of night work of children and young persons (non-industrial occupations) (second discussion);
4. Minimum Standards of Social Policy in Dependent Territories (provisions suitable for a Convention) (first discussion);
5. Reports on the Application of Convention.

For each of these items a report had been prepared by the International Labour Office, of which copies had been circulated to governments for advance distribution to delegates.

The first item was intended to afford delegates an opportunity for an exchange of views on developments in the economic and social field since the 27th Session of the Conference in 1945, with particular reference to employment problems.

Under the second heading the Conference was called upon to consider, first, the draft agreement which had previously been negotiated between representatives of the I.L.O. and the United Nations, and second, a number of proposals for the amendment of the constitution of the I.L.O.

Drafts for three International Labour Conventions and two Recommendations, prepared by the Office as a result of consultation with governments following a discussion on the Protection of Children and Young Workers at the 27th Session, formed the basis of the third item on the agenda.

The determination of provisions suitable for a Convention constituted the subject matter of the fourth item, Social Policy in Dependent Territories, which was not of direct interest to the Canadian Government, since Canada has no dependent territories.

Under the fifth item, which appears on the agenda of each regular annual session of the Conference, the delegates were called upon to consider the annual reports which each member state makes on the measures it has taken to comply with the provisions of Conventions to which it is a party. The item was intended also to afford an opportunity for discussing the question of labour inspection.

Opening of the Conference

Speeches of welcome were made by Mr. Camilien Houde, Mayor of Montreal, Mgr. Olivier Maurault, Rector of the University of Montreal, the Honourable Antonio Barrette, Minister of Labour of the Province of Quebec, and the Honourable Joseph Jean, Solicitor-General of Canada.

The following telegram was sent by the Prime Minister of Canada:

I shall appreciate it if you will accept and convey to all delegates to the 29th Session of the International Labour Conference, opening in Montreal tomorrow, a very cordial welcome to Canada. The people of Canada will follow with the deepest interest and good will the proceedings of the first International Labour Conference to be held in this country. I send my best wishes for the success of the Conference in its vitally important work of seeking to improve labour conditions and labour relations throughout the world. W. L. Mackenzie King.

In opening the Conference, the Chairman of the Governing Body, Mr. Guildhaume Myrddin-Evans, United Kingdom, expressed gratitude to the Dominion of Canada for harbouring the International Labour Office at Montreal since 1940. "Not only the International Labour Organization, but all who believe in its mission," he said, "owe to Canada a debt which it is difficult to estimate and impossible to repay. And I count it a great privilege to tender on behalf of the whole Organization and of the Governing Body the expression of our gratitude for the hospitality that Canada has so unstintingly

offered to the International Labour Office. It is a particular pleasure that we are able to hold this annual Conference of the Organization in Montreal, in these delightful and convenient premises which the University of Montreal has so generously placed at our disposal."

The Conference unanimously elected as its President the Honourable Humphrey Mitchell, Minister of Labour of Canada. Mr. Mitchell was nominated by Mr. Justin Godart, Government Delegate of France. The nomination was seconded by Senator Elbert D. Thomas, United States Government Delegate, and supported in the name of the Employers' and Workers' Groups respectively by Mr. H. C. Oersted, Denmark, and Sir Joseph Hallsworth, United Kingdom.

In his speech of welcome (the full text of which appears as Annex 1), Mr. Mitchell said in part:

"More than at any time since the inception of the International Labour Organization, its principles of social justice and the progressive improvement of living standards must be held high as a beacon light to the citizens of war-ravaged countries and to the peoples of all nations.

"The principles of social justice must be applied to our economic and social life, finding ultimate expression in their respective legislative decisions. To the extent that the International Labour Organization may help in the realization of this objective, its work must be worth while as essential to human progress. . . .

"In my opinion, the establishment of liberty and justice all over the world can only come about by giving voice to the simple aspirations of the great mass of the people. They must be left in peace to work out their lives so that they may establish security for themselves and families and not be the pawns in any game being played by persons bent upon satisfying their own plans for world domination.

"Unless we make social justice the cornerstone of our respective national lives and the basis of international policies, devastation and destruction must by the very nature of things be the lot of mankind. Let us see to it at this Conference that we issue a challenge to the nations of the world, that we return to the true paths of peace, and that our energies be centred upon the age-old wish that we be our brother's keeper."

As Vice-Presidents the Conference elected Mr. A. M. Joekes, Netherlands, for the Government Group; Sir John Forbes Watson, United Kingdom, for the Employers' Group; and Mr. Carlos Fernandez Rodriguez, Cuba, for the Workers' Group.

The Director of the International Labour Office, Mr. E. J. Phelan, acted as Secretary-General of the Conference.

The Chairmen of the three Groups at the Conference were: Mr. S. Lall, India, Government Group; Mr. H. C. Oersted, Denmark, Employers' Group; and Sir Joseph Hallsworth, United Kingdom, Workers' Group.

Procedure of the Conference

The Conference dealt with the various items on its agenda as follows:

A debate on Item 1, the Director's Report, took place in plenary session during the first two weeks of the Conference. Meanwhile the other four items were being considered by committees, whose reports were subsequently considered by the Conference in plenary session.

In addition to the four committees thus established, the Conference appointed a Finance Committee of Government Members, a Selection Committee, a Credentials Committee, a Committee on Standing Orders, and a Resolutions Committee.

Canadian representation on the various committees was as follows:

Constitutional Questions

Government member, Mr. Renaud (Substitutes: Mr. Brown, Mr. Stangroom); Employers' member, Mr. Taylor (Substitutes: Mr. Niderost, Mr. Ross); Workers' member, Mr. Forsey.

Protection of Children and Young Workers

Government member, Miss Mackintosh (Substitutes: Mr. Hudson, Mr. Maclean); Employers' member, Mr. Taylor (Substitutes: Mr. Complin, Mr. Shumaker); Workers' member, Mr. Andras (Substitute: Mr. Picard).

Dependent Territories

Employers' substitute member, Mr. Taylor (Substitute: Mr. Niderost); Workers' substitute member, Mr. Anderson.

Application of Conventions

Government member, Mr. Goulet (Substitute: Mr. Phelan); Employers' member and Vice-Chairman of the Committee, Mr. Taylor (Substitutes: Mr. Nicholls, Mr. Macdonnell).

Finance Committee of Government Members

Member, Mr. Renaud (Substitute: Mr. McCord).

Selection Committee

Government member, Mr. MacNamara (Substitutes: Mr. Renaud, Mr. Goulet); Employers' substitute member, Mr. Taylor.

Standing Orders

Workers' member, Mr. Henderson.

Resolutions

Employers' substitute member, Mr. Taylor (Substitute: Mr. Ross); Workers' member, Mr. Francq.

As President of the Conference the Honourable Humphrey Mitchell served on the Drafting Committee.

General Observations

For the most part the subjects on the agenda of the Conference did not arouse serious differences of opinion. Three of the four Conventions, and most of the other decisions of the Conference, were adopted unanimously.

Only one committee was called upon to add to the body of international labour standards that the Organization has built up over the years, and in this, the Committee on the Protection of Children and Young Workers, a co-operative spirit and a desire to improve and strengthen the texts that had been proposed were most marked.

In the Constitutional Committee there were opposing viewpoints on certain questions, but these were successfully resolved, frequently without resort to a vote.

The members of the Canadian Government delegation were active participants in the work of the Conference, taking a full and vigorous part in the discussions both in plenary session and in meetings of the committees on which they served. In the Constitutional Committee the Canadian Government member sponsored two amendments on matters in which Canada had a particular interest: the obligations of federal states in regard to Conventions and Recommendations; and the determination of the eight states of chief industrial importance eligible for non-elective seats on the Governing Body. Both of these amendments were unanimously adopted.

The workers' and employers' delegations had the status of autonomous units within the Canadian delegation.

The Provincial Government representatives accompanied the Canadian delegation in conformity with Article 2 of the Standing Orders as amended at Paris. They attended committee meetings and plenary sessions of the Conference.

Debate on the Director's Report

The Report of the Director of the International Labour Office opened with a survey of the economic background of events since the Paris Conference. A second section described the employment measures that have been taken by various countries, and outlined the problems involved in effectively organizing manpower resources. The Report also contained a survey of the activities of the I.L.O. during the past year.

In opening the debate, the Director suggested that delegates might find it appropriate to give the Conference information on the progress of reconstruction in their various countries, and an account of the new methods and policies that are being applied in most countries in the treatment of economic and social questions.

A total of 67 speakers from 36 countries participated in the debate, 34 of them representing governments, 13 employers, and 20 workers. Among the speakers were three members of the Canadian delegation.

Mr. Gustave Francq, the first Canadian to speak, dealt mainly with the wage-price relationship in Canada. While arguing that wage increases were not the direct cause of price increases, he said that "nevertheless we seem to be living in a vicious circle because as long as each increase in wages is followed by a rise in prices, this simply leads the workers to ask for another rise in wages, followed by the usual process of refusal first and then by search for a compromise solution." He advocated a spirit of partnership in which workers on the one hand would avoid production-crippling strikes and employers on the other hand would willingly grant such increases as were necessary.

He thought that the responsibility of public authorities should be to develop social legislation, and to extend their services of conciliation and arbitration. (The text of Mr. Francq's speech appears as Annex 4.)

Speaking for the Canadian Government, Mr. V. C. Phelan praised the work of the International Labour Organization, and urged that the Office give priority to the study of industrial relations and employment policy. He said that although the post-war level of

employment had held up well in Canada in spite of frightening predictions to the contrary, nevertheless Canada fully subscribed to the principle that the domestic level of employment in any country was gravely influenced by fluctuations in other countries. "High employment must therefore be universal, or nearly universal . . . The International Labour Organization is one important factor in promoting principles to see that employment is maintained in all countries and we must use it to that end."

Turning to the field of social security, he pointed out that Canada had come out of the war with the addition of two major measures, those of unemployment insurance (which included a national employment service) and family allowances. "Taken along with the older social measures in force in Canada, along with workmen's accident compensation, with widows' allowances for children, with old-age pensions and pensions for the blind, we have now filled in a good part of the picture of a general social security coverage. And constant study is being given to remaining social needs, to the matters which will be the issues of the future." (Annex 3.)

Like Mr. Francq, Mr. Harry Taylor, the employers' delegate, spoke of the futility of an upward spiral of both wages and prices. He said that there must be a gain in real wages if any real benefit was to accrue. "In our opinion," he continued, "this can best be accomplished by increased production and productivity, with employers and workers each bearing their full share of this responsibility."

In regard to the rôle of governments, he said, "Increased production can only be achieved by workers and employers; it is for governments to confine themselves to facilitating them in their task." He thought that public spending should be undertaken "only to supplement private business, not to replace it." (Annex 5.)

Among the other speakers was the Right Honourable George Isaacs, Minister of Labour and National Service for Great Britain, who gave an interesting review of the way in which his government was carrying out its employment policy.

The speeches of the delegates, taken together, provided a mass of valuable information on social and economic conditions and legislation in the various countries, noteworthy for the special approaches to particular problems made by members of the three Conference groups.

Replying to the debate, the Director called attention to the value of a discussion of this kind. "It is here," he said, "in the discussion on the Director's Report, that out of an exchange of experi-

ence, ideas are born which later bear fruit in national or international action."

On one point, he said, the various speakers seemed to be in unanimity—"that the strains and stresses, political, economic and social, which are the aftermath of the war, are felt in all regions and in all countries. And there seems equally general recognition that national or regional action will not suffice to alleviate those strains and stresses, but that international action is required, and that it must be vigorous and effective . . .

"Fortunately, the instruments for international action are at hand. The United Nations has now almost completed its machinery. The world has for the first time at its disposal the institution which can meet its needs. Those needs I stated in Paris as peace, production, and social justice: peace, for without peace the energies of the nations must be mobilized for destruction; production, because the world cannot eat next year's harvest—and it is vain, as a number of speakers have stressed, to aim at a higher standard of life unless we produce more goods and services to make that higher standard possible; and social justice, because we must ensure that the wealth produced is justly distributed.

"These three needs are indivisible. We cannot hope to achieve any one of them unless we also achieve the other two. That does not mean that they cannot be pursued separately, as indeed they must, through the operation of the appropriate national and international machinery. It does mean that none of them can be pursued successfully in isolation. It means that no diplomacy, however skilful, can maintain peace if there are economic and social dislocations which make for war. It means on the other hand that economic and social measures cannot in themselves make for peace unless political disputes are settled by peaceful means."

He urged the need for working through international agencies, in spite of their imperfections, towards world objectives, and of understanding clearly both their possibilities and their limitations.

"Let me repeat, for example, that the International Labour Organization is not the Conference, or the Governing Body, or the Office. It is the whole operation of collaboration by its Member States for the purpose set out in its Constitution, and in the words 'whole operation' I include what is done nationally by the parliaments, by the civil services, and by the organizations of workers and employers. It is therefore futile to expect that the Conference or the Governing Body can act as if this were not so. States, it is true, cannot do alone

what they can do collectively. But while Conference or Assembly is the instrument for their collective action, a Conference or Assembly cannot act independently of or in contradiction with the States which they represent. Criticisms which are sometimes directed to the International Labour Organization often arise out of a misunderstanding of its powers, and I have no doubt that the United Nations will have the same experience . . .

“One strength of this Organization is that it has made a choice each year of a limited number of questions and tried to arrive at practical and positive results concerning them. It is not, in the world as at present organized, possible to do more . . .

“The fundamental action on economic and social questions, as one speaker reminded us, is taken nationally. The international meeting in which such questions are treated is only one link in the chain between a proposal and the positive practical effect to be given to it. You cannot strengthen the chain by lengthening or thickening that one link.”

In regard to the future location of the International Labour Office the Director stated that the Office was not leaving Montreal. He noted that one of the articles in the Agreement with the United Nations stipulated that the I.L.O. “having regard to the desirability of the headquarters of specialized agencies being situated at the permanent seat of the United Nations and to the advantages that flow from such centralization,” should consult the United Nations before making any decision concerning the location of its permanent headquarters; and also that a proposed amendment in the I.L.O. Constitution would give the Conference the power to fix the seat of the Organization. He anticipated that when the United Nations had decided on its own seat, then the consultation provided for in the Agreement would be undertaken, and the Conference would be in a position to make its decision.

Among the other subjects mentioned by the Director was that of industrial relations (a recommendation concerning which had been made in the speech of the Canadian Government representative). The Director said: “The importance of the subject of industrial relations will be denied by none. It was a major topic at the New York and Mexico Conferences and it will no doubt find an important place in our deliberations again in the future. In one sense every International Labour Conference has been a successful experiment in industrial relations, and the pattern there set found valuable application in the tripartite collaboration which so powerfully aided the war effort of the democratic countries.”

Constitutional Questions

The Montreal Conference had the task of making final decisions on constitutional problems which had occupied the attention of the I.L.O. for over two years.

These problems had come to the fore at the Philadelphia Conference in 1944, when it became apparent, first, that the future status of the I.L.O. would need to be worked out in relation to whatever machinery for international co-operation was devised to succeed the League of Nations, and second, that a remodelling of its methods of procedure would be desirable to enable the I.L.O. to do its work better.

The Philadelphia Conference, on motion of the Canadian Delegation, headed by the Honourable Paul Martin, requested the Governing Body to appoint a Constitutional Questions Committee to examine the situation and bring to the attention of the next Conference such matters as, in its judgment, required action.

This Committee met in January, 1945, and formulated the principles which guided the I.L.O. delegation to the San Francisco Conference of the United Nations, where the United Nations Charter was drawn up. The Charter made provision that specialized organizations such as the I.L.O. would come into relationship with the United Nations through the Economic and Social Council, the exact terms of the relationship to be established by negotiation.

At its subsequent meetings this Committee considered proposals for changes in the internal mechanism of the I.L.O., but did not arrive at final conclusions.

The Paris Conference reviewed the subject again, and adopted an Instrument of Amendment embodying a few changes in the Constitution that were of immediate importance, relating to membership, finance, and the procedure for making future amendments. (These changes came into effect on September 26, 1946, the Instrument having been ratified by three-quarters of the member states.) The Paris Conference also authorized the Governing Body to enter into negotiations with the United Nations, and decided to refer all other constitutional questions which were pending to a small tripartite "working party," to be known as the Conference Delegation on Constitutional Questions, which would examine them and report to the Conference of 1946 for a final decision.

The working party held its first session in London between January 21 and February 15, 1946, under the chairmanship of Mr. Guildhaume Myrddin-Evans. It was able to reach unanimous conclusions on all matters except one, the problem of the proportionate sizes of the workers', employers' and government groups at Confer-

ences and on the Governing Body. Its recommendations were embodied in a report which, after reference to governments for their observations, was put on the agenda of the Montreal Conference.

A second session was held at Montreal in May, at which representatives of federal governments met with the Delegation to consider problems arising in connection with the application by federal states of International Labour Conventions and Recommendations. The Delegation's report on the work of this session (at which Mr. A. H. Brown and Mr. P. E. Renaud represented Canada) was also placed before the Montreal Conference, having previously been circulated to governments for their observations.

Meanwhile negotiations with the United Nations were carried forward by a tripartite Negotiating Delegation, appointed by the Governing Body. This Delegation, whose chairman was Mr. Myrddin-Evans, met with representatives of the Economic and Social Council at the end of May, and reached agreement with them as to the terms of association of the I.L.O. with the United Nations, subject to approval by the International Labour Conference on the one hand and the United Nations Assembly on the other.

The Montreal Conference thus had before it two sets of proposals:

- (a) The draft Agreement between the United Nations and the International Labour Organization; and
- (b) The proposals for the revision of the Constitution submitted by the Delegation on Constitutional Questions.

The Conference referred these matters to its Committee on Constitutional Questions.

AGREEMENT WITH THE UNITED NATIONS

The Committee on Constitutional Questions agreed without discussion to recommend that the Conference approve the Agreement with the United Nations. It was understood that the Agreement would similarly be submitted to the Assembly of the United Nations for its acceptance. The Agreement, whose text appears as Annex 7, defines the terms of the relationship between the organizations. Under it the United Nations recognizes the Organization as a specialized agency "responsible for taking such action as may be appropriate under its basic instrument for the accomplishment of the purposes set forth therein."

The Conference gave unanimous approval to the Agreement on October 2.*

*On December 14 the Assembly of the United Nations also approved the Agreement.

AMENDMENTS TO THE CONSTITUTION

The second task of the Committee, that of considering proposals for the revision of the Constitution, took much longer and occasioned considerable discussion, although a spirit of compromise prevailed and comparatively few issues were brought to a vote.

The Committee took as the basis of its discussions the reports of the working party, and the observations on these reports which had been received from a number of governments. In regard to nearly all essential matters, the recommendations of the Committee to the Conference were based on the proposals of the Delegation, although more than fifty further proposals were introduced by members of the Committee and some of these were accepted.

The most important amendments recommended by the Committee are perhaps those affecting Article 19. These amendments are designed to strengthen the obligations of member states in regard to Conventions and Recommendations.

The existing constitution obliges members to bring Conventions or Recommendations, within the period of a year from the closing of the Conference at which they are adopted, or at most eighteen months, before "the authority or authorities within whose competence the matter lies for the enactment of legislation or other action." In the case of a Recommendation, the member is then required merely to inform the I.L.O. of the action taken. In the case of a Convention the member, if it obtains the consent of the appropriate authority, is required to communicate the formal ratification of the Convention, to take such action as may be necessary to comply with its provisions, and to report annually on its method of applying the Convention. If the consent of the authority is not obtained, "no further obligation shall rest upon the member."

The first of the amendments imposing additional obligations requires members to give particulars of the authority or authorities regarded as "competent," and of the action taken by them.

The second of the amendments provides that, if a Convention fails to obtain the consent of the competent authority or authorities.

"no further obligation shall rest upon the member except that it shall report to the Director-General of the International Labour Office, at appropriate intervals as requested by the Governing Body, the position of its law and practice in regard to the matters dealt with in the Convention, showing the extent to which effect has been given, or is proposed to be given, to any of the provisions of the Convention by legislation, administrative action, collective agreement or otherwise and stating the difficulties which prevent or delay the ratification of such Convention."

The third amendment requires a report in regard to non-adopted Recommendations showing

“the extent to which effect has been given or is proposed to be given to the provisions of the Recommendations and such modifications of these provisions as it has been found or may be found necessary to make in adopting or applying them.”

A further amendment to Article 19 deals with the obligations of federal states. This amendment is of particular interest to Canada, and in fact the Canadian Government representatives took an active part in evolving the formula that was eventually adopted by the Committee.

The Constitution of the I.L.O., as adopted in 1919, makes special provision for federal states by permitting them to treat Conventions as though they were Recommendations, thus relieving them of the heavier obligations that fall on unitary states.

The amendment, which was submitted jointly by the Government delegates of Canada, Australia and the United States, specifies that in respect of Conventions and Recommendations which the federal government regards as appropriate under its constitutional system for federal action, the obligations of the federal state shall be the same as those of other members. In respect of Conventions and Recommendations which the federal government regards as appropriate, in whole or in part, for action by the constituent provinces (or states or cantons) rather than for federal action, the federal government is required:

- (a) to make effective arrangements for the reference of such Conventions and Recommendations to the appropriate provincial authorities;
- (b) to arrange, subject to the concurrence of the provincial governments concerned for periodical consultations between the federal and provincial authorities with a view to promoting within the federal state co-ordinated action to give effect to the provisions of such Conventions and Recommendations;
- (c) to inform the Director-General of the action taken to bring such Conventions and Recommendations before the appropriate authorities with particulars of the action taken by them; and
- (d) to report to the Director-General at appropriate intervals as requested by the Governing Body on the position of federal and provincial law and practice in regard to unratified Conventions and Recommendations.

Addressing the Committee in support of these proposals, the Canadian Government delegate traced the successive steps through which they had passed before being finally agreed to by the representatives of Canada, Australia and the United States. He recalled that they originated with a draft resolution submitted by Mr. Percy Bengough, Canadian Workers' delegate, at the Philadelphia Conference in 1944, and that they were in fact but a paraphrase of that draft resolution.

The Committee proposed that a further obligation on member states in regard to Conventions should be added to the Constitution as Article 23. This is a requirement that governments submit copies of their reports on Conventions to the organizations recognized by them as representative of workers and employers, as well as to the I.L.O.

Of the other amendments a number are consequential upon the dissolution of the League of Nations. Among these is the question of the determination of the eight states of chief industrial importance entitled to the non-elective seats on the Governing Body. Under Article 7, paragraph 3, of the existing Constitution the power of deciding this question resides with the Council of the League of Nations. The working party's proposal was that this power be vested in the Governing Body, as follows:

"The Governing Body shall as occasion requires determine which are the members of the Organization of chief industrial importance and shall make rules to ensure that all questions relating to the selection of the members of chief industrial importance are considered by an impartial committee before being decided by the Governing Body."

It was proposed by the Government delegates of Mexico and Australia that the determination of the eight states of chief industrial importance should rest with the Conference and not with the Governing Body, and by the Government delegate of India that an appeal from the decision of the Governing Body should be open to the International Court of Justice. These various proposals were finally withdrawn by their authors in favour of the Canadian suggestion, which was unanimously approved, that the Governing Body should be recognized as competent to determine the list of the eight states, subject to the right of appealing to the Conference in case of dispute.

As a result the following paragraph was added to the paragraph submitted by the working party:

"Any appeal made by a member from the declaration of the Governing Body as to which are the members of chief industrial importance shall be decided by the Conference, but an appeal

to the Conference shall not suspend the application of the declaration until such time as the Conference decides the appeal."

The statement which the Canadian Government delegate, Mr. P. E. Renaud, made in support of his proposal is reproduced in full in Annex 6 to this report, in view of its informative character.

After a lengthy debate, in which the Canadian delegate spoke in favour of the status quo, the Committee decided to recommend the Conference to leave unchanged the provisions of Article 7 of the Constitution which reserve certain places on the Governing Body for "non-European" Governments, employers and workers. The Conference Delegation had suggested the abrogation of these provisions, and the Indian delegates that the words "non-European" be replaced by the words "Asiatic and African."

A further amendment eliminates the provisions in the Constitution concerning economic sanctions, which had become obsolete, and substitutes a provision that, in the event of any member failing to carry out the recommendations of a Committee of Inquiry or the International Court of Justice, the Governing Body may recommend to the Conference such action as it may deem wise and expedient to secure compliance therewith.

After a debate in which the Canadian Government delegate participated, the Committee recommended the inclusion in the Constitution of two new articles dealing with the legal status and immunities of the Organization. The first of these articles provides that "the International Labour Organization shall possess full juridical personality and in particular the capacity: (a) to contract, (b) to acquire and dispose of movable and immovable property, and (c) to institute legal proceedings." The second article provides that "the International Labour Organization shall enjoy in the territory of each of its members such privileges and immunities as are necessary for the fulfilment of its purposes," that "delegates to the Conference, members of the Governing Body, and the Director-General and officials of the Office shall likewise enjoy such privileges and immunities as are necessary for the independent exercise of their functions in connection with the Organization," and that "such privileges and immunities shall be defined in a separate agreement to be prepared by the Organization with a view to its acceptance by members." The Committee agreed with the Canadian Government delegate's view that it would be premature to adopt a separate agreement on privileges and immunities in the course of the present Session of the Conference.

Other amendments agreed to by the Committee have the effect of including in the preamble the words "recognition of the principle of equal remuneration for work of equal value" as one of the basic

objectives of the I.L.O.; including the Declaration of Philadelphia as an annex to the Constitution, and making appropriate reference to it in Article 1; deleting all references to the League of Nations; clarifying and giving greater recognition to the position occupied by the Governing Body; and changing the title of the Director of the International Labour Office to Director-General.

The Committee devoted two days' debate to an amendment submitted by the French Government representative providing that the International Labour Conference should consist of six representatives of each member, of whom two should be government delegates, two should represent the employers (in lieu of one as at present), and two (in lieu of one) should represent the workers, and that one of the employers' representatives should be chosen from among the managers of undertakings possessed or controlled by public organizations where such organizations exist. A subsidiary amendment provided that each government represented on the Governing Body should have one vote and that each employers' and each workers' representative should have two votes.

In opposition to the French amendment it was contended that its adoption would cut at the roots of governmental responsibility in regard to both legislation and finance. This, it was stated, would be particularly serious at a time when the Organization was amending Article 19 of its Constitution with a view to securing the acceptance by governments of increased obligations in connection with its legislative activities, and when it was for the first time assuming full responsibility for its own finances.

In view of the weight of opinion in the Committee, the representatives of the French Government agreed to withdraw their amendments.

The amendments to the Constitution proposed by the Committee were embodied in an Instrument for Amendment, which was adopted by the Conference on October 9 by a vote of 124 to nil. (Annex 8.)

The Instrument will come into force in accordance with the provisions of the Constitution as amended at Paris on November 5, 1945, Article 36 of which reads as follows:

"Amendments to this Constitution which are adopted by the Conference by a majority of two-thirds of the votes cast by the delegates present shall take effect when ratified or accepted by two-thirds of the members of the Organization including five of the eight members which are represented on the Governing Body as members of chief industrial importance in accordance with the provisions of paragraph 3 of Article 7 of this Constitution."

REVISION OF EXISTING CONVENTIONS

Consequent upon the dissolution of the League of Nations, a number of changes, purely formal in nature, were made necessary in the sections of existing Conventions which make reference to the League.

The Committee decided therefore to recommend the Conference to adopt a Convention for the partial revision of existing Conventions (Annex 10). This Convention was adopted on October 9 by 123 votes to nil.

On the recommendation of the Committee the Conference also adopted:

A series of final articles concerning ratification and denunciation procedure to be inserted in future Conventions;

A model clause concerning measures to secure compliance with the provisions of Conventions for inclusion in future Conventions;

A resolution referring to the Governing Body for further consideration the preliminary text of a proposed Convention on the privileges and immunities of the Organization;

A resolution urging the prompt ratification of the Instrument of Amendment, 1946;

A resolution applying immediately certain provisions of the Instrument of Amendment, 1946, including the provision changing the title of Director of the Office to Director-General.

Address by Secretary-General of United Nations

A feature of the Conference was the visit on September 25 of Mr. Trygve Lie, Secretary-General of the United Nations, who addressed a plenary session on the subject of the relationship between the I.L.O. and the United Nations.

Mr. Lie declared that it was appropriate that the Agreement with the I.L.O. was the first to be negotiated under Article 57 of the United Nations Charter.

"The successful experience of the International Labour Organization," he said, "was the most important single factor in developing the new idea of specialized agencies. That experience proved the value of separate organizations with a large measure of autonomy, operating as instruments of international co-operation in their specific fields."

The United Nations, he said, looked to the I.L.O. to carry out an important branch of the objectives laid down in Article 55 of the Charter, "to promote higher standards of living, full employment, and conditions of economic and social progress and development."

Mr. Lie attached particular importance to the articles in the Agreement designed to integrate the work of the two organizations, noting that under Article IV the Economic and Social Council or the Assembly was entitled to make recommendations to the I.L.O., that the I.L.O. agreed to consult with the United Nations regarding such recommendations, and that the I.L.O. further agreed to co-operate in any measures which were designed to co-ordinate the activities of the specialized agencies and the United Nations. Article V provided for a full exchange of documents and information.

Mr. Lie also anticipated good results from Article II which provided for mutual representation. Such relations were already good. He would like to consider measures for making them even better.

Finally Mr. Lie mentioned Article X which concerned the site of the I.L.O. headquarters. He gave his personal assurance that if the International Labour Organization decided to make its permanent headquarters at the site of the United Nations, the United Nations secretariat would do everything possible to assist the Organization in securing the accommodation it needed.

The partial text of Mr. Lie's address will be found in Annex 9.

Financial and Budgetary Matters

The dissolution of the League of Nations necessitated changes in the fiscal practice of the International Labour Organization. Originally the budget estimates for the I.L.O. were submitted each year by the Director to the Governing Body, following which the I.L.O. budget was submitted to the League. Upon acceptance by the Assembly the I.L.O. budget became part of the general budget of the League.

Contributions by member states were paid directly to the League, which remitted to the I.L.O. its share of the amount received. Subsequently the I.L.O. began to receive a certain amount of its income direct from members of the I.L.O. who were not also members of the League.

The 29th Session of the International Labour Conference was the first session to be called upon to take action in regard to financial and budgetary matters. That such action might be required at this session was foreseen at the Paris Conference, which adopted a provision that, pending the conclusion of financial and budgetary arrangements with the United Nations, or if at any time no such arrangements were in force, the arrangements for the approval, allocation and collection of the budget of the International Labour

Organization should be determined by the International Labour Conference.

Since arrangements with the United Nations had not yet been completed it was for the 29th Session to take certain decisions on financial and budgetary matters, relating in particular to the procedure for the approval, allocation and collection of the budget of the Organization and to the approval of the budget estimates for the 29th financial period (1947).

On September 28, the Conference decided in the first instance to adopt provisionally the proposed amended Financial Regulations submitted by the Governing Body (which are based on the Financial Regulations which were worked out through many years of League of Nations experience).

Under these Regulations the budget is prepared by the Director of the Office and submitted to the Governing Body in the usual way. The Governing Body, after having amended the budget as it may think fit, transmits it to governments some time in advance of the meeting of the Conference. The discussions on the Director's Report at the Conference afford the Conference an opportunity for a general survey of the policy and program of the Organization. The Conference then sets up a Committee of Government representatives to which the budget estimate is referred. This Committee consists of one government delegate of each member state of the Organization attending the Conference. A two-thirds majority of the votes cast by the members of the Committee present at the meeting is required to reach decisions, and a similar majority is required for approval of the Committee's report by the Conference itself. This approval by the Conference constitutes the final adoption of the budget. The Director then transmits the budget so adopted to the member states of the Organization and collects their contributions. The allocation of the shares of the expenditure which the different members of the Organization have to bear is made by the Governing Body, subject to ratification by the Conference.

The Conference decided, on September 28, to set up the Committee of Government Representatives provided under the Financial Regulations and to refer to this Committee the Reports of the Office on Financial and Budgetary Matters.

After consideration of the estimates as submitted by the Governing Body, the Committee decided to recommend the Conference to adopt an expenditure budget for 1947 amounting to 16,052,980 Swiss francs or approximately \$3,733,000 (See Annex 11).

The expenditure budget showed three main increases, the first necessitated by the development of the new system of industrial committees, the second to provide for an increase in staff of the Office from 230 to 457, and the third to cover any improvement in staff salary scales that may be introduced as from January 1947 as a result of consideration by the Governing Body of the report of a special Committee of Experts.

To the expenditure budget, fixed in Swiss francs, corresponds an income budget fixed in gold francs. Originally, and until the devaluation of the Swiss currency on September 26, 1936, the gold franc had the same value as the Swiss franc, but now they are in the relation of 10·4 gold francs to 14·7 Swiss francs.

The net income budget (10,386,763 gold francs)—which is arrived at after deduction of certain supplementary receipts (sale of publications, etc.)—will be covered by the contributions of the members in proportions fixed by the Conference. The Conference adopted a scale in which these proportions are indicated in units. (Annex 12). The number of units assigned to each State is based on various factors regarded as indicative of its economic and financial position. The total number of units in 1947 will be 690 and the value of one unit will be 16,353·11 gold francs.

The contribution of Canada was fixed at 35 units or 572,358·91 gold francs, which is equivalent to \$189,068.02.

The resolution adopting the budget for 1947 and allocating the expenses among member states for 1947 was adopted by the Conference, on October 9, by a record vote of 130 to nil.

Protection of Children and Young Workers

The Committee on the Protection of Children and Young Workers dealt with two subjects:

(a) Medical examination for fitness for employment of children and young workers; and

(b) Restriction of night work of children and young workers in non-industrial employment.

A preliminary discussion of these two subjects had taken place at the 27th Session of the Conference when it was decided to place them on the agenda of the Montreal Conference with a view to the adoption of Conventions and Recommendations. In accordance with a list of points adopted by the Paris Conference, the Office prepared a questionnaire which was sent to the governments of the member states.

On the basis of the replies to the questionnaire the Office prepared a report, which was laid before the Committee and which contained draft texts proposed for adoption by the Conference.

The Committee's discussions revealed a spirit of agreement on the general objects to be obtained, and were directed towards improvement and strengthening of the Office texts.

MEDICAL EXAMINATION

The Committee considered first the question of medical examination of children and young workers. It decided to draw up two Conventions, the first dealing with medical examination in industrial employment, and the second with medical examination in non-industrial occupations.

Discussion of the Office texts resulted in the strengthening of certain provisions and changes in the drafting of others. The two Conventions, as approved by the Committee, were almost identical in content. (Annexes 13 and 14)

They provide that persons under 18 years of age shall not be admitted to employment unless they have been found fit for the work on which they are to be employed by a thorough medical examination. The examination is to be carried out by a qualified physician approved by the competent authority, without charge to the child or his parents.

Re-examination is to take place at least annually until the age of 18 is reached, and until the age of 21 in occupations which involve high health risks.

The document certifying fitness for employment may cover a specific job or a group of jobs.

Vocational guidance and physical and vocational rehabilitation are to be afforded those found by medical examination to be unsuited to certain types of work, or to have disabilities.

Temporary work certificates may be issued in special cases where a young worker is found to be unfit.

A member country which has at present no laws or regulations permitting the ratification of these Conventions may substitute the age of 16 for the age of 18, as a preliminary step towards the full application of the provisions of the Conventions. A country may also exempt from coverage areas where by reason of the sparseness of the population or the stage of development of the area enforcement would not be feasible.

Each Convention will come into force twelve months after it has been ratified by two member states.

Following the submission of the texts to the Conference the first Convention, dealing with medical examination in industrial employment, was adopted by a vote of 123 to nil. In regard to the second Convention, however, there had been a feeling among certain members of the Committee that it would be difficult to apply, and would thus be unlikely to secure many ratifications, and that therefore its provisions should be approved in the form of a Recommendation rather than a Convention. This view was brought to the floor of the Conference by the employers' group in the form of an amendment, which was rejected by a vote of 18 to 62. Subsequently the Conference adopted the Convention by 81 votes to 25, the Canadian workers' and government delegates voting in its favour and the employers' delegate being opposed.

The Committee also approved, and the Conference adopted unanimously, a Recommendation containing various suggestions to facilitate the application of the two Conventions. (Annex 15)

Both Conventions exclude maritime and agricultural employment from coverage. Young maritime workers are already protected by an earlier Convention (No. 16) adopted at a Maritime Conference. In regard to farm workers, the Conference adopted a resolution requesting that the question of extending coverage to young agricultural workers be studied by the Permanent Agricultural Committee, with a view to its being placed on the agenda of a future session of the Conference.

RESTRICTION OF NIGHT WORK

The Committee approved a Convention and a Recommendation restricting the night work of children and young persons in non-industrial occupations.

A similar Convention, applying to industrial employment, had been adopted by the Conference at its first session in 1919.

The present Convention provides that children under 14 years of age who are admissible for full or part-time non-industrial employment (exclusive of agricultural or maritime occupations) and children over 14 years of age who are still subject to full-time compulsory school attendance shall not be employed or work at night during a period of at least 14 consecutive hours, including the interval between eight o'clock in the evening and eight o'clock in the morning. National laws or regulations may exempt domestic service in private households and work in family undertakings which is not deemed to be harmful to young persons.

The period of 14 consecutive hours is reduced to 12 in the case of children over 14 years of age who are no longer subject to compulsory school attendance and to young persons under 18.

The Convention makes certain exceptions to meet local climatic conditions. It permits national laws or regulations to grant temporary individual licences in order to enable young persons of 16 years of age and over to work at night when the special needs of vocational training so require, subject to the period of daily rest being not less than eleven consecutive hours. National laws or regulations, subject to certain restrictions, may grant individual licences in order to enable children or young persons under 18 years of age to appear at night as performers in public entertainment or to participate at night as performers in the making of cinematographic films.

The Conference adopted the Convention by a vote of 111 to nil, and the Recommendation which supplemented it by 123 votes to nil. (Annexes 16 and 17.)

Application of Conventions

A regular feature of International Labour Conferences is the consideration of annual reports from governments (made under Article 22 of the Constitution) on the way in which they are applying within their respective countries such Conventions as they have ratified. In fixing the agenda of the Montreal Conference, the Governing Body had decided that the subject should be treated as a separate item on the agenda, in order to enable governments to appoint advisers for the discussion. The Governing Body had also decided that there should be an opportunity for a discussion of labour inspection.

The Conference Committee on the Application of Conventions had before it a summary of annual reports from governments, prepared by the Office; a report from the Committee of Experts which had examined the reports from governments at a meeting in July; and a Note on Labour Inspection prepared by the Office.

The Office had requested a total of 725 reports from governments in respect of the 52 Conventions which are at present in force, covering the period October 1, 1944 to September 30, 1945.

When the Committee of Experts met in July, only 382 reports had been received, but by the time the Conference Committee concluded its work this number had risen to 523, with 202 reports still outstanding.

While the Committee recognized that in many cases the failure to supply reports was due to the dislocating effect of the war in the countries concerned, it was unable to accept this as true of all countries.

In its report to the Conference it suggested that the Office be asked to address a special appeal to delinquent governments, where extenuating circumstances did not apply, emphasizing the importance of reporting promptly for the next period by the time limit fixed by the Office. The Committee felt that if reports were not forthcoming, the result would be prejudicial to the governments which interpret their obligations strictly and carry them out punctually.

On the whole, however, the Committee felt that the Conference would be justified in regarding as encouraging the efforts made by governments to fulfil their obligations in the matter of the submission of reports.

Although the Committee did not, under the circumstances, proceed to a thorough-going examination of the reports, it recommended that this practice be resumed at the next Conference.

It considered that in order not to impair confidence in the legislative work of the I.L.O., the supervision of the application of past decisions of the Organization should be considered as at least of equal importance to the preparation of new decisions.

The Committee devoted some attention to the proposals that were before the Constitutional Committee for amending the articles dealing with the obligations of member states in regard to Conventions.

Speaking for the Canadian Government, Mr. V. C. Phelan referred to the difficulties encountered by Canada and other federal states with regard to the ratification and application of International Labour Conventions. It would be erroneous to assume, because of the small number of Conventions ratified by Canada, that Canada's legislation was not in harmony with the provisions of other Conventions. But, under the British North America Act, legislative powers were distributed between the central and the provincial governments and this made it difficult for the federal government to ratify Conventions the subject matter of which did not fall within its jurisdiction.

Mr. Phelan then made certain suggestions as a basis for discussion at a future Conference. Referring to the action of the Seattle Conference in deciding, in the case of certain Conventions, to permit the competent authority to ratify if application could be ensured by means of collective agreements, he suggested that it might be possible to extend this principle to other Conventions, especially in the case of federal states. Or it might happen that one-half or two-thirds of the constituent parts of a federal state had passed the legislation required to implement a Convention. In such a case, means might be found to establish a system which would allow the central authority to decide on the partial or fractional ratification of a Convention.

(Mr. Phelan made similar observations when the report of the Committee was presented to the Conference, the text of which appears in Annex 18.)

In view of the fact that the question of labour inspection had been placed on the agenda of the 1947 Session of the Conference, the Committee did not proceed to a detailed expression of views on the subject. In its report, however, the Committee stressed the "fundamental importance of proper systems of labour inspection as a means of ensuring the application of the legislation implementing ratified conventions."

Mr. William Best, of the Canadian workers' delegation, welcomed the placing of labour inspection on the agenda of the 1947 Conference. He said that there was considerable room for improvement in labour inspection in Canada as in other industrial countries, but added that as a result of repeated representations to government authorities on behalf of organized labour and other bodies, considerable progress had been made by the enactment and application of inspection measures and regulations governing factories, mines and other undertakings. Obviously, where efficient labour inspection was wanting and the application of modern methods delayed, the industrial workers were usually the unfortunate victims. While recognizing the constitutional difficulties with which Canada was faced, he felt that with the necessary federal and provincial co-operation, Canada would continue to play a worthy part in the national and international struggle for freedom and human betterment.

The report of the Committee was adopted unanimously by the Conference on October 4.

Dependent Territories

The question of labour standards in dependent territories has been before the I.L.O. for over two years. At the Philadelphia Conference in 1944, and again at the Paris Conference in 1945, discussions took place, as a result of which two Recommendations and a number of resolutions were adopted. The Paris Conference decided further that some of the conclusions that had been reached on the subject might be embodied in the form of Conventions, and the matter was therefore placed on the agenda of the Montreal Conference.

The work of the Committee on Dependent Territories at Montreal was completed in the form of three groups of conclusions on questions which the Committee decided were suitable for inclusion in Conventions, and three resolutions. On the basis of the former,

the Office will draw up draft Conventions which, after submission to governments, will be placed before the next session of the Conference for final action.

The three groups of conclusions deal with the following subjects:

- (a) the improvement of living standards, including health, housing, nutrition, the welfare of children, conditions of employment, etc.; improvement of the productive capacity and conditions of agricultural producers; elimination of discrimination on account of race, colour, religion or tribal association, with respect to the economic treatment of workers; provision of training facilities and of labour inspectorates; guarantee of the right of association; and procedure for the settlement of disputes;
- (b) the application of certain specified International Labour Conventions to non self-governing territories;
- (c) the maximum length of contracts of employment.

The three resolutions have to do with:

- (a) placing the subject matter of the three groups of conclusions on the agenda of the next session of the Conference;
- (b) freedom of labour;
- (c) requesting action by the Governing Body in regard to the furnishing of technical assistance by the I.L.O. to governments with dependent territories; the holding of regular meetings concerned with the application of the proposed Conventions; the setting up of regional economic and scientific commissions; and the establishment of a regional office of the I.L.O. on the African continent.

When the report of the Committee was brought before the Conference the proposed texts were all adopted, although some met with opposition. There were a number of abstentions on the part of the employers' group, and to a lesser extent on the part of the government group. Only one text, however, received any votes in opposition, this being the second set of conclusions, which carried by 36 votes to 15.

Indigenous Populations of Independent Countries

The Resolutions Committee submitted to the Conference a resolution which was adopted in amended form asking the Governing Body to consider the desirability of placing on the agenda of a forthcoming session of the Conference the question of the social problems of indigenous populations of independent countries.

The resolution originated with the South African workers' delegate, who expressed concern that native populations of self-governing territories, whose conditions were sometimes more unfavourable than those of the peoples of dependent territories, would be excluded from the scope of the Conventions proposed by the Committee on Dependent Territories.

Tribute to War Victims

In addition to the resolution noted above, the Resolutions Committee presented to the Conference a draft resolution submitted by the delegation of the Argentine Republic concerning a tribute to war victims. A substitute resolution was put forward jointly by the workers' delegate of the United States and the Indian delegation. Adopted unanimously, the substitute resolution placed the Conference on record as paying tribute to "those brave people who suffered and especially to the millions who died in the struggle for freedom and liberty" and as asking "all member governments to develop and strengthen their democratic institutions and social principles in accordance with the Atlantic Charter and the Declaration of Philadelphia to prevent the reappearance of fascist exploitation everywhere."

Credentials Committee

The Credentials Committee considered objections against the credentials of the workers' delegates and advisers of India and Greece. It unanimously found those of the Indian workers' delegate and his advisers to be in order, but submitted majority and minority reports on the objection against the Greek workers' delegation. After debate, the Conference (including the Canadian Government and employers' delegates) approved by a vote of 40 to 36 the majority report, which rejected the objection.

Use of Spanish Language

On the recommendation of the Committee on Standing Orders, the Conference adopted a number of changes in its Standing Orders, giving statutory effect to the existing practice according to which official translations into Spanish of speeches are furnished by the secretariat, and documents of the Conference and the stenographic record are published in Spanish as well as English and French, the official languages of the Organization.

Admission of New Members

Requests for readmission to the International Labour Organization were received from the Republic of Nicaragua and the Republic of El Salvador, and for admission from the Lebanon Republic.

These requests were considered by the Selection Committee which pointed out that the three republics are all members of the United Nations and are therefore, entitled, under the Constitution as amended at Paris, to become members of the International Labour Organization by communicating to the Director of the International Labour Office their "formal acceptance of the obligations of the constitution of the International Labour Organization."

On recommendation of the Committee, the Conference expressed the hope that Lebanon, Nicaragua and El Salvador would forthwith communicate to the Director their formal acceptances of the obligations of the Constitution of the Organization and would be represented as members of the Organization at the 30th Session of the Conference.

Closing of the Conference

The Conference concluded with speeches by the Officers of the Conference.

The speakers all made cordial reference to the pleasant surroundings in which the Conference had taken place and the hospitality that had been extended to the delegates by Canada. Of particular interest were the following remarks of Sir John Forbes Watson, British Employers' delegate and vice-president of the Conference:

"As one, and possibly the only one in this hall, who has attended twenty-three consecutive Conferences, I express the view that this has been the most pleasant Conference I have ever attended."

Mr. G. Myrddin-Evans, British Government delegate and Chairman of the Governing Body, expressed similar views:

"This Conference has been—and I have been to a very large number of conferences in my life—the best conference that I have ever attended. Never in any conference have I seen the spirit of co-operation and the spirit of good will displayed as I have in this Conference; and as a result, we have done, I believe, magnificent work. We have built well and I think that in the future this Organization and the peoples of the world are going to benefit immeasurably from the decisions which we have taken in the course of our deliberations."

The Secretary-General of the Conference, Mr. E. J. Phelan, said in part:

"Canada has been a staunch friend of this Organization since its beginning. It might even be said that they grew up together. It is interesting to recall that the recognition of Canada's emergence into full statehood began with the discussions in Paris in 1919 on the International Labour Organization's Constitution—discussion which led to Canada's full membership of the League of Nations on a footing of equality with all other members.

"Canada gave us a safe haven amid the storms of war and it is peculiarly fitting that this 29th Session of the Conference, which will rank at all events for a long time to come as the most important session the Conference has ever held, should have been held on Canadian soil under the presidency of the Minister of Labour in the Canadian federal government. Guided by his long experience and his robust common sense and inspired by his deep attachment to the cause for which this Organization stands, the Conference has worked through a heavy agenda with earnestness of purpose and with unflagging energy.

"It deserved and has achieved an outstanding success."

In closing the Conference, the Honourable Humphrey Mitchell as President followed the precedent of other International Labour Conferences by reviewing the work accomplished during its three weeks of activity. (Annex 2). He declared:

"As in all gatherings of this kind, we have had our differences of opinion. One expects those differences among men and women who are experts in the highly technical fields of labour and social affairs.

"On every major point before it, the Conference reached agreement. If at times it was not found possible to compose conflicting opinions, then the democratic method of a vote was adopted, and in good democratic fashion, was accepted by all.

"I wish to emphasize this highly significant point in the procedure of this I.L.O. Conference, for I think the good faith with which all delegations have entered into the proceedings and have accepted the decisions, whether unanimous or by majority, might well serve as a model in other fields."

Thanking the delegates for kindness shown to the chair, he said:

"I have regarded the responsibility which you gave me as one of the highest honours in my life.

"Let us," he concluded, "depart from this Conference filled with the high purpose of social justice for all which is the objective of the International Labour Organization."

Closing Remarks

Mention should be made in closing of Canada's responsibilities as host to the Conference.

Every effort was made, in co-operation with the International Labour Office and with the provincial and municipal authorities, to provide the conditions under which an efficient and harmonious Conference could take place.

We think it may be said that the physical arrangements for the Conference were most satisfactory to all concerned, and this was in no small measure due to the work of the following committee which made advance preparations for the Conference:

Mr. Paul Goulet, Assistant to the Deputy Minister of Labour in charge of relations with the I.L.O., representing the Dominion Government; Mr. Jean-Pierre Despres, Director General of Services, Ministry of Labour, representing the Province of Quebec; Mr. Valmore Gratton and Mr. Royden M. Morris, representing the City of Montreal; Mr. Paul E. Joubert, Montreal Tourist and Convention Bureau; Mr. Roland Bureau, University of Montreal; Mr. G. A. Johnston, Assistant Director of the International Labour Office, who acted as chairman; and other officials of the International Labour Office.

The fact that the problems of accommodation and transportation for a Conference of over 400 persons and a correspondingly large Office staff were effectively handled perhaps made its contribution to the co-operative atmosphere which, as we have already said, was so much in evidence at this international gathering. A special word of praise is due to the efficiency of the I.L.O. secretariat. The Conference was able to get its work under way in record time, and in fact was able to terminate its proceedings several days earlier than had originally been planned.

The Conference was declared closed at 7 p.m. on Wednesday, October 9.

We have the honour to be, Sir,

Your Excellency's obedient servants,

HUMPHREY MITCHELL,
Minister of Labour.

ARTHUR MacNAMARA,
Deputy Minister of Labour.

Annex 1—Address of Welcome by The Honourable Humphrey Mitchell

First of all, I desire to thank the mover of my nomination, and also those who seconded. In accepting the high honour which this Conference of the International Labour Organization has just conferred upon me by selecting me as its President, I wish to take this first opportunity of expressing sincere appreciation to the delegations present at this meeting. With your assistance, I trust I may discharge the responsibilities of President in a manner which will be in keeping with the importance of the work of the Conference.

The representatives of Montreal and of the Province of Quebec, and my Cabinet colleague, the Honourable Joseph Jean, Solicitor-General for Canada, have already bid the Conference a hearty welcome to this country.

Let me in the first instance congratulate Mr. E. J. Phelan on his appointment as Director of the International Labour Office. He took an outstanding part in its establishment at the conclusion of the First Great War and follows a line of brilliant administrators who have held this important post. My mind goes back to that great Frenchman, Mr. Albert Thomas, who with his untiring zeal and imagination foresaw the possibilities of a worldwide organization of this character as an instrument for the advancement of labour and social legislation on a worldwide basis. He was followed by the Honourable H. A. Butler, who as an able administrator kept the Organization in the forefront during a very difficult period. The Honourable John Winant, who succeeded him, further increased the prestige of the Organization up to the time of his resignation and appointment by the late President Franklin Roosevelt as United States Ambassador to the Court of St. James, where he played an outstanding part in mobilizing the forces of freedom toward the ultimate defeat of those nations which, had they been successful, would have destroyed for generations to come our way of life that has meant so much for the advancement of human progress over the centuries. With his wealth of experience and understanding of the high mission of the International Labour Organization, Mr. Phelan, will, I am sure, measure up to the great attainments of his predecessors in office.

And might I also congratulate Mr. Evans on the discharge of his duties during this very difficult time through which we are passing. We have been friends for many years and I have always cherished that friendship, and I am sure that when his term of office reaches its conclusion, it will be said of my good friend Evans that he made a great contribution to the International Labour Organization.

I need only repeat what has already been well said. In no country in the world would this gathering be more welcome than here in Canada. We take second place to none in our good feelings towards other nations. Speaking on behalf of the Canadian Government, we wish you to feel thoroughly at home in our midst. Canada, a member of the International Labour Organization since its very beginning, has always regarded her membership with pride. We have endeavoured always, sometimes under difficulties, to be well represented at International Labour Conferences. At no time have we subscribed more earnestly to the ideals of the International Labour Organization, to the principles for which it stands, than at the present time.

As you well know, we in Canada were active participants in World War II. It was the greatest armed conflict in history, one which brought great destruction, misery and chaos to the human race. Arising out of this, we have a profound understanding of the plight of even the most bitterly assailed countries which stood up against a cruel and unjust aggression.

The nations that sacrificed life and treasure to maintain justice and human liberty have much in common. Not the least important is their regard for human rights, recognition of the interests and the yearnings of all classes and peoples who seek only to improve their lot in conformity with the course charted by this Organization.

Today much of the world is still in a ferment, struggling bravely to eradicate the evil seeds sown by war, to repair the moral, physical ravages caused by ruthless aggression. More than at any time since the inception of the International Labour Organization, its principles of social justice and the progressive improvement of living standards must be held high as a beacon light to the citizens of war-ravaged countries and to the peoples of all nations.

The principles of social justice must be applied to our economic and social life, finding ultimate expression in their respective legislative decisions. To the extent that the International Labour Organization may help in the realization of this objective, its work must be worth while as essential to human progress. The setback of war and the war-bred social unsettlement and retrogression offer a challenge to the International Labour Organization and its Member nations whose representatives are assembled here this morning. Along with others who have studied labour and social problems for many years, I would be the last to suggest that a person's education in these fields is ever ended. The interchange of opinion, the sharing of the fruits of broad observation and experience which is such a prominent feature of these sessions, is of immense value. As the world contracts by reason of modern invention, we must learn more and more of each other; we must learn more from one another. In no field is the pooling of ideas more worth while than in the humanitarian concepts which will be in the forefront of these meetings.

Let us pay tribute to those who established the International Labour Organization after World War I, for it made possible this interchange of information in labour and social fields at an international level. It is significant that the International Labour Organization is virtually the sole survivor of the international organisms created by those men who sought a new world in 1919. Representation at this gathering offers an opportunity for the recognition of the importance of consultation among Governments, organized employers and workers. As economic growth becomes further advanced, groups become firmly established and begin to exercise financial power, they must act with a sense of responsibility to their own national well-being and its effect on enlightened world opinion.

We are not here to take advantage of one another, as groups or as nations. We are here to lay down broad principles of social advancement. The basic races, British and French in Canada, sprang from the stock of the Old World. They planted here the seeds of Old World culture and love of freedom, and have patterned and nurtured ideals and institutions to ensure the highest form of democratic government. We have, of course, brought within our family circle many of the bonniest bloodstreams in the world and developed a way of life that is based on freedom in its truest sense for the social well-being of our people.

While our parliamentary institutions are patterned on those of Great Britain, we have of course a federal system of government, wherein responsibilities are divided between the federal parliament and the provincial legislatures. Notwithstanding this, we believe that in the last generation, legislative enactments for the advancement of the living standards of our people have proceeded with a degree of alacrity comparable to that of any other nation. We have established unemployment insurance, workmen's compensation, provided for a system of family allowances, raised the

school-leaving age, and introduced many other reforms covering every phase of our national life. In some cases this has been accomplished by the federal Government. In others it has been undertaken by the provincial legislatures. In many cases it has been a result of co-operation between the federal and provincial authorities.

There has been, and I am convinced there will continue to be, co-operation between our several responsible Governments in policies that have for their purpose the protection of the weak against the strong through legislative action. The agenda of this Conference offers opportunity for further steps in social advancement, and I trust that at the conclusion of our deliberations, it will be said that we builded better than we knew.

Just a few words in conclusion. After the terrible conflict that we have just passed through, those responsible for the guarding of the destiny of our peoples should ponder on the lessons of the last six years and the possibility of the future. In my opinion, the establishment of liberty and justice all over the world can only come about by giving voice to the simple aspirations of the great mass of the people. They must be left in peace to work out their lives so that they may establish security for themselves and families and not be the pawns in any game being played by persons bent upon satisfying their own plans for world domination. Unless we make social justice the cornerstone of our respective national lives and the basis of international policies, devastation and destruction must by the very nature of things be the lot of mankind. Let us see to it at this Conference that we issue a challenge to the nations of the world, that we return to the true paths of peace, and that our energies be centered upon the age-old wish that we be our brother's keeper.

At this time I wish to extend a welcome to the representatives of official international organizations who are present at this Conference: The United Nations Relief and Rehabilitation Administration, the United Nations Educational, Scientific and Cultural Organization, the International Committee on Refugees, the Provisional International Civil Aviation Organization, and in particular the United Nations, whose representative, Mr. Stanczyk, Director of the Department of Social Affairs, bears a message from Mr. Lie, Secretary-General of the United Nations, which he will now deliver to the Conference.

Annex 2—Closing Address by the Honourable Humphrey Mitchel

This 29th Conference of the International Labour Organization is about to close. All of you have spent a busy and most useful three weeks deliberating on questions of vital importance to the well-being of the peoples of the countries you represent.

As in all gatherings of this kind, we have had our differences of opinion. One expects those differences among men and women who are experts in the highly technical fields of labour and social affairs. On every major point before it, the Conference reached agreement. If at times it was not found possible to compose conflicting opinions, then the democratic method of a vote was adopted, and in good democratic fashion, was accepted by all.

I wish to emphasize this highly significant point in the procedure of this International Labour Conference, for I think the good faith with which all delegations have entered into the proceedings and have accepted the decisions, whether unanimous or by majority, might well serve as a model in other fields. In our national affairs, no doubt, each of us has seen where failure to agree, and unwillingness to compose differences, has had unfortunate results. We have seen this illustrated many times in

labour relations. One would hope this ability to reach common ground will continue as an equally prominent feature of future International Labour Conferences. It shows how countries can get along together, and also illustrates how employers and employees are able to come to substantial agreement when opportunity is given for conference, and when the disposition to reach agreement is present.

We can understand the wisdom of those who set up the International Labour Organization, in providing the tripartite principle, of having responsible spokesmen of employers and trade unions, as well as of Governments, form part of these meetings. It can be said in perspective that those who brought the International Labour Organization into being builded better than they knew. The fact that this organization alone survived the shock of war is evidence of its soundness.

Any attempt to place a precise value on our meetings during three weeks would require a prophet. All I can do is to sum up in a general way what the Conference has accomplished, and leave it for the future to prove its value. By reason of the necessary legislative and other adjustments involved, time is required to decide the effect of standards adopted at this Conference. However, I feel the record of this Organization will show that once we adopt standards, there is no reason to be pessimistic as to the outcome.

This 29th Conference will be particularly noted because of the changes it has effected in the external relationships of the International Labour Organization and the internal changes it has made in order to adjust to post-war conditions.

In time to come it may well be that the most significant feature of the present Conference will prove to be the decision to establish relations with the United Nations. Going as far as we could in this matter, and believing that the United Nations itself will take corresponding action, we feel that we have usefully fitted ourselves into the post-war pattern of world organization. This is highly important, for with the several bodies now functioning in the international field, duplication and even conflict would ensue if we failed to become part and parcel of the over-all picture. The agreement with the United Nations safeguards our autonomy with reasonable care, and reserves to us our proper field of action. I am sure there will be general satisfaction over our relations with the United Nations, which we hope to see consummated shortly. It is a promising development for the future of the International Labour Organization.

Before leaving this subject, I should like to refer to the visit paid us by Mr. Trygve Lie, Secretary-General of the United Nations. It was one of the highlights of this Conference. Apart from his very timely message, the spirit which prompted his visit is a good omen of the friendly relations still in process of establishment. We trust that each organization will lend strength to the other. Both have shown the proper approach at the start. We are fully warranted in looking most hopefully to an alliance which will be fruitful of good results for humanity. Much has been said in praise of the service rendered by the Negotiating Delegation appointed earlier to carry on the negotiations with the United Nations. I think it is the unanimous opinion of this Conference that the Delegation did exceptionally fine work in this respect.

Flowing out of the new conditions which face us—the death of the old League of Nations, and our new relations with the United Nations, the Conference found it necessary to carry forward the task of amending the Constitution. Twenty-five years' experience well equipped the Conference not only to amend the Constitution in the light of our new external

relations, but also to revise it into a form in which it would provide a more workable instrument for the future work of the International Labour Organization in this post-war world.

Following the painstaking efforts of the Conference Delegation on Constitutional Questions provided for at the Paris Conference a year ago, this Conference has fashioned a document which should stand the stress and strain of future years. If in all particulars it does not meet everyone's views, at least over a large area there was general agreement. Points of difference, inevitable in such a body as this, are not vital. I believe that as far as the Constitution is concerned we may feel reasonably well satisfied that a difficult task has reached a satisfactory conclusion. While a Constitution must not be so rigid as to strait-jacket an organization, it must hold something of permanence, and at the same time permit a degree of flexibility to meet unforeseen circumstances. That, it would seem, would briefly describe the International Labour Organization's Constitution as now adopted.

The Conference, under its new régime, has had to undertake a greater measure of control over its own financial destinies, and here I need only remark that this has been most satisfactorily decided.

Now, I should like to turn to what has been accomplished in regard to the social and labour field.

Having considered with extreme care the problems involved in the protection of children and young workers, the Conference adopted three Conventions setting up standards as follows: first, on medical examination for fitness for employment in industry of young workers; secondly, on medical examination for fitness for employment of young workers in non-industrial pursuits; and, thirdly, on restriction of night work of young persons in non-industrial occupations. Also, the Conference adopted two Recommendations, setting standards for the machinery required to give effect to the Conventions. On the objective of these documents, of which first drafts had already been worked out at Paris a year ago, there can be no two minds. All will agree upon the necessity of protecting children and young persons from exploitation. This is how we must build a better world—by developing citizens who have had decent opportunities. Judged by discussions in the Conference, we were well agreed also on the details. These Conventions and Recommendations are important documents. Their adoption here is a solid accomplishment.

On social and labour conditions in dependent territories, the Conference had before it an involved and somewhat delicate problem and of first importance in the application and spread of International Labour Organization principles. It would be premature at this time to enter a discussion on what yet remains to be done by the Organization in this regard, but this Conference moved along on this problem of dependent territories, and brought nearer the day when finally standards may be fixed.

The subject of the application of Conventions received deserved attention. Disrupted by war, the operation of national legislation called for in previous Conventions, has been, or is now being, resumed. This is gratifying. But the report adopted by the Conference looks to an examination into the whole field of application of Conventions at the next Conference, which should do much good. Some Conventions are now obsolete. Some others might well be reviewed, and revised. In part the need for others may have passed. Sooner or later we must review all Conventions and Recommendations.

During the discussion on the Directors' Report, I am sure everyone was struck by the extreme divergence of present world economic conditions. The discussion was most instructive, and is a valuable feature of our

work. It shows the patience which must be displayed by those seeking to raise standards through a body like the International Labour Organization.

I think I have left now only a few words to say, which have a more personal significance to many who have made this Conference possible, who have made it the success it has been. To the Vice-Presidents of this Conference and to the chairmen and other officers of committees, I offer once again the grateful thanks of the Conference. To the new Director-General of the International Labour Office, Mr. E. J. Phelan, and his efficient staff, I offer our most heartfelt appreciation. I know I am echoing your thoughts when I extend to Mr. Phelan best wishes for the future. To my good friend Mr. Myrddin-Evans and the Governing Body, I convey your congratulations on their work in the past year and also voice our confidence that an equally fruitful year lies ahead. I should like to point out that, like all good conferences, we have not failed to load up the executive with plenty of work for the next year. That's a habit conferences of all kinds have. We have given the Governing Body and the Office plenty to keep them busy for twelve months. To the interpreters, I feel we owe thanks for the understanding they have brought into our deliberations and while I am on this subject I want to say I hope ways and means may be found to give to the staff of the International Labour Office some consideration for the overtime they have put in at this Conference. I feel we should put into effect International Labour Organization principles as far as our own staff is concerned, and they deserve consideration. To the press and radio, including the C.B.C. and its foreign service, I voice the thanks of the Conference.

Now, before adjourning the Conference, may I thank each and every delegate for kindness shown to the Chair. I have regarded the responsibility which you gave me as one of the highest honours in my life. One of the most important features of a Conference of this character is the personal contacts that are made. They often lead to new friendships and understandings that cannot help but contribute to better relations between nations. When you leave our shores we hope you will take with you an imprint of freedom in its truest sense which we pride ourselves we have in Canada where races, colours and creeds are equal before the law, and where the right to express an opinion is the inalienable privilege of every citizen. Let us depart from this Conference filled with the high purpose of social justice for all which is the objective of the International Labour Organization. God speed you all on your journey home.

I now declare closed the Twenty-ninth Session of the International Labour Conference.

Annex 3—Statement by Mr. V. C. Phelan on the Director's Report

To me has fallen the honour of speaking for Canada in this first and important discussion of the Twenty-ninth Conference of the International Labour Organization.

I must confess that at this late hour in the programme, I approach the assignment with some diffidence. What, one might ask, can another speaker hope now to contribute when already so much has been said so well by so many speakers who have gone before? Nevertheless, in view of the cogency of such a vital discussion as this in a troubled post-war world, it was felt that it would not be fitting to let the occasion pass without the views of this very country, in which the Conference now meets, being heard.

On behalf of Canada, there have already been expressed the words of welcome to those from outside our borders, which are felt in the hearts of

Canadians in consequence of the selection of Montreal as the Conference seat. I need only add a simple word to what has already been said.

Relatively few of the world's cities have been singled out for the distinction of one of these Conferences, so that if Canadians feel some pride in the selection, I trust it may be pardonable. We hope that each and every one of our visitors may feel fully at home while here, and may later look back in fond remembrance on the days spent in Canada.

Next I should like to pay an official tribute to Mr. Edward J. Phelan, now the Director of the International Labour Office. An appointment logical from every point of view, it is still an occasion for congratulations, which I must heartily tender. But to any official tribute I wish to add this personal word: though of different national birth and citizenship, I feel that I still have enough of the ancient clan spirit in common with the new Director, by reason of sharing the same family name, to tell him thus publicly that it is a source of gratification still to see one of the Phelan boys earn and receive a recognition of world significance.

May I also at this time tell the Conference that it was with a feeling of pride and appreciation that we saw our Minister of Labour, the Honourable Humphrey Mitchell, selected as President at the first session. Such a mark of recognition to one who has been prominent for so long in our labour affairs, such a gracious tribute to Canada, could not go unmarked in the assignment I am at present carrying through.

Having said these things, I wish now to turn to the work of the Conference, to the task of the International Labour Organization so well set forth in the Report of the Director, which we have had under discussion for several days. I feel that all who have had the opportunity to peruse that Report will agree that it might well be "required reading" to anyone, anywhere, who would seek an introduction to labour and social problems of the moment. If the Report raises questions rather than answering them, I suggest that is the proper function of such a document.

Whether one looks to the future in a spirit of depressed pessimism, or whether one sees events to come through the rosy glasses of the optimist, no thoughtful person can regard the present as other than the most serious situation within the memory of man, save for a time of open international conflict. Those nations ravaged by war are binding up their wounds but slowly. More fortunate countries, spared the devastation of bombing and invasion, likewise have their problems of reconversion and the economic exhaustion of war to deal with. And in large parts of the world, not the least of the aftermath of world unsettlement is the effect on men's minds—a condition of unrest, of much disappointment—which carries through many departments of human activity, which has manifested itself in a disturbance of employer-employee relations on a grand scale in several parts of the world. In these circumstances, we are fortunate that the International Labour Organization is an established organization, skilled in the matter of international collaboration in labour affairs, with a tradition of more than a quarter of a century of service to humanity.

In social and labour relations, the International Labour Organization can do much to aid in allaying the fears and apprehensions which now seize men's minds, and in doing so it can call upon an invaluable experience. We are fortunate that the International Labour Organization is a going concern—that there is not added to our troubles the business of organizing such a body as this *de nouveau*—for through international co-operation the nations find it easier to advance conditions at home, to advance parallel to the other countries of the International Labour Organization.

But I should like to sound a note of warning. It is perfectly true that whatever the pace set by a body like this, some will decry its efforts, will claim it is travelling at a snail's pace. Nevertheless, we must exercise reasonable caution. We cannot reach out too far at any time. We cannot undertake too much at one moment and expect results. Physical and psychological limitations will hamper our efforts, and results will be disappointing. We must give attention to first things first and be content that some items remain for future treatment. An overload of work places an impossible task on the shoulders of the Office and just defeats its own purpose.

Among the problems of the moment, none is more important than that of industrial relations, from our point of view, and I should think that many other industrial countries would share our concern in that regard. Since its foundation, the International Labour Organization has shown the way to peace on the industrial front, both by precept and example. The tripartite character of these gatherings, the co-operation of Governments, employers and workers has been a steady lesson on what may be accomplished by the two partners in industry and their Governments working together.

But we think the time would be opportune for the Office to carry on further work in the field of study provided by industrial relations, by the constant collaboration demanded if the world is to have the benefits of continuous production now so abundantly possible. Each country can learn from the rest. We think our experiences, what we have hammered out in Canada, might help elsewhere. What others have done will help us. We all may still learn much. Only through recognition of mutual rights, by respect for the other's view, by regard for law, can any party in the industrial field hope for peace and progress.

New devices to promote industrial harmony are constantly being developed. They are necessary to counter the sources of friction, at times so innumerable. Our country, and I am sure others, could reap immediate benefit from all the work the Office may be able to do. We regard this as a priority job.

The Industrial Committees of the International Labour Organization, still a new departure, promise at least a prospect of improving relations in important industries, while at the same time directing attention to the general social condition of the men and women who work in particular fields. We approved the formation of the committees. We view their work with interest. We have hopes they will prove their value in time by practical results. And we hope their progress may be paralleled by constant study by the International Labour Organization of techniques in employer-employee relations in an even broader field of industrial activity.

A special part of the Director's Report is given over to employment, and that, we in Canada are glad to see. With us, as with many other countries, the level of employment has held up in the past sixteen months in spite of frightening predictions to the contrary. But the time to plan for a high level of employment is not after unemployment strikes; it is while we still enjoy an abundance of jobs. There is no need to stress the importance of high employment. One need only recall the dire experiences of the 1930's to remember the evils of unemployment, evils which must be avoided in the future.

The International Labour Organization has done a good deal of valuable work in the field of employment policy. That is one of its important contributions. I suggest that the Office must continue to give thought and study in this vital field, that employment must continue indefinitely as a

top item on the agenda of the Conference and in the work of the Office. We are confident that the International Labour Organization can make still further contributions to human welfare and to world prosperity in this matter, and no possibility can safely be overlooked.

In our country we fully subscribe to the principle laid down by other speakers, namely, that the domestic level of employment in any country is gravely influenced by fluctuations in other countries. High employment must therefore be universal, or nearly universal. On a local basis, it is apt not to exist. The International Labour Organization is one important factor in promoting principles to see that employment is maintained in all countries, and we must use it to that end.

Turning now to our Canadian scene, a year ago, when the Paris Conference met, we still had some remaining wartime controls in the labour field. Today, except for a limited measure of wage control as an essential part of our policy of controlling the price level, wartime restraints on employer-employee relationships, needed at a time of a shortage of workers for vital war services, have been abolished. Once again we have returned to the condition of pre-war days, except for the limitation on wage bargaining already referred to. This is the situation our people, freedom-loving and freedom-trained, accept as normal. This is the situation they require. I shall not undertake a recital of the present position of labour and social legislation in Canada, but I should like to mention just one or two points.

We came out of the war with two major measures of social security added to our social arrangements. From 1941 we have had a system of unemployment insurance, under which three million workers in Canada are insured. As related to this insurance, we created a National Employment Service, which already has proved itself in war and during reconversion.

The second of the two measures is our system of family allowances, of cash payments monthly to the mother of the family in respect of each of the children of the family, to assist in the better provision of necessities for young Canadians. Taken along with the older social measures in force in Canada, along with workmen's accident compensation, with widows' allowances for children, with old-age pensions and pensions for the blind, we have now filled in a good part of the picture of a general social security coverage. And constant study is being given to remaining social needs, to the matters which will be the issues of the future.

Canada has subscribed to the principles for which the International Labour Organization stands, and she is one of the nations which have gone a good distance to give actual effect to those principles. We from the Canadian Government join in the general hope that this Conference may be fruitful of results. The adoption of a new Constitution and establishment of relations with the United Nations surely will mark this gathering as a milestone in the history of the International Labour Organization. With a renewed spirit, ever bearing in mind the high principles for which the Organization was founded, always striving to make those principles a living thing, we join in the hope that the International Labour Organization may be able to make and may make an even more significant, helpful contribution to humanity's upward climb along the road to the better world of tomorrow.

Annex 4—Statement by Mr. Gustave Francq on the Director's Report

On behalf of the Workers' delegation, we offer our very sincere congratulations to Mr. Edward Phelan on his appointment to the post of Director of the International Labour Office. This honour is well merited on many grounds, for he is undoubtedly the right man in the right place. There can be no doubt that under his vigorous leadership, the International Labour Office will extend its influence and make a valuable contribution to the solution of the economic problems of the world, while at the same time preparing for a more stable future for coming generations.

The Director's Report can be said without exaggeration to be a masterpiece of its kind. It outlines the economic situation in a masterly fashion and it gives a very exact picture of the immediate problems and of those that face us in the near future. One section deals with the immediate problems of peace. If we examine these pages, we will see that similar problems exist in most countries, irrespective of whether they were directly involved in the war or whether they escaped actual hostilities and were engaged in the development of armaments to assist those who were fighting. It was often feared that the transition from war to peace might be extremely difficult. Fortunately, in most cases, this transition has taken place without undue dislocation, and we find the same workers employed in the same factories but engaged on civilian production instead of war production.

Turning to the threat of inflation, we note that in some circles it is thought that increases in wages are the direct cause of the increase in the cost of living. It would seem that no account is taken of the fact that wage increases are essential, because there have been and there still are too many workers who are not earning enough to raise their families and to set aside some provision for their old age. Similarly, it would seem that people forget that labour costs are only a small fraction of the total cost of production. In many cases, the figures for dividends are exaggerated and out of all proportion to the amount of capital invested. It is true that control of prices and a tax on profits have helped to improve this situation. Nevertheless, we seem to be living in a vicious circle because as long as each increase in wages is followed by a rise in prices, this simply leads the workers to ask for another rise in wages, followed by the usual process of refusal first and then by search for a compromise solution. When a further increase in wages is granted, it is followed by another increase in prices and one is led to ask where the process will stop. This is a matter on which we must reflect. Are we going to have a constant struggle between the two factors of production and, if so, which one is going to win in the end? One thing is certain: both sides suffer in the struggle. If, as a result of our discussions at the present session of the Conference, we can find a remedy for this problem of wages and prices, then the Conference will not have been held in vain, but will have contributed to establishing an atmosphere of peace in a very troubled world. The question before us is whether capital and labour are going to continue their struggle without hope of final victory for either side, or are going to act as two partners, each aware of his responsibilities and working together to ensure, on the one hand, a reasonable wage for the worker and, on the other hand, a fair income for the employer. The two should make their contribution to the undertaking, the one by his labour, which is the only thing he can contribute, and the other by the investment of his capital, and the two should then share the risks inherent in any human undertaking.

If this is to be achieved, the workers should, as far as possible, avoid strikes to obtain improvements in their conditions when the same results

can be obtained by other means, and strikes should not last weeks and months, when it is possible to shorten them by negotiation, conciliation and arbitration. Moreover, the employers should always remember that we are living in a new era, and that the methods which have been advocated in the past half century are no longer appropriate. The time has gone when employers could say to their employees, "This is my will. You will work on the conditions I lay down or you will not work for me at all. I refuse to recognize your trade union and I will not negotiate with it." The employers should willingly grant such increases in wages as are reasonable and essential. When we remember the tremendous number of working days that are lost during the year through strikes and the consequent loss of production, which simply means loss of money for both parties, we are forced to ask ourselves whether many industrial disputes could not be avoided if both sides showed a spirit of goodwill and diplomacy.

I feel that with our modern equipment, it should be possible to increase production without increasing its cost or without asking the workers to work longer hours. The 40-hour week has come to stay. There can no longer be any question of a 50, 60, or even 72-hour week. That is past, and we must live in the present. Increased production can be achieved without increasing the cost of production and without reducing wages.

I would like to touch briefly on the part that should be played by the public authorities. It is their duty to contribute to develop social legislation and to extend to all parties the possibilities of conciliation and arbitration, not so much for settling labour disputes as for preventing them from arising. I know that in certain countries and in certain circles, compulsory arbitration is favoured. We have not adopted it in Canada, and I am really not certain whether it is a desirable system or whether a system of voluntary arbitration is not preferable. The Director touches on this point in his Report. He indicates some principles which should be considered, both by the Workers' delegates and by the Employers'. I shall leave it to others to speak on the other points that have been dealt with by the Director's Report.

Annex 5—Statement by Mr. Harry Taylor on the Director's Report

May I, on behalf of the Employers of Canada, say how pleased we all are that this important international conference is being held in Canada. The Employers join with the representatives of the Canadian Government and Workers in extending a most sincere welcome to our country. I hope that while you are here there will be an opportunity for many of our people to meet you and discuss matters of common interest, and for you to see for yourselves something of the social, industrial, and other conditions that prevail in this country.

I should like to associate the Employers of Canada with the congratulations that have been extended to Mr. Phelan on his elevation to the very responsible position of Director of the Organization. The six years that have elapsed since Mr. Winant and Mr. Phelan brought the Office to Canada have given Canadians a special opportunity of getting to know Mr. Phelan and to appreciate his very special qualifications for this high office. I should also like to congratulate the Director on the Report he has presented to the Conference, which is well up to the high level he has established in previous years.

The post-war transition period in Canada has witnessed a rapid change-over to the production of peace-time goods and services. Transitional unemployment has not reached the serious proportions which were forecast.

The employment level has remained substantially above the pre-war level. This has been achieved in spite of continued shortages of imported and domestic materials, which shortages have been aggravated by serious work stoppages.

As regards conditions of work, with the cessation of hostilities there has been a rapid restoration of such standards as were of necessity suspended or modified during the war, and employers generally have gone further and voluntarily provided liberal vacations with pay, reduced hours of work, and various security, welfare and benefit plans and other conditions of employment which exceed any applicable statutory requirement.

During the war period a lot of bad habits were picked up by employers. Some were forced upon them, others were accepted voluntarily. Some of these conditions were imposed upon employers as a matter of expediency in a war-time economy, but many of them are economically unsound in a peace-time economy. The employers accepted a degree of control and regulation during the war because the only competition we had to meet was the Nazi machine. These controls must not carry over too far into our peace-time economy. We must be relieved of these controls at the earliest possible moment consistent with our fight against inflation, if we are to organize ourselves effectively to provide a maximum of employment.

All the ingredients are present in Canada for an inflationary spiral. The upward spiral of wages and the inevitable increase in prices can, at best, produce only temporary gains for the workers, since these undoubtedly would be followed by further demands for upward wage and price adjustments. There can be no permanent gain in this kind of situation, as is properly pointed out by the Director in his Report. We must all of us adjust our sights and aim at a gain in real wages if there is to be any real benefit. In our opinion, this can best be accomplished by increased production and productivity, with employers and workers each bearing their full share of this responsibility. Increased production can only be achieved by workers and employers; it is for Governments to confine themselves to facilitating them in their task. In achieving this increased production, Canadian employers realize that, in a dynamic economy like ours, standards of equity undergo constant change, which adds to the social cost of doing business. They have met and will continue to meet voluntarily their fair share of such cost.

No analysis of Canada's position with respect to employment, wages, prices and related matters would be realistic if it failed to take into account the fact that she is an exporting country and must have access to world markets. This is of special significance since three out of eight workers are engaged, directly or indirectly, in producing for export. If we are to succeed in maintaining a high level of employment, it is an economic necessity that our costs should be held where we can compete in world markets.

Canada has an expanding economy. Great things lie ahead in many fields which will reflect themselves in employment. This development will take place at an accelerated rate if we can attract risk capital by stabilizing our economy and providing reasonable incentive and encouragement to private business. It will be retarded if restrictions are imposed or Government policies pursued which render unattractive the investment of capital. The employers of Canada recognize there must be public spending, but they believe it should be done only to supplement private business, not to replace it.

The strength of the International Labour Organization lies in the tripartite character of its composition. It must guard this jealously. If either the Workers' or the Employers' group loses its individuality and

freedom of action, the Organization will cease to be truly tripartite and the reasons for its existence will largely disappear. It will be reduced to nothing more than a research and statistical organization.

Those of us here at this Conference have a great responsibility, a responsibility which requires us to consider carefully the various proposals which are advanced, so that we fully understand their impact upon our own and other economies. Let us think not only in terms of commendable objectives, but let us also think in terms of cost, whatever form such cost may take.

Annex 6—Statement on the Government Representation on the Governing Body by P. E. Renaud

It is the Canadian Delegation's view that, under the existing Constitution, the Conference, and not the Governing Body, is the competent organ to determine the States Members which are of chief industrial importance.

This view, based on both legal and historical grounds, was presented to the Governing Body by the Canadian Government member on the 31st January, 1935. When the Canadian member resumed his seat, the Director acknowledged that the speaker had put forward arguments the force of which, he, the Director, fully recognized.

The Canadian delegate first observed,—and his observation remained unchallenged,—that no provision could be found in the Constitution authorizing the Governing Body to fix the list of States Members of chief industrial importance. That it was so, Mr. Oersted, the leader of the Employers' group, expressly conceded.

The Canadian delegate further pointed out that, under Article 7 of the Constitution, which lays down the composition of the Governing Body, the members of each group in the Governing Body were to be selected by their respective groups as constituted in the Conference,—that is the Government members by the Government group, the Employers' members by the Employers' group, and the Workers' members by the Workers' group. The letter and the spirit of Article 7 of the Constitution were unequivocally, by implication, to the effect that each group, including the Government group, should determine its own representation. This was a natural consequence and condition of the tripartite character of the Organization.

After analyzing the Constitution, Mr. Chairman, the Canadian delegate went on to review the interpretation thereof as given by the highest authorities. He first recalled the advisory opinion of the Secretary-General of the League of Nations, as set forth in a report to the Council dated 26th June, 1922. This report was drawn up after extensive consultation. Among those consulted were Mr. Anzilotti, judge of the Permanent Court of International Justice, Mr. McKinnon Wood, Legal Adviser of the League Secretariat, Mr. Arthur Fontaine, chairman of the Governing Body, and Mr. Jouhaux, the leader of the Workers' Group. In his report the Secretary-General set out that "the first step in the procedure (for the renewal of the Governing Body) must be the recognition by the Conference of a list of the eight members of chief industrial importance."

The Canadian delegate further recalled the interpretation given by the Council of the League of Nations. This was set forth in Viscount Ishii's report adopted by the Council on the 30th September, 1922. This report emphatically stated that "the duty of drawing up the list of eight chief industrial countries was primarily the function of the International Labour Conference."

Examining then the question from the historical angle, the Canadian representative reminded the Governing Body that the first list of eight States Member of chief industrial importance, which was submitted to the Washington Labour Conference of 1919 by the Organizing Committee at a time when the Governing Body did not yet exist, was definitely fixed by the Conference itself. Commenting upon this observation, Mr. Jouhaux remarked: "The fact exists, and it can certainly be contended that the action of the Conference proves in a certain measure that it is the International Labour Conference which is competent to decide the question."

The Canadian representative finally recalled that in 1922, when the first list of the eight States Members of chief industrial importance was revised, the Governing Body proposed an amendment to the Conference which, if adopted, would have had the effect of changing the basis of the list. The proposed amendment was rejected, and it was important to observe that, on this occasion, the Governing Body did not adopt the changes itself, but only recommended their adoption to the Conference.

This was the only occasion, at the time the Canadian delegate spoke, on which the Governing Body could have been said to have taken any action in the matter of the eight States Members of chief industrial importance, and, on this occasion, it has not assumed the power of revising alone the list of eight States.

In 1934, it is true, the Governing Body assumed that power. But, when the Legal Adviser of the Office was asked to justify that assumption, he referred, in a note on the legal situation dated 17th January, 1934, to the resolution adopted by the International Labour Conference on 22nd June, 1934, which stated that, in the event of a certain named Government accepting membership of the Organization the Governing Body was authorized to arrange with that Government any question arising out of its membership. This resolution could be regarded as an *ad hoc* delegation of power to meet a quite exceptional case. That it is so, is confirmed by the Conference Delegation, which states in its Report, paragraph 27, that it is "upon a *de facto* basis" that the Governing Body, in the subsequent cases, exercised the power of determining the Members which are of chief industrial importance.

Should any doubt remain as to the paramount competence of the Conference to deal with the matter of the eight States it should be removed by the examination of the amendments standing before us. It is obvious that their authors consider that the Conference, as sovereign organ of the Organization, is absolutely free to decide that it belongs to itself or to the Governing Body, or to both, to determine the eight States Members of chief industrial importance.

But this Committee, Mr. Chairman, is not a court which has to decide what the law is. It is a constituent assembly which has to declare what the law should be. The Canadian Delegation, in a spirit of co-operation, is prepared to vote for the text of Article 7 paragraph 3 as proposed by the Conference Delegation on Constitutional Questions, subject, however, to a proviso, namely: that, "Any appeal from the declaration of the Governing Body as to which are the Members of chief industrial importance shall be decided by the Conference," and on the understanding that "an appeal to the Conference shall not suspend the application of the declaration."

This proviso will have the effect of maintaining, *mutatis mutandis*, the right of appeal provided for in the existing paragraph 3 of Article 7, right of appeal which was exercised by India and Poland in the years 1920-1922. The second part of the Canadian Delegation's amendment, namely the

words "but an appeal to the Conference shall not suspend the application of the declaration," is borrowed from a Report on the matter adopted by the Governing Body on the 31st January, 1934.

The object of the Canadian amendment is first to prevent that the Governing Body be open to the criticism of constituting itself in a closed corporation pretending to exercise, without any control whatsoever, the major privilege of deciding as to which are its permanent members, when, under the existing Article 7, it can decide upon such minor questions as the method of filling vacancies and of appointing substitutes but "subject to the approval of the Conference."

The object of the Canadian amendment is secondly to prevent that some forty Government delegates to the Conference be denied their birth-right to decide on the permanent representation of their own group on the Governing Body, when the eight Employers and eight Workers sitting on the Governing Body lay claim to assume that right. Are Governments to abandon lightly a prerogative based on the very tripartite nature of the Organization? Do not the Employers and Workers see that, by derogating to the firmly-established principle that each group select its own representatives, they create a precedent which may one day be turned against them?

The object of the Canadian amendment is finally and above all to assure the respect of a principle inserted in paragraph 2 of Article 7 by the Peace Conference of 1919, and reaffirmed by the Council of the League of Nations and the International Labour Conference in 1922, and again by the Conference Delegation in 1946.

It will be remembered that when, at the Peace Conference of 1919, the original draft of the constitution of the International Labour Organization was submitted to the Commission on International Labour Legislation, this draft laid down that five members of the Governing Body were to be selected by the Governments of the five Great Powers, which were mentioned by name. That clause gave rise to strong objection on the part of Mr. Vandervelde, of Belgium, who was anxious that Germany should one day be included among the so-called permanent members of the Governing Body and also to retain a seat for Belgium. The result of the incident was the inscription in the Constitution of the Organization of the principle that the perpetual privilege of sitting in the Governing Body shall belong to States Members of chief industrial importance.

In 1922 the Council of the League of Nations, which had been called upon to consider claims made to it by India and Poland, adopted a report accepting that criterion of industrial importance, and giving an authoritative interpretation thereof.

In the same year 1922, the Governing Body submitted an amendment to the 1922 International Labour Conference in which it was recommended that the five Great Powers then on the Council of the League, as well as the United States of America, should be substituted for the eight States of chief industrial importance. That amendment was opposed by the Canadian Delegation, then led by the Honourable Ernest Lapointe, Minister of Justice. The Canadian Delegation urged that no seat should be allocated forever to any State, irrespective of its industrial importance, and that the principle sanctioned by Article 7 of the Constitution that all countries, not only those ranking as Great Powers, should have an opportunity to fill the named seats, should be maintained. The Canadian Delegation was supported by the Indian Delegation. When the vote was taken, the amendment proposed by the Governing Body was overwhelmingly rejected by 62 votes to 8.

For all these reasons, Mr. Chairman, the Canadian Delegation, jealous of the prerogative of the Government group and respectful of the Constitution, has the honour to move the adoption of the amendment it has submitted.

This amendment, Mr. Chairman, being of the nature of a compromise,—of a compromise between the Conference Delegation's proposal on the one hand, and the Australian, Mexican and Indian proposals on the other, should meet with unanimous approval.

Annex 7—Draft Agreement Between the United Nations and the International Labour Organization

Article 57 of the Charter of the United Nations provides that specialized agencies established by inter-governmental agreement and having wide international responsibilities as defined in their basic instruments in economic, social, cultural, educational, health, and related fields shall be brought into relationship with the United Nations.

The International Labour Conference, meeting in its twenty-seventh session in Paris on 3rd November, 1945, adopted a resolution confirming the desire of the International Labour Organization to enter into relationship with the United Nations on terms to be determined by agreement.

Therefore, the United Nations and the International Labour Organization agree as follows:

Article 1

The United Nations recognizes the International Labour Organization as a specialized agency responsible for taking such action as may be appropriate under its basic instrument for the accomplishment of the purposes set forth therein.

Article 2

RECIPROCAL REPRESENTATION

1. Representatives of the United Nations shall be invited to attend the meetings of the International Labour Conference (hereinafter called the Conference) and its committees, the Governing Body and its committees, and such general, regional or other special meetings as the International Labour Organization may convene, and to participate, without vote, in the deliberations of these bodies.

2. Representatives of the International Labour Organization shall be invited to attend meetings of the Economic and Social Council of the United Nations (hereinafter called the Council) and of its commissions and committees and to participate, without vote, in the deliberations of these bodies with respect to items on their agenda in which the International Labour Organization has indicated that it has an interest.

3. Representatives of the International Labour Organization shall be invited to attend in a consultative capacity meetings of the General Assembly and shall be afforded full opportunity for presenting to the General Assembly the views of the International Labour Organization on questions within the scope of its activities.

4. Representatives of the International Labour Organization shall be invited to attend meetings of the main committees of the General Assembly in which the International Labour Organization has an interest and to participate, without vote, in the deliberations thereof.

5. Representatives of the International Labour Organization shall be invited to attend the meetings of the Trusteeship Council and to participate, without vote, in the deliberations thereof with respect to items on the agenda in which the International Labour Organization has indicated that it has an interest.

6. Written statements of the Organization shall be distributed by the Secretariat of the United Nations to all Members of the General Assembly, the Council and its commissions and the Trusteeship Council as appropriate.

Article 3

PROPOSAL OF AGENDA ITEMS

Subject to such preliminary consultation as may be necessary, the International Labour Organization shall include on the agenda of the Governing Body items proposed to it by the United Nations. Similarly, the Council and its commissions and the Trusteeship Council shall include on their agenda items proposed by the International Labour Organization.

Article 4

RECOMMENDATIONS OF THE GENERAL ASSEMBLY AND OF THE COUNCIL

1. The International Labour Organization, having regard to the obligation of the United Nations to promote the objectives set forth in Article 55 of the Charter and the function and power of the Council, under Article 62 of the Charter, to make or initiate studies and reports with respect to international economic, social, cultural, educational, health and related matters and to make recommendations concerning these matters to the specialized agencies concerned, and having regard, also, to the responsibility of the United Nations, under Articles 58 and 63 of the Charter, to make recommendations for the co-ordination of the policies and activities of such specialized agencies, agrees to arrange for the submission, as soon as possible, to the Governing Body, the Conference or such other organ of the International Labour Organization, as may be appropriate, of all formal recommendations which the General Assembly or the Council may make to it.

2. The International Labour Organization agrees to enter into consultation with the United Nations upon request with respect to such recommendations, and in due course to report to the United Nations on the action taken by the Organization or by its members to give effect to such recommendations, or on the other results of their consideration.

3. The International Labour Organization affirms its intention of co-operating in whatever further measures may be necessary to make co-ordination of the activities of specialized agencies and those of the United Nations fully effective. In particular, it agrees to participate in, and to co-operate with, any body or bodies which the Council may establish for the purpose of facilitating such co-ordination and to furnish such information as may be required for the carrying out of this purpose.

Article 5

EXCHANGE OF INFORMATION AND DOCUMENTS

1. Subject to such arrangements as may be necessary for the safeguarding of confidential material, the fullest and promptest exchange of information and documents shall be made between the United Nations and the International Labour Organization.

2. Without prejudice to the generality of the provisions of paragraph 1:
- (a) the International Labour Organization agrees to transmit to the United Nations regular reports on the activities of the International Labour Organization;
 - (b) the International Labour Organization agrees to comply to the fullest extent practicable with any request which the United Nations may make for the furnishing of special reports, studies or information, subject to the conditions set forth in Article 15; and
 - (c) the Secretary-General shall, upon request, consult with the Director regarding the provision to the International Labour Organization of such information as may be of special interest to the Organization.

Article 6

ASSISTANCE TO THE SECURITY COUNCIL

The International Labour Organization agrees to co-operate with the Economic and Social Council in furnishing such information and rendering such assistance to the Security Council as that Council may request including assistance in carrying out decisions of the Security Council for the maintenance or restoration of international peace and security.

Article 7

ASSISTANCE TO THE TRUSTEESHIP COUNCIL

The International Labour Organization agrees to co-operate with the Trusteeship Council in the carrying out of its functions and in particular agrees that it will, to the greatest extent possible, render such assistance as the Trusteeship Council may request in regard to matters with which the Organization is concerned.

Article 8

NON-SELF-GOVERNING TERRITORIES

The International Labour Organization agrees to co-operate with the United Nations in giving effect to the principles and obligations set forth in chapter XI of the Charter with regard to matters affecting the well being and development of the peoples of non-self-governing territories.

Article 9

RELATIONS WITH THE INTERNATIONAL COURT OF JUSTICE

1. The International Labour Organization agrees to furnish any information which may be requested by the International Court of Justice in pursuance of Article 34 of the Statute of the Court.

2. The General Assembly authorizes the International Labour Organization to request advisory opinions of the International Court of Justice on legal questions arising within the scope of its activities other than questions concerning the mutual relationships of the Organization and the United Nations or other specialized agencies.

3. Such request may be addressed to the Court by the Conference or by the Governing Body acting in pursuance of an authorization by the Conference.

4. When requesting the International Court of Justice to give an advisory opinion the International Labour Organization shall inform the Economic and Social Council of the request.

Article 10

HEADQUARTERS AND REGIONAL OFFICES

1. The International Labour Organization, having regard to the desirability of the headquarters of specialized agencies being situated at the permanent seat of the United Nations and to the advantages that flow from such centralization, agrees to consult the United Nations before making any decision concerning the location of its permanent headquarters.

2. Any regional or branch offices which the International Labour Organization may establish shall, so far as practicable, be closely associated with such regional or branch offices as the United Nations may establish.

Article 11

PERSONNEL ARRANGEMENTS

1. The United Nations and the International Labour Organization recognize that the eventual development of a single unified international civil service is desirable from the standpoint of effective administrative co-ordination, and with this end in view agree to develop common personnel standards, methods and arrangements designed to avoid serious discrepancies in terms and conditions of employment, to avoid competition in recruitment of personnel, and to facilitate interchange of personnel in order to obtain the maximum benefit from their services.

2. The United Nations and the International Labour Organization agree to co-operate to the fullest extent possible in achieving these ends and in particular they agree to:

- (a) consult together concerning the establishment of an International Civil Service Commission to advise on the means by which common standards of recruitment in the secretariats of the United Nations and of the specialized agencies may be ensured;
- (b) consult together concerning other matters relating to the employment of their officers and staff, including conditions of service, duration of appointments, classification, salary scales and allowances, retirement and pension rights and staff regulations and rules with a view to securing as much uniformity in these matters as shall be found practicable;
- (c) co-operate in the interchange of personnel, when desirable, on a temporary or permanent basis, making due provision for the retention of seniority and pension rights;
- (d) co-operate in the establishment and operation of suitable machinery for the settlement of disputes arising in connection with the employment of personnel and related matters.

Article 12

STATISTICAL SERVICES

1. The United Nations and the International Labour Organization agree to strive for maximum co-operation, the elimination of all undesirable duplication between them, and the most efficient use of their technical personnel in their respective collection, analysis, publication and dissemina-

tion of statistical information. They agree to combine their efforts to secure the greatest possible usefulness and utilization of statistical information and to minimize the burdens placed upon national governments and other organizations from which such information may be collected.

2. The International Labour Organization recognizes the United Nations as the central agency for the collection, analysis, publication, standardization and improvement of statistics serving the general purposes of international organizations.

3. The United Nations recognizes the International Labour Organization as the appropriate agency for the collection, analysis, publication, standardization and improvement of statistics within its special sphere, without prejudice to the right of the United Nations to concern itself with such statistics so far as they may be essential for its own purposes or for the improvement of statistics throughout the world.

4. The United Nations shall develop administrative instruments and procedures through which effective statistical co-operation may be secured between the United Nations and the agencies brought into relationship with it.

5. It is recognized as desirable that the collection of statistical information should not be duplicated by the United Nations or any of the specialized agencies whenever it is practicable for any of them to utilize information or materials which another may have available.

6. In order to build up a central collection of statistical information for general use, it is agreed that data supplied to the International Labour Organization for incorporation in its basic statistical series or special reports should so far as practicable be made available to the United Nations.

Article 13

ADMINISTRATIVE AND TECHNICAL SERVICES

1. The United Nations and the International Labour Organization recognize the desirability, in the interest of administrative and technical uniformity and of the most efficient use of personnel and resources, of avoiding, whenever possible, the establishment and operation of competitive or overlapping facilities and services among the United Nations and the specialized agencies.

2. Accordingly, the United Nations and the International Labour Organization agree to consult together concerning the establishment and use of common administrative and technical services and facilities in addition to those referred to in articles 11, 12 and 14, in so far as the establishment and use of such services may from time to time be found practicable and appropriate.

3. Arrangements shall be made between the United Nations and the International Labour Organization in regard to the registration and deposit of official documents.

Article 14

BUDGETARY AND FINANCIAL ARRANGEMENTS

1. The International Labour Organization recognizes the desirability of establishing close budgetary and financial relationships with the United Nations in order that the administrative operations of the United Nations

and of the specialized agencies shall be carried out in the most efficient and economical manner possible, and that the maximum measure of co-ordination and uniformity with respect to these operations shall be secured.

2. The United Nations and the International Labour Organization agree to co-operate to the fullest extent possible in achieving these ends and, in particular, shall consult together concerning the desirability of making appropriate arrangements for the inclusion of the budget of the Organization within a general budget of the United Nations. Any such arrangements which may be made shall be defined in a supplementary agreement between the two organizations.

3. In the preparation of the budget of the International Labour Organization the Organization shall consult with the United Nations.

4. The International Labour Organization agrees to transmit its proposed budget to the United Nations annually at the same time as such budget is transmitted to its members. The General Assembly shall examine the budget or proposed budget of the Organization and may make recommendations to it concerning any item or items contained therein.

5. Representatives of the International Labour Organization shall be entitled to participate, without vote, in the deliberations of the General Assembly or any committee thereof at all times when the budget of the Organization or general administrative or financial questions affecting the Organization are under consideration.

6. The United Nations may undertake the collection of contributions from those members of the International Labour Organization which are also Members of the United Nations in accordance with such arrangements as may be defined by a later agreement between the United Nations and the International Labour Organization.

7. The United Nations shall, upon its own initiative or upon the request of the International Labour Organization, arrange for studies to be undertaken concerning other financial and fiscal questions of interest to the Organization and to other specialized agencies with a view to the provision of common services and the securing of uniformity in such matters.

8. The International Labour Organization agrees to conform as far as may be practicable to standard practices and forms recommended by the United Nations.

Article 15

FINANCING OF SPECIAL SERVICES

1. In the event of the International Labour Organization being faced with the necessity of incurring substantial extra expense as a result of any request which the United Nations may make for special reports, studies or assistance in accordance with articles 5, 6 or 7, or with other provisions of this agreement, consultation shall take place with a view to determining the most equitable manner in which such expense shall be borne.

2. Consultation between the United Nations and the International Labour Organization shall similarly take place with a view to making such arrangements as may be found equitable for covering the costs of central administrative, technical or fiscal services or facilities or other special assistance provided by the United Nations.

Article 16

INTER-AGENCY AGREEMENTS

The International Labour Organization agrees to inform the Council of the nature and scope of any formal agreement between the International Labour Organization and any other specialized agency or inter-governmental organization and in particular agrees to inform the Council before any such agreement is concluded.

Article 17

LIAISON

1. The United Nations and the International Labour Organization agree to the foregoing provisions in the belief that they will contribute to the maintenance of effective liaison between the two organizations. They affirm their intention of taking whatever further measures may be necessary to make this liaison fully effective.

2. The liaison arrangements provided for in the foregoing articles of this agreement shall apply as far as appropriate to the relations between such branch or regional offices as may be established by the two organizations as well as between their central machinery.

Article 18

IMPLEMENTATION OF THE AGREEMENT

The Secretary-General and the Director may enter into such supplementary arrangements for the implementation of this agreement as may be found desirable in the light of the operating experience of the two organizations.

Article 19

REVISION

This agreement shall be subject to revision by agreement between the United Nations and the International Labour Organization.

Article 20

ENTRY INTO FORCE

This agreement shall come into force on its approval by the General Assembly of the United Nations and the General Conference of the International Labour Organization.

New York, 30 May, 1946

(signed)

A. Ramaswami MUDALIAR,
*President of the Economic and Social Council
of the United Nations and Chairman of the Com-
mittee of the Council on Negotiations with
Specialized Agencies.*

G. MYRDDIN-EVANS,
*Chairman of the Governing Body of the Inter-
national Labour Office and of the Negotiating
Delegation of the International Labour Organi-
zation.*

Annex 8—Instrument for the Amendment of the Constitution of the International Labour Organization

The General Conference of the International Labour Organization, having been convened at Montreal by the Governing Body of the International Labour Office, and having met in its Twenty-ninth Session on 19th September, 1946; and having decided upon the adoption of certain amendments to the Constitution of the International Labour Organization, a question which is included in the second item on the agenda of the Session, adopts, this ninth day of October of the year one thousand nine hundred and forty-six, the following instrument for the amendment of the Constitution of the International Labour Organization, which may be cited as the Constitution of the International Labour Organization Instrument of Amendment, 1946:

Article 1

As from the date of the coming into force of this Instrument of Amendment, the Constitution of the International Labour Organization, of which the text at present in force is set forth in the first column of the Annex to this Instrument, shall have effect as amended in the second column of the said Annex.

Article 2

Two copies of this Instrument of Amendment shall be authenticated by the signatures of the President of the Conference and of the Director-General of the International Labour Office. One of these copies shall be deposited in the archives of the International Labour Office and the other shall be communicated to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations. The Director-General will communicate a certified copy of the Instrument to all the Members of the International Labour Organization.

Article 3

1. The formal ratifications or acceptances of this Instrument of Amendment shall be communicated to the Director-General of the International Labour Office, who shall notify the Members of the Organization of the receipt thereof.

2. This Instrument of Amendment will come into force in accordance with the provisions of Article 36 of the Constitution of the Organization.

3. On the coming into force of this Instrument, the Director-General of the International Labour Office shall so notify all the Members of the International Labour Organization, the Secretary-General of the United Nations, and all the States having signed the Charter of the United Nations.

THE CONSTITUTION OF THE INTERNATIONAL LABOUR ORGANIZATION

Amended Text¹

PREAMBLE

Whereas universal and lasting peace can be established only if it is based upon social justice;

And whereas conditions of labour exist involving such injustice, hardship and privation to large numbers of people as to produce unrest so great that the peace and harmony of the world are imperilled; and an improvement of those conditions is urgently required: as, for example, by the regulation of the hours of work, including the establishment of a maximum working day and week, the regulation of the labour supply, the prevention of unemployment, the provision of an adequate living wage, the protection of the worker against sickness, disease and injury arising out of his employment, the protection of children, young persons and women, provision for old age and injury, protection of the interests of workers when employed in countries other than their own, *recognition of the principle of equal remuneration for work of equal value*, recognition of the principle of freedom of association, the organization of vocational and technical education and other measures;

Whereas, also the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries;

The HIGH CONTRACTING PARTIES, moved by sentiments of justice and humanity as well as by the desire to secure the permanent peace of the world, *and with a view to attaining the objectives set forth in this Preamble*, agree to the following Constitution of the International Labour Organization:

CHAPTER I—ORGANIZATION

Article 1

1. A permanent organization is hereby established for the promotion of the objects set forth in the *Preamble to this Constitution and in the Declaration concerning the aims and purposes of the International Labour Organization adopted at Philadelphia on 10th May, 1944, the text of which is annexed to this Constitution.*

2. The Members of the International Labour Organization shall be the States which were Members of the Organization on 1st November, 1945, and such other States as may become Members in pursuance of the provisions of paragraphs 3 and 4 of this Article.

3. Any original Member of the United Nations and any State admitted to membership of the United Nations by a decision of the General Assembly in accordance with the provisions of the Charter may become a Member of the International Labour Organization by communicating to the *Director-General* of the International Labour Office its formal acceptance of the obligations of the Constitution of the International Labour Organization.

4. The General Conference of the International Labour Organization may also admit Members to the Organization by a vote concurred in by two thirds of the delegates attending the session, including two thirds of

¹ New or revised portions of the Constitution are printed in italics.

the Government delegates present and voting. Such admission shall take effect on the communication to the *Director-General* of the International Labour Office by the Government of the new Member of its formal acceptance of the obligations of the Constitution of the Organization.

5. No Member of the International Labour Organization may withdraw from the Organization without giving notice of its intention so to do to the *Director-General* of the International Labour Office. Such notice shall take effect two years after the date of its reception by the *Director-General*, subject to the Member having at that time fulfilled all financial obligations arising out of its membership. When a Member has ratified any International Labour Convention, such withdrawal shall not affect the continued validity for the period provided for in the Convention of all obligations arising thereunder or relating thereto.

6. In the event of any State having ceased to be a Member of the Organization, its readmission to membership shall be governed by the provisions of paragraph 3 or paragraph 4 of this Article as the case may be.

Article 2

The permanent organization shall consist of:

- (a) a General Conference of representatives of the Members;
- (b) a *Governing Body* composed as described in Article 7; and
- (c) an International Labour Office controlled by the Governing Body.

Article 3

1. The meetings of the General Conference of representatives of the Members shall be held from time to time as occasion may require, and at least once in every year. It shall be composed of four representatives of each of the Members, of whom two shall be Government delegates and the two others shall be delegates representing respectively the employers and the workpeople of each of the Members.

2. Each delegate may be accompanied by advisers, who shall not exceed two in number for each item on the agenda of the meeting. When questions specially affecting women are to be considered by the Conference, one at least of the advisers should be a woman.

3. *Each Member which is responsible for the international relations of non-metropolitan territories may appoint as additional advisers to each of its delegates:*

- (a) *persons nominated by it as representatives of any such territory in regard to matters within the self-governing powers of that territory; and*
- (b) *persons nominated by it to advise its delegates in regard to matters concerning non-self-governing territories.*

4. *In the case of a territory under the joint authority of two or more Members, persons may be nominated to advise the delegates of such Members.*

5. The Members undertake to nominate non-Government delegates and advisers chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople, as the case may be, in their respective countries.

6. Advisers shall not speak except on a request made by the delegate whom they accompany and by the special authorization of the President of the Conference, and may not vote.

7. A delegate may by notice in writing addressed to the President appoint one of his advisers to act as his deputy, and the adviser, while so acting, shall be allowed to speak and vote.

8. The names of the delegates and their advisers will be communicated to the International Labour Office by the Government of each of the Members.

9. The credentials of delegates and their advisers shall be subject to scrutiny by the Conference, which may, by two thirds of the votes cast by the delegates present, refuse to admit any delegate or adviser whom it deems not to have been nominated in accordance with this Article.

Article 4

1. Every delegate shall be entitled to vote individually on all matters which are taken into consideration by the Conference.

2. If one of the Members fails to nominate one of the non-Government delegates whom it is entitled to nominate, the other non-Government delegate shall be allowed to sit and speak at the Conference, but not to vote.

3. If in accordance with Article 3 the Conference refuses admission to a delegate of one of the Members, the provisions of the present Article shall apply as if that delegate had not been nominated.

Article 5

The meetings of the Conference shall, *subject to any decisions which may have been taken by the Conference itself at a previous meeting, be held at such place as may be decided by the Governing Body.*

Article 6

Any change in the seat of the International Labour Office shall be decided by the Conference by a two-thirds majority of the votes cast by the delegates present.

Article 7

1. *The Governing Body shall consist of thirty-two persons:*
 Sixteen representing Governments,
 Eight representing the employers, and
 Eight representing the workers.

2. Of the sixteen persons representing Governments, eight shall be appointed by the Members of chief industrial importance, and eight shall be appointed by the Members selected for that purpose by the Government delegates to the Conference, excluding the delegates of the eight Members mentioned above. Of the sixteen Members represented, six shall be non-European States.

3. *The Governing Body shall as occasion requires determine which are the Members of the Organization of chief industrial importance and shall make rules to ensure that all questions relating to the selection of the Members of chief industrial importance are considered by an impartial committee before being decided by the Governing Body. Any appeal made by a Member from the declaration of the Governing Body as to which are the Members of chief industrial importance shall be decided by the Conference, but an appeal to the Conference shall not suspend the application of the declaration until such time as the Conference decides the appeal.*

4. The persons representing the employers and the persons representing the workers shall be elected respectively by the employers' delegates and the workers' delegates to the Conference. Two employers' representatives and two workers' representatives shall belong to non-European States.

5. The period of office of the Governing Body shall be three years. *If for any reason the Governing Body elections do not take place on the expiry of this period, the Governing Body shall remain in office until such elections are held.*

6. The method of filling vacancies and of appointing substitutes and other similar questions may be decided by the Governing Body subject to the approval of the Conference.

7. The Governing Body shall, from time to time, *elect from its number a Chairman and two Vice-Chairmen, of whom one shall be a person representing a Government, one a person representing the employers, and one a person representing the workers.*

8. The Governing Body shall regulate its own procedure and shall fix its own times of meeting. A special meeting shall be held if a written request to that effect is made by at least twelve of the representatives on the Governing Body.

Article 8

1. There shall be a *Director-General* of the International Labour Office, who shall be appointed by the Governing Body, and, subject to the instructions of the Governing Body, shall be responsible for the efficient conduct of the International Labour Office and for such other duties as may be assigned to him.

2. The *Director-General* or his deputy shall attend all meetings of the Governing Body.

Article 9

1. The staff of the International Labour Office shall be appointed by the *Director-General* under regulations approved by the Governing Body.

2. So far as is possible with due regard to the efficiency of the work of the Office, the *Director-General* shall select persons of different nationalities.

3. A certain number of these persons shall be women.

4. *The responsibilities of the Director-General and the staff shall be exclusively international in character. In the performance of their duties, the Director-General and the staff shall not seek or receive instructions from any Government or from any other authority external to the Organization. They shall refrain from any action which might reflect on their position as international officials responsible only to the Organization.*

5. *Each Member of the Organization undertakes to respect the exclusively international character of the responsibilities of the Director-General and the staff and not to seek to influence them in the discharge of their responsibilities.*

Article 10

1. The functions of the International Labour Office shall include the collection and distribution of information on all subjects relating to the international adjustment of conditions of industrial life and labour, and particularly the examination of subjects which it is proposed to bring before

the Conference with a view to the conclusion of international Conventions, and the conduct of such special investigations as may be ordered by the Conference or by the Governing Body.

2. Subject to such directions as the Governing Body may give, the Office will—

- (a) prepare the documents on the various items of the agenda for the meetings of the Conference;
- (b) accord to Governments at their request all appropriate assistance within its power in connection with the framing of laws and regulations on the basis of the decisions of the Conference and the improvement of administrative practices and systems of inspection;
- (c) carry out the duties required of it by the provisions of this Constitution in connection with the effective observance of Conventions;
- (d) edit and issue, in such languages as the Governing Body may think desirable, publications dealing with problems of industry and employment of international interest.

3. Generally, it shall have such other powers and duties as may be assigned to it by the Conference or by the Governing Body.

Article 11

The Government departments of any of the Members which deal with questions of industry and employment may communicate directly with the *Director-General* through the representative of their Government on the Governing Body of the International Labour Office or, failing any such representative, through such other qualified official as the Government may nominate for the purpose.

Article 12

1. *The International Labour Organization shall co-operate within the terms of this Constitution with any general international organization entrusted with the co-ordination of the activities of public international organizations having specialized responsibilities and with public international organizations having specialized responsibilities in related fields.*

2. *The International Labour Organization may make appropriate arrangements for the representatives of public international organizations to participate without vote in its deliberations.*

3. *The International Labour Organization may make suitable arrangements for such consultation as it may think desirable with recognized non-governmental international organizations, including international organizations of employers, workers, agriculturists and co-operators.*

Article 13

1. The International Labour Organization may make such financial and budgetary arrangements with the United Nations as may appear appropriate.

2. Pending the conclusion of such arrangements or if at any time no such arrangements are in force—

- (a) each of the Members will pay the travelling and subsistence expenses of its delegates and their advisers and of its representatives attending the meetings of the Conference or the Governing Body, as the case may be;
- (b) all other expenses of the International Labour Office and of the meetings of the Conference or Governing Body shall be paid by the *Director-General* of the International Labour Office out of the general funds of the International Labour Organization;
- (c) the arrangements for the approval, allocation and collection of the budget of the International Labour Organization shall be determined by the Conference by a two-thirds majority of the votes cast by the delegates present, and shall provide for the approval of the budget and of the arrangements for the allocation of expenses among the Members of the Organization by a committee of Government representatives.

3. The expenses of the International Labour Organization shall be borne by the Members in accordance with the arrangements in force in virtue of paragraph 1 or paragraph 2 (c) of this Article.

4. A Member of the Organization which is in arrears in the payment of its financial contribution to the Organization shall have no vote in the Conference, in the Governing Body, in any committee, or in the elections of members of the Governing Body, if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years: *Provided that the Conference may by a two-thirds majority of the votes cast by the delegates present permit such a Member to vote if it is satisfied that the failure to pay is due to conditions beyond the control of the Member.*

5. The *Director-General* of the International Labour Office shall be responsible to the Governing Body for the proper expenditure of the funds of the International Labour Organization.

CHAPTER II—PROCEDURE

Article 14

1. The agenda for all meetings of the Conference will be settled by the Governing Body, *which* shall consider any suggestion as to the agenda that may be made by the Government of any of the Members or by any representative organization recognized for the purpose of Article 3, *or by any public international organization.*

2. *The Governing Body shall make rules to ensure thorough technical preparation and adequate consultation of the Members primarily concerned by means of a preparatory Conference or otherwise, prior to the adoption of a Convention or Recommendation by the Conference.*

Article 15

1. The *Director-General* shall act as the *Secretary-General* of the Conference, and shall transmit the agenda so as to reach the Members four months before the meeting of the Conference, and, through them, the non-Government delegates when appointed.

2. *The reports on each item of the agenda shall be despatched so as to reach the Members in time to permit adequate consideration before the meeting of the Conference. The Governing Body shall make rules for the application of this provision.*

Article 16

1. Any of the Governments of the Members may formally object to the inclusion of any item or items in the agenda. The grounds for such objection shall be set forth in a statement addressed to the *Director-General* who shall circulate it to all the Members of the Organization.

2. Items to which such objection has been made shall not, however, be excluded from the agenda, if at the Conference a majority of two-thirds of the votes cast by the delegates present is in favour of considering them.

3. If the Conference decides (otherwise than under the preceding paragraph) by two-thirds of the votes cast by the delegates present that any subject shall be considered by the Conference, that subject shall be included in the agenda for the following meeting.

Article 17

1. *The Conference shall elect a President and three Vice-Presidents. One of the Vice-Presidents shall be a Government delegate, one an employers' delegate and one a workers' delegate.* The Conference shall regulate its own procedure and may appoint committees to consider and report on any matter.

2. Except as otherwise expressly provided in this *Constitution* or by the terms of any *Convention* or other instrument conferring powers on the Conference or of the financial and budgetary arrangements adopted in virtue of Article 13, all matters shall be decided by a simple majority of the votes cast by the delegates present.

3. The voting is void unless the total number of votes cast is equal to half the number of the delegates attending the Conference.

Article 18

The Conference may add to any committees which it appoints technical experts without power to vote.

Article 19

1. When the Conference has decided on the adoption of proposals with regard to an item in the agenda, it will rest with the Conference to determine whether these proposals should take the form: (a) *of an international Convention*, or (b) *of a Recommendation to meet circumstances where the subject, or aspect of it, dealt with is not considered suitable or appropriate at that time for a Convention.*

2. In either case a majority of two-thirds of the votes cast by the delegates present shall be necessary on the final vote for the adoption *of the Convention or Recommendation*, as the case may be, by the Conference.

3. In framing any *Convention or Recommendation* of general application the Conference shall have due regard to those countries in which climatic conditions, the imperfect development of industrial organization, or other special circumstances make the industrial conditions substantially different and shall suggest the modifications, if any, which it considers may be required to meet the case of such countries.

4. *Two copies of the Convention or Recommendation shall be authenticated by the signatures of the President of the Conference and of the Director-General. Of these copies one shall be deposited in the archives of*

the International Labour Office and the other with the Secretary-General of the United Nations. The Director-General will communicate a certified copy of the Convention or Recommendation to each of the Members.

5. *In the case of a Convention—*

- (a) *the Convention will be communicated to all Members for ratification;*
- (b) *each of the Members undertakes that it will, within the period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within the period of one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the session of the Conference, bring the Convention before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action;*
- (c) *Members shall inform the Director-General of the International Labour Office of the measures taken in accordance with this Article to bring the Convention before the said competent authority or authorities, with particulars of the authority or authorities regarded as competent, and of the action taken by them;*
- (d) *if the Member obtains the consent of the authority or authorities within whose competence the matter lies, it will communicate the formal ratification of the Convention to the Director-General and will take such action as may be necessary to make effective the provisions of such Convention;*
- (e) *if the Member does not obtain the consent of the authority or authorities within whose competence the matter lies, no further obligation shall rest upon the Member except that it shall report to the Director-General of the International Labour Office, at appropriate intervals as requested by the Governing Body, the position of its law and practice in regard to the matters dealt with in the Convention, showing the extent to which effect has been given, or is proposed to be given, to any of the provisions of the Convention by legislation, administrative action, collective agreement or otherwise and stating the difficulties which prevent or delay the ratification of such Convention.*

6. *In the case of a Recommendation—*

- (a) *the Recommendation will be communicated to all Members for their consideration with a view to effect being given to it by national legislation or otherwise;*
- (b) *each of the Members undertakes that it will, within a period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within the period of one year, then at the earliest practicable moment and in no case later than eighteen months after the closing of the Conference, bring the Recommendation before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action;*
- (c) *the Members shall inform the Director-General of the International Labour Office of the measures taken in accordance with this article to bring the Recommendation before the said competent authority or authorities with particulars of the authority or authorities regarded as competent, and of the action taken by them;*

(d) apart from bringing the Recommendation before the said competent authority or authorities, no further obligation shall rest upon the Members, except that they shall report to the Director-General of the International Labour Office, at appropriate intervals as requested by the Governing Body, the position of the law and practice in their country in regard to the matters dealt with in the Recommendation, showing the extent to which effect has been given, or is proposed to be given, to the provisions of the recommendation and such modifications of these provisions as it has been found or may be found necessary to make in adopting or applying them.

7. In the case of a federal State, the following provisions shall apply:

(a) in respect of Conventions and Recommendations which the federal Government regards as appropriate under its constitutional system for federal action, the obligations of the federal State shall be the same as those of Members which are not federal States;

(b) in respect of Conventions and Recommendations which the federal Government regards as appropriate under its constitutional system, in whole or in part, for action by the constituent States, provinces, or cantons rather than for federal action, the federal Government shall—

(i) make, in accordance with its Constitution and the Constitutions of the States, provinces or cantons concerned, effective arrangements for the reference of such Conventions and Recommendations not later than eighteen months from the closing of the session of the Conference to the appropriate federal, State, provincial or cantonal authorities for the enactment of legislation or other action;

(ii) arrange, subject to the concurrence of the State, provincial or cantonal Governments concerned, for periodical consultations between the federal and the State, provincial or cantonal authorities with a view to promoting within the federal State co-ordinated action to give effect to the provisions of such Conventions and Recommendations;

(iii) inform the Director-General of the International Labour Office of the measures taken in accordance with this article to bring such Conventions and Recommendations before the appropriate federal, State, provincial or cantonal authorities with particulars of the authorities regarded as appropriate and of the action taken by them;

(iv) in respect of each such Convention which it has not ratified, report to the Director-General of the International Labour Office, at appropriate intervals as requested by the Governing Body, the position of the law and practice of the federation and its constituent States, provinces or cantons in regard to the Convention, showing the extent to which effect has been given, or is proposed to be given, to any of the provisions of the Convention by legislation, administrative action, collective agreement, or otherwise;

(v) in respect of each such Recommendation, report to the Director-General of the International Labour Office, at appropriate intervals as requested by the Governing Body, the position of the law and practice of the federation and its constituent States, provinces or cantons in regard to the

Recommendation, showing the extent to which effect has been given, or is proposed to be given, to the provisions of the Recommendation and such modifications of these provisions as have been found or may be found necessary in adopting or applying them.

8. *In no case shall the adoption of any Convention or Recommendation by the Conference, or the ratification of any Convention by any Member, be deemed to affect any law, award, custom or agreement which ensures more favourable conditions to the workers concerned than those provided for in the Convention or Recommendation.*

Article 20

Any Convention so ratified shall be *communicated by the Director-General of the International Labour Office to the Secretary-General of the United Nations for registration in accordance with the provisions of Article 102 of the Charter of the United Nations* but shall only be binding upon the Members which ratify it.

Article 21

1. If any Convention coming before the Conference for final consideration fails to secure the support of two thirds of the votes cast by the delegates present, it shall nevertheless be within the right of any of the Members of the Organization to agree to such Convention among themselves.

2. Any Convention so agreed to shall be communicated by the Governments concerned to the *Director-General of the International Labour Office and to the Secretary-General of the United Nations for registration in accordance with the provisions of Article 102 of the Charter of the United Nations.*

Article 22

Each of the Members agrees to make an annual report to the International Labour Office on the measures which it has taken to give effect to the provisions of Conventions to which it is a party. These reports shall be made in such form and shall contain such particulars as the Governing Body may request.

Article 23

1. *The Director-General shall lay before the next meeting of the Conference a summary of the information and reports communicated to him by Members in pursuance of Articles 19 and 22.*

2. *Each Member shall communicate to the representative organizations recognized for the purpose of Article 3 copies of the information and reports communicated to the Director-General in pursuance of Articles 19 and 22.*

Article 24

In the event of any representation being made to the International Labour Office by an industrial association of employers or of workers that any of the Members has failed to secure in any respect the effective observance within its jurisdiction of any Convention to which it is a party, the Governing Body may communicate this representation to the Government against which it is made, and may invite that Government to make such statement on the subject as it may think fit.

Article 25

If no statement is received within a reasonable time from the Government in question, or if the statement when received is not deemed to be satisfactory by the Governing Body, the latter shall have the right to publish the representation and the statement, if any, made in reply to it.

Article 26

1. Any of the Members shall have the right to file a complaint with the International Labour Office if it is not satisfied that any other Member is securing the effective observance of any Convention which both have ratified in accordance with the foregoing Articles.

2. The Governing Body may, if it thinks fit, before referring such a complaint to a Commission of Enquiry, as hereinafter provided for, communicate with the Government in question in the manner described in Article 24.

3. If the Governing Body does not think it necessary to communicate the complaint to the Government in question, or if, when *it has* made such communication, no statement in reply has been received within a reasonable time which the Governing Body considers to be satisfactory, the Governing Body may *appoint* a Commission of Enquiry to consider the complaint and to report thereon.

4. The Governing Body may adopt the same procedure either of its own motion or on receipt of a complaint from a delegate to the Conference.

5. When any matter arising out of Articles 25 or 26 is being considered by the Governing Body, the Government in question shall, if not already represented thereon, be entitled to send a representative to take part in the proceedings of the Governing Body while the matter is under consideration. Adequate notice of the date on which the matter will be considered shall be given to the Government in question.

Article 27

The Members agree that, in the event of the reference of a complaint to a Commission of Enquiry under Article 26, they will each, whether directly concerned in the complaint or not, place at the disposal of the Commission all the information in their possession which bears upon the subject matter of the complaint.

Article 28

When the Commission of Enquiry has fully considered the complaint, it shall prepare a report embodying its findings on all questions of fact relevant to determining the issue between the parties and containing such recommendations as it may think proper as to the steps which should be taken to meet the complaint and the time within which they should be taken.

Article 29

1. *The Director-General of the International Labour Office* shall communicate the report of the Commission of Enquiry *to the Governing Body* and to each of the Governments concerned in the complaint, and shall cause it to be published.

2. Each of these Governments shall within *three months* inform the *Director-General of the International Labour Office* whether or not it

accepts the recommendations contained in the report of the Commission; and if not, whether it proposes to refer the complaint to the *International Court of Justice*.

Article 30

In the event of any Member failing to take the action required by paragraphs 5 (b), 6 (b) or 7 (b) (i) of Article 19 with regard to a *Convention or Recommendation*, any other Member shall be entitled to refer the matter to the *Governing Body*. In the event of the *Governing Body* finding that there has been such a failure, it shall report the matter to the *Conference*.

Article 31

The decision of the *International Court of Justice* in regard to a complaint or matter which has been referred to it in pursuance of Article 29 shall be final.

Article 32

The *International Court of Justice* may affirm, vary or reverse any of the findings or recommendations of the Commission of Enquiry, if any.

Article 33

In the event of any Member failing to carry out within the time specified the recommendations, if any, contained in the report of the Commission of Enquiry, or in the decision of the *International Court of Justice*, as the case may be, the *Governing Body* may recommend to the *Conference* such action as it may deem wise and expedient to secure compliance therewith.

Article 34

The defaulting Government may at any time inform the *Governing Body* that it has taken the steps necessary to comply with the recommendations of the Commission of Enquiry or with those in the decision of the *International Court of Justice*, as the case may be, and may request it to constitute a Commission of Enquiry to verify its contention. In this case the provisions of Articles 27, 28, 29, 31 and 32 shall apply, and if the report of the Commission of Enquiry or the decision of the *International Court of Justice* is in favour of the defaulting Government, the *Governing Body* shall forthwith recommend the discontinuance of any action taken in pursuance of Article 33.

CHAPTER III—GENERAL

Article 35

1. *The Members undertake that Conventions which they have ratified in accordance with the provisions of this Constitution shall be applied to the non-metropolitan territories for whose international relations they are responsible, including any trust territories for which they are the administering authority, except where the subject matter of the Convention is within the self-governing powers of the territory or the Convention is inapplicable owing to the local conditions or subject to such modifications as may be necessary to adapt the Convention to local conditions.*

2. Each Member which ratifies a Convention shall as soon as possible after ratification communicate to the Director-General of the International Labour Office a declaration stating in respect of the territories other than those referred to in paragraphs 4 and 5 below the extent to which it undertakes that the provisions of the Convention shall be applied and giving such particulars as may be prescribed by the Convention.

3. Each Member which has communicated a declaration in virtue of the preceding paragraph may from time to time, in accordance with the terms of the Convention, communicate a further declaration modifying the terms of any former declaration and stating the present position in respect of such territories.

4. Where the subject matter of the Convention is within the self-governing powers of any non-metropolitan territory the Member responsible for the international relations of that territory shall bring the Convention to the notice of the Government of the territory as soon as possible with a view to the enactment of legislation or other action by such Government. Thereafter the Member, in agreement with the Government of the territory, may communicate to the Director-General of the International Labour Office a declaration accepting the obligations of the Convention on behalf of such territory.

5. A declaration accepting the obligations of any Convention may be communicated to the Director-General of the International Labour Office—

- (a) by two or more Members of the Organization in respect of any territory which is under their joint authority; or
- (b) by any international authority responsible for the administration of any territory, in virtue of the Charter of the United Nations or otherwise, in respect of any such territory.

6. Acceptance of the obligations of a Convention in virtue of paragraph 4 or paragraph 5 shall involve the acceptance on behalf of the territory concerned of the obligations stipulated by the terms of the Convention and the obligations under the Constitution of the Organization which apply to ratified Conventions. A declaration of acceptance may specify such modifications of the provisions of the Convention as may be necessary to adapt the Convention to local conditions.

7. Each Member or international authority which has communicated a declaration in virtue of paragraph 4 or paragraph 5 of this Article may from time to time, in accordance with the terms of the Convention, communicate a further declaration modifying the terms of any former declaration or terminating the acceptance of the obligations of the Convention on behalf of the territory concerned.

8. If the obligations of a Convention are not accepted on behalf of a territory to which paragraph 4 or paragraph 5 of this Article relates, the Member or Members or international authority concerned shall report to the Director-General of the International Labour Office the position of the law and practice of that territory in regard to the matters dealt with in the Convention and the report shall show the extent to which effect has been given, or is proposed to be given, to any of the provisions of the Convention by legislation, administrative action, collective agreement or otherwise and shall state the difficulties which prevent or delay the acceptance of such Convention.

Article 36

Amendments to this Constitution which are adopted by the Conference by a majority of two thirds of the votes cast by the delegates present shall take effect when ratified or accepted by two thirds of the Members of the Organization including five of the eight Members which are represented on the Governing Body as Members of chief industrial importance in accordance with the provisions of paragraph 3 of Article 7 of this Constitution.

Article 37

1. Any question or dispute relating to the interpretation of *this Constitution* or of any subsequent Convention concluded by the Members in pursuance of the provisions of *this Constitution* shall be referred for decision to the *International Court of Justice*.

2. *Notwithstanding the provisions of paragraph 1 of this Article the Governing Body may make and submit to the Conference for approval rules providing for the appointment of a tribunal for the expeditious determination of any dispute or question relating to the interpretation of a Convention which may be referred thereto by the Governing Body or in accordance with the terms of the Convention. Any applicable judgment or advisory opinion of the International Court of Justice shall be binding upon any tribunal established in virtue of this paragraph. Any award made by such a tribunal shall be circulated to the Members of the Organization and any observations which they may make thereon shall be brought before the Conference.*

Article 38

1. *The International Labour Organization may convene such regional conferences and establish such regional agencies as may be desirable to promote the aims and purposes of the Organization.*

2. *The powers, functions and procedure of regional conferences shall be governed by rules drawn up by the Governing Body and submitted to the General Conference for confirmation.*

CHAPTER IV—MISCELLANEOUS PROVISIONS

Article 39

The International Labour Organization shall possess full juridical personality and in particular the capacity—

- (a) *to contract;*
- (b) *to acquire and dispose of immovable and movable property;*
- (c) *to institute legal proceedings.*

Article 40

1. *The International Labour Organization shall enjoy in the territory of each of its Members such privileges and immunities as are necessary for fulfilment of its purposes.*

2. *Delegates to the Conference, members of the Governing Body and the Director-General and officials of the Office shall likewise enjoy such privileges and immunities as are necessary for the independent exercise of their functions in connection with the Organization.*

3. *Such privileges and immunities shall be defined in a separate agreement to be prepared by the Organization with a view to its acceptance by the Members.*

ANNEX

DECLARATION CONCERNING THE AIMS AND PURPOSES OF THE INTERNATIONAL
LABOUR ORGANIZATION

The General Conference of the International Labour Organization, meeting in its Twenty-sixth Session in Philadelphia, hereby adopts, this tenth day of May in the year nineteen hundred and forty-four, the present Declaration of the aims and purposes of the International Labour Organization and of the principles which should inspire the policy of its Members.

I

The Conference reaffirms the fundamental principles on which the Organization is based and, in particular, that:

- (a) labour is not a commodity;
- (b) freedom of expression and of association are essential to sustained progress;
- (c) poverty anywhere constitutes a danger to prosperity everywhere;
- (d) the war against want requires to be carried on with unrelenting vigour within each nation, and by continuous and concerted international effort in which the representatives of workers and employers, enjoying equal status with those of Governments, join with them in free discussion and democratic decision with a view to the promotion of the common welfare.

II

Believing that experience has fully demonstrated the truth of the statement in the Constitution of the International Labour Organization that lasting peace can be established only if it is based on social justice, the Conference affirms that:

- (a) all human beings, irrespective of race, creed or sex, have the right to pursue both their material well-being and their spiritual development in conditions of freedom and dignity, of economic security and equal opportunity;
- (b) the attainment of the conditions in which this shall be possible must constitute the central aim of national and international policy;
- (c) all national and international policies and measures, in particular those of an economic and financial character, should be judged in this light and accepted only in so far as they may be held to promote and not to hinder the achievement of this fundamental objective;
- (d) it is a responsibility of the International Labour Organization to examine and consider all international economic and financial policies and measures in the light of this fundamental objective;
- (e) in discharging the tasks entrusted to it the International Labour Organization, having considered all relevant economic and financial factors, may include in its decisions and recommendations any provisions which it considers appropriate.

III

The Conference recognizes the solemn obligation of the International Labour Organization to further among the nations of the world programmes which will achieve:

- (a) full employment and the raising of standards of living;
- (b) the employment of workers in the occupations in which they can have the satisfaction of giving the fullest measure of their skill and attainments and make their greatest contribution to the common well-being;
- (c) the provision, as a means to the attainment of this end and under adequate guarantees for all concerned, of facilities for training and the transfer of labour, including migration for employment and settlement;
- (d) policies in regard to wages and earnings, hours and other conditions of work calculated to ensure a just share of the fruits of progress to all, and a minimum living wage to all employed and in need of such protection;
- (e) the effective recognition of the right of collective bargaining, the co-operation of management and labour in the continuous improvement of productive efficiency, and the collaboration of workers and employers in the preparation and application of social and economic measures;
- (f) the extension of social security measures to provide a basic income to all in need of such protection and comprehensive medical care;
- (g) adequate protection for the life and health of workers in all occupations;
- (h) provision for child welfare and maternity protection;
- (i) the provision of adequate nutrition, housing and facilities for recreation and culture;
- (j) the assurance of equality of educational and vocational opportunity.

IV

Confident that the fuller and broader utilization of the world's productive resources necessary for the achievement of the objectives set forth in this Declaration can be secured by effective international and national action, including measures to expand production and consumption, to avoid severe economic fluctuations, to promote the economic and social advancement of the less developed regions of the world, to assure greater stability in world prices of primary products, and to promote a high and steady volume of international trade, the Conference pledges the full co-operation of the International Labour Organization with such international bodies as may be entrusted with a share of the responsibility for this great task and for the promotion of the health, education and well-being of all peoples.

V

The Conference affirms that the principles set forth in this Declaration are fully applicable to all peoples everywhere and that, while the manner of their application must be determined with due regard to the stage of social and economic development reached by each people, their progressive application to peoples who are still dependent, as well as to those who have already achieved self-government, is a matter of concern to the whole civilized world.

Annex 9—Partial Text of Address by Mr. Trygve Lie

In meeting you here to-day, I do not have the feeling that I meet you as an outsider. In the first place, of course, I have been a member of the working class movement since boyhood and, because of that, I have been directly concerned with the activities of the International Labour Organization. I have followed the work of that Organization since it was organized in 1919, and although I last attended a meeting of this Conference in 1925, when I was adviser to the Workers' group of the Norwegian delegation, I have continued to keep track of its activities. . . .

What I want to do is to discuss briefly the part which the International Labour Organization has to play in the future, and the relationship of its work with the activities of the United Nations. The broad objectives of the United Nations in the economic and social field are laid down in Article 55 of the Charter, and they are to "promote higher standards of living, full employment, and conditions of economic and social progress and development." This directive constitutes a challenge to our energy and our devotion, and it will continue to do so for many years to come. My own feeling has been that the accomplishment of the positive economic and social aims of the Charter will require more of our energy and resources than the mere prevention of armed conflict.

The United Nations does not possess the machinery to accomplish all of these objectives by itself. It must depend to a great extent upon other bodies. Its function is to co-ordinate the activities of these different organs which are designed to carry out the purposes of the Charter. In the case of the International Labour Organization, the United Nations looks to an Organization of proved efficiency, in which employers and workers as well as Governments are represented, to carry out one of the most important branches of this work. A glance at the agenda of this Conference shows that you are doing so. For example, by your work on the organization of employment, you are making a real contribution toward the achievement of full employment throughout the world. This is part of the mandate of the Economic and Social Council. You are also considering the question of minimum standards of social policy in non-self-governing territories. The welfare of these territories is a special concern of the United Nations. Your work on the protection of children fits in with the work of the Social Commission which will be set up under the Economic and Social Council. In general, the activities of the International Labour Organization are closely bound up with those of the United Nations.

Lasting peace can only be secured on a basis of social justice and social security. At the same time, progress toward social justice and social security can be made only within a framework of political security. The United Nations needs the full and active support of the International Labour Organization. On the other hand, the International Labour Organization is bound to be strengthened by its close relationship with the United Nations and other specialized agencies. The basis for this relationship is provided by the agreement which has been concluded between the United Nations and the International Labour Organization. It is appropriate that this was the first agreement negotiated under Article 57 of the Charter. The successful experience of the International Labour Organization was the most important single factor in developing the new idea of specialized agencies. That experience proved the value of separate organizations, with a large measure of autonomy, operating as instruments of international co-operation in their specific fields. I hope that this agreement will be approved both by this Conference and by the General

Assembly of the United Nations. I believe that under it the United Nations and the International Labour Organization will be able to work in full agreement and harmony throughout the years. I can assure you that you will have every assistance from the United Nations in accomplishing your great task.

There are two or three points in the agreement on which I would like to comment. In the first place, I attach particular importance to Articles IV and V, which are designed to ensure that the work carried out by the United Nations and the International Labour Organization is properly integrated. You will recall that under Article IV the Economic and Social Council or the Assembly is entitled to make recommendations to the International Labour Organization. The International Labour Organization agrees to consult with the United Nations regarding such recommendations. Finally, the International Labour Organization agrees to co-operate in any measures which are designed to co-ordinate the activities of the specialized agencies and the United Nations. Article V provides for a full exchange of documents and information. I am glad to see that the International Labour Organization has already submitted two Resolutions of the Paris and Mexico Conferences to the Economic and Social Council for its advice and information. These are being placed on the agenda of the first session of the Economic and Employment Commission.

I also attach great importance to Article II, which provides for mutual representation. Such relations between the United Nations and the International Labour Organization are already good. In agreement with the Director, I would like to consider measures for making them even better.

Finally, I would like to mention Article X, which concerns the site of the International Labour Organization headquarters. In this connection, I give you my personal assurance that if the International Labour Organization decides to make its permanent headquarters at the site of the United Nations, the United Nations secretariat will do everything possible to assist you in securing the accommodations you need.

Annex 10—Convention (No. 80) for the Partial Revision of the Conventions Adopted by the General Conference of the International Labour Organization at its First Twenty-eight Sessions for the Purpose of Making Provision for the Future Discharge of Certain Chancery Functions Entrusted by the Said Conventions to the Secretary-General of the League of Nations and Introducing Therein Certain Further Amendments Consequential upon the Dissolution of the League of Nations and the Amendment of the Constitution of the International Labour Organization

The General Conference of the International Labour Organization,

Having been convened at Montreal by the Governing Body of the International Labour Office, and having met in its Twenty-ninth Session on 19 September 1946, and

Having decided upon the adoption of certain proposals with regard to the partial revision of the Conventions adopted by the Conference at its first twenty-eight sessions for the purpose of making provision for the future discharge of certain chancery functions entrusted by the said Conventions to the Secretary-General of the League of Nations and introducing therein certain further amendments consequential

upon the dissolution of the League of Nations and the amendment of the Constitution of the International Labour Organization, a question which is included in the second item on the agenda of the Session, and

Considering that these proposals must take the form of an international Convention,

adopts this ninth day of October of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Final Articles Revision Convention, 1946:

Article 1

1. In the texts of the Conventions adopted by the International Labour Conference in the course of its first twenty-five sessions the words "the Director-General of the International Labour Office" shall be substituted for the words "the Secretary-General of the League of Nations", the words "the Director-General" shall be substituted for the words "the Secretary-General", and the words "the International Labour Office" shall be substituted for the words "the Secretariat" in all passages where these various expressions respectively occur.

2. The registration by the Director-General of the International Labour Office of the ratifications of Conventions and amendments, acts of denunciation, and declarations provided for in the Conventions adopted by the Conference in the course of its first twenty-five sessions shall have the same force and effect for all purposes as the registration of such ratifications, acts of denunciation and declarations by the Secretary-General of the League of Nations in accordance with the terms of the original texts of the said Conventions.

3. The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications, acts of denunciation and declarations registered by him in accordance with the provisions of the Conventions adopted by the Conference at its first twenty-five sessions as amended by the foregoing provisions of this Article.

Article 2

1. The words "of the League of Nations" shall be deleted from the first paragraph of the Preamble of each of the Conventions adopted by the Conference in the course of its first eighteen sessions.

2. The words "in accordance with the provisions of the Constitution of the International Labour Organization" shall be substituted for the words "in accordance with the provisions of Part XIII of the Treaty of Versailles and of the corresponding Parts of the other Treaties of Peace" and the variants thereof contained in the Preambles of the Conventions adopted by the Conference in the course of its first seventeen sessions.

3. The words "under the conditions set forth in the Constitution of the International Labour Organization" shall be substituted for the words "under the conditions set forth in Part XIII of the Treaty of Versailles and the corresponding Parts of the other Treaties of Peace" or any variant thereof in all articles of the Conventions adopted by the Conference in the course of its first twenty-five sessions in which the latter words or any variant thereof occur.

4. The words "Article 22 of the Constitution of the International Labour Organization" shall be substituted for the words "Article 408 of the Treaty of Versailles and the corresponding Articles of the other Treaties of Peace" or any variant thereof in all articles of the Conventions adopted by the Conference in the course of its first twenty-five sessions in which the latter words or any variant thereof occur.

5. The words "Article 35 of the Constitution of the International Labour Organization" shall be substituted for the words "Article 421 of the Treaty of Versailles and the corresponding Articles of the other Treaties of Peace" in all articles of the Conventions adopted by the Conference in the course of its first twenty-five sessions in which the latter words or any variant thereof occur.

6. The word "Draft" shall be omitted from the expression "Draft Convention" in the Preambles of the Conventions adopted by the Conference in the course of its first twenty-five sessions and in all articles of the said Conventions in which the said expression occurs.

7. The title "Director-General" shall be substituted for the title "Director" in all articles of the Conventions adopted by the Conference in the course of its twenty-eighth session which refer to the Director of the International Labour Office.

8. In each of the Conventions adopted by the Conference in the course of its first seventeen sessions there shall be included in the Preamble the words "which may be cited as" together with the short title currently used by the International Labour Office for the Convention in question.

9. In each of the Conventions adopted by the Conference in the course of its first fourteen sessions all unnumbered paragraphs of articles containing more than one paragraph shall be consecutively numbered.

Article 3

Any Member of the Organization which, after the date of the coming into force of this Convention, communicates to the Director-General of the International Labour Office its formal ratification of any Convention adopted by the Conference in the course of its first twenty-eight sessions shall be deemed to have ratified that Convention as modified by this Convention.

Article 4

Two copies of this Convention shall be authenticated by the signature of the President of the Conference and of the Director-General of the International Labour Office. Of these copies one shall be deposited in the archives of the International Labour Office and the other shall be communicated to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations. The Director-General shall communicate a certified copy of this Convention to each of the Members of the International Labour Organization.

Article 5

1. The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office.

2. The Convention shall come into force at the date on which the ratifications of two Members of the International Labour Organization have been received by the Director-General.

3. On the coming into force of this Convention and on the subsequent receipt of further ratifications of the Convention, the Director-General of the International Labour Office shall so notify all the Members of the International Labour Organization and the Secretary-General of the United Nations.

4. Each Member of the Organization which ratifies this Convention thereby recognizes the validity of any action taken thereunder during the interval between the first coming into force of the Convention and the date of its own ratification.

Article 6

On the first coming into force of this Convention the Director-General of the International Labour Office shall cause official texts of the Conventions adopted by the Conference in the course of its first twenty-eight sessions as modified by the provisions of this Convention to be prepared in two original copies, duly authenticated by his signature, one of which shall be deposited in the archives of the International Labour Office and one of which shall be communicated to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations; the Director-General shall communicate certified copies of these texts to each of the Members of the Organization.

Article 7

Notwithstanding anything contained in any of the Conventions adopted by the Conference in the course of its first twenty-eight sessions, the ratification of this Convention by a Member shall not, *ipso jure*, involve the denunciation of any such Convention, nor shall the entry into force of this Convention close any such Convention to further ratification.

Article 8

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides—

- (a) the ratification by a Member of the new revising Convention shall, *ipso jure*, involve the denunciation of this Convention if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its present form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 9

The English and French versions of the text of this Convention are equally authoritative.

Annex 13—Convention (No. 77) Concerning Medical Examination for Fitness for Employment in Industry of Children and Young Persons

The General Conference of the International Labour Organization,
Having been convened at Montreal by the Governing Body of the
International Labour Office and having met in its Twenty-ninth
Session on 19 September 1946, and

Having decided upon the adoption of certain proposals with regard
to medical examination for fitness for employment in industry
of children and young persons, which is included in the third item
on the agenda of the Session, and

Having determined that these proposals shall take the form of an
international Convention,

adopts this ninth day of October of the year one thousand nine hundred and
forty-six the following Convention, which may be cited as the Medical
Examination of Young Persons (Industry) Convention, 1946:

PART I. GENERAL PROVISIONS

Article 1

1. This Convention applies to children and young persons employed or working in, or in connection with, industrial undertakings, whether public or private.

2. For the purpose of this Convention, the term "industrial undertaking" includes particularly:

- (a) mines, quarries, and other works for the extraction of minerals from the earth;
- (b) undertakings in which articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed, including undertakings engaged in shipbuilding or in the generation, transformation or transmission of electricity or motive power of any kind;
- (c) undertakings, engaged in building and civil engineering work, including constructional, repair, maintenance, alteration and demolition work;
- (d) undertakings engaged in the transport of passengers or goods by road, rail, inland waterway or air, including the handling of goods at docks, quays, wharves, warehouses or airports.

3. The competent authority shall define the line of division which separates industry from agriculture, commerce and other non-industrial occupations.

Article 2

1. Children and young persons under eighteen years of age shall not be admitted to employment by an industrial undertaking unless they have been found fit for the work on which they are to be employed by a thorough medical examination.

2. The medical examination for fitness for employment shall be carried out by a qualified physician approved by the competent authority and shall be certified either by a medical certificate or by an endorsement on the work permit or in the workbook.

3. The document certifying fitness for employment may be issued—

- (a) subject to specified conditions of employment;
- (b) for a specified job or for a group of jobs or occupations involving similar health risks which have been classified as a group by the authority responsible for the enforcement of the laws and regulations concerning medical examinations for fitness for employment.

4. National laws or regulations shall specify the authority competent to issue the document certifying fitness for employment and shall define the conditions to be observed in drawing up and issuing the document.

Article 3

1. The fitness of a child or young person for the employment in which he is engaged shall be subject to medical supervision until he has attained the age of eighteen years.

2. The continued employment of a child or young person under eighteen years of age shall be subject to the repetition of medical examinations at intervals of not more than one year.

3. National laws or regulations shall—

- (a) make provision for the special circumstances in which a medical re-examination shall be required in addition to the annual examination or at more frequent intervals in order to ensure effective supervision in respect of the risks involved in the occupation and of the state of health of the child or young person as shown by previous examinations; or
- (b) empower the competent authority to require medical re-examinations in exceptional cases.

Article 4

1. In occupations which involve high health risks medical examination and re-examinations for fitness for employment shall be required until at least the age of twenty-one years.

2. National laws or regulations shall either specify, or empower an appropriate authority to specify the occupations or categories of occupations in which medical examinations and re-examinations for fitness for employment shall be required until at least the age of twenty-one years.

Article 5

The medical examination required by the preceding Articles shall not involve the child or young persons, or his parents, in any expense.

Article 6

1. Appropriate measures shall be taken by the competent authority for vocational guidance and physical and vocational rehabilitation of children and young persons found by medical examination to be unsuited to certain types of work or to have physical handicaps or limitations.

2. The nature and extent of such measures shall be determined by the competent authority; for this purpose co-operation shall be established between the labour, health, educational and social services concerned, and effective liaison shall be maintained between these services in order to carry out such measures.

3. National laws or regulations may provide for the issue to children and young persons whose fitness for employment is not clearly determined—

- (a) of temporary work permits or medical certificates valid for a limited period at the expiration of which the young worker will be required to undergo re-examination;
- (b) of permits or certificates requiring special conditions of employment.

Article 7

1. The employer shall be required to file and keep available to labour inspectors either the medical certificate for fitness for employment or the work permit or workbook showing that there are no medical objections to the employment as may be prescribed by national laws or regulations.

2. National laws or regulations shall determine the other methods of supervision to be adopted for ensuring the strict enforcement of this Convention.

PART II. SPECIAL PROVISIONS FOR CERTAIN COUNTRIES

Article 8

1. In the case of a Member the territory of which includes large areas where, by reason of the sparseness of the population or the stage of development of the area, the competent authority considers it impracticable to enforce the provisions of this Convention, the authority may exempt such areas from the application of the Convention either generally or with such exceptions in respect of particular undertakings or occupations as it thinks fit.

2. Each Member shall indicate in its first annual report upon the application of this Convention submitted under Article 22 of the Constitution of the International Labour Organization any areas in respect of which it proposes to have recourse to the provisions of the present Article and no Member shall, after the date of its first annual report, have recourse to the provisions of the present Article except in respect of areas so indicated.

3. Each Member having recourse to the provisions of the present Article shall indicate in subsequent annual reports any areas in respect of which it renounces the right to have recourse to the provisions of the present Article.

Article 9

1. Any Member which, before the date of the adoption of the laws or regulations permitting the ratification of this Convention, had no laws or regulations concerning medical examination for fitness for employment in industry of children and young persons may, by a declaration accompanying its ratification, substitute an age lower than eighteen years, but in no case lower than sixteen years, for the age of eighteen years prescribed in Articles 2 and 3 and an age lower than twenty-one years, but in no case lower than nineteen years, for the age of twenty-one years prescribed in Article 4.

2. Any Member which has made such a declaration may at any time cancel the declaration by a subsequent declaration.

3. Every Member for which a declaration made in virtue of paragraph 1 of this Article is in force shall indicate each year in its annual reports upon the application of this Convention the extent to which any progress has been made with a view to the full application of the provisions of the Convention.

Article 10

1. The provisions of Part I of this Convention shall apply to India subject to the modifications set forth in this Article:

- (a) the said provisions shall apply to all territories in respect of which the Indian legislature has jurisdiction to apply them;
- (b) the term "industrial undertaking" shall include—
 - (i) factories as defined in the Indian Factories Act;
 - (ii) mines as defined in the Indian Mines Act;
 - (iii) railways;
 - (iv) all employments covered by the Employment of Children Act, 1938;
- (c) Articles 2 and 3 shall apply to children and young persons under sixteen years of age;

- (d) in Article 4 nineteen years shall be substituted for twenty-one years;
- (e) paragraphs 1 and 2 of Article 6 shall not apply to India.
2. The provisions of paragraph 1 of this Article shall be subject to amendment by the following procedure:
- (a) the International Labour Conference may, at any session at which the matter is included in its agenda, adopt by a two-thirds majority draft amendments to paragraph 1 of this Article;
- (b) any such draft amendment shall, within the period of one year, or, in exceptional circumstances, of eighteen months, from the closing of the session of the Conference, be submitted in India to the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action;
- (c) India will, if it obtains the consent of the authority or authorities within whose competence the matter lies, communicate the formal ratification of the amendment to the Director-General of the International Labour Office for registration;
- (d) any such draft amendment shall take effect as an amendment to this Convention or ratification by India.

PART III. FINAL ARTICLES

Article 11

Nothing in this Convention shall affect any law, award, custom or agreement between employers and workers which ensures more favourable conditions than those provided by this Convention.

Article 12

The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office for registration.

Article 13

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Director-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

Article 14

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Director-General of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 15

1. The Director-General of the International Labour Office shall notify all Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the second ratification communicated to him, the Director-General shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 16

The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 17

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 18

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 14 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 19

The English and French versions of the text of this Convention are equally authoritative.

Annex 14—Convention (No. 78) Concerning Medical Examination² of Children and Young Persons for Fitness for Employment³ in Non-Industrial Occupations

The General Conference of the International Labour Organization, Having been convened at Montreal by the Governing Body of the International Labour Office and having met in its Twenty-ninth Session on 19 September 1946, and

Having decided upon the adoption of certain proposals with regard to medical examination for fitness for employment in non-industrial occupations of children and young persons, which is included in the third item on the agenda of the Session, and

Having determined that these proposals shall take the form of an international Convention,

adopts this ninth day of October of the year one thousand nine hundred and forty-six the following Convention which may be cited as the Medical Examination of Young Persons (Non-Industrial Occupations) Convention, 1946:

PART I. GENERAL PROVISIONS

Article 1

1. This Convention applies to children and young persons employed for wages, or working directly or indirectly for gain, in non-industrial occupations.

2. For the purpose of this Convention, the term "non-industrial occupations" includes all occupations other than those recognized by the competent authority as industrial, agricultural or maritime occupations.

3. The competent authority shall define the line of division which separates non-industrial occupations from industrial, agricultural and maritime occupations.

4. National laws or regulations may exempt from the application of this Convention employment, on work which is recognized as not being dangerous to the health of children or young persons, in family undertakings in which only parents and their children or wards are employed.

Article 2

1. Children and young persons under eighteen years of age shall not be admitted to employment or work in non-industrial occupations unless they have been found fit for the work in question by a thorough medical examination.

2. The medical examination for fitness for employment shall be carried out by a qualified physician approved by the competent authority and shall be certified either by a medical certificate or by an endorsement on the work permit or in the workbook.

3. The document certifying fitness for employment may be issued—

(a) subject to specified conditions of employment;

(b) for a specified job or for a group of jobs or occupations involving similar health risks which have been classified as a group by the authority responsible for the enforcement of the laws and regulations concerning medical examinations for fitness for employment.

4. National laws or regulations shall specify the authority competent to issue the document certifying fitness for employment and shall define the conditions to be observed in drawing up and issuing the document.

Article 3

1. The fitness of a child or young person for the employment in which he is engaged shall be subject to medical supervision until he has attained the age of eighteen years.

2. The continued employment of a child or young person under eighteen years of age shall be subject to the repetition of medical examinations at intervals of not more than one year.

3. National laws or regulations shall—

- (a) make provision for the special circumstances in which a medical re-examination shall be required in addition to the annual examination or at more frequent intervals in order to ensure effective supervision in respect of the risks involved in the occupation and of the state of health of the child or young person as shown by previous examinations; or
- (b) empower the competent authority to require medical re-examinations in exceptional cases.

Article 4

1. In occupations which involve high health risks medical examination and re-examinations for fitness for employment shall be required until at least the age of twenty-one years.

2. National laws or regulations shall either specify, or empower an appropriate authority to specify, the occupations or categories of occupations in which medical examination and re-examinations for fitness for employment shall be required until at least the age of twenty-one years.

Article 5

The medical examinations required by the preceding Articles shall not involve the child or young person, or his parents, in any expense.

Article 6

1. Appropriate measures shall be taken by the competent authority for vocational guidance and physical and vocational rehabilitation of children and young persons found by medical examination to be unsuited to certain types of work or to have physical handicaps or limitations.

2. The nature and extent of such measures shall be determined by the competent authority; for this purpose co-operation shall be established between the labour, health, educational and social services concerned, and effective liaison shall be maintained between these services in order to carry out such measures.

3. National laws or regulations may provide for the issue to children and young persons whose fitness for employment is not clearly determined—

- (a) of temporary work permits or medical certificates valid for a limited period at the expiration of which the young worker will be required to undergo re-examination;
- (b) of permits or certificates requiring special conditions of employment.

Article 7

1. The employer shall be required to file and keep available to labour inspectors either the medical certificate for fitness for employment or the work permit or workbook showing that there are no medical objections to the employment as may be prescribed by national laws or regulations.

2. National laws or regulations shall determine—

- (a) the measures of identification to be adopted for ensuring the application of the system of medical examination for fitness for employment to children and young persons engaged either on their own account or on account of their parents in itinerant trading or in any other occupation carried on in the streets or in places to which the public have access; and
- (b) the other methods of supervision to be adopted for ensuring the strict enforcement of the Convention.

PART II. SPECIAL PROVISIONS FOR CERTAIN COUNTRIES

Article 8

1. In the case of a Member the territory of which includes large areas where, by reason of the sparseness of the population or the stage of development of the area, the competent authority considers it impracticable to enforce the provisions of this Convention, the authority may exempt such areas from the application of the Convention either generally or with such exceptions in respect of particular undertakings or occupations as it thinks fit.

2. Each Member shall indicate in its first annual report upon the application of this Convention submitted under Article 22 of the Constitution of the International Labour Organization any areas in respect of which it proposes to have recourse to the provisions of the present Article and no Member shall, after the date of its first annual report, have recourse to the provisions of the present Article except in respect of areas so indicated.

3. Each Member having recourse to the provisions of the present Article shall indicate in subsequent annual reports any areas in respect of which it renounces the right to have recourse to the provisions of the present Article.

Article 9

1. Any Member which, before the date of the adoption of the laws or regulations permitting the ratification of this Convention, had no laws or regulations concerning medical examination for fitness for employment of young persons in non-industrial occupations may, by a declaration accompanying its ratification, substitute an age lower than eighteen years, but in no case lower than sixteen years, for the age of eighteen years prescribed in Articles 2 and 3 and an age lower than twenty-one years, but in no case lower than nineteen years, for the age of twenty-one years prescribed in Article 4.

2. Any Member which has made such a declaration may at any time cancel the declaration by a subsequent declaration.

3. Every Member for which a declaration made in virtue of paragraph 1 of this Article is in force shall indicate each year in its annual reports upon the application of this Convention the extent to which any progress has been made with a view to the full application of the provisions of the Convention.

PART III. FINAL ARTICLES

Article 10

Nothing in this Convention shall affect any law, award, custom or agreement between employers and workers which ensures more favourable conditions than those provided by this Convention.

Article 11

The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office for registration.

Article 12

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Director-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

Article 13

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Director-General of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 14

1. The Director-General of the International Labour Office shall notify all Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the second ratification communicated to him, the Director-General shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 15

The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 16

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 17

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 13 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 18

The English and French versions of the text of this Convention are equally authoritative.

Annex 15—Recommendation (No. 79) Concerning the Medical Examination for Fitness for Employment of Children and Young Persons

The General Conference of the International Labour Organization,
Having been convened at Montreal by the Governing Body of the International Labour Office and having met in its Twenty-ninth Session on 19th September, 1946, and

Having decided upon the adoption of certain proposals with regard to the medical examination for fitness for employment of children and young persons, which is included in the third item on the agenda of the Session, and

Having adopted Conventions concerning medical examination for fitness for employment in industry and non-industrial occupations of children and young persons, and

Having decided to supplement these Conventions by a Recommendation, adopts this ninth day of October of the year one thousand nine hundred and forty-six the following Recommendation, which may be cited as the Medical Examination of Young Persons Recommendation, 1946:

Whereas the Medical Examination of Young Persons Conventions, 1946, lay down the basis for regulations relating to medical examination for fitness designed to protect the health of children and young persons against the risks of unsuitable employment but leave to national laws or regulations the choice of practical methods of detail; and

Whereas it is desirable, while permitting practical adaptations of the system of medical examinations so that it may be incorporated in the general administrative scheme of the various States Members, to assure reasonably uniform application of the Conventions for the purpose of maintaining at the highest possible level the protection of children and young persons which it is the aim of the Conventions to ensure; and

Whereas it is desirable to make known to all Members methods which have been found to give satisfactory results in certain countries and which may be a guide to them;

The Conference recommends that each Member should apply the following provisions as rapidly as national conditions allow and report to the International Labour Office as requested by the Governing Body concerning the measures taken to give effect thereto.

I. SCOPE OF THE REGULATIONS

1. The provisions of the Medical Examination of Young Persons (Non-Industrial Occupations) Convention, 1946, should be applied to all occupations carried on in or in connection with the following undertakings and services, whether public or private:

- (a) commercial establishments, including delivery services;
- (b) postal and telecommunication services, including delivery services;
- (c) establishments and administrative services in which the persons employed are mainly engaged in clerical work;
- (d) newspaper undertakings (editing, distribution, delivery services and the sale of newspapers in the streets or in places to which the public have access);
- (e) hotels, boarding-houses, restaurants, clubs, cafés and other refreshment houses, and domestic service for wages in private households;
- (f) establishments for the treatment and care of the sick, infirm, or destitute and of orphans;
- (g) theatres and places of public entertainment;
- (h) itinerant trading, the hawking of objects of all kinds, and any other occupation or service carried on in the streets or in places to which the public have access;
- (i) all other jobs, occupations or services which are neither industrial nor agricultural nor maritime.

2. Without prejudice to the discretion which the Medical Examination of Young Persons (Non-Industrial Occupations) Convention, 1946, leaves to Members to exempt from its application employment, on work which is recognized as not being dangerous to the health of children and young persons, in family undertakings in which only parents and their children or wards are engaged, governments should, in taking into account the fact that occupations which are not generally considered hazardous may be dangerous for individuals who have not the aptitudes required for a certain job or for any job, endeavour to extend to all occupations carried on for profit, without consideration of the family relationship existing between the persons engaged in them, the application of the regulations concerning medical examination for fitness for employment.

II. PROVISIONS CONCERNING MEDICAL EXAMINATIONS

3. Without prejudice to the medical examination on entry into employment for the purpose of certifying the fitness of a child or young person for a specified occupation required by Article 2 of the said Conventions, it is desirable that all children should undergo, preferably before the end of their compulsory school attendance, a general medical examination, the results of which can be used by the vocational guidance services.

4. The thorough medical examination required on entry into employment should—

- (a) include all the clinical, radiological and laboratory tests useful for discovering fitness or unfitness for the employment in question; and
- (b) be accompanied in each case by appropriate advice on health care.

5. Periodical examination should—

- (a) be carried out in the same way as the examination on entry into a given employment; and
- (b) be accompanied by appropriate advice on health care and if necessary by supplementary vocational guidance with a view to a change of occupation.

6. (1) The findings of the examination should be entered in full on an index-card to be kept in the files of the medical services responsible for carrying out the examinations.

(2) The information entered on the medical certificate intended to come to the knowledge of the employer or the statement concerning the medical examination endorsed on the permit or workbook should be explicit enough to indicate the limitations of fitness for employment noted in the examination and the precautions which should, as a result, be taken regarding employment conditions, but should on no account include confidential information such as the diagnosis of congenital defects or diseases discovered by the examination.

7. (1) Since in most cases the adolescent stage is not ended at eighteen years of age and there is consequently still need of special protection, it is desirable to extend compulsory medical examination until at least twenty-one years for all young workers employed in industrial or non-industrial occupations.

(2) As a minimum, the degree of risk calling for the extension of medical examination until twenty-one years in accordance with Article 4 of the said Conventions should be estimated liberally; this extension should apply, in particular, to all mining occupations, to all employment in hospitals, and to such employments in public entertainment as dancing and aerobatics.

8. The provisions of the preceding paragraph should not be interpreted as impairing the obligation to apply the provisions of international Conventions or of national laws or regulations which prohibit the employment of young persons in certain occupations on account of the high health risks involved or which require, irrespective of the age of the worker, the health supervision of all those employed in such occupations.

III. MEASURES FOR PERSONS FOUND BY MEDICAL EXAMINATION TO BE UNFIT OR ONLY PARTIALLY FIT FOR EMPLOYMENT

9. The measures to be taken by the national authority for enforcing the provisions of Article 6 of the said Conventions should include, in particular, measures for ensuring that children and young persons found by medical examination to have physical handicaps or limitations or to be generally unfit for employment—

- (a) receive proper medical treatment for removing or alleviating their handicap or limitation;
- (b) are encouraged to return to school or are guided towards suitable occupations likely to be agreeable to them and within their capacity and are provided with opportunities of training for such occupations;
- (c) have the advantage of financial aid, if necessary, during the period of medical treatment, schooling or vocational training.

10. In order to facilitate the guidance towards suitable occupations of children and young persons found to be lacking in physical resistance or to have definite handicaps, it is desirable that lists of trades and

occupations suitable to each category of young deficient or handicapped workers should be drawn up by qualified specialists under the joint responsibility of the medical services and the services competent to deal with employment problems; these lists should be used as guides for examining doctors but should not be binding.

IV. RESPONSIBLE AUTHORITIES

11. (1) In order to ensure the full efficacy of the medical examination of young workers, measures should be taken to train a body of examining doctors who are qualified in industrial hygiene and have a wide experience of the medical problems relating to the health of children and young persons.

(2) The competent authority should ensure that courses and practical studies are organized for this purpose.

(3) Examining doctors should be selected on the basis of the qualifications indicated in sub-paragraph (1).

12. The system of medical examination for fitness for employment should be administered in such a way as to ensure close co-operation between the medical services responsible for carrying out the examinations and the services responsible for authorizing the employment of children and young persons and for supervising their conditions of employment.

V. METHODS OF ENFORCEMENT

13. (1) In order to ensure a regular medical examination for fitness for employment to children and young persons employed in an industrial or non-industrial undertaking either on the premises of the undertaking or in connection with its operation, employers should be required to send to a specified authority a notification of the employment of all young workers under the age-limit laid down by the regulations for the examination.

(2) This authority should be—

(a) the official medical service responsible for carrying out the examinations and for keeping complete records of the findings of these examinations; or

(b) the service competent to authorize the employment of a child or young person on the basis of the findings of the examination.

14. In order to ensure a regular medical examination for fitness for employment of children and young persons engaged, either on their own account or on account of their parents, in itinerant trading or any other occupation carried on in the streets or in places to which the public have access—

(a) young itinerant workers under the age-limit up to which medical examination for fitness is compulsory should be required to obtain an individual licence, issued preferably by a service under the labour department on the basis of the certificate for fitness for employment and renewed annually on the basis of the findings of the annual re-examination; the licence should bear a serial number and the photograph or the signature or any other means of identification of the holder and should also include information concerning—

(i) the name, age and address of the holder;

(ii) the name and address of his parents and the statement that they have authorized the child or young person to engage in the occupation for which the licence is issued;

- (iii) the findings of the medical examination on entry into employment and of subsequent re-examinations;
- (b) the holder of the above-mentioned licence should be required to wear a visible badge bearing the serial number corresponding to that of the licence;
- (c) full co-operation should be established between the labour inspection services responsible for the enforcement of legislation and local authorities, particularly the services of the preventive police, for the purpose of checking regularly the documents of young itinerant workers and for ensuring their compliance with the regulations concerning medical examination for fitness for employment.

Annex 16—Convention (No. 79) Concerning the Restriction of Night Work of Children and Young Persons in Non-Industrial Occupations

The General Conference of the International Labour Organization, Having been convened at Montreal by the Governing Body of the International Labour Office and having met in its Twenty-ninth Session on 19 September 1946, and

Having decided upon the adoption of certain proposals with regard to the restriction of night work of children and young persons in non-industrial occupations, which is included in the third item on the agenda of the Session, and

Having determined that these proposals shall take the form of an international Convention,

adopts this ninth day of October of the year one thousand nine hundred and forty-six the following Convention, which may be cited as the Night Work of Young Persons (Non-Industrial Occupations) Convention, 1946:

PART I. GENERAL PROVISIONS

Article 1

1. This Convention applies to children and young persons employed for wages, or working directly or indirectly for gain, in non-industrial occupations.

2. For the purpose of this Convention, the term "non-industrial occupation" includes all occupations other than those recognized by the competent authority as industrial, agricultural or maritime occupations.

3. The competent authority shall define the line of division which separates non-industrial occupations from industrial, agricultural and maritime occupations.

4. National laws or regulations may exempt from the application of this Convention—

- (a) domestic service in private households; and
- (b) employment, on work which is not deemed to be harmful, prejudicial, or dangerous to children or young persons, in family undertakings in which only parents and their children or wards are employed.

Article 2

1. Children under fourteen years of age who are admissible for full-time or part-time employment and children over fourteen years of age who are still subject to full-time compulsory school attendance shall not be employed nor work at night during a period of at least fourteen consecutive hours, including the interval between eight o'clock in the evening and eight o'clock in the morning.

2. Provided that national laws or regulations may, where local conditions so require, substitute another interval of twelve hours of which the beginning shall not be fixed later than eight thirty o'clock in the evening nor the termination earlier than six o'clock in the morning.

Article 3

1. Children over fourteen years of age who are no longer subject to full-time compulsory school attendance and young persons under eighteen years of age shall not be employed nor work at night during a period of at least twelve consecutive hours, including the interval between ten o'clock in the evening and six o'clock in the morning.

2. Provided that, where there are exceptional circumstances affecting a particular branch of activity or a particular area, the competent authority may, after consultation with the employers' and workers' organizations concerned, decide that in the case of children and young persons employed in that branch of activity or area, the interval between eleven o'clock in the evening and seven o'clock in the morning may be substituted for that between ten o'clock in the evening and six o'clock in the morning.

Article 4

1. In countries where the climate renders work by day particularly trying, the night period may be shorter than that prescribed in the above Articles if compensatory rest is accorded during the day.

2. The prohibition of night work may be suspended by the Government for young persons of sixteen years of age and over when in case of serious emergency the national interest demands it.

3. National laws or regulations may empower an appropriate authority to grant temporary individual licences in order to enable young persons of sixteen years of age and over to work at night when the special needs of vocational training so require, subject to the period of rest being not less than eleven consecutive hours in every period of twenty-four hours.

Article 5

1. National laws or regulations may empower an appropriate authority to grant individual licences in order to enable children or young persons under the age of eighteen years to appear at night as performers in public entertainments or to participate at night as performers in the making of cinematographic films.

2. The minimum age at which such a licence may be granted shall be prescribed by national laws or regulations.

3. No such licence may be granted when, because of the nature of the entertainment or the circumstances in which it is carried on, or the nature of the cinematographic film or the conditions under which it is made, participation in the entertainment or in the making of the film may be dangerous to the life, health, or morals of the child or young person.

4. The following conditions shall apply to the granting of licences:—
- (a) the period of employment shall not continue after midnight;
 - (b) strict safeguards shall be prescribed to protect the health and morals, and to ensure kind treatment of, the child or young person and to avoid interference with his education;
 - (c) the child or young person shall be allowed a consecutive rest period of at least fourteen hours.

Article 6

1. In order to ensure the due enforcement of the provisions of this Convention, national laws or regulations shall—

- (a) provide for a system of public inspection and supervision adequate for the particular needs of the various branches of activity to which the Convention applies;
- (b) require every employer to keep a register, or to keep available official records, showing the names and dates of birth of all persons under eighteen years of age employed by him and their hours of work; in the case of children and young persons working in the streets or in places to which the public have access, the register or records shall show the hours of service agreed upon in the contract of employment;
- (c) provide suitable means for assuring identification and supervision of persons under eighteen years of age engaged, on account of an employer or on their own account, in employment or occupations carried on in the streets or in places to which the public have access;
- (d) provide penalties applicable to employers or other responsible adults for breaches of such laws or regulations.

2. There shall be included in the annual reports to be submitted under Article 22 of the Constitution of the International Labour Organization full information concerning all laws and regulations by which effect is given to the provisions of this Convention and, more particularly, concerning—

- (a) any interval which may be substituted for the interval prescribed in paragraph 1 of Article 2 in virtue of the provisions of paragraph 2 of that Article;
- (b) the extent to which advantage is taken of the provisions of paragraph 2 of Article 3;
- (c) the authorities empowered to grant individual licences in virtue of the provisions of paragraph 1 of Article 5 and the minimum age prescribed for the granting of licences in accordance with the provisions of paragraph 2 of the said Article.

PART II. SPECIAL PROVISIONS FOR CERTAIN COUNTRIES

Article 7

1. Any Member which, before the date of the adoption of the laws or regulations permitting the ratification of this Convention, had no laws or regulations restricting the night work of children and young persons in non-industrial occupations may, by a declaration accompanying its ratification, substitute an age limit lower than eighteen years, but in no case lower than sixteen years, for the age limit prescribed in Article 3.

2. Any Member which has made such a declaration may at any time cancel that declaration by a subsequent declaration.

3. Every Member for which a declaration made in virtue of paragraph 1 of this Article is in force shall indicate each year in its annual report upon the application of this Convention the extent to which any progress has been made with a view to the full application of the provisions of the Convention.

Article 8

1. The provisions of Part I of this Convention shall apply to India subject to the modifications set forth in the present Article:—

- (a) the said provisions shall apply to all territories in respect of which the Indian Legislature has jurisdiction to apply them;
- (b) the competent authority may exempt from the application of the Convention children and young persons employed in undertakings employing less than twenty persons;
- (c) Article 2 of the Convention shall apply to children under twelve years of age who are admissible for full-time or part-time employment and to children over twelve years of age who are subject to full-time compulsory school attendance;
- (d) Article 3 of the Convention shall apply to children over twelve years of age who are not subject to full-time compulsory school attendance and to young persons under fifteen years of age;
- (e) the exceptions permitted by paragraphs 2 and 3 of Article 4 shall apply to young persons of fourteen years of age and over;
- (f) Article 5 shall apply to children and young persons under fifteen years of age.

2. The provisions of paragraph 1 of this Article shall be subject to amendment by the following procedure:

- (a) the International Labour Conference may, at any session at which the matter is included in its agenda, adopt by a two-thirds majority draft amendments to paragraph 1 of this Article;
- (b) any such draft amendment shall, within the period of one year, or, in exceptional circumstances, of eighteen months, from the closing of the session of the Conference, be submitted in India to the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action;
- (c) India will, if it obtains the consent of the authority or authorities within whose competence the matter lies, communicate the formal ratification of the amendment to the Director-General of the International Labour Office for registration;
- (d) any such draft amendment shall take effect as an amendment to this Convention on ratification by India.

PART III. FINAL ARTICLES

Article 9

Nothing in this Convention shall affect any law, award, custom or agreement between employers and workers which ensures more favourable conditions than those provided by this Convention.

Article 10

The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office for registration.

Article 11

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Director-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

Article 12

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Director-General of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

Article 13

1. The Director-General of the International Labour Office shall notify all Members of the International Labour Organization of the registration of all ratifications and denunciations communicated to him by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the second ratification communicated to him, the Director-General shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

Article 14

The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and acts of denunciation registered by him in accordance with the provisions of the preceding Articles.

Article 15

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the agenda of the Conference the question of its revision in whole or in part.

Article 16

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 12 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

Article 17

The English and French versions of the text of this Convention are equally authoritative.

Annex 17—Recommendation (No. 80) Concerning the Restriction of Night Work of Children and Young Persons in Non-Industrial Occupations

The General Conference of the International Labour Organization,
Having been convened at Montreal by the Governing Body of the International Labour Office and having met in its Twenty-ninth Session on 19 September 1946, and

Having decided upon the adoption of certain proposals with regard to the restriction of night work of children and young persons in non-industrial occupations, which is included in the third item on the agenda of the Session, and

Having adopted a Convention on this subject and having decided to supplement this Convention by a Recommendation,
adopts this ninth day of October of the year one thousand nine hundred and forty-six the following Recommendation, which may be cited as the Night Work of Young Persons (Non-Industrial Occupations) Recommendation, 1946:

Whereas the Night Work of Young Persons (Non-Industrial Occupations) Convention, 1946, lays down the basis for legislative protection against the dangers of night work in non-industrial occupations in which large numbers of young workers are engaged;

Whereas although, on account of the great diversity of employments to which its provisions apply and on account of the different traditions and circumstances peculiar to each country, the Convention leaves it to national laws and regulations to adapt for each given country the implementation of the standards laid down therein, it is nevertheless desirable to ensure as uniform application as possible of the Convention; and

Whereas it is desirable that account should be taken of certain methods which have been found to give satisfactory results and which may accordingly be a guide to the Members of the Organization;

The Conference recommends that each Member should apply the following provisions as rapidly as national conditions allow and report to the International Labour Office as requested by the Governing Body concerning the measures taken to give effect thereto:

I. SCOPE OF THE REGULATIONS

1. The provisions of the Night Work of Young Persons (Non-Industrial Occupations) Convention, 1946, should be applied to all occupations which are carried on in or in connection with the following undertakings or services, whether public or private:

- (a) commercial establishments, including delivery services;
- (b) postal and telecommunication services, including delivery services;
- (c) establishments and administrative services in which the persons employed are mainly engaged in clerical work;
- (d) newspaper undertakings (editing, distribution, delivery services and the sale of newspapers in the streets or in places to which the public have access);
- (e) hotels, boarding-houses, restaurants, clubs, cafés and other refreshment houses;
- (f) establishments for the treatment and care of the sick, infirm or destitute and of orphans;
- (g) theatres and places of public entertainment;
- (h) itinerant trading, the hawking of objects of all kinds, and any other occupation or service carried on in the streets or in places to which the public have access;
- (i) all other jobs, occupations or services which are neither industrial nor agricultural nor maritime.

2. Without prejudice to the discretion which the Night Work of Young Persons (Non-Industrial Occupations) Convention, 1946, leaves to Members to exempt from its application domestic service carried on for wages or earnings in a private household and employment on work which is not deemed to be harmful, prejudicial or dangerous to children or young persons in family undertakings in which only parents and their children or wards are engaged, the attention of Members is drawn to the desirability of:

- (a) adopting appropriate legislative and administrative measures for restricting the night work of children and young persons under eighteen years of age who are engaged in domestic service;
- (b) extending to all undertakings carried on for profit, without consideration of the family relationship existing between the persons engaged in them, the application of the regulations concerning the restriction of night work in non-industrial occupations.

II. EMPLOYMENT IN PUBLIC ENTERTAINMENT

3. Where local authorities are empowered, in virtue of the provisions of Article 5 of the Night Work of Young Persons (Non-Industrial Occupations) Convention, 1946, to grant individual licences to children and young persons allowing them to appear at night as performers in public entertainments or to participate at night as performers in the making of cinematographic films, supervisory control over the issuing of such licences should be vested in a higher authority to which the persons concerned may appeal either against the refusal of the licence or against any of the conditions imposed therein.

4. Licences should be issued for limited periods and should be subject to all the conditions necessary in the circumstances of each case for the protection of the child or young person.

5. Licences should be granted for children under fourteen years of age only in exceptional cases in which they are justified by the need of vocational training or the talent of the child and should be subject to the following conditions:

- (a) such licences should be restricted as a rule to children who are attending institutions for dramatic or musical instruction;
- (b) employment at night should be limited as far as possible to three evenings a week or to an average of three evenings a week calculated over a longer period;
- (c) employment should cease by ten o'clock in the evening or a rest period of sixteen consecutive hours should be granted.

III. METHODS OF SUPERVISION

6. While respecting the principle laid down in paragraph 12 of the Labour Inspection Recommendation, 1923, according to which the inspectorate should include men and women having the same powers and duties and exercising the same authority, it is desirable to take into account the experience of certain countries which have found it particularly satisfactory to entrust to women inspectors the enforcement of laws and regulations for the protection of young workers.

7. In addition to regular inspection to ensure compliance with the laws and regulations for the protection of young workers, special attention should be given, in order to achieve effective application of the provisions of the Night Work of Young Persons (Non-Industrial Occupations) Convention, 1946, as regards non-industrial activities carried on in a great number of small and scattered undertakings, to the investigation of alleged violations of the law reported by the public, and more particularly immediate action should be taken upon complaints lodged by the parents of the child or young person.

8. When deciding on the form of document which the employer shall be required by law to keep for the purpose of furnishing the inspection services with the means of supervising the enforcement of the regulations restricting night work, it is desirable to take into consideration the advantages of the work permit or the workbook which, as they must be issued or officially stamped on each change of employment, make it easy to identify the young worker, provide proof of age and fix his conditions of work, including working hours.

9. (1) In order to facilitate the identification by official supervisory services of young itinerant workers protected by the laws or regulations concerning night work—

- (a) young itinerant workers working for wages should carry on their person a document and a badge which will permit their identification outside the undertaking, in addition to the documents kept by the employer;
- (b) young itinerant workers working on their own account or on account of their parents should carry on their person a document authorizing their employment and a badge which will permit their identification.

(2) Young itinerant workers under eighteen years of age should be provided with a work permit or an individual licence containing—

- (a) the name, age and address of the child or young person;
- (b) the photograph or signature of the child or young person or other means of identification and his permit or licence number;
- (c) if the child or young person is employed for wages, the name and address of the employer and his hours of work; and
- (d) if the child or young person is working on his own account or on account of his parents, the name and address of his parents and their authorization.

(3) It is desirable that the work permit or individual licence should be issued by a service under the labour department.

(4) A young itinerant worker should be obliged to wear the badge which bears his permit or licence number so that it will be readily visible.

(5) The full co-operation of local authorities, and particularly that of the preventive police, if such exists, of educational authorities and of child welfare authorities with inspection services, should be obtained in order to ensure supervision of the working hours of young itinerant workers and the enforcement of the laws and regulations relating to night work.

(6) The employer should be held legally responsible for violations of the laws or regulations, and in particular for any disproportion between the volume of work to be required and the time available for its performance during permitted working hours; the employer should be given the opportunity to vindicate his good faith if he exercised all due diligence to prevent the violation.

(7) Parents should, after previous warning, be held legally responsible for violations of the laws or regulations when the occupation is carried on on their account or with their authorization.

Annex 18—Statement by Mr. V. C. Phelan on the Report of the Committee on the Application of Conventions

I should like to support the report of the Committee, but there are one or two observations from my Government which I feel should go in the record of this discussion before the report is adopted.

Some of our countries, including Canada—but we are not at all unique in that respect—have a federal system of Government; and as I think the Conference is well aware, but more particularly as those representing federal States are aware, there are very practical difficulties arising out of the division of jurisdiction in relation to social and labour matters when it comes to the point of seeking to ratify International Labour Organization Conventions or carrying into effect the content of Recommendations.

I know that this topic has been discussed on innumerable occasions, both by the Committee to which the question of application of Conventions is referred, by various committees on the subject of the Constitution, and in various other phases of the work of the International Labour Organization. It does seem to us, however, that the question might profitably be explored further at a later date, and we have a couple of suggestions to offer.

I put these suggestions before the Committee which brought in this report, but, unfortunately from our point of view, the Committee did not see its way clear to pursue the items nor to embody any direct reference in regard to them into the report.

The first suggestion we would offer is that the device written into some of the Seattle Maritime Conventions for implementation of Conventions in whole or in part, and the subsequent ratification, might be based upon collective labour agreements—that principle might be explored in reference to other existing Conventions to see whether it would have pertinence; and that device also might be borne in mind in the drafting of future Conventions, future Recommendations, to see whether it would not be possible to broaden the base for ratification and make it more easily possible for federal States to ratify—particularly when they have actually carried into effect whatever may be the proposals contained in the Convention or the Recommendation.

The second device which we would like to see considered at some later date would provide for a fractional ratification. Where you have within the federal State several local or district jurisdictions—they may be called provinces, they may be called states—each of which holds some jurisdiction in the social or labour field, it now happens that many of these lesser—lesser in extent of territory at least—jurisdictions do implement the intent of Conventions but no formal notice of that appears in International Labour Organization documents.

I am well aware that the reports are received, but when the tally is made, and when the score board, so to speak, is drawn up indicating ratification of Conventions, credit is not given to federal States for this partial implementation. We would not suggest, in the case of a federal State where a very minor part of the secondary jurisdiction has implemented the Convention, that any credit should be accorded to the federal State as a whole in that behalf; but we do feel that where the population served by State or provincial Governments represents 65 or 70 per cent of the entire population of the country, and where those Governments, as to 65 or 70 per cent of the population, have put through the necessary legislation in accordance with an International Labour Organization Convention, we then think some formal partial or fractional credit should be given by way of partial ratification to the federal State involved.

We realize that there are a lot of implications involved in these suggestions, but we do hope that there will be opportunity to study them further at a subsequent Conference. After all, I think we will all agree that the formal ratifications are secondary to the prime purpose of International Labour Organization Conventions, which is to stimulate the securing of labour and social legislation. But nevertheless, while ratification may be the formality which follows the act of substance, namely, the implementation of the content of a Convention, in fairness to the States involved, it should be made possible that the record of ratifications should reflect as accurately as possible the degree to which the countries of the world—the International Labour Organization countries, at any rate—have carried through decisions of these Conferences.

We in Canada do not show an impressive list of actual ratifications. In our legislation, however—in our provincial legislation, for example—we have carried into effect over a period of years a great many measures which cover a very large area of the Conventions and of the Recommendations, with ratification of which we are not yet credited. We think that is a situation which should be accommodated, first in the interests of federal States, and secondly, because formal ratification, even a fractional formal ratification, gives an example to other States and should result in more widespread ratification, more widespread implementation of the various decisions of this body.
