483304

4.1.49

In this Issue . . . Relaxation of Wage Control . . Canadian Science at War . . Increase in Index of Wage Rates . . Suggestion Plans . . Stabilization in New Zealand.

Functions of the Department of Labour

The Department of Labour of Canada has functioned for forty-four years as the agency of the Federal Government charged with the administration of labour legislation. During the present war the Department's activities have been widely expanded. The functions of the principal branches of the Department and agencies associated with it are:—

Industrial Relations.—Under the direction of the Wartime Labour Relations Board (National), the Industrial Relations Branch is charged with the administration of the Wartime Labour Relations Regulations, P.C. 1003, which provide for the certification of employees' bargaining representation and the establishment of Boards of Conciliation for the settlement of disputes.

The Branch also administers the Conciliation and Labour Act, Chap. 110, R.S.C., 1927, which empowers the Minister of Labour to inquire into the causes and circumstances of a dispute and take measures considered expedient to effect a settlement. For the purpose of administering the Act, the Department maintains a staff of Industrial Relations Officers at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, and Sydney. The office of the Director of Industrial Relations is located in Ottawa.

The administration of the Fair Wages and Hours of Labour Act, 1935, and Order in Council P.C. 7679 governing the application of minimum rates of pay to all employees of Government contractors and subcontractors, are also administered by the Industrial Relations Branch.

Wartime Labour Relations Board (National).—The Board, together with Provincial Labour Relations Boards, administers the Wartime Labour Relations Regulations, P.C. 1003.

Statistics and Research.—The branch is charged with the collection and publication of statistics of employment, wages, hours, prices, industrial agreements, also of research in commerce and the professions; the industrial relations, labour conditions and organization in industry, and research work bearing on the publication of bulletins of

Labour Gazette.—The monthly LABOUR GAZETTE provides a review of the labour-industrial situation throughout the Dominion.

Canadian Vocational Training.—The training of young people and assistance to students; carried on under Dominion-Provincial co-operation include: training of apprentices; retraining of foremen and supervisors; training of members of the Armed Forces; training of unemployed persons from employment; training of

Dominion Government Annuities.—The administration of the Government Annuities Act, Chap. 7, R.S.C., 1927, whereby provision may be made for old age by the purchase of annuities by individuals, or associations on behalf of their members or by employers on behalf of their employees.

Unemployment Insurance Commission.—The Commission administers the Unemployment Insurance Act, 1940, which provides for a national unemployment insurance system and employment service. The employment service now functions as the field organization of National Selective Service.

National War Labour Board.—This tribunal with its regional divisions administers the Government's wartime wages policy as set forth in Order in Council P.C. 9384 as amended.

National Selective Service.—This body administers the Government's manpower program.

Wartime Bureau of Technical Personnel.—The bureau organizes the placement of scientific and technical engineering personnel for war industries and the government service.

Industrial Production Co-operation Board.—Encourages the formation of labour-management production committees in Canadian industry through the use of a field staff and informational material.

Library.—The maintenance of a library of publications on labour and economic subjects.

International Labour Organization (League of Nations).—The collection and transmission of information in connection with the work of the International Labour Conference and Office, including related correspondence with Federal and Provincial Government Departments and with organizations of employers and employees.

Notes of Current Interest

Administration of Combines Investigation Act

A Bill to amend the Combines Investigation Act was introduced in the House of Commons on June 5 by the Minister of Justice. The amendments proposed give legislative effect to a transfer of the administration of the Combines Investigation Act from the Minister of Labour to the Minister of Justice (L.G. Nov., 1945, p. 1606), and provide for modifying in some respects the procedure to be followed in dealing with alleged violations of the Act.

Proposed additions to the Act include provision for investigation of complaints alleging breaches of sections 498 and 498A of the Criminal Code, which concerns offences similar to those covered by the Combines Investigation Act, and remedial powers which would be available to the Exchequer Court of Canada to prevent uses of patents or trade marks to limit production unduly or to restrain or injure trade.

The Minister of Justice, referring in the House of Commons to the intention of the government to recommend to Parliament substantial implementing of the recommendations made in the report "Canada and International Cartels" (L.G., Nov., 1945, pp. 1614-1620), said the Bill had been designed for that purpose. When wartime price and supply controls exercised by the Wartime Prices and Trade Board and by Controllers under the Minister of Munitions and Supply are removed, he said, there would be opportunity for combinations which might be harmful to the public. For that reason the facilities of

the Combines Investigation Commission were being put into shape to deal with the situation.

Group insurance and medical benefits scheme discontinued

When in 1943, under authority of the National Selective Service Civilian Regulations, men were compulsorily transferred to high priority industry, one of the most intricate problems involved in their transfer was the continuation of group insurance and medical benefits.

When compulsory transfers were found necessary it was recognized that any loss of economic social security by the employee would not only be unfair, but it would have a very disturbing effect upon the man transferred and his dependents, and in such circumstances individual and community morale might suffer.

To avoid any such aftermath the officials of the Department of Labour, in co-operation with the Federal Department of Insurance and the Canadian Life Insurance Officers' Association, evolved a comprehensive scheme for the protection of the employee (L.G., 1945, p. 525).

The Regulations provided that any employee, directed by the Department of Labour to transfer, who was contributing to a group insurance or a medical benefit program, could elect to continue such a scheme under the new employer. A clearing house was set up in Montreal and the success of the Regulations is evidenced by the fact that in not one case of the 550 insured men transferred by the Department did an eligible employee

lose any of the benefits he had previously enjoyed. In most companies, the men responded one hundred per cent to the continued protection afforded and continued to belong to the same benefit plan even though they had been moved to different localities and different employers.

When the manpower problem eased those affected by the compulsory transfer order could elect to return to their previous employment or remain with the new employer. Although complete statistics are not available, officials of the Labour Department state that most of the men returned to their old jobs when given the opportunity to do so.

It is now felt that the wartime situation has re-adjusted to the point where the special arrangements on insurance and medical benefits are no longer needed. Accordingly a recent amendment to the National Selective Service Civilian Regulations revokes that part of the Regulations providing for carrying on of these schemes by transferred employees already covered by group insurance or medical benefits (P.C. 1878, May 10, 1946).

Earnings of wage-earners at 1941 Census

Average annual earnings of male wage-earners in all industries in Canada were \$993 during the 12 months ended June 2, 1941, and

those of female wage-earners \$490, according to a bulletin issued by the Dominion Bureau of Statistics giving final figures on the earnings of gainfully employed persons by industry groups and sex, as recorded at the 1941 Census. Male wage-earners totalled 2,117,357 and female wage-earners 699,441, the former being employed an average of 41.31 weeks during the 12 months and the latter an average of 40.67 weeks.

A wage-earner in the census is defined as a gainfully-occupied person who works for salary, wages, commission, or on a piece-rate basis of payment, whether he be a day labourer or the general manager of a bank. Deductions from pay for such purposes as pension schemes, taxes, war savings certificates and insurance are included in the earnings, but income from pensions, investments, workmen's compensation, relief and other sources of this kind are excluded.

Among industry groups, the highest average earnings for males were recorded in finance and insurance at \$1,657 a year. The figure for women in this group was \$751. Lowest annual earnings for males was in agriculture at \$298, in which the average for women was \$233. In connection with these figures, however, it is to be noted that the money value of room and board is not counted in the earnings recorded in the census. Indicative of the

seasonal nature of employment in agriculture, the average weeks worked was recorded at 35.42 and 28.97 for men and women, respectively.

Second highest annual earnings for men was \$1,588 in business, in which the average for women was \$758, followed by the electricity, gas and water group at \$1,436 for males and \$892 for female wage-earners, the highest figure recorded for the latter. In the public services, average earnings of males were \$1,352 and of females \$784, while for professional services the figures were \$1,249 and \$659.

Average earnings in manufacturing industries as a whole were \$1,075 and \$532 for male and female workers, respectively, with the highest average for males in non-ferrous metals at \$1,253 and the highest female in non-metallic minerals at \$638 a year.

Figures for other groups were: forestry, fishing and trapping, \$522 for males and \$441 for females; mining and quarrying, \$1,215 and \$833; construction, \$737 and \$690; transportation, including communications, \$1,204 and \$755; trade (retail and wholesale), \$1,085 and \$555.

Employment and industrial Statistics

The accompanying table gives the latest statistics available reflecting industrial activity in Canada, for certain months in the current year, as compared with the corresponding period in 1945.

The index of industrial employment, published by the Dominion Bureau of Statistics, rose from 168.9 in April to 169.2 in May. The cost-of-living index advanced to 123.6, the highest level reached in many years. A decline of 8.5 points in the physical volume of business during the month was recorded, the index being 184.3 in May, 1946 as compared with 192.8 in the previous month.

Employment and earnings.—The trend of employment continued generally upward at the beginning of May, although the expansion was on a smaller scale than that indicated at April 1. The increase took place among male employees; a further slight falling-off was noted in the total number of women in recorded employment. In the latest survey of employment and payrolls the Dominion Bureau of Statistics tabulated reports from 15,867 establishments with a combined working force of 1,728,735 at May 1. This number exceeded by 3,262 the staffs reported by the same firms at the beginning of April. The gain registered was seasonal according to pre-war experience and was substantially below the usual increase at May 1 in the period since 1920. At May 1 since 1920 the movement has been upward except for the last three years when declines

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

† Week ended June 27, 1946.

¹ Base 1926=100. ² Daily averages. ³ Base June, 1941=100. ⁴ Base 1935-1939=100. ⁵ Adjusted, where necessary, for seasonal variation. ⁶ Notes in the hands of the public at the end of the month. ⁷ Figures for four weeks ended June 29, 1946, and corresponding previous periods.

were recorded. Based on the 1926 average as 100, the latest index was 169.2 as compared with 168.9 at April 1, and 175.5 at May 1, 1945.

A considerable expansion of employment in manufacturing was recorded for the second month in succession. The gain of 6,324 employees was seasonal and although not equal to the average increase at the beginning of May in the period since 1920, compared favourably with the recessions shown at May 1 in the last three years. The greatest improvement in the group at May 1 as compared with the previous month took place in iron and steel plants which reported an addition of 2,859 persons. Substantial gains were also indicated in animal food, lumber, pulp and paper, and electrical apparatus manufacturing. Smaller gains were reported in the remaining manufacturing sub-groups with the exception of rubber, textile, tobacco and chemical firms in which employment was at a lower level.

Among the non-manufacturing industries, only logging showed curtailment. A loss in coal mining was recorded but metallic and non-metallic mining showed greater activity. An expansion was indicated in communications at May 1 as compared with April 1. Improvements of a seasonal nature were noted in transportation, building and highway work, services and trade.

Although there was an increase in employment at May 1, the aggregate weekly salaries and wages of \$55,412,730 paid at this date were 1.1 per cent lower than at April 1. The decline was due to time lost during the Easter holidays. Average weekly wages in recorded employment were \$32.06 as compared with \$32.48 at April 1, and \$32.55 at May 1, 1945. In earlier years for which data are available, the May 1 averages were: 1944, \$32.26; 1943, \$30.59 and 1942, \$28.59.

Prices.—The Dominion Bureau of Statistics' cost-of-living index (base 1935-1939=100) advanced from 122.0 for May 1 to 123.6 for June 1, 1946. The major part of this increase was due to the food group which has risen more than 43.0 per cent since August, 1939.

The most important factor in the June advance in foods was the general increase of 2 cents per quart in the retail price of milk following removal of the consumer subsidy. The food index for June which rose 4.4 points also reflected higher quotations for fresh vegetables and fruits, eggs and meats. Moderate increases were recorded in three other group indexes: clothing moved from 123.7 to 124.3, home furnishings and services from 122.1 to 122.4, and miscellaneous items from 111.5 to 112.1. Rentals and fuel and light were unchanged at 112.6 and 107.2 respectively. The

increase in the cost-of-living index since August, 1939, was 22.6 per cent at June 1.

Index of the Physical Volume of Business.—The index of the physical volume of business declined from 192.8 in April to 184.3 in May, 1946. The index of industrial production receded 8.3 points to stand at 189.6. Slight improvements were noted in mineral production and electric power while declines were indicated in manufacturing and construction, in the latter from 426.3 to 302.6. The index of distribution, based upon railway traffic, internal and external trade, decreased to 173.4 in May from 182.3 in April. An advance was noted in carloadings but there were substantial declines in imports and exports.

Compared with the corresponding period of 1945, the majority of the major economic factors averaged higher in the first four months of 1946. Wholesale prices continued the trend upward. The index of the physical volume of business however was 15.6 per cent lower and a decline of 6.2 per cent was noted in the index of general employment. Gold receipts at the Mint rose 11 per cent while coal mining showed an increase of 7 per cent. Generally, employment in mining averaged higher.

The discontinuance of munitions production put manufacturing at a lower level in the early months of 1946. A recession occurred in the meat-packing and dairy industries but expansion was shown in flour of 11 per cent in the first quarter and in newsprint production of 29 per cent. The operations of the railroads were slightly lower in regard to tonnage carried and number of cars loaded. Very marked advance was recorded in the new business obtained by the construction industry; the gain in the value of contracts awarded was 147 per cent while building permits were three times as great as in the first four months of 1945. Employment in building construction was about 45 per cent higher.

After a long period of failing health, Tom Moore, one of the most noteworthy of Canadian Labour leaders, died at his home in Ottawa on July 6. A few years earlier he had suffered a stroke from which he never fully recovered. During that time he was practically in retirement.

Mr. Moore was born in England in 1878 and came to Canada in 1909. His first association with Canadian organized labour began shortly after his arrival in the Dominion, when he became a member of Local No. 713, United Brotherhood of Carpenters and Joiners of America, Niagara Falls.

Tom Moore,
noted leader
of Canadian
labour, dies
in Ottawa

From 1911 to 1918 he served as general organizer of the Brotherhood. In the latter year, he was elected President of the Trades and Labour Congress of Canada at its convention in Quebec City. He continued as President until 1935, when he was appointed Vice-chairman of the National Employment and Social Insurance Commission by the Dominion Government. In 1938, the Commission was disbanded and in 1940 he was again elected President of the Trades and Labour Congress, upon the retirement of the late P. M. Draper.

That Mr. Moore's ability and influence as a labour leader extended far beyond the Dominion was shown by his appointment in 1922 as one of the labour members on the Governing Body of the International Labour Office in connection with the League of Nations at Geneva. His service in that capacity brought him recognition as one of the "authentic voices" in organized labour throughout the world.

He represented Canadian organized labour at a number of other National and International assemblies, notably the Pacific Relations Conference at Kyoto, Japan in 1929, the British Commonwealth Labour Conference in London and the meeting of the International Federation of Trade Unions at Amsterdam, Holland.

Upon being informed of Mr. Moore's death Hon. Humphrey Mitchell, Minister of Labour paid him the following tribute:

"The passing of Mr. Tom Moore will, I am sure, be deeply regretted generally throughout Canada but particularly in the labour movement where he was such an outstanding figure for so many years.

"To me it means the loss of a close personal friend from whose fountain of knowledge of labour problems I often drew counsel and advice. No one has contributed more to the advancement of the cause of labour in Canada than the late Mr. Moore. Coming from the ranks of the workers himself he understood their problems. Over the years, he developed into a wise, sound reasoning but firm labour leader. Early in his' career he had won the respect and confidence of the workers and it was not long before he also had the respect of the employers. This happy situation enabled Mr. Moore to serve well those he represented and to contribute much to the general industrial progress of our country.

"His election as head of the Trades and Labour Congress of Canada and the succeeding terms of office which were unanimously given to him illustrate how warm a place he held in the hearts of his fellow trade unionists.

"Responsible Government positions also came his way through which by his talents and his intimate understanding of labour and social questions he was able to render valuable services to his country.

"Everyone who knew Mr. Moore was sorry when he became ill two years ago. Since then his health has been poor and he was forced into a period of inactivity which I know was unwelcome. He had been busy helping others all his life and he wished to continue to do so. He realized, however, it could not be.

"In trade union halls across Canada today there will be sincere mourning because Mr. Moore is dead."

Industrial Selection and Release Plan terminates Having fulfilled its purpose of speeding the release of members of the Armed Forces for essential work during the early stages of reconversion, the Industrial Selection and Release Plan was terminated at the end of May.

During the operation of the plan, a total of 42,870 applications were considered and 35,452 members of the Armed Forces were recommended for release. By the end of April, 30,714 individuals had actually been released. A certain percentage of those recommended for release decided to remain in service and others for various reasons could not be spared by the Services.

In announcing the termination of the plan, the Hon. Humphrey Mitchell, Minister of Labour, stated that demobilization had now reached a point where the plan could no longer be of service to the country. It had been designed to speed up the release of service personnel for key positions in industrial reorganization and to provide much needed essential workers for vital industries such as agriculture, lumbering and construction.

The plan was terminated by the revocation on May 31 of two Orders in Council under which the plan had operated for approximately the past year, and which had provided for an Industrial Selection and Release Board, an Industrial Selection and Release Committee, and the Government Services Selection and Release Committee. (L.G., 1945, pp. 810, 1077).

In making the announcement, the Minister commended the work of all those concerned with the plan which had completely fulfilled the purpose for which it had been designed. He recalled that the pressure of work during the first few months following the war had been tremendous, but that in spite of this no serious criticism of the operation of the plan had been made.

Wartime Labour Relations Board statistics

The Wartime Labour Relations Board (National) received 35 applications for certification during the period from January 1 to June 15, 1946. It decided on 42 applications in total: 31 certifications for collective bargaining units were granted, one was referred to Provincial Board, six were rejected and four were withdrawn. The Board ordered five representation votes.

The Board, since it became effective on March 20, 1944, has received 357 applications of which 335 have been decided and 22 remain unresolved as of June 15, 1946. The dispositions were as follows:

Certification was granted in 220 cases; applications were referred to Provincial Boards in 25; 43 applications were rejected and 47 were withdrawn. A total of 64 representation votes was ordered.

The Board dealt with a total of 90 applications for leave to appeal and appeals, since its inception, of which 23 were granted, 55 were denied and 9 were withdrawn. At the close of the period three cases were outstanding.

Statistics pertaining to the activities of the Provincial Wartime Labour Relations Boards from January 1 to June 15, 1946, were as follows: 546 applications for certification were received, of which 378 were granted, 50 rejected, 49 withdrawn and 181 were pending at the close of the period.

British Columbia and Ontario recorded the largest number of applications with 295 and 128 respectively.

Labour Dept. officials honoured by His Majesty the King

On July 1, several hundred Canadian public servants and private citizens were awarded honours and decorations by His Majesty the King, for meritorious and distinguished service during the war.

Among these, officials of the Federal Department of Labour were awarded honours as follows:—

C.M.G.

(Companion of the Most Distinguished Order of St. Michael and St. George)

Arthur James MacNamara, LL.D.; Deputy Minister and Director of National Selective Service.

C.B.E.

(Companion of the Order of the British Empire, Civil Division)

Murdock Mackay MacLean; Director of Industrial Relations.

O.B.E.

(Officer of the Order of the British Empire, Civil Division)

Robert Fleming Thompson, M.C.; Director of Vocational Training.

Paul Goulet; Assistant to Deputy Minister. (Appointed official representative of the Department to the Governing Body of the I.L.O., April, 1946.)

Mrs. Rex Eaton; Associate Director, National Selective Service.

In addition, the following Regional Directors, National Selective Service were awarded the M.B.E. (Member of the Order of the British Empire, Civil Division).

George William Ritchie; Ontario Region. (Appointed a member of the Unemployment Insurance Commission, May, 1946.)

Hector Dupuis; Quebec Region.

Hon. Michael Dwyer; Maritimes Region.

Herbert Phillip Crabb; Prairie Region.

Frederick Smelts; British Columbia Region.

Among those who were awarded honours in the King's List were leaders of organized labour in Canada. These, with their titles included:—

C.B.E.—Commander of the Order of the British Empire:

Percy Robert Bengough, president, Trades and Labour Congress of Canada.

Aaron Roland Mosher, president, Canadian Congress of Labour.

Alfred Charpentier, president, Canadian and Catholic Confederation of Labour.

James Ward, chairman, General Conference Committee of Railway Brotherhoods.

Howard B. Chase.

O.B.E.—Officer of the Civil Division of the Most Excellent Order of the British Empire:

Joseph Arthur D'Aoust, vice-president, Trades and Labour Congress of Canada.

Gerard Picard, secretary, Canadian and Catholic Confederation of Labour.

John W. Bruce, general organizer, United Association of Plumbers, Steamfitters of the United States and Canada.

Ernest Ingles, vice-president, International Brotherhood of Electrical Workers.

Arthur J. Kelly, legislative representative, Brotherhood of Railroad Trainmen.

Fred Molineux, former representative of Brotherhood of Painters, Decorators and Paperhangers of America.

M.B.E.—Member of the Order of the British Empire:

James A. Whitebone, vice-president, Trades and Labour Congress of Canada.

Birt Showler, vice-president, Trades and Labour Congress of Canada.

Carl E. Berg, vice-president, Trades and Labour Congress of Canada.

Patrick Conroy, secretary, Canadian Congress of Labour.

Arthur J. Crawford, vice-president, International Association of Sheet Metal Workers.

Joseph Corbett.

Alfred Farmillo, secretary, Civil Service Association of Alberta.

Gustave Francq, secretary, Quebec Provincial Federation of Labour.

Arthur Martel, ex-board member, United Brotherhood of Carpenters and Joiners of America.

George A. Smith, United Brotherhood of Carpenters and Joiners of America.

Frank H. Gillespie, general chairman, Alberta Region, Canadian Brotherhood of Railway Employees.

Robert Livett, president, District 18, United Mine Workers of America.

Elroy Robson, vice-president, Canadian Brotherhood of Railway Employees.

Retirement of Mr. J. Lacelle severs historic link with Dept. of Labour

After 40 years and 9 months service in the Department of Labour, Mr. Joseph H. Lacelle was honoured upon the occasion of his retirement by the entire headquarters staff in a formal presentation on June 26.

The Minister of Labour, Hon. Humphrey Mitchell, who presided, and Dr. Arthur MacNamara, C.M.G., Deputy Minister, reviewed Mr. Lacelle's long and valued association with the Department, and his career of loyalty and service were commended before a staff audience which comprised several with whom Mr. Lacelle had been associated for a long period as well as many who were comparative "youngsters", in a tradition of service to which he had given such fidelity.

Mr. Lacelle entered the service of the Department on November 6, 1905. Sir Wilfrid Laurier, then Prime Minister, had established the Department of Labour only five years before. The present Prime Minister, Right Hon. W. L. Mackenzie King, was then Deputy Minister and editor of the *LABOUR GAZETTE*. The Minister of Labour and Postmaster General was Sir William Mulock. It was not until 1908 that a separate portfolio

for the Department was established with the young Deputy Minister, Mr. King, moving up to become its Minister.

The Department of Labour, when Mr. Lacelle joined it, had a total staff of twelve as follows: W. L. Mackenzie King, Deputy Minister and editor of the *LABOUR GAZETTE*; F. Giddens, secretary; R. H. Coates, associate editor; V. Dubruille and D. O'Donoghue, fair wage officers; F. J. Plant, circulation clerk; Harry Andrews, assistant; E. N. Williams, supplies clerk; W. W. Edgar, and Miss E. Sherman. Mr. Lacelle, coming in as messenger, made the twelfth member of the new Department.

Possessed of a keen mind and an excellent memory, Mr. Lacelle was the Department's one-man filing system and had an unerring instinct for filing and finding documents.

He has watched the Department grow from those early years when it was only an experiment in promoting labour relations to its present status covering a wide jurisdiction in the social, economic and industrial life of the country.

Farm wage rates advance	Wage rates paid for farm help in Canada averaged higher at May 15 this year than on the corresponding date of 1945, according to returns received by the Dominion Bureau of Statistics from farm correspondents in all provinces of the Dominion. This year's advance follows upon a similar rise last year over the same date of 1944.
--------------------------------	---

For all Canada the average rates were \$3.25 per day and \$71.36 per month with board as compared with \$3.04 and \$66.88 in 1944, and \$4.15 per day and \$96.27 per month without board as against \$3.89 and \$90.60. These rates, the Bureau states, are almost the same as those paid last year at August 15, which is usually the high point for the year, and a further increase by August is thus indicated if crop prospects are maintained at anywhere near normal.

The highest wage rates were reported from the three westernmost provinces. British Columbia led with rates of \$3.80 per day and \$79.60 per month with board and \$4.74 per day and \$104.05 without board. For Ontario the average rates reported were \$3.29 per day and \$64.80 with board, and \$4.19 per day and \$89.40 without board. For Quebec the rates per day were lower than in Ontario at \$3.10 with board and \$3.96 without board, but higher per month at \$68.94 and \$93.96, respectively. Prince Edward Island had the lowest rates at \$2.53 per day and \$55.76 per month with board, and \$3.28 and \$77.37 without board.

Average rates per month with board by provinces, with rates for corresponding date of 1945 in brackets, were: British Columbia, \$79.60 (\$70.15); Alberta, \$76.16 (\$74.76); Saskatchewan, \$77.24 (\$75.92); Manitoba, \$68.75 (\$70.01); Ontario, \$64.80 (\$59.86); Quebec, \$68.94 (\$59.68); New Brunswick, \$76.98 (\$75.32); Nova Scotia, \$70.39 (\$64.07); Prince Edward Island, \$55.76 (\$50.19).

**Dates of
annual labour
conventions
announced**

The dates of their annual conventions have been announced by the three major central labour bodies of Canada. The Canadian Congress of Labour

will hold its convention at the Royal York Hotel in Toronto, commencing on September 23, and continuing until its business is concluded. The Trades and Labour Congress will convene in Windsor on September 18, and the Canadian and Catholic Confederation of Labour in Quebec from September 16 to September 20.

**Western farm
workers
assist on
Ontario farms**

Approximately 2,500 western farm workers moved to Ontario during June and early July to help hard-pressed Ontario farmers with haying and early harvesting operations. Recruited in Alberta, Saskatchewan and Manitoba under the Dominion-Provincial Farm Labour Program, the men were given free transportation east.

Workers taking part in the movement will return to the west during the latter part of August when a reciprocal movement of eastern workers to the Prairies will take place as required.

**New
government
savings plan
to be made
available
to public**

A plan to provide facilities to the public for the investment of savings in government securities during peacetime was announced in the House of Commons on June 21, by the Rt. Hon. J. L. Ilsley, Minister of Finance.

A new bond, the Canada Savings Bond, is to be introduced in the fall. No new victory loan campaign will be held, and the sale of war savings certificates and stamps will be discontinued.

The new bond may be purchased at banks or other financial institutions, or under the payroll deduction plan now in effect. The

Minister stated that under the latter plan employees would be able to adjust the amounts of the deductions in accordance with their peacetime needs.

Canada Savings Bonds will be issued in denominations of \$50, \$100, \$500 and \$1,000, with annual interest coupons attached. The Minister said: "The exact rate of interest and the maturity date of these bonds cannot yet be announced, but I can say that the terms will be more favourable than those existing for comparable investments at the time of issue. For this reason, a limit will be placed on the amount of Canada savings bonds anyone can hold, and they will be sold only to individuals.

"The bonds will be registered in the name of the owner. This registration, in addition to providing control of purchases in the name of one holder up to the limit decided upon, will render service to the holder in protecting him against loss of his investment through theft or destruction of his bond.

"The Canada savings bond will be redeemable at 100 per cent plus interest at any branch of any chartered bank in Canada upon presentation of the bond by the registered owner. Identification of the person presenting it as the owner will, of course, be necessary."

The Minister added: "I should also point out to employees that their employer is acting solely in their interest in offering the opportunity for deductions from their pay. Although the government has attempted to lighten the work, the administration of payroll deduction plans still involves employers in expense and responsibility."

**Construction
of dwellings
during 1945**

During 1945, a total of 35,881 new buildings were constructed in Canada for dwelling purposes, according to a report issued by the Dominion Bureau of Statistics on 1945 housing statistics.

Construction of these buildings made possible the provision of 41,386 dwelling units; while the conversion or reconversion of existing buildings brought the total number of dwelling units created during the year to 47,356.

By type of building the figures show 32,298 new single dwelling units completed in 1945, 1,800 units in semi-detached or double houses, 235 in rows or terraces, 1,894 in duplexes, 1,044 in triplexes, 2,965 in apartments, 969 in buildings containing business premises and apartments, 181 unclassified, and 5,970 in buildings converted or reconverted. Of the total, 41,386 units were provided by the construction of 35,881 new buildings.

**Dressmaking
course for
women veterans**

To meet the insistent demand for seamstresses and to assist in the re-establishment of women discharged from the Armed Forces, the Canadian Vocational Training Branch of the Department of Labour has established several schools for dressmakers at centres across Canada. These schools have been, and are, performing useful service under the general supervision of Miss Marion Graham, Director of Women's Training, Canadian Vocational Training Branch. A great many women veterans have been taking advantage of the training in preparation for work in garment manufacturing plants, while others want to learn how to make their own clothing and possibly, to supplement their husband's incomes by work outside the home.

Every effort has been made to secure competent instructors and equipment for the C.V.T. schools. The courses usually extend over a period of six months and, although the syllabi differ somewhat in the several centres, the training given in all of them is of comparable value.

The only academic standing required is Entrance to High School, but graduation from high school is preferable. At the school in Toronto, for example, the course is divided into two sections.

Part I—Dressmaking: Here the student works from commercial patterns and receives complete instruction in the making of all types of dresses, lingerie, sportswear, dressmaker-suits and children's clothing. She is trained in the operation and care of machines, irons, automatic irons, velvet boards, pinkers, scissors, etc. Instruction is also given in the qualities, properties, and the preparation and care of materials, commercial patterns, types of figures and body measurements. She is also given practice in identifying materials, laundering, cleaning and spotting, shrinking and pressing, identifying and choosing patterns, materials to cover figure defects and adjusting patterns to measurement. Then too, the student is taught cutting and assembling, fitting, altering, finishing and pressing garments.

Part II—Designing: The success achieved by these courses prompted an extension of the project. Courses in dress designing have been set up at a number of the schools. Arrangements have been made with the Rehabilitation Boards to review the cases of individual applicants for this additional training and to make the necessary recommendations. It is expected this "screening process" will determine with a considerable degree of accuracy the eligibility of applicants. Under this advanced course students will learn pattern

making, the application of slopers, draping and sketching.

The greater number of Canadian dress manufacturers, especially those that make less expensive dresses employ pattern makers instead of designers. Consequently, the number of employment openings for designers is relatively small. Nevertheless, pattern makers or other dress making students who give evidence of having the potential qualifications are given the opportunity, through the new course, to advance into the higher category.

**Ontario
Institute of
Textiles**

The Province of Ontario will open an Institute of Textiles, to train personnel desirous of securing employment in the industry, Premier George Drew announced recently.

The school, which is to be located in Hamilton, will be completely financed by the Provincial Government; an advisory committee composed of representatives of the industry's employers and employees has promised to give the institute its active support.

The Board of Governors will consist of Mr. L. S. Beattie, Director of Vocational Education for Ontario; Mr. Hugh H. Lawson, Vice-President, York Knitting Mills, and the principal of the school, who has not yet been named.

Establishment of the Institute of Textiles, Mr. Drew said, is the most recent development in the Province's program of technical institutes. The Ontario Mining Institute is already in full operation and a site has been obtained between Port Arthur and Fort William for an institute to serve industries in that area.

**Holidays and
wages in B.C.
and Saskatchewan**

The Saskatchewan Annual Holidays Act (L.G. Dec. 1944, p. 1544) went into effect on July 1. Proclamation of the Act was made possible by an amendment to the Federal Wartime Wages Control Order (L.G., Feb., 1946, p. 142) returning to the provinces jurisdiction over minimum wage rates, hours of work and vacations with pay, effective June 30.

The Act provides two weeks' holidays with pay for all workers except those in farming, ranching, and market gardening or where only members of the employer's family are employed. Agriculture and horticulture may be brought under the Act if the Minister of Labour considers it administratively possible.

One section not proclaimed would require a worker, who during his holiday engages in paid employment, to return his holiday pay to his employer or authorize the employer to deduct it from his wages. The other section

would permit a worker to forego his holiday, but not his holiday pay, because of a shortage of labour, provided that a written agreement between him and his employer is filed with the Deputy Minister of Labour.

New minimum wage rates have been established from July 1 in British Columbia and from July 22 in Saskatchewan. In British Columbia these rates represent an increase of from 20 to 38 per cent in eight classes of undertakings and of 20 per cent in other classes of establishments including most factories and shops. In Saskatchewan the new rates are some 12 per cent higher. (See elsewhere in this issue, p. 995).

British scheme for following up disabled persons after placement in employment

Reference was made in the April issue of the *LABOUR GAZETTE* (p. 432) to the coming into effect in the United Kingdom of the Disabled Persons (Employment) Act, under the provisions of which British employers are required to hire enough disabled persons to equal two per cent of their total employment.

Up to April 15, 1946, a total of 482,221 disabled men and women had registered under the act, of whom 287,818 were ex-service personnel. Most of these persons were employed at the date under review, but 55,854 (including 2,328 women) were still without jobs. Of this number 46,404 were classified as "suitable for ordinary employment" while 9,450 required employment under special conditions.

A scheme for following up disabled persons after they have been placed in employment has been introduced at certain selected government employment offices. This scheme is announced as the first step in the introduction of a complete follow-up program.

The main principles underlying the scheme are, first, that a mere written inquiry is not enough—wherever possible there should be a personal inquiry; and, secondly, that these inquiries should not be forced on individuals who do not want to be interfered with. Every registered disabled person who is placed in employment is, at the time of placing, invited to keep in touch with the Disablement Rehabilitation Officer and to keep him informed of his progress, the object being to make sure that the individual is satisfactorily resettled, and to collect information which will throw light on the general problems of disablement.

Under the new scheme those who are to be followed up will, at the time of placing, be given a definite appointment about six weeks ahead to come and see the Disablement Rehabilitation Officer. If they fail to attend they will receive a reminder, or a personal inquiry or visit will be made, as appropriate. If the

inquiry shows that the person is satisfactorily resettled, no further action will be taken until the second follow-up which will take place six months after placing. If, however, the six weeks' inquiry shows that the disabled person is either unemployed or that his employment is unsatisfactory, immediate steps will be taken to secure satisfactory resettlement. This may involve finding a new job, possibly after consultation with the Disablement Advisory Committee; it may mean that further medical guidance is required; or the difficulty may be one which can be solved by consultation with the employer. Whatever steps seem necessary to solve the difficulty will be taken.

At the second follow-up, which takes place six months after the original placing, inquiries similar to those made at the end of the first six weeks will be made to ensure that resettlement is satisfactory.

The information obtained from this follow-up review of disabled persons should provide useful material for measuring the results of resettlement action, and should, in addition, throw light on the general problems of resettling the disabled in industry.

Operation of Reinstatement Act in United Kingdom

Under the provisions of the British Reinstatement in Civil Employment Act, which came into force on August 1, 1944 (L.G., 1944, pp. 264, 820), any person

who claimed that his rights under the Act were being denied him could apply to a Reinstatement Committee.

Up until December 31, 1945, only 505 cases had come up for decision in Great Britain, but in the first three months of 1946 the number of cases dealt with was 849. The increase followed the release of large numbers of men and women from the Forces.

Where a Reinstatement Committee is satisfied that default has been made by the former employer of an applicant in the discharge of his obligations under the Act, the Committee may make either an order for reinstatement or for compensation, or both, having regard to the circumstances of the case. When the employer is not in default no order is made.

A summary of the decisions given by Reinstatement Committees up to the end of March, 1946, is as follows:—

Orders requiring employment to be made available to applicant	357
Orders requiring payment of compensation	84
Orders for both reinstatement and compensation	322
	763
Cases where no order was made against the employer concerned	591
Total of cases decided	1354

The Act makes provision for appeal from the decisions of Reinstatement Committees to an Umpire. Up to the end of March the Umpire had given his decision in respect of 92 appeals, in 64 of which he confirmed the Committee's ruling, reversing it in the other 28 cases.

**Government
action in Britain
to raise
status of
domestic work**

A National Institute of Houseworkers to furnish a regular supply of qualified domestic workers is to be set up in Great Britain. The Government's decision

was announced on February 7, and the functions of the Institute outlined by the Minister of Labour and National Service:

The Institute will have the functions of securing training for domestic employment in households, to standards which it will lay down, either in technical institutions, Government training centres or its own training centres. Workers trained in this way and others who give satisfactory proof of their qualifications will be given certificates of efficiency by the Institute. Such workers will be placed, in co-operation with the employment exchanges, either with employers or with the Home Helps Service which local authorities are now developing, and it is hoped that this will open up a new field of labour supply for this valuable social service.

Such an Institute was proposed in the Report on Post-War Organization of Private Domestic Employment which was prepared by Miss Violet Markham and Miss Florence Hancock, who were requested by the Minister to review the schemes concerning domestic employment received by the Ministry and to make recommendations for future plans. (L.G. 1945, p. 942). The primary object of the Institute will be to raise the status of domestic employment and to attract more workers, thus assisting hospitals and other institutions where the need for domestic workers is most acute. In addition to supplying competent domestic workers, the Institute will fix minimum rates of wages and conditions of work.

The Institute is to be established in the first place on a limited basis. The report suggested, as a beginning, three branches in London and 10 or 12 branches in other centres, with at least one serving an agricultural area.

Although, as a general rule, domestic workers holding the Institute's certificate will be employed by those for whom they work, a staff of trained employees of the Institute will be organized in a few selected centres to work, on an hourly basis and at a charge calculated to cover the full cost, for housewives who cannot afford or do not wish to engage full-time domestic help. Employers will be expected to conform to the standards established

by the Institute. In co-operation with the Education Departments, the Institute will arrange for the instruction of housewives in up-to-date methods of organizing domestic work and will serve as a centre for research into the problems of supply and demand for domestic workers.

The New Zealand scheme for a home-aid service through the National Employment Service is noted on p.834 of the June issue of the *LABOUR GAZETTE*.

**Aid to British
employers in
establishing
personnel
departments**

The United Kingdom Ministry of Labour and National Service has undertaken a service to help employers to organize or improve personnel departments in their establishments.

A Personnel Management Section has been set up within the Ministry which will provide expert advice on the subject. The Section will also give special attention to factories which are too small to warrant the appointment of a personnel officer but where expert advice as to management of personnel is needed.

The advice given will cover such subjects as employment, comfort, joint consultation, health and safety, welfare services, education and training. The attention of firms will be drawn to special services available in other branches of the Ministry of Labour, such as training within industry, or in other Government Departments, such as the Production Efficiency Services of the Board of Trade.

**Report of
court of
inquiry into
bus workers'
wages, etc.**

A Report has been made by the Court of Inquiry set up by the Minister of Labour and National Service on February 20, under the Industrial Courts Act, 1919, with Sir John Forster

as chairman, to inquire into a difference between the two sides of the National Council for the omnibus industry on the trade union application for a national agreement. The National Council, constituted in 1940, consists of trade union representatives and, on the employers' side, of representatives of both municipal and company-owned omnibus undertakings. The original union claim was for a national agreement on conditions, but because of the delay in reaching a settlement and the emergence of other factors, the unions decided to press also for a national wages agreement. Heretofore, separate agreements have been made with the 63 undertakings represented on the National Council.

As a national agreement was secured between the unions, on the one hand, the muni-

cipal undertakings and the London Passenger Transport Board, on the other, while the inquiry was being held, the recommendations of the Report concern only company undertakings.

The Court rejected the companies' argument that their services differ essentially from municipal undertakings. In its view there may be no more difference between company-operated and municipally-operated undertakings than between one municipal undertaking and another.

The Court recommended that, for wages purposes, the omnibus companies should be divided into two groups based on existing drivers' rates, the companies paying more than 90s. 6d. a week being in Group 1 and those with a rate of 90s. 6d. or below should be in Group 2. It suggested that provision should be made for appeals against grouping.

Increases in wage-rates to the levels recently agreed upon in respect of London Passenger Transport and municipal workers of similar grades were recommended. To bring wages up to these schedules, it is proposed that drivers and conductors in both groups should receive an immediate increase of 7s. 6d. a week. Where this increase does not bring the worker to the maximum of his scale, the difference should be divided by four, one part to be granted immediately and the remainder by equal annual increments over three years.

The rates recommended for drivers in Group 1 are 96 to 100s. a week, in Group 2, from 94 to 98s.; for conductors in Group 1, from 92 to 96s., and in Group 2 from 90 to 94s. a week. For garage staff, the same method of granting increases should apply, the maximum rates, according to the particular grades, to be 91s., 94s. 6d., and 98s. 6d. For skilled maintenance engineers the Court suggests an increase to 105s. a week.

Present differentials between men and women should be maintained pending the findings of the Royal Commission on Equal Pay, and there should be no consolidation of basic wage rates and war bonuses.

As regards the union claim for a new agreement on conditions, the Court considered that the "Model Conditions" were, in effect, national conditions and that the existing arrangement by which "Model Conditions" may, on application, be substituted as a whole for an existing conditions agreement should continue.

In pointing out that the proposed increases would cost the companies about £3½ million a year, the Court "emphasized strongly that in the absence of changes of circumstances affecting the whole omnibus industry, the new wage rates should hold for a number of

years," and in its opinion fares need not be increased at present.

The Report was considered by the National Council for the industry and it was agreed to recommend its acceptance to the constituent parts on both sides of the Council. Omnibus workers employed by the companies have now accepted these recommendations.

Meeting of Anglo-American Trade Union Committee

A delegation of the British Trades Union Congress, headed by Sir Walter Citrine, late in May visited the United States to confer with CIO officials on problems facing the labour movements in both countries. The field of discussion covered by this recently formed Anglo-American Trade Union Committee (L.G., Nov., 1945, p. 1609) embraced such varied points as collective bargaining, minimum wages, the forty-hour week, health and safety standards, and problems of workers' security in the post-war world.

Sir Walter Citrine, and CIO President Phillip Murray in a joint statement issued at the conclusion of the formal meetings said that the Committee "has enjoyed a fruitful discussion of the major problems affecting the labour movements of Great Britain and the United States. As representatives of the British Trade Union Congress and the CIO, we have surveyed the problems concerning the development of industrial democracy in our two countries and exchanged past experiences in developing strong union organizations."

They stated that they felt the meeting had been extremely beneficial and believed "that continued forms of these international discussions can prove tremendously helpful in developing international friendship."

It is expected that the Committee will again convene in England later in the year.

Pres. Truman vetoes anti-strike legislation

A United States Bill, which would have made strikes illegal until termination of a thirty-day cooling-off period in industries affecting inter-state commerce, excluded supervisory personnel from membership in trade unions, made labour organizations liable to damage suits and injunctions for breach of collective bargaining contracts, and outlawed sympathetic strikes, was vetoed by President Truman on June 11. The veto was sustained in the House of Representatives by a five vote margin.

The President contended that the proposed legislation, the Case Bill, would not have provided an overall or permanent solution of present-day labour problems in the United

States and called it "a collection of separate unrelated measures." None of the major disputes "which have caused such public concern during the past months would have been affected in any way by this bill had it been law at the time", he said.

**Foremen's unions
contested in
United States** A suit to enjoin the unionization of supervisory employees has been filed in the Federal District court by a major segment of the soft coal industry. The suit, in effect, challenges the right of the United States Government to contract with the United Mine Workers for the unionization of mine foremen as provided for in the agreement which terminated the recent soft coal strike. (L.G., June, 1946, p 720.)

It further asks that the court preclude the National Labour Relations Board from implementing its policy of granting permission to foremen to join unions of rank and file employees. In a statement issued by the companies, it was contended that the Government, in granting such a clause to the union while in control of the mines and before the issue has been legally resolved, acted unfairly—"To award the union in this case the right to collectively bargain for the industry's mine supervisory employees before the full status of the issue has been established in the courts could not be taken as other than a position of bias and unfairness to the industry, whose interests the Government should protect."

In October 1945 a strike by mine foremen was called off by the United Mine Workers' President, Mr. John L. Lewis, saying he did so "in the public interest" and that the controversy would be settled at a "more appropriate time."

**Time study
men granted
bargaining rights** The United States Labour Relations Board has ruled that a unit of time study men is appropriate for collective bargaining, since their activities include no supervision and the confidential aspect of their work does not pertain to labour relations.

The ruling emanated from a case before the Board asking certification for a unit to cover draftsmen, estimators, engineers, planners and time study men. The company's contention in opposing the granting of bargaining rights was that these employees were confidential workers and too closely allied to management to be properly included in a bargaining unit.

The Board found that the employees in question were neither "managerial" nor "confidential." It ruled, however, that the time study men were "a distinct and functionally

homogeneous group" which should properly comprise a separate unit, while the other technical workers possessed sufficient similarity of background and interest to warrant their inclusion in a unit of their own.

In regard to the definitions, "managerial" and "confidential", the Board, in an earlier ruling affecting the Ford Motor Company, defined "managerial" as being applicable only to employees in a position to formulate, determine and effectuate management policies and "confidential" as applying to employees who assist management in confidential matters relating to labour relations only.

**Equal pay laws
in United States** Rhode Island is the seventh State of the United States to adopt an "equal pay" law for women. It went into effect on April 25. The Act prohibits discrimination in the rate of pay on the ground of sex except where union agreements provide otherwise. The Six States with equal pay laws, four of which were passed since 1942, are Michigan, Montana, Washington, Illinois, New York and Massachusetts. The Illinois and Michigan laws apply only to factories.

**Unemployment
benefit allowed
despite job
refusal in U.S.** The United States Social Security Board recently reported that the Attorney General of the State of Arkansas upheld the right of a union member to collect unemployment insurance after he had refused to accept a non-union job in order to protect his union membership. Under the Arkansas law a person claiming unemployment benefit is not disqualified for refusing employment in which he would be required to join or resign from a labour union.

A similar interpretation to the same provision has been rendered by the Supreme Court of Pennsylvania, while in Ohio the State Supreme Court ruled that a worker is not entitled to receive benefits if he refuses to accept a position that is prohibited by rules of labour unions.

**I.L.O. report
on world
employment
situation** A report of the International Labour Office submitted to the Employment Committee of the I.L.O. Governing Body at its recent meeting in Montreal (see page 882) deals with the present world employment situation.

The report indicates that during the year May 1945 to May 1946 there was generally speaking less unemployment than had been anticipated, though serious pockets of unemployment have appeared within almost every country and there is extensive unemployment

in a number of countries. So far, however, the dominant characteristic, especially in the more industrialized countries, is a general shortage of workers combined with specific surpluses of workers in particular industries, occupations or areas or among particular groups in the labour force.

Counterbalancing the demobilization of members of the armed forces and war workers, there has been a rapid flow of workers to reconstruction and peacetime activities. Starting from almost complete economic paralysis, and working against tremendous odds, the liberated countries of Europe have been able to re-employ almost the whole of their available working populations. Much of this employment, however, is on urgent reconstruction work, and a further redistribution of the labour force will have to take place within the next few years. In Great Britain, peacetime industries, starved of labour during the war, had, by the end of 1945, expanded their employment to 4,581,000, an increase of nearly 2,000,000 workers during the last six months of the year.

The chief exceptions to the general picture of relatively low unemployment are India, China, Italy and parts of the Middle East and of Southeastern Europe. Moreover, in the enemy countries unemployment was reported to be extensive by the end of 1945; in Japan, over 4,000,000 persons were said to be unemployed, and in the United States-occupied zone in Germany a fifth of the total labour force was reported to be out of work.

The unemployment which has arisen is of different kinds. A good deal of it is purely short-term, made up of people unemployed for a few weeks before finding suitable reconstruction or peacetime jobs. This unemployment swells the statistics but raises no serious problems beyond those of continuous improvements in counselling and placement work, to hold the interval between jobs to a minimum and to ensure that the new jobs are suitable so that unnecessary turnover is kept to a low level. A second type of unemployment is more stubborn and persistent. It arises out of serious discrepancies between the supply of and the demand for workers belonging to particular skill categories, industries or groups in the labour force or living in particular areas. This type of unemployment tends to become localized in these industries, areas or groups, pro-

ducing pockets of unemployment, each with its special problems. There is evidence in many countries, for example, that unemployment has struck with greatest force over the last year among those workers who are the least mobile, the least skilled, the least effectively protected by collective agreements, and the most liable to encounter social prejudices.

Proposed national health scheme in Australia

Australian press reports referred recently to a national health scheme, in which there will be no compulsion of doctors and patients, proposed by the Australian Government.

Under the scheme, free medical service will be available to every person in Australia without regard to economic status. The service will be new to Australia, which has no "panel" system of medical contributions, similar to that in England, nor a national health insurance plan.

The Government proposes to introduce the scheme by legislation. It will seek additional social service powers in the national referendum to be held conjointly with the elections in September.

Basis of the scheme will be the establishment throughout the Commonwealth of medical centres where free diagnosis and treatment will be given.

Other proposals cover the use of flying doctors and mobile medical units in remote areas, and the establishment of training schools for pathologists, bio-chemists, radiologists, technicians and other specialists.

It is reported that the scheme does not envisage the nationalization of the medical profession. No compulsion will be used either to induce doctors to undertake work or for patients to use the service.

Both doctors and patients will be free to make private arrangements outside the service. Doctors now in practice will be given the opportunity to join in the service on either a part-time or full-time salaried basis. Precautions will be taken to ensure that doctors do not make private profits from the service.

The Commonwealth does not propose to take over any hospital, but will seek full co-operation with State hospitals.

Relaxation of Wage Control

Amendment to Order Announced by Minister of Labour

AN amendment to the Wartime Wages Control Order announced by the Honourable Humphrey Mitchell, Minister of Labour, on June 24, has the effect of relaxing further the control of wages within the framework of the Government's anti-inflation program.

As a result of the amendment a War Labour Board may now authorize or direct an increase in wage rates if the Board finds the proposed increase "just and reasonable."

Since January, 1946, Boards had been empowered to increase wage rates under two conditions; first, if the rates were found to be

low in comparison with rates generally prevailing in the locality, or second, on such other basis as the Board considered reasonable in the circumstances, consistent with the maintenance of existing prices of goods and services (L.G., Feb., 1946, p. 140). Previously Boards had been able to increase rates only to the extent necessary to rectify a "gross injustice or gross inequality."

The text of the Minister's statement in the House of Commons follows, together with the text of the amending Order in Council, P.C. 2432, June 20.

Statement of the Minister of Labour

Mr. Speaker:

I wish to table herewith copy of Order in Council P.C. 2432, passed June 20, 1946, further amending the Wartime Wages Control Order, P.C. 9384.

In connection with this amendment I wish to make the following statement:

Canada's anti-inflation program, established in 1941, can, I think, be regarded as being something in the nature of an experiment.

It can now be said that many economists did not think it would succeed and would break down because it ran contrary to the economic forces.

However, for the most part it did succeed. In large measure that success was due to the unqualified acceptance of the program by the people of Canada.

While it was a difficult enough task to put into motion the machinery needed to implement the anti-inflation program, it is equally difficult to gear down that machinery and modify the program.

On previous occasions, it has been stated in this house that the Government's policy is to move out of the price control-wage stabilization field just as rapidly as it is considered expedient to do so.

The current problem is one of timing the steps to be taken in decontrol.

In respect of wage stabilization, steps have already been taken to modify the Wages Order—and a further step is about to be taken. It is concerning this latest modification that I wish to speak in particular.

The important change proposed concerns Section 20 of the Order, Wartime Wages Control Order 1943, P.C. 9384. That is the

Section which gives War Labour Boards the power to authorize or direct adjustments in wage rates.

The original clause (a) of Subsection 1 of the Section limited the Boards' powers to increase wage rates only to the extent necessary to rectify "a gross injustice or gross inequality."

In January of this year, that Section was changed so as to enable Boards to authorize or direct increases in any wage rates which were found to be low in comparison with the wage rates generally prevailing in the locality.

The amendment further empowered a War Labour Board to authorize an employer to increase wage rates *on such other basis*, and to such extent, as in the opinion of the Board is reasonable in the circumstances and consistent with the maintenance of existing prices of the goods and services which the employer sells.

While this amendment served its purpose during the period it has been in force, changing conditions during this transitional period have made it appear to us that the wage adjusting formula should be modified to permit War Labour Boards a wider discretion than they have had.

Under the present amendment, War Labour Boards may authorize or direct increases in wage rates if and to the extent that such Boards find the proposed increases are "just and reasonable."

The amendment cuts away from the overall wage fixing formula some of the previously existing restrictive conditions.

It places upon War Labour Boards a greater discretion—a discretion which, I am satisfied, will be fairly exercised by representatives of management and of the major branches of organized labour in Canada, who as members of those Boards, have had a vast amount of experience in administering this part of our anti-inflation program.

Much has been said of Canada's contribution to the war effort. In my opinion this is not the time to review that contribution.

This is the time to direct our thoughts to the present and the immediate future. The progress of Canada will depend largely on the process of reconverting the country from a war-time to a peace-time basis.

The next two or three years will be critical ones for the future economic development of Canada. If we fail to pursue sound economic policies during that time, damage will be done which will jeopardize our progress for years to come.

I can tell you that the task of maintaining a reasonable degree of stability in our economic affairs at this time is much more complicated and calls for a much greater degree of judgment than was the case when we were fighting for our very existence.

Thanks to our policy of economic stabilization, which ultimately met with the active support of industry and of the great majority of organizations in the labour movement, we came through the war well. That has been true to date in this transition period.

It is the responsibility of all Canadians, whether they be in the managerial group or the labour groups to see to it that we do not have a repetition of the inflation that struck this country in the early twenties.

We must not lose sight of the fact that the forces which brought about the chaotic conditions of boom and slump after the last war are present in our economy now.

An abandonment of control now would let loose forces which could wreck the economic life of the country at a time when an orderly

transition to peace-time conditions is a primary necessity, and the country would be worse off than if stabilization controls had never been imposed.

I have been in the labour movement long enough to know that the real target of labour is to raise the real standard of living. I know that labour has, during these last six years, made greater gains in this direction than they have in any other period in the history of the movement.

The ideal should be to consolidate those gains. What I am afraid of—and I say this with all sincerity—is that any untoward advance in the present wage structure is going to do one of two things—either it will force prices up whereupon the increased rates will count for nought—or it could force a buyers strike to curtail production and that will mean unemployment.

This Government is in favour of good and fair wages—let no one think that any member of the Government holds a contrary view. Good and fair wages are just that as long as they can maintain a real standard of living.

What all should strive for is production. A normal flow of goods and services will indeed form the real income of the community. It is the responsibility of management and labour, acting as a team, to work for the maximum production of goods and services, and anything which stands in the way of this is contrary to the best interests of all—particularly the wage earner.

What I have said has been for a very definite purpose. I don't want anyone to think that because the Wartime Wages Control Order has been amended, that the lid is off.

The revision of the Order imposes upon all a very special duty. That duty being to work together through this transition period to the end that we can come out of it with an economy second to none. That should surely be a duty which all good Canadians should be glad to assume.

Text of Order in Council, P.C. 2432 Amending the Wartime Wages Control Order, 1943

His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and under the authority of The National Emergency Transitional Powers Act, 1945, is pleased to amend the Wartime Wages Control Order, (P.C. 9384, 9 December 1943) and it is hereby further amended as follows:

1. Subsection (1) and (2) of Section 2 are rescinded and the following substituted therefor:—

(1) There shall be a National War Labour Board (hereinafter referred to as the National Board) consisting of three members one of whom shall be chairman.

(2) The Governor in Council may appoint one or more alternate chairmen of the National Board any one of whom may act in the absence of the Chairman and while so acting, an alternate chairman shall be deemed to be a member of the Board and shall exercise the powers of the Chairman.

2. Paragraph (c) of Section 14 is rescinded and the following substituted therefor:—

(c) to make provision for orderly adjustment of wage rates on such basis as and to the extent that the National Board finds just and reasonable in the circumstances, insofar as this is possible and consistent

with the paramount principles of the maintenance of stability in prices.

3. Clause (a) of subsection (1) of Section 20 is rescinded and the following substituted therefor:

(a) authorize or direct an employer to increase a single rate or the rates of a range established by him under this Order, or by or pursuant to a direction of the Na-

tional Board, for an occupational classification of his employees if, and to the extent that, the National Board finds that such increased rate or range is just and reasonable, and is consistent with, and will give effect to, the purposes of this Order, having regard to all the circumstances deemed by it, in its discretion, to be material;

4. Subsection (3) of Section 20 is rescinded.

Statement on Wage Increases

SPEAKING in the House of Commons on July 10 with reference to the appointment of controllers for the steel industry (see p. 915) the Minister of Labour, Hon. Humphrey Mitchell, made public the text of a telegram sent to Mr. Pat Conroy, Chairman of the Wage Policy Committee of the Canadian Congress of Labour.

The telegram, which deals with the wage-price situation, is as follows:—

Ottawa, Ont., July 9, 1946.

Mr. PAT CONROY,
% Royal York Hotel,
Toronto, Ont.

In view of the meeting of your Wage Policy Committee I feel impelled with the friendliest of feelings to place before you and your colleagues the following views.

According to the latest reliable information obtainable the abandonment of price control in the United States has resulted in a 12.7 per cent increase in certain living costs and an average estimated at 10 per cent. I do not need to emphasize to you the gravity of a similar inflation spiral developing in Canada which might quite easily occur with unrestricted wage increases leading to the abandonment of price control.

Those in the best position to judge state most emphatically that wage increases beyond an amount considered just and reasonable cannot be made effective if price control is to be retained.

Again it is the considered opinion of those best able impartially to assess the present economic situation in Canada that increases in wages beyond ten cents per hour and in some instances less will force a break in the price ceiling.

Amendments recently made to the wage control order have cleared the way for favourable consideration of application to War Labour Boards for just and reasonable increases in wages and it is my hope that all labour leaders should see the wisdom of using the machinery provided by the wage control order as revised rather than resort to threats of strikes and strike action.

On numerous occasions I have commended labour for its co-operation in making the policy of price control effective and I should regret very greatly at this time any action by organized labour which would place such a strain upon the price ceiling that it would crack and bring about an inflationary situation which would be detrimental to the interests of all workers and many others whose incomes never rise as rapidly as prices once inflation sets in.

Referring to our recent conversation in connection with B.C. wage settlements you may have noticed I stated recently in the House of Commons that the B.C. interior lumber, logging and box manufacturing industries settled with the I.W.A. for a ten-cent per hour increase.

HUMPHREY MITCHELL,

Minister of Labour.

Retention of Canadian Controls

FOLLOWING the expiry of price control legislation in the United States (see below) the Prime Minister, Rt. Hon. W. L. Mackenzie King, made the following statement in the House of Commons regarding the Government's intention to continue price control in Canada:—

"Mr. Speaker, I might give the House a little information with respect to the matters of price control in the United States and the attitude of this Government towards the possible consequences thereof.

"On June 30, the emergency legislation in the United States which authorized price, rent and rationing controls expired. As I understand it, the consequence is that there is at the present time under federal law no price control, no rent control and, with the possible

exception of sugar, no rationing in the United States. There are, of course, certain states and municipalities which have taken emergency measures or maintained existing regulations which are not affected by the expiration of the federal law.

"This situation has not, unnaturally, raised certain questions in the minds of many Canadians. The Government feels that the first opportunity should be taken to assure parliament and the country that there is no intention of abandoning similar controls in Canada.

"Developments affecting prices in other countries, particularly the United States, are, of course, not without their effect upon Canada. Our policies have, in the past, and will, in the future, necessarily continue to have such developments in mind.

"Price control, rent control and the control of supplies existed in Canada before they were adopted in the United States. Canadian regulations, while similar in objective to those in the United States, have often differed quite widely both as to their form and their nature. In other words, we in Canada have followed our own course, which we believe is

well adapted to Canadian conditions and to the Canadian economy. We shall continue to follow policies which we believe to be in the general interest, making, from time to time, such modifications as seem to be required in the light of internal and external conditions as they develop."

Removal of Price Control in United States

ALL federal price and rent control in the United States ended officially at midnight June 30 when the legislation under which the Office of Price Administration had functioned during the war years expired.

Late in June the United States Congress adopted a Bill to continue the OPA in existence for another year, but with greatly weakened powers. This Bill was vetoed by President Truman who characterized the legislation as presenting "a choice between inflation with a statute and inflation without one" and claimed that it continued Government responsibility to stabilize the economy but at the same time destroyed its ability to do so.

The vetoed measure would have retained price ceilings on meat, poultry, dairy products, tobacco and other items and on rent. However it contained other provisions which would have resulted in price increases. It permitted manufacturers to raise their October, 1941, prices by the amount that their costs had increased since that time; and allowed wholesalers and retailers to pass on these added costs to the consumer. It provided for a three-man "decontrol board" with power to overrule refusals by price control administrators to grant price increases. It also reduced food subsidies.

In vetoing the measure, the President asked Congress to pass immediately a resolution continuing the old OPA Act in effect until there was time to write a new one.

Particularly objecting to the amendment permitting manufacturers to add increased costs to their prices, the President cited examples of the price rises that this would cause. In the case of low-priced cars, he said, there would be an immediate rise of \$225 to \$250; and since the price of materials used in the manufacture of cars would also increase under the amendment, and these increases could be counted by the manufacturers as increased costs, further rises would follow. Wage increases could also be used as the basis for increases in the price of finished articles, and thus there would begin "an inevitable spiral of uncontrolled inflation—a race between rising wages and rising prices.

"Far-sighted leaders of both labour and management know", the President continued,

"that nothing can be gained—and everything lost—by simply letting prices and wages chase each other."

In a radio address to the nation, explaining the reasons for his veto, he said that although the amendment was defended as a stimulant to production it would in fact have the reverse effect since it would increase the tendency to withhold goods from the market in anticipation of further price increases. "Nobody wants to sell his goods this week if he can get a better price for them next week. This is no mere theory. You have seen it working day after day for the last month or so, as people began to believe that price control might soon come to an end.

"People who had cattle and hogs to sell for food have decided to hold them for higher prices. People who had clothing for sale have decided to do the same thing. So have people with innumerable other commodities which we all need so badly now.

"Incidentally, I have asked the Attorney General to make an investigation of some of the factors involved in our present shortages to determine whether anyone is criminally responsible for them and to place the responsibility where it belongs.

"These instances of withholding goods from the consumer would be multiplied thousands of times under the Taft amendment; production and deliveries would be slowed down waiting for price increases. This would create bottlenecks of essential materials and essential parts which would bring production lines to a halt. By the time they started up again there would be new applications for price increases and additional waiting for greater profits.

"Labour would be penalized by the loss of employment. Consumers would be penalized by lack of goods and ever-rising prices. Farmers would be penalized by higher prices for what they had to buy and reduced markets for what they had to sell."

At the conclusion of his talk he told the American people that they could themselves fashion the post-war period into the greatest in opportunity and prosperity in the country's history, but warned that "if partisanship and greed are allowed to triumph over efforts

to maintain economic stability this great opportunity will be sacrificed". He emphasized that the administration's attempt to secure adequate control legislation "was not over".

Mr. Chester Bowles, Director of Economic Stabilization and former head of the OPA tendered the President his resignation in a letter in which he described the Bill as an attempt "to legalize inflation", and predicted that its enactment would render effective control of prices and rent "flatly impossible". Another warning of the possible consequences of the measure was voiced by John D. Small, Civilian Production Administrator, who claimed that its passage would presage a recurrent wave of wage demands and strikes.

The veto elicited prompt passing of rent control legislation by several States to present rent increases. In New York State

the federal law was promulgated as the law of the State and was made applicable to all residential dwellings except new buildings or those under construction at the time it becomes effective.

As the *LABOUR GAZETTE* went to press, Congress was considering a new price control bill. In the two weeks since the end of OPA, prices of food had risen 10 to 20 per cent, according to the *New York Times*, which cited local advances in the price of milk from 16 to 19 cents a quart, veal cutlets from 50 to 65 cents a pound, porterhouse steak from 56 to 75 cents a pound, and butter from 68 to 80 cents a pound. On the West Coast, porterhouse steak, which had had a ceiling of 56 cents, was reported to have sold for as high as \$1.25. Increases in commodities other than food were reported to be taking place at a slower rate.

Economic Stabilization in New Zealand

Report of Labour Leader on Controls in Post-War Period

A REPORT to the New Zealand Federation of Labour by its vice-president, Mr. F. P. Walsh, which has attracted attention in this country recently, deals with the subject, "Economic Stabilization in the Post-War Period".* In it Mr. Walsh, who is also president of the Wellington Trades and Labour Congress, discusses the danger of inflation in the post-war period, and recommends appropriate action on the part of the trade union movement in his country.

The report recalls that after the last war prices rose rapidly, with a serious effect on all who were dependent on wages and salaries and a weakening of the country's economic structure which resulted in a collapse under the impact of the depression of the 1930's.

The report praises the success of the stabilization program undertaken in New Zealand during the second world war, but states that the danger of inflation still persists. The reasons for this situation are stated to be: (1) a rise to record levels of the volume of money and small savings; (2) a shortage of goods and raw materials; (3) a shortage of skilled labour; (4) problems relating to the proper use of price control and subsidy policies in bringing about the transition to a peacetime economy; (5) problems of selling the products of primary industry overseas, and thus obtaining the money to pay for imports. (On this last

point the report comments: "This is perhaps the most important of all the factors in the present situation, since New Zealand is dependent more than any other country in the world, on overseas trade for its prosperity.")

"The labour movement," the report continues, "is interested in improving its conditions and in raising the real standard of living. Strange as it may seem to some people, there is no conflict between these ideals and the benefit of the whole community. If the movement succeeds in improving the real standard of living, it benefits not only itself but the whole country."

Purchasing Power and Production

During the war, the report states, the increase in the volume of money was proportionately greater than the increase in the volume of goods available for consumption. The report rejects monetary deflation as a cure for this state of unbalance, declaring: "It is clear that the gap between money and goods should be adjusted from the opposite end—by more production.

"This is where workers can do a real job," the report continues. "Provided we can get raw materials, it is within our own power to produce more goods and bridge the gap between money and goods. If we do not close this gap by our own productive efforts, it will be closed for us. It will be closed perhaps by an inflation of prices, perhaps by a deflation of money and incomes. Both of these things are poison in the economic

* The Minister of Labour, Hon. Humphrey Mitchell, recently tabled copies of the report in the House of Commons, on the request of the member for Yale, Hon. Grote Stirling.

structure. No effort should be spared to avoid them and to adopt the only sensible way out—namely increased production.

“And nothing should be allowed to interrupt the productive system. We cannot afford to have stoppages of production. Machinery exists in the Federation of Labour and in the Government for the settlement of industrial disputes. This machinery is adequate and is there to be used. The history of disputes shows that it must be used at some stage and therefore the most effective way for our movement to use it is before the stoppage occurs. Every time a stoppage occurs, not only are wages lost, but goods are lost which are essential to the attainment of a higher standard of living—our primary objective.

“The battle for minimum wages and living standards for workers has been fought and won. We are now past that stage. It is now a question of the distribution of the flow of goods and services which form the real income of the community. Unless the goods and services are being produced, it is not possible to distribute them. It is labour’s responsibility to work for the maximum production of goods and services, and anything which stands in the way of this is contrary to the best interests of the movement.”

The report stresses the need of channeling available supplies of materials and manpower where they will be most useful. It states that while certain industries lend themselves to development within New Zealand, other industries are not suitable, and should not be allowed to be built up behind a wall of tariff protection.

“Consumer industries which should be expanding now are textiles, clothing, footwear, household furnishings and requisites. One of the worst faults in the present situation is that too much attention is being paid to the production of non-essential items selling at high prices, and the necessary manpower and materials are being drawn away from the production of items more essential to everyday needs. The result is that we are faced with needless shortages of essential items, because higher profits can be made in luxury items. The clothing industry is a case in point. . . .”

Manpower and Wages

The shortage of manpower in the large cities, the report asserts, is accentuated by the housing shortage. Housing difficulties “can be overcome by the efforts of the labour movement with the assistance of the Government in regard to shortages of essential materials. We have not had control over incidental shortages such as nails, spouting, and fittings. But the shortage of timber is one which the labour movement has power

to adjust. We should never rest until we have provided the people of this country with housing, even though this means working extended hours, provided the men doing the extended work are compensated for it.

“The position regarding labour supply and labour rewards has now reached the stage of being one of our most serious post-war problems. The time has come for some very serious thought regarding wage increases and the cost structure of the New Zealand economic system. Wages have changed very fundamentally since the stabilization regulations first came into operation in 1942. Sectional wage increases led up to a general wage increase, as a result of the Arbitration Court pronouncement of 1945. The passing of legislation for a universal 40-hour week in factories has meant further increases in costs. I wish to stress that there was real justification for these increases. The fixation of all wages at their 1942 levels, irrespective of any other factors in the economy, would have been both unjust and impracticable. But let us be quite clear as to the implications of what is happening.

“The freezing industry, which incidentally is the largest industry in the country, is a good example of how wage increases are being met. Every wage increase in this industry since mid-1944 has been met by subsidy. The original stabilization subsidy paid to the freezing industry was £400,000. As a result of two wage increases in 1945, extra costs amounting to another £400,000 were incurred. The total subsidy became £800,000. Now, another £350,000 must be found, arising from the recent 40-hour week legislation, and it must be found from the War Expenses Account, since in terms of the agreement between the Government and the farmers this extra sum cannot be charged to the farm products stabilization accounts. By agreement with the Government, direct wage increases incurred after March 1, 1945, are not chargeable to farm stabilization accounts. The taxpayer must pay. The sum cannot be recovered from our export receipts. Other industries which will have to be subsidized more as a result of this legislation are: Bacon and ham curing, dairy factories, abattoirs, jam-making, gas works, tanneries and chemical manures.

“When the Government originally brought in a policy dealing with the 40-hour week, it was realized that the policy should be applied to all. But everyone cannot have the 40-hour week on a Monday to Friday basis. It must be staggered over the whole week, otherwise the 40-hour week will kill itself. For example, imagine what would happen if we closed down transport, gas and electricity over the week-end. It would cause consider-

able inconvenience and would destroy the capacity for recreation. But the extension of the 40-hour week to other workers who have a normal working week in excess of five days and 40 hours, and who are not covered by the Factories Act, will under the present measures of price control result in a large part of the extra cost being met by subsidies. As an example of the increased costs involved in this process, it is estimated that it would cost about £200,000 a year to put a 40-hour week into operation on shipping vessels on New Zealand articles. Then freight rates must either go up, or still more subsidies be paid.

"All these upward wage adjustments of which the 40-hour week is only one example have to be met by price increases or by subsidies, and an increasing proportion is being found by subsidies. Wages form an essential part of costs in all industries. Under a capitalist economy industry will only run while it shows a profit, or while it has prospects of making a profit. Therefore, industries cannot absorb wage increases indefinitely. They have either to be met by price increases, or be held by subsidies. The Government is now faced with a mounting bill of subsidies, and it will be seen that the continuation of a policy of subsidies cannot be carried on for ever without disastrous effects."

Price Control in the Reconversion Period

The report praises the success of price control and subsidies in holding down the cost of living during wartime. Subsidies have been paid partly on account of wage increases, and partly on account of the increased landed cost of imports.

"Subsidies are extremely difficult to administer and may have undesirable effects on production. If an industry continually receives subsidies to protect its position against cost increases, the incentive to increased efficiency is lost. The administration of price controls as we have had it during the war years has been accompanied by an increase in production of non-essential items. This has happened because the profit margin on essential items has been squeezed the most. Also manufacturers have striven to avoid the control which goes with the administration of subsidies on essential items. These two main factors have led manufacturers to concentrate on less essential but more profitable lines.

"Nevertheless, even though price control distorted the structure of production, it was effective in holding down the general level cost of living items. The distortions were not so marked during the war years when

price control was assisted by physical controls of raw materials and the direction of manpower.

"It is now necessary to rely on price control measures alone to remedy the distortion. This means a new emphasis of price control policy. The present distortion of production away from low-priced essential goods can be avoided. You will all agree that price control policy should be designed to assist the maximum production in efficient units. We must get more production of essential goods. Therefore we must make luxury goods less attractive to produce than essentials.

"As to how this can be done, there may be room for discussion. One method worth considering is that industry price ceilings should be substituted for the present system of individual price authorizations; that is, we might establish for a given line of goods a price ceiling based on the costs of a reasonably efficient firm. A firm which cannot operate under this ceiling would be squeezed into some other line of production. On the other hand, a firm which can increase its profit margin by increasing its efficiency would be encouraged to increase its production. The production lost by this squeezing out of inefficient units should be more than offset by the increased production incentive to efficient units.

"You may be able to think of a better method of coping with the problem, but of this I am certain: we cannot continue with a system of price control which props up the least efficient units in the capitalist system.

"I believe that it is better to influence the direction of production by a well-planned price policy than by direct physical controls such as manpower controls and production controls, which are unpopular to employers and employees alike, and bring in their train a whole series of undesirable repercussions.

"At some point in this process, we should be moving away from an artificial structure based on subsidies, but in fact the subsidy bill is still on the increase. The wage-earner, who is also a consumer and a taxpayer, now contributes towards his own subsidies. Therefore the process of increasing wages and meeting the increases by subsidies or by price increases has its shortcomings.

"The only solution to our problem is increased production. I stress again the point that if we are to have higher standards of living we must have more goods and services. Our movement is no longer just fighting for wages. We want to increase actual standards of living. To do this, we must increase production. Real standards come from production, and not from the printing of a note issue.

"This brings me to proposals now being made for an even shorter working week. Owing to the shortage of female labour, certain manufacturing industries are offering to reduce working hours to 35 in order to attract labour. On the surface, no doubt, some labour people will think this a victory. A careful analysis, however, will show that workers as a whole are not going to benefit by this reduction of hours while goods and services are in short supply. This and other schemes to attract scarce labour from one industry to another will not improve the overall labour position. Further, they will tend to push up costs and prices, and workers as a whole will pay for this in the goods they buy. The question of reducing hours should always be measured by the supply of goods and services available to the people. If there were over-production, and stock-piles were accumulating, then we would be justified in an application for a reduction of hours—not now when New Zealand's main economic difficulty is a shortage of goods.

"Our most important industries are farming and industries processing farm products for exports. The relation between New Zealand costs and overseas prices is fundamental to our economy. . . .

"In the competitive conditions which we will have to face overseas, it will be an economic necessity to keep costs on a basis where we can compete. We must constantly keep in mind the relationship between internal costs and external prices, since whatever way we approach the problem this is in the last analysis the most important relationship in our economy. . . ."

Labour and Economic Problems

"For the greater part of its existence our movement has been primarily a defensive organization; its purpose has been to defend the workers against exploitation and to ensure them certain minimum living standards. In other words, the basis of the wages system was the minimal needs of the working class family. Necessarily, this meant that the trade union movement had a somewhat negative attitude towards economic problems.

"Today the situation is very different. In this country at any rate the battle for adequate minimum wage standards has been won; and the tendency is now for our movement to base wages on the productivity of the economic system. This means that we must have a positive approach to economic problems, because every gain in production means a gain to the workers. We can no longer stand apart from the economic system and throw the responsibility for its smooth

working on employers or the Government. We are asked to contribute something more to the economic system than our labour; we are asked to play a part in solving its problems and in improving its efficiency.

"If we can agree that under the present economic set-up in New Zealand every gain in production places at the disposal of the Government additional goods for distribution, then we must agree that every loss in production means a loss in the total goods available for distribution, and the workers must suffer. This economic factor unfortunately is not realized by all members of our movement. If it were, then we would not have recurring stoppages of production in many parts of the country.

"Every award and industrial agreement recognizes the possibility of industrial disputes within industry. This is realized by both employers and employees. The Government also recognizes that society is not a smooth running machine and has set up machinery for the adjustment of disputes. This machinery meets with the approval of our national organization, the Federation of Labour, the executive of which has repeatedly gone on record in advice to its affiliations that before stoppages occur, steps should be taken to take advantage of the machinery for the adjustment of the dispute.

"If the advice of the Federation of Labour were taken, we would not have that serious loss in production which has happened over the past few years, nor would the workers involved in the disputes suffer the unnecessary loss of wages.

"For our movement to become a really effective force in the productive structure of our country, it is imperative that we have discipline within our own movement. Individual and undisciplined action by parts of the movement weakens the strength of the movement as a whole. The unions must take steps to prevent such action, since any gains which are made by this expensive method, involving losses of production, could in fact have been gained through the normal machinery provided by the Government.

"It may be said that New Zealand has been more fortunate than most countries in avoiding industrial disturbances. Credit for this achievement must certainly be given to the Federation of Labour and to the Government. But we must not let the matter rest at that. The movement has a fundamental duty to itself and to the community to do everything in its power to increase the production of goods and services. We must perform this duty by all means within our power, otherwise we sacrifice the goal of higher standards of living for all."

Statement of Canadian Manufacturers' Association on Employee-Employer Relations

THE Canadian Manufacturers' Association at its 75th annual general meeting in Toronto on June 4-6, re-affirmed its position concerning employee-employer relationships by the adoption of the following statement:—

The Canadian Manufacturers' Association, Inc., regards a high standard of living for all Canadians as the chief objective of Canadian industry. The Association believes that a high standard of living in Canada depends upon maintenance of a high level of production.

A high level of production, however, can be maintained only if Industry supplies consumers with satisfactory goods at prices which will encourage a high level of consumption both at home and for export. To do this is the prime function of Industry.

If this function is to be successfully performed, there must be a fair return in the form of gross earnings from which wages and dividends may alike be paid.

For the successful performance of this function, there must also be suitable plants, equipment and machinery; sound management; and a working force willing and able to perform the many and various duties necessary in modern manufacturing operations.

But even with all these, the successful functioning of Industry can be assured only by full and harmonious co-operation between employees and employers.

To promote full and harmonious co-operation, the Association believes that the following principles should govern relations between employees and their employers.

A. Both Employees and Employers Should

(1) Regard continuity and quality of service to the public (the customer), as the first consideration. Upon it depend year-round jobs, good wages, dividends, and the future of Industry itself.

(2) Observe faithfully the provisions of every agreement or undertaking made by them or on their behalf.

(3) Seek constantly to discover methods of increasing production and improving products.

(4) Consider with open minds proposals made by either party to the other, each seeking to understand the other's needs and problems, and constantly bearing in mind that neither can operate without the assistance of the other.

(5) Settle differences by negotiation in good faith without interruption of operations.

B. Employers Should

(1) Provide facilities which will permit efficient and economical production and make all reasonable provision for the safety and health of their employees during the hours of their employment.

(2) Select and develop supervisors who are not only technically competent, but who will deal on a fair and friendly basis with the men and women whom they supervise.

(3) Respect the right of employees to associate freely for all lawful purposes.

(4) Bargain collectively, in cases where representatives have been freely chosen by a majority of the employees affected, on wages, hours of work, and working conditions.

(5) Organize operations with a view to promoting maximum regularity and continuity of employment and consequently maximum stability of income.

(6) Give employees, as far as possible, opportunities to progress within the organization according to ability, experience and merit.

(7) Support and develop good wage standards having regard to all circumstances which are material.

C. Employees Should

(1) Recognize the Employer's right to plan, direct and manage the business.

(2) Perform their assigned duties in an efficient and industrious manner to the best of their ability.

(3) Co-operate freely with management in meeting the many problems in which the employees are concerned.

(4) Conserve and protect the products, plant, equipment and machinery, and respect the rights of employers as the owners of the property.

(5) Recognize the right of an individual employee to join or not to join any lawful organization of employees or other citizens without impairing his right to work at the occupation of his choice.

It is hoped to publish a summary of the proceedings in regard to that part of the conference dealing with employee-employer relations in an early issue.

Canadian Science at War

Review of the Activities, from 1941 to 1945, of Wartime Bureau of Technical Personnel

WITH the abandonment of wartime controls, at the end of 1945, covering the employment of engineers and scientists, it would appear timely to review both the methods used and the results accomplished during the period of their application.

Two main underlying principles governed the activities of the Department of Labour in this field. One was to take maximum advantage of co-operation and the other to adhere to manpower priorities. This latter term has not been universally popular, but when taken to mean "first things first in the national interest" there could be little quarrel with it.

The Bureau was created, in 1941, as a direct result of an approach to the Department by the three national engineering and scientific societies. The government immediately accepted the offer to set up an agency to deal with the mobilization of scientists, and, ever since, the interests of both parties have been closely related. From an administrative point of view the Bureau has operated as a branch of the Department of Labour, while at the same time there has existed an active advisory board representing professional bodies, universities and manufacturers.

Inventory of Technical Manpower

The first step taken was to set up (and afterwards maintain) an inventory of individual engineering and scientific skills with particular reference to training, experience, age and general physical condition. Then, as needs of the Armed Forces, of Government Branches and of essential industry were recorded from day to day, advice could be given as to the most efficient possible use of any technical person. When formal controls were set up in March, 1942 (those governing technical persons pioneered the civilian manpower control program), they were designed deliberately to operate in a negative way. Although they provided for a "request" to change employment, they did not then, or subsequently, include power to "direct" such changes. The need for a permit prior to using the services of a technical person was sufficient provision to head off any departure from true priorities.

In this regard, it might appear that those administering the regulations would be faced with problems of great complexity. Who is to say, for example, which is the greater need, making weapons or maintaining them in the field? If they are not made in the first place, their maintenance becomes a question of only academic interest. But if it is remembered that operations in the field are conducted under rigid limitations as to age and medical category an immediate clue is provided. One actual case that was dealt with involved a decision as to the relative urgency of improvement of a type of wheat for food purposes and the development of higher resistance in armour plate.

Meeting Military and Civilian Needs

In meeting the needs of the Armed Forces for technical officers the Bureau acted as a recruiting channel for the majority of those still required as from the end of 1941. This work was expedited when in the summer of 1942 the Department of National Defence seconded a senior officer to act as "Military Adviser" in the Bureau. A large proportion of those selected for technical appointments were newly—or recently—graduated students. Altogether there were 1,630 potential officers inducted as a result of Bureau references out of an estimated 3,000 enrolled for technical duties during the three-year period concerned. Another important function of the military adviser was to keep track of those with technical backgrounds who had already enlisted, but not in technical capacities. On more than one occasion the Bureau was able to advise one of the services where they might find within their own ranks a candidate suitable for some special need.

On the civilian side, every effort was made to discourage needless turnover. This is reflected in the number of new individual contracts of employment recorded from month to month under the permit system. Allowance must be made for replacements due to deaths, retirements and enlistments, for curtailment of some activities and expansion of others, and for the absorption each spring of the civilian portion of the graduating classes. Nevertheless, the number entering new employment each month has averaged about one per cent

of the total number registered. This would indicate a very gratifying degree of stability.

In the result, it may be stated that the needs of the Armed Forces for technical personnel have been fully met, whether such needs were for quotas to build up establishments or for individuals or small groups with highly specialized skills. In the civilian field, there have been some shortages. But it is a question whether they could have been fully met except at the expense of the services in any case. It was possible to a large extent to prevent such shortages from becoming acute.

Varied Demands Satisfied

It is doubtful whether any complete record in detail can ever be compiled to show the contribution made by each of the engineers and scientists whose case has come before the Bureau. But a few examples will indicate how varied were the fields in which they served.

According to custom, naval captains write out a modest ticket when an officer leaves their ships' company. In two typical cases these close with the stereotyped phrase "and has served to my entire satisfaction". One, dealing with an engineer officer goes on to refer to the example set to all hands on the night the ship was damaged. (With typical naval reticence, no reference is made to the fact that the ship sank shortly after being "damaged".) Another, from a cruiser in far eastern waters, mentions the technical proficiency of the radar officer.

In the army, such corps as the engineers and the electrical and mechanical engineers recruited officers for their field units to a large extent from among the younger civilian engineers. Many an Italian river was crossed by our troops over a bridge sited and erected, under the usual "hail of gunfire", by one of these men. An early citation (regrettably posthumous) from the campaign in Egypt deals with the work under fire of a young Canadian who saw service with a British Light Aid Detachment there.

Many technical persons enlisted in air crew, where combat duty was available to a greater extent than purely technical operations. But the two were nicely combined in the case of a physicist acting as navigator in a pathfinder squadron. Exclusively scientific were the duties of the expert mathematician who worked out saturation tables for mass bombing raids.

Civilian duties were by no means confined to war production. Permits were issued, and in many cases candidates found by the Bureau, covering such positions as meteoro-

logical officer at Aklavik, civil engineers for the Ministry of Aircraft Production in Britain or veterinary officer for New Zealand. Other overseas assignments included chemical engineers for the Persian Gulf, mining personnel for British Guiana, and geologists for the oil fields of South America. Working more or less behind the scenes were the forest entomologist at war with the spruce bud worm, agricultural scientists improving farm production and hundreds of research people both in Canada and in the United States.

Whole new industrial enterprises were staffed from the ground up, the synthetic rubber, radar and explosives programs being entirely new fields, while shipbuilding, aircraft and fighting equipment were almost entirely so. And it should be remembered that this was done at a time when the country was producing but 1,700 new engineers and scientists each year, with the armed forces absorbing 1,200 and death or retirement accounting for 500 out of the existing supply.

Reconversion Technique

The experience gained, and the useful contacts made, in dealing with the war manpower problems of hundreds of employers and thousands of individuals is currently being used to assist in the resettlement of those whose war service has now terminated. Reconversion in the technical personnel field has been characterized by a minimum of confusion or resulting unemployment, due in large measure to the fact that, for the time being, the machinery which functioned smoothly for over four years of war has not been changed but merely thrown into reverse. Such time as can be spared from immediate tasks is being devoted to development of plans for future efficient use of technical persons. There is, however, the important difference that the happiness and prosperity of the individual need no longer be subordinated to national needs. In fact the two should now go hand in hand.

In conclusion, it should be made quite clear that no attempt is here being made to glorify the part played by technical persons in Canada's war effort. But when the enemy, as was most quickly apparent to scientific minds, set out to use ruthlessly and with single-minded purpose every resource of science and industry for the bald objective of destroying the Allies, it was not sufficient to point out that Canadians as a nation, were congenitally unable to accept such ideas. Nor would it have accomplished anything other than much glory to oppose him only with the bare breasts and strong arms of Canada's sons. He had to

be fought with everything that science and engineering could devise and produce. It was the appreciation of this truth that led various scientific bodies, even before war was more than a possibility, to initiate action leading to complete mobilization of technical man-

power. They would be the first to admit that they were merely members of a team, along with their sister professions and all other types of skilled and unskilled workers of both sexes, which finally completely defeated the enemy at his own game.

Handbook on Suggestion Plans

A HANDBOOK designed to assist industrial plants in instituting suggestion plan systems has been prepared by the Industrial Production Co-operation Board of the Dominion Government. It embodies the general features and methods of organization common to the more successful plans that are presently in operation across the country.

The *Handbook on Suggestion Plans* stresses, however, that no overall suggestion plan exists; to achieve results it is essential to tailor each plan to individual plant needs. The fundamental requisite for success, the handbook states, is good labour-management relations, in order to obviate the workers' fear that a suggestion scheme will adversely affect their job security and rates of pay. It contends that suggestion plans should operate as a representative part of Labour-Management Production Committee activity and not become its sole function, if a foundation of mutual trust and good will is to be maintained. Emphasis is also placed upon the advisability of bringing employees into active participation on both the L.M.P.C. and Suggestion Sub-Committees, in order to maintain co-operation, which, it states, inclines to decrease when workers merely deposit ideas in a suggestion box.

"Distinct and valuable contributions to plant efficiency result from ideas submitted to the Suggestion Sub-Committee through suggestion boxes. But they are not the only suggestions which result from L.M.P.C. activity. Some of the best contributions emerge from the discussions which take place both on the main L.M.P.C. and on Sub-Committees dealing with plant safety, conservation of materials, care of tools, etc.

"These ideas are a joint product of co-operation between management and labour".

It is essential that all levels of management and labour be informed that the top executives in both groups fully endorse the plan and that this is explained to them before the Suggestion Sub-Committee is constituted and activity begun. The Sub-Committee is normally appointed by the main L.M.P.C. and is composed of an equal number of qualified representatives of management and labour.

In rewarding suggestions, "no definite procedures as to the allocation of authority can be laid down; the diversity is too great." Generally, however, the means employed fall into two broad categories: management may decide, alone, the amount of the awards, or authority may be vested in the committees concerned.

Awards are usually paid to all employees below the rank of foreman; normally personnel engaged in developing new methods and designs, etc. are excluded.

The work of suggestion committees usually includes the task of stimulating interest in the plan through various means of publicity; co-ordinating the scheme with other sub-committee drives and L.M.P.C. activity generally; assisting employees in cases where ideas require illustrations and drawings, or where employees have difficulty in expressing themselves clearly; and in devising an office routine and arranging acceptance and rejection procedures.

A description of the benefit of tying in the Job Instruction Training and Job Methods Training courses provided by the Canadian Vocational Training Branch of the Dominion Labour Department is given in the publication.

Awards

"Greater diversity of opinion exists on the subject of awards than on any other feature of the Suggestion Plan." The booklet contains a description of methods of awarding suggestions which are held in common by a substantial number of successful committees and quotes the conclusions reached in an Analysis of Suggestion Systems by A. W. Hendrickson and A. E. Heusser, published in the May, 1945 issue of *Factory Management and Maintenance*.

"Although the formulas used by companies in calculating the amount of award to be granted differ substantially, there are relationships between the award practices of companies and the effectiveness of their Employee Suggestion Plans. The major relationships are:—

(1) The granting of low minimum awards sometimes called token awards, such as some

companies offer for safety suggestions, tends to increase the total number of suggestions.

(2) The granting of even an occasional high award also tends to increase the number of suggestions received.

(3) As the number of suggestions received increases, the acceptance rate tends to increase. (Part of the increase in the acceptance rate may be attributed to the granting of token minimum awards.)

(4) As the number of suggestions received increases, the average award tends to decline. (Part of the decline may be attributed to the granting of token awards by companies receiving a large number of suggestions.)"

A number of British firms make awards from 25 to 50 per cent of the first year's savings.

An American electrical manufacturing plant, estimating that the average suggestion has a life of three years, calculates its awards as follows; Savings for this period are estimated and awards paid on 15 per cent of the first \$1,000 of savings, 10 per cent of the next \$1,500, and 2 per cent for every dollar saved after \$2,500. This plant reports that prior to the

initiation of the above-mentioned award policy they received 800 suggestions a year. Without making any other changes in their suggestion plan, ideas which were submitted jumped to 1900 at the end of the first 11 months. Possible errors in estimating savings for three years tend to offset each other, it is stated, in that some awards may be a little high, others a little low.

The Consolidated Vultee Aircraft Corporation, besides paying its employees cash awards for their suggestions, also assists them in obtaining patent rights.

The booklet also contains a detailed description of suggestion award systems operating in Canada in the plants of Somerville Limited London, Ont., Pacific Mills Limited, Vancouver, B.C., Norton Company of Canada, Chippawa, Ont., Northern Electric Company, Limited Montreal, P.Q., Massey-Harris Company Limited, Toronto, Ont., and The William Kennedy & Sons Limited, Owen Sound, Ont.

Copies of the booklet may be obtained on application to the Industrial Production Co-operation Board, Department of Labour, Ottawa.

Increase in Index of Wage Rates

THE preliminary index number of wage rates in Canada for 1945 calculated from data for six main industry groups was 140.3 as compared with 137.5 in 1944. The index is based upon rates in 1939 as 100. The increase therefore between 1939 and 1945 was 40.3 per cent and between 1944 and 1945 was 2.0 per cent.

The general index is shown below, together with the index for each of the main groups. Final and more detailed figures for 1945 will be given in a subsequent issue of the LABOUR GAZETTE.

	1939	1944	1945*
General index.	100	137.5	140.3
Logging.	100	146.1	161.4
Mining.	100	134.8	136.2
Coal mining.	100	146.0	145.3
Metal mining.	100	125.2	128.4
Manufacturing.	100	141.1	143.2
Construction.	100	129.6	131.1

* Preliminary.

	1939	1944	1945*
Transportation and Communication.	100	127.6	128.9
Water transportation.	100	140.7	143.1
Steam railways.	100	125.5	125.5
Electric street railways.	100	125.7	125.9
Service—Laundries.	100	128.9	136.1

The index for the logging group advanced 10.5 per cent in 1945 over the figure for 1944. In the same comparison mining increased 1.0 per cent; manufacturing 1.5 per cent; construction 1.1 per cent; transportation 1.0 per cent and services 5.6 per cent.

In the mining group the slight decline in the index for coal mining was due to a decrease in earnings for contract miners and to a slight decline in average rates for total miners resulting from changes in the numbers of workers. No changes were recorded in contract rates.

The electric street railways index is revised for the period 1940 to 1944 as follows: 1940, 103.9; 1941, 109.1; 1942, 115.8; 1943, 121.2; 1944, 125.7.

International Labour Organization

Relationship of ILO with United Nations

NEGOTIATIONS to bring the International Labour Organization into relationship with the United Nations resulted in a draft agreement being reached at the end of May by delegations representing the two organizations. The draft agreement, which will be subject to approval by the International Labour Conference on the one side and the Assembly of the United Nations on the other, was signed by Mr. G. Myrddin Evans (United

Kingdom), Chairman of the Governing Body of the ILO, and Sir Ramaswami Mudaliar (India). President of the Economic and Social Council of the United Nations.

It provides for reciprocal representation, for exchange of information and documents, and for co-ordination of the work of the ILO with that of United Nations bodies and agencies.

Ninety-Eighth Session of Governing Body

THE Governing Body of the International Labour Office held its 98th Session in Montreal from May 23 to May 27, 1946, under the chairmanship of Mr. G. Myrddin Evans, representative of the Government of the United Kingdom.

The session was preceded by meetings of several Governing Body Committees including the Employment Committee, the Finance Committee and the Standing Orders Committee. A meeting also took place between representatives of federal states and the Conference Delegation on Constitutional Questions, to consider the problems confronting federal states in regard to the ratification of Conventions adopted at International Labour Conferences.

The Canadian Government was represented at the Governing Body meeting by Mr. Paul Emile Renaud, Counsellor, Department of External Affairs, in the absence of the regular Government member, Mr. A. Mac-Namara, Deputy Minister of Labour, and of his former substitute, Dr. A. Rive, recently appointed High Commissioner for Canada to New Zealand.

Canada was represented at the meeting of federal states by Mr. A. H. Brown, Assistant to the Deputy Minister of Labour, accompanied by Mr. Renaud; on the Employment Committee by Mr. Paul Goulet, Special Assistant to the Deputy Minister of Labour in charge of relations with the ILO, accompanied by Dr. O. J. Firestone, Department of Reconstruction, and Mr. W. K. Rutherford, Acting Chief Employment Officer, National Employment Service; on the Standing Orders Committee by Mr. Goulet; and on the Finance Committee by Mr. Renaud, accompanied by

Mr. Goulet, Mr. E. B. Armstrong, of the Finance Department, and Mr. C. R. McCord, of the Department of Labour. Some of these officers also attended the session of the Governing Body, as did Mr. V. C. Phelan, Department of Labour, and Mr. H. F. Davis, Department of External Affairs.

Mr. Percy R. Bengough, President of the Trades and Labour Congress of Canada, was present as a workers' delegate. Mr. Bengough had been re-elected to one of the eight seats allotted to workers on the Governing Body at the Paris Conference in October, 1945.

Employment

As a basis for discussion by the Employment Committee, the International Labour Office submitted information on the employment situation in various countries. A comprehensive report, both factual and analytical, gave a description of employment policies adopted in a number of countries and indicated measures taken to implement such policies.

The report dealt with such problems as: the type of employment information and statistics necessary in order that a full employment policy may be applied; means to attain a balanced allocation of industrial activity within each country; factors involved in attaining the geographical mobility of labour required in an expanding economy; vocational training, vocational guidance; and the functions of an employment service.*

The importance of accurate and thorough statistics was emphasized in a separate report; and in the interchange of opinion among the delegates a number of suggestions were

*Further reference to this report is made elsewhere in this issue on page 867.

made for the improvement of this sort of information.

The report of the International Development Works Committee, which had met in Montreal in January (L.G., March, 1946, p. 278) was studied by the Employment Committee, and subsequently by the Governing Body which decided to ask governments to give effect to suggestions contained in the report, covering such matters as the supply of information to the ILO on public works proposed or undertaken by countries; the supply of employment statistics; points to be considered by governments engaged in planning public investment; and exchange of technical personnel.

Finance

The budget for 1947 voted by the Finance Committee and approved by the Governing Body for submission to the next session of the Conference, amounted to 15,429,088 Swiss francs, as compared with 11,521,510 Swiss francs in the 1946 budget.

This was the first budget to be adopted autonomously by the ILO following the dissolution of the League of Nations.

Considering it desirable that machinery should be provided under which the financial operations of the ILO could be carried out pending the conclusion of financial and budgetary arrangements with the United Nations, the Governing Body adopted draft regulations for consideration at the next session of the Conference.

It was decided to set up a Contributions Committee to consider the question of financial contributions of member states to the Organization. The Committee will consist of representatives of the Governments of Canada, France, India, Mexico and the United States of America.

Federal States

The possibility of lessening the existing disparity between the obligations of unitary and federal states in regard to conventions adopted at International Labour Conferences was considered at a meeting between representatives of federal states and members of the Conference Delegation on Constitutional Questions.

The federal states represented were: Australia, Canada, India, and the United States of America. Brazil, Mexico, Switzerland and Venezuela, which are also federal states, were not represented.

Under the existing Constitution, the obligations of federal states, in respect of International Labour Conventions, are regulated by Article 19 (9) as follows:

In the case of a federal state, the power of which to enter into Conventions on

labour matters is subject to limitations, it shall be in the discretion of that Government to treat a draft Convention to which such limitations apply as a Recommendation only, and the provisions of this article with respect to Recommendations shall apply in such case.

A Recommendation is submitted to the Members of the ILO, not for "ratification" as in the case of Conventions, but for consideration with a view to effect being given to it by national legislation or otherwise, and the only obligation which a member undertakes is to bring the Recommendation within twelve, or at most eighteen months, before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action.

The meeting considered a number of proposals for amending Article 19 (9) of the Constitution. The report of the Delegation containing these proposals was noted without discussion by the Governing Body, and will be considered at the next session of the Conference.

Instrument of Amendment

An appeal was made by the Acting Director of the Office of Government Members of the Governing Body to send in their ratifications of the Instrument of Amendment to the Constitution adopted at Paris in November last before the opening of the 29th Session of the International Labour Conference, September 19, 1946. He pointed out that 39 ratifications were required to bring the Instrument into force.

Relationship with the United Nations

The Governing Body was informed that immediately following its session, an ILO delegation would go to New York to negotiate the terms of the Organization's relationship with the United Nations. The Negotiating Delegation of the Governing Body had held two meetings in Montreal on May 22-23 and considered the draft of an agreement between the United Nations and the International Labour Organization which had been prepared by officials of the United Nations working in co-operation with officials of the International Labour Office.

Agreement was subsequently reached between the delegations of the ILO and the United Nations (see p. 882), and this agreement will have to be submitted to the United Nations Assembly on the one side and to the International Labour Conference on the other for final approval.

30th Session of the Conference

It was decided that the 30th Session of the International Labour Conference should be

held at Geneva, and that it should open on Thursday, June, 19, 1947. The following agenda was agreed upon:

- (1) Director's Report. (The report is to provide an opportunity for a discussion of wages.)
- (2) Reports on the Application of Conventions under Article 22 of the Constitution.
- (3) Financial Questions, including the adoption of the budget and the scale of contributions for 1947.
- (4) Minimum Standards of Social Policy in Dependent Territories (Provisions suitable for a Convention). (The 29th Session of the Conference will undertake a first discussion of this question. It is anticipated that by decision of the Conference, under Article 16 of the Constitution, this question will be placed on the agenda of the 30th Session for second discussion).
- (5) Organization of Labour Inspection in Industrial and Commercial Undertakings. (Single discussion procedure.)
- (6) Employment Service Organization. (Double discussion procedure.)

The suggestion of the Office that the agenda should include also the question of Vocational Guidance was not adopted.

Other Meetings

The Governing Body authorized the Acting Director to arrange for a regional conference of Asiatic States Members of the ILO in New Delhi, India, January, 1947.

Of the industrial committees, the Governing Body decided that the Textiles Committee and the Building Committee should hold their first meetings in Brussels in the fall of 1946. The date and place for the first meeting of the Petroleum Committee will be considered by the Governing body at its next session in September. An invitation to meet in Lima has been received from the Peruvian Government.

An agenda was decided on for the second meetings of the Coal Mines Committee and the Inland Transport Committee.

The Acting Director was authorized to communicate to the Economic and Social Council of the United Nations as well as to the Governments the resolutions of the Iron and Steel Committee on freedom of association, collective bargaining, and full employment, and those of the Metal Trades Committee on shortages of steel, new equipment and coal in Europe, and on the needs of the industrially underdeveloped regions (see Supplement to December, 1945, issue of the LABOUR GAZETTE).

The Governing Body took steps to give

concrete effect to the recommendations and resolutions formulated by the Third Labour Conference of American States Members of the International Labour Organization held in Mexico City in April 1946 (see Supplement to July, 1946, issue of the LABOUR GAZETTE).

Thus it authorized its Employment Committee to set up a sub-committee of its American members to consider questions relating to vocational training in the American countries and proposals concerning methods of regional co-operation. It accepted in principle the recommendation of the Mexico Conference concerning collaboration between the public authorities and employers' and workers' organizations. It agreed to call the attention of the Economic and Social Council of the United Nations to the desirability of studying in the near future, in co-operation with the International Labour Organization and other interested bodies, the most effective methods of facilitating the process of harmonious industrialization of the Latin-American countries. It instructed the Office, within the scope of its functions in relation to economic problems, to apply itself particularly to studying the problem of inflation, in collaboration with other competent international bodies, and to report on the results of these studies to the 29th Session (Montreal) of the International Labour Conference.

On the suggestion of the Acting Director, the Governing Body decided

- (a) to convene the Permanent Migration Committee for August 26, 1946 at Montreal;
- (b) to reconstitute the Sub-Committee on Automatic Coupling of Railway Vehicles;
- (c) to set up a Co-operative Committee to direct in a more systematic way the activities which the Office has carried on in co-operative matters for the last twenty-five years;
- (d) to revive the Silicosis Sub-Committee of the Correspondence Committee on Industrial Hygiene;
- (e) to reconstitute the Permanent Agricultural Committee with Mr. J. F. Booth (Canada) and eleven other experts as members.

Spanish Language

It was decided to recommend to the Conference, at its 29th Session, to include in the Standing Orders of the Conference provisions giving a statutory character to the practice according to which official translations into Spanish of speeches are furnished by the Secretariat of the Conference, and all documents of the Conference are published in Spanish in the same way as in English and French.

Farm Labour in New York State

Measures to Prevent Child Labour

IN ORDER to cope with the problem of the growing employment of children and migrants in agriculture while at the same time striving for maximum food production, the New York State Department of Labour has announced its intention strictly to enforce the existing law. In co-operation with other Government agencies, the Department will seek to ensure (1) an adequate supply of farm labour, (2) the employment of children only of legal age with approved permits, and (3) healthful living and working conditions for seasonal migrant workers. The results of a State-wide survey in 1945 of seasonal farm labour and the conditions of its employment showed the need for greater control.

Seasonal workers harvest about 20 per cent of the State's fruit and vegetable crops. Of these workers a large number are under 18.

It is well to point out, however, that there is no child labour in some branches of fruit and vegetable production in the State. Because of the inefficiency of young workers, delicate fruits such as tomatoes, peaches, and grapes are harvested in New York State mainly by older youths and adults.

The Child Labour Law prohibits children under 14 being employed on farms except those of their parents, and requires children of 14 and 15 to have farm work permits.

The New York State Child Labour Law applies to child workers on the farms as well as in factories; but while public opinion has long been aware of the evils of child labour in the factory, there is less information regarding employment conditions of child workers in agriculture. A large part of public opinion, associating farm labour with work on small home farms, has been inclined to consider such work as a rather pleasant and not too arduous task for children, ignoring the fact that in modern industrialized agriculture such labour can be quite as difficult and exhausting for a child as factory work.

Because of the wartime shortage of farm help, children under the legal minimum age of 14 were employed. A study of 34 labour contractors with 3,195 workers in 1945 showed that 66 children or 2.9 per cent of those employed were under 12 years of age.

In 1945 the Labour Department took definite steps towards enforcement of the law. First, an educational campaign was inaugurated to inform farmers and the public of the law. In July, a conference of persons representing farming, food processing and social and child welfare groups recommended allowing children of 12 and 13 to work on farms in 1945 if

accompanied by their parents and if hours were kept short.

Lastly, a survey was made of the wages, hours, and working conditions of workers hauled daily to the farms from near-by cities and "migrant camps" housing workers for the harvesting season. Of about 1,900 children and youths under 18 employed on day-haul, slightly more than one-half were at least 14 years old but almost one-fifth were younger than 12 years. In the labour camps similar conditions prevailed. Of 605 pickers one-fourth were under 14 years; 113 children were from 10 to 13 years and there were 32 children under 10. None of the 14 and 15-year-olds had permits. Some growers claimed ignorance of the law. Others, while admitting the greater efficiency of the older worker, stated that they were reluctant to forgo this source of labour supply as long as other growers employed young children. A few claimed that the children were working at the insistence of their parents. Some pleaded that they could not get their crops harvested without the help of the 12- and 13-year-olds.

The hours of farm labourers under 18 are not limited by law. Hours on day-haul were usually eight but more than one-quarter of these young people worked more than eight, a considerable number as many as 10 hours. With travel time, this amounted to about 12 hours a day. The working day in migrant camps ranged from 7½ to 10½ hours but 21 out of the 29 camps surveyed called for nine hours or more.

To secure the largest possible number of legally-employed young workers, legislation which was enacted during the war permitting the release of pupils of 14 or over for planting and harvesting and those 16 and over for canneries, green-houses and milk plants, has been extended to July 1, 1947. But such release may be granted only when there is insufficient available adult labour and only for a period of not more than 30 days in any year or 20 days in any three-month period. Pupils must be physically fit and the school authorities are responsible for safeguarding their educational interests.

As regards migrant labour, the law, as amended in 1946, requires every person who proposes to employ, recruit, transport or bring into the State ten or more migrant farm or processing workers to register with the State Industrial Commissioner before importing such

workers and to submit a statement on wages, housing and working conditions and such other information as the Commissioner may prescribe. The registrant must also give a copy of such statement to each worker, either at the

time of recruitment or immediately upon his arrival in the State and post a copy in any camp in which migrant workers are housed. Minors coming from another State must bring with them proof of age.

Maritime Labour Institute Conference

Many Problems of Interest to Workers Discussed at Annual Meeting

THE third annual conference of the Maritime Labour Institute of Dalhousie University, held this year, May 15-17, brought together over 60 representatives of trade union locals in the Maritimes to hear speakers on a wide range of topics of interest and importance to organized labour. Unions from all types of industry—coal mining, ship building, carpentering, painting, paper-making, salt mining, rail-roading—were represented at the course. The delegates came looking for information; when it wasn't given in the addresses they asked for it; and to their organizations they took back new ideas and new objectives.

"It is fitting, with the Maritimes' pioneering record in Canadian industrial relations that, through the Maritime Labour Institute, they should take the lead in labour education", said Dr. L. Richter, Director of the Institute, in welcoming the delegates. Hon. L. D. Currie, Minister of Labour for Nova Scotia, spoke to the delegates, as representative of the provincial government, calling on them to take the lead in educating labour to its rights and responsibilities.

Keynote of the conference was the topic of Dr. H. D. Woods, Associate Professor of Industrial Relations at McGill University, "Labour and Reconversion." He sketched the problems of reconverting the nation's economy to peacetime production: the backlog of demand for capital and consumer goods, the enlarged labour force, the dangers of inflation, and the divided jurisdiction of labour questions by the federal and provincial governments.

Norman S. Dowd, Executive Secretary of the Canadian Congress of Labour, spoke of the task of the International Labour Organization, describing the work done at its Paris Conference last October, and its plans for the future.

"The Health of Industrial Workers" was the subject of Dr. F. S. Parney, Chief of the Division of Industrial Hygiene of the Department of National Health and Welfare, Ottawa. Dr. Parney reviewed recent developments in industrial medicine, and set forth the methods by which workers can be protected from occupational diseases.

Delegates evinced interest in the social security system of New Zealand, described by Hon. David Wilson, High Commissioner for New Zealand in Canada, and formerly a member of that Dominion's Labour government. Mr. Wilson told of the measures taken to achieve social and economic security in New Zealand, and the methods through which the beneficial measures are being carried out.

During the last few months the housing shortage has been one of the most acute problems in Canada. To bring delegates a clearer understanding of the problem, and the methods by which it may be solved, Benjamin Higgins, of the International Labour Office, spoke on "The Housing Crisis". Nearly two-thirds of the nation, he stated, is poorly-housed, because of inadequate facilities to meet the demand of middle and lower income groups. The basis for solution is the cessation of high monopolistic prices on material, and of restrictive labour practices, and the development of new methods and materials for construction. Private enterprise, with government help in the form of low-interest, long-term loans, can meet the needs of the middle income group, but housing for the low-income group, he declared, will call for large-scale government subsidization of housing projects.

Ted F. Silvey, Reconversion Officer of the C.I.O., Washington, spoke to the delegates on "Labour and Technological Change." At one time technological change was strongly resisted by the workers, he stated, but to-day, both workers and management have accepted it as necessary and desirable for a prosperous life. But technological progress, he declared, has outrun social and economic development, and today's challenge is to bring about great changes in these fields, so that recurring cycles of booms and depressions may be abolished.

The final speaker was Russell Harvey, of the American Federation of Labour, Toronto. He described P.C. 1003, the Dominion's wartime Labour Relations Act, and urged unions to become more familiar with its provisions, its shortcomings and benefits, as a prelude to harmonious peacetime labour relations.

Rehabilitation

Extend Co-operative Efforts on Behalf of Disabled Veterans

SPECIAL arrangements to give greater effect to the existing co-operation between local offices of the National Employment Service of the Unemployment Insurance Commission, Department of Labour, and the Casualty Rehabilitation Services of the Department of Veterans Affairs in regard to the placing of disabled veterans in suitable jobs were announced recently by A. MacNamara, Deputy Minister of Labour.

While the local employment offices through their veterans' officers and their special placements officers have been instrumental in securing employment for a considerable number of disabled ex-service personnel, the placement of disabled veterans in employment is the special function of the casualty rehabilitation officers of the Department of Veterans Affairs. The procedure will now be broadened to allow of greater integration of the activities of both Departments in this work.

"Rehabilitation of disabled veterans is a matter deserving of the maximum co-operation of all agencies concerned in this work," said Mr. MacNamara. "While casualty rehabilitation officers of the Department of Veterans Affairs are primarily responsible for the placement in employment of disabled veterans, all offices of the National Employment Service must not only give every consideration to disabled veterans who seek employment, but must also co-operate fully with casualty rehabilitation officers in this phase of their work, so that the fullest benefit may be derived from the organization and opportunities developed by each."

Exchange of assistance and information will take place at both the regional and the local office level. Veterans' officers of the National Employment Service will assist in the investigation of cases submitted to them through the casualty rehabilitation officers. All inquiries by the latter regarding employment opportunities for disabled veterans and all disabled veterans seeking employment will be handled through the special placements sections of the local offices. Employer relations officers will continue to note and report employment opportunities for these veterans, not only in cases where the employer has placed an order with the local office for workers but in those cases where it is expected that an employer may have future openings which are of a suitable nature.

Casualty rehabilitation officers will refer the veteran to the local employment offices whenever convenient. If the veteran's disability is such that he cannot conveniently report to the National Employment Service, or if he lives in an outlying area, the employer interview will be arranged for him entirely by correspondence. Special forms will be mailed to him for completion and return to the local office. This will obviate the necessity of reporting in person. Before an interview is arranged with a prospective employer, the veteran has an opportunity to accept or reject the preferred position. In all cases where the veteran is registered with the local office, the casualty rehabilitation officer will be kept fully informed of the progress and settlement of his case.

Third Report on Veterans' Qualifications

THE third and final Report of the Royal Commission on Veterans' Qualifications together with two supplements to the Second Report (L.G. Nov., 1945, p. 1621) were tabled in the House of Commons on June 27, by the Honourable Humphrey Mitchell, Minister of Labour. This third report concluded the work of the Commission set up in April, 1945, under the chairmanship of Lt. Col. Wilfrid Bovey, O.B.E., to examine problems involving the granting of appropriate credits

for trade skill, and for technical and other educational training or experience gained in the Armed Forces.

In this final report, which is in four sections, the Commission finds that there is a very pressing need for legislation by all provinces on the subjects of trades standards and apprenticeship training. A lack of uniformity in trade standards in the provinces, the report states, has prevented the placing of a civilian evaluation on the Armed Forces trades in

which ex-servicemen had been engaged. Further, the evaluation of apprenticeship training was for the most part being based on the time spent in training rather than on the amount of instruction given or the skill attained.

The Commission is of the opinion that the rehabilitation of veterans cannot be made effective until laws and regulations within the nine provinces have been amended to give some standardization on a Dominion-wide scale. It adds that in its discussions with provincial government authorities the latter have in all cases expressed themselves as being prepared to consider the Commission's recommendations.

Rehabilitation of veterans with marine experience was also dealt with. The Commission asks that students be given "time-at-sea" credit for part of the time spent at school, and that they be allowed to sit for official examination in theory upon graduation, thereby waiving the present regulation that they must first have served time at sea.

With regard to ocean-going certificates, it is recommended that the Department of Transport seek authorization to issue temporary Second Mates' certificates to former naval officers who have earned watch keeping certificates on ships of the Royal and Royal Canadian Navies. It is suggested further that naval seamen who have served on merchant ships should be allowed to count their time at sea toward obtaining a Merchant Navy certificate.

During the sessions in Quebec the Commission studied the province's system of issuing Competency cards to veterans. Under the Collective Agreement Act of Quebec Province, every employee who is subject to a collective bargaining agreement must receive a Certificate of Competency from a Parity Committee before he may work at his job.

The Commission investigated complaints that Parity Committees had refused, without just cause, to issue Competency Certificates to veterans. These complaints were not borne

out in the evidence of the witnesses examined by the Commission, and representatives of Parity Committees stated, before the Commission, that they would be willing to give the veteran the benefit of any doubt as to his skill and knowledge. The Commission did find fault, however, with the lack of uniformity throughout the province in the trades governed by the Parity Committees in each district. There was no evidence of a general standard of skill, and the Commission claimed that it would be difficult to establish civilian credits throughout the province for armed forces trades. Under existing arrangements, Competency Cards issued by a Parity Committee in one district are not recognized in another, thus preventing qualified tradesmen from moving from their present location.

Apprenticeship and Seniority

With respect to restrictions governing the number of apprentices who may enter trades training, the report states that most of the trade unions had agreed to the Commission's request to relax quota restriction in favour of veterans for the next two or three years, in cases where it can be demonstrated that there is an actual shortage of qualified tradesmen. The unions also stated that they would waive the age requirements where they would prevent a veteran from entering a trade because he was over the age limit for apprenticeship.

Following examination of representatives of organized labour, the Commission reported that trade unions were greatly assisting veterans who were returning to their pre-enlistment occupations.

With regard to seniority status, it found that the unions were agreed upon a policy of allowing seniority, for persons who were union members prior to enlistment, to continue for the period of service in the Armed Forces. There was, however, a tendency in some instances to treat ex-servicemen seeking employment in an industry for the first time, in the same manner as they would treat any other person.

Rehabilitation of Ex-Service Personnel

"THE objective which the Department of Veterans Affairs has set itself and which the National Employment Service has also accepted and is helping to attain is 'a job for every employable veteran.'" Such was the keynote of the address of Major-General E. L. M. Burns, Director General of Rehabilitation at the annual general meeting of the Canadian Manufacturers' Association, in Toronto, early in June.

General Burns pointed out that the phases of rehabilitation on which war veterans felt most keenly were two-fold: (a) employment and (b) housing. He discussed in detail what the government has done, is doing, and intends to continue doing, to achieve its objective with regard to ex-service personnel. He commended the co-operative work of Citizens' Rehabilitation Committees and other voluntary bodies in assisting veterans to find

jobs, and also "the overwhelming majority" of employers who had "re-instated their old employees in a generous spirit". They have gone "well beyond their legal obligations", he asserted. Continuing, he said, "So far as our records can establish, about 40 per cent of ex-service men return to their former occupations. . . . At present . . . some 60,000 are taking training under the Veterans Rehabilitation Act, almost exactly divided between vocational and educational".

Placement of Veterans

Referring to placements, General Burns stated that "the success in placing ex-service men in civil employment is beyond expectations. Our latest information shows that we have done better in this respect than they have in the United States". He did not wish to give the impression however, that the task was completed. "It may be that only the easiest part of the job has been done—that is, the settling of the ex-service men who have the best natural abilities and initiative".

He was emphatic in claiming that the policy of both the Department of Labour and the Department of Veterans Affairs recognized that it must be a first principle of the National Employment Service to give the employer good service. Even the keen desire for the placement of veterans is not permitted to override this principle. Preference is given veterans on the employment register only when they have the required qualifications for the jobs to be filled.

The speaker dwelt in some detail on benefits derived from vocational training for ex-service personnel, both on-the-job and in schools. This phase of rehabilitation, directed by the Vocational Training Branch of the Department of Labour, has the active co-operation of provincial departments of education. Officials and instructors at these training centres assist in finding jobs for veterans

and, as far as possible, maintain a measure of balance in the choice of employments made by ex-members of the Armed Forces. In this way the danger of overcrowding in specific lines of trade or industry is, to some extent at least, prevented.

Veterans' Seniority

"Seniority clauses, when they exist, frequently operate to the disadvantage of the veteran who has not been previously employed in industry", General Burns said. "It is not an answer to say that the solution to this problem is that the government should 'create full employment and then the veteran would be taken care of'. The fact is that any of the industries and occupations, where there are seniority agreements operating in this way, are among the best paid and it is not fair that a veteran who has served his country overseas in war, should be unable to get into these lucrative employments because the jobs are held by those who started their employment and established their seniority while the veteran was absent fighting."

He continued: "The award made by Justice Rand, in settling the Ford labour dispute last January (L.G., Jan., 1946, p. 130, No. 52), contained a clause which seems a very fair solution to the problem and which, it is understood, is working satisfactorily. If the principle contained in this portion of the award could be extended to all occupations and industries, it would remove this source of injustice", he asserted. "The Canadian Legion, in its recent convention (Quebec City, May, 1946) passed a resolution that this should be done. I think it is fair to say that representatives of labour on the higher levels recognize the justice of this contention, but the difficulty arises through the autonomy of local unions and the opposition of their recent members who would be adversely affected," General Burns stated.

Business Training for Ex-Forces Workers

The British Ministry of Labour and National Service is making provision for training suitable young men and women discharged from the Armed Forces who intend to make business their career. Not only is training provided, but where necessary, financial assistance is granted for the whole period of training.

In a brief explanatory article in the June issue of *Labour*, official organ of the Trade Union Congress, the Minister of Labour and National Service, Mr. George Isaacs, is

quoted as saying that while employers are anxious to deal fairly with young people from the Services, there are considerable difficulties to be overcome. To assist in solving these, the Business Training Scheme is designed to offer practical help. It "looks also to the future. Never has this country stood more in need of an ample supply of the best and best-trained brains, as recruits to all ranks of management. In ten and fifteen years' time, British business is going to need these young men."

Nature of Courses

The project, which has been framed and developed by business men, provides a short General Course of three months "to give students a grasp of basic business principles". Following this, a Specialized Business course for selected trainees is designed to give "a practical approach to administration in a particular firm or field of business. These courses will not be shorter than six months and may last up to two years." Maximum grants are at the rate of £160 a year with an additional £110 a year for a wife and £40 a year for each child. Fees for approved training at a technical or commercial college will also be paid. Employers may make "payments of grace" to a trainee during the period of a specialized training without such payment being deducted from any government maintenance grant allowed to the trainee.

Enrolment Conditions

The General Business course is open to men and women who have had at least one year's full-time effective war service and have the necessary education. An applicant must also satisfy one of the other conditions of

eligibility of which the two principal ones are: (1) that by reason of war service he was unable to start a career or start training for a career; (2) that his business career was interrupted by his war service before he had reached the age of 21, or before he had completed two years in business, whichever is more favourable to the applicant.

Each Specialized course must be approved as part of the plan by the Ministry of Labour and National Service before a trainee can qualify for assistance and trainees applying for these courses must have taken the General Business course. In selecting trainees for the Specialized courses employers will have the final say, but it is indicated that the Regional Appointments Offices will be in a favourable position to make recommendations. However, an employer who accepts a trainee for a Specialized course is not bound to take him on afterwards. In this regard, arrangements may be mutually agreed upon between the employer and the trainee. In cases where opportunities for quicker advancement are offered trainees, release from training may be arranged at any time.

Report of U.S. Fair Employment Practices Committee

"THE war gains made in eliminating discrimination in hiring practices are being rapidly dissipated in the United States." This was the charge contained in a final report presented to President Truman by the Fair Employment Practices Committee which ceased to function on July 1, following the expiry of the legislation under which it had operated.

The Committee's conclusions presented to the President held that:—

1. Wartime gains of Negro, Mexican-American and Jewish workers are being lost through a revival of discriminatory practices.
2. War veterans of these minority groups face greater difficulties to-day than other veterans in obtaining training and finding work.
3. Government action was effective in reducing wartime discrimination, but the gains began to disappear as soon as wartime controls were relaxed.
4. Only Congressional action to end employment discrimination can prevent the freezing of American workers into fixed groups with ability and hard work of no account to those of the 'wrong' race or religion.

5. This denial of equal opportunity, if allowed to become permanent, cannot fail to create discord.

6. Out of its experience, the Committee said it had found that employers and workers abandoned discrimination in most cases where government intervened, and that once the barriers were down the workers of varying races and religions worked together efficiently and learned to accept each other without rancour."

The report emphasized the need for "final authority" to support any policy against discrimination.

Some 80 per cent of the total complaints were filed by Negroes. During 1945 the chances to retain employment fell far more rapidly for Negroes than for white workers the report added. It stated that, generally, the opportunities to rise into skilled professional and managerial categories "dwindled to a scant few".

In outlining some of the prevalent discriminatory practices against returning service men of minority groups the report said "that they were having trouble getting into school, getting rehabilitation loans and obtaining skilled jobs."

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

John Ritchie and Company, Limited, and the Protective Union of Quebec Shoe Workers (C.C.C.L.).

Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 3, Lauzon, P.Q., and Davie Shipbuilding and Repairing Company, Limited.

The Employers' Syndicate of the Quebec Printing Industry, Inc.

Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company.

Norton Company of Canada, Limited.

Prudential Insurance Company of America. Canadian National Carbon Company, Limited, Toronto, Ontario.

Dominion Oxygen Company, Limited, and Prest-O-Lite Company of Canada Limited, Toronto, Ontario.

Employers' Association of Master Barbers and Hairdressers of Quebec, Inc., and the Syndicate of Journeymen Barbers of Quebec, Inc.

Imperial Oil Limited.

Modern Press Limited, General Printing and Bookbinding Limited, and Local 663, International Typographical Union, Local 206, Saskatoon Printing Pressmen and Assistants' Union and Local 85, International Brotherhood of Bookbinders.

Re: John Ritchie and Company, Limited, and the Protective Union of Quebec Shoe Workers (C.C.C.L.)

Reasons for Decision

This is an application for leave to appeal and an appeal from a Finding and Direction of the Regional War Labour Board for Quebec, dated January 22, 1946. Leave to appeal was denied by the Regional War Labour Board on February 14, 1946.

The Union applied to the Regional War Labour Board for a declaratory finding that the Company had wrongfully reduced the wage rates for two piece work operations in the Company's Stitching Department, and the Regional Board was requested to declare what the established rates were for the two operations in question. A brief résumé of the pertinent facts will be helpful to a full understanding of this appeal.

The dispute centres around the rate for stitching operations on footwear which is made without a box toe. The two operations in question are:—

Stitching 2 x 1 Toe-cap

Stitching 2 x 2 Toe-cap

Up to 1940 the rates for these operations were 12 cents and 17 cents, respectively. The Union contends that from 1940 to 1943 the Company paid 17 cents and 21 cents, respectively, for these operations, and that in 1943 the Company reduced the piece work rates to 12 cents and 17 cents. It is contended by the Union that the established rates of the

Company for those operations are the rates which were being paid as of November 15, 1941.

The Company, on the other hand, states that there was very little production of footwear without box toe between 1940 and 1943 (almost all the production being with box toe, in which case the regular piece work rates for these operations are 17 cents and 21 cents), and that during that time on the rare occasion when footwear without box toe was being produced, the higher rates were paid only as a result of an error on the part of one of its clerical employees. It was further pointed out that the error was discovered and the proper rates for the operations in question were restored at least two years before the point was raised by the Union in its application to the Regional Board, and in the meantime, no complaint had been received from the employees.

We are unable to understand why the employees, if they felt that there was merit to their contention, waited for two years before raising the issue. In these days when employees are, as a rule, quite conversant with their rights, a delay of this kind tends to lead us to believe that their silence over the two year period indicates that they did not consider that there had been any improper action taken by the Company. Further, the Company's explanation that they had paid the

higher rates as a result of an error appears reasonable and, if this is so, it follows that an error on the part of the Company cannot be or become the basis of a right on the part of the employees.

All of the above facts were presented to the Regional War Labour Board for Quebec, which accepted the Company's explanation of an error having been committed by it.

The Regional Board does not appear to have made any fundamental error in its consideration of this application, and we cannot see any reason for interfering with their decision.

The Union's application for leave to appeal will be granted and the appeal dismissed.

Finding and Direction will be issued accordingly.

June 7, 1946.

Re: Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 3, Lauzon, P.Q., and Davie Shipbuilding and Repairing Company, Limited

Reasons for Decision

This is an application by the Union to obtain a retroactive adjustment of ten (10c.) cents for every hour worked at piece work rates in the period April 16, 1943, and February 11, 1944, inclusive by Riveters, Holders-on and Rivet Heaters in the employ of the Company.

The application is based upon a qualification included in the National War Labour Board's Finding and Direction of January 5, 1944, in respect of the shipbuilding and repairing industry in the Provinces of Ontario and Quebec, providing for the establishment of a Committee to study existing incentive wage payment plans and systems of contract work as then in effect in the respective yards and the consideration that as such Committee was not established, the study of such plans contemplated by the qualification was not made.

The wording of the qualification in question did not imply that an increase in the

prevailing rate of compensation of Riveters and other occupational classifications at piece work rates might be anticipated and both the Union and the Company concerned are wholly cognizant of the reasons why the Committee was never established.

In all the circumstances of this case, this Board does not consider that the employees affected, suffered any "gross inequality or gross injustice" by reason of the fact that no committee such as that intimated was ever set up, and in any event, this Board operating under the provisions of P.C. 9384 as now amended, could not and would not direct retroactive adjustment for the period April 16, 1943, to February 11, 1944, because it is not competent for the Board to direct retroactivity for any period prior to February 15, 1946.

Therefore, the application of the Union is disallowed.

June 11, 1946.

Re: The Employers' Syndicate of the Quebec Printing Industry, Inc. and Catholic Syndicate of Printers and Bookbinders of Quebec Inc.; International Union of Pressmen and Stereotypers, Local 152; International Typographical Union of Quebec, Local 302, and International Union of Bookbinders, Local 152.

Reasons for Decision

This is an appeal by the Employers' Syndicate from a decision of the Regional War Labour Board for Quebec, dated February 12, 1946. The only question in this appeal is with respect to the effective date of the decision of the Regional Board.

Pursuant to a collective agreement entered into between the Employers' Syndicate and the above named Unions, and in pursuance of the Collective Agreement Act of the Province of Quebec, the said collective agreement was promulgated by Provincial Order in Council No. 3022 of October 21, 1943, amended by Order No. 895 of March 18, 1944. The said Order in Council provides that it may be terminated by notice in writing by either

of the parties giving to the other sixty days' notice prior to the expiry of the Order in Council. The said Order in Council was to remain in effect normally until October 15, 1945. Pursuant to the provision of the said Order in Council with respect to the giving of notice of termination, the Unions notified the Employers' Syndicate between August 10 and August 15, 1945, that they would not renew the collective agreement. In view of the fact that the parties were negotiating toward a new agreement, the Parity Committee of the Graphic Arts Industry of Quebec and District, to which the employers and employees belong, adopted a joint resolution on September 28, 1945, requesting the Provincial authorities to extend the Order in

Council from October 15, 1945, to November 15, 1945, pending the outcome of their negotiations on the understanding that the retroactive date of the new agreement would be November 1, 1945. Early in November, 1945, the Department of Labour for the Province of Quebec notified the Unions that the notice that it had given in August was invalid. The invalidity was occasioned by a technical defect in the notice. Upon receiving this ruling from the Provincial Department of Labour, the Employers' Syndicate at first stated that the Order in Council No. 3022 was automatically renewed and that, therefore, there was no need for further negotiation. Shortly thereafter, however, they did resume their negotiations with the Unions, and a mutual agreement was concluded. The agreement was approved by the Regional War Labour Board for Quebec as a result of the joint application of the parties. The only point of difference between the parties was, however, in respect to the date upon which such new agreement was to become effective. The Union, relying upon the joint resolution of September 28, 1945, contended that November 1, 1945, was to be the effective date, while the Employers' Syndicate stated that January 1, 1946, should be the effective date as it was the commencement of the new Fiscal Year for the employers. The Regional War Labour Board, after considering all circumstances of the application, upheld the

Unions' contention and made its Order retroactive to November 1, 1945.

Section 30 (2) of the Wartime Wages Control Order, as amended, gives to Regional War Labour Boards the power of discretion in deciding the effective date of any Order made by them. It follows, therefore, that this Board may not lightly interfere with the discretion of the Regional Board if the Regional Board does not appear to have been governed by any misconception or misunderstanding of the case. In the case of Messrs. Weiller and Williams Company Limited, Saskatoon (LABOUR GAZETTE, January, 1945, page 27), we said:—

The matter of retroactivity is discretionary (Section 30 (2) of P.C. 9384) and, as a rule, this Board does not substitute its discretion for that exercised by a Regional Board, unless it be demonstrated that the latter proceeded upon some material error.

The Regional War Labour Board gave very careful consideration to the question of retroactivity. Indeed, at the request of the Employers' Syndicate, it reconsidered its decision, but did not see fit to alter it. No evidence has been presented to us which indicates that the Board proceeded on other than proper principles. There is no evidence of a positive character that that discretion was wrongly exercised.

The appeal must, therefore, be dismissed. There will be a Finding and Direction issued accordingly. June 6, 1946.

Re: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company.

Reasons for Decision

This is an application by the Brotherhood on behalf of occupational classifications engaged in Coal Dock operations at Fort William, Ontario, for a direction to the Company to establish an eight (8) hour day and to pay rate of time and one-half for all time required to be worked in excess of eight (8) hours per day, and rate of double time for work required to be performed on Sundays and seven (7) designated Statutory Holidays.

The payment of double time rate for work required to be performed by such occupational classifications on Sundays and Statutory Holidays was a condition already in effect before November 15, 1941, and, therefore, this part of the application does not need to be dealt with by the Board.

It is generally established practice under other Railway Wage Agreements to pay rate of time and one-half for time required to be worked by employees in excess of eight (8) hours per day. This condition has likewise become more or less generally established practice in most industries and is particularly prevalent in industries in the region of the Lakehead, Fort William and Port Arthur. In these circumstances it is the view of the Board that rate of time and one-half should be paid to the occupational classifications covered by the application for time required to be worked in excess of eight (8) hours per day.

There will be Finding and Direction accordingly.

June 11, 1946.

Re: Norton Company of Canada, Limited

Reasons for Decision

The Company applied to the Regional War Labour Board for Ontario for permission to increase rates for its Senior Abrasive Technicians and a Pulpstone Technician. The Regional Board by its decision dated March 20, 1946, dismissed the application. Later, that Board granted leave to appeal from the decision.

The duties and responsibilities of the Company's Senior Abrasive Technicians include the sale of various types of grinding wheels and abrasive products, and the training of industrial distributors' salesmen in the sale, service and application of the Company's products. These technicians are also required to recommend to the end users of the Company's products, the methods by which the greatest use of those products may be had. The incumbents in this classification are not above the rank of foreman.

The evidence before us is to the effect that the Company's Senior Abrasive Technicians are paid a salary and a bonus or commission based on sales. The salary has continued at the same rate since 1936. The amount earned by bonus or commission on sales has fluctuated from year to year.

The Company's most nearly comparable competitor has employees engaged in the same type of work as that performed by the technicians in question. We find that the salary paid by the Company to the employees in this classification is low in comparison with the salary paid by the competitor. Incidentally, the competitor also pays a bonus or commission to its Technician.

We have come to the conclusion that the increase requested by the Company for its Senior Abrasive Technicians should be allowed.

The case of the Pulpstone Technician is different from that of the Senior Abrasive Technician. The Company has one employee in that classification. He was appointed to

that position on December 1, 1941. As of the basic period November 15, 1941, the position was vacant, the previous incumbent having been promoted to the position of sales manager on July 1, 1941. The Company asks permission to pay the present incumbent the same salary as that paid his predecessor in 1941.

In Wartime Wages Control Order P.C. 5963, of July 10, 1943, it was provided that where, by reason of a temporary vacancy in any occupational classification, no range of wage rates or single wage rate was, on November 15, 1941, being paid by an employer in respect thereof, a range of such occupational classification within a period of four years from the said date, shall for purpose of this Order, be deemed to be the range of wage rates or single wage rate paid by the employer on such date and to form part of the basic scale of wage rates paid by such employer on November 15, 1941.

The Company did not choose to pay the present incumbent the rate established for his predecessor, but went to the Regional Board and obtained authority to pay a lower rate for the period during which the employee would acquire experience necessary to fit him for the job.

It is our view that the Company, by obtaining such authority, became entitled to establish and have a range of rates, the low of which was authorized by the Regional Board as aforesaid, and the high, the rate paid to the previous incumbent. In any event, it is our opinion that it would be fair and reasonable and consistent with the purpose of the Order having regard to all the circumstances to recognize and confirm the range of rates above referred to as being applicable to the Company's Pulpstone Technician.

The appeal is allowed. There will be a Finding and Direction giving effect to this Decision.

June 13, 1946.

Re: Prudential Insurance Company of America

Reasons for Decision

This is an appeal from the Finding and Direction of the Regional War Labour Board for Manitoba, dated February 20, 1946, by which Finding and Direction the said Regional Board held the occupational classification of "Assistant Superintendent" to be above the rank of foreman or comparable rank within the meaning of the Wartime Wages Control Order, 1943.

We have given careful consideration to the nature of the duties which are required to be

performed by the Company's "Assistant Superintendents". These duties are not of an executive character. Indeed, the duties of the "Assistant Superintendent" are those of a foreman. He has general supervision over the Company's agents in his district; he instructs these agents and assists them in the performance of their duties, which include the sale of new insurance and the collection, conservation and servicing of insurance that is in force. In the absence of one of his agents, the "Assistant Superintendent" is

required to perform, temporarily, the duties of such absent agent. It might also be pointed out that identical applications were made to the other Regional War Labour Boards, and in no case, with the exception of the present one, was the "Assistant Superintendent" held to be above the rank of foreman or comparable rank.

In the determination of the status of the "Assistant Superintendent", we have had an opportunity of examining the formal contract which an "Assistant Superintendent" is required to enter into, which contract specifies his rights and responsibilities.

As a result, we are satisfied that the Company's "Assistant Superintendents" are not above the rank of foreman or comparable rank.

Having thus disposed of the question of status, there remains to be considered the substantive part of the Company's application, wherein they requested an increase in the basic wage rates for their "Assistant Superintendents". We are satisfied that the Company's application for an increase in the base rates for "Assistant Superintendents" is reasonable. Comparison has been made with other insurance companies carrying on business in Manitoba, and the rates requested are not only in line with competing insurance firms but, in some cases, are somewhat lower. In the light of these circumstances, it is considered reasonable to approve the requested rates.

Finding and Direction will be issued accordingly.

June 13, 1946.

Re: Prudential Insurance Company of America

Reasons for Decision

This is an appeal from the Finding and Direction of the Regional War Labour Board for Ontario, dated March 20, 1946, by which Finding and Direction the said Regional Board refused the Company's application for an increase in the wage rates for the occupational classification of "Assistant Superintendent".

The Assistant Superintendent's wage rates comprise a single rate and certain commissions. Comparable employers in Ontario maintain substantially the same method of remunerating their Assistant Superintendents.

The current single rate and the rates of the commissions now in effect for the Company's said employees are low in comparison with the rates and commissions presently prevailing, for Assistant Superintendents in the employ of comparable employers in Ontario.

In view of the above circumstances, we consider it reasonable to allow the Company's appeal and to approve the requested rates.

Finding and Direction will be issued accordingly.

June 13, 1946.

Re: Prudential Insurance Company of America

Reasons for Decision

This is an application for leave to appeal and an appeal from the Finding and Direction of the Regional War Labour Board for Alberta, dated April 4, 1946, whereby the said Regional War Labour Board refused the application of the Company for an increase in wage rates for the occupational classification of "Assistant Superintendent". Leave to appeal was also refused by the said Regional War Labour Board.

The facts in this case are identical with those in the case of Prudential Insurance Company of America. The two cases are similar in all respects.

For the reasons enunciated in our Reasons for Decision, dated June 13, 1946, in the case of Prudential Insurance Company of America, we grant the Company's application for leave to appeal and allow the said appeal.

Finding and Direction will be issued accordingly.

June 13, 1946.

Re: Canadian National Carbon Company, Limited, Toronto, Ontario

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for Ontario, dated May 14, 1946, leave to appeal having been granted by the Regional Board.

The Company's application leading to the said decision requested authority to make certain adjustments in base rates and to make

certain modifications in overtime conditions coincident with a change in the number of hours worked per week. The Regional Board, without giving reasons, dismissed the application.

It is essential, in the interests of clarity, to set forth in some detail, the circumstances leading to the making of the application to the Regional Board. In the early part of

1932 and continuing until February 1, 1941, the Company's scheduled work week for hourly payroll employees consisted of 43½ hours, made up of 5 days of 8·7 hours each. In February, 1941, the work week for those employees was extended to 48 hours, a six day work week. This extension, the Company explains, was made as a temporary measure and introduced mainly to conform to the announced government policy of encouraging longer work weeks in order to assist in meeting the overall industrial manpower requirements of Canada. At the time when the extension was made, the Company gave an undertaking to its employees to return to a five day week as soon as circumstances and conditions permitted.

The Company's officers are of the opinion that a cut-back in hours should be implemented at once, not only to satisfy the Company's undertaking to its employees, but also to avoid or at least minimize the laying off of other employees in order to meet its obligations under Reinstatement in Civil Employment Act (1942), to those of its 170 employees who, during World War II, became members of His Majesty's Armed Forces, most of whom have since returned to service with the Company. To maintain the highest possible level of employment consistent with its requirements under existing conditions, the Company proposes to adopt a 40-hour week, five days of 8 hours each.

The adoption of a 40-hour week involves a reduction in work time of 16·7 per cent when expressed as a percentage of the present 48 hour week. The Company takes the position that its employees should not bear the full cost of the change and to meet the employees part way, is prepared to provide an average increase in rates of approximately 10·4 per cent overall, i.e. 9·2 per cent for time rates and 11·1 per cent for piece rates. By converting the proposed percentage increases for time rates into cents per hour, we find that they range from 5c to 9c an hour, with an average of 7·8c an hour.

What we are called upon to determine in this appeal is whether the proposal is one which can be regarded as coming within Section 20 (1) (a) of Wartime Wages Control Order, 1943, as amended by Order in Council P.C. 348. To succeed in this appeal, the Company must show either that the wage rates for the occupational classifications are *low* when compared with the wage rates generally prevailing for the same or similar occupational classifications in the Toronto area, or that the proposed adjustments are *reasonable* in the circumstances of this case and consistent with the maintenance of existing prices of

the goods and services which the Company sells.

Little, if any, attempt was made to justify the proposal on the plea that existing wage rates are below prevailing rates. We recognize that it would be virtually impossible to bring the case within the first part of 20 (1) (a) because nearly all of the 150 occupational classifications or grades of classifications involved are peculiar to the Company's organization. Some evidence was, however, submitted in support of such plea as it concerns a few classifications which are common in other industries. That evidence, while not of itself conclusive, lends some support to the plea, in the alternative, that the Company's proposal is reasonable.

We have compared the Company's wage schedule of August, 1939, with the proposed schedule. The increases involved in the proposed rates over the 1939 rates are comparable with the increases in wage rates which have been made since August, 1939, in the majority of manufacturing establishments whose affairs have come to our notice. That seems to be a further ground for saying that the Company's request is reasonable.

When dealing with a case such as this, we regard it as our duty to ascertain whether the goods being produced by the establishment concerned are in normal supply. It must be remembered that wage stabilization forms part of Canada's anti-inflation programme. That programme was adopted as a means of controlling prices of goods which fell into short supply as a result of the diversion of industrial output from consumer goods to munitions and supplies. Many lines of consumer goods, are still in short supply. To get those goods into normal supply seems to be the most effective way of beating off the ravages of an inflation. To us it has always seemed inconsistent to look with favour on a reduced work week in an industry and at the same time complain about the scarcity of goods produced by that industry. There is a presumption that a reduction in the number of hours worked lowers production and postpones the day when goods will be in normal supply. It is difficult to find grounds for saying that it would be *reasonable* to approve wage increases merely for the purpose of maintaining take-home pay consequent upon a reduction in the work week of any establishment engaged in producing goods that are, nevertheless, in short supply.

We have applied the aforementioned test to this case. We find that the goods such as the Company produces are in normal supply. The danger of any rise in prices of these goods is remote. Moreover, and in any event, we have the Company's assurance that the

increased cost which would result from the proposed increases in wage rates can be borne by it out of sales of its goods at existing prices. These factors we regard as further grounds for saying that the Company's request is reasonable.

Having disposed of the main issue involved in this case in the manner indicated above, we see no reason for withholding approval on the requests concerning weekly and monthly

rated employees and concerning overtime conditions as those conditions apply to hourly and piece rated employees.

The appeal is allowed. There will be a Finding and Direction giving formal effect to this decision. The adjustments involved in this case may be implemented by the Company with effect not earlier than the date of this decision.

June 19, 1946.

Re: Dominion Oxygen Company Limited and Prest-O-Lite Company of Canada Limited, Toronto, Ontario

Reasons for Decision

This is an appeal by the Companies from a Decision of the Regional War Labour Board for Ontario, dated May 14, 1946, leave to appeal having been granted by the Regional Board.

The Companies' application leading to the said Decision requested authority to make certain adjustments in base rates and to make certain modifications in overtime conditions coincident with a change in the number of hours worked per week.

Except in respect of certain minor details which need not here be mentioned, the factors

involved in this case are the same as those outlined in our Decision in Canadian National Carbon Company, Limited, dated June 19, 1946.

This Board's reasons for allowing the appeal in the Canadian National Carbon case apply with equal force in this case and we allow this appeal accordingly.

There will be a Finding and Direction setting out in detail the items for which approval is given as requested by the Companies.

June 19, 1946.

Re: The Employers' Association of Master Barbers and Hairdressers of Quebec, Inc., and the Syndicate of Journeymen Barbers of Quebec, Inc.

Reasons for Decision

The Employers' Association, described above, asked for leave to appeal and appeals from the Finding and Direction of the Regional War Labour Board for Quebec, dated January 22, 1946. The Regional Board, by the said Direction, ordered the Employers' Association, *inter alia*, to increase from 40 per cent to 55 per cent the commission payable to regular employees (barbers) on the receipts from their work over \$29 per week. The Employers' Association ask that the commission remain at 50 per cent.

A brief summary of the relevant facts of the case appears to be in order. Pursuant to a collective agreement entered into between the Employers' Association and the Union, the barbers of Quebec, under the authority of the Collective Agreement Act, Revised Statutes of Quebec, Chapter 163, as amended, issued Order in Council 3365. The said Order in Council provides for the *minimum* wage rates to be paid in certain zones to journeymen barbers in the City of Quebec and district. It was argued on appeal that barbers in other districts in the Province of Quebec are, in pursuance of other Orders in Council relating

to the Barber and Hairdresser Trades, paid higher *minimum* rates than those prescribed for Quebec City and district.

The submissions before this Board dealt exclusively with the question of inequalities in the *minimum* rates as between districts. It should be borne in mind that War Labour Boards are not concerned with *minimum* rates; rather are they concerned with *actual* prevailing rates. We can do no better than to refer to the decision of this Board in the case of Printing Trades of Montreal (L.G., January, 1946, p. 37), where a somewhat similar appeal was entertained by the Board. In that case we said, "We pointed out during the hearing and now repeat, that the fixing of *minimum* rates, as such, forms no part of the function of this Board. We are required to deal with *actual* rates." The opinion expressed in the Printing Trades' appeal applies with equal force in the present appeal. No attempt was made to prove that the *actual* prevailing rates in the City of Quebec and District are lower than the *actual* prevailing rates in other districts. The Board merely referred to the various Orders in Council relating to barbers and hairdressers

and was asked to observe the differences in the *minimum* rates established by the Provincial Decree.

In view of the fact that there is no evidence before the Board that the *actual* prevailing wage rates for journeymen barbers in Quebec City and District are lower than the *actual* prevailing wage rates in other districts in the Province of Quebec, the Board

is of the opinion that it has not been proved that there should be any change in the wage structure. Consequently, we deem it advisable to grant the application of the Employers' Association for leave to appeal, and to allow such appeal.

Finding and Direction will be issued accordingly.

June 20, 1946.

Re: Imperial Oil Limited and Joint Industrial Council of Imperial Oil Limited, Sarnia Refinery

Reasons for Decision

With leave of the Regional War Labour Board for Ontario, the Council appeals from a Decision of that Board, dated April 12, 1946. The Regional Board dismissed an application made by the Company and the Council for permission to increase wage rates and make certain changes in overtime conditions coincident with a change in the number of hours worked per week. The Company has indicated its concurrence in the action taken by the Council in instituting this appeal.

In 1932, the Company established a 40-hour week for its hourly rated employees at its Refineries located at or near Sarnia, Regina, Montreal and Dartmouth. On March 1, 1941, the work week for those employees was increased to 44 hours. At the time when the work week was extended, the Company gave its employees an undertaking that it would revert to the 40-hour week when the circumstances permitted.

In due course, following the cessation of hostilities of World War II, the Company and the Council decided to revert to the 40-hour week. We have no doubt but that the decision was largely influenced by the fact that it was necessary to make provision for the reinstatement of veterans, and at the same time keep in employ as many of the other employees as would be possible under the circumstances. In this connection, it is interesting to note that more than 600 of the Company's employees from the Sarnia plant became members of His Majesty's Armed Forces during World War II,

and of that number, 400 have already been reinstated in employment, and another 50 are expected to return to their former jobs.

The Company agreed with the Joint Industrial Councils at the four Refineries to seek permission from the appropriate Regional Boards to increase wage rates by amounts equal to 10 per cent so that the income of the employees would not be lessened by reason of the reduction in hours worked. The applications were made to the Regional Boards and the same were approved in all cases, except the one now before us.

What is requested in this case is that we approve increases in the wage rates which have been in effect ever since 1937, subject, of course, to the merging of the cost-of-living bonus with those rates. In other words, since 1937 there have been no increases in wage rates made or granted for the employees concerned in this application. It is hardly necessary to remark that the foregoing fact is most unusual when we take into account the wage adjustments which have been made in other industries since that year.

We regard the request made by the Company and the Council as reasonable. The Company has given its undertaking that the increases proposed will not be used as a ground for any increase in the price of its products.

The appeal is allowed and the adjustments may be made at any time after June 20, 1946. Finding and direction will be issued accordingly.

June 20, 1946.

Re: Imperial Oil Limited

Reasons for Decision

This is an appeal by the Company from the decision of the Regional War Labour Board for Ontario, dated April 12, 1946, wherein the Regional Board dismissed the Company's application for permission to change the conditions of employment (hours of work) of its weekly and monthly rated plant and office

employees at the Sarnia Refinery. Leave to appeal was granted by the Regional Board.

The application was made to the Regional Board at or about the time when the Company and the Joint Industrial Council sought approval of the plan to increase by 10 per cent, the wage rates of its hourly rated employees at the same Refinery, coincident with the reduc-

tion of the work week from 44 hours to 40 hours.

The application in this case covers approximately 370 employees. Some of these employees are at present working 48 hours per week, some 44 and others 40. We shall deal with each of such groups separately and in the order above indicated.

The employees in the occupational classification of Process Foreman comprise the first group. Up until March 1, 1941, their regular work week was 42 hours. On that date, their work week was increased to 48 hours. To compensate them for the six extra hours, their wage rates were increased proportionately. The Company wants to restore the 42 hour week for these employees and in order that their wage rates be maintained in proper relation to the wages of the hourly rated employees, the Company asks permission to adjust the foreman rates. Put briefly, the adjustment involves, firstly, the cancellation of the aforementioned proportionate increase. This would produce a figure equal to the 1941 rate, plus the cost-of-living bonus, subsequently incorporated. To that figure, the Company proposed to add an amount equal to 10 per cent thereof.

The adjustment proposed for the Process Foreman is in line with the adjustment which we have already approved for the hourly rated employees at Sarnia.

Other weekly and monthly rated plant employees comprise the group working 44 hours per week. Prior to March 1, 1941, they worked 40 hours per week. In the case of the salaried office employees, the weekly working schedule was increased from 35 to 40 hours as of April 1, 1943. The employees in each of these two groups received proportionate increases in wages or salaries to compensate them for the extra hours worked.

The Company asks permission to reduce the work week of the two groups referred to in the last above paragraph, to 40 and 36½ hours respectively. Both adjustments are within the formula approved by us in the case of hourly rated employees.

It has been shown to us that the employees in the same groups located at Regina, Montreal and Dartmouth have already been given the same conditions of employment as to hours of work as those which the Company proposes here. It has also been shown to us that it is the established practice of the Company to maintain uniformity of rates and working conditions for the employees at all the Refineries.

Having regard to all the circumstances of this case, we are of the opinion that it would be fair and reasonable to approve the proposals herein. We allow the appeal and there will be a Finding and Direction accordingly.

June 24, 1946.

Re: Modern Press Limited, General Printing and Bookbinding Limited and Local 663, International Typographical Union, Local 206, Saskatoon Printing Pressmen and Assistants' Union and Local 85, International Brotherhood of Bookbinders.

Reasons for Decision

The Companies are job printers carrying on business in Saskatoon, Saskatchewan. The Unions represent employees of the Companies. Collective agreements were entered into between these parties and in due course they applied jointly to the Regional War Labour Board for Saskatchewan for permission to implement the terms of the agreements insofar as the terms concerned changes in terms of employment. The Regional Board dismissed the applications, but granted leave to appeal.

According to the evidence submitted to us, the employees are paid at weekly rates, and at the present time, are on a regular work week of 44 hours. The parties agreed that the work week would be reduced to 40 hours, and that there would be no reduction in the weekly rate of pay.

This case comes under Section 20 (1) (b) (i) of Wartime Wages Control Order, 1943. What is asked of us is that we authorize an alteration of a term of employment which has the

effect of increasing, indirectly, the single rates established under the Order for the Companies' occupational classifications of employees. Any such authorization must be granted "in such manner . . . as in the opinion of the National Board is fair and reasonable and is consistent with, and will give effect, to the purposes of this Order, having regard to all the circumstances deemed by it, in its discretion, to be material".

One of the main purposes of the Order is to maintain stability in prices and prevent increases in the general cost of living. Put in another way, it can be said that it is the duty of War Labour Boards to administer the said Order in such manner as will prevent inflation.

Any direction which would have the effect of increasing the amount of money that goes as wages into the hands of employees, might have some inflationary effect. Approval of the applications in this case would not have such effect. In saying this, we are not unmindful of the terms respecting overtime. In this con-

nection, however, it has been shown that additional employees have been engaged. This will have the effect of eliminating much of the overtime which has been paid when the employees were on a 44 hour week. It is also noted that the parties have agreed to an arrangement whereby the work days will be staggered between the employees, so that the employers may operate their plants on six days of 8 hours each at straight time. There will be no Saturday overtime, as heretofore paid, unless, and to the extent, that the employees work more than 8 hours on that day.

It cannot be said that the proposal is one which runs counter to the purposes of the Order, having regard for take-home pay.

It is our understanding that certain decreases in wage rates were made by the Companies during the economic depression of the early thirties, and that those losses were made up only when the cost-of-living bonus was merged with the wage rates in February, 1944. It was stated that no general increases have been granted to the employees in question, a fact which we regard as being of some considerable importance.

The Regional Board quite properly took the precaution to warn the employers that if the applications were authorized, the increased costs resulting from the implementation of the authority could not be used by the Companies

as a ground for increasing the prices of their services. Indeed, the Regional Board asked the Companies to give undertakings that such increased costs would not be so used. General Printing and Bookbinding Limited gave the undertaking. Modern Press Limited stated that it was not prepared to give such undertaking.

The warning and the request for the undertaking, referred to in the preceding paragraph, indicates that the Regional Board was fully aware of the duties it must assume in dealing with the case.

Having regard for all the circumstances of the case, we have come to the conclusion that it is fair and reasonable and consistent with the purpose of the Order to authorize the Companies to give effect to the terms of the aforementioned collective agreements. The appeal is therefore allowed. This authorization is given upon the distinct understanding and condition that any increased costs resulting from the implementation of the authorization will not be used by the Companies or either of them, as a ground or basis for any increase in the presently existing price or prices of their services or of the services of either of them.

There will be a Finding and Direction accordingly.

June 25, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for two days during the month of June. During this period the Board received eleven applications, held four hearings, issued two certificates designating bargaining representatives, ordered two representation votes and rendered decisions in two appeal cases.

Certificates Issued

Two applications for the certification of bargaining representatives were approved by the Board and certificates issued as below:—

1. Messrs L. McDermott, C. J. McDougall and M. A. Roberge and the *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 56*, for employees employed by *F. J. Murray, Kirkland Lake, Ontario*. The chief clerk was excluded from the bargaining unit.*

2. Messrs J. L. Pateman and A. Mose and the *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* for employees in the Superintendent's Office of the *Canadian Pacific Railway Company, Regina, Saskatchewan*, classified as clerk stenographer, maintenance-of-way clerk and clerk.**

Representation Votes Ordered

1. *Canadian Brotherhood of Railway Employees and Other Transport Workers and Bessborough Hotel, Canadian National Railways, Saskatoon, Saskatchewan*. (L.G., June, 1945, p. 751.) Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Manitoba, was appointed by the Board to act as Returning Officer in a vote of certain employees of the Bessborough Hotel, Canadian National Railways, Saskatoon, Saskatchewan.

* Following investigation of the application.

** Following investigation of the application and a representation vote.

2. *Quebec Federation of Professional Employees and Bell Telephone Company of Canada, Montreal, Quebec.* (L.G., December, 1945, p. 1788). The Board ordered a representation vote of employees in the Department of the Vice President (Engineering), the Engineering Department, Eastern Area, and in the division plant engineering groups of the Eastern Area Plant Department of the *Bell Telephone Company of Canada, Montreal, Quebec.*

Applications for Certification Received During the Month of June

1. *Canadian Air Line Navigators' Association* on behalf of Navigating Officers of *Trans-Canada Air Lines, Winnipeg, Manitoba.*

2. *Order of Railway Conductors* on behalf of Road Train Conductors employed by the *Canadian Pacific Railway Company (Eastern Lines) Montreal, Quebec.*

3. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of clerks, etc. employed by the *Toronto Hamilton and Buffalo Railway, Hamilton, Ontario.*

4. *Brotherhood of Railroad Trainmen* on behalf of the Road Train Conductors employed by the *Canadian Pacific Railway Company (Western Lines) Winnipeg, Manitoba.*

5. *Canadian Seamen's Union, Pacific Coast District*, on behalf of the unlicensed crew members in deck, engine room, and stewards'

departments of vessels operated by *Union Steamships Limited, Vancouver, British Columbia.*

6. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on the vessel of *Syclo Chief Limited, Montreal, Quebec.*

7. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on the vessel of *Syclo Warrior Limited, Montreal, Quebec.*

8. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of clerks in the Superintendent's office of the *Canadian Pacific Railway Company, Saskatoon, Sask.*

9. *International Longshoremen's and Warehousemen's Union Local 507*, on behalf of elevator employees, employed by *Searle Grain Company Limited, New Westminster, B.C.*

10. *International Longshoremen's and Warehousemen's Union Local 507*, on behalf of elevator employees, employed in elevators Numbers 1 and 2 of the *Alberta Wheat Pool, Vancouver, B.C.*

11. *International Longshoremen's and Warehousemen's Union Local 507*, on behalf of elevator employees of the *Pacific Elevators Limited, Vancouver, B.C.*

Decisions of Board in Appeal Cases

The Board issued Reasons for Judgment in three cases, the texts of which are given below:—

Between: Quebec Federation of Professional Employees, Unit No. 3, Applicant, and The Bell Telephone Company of Canada, Respondent

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Deschamps, Mosher, and Taylor.

Reasons for Judgment

1. This is an application made by Unit No. 3, Quebec Federation of Professional Employees for certification of bargaining representatives of employees in the Department of the Vice-President (Engineering), the Engineering Department, Eastern Area, and in the Division Plant Engineering Groups of the Eastern Area Plant Department of the Bell Telephone Company of Canada.

In its application, as amended, during the course of the hearing before this Board, the employees in the said Company establishments whom the applicant sought to have certified as an appropriate bargaining unit were described as all professional engineers, as that term is defined in the Professional

Engineers Act, RSO 1937 c. 237, practising as professional engineers in Ontario and all civil engineers as that term is defined in the Civil Engineers Act RSQ 1941 c. 270, practising as civil engineers in Quebec other than those who are above the rank of division plant engineers.

The application was opposed by the Company on a number of grounds.

STATUS OF PROFESSIONAL EMPLOYEES

2. The Company urged as a preliminary objection that a ruling made by this Board in April, 1944, to the effect that persons employed in a professional capacity should be considered as employed in a confidential capacity, is incapable of later revocation by the Board and effectively excludes all such employees from collective bargaining under P.C. 1003.

The Board entertains no doubt as to its authority to revoke, amend or vary any rule

or regulation made by it at any time including the ruling which has been referred to. However, since the issue has been raised, the Board considers it advisable to outline the policy of the Board in relation to persons employed in a professional capacity.

Following the inception of the Board's operations in April, 1944, the Board, upon the request of the Minister of Labour, heard representations made by the major professional engineering and other applied science organizations in Canada to the effect that professional men be excluded from the operation of P.C. 1003 by the amendment thereof. Those speaking for these organizations claimed to represent the views of the employee professional men in their organizations.

The Board considered that any final conclusion as to the advisability of the amendment of the Regulations requested should be deferred until there had been greater opportunity for employees represented by these organizations to observe the operation thereof. In view of the weight and apparent unanimity of opinion expressed, however, the Board, following upon that hearing, approved in April, 1944, as a temporary measure and subject to later review, the provision that persons employed in a professional capacity should be considered as employed in a confidential capacity. This provision, while in effect, was applied so as to exclude persons employed in a professional capacity from bargaining units certified by the Board.

In January, 1945, the Board held a further hearing to receive representations on the status of persons employed in a professional capacity. At this hearing, the representatives of the professional organizations modified the position which they had taken at the first hearing in requesting the exclusion of professional employees from the operation of collective bargaining and instead requested legislation which would assure recognition to groups of professional employees as appropriate collective bargaining units.

In view of these further representations, the Board, on February 13, 1945, reviewed its policy then in effect with reference to professional employees and in substitution of the earlier statement provided that from that date the Board would be prepared, *in proper cases*, to certify bargaining representatives for units consisting of employees engaged in a professional capacity.

In the opinion of the Board, there is a clear distinction between a finding or order made by the Board with respect to the status of an employee on a specific application coming before it under the Regulations and a rule,

regulation or resolution of general application made by the Board.

In the latter case the Board has undoubted authority to revoke or amend, from time to time, as it deems advisable.

STATUS OF APPLICANT

3. The Quebec Federation of Professional Employees qualifies as a trade union and Unit No. 3 qualifies as a local branch chartered by and in good standing with the provincial organization.

4. In addition to the foregoing objections, the Company at the hearing objected to the bargaining unit as defined by the applicant on the ground that the effect of establishing such a bargaining unit would be to exclude, because of lack of professional educational qualifications, other technical and engineering employees in its engineering establishments engaged in the same class of technical and engineering work and working under the same conditions as professionally qualified engineers employed therein. The Company also sought to establish that the group of professional engineers classified in the company's organization charts under title of engineering assistants were employed as technicians rather than as professional engineers and pointed out that there was a considerable number of non-professionally qualified employees doing the same work. The Company contended that technicians should be included in the unit but if this were not done then that all professional engineers classed as engineering assistants should be excluded.

Following the hearing the parties conferred in an effort to arrive at an agreement on the matters at issue and requested the Board to defer disposition of the application in the meantime.

As a result of these discussions the applicant has now amended its application for certification by asking for certification of bargaining representatives for a bargaining unit consisting of all employees engaged in the Department of the Vice-President (Engineering), in the Engineering Department, Eastern Area, and in the Division Plant Engineering groups of the Eastern Area Plant Department of the Bell Telephone Company designated by the following titles, viz: engineer, assistant engineer, engineering assistant (exclusive of those in this title already included in the certification of the Plant Employees Association, dated February 3, 1945) technical assistant and staff assistant and all engineering employees in rank above the title engineer other than those whom the applicant conceded in the course of the hearing before

the Board should be excluded as having authority to hire and discharge.

The company wants an engineering plant unit exclusive of clerical employees while the applicant asks for an engineering craft unit comprising engineers and their technical assistants.

In our opinion, like considerations apply in general in determining an appropriate bargaining unit comprising or including occupational classifications requiring professional skills as apply in determining an appropriate craft unit comprising or including occupational classifications requiring particular artisan skills. An appropriate unit should include the occupational classifications engaged in common employment in the same line of skilled work and in which there is by reason of training or experience and established practice the normal opportunity for promotion from the lowest to the highest occupational classifications comprising the professional or professional and technical group.

In the present instance and having regard to the particular organization structure of this Company, the Board is of opinion that a bargaining unit comprising employees performing the duties of engineering assistant, technical assistant, student engineer, assistant engineer and engineer below the rank of division plant engineer employed in the Department of the Vice-President (Engineering), in the Engineering Department, Eastern Area, and in the Division Plant Engineering groups of the Eastern Area Plant Department of the Company (but excluding therefrom those employees exercising supervisory and confidential functions as hereafter described) constitutes an appropriate bargaining unit; provided, however, that where in any case employees in the bargaining unit so established have already been included in the plant bargaining unit for whom the Plant Employees' Association was certified by the Board under date of February 3, 1945, such employees shall, pending any such modification of the latter unit as may be made at an appropriate time, be deemed to be in the plant bargaining unit so established rather than in the unit herewith defined.

Employees in the designated classifications set out in Schedule I hereto are excluded on account of confidential or supervisory duties.

In view of the changes in the constitution of the bargaining unit a representation vote is ordered. The matter is referred to the Chief Executive Officer to complete the necessary

arrangements for the vote in consultation with the parties.

(Sgd.) A. H. BROWN,
Vice-Chairman
for the Board.

A. L. FLEMING, Esq., K.C.

R. C. HARVEY-JELLIE, Esq., K.C.

Dated at Ottawa, June 17, 1946.

Schedule I

Department of the Vice-President Engineering:

Vice-President
Inventory and Cost Engineer
Architect
General Plant Extension Engineer
Transmission and Foreign Wire Relations
Engineer
Staff Engineer
Toll Plans Engineer
Equipment Standards and Maintenance
Engineer
Outside Plant Standards and Maintenance
Engineer
Supervising Engineer (Dial, Power and Test-
room Operation)
Supervising Engineer (Stations and P.B.X)

Engineering Department, Eastern Area:

Chief Engineer
Plant Extension Engineer
Transmission Engineer
Buildings Engineer
Equipment Engineer
Outside Plant Engineer
Program and Cost Studies Engineer
Budget and Records Supervisor
Foreign Wire Relations Engineer
Toll Plans Engineer
Transmission Practices Engineer
Radio Telephone Engineer
Toll Equipment Engineer
Power Engineer
Local Equipment Engineer
Exchange Plant Engineer
Toll Plant Engineer

Eastern Area, Plant Department, Montreal

Division, Engineering:
Division Plant Engineer
Right of Way Supervisor
District Plant Engineers
Transmission Engineer
Equipment Engineer
Special Studies Engineer

Eastern Area, Plant Department, Eastern Division, Construction and Plant Engineering:

Superintendent of Construction and Plant Engineering
Division Plant Engineer
District Plant Engineers

Special Studies Engineer
Transmission Engineer
Equipment Engineer
Division Superintendent of Toll Cable Plant
Toll Cable Engineer

Between: Toronto Hydro-Electric System of Employee-Professional Engineers and Assistants, Unit No. 1, Appellant (Petitioner), and Toronto Hydro-Electric System, Respondent.

The Board consisted of the Vice-Chairman and Messrs. Best, D'Aoust, Deschamps, Mosher and Taylor.

Reasons for Judgment

This is an appeal from the dismissal by the Ontario Labour Relations Board of an application for certification made by a local unit of the Employee-Professional Engineers organization for certification of employees of the Toronto Hydro-Electric System engaged in the practice of professional engineering or who are employed in training for professional engineering. The Ontario Board dismissed the application on the ground that in view of earlier declarations of policy and rulings of this Board it was uncertain as to the present attitude of this Board toward the inclusion of professional employees in bargaining units.

The Ontario Board stated further that if free to deal with the application it would find that the applicant was a trade union and that the bargaining representatives were regularly and properly elected by the employees in a bargaining unit "consisting of all persons practising professional engineering or engaged in training for professional engineering as that term is defined in the Professional Engineers' Act, R.S.O. 1937, c. 237, who are within the definition of 'employee' in P.C. 1003, February 17, 1944, and who are employed in the works of the respondent at Toronto."

Neither the petition nor the appeal was opposed. Counsel for the appellant advised the Board at the hearing that the list of employees within the bargaining unit, as described above, had been settled before the Ontario Board.

Between: The Trustees of the Queen Elizabeth Hospital for Incurables, Toronto, Appellant (Respondent), and Local 796, International Union of Operating Engineers, Respondent (Petitioner).

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Deschamps, Mosher and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal from the decision of the Ontario Labour Relations Board certifying

This Board is prepared in proper cases to certify duly elected or appointed bargaining representatives of bargaining units constituted of employees employed in professional engineering or employed in training for professional engineering and to deal with the issue of whether a professional employee is employed in a confidential capacity on the facts of the particular case. This accordingly disposes of the query raised by the Ontario Board as its reason for dismissing the application for certification.

In view of this Board's understanding that the list of employees included in the proposed bargaining unit has been settled before the Ontario Board, and does not include persons employed in a confidential capacity or having authority to employ or discharge, we certify the bargaining representatives covered by the application for a bargaining unit consisting of all employees in the works of the Toronto Hydro-Electric System at Toronto, Ontario, who are employed in the practice of professional engineering or employed in training for professional engineering, except those employed in a confidential capacity or who have the authority to employ or discharge.

Accordingly, the appeal is allowed.

(Sgd.) A. H. BROWN,
Vice-Chairman
for the majority of the Board.

I dissent:

(Sgd.) H. TAYLOR,
A. L. FLEMING, Esq., K.C.,
for Appellant.

Dated at Ottawa, June 18, 1946.

bargaining representatives selected by the respondent union for a unit comprising the engineers and boiler room employees (six in number) in the employ of the appellant.

The appellant refers to the report of the investigator (or 'referee' as he is termed) appointed by the Ontario Board to investigate and report in the matter. In this report the

referee stated that all six employees in the bargaining unit had applied for membership in the respondent union and paid the required initiation fee and that bargaining representatives had been duly selected by the union. The report further states that subsequently three of the employees had notified the union they wished to resign their membership in the union. In view of these later resignations the appellant claims that the petition for certification should have been dismissed or in the alternative a vote of the employees in the bargaining unit should have been ordered by the Ontario Board and asks that this Board on Appeal should so dispose of the petition. At the hearing before the Board the information furnished by the respondent was that the applications for union membership was made by three employees on January 11, the bargaining representatives were selected by the union at a meeting on January 30, the petition for certification was filed with the Ontario Board on February 11, notices of the petition for certification were posted in the hospital plant by direction of the Ontario Board under date of February 14, and letters of two employees tendering resignation from the union were received by the union on February 15, with a similar letter from a third employee on February 16. The union representative stated that the union had acted on the applications for membership and the accompanying initiation fees, accepting the employees as union members, and that the

subsequent resignations were not effective under the union constitution to terminate their membership in the union.

Neither the appellant nor the respondent were represented when the petition was finally disposed of by the Ontario Board and certification granted although both were duly notified and given the opportunity to attend and make representations.

In the opinion of the Board, the Ontario Board was acting within its authority in granting certification in view of the facts of the case. It is equally within its authority and discretion to have ordered the taking of a vote. In the opinion of this Board the circumstances of the case are not such as to warrant interference with the discretion exercised by the Ontario Board and disturbing the decision made by it.

Leave to appeal is granted but the appeal is dismissed.

(Sgd.) A. H. BROWN,

Vice-Chairman

for the majority of the Board.

I dissent:

(Sgd.) H. TAYLOR.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an

agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During June, 1946, Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:—

Canadian National Railways, and Canadian Brotherhood of Railway Employees (CCL). B. Wilson, Conciliation Officer.

East Malartic Mines, Malartic, Quebec, and Local 696, Malartic Mine and Mill Workers' Union (CIO-CCL). Raoul Trepanier, Conciliation Officer.

Ingersoll Machine and Tool Company, Ingersoll, Ontario, and Local 2918, United Steelworkers of America (CIO-CCL). H. Perkins, Conciliation Officer.

John Inglis Company Limited, Toronto, Ontario, and Local 2900, United Steel Workers of America (CIO-CCL). F. J. Ainsborough, Conciliation Officer.

Link-Belt Limited, Toronto, Ontario, and Local 3394, United Steel Workers of America (CIO-CCL). F. J. Ainsborough, Conciliation Officer.

Ottawa Car and Aircraft Limited, Ottawa, Ontario, and Local 641, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO). C. W. Rump, Conciliation Officer.

Pease Foundry Company Limited (Brampton Division), and Local 28, International Moulders and Foundry Workers' Union (AFL-TLC). Wm. Dunn, Conciliation Officer.

Searle Grain Company Limited, Fort William, Ontario, and United Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (AFL-TLC). H. S. Johnstone, Conciliation Officer.

Snyder's Limited, Waterloo, Ontario, and Local 13, National Union of Aircraft, Furniture Workers and Allied Crafts (CCL). William Dunn, Conciliation Officer.

The Toronto Broadcasting Company (Station CKEY), Toronto, Ontario, and Local 1446, International Brotherhood of Electrical Workers (AFL-TLC). F. J. Ainsborough, Conciliation Officer.

Winnipeg Electric Company, Winnipeg, Manitoba, and Winnipeg Electric Employees' Federated Council (OBU). H. S. Johnstone, Conciliation Officer.

Agreements Facilitated by Conciliation Officers

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:—

Canada Bread Company, Toronto (Davenport Road), Ontario, and Local 847, Bakery Wagon Drivers' Union (AFL-TLC). F. J. Ainsborough, Conciliation Officer.

C.P.R. (B.C. Coast Steamship Service), Vancouver, British Columbia, and Canadian Merchant Service Guild Inc. (TLC). G. R. Currie, Conciliation Officer.

George Weston Bread and Cakes Limited, Toronto, Ontario, and Local 847, Bakery Wagon Drivers and Warehousemen's Union (AFL-TLC). F. J. Ainsborough, Conciliation Officer.

Union Steamships Limited, Vancouver, British Columbia, and Canadian Merchant

Service Guild Inc. (TLC). G. R. Currie, Conciliation Officer.

Boards Established

During the month, Boards of Conciliation were established but not fully constituted as follows:—

Gibson Brothers (Rock Realty Investments Limited), Toronto, Ontario, and Local 204, Building Service Employees International Union (AFL-TLC).

Lamaque Mining Company Limited, Bourlamaque, Quebec, and Local 654, International Union of Mine, Mill and Smelterworkers (CIO-CCL).

Noranda Mines Limited, Noranda, Quebec, and Local 688, International Union of Mine, Mill and Smelterworkers (CIO-CCL).

Wilson Motor Bodies Company Limited, Long Branch, Ontario, and Local 252, International Union of United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIC).

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:—

Corporation of Penticton, Penticton, British Columbia.—The Board of Conciliation established to deal with a dispute between Corporation of Penticton, Penticton, British Columbia, and Local No. 1, Penticton Municipal Employees' Union, was fully constituted on June 22, 1946, with the appointment of Mr. E. S. Farr, Victoria, British Columbia, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. H. W. McInnes, Penticton, British Columbia, and Mr. W. H. Sands, Kelowna, British Columbia, were appointed on the recommendation of the employer and employees respectively.

Corporation of the Township of York (York Township Hydro System).—The Board of Conciliation established to deal with a dispute between Corporation of the Township of York (York Township Hydro System) and Branch No. 1, National Organization Civic Utilities and Electrical Workers (CCL), was fully constituted on June 19, 1946, with the appointment of Doctor A. Brady, Toronto, Ontario, as Chairman of the Board, who was appointed on the joint recommendation of the other two members of the Board. Mr. J. D. McNish, K.C., Toronto, Ontario, and Mr. Bora Laskin, Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister, or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during June:—

Reports of Board in Dispute between the Canadian Fishing Co., Ltd. (Atlin Fisheries, Ltd.), Prince Rupert, B.C., British Columbia Packers, Limited (Canadian Fish and Cold Storage Co., Ltd.), Prince Rupert, B.C., and United Fishermen and Allied Workers' Union (CCL).

On June 17 the Minister of Labour received the Reports of the Board of Conciliation which dealt with the dispute between the Canadian Fishing Co., Ltd., (Atlin Fisheries, Ltd.) Prince Rupert, B.C., and United Fishermen and Allied Workers' Union.

The Board was under the chairmanship of Mr. J. Edwin Eades of Vancouver, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. R. L. Norman and E. Bjarnason, both of Vancouver appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable the Minister of Labour,
Ottawa,
Ontario.

Following the recommendation of Mr. W. Fraser, a conciliation officer, in accordance with the provisions of P.C. 1003, a Board of Conciliation was duly constituted by order of the Honourable the Minister of Labour dated the 15th day of April, A.D. 1946. Mr. Emil G. Bjarnason and Mr. J. B. Thomson were appointed members of the Board on the recommendation of the employees and the employer respectively and having failed to recommend a third person the Honourable the Minister of Labour by the said order appointed Mr. J. E. Eades.

On the 26th day of April, A.D. 1946, Mr. Bjarnason and Mr. J. E. Eades met and Mr. Eades reported that Mr. Thomson was unable to attend through very serious illness and would not be able to continue as a member of the Board. Mr. Eades' telegram to the Director of Industrial Relations and reply thereto were approved. The order of the Minister appointing the Board and the order appointing the members were filed as Exhibits 1 and 2 respectively. Mr. Eades was instructed to write the parties advising them of the position and of the desire of the Board to proceed immediately a new nominee could be appointed.

The Board met on the 9th day of May with the three members present. The order of the Minister dated May 1, 1946, appointing Mr. R. L. Norman to the Board on the recommendation of the employer was filed as Exhibit 3. Mr. Eades was agreed upon as Chairman. The members and chairman were duly sworn, the procedure to be followed and the time and place of the first sittings at which the parties would be heard was discussed and agreed upon.

The first sittings of the Board at which the parties were present was held the following day. At this meeting and at all subsequent sittings Mr. W. Rigby and Mr. Alex Gordon appeared for the Union and Mr. W. S. Owen, K.C. appeared for the two employers, Mr. E. L. Harrison for B. C. Packers Ltd. and Mr. G. R. Clark for Canadian Fish & Cold Storage Ltd.

After discussion at some length it was agreed that the sole question to be mediated by the Board was that of Union security. All other clauses referred to in the report of Mr. Fraser were either settled or abandoned. The question of check-off was dropped and a Union shop clause was submitted which reads as follows:—

"Article 2. Employment of Union Members

When hiring help the employer agrees to give preferential treatment to Union members. Should Union workers be unavailable when additional help is needed, the employer may hire non-Union men and women, with the understanding that such non-Union employees shall become members of the Union within thirty (30) days of the date of hiring."

Subsequent sittings were held on the 16th, 20th, 27th and 31st days of May and on the 4th of June. The Union presented a brief, the Company presented a brief, the Union replied verbally. There was a great deal of discussion and argument and many exhibits were filed. The discussion and arguments throughout were marked by a tolerant attitude and an apparent endeavour on each side to understand the point of view of the other. The tenor of the late sittings was most conciliatory and it was thought by the Board

that an agreement would certainly result as the differences resolved themselves into a small compass.

During one of the later sittings the employers' representative presented a seniority clause which it was felt would meet some of the arguments advanced by the Union for the Union shop clause. This clause has been carefully examined by the Board and it is felt that it would be of great value to the employees and of substantial value to the Company to have this clause inserted in the agreement. The clause reads as follows:—

Sec. 1 (a) Employees with less than three months accumulated service with the Company shall be considered temporary employees.

(b) Employees with more than three months accumulated service with the Company shall be considered regular employees.

(c) Employees who have gained that status of regular shall have their service time computed from the date of hiring.

(d) Seniority rights of regular employees shall be considered cancelled in the event they accept employment with another Company, and as a result are unable to report for work when requested, providing the Company notifies said employees of resumption of operations on the following basis.

1. Forty-eight hours notice to employees who have been laid off for a period of one week (7 days) or more.

2. At least 12 hours notice to employees who have been laid off for a period less than one week (7 days).

(e) If inability to report for work arises from sickness or other legitimate cause, seniority rights of employee concerned shall not be affected.

Sec. 2: The Company shall give consideration and preference to regular employees who have the greatest length of service with the Company. During slack seasons employees with the greatest length of service shall be the last to be laid off and at the termination of such slack periods shall be the first hired on providing they are competent and willing to accept such work as is available.

Sec. 3 (a) Men or women who left the employ of the Company at the Seal Cove Plant to enlist in the armed services, and who return to their jobs after discharge, shall have their service time with the Company computed without interruption from their original date of employment.

(b) Discharged service personnel, both men and women, shall be allowed 50 per cent of their war-time service in the armed forces in the establishment of seniority rights, providing they are employed by the Company at the plant within six months of their date of discharge from:

1. The armed services.

2. Hospital or other centre for rehabilitation of injured veterans,

or within six months of the date of completion of their government educational or vocational training.

(c) Discharged service men and women must qualify as regular employees on the basis set forth herein before seniority rights as stated in this section shall apply.

Sec. 4: Should disputes arise on the question of seniority such disputes shall be settled on the basis of a seniority list to be drafted by the Shop Steward Committee in consultation with the management, on the basis of the conditions as set forth in this Article.

During a later sitting a proposal called a Proposal for Maintenance of Membership was submitted by the Union's representatives which they were careful to point out was a suggestion subject to the approval of the membership. This clause read as follows:—

Section 1:

All employees who are members of the Union and who have not tendered their resignation from the Union on or before _____ as it is hereby agreed they may, should they choose to do so, shall retain their membership in the Union throughout the term of the present agreement.

Section 2:

When hiring help the Employer agrees to give preferential treatment to Union members. Should Union workers be unavailable when additional help is needed, the employer may hire non-Union men and women, with the understanding that such non-Union employees shall become members of the Union within thirty (30) days of the date of hiring.

Section 3:

Any member of the Union shall have the right to withdraw from membership in the Union at any time in the 15 day period between the following dates—
by notice in writing mailed to the Union and the Company, and said withdrawal from the Union will not prejudice the employee concerned in any way in the continuance of his employment by the Company, provided that no member shall enjoy the right to withdraw from the said Union under the terms of this sub-paragraph unless he is a member in good standing at the time of his notice of withdrawal.

Section 4:

The Companies agree to honour Union vouchers for dues signed by employees who are members of the Union or who are desirous of becoming members of the Union and who have money due them from the Companies. It is understood that such vouchers when honoured shall be paid by the Companies by cheque and forwarded to the headquarters of the Union.

At the last hearing a suggested clause for maintenance of membership was suggested by Mr. Owen on behalf of the employer which reads as follows:—

Section 1:

All employees who are members of the Union and who have not tendered their resignation from the Union on or before

—as it is hereby agreed they may, should they choose to do so, shall retain their membership in the Union throughout the term of the present agreement.

Section 2:

When hiring help the employer agrees to give preferential treatment to Union Members.

Section 3:

Any member of the Union shall have the right to withdraw from membership in the Union at any time during the term of this agreement by fifteen (15) days notice in writing mailed to the Union and the Company, and said withdrawal from the Union will not prejudice the employee concerned in any way in the continuance of his employment by the Company.

and Mr. Owen further offered the seniority provision in addition to his proposed clause and also made a further alternative suggestion of the seniority clause together with voluntary revocable check-off. Inasmuch as the Union's request for the check-off was withdrawn the Board is not required to make any recommendation in this regard.

However, as the voluntary check-off does not conflict in principle with the employers' position, while it does have very obvious advantages from the point of view of the employees, the parties may wish to further discuss the matter and may reach agreement between themselves.

The suggestions of neither side were entirely acceptable to the party to whom they were proposed and various alternatives were discussed but no agreement reached.

The Board has carefully reviewed the arguments and submissions advanced and is of the opinion that the needs of both parties can be reasonably met by a clause reading as follows:—

Section 1:

All employees who are members of the Union and who have not tendered their resignation from the Union on or before (a date thirty (30) days after the date of the execution of the agreement) as it is hereby agreed they may, should they choose to do so, or thereafter become members, shall retain their membership in the Union throughout the term of the present agreement.

Section 2:

When hiring help the employer agrees to give preferential treatment to Union members.

The Board, therefore, unanimously recommends that the proposed agreement between the parties with the clauses adopted by both parties and containing the above mentioned seniority clause and the above mentioned Union security clause be executed by the parties.

All of which is respectfully submitted this 14th day of June A.D. 1946.

J. E. EADES,

Chairman.

Member.

Report of Board in Dispute between Steel Company of Canada, Limited (Hamilton Works) and Local 1005, United Steelworkers of America (CIO-CCL).

On June 15 the Minister of Labour received the Report of the Board of Conciliation which dealt with the dispute between the Steel Company of Canada, Ltd. (Hamilton Works), and Local 1005, United Steelworkers of America.

The Board was under the chairmanship of His Honour Judge M. A. Miller of Sarnia, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. J. S. D. Tory, K.C., Toronto, and J. E. McGuire, Ottawa, appointed on the nomination of the employer and employees respectively.

Report of Board

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

SIR:

The Board of Conciliation appointed by you report as follows:—

At all meetings of the Board the Company was represented by Mr. G. R. Munnoch, K.C.,

Mr. R. A. Gillies, its Works Manager, and Mr. R. E. Alden of its Personnel Department and the Union by Mr. Reg. Gardiner, President of the Local, Mr. Larry Sefton, International Representative, and Mr. W. F. C. Kidd, Research Director of United Steelworkers. At the first meeting of the Board Mr. John Mitchell, Director of District No. 6 also appeared on behalf of the Union and at the last meeting at which the parties appeared before the Board, Mr. Millard, Canadian National Director of the United Steelworkers appeared.

The Company and Local 1005 entered into a collective agreement dated the 24th day of February, 1946. Before this Board the Union submitted proposals for an almost complete revamping of this agreement and the Company submitted counter proposals.

The original agreement provided against strikes or lockouts during its term. The Union proposed that the new agreement should contain no provision against strikes in connection with wages and hours of work until a new settlement had been reached in respect

of them. They refused to agree to a clause prohibiting strikes in respect of wages and hours of work while the present wage ceiling prevails and thereafter until the Company failed to meet their requests within such new limits, if any, as might be fixed. The Company from the beginning took the position that it would not enter into an agreement that did not protect it against strikes from any cause.

Despite this apparently impossible barrier to completing an agreement at this time, the Board considered with the parties the Union's proposals and the Company's counter proposals clause by clause and, in the course of the hearings, made a number of suggestions.

In connection with the grievance procedure, the most fundamental difference between the parties was in connection with the number of grievance committee men or stewards. The old agreement provided for a Grievance Committee of six employees, selected by the Union, to be assisted by thirteen assistant grievance committee men. The Union proposed that, instead of thirteen assistants, or stewards, they be appointed on the basis of one for every twenty, or in certain cases less, employees or approximately two hundred in all. The Company suggested thirty-eight such stewards. The Board requested that the parties get together with a plan of the plant and a list of the personnel and endeavour to work out a schedule providing for such number and distribution of stewards as would give reasonable and adequate service. This was done and the parties agreed that there should be seventeen chief stewards and eighty-three stewards and agreed on their distribution in the plant.

The Board believe that the parties are soon again to negotiate on the question of wages and hours and they are of the opinion that when that question is solved, the parties will have no difficulty in agreeing on most, if not all, points of a new agreement. They

were encouraged in that belief by the representatives of the Company. Inasmuch as many of the matters to be settled relate only to the mechanics governing relations between the Company and its employees, the Board are of the opinion that an agreement so arrived at by the parties would be much more satisfactory to both of them than anything this Board could suggest.

The Board accordingly recommend that, as soon as the question of wages and hours of work is disposed of, the parties again negotiate as to the terms of a new agreement and that in the meantime they continue to operate under the provisions of the old agreement as to seniority and grievance procedure with the substitution of the new setup as to stewards and chief stewards.

The Board further recommend that in negotiating the seniority provisions of the new agreement crane men continue to be in and under the supervision and direction of the respective departments in which they work but that seniority for crane men be on a plant wide, rather than a departmental, basis.

If, when the question of wages and hours of work is settled,* the parties still find themselves unable to agree on any points, the Board will be glad to go into the matter and make specific recommendations, or to be of assistance in any way that they may be able.

All of which is respectfully submitted.

Dated this 7th day of June, 1946.

Report of Board in Dispute between Canadian Drawn Steel Co., Ltd., Hamilton, and Local 1031, United Steelworkers of America.

On June 13, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge J. C. M. German, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Norman L. Mathews, Toronto, and John J. Sullivan, Hamilton, appointed on the nomination of the employer and employees respectively.

Report of Board

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa,
Ontario.

DEAR SIR:

The Board established by you herein held a meeting at the Court House in Hamilton on May 6, 1946, to hear the representations

of the parties to the above dispute. The Company was represented at this hearing by Mr. R. R. Evans, K.C., Counsel, Mr. Ralph Biggar, President and General Manager, and Mr. J. Taylor, Superintendent. The Union was represented by Mr. P. G. O'Donovan, International Representative, and Messrs. George Bishop and Stewart McLeod, President and Financial Secretary respectively of Local 1031. A very comprehensive brief was submitted by the Union in support of its views and the Company was ably stated by Mr. Evans.

Following this meeting, the Board held another meeting in Toronto to consider its recommendations and, at the request of the Union, a further meeting was held in Toronto on May 31, 1946, at which further representations were made by both parties.

During the course of the hearings, several of the points in issue were settled by agreement and, for convenience, the Board has drafted a new agreement setting forth its recommendations as to the form the agreement between the parties should take and giving effect to the amendments agreed upon. In the margin opposite each section, we have indicated whether or not such section has been agreed upon by the parties.

While the Union presented strong arguments in support of its contention for a union shop, or at least a maintenance of membership clause, the Company was equally insistent that no such provisions should be included in the agreement, on the ground that it interfered with the freedom of action of the employees. While there is no doubt that those employees who are members of the Union are desirous of making it compulsory for the other present employees and for all new employees to become members of the Union, the Board feels that this is a matter which should be determined by each individual employee and that he should be entitled to freedom of action to either join the Union or refrain from joining it, or to

continue or withdraw his support from the Union as his own conviction dictates without any coercion from the Company. There was no evidence whatever that the Company was in any way attempting to undermine the Union or to bring any pressure upon its employees to refrain from joining or to continue belonging to the Union and, under the circumstances, the Board feels that no case was made out for either union shop or maintenance of membership. In view of the fact that the Union asserts that it has one hundred per cent membership of the eligible employees, the Board recommends that the Company agree to a voluntary, revocable check-off and has accordingly provided for such a clause in the recommended agreement.

The Union has also requested substantial wage increases and shorter working hours but the Board feels that in the absence of an agreement between the parties, this is a matter to be determined by the Regional War Labour Board and that each party should be free to present its submissions on these questions to that Board. On the other hand, the Company has requested that there be a certain amount of stability in its labour costs and has requested the insertion of a clause in the agreement to provide that, if the Union decides to make an application for wage increases, this should be done within a reasonable time so that the Company will be in a position to estimate its costs for a reasonable period at least. With this end in view, the Board has included as Article IV 1 (a) a wage clause in its recommended agreement which the Board considers to be fair to both parties.

All of which is respectfully submitted.

(Sgd.) J. C. M. GERMAN,
Chairman.

Report of Board in Dispute between Andrews Wire Works of Canada, Ltd., Watford, Ont., and Local No. 2, Federation of Industrial Workers' Union.

On June 11, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge J. J. Coughlin, Sandwich, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. G. E. Burnson, and Herbert Orloff, both of Toronto, nominees on the Board of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

SIR:

Your Board of Conciliation in the above dispute having been reconvened at your request beg to report as follows:

In our previous report dated March 14, 1945, this Board made certain recommendations for the inclusion, in a proposed collective agreement, of specific provisions with respect to matters on which the parties had been unable to agree.

Having no power to compel the acceptance of our suggestions, it then remained for the parties to either voluntarily adopt the recommendations, agree on some alternative or have all negotiations fail.

What happened later was that the Union agreed to accept the recommendations of the Board but the Company refused.

On the reconvening of the Board the Company and the Union agreed to re-open direct negotiations in an effort to find acceptable alternatives to the recommendations made by the Board. These negotiations have now gone on for about five months with no tangible results.

The Company has taken the stand that it will not accept the Board's recommendation and will not go further by way of counter proposal than to sign an agreement in the form prepared by it a copy of which is set out as schedule 1 hereto. Particularly it is not content to modify in any way Article 6 or Article 11 thereof.

We are of opinion that the inclusion of these two articles in the form proposed would place the relations between the Company and its employees represented by the Union absolutely under the domination of the Company.

We believe that with these articles in the agreement it would not be a mutual bargain but a one-sided surrender and wholly at variance with the spirit of Privy Council Order No. 1003.

The insistence by the Company on the inclusion of these two articles in the form prescribed by it constitutes in our opinion a failure by the Company to "make every reasonable effort to conclude a collective agreement" as required by section 10 (2) of that order and calls for such action pursuant to the order as will induce compliance with its terms.

All of which is respectfully submitted.

Dated at London, this 1st day of June, 1946.

(Sgd.) J. J. COUGHLIN,
Chairman.

Member.

Minority Report

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

SIR:

I have had the opportunity of reading the majority report rendered by this Board and while I agree in principle with that report I find myself unable to agree with the recommendation therein set out.

There is no doubt that the failure of the Company to agree to an appointment of an impartial arbitrator as a final step in the Grievance Procedure could be construed as contrary to the spirit of the Wartime Labour Relations Regulations, P.C. 1003. However, I attribute the Company's attitude to a lack of previous experience in collective bargaining rather than to any lack of good faith. I feel that the Company has endeavoured in good faith to reach an agreement with the Union.

In my opinion, S. 10 (2) of P.C. 1003 has no application to the present situation. It applies only to negotiations in the first instance following certification or to negotiations for renewal of a collective agreement. In the event of any failure to reach an agreement in such negotiations either party can then apply to the Ontario Labour Relations Board and the conciliation provisions of P.C. 1003 will then be invoked. However, once a conciliation board has been appointed S. 10 (2) no longer applies.

I feel, therefore, that all that the present Board can and should do at this time is to report a failure by the parties to enter into a collective bargaining agreement.

All of which is respectfully submitted.

Dated at London, this 1st day of June, 1946.

Report of the Board in Dispute between International Nickel Co. of Canada, Limited, Sudbury, Ont., and Local 598, Sudbury Mine, Mill and Smelterworkers' Union (Int. Union M.M.S.W.) (CIO-CCL).

On June 18 the Minister of Labour received the Report of the Board of Conciliation which dealt with the dispute between the International Nickel Co. of Canada, Ltd., Sudbury, Ont., and Local 598, Sudbury Mine, Mill and

Smelterworkers' Union (International Union, M.M.S.W.)

The Board was under the chairmanship of the Hon. Mr. Justice W. D. Roach of Toronto, appointed by the Minister of Labour in the

absence of a joint recommendation from the other two members of the Board, Messrs. R. Bigelow and E. B. Jolliffe, both of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable the Minister of Labour,
Ottawa, Canada.

The undersigned Chairman and members of the Board of Conciliation established in this matter respectfully report as follows:—

Your Board met with the parties at the City of Sudbury on the 30th and 31st days of May and the 1st day of June, 1946. The Company was represented by the following:—

Mr. R. H. Waddington, Superintendent of Refineries,
Mr. Fred Benard, Assistant to the General Superintendent of Mining and Smelting,
Mr. H. C. F. Mockridge, Chairman of the negotiating Committee of the Company and a Director,
Mr. B. M. Osler, and
Mr. T. D. Delamere, Counsel for the Company.

The Union was represented by:—

Mr. T. F. McGuire and
Mr. H. L. Ladd,
International Representatives,
Mr. J. L. Kidd, President of the local Union,
Mr. N. Thibault, Vice-President of the local Union,

Mr. J. P. McCool, Financial secretary,
Mr. H. Shebeski, Recording secretary,
Mr. M. Soski and
Mr. W. Santela, Trustees,
and the following members of the Negotiating Committee, namely:—

Mr. C. Ross,
Mr. G. Cranston,
Mr. C. Crouch,
Mr. C. Ready,
Mr. G. McKay, and
Mr. L. Jorgensen.

We were very happy to report that at the conclusion of our discussions with the parties, agreement was reached on all matters that were in issue, subject, however, to approval by the membership of Local No. 598. We have since been advised that the membership has approved the agreement. We have been given to understand that the agreement has actually now been executed by the parties.*

We desire to record our appreciation of the very great assistance and co-operation given to this Board by the parties.

All of which is respectfully submitted.

Dated this 14th day of June, 1946.

(Sgd.) W. D. ROACH,

Chairman.

(Sgd.) EDWARD B. JOLLIFFE,

(Sgd.) ROBERT BIGELOW.

*The agreement will be summarized in the Collective Agreements and Wage Schedules section of a subsequent issue of the LABOUR GAZETTE.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020

Officers of the Industrial Relations Branch dealt with 13 industrial disputes during the month of June, involving 61,235 workpeople employed in 475* separate establishments. Of these, 8 were new disputes which originated during the month and 5 were situations which had been untermiated as of May 31, and received further attention in June. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

*The large number of establishments involved is accounted for by the fact that some 416 employers were affected in the logging and lumbering dispute in British Columbia.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B. and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

I.D.I. Commission appointed under Section 8 of P.C. 4020	2
Dispute called off; no further action required	1
Referred to Provincial authorities ...	1
Disposition pending	5

Method of Settlement:

Conciliation or mediation	2
Administrative action	2
Investigation only	1
Settlement Pending	8

Brief summaries of some of the cases of chief interest follow:—

Steelworkers, Ontario and Nova Scotia.—In an effort to avert a threatened strike in the basic steel industry the Minister of Labour on June 12 appointed the Honourable Mr. Justice Wilfrid D. Roach, of Toronto, as an Industrial Disputes Inquiry Commission to investigate and report upon disputes between The Steel Company of Canada Limited, Hamilton, Ontario, the Algoma Steel Corporation

Limited, Sault Ste. Marie, Ontario, and the Dominion Steel and Coal Corporation Limited, Sydney, N.S., on the one hand, and their employees represented by the United Steelworkers of America on the other hand. The appointment was made pursuant to Section 8 of Order in Council P.C. 4020, which provides that the Minister of Labour may appoint such a Commission for the purpose of investigating any situation which in his opinion may interfere with the effective transition to a peacetime economy in Canada.

The principal demands of the union were for a basic wage rate of 84 cents per hour or \$33.60 per week, involving an hourly wage increase of 19½ cents at the plants of the Ontario companies and 24½ cents at Sydney; a 40-hour work week; two weeks' annual vacation with pay after five years of employment; and the union shop and check-off or the principles of the "Rand decision" in the Ford Motor Company of Canada case (see LABOUR GAZETTE, January, 1946, pages 123-131).

Commissioner Roach held lengthy conferences with representatives of the union and each of the three steel companies between June 14 and 21. On June 28 he held a joint conference, at which all of the parties were represented, in order to lay plans for negotiations, commencing with discussions between the union and the Algoma Steel Corporation, Ltd., at Sault Ste. Marie on July 4.

On June 29 the union's National Advisory Wage Committee held a meeting following which it was announced by the union that unless "satisfactory progress" was made toward a settlement of the issues in dispute by July 12, the National Director of the union was authorized to give the three companies notice of strike action on that date.

The Commissioner proceeded to conduct local negotiations as planned, and conferences were held at Ottawa between union officials and officers of the Department, in an effort to find a pattern of settlement which would satisfy the union's aspirations and at the same time be in harmony with the national interest and the government's wage and price control policies, while safeguarding the legitimate interests of the companies. This did not prove possible and on July 10 the Government passed an Order in Council providing for government control of the steel production plants of the three companies, which was announced by the Minister of Labour in the House of Commons the same day.

By the terms of the Order in Council, Mr. F. B. Kilbourn, of Montreal, who had been the federal Steel Controller during the war

period, was named as Controller of the business, undertaking, affairs and operations of the three companies necessary for the operation of their steel production plants and establishments. Three Deputy Controllers were also appointed to assist the Controller in carrying out his duties, which commenced on the morning of July 11. The Order also provided that every person in the employ of the companies in such plants or establishments should continue to perform the duties of his employment until the authority of the Controller was revoked; and that any person failing to do so, without lawful excuse, would be guilty of an offence and subject to a fine for each day on which he failed to perform his duties.

Provision was made that the Honourable Mr. Justice Roach would continue his duties as Industrial Disputes Inquiry Commissioner, and that the bargaining representatives of the employees and the companies should continue their negotiations in good faith and make every reasonable effort to conclude a settlement.

Without prejudice to the final settlement of the matters involved, the Controller was given authority to apply on behalf of each of the companies to the appropriate War Labour Board for an immediate increase in the wage rates of the employees affected, and to give effect to any authorization or direction issued by such Boards.

A final provision of the Order in Council made it an offence subject to a fine or imprisonment, or both, for any person to interfere with the Controller or Deputy Controllers in the exercise of their functions, to interfere with any employee or other person seeking to comply with the terms of the Order, or counselling or procuring any person to violate the Order.

The text of the Order appears at the conclusion of this article.

In spite of the Government's action, the National Advisory Committee of the union at noon on July 12 decided that no adequate offer had been received from any of the employers and that satisfactory progress had not been made toward a settlement. The National Director, Mr. C. H. Millard, therefore notified all the companies that all production work would stop in the steel plants at or before 7 a.m. on July 15.

Merchant Seamen, Montreal, P.Q.—On June 24, the Minister of Labour appointed the Honourable Mr. Justice J. T. Rheame, of Montreal, P.Q., as an Industrial Disputes Inquiry Commission under Section 5 of Order in Council P.C. 4020 to investigate charges that Keystone Transports Limited, Montreal, P.Q., had dismissed two employees for the

reason that they were members of or working on behalf of the Canadian Seamen's Union. The case originated prior to the general strike of seamen on the Great Lakes and St. Lawrence Waterways which is referred to below. At the end of the month the Commissioner's report had not been received.

Merchant Seamen, Great Lakes and St. Lawrence River.—The June issue of the LABOUR GAZETTE contained an account of developments in the strike of the unlicensed personnel of shipping companies operating on the Great Lakes and St. Lawrence Waterways, which was called on May 27 by the Canadian Seamen's Union. On June 13, officers of the Department of Labour placed before the parties to the dispute a formula which it was felt both sides could and should accept. It was proposed that those steamship companies which were parties to the collective agreement of August 1, 1945, or with respect to which the Canadian Seamen's Union had obtained certification as the bargaining agency for the employees under P.C. 1003, should join with the Union in making an application to the National War Labour Board for permission immediately to introduce the eight-hour day, three-watch system on all their vessels, and pending the decision thereon to introduce such a system by adding to their crews a minimum of one wheelman, one oiler, one watchman, and one messman. It was also proposed that the collective agreement between the parties should continue in effect and that negotiations should commence at once for a new agreement covering wages, union security and other working conditions to be effective as from August 1, 1946. To assist such negotiations the parties would jointly request the Minister of Labour to appoint an Industrial Disputes Inquiry Commissioner. All crew members required by the companies would be hired in accordance with the terms of the existing agreement, and the companies would agree to reinstate without discrimination all members of the Union who were on their ships at the time the strike commenced, except those employees who had been convicted of violations of the Criminal Code.

With respect to those companies for whose employees the Union was not the bargaining agency, it was proposed that they should immediately make an application to the National War Labour Board for permission to introduce the eight-hour day, three-watch system, if they had not already done so, and that they would recognize the Union as the bargaining representatives of the unlicensed personnel of their vessels upon receiving advice from the Department of Labour that it had conducted an investigation of the Union's membership

among the crew members and had found that a majority of the seamen supported the Union. After determination by the Department of Labour that the Union represented a majority of the unlicensed personnel on the vessels of any of the companies, they should undertake at once to accept and apply the provisions of the collective agreement dated August 1, 1945, between the operators associated with the Dominion Marine Association and the Union, and also to apply the proposals put forward by the Department of Labour to the companies which were already parties to the collective agreement.

The officers of the Canadian Seamen's Union at once indicated their willingness to accept the proposals and to declare the strike ended when agreements embodying them were signed. The shipping companies requested time in which to study the proposals, and on June 18, 23 of them advised the Minister of Labour by telegram that they had decided that they would not enter into any negotiations whatever with the individuals who were the present officers of the Canadian Seamen's Union. They stated that they would negotiate with responsible representatives of their employees and that provided the men returned to the ships immediately all former crew members would be re-engaged under previous terms and conditions with the exception of those implicated in acts of violence. The eight-hour day would be put into effect as soon as it was authorized by the National War Labour Board, with the companies making every effort to implement the eight-hour day by requesting an early decision. The operators stated that they would request the Government to appoint a Commissioner to deal with all questions in dispute as quickly as possible, but stipulated that all interference with the manning and operation of ships must come to an end immediately. Failing acceptance of their proposals the operators suggested that in view of the national emergency, the Government authorities should direct that control of operations of all vessels on the Great Lakes and St. Lawrence Waterways should be entrusted to the Canadian Shipping Board or to some other properly constituted authority and that the striking seamen should be ordered back to work on the terms and conditions prevailing prior to the strike, on the understanding that the eight-hour day would be placed in effect immediately if the National War Labour Board would permit the whole matter to be adjusted according to recommendations of a Commission to be appointed by the Government.

On June 21, the Minister of Labour announced in the House of Commons that since it was apparently impossible to expect

the shipping operators and their striking crews, members of the Canadian Seamen's Union, to get together and effect a settlement of the strike, the Government had decided to take over the operations of 29 of the shipping companies affected as of June 24. Capt. E. S. Brand, O.B.E., R.C.N., was appointed Controller of the operations of these companies and Mr. Justice S. E. Richards, of Winnipeg, was appointed as an Industrial Disputes Inquiry Commission to conciliate the matters at issue while the Controller was in charge. At the same time, the Minister announced that the National War Labour Board had issued a Finding and Direction providing for the immediate introduction of the eight-hour day, three-watch system on vessels operating on the Great Lakes and St. Lawrence Waterways, with the maintenance of present monthly wage rates, plus overtime payments for all hours worked during "off watch" periods.

One employer, the Upper Lakes and St. Lawrence Transportation Company was not included in the Controllorship of Capt. Brand since it had already entered into a signed agreement with the Canadian Seamen's Union embodying the proposals put forward by the Department of Labour on June 13. However, the Controllorship was made to apply to oil tankers operated by the oil companies. Most of these companies were already working on an eight-hour day but had been unable to operate in consequence of the strike.

Entering upon his duties on June 21, the Controller gave instructions to all parties for the manning of vessels by June 24. Some ships were able to sail before that time and the movement of vessels was reported to have returned practically to normal by June 26. Many details concerning the completion of crews, transfer of personnel where necessary under a Government warrant scheme, and other minor details continued to occupy the attention of the Controller, while negotiations between the parties were initiated by Judge Richards. At the time of going to press the Commissioner's report had not been received.

Metal Miners, British Columbia.—In the latter part of June, the Minister of Labour for British Columbia requested the Federal Department of Labour to appoint an Industrial Disputes Inquiry Commission to investigate a dispute involving 12 companies operating gold and other metal mines in the Province of British Columbia and their employees represented by the International Union of Mine, Mill and Smelter Workers. The dispute involved demands for increased wage rates, shorter hours of work, a check-off of union dues and joint negotiations with all companies belonging to the Mining Association of British Columbia. On July 3, the Minister of Labour

appointed the Honourable Mr. Justice G. McG. Sloan, Chief Justice of British Columbia, to deal with the situation under the provisions of Section 8 of Order in Council P.C. 4020. On the morning of the same day, a strike of some 2,500 employees of 12 metal mines went out on strike at the call of the union, in spite of the fact that union leaders were well aware that the appointment of the Commission was pending. As the LABOUR GAZETTE went to press no report had been received from the Commissioner as to the progress of the negotiations.

Rubber Workers, Province of Ontario.—It was reported in the June issue of the LABOUR GAZETTE that on May 23 the Minister of Labour had appointed His Honour Judge J. C. A. Cameron, of Belleville, an Industrial Disputes Inquiry Commissioner to investigate matters in dispute between various rubber manufacturing companies in the Province of Ontario and their employees, represented by the United Rubber Workers of America. The text of the Commissioner's report, which was received on June 26 and released to the interested parties on June 27, will be found at the end of this article.

On June 24 strikes occurred at ten of the thirteen plants mentioned in the Commissioner's report, and work had not been resumed by the end of the month. The three plants unaffected by the strike action were those of the Dunlop Tire and Rubber Goods Company, Limited, the Kaufman Rubber Company, Limited, and the Viceroy Manufacturing Company, Limited. Approximately 12,000 employees were affected by the disputes, and of this number more than 10,000 were in the employ of the plants where strikes occurred.

Following the release of the Commissioner's report, the Minister of Labour and departmental officials conferred in Ottawa with representatives of management and with union officials with a view to arranging settlements of the disputes on the basis of the Commissioner's recommendations.

Logging and Lumbering Workers, British Columbia.—The June issue of the LABOUR GAZETTE contained a report of a strike in the logging, lumbering and woodworking industry in British Columbia which commenced on May 15 and which affected, according to revised estimates, about 416 employers and 38,000 workers in both Coastal and Interior operations.

Following the rejection by the International Woodworkers of America of the recommendations made on June 1 by the Honourable Mr. Justice Sloan, as Commissioner, a particularly acute situation developed in the Interior region where the closure of box factories and shook mills threatened to create a shortage of con-

tainners necessary for the handling of fruit and vegetable crops and the salmon and halibut catch. On June 11 employers in the interior, organized as the Northern Lumber Manufacturers' Association, the Interior Lumber Manufacturers' Association and the Interior Box Manufacturers' Association, requested the Regional War Labour Board to authorize them to put into effect immediately an increase of 10 cents per hour on the basis of a 48-hour week. In connection with this request, the Provincial Minister of Labour expressed doubt that the Board had the power to make an industry-wide increase, especially on a one-party application, under the circumstances existing at the moment. He stated that the employers could make an application which would be considered, but the Board would call in the bargaining representatives of the employees before taking action. It was also pointed out that the 44-hour week would become the legal maximum in the Province on July 1, and that this maximum could only be extended by the action of the provincial Board of Industrial Relations.

On June 13, the District President of the union proposed to the Coastal operators that they should reopen negotiations for a settlement of the dispute under the chairmanship of Chief Justice Sloan, using the Commissioner's recommendations of June 1 as a basis for further bargaining. Accusing the union of "stalling", the Coastal employers replied that they had accepted the Commissioner's proposals without reservation and were prepared to sign a collective agreement giving effect to them. On June 14 the Provincial Cabinet met the strike leaders of the union and strongly advised them to have work resumed on the basis of the recommendations of the Commissioner. On June 17 the executive committee of the union announced that it would recommend to the union membership acceptance of the Sloan report if the Provincial or Federal Government would conduct a referendum among the union members with reference to the inclusion of a maintenance of membership clause in the collective agreement. The clause proposed by the union would have the effect of compelling present employees to keep up their membership in the union as a condition of employment and compelling all new employees to join the union within thirty days after being hired, and to maintain their membership therein. The proposal was not accepted by the employers or by the governmental authorities.

On June 18, in compliance with a request by the provincial authorities, the federal Government passed an Order in Council appointing Mr. Gordon Bell, of Vancouver, as Controller of the box factories and shook mills in the

interior of the province and of sawmills and lumber camps normally supplying such factories. The Order in Council required the employees of all such establishments to return to work at once, and also ordered the operators and the bargaining representatives of their employees to enter into negotiations with a view to the settlement of the issues in dispute between them. It was stated that if the negotiations resulted in agreement as to an increase in wages, the increase would, if approved by the Regional War Labour Board for British Columbia, be made effective as and from the date on which the employees resumed work.

At the same time, a new Commission was issued by the Minister of Labour to Chief Justice Sloan empowering him to extend his negotiations to cover the dispute between the Interior operators of box factories, shoox mills, sawmills and logging and lumbering operations, and the union.

When the appointment of the Government Controller was announced, the district president of the International Woodworkers of America reported that the District Council of the union was being convened the next day to consider a return to work throughout the whole industry upon the basis of the Commissioner's recommendations, and requested that the time limit for the reopening of the Interior factories should be extended for twenty-four hours to enable the Council to work out plans for an orderly return to work. The Controller acceded to the request for an extension of time, and the following day the union's District Council announced that it was recommending to its members that the strike be terminated at 11 a.m. on June 20 and that they resume immediate production.

Representatives of the union and of the operators of logging and lumbering camps in the Coastal area met with the Commissioner in Victoria on June 20 and signed an agreement providing that the parties would enter into a collective agreement, effective for one year, incorporating the recommendations made by the Commissioner on June 1. The settlement gave to the employees engaged in Coastal operations, a general wage increase of 15 cents per hour; an average 44-hour week (recently made legal by Provincial enactment in British Columbia) in the logging industry, to be arranged by working a 48-hour week from April to September, inclusive, with time and one-half rates for work in excess of 44 hours per week, and by working a 40-hour

week during the other months of the year; a 44-hour week throughout the year in sawmills; and a voluntary revocable check-off of union dues.

Work was resumed in orderly fashion in practically all camps and factories on June 21 and operations were practically normal by Monday, June 24. Approximately 1,600 workers remained on strike in the Northern Interior, including the employees of six small box mills in the Prince George area. On instructions of the Controller, union officials agreed on June 24 to instruct the employees of the northern mills supplying materials for box factories to resume work at once. Work was resumed generally throughout the area on June 27.

In the meantime, negotiations were proceeding between representatives of the Interior operators and the union with the Commissioner acting as mediator. An interim agreement was signed at Victoria on June 26. The employers agreed to accept the same check-off clause as was included in the coast agreement. A basic work week of 44 hours was agreed upon, and the union and employers' representatives undertook jointly to seek permission from the appropriate provincial authorities for permission to work in excess of 44 hours per week at overtime rates of time and one-half pay.

Negotiations continued with regard to wage rates and on July 5 a further interim agreement was signed by representatives of the Interior logging, sawmill and box factory industries and the I.W.A. providing for a general increase of 10 cents per hour on a base rate of 67 cents per hour, retroactive to the date on which the men returned to work. Where a range of rates was established, it was agreed that there would be a probationary period of 90 days for new employees, at the end of which employees would automatically receive the prevailing rate. It was also agreed that further negotiations would take place in regard to categories for which either the union or the operators felt that inequalities existed, and that Chief Justice Sloan would arbitrate any disputed items.

At the time of going to press, the wage adjustments agreed upon for both the Coastal and Interior areas had not been dealt with by the Regional War Labour Board, and the Government Controller was still in charge of the operations of the box factories in the Interior.

Text of Order in Council, P.C. 2901

Whereas the Honourable Mr. Justice W. D. Roach was appointed as an Industrial Disputes Inquiry Commissioner under Order in Council P.C. 4020 of June 6, 1941, to inquire into and mediate certain disputes between Algoma Steel

Corporation Limited, Sault Ste. Marie, Ontario, Steel Company of Canada Limited, Hamilton, Ontario, Dominion Steel and Coal Corporation Limited, Sydney, Nova Scotia, and the United Steel Workers of America;

And whereas the Minister of Labour reports that he is advised that there is grave danger of a strike in the immediate future by employees of the Companies named in the next preceding paragraph arising out of the failure of the said Companies and the said Union representing the employees of the said Companies to settle matters presently in dispute between them;

That a stoppage of work in the said Companies would seriously curtail the essential supply of steel and would dislocate production in other industries and would be contrary to the national interest thereby jeopardizing the orderly transition to a peacetime economy in Canada;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of The National Emergency Transitional Powers Act 1945 is pleased to make the following Order and it is hereby made and established accordingly.

ORDER

1. In this Order, "Companies" means Algoma Steel Corporation Limited, with head office at Sault Ste Marie, Ontario, Steel Company of Canada Limited, with head office at Hamilton, Ontario, Dominion Steel and Coal Corporation Limited, with head office at Montreal, P.Q., and "establishment" includes a work, undertaking or business.
2. F. B. Kilbourn, Esquire, of the City of Montreal, P.Q., Vice-President and General Manager of Canada Cement Company Limited, formerly Dominion Steel Controller, is hereby appointed Controller of
 - (a) the business, undertaking, affairs and operations of the Algoma Steel Corporation Limited, necessary for the operation of its steel production plant and establishment at Sault Ste. Marie, Ontario; and
 - (b) the business, undertaking, affairs and operations of Steel Company of Canada Limited, necessary for the operation of its steel production plant and establishment at Hamilton, Ontario;
 - (c) the business, undertaking, affairs and operations of Dominion Steel and Coal Corporation Limited, necessary for the operation of its steel plant and establishment at Sydney, Nova Scotia.
3. The said Controller shall have the custody and control of such property and assets of each of the Companies as he in his uncontrolled discretion and judgment may deem necessary in order to manage, operate and carry on the business of each of the aforesaid Companies and he shall, for such purposes, have and exercise the powers, authorities and rights of the Board of Directors of each of the said Companies.
4. The Controller shall exercise the foregoing powers and authorities subject to such instructions and directions, if any, as may from time to time be approved by the Governor in Council.
5. B. G. Sullivan, Esquire, of the City of Toronto, J. V. Argyle, Esquire, of the City of Ottawa, and H. R. Pettigrove, Esquire, of the City of Halifax are hereby appointed Deputy Controllers and each of them shall have and exercise any and all powers conferred on the Controller, subject to any restrictions thereof which the Controller may from time to time impose and subject, in all cases, to review by the Controller.
6. The Controller, any Deputy Controller and any person acting for or on behalf of, or under the authority of the Controller, shall not be or become liable to any person (including any of the said Companies, their creditors or shareholders) for anything done or omitted in the exercise or purported exercise of any power or authority from time to time vested in or conferred upon the said Controller.
7. The authority of the Controller shall commence at eight o'clock a.m. the 11th day of July, 1946, and shall continue until the same is revoked by Order in Council which shall be published in the *Canada Gazette*.
8. The authority of the Boards of Directors of each of the said Companies in respect of the management, operation and carrying on of the aforesaid establishments of the Companies is, subject to Section 10 of this Order and in so far as the same is abrogated by or pursuant to sections two and three of this Order, suspended from eight o'clock a.m. the 11th day of July, 1946, until the powers, authority and rights of the Controller in respect of such management, control and operations shall be revoked.
9. It shall be the duty of every person in the employ of any of the said Companies at or in any of the aforesaid establishments of the Companies to perform the duties of his employment until the authority of the Controller is revoked; and every person who fails to perform his duties as aforesaid as herein required without lawful excuse, the onus of proof of which is upon him, is guilty of an offence and liable upon summary conviction to a fine of twenty dollars for each day or part of a day on which he fails so to perform his duties.
10. The Commissioner, the Honourable Mr. Justice W. D. Roach will continue with his duties as an Industrial Disputes Inquiry Commission as aforesaid, and the bargaining representatives of the aforesaid employees and the Companies shall continue their negotiations with a view to the settlement of the matters presently in dispute between them and shall negotiate in good faith with one another and make every reasonable effort to conclude a settlement.
11. Notwithstanding anything hereinbefore contained and without prejudice to the final settlement of matters involved in the negotiations between the Companies and the bargaining representatives of their employees and the operations of the aforesaid Commission, the Controller is hereby authorized to apply on behalf of each of the said Companies to the appropriate War Labour Boards for an immediate increase in the wage rates of employees employed at the aforesaid establishments of the said

Companies, and to give effect to any authorization or direction which may be made, or issued by any such War Labour Board.

12. Any person who (a) interferes with the exercise by the Controller or any Deputy Controller of any of the powers, authorities and rights conferred upon him or (b) interferes with any employee or other person seeking to comply with the terms of this Order or (c) counsels or procures

any person to violate this Order, shall be guilty of an offence and liable upon summary conviction to a fine not exceeding in the case of (a) Five Thousand Dollars or imprisonment for a term not exceeding five years or to both such fine and such imprisonment, and in the case of (b) or (c) to a fine not exceeding Five Hundred Dollars or imprisonment for a term not exceeding six months or to both such fine and such imprisonment.

Report of Commission in Dispute Between Ten Ontario Rubber Companies and the United Rubber Workers of America

On May 23 the Hon. Humphrey Mitchell appointed His Honour Judge J. C. A. Cameron as an Industrial Disputes Inquiry Commission under Order in Council P.C. 4020, as amended, to investigate and report upon a dispute between various rubber manufacturing companies of Ontario and the United Rubber Workers of America. The matters in dispute concerned wage rates, hours of labour, payment for overtime and for statutory holidays, premium payment for night work and other matters usually covered in collective agreements.

Text of Report

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa.

Dear Sir—

Pursuant to my appointment as Commissioner to investigate and report upon the above matters, under date of May 23rd, 1946, I have the honour to submit herewith my Report:

Ten companies, 13 factories and 13 local unions of the United Rubber Workers of America, were involved in the disputes, as follows:

Barringham Rubber Co., Ltd., Oakville, Local 292.

Dominion Rubber Co., Ltd. (Merchants Factory), Kitchener, Local 67.

Dominion Rubber Co., Ltd. (Textile Division), Kitchener, Local 296.

Dominion Rubber Co., Ltd. (Tire Factory and Rubber Machinery Shops), Kitchener, Local 80.

Dunlop Tire and Rubber Goods, Ltd., Toronto, Local 132.

Firestone Tire and Rubber Co. of Canada, Ltd., Hamilton, Local 113.

B. F. Goodrich Rubber Co. of Canada, Ltd., Kitchener, Local 73.

Goodyear Tire & Rubber Co. of Canada, Ltd., Bowmanville, Local 189.

Goodyear Tire & Rubber Co. of Canada, Ltd., New Toronto, Local 232.

Gutta Percha & Rubber, Ltd., Toronto, Local 136.

Kaufman Rubber (Ontario) Ltd., Kitchener, Local 88.

Seiberling Rubber Co. of Canada, Ltd., Toronto, Local 118.

Viceroy Manufacturing Co., Ltd., West Toronto, Local 126.

Conferences were commenced on May 29th and negotiations continued until June 21st by which time it was apparent that no further progress could be made despite every effort to bring about satisfactory agreements between the parties.

On June 17th I was advised by Dunlop Tire & Rubber Goods Co., Ltd., and the representatives of the bargaining committee of Local 132, that the matters in dispute had been settled, and that a new agreement, to replace the one expiring on June 30th, 1946, was being prepared. I regret to advise that with this exception no other agreements were concluded.

Before setting out my specific recommendations as to the manner in which (in my view) the disputes should be determined, I deem it advisable to indicate the nature of the disputes, and the difficulties encountered in my efforts to bring the parties together.

It is to be noted that the one union—the United Rubber Workers of America—has local unions in each of the named factories. In the fall of 1945 the Strategy Committee of the Union, comprised, I believe, of one or more representatives of each local, adopted the so-called "Seven Point Program" and requests were made through the local bargaining committees to management in most of the plants, to have the full program adopted. Little if any success was obtained, some companies taking the stand that the demands were excessive, some that their contracts with the Union still had some time to run, and others that they were not engaged in the manufacture of rubber goods or were only partially so engaged. Subsequently, in April and May, 1946, the President of the United Rubber Workers of America from Akron, Ohio, en-

deavoured to bring all the operators together in one meeting at Toronto in order to deal with this program on an industry-wide basis. The operators declined to attend and, strike votes having been taken in most of the plants, it was proposed to call a strike in all the factories on May 27, 1946. On May 23, following my appointment as Commissioner, the Strategy Committee advised the locals to withhold strike action for the time being.

The "Seven Point Program" is as follows:

1. Wage increase of 20c per hour.
2. A basic forty (40) hour week.
3. Time and one-half for hours worked in excess of 8 hours per day and 40 hours per week.
4. Time and one-half for work performed on Saturdays.
5. Double time for work performed on Sundays and all holidays proclaimed by Federal, Provincial or Municipal Governments.
6. Straight time pay for holidays proclaimed by Federal, Provincial or Municipal Governments when not worked.
7. Ten Cents (10c) per hour bonus for all employed on second and third shifts. (This based on three 8-hour shifts per day.)

However desirable the "Seven Point Program" might be considered, I reached the conclusion that in this particular case it could not be approached on an industry-wide basis. A number of the contracts have some months to run and in one case the contract does not expire until January, 1947; and while in the main there are "open end" wage clauses, the existing contracts cover hours of work, payment for statutory holidays, off-shift differentials and the like. Some of the plants are small, one employing about 100 persons, while the largest employs nearly 2,800. Some are located in small areas—Oakville and Bowmanville; others in Kitchener; and still others in Hamilton, suburban Toronto and Toronto. It is well known that wages in the smaller areas are not equal to those in urban centres and the Wage Control Order, P.C. 9384, Sec. 20, provided for comparisons in wage rates on an area basis. It is significant to note that in no case did the Union attempt to show that wages and conditions now in effect were below those paid in the plant area. Moreover, the products of these plants are greatly diversified, and what might be considered fair rates for one would be quite unfair in others. Some plants are composite, producing tires and tubes, mechanical goods, footwear or sundries; others produce footwear or sundries entirely; and one the Textile Division of Dominion Rubber Co., Ltd.; uses no

rubber at all. The margin of profit varies greatly, being less in footwear where competition is very keen and much of the output is exported.

At an early stage I indicated my views on the industry-wide approach to the President and General Counsel of the United Rubber Workers of America, who were in attendance from Akron, and I endeavoured to get them to agree that such an approach was not here practicable. It may be of interest to note that the same effort was made in the U.S.A. by the same organization and while it failed, the Union did secure similar settlements with the Big Four in the rubber industry (U.S. Rubber, Goodyear, Goodrich and Firestone) and later was able to apply the pattern with some variations to some, but not all, of the smaller rubber plants. It is to be noted also that on May 27, 1946, the Wage Stabilization Board in the U.S.A. refused to issue industry-wide patterns under the existing stabilization policy for the purpose of forestalling strikes, on an application by the United Rubber Workers of America. In its decision against the Union, the Board took the position that because the great majority of employers in the rubber industry were opposed to the terms agreed upon by the Big Four, these terms did not constitute a "pattern" for stabilization.

In the disputes before me all the employers were opposed to industry-wide bargaining.

Notwithstanding my direction that the negotiations should continue on a plant basis, it is very clear to me that the failure to reach satisfactory agreements was due to the over-all control of each local union by the Strategy Committee. The bargaining committees had, in effect, handed over full authority to the Strategy Committee, and the evidence clearly showed that even if an offer were made by company representatives, the local bargaining committee had no power to accept it or even to negotiate on it without the approval of the Strategy Committee, which was in daily session throughout.

However fair and proper it may be for local unions to have the advice and assistance of union representatives and officials before completing an agreement, the transfer of authority to negotiate an agreement by those with full knowledge of local conditions and of the desires of their own members, to a composite group made up in the main of representatives of other plants, where totally different conditions existed, was in my opinion unwise and unrealistic. Doubtless it was done for the purpose of solidarity; but for the reasons which I have pointed out above, industry-wide bargaining is not practical in this instance. Repeatedly I was told by members of the

bargaining committees that heretofore their relationships with management had been most satisfactory; that the companies had always been willing to negotiate with them in good faith and that in some plants there had never been any difficulties which were not overcome by ordinary collective bargaining. It is worthy of note also that the contracts in existence provided for bargaining with the bargaining committee only and not with or through a Strategy Committee. The Wartime Labour Relations Regulations, P.C. 1003, require the employer and the bargaining representatives *to negotiate in good faith with one another* and make every reasonable effort to conclude a collective agreement. The procedure here adopted by the Strategy Committee is not in my view consistent with ordinary bargaining practices or with the requirements of P.C. 1003.

The extreme rigidity with which the Strategy Committee regarded the "Seven Point Program" is seen in the case of one company which had negotiated a contract in February, 1946, and which resulted in substantial wage increases. The Union stated that in spite of wage increases then given and after discussion of the "Seven Point Program", it still insisted that an additional 20c an hour should be granted by that company.

On the other hand, I think it fair to say that some of the companies have not approached the negotiations in a realistic manner. The Union's program was presented to the companies as a basis for local negotiations more than six months ago and in a number of cases concrete counter-proposals were never made by management. I am satisfied that a more reasoned approach to the problems involved, rather than a mere rejection in toto of all the requests made, would at that stage have brought about satisfactory results on a plant basis in some cases.

It is not my intention to give in detail the existing wage structure of each company. It is sufficient to say that in every case substantial increases, ranging from 30 per cent to 80 per cent, have been granted since September, 1939, which increases greatly exceeded the increases shown in the cost of living index. In many cases inequalities and injustices have been dealt with satisfactorily, although it is admitted that some still exist.

A general brief was submitted by the Union and some of its contents are of importance—and revealing. Paragraph 4 of Page 1 of the Union brief is as follows:

The reason for putting emphasis on the importance of the matter is to indicate that this is not any ordinary wage dispute, but involves the setting of a *pattern** for an important industry in view of great changes in the general economic situation based upon the transition to a peace time economy.

A pattern will be set not only for the immediate future, but perhaps for many years to come. The ordinary processes of collective bargaining by the representatives of the employees in the plants concerned, and the lengthy procedure of applications to regional and national boards, with the delay that is attendant on such applications, may well be inappropriate to an emergency of this nature.

Under the heading "The Government's Wage Stabilization Policy" the brief refers to Section 20 of P.C. 9384, as amended, and states (Page 6):

In the present instance the unions are not putting their case on either of the first two conditions under which the National Board may direct an increase, but do vigorously assert that it is reasonable in the circumstances, and consistent with the maintenance of existing prices of goods and services which the employer sells, to grant the increase which they have claimed.

The reasons advanced in favour of the wage increase of 20c per hour "across the board" are as follows:

(a) The existing and *anticipated** increase in the cost of living.—It is suggested that the average worker would require \$3.00 per week more in his pay envelope to maintain his existing standard of living and purchasing power.

(b) Reduction in take-home pay due to shorter hours worked.—In this connection it is to be noted that in the plants involved hours of work vary from 40 to 48 hours per week. In some cases the hours were reduced at the request of the employees and in others to meet the requirements of the Ontario Statute. In every plant the production is less than the demand, extra employees are needed but unobtainable, due to shortage of skilled labour, housing and/or necessary mechanical equipment.

(c) Increased productivity of the employees.—In the evidence submitted to me, I found a wide divergence of view between management and employees as to whether output per man-hour has in fact increased in recent years. In any event, I deem it regrettable that when proposals for increasing pay and shortening hours of work are put forward, more recognition is not given to the need for greater productivity, which it is generally conceded must be the basis for improvement in the standard of living.

(d) Some of the Canadian plants are subsidiaries of American plants where wages are higher.—This is no doubt true in the main but the argument is not convincing. The standard to be attained is that within the Canadian economy, not that existing in some countries where wages are lower or in the U.S.A. where they are higher.

*Italics mine

(e) Wage rates sought by the Union are lower than the minimum standard of health and decent living for the ordinary Canadian family.—This is a sweeping generalization, which in many instances was not borne out by the evidence submitted to me.

(f) It is desirable to have a general pattern of "across the board" increases.—Reference was made to the recent settlement in the logging industry in British Columbia and in the International Nickel Co. of Canada, Ltd., in Ontario.

(g) The companies are, or, in the absence of clear evidence produced by them, must be assumed to be, well able to pay the requisite increases without affecting prices.—On the question of ability to pay, it was suggested by the Union that, because a company was able to pay more, therefore it should pay more. So far as I am aware, under wage control, mere ability to pay has never been considered as a reason for increasing wages. The question of inability to pay is quite another matter and arises only when, on an application to the War Labour Board, an employer alleges that the proposed increase is beyond his power to pay without price relief. In my view the question of ability to pay was not relevant to the issues before me and I declined to direct the companies to file evidence as to their financial ability to pay the full amounts requested in the "Seven Point Program", particularly in view of the fact that at the hearings there were present, not only the bargaining committee of the local union involved, but also the members of the Strategy Committee and other Union officials I saw no reason why such information should be disclosed to many who had no direct concern therewith. I am of the opinion that the question may be appropriately determined when on an application to the War Labour Board inability to pay a proposed increase is pleaded, the Board having adequate staff to satisfactorily decide such questions.

I shall not attempt to discuss in great detail the remainder of the "Seven Point Program". The wage increase is by far the most important matter but some of the others are worthy of consideration. It was generally agreed that the 40 hour week is impracticable in plants where it is not now in effect, that the demand for rubber goods is still high and will so continue for some time. Most of the plants will continue to work for 48 hours and the reduction to 40 hours per week would result merely in further wage increases, the remaining 8 hours being paid for at time and one-half. Some of the plants now have a 45 hour week and others

a 47 and 48 hour week. The general trend when production has caught up, will, I think be toward a shorter work-week.

In some plants off-shift differentials are in effect in one way or another; in some plants statutory holidays are paid at straight time when not worked.

I find some difficulty in stating specifically my recommendations as to how the disputes might be determined, particularly in view of the fact that in each case an application must be made to the Regional War Labour Board for its approval. I do not desire in any way to interfere with the discretion of the Regional War Labour Board for Ontario and my recommendations must be considered merely as suggestions which appear to me, after the fullest consideration of all the evidence submitted to me, to be of such a character that they should commend themselves to the parties in dispute as the general basis for negotiation and agreement, and as a preliminary to an application to the Regional War Labour Board. That Board, in the exercise of its powers, will then have to determine whether such agreements or applications are proper in all respects under the powers conferred on it.

Subject always to the above, therefore, I recommend that the parties in dispute should re-open negotiations on the plant level (i.e., representatives of management and the local union's bargaining committee) and as a basis for the negotiations leading to final settlement I recommend the following:

(a) An increase of 8c per hour to all hourly-rated employees represented in the bargaining unit; and an equivalent amount to all others so represented who are employed on an incentive or piece-work system. Such amounts should be reduced to the extent that general wage increases have been granted since October 1st, 1945.

(b) That where not now in effect, overtime should be paid at the rate of time and one-half for all hours worked in excess of 44 hours in any one week.

(c) That time and one-half be paid for all work performed on Sundays and on the following five holidays: New Year's Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, and on two additional holidays to be agreed upon by the parties.

(d) That consideration be given to the payment to hourly-rated and piece-work employees of an amount equal to time lost but not to exceed one standard shift due to shut-down for holidays as follows: New Year's Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, and two additional holidays to be agreed upon by

the parties; but subject to the limitation that an employee shall not be entitled to holiday pay for a holiday that occurs during his regular paid vacation leave.

(e) That off-shift differentials at the rate of 5c per hour be paid for all work performed between 6 p.m. on any one day and 6 a.m. on the following day.

(f) That where better conditions and rates than above now prevail, they remain in effect.

(g) That the sum of any wage increases negotiated under clause (a) above and of payment for any holidays not worked, whether heretofore in effect or hereinafter negotiated under clause (d) above, should not exceed an average of 10c per hour for all employees in the bargaining unit.

(h) That increases granted under any of the above clauses should be effective as of June 1, 1946.

I further recommend that upon reaching an agreement, the parties should make a joint application to the Regional War Labour Board for the approval of such an agreement; and that where the parties fail to reach an agree-

ment, the local union should exercise its rights under the existing Wage Control Order and apply to the Regional War Labour Board for approval of any of its proposals which have not been settled by agreement between the parties.

In making the above recommendation I have endeavoured to give consideration to all the matters submitted to me. Much is to be said in favour of improvement in working conditions—a shorter work-week, payment for statutory holidays and off-shift differentials; and it is to be noted that all of these will result in substantial increases in take-home pay, particularly when overtime is worked, as will likely be the case for some time. At the same time, I cannot agree that excessive increases in basic wage rates, doubtless resulting in applications for price increases, can be helpful to the employees and the public as a whole.

All of which is respectfully submitted.

June 26, 1946.

Judge J. C. A. CAMERON,
Commissioner.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not possible, because of limitation of space, to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining Non-Ferrous Smelting and Quarrying: Metal Mining

TIMMINS, ONT.—HOLLINGER CONSOLIDATED MINES LIMITED AND INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS LOCAL 241.

Agreement to be in effect from November 14, 1945 to November 13, 1946. The company recognizes the union as the sole and exclusive bargaining agency for all eligible employees. No discrimination against any employee because of union membership or activities.

Hours of work and overtime: Underground—8 per day from collar to collar for each shift, 15 minute variations which do not occur consistently to be disregarded, delays in excess of 15 minutes shall be considered time worked and paid for on the basis of straight time except when delay is beyond the control of the company; Surface—three shifts of 8 hours at work place; steady day shift—8½ hours at work place Monday through Friday, 5½ hours on Saturday, a 48-hour week; hoistmen, cage-tenders and deckmen on a 2-shift basis will be expected to lower their shift and return them to surface without overtime unless the shift works overtime; subject to the approval of the National War Labour Board all time worked in excess of 48 hours in any work week shall be paid for at the rate of time and one half, except in the case of employees in the mill, the Mattagami River Pump House, the Compressor Plant and cage-tenders at Central Shaft who are working 56 hours regularly on continuous operations, in which case overtime starts after 56 hours work; this 56-hour week clause shall remain in effect only until the exemption from the 48-hour work week law is lifted. Time and one half will be paid for work on any of four specified statutory holidays subject to the approval of the National War Labour Board.

Vacation: one half day with pay for each 25 days worked to a maximum of 6 days after 300 days have been worked except when absent through justifiable cause.

Wage rates presently in effect except as modified by the agreement shall continue for

the life of the agreement subject only to such changes as are ordered by the National War Labour Board or successor.

Provision is made for safety and health of employees, seniority rights and grievance procedure.

Manufacturing: Metal Products

LACHINE, P.Q.—DOMINION ENGINEERING WORKS, LIMITED AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 1660.

Agreement to be in effect from March 27, 1946, to March 26, 1947 or 1948, if notice not given. No discrimination by company or union because of membership or non-membership in the union.

Hours of work and overtime: subject to the approval of the Quebec Regional War Labour Board and effective July 15, 1946, time and one half for work in first shift in excess of 8 per day Monday through Friday and 5 on Saturday (except yardmen and labourers—8 on Saturday) and in second shift in excess of 9 per day Monday through Friday, double time for work in excess of 12 hours per day and for all work on Sundays and 7 specified holidays, except for power house men, firemen and coal passers, who shall be paid time and one half for work on Sundays, and in excess of 12 hours per day or 60 hours from Monday through Saturday.

Vacation: one week with pay for all hourly-rated employees with one year's continuous service with the company, two weeks with pay for those with 5 years continuous service; those with more than 6 months but less than one year receive two-thirds of a week with pay, while those with one month's service but less than 6 months' one-third of a week with pay.

Minimum hourly wage rates for certain classified operations: babitter 69 cents, blacksmiths 69 to 89 cents, carpenter 64 to 74 cents, chippers and operators 64 to 84 cents, fitters and assemblers 64 to 89 cents, electricians (maintenance) 69 to 89 cents, engineers 68½ to 77½ cents, general helpers 59 cents, horizontal boring machine operators and inspectors 64 to 99 cents, labourers 53½ cents, lathe operators 64 to 89 cents, layout men 69 to 99 cents, machine shop maintenance and welders 69 to 89 cents, milling machine operators 64 to 99 cents, painters 59 to 69 cents, pipefitters 64 to 84 cents, slingers 59 to 84 cents, and toolmakers 89 cents to \$1.04.

Minimum wage rates on night shift are 5 cents per hour over the day scale.

Provision is made for seniority rights and grievance procedure.

ISLE MALIGNÉ, P.Q.—ALUMINUM COMPANY OF CANADA, LIMITED AND LE SYNDICAT NATIONAL DES EMPLOYÉS DE L'ALUMINIUM DE ST. JOSEPH D'ALMA, INC. (NATIONAL SYNDICATE OF ALUMINUM EMPLOYEES OF ST. JOSEPH D'ALMA, INC.)

Agreement to be in effect from March 30, 1946, to March 29, 1947, and thereafter from year to year subject to 30 days' notice.

Hours of work: for both day and shift workers 8 per day, 6 days a week, a 48-hour week. Overtime for day workers: time and one half for work in excess of the above hours.

Vacation: one week with pay for employees with one year's continuous service (2,400 hours of which at least 1,800 hours must have been worked during the immediately preceding 365 days) and two weeks with pay after 7 years' service. Day workers are allowed 8 specified holidays.

Hourly wage rates: Plant maintenance—boiler operators 68 to 98 cents, blacksmiths 73 cents to \$1.03, blacksmiths helpers 61 to 68 cents, hand burners 71 to 81 cents, carpenters 73 to 94 cents, carpenters' helpers 63 to 68 cents, crawler crane operator 73 cents to \$1.03, electricians 78 cents to \$1.03, electricians' helpers 63 to 76 cents, greaser 61 to 66 cents, internal combustion fitters 73 to 98 cents, helpers 61 to 68 cents, general labourers 56 cents, machine operator 66 to 76 cents, machinists 78 cents to \$1.03, machinists' helpers 63 to 73 cents, millwrights 73 cents to \$1.01, millwrights' helpers 63 to 68 cents, painters 68 to 83 cents, pipefitters 73 to 98 cents, pipefitters' apprentices 63 to 68 cents, tool repairmen (day) 61 to 67 cents, truck drivers 61 to 76 cents, welders 73 cents to \$1.03, welders' helpers 63 to 68 cents; Potroom operation and control—trimmer 69 cents plus production bonus, syphoner and channel changer 67 cents plus bonus, cranemen (day) 68 and 75 cents, potroom service men 59 cents to 67 cents; sweepers 59 cents, control men 61 to 65 cents; Remelt shipping, distribution and potlining—after 3 months cranemen, ore unloaders and gas and electric truck drivers 68 cents, furnacemen 78 cents, pourers 73 cents, sand blast operators 66 cents, assistants and utility men 59 cents; Atomized aluminum plant—metal transfer men, furnace firemen 78 to 83 cents, packers and operators 66 to 83 cents, utility men 60 cents.

Provision is made for grievance procedure.

KINGSTON, ONT.—ALUMINUM COMPANY OF CANADA, LIMITED AND UNITED STEEL WORKERS OF AMERICA, ALUMINUM DIVISION, LOCAL 343.

Agreement to be in effect from February 1, 1946, to January 31, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agent for all employees represented by the union. No discrimination because of union membership or non-membership.

Hours of work: 48 per week—shifts of 8 hours, 6 days a week to rotate in a forward direction weekly. Six specified holidays to be observed, 4 of which are paid holidays. Vacation: one week with pay after one year's service of at least 1,800 hours (exclusive of overtime) and after 7 years' continuous service with company 2 weeks with pay. Ten minute rest periods with pay during each half of shift except where shift workers are allowed 30-minute lunch period with pay, then rest period to be considered as part of lunch period.

Wage rates to be those authorized by the Ontario Regional War Labour Board.

Provision is made for a Labour-Management Production Committee, seniority rights and grievance procedure.

KINGSTON, ONT.—ALUMINUM COMPANY OF CANADA, LIMITED AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 54.

Agreement to be in effect from February 19, 1946, to February 18, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agent for all employees represented by the union.

Hours of work the same as those in the agreement between this company and the United Steelworkers of America, Aluminum Division, Local 343, summarized above.

Hourly wage rates: die and machine shops—toolmaker, die maker and die sinker 97½ cents to \$1.17½, precision inspector, machinist and roll grinder 87½ cents to \$1.07½, heat treater 87½ cents to \$1.02½, improver A 67½ to 82½ cents, cribkeeper 62½ to 72½ cents, crane operator B 62½ to 67½ cents, janitor 60 to 67½ cents, improver B and laboratory helpers 57½ to 65 cents, machine labour 60 to 62½ cents and sweeper 57½ cents; maintenance department—machinist 87½ cents to \$1.07½, mechanic A 92½ cents to \$1.02½, electrician, plumber, welder, saw filer and carpenter 82½ cents to \$1.02½, painter 92½ cents to \$1.02½, pyrometrist A 82½ to 97½ cents, blacksmith 82½ to 92½ cents, mechanic B 85 to 90 cents, saw grinder 67½ to 82½ cents, improvers 75 to 82½ cents, pyrometrist B 72½ to 77½ cents, cribkeeper, helpers and oilers 62½ to 72½ cents, driller 60 to 67½ cents, general labour 57½ to 60 cents; maintenance department, heating section—engineers fourth to second class 62½ to 97½ cents.

Provision is made for a Labour-Management Production Committee, seniority rights and grievance procedure.

Manufacturing: Non-Metallic Mineral and Chemical Products

QUEBEC, P.Q.—LA BRIQUE CITADELLE LIMITEE AND L'UNION FEDERALE DES EMPLOYES DE LA BRIQUE DE QUEBEC, LOCAL 103.

Agreement to be in effect from March 18, 1946, to March 18, 1947, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the sole collective bargaining agent for all eligible employees. All employees must be union members. Check-off: the company agrees to deduct the dues of union members who so authorize and remit same to the union.

Hours of work: 10 per day Monday through Friday, 5 on Saturday, a 55-hour week (except furnace firemen, etc. who work 12 hours a day, 6 days a week) amended by mutual consent for night shift to 11 hours per night, 5 nights a week. Overtime: time and one-half for work in excess of the above hours, double time for work on Sundays and 9 specified holidays.

Vacation: one week with pay for all employees with one year's service with the company.

Wage rates: the company and the union agree to submit a joint application to the Regional War Labour Board for a wage schedule with a minimum wage rate of 50 cents per hour for all employees.

Provision is made for seniority rights and grievance procedure.

*Transportation and Public Utilities:**Local and Highway Transport*

VICTORIA, B.C.—DOWELL'S PACIFIC TRANSFER AND STORAGE CO. LTD. AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS, VANCOUVER ISLAND DIVISION 234.

Agreement to be in effect from May 27, 1946, to May 26, 1947, and thereafter subject to notice. The company recognizes the union as the sole collective bargaining agent of the employees covered by the agreement. All employees, members of the union at the time of the signing of the agreement, shall remain members of the union in good standing during the life of the agreement and all new employees shall within 60 days of starting to work for the company become and remain union members in good standing. Check-off: all union members to authorize the company to deduct and pay over to the union any monthly dues, fines or assessments.

Provision is made for seniority rights and grievance procedure.

Service: Business and Personal

WINNIPEG, MAN.—THE CANADIAN PACIFIC RAILWAY COMPANY (ROYAL ALEXANDRA HOTEL) AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS.

Agreement to be in effect from September 1, 1945, to August 31, 1946, and thereafter subject to 30 days' notice.

Hours of work: 8 per day, exclusive of meal period, a 48-hour week, except where it has been the practice to work less than 8 hours per day or 48 hours per week. Where the work is of an intermittent nature, there being no work for periods of more than one hour's duration, trick split assignment may be established only by mutual agreement between the accredited representatives of the union and the company. This rule may be applied only to the staffs of the catering, chefs', stewards', nousekeepers', service departments, telephone operators, cashiers and tavern. Split trick assignments in the catering department to be confined to not more than 3 tours of duty, a total of 8 hours work, within a spread of 13½ consecutive hours in any day; in the chef's and steward's departments to not more than 2 tours of duty, a total of 8 hours' work, within a spread of 12½ consecutive hours in any day; in the housekeeper's department to not more than 2 hours of duty, a total of 8 hours' work, within a spread of 13 consecutive hours in any day or on alternate days; for the service department, telephone operators and cashiers to not more than 2 tours of duty on alternate days within a spread of 16 consecutive hours in any such day; for tavern employees to be mutually arranged. Both hourly and monthly rated employees may be allowed Saturday afternoon where it can be arranged and when the interests of the hotel will not suffer thereby, in which event service in excess of 8 hours per day in the previous 5 days may be required to bring the total hours to 48 for the week. Overtime: except as otherwise provided, time

worked by proper authority by employees on regular assignment in excess of 8 hours continuous with, before or after the regularly assigned hours of duty shall be considered overtime and paid on the actual minute basis at the rate of time and one-half times the pro rata rate. Regularly assigned employees shall be assigned a regular seventh day off duty each week, preferably Sunday. Employees required to work on their assigned day off duty shall be paid at one and one-half times the pro rata rate with a minimum of two hours and forty minutes for which two hours and forty minutes service may be required. Vacation: existing practices under which annual vacations with pay to hotel employees are allowed to be continued. Free transportation and leave of absence: transportation shall be granted in accordance with the standard regulations of the company. Free transportation over the company's lines and leave of absence without pay shall be granted employees to attend general meetings upon proper request being made and if the requirements of the service permit.

Regularly assigned employees temporarily assigned to duties as waiters or waitresses on special functions during their regular working hours will be paid in addition to their regular rate of pay as follows: breakfast or luncheon functions 75 cents, dinner functions \$1.

Provision is made for promotional training, rehabilitation, seniority rights and grievance procedure.

REGINA, SASK.—THE CANADIAN PACIFIC RAILWAY COMPANY (HOTEL SASKATCHEWAN) AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS.

This agreement is for the same period and is similar to the agreement with the Royal Alexandra Hotel employees at Winnipeg as summarized above with these exceptions:—

Hours of work: same as above except split-trick assignments in catering department confined to not more than 3 tours of duty, a total of 8 hours' work within a spread of 14 consecutive hours in any day; in the chef's and steward's departments and for telephone operators not more than 2 tours of duty within a spread of 13½ consecutive hours in any day; in the housekeeper's department to not more than 2 tours of duty within a spread of 14 consecutive hours in any day; for elevator operators not more than 2 tours of duty on alternate days within a spread of 16 consecutive hours in any such day; for porters in the service department not more than 2 tours of duty within a spread of 14½ consecutive hours in any day; for relief clerks not more than 3 tours of duty within a spread of 13½ consecutive hours in any day; for tavern employees to not more than 2 tours of duty within a spread of 13½ consecutive hours in any day; and for troublemen to not more than 2 tours of duty within a spread of 12 consecutive hours in any day.

Regularly assigned employees assigned as waiters or waitresses on special functions during their regular working hours will be paid, in addition to their regular rate of pay, 75 cents for breakfast, luncheon or dinner functions.

CALGARY, ALBERTA.—THE CANADIAN PACIFIC RAILWAY COMPANY (PALISER HOTEL) AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS.

This agreement is for the same period and is similar to the agreement with the Royal Alexandra Hotel employees at Winnipeg as summarized above with these exceptions:—

Hours of work: same as above except split trick assignments in catering department confined to not more than 3 tours of duty, a total of 8 hours' work, within a spread of 14 consecutive hours in any day; in the chef's and steward's departments to not more than 2 tours of duty within a spread of 12 consecutive hours; in the housekeeper's department to not more than 2 tours of duty within a spread of 14 consecutive hours; in the service department and for cashiers to not more than 2 tours of duty, on alternate days, within a spread of 16 consecutive hours in any such day, or 2 tours of duty within a spread of 12 consecutive hours in any day; for staff waitresses to not more than 3 tours of duty within a spread of 12½ consecutive hours in any day; for telephone operators to not more than 2 tours of duty within a spread of 11 consecutive hours in any day.

Regularly assigned employees assigned as waiters or waitresses on special functions during their regular working hours will be

paid, in addition to their regular rate of pay, 75 cents for breakfast, luncheon or dinner functions.

VICTORIA, B.C.—THE CANADIAN PACIFIC RAILWAY COMPANY (EMPRESS HOTEL) AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS.

This agreement is for the same period and is similar to the agreement with the Royal Alexandra Hotel employees at Winnipeg as summarized above with these exceptions:—

Hours of work: same as above except split trick assignments in the catering department and for staff waitresses will be confined to not more than 3 tours of duty, a total of 8 hours' work, within a spread of 14 consecutive hours in any day; in the chef's, steward's, housekeeper's and service departments to not more than 2 tours of duty within a spread of 12 consecutive hours in any day; for cashiers to not more than 2 tours of duty on alternate days within a spread of 15 consecutive hours in any such day; for the Crystal Garden to not more than 2 tours of duty within a spread of 10 consecutive hours in any day.

Regularly assigned employees assigned as waiters or waitresses on special functions during their regular working hours will be paid, in addition to their regular rate of pay, 75 cents for breakfast, luncheon or dinner functions.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *Labour Gazette*, January, 1943, p. 86. Proceedings under this act and earlier legislation have been noted in the *Labour Gazette* monthly since June, 1934.

Recent proceedings under the Act include the amendment of seventeen agreements and

the correction of four of them, all of which are noted below. Barbers and hairdressers in Hull requested an amendment in the May 18 issue of the *Quebec Official Gazette*; a request for an amendment for the barbers' and hairdressers' agreement at Chicoutimi was gazetted May 25. Requests for new agreements for retail stores in Chicoutimi and for longshoremen, shipliners and checkers and coopers (ocean navigation) at Montreal were published June 1. Requests for the amendment of the clockmakers' agreement at Montreal and for the amendment of the agreement for the paper box industry (uncorrugated) for the province were also gazetted June 1. Requests for amendments of agreements for grocers and butchers in Sherbrooke, retail stores at Mégantic and Windsor, for tannery employees for the province, plumbers in Hull and barbers and hairdressers at Sherbrooke were gazetted June 8. Requests for a new agreement for the printing trades in Montreal and for amendments to the agreements for the paper box industry (uncorrugated) for the province, for commercial employees, Farnham, and for hospital employees at Sherbrooke were all gazetted June 15.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Mining, Non-Ferrous Smelting and Quarrying

BUILDING MATERIALS, PROVINCE OF QUEBEC

See below under "Manufacturing: Non-metallic Minerals, Chemicals, etc."

Manufacturing: Vegetable Foods

BAKERS, QUEBEC

An Order in Council, dated May 28, gazetted June 8, and corrected June 15, amends the previous Orders in Council for this industry (L.G., June, 1941, p. 703; Sept., 1943, p. 1253; Sept., 1944, p. 1140; Sept., 1945, p. 1341). This amendment does not affect the summary already given.

BAKERS AND SALESMEN, THREE RIVERS

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., March, 1938, p. 334; March, 1940, p. 281; Nov., 1942, p. 1347; June, 1945, p. 872).

Weekly wage rates: journeymen bakers, and pastry cooks from \$22.70 to \$29.70, apprentices from \$11.70 during first year to \$17.70 during third year. Bakers selling bread to salesmen who then resell it to the consumers must pay such salesmen a minimum of \$17 per week for their work, or if such salesmen furnish their vehicle, a minimum of \$27 per week. The bakeries and pastry shops operating on this basis will be responsible for the wages of such employees.

Vacation with pay: three days with pay shall be granted to every baker or salesman with one year's service, one week with pay after two years' service—remuneration for said vacation to be based upon the minimum wage rate set by the present decree. Choice of vacation period is on a seniority basis.

All general conditions previously applying to bakers and bakeries to apply also to pastry-cooks and pastry-cooks' shops.

Manufacturing: Textiles and Clothing

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated May 16, and gazetted May 25, extends the term of the previous Orders in Council for this industry (L.G., April, 1945, p. 517; May, 1946, p. 627, and previous issues) to August 1, 1946.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

An Order in Council, dated May 10, and gazetted May 18, extends the term of the previous Orders in Council for this industry (L.G., Feb., 1946, p. 187, April, p. 499, and previous issues) to August 1, 1946.

Manufacturing: Non-Metallic Minerals, Chemicals, Etc.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated May 28, and gazetted June 8, amends the previous Order

in Council for this industry (L.G., Sept., 1944, p. 1141). This amendment does not affect the summary already given.

Construction

BUILDING TRADES, CHICOUTIMI

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., March, 1945, p. 349; May, 1946, p. 628, and previous issues). If lodging and board are supplied by employer, not more than \$2 per room per month and \$1 per day for board may be charged.

BUILDING TRADES, SHERBROOKE

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., Oct., 1942, p. 1209; Feb., 1943, p. 220, Aug., p. 1131; Nov., 1944, p. 1368), "Zone I" and "Zone II" are replaced by the following: "Zone I:—The city of Sherbrooke and the town of Farnham and the territory comprised in a radius of 5 miles from their limits". "Zone II:—The cities of Granby and Drummondville, the town of Cowansville and the territory comprised in a radius of 5 miles from their limits".

BUILDING TRADES, MONTREAL

An Order in Council, dated May 10, and gazetted May 25, extends the term of the previous Orders in Council for this industry (L.G., Feb., 1946, p. 187, April, p. 499, May, p. 628 and previous issues) to July 1, 1946.

Trade

RETAIL STORES, QUEBEC

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., April, 1943, p. 490; August, 1944, p. 1007, Sept., p. 1142; May, 1946, p. 629, June, p. 783, and previous issues.) "L'Association professionnelle des Employés de Bureau du District de Québec inc." is no longer considered as co-contracting party.

WHOLESALE FOOD STORES, QUEBEC

An Order in Council, dated May 10, and gazetted May 18 amends the previous Order in Council for this industry (L.G., July, 1944, p. 868). "L'Association professionnelle des Employés de Bureau du District de Québec inc." is no longer considered as co-contracting party.

Another Order in Council, dated May 16, gazetted May 25 and corrected June 15, also amends the previous Order in Council. Agreement to be in effect to May 1, 1947, and thereafter from year to year subject to notice. The decree now applies to the cities of Quebec and Levis and all municipalities within a radius of 50 miles from their limits. Territorial jurisdiction is divided as follows:

Zone I:—The cities of Quebec and Levis and the municipalities within a radius of 25 miles from their limits.

Zone II:—The remainder of the territorial jurisdiction.

Hours: stationary enginemen and firemen other than first-class chief enginemen, 54-hour week, but from January to April 1 there shall be a 48-hour week. However, in establishments dealing in fruit, vegetables, fish, and meat mashes, a 53-hour week throughout the year. Office employees male and female, a 44-

hour week. All other employees except occasional hands, common labourers (male and female) watchmen and boiler (not stationary) firemen, personnel and administration employees and enginemen working as first-class chief enginemen, a 48-hour week throughout the year. For establishments dealing in fruit, vegetables and fish, a 53-hour week during June, September, October, November and December and a 48-hour week during all the other months.

Overtime is payable at time-and-one-half, with the exception of certain classes of workers.

Wages: Zone I—wage schedule is the same as the one previously in effect; Zone II—same as Zone I less 10 per cent. Vacation: one week or six non-consecutive days with pay each year between May 15 and October 15 for employees with at least one year's service. An employee may receive an equivalent remuneration in lieu of vacation. Certain specified classes of employees to be paid double time if their services are required for the 11½ kept holidays.

A new part of the agreement is added, covering commercial salesmen in the industry. The working week for a commercial salesman or representative shall consist of 5 days, Monday to Friday inclusive. He shall report to his employer's office every Saturday morning to give an account of his work and expenses and to receive instructions; no work Saturday afternoon. The duration of any trip exceeding 5 consecutive days to be determined by the employer alone; the duration of any trips exceeding 2 consecutive weeks may be fixed by an agreement between the employer and the employee.

Minimum wage rates: Zone I—from \$20 per week during first 6 months to \$30 after the third year's selling in the line; Zone II—same as Zone I less 10 per cent. When the employee is paid on a commission basis, his income shall be adjustable at least once a year or when the employment comes to an end. Necessary travelling expenses, 3 meals per day and suitable lodging to be paid by employer for outside trips. The amount of wages to be paid a commercial salesman who works for several employers to be agreed upon, in writing, by the salesman and all his employers.

HARDWARE AND PAINT TRADE, QUEBEC

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G. Oct., 1943, p. 1381; June, 1944, p. 754; Oct. 1945, p. 1520 and previous issues). "L'Association professionnelle des Employés de Bureau du District de Québec inc." is no longer considered as co-contracting party.

TRADE AND OFFICE EMPLOYEES, JONQUIERE, ARVIDA AND ST. JOSEPH D'ALMA

An Order in Council, dated May 10, gazetted May 18, and corrected May 25, amends the previous Orders in Council for this industry (L.G., April, 1945, p. 518, Aug., p. 1199). Hours: 50-hour week for female employees and 56-hour week for male employees in commercial establishments.

Service: Business and Personal

HOSPITAL AND CHARITABLE INSTITUTION EMPLOYEES, SHERBROOKE

An Order in Council, dated May 28, and gazetted June 8, amends the previous Order in Council for this industry (L.G., Nov., 1944, p. 1369). Orderlies shall receive an additional \$2 per week for night work. Enginemen to be paid 60 to 70 cents per hour; firemen 50 cents; elevator men, night watchmen \$18 per week; cleaners (male) \$21 per week for first year and \$22 for second year; cook's helpers \$18 to \$22.

BARBERS AND HAIRDRESSERS, SHERBROOKE

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., March, 1946, p. 318, April, p. 499, and previous issues). Territorial jurisdiction for male and female hairdressers now comprises the city of Sherbrooke and within a radius of 10 miles from its limits, Magog and within 8 miles from its limits, East Angus and Megantic and within 5 miles from their limits. Hours for hairdressers: hours are fixed, with Wednesday a half-holiday in 7 months of the year in Magog.

BARBERS AND HAIRDRESSERS, JOLIETTE

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., January, 1944, p. 70, September, p. 1143; January 1945, p. 71; February 1946, p. 187, March, p. 318) by deleting the following paragraph: "However, within the limits of the City of Joliette, the Monday holiday applies to every month of the year in the hairdressing parlors and the hours of work shall end at 7.00 p.m. on Saturday and holiday eves."

HAIRDRESSERS, MONTREAL

An Order in Council, dated May 23, and gazetted June 1, extends the term of the previous Orders in Council for this industry (L.G., July, 1941, p. 855; July, 1942, p. 857; April, 1943, p. 490, June, p. 813; July, 1945, p. 996) to June 7, 1947.

Another Order in Council, dated May 10, gazetted May 18, and corrected May 25, amends the previous Orders in Council for this industry. All work in excess of 48 hours in a week to be paid for at the pro rata of the regular salary paid to the employee. Apprentice manicurists to serve 12 months and to be paid from \$3 per week during the first three months to \$7 during fourth three months. Where board or lodging furnished by the employer, not more than \$5 per week for board and \$3 for lodging may be charged. Vacation: one week with pay for every employee with at least 12 consecutive months' service. Period of such vacation to be determined by employer. An additional regular week's pay may be given in lieu of above vacation with the approval of the parity committee.

BARBERS AND HAIRDRESSERS, VALLEYFIELD

An Order in Council, dated May 10, and gazetted May 18, amends the previous Orders in Council for this industry (L.G., Aug., 1943, p. 1131; March, 1945, p. 351, Oct., p. 1521). This amendment does not affect the summary already given.

Fair Wages Conditions in Dominion Government Contracts

WITH this issue the LABOUR GAZETTE resumes the publication of information regarding the application of the Fair Wages Policy of the Dominion Government to contracts awarded by various departments of the Government.

During the war years the publication of detailed information concerning government contracts was suspended for reasons of security. Commencing with the present issue, however, this information will again appear periodically, and the following article gives details of contracts awarded by various departments during the months of April and May.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 as a resolution of the House of Commons. Its purpose was to ensure that all government contracts should contain provisions to prevent abuses and to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work was to be carried out.

Subsequently a series of Orders in Council, adopted between 1907 and 1941, expressed the purpose of the Policy in greater detail. In addition, an Act of Parliament of 1930* made special provision for effectuating the Policy in regard to contracts for building and construction; although other government contracts continued to be covered by Order in Council.

There are thus two sets of conditions applicable to government contracts, those marked "A" which apply to building and construction work, and those marked "B" which apply in the case of contracts for the manufacture of various classes of government supplies and equipment.

In regard to "A" conditions, the clauses relating to wages and hours in the Fair Wages and Hours of Labour Act are as follows:

"All persons in the employ of the contractor, sub-contractor, or any other persons doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages:

The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council

may otherwise provide or except in cases of emergency as may be approved by the Minister."

Fair wages are defined in the Act as "such wages as are generally accepted as current for competent workmen in the district in which the work is being performed for the character or class of work in which such workmen are respectively engaged; but shall in all cases be such wages as are fair and reasonable".

This Act applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work; but also to workmen employed on works of this nature by the Government direct who are excluded from the provisions of the Civil Service Act. It applies also to such works as are assisted by Government aid in the form of contributions, subsidy, loan, advance or guarantee.

"B" conditions, applying to contracts for the manufacture and supply of goods, set forth certain specific minimum rates as a supplement to the general provision that rates must equal those accepted as current for competent workmen in the district in which the work is to be performed. These minimum rates are 35 cents per hour for male workers 18 years of age and over, and 25 cents per hour for females 18 years of age and over; for male or female workers under 18 the minimum rate is 20 cents per hour; and for beginners the rate may be 20 cents per hour, but must rise at the rate of 5 cents an hour every 4 weeks until the minimum for trained workers is reached. These rates apply to *all* employees of contractors and sub-contractors throughout an establishment of which any part may be engaged on Government orders.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of

*The Fair Wages and Eight-Hour Day Act, 1930, subsequently superseded by the Fair Wages and Hours of Labour Act of 1935.

Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours, on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be resident of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other

inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

Under the provisions of the Wartime Wages and Cost of Living Bonus Order, dated October 24, 1941 (P.C. 8253), the administration of the Fair Wage Policy was vested as from November 15, 1941, in the National War Labour Board, and remained in the hands of that body until December 9, 1943, when, with the passing of the Wartime Wages Control Order, 1943 (P.C. 9384), the administration reverted to the Department of Labour.

On May 17, 1943 (P.C. 3870), the Western Labour Board was established with powers to administer "fair wages" on all western defence projects for the Dominion Government in the Provinces of Alberta and British Columbia and in the Yukon and Northwest Territories. On September 11, 1945 (P.C. 5981), was approved revesting this authority in the Department of Labour.

Schedules Issued during Fiscal Year, 1946

During the fiscal year ending March 31, 1946, the Department of Labour issued 354 fair wages schedules and the Western Labour Board 85, making a grand total of 439. During the same period, the sum of \$2,381.59 was collected from employers who had failed to pay the wages prescribed in fair wages schedules, or the minimum rates specified in Order in Council (P.C. 7679), and adjustments were made in respect of 71 workers.

Schedules Prepared and Contracts Awarded During April and May

During the months of April and May, the Department of Labour prepared, on request, 110 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into during this period by the various Government departments appear hereunder:—

Group "A" Contracts

(1) Works of Construction, Remodelling, Repair or Demolition

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour, and also specify that the rates of wages set out therein are "minimum rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation, or by direction of a War Labour Board."

NATIONAL HARBOURS BOARD

Resurfacing concrete railway platform at Shed 18, Montreal Harbour, P.Q. Name of contractors, Charles Duranceau Ltd., Montreal, P.Q. Date of contract, June 5, 1946. Amount of contract, \$2,475. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asphalt rakers	\$.71
Asphalt tampers, smoothers and spreaders..	.66
Drill runners71
Firemen, stationary71
Labourers61
Motor truck drivers61
Motor truck driver and truck.....	1.61
Road roller operators (steam and gas)86
Compressor operators (gas or elec.).....	.76
Watchmen56

DEPARTMENT OF PUBLIC WORKS

Reconstruction of wharf at Rocky Point, Queen's County, P.E.I. Name of contractor, H. J. Phillips and Son, Charlottetown, P.E.I. Date of contract, April 10, 1946. Amount of contract, unit prices—approximately \$43,634.50. A fair wages schedule was included in the contract as follows:—

	Per Hour
Drivers	\$.46
Driver, horse and cart.....	.60
Driver, team and wagon75
Engineers, crane—steam, gas, elec.71
Enginemn, stationary55
Compressor operator—gas. or elec.55
Labourers46
Motor boat operators50
Motor truck drivers50
Motor truck driver and truck	1.50
Pile driver and derrick foreman.....	.80
Pile driver and derrick engineers.....	.70
Pile driver and derrick firemen55
Pile driver and derrick men (rigging, setting, signalling)60
Pile driver and derrick labourers50
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)55
Watchmen40

Installation of exit fire alarm system, Government Printing Bureau, Ottawa, Ont. Name of contractors, Fred A. Wilson Contracting Co., Ltd., Ottawa, Ont. Date of contract, April 16, 1946. Amount of contract, \$4,447. A fair wages schedule was included in the contract as follows:—

	Per Hour
Drivers	\$.56
Driver, team and wagon90
Electricians—inside wiremen96
Labourers56
Motor truck drivers60
Motor truck driver and truck	1.60
Painters and glaziers86

Construction of a Nurses' Home, Westminster Hospital, London, Ont. Name of contractor, L. C. Scott Construction Co., Ltd., Toronto, Ont. Date of contract, April 27, 1946. Amount of contract, \$947,500 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos Insulation Workers	\$.80
Blacksmiths86
Blacksmiths' helpers55
Boilermakers on construction or erection.....	.96
Brick and hollow tile layers.....	1.20
Brick and hollow tile layers' helpers (mixing and tempering mortar)55
Carpenters and joiners	1.00
Cement finishers70
Cement and concrete mixer operators:	
Steam75
Gas. or elec.65
Compressor operators—gas. or elec.60
Drivers51
Driver, team and wagon.....	.90
Drill runners60
Electricians—inside wiremen	1.10
Electricians—cable splicers	1.10
Elevator constructors	1.06
Elevator constructors' helpers76
Engineers, operating steam81
Engineers, crane—steam, gas., elec.85
Enginemn, stationary60
Hoist operators—tower—gas. or elec.60

	Per Hour
Labourers	\$.51
Lathers—metal80
Lathers—wood75
Linoleum layers65
Motor truck drivers55
Motor truck driver and truck	1.55
Ornamental iron workers75
Painters and glaziers70
Plasterers	1.06
Plasterers' helpers (mixing and tempering material)55
Plumbers and steamfitters96
Road grader operators:	
Horsedrawn55
Incl. team90
Gas65
Road roller operators—steam or gas75
Rodmen—Reinforced steel60
Roofers, felt and gravel: patent: comp.....	.55
Roofers, sheet metal80
Sheet metal workers80
Steam shovel engineers	1.06
Steam shovel firemen70
Steam shovel oilers60
Shovel operators—gas	1.06
Stonecutters	1.01
Stonemasons	1.20
Stonemasons' helpers (mixing and tempering mortar)55
Terrazzo layers96
Terrazzo finishers and helpers71
Tile setters, asphalt80
Tile setters, ceramic	1.06
Tile setters' helpers (all men assigned to help tradesmen)55
Tractor operators—	
Letourneau80
Small70
Watchmen46
Waxers and polishers—floor55

Reconstruction and extension of wharf, Clarke's Harbour, Shelbourne County, N.S. Name of contractor, Messrs. Barney Mosher & Merrill D. Rawding, Liverpool, N.S. Date of contract, April 20, 1946. Amount of contract, unit prices—approximately \$81,338. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.65
Boatmen—rowboats45
Carpenters and joiners65
Compressor operators—gas, or elec.55
Drill runners55
Engineers—operating—steam80
Firemen, stationary60
Hoist operators—gas, or elec.60
Labourers45
Motor boat operators50
Motor truck drivers50
Motor truck driver and truck	1.50
Pile driver and derrick foreman85
Pile driver and derrick engineers75
Pile driver and derrick men (rigging, setting and signalling)60
Pile driver and derrick firemen60
Watchman40

Construction of an extension to the breakwater, Meteghan, N.S. Name of contractors, Messrs. Edward L. Babine & John K. Taylor,

Yarmouth, N.S. Date of contract, April 23, 1946. Amount of contract, unit prices—approximately \$193,696.45. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.65
Blacksmiths' helpers50
Boatmen (rowboat)45
Compressor operators (gas or elec.)55
Drill runners55
Engineers, operating steam80
Firemen, stationary60
Hoist operators (gas or elec.)60
Labourers45
Motor boat operators50
Motor truck drivers50
Motor truck driver and truck	1.50
Steam shovel engineers	1.10
Steam shovel firemen65
Steam shovel oilers60
Tractor operators—	
Letourneau, etc.75
Small60
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber)55
Watchman40

Construction of a mental infirmary, Westminster Hospital, London, Ont. Name of contractor, Sterling Construction Co., Ltd., Windsor, Ont. Date of contract, April 18, 1946. Amount of contract, \$1,625,790 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos insulation workers	\$.80
Asphalt rakers65
Asphalt tampers, smoothers and spreaders ..	.55
Blacksmiths86
Blacksmiths' helpers55
Boilermakers on construction or erection ..	.96
Brick and hollow tile layers	1.20
Brick and hollow tile layers' helpers (mixing and tempering mortar)55
Carpenters and joiners	1.00
Cement finishers70
Cement and concrete mixer operators:	
Steam75
Gas, or elec.65
Compressor operators—gas, or elec.60
Drivers51
Driver, team and wagon90
Drill runners60
Electricians—inside wiremen	1.10
Electricians—cable splicers	1.10
Elevator constructors	1.06

	Per Hour
Road grader operators—	
Horsedrawn	\$.55
Incl. team90
Gas.65
Road roller operators—steam or gas.75
Rodmen, reinforced steel60
Roofers, felt and gravel: patent: comp.55
Roofers, sheet metal80
Sheet metal workers80
Shinglers, wood, asbestos	1.00
Steam shovel engineers	1.06
Steam shovel firemen70
Steam shovel oilers60
Shovel operators—gas.	1.06
Stoncutters	1.01
Stonemasons	1.20
Stonemasons' helpers (mixing and tempering mortar)55
Structural steel workers96
Terrazzo layers96
Terrazzo finishers and helpers71
Tile setters, asphalt80
Tile setters, ceramic	1.06
Tile setters' helpers (all men assigned to help tradesmen)55
Tractor operators—	
Letourneau80
Small70
Watchmen46
Waxers and polishers—floor55

Installation of automatic sprinklers and fire alarm systems at Government House, Ottawa, Ont. Name of contractor, Automatic Sprinkler Company of Canada Limited, Montreal, P.Q. Date of contract, April 6, 1946. Amount of contract, \$11,970. A fair wages schedule was included in the contract as follows:—

	Per Hour
Brick and hollow tile layers.....	\$1.16
Brick and hollow tile layers' helpers (mixing and tempering mortar)60
Carpenters and joiners96
Cement finishers75
Drivers56
Driver, horse and cart70
Driver, team and wagon90
Electricians (inside wiremen)96
Labourers56
Motor truck drivers60
Motor truck driver and truck	1.60
Painters and glaziers86
Plasterers	1.06
Plasterers' helpers (mixing and tempering material)60
Plumbers and steamfitters	1.12
Sprinkler installers	1.03
Watchman51

Installation of industrial (tile) flooring, Postal Terminal Building, Ottawa, Ont. Name of contractor, Mr. W. G. Stephenson, Toronto, Ont. Date of contract, April 4, 1946. Amount of contract, \$7,711. A fair wages schedule was included in the contract as follows:—

	Per Hour
Drivers	\$.56
Driver, team and wagon90
Labourers56
Mastic floor layers90
Mastic floor rubbers and finishers.....	.75
Mastic floor kettlemen75
Mastic floor labourers56

	Per Hour
Motor truck drivers.....	\$.60
Motor truck driver and truck	1.60
Tile setters—asphalt95
Tile setters' helpers (all men assigned to help tradesmen)60
Waxers and polishers—floor.....	.60

Reconstruction of wharf, Bagotville, P.Q. Name of contractor, Mr. Emile Gagnon, Jonquiere, P.Q. Date of contract, April 11, 1946. Amount of contract, unit prices—approximately \$238,878. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asphalt rakers	\$.65
Asphalt tampers, smoothers and spreaders... ..	.60
Blacksmiths70
Blacksmiths' helpers60
Carpenters and joiners75

The following contracts contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour, and also empower the Minister of Labour to deal with any dispute which may arise thereon.

DEPARTMENT OF FISHERIES

Overhauling of Fisheries Patrol Vessel *Nitinat*. Name of contractor, Victoria Machinery Depot Company, Limited, Victoria, B.C. Date of contract, May 31, 1945. Amount of contract, \$6,530.

DEPARTMENT OF RECONSTRUCTION AND SUPPLY

Construction of outside cable distributing camp and the installation of telephone equipment, Valcartier Camp, P.Q. Name of contractors, The Bell Telephone Company of Canada, Quebec, P.Q. Date of contract, May 28, 1946. Amount of contract, \$13,750.

Canadian Vocational Training

THE following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments:

- (1) The vocational and pre-matriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Retraining of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the provinces for vocational schools.

Cumulative Enrolment

From its inception up to May 31, 1946, the gross enrolment in all types of projects has been 506,420 made up as follows:

Discharged Members of the Forces ..	70,374
Industrial Supervisors and Foremen Training	120,709

There have been no further classes for War Industry or Service Tradesmen since the previous report—therefore, the balance of 315,337 comes under those projects.

Training of Discharged Members of the Forces

The number of new trainees enrolled during the month in all categories of training (5,499 men and 508 women) was substantially less than corresponding number enrolled during month of April.

The total number under training at the end of May was 38,333—(35,546 men and 2,787 women) with a breakdown as listed below:—

	Men	Women
Training in C.V.T. Schools ...	12,222	979
Training in Private Schools ..	3,531	1,343
Training in Industry	9,212	148
Training in Pre-Matriculation .	9,785	314
Training in Correspondence ..	796	3

During the month a substantial number of new classes and courses were opened in various regions. These classes were not only to increase capacities but also to initiate new types of training as requested by the veterans. As formerly reported, the item of necessary equipment for adequate and thorough training still presents a problem. It is felt, however, that recent regional surveys on capacities and equipment will suggest some solution in re-

distribution which may relieve the situation to a degree.

Recent regional surveys made on facilities in types of training indicate that training is now available for approximately 127 different occupations in 70 C.V.T. Schools. In addition to these centres, use is made of over 40 provincial and municipal schools. However, in spite of every effort being made to meet anticipated training demands as estimated, there has been an accumulated backlog of approximately 5,500 as reported on month ending May, 1946. Of this total, Motor Mechanics, Barbering and Hairdressing, Horology and Jewellery Repairing, made up a total of over 1,300 alone.

Active co-operation with National Employment Service has been maintained in connection with training veterans on the job in industry. The total industry at the end of May was 9,360 (Men 9,212—Women 148). This figure represents a gain of approximately 1,000 over those in training at end of April.

Indications are that there is a general "flattening out" of the peak in the demand of veterans for training. Seasonal employment probably an important factor at this time.

Training Apprentices

There has been an increase of 575 over April report in the number of veterans enrolled in Industry in the Building and Construction trades, as indicated by the total of 2,947. However, the veterans registered for training in the Building and Construction trades in C.V.T. Schools shows a total of 3,814 or a decrease of 372 over the April report. An earlier submission by National Joint Conference Board of Building and Construction Industry, shows a lack of balance between enrolments and anticipated requirements. There still is in general a shortage of veterans enrolling as plasterers, painters, carpenters and an excess enrolment for electricians, plumbers, sheet metal workers. Moreover, the backlog of over 1,000 of those waiting training in these designated trades does not change the picture to any degree.

Training of Ex-Service Women

There were at the month ending May 1946, approximately 6,200 women still in the Services. This figure indicates that approximately 39,108 of the service girls are now veterans. There have been 4,741 of these enrolled under the C.V.T. program since April 1, 1945, to

May 31, 1946, of which 508 were enrolled during the month of May 1946.

Out of this number, 1,035 women have graduated and have been placed in employment. Another 919 have discontinued training for a multiplicity of reasons, personal and circumstantial. This leaves 2,787 women under the C.V.T. program on the 31st May, 1946. It is noted that approximately 11 per cent of the discharged service women have received training up to April 1946. However, on a comparative basis approximately 1,200 women were discharged during the past month and 531 were enrolled under C.V.T. The percentage, therefore, for month ending May is raised to approximately 44.

Commercial training continues to answer the demand of about 46 per cent of our women veterans. Hairdressing and dressmaking rating as 2nd and 3rd.

It is interesting to note that courses in Practical Nursing are being so well received. There were 76 under training at the end of May 1946. All provinces have set up or are

setting up training approved by the Provincial Registered Nurses' Association with the exception of Saskatchewan and Quebec. There has not been an employment problem to date for the graduates of these classes. However, it is anticipated that before long the Department of Veterans Affairs will declare a policy re employment of trained Practical Nurses in their hospitals.

Home Service Training Centres are the scenes of some of the most enthusiastic classes. The only criticism is the small enrolments. It is hoped that when the Provincial Agreements are signed to allow for the training of civilian women that these classes may be filled to the capacity. Up to date the only classes given in these Centres are for brides or potential brides. Home Service Training Centres are at Calgary, Saskatoon, Toronto, Quebec and Moncton.

The C.V.T. Dressmaking and Designing Classes had an enrolment at the end of the month of 360. New classes are being opened to meet the demand for this type of training.

Youth Guidance and Placement Council

A Council for Youth Guidance and Placement in Ottawa, the first of its kind in Canada, was formally launched at a meeting held at Ottawa University on Monday, January 14, 1946, following preliminary organization work done by the Special Placements Division of the Unemployment Insurance Commission.

The Council was designed and brought into being for the purpose of co-ordinating the activities of educational authorities, organizations dealing with young people, and the Local Office of the National Employment Service in the matter of occupational guidance and placement in employment. It is anticipated that the pooling of information available through the schools, the clubs, and the Employment Service will make possible a better job of guidance and placement than where these various interested groups work independently of each other.

Mr. B. G. Sullivan, Ontario Regional Superintendent of the National Employment Service, and Mr. Howard Beattie, Director of Guidance for the Province of Ontario, attended the inaugural meeting and in brief speeches heartily endorsed the program of activity outlined by the Council.

The President elected at the meeting, Mr. Charles Hulse, Chairman of the Ottawa Public School Board, was installed by Mr. H. C. Hudson, who had acted as interim chairman. Mr. Hulse, in turn, recorded the election of other officers as follows:

Honorary President, Mr. Louis J. Trotter, Chief Commissioner of the Unemployment In-

urance Commission; First Vice-President, Rev. Father Shevenell, Head of Institute of Psychology, University of Ottawa; Second Vice-President, Miss Thelma D. Williams, Ottawa Welfare Bureau; Secretary, Major A. E. Wood, Youth and Vocational Guidance, National Employment Service; Treasurer, Mr. Arnold Fraser, Y.M.C.A.

Councillors elected were:

Mr. J. Enns, Ottawa Technical School; Mr. A. Haltrecht, Jewish Young People's League; Mr. R. Lachaine, Chairman, Management Committee, Ottawa Separate Schools; Mr. Frank Patton, Chairman, Ottawa Collegiate Institute Board; Mr. F. D. Whitworth, Dominion Bureau of Statistics; Miss Olive Zeron, Y.W.C.A.

The extent of the local interest is clearly indicated by the fact that the following organizations have become charter members in the Council:

Ashbury College; Elmwood School for Girls; Jewish Young People's League; Nepean High School Board; Ottawa Boys' Club; Ottawa Boy Scouts Association; Ottawa High School Board; Ottawa High School of Commerce Board; Ottawa Local Office of the National Employment Service; Ottawa Normal School; Ottawa Public School Board; Ottawa Separate School Board; Ottawa Welfare Bureau; St. Patrick's College; St. Jean Baptiste Society; University of Ottawa; University of Ottawa Normal School; Young Men's Christian Association; Young Women's Christian Association.

Proposed Amendments to Unemployment Insurance Act

Senate Legislation Withdrawn—Minister of Labour Explains in House of Commons Purposes of Suggested Changes

BILL L5 entitled, "An Act to Amend the Unemployment Insurance Act, 1940" was introduced in the Senate of Canada on May 16, 1946. It was read a second time and debated on May 23. The debate was continued on May 27 when it was referred to the Standing Committee on Immigration and Labour.

As the Bill involved expenditures of money, it was subsequently withdrawn from the Senate and introduced in the House of Commons as Bill No. 243 on July 3, 1946, by Hon. Humphrey Mitchell, Minister of Labour.

Outline of Proposed Amendments

Many of the clauses in this amending Bill are matters of clarification, re-arrangement, and changes in sections dealing with legal proceedings and coverage, which administrative experience has shown to be desirable.

The more substantive clauses include a widening of the interpretation of dependent; an increase of subsidiary earnings permitted from \$1.00 to \$1.50 per day; the calculation of the daily rate of benefit to the nearest five cents; requiring the Advisory Committee to report in respect of the same period as the Commission; making the Employment Service more directly responsible to the Minister; requiring employers to notify the engaging of employees and persons seeking employment to notify the Employment Service; and the transfer of sections of the Veterans Rehabilitation Act dealing with unemployment insurance to this Act.

Characteristics of Unemployment Insurance

In speaking to the resolution introducing the measure, Mr. Mitchell traced in some detail the progress of the Unemployment Insurance Act from its inception on July 1, 1941, to the present time. He declared that "the Canadian unemployment insurance scheme is based on sound insurance principles, many of which are common to both commercial and social insurance".

The first of these principles, the Minister stated, was "that there must be a reasonable interest in a contingency". In the case of an insured worker the contingency is his "contract of service" which "may fail in its

completion by a lay-off, by termination in accordance with its terms, or by mutual agreement."

The second principle is, he said, "that the indemnity, or benefit arising out of the contingency must be related to, but must not exceed, the loss or value of the insurable interest". The benefit may be related to part of the loss, Mr. Mitchell stated, "as in some forms of automobile insurance, or a cash benefit related to but less than earnings, as in unemployment insurance".

The third principle cited by the Minister, "is that due weight must be given to what might be called the moral hazard". In commercial insurance this is provided for by the selection of risks, but in the wider scope of unemployment insurance, proper safeguards are required in the public interest.

"The effect of any social legislation is dependent on the extent of the classes of persons covered", Mr. Mitchell said. From the beginning in July, 1941 "there was insured under the Unemployment Insurance Act almost all employment in industry, apart from the basic industries of agriculture, fishing, lumbering and logging, transportation by water and air as well as those excluded by reason of the wage ceiling of \$2,000". "The policy of the government," he asserted, "was to widen the scope of the Act as rapidly as possible."

Early Changes in Regulations

Administrative experience soon warranted certain changes in the regulations. The Minister pointed out that in 1942, the ceiling had been raised in cases of insured workers whose income went beyond \$2,000 as a result of extra wartime earnings. Then too, provision had been made for placing veterans of the war as nearly as possible in the same position that they would have had under the Act, if they had not served in the Armed Forces.

Specific mention was made to the legislative amendments passed in July, 1943. These raised the ceiling from \$2,000 to \$2,400 and the earnings ceiling was removed entirely for persons paid by the hour, day, week, or on a piece-rate. They also provided for the coverage of public utility employees.

Workers in "Safe Employments"

Mr. Mitchell referred to the question of permanency of employment in its relation to coverage under the Act and pointed out that "it is only by spreading the risk that a sound scheme is possible". "It should be recognized", he continued, "that even in employments regarded as most stable, unemployment is not unknown". He instanced the experience of Britain in the 1920's. At that time British workers in the so-called *safe* industries were permitted to withdraw from under the unemployment insurance regulations. The results were unfortunate, both for such workers and for the solvency of the British insurance fund.

"Included in the 1943 amendments", the Minister said, "was one giving the Governor in Council authority to extend coverage to excepted employments on joint recommendation of the Commission and the Unemployment Insurance Advisory Committee". This provision was applied in 1945 when employment in transportation by air, and in professional nursing (other than employment as a private duty nurse, or as a probationer) became insurable. Portions of the lumbering and logging industry have also been included. Employment in transportation by water presented some difficulties, notably in the coverage of deep sea vessels. Reciprocal arrangement with Great Britain and the United States will have to be completed in these cases. "There is now included in the Bill an amendment which will make insurable employment in transportation by water—both inland and deep sea", Mr. Mitchell said.

He explained in considerable detail the procedure used in establishing a claim for benefit, including the regulations and conditions with respect to "suitable employment". Concerning the latter feature the Minister stated:

"Suitable Employment"

"The Act also states clearly that employment is not to be regarded as suitable if it is employment in the claimant's usual occupation where the wages are lower or the conditions less favourable than those observed by agreement between employer and employee. Neither is employment suitable in another occupation where the wages are lower or the conditions less favourable than those he obtained in his usual occupation."

"On the other hand, it is likewise specifically provided that after a lapse of a reasonable interval from the commencement of unemployment, employment in another occupation is not to be considered *unsuitable* (in other words it is suitable) if the wages offered are

not lower and the conditions not less favourable than those obtaining in *that* occupation.

"It is not possible to consider whether a particular offer of employment is suitable in relation to an individual claimant at that time; what is not suitable to-day may well be suitable a month from to-day.

"The most careful consideration has been given to the guidance afforded insurance officers in adjudicating cases of refusal of employment which is apparently suitable, and reference has been made to both British and American experience in handling this problem.

"Some of the factors considered by insurance officers are the difference in the rate of wages between the usual occupation and the work offered; whether there would be any sacrifice of skills in accepting the job offered; the length of unemployment; whether there is any prospect of the claimant finding work with his former employer within a reasonable time, or whether there is any possibility of his finding work in what is his usual occupation.

"After an accident, for instance, a man may not be able to return to his former work, and he must consider a change in occupation immediately. Or a man who has reached retirement age for a given occupation cannot hold out for employment of that kind. Similarly, there are certain skills which were required during the war which have little or no place in a peace-time economy. Then there are always circumstances peculiar to an individual claimant—his family responsibilities, adaptability, age and so on, which affect his suitability for a job.

"Let me emphasize" Mr. Mitchell said, "that in no country has it been found practicable to legislate on what is suitable employment, because it is one thing one day for one claimant, and something else a month or two hence. It should always be remembered that if a claimant is not satisfied with an insurance officer's decision, he has a right of appeal to a Court of Referees, composed of representatives of employers and employees, and an independent chairman. In certain circumstances there is a right of appeal to the Umpire. Gradually there is being built up from decisions of the Umpire a most important and helpful guide to the interpretation of various provisions of the Act, which is of great assistance in striving for uniformity of action among those adjudicating claims".

Later on in the debate in the House of Commons the Minister made a further statement with respect to "suitable employment", as follows:—

In view of the provisions of the act and the conditions resulting from the war the commission has taken the view that a reasonable inter-

pretation can be made along the following lines:

1. Where claimants have had technical training and experience in a skilled occupation they should be allowed a considerable period to find work in their own occupation before being required to make a complete change in their occupation and sacrifice their training and experience. The extent of the change of occupation involved would have a bearing on the interval allowed. For certain specified groups of skilled workers, the commission has instructed its offices to allow a period of three months before a change of occupation is insisted upon, provided that employment in the claimant's usual occupation has a place in a peace-time economy and that he is not barred from the occupation by reasons of age, physical deterioration, et cetera.

2. Occupations which have many of the same characteristics may be segregated into groups. If employment is not available in the claimant's usual occupation he may be offered employment in another occupation in the group in which his usual occupation falls. Because of the similarity of the occupations in this grouping a comparatively short period of unemployment is a reasonable interval.

3. The extent of the contrast between wages and conditions of work in the usual occupation and the other occupation has a bearing on the period allowed before a change of occupation was insisted upon. The commission does not require claimants immediately to accept very much lower rates of wages. However, following the war period the employment available for some of them may use only pre-war skills and may be at lower rates of wages than those to which they have become accustomed during the war. The period allowed for a change of occupation which includes a lower rate is therefore made progressive. For instance, employment in another occupation at a wage rate of 5 cents an hour lower is considered suitable for some claimants after three weeks of unemployment, while an occupation paying a wage rate of 10 cents an hour lower would be considered suitable only after four weeks of unemployment.

4. Other factors taken into account by the commission are the number of years the claimant has been employed in his usual occupation, provided it is a skilled occupation; distance of work offered from the claimant's home; prospects of work in his own occupation, either in his own district or in another district; domestic responsibilities of that claimant and adaptability of the claimant, particularly where employment is in another part of the country.

5. Workers discharged from purely war work in plants, for example, shell-filling plants, where there are few if any similar skills required in peace-time industry, may be offered employment in another occupation with practically no interval allowed.

6. Persons who have been transferred from one part of the country to another to engage in war industry and who choose to return to the areas in which they formerly resided, may reasonably be expected to accept any work available in those areas without any interval.

7. Workers trained in specific war jobs with previous experience in some other occupation should be allowed only a short interval before being required to accept employment in an occupation in which they have had some experience.

Amendments Proposed in Bill

With regard to the amendments in the present Bill, the Minister drew attention to the fact that "nearly two-thirds relate to changes in references made necessary by a re-arrangement of some of the sections and by minor clarifications of old sections which experience has shown as desirable".

Of the other changes he drew attention particularly to the following:

"Clause 3 of the Bill permits coverage of persons whose status as employees has given rise to some argument; for example, men paid on a commission basis may be either employees or independent contractors. On the other hand, Clause 36 excepts from coverage a person who is virtually an employer; for example, a man who owns more than half the registered stock of a corporation.

"Clause 6 of the Bill permits repeal of section 23(2) of the Act if the present proposal in the Bankruptcy Bill on priority of claims is approved.

"Clause 7 is a major re-arrangement of the present section in order to set out in a more straightforward manner the conditions on which benefit will be paid.

"It also increases the earnings permitted from subsidiary employment from \$1.00 to \$1.50 a day; widens the group of dependents in respect of whom the increased benefit rate may be paid; authorizes benefits to be calculated to the nearest five cents, and also permits small errors to be cleared from the books of the Fund. Clause 7 takes up about one-third of the Bill.

"Clauses 10 and 11, together with part of Clause 7, clarify the question of appeals to the Umpire.

"Part of Clause 14 assures that benefits obtained by false pretences will not be retained by the claimant.

"Clause 16 extends the time in which proceedings for an offence may be commenced from three months to twelve months of evidence of the offence coming to the knowledge of the Commission.

"Part of Clause 18 permits benefit to be paid where contributions were not paid due to an erroneous decision of an officer of the Commission.

"Clause 20 grants authority to pay expenses which may be incurred if it becomes necessary to pledge securities held in connection with the Fund.

"Clause 21 makes the date of the report of the Advisory Committee the same date as that of the Commission.

"Clause 22 permits gradual extension of coverage to lumbering and logging.

"Clause 23 makes the National Employment Service responsible to the Minister and permits it to carry out additional duties not within its formal functions.

"Clause 24 transfers to the Act sections of the Veterans Rehabilitation Act dealing with unemployment insurance, with some enlargement relating to veterans of allied nations and certain merchant seamen. In this connection Clause 32 repeals the relative sections of the Veterans Rehabilitation Act.

"Part of Clause 25 continues the requirements that employers report engagement of employees and that persons seeking employment notify the Employment Service.

"Clauses 33 and 34 extend coverage to Merchant Seamen".

Responsibility for Employment Service

Explaining in more detail the principle of ministerial responsibility in respect of the employment service, Mr. Mitchell said:

"The efficient administration of the Unemployment Insurance Act requires an effective employment service. The problems of war made it abundantly clear that a national employment service has other important functions to fulfil. The complexity of post-war conditions, the conviction that employment must be provided for all who want to work show that the employment service has still to play a much larger part in our national economic life than that connected with unemployment insurance.

"The National Employment Service should and must become a keystone in the carrying out of plans of the Department of Veterans Affairs, the Department of Reconstruction, the Department of Transport, the Department of

Agriculture and the Departments of National Defence in their various activities for reconversion and re-establishment.

"There must be the closest possible working arrangement between Departments at the ministerial level, and the Minister of Labour must have detailed knowledge and control over the employment service* so that he can give his colleagues the co-operation necessary to carry the reconversion plans to a successful conclusion.

"Then there are cases where special financial or other curative measures are necessary. Such cases include employment problems of youth, of older persons who are not pensionable, of persons not covered by unemployment insurance, as well as problems associated with apprenticeship, and encouragement of movements of manpower to agriculture (one of the most important responsibilities we face at this time), basic industries or domestic service. More efficient Dominion-Provincial arrangements to deal with these matters would be possible where the Minister could issue direct instructions to the Employment Service".

Experience of Other Countries

With respect to the employment services in other countries Mr. Mitchell said: "In the administration of the employment service and unemployment insurance, Great Britain has divided authority at the top level between a Ministry of Labour in charge of employment, and a Ministry of National Insurance in charge of unemployment insurance and other social security benefits. The

*Section 23 of the Amending Bill repeals Section 88 of the Act and the following is substituted therefor:

"88. (1) The Commission shall organize and maintain an employment service for Canada and in respect of the administration of that service shall be responsible to the Minister.

(2) It shall be the duty of the Commission in organizing and maintaining such employment service, to collect information concerning employment for workers and workers seeking employment and, to the extent the Commission considers it necessary, to make such information available at the employment offices, with a view to assisting workers to obtain employment for which they are fitted and assisting employers to obtain workers most suitable to their needs.

(3) The employment service shall in relation to unemployment insurance, perform such duties under this Act as may be prescribed by the Commission, and undertake such other services in the interests of workers and employers as the Commission in the exercise of its powers may prescribe.

(4) The Commission shall assume and carry out such other duties and responsibilities as the Governor in Council, on the recommendation of the Minister, may require from time to time and, in respect of such other duties and responsibilities, shall be responsible to the Minister."

long experience of Great Britain in matters of this kind. makes worthy of note her action in determining this to be the most desirable line of action between Parliament and the administrators concerned.

"In the United States, the Department of Labour and the Social Security Board have each had a hand in administration of the Federal Employment Service, which in turn are separated from the State unemployment compensation authorities. At present, there is a move on foot to vest complete control of the employment service in the Department of Labour.

"In New Zealand, the employment service will come under a newly created Ministry of Employment. Their Social Security Department, which will be responsible for unemployment compensation policy at top levels, will have no authority over the employment service. Australia is to follow New Zealand's lead with a Commonwealth Employment Service directly responsible to the Minister of Labour and National Services, and free to act independently of the Department of Social Services.

"Thus the plan proposed for Canada follows the trend that experience in other parts of the world has found desirable in that it seeks to make the employment service directly responsible to the Minister of Labour,

rather than to have the chain of authority directed through the Unemployment Insurance Commission."

"It should be noted" the Minister stated, "that sixty per cent of the money voted by Parliament for the activities carried out by the staff of the Commission is spent for work not covered by the Act.

"If this sixty per cent is a responsibility of the Minister, it is submitted that it is the duty of the Minister to exercise supervision of the employment service, because it is through that service and by its staff that money voted is spent.

"Unemployment insurance and the employment offices are a part of the general social security program. They are primarily concerned with one of the most important fields of national welfare, the provision of insurance payments during periods of unemployment and the movement through the employment offices of persons in search of gainful employment.

"It has facilities to deal with veterans and to meet the problems of persons requiring vocational guidance, or special attention due to physical handicap. It is already taking its proper place in the minds of both workers and employers—a place which they see is necessary in any plan to maintain a high and stable level of employment."

Activities of Unemployment Insurance Commission*

Analysis of Claims and Benefit for May—Insurance Registrations— The Fund—Decisions of Umpire

THE number of claims for Unemployment Insurance benefit recorded in local offices across Canada was at about the same level during May as during April. In May 34,777 claims were filed compared with 35,781 in April and 8,825 in May, 1945. Significant increases in the number of claims filed during May as against April were recorded in Ontario (plus 2,293) and British Columbia (plus 1,247). Significant decreases were recorded in New Brunswick (-507), Quebec (-3,168), Saskatchewan (-316) and Alberta (-554).

Although the number of cases of unemployment resulting in claims showed no marked change in May over April, a decline of 25,140 in the number of live claims at May 31, compared with April 30, indicates that the decline in recorded unemployment among insured persons on any given date that began in March, 1946, is continuing. Live claims at May 31 numbered 98,810 (74,130 males and 24,680 females) compared with 123,950 (94,979 males and 28,971 females) at April 30, and 16,645 (10,044 males and 6,601 females) at May 31, 1945. Thus the decline in recorded unemployment of insured persons at May 31, was proportionally greater for males than for females.

Claims adjudicated during May totalled 32,244 of which 23,285 were considered entitled to benefit and 8,959 not entitled to benefit. The chief reasons for non-entitlement were: "insufficient contributions while in insurable employment" (4,615 cases), "voluntarily left employment without just cause" (2,580 cases) and "discharged for misconduct" (416 cases).

During May a total of 127,866 persons received benefit payments amounting to \$5,221,870 for 2,719,294 compensated unemployed days compared with 158,168 persons who were paid \$7,011,579 for 3,446,271 days during April and 21,294 persons paid \$672,869 for 349,996 days in May, 1945.

The average duration of the unemployment compensated was, then, 21.3 days in May,

21.8 days in April and 16.4 days during May last year. The average amount of benefit paid per beneficiary was \$40.84 in May, \$44.33 in April and \$31.60 in May, 1945. The average amount of benefit paid per compensated unemployed day was \$1.92 in May, \$2.03 in April and \$1.92 in May, 1945.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at May 31, 1946, 2,355,166 employees were issued with insurance books and had made contributions to the fund at one time or another, since April 1, 1946 and 161,583 employers were registered as having insurable employees. Registrations by regions, as at May 31, 1946, are shown in Table 1.

Unemployment Insurance Fund

Total Employer—Employee contributions during May amounting to \$5,577,503.78 showed an increase of 6.9 per cent over the corresponding figure of \$5,218,820.38 in the same month last year.

Benefit payments in May this year amounted to \$5,218,914.32. This was 7.8 times the benefit payments in May last year when the amount paid was \$671,326.41.

Total revenue during May this year was \$7,258,574.49. After payment of benefits the net increase to the Fund was \$2,039,660.17.

Tables No's 6 and 7 Omitted from this Issue

The Unemployment Insurance Commission is reorganizing to some extent its system of collecting and collating certain of its statistical data. One result of this involves some modification in the form of Tables 6 and 7; "Active Claimants for Benefit by Occupations" and "Summary of Active Claimants by Sex and by Age Groups", respectively, which have been appearing monthly in the Unemployment Insurance section of the *Labour Gazette*. Data for these tables will, in future, be prepared by the Research and Statistics Branch of the Department of Labour. It is necessary, therefore, to omit Tables 6 and 7 in this number. They will appear in a somewhat modified form in forthcoming issues.

*Statistics (including tables) based on returns supplied by the Unemployment Insurance Commission and the Dominion Bureau of Statistics.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the LABOUR GAZETTE and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU.-B. 54

(Oct. 3, 1945)

The claimant, a welder, was laid off work as a result of his expulsion from his union, with which his employer had a "closed shop" agreement. He received benefit for a month and was notified of a position as a welder with a manufacturing company at the union rate of pay. He refused to accept the employment offered as the prospective employer operated an "open shop" and refused to employ him as a union member (specifically of his particular union). He was disqualified and the Court of Referees confirmed the disqualification—HELD: Section 32 of the Unemployment Insurance Act provides that a claimant shall not be disqualified for refusal to accept employment if the acceptance of that employment would cause him to lose the right to continue to be a member of a union. But as no proof whatsoever was submitted by the claimant that he would lose the right to continue to be a member of his union if he accepted the employment offered he should be disqualified since, without good cause, he refused an offer of suitable employment.

The material facts of the case are as follows:

The claimant, a single man, aged 33 years, was last employed by a ship repairs company as a welder, at \$1.00 per hour. He was employed by that firm from November 17, 1944 to April 3, 1945, when he was laid off as a result of his expulsion from the Boilermakers' and Iron Shipbuilders' Union, Local No. 1, with which the employer has entered into a

collective labour agreement which includes a "closed shop" clause.

The claimant filed his claim for benefit on April 11, 1945. His claim was allowed and he received benefit for 33 days, i.e., until May 29, 1945. On June 5, the claimant was notified of a position as a welder with a manufacturing company, at a rate of remuneration of \$1.00 per hour for an eight-hour day, the work offered being at the union rate of pay, under favourable conditions in the claimant's usual occupation, but the employer operated an "open shop." The claimant was ready to accept the position offered but insisted upon being employed as a union welder and, upon refusal of the employer to employ him under such conditions, he did not accept the position offered.

On June 6, the claimant was notified of a similar position with a construction company, under the same conditions as the employment previously offered. The claimant refused this second offer of employment for the same reasons.

In both instances, the Insurance Officer was of the opinion that the employment offered in each case was suitable employment for the claimant and that he had not shown good cause for his failure in refusing to accept the situations offered, and disqualified him under the provisions of Section 43 (b) (i) for a period of six weeks, commencing on the day of each refusal.

From this decision the claimant appealed to the Court of Referees and he was granted an oral hearing.

The Court unanimously disallowed his appeal and confirmed the disqualifications imposed upon him.

The Chairman of the Court of Referees granted the claimant leave to appeal to the Umpire.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons:

In support of his appeal the claimant submitted to me a voluminous brief which was very well prepared but which contains a great deal of irrelevant information. The claimant has been involved in protracted legal proceedings against the Union in connection with the attempts of the Union to expel him as a member but I do not find that those proceedings, interesting though they may be, have any direct bearing on the question before me for decision. There is no doubt whatsoever that the employment offered to the claimant is suitable employment within the meaning of

the Act. Throughout his brief the claimant refers to suitable and similar employment but, of course, the term "similar" is one not taken from the Unemployment Insurance Act and I must confine my findings to the term "suitable employment", which is the term used throughout the Unemployment Insurance Act.

The essence of the appeal is the contention of the claimant that, if he were to accept the employment in either of the plants which operate as open shops, he would lose his right to continue to be a member of the Union and that Section 32 of the Act provides that a claimant shall not be disqualified for refusal to accept employment if the acceptance of that employment would cause him to lose the right to be a member of the Union.

Notwithstanding the volume of the material submitted to me for consideration on this appeal, I do not find any proof whatsoever that the claimant would lose the right to continue to be a member of the Union if he were to accept the employment offered in an open shop. I would expect that, if there were any such union rule, it would be found in the by-laws of the Union but I have examined the by-laws with great care and find no indication of any such rule.

The proceedings between the claimant and the Union, which I have already mentioned, concerned the effectiveness of the Union's expulsion of the claimant and the question whether the claimant is or is not a member of the Union. I do not think the ultimate disposition of that question affects my decision in any way. If the claimant is not a member of the Union, then Section 32 of the Act, already mentioned, has no bearing on the case. If he is a member of the Union, then, as already indicated, there is no proof that his membership would be affected by acceptance of employment in an open shop.

CU.-B. 56

(Oct. 15, 1945)

The claimant entered into a contract for painting and carpentering, but left his employment voluntarily. The Court of Referees disqualified him for the receipt of benefit on the ground that the employment carried on by the claimant was an excepted employment, and the word "employment" in Section 43 (c) of the Unemployment Insurance Act did not apply—HELD: The claimant should be disqualified as the risk insured against under the Act is the risk of involuntary unemployment and no distinction can be drawn between a man voluntarily leaving insured employment and voluntarily leaving uninsured employment, as in either case he has voluntarily caused his unemployment.

The material facts of the case are as follows:

The claimant, a single man, aged 36 years, was employed as a painter and carpenter from July 20, 1945 to August 6, 1945, at which time he voluntarily left that employment.

The claimant applied for benefit on August 13 and the Insurance Officer was of the opinion that the claimant left his employment voluntarily without just cause and disqualified him in accordance with paragraph (c) of Section 43 of the Act, for three weeks ending August 27, 1945.

From this decision the claimant appealed to the Court of Referees which allowed the claimant's appeal and removed the disqualification.

The Court's decision was that the employment carried on by the claimant, which he left voluntarily, is an excepted employment and that the provisions of Section 43 (c) of the Act insofar as it refers to the word "employment" do not apply to excepted employment.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and the claimant disqualified for a period of three weeks from the date on which his decision is communicated to the claimant and gave as his reasons:

The relevant section of the Act reads as follows:

"43. An insured person shall be disqualified for receiving benefit—

(c) If he has been discharged from his employment by reason of his own misconduct or if he voluntarily leaves his employment without just cause,"

The principle underlying this particular provision of the Act and, as a matter of fact, of the Act as a whole, is that the risk insured against under the Act is the risk of involuntary unemployment. Adopting this principle, a person is disqualified for the maximum period specified under the Act if his unemployment is brought about by his own actions.

Following that principle, I cannot see how or why a distinction could be drawn between a man voluntarily leaving insured employment or voluntarily leaving uninsured employment. In either event, the fact is that he has voluntarily caused his own unemployment. I have no hesitation in saying that, where the term "employment" is used in Section 43 (c), it must be given its ordinary meaning and not limited to insurable employment. There is nothing in the section to suggest the limited interpretation arrived at by the Court of Referees.

Employment, Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment in Canada.

Employment at the beginning of May, 1946.—The trend of employment continued generally upward at the beginning of May, although the expansion was on a smaller scale than that indicated at April 1. The increase took place among men, there being a further decline in the number of women in recorded employment, according to reports received by the Dominion Bureau of Statistics.

Monthly data were tabulated from 15,867 establishments which employed a working force of 1,728,535 persons, an increase of 3,262, or 0.2 per cent, as compared with April 1. Based on the 1926 average as 100, the May 1 index was 169.2 as compared with 168.9 at April 1, 1946 and 175.5 at May 1, 1945. The latest increase was less than normal in extent, with the result that there was a falling-off in the seasonally-adjusted index. This fell from 178.9 at April 1 to 175.7 at the date under review.

Claims for unemployment insurance benefit.—In May, 34,777 claims for benefit were filed in local employment offices of the Unemployment Insurance Commission, compared with 35,781 in April and 8,825 in May, 1945. During the last six working days of May, 1946, 98,810 persons signed the live unemployment register. There were 127,866 persons receiving benefit in May, 1946, as compared with 21,294 persons in May, 1945.

Employment situation at June 20, 1946, as reported by Employment Offices.—Unemployment, as measured by unplaced applicants registered at employment offices, continued to decline during June. The number of unplaced applicants totalled 185,855 at June 20, as compared with 211,744 four weeks earlier.

Labour demand, on the other hand, remained substantially unchanged during June, in contrast to the sharp upward trend evident during the past few months. The number of unfilled

vacancies (exclusive of agriculture) totalled 114,419 (male 65,857 and female 48,562) at June 20.

Man-hours and hourly earnings at May 1, 1946.—Average hours per week worked by hourly-rated wage-earners employed in manufacturing was 43.0 during the week of May 1, as compared with 44.4 hours during the week preceding April 1. The average hourly earnings were 68.9 cents as compared with 68.4 cents at April 1.

Applications for Employment; Vacancies and Placements; May, 1946.—Reports received from the National Employment Service Offices of the Unemployment Insurance Commission during the four-week period May 3 to May 30, 1946, showed a gain in the average number of placements made daily when compared with the previous five weeks and a sharp decline with the four-week period May 4 to May 31, 1945. Under the first comparison except for minor losses in agriculture and public utilities operation, all industrial groups registered increases the most noteworthy being in services and construction. In comparison with the four weeks ending May 31, 1945, apart from a moderate gain in construction and minor increases in agriculture and mining all industrial divisions recorded losses, the most pronounced being in manufacturing, public utilities operation and forestry and logging. During the period under review there were 162,771 vacancies reported, 141,503 applications for employment and 73,398 placements effected in regular and casual employment.

Unemployment in trade unions at the close of the quarter ending March 31, 1946.—Returns from 2,463 local unions in Canada with a combined membership of 414,487 indicated an unemployment percentage of 1.9 at the end of the first quarter of 1946. At the end of December, 1945, 2,460 locals with a total of 410,089 members reported 3.0 per cent unemployed, while in March, 1945, 2,337 locals representing 421,779 members, registered 0.7 per cent unemployed.

Employment and Payrolls at the Beginning of May, 1946

THE trend of employment continued generally upward at the beginning of May, although the expansion was on a smaller scale than that indicated at April 1. The increase took place among men, there being a further slight falling-off in the total number of women in recorded employment. The Dominion Bureau of Statistics tabulated monthly data from 15,867 establishments which employed a working force of 1,728,535 persons. This number exceeded by 3,262 the staffs reported by the same firms at the beginning of April; the gain of 0.2 per cent was seasonal in character according to pre-war experience, but was substantially below the average at May 1 in the period since 1920. The movement at that date in each of the last three years had been decidedly retrogressive, so that the latest advance, though moderate, nevertheless tends to narrow the distance between the present curve of employment and those in the early spring of recently preceding years. Based on the 1926 average as 100, the latest index was 169.2, as compared with 168.9 at April 1, and 175.5 at May 1, 1945. The decline in the year amounted to 3.6 per cent; this reduction in the 12 months' comparison was the smallest shown in such a comparison in a period of many months.

As already stated, the latest increase was less-than-normal in extent, with the result that

there was a falling-off in the seasonally adjusted index. This fell from 178.9 at April 1 to 175.7 at the date under review.

Employment in all provinces except Quebec and New Brunswick showed improvement. The trend in most cities was also favourable. Among the leading industries, manufacturing, mining, communications, transportation, construction, services and trade reported heightened activity, the gains in construction being substantial. On the other hand, there were important seasonal losses in logging. Within the manufacturing industries, employment moderately advanced; there were considerable additions to the forces in iron and steel, lumber and other industries, but these were largely offset by seasonal declines in textile and tobacco factories.

Payrolls

The aggregate weekly salaries and wages reported at the beginning of May were lower than at April 1, in spite of the small increase in employment. The decline, amounting to 1.1 per cent, was mainly a result of time lost during the Easter holidays, which fell in the pay period for which statistics were furnished by many employers; in 1945, the observance of Easter in the final week of March had greatly affected the payrolls reported at April 1. The disbursements at the date under review

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

aggregated \$55,412,730, as compared with \$56,029,414 in the preceding period of observation. The latest total represented an average of \$32.06, as compared with \$32.48 at April 1. The per capita figures at May 1 in earlier years for which statistics are available were as follows: 1945, \$32.55; 1944, \$32.26; 1943, \$30.59 and 1942, \$28.59.

Based on the June 1, 1941, disbursements as 100 per cent, the index number of payrolls at the date under review was 137.6, as compared with 139.1 at April 1, 1946, and 145.4 at May 1 of last year. Thus, in the latter comparison there was a decline of 5.4 per cent in the indicated weekly salaries and wages, as compared with that of 3.6 per cent in the number of workers.

When figures for financial institutions are included, the latest survey shows a total of

1,802,960 persons in recorded employment, whose payrolls amounted to \$57,994,827. The same establishments had reported 1,799,784 employees at the first of April, when their disbursements in weekly salaries and wages had totalled \$58,603,386. The per capita figure in the nine major industrial groups, including finance, stood at \$32.17 at the beginning of May, as compared with \$32.56 at April 1, and \$32.58 at May 1 a year ago. In the latter comparison, there was a reduction of three per cent in recorded employment in these industries, accompanied by that of 4.7 per cent in the weekly payrolls.

Table II summarizes the latest statistics of employment and payrolls for the major industrial divisions, the provinces and economic areas and the leading industrial cities, with comparisons as at April 1, 1946, and May 1,

1945. Table I contains a monthly record for the eight leading industries as a whole and for manufacturing, showing the movements of employment and payrolls since 1943.

The disbursements of the co-operating firms at June 1, 1941, are used as the base in calculating the index numbers of payrolls. To

provide a comparison of the trends of employment and payrolls, the index numbers of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table I shows that in the period for which information on payrolls is available, the number of persons on the staffs of estab-

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

ishments in the eight leading industrial groups has risen by 10·8 per cent and the aggregate weekly earnings by 37·6 per cent. Including finance, the increase in employment from June 1, 1941, to May 1, 1946, amounted to 11·3 per cent, while the gain in the salaries and wages was 38·0 per cent. In previous reports the following facts have been cited as mainly responsible for the much greater rise in the payrolls than in employment: (1) the concentration of workers still existing in the heavy manufacturing industries, in spite of the declines which preceded and followed the cessation of hostilities; in this group, rates of any are above the average and there has been a considerable amount of overtime work; (2) the payment of cost of living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944; (3) the progressive up-grading of employees as they gained experience in their work and (4) the payment of higher wage-rates in a great many cases.

The increase in employment in manufacturing at May 1, 1946, as compared with June 1, 1941, amounted to 10·8 per cent, and

that in the indicated salaries and wages to 37·1 per cent. The advance in the same comparison in the non-manufacturing industries taken as a whole was also 10·8 per cent in the case of employment, but that in the payrolls was 38·1 per cent. The relative equality in the rates of increase in the two groups is at variance with the experience during the war, when activity in manufacturing was maintained at levels decidedly above those in many of the non-manufacturing classes.

With regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of paramount importance.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Sex Distribution of Persons in Recorded Employment

AS already stated, the co-operating firms in the eight leading industries reported a staff of 1,728,535 persons at May 1, of whom 1,339,259 were men and 389,276 were women, there being 775 of the former sex and 225 of the latter in each 1,000 workers in recorded employment. As compared with April 1, the number of men showed an increase of 3,898, or 0.3 per cent, but there

was a reduction of 636 women, a loss of 0.2 per cent. In the nine leading industries, in which there was a general increase of 3,176 persons, the number of women showed a decline of 1,041, or 0.2 per cent, at May 1 as compared with a month earlier, but among male employees, there was an increase of 4,217, or 0.3 per cent. The variation in the trends of recorded employment for men and

¹This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

women largely resulted from seasonal causes, there being important increases in those branches of industry which normally provide work mainly for the former sex, with curtailment in the divisions which ordinarily employ large numbers of females.

The latest ratio of women per 1,000 employees in the case of the eight major industrial groups was 225, as compared with 226 at April 1 and 227 at March 1. In the case of the nine leading industries, the proportion at May 1 was 236, as compared with 237 at April 1 and 238 at March 1. When the ratio of women was at its highest point at October 1, 1944, the number of women re-

ported in the eight industries constituted 261 per 1,000 workers, and in the nine major industrial divisions, 271 per 1,000. While the completion or the curtailment of war work is obviously an exceedingly important factor in the declines recently indicated in the numbers and the proportions of women workers, the seasonal element also enters into the situation to a considerable extent. The latter factor reduces the value of comparisons of the latest data with those obtained in the earlier enquiries into sex distribution, made as at October 1 in 1942-45, and at April 1 in 1944 and 1945.

Report on Employment Conditions, June, 1946

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE rate of decline in unemployment evident during the past few months was maintained in June. The discontinuance of unemployment insurance payments to unplaced applicants having agricultural experience has resulted in considerably more applicants being placed in farm work. The labour market has been able to absorb the influx of students and teachers temporarily seeking employment at this time. Expansion of employment opportunities, however, has been disrupted by the prolonged strikes throughout the country. The construction and transportation industries, especially, suffered severely from the labour unrest. This is reflected in the low level of demand at this time although seasonal activity in these industries is nearing its peak.

At June 20, the number of unfilled vacancies¹ exclusive of agriculture, totalled 114,419, as compared with 111,307, four weeks previous. Demand for women rose during the period more than offsetting the slight decline in male labour requirements. Unplaced applicants²,

on the other hand, dropped to 185,855 (147,594 male and 38,261 female) at June, 20. The Quebec and Ontario regions accounted for 71 per cent of demand but only 55 per cent of the applicants were in these regions.

Table I shows labour demand and supply by main occupational group and by sex as at June 20, 1946. Table II presents a monthly comparison of total labour demand and supply. Unfilled vacancies classified by main industry group and by sex, as at June 20, 1946, with absolute and percentage changes in total demand during the last month, are shown in Table III.

Clerical Workers

The labour situation for clerical workers improved slightly during June, with unfilled vacancies increasing and unemployment declining somewhat. Clerical workers seeking employment, however, are still in excess of demand. Demand continues to be mainly for young, single, well-educated and experienced help. Many of the applicants, on the other hand, are married, and in the older age bracket and cannot meet the qualifications presently specified by employers. Some employers are seeking junior office help but the low salaries offered make it difficult to place applicants in these positions. Increased seasonal activity within the country was reflected in a rise in labour needs among general clerical help and machine operators.

At June 20, there were 8,229 jobs available for clerical workers, while the available supply numbered 22,480. Demand for male workers was less than one-fifth the number of men seeking clerical positions. A shortage of female stenographers persists, with 3,059 required at the June date.

¹Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

²Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

Sales Workers

The demand for sales workers has remained practically unchanged during the past few months. The number of unplaced applicants, however, has been gradually falling off. At the end of June, the available supply outnumbered demand by almost three to one. The strict requirements now specified by employers prevent the referral of many of the presently unemployed sales workers. Thoroughly qualified help, however, is easily placed. Some of the jobs on file are on a commission basis but applicants, on the whole, are reluctant to accept this type of work.

At June 20, there were 4,722 sales clerks required across Canada while the unemployed in this occupation numbered 12,575.

Service Workers

The shortage of female service workers is acute throughout Canada. Demand for

workers in the summer resorts was met largely by the influx of students and teachers into the labour market during their summer vacation. There remains, however, an urgent need for additional help in homes, hotels, restaurants, and hospitals. The expansion within the service trades which has been necessary in order to cope with the general "urbanization" throughout the country, intensifies the problem of interesting women in this type of work. Although wages, in many cases, compare favourably with those paid clerical and sales workers, poor working conditions and the social stigma attached to service work enhance the difficulty of interesting applicants in service work. The institution of the Home Aide courses throughout the country has alleviated the shortage of domestic help somewhat, but demand still is greatly in excess of supply.

June 20 ".....	65,857	48,562	114,419	147,594	38,261	185,855

At June 20, there were 19,308 service workers required while unplaced applicants at that time numbered 13,796; demand for female service workers totalling 15,182 was triple the available supply. There were 4,510 domestic servants required at the June date, but applicants seeking this work numbered less than 800.

Skilled and Semi-skilled Workers

The sharp rise in unfilled vacancies in the skilled and semi-skilled occupations evident

since March levelled off during June. Repercussions from the labour unrest throughout Canada have counteracted the seasonal upswing and increasing labour demands of reconverted industries. Shortages of raw materials and skilled labour continue to hamper industrial expansion and these shortages are intensified by wide-spread strikes. At June 20, there were 41,679 positions available for skilled and semi-skilled workers.

Unemployment among skilled tradesmen declined by 15 per cent during June. The

drop was due largely to the decline in the number of male applicants seeking work in the Quebec and Ontario regions.

Textile Workers—Renovations, extensions, and erection of new plants continue in the textile industry, despite the strike wave within this industry. In some cases, cut-backs and lay-offs have been necessary in the secondary textile industries due to the shortage of materials resulting from strike-bound primary textile plants. Throughout the industry the need for experienced help persists with no immediate alleviation in sight. Although recruitment of trainees has met with fair success, many employment offices suggest that needle trade schools should be instituted to attract additional help to this line of work.

There were 8,791 textile workers required at June 20, while applicants seeking this type of work numbered 4,097. The need for female textile help outnumbered the supply by more than 4,000. Female sewing machine operators comprise over 50 per cent of the total number of textile workers required.

Lumber and Wood Products Workers—Demand for workers in the lumber and wood products occupations continues at a high level. River drives have been progressing satisfactorily with labour requirements generally well met. Additional workers were required for pulpwood cutting and orders for workers have been cleared to nearby local office areas. Settlement of the prolonged strike in the lumber industry in British Columbia will result in an increased demand for loggers if employers endeavour to meet production goals. Sawmills, generally, are operating at full capacity with a good supply of labour available. Orders are on file for cabinet makers, furniture finishers and polishers, but suitable applicants are in short supply.

There were 13,819 lumber and wood products workers required at June 20, with only 2,061 applicants interested in this type of work. Demand for loggers comprised 85 per cent of the number of lumber and wood products workers required at the June date.

Miners.—Expansion and development projects are in progress in many mining areas. The shortage of labour continues acute in some areas, but the lack of housing accommodation obstructs any extensive transfer of workers at this time. Demand for certificated coal miners remains at a high level as production goals rise to compensate for the depleted coal stocks resulting from the strike in the United States coal mines. Additional track layers, mine drivers, and underground workers were required during June.

Demand for miners totalled 1,585 at June 20, with available supply numbering 988; approximately 60 per cent of the labour requirements were for coal miners. There were 587 hard rock miners required at the June date, which was slightly less than the number reported four weeks earlier.

Construction Workers.—A contra-seasonal drop in the demand for construction workers took place during June. This decline reflects not only the depleted labour demand due to the crippling effects of the lumber industry strike, but also the fact that labour requirements are being quickly met by the employment offices. The latter statement is substantiated by the fact that the available supply of construction workers fell by 22 per cent during June. There is an acute shortage of skilled and experienced tradesmen. Many of the present unemployed workers registered for construction work are too old, and not proficient in the general trade, consequently cannot meet the qualifications now required by employers.

At June 20, there were 6,051 construction workers needed, with unplaced workers totalling 6,179. Approximately 50 per cent of the construction workers required were carpenters. Bricklayers and plasterers remain in short supply.

Miscellaneous Workers. — Unemployment among applicants registered as metalworkers has steadily declined during the past few months. With the completion of reconversion in many plants, employment opportunities for this type of worker have increased. Also, many of those classified as metalworkers have been absorbed in other occupations. A surplus supply still persists, however, with applications outnumbering vacancies by more than 10,000. There is a good demand for moulders and core-makers but labour turnover in this trade remains high, especially in the warm weather. Qualified mechanics are required throughout the Dominion but suitable applicants are difficult to obtain. Demand for women in laundries continued to increase during the month; at June 20, there were 775 spotters, dry cleaners, and finishers required.

Unskilled Workers

Unemployment among unskilled workers dropped by 15 per cent during June. Despite the general unsettled labour situation, unskilled workers are being absorbed into industry at a high rate. Expansion of food processing industries at this time has supplied work for many applicants. Demand for longshoremen and stevedores rose slightly during June and substantial increases are

expected shortly pending settlement of the seamen's union strike. Track maintenance workers, section hands, and extra gang men are needed with a good supply of labour available in most areas.

There were 38,369 unskilled workers needed at June 20 while unplaced applicants numbered 70,652. Demand for female unskilled workers was well above the available supply, particularly in the Quebec and Ontario regions.

Regional Analysis

The regional analysis which follows is based on the semi-monthly reports received from National Employment Offices across Canada. The report covers employment conditions during the month ended June 23, 1946.

Maritime Region

Agriculture.—Seeding operations have for the most part been completed. Lack of moisture is retarding growth; both the hay crop and the late grain crop are particularly affected. Labour demand has slackened markedly; in the past two weeks, farm vacancies have declined 50 per cent. It is difficult to make preparations to meet the labour demand for haying operations, as farmers are reluctant to list their requirements so far in advance.

Logging.—Pulpwood cutting is active in many areas, and experienced woodsmen are in short supply. The transfer of 490 men from the depressed Cape Breton area to the woods of Maine, U.S.A., has been satisfactorily accomplished. Although many of these men are untrained, it is expected that they will develop into good bushmen.

Sawmill operations are on a larger scale this year than for many years past; an adequate supply of labour is available.

Coal Mining.—All mines are working steadily, but no increase in production has been apparent. About 250 skilled miners are required, approximately 170 for the Cape Breton area and 80 for the Minto district. Most collieries will close for a two-week vacation period, during which time repair work will be carried out by construction men.

Manufacturing.—The level of activity has remained stable during the past month. Shortages of material are still hampering production. The Sydney Steel Plant is re-hiring a large proportion of the men who were laid off temporarily in the past month. Otherwise, labour needs in heavy industry throughout the region are very light. Plants in the New Glasgow area are operating on a reduced scale because of the scarcity of steel. The Maritime Pant Manufacturing Company of Amherst has now re-opened, and will enlarge its employment as the supply of materials increases. Fish processing plants in the Halifax, Digby and St. Stephen areas are

still in urgent need of experienced labour. Two of the larger firms in Halifax have instituted their own training programs, but the number receiving instruction is small in relation to the total demand.

Construction.—Building construction is very active in all areas. A heavy program of rural building is in progress throughout the region. The amount of residential and commercial construction is limited only by the supply of materials and skilled labour available. Shortages of finishing material, bricks, plumbing and heating supplies are retarding the completion of many units. Skilled carpenters, bricklayers and plasterers are in scarce supply, but all demands for unskilled construction labour can now be filled.

Transportation.—Port activity is slight at Saint John and Halifax, as ocean-going traffic has slackened. Large troop movements through Halifax will be completed by the first week of July. Rail freight traffic has declined, although the tourist trade is stimulating business for air lines and bus companies.

Quebec Region

Agriculture.—Seeding operations have now been completed throughout the Province. Seeding in the Lower St. Lawrence Valley was finished 10 days in advance of operations in the Montreal region. Since crops mature faster in the latter region it is feared that harvesting will occur simultaneously in both areas, disrupting the former plan of transferring workers from one area to the other between harvests. The farm labour measure cancelling unemployment benefits for workers with previous agricultural experience who refuse suitable farm work is producing encouraging results. Farm labour is also being recruited for work on American farms; the higher wages offered provide a strong incentive to workers who have rejected similar jobs on Quebec farms.

Logging.—Driving operations are ahead of the normal schedule; water conditions are excellent except in the Coulonge River area. Cutting is progressing satisfactorily in the St. Maurice and Lake St. John districts, but no great activity is expected for the next six weeks. Sawmills are working at capacity, and many of the smaller mills will have completed their operations by the end of this month.

Mining.—Hardrock districts report that the shortage of labour for underground operations is still acute. Demand is heavy for experienced miners and beginners but most applicants will only consider surface jobs during the summer months. In the Thetford area, Flintkote Mines Ltd. is expanding employment, and at Acton Vale, the Kennedy Company is re-opening its quarry.

Manufacturing.—Strike gloom still darkens the industrial scene. Lake shipping activity is again commencing but labour unrest is spreading in the textile, rubber, electrical and steel industries. The White Motor Company, beginning operations at its new Montreal plant, has placed initial orders for 1,000 workers. Foundries are still in need of skilled moulders, but foundry labour remains in short supply. A shortage of lumber, chiefly as a result of the strike in British Columbia, is hampering production at the Canadian Car and Foundry Company. Shipbuilding is expanding at Lauzon, where 284 men were hired in the past fortnight by the Davie Shipbuilding Company.

A \$5,000,000 chemical plant to be established at Cap de la Madeleine will make Canada self-sufficient in the supply of titanium pigment, a raw material essential to the manufacture of paint, paper, textiles and other industrial products. A new textile plant is being erected at St. Jérôme, and will provide jobs for three or four hundred workers.

Construction.—Industrial, commercial and residential projects are increasing in number throughout the region. All skilled tradesmen can find ready employment, with the exception of electricians, for whom demand is fairly light. Unskilled labour is very scarce, as first-class heavy labour is required by almost every industry.

Ontario Region

Agriculture.—Flood conditions in Kent and Essex Counties have caused considerable damage to crops, and a large acreage will require reseeded. As a result the demand for farm labour has increased, since farmers are trying to speed up operations as well as to repair damages. Wheat and hay crops are in good condition, but the acreage of corn, tobacco, and tomatoes will be substantially reduced. Orders for prisoner-of-war labour are heavy. To date, 500 harvesters have been transferred to this region from the western provinces. It is expected that a total of 2,500 men will eventually be brought in, as demand for such workers is heavy.

Logging.—Demand for pulpwood cutters is increasing but the supply of experienced bush-

men is scarce. In the Sudbury district, orders have been placed in clearance for 1,000 cutters. At Timmins, vacancies are available in the logging industry for 3,500 men, chiefly for pulpwood cutting.

Sawmills throughout the province are operating at full capacity; the supply of labour is ample except in the Timmins area.

Mining.—The shortage of experienced miners, particularly drillers, continues. Machine men for underground work are also required. The only solution to the scarcity seems to lie in on-the-job training programs. A slight demand also exists for both surface and underground labourers.

Manufacturing.—The strike situation is holding up production in the automobile, brass and rubber industries. At Windsor, the Ford Motor Company has resumed operations, recalling all former employees; Chrysler Corporation workers are out on strike. Shortages of heavy labour for foundry and forge have not lessened and the movement of this labour to outdoor work continues. A farm implement firm at Brantford, and McKinnon Industries Ltd. at St. Catharines, are securing accommodation for foundry labour and other employees through special housing projects. An acute scarcity of labour still afflicts the textile industry, where industrial unrest is also currently disrupting production. The employment situation in the rubber industry is very unsettled with a number of strikes in progress, and labour demand is low. The furniture industry requires cabinet makers, finishers and polishers, but qualified applicants are few.

Construction.—A large amount of proposed construction is being postponed because of the scarcity of building materials and skilled construction tradesmen. Carpenters, bricklayers, painters, and experienced construction labourers are in especially short supply. Many of the applicants for such work are over-age or physically unfit.

Transportation.—Since Great Lakes shipping is now under the supervision of a Government Controller and the working day has been reduced to eight hours, a brisk demand for additional seamen is anticipated in the near future. Applicants for track maintenance and section work on the railroads are fairly plentiful except in Northern Ontario, where working conditions are made difficult by black flies.

Prairie Region

Agriculture.—The supply of farm labour is adequate to meet demand throughout the region. Recent general rains have enhanced the prospects of a good harvest. No great

increase in regional labour requirements will occur until harvesting commences. The current advertising campaign to recruit prairie farm workers to assist in haying and harvesting operations in Ontario and British Columbia is producing excellent results. No difficulty in filling these labour requirements is expected.

Logging.—Skilled pulp and log cutters are required in the Fort William-Port Arthur and Fort Francis districts. The supply of labour, however, is not equal to the demand. In the Port Arthur area alone, at least 3,000 men will be required before autumn. Summer logging in the Blairmore area is progressing steadily, enabling coal mines in the district to build up stocks of logs and props for winter operations.

Coal Mining.—The coal strike in the United States has stimulated demand for Alberta coal. As a result, an urgent need for skilled miners and mine labourers has developed simultaneously. Mines in the Drumheller district require track layers, mine drivers and underground labourers. Full-time employment is assured; the housing shortage is easing slightly in this area. Lethbridge mines have an urgent need for skilled men but lack of housing prohibits placements through clearance orders. All mines in the Blairmore district are operating at capacity.

Hardrock Mining.—Expansion is occurring in the mining industry throughout the region, although lack of skilled men and housing accommodation form major obstacles. Gold mines in the Port Arthur district require 150 miners immediately. Exploration activity is increasing in the Herb Lake and Snow Lake areas. Employment is remaining stable at the Steep Rock Iron Mines of Atikokan.

Manufacturing.—Production in the flour mill and packing plant industries of the region remains stable. The building material industry is very active, although sash-and-door factories have suffered severe set-backs from supply shortages as a result of the B.C. lumber strike. Calgary iron firms are now affected by the spreading labour unrest amongst foundry workers. Textile factories are in urgent need of female workers at Winnipeg and Edmonton.

Construction.—Shortage of materials is retarding construction activity. In some areas, lay-offs of building tradesmen are occurring, and nowhere throughout the region is demand substantial in this industry.

Transportation.—Workers are required for extra gang labour by the C.P.R. at Calgary, Moose Jaw, Port Arthur, Kenora and Edmonton, and by the C.N.R. at The Pas, Dauphin, Port Arthur and Edmonton.

Pacific Region

Agriculture.—Indications point to an excellent fruit crop this year. It is expected that apple yields will be 25 per cent greater than last year, and heavy yields of peaches, apricots and plums are in prospect. In the lower mainland area the strawberry crop is at its peak; a shortage of pickers has caused some loss. The response to special advertising campaigns at both local and prairie points has been disappointing. Farmers require about 300 more berry pickers.

Logging.—With the settlement of the 36-day labour dispute in the lumbering industry, orders for workers are once more being placed with the National Employment Service. At present, orders are chiefly for sawmill workers. Until loggers return to camp, logging crew shortages cannot be estimated. This mass return movement is reflected in the scarcity of transportation accommodation on up-coast steamers.

A major problem facing Vancouver Island logging operators at the present time is the extremely dry condition of the forests. It is doubtful whether some will find it worth while to re-open for the short time remaining before the annual fire season shut-down.

Several sawmills will delay re-opening until log reserves are back to normal. Shortages of skilled men are feared, as many have left the industry to take work in fishing or agriculture.

Coal Mining.—The acute shortage of certified coal miners still prevails. A temporary lay-off of 350 coal miners occurred in a Nanaimo mine because of a shortage of pit props. The mine is now back in full production, however.

Gold Mining.—Heavy demand exists for experienced miners in this industry. Labour unrest is the cause of the current high rate of labour turnover. Despite these obstacles, expansion and development is continuing.

Base Metal Mining.—Expansion at Trail and Kimberley has been accompanied by constant demand for labour; the immediate need is for hard-rock miners. Labour unrest at Granby Consolidated Mining, Smelting and Power Company Ltd. is affecting placement activity.

Manufacturing.—The effect of the foundry strike is still hampering production in the metal industries. No demand for labour is apparent in the shipbuilding industries because of the adverse effects of both the foundry and lumber strikes. Now that the latter has been settled, this situation should ease somewhat. Lay-offs are taking place at a shipbuilding yard in Victoria because of a scarcity of orders. Expansion in vegetable and fruit canneries will

be reflected in increased demands for suitable workers; the season will shortly be in full swing.

Construction.—It is expected that the construction industry will resume full activity within a few weeks, when lumber is again in good supply. Skilled carpenters are required

in Vancouver; qualified painters are needed in Victoria but few suitable men are available.

Transportation.—Demand for coastal seamen is slackening. Section men are required at Penticton, Kamloops and Victoria, but few applicants will accept this work as the wages offered are relatively low.

Applications for Employment; Vacancies and Placements; May, 1946

REPORTS received from the National Employment Service Offices of the Unemployment Insurance Commission during the four-week period May 3 to May 30, 1946 showed an increase of 8.9 per cent in business transacted, when compared with the preceding five-week period March 29 to May 2, and a decrease of 38.0 per cent in comparison with the four weeks May 4 to May 31, 1945, this computation being based on the average number of placements recorded daily. Under the first comparison all industrial groups except agriculture and public utilities operation recorded gains, the most noteworthy being in services and construction. When compared with the four weeks ending May 31, last year reports showed a moderate gain in construction and smaller increases in agriculture and mining but losses were recorded in all other industrial groups, the greatest being in manufacturing, public utilities operation, forestry and logging, trade and services.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each one hundred applications for work registered at Employment Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took upward courses, the ratio of vacancies to applications being 115.0 during the four weeks May 3 to May 30 in contrast with 114.6 during the preceding five weeks, and 109.5 during the four weeks May 4 to May 31, 1945. The ratio of placements to each one hundred applications was 51.9 as compared with 49.5 in the previous period and 70.9 in the four weeks ending May 31 a year ago.

The average number of vacancies reported daily by employers to the Offices of the Commission throughout Canada during the period under review was 7,077 compared with 6,786 during the preceding five-week period and 7,953 during the period May 4 to May 31, 1945. The average number of applications for employment received daily by the Offices

during the four weeks May 3 to May 30, was 6,152 in comparison with 5,921 in the previous five weeks and 7,261 for the four weeks in May 1945. The average number of placements made daily by the offices during the period under review was 3,191 of which 2,921 were in regular employment and 270 in work of one week's duration or less, as compared with a total daily average of 2,929 during the previous five weeks. Placements in the four weeks ending May 31, last year, averaged 5,151 daily consisting of 4,979 placements in regular and 172 in casual employment.

During the period May 3 to May 30, 1946, the offices of the Commission referred 113,473 persons to vacancies and effected a total of 73,398 placements. Of these, the placements in regular employment were 67,183 of which 53,246 were of males and 13,937 of females, while casual placements totalled 6,215. The number of vacancies reported by employers was 114,833 for males and 47,938 for females, a total of 162,771 and applications for work numbered 141,503 of which 109,452 were from males and 32,051 from females. Reports for the five weeks March 29 to May 2, 1946, showed 190,000 positions available, 165,791 applications made and 82,008 placements effected while from May 4 to May 31, 1945, there were recorded 182,908 vacancies, 167,010 applications made and 118,483 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year, from January 1936 to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945.....	1,445,692	47,889	1,493,581
1946 (22 weeks).....	300,266	28,097	328,363

Nova Scotia and Prince Edward Island

During the four weeks ending May 30, 1946, the daily average of positions offered through National Employment Service Offices in Nova Scotia and Prince Edward Island was 275, in comparison with 248 in the previous period and 278 during the four weeks ending May 31 last year. The average number of placements recorded daily was 189 during the period under review, in contrast with 122 in the preceding five weeks and 208 during the corresponding period a year ago. The largest decreases in placements from the four weeks

in the preceding five weeks and 193 during the period terminating May 31, 1945. There was a daily average of 89 placements as compared with 74 in the previous five weeks and 159 during the period May 4 to May 31, a year ago. A fairly large decline in manufacturing together with smaller losses in public utilities operation, trade and services accounted for the reduction in placements from the four weeks terminating May 31 last year. Placements by industries included: services 545; construction 437; manufacturing 430; trade 270 and public utilities operation

ending May 31, 1945, were in manufacturing and public utilities operation but these were partly offset by a gain in construction, the changes in other groups being small. Placements by industrial divisions numbered: services 1,122; construction 1,009; manufacturing 996; trade 584; public utilities operation 303 and mining 154. Regular placements totalled 3,082 of men and 842 of women.

New Brunswick

The demand for workers on a daily average as indicated by orders listed at Employment Offices in New Brunswick during the period under review was 227, as compared with 174

209. There were 1,501 men and 371 women placed in regular employment.

Quebec

Orders listed at Employment Offices in the province of Quebec during the four weeks ending May 30, 1946, called for a daily average of 1,673 workers, in contrast with 1,473 in the period March 29 to May 2, and 2,486 during the corresponding four weeks of 1945. Placements showed a daily average of 538, in comparison with 447 in the preceding period and 1,563 during the four weeks ending May 31 last year. With the exception of a small gain in agriculture, placements were

less numerous in all industrial groups than during the four weeks May 4 to May 31 a year ago. The most pronounced reductions being reported in manufacturing and forestry and logging, followed by fairly substantial losses in public utilities operation, services, trade and construction and moderate declines in finance and insurance, and mining. Industries in which employment was secured for more than 200 workers included: manufacturing 4,477; construction 2,506; services 1,975; forestry and logging 1,182; trade 933; mining 638 and public utilities operation 471. Placements in regular employment numbered 10,096 of men and 2,101 of women.

Ontario

There was an increase in the average number of positions available daily at Employment Offices during the period terminating May 30, 1946, there being 3,121 in comparison with 3,012 in the previous five weeks and 3,040 during the corresponding period of 1945. The average number of placements effected daily was 1,329 during the four weeks under review, compared with 1,336 in the preceding period and 1,918 during the four weeks terminating May 31 last year. The most noteworthy decline in placements from the corresponding period a year ago occurred in manufacturing. Fairly substantial reductions were reported in services, trade and public utilities operation and a loss much smaller in proportion in finance and insurance but these decreases were somewhat modified by an appreciable gain in construction. In addition, a moderate loss in forestry and logging, and a gain in agriculture were shown. Industrial divisions in which most of the placements were effected were: manufacturing 11,126; services 6,817; construction 4,901; trade 2,903; public utilities operation 2,040; forestry and logging 1,021 and mining 928. Regular placements numbered 22,995 of men and 5,929 of women.

Manitoba

Employment opportunities as indicated by orders received at Employment Offices in Manitoba during the four weeks ending May 30, 1946, showed a daily average of 349 in contrast with 357 in the preceding period and 422 during the four weeks ending May 31 a year ago. Placements registered a daily average of 212, in comparison with 192 in the previous period and 281 during the four weeks May 4 to May 31, 1945. Reduced placements in manufacturing, public utilities operation, trade and services accounted for the decrease from the period ending May 31 last year. A moderate improvement was noted in mining, while the changes in remaining groups were unimportant. Placements by industries

numbered: services 1,552; manufacturing 978; trade 808; construction 576; public utilities operation 469; mining 236 and agriculture 145. There were 2,728 men and 1,036 women placed in regular employment.

Saskatchewan

Positions offered through Employment Offices in Saskatchewan during the period under review, averaged 220 daily compared with 268 in the preceding five weeks and 182 during the corresponding period a year ago. Placements increased under both comparisons, the daily average being 146 as compared with 141 in the previous period and 138 during the four weeks terminating May 31 last year. The small increase over the period May 4 to May 31, 1945, was due to additional placements in services and construction, although these advances were partly offset by moderate losses in manufacturing and public utilities operation. Placements by industrial groups included: services 1,381; construction 561; trade 508; manufacturing 360; public utilities operation 299 and agriculture 167. Regular placements totalled 2,045 of men and 658 of women.

Alberta

Orders received at Employment Offices in Alberta during the four weeks ending May 30, 1946, called for an average of 406 workers daily in contrast with 418 in the previous period and 383 during the four weeks ending May 31 a year ago. There was a daily average of 243 placements in comparison with 215 in the preceding period and 257 during the four weeks May 4 to May 31 last year. When comparing placements by industrial divisions with the corresponding period of 1945, none of the changes was large, the most significant being moderate decreases in public utilities operation, trade and manufacturing and an increase in construction. Placements by industries included: services 1,928; construction 1,173; manufacturing 769; trade 631; public utilities operation 349; agriculture 329 and mining 255. Placements in regular employment totalled 3,656 of men and 1,043 of women.

British Columbia

Opportunities for employment at Employment Offices in the province of British Columbia during the period terminating May 30, 1946, numbered 806 daily in comparison with 837 during the five weeks March 29 to May 2, 1946, and 967 in the corresponding period last year. Placements recorded a daily average of 446 during the four weeks under review, in contrast with 400 in the preceding period and 626 during the four weeks terminating May 31, 1945. There was considerable variation of placements by industrial divisions when com-

pared with the corresponding period a year ago, the most noticeable being a fairly substantial decrease in manufacturing followed by losses much smaller in volume in forestry and logging, and public utilities operation. Moderate decreases were reported in services and trade but these were partly offset by gains in construction and mining, the changes in

other groups being small. Industrial division in which the majority of placements were effected were: services 2,338; manufacturing 2,167; construction 1,697; trade 1,163; public utilities operation 832; forestry and logging 730 and mining 540. There were 7,143 men and 1,957 women placed in regular employment.

Strikes and Lockouts

Strikes and Lockouts in Canada During June, 1946

DURING June, 1946, strike activity in Canada continued at a high level, the number of workers involved in strikes and lockouts and the resulting time loss being much greater than in the previous month and in June, 1945. Preliminary figures show 36 strikes in existence during June, 1946, involving 70,688 workers, with a time loss of 935,188

man-working days, as compared with 35 strikes in May, 1946, with 47,730 workers involved and a time loss of 564,925 days. In June, 1945, there were 13 strikes, involving 2,926 workers, with a time loss of 5,138 days.

Preliminary figures for the first six months of this year show 117 strikes, involving 92,220 workers, with a time loss of 1,626,296 days.

STRIKES AND LOCKOUTS IN CANADA, JANUARY-JUNE, 1945-1946†

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man- Working Days	Particulars ⁽²⁾
	Establish- ments	Workers		
Strikes and Lockouts in Progress Prior to June, 1946				
LOGGING—				
Loggers, sawmill, shingle mill workers, etc., British Columbia	(3)416	35,000	600,000	Commenced May 15; for new agreements providing for increased wages, reduced hours, union shop, check-off, etc.; terminated June 20 to 26; controller appointed for interior box factories and supplying companies, also conciliation by IDI Commissioner appointed by federal government on recommendation of provincial government, and return of workers pending further negotiations; compromise.
MINING—				
Asbestos miners Black Lake and Thetford Mines, P.Q.	2	625	1,875	Commenced May 28; inter-union dispute <i>re</i> bargaining agency; terminated June 4; return of workers pending reference to QLRB (4); indefinite.
MANUFACTURING—				
<i>Vegetable Products—</i>				
Bakery workers, Halifax, N.S.	1	10	150	Commenced February 11; for a union agreement; untrminated.
<i>Textiles, Clothing, etc.—</i>				
Woollen factory workers, Carleton Place, Ont.	1	160	1,400	Commenced April 2; for increased wages, union shop, check-off, two weeks' vacations with pay, etc; terminated June 11; conciliation, federal, and return of workers pending further negotiations; indefinite.
Carpet factory workers, weavers, Brantford, Guelph and Toronto, Ont.	3	70	1,500	Commenced April 29; for increased wages, reduced hours, two weeks' vacations with pay; untrminated.
Textile factory workers, Sherbrooke, P.Q.	1	(6)115	900	Commenced May 13; inter-union dispute <i>re</i> bargaining agency following demand for increased wages and reduced hours; terminated June 10; return of workers pending reference to QLRB; indefinite.
<i>Printing and Publishing—</i>				
Compositors, etc., Winnipeg, Man.	2	97	2,000	Commenced November 8, 1945; for a new agreement providing for increased wages and other conditions; untrminated.
Compositors, stereotypers, pressmen, etc., Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.	5	257	4,800	Commenced May 30; in sympathy with strike of compositors at Winnipeg, Man., commencing November 8, 1945; untrminated.
<i>Metal Products—</i>				
Foundry workers, Vancouver and New Westminster, B.C.	35	500	12,000	Commenced May 17; for increased wages and reduced hours; untrminated.
Brass factory workers, New Toronto, Ont.	1	(6)1,000	20,000	Commenced May 18; for increased wages, reduced hours, union shop, seniority in lay-offs, etc.; untrminated.
TRANSPORTATION AND PUBLIC UTILITIES—				
<i>Water—</i>				
Seamen, Quebec, Ontario, Nova Scotia, New Brunswick, Prince Edward Island.	(7)154	(7)2,500	45,000	Commenced May 24; for an eight-hour day and three-watch system; terminated June 22; government assumed control pending settlement; indefinite.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1946⁽¹⁾—Continued

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Establishments	Workers		
Strikes and Lockouts Commencing During June, 1946				
MINING—				
Coal miners, drivers, Cambria, Alta.	1	(⁸)5	15	Commenced June 6; against penalty deductions from wages for quitting work before end of shift; terminated June 8; return of workers; in favour of employer.
Coal miners, Springhill, N.S.	1	1,500	8,250	Commenced June 7; tea bottles could not be kept warm because steam turned off at bankhead to repair boilers, and suspension of chain runner; terminated June 13; return of workers; in favour of employer.
Gold miners, Sheep Creek, B.C.	1	51	153	Commenced June 13; against discharge of cook for cause; terminated June 18; return of workers pending reference to arbitration; indefinite.
Coal miners, motormen, East Coulee, Alta.	1	(⁹)16	16	Commenced June 13; protest by motorman against being given job as driver; terminated June 20; negotiations and check-up by company doctor; in favour of workers.
Coal miners, Alberta	50	6,500	6,500	Commenced June 26; for removal of Chairman and Labour Commissioner from Alberta Workmen's Compensation Board terminated June 26; return of workers; in favour of employers.
MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Rubber factory workers, Bowmanville, Hamilton, Kitchener, New Toronto, Oakville and Toronto, Ont.	10	10,146	57,000	Commenced June 23; for increased wages, reduced hours, overtime rates for Saturdays, Sundays and holidays, etc.; un-terminated.
<i>Fur and Leather Products—</i>				
Fur factory workers, Toronto, Ont.	3	274	4,500	Commenced June 10; for increased wages, reduced hours, two weeks' vacations with pay, etc.; terminated June 29; conciliation, provincial, and reference to RWLB (⁹); indefinite.
<i>Textiles, Clothing, etc.—</i>				
Textile factory workers, Montreal and Valleyfield, P.Q.	5	5,253	119,000	Commenced June 1; for increased wages, reduced hours, two weeks' vacations with pay, etc.; un-terminated.
Cotton factory workers, spinners, Welland, Ont.	1	(¹⁰)26	125	Commenced June 3; for increased wages; terminated June 8; return of workers pending decision of RWLB; compromise.
Woolen factory workers, Granby, P.Q.	1	130	625	Commenced June 10; against dismissal of a foreman for failure to maintain minimum production; terminated June 15; negotiations; in favor of employer.
Twine factory workers, Brantford, Ont.	1	321	1,525	Commenced June 11; against dismissal of a female worker for infraction of company rules; terminated June 17; negotiations; in favour of employer.
Textile factory workers, Sherbrooke, P.Q.	1	550	1,100	Commenced June 24; for increased wages; terminated June 25; return of workers pending decision of RWLB; compromise.
Knitting factory workers, Toronto, Ont.	2	630	3,150	Commenced June 25; for increased wages and reduced hours; un-terminated.
<i>Miscellaneous Wood Products—</i>				
Saw and planing mill workers, Lindsay, Ont.	1	44	44	Commenced June 3; for increased wages; terminated June 3; return of workers pending reference to RWLB; indefinite.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1946⁽¹⁾—*Concluded*

<i>Metal Products—</i>				
Motor vehicle factory workers, Chatham and Windsor, Ont.	2	3,440	37,250	Commenced June 18; for increased wages, reduced hours, two weeks' vacations with pay, etc.; un-terminated.
Foundry workers, Calgary, Alta.	3	265	2,150	Commenced June 20; for a new agreement providing for increased wages, reduced hours, closed shop, check-off, two weeks' vacations with pay, etc.; un-terminated.
Steel products factory workers, Windsor, Ont.	1	224	672	Commenced June 27; for a new agreement providing for increased wages, reduced hours, two weeks' vacations with pay, etc.; un-terminated.
<i>Non-Metallic Minerals, Chemicals, etc.—</i>				
Roofing products factory workers, Brantford, Ont.	1	80	200	Commenced June 25; against dismissal of a worker for absenteeism; terminated June 27; negotiations; in favour of employer.
Chemical factory workers, Windsor, Ont.	1	531	1,593	Commenced June 27; for a new agreement providing for increased wages, reduced hours, union shop, check-off, two weeks' vacations with pay etc.; un-terminated.
TRANSPORTATION AND PUBLIC UTILITIES—				
<i>Steam Railways—</i>				
Round house workers, Glace Bay, N.S.	1	73	73	Commenced June 3; against penalty deduction from wages of a worker for being absent without leave; terminated June 3; negotiations; in favour of workers.
<i>Water—</i>				
Freight handlers, Waterways, Alta.	1	30	15	Commenced June 6; for increased wages; terminated June 6; negotiations and reference to NWLB ⁽⁴⁾ ; in favour of workers.
Freight handlers, Victoria, B.C.	1	10	40	Commenced June 20; for increased wages; terminated June 24; return of workers pending joint application to NWLB; indefinite.
SERVICE—				
<i>Public Administration—</i>				
Town labourers, Woodstock, N.B.	1	12	12	Commenced June 4; for increased wages; terminated June 4; negotiations; in favour of workers.
<i>Business and Personal—</i>				
Beverage dispensers, Calgary and Medicine Hat, Alta.	25	175	875	Commenced June 25; for increased wages and reduced hours; un-terminated.

(1) Preliminary data based where possible on direct reports from parties concerned, in some cases, incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) Approximately 416 employers, operating various logging camps, sawmills, woodworking plants, shingle and planing mills, sash and door factories, lumber yards, etc.

(4) QLRB—Quebec Labour Relations Board; RWLB—Regional War Labour Board; NWLB—National War Labour Board.

(5) 435 indirectly affected; (6) 300 indirectly affected; (7) 115 indirectly affected; (8) 102 indirectly affected; (9) 575 indirectly affected.

(10) Estimated; number indirectly affected not known.

For the same period last year there were 95 strikes, with 25,871 workers involved and a time loss of 82,711 days.

Of the 36 strikes recorded for June, four were settled in favour of the workers, six in favour of the employers, four were compromise settlements and eight were indefinite in result, work being resumed pending final settlement. At the end of the month 14 strikes were recorded as unterminated, namely: bakery workers at Halifax, N.S.; carpet factory workers at Brantford, Guelph and Toronto, Ont.; compositors at Winnipeg, Man.; compositors, stereotypers and pressmen at Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.; foundry workers at Vancouver, B.C.; brass factory workers at New

Toronto, Ont.; rubber factory workers at Bowmanville, Hamilton, Kitchener, New Toronto, Oakville and Toronto, Ont.; textile factory workers at Montreal and Valleyfield; knitting factory workers at Toronto, Ont.; motor vehicle factory workers at Chatham and Windsor, Ont.; foundry workers at Calgary, Alta.; steel products factory workers at Windsor, Ont.; chemical factory workers at Windsor, Ont.; and beverage dispensers at Calgary and Medicine Hat, Alta.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which unions concerned have not declared terminated.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing up to date that given in the March, 1946, issue in the review, "Strikes and Lockouts in Canada and Other Countries." The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in April, 1946, was 185, and 21 were still in prog-

ress from the previous month, making a total of 206 during the month. There were 42,400 workers involved and a time loss of 158,000 working-days was caused.

Of the 185 stoppages which began during April, 31 arose out of demands for advances in wages; 51 over other wage questions; five on questions as to working hours; 20 on questions respecting the employment of particular classes or persons; 68 on other questions respecting working arrangements; and 10 on questions of trade union principle.

United States

Preliminary figures for May, 1946, show 360 strikes and lockouts beginning in the month, in which 560,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 11,500,000 man-days. Corresponding figures for April 1946, are 465 strikes and lockouts, involving 575,000 workers, with a time loss of 15,500,000 man-days.

Labour Law

Labour Legislation in British Columbia in 1946

IN its session from February 21 to April 11 the British Columbia Legislature enacted a new law providing for annual holidays with pay for employees. Acts amended related to workmen's compensation, hours of labour, minimum wages, factories, shops, coal-mines, municipal superannuation and credit unions.

Workmen's Compensation

Among the changes made in the Workmen's Compensation Act certain amendments (1) reduce from 14 to 6 the number of days of disability required in order to be eligible for compensation for the first three days' loss of work, (2) abolish the workers' contributions of one cent per day to the cost of medical aid, (3) empower the Workmen's Compensation Board to provide for replacement and repair of dentures, eye-glasses, and artificial appliances, including artificial members, broken in the course of employment, and (4) extend the authority of the Board to bring under the Act industries and occupations not previously covered.

A master, mate, engineer, seaman, sailor, steward or fireman entitled to medical aid from the Sick Mariners' Fund under the Canada Shipping Act, 1934, is, in future, to be eligible under the British Columbia Workmen's Compensation Act for any necessary additional medical aid which is not furnished under the Shipping Act.

Applications for compensation are required to be made, as heretofore, within one year from the date of accident or death, but the Board may, on proof of the accident and injury being filed within three years from its occurrence, pay the compensation, if, in its opinion, the claim is a just one and ought to be allowed.

Another amendment requires the doctor to furnish a report to the Board within three days after his first attendance upon an injured workman, to report at intervals of not more than 30 days during the period of disability and, finally, within three days after the workman is, in his opinion, able to resume work. A specialist whose opinion is requested must report within three days of his last attendance on the workman, or if he is treating the workman regularly he must report as above.

All moneys in the hands of the Board, or hereafter collected, for medical aid are to be credited to the classes in which the employers were assessed, and all accounts for medical aid are to be paid out of the class funds, as is the case with compensation.

The sections relating to compensation for silicosis, with or without tuberculosis, were amended to provide that if a workman in either coal or metal mining has been exposed to silica dust in two or more classes or subclasses of industry in the Province, the cost of compensation is to be apportioned among such classes on the basis of the duration and severity of exposure.

When a workman becomes disabled by pneumoconiosis, he or his dependents may claim compensation only if he was free from pneumoconiosis and tuberculosis before being exposed to dust conditions in British Columbia and if he meets the conditions laid down for compensating silicosis with respect to residence, exposure to dust conditions, and filing and establishing his claim within the period prescribed. The cost of compensation for pneumoconiosis is to be apportioned as for silicosis. These provisions, however, are not to prevent the Board allowing any case due to uncomplicated pneumoconiosis which it considers should be allowed.

The section dealing with an injured workman's right of action against a person other than his employer was amended in several respects. These amendments are to apply retrospectively to all actions in which final judgment has not been entered. The subsection allowing a workman to elect whether to claim compensation or to bring an action was amended to prohibit an action against any employer covered by the collective liability part of the Act or against the Crown. The section was also amended to make it clear that where an injured workman is entitled to an action, neither the making of an application for compensation nor the receipt of compensation bars that right. As before, in such a case the Board assumes the workman's right to an action but, as a result of the amendment, if more is recovered and collected than the amount of compensation to which the workman or his dependents are entitled, the

excess, less costs and administration charges, may be paid to the workman or his dependents. If in any such action brought by a workman, his dependents or the Board, it is found that the accident was due partly to the negligence of one or more employers who are within the collective liability system, no damages or contribution may be recoverable for the portion of the loss or damage caused by the negligence of such employer.

A further amendment provides that an application filed by a parent or guardian for compensation for a deceased workman's infant child must be deemed to be a valid election on behalf of such child.

It is also stipulated specifically that the provisions of the collective liability part of the Act are in lieu of all rights of action by a workman or his family against his employer not only for an accident but also for industrial diseases contracted on or after January 1, 1917.

Hours of Labour

By an amendment in the Hours of Work Act, in effect July 1, 1946, or earlier if proclaimed, the maximum weekly working-hours of employees in "industrial undertakings" are reduced from 48 to 44, except in emergencies where the Board of Industrial Relations considers extra hours necessary and not inimical to the interests of the employee and for which it gives permission in writing. "Industrial undertakings" include mines, factories, shipyards, lumbering, construction, road transport, shops, bakeries, hotels and restaurants and elevator operation.

Factories

An amendment in the Factories Act, also effective July 1, 1946, reduces the normal maximum hours of women and girls in factories from 48 to 44, and when overtime is permitted on not more than 36 days in the year, reduces the limits from 54 to 50 hours in a week.

Minimum Wages

The Male Minimum Wage Act was amended to reconstitute the Board of Industrial Relations in order to make it representative of organized groups of employers and employees and of the general public. It is henceforth to consist of not more than seven and not fewer than five members, instead of five, one of whom, the chairman, must be an officer of the Department of Labour. Three, four or five members are to constitute a quorum where the Board consists of five, six or seven members, respectively.

The Board is now to have power to limit the working hours of men, an authority it already

had under the Female Minimum Wage Act. In both Acts it is now stipulated that the limits on hours prescribed by the Board must not be incompatible with those prescribed by or under the Hours of Work Act.

Both the Minimum Wage Acts contain new provisions with respect to payment for overtime. Where the Board has, under powers conferred by any other Act such as the Hours of Work Act, permitted longer hours than the normal hours permitted by the statute, it may make an order under the Minimum Wage Act fixing a minimum rate for overtime. Such power may be exercised on the Board's behalf by the chairman or by any person nominated in writing by the chairman. Such an order may be made whether or not a minimum rate has been fixed by the Board for the regular hours of the establishment. An order may be made without inquiry, and publication in the *British Columbia Gazette* is not necessary. It will take effect at the time when it is made or other time fixed therein and will apply only to those employees in respect of whom overtime has been permitted. The Act stipulates that the minimum rate for overtime prescribed by the Board must not be less than any overtime rate fixed by collective agreement between employer and employees.

Shops

In line with the reduction of weekly hours from 48 to 44 in the Hours of Work Act, the Shops Regulation and Weekly Half-holiday Act was amended to prohibit boys and girls under 16 being employed in shops more than 44 hours in a week. The provision that no child under 14 may be employed in a bake-shop was repealed as conflicting with the prohibition of employment under 15 in the Control of Employment of Children Act, 1944.

Other amendments in the Shops Act include shoe-shine stands among the businesses to which it applies, and give municipal councils authority, on petition of not less than three-fourths of the occupiers of shops of any class, to require the closing of all shops of their class for one whole day in a week.

Every by-law requiring the closing of garages, repair-shops or service-stations must permit as many of such places of business as are necessary for the accommodation of the public to remain open after the hour for closing appointed by the by-law, those remaining open to be nominated in writing by three-fourths of the occupiers of such work-places, or failing such nomination, appointed by the council. The council may, in any such by-law, require that the places permitted to remain open must remain so continuously for such hours and on such days as the council stipulates.

Holidays with Pay

The Annual Holidays Act, to come into operation on July 1, 1946, if not proclaimed in effect before that date, provides for one week's holiday with pay for employees who work not less than 280 days in one year. The Act covers all employees in every industry, business, trade and occupation, except agriculture and domestic service.

This enactment in British Columbia brings it into line with Ontario and Saskatchewan which made legislative provision in 1944 for annual holidays with pay, Ontario for at least one week and Saskatchewan for two weeks. The Alberta Welfare Act, 1943, empowers the administrative board to require an employer to give his workpeople, after one year's employment, one week's holiday, or for longer employment, up to two weeks. Amendments of 1946 in the Quebec Minimum Wage Act and Collective Agreement Act enable minimum wage orders and collective agreements under these statutes to provide for holidays with pay.

Holidays, exclusive of statutory holidays, must be in an unbroken period and must be given within ten months after the employee is entitled to them. A period of work recognized as a working shift performed daily constitutes a day of actual work and the usual number of working shifts normally worked per week in the establishment constitutes six days of actual work. The holiday pay will be at least: for hourly-paid employees, the amount earned at prevailing rates for the regular number of hours per week; for those paid weekly, the amount earned regularly per week; for those paid semi-monthly, one-half the regular semi-monthly pay; and for those paid monthly, one-quarter of the regular monthly pay.

Where an employee ceases to work during the course of a working-year and has not received holidays, the employer must pay him at the end of his employment, in addition to all other amounts due to him, the equivalent of one-eighth of a day's pay for each week of actual work performed. An employer must pay to an employee leaving his employment a week's wages in lieu of the annual holiday to which he was entitled and which he has not received.

The Minister of Labour, or his duly authorized representative, may at any reasonable time inspect an employer's books or records, the entries of which he may require the employer to verify by statutory or other declaration, or require any person to furnish information necessary for the enforcement of the Act. Failure to comply with the provisions of the Act, the making of a false or misleading state-

ment or interference with the Minister in the exercise of any power conferred on him are punishable, for a first offence, by a fine of from \$25 to \$100 and, in default of payment, imprisonment from 10 to 30 days, and, for subsequent offences, from \$50 to \$200 and, in default of payment, imprisonment from 30 to 90 days. An employer convicted of failure to pay any money that he is required to pay under the Act must pay the employee such money in addition to any penalty imposed.

Nothing in the Act may affect more favourable conditions which may be put into effect by mutual arrangement between employers and employees or provided for under any other Act or agreement.

Attachment of Wages

Verbal changes were made in the prescribed forms under the Attachment of Debts Act.

Coal Mines

An amendment in the Coal-Mines Regulation Act, to come into effect by Proclamation, requires owners, agents or managers of mines employing more than 15 workers below ground (1) to provide for those employed above and below ground, washing facilities in a building not used for other purposes and accommodation for drying and changing their clothing; (2) to maintain all bunk-houses, cook-houses, dining-rooms and wash-houses in such sanitary condition as may be approved by the Inspector of Mines; (3) to provide in mines where egress to the surface cannot be conveniently obtained, suitable places for sanitary uses, constantly maintained in a sanitary condition, and similar suitable outhouses in convenient positions contiguous to the surface works.

Amendments proposed in a private Member's Bill were defeated. These would have provided for 16 hours off between all shifts in coal mines, and for abandoned coal mines to revert to the Crown.

Credit Unions

Changes in the Credit Unions Act increase the amount that a credit union may invest in fully paid shares of a co-operative association consisting only of credit unions ten or more in number. Such sum may not exceed \$5 but may be increased by \$25 for every 1,000 shares of the credit union that are fully paid up. Previously, the amount stipulated was \$5 for every 1,000 shares.

A further amendment permits a credit union, on the authorization of the Inspector and under conditions fixed by him, to make loans to its members of from \$100 to \$300 without

security other than the covenant of the borrower. Formerly, \$100 was the maximum loan permitted without security.

From net earnings after a reserve fund has been set aside, an amendment provides for giving additional remuneration to any employee of the credit union, and, for the promotion of thrift and for education in co-operative principles, an amount to be decided on by the members rather than a stated sum of not more than five per cent.

If the Inspector makes an unsatisfactory report to the Minister respecting a credit union, the Minister may suspend not only the right of the credit union to accept applications for shares or loans but also its right to redeem any shares or make any return of moneys paid for shares without the Inspector's approval.

Municipal Superannuation

By an amendment in the Municipal Superannuation Act, drivers of public passenger-vehicles other than tramway vehicles are classed with firemen and policemen as employees who are entitled to a superannuation allowance at the minimum age of 55 or the maximum age of 60 years, and provision is made for them to receive the same amount of service pensions as firemen and policemen are entitled to receive under the Act. A new clause stipulates that, with respect to a superannuation allowance, any employee to whom the Act applies whose annual salary is paid in 10 equal instalments must be considered as employed for a full year.

Teachers' Pensions

The Teachers' Pensions Act was amended to provide that an employee, who after serving in the Armed Forces resumes his employment and repays into the Pension Fund an amount equal to that withdrawn by him as a refund of his contributions, is entitled to reinstatement as a contributor and to be credited with the time of his employment before he obtained leave of absence or resigned. Such employee may make repayment into the Fund over a period of time equal to the time served by him in the Forces by such periodical payments as are agreed to by the Commissioner.

Provision is made for the payment of a superannuation allowance, based on the number of years of teaching and the amount of contributions made, to an employee, at 65 in the case of a man and 60 of a woman, who has ceased to become a contributor because of loss of employment as a teacher for a reason beyond his control and is unable to return to teaching as a contributor within the two-

year period referred to in the Act, if such person has not obtained a refund of the amount to his credit in the Fund. In the event of death before 65 or 60, as the case may be, the employee must be deemed to have died in service and the provisions of the Act governing the granting of an allowance to a widow or dependent relative will apply. The Act also provides for an allowance, in the case of the death in service of a male employee having had not less than 10 years' service, to his widow, if any, or to a father, mother, sister or brother who was wholly dependent on him for support and previously nominated by the deceased in writing.

Slum Clearance

The Slum Clearance Assistance Act authorizes the Government to borrow or raise from time to time a sum of money not exceeding \$500,000 for grants to municipalities in order to assist in defraying the cost of acquiring and clearing land suitable for low-cost or moderate-cost rental housing projects.

Where a municipality obtains a grant for slum clearance from the Dominion Minister of Finance under the National Housing Act, 1944, the Lieutenant-Governor in Council may make a grant to that municipality out of the moneys referred to above. A grant under this Act must not exceed 50 per cent of the total cost that remains after deducting (a) the amount of the Dominion grant; and (b) the cost at which the land is sold to a limited dividend housing corporation or an insurance company for the purpose of constructing thereon a rental housing project. If, at the time of application, it is not possible to ascertain the total cost, the amount of the Dominion grant or the cost at which the land is to be sold, the Lieutenant-Governor in Council may make advances to the municipality on account of the grant.

Bill Not Passed

A private Member's Bill to amend the Apprenticeship Act failed to pass. It would have defined "employer" as any person, firm, corporation or Provincial or other public authority employing mechanics, helpers, labourers, apprentices or other employees in connection with any designated trade, and provided that any person, with the Minister's approval and on recommendation of the Provincial Apprenticeship Committee, may be required to attend a technical school, either at the beginning or during the life of his contract of service. At least one-third of the time of such attendance would be credited to the apprentice as part of the contract of apprenticeship.

Resolutions

A resolution adopted on April 10 recommended that the Government urge the Dominion Government to repeal the present regulations which reduce the pension payable to a blind pensioner upon marriage to another blind person.

A rejected motion of April 10 asked that the Government confer with the Dominion Government with the object of securing a long-term low-interest loan to be guaranteed and administered directly by a provincial housing authority for the purpose of remedying the housing shortage. In its place a resolution was carried urging the Dominion to make available immediately the necessary lumber, plumb-

ing, electrical and other building materials required to complete the homes already under construction and to erect the many thousands of additional homes needed.

A resolution, defeated on March 27, proposed that the Male and Female Minimum Wage Acts be consolidated into one in order to adopt the principle of equal pay for equal work regardless of sex.

A resolution of the same date urging that minimum wages in the mercantile industry be raised in accordance with those now prevailing in the industry was withdrawn.

A motion to include domestic servants in the Hours of Work Act, the Female Minimum Wage Act, and the Workmen's Compensation Act was defeated on April 10.

Recent Regulations Under Dominion and Provincial Legislation

IN Alberta, a new Order provides for most workers an annual holiday with pay of one week after one year's employment and of two weeks after two years. In British Columbia, the Minimum Wage Orders are being revised. Seven Orders have already been replaced, and an interim blanket order has been made raising from July 1 the rates in all other orders by 20 per cent. The Workmen's Compensation Act has been extended to workers in shops, hotels and lodging-houses, building-maintenance, catering and licensed beer parlours, barber and beauty shops, stockyards, broadcasting stations,

private hospitals, janitor service, places of amusement and several other occupations. In Manitoba, the fair wage schedule for the 1946 season fixes higher rates for most construction workers. The Manitoba Power Commission has made regulations concerning licences, inspection and standards for work under its jurisdiction. In Saskatchewan, new Minimum Wage Orders have been issued increasing minimum rates by about 12 per cent. Regulations under the Annual Holidays Act set out the arrangements that may be made for the annual holiday and the pay for it.

Dominion

Merchant Seamen Special Bonus Order

Certain seamen formerly ineligible under the Merchant Seamen Bonus Order (P.C. 3227) of May 3, 1945 (L.G. 1945, p. 913) will receive the special bonus for merchant seamen who served during the war of 10 per cent of their total earnings as a result of an amending Order in Council (P.C. 2149) of May 28, gazetted on June 3. A seaman who served at least six months between September 10, 1939, and April 1, 1944, will receive the bonus even if he did not sign an agreement to serve at sea for the duration of the war, or did not apply for the bonus before January 1, 1946, because of circumstances beyond his control but applied before September 1, 1946. Other seamen now eligible are Canadian citizens or residents who served on certain British ships and who were engaged and discharged in Canada or who were assigned for a time by the Regional Director of a Canadian Manning Pool to British ships.

Family Allowance Regulations Amended

Amendments made to these Regulations (P.C. 5093) of August 3, 1945, (L.G. 1945, p. 1530) by an Order in Council (P.C. 2316) dated June 7 and gazetted July 6, provide for the establishment of an appeal committee in each province and one for the Territories to hear appeals relating to allowances, give the Director of Family Allowances power to have a family allowance paid to another person or agency instead of to the recipient when the latter does not exclusively apply the allowance towards the child for whom it is being paid, and make some minor changes in the rules regarding registration and in the registration forms.

An Order in Council (P.C. 6588) of November 6, 1945, made some slight changes in the Regulations including one which permits the registration of a child or of an allowance to be cancelled at the request of the parent.

Provincial

Alberta Labour Welfare Act

An annual holiday with pay of one week after one year's employment and of two weeks after two years must henceforth be given to all workers other than coal-miners, farm labourers, and domestic servants according to an Order under the above Act dated June 24 and gazetted on June 29. More favourable provisions in collective agreements, etc., are not affected. An Order of March 25, 1946, replacing a 1945 Order provided for coal-miners annual holidays of one day for every 23 days worked in a month (L.G. 1946, p. 683).

The new Order defines one year's employment to be at least 275 days of actual work a year, the normal daily shift constituting a day, and the usual number of shifts worked in a week in any establishment being considered as six days. The annual holiday must be exclusive of the public holidays to which a worker is entitled and must be given as a whole and within ten months after the completion of a year's employment. A worker terminating his employment and who has not been given his holiday must be paid in lieu of the holiday.

British Columbia Hours of Work Act

Certain Orders under this Act, recently amended to limit from July 1 hours worked by employees to eight daily and 44 weekly, were amended by an Order gazetted June 27 and effective July 1. Workers on night shifts in the lumbering industry may now work 44 hours weekly in five nights but not more than nine each night; the previous limits were 10 and 48. Boatmen and emergency fire-fighters in the logging industry are now exempt from the Act, but cook and bunkhouse employees are exempt only in unorganized territory while those who operate and service donkey-engines are now within the Order.

In drug-stores, apprentices, certified clerks and pharmacists may now work no more than 88 hours in a two-week period nor more than 48 in any week nor nine a day; the limits were formerly 96, 52, and nine respectively.

Workers in the catering industry are no longer exempt from the limits set by the Act; they had been exempt to the extent that their hours on a split shift should be confined to 14 hours and that time over 12 hours should be paid at time and one-half their regular rates.

The weekly limit for shop workers in places other than Vancouver, North Vancouver, West Vancouver, Burnaby, Victoria, Esquimalt, Oak

Bay and Saanich, who may work 11 hours on Saturday or on the day before a statutory holiday, is now 44 hours instead of 48.

Employees in florists' shops who are exempt from the ordinary limits of the Act must not work more than an average of 88 hours, instead of 96, in a two-week period.

The fruit and vegetable industry which has been declared exempt during the summer by an annual order from the hours limits will now be exempt between June and November inclusive each year.

Men engaged in delivering milk may work 59 hours weekly provided that in a seven-week period they do not work more than 350 hours (formerly 378) or more than 10 a day.

Regulation 28B permitting longer hours for certain taxicab drivers is revoked.

British Columbia Male and Female Minimum Wage Act

INCREASED RATES

Effective July 1, when the Dominion Wages Control Order ceased to restrict the raising of wages provided the increase is in accordance with a provincial Minimum Wage Order, the minimum rates of wages applying to some 150,000 workers have been raised by the British Columbia Board of Industrial Relations by Orders gazetted June 27.

A single interim Wage Order increases by 20 per cent the rates which were established in 37 Orders. Orders applying to six industries or classes of undertakings have been revised; the minimum rates raised from 20 to 38 per cent and certain new or amended provisions made. These revised wage Orders apply to male and female workers in the hotel and catering industry (Order 52), in laundries and dry cleaning establishments (Order 74), and in the fruit and vegetable industry (Female Order 46, Male Order 47), to barbers (Order 42), men in shipbuilding (Order 20), and to women in offices (Order 34). For the first time, minimum rates were fixed for men working in hotels and restaurants and in laundries.

Another wage Order, (Order 4), gazetted and effective July 4, fixes a higher minimum wage for cooks and other bunkhouse workers in unorganized territories, amending Orders for the logging and sawmill industries accordingly.

Provisions concerning overtime and weekly rest for workers in resort hotels in unorganized territory were made by an Order (52A) amending Order 52 respecting hotels and catering.

Two new general Orders (Orders 2 and 3 respectively) declare rates in apprenticeship contracts the minimum rates for apprentices and stipulate that an employer who requires his workers to wear uniforms or other special apparel must supply and service it free of charge to his employees.

INTERIM ORDER

The Wage Orders which are amended by the interim blanket Order giving a flat 20 per cent increase and which will be later replaced by revised Orders are those for men and women in shops, transport, the shingle industry, janitor service and for elevator operators and bus-drivers; for women in manufacturing, fishing, telephone and telegraph service, beauty shops, and places of amusement; for men in logging, sawmills, woodworking, the Christmas tree industry, household furniture and box manufacturing, baking, for stationary engineers, patrolmen and first-aid attendants and, in certain places, for men in construction, carpentry, and painting and decorating and for taxi-drivers.

REVISED ORDERS

The provisions of the seven revised wage Orders and the new Order for cooks and other bunk-house employees are summarized below.

Overtime.—Time and one-half a worker's regular rate of pay must now be paid for all time worked over eight hours in a day or 44 in a week (the limits imposed by the recent amendment to the Hours of Work Act and effective July 1), or for time in excess of any higher limits permitted by the Board of Industrial Relations, in hotels and catering, laundries, and shipbuilding and for women in offices. Under the repealed Orders only to women in hotels and catering was time and one-half the regular rate required to be paid for overtime, which began after eight hours in a day or 48 in a week.

In the fruit and vegetable industry, punitive overtime rates have been required. But the time-limits for regular rates are reduced. For work beyond eight hours or 44 between December and May inclusive, and for work after nine hours in a day between June and November, when the industry is exempt from the Hours of Work Act, time and one-half must be paid, and double time between June and November inclusive for work beyond 11 hours in a day. Previously, time and one-half was required for work over 10 hours in a day and double time for work over 12.

Short Time.—As in the repealed Orders, provision has been made to safeguard the

minimum rate when the weekly hours are reduced or in the case of establishments regularly operating less than 44 hours.

The regular weekly minimum applies to a specified range of working hours varying from 36 to 44 in offices, and from 40 to 44 in hotels and catering and barbering.

Minimum Rates.—Full-time employees in hotels and catering must now receive a minimum of \$18 a week instead of the \$14 rate formerly fixed for women, and the part-time minimum is 45 cents an hour instead of 37½ cents.

The minimum for women working full-time in offices is now \$18 instead of \$15 a week, and for part-time it is 50 cents an hour instead of 40 cents. In laundries, the minimum rate has been raised from 31 cents to 40 cents an hour. In the fruit and vegetable industry the male minimum is now 48 cents an hour instead of 38 cents, but as before 15 per cent of the workers may be paid at a lower rate, 38 cents; for women the new rate is 40 cents instead of 30 cents but 10 per cent may be paid at 35 cents an hour. In shipbuilding a minimum of 90 cents an hour replaces the 67½-cent rate for journeymen, 60 cents replaces the 50-cent minimum for other workers but 10 per cent of these workers may be paid 45 cents an hour. For barbers, the minimum for full-time workers is now \$25 a week instead of \$18 and the part-time rate 65 cents an hour instead of 45. For cooks and bunk-house employees in unorganized territories, the minimum is now 50 cents an hour instead of \$2.75 a day.

Deductions for accidental damages or breakages by workers are prohibited in the Orders for laundries, hotels and catering, and cooks and bunk-house employees. The latter Order again limits deductions from wages for meals and lodging to 20 cents per meal or \$4 for 21 meals, and \$2 for 7 days' lodging.

The new and old minimum rates for experienced workers in some classes of establishments are shown in the accompanying table.

	Factories	Shops	Offices	Hotels Catering
<i>Women</i>				
Old Rate ..	\$14	\$12.75	\$15	\$14
New Rate ..	\$16.80	\$15.30	\$18	\$18
<i>Men</i>				
Old Rate ..	.40 hr. \$15
New Rate ..	.48 hr. \$18

Learning Period.—For occupations requiring some degree of experience before satisfactory service can be given, lower rates are established for inexperienced workers rising usually by stages to the full minimum rate at the end of the learning period. As before, however, no

learning period is fixed for those in the fruit and vegetable industry, in barbering or shipbuilding. In hotels and catering, it is still three two-month periods but at \$12, \$14 and \$16 respectively instead of at \$9, \$10.50 and \$12 weekly. The learning period has been reduced in offices. It is the same as in hotels and catering, as are the new rates. Formerly girls over 18 in offices received at least \$11, \$12, \$13 and \$14 for each of four three-month periods and those under 18 the same rates for each of four six-month periods. In laundries, the new hourly rates are 31, 34 and 37 cents for three two-month periods; they were 21, 24 and 27½ cents for three four-month periods.

Minimum Working Period.—A new provision in the seven revised Orders, except those for shipbuilding and the fruit and vegetable industry, requires a worker called to work but for whom there is no work to be paid at least two hours' pay or for the entire waiting time if longer. As before, hourly-paid workers in hotels and restaurants, offices, barber-shops and laundries who work part of a day must be paid for at least four hours; in laundries the minimum period is three hours on Saturdays. In the fruit and vegetable industry the minimum for men is \$1.44 and for women \$1.20.

Weekly Rest.—A weekly rest of 32 consecutive hours is provided for the first time for workers in hotels and catering, offices and laundries. Notice of the rest period must be given. The Board of Industrial Relations may approve other arrangements in exceptional cases when the employer and employees apply for such a change.

Maximum Work-Spell.—As before, workers in the fruit and vegetable industry must be given an hour off after not more than five consecutive hours of work, but the Board may approve a rest period as short as a half-hour, if 75 per cent of the workers sign a petition requesting a shorter one.

Semi-Monthly Payment of Wages.—The Orders stipulate that wages earned up to a maximum of eight days before pay-day must be paid at least semi-monthly to workers in hotels and catering, laundries, the fruit and vegetable industry, shipbuilding, to barbers and to cooks and bunk-house employees in unorganized territory. The Semi-Monthly Payment of Wages Act as revised in 1939 makes this provision for manufacturing, construction, mining, shipbuilding and logging and it may, by regulation, be extended to other industries and occupations.

Other Provisions for Hotel and Catering Industry.—By the Order applying to hotels and catering work, which include such places as boarding-houses, clubs, restaurants, dance-

halls, hospitals (excluding nurses), dining-rooms in connection with industrial and commercial establishments, and schools (excluding students), night work of women is prohibited, except on Christmas and New Year's Day or on any other day specified by the Board, between 1.30 a.m. and 6 a.m. unless employment during this period is continuous, but this rule does not apply to hospital employees who live on the premises or where the Board grants exemption to those employed in catering.

No employer may require a woman in these establishments to begin or finish her working-shift between 1.30 a.m. and 6 a.m.

In addition, the Order requires an employer to provide suitable rest-rooms and adequate toilet and wash-room facilities for his workers. If the employer fails to make satisfactory provision, the Board may indicate the provision to be made and the time-limit within which the employer is to comply.

Special provisions for resort hotels in unorganized territory between June 15 and September 15 are made by an Order gazetted and effective July 4. Men and women may work up to 10 hours a day and 52 a week, and there is no prohibition of work by women between 1.30 and 6 a.m., the weekly rest-period for all workers is at least 24 hours and their over-time pay begins after 44 hours a week instead of after 8 in a day or 44 in a week.

Enforcement.—All the Orders reproduce provisions in the Acts which require an employer to keep records in English of wages paid, hours worked and the names, ages, nationalities and addresses of his workers, and to keep posted in a conspicuous place in his establishment a copy of the Wage Order which applies to him and his workers and of a schedule setting out the daily shifts and intervals free from duty of each of his employees.

British Columbia Workmen's Compensation Act

Workers in retail stores, in the catering industry, in hotels and lodging houses with at least 10 bedrooms, in apartment and commercial buildings and licensed beer parlours, have been brought within the Act from July 1, and in land surveying, auctioneering, private schools, and clubs, nursing homes, dental laboratories, barber and beauty shops, photography studios and photo printing shops, stockyards, and broadcasting stations, but not players and artists, from August 1, provided the employer has at least three workers other than members of his family.

Private hospitals, janitor service, floor polishing and waxing service, theatres, golf courses, rinks, bowling alleys and billiard parlours and park operations but not players and artists in any of these have also been brought within the Act from August 1, provided an employer has at least one workman other than a member of his family.

Manitoba Child Welfare Act

Mothers' Allowances

That part of the Regulations of 1936 which establishes rules governing eligibility and the payment of mothers' allowances (L.G. 1936, p. 575) under this Act was replaced by Regulations dated June 20 and gazetted June 22. The only important changes relate (1) to the powers of the Director of Public Welfare to hold in trust or to use for the beneficiaries any cash or liquid assets owned by the beneficiaries and (2) to the eligibility of a deserted mother.

By Regulations issued on December 29, 1945, and gazetted January 12, the allowances were increased, a medical certificate required where the eligibility of a child depends on the continuous ill-health of its mother, and the Director of Public Welfare given the powers formerly exercised by the Child Welfare Board.

Manitoba Fair Wage Act

The annual schedule for rates of wages and maximum hours prescribed for certain public and private construction works in Manitoba (L.G. 1945, p. 1004) was gazetted on May 25,

1946, and will be in effect from June 1, 1946, to April 30, 1947.

"Public Work" applies to work under contract between the Minister of Public Works and an employer and includes construction, remodelling, demolition or the repairing or painting of buildings in Manitoba and to a highway, road, bridge or drainage construction work where the work is done outside the Greater Winnipeg Water District.

"Private Work", as defined in the Act, applies to the building, construction, remodelling, demolition or the repairing of any building or construction work in the Greater Winnipeg Water District, irrespective of the number of contracts made, in any city or town with a population exceeding 2,000, or in any other part of the province to which the Act may be extended by the Lieutenant-Governor in Council provided that the total cost of such work exceeds \$100. Maintenance work done by a regular maintenance staff on any property under the immediate control of the owner, tenant or occupant is not included where the work is not undertaken with the intention of selling or renting the property.

Most rates have been raised by five or ten cents an hour, and the new ones were approved by the Regional War Labour Board. Rates are not set in the new schedule, however, for asphalters, boilermakers, welders, teamsters, or for the use of trucks. As before, time worked in excess of the hours listed in the schedule, or on Sunday in emergencies, must be paid at the rate of time and one-half, and ordinary work on Sunday must be paid at double time rates.

The schedule follows:

FAIR WAGE SCHEDULE

The following schedule shall apply from and after June 1, 1946, on "Private Work" and on "Public Works", as described herein:

Occupation	A-Greater Winnipeg Water District Area for Private Work, and for Gov't Work, Winnipeg and Radius of 30 Miles.		B-Other than Area Described in "A" (applies to private work when population exceeds 2,000).	
	Basic Wage Rate Minimum Per Hour	Hours Maximum Per Week	Basic Wage Rate Minimum Per Hour	Hours Maximum Per Week
1. Asbestos Workers—	\$ c.		\$ c.	
(a) Journeymen.....	1 00	44	1 00	50
(b) 1st Class improvers.....	0 85	44	0 85	50
(c) 2nd Class improvers.....	0 70	44	0 70	50
2. Bricklayers.....	1 35	44	1 20	50
(a) Helpers (continuously employed at mixing and tempering mortar). Subject to existing agreement between the Builders' Exchange and the Bricklayers' Union.	0 73	43	0 68	54
3. Bridge and Structural Steel and Iron Workers.....	1 10	44	1 10	50
4. Carpenters and Millwrights..... Subject to existing agreement between the Builders' Exchange and Carpenters' Union, Local 343.	1 15	44	1 00	50
5. Cement Finishers (in warehouses or large floor area jobs).....	0 80	43	0 75	54

FAIR WAGE SCHEDULE

The following schedule shall apply from and after June 1, 1946, on "Private Work" and on "Public Works", as described herein:

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Gov't Work, Winnipeg and Radius of 30 Miles.		B—Other than Area Described in "A" (applies to private work when population exceed 2,000).	
	Basic Wage Rate Minimum Per Hour	Hours Maximum Per Week	Basic Wage Rate Minimum Per Hour	Hours Maximum Per Week
6. Electrical Workers (inside wiremen, licensed journeymen).....	\$ c. 1 15	44	\$ c. 1 00	50

Spreader and Finishing Machine operator.....	0 70	54
Teamsters.....	0 55	54
Teamsters and two horse teams.....	0 80	54
Teamsters and four horse teams.....	1 05	54
Timber men (timber work where use of hammers, saws, axes and augers only are required).....	0 75	54
Tractor operator, 50 H.P. drawbar or over.....	0 75	54
Tractor operator, under 50 H.P. drawbar.....	0 60	54
Truck Drivers.....	0 65	54
Watchman and Flagman.....	25 00 per week	

Manitoba Power Commission Act

Regulations under this Act, gazetted June 8, lay down rules for issuing licences and permits, for inspection and standards for electrical work under the jurisdiction of the Power Commission. Regulations under the Electricians' Licence Act (L.G. 1942, p. 1439) laid down standards for work governed by that Act and provided for inspection by the Department of Labour. The latter Act applies to all electrical work not carried on by public service corporations or by municipal departments engaged in generating and distributing power in plants to which the public is not admitted, or engaged in operating railway transport systems. More recent regulations under that Act (L.G. 1946, p. 684) set rules for the examinations for certificates and fees to be paid.

A board of examiners, composed of three employees of the Power Commission, one of the Department of Labour, and a qualified electrician, will prescribe the subjects and examinations and issue general and limited licences which will expire each December 31. Those licensed under the Electricians' Licence Act will be considered holders of the general licence and may perform any work on works covered by the Power Commission Act and may employ up to three unlicensed helpers and one additional helper for each employee holding a general licence. A limited licence permits work where the current is single phase and the pressure not more than 150 volts to ground or 300 volts between phase wires on installations on a farm or residence or on commercial premises with a floor area not exceeding 1200 square feet and which are not a hazardous location; a licensee may employ up to two unlicensed helpers. Holders of general and limited licences are responsible for supervising their unlicensed helpers. A wiring permit enables its holder to do only work specified in the permit. On completion of any work, a holder of a licence or permit must apply for inspection and approval of the work. The Regulations also fix licence fees and give the board power to refuse to grant or to cancel licences but permit appeals to the Power Commission.

The rules for standards of work incorporate the latest edition of the Canadian Electrical Code, Part I, but the Power Commission may modify the provisions or waive compliance where strict adherence would cause undue hardship or expense and no undue hazard would be created. For work on commercial, industrial and public buildings with floor areas greater than 1200 square feet, on motor installations where the motor capacity exceeds 10 horsepower, or on such hazardous locations as refineries, oil warehouses, dry-cleaning plants,

paint and spray booths, motion-picture projection rooms, grain elevators, feed and flour mills, garages, filling stations, etc., plans must be submitted to the Commission for approval; the work, on completion, must be inspected by Commission inspectors and no power connection may be made until it has been approved. The Commission or its inspectors may disconnect or prohibit the use of any works deemed hazardous.

Nova Scotia Minimum Wage for Women Act

The Order under this Act governing employees in hotels, restaurants, boarding-houses, and hospitals and institutions was amended by an Order gazetted June 5, 1946, to make it clear that an employer who requires a worker to wear a uniform, etc. must supply, repair and launder it free of charge and may not reduce wages for such service. Formerly, it was merely stipulated that no reduction might be made from the minimum rate for the use, purchase or laundering of such apparel.

Quebec Apprenticeship Assistance Act

Apprenticeship Commissions for the building trades of Matane and for the barber and ladies' hairdressing trades of St. Francis District were incorporated by Orders in Council dated May 23 and June 20, gazetted June 1 and June 29 respectively.

Saskatchewan Annual Holidays Act, 1944

Regulations under this Act, which went into force on July 1, were made on June 14, gazetted and effective on July 2. The Act provides two weeks' holidays with pay after a year's employment for all employees including domestic servants who work only half-days, except those in farming, ranching and market gardening. The holiday may be taken in one period or in two periods of one week each.

The Regulations stipulate that an employer, who, by agreement with a worker who has been in his employ for less than a year, grants a holiday of one working day for each month the workman has been employed, must allow the holiday to be taken in one period and must pay to such employee for his holiday as holiday pay one-twenty-sixth of the total wages he has earned during the months he has been employed and for which the holiday is being given. If a worker takes his holiday on this basis he is not entitled to another until one year later.

An abstract of the Act and the Regulations, which the Act requires an employer employing three or more persons to keep posted in a conspicuous place, appears as a schedule to the Regulations.

Saskatchewan Minimum Wage Act

Effective July 22, new Minimum Wage Orders increase the minimum rates for most employees by some 12 per cent and apply the rates to all workers within the scope of the Act in places of 500 or more population and, for the season, in certain summer resorts. Farm labour and private domestic servants are excluded but the Orders apply to municipal employees. On July 1, the Dominion Wages Control Order ceased to restrict the raising of wage-rates when the increase is made in order to comply with a provincial Wage Order.

As before, the minimum rates are lower in towns than in cities, except for places of amusement and for janitors and charwomen. The higher rates, however, apply now not only to cities and within a five-mile radius but also to eight larger towns and their vicinity; these are Canora, Estevan, Humboldt, Kamsack, Lloydminster, Melville, Shaunavon and Wynyard. The new rates for amusement places, now hourly instead of weekly, are the same in cities as in towns.

The old and new rates for certain work-places are set out in tabular form below.

	Factories	Shops	Offices	Hotels and Catering
Zone 1*	\$	\$	\$	\$
Old Rate ..	16.80	16.80	16.80	16.80
New Rate ..	18.50	18.50	18.50	18.50
Zone 2*				
Old Rate ..	14	14	14	14
New Rate ..	16	16	16	16

Of the seven new Orders, Numbers 1 and 3 applying to the cities and larger towns and to the smaller towns, respectively, fix minimum rates for all workers within the Act except those employed: (a) in hotels, restaurants, hospitals, nursing homes, educational institutions (Orders 2 and 4, according to size of towns); (b) in places of amusement in any city or town of over 500 (Order 5); and (c) as janitors or as charwomen in apartment blocks or commercial buildings (Order 6). Order 7 applies to all persons employed in or within three miles of seven specified summer resorts except those in agriculture or private domestic work.

In addition to provisions to ensure the payment of the prescribed wage, the Orders relating to hotels, restaurants and like places, to

places of amusement and to summer resorts contain a section prohibiting the employment of children under 16, which is the minimum age for employment in factories in Saskatchewan.

Every employer within the scope of these Orders is required to keep posted a copy of the relevant Order in such a position in his establishment that it can be easily read by his employees.

GENERAL ORDER FOR CITIES AND LARGE TOWNS

Order 1 fixes a minimum of \$18.50 instead of \$16.80 a week for workers within its scope except those engaged principally in delivering messages or merchandise. For messengers on foot or by bicycle, the new minimum is \$12 instead of \$10 and for operators of horse-drawn or motor vehicles it is \$24 instead of \$16.80.

The rate applies to the "normal work-week" which is defined as 48 hours in a week or the number of hours customarily worked in an establishment in a week, if they are less than 48. When a public holiday falls in any week, the normal work-week is reduced by the number of hours ordinarily worked on that day of the week. A public holiday is defined as New Year's Day, Good Friday, May 24, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, a civic holiday or a weekly half-holiday prescribed by statute or municipal by-law. A worker who has been employed by the employer for at least six months and who works on a public holiday is to be paid for that day or half-day at his regular rate increased in the proportion which the hours worked on the holiday bear to the normal work-week.

No learning period is provided for by this Order except that a student at law, or in accountancy or pharmacy whose employment is part of his training may be paid at a rate other than that prescribed if it is approved in advance by the Chairman of the Minimum Wage Board. The rescinded Order provided for lower rates for learners for two three-month periods.

Part-time workers, that is, those employed for less than the normal work-week except messengers on foot or bicycle, must now be paid at least 50 cents an hour instead of 35 cents, and, except in the case of school-children, they must be paid at least \$1.50 each time they are required to report for work. For part-time messengers the new minimum is 35 cents an hour instead of 25 cents. As before, unless the Board permits otherwise, the number of part-time workers is limited to 25 per cent of the full-time workers except that one may be employed

* Under previous Orders higher rates were fixed for cities than for towns; under new Orders higher rates the fixed for cities and larger towns, other rates for smaller places.

where there are less than four full-time workers.

Overtime is work beyond the normal work-week and must now be paid at time and a half the regular rate to any worker earning not more than \$35 weekly. The overtime rate was formerly 35 cents an hour or *pro rata* whichever was the greater.

GENERAL ORDER FOR SMALLER TOWNS

Under Order 3, applying as described above in some 49 towns and villages of over 500 population, the minimum rate for most classes for a normal work-week as defined above, is \$16 instead of \$14, the rate for full-time messengers on foot or bicycle, \$10 instead of \$7, and for operators of horse-drawn or motor vehicles, \$24 instead of \$16.80.

A part-time worker's minimum is 40 cents an hour instead of 35 cents and he must receive at least \$1.20 when called to work. There is no restriction on the number of part-time workers.

For overtime beyond the normal work-week by workers paid \$30 or less in a week, time and one-half the regular rate must be paid.

Other provisions are the same as those made by Order 1.

HOTELS, RESTAURANTS, HOSPITALS ETC.

Orders 2 and 4 apply to hotels, including boarding and rooming-houses where more than five beds are set apart for the use of boarders or lodgers, to restaurants, including non-public places where for a consideration meals are regularly supplied to more than five persons, and to hospitals, schools and nursing-homes.

In cities and the eight larger towns and within a five-mile radius of these places, the minimum wage in these work-places is \$18.50 for the normal work-week, instead of \$16.80. In the smaller towns and villages the minimum is \$16 instead of \$14 for the same period. The normal work-week under these Orders is not more than 48 hours, or if a public holiday occurs not more than 40 hours. Previous to these Orders, there were two three-month learning periods permitted at lower rates.

Part-time workers, those who work less than the normal week, must be paid at least 50 cents an hour in the cities and larger towns or 40 cents in the smaller places instead of 35 cents. There is a minimum of \$1.50 payable in both zones if employees are called to work. The number of part-time workers is restricted as before in cities and larger towns to 25 per cent of the number of full-time workers.

Overtime in excess of the normal work-week must be paid at time and one-half the

regular rate to workers in cities and large towns who are not earning more than \$35 per week and to those in smaller places earning \$30 or less in a week. One who works on a public holiday must be either paid at regular rate in addition to his regular weekly wages or be granted, within four weeks, time off in one period amounting to one hour for each hour or fraction of an hour he was required to be on duty.

Other provisions in the Orders stipulate that an employer who requires his workers to wear a uniform or any special apparel must provide, repair and launder it free of cost, and limit deductions for meals and lodging to 20 cents for each meal or 60 cents per day and 25 cents for each night's lodging. No deduction may be made for any meal not consumed by the worker.

New provisions of these Orders prohibit the employment of anyone under 16, restrict the hours of work within a period of 12 hours in any one day, and stipulate that a female who does not reside on the premises may not begin or finish work between 12 midnight and five a.m.

PLACES OF AMUSEMENT

Order 5, applies to billiard-rooms, bowling-alleys, skating-rinks (except persons employed to sweep the ice), dance-halls, theatres and other places where games of skill are carried on in all cities and towns with more than 500 people and within a five-mile radius. The new minimum is 50 cents an hour in any of these places; the former minimum rates were \$16.80 and \$14 a week for full-time employees in cities and in towns, respectively, and 35 cents an hour for part-time workers. At least \$1.50 must be paid to any worker called to work in any city whether or not he is on duty for three hours.

No child under 16 may be employed in any of these places of amusement.

JANITORS AND CHARWOMEN

Order 6 provides minimum rates for a new class: janitors, caretakers and charwomen working in any apartment block, boarding or rooming-houses (in which meals or beds are provided for a consideration for more than five persons), business block, office building or any building used for commercial purposes in any city or town of over 500 population and within a five-mile radius thereof.

The minimum is \$18.50 a week for an employee working more than 36 hours in any week for the same employer, and at least 50 cents an hour must be paid to one working 36 hours or less for one employer in a week.

SUMMER RESORTS

Another new order, Order 7, applies to all persons employed, except in agriculture or in private domestic service, in the summer resorts known as Carlyle Lake, Emma Lake, Kenosee Lake, Katepwe, Lebret, Regina Beach, Waskesiu and within a three-mile radius of them during the season between June 15 and September 15 inclusive in each year.

Under this Order no employer may employ a child under 16. The minimum rate is 35 cents an hour and at least \$1.40 must be paid for each day on which a worker is required to report for duty. As under the hotel and restaurant Order, uniforms and other special wearing apparel which the employer requires a worker to wear must be supplied, repaired and laundered free of charge to the worker, and 20 cents a meal or 60 cents a day and 25 cents for each night's lodging are the maximum deductions which an employer may make for meals and lodging furnished to an employer and accepted by him as part payment of wages.

Saskatchewan Social Aid Act

Mothers' Allowances

The Mothers' Allowance Regulations (L.G. 1945, p. 916), made under the Child Welfare Act, have been rescinded, and re-issued under the Social Aid Act, 1944.

Saskatchewan Steam Boilers Act

Regulations governing examinations for engineers' and firemen's certificates were approved by Orders in Council dated June 14 and gazetted July 2. Regulations of April 18, 1945, laid down rules for the inspection and operation of pressure vessels (L.G. 1945, p. 917) and regulations of August 3, 1943 (L.G. 1943, p.

1298) adopted the Canadian Standards Association rules for the construction and inspection of boilers and pressure vessels and the C.S.A. Mechanical Refrigeration Code, and set forth rules for refrigerating engineers and for the inspection of refrigerating systems.

The new Regulations provide for issuing a permanent certificate, or a certificate of re-registration to the holder of a permanent certificate, to every candidate for an engineer's certificate who, on a written examination, receives the percentage of marks prescribed by the Act for his class, and a fireman's or provisional certificate, good for 12 months, to a candidate for such a certificate who passes an oral examination. Fees are set for examinations and certificates.

That part of the 1943 Regulations dealing with examinations for refrigerating engineers' certificates was amended to specify that a candidate must have had at least one year's practical experience in the operation of a refrigeration system with a capacity of three tons or more, or that he must have a first, second or third-class engineer's certificate and has had six months practical experience. The amendment also requires permanent certificates to be re-registered.

Saskatchewan Workmen's Compensation (Accident Fund) Act

All employees of rural telephone companies including operators were brought within the Act from August 2 by an amendment to the General Regulations (L.G. 1943, p. 1419) made by an Order in Council dated June 18 and gazetted July 2. The General Regulations provided for bringing all workers of rural telephone companies other than operators under the Act and a recent amendment to the Act removed telephone operators from the classes of workers excluded from it.

Legal Decisions Affecting Labour

Saskatchewan Appeal Court Holds that Union is Legal Entity for Purpose of Trade Union Act

A union under the Saskatchewan Trade Union Act, 1944, is a legal entity for the purpose of making application to the Labour Relations Board and to the Court of King's Bench for enforcement of the Board's Orders, and it cannot divest itself of that status when an application is made to a superior Court for a review of a Board Order which was made at the union's request. So held the Saskatchewan Court of Appeal on April 30, 1946, in unani-

mously dismissing an appeal by Lodge 1057, International Association of Machinists, from a rejection in the Court of King's Bench in Chambers of its request for a re-hearing of a preliminary objection in an application by the Acme Machine and Electric Company for a writ of *certiorari*.

The union had applied on June 26, 1945, to the Saskatchewan Labour Relations Board for an order under the Trade Union Act requiring the company to refrain from the "unfair labour practice" of failing to negotiate with representatives of the union. The Board made such

an order on August 14, 1945. In February, 1946, the company applied to the presiding Judge of the Court of King's Bench in Chambers for an order for a writ of *certiorari* to return to that Court the order of the Labour Relations Board and also for an order that the Board's order be quashed without actual issue of the writ. The notice of motion was returnable on February 12 and was served upon the Attorney-General and the Labour Relations Board in accordance with the Crown Practice Rules. It was served also on the president of the union.

The Trade Union Act gives the Labour Relations Board the authority to require an employer to bargain collectively, or to require any person to refrain from violating the Act or from engaging in unfair labour practices, one of which is "... to fail or refuse to bargain collectively with representatives elected or appointed (not necessarily being the employees of the employers) by a trade union representing the majority of the employees in an appropriate unit; . . ." A certified copy of a Board order, filed in the office of the Registrar of the Court of King's Bench, becomes enforceable as a judgment or order of the Court.

During hearings on the company's motion, which had been adjourned from time to time, counsel for the Board took preliminary objection to the proceedings on the ground that the union, named as sole respondent, "is not a legal person or body or *quasi* body, corporate or politic, which may be made party in any action", and that the provisions of the Trade Union Act, 1944, do not alter the common law so as to endow the union with legal status. The presiding Judge dismissed the preliminary objections, and also a motion by the union asking him to hear the preliminary objections again. The union thereupon appealed.

Chief Justice Martin, after stating certain provisions of the Act, held these provisions give a trade union "a status at least for the purpose of carrying out the provisions of the statute," and that Lodge 1057

... is a legal entity for the purpose of making applications to the Labour Relations Board; it is clothed with authority to make applications to the Court of King's Bench to enforce the orders of the Board and I am of the opinion that it cannot divest itself of the status given to it by the Trade Union Act, 1944, when an application is made to a superior Court for the review of an order of the Labour Relations Board which has been made at the request of the trade union. In the absence of plain language in the statute to the effect that a trade union cannot be named as a party in proceedings taken before a superior Court to question an order of the Board made at its request, I am not prepared to hold that it cannot be so named. There is no such provision in the statute. Our

attention was directed to sec. 21, which provides that a trade union shall not be made party to any action in any Court "unless such trade union may be made a party irrespective of any of the provisions of this Act." This provision is no doubt inserted in order to preserve the status of trade unions at common law and it has no application in my opinion to proceedings of the character here under review . . .

Mr. Justice Mackenzie, concurring, declared that—

... having availed itself of the provisions of the Trade Union Act, 1944, 2nd sess., ch. 69, to apply for and obtain in the corporate capacity authorized by that Act an order requiring the respondents to refrain from an unfair labour practice, the appellant cannot now, in the proceedings taken by way of *certiorari* to question the validity of such order, be heard to contend that it should have been served with the notice of motion initiating such proceedings as if it had applied for and obtained the order in a non-corporate capacity . . .

Mr. Justice Gordon agreed with these opinions and dealt with the union's argument that the motion as constituted was contrary to the procedure laid down in the King's Bench Act and the Crown Practice Rules, that it was not an "action" within the meaning of that statute and that the union had no legal existence and would have to proceed by way of a representative action. He was of the opinion that these arguments failed. *Mackay and Mackay v. International Association of Machinists Lodge No. 1057, Saskatoon, (1946) W.W.R. 257.*

English Employer Liable When Inadequate Guards Permit Injury to Operator of Neighbouring Machine

Pointing out that an employer is required by the Factories Act, 1937, to fence dangerous parts of a machine so as to make it safe not only for the operator but for every person working on the premises, the Court of King's Bench Division on November 30, 1945, awarded damages to an injured operator of a woodworking machine. The case is reported in the British *Ministry of Labour Gazette*, March, 1946.

The plaintiff, a press operator at the defendants' woodworking factory, was injured when part of a vertical spindle moulding machine, which was next to his machine, broke away and a piece lodged in his thigh. The injured worker claimed damages from his employer for breach of statutory and of common law duty to fence the spindle moulding machine. The defendants contended that the machine was fenced in compliance with the Woodworking Machinery Regulations which, where they applied, replaced Section 14 of the Factories Act and

required the protection only of the employee working the particular machine which was alleged to be insufficiently fenced.

Section 14 of the Factories Act, like the sections dealing with prime movers and transmission machinery, requires that every dangerous part of any machinery

shall be securely fenced unless it is in such a position or of such construction as to be as safe to every person employed or working on the premises as it would be if securely fenced.

Regulation 17 of the Woodworking Machinery Regulations, which were recently amended in scope (L.G., 1946, p. 105) stipulates:—

The cutter of every vertical spindle moulding machine shall, when practicable be provided with the most efficient guard having regard to the nature of the work which is being performed.

The Court held that while the Regulations modified Section 14 in respect to woodworking machines by substituting prescribed guards and fences for the general requirement of secure fencing which would be otherwise required by the Section, they did not deprive certain classes of workers in a factory from their right to protection. Moreover, the evidence showed that the plaintiff would not have been injured if the Woodworking Regulations had been complied with. *Harrison v. Metropolitan Plywood Co.*, King's Bench Division, November 30, 1945.

English Court of Appeal Holds Gradual Disablement Caused by Vibrating Machine to be Injury by Accident

The appeal of a workman whom the County Court had refused compensation for a gradually increasing disability caused by a vibrating machine was allowed by the Court of Appeal on February 22. The case was reported in the British *Ministry of Labour Gazette*, May, 1946.

The appellant was a rotary fettle who had to hold a vibrating machine tightly in his left hand. After about one year, the fingertips of his left hand were becoming numb and, eventually, he became totally incapacitated. The County Court Judge who heard his application for compensation ruled that an injury by accident could only be said to occur when the workman was "suddenly and decisively attacked at his work." The Court of Appeal held that the workman was entitled to an award:—

each vibration was, as it were, an infinitesimal blow causing an infinitely small damage to the tissue. The fact that the condition causing the disability was the result of the cumulative effect of successive occurrences did not prevent its being accidental.

Fitzsimons v. Ford Motor Company Ltd. (Aero Engines), Court of Appeal, February 22, 1946.

U.S. Supreme Court Holds Preparations Made in Work-Place for the Job are Work Within Fair Labour Standards Act

Time necessarily spent by employees in walking to their work after punching the time-clock on the employer's premises, and in preparatory activities such as donning work-clothes, taping or greasing arms, preparing equipment and machinery, is "working time" within the provisions of the federal Fair Labour Standards Act. This was the opinion of a majority of the United States Supreme Court on June 10, 1946, in a case involving a Michigan pottery plant. Where the time so spent is a matter of a few seconds or minutes, however, it may be disregarded. The decision reversed the judgment of the Sixth Circuit Court of Appeals.

The Fair Labour Standards Act, 1938, requires time and one-half the regular hourly rate of pay to be paid for all hours worked beyond 40 in a week. An employer who violates the wage-and-hour requirements is liable to his employees for double the unpaid amounts as well as court costs and a reasonable attorney's fee.

At the pottery plant involved, the time counted as worked by the employees, most of whom work on shifts at piece-rates, is calculated from the even quarter-hour after the worker punches in to the quarter-hour immediately preceding the time when he punches out. Thus, an employee working the 8-hour shift between 7 a.m. and 4 p.m. and punching in at 6.46 a.m., out at 12.14 p.m. in at 12.46 p.m. and out at 4.14 p.m. is credited with the eight hours, or 56 minutes less than the time recorded by the clocks.

Seven employees and their local union brought an action in District Court under the Act, claiming that this method did not compute all the time actually worked and that they were thereby deprived of the proper overtime compensation guaranteed by the Act, since, they alleged, all employees worked approximately 56 minutes more per day than were credited by the Company.

The District Court referred the case to a special master who recommended its dismissal since the employees "have not established by a fair preponderance of evidence" that the company had violated the Act. It was found that the workers were not required to, and did not, work 56 minutes more per day than credited, that they had not proved that all the time between the hours recorded was spent in

working, and that productive work did not regularly begin until the scheduled starting time.

The District Court agreed with these findings except that it considered there was evidence that most of the workers were ready for productive work at from 5 to 7 minutes before the scheduled time and it therefore set a formula for computing this additional time. The company appealed successfully to the Sixth Circuit Court of Appeals which held that the onus was on the workers to prove that they did not receive the wages to which they were entitled.

On appeal, the Supreme Court, through Mr. Justice Murphy, declared that the time spent in walking to work benches after punching the time-clock and in preparatory activities at their work places.

. . . involve (s) exertion of a physical nature, controlled or required by the employer and

pursued necessarily and primarily for the employer's benefit . . . Work of that character must be included in the statutory work-week and compensated accordingly regardless of contrary custom or contract.

.With respect to proof, the Court found that:—

In such a situation we hold that an employee has carried out his burden if he proves that he has in fact performed work for which he was improperly compensated and if he produces sufficient evidence to show the amount and extent of that work as a matter of just reasonable inference. The burden then shifts to the employer to come forward with the evidence of the precise amount of work performed or with evidence to negative the reasonableness of the inference to be drawn from the employee's evidence. If the employer fails to produce such evidence, the court may then award damages to the employee, even though the result may be only approximate.

Anderson et al v. Mt. Clemens Pottery Co., No. 342, (L.R.R. Vol. 18, No. 13, W.H. Cases 83), June 10, 1946.

Conference on Community Planning

A CONFERENCE to discuss methods of encouraging more community planning in the country was held in Ottawa on June 25 and 26, under the auspices of the Central Housing and Mortgage Corporation, an agency of the Department of Reconstruction and Supply. Major-General H. A. Young, Vice-President of the Corporation, acted as Chairman.

The conference, which was attended by delegates from the Provincial and Federal Governments, professional bodies and other associations, was opened by Right Honourable C. D. Howe, Minister of Reconstruction and Supply.

In outlining the position of community planning in the post-war development of Canada, Mr. Howe referred to the important place it held in the achievement of high levels of employment and social security. The war years, he said, had increased the growth of larger cities three times as much as they had grown in the previous ten years which, coupled with the substantial increment in the supply of modern and efficient plants and skills, made the best use of community resources imperative if achievement of "conditions of welfare worthy of the rich natural wealth" of the country is to be realized.

He stated that to realize the highest possible standards of living, Canadians must employ what we have in the most efficient way. "The most efficient employment of our people and our resources is increasingly dependent on the

efficiency and the amenities of the communities where we live, and the routes connecting these communities".

"Modest outlay on community and regional surveys and plans will make for better health and welfare for all time to come. Viewed in this light, planning is probably one of the least expensive kinds of social security."

Provincial spokesmen outlined legislation and operations existing in the community planning field in the various provinces.

Federal spokesmen proposed the formation of a national association which would provide facilities for the exchange of information between local citizens' planning groups in all parts of the country. It was pointed out that many cities and towns have possessed such groups for a long while, but lack of full information of progress in other localities tended to hinder the implementation of plans.

The proposal was overwhelmingly accepted by the conference and the draft by-laws of the Community Planning Association of Canada, prepared by a representative sub-committee were adopted. The draft constitution defined the object of the Association as being "to foster public undertakings of, and participation in, community planning in Canada". Its structure is to consist of Provincial branches and a National Council composed chiefly of branch delegates.

The conference ended with addresses by Mr. David Mansure, President of Central Mortgage and Housing Corporation and M. Jacques Greber, Director of the National Capital Planning Office.

Prices

Prices, Retail and Wholesale, in Canada, June, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

AN advance of 1.6 points to 123.6 was recorded in the Dominion Bureau of Statistics cost-of-living index between May 1 and June 1, 1946. As in preceding months, food price changes were mainly responsible for the increase. An index for this group rose 4.4 points to 142.1 following the removal of the 2-cent per quart consumer subsidy for milk sold at retail; fresh vegetables, fruits, eggs and meats also recorded price increases. Other groups to register advances were clothing, up 0.6 points to 124.3, home furnishings and services 0.3 to 122.4 and miscellaneous items 0.6 points to 112.1. Fuel and light at 107.2 and rentals at 112.6 continued unchanged.

Bi-monthly cost-of-living indexes for eight regional cities registered further sharp increases between April and June. These advances were supported mainly by substantially higher food prices though at most centres price increases were also noted for clothing, homefurnishings and services, fuel and miscellaneous items. The Saskatoon index, up 3.6 points to 125.3, registered the sharpest gain, followed by the Vancouver series 3.2 higher to 122.5. At other centres the following increases were recorded: Montreal 2.7 to 125.8; Toronto 2.6 to 121.9; Winnipeg 2.5 to 120.9; Halifax 2.1 to 122.4; Edmonton 2.1 to 120.4 and Saint John 1.9 to 122.5.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1946

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939 = 100

* Indexes prior to 1926 have been recalculated, resulting in revisions from figures previously published. Typographical errors in 1945 averages and in rent indexes for 1941 and 1944 have also been corrected

† Commodities in the cost-of-living excluding rents and services.

Retail Prices

The accompanying table on retail prices of staple goods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of

TABLE II.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF JUNE, 1946

(Base:—August, 1939=100)

(a) The basis of these figures is the record of rents collected in the 1941 Census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices was not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every

tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home-furnishings, etc., with their weight, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941,

except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE.

Wholesale Prices, May, 1946

The Dominion Bureau of Statistics general index of wholesale prices advanced 0.4 points to 108.6 between April and May 1946, due mainly to increases in wood, wood products and paper. This group rose 2.5 points to 130.9 in May on higher prices for wood-pulp sold for export and certain furniture items including beds, springs, mattresses and bed couches. Animal products moved up 0.3 points to 112.9 in May, reflecting increases in livestock, raw furs and eggs which outweighed lower butter quotations. A gain of 0.2 to 128.1 in the iron and steel group was supported by strength in steel sheets and hardware items. Two groups were lower, the non-ferrous metals group falling 0.7 to 87.1, while the vegetable products group receded 0.1 to 97.7. Fibres, textiles and textile products at 98.2, non-metallic minerals at 103.0 and chemicals and allied products at 95.7 were unchanged.

Canadian farm products registered a further advance in May, the composite index moving up 0.7 points to 108.2. Animal products increased 1.2 points to 127.7 in the same interval due to higher prices for livestock and eggs, while field products gained 0.4 to 96.6 on increases in rye, potatoes and hay. Onions were fractionally lower.

Publications Received Recently in Library of the Department of Labour, Ottawa

THE Library of the Department of Labour was organized in 1900, and is both a reference and a circulating Library. It is maintained by the Department for the purpose of assembling and dispensing or distributing information required on all subjects which affect in any way the labour movement and the laws by which it is governed. These sources include a valuable collection of publications of labour organizations and periodicals published in the interest of organized labour, a collection of books and periodicals and newspapers dealing with economic and social problems, books of reference and volumes on history and law, a comprehensive collection on industrial combinations and related subjects, and all publications of the International Labour Office.

While the Library is primarily for departmental use, it also serves other government departments, provincial departments, the International Labour Office, labour organizations, and the public in general. Bibliographies on various subjects are compiled by the Library and supplied as required.

The Library contains approximately 50,000 volumes, many thousand pamphlets, and it also receives 150 newspapers and 1,000 periodicals. All periodicals are analysed, and articles on labour and economic subjects catalogued for permanent reference. The Library catalogue contains some 280,000 cards.

The list that follows is a continuation of those published in the LABOUR GAZETTE during the first four months of 1945. The arrangement of the catalogue has been revised somewhat. Instead of listing the authors first the titles of the publications under the several sub-headings are given the primary position, followed by the names of the authors, and publishers and other relevant details. It is intended that similar lists will be a more or less regular feature in subsequent issues of the LABOUR GAZETTE.

ACCIDENT PREVENTION:

Manual of Accident Prevention in Construction. Associated General Contractors of America Inc. Second revised ed., 1938, 370 pp.

The Control of Accidents; fabricated structural steel industry. U.S. Dept. of Labor, Washington, G.P.O., 1945, 14 pp.

Union-Management Co-operative, 20th Annual Meeting

Canadian National Railways Organization Held Successful Conference

THE System Committee Union-Management Co-operative Movement, Motor Power and Car Equipment Department of the Canadian National Railways, recently held its twentieth Annual Meeting in Montreal. Representatives of management and of the employees were present from several important railway centres between Moncton, New Brunswick and Winnipeg, Manitoba. The Chairman was Mr. E. R. Battley, Chief, Motor Power and Car Equipment Department, Montreal.

Co-operation between management and workers was the keynote in most of the addresses and discussions throughout the Conference. Emphasizing this factor in his preliminary remarks, the Chairman pointed out that if the railway was to retain its fair

share of the transportation business, co-operative efforts were essential.

Speaking on behalf of the employees, Mr. J. Corbett, President of Federation No. 11 A.F.L., also stressed the advantages of co-operation. He declared: "We have a good example in the co-operative movement . . . in getting the employees to feel that their co-operation is of value. . . . We wish to share the responsibility with management. . . . Realizing the amount of money in the Treasury, how it gets there, and how it is spent is our concern."

The Executive Vice-President of the Company, Mr. N. B. Walton, in defining the purposes of the meeting, said. "We have gathered together in order that we may discuss openly any differences that we have. . .

It is only human nature", he asserted, "to take a short view of the other fellow's position. If we stay apart and write letters", differences may not be "ironed out". He felt that "this 20th Annual Meeting of the System Committee Co-operative Movement is a real mile post" and "indicative of a very great accomplishment".

Mr. A. Fraser, Vice-President of the Traffic Department, stated, "I need not tell you gentlemen what co-operation means. It would be like carrying coals to Newcastle. But the value of working together can never, I think, be emphasized too frequently—the value, and the necessity—the urgent necessity".

Dealing especially with the question of Public Relations Mr. W. S. Thompson, Director, claimed the best means of attracting business is the "personal service touch, the best of mechanical appliances and by all-out and over-all co-operative effort on the part of those who work for the railroad, those who manage it, and our customers—the public."

Many questions of common interest to management and workers with reference to the operation of the railway and railway shops were discussed. Among the reports presented and discussed were: apprentice training, purchasing and handling materials, fire prevention, first aid and accident prevention (including conditions in a number of designated shops).

Origin of Movement

The Union-Management Co-operative Movement originated in 1925, some two years after the several component systems in the Canadian National Railways were amalga-

mated. It was essential, immediately following the amalgamation, to harmonize varying practices affecting the operation of mechanical department facilities. To achieve this co-ordination, consideration was given to various plans, and special studies were made in which employees' representatives worked with the management. From these conferences resulted a trial of the co-operative plan. The first meeting was held in Moncton, New Brunswick in January, 1925. The plan next extended to the locomotive repair shops at Stratford, Ontario, and thereafter, by degrees to other major shops of the Canadian National system. As the movement proved successful in the larger plants it was extended in April, 1927, to all engine-houses and smaller car repair points where approximately 50 or more men were employed.

The Committees are required to confine their recommendations to; (1) subjects designed to advance the railway industry under the jurisdiction of the Chairman; (2) advance the welfare of the employees; and (3) the betterment of the railway's service to the public.

It is explicitly specified that no subject which would affect wage agreements is to be considered by the Committees, nor do the Committees deal with grievances which arise with respect to working conditions established by agreements between the trades unions and the management. Other means are provided for dealing with such problems.

It is the opinion of the railway management that "a great benefit is recognized in the mutual understanding developed between officers and employees on which no monetary value can be placed."

Conditions of Work in New South Wales Bread Industry

AN inquiry into the bread-making industry in New South Wales both with respect to the quality of bread and to the conditions of work was made in 1944 by the Industrial Commission. The Commission's Report was referred in June, 1945, by the Minister for Labour and Industry and Social Welfare to an advisory committee representing bread manufacturers, operative bakers and bread carters with the request that it consider methods of giving effect to the Commission's recommendations. The report of this Committee was published in the N.S.W. *Industrial Gazette* for January.

The establishment of a central controlling authority, the Bread Industry Board, was recommended, representative of manufac-

turers, consumers, baking trade employees and bread carters, with statutory powers to regulate, *inter alia*, the manufacture, distribution and sale of bread, to establish standards of hygiene, sanitation, lighting and ventilation and, after investigation, to fix bread prices.

The Committee considered that control may best be effected by a system of licensing, the granting of a licence to be determined mainly by the suitability of premises and equipment and the competence of the persons concerned. To improve the technical knowledge of those entering the industry, a Food School at the Technical College is proposed and, in collaboration with it, a Technical Research Section to conduct research with a view to obtaining the highest quality loaf.

The working hours of operative bakers, the Committee agreed, should permit a five-day baking week. Bakers would thus have every weekend off, except on extraordinary occasions. Night work would be eliminated except on about seven nights a year before statutory holidays. In an ordinary week, earliest starting time would be 4 a.m. on Friday. Work would begin on Monday at 4.30 a.m. and at 5.30 on the other three days. Baking after 6 p.m. would be prohibited.

Carters should not deliver bread between 6 p.m. and the fixed starting time for the next day except on a Saturday when three days' bread is delivered but delivery should not be later than 7 p.m. On Saturdays they would work only to 11 a.m. instead of all day as at present. On the day before a holiday, no delivery should be made after the the hour prescribed or before the prescribed starting time on the next working day. The adoption of this schedule would result in week-end bread being only 12 hours older than at present. The Committee also suggests a delivery system to eliminate the wasteful pre-war overlapping but to give the public more opportunity to select bakers. The Committee

would prohibit the return of any unsold loaves from the shop to the baker.

As regards training, the Commission had recommended that classes in bread-making for apprentices be held at Technical Colleges during the forenoon and that apprentices be allowed time to attend classes during working hours. The Committee suggests that the Apprenticeship Commissioner arrange a conference of all parties as soon as possible to discuss how to give effect to this recommendation.

The Committee emphasizes that the Board should be authorized to appoint inspectors who could concentrate on bakehouse premises under the powers given by the Shops and Factories Act, the Pure Foods Act and the Weights and Measures Act. Bakehouses are now merely a part of a vast field to be covered by inspectors of the three Departments.

At present the system of inspection of bakehouses is dual in character and there is evidence of lack of organization to ensure co-operation between the departments charged with inspection from the factory point of view and departments charged with inspection from the health standpoint.

Scalping Accidents

IN connection with accidents caused by the entangling of women's hair in machinery the April Industrial Accident Prevention Bulletin published by the Royal Society for the Prevention of Accidents, London, gives particulars of three recent accidents of this kind in which the employer was fined for failure to fence the machinery. The Bulletin states:

These three cases, reported from different parts of the country in the same week, show that in spite of all the publicity given to hair entanglement accidents there is still a lack of sufficient precautions in many places. Incidentally, it is interesting to note that in none of these cases did anyone appear to blame the victims for not wearing caps; apparently, it is at last being realized that caps are a second line of defence and not substitutes for guards.

In one case the girl's hair was caught by the unfenced stock-bar of a lathe she was operating. In the second case there was a guard for

a shaft under the work-bench from which the sewing-machine was driven but the guard was not in proper position. In the third case the girl was operating a drilling machine which had a guard only on the upper part, the lower part, including the spindle, being quite unprotected. As in the other two cases the girl in this case bent down to pick up something and in doing so got her hair caught.

In the 1944 report of the Chief Factory Inspector of the United Kingdom (L. G. Feb., 1946, p. 154), it was remarked that in too many hair entanglement accidents the cause is still the lack of secure fencing and investigation shows that some managements still rely on the women and girls wearing caps. A London magistrate is quoted as pointing out to a defendant in such an accident case that "the law requires you to fence the machine, not the girl".

Recreation and Canadian Youth

"IN Canada at the present time, we see many evidences of a new impulse to improve recreational opportunities for all members of the community. From small, out-of-the-way villages right up to the Federal government there are stirrings which indicate a desire to assist the individual citizen in the constructive use of his leisure time."

With that postulate the Canadian Youth Commission introduces its study, "Youth and Recreation", a volume of 220 pages prepared under the direction of a committee of 14 leading Canadian social workers and authorities on education. It is asserted that it is "the first comprehensive survey made in Canada of recreational needs and opportunities", and is restricted to the needs of young people of both sexes in the age group 15 to 24 years.

The problem has given serious concern to social and governmental bodies in recent years. In the first place, it has been claimed that juvenile delinquency has markedly increased. Coupled with that is the movement to extend the age for school attendance and the demand for shortening the hours of industrial workers. These and related factors make the constructive and re-creative use of leisure time of national importance.

Before attempting to suggest a solution of the problem, the Canadian Youth Commission carried out a nation-wide survey to ascertain the types of leisure-time activities in which Canadian youth are interested. The first part of the report presents an analysis of the survey and serves to indicate the varied attitudes of youth toward recreation and to give some idea of what youth are asking by way of improved facilities. That raises the questions: "What are governments (Dominion, provincial and municipal) and private agencies (educational, social and religious) doing to cope with the situation?" The remainder of the book suggests possible answers.

The report outlines in some detail the contribution that the Dominion government is making in providing recreational facilities. Among these are the National Parks, the Canadian Broadcasting Corporation, the National Film Board and Wartime Housing. It is asserted that in her national and provincial parks "Canada possesses some of the most outstanding resources for recreation in the world." These are being improved by the provision of camp sites equipped with stoves, kitchen shelters, running water, etc. Boating, fishing, observation of wild life are

characteristic recreational possibilities in most parks during the summer season. Other parks are being planned for the post-war period, trails constructed and shelters provided for use at reasonable rates. It is urged that their benefits could be extended by government-sponsored summer camps to be used not only as playgrounds, but for specific interests such as art, drama, music, etc. A French-speaking camp in Quebec is advocated as likely to be of great interest to young people from the other provinces. Camps patterned after those of the Work-Camp movement in the United States in which young people undertake specific work projects aiming at the development of local resources, are also suggested.

The CBC programs are designed not only to entertain, but to inform and guide. Broadcasting to schools has developed steadily and has done much to create interest in valuable spare time activities such as music and drama and forums on public affairs. With the advent of frequency modulation the influence of the radio promises to be greatly extended.

The National Film Board provides films depicting various phases of outdoor recreation, and community life. These films are loaned to film societies and educational and recreational bodies throughout the country. In addition, the N.F.B. distributes many films of non-Canadian origin on aspects of recreation in other countries.

Wartime Housing has built many special community buildings and the Tenant Relations Department has appointed trained workers to carry through a social integration program, including provisions for adequate recreational facilities for the tenants of wartime housing communities. These Community Counsellors are now operating in more than 30 centres across Canada.

Other governmental projects to provide recreation are the Dominion-Provincial Youth Training plan inaugurated in 1937 which did much to promote physical fitness and to maintain morale during the war years. The National Physical Fitness program commenced during the war under governmental auspices gives promise of playing a useful part in providing and directing worth-while recreational activities.

The Book is published for the Youth Commission by the Ryerson Press. It is well printed, bound in cloth and sells for \$1.25 a copy.

Notes of Current Interest

Meetings of House of Commons Committee on Industrial Relations

Endorsement by the Prime Minister of a proposal made by Mr. A. L. Smith, (member for Calgary West) that an industrial relations committee be established to investigate the causes underlying the present labour disturbances in Canada in order to resolve the present disputes and attempt to develop a formula to prevent their recurrence, led to a series of meetings of the House of Commons Standing Committee on Industrial Relations, which had previously been inactive during the session.

The proposal was precipitated by the steel strike (see elsewhere in this issue, p. 1087) which, the Prime Minister stated, might produce "one of the most devastating situations" growing out of any labour dispute.

The Committee's terms of reference empowered it to investigate "all issues connected with and appertaining to the present industrial unrest in Canada, with power to call and examine witnesses under oath, and with power to call persons, papers and records and take all essential evidence, and to report their findings and conclusions to the House."

It was composed as follows: Hon. Humphrey Mitchell, Minister of Labour, Right Hon. C. D. Howe, Minister of Reconstruction and Supply, and Messrs: Adamson, Archibald, Beaudoin, Belzile, Black (Cumberland), Blackmore, Case, Charlton, Cote (Verdun), Croll, Dechene, Gauthier (Nipissing), Gillis, Gibson (Comox-Alberni), Gingues, Homuth, Johnston, Lalonde, Lapalme, Lockhart, Maybank, Merritt, MacInnis, McIvor, Moore, Pouliot, Ray-

mond, Ross (Hamilton East), Sinclair (Vancouver North), Skey, Smith (Calgary West), Viau. Messrs. J. J. Robinette of Toronto and A. Lief of Ottawa were appointed Counsel and Junior Counsel respectively, for the committee.

During preliminary meetings the steel strike was designated as the first order of business and telegrams were dispatched to the heads of the companies and the union involved in the dispute, inviting them to Ottawa to present their case before the committee.

Pursuant to the invitation Mr. C. H. Millard, Canadian National Director, United Steel Workers of America, Mr. H. G. Hilton, President of the Steel Company of Canada, Limited, Hamilton, Ont., Mr. Gordon MacMillan, Director of the Algoma Steel Corporation Limited, Sault Ste. Marie, Ont., and Mr. Clement Anson, General Manager, Sydney Steel Plant Division, Dominion Steel and Coal Corporation, Sydney, N.S., presented briefs and amplifying testimony.

In addition the Committee heard Mr. Justice W. D. Roach, appointed as an Industrial Disputes Inquiry Commissioner in the steel dispute, Mr. Donald Gordon, Chairman of the Wartime Prices and Trade Board, Mr. C. A. L. Murchison, Alternate Chairman of the National War Labour Board, Mr. A. MacNamara, Deputy Minister of Labour, Mr. A. H. Brown, Vice-Chairman of the Wartime Labour Relations Board, Mr. M. M. Maclean, Director of Industrial Relations, Department of Labour, and Hon. Douglas C. Abbott, acting Minister of Finance. Subsequently Mr. L. W. Brockington, K.C., was appointed as special negotiator to meet with the heads

of the companies and the union to attempt to negotiate a settlement.

No results of the meetings had been officially reported as this issue of the *LABOUR GAZETTE* went to press.

A summary of the proceedings of the Committee will be contained in a future issue of the *LABOUR GAZETTE*.

Termination of alternative service for conscientious objectors

Assignment of conscientious objectors to the performance of alternative service ended on August 15 under the terms of an amendment to the National Selective Service Civilian Regulations.

The amending order (P.C. 3030, July 18, 1946) was tabled in the House of Commons on July 23. It revokes Part IIA of the Regulations, the portion which dealt with the conditions under which conscientious objectors were assigned by the Department of Labour to perform work in lieu of military service.

New proposals to provinces made by Dominion

Following the failure of the Dominion-Provincial Conference to achieve agreement on proposals relating to employment policy, social security, and the distribution of powers of taxation (L.G., May, 1946, p. 579), the Minister of Finance, Right Hon. J. L. Ilsley, on June 27 put forward a new plan whereby provinces which desire to come to agreement with the Dominion in regard to financial matters may do so individually.

The plan was announced by the Minister in his annual financial statement, during the course of which he said that the budget had been prepared on the assumption that no new general tax agreement with the provinces could be made in the near future.

The plan follows the general line of the Dominion's previous proposal that in return for specified unconditional payments to the provinces, the provinces should vacate certain fields of taxation. Agreeing provinces would levy no income tax, levy no more than five per cent tax on net corporate income within the province (this tax to be eliminated at such time as all provinces may enter the agreement), and either withdraw from the field of succession duties or accept a proportionate reduction in annual payments from the Dominion. A term of five years is proposed for an agreement.

Calling attention to the fact that the new proposal to the provinces was limited to matters of finance and taxation, the Minister said that this was the result of failure to

reach overall agreement with the provinces. "Several of the major objectives of the comprehensive Dominion proposals which were announced last August must therefore be held in abeyance for the time being," he said, but added that the Government was ready to proceed with them "as and when arrangements can be worked out which will enable us to carry them out satisfactorily."

Employment of persons over 40

In reply to a question from Mr. Stanley Knowles, member for Winnipeg North Centre, the Hon. Humphrey Mitchell, Minister of Labour, stated in the House of Commons recently that a request had been received from the Senior Citizens' Association of Canada calling attention to alleged discrimination in employment against persons over the age of 40 years, and requesting that a Royal Commission be appointed to inquire into the matter.

"The petition has been given consideration," the Minister said, "but it was considered that the recommendation for the appointment of a Royal Commission at the present time would not have a beneficial effect.

"In the National Employment Service a special section has been set up to deal with the cases of men and women who find it difficult to obtain placement, and it is anticipated that more beneficial results will accrue from the activities of this special section than in any other way. It is felt that persistent day-to-day activities through the special section herein referred to would be effective."

Employment and industrial statistics

In the accompanying table may be found the latest statistics available reflecting industrial activity in Canada, for certain months in the current year, as compared with the corresponding period in 1945.

The index of industrial employment, published by the Dominion Bureau of Statistics, rose from 169.3 in May to 169.9 in June. The index of the cost of living was 1.5 points higher at July 2 at 125.1. The index of the physical volume of business declined from 184.3 at May 1 to 178.9 at the beginning of June.

Employment and Earnings—There was a moderate increase in employment at June 1 as compared with May 1, in spite of industrial disputes affecting large numbers of workers at that date. Normally the index has advanced at June 1 in the experience of the last 25 years. The only exception was in June, 1945, when a slight decline was recorded. The

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

NOTE.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

7 Figures for four weeks ended July 27, 1946, and corresponding previous periods.

advance in June of this year was less than that recorded in any other June. In the latest survey of employment and payrolls, the Dominion Bureau of Statistics tabulated reports from 15,876 establishments with a combined working force of 1,735,435 at June 1, exceeding by 5,963 the staffs reported by the same firms at May 1. Based on the 1926 average as 100, the index of industrial employment was 169.9 as compared with 169.3 at May 1, and 175.3 at June 1, 1945. With the exception of the beginning of June in each of the years 1942 to 1945, the index at June 1, 1946, is higher than any other June 1 of the record, exceeding by over 50 per cent that of 113.1 at June 1, 1939.

The widespread strike in the lumber industry in British Columbia, together with local strikes in textile and non-ferrous metal plants in Quebec and Ontario, resulted in a considerable recession in employment in manufacturing in Canada as a whole at the beginning of June. The decrease of 8,782 employees reflected the losses in lumber and textile manufacturing, non-ferrous metals, iron and steel and miscellaneous manufacturing. On the other hand, decided improvement was shown in animal and vegetable food, pulp and paper, paper products, beverage, clay, glass and stone, electrical apparatus and non-metallic mineral. In many cases the improvement was seasonal in character.

Among the non-manufacturing industries, logging and transportation showed curtailment. The first was due mainly to the strike in British Columbia. A loss in coal mining was recorded but other mining showed greater activity. Improvements of a seasonal nature were noted in communications, building and highway work, services and trade.

The aggregate weekly salaries and wages disbursed by the firms co-operating in the survey amounted to \$54,969,486, a decline of 0.9 per cent from the payrolls reported at May 1. This loss was largely due to the industrial disputes, already referred to and to the Victoria Day holiday. Average weekly wages in recorded employment were \$31.67 at June 1 as compared with \$32.05 at May 1, and \$32.10 at June 1, 1945. In earlier years for which data are available, the June 1 averages were: 1944, \$31.80 and 1943, \$30.93.

Prices—The general index of wholesale prices (base 1926=100) rose to 109.1 in June from 108.6 in May, 1946, and 104.0 in June, 1945. The indexes for animal and vegetable products increased respectively from 112.9 to 114.2, and from 97.7 to 98.7. Slight increases were also indicated in wood products and iron products. Textiles remained unchanged at 98.2 while declines were noted in the whole-

sale indexes of non-ferrous metals, non-metallic mineral products, and chemical products which declined from 95.7 in May to 94.5 in June. The index of consumers' goods rose from 100.8 to 101.3, producers' goods from 105.0 to 106.2, and Canadian farm products from 108.2 to 109.5.

The official cost-of-living index, on the base of prices in the years 1935 to 1939 as 100, registered a further advance from 123.6 for June 1 to 125.1 at the beginning of July. In the past four months the index has recorded a gain of 5.0 points.

The July rise reflected widely distributed price increases affecting four of the six index budget groups. Higher prices for eggs, beef, lamb, potatoes and carrots, resulted in the advance in the food index from 142.1 to 144.2. Clothing moved up from 124.3 to 126.4 due mainly to advances in men's wear and in footwear. The gain in home furnishings and services from 122.4 to 125.1 reflected increases in furniture, textile furnishings, and chinaware. The miscellaneous group index rose from 112.1 to 113.7 while fuel and light remained at 107.2 and rentals at 112.6. The advance in the general index since August, 1939, was 24.1 per cent.

Index of the Physical Volume of Business—The index of the physical volume of business declined from 184.3 in May to 178.9 in June, 1946. The index of industrial production receded 10.2 points to stand at 179.4. A slight improvement was noted in mineral production while declines were indicated in manufacturing and electric power. The index of construction receded from 302.6 to 204.0. The index of distribution based upon railway traffic, internal and external trade rose from 173.4 in May to 178.0 in June. While exports and carloading both declined, advances were shown in imports and in railway freight traffic.

Survey of employment opportunities for university graduates

A national survey has been undertaken by the Department of Labour, to assemble authentic information on future employment opportunities for university-trained personnel in Canada, it was announced by the Hon. Humphrey Mitchell, Minister of Labour, on August 6.

This project was made the responsibility of the Department of Labour by a recent Cabinet decision, following consideration of the need for information to be used in counselling the many veteran students now attending, or about to attend, university as a part of their rehabilitation. In addition to meeting counselling needs, it is expected that the results of

the survey will assist in dealing with the question of future employment possibilities for veterans and younger civilian students, as well as the need for more comprehensive information for the use of educational and other authorities interested in matters of occupational guidance of persons with university training.

To assist in making this study, an Inter-departmental Advisory Committee has been set up under the chairmanship of Arthur MacNamara, Deputy Minister of Labour. On the committee are representatives from the Departments of Labour, Veterans' Affairs, Reconstruction, National Defence, National Health and Welfare, and Civil Service Commission and the National Research Council.

In view of the particular problem involved in studying employment possibilities for veteran students, it is proposed to concentrate first on needs for personnel who will complete their university training in the years, 1947 to 1951, inclusive.

The project will involve the study of information gathered from employers of university-trained personnel, including the Federal and Provincial Governments, and from various professional associations in connection with groups who are largely self-employed. The facts assembled will include the present needs for professional and technical personnel, and the expected requirements for replacement of retiring personnel, and for purposes of expansion and new projects.

The Minister, in making his announcement, emphasized the fact that all information furnished by employers will be regarded as strictly confidential, and care will be taken that no figures of individual firms or undertakings will be disclosed.

Termination of Regional Reconstruction Councils

In reply to a question from Mr. H. C. Green (Vancouver South) the Minister of Reconstruction and Supply, Right Hon. C. D. Howe, stated in the House of

Commons recently that it was the intention of the Government to do away with the Regional Reconstruction Councils.

Established early in 1945 in the provinces of Canada, the Councils had the function of informing the Department of Reconstruction in regard to conditions within the region and of assisting those engaged in reconstruction work in the area (L.G., May, 1945, p. 620). Their membership included representatives of organized labour.

The Minister said that the Councils had served "a very useful purpose indeed", and had "given the Government excellent advice

on matters having to do with that transition. Today," he continued, "the transition has largely been effected. Canada's private construction program is heavier than was expected with the result that the work of the Councils has declined to a point that does not justify continuing them indefinitely; therefore arrangements have been made to terminate their work at an early date."

A function of the Councils that will be continued, the Minister stated, is the service being furnished in each province by the National Research Council. Attached to each of the Councils has been a representative of the Research Council, who has been on hand to discuss the problems of industry with anyone who wishes information, and to make available the services offered by the Research Council.

Preparatory international meeting on trade and employment

A Preparatory Committee of the Economic and Social Council of the United Nations is to meet in London on October 15, 1946, with the following suggested basis of discussion:

(a) International agreement relating to the achievement and maintenance of high and stable levels of employment and economic activity; (b) International agreement relating to regulations, restrictions and discriminations affecting international trade; (c) International agreement relating to restrictive business practices; (d) International agreement relating to intergovernmental commodity arrangements; (e) Establishment of an international trade organization, as a specialized agency of the united nations, having responsibilities in the fields of (b), (c) and (d) above.

The following nations are members of the preparatory committee: Australia, Belgium-Luxembourg, Brazil, Canada, Chile, China, Cuba, Czechoslovakia, France, India, Lebanon, the Netherlands, New Zealand, Norway, Union of South of Africa, the U.S.S.R., the United States and the United Kingdom.

The proposed International Conference on Trade and Employment is expected to take place next year.

Increase in labour- management production committees

The Industrial Production Co-operation Board had record of 477 labour-management production committees in Canada at June 30, 1946. Six months previously the total had been 387.

Employment opportunities in construction industry

The Department of Labour recently issued a twelve-page pamphlet entitled "Blueprint for a Skilled Job in the Construction Industry". This presents in summarized form the opportunities for steady employment at good wages for veteran and civilian alike in an occupation where additional manpower is greatly in demand. Veterans are urged to consider seriously the opportunity thus offered; it is explained how initial training and training-on-the-job may be arranged through Canadian Vocational Training. It is pointed out that time required to serve full apprenticeship at a building trade has been shortened for ex-servicemen in all provinces where apprenticeship arrangements are in effect—a policy having the full approval of the trade unions. Credit for previous experience is given where applicable. Eight typical building trades are described briefly: bricklayer, carpenter, electrician, lather, plasterer, painter, plumber and roofer; and the value of possessing a skilled trade emphasized.

"Blueprint" has been and is being supplied to Local Offices of the National Employment Service, the discharge and counselling centres of the three armed services, the Department of Veterans Affairs, Canadian Vocational Training, veterans organizations, and all building and construction firms across Canada. In all, some 40,000 English and 10,000 French copies will be distributed; 15,000 to the Armed Services, 8,000 to CVT, 10,000 to DVA and an additional 10,000 to the Canadian Information Service, along with lesser quantities to the other bodies. Trade unions will also receive copies.

"Blueprint" is primarily designed to attract veterans to the all-important construction industry as a permanent means of livelihood, and all governmental and other bodies associated with veterans rehabilitation will be able to advise and assist in the placing of veterans in the numerous trades thus offered, which are indicated in the booklet.

Union-management co-operation at paper mill

An article in the June edition of *Teamwork in Industry*, the monthly publication of the Industrial Production Co-operation Board, describes the work of the labour-management production committee recently formed at Alliance Paper Mills, Merri-ton, Ont., where Local 77 of the Pulp and Sulphite Workers (AFL) is the bargaining agency.

Having decided on co-operation last fall, the article states, union and management sought the assistance of the fieldman of the Industrial Production Co-operation Board and set about

reviving their Mutual Interest Board, which had been allowed to lapse, and putting it on a more businesslike basis. Five divisional committees were organized according to the geographical divisions of the plant. These are co-ordinated by a central committee comprised of representatives of the divisional committees and top management.

While the plan is still in its initial stages both management and labour are reported to be enthusiastic at the results. "Already the machinery for co-operation is running smoothly and labour and management representatives are working together and conducting meetings like veterans. Genuine desire to make co-operation work has made up for any lack of experience.

"A recent meeting of the central committee, typical of such gatherings, discussed first aid, spent considerable time considering safety measures, reviewed suggestions received since the last meeting and set up a sub-committee on recreation. Of the six suggestions reviewed, two received a reward, two were eliminated because they dealt with union matters, one was rejected because the idea had been tried and found not to work and one was referred for further study. A generous reward was given for a suggestion of a simple construction designed to prevent waste from escaping from the bins and creating a fire hazard. The other award was a small token payment for a suggestion which was a good idea but proved impracticable. The token award was paid in order to encourage the suggestor to contribute more ideas.

"It is notable that at this plant top management has given the central committee authority to decide on suggestions and immediately put into effect those judged worthy. This prompt action on suggestions is most encouraging to the employees."

Earnings and family size

In Canada, as in all other countries of the Western world, the birth rate is declining, and the rate of natural increase is slowing down, the Dominion Bureau of Statistics points out in a study of economic differences in family size, which is based on information obtained from the 1941 Census of Canada. Ultimately, the report continues, unless trends are reversed or large-scale immigration occurs, a stationary or even declining population is to be expected. Previous reports in this series have studied various social characteristics, associated with large and small families, in order to throw light on the causes of the declining birth rate.

The present report is primarily concerned with differences in family size associated with differences in income. Total income is not

recorded in the census, but for wage-earners the greater part is known. All earnings, whether in the form of wages, salaries, commission, or piece-work remuneration, are recorded. For others than wage-earners much less information is available. The only clue to income is a much less satisfactory index, the value or rent of the home. Earnings and, to a lesser degree, value of home owned provided an approximate index of income levels that is adequate for the purposes of the study.

Average family size of wage-earner normal Canadian families with wives aged 45-54 years was found to be significantly associated with differences in earnings, as well as with differences in ethnic origin, educational status, and urbanization, the report indicates. With very few exceptions, families were largest in the groups with lowest earnings, and decreased consistently as earnings rose. While part of the difference in family size is associated with the occupational characteristics of groups at different earnings levels, low and high earnings within the same broad occupational group were still found to be associated with differences in family size.

When the effects of ethnic group, educational status, earnings and urbanization were equalized, the largest families were found among those employed in primary occupations and the smallest in trade, finance, service and clerical work. Among those with low-earnings and low educational status, the largest families were found among workers in lumbering and mining. The small class of agricultural wage-earners had rather small families. Families of unskilled labourers were also large.

Owing to the high proportion of independent farmers with large families among non wage-earners, family size as a whole appeared to be at least as large as among wage-earners at roughly comparable economic levels. Family size among non-wage-earners varied on the whole in the same way as among wage-earners. Owing in part to inadequacy of value of home as an index to economic status, the differences in size of family associated with this characteristic were not so clear cut as the differences in family size different earnings levels.

The report is entitled *Economic Differences in Family Size, Canada, 1941*.

**New Brunswick
Minimum
Wage Act
in force**

The Minimum Wage Act, 1945 (L.G. 1945, p. 1695) was proclaimed in force from July 1 on June 27, 1946. On the same date was proclaimed a 1945 Act repealing the Labour and Industrial Relations Act, 1938, under which a number of minimum

wage orders had been issued (L.G. 1942, p. 586).

The new Minimum Wage Act applies to both men and women in any trade but excludes workers in agriculture, domestic service, those employed by the Crown or by any provincial board or commission, and persons employed in a confidential capacity.

Orders in effect under the repealed Fair Wage Act and under the Labour and Industrial Relations Act are to continue in force under the new Act. They govern the dairy products industry in Saint John and district, certain employees in garages and automobile repair shops in Saint John and Fredericton and districts, and in five counties the canning or processing of fish, vegetables or fruits, the manufacture or repair of canning and fishing equipment and the loading of pulpwood and lumber at dock and within reach of ship's tackle.

**Alberta
Legislative
Committee
holds hearings
on labour
legislation**

The Alberta Legislature on March 1 directed its Agriculture Committee to consider requests of labour organizations for amendments to various labour laws and during March the Committee heard representations from labour, employer and farm organizations. Evidence was also given by the Secretary of the Alberta Board of Industrial Relations which administers the Hours of Work Act, the Male and Female Minimum Wage Acts, the Industrial Standards Act, the Labour Welfare Act and the Industrial Conciliation and Arbitration Act.

The Committee subsequently recommended to the Legislative Assembly that no action on labour be taken during the Session, which concluded on March 27, but that the Government consider implementing the recommendations made before the Committee when it deems this advisable (L.G., 1946, p. 826).

Representatives of labour organizations in Alberta requested, among other things, that the minimum rate be raised from \$20 and \$15 weekly for men and women respectively to 60 cents an hour, that weekly hours of work be limited by law to 40 instead of 48 as at present, with no reduction in "take-home pay" that an annual holiday of two weeks' with pay be required, and that the industrial Conciliation and Arbitration Act be amended to provide for "union security", heavier penalties for infractions, and to define "bargain collectively" as "negotiating in good faith to the conclusion *and signing of a written collective labour agreement*" (the words in italics are the proposed additions to the definition).

Representatives of the Alberta Farmers' Union, in their brief, supported the requests of the labour delegations for a 60-cent minimum rate and for a 40-hour week with the same "take-home pay". They stated also that they would be in favour of the same minimum wage rate for skilled farm help if farmers received "parity prices".

Spokesmen for the Alberta branch of the Canadian Manufacturers' Association opposed changes in the labour laws at the present time but asked that the provision for a voluntary check-off in the Industrial Conciliation and Arbitration Act be removed.

**Central
Institute
of Management
proposed in U.K.**

The recommendations of the Baillieu Committee, appointed by Sir Stafford Cripps, the President of the Board of Trade, last November to formulate detailed proposals for the setting up of a Central Institute for all questions connected with management, are summarized in the April-May, 1946, issue of *Labour Management*.

The proposed Institute, according to the Committee, should provide a centre for study and research into Management problems, bringing together by affiliation the existing organizations. It should also serve as a central body for its member firms to furnish them with information and encourage education and training. Further, it should disseminate information concerning management practice, advise educational agencies in developing courses of instruction, maintain a library and serve as a link between persons seeking help on management problems and those who can furnish it.

Members of the Institute should be (1) management associations affiliated to it, (2) industrial and commercial firms as corporate subscribers, and (3) individual members. Trade unions and trade associations, not primarily concerned with management, should be given some interest in the Institute.

The Institute should be a professional organization with two grades of individual membership, according to the Committee. Full membership would be open only to a person whose "qualifications in management are higher or wider than those required for professional membership of any of the affiliated bodies." Graduation to full membership through membership in an affiliated body would be a normal process. Associate membership, which would have no professional status, would be open to anyone interested in the work and aims of the proposed Institute.

The Institute would be governed by a 24-member Council, including three representatives of affiliated bodies, three of companies,

12 full members, 3 associate members and 3 persons appointed by the Council to represent trade unions and trade associations.

The Committee recommended that the Institute from its inception should operate on a country-wide basis, but that a strong headquarters should be set up in London before regional centres are established.

**Development
of industrial
research in
Great Britain**

The British Department of Scientific and Industrial Research, reputed to be "a body unique among Government organizations throughout the world" is

to spend 70 per cent more on research in 1946-47 than in 1945, according to the United Kingdom Information Office.

The function of the D.S.I.R. is to conduct research for the benefit of the community, as well as to aid research in industry and in the universities. It covers a field ranging from research on building and radio, to food, water pollution and fuel. The largest establishment which it controls is the National Physical Laboratory with a staff of well over one thousand. In one department, that of "ship-building research, work on fuel consumption of ships has alone produced a saving of over one million pounds annually." Even that is being stepped up. "In the past year tests on model ships have produced a fuel-saving of another 25 per cent in the performance of the finished ship." Large savings have also been made possible by the study of heating appliances and in the prevention of spontaneous combustion in coal dumps.

Much of the annual grant for research in industry is absorbed by Industrial Co-operative Research Associations, which were founded by D.S.I.R., but in the main, carry on their work independently. The Associations' main functions are to develop new methods of manufacture and to cheapen and speed up existing processes. Notable results are reported to have been made in the cotton and wollen industries, and in fish processing.

**Inter-union
agreements
in British
engineering
trades**

Members of the Amalgamated Engineering Union are voting on a proposal, recommended by their Executive Council, for affiliation to the Confederation of Shipbuilding and

Engineering Unions which includes workers in the shipbuilding, ship-repairing, engineering and aircraft industries, railway workshops, and in His Majesty's Establishments. The June, 1946, *Monthly Journal* of the A. E. U. contains the text of the proposed changes in the constitution of the Confederation.

Also reported is a new membership agreement between the A.E.U. and the National Union of Foundry Workers, which revokes one of January, 1945, and which will be reviewed in December, 1946. In future, the unions will recognize each other's cards in non-ferrous moulding shops, the A.E.U. will not enroll new members in ferrous moulding shops after July 1, 1946, and will recommend to members already enrolled there a transfer to the Foundry Workers which guarantees that they will not suffer any loss of benefits.

Protection of workers exposed to radio-active substances

The Minister of Labour and National Service in Great Britain has issued, under the power conferred by the Factories Act to make regulations for dangerous trades, draft regulations applying to factories where luminising is done. These are designed to replace the Factories (Luminising) (Health and Safety Provisions) Orders, 1942 and 1943, under the Defence (General) Regulations (L.G. 1943, p. 1481).

The proposed regulations add some new and important provisions to those contained in the earlier Orders. They propose to raise from 16 to 18 the age below which employment in luminising processes is prohibited. Persons who handle luminous compounds are to be given tests of exposure to radiation through the wearing of a photographic film, thus indicating whether the exposure to radiation is dangerously high.

For the first time, cleaners and maintenance workers are to be brought within the scope of the requirements, the latter only with respect to protective clothing, which is required to be worn in repair or maintenance work in rooms where luminising is carried on. Provisions with regard to cleaners who normally work more than three hours a week relate to medical examination, protective clothing and other safety precautions. To them will apply also the restrictions as to age and hours of work similar to those already in force for other persons employed in luminising operations.

There are new requirements about the use and disposal of cleaning materials, the use of drying stoves, the disposal of waste material and disused containers, the provision of paper handkerchiefs to certain persons, and regarding precautions to be taken where the carrying on of the process in any room is abandoned. Provisions regarding exhaust ventilation are also to be amplified.

Compensation for silicosis in United Kingdom

To ensure payment of compensation to workmen suffering from silicosis incurred in industry who served in the Armed Forces or who were engaged during the war in any employment other than that responsible for the disease, the British Minister of National Insurance has amended the Orders of 1931 providing for compensation for silicosis incurred in the sandstone industry, in metal grinding and in various other industries as well as the Order concerning asbestosis in the asbestos industry. The amending Orders stipulate that the proviso in the principal Orders which excludes payment of compensation in cases where the workman has not been employed in certain processes at any time within a specified period (five years for silicosis and three years for asbestosis) shall be interpreted so as to disregard any period between September 3, 1939, and March 31, 1946.

Wage control re-established in U.S.A.

Federal wage and salary controls were re-established in the United States on July 26. Lapse of the Economic Stabilization Act on June 30 led to a joint Resolution of Congress amending the Price Control and Economic Stabilizations Acts and extending them to June 30, 1947.

The controls which were in effect at the end of June, 1946, and which have now been resumed are of two kinds, indirect and direct.

Direct control, the Wage Stabilization Board stated on July 26, applies to (1) all wage and salary increases in the building and construction industry, (2) all wage decreases and all decreases in salaries below \$5,000, and (3) the fixing of rates for new plants or new jobs. Failure to obtain approval before making any of these increases or decreases is a violation of the Economic Stabilization Act. Wages and salaries, subject to direct control, which were changed between June 30 and July 26, must be restored to the June 30 basis before August 10.

Indirect control applies to all wage and salary increases which are not subject to direct control. Such wage or salary adjustments may not be used, unless approved by the Board, as a basis for price relief or for increasing costs to the Government. Increases, however, may be granted without violating the Act and, by regulation of July 26, application for approval of such increases in wages or salaries as a basis for price relief may be made either before or after the increase is put into effect. The increases given since June 30 are not to be recognized as a reason for raising prices unless they are approved by the Board.

Price control renewed in U.S. The twenty-five day hiatus in federal price and rent controls in the United States, which followed President Truman's veto of a bill to replace the lapsed OPA legislation (L.G. July 1946, p. 872), was ended on July 25, when the President signed a new Price Control bill passed by Congress.

The new bill continues the office of Price Administration in existence for another year but with reduced powers. It restores OPA regulations and price schedules as they existed on June 30; with the exception that controls on the prices of meat, milk, dairy products, grains and certain other commodities may not be restored before August 20. The bill establishes a three-man "decontrol board", empowered to remove controls from any commodity. It also contains a formula whereby the price ceilings of manufactured goods will be fixed at such a level as to reflect the average industry-wide price on each product for the year 1940 plus any increases in the cost of producing, manufacturing, or processing that have occurred since the base period. It restores all rent regulations in effect when price control lapsed, but exempts landlords from refunding excessive amounts collected during the interim period. Leases signed during the interim, however, which conflict with the reimposed controls are voided by the new bill.

In a message to Congress the President said that he signed the bill "reluctantly" as it fell "far short" of his hope for a measure that would assure prices remaining generally stable, but stated that "it is a better bill than the one I was forced to veto," and indicated his hope that under its provisions the economy could be kept on an even keel "until a flood of goods makes further control unnecessary."

"The behaviour of prices and rents in the last four weeks," the President said, "has given the country a frightening foretaste of what would happen to the cost of living without price and rent control. . . The Bureau of Labor Statistics index of twenty-eight basic commodities in the primary markets has shown an increase of 24.8 per cent in the twenty-six days since June 28, 1946, as against an increase of only 13.1 per cent in the three years and forty-two days between the signing of the hold-the-line order on May 17, 1943, and June 28, 1946. . .

"These increases have occurred in spite of the restraining influences at work to keep prices down. I had requested that the price line be held while the Congress considered the enactment of a workable law. Business men hesitated to build up inventories at high

prices and thus risk serious loss if prices were rolled back to the June 30 levels. This risk was heightened by the prompt passage in the House of Representatives of a resolution which would restore the June 30 prices and rents. In addition, consumer resistance to increased prices developed immediately.

"In view of the alarming rise in prices which took place under these conditions, it is not difficult to predict what would happen if a free market were operating without restraint."

Trend of earnings in United States

Although average earnings in manufacturing, calculated on an hourly basis, have been rising at a rate of two cents a month, average weekly earnings have been showing a steady decline, according to a recent report of the United States Department of Labor.

Hourly earnings for production workers in manufacturing reached a new high of \$1.07 in May, while preliminary estimates for June indicated a further rise to \$1.08.

On the other hand weekly earnings in manufacturing declined from \$42.87 in April to \$42.46 in May, reflecting a shorter work-week in virtually all industries. To some extent, the report states, the decrease in average hours per week results from the adoption of a shorter scheduled work-week but, in the main, it was necessitated by the shortages of coal and other materials during the coal strike and the freight embargo.

Each of the 20 major manufacturing groups reported higher average hourly earnings in May 1946 than a year ago. However, in only half of the groups were average weekly earnings above the level of May 1945. In the groups which were directly concerned with the war effort, the so-called munitions groups, weekly earnings declined. Over the year, decreases of \$5 or more per week were reported by the iron and steel, machinery, transportation equipment and automobile groups. Despite a weekly drop of over \$7 in transportation equipment, earnings in that group are still higher than in any other major group.

Average weekly earnings were 7.6 per cent lower in May, 1946 than in May, 1945. Average hours, which were 39.7 in May, 1946, were 10.1 per cent lower than a year ago; while hourly earnings had increased by 2.8 per cent.

Farm workers and U.S. Labour Relations Act

Organization and collective bargaining by persons employed by farmers or on farms in work incidental to or in conjunction with farming operations, including the preparation of commodities for market, the delivery to storage

or to market or to carriers for transport to market, cannot, during the fiscal year 1947, be aided by the U.S. National Labour Relations Board.

"Agricultural labourers" were excluded from the operation of the U.S. National Labour Relations Act, 1935, but the term was not defined in the statute. The Board interpreted it according to its "common usage" to mean persons "employed on a farm in the cultivation of the soil, including the harvesting of crops and the rearing and management of live stock". The essential character of the work performed by the individual employee was the test, the Board considered, "not whether various activities are considered part of a single management or whether the employee is engaged in handling products grown on a farm".

A "rider" attached to the Act appropriating funds for the Board, which was approved on July 26, stipulates that no part of the Board's funds may be available "to organize or assist in organizing agricultural labourers or used in connection with" investigations, hearings or orders concerning bargaining units composed of agricultural labourers as defined in the Fair Labour Standards Act, 1938.

The latter statute defines "agriculture" to include

farming in all its branches and among other things includes the cultivation and tillage of the soil, dairying, the production, cultivation, growing and harvesting of any agricultural or horticultural commodities . . . the raising of live stock, bees, fur-bearing animals, or poultry, and any practices (including any forestry or lumbering operations), performed by a farmer or on a farm as an incident to or in conjunction with such farming operations, including preparation for market, delivery to storage or to market or to carriers for transportation to market.

**Amendment in
United States
Anti-
Racketeering
Act**

On July 3, 1946, the President of the United States signed an amendment removing the special immunity of labour unions from the so-called Anti-Racketeering Act of 1934,

an "Act to protect trade and commerce against interference by violence, threats, coercion or intimidation". The Act of 1934 declared it a felony for any person (a) to obtain or try to obtain, by the use of, or the attempt to use or threaten to use, force, violence, or coercion, the payment of money or other valuable considerations or the purchase or rental of property or protective services, but not including "the payment of wages by a bona fide employer to a bona fide employee"; (b) to obtain the property of another, with his consent, induced by wrongful use of force or fear; or (c) to commit or threaten

to commit an act of physical violence or injury to a person or property in furtherance of a purpose to violate (a) or (b) above; or (d) to conspire to do any of these things.

On March 2, 1942, the United States Supreme Court, the Chief Justice dissenting, held, in a case involving Local 807 of the Teamsters' Union in New York, that the Act did not apply to the practices of the Teamsters' Union, that the decision of the Circuit Court of Appeals must be affirmed and that the conviction of the Local and certain individuals for violating the Act could not stand.

Members of the Local, which included nearly all the motor-truck drivers and helpers in New York City, "conspired to use and did use violence and threats" in an attempt to compel the hiring of the Local's members as drivers of out-of-town trucks from the city limits into New York. Previously, the out-of-State drivers made deliveries to warehouses in New York and picked up merchandise for delivery to consignees in other States. In some of the cases complained of, the out-of-State driver was compelled to turn over his truck to a member of the New York Local; in other cases, the owner or driver was forced to pay \$9.42 or \$8.41 for each truck according to size, being the amounts of the regular union rates for a day's work of driving and unloading. In the latter cases, the New York drivers might or might not refuse to do the work or might not be permitted to do it.

The majority opinion was that the "ordinary activities of labour unions" were intended to be protected by the Act and that other unions, for example the Musicians', accepted payments even where their services were refused. The Court was careful to state, however, that it was

not its province to approve or disapprove such tactics. . . . such activities are not beyond the reach of federal legislative control The power of State and local authorities to punish acts of violence is beyond question The use of violence disclosed by this record is plainly subject to the ordinary criminal law.

Two months after this decision the "Hobbs Bill" to amend the Act of 1934 was introduced in Congress and passed by the House of Representatives. It was approved by the Senate only in 1946.

The amending Act declares guilty of a felony any person who, by robbery or extortion, obstructs, delays or affects interstate commerce in any way or degree, or who conspires or attempts or participates in an attempt to do so, or any person who uses or threatens to use physical violence to a person or property with the object of interfering with commerce as described.

The Act stipulates that it shall not be construed to repeal, modify or affect the Clayton Anti-trust Act, 1914, the Norris-LaGuardia Anti-injunction Act, 1932, the Railway Labour Act, 1936, or the National Labour Relations Act, 1935.

Chain-store managers granted bargaining rights in U.S.A.

The United States National Labor Relations Board has interpreted the term "employees" under the Wagner Act as being applicable to store managers of retail chain companies.

In a recent case dealing with an application for collective bargaining rights on behalf of store managers of the Great Atlantic & Pacific Tea Co., the board ruled that only members of the "nationwide supervisory hierarchy" of the chain were to be excluded from the ambit of the Wagner Act. The Board, in its ruling, distinguished managers possessing supervisory authority over segments of the company's operations from supervisory personnel dealing with overall operations, and held that this restricted authority did not obviate coverage under the Wagner Act.

Child labour branch in U.S. Department of Labour

The United States Secretary of Labour announced on July 16 that the Industrial Division of the Children's Bureau is being transferred to the Labour Department's Division of Labour Standards, and the rest of the Bureau to the Federal Security Agency.

To be known as the Child Labour and Youth Employment Branch of the Division of Labour Standards, the new branch "will be expected to promote better working conditions for minors, develop and promote standards for their employment protection, and measures for advancing their opportunities for suitable work. It will advise with other bureaus in the Department and with State and other public and private agencies and with individuals on these and other matters affecting young workers. In these activities, the branch will co-operate with the Children's Bureau work in the broad field of child health and welfare."

Minimum age for work on power hoists and lifts in U.S.A.

A Hazardous - Occupations Order (No. 7) effective on September 1 has been issued by the Chief of the Children's Bureau of the U.S. Department of Labour. Made under the Fair Labour Standards Act, the Order prohibits the employment of persons under 18 in occupations involved in the operation of power-driven hoisting appara-

tus. The Order was made after hearings were held by the Chief of the Children's Bureau (L.G., 1946, p. 835), and its effect will be to raise from 16 to 18 years the minimum age for employment in the work of operating an elevator, operating or assisting in the operation of a crane, derrick, hoist or high-lift truck, or in work which involves riding on a freight elevator. The operation of an unattended automatic passenger elevator or an electric or air-operated hoist not exceeding one-ton capacity, or work where workers customarily are transported in a freight elevator to their workplace at the beginning and end of scheduled work-periods are not included in the Order.

Safety code for U.S. soft-coal mines

A uniform safety code in all soft-coal mines in the United States operated by the Federal Government was proclaimed on July 29

by the Secretary of the Interior, J. A. Krug. The code was ordered established pursuant to the provisions contained in the agreement signed by the Government and the United Mine Workers which terminated the recent soft-coal strike (L.G., June, 1946, p. 720). The code will apply to more than 4,500 mines and remain in effect during the period of Government control. Secretary Krug expressed enthusiasm for the code and described it as "a milestone on the road that leads to making American mines the safest in the world."

The Union expressed approval of the standards and a spokesman declared them to be "a vast improvement over existing working conditions." He added that it would promote better safeguards and reduce mine fatalities.

The new minimum safety code establishes more than 300 separate standards covering "practically every phase of operating conditions and practices in coal mines" according to the official announcement from the Department of the Interior. These standards apply specifically to such aspects and conditions of mining as ventilation and gases, explosives, timbering, rock dust, transportation and haulage, electricity, fires and disasters and a list of miscellaneous items.

Vacation with pay benefits contained in health scheme

A group insurance scheme providing for paid vacations in addition to payments of health benefits has been established through collective bargaining between the

Joint Board of the Dressmakers Union of Greater New York, a local of the International Ladies Garment Workers Union (AFL), and five associations representing 2,200 employers in the dress industry in New York City.

The fund is financed by a contribution of 3½ per cent of the payroll by the employers and is administered jointly. Vacation benefits, paid from the fund, average approximately \$30 per week. Members of the plan employed for one year are granted one week's vacation. For members with at least six months a half of the week's pay is given. It is estimated that paid vacations consume about two-thirds of the contributions to the fund.

The health provisions of the fund provide for disability and hospital benefits, eye examinations and free medical service up to a maximum of \$15 a year.

Health insurance plan initiated in New York City

A health insurance scheme encompassing all employees living and working in New York City has been recently initiated, news items report.

A non-profit corporation, The National Health Insurance Plan of Greater New York will provide for comprehensive medical and surgical services for qualified persons earning up to \$5,000 a year. It covers all types of medical treatment but excludes hospitalization costs. Enrolment groups are limited to those composed of 75 per cent of the personnel of the firm or city department involved. The estimated costs will range from \$28 for a single individual to \$87 for employees with families of three or more persons.

UAW sponsors "Charm School" in Detroit

Sponsored jointly by the United Automobile Workers of America and Wayne University, a course for female union members in health and physical education known as the "Charm School" took place in Detroit this year and is expected to be resumed in the fall in individual locals.

Classes met in the UAW Health Institute (L.G., 1944, p. 554), and the eight-week course included instruction in cosmetics and make-up, posture and corrective exercises, health and nutrition, and hair-styling. An enrolment of 65 was reached, according to the *CIO News*.

Meeting of WFTU executive committee in Moscow

The executive committee of the World Federation of Trade Unions, meeting for the first time in Moscow, adopted resolutions for the staging of world wide labour demonstrations demanding the inclusion of the WFTU in the United Nations and "the restoration of democracy in Spain".

Sir Walter Citrine, President of the Federation, in announcing the above resolutions revealed that they empowered each national organization to determine its own action against Spain, but recommended that mass demonstrations begin in all countries on July 18, the anniversary of General Franco's advent to power, and continue until August 18.

The WFTU also called on the United Nations to recognize the Giral Republican Government, functioning in Mexico, as "the legal constitutional government" of Spain.

Membership in the recently-formed labour body was granted to labour federations in Burma, Korea, Greece, the Belgian Congo, Lebanon and Indo-China and, provisionally, Iran. Sir Walter stated that the Korean federation was accepted "in principle" but that an executive council committee would visit Korea to determine whether it was a bona fide and democratically organized trade union. Conjointly, the commission will study trade unions in Japan, Malaya and Burma to determine their acceptability for WFTU membership.

M. Louis Saillant, general secretary of the organization declared that the committee found the United Nations refusal to grant the WFTU membership in the Economic and Social Council "highly unsatisfactory". The committee called upon member unions to exert pressure upon their respective governments to send resolutions advocating membership in the council to the United Nations.

The next meeting is scheduled to be held in the United States, coinciding with the meeting of the General Assembly, it was announced.

Annual holiday in factories in India

From January 1, 1946 a yearly paid holiday of ten consecutive days, or in the case of a child under 16 to 14 days, was provided for all factory workers in India except those operating only seasonally. The holidays can be accumulated over two years. A holiday is to be granted after 12 months continuous service and service is to be deemed continuous notwithstanding interruption brought about by sickness, accident or authorized leave not exceeding 90 days in the aggregate for all three, or by a lockout or a legal strike, or by periods of involuntary unemployment not exceeding 30 days in all. A factory inspector may institute proceedings on behalf of any worker to recover any sum required to be paid under the holidays provision.

Annual Holidays in Canada and Britain

Summary of Legislation and of International Labour Convention

LEGISLATION in Canada and Britain to provide holidays with pay is briefly summarized below with particular reference to the provisions relating the length of the annual holiday to the period of employment. Also given in summary form are the stipulations of the Holidays with Pay Convention and Recommendation which were adopted by the International Labour Conference of 1936.

In Canada the provinces of Quebec, Ontario, Saskatchewan, Alberta and British Columbia have provided for a yearly holiday with pay for persons employed in most trades and industries. All these provinces except agriculture, and all but Saskatchewan exclude private domestic service. The provincial laws vary in the relation of the holiday period to the length of employment.

In Quebec an Order, gazetted and effective on July 27, 1946, under the Minimum Wage Act requires a worker to be given a week's holiday after a year's employment or a half-day for each calendar month of employment if less than a year.

The Ontario Hours of Work and Vacations with Pay Act, 1944, provides for one week's holiday for every person who has been employed at least one year. The Saskatchewan Annual Holidays Act, 1944, effective on July 1, 1946, grants two weeks' holidays after a year's employment but an employer may give a worker who has been employed less than a year a holiday of one working day for each month of employment, the holiday to be in one whole period. In Alberta, regulations of June 24, 1946, in effect on June 29, under the Labour Welfare Act, 1943, stipulate that a week's holiday shall be given after one year's employment and two weeks' holiday after two years' employment.

In British Columbia, the Annual Holidays Act from July 1, 1946, provides for one week's holiday after a year's employment, 280 days of actual work.

The British Columbia and Saskatchewan Acts and the Alberta regulations expressly stipulate that the annual holiday with pay is exclusive of any public holidays to which the worker is entitled; the Quebec Order stipulates that the holiday must consist of at least six working days, seven in all, and be continuous. In Saskatchewan the annual holiday may be taken in one period of two weeks or in two periods of one week each; in Alberta, except for coal miners, and in

British Columbia, the week's holiday must be given in one unbroken period. Alberta Regulations of April, 1945 (L.G., 1945, p. 915) under the Labour Welfare Act provided for annual holidays for coal miners. As revised in March, 1946 (L.G., 1946, p. 683), these regulations entitle a miner to one day's holiday for every 23 days worked in a month (22 in February) but not more than two weeks' holiday in a year. An eight hour shift is to be counted as a day's work and overtime is to be an additional day or part of a day in qualifying for holidays. Where a short shift is worked on account of mine difficulties, a full work day is to be counted but where the workers leave work before the end of the shift of their own volition, credit is to be given only for the time worked. Time lost through illness, certified by a physician, of not more than three days in a month and time lost on account of an industrial accident up to six days in a month are to be considered working time.

British Legislation

The Holidays with Pay Act, 1938, authorized the minimum-wage-fixing authorities such as the Trade Boards (now the Wages Councils), the Agricultural Wages Board and the Road Haulage Central Wages Board, to grant holidays of such duration as the authority might direct provided the holiday did not exceed, in the aggregate, seven days in any twelve-month period. A Wages Council may be established in any industry where there is no adequate machinery for the effective regulation of wages. Council members are representative of the public and the employers and workers in the industry. The Wages Councils Act, 1945, repeals the Trade Boards Acts, 1909 and 1918, under which somewhat similar machinery was provided for low-wage industries.

By the Wages Council Orders holidays are usually required to be given during the "holiday season" between April or May 1 and September 30. In addition to the six or seven public holidays to which a worker is entitled, he is, by these Orders, entitled to one day's holiday after being employed at least eight weeks in the twelve months preceding the "holiday season", two days' holidays after 16 weeks employment and so on, one additional holiday being allowed for eight additional

weeks' employment until, after at least 48 weeks' work, the full six days holiday is due.

Holiday orders made by Wages Councils include provision to safeguard the holiday rights of persons who work short time or who lose time on account of illness or accident, who are laid off temporarily because of shortage of work, or, in some cases, who lose time on account of a strike. Most of the Orders stipulate that:—

for the purpose of calculating any period of employment entitling a worker to an annual holiday or to any accrued holiday remuneration . . . the worker shall be treated—

(a) as if he were employed for a week in respect of any week in which—

(1) he has worked for the employer for not less than 20 hours [ranges from 12 hours in baking to 24 hours in several trades] and has performed some work to which statutory minimum remuneration applies; or

(2) he has been absent throughout the week by reason of proved illness or accident, but not exceeding four weeks in the aggregate [12 weeks in baking] in the period of 12 months immediately preceding the commencement of the holiday season; or

(3) he has been suspended throughout the week owing to shortage of work, but not exceeding six weeks in the aggregate in the period of 12 months last mentioned; or

(4) he has been absent throughout the week owing to stoppage of work due to a trade dispute but not exceeding 12 weeks in the aggregate in the period of 12 months last mentioned [from Baking Industry Order; in Boot and Shoe Repairing Order strike unauthorized by the workers' trade union is excepted from this provision].

International Labour Convention and Recommendation

An International Labour Convention of 1936 provides for a yearly holiday of at least six working days after one year of continuous employment. The annual holiday for young persons, including apprentices, under 16 years of age, must be at least 12 working days. Each country is to provide for a longer holiday after longer service and in such case, the holiday may be taken at different times according to the regulations made.

A holiday period may not include any public or customary holidays or any period of absence from work on account of illness. Any agreement to relinquish the right to a holiday is to be void and engaging in paid employment during a holiday may deprive the worker of his holiday pay. Any person dismissed by an employer is entitled to pay for the proportion of the holiday due him.

A Recommendation of the International Labour Conference of 1936 sets out the following suggestions to Member States who give effect to the Convention:

(1) the continuity of service required to entitle a worker to a holiday should not be affected by interruptions caused by sickness or accident, family events, military service, the exercise of civic rights, changes in management of the undertaking, or intermittent voluntary unemployment if it does not exceed a prescribed limit and if the worker resumes employment;

(2) in seasonal work the condition of continuity of employment should be considered satisfied by the working of a prescribed number of days in a prescribed period;

(3) the holiday should be earned after one year's work, regardless of whether this period has been spent in the employment of the same or of several employers. The cost of the holiday should not fall entirely on the last employer;

(4) the holiday should be taken at one time except in special cases and then in not more than two parts;

(5) the increase in the length of the holiday with the duration of service should begin to operate as soon as possible and should be effected by regular stages so that a prescribed minimum will be attained after a prescribed number of years, for example, 12 working days after seven years' service;

(6) holiday pay to be calculated as fairly as possible for workers not paid at time-rates should be based on average earnings over a fairly long period so as to nullify, as far as possible, fluctuations in earnings.

(7) consideration should be given to longer holidays for persons under 18 years of age.

International Labour Organization

Twenty-ninth Session of International Labour Conference

THE 29th Session of the International Labour Conference, to be held at the University of Montreal beginning September 19, will be the first session of the Conference to be held on Canadian soil.

The meeting is expected to bring to Montreal delegations from 45 to 50 of the member countries of the International Labour Organization. The delegations will be tripartite, comprising two Government representatives, and one representative each of employers and labour. Each delegate may be accompanied by two advisers for each of the four technical items on the agenda, making a total of eight advisers for each delegate. An attendance of more than 400 is anticipated.

The agenda is as follows:

1. Director's Report;
2. Constitutional Questions;
3. Protection of Children and Young Workers;
4. Minimum Standards of Social Policy in Dependent Territories;
5. Report on the Application of International Labour Conventions.

A committee to co-ordinate preparations for the physical arrangements for the Conference has been set up with the following as members: Mr. Paul Goulet, special assistant to the Deputy Minister of Labour in charge of relations with the ILO, representing the Dominion Government; Mr. Jean-Pierre Despres, Director General of Services, Ministry of Labour, representing the Province of Quebec; Valmore Gratton and Royden M. Morris, representing the City of Montreal; Paul E. Joubert, Montreal Tourist and Convention Bureau; Roland Bureau, University of Montreal, and officials of the International Labour Office.

The Conference will be preceded, beginning September 11, by meetings of a number of committees of the Governing Body. The Governing Body itself will meet September 16 and 17. September 18 has been set aside for separate pre-conference meetings of the Government, management and labour delegates to the Session.

Several draft International Labour Conventions will be up for consideration at the

Conference. An International Labour Convention is a draft international treaty, and may only be adopted by a two-thirds vote of the Conference, whereupon member states are obligated, under the terms of the Constitution, to give consideration to the matter with a view to enacting legislation or taking other action to comply with the provisions of the Convention. If the country decides not to ratify the Convention, its obligation ceases. If, however, it decides to ratify, the Convention becomes binding upon it and upon such other members as take similar action. Each of the members are required to make an annual report to the International Labour Office on the measures which it has taken to give effect to the provisions of Conventions to which it is a party.

Canada, like other federal states, has been faced with difficulty in regard to International Labour Conventions whose subject matter falls within provincial rather than Dominion jurisdiction. As a result, Canada has been able to ratify comparatively few Conventions. The difficulties of federal states in regard to Conventions have been a matter of concern to the Organization, and will come up for discussion at the Montreal Conference under Item 2 of the agenda, Constitutional Questions (L.G., May, 1946, p. 591).

The new draft Conventions that will be brought before the Conference in September have to do with the protection of children and young workers, and with the establishment of minimum labour standards in non-self-governing territories.

Canada's delegation to the Montreal Conference is expected to include strong representation from the provincial governments as well as from the Dominion. Delegates representing organized labour and employers will also be in attendance.

Twenty-eighth Session

The Report of the Canadian Government Delegates to the Twenty-eighth Session of the International Labour Conference is being published as a supplement to this issue of the

LABOUR GAZETTE. The Conference was held at Seattle, and dealt exclusively with maritime questions.

Nine Conventions were adopted, one of which dealt with minimum wages and maximum hours of work, the first time that an

international treaty dealing with such a subject has been negotiated. The other eight Conventions dealt with such aspects of the living and working conditions of seamen as food on board ship, crew quarters, vacations with pay, and social security.

Amendments to Constitution of ILO

THE International Labour Office announced on July 30 that twenty countries had so far ratified the Instrument of Amendment to the Constitution of the International Labour Organization. The constitutional changes embodied in the instrument will come into effect when it has been ratified by thirty-nine countries, that is, by three-quarters of the fifty-one member states.

Canada's ratification was made by an Order in Council of July 12, 1946, which was deposited with the International Labour Office on July 22.

The Instrument of Amendment was adopted by the General Conference of the ILO in Paris on November 5, 1945 (see Supplement to LABOUR GAZETTE, December, 1945).

The amendments relate to membership of the International Labour Organization, the arrangements for the financing of the Organization, and the procedure for making future amendments to the Constitution of the Organization.

The amendments dealing with the membership of the Organization are aimed at achieving the full participation in the Organization of all states which are members of the United Nations; they replace the present text which connects membership of the International Labour Organization with membership of the League of Nations.

The provisions concerning financial and budgetary arrangements are designed to facilitate the conclusion of appropriate financial and budgetary arrangement between the

International Labour Organization and the United Nations, and to make provision for the continuance of the work of the International Labour Organization in any interval which may occur between the winding up of the League of Nations and the conclusion of appropriate arrangements with the United Nations. (Negotiations have already been completed as to the relationship of the ILO with the United Nations between delegations representing the two organizations, subject to final ratification by the September Conference of the ILO and the General Assembly of the United Nations.)

In substitution for the existing arrangements under which amendments to the constitution of the International Labour Organization require ratification by three-quarters of the members of the Organization, including all the States whose representatives compose the Council of the League of Nations, the Instrument of Amendment provides that amendments shall take effect when ratified or accepted by two-thirds of the members of the Organization, including five of the eight members which are represented on the Governing Body as States of chief industrial importance.

The September Conference will have before it a number of additional amendments to the constitution designed to remodel and re-equip the ILO to enable it to discharge its responsibilities with enhanced efficiency. These proposed amendments were suggested by the committee on constitutional questions appointed by the 27th Session of the Conference.

Turkey and New Zealand Ratify ILO Conventions

The International Labour Office recently announced the registration of four ratifications of International Labour Conventions.

Turkey registered its ratification of Conventions governing a weekly rest in industry, fee-charging employment agencies, and workmen's compensation for industrial diseases. Ratification of the revised Convention concerning the minimum age of employment at sea was registered by New Zealand.

The registrations brought to 921 the total of registered ratifications of the 76 Inter-

national Labour Conventions which have been adopted by the ILO in the past 27 years. Turkey has now ratified four Conventions, and New Zealand 24.

Countries ratifying Conventions are obligated, under the terms of the Constitution of the ILO, to apply the standards set forth in the Conventions, and to report annually to the International Labour Office on how they are applying them.

Statements of Labour Organizations on Immigration

THE views of the two major Canadian labour organizations on the question of immigration were expressed in prepared statements read by A. R. Mosher, President of the Canadian Congress of Labour, and Percy R. Bengough, President of the Trades and Labour Council, before the Senate Standing Committee on Immigration and Labour, on July 25.

The Committee has been conducting hearings on the problem of immigration for the

purpose of determining: (a) the desirability of admitting immigrants to Canada; (b) the type of immigrant which should be preferred, including origin, training and other characteristics; (c) the availability of such immigrants for admission; and (d) the facilities, resources and capacity of Canada to absorb, employ and maintain such immigrants.

Some of the highlights of the statements of the two labour organizations are presented below.

Statement of Canadian Congress of Labour

Mr. Mosher declared: "The Canadian Congress of Labour, representing over 300,000 Canadian workers, greatly appreciates this opportunity of appearing before you. The question of immigration is of the greatest importance to labour, and the Congress welcomes your recognition that before any policy is decided upon representatives of labour should be consulted.

of course, economic aspects, is primarily a humanitarian question. Canada is under an obligation to humanity to admit her due share of refugees even if it costs her something. It may actually bring her important economic benefits. But even if it does not, she must do her part.

No Racial Discrimination

"Assuming for the moment that some immigration is desirable, the Congress submits that there are two points on which there should be general agreement:

"(a) Racial discrimination should have no place in our immigration policy. People from some countries may, because of their background, education or customs fit into Canadian life more easily than people from some other countries, and such factors may properly be taken into account. But 'race' (however defined) or nationality ought not to be considered at all.

"(b) The last two Censuses have shown a steadily rising proportion of old people in our population, and the recent Dominion Bureau of Statistics, Bulletin F-4. *The Future Population of Canada*, shows that this trend is likely to continue and to become more marked. The following table shows the percentages of persons of 70 years and over, 65 and over and 60 and over in 1921, 1931 and 1941, and the estimated percentages for 1951, 1961, and 1971:—

	1921	1931	1941	1951	1961	1971
70 and over	2.8	3.3	4.0	4.7- 4.8	5.8- 6.0	6.7- 7.0
65 and over	4.8	5.5	6.7	7.9- 8.0	8.2- 9.5	10.4-11.0
60 and over	7.5	8.4	10.2	11.8-12.0	13.2-13.6	15.2-15.9

"The admission of refugees," Mr. Mosher said, "is not really part of the immigration question. Immigration is an economic question. The admission of refugees, though it has,

Suitable Immigrants

"The Congress is very doubtful whether suitable immigrants will be available in any large numbers during the next few years. Plenty of Europeans may want to come here, but most European countries will be anxious to keep exactly the types of people who would make the best immigrants. The Congress submits, therefore, that it would be very unwise to base immigration policy on the assumption that we can get as many suitable immigrants as we may want, or that we have only to reach out and take our pick of the world's population . . .

"The 'desirability of admitting immigrants to Canada' and 'the facilities, resources and capacity of Canada to absorb, employ and maintain such immigrants' are part of our general national economic problem. They cannot be viewed in isolation. Specifically, they must be related to the Government's declared aim of maintaining a high level of employment and income. We want as many immigrants as will give us the highest possible standard of living for the masses of the people. We do not want immigration used as a means of getting cheap and docile workers and breaking down the standard which organized Labour has built up. We do not want it used to provide employers with a pool or reserve of unemployed workers who will be taken on when the employer can make more profit by using extra hands, laid off and maintained at the taxpayers' expense when he cannot, and used as a big stick to keep Labour in its place.

Must Be Strictly Controlled

"For this reason, the Congress submits that neither the framing of immigration policy, nor the carrying out of any policy, should be left to private interests. Both should be kept firmly in the hands of the Government, which is responsible to the people, and the Government should regularly consult with the representatives of Labour and Agriculture as to both policy and administration.

"In formulating suitable immigration policy it is necessary at the outset to clear our minds of two widely-held false notions. One is the lump of work theory: that there is only a fixed amount of work to go around, and that if you bring in more people, there will be just that much less for everybody. The other is that population in itself means prosperity: that the more people you bring in, the richer everybody will be. Clearly, extra people are not just extra stomachs; they *can* mean extra production. On the other hand, they do not *necessarily* mean extra production: an empty stomach is no customer unless its owner can pay for what he needs to fill it. A dozen years ago we had a considerable number of empty stomachs whose owners, through no fault of their own, could produce nothing, and were able to consume only what the employed population was prepared to contribute by way of relief. India, China and other countries have very large populations but are not famous for high standards of living.

"In considering Canada's capacity to absorb immigrants, the first thing to bear in mind is that the physical size of the country, the fact that it covers nearly half a continent, is almost wholly irrelevant. A large part of our territory is economically worthless and incapable of settlement. The 1945 *Canada Year Book*, pp. 27 and 28, classifies over 56 per cent of our land area as 'waste and other land', a footnote explaining that this 'includes open muskeg, rock, road allowances, urban land, etc.' This land, as Professor Dymond, Director of the Royal Ontario Museum of Zoology, says, 'is incapable of producing any crop other than wild life . . .'

Uncertainty of Foreign Trade

"To a considerable degree our future industrial development depends on the future of international trade . . . We cannot be certain of the restoration of international trade. We cannot even be certain that the United States will avoid another major depression. The very well-informed, able and careful London *Economist* is far from hopeful on any of these points.

"It is very doubtful, indeed, whether we can expect any spectacular expansion in the outside markets for our forest or mineral products in the near future; and even under the most favourable conditions our manufacturers will face strenuous competition abroad from Britain, which must export or die, and the United States, where the idea of exporting to secure full employment has gained wide acceptance.

National Economic Planning Essential

"The Congress submits that the first aim of national economic policy should be to provide full employment at decent incomes for our own people. This, the Congress believes, will require national economic planning at least to the degree contemplated by Lord Beveridge in his *Full Employment in a Free Society*. Of such planning, immigration policy would be a necessary, and might be a most important, part. The Minister of Finance, or other responsible Minister, in drawing up his manpower budget, would have to plan for private and public expenditure for consumption and investment on a scale sufficient to employ the whole working force of the nation, and to provide the goods and services which a modern civilized community has a right to expect. He might well find that the country needed a larger working force than was available from the existing population. He might find that there was not enough skilled labour of certain types, and that the time needed to train the necessary number of workers was so long that the delay would seriously hamper national development. In these circumstances, he would presumably recommend bringing in the proper number and kinds of immigrant workers, and the Government would bring them in, take them where they were needed, and see that they were decently established in the community.

"In other words, immigration policy would have to be dovetailed in with general employment policy, housing policy, a Labour Code, and social security. Immigration would have to be planned, not left to the hit-or-miss, catch-as-catch-can, Micawberish methods of the years before 1914. We cannot afford to let people come here just as they please, or as suits the convenience and profit of private interests. We cannot afford to leave the immigrant to sink or swim. We cannot afford to expose Canadian workers to the constant threat of having their standards undercut by immigrants who must take any kind of job at any wages and under any conditions to avoid sheer starvation."

Statement of the Trades and Labour Congress of Canada

Mr. Bengough's statement was as follows:

"The Trades and Labour Congress of Canada has considered the question of immigration for many years. Believing it may be of interest to the Members of the Senate Committee, we are attaching to this Memorandum the views on the question of immigration as expressed at the Conventions of this Congress at the time and place stipulated. Naturally, with changing times, some changes have been made in the views expressed during the years. However, there has been no change in the particular view which has been and still is contained in the Platform of Principles of this Congress, which states: 'Exclusion of all races that cannot be properly assimilated into the national life of Canada.'

"It must be recognized that there are citizens of other countries who may be good brothers and sisters, internationally, but yet would not be acceptable as brothers and sisters-in-law to Canadians. Experience has clearly demonstrated that because of this fact certain nationals who have in the past been admitted into Canada remain as a distinct race and will remain a problem for future generations. The result of permitting such an immigration policy has been equally unfair to those admitted and to their children, as to the citizens of Canada generally. Organized labour naturally opposed such immigration for the fact that such immigrants came and for many years stayed as a source of cheap labour, which, of course, was the same reason that the 'get rich quick employers' of that day welcomed them. Any system of selection must include the suitability of assimilation, and must, in the best interests of all, be rigidly adhered to.

"At the last Convention of this Congress, held in the City of Toronto, September, 1944, the Standing Committee on Post-war Rehabilitation reported as follows:—

Whether we in Canada are prepared to adopt a progressive immigration policy is a matter of vital concern. We cannot ignore the fact of the wonderful productive advantages of our industries, agriculture and our valuable natural resources and in our judgment we should be willing to accept selected people only in such degrees that they can be absorbed and do not vitally affect the general welfare of our own citizens and that full employment and security are assured to all before any attempts are made to remove existing restrictions.

This was unanimously endorsed by the Convention and represents the present day views of the Congress on the question of immigration, with the inclusion of recognition of the

need of proper housing. We might add that there is a general recognition that this country could and should maintain a far larger population than we have at present. In face of the future prospects of less export trade as a result of the improvements made in importing countries both agriculturally and industrially, Canadians must, of necessity, give more attention to the development of Canada and to their home market, which is possible only if our people are gainfully employed with a buying power in balance with their ability to produce. Unquestionably a larger population would mean more customers both for the manufacturer and the merchant; neither can we overlook the fact that twelve million people are not sufficient to hold such a country as Canada so rich in natural resources, indefinitely.

"In conclusion, we wish to leave this thought with this Committee: The problem of securing selected immigrants is no less than the one of how to retain them as citizens. Some claiming to be informed have stated that the natural birth increase from the time of Confederation would have resulted in a population equal to that at present. If such were true, then all results of past immigration have been lost.

"A five-year survey conducted on the Pacific Coast a few years ago did show that fifty per cent of our building trades mechanics had taken employment in the United States. Many of them, undoubtedly immigrants trained in Canada to our construction methods, then went to the United States as first class workmen. The same applies to thousands of our apprentices, our working population and to the graduates of our Universities. While Canada can supply the education and meet the cost in producing artisans and scientists, we have not yet found the answer to providing them with a standard of living sufficient to retain their services, so necessary to the building and development of this great country. Until means are found to retain our ablest and brightest citizens, the looking for new immigrants to educate, train and lose is not so important. On the face of it our first job is to repair the container, then pour in the new immigrants."

A list of resolutions adopted at past conventions of the Congress, which was appended to the statement, amplified the Congress' position of favouring a selective immigration policy which in no way would adversely affect the "living standards or the welfare of our present Canadian population."

Immigration of Members of Polish Army

FOUR thousand members of the Polish Army are to be admitted to Canada to engage in agricultural pursuits, it was announced recently in the House of Commons by the Minister of Justice, Rt. Honourable L. S. St. Laurent.

The Minister stated that the Government of the United Kingdom, honouring obligations undertaken somewhat earlier, had obligated itself to find domicile for members of the Polish Army which served with the allied forces who may not choose to return to Poland immediately. There were about 159,000 men in this army; of whom those who have not been demobilized are now located partly in Italy and partly in the United Kingdom. Most of them, the Minister said, have chosen not to return to Poland at this time.

The Minister declared that in reviewing the situation to determine whether the Government could be of assistance it had been noted that there still exists in Canada an acute shortage of suitable labour for agricultural employment, not only on a seasonal basis but as a more or less permanent situation.

"In surveying the problems involved," he said, "the Government had the benefit of advice from an interdepartmental committee which was set up under the chairmanship of A. MacNamara, Deputy Minister of Labour, and upon which there were representatives also of the Department of External Affairs, of the Royal Canadian Mounted Police and of the Immigration Branch of Mines and Resources.

"After due consideration by the Government of all the factors involved, the Ministers of Labour and Mines and Resources have recommended to Cabinet Council that a limited number of single ex-members of these Polish armed forces should be admitted to Canada conditionally for farm work.

"The recommendation of the two Ministers has now been approved by the Governor in Council P.C. 3112 of July 23, 1946. It authorizes a program for assisting our farm labour problem, while at the same time sharing to some extent in the solution of an

allied problem. I might summarize the main points of the Order in Council as follows:—

"1. Four thousand single ex-members of the Polish armed forces who served with the allied forces will be admitted to Canada shortly, on a conditional basis.

"2. The men admitted must be qualified for and willing to undertake agricultural employment in Canada.

"3. The Minister of Labour is authorized to arrange for representatives of the Immigration Branch of Mines and Resources, of the Department of Labour and of the Royal Canadian Mounted Police to proceed to the United Kingdom and Italy to select the 4,000 suitable men to come to Canada for agricultural employment.

"4. The facilities of the National Employment Service will be utilized for the work of placing these men on farms, but provision is also made for Dominion-provincial agreements if it be found desirable to arrange for the assistance of the provinces in connection with the task of placement.

"5. Every Polish soldier admitted to Canada will be required to sign an undertaking that for a period of two years following arrival he will accept direction to farm employment and will remain at agricultural work.

"6. Steps will be taken to ensure that the men admitted are engaged at current wages and in accordance with living and working conditions prevailing in the locality of employment.

"7. The United Kingdom will bear the cost and responsibility of transporting the men to Canada and the Canadian government will bear the cost of distribution within Canada.

"8. The Order in Council sets forth a declaration that each man admitted to Canada under this arrangement who fulfils for two years after arrival the terms and conditions under which he is admitted will then be granted permanent admission to Canada.

"It is understood, of course, that any man who fails to carry out his obligation in relation to farm employment, or whose deportation becomes necessary otherwise, shall be returned to the United Kingdom."

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

Manitoba Cold Storage Company, Limited, and Local 235, United Packinghouse Workers of America.

Beattie Cadillac Chevrolet Oldsmobile Limited, Toronto, Ontario.

Canadian International Paper Company, Montreal, P.Q.

Re: Manitoba Cold Storage Company Limited, and Local 235, United Packinghouse Workers of America

Reasons for Decision

The Union applied to the Regional War Labour Board for Manitoba for a direction which would require the Company

- (a) to establish a regular work week of 45 hours for all its employees;
- (b) to maintain the existing rates for shift workers (weekly rated) notwithstanding a reduction in their regular work week;
- (c) to establish automatic increases for new employees;
- (d) to increase by 10 cents an hour the wage rates for all other hourly rated employees;
- (e) to pay double time for work performed on statutory holidays and straight or pro rata time, as the case may be, for those holidays not worked.

The Regional Board in its decision of January 30, 1946, directed the Company to maintain existing weekly rates for oilers upon reduction, from 52 to 48, in the number of hours worked per week by the oilers; to pay a probationary rate of 55 cents an hour for the first three months of service; and to increase by 3½ cents an hour the wage rates of all other hourly rated employees. The

Regional Board made no ruling on the application in so far as it concerns statutory holidays.

On March 8, 1946, the Regional Board amended its decision by substituting the last paragraph thereof by the following:

All items in this Finding and Direction whereby the hourly remuneration or the equivalent hourly remuneration is increased are directly conditioned on the workers obeying the employer's instructions to work overtime as such may be required by the Employer and (when there is a Labour Agreement) in accordance with the provisions of such Labour Agreement, and if the Employee or a number of Employees refuse to work overtime when required this Order shall automatically lapse and be of no further effect and the increases hereby directed shall cease to be obligatory on the Employer.

With leave of the Regional Board the Union appeals from that Board's decision, as amended. In brief, the Union asks for the 45-hour week, a general increase of 10 cents an hour (6½ cents over what the Regional Board directed) and payment for six statutory holidays not worked. Further, the Union moves to have

the above-quoted condition deleted from the Regional Board's decision.

The Union supports its appeal on the grounds that the *occupational classification* involved are comparable with similar ones in the packinghouse industry and by comparison, the employees concerned in this appeal are underpaid. The Company denies that the packinghouse industry (as distinct from occupational classifications within it) is comparable with the business carried on by the Company. Moreover, it contends that the wage rates for its classifications of employees are as high as, if not higher than, the rates for the same classifications in other cold storage plants in Winnipeg.

The Regional Board decided that the Company's business should not be considered a part of the meat packing industry. Indeed, it appears that such decision is a confirmation of an earlier decision by that Board concerning the same Company. In this connection it must be remembered that the Regional Board is in much better position to determine such question, than is the National Board. The evidence before us did not show that the Regional Board erred on this point.

We compared the wage rates paid by the Company with those paid by other cold storage plants in Winnipeg and found that the former were as high as, and in many cases higher than, the latter rates.

In view of the foregoing, we are not disposed to disturb the Regional Board's decision affecting wage rates or hours of work.

The evidence concerning statutory holidays does not justify any direction to pay the punitive rates requested or to pay for those holidays not worked.

Re: Beattie Cadillac, Chevrolet, Oldsmobile Limited, Toronto

Reasons for Decision

With leave of the Regional War Labour Board for Ontario, the Company appeals from a decision of that Board, dated March 2, 1946, which dismissed the Company's application for permission to increase the wage rate of its shop foreman.

The evidence before us shows that the Company's business is rapidly expanding, and in consequence the earnings of its mechanics have risen to the point where many of those mechanics receive more money than does the shop foreman.

The Regional Board compared the wage rate paid by the Company to its shop foreman with the wage rates paid by other comparable employers in Toronto to their respective foremen and found that the rates for the Company's shop foreman were not low. If we limited comparisons to wage

With much respect we must disagree with that part of the Regional Board's Finding and Direction which imposed the condition above-quoted. The Regional Board must have considered the directed wage increases to be right for *normal working hours*. How then can there be justification for the imposition of a condition which, if applied, would nullify the Regional Board's decision. The said condition is so worded as to entitle the employer to refuse the wage increases to all its employees if one employee declined to work overtime.

We are not unmindful of the Company's allegation to the effect that Union-Member employees have consistently refused to work overtime, even though the collective agreement between the parties specified that the employees would work overtime as necessity required. Further, we noted that the Union did not deny the allegation but simply claimed that the Company could schedule its work to avoid overtime. Notwithstanding the refusal of the men to work overtime, we cannot agree that it was right to impose the condition. This is not to say that we approve of the actions of the employees in failing to carry out the terms of a collective agreement, on the contrary, experience has shown us that people who honour their undertakings invariably and in the long run benefit thereby.

The appeal is dismissed on all points save and excepting the one referred to in the immediately preceding two paragraphs, and on that point the appeal is allowed. There will be a Finding and Direction accordingly.

June 28, 1946.

rates, we would have to confirm the Regional Board's decision. However, there is evidence to show that the duties and responsibilities of the Company's shop foremen are much greater than those of the foreman whose rates were used for purposes of comparison. The employee concerned in this case maintains direct supervision over the mechanics, and paint shop and body repair departments. The other comparable employers have foremen for each of their respective departments.

After giving careful consideration to this case, we have come to the conclusion that an adjustment in wage rates for the shop foreman is justified though not to the extent requested.

We allow the appeal. Our Finding and Direction to be issued in pursuance of this decision will set forth the extent to which the employer may adjust the wage rates of its shop foreman.

June 28, 1946.

Re: Canadian International Paper Company, Montreal

Reasons for Decision

The Company applied to the Regional War Labour Board for Ontario for permission to increase the top rates in the ranges of rates in the Company's "Standard Salary Schedule for Employees not above the rank of Foreman". The Regional Board dismissed the application. While the application concerned a large number of classifications, the appeal before us is confined to the effect of the Regional Board's decision concerning the top rates in the ranges of rates for the following classifications namely: Laboratory Assistant (male), Laboratory Assistant (female), Librarian, Secretary, Secretary to Executive, Shipping Room Clerk, Sulphite Foreman and Switch Board Operator.

The Company, either directly or through subsidiary and affiliated Companies, operates newsprint mills in New Brunswick and Quebec, bleach sulphite pulp mills in Quebec and Ontario and board mills in Quebec. The Company also maintains and operates an industrial research laboratory at Hawkesbury, Ontario. This case concerns employees in the laboratory.

The Company states that its policy has been, and is, to pay the same rates for the same duties and responsibilities throughout all operations, regardless of whether the operations are located in New Brunswick, Quebec or Ontario. It has been, and is, Company policy to apply to all employees, adjustments equivalent to those which have been applied to any substantial group of employees. It was shown that even before wage control, any overall adjustment in the case of hourly paid employees was generally accompanied by a comparable adjustment for salaried

employees. It was stated before us that the said policy was, to a substantial degree, modified in deference to the National policy of price control through wage stabilization. The result has been that the wage rates for hourly rated employees have been increased considerably more than have the wages of salary scheduled employees.

The Company accordingly, and in keeping with its policy, applied to the Regional War Labour Boards for Quebec, New Brunswick and Ontario, for permission to adjust the wage rates for its salaried employees. The Quebec and New Brunswick Boards approved the applications. The Ontario Board dismissed the application before it.

In effect what the Company wants to do is to restore, in part at least, the differentials previously existing between the hourly paid and salaried groups. Section 21 of Wartime Wages Control Order, 1943, vests authority in the National Board to authorize or direct an employer to increase single rates or rates within ranges for occupational classifications, in order to maintain differentials. There are certain conditions laid down in Section 21 which are intended as guides for Boards in dealing with such cases. One of the conditions is that the proposed increases designed to restore differentials can be justified under Section 20 of the Order.

We find that the conditions prescribed by Section 20, as that Section stood on the date of the Regional Board's decision, are met and satisfied by the Company. Accordingly, we allow the appeal. A Finding and Direction will issue to give effect to this decision.

June 29, 1946.

Re: Corbin Lock Company Limited, and Belleville-Sargent and Co. Ltd., and United Automobile Workers of America (C.I.O.)

Reasons for Decision

On May 7, 1946, the National Board issued Interim Reasons for Decision in these appeals. The Board suggested that the parties negotiate on the issues involved. For that purpose the Board adjourned the appeals until June 18, 1946.

Belleville-Sargent and Company, Limited, and the Local C.I.O. Committee negotiated and have agreed on wage rates for female employees, apprentices over 19 years of age, boys under 19 years of age, and labourers. The agreement has been reduced to writing and we have copies of same. The proposed rates are reasonable and we approve them.

We have been advised that the Local Committee representing the employees of Corbin

Lock Company, Limited, was not available for discussions with the Company, hence we have no agreement, from the parties, to consider. It is our view, however, that it would be proper in the circumstances to adopt for Corbin Lock employees in the above named groups and classifications, the same starting rates and automatic increases as have been approved for Belleville-Sargent employees in the same groups and classifications, respectively.

The appeal is allowed. The Cross Appeal is dismissed. This Board's Findings and Directions will set forth the hourly rates to be paid to the said employees by their respective employers.

July 2, 1946.

Re: Winnipeg Free Press Company Limited, and Winnipeg Tribune Company Limited, and Stereotypers and Electrotypers Union, Local 59, Winnipeg Newspapers Pressmen's Union, Local 35

Reasons for Decision

In December, 1945, the Companies and the Unions negotiated on wage rates for Stereotypers, Electrotypers and Pressmen employed by the Company. The negotiations resulted in an agreement in which it was provided that the wage rates for employees in the said occupational classifications be \$1.08½ per hour for day work and \$1.24 for night work.

The Companies and the Unions joined in asking the Regional War Labour Board for Manitoba to approve the rates. The Regional Board, by its decision of January 23, 1946, approved \$1.02 per hour for day rates and \$1.24 for night rates. Upon the request of the parties, another hearing was held and after further consideration, the Regional Board increased the rates to \$1.05 and \$1.19. The later decision is dated April 24, 1946, and was apparently made in pursuance of the second part of Section 20 (1) (a) of Wartime Wages Control Order 1943, as amended by P.C. 348, because the authorization was issued upon the condition and understanding that there would be no increases in the prices of the services rendered by the Companies, as a result of the increases in wage rates.

With leave of the Regional Board, the Unions appealed from the decision of April 24. The Companies, by letter dated June 5, 1946, addressed to us, had the following to say about the appeal: "The publishers feel that the rate of \$1.08½ per hour for day work and \$1.24 for night work, as arrived at as a result of negotiations, is a fair and equitable rate and we, therefore, respectfully request that you give authorization to pay the rates agreed upon between those two crafts."

It has been reported to us that the Regional Board's dominant reason for fixing \$1.05 as the day rate was that it "would maintain the 10 cents newspaper premium over the job printing rate of 95 cents set in several job printing applications concurrently before the Board." The appellants attack the basis for the aforesaid reason, on two grounds. Firstly, they say that 95 cents is not the rate fixed and paid in job printing establishments. In support of that statement, they show that the actual rates paid to Electrotypers and Stereotypers in the two job plants in Winnipeg where men of that craft are employed, are in excess of 95 cents. Indeed it would appear that ranges of rates are in effect for the classification in the two plants. Secondly, the

appellants say that the Manitoba Board's decision of recent date, affecting "Union Label Shops" and their printers, pressmen and bookbinders, call for a rate of 97 cents for a 44-hour week with step increases to \$1 coincident with a gradual reduction to 40 hours in the work week. Moreover, it was argued that it was not the established practice in the industry, as a whole, to limit the differential to 10 cents. Numerous instances were cited in support of the argument.

Fortunately, it is not necessary to decide this appeal on the points raised in the last above paragraph. In our opinion, there is a much more important point to consider. It appears that the Unions are obliged to supply the Companies with skilled craftsmen as and when required, an obligation undertaken by the Unions wherever they are recognized as bargaining representatives. To carry out this obligation, craftsmen are moved from city to city as circumstances may require. One may readily understand the reluctance of an individual in accepting a job in any city at a rate lower than that which he may receive in another city. The evidence before us shows that such reluctance might well apply in a case where a Stereotyper or Pressman would be asked to take a job with the appellant companies.

The recognized "regular work week" for the employees on day work comprises 40 hours, and on night work 37½ hours. Notwithstanding the foregoing, the actual work week for those employees comprises a greater number of hours on each shift. A shortage of craftsmen makes this necessary. It is a matter of record that there will be no request for further wage increases when the actual work week of 40 hours is restored.

We find that there are no occupational classifications in Winnipeg which may be regarded as being the same as or similar to those concerned in this appeal (see definition "occupational classifications" in 13 (1) (h) of Wartime Wages Control Order 1943). We further find that the wage rates for the Companies' said occupational classifications are low in comparison with the same occupational classifications in other localities, which localities, in our opinion, are comparable with Winnipeg.

The appeal is allowed and the rates requested are approved. Finding and Direction accordingly.

July 4, 1946.

Re: Noubar Courian vs Hall-Wheler Engineering Limited, Toronto, Ontario*Reasons for Decision*

This is an appeal by Noubar Courian from a decision of the Regional War Labour Board for Ontario dated March 28, 1946. In that decision the Regional Board declared Courian to be above the rank of foreman and subject to Wartime Salaries Order, P.C. 1549, for the period during which he was employed by Hall-Wheler Engineering Limited.

The Company was incorporated in May, 1942. Mr. Courian became a Director at the first meeting of the shareholders and the "Business Manager" of the Company at the first meeting of Directors. He resigned from the Board of Directors in November, 1942, but continued to hold office as "Business Manager" until April 4, 1944, when his relationship with the Company was terminated.

Courian's appointment as Business Manager was confirmed by an agreement in writing dated June 18, 1942. In that agreement his rate of salary is mentioned. It is a rate considerably in excess of \$250.00 per month. The agreement further provided that he was to be paid travelling and other expenses connected with his work. On the same date, June 18, the parties entered into a further agreement which no doubt was intended to modify or vary the first agreement to the extent that Courian's remuneration was to be computed by applying certain percentage rates to the value of the work brought in by him to the Company. Notwithstanding the second agreement and for his full period of employment, Courian was paid at the monthly rate mentioned in the first agreement.

Counsel for the appellant took the position that the money received by Courian was a "salesman's commission" and therefore could not be deemed a "salary" within the meaning of 1 (c) of Wartime Salaries Order P.C. 1549. In this connection it must be remembered that we are called upon to determine Mr. Courian's status, in pursuance of the provisions of Wartime Wages Control Order. In that Order the word "wages" is defined as including "wages, salary, *commissions*, gratuities". Therefore we must hold that even if Courian's remuneration was calculated on the basis of commissions it is nevertheless

to be regarded as "wages".

Courian's wages were in excess of \$250.00 per month. That being so it follows that before a War Labour Board may assume jurisdiction, the appellant must show clearly that his duties and responsibilities and his relationship to other employees were not such as to place him above the rank of foreman or comparable rank.

If Mr. Courian's sole duty had been that of taking orders for work, the appellant no doubt would have succeeded in persuading the Regional Board to assume jurisdiction. If the Board had done so we feel sure that it would also have done something about the failure of the Company to obtain at the proper time, approval of the rate paid. However, the occupational title of "Business Manager" was sufficiently impressive to cause the Board to enquire into Mr. Courian's duties. The statement of duties shows that the appellant assumed responsibilities much greater than those normally assumed by one of the rank of foreman or comparable rank. Moreover it must not be forgotten that Mr. Courian was, for a time, a Director of the Company.

We are fully aware of the difference between the definitions of "wages" as found in Wartime Wages Control Order, and of "salary" as contained in Wartime Salaries Order. In the former "wages" include commissions, in the latter "salary" may not include "salesman's commissions". As above stated, however, our view is that Mr. Courian's duties went considerably beyond those of a salesman.

We find that Noubar Courian was at all times material to this case, above the rank of foreman or comparable rank, and that he was not subject to the Orders in Council administered by the National War Labour Board. It will be for the Salaries Controller to decide whether, in his opinion, Mr. Courian can be held to be subject to Wartime Salaries Order P.C. 1549.

The Regional Board's Finding and Direction will be varied by deleting therefrom the words "and subject to the Wartime Salaries Order P.C. 1549, as amended". Otherwise the Appeal is dismissed.

July 10, 1946.

Re: Canadian Laco Lamps, Limited, Toronto, Ontario*Reasons for Decision*

On the 25th of April, 1946, the Regional War Labour Board for British Columbia directed the Company to pay its employees in British Columbia in the occupational classification of Stenographer-Secretary, within

the range of from \$95 to \$135 per month. The direction has effect from March 8, 1946. By letter dated April 25, 1946, the Regional Board directed the Company to pay two of its said employees certain amounts of money which the Regional Board declared to be

arrears in wages. With leave of the Regional Board, the Company appeals from the last mentioned direction.

It appears that prior to November 15, 1941, the employer had, for the said occupational classification, a range of rates from \$75 to \$90 per month. In October, 1943, the Company applied to the Regional Board for permission to increase the wage rate to \$100 per month, and on October 22, 1943, the Regional Board directed the employer to pay a rate of \$100 per month for the incumbent in the occupational classification of *Secretary*. On the 15th of February, 1944, the Company incorporated the cost-of-living bonus—\$18.40—with the directed wage rate, making the salary of the Secretary \$118.40 per month.

Between December of 1943 and March 15, 1946, changes took place in personnel in the occupational classification. Rates lower than that directed as aforesaid were paid to the succeeding incumbents. The difference between the rates actually paid and the directed rate was computed by the Regional Board, and the amounts so computed were directed to be paid.

If the Regional Board, in its decision of October 22, 1943, had authorized the Company to increase the rates as therein provided, the Company would have been entitled to claim

that a range of rates existed. In this case, however, the Board directed the \$100. rate. In our view, this direction precluded the Company from having a range of rates for the classification in question.

Section 19 of Wartime Wages Control Order, 1943, reads as follows: "No employer shall pay wages to an employee, or employ an employee on terms which are in contravention of or otherwise than in compliance with any direction or Order made by the National Board under this Order given or made to or in respect of, such employer".

Penalties are provided in the said Order for any violation committed under the Order. They are penalties which might be imposed by the Courts. A War Labour Board has no authority to direct an employer in any case to pay a sum certain which the Board purports to find owing to an employee. In other words, the Board can neither usurp the functions of a Court, nor set itself up as a collection agency. We hold that the Regional Board was without the necessary power to direct the Company to pay the alleged arrears of wages. Accordingly, we allow the appeal and order that the Regional Board's letter of April 25, 1946, shall not have effect.

July 15, 1946.

Re: Victoriaville Specialties Company Limited, and Syndicat Catholique National des Travailleurs du Meuble de Victoriaville Inc.

Reasons for Decision

The Furniture Manufacturers' Association, on behalf of the Company, and the Syndicat, on November 2, 1945, entered into a collective labour agreement in accordance with the provisions of the Collective Agreement Act 4 Geo. VI, Chap. 38, as amended. In that agreement, the following Article is contained:

7. The average minimum wage rate will not be lower than Forty-seven (47) cents per hour. In determining the average, the total wages earned, less overtime, will be divided by the total normal hours of work, and that part of each Employee's wages which exceeds Sixty-five (65) cents per hour will not be considered.

Under no circumstances will the minimum hourly rate be lower than Twenty-five (25) cents per hour. This minimum hourly rate will also apply as a guaranteed rate in the case of piece workers.

It is agreed that the Employer will sign, together with the representatives of the Syndicat, a joint application to the Regional War Labour Board for its approval of the wage rates mentioned above, with recommendation that these rates become retroactive to July 30, 1945.

The parties applied to the Regional War Labour Board for Quebec for approval of

the collective agreement. The Regional Board, by its decision of December 11, 1945, directed the Company to give effect to the terms of the agreement.

A dispute arose between management and the Syndicat concerning the method to be followed in adjusting wage rates so as to bring the overall average up to 47 cents an hour. Management maintained that it was within its province to make adjustments as it saw fit. The Syndicat, on the other hand, insisted that the average should be established by a general increase in the wage rates of all employees.

The Syndicat asked the Regional Board to settle the dispute. The Regional Board, on February 15, 1946, decided that the Company should, firstly, increase the wage rates of each employee by three cents an hour, and secondly, and upon agreement with the Syndicat, make such further and other adjustments in wage rates as would establish and maintain the said average rates.

Upon receipt of the February decision, the Company complained to the Regional Board that it had not been given an opportunity to make representations to the Board

concerning the matter in dispute. The Company asked leave to make those representations upon an application for reconsideration. In the alternative, it asked leave to appeal. Leave to appeal was granted.

The collective labour agreement in this case, as in all others affecting the Furniture Industry in Quebec, deals with minimum wage rates and average minimum wage rates. Maximum rates are not mentioned in the agreement. It was not sufficient according to the provisions of Wartime Wages Control Order, 1943, for the Regional Board simply to approve the said agreement. That, as above stated, is precisely what the Regional Board did in and by its December Decision. The February Decision is more in keeping with the provisions of the Order because it directed specific increases in wage rates.

It has been indicated to us that the Regional Board did not have before it, at any time material to the case, any evidence as to the rates being paid the several occupational classifications in the Company's employ. With much respect we are of the opinion that such evidence should be obtained before any specific wage increases are directed in any case such as this.

The February Decision affects only those employees whose rates are within the limits mentioned in the above-quoted Article. To apply the 3 cents increase to the employees receiving wages at rates of 63, 64 and 65 cents an hour would move those employees out of the wage group used in calculating the "average minimum wage" as provided in the collective agreement. The Company, in such case, would of necessity have to readjust the rates of the employees remaining within that wage group so as to establish the minimum average. We are satisfied that the Regional Board did not contemplate such a situation when it directed the general increase.

We have decided that this case should be returned to the Regional Board. We ask the Regional Board to make a careful analysis of the existing rates for the several occupational classifications concerned, and having made the analysis, to direct such specific wage increases as they consider proper having regard to the provisions of Wartime Wages Control Order, 1943, and the terms of the collective labour agreement.

The appeal is allowed. Finding and Direction accordingly.

July 19, 1946.

Re: Imperial Optical Company and United Electrical, Radio and Machine Workers of America, Local 514

Supplementary Reasons for Decision

The National War Labour Board on March 6, 1946, issued its Reasons for Decision on the appeal by the Company from a Finding and Direction of the Regional War Labour Board for Ontario, dated November 26, 1945. As is the practice, the National Board issued its Finding and Direction which gave formal effect to its decision. In the Schedule attached to the Finding and Direction, ranges of rates are set forth for the several occupational classifications of employees in the Company's plant in Toronto. Automatic wage increases based on length of service are also provided for some occupational classifications. Incidentally, the ranges of rates so set forth are higher than the ranges previously in effect for most of the classifications.

Sometime after the decision was issued, the Union complained that the Company had failed to implement the Board's directions. Upon receipt of the complaint, we decided to ask the Company and the Union to appear before us to discuss the matters in dispute. We have heard Counsel for the Company and representatives of the Union.

It is contended by the Union that because there was an upward adjustment in rate ranges,

the Company should have increased the wages of each and every employee regardless of whether the employee's rate is within the newly established range of rates for his occupational classification. We say that it was not intended that the said decision should have that effect. The decision required the Company to increase those wage rates of every employee whose rate was less than the low of the newly established range for his classification. The decision further required the Company to increase rates in several classifications for those employees who had served the Company for certain named periods. From that point on however, and in respect of those employees in any occupational classification whose rates are found to be within the new range of rates for that classification, Section 25 (1) (a) of Wartime Wages Control Order 1943, shall apply.

The evidence submitted to us shows that the Company has made many adjustments in rates within the new ranges. The Union representatives did not indicate to us that they knew that those adjustments had taken place. However, they now have full knowledge of those adjustments and they also heard a representative of the Company say that a review of rates of other employees is under

way. This much has been gained by this further hearing. It is not out of place, however, for us to remark that all such knowledge could or should have been obtained through direct inquiry from officers of the Company.

The second point in the current dispute concerns the Company's piece rate systems and their relationship to the rate ranges established by the Board. Those systems were not issues in the appeal. Nevertheless, at the first hearing, reference was made to them. It was then indicated that for a number of operations there was a system whereby employees received a guaranteed rate and in addition, had the opportunity to increase their earnings under production incentive bonuses. At the recent hearing, however—and then only for the first time—it was revealed that the Company has in effect, a form of piece work for the operations in question. This piece work structure does not, in our opinion, meet with the usual standards inherent in accepted piece work plans. In a large number of the operations, limitations are placed upon the productivity of the employees engaged on those operations. It is said that such limitations are occasioned by bottlenecks in production, and through faults in the assembly line system.

Re: Workers' Association of Little Long Lac Gold Mines (Canadian Federation of Labour) and Little Long Lac Gold Mines Limited

Reasons for Decision

This is an application by the Association for a direction to the Company to increase wage rates of all occupational classifications covered by collective agreement by thirty (30%) per cent.

The Company is engaged in the mining of gold in the vicinity of Geraldton, Ontario, and examination of the wage rates currently paid to its occupational classifications as compared with wage rates paid to workers in substantially similar employment in the service of other gold mining companies in the area discloses variations in the wage rates as paid occupational classifications under the same job titles by the respective companies. To certain of the occupational classifications Little Long Lac Gold Mines pays higher wage rates than any other mine in the field. In other cases wage rates are equal to those paid by other mines and in certain cases the wage rate is lower.

No evidence was presented to this Board at the hearing of the case that this particular Company or any other gold mining company similarly situated could support any general adjustment in wage scales on the basis suggested by the application or for that matter,

It would seem that employees on piece work do not stand to benefit from this Board's decision, except to the extent that their guaranteed rates have been increased. In our view, the piece rates should be adjusted in order that they will reflect, in some measure at least, the changes which have taken place in the rates schedule of the Company.

We are aware of the care which must be taken in adjusting the piece work rates. We believe that the Company and the Union can make reasonably satisfactory adjustments in those rates if they approach the problem in good faith. We direct them to proceed to negotiate thereon. Mr. H. Perkins, Industrial Relations Officer, Toronto, will be available to assist the parties in making such adjustments.

The negotiations should be completed within thirty days from the date of this decision. The results of those negotiations should be submitted promptly to the Regional War Labour Board for Ontario for approval. In view of the fact that it would be difficult, if not impossible, to make the revised piece work rates retroactive to October, 1945 (the effective date of the previous decision), they should become effective as of the date of approval by the Regional Board. July 18, 1946.

any overall general increase in wage rates in any lesser amount under prevailing conditions. In these circumstances, the Board cannot find that it would be just and reasonable or consistent with the intent of the Wage Control Order to direct the Company to grant any general increase in wage rates to its occupational classifications covered by the application.

The Board is aware that variations in the wage rates paid particular occupational classifications as between one mine and another may be justified on the ground of variations in conditions of employment and the nature of the service required and we, therefore, do not feel that we should direct the Company to pay the same wage rate as may be paid under the same occupational classification title by any one of the other mines in the field in all cases. However, we do feel that minor adjustments in wage rates in the order indicated hereunder would be just and reasonable in the terms of the Wage Control Order for the occupational classifications listed:—

1. an increase of five (5c) cents per hour in the wage rate of the occupational

classifications of Blacksmith, Blacksmith Helper, Pipefitter, Carpenter, General Labour, Dryman, Lampman, Roasterman, Machineman Helper, Trammer, Timberman Helper.

2. an increase of ten (10c) cents per hour in the wage rate of the occupational classifications of Truck Driver and First Aid Attendant.

There will be Finding and Direction accordingly.
July 18, 1946.

Re: Fraser-Brace Engineering Company Limited, Montreal, P.Q.

Reasons for Decision

This is an application for leave to appeal and appeal by the Company from a Finding and Direction of the Regional War Labour Board for Nova Scotia, dated May 6, 1946. In that Finding and Direction the Regional Board approved rates requested by the Company for several occupational classifications of employees employed in constructing a salt plant at or near Amherst, N.S. In the case of three occupational classifications, however, the Regional Board declined to approve the rates requested, but instead, approved lesser amounts in each case. Those occupational classifications are: Carpenter Foreman, General Labour Foreman and Foreman of Steam Shovel. The Company now requests us to approve the rates proposed by it for the three classifications.

The incumbents in the three occupational classifications were previously employed by the Company on a certain project in Ontario. The Ontario Regional Board approved certain rates for the said classifications for the duration of that project. The rates now proposed are the same as those which the Ontario Board approved and are considerably higher than those authorized by the Nova Scotia Board.

We are unable to accept the Company's argument that the rates of the employees, whilst engaged in Nova Scotia, should be the same as those authorized by the Ontario Board for the same classifications. The fact that the employees are the same is immaterial. Under Wartime Wages Control Order 1943, Boards deal with occupational classifications, and not individuals. Moreover, we are aware of the circumstances lead-

ing to the fixing of the rates for the Ontario project. There is no doubt but that the special circumstances in that case had effect upon the minds of the members of the Ontario Board when the rates were considered and approved.

Assuming that the employees in the first two named occupational classifications are of the rank of foreman, it is our view that the rates approved for them by the Nova Scotia Board provide ample differentials over the rates authorized for the employees being supervised. If the standard work week in this case is one of forty-eight hours, then the Carpenter Foreman enjoys a differential of 55 cents an hour over Journeymen Carpenters, and the General Labour Foreman, a still greater differential over the labourers.

The employee in the occupational classification of "Foreman of Steam Shovel" operates a shovel, but exercises supervision over other operators. The Regional Board's Finding and Direction did not provide any differential in this case; in fact, we are unable to find this classification mentioned in the Regional Board's Decision. We authorize the establishment of this occupational classification and a rate of \$1.30 per hour may be paid to the incumbent.

We allow the application for leave to appeal, but we confirm the Regional Board's Decision as to the Carpenter Foreman and General Labour Foreman. The Company is authorized to establish the occupational classification of Foreman of Steam Shovel and to pay the incumbent in that classification at the rate of \$1.30 per hour. Finding and Direction accordingly.

July 22, 1946.

Re: Nufashioned Narrow Fabric Company of Canada Limited

Reasons for Decision

With leave of the Regional War Labour Board for Ontario, the Company appeals from a Decision of that Board, dated May 2, 1946. The Regional Board rejected the Company's application for permission to pay its employees a bonus based upon the maintenance of a certain percentage efficiency in the general operations in the Company's plant at St. Catharines, Ontario.

The Regional Board held that the proposed bonus is in the nature of a voluntary bonus and, therefore, could not be approved under Wartime Wages Control Order, 1943. The Company's representations before the Regional Board did not adequately describe the plan which the Company wished to put into effect. In the circumstances, the Regional Board could not have rendered any decision other than the one it made. With much

respect, however, it is our view that the plan is not one involving a voluntary bonus.

The Company, as its name would indicate, is engaged in the manufacture of narrow fabrics such as lace, ric-rac braid, braid trimming, tubular elastic, soutache braid and such-like. The machines used to produce those products are automatic. The attendants, called braiders and winders, are paid on a piece-work basis, but are guaranteed certain rates. All other employees are paid time rates.

The efficiency of the machines depends, to a great extent, upon the care taken in maintaining them. This is the responsibility of fixers and other mechanics. Of equal importance are those employees who keep available, at all times, the material used in the manufacture of the products. Team work is essential to overall plant efficiency.

To induce the employees to exercise the greatest degree of co-operation, the Company proposes to establish a plant-wide incentive bonus plan. The plan calls for the payment to all employees of amounts equal to 5 per cent of their wage rates when efficiency in production is maintained at 85 per cent, and

an additional 1 per cent for each 1 per cent increase in efficiency over 85 per cent. It is proposed that the bonus shall be paid quarterly. Certain other factors concerning waste will be taken into account in those calculations.

We have examined the production figures of the Company for the periods July 1, 1945, to December 31, 1945, and January 1, 1946, to June 30, 1946. Those figures show that a material improvement in production costs has taken place during the latter part of the second period. This fact takes on added significance when it is realized that the Company proposes to have the plan made effective commencing April 1, 1946.

We are satisfied that the plan is reasonable and is one which can be approved under the Order. It will benefit both employees and employer.

We allow the appeal and authorize the Company to put the aforesaid plan into effect commencing April 1, 1946. Finding and Direction accordingly.

July 23, 1946.

Re: McColl-Frontenac Oil Company, Limited, and Plant Council of the Toronto Refinery of McColl-Frontenac Company, Limited

Reasons for Decision

This is an application for leave to appeal and an appeal by the Company and the Council from a decision of the Regional War Labour Board for Ontario, dated April 6, 1946. In that decision the Regional Board refused to authorize the Company to increase the wage rates of its employees at its Toronto Refinery, coincident with the reduction in the regular work week of those employees from 48 hours to 42 hours.

The grounds taken by the Appellant in support of the application and appeal are:

- (a) that the current wage rates for the occupational classifications concerned in this case are "low in comparison with the rates in effect for the same or similar occupational classifications in the same or comparable localities" and, therefore, the Regional Board erred in that it failed "to make provision for orderly rectification" of such wage rates;
- (b) that the Regional Board erred in principle in ignoring precedents established in cases concerning other oil refining companies.

We find that the current wage rates of the employees concerned are "low" in comparison with rates paid by other oil refining companies at their plants located in areas which, in our opinion, are comparable. We also find that the Company has given its undertaking that

the increased cost for labour arising out of upward adjustment in wage rates, as now proposed, will not make it necessary for the Company to increase the price of its products. Both facts bring the case within Section 20 of Wartime Wages Control Order 1943, as amended by P.C. 348. The question still to be determined is, to what "extent" would it be reasonable to vary the existing rates.

In our view it would not be reasonable in the circumstances to approve the ranges of rates requested in this case. One reason for that view is to be found in the fact that there is considerable overlapping in the ranges affecting grades of certain occupational classifications. We do not favour such practice. Another and more important reason is that the proposed ranges, if approved and put into effect, would have a disturbing effect in the oil refining industry generally.

We propose to authorize a new maximum for each range. To permit this being done, we allow the application for leave to appeal and we allow the appeal in part. This Board's Finding and Direction will indicate the extent to which the previous maxima of ranges may be varied by the Company.

The Company should revise its schedule of ranges in keeping with the newly authorized maximum, so as to eliminate the overlapping above referred to. Such revision should be reported to this Board for approval.

July 26, 1946.

Re: International Business Machines Company, Limited, Toronto, Ontario

Reasons for Decision

This is an appeal which concerns a Decision of the Regional War Labour Board for Ontario, dated February 21, 1946. The Company had asked the Regional Board to approve a general increase in wage rates for the classifications concerned. The Regional Board approved the increases requested for some occupational classifications, but denied the requests made in respect of other classifications.

Prior to November, 1939, the Company's regular work week was one of 42½ hours. At the commencement of the war, the work week was increased to 55 hours, and there it remained until January, 1944, when it was reduced to 50 hours. In January, 1944, the wage rates of the employees were increased by amounts equal to 10 per cent of their previous rates. Outside of this adjustment the only addition to the 1939 rates of these employees came about through incorporating therewith the cost-of-living bonus.

The Company wishes to revert to its original regular work week of 42½ hours, but says that it is not practical to do so under the Regional Boards' Decision. That decision adjusted the rates of only 55 per cent of the employees con-

cerned, and in the opinion of management would be unfair to the remaining 45 per cent to revert to the Company's original work week.

We have examined the schedule of wage rates in effect prior to the Regional Board's Decision under appeal. Some indication of the level of those rates may be obtained when it is known that the weighted average thereof is 85½ cents an hour. While that figure may be regarded as being above the average, it must be realized that most of the employees concerned are engaged in operations requiring much experience and a high degree of skill.

To approve the Company's request in this case, however, would enable the Company to establish a schedule of wage rates which would, undoubtedly, have a disturbing effect upon the rates paid in other establishments in the Toronto area.

Having regard to all the circumstances in this case, we have come to the conclusion that it would be just and reasonable to authorize the Company to increase its ranges of rates by 15 cents an hour. We allow the appeal and revoke the Decision of the Regional War Labour Board. There will be a Finding and Direction accordingly.

July 26, 1946.

Re: Canada Creosoting Company, Limited, and Creosote Workers, Federal Union No. 57

Reasons for Decision

On application by the Union, the Regional War Labour Board for Alberta directed the Company to increase the piece work rates for handling certain classes and sizes of ties at the Company's North Edmonton Plant. With leave of the Regional Board the Company appeals from that direction.

We have carefully studied the submissions of the Company and of the Union, and have concluded that the argument submitted by the Company does not indicate that the Regional Board erred in principle or in appreciation of the facts. In the circumstance we must dismiss the appeal.

July 27, 1946.

Re: Powers Color Research Limited

Reasons for Decision

This is an appeal by the Company from a Decision of the Regional War Labour Board for Quebec, dated May 7, 1946. In and by that Decision, the Regional Board authorized the Company to establish thirteen occupational classifications and to pay therefor certain single rates and ranges of rates. The rates and ranges authorized are lower than those requested. The Regional Board granted leave to appeal.

We have examined the material upon which the Regional Board based its Decision, and we are compelled to say that on the material available, the Regional Board's Decision was sound. On appeal, the Company asked for

and was accorded a hearing. Much of the evidence submitted to us at the hearing had not been presented to the Regional Board. In our view, the Company should have presented the new evidence to the Regional Board on an application for reconsideration. However, in view of the fact that the Company incurred considerable expense in bringing from its United States' and Canadian laboratories a number of witnesses who gave evidence before us, we concluded that the best interest of all concerned would be served by our assuming jurisdiction.

The Company was incorporated on November 20, 1945, and has its Head Office at St. Lambert, P.Q. It is engaged in research on

new processes in colour reproduction. It does not sell goods or services.

The success in developing the new processes depends in large measure upon the perfecting of three pieces of equipment. Those pieces of equipment are called the Integral Mashing Camera, the Positive Camera and the Colour Halftone Film Strip Camera. To succeed in such development, the Company must employ craftsmen who have had long experience in the graphic arts and have acquired a high degree of skill in those arts. These craftsmen must also have initiative. They must be capable of analyzing the results of their experiments and of collaborating with others in a study of suggested improvements in the said equipment. In the Company's St. Lambert laboratory, there will be used certain secret processes and formulae which have been developed by Powers Laboratories in the United States. The Company relies on these employees to guard those secrets.

A collective agreement made between the Company and International Photo Engravers'

Union, Local 96, records that the proposed ranges of rates were predicated upon the extraordinary demands upon the skill, initiative and integrity of the men required to perform the necessary research work.

In our opinion, the evidence submitted to us shows that the employees concerned, other than apprentices and the secretary, are entitled to higher rates than those authorized by the Regional Board. While we are unable to find that it would be just and reasonable to approve the ranges of rates proposed by the Company, we do find it appropriate in the circumstances to approve the rates which the Company reports as being paid. Such approval is granted upon the condition and understanding that the Company's operations are, and will continue to be, limited to research in colour reproduction.

The appeal is allowed and there will be a Finding and Direction accordingly.

August 1, 1946.

Re: Nesbitt, Thomson and Company, Limited, Toronto, Ontario

Reasons for Decision

The Company applied to the Regional War Labour Board for Ontario for permission to adjust ranges of rates for its employees in Ontario. The Regional Board, by its Decision dated June 19, 1946, dismissed the application. With leave of the Regional Board, the Company now appeals.

We find that the Company's established rates and ranges of rates for its occupational classifications of employees are low in comparison with the rates and ranges of rates prevailing for the same occupational classi-

fications in the employ of comparable employers in the same locality. On the other hand, the ranges of rates requested by the Company would, if approved, entitle the Company to pay salaries considerably in excess of the prevailing rates. The ranges of rates which we propose to fix for the several occupational classifications will permit the Company to rectify existing inequalities.

The appeal is allowed in part. The newly authorized ranges of rates will be set forth in this Board's Finding and Direction.

August 3, 1946.

Industrial Disputes and Conciliation

Introduction

The Industrial Disputes and Conciliation section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war," but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

The Wartime Labour Relations Board (National) met for two days during the month of July. During this period the Board received 27 applications, held five hearings, issued three certificates designating bargaining representatives, rejected one application and gave decisions in four appeal cases.

Certificates Issued

Three applications for certification of bargaining representatives were approved by the Board and certificates issued as below:—

1. Messrs. H. T. Warkentin and W. K. Henderson and *Canadian Air Line Navigators Association* for the Navigating Officers employed by *Trans-Canada Air Lines* in its Trans-Atlantic Service. The Chief Navigator was excluded from the bargaining unit.*

2. Messrs. A. Frome, E. F. M. Hill, and F. E. Pope and *Canadian Air Line Passenger Agent Association* for Passenger Agents and

Passenger Agents-in-Training of *Trans-Canada Air Lines, Winnipeg, Manitoba*. Passenger Agents-in-Charge were excluded from the bargaining unit.**

3. Messrs. A. R. Mosher, H. A. Chappell, J. A. Querido, Frederick W. McClland and Arthur W. Holmesdale and the *Canadian Brotherhood of Railway Employees and Other Transport Workers* for employees of the *Bessborough Hotel, Saskatoon, Saskatchewan*. The Manager, Manager's Secretary, Head Barber, Chef, Accountant, Head Waiter, Housekeeper, House Officer, Chief Cashier, Bell Captain, Chief Engineer, Steward, Accountant's Stenographer, Laundry Superintendent, Head Porter, Food Checkers, Cafeteria Food Checkers and Timekeeper-Watchmen were excluded from the bargaining unit.***

** Following investigation of the application and a public hearing.

*** Following investigation of the application, a public hearing and a representation vote.

* Following investigation of the application.

Application for Certification Rejected

International Brotherhood of Electrical Workers and Ottawa Electric Railway Company, Ottawa, Ontario (L.G., May, 1946, p. 607). Following investigation of the application and a public hearing, the Board decided to reject the application as the bargaining unit described in the application was inappropriate as it only covered a portion of the electrical craft employees affected.

**Applications for Certification Received
During the Month of July**

1. *Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division No. 591* on behalf of car operators, freight crew, car barn employees, trackmen and trolley linemen of the *Hull Electric Company, Hull, P.Q.*

2. *The Canadian Association of Maritime Transport Workers, Local No. 1, Incorporated* on behalf of certain employees of the *Lower St. Lawrence Transport Company Limited, Rimouski, P.Q.*

3. *Quebec Federation of Professional Employees in Applied Science and Research Unit No. 4*, on behalf of engineers and architects employed by the *Canadian Broadcasting Corporation, Montreal, P.Q.*

4. *Canadian Seamen's Union* on behalf of the Unlicensed Crew Members of the Tug "Point Ellice" operated by the *Pacific Great Eastern Railway Company, Vancouver, B.C.*

5. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of the *Keystone Transport Limited, Montreal, P.Q.*

6. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of the *Owen Sound Transportation Company Limited, Owen Sound, Ontario.*

7. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of the *North American Transports Limited, Montreal, P.Q.*

8. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of *Transit Tankers and Terminals Limited, Montreal, P.Q.*

9. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of *Hall Corporation of Canada, Montreal, P.Q.*

10. *Canadian Seamen's Union* on behalf of the unlicensed personnel employed on vessels of *Gulf and Lake Navigation Company Limited, Montreal, P.Q.*

11. *National Seamen's Association of Canada* on behalf of the unlicensed personnel employed on vessels of *Canada Steamship Lines, Limited, Montreal, P.Q.*

12. *International Longshoremen's and Warehousemen's Union, Local 501*, on behalf of scalers, washers, cleaners, etc., employed by *Empire Stevedoring Company Limited, Vancouver, B.C.*

13. *International Longshoremen's and Warehousemen's Union, Local 507*, on behalf of scalers, washers, cleaners, etc., employed by *Canadian Stevedoring Company Limited.*

14. *International Longshoremen's and Warehousemen's Union, Local 507*, on behalf of scalers, washers, cleaners, etc., employed by *Louis Wolfe and Sons, Vancouver, B.C.*

15. *National Seamen's Association of Canada* on behalf of unlicensed personnel employed by *Paterson Steamships Limited, Montreal, P.Q.*

16. *National Seamen's Association of Canada* on behalf of unlicensed personnel employed by *Colonial Steamship Company Limited, Port Colborne, Ont.*

17. *National Seamen's Association of Canada* on behalf of unlicensed personnel employed by *Sarnia Steamship Company, Limited, Port Colbourne, Ont.*

18. *Canadian Seamen's Union* on behalf of unlicensed personnel employed by *British Columbia Steamships Limited, Vancouver, B.C.*

19. *Canadian Flight Officers' Association* on behalf of flight radio officers employed by *Trans-Canada Airlines, Winnipeg, Man.*

20. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on vessels of *Lakes and St. Lawrence Navigation Company, Limited, Cardinal, Ont.*

21. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on vessels of *Powell Transports Limited, Winnipeg, Man.*

22. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on vessels of *Foote Transit Company, Limited, Toronto, Ont.*

23. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on vessels of *C. W. Cox, Limited, Port Arthur, Ont.*

24. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on vessels of *United Towing and Salvage Company Limited, Montreal, P.Q.*

25. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on vessels of the *Provincial Paper Company, Limited, Port Arthur, Ont.*

26. *The Order of Railroad Conductors* on behalf of road train conductors employed on the Western Lines of the *Canadian Pacific Railway Company, Montreal, P.Q.*

27. *Canadian Seamen's Union* on behalf of unlicensed personnel employed on the *M.V. Turret Cape* owned by *Saguenay Terminals, Limited, Montreal, P.Q.*

Decisions of Board in Appeal Cases

1. On July 10 the Board dismissed the appeal of *La France Textiles Limited, Woodstock, Ontario*, from a decision of the Ontario Labour Relations Board establishing a bargaining unit for certain employees of the Company.

The appellant Company desired that the maintenance men and firemen be included in the bargaining unit and that a new vote of the employees be taken.

The Board directed that the Ontario Board include the maintenance men but exclude the firemen in fixing the bargaining unit and

stated that as the evidence revealed that the United Textile Workers of America (AFL) had a greater majority of the employees eligible to vote in a vote conducted by the Ontario Board, no further vote was necessary.

2. Following a hearing, the Board dismissed the appeal of *Silverwood Dairies (Sarnia Branch), Sarnia, Ontario*, from a decision of the Ontario Labour Relations Board, determining a unit of milk sales drivers as appropriate for collective bargaining purposes.

The appellant Company desired that the inside plant employees be included in the unit, while the Union contended that the unit as established by the Ontario Board was appropriate.

The Board decided that under the circumstances, the decision of the Ontario Board in determining a unit of milk sales drivers would not be disturbed.

In two other appeal cases the Board issued Reasons for Judgment, the texts of which are given below:—

Between: Local No. 1, Industrial Union of Bakery and Confectionery Workers, Appellant, and Ben's Limited, Halifax, N.S., Respondent.

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Deschamps, Mosher, Picard and Taylor.

Reasons for Judgment

Leave to appeal having been granted by the Nova Scotia Labour Relations Board, this is an appeal from a decision of that Board.

On February 23, 1946, the Nova Scotia Board, upon application of the appellant, issued a certificate consenting to the prosecution of the respondent for the alleged offence *inter alia* of failure to negotiate in good faith with the certified bargaining representatives of its employees contrary to Section 10 (2) of the Wartime Labour Relations Regulations.

Following upon the issue of such consent, a prosecution was duly instituted by the appellant and came on for hearing before Provincial Magistrate J. L. Crowe.

In the course of such proceedings, the Magistrate referred to the Nova Scotia Board for its decision the question as to whether the said employer was negotiating in good faith with the certified bargaining representatives of its employees as required by Section 10 (2) of the Regulations. Upon such application, the Nova Scotia Board made the following decision:

It is the decision of this Board that having considered an application for leave to prosecute and having in the exercise of its discretion issued its consent to the institution of a prosecution for the above prosecu-

tion, this Board has no further duty or power in connection with the prosecution for the offence aforesaid now pending before the Magistrate and that the Magistrate should be advised accordingly.

Section 45 of the Regulations forbids the institution of a prosecution under the Regulations except by or with the consent of the Board. In the *Stokes Rubber Company Case (D.L.S. 7-601)*, this Board held that on such an application the Board is not required to pass on the merits of the case in anticipation of a decision of the Court in order to dispose of the application for leave to prosecute.

However, Section 25 (1) of the Regulations provides *inter alia*:

(1) If a question arises under these Regulations as to whether. . . .

(e) an employer, or certified bargaining representatives of employees, is negotiating in good faith; the Board shall decide the question and its decision shall be final and conclusive for all the purposes of these Regulations."

and Section 25 (2) of the Regulations provides:

(2) If a question set out in subsection one arises in any legal proceedings, the Justice or Justices of the Peace, Magistrate, Judge or Court before whom it arises shall, if the question has not been decided by the Board, refer the question to the Board and defer further proceedings until the Board's decision is received.

It is the evident intent of the Regulations, therefore, that with respect to the matters

enumerated in Section 25 (1) the Board shall, for the purposes of the Regulations, have exclusive jurisdiction to determine such questions and the provisions of Section 25 (1) to this effect are reinforced by Section 25 (2) which contains a direction to the Court before whom any such question arises in the course of legal proceedings before requiring the Court to refer such question to the Board for decision.

In the opinion of this Board, therefore, as the consent for leave to prosecute given by the Nova Scotia Board for the alleged offence did not constitute a disposition by that Board of the question as to whether the respondent had failed to negotiate in good faith with the certified bargaining representatives of its employees and as that Board did not purport to make a decision on that question in disposing of the application, it was the duty of and within the authority of the Nova Scotia Board in view of Section 25 (1) and (2) to make a decision on this question on reference by the Magistrate.

Order in Council P.C. 5001 of July 30, 1944, which provided for the establishment of the Nova Scotia Board and defined its jurisdiction with respect to the administration of the War-time Labour Relations Regulations provided by Section 6 thereof that any employer, employee, employers' organization, trade union, or employees' organization interested in or affected by any decision or order of the Provincial Board made pursuant to the Regulations may appeal to the National Board by leave of either the National Board or Provincial Board and that on any such appeal, the National Board may dismiss the appeal or may make the decision or order which, in

its opinion, the Provincial Board should have made.

The evidence given before the Nova Scotia Board at the hearing on the application for leave to prosecute established that the certified bargaining representatives of the employees had forwarded to the respondent company a draft of a collective agreement between the company and such bargaining representatives for its employees as a basis for negotiation with a view to the completion of a collective agreement, and followed the submission of this agreement with notices to the company both written and verbal to negotiate with them for such purpose. The respondent company ignored such notices and made no attempt to enter into any negotiations with the bargaining representatives for the purposes of completing a collective agreement in spite of the efforts of the latter to arrange a meeting for this purpose. In view of these facts concerning which there was no dispute, this Board finds that the respondent company failed to negotiate in good faith with the bargaining representatives of its employees certified under the Regulations by the Nova Scotia Board as required by Section 10 (2) of the Regulations in the period between the 6th day of February, 1946, and the 18th day of March, 1946. A reply to this effect will be transmitted to the Magistrate accordingly.

The appeal is allowed in accordance with the foregoing.

(Sgd.) A. H. BROWN,
Vice-Chairman
for the Board.

EUGENE FORSEY, Esq., Ph.D., for Appellant.
E. T. PARKER, Esq., K.C., for Respondent.
Dated at Ottawa, July 9, 1946.

Between: Local 882, International Union of Operating Engineers, Appellant (Applicant), and Local 1-85, International Woodworkers of America, Respondent (Intervener), and Alberni Pacific Lumber Co., Port Alberni, B.C., Alberni Plywoods Ltd., Port Alberni, B.C., Bloedel Stewart & Welch Ltd., Port Alberni, B.C., Bloedel, Stewart & Welch Ltd., Great Central Lake, B.C., Respondents.

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Deschamps, Mosher, Picard and Taylor.

Reasons for Judgment

This is an appeal from four decisions of the Minister of Labour for British Columbia rejecting applications for certification of bargaining representatives made by the appellant union under the provisions of Order in Council P.C. 1003. In each case the appellant union has applied for certification of bargaining representatives for the steam

and power plant engineers employed in the sawmill operations of the Company. In each case the application was rejected on the ground that the bargaining unit was inappropriate.

The appellant submits that the group of employees comprising the proposed bargaining unit is a group comprising a craft in accordance with well-established trade union practice and, as such, is entitled to recognition as an appropriate bargaining unit in view of the provisions of Sections 5 (4) of the Regulations.

On the other hand, the respondent union, in opposing the application, submits that it has been and is presently the certified bargaining representative for all employees in each employer's establishment and that it has been the bargaining agency for all organized groups of employees in the woods industry in British Columbia for a long period of time. It urges that in view of these circumstances, recognition should not be given to the craft group which the appellant has organized and seeks recognition for as a separate bargaining unit in each employer's establishment.

The Board is of the opinion that the craft group for which recognition is sought is one which is entitled to recognition as an appropriate bargaining group in view of the provisions of Section 5 (4) of the Regulations. While it may be true that this group was not previously organized for collective bargaining purposes in these employers' establishments

or in the woods industry in British Columbia, similar groups have been organized and accorded bargaining rights in the woods industry in Eastern Canada and in numerous other industries in Canada.

The appeal is allowed but in the case of each application a vote is ordered of the steam and power plant engineers employed by the Company to determine whether they wish to be represented by the appellant union for collective bargaining purposes. The vote will be taken under the direction of the Chief Executive Officer.

(Sgd.) A. H. BROWN,
Vice-Chairman for the Board.

JOHN WEDGE, ESQ., *for Appellant (Applicant).*
NORMAN DOWD, ESQ., *for Respondent (Intervener).*

Dated at Ottawa, July 9, 1946.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

The Wartime Labour Relations Regulations provide conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During July, 1946, Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Beach Foundry Limited, Ottawa, Ontario, and Local No. 641, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.). F. J. Ainsborough, Conciliation Officer.

Beardmore and Company Limited, Acton, Ontario, and Local No. 26, National Union of Shoe and Leather Workers (C.C.L.). G. Fenwick, Conciliation Officer.

Bishopric and Natural Sodium Products Limited, Bishopric, Saskatchewan, and Sodium Sulphate Workers' Union. H. S. Johnstone, Conciliation Officer.

Canadian Association of Master Painters and Decorators, (Hamilton Chapter), Hamilton, Ontario, and Local No. 205, Brotherhood of Painters, Decorators and Paperhangers of America (A.F.L.-T.L.C.). H. Perkins, Conciliation Officer.

Canadian Industries Limited (Copper Cliff Plant), Copper Cliff, Ontario, and Local No. 598, International Union of Mine, Mill and Smelter Workers (C.I.O.-C.C.L.). H. Perkins, Conciliation Officer.

W. C. Edwards Company Limited, Ottawa, Ontario, and Local No. 6, National Union of Woodworkers (C.C.L.). F. J. Ainsborough, Conciliation Officer.

Greater Winnipeg Taxicab Owners' Association, Moore's Taxi and Subsidiaries and Taxicab Drivers' Unit, One Big Union. T. J. Williams, Conciliation Officer.

Jewel Consolidated Limited, Winnipeg, Manitoba, and Local No. 832, Retail Clerks' International Protective Association. T. J. Williams, Conciliation Officer.

Levy Electric Company, Winnipeg, Manitoba, and Electrical Workers' and Inside Wire-

men's Unit of One Big Union. T. J. Williams, Conciliation Officer.

A. E. McKenzie Company Limited, Brandon, Manitoba, and Local No. 1, Canadian Bakery Workers' Union (C.C.L.). Thos. Williams, Conciliation Officer.

McMullen-Perkins Limited, Ottawa, Ontario, and Local No. 641, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.). F. J. Ainsborough, Conciliation Officer.

Mercury Mills Limited (Maitland Spinning Mills), Listowel, Ontario, and Local No. 724, Textile Workers Union of America (C.I.O.-C.C.L.). William Dunn, Conciliation Officer.

Port Arthur Shipbuilding Company Limited, Port Arthur, Ontario, and six Unions: Local No. 628, United Association of Plumbers and Steamfitters of the United States and Canada; Local No. 553, Hotel and Restaurant Employees International Alliance; Local No. 865, International Union of Operating Engineers; Local No. 1365, United Brotherhood of Painters, Decorators and Paperhangers of America; Local No. 850, United Brotherhood of Carpenters and Joiners of America; and Local No. 607, International Brotherhood of Blacksmiths, Drop Forgers and Helpers (A.F.L.-T.L.C.). G. Fenwick, Conciliation Officer.

Agreements Facilitated by Conciliation Officers

In the following cases, reports were received from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:

City Chevrolet Sales Company Limited, Hamilton, Ontario, and Lodge No. 1258, International Association of Machinists. William Dunn, Conciliation Officer.

Eldorado Mining and Refining (1944) Limited and Port Hope Refinery Workers Union (C.C.L.). H. Perkins, Conciliation Officer.

Greater Winnipeg Taxicab Owners' Association, Moore's Taxi and Subsidiaries and Taxicab Drivers' Unit, One Big Union. T. J. Williams, Conciliation Officer.

John Inglis Company Limited, Toronto, Ontario, and Local No. 2900, U.S.A. (C.I.O.-C.C.L.). F. J. Ainsborough, Conciliation Officer.

Levy Electric Company, Winnipeg, Manitoba, and Electrical Workers' and Inside Wiremen's Unit of One Big Union. T. J. Williams, Conciliation Officer.

Port Arthur Shipbuilding Company Limited, Port Arthur, Ontario, and six Unions. Local No. 628, United Association of Plumbers and Steamfitters of the United States and Canada;

Local No. 553, Hotel and Restaurant Employees International Alliance; Local No. 865, International Union of Operating Engineers; Local No. 1365, United Brotherhood of Painters, Decorators and Paperhangers of America; Local No. 850, United Brotherhood of Carpenters and Joiners of America; and Local No. 607, International Brotherhood of Blacksmiths, Drop Forgers and Helpers (A.F.L.-T.L.C.). G. Fenwick, Conciliation Officer.

Silverwoods Dairies Limited, Hamilton, Ontario, and Local No. 422, United Dairy and Creamery Workers (C.C.L.). H. Perkins, Conciliation Officer.

Boards Established

During the month, Boards of Conciliation were established but not fully constituted as follows:

Canadian National Railways and Canadian Brotherhood of Railway Employees (Clerks and Other Classes of Employees, Regional Auditors' and Treasurers' Offices Cartage Services Department).

Ottawa Car and Aircraft Limited, Ottawa, Ontario, and Local 641, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.).

Snyder's Limited, Waterloo, Ontario, and Local 13, National Union of Aircraft, Furniture Workers and Allied Crafts (C.C.L.).

Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:

Gibson Brothers (Rock Realty Investments Limited), Toronto, Ontario. The Board of Conciliation established to deal with a dispute between Gibson Brothers (Rock Realty Investments Limited), Toronto, Ontario, and Local No. 204, Building Service Employees International Union (A.F. of L.-T.L.C.), was fully constituted on July 31, 1946, with the appointment of Mag. S. Tupper Bigelow, Toronto, Ontario, as Chairman of the Board on the joint recommendation of the other two members of the Board. Mr. W. W. Gunn, Toronto, Ontario, and Mr. C. C. Woollon, Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

Lamaque Mining Company Limited, Bourlamaque, Quebec. The Board of Conciliation established to deal with a dispute between Lamaque Mining Company Limited, Bourlamaque, Quebec, and Local No. 654, Val D'Or Mine and Mill Workers—International Union, Mine, Mill and Smelter Workers (C.I.O.-

C.C.L.), was fully constituted on July 13, 1946, with the appointment of Mr. R. T. Ferguson, Montreal, Quebec, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. A. Harris, Kirkland Lake, Ontario, and Mr. G. M. Desaulniers, Montreal, Quebec, were appointed on the recommendation of the employer and employees respectively.

Noranda Mines Limited, Noranda, Quebec. The Board of Conciliation established to deal with a dispute between Noranda Mines Limited, Noranda, Quebec, and Local No. 688, International Union of Mine, Mill and Smelter Workers (C.I.O.-C.C.L.), was fully constituted on 30 July, 1946, with the appointment of His Honour Judge C. E. Guerin, Montreal, Quebec, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr.

T. R. Ker, K.C., Montreal, Quebec, and Mr. G. M. Desaulniers, Montreal, Quebec, were appointed on the recommendation of the employer and employees respectively.

Wilson Motor Bodies Company Limited, Long Branch, Ontario. The Board of Conciliation established to deal with a dispute between Wilson Motor Bodies Company Limited, Long Branch, Ontario, and Local No. 252, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.), was fully constituted on 10 July, 1946, with the appointment of His Honour Judge A. Cochrane, Brampton, Ontario, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. G. Sparrow, Toronto, Ontario, and Mr. N. Levy, Toronto, Ontario, were appointed on the recommendation of the employer and employees respectively.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during July:—

Report of Board in Dispute between Kirkland Lake Gold Mining Co., Ltd., Kirkland Lake, Ont., and Local 240, International Union of Mine, Mill and Smelter Workers.

On June 29 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Kirkland Lake Gold Mining Co., Ltd., Kirkland Lake, Ont., and Local 240, International Union of Mine, Mill and Smelter Workers.

The Board was under the Chairmanship of Mr. J. H. Stitt, Ottawa, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Col. J. F. C. Thompson, Ottawa, and Mr. Drummond Wren, Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To: Honourable HUMPHREY MITCHELL,
Dept. of Labour,
Ottawa, Ont.

SIR:

Your Board of Conciliation in the above matter journeyed to Kirkland Lake, Ontario, and held meetings with the representatives of the above Company and Union on Wednesday, June 12 and Thursday, June 13, 1946.

The Company was represented by:—

W. S. Walton, K.C., Counsel of Toronto, Ont.

V. H. Emery, Vice-President and Managing Director of Kirkland Lake Gold Mining Co. Ltd.

George Dunn, Manager of Mine.

Alex Harris, Member of Company's Negotiating Committee.

The Union was represented by:—

Thomas McGuire, International Representative.

Michael Uhrym, Member of Union Negotiating Committee.

Stoel Bentley, President, Local 240.

Cliff Olson, Member of Union Negotiating Committee.

At the first meeting there was little evidence of conciliation. The Company wanted the meeting held in camera and counsel for the Company argued it was illegal to hold them in public. To this motion the Union objected and the Board adjourned to consider its procedure.

At resumption the chairman overruled the contention of the Company's Counsel and

the meetings were held in public. The meetings proceeded thereafter in a most orderly manner and on the second day there was a very large measure of agreement between the Union and the Company.

The one matter on which there was no measure of agreement was that of union security. The Company was unalterably opposed to any form of check-off for the following reasons:—

1. Because it would lead finally to the "closed shop".
2. It was not in the interest of industrial peace and therefore meant insecurity for the Public, for Industry and for Employees.
3. Wartime Labour Relations Regulations P.C. 1003 do not contemplate the bolstering up of either party to bargain collectively and support for either was prohibited by Section 19.
4. The demand for Union security removed the right of free association, created a monopoly, thus destroying free enterprise and lessening the freedom of the individual. In the end this would place "in the hands of Union Leaders the control of the destiny of all citizens."
5. Financial relations should not be established between the employer and the union such as check-off thus compelling the unwilling employee to contribute Union funds. This makes the worker a mere pawn of the Union and the Union should make its own collections and stand on its own feet.
6. The Company at present makes deductions for the following:—
 - (a) Medical and Hospital Aid Plan
 - (b) Sickness and Accident Benefit Plan
 - (c) Athletic Association
 - (d) Victory Bonds and War Savings Certificates
 - (e) Items from Stores.

None of these, however, were arbitrary in their nature, the individual could name his doctor in (a) he may withdraw from (b) also from (c) in the case of (d) it was a patriotic duty done at the Government's request and in (e) stores were obtained by employees at net cost to the Company.

7. Attention was drawn to the fact that within the past ten months three collective bargaining agreements were entered into with mining Companies in the immediate district and not one of them contained a check-off clause.

It was noted by the Board that what the Union requested was an irrevocable check-off

where authorized by members of the Union in writing. This to be in amounts of \$1 per month to be confined only to members of the Union so authorizing and did not ask for all employees to come under the check-off. This, Mr. McGuire hoped, would meet the Company's objection to the "closed shop". Of 220 men concerned authorization was presented in writing of 184 to exercise the check-off and it was claimed they represented over 90 per cent of the men underground. However, the Company and the Union could come to no agreement on this matter.

At the final meeting with the Board the existing agreement was gone through, clause by clause, and all items were agreed to with amendments acceptable to both parties excepting the following clauses which were left with the Board:—

Clause 10—Temporary Employees

Clause 12—Overtime

Clause 15—Wages with respect only to double time for holidays and off-shift differentials

Clause 16—Vacation with pay.

With regard to Clause 10, the Company desired the period of temporary employment to remain as it was at six months. The Board considers that a temporary period of four months should be sufficient in ordinary circumstances.

In Clause 12, Overtime, the Union asked for Overtime pay of time and a half after eight hours of work in any one day and after forty hours of work in any one week and the Company desired the clause to stand as in the present agreement.

The Board recommends that overtime pay of time and a half be granted for time worked over eight hours each work day providing the employee is at work on the succeeding work day unless prevented therefrom by accident or illness, or conditions existing in the home justifying absence.

The Board further considers that overtime pay of time and one-half be granted after 45 hours have been worked in each working week, that is for time worked on any day but Saturday in excess of eight (8) hours and for time worked on Saturday in excess of five (5) hours.

In Clause 15, Wages, that is with respect to double time for Statutory holidays and pay differentials for off-shifts. In the case of the former the Board presided over by Mr. Justice Roach in the case of The International Nickel Company Ltd. and Local 598 effected an agreement whereby time and one-half for work performed on Good Friday, Dominion Day, Labour Day and Thanks-

giving Day and for work done on Christmas and New Year's Day, double time is to be paid, and this Board recommends similar action in this case. It is to be noted that the Union asked for double time for all such days actually worked.

In regard to pay differentials for off-time shifts, the Union asked for ten (10) cents an hour additional pay for the night shift from 11 p.m. to 7 a.m. and for five (5) cents additional per hour during the afternoon shift from 3 p.m. to 11 p.m. This Board recommends five (5) cents extra per hour for the former and three (3) cents extra per hour for the latter.

In Clause 16, Vacation with pay. This Board recommends that any employee who has one year's continuous employment with the Company shall be entitled to one week's vacation with pay and where the employee has five years continuous employment he should be entitled to two weeks vacation with pay as in the agreement made by the International Nickel Co. Ltd. An employee's one week's vacation pay should be an amount equal to 2 per cent of his annual earnings and two week's vacation pay should be equal to 4 per cent thereof.

With regard to check-off deduction we recommend that an irrevocable check-off amounting to \$1 per month be deducted from the pay of every workman so authorizing the same in writing. This is all the Union asked and is much less than the award given by Mr. Justice Rand in the case of the Ford Motor Car Company and is less than what was agreed to by the International Nickel Company and the bargaining union as in such case the check-off extended to all their workmen.

We commend the spirit evidenced by the Company and the Representatives of the Union in the conciliation proceedings and the Board trusts that an agreement may be speedily reached.

Dated at Ottawa on this 26th day of June, A.D. 1946.

(Sgd.) J. H. STITT,
Chairman of Board.

(Sgd.) DRUMMOND WREN,
Board Member.

Minority Report

The Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir—

I have concurred in the report made to you in this matter by the Chairman, Mr. J. H. Stitt. However, I am of the opinion that

while we have agreed double time is to be paid for time worked on Christmas Day and on New Year's Day, that there should also be provision for payment at straight time for both of these Statutory Holidays when no work is performed on them. In order to avoid lessening the pay of industrial workers because of cessation of work owing to Statutory Holidays, and in order that these workers may enjoy payment for these holidays when not worked, treating them on a par with non-productive and supervisory staff, and as it is becoming more and more a practice for enlightened employers to make such payment, in fact many employers are paying for all Statutory Holidays, I would recommend that such a provision be included in the agreement between the parties in this case mentioned above.

Yours very truly,
(Sgd.) DRUMMOND WREN,
Board Member.

Minority Report

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:

I have read the majority report of this Board as prepared by Chairman, J. Stitt and Union Representative, Mr. Drummond Wren and wish to state that I fail to agree with any of their recommendations and some of the statements made.

As concisely as possible, there are set out herein my objections and conclusions.

First, may I say that I was greatly impressed by the spirit of cooperation shown throughout the Hearings by the Company and Union, as evidenced by their Brief and Evidence respectively and by the ready acquiescence of the Company to the suggestions of the Board. There was initially an objection on the part of the Company to the Hearings of the Board being held in public because of unfortunate incidents which it was stated had previously occurred in Kirkland Lake before a Board of Conciliation. Once the Chairman ruled the Hearings would be made in public, they proceeded without incident.

There had been no agreement on any clause of the proposed agreement prior to the sittings of the Board. At the suggestion of this Board, the Company and the Union were able to agree on the greater proportion of the clauses. The Company made many concessions and exhibited an earnest desire to arrive at a mutually satisfactory complete agreement. I, therefore, take exception to the majority statement that there was little evidence of conciliation.

It was the Company's contention in their Brief before the Board that check-off alone was the stumbling block in the way of a complete agreement. The trend of events appears to support this contention, as, with the exception of one clause respecting temporary employees, the only items now in dispute are matters affecting compensation of employees and the check-off. These items are set out specifically in the Majority Report.

CLAUSE 10—TEMPORARY EMPLOYEES

I would recommend the clause in the existing agreement which provides for a probationary period of six months. This is much more satisfactory from the viewpoint of the new employee as it is from the Company's standpoint. As I understand it, there is no evidence of any hardship under the clause which has been in effect during the past seventeen months.

CHECK-OFF—DEDUCTION OF UNION DUES

The Union requests that the Company recognize authorizations signed by employees for deduction from their pay cheques, monthly Union dues, initiations and re-instatements, and remit the amount to the Union; such authority to be irrevocable.

The Company in its Brief advanced arguments against any form of check-off. My considered opinion, on the basis of conditions as they exist in the field of industrial relations to-day, is that the reasons of the Company are well-founded. Industrial peace I am convinced will not come by the indiscriminate granting of check-off and other so-called "Union security" clauses. Summed up, the reasons against the check-off submitted by the Company were as follows:

- (1) Innocuous as the mildest form of check-off might appear to be, it is the beginning of demands for successive forms of so-called "Union Security" clauses with a view to reaching the ultimate goal of unions—the Closed Shop.
- (2) Unions possessing the best "security" clauses have been responsible for major strikes in industry. Insecurity for employees, industry and the public and not industrial peace has come from creating a monopoly for Unions by establishing "Union Security" clauses.
- (3) Order in Council P.C. 1003, Wartime Labour Relations Regulations, does not contemplate the necessity for bolstering the position of one of the parties by the other party to enable it to carry out the agreement and confers no obligation on the Union or the Company to agree to any proposal which

would render a measure of support to either party, and support is prohibited by Section 19.

- (4) The right of free association of employees is removed through the creation of a monopoly. Any monopoly, whether held by Unions or by industrial concerns, destroys free enterprise and removes individual liberty. Freedom should be retained by the individual to change his Union or his job. Successive demands for "Union Security" clauses in the process of collective bargaining would ultimately result in creating a monopoly and placing in the hands of a few Union leaders the control of the destiny of all citizens.
- (5) It is a fundamental error to establish financial relations between an employer and a Union, as happens when a check-off is permitted. The employee who is compelled to pay into a Union whether he so desires or not becomes a mere pawn in the Union plan over which he has little or no control. Compulsion in any form is thoroughly obnoxious. The Union should stand on its own feet and attend to its own collections.
- (6) Attention was drawn to the fact that within the past ten months this Union entered into three collective bargaining agreements with Mining Companies in the immediate vicinity of the Company's property and these agreements do not contain a check-off clause.

I subscribe fully to the reasons advanced by the Company as summarized herein, and must therefore go on record as being opposed to the granting of any form of check-off in this case.

ADDITIONAL COMPENSATION OF EMPLOYEES

Under this heading are the following items in dispute:—

1. General wage adjustments.
2. Overtime and holidays.
3. Shift premiums.
4. Vacation with pay.
5. Sick Leave pay.
6. Severance pay.
7. Guaranteed annual work.

As all these items represent increased compensation I shall first deal with them collectively. Notwithstanding the fact that this Board has the right to bring in recommendations with respect to certain of these items, I feel that the general question of additional compensation is one with which the Board in the circumstances is not competent to deal, particularly as some of the items are definitely outside the scope of the

Board's powers. The spokesman for the Union spent the greater part of one session demanding increased wages and he was not interrupted by the Chairman or Mr. Wren. I have been subsequently informed by these Members that this question is beyond the jurisdiction of the Board. Nevertheless, I feel it is incumbent upon me to refer to it.

The Company's product is gold, which must be sold to the Dominion Government at a fixed price. In this respect the situation differs entirely from that quoted in the Majority Report and covered in the recent report of a board in the case of a base metal mine. The producers of base metal, as well as manufacturing industries generally are in a position to pass along any increase in costs to the buyers of their products. This Company and all gold mines are unable to do this. The Company's costs of operation have been steadily increasing. The per ton milled cost in 1940 before income tax was \$7.29 and the Company estimates the cost for the first six months of 1946 will be \$9.68, an increase of \$2.39 per ton, or approximately one-third. The average annual earnings of the Company's wage earning employees (excluding salaried employees) increased from \$1,823 in 1939 to \$2,194 in 1945. During the first half of 1946 the Company estimates it will mill 46,973 tons, recovering an average of \$11.58 per ton and producing \$543,978. Compare this with 1940 when the Company milled 137,986 tons, recovering an average of \$14.87 per ton and produced \$2,051,789. In other words the Company's production has fallen off about one-half and the average grade is lower by \$3.29 per ton.

I cannot in addition do better than attach hereto a copy of the Company's Supplementary Statement filed with their Brief and dealing with the entire question of increased compensation of employees. I would also refer you to the recent Brief of the Ontario Mining Association, which was presented to the Committee on Natural Resources and which is included in the Proceedings of the Senate. At the time of the presentation of this Brief the Committee remarked that the lot of the gold mine operator was not a happy one.

The Union's requests in this connection are now dealt with individually as follows:—

1. GENERAL WAGE ADJUSTMENTS

The Union asks that a minimum rate of \$1.10 per hour for machine runners be established and corresponding increases for all other classifications, and that the Company agree to negotiate bonus incentive or contract rates with the Union.

This is a matter for submission to the National War Labour Board. As stated, I am of the opinion that this Board of Conciliation lacks jurisdiction and this opinion was confirmed by the other Members on the Board, but I might observe that for the reasons set out in the Company's brief, it is my feeling an increase is unjustifiable now. This observation applies equally to any increased financial obligations directly or indirectly affecting the Company.

2. OVERTIME AND HOLIDAYS

The Union asks time and one-half for work in excess of eight hours per day; also in excess of forty hours per week; and full pay for New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day if not worked and double time if worked.

The Company pays time and one-half for work in excess of forty-eight hours per week, so that if an employee works throughout the week, he secures the premium for all hours worked in excess of forty-eight. This is the general practice in the gold mines of the district and I understand, in Ontario.

In regard to Statutory Holidays, the Company pays time and one-half for two holidays when worked, although this is not covered in the agreement with the Union. I find it is the general practice in the gold mines in the District to pay for three holidays at time and one-half if worked and I would therefore recommend that the Company pay time and one-half for any work performed on New Year's Day, Christmas Day and Dominion Day. I would, however, recommend no change in the present method of computing overtime over forty-eight hours per week.

3. SHIFT PREMIUMS

The Union asks a premium of five cents per hour for the second shift and ten cents per hour for the third shift. The Union also asked premium of seven and one-half cents per hour in the second of a two-shift operation, but this was abandoned as inapplicable.

Shift premiums as such have never been paid by the Gold Mines, it being considered that the wage rates include compensation for changing shifts. The shifts rotate each week and it is stated by the Company that some men prefer the afternoon shift steadily. I cannot recommend any change in the present method of compensation.

4. VACATION WITH PAY

The Union asks for one week, after one year and two weeks, after two years.

This Company in conformity with the general practice in the district is prepared to continue the present arrangement whereby every employee with seniority of one year or more is entitled to vacation of one week. This is in accordance with the Provincial Regulations entitling an employee to such a vacation after service of one year.

For the reasons respecting additional compensation, previously mentioned, I would recommend no change in this connection.

5. Sick Leave Pay
6. Severance Pay
7. Guaranteed Annual Work

In regard to the above items, it was stated before the Board by the Union spokesman that they were not pressing for these benefits. These items are not specifically named in the Majority Report, but as they were brought before the Board, I am dealing with them herein.

These matters involve additional compensation and an additional financial burden on

the Company and my remarks relating to increased costs apply equally to the above items.

As stated the seven items which I have dealt with under the heading of Additional Compensation of Employees must be treated together, as they all mean increased costs. The Company has been struggling to get back to normal and it should not be called upon to pay increased compensation under existing circumstances. The employees have enjoyed a high wage, high average earnings and steady employment. There is no comparison between the employees of this mine and workers in industries where the operation is seasonal.

All of which is respectfully submitted.

Yours truly,

(Sgd.) JOHN THOMPSON,

Board Member.

Ottawa, Canada,
June 26, 1946.

Report of Board in Dispute between Perfect Circle Co., Ltd., Leaside, Ont., and Local 2729, United Steelworkers of America

On July 6 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Perfect Circle Co., Ltd., Leaside, Ont., and Local 2729, United Steelworkers of America.

The Board was under the chairmanship of Mr. F. J. MacRae, Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. E. Macaulay Dillon, and E. B. Jolliffe, both of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable HUMPHREY MITCHELL,
Confederation Building,
Ottawa, Ontario.

The Board of Conciliation appointed by you, consisting of Mr. E. B. Jolliffe, K.C., the nominee of the employees, Mr. E. Macaulay Dillon, K.C., the nominee of the employer, and Mr. F. J. MacRae, K.C., as Chairman, has had a total of twelve meetings of which seven were attended by the parties and five were meetings of the Board only.

The company was represented by Mr. J. C. Adams, K.C., Mr. S. T. Garside, Mr. C. E. McTavish, Vice-President and General Manager, and Mr. L. Kay, Production Manager. Those present for Local 2729 of the United Steelworkers of America were Mr. Howard Conquergood, International Representative,

Mr. Mitchell, Mr. John Malone, President of the Local Union, Mr. Robert Campbell, Vice-President of the Local Union, and three other members of the negotiating committee.

From the letter of Mr. George L. Fenwick, Conciliation Officer, to you dated August 10, 1945, it would appear that the main difference between the parties centered around the matters of maintenance of membership and check-off, but as the hearings progressed many other details were discussed before the Board. However, the Board was successful in reducing the number of points of disagreement and the matter of relationship and voluntary check-off has been settled between the parties.

A report was submitted in which the majority of the Board declined to make recommendations about the remaining points of disagreement on the ground that the parties themselves could more easily agree without the assistance of any recommendations.

The Director of Industrial Relations of the Federal Department of Labour, by letter dated the 26th of March, 1946, to the Chairman of the Board, took the position that "Sec. 13, ss. 2, P.C. 1003, imposes upon a Conciliation Board the responsibility of reporting its findings and recommendations in the event that agreement by the parties is not reached." He accordingly directed the Chairman to reconvene the Board for the purpose of submitting findings and recommendations. This was done and the Board had two meetings with the parties.

1. GRIEVANCE PROCEDURE

The Union suggests five steps in the Grievance Procedure and the Company wants only four on the ground that the Union's proposal would unduly prolong the final disposition of a grievance. It is recommended by the Board that a definite time of fifteen days be fixed between the preliminary step and the first step of the Grievance Procedure in order to avoid undue delay when grievances arise. This Board further recommends that the decision referred to under Step 3 be given in writing at a meeting called under the provisions of Step 3. Both parties agreed to this.

If the matter of grievances cannot be satisfactorily settled within the three steps of the Grievance Procedure, the matter may then be submitted to a Board of Arbitration. If the grievance concerns a matter other than the discharge of an employee, request for arbitration shall be made in writing within ten full working days after the grievance has been dealt with in Step 3.

If the grievance concerns the discharge of an employee, request for arbitration must be made in writing within ten full working days after the grievance has been dealt with in Step 3. These time limits of ten days may be extended by mutual agreement between the company and the Union Grievance Committee. The parties agreed to the principles of this paragraph but the time limits are the Board's.

2. DISCHARGE CASES

After hearing considerable discussion with regard to the discharge of probationary employees, the Board makes the following recommendations: That the Company shall have the right to dismiss an employee within thirty days from the date he or she first comes to work for the Company provided that such employee shall have the right within three full working days to take the matter of his or her dismissal up with the Production Manager and be accompanied, if he or she so desires, by two of his or her fellow employees who may take part in the discussion. The parties agreed to these provisions.

The Board also recommends that where a regular employee claims he has been unjustly discharged from his employment, he shall have the right to invoke the Grievance Procedure commencing with Step 3, providing a written statement of such grievance is lodged with the Production Manager within five full working days after the employee ceases to work for the Company. There was no agreement on this clause by the Union who desired no time limit. The Company recommended a time limit of three days and the Board recommends a five-day limit.

3. VACANCIES

The Board recommends that promotions to vacancies and new positions, not including the rank of foreman, shall be according to employees' seniority standing, ability and proficiency to perform the work, but where ability and proficiency are equal, seniority shall be the determining factor. All vacancies should be posted on the Bulletin Board for at least twenty-four hours.

It is further recommended that a delegated representative of the Union meet in an advisory capacity with the company in selecting employees for posted vacancies.

4. REDUCTION IN WORKING HOURS

The parties were practically in agreement with regard to the formula to be used in reduction of working hours. The Board recommends that it be made clear in the agreement that the Company will not resort to the reduction of hours and/or the working force unless it is deemed necessary as a result of declining volume of business; and further that the Company, before any lay-off of any regular employees, must first reduce hours of work to not less than thirty-five per week in the manufacturing, inspection, and cartoning, tool room, maintenance production stores and time-keeping departments and no new employees shall be hired until standard hours are restored. This was agreed to by both parties.

5. ARMED SERVICES SENIORITY

This Board recommends that the Company consider favourably the application of veterans for employment in their plant and to assist in their re-establishment in civil life. The Board is unable to recommend the adoption of the super-seniority clause as applied to veterans.

6. REGULAR HOURS AND REGULAR WORK WEEK

This Board recommends the continuation of the regular work week of forty-five hours; that the regular hours and the number of days per week may be varied by the Company as is necessary in the shipping, receiving, building maintenance, tool room and maintenance departments; and that the company, before any change is made in the hours of work in the manufacturing, inspection and cartoning, production stores, time-keeping and garage departments, will give the Union five days' notice of any change contemplated; and the Union representatives will have the right to discuss the contemplated change of hours with the Production Manager.

7. EXTRA PAY AND OVERTIME

This Board recommends that, in case of an emergency, and then only with the consent of the employee or employees affected, the

employees may be required under the agreement to perform overtime work in excess of their regular hours but in any event not more than twelve hours shall be worked in any one shift. This Board is unable to recommend any change from the present practice of one and one-half times regular pay for all overtime work. This Board recommends that overtime be discouraged by the company as much as possible. These two recommendations are made, although not within our jurisdiction, in the hope that they will contribute to a final settlement.

8. VACATION WITH PAY

The Board recommends that the company's Vacation Plan, as submitted to the Union and this Board, be adopted and implemented, if necessary, by the provisions of Hours of Work and Vacation With Pay Act (Ontario), as amended.

With regard to the recommendations of the Board, where it is stated that both parties agreed thereto, Mr. Conquergood, the Union representative before the Board, agreed to submit these recommendations to the workers and advise the Board of their decision. Mr. Conquergood took the position at the last two hearings of the Board that, while he had no serious objections to them, he felt bound to consult the workers and agreed to do so and report to the Board. No official report has been received on these matters from Mr. Conquergood, although a written request was sent to him on the 2nd of May, 1946, which, it should be noted, was weeks after the final hearing held on the 10th of April, 1946.

The Board therefore feels that there is every reasonable prospect that both parties will agree to the foregoing recommendations.

Dated at Toronto this 22nd day of May, 1946.

(Sgd.) F. J. MACRAE,
Chairman.

(Sgd.) E. MACAULAY DILLON.

Minority Report

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

Sir,—The parties to this dispute succeeded in arriving at collective bargaining agreements in 1943 and again in 1944. Negotiations for the third agreement were commenced in April, 1945. During the year which followed the parties agreed upon most clauses of a new agreement and even came to an understanding upon the important issue of union security. However, notwithstanding the efforts of a conciliation officer and of this Board, there remain at least eight issues upon which the

parties appear unable to agree. In these circumstances, so many obstacles to agreement having been surmounted, my opinion is that the Board has an obligation to give not only a summary of the facts but also an explanation for the present breakdown of a collective bargaining relationship which has existed since 1943. In the absence of an explanation the report of the Board can be neither constructive nor intelligible.

I am, of course, aware that recommendations of the Board cannot be enforced, as I am also aware that in this case one of the parties, the Local Union, volunteered to accept the findings of the Board if the other party, the Company, would undertake to do the same, a commitment the Company declined to make.

I agree with my colleagues that the outstanding differences between the parties could and indeed ought to be resolved by the normal processes of collective bargaining, as they were when two previous agreements between the parties were successfully negotiated. The inescapable question arises—and it is a question affecting the public interest—as to why there should be failure now where previously there was success.

Conciliation proceedings before the Board commenced with some disputation on a highly contentious issue—that of union security. Instead of insisting upon a finding by the Board, the Local Union reluctantly abandoned its original demand for a Union Shop and even withdrew its plea for a maintenance-of-membership clause, (which already exists in the Perfect Circle Company's contract with its American employees, represented by the United Steelworkers of America, at Tipton, Indiana), expressing the hope that an understanding could be reached on some form of check-off. Subsequently it was reported to the Board that the parties had agreed on a form of voluntary revocable check-off, which is a modest degree of union security, very much less than what was sought by the Local Union, and indeed much less than what is frequently recommended in these times by conciliators and arbitrators. If, upon such a contentious matter, the Union could make such substantial concessions for the sake of reaching agreement, it is obvious that agreement could also be reached upon less difficult questions, if both parties had the will to do so, and it is equally obvious that the Local Union cannot be expected to make all the concessions or sacrifices or to surrender rights won in previous years in order to reach an agreement.

While I am satisfied that some of the outstanding differences did not seriously divide the parties so long as negotiations were conducted directly between the Union and the

management of the Company, they have been put in issue before the Board, and it becomes necessary to state my conclusions upon the merits of such matters.

I am bound to point out that the parties themselves reached agreement on three of the outstanding differences prior to the appearance of the Central Ontario Industrial Relations Institute to represent the Company before the Board. These three were: Grievance Procedure, Discharge Cases, and Reduction in Working Force.

I must further point out that in all but two of the outstanding differences, the Company, as represented by the Central Ontario Industrial Relations Institute is seeking to withdraw or curtail rights which were expressly granted to the employees by the parties on April 28, 1944. What the Institute has proposed is a whole series of new departures, all at the expense of the employees, none of which were suggested by management in earlier negotiations.

I shall now report upon the outstanding differences seriatim:

1. GRIEVANCE PROCEDURE:

The previous agreement between the parties provided for a preliminary step to be taken before entering upon the successive steps customarily recognized in grievance procedure. The significant feature of this preliminary step is that the union can be ignored, that is, the individual concerned can take the matter up without consulting a steward or any other union officials. The Local Union does not ask for the elimination of the so-called preliminary step, but the Institute insists that the procedure be revised by setting a time-limit of two days, or at most seven days, between the end of the preliminary step and the initiation of the first step. The Local Union opposed any limit at that point, and holds that the preliminary step is not really a part of grievance procedure.

I agree with my colleagues that there should be a time-limit, but it is perfectly clear that two days, or even seven days, would be inadequate and unfair. At later stages in grievance procedure it is customary and proper to set peremptory time-limits. This, however, is a different matter.

The individual employee, taking up a grievance himself under the preliminary step, without consulting the union or his steward, cannot be expected to know all the procedural niceties of the agreement. It would not occur to him that his rights lapse after only 48 hours. Yet the Institute's written proposal was that such a man lose all his rights unless he proceeds to the next step within two days. It is an unfair and improper suggestion which

would make the grievance procedure worthless to most employees.

To give an employee an opportunity to ascertain what his rights are, the time-limit must be reasonable. Union meetings are usually held each month. Although it might have been considered as a compromise, I do not think 15 days is adequate.

I therefore recommend that a 30-day limit be fixed as between the so-called preliminary step and the first step.

Time-limits between subsequent steps can of course be much shorter, because the matter is then within the knowledge of union stewards and officials, who must be well acquainted with all the terms of their agreement with the Company. I also recommend that the contract provide for a meeting between an International Representative and Management at the third step. The efforts of the Institute to eliminate this step indicate an unfortunate failure to appreciate the helpful part representatives can play in adjusting grievances.

It is worthy of note that the difference between the parties on these issues, actually arose *after* conciliation proceedings commenced, and not before, a strange circumstance for which the Board cannot be held responsible. It is, however, a circumstance which calls for an explanation. The explanation is as follows:

Prior to the appointment of the Board the Union had negotiated directly with management, and for a time, with the assistance of a conciliation officer. The Union proposals with respect to Grievance Procedure were accepted by the management by a letter dated October 4, 1945, (and later filed with the Board) in which clauses 10 to 38 inclusive of the Union's draft agreement were described as "O.K.". Upon his first appearance before the Board, Mr. J. C. Adams of the Central Ontario Industrial Relations Institute submitted a document setting out the points on which the parties had failed to agree—and Grievance Procedure was not one of them. Subsequently the Board met from time to time and negotiations were continued between the representatives of the parties, during which the Union's draft agreement was considerably modified and the Institute advanced entirely new proposals with respect to grievance procedure and other matters upon which an understanding had been reached in October. The result was that when, on January 11, 1946, the Union submitted a new draft agreement to the Board, together with the alternative clauses advocated by the Institute, it appeared that (apart from the union security issue) the parties were farther apart than they had been at the Board's

first meeting. It is a regrettable result, which might seem to be "conciliation in reverse" if the explanation were not so apparent.

2. DISCHARGE CASES

The Local Union concedes that probationary employees may be dismissed without reference to seniority, but declines to concede that probationary employees may be dismissed for no reason at all.

The effect of the Institute's proposal is that during his first 30 days' employment a probationary employee may be dismissed with or without cause, and without recourse of any kind under the agreement. The theory of it is that for 30 days employees are completely rightless, and even the rawest case of injustice, if such were to occur, could not be questioned. The victim would then be compelled to seek employment elsewhere, carrying the stigma of unexplained dismissal.

While recognizing the distinction between the status of probationary employees and that of regular employees, it would be wrong to acquiesce in such an extreme suggestion. The Union could be justifiably charged with betraying the interests of new employees if it agreed that they shall be rightless for a period of 30 days.

This is another issue upon which the parties were in accord until the Institute appeared.

This is also another instance in which the Institute's proposal involves the withdrawal of rights enjoyed by employees under the previous agreement.

I do not agree with the recommendation of the majority of this Board as to the dismissal of employees during their first 30 days of employment. The majority scheme would simply have the effect of excluding the Union from its proper function of handling grievances for such people. The Union is recognized as bargaining agency for all the employees and not merely for those who have been employed for a certain period of time. The Union denies that it has agreed to any such provisions.

I recommend that the parties agree in the same language with respect to the Discharge of Employees as that which appeared in their 1944 agreement or in their accord of October 4 1945.

3. VACANCIES

The Local Union's proposals with respect to this question are almost exactly the same as the provisions of the 1944 agreement.

The Institute insists that the previous machinery for promotions to fill vacancies be scrapped by excluding promotions to the rank of foreman.

The Board was informed by management that there have been no cases of promotion to foreman under the previous agreement. Thus the pre-existing machinery has had no test, and no experience was cited against it. Indeed no reason whatever was offered for the change.

I therefore recommend that the parties agree to the same effect with respect to vacancies as in their 1944 agreement.

4. REDUCTION IN WORKING FORCE

Another new departure is here advanced by the Institute. The Local Union proposed, as provided in the previous agreement, that a reduction in working hours (for the purpose of avoiding lay-offs) should be made "as mutually agreed upon by the Company and the Union". This formula was specifically approved by the management's letter of October 4.

I see no reason why a Board of Conciliation should stand idly by and express no opinion when an accord reached by the parties is destroyed by the intervention of the Institute. The history of the matter seriously affects the relationship of the parties and illustrates why the Board is now unable to report that agreement has been reached on all points.

The majority of this Board recommend a certain formula but ignore the point upon which the parties agreed in 1944 and again in 1945 but cannot now agree. The effect of ignoring it is to concede the point raised by the Institute. With reference to hours, the Union wishes to retain the words "as mutually agreed upon by the Company and the Union".

I recommend that the parties now agree as to the Reduction of Working Force and Hours in the same terms as in their 1944 agreement and their accord of October 4, 1945.

5. VETERANS' SENIORITY

It was stated in the original report of the majority of this Board, (which has now been modified): "The Company is willing to discharge its obligations to employees in the Armed Services as provided by the Reinstatement in Civil Employment Act."

The effect of the statement, which correctly describes the Company's position, simply is that the Company offers nothing. The Company is obliged to comply with the law in any case, entirely apart from any question of collective bargaining.

The Local Union requests what is called "super-seniority" for war veterans. This proposal does not mean that veterans receive uniform seniority rights. It means that, upon

becoming a regular employee, the war veteran's seniority is deemed to run from the date of his enlistment or call-up; it is made retroactive. It would mean, for example, that a veteran who enlisted in November, 1939, and was discharged in December, 1945, would have over six years seniority on becoming a regular employee of the Company at this time, although never previously employed by the Company, and he would be junior only to those workers whose service with the Company began before November, 1939. Such an arrangement has been called "super-seniority" because it goes even farther than the clause frequently used which preserves and accumulates the seniority rights during military service of a former employee who returns to the Company upon being discharged.

The Local Union urges the "super-seniority" clause on the ground that it is the only way of putting the war veteran on a footing of equality (so far as the collective bargaining agreement is concerned) with a fellow-worker who was continuously engaged in industry during the war years.

The Company's representatives were invited to state their position on this issue, and did so with surprising frankness. It was stated that most war veterans must be regarded as new and inexperienced workers, that a considerable period of time must elapse before the Company can be satisfied of their value and that in general, notwithstanding some exceptions, the experience of employing them is not satisfactory. For these reasons the Company refused to make any concessions in their favour other than those required by statute. The Company's views were emphasized by an official of the Central Ontario Industrial Relations Institute. They did not alter their pronouncements until after my preliminary report, which dealt with this subject, had been made known and the Board was re-convened. They then professed their appreciation of the desirability of employing war veterans, but failed to give it any tangible recognition by amending the proposed agreement with the Union. War veterans are more interested in tangible recognition by way of employment than in professions of sympathy or appreciation. Notwithstanding the explanations and contradictions made by the employer's representatives when the Board was re-convened, I repeat that they made it perfectly clear, at earlier meetings, that they were not prepared to accept veterans into employment on the same footing as others, and, specifically, that a longer period of time is required to assess their suitability for employment.

It is regrettable that such an irresponsible attitude should be adopted by any employer

or employer's representative toward the serious problems of veterans readjustment and rehabilitation to which so much attention has been given by the Government and by numerous voluntary organizations. It has never been suggested that the return of veterans to civil employment would be entirely free from difficulty. It does not follow that employers can lightly repudiate all responsibility except that imposed upon them by law.

The principle is an important one. It was widely and emphatically stated during the war years that veterans would be assisted to re-establish themselves without any avoidable disability. On occasion it was also predicted that veterans' interests would clash with those of organized workers who were, during the same period, obtaining the recognition of seniority rights by collective bargaining. Now that the war has ended and demobilization is in full flood, the question is no longer one of theory; it is a question of practice. The assurances so freely given from 1939 to 1945 must hereafter receive something more than lip-service.

The Local Union has met this test by proposing the super-seniority clause, which subordinates the interest of the "war worker" to that of the "war veteran". Whether or not they were wise in so doing, such was the decision of members of the Local Union. It may be fairly deduced that in taking a step which at first sight appears contrary to their own interests, they had in mind their obligations to war veterans, and also the long-term desirability of establishing harmonious relations between themselves and workers returning to industry from war service.

The Company is not asked to make a corresponding sacrifice. Seniority rights may be precious to employees of long standing; they do not have the same high significance or value for the employer.

Moreover, the Company has adequate protection for its efficiency standards. Under the 1944 agreement—and the proposed new agreement—no employee becomes a regular employee with seniority rights until after three months' service as a probationary employee. In a relatively small plant, three months give management ample opportunity to assess an employee's suitability for regular employment. This is admitted by the Company, which alleged, however, that a longer period of trial is needed for war veterans. In other words, the Company proposes to discriminate against veterans in the matter of probationary employment, and the device for so doing is to deny veterans any retroactive seniority so that, in the event of staff being reduced, war veterans will be the first to be laid off. It is impossible to understand what good

purpose can be served by this procedure, and the result of such discrimination could only be to create ill-feeling between veterans and the Union. If the Company does not desire that result and does not wish to discredit the seniority system, *it would be well advised to accept the principle of super-seniority advocated by the Local Union, and I so recommend.*

The wording of the proposed super-seniority clause is open to improvement. I suggest that it be reviewed by both parties and that it apply to all cases of "initial employment" with the Company after discharge rather than to those employed within 30 days after discharge.

6. REGULAR WORK WEEK AND HOURS OF WORK

The Local Union proposes that the schedule of working hours be fixed from time to time by negotiation between the parties, it being recognized that changes may become necessary. In schedule "A" to the 1944 agreement, it was provided that hours, if other than regular, "shall be fixed from time to time by the Company after consulting with the union..".

The disagreement here is not about the number of hours in the work-week but about the scheduling of hours.

The Institute advances the novel theory that the Company should be in a position, with respect to scheduled hours, to amend the agreement unilaterally from time to time. This, like the Company's proposal with respect to Reduction of Working Force, would have the effect of reducing the area of collective bargaining so far as these parties are concerned.

The determination of working hours is normally a subject for collective bargaining, dealt with in practically all agreements, and is not, as the Institute suggests, a matter for determination by the employer alone. Collective bargaining ceases to be bargaining in good faith if one party, the employer, reserves unto itself the sole right to determine and to alter from time to time such an important working condition as scheduled hours.

Moreover, if employers were to continue asserting, after the fashion of the Institute before the present Board, that more and more subjects of collective bargaining must be regarded as the prerogative of management alone, then conciliation will be often frustrated, as it has been in this case, and the whole collective bargaining process would become by degrees so empty of substance as to be worthless.

The tactic may be summed up by saying: "I will formally recognize you and I will negotiate with you, but only as to certain points." In my view such a tactic does not

meet the requirements of the law with respect to bargaining in good faith. If it were to succeed, the controversy as to Union recognition would have to be decided all over again.

In view of the parties' failure to agree in recent negotiations, *I recommend that they adopt the compromise contained in Schedule "A" to their 1944 agreement.*

7. EXTRA PAY AND OVERTIME

In this connection both parties are proposing changes from the previous agreement. The most important question is that of double time after four hours of overtime.

The Local Union contends that excessive overtime should be penalized by providing that work performed after 12 hours shall be at double time rates. It was pointed out that it is particularly desirable to penalize all overtime in periods when unemployment is increasing.

My colleagues accept the Company's contention that the matter is one for the Regional War Labour Board to decide. There is, however, nothing to prevent the parties from agreeing to make a joint application to the War Labour Board, or from agreeing that the double time proposal shall take effect as soon as it becomes permissible by law. The Company already pays double time for work performed on holidays.

In view of the Company's acknowledgment that overtime ought to be reduced to the minimum, and in view of the improbability of much double time (after 12 hours) in a well-managed plant, the Company has little to lose by conceding the point to the Local Union.

8. NIGHT PREMIUM

The Company declines to state its position with respect to night-shift differentials until all the wage demands of the Union are known. The principle of an off-shift premium or night-shift differential is quite independent of other wage adjustments and could be dealt with as such even on January 11. Now under P.C. 348 of January 31, 1946, effective February 15, 1946, such matters can be negotiated and settled without recourse to the War Labour Board. I suggest that the parties do so.

9. VACATION

The Institute submitted, conditionally, on behalf of the Company a certain vacation plan, stipulating that it would be withdrawn immediately unless accepted in toto. No further comment is necessary, except that the plan did not appear to comply with the Ontario Statute known as The Hours of Work and Vacations with Pay Act, 1944.

In conclusion, it must be repeated that there is no mystery about the failure of these parties to agree in this instance.

The same parties were successful in concluding agreements in 1943 and 1944.

The Perfect Circle Company and the United Steelworkers of America have successfully concluded agreements in the United States.

So far as the management of the Canadian plant is concerned, the general manager of the Company impressed me at those sessions he attended as being a fair-minded person. I do not for a moment believe he is incapable of reaching agreement with the Union representatives. Nor do I believe that they are incapable of reaching agreement with him.

Report of Board in Dispute between Smith and Stone Co., Ltd., Georgetown, Ont., and Local 526, United Electrical, Radio and Machine Workers of America

On July 6 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Smith and Stone, Limited, Georgetown, Ont., and Local 526, United Electrical, Radio and Machine Workers of America.

The Board was under the chairmanship of His Honour Judge Egerton Lovering, Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Norman L. Mathews, Toronto, and Weir Reid, Georgetown, nominees on the Board of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:

The Board established by you herein held a meeting in the City Hall in Toronto on June 10, 1946, to hear the representations of the parties to the above dispute. The Union was represented by Mr. R. Russell, International Representative of the Union, Mr. Joseph Hall, President of Local 526, Mrs. Ethel Anthony, Chief Steward, Mr. Alex Korzuck, Treasurer of the Local, and Mr. James Ritchie, a member of the negotiating committee of the Union. The Company was represented by Mr. H. F. Caloren, personnel Manager of the Company. Complete briefs were presented by both the Union and the Company and oral arguments were presented by Mr. Russell and Mr. Caloren. It was agreed by both parties that there were three issues in dispute, namely:—

1. The request of the Union for union shop.

I am obliged to conclude that agreement would have been reached if it had not been for the intrusion of extraordinary factors already referred to in this report. These have been discussed at some length because they provide the only rational explanation for the break-down of relations in this case, and because of their broader significance if collective bargaining generally is to proceed in a constructive and orderly manner.

Dated at Toronto this 28th day of June, 1946.

(Sgd.) EDWARD B. JOLLIFFE,

Member.

2. The request of the Company for a clause prohibiting strikes and lock-outs during the duration of the agreement.
3. The request of the Union for the inclusion of an open-end wage clause.

The Union was adamant in its demand for the union shop provision and also for a compulsory check-off of Union dues. The Company was unwilling to grant a union shop but did offer a voluntary, revocable check-off. The Union refused to consider the request of the Company for a no-strike clause unless a union shop was given but did express its willingness to consider the insertion of such a clause if they obtained a union shop. The Company refused to agree to an open-end wage clause but did offer certain wage concessions which the Union refused to accept. It was pointed out that an application by the Union for wage increases is now pending before the Regional War Labour Board.

As it was impossible to reconcile the parties, the members of the Board held a further meeting on June 24 to consider the recommendations that should be made. While we regret that it was not possible for it to arrive at a unanimous agreement on these recommendations, the majority of the Board have agreed on the following recommendations:—

1. We recommend that no provision for Union Shop be inserted in the agreement. While the usual arguments in favour of and against a Union Shop were presented by the parties, we feel that no case has been made out for Union Shop in this instance. There is a substantial number of employees who do not belong to the Union at the present time and who do not wish to belong to it. These are, in many instances, valued employees of the Company, and we feel that the question

of joining or not joining a Union is a matter for these employees to decide for themselves and that the Company has no more moral right to coerce these into joining the Union than it has to prevent them from joining the Union. There was no evidence presented before the Board that the Company has discriminated in any way against Union employees or that it has in any way endeavoured to undermine the Union. On the other hand, the Company stated without contradiction that in violation of the present agreement the Union staged two sit-down strikes in February of this year. Under these circumstances, the majority of the Board fails to see why the Company should feel that it has derived so much benefit from the Union that it should override the wishes of the minority of its employees by requiring them to join the Union against their wishes. Taking all these factors into consideration, the majority of the Board recommends against any provision for a Union Shop in the present agreement and feels that the offer of the Company to grant a voluntary, revocable check-off is fair and reasonable under all the circumstances.

2. It is difficult to understand the refusal of the Union to the inclusion of a no-strike, no-lockout clause in the agreement. So long as P.C. 1003 is in effect any strike or lockout during the lifetime of the agreement would be illegal. Then again, in view of the fact that the grievance procedure culminating in arbitration provides a simple and peaceful method for the settlement of all disputes that may arise during the lifetime of an agreement, there would seem to be no justification for any strike or lock-out while the agreement is in force. If the parties do not intend to carry out the agreement then they are not entering into it in good faith and if they do intend to carry out the agreement they should not object to a clause providing that the method prescribed by the agreement for the settlement of disputes should be carried out. If, therefore, the parties are acting in good faith, it seems to the majority of the Board that the no-strike, no-lockout clause is an essential provision in the agreement and no valid argument has been presented against its inclusion. We, therefore, recommend without hesitation that the no-strike, no-lockout clause should be included in any agreement into which the parties may enter.

3. In view of the fact that one of the main purposes of collective bargaining is to cover the question of wages, we feel that both parties are entitled to a measure of stability on wage matters and it is not too much to expect both parties to provide that a wage schedule when agreed upon or, in the alterna-

tive, when directed by a properly constituted authority shall remain in effect during the one-year lifetime of the agreement. In view of the fact that an application has already been made to the Regional War Labour Board for wage increases, the Majority of the Board recommends that the following clause be included in the agreement:—

In view of the fact that an application for wage increases is now pending before the Regional War Labour Board for Ontario at which both parties will be free to present their views, it is agreed that the scale of wages directed by the Regional War Labour Board shall, subject to the right of either side to appeal to the National War Labour Board from such direction, remain in force and effect for the duration of this agreement.

We think that this is a reasonable provision and should be included in the proposed agreement.

All of which is respectfully submitted.

Dated at Toronto this 26th day of June, 1946.

(Sgd.) EGERTON LOVERING,
Chairman.

(Sgd.) NORMAN L. MATHEWS,
Member.

Minority Report

The matters in dispute between Smith and Stone Limited and Local 526, United Electrical, Radio and Machine Workers of America were (1) the union shop; (2) the no-strike clause; and (3) the open-end wage clause. The member appointed on behalf of the company was Mr. Norman L. Mathews, Imperial Bank Building, 171 Yonge St., Toronto, on behalf of the Union, the writer of this minority report. The Chairman, Judge Egerton Lovering was appointed by the Minister of Labour after Mr. Mathews and myself failed to agree on a mutually acceptable chairman. I must confess that this was my first experience on a conciliation board. It has left me with a profound conviction that progressive labour-management relations cannot be effected if the proceedings of this particular board are typical. The chairman gave the impression that labour existed for the convenience of companies who may at times require them. This is an attitude which is to my mind not even in keeping with that which could reasonably be expected from the member appointed by the company who accepted sincerely his responsibilities to recommend a mutually satisfactory basis for the relations of the parties in dispute. On at least three occasions during the presentation of the union's brief by Mr. Russell, the chairman protested that he could not see how either the union shop or the open-end wage clause could possibly be in the

interest of the company. Further, I submit that at no time was such relevant matters as local needs and conditions discussed in their broad relationship with the needs and conditions affecting the workers and the industry as a whole. This made it impossible for me to accept the majority report in whole or in part, in that I do not believe that an understanding of the issues in dispute can be reached apart from these basic considerations,—union security and job security, wage-price relationships, labour-management co-operation—nor can the functions of the board be fulfilled in assisting the union and the company in reaching an agreement so that production can be continued in the common interest.

In supporting the union's demands for a union shop I recognize the reasonable argument advanced in the union's brief to the board which is reinforced by decisions of other boards of conciliation where union shops have been recommended in recognition of the union's contribution to the war effort and to labour-management co-operation. As early as February, 1945, the LABOUR GAZETTE published an analysis of the recommendations made by conciliation boards on union security disputes in 1944. The union shop was recommended in three majority reports and unanimously opposed in one other case. Maintenance of membership was recommended unanimously in four other cases, recommended by a majority report in seven, opposed in a majority report in one case and opposed unanimously in three cases.

As instance, there is the case between the Ontario Malleable Iron Company, Oshawa, and the United Steel Workers of America. "The union claimed harmonious relations with the employers since the signing of the first collective agreement in 1937 and one hundred per cent membership among the employees from 1941 until the end of 1943 when a group of employees from the province of Quebec had been placed in the plant and had refused to join the union. In view of the continued good relations between the company and the union and the thoroughly responsible behaviour of the latter the majority of the board felt that the demand of the union for a union shop was thoroughly justified and that a denial of the demand would be in fact a refusal of further recognition by the Company. The granting of a union shop would be the best possible token of renewed and increased confidence between the company and the union." (*Union Security*, pub. by Workers' Educational Association, page 37).

Again, more recently in the report of board of conciliation of dispute between Canadian

Marconi Company, Limited, Montreal, P.Q., and its employees members of the Commercial Telegraphers Union, Canadian Marconi System Division No. 59, signed by the chairman, Mr. L. W. Brockington, Ottawa, and Mr. Bora Laskin, employees nominee, recommended a modified union shop consisting of maintenance of membership for present employees, who are, or may become members of the union, and compulsory union membership for new employees within 30 days of hiring. This provision is to remain in effect for one year from the date of signing of the agreement.

In the light of an intimate knowledge of the workers of Smith and Stone and of the integrity of their chosen bargaining agent I insist that the common interest would be served best by the establishment of a union shop. From the attitude of my fellow board members and of Mr. Caloren, the personnel manager of the company and the expressed anti-union feelings of other company officials whom I have occasion to know casually, I fail to be impressed with the statement found in the company's brief on Page 2. "The Company would not agree to the union's request, re: union shop as it feels that it cannot subscribe to any action which would deny the right of a citizen to obtain or continue in employment on a free basis independently of any organized group." This can be understood only as an anti-union view and a condition denied even Napoleon on St. Helene or Robinson Crusoe. Mr. Mathews maintained that the union shop contravened the fundamental freedom of the individual. He drew the parallel that it was like forcing everyone to vote for the Liberal Government. I disagree with the premise in that everyone has the rights and responsibilities of citizenship under the constitution which does not preclude freedom of thought and action within the institution of the state. It can be said that the union shop provides a stable agency organized and directed by the employees in which every member enjoys democratic rights.

As for the second argument against the union shop contained on page 2 of the company's brief, "A union shop has the power to dismiss a member and thus force his termination with the company, and such action is not subject to legal review". If it were a case of "tit for tat" involved perhaps this line of argument might if pushed to its logical conclusion involve the company in legal process each time that they discharged a worker. It seems clear that with a union shop that the union would not have the same fears that the company was discriminating against a union

worker if he were discharged for some justifiable reason where it in no way impaired the strength and responsibility of the union since it is in their interest to develop and maintain a responsible working force.

In respect the second matter in dispute the "no-strike clause" I submit that this must be reviewed in the light of a transition from a wartime to a peacetime economy. In the union's statement it is pointed out that the United Electrical Workers adopted and maintained a no-strike pledge throughout the war in support of our fighting forces and of the country as a whole. The company's refusal to negotiate on the question of strike action, is in effect denying labour their fundamental right to strike. It is equally clear that the company is using the no-strike provisions of P.C. 1003, to delay and frustrate the union in their efforts to negotiate a new contract. I submit that it is in the interest of the workers of Local 526 that a wartime condition accepted by the local in that period should be deleted and that the company and the union negotiate on this as on other questions as may be advanced by either party in the process of collective bargaining. It is not in the interest of the union to stop work in instances other than where it is impossible to negotiate a settlement on another basis. Legal machinery such as the P.C. 1003 should not afford protection to industry against a strike action taken to secure satisfactory working conditions and wages, when continued production is not in the common interest.

It is apparent that prices and wages are in the process of change. To secure the welfare of the workers of Local 526, it is a precondition that any settlement made at this time be subject to review in relation to the wage-price levels established in the industry generally. Since this level does not appear to be forthcoming in the immediate future the company's fears that they would be subject to continual renegotiations of wages is

ill-founded. Once the level is established it is not reasonable that a small local would attempt to raise the level of wages beyond that which has been attained by an industry-wide action. Since the majority report takes substantially the same position as the company's brief, there remains only the point raised by Mr. Mathews to discuss that if the no-strike clause is deleted and open-end wage clause included in the contract it is in effect invalid. I suggest that my eminent legal colleague is more familiar with contractual matters than to advance this argument seriously. It is only necessary to refer him to some elaborate cost-plus contracts which have been most flexible and profitable—with more than one point open for renegotiation in the light of changing conditions.

In conclusion I should like to draw the attention of the Minister to the record of workers of Georgetown, particularly those of Local 526. Many of them will not return to the factories from the fields where they died in the cause of freedom. Those who have returned and taken their place in Smith and Stone Limited, have supported the union and the war effort fully. The evidence is found in the majority vote of 86 per cent in favour of the union. I am aware that the workers of Georgetown are finding it increasingly difficult to establish and maintain a standard of living consistent with their contribution to the wealth and security of the community, and in such a level as to provide for the health and nutritional, educational and recreational, and housing needs of their families. In as much as successful collective bargaining is the basis for industrial democracy and common security, I submit that the three demands made by the union are just and reasonable and are basic to labour-management cooperation.

Respectfully submitted,

(Sgd.) WEIR REID.

Report of Board in Dispute between the Corporation of Penticton, B.C., and Local No. 1, Penticton Municipal Employees' Union

Report of Board

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

HONOURABLE SIR:—

On July 6 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Corporation of Penticton, B.C., and Local No. 1, Penticton Municipal Employees' Union.

The Board was under the chairmanship of Mr. E. S. Farr, Victoria, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. H. W. McInnes, Penticton, and W. H. Sands, Kelowna, appointed on the nomination of the employer and employees respectively.

The Conciliation Board appointed by you, as above noted, consisting of myself as Chairman, Mr. Harold W. McInnes representing the Employer, and Mr. W. H. Sands representing the Employees, has duly met in Penticton, and being unable to formulate a contract between the Employer and Employees

begs to submit herewith its report and recommendations.

The Board met on the morning of June 25 to decide upon procedure, and to discuss the broad issues involved. Arrangements were made for an open hearing to be held at the Three Gables Hotel, Penticton at two p.m.

The meeting convened at two p.m. with the following members present:—

The entire members of the Board of Conciliation,
J. S. Aikins, Counsel representing the Corporation of Penticton,
Alex Tough, Councillor of the Corporation,
Daniel O'Brien, Regional Director Canadian Congress of Labour as spokesman for the Employees.

The Bargaining representatives for the Employees were present as follows:—

A. S. Gough, President of the Union,
Miss M. Young, Secretary-Treasurer,
W. T. Mattock, Bargaining Representative,
W. C. Carter, Bargaining Representative.

The clarification of the issues involved were called for and it was noted that the previous contract had terminated on the 15th of February, and that the proposed contract, unacceptable to the Employers, is dated April 16. The only two issues involved were the maintenance of membership, and the check-off. Daniel O'Brien for the Union thereupon outlined the purpose, standing and powers of the local union and discussed at some length the issues in dispute.

Following Mr. O'Brien's presentation, Mr. J. S. Aikins, representing the Corporation of Penticton, questioned Mr. O'Brien on certain points, asking for further information. The hearing was adjourned until 1.30 p.m. Thursday in view of the absence of all members of the Municipal Council of Penticton from the City, except Mr. Tough.

On Wednesday morning and afternoon the Board met to study Mr. O'Brien's argument and to review the record of the previous meeting. Thursday morning the Board again met and learned that there was not a quorum of the Municipal Council in Penticton, but that following long-distance conversations the Municipal Council had decided to adhere to the original contract.

At 1.00 o'clock in the afternoon on Thursday the general hearing reconvened in the writing room at the Three Gables Hotel at which all representatives, previously noted, were present, with the addition of Mr. H. G. Andrew, Municipal Clerk in the place of Mr. Alex Tough, Councillor who was not present. Mr. J. S. Aikins presented argument for the Corporation at some length, following which Mr. O'Brien replied and rested his case for the Employees. The open meeting then adjourned and the Board subsequently met and it being apparent that no contract could be formulated between the parties, this Board now begs to submit its recommendations for a contract between the two parties.

It recommends, referring to the two points in issue, that the proposed contract be approved with the following qualifications:—

1. *Re:* Article 3. Add after the word "employees" in the second line of paragraph one "except clerical staff".

2. *Re:* Article 4, Check-off. After the word "of" in the fifth line add "One Dollar (\$1.00) for" and in the prescribed form in Section 2 Line 5 "One Dollar (\$1.00)" should be inserted. (This amendment restricts the Union from increasing the union dues during the life of this contract.)

We make a third recommendation providing for the withdrawal of any member of the Union as follows:—

3. Section 10 of the draft contract provides that either party to the contract may give the opposite party sixty days' notice in writing of his intention to cancel the contract or propose amendments thereto. Every employee shall at any time after such notice has been given by either Party to the Contract, and not less than thirty days before the expiration date of the contract, give notice to the Union of his intention to withdraw from the Union upon the expiration date of the contract, and upon the expiration of the contract the membership of the Employee in the Union shall cease.

All of which is respectfully submitted.

(Sgd.) E. S. FARR.

(Sgd.) W. H. SANDS.

(Sgd.) H. W. McINNIS.

Report of Board in Dispute between Eaton-Wilcox, Limited, Windsor, Ont., and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America

On July 6 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Eaton-Wilcox, Limited, Windsor, Ont., and Local 195, Int. Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

The Board was under the chairmanship of His Honour Judge H. E. Fuller, Welland, Ont., appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. B. A. E. Clouse, Kingsville, Ont., and C. I. Dubin,

Toronto, nominees on the Board of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

The undersigned, the members of the Board of Conciliation appointed by you in this matter, beg to report as follows:

Meetings of the Board were held at Toronto and at Windsor, all members of the board being present at each meeting. The Company was represented by Mr. G. C. Richards, Solicitor, and Mr. Pullen, Manager. The Union was represented by Mr. Drummond Wren, Mr. E. J. Parent, International Representative, and Mr. G. Quick, Mr. E. Valencourt and Mr. Thomas Pearce of the Local Committee.

The relationship between the Company and the Union in the past has apparently been quite satisfactory and all members of the Board appreciate the courteous and friendly attitude of the representatives of the parties in the meetings.

This Company normally employs 80 to 100 men. At the present time the number employed is 38. All employees, except one, are and have been for at least a year members of the Union and it is expected that the one exception—a new employee—will join the union in the near future. During the past few years the Company have employed up to a maximum of 200 men and since May of 1943 a substantial majority of the employees have been members of the union. An agreement was made between the Company and the Union in August of 1943. This agreement was renewed in August of 1944 for one year. In July of 1945 certain amendments to this agreement were submitted to the Company by the Union. The parties failed to agree on the amendments. Negotiations were carried on for some time and finally this Board was appointed.

A draft agreement—a copy of which is attached hereto—has been agreed to by the parties, except as to paragraphs 4, 5, 6, 14-A and D, and 41. In addition to this, the union desire to have the contract made with the International Union rather than Local 195.

During the sittings agreements were arrived at between the parties as follows:

1. *Re Paragraph 14-A.* The first three lines of paragraph 14 and clause (a) of paragraph 14 of the draft agreement shall be struck out and

there shall be substituted therefor the following:

14-A No grievance shall be considered which usurps management's function.

Any employee having a grievance shall first submit the same to the foreman in writing, in triplicate and on forms to be supplied by the company, either direct or through the relevant committeeman. It shall be optional to the company to decline to consider any grievance the alleged circumstances of which originated or occurred more than five working days prior to its presentation. The foreman shall deal with the grievance and render his decision thereon in writing not later than the second working day next following the day upon which he receives the grievance.

2. *Re Paragraph 41.* The parties have agreed that paragraph 41 of the draft agreement shall be struck out and there shall be inserted, in lieu thereof, a paragraph covering employees who were serving in the Armed Forces—the exact wording of which the parties will agree to.

With regard to paragraph 14-D of the agreement, the union suggested, in place thereof, there should be procedure for the appointment of an umpire—whose decisions should be final and binding on both parties—and they suggested that there should be inserted in the agreement, in substitution for paragraph 14 (d), paragraph 7 (e) of the last agreement between the union and the company—except that the last sentence of such sub-section should be replaced with the following clause:

The decision of the umpire shall be final and binding on both parties.

During the discussions, it was obvious to the members of your Board that the parties were not far apart on this point. The Company stated that they had no objection to the proposal of the union so long as the matters which were to be referred to the umpire were not such as might interfere with or usurp management's function.

Your Board recommend that the agreement contain the clause as suggested by the Union and that there shall be added to the clause a paragraph, to be agreed on between the parties, setting out exactly what matters may be referred to such umpire for settlement. This paragraph should include differences concerning the interpretation or violation of the agreement, as provided for in paragraph 18(1) of the Wartime Labour Relations Regulations, P.C. 1003.

With regard to the proposal of the Union that the agreement be made with the International Union rather than Local 195, the Union gave as a reason for this that the Local

Union 195 functions under the authority of and subject to the rules and regulations of the International and that this is recognized in clause 15 of the draft agreement. The Company objected on the ground that the present and past agreement had been with Local 195; that Local 195 has its office and officers in Windsor; that when dealing with Local 195 the Company knew who it was dealing with; that the past relationship has been reasonably satisfactory and that the Company therefore, does not care to substitute International for the Local Union.

The Board is of the opinion that, under the circumstances present in this case, there should be some recognition in the contract of the International. Both parties indicated, at the hearings, that they would have no serious objection to the following, and the Board therefore recommend:

- (a) That there should be added, as a Party to the Agreement

INTERNATIONAL UNION UNITED AUTOMOBILE,
AIRCRAFT AND AGRICULTURAL IMPLEMENT
WORKERS OF AMERICA,
hereinafter called "PARTIES OF THE THIRD
PART",—and

- (b) That there should be added to the agreement, as clause 49, the following:

"The Parties of the Third Part hereby consent to and approve of the terms of the within Agreement".

The only other matter in dispute between the parties were clauses 4, 5 and 6 of the draft agreement. These clauses deal with the question which is commonly known as "Union Security". The Union ask a closed shop with check-off. It argues that where, as in this case, there is, to all intents and purposes, 100 per cent of the employees members of the Union that it is usual to have such a union shop; that it is desirable to have it, having regard to the existing labour conditions in the Windsor district; that to a large extent it is, for all practical purposes, already established in this area and that, in any event, the Company should not object as there is practically a 100 per cent membership in the union by the employees now. On the other hand, the Company take the position that they are against the principle of the Union shop; that the Company has no right to dictate to its employees that they should belong to any particular union and that such choice should be left to the individual employee. The Company pointed out that, from its point-of-view, it was interested in industrial peace; that if there was going to be any agreement, of any kind, along this line it should be one which would settle all points on which there

might be a dispute. The Company pointed out that, recently, a letter had been received from the Union asking for a \$2.00 per day increase in wages and that there would be little satisfaction in the Company making some settlement of this matter if, immediately following, they were going to be faced with a strike, any way, over wages. The Board were unable, under the circumstances, to bring the parties together on this point and, unfortunately, the members of the Board were unable to come to any unanimous opinion as to the recommendations the Board should make on this point.

There is attached hereto a minority report by Mr. Clouse, containing his views.

In the opinion of the majority of the Board it is in the best interest of the parties hereto that they should enter into an agreement in which there is incorporated the formula laid down in the decision of Mr. Justice Rand in the Ford Motor dispute, which has been adopted by the Ford Corporation and the Union concerned. This formula was also recommended in the majority report of the Board of Conciliation in the dispute between the Union and the Chrysler Corporation of Canada, Limited.

The present Company is a comparatively small Company, located in the Windsor area, manufacturing parts for the motor industry. Under these circumstances it is the opinion of the majority of this Board that there should be, as far as practical, some uniformity in the relative position of the Union and the Companies concerned in the automotive industry in the Windsor area. The majority of the Board feel that if this were done it would be a step forward in the settlement of disputes of this nature in this area and that it would be desirable in the interests of the welfare of the community and of the public generally.

Respectfully submitted.

(Sgd.) HAROLD E. FULLER,
Chairman.

(Sgd.) CHARLES L. DUBIN,
Member.

(Sgd.) BRUCE A. E. CLOUSE,
Member.

Minority Report

THE HONOURABLE HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

First of all I wish to associate myself with the other members of the Board in appreciation of the courteous and friendly attitude of the representatives of the parties in the meetings at the hearings.

As set out in the majority report of this Board dated June 21, 1946, the Board was able to arrange agreement between the parties on all matters in dispute except on the question of so called "Union Security" and on this subject I cannot agree with the other members of the Board in their recommendation that the settlement by the Honourable Mr. Justice Rand in the Ford dispute be applied to this case.

I do not feel that workmen should be compelled by means of a compulsory check off to pay dues into a union which they may or may not wish to belong to and as pointed out by the majority report of the Board of Conciliation in connection with this local and the Chrysler Corporation "no doubt there are present legal weaknesses, particularly with reference to the mutual obligations imposed by the learned Judge which may require legislative consideration" and until I am

advised what these weaknesses are and until legislative consideration is given to the mutual obligations I do not care to be a party to a recommendation that this formula be recommended for this company.

I feel that workmen unwilling to pay dues voluntarily into a union should not be compelled to do so as a condition of employment, particularly when this local of this union takes an active part in and promotes and runs a political candidate.

At the hearings before this Board it was stated that all or nearly all of the present employees are members of the union and if this is so then there should be no difficulty by the union in collecting its union fees and the company should not be asked to act as a collection agent for the union.

All of which is respectfully submitted.

(Sgd.) BRUCE A. E. CLOUSE,
Member.

Report of Board in Dispute between Railway Association of Canada, Montreal, P.Q., and Division No. 4, Railway Employees' Department (AFL).

On July 6 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Railway Association of Canada, Montreal, and Div. No. 4, Railway Employees' Dept. (AFL).

The Board was under the chairmanship of the Hon. Mr. J. A. E. McPherson, Winnipeg, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. W. F. Macklaier, Montreal, and Senator A. W. Roebuck, Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir:

The above mentioned Union made an application on December 18, 1945, to have certain changes made in their existing agreement with the above Association. Mr. J. S. McCullagh was appointed as a Conciliation Officer to attempt to effect a settlement. He subsequently reported that he had been unsuccessful.

Those matters in dispute which related to rates of pay and hours of work were referred to the National War Labour Board. The Union included in their application a request to insert in the proposed new agreement a clause providing for a union shop.

A conciliation Board consisting of Senator A. W. Roebuck, K.C., Mr. William F.

Macklaier, K.C., and Chief Justice E. A. McPherson were appointed to consider the proposal.

The first meeting of the Board was held on April 29, 1946, and arrangements were made to hear the representatives of the parties on April 30, 1946. When the hearing opened the Railway Association was represented by Mr. E. R. Battley, Chief of Motive Power and Car Equipment, C.N.R., and Chairman, Wage Sub-Committee, Federated Trades, Railway Association of Canada; Mr. F. W. Edge, Director of Labour Relations, Canadian National Railways, and Mr. H. D. Brydone-Jack, Acting Manager, Department of Personnel, Canadian Pacific Railway, and representatives of the Union were Mr. H. Smith, President, Division No. 4, Railway Employees Department, A.F. of L.; Mr. T. Broad, Vice-President, Division No. 4, Railway Employees Department; Mr. J. Tomes, Secretary-Treasurer, District 30, International Brotherhood of Boilermakers; Mr. C. Sperano, General Chairman, International Brotherhood of Blacksmiths; Mr. K. Cockburn, General Chairman, International Brotherhood of Electrical Workers; Mr. W. H. C. Logan, President, District No. 2, International Association of Machinists; Mr. W. Ansell, General Chairman, United Association of Journeymen Plumbers and Steamfitters; Mr. A. Payne, General Chairman, Sheet Metal Workers International Association; Mr. S. Upton, Brotherhood of Railway Car Men.

Mr. Smith made the formal submission on behalf of the Union in which the employees

requested that Wage Agreement No. 6 between the Railway Association of Canada and Division No. 4, Railway Employees Department, A.F. and A.L. should be altered by inserting the following clause:

The best interests of the parties hereto are secured when by mutual co-operation and spirit of goodwill the terms of this Agreement are fully recognized and enforced, therefore the Railway Association of Canada, representing the various railroad companies—as outlined in this Agreement—agree that all employees affected by this Agreement shall become and remain members of the organization parties thereto and that all new employees shall within three months from the commencement of their employment with the various railroads become and remain members. In the case of suspension or expulsion of any member of the various employees organizations, the companies affected agreed to suspend or dismiss from the service such member upon satisfactory proof of such misconduct allegedly for which suspension or expulsion is made.

Mr. E. R. Battley filed a reply to the Union submission. After the formal written document had been filed an informal discussion took place during which various representatives of both parties spoke in reference to points which had been raised.

Before the meeting closed it was very definitely shown that neither of the parties wished the Board to recommend any alternative proposal but that it should confine itself solely to the question submitted to it, namely, "shall the Agreement referred to contain a clause allowing a union shop".

The contribution made by labour and industry during the war was one of which they both may be justly proud. They made concessions which they would have strenuously refused under normal conditions and by doing so achieved results in production and transportation which no one in prewar conditions would have thought possible.

The successful termination of the war does not mean that it is not necessary to continue to make every effort to maintain production in as great a volume as possible. The demand for peacetime goods is enormous. This is especially true in reference to building material and supplies. The transportation facilities of this country have an important work to perform in the delivery of raw materials and the distribution of the actual goods.

The relationship of all the Unions connected with the operation of the railways of Canada (of which the present applicant is an important part) and their employers during the past years under existing agreements shows that, though many disputes arose over details in connection with their employment, they were able to meet each other in a spirit of

co-operation and settle their difficulties without any serious injury to either of them or to the general public.

I fully realize the desirability or rather the necessity of maintaining if possible the present very satisfactory relations which have existed between them.

Before I deal with the questions before us there are certain basic conditions in Canada to which I wish to refer. Union shops are not prohibited. Collective bargaining is not only legal but is compulsory under certain conditions. The workers have the right to organize themselves into trade unions. The unions so formed have the right to adopt a constitution and pass by-laws setting forth the conditions under which members may be admitted, suspended or expelled and for the general purposes of the internal management of union.

The applicants are now asking this Board to recommend that the proposed union shop clause be inserted in their agreement with the Association. If the Association was agreeable to have it a part of the contract it would be legal to include it, and the whole matter would be disposed of. They however take the position that they will not accept such a clause.

I have studied the submission put forward by the applicants in support of their request. There are a great many statements in same with which I heartily agree but there are some which I cannot accept. I do not think that the refusal of the employers to accept the clause in any way indicates that they have any desire or intention of sabotaging the present conditions or bring about the chaos referred to on page 4 of the submission. Neither can I accept it as a fact that the establishment of a union shop would eliminate industrial strife in the way of strikes. On the other hand I think there is considerable force in the argument indirectly referred to in the quotation from Idele Wilson on page 8 of the submission.

I agree with the Union when they claim that if they had union shop they would not have to spend as much time as they do in maintaining the strength of their union and could devote that time to other purposes.

I have watched reports dealing with industrial disputes through the years and I cannot see any justification for actions which temporarily destroy and demoralize production based upon the questions of what organization shall be the authority to speak for the employees any more than I can justify the same being caused by strife among competitive industries. The union shop would simplify the question of membership in the Union but it would not be a protection

against members of a competitive union unless such membership was arbitrarily refused. At the present time non-union members may cause some difficulty but the personnel is at least known to the union, which would not be the case if competitive union members were hidden within the controlling union itself.

The fact that approximately 94 per cent of all the workers in the trades affected herein are members of the union is an indication of the extent to which the benefits belonging to same are acknowledged by the worker, and the voluntary association with same must lead to a more harmonious organization than would exist if the worker was made a member by compulsion. I do not think that the freedom referred to in the Atlantic Charter is retained by the individual any more by a rule which may force him to join a union than he would have if his rights to labour were allowed by an employer only if he refrained from joining a union. The whole trend of the law is that the individual shall not be coerced into one position before he is entitled to employment. The employer at the present time cannot use coercion to force a worker out of a union and I cannot see any reason why he should be compelled to join a union before being entitled to employment. The fundamental objection appears to me to be that the liberty of the individual is at stake.

I quite agree with the applicants that they have done a great work in obtaining justice for the worker and their labours in that behalf should be continued, but the success of that programme does not appear to me to depend upon the form of the organization but upon the good judgment, fairness and honesty in approaching debatable questions both on the part of the employer and employee.

At the present time the unions in Canada appear to be constructed on democratic lines and the maintenance of democratic conditions which exist have to be maintained and the greater interest the individual members take in their organization the better it will be for that organization; but on the other hand the management of unions can be dictatorial and I think the applicants will agree with me that in some cases on this continent dictatorship in union affairs does exist to the detriment of the union as a whole.

Where such a condition is possible my opinion is that it would be dangerous to take away the individual liberty of a citizen in respect to his right of employment under conditions agreeable to he and his employer.

It may not be necessary for me to refer to the argument submitted by the employers

except that I would like to point out that in the summing up of their submission on page 3 I have not considered the conditions under the War Labour Act in the United States as applicable to the conditions here except to the extent that it does indicate a ground of objection to union shops in that branch of industry but the reasons for same existing in the States are at least partially caused by local conditions. Their second ground has no application at all in Canada. In my opinion their third ground is sound and, as I have indicated, a union shop is not necessary to maintain membership nor is it the best way to obtain new members and the questions of attack are not eliminated by the mere formation of a union shop.

The parties hereto restricted their application to the one question in regard to a Union shop which I could not recommend. As a member of a Board of Conciliation I was of the opinion that if possible a common ground should be arrived at, and for that purpose I have explored various possible solutions to the problems.

Since the adjournment on May 10, I have endeavoured to arrive at some satisfactory settlement, as it was agreed that there would be no necessity for a further meeting of the Board.

I regret that I have not been able to make a suggestion which would be acceptable to both the parties, and any suggestion which would not be adopted unanimously would in my opinion be worthless. In view of this situation I cannot recommend that the Union Shop clause be inserted in the agreement.

My rather lengthy report on the matter may differ from other Boards, but I felt that the parties interested were entitled to know the line of reasoning followed by myself in arriving at that conclusion.

(Sgd.) E. A. McPHERSON,

Chairman.

Dated at Winnipeg, this 17th day of June, 1946.

Minority Report

To the Honourable The Minister of Labour,
Ottawa,
Canada.

SIR:

As a member of the Board of Conciliation appointed in this matter, I have the honour to report as follows after hearing the respective submissions of the Employers and the Employees, presented as well in writing as orally, and after due consideration of such submissions:

1. *The Parties:*

Division No. 4, Railway Employees' Department, of the American Federation of Labour represents about 94 per cent of the total number of approximately 35,000 workers, employed in the Locomotive and Car Departments of the railroads, who are responsible for the building, repairing and maintenance of engines, cars, rolling stock and all mechanical equipment—composed principally of skilled mechanics such as Pipefitters, Sheet Metal Workers, Moulders, Machinists, Carmen, Boilermakers, Blacksmiths, Electrical Workers and their Helpers and Apprentices. The employees represented in the issue before this Board comprise 20 per cent of the total railway employees in Canada.

The Railways represented by the Railway Association of Canada in the issue before the board are:

- Canadian National Railways,
- Canadian Pacific Railway,
- Dominion Atlantic Railway, Esquimalt and Nanaimo Railway, Kettle Valley Railway, Quebec Central Railway, (Subsidiaries of the Canadian Pacific Railway Company).
- Alberta & Great Waterways Railway, Edmonton, Dunvegan and British Columbia Railway. (Owned jointly by Canadian National and Canadian Pacific Railways and now known as Northern Alberta Railways).
- Temiskaming & Northern Ontario Railway. (Now Ontario Northlands Railway).
- Toronto, Hamilton & Buffalo Railway.

These railways represent 92.4 per cent of the railway mileage in Canada, the majority of the residue being made up of sections of United States railways operating through Canada, the employees of which come under the working agreements in force on their own systems in the United States.

2. *The Issue:*

The matter in issue is concise and specific: it is whether in the revision of a collective agreement between the Employers and Employees, which has subsisted since 1927 (known as Wage Agreement No. 6), there should be a clause providing for a Union Shop. The clause which the Employees' representatives seek to incorporate reads:

The best interests of the parties hereto are secured when by mutual co-operation and spirit of goodwill the terms of this agreement are fully recognized and enforced. Therefore, the Railway Association of Canada, representing the various railroad companies as outlined in this agreement, agrees that all employees affected by this agreement shall be-

come and remain members of their various organizations, parties to this agreement and all new employees shall—within three months from the commencement of employment with the various railroads—become and remain members. In the case of suspension or expulsion, of any member of the various employees' organizations, the companies affected agree to suspend or dismiss from the service such members upon satisfactory proof of such misconduct alleged for which suspension or expulsion is made.

The Employers' representatives have refused to agree to the inclusion in the Collective Agreement of this or any other clause establishing a "Union Shop" in the relevant departments of their railways.

The issue is therefore clearly and concisely whether the relevant departments of the railways are to be operated as a "Union Shop" or as an "Open Shop".

3. *Possibilities of Conciliation:*

The Conciliation Officer having been unable to effect an agreement between the parties, the present Board of Conciliation was constituted. It appears and in fact was stated categorically by the parties in issue at the hearing that they cannot agree on the matter in issue. Under the circumstances, there is no chance that any endeavour by this Board to effect an agreement between the parties can be successful.

There are no facts in issue so that there are no findings of fact for this Board to make.

It therefore follows that the only function for this Board to fulfil is reach its conclusions and make its recommendations to the Minister in respect of the matter in dispute.

4. *Conclusion and Recommendation:*

It is my conclusion that under all of the circumstances, the "Open Shop" policy heretofore prevailing between the parties in issue should not be disturbed and should consequently be continued and I therefore recommend that neither the "Union Shop" clause above quoted, nor any other clause of similar purpose, should be included in the Collective Agreement which is now before this Board for its consideration and recommendations.

As is more fully developed hereinbelow, both the railways and the Union have flourished and their mutual relationship has been a satisfactory one without a Union Shop agreement and I see no justification for forcing such an agreement on an unwilling employer under all the circumstances of the present case. In my view, the Unions do not need it to maintain their present position of prestige and importance and as the Railways do not want it, it would be inappropriate and against the best interests of the parties in issue and against the best interests of Canada under

the circumstances, to make any recommendation that would force the Railways to adopt the principle of the Union Shop.

5. Reasons:

1. This is a case in which a long-standing relationship between the Employers and the Employees has, from all appearances and from the evidence, been substantially harmonious under an agreement not providing for a Union Shop. It is therefore my view that in asking this Board to recommend that there be included in the new Agreement, against the will of the Employers, a provision for a Union Shop, the burden of proof is on the Employees to demonstrate the necessity or at least the expediency of the innovation; necessity or expediency not merely in the interests of the Union but in the mutual interests of the Union and the Railways.

The Railways assert that it would be against their interests to become a Union Shop as it would divest them of and vest in the Union the right to discipline the Railways' Employees by the ultimate sanction of dismissal. This is fully covered in paragraph 12 of the Railways' Brief and no satisfactory answer has in my view been given by the Employees to this contention.

I find it difficult to conclude that on a matter affecting some 35,000 Employees of so vital a part of Canada's economy as the Employers who comprise 92.4 per cent of the railway mileage in Canada, the latter should be urged by any recommendation of this Board to accept a principle which would deprive them of the right of ultimate discipline of their own Employees and virtually force them to abdicate in this respect in favour of a Union which by the nature of its organization and under its rules of procedure is its own court of last resort on any issue between itself and its members and thus, if the principle of the Union Shop were granted, the court of last resort on the issue of who should be dismissed or not dismissed from employment by the Employers.

2. The Union admits that it now embraces a membership of 94 per cent of the total potential number of Employees: evidently it is flourishing without the protection of the Union Shop clause and in so far as concerns its alleged fear of inroads from predatory rivals, the present percentage of its membership would seem to guarantee it in this respect. If without a Union Shop clause the Union has grown to its present strength, it would seem to add more to its stature and prestige that it should grow even greater still on its own merits and not by coercing non-members into

joining by facing them with the dilemma of joining the Union or losing their jobs.

3. Admittedly, the Union now before this Board has had a good record; admittedly, the statement on page 3 of the Union's Brief is true, namely:—

As workers in the railroad industry who carried on so successfully during the war, we are conscious of our contribution to the development of this industry that was a tremendous factor in assisting to bring about such a successful termination of hostilities, with victory to the Allied Forces, and as workers in the Motive Power and Car Departments in the Canadian railroad industry, we believe that our efforts are worthy of recognition.

The Union claims that its record of good behavior is virtually a guarantee that the monopoly it would obtain as the result of the Union Shop clause would not be abused to the detriment of the Railways.

The expediency or in expediency of a Union Shop clause cannot, however, be determined by the character of those who, for the time being, may happen to administer the affairs of any particular union; under democratic principles, control of any particular union is not perpetuated in the hands of any particular individuals; neither, for that matter, is there any assurance that the Union which today dominates a Union Shop will continue to dominate it in future. Once the principle of the Union Shop is admitted by any particular employer or group of employers, it is difficult to abolish the principle. The soundness in principle of the Union Shop can hardly be admitted in the case of one Union and denied in the case of another, its validity must be assessed independently of personalities and identities; it is either good or bad in principle; if bad in principle, it does not become good merely because of those in whose hands its control may be vested at any given time. I am therefore not convinced that the identity of the applicants is in itself sufficient warrant for the granting of their application.

4. Certainly in the case of the publicly-owned Canadian National Railways and its subsidiaries, the management of the Railway would be acting in conflict with the declared policy of the Canadian Government if they agreed to accept the principle of the Union Shop. The Canadian Government Statement of Policy quoted in paragraph 24 of the Employers' Brief is quite specific in this particular, where it reads:—

Broadly speaking, all citizens of Canada have equal rights in the matter of employment in Government undertakings. As Crown companies are owned by the public, their directors are expected to be careful to see that no provision is included which would create discrimination as between one employee and

another, or which would have the effect of excluding any citizen from employment therein because he did not belong to a particular union.

It would be truly an anomalous situation if a Canadian taxpayer whose work and conduct was satisfactory to his employer, the Canadian National Railways, had to be discharged merely because he exercised his freedom of personal choice and refused to join the applicant-Union, yet under the regime of the Union Shop this would be the case.

5. While it imposes no obligation on the employers and employees in our Canadian Railways to follow suit, it is not irrelevant that in spite of the trends in so many other employer-employee relationships in the United States, The Railway Labour Act in definite terms forbids the adoption of the Union Shop principle as regards carriers subject to that Act. One would assume that with the present strength of labour in the United States, if the adaption to the railways of the Union Shop principle was as necessary or expedient in the mutual interests of the railways and their employees as the present employee-applicants claim, pressure would have been exerted effectually and successfully to render this possible under circumstances in the United States paralleling the circumstances of the case now before this Board.

I have the honour to be sir,

Your obedient servant,
(Sgd.) Wm. F. MACKLAIER,

Ottawa, May 7, 1946.

Minority Report

The Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The purpose of a Board of Conciliation is to conciliate and from that point of view the proceedings of this Board has been disappointing. The Railway Unions had asked for a closed shop which the Employers had refused, and the Board met to hear the contending submissions of the parties, at the conclusion of which the spokesmen were asked by the Board whether they wished the Board to consider any alternative proposal or to confine itself to the one issue that had been argued. In other words, the men were asked whether they were willing to abandon the concession for which they had asked and argued for an undefined something else which they had neither considered nor discussed, and the Employers were put in an equally embarrassing position. They were asked to constitute the Board a prospecting expedition to search out concessions which they might make. It is obvious what the answers would be. As a matter of tactics neither side could abandon its position under such circumstances, and both said so.

The Board then met to consider its report, when it became manifest that the Chairman and the appointee of the Railways were opposed to the Union shop, and were prepared to so report.

The writer protested that such preemptory action would be provocative rather than conciliatory, and asked for further hearings. At his solicitation, an appointment was made when the Union Representatives might again appear, the purpose being to enable them to submit alternative proposals in the light of the pending adverse majority decision. President, H. Smith, and Vice-President, F. Broad, attended and in an informal gathering in the presence of representatives of the Railway, and all three members of the Board, met the Chairman's announced opposition to their demand with an alternative proposal which the management officials did not preemptorily reject. They argued the utter unfairness of extending to the man who refuses to join the Union every benefit which the Union with much effort has secured for its members. One of these benefits is the provision as to seniority, and they proposed as an alternative to the Union Shop that in event of lay-offs this provision do not apply to non-Union men. Such an arrangement would give to the Union man some advantage in return for his Union's activities over the man who is not a party to the collective agreements in force and who pays no Union dues.

It looked as though progress was being made towards continued amicable relations, and after a lengthy discussion an adjournment was taken until early in June when the Board would meet again. In the meantime the parties were to continue the discussions among themselves with a view to settling upon an acceptable compromise.

On the 5th of June, I wired the Chairman as follows:

Smith cannot attend Conciliation meeting until fourteenth. Wire if convenient or otherwise.

This wire is explained by the fact that the 10th of June, had been mentioned as the suggested date for the re-assembling of the Board.

To this wire the Chairman replied as follows:

Do not see necessity for any further meeting. I have hopes of submitting a proposal which would be unanimous. Would suggest that question of any further conference be postponed indefinitely pending my further submission to you.

My next communication from the Chairman was his letter of the 17th of June, notifying me that he had filed his report with the Minister, and expressing regret that—

We could not agree on a common ground, but any proposal I was prepared to make

had to be unanimous before it could be of any value and as I could not arrive at that result I have filed my recommendations in approximately its original form.

Who the parties were who could not agree upon a common ground, I do not know, and President Smith, of the Employees says he does not know; he was not consulted.

In the concluding paragraphs of his Report the Chairman says:

Since the adjournment on May 10th, I have endeavoured to arrive at some satisfactory settlement, as it was agreed that there would be no necessity for a further meeting of the Board.

I made no such agreement, as the above quoted exchange of telegrams makes clear. The Chairman says that he has "explored various possible solutions to the problems," which is not quite consistent with his assertion that—

The parties hereto restricted their application to one question in regard to a Union Shop.

With the Chairman's exploration of possible solutions I am unfamiliar and I disassociate myself with their failure. It has not been by negotiations so conducted that the parties have in the past—

Been able to meet each other in a spirit of co-operation and settle their difficulties without any serious injury to either of them or to the general public.

The Chairman bases his decision against the Union's request for a Union Shop on the "fundamental objection" that the "liberty of the individual is at stake."

Liberty to do what? To take the fruits of other men's labour. To reap where one has not sown. To absorb a benefit for which others have paid? Does the liberty of the individual require that of two men working at the same bench one may refuse to co-operate in a common endeavour and to pay anything towards the achievement of a common goal, and yet must be permitted to share in every benefit which the other workman may secure by enterprise, courage, effort and outlay. That is not liberty; it is not even common decency, and yet that is the effect of a decision which refuses to require all workmen to belong to the Union or the compromise demand that he who does neither work or pay shall not enjoy as completely as he who does.

The substance of the Employees' first and formal demand was set forth by the Employees' in a draft clause, which it was suggested be added to Rule 157, of Wage Agreement No. 6, now currently in force as between the parties. The clause provided in substance that all Employees affected by Wage Agreement No. 6, "Shall become and

remain members of the Organizations parties thereto and that all new Employees shall within three months from the commencement of their employment with the various railroads become and remain Members."

That is to say, the Employees are asking for what is known as a "Union Shop" provision under which all men employed in the classes of labour affected by the collective agreement mentioned must be or become members of the appropriate Union.

It is further provided in the draft clause that "in case of suspension or expulsion of any member of the various Employees' Organizations, the Companies affected agree to suspend or dismiss from the service such members upon satisfactory proof of such misconduct alleged for which suspension or expulsion is made."

The Employees gave evidence that approximately 94 per cent of the men eligible are members of the constituent Unions, which leave about 6 per cent of the staff outside the Unions, but enjoying the benefits of the Union's activities. This means that the Union members pay from Twelve to Twenty-one Dollars per year in order to secure benefits which are extended equally to the non-Union minority free. This is manifestly unfair, and the Employees argue that the outsiders should be required to join their fellow workers in the Union and help pay for the advantages which they all enjoy.

A still more compelling argument in favour of the Union demand is the Employees' plea for what they term Union Security. They point out to the Employers that the Railroads have been practically free of "labour trouble" throughout the entire war, and for many years previously. Not a wheel has ceased to turn as a result of Union action for a great many years. Railroads are public utilities and the nation has enjoyed an uninterrupted service, while the Company and the Employees have patiently worked out their difference without the losses to themselves or the public consequent upon industrial warfare. This excellent record has been due to the sense of responsibility of the Union members and their elected representatives, and to the wise reasonableness of the Railroad management.

The Union spokesmen contend that such a record should count for something and that the Railroads should be prepared to deal with the Union only. After all these years of service by the Union to the Employees and to the industry, the individual who will not join the Union should not work for the Railroad. At the present time the non-Union employee is entitled to take his grievance to the highest authority, side-tracking the Union and its grievance committees, which gives rise

to all sorts of irregular and disturbing conditions.

The Union is held accountable for the mass actions of the Employees, and yet the Company by its insistence on dealing with those not within the Union ranks is facilitating a disorderly condition.

Not only so, but such a condition invites action by irresponsible groups. It is impossible to maintain the discipline which is expected of the Union when individuals or groups may defy the majority and walk out on the Union without loss of advantage or of position.

It is pointed out that difficult times are ahead. Staffs are now being reduced. The full employment of the war years is not likely to continue and the community is in a disturbed state of mind. Should an upheaval take place among the workers, the Employers would have no one to blame but themselves.

"If there is trouble ahead", said a spokesman for the Union, "let it take place in the Union Committee Room rather than upon the job."

In answer to this, the Railway Association declares that it is the right of management to select its own employees and objects to "arbitrary power" being placed in the hands of Union officials. I can appreciate the desire of Management to run the employment show to suit itself, and undoubtedly the Union Shop arrangement would place additional authority in the hands of the Union officials, but I would not call it "arbitrary power." The officials of these Railway Unions are all elected for short terms, and the Constitutions of these Unions are most democratic. Important decisions are made by the Membership, and as in the Nation at large minorities are expected to accept the decisions of the majority, retaining the right of free speech and advocacy.

It is suggested that were the present Railway Unions given a Union Shop, other less responsible organizations might demand the same concession. Were this the first time such a thing had been demanded there might be some force in the argument, but many thousands of workers in Canada have already achieved such conditions, notably in the building industry, the pulp and paper industry, the printing industry, many branches of the metal trades industry and in all the shipyards on the Pacific coast.

To my own knowledge there was time when the Employees of the needle trades in Toronto fought street battles every Spring as an accompaniment to their annual wage negotiations. This condition ceased with the passing of the Industrial Standards Act, and out of the negotiations which it facilitated came the Union Shop in most of these allied trades.

The employee is required to be a member of the Union, and in return the Union performs important services for the industry, such as the finding and distribution of labour, settling prices, regulating conditions and adjusting grievances.

Where the Union Shop is in effect, the trouble maker is much less in evidence, emotional groupings are suppressed and wild-cat strikes are largely unknown.

It is therefore unnecessary to worry about the effect elsewhere of the adoption of the Union Shop by the Railroad workers, and moreover, this Conciliation Board is not informed of conditions elsewhere. It should decide the issues before it on the merits.

These Unions are now the Bargaining Agents by law within their trades and employment for all employed, union members or otherwise.

Their officials represent 94 per cent of these employed and they have served all employed. In my judgment, they are entitled to the Membership of all employed. The argument that it would give the Union additional power is unsound. They have a good deal of power now, and the years have shown that they do not abuse it. Men in responsible positions require authority if they are to give service.

It is the abuse of power that is to be avoided, and these Union officers are men of long experience, democratically elected, who can be trusted. They have well earned such confidence.

In my judgment, the Union's request for a Union Shop is reasonable and should be conceded by the Employer. It is only just that those who enjoy the benefits of joint action should join in and co-operate with their fellows, and pay their share of the cost. The Unions in question are well lead and democratically controlled, with a splendid record, and should be assisted by the Employer, not hampered, in their operations or opposed in matters of membership and undermined. In the public interests this question should be settled so that the railroad may continue to operate as harmoniously in the future as they have done in the past. The public has a vital interest in this dispute.

If the exact terms of the first demand are for some good reason objectionable to the Employer, then negotiations should continue until the appropriate solution is found. Problems have been met in the past and solved by good-will intelligently applied, and the fact that this particular Conciliation Board has been a failure is no good reason why negotiations should not continue.

Dated at Ottawa, this 3rd day of July, 1946.

(Sgd.) A. W. ROEBUCK,
The Senate,
Ottawa.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020

Officers of the Industrial Relations Branch dealt with 29 industrial disputes during the month of July, involving 95,507 workpeople employed in 597 separate establishments.* Of these, 20 were new disputes which originated during the month and 9 were situations which had been untermiated as of June 30, and received further attention in July. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal and Fredericton, N.B. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North western Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and the officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Chemical Products Workers, Amherstburg, Ont.—On July 22, a request was received from the Minister of Labour for Ontario for the appointment, under the provisions of Order in Council P.C. 4020, of an Industrial Disputes Inquiry Commission to investigate a dispute between Brunner, Mond Canada, Limited, Amherstburg, Ont., and its employees represented by Local 89, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America. The Company's employees had gone on strike on July

12, 1946, in an attempt to secure mutual agreement upon the Union's demands with regard to wages, hours of work and other matters. On July 24, the federal Minister of Labour appointed Police Magistrate J. A. Hanrahan of Windsor, Ont., as a Commissioner to deal with the dispute. His appointment was made pursuant to Section 8 of the Order in Council which enables the Minister of Labour to cause an investigation to be made into any situation which, in his opinion, may interfere with the effective transition to a peacetime economy in Canada. In this connection representations had been made to the Department of Labour that the interruption in the Company's production of soda ash was having such a serious effect upon the manufacture of glass containers that there was reason to fear that canning companies would be unable to process more than a small part of the season's crops of tomatoes, fruit and other foodstuffs. At the end of the month the report of the Commissioner had not been received.

Electrical Appliance Workers, Hamilton, Ont.—The Minister of Labour for Ontario on July 22 made representations to the federal Minister of Labour, to the effect that a strike by some 4,000 employees of the Canadian Westinghouse Company, Ltd., Hamilton, Ont., which had commenced on July 5, 1946, was having an adverse effect upon a large number of industries depending upon the Company's products. It was stated that many of these related industries would be compelled to close down in the immediate future unless production was resumed at the Westinghouse plant, and the appointment of an Industrial Disputes Inquiry Commissioner under Order in Council P.C. 4020 was requested. In compliance with this request the Minister of Labour for Ontario appointed His Honour Judge J. C. Reynolds, of Kingston, Ont., to inquire into the dispute and endeavour to secure a settlement. The employees affected were members of Local 504, United Electrical Radio and Machine Workers of America. The Commissioner's report had not been received at the end of the period under review.

Chemical Products Workers, Windsor, Ont.—The seriousness of a continuing strike by employees of the Windsor Works of Canadian Industries Limited, Windsor, Ontario, gave rise to the appointment on July 18th of His Honour Judge A. Cochrane, of Brampton, Ont., as an Industrial Disputes Inquiry Commissioner under Section 8 of Order in Council P.C. 4020. The employees, numbering some 530, members of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195, had gone on strike on June 27, 1946, as a

result of a dispute with the company over demands concerning wage rates, hours of work, vacations with pay and job evaluation.

The appointment of the Commissioner was made following consultations with the Minister of Labour for Ontario, and in the light of representations from various sources that the salt products of the Company were urgently needed by food processing and preserving plants, while its chlorine products were in vital demand by water purification plants throughout Canada. It was reported that the chief demands of the Union were for an increase of 25c. per hour in wages and a forty-hour week, and that the Company had offered wage increases for various classifications ranging from 7c. to 14c. per hour. At the end of July the report of the Commissioner had not been received.

Brass Factory Workers, New Toronto, Ont.—On July 22nd, on the recommendation of the Minister of Labour of Ontario, the Minister of Labour appointed Mr. L. W. Brockington, K.C., C.M.G., of Ottawa, an Industrial Disputes Inquiry Commissioner under the provisions of Section 8 of Order in Council P.C. 4020, as amended, to investigate a dispute between Anaconda American Brass Limited, New Toronto, and its employees, members of Local 811, International Union of Mine, Mill and Smelter Workers (C.I.O.-C.C.L.). The employees, approximately 1,000 in number, had been on strike since May 18 as a result of the breakdown of negotiations with respect to wage rates, hours of labour, union security, seniority rules, and other matters usually covered in a collective agreement. The Commissioner had not completed proceedings at the end of the month.

Rubber Factory Workers, Ontario.—Strikes at ten rubber manufacturing plants in Ontario, which commenced on June 24, were un-terminated at the end of July, the employees concerned having rejected the recommendations made by an Industrial Disputes Inquiry Commissioner, His Honour Judge J. C. A. Cameron, of Belleville, as a basis for settlement of the matters in dispute (L.G., July, 1946, p. 921). The plants closed by strike action were as follows: Dominion Rubber Company, Limited (three plants at Kitchener); Goodyear Tire and Rubber Company of Canada, Limited (plants at New Toronto and Bowmanville); Firestone Tire and Rubber Company of Canada, Limited, Hamilton; B. F. Goodrich Rubber Company of Canada, Limited, Kitchener; Gutta Percha and Rubber, Limited, Toronto; Seiberling Rubber Company of Canada, Limited, Toronto; and Barringham Rubber Company, Limited, Oakville. More

than 10,000 workers were directly affected. Employees of the Kaufman Rubber Company, Limited, Kitchener, also rejected the Commissioner's recommendations, but elected to remain at work. About the middle of July the Department was notified of the settlement of matters in dispute between the Viceroy Manufacturing Company, Limited, Toronto, and its employees (who had not taken strike action), following negotiations on the basis recommended by the Commissioner. Employees of all the aforementioned companies are represented by various local unions of the United Rubber, Cork, Linoleum and Plastic Workers of America (C.I.O.-C.C.L.).

Metal Miners, British Columbia.—Reference was made in the July issue of the *LABOUR GAZETTE* to the appointment of the Honourable Mr. Justice Gordon McG. Sloan, Chief Justice of British Columbia, as an Industrial Disputes Inquiry Commissioner under the provisions of Section 8 of Order in Council P.C. 4020, as amended, to deal with matters in dispute between twelve British Columbia metalliferous mining companies and their employees, members of various local unions of the International Union of Mine, Mill and Smelter Workers (C.I.O.-C.C.L.). On July 13, the Commissioner reported to the Minister of Labour that he had made no progress towards a settlement, because of the employees' desire and the employers' refusal to bargain on an industry-wide, or province-wide, basis. The Commissioner having advised that he would not have time to confer with each company and its employees individually, Mr. G. R. Currie, Industrial Relations Officer stationed at Vancouver, was instructed to assist the Commissioner with a view to bringing about settlements of matters in dispute between the various companies and their respective employees. Strikes at the twelve mines, which had commenced on July 3, were untermi- nated at the end of the month. About 2,500 workers were affected.

Foundry Workers, British Columbia.—On July 22, on the recommendation of the Minister of Labour of British Columbia, the Minister of Labour appointed Mr. David Whiteside, K.C., of New Westminster, an Industrial Disputes Inquiry Commissioner under the provisions of Section 8 of Order in Council P.C. 4020, as amended, to deal with matters in dispute affecting twenty-nine foundries in Vancouver area and their employees, numbering approximately 800, some of whom are members of Local 281, International Moulders and Foundry Workers' Union of North America (A.F.L.-T.L.C.C.) and some of whom are members of Local 289, Inter-

national Union of Mine, Mill and Smelter Workers (C.I.O.-C.C.L.). A strike had been called at certain foundries on May 17 by Local 289, International Union of Mine, Mill and Smelter Workers, following the breakdown of negotiations in regard to wage rates, hours of labour and union security, and subsequently production was stopped at other foundries when members of Local 289 of the International Union of Mine, Mill and Smelter Workers began picketing those establishments where Local 281, International Moulders and Foundry Workers' Union of North America, is bargaining representative for the employees. At the end of the month the strike was untermi- nated and the Commissioner had not completed his investigation.

Rubber Workers, Acton Vale, P.Q.—Late in June, the Chief Executive Officer of the Quebec Wartime Relations Board requested the federal Department of Labour to appoint an Industrial Disputes Inquiry Commission under the provisions of Section 5 of Order in Council P.C. 4020 to investigate charges that Acton Rubber Limited, Acton Vale, P.Q., had dismissed or discriminated against two of its employees for the reason that they were members of or working on behalf of a local union of the Trades and Labour Congress of Canada. A preliminary investigation into the charges had been made earlier by an officer of the provincial Department of Labour. On July 5, the Minister of Labour appointed Mr. Lawrence Hart, K.C., of Montreal, as a Commissioner to conduct an investigation. The report of the Commissioner indicated that, following several conferences with the parties, the charges of discrimination were withdrawn by the union's representatives.

Garment Workers, Toronto, Ont.—On July 3, the federal Minister of Labour received a request from the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commission under the provisions of Section 5 of Order in Council P.C. 4020 to investigate allegations that Buchan Sinclair Limited, of Toronto, had dismissed 10 of its employees because of union membership and activity. The charges were laid by the International Ladies' Garment Workers' Union. In compliance with this request the Minister of Labour on July 12 appointed His Honour Judge J. Ambrose Shea, of Toronto, to deal with the dispute. Upon the request of the Union, it was mutually agreed between the parties that the Commissioner's inquiry should be postponed until September.

Plastics Workers, Toronto, Ont.—Following a preliminary investigation by an Industrial Relations Officer, the Minister of Labour for

Ontario made a request to the Minister of Labour of Canada during the earlier part of July for the appointment of an Industrial Disputes Inquiry Commission to investigate a complaint of the International Chemical Workers' Union that one of its members had been dismissed by the Reliable Toy Company, of Toronto, because of union activity. His Honour Judge J. Ambrose Shea, of Toronto, was appointed a Commissioner on July 12 to investigate the situation. A hearing of the case was postponed until September because of the absence of one of the principal witnesses.

Aircraft Workers, Hamilton, Ont.—Allegations that the Cub Aircraft Corporation Limited, of Hamilton, Ontario, had dismissed or discriminated against 21 of its employees because of union activity were brought to the attention of the Department of Labour during July by the provincial Minister of Labour, who requested that an Industrial Disputes Inquiry Commission be appointed to inquire into the circumstances. On July 9, His Honour Judge D. J. Cowan, of Brantford, Ontario, was appointed Commissioner under the terms of Section 5 of Order in Council P.C. 4020 to investigate the charges, which had been made by the International Association of Machinists. Following a joint meeting between representatives of the parties, the Commissioner reported that, under the circumstances disclosed at the conference, the Union decided not to call any evidence. The parties were notified accordingly that the case was considered to be closed.

Retail Coal Distributors, Ottawa, Ont.—In mid-July the Ontario Department of Labour brought to the attention of the federal Department of Labour a complaint made by a representative of the United Distribution Workers' Union, Local No. 438, to the effect that one of its members had been dismissed because of union activity by John Heney and Son Company, Limited, of Ottawa. Preliminary investigation of the circumstances was made by an Industrial Relations Officer of the federal Department, who reported back to the provincial authorities that the appointment of an Industrial Disputes Inquiry Commission under Order in Council P.C. 4020 was warranted. The Ontario Minister of Labour then made a formal recommendation for the appointment of a Commissioner, and on July 31, the federal Minister of Labour appointed His Honour Judge J. P. Madden, of Ottawa, to conduct an investigation into the union's allegation.

Textile Workers, Carleton Place, Ont.—In the June issue (page 774) reference was made to the appointment of Mr. L. W. Brockington, K.C., C.M.G., on May 27, 1946, as Industrial

Disputes Inquiry Commissioner under Section 8 of P.C. 4020 to investigate a dispute between Renfrew Woollen Mills, Limited, Carleton Place, Ont., and its employees represented by Local 103, United Textile Workers of America. Employees of the Company had been on strike since April 2 in support of their demands for wage increases, a 40-hour work-week, two weeks' holidays with pay and other concessions.

The Commissioner was successful in having the employees return to work on June 11, it being provided in the terms of the strike settlement that an employees' representation vote would be taken under the supervision of the Federal Department of Labour to determine whether or not the employees wished to be represented by Local 103, United Textile Workers of America, and that, if so, representatives of the Company and the Union would meet for the purpose of negotiating a new agreement. Failing agreement between the parties after fourteen days, the Commissioner could be recalled to assist in the settlement of the matters remaining at issue between them. It was also agreed that a "no strike" clause would be inserted in any agreement reached. The representation vote agreed to was conducted on June 14 and resulted as follows: number of eligible voters, 152; number of votes cast, 131; number voting in favour of being represented through Local 103, United Textile Workers of America, 86; number of negative votes, 44; spoiled ballots, 1.

On July 6, in accordance with the provisions of the strike settlement the Commissioner's assistance was requested in the settlement of the matters remaining in dispute between the parties. On July 22, the Commissioner reported to the Minister of Labour that he had succeeded in bringing the parties into agreement. With respect to wages, the proposals put forward by the Company were accepted with minor adjustments, increases in some classifications amounting to 10 per cent. It was also provided that the agreement would contain a voluntary revocable check-off; that Dominion Day, Labour Day, Christmas Day and New Year's Day would be recognized as statutory holidays and that vacations with pay would conform with the requirements of the Ontario Vacations with Pay Act.

Merchant Seamen, Great Lakes and St. Lawrence River—The June and July issues of the LABOUR GAZETTE (pp. 776, 916) carried summaries of the chief developments in the dispute over working hours and other matters between the Canadian Seamen's Union and various shipping companies operating vessels on the Great Lakes and St. Lawrence Waterways. During July numerous conferences with the parties to

the dispute were held by the Industrial Disputes Inquiry Commissioner, Hon. Mr. Justice S. E. Richards, while active control of the operations of some 29 companies continued to be exercised by Capt. E. S. Brand, the Government-appointed Controller. On July 6 Capt. J. E. Matheson, Regional Director of the Merchant Seamen's Manning Pool, Department of Transport, Montreal, was appointed as a Deputy Controller by the Minister of Labour to assist the Controller with regard to personnel matters and the movement of vessels at the Port of Montreal. On July 17, the Minister of Labour, under the provisions of Order in Council P.C. 2556, also appointed Mr. H. L. Rowntree, Barrister, of Toronto, as a Deputy Controller to assist Captain Brand at that point.

The report of the Commissioner had not been received at the end of July.

Steel Workers, Ontario and Nova Scotia.—It was reported in the July issue of the *LABOUR GAZETTE* (p. 915) that negotiations between The Steel Company of Canada, Ltd., Hamilton, Ont., Algoma Steel Corporation, Ltd., Sault Ste. Marie, Ont., and the Dominion Steel and Coal Corporation, Ltd., Sydney, N.S., and their employees as represented by the United Steelworkers of America had culminated in strike action on July 13-15. The strike was called immediately after the Government announced that it was appointing the former wartime Steel Controller, Mr. F. B. Kilbourn, of Montreal, as Controller of the primary steel operations of the three companies, and requiring the employees to continue to perform the duties of their employment.

On July 16, it was ordered by the House of Commons that its Standing Committee on Industrial Relations be directed and empowered to investigate immediately all issues connected with the present industrial unrest in Canada. The Committee made the steel strike its first order of business and on July 18, commenced hearing witnesses. The proceedings before the Standing Committee on Industrial Relations will be reported subsequently in the *LABOUR GAZETTE*.

Farm Implement Workers, Toronto and Brantford, Ont.—During July the Minister of Labour for Ontario reported to the federal Minister that a strike of employees of the Massey-Harris Co., Ltd., was considered to be imminent as the result of the breakdown of negotiations for the renewal of a collective agreement between the company and the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America. The provincial Minister recom-

mended that an Industrial Disputes Inquiry Commission be appointed to investigate the situation under the provisions of Section 8 of Order in Council P.C. 4020 because of the serious effects which would result in Canada and other countries from any curtailment in the production of farm implements.

On July 5, the Minister of Labour for Canada appointed Mr. Leonard W. Brockington, K.C., of Ottawa, to investigate the situation as it affected one plant of the Company in Toronto and two plants in Brantford, Ont. On July 13, the Commissioner reported the terms of a settlement which was accepted by the company and, following presentation to the members, by the joint committee of the union representing both the Toronto and Brantford workers. It was agreed that there would be a general wage increase of 10 cents per hour payable as and from July 1, 1946 (replacing a previous company offer of 10 cents per hour, payable as to 7½ cents on present acceptance, and as to 2½ cents on September 1). The company would withdraw all penalty clauses previously proposed, and there would be substituted therefor such amended or alternative proposals as might be agreed upon after negotiations between the parties. Notwithstanding the general wage increase, the parties agreed to enter into negotiations for an adjustment of general wages based upon all ascertainable and applicable facts, if and when during the currency of the Agreement there should be an advance of four points, or any multiple thereof, above the Cost of Living Index for September 1, 1946. If the parties were unable to agree on such wage adjustments after 30 days' negotiation, application might be made to the War Labour Board competent to deal therewith. The company would also put into effect during 1946 two weeks' holiday with pay for all employees with five years' service, instead of postponing same until 1947.

It was understood that prior to the appointment of the Commissioner, the parties had agreed upon a reduction of the work week from 48 to 45 hours, with payment of time and one-half rates for hours worked in excess of 45 per week.

Newspaper Compositors, Vancouver, B.C.—The June issue of the *LABOUR GAZETTE* contained on account (page 778) of developments in a strike affecting composing-room employees of various newspapers owned by the Southam Company, Ltd., and of the Winnipeg Free Press Co., Ltd., and also reproduced Reasons for Judgment of the Wartime Labour Relations Board (National) (page 756) denying an application for intervention made by the International Typographical Union with a

view to the completion of a collective agreement between the Southam Company, Ltd., and the union, covering groups of employees in each of several newspaper plants operated by the Company in five cities. One of the establishments involved in each of the foregoing cases was the Vancouver Province Division of the Southam Company.

On July 3, the Minister of Labour for British Columbia made a recommendation to the federal Department of Labour that a Conciliation Board be appointed under the provisions of Order in Council P.C. 1003 to investigate the situation affecting the Vancouver *Daily Province* and Local 226 of the International Typographical Union. The federal authorities took the position that a Conciliation Board should not be established under P.C. 1003 while a strike was in existence in contravention of the Regulations, and, following further consultation with the provincial Minister, the Minister of Labour for Canada on July 4, appointed an Industrial Disputes Inquiry Commission pursuant to the provisions of Section 8 of Order in Council P.C. 4020, as amended. The members of the Commission were Brig. Sherwood Lett, Chairman, Mr. C. B. Delbridge, member representing the employer, and Mr. R. K. Gervin, member representing the employees.

The Commission held thirteen meetings, some being in the nature of public hearings and others being conferences in private with

the representatives of the parties, either together or alone. Its findings, as contained in a report to the Minister of Labour on July 19, were that no labour dispute in the ordinary sense existed between the union and the publisher of the Vancouver Province Division of the Southam Company. The work stoppage at Vancouver was not of local origin, and the real issue was that the International Typographical Union wished the Southam Co. Ltd., as a Company, to undertake that all its local publishers should enter into agreements containing a clause whereby such publishers would be bound to respect and observe the "laws" of the I.T.U., leaving for negotiation between the local unions and the local publishers such matters as hours of work, work conditions and the like. The Commission reported that the persons capable of settling the issue were the principal officials of the I.T.U. and the Southam Co. Ltd., and recommended that the Minister of Labour endeavour to bring those officials together for the purpose of resuming their discussions with a view to reconciling their respective policies.

Later the Minister of Labour announced that the Hon. Mr. Justice S. E. Richards of Winnipeg, had agreed to act informally as a conciliator, and would try to arrange joint conferences between the heads of the company and the union.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not possible, because of limitation of space, to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying

KIMBERLEY AND CHAPMAN CAMP, B.C.—THE CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA, LTD. AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 651.

Agreement to be in effect from June 1, 1946, to May 31, 1947, and thereafter subject to 2 months' notice. The company recognizes the union as the exclusive representative for all eligible employees. No discrimination against employees because of union activity. Negotiations on "union security" to be re-opened after six months from the date of the agreement.

Hours of work: 40 to 48 per week. The company agrees to endeavour to rearrange work in such a way that within 12 months the regular working week of every employee will be either 40 or 42 hours per week or the equivalent thereof. Overtime: time and one-half for work in excess of 8 hours in any one day and, subject to the approval of the National War Labour Board, for work on regularly assigned seventh day off duty and on certain statutory holidays. Vacation: one week with pay for employees with one year's service with the company, two weeks with pay for those with 5 or more years' service, while those with two months but less than one year one half day with pay for each month of service.

Basic hourly wage rates: labourers 77 cents, helpers 80 cents, operators 83 to 89 cents, chief operators and repairmen 92 to 98 cents, timbermen and miners (drift or stope) 95 cents; miners (raise or shaft), painters, and steam engineers—third class 98 cents; chief flotation operators and journeymen tradesmen \$1.01, toolmakers \$1.04, steam engineers (second class) \$1.07, and barmen \$1.10. The company also agrees to pay to each employee an "interim adjustment" not to exceed 40 cents per hour, all of which is subject to the approval of the

National War Labour Board. For hours worked on the afternoon shift a premium rate of 3 cents per hour will be paid and for the night shift 5 cents per hour extra.

Provision is made for a Labour-Management Production Committee, seniority rights and grievance procedure.

Manufacturing: Textiles and Clothing

BRANTFORD, ONT.—HARDING CARPETS LIMITED AND UNITED TEXTILE WORKERS OF AMERICA, LOCAL 109.

Agreement to be in effect from June 10, 1946, to January 31, 1947, or 1948, if 60 days' notice not given. The company recognizes the union as the sole and exclusive bargaining agency for all eligible employees. Check-off: the company will deduct union dues monthly from all union members; and also will deduct from all employees for whom the union is the bargaining agency and who are eligible for membership in the above local and who are hired after the signing of the agreement.

Hours of work: for day workers, 9 per day Monday through Friday, a 45-hour week; for shift workers, 8 hours per shift. Overtime: time and one-half for work in excess of 45 hours in one week and for work on Sundays (or other assigned day) and holidays. Vacation: one week with pay equal to 2 per cent of earnings during previous 12 months' period for employees with less than 5 years' service with the company, employees with more than 5 years' service one week with pay equal to 4 per cent of earnings during previous 12 months. There shall be two 10-minute rest periods during each full shift as well as 5 minutes for washing immediately prior to each meal hour and at the end of each shift.

Wage rates and ranges of wage rates shall be those presently in effect. Organized shifts not occurring during regular working hours, special short shifts, and night shifts to be paid regular rates, plus 10 per cent for all hours up to and including 45 in one week. This does not apply to engineers and firemen nor to special short shifts unless the employee is on a rotating shift, or on a night shift that ends at 11 p.m. or later.

Provision is made for seniority rights and grievance procedure.

WOODSTOCK, ONT.—FIRESTONE TEXTILES LIMITED AND UNITED TEXTILE WORKERS OF AMERICA, LOCAL 115.

Agreement to be in effect from January 5, 1946, to January 5, 1947, and thereafter subject to 2 months' notice. The company recognizes the union as the exclusive bargaining agency for all eligible employees. No discrimination or intimidation because of union or non-union membership.

Hours of work and overtime: subject to the approval of the Regional War Labour Board time and one half will be paid for all hours worked in excess of 48 hours per week, also for work on Sundays and 7 specified holidays. Vacation: one week with pay for employees with one year of continuous service, and when the Regional War Labour Board authorizes, employees with 10 years continuous service are eligible for 2 weeks with pay.

Wage rates: a joint application for authorization for revision of wages to be submitted to the Regional War Labour Board. This shall be the only application during the life of the agreement. Subject to the approval of the Regional War Labour Board 5 cents per hour bonus will be paid to all employees working on a permanent night shift between 6 p.m. and 6 a.m.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Miscellaneous Wood Products

OTTAWA, ONT.—JAMES DAVIDSON'S SONS AND NATIONAL UNION OF WOODWORKERS, LOCAL 6.

Agreement to be in effect from May 1, 1946, to April 30, 1947, and thereafter from year to year subject to 30 days notice. There shall be no intimidation or discrimination of union or non-union members. Check-off: the company agrees to deduct union dues monthly upon voluntary authorization and remit same to the union.

Hours of work: schedule presently in effect shall continue until changed by government regulations. Five specified days will be paid holidays for workers with 6 months' service with the company who have not been absent from work without permission on any of the five full working days immediately preceding such holiday or upon any of the working days in the calendar week in which such holiday occurs.

Wage rates presently in effect to continue for the duration of the agreement.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Metal Products

MONTREAL, P.Q.—WARDEN KING LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 528.

Agreement to be in effect from March 29, 1946, to March 28, 1947, and thereafter from year to year subject to 60 days' notice. No discrimination by company or union because of membership or non-membership in the union. Check-off: company to deduct union dues monthly from employees' pay upon authorization and remit to the union.

Hours of work: for boiler, radiator, soil pipe, soil pipe fittings and jobbing foundries, cupola and sand control, 9 per day Monday through Friday, a 45-hour week; for the rest of the plant 9½ per day Monday through Thursday, 9 on Friday, a 47-hour week. Overtime: time and one half for work in excess of the above regular hours and for all work on Saturday afternoons, double time for hours worked consecutively after midnight by a day shift worker who continues work beyond the end of regular shift and for all work on Sundays and 8 specified holidays. Two 10-minute rest periods per shift shall be allowed as well as 10 minutes before quitting time at the end of each shift for putting tools

away and washing. Vacation: one week with pay for employees with one to five years' service with the company, 2 weeks with pay for those with 5 years' service or more.

Wages—a general increase of 2½ cents per hour retroactive to March 4, 1946, shall be granted subject to the approval of the Quebec Regional War Labour Board or National War Labour Board. The question of the general scale of wages may be reopened for discussion upon the removal of price controls by the Wartime Prices and Trade Board. Workers employed on the second and third shifts will be paid a bonus of 12½ cents per hour.

Provision is made for seniority rights and grievance procedure.

PORT WILLIAM, ONT.—CANADIAN CAR AND FOUNDRY COMPANY LTD., AUTOMOTIVE DIVISION, AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 719.

Agreement to be in effect from March 19, 1946, to March 18, 1947, and thereafter from year to year subject to 2 months' notice. The company recognizes the union as the sole bargaining agency for all eligible employees as long as the members of the local lodge have a majority of such employees. Check-off: the company will deduct union dues upon the members' authorization and remit same to the union. There will be no discrimination or intimidation of union or non-union members.

Hours of work: 8 per day 5½ days per week, a 44 hour week (except boiler room employees); when 2 shifts are worked the afternoon shift shall work 8½ hours per shift Monday through Friday; when 3 shifts are worked the afternoon shift shall work 8 hours per shift Monday through Friday and the night shift 8 hours Monday through Saturday, the day shift hours as above in all cases. All shifts shall change in rotation weekly. Overtime: time and one half for work in excess of the above hours and double time for work on Sundays, regular day off, 8 specified holidays and time after 8 hours of overtime in any one day. Vacation: one week with pay for employees with one year's continuous service of 300 days (including authorized leave), with proportionately less for those who have worked over 294 and less than 300 days. Any employee who has been employed during the year but who has been absent more than 26 days through sickness or authorized leave shall receive one half day with pay for each full month worked.

Hourly wage rates include the following: automotive and body assemblers 82 to 99 cents, bench fitters 90 and 99 cents, boring mill operators 99 cents, maintenance carpenters 90 cents and \$1.07, drivers 82 and 86 cents, installation electricians 74 to 99 cents, maintenance electricians 78 cents to \$1.11, engineers 82 cents to \$1.11, fitters 78 to 99 cents, jig and toolmakers 86 cents to \$1.15, labourers 70 cents, tooling machinists \$1.11, automotive mechanics 82 cents to \$1.07, millwrights 90 cents and \$1.11, painters 82 to 99 cents, pipe-fitters 90 cents and \$1.11, riggers 90 cents and \$1.07, riveters 86 to 96 cents, sewing machine operators 65 to 82 cents, spot welders 82 and 90 cents, maintenance tinsmiths 86 and \$1.03, tool and diemakers 86 cents to \$1.15, upholsterers 74 to 90 cents, welders 86 cents to \$1.03, and woodworkers 99 cents and \$1.11. A bonus of 5 cents per hour shall be paid for work on the second and third shifts. An employee responsible for the instruction and supervision of

other employees shall receive a rate of pay 5 cents per hour more than the highest paid worker under his supervision.

Provision is made for seniority rights and grievance procedure.

PORT ARTHUR, ONT.—PORT ARTHUR SHIP-BUILDING COMPANY LTD. AND INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS, LOCAL 11.

Agreement to be in effect from February 1, 1946, to February 1, 1947, and may be renewed for additional periods of one year. The company recognizes the union as the sole collective bargaining agency for all eligible employees. There shall be no discrimination or intimidation of union or no-union members.

Hours of work: 9 per day Monday through Friday, 4½ Saturday, a 49½-hour week. Overtime; time and one-half for work in excess of the above hours and all work on Sundays and 5 specified holidays, on 3 additional specified holidays work only if absolutely necessary and at double time rate. Vacations with pay will be granted in accordance with the direction of the National War Labour Board, dated May 18, 1944.

Wage rates and occupational classification shall be in accordance with the finding and direction, dated January 5, 1944, by the National War Labour Board.

Provision is made for an apprenticeship plan, seniority rights and grievance procedure.

Manufacturing: Non-Metallic Minerals and Chemicals

TORONTO, ONT.—LEVER BROTHERS LIMITED AND INTERNATIONAL CHEMICAL WORKERS' UNION, LOCAL 32.

Agreement to be in effect from April 5, 1946, to April 5, 1947, and thereafter from year to year subject to 30 days' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. All future employees shall become members of the union and all present employees who are now or later become members of the union shall as a condition of continued employment with the company remain members in good standing during the life of the agreement. Check-off: the company agrees upon an employee's authorization to deduct union dues monthly from the employee's pay and remit same to the union.

Hours of work: 8 per shift Monday through Friday, a 40-hour week. Overtime: time and one-half for all work in excess of these hours and for work on Saturdays and Sundays. Eight specified days are designated as paid holidays provided the employee has worked during the week upon which the holiday falls. All time worked on a paid holiday shall be paid for at the employee's normal rate in addition to the normal full day's pay. Vacation: each employee to receive one day with pay for each 5 weeks of service during the preceding 12 months.

Provision is made for seniority rights and grievance procedure.

Construction

TORONTO, ONT.—VARIOUS PAINTING, DECORATING AND PAPERHANGING FIRMS AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, TORONTO, AND DISTRICT COUNCIL.

Agreement to be in effect from June 1, 1946, to March 31, 1947, and thereafter from year to

year subject to 2 months' notice. The firms and the union agree to co-operate to maintain a closed union shop, the firms to employ only qualified union members and to hire, when extra journeymen needed, from the unemployed lists of the union. The union agrees to furnish at all times duly qualified journeymen in sufficient numbers to execute the contracted work.

Hours of work: 8 per day Monday through Friday, a 40-hour week. Overtime: time and one-half for all work on Saturdays; double time for work on Sundays and 7 specified holidays. No work to be performed on Labour Day. Vacation to conform to the Ontario government's "Holiday-With-Pay Act" as amended to include the building trades.

Basic minimum wage rates: \$1.05 per hour for skilled mechanics, \$1.10 per hour for spray painters and for swing stage men on building or steel work over six storeys.

Transportation and Public Utilities: Water Transport

MONTREAL, P.Q.—VARIOUS STEAMSHIP COMPANIES (OCEAN NAVIGATION) AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 375 (GENERAL LONGSHOREMEN).

Agreement to be in effect from April 12, 1946, to December 31, 1946, and thereafter from year to year subject to 60 days' notice. Preference of work will be given to members of above local whenever such are available.

Hours of work and overtime: 9 per day, Monday through Saturday; however both parties to the agreement shall take such steps as lie within their competence to ensure that the average number of hours per week of the workers shall not exceed 48 during the term of the agreement. Double time for work on Sundays and 2 specified holidays, also for working through meal hour and thereafter until discharged for meals.

Hourly wage rates: \$1 for work between 8 a.m. and 6 p.m., \$1.20 for work between 7 p.m. and 11 p.m., and \$1.50 for work between midnight and 5 a.m.; for working on nitrate, bulk sulphur, etc.: frozen cargo, grain trimming and bagging or work in open between decks where grain is running the rates are \$1.15 for work between 8 a.m. and 6 p.m., \$1.35 between 7 p.m. and 11 p.m., and \$1.72½ between midnight and 5 a.m., double time to be paid for work on ships in port with cargoes on fire.

SAINT JOHN, N.B.—VARIOUS STEAMSHIP COMPANIES AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 273 (GENERAL LONGSHOREMEN).

Agreement to be in effect from December 1, 1945, to November 30, 1946, and thereafter from year to year subject to 60 days' notice.

Hours of work: 8 per day or night. Overtime: double time for work on Sundays, 6 specified holidays and Saturday afternoons during four summer months which are recognized as half holidays.

Hourly wage rates: day—general cargo 98 cents, bulk cargoes \$1.08; night—general cargo \$1.03, bulk cargoes \$1.13; ten cents per hour extra to be paid for unwrapped hides and phosphate and tankage in bags, slag and bird-lime in bags; ten cents per hour extra to be paid for handling, in refrigerations, cargo that is to be carried at 26 degrees Fahrenheit or lower.

*Service: Public Administration***KITCHENER, ONT.—THE CORPORATION OF THE CITY OF KITCHENER AND CIVIC EMPLOYEES' FEDERAL UNION, LOCAL 68.**

Agreement to be in effect from January 1, 1946, to January 1, 1947, and thereafter from year to year subject to 30 days' notice. This agreement covers employees in the sewage disposal plants, garbage and sanitary disposal department, golf course, maintenance men at the former C.W.A.C. camp and cemetery and works departments except those whose normal duties are carried on in or from the City Hall other than the janitor staff. The corporation recognizes the union as the sole bargaining agency for all eligible employees. No employee will be discriminated against because of union membership. Check-off: There shall be a compulsory check-off for all employees covered by the agreement for general union purposes. This, however, shall not extend to special assessments

or to an increment to an assessment which relates to special union benefits.

Hours of work and overtime: time and one-half shall be paid to hourly paid men for work in excess of 44 hours per week and for work on Saturday afternoons, Sundays and 6 specified holidays and any other days declared statutory holidays. All hourly-paid permanent employees shall be paid for all statutory holidays. Vacation: 2 weeks with pay for all employees, sewage disposal employees are granted an extra week in lieu of working regular holidays. Sick leave is granted, as covered by a city by-law.

Wage rates: hourly—labourers 67½ cents; garbage men, truck drivers, snow plough wing men 72½ cents; flusher and snow loader operators 80 cents; mechanics 92½ cents; stationary engineers \$1.02½; weekly—labourers \$29.60; incinerator helpers \$32.60; sewage plant operators \$33.50; sewage plant engineers \$35.50 to \$37.50; snow plough and sweeper and grader operators \$38.60.

Provision is made for seniority rights and grievance procedure.

Collective Agreements Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement, the amendment of eighteen others and the correction of one of them and the repeal of one agreement, all of which are noted below. Requests for amendments of the agreements for barbers and hairdressers at St. Hyacinthe and Chicoutimi were gazetted June 22. Requests for new agreements for the shoe industry for the province and for building

trades in Montreal were also published June 22. Requests for amendments of agreements for the tannery industry for the province, for building trades at Three Rivers and for lithographers for the province were published June 29. Requests for amendments of the agreements for building trades and for retail food stores in Quebec, as well as a request for a new agreement for garages and service stations at Sherbrooke, were gazetted July 6. A request for an amendment to the building trades' agreement at Sorel was published July 13. Requests for amendments of the agreements for clockmakers at Montreal and for building trades at St. Hyacinthe were gazetted July 20. Requests for new agreements for plumbers (both English and French sections) at Montreal were also published July 20.

Orders in Council were also published approving the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

*Manufacturing: Fur and Leather Products***TANNERY INDUSTRY, PROVINCE OF QUEBEC**

An Order in Council, dated June 12, and gazetted June 22, amends the previous Orders in Council for this industry (*L.G.*, Mar. 1945, p. 349, April, p. 517; May, 1946, p. 627, June, p. 782). This amendment does not affect the summary already given.

WHOLESALE FUR INDUSTRY, MONTREAL

An Order in Council, dated June 12, and gazetted June 22, extends the term of the previous Orders in Council for this industry

(L.G., Nov., 1944, p. 1368; April, 1945, p. 517, Aug., p. 1197, Oct., p. 1520; June, 1946, p. 783) to September 1, 1946.

FINE GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated July 3, and gazetted July 13, amends the previous Orders in Council for this industry (L.G., July, 1944, p. 867, Sept., p. 1141; Aug., 1945, p. 1197, Oct., p. 1520, and previous issues). This amendment does not affect the summary already given.

WORK GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated July 3, and gazetted July 13, amends the previous Orders in Council for this industry (L.G., Oct., 1945, p. 1520; May, 1946, p. 627, and previous issues). This amendment does not affect the summary already given.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated June 20, and gazetted June 29, amends the previous Orders in Council for this industry (L.G., Aug., 1944, p. 1005, Sept., p. 1141, Nov., p. 1368; Oct., 1945, p. 1520, and previous issues). Amendment to come into effect July 1, 1946.

Hours of work: Zone I a 40-hour week, zones II and III a 44-hour week, (a 5-day week in all zones, unless otherwise agreed on). Overtime: Any work in excess of above to be paid at time and one-half in the 3 zones. Vacation: Employees to be given one week's vacation with pay of 2 per cent of their yearly earnings.

Wage rates: All employees working on a weekly basis to be paid same weekly rate despite reduction in hours. In the resulting new wage scale, except for the rates for skilled trimmers, all minimum hourly rates, as well as the rates earned in excess of minimum rates, and all piece work rates are increased by 10 per cent in zone I and by 9.1 per cent in zones II and III. Minimum hourly rates for skilled trimmers—in the coat and pants industry 96½ cents in zone I, 86½ cents in zone II and 82 cents in zone III; in the vest industry 95½ cents in zone I, 86½ cents in zone II and 82 cents in zone III. Minimum hourly rates for infants' and children's clothing industry are as follows:

MINIMUM HOURLY RATES FOR INFANTS' AND CHILDREN'S CLOTHING COMPRISING AGES FROM BIRTH TO 6 YEARS, NOT EXCEEDING SIZE 24, AS WELL AS SPORTSWEAR, AND FOR GIRLS' CLOTHING UP TO THE AGE OF 14 YEARS, INCLUSIVE.

Manufacturing: Miscellaneous Wood Products

SASH AND DOOR INDUSTRY, QUEBEC

An Order in Council, dated July 3, and gazetted July 13, amends the previous Orders in Council for this industry (L.G., Mar., 1945, p. 349; April, 1946, p. 498, May, p. 628). This amendment does not affect the summary already given.

WOODWORK AND WOODEN FURNITURE INDUSTRY, STE. AGATHE

An Order in Council, dated June 20, and gazetted June 29, repeals the Order in Council of March 1946 (L.G., April, 1946, p. 498) relating to the industry.

Manufacturing: Metal Products**GARAGES AND SERVICE STATIONS, QUEBEC**

An Order in Council, dated June 12, and gazetted June 22, amends the previous Orders in Council for this industry (L.G., May, 1941, p. 631; Jan., 1944, p. 70; Oct., 1945, p. 1520). This amendment does not affect the summary already given.

GARAGES AND SERVICE STATIONS, MONTREAL

An Order in Council, dated June 12, and gazetted June 22, extends the term of the agreement (L.G., Mar., 1945, p. 349; Mar., 1946, p. 317, and previous issues) to June 24, 1947.

Construction**BUILDING TRADES, QUEBEC**

An Order in Council, dated July 3, and gazetted July 13, amends the previous Orders in Council for this industry (L.G., August, 1944, p. 1007; March, 1946, p. 317, and previous issues). This amendment does not affect the summary already given.

BUILDING TRADES, ST. HYACINTHE

An Order in Council, dated July 3, and gazetted July 13, amends the previous Orders in Council for this industry (L.G., Aug., 1940, p. 867, Dec., p. 1311; Mar., 1941, p. 334, Sept., p. 1160; Sept., 1942, p. 1097; Jan. 1943, p. 88, Feb., p. 220; Jan., 1944, p. 70; Jan., 1945, p. 70). Present agreement to remain in effect to April 30, 1947, and thereafter from year to year until notice.

BUILDING TRADES, MONTREAL

An Order in Council, dated June 20, and gazetted June 29, extends the term of the agreement (L.G., Feb., 1946, p. 187, April, p. 499, May, p. 628, July, p. 930, and previous issues) to September 1, 1946.

BUILDING TRADES, HULL

An Order in Council, dated June 12, and gazetted June 22, amends the previous Orders in Council for this industry (L.G., May, 1943, p. 639; April, 1945, p. 517; May, 1946, p. 629, and previous issues) by extending the duration of the agreement to May 1, 1947, and thereafter from year to year until notice.

Trade**WHOLESALE FOOD STORES, QUEBEC**

An Order in Council, dated June 12, and gazetted June 22, amends the previous Orders in Council for this industry (L.G., July, 1944, p. 863; July, 1946, p. 930) by the addition of "L'Association professionnelle des Voyageurs de Commerce du Canada," Quebec section, as a contracting party.

Service: Public Administration**MUNICIPAL EMPLOYEES (OUTSIDE SERVICES), SHERBROOKE.**

An Order in Council, dated June 12, gazetted June 22 and corrected July 13, amends the previous Order in Council for this industry (L.G., Sept., 1945, p. 1342). Agreement to be in effect to January 1, 1947, and thereafter from year to year subject to notice.

The number of specified holidays with pay is increased by one day. If a feast day falls

on Sunday, the following day will be considered as a holiday.

The new hourly wage rates are as follows: labourers 50 cents; specialized labourers 55 cents; firemen-enginemen (3rd class), heating and plumbing employees 75 cents; firemen and mechanics in asphalt shop, blaster (dynamite), tractor operators, asphalt leveller and raker, foreman-joiner, tree cutter 60 cents; firemen (3rd and 4th class) 60 and 65 cents; asphalt roller operator, ordinary roller operator, watering-truck driver with no helper, grader operator, meter and tool repairer (aqueduct) 65 cents; blacksmiths 55 and 65 cents; truck drivers 55 and 60 cents; bulldozer operators 72 cents; garage mechanics 55 to 85 cents; joiners 55 and 60 cents; asphalt weighers and mixers, "alivettes" operators, asphalt shovellers, harness-makers 55 cents; gardeners 55 and 65 cents; park watchman 50 cents; scavengers 50 and 52 cents; pump house engineman (59-hour week) \$27 a week.

Provision is made for seniority rights.

MUNICIPAL OFFICE EMPLOYEES (PERMANENT), SHERBROOKE.

An Order in Council, dated June 20, and gazetted June 29, makes obligatory the terms of a new agreement between the City of Sherbrooke, and L'Association des Employés de l'Hôtel-de-Ville de Sherbrooke. Agreement to be in effect from June 29, 1946, to January 1, 1947, and thereafter from year to year subject to notice. The decree applies to permanent office employees of the City of Sherbrooke under the jurisdiction of the treasurer or the town-clerk of the city.

Hours: 38½ to 41-hour week. Overtime hours worked to be added as a credit to the days of absence for illness with pay for all employees except those working in the Central Store, who are to receive 2 hours' credit for every overtime hour worked. Certain classes of employees required to work on any of the specified holidays may, after notifying the Treasurer, take an equal number of days off at a later date.

Salaries—accountants \$30 to \$50 per week; clerks \$14 to \$30; cashiers \$20 to \$37; telephone operators, stenographers \$14 to \$23; book-keepers \$23 to \$30; collectors, investigators \$18 to \$25; storemen \$30 to \$40; checkers in Public Works \$18 to \$26. Vacation: 12 days with pay per year after one year's service. Sick leave: Employees are entitled, after one year's service, to 8 days' sick leave with pay per year.

Service: Professional Establishments**HOSPITAL AND RELIGIOUS INSTITUTION EMPLOYEES, ST. HYACINTHE.**

An Order in Council, dated June 12, and gazetted June 22, amends the previous Orders in Council for this industry (L.G., March, 1945, p. 350, April p. 518; May, 1946, p. 629, June, p. 783). This amendment does not affect the summary already given.

Service: Business and Personal**BARBERS AND HAIRDRESSERS, THREE RIVERS.**

An Order in Council, dated June 12, and gazetted June 22, amends the previous Orders in Council for this industry (L.G., Feb., 1945, p. 182, Aug., p. 1199; Feb., 1946, p. 187, and previous issues). In Zone II the hours of work for barbers and men's male and female hairdressers are reduced from 56 to 52½ hours per week. Vacation: every employee to receive 6 days' vacation with pay after one year's service.

Fair Wages Conditions in Dominion Government Contracts

THE Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to prevent abuses and to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classes

of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts in the second group. Contracts in this group are covered by the general provision that rates must equal those current in the district, and in addition, by the requirement that the rates must not be less than 35 cents an hour for male workers 18 years of age and over, 25 cents for female workers 18 years and over, and 20 cents for beginners and for workers under 18.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During June

During the month of June the Department of Labour prepared, on request, 66 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into during this period by the various Government departments appear hereunder:—

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "minimum rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation or by direction of a War Labour Board."

DEPARTMENT OF PUBLIC WORKS

Construction of an extension to wharf and float renewal, Long Bay, (Gambier Island, Howe Sound), B.C. Name of contractor, Pacific Pile Driving Limited, Victoria, B.C. Date of contract, May 22, 1946. Amount of contract, unit prices—approximate expenditure \$5,242. A fair wages schedule was included in the contract as follows:—

	Per Hour
Pile driver and derrick foreman.....	\$1.35
Pile driver and derrick engineers.....	1.22½
Pile driver and derrick boommen.....	1.10
Pile driver and derrick bridgemen.....	1.10
Pile driver and derrick men.....	1.10
Pile driver and derrick firemen.....	.79
Labourers65
Watchmen60

Renewal of a float and gangway and approach repairs, Seaside Park B.C. Name of contractor, William Greenlees, Vancouver, B.C. Date of contract, June 4, 1946. Amount of contract, unit prices—approximate expenditure \$7,766. A fair wages schedule was included in the contract as follows:—

	Per Hour
Pile driver and derrick foreman.....	\$1.35
Pile driver and derrick engineers.....	1.22½
Pile driver and derrick men.....	1.10
Pile driver and derrick boommen.....	1.10
Pile driver and derrick bridgemen.....	1.10
Pile driver and derrick firemen.....	.79
Wharf and dock builders.....	1.10
Carpenters	1.10
Labourers65
Watchmen60

Construction of an approach and float, Seaford, B.C. Name of contractors, Horie-Latimer Construction Company, Limited, Vancouver, B.C. Date of contract, June 10, 1946. Amount of contract, unit prices—approximate expenditure \$7,275. A fair wages schedule was included in the contract as follows:—

	Per Hour
Wharf and dock builders.....	\$1.10
Labourers65
Carpenters	1.10
Axemen71
Cement finishers	1.00
Concrete mixer operators (gas or elec.).....	.81
Pile driver and derrick foreman.....	1.35
Pile driver and derrick engineers.....	1.22½
Pile driver and derrick men.....	1.10
Pile driver and derrick bridgemen.....	1.10
Pile driver and derrick boommen.....	1.10
Pile driver and derrick firemen.....	.79

DEPARTMENT OF RECONSTRUCTION AND SUPPLY

Construction of a storage warehouse, R.C.C.S., Edmonton, Alta. Name of contractors, Messrs. H. G. Macdonald and Company, Limited, Tegler Building, Edmonton, Alta. Date of contract, June 15, 1946. Amount of contract, \$26,102. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos insulation workers.....	\$.91
Brick and hollow tile layers.....	1.31
Brick and hollow tile layers' helpers (mixing and tempering mortar).....	.75
Carpenters and joiners.....	1.03
Cement finishers	1.03
Cement and concrete mixer operators—	
Steam95
Gas or electric.....	.75
Compressor operators—gas or electric.....	.80
Drivers (teamsters)60
Drill runners85
Electricians (inside wiremen).....	1.06
Engineers, operating, steam—	
Single drum	1.00
Two or more drums.....	1.15
Engineers, crane (steam, gas or electric).....	1.05
Enginemen, stationary70
Hoist operators—tower (gas or electric).....	.75

Labour Law

Labour Legislation in Nova Scotia in 1946

DURING the session of the Nova Scotia Legislature from March 14 to April 18, laws were amended relating to workmen's compensation, industrial standards, employment of non-resident labour, coal mines, credit unions and school attendance.

Workmen's Compensation

Changes in the Workmen's Compensation Act raise from \$100 to \$150 the maximum amount payable for funeral expenses, provide for payments up to the age of 18 in respect of a child whose education should, in the Board's opinion, be continued, and revise the description of the industrial incidence of silicosis from silicosis occurring in mining, quarrying, stone-cutting and stone-crushing, and grinding or polishing stone or metal to silicosis occurring in any process permitting the inhalation of silica dust.

Coal Mines

Amendments in the Coal Mines Regulation Act add to the Central Mining Examining Board a qualified electrical engineer, and provide for the issuing of certificates to electricians, electrical machine operators, coal miners and firemen.

The Act, as amended, stipulates that the Board, with the Minister's approval, must hold examinations at which candidates for certificates of competency as managers, underground managers, overmen, first, second and third-class engineers, mine surveyors and electricians may qualify.

Provision is now made for local examining-boards to grant certificates to mine examiners, coal miners and electrical machine operators. These boards, to consist of three or more members with the Inspector or Deputy Inspector for the district as chairman, are to be set up by the Central Board, with the Minister's approval, in such places throughout the Province as it deems expedient. Previously, local boards examined coal miners only. Fees and travelling expenses of local board members and fees to be paid by applicants for certificates are to be determined by the Governor in Council.

Other amendments set out qualifications for electricians', coal miners' and electrical machine operators' certificates. An applicant for a first-class electrician's certificate must be a British subject, at least 23 years old, hold a second-class certificate and have served at least two years under a mine electrician first-class; for a second-class certificate he must be 21 and a British subject and must hold a certificate or diploma from an educational institution approved by the Minister.

The Act no longer calls for two classes of coal miners' certificates. No one without a coal miner's certificate under the amending Act may have charge of a working face, and no person may be employed at a working face unless he (a) holds a coal miner's certificate, or (b) is 18 and is, while so employed, constantly under the supervision of the holder of such a certificate, or (c) has worked for six months at the face, and continues to work, under the close supervision of a holder of a coal miner's certificate, or (d) is 18 and is employed at a working face approved by the Minister as a training place. No person may cut, shear, bore or loosen coal by hand, machine or otherwise at the face in any mine for more than 18 months without a coal miner's certificate.

A candidate for a mine-examiner's certificate must be 21 or over; have had at least three years practical coal mining experience in Nova Scotia, two years of which must have been at a working face; hold a coal miner's certificate; have a satisfactory knowledge of the sections of the Act relating to his duties, and a working knowledge of mine gases and ventilation, explosives and blasting, and mine plans; be able to write intelligible reports; and hold a first-aid certificate.

For a coal miner's certificate, a candidate must be 19, have had at least 18 months' experience in a coal mine of which at least six must have been at the face; or he must be 18 years and six months old and have had six months training at a working face approved by the Minister as a training place and have been recommended by his supervisor. All coal miners' certificates granted in the Province before the passing of the Act and held

by persons with at least 18 months' experience in a coal mine in Nova Scotia, of which 12 months have been at the face, are to be valid.

For an electrical machine operator's certificate, Grade I, a candidate must be 22, hold a coal miner's certificate, and have operated electrically-driven apparatus for at least one year; for a Grade II certificate, he must be 21 and have at least one year's mining experience, six months of which must have been with or about electrically-driven apparatus. Each electrical machine operator's certificate must specify the type of machine for which it is issued. Local boards may, with the Board's written consent, in granting certificates, accept as of equal value experience at a working face obtained outside the Province. The Board, with the Minister's approval, may make regulations to guide local boards and may prescribe times and places for examinations. Local boards must report in writing to the Board as prescribed after each examination.

The Act also includes more stringent provisions for the use of explosives underground. The stipulation that an explosive may be taken into a mine if it is in a secure case or canister containing not more than six pounds is narrowed to provide that this may be done only under the immediate control of a person appointed by the manager and approved by the Chief Inspector. Except where the Chief Inspector's written permission has been granted, shots must be charged and fired singly and sufficient time allowed between firings for the dust to settle.

The Act now requires every person in charge of an engine or combination of engines of not more than 300 horse-power used for lowering or raising or moving persons to hold at least a third-class stationary engineer's certificate and for engines of more than 300 horse-power a second-class certificate, or, in each case, an equivalent certificate or permit issued by the Board. Every person in charge of an engine or other machine used for ventilating a mine must hold a third-class stationary engineer's certificate or its equivalent.

On the Board's recommendation, the Minister may grant permits for limited periods to persons to take charge of a steam plant or stationary engines. Previously, permits might be granted on the recommendation of any member of the Board. The provision has been repealed which stipulated that such permit might not be valid for more than 60 days after the date fixed for examination of candidates for stationary engineers and that such permit might not be granted a second time to the same person.

Industrial Standards

The Industrial Standards Act which previously applied only to building and construction in Halifax and Dartmouth was amended to extend its application to any other city, town, municipality, municipal district, polling division of a municipal district, or other area of a municipality as the Governor in Council may determine by Proclamation. As heretofore, the Act does not apply to persons employed by the Provincial Government or any of its departments, by a municipal corporation, or by a board or commission created by an Act of the Legislature.

Employment of Non-Residents

The Nova Scotia Labour Act which re-enacts a statute of like title, first passed in 1933 and continued from year to year (L.G., 1945, p. 1527) is to be in force until May 1, 1947.

Employees' Pensions

A new section in the Municipal Act enables municipal councils to make by-laws providing for pensions for any class of full-time employees by payment from current municipal revenues, by arrangement with the Dominion Government under the Government Annuities Act, by contract with a licensed insurer, by arrangement with the Provincial Government or otherwise, with power to define "employee" (excluding teacher), to provide that the by-law shall include full-time employees of any board, commission or local authority having statutory powers with respect to municipal affairs, to provide for deductions from wages or salaries of employees' contributions and for contributions to be made by the municipality, board, commission, body or local authority, as the case may be. A similar section empowering a town council to pass by-laws providing for pensions for full-time employees was inserted in the Towns' Incorporation Act.

School Attendance

New sections of the Education Act raise the standards for school attendance. It is now provided that any child who, during the school year, attains the statutory school-leaving age, which remains at 14 in rural and 16 in urban districts, must, unless excused for a valid reason under the Act, continue to attend school to the end of such school year. This provision obviates "broken terms" and tends to maintain the child's interest in school during the year.

The provisions granting exemption to a child on the ground of poverty or to one

12 years of age and over who has successfully completed Grade 9 or its equivalent have been repealed. The Act continues to exempt a child who is physically unable to attend school or one who is under 10 and lives more than two and one-half miles from school in a section which is not a consolidated school section nor a section for which conveyance is provided, but stipulates that in either of these cases the child must be receiving instruction equivalent to that which he would receive if in regular attendance at school.

Trade Unions

An amendment in the Trade Union Act, to come into force on Proclamation, substitutes the Minister of Labour for the Provincial Secretary as the Minister in charge of the Act.

A private Act to incorporate the United Steelworkers of America, Local 1231, Building Corporation with headquarters at Trenton, Nova Scotia, was also enacted. The Corporation includes the officers of Local 1231 and all the other organized employees of Trenton Steel Works Limited, Eastern Car Limited, Standard Clay Products Limited, Dominion Steel Foundry Limited, and their associates, successors and such other persons as are or may become members of the Corporation. The objects of the Corporation are to erect and operate a union hall in

Trenton and to promote the interests of the Local.

Credit Unions

Minor amendments in the Credit Union Societies Act provide that the treasurer of a credit union who may also act as clerk may be chosen either from the board of directors or from the general membership. In the former case he is to hold office for one year and an appointment is to be made annually. If not a member of the board of directors he is to serve during good behaviour without annual reappointment and is to have a voice in the board's deliberations but no vote. The section permitting unions to make loans of not over \$50 to its members without security other than the note of the borrower was amended to allow this limit to be raised to \$200 in the case of loans to a farmer or fisherman for purposes of his calling.

Miscellaneous

An amendment in the Halifax Charter authorizes the City Council to make an ordinance licensing and regulating chimney sweeps, fixing the rates chargeable by sweeps and prescribing the mode and frequency of cleaning. With respect to the amount of licence fees, the Council may discriminate between residents and non-residents. It may also cancel or suspend the licence of a sweep who does his work negligently or improperly.

Recent Regulations Under Provincial Legislation

IN Alberta, new Orders under the Hours of Work Act limit the hours on a split shift to 10, prohibit most women working on shifts which begin or end between 12.30 a.m. and 6 a.m., restrict the hours of workers in hotel beverage rooms in certain places to eight in a day and 44 in a week, and fix at eight in a day and 40 in a week the maximum hours which may be worked by most men in breweries.

In British Columbia, the minimum weekly rate for women in shops has been raised from \$12.75 (it was \$15.30 during July) to \$17 and the part-time rate to 45 cents an hour; the weekly rate applies to a work-week of from 39 to 44 hours. The learning time is reduced to three two-month periods.

In Nova Scotia, all minimum wage rates have been increased by \$1. For experienced women workers the minimum is now \$13 in places of 17,000 or more population and \$12 in other towns.

In Ontario, regulations have been made for fire and dust control and general safety in grain elevators.

In Quebec, most workers within the scope of the Minimum Wage Act will be entitled henceforth to an annual holiday of one week with pay.

Alberta Hours of Work Act

Henceforth the hours of any employee within the scope of this Act who works on a split shift must be confined within 10 hours after he begins work, and no working period for female workers may begin or end between 12.30 a.m. and 6 a.m., as a result of Orders 35 and 38, respectively, which were issued under this Act on June 26, gazetted and effective on July 15. The Act, providing for an eight-hour day and 48-hour week, applies to all workers except farm labour, domestic servants and those specially exempted by Order. Order 38 applies in hospital and nursing homes only to office workers and does not apply to telephone

operators. A similar Order, No. 20, in June, 1941, prohibited most women from being employed later than midnight or earlier than 6 a.m. but it was rescinded for the duration of the war in September, 1941 (L.G. 1941, p. 1269). An Order in Council of July 5, 1946, gazetted July 15, rescinds Order 20.

A new Order, No. 36, gazetted and effective July 15, restricts to eight in a day and 44 in a week the hours of workers in hotel beverage rooms, limiting hours on a split shift to nine in Edmonton, Calgary, Lethbridge, Medicine Hat, Drumheller, Pincher Creek, Blairmore, Bellevue, Coleman and Hillcrest. Another Order, No. 37, of the same date, fixes the maximum hours of work of male workers, other than office staff, in the brewery industry at eight in a day and 40 in a week.

British Columbia Female Minimum Wage Act

The minimum rate for some 11,000 women working in shops was raised from \$15.30 to \$17 weekly by a new Order, 24, which was gazetted July 18 and made effective August 5. An interim Order of June 25 (L.G. 1946 p. 988) had raised by 20 per cent the \$12.75 minimum for these workers which was fixed by a 1935 Order.

The new \$17 rate applies to a work-week of from 39 to 44 hours. Time and one-half the regular rate must be paid for work over eight hours in a day or 44 in a week except where, by agreement between employers and workers, nine hours are worked on some days but no more than 44 are worked in a week, or where, outside of certain metropolitan districts, workers by regulation, may work 11 hours on Saturday or the day before a statutory holiday.

The new rate for part-time workers in shops, working less than 39 hours weekly, is 45 cents instead of 35 cents, the rate before the 20 per cent interim increase was made. As before, these workers must receive at least four hours' pay in any one day; a new provision fixes a minimum of two hours' pay for any worker called to work and for whom there is no work.

Learners working full-time must now receive \$11, \$13, and \$15 weekly for the three successive two-month learning periods. Formerly, the learning period consisted of four three-month periods for those over 18 and seven three-month periods for those under 18. The rates for part-time learners are 30 cents, 35 cents and 40 cents, for the three two-month learning periods.

As provided for other trades covered by recently revised Orders, an employer must pay at least semi-monthly the wages earned up to not more than eight days before pay-day, give a worker at least 32 consecutive hours of rest

weekly unless a joint agreement in writing for another arrangement is approved by the Board of Industrial Relations and must maintain specified records and keep posted in a conspicuous place a copy of the Order.

British Columbia Railway Act

Regulations governing the operation of tramways, interurban and street railways, and prescribing the equipment to be used, were issued under this Act on June 18 and gazetted July 11; regulations issued in 1921 and 1929 are rescinded.

Operating employees and those handling train orders must pass an examination on the rules and also a satisfactory eye and ear test. Locomotive engineers, motormen, conductors and dispatchers must be at least 21 and all but dispatchers must pass an examination on proper care of equipment and the handling of air-brakes.

Equipment must include devices for communication between a conductor and engineer or motorman and for checking speed at will and bringing a train to a standstill safely.

Interurban railway companies are required to conform to the rules approved by the Association of American Railroads governing the loading of lumber and stone on open cars and the loading and carrying of structural material. Provision is made for inspection of cars and trains and rules laid down for precautions at railroad crossings.

Nova Scotia Minimum Wage for Women Act

All the minimum rates of wages established by the Orders under this Act (L.G. 1946, p. 103) were increased by \$1 by an Order dated June 15 and gazetted July 3. The new minima for experienced female workers in the specified establishments are therefore \$13 in places of 17,000 or more population and \$12 in other towns. However, for telephone operators the minimum is \$11 in places other than Halifax, Sydney, Dartmouth and Glace Bay, where it is \$13, and other than Amherst, New Glasgow, North Sydney, Truro, Yarmouth, Sydney Mines and Westville, where it is \$12.

Lower rates apply to learners and, as for experienced workers, the rates in smaller places, not given below, are \$1 less. In factories, the paper, textile and needle trades and in offices, the new learning rates are \$11 and \$12 for two six-month periods for women over 18, and \$9, \$10.50 and \$12 (\$10, \$11 and \$12 in offices) for three such periods for those under 18; in shops and food trades these rates apply to two three-month periods for adults and for girls under 18 in shops to three three-month

periods and in the food trades to three four-month periods. In other establishments no distinction is made because of age; the learning time in garages and places of amusement is one month at \$11; in hotels and restaurants, three one-month periods at \$10, \$11 and \$12; in laundries two three-month periods and for telephone operators two six-month periods at \$11 and \$12; and in beauty parlours three six-month periods at \$9, \$10 and \$12.

Ontario Factory, Shop and Office Building Act

Regulations for fire and dust control and general safety in grain elevators were made under the above Act by an Order in Council of July 4, gazetted July 20. The new Regulations contain sections on (1) design of structure, (2) ventilation, (3) equipment, (4) grain driers, (5) dust control systems, (6) electric equipment and (7) fire protection. The following is merely a summary of some of the provisions.

Elevators built in the future must be of non-combustible materials and explosion venting-areas must be provided. A tight non-combustible partition will be required between the track shed for loading or unloading cars and the elevator, and where belt-conveyor galleries or tunnels connect main sections of the elevator. The partitions, openings to stairways and in elevator shaftways, must have self-closing fire-doors.

Window ventilation must be provided in all grain elevators but those in existence may have mechanical ventilation as an alternative. Each bin, tank, and interspace, enclosed at the top, must have adequate positive air-aspiration or be separately vented to the outside.

The beltway between the bins must be tightly closed at top and bottom and hopped to prevent accumulation of dust, and leg casings, connecting spouts and doors must be dust-tight. A conveyor belt delivering grain to a boot must have an automatic device that will stop the belt or notify the operator when the leg stops, and the belt and leg motors are to be interlocked so that the former stops automatically when the leg motor is stopped.

Grain-processing machinery such as cleaners and friction clutches installed in non-combustible elevators must be non-combustible. Driers henceforth installed will be dust-collecting, the dust to be removed by the elevator's dust collection system, and they must be separated from each other by dust-tight partitions.

The dust control system must be designed and installed in accordance with recognized engineering practice to prevent dust from

entering the atmosphere in the elevator and to avoid the pick-up of solid grain. No direct open connection is permitted between dust collectors and the boiler-room or incinerators. Head, boots and garners must be dust-tight and they and enclosed bins must be provided with positive air-aspiration or effective vents to the outside. Sweeping is to be done daily and floor sweeps connected to the dust-collection system must be provided.

All electric wiring, appliances and equipment are to conform to the Power Commission Act and the regulations made under it. Places such as offices may be classed as non-hazardous if declared free from dust by a Commission inspector. Lighting installations must be of types designed for use in atmospheres containing grain dust. Smoking is prohibited except under specified conditions; no person in an elevator may have on him matches, lighters, etc., and every elevator must have receptacles at the employees' entrance for matches, butts and ashes. Metal lockers are required for workmen's clothing, and eating rooms must be separated from working areas by a dust-tight partition.

Combustible elevators must have lighting protection. Where the presence of static electricity is indicated by tests, permanent ground wires or metal combs must be provided to remove it. The Regulations specify the fire extinguishing equipment to be provided and require every elevator to have a watchman.

Quebec Minimum Wage Act

Holidays With Pay.—An annual holiday of one week with pay after one year's employment is provided for most workers in Quebec by a new Order, Order 3, issued under this Act, and approved by an Order in Council of July 17, gazetted and effective on July 27, 1946. The Act was amended at the last legislative session, to give the Minimum Wage Commission power to require employers to give their workers annual holidays with pay. The Collective Agreement Act was also amended to provide that provisions concerning holidays with pay in agreements under the Act may be made legally binding (L.G., 1946, p. 681).

The following workers are excluded from the provisions of the new holidays Order: domestic servants, farm labour, and workers covered by an agreement under the Collective Agreement Act, all of whom are excluded from the Minimum Wage Act; workers in seasonal industries, building construction, forest operations, janitors and watchmen of any immovable property, employees of municipal, school or other public corporations and workers excluded from the

application of a Wage Order or entitled by another Order to an annual holiday.

The new Order provides that any worker governed by it is entitled annually to a continuous paid holiday of one week after one year's continuous employment with his employer or to a half-day for each calendar month of employment if he has worked less than a year. A week's holiday must include at least six working days, in all, seven days.

Holidays must be given within 12 months from the May 1 following the expiration of the worker's year of employment and an employer must give 15 days' notice of the date of a worker's holiday. A worker entitled to a holiday as of May 1, 1946, must be given it before December 31, 1946, however.

A worker must be paid for his holiday before he takes it, the pay to consist of the wages he would have earned during that week, if he is paid on a time basis, or of two per cent of the wages he earned during his year of employment, if he is paid on any other basis. A worker's benefit rights, such as pensions, sick leave, etc., are not to be affected by the holiday.

A worker who leaves his employment before he has taken his holiday, will be entitled to the holiday pay due him at his holiday time, together with two per cent of the wages earned after the May 1 before he leaves his job.

The Order prohibits any agreement contrary to its provisions even when the agreement provides a compensating indemnity.

Taverns.—Order 23 governing taverns in Montreal and district was amended by an Order, approved by an Order in Council of July 3, gazetted and effective on July 13. The amended Order requires an employer to grant an annual holiday with pay of one week to a regular worker who has worked 12 months. If the worker leaves before he has taken his holiday he must be paid a day's wages (nine hours) for each period of two months he has worked since the January 1 before his departure.

A new provision forbids the employment of anyone under 20 years of age. It may be noted here that the Quebec Alcoholic Liquor Act declares guilty of an offence anyone under 20 who performs "the duty of clerk" in any tavern.

Other changes made by the new Order require a worker to be given at least one hour's rest, instead of half an hour, after six consecutive hours of work, fix a three-hour minimum for any worker called to work (formerly temporary bartenders and waiters were excluded), and stipulate that an employee can be classed as a bartender apprentice only in a tavern which has at least one bartender, or as a temporary waiter only in a tavern with at least two regular workers. Bartenders and waiters, who may not be required to clean anything except glasses and tables while the tavern is open, will now be paid at double rates for such work, but time so spent may not be included in the calculation of overtime for which time and one-half is paid.

Legal Decisions Affecting Labour

Damages, not Compensation, Available in Ontario for Accident on Way to Work due to Driver's Negligence

In an action on June 18 for damages for physical injuries, Mr. Justice Urquhart of the Ontario High Court of Justice held that the employees who had been injured on the way to their employment when their bus collided with a truck had a right of action against the negligent third parties, the bus and transport companies, and awarded damages. It was held the accident was not within the scope of Part I of the Ontario Workmen's Compensation Act since the accident did not arise "out of and in the course of the employment".

The plaintiffs were employed by the General Engineering Company at its plant about four miles from Toronto. This plant was engaged on war work for the Dominion Government.

The employer company had a contract with Hollinger and Co. to transport to and from work such employees as desired transportation. No charge was made to the employees for this service and they were not paid for the time spent in transit. The accident occurred on January 26, 1945. The actions were originally brought against the Engineering Company, Hollinger and the other transport company, but were discontinued at trial as against the Engineering Company. The remaining defendants admitted that their joint negligence caused the collision.

Mr. Justice Urquhart pointed out that by the Ontario Workmen's Compensation Act, the plaintiffs could not recover damages where all parties concerned and the plaintiff's employer were under Part I of the Act. Both defendants were employers within Part I. The principal questions were whether the Engineering Company at the time of the accident came

under Part I and whether the accident arose out of and in the course of employment as stipulated in the Ontario Act. The Act adds that proof that the accident arose "out of" the employment raised a presumption that it occurred "in the course of" employment unless the contrary was shown and vice versa.

Mr. Justice Urquhart considered that "arising out of the employment" was interpreted by the other and more important expression, "in the course of the employment". In his opinion, the accident must have arisen both "out of" and "in the course of" employment, before the Act could apply to prevent an action against a third party, even though that party was also under Part I.

On the question whether the accident occurred "in the course of the employment", Mr. Justice Urquhart quoted from 34 Halsbury, p. 824:

In general, the employment begins as soon as the workman has reached the place where he is employed, or the means of access thereto, and continues until he again reaches the same point at the end of his work.

Appeal cases were cited in which the point arose as to whether a workman, who had the right, by the terms of his employment, to use certain facilities but was under no duty or necessity to do so, was not entitled to statutory protection when doing so. Mr. Justice Urquhart concluded that the accident to the plaintiffs did not arise in the course of their employment and it was doubtful also whether it could be said to have arisen out of the employment. It was not, therefore, within the scope of Part I of the Ontario Act.

As regards the status of the plaintiffs in relation to the Dominion Government, it was argued that their employer was acting as an agent of the Crown in carrying on the work of this particular plant and that, therefore, the plaintiffs and their employer were under the Government Employees' Compensation Act which does not bar actions against third parties, and not under the Ontario statute. Mr. Justice Urquhart agreed with this contention.

The plaintiffs, therefore, had a right of action against the defendants, since the latter admitted negligence, and the final question for determination by the Court was the assessment of damages.

An advance of partial damages by the Dominion Government for loss of time and medical bills was considered a gratuitous payment made in order to prevent any dislocation and disturbance in a period when great production was required. These sums were later repaid or authorized to be repaid by the

plaintiffs. The Court held, therefore, that these payments should not have the effect of exempting the negligent parties from the results of their responsibility for the accident.

The defendants' claim that the Court, in assessing damages, should take into consideration only "take-home" pay, excluding income tax and unemployment insurance deductions, was rejected. The proper amount to be assessed for loss of wages, the Court found, was the gross amount owing to each claimant by the Company. Moreover, either as a result of the closing down of the plant in July, 1945, or because of the continuance of their injuries, few of the plaintiffs had worked long enough in 1945 to be liable for income tax. The damages were assessed and judgment awarded accordingly with costs.—*Bowers et al. v. J. Hollinger and Co. Ltd. et al.* (1946) Ontario Weekly Notes 608.

House of Lords Holds Factory Law Gives No Protection Against Injury From Materials Thrown From Machine

A permanent injury to the hand caused by a small sliver of wood which flew from a circular saw which she was working is not ground for damages based on a breach of the statutory duty to fence machinery under the British Factories Act, 1937, and the Woodworking Machinery Regulations, 1922. Neither were the employers guilty of any breach of their common law duty.

As reported in *The Ministry of Labour Gazette*, June, 1946, the House of Lords held, on April 12, that Section 14 (1) and (2) of the Factories Act imposed an obligation to provide a guard against contact with any part of a dangerous machine but did not impose any obligation to guard against dangerous materials or articles ejected from a machine in motion. Similarly, the Woodworking Regulations require safety precautions to safeguard the operator from the machinery but do not provide for protection from materials in motion in the machine.

This decision confirmed the judgment of the Court of Appeal which had reversed that of the trial Judge. The latter allowed damages on the ground that, notwithstanding that the employers had complied with the Regulations and with Section 14 (1) and (2), it was also their duty under Section 14 to prevent material which was being operated on by the circular saw from flying out and injuring the workman.

Section 14 of the Factories Act, 1937, stipulates—

- (1) Every dangerous part of any machinery other than prime movers and transmission machinery shall be securely

fenced unless it is in such a position or of such construction as to be safe to every person employed or working on the premises as it would be if securely fenced: Provided that, in so far as the safety of a dangerous part of any machinery cannot by reason of the nature of the operation be secured by means of a fixed guard, the requirements of this subsection shall be deemed to have been complied with if a device is provided which automatically prevents the operator from coming into contact with that part.

Subsection (2) empowers the Secretary of State to make regulations directing the type of device which shall be used in connection with any particular class of machinery.

In dismissing the appeal, the House of Lords pointed out that while subsection (3) authorizes the Secretary of State to make regulations, as respects any machine or process, requiring the fencing of materials or articles which are dangerous while in motion in the machine, no such regulations have been made and therefore the employers had not failed in their statutory duty. *Nicholls v. F. Austin (Leyton) Ltd.* House of Lords, April 12, 1946.

English Court Grants Interlocutory Injunction Restraining Workers from Assisting Trade Rival in Spare Time

The English Court of Appeal on February 5 unanimously allowed the appeal of a company for an interlocutory injunction to restrain a rival company from employing five of the appellants' highly skilled manual workmen during their spare time. These workmen who had been employed by the appellant company, manufacturers of midget valves for hearing aids for several years, with no written contract, but on a normal 5½-day-week agreement subject to 24 hours' notice, worked on Sundays for a considerable period for the defendant company without their employers' knowledge and consent.

The defendants were a company which had recently entered the same field, two of its directors and a highly skilled man, Davies, and his wife, all of whom had been employed by the plaintiffs in responsible positions requiring skill and knowledge. The defendant company manufactured not only midget valves but complete hearing aids embodying these valves. The individual defendants secretly induced the five workmen to put their skill and experience at the disposal of the defendant company, thus enabling it to develop its business from the early stages to that of a competitor.

There was no evidence that the employees concerned had made use of any confidential information, and Mr. Justice Cohen had, on December 14, 1945, refused to grant an injunction, considering that the evidence did not show a breach of any implied obligation and did not warrant the issue of a restraining order.

In his judgment, Lord Greene, Master of the Rolls, emphasized that in dealing with an interlocutory appeal, the Court could pay regard only to the evidence before it which was not necessarily complete. When the action came to trial, more evidence might be disclosed and a different aspect be given the dispute. The question before the Court was whether or not a *prima facie* case was established and if so, whether an interlocutory injunction was the appropriate remedy or whether matters should be allowed to stand until the trial.

The appeal, he pointed out, concerned a branch of law which had not been fully explored. In normal times the plaintiffs would have had as an obvious remedy the right of summary dismissal of the employees in question but the application of the Essential Work Order and the shortage of labour made it unreasonable to expect them to adopt this course.

The secrecy which was maintained indicated that the workers knew that what they were doing was, if not legally wrong, at least morally reprehensible. Lord Greene agreed with the lower Court that there was no evidence of disclosure of confidential information but he considered that it would be inevitable if the employees continued to work for the defendants that they would disclose information concerning improvements or experiments made in the plaintiffs' business.

As regards an employee's obligation of fidelity which is an implied term of the contract of employment, it would appear *prima facie* that the extent of such obligation depended on the facts of each particular case and might extend very much further in some cases than others—

The law would, I think, be jealous of attempting to impose on a manual worker restrictions the real effect of which would be to prevent him utilizing his spare time On the other hand, it would be deplorable if it were laid down that a workman could consistently with his duty to his employer, knowingly, deliberately and secretly set himself to do in his spare time something which would inflict great harm on his employer's business.

Lord Greene dismissed the defendants' argument that, even if a *prima facie* case had been made out, in the absence of the five workers as parties, the action was not properly constituted, declaring that there was a very good practical reason why these workmen should not be joined in the action and that the Court should be able to decide the question satisfactorily in their absence. Neither could the argument be allowed to prevail, in view of the Essential Work Order, that if the plaintiffs were right the work-people could be dismissed for misconduct. Lord Greene concluded that there was a *prima facie* case and the balance of convenience and fairness was in favour of an injunction.

In this Lords Justices Morton and Bucknill concurred. The former quoted a dictum in *Robb v. Greene* (1895)—

I think that it is a necessary implication that must be engrafted on such a contract (that is a contract of service) that the servant undertakes to serve his master with good faith and fidelity.

In his view, although the five employees had not broken any express term of their contract, an employee's implied duty of fidelity extended to his spare time. In the granting of an interlocutory injunction no irreparable damage would be done to the defendants, even if it should turn out at the trial that an injunction should not have been granted, and the employees in question would only be prevented from doing some rather hard work in their leisure time for which they received only their expenses. *Hivac, Ltd. v. Park Royal Scientific Instruments Ltd.* (1946) All England Reports 350.

Accidents and Production Costs

The Industrial Accident Prevention Associations in their "Memorandum to Executives", for July, emphasize the importance of industrial accidents as factors in production costs.

It is pointed out that "in Ontario in the first five months of this year there was about the same number of accidents reported as in the full year 1934; namely, 54,049 and 54,730, respectively. In the first five months of 1946 \$6,437,804.38 were awarded by the Workmen's Compensation Board, while in the 12 months of 1934, the awards were \$4,499,797.23".

The suggestion is made that some further research work in accident control is necessary at present. It is stated that "research indicates that for each average dollar paid out for compensation, four more dollars are lost in indirect costs by the employing firm. The indications, therefore, are that additional research on accident causes by the average industrial executive, will, if followed by appropriate action, more than pay its way and

contribute something worth while towards holding down overall costs of production."

The following comparative figures covering the first six months of 1945 and 1946 in all Ontario industries illustrate the accident incidence and the advantages to be derived from definite action based on a continuing study of the problem.

	1945	1946
Total injuries reported	59,443	64,214
Fatal cases included in total ...	239	207
Total compensation and medical aid awarded	\$6,720,603.78	\$7,810,167.57
Medical Aid Costs in above figures .	\$1,018,126.38	\$1,164,769.84

In June, 1946, there were 10,165 accidents reported by industry in Ontario to the Workmen's Compensation Board, including 16 fatal cases. In that month the awards by the Board totalled \$1,372,363.19, of which \$163,931.90 covered medical costs.

Rehabilitation

Rehabilitation of Ex-Service Personnel

Use of Government Aids up to June 1, 1946

BY the first of June demobilization in Canada had neared completion, more than 900,000 persons having been discharged since the beginning of the war. The rate of demobilization had also declined considerably from the high level of the fall and winter months.

In view of the speed with which demobilization has been achieved, it was to be expected that a certain degree of unemployment would be experienced among ex-service men and women.

Unemployment among ex-service personnel is, however, declining steadily from a peak reached at the end of March, a date at which seasonal unemployment in the country was at its height and the rate of demobilization was still high. At March 31 the number of unplaced ex-service men registered at Employment Offices was 83,029, by May 31 this total had dropped to 72,370, and by the end of June to 61,000. Total unemployment in the country at the same period, as measured by unplaced applicants registered at Employment Offices, was about 179,000. The proportion of the total unemployed who are ex-service men was 34 per cent at the end of June.

The seasonal upswing in industrial activity has created employment particularly for construction workers and metal workers. This is evident in the decreased number of ex-service men classified in these occupations registered with the National Employment Service. However, the number of applicants for clerical work has shown an increase.

In the past year more than half a million adult men and women were added to the civilian labour force through the demobilization of the Armed Services. These workers represent about one out of every nine persons classed as employables in Canada.

Approximately 95,000 Canadians still remain in uniform, of more than 1,100,000 who enlisted with the wartime services. The exact proportion of these who will be discharged is not known, but it is evident that demobilization is fast approaching completion.

During May 28,522 ex-service men were placed in employment by local offices of the National Employment Service. A campaign of

information is being currently conducted to place before employers the skills and talents of veterans, particularly those who suffered serious disability in this war. From April 15 to May 14 there were 444 handicapped ex-service men placed by the National Employment Service offices. At the middle of May, 2,041 handicapped ex-service men were registered as unplaced applicants.

The occupational categories of unplaced ex-service personnel are listed in Table 1.

Reinstatement

About one in every four of the returning veterans is returning to his pre-war employment. Since August 1, 1945, about 150,000 ex-service men have been reinstated in their old jobs.

Post-Discharge Re-establishment Order

There has been an increase in demand for the various rehabilitation aids provided by the Government. Up to the end of May, 131,000 persons had received benefits under the Post-Discharge Re-establishment Order.

The number of persons receiving out-of-work benefits increased from 43,500 at March 31 to 48,500 at April 30. By the end of May, however, the number had dropped back to the March level. There were 6,600 awards granted in April and 6,800 in May.

Enrolment in vocational training and pre-matriculation courses was 30,200 at the end of May. Almost as many persons were receiving university education benefit, the number dropping from 30,000 to 27,000 between the end of March and the end of May. About 14,800 persons were receiving "awaiting returns" awards, while 83 were receiving temporary incapacity benefit.

Re-establishment Credit

Re-establishment credit has been increasingly popular with ex-service men, some 200,000 payments having been made up to the end of May. Of these, 120,000 were for the purchase of furniture and household equip-

ment, 17,600 for home owning (610 under the National Housing Act); 14,000 for repairs and modernization of homes; 25,600 for the provision of working capital; 16,700 for the purchase of tools, instruments or equipment; 1,500 for the purchase of a business; and the remainder for other purposes.

Veterans' Land Act

Almost 35,000 ex-service men had qualified for benefits under the Veterans' Land Act up to the end of May. Of this number, 8,343 had been actually established in farming or fishing activities.

TABLE I.—OCCUPATIONAL CATEGORIES OF EX-SERVICE PERSONNEL UNPLACED AT MAY 31, 1946

Occupational Group	May 31, 1946
Professional and managerial workers.....	3,894
Clerical workers.....	7,299
Sales workers.....	4,181
Service workers.....	3,720
Agricultural workers.....	2,081
Fishermen.....	415
Skilled and semi-skilled workers.....	25,443
Food products.....	343
Textiles, clothing, etc.....	264
Lumber and wood products.....	713
Pulp and paper makers.....	33
Printing.....	193
Leather and products.....	194
Stone, clay, and glass.....	27
Electrical workers.....	1,038
Mining and quarrying.....	401
Construction workers.....	2,391
Metalworkers.....	4,056
Miscellaneous.....	15,790
Unskilled workers.....	25,337
Total.....	72,370

Handicapped Workers in Industry

WHILE not a new problem, the necessity of absorbing into commercial and industrial life large numbers of permanently impaired veterans, has focussed attention on the performance of handicapped workers in industry.

Many employers learned during recent years that men and women with physical disabilities can be desirable workers if they are carefully placed in jobs where their disablements do not constitute handicaps. Traditional prejudices of many employers with respect to the employment of workers having physical defects, are being gradually overcome.

A brochure recently issued by the Industrial Hazards Division of the Bureau of Labor Statistics at Washington presents a progress report concerning factual information obtained from industrial plants that employ impaired workers in sizeable numbers. The records of such workers were matched with those of unimpaired workers in the matters of production, absenteeism, accident hazards and performance in general, with a view to making accurate statistical comparisons. The brochure covers investigations into nine plants where 908 impaired workers were matched with 1,165 unimpaired workers. Only serious impairments were studied.

Output.—It was found that the average weekly output of impaired workers was "2·8 per cent better than that of unimpaired workers on the same job. The performance of impaired workers excelled in every one of the plants which had a careful placement program". It fell below that of unimpaired fellow workers in one of the plants that did not have a placement program.

Efficiency.—In the matter of efficiency, "impaired workers produced 3·6 per cent more for every hour worked than did their unimpaired co-workers on the same jobs. The significance of careful placement is emphasized by the fact that the efficiency of impaired workers was better in each of the four plants which had a careful placement program. In some of the plants without such a program, the reverse was true".

Work Injury Frequency.—It was disclosed that "the number of work injuries per month per 100 workers was identical for both impaired and unimpaired workers. Each had 20 such injuries, and practically all of these required only first aid".

Absenteeism.—With respect to absenteeism, the difference between the two groups was negligible. "Scheduled work hours lost be-

cause workers were absent from work because of illness or other reasons amounted to 3·2 per cent for impaired workers and 3·3 per cent for unimpaired." However, the absentee "rates for impaired women (of whom very few were employed) were higher than for unimpaired women, largely because of lack of satisfactory placement programs in certain plants."

Labour Turnover.—Separation figures given represent only "voluntary quitting" by workers and cover an unusual wartime period when labour turnover was high. "The quit rate for unimpaired workers was 2½ times as high

as that of the impaired". It is pointed out, however, that "mobility of impaired workers is, of course, not usually as great as for the unimpaired."

The conclusions reached from these preliminary findings were that when impaired workers have been placed in jobs in which their impairments are not handicaps, "they do as well—and frequently better—than the so-called normal workers." The Veterans' Administration at Washington has planned to continue the study in a greater variety of jobs and industries with a view to obtaining more conclusive statistics.

Medical Treatment of Ex-Prisoners of War

A complete medical examination for each of the more than 8,000 Canadians who were prisoners of war has been announced by the Department of Veterans Affairs.

"The examinations are being given to safeguard the health of World War II veterans who endured the hardships of captivity. They will be repeated as often as is necessary for their medical protection, and within another six months in any case."

The plan calls for the first examination to be given six months after the former prisoner's discharge. Arrangements are proceeding to put the program into effect, and letters have been sent out to veterans listed as ex-POW's

by the three services, inviting them to take advantage of the facilities offered, in their own interest.

"Many of these men were subjected to prolonged malnutrition and unhygienic conditions," Hon. Ian Mackenzie, Minister of Veterans Affairs, stated. He continued: "Extra precautions are well justified. The examinations are to be conducted largely in DVA treatment centres. Provincial health authorities have been approached, and it is anticipated they will give their fullest co-operation."

The Canadian Army lists 6,548 former prisoners of war; the RCAF 2,525, and the Royal Canadian Navy 97.

New York Veterans and Education

It is reported in the New York *Times* of July 31, that the Veterans Administration of the State of New York is starting "an all-out program to provide thousands of job-training opportunities for some 120,000 New York veterans who will seek entrance to overcrowded schools and colleges by October".

According to the Veterans Administration 36 per cent of a sample group of ex-servicemen, who were eligible for training and schooling, planned to attend college; 23 per cent chose Trade schools and 16 per cent elected on-the-job training. The acting deputy administrator is quoted as saying: "With colleges and schools already overcrowded, many of these veterans will have to choose an alternate means of obtaining an education. . . The administration is making every effort to provide this alternate means of education."

An employment survey of New York industry is being conducted, which when completed, is expected to show what on-the-job training prospects there are in the state and thus pave the way for the creation of many job-training opportunities.

Evidence of the serious purpose of veterans enrolled in colleges is provided by New York University. Disabled veterans at the School of Commerce, Accounts and Finance won, in the Spring semester, a greater number of scholastic honours in ratio to their enrolment than the able-bodied veterans, or the non-veteran students. Moreover, "the veterans as a whole took the academic laurels from the rest of the student body." While they comprised only 48 per cent of the student body, they took 62 per cent of the coveted positions on the dean's list. To qualify for this list, "a student must receive a scholastic grade of over 80 per cent in at least eight subjects on his regular program, and the same grade in five subjects if he attends the evening division."

The dean of the school stated that "It has been the experience of the faculty as a whole, the veterans are more serious minded and industrious than they were before their war experiences". He pointed out that "the majority of the veterans now attending the school had been students there before the war".

Canadian Vocational Training

THE following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments:—

- (1) The vocational and pre-matriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Re-training of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the provinces for vocational schools.

Cumulative Enrolment

From the inception of the Training Program up to June 30, 1946, the gross enrolment of discharged members of the forces for training, has been 76,364.

The gross enrolment in the training of industrial supervisors and foremen has been 21,938.

As there have been no further classes for War Industries or for tradesmen for the Armed Forces since March, the accumulated enrolments for these fields are no longer given in this statement.

Training of Discharged Members of the Forces

The total number of veterans enrolled on June 30, in all categories of training, was approximately the same as for May 31, but the distribution shows certain significant changes. There was an increase of 1,029 men and women training on the job in industry, but the following decreases were shown in the other classes:—

Pre-matriculation	533
Private Trade Schools and Commercial Schools	191
Canadian Vocational Training Schools.	266

Substantial numbers of trainees in the schools left their courses to accept employment during the Summer months, particularly in the building trades, and it is anticipated that there will be still further reductions in enrolments until the return in the Fall, when a seasonable increase is expected. The indications are that the peak of enrolments in pre-matriculation courses has been passed, and the number in these courses will show a continued decrease from now on.

The maximum number of new trainees enrolled in any month, 10,750, was in January.

From that date there has been a steady decline, but the minimum of new enrolments is shown for June, namely, 5,990. On the other hand there has been a continuous increase in the number of those completing training, from 1,101 in January to 3,552 during June.

As of June 30, the distribution of the enrolment in the following types of training was as follows:—

	Per Cent
Correspondence courses	2.2
Private Trade Schools and Business Colleges	12.2
Training-on-the-job in Industry.....	27
Pre-matriculation classes in special CVT Centres	24.9
Vocational and Commercial classes in special CVT Centres.....	33.7

No new Training Centres have been opened during the past month, although a number of new courses of Vocational Training have been started in the existing training centres. In most places sufficient machinery and capital equipment is now available although there are still shortages in certain lines such as watch repair. Shortages of materials, instructional supplies and certain types of hand tools are still causing serious difficulty in providing thorough practical instruction throughout the country, particularly in plumbing and electrical supplies and even in such items as sheet metal, lumber and nails.

In order to provide living accommodation and messing facilities for the trainees, Canadian Vocational Training is now carrying on residential centres in the following places—North Sydney, N.S., Windsor, N.S., Pictou, N.S., Moncton, N.B., St. Paul l'Ermite, P.Q., Prescott, Ont., Brockville, Ont., and Red Deer, Alberta. In some of these centres the catering arrangements have been let to outside firms following submission of tenders, but in others, Canadian Vocational Training is handling it directly. In other centres, cafeterias and canteens are being operated for the convenience of the trainees.

Students' Councils have also been established in nearly all the larger training centres, with representatives elected by the student body. These councils have been found to be of great assistance in presenting to the Director of each centre, in an orderly manner, suggestions and complaints from the students. They have also been active in the promotion of recreational activities.

Vocational Training for Ex-Service Women

WITHIN certain limits the proportion of ex-service women who enrol for post-discharge vocational training in Canada parallels that of ex-service men.

The total enlistments and discharges of women in the three Armed Services up to June 30, 1946 are shown in the following table:—

	WRCNS	CWAC	RCAF	Total
Enlistments.	6,675	21,600	17,033	45,308
Discharges.	6,375	18,700	15,133	40,208
On Strength.	300	2,900	1,900	5,100

There have been 5,179 women enrolled under CVT during the period from April 1, 1945 to June 30, 1946, of whom 422 were enrolled during June, 1946, with the following breakdown in types of training:—

Training-on-the-job	274
Training in Schools.	4,354
Pre-Matriculation or Correspondence.	551
	<u>5,179</u>

Of this number 1,271 had graduated and been placed in employment; 1,069 had discontinued training and the remainder, 2,839 were proceeding with the courses they had selected.

Approximately 13 per cent of the women discharged up to June 30 have received training under the CVT program. However, of some 1,100 discharged in June, 422, or

slightly less than 39 per cent, were enrolled for vocational training. This proportion corresponds more closely to earlier surveys on "Demand for Training" carried out by the three Armed Services.

While there was a decline in the number of women enrolled for training during June, 1946, the over-all percentage increased. It may be noted that a great many women who were discharged at an earlier date were released on compassionate grounds, and for marriage, etc. These, for the most part, did not desire to take advantage of training opportunities. Moreover, employment conditions for women veterans have been sufficiently attractive to remove, in some measure, the immediate necessity for further training.

The following courses have been the most popular choices of women veterans:—

Commercial	1,292	46 per cent
Hairdressing	431	16 per cent
Dressmaking	388	14 per cent
Pre-matriculation	316	11 per cent

The 11 per cent taking pre-matriculation work were doing so either for vocational purposes or to satisfy university requirements.

The accompanying table provides a summary by provinces of the numbers of women taking the several types of training during the period April 1, 1945 to June 30, 1946.

*Activities of Unemployment Insurance Commission**

Growth of Fund in Five Years—Registrations and Benefit During June— Chairman of Commission Resigns—Umpire's Decisions

FIVE years ago, on July 1, 1941, the unemployment Insurance Act came into force and the Commission began the collection of contributions to the unemployment insurance fund from employers and workers in insurable employment. Benefit payments were not commenced until early in February, 1942, as the first statutory condition for the receipt of benefit by any unemployed insured worker requires that not less than 30 weekly, or 180 daily contributions be made.

In February, 1942 (portion of month), 663 persons filed claims for benefit and \$983.09 was paid to claimants. In March, 1942, the number filing claims rose to 4,124 and benefit payments increased to \$26,769.83.

From the outset, the number of persons filing claims and the amounts paid in benefit have followed a seasonal pattern, being relatively high at the beginning and end of each year and lowest during the early summer months. However, the general trend has risen steadily, reaching its highest level to date during the winter of 1946. In all, 71,932 persons filed claims for benefit in January, 1946, while the peak in expenditure for benefit payments for any single month was reached in March, 1946, with a total of \$9,926,293.28. That was the only month since the inception of the Act that benefit payments were in excess of monthly revenue.

During the five years ending June 30, 1946, employer-employee contributions totalled \$297,762,652.06. The Dominion government's contributions, as provided under Section 77 of the Act, amounted to \$59,552,530.41 and the revenue from interest and profits on the sale of securities \$20,087,801.67. Thus, the total revenue during the five years amounted to \$377,402,984.14. For the same period, \$53,398,929.20 was paid in benefit, leaving a balance of \$324,004,054.94 in the Fund on June 30, 1946.

Claims for benefit.—Claims for unemployment insurance benefit in Canada during June showed a greater decline than in the preceding month, numbering 30,646 as compared with 34,777 in May and 35,781 in April, according to the statistical report on the operation of the Unemployment Insurance Act issued by the Dominion Bureau of Statistics. During June last year 10,857 applications were filed. The June decline

was fairly general across Canada, lower figures being recorded in all provinces except Prince Edward Island and Quebec, which had increases of 29 and 1,541 respectively.

There was a decline also in the number of live claims at June 30 as compared with May 31. These totalled 82,382 (60,210 males and 22,172 females) as against 98,810 (74,130 males and 24,680 females) at the end of May. The decrease of 16,428 in the total compares with a drop of 25,140 in the preceding month, and was spread through all provinces. The number of live claims at June 30 last year was 17,242 (9,230 males and 8,012 females).

Unemployment insurance fund.—Total revenue during the month of June amounting to \$7,123,236.51 showed an increase of \$76,013.19 or one per cent over the monthly average of \$7,047,223.32 for the first five months of the year 1946.

Benefit payments in June this year amounted to \$4,468,245.05, a decrease of \$1,496,680.05 or 25 per cent from the monthly average of \$5,964,925.10 for the first five months of the year 1946.

As a result of the increase of revenue over benefit payments the Fund shows an increase of \$2,654,991.46 in June.

Insurance registrations.—Reports received from Local Offices of the Unemployment Insurance Commission showed that as at June 30, 1946, 2,410,565 employees were issued with Insurance Books and had made contributions to the fund at one time or another since April 1, 1946, an increase of 55,399 since May 31, 1946.

As at June 30, 1946—165,047 employers were registered as having insurable employees, an increase of 3,464 since May 31, 1946.

Registrations as at June 30, 1946, by regions, are shown in Table 1.

Chief Commissioner resigns.—Honourable Humphrey Mitchell, Minister of Labour, announced in the House of Commons on July 25, the resignation of Mr. Louis J. Trottier, as Chairman of the Unemployment Insurance Commission, effective September 30, 1946.

The Minister stated that the resignation had been accepted with regret and the appointment of a new Chairman would be made as soon as possible.

Mr. Trottier received the appointment in March, 1942 to succeed the late Dr. Joseph Sirois. (L.G., April, 1942, p. 449.)

*Statistics (including tables) are based on returns supplied by the Unemployment Insurance Commission and the Dominion Bureau of Statistics.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the Provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the *LABOUR GAZETTE* and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are being published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU.-B. 57

(Nov. 8, 1945)

The Claimant applied for benefit in his second benefit year, without having made sixty days' contributions since the commencement of his first benefit year—HELD: The provisions of Section 40 (1) (b) of the Unemployment Insurance Act, 1940, cannot be dispensed with and as the claimant had not met the conditions stated in the Act he was not entitled to benefit.

The material facts of the case are as follows:

The claimant, a married man, aged 73 years, became unemployed on April 5, 1944 and made application for benefit at a local office of the Commission on April 11, 1944. His claim was allowed and the claimant received benefit for nine days.

The claimant did not obtain any further benefit in the twelve months following his first claim and his benefit rights lapsed. On July 13, 1945 he made a new application for benefit which the Insurance Officer disallowed under Section 40 (1) (b) of the Act.

From this decision the claimant appealed to the Court of Referees which, in a majority decision, dismissed the appeal.

The Union of which the claimant was a member appealed to the Umpire on behalf of the claimant.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons: This appeal is unusual only in one sense

and that is, that there is really no dispute either as to the fact or law. In substance the appeal seems to be one against one of the provisions of the Act but of course my jurisdiction is limited to interpreting the Act as it is.

The Section of the Act mentioned above provides that on an application for benefit the claimant must show that since the commencement of his last benefit year contributions have been paid in respect of him for sixty days. The claimant was unable to show any contributions since the commencement of his last benefit year and consequently he simply could not meet the condition stated in the Act.

CU.-B. 58

(Nov. 19, 1945)

The claimant, while receiving benefit, was employed in subsidiary employment at a daily rate of remuneration in excess of \$1.00 per day; the Insurance Officer considered therefore that he was not unemployed—HELD: Under the provisions of Section 33 (b) of the Unemployment Insurance Act, 1940, a claimant is entitled to benefit while engaged in subsidiary employment, only if the remuneration received therefrom does not exceed a daily average of \$1.00; in view of the claimant's rate of remuneration he cannot be considered as having been unemployed during the period he was engaged in subsidiary employment.

The material facts of the case are as follows:

The claimant, a married man, aged 44 years, whose occupation was that of carpenter, applied for benefit on December 7, 1944. On March 18, 1945, a parish priest wrote a letter to the Commission advising that the claimant had been employed by him as a sexton since December 15, 1944 at a salary of \$35.00 per month.

The Insurance Officer was of the opinion that under the provisions of Section 33 (b) of the Act the claimant could not be deemed to be unemployed, and he therefore disallowed the application as from December 15, 1944, on the ground that the claimant had failed to satisfy the second statutory condition, which requires the claimant to prove that he was unemployed on each day on which he claims to have been unemployed.

From this decision the claimant appealed to the Court of Referees which unanimously disallowed the claimant's appeal but the Chairman granted him leave to appeal to the Umpire.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons: Section 33 (b) of the Act provides that:

An insured person shall not be deemed to be unemployed—On any day on which notwithstanding that his employment has terminated he is following an occupation from which he derives any remuneration or profit, unless that occupation could ordinarily be followed by him in addition to his usual employment and outside the ordinary working hours of that employment, and the remuneration or profit received therefrom for that day does not exceed one dollar, or where the remunera-

tion or profit is payable or is earned in respect of a period longer than a day, the remuneration or profit does not on the daily average exceed that amount.

It is quite clear that the occupation as sexton could be followed in addition to the usual employment and outside the claimant's ordinary working hours, but it is equally clear that the remuneration from the part-time employment exceeded a daily average of \$1.00. This is not changed in any way by the fact that the claimant's son assisted him from time to time. I therefore find that the claimant must be deemed to be not unemployed during the period in question and, consequently, he has not satisfied the second statutory condition.

First Annual Conference—Council for Guidance of Handicapped

The increasing extent of public interest in the problems of handicapped persons, particularly in relation to employment, was revealed by an attendance of some 200 persons, representing 85 different organizations, at a three-day conference, held in Vancouver, B.C., under the auspices of the Vancouver Council for Guidance of Handicapped, on June 10, 11 and 12, 1946. The United States Government was represented by Michael J. Shortley, Director of the Office of Vocational Rehabilitation, Washington, D.C., who spoke on the rehabilitation program of the United States. The Supervisor for Vocational Rehabilitation from the State of Washington, E. M. Oliver, also participated in the program. Canadian Government representatives and speakers were Major E. A. Dunlop, G.C., Supervisor, Casualty Rehabilitation Section, Department of Veterans Affairs, and H. C. Hudson, Supervisor of Special placements Division, Unemployment Insurance Commission. A message from A. MacNamara, C.M.G., Deputy Minister of Labour, was delivered by Fred J. Smelts,

O.B.E., Pacific Regional Director, Department of Labour.

The program also included papers and discussions on the problems of the disabled veteran; the injured workmen; crippled children; the blind; the deaf; and arrested tuberculosis cases. In addition, through the courtesy of the Workmen's Compensation Board of British Columbia, films dealing with various aspects of rehabilitation were shown. An interesting feature of the conference was an expression of the viewpoints of both employer's associations and trade union groups regarding the place of the disabled man in industry.

In addition to the information supplied regarding the rehabilitation program of the United States, the conference was given first-hand information on the actual operations of the Disabled Persons (Employment) Act passed in Great Britain in 1944, the speaker being Dr. A. S. McConkey of Vancouver, who has recently returned after several years spent in England.

Employment Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month indicated a continued improvement in the employment situation.

Employment and Payrolls at the beginning of June, 1946.—In spite of industrial disputes affecting large numbers of workers, there was a moderate increase in employment at the first of June as compared with a month earlier, according to the monthly report of the Dominion Bureau of Statistics based on returns received from firms employing 15 or more workers.

The Bureau tabulated data for the beginning of June from 15,876 firms. These had an aggregate working force of 1,735,435 men and women as compared with 1,729,472 a month earlier, an increase of 0.3 per cent. This raised the Bureau's index, on the base 1926=100, to 169.9 as compared with 169.3 at May 1 and 175.3 at June 1 last year. Except for the four years 1942 to 1945, when the June 1 indexes ranged between 171.7 and 181.2, the latest index is higher than at any other June 1 for which figures have been recorded by the Bureau, exceeding by over 50 per cent that of 113.1 in 1939.

Payrolls reported by the industrial firms furnishing statistics aggregated \$54,969,486 for the week preceding June 1, a decline of \$466,197 or 0.9 per cent from the aggregate a month earlier. This decrease was largely due to the industrial disputes, although the Victoria Day holiday in the pay period for which figures were furnished by many firms also had an effect. Average weekly earnings for the period reviewed, on the basis of these totals, were \$31.67 at June 1 as compared with \$32.05 at May 1 and \$32.10 at June 1 last year.

Employment Conditions as reported by Employment Offices, July, 1946.—Returns from local offices of the National Employment Service indicate that the reduction in unemployment continued during July at a rate of approximately 4,000 a week. Many of those seeking work were absorbed into the agricultural industry. Unplaced applicants at July 25 totalled 165,301, as compared with 185,855, five weeks earlier.

Numerous strikes throughout the country, particularly in primary manufacturing industries such as steel, rubber, and chemical manufacturing plants seriously affected the labour situation during July. Fewer positions were available at July 25 than the number reported five weeks earlier, the decline taking place largely in female labour requirements. Labour demand, exclusive of agriculture, totalled 106,321 (male 63,913 and female 42,408) at July 25.

Unemployment Insurance Statistics, June, 1946.—During the month of June, 103,231 persons received one or more cheques for unemployment insurance benefit, as compared with 127,866 in May, and 16,921 in June, 1945. At the end of June the number of live claims was 82,382 (60,210 males and 22,172 females) as compared with 98,810 at May 31, and 17,242 at June 30, 1945.

Claims for benefit totalled 30,646 in June as against 34,777 in May and 10,857 in June, 1945.

Placements Effected by Employment Offices, June, 1946.—During the four-week period May 31 to June 27, 1946 there was a slight decrease in the daily average of placements in employment made by Employment Offices when compared with the preceding four weeks and a greater decline when compared with the corresponding period in 1945.

During the period under review there were 155,144 vacancies reported, 152,822 applications for employment and 71,702 placements effected in regular and casual employment.

Average weekly hours and earnings, June 1, 1946.—Average hours per week worked by hourly-rated wage-earners employed in manufacturing were 42 in the week of June 1, as compared with 43 in the week of May 1 and 44.3 in that of June 1 last year. Average hourly earnings were 69.1¢ at June 1, 68.9¢ at May 1, and 79.3¢ at June 1, 1945.

Labour Force Survey.—Total employment in Canada reached an estimated 4,702,000 by June 1, a gain of 390,000 since the end of February, according to the third quarterly labour force survey by the Dominion Bureau of Statistics, based on a sampling of 25,000

households in nearly 100 different areas across Canada. The number of unemployed, consisting of those who were looking for work and did no work in the week ending June 1, totalled 126,000, about 87,000 below the estimate for February 23.

Employment and Payrolls in 1945.—

Employment generally in Canada continued at an extremely high level during 1945 in relation to pre-war standards, according to the annual report of the Dominion Bureau of Statistics based on monthly returns from employers, although during most of the year the tendency from month to month was downward.

The Bureau's annual index was just over four per cent below that of 1944 and less than five per cent below the all-time high of 1943. In comparison with 1939, the 1945 index showed an increase of 53.7 per cent, and it was also some 47 per cent higher than in 1929, when industrial employment in Canada had reached its pre-war maximum.

Salaries and wages distributed in 1945 showed a smaller decline than the curtailment in employment, the falling-off in the aggregate amounting to 3.8 per cent. The average earnings per employee in eight leading industries were slightly higher at \$31.99 compared with \$31.84 in 1944. With figures for financial institutions added to those for the eight major industrial groups weekly payrolls aggregated \$59,443,292, representing an estimated annual payroll of \$3,091,051,200.

Unemployment in Trade Unions, June 30, 1946.—

Trade union unemployment for the quarter ending June 30, 1946, recorded a decrease of approximately 1.4 per cent over the first quarter of the year. The percentage of unemployed union members, within a unit of 414,150 members of 2,238 locals, was 0.5 in the period under review.

The improvement resulted from better conditions for employment in manufacturing, transportation, building and construction, services, and wholesale and retail trade.

Employment and Payrolls at the Beginning of June, 1946

IN spite of industrial disputes affecting large numbers of workers at the beginning of June, there was, on the whole, a moderate increase in employment at that date as compared with a month earlier. The advance was the smallest indicated at June 1 in any of the years since 1920 in which the trend at that date has been upward; the situation at the first of June of last summer was unique in that a recession had then been indicated.

The Dominion Bureau of Statistics tabulated information from 15,876 firms with a combined working force of 1,735,435 men and women; as compared with 1,729,472 in their last return, there was an increase of 0.3 per cent. This raised the index number, on the 1926 base, from 169.3 at May 1 to 169.9 at the date under review, as compared with 175.3 at June 1, 1945. In 1944, 1943 and 1942, the June 1 indexes had been 180.5, 181.2 and 171.7, respectively. With these exceptions, the latest index is higher than at any other June 1 of the record, exceeding by over 50 per cent that of 113.1 at June 1, 1939. After correction for seasonal influences, however, the adjusted index at June 1 showed a considerable decline, falling from 175.8 at May 1 to 169.9 at the date under review; the latter figure coincides with the unadjusted index.

Extensive strikes in the lumber industry in British Columbia, and more local disputes in the textile and non-ferrous divisions in Quebec and Ontario, were responsible for a decline of nearly 8,800 men and women in manufacturing,

in which the trend in many other groups was upward; the largest gains were in food and pulp and paper mills. The general reduction in manufacturing was contra-seasonal in character, although it was similar in size to the contraction which had been noted at June 1, 1945.

Among the non-manufacturing industries, logging showed an important decrease, mainly as a result of labour-management disputes, the co-operating firms reporting 8,843 fewer workers than at May 1. There were seasonal losses in transportation, in which the shipping strike was also a factor; many seamen worked part of the week of June 1, however, so that the latest figures in this industry only partially reflected this dispute. Noteworthy expansion was shown in construction and maintenance, in which some 20,300 additional workers were reported. Increases on a smaller scale were indicated in mining, communications, services and trade.

Payrolls

The firms co-operating in the eight leading industries at the beginning of June disbursed \$54,969,486 in salaries and wages for services rendered in the week preceding, a sum which was less by \$466,197 than the payrolls indicated at May 1. This loss of 0.9 per cent was largely due to the industrial disputes in existence in the week of June 1, although the fact that the Victoria Day holiday fell in the pay period for which data were furnished by many firms

also had an effect. In other cases the earnings returned to a more usual level following the declines which had taken place at May 1, as a consequence of the occurrence of the Easter holidays in the pay periods then reported by some firms. The typical person in recorded employment received an average of \$31.67 at June 1, as compared with \$32.05 at May 1, and \$32.10 at June 1, 1945; the mean at June 1, 1944, was \$31.80, and that at June 1, 1943, \$30.93. In the last 12 months, there has been a decline of 3.1 per cent in the index of aggregate payrolls, accompanying that of 4.7 per cent in the indicated numbers of workers.

When the figures of employment and payrolls in financial institutions are included, the survey shows that the total persons in recorded employment in the nine leading industries at June 1 numbered 1,810,066, as compared with 1,803,897 at the beginning of May. The weekly salaries and wages fell from \$58,017,781 at that date, to \$57,564,041 at the beginning of June. The per capita earnings in the nine industries stood at \$31.80, as compared with \$32.16 at May 1, and \$32.15 at June 1, 1945.

Table II summarizes the latest statistics of employment and payrolls for the major industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons with May 1, 1946, and June 1, 1945 and 1944. Table I contains a monthly record for the eight leading industries as

a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100; to facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table I shows that in the period for which information on payrolls is available, the number of persons on the staffs of establishments in the eight leading industrial groups has increased by 11.3 per cent and the aggregate weekly earnings by 36.4 per cent. Including finance, the increase in employment from June 1 1941, to June 1, 1946, amounted to 11.8 per cent, while the gain in the salaries and wages was 37 per cent. In previous reports the following factors have been cited as largely responsible for the much greater rise in the payrolls than in employment, (1) the concentration of workers still existing in the heavy manufacturing industries, in spite of the declines which preceded and followed the cessation of hostilities; in this group, rates of pay are above the average and there has been a considerable amount of overtime work; (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

basic wage rates as from February 15, 1944; (3) the progressive upgrading of employees as they gained experience in their work and (4) the payment of higher wage-rates in large numbers of cases.

In the last five years, employment in manufacturing, in spite of curtailment in the production of munitions, and the existence of widespread industrial disputes, has shown an increase of 9.9 per cent, while the reported payrolls at the date under review were higher by 34.3 per cent than in the week of June 1, 1941. Among the non-manufacturing industries taken as a unit, there was in this comparison a gain of 13 per cent in employment and of 39.3 per cent in the weekly salaries and wages disbursed at the beginning of June, 1946. The larger advance in the latter category than in manufacturing indicates a situation differing greatly from that in existence in recently-preceding years, when wartime con-

ditions resulted in a much higher level of employment and payrolls in manufacturing in relation to the 1941 basic period than was shown in the non-manufacturing groups.

With regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of the utmost importance.

TABLE 1.—INDEX OF EMPLOYMENT AND PAYROLLS, BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS
(The latest figures are subject to revision)

Date	Eight Leading Industries			Manufacturing

¹The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, July, 1946

THE following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

The seasonal trend of employment expansion at this time has been jeopardized by work stoppages in primary manufacturing industries. Current strikes in steel, rubber, textile, and chemical manufacturing plants have disrupted industrial production throughout the country. Expansion in employment opportunities, however, continues in the seasonal industries. Absorption of workers into the agricultural industry has been increasing, especially among ex-servicemen. Extensive transfer programs have been arranged among agricultural workers to ensure a good supply of labour during the harvest season. The existing shortage of female workers will become more acute as seasonal activity increases in food processing plants.

Labour demand, as measured by the number of unfilled vacancies¹ on file at National Employment Service offices, totalled 106,321 at July 25, as compared with 114,419 five weeks earlier. The decrease took place largely in the unskilled group and "white-collar" occupations. The number of unplaced applicants² dropped by 11 per cent during the five-week period, to total 165,301 at July 25. Although the decline was common to all occupational groups, unemployment among men registered in skilled and semiskilled trades, particularly, showed a marked decrease.

Table I shows labour demand and supply by main occupational group and by sex as at July 25, 1946. Table II presents a monthly comparison of total labour demand and supply. Table III shows unfilled vacancies classified by main industry group and by sex, as at July 25, 1946, with absolute and percentage changes in total demand during the last month.

Clerical Workers

Workers seeking employment in clerical occupations are greatly in excess of the number required. Even during the years of extreme

labour shortages, applicants desiring clerical work were almost equal in number to the vacancies reported. There exists, however, a considerable maladjustment in the geographical distribution of labour demand and supply. Demand is centred in the industrialized Ontario and Quebec regions while a surplus supply persists elsewhere. The real problem, however, lies in the fact that the applicants registered in this occupation are not qualified to fill the present demands of employers. Many of those seeking clerical positions are older, married, and lack general office experience. Qualified help is greatly in demand throughout the country. Placement of suitable applicants is deterred, in many cases, by the relatively low wages offered by employers. Some expansion of junior office staff has currently been taking place as students complete the school term. At July 25, there were 7,026 clerical workers required while available supply numbered 20,731. For every male vacancy notified, there were 7 men available. On the other hand, demand for female stenographers and typists totalled 2,960, outnumbering supply by 714.

Sales Workers

The number of applicants seeking sales work declined markedly during July. Despite this drop, unemployed sales workers outnumbered the jobs available by almost 7,000 at July 25. As in the clerical field, there persists a number of specialized positions which remain unfilled. In some areas expansion of retail establishments has been curbed by the lack of competent staff. Local offices report that employers are endeavouring to relieve this shortage by training junior help. At July 25, applicants seeking sales work numbered 11,011 as compared with 12,575 five weeks earlier. Vacancies on file at the July date totalled 4,047.

Service Workers

The need for service workers remains acute with no immediate alleviation in sight. Help is needed in both rural and urban areas for homes, hospitals, hotels and restaurants. Despite the fact that many jobs offer good wages, few applicants are interested in service work. The long hours, poor working conditions and heavy manual labour involved are deterrent factors in placing workers in service occupations. The fact that the coverage of unemployment insurance is low in this occupation also prevents workers from entering service work. The shortage of waitresses and kitchen help has become considerably more acute due to the active tourist trade. Jobs

¹Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated.

²Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

available for these workers are more than triple the number seeking them. Various means have been devised to alleviate the shortage of domestic servants. The institution of the Home Aide courses in many of the larger centres has succeeded in attracting workers, but the number is still very inadequate to meet the need for domestic servants. At July 25, demand for female service workers totalled 13,076, with available supply numbering 4,679. The supply of male service workers, on the other hand, totalling 7,609 outnumbered demand by 4,327.

Skilled and Semi-skilled Workers

Work stoppages in essential manufacturing industries have seriously affected the expansion of employment at this time. The devastating effects of the current steel strike are crippling production in automobile plants, foundries, and farm machinery production. Also, the existing shortage of supplies for the construction industry is gravely aggravated by stoppage of steel production. The current labour dispute in a chemical manufacturing plant has cut off the supply of soda ash which is vital to the production of glass, and pulp and paper. Despite these factors, employment opportunities for skilled and semi-skilled workers increased during July, while unemployment among skilled workers continued to decline. At July 25, there were 43,690 skilled and semi-skilled workers required while unplaced applicants numbered 49,835.

Textile Workers—Labour unrest continues to hamper production in textile plants. Despite

strikes and the difficulty of obtaining necessary supplies expansions and erection of new plants are being undertaken. Firms are providing housing in some areas where accommodation is difficult to obtain, in order to attract workers to textile occupations. It is felt that concessions made in settlement of current strikes should make it easier to interest unplaced workers in the textile occupations. Demand for textile workers remained practically unchanged during the month, with vacancies at July 25 totalling 8,487. Available supply, numbering 4,342 at July 25 showed a slight increase during the period due to the rise in male unplaced applicants. The shortage of female sewing machine operators remains acute, with 4,735 required at the July date but only 887 available.

Lumber and lumber products workers—Demand for workers in the lumber and lumber products industry rose during the month. The exceptionally good export market for pulp and paper and the overwhelming domestic demand for lumber for construction purposes have provided excellent opportunities for employment expansion. Employment in the logging camps is suffering from the withdrawal of prisoner of war labour and of conscientious objectors. The exceptionally good crop prospects throughout the country will prevent the transfer of farmers to the logging camps for some months. Consequently, employment opportunities for loggers remain high. Production in sawmills is progressing satisfactorily, although shortages of skilled help continue in some areas. The number of lumber and lumber products workers required

June 20, 1946	65,857	48,562	114,419	147,594	38,261	185,855
July 25, 1946	63,913	42,408	106,321	130,200	35,101	165,301

totalled 16,315 at July 25. Approximately 90 per cent of this demand was for loggers.

Miners—The mining industry, generally, reports a steady exodus of workers leaving the mines with no substantial replenishment in sight. Many mining companies are undertaking extensive development and exploration projects offering good possibilities for advancement of workers. Transferring of these orders to other localities has not proved satisfactory, due to the strict physical requirements specified by the companies. In addition, mining areas particularly have extremely limited housing accommodation. To ease the shortage of coal miners, extensive training courses for veterans are offered, reducing the required apprenticeship period from 2 years to 6 months. Available supply, however, continues to fall short of the number required. There were 1,491 vacancies on file for miners at National Employment Service offices at July 25, with available supply approximately one-half the number required. Demand for coal miners totalled 895, the Prairie and Maritime regions accounting for 72 per cent of the number required.

Construction—Recent reports indicate a serious housing situation. Two main factors holding up construction activity have been the shortages of vital raw materials and skilled help. Materials shortages were further aggravated by the strike in the British Columbia lumber camps and recently the labour dispute in the basic steel plants. The shortage of skilled tradesmen continues acute. This situation should be somewhat relieved when trainees under the Canadian Vocational Training Program complete their apprenticeship. Highway construction reports the need of

experienced help but few qualified workers are available. Demand for construction workers totalled 6,093 at July 25 with carpenters accounting for almost 60 per cent of the number required. Bricklayers and plasterers continue to remain in short supply. The number seeking construction work fell by 19 per cent during the month to total 4,988 at the July date. Of these workers, 10 per cent of those not referred to specific jobs were over 65 years of age while 23 per cent were between the age of 45 and 65.

Workers in Miscellaneous Occupations—With the prevailing high level of economic activity unemployment among applicants registered as metalworkers has declined sharply. Since vacancies in this occupation have remained at a low level, many of the workers undoubtedly accepted employment in alternative occupations. Nevertheless, there were five applicants for every job available at the end of July. Unplaced metalworkers numbered 10,641 at July 25 as compared with 12,271, five weeks earlier. The labour shortage in foundries has been further aggravated by numerous strikes throughout the country. In addition, the high rate of labour turnover during the warm weather, has become a serious problem. Good positions are available for experienced auto repairmen and mechanics. Although there is a generous supply registered at employment offices, few have the necessary qualifications. A large surplus of truck-drivers persists. Local offices have been endeavouring to reduce this surplus by re-interviewing applicants in an attempt to redirect them into other occupations. Laundries remain hard-pressed for labour although some relief has resulted from the temporary employment of students. At July 25, demand for finishers in laundry and

cleaning establishments totalled 662 while available supply was only one-third the number required.

Unskilled Workers—A sharp drop in vacancies for unskilled workers was evident during July. Reporting of vacancies in the transportation industry has been very low this season, due in part to the adverse effect of the strike of the seamen's union. Food processing establishments are commencing to increase their staffs in anticipation of an

extremely active season. The curtailment of glass production necessitated by current labour strikes, however, will seriously affect food manufacturing plants. During the five-week period ending July 25, unemployment among unskilled workers dropped by 6,600; at the July date, 56,361 male and 7,667 female unskilled workers were seeking employment. Jobs available for men were slightly more than one-third the number seeking work. Vacancies for women, on the other hand, were considerably more than the available supply.

TABLE III.—UNFILLED VACANCIES BY INDUSTRY AND BY SEX AS AT JULY 25, 1946

Regional Analysis

The Regional Analysis which follows is based on semi-monthly reports received from Local Employment Offices across Canada. The report covers employment conditions during the month ended July 22, 1946.

Maritime Region

Agriculture.—Hay making is progressing satisfactorily, although many districts report poor crops. Labour supply is adequate to meet demand except in Prince Edward Island, where a slight shortage has appeared.

Logging.—Summer logging activity is increasing, accompanied by expanding sawmill operations. Orders are registered for over 1,000 experienced lumbermen. However, the workers available are chiefly untrained and therefore not acceptable to employers.

Fishing.—Good catches are reported from most points. Processing plants still urgently require skilled cutters and filleters. The training courses established to meet this shortage are making only fair progress. The Maritime Fishermen's Union is requesting a 10-cent increase for cutters and filleters in Halifax plants; this movement will probably spread throughout the industry, and may stimulate placements. The Department of Fisheries is undertaking a program for the improvement of facilities and methods of fishing, fish processing and freezing.

Coal Mining.—The present output of coal per man has declined seriously in comparison with pre-war figures. As an indication, one company reports a drop in daily output from a pre-war 19,000 tons to approximately 13,000 tons. Largely accounting for this is the increased proportion of day-to-day workers as opposed to contract workers—now 67 per cent datal and 33 per cent contract, formerly 55 per cent and 45 per cent. The shortage of skilled miners is also a serious handicap.

An underground training school has been established by the Dominion Coal Company at Sydney. Intensified training will enable workers to obtain their first-class miner's papers in six months instead of the two years normally required.

Two hundred and fifty first-class miners are required throughout the region, but no demand exists for mine labourers.

Manufacturing.—The complete shut-down of the steel plant at Sydney is adversely affecting other industries of the region. Several factories in Saint John, Moncton, Halifax and other areas are releasing workers and may even close temporarily if supplies are not forthcoming shortly.

General material shortages persist. Several firms state that although their present output approximates pre-war production, demand for their products has increased by 50 per cent. Plant facilities would permit them to meet the demand, but sufficient materials are not available. Biscuit, paint, leather and textile companies are in this position.

Except for skilled workers, almost all labour demand can be met. Orders for skilled workers are difficult to fill, as many applicants lack the full qualifications specified by employers.

Construction.—The shortage of cement has delayed projects in several areas. Severe shortages of wallboard, inside finish and plumbing fixtures are holding up the completion of many housing units. Skilled carpenters, bricklayers and plasterers are in demand wherever construction is progressing. At Sydney, construction to the value of \$755,000 is under way; 106 housing units near Saint John, and 100 units at Moncton, are in progress.

Transportation.—There is very little activity on the Halifax waterfront. The grain elevators are empty and no shipments are expected before late fall. Exports of lumber, pulpwood and pitprops to overseas markets are stimulating port activity at Campbellton.

Quebec Region

Agriculture.—Recent rainfalls in most districts have improved crop conditions. The shortage of experienced agricultural workers for harvesting operations remains an emergency problem.

The bean-picking season has begun; farm hands are being recruited for American border areas. Labour quotas for the American farms are easily filled as wage scales are high, even with the effect of dollar parity.

Logging.—Employment in the woods is relatively slack at present. Operators are preparing equipment in anticipation of a 15 to 20 per cent increase in cutting operations during the coming season. Recruiting campaigns for woods labour will commence in about one month.

Mining.—The supply of underground labour remains acutely scarce. To relieve the situation, planned recruiting and training of beginners is being attempted. Considerable shaft-sinking activity is occurring in North-western Quebec. Wage levels are high for this type of work and labour response is satisfactory.

Manufacturing.—A decline in operations, particularly in the heavy iron and steel industries, has resulted from effects of the Cana-

dian steel strike, the previous American steel and coal strikes, and the recent tie-up in Great Lakes shipping. Strikes are in progress in the textile industry, and labour-management friction still exists in basic steel plants. Glass factories are adversely affected by the strike at the potash plant of Amherstburg, Ontario, and lay-offs may occur.

High labour turnover persists in iron and steel foundries. Shipbuilding activity is slow. The recent 10 per cent boost in radio prices will stimulate production in this industry; a new radio manufacturing plant has been established in Quebec City. The clothing industry still reports an acute scarcity of sewing machine operators. Nevertheless plant expansion continues in this industry, as well as in the textile industry where equal shortages of workers are reported.

Construction.—The construction industry is forging ahead and new projects are starting continually, despite material obstacles. All construction tradesmen are fully employed except for electricians, whose employment is restricted by supply shortages. Heavy labour is in active demand. Two new training centres have been established to increase the supply of skilled construction tradesmen. Material shortages continue to delay work on many large projects—steel and plumbing supplies being especially scarce.

Ontario Region

Agriculture.—Haying operations have been almost completed and grain harvesting is now commencing. The crop situation is excellent and heavy yields are expected. Recent rains have improved the fruit crop in many districts and returns will be the highest in years. The seasonal pressure for farm labour has eased somewhat. The supply of western farm workers and students has been augmented by numerous casual workers as a result of the strikes, and is generally sufficient.

Logging.—Operators are organizing for fall cutting in both pulp and lumber camps. Demand for woodmen is as high at the present time as it was during the peak season of last year. About 5,000 men are required in the Timmins area alone, but applicants are few. Sawmill labour is in good supply.

Mining.—The supply of miners is insufficient to meet present and future demands. Operators are willing to train inexperienced men and are requesting that orders be cleared through other employment offices. All men must pass a physical examination before entering underground work; the drawback to clearance placements is that most operators will not arrange for this before the worker is transferred, insisting that their own mine doctors perform the examination.

Manufacturing.—Strikes directly affect production in basic steel, rubber products, electrical products, automobile, brass and potash industries. At Windsor, strikes involving 4,500 workers have in turn caused the lay-off of 1,500 additional workers because of supply shortages. The disputes involving 7,500 at Hamilton have indirectly affected the employment of 550 other workers. Steel shortages have also resulted in a reduced working week for many plants.

A decrease in the current high rate of labour turnover in foundries is expected when wage increases now under consideration come into effect. Heavy industries in some areas require machinists and mechanics, but will not accept war-trained applicants. The textile industry still needs workers acutely, but few applicants are interested. Heavy labour turnover exists in the female labour field, as workers shift to higher-wage jobs.

Construction.—The demand for skilled labour in the construction industry remains a major problem. Unskilled labourers are urgently required but suitable applicants are few. To offset the shortage of labour, contractors are being urged to hire C.V.T. graduates, who could thus complete their apprenticeship during the present building boom.

Construction materials are in short supply. Although production has expanded, it cannot keep pace with demand. If the steel strike persists, it will seriously retard building progress.

Transportation.—Railway companies are in need of heavy labourers for maintenance work. Few suitable applicants are available, as the orders specify physically fit, husky men.

Lake shipping is progressing normally once more.

Prairie Region

Agriculture.—Haying operations are underway and farm labour demand is fairly heavy. Rye harvesting is in progress in the Saskatoon area; tractor and combine operators are particularly required. A heavy demand for workers during the harvest season is indicated.

Logging.—Orders for bush workers have increased in the Port Arthur and Kenora areas with the removal of prisoners of war labour. The Fort William and Winnipeg districts also report a heavy demand. Workers, however, are reluctant to accept woods employment during the summer months. Plans are under way to establish the pulp industry of the Fort Frances area on a twelve-month basis.

Coal Mining.—All coal mines require certificated miners, but few are available. The

housing shortage still prevents placements through clearance.

Hardrock Mining.—Gold mines are active and experienced underground men are in great demand. Physically fit as well as trained men are difficult to obtain. Exploration and development work continues, accompanied by a growing need for workers. Some companies will hire labourers of a good type, to be trained for various key positions where qualified workers are scarce.

The base metal industry plans great expansion in the Atikokan area; iron ore production will be trebled. The demand for skilled or semi-skilled labour continues despite placements and transfers-in from other areas, as the rate of turnover is high. Accommodation is available for single men.

Manufacturing.—Building material firms are in active operation except for sash and door factories, now hampered by glass shortages. Wage increases in some sections of this industry may reduce the present abnormal turnover of labour. Meat-packing plants are making inquiries as to the labour available to meet their seasonal requirements in the autumn. Physically fit men are needed in this industry at Edmonton. Flour mills are working steadily. Paper mills in the Northwestern Ontario area are in need of skilled labour. Qualified automotive mechanics and bodymen are required throughout the region. Many ex-servicemen registered in these categories find that employers consider war-training inadequate for the civilian trade.

Construction.—All types of construction projects are planned but material shortages are retarding progress. The shortage of skilled tradesmen in some regions is thus no longer so apparent with the slackening of activity. Lumber, brick, cement and finishing materials are particularly in short supply.

Transportation.—Section men and extra gang labourers are required for railway maintenance work at various divisional points.

Pacific Region

Agriculture.—All types of farm workers, except dairy workers, are in good supply. In the fruit belt a surplus exists, but this will disappear as fruit picking accelerates. The berry crops are almost over; haying and pea harvesting are in full swing. A record fruit crop is in prospect.

Logging.—The coastal logging industry, not yet fully recovered from the recent labour dis-

pute, may suffer a further serious set-back if the fire hazard forces a complete shut-down of major logging operations. The acute shortage of labour in the skilled logging occupations still persists—engineers, fallers and hook-tenders being in greatest demand.

Sawmills in the Vancouver area are in normal operation now that the log supply is again adequate. Three of the larger sawmills plan to enter the logging field in order to ensure a continuous supply of logs. Sawmills in the New Westminster area report a scarcity of skilled and semi-skilled workers, particularly shingle sawyers and packers, boommen and doggers. The supply of unskilled sawmill labour is ample.

Coal Mining.—Workers continue to leave this industry for other employment, and the problem of replacement grows more serious. The conditions of work appear to discourage applicants. Orders for labour are heavy but no workers are available.

Hardrock Mining.—The labour dispute in producer gold mines affects approximately 2,500 workers. Developmental operations are continuing, however, but would be affected by the strike as soon as they reached the production stage. The base metal industry is also involved in the current dispute and no settlement is imminent.

Manufacturing.—Strike conditions are curtailing production in iron and steel plants. The moulders' strike, now two months' old, is indirectly affecting operations in sawmills and other industries dependent on machine shops for repair parts and replacements. Shipyard activity is at a standstill pending negotiation of a new agreement in the steel yards; wages and hours have been agreed upon, but the overtime clause is still under discussion. Material shortages, particularly steel and castings, are still acute.

The late run of salmon has retarded fish cannery operations. Labour unrest is prevalent in Prince Rupert fish processing plants, and a strike may result shortly. Fertilizer, feed, packing and other manufacturing plants are busy.

Construction.—The demand for skilled construction workers rises as lumber supplies increase. All available finishing carpenters are employed.

The road construction program has been hampered by shortages of skilled shovelmen, grader operators, and "cat" operators. Contractors, especially those working in mountainous country, will hire only highly-experienced men. Orders for labourers are readily filled.

Sex Distribution of Persons in Recorded Employment

OF the 1,735,435 employees reported at June 1 by the establishments furnishing data in the eight leading industries, 1,347,788 were men and 387,647 were women, there being 777 of the former sex and 223 of the latter in each 1,000 workers in recorded employment. The number of men showed an increase of 7,803,

or 0.6 per cent as compared with May 1, but there was a reduction of 1,840 women, a loss of 0.5 per cent; the ratios then indicated were 775 men and 225 women per 1,000 employees.

Firms in the nine leading industries showed an advance of 6,169 persons in the month;

THE SEX DISTRIBUTION OF THE WORKERS IN RECORDED EMPLOYMENT IN THE PROVINCES, THE LEADING INDUSTRIAL CITIES, AND THE NINE MAJOR INDUSTRIAL GROUPS, AS AT JUNE 1, MAY 1 AND APRIL 1, 1946, WITH COMPARATIVE FIGURES FOR OCTOBER 1 AND APRIL 1, 1945

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The nondurable group includes the remaining manufacturing industries with the exception of electric light and power. ²The June data are subject to revision.

the number of men increased by 8,007, or 0.6 per cent, but there was a decrease of 1,838, or 0.4 per cent in the reported women workers. The ratio of the latter per 1,000 persons of both sexes in recorded employment in this group of industries was 234, as compared with 236 at May 1. This proportion and that in the eight major industrial groups, were lower than those indicated in any earlier enquiry into sex distribution. The ratio of women per 1,000 persons in recorded employment reached its maximum at October 1, 1944, when the number of women reported in the eight industries was 261 per 1,000, and in the nine major industrial divisions, 271. As goes without saying, the completion or the curtailment of war work is a factor of outstanding importance in the declines recently indicated in the numbers and the proportions of women workers, but the seasonal element and the existence

of strikes at June 1 also entered into the situation to a considerable extent. The last two factors affect the value of comparisons of the latest data with those obtained in the earlier surveys into sex distribution, made as at October 1, in 1942-45, and at April 1 in 1944 and 1945.

There were losses at June 1 as compared with a month earlier in the number of men reported in manufacturing, logging and transportation, mainly as a result of the strikes; in mining, communications, services, trade and finance, the employment of such workers reached a higher level. In the three divisions first mentioned, the indicated numbers of women were also lower at June 1 than at May 1, and there were declines in trade. Little change was shown in mining, construction and finance, but employment for women was more active in services.

Applications for Employment; Vacancies and Placements; June, 1946

REPORTS received from the National Employment Service Offices of the Unemployment Insurance Commission for the four weeks May 31 to June 27, 1946, showed a decrease of 2.3 per cent in the daily average of placements effected when compared with the preceding four-week period May 3 to May 30, and a loss of 38.4 per cent in comparison with the four weeks June 1 to June 28, 1945. Under the first comparison agriculture, and finance and insurance showed increases but all other industrial groups registered losses. When compared with the four weeks of June, last year, except for an increase in agriculture all industrial groups recorded declines the most pronounced being a substantial decrease in manufacturing, and moderate losses in public utilities operation, forestry and logging, trade and services.

The accompanying chart shows the trend of employment since January, 1943, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the National Employment Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each 100 applications was 101.5 during the four weeks ending June 27, 1946, in contrast with 115.0 in the previous period, and 98.9 during the four weeks June 1 to June 28, 1945. The ratio of placements to each 100 applications during the period under review was 46.8 compared

with 51.9 in the preceding four weeks and 63.3 during the corresponding period in June last year.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the four weeks May 31 to June 27, 1946, was 6,745 in comparison with 7,077 in the preceding period and 7,908 during the four-weeks June 1 to June 28 last year. The average number of applications for employment received daily during the period under review was 6,644 compared with 6,152 in the previous period and 7,990 during the four weeks in June 1945. The average number of placements made daily by the offices during the four weeks ending June 27, 1946 was 3,117 of which 2,867 were in regular employment and 250 in work of one week's duration or less, in comparison with a daily average of 3,191 during the previous period. Placements during the four weeks ending June 28, 1945 averaged 5,064 daily consisting of 4,896 in regular employment and 168 in casual work.

During the four weeks May 31 to June 27, 1946, the offices referred 111,931 persons to employment and effected a total of 71,702 placements. Of these, the placements in regular employment numbered 65,952 of which 50,578 were of males and 15,374 of females, while placements in casual work totalled 5,750. The number of vacancies reported by employers was 108,937 for males and 46,207 for females a total of 155,144, while applications for work numbered 152,822 of which 115,768 were from males and 37,054 from females. Reports for

the four weeks May 3 to May 30, 1946, showed 162,771 positions offered 141,503 applications for employment and 73,398 placements effected while in the four weeks ending June 28, 1945, there were reported 189,782 vacancies, 191,749 applications and 121,535 placements in regular and casual employment.

The following table gives the placements effected by the offices each year from January 1936 to date.

PLACEMENTS

Year	Regular	Casual	Totals
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944	1,693,119	46,798	1,739,917
1945	1,445,692	47,889	1,493,581
1946 (26 weeks)	366,218	33,847	400,065

Nova Scotia and Prince Edward Island

Positions offered through National Employment Service Offices in Nova Scotia and Prince Edward Island during the four weeks terminat-

ing June 27, 1946, averaged 260 daily compared with 275 in the previous period and 306 during the four weeks June 1 to June 28, 1945. Placements registered a daily average of 169, in comparison with 189 in the preceding period and 213 during the corresponding four weeks of last year. The decrease in placements from the period terminating June 28 a year ago, was greatest in manufacturing with declines of more moderate proportions in public utilities operation and trade. These reductions were partly offset by moderate increases in construction, and forestry and logging. Placements by industries included: services 1,157; construction 823; manufacturing 805; trade 432; forestry and logging 345, and public utilities operation 148. Regular placements numbered 2,818 of men and 891 of women.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the period under review called for a daily average of 192 workers, in contrast with 227 in the preceding four weeks and 246 during the period ending June 28 a year ago. There was a daily average of 95 placements in comparison with 89 in the previous period and 165 during the four weeks June 1 to June 28, 1945. Manufacturing and

public utilities operation were largely responsible for the total reduction in placements for the corresponding period of last year, although trade and services showed moderate losses. In the remaining groups a moderate improvement was noted in construction. Placements by industrial divisions numbered: construction 719; services 482; manufacturing 361; trade 287; public utilities operation 125 and mining 102. There were 1,701 men and 368 women placed in regular employment.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the province of Quebec during the four weeks terminating June 27, 1946; there being 1,343 in contrast with 1,673 in the previous period and 2,170 during the corresponding four weeks of last year. Placements, likewise, decreased under both comparisons, the daily average being 493 during the period under review, as compared with 538 in the four weeks terminating May 30, and 1,391 during the period June 1 to June 28, 1945. Except for a moderate increase in agriculture, all industrial groups reported decreases, the most noteworthy being in manufacturing followed by fairly substantial losses in forestry and logging, construction, public utilities operation, services and trade and moderate declines in mining and finance and insurance. Industrial divisions in which most of the placements were effected were: manufacturing 3,884; services 2,283; construction 1,992; forestry and logging 851; trade 777; public utilities operation 480; mining 461 and agriculture 427. Placements in regular employment totalled 8,841 of men and 2,358 of women.

Ontario

Opportunities for employment at Employment Offices in Ontario during the period ending June 27, 1946, numbered 3,194 daily in comparison with 3,121 during the four weeks ending May 30, and 3,482 in the period June 1 to June 28 a year ago. The average number of placements effected daily was 1,407 during the four weeks under review, in contrast with 1,329 in the previous period and 2,135 during the four weeks ending June 28 last year. A substantial reduction in manufacturing together with fairly large decreases in public utilities operation, services and trade accounted for the loss in placements from the period ending June 28, 1945. Moderate declines were registered in finance and insurance, forestry and logging, and mining but these contractions were partly offset by gains in construction and agriculture. Industries in which employment

was secured for more than 500 workers included: manufacturing 11,834; services 6,926; construction 5,769; trade 2,930; public utilities operation 1,990; mining 946; agriculture 911, and forestry and logging 635. Regular placements numbered 24,132 of men and 6,550 of women.

Manitoba

The demand for workers on a daily average as indicated by vacancies listed at Employment Offices in Manitoba during the four weeks under review, was 390 as compared with 349 in the preceding period and 367 during the corresponding four weeks of 1945. There was a daily average of 217 placements in comparison with 212 in the previous period and 265 during the four weeks terminating June 28 a year ago. Reductions in placements from the period June 1 to June 28 last year took place in public utilities operation, manufacturing, construction and trade, all of which were moderate in volume. The changes in all other groups were negligible. Placements by industrial groups numbered: services 1,623; manufacturing 1,145; trade 903; public utilities operation 506; construction 457 and mining 162. There were 2,502 men and 1,316 women placed in regular employment.

Saskatchewan

Orders received at Employment Offices in Saskatchewan during the period ending June 27, 1946, called for an average of 218 workers daily in contrast with 220 in the previous four weeks and 193 during the period ending June 28, 1945. Placements showed a lower average during the four weeks under review, being 133 daily in comparison with 146 in the preceding period and 143 during the corresponding four weeks a year ago. Placements by industrial groups showed small variation from the period ending June 28 last year, the largest changes being a moderate loss in public utilities operation and a gain in services. Placements by industries included: services 1,304; trade 559; construction 439; manufacturing 326; public utilities operation 216 and agriculture 149. Placements in regular employment totalled 1,810 of men and 671 of women.

Alberta

Employment opportunities as indicated by orders received at Offices in Alberta during the four weeks under review, showed a daily average of 407 workers in comparison with 406 in the preceding period and 413 during the four weeks terminating June 28, 1945. Placements recorded a daily average of 243 during both the period under review and the previous four

weeks, but 261 during the corresponding period a year ago. Significant changes in placements when compared with the four weeks June 1 to June 28 last year, consisted of losses in public utilities operation, trade and manufacturing and gains in construction and services. Industrial divisions in which the majority of placements were effected were: services 1,747; construction 1,032; manufacturing 861; trade 766; mining 388; public utilities operation 340 and

agriculture 289. Regular placements numbered 3,546 of men and 1,121 of women.

British Columbia

During the period ending June 27, 1946, the daily average of positions offered through Employment Offices in the province of British Columbia was 742, in contrast with 806 in the previous four weeks and 1,075 during the corresponding period a year ago. Placements

decreased under both comparisons, the daily average being 361 as compared with 446 in the preceding four weeks and 712 during the period ending June 28 last year. The loss in placements from the four weeks ending June 28, 1945, was mainly due to a fairly substantial reduction in manufacturing supplemented by decreases somewhat smaller in volume in forestry and logging, public utilities operation, trade and services. In addition, a moderate

decline was shown in construction but was entirely offset by gains in agriculture and mining. Placements by industrial divisions included: services 2,596; manufacturing 1,592; construction 1,305; trade 1,072; public utilities operation 564; mining 524; agriculture 266, and forestry and logging 250. There were 5,228 men and 2,099 women placed in regular employment.

Employment Gain Shown by Quarterly Labour Force Survey

TOTAL employment in Canada reached an estimated 4,702,000 by June 1, a gain of 390,000 since the end of February, according to the third quarterly labour force survey by the Dominion Bureau of Statistics. Employment in agriculture rose by 190,000, slightly more than one-half of the increase being accounted for by women working on farms, while in other industries it increased by about 200,000, although the volume of female employment showed a slight drop.

Employed persons, as recorded in the survey, are those who worked during the week ending June 1 as well as those who had jobs but did not work at them because of illness, bad weather, vacation, labour disputes, or temporary lay-offs of less than 30 days.

The number of unemployed, consisting of those who were looking for work and did no work in the week ending June 1, totalled

culture, consisting almost exclusively of unpaid family workers helping around the farm during the seasonal peak of activity, contrasts with a drop of about 20,000 women in the non-agricultural labour force, indicative of the continuing retirement of women from the labour market. On the other hand, there was an increase of more than 200,000 in the male labour force in agriculture and non-agricultural industries. The number of men in the labour force was estimated to be 3,732,000 on June 1 as against 3,511,000 on February 23. This increase reflects the re-entry of veterans into the labour market as well as an increase in the number of students working.

The following table shows changes that occurred in the employment status of Canadians in the three months between the end of February and the beginning of June as indicated by the survey:—

	February 23	June 1	Net Change
Civilian labour force.....	4,525,000	4,828,000	+ 303,000
Employed	4,312,000	4,702,000	+ 390,000
at work	4,207,000	4,581,000	+ 374,000
with a job but not at work.....	105,000	121,000	+ 16,000
Unemployed	213,000	126,000	- 87,000
Not in the labour force.....	4,013,000	3,890,000	- 123,000

126,000, about 87,000 below the estimate for February 23. According to this definition, the number of unemployed men fell by about 70,000 between February and June to a level of 108,000, and female unemployment was 18,000, approximately 50 per cent less than three months earlier. This estimate of unemployment does not include those who were temporarily laid off or were working at casual part-time jobs, a substantial proportion of whom were registered as unplaced applicants at local National Employment Service Offices. This accounts for the fact that the number of unplaced applicants, which was 210,404 on May 30, yields a higher estimate of unemployment.

The total labour force, consisting of the employed and the unemployed, showed a net gain of roughly 300,000 in the three months and reached 4,828,000 on June 1. The marked increase in the female labour force in agri-

These estimates are based on a scientific cross-section survey of the Canadian population, covering about 25,000 households in nearly 100 different areas scattered over Canada. The purpose of these surveys is to provide quarterly breakdowns of the civilian non-institutional population 14 years of age and over by labour market status. People are classified not by what they normally do but on the basis of their activities during the survey week.

Employed persons, as shown in the table, consist principally of those who worked one hour or more in the survey week for pay or profit or who did unpaid family work on a farm or in a business. Also counted as employed are those who had jobs but did not work at them during the survey week because of temporary illness, vacation, bad weather, labour disputes, or temporary lay-off lasting less than 30 days. The number in this

category was estimated at 121,000 on June 1, an increase of about 16,000 since three months earlier, mainly because of an increase in the number of persons on strike. It was estimated that 60,000 persons had jobs but did not work

at them during the survey week because of temporary illness, while nearly 20,000 others were temporarily laid off but were expecting to return to work within 30 days of the time of being laid off.

Quarterly Report of the National Employment Service Offices, March 29 to June 27, 1946

Employment conditions, as indicated by the work of the National Employment Service Offices of Canada during the quarter March 29 to June 27, 1946, showed losses in both vacancies and placements, there being reductions of 23.5 per cent in vacancies offered and 43.5 per cent in placements effected when

compared with those reported during the corresponding quarter of 1945. Construction and agriculture showed increases in both instances but all other industrial divisions recorded losses, the greatest reduction in vacancies being in manufacturing, public utilities operation, trade and services. The heaviest

losses in placements were in manufacturing, public utilities operation, services, forestry and logging and trade. All provinces except Saskatchewan and Prince Edward Island reported fewer vacancies and all recorded reductions in placements, the greatest declines in both vacancies and placements being in Quebec, Ontario and British Columbia.

The accompanying table gives the vacancies and placements of the National Employment Offices by industrial groups in the various provinces during the period March 29 to June 27, 1946.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of the National Employment Service Offices during June, 1946, it will be seen that

the curves of vacancies and placements in relation to applications showed upward courses in April and May but downward trends in June. During the thirteen-week period there was a ratio 110.3 vacancies and 49.3 placements for each 100 applications for employment as compared with 113.2 vacancies and 68.5 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 6,864, of applicants registered 6,218, and of placements effected 3,069 in contrast with a daily average of 8,742 vacancies, 7,721 applications and 5,290 placements during the same quarter of 1945.

During the three months April to June, 1946, the offices reported that they had referred 358,701 persons to positions and had effected a total of 227,108 placements, of which 208,647 were in regular employment and 18,461 in casual work. Of the placements in regular employment 163,052 were of males and 45,595 of females. A comparison with the corresponding period in 1945 shows that 402,011 placements were then made, of which 389,013 were in regular employment and 12,998 in casual

work. Applications for employment during the period under review were received from 349,432 males and 110,684 females, a total of 460,116 in contrast with the registration of 586,794 applicants during the same period last year. Employers notified the offices during the quarter April to June, 1946, of 507,915 vacancies of which 360,652 were for males and 147,263 for females, as compared with 664,412 opportunities for work offered during the second quarter of 1945.

Annual Review of Employment and Payrolls in Canada, 1945

With the termination of hostilities in the European and the Pacific theatres of war in 1945, there was further and more marked recession from the high point of industrial activity which had been reached when war-time production was at its peak, according to the Annual Review of Employment and Payrolls of the Dominion Bureau of Statistics. Employment generally in the Dominion during the year nevertheless continued at an extremely high level in relation to pre-war standards. The annual index was just over four per cent below that of 1944, and not quite five per cent lower than the all-time high of 1943; in the significant comparison with 1939, however, there was an increase of 53.7 per cent. The 1945 index was also some 47 per cent higher than in 1929, when industrial employment in Canada had reached its pre-war maximum.

The tendency from month to month was downward during most of the year under review, the only interruptions to the generally unfavourable movement having been at July 1 and again at November 1 and December 1. As would be expected, the most extensive declines, (apart from those at the opening of the year), were recorded after V-J Day, at September 1 and October 1. From January 1 to the first of December, there was a falling-off of four per cent; the experience of the years prior to the war show that, ordinarily, there is considerable expansion in industrial activity between those two dates, the normal gain in this comparison approximating six per cent. During the period of the war, the seasonal upswing in employment received impetus from the demands created by war-time needs and conditions, with the result that the buoyant movement from the beginning to the end of the year was greatly intensified, the increase from January 1 to December 1 in the period, 1940-1944, averaging over twelve per cent. Thus the general trend during the 12 months under review varied from the pre-war normal, and even

more so from that which was established as typical during the war.

The effect of the war had been particularly great in the manufacturing industries, many of the non-manufacturing classes having had low priority in respect of labour procurement when the market was tight. Consequently, most of the curtailment indicated in 1945 as compared with immediately preceding years took place in factory employment, while non-manufacturing industries taken as a unit showed considerable improvement; except in mining, there were advances in each of the divisions in this broad group, in which the number in recorded employment rose as compared with 1944 by 4.7 per cent. The decline in manufacturing amounted to 9.3 per cent. These divergencies in movements resulted in a more normal distribution of workers between the manufacturing and the non-manufacturing divisions than has existed for several years. In 1945, just under 60 per cent of all those on the payrolls of the co-operating firms were engaged in factory employment; in 1944, the proportion was 63.5 per cent and that in 1943, 63.9 per cent. In 1939, however, the ratio in manufacturing had been not quite 52 per cent. The 1945 distribution, therefore, was still abnormal.

With the gradual release of workers from the Armed Forces and from war industries, the sex distribution of the persons in recorded employment during the year under review showed some variation from that indicated in more recent surveys. At October 1, 1945, 253 per 1,000 workers in recorded employment in the nine leading industries were women, a ratio which was considerably less than that of 271 per 1,000 12 months earlier. The latest proportion was the lowest since 1942, when the number of women per 1,000 employees at October 1 had been 235. Between October 1, 1944 and October 1, 1945, there were declines of 5.3 per cent in recorded employment for men, and 13.5 per cent for women; it is never-

theless important to note that more than 51 per cent of the total workers released by the cooperating firms in the 12 months were men.

During the period of industrial and military demobilization and reconversion, a consider-

able amount of unemployment developed. Thus the number of unplaced applicants for work registered at the local offices of the National Employment Service rose from 80,279 in January, to 185,274 in December,

¹ This division includes the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, with the exception of electric light and power.

1945; the number of unfilled vacancies declined from 126,511 in the former to 79,541 in the latter month. Claimants for unemployment insurance benefits increased in number from 90,897 in 1944 to 296,391 in 1945. The proportion of unemployed members reported quarterly by trade unions rose from 0.6 per cent of the indicated membership at the end of December, 1944, to three per cent 12 months later.

The general trends of industrial employment in Canada as reported by leading employers during a lengthy period are depicted in the accompanying chart. This shows clearly the literally enormous expansion in industrial activity which took place in the Dominion in the period immediately after the fall of France in 1940, until the peak was reached in the latter part of 1943. In succeeding months, a greater degree of stability was indi-

TABLE 2.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS (1926=100)

NOTE.—The relative weight shows the proportion of employees reported in the indicated province or area, to the total number of employees reported in Canada by the firms making returns at Dec. 1, 1945.

cated but at a rather lower level; the curve at the end of 1944 was at the same point as at the opening of the year. In 1945, the general movement was almost uninterruptedly downward. Despite the very definite recession in the year under review, the volume of employment continued decidedly above that recorded at any time prior to 1943.

The Dominion Bureau of Statistics tabulated an aggregate of 184,300 returns on employment and payrolls in the following major industrial divisions; manufacturing, logging, mining, transportation, communications, construction, services and trade; this figure represented a monthly average of 15,358 reports. The working forces of the establishments participating in the current surveys averaged 1,787,751, varying from 1,834,450 at January 1 to 1,724,549 at the beginning of October. In the preceding year, the 14,641 employers furnishing statistics had indicated a monthly average of 1,850,851, ranging from a minimum of 1,796,340 at the first of May, to a maximum of 1,887,752 at December 1. The latest annual index, at 175.1, was 4.3 per cent lower than that of 183.0 in 1944.

Payrolls

The curtailment in employment indicated in 1945 as compared with a year earlier was accompanied by a relatively smaller reduction in the sums currently distributed in salaries and wages. In the eight leading industries, the disbursements in one week in each month averaged \$57,178,954, representing an annual payroll of some \$2,973,306,000 distributed among those on the staffs of firms ordinarily employing 15 persons and over. The falling-off from 1944 in the aggregate salaries and wages amounted to 3.8 per cent; as previously stated, the decrease in employment in the same comparison was 4.3 per cent. In spite of the decline in the reported payrolls in the year under review, the average earnings per employee were slightly higher, standing at \$31.99, the per capita figure in 1945 exceeded by 0.5 per cent that of \$31.84 in 1944, previously the maximum in the comparatively brief record. The means in 1943 and 1942 were \$30.78 and \$28.56, respectively. Since the institution of the statistics of current payrolls at June 1, 1941, there was in 1945 an average increase of 14.7 per cent in the number in recorded employment in the eight leading industries, of 42.6 per cent in the weekly salaries and wages, and of 26.7 per cent per capita earnings.

In addition to the statistics just given for the eight major industrial groups (enumerated in an earlier paragraph), information was furnished by 906 financial institutions and

branches, in which the employees averaged 67,549 per month, and the weekly payrolls, \$2,264,339. When these figures are included with those given above for the eight leading industries (for which monthly data on employment are available from 1920), the total labour force of whose employment and earnings there is current record aggregated 1,855,300. The weekly payrolls in the nine industrial divisions in the year under review aggregated \$59,443,292, representing an estimated annual payroll of approximately \$3,091,051,200 disbursed in salaries and wages by the co-operating establishments. The per capita weekly figure in the nine industries in 1945 was \$33.04, as compared with \$31.85 in 1944, \$30.79 in 1943 and \$28.61 in 1942; the latest annual index of aggregate payrolls was lower by 3.4 per cent than that of the preceding year, but the average earnings of the typical individual in recorded employment were 0.6 per cent higher than in 1944.

The current record of salaries and wages commenced with the statistics for June 1, 1941. Until a more satisfactory base can be established, the disbursements of the co-operating firms on or about that date are taken as 100 per cent in calculating the index numbers of aggregate payrolls. In the eight major industries, this index averaged 142.6 during 1945, when the annual index of employment, converted to June 1, 1941, as 100 per cent, stood at 114.7. The factors enumerated in earlier bulletins as contributing to the substantially greater rise in the index of aggregate payrolls than in that of employees in the period of observation may again be stated: (1) the concentration of workers still existing in the heavy manufacturing industries, where rates of pay are above the average, and, in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers, at rates which were increased on more than one occasion before they were absorbed in the basic wage-rates as from February 15, 1944, (3) the progressive upgrading of employees as they gained experience and (4) the payment of higher wage rates in a very large number of cases. The changing industrial pattern in the Dominion following the cessation of hostilities has already lessened the influence of some of these factors. The existence of several important industrial disputes in Canada during 1945 had a considerable effect upon the situation, which was also indirectly affected by strikes in the United States. The number of workers directly involved in disputes in Canada during the year under review was 96,068, while the number of man-working days lost was 1,457,420; in 1944, 75,290 workers were involved in strikes and lockouts, resulting in a loss of 490,139 man-working days.

Employment

A short summary of the situation, industrially and geographically, in the year under review is contained in the following paragraphs.

As already stated, the curtailment in recorded employment during 1945 was largely confined to manufacturing, from which some 106,800 men and women were released by the co-operating establishments, a decline of 9.3 per cent as compared with 1944. In the non-manufacturing industries taken as a unit, there was indicated an increase of some 43,700 workers, or 4.7 per cent; within the latter category, only mining showed a reduction. The general recession involved the release of some 63,100 persons, or 4.3 per cent of the total reported working force in the eight leading industries.

Within the manufacturing division, the loss during 1945 was largely, though not entirely, limited to establishments producing durable manufactured goods, in which there was a decrease of 16.3 per cent. The decline in the non-durable manufactured goods industries, amounting only to 1.1 per cent, took place almost wholly in plants turning out ammunition and chemical products for wartime use. Excluding the chemicals division, there was an increase of 2.1 per cent over 1944 in the employment afforded in the light manufactured goods industries, taken as a unit. A comparison made with the data for 1939 reveals an advance of 133.7 in 1945 in the heavy manufactured goods industries, together with that of 49.1 per cent in the non-durable manufactured goods industries, there being a general rise of 84 per cent in this comparison in these two major classes.

Although the improvement in the various non-manufacturing industries in the year under review was important, it was not particularly pronounced. Employment in logging, transportation, services and trade reached new all-time high levels. In communications, activity was greater than in any earlier year since 1930. The construction and maintenance group was generally brisker than in 1944 but was quieter than in 1943 and earlier years since 1940. Shortages of material and of skilled labour had a serious effect upon the situation in these industries, in which the situation at the end of the 12 months under review was nevertheless better than at the same date in any earlier year since 1928 with

the exception of Dec. 1 in 1941 and 1942. It will be recalled that in those years a large amount of construction work was being done on defence projects and war plants. In mining, the trend continued downward, there being a falling-off of 4.9 per cent in 1945 as compared with 1944; the latest annual index was the lowest since that of 1936.

Geographically, the declines in industrial activity in the year under review were widely distributed, lowered employment as compared with 1944 being indicated in all provinces except New Brunswick and Saskatchewan. The largest percentage losses were in Quebec and British Columbia. In all areas, the recession took place mainly in the manufacturing industries; mining also showed general reductions.

The curtailment in employment in the eight cities having populations of 100,000 and over was relatively greater during 1945 than that indicated in the remaining parts of the Dominion. Thus in Montreal, Quebec, Toronto, Ottawa, Hamilton, Windsor, Winnipeg and Vancouver, taken as a unit, there was a reduction of 7.7 per cent from 1944 in the numbers in recorded employment, a ratio which considerably exceeded that of 1.5 per cent in the smaller centres and the rural areas in Canada in the same comparison. During 1944, the decline from 1943 in the leading cities had been somewhat less than that in the Dominion as a whole. As would be expected, employment in the above-named cities taken as a unit had shown more pronounced expansion during the war than was the case in other parts of the country; the 1945 index for the cities was 67.8 per cent above the 1939 level, while the increase in this comparison in the smaller centres and the rural areas amounted to 43.7 per cent.

The monthly returns received from firms in the eight leading industries during 1945 exceeded those furnished in 1944 by 717, or 4.9 per cent; this increase brought about a somewhat higher coverage of industry although the gain in this respect, expressed as a percentage would be much smaller than that in the number of firms. Adjustment for changes in the coverage is made in the index numbers of employment, and it must again be emphasized that comparisons from year to year should be made through the indexes; these are not only adjusted for the inclusion of firms newly added to the mailing list, but also for declines in employment resulting from the closing of business or branches.

Unemployment in Trade Unions at the Close of the Quarter Ending June 30, 1946

FOR each of the last two quarters, a decline was recorded in the percentage of trade union unemployment. Returns from 2,326 local unions in Canada with a combined membership of 408,002 indicated an unemployment percentage of 1.3 at the end of the second quarter of 1946. At the end of March, 2,463 locals with a total of 414,487 members reported 1.9 per cent unemployed, while in June, 1945, for 2,238 locals representing 414,150 members, the percentage of unemployed was 0.5.

In the following report unemployment refers only to involuntary idleness due to economic causes. Persons who are without work because of illness, a strike or a lockout, or who are engaged in work outside their own trades are not considered as unemployed. As returns from unions reporting vary from quarter to quarter with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that the figures refer only to organizations reporting.

The decrease in the percentage of trade union unemployment at the end of June was due mainly to improvement in employment opportunities in manufacturing, transportation, building and construction, services, and wholesale and retail trade. Improvement was also noted in fishing, and lumbering and logging. An increase in the unemployment percentage was reported by trade unions in mining and communications.

The percentages of trade union unemployment, at certain dates, in each province are shown in Table I. All the provinces with the exception of New Brunswick, for which the percentage of unemployment rose from 1.8 to 3.7, showed an improvement at the end of June as compared with the previous quarter. The decrease was from 4.0 to 3.6 per cent in Nova Scotia; 1.4 to 1.0 in Quebec; 1.7 to 0.8 in Ontario; 1.6 to 1.5 in Manitoba; 2.1 to 0.7 in Saskatchewan; 1.0 to 0.4 in Alberta; and 3.0 to 2.3 in British Columbia. In comparison with June, 1945, lower employment levels were indicated in all the provinces with the exception of Saskatchewan.

A separate compilation is made each quarter of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. For the quarter under review as compared with the previous quarter, improvement was recorded in Halifax from 0.9 to 0.1 per cent, in Montreal from 1.1 to 0.4, Regina from 0.9 to 0.2, and in Edmonton from 1.9 to 0.2

per cent. The percentage rose in Saint John from 3.1 to 12.3, in Winnipeg from 1.1 to 1.5, and in Vancouver from 2.9 to 3.0. The percentage for Toronto remained unchanged, at 0.6. A comparison with June, 1945, indicates lower employment levels in all but Regina and Edmonton.

Returns were tabulated from 853 local union organizations in the manufacturing industries. These reported a combined membership of 185,865 of whom 2,986 or 1.6 per cent were recorded as unemployed. At the end of the previous quarter 3,597 or 1.8 per cent of 195,351 members reported by the local branches were without work. In June, 1945, 0.7 per cent of 214,832 members were unemployed. In comparison with the previous quarter (Table II), the employment situation was more favourable among union members engaged in the manufacture of pulp, paper and paper products, wood products, iron and its products, and mineral products. Improvement was also noted in printing and publishing and in miscellaneous manufacturing. Increases in trade union unemployment were indicated in textiles and textile products, rubber products, and non-ferrous metals. A comparison with June of the previous year shows decreases in unemployment in non-ferrous metals, chemical and allied products and miscellaneous manufacturing.

In the transportation industries, reports were received from 861 local unions with a membership of 101,105 of whom 1,470 (1.5 per cent) were without work on the reporting date. In comparison 2.0 per cent were unemployed at the end of the previous quarter and 0.3 per cent at the end of June, 1945.

Unemployment among union members in shipping increased to 6.5 per cent from 4.3 in the previous quarter but in steam railway operations the percentage for the same period declined from 2.4 to 1.6.

Unemployment in the mining group increased slightly from 0.7 per cent to 0.8. At the end of June, 1945, the percentage recorded was 0.4. For the quarter under review 69 unions in mining reported a total of 24,763 members of whom 201 were unemployed at the reporting date. Unemployment in coal mining was recorded as 0.6 per cent in comparison with 0.1 in the previous quarter and full employment at the end of June, 1945. Metallic miners showed no unemployment at the reporting date. Unions of non-metallic miners, other than coal miners, reported 2.8 per cent of 3,628 members unemployed. For

the previous quarter this group reported an unemployment percentage of 4.0 and of 3.5 per cent for June, 1945.

The Department received reports from 202 locals in the building and construction trades. These reported a combined membership of 40,210 of whom 0.8 per cent were unemployed at the end of June. This was a substantial improvement over the 3.1 per cent unemployed at the end of March but slightly higher than the 0.3 per cent registered at the end of June, 1945. This seasonal improvement reflected decreases in unemployment among all the construction trades, notably carpenters and joiners, plumbers, granite and stone-cutters, bricklayers, masons and plasterers and electrical workers.

Unemployment among trade union members in public and personal services decreased from 0.7 per cent at the end of March to 0.4 per cent at the end of June. The percentage at the end of June, 1945, was 0.2.

The communications group with an unemployment percentage of 1.4 was higher than at the end of March this year and at the end of June, 1945, when the percentages were 0.3 and 1.3 respectively.

Unemployment in logging declined to 0.8 per cent as compared with 4.2 per cent in the previous quarter. No unemployment was reported in June, 1945. Very few unions in the fishing industry report on unemployment among their members, so that the information cannot be considered as representative of the industry as a whole.

Table I shows by provinces the average percentage of union members who were unemployed in each year from 1933 to 1945 inclusive. It also indicates the percentage of those without work for June of each year since 1932 and for each quarter since 1943 to date. Table II indicates the percentage of unemployment

in the various groups of industries at certain dates since 1932.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N. S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Note.—In percentages shown below, "0" indicates no unemployment—When ".0" is used, negligible unemployment (less than .05 per cent) is indicated.

Table with columns: Month, Fishing*, Lumbering and Logging, Mining, Manufacturing, Industries, Vegetable products, Pulp and paper products, Pulp and paper, Pulp products, Printing, publishing and Lithographing, Electric current, etc., Wood products, Fibres, textiles and textile products, Textile and carpet workers, Garment workers, Hat, cap and glove workers, Animal products, Rubber products, Iron and its products, Non-ferrous metals, Clay, glass and stone products, Mineral products, Chemical and allied products, Miscellaneous manufacturing industries, Building and construction, Transportation, Shipping, Steam railway operation, Local transportation, Communication, Telegraph operation, Telephone operation, Trade (retail and wholesale clerks), Services, Governmental (civil), Miscellaneous, All occupations

* Few unions of fishermen report on unemployment among their members and these percentages should not be considered as representative.

Strikes and Lockouts

Strikes and Lockouts in Canada During July, 1946

DURING July, 1946, strike activity in Canada continued at a high level, the time loss again approaching a million man-working days. As compared with the previous month, the number of strikes and lockouts increased by six, the number of workers involved showed a decrease of 20,000, and the

resulting time loss in man-working days was lower by 17,000 days. As compared with July, 1945, the figures as to the workers involved and the time loss were much greater. Preliminary figures show 42 strikes and lockouts in existence during July, 1946, involving 49,752 workers, with a time loss of 918,285 man-

STRIKES AND LOCKOUTS IN CANADA, JANUARY-JULY, 1945-1946†

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

working days, as compared with 36 strikes in June, 1946, with 70,688 workers involved and a time loss of 935,188 days. In July, 1945, there were 27 strikes, involving 11,975 workers, with a time loss of 45,497 days.

The figures for the first seven months of this year are affected by a number of strikes involving an unusually large number of workers for considerable periods. While the number of strikes during this period is not materially higher than last year, the total of the workers involved and the time loss show great increases. Preliminary figures for the first seven months of this year show 145 strikes, involving 119,679 workers, with a time loss of 2,544,581 man-working days. For the same period last year there were 120 strikes, with 37,609 workers involved and a time loss of 128,208 days.

Of the 42 strikes recorded for July, four were settled in favour of the workers, three in favour of the employers, four were compromise settlements and eight were indefinite in result, work being resumed pending final settlement. At the end of the month 23 strikes were recorded as un-terminated, namely: bakery workers at Halifax, N.S.; rubber factory workers at Bowmanville, Hamilton, Kitchener, New Toronto, Oakville and Toronto, Ont.; textile factory workers at Valleyfield, P.Q.; knitting factory workers at

Toronto, Ont.; compositors at Winnipeg, Man.; compositors at Ottawa, Hamilton, Ont., Edmonton, Alta., and Vancouver, B.C.; foundry workers at Vancouver and New Westminster, B.C.; brass factory workers at New Toronto, Ont.; motor vehicle factory workers at Chatham and Windsor, Ont.; foundry workers at Calgary, Alta.; steel products factory workers at Windsor, Ont.; chemical factory workers at Windsor, Ont.; metal miners in British Columbia; bakery workers at Winnipeg, Man.; glove factory workers at Waterloo, Ont.; electrical apparatus factory workers at Hamilton, Ont.; metal factory workers at Welland, Ont.; electrical apparatus and wire factory workers at Toronto, Ont.; steel mill workers at Hamilton, Sault Ste. Marie, Ont., and Sydney, N.S.; storage battery factory workers at Kingston; steel products factory workers at Montreal, P.Q.; chemical factory workers at Amherstburg, Ont.; and construction labourers at Glace Bay, N.S.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1946⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-working Days	Particulars ⁽²⁾

Strikes and Lockouts in Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing up to date that given in the March, 1946, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to unsettled conditions following the war. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British Ministry of Labour Gazette publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in May 1946, was 198, and 23 were still in pro-

gress from the previous month, making a total of 221 during the month. There were 84,100 workers involved and a time loss of 207,000 working-days was caused.

Of the 198 stoppages which began during May, 25 arose out of demands for advances in wages; 65 over other wage questions; five on questions as to working hours; 30 on questions respecting the employment of particular classes or persons; 63 on other questions respecting working arrangements; six on questions of trade union principle; and four were in support of workers involved in other disputes.

United States

Preliminary figures for June, 1946, show 350 strikes and lockouts beginning in the month, in which 150,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 3,800,000 man-days. Corresponding figures for May 1946, are 360 strikes and lockouts, involving 560,000 workers, with a time loss of 11,500,000 man-days.

Prices

Prices, Retail and Wholesale, in Canada, July, 1946

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

The Dominion Bureau of Statistics cost-of living index registered a further increase in July touching 125.1 compared with 123.6 a month earlier. While food price increases continued to dominate the over-all advance there was a noticeable broadening out of price increases among other groups. Due to higher quotations for eggs, beef, lamb, potatoes and carrots the food group moved up 2.1 points to 144.2 while clothing gained 2.1 also to 126.4 following higher prices in men's wear and footwear. An increase of 2.7 points to 125.1 in homefurnishing and services reflected higher prices for furniture, textile furnishings and chinaware, while advances in health maintenance and recreation costs supported a gain of 1.6 to 113.7 in the miscellaneous series. Two groups were unchanged, fuel and light at 107.2 and rents at 112.6.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for

bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.59; clothing (11.7 per cent), \$165.80; home-

furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups,

Wholesale Prices, June, 1946

There was a further advance in wholesale prices between May and June as indicated by the Dominion Bureau of Statistics composite index which moved up 0.5 points to 109.1. Higher prices for vegetable and animal products lent principal support to the increase. For the former series a gain of 1.0 to 98.7 reflected higher prices for rye, potatoes, currants, raisins, corn syrup, glucose and starch which outweighed weakness in lemons

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

food, fuel, rent, clothing, homefurnishings, etc., with their weight, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (*L.G.*, 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Price Control in Canada*.

and onions. In the same interval animal products registered a gain of 1.3 points to 114.2 due to firmer prices for steers, hogs, lambs, beef and lamb carcass, eggs and men's shoes. Calves and butter were lower in this section. Increases in hardware items advanced the iron and steel group 0.3 to 128.4, while similarly higher furniture quotations moved wood, wood products and paper products up 0.2 to 131.1. Three groups were lower, chemicals and allied products receding 1.2 to 94.5 following a lower price for tartaric acid which overbalanced strength in copper sulphate and alcohol. Non-metallic minerals weakened 0.3 to 102.7 with declines in United States bituminous coal, crushed stone and

* Descriptions and units of sale apply to July 1946 prices.

gravel being responsible while non-ferrous metals weakened 0.2 to 86.9 following lower prices for aluminum ingots. Fibres, textiles and textile products were unchanged at 98.2.

Canadian farm products rose 1.3 points to 109.5 between May and June mainly supported by animal product prices: the index

for this group strengthened 2.8 points to 130.5 reflecting upturns in live stock and eggs which outweighed weakness in fowl. Field products gained 0.4 to 97.0 in June, with increases in rye, potatoes and raw leaf tobacco overbalancing declines in onions and hay.

TABLE IV.—RETAIL PRICES OF STAPLE FOODS

	Beef					Pork															
	Sirloin steak, per lb.	Round steak, per lb.	Rib roast, prime, rolled, per lb.	Blade roast, per lb.	Stewing, per lb.	Veal, boneless fronts, per lb.	Lamb, leg roast, per lb.	Fresh loins, per lb. (a) The basis of these figures is the record of rents collected in the 1941 Census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

Canadian Manufacturers' Association Discusses Employer-Employee Relations

Collective Bargaining, Handling of Grievances, Foremen's Position in Industry, Wages and Salary Control, Negotiation of Labour Contracts, among Subjects Considered at Annual Meeting in Toronto

RE-AFFIRMATION of its position with respect to employer-employee relationships was a noteworthy feature of the 75th Annual Meeting of the Canadian Manufacturers' Association in Toronto, June 4-6. More than 2,000 persons including guests and members of the Association's staff were present.

Except for the opening and closing business sessions, the meeting took the form of a number of individual conferences conducted concurrently. Keen interest was shown in the conference on employer-employee relationships and the addresses and discussions reflected to a considerable degree the employers' approach to the question of industrial relations. Approximately 500 persons attended this panel.

Presidential Address

The President, Mr. G. Blair Gordon, in his address at the opening meeting urged that Canada's policy should be to increase production in every possible way. "Turn out vast quantities of products from the farms, factories, mines, forests and fisheries. Make things plentiful, good and cheap; not scarce, poor and dear."

"Industrial production in Canada doubled during the war," Mr. Gordon said. "Canadian manufacturers fed, clothed and equipped Canada's armed forces and supplied the civilian population. They also shipped to other countries three times as much as was used by our own forces."

Much of this production machinery is being adapted to make goods for domestic and external markets but a great obstacle to a full flow of goods is and will be severe shortages of many materials. "In Canada, we are more fortunate than the peoples of many other countries," Mr. Gordon stated, "but there will be necessary delays before needed materials will be available for industrial requirements."

"Employment and business conditions in Canada are dependent to at least 25 per cent on a prosperous export trade," said Mr. Gordon. "It would be a mistake to conclude that trade is going to be handed to us by whatever

machinery the United Nations Organization sets up. The great volume of international transaction in the past has always been created by the enterprise and energy of individuals."

"Canadian manufacturers have been sending representatives to practically all countries open to travellers, seeking markets for Canadian products," Mr. Gordon reported. "They are searching all over the world for outlets for surplus goods which can be spared by Canada"

Minister Unable to Attend

Hon. Humphrey Mitchell, Minister of Labour, was unable to attend the meeting owing to pressure of official business in Ottawa. The following telegrams are self-explanatory:

Ottawa, Canada
June 3, 1946

G. B. GORDON, Esq.,
President,
Canadian Manufacturers Association,
Royal York Hotel, Toronto.

Owing to present circumstances I feel it is most inadvisable for me to leave Ottawa during the next few days and therefore I shall be much disappointed in not having the opportunity of being present at any of your functions in connection with the seventy-fifth annual general meeting of the Canadian Manufacturers Association. While we seem to be passing through a difficult industrial period at the moment I am confident and convinced that the inherent good sense of both employers and workers will bring us into smooth waters in the not distant future. Without the stimulus of private enterprise as represented by your membership there would be no jobs for many thousands of our workers and correspondingly without the labour of these many thousands of workers private enterprise would be bogged down. One side cannot do without the other. For that reason I hope for a greater understanding of the importance and indispensability of sound, close and friendly labour management relations. Our war job really was well done. All played their part, the men and women in the armed forces, manufacturers and business and professional men generally, the workers and our farmers. Surely a team that played so well to bring victory in the war must not be broken up now. Best wishes for the success of your meeting.

(Sgd) HUMPHREY MITCHELL
Minister of Labour.

Royal York Hotel,
Toronto, June 4, 1946

The Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Your telegram received, we appreciate your good wishes and understand the reasons which prevent your attendance at our annual meeting. You may rest assured that manufacturers will continue to co-operate with you in doing everything possible to promote sound and friendly labour-management relations. The present disturbed situation throughout the country is largely due to concerted attacks by certain labour organizers on the Federal government-declared policy of controlling inflation. We believe that government anti-inflation policy of

gradual and orderly relaxation of controls is sound and necessary and will continue to co-operate in carrying this out. The interests of all consumers are involved and will become seriously impaired if the current unsettled situation gets any further out of hand. Notwithstanding the best of spirit and intention on the part of employers and employees unless the responsible authorities protect life and property, subversive interests devoid of a desire for harmony will control the situation. The Federal Government should maintain a firm stand against lawlessness of all kinds and encourage and assist the provincial and municipal authorities in carrying out their responsibilities.

(Sgd.) G. BLAIR GORDON,
President

Canadian Manufacturers Association.

Employer-Employee Relations

The conference on employer-employee relations was under the chairmanship of E. R. Complin, O.B.E., Canadian Industries, Limited, Montreal. The first study and discussion concerned "Management and Collective Bargaining" and was introduced by Harry Taylor, O.B.E., Canadian National Carbon Company, Toronto, in an address designed to focus attention on some of the more important phases of "the general situation".

"Many of us sometimes forget," he said, "that a business has a personality which finds expression in policies and practices. Many factors may play a part in moulding this personality, such as competition, products, markets, community practices and others, but none outshine the attitude and ability of those whose job it is to formulate policy." He continued: "a trade union also has a personality which is reflected in the policies and practices which its leaders adopt. If we are to have good industrial relations and industrial peace, the area within which these personalities clash must somehow be narrowed," he claimed.

Mutual Understanding Needed:— He asserted that "generally speaking, workers and their representatives have not tried to understand the problems of management and in many cases, management has not tried to understand the problems of the workers. The most outstanding shortcoming on both sides is the failure to recognize and gauge the rate of change. There is," he continued, "a reluctance on the part of some managements to accept any change and there are demands on the part of unions which are not only unreasonable and ahead of their time, but in some cases are economically unsound".

With regard to the circumstances that motivate management, Mr. Taylor said: "It must be taken for granted that management, as we understand it, believes in the system of profit

incentive or private enterprise. Under such a system," he held, "we always find a dynamic economy, and economy in which the standards of equity are gradually changing. These changes bring with them greater social responsibilities on the part of management which must be met, but management must resist being driven too far and too fast by either unions or governments."

In the opinion of the speaker, "Canadian management, under wartime pressure had picked up a lot of bad habits. Conditions and practices were agreed to, or forced upon management, which were basically unsound, costly and not workable under peacetime conditions." He contended that "much of what was done will have to be undone, if we are to have efficient production and industrial peace. Unions and all concerned must play their full part in the restoration of sound relationships and business practices".

Developing this point, Mr. Taylor continued: "Management knows it must consider cost problems, the relation of costs to prices, prices to volume and volume to employment. It must consider the importance of risk capital, expansion reserves and the part profits are to play in our economic processes. Management knows you cannot long pay wages out of invested capital. Management knows these things, but is sometimes confronted with union demands and government action which are in conflict with some of these fundamentals. Management knows there is a social cost of doing business and is prepared to meet its fair share, but how can you justify a union forcing a company to price itself out of the market? How" he asked, "can anyone expect management to accept conditions which challenge the survival of the business?"

Annual Wages:— Turning to the question of annual wages, the speaker asserted: "Unions suggest that industry should produce new

products which peak during low production periods of products already produced. It is not as simple as that. It may be possible for a few companies to guarantee an annual wage, but to deal with it across Canada is a very involved economic problem. It involves domestic and international trade, climatic conditions, geographic problems and fiscal policy. It involves solving problems of seasonal industries, style goods, perishable goods and changing the buying habits and many other habits of the consuming public", Mr. Taylor asserted.

Royalty Payments:—"Royalty payments to unions is a new device in its present form", the speaker claimed. "At the present moment, it seems to be confined to the United States, but, as Canadian manufacturers, we have more than an academic interest in the result." Royalty payments such as are being demanded by certain American unions "are considered by many as nothing more than extortion", he said.

Mr. Taylor claimed that, historically, industry has alternately been centralized and then decentralized. "We are now going through a period of industrial decentralization." On the other hand, unions seem to be "rapidly moving towards centralized unions. We find area, regional, and industry bargaining creeping into our relations", he said.

Foremen's Unions:—Referring to foremen's unions, the speaker asserted that the development of such unions in the United States "may well be an indictment against management. The organization structure of American and Canadian industry has been built around the foreman. He is the first level of management, but what has management done to make him feel that he is part of management? How often we have discussed production plans and other policy changes with our foremen? Frequently foremen hear of new policies or practices or progress in negotiations from the union officers and stewards". Mr. Taylor said that in his opinion "a foreman wants to be part of management, but he is not part of management if he himself feels and thinks he is not. The whole question of foremen's unions is a challenge to management."

"What is Right vs. Who is Right":—After quoting extensively from the statement of policy adopted by the U.A.W.-C.I.O. at its recent conference in Atlantic City the speaker said:

"It seems to me, if we are going to have sound industrial relations, governments, trade unions and employers should adopt a concept of basic industrial relations' philosophy based upon what is right and fair and equitable and not place so much emphasis on who is right. Governments should see to it that all groups

are equal before the law. If in the public interest industrial monopolies are prohibited or closely regulated because of restraint of trade and the establishing of monopolistic prices, it is not an anomaly to encourage labour monopolies which, in the case of mass action so frequently operate contrary to the public interest?"

"This whole general problem of labour relations is a very complex one and I would be the first to admit that I do not know the final answer, or if there is a final answer. I am convinced, however, there are some things which merit the serious consideration of government, management and unions and which, if properly dealt with, would go a long way toward improving the general situation."

Points for Government, Management and Labour to Consider

Government.—Mr. Taylor enumerated the following twelve points which, he claimed, governments should consider carefully:—

1. Have labour monopolies developed to a point where regulation is necessary?
2. Is there any justifiable reason why unions and employers should not be equal before the law?
3. How long can governments continue to permit mass picketing and plant seizures by unions?
4. Should sympathy strikes and boycotts be outlawed?
5. The rights of individuals should be recognized in all labour laws.
6. Governments should more clearly exclude from the area of legally required collective bargaining all persons performing managerial or supervisory functions.
7. Governments should exclude from the area of legally required collective bargaining management's right and responsibility to direct and manage the business.
8. Governments should establish the necessary machinery to conduct strike votes, granting the right to vote to all employees affected. No other strike votes should be permitted; in any event they should not be recognized.
9. Governments should prohibit royalties and payroll levies by unions.
10. Governments should make it possible to de-certify a union when the majority of the employees affected no longer desire the union.
11. Governments should continue the present policy of no compulsory arbitration of new issues not covered by a contract.
12. Governments should give greater support to sanctity of contracts and set up effective machinery to enforce the sanctity of contracts.

Management.—The speaker summarized as follows management's part in the improvement of labour—management relations:—

1. Recognizing that employees have the right by law to join a union of their own choosing.

2. Recognizing that collective bargaining is a two-way street.
3. Not practising or in any way permitting discrimination.
4. Avoiding indulging in legal technicalities.
5. Not trying to interfere with the internal workings of a trade union.
6. Not by-passing the union in an organized company by unilateral action on matters properly within the area of collective bargaining.
7. Not unnecessarily prolonging negotiations.
8. Recognizing the right of unions to elect or appoint their bargaining representatives whether or not they are employees.
9. Recognizing the importance of negotiations and assigning this responsibility to senior officials.
10. Seeing to it that foremen and other levels of management are properly trained and equipped to effectively carry out the company's obligations and responsibilities provided for in the collective contract.
11. Recognizing unions for what they are—a device for continuously changing the balance of fundamental economic rights and rewards in favour of workers.
12. Not making grievances or amplifying them unreasonably.
13. Not trying to organize foremen or other levels of management.
14. Not making demands on the basis of ability to pay.
15. Recognizing merit or ability to perform the work in seniority provisions.
16. Avoiding long and repetitious negotiations.
17. Declining to participate in or condone mass picketing, plant seizures, sympathy strikes and boycotts.
18. Avoiding over-emphasis of the importance of uniformity of terms and conditions of employment regardless of other factors.
19. Recognizing that the economic problems of one employer may be similar to but are not necessarily the same as those of a similar industry or the economy as a whole.
20. Recognizing the right of an employee to join a union or not to join a union, as he himself may decide.
21. Recognizing that management must have the right to direct and manage its business and that it properly resists all demands that undermine or challenge the survival of the business.
22. Recognizing completely the sanctity of contracts during the contract term.
23. Accepting responsibility and regulation commensurate with their position in our economy and by not insisting on conciliation and arbitration proceedings unnecessarily.

Labour.—Mr. Taylor claimed that perhaps unions and their leaders have the opportunity of making the greatest contribution towards improved labour-management relations. He set forth the following points:—

1. Not attacking management's good faith and integrity by a misrepresentation of facts and by avoiding slanderous statements about employees and individual members of management.
2. Not making unreasonable and economically unsound demands.
3. Not trying to inject a company's price policy into the area of collective bargaining.

Wage and Salary Control

With a view to stimulating discussion, C. B. C. Scott, Massey Harris Company Limited, Toronto, opened the conference on Wage and Salary Control by reviewing the history of these controls since their inception on November 15, 1941, as adjuncts of Price Controls which had been established two weeks earlier.

At the outset of his address Mr. Scott explained that the first wage control Order, P.C. 8253, "was comparatively simple and provided that no employer could increase the basic scale of wages paid by him at the effective date of the Order, except by permission from the Regional or National Board." The Board, on its side, "could only raise such scale of wages if they found they were low as compared with the rates generally prevailing for the same or substantially similar occupations in the same locality. This Order also made compulsory the payment of a cost of living bonus which had previously been suggested by

the government in P.C. 7440 as a means of keeping wages in line with the cost of living.

"The Order provided that the cost of living would be reviewed quarterly by the National Board and for every increase of one point from one quarter to the next, the cost of living bonus paid to employees would be raised 25 cents per point.

"As the Order itself was very general in its wording, the National Board drew up interpretative rulings which greatly amplified the meaning of the Order. In these rulings it stated that an employer might not decrease his basic scale of wages, while the Order only provided that he must not increase. This Order remained in force until July 10, 1942, when it was superseded by Order in Council 5963. This latter Order was basically the same as 8253, but provided more detailed coverage of the Control as a result of the experience which was gained during the first six months

"It would be unfair to say that all points I have listed for consideration apply to all managements or all unions. Certainly many managements and some unions are doing a good job on labour relations, but it is my observation there are some who are not and, therefore, attention may properly be directed to the points listed."

that Wage Control was in force in this country. This Order did provide a little broader treatment of the wage situation.

"Under these first two Orders there were many applications to the Boards for increases in rates. A great majority of these applications were from employers. As the labour shortage became more acute employers with low or relatively low wages found that they could not either retain their present help or get additional help at the wages being paid. Therefore, there was a constant demand on the Labour Boards to raise wages to the top prevailing in the community.

"In December, 1943, Wage Control was again changed by Order in Council P.C. 9384. This Order tightened up wage increases very considerably and provided that a Board could only increase rates in order to rectify a gross inequality or gross injustice.

"This order also provided that the cost of living bonus be incorporated into basic rates as of February 15, 1944; the assumption here being that the cost of living index had reached its peak and that there would be no further need for increases on this score in wages. At this time the cost of living had increased by 18.4 per cent and the bonus had reached a maximum of \$4.60 per week. This Order did put the clamps on applications to a certain degree and as a result, I would say that the percentage of applications from Unions as against employers, increased very perceptibly.

"On January 31, 1946, the Government, by Order in Council 348, amended the previous Order in Council 9384, governing wage control. This is the Order under which we are operating today.

"By this amendment, the Government eliminated a raise based only on gross inequity or gross injustice and substituted, therefore, the previous basis of increasing rates where they were found to be low in comparison with the rates prevailing in the same or comparable occupations and in the same or comparable locality.

"This Order, however, went further and suggested that Boards might raise rates 'on such other basis and to such extent as in the opinion of the National Board is reasonable in the circumstances and consistent with the maintenance of existing prices of the goods and services which the employer sells'.

"This amendment also provided that certain conditions of labour which previously could not be changed without authorization of the Board, could now be done with direct negotiations between labour and management. These working conditions now eliminated from the Board's jurisdiction were vacations with pay, off shift differentials, employees' pensions, benefit schemes.

"Also, it provided by this Order that on and after June 30, 1946, the provinces will have full jurisdiction with respect to vacations with pay, and hours of work."

Management's Attitude on Current Wage Controls—Turning to the effect of existing controls on the problems of management, Mr. Scott said:

"Now the thought that concerns us most, I am sure, is that in the recent Order which gives the Board authority to increase rates to such an extent as in the opinion of the Board is reasonable, appears to leave the door very wide open. Industry is now being faced with a concerted demand from labour unions for a forty-hour week and a two dollar per day increase in pay, plus other concessions such as an increased holiday schedule, night shift bonuses, etc.

"We are confronted with these demands from labour in spite of the fact that money wages have increased 40 per cent to 50 per cent since 1939, whereas the cost of living has only increased 19.8, and I have figures to show real wages increased in the same period 19.4 per cent" Mr. Scott asserted.

Labour Boards and Organized Labour—Referring to the activities of the War Labour Boards and organized labour's attitude, Mr. Scott stated: "I think it must be admitted that up until now the Labour Boards, generally speaking, have done a very excellent job in keeping wages relatively under control. Certainly it can be said that a better job has been done in this country than in other countries. We are now, however, reaching the critical point and it seems to me that if the lid on wages is removed now, all our labour and sacrifice has been in vain.

"Where do the Labour Boards stand in connection with these demands or in connection with any settlement that the Union and the employer may agree upon? Also, how are the Labour Boards to determine that the wages can be increased and existing prices still maintained?"

"We are also faced with a determined effort on the part of the Unions to break or remove the War Labour Boards. It has been stated publicly by some of the labour leaders in this country that they will take any steps that are required to force Labour Boards to agree to the increases which they are demanding, or else to put the Labour Boards out of business altogether. This puts the employer in a most difficult position. He might agree with the Union on an increase of eight or ten cents per hour which would be turned down by the Labour Board and if the Unions follow through on their announced policy, they would then strike, not against the company, but against the decision of the Labour Board.

Salary Control Relatively Simple

With regard to salary control Mr. Scott claimed that it "has been relatively simple as there have been very few changes since Order in Council 9298 froze salaries for employees above the rank of foreman as of November 6, 1941.

"This Order provided that permission must be secured from the Salary Board for the increases in salary of any employee who is ranked above the position of foreman.

"If the total salary, including the increase, was less than \$7,500 per year, it could be put into effect pending the approval of the Minister of National Revenue, but, if it was over this figure, it could not be paid until approval had been received.

"There have been minor changes since the passing of this Order in Council, loosening up the salary regulations slightly. There has, however, been nothing of a major nature, and the tenor and main regulations of the original Order are still in effect.

"It is possible now, however, to get approval of increases in salary up to \$10,000, from local Boards without having to wait for Ottawa's approval which has speeded up the handling of applications for salary increases somewhat.

"Here again the employer is likely to encounter trouble, because if he grants an increase to his employees under the Wage Order, it is obvious that in order to prevent trouble amongst his salaried staff, he must increase them likewise. With the Controls that still exist over salaried people, this is going to make another headache for employers. All this leaves the employer in a most unsatisfactory position", Mr. Scott maintained, and

Prices and Wages Controls

In the unavoidable absence of the Chairman, S. G. Bennett of Toronto, the Conference on Prices and Wages Controls was presided over by C. B. C. Scott of Toronto, Vice-Chairman.

The opening address, which had been prepared by Mr. Bennett, was read by Mr. Scott. Commencing with the establishment of the Wartime Prices and Trade Board on November 1, 1941, and the enactment of the Maximum Prices Regulations two weeks later, Mr. Bennett traced the application of the controls, up to the removal of price ceilings on specified capital goods on May 1, 1946. He referred in some detail to supplementary war-time regulations providing for overall wage and salary control, the rationing of certain commodities and the setting up of special controls over production, dis-

advanced the following argument to support his claim.

"First of all, he is being asked for wage increases which are not justified on the basis of the increase labour has received during the war years in comparison with the increase in the cost of living.

"Secondly, with the Labour Board and the Price Board operating as two entirely separate entities, he might quite easily find himself paying a wage increase with no offsetting price increase allowed by the Prices Board.

"Thirdly, he may find himself as the pawn in a fight between labour and the government. It would seem, therefore, that the time has come when we should take a position in regard to the situation that is facing us, and I hope, Mr. Chairman, that this brief outline of existing conditions may stimulate discussion."

At the conclusion of Mr. Scott's address, the chairman, Mr. E. R. Complin, raised the question as to the interpretation of the regulations covering hours and wages. "If a firm agrees to shorten the hours but leave the weekly take-home pay the same, will the Board consider it as an hourly wage increase, or will the Board consider it simply a shortening of the hours without a corresponding decrease in weekly earnings?"

Mr. Michael O'Brien, of the Ontario Regional War Labour Board replied that while the problem presented pitfalls, the Board had considerable latitude in deciding what was "fair and reasonable". All the contingent facts were considered "but in general, the Board up until now have been basing their decisions on the hourly rate, rather than on the weekly take-home pay".

tribution and manpower. He recalled that the C.M.A., at its 1945 annual meeting, passed a resolution asking the Prices Board, to adopt "a selective type of price control", maintaining controls on consumer goods that affected the cost-of-living index, but allowing price increases on certain specified capital goods. It was urged further at that time, that "the price control policy must be such as to provide an incentive to production". He pointed out that the Board had suspended the imposition of maximum prices on the sales of many luxury goods on February 1 and on specified machinery and other capital equipment on May 1, 1946.

Mr. Bennett referred appreciatively to the results obtained by rigid control of prices in preventing inflation and enumerated some of

the considerations that led up to more recent adjustments.

For example, during the war "the basic criterion in dealing with an application for a price increase" was the current financial position of the firm or industry making the application". Following the conclusion of hostilities this provision was enlarged to take into account "not only current earnings, but prospective earnings."

Again, while maintaining maximum ceiling prices on retail sales, sellers to manufacturers in certain industries, such as the automobile industry, have been allowed to negotiate for

higher prices. The speaker pointed out too, that higher costs in the post-war production of peace-time goods has been offset, in some measure, by the reduction or elimination of certain war excise taxes, removal of some sales taxes and the cancellation of war exchange taxes on imports.

A number of members took part in the discussion that followed Mr. Bennett's address, among them, W. R. Yendall, London; W. S. Beazley, Montreal; C. H. Mitchell, Kitchener; Frank A. Best, Windsor; and F. P. Fowle, Toronto.

Negotiations of Labour Contracts

"No satisfactory labour negotiations can be achieved unless there is extensive pre-negotiation preparation". That was the first postulate laid down by E. C. Burgess in his address on the negotiation of labour contracts. "We must recognize," he continued, that the soil of industrial understanding is cluttered up with the weeds of traditional suspicion, fear and ignorance, fertilized by crack-pot theories".

Having recognized these conditions "the first essential towards reasonable and satisfactory negotiations is a background of months of confidence-building, achieved only by prompt and fair settlement of grievances, a record of undertakings fulfilled and promises made and kept". These things all make for understanding and confidence and "without confidence, understanding and knowledge, labour negotiations become a bitter and costly experience," the speaker declared.

Having established a record of good faith and a feeling of confidence on the part of the workers, the second postulate Mr. Burgess stressed was, "don't underestimate the full-time, paid regional union organizer". Management has a wide range of problems that demand his attention constantly, whereas the union organizer has but one upon which to centre his energies. "All his working hours are devoted to ways and means of getting more and more for his members". Consequently, he comes to the conference table a specialist on one subject.

Next, it is invaluable for management's negotiators "to know everything there is to know about each individual member of the bargaining committee". With such knowledge, management is in a better position to discuss a collective agreement.

Again, it is essential to get all the details of the proposed agreement before commencing discussion of any one of them, the speaker asserted "Don't hurry, don't get mad and don't show fear" when engaged in

collective bargaining, were points emphasized by Mr. Burgess.

The speaker claimed that present-day labour negotiations are more difficult than at any time in the past, due, largely, to the pattern established in the United States. If it is fair for the unions to make demands, it is equally fair for management to make demands as well. "Establish the principle that demands are to work both ways," he urged.

Mr. Burgess concluded: "Knowing Canadian management as I think I do, I do not believe we are going to give up our way of life, for ourselves or our children, without a very great struggle and, as I see it, there is no better way to display that determination than by having a fair and well-conceived approach at the negotiation of an annual labour contract, keeping constantly before all concerned that there cannot be two bosses."

The Foremen's Position in Industry

Introducing the subject, "The Foreman's Position in Industry," C. B. C. Scott, Vice-Chairman of the Conference, declared: "We all know that the foremen are the key-men in any successful plant . . . On the other hand, we see, particularly in the south, across the line, that the foreman is being taken into unions", two facts that help to explain management's interest in the status of foremen.

The opening address was given by E. E. Sparrow, Toronto industrialist, who for a number of years, has taken an active interest in local and in the Dominion Council of Foremen's Clubs. At the outset of his address he said: "I think that a great many management people say, 'Yes, our foremen are a part of management', but forget some very, very important actions that should go along with those words."

"In the first place," he continued, "if they are foremen who have been with you any

length of time, they have had superimposed upon them a personnel department. They have had taken away from them, in many instances, the right to hire and fire. They had many other little points of responsibility reduced. And very few foremen have been told what it is all about."

While frankly admitting that the growth and development of industrial relations and personnel departments in recent years is "a very fine thing," he asserted that "a good many personnel officers have taken upon themselves too many of the foremen's responsibilities, and consequently, your foremen have . . . a complaint."

Mr. Sparrow referred to the camaraderie that goes on between the senior administrative officials "and all the other people in the front office . . . but a good many foremen out in the plant hardly know the president or the general manager." The cause for such a condition lay in the head office. "Unless he is sent for, he (the foreman) hasn't much business coming into head office." The speaker suggested "that foremen, since they are a part of management, should be met by top management in the foremen's departments . . . if you are going to have foremen feel that they are a part of management, you have got to be equally as friendly, equally as prepared to stop and talk to the foremen in the shop, as to your accountant and other officials in the front office, who, by the way, do not rank higher than foremen."

National Employment Service

The "Administration of the Unemployment Insurance Act" was the subject of an address by Mr. G. W. Ritchie, M.B.E., employers' representative on the Unemployment Insurance Commission. He explained that the administration of the Act involved two functions, first, unemployment insurance, with all its problems of coverage, contributions, claims and audits, and secondly, an employment service to find employment for workers so that they would not be under the necessity of applying for benefit. He reminded his audience that the second function assumed great national importance early in the war, when the manpower situation was becoming more and more acute. About that time, National Selective Service was set up in the Department of Labour and became affiliated with the employment service of the Commission. These united services were used for a number of purposes, such as "labour priorities, mobilization surveys, housing surveys, farm labour excursions, special recruiting of labour forces, vet-

Turning to the matter of union agreements, Mr. Sparrow pointed out that possibly seven per cent of industry was unionized before the war, "but now it may run up to twenty per cent." Consequently, "many more foremen are having to learn something about union agreements. But all that they learn about it generally is that an agreement has been reached with an outsider, the union organizer, and that once again their authority is being reduced".

The speaker stated that "firms that are doing the right thing by their foremen are in the habit of calling their foremen together practically every day that the negotiating committee meets with management, in order to keep their foremen posted on the development of the new agreement." They are the men that should know, he claimed, and if they "are a part of management, does it not follow that they should be in a position to speak for management in a critical period?"

Another factor that the speaker touched upon was the proper training of foremen. He was not greatly impressed with the "training within industry", tried out during the war, but he urged that each foreman in turn be "brought in before some member of top management, to sit down in his office and to learn from him exactly what is done—just the way that a lot of us learned, years ago."

Mr. Sparrow referred appreciatively to Community Foremen's Clubs, claiming that they had advantages over the individual company club.

erans' preference, reinstatement of veterans in civil employment and other activities of a labour department nature."

Mr. Ritchie continued: "So when the war ended, and the period for which the control of the Unemployment Insurance Commission was contracted was drawing to a close, the inevitable happened. The Minister of Labour and his deputy felt that it would be very unwise in the country's interest to give up the control of the employment service, which, by the way, had become known by much publicizing, as the 'National Employment Service', though it was not so named under the Act."

Reference was made by the speaker to the amendments made in the Act at the present session of Parliament. "There are two amendments which I would like to discuss with you," he said; (1) the power to pass regulations requiring every employer to advise the employment service of his labour needs, and of his labour separations; (2) the power to pass

regulations requiring every person seeking employment to advise the employment service of their intention."

While admitting that "some employers do not see why such regulations are necessary in

peacetime and...that some employers are not co-operating," Mr. Ritchie asserted that "these regulations would simplify carrying on under the Act certain requirements which are still in force under Order in Council."

Provision of Suitable Employment

Providing an adequate interpretation of the term "suitable employment", has been a difficult problem for administrative officials of the Unemployment Insurance Commission ever since the Unemployment Insurance Act, 1940, came into force.

With a view to clarifying the issue, at least in the minds of employers, the Conference on employer-employee relations included in its program an address by Mr. G. S. Collins, Manager of the Toronto office of the Commission.

After quoting the statutory conditions that relate to "suitable employment", Mr. Collins said:—

The Act is specific, but when you consider our Occupational Dictionary contains about 30,000 job classifications, is it any wonder we ask employers to describe carefully to us the type of person they want us to send to them . . . some employers ask us to send a man and get annoyed when we ask them to describe briefly some qualifications the man should possess.

Such factors as education, experience, type of work, personal characteristics, rate of wages, working conditions, and nature of the employment, have all to be considered by the selection officers of the employment service, if they are to refer suitable applicants to jobs.

Mr. Collins continued: "We have an obligation to the employer and the employee and we must protect the insurance fund". Some of the guiding principles set forth of the Commission help in the constant effort to place people in employment who are drawing insurance benefit. "The task of all concerned is to make certain that the interpretation of this phrase 'suitable employment' is a fair and reasonable one in every case. However, what is fair and reasonable in wartime may not be good practice in the transition period and what is fair and reasonable in the transition period

may again be changed in normal times. Up until the present time the Commission has felt it desirable to build up gradually through the processes authorized by the Act the interpretation of the term 'suitable employment'. However, it feels that now much more definite instructions will be effective".

These have been set up by the Commission and the speaker quoted them extensively. For example, the regulations provide for a grouping of occupations which are similar in many respects. If there are no jobs available in the claimant's usual occupation the order in which employment in other occupations should be offered to a claimant are set out in the following order:—

- (1) in the claimant's usual occupation; (2) in the group containing the claimant's occupation; (3) in the claimant's pre-war occupation; (4) in the group containing the claimant's pre-war occupation; (5) in the claimant's secondary occupation (if any); (6) in the group containing the claimant's secondary occupation; (7) or, failing any of these in the nearest related group to (1), (3) and (5) in which there are employment opportunities, or in any other occupation for which the claimant is suited.

Summarizing his presentation Mr. Collins said, "The Unemployment Insurance Act, 1940, does not permit of any definition of the term 'suitable employment'. It must necessarily be the circumstances in each individual case which determine the suitability of employment and while it is possible to outline the general principles . . . nevertheless it is a question of relating these principles to the particular facts that exist in the individual case". He pointed out that appeals can be made from local office decisions to Courts of Referees and from the decisions of these Courts appeals may finally be made to the Umpire.

Fire Losses in Canadian Industry

In an address entitled, "Canadian Fire Losses in Industrial and Other Fields", Mr. C. Willis George of Ottawa revealed that "over the last ten years industrial fires have occurred in 12,475 cases, causing a property loss of \$64,806,000." He emphasized the fact that "these staggering figures" do not take into account loss of life, loss of wages by

workers, loss of shipping by transportation companies, nor the loss of revenue by municipal, provincial and federal governments, during the time that the damage to property was being repaired.

Mr. George presented details of the fire losses in manufacturing properties during 1945. "As is to be expected," he said, "the provinces

of Ontario and Quebec, where there is the greatest concentration of industry, led in fire and losses, with 567 fires costing \$3,972,000 in Ontario, and 367 fires costing \$3,789,000 in Quebec. British Columbia came third with 100 fires causing losses of \$435,000. New Brunswick and Nova Scotia had losses of \$391,000 each, from 23 and 63 fires respectively and Alberta, Manitoba and Saskatchewan experienced losses of a little over \$100,000 each. Prince Edward Island had eight fires in manufacturing properties, causing a loss of \$16,000."

Formula on Employer-Employee Relations

Although the statement on labour policy adopted by the convention was published in the July issue of the *LABOUR GAZETTE*, it is being reproduced here for the purpose of recording the proceedings in one issue. The statement termed, "An Approach to Employer-Employee Relations", is as follows:—

The Canadian Manufacturers' Association, Inc., believes a high standard of living for all Canadians to be the chief objective of Canadian industry. The Association believes that a high standard of living in Canada depends upon maintenance of a high level of production.

A high level of production, however, can be maintained only if industry supplies consumers with satisfactory goods at prices which will encourage a high level of consumption both at home and for export. To do this is the prime function of industry.

If this function is to be successfully performed, there must be a fair return in the form of gross earnings from which wages and dividends may alike be paid.

For the successful performance of this function, there must also be suitable plants, equipment and machinery; sound management; and a working force willing and able to perform the many and various duties necessary in modern manufacturing operations.

But even with all these, the successful functioning of industry can be assured only by full and harmonious co-operation between employees and employers.

To promote full and harmonious co-operation, the Association believes that the following principles should govern relations between employees and their employers.

A. Both Employees and Employers Should

(1) Regard continuity and quality of service to the public (the customer), as the first consideration. Upon it depend year-round jobs, good wages, dividends, and the future of industry itself.

To prevent similar losses in future, the speaker urged "eternal vigilance, adequate preventive methods, good housekeeping, proper construction and control, and above all, a recognition of the hazard which exists—always to insure that all the things which *should* be done *are* done". In conclusion, he declared: "We face a challenge. We must accept the challenge and do our utmost to cut down the fearful losses in lives, production and material which we annually experience. It *can* be done and we must do it."

(2) Observe faithfully the provisions of every agreement or undertaking made by them or on their behalf.

(3) Seek constantly to discover methods of increasing production and improving products.

(4) Consider with open minds proposals made by either party to the other, each seeking to understand the other's needs and problems, and constantly bearing in mind that neither can operate without the assistance of the other.

(5) Settle differences by negotiation in good faith without interruption of operations.

B. Employers Should

(1) Provide facilities which will permit efficient and economical production and make all reasonable provision for the safety and health of their employees during the hours of their employment.

(2) Select and develop supervisors who are not only technically competent, but who will deal on a fair and friendly basis with the men and women whom they supervise.

(3) Respect the right of employees to associate freely for all lawful purposes.

(4) Bargain collectively, in cases where representatives have been freely chosen by a majority of the employees affected, on wages, hours of work, and working conditions.

(5) Organize operations with a view to promoting maximum regularity and continuity of employment and consequently maximum stability of income.

(6) Give employees, as far as possible, opportunities to progress within the organization according to ability, experience and merit.

(7) Support and develop good wage standards having regard to all circumstances which are material.

C. Employees Should

(1) Recognize the Employer's right to plan, direct and manage the business.

(2) Perform their assigned duties in an efficient and industrious manner to the best of their ability.

(3) Co-operate freely with management in meeting the many problems in which the employees are concerned.

(4) Conserve and protect the products, plant, equipment and machinery, and respect the

rights, of employers as the owners of the property.

(5) Recognize the right of an individual employee to join or not to join any lawful organization of employees or other citizens without impairing his right to work at the occupation of his choice.

The National Film Board and Labour

SINCE its inception in 1939, the National Film Board of Canada has endeavoured to help the man in the factory in a variety of ways. During the war, films on production problems and workers' morale made their contribution towards the high production level that was achieved. It has been indicated that with the help of training films, the worker's training period can be reduced, while accidents may be lessened with the screening of films on fire and accident prevention and first-aid. Time lost in sickness may be shortened through films on nutrition and health. Films on current social problems, labour relations, and motion economy are found to help working conditions.

Films which go to the workers are directly related to the particular needs of industry and of organized labour. To be of real value, the films must be not only factually correct, but must be produced with the aim of putting across the lesson in understandable, easily-remembered terms. It is essential that they possess the power of stimulating thought, raising questions, and provoking discussion among workers. The showing alone cannot be considered as an end in itself to be of any long-term use, but should be a means of getting workers' participation in figuring out the answers to questions posed by the film.

Discussion trailers, short visuals acted out by union members and workers in a discussion on the film which has preceded it, have been produced by the Film Board to accompany the majority of labour films since 1943.

May, 1942, saw the birth of the National Film Board Trade Union Circuits, under the joint sponsorship of the Trades and Labour Congress, the Canadian Congress of Labour, the National Film Board, and the Worker's Educational Association of Canada. These circuits, which have been described as being "one of the most comprehensive plans worked out in any country in the world for the production and distribution of films as a means of adult education," carried films to working men and women in every corner of the Dominion, reaching a monthly audience of 30,000 trade union members.

At the same time, thousands of men and women in the factories for the past three years have seen films for workers produced by the National Film Board, or in Great Britain, the United States, France, and Russia on the Industrial Circuits of the Film Board. In the first four months of 1945, about 2,000 showings were made to an audience of approximately 270,000 factory management committees and workers. These were made through factory management.

Originally, these circuits were covered by a Film Board projectionist, or field representative, whose job it was to take film and projector into factories and union meetings, give the audience an idea of the film and start the ball rolling in the ensuing discussion. Now, plants and unions are forming Film Councils and training their own men to give projection service and plan film programs. In unions, film stewards, usually members of the union's educational committee, take over the duties of projectionist. Film Councils are making headway in larger urban areas, like Toronto, Winnipeg and Vancouver.

The Councils came into existence through the amalgamation of effort of groups and organizations which felt the need for functional film programs. The first Councils to be formed were Community Film Councils. Service organizations such as the Junior Chamber of Commerce, Kiwanis Club, and the Y.M.C.A. pooled their resources to purchase projection equipment and films, plan programs, and train projectionists.

In some cities, labour and industrial councils were formed independently of Community Councils. The recent trend, however, is for labour and industry to send representatives to sit on the Community Council.

Both labour and industry are finding film showings helpful in stimulating discussion on current labour problems. Workers choose their own films. They are previewed, adjudged and passed by a group of men who form the National Labour Union Film Committee. On the Committee sit representatives from the two Congresses, the Worker's Educational Association, the National Film Board,

and the National Film Society. Films selected by these men are procured and placed in film libraries across Canada by the National Film Board, whence they may be booked by local unions and factories either directly or through the Films Councils.

Promotion and publicity for the monthly shows are supervised by the Committee, as well as program selection, the Congresses working through their local unions, and the Film Board through regional offices.

The National Film Board serves the needs of Labour Film Councils in more ways than film supply. It supplies graphical material in the form of informational displays, posters, illustrated pamphlets, and filmstrips for labour meetings. Some of the recently-distributed filmstrips are "The Saga of 666", and "Svenson's Seniority", which outline the operation of grievance procedure, "Working Together in Canada", and "Orphan Willie". This visual presentation of the worker's problems does much to clarify the questions raised by the film on the same theme.

Film programs are planned so that they will have a close relationship with the educational work of individual labour groups. But while there are films on progressive education, slum clearance, and other social problems as well as world affairs, there are many fields not yet covered. Topics such as collective bargaining, labour economics, and trade union history have not been given film treatment. The Film Board has already produced films like "Labour Front", "Partners in Production", and "A Man and His Job". When the organized labour movement expresses a need and desire for more films, and has worked out methods of distribution, the Board will endeavour to produce films on new labour problems as they arise.

The "Labour Film Handbook" scheduled for publication this Fall, by the Film Board gives complete details on labour films, instructions on program planning, and tells where projection equipment and films may be obtained.

Fatal Industrial Accidents in Canada During the Second Quarter of 1946

THERE were 271 fatal industrial accidents in the second quarter of 1946 according to the latest reports received by the Department of Labour. In the previous three months there were 346 including 17 in a supplementary list. The accidents recorded are those occurring to persons gainfully employed during the course of, or arising out of their employment as well as fatalities from industrial diseases reported chiefly by Provincial Workmen's Compensation Boards.

The statistics are compiled from reports received from Provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, and from LABOUR GAZETTE correspondents. Newspaper reports are also used to supplement these data.

Several industrial accidents were recorded which resulted in the deaths of three or more persons, as follows. A pressure shift buried four coal miners at Glace Bay, Nova Scotia, on June 15. Three gold miners were killed at Timmins, Ontario, on June 18 when a locomotive plunged down an underground shaft and struck the cage in which they were travelling. The capsizing of a boat at Marathon, Ontario, caused the death by drowning of three labourers on April 7. Six persons engaged in construction and dredging were drowned when a tugboat capsized at Port Weller, Ontario, on June 29. At

Anticosti, Quebec, a barge capsized on June 14 and four men were drowned.

Grouped by industries the largest number of fatalities, 63, were recorded in manufacturing. Of these, 15 were in iron, steel and products, 12 in saw and planing-mill products, and 10 in pulp, paper and paper products. The remainder was distributed among the other manufacturing sub-groups. In the previous quarter 96 industrial deaths were recorded in manufacturing.

Industrial fatalities in transportation decreased to 42 from the 57 recorded in the previous quarter. There were 16 in steam railways, a marked decline from 38 in the previous three months. Fatalities in water transportation numbered 15 as compared with four in the previous quarter.

Of the 37 deaths in the mining group 23 were in metalliferous mining, 10 in coal mining, and 4 in other non-metallic mineral mining and quarrying. In the previous quarter 52 fatalities were recorded in mining, 31 being in metalliferous mining.

The number of fatalities in logging declined from 48 to 19, and in trade from 18 to 13. Slight increases were recorded in agriculture, from 22 to 24, and in service from 20 to 24.

In the construction group were recorded 28 fatalities, of which 17 were in buildings and structures, 7 in miscellaneous construction, and

4 in highway and bridge construction. In the previous quarter 14 deaths occurred in this group, 11 of which were in construction of buildings and structures.

More fatal accidents, 92 in number, were caused during the quarter by moving trains and other vehicles than by any other cause. Deaths from industrial diseases, infections, etc., declined to 55 from 86 in the previous quarter. Falls of persons resulted in 46 fatalities during the quarter while dangerous substances caused 39.

More fatal industrial accidents were recorded in Ontario than in any other province. The number was 139. Of these 43 were in manufacturing, 18 in agriculture, 17 in construction, and 16 in transportation. In British Columbia there were 53 industrial deaths including 11 in transportation and 10 in manufacturing. Quebec registered 23 fatalities and Nova Scotia 14, of which 8 occurred in mining.

Of the total of 271 deaths, 82 occurred in April, 94 in May, and 95 in June.

Publications Received Recently in Library of Department of Labour, Ottawa

THE Library of the Department of Labour was organized in 1900, and is both a reference and a circulating Library. It is maintained by the Department for the purpose of assembling and dispensing or distributing information required on all subjects which affect in any way the labour movement and the laws by which it is governed. These sources include a valuable collection of publications of labour organizations and periodicals published in the interest of organized labour, a collection of books and periodicals and newspapers dealing with economic and social problems, books of reference and volumes on history and law, a comprehensive collection on industrial combinations and related subjects, and all publications of the International Labour Office.

The list that follows is a continuation of those published in the *Labour Gazette* during the first four months of 1945, and in July, 1946. The arrangement of the catalogue has been revised somewhat. Instead of listing the authors first the titles of the publications under the several sub-headings are given the primary position, followed by the names of the authors, and publishers and other relevant details. It is intended that similar lists will be a more or less regular feature in subsequent issues of the *Labour Gazette*.

ACCIDENT PREVENTION :

1. *National Fire Codes for the Prevention of Dust Explosions, 1943*; sponsored by National Fire Protection Association. U.S. Department of Agriculture. Boston National Fire Protection Association, 1943, 160 pp. Superseded by 1944 edition, 176 pp.

2. *Textile Safety Code*; U.S. Bureau of Labor Statistics, Washington, G.P.O. 1930, 11 pp. (Bulletin No. 509. Safety code series).

APPRENTICESHIP :

3. *Carpentry; Apprenticeship Standards*; New Brunswick, Department of Labour. Fredericton, 1945, 13 pp.

4. *Painting and Decorating Apprenticeship Standards*. New Brunswick, Department of Labour. Fredericton, 1945, 13 pp.

5. *Commission Inquiring into Apprenticeship and Related Matters, New Zealand*. Report presented to both Houses of the General Assembly. Wellington, Government printer, 1945, 20 pp.

COMMUNISM :

6. *The Secret Battalion*; an examination of the Communist attitude to the Labour Party, By Harold J. Laski, London Party, 1946, 30 pp.

COAL TRADE :

7. *New Deal for Coal*; by Harold Wilson, London, Contact, 1945. 264 pp. illus. bibliography. A guide to the problems in war and peace including a plan put forward by the Labour Party and the criticism of mine workers.

DISABLED :

8. *Statement before the Subcommittee of the House on aid to the Physically Handicapped*; H.R. 5206, the Federal Aid to the Physically Handicapped Act, April, 1946; by Louis B. Swellenbach, Washington, G.P.O., 1946, 8 pp.

ECONOMIC PROBLEMS :

9. *Labor's Stake in a Free Economy*. An address prepared by Wendell Berge, for delivery at a conference sponsored by the Workers' Educational Service, University of Michigan Extension Division. March 16, 1945. Detroit, 1945.

EDUCATION :

10. *Commission on Higher Education in West Africa*; Great Britain, Colonial Office. Report presented June, 1945. London, H.M. S.O., 1945, 190 pp., diags., tables. Cmd. 6655.

11. *Building Crafts, Education for Industry and Commerce*; Great Britain, London, H.M.S.O., 1945, 73 pp. (Pamphlet No. 4).

12. *A Guide to the Educational System of England and Wales*; Ministry of Education, Great Britain, London, H.M.S.O., 1945. 61 pp. (Pamphlet No. 2).

13. *The Nation's Schools, their Plans and Purposes*; Great Britain. London, H.M.S.O., 1945, 30 pp. (Pamphlet No. 1).

EMPLOYMENT :

14. *The Key to Full Employment without Regimentation*; by Eugen Berkovits, in collaboration with George C. Atkins. Toronto, Longmans, Green & Co., 1945, 81 pp.

HOUSING:

15. *U.S. National Housing Agency; 3rd Annual Report*; January 1 to December 31, 1944; Washington, G.P.O., 1945, 215 pp.

INDUSTRIAL RELATIONS:

16. *National Collective Bargaining Policy*; New York, Industrial Relations Counsellors Inc., 1945, 5 pp.

17. *Labour Policy of the Federal Government*, by Harold W. Metz; Washington, D.C., The Brookings Institution, 1945, 284 pp.

18. *Fact Finding in Industrial Disputes*, by Bryce M. Stewart and Walter J. Couper; New York, Industrial Relations Counsellors, Inc., 1946, 61 pp. (Industrial Relations Monograph No. 11).

19. *Nonferrous Metals Fact Finding Board*; U.S. Congress, Department of Labor. Report and recommendations. Washington, Department of Labor, 1946, 84 pp.

INTERNATIONAL LABOUR CONFERENCE:

20. *Report of the Canadian Government delegates to the twenty-sixth session of the International Labour Conference, Philadelphia, April 20—May 13, 1944*. Ottawa, King's printer, 1944.

INTERNATIONAL RELATIONS:

21. *Human Leadership in Industry, the Challenge of To-morrow*; by Sam Adolph Lewisohn New York and London, Harper & Bros. 1945. 112 pp. Newer points of Industrial Relations are stressed.

INSURANCE SOCIAL:

22. *Federal Old-age and Survivors' Insurance*; insurance for workers and their families, U.S. Social Security Board, Washington, G.P.O., 1945, 17 pp. tables.

INSURANCE UNEMPLOYMENT:

23. *Labor looks at Unemployment Insurance*; H. L. McCarthy, comp., report of the conference workshop of organized labor on employment security at the University of Chicago, Chicago, Ill., University of Chicago Press 1946, 40 pp.

LABOUR UNIONS:

24. *The Truth About Unions*, by Leo. Huberman, New York, Phamphlet Press, 1946, pp. illus. diags.

PLANNING:

25. *Political and Economic Planning*; Economic development in S.E. Europe, including Poland, Czechoslovakia, Austria, Hungary, Roumania, Yugoslavia, Bulgaria and Greece; with an introduction by David Mitrany, London, Oxford University Press, 1945; 156 pp. tables.

PRICE CONTROL:

26. *The End of Price Control—How and When?* Committee for Economic Development. A statement on national policy, New York, C.E.D., 1946, 13 pp.

PROFIT SHARING:

27. *Profit sharing and Stock Ownership for Wage Earners and Executives*, by Bryce Morrison Stewart, New York, Industrial Relations Counsellors Inc., 1945, 143 pp. (Industrial Relations Monograph No. 10).

SOCIAL PROBLEMS:

28. *The Social Problems of an Industrial Civilization*, by Elton Mayo; Boston, Division of Research, Graduate School of Business Administration, Harvard University, 1945. xvii, 150 pp. diags.

SOCIAL SECURITY:

29. *Disability among Gainfully Occupied Persons*; an introduction to disability insurance statistics, by I. S. Falk, Barkav S. Sanders and David Federman; Washington, G.P.O., 1945, 60 pp. tables, charts.

30. *Cash benefits under the New Zealand Social Security Program*, by Jacob Fisher; Washington, G.P.O., 1946, 42 pp., tables. (Bureau reports No. 13).

STRIKES AND LOCKOUTS:

31. *Minority conference Wartime Record of Strikes and Lockouts, 1940-1945*. U.S. Congress, Senate. Presented by Mr. Ball; prepared by Rosa Lee Swafford. Washington, G.P.O., 1946, 38 pp., (79th Congress, 2d. session, Document No. 136).

SUPERVISION:

32. *Studies in Supervision*: a series of lectures delivered at McGill University, Montreal, January 30—March 20, 1945. Montreal, McGill University, 1945; ix, 149 pp. tables. (Monograph Series No. 6).

UNEMPLOYMENT:

33. *There's Work for All*; by Michael Young and Therdor Prager, with 14 pictorial charts in colour designed by the Isotypo Institute; 84 photographs. London, Nicholson & Watson, 1943, 123 pp., illus., diags.

Contents: No more dole; The Consequences; Causes of general unemployment. How to deal with general unemployment; Structural unemployment, and the location of Industry; International aspects of full employment; The war and after: Reading List.

Notes of Current Interest

Order in Council governing taking of strike votes under Government supervision

Council P.C. 3689 under the National Emergency Transitional Powers Act, 1945, governing the taking of strike votes under government supervision. Implementation of this specific item of the report was recommended by Hon. Humphrey Mitchell, Minister of Labour. The Order provides that "the Minister of Labour may at the request of either party to an industrial dispute, and if he deems fit, either before or after the strike is in progress, direct that a strike vote be taken under government supervision to determine the wishes of the men affected as to whether the strike will take place or otherwise."

The text of the Order is as follows:

1. In this order, "Minister" means the Minister of Labour.

2. Where in the opinion of the Minister a dispute between an employer and his employees over wages, working conditions or other terms of employment exists which may cause or has caused a strike or other concerted cessation of work in the employer's establishment and in his opinion such strike or other concerted cessation of work or the continuance thereof will interfere with economic stability or the orderly transition to conditions of peace in Canada, the Minister may order a vote by secret ballot to be taken under the direction of the Department of Labour, of the employees involved in the

dispute to determine the views of such employees and any matter involved in or arising out of the dispute.

3. Such vote shall be taken upon such notice and subject to such provisions, conditions, stipulations and restrictions and the ballot shall be in such form, as the Minister may prescribe or direct.

4. Where a vote has been taken under the provisions of this Order, the Minister shall advise the employer and the employees and any interested trade union or employees' organization of the result of such vote forthwith after the vote has been taken and may publish the same in such manner as he sees fit.

5. Where a vote has been ordered by the Minister under the provisions of this Order, the employees and employers who are parties to the dispute and every interested trade union or employees' organization and the officers thereof shall provide or make available to the Minister or to the person designated by him to take the vote, upon request, such assistance, facilities and information as may be deemed necessary by the Minister or by such person for the taking of the vote.

6. Any person who

- (a) refuses or fails to comply with any direction or request made or given by the Minister or any person designated by him under the provisions of this Order, or
- (b) obstructs any person designated by the Minister to take a vote under this Order, in the performance of his duties, or
- (c) seeks by intimidation or violence to prevent any employee from voting on a vote taken under the provisions of this Order.

shall be guilty of an offence and liable upon summary conviction in the case of a corporation, to a fine not exceeding two thousand dollars, or in the case of any other person to a fine not exceeding five hundred dollars or imprisonment for a term not exceeding six months or to both such fine and such imprisonment.

Summary of Industrial Relations Committee proceedings

A summary of the evidence and recommendations of the House of Commons Committee on Industrial Relations, which during July and August conducted an inquiry into the causes of industrial unrest in Canada, with specific reference to the steel strike, is contained elsewhere in this issue.

Canadian participation in World Health Organization

The Canadian Parliament has approved the constitution of the World Health Organization, which was drawn up and signed by representatives of fifty-one United Nations at a conference in New York last July.

The World Health Organization is to be brought into relation with the United Nations as one of the specialized agencies referred to in Article 57 of the Charter. Its objective, as stated in its constitution is "the attainment by all peoples of the highest possible standard of health."

The structure of the Organization will comprise (1) a World Health Assembly, consisting of delegates from all the member states, which will meet annually; (2) an executive board, consisting of members from eighteen states; and (3) a secretariat, composed of a Director-General and technical and administrative staff.

(General Brock Chisholm, formerly Deputy Minister of Health in the Department of National Health and Welfare, has been chosen as Executive Secretary of the Interim Commission which is to function until the new organization is formally constituted.)

The World Health Assembly will have power to adopt international conventions or agreements, which, like International Labour Conventions, will come into force upon ratification by the governments of the member states. Each country is required to report within 18 months as to the action it has taken in regard to the convention or agreement. In addition, by the terms of a provision not at present duplicated in the constitution of the ILO, if the country fails to ratify the convention, it must furnish a statement of its reasons for non-acceptance.

Health is defined in the constitution as "not merely the absence of disease or infirmity" but as a "state of complete physical, mental and social well-being". The enjoyment of the highest attainable standard of health is declared to be "one of the fundamental rights of every human being without distinction of race, religion, political belief, economic or social condition."

Among the functions of the World Health Organization, in addition to obtaining international agreements on health matters, will be the following: to promote and conduct research in the field of health; to stimulate and advance work to eradicate epidemic, endemic and other diseases; to provide technical and statistical services; to assist governments, upon request, in strengthening health services; to furnish aid in emergencies; to promote maternal and child health and welfare; to foster activities in the field of mental health, especially those affecting the harmony of human relations; to consider techniques of public health and medical care, including hospital services and social security; to develop, establish and promote international standards with respect to food, biological, pharmaceutical and similar products; and to promote, in co-operation with other specialized agencies where necessary, the improvement of nutrition, housing, sanitation, recreation, economic or working conditions and other aspects of environmental hygiene.

Employment and Industrial Statistics

The accompanying table contains the latest statistics available reflecting industrial activity in Canada, for certain months in the current year, as compared with the corresponding period in 1945.

The index of industrial employment, published by the Dominion Bureau of Statistics, rose from 169.9 in June to 173.5 in July. An advance of 0.5 points was recorded in the cost-of-living index which was 125.6 at August 1. The index of the physical volume of business rose to 180.3 in July from 178.9 in June.

Employment and Earnings—The resumption of operations in the logging and lumber-using industries of British Columbia following the settlement of the strike was an important factor in the substantial increase in industrial employment at the beginning of July, as reported by the Bureau of Statistics in its latest survey of employment and payrolls. There were moderate advances in the other provinces in spite of strikes in the iron and steel, non-ferrous metal, rubber, textile, fur and other industries. The gain in Canada as a whole was above normal for the time of year, although it was seasonal in character.

Reports from 15,933 employers indicated a combined staff of 1,773,712 persons at July 1, as compared with 1,737,271 at June 1, a gain of 36,441. Based on the 1926 average as 100, the index of industrial employment was 173.5 as compared with 169.9 in the preceding month and 175.5 at July 1, 1945. An increase of 13,000 was recorded in the manufacturing industries at July 1. An addition of 14,700 to the working forces in the lumbering industries

STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

Note.—Official statistics except where noted. Much of the statistical data in this table, with an analysis, are included in the *Monthly Review of Business Statistics* issued by the Dominion Bureau of Statistics.

3 Base June, 1941=100.

4 Base, 1935-1939=100.

5 Adjusted, where

necessary, for seasonal variation.

6 Notes in the hands of the public at the end of the month.

7 Figures for four weeks

ended August 24, 1946, and corresponding previous periods.

was reported. Large seasonal advances occurred in food and pulp and paper while losses were noted in rubber, iron and steel and textile plants, due partly to industrial disputes.

Among the non-manufacturing industries, improvements were shown in logging, communications, transportation and storage, construction, services, trade and finance. Strikes in metal mines were a factor in a reduction in employment in metallic ore mining but an improvement was noted in mining generally.

Weekly payrolls of eight leading industries rose 3.9 per cent, from \$55,043,483 at June 1 to \$57,192,594 at July 1. The weekly average per employee was \$32.24 as compared with \$31.68 at June 1. Per capita figures at July 1 in previous years were: 1945, \$32.32; 1944, \$31.72 and 1943, \$30.97.

Prices—The general index of wholesale prices (base 1926 = 100) rose to 109.5 in July from 109.1 in June and 104.0 in July, 1945. The indexes for animal and vegetable products increased respectively from 114.2 to 115.7, and from 98.7 to 99.2. Textiles remained unchanged at 98.2 while decreases were noted in wood products, from 131.1 to 130.5, and iron products, from 128.4 to 128.3. Non-ferrous metals increased 2.4 points, from 86.9 to 89.3, while declines of 0.1 points were noted in non-metallic minerals and chemical products. The index of consumers' goods rose from 101.3 to 102.0 and of Canadian farm products, from 112.7 to 113.8; the index of producers' goods, however, declined from 106.2 to 106.0.

The official cost-of-living index, on the base of prices in the years 1935 to 1939 as 100, registered a further advance from 125.1 on July 2 to 125.6 for August 1, 1946. The food index rose from 144.2 to 144.7 reflecting gains for eggs, butter and meats which were not balanced by seasonal declines for vegetables and fruits. Increases in prices of men's wear contributed the major part of a rise in the clothing index from 126.4 to 127.6. Home furnishings and services moved up from 125.1 to 127.0 due chiefly to advances in furniture and chinaware. A slight increase was indicated in the miscellaneous index from 113.7 to 113.8, while no changes were noted in the indexes for rentals and fuel and light which remained at 112.6 and 107.2 respectively. The advance in the general index since August, 1939, was 24.6 per cent.

Index of the Physical Volume of Business—The index of the physical volume of business advanced from 178.9 in June to 180.3 in July, 1946. The index of industrial production gained 1.7 points to stand at 181.1 at July 1. The index of construction rose from 204.0 to 237.0. Moderate declines were noted in mineral production and manufacturing while an im-

provement of 3.7 points was recorded in electric power. The index of distribution based upon railway traffic, internal and external trade increased slightly from 178.0 in June to 178.6 in July. Imports and exports increased 14.4 and 22.8 points respectively.

Labour day message of Minister of Labour

The Hon. Humphrey Mitchell, Minister of Labour, issued the following Labour Day message for 1946: It is now more than a year from the day when a conquered Germany and Japan failed in their war of oppression. But though the fighting in Europe and in Africa and in Asia has been over these many months, we in Canada still have with us the legacy of problems unavoidable following a total war effort.

For almost six years our whole economy either had to be completely changed, or was automatically thrown out of gear by the most destructive war in the history of mankind. It was not to be expected, therefore, that in little more than one year we would return to normal peacetime conditions. It is true we have made much progress in "reconversion", but a very great deal remains to be done.

Nations to which we look as the customers to buy our surplus production are themselves prostrate in many cases. Foreign trade is vitally essential to Canada's economy and high employment and until friendly nations are in a position to buy the commodities which we produce in abundance, we are severely handicapped. Consequently, we must do and are doing what we can to encourage those nations in again re-establishing themselves.

At home many of our wartime shortages persist. No need to dwell upon the fact that houses, that many items of clothing, and that even several items of food are still in short supply.

In some cases our shortages arise out of the continuing difficulties of securing materials from abroad. In other cases the shortages will be overcome only by a more intensive production domestically, a production which had to be interrupted in the interests of waging war.

In this present trying period, when we are endeavouring to re-establish ourselves once again on the domestic front, Canadian labour is a dominant factor. Without the full cooperation of labour we could not succeed just as we could not have shared so effectively in fighting the war of freedom. The core of Canadian labour is strong and sound. Given wise leadership which recognizes not only the rights of labour but also the common good there is no doubt in my mind that trade unionism will

continue to flourish and play a growing part in the general progress of our great country.

One cannot speak of this present difficult period without making some reference to the dangers of inflation which still exist. Inflation is not a bogey, to be used to frighten people into doing what otherwise they did not like to do. It is a real threat that still hangs over our national economy.

We have had price rises in Canada, but prices here are not out of hand. We have seen vastly greater price rises upset the economy of other countries in the past few months. We must continue our resolve not to let it happen here.

Eventually, of course, runaway prices mean unemployment and suffering: as happened in Canada after the first Great War. One of the most serious consequences of inflation is to make wage gains and improvements in working conditions previously secured after so much effort, to be almost totally unreal.

My appeal to the workers of Canada on this 1946 Labour Day is for solidarity in the job of helping our country through this period of reconversion into the happier days of high employment and better living which lie ahead.

**Labour day
messages by
labour leaders**

Leaders of Canada's two largest labour organizations, Mr. Percy R. Bengough, President of the Trades and Labour Congress of

Canada and Mr. A. R. Mosher, President of the Canadian Congress of Labour, in Labour Day messages made particular reference to the unsettled conditions in labour-management affairs during recent months.

Mr. Bengough declared that "conditions internationally and locally are in a state of flux with issues beclouded and uncertain . . . When one gets down to the basic reason, we find it is still the fear of insecurity." Answering the question, what do the workers want? Mr. Bengough said: "They want economic and social security. The Canadian worker, able and willing to work, wants an income sufficient to guarantee a good home and a comfortable living for both himself and his family that will free them from the fear of want for the whole of their lives, with an all-embracing scheme of health insurance for all, and a real aged citizens' pension when too old to work."

Mr. Bengough further asserted that "the old worries of getting a job or how long will it last; how are we going to get along if we become ill and have to meet a flock of doctors' bills, to say nothing about what we are going to do when we get old, are still real. We cannot fool ourselves. These are the worries of most people and little has been done so far to rid the people of Canada from their real fears that automatically bring an unsettled state of mind."

In referring to current labour unrest, Mr. Mosher said that "workers do not go on strike and give up their incomes unless they have what they feel to be ample justification for their action. In my opinion," he said, "the attitude of the workers results largely from a feeling of disillusionment and apprehension."

Mr. Mosher recalled that during the war Canadians were promised that "peace would make possible an era of justice and economic security, such as had scarcely been dreamed of in the past." Instead, however, "war workers were laid off in huge numbers without any provision for dismissal pay." Reconversion had been slow, shortages—especially of homes—became aggravated, "unemployment began to increase and the workers became more and more afraid . . ." It is evident, he continued, "that the attainment of higher standards of living depends upon increased production, but it is only when the workers refuse to produce that any attention is paid to their demands." He pointed out that "labour is now an important and integral part of the economic and social structure" not merely "a commodity". In conclusion, Mr. Mosher said: "The future of Canada and of the other nations depends upon the recognition of labour's rights and the sharing of responsibility for the control of both political and industrial affairs with the workers."

Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour, stated that the war had done much to raise the prestige of labour. The colossal growth of unionism had also contributed to labour's increased stature, and was inculcating in the minds of men that the true place of labour is as the equal of capital.

"This equality of rank of capital and labour means that before the distribution of profits and dividends to the shareholders the worker will be assured of receiving a fair wage in return for a reasonable day's work, in surroundings that give him material comfort as well as physical and moral protection."

As an instrument for establishing the right of labour to be on the same plane as capital, Mr. Charpentier urged the establishment in each industry of a national industrial council.

**Approval of
constitution
of UNESCO**

International co-operation in intellectual fields is the objective of the United Nations Educational, Scientific and Cultural Organization, whose constitution was recently approved by the Canadian Parliament.

According to the preamble of the constitution, UNESCO was created

for the purpose of advancing, through the educational, scientific and cultural relations of the peoples of the world, the objectives of international peace and of the common welfare of

mankind for which the United Nations Organization was established and which its charter proclaims.

In general the Organization will "promote the free flow of ideas by word and image" and thus foster the mutual knowledge and understanding of peoples.

In the field of education the Organization is to "advance the ideal of equality of educational opportunity without regard to race, sex, or any distinctions, economic or social." It will collaborate with members at their request in the development of educational activities, and will suggest educational methods.

It will encourage the international exchange of persons active in fields of education, science and culture, and the exchange of publications, objects of artistic and scientific interest and other materials of information.

The structure of the Organization, like that of the World Health Organization and the ILO, consists of a general conference which is to meet annually, an executive board, and a secretariat. The distinguished British scientist, Dr. Julian Huxley, has been appointed as secretary.

Describing Canada's obligations in regard to the Organization in the House of Commons, the Acting Secretary of State for External Affairs, Rt. Hon. L. S. St. Laurent, said: "Each Member State is required to make arrangements in accordance with its particular conditions for linking up principal bodies interested in educational, scientific and cultural matters with the work of the Organization. It is suggested that this preferably be done by forming a national commission which would be broadly representative of the Government and such bodies. The national commission or some such body is intended to act in an advisory capacity to the Government and to delegations to the general conference. It is also intended to be a liaison between various educational and cultural organizations and the Government.

"Here in Canada we have not yet determined what form of action we will take to bring the bodies interested in educational, scientific and cultural advancement into relationship with this international organization. In the United States before the adjournment of Congress a bill was adopted and signed by the President providing for the setting up in the United States of a national commission comprising one hundred members. Of course we would not have in contemplation anything as elaborate as that, but because of the jurisdiction of the provinces in matters of education we wish to confer with them as well as with the private organizations that exist for the promotion of educational,

scientific and cultural development. It is desired to have some Canadian body that will be widely representative of the Canadian public and that will be entirely divorced from any partisan political influence, to make this a matter in which all those in Canada interested in educational, scientific and cultural development will feel that they have a part."

Amendments to Combines Investigation Act

Bill No. 193, an Act to Amend the Combines Investigation Act, introduced in the House of Commons by the Minister of Justice on June 5 (L.G. July, 1946,

p. 855) was given third reading by the House of Commons on July 3 on conclusion of debate which began on July 2. The bill was amended during its passage in the House by the removal of a provision which provided that no prosecution could be commenced otherwise than at the instance of the Attorney General of Canada or the attorney general of a province. The effect of the amendment would be to enable any individual to lay an information alleging the existence of a combine.

In the Senate, the bill, following recommendation of the Senate Committee on Banking and Commerce, to which it had been referred for consideration, was amended by qualifying slightly the Commissioner's power to penalize a person for contempt in the course of an inquiry and by extending the power to retain and copy documents required as evidence in an investigation. The Senate did not make certain other changes proposed by the Committee limiting a provision authorizing the Exchequer Court to restrain misuses of patents or trade marks in undue restraint of trade, although one minor change in that provision was adopted.

The bill as amended was given third reading by the Senate on August 8. On August 17 the House of Commons concurred in the amendments made by the Senate, and on August 31 the bill received royal assent.

Industrial Democracy at Work

As a general introduction to the subject of labour-management co-operation, and the contribution that joint labour-management production committees can make to Canada's economic welfare, the Industrial Production Co-operation Board has published an illustrated booklet entitled *Industrial Democracy at Work*.

The booklet explains, through the use of charts, pictures and written text, the various functions that a labour-management production committee can perform, and gives in-

formation on how such a committee may be set up.

Introduced in wartime to examine and consider means to improve and increase production, the committees have met with success sufficient to warrant their continued existence and further development in the years to come, the booklet states, quoting the official declaration of the Canadian Government made at the Dominion-Provincial Conference, of its intention to continue active sponsorship of the committees.

Responsibility for fostering the growth of the committees has been vested in the Industrial Production Co-operation Board, with headquarters at Ottawa, which functions through the use of a field staff and informational material.

**Successful
co-operation
at Cornwall
paper mill**

An account of labour relations at the Howard Smith Paper Mills plant in Cornwall, Ont., forms the subject of *Teamwork in Action*, a recent publication of the

Industrial Production Co-operation Board.

Joint consultation at this plant, the booklet states, "is an outstanding industrial relations 'success story'. Labour-management co-operation on production and plant welfare has developed to a high level. Results of very tangible benefit to production are now commonplace under the plan."

Employees at the plant, who number about 1,000, have been organized since 1937 in two AFL unions, the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 338, and the International Brotherhood of Paper Makers, Local 212.

The present agreement, which provides for a union shop, states that its general purpose is in the mutual interest of the employer and employee to provide for the operation of the plant of the Company under methods which will further to the fullest extent, the safety and welfare of the employees and economy of operations, quality and quantity of output, cleanliness of plant and protection of property. It is recognized by this agreement to be the duty of the company and the employee members of the signatory unions to co-operate fully, individually and collectively, for the advancement of said conditions.

The level of enthusiasm and interest in co-operation among the employees at Howard Smith is reported in the booklet to be the fruit of forward thinking on the part of the union leaders and the fair-minded attitude of the resident manager. Collective bargaining relationships and grievance procedures "provide an essential background to the machinery developed for co-operation."

Among the joint committees established in the plant and described in the booklet are the Mutual Interest Board, which discusses educa-

tion, apprenticeship, sports, health, welfare, working conditions, efficiency, and other problems of common interest; the Labour-Management Production Committee, through which workers contribute to plant efficiency by participating in the solution of production problems; the Mill Safety and Accident Prevention Committee, which has enabled the plant to achieve a fine record in accident control; the Safety Box Committee; Job Analysis Co-operation; and the Cafeteria Committee.

**Industrial
reconversion
in selected
industries**

Technical reconversion of Canadian industry from war to peace-time production reached the three-quarter mark during August, a report tabled by the Rt.

Hon. C. D. Howe in the House of Commons, revealed. Prepared by the Economic Research Branch of the Department of Reconstruction and Supply on the basis of a survey conducted in March, 1946, in 643 major plants formerly engaged in war production, it further indicated that, "by the end of the present year reconversion is expected to be about 90 per cent completed and fully accomplished by the spring of 1947."

About half of the plants surveyed indicated that they were embarking on programs of modernization and expansion of their productive facilities. Of these about three-fifths have already completed their plans or expect to do so by the end of the year. A majority of the remainder expect completion in 1947.

The report states that, "in spite of the magnitude of the man-power shift in the first postwar year, that is between June 1, 1945 and June 1, 1946, when approximately 620,000 servicemen had been discharged and 720,000 persons released from war work, the number of unemployed was kept surprisingly low. It never reached more than about 270,000 out of a total working force of close to 4.8 million.

"Three-fifths of the plants that were engaged in reconversion activities were being retarded by various shortages, the most important of these being delays in securing machinery and other equipment. The estimates are subject to correction in the light of development of labour-management relations. Extensive strikes, such as the steel strike, may cause further considerable delays not accounted for in the estimates given.

"The degree to which reconversion was required was greatest among plants formerly engaged in war production but now turning to the production of automobiles, electrical apparatus, boilers and heating equipment, radio and domestic appliances.

"Three-fifths of the total expected increase in employment resulting from the completion

of reconversion, modernization and expansion, was accounted for by the consumers' goods industries.

"Due to the relative importance of the primary textile and clothing industry in that province, the expected increase in employment was highest in Quebec. The expected increase in Ontario was just equal to the over-all average and it was relatively low in the other regions."

The report warns that the findings cannot be regarded as completely representative of the manufacturing industry as a whole unit, but because of a much higher concentration in the producers' goods industry, should be considered as a representative sample for a number of important industries.

Canada's manufacturing industries in 1944

Gross output of manufactured products in Canada during 1944 was valued at \$9,073,692,519 an increase of \$340,831,520 or 3.9 per cent over the 1943 value, according to an advance report on the manufacturing industries of Canada in 1944 by the Dominion Bureau of Statistics.

This increase in value was not due to an increase in the physical volume of production, the report states, but to a rise in the selling value of the products made. The physical volume was actually lower than in 1943, the decline being reflected in a drop of 18,186 or 1.5 per cent in the number of persons employed. Salary and wage payments, however, increased by \$42,328,986 or 2.1 per cent.

Continued expansion of aircraft production resulted in the aircraft industry being the greatest employer of labour in 1944 with 79,572 persons on its payrolls, an increase of 10,043 over 1943. It displaced the shipbuilding industry from the premier position in this respect.

Other industries engaged in war production operated at lower levels during 1944, chief among these being the miscellaneous iron and its products industry with a drop of 11,604 employees, miscellaneous chemical products with 10,991 less, shipbuilding with 8,771 and brass and copper products with 4,266 fewer.

On the other hand, the food-producing industries were more active in 1944. The slaughtering and meat packing industry reported an increase of 5,092 workers, fruit and vegetable preparations 3,474, and miscellaneous foods 1,093. The output of the rubber goods industry, which includes the production of synthetic rubber, also expanded, the number of employees increasing by 5,508.

Manufacturing establishments reporting in 1944 numbered 28,483 and the number of persons employed totalled 1,222,882, of whom 192,558 were classed as salaried employees and

1,030,324 as wage-earners. Male employees declined by 20,040 and female employees were 1,854 higher, the proportion of women workers being 287 out of every 1,000 workers.

Ontario with 38 per cent of the total number of establishments reporting produced over 45 per cent of the entire manufactured output in 1944. Quebec ranked second with 32 per cent and British Columbia third with seven per cent.

Health and death benefit scheme for garment workers

Adoption of a health insurance and death benefit scheme by the Garment Manufacturers Association of Western Canada and the Amalgamated Clothing Workers of America, Local 495 (TLC) was reported recently. The scheme's adoption resulted from a joint committee's unanimous recommendation that this welfare plan be set up for workers in the men's clothing industry in Winnipeg.

It provides for death benefits of \$500, effective from October 1, 1946, and the establishment of a health insurance fund financed by a one per cent gross weekly payroll deduction by the employer and an equal one per cent of weekly pay contribution by union employees. The fund is to be controlled by a Board of Trustees under agreement made with a Winnipeg Trust Company to which the money will be paid. Deductions, contributions, and benefits are to be audited and financial statements distributed annually.

Benefit payments under the insurance provision are not to commence until January 1, 1947, although the first contributions were made on July 1, 1946, in order to establish a fund.

Labour legislation enacted by Parliament in 1946

Elsewhere in this issue (p. 1271) appears a summary of labour legislation enacted by the Parliament of Canada during 1946. The legislation had to do with workmen's compensation for merchant seamen, unemployment insurance, reinstatement in employment, family allowances, housing, and the taxation of co-operatives.

Discharged veterans urged to contact old employers

"The re-absorption of veterans into employment would be much assisted if certain veterans who have never communicated with their pre-enlistment employers would now do so," Hon. Humphrey Mitchell, Minister of Labour, said in a statement issued at the end of August.

The Labour Minister explained that several employers are still holding positions for veterans who left their employ to enlist. No doubt many of these veterans were discharged some time ago, and their period for seeking reinstatement in their pre-service jobs has already expired, but as their employers do not know that the veterans have been discharged, and that they are actually no longer eligible for reinstatement, the employer is still carrying the vacancy thinking that the man may show up at a later date. In most of these cases the veterans are re-established elsewhere. "It would clear some vacancies in employment for other veterans if any dischargee in this category would now inform his pre-enlistment employer that he will not be seeking reinstatement", Hon. Mr. Mitchell said.

The Minister pointed out further that many veterans discharged in recent months are still eligible for reinstatement, and several undoubtedly will be returning to their employers a little later on. "It would assist in stabilizing the employment market if these veterans, still eligible to be reinstated, would let their employer know of their intention to return just as soon as they have made up their minds to do so—even if for any reason they still do not actually go back to work for some days."

The Minister pointed out that in the Reinstatement in Civil Employment Act, a veteran discharged in Canada may apply for reinstatement within three months of his discharge, or if discharged overseas, within four months of the time of discharge from the Forces, or from hospitalization immediately following service. In certain cases, where a period of convalescence is required after discharge, there is provision for a six-months' extension to the regular period allowed to a veteran before he reports for his old job, but the veteran should see the National Employment Service, which administers the Act, before he assumes that he is entitled to an extension. The Act covers only persons who were with the employer steadily for three months at least, immediately before enlistment.

The efforts of Canadian employers to provide suitable civilian opportunities for personnel who have returned to their former jobs were praised by the Minister. Many Canadian firms, he said, had adopted detailed programs to facilitate the re-employment of their ex-service personnel. Many of these programs went so far as to set aside jobs for former employees while still in uniform, and this is why it is an assistance in the employment market where a discharged person is no longer eligible for reinstatement to now contact his pre-enlistment employer to make

clear exactly what his present status is, assuming that he has not done so already.

"The purpose of the present appeal", the Minister said, "is to help out the employer who is doing his very best to comply with the Reinstatement in Civil Employment Act. At the same time certain employment vacancies which would be available for other veterans will be cleared once the employer knows where he stands in relation to ex-employees now out of the Armed Services, for whom he is obligated by law to provide jobs, in accordance with the terms of the Act. In the case of those still eligible, who are going to return, the employer will be further assisted by making the necessary provision in their case," Hon. Mr. Mitchell concluded.

**Recognition
of coal mine
foremen in
United States**

A United States District Court of Appeals has rejected a petition by employers in the coal mine industry to prevent the operation of a collective agreement between the U.S. Government and the United Mine Workers covering foremen in the mines. (L.G., July, 1946, p. 867). The Government has been operating the mines since the termination of a strike last May. The agreement has been approved by President Truman and the National Wage Stabilization Board.

A further development in the issue of foremen's recognition came about when the United States Circuit Court of Appeals in Cincinnati ordered the Packard Motor Car Company, Detroit, to obey a ruling of the National Labour Relations Board to bargain collectively with the independent Foremen's Association of America (L.G., April, 1946, p. 439).

The Packard management was alleged to have been dealing with the organization without officially recognizing it.

**Efforts to
force
recognition
of uncertified
union held
illegal in U.S.**

A strike by employees to compel an employer's recognition of their union despite previous certification of a rival union was recently declared illegal by the United States National Labour Relations Board.

The striking employees were discharged after ignoring the employer's offer of reinstatement if they called off the strike. The Board ordered reinstatement without back pay on the grounds that the employer's offer and the subsequent discharge was a discriminatory action. The board majority conveyed the idea that had discrimination not been in evidence the employer would have been legally justi-

fied in dismissing the employees attempting to compel him to disregard another union's certification. The decision represents the first penalization in the United States of discharged employees for efforts to compel violation of a previous certification.

Employer interference in election ruled unfair labour practice in U.S.

The United States National Labour Relations Board in a majority decision recently ruled that an employer who compelled his employees to assemble and listen to an anti-union speech shortly preceding a collective bargaining election committed an unfair labour practice under the Wagner Act.

The Board majority found that the action of the company, in compelling its employees to listen to a speech of the company president, during which time all plant operation was suspended, did not represent merely an attempt to express the employer's view but was designed "to achieve a restraining and coercive effect upon its employees' free expression of their organizational will", and was "an aggressive campaign against the CIO."

The Board's decision directed the company to cease and desist from: engaging in surveillance; enforcing the rule prohibiting union solicitation on the employees' own time; compelling its employees to listen to speeches relating to self-organization; and interfering with its employees in the exercise of the right to self-organization. Furthermore, the company was directed to mail to each of its employees a copy of a notice which embodied the Board's order.

Involved in the case were the UAW-CIO and the Employees Association Inc. of Clark Bros. Co., Olean, New York, an affiliate of the Confederated Union of America.

UAW Health Institute in Detroit

The United Automobile Workers (CIO) recently reported on the operation of their Detroit Health Institute for the first six months of the present year. During the period the institute recorded diagnostic examinations for more than 3,400 persons; health and safety education classes, attended by 1,600; and interviews given to nearly 900 workers suffering from emotional upsets. The institute services locals in Detroit and its surrounding areas. It is financed through a tax of 1½ cents per month per member for locals in the city with a reduction in the rate to outside locals proportionate to their distance from the institute. A registration fee of \$2 per year is required from each member.

The institute gives diagnosis only and makes its records available to the person's family

physician. Where the ailment is found to be caused by an emotional rather than physical condition the case is referred to a practising psychiatrist.

Assistance is derived from nearby universities and the United States Public Health Service. The institute receives financial aid from Detroit's community chest.

The union stated that its institute had made "effective strides towards the general health improvement of its members."

Professors study GM industrial relations

The General Motors Corporation in the United States has been host to a selected group of university professors in sociology, labour relations and related fields,¹ invited to study the company's industrial relations set-up and then give the management their opinions on its policies. Each of the men spent a week inspecting individual GM plants. They were first briefed for a day by company officials on the management's approach to industrial relations problems, then assigned to a plant where plant officials answered all their questions and gave them all possible assistance. After the field work the professors met to compare notes and report their findings and recommendations. The company inaugurated the plan in 1945 and has already announced a similar program for 1947.

Prohibition of strikes in Japan

In a measure designed to curb labour unrest in Japan, General Douglas MacArthur, Supreme Commander for the Allied powers, informed the Japanese Government on August 29 that "strikes, walkouts or other work stoppages which are inimical to the objectives of the military occupation are prohibited".

In particular General MacArthur's order was aimed at threatened strikes of seamen and of government railroad employees, according to the New York *Times*. Objectives of the seamen's union were revised pay rates and limitation of the employers' right of discharge, while railroad workers sought a seven-hour day and the hiring of 30,000 additional workers. The demands are said to be under discussion.

The right of Japanese labour to organize and bargain collectively had been established by an Allied order early in the occupation. In a recent report on the first year of occupation, General MacArthur included the statement that the Japanese citizen now "enjoys the untrammelled right, individually or collectively with his fellow workers, to demand correction of unjust labour practices and conditions".

Department of Labour in Post-War Period

Statement by Minister of Labour Outlines Work of Department

IN presenting the estimates of the Department of Labour in Committee of Supply in the House of Commons on August 30, the Hon. Humphrey Mitchell, Minister of Labour, made the following statement regarding the work of the Department in the post-war period.

Quite largely the estimates of the Department of Labour which are now before the Committee illustrate the problems which we had to face once World War II ended—the training and re-employment of men and women demobilized from the Armed Forces and replacement of many thousands released by munitions plants. We have, too, the still important duty of doing our utmost to meet the labour demands for agriculture—a question of real emergency in view of the grave shortage of food in Europe as well as in Asia.

Reconversion and Rehabilitation

In spite of difficulties, I believe it may be stated that we are moving along very well benefited by the stabilization policy which was introduced the latter part of 1941. The first phase of our national industrial reconversion was passed in January last when all but one-sixth of war work in progress at V-J Day had been terminated. A total of 370,000 persons who had been employed in war plants were laid off after V-J Day and sixty per cent of these were immediately or almost immediately re-engaged for the production of civilian goods in the same plants. There were in all 860,000 persons employed in direct war work at the peak period October 1943. Up to June 30 of this year there had been 883,006 discharged from the Armed Forces.

Through the Veterans' Placement Division of the Employment Service positions were secured for 284,000 ex-servicemen and women during the twelve months ending March 31 last. From April 1 to August 1 there were placed an additional 103,000 ex-service personnel. A considerable number of those released from munitions plants were married women and they did not all become an employment problem because of a preference to devote all their time to home-keeping. In a measure that has been true of some women discharged from the Armed Forces. Many had been married or were married after release and they, too, were not interested in work outside their homes. Under the style "Home Aid

Plan" our Employment Offices are making a special effort to place women and girls in household work provided, however, that pay and conditions of work are fair.

The peak of unemployment was reached in April last when we had 267,000 unplaced applicants, men and women, registered at our National Employment Service offices across Canada. This total included 72,000 former service personnel discharged during March. On August 15, we had 149,000 unplaced persons listed comprising 116,000 men and 33,000 women. It is of interest to note that on the same date there were 68,000 vacancies for males and 44,000 vacancies for females. We have, of course, been doing our utmost to find positions for veterans and former war plant workers. Naturally we are keenly desirous of doing everything in our power for those who served overseas not forgetting those who did such a fine job on the home front during the years of war.

There are regional supervisors of veterans' placement in Moncton, Montreal, Toronto, Winnipeg and Vancouver. Each local office has what is known as an armed forces registration unit to look after veterans in the first instance. Then at all rehabilitation centres maintained by the Department of Veterans Affairs—the Department of Labour has veterans' employment advisers who are doing good work. Where no such centres exist the advisers are stationed in the local employment offices. There is also a special placements division in the Department of Labour giving attention to physically handicapped persons. Some of these are referred for training through the Department's facilities.

In the year ending March 31,—this is important—jobs were found for the handicapped at the rate of 1,250 a month, 25 per cent of them veterans.

I think this is a forward advance in the placement facilities of the Employment Service for the placement of handicapped persons under our jurisdiction.

Twenty-two men and two women with double amputations were satisfactorily placed in positions. The training work of the Department is getting preferential consideration because of the importance of adequately fitting men and women for new types of peace-time work and also to meet a shortage of skilled workers in different vocations.

Training

With regard to veterans, a total of over 76,000 have been enrolled for training up to August 1 of this year with 38,000 undergoing training on that date—and approximately 5,000 others awaiting entry to training. We had 4,000 being trained in schools for the construction and building industries, and in addition more than 3,500 others working as apprentices. Over 10,000 other veterans were being trained for other occupations on the job in industry, that is besides those who have actually been employed in industry. The government subsidizes rates of pay during such training.

Rehabilitation of veterans training is carried on in co-operation with the provinces—the dominion bearing the operating costs. There are centres across Canada to meet area needs and every type of training desired is provided when it is believed that those so trained may speedily be absorbed in the employment stream. Recently I visited the centre at Brockville and I was much impressed by the eagerness of the students and the enthusiasm and ability of the instructors. Another phase of our work is the training of civilian workers released from gainful employment under joint Dominion-provincial plans. Usually such trainees are referred to the centres by the employment offices of the department. Agreements covering this training are in effect with the Provinces of Nova Scotia, Saskatchewan, Alberta and British Columbia. Supplementary to this is the vocational guidance which our employment offices give to young persons seeking their first jobs.

Agreements have been made with all the provinces for vocational education on the secondary school level. The Dominion Government pays \$10,000 a year to each province plus a proportion of \$1,915,000 distributed on the basis of the population 15 to 19 years of age. The latter amount is matched by the provinces. Additionally there is a Dominion grant of \$10,000,000 for capital expenditures, 25 per cent for equipment, to be matched dollar for dollar by the provinces and used by the end of March, 1948.

There are several factors to be considered in connection with employment after a war. We have the large number who were trained for war jobs whose skills are not in general demand for peace-time production. They must readjust themselves to the new work. High war-time earnings in comparison with normal peace-time rates of pay and the indisposition of persons to move from communities in which they have settled to other places where work is available, are other factors. It should be

noted that upward adjustments of pay to compensate for changes in war-time "take-home pay" and reduced weekly hours of work have been put into effect in recent months by a number of industries following approval of War Labour Boards. Re-tooling and re-organization of industry was well advanced up to a few months ago but has lagged because of industrial troubles.

Our latest figures show there were 87,000 working in all branches of mining. Of the number, 26,000 were employed in coal mines where more skilled men could be used now. The base metal mines had 27,000 on their payrolls and the gold mines 22,000 men, a gain of forty per cent since the end of the war. It is expected gold mining will be giving employment to 30,000 men by next autumn and that in mining generally there will be 100,000 working. I would like to see a movement to the mining sections of Canada of persons in centres where there cannot be enough employment to take care of all.

Most of the prisoners of war whose labour was most useful in Canada for several years have been returned to the British Isles. We had thousands of these men engaged in woods operations, largely pulp for paper making. Last winter ten per cent more men were employed in woods operations than the winter before. There is work for more men in this field now but a disinclination to take these jobs is apparent.

The war taught men and women new skills, more self-reliance and self-confidence. It is safe to forecast that new types of manufacture and thus new employment opportunities will come as time goes by.

Farm Labour Program

To maintain the highest possible production of food to assist in relieving the famine areas of the world farm labour agreements again are in effect with the provinces.

In February the Department of Labour sent a letter to farmers urging them to submit their help requirements to the employment offices.

Wages and conditions are more attractive in farming now. There is new and better equipment. Every possible effort is being made to encourage idle industrial workers to take farm jobs.

There will be organized movements of labour for farm work from west to east and east to west. Already the movement to the eastern provinces is under way. An arrangement, previously in effect, is for exchange of workers and equipment with the United States for the harvesters of grain, potatoes and tobacco.

As already announced we are bringing 4,000 farmer Polish soldiers to Canada to work on farms.

Appreciating the importance of the sugar beet industry we were able to retain about 4,000 prisoners of war for this type of work until harvests are over. They are distributed in Ontario, Manitoba and Alberta.

Placements

Referring again to our Employment Service I would like to mention that in Moncton, Montreal, Toronto, Winnipeg and Vancouver we have branches to assist in the placement of persons with executive and professional abilities.

We have found positions for 4,599 in the past year. A considerable number were ex-service personnel.

Under the Reinstatement in Civil Employment Act, between August 1, 1945, and June 29, 1946, or a period of eleven months, 151,000 discharged from the Armed Forces had been reinstated by their former employers. A total of 46,000 eligible did not apply for reinstatement.

The Wartime Bureau of Technical Personnel continues to function as a branch of the Department and the staff is rendering fine service in assisting technicians to find good positions as well as in advising firms of men and women available.

We still have the labour exit permit order in force but mainly it is to control the movement from Canada of these technicians as well as graduate nurses. There are shortages in these fields. Some hospitals, in fact, are much understaffed.

National Selective Service largely is a thing of the past. Remaining regulations require an employer to register a vacancy with local employment offices and to report when an employee has been hired, and the seven days' notice rule for employer and employee. The purpose of this is to have an up-to-date picture of the employment situation.

Wage Control

The Government's price, salary and wage stabilization policy remains effective although modified and subject to further gradual changes. We are anxious to abandon controls as soon as feasible but not until the danger of ruinous inflation is past.

Amendments to P.C. 9384, the Wartime Wages Control Order, now make it possible for the National and Regional War Labour Boards to approve applications for wage increases which are shown as "just and reasonable."

Wage control began on November 15, 1941. To the end of March this year the boards had dealt with 123,500 applications. Eighty-four per cent were granted in full, 10 per cent in part; only 7 per cent denied.

The wage rate index was 137.5 in 1944, compared with the basic figure of 100 for 1939. It was 140.3 in 1945, according to preliminary figures.

Industrial Disputes

The industrial condition as affecting labour has not been good in the past seven months. In 1945, while the number of strikes did not increase over 1944, the number of workers involved did. There were 197 strikes and lock-outs. The majority were settled by conciliation within a few days. Fifty-eight lasted one day, 152 less than five days.

The strike of the Ford Motor Company employees at Windsor involved 10,000 workers and was the most serious in several years.

It lasted from September 12 to December 29, 1945, resulting in 900,000 man-days time loss and more than one million days if the sympathy strike which occurred in Windsor affecting other firms is included.

A total of 150,000 man-days were lost by a strike of coal miners in Alberta and British Columbia.

During the first seven months of the present year we have had 145 strikes involving a time loss of 2,544,581 man-days, of which the most serious were those affecting the British Columbia logging, great lakes shipping, and the rubber industries.

I must say, having in mind the strike of loggers in British Columbia, seamen engaged in great lakes shipping, rubber workers, steel workers and others, that all could have been avoided by the proper use of the existing conciliation and wage control machinery.

An uncompromising attitude on both sides has been responsible for many serious labour troubles leading to unnecessary loss of business to employers and wages to workers.

The Wartime Labour Relations Regulations provided by P.C. 1003, were enacted early in 1944 in order to stabilize industrial conditions. We did not know how long the war would last then.

I shall be having another meeting with the Ministers of Labour of the provinces to discuss future labour relations. Some provinces want a national code; others do not.

As members know, with certain exceptions, labour relations normally come under provincial jurisdiction.

Under the Industrial Production Co-operation Board there are 477 labour management production committees. The plants covered have more than 245,000 workers.

Conscientious Objectors

As of May 1, we had 10,867 men who were exempt from military service on conscientious grounds. Sixty-five per cent were employed in agriculture and on June 27 this year there were seventy-three in four alternative service work camps.

These conscientious objectors contributed more than \$2,300,000 to Canadian Red Cross under arrangements by which part of their earnings were earmarked for Red Cross work.

Japanese

Our Japanese administration work comes under two main headings—repatriation and relocation.

With respect to repatriation, the records show that 6,892 adults voluntarily signed requests for repatriation covering a total of 10,632 persons; while 4,527 adults have requested cancellation of their applications for repatriation, covering also their 1,786 minor children.

I would like to review the situation with respect to compulsory repatriation.

After the Prime Minister on December 17 last explained in this House the purpose and scope of the three Orders in Council dated December 15, 1945, providing for deportation and repatriation of Japanese, strong representations were received not only asking for a review of the program but challenging the validity of the orders.

As a result, the Government in January, 1946, made a reference to the Supreme Court of Canada for an opinion as to whether the orders in council were ultra vires in whole or in part.

The Supreme Court upheld the validity of the orders except as they affected the dependents of deportable persons.

The judgment of the court was not unanimous. At present an appeal to the Privy Council from the Supreme Court ruling is being taken by a committee on behalf of the Japanese. The Government has accordingly considered it advisable to suspend deportation proceedings under the orders in the meantime, but is continuing arrangements for the repatriation of those who wish to go to Japan on a voluntary basis.

Including a sailing on August 2, 3,151 Japanese have left Canada for repatriation to Japan. Hundreds more have expressed a desire to go and they will be accommodated as soon as we can secure another vessel.

Now with respect to relocation, since the beginning of April more than 2,000 Japanese who desired to remain in Canada were moved east for resettlement and employment.

At present there are 21,100 Japanese in Canada, of whom a little less than fifty per cent remain in British Columbia, with the rest about equally divided between the prairies and eastern Canada.

All employable Japanese with a few exceptions are in useful employment on a self-supporting basis at prevailing wages.

It is hoped that relocation will be substantially accelerated by the evidence of increased desire on the part of the Japanese to co-operate, and the growing appreciation by the public of the wisdom of the Government's dispersal program.

An effort is being made to resettle as many as possible in smaller communities and rural areas where they will help to increase production of badly needed farm and forest products, and where the shortage of housing accommodation is not so serious.

Our proposals for this year summarized are:

(1) To repatriate to Japan as soon as possible all those desiring to go voluntarily;

(2) To disperse and resettle across Canada in 1946 those who have proven their firm desire to remain in Canada, by giving them every assistance and encouragement possible, including the progressive relaxation of wartime restrictions;

(3) To delay compulsory deportation until a decision has been handed down by the Privy Council on the appeal, at which time Government policy will be reviewed.

Annuities

The Annuities Act is administered by the Department of Labour. As of March 31, 1946, there were 151,000 active contracts including 450 group plans.

Total premium payments since the act became operative in 1908 amount to \$318,781,000. In the last fiscal year, 25,500 new contracts were recorded and these with previously existing contracts brought in \$46,900,000.

International Labour Organization

Canada, as one of the eight states of chief industrial importance, has a permanent seat on the Governing Body of the I.L.O. This body last met in Montreal in May.

Machinery has been set up for the appointment of international standing committees for seven major industries. This is to enable the I.L.O. to give closer attention to the problem of such industries than is possible at annual general conferences.

Each of these committees is composed of two representatives for the government, two

for the employers and two for the workers, from each of the countries interested in that particular industry.

In December last, Canada participated in meetings held in London of two of these industrial committees, those on coal mining and inland transport. In April and May we took part in meetings at Cleveland and Toledo, Ohio, of the committees on iron and steel production and the metal trades.

We shall be represented on the three remaining committees: the first two of which, the building, civil engineering and public works committee and the committee on textiles, will meet in Brussels in October and November next; and the petroleum production and refining committee, which will probably meet in Peru early next year.

Canada participated in a technical maritime meeting held in Copenhagen last November,

in preparation for the 28th Session of the International Labour Conference which met in Seattle from June 6 to 29 to consider the setting up of international minimum standards for the employment of seamen.

We sent a tripartite delegation to the Third Labour Conference of American States Members of the I.L.O. which was held in Mexico City last April.

In September Canada will be host to the 29th Session of the International Labour Conference, the first of such conferences ever to be held in this country.

I now ask that the following statistical statements be reproduced in *Hansard*:

(1) Cases submitted to the National and Regional War Labour Boards.

(2) Decisions rendered by the National and Regional War Labour Boards.

(3) Wage trends.

NATIONAL WAR LABOUR BOARD

Types of Applications received by the National and Regional War Labour Boards under P.C. 8253, P.C. 5963, P.C. 9384 and P.C. 348—from November 15, 1941, to April 30, 1946

WAGE TRENDS

Total Salaries and Wages, Index Numbers of Employment and Index Numbers of Wage Rates in Canada
for the period 1938-1945

	Salaries and wages ¹	Index Numbers	
		Employment ¹ 1926=100	Wage rates ² 1939=109
	\$		
1938.....	2,449,000,000	111.8	99.6
1939.....	2,540,000,000	113.9	100.0
1940.....	2,870,000,000	124.2	103.9
1941.....	3,530,000,000	152.3	113.1
1942.....	4,233,000,000	173.7	122.5
1943.....	4,790,000,000	184.1	132.8
1944.....	4,983,000,000	183.0	137.5
1945.....	5,007,000,000	175.1	140.3*

* Preliminary figure.

¹ From Dominion Bureau of Statistics. The wage and salary figures do not include payments to the armed forces.

² From Department of Labour. The figures include cost of living payments.

NOTE: The index numbers of wage rates apply to wage rates only, not salaries.

The changes shown by the index numbers of wage rates are not necessarily reflected in the total wages and salaries earned as total earnings are affected also by the changes in the size of the working force (employment index) and by the shift from "short time" in depression years to "overtime" in boom years.

Annual Conference of Canadian Institute on Public Affairs

“ONE year after”, was the general theme of the fifteenth Annual Conference of the Canadian Institute on Public Affairs, held at Geneva Park, Lake Couchiching, August 17-24, 1946. The program was designed to appraise some of the national and international trends in human relationships one year after hostilities ended in the second World War.

Acknowledged authorities presented expositions of such Canadian problems as “Dominion-Provincial relations”; “Canada’s responsibilities in connection with the world food supply”; “national unity”; “municipal government”; “immigration and refugees”; “civil liberties”; “penal reform”; “labour-management relations”; “housing”; and “Canadian music, art and literature”. In like manner, analyses were given of several international issues, as “world security”; “the United Nations’ organization”; “China’s international relations”; “trusteeship and accountability for colonies” and “the evolution of self-government in India”.

The daily round table sessions were led by Mr. J. King Gordon, Managing Editor of *The Nation*, New York; Dr. B. A. Liu of the Chinese Information Office in Canada; Dr. Ralph J. Bunche, Director, Division of Trusteeship, United Nations; Dr. W. R. Dymond of the University of Toronto; and Dr. Martyn Estall, of Queen’s University. Some 300 persons registered for all, or a portion of the Conference. In the main, they came from centres throughout Ontario, with a few from Quebec, the Maritimes and some of the northern United States. The general chairman was Dr. M. W. Wallace, former principal, University College, Toronto.

Interprovincial Relations

Beginning with the discussions of “the Fathers” prior to the confederation of the Canadian provinces, in 1867, Mr. Wilfred Eggleston, Ottawa Editor of *Saturday Night*, presented an historical sketch of Dominion-Provincial relations. He pointed out that the Fathers of Confederation planned a strong federal union and that there “is no historical validity for the ‘compact theory’ of Confederation”, that is, a loose union of sovereign states. To that end, the Fathers devised a financial settlement that they considered to be in keeping with such a federal union, with “the major (financial) load on the central government”.

However, “Canada became a looser federation” than had been intended at the outset, “partly due to Privy Council decisions, partly due to economic, geographical and political factors”, Mr. Eggleston asserted. As a result, the financial settlement between the Dominion and the provinces at Confederation became inadequate and “finally and permanently broke down during the 1930’s”, when the provinces and municipalities were spending perhaps three times as much as the Dominion. For example, expenditure on public welfare increased practically one hundredfold between 1867 and 1930. Originally too, the Dominion had provided for transportation by subsidizing railways, but with the advent of motor transport the provinces had to spend large sums on motor roads. Meantime the Dominion in 1917 had entered the direct taxation field, which had hitherto been a provincial prerogative and during the second world war the precedent of 1917 had been extended.

The Rowell-Sirois Commission had, in its report in 1938, “offered a feasible solution for provincial solvency and went some way toward offering to restore the original conception of the Fathers”, the speaker contended. The stress and strain of the war made necessary centralized fiscal arrangements and caused a postponement of any re-adjustment. While there are strong reasons against undue centralization, Mr. Eggleston held that “if Canada is to deal effectively with her post-war problems, domestic and international, we can’t go back to the paralysis, frustration and drift of the 1930’s”. Further, “we must find a way to reconcile regional and provincial autonomy with the maintenance of an effective nation, not by moving toward a unitary state, but by restoring the strong federal union visualized by the Fathers of Confederation”.

World Food Situation

A “general appraisal” of the world food situation was presented by Mr. George Patterson, Commercial attaché, Canadian Embassy, Washington, while “Canada’s responsibilities and program” with respect to the problem were outlined by Mr. Kenneth W. Taylor, formerly, Co-ordinator, Foods Administration, Ottawa.

Mr. Patterson asserted that in the considered judgment of the World Food and Agriculture Organization (FAO), “a critical

world shortage of the major items of consumption will continue at least until the 1947 crops are harvested". He continued: "Food production in continental Europe, excluding the USSR, will be about 90 per cent of pre-war, in terms of calories. Rice production in the Far East will be below pre-war levels". Moreover, world reserve food stocks had been largely depleted to meet the urgent needs of war-devastated lands following the close of hostilities. Mr. Patterson described the allocation of food products during the war, when the most efficient use of available supplies were of prime importance. Allotments were made to European neutrals under rigid controls. This involved also, efficient utilization of both land and water transport. With the advent of European liberation, the needs of the liberated countries were taken into account. Food was at first distributed by the military authorities under a civil affairs program. Restoration of civil administration in France, Holland, Belgium, Norway and Denmark, which had retained some of their resources, soon enabled them to become measurably self-sufficient as far as food was concerned. For the other war-stricken countries UNRRA had assumed temporary responsibility. Complex financial transportation and organizational problems had been encountered and in a large degree overcome. But the long-term job, Mr. Patterson said, will be directed by FAO.

"Canada's wartime food policy and program may be stated in brief as the maximum achievement of a balanced program of production, a program developed with due regard for our own special requirements, for the most urgent needs of the Allies, and, at a later stage, directed more particularly towards building the foundations of a lasting peace", Mr. Taylor stated. The emphasis changed with circumstances, but was always integrated with the war effort, he continued. "The size of the Armed Forces, the production of war material and the production of food, all were factors to be considered" and in the opinion of the speaker, "Canada probably came as close as any country and closer than most, to achieving a total war effort. . . ."

Mr. Taylor paid tribute to Canadian public servants, notably, the Hon. L. B. Pearson, Canadian Ambassador to the United States, Dr. G. S. Barton, Deputy Minister of Agriculture and Dr. D. B. Finn, Deputy Minister of Fisheries, for work in formulating international food policies. In the matter of food production during the war years, he pointed out that "75 or 80 per cent of the pre-war farm labour force (in Canada) has delivered 140 per cent of the pre-war production, which

is not far short of a doubling of the per capita output of our farmers." He attributed the success that had been achieved to three main factors: "(1) Careful thought and planning of the program as a whole, from the Combined Food Board right through to the country and local committees; (2) fine co-operation and team-work without regard to political or other differences; (3) . . . plain hard work, long hours—winter and summer, hours of extra chores in the early dawn and late in the evening—by a million farmers and their wives from coast to coast."

National Unity

Following an established custom at its annual conferences, the Institute gave consideration to the question of Canadian Unity, which was the subject of an address by Hon. Adelard Godbout, former premier of Quebec. He renewed the plea for better understanding between English and French Canadians and urged all Canadians to become familiar with both languages. He held that narrow provincialism should be discouraged wherever and whenever it discloses itself. He asserted, however, that French Canadians must retain their constitutional rights and claimed that they were not opposed to Commonwealth ties. "If there came a vote between connection with France and England", he said, "I believe the French Canadians would not support a change".

Mr. Godbout suggested that "it might be a good thing to hold Dominion-provincial conferences every ten or twenty years" to consider any constitutional changes that actual experience showed were necessary, or, at all events, were of sufficient importance to warrant consultation between the Dominion and the provinces with a view to possible improvement.

Labour-Management Relations

In outlining the course of studies on "the impact of World War II on labour-management relations", Professor W. R. Dymond, of the University of Toronto, first of all emphasized the point that the full-employment that was characteristic of the wartime economy "induced basic shifts of policy on the part of employers, trade unions and governments."

Following the long period of labour surplus that occurred during the 1930's, employers developed and extended personnel techniques to cope with conditions resulting from extreme labour scarcity. The labour unions on their part greatly extended their membership and, in turn their influence in collective

bargaining, thus materially improving wages and working conditions. It was soon recognized by governments, he observed, that if the nation's manpower was to be effectively mobilized for the war effort, not only was appropriate labour legislation required, but wage controls and the adoption of the principle of selective service were prime essentials.

Assuming for purposes of discussion, that post-war employment would be maintained at a fairly high level, Professor Dymond was of the opinion that employers will be inclined to perfect and extend many of their wartime personnel techniques "as a weapon in the competitive struggle to reduce labour costs". Trade unions on their part "will seek to maintain their wartime organizational gains and advance the economic welfare of their members". He predicted that "governments will have to maintain a considerable degree of intervention in the determination of employer-employee relations, because of the political power of organized labour and the adverse effect of industry-wide strikes on the consuming public."

Professor Dymond contrasted conditions in Great Britain with those in the United States. In the former "a highly developed and long maturing machinery of industry-wide councils and collective bargaining procedure has promoted a peaceful determination of employer-employee relationships". In the United States, on the other hand, it was pointed out that the emphasis was largely on a return to "free competition and a minimum of government control." The recent strikes in major industries, not only showed the growth and power of organized labour, but had forced the government to intervene in disputes where collective bargaining and conciliation procedures had broken down. He claimed that "price and wage controls have been so weakened in the United States that a rapidly developing inflation is likely to have profound effects on the future course of labour-management relations".

As a means of reconciling divergent interests in industrial relations, Professor Dymond suggested "labour-management co-operation and improved techniques of collective bargaining". It is, he said, "equally the responsibility of management and unions to extend and perfect these techniques in the post-war period. . . . A full employment society and industrial peace are indivisible". Governments, on their part must create "a sound legislative framework within which employer-employee relationships can be determined without industrial conflict." This requires provision for "orderly collective bargaining and the introduction by law of adequate minimum labour standards,

and the provision of educational services for unions and managements in the principles of sound industrial relations", Professor Dymond concluded.

Refugee Problem and Immigration

Mr. R. G. Riddell of the Department of External Affairs, Ottawa, and a Canadian representative on the International Commission that studied the refugee problem, asserted that the solution rests a good deal with public opinion. "It is one case where the government can't lead as effectively as public opinion", he claimed. As a result, the development of an informed public opinion is important and desirable. "A typical bureaucrat", Mr. Riddell pointed out, "never saw a displaced person . . . one of the most tragic creatures thrown up by modern war."

The refugees created by the war are "masses of people—not individuals". It is an "international responsibility, not only to find new homes for them but to provide at least some of the rights granted ordinary citizens", Mr. Riddell said.

The principles agreed upon by the Assembly of the United Nations in January, 1946 were: (1) international responsibility for war refugees; (2) no refugee against whom a specific criminal charge had not been laid should be compelled to return to his place of origin. Having adopted these principles, the Assembly then referred the problem to the Economic and Social Council. The latter set up a special committee to deal with refugees and displaced persons. This committee made up of representatives of 20 nations, of which Canada is one, met in London in April and made an appraisal of the problem. "In terms of numbers we may start with an estimated total of three million, one-half of them in the Far East, and the remainder in Europe and the Mediterranean area". Of these, the speaker explained, about 700,000 were pre-war refugees—German Jews and Social Democrats, Spanish Republicans and "Nansen" refugees who were already the charge of other organizations. "This leaves a balance of 800,000 people who make up the new European refugee problem".

Mr. Riddell pointed out that the political and financial phases of the problem were more complicated than the statistical and attempts to clarify some of these will be made by the U.N. General Assembly in September. He pointed out that "Canada has given full support to the organizations which are already caring for refugees. It is one of the few countries, apart from the United States and Great Britain, that has

made a financial contribution of material size to the operations of the Inter-governmental Committee on Refugees. . . . A nation which advocates international action . . . is by implication, itself willing to accept responsibilities and Canada must consider the question of its own contribution. . . ."

"Between 1939 and 1945", Mr. Riddell stated, "about 3,500 persons (classed as refugees) were admitted to Canada with non-permanent status". Since the war, "two other measures have been taken: (1) adjustment of immigration regulations, and (2) the decision to admit 4,000 Poles". The speaker contended, however, that "Canada must consider a long-term immigration policy".

Liberty and the Authority of the State

In discussing the problem of civil liberties in Canada Mr. B. K. Sandwell enumerated "three different ways in which the ordinary liberties of the individual are reduced, without the courts being able to protect them . . ."

"The first, that of passing laws which are in themselves bad is the least common and the least dangerous of the three, because its evils are more readily apparent . . ."

"The second way by bad executive actions taken under powers which in themselves are reasonable and proper (especially if limited to periods of war) is almost impossible to guard against during the actual hostilities, when the executive must inevitably be clothed with powers, which if too closely restricted might be valueless for their proper purposes". Mr. Sandwell continued, "all that we can ask is that the instant all danger from actual (not potential) enemies is at an end, these powers shall be reduced to their lowest terms and as soon as possible withdrawn altogether, and while they are in operation, even in wartime, every use made of

them should be accompanied by the fullest and promptest publicity."

The third way in which ordinary liberties of the individual may be infringed upon, without protection from the courts, the speaker said, was "in bad procedures by authorities which lack the checks and responsibilities of a true court, but nevertheless exercise *quasi-judicial* functions".

Mr. Sandwell quoted extensively from John Stuart Mill's essay on *Liberty* to illustrate the origin and nature of the British conception of civil liberty. He held that the principles propounded by Mill were still applicable in Britain and urged Canadians to withstand any infringement of them.

Other Subjects on Agenda

Other speakers and their subjects included: Mr. J. King Gordon, Managing Editor, *The Nation*, New York, "Problems of World Security". Prof. Humphrey Carver, Research Associate, School of Social Work, University of Toronto, "Analysis of the Housing Problem in Canada". Dr. E. N. Van Kleffens, Netherlands representative on the U.N. Security Council, "The United Nations Organization". Dr. B. A. Liu, Director, Chinese Ministry of Information in Canada, "China's International Relations". Sir Frederick Puckle, British Embassy, Washington, "Evolution of Self-Government in India". Dr. Ralph J. Bunche, Director, Division of Trusteeship, UNO, "Trusteeship and Accountability—the Problem of Colonies". Prof. K. G. Crawford, Director, Institute of Local Government, Queen's University, "Problems of Municipal Government". Messrs. Jean Beaudet, Charles Comfort and W. A. Deacon, "The Creative Arts in Canada". Mr. J. A. Edmison, Executive Secretary, Prisoners' Rehabilitation Society, "Penal Reform".

Housing Program for 1947

MEASURES designed to improve the efficiency of existing housing legislation and ensure implementation of the Government's 1947 housing program through effective channelling of building materials into desired types of housing were recently introduced by Rt. Hon. C. D. Howe, Minister of Reconstruction and Supply.

He said that experience gained in administering the National Housing Act of 1944 (L.G. Dec., 1945 p. 1769) and, transfer of its administration from the Minister of Finance to the Central Housing and Mortgage Corporation prompted the presentation of a bill amending some of the legislation's loan provisions. The amending bill was given first reading in the House of Commons on July 22, and was subsequently passed.

The amendments were designed:

(1) to provide for changes in the administration of the existing housing legislation, consequent rewording of definitions and references throughout the Act;

(2) to provide for His Majesty to join with approved lending institutions in the making of loans for the construction of homes for home owners who have a leasehold interest only in the land upon which the home is to be built and to take security in such form as may be deemed necessary to protect the interest of His Majesty and the lending institution;

(3) to lengthen the period within which a joint loan to home owners may be repaid from twenty years to twenty-five years;

(4) to authorize Central Mortgage and Housing Corporation on behalf of His Majesty to enter into agreements with builders who will undertake to build a specified number of houses to be financed under the National Housing Act, 1944, and to offer each such house for sale first to veterans and then to others at a price not in excess of the selling price fixed in the agreement in consideration for the undertaking of Central Mortgage and Housing Corporation to purchase such houses from the builders within one year from their completion if they have not been sold;

(5) to authorize Central Mortgage and Housing Corporation to make direct loans in outlying areas to borrowers engaged in mining or lumbering, to assist them to provide low or moderate-cost housing for rent or sale to their employees and others in the area of the operations of the borrowers with a view to making possible increased employment in connection with the said operations;

(6) to authorize Central Mortgage and Housing Corporation to hold, operate and manage and lease on terms satisfactory to the Minister, real or personal property owned by His Majesty and made available to the corporation for such purpose, and to authorize the corporation to collect the revenues from such properties and to pay such revenues to the Minister, less expenses incurred in connection with such properties and less such com-

pensation to Central Mortgage and Housing Corporation as may be agreed upon by the Minister;

(7) to provide greater facility for the making of joint loans for the construction on farms.

Program for 1947

At a later date Mr. Howe declared that in order to obtain an objective of 80,000 new homes in the year ending March 31, 1948, the Government was "prepared to take drastic steps to ensure that the 1947 program is not curtailed by lack of materials."

"A large measure of success or failure of the 1947 program will depend upon our having an effective method of channelling building materials into housing of a desirable type, whether it is being built by Government or by private enterprise," he said. "Earnest consideration is now being given to this problem."

Immediate steps to ensure the success of the 1947 program were outlined by the Minister as follows:

1. The Central Mortgage and Housing Corporation, Crown-owned company set up to administer the National Housing Act and make loans for home building, is establishing an organization to look after the 1947 plan.

2. Incomplete 1946 construction is being kept continuously under review by the Corporation, and will receive its assistance to meet material shortages.

3. The Corporation will be talking to proper departments of provincial governments to secure their co-operation, as well as advice and assistance, in reviewing the needs of municipalities.

4. Within the next three months the Government will confer with some 120 municipalities on ways and means of assisting them in their housing problems.

5. Consideration will be given to the portion of the 1947 program which can be started in the Fall of 1946.

Referring to the recent consolidation of all branches of housing sponsored by the Government, Mr. Howe said the new organization is devoting its first energies toward ensuring the fulfilment of the Government's target of 60,000 housing units by March 31, 1947.

"I need hardly point out the seriousness of present strikes", he warned. "Already the construction of houses, and other forms of construction, has been slowed down by the steel and other strikes. If the present situation continues, construction of all kinds will virtually come to an end."

"Even under the best of conditions," continued the Minister, "with the very large number of houses which have been started in the year 1946, there is the likelihood of a large number of these houses being uncompleted at the end of November. Our first effort in any program or plan for 1947 construction must be to take every step to keep to an absolute minimum the carry-over into 1947 of incomplete houses."

The Minister outlined the second part of the program, the making and implementing of a plan for the 1947 construction year.

The 1947 plan is the first part of the five-year program of 480,000 housing units. Steps will be taken to determine optimum distribution of the first target—80,000 units—between metropolitan areas, other urban centres, and rural housing. In the metropolitan areas consideration is to be given to a desirable division between housing for rental and housing for sale. An appropriate division between houses built under Government approved plans and houses built by private enterprise, will also be determined.

Two prime objectives will be kept continuously before the Government housing organization, namely to keep the carry-over of incomplete houses as low as possible, and ensure the construction of 80,000 units in the year ending March 31, 1948. To accomplish this the Minister said he realized any realistic plan or program will be in a continuous state

of revision month by month. Needs will change, as well as methods of implementation. Many problems are involved. One of these is land assembly.

"There is not a plentiful supply of serviced land upon which to build the 1947 program," he said.

As for materials, methods will have to be considered to assure an ample supply, not only in the aggregate, but for housing requirements in each municipality.

At the moment the 80,000-units plan calls for a tentative division of 60,000 units for urban areas and 20,000 units for rural areas. Of this program, perhaps 30,000 units would be of the Government-approved type of projects such as Wartime Housing, Integrated Housing, Housing Enterprises, Emergency Shelter, prefabrication, small holdings under the Veterans' Land Act, and possible insurance company investments under Section 11 of the National Housing Act. Within this number of Government-approved projects, Integrated Housing would extend to perhaps 10,000 units, which are constructed by private builders with priorities being made available.

Admitting the program was ambitious, and one which will require the best efforts of those who participate for its success, Mr. Howe expressed confidence that "a definite plan, the organization to implement it, and the constructive help of all interested in housing needs, can meet our objective."

Films to Assist in Rehabilitation

All citizens' organizations that are actively interested in the successful re-establishment of Canada's veterans may have the assistance of the National Film Board. The Board has produced a series of films designed to convey the importance of the national rehabilitation program to the individual veteran, to industry and to citizens in general. It is hoped also by visual methods to increase public understanding of veterans' problems and the machinery that has been set up to aid in their solution.

In more than 75 Canadian urban centres community film councils have been organized and are ready to give every co-operation to groups wishing to arrange film programs. In each of these centres the local volunteer

projection service can provide the necessary facilities for showing the films.

Film libraries have been set up at several points in each of the provinces where a majority of the films may be secured. The others may be obtained from the National Film Society, 172 Wellington Street, Ottawa, Ontario. With few exceptions, the films are 16mm sound productions in English. The titles have been arranged under the following headings:

- (1) Machinery of Rehabilitation;
- (2) Re-establishment in Industry;
- (3) Agricultural Re-establishment;
- (4) Training Disability Cases;
- (5) Psychiatry;
- (6) Physical Medicine;
- (7) Amputations.

Discontinuance of National Registration

Mobilization Regulations also Revoked

DISCONTINUANCE of National Registration was announced by the Hon. Humphrey Mitchell, Minister of Labour, on August 15, 1946.

The National Selective Service Mobilization Regulations were also revoked on the same date, and the Minister announced that no further court action would be taken against draft delinquents. The military call-up had been suspended since V-E Day.

The text of the Minister's statement to the House of Commons, outlining the uses to which National Registration was put, is as follows:

National Registration

I have to inform the House that under Order in Council P.C. 3449 of August 14, 1946, National Registration has been discontinued as from August 15. It is provided by the same Order in Council that further prosecutions shall not be entered against anyone accused of an infraction under the National Registration Regulations, 1940, nor shall pending cases be proceeded with.

I should like to briefly review the salient features of the Registration when now announcing its termination.

At a time when France had fallen and Great Britain was already being subjected to the most violent action the enemy could put against her, when indeed the shadow of actual invasion over this country appeared to offer some grim prospect of reality, it was agreed that existing data on Canada's human resources was inadequate for total war purposes.

Within two months of the collapse of France all plans had been laid for the national registration of civilian residents of Canada over 16 years of age, and registration was made during August, 1940.

With the assistance of an army of volunteer registrars, forms were completed by 7,862,920 persons—of whom 3,979,680 were males and 3,883,240 females.

Made under the National Resources Mobilization Act, the registration was taken for, and kept up to date by the Department of National War Services, until March, 1942, when it was transferred to the Department of Labour to assist toward wartime control of manpower.

Since 1940 keeping the fundamental data of the registration up to date has involved a total of about eight million changes, including new

addresses, marriages, deaths, corrections, new registrations, and so forth—about the same number as there were persons registered originally.

The data yielded by the registration was used for a variety of purposes, but chiefly for the following:—

- (a) The military call-up for the Army.
- (b) Procurement of skilled workers for essential industries.
- (c) Indexing of technical personnel.
- (d) Listing of doctors and nurses.
- (e) Identification of individuals for a variety of purposes.
- (f) Listing of certain foreign nationals of Allied nations, available for military service under those countries.

I should like to express my own sincere appreciation to the staff engaged on the registration while in the Department of Labour, and to the Postmasters across the country who acted as agents, and without whose assistance the keeping up to date of the registration would have been extremely difficult.

Mobilization Regulations

The same Order in Council, P.C. 3449, revokes the National Selective Service Mobilization Regulations, 1944, as from August 15. Earlier this year the thirteen Mobilization Boards had been dissolved, and the thirteen Registrars' offices across Canada had been closed out. The Order in Council provides that further action will not be instituted in the courts against any offenders under the Mobilization Regulations, nor will court proceedings now pending be proceeded with.

At this point I should like to explain that the action taken now, follows after very strenuous efforts to locate all men of Military Call-up age who could not be found again after first registering. In addition to using the services of the Royal Canadian Mounted Police and other police forces throughout Canada and checking through Government contacts with the population, we have used several established tracing agencies for some years. The various methods used did, of course, succeed in locating many outstanding delinquents, but it is our opinion that the 1,563 who failed to respond to our orders, and who have not yet been traced, could

hardly be located, even through further efforts.

The total of men not yet located has been reduced to 6,553—this out of a grand total of 1,859,811 men dealt with under Mobilization Regulations.

But this number of 6,553 contains mostly men who have left the country, or who apparently are dead, or who registered more than once under assumed names, or are in other unusual categories. The possible delinquents are represented by the figure of 1,563, to which I have referred already. Thus, at most, men not yet located, and thought to be delinquent under the Regulations, represent only one-twelfth of one per cent of the grand total, 1,859,811.

Figures on the Military Call-up were frequently given to the House in the past, so that at this time I think that in addition to the figures I have mentioned already, it is only necessary to mention that somewhat more than 800,000 of the men dealt with under Mobilization Regulations are recorded as in the Armed Services at one time or another.

Originally, of course, the Military Call-up came under the Department of National War Services, but its administration had been

transferred to the Department of Labour at December 1, 1942.

To the members of the judiciary and the other gentlemen who served on the Mobilization Boards, I wish to express my sincere appreciation once again. Their responsibilities were grave, and their duties were onerous. They had to decide between important wartime industries and the urgent need of men for the Armed Services. I suggest that without exception they discharged their duties in a conscientious and fair manner, and that they deserve our gratitude. Also, the Registrars and their staffs deserve credit for the manner in which they carried through their responsibilities.

I am happy that we have reached the day when we are able to dispense finally with these Registrations and Mobilization Regulations, and I am sure that the honourable members will agree with that sentiment. These measures were vitally necessary for war purposes. They helped Canada over many of our manpower difficulties, but they represented one of the features of wartime administration which a democratic public tolerate and even expect, but which the same public very properly feel is not in accord with the peace-time machinery necessary in the Government of a free people.

National Holiday Agreement for British Electrical Workers

The National Joint Industrial Council for the Electricity Supply Industry in Great Britain, representing employers' organizations and trade unions in the industry, concluded on May 7 an agreement, deemed to have come into operation on April 1, which provides for an annual holiday and for certain public holidays for workers in the industry.

The agreement provides for holidays with pay for eligible workers during the "holiday period", from April 1 to September 30, or, if impracticable for employers to arrange holidays within those limits in 1946, from April 1 to October 31.

After 12 months' continuous service, day workers must be allowed an annual holiday of two consecutive weeks during the holiday period, and shift workers, three weeks, of which two consecutive weeks must be during the holiday period. After six months' service, both classes of workers are entitled to one week's holiday during the holiday period. Shift workers with six months' service are entitled to an additional three days, which may be consecutive or not as agreed upon by the employer and worker. Payment to shift workers under the agreement must be calculated on the shift rate.

As regards public holidays, day workers after twelve months' employment, must be allowed with pay the six statutory or public

holidays recognized by the Council, and after six months' service, three of these holidays. If required to work on such a holiday, they must be paid double time.

A worker who leaves his employment must be granted the holidays with pay to which he was entitled on the previous April 1, or payment in lieu thereof, together with any holidays accrued to him pro rata to his completed months of service after that date. A deceased worker's personal representatives must be paid an allowance in lieu of holidays with pay, calculated on the same basis.

Employees receiving sick payment, in accordance with the Agreement made by the National Council on May 31, 1945, must on return to their employment be allowed, at the employer's convenience, the holidays they would have otherwise received. The sick pay scheme noted above, in operation from August 1, 1945, covers workers with one year's continuous service who are recommended for admission to the scheme by a medical practitioner nominated by the employer. To claim sick pay benefits a doctor's certificate must be furnished to the employer not later than the fourth day of illness. No payment is made for the first three days. The plan provides for payment for five weeks at two-thirds normal weekly pay and for a further period of seven weeks at half-pay.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:

Canada Packers Limited, Sydney, N.S., and United Packinghouse Workers of America, Local 268.

Building Products Limited and La Federation Nationale des Travailleurs de la Pulpes et du Papier, Inc.

Imperial Oil Limited and Joint Industrial Council representing the employees of Imperial Oil Limited, at Dartmouth, N.S.

Consolidated Textiles Company Limited, St. Hyacinthe, Que., and La Federation Nationale Catholique du Textile, Inc.

Duplex Textiles Limited, St. Hyacinthe, Que., and La Federation Nationale Catholique du Textile, Inc.

Standard Chemical Company Limited, Toronto, Ont.

Evans Products Limited, and International Woodworkers of America, Local 1-217, Vancouver, B.C.

Lever Brothers Limited and International Chemical Workers' Union, Local 32.

Landis Co-operative Association, Limited, Landis, Sask.

Canadian Brotherhood of Railway Employees and Other Transport Workers and Temiscouata Railway Company.

Acme Steel Company of Canada, Limited, Montreal, P.Q.

International Harvester Company of Canada, Limited, and Local 127, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

Re: Canada Packers Limited, Sydney, N.S., and United Packinghouse Workers of America, Local 268

Reasons for Decision

This is a joint appeal from the Findings and Directions of the Regional War Labour Board for Nova Scotia, dated March 18, 1946, and April 12, 1946. The Company and its employees, represented by the UPWA, Local 268, appeal to this Board from that part of the decision of the Nova Scotia Board which refused to permit the Company to pay its hourly-rated employees for statutory holidays, when not worked, and double time for work performed on Sundays except where the work regularly falls on Sundays.

The parties rely heavily on the recommendations made by the Honourable Mr. Justice S. E. Richards on November 2, 1945, in his capacity as an Industrial Disputes Inquiry Commissioner, which recommendations have come to be popularly known as the "Winnipeg Settlement". The "Winnipeg Settlement" contains, inter alia, the following clauses:—

13. *Sundays and holidays.* Double the regular rate shall be paid for work performed on Sunday except where the work regularly falls on Sunday, but if an employee's regular day off falls on a week day he shall be paid double the regular rate if he works on such day off.

14. In respect of six statutory holidays now declared by the law of Canada to be of general observance throughout the Dominion regular hourly paid employees shall be en-

titled to receive pay at their regular rates for the normal hours on each of such days if they do not work, and if they do perform work on any one of such holidays they shall receive pay at double the regular rate for the hours so worked. Regular hourly paid employees shall mean those entitled to guaranteed weekly hours.

15. The statutory holidays to which reference is made above are New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day. Of these six named holidays, by local agreement, two holidays other than Thanksgiving Day and Dominion Day may be substituted, and for the purposes of these recommendations be deemed statutory holidays. The companies further undertake that as and when general observance throughout Canada of additional holidays, not exceeding two in number, is restored, these two statutory holidays shall for the foregoing purposes become statutory holidays, and the provisions of this agreement shall apply thereto.

The Company operates more than 100 establishments in Canada. The working conditions recommended in the "Winnipeg Settlement", as hereinbefore set out, have been approved by the other Regional War Labour Boards concerned and it has now become accepted practice in the Company's establishments to pay its hourly-rated employees (approximately 5,000 throughout Canada) for six statutory holidays when not worked, and double time for work performed on Sundays,

except where the work regularly falls on Sundays. It has been represented to the Board that there are only about 7 hourly-rated employees who are employed at the Company's establishment at Sydney, N.S. These employees are thus deprived of the working privileges enjoyed by the other employees in Canada.

The "Winnipeg Settlement" was arrived at largely as a result of negotiations between the Company and its employees. Implementation of the recommendations of the "Winnipeg Settlement" in individual plants is subject to approval by War Labour Boards. Insofar as the recommendations are consistent with the Wartime Wages Control Order, 1943, P.C. 9384, as amended, they merit the approval of War Labour Boards, and, with the exception of this case, such approvals have been obtained. Having regard for all the circumstances leading up to the joint applications

in the present cases, the history of negotiations in arriving at the said working conditions, the general acceptance in the industry of those working conditions, we are of the opinion that it would be fair and reasonable to extend to the Company's hourly-rated employees at Sydney, the same privileges as prevail in the Company's other establishments. The necessity of attaining uniformity in the administration of the Wartime Wages Control Order, 1943, would suggest that such action would be advisable. Under the authority of Section 20 (1) (b) (i) of the Wartime Wages Control Order, 1943, the Company will be authorized to pay for 6 statutory holidays, when not worked, and double time for work performed on Sundays, except where the work falls regularly on Sundays.

The appeal is allowed. Finding and Direction will be issued accordingly.

August 7, 1946.

Re: Building Products Limited, and La Federation Nationale des Travailleurs de la Pulpe et du Papier, Inc.

Reasons for Decision

With leave from the Regional War Labour Board for Quebec, the Company appeals from a decision of that Board dated March 15, 1946. In and by the latter decision, the Quebec Board directed the Company to "grant to its employees having five years or more service, two weeks' vacation with pay".

The policy of the National War Labour Board on the question of vacations with pay is quite clear. This Board, by D.B. 17, has encouraged the implementation by employers of one week's paid vacation. It is a matter of record that many employers have been directed by this Board to give to their employees one week's vacation with pay. Indeed, the Company in the present case was, on a previous occasion, directed by the Regional War Labour Board for Quebec to give to its employees one week's vacation with pay, and this plan is presently in effect. It is not, however, the policy of this Board to direct employers to extend their vacations-with-pay plans beyond that point. This Board has stated its position on this question on many occasions. In *Alberta Nitrogen Products Limited (Calgary) and International Union of Mines, Mill and Smelter Workers, Local 690*, (L.G., November, 1944, p. 1325) the Board said:—

On the matter of holidays with pay, we have in some cases at the request of the employer allowed 2 weeks' vacation with pay

after 5 years' of service or a graduated scale on the basis of one additional day (i.e. additional to the one week under D.B. 17) for each year of service after the first year. But we have never 'legislated' an employer into a vacation plan which went beyond the general terms of D.B. 17.

Again, in *The Thorold Pulp Company Limited, (Thorold, Ontario) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 84* (L.G., April, 1945, p. 471), we stated:—

To dispose of this appeal, we need not examine the merit of the Company's plea, because in any event we would not direct the employer to extend the present plan which appears to be in conformity with D.B. 17.

The Board's policy was also expressed in *Abrasive Company of Canada, Arvida Limited and The International Union of Abrasive Employees, A.F.L., Local Union 23737* (L.G., May, 1945, p. 660):—

It is apparent that the foregoing direction is not in accord with D.B. 17 and with the general policy of the National Board which has been to refrain from directing more than one week's paid vacation.

It follows from the above that we cannot direct the Company to go beyond its present paid vacation plan of one week.

The appeal is allowed.

Finding and Direction will be issued accordingly.

August 8, 1946.

Re: Imperial Oil Limited and Joint Industrial Council representing the employees of Imperial Oil Limited, at Dartmouth, N.S.

Reasons for Decision

The Company and the Council asked the Regional War Labour Board for Nova Scotia to grant the Company authority to pay its Mechanical Department employees of the Imperial Refinery, straight time for six statutory holidays, although not worked. The Regional Board dismissed the joint application on the ground that such a condition of employment does not prevail in the Province of Nova Scotia. The Regional Board granted leave to appeal.

The Company operates refineries in several Provinces. Prior to November 15, 1941, it was the established practice of the Company to pay the same wage rates and provide the same working conditions to and for its Mechanical Department employees in those refineries, regardless of where the same are located. The condition of employment involved in this

appeal did not exist prior to November 15, 1941, but has since been approved by War Labour Boards having jurisdiction over the Company's other refineries.

The Regional Board's decision in this case was made under Section 20 (1) (a) of Wartime Wages Control Order, 1943, as amended by P.C. 348. The Company has undertaken that the cost of putting into effect the said condition of employment will not result in any application for an increase in the prices of the Company's goods or services.

In the light of the foregoing, we have come to the conclusion that the Company's request in this case is reasonable and should be approved. The appeal is allowed. A Finding and Direction will issue, giving formal approval to the application with effect from March 20, 1946.

August 8, 1946.

Re: Consolidated Textiles Company Limited, St. Hyacinthe, Que., and La Federation Nationale Catholique du Textile, Inc.

Reasons for Decision

The Federation applied to the Regional War Labour Board for Quebec requesting, (1) increases in wage-rates, (2) a night shift premium of 5 cents per hour and (3) overtime pay at the rate of time and one-half of the regular rate. The application was made to the Quebec Board at the time when the basis for increasing of wage-rates depended upon showing that the increase was necessary "to rectify a gross inequality or gross injustice." The Regional War Labour Board for Quebec concluded that "the wages and working conditions referred to do not constitute a gross injustice or a gross inequality" within the meaning of the Wartime Wages Control Order, 1943, as it then read.

The Federation now appeals to this Board from the decision of the Quebec Board. Section 11 (2) of the Wartime Wages Control Order, 1943, provides that "on any such appeal, the National Board may make the decision or direction which in its opinion, the Regional Board *ought to have made* and the decision or direction of the National Board shall constitute the decision or direction of the Regional Board as if originally made by it." Inasmuch as this Board's decision must be that, which in its opinion, the Regional Board ought to have made, the present appeal must be considered under the "gross inequality or gross injustice" formula. It might be added, however, that regardless of which formula or yard-stick is applied to this case, whether it

be the present yard-stick or the "gross inequality or gross injustice" formula, our decision would be the same.

We cannot overlook the fact that the wage rates presently prevailing in the Company's Plant are extremely low. We are of the opinion that gross inequalities exist in many of the wage rates of the employees concerned. The wage rates requested by the Federation are, generally speaking, quite reasonable and this Board is prepared to direct the company to increase the hourly rates. The effect of such direction will be made known in this Board's Finding and Direction. Where employment in any of the occupational classifications is governed by piece-work, the piece-work rates will be changed so that they will properly reflect the corresponding increases directed for hourly rates.

We are of the opinion that the portion of the Quebec Board's decision dealing with the wage rate for "Weavers" should not be disturbed. The parties should implement the decision of the Quebec Board respecting "Weavers" for a trial period of three months. This will give both the Company and its employees an opportunity to determine the advantages or disadvantages of the new method for production with twelve looms. After the three months has expired, the parties should refer the matter to the Regional War Labour Board for Quebec for final determination. It may well be, that during or after the three months' trial period, the parties may agree, by

negotiation, upon the production method and the wage rate for "Weavers."

With respect to the question of the night-shift premium, it would appear that a premium rate of five per cent appears to be the general practice in the Industry and, therefore, we are not disposed to interfere therewith.

With respect to the question of overtime pay, it has just come to our attention that by Ordinance No. 2, dated August 3, 1946, the

Minimum Wage Commission of the Province of Quebec, under the authority of the Minimum Wage Act (R.S.Q. 1941, C. 164), has ordered an overtime rate to be paid of time and one-half. It becomes unnecessary, therefore, for us to deal with this matter since the Union's request will be satisfied by the said Quebec legislation.

Finding and Direction will be issued shortly giving formal effect to the above.

August 14, 1946.

Re: Duplex Textiles Limited, St. Hyacinthe, Que., and La Federation Nationale Catholique du Textile, Inc.

Reasons for Decision

With the exception of the question of the wage rate for the occupational classification of "Weavers", the decision of the National War Labour Board in this case is the same as the decision in the case of Consolidated Textiles Company Limited, St. Hyacinthe, Que., and La Federation Nationale Catholique du Textile, Inc., and the principles of the decision in this case are similar to those in the case of Consolidated Textiles Limited. It is not

necessary, therefore, to set out in detail the reasons for the Board's decision in this case.

The question of wage rate for the occupational classification of "Weavers" which is referred to in the Reasons for Decision in the case of Consolidated Textiles does not enter into this case.

The appeal of the Federation is allowed in part. Finding and Direction will be issued shortly giving formal effect to the Board's decision.

August 14, 1946.

Re: Standard Chemical Company Limited, Toronto, Ont.

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for Ontario dated April 4, 1946. The appeal is limited to that part of the Regional Board's decision which concerns the Company's salesmen.

The Company has supplied us with the names of its competitors. We in turn have ascertained the amounts of salaries which those competitors are paying to their respective

industrial salesmen. We find that the Company's present rates are low in comparison with the rates generally prevailing for industrial salesmen in the localities where the Company's salesmen are employed. To permit the Company to establish rates for its industrial salesmen which will compare with rates paid by the Company's competitors for the same classification, it is necessary to allow the appeal and approve the rates requested.

August 17, 1946.

Re: Evans Products Limited, and International Woodworkers of America, Local 1-217, Vancouver, B.C.

Reasons for Decision

The Union applied to the Regional War Labour Board for British Columbia requesting the said Regional Board (1) to make certain adjustments in wage rates and (2) to direct the Company to abolish the Bodeaux Incentive Plan which is in effect in the Company's plant. By its Finding and Direction of February 9, 1946, the Regional Board directed the Company to make certain adjustments in wage rates for various occupational classifications. The Regional Board declined to direct the Company to abolish its Bodeaux plan.

We have given careful consideration to the wage rates paid in this plant and we are of the opinion that the decision of the Regional Board should not be interfered with. It should also be pointed out that since the Regional Board's decision of February 9, 1946, the employees in this plant have obtained substantial increases in wage rates. It is not considered advisable, therefore, to authorize or direct any further wage increases at the present time.

With respect to the Union's request that the Bodeaux plan be abolished, this Board is impressed with the fact that the Regional

Board made its decision only after the most careful consideration. In order to determine as to whether or not the plan should be abolished the members of the Regional War Labour Board for British Columbia personally inspected the Company's plant. They had an opportunity of viewing the Company's production process. Apparently they were satisfied that there was not sufficient justification for directing the abolition of the system. No evidence was adduced which would indicate

that the Regional Board acted under any misconceptions. In view of the fact that the Regional Board's judgment was based upon a careful analysis of the situation we are of the opinion that that Board's decision should not be disturbed.

Under the circumstances, therefore, the appeal is dismissed. Finding and Direction will be issued accordingly, giving formal effect to the above.

August 22, 1946.

**Re: Lever Brothers Limited and International Chemical Workers' Union,
Local 32**

Reasons for Decision

In August, 1945, the Regional War Labour Board for Ontario dismissed a joint application by the Company and the Union for approval of an elaborate revision in factory wage rates resulting from job evaluation. An appeal was taken from that decision. The National Board dismissed the appeal because the parties had failed to show that any gross injustice or gross inequality existed in the current rates.

The job evaluation plan called for reductions in wage rates for some occupational classifications, and increases for others. The over-all effect of the plan is to increase the Company's wage bill by six per cent. Incidentally, it should be noted that Wartime Wages Control Order, 1943, as it read in August, 1945, did not provide War Labour Boards with authority to reduce wage rates.

Wartime Wages Control Order, 1943, was amended by Order in Council P.C. 348 on January 31, 1946, with effect from February 15, 1946. Prior to the amendment Boards could increase wage rates only to the extent necessary to rectify a gross injustice or inequality. Section 20 (1) (a) limited Board's powers to that extent. The Section as amended by P.C. 348 read as follow:

20. (1) The National Board may
(a) authorize or direct an employer to increase a single rate or the rates of a range established by him under this Order or by or pursuant to a direction of the National Board for an occupational classification of his employees if and to the extent that the National Board finds that such rate or rates are low in comparison with the rate or rates generally prevailing for the same or comparable occupational classifications in the same locality, or if there is no such occupational classification in that locality, then for the same or comparable occupational classification in a locality which, in the opinion of the Board, is comparable; or may authorize an employer to vary a single rate or the rates of a range on

such other basis and to such extent as in the opinion of the National Board is reasonable in the circumstances and consistent with the maintenance of existing prices of the goods and services which the employer sells;

Boards construed the last part of the quoted provision as meaning that wage rates could be increased notwithstanding that they were not "low". Before authorizing any increases in any such case, Boards obtained from the employer an undertaking to the effect that the increased wage costs resulting would not make it necessary for the employer to increase or obtain permission to increase the price of his goods or services. Further, Boards interpreted the word "vary", as used in the quoted provision, as meaning that the adjustment of wage rates could be down as well as up.

The Company again applied to the Regional Board under the Order as amended by P.C. 348 for approval of the job evaluation plan. On June 5, 1946, the Regional Board dismissed the application but granted leave to appeal.

The Company filed its written undertaking that the increased wage bill which would result from approval of the application in question would not make it necessary for the Company to apply for permission to increase the price of its goods.

We are satisfied that the variations of wage rates as proposed by the Company and the Union are reasonable in the circumstances. The appeal is allowed and the application is approved subject to the condition that employees in those occupational classifications in respect of which wage rates have been reduced will continue to receive the wage rates in effect for that classification prior to the effective date of this decision. The Company may give effect to this decision at any time not earlier than the first payroll period commencing on or after May 6, 1946.

August 22, 1946.

Re: Landis Co-operative Association, Limited, Landis, Sask.

Reasons for Decision

This is an application for leave to appeal and an appeal from the Finding and Direction of the Regional War Labour Board for Saskatchewan dated May 16, 1946.

The Association applied to the Regional War Labour Board for Saskatchewan for an increase in the wage rate of its Manager. The Regional Board was unable to satisfy itself that the rate presently being paid to the Manager was low in comparison with the rate or rates generally prevailing for the occupational classification in question. We have made inquiries as to the prevailing rates for the occupational classification under consideration and we are of the opinion that the current

rate is not low within the meaning of the Wartime Wages Control Order, 1943, P.C. 9384, as amended by Order in Council P.C. 348.

The record indicates that the Regional Board considered this application several times and there is nothing which might cause us to believe that the Regional Board failed in its appreciation of the facts of the case.

Under these circumstances, therefore, we are unable to accede to the appellant's request.

The application for leave to appeal is allowed but the appeal is dismissed.

Finding and Direction will be issued accordingly.

August 23, 1946.

Re: Canadian Brotherhood of Railway Employees and Other Transport Workers and Temiscouata Railway Company.

Reasons for Decision

In 1945, the Brotherhood applied to the National War Labour Board requesting, *inter alia*, inauguration of a vacation with pay plan for the Company's employees who were covered by the collective agreement between the Company and the Brotherhood. This Board, in approving this portion of the Brotherhood's request, stated in its Reasons for Decision (L.G., June 1945, p. 824-5) as follows:—

With respect to the request for vacations with pay, we are of the opinion that a plan for one week under the terms and conditions of D.B. 17 should be authorized.

Subsequently, a Finding and Direction was issued by this Board which gave formal effect to this Board's decision. Unfortunately, the said Finding and Direction was couched in terms which did not adequately reflect the Board's decision, as stated above. The relevant portion of the Finding and Direction merely authorized the Company "for the year 1945 to implement a plan of one week's vacation with pay under terms and conditions of the National War Labour Board's Decision Bulletin No. D.B. 17 Supplement." The Company provided vacations with pay for the employees affected during the year 1945 in accordance with the Board's Finding and Direction. However, the Company now states

that this Board's Finding and Direction obliged the Company to give vacations with pay *only for 1945* and not for subsequent years. We are unable to agree with the Company's contention for two reasons. In the first place, it was not the Board's intention to limit the vacations with pay plan only to the year 1945; rather, was it the intention of this Board to establish the vacation with pay plan as a working condition so long as the Wartime Wages Control Order, 1943, P.C. 9384, as amended, continues in effect. In the second place the Company has, pursuant to Finding and Direction of this Board, instituted an annual vacation with pay plan to other of its employees who are not covered by the collective agreement between the Company and the Brotherhood. To deny to the employees affected by this application an annual vacation with pay plan would constitute gross discrimination against them.

In the circumstances, therefore, we direct the Company to inaugurate an annual vacation with pay plan for the employees affected by this application in accordance with the terms and conditions of our Decision Bulletin D.B. 17 Supplement; this Decision to be effective as from January 1, 1946. This will have the effect of continuing the vacation with pay plan instituted by the Company in 1945.

Finding and Direction will be issued accordingly.

August 24, 1946.

Re: Acme Steel Company of Canada, Limited, Montreal, P.Q.

Reasons for Decision

With leave of the Regional War Labour Board for British Columbia, the above Company appeals from a decision of that Board dated June 17, 1946.

The Company seeks to introduce a new Customers Bonus Plan for its salesman in British Columbia. The Company had such a plan in effect from 1935 to 1942. In 1942, their bonus plan was discontinued and from

1943 to date their salesmen across Canada have been paid a bonus based on the average bonus earned during the four years 1938-1941, inclusive. The bonus plan has now been revised and the Company seeks approval thereof.

It is significant that approval of similar applications was obtained from the Regional War Labour Boards in Ontario and Quebec. Only one employee in British Columbia is affected by the revised plan. The Company predicts, and we consider the prediction to be well founded, that it is not expected that the new plan will result in a higher average bonus payment as prevailed under the old plan.

The Regional Board, in disallowing the application, felt that the proposed plan would decrease the salesman's bonus in respect of the sale of certain of the Company's products. While this may be so we feel that the overall bonus will not involve a decrease in the

salesmen's earnings. The Company contends that the new bonus plan will provide an incentive for its employees in its Sales Department. The Company states that they wish to maintain their previous policy of having a uniform bonus plan for all of their employees in the various areas.

Having regard for the fact that the Company's bonus plan has been approved by the other Regional Boards having jurisdiction over the Company's salesmen and having regard for the desirability of maintaining uniformity in the administration throughout Canada of the Wartime Wages Control Order, 1943, P.C. 9384, as amended, and it appearing that the proposed bonus plan is reasonable we deem it advisable to allow the Company to introduce this plan in British Columbia.

The appeal is allowed. Finding and Direction will be issued accordingly.

August 26, 1946.

Re: International Harvester Company of Canada, Limited, and Local 127, United Automobile, Aircraft and Agricultural Implement Workers of Amerca (UAW-CIO).

Reasons for Decision

The Company employs approximately 260 production workers at its Chatham plant. Some of those employees are time rated and others are on piece work rates. The Union is the recognized bargaining agent for these employees.

In November, 1936, all employees received a wage increase of 4 cents an hour. In March, 1937, a further increase of 4 cents an hour was granted. In September, 1943, the Regional War Labour Board for Ontario, authorized the Company to increase all wage rates by 5 cents an hour. The Company paid a cost-of-living bonus equal to 10 cents an hour. The said increases and the cost-of-living bonus were from time to time incorporated into the time rates, but they were not incorporated into the piece work rates. In the case of the piece rated employees, the increases and the cost-of-living bonus, 25 cents in all, did not form part of the basis for the piece work incentive.

Following negotiations, the Company and the Union asked the Regional Board to authorize the Company to adjust the piece work rates to include the aforesaid increase and bonus. The parties also asked the Regional Board to authorize the Company to increase all rates by 10 per cent.

The Regional Board authorized the Company to adjust the piece work rates as requested, but declined to approve the 10 per cent increase, instead a general increase of 5 cents an hour was authorized.

The Union now appeals from the Regional Board's Decision and asks us to approve the joint application. The Company takes what one might describe as a "natural position" in this appeal. It should here be noted that joint applications affecting the Company's three plants in Ontario went to the Regional Board at or about the same time. All three applications asked for the same relief and the Regional Board's Decisions were the same for all. The Company's employees in the Hamilton plants accepted the Regional Board's Decision. The Company's representatives say that it is the established practice of the Company when considering and granting wage adjustments, to apply such adjustments in all its plants. In the circumstances, the Company submits, it could not consistently join in the appeal since the Hamilton employees have accepted the Regional Board's Decisions which affect them.

To put into effect the terms of the agreement made between the Company and the Union, the increases to the time rated employees would range from 6 to 9 cents an hour. In the case of piece work rated employees, the 10 per cent increase in such rates would amount to 7 or 8 cents an hour.

The Company and the Union made what we regard as a reasonable settlement of their differences and in our opinion they should be permitted to give effect to the terms of that settlement. As we understand it, approval of the settlement will stabilize wage rates in the

plant in question for the term of existing collective agreement which expires in July, 1947. In support of this understanding, Mr. Roy Brown, International Representative of the Union, said in part "we feel that if we had the support of this Board on the 10 per cent increase, we could carry through until some time next year before we opened wages again".

The appeal is allowed and a Finding and Direction will issue accordingly.

At the hearing, the Company intimated that if the National Board allowed the appeal in

this case, proceedings would have to be taken to change the Regional Board's Decisions affecting the Hamilton plants. We recognize the force of the Company's argument on this point. The proceedings to which the Company refers may be taken either by way of review by this Board or by way of an application to the Regional Board for reconsideration. The Company may choose its forum as it may be advised.

August 26, 1946.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of August. During this period the Board received twelve applications, held six hearings, issued four certificates designating bargaining representatives, rejected four applications, ordered eight representation votes and rendered decisions in four appeal cases.

Certificates Issued

Four applications for certification of bargaining representatives were approved by the Board and certificates issued as below:

(1) Messrs. Harry Davis, T. G. McManus, D. Ferguson and J. A. Sullivan and the Canadian Seamen's Union for the unlicensed personnel employed on the vessels "S/S Cyclo Chief" of Cyclo Chief Limited, Montreal, P.Q., and (2) "S/S Cyclo Warrior" of Cyclo Warrior Limited, Montreal, P.Q.

(3) Messrs. John Beevis, Leopold Fortin, J. A. Noel and G. G. Proulx and the Amalgam-

ated Association of Street, Electric Railway and Motor Coach Employees of America for the employees of the Hull Electric Company, Hull, P.Q., in the classifications of operator, freight conductor, freight motorman, freight brakeman, mail carrier, carpenter, carpenter's helper, pitman, pitman's helper, blacksmith, blacksmith's helper, welder, welder's helper, machinist, armature winder, airbrake apprentice, cleaner, oiler, storekeeper, general maintenance man, track man, flag man, controller troubleman, control lineman and control helper.

(4) Messrs. Austin Smith, Edward Wennerlow and William Foster and the International Longshoremen's and Warehousemen's Union, Local 507, for employees of the Empire Stevedoring Company Limited, Vancouver, B.C., engaged in operations of scaling, washing, cleaning, sweeping, chipping and painting of ships and ships' parts; cleaning of deep tanks, lining and fitting ships for grain; fitting ships for live stock and other commodities; shoring of cargoes and operators of gear and equip-

ment aboard ship only but not including the superintendent, clerical employees, senior foreman and foremen.*

Applications for Certification Rejected

1. *Brotherhood of Railroad Telegraphers, Division No. 43 and Canadian National Railways (Western Region), Winnipeg, Manitoba* (L.G. June, 1946, p. 752). Following an investigation of the application and a public hearing the Board rejected the application for the reason that the confidential and supervisory duties performed by the employees affected are such as to exclude them from the scope of the Wartime Labour Relations Regulations, P.C. 1003.

2. *Brotherhood of Railroad Telegraphers, Division No. 1, and Canadian National Railways (Central and Atlantic Regions), Montreal, P.Q.* (L.G. June, 1946, p. 752). The Board rejected the application for certification following an investigation and a public hearing for the reason that the confidential and supervisory duties performed by the employees affected are such as to exclude them from the scope of the Wartime Labour Relations Regulations, P.C. 1003.

3. *International Longshoremen's and Warehousemen's Union, Local 507, and Alberta Wheat Pool (Elevators Nos. 1 and 2), Vancouver, B.C.* (L.G. July, 1946, p. 902). Following an investigation of the application the Board rejected the application for the reason that it was not supported by a majority of the employees affected as required by the Wartime Labour Relations Regulations, P.C. 1003.

4. *International Longshoremen's and Warehousemen's Union, Local 507, and Pacific Elevators Limited, Vancouver, B.C.* (L.G. July, 1946, p. 902). The Board rejected the application following an investigation for the reason that the application was not supported by a majority of the employees affected as required by the Wartime Labour Relations Regulations, P.C. 1003.

Representation Votes Ordered

1. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Toronto, Hamilton and Buffalo Railway Company, Hamilton, Ontario.* (L.G. July, 1946, p. 902). Following an investigation of the application and a public hearing, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ontario, was appointed by the Board to act as Returning Officer in a vote of certain clerical employees in freight and yard offices of the Toronto, Hamilton and Buffalo Railway Company, Hamilton, Ontario.

2. *Canadian Seamen's Union and Union Steamships Limited, Vancouver, B.C.* (L.G. July, 1946, p. 902). A vote of the employees affected was ordered by the Board following consideration of the application. The name of the Seafarers' International Union of North America, the intervening organization, will also appear on the ballot. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., was appointed Returning Officer to conduct the vote.

3. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company, Saskatoon, Saskatchewan.* (L.G. July, 1946, p. 902). Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Manitoba, was appointed Returning Officer by the Board to conduct a vote of the clerks, excluding the assistant chief clerk and the superintendent's stenographer, in the superintendent's office of the Canadian Pacific Railway Company, Saskatoon, Saskatchewan, to determine whether or not the employees concerned desired the Brotherhood to elect or appoint bargaining representatives on their behalf.

4. *International Longshoremen's and Warehousemen's Union, Local 507, and Searle Grain Company Limited, New Westminster, B.C.* (L.G. July, 1946, p. 902). Following an investigation of the application Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., was appointed by the Board to conduct a vote of the employees, exclusive of office and supervisory staff, of the Searle Grain Company Limited, New Westminster, B.C.

5. *Canadian Seamen's Union and Gulf and Lake Navigation Company Limited, Montreal, P.Q.* (L.G. August, 1946, p. 1051). Mr. R. Trepanier, Industrial Relations Officer, Montreal, P.Q., was appointed Returning Officer by the Board to conduct a vote of the unlicensed personnel employed on vessels of Gulf and Lake Navigation Company Limited, Montreal, P.Q. The name of the National Seamen's Association of Canada, the intervening union, will also appear on the ballot.

6. *Canadian Seamen's Union and Keystone Transports Limited, Montreal, P.Q.* (L.G. August, 1946, p. 1051). Following an investigation of the application the Board appointed Mr. R. Trepanier, Industrial Relations Officer, Montreal, P.Q., Returning Officer to conduct a vote of the unlicensed personnel employed on vessels of the Keystone Transports Limited, Montreal, P.Q. The name of the applicant union as well as the name of the intervening union, the National Seamen's Association of Canada will appear on the ballot.

7. *International Longshoremen's and Warehousemen's Union, Local 507, and Canadian*

*Following investigation of the application.

Stevedoring Company Limited, Vancouver, B.C. (L.G. August, 1946, p. 1051). Following consideration of the application for certification of bargaining representatives submitted by Local 507, International Longshoremen's and Warehousemen's Union, the Board appointed Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., to conduct a vote among certain employees of the Canadian Stevedoring Company Limited, Vancouver, B.C. The foreman was excluded from the vote.

8. *International Longshoremen's and Warehousemen's Union, Local 507, and Louis Wolfe and Sons, Vancouver, B.C.* (L.G. August, 1946, p. 1051). Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., was appointed by the Board to conduct a vote among certain employees of Louis Wolfe and Sons Limited, Vancouver, B.C., to determine whether or not the employees affected desired the International Longshoremen's and Warehousemen's Union to elect or appoint bargaining representatives on their behalf. The foreman was excluded from the vote.

Applications for Certification Received During the Month of August

1. *Canadian Seamen's Union* on behalf of the unlicensed personnel on M.V. "Turret Cape" of *Saguenay Terminals Limited*, Montreal, P.Q.

2. *Yellowknife District Miners' Union, Local 802, International Union of Mine, Mill and Smelter Workers* on behalf of employees of the *Giant Yellowknife Gold Mines Limited*, Yellowknife, N.W.T., excepting the shift boss, foreman and those employed in a supervisory capacity.

3. *Western Canada Firebosses Association Sub-District No. 2* on behalf of mine examiners of *Cadomin Coal Company Limited*, Cadomin, Alberta.

4. *Western Canada Firebosses Association Sub-District No. 2* on behalf of mine examiners of *Luscar Coals Limited*, Luscar, Alberta.

5. *Western Canada Firebosses Association Sub-District No. 2* on behalf of mine examiners of *Mountain Park Coal Company*, Mountain Park, Alberta.

6. *International Longshoremen's Association Local No. 1696*, on behalf of employees engaged in loading and unloading vessels with logs for paper mill for *J. C. E. Malone Company Limited*, Three Rivers, P.Q.

7. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of clerks in the superintendent's office of the *Canadian Pacific Railway Company*, Farnham, P.Q.

8. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of clerks in the superintendent's office of the *Canadian Pacific Railway Company*, Nelson, B.C.

9. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of checkers, freight handlers, etc., of the *Dominion Atlantic Railway Company*, Kentville, N.S.

10. *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees* on behalf of clerks in the superintendent's office of the *Canadian Pacific Railway Company*, Brandon, Manitoba.

11. *Hotel and Restaurant Employees International Alliance and Bartenders' International League of America, Local 662*, on behalf of telephone operators, room clerks, front office cashiers, night cashier, relief cashier, relief clerk, desk clerks, and telephone operator of the *Nova Scotian Hotel, Canadian National Railways*, Halifax, N.S.

12. *Federation of Employee-Professional Engineers and Assistants' Union No. 1*, on behalf of professional engineers, below the rank of chief engineer and their draftsmen and technical assistants in the engineering department of the *Canadian National Telegraph Company*, Toronto, Ontario.

Decisions of Board in Appeal Cases

1. On August 22 the Board dismissed the appeal of the Halifax Civic Employees Federal Union No. 143 from a decision of the Nova Scotia Wartime Labour Relations Board excluding certain employees of the Corporation of the City of Halifax from the bargaining unit established by the Nova Scotia Board.

The Nova Scotia Board, in certifying the union's bargaining representatives, excluded 32 classifications from the bargaining unit, 30 of which the union by appeal desired to have included. Among the latter were city solicitor, city clerk, bailiff, commissioner of finance, commissioner of works, superintendent of streets, commissioner of public health and welfare, superintendent of health, superintendent of the city home, governor of the city prison and the city assessor.

The National Board, in dismissing the appeal, found that the employees affected performed confidential and supervisory duties such as to exclude them from the scope of the Wartime Labour Relations Regulations, P.C. 1003, as not being employees as defined therein or were otherwise inappropriate for inclusion in the bargaining unit. Reasons for judgment are to be given at a later date.

2. Following an appeal by the International Union of Operating Engineers from a decision of the British Columbia Minister of Labour, the Board ordered representation votes among steam and power plant engineers employed by the Alberni Plywoods Limited, Port Alberni, B.C.; Bloedel, Stewart and Welch, Port Alberni and Great Central Lake, B.C., and Alberni Pacific Lumber Company, Port Alberni, B.C. In these votes the union obtained the support of a majority of the employees affected and as a result the Board certified Jack Henderson and W. H. Flesher and the International Union of Operating Engineers as bargaining representatives for steam and power plant engineers, except chief engineer, for the four companies concerned.

3. The Board gave consideration to the appeal of Local 1-217, International Woodworkers' Union of America from a decision of the British Columbia Minister of Labour in certifying bargaining representatives of the

United Brotherhood of Carpenters and Joiners of America for employees of British Columbia Forest Products Limited, Vancouver, B.C.

The decision was reached by the Board that a vote of the employees affected would be taken with the names of the United Brotherhood of Carpenters and Joiners of America and the International Woodworkers' Union of America on the ballot. Formal reasons for judgment will be issued later.

4. Following consideration of an appeal by the Sylvia Hotel Employees' Organization and Sylvia Hotel Limited, Vancouver, B.C., from a decision of the British Columbia Minister of Labour in certifying bargaining representatives of Building Service Employees' Union, Local 224 and Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America, Local 28, the Board denied the appeal. Reasons for judgment will be given at a later date.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide a conciliation procedure for the settlement of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. Under the procedure a Conciliation Officer is appointed to confer with the parties and endeavour to effect an agreement. If a Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is then established by the Minister of Labour. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and, in any event, to report its findings and recommendations to the Minister.

Assignment of Conciliation Officers

During August, 1946, Conciliation Officers were assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Beattie Gold Mines Quebec Limited, Duparquet, P.Q. and Local 688, International Union

of Mine, Mill and Smelter Workers. Mr. R. Trepanier, Conciliation Officer.

Davie Shipbuilding & Repairing Company, Lauzon, P.Q. and Local No. 3, Marine and Shipbuilding Workers of Canada (CCL). Mr. L. Pepin, Conciliation Officer.

Donnell & Mudge Limited, New Toronto, Ont., and Local 330, International Fur and Leather Workers Union. Mr. H. Perkins, Conciliation Officer.

Falconbridge Nickel Mines Limited, Falconbridge, Ontario, and Local 598, International Union of Mine, Mill and Smelter Workers. Mr. G. Fenwick, Conciliation Officer.

Malartic Gold Fields Mine Ltd., Halet, P.Q., and Local 696, Malartic Mine and Mill Workers Union of the International Union of Mine, Mill and Smelter Workers. Mr. R. Trepanier, Conciliation Officer.

Public Markets Ltd., St. Boniface, Man. and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. Mr. J. S. McCullagh, Conciliation Officer.

Purity Flour Mills Limited, Goderich, Ontario and Local 23736, Federal Labour Union, (A.F. of L.) Mr. Wm. Dunn, Conciliation Officer.

Sudbury Construction and Machinery Company Ltd., Sudbury, Ont. and Local 598, Inter-

national Union of Mine, Mill and Smelter Workers. Mr. G. Fenwick, Conciliation Officer.

Agreements Facilitated by Conciliation Officers

In the following cases, reports were received during the month from Conciliation Officers indicating the successful completion of negotiations and the signing of an agreement:

Beardmore & Co. Ltd., Acton, Ont. and Local 26, National Union of Shoe and Leather Workers (CCL). Mr. Charles Hutcheon, Conciliation Officer.

Mercury Mills Ltd. (Maitland Spinning Mills), Listowel, Ont. and Local 724, Textile Workers Union of America. Mr. Wm. Dunn, Conciliation Officer.

Pease Foundry Company Limited (Brampton Division), and Local 28, International Molders and Foundry Workers Union. Mr. Wm. Dunn, Conciliation Officer.

Purity Flour Mills Limited, Goderich, Ontario and Local 23736, Federal Labour Union, (A.F. of L.). Mr. Wm. Dunn, Conciliation Officer.

Conciliation Boards Established

During the month, Boards of Conciliation were established but not fully constituted, as follows:—

Canadian Industries Ltd. (Copper Cliff Plant), Copper Cliff, Ont., and Local 598, International Union of Mine, Mill and Smelter Workers.

Hamilton Chapter of the Canadian Association of Master Painters and Decorators, Hamilton, Ont., and Local 205, Brotherhood of Painters, Decorators and Paperhangers of America.

Jewel Consolidated, Limited, Winnipeg, Man. and Local Union No. 832, Retail Clerks Int. Protective Association, Jewel Store Employees' Section.

Ottawa Electric Railway Company and Div. No. 279, Amalgamated Assn. of Street, Electric Railway and Motor Coach Employees of America.

Searle Grain Company, Limited, Fort William, Ont., and Bro. of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Conciliation Boards Fully Constituted

During the month, Boards of Conciliation were fully constituted as follows:—

Canadian National Railways.—The Board of Conciliation established to deal with a dispute between Canadian National Railways and Canadian Brotherhood of Railway Employees (Clerks and Other Classes of Employees, Regional Auditors' and Treasurers' Offices Cartage Services Department), was fully constituted on August 20, 1946, with the appointment of Mr. L. W. Brockington, K.C., Ottawa, Ont. as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. J. W. Long, K.C., Montreal, P.Q. and Mr. F. R. Scott, Montreal, P.Q. were appointed on the recommendation of the employer and employees respectively. (Agreement on all matters in dispute was reached by the parties directly and the Board did not find it necessary to meet.)

Snyder's Limited, Waterloo, Ont.—The Board of Conciliation established to deal with a dispute between Snyder's Limited, Waterloo, Ontario, and Local 13, National Union of Aircraft, Furniture Workers and Allied Crafts (CCL), was fully constituted on Aug. 17, 1946, with the appointment of His Honour Judge A. Cochrane, Brampton, Ont., as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board. Mr. J. E. Ferguson, Toronto, and Dr. E. Forsey, Ottawa, were appointed on the recommendation of the employer and employees respectively.

Weston Dairy, Limited, Weston, Ont.—The Board of Conciliation established to deal with a dispute between Weston Dairy, Limited, Weston, Ont. and Local 647, Milk Drivers and Dairy Employees' Union was fully constituted on April 4, 1946, with the appointment of His Honour Judge Samuel Factor, Toronto, as Chairman of the Board, who was appointed in the absence of a joint recommendation from the other two members of the Board, Mr. J. J. Robinette, Toronto, and Mr. G. R. Harvey, Toronto, were appointed on the recommendation of the employer and employees respectively. The Board reported May 1, 1946.

The Board was reconvened by the Minister, Aug. 30, 1946, in order to clarify and amplify a portion of its report.

Board Reports Received

PURSUANT to the Wartime Labour Relations Regulations, Boards of Conciliation are allowed 14 days in which to make their report. This can be extended, either by the

Minister or by mutual consent of the representatives of the parties concerned. The following reports were received by the Minister of Labour during August:—

Report of Board in Dispute between Canadian Industries, Limited, Windsor Works, and Local 195, International Union United Automobile, Aircraft, and Agricultural Implement Workers of America

On April 27 the Minister of Labour received the Report of the Board of Conciliation, the personnel of which was as follows: Mr. Alexander Brady, Chairman, appointed on the recommendation of the other two members of the Board, Messrs. Norman Levy and Gerald H. Brown appointed on the nomination of the employer and employees respectively.*

It is the duty of the Conciliation Board to endeavour to effect an agreement between the parties with respect to the matters upon which they have not agreed, and, in any event, to make its findings and recommendations to the Minister. These findings and recommendations are transmitted to the parties concerned and made public by the Minister. Fourteen days after the Board has reported the employees are free to strike.

Conciliation Services under Section 8 of P.C. 4020

Section 8 of P.C. 4020 provides conciliation assistance in special cases that do not come within the scope of the Regulations. This Section of the Order reads as follows:—

“The Minister of Labour may appoint an Industrial Disputes Inquiry Commission for the purpose of investigating any situation which in his opinion appears to be detrimental to the most effective utilization of labour in the war effort or may interfere with the effective transition to a peacetime economy in Canada. The Commission shall report its findings and recommendations to the Minister of Labour who may take such steps as he deems necessary and desirable to effect such recommendations.”

It is under this Section that a number of conciliators have been appointed, chiefly from the Bench and the professions.

Conciliation Services under the Conciliation and Labour Act

The Conciliation and Labour Act (Chap. 110, R.S.C. 1927) empowers the Minister of Labour to enquire into the causes and circumstances of industrial disputes and to take expedient measures to bring the parties together with a view to effecting a settlement. The Minister is also authorized to appoint a conciliator or an arbitrator to deal with any dispute when requested by the parties involved.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation appointed by you to investigate this dispute now submits its report.

The Board met the representatives of the parties on April 2, 1946, in Toronto. The Company was represented by Messrs. E. G. Taylor, R. A. Clarke, J. D. Wright, and H. L. Johnston. The Union was represented by Messrs. G. R. Foley, Drummond Wren, J. Dunn, and A. Currie.

In previous negotiations for the renewal of a collective agreement the parties had failed to agree upon seven main points:

- (1) Request of the Union for a union shop.
- (2) Request of the Union for a checkoff.
- (3) Request of the Union for an advertising of jobs within the plant on a plant-wide basis.
- (4) Request of the Union for a leave of absence for certain Union officials.
- (5) Request of the Company for a no-strike clause.
- (6) Request of the Union for a revised method in the handling of grievances.
- (7) Request of the Union for a rate of pay during temporary shut-downs.

In the presence of the Board the Union asked that, since it and the Company could not agree upon a joint application to the Regional War Labour Board, No. (7) above be dropped from the consideration of the present Board. All the other six points in dispute were fully examined and discussed in turn. In this discussion the parties reached agreement on three of the six matters.

First, the Union agreed to accept the clause proposed by the Company on the advertising of jobs, which reads:

It is understood that the Company will continue, in conformity with the established practice at the works, to advertise on the bulletin boards for a period of three days, openings for positions of a permanent nature available to employees paid at hourly rates.

The Union requested an additional clause, which should read that:

Any individual hardship or injustice, arising out of the filling of temporary positions, shall be a discussible grievance.

The representatives of the Company were prepared to accept this additional clause.

Secondly, the Union agreed to drop its request that “an employee in the seniority

*Publication of this report of the LABOUR GAZETTE was inadvertently overlooked at the time of receipt by the Industrial Relations Branch.

record who is elected to a permanent position in any labour activity of the Union shall be granted a leave of absence for one year and, on application by him within such year, shall be re-employed by the Company at his own work without affecting his position in the seniority records". The Company on its part agreed to revise Clause (9) of the present Agreement to read as follows:

Members of the Union, not exceeding three in number, shall be granted reasonable leave of absence without pay for the transaction of business for the Union provided that such leave of absence shall not in any event exceed a total of six weeks in any one year.

The Company considered that an extended leave of absence of a year or two years was difficult because a number of the Industrial Relations Plans of the Company remain effective even while an employee is absent on leave without pay. It was prepared, however, to agree that it would make every reasonable effort to re-employ a Union member who resigned to take a full-time position with the Union, and that for seniority purposes, continuity of service would be granted to an employee who resigned for such a purpose provided that he was re-employed within one year.

Thirdly, the Union agreed to accept the present grievance procedure whereby an employee is free to approach his foreman with a grievance either alone or with or through his steward provided that there is a clause added to guarantee that, when an employee approaches a foreman alone, no grievance shall be settled to the detriment or prejudice of the Union pursuant to the terms of the Agreement.

Thus three matters remained on which the parties could not reach agreement in the discussions before the Board; namely, the requests of the Union for a union shop and check-off and the request of the Company for a no-strike clause. On these matters the Board wishes to make recommendations to assist the parties to reach agreement.

First, the Board would recommend that the Union withdraw its request for a Union Shop. In this recommendation the Board make no attempt to decide on the principle of the union shop. It is concerned solely with a specific relationship, that between the present Union and the present Company in the City of Windsor. It is concerned with making what would appear to be a reasonable recommendation with due regard to all the complicated industrial circumstances which affect both Company and Union in Windsor. While it asks the Union to withdraw its request for a union shop, the Board recommends to both parties to agree upon a maintenance of

membership clause which would apply to employees who are members of the Union and to new employees. The inclusion of such a clause involves a recognition of the principle of union security, a recognition that would appear to be reasonable and broadly in unison with the changing pattern of industrial relations in the Windsor area.

Secondly, the Board recommends that the Union drop its request for a check-off and accept the offer of the Company; namely,

- (a) to provide facilities in the Works for cashing employees' pay cheques.
- (b) to provide tables in the Works on pay days at which stewards may solicit union membership dues and to permit the posting of notices soliciting the payment of such dues.
- (c) to permit stewards during their non-working time to collect membership dues.

While the Board so recommends, it would appear to them that this proposal may involve both the Company and its union member employees in more inconvenience than a check-off.

Thirdly, the Board recommends that the Company drop its request for a no-strike clause. The Board approves of such a clause to the extent that it expresses recognition of the present law, but the Union is unwilling to accept it unless a final all-inclusive arbitration clause is included, and the Company sees difficulties in such a clause. The Board would remind the parties that P.C. 1003 is still operative and it has significant provisions on the issue of strikes. During its continuance, P.C. 1003 may be relied upon by the Company, and, in view of that fact, the related issues of a no-strike clause and enlarged arbitration provisions may reasonably be shelved for the present.

In asking the parties to accept the above recommendations, the Board would emphasize the truism that the relationship between a company and a union cannot remain static in contemporary Canadian society. The very existence of collective bargaining involves periodic adjustments and changes. The representative of the Company in this case remarked before the Board that collective agreements pertained almost exclusively to concessions by the Company. This fact is not deniable. It is due to the struggle of unions for a recognition and status, but the element of mutual concessions will require to be emphasized increasingly in the future. Unions will need to stress their responsibility as well as their status, and companies will have to encourage unions in their responsibility by

ensuring unions of the security of their position.

In conclusion the Board wish to pay tribute to the excellent relations which have evidently existed between the Company and the Union. These relations are due to a commendable attitude of mind on the part of both, and the Board hopes that such an attitude may continue.

The employer nominee on the Board of Conciliation dissents from the recommendation of the other members of the Board in respect of the inclusion of a maintenance of membership clause in the new agreement. While most favourable to union membership and collective bargaining, he is opposed to the principle of compulsion as to membership in individual unions as a condition of employment, favouring instead freedom of association in regard to these matters. In this connection he cites also the declaration of Canadian

government policy concerning such matters published in the March, 1945 LABOUR GAZETTE. He considers, moreover, that the status of the Union in this particular plant and its relations with the employing Company since the formation of the Union in 1942 have not been characterized by any state of insecurity whatever calling for remedial action, and further that the operation of a maintenance of union membership clause in the new agreement would not operate to the advantage of the industry or of those employed therein.

All of which is respectfully submitted.

Dated at Toronto, April 24, 1946.

Report of Board in Dispute between Clare Shipbuilding Company, Limited, Meteghan, N.S., and Local No. 6 Industrial Union of Marine and Shipbuilding Workers of America.

On September 3, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge K. L. Crowell, Bridgetown, N.S., Chairman, appointed by the Minister on the joint recommendation of the other two members of the Board, Messrs. R. McInnes of Halifax and F. D. Nichols, also of Halifax, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Department of Labour,
Ottawa, Canada.

Sir:—

The Conciliation Board appointed by you under Section 13 of Wartime Labour Relations Regulations, (P.C. 1003) to inquire into the dispute between Clare Shipbuilding Company, Limited, Meteghan, N.S. and Local No. 6, Industrial Union of Marine and Shipbuilding Workers of Canada is pleased to advise you that an amicable settlement of the aforesaid dispute has been effected, a collective agreement or contract has been drawn up which has been approved and accepted by both parties to the dispute.

Sittings of the Board were held on the 22nd day of August, 1946 at the Court House in Little Brook (six miles from Meteghan) in the County of Digby, N.S. and on the 23rd

day of August in the Court House in the Town of Digby.

The Chairman of the Board, after telephone consultations with the other members of the Board fixed the time and place of the first sitting of the Board for the 22nd day of August, A.D. 1946 at the hour of 11 o'clock in the forenoon at the Court House in Little Brook aforesaid and had both parties to the said dispute notified of the time and place so fixed.

When the Board met at the first sitting at the hour and place so fixed the aforesaid company was represented by Mr. W. Percival, General Manager, Mr. Oswald Brand, Secretary and Mr. M. J. Deveau, Vice President having for counsel Mr. F. D. Smith, K.C. and Mr. V. J. Pottier, K.C. No person or counsel appeared on behalf of the union.

In these circumstances the Board thought that possibly these bargaining agents for the union, who were all French Acadians, did not understand that they were supposed to represent the union at these hearings, it was therefore unanimously decided to adjourn the hearing until 2 o'clock in the afternoon and in the meantime get in touch personally with each of the bargaining agents. Mr. Nichols, a member of the Board undertook to contact each of the bargaining agents, all of whom resided within a radius of seven miles. Mr. Deveau, vice-president of the aforesaid company and a resident of Meteghan arranged to drive Mr. Nichols to the homes of the bar-

gaining agents of the union where Mr. Nichols left notices that the Board would again meet at 2 o'clock in the afternoon and requested that they attend.

At the resumption of the sitting of the Board at 2 o'clock as aforesaid and the bargaining agents being still absent, the members of the Board unanimously decided that they would hear representations on behalf of the company; accordingly after a statement by counsel on behalf of the company, Mr. Percival was sworn and examined.

At the conclusion of Mr. Percival's evidence and examination, the Board, in order that the union would again have an opportunity of appearing before it, adjourned the sitting to the following day, August 23rd at the hour of 10 o'clock in the forenoon, the said sitting to take place in the Court House in the Town of Digby (there being no hotel accommodation for the Board members in Little Brook) and that written notice of such adjourned meeting be given to the three aforesaid bargaining agents by either being personally served or leaving such notice at their respective homes; thereupon the chairman personally wrote out notices of the time and place of such adjourned sitting and had them personally served on the three aforesaid bargaining representatives or agents.

When the Board met on the 23rd day of August at the hour and place above mentioned, the company was again represented by the same persons who were present on its behalf on the preceding day and the Union was represented by Mr. H. Saulnier and Mr. Fred Gaudet, two of the bargaining agents of the Union and a third party substituting for Mr. Flynn, the other bargaining agent, who was not at home.

At this sitting, after an opportunity had been given the bargaining agents of the Union to hear the evidence given by Mr. Percival at the previous sitting and after hearing counsel for the company again give the stand of the company on the matters in dispute, the bargaining agents were given an opportunity of stating the Union's views and demands.

After a lengthy discussion entered into by the representatives of both parties under the direction of the Board, the bargaining agents for the Union agreed on behalf of the said Union to drop the question of a closed shop or union security and the representatives of the company on behalf of the said company agreed to a re-drafting of clause 8 (b) in the draft agreement previously submitted by Mr. Pettigrove, the amended clause reading as follows:—

Ability, skill, experience and length of service of the employees will be the governing factors as regards rehiring, lay-off and promotion, subject to any statutory or governmental regulations pertaining to ex-service men.

The said collective agreement was then redrafted to include the new clause 8 (b) after which it was unanimously accepted by both parties to the dispute. Two copies of this amended agreement were then and there signed by the three bargaining agents on behalf of the Union and handed to Mr. Percival, who gave his undertaking to forward them to the company to be executed and on their return to hand one executed copy to the Union.

Respectfully submitted.

(Sgd.) K. L. CROWELL,
Chairman of the Board.

Report of Board in Dispute between Gibson Brothers (Rock Realty Investments Limited), Toronto, Ontario, and Local 204, Building Service Employees' International Union (AFL-TLC).

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Parliament Buildings,
Ottawa, Ontario.

Report of Board

The following witnesses gave evidence before the Board:

On August 21, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Worship Magistrate S. Tupper Bigelow, Toronto, Chairman, appointed by the Minister on the joint recommendation of the other two members of the Board, Messrs. W. W. Gunn of Toronto, and C. C. Woolton, also of Toronto, appointed on the nomination of the employer and employees respectively.

Lorne H. Kelly, Gibson Brothers, 357 Bay Street, Toronto, Ontario; H. C. McCloskey, 15 Kingsway Crescent, Toronto Ontario; Ray Grant, 56 Prince Arthur Avenue, Toronto, Ontario; Arthur Cowles, 135 Sherbourne Street, Toronto, Ontario; R. H. Walker, 176 Hastings Avenue, Toronto, Ontario; Walfred Smedberg, 212 W. Wisconsin Avenue, Milwaukee, Wisconsin; Albert Hearn, 215 Manning Chambers, Toronto, Ontario.

The admitted facts of the dispute between the Employer and the Union are as follow:

Rock Realty Investments Limited, hereinafter referred to as "the Company", is the owner of an office building known as the Ussher Building, 244 Bay Street, Toronto, Ontario. Gibson Brothers, a realty firm whose head office is in Toronto, are the rental agents for the Company and manage this property in all respects. The Company is what is known as a one-man company, the president and owner of all except the qualifying shares being H. C. McCloskey.

The Ussher Building is staffed by an elevator operator Ray Grant, and a porter, Arthur Cowles, as well as charwomen but the union is interested only in Grant and Cowles, who are members of their union. Grant operates the building's elevator during the day and is relieved by Cowles at five o'clock, who stays on duty until midnight. These men each receive \$26.60 for a 48-hour week and take two weeks' annual holidays with pay.

There were actually only two matters in dispute between the employer and the union: the union requested a union shop and a dues checkoff, and the Company refused these concessions.

Following the union's request, a draft agreement was prepared by the union and the employer was requested to sign it. A copy of this draft agreement is attached hereto as Schedule "A" to this Report.

The employer declined to sign this draft agreement and prepared a draft agreement which it was prepared to sign. A copy of this draft agreement is attached hereto as Schedule "B" to this Report. The Union refused to sign this agreement.

This situation created the stalemate with which your Board of Conciliation dealt.

The above, then, were the salient admitted facts in dispute between the parties.

A good deal of difficulty was encountered because of the fact that the two employees were apparently not willing members of the union. We explored carefully the possibility that they had been persuaded to join the union by false statements made or "high-pressure" methods used by the union representative who procured their applications for membership in the union, but we find as a fact that these men joined the union freely and voluntarily although at this time, they regretted that they joined the union and wished to withdraw from membership in it.

Mr. Walker, for the union, pointed out that the union would not permit the men to resign from the union but if they failed to pay their union dues, they would in due course, be suspended from membership. This was made

clear to the employees who were prepared to face all contingencies resulting from their suspension.

The Board conducted its negotiations on the basis that the employees were and would continue to remain members of the union.

Mr. McCloskey, for the Company, took the view that he wanted no dealings with the Union because: (a) no agreement with a union is binding on it; (b) his employees wanted no such agreement; (c) if he signed the presently proposed union draft agreement now, the union would want something more later on and (d) he had apparently had, in other spheres of activity, dealings with unions which did not ensure to his benefit.

Mr. McCloskey stated that he has instructed Gibson Brothers to make the necessary arrangements to instal an automatic elevator in the Ussher Building which would dispense with the necessity of employing an elevator operator and a porter.

Mr. McCloskey stated that for some years past, the Ussher Building has been operated at an operating annual loss of about \$4,000.00 to which a further annual amount of \$3,000.00 should be added for depreciation. He has listed the property for sale with Gibson Brothers and is anxious to sell the property as soon as possible.

The members of your Board suggested, in the hope of compromise, the following solutions to the dispute:

(a) Since Gibson Brothers operate 27 buildings of a similar character in Toronto and since agreements have been made between Gibson Brothers and the union with respect to only two of these, we suggested to the union that they might defer their activities with respect to the Ussher Building to a later time, and in the meantime, pursue activities with respect to other office buildings, with the view of dealing later with the new owner of the Ussher Building, who might be more amenable to their present demands than the present owner; this solution was not satisfactory to the union.

(b) we suggested that each party waive one of their points of stipulation; the union agree to waive their demand for checkoff if the employer would sign a union shop agreement; this was not satisfactory to the employer, who refused to yield either point. We felt, however, that the employer might have yielded to the checkoff demand but this alone would definitely not have been satisfactory to the union.

(c) We suggested that the union permit the employees to resign from the union or failing that, suspend them or expel them from union membership for non-payment of dues so that

the situation might revert to the status quo, but this was not satisfactory to the union.

(d) We suggested to the employer that he sign an agreement, incorporating in it the demands of the union, which agreement would be in effect for one year, and on its expiry, matters would then revert to the point they are now and negotiations could begin afresh with each party having been able to observe how the other had lived up to its part of the agreement, always bearing in mind that the ownership of the building might change within the year the agreement would be in effect; this suggestion was not satisfactory to the employer.

(e) We suggested to both parties that all matters between them be settled by an agreement to appoint an arbitrator or panel of arbitrators empowered to hear and determine all matters in dispute between the parties and that the arbitrator or arbitrators be empowered to adjudicate on the matters between the parties, the decision of the arbitrator or arbitrators to be final and binding on both parties. This suggested solution was not satisfactory to either party.

By Thursday, August 15, we had abandoned hope of conciliating the dispute, as both parties appeared to be adamant and we felt we had exhausted all possible solutions of the dispute.

However, on this day, we were informed by Mr. Walker that on the following day, Mr. Walfred Smedberg, the International representative of the union, would be in Toronto. As his authority was greater than Mr.

Walker's, we decided to call Mr. Smedberg and explore the possibility of his making concessions which Mr. Walker was not prepared to do.

Accordingly, Mr. Smedberg was called and when it was made apparent to him that the two union members were dissatisfied with their membership in the union, he stipulated that if this were so and the Board found it to be so, the union would abandon their dispute with the employer provided that if the Board found it not to be so, Mr. McCloskey would consent to an automatic and irrevocable checkoff. The employer agreed.

Accordingly, the employees were again called before the Board and matters explained carefully to them. After considerable discussion, it became clear to the Board that the men were unwilling and dissatisfied members of the union, and each signed, at the union's request, letters which are attached hereto as Schedules C and D, copies of which are given to the employer and the union.

Mr. Hearn, authorized by the union as its signing officer, then signed a letter attached hereto as Schedule E, copies of which were given to the employer and the union.

Signed at Toronto, Ontario, this 20th day of August, 1946.

(Sgd.) S. TUPPER BIGELOW,
Chairman.

(Sgd.) E. E. WOOLTON,
Member.

(Sgd.) W. W. M. GUNN,
Member.

Report of Board in Dispute between Township of York Hydro System and the National Organization of Civic, Utility and Electrical Workers, Branch 1, C.C.L.

On August 5, 1946, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Dr. A. Brady, Toronto, Chairman, appointed on the joint recommendation of the other two members of the Board, E. J. D. McNish, K.C., of Toronto, and Mr. B. Laskin of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation established to deal with the above dispute begs to submit its report.

The Board duly met the parties in Toronto on July 2 and July 5. The Township of York

Hydro System was represented by Mr. H. R. McClyment, manager, and Mr. H. A. Hall, K.C., solicitor. The Union was represented by Messrs. T. F. Stevenson, A. Kaines, and G. Mainprize.

An agreement between the parties expired on December 31, 1945, and since then negotiations have taken place for a new agreement. When the parties first came before the Board on July 2 there were still nine matters in dispute; namely, provisions pertaining to,

- (1) Hours of work
- (2) Overtime
- (3) Annual vacations
- (4) Statutory holidays
- (5) Seniority
- (6) Union shop and check-off
- (7) Cost of living bonus
- (8) Pension plan
- (9) Schedule of wages.

The disputed point in each case and the recommendation of the Board may now be submitted in the order above.

(1) HOURS OF WORK

The main request of the Union is for a five-day week of forty hours for hydro employees who now work 40, 44 or 48 hours and a five-day 35-hour week for those who now work 38 hours. The Corporation has felt unable to concede this request.

The Board of Conciliation is of the opinion that the request of the Union cannot be assessed only in terms of creating more employment or of acquiescence in the inevitable. The employees who would be affected by the five-day week are in heterogeneous work classifications and lack even the unity which exists in a manufacturing plant wherein diverse classifications of employees work under one roof and under an integrated scheme of production. The exigences of the service which the different groups of hydro employees are called upon to render is a factor of considerable importance, and there is a burden upon the Union to show that the present arrangement of hours of work (borrowed largely from the Toronto Hydro System) could be feasibly changed without impairing either the efficiency or the availability of employees in maintaining hydro services. This burden the Union has not, in the opinion of the Board, discharged. The Board cannot be unmindful of the bearing of the "five-day week" issue on the availability of skilled labour nor can it ignore the effect on other branches of York Township's services and the extent to which it prevails in other hydro systems in the province. On balance, this Board cannot at this time recommend the inauguration of a five-day week. The Board is, however, sympathetic to the elimination of disparities in the normal work week as among different classes of hydro employees, so far as this can be done without unreasonable interference with the rendering of efficient service. It would suggest that the system and the Union jointly review the work week structures and see whether greater uniformity than now exists cannot be introduced. Perhaps, too, the parties might investigate the possibilities of making some concession to the outside workers in the matter of working hours on a seasonal basis similar to that in vogue for the office staff.

The Union also asks that all "call duty" as it exists at present should be eliminated. But the Board is of the opinion that this is not a suitable time to make a change of the kind requested.

Two other matters in dispute respecting work hours pertain to the schedule of Line

Trouble Crews and Pre-Arranged Overtime. The parties agreed before the Board to have further discussion on these two matters and did not think it necessary for the Board to make recommendations.

(2) OVERTIME

The request here pertained to the payment for overtime for work on Saturday under a forty-hour week schedule. Since the Board is not recommending a five-day week, it is needless for it to make a recommendation in this matter.

(3) ANNUAL VACATION

The Union requests that all employees with fifteen years service and over be entitled to an annual vacation of three weeks with pay. It points out that Toronto Hydro and many other Utilities and Governments extend this or a similar benefit to their employees.

It is true that the City of Toronto gives its employees three weeks vacation with pay after ten years of service while the Provincial and Dominion Governments give three weeks vacation with pay after one year's service. However, it should be observed that in these cases there is no grant of Saturday morning off during the summer months.

The purpose of a longer vacation for senior employees is to reward long service and to give older employees a further period to recuperate from their year's work. The Board commends the principle involved, and suggests that York Township Council give serious consideration to some such provision. It recognizes, however, that at the present time the Township gives most of its employees, including the office staff and linecrew of the Hydro, Saturday mornings off during the summer months and that no such provision as that requested by the Union is in force among other township employees.

(4) STATUTORY HOLIDAYS

The Union's claim under this head is that line troublemen should be entitled to another day off with pay at troubleman's rate for each statutory holiday worked while on trouble shift. The existing agreement recognizes the principle of paid statutory holidays and provides, in certain cases, for another day off with pay where work is performed on a statutory holiday; line troublemen are, however, excepted.

The Board sees no reason for differentiating between line troublemen and other classifications in respect of paid statutory holidays. Hence it would recommend that the principle

of paid statutory holidays be recognized in the case of line troublemen and that they be given another day off with pay for each statutory holiday worked.

It has been pointed out to the Board that line troublemen are paid a 9c. hourly premium over linemen's rates while on trouble shifts, and there was some suggestion that this premium rate was fixed to compensate line troublemen for losing paid statutory holidays. On the other hand, there is the fact that line troublemen work the night shift and on weekends, so that it may well be that the premium rate is based on this feature of their duties.

The evidence before the Board was not sufficient to enable it to determine what exactly the premium rate was intended to cover. In view of the Board's recommendation of a day off with pay for each statutory holiday worked, it feels that it can safely leave it to the parties to determine and agree as to whether the 9c. hourly premium is appropriate and as to what rate should be paid for the day off in lieu of the statutory holiday.

(5) SENIORITY

The Union requested seniority lists to be compiled for each section and posted for a period of thirty days. The Township Council would not concede this request.

The Board suggested to the representatives of the parties that Mr. McClymont as manager might supply Mr. Stevenson as Union Business Secretary with a seniority list, and this suggestion was accepted.

(6) UNION SHOP AND CHECK-OFF

The Union requests that all present and future employees must become members of the Union. The Township Council was unwilling to accede to this request.

The Board is not prepared to recommend a Union Shop under the present circumstances. The Board would note the fact that the Union at present does not suffer from any insecurity and that it enjoys a maintenance of membership provision in the existing agreement. The Union indeed has almost a hundred per cent enrolment of employees in the Township. The Board would recommend a voluntary check-off for the life of the agreement.

(7) COST-OF-LIVING BONUS

The request of the Union is that the cost of living bonus now being paid be added to the wage rates.

The Board would suggest what the Union requests, namely that the bonus be incorporated with the wage, because the present

wage structure is actually based on the bonus and it would be simpler for all concerned if the bonus was incorporated in that structure.

(8) PENSION PLAN

The pension plan appeared to be acceptable to both parties, but its application in the judgment of the Council was made solely contingent on what wages the Council was obligated to pay. Hence the Board proceeds to the wage issue.

(9) SCHEDULE OF WAGES

In its recommendations on wages, the Board is not in all respects unanimous. The majority consisting of Mr. McNish and the Chairman think that the schedule of wages agreed to by the Council of the Township in the spring of this year is reasonable under the existing circumstances and should be accepted by the Union. The evidence submitted to the Board was that the wages now paid to the Hydro staff are comparable to those paid in other municipalities and in the Toronto Hydro service. The Board considers it very important that the pension plan should be brought into effect as soon as possible and would deem it to be a serious mistake if the payment of a higher wage schedule necessitated a postponement of the pension system.

Mr. Laskin takes a position on the wage issue differing from that adopted by the majority of the Board. He points out that while York Township Council proposed certain wage increases for weekly workers (falling below the demands of the Union, however), it did not propose any wage increases for hourly workers; and, in his opinion, Council should have shown at least as much consideration for the hourly workers as it did for the weekly workers. Further, he points out (while recognizing that the parties to this dispute are not governed by wage control orders) that Council has not paid its hydro employees the full cost of living bonus permissible under the wage control scheme formerly in force. This is of some significance when it is recalled that the amount of the cost-of-living bonus has not been integrated to date with the wages of hydro employees. It is arguable that increases in various rates from time to time have made up for any deficiency in the full cost of living bonus; but it should be noted that the increases were not general, and that the separation of the bonus from the wage rates indicated that the former was considered by Council as a separate item. Mr. Laskin urges that Council should reconsider its wage proposals in the light of the factors he has mentioned and in

the light of the Union's demands, and that both parties should then review together their respective positions on the matter of wages. They should be able, on the basis mentioned, to reconcile their differences on a level satisfactory to each of them.

All of which is respectfully submitted.
Dated at Toronto this second day of August, 1946.

(Sgd.) BORA LASKIN.

Report of Board in Dispute between Wilson Motor Bodies Limited, Long Branch, Ontario, and Local 252, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.)

On August 10, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: His Honour Judge A. Cochrane, Brampton, Chairman, appointed by the Minister in the absence of a joint recommendation of the other two members of the Board, Messrs. E. Sparrow of Toronto, and N. Levy, also of Toronto, appointed on the nomination of the employer and employees respectively.

Report of Board

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Sir:

The Board of Conciliation appointed by you in this matter begs to report as follows.

The Board held a preliminary meeting of July 17, 1946, and then met to hear the parties at Toronto on July 24, holding a final meeting on July 25.

At the hearings the Company was represented by Mr. W. Shanahan, President, Mr. B. O. Hipwell, Sales Manager, Mr. J. Macfarlane, Factory Manager, and Mr. H. Steen, Counsel for the Company.

The Union was represented by Mr. P. Siren, International Representative, U.A.W.-C.I.O., Mr. W. Potter, Committee Member, and Mr. P. Berkenhier, Committee Chairman.

The Board wishes to thank the parties for their clear and frank presentations, and particularly for the even tenor of discussions, by reason of which it was possible to bring the parties to concurrence on one issue and closer together on others.

The Board had before it the following matters in dispute, which had been requested by the Union as amendments to the existing collective bargaining agreement between the parties:

(a) Union Security.

1. Union Shop.
2. Checkoff.

(b) Two Weeks' Holidays With Pay.

HOLIDAYS WITH PAY

In its original submission the Company proposed to grant one week's holiday with pay to all hourly rated employees with one year's continuous employment as of May 31, 1947. During discussions the Company enlarged this proposal to include the two weeks' holidays with pay, to extend to all hourly rated employees with five years' service, or seniority, as of May 31, 1947, contingent upon the Union's acceptance of the Company's present wage increase proposals. Subject to its clarifying certain items with the Company, the Union Representatives agreed to report back this offer and condition favourably.

UNION SECURITY

The Board therefore had remaining before it the matter of union security. It was stated that there were 150 present employees affected, of whom 119 were stated to be Union members.

The bargaining agency was elected under a vote supervised by The Ontario Department of Labour in December, 1942. While there had apparently been initial reluctance on the part of the Company to accept this result, leading to a strike, a collective bargaining agreement was entered into in February 1943 which has subsisted since with out substantial change. It was agreed by the Union that relations with the Company, particularly of late, had considerably improved.

The Union for its part expressed a willingness to avoid having the letter of its requested amendments stand in the way of mutual agreement. It pointed out that its recognition by the Company as representative of all employees, imposed on it responsibilities to act for the benefit of some who assumed no balancing obligations. It further submitted that since the Union is expected by the Company, and is willing, to act objectively, it is entitled to have its security acknowledged and protected by agreement.

While the Company at first took objection entirely to Union security, after considerable discussion it proposed a voluntary revocable

checkoff to apply to all employees covered by the bargaining unit who so authorize the Company. The Company maintained objection to union shop. It particularly emphasized its concern for its long term employees, of whom the Union admitted that not all were presently Union members.

It appeared to the Board that this mutual willingness to compromise indicated a desire of both parties to advance their relations. Efforts were made to bring the parties to a decision but were not further successful.

The Board therefore makes the following recommendations to assist the parties reach agreement.

First, as to the Union Shop, the Board recommends that the Union withdraw this request. No opinion is thereby expressed by the Board on the union shop principle, or indeed of any other principle, being concerned with settlement of the specific issues in these specific circumstances.

Secondly, the Board recommends that the Union accept the offer of the Company regarding check-off, on the basis that it be voluntary; that it be for all employees in the bargaining unit, for whom the bargaining agency presents written authorizations to the Company; such authorizations to be revocable on 90 days' notice in writing; the check-off to be monthly and for such sum or sums as the authorization specifies.

Thirdly, and as a necessary complement to the foregoing the Board recommends that the Company agree to a limited form of union security whereby future hired employees, affected by the agreement, as a condition of their hiring become members of the Union after achieving seniority status, that is, after the 90 day period of probation as provided by the agreement.

These provisions would leave the present employees for whom the Company expressed its chief concern, to make their own elections, and it cannot be deemed coercive of new employees who, with prior knowledge of its conditions, freely choose employment with the Company. In particular, having regard to the agreement that the Union shall represent all employees in the bargaining unit, it would demonstrate that the Company intended that agreement to be effective and is not indifferent or hostile to its development.

These recommendations are made to the parties to help advance their relationship. The Board deemed it encouraging that the Company, in the course of the hearings, appeared to look to the Union to take an interest in the Company's problems, with a view to benefiting the Company. The Union stressed its desire to maintain its responsibility to the Company as well as to the employees, and

great encouragement may be given to this attitude by moving progressively to assure the Union, and consequently the working people who compose it, of the security of their position.

The employer nominee on the Board, who dissents in part from the majority recommendations on union security, has attached hereto his minority report.

All of which is respectfully submitted.

(Sgd.) A. COCHRANE,
Chairman

(Sgd.) NORMAN LEVY,
Union Nominee

Minority Report

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Sir:

The deliberations of the Board of Conciliation in the above case were on a high plane of debate and in the final meeting unanimity prevailed on all but one point. I disagreed with the other two members of the Board in their recommendation that new employees, as a condition of employment be required to join the Union.

The theory advanced by Mr. Levy and in the end supported by the Chairman that Management cannot reasonably cooperate with a Trade Union unless there is so-called "Union Security" may be currently popular but is none the less fancy rather than fact. Many instances are on record where co-operation prevails between Management and Union without any form of "Union Security" present. As a matter of fact it can be proved that the best type of Industrial relations exists in plants where the Union does not require Management to be its recruiting agent nor to deduct from its employees a monthly fee in order that they may maintain their right to earn a living.

In this particular case the Company granted Union requests for higher wage rates, for a more generous vacation policy, and conceded other points, while faced with the fact that productivity per man-hour was considerably reduced. Quite reasonably the Company after three years experience of it wonders where the business is benefiting from Union activity.

The Union business agent stated that while there had been noticeable antipathy to the Union in the early days, a much better spirit of co-operation had prevailed in the past months.

My contention was that, due to the Management's ability to prove reduced efficiency

during the Union's regime and that greater productivity could be obtained without much increased effort by the employees, it was unwise and unfair to force the Management to support the Union through any form of "Union Security". At the same time as a Conciliator I felt it my duty to suggest that the Union should exercise to a greater extent its responsibility toward the community by ensuring to the best of its ability a fair rate

of productivity. With approximately 110 paid up members out of a possible 151, it is unfortunate that so little attention has been paid by the Union leaders to the all important factor of reasonable productivity.

All of which is respectfully submitted.

E. E. SPARROW,
Management Nominee.

Report of Board in Dispute between Grey Goose Bus Lines, Limited, and the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 1374.

On August 20, the Minister of Labour received the report of the Board of Conciliation the personnel of which was as follows: Honourable Mr. Justice A. K. Dysart, Winnipeg, Chairman, appointed by the Minister in the absence of a joint recommendation of the other two members of the Board, Messrs. R. B. Graham, of Winnipeg, and S. Duff, also of Winnipeg, appointed on the nomination of the employer and employees respectively.

Report of Board

Honourable HUMPHREY J. MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir:

We, the undersigned, being members of the Conciliation Board established by you by instrument dated April 11, 1946, to deal with the above dispute, begs now to submit herewith this our *Report*.

The material forwarded to the Board from your Department does not define the issues of the dispute, except to say that the Employer refused to sign any wage agreement with the said Union on the ground that the Union does not truly represent its employees. But the oath of office to which each member of the Board had to subscribe declares that the Board has been "appointed to endeavour to effect an agreement between the above parties on the matters on which they have not agreed in negotiations of a collective agreement between the said employer and the bargaining representatives of the said employees".

The foregoing constitutes the only specific guidance given the Board for the discharge of the duties undertaken.

At the first meeting of the Board the discussion centered around an attempt to define the facts of the disputes, the cause thereof and the probable chances of bringing the parties into accord.

The next meeting was attended by full representation of the employer and the Union—including solicitors for each. A long discussion ensued, and the history of the dispute and attempts at negotiation were recounted. Contradictions and qualifications were exchanged, and the whole situation seemed to be one attended by considerable feeling rather than business or economic considerations. It was stated on behalf of the Union that an agreement had been negotiated between Mr. Hebert, one of the bargaining representatives of the Union, and Mr. Lewis, Manager of the Employer, under the chairmanship of an officer of the Labour Department, and that all terms and conditions had been settled to the apparent satisfaction of all concerned, that the agreement had been executed on behalf of the Union and was ready for delivery. The employer admitted that negotiations had been carried on, but asserted that they had proved abortive in the end. The employer's solicitor added that any concessions made during the negotiations must now be considered as withdrawn because the agreement had not been completed.

The authority of the bargaining representatives also was denied by the employer on the ground that the certification of those representatives had been made in March, 1945, and that while the Union at that time may have had in its membership a majority of the employees, the reverse was true today, and the Union represented only a small minority and not the employees as a whole.

The meeting concluded with the proposal of a subsequent meeting to be held, at which full briefs would be submitted.

At the next meeting the Union submitted a brief containing a copy of the Certification Order; copy of the draft agreement; and certain correspondence. The Employer did not file a brief. The solicitors were informed by the Chairman that their presence at sub-

sequent meetings would be dispensed with. Two points of importance were raised. The first had to do with the Bargaining Representatives. On this point the Union spokesmen declared that whether the Union represented the majority of the employees or not was immaterial, because the Bargaining Representatives—having been chosen by the Union and certified by proper authority—are by law the only Bargaining Representatives on behalf of the Employees; and that they can be replaced only by an order of the Wartime Labour Relations Board, and that in any event there was no possibility of replacing them until after an agreement had been executed and put in force. The Board agreed with the legality of that contention.

The second point related to the agreement which the Bargaining Representatives stated had been negotiated. Mr. Lewis, Manager of the Employer Company, when closely questioned abandoned the position taken by his solicitor, and admitted that he had taken part in the alleged negotiations and that the agreement was reached setting forth all the terms that had been agreed upon; that he was quite satisfied with its terms; and that he would sign the agreement with any representatives chosen by the majority of the Employees—but he would not sign with the Union.

All attempts of the Board to persuade Mr. Lewis to execute and deliver the agreement came to naught—he was adamant.

Following up that situation, later, the Board was unanimously of the opinion they should recommend in their Report to you that the Employer execute and deliver that agreement.

However it was thought advisable to test the strength of Mr. Lewis' contention for the reason, as appeared to us, that if a canvass of the employees proved that a majority of them desired the agreement, Mr. Lewis would be morally bound, on his own words, to complete the agreement; and as the Union contended that they did represent the majority, a vote would or should bring the issue to a happy conclusion. Such a canvass could do no harm, and it might do good; it could not weaken any prospect of settlement, and might end in a signed agreement.

The Board then proceeded to take a vote. Three questions were drawn up in writing and approved by the Board. An invitation was sent to every employee to call individually and at his own convenience, at the office of the Chairman. To avoid any embarrassment or influence they were to be asked to answer those questions before the Chairman of the

Board, who was to maintain secrecy of the names to the answers. In due course 14 of the 18 employees attended individually. Twelve of these signed the questions; 2 of them refused to sign, declaring that they were not members have granted the present wage rate, nor have and were satisfied with present conditions; 4 did not attend at all, but were reported by some of the others as being wholly indifferent. A summary of the votes, with the form of questions submitted, is attached to this report.

After that vote was taken, a question was raised as to whether or not the vote might be open to the suspicion of unfairness or inaccuracy to any of the parties concerned. In order to remove any doubts on the point, the Board reassembled and decided to have a new vote taken by the Regional War Labour Board at Winnipeg. You kindly agreed to this course. Accordingly Mr. H. S. Johnstone, Chairman of the Regional War Labour Board, conducted a new vote according to the practice of that Board in such matters; and instead of the three questions which we had submitted only one simple question was submitted to each employee concerned, namely "Do you desire to have your employer sign a collective agreement?"

The report of Mr. Johnstone is also attached to this Report.

The question was submitted by mail, and the answers were opened by Mr. Johnstone in the presence of a scrutineer who had been selected by each party. The result of the vote, as now reported to us by Mr. Johnstone, is practically identical in effect with the vote we had taken.

It therefore is undoubted that only a small minority of the employees desire any such agreement. It is now useless to expect the Employer to execute the agreement. And it seems to the Board, that whatever may be the legal rights of the matter, the practical aspect is that it would be futile for this Board to recommend the execution by the employer of the drafted or any other collective agreement.

The Board accordingly make no recommendation. They think that the dispute has, at least for the present, vanished into nothingness.

Before dismissing the matter, however, the Board think it only fair to say that the Union is entitled to considerable credit for having brought about the present solution—although it never intended the solution to take the present form. The Board feel that the activity of the Union in getting Bargaining Representatives chosen and certified, and

its negotiations leading up to the agreement, had their effect. We do not say that without the Union activities the Company would not established conditions satisfactory to the employees, but we do think that the Union did exercise considerable influence in bringing the matter to a head.

Accompanying this report are the evidence and other papers filed with us in this matter,

together with the usual forms, all duly completed.

Respectfully submitted,

(Sgd.) A. K. DYSART,
Chairman.

(Sgd.) STEPHEN DUFF,
Member.

(Sgd.) R. B. GRAHAM,
Member.

Activities Under the Conciliation and Labour Act and Order in Council P.C. 4020.

OFFICERS of the Industrial Relations Branch dealt with 27 industrial disputes during the month of August, involving 63,054 workpeople employed in 175 separate establishments. Of these, 14 were new disputes which originated during the month and 13 were situations which had been unternminated as of July 31, and received further attention in August. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, and Fredericton, N.B. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and the officer resident in Fredericton, N.B., represents the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Brief summaries of some of the cases of chief interest follow:—

Logging and Lumbering Workers, British Columbia.—The June and July issues of the LABOUR GAZETTE contained reports of a strike

in the logging and lumbering industry in British Columbia and the recommendations regarding operations in the Coastal area made on June 1 by the Industrial Disputes Inquiry Commissioner, the Honourable Mr. G. McG. Sloan, Chief Justice for British Columbia, which were adopted as a basis of settlement of the strike when it was terminated on June 21.

The terms of settlement arranged by the Commissioner in respect of operations in the Interior area provided for an increase in wages of ten cents per hour "across the board". It was further agreed that common labourers, who at the time of the strike were receiving 65c. per hour, should receive an increase of an additional two cents per hour and that, before signing collective agreements, employers and the employees should have the right to negotiate the wage rates for not more than eight occupational classifications within the wage structure of any one employer. Where employers and employees were unable to agree upon the upward or downward adjustment of particular categories, it was provided that the Commissioner should make a final and binding decision in arbitration, but in the ensuing negotiations this did not prove necessary.

The final terms of settlement for both Coastal and Interior operations received approval of the Regional War Labour Board for British Columbia. The Government Controldership of box factories, shook mills and their suppliers in the Interior region was revoked by Order in Council as of August 10.

Rubber Factory Workers, Ontario.—Reference was made in the July and August issues of the *LABOUR GAZETTE* to strikes of employees at ten rubber products manufacturing plants in Ontario, which commenced on June 24. On August 22 the employees of the Barringham Rubber Company, Limited, Oakville, represented by Local 292 of the United Rubber Workers of America, accepted a company proposal as a result of which work was resumed on August 23. Under the terms of the settlement it was agreed that the employees would return to work on the understanding that the Company would meet "the increase in basic rubber pattern as set by the average of the ten companies in the rubber industry now out on strike". It was also provided that the increase in the basic wage rate would be retroactive to June 1, 1946; that an increase of eight cents per hour would be paid to all hourly rated employees until a new wage pattern was established in the industry; that working hours would be forty-four per week on the average for three shifts; that wage rates of time-and-one-half would be paid for work over eight hours per day and on Saturday afternoons;

that time-an-one-half rates would be paid for work performed on Sundays, or any higher rate which might be accepted by a majority of the other companies in the rubber industry; that an additional three cents per hour would be paid for rotating shifts, to be adjusted in line with the basic wage pattern; and that two weeks' vacation with pay would be granted employees after five years of service with the company. About 125 employees were affected by the settlement.

The strikes at the other nine plants, involving some 10,000 workers, were untermated at the beginning of September.

Street Railwaymen, Vancouver, New Westminster and Victoria, B.C.—On August 3, the Minister of Labour for British Columbia requested the Federal Minister of Labour to appoint an Industrial Disputes Inquiry Commission under Section 8 of Order in Council P.C. 4020 to investigate matters in dispute between the British Columbia Electric Railway Company, Limited, and its employees in the Cities of Vancouver, New Westminster and Victoria as represented by the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. Prior to August, the parties had for several months endeavoured to negotiate amendments to their existing collective agreement, but a settlement recommended by the bargaining committee of the union had been rejected in a referendum taken among the employees by a vote of 1,076 to 1,053. The principal feature of the eight-point plan which was rejected by the membership was an increase in wage rates of seven and one-half cents per hour retroactive to March 1, 1946. The Chief Conciliation Officer of the provincial Government had been unable to secure final agreement between the parties.

On August 3, the Minister of Labour for Canada appointed Mr. J. Edwin Eades, of Vancouver, as an Industrial Disputes Inquiry Commission to deal with the situation. On August 29, the Commissioner reported that he had succeeded in securing a mutually satisfactory settlement and that the parties had agreed upon a general wage increase of ten cents per hour, subject to the approval of the Regional War Labour Board. The settlement was ratified by a vote of the union's membership during the early part of September.

Packinghouse Workers, Various Provinces.—During August, it was reported to the Minister of Labour that negotiations for the renewal of collective agreements between Burns and Company, Limited, and Canada Packers, Limited, and the employees of a number of their meat packing plants through-

out Canada, as represented by the United Packinghouse Workers of America, had been broken off without agreement being reached. The intervention of the Federal Department of Labour was requested and, following consultation with the Ministers of Labour of the six provinces affected by the dispute, the Minister of Labour for Canada on August 20 appointed the Honourable Mr. Justice S. E. Richards, of Winnipeg, as an Industrial Disputes Inquiry Commission under Section 8 or Order in Council P.C. 4020 to endeavour to mediate between the parties with regard to the issues in dispute. Later it was reported that a deadlock had also occurred in negotiations between the union and the Swift Canadian Company Limited, and on September 5 the Honourable Mr. Justice Richards was empowered to deal with this dispute as well. As this issue of the *LABOUR GAZETTE* went to press, negotiations between the parties were still proceeding under the guidance of the Commissioner.

Metal Products Workers, Leaside, Ontario.—Following a breakdown in negotiations with respect to wage rates, hours of labour and other matters usually covered by collective agreement, between the Canada Wire and Cable Company Limited, Leaside, Ontario, and its employees represented by Local 514, United Electrical, Radio and Machine Workers of America, in consequence whereof a strike had occurred on July 8, the Minister of Labour for Ontario on August 12 requested the Federal Minister of Labour to appoint an Industrial Disputes Inquiry Commission under Section 8 of Order in Council P.C. 4020. In compliance with this request, His Honour Judge Samuel Factor, of Toronto, was appointed on August 15 to deal with the situation. At the end of the period under review the Commissioner was continuing his efforts to secure a settlement. The strike of employees was reported directly to involve 1,166 employees.

Insulating Products Workers, Hamilton, Ontario.—Charges that the Canadian Porcelain Company Limited, Hamilton, Ontario, had dismissed an employee because of union membership and activity were brought to the attention of the Federal Department of Labour on August 17 by the Minister of Labour for Ontario, who requested the appointment of an Industrial Disputes Inquiry Commission under the provisions of Section 5 of Order in Council P.C. 4020. On August 22, the Minister of Labour for Canada appointed His Honour Judge Samuel Factor, of Toronto, to investigate the charges. The union involved was the Canadian Chemical Division of the United Mine Workers of America, District No. 50.

Automobile Workers, Windsor and Chatham, Ontario.—As reported in previous issues of the *LABOUR GAZETTE*, strikes by some 3,440 employees of the Chrysler Corporation of Canada, Limited, occurred on June 18 at the plants of the Company located at Windsor and Chatham, Ontario. The employees are represented by Locals 195 and 127, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America. The matters in dispute included wage rates, hours of labour, vacations with pay and union security. The strike was first dealt with by the provincial authorities, but when no settlement could be reached, the Federal Minister of Labour on September 3, following consultation with the Minister of Labour for Ontario, appointed Mr. Leonard W. Brockington, K.C., C.M.G., of Ottawa, as an Industrial Disputes Inquiry Commissioner under Section 8 of Order in Council P.C. 4020 to investigate the situation. The Order in Council gives the Minister of Labour authority to inquire into any situation which in his opinion may interfere with the effective transition to a peacetime economy in Canada. Negotiations under the guidance of the Commissioner were still proceeding as the *LABOUR GAZETTE* went to press.

Metal Products Workers, Toronto, Ontario.—Acting upon a request made during August by the Minister of Labour for Ontario for the appointment of an Industrial Disputes Inquiry Commission under Section 5 of Order in Council P.C. 4020 to investigate the dismissal of 33 employees of Silverware Products (Canada), Limited, Toronto, Ontario, allegedly because of union membership and activity on behalf of the United Electrical, Radio and Machine Workers of America, the Minister of Labour early in September appointed His Honour Judge Egerton Lovering, of Toronto, for the purpose of making a formal investigation. It was reported that the dismissal of the employees in question followed a stoppage of work over an alleged delay in negotiations between the Company and the Union for the completion of a collective agreement.

Stationery Products Workers, Eastview, Ontario.—On behalf of the Ontario Department of Labour, an Industrial Relations Officer stationed in Ottawa conducted an investigation during August into a complaint of alleged discrimination in connection with the dismissal of 24 employees of the Capital Carbon and Ribbon Company, Limited, Eastview, Ontario. A mutually satisfactory settlement was reached, as a result of which the Company reinstated all the employees involved without prejudice and without loss of remuneration or seniority.

Electrical Appliance Workers, Hamilton, Ontario.—The appointment of His Honour Judge J. C. Reynolds, of Kingston, Ontario, to deal with a strike of some 4,000 employees of the Canadian Westinghouse Company, Limited, Hamilton, Ontario, members of Local 504, United Electrical, Radio and Machine Workers of America, was reported in the August issue of the *LABOUR GAZETTE*. The Commissioner made a report on August 7 in which he stated that he had been unable to secure any settlement; that conciliation of the dispute was not possible unless there were substantial concessions on both sides; and that he was not in a position to make any recommendation as to a basis of settlement.

The strike was untermiated at the end of the month, and on August 30 the Minister of Labour requested the Commissioner to resume his efforts to bring the parties together.

Merchant Seamen, Great Lakes and St. Lawrence River.—Conciliation of the dispute between various shipping companies operating vessels on the Great Lakes and St. Lawrence Waterways and the Canadian Seamen's Union was continued throughout August by the Industrial Disputes Inquiry Commissioner, the Honourable Mr. Justice S. E. Richards, of Winnipeg. (See *LABOUR GAZETTE* for June, July and August). On September 3rd, collective agreements were signed between the Union and several of the largest companies, namely, Canada Steamship Lines, Limited, Paterson Steamships Limited, Colonial Steamships Limited, and the Sarnia Steamships Limited.

The agreements recognized the Canadian Seamen's Union as the "sole and exclusive" collective bargaining representatives for the unlicensed personnel employed on the vessels of each of the companies. Employees covered by the agreements who were union members as of the date of the agreements, or who might later become members, required to remain members during the effective term of the agreements, which were fixed to run from August 1, 1946 to December 31, 1947. The companies agreed that all unlicensed personnel to be hired would be requested through the office of the Union and through the medium of the Seamen's Section of the National Employment Service. The actual selecting, hiring and dismissal of seamen would be in the discretion of the Master and/or Chief Engineer of the vessel. Provision was made for grievance procedure, and when the parties were unable to reach a satisfactory settlement of a grievance or dispute involving the interpretation or violation of the agreement, it

was provided that such a matter would be referred to arbitration by a Maritime Adjustment Board composed of three members. Clauses were also included providing for the election of a Ship's Delegate for each vessel, whose rights and duties were defined, and for the boarding of vessels by Union officers under certain conditions. Eight statutory holidays were recognized and rules were set out for their observance whether a vessel was on the run or in port. General wage increases were granted amounting to 12½ per cent for the remainder of the 1946 navigation season, with an additional 7½ per cent payable for the 1947 season. The increases would be equivalent in all to 7-9 cents per hour. Conditions under which overtime would be paid were also set out. The regular hours of work for unlicensed crew members were fixed at eight hours per day to be worked on a three-watch system. Final decision as to how the eight-hour day would be applied to deckhands was left in abeyance for a period of thirty days, before the expiration of which the parties would be called by the Deputy Minister of Labour to review the situation in the light of any action taken by the Dominion Government to extend the system of employing linesmen.

A more complete summary of the collective agreements will appear in the next issue of the *LABOUR GAZETTE*.

Steelworkers, Ontario and Nova Scotia.—During the course of the inquiry of the Standing Committee on Industrial Relations of the House of Commons into the strike affecting The Steel Company of Canada, Ltd., Hamilton, Ont., the Dominion Steel and Coal Corporation, Ltd., Sydney, N.S., and Algoma Steel Corporation, Ltd., Sault Ste. Marie, (see *LABOUR GAZETTE* for July and August), the Committee appointed Mr. L. W. Brockington, K.C., C.M.G., of Ottawa, as a special mediator to try to effect a settlement. Several joint and separate conferences of the parties were convened by the conciliator but he was unable to bring about a settlement.

The recommendations of the Industrial Relations Committee contained in its report to the House of Commons (which are printed in full elsewhere in this issue) referred only indirectly to the basic steel dispute. Following the adoption of the Committee's report, officers of the Department of Labour again entered into conversations with representatives of the union and the three steel companies. These negotiations reached a climax on September 6 when the Government's plan for settlement of the strike was placed before the national director of the United Steelworkers of America and

the heads of the Canadian Congress of Labour.

The plan proposed an immediate return of work of employees, with the Government Controller guarding against any discrimination by the companies or the union towards strikers or non-strikers. The Controller would apply to the appropriate wage board for wage increases and recommend that authorization for same be issued. Under the wage proposals a general increase of 10 cents per hour retroactive to April 1, 1946, would apply to the employees at the struck plants of all three companies. In addition, the employees of the Ontario companies would receive graduated increases effective from the date on which work was resumed, as follows: 2½ cents per hour for employees receiving from 64½c. to 74½c. per hour; 2 cents for those receiving from 75c. to 84½c. per hour; 1½c. for those receiving from 85c. to 94½c. per hour; and 1 cent for those receiving 95c. per hour or more. The graduated increases proposed for the employees of the Dominion Steel and Coal Corporation, Ltd., at Sydney, N.S., were the same as above except that the 2½-cent increase would be paid to the group of employees receiving from 59½c. to 74½c. per hour.

Other proposals included a minimum of six statutory holidays, to be paid for at the rate of time-and-one-half, if worked; vacations with pay of one week after one year's service, two weeks after five year's, and three weeks after twenty-five year's, effective from September 1, 1946; the question of the 5c. wage differential between the basic rates for workers at Sydney and those in Ontario to be decided by the National War Labour Board following the resumption of work; the Controller's application for wage increases, as indicated, to be without prejudice to any applications made by the union for further increases.

It was also stated that the Government "recommends and requests" that the parties refer to arbitration the questions of union security, payment for statutory holidays in a manner other than proposed in the Government's plan, and any other matters in dispute.

The Government's proposals were put before meetings of members of the local unions at Hamilton, Sault Ste. Marie and Sydney on September 8 and 9, but were rejected on a show of hands.

Foundry Workers, British Columbia.—Reference was made in the August issue of the LABOUR GAZETTE to the appointment of Mr. David Whiteside, K.C., of New Westminster, B.C., as Industrial Disputes Inquiry Commissioner to investigate matters in dispute affecting twenty-nine foundries in the Vancouver area and their employees, some being members

of Local 281, International Moulders and Foundry Workers' Union of North America (A.F.L.-T.L.C.) and some being members of Local 289, International Union of Mine, Mill and Smelter Workers (C.I.O.-C.C.L.). Work was resumed at all the foundries on August 5, following the decision of Local 289 to terminate the strike it had called at some of the foundries and to discontinue the picketing of other establishments, where Local 281 is bargaining agency for the employees. This decision was made upon receipt of an announcement that the British Columbia Regional War Labour Board would withdraw Findings and Directions which had approved joint applications from Local 281 and certain employers for general wage increases of 10 cents per hour and had rejected joint applications from Local 289 and some other employers for general wage increases of 15 cents per hour. The Commissioner's investigation was still in progress at the end of the month.

Chemical Products Workers, Amherstburg, Ont.—The appointment of Magistrate J. A. Hanrahan, of Windsor, as an Industrial Disputes Inquiry Commissioner to deal with a dispute between Brunner Mond Canada, Limited, Amherstburg, Ont., and its striking employees, members of Local 89, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, was reported in the August issue of the LABOUR GAZETTE (page 1083). The report of the Commissioner was received on August 5 and released to the parties and the press. It indicated that the four questions in dispute concerned increased wages, "union security", two weeks' vacation with pay for employees with one year of service and a shorter work week. The Company had offered a general wage increase of 10 cents per hour, subject to the approval of the Regional War Labour Board. It claimed that its present policy of providing one week's vacation with pay for all employees and two weeks for those having five year's service was in advance of prevailing practices in the district. It was "in sympathy" with a shorter work week, but believed it was impractical at present owing to the labour situation. The Company was not prepared to accept any form of union security, and would not consent to any form of arbitration of the differences existing.

Summing up the situation, the Commissioner stated that the Company had steadfastly refused to negotiate concerning "the one really controversial point remaining in this dispute", namely, some form of union security for workers. The contract had expired in November, 1945, and amendments suggested by the employees had been submitted in Sep-

tember, 1945. Members of the negotiating committee complained bitterly of what they described as the disheartening delaying tactics of the company until July, when strike action was taken. This factor, stated the Commissioner, had undoubtedly contributed to the very firm demand for some form of union security, and warranted the conclusion that it came from deeply affronted employees rather than having been inspired by union officials. The Commissioner said he had formed a clear impression that "this was not a union inspired strike".

The Commissioner also referred to "absentee policy-makers" who had apparently given to counsel for the Company "inflexible instructions to say 'no' to all suggestions as to some form of union security", and stated that this situation made further conciliation efforts with counsel regrettably futile.

The Commissioner recommended that the Minister of Labour personally intervene with a view to persuading company officials to submit the whole question to arbitration, adding that he had no doubt that this suggestion would be accepted by the workers.

On August 6 the Minister of Labour, pursuant to the Commissioner's recommendation, wired both Company and union officials endorsing the suggestion of arbitration and suggesting that it be given earnest consideration. The union replied that the question would be "discussed thoroughly". The reply of the Company took issue with the statement that the agreement had expired in November, 1945, since the union had not given formal notice of termination, and reviewed the history of negotiations, which it claimed were not at any time delayed by the company. It claimed that the union representatives had been unable to agree among themselves on certain proposed amendments, and had increased their demands during the period of negotiations. The company also charged that the Commissioner's report did not deal with the illegal aspects of the strike and the character of the picketing; that the statement that it was unalterably opposed to any form of union security was "too broad", since its opposition had been to the union shop or closed shop type of union security. The Commissioner was held to be mistaken in his understanding that the local management did not have full power to negotiate an agreement in regard to all matters. The Company also claimed that the reference to arbitration of the union security issue "on the basis of and as recommended by the report" would be unfair from the Company standpoint, and expressed doubt that the workers would accept such a recommendation. Management believed that negotiations to

settle the strike had by no means been exhausted and that they should be resumed at once either with or without the aid of a wholly disinterested person. The basis on which the company was prepared to proceed was stated.

Following receipt of the above-mentioned replies to the Minister's proposal of arbitration, the Commissioner was asked to ascertain if the new statement of the company's position offered any chance of a compromise solution, but a condition of stalemate persisted for several weeks more. As the *LABOUR GAZETTE* went to press, the Minister of Labour again intervened personally in the dispute and conversations were proceeding from which it was hoped that an early settlement would result.

Chemical Products Workers, Windsor, Ont.

—It was reported in the August issue of the *LABOUR GAZETTE* (page 1084) that the Minister of Labour had appointed His Honour Judge A. Cochrane, of Brampton, Ont., as an Industrial Disputes Inquiry Commission to deal with a dispute between Canadian Industries, Ltd., Windsor Works, and its employees represented by the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195. The report of the Commissioner was received on August 21 and promptly released to the parties and to the press.

Dealing with the four questions in dispute which had been referred to him, the Commissioner reported that it seemed apparent that the issues of shorter hours of work, provisions in the collective agreement giving formal recognition to the existing practice with regard to vacations with pay, and grievances over job evaluation, could have been disposed of readily and amicably if the other matters in dispute could have been agreed upon. With regard to the union's wage demands, the Commissioner reported that the Company had submitted an offer in writing proposing wage increases which would have the effect of increasing the average rate of the employees by 10 cents per hour. Under the new wage schedule proposed by the Company, some 346 employees would receive increases varying from 10 to 19 cents per hour, 72 would receive increases varying from 1 to 9 cents per hour, and 29 would receive no increase at all for the reason that they were presently receiving an "artificial" rate of pay, i.e., a rate higher than that approved by the Regional War Labour Board, but which rate had been in effect prior to the Board's approval. The Company also made it clear that it was prepared to reconsider the proposed wage rates at an early date in the light of wage schedules

then prevailing in other industries in the district, and if it were shown that the rates being paid by the Company were low the Company would increase them accordingly.

The union objected to the fact that under the Company's wage proposals some employees would not receive any increase, while admitting that the Company's wage scheme would probably cost it more than would the suggestions made by the union's representatives. The bargaining committee of the union maintained that any revision of wages should be based upon the increased cost of living as well as other factors, and that there should be a flat increase in wages "across the board" with provision for a review of wage differentials at a later date.

Although the Commissioner's terms of reference did not include matters relating to the union's demands for the union shop and check-off, for the reason that these had been dealt with a short time earlier by a Board of Conciliation, the Commissioner reported that it became clear during the course of his negotiations that there could be no settlement without some form of "union security" being granted and that, to the union, it was a matter of paramount importance. The Company made it equally clear that it would not go further along that line than that which had already been offered by way of extending privileges to the union stewards facilitating the collection of union dues at the Works during non-working time and on pay-days. During the course of the Commissioner's inquiry direct negotiations took place between the parties on the question of "union security" and although the matter was outside the scope of his investigation the Commissioner reported upon the attitude of the parties in that connection. He stated that at no time did the Company express willingness to grant even a modified form of "union security" and that it was obvious that at no time during the negotiations did it intend to do so. The union was, in the opinion of the Commissioner, prepared to accept a considerable modification of its original demands in this regard. The Commissioner said that he

had been advised by union representatives that over 90 per cent of the workers in the plant were members of the union, and that "this being so, the demand for some form of union security could hardly be classed as unreasonable". The Commissioner concluded that there was "at present no possibility of a settlement of any of the matters in dispute unless the Company modifies its position on this matter".

Before the Commissioner presented his report the proposals of the Company with regard to wages and other matters were presented to a mass meeting of the employees. It was reported back to the Commissioner that, apart from the matter of hours of work, the union membership rejected all of the Company's proposals. The union was prepared to recommend to its membership a settlement of the wage question on the basis of an increase of 10 cents per hour retroactive to January 1, 1946, and a further increase of 6½ cents per hour retroactive to June 27th; but on the "union security" issue, it was not prepared to recommend anything short of the Rand formula. It would also insist on provision for vacations with pay being made in the collective agreement so that the employees would receive them as a matter of right and not solely at the discretion of the management.

Following this breakdown of negotiations, the Commissioner made a further effort to find a solution, but after interviewing both Company and union representatives concluded that it was useless to proceed further. In making his report he declared that he could not see that there was anything to be gained by making recommendations with regard to the matters set forth in the terms of his appointment and he refrained from doing so.

Shortly before the LABOUR GAZETTE went to press, the Deputy Minister of Labour made an appeal to the parties to get together, stating that it was believed that their existing differences were capable of settlement by the usual collective bargaining methods. An early settlement of the dispute was anticipated as a result of the ensuing discussions.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. Because of limitation of space it is not possible to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Fur and Leather

MONTREAL, P.Q.—A. HOLLANDER AND SON LIMITED and THE INTERNATIONAL FUR AND LEATHER WORKERS UNION of the UNITED STATES AND CANADA (LOCAL 54)

Agreement to be in effect from December 1, 1945, to November 30, 1948. The company recognizes the union as bargaining agent for its members. All eligible employees must join union three weeks after employment. Check-off: the company shall deduct monthly from employees' pay, who so authorize it, union dues and assessments, which will be imposed uniformly and shall remit same to the union. Any increase or assessment to be approved by all members affected.

Hours of work: 9 per day Monday through Friday, a 45-hour week. Overtime: time and one-half for work in excess of 9 hours per day, and for all work on Saturdays, Sundays and 4 specified holidays. Christmas Day will be a holiday with pay. Vacation: one week with pay equivalent to 2 per cent of regular earnings during previous year to employees with 6 months' or more employment with the company.

Wage rates: as from December 1, 1945, all machine fleshers shall receive a 12½ cents per hour increase and all others a 10 per cent increase, while commencing December 1, 1946, all machine fleshers shall receive a further increase of 5 cents per hour and all others an additional 5 per cent increase, subject to the approval of the Regional War Labour Board.

Provision is made for seniority rights and grievance procedure.

MONTREAL, P.Q.—THE ASSOCIATION OF HANDBAG MANUFACTURERS AND THE INTERNATIONAL FUR AND LEATHER WORKERS UNION of the UNITED STATES AND CANADA, LOCAL 440 (POCKETBOOK WORKERS UNION OF MONTREAL).

Agreement to be in effect from June 27, 1946, to July 1, 1947, and until July 1, 1948, unless 60 days' notice is given. The employers recognize the union as the sole agent and representa-

tive of all eligible employees, who as a condition of employment must be members of the union. The employers agree to obtain any new help from the union if available; any others taken on must join the union within 2 weeks of starting to work. There is to be no discrimination either by the employers or workers.

Hours of work: 8½ per day Monday through Thursday, 8 on Friday, a 42-hour week. Overtime: time and one-half for all work in excess of these hours and for all work on Saturdays. Vacation: one week with pay equal to 2 per cent of gross earnings during preceding year to employees with one year's seniority in industry and at least 6 months' with present employer.

Wage rates: subject to the approval of the Regional War Labour Board all employees with at least 3 months' service with their present employers prior to effective date of present agreement shall receive an increase of \$2.50 per 42 hour week over their present weekly wages. The union and the association will meet for the purpose of determining and establishing the craft or occupational classification of employees in the factory governed by the agreement. Minimum weekly rates will be determined including those for apprentices and new apprentices employed after the effective date of agreement to be incorporated as a supplement to the present agreement.

Provision is made for grievance procedure and for division of work in slack times.

Manufacturing: Textiles and Clothing

MANUFACTURERS' GUILD AND INTERNATIONAL LADIES' GARMENT WORKERS' UNION, DRESS-MAKERS' LOCAL 262 AND DRESSCUTTERS' LOCAL 205.

Agreement to be in effect from August 1, 1946, to July 31, 1947, and for another year to July 31, 1948. This agreement is a renewal of previous agreements summarized in the *LABOUR GAZETTE* for April 1946, p. 496, with the following changes:

Hours of work: 8 per day Monday through Friday, a 40-hour week, no work to be performed or permitted on Saturday or Sunday of any week. Overtime: the first 4 hours of overtime worked in a week between 5 and 6 p.m. shall be paid for at regular rates, all overtime after 6 p.m. shall be paid for at time and one-half. Wage rates: weekly workers—10 per cent increase over actual prevailing rates; piece workers—5 per cent increase over actual piece work prices or rates prevailing. Parties agree to make joint application to Minister of Labour and/or Regional War Labour Board for authority to reduce hours and increase wage rates and also for the extension of the 40-hour week to the entire industry of the Province of Quebec as governed by the Decree 3519. Provision is also made for the setting up of a health and sick benefit fund, to which the employers shall

contribute $\frac{3}{4}$ of 1 per cent of the weekly payroll and employees $\frac{1}{4}$ of 1 per cent of their wages, the fund to be administered jointly by the employers' guild and the union.

Manufacturing: Pulp, Paper and Paper Products

THOROLD, ONT.—BEAVER WOOD FIBRE CO. LTD. AND THE BEAVER CO. LTD. AND INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, LOCAL 192 AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS. LOCAL 228.

Agreement to be in effect from May 1, 1946, to April 30, 1947, and thereafter from year to year subject to 30 days' notice. This agreement is similar to one previously in effect and summarized in the *LABOUR GAZETTE*, September, 1944, p. 1138 with the following changes:

Vacation: after 5 years continuous service 2 weeks with pay. Hourly wage rates: subject to the approval of the War Labour Board effective May 1, 1946, or should the latter decline approval of the joint application for the general wage increase and subsequently go out of existence during the current contract year the company agrees to pay the amount of the increase retroactive to May 1, 1946, if permitted to do so under the Provincial and Federal Laws and the regulations of the Income Tax Department. Rates for some classes: wood room—sawman 85 cents, labourers 76 cents; grinder room—foremen 90 cents to \$1.11, grindermen, wood handlers 85 cents, screen operator 80 cents; lapping—wet machine operator and cleaner 78 cents; continuous beater—78 and 81 cents; board mill beaters—head beaters \$1.17, others 78 to 92 cents; board machine—shift foreman \$1.47, machine tenders \$1.22, back tenders \$1.02, other machine hands 79 to 95 cents, others 78 and 80 cents; news machine—machine tenders \$1.53, back tenders \$1.36, other machine hands 86 cents to \$1.12, oilers 82 cents; steam power—engineers 98 cents and \$1.06, firemen 89 cents; electric power—operators and maintenance \$1.01; sizemen 93 cents; finishing (news) 82 cents to \$1.01; shippers 82 and 83 cents; mechanical department—millwrights, pipefitters, bricklayers, blacksmiths and carpenters \$1.01, painters 89 cents; yard—checkers \$1.01, others 76 to 87 cents, varnish makers 85 cents; sweepers 78 cents.

KAPUSKASING, ONT.—SPRUCE FALLS POWER AND PAPER COMPANY. LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 523), THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 89) AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS (LOCAL 1149).

Agreement to be in effect from May 1, 1946, to April 30, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the unions as the agencies representing all eligible employees. Maintenance of membership: any employee who is now or later becomes a member of any of the signatory unions shall as a condition of continued employment maintain such membership in good standing. New employees eligible for membership in one of the signatory unions must join such union after 30 days.

Hours of work: 8 per day, 6 days a week, a 48-hour week for both day and shift workers. Overtime: time and one-half for work in excess of the above hours and for all work on Sundays

and on New Year's day if the company elects not to operate. Three specified days are paid holidays and employees working any of these days shall receive time and one-half and a day off later on. Vacation: one week with pay after one year's service, two weeks with pay after 5 years' service.

Hourly wage rates for certain classes: robbing plant—saw filer 86 to 94 cents, sawyers 71 cents, others 66 cents; wood room—chippermen 71 cents, others 66 to 69 cents; sulphite—acid makers \$1.08, cooks \$1.15, helpers 69 to 86 cents, blowpitmen 80 cents, stockrunners \$1.03, flat screen operators 66 cents, wet machine tenders 70 cents, dry machine tenders \$1.17, back-tenders 92 cents, third hands 76 cents, fourth hands 68 cents, dry pressmen 72 cents, dry press helpers 69 cents; dryer machine—machine tenders 97 cents, cuttermen 74 to 78 cents, weighers 83 cents, bale handlers 78 cents, others 66 to 72 cents; paper mill—machine tenders \$1.89, back tenders \$1.72, third hands \$1.32, fourth hands 92 cents, fifth hands 84 cents, others 66 to 73 cents; finishing room—rollfinishers, reliefmen 69 cents, truck operators 81 cents, printer and trucker 90 cents, others 66 to 73 cents; groundwork—magazine loaders, cleaners 66 cents, stone sharpeners 96 cents, panel board operators 76 cents, grindermen 78 cents, others 66 to 71 cents; mixing room—stock-runners \$1.07, others 74 to 87 cents; steam—turbine operators 84 to 99 cents, boiler operators 72 cents, firemen 68 to 90 cents; electric boiler operators 72 cents; steamfitters 90 to 99 cents, steamfitters' helpers 74 to 81 cents, locomotive crane operators 86 to 99 cents, coal passers 69 to 72 cents; electrical—electricians 81 to 99 cents, substation operators 95 cents, assistants 66 to 76 cents, paper mill operators \$1.04, assistants 89 cents, motormen 83 cents, hydro operators 95 cents, assistants 66 to 76 cents; maintenance—machinists 81 cents to \$1.05, tin-smiths, pipefitters, millwrights, carpenters, patternmakers 90 to 99 cents, helpers 74 to 81 cents, painters 83 to 91 cents, painters' helpers 68 to 72 cents, oilers 68 to 85 cents, labourers 66 cents; technical—paper testers 76 cents, paper inspectors \$1.72, sulphite strength testers 85 cents, others 66 cents, railroad—conductors, engineers 99 cents, brakemen, firemen 87 cents, hostlers 77 cents, labourers 66 cents.

Provision is made for seniority rights, grievance procedure and an apprenticeship plan.

KAPUSKASING, ONT.—SPRUCE FALLS POWER AND PAPER COMPANY LTD. AND THE OFFICE EMPLOYEES' INTERNATIONAL UNION, LOCAL 166.

Agreement to be in effect from May 1, 1946, to April 30, 1947, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole bargaining agency for all eligible employees. Maintenance of membership: any employee, who is now a member of the union or who becomes or is reinstated as a member, shall as a condition of continued employment maintain such membership in good standing by regular payment of union dues. New employees eligible for membership shall join the union immediately unless specified as temporarily employed on probation (not to exceed 9 months). There shall be no discrimination imposed upon any employee for union or non-union membership or activity.

Hours of work: schedule of hours of work shall be arranged by the company giving due consideration to the preference and convenience of employees. However, no schedule will be arranged to exceed present schedules without

consultation with the union. Overtime: company agrees to maintain sufficient clerical staff to avoid excessive overtime work. Employees covered by the agreement, except those engaged in the hotel and laundry, shall be allowed 5½ specified statutory holidays. When an employee (other than hotel and laundry) is required to work on one of these days he shall be entitled to a day off if he works ¾ a day or more and to a day and one-half off for working a full day. Vacation: 2 calendar weeks with pay for employees employed by company prior to the first of the year. If these employees take 2 weeks at one time they shall be given from the Friday noon before till the Monday noon following their 2 weeks.

Monthly wage rates: messengers and assistant checking clerk \$70 to \$100, junior clerks, sample boy and checking clerk \$90 to \$140, stenographers, clerk, assistant clerk, typist and laboratory assistant \$100 to \$140, in latter two groups individuals without commercial training nor previous business experience may be hired at \$80 and \$90 respectively for a 9 months probationary period; clerks, senior stenographers, telephone operator and paper day tester \$120 to \$160; warehouseman, apprentice draughtsman and statistics clerk \$120 to \$170; employment clerk, compensation clerk and secretary \$140 to \$185; various clerks and car checker (railroad) \$140 to \$200; clerks, material man, statistician and assistant timekeeper \$170 to \$225; planner, cashier and clerks \$195 to \$255; internal auditor, assistant cost accountant and clerks \$250 to \$310; shipper, mill accountant, timekeeper and traffic supervisor \$280 to \$340.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Metal Products

BEDFORD, P.Q.—THE TORRINGTON COMPANY LTD. AND THE NATIONAL UNION OF NEEDLEWORKERS, LOCAL 1.

Agreement to be in effect from October 22, 1945, to October 21, 1946, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees.

Hours of work: 9 per day Monday through Friday, 5 on Saturday, a 50-hour week. Overtime: time and one-half for work in excess of 50 hours in a week and for all work on Sundays and 11 specified holidays. Men called out for emergency work at night will also be paid at time and one-half. Vacation: one week with 50 hours pay to employees with one or more years' continuous service, to those with 9 months' service one week with 30 hours pay, to those with 6 months' service one week with 20 hours pay, and to those with 3 months' service one week with 10 hours pay. No vacation pay will be granted employees with less than 3 months' service.

Wage rates of all employees covered by the agreement shall be increased by 5 per cent over the regular rate. The schedule of hourly rates and piece work rates fixed by the company is available to the union president. Male employees 18 years old or over after 3 months employment shall be paid a minimum of 40 cents per hour and female employees and male employees under 18 years a minimum of 30 cents per hour on day work operations only. A 5 cents per hour night shift premium shall be paid to employees who work on a night shift. The union may reopen the matter of pay dif-

ferential for working shifts if the company should decide to operate multiple shifts.

Provision is made for seniority rights, grievance procedure, leave of absence to not more than 2 employees at a time to attend union conventions, and for necessary protective devices and other equipment for the purpose of protecting employees from injury.

BRANTFORD, ONT.—COCKSHUTT PLOW COMPANY LTD. AND THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 458.

Agreement to be in effect from March 25, 1946, to March 24, 1947, and thereafter from year to year subject to 10 days' notice. The company recognizes the union as the sole and exclusive bargaining agency for all eligible employees. Check-off: the company agrees to deduct, upon the member's authorization, the initiation fee and the monthly union dues from the employee's pay and remit to the union. There shall be no discrimination because of membership or non-membership in the union.

Hours of work: either 43½ or 48 per week according to type of work performed, that is, 8½ hours Monday through Friday, or 10 on Monday and 9½ Tuesday through Friday. Overtime: time and one-half for work in excess of 48 hours a week, and for all work on Sundays and 6 specified statutory holidays. Vacation: one week with pay for employees with one or more years' seniority. A recess period of 10 minutes will be allowed each morning. Female employees shall be allowed to quit work at the end of each half shift 5 minutes before the regular time.

Wage rates presently in effect shall be maintained for the duration of the agreement. Neither party shall make an application to the Regional or National War Labour Boards until it has discussed the matter with the other party.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Non-metallic Minerals and Chemicals

MONTREAL, P.Q.—MONTREAL COKE AND MANUFACTURING COMPANY AND INTERNATIONAL CHEMICAL WORKERS' UNION, LOCAL 238.

Agreement to be in effect from October 30, 1945, to November 1, 1946, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as exclusive bargaining agency for all eligible employees. There shall be no discrimination because of membership or non-membership in the union. Checkoff: the company will, upon employee's authorization, deduct union dues from employee's pay and remit same to the union.

Hours of work: 8 per day, six days per week, a 48-hour week, except garage employees who work 54 hours per week, trimmers who shall work at any time to load or unload boats and coal transfer operators who may work 12 hours per day but receive overtime after 48 hours per week. Overtime: time and one-half for work in excess of the above hours and for all work on the seventh day and on seven specified statutory holidays. Vacation: 7 days with pay for all employees with one year's seniority and an additional day for each year of service more than 7 up to a maximum of 14 days.

Hourly wage rates (subject to the approval of the Regional War Labour Board) including 3 cents per hour increase, include: coal handling

—operators 73 to 83 cents, flue dust man 58 cents; coke handling—operators 73 cents, truck loader 68 cents; ovens—assistant heater, machine men and chief patcher 88 cents, other labour 85 cents; by-product—engineers 76 to 85½ cents, saturator 73 cents, stillman 68 cents, utility utility man 62 cents and purification 58 cents; producers—engineers 76 to 85½ cents, charger 73 cents, ashman 68 cents; mechanical—machinist 90 cents, boiler maker, welder and mechanic class "A" 86 cents, mechanics class "B" "C" & "D" 73 to 83 cents, blacksmith and pipefitters 83 cents, carpenter 79 cents, handyman 69 cents, oiler and greaser 68 cents; electrical—electrician 83 cents, helper 73 cents; steam station—engineers 78 to 85½ cents, firemen 73 cents, boiler patcher 63 cents; laboratory—chief sampler 78 cents, sampler 68 cents; locomotive and crane crew—crane operator 83 cents, locomotive engineer and brakeman 78 cents, fireman, crane greaser and night hostler 68 cents; coal boat trimmers—signal man 88 cents, bucket man 84 cents and shovel man 74 cents; garage—truck mechanic 73 cents, drivers 63 cents, helpers 58 cents; labour—track man and labourer dumping oxide box 63 cents, all other labourers 58 cents.

Provision is made for seniority rights and grievance procedure.

MONTREAL, P.Q.—THE MARTIN-SENOUR COMPANY LTD. AND THE UNITED MINE WORKERS OF AMERICA, LOCAL 13077.

Agreement to be in effect from October 25, 1945, to October 24, 1946, and thereafter from year to year subject to notice. The company recognizes the union as the sole and exclusive bargaining agent for all eligible employees. Check-off: company to deduct, upon employee's authorization, union dues from employee's pay monthly and remit same to the union.

Hours of work: 9 per day Monday through Thursday, 8 on Friday, a 44-hour week. When two shifts are used the night shift will work a 5 day week as above but the day shift will work 8 hours per day Monday through Friday and 4 hours on Saturday. Overtime: time and one-half for work in excess of these hours, double time for all work on Sundays and 7 specified holidays, 4 of which are paid holidays providing the employee works on the first working day following the holiday unless prevented from so doing by sickness. Vacation: one week with pay to employees with one year's continuous service, 2 weeks with pay for those with 5 or more years' continuous service. Ten minute rest periods will be granted employees during morning and afternoon. A five minute wash-up period before quitting time will be granted all employees except those in the mixing department who will be allowed 15 minutes.

Starting hourly wage rates: Male employees, paint factory—labourers 55 cents, helpers 57 cents, cappers 58 cents, fillers 59 cents, mixers and millmen 61 cents, shaders 62½ cents and charge hands 67½ cents; varnish factory—labourers 55 cents, helpers 57 cents, fillers 59 cents, pumpmen 62 cents, thinning men 63 cents, cooks and charge hands 67½ cents; receiving, packing and shipping—labourers 55 cents, helpers 57 cents, packers 59 cents, shippers and receivers, warehousemen 60 cents, charge hands 67½ cents; insecticide production—labourers 55 cents, fillers 59 cents, charge hands 67½ cents; general department—an overall increase of 5 cents per hour over present rate to all employees in this department (except fourth class

engineers and youths) to be considered as increases to individual employees and not as new rates for the different jobs. Youths will be paid 38 cents per hour, unless assigned work ordinarily done by men. Female employees—labellers 38 cents, cappers 41 cents, labelling machine operators, fillers 43 cents; fillers to receive 5 cents extra when filling shellac, insecticides, aluminum, gold bronze and paint remover. Two increases of from 2½ to 6 cents per hour each may be granted to individual employees according to merit. A premium of 5 cents per hour will be paid to employees working on the night shift.

Provision is made for seniority rights, grievance procedure, a group insurance plan and a Labour-Management Committee.

Construction

CALGARY, ALTA.—DECORATING CONTRACTORS ASSOCIATION (CALGARY BUILDERS' EXCHANGE) AND INTERNATIONAL BROTHERHOOD OF PAINTERS, DECORATORS AND PAPER-HANGERS OF AMERICA, LOCAL 583.

Agreement to be in effect from July 1, 1946, to June 30, 1948, and thereafter from year to year by mutual consent in writing; six months' notice required for any change.

Hours of work: 8 per day Monday through Friday, a 40-hour week. Overtime: time and one-half for work in excess of these hours and for first 8 hours on Saturday; double time after 8 hours on Saturday and for all work on Sundays and 8 specified holidays.

Wage rates: \$1 per hour for paper hangers and painters in any capacity. Rate of pay for extra hazardous work to be settled by negotiations between employer and employee. Where a night shift is employed 8 hours' pay shall be paid for 7 hours' work. Any man acting as foreman to 3 or more journeymen shall receive 10 cents per hour extra.

Provision is made for an apprenticeship plan and grievance procedure.

CALGARY, ALTA.—THE CALGARY GENERAL CONTRACTORS ASSOCIATION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 1779.

Agreement to be in effect from July 1, 1946, to April 1, 1948, and thereafter from year to year by mutual consent. Sixty days' notice must be given by either party desiring to change, add to or amend the agreement.

Hours of work: 8 per day Monday through Friday, a 40-hour week. Overtime: time and one-half for work in excess of the regular hours; double time for work on Sundays and 8 specified holidays. No work on Labour Day except where safety to life or property make it necessary.

Wage rates: \$1.10 per hour minimum, any time worked after 5 p.m. or before 8 a.m. shall be paid for at the rate of time and one-seventh if these hours are part of the regular 8 hour shift. Foremen in charge of work shall be paid at least 10 cents per hour extra.

EDMONTON, ALTA.—GENERAL CONTRACTORS ASSOCIATION AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 1325.

Agreement to be in effect from June 13, 1946, to March 31, 1947, and thereafter sub-

ject to 60 days' notice. The association recognizes the union as the exclusive bargaining agency for all carpenters. Union members to be given preference of employment when available.

Hours of work: 8 per day Monday through Friday, 4 on Saturday, a 44-hour week. Overtime: time and one-half for work in excess of the regular hours, double time for all work

on Sundays and 7 specified holidays. In cases where more than one shift is worked in 24 hours the day shift only may be 8 hours, all other shifts shall be $7\frac{1}{2}$ hours work for 8 hours pay.

Wage rates: \$1.10 per hour minimum. Carpenters in charge of work with a crew of 5 or more shall be paid a minimum of 10 cents per hour extra.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, p. 86. Proceedings under this act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of ten new agreements, the amendment of thirteen others and the correction of three of them, all of which are noted below. Requests for the amendment of the agreements for building trades at St. Jerome, for the dress manufacturing industry for the province, for building trades at St. Jerome, for both the work glove and the fine glove industries for the province, for bakers at Granby and for building trades at Sherbrooke were all gazetted July 27. Requests for amendments of the agreements for men's and boys' hat and cap industry for the province and for the wholesale fur industry at Montreal were published August 3. A request for the addition of one party to the agreement covering clerks and accountants at Jonquière, as well as requests for a further amendment of the building trades' agreement at St. Jerome and for an amendment of the barbers' and hairdressers' agreement at Valleyfield were gazetted August

10. Requests for amendments to the agreements for the corrugated paper box industry for the province, for barbers at Rouyn and Noranda, for retail stores at St. Hyacinthe and for the fur industry at Quebec were gazetted August 17.

Orders in Council were also published approving the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated July 17, and gazetted July 27, amends the previous Orders in Council for this industry (L. G., Mar., 1945, p. 349, April, p. 517; May, 1946, p. 627; June, p. 782, Aug., p. 1092). "Le Syndicat National des Tanneurs et Corroyeurs inc." of St. Hyacinthe is added as a co-contracting party. Hours of work are distributed as follows: stationary enginemen and maintenance men (millwrights) 11 hours per day from Monday to Friday inclusive, 5 hours Saturday morning; all other employees, except watchmen, 10 hours per day from Monday to Friday inclusive and 5 hours Saturday morning.

SHOE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated July 31, and gazetted August 3, and corrected in the August 10 issue, makes obligatory the terms of an agreement between "La Fédération Nationale du Cuir et de la Chaussure du Canada Inc.", the Boot and Shoe Workers' Union, "L'Association des Travailleurs en Chaussures inc." and L'Association patronale des Manufacturiers de Chaussure du Québec." Agreement to be in effect from August 3, 1946, to September 1, 1947, and thereafter from year to year, subject to notice. Territorial jurisdiction is as follows: Zone I comprises the Island of Montreal and within 5 miles from its limits; Zone II the city of Quebec and within 5 miles from its limits; Zone III the remainder of the Province of Quebec. Agreement applies to both male and female workers employed in all operations of the shoe industry, except the manufacture of rubber or composition of rubber molded to shape, rubber heels molded to shape and wooden heel blocks, the rubber part of shoes with uppers fabricated entirely or partially with cemented rubber and any material which, although used in the manufacture of shoes, does not constitute a part of the shoe proper.

Hours: 55-hour week, with the exception of foremen. Eight specified holidays are observed.

Vacation: one week with pay annually after one year's service, at 2 per cent of wages earned by employee from June 1 to May 31 preceding vacation week. An employee is entitled to one week's vacation with pay, if he has worked at least 6 months for the same employer.

The number of male apprentices in a factory must not exceed 10 per cent of the total number of male employees in classes 1, 2, 3 and 4.

Wages: There are six main classes, minimum rates for which are shown in the accompanying table. Operations included in each class are as follows:

Class 1: in the pattern maker department—designing patterns, cutting out pieces from original pattern, grading patterns; in the cutting department—cutting outside, cutting openings, straps and strips cutting or emptying cutout with knife by outside cutter, examining after cutting; in the sole leather department—cutting up, stripping sole leather, cutting in leather the sole and tap sole, stripping, levelling, jointing welt, sorting sole, channelling, preparing heel; in the lasting department—pulling over (including glueing, laying box toe), pulling and tacking counter, lasting by machine, lasting by hand, slicking upper to last, sewing by hand upper of moccasin or boot, fixing welt, cobbler (who lasts, stitches and repairs); in the making department—rough rounding, trimming sole before stitching, sewing (also cementing pigging, standard screw, loose nailing) sole or shoe, heeling, trimming heel, scouring heel, trimming edge, fixing skate; in the finishing department—edge setting on machine, treeing; in the sewing department—stitching vamp or outside counter.

Class 2: in the cutting department—cutting outside of Indian specialties; in the sole leather department—recutting block soles, cutting in leather insole, middle sole, slip sole, top piece, box toe, counter, heel pad, shank, lift, rounding insole, sorting leather insole, fairstitching; in the lasting department—moulding counter in upper, assembling, covering insole, blocking soft sole slippers, turning upper, laying sole with tacks or staples, cement process; in the making department—fairstitching, levelling bottom, slugging heels; in the finishing department—sanding sole.

Class 3: in the pattern making department—binding or welding pattern; in the cutting department—cutting lining (except leather), cutting soft leather sole, crimping; in the sole leather department—cutting in any material except leather, the sole, tap sole, insole, middle sole or slip sole, cutting, rolling, splitting and sorting head, belly and pieces, skiving sole or insole, skiving cookie or counter, moulding sole or insole, pressing heel on automatic press; in the lasting department—placing last in upper, lasting heel seat on automatic machine, forming toe or counter on machine, blocking baby soft sole shoes, pounding upper, trimming insole, inspecting, ironing or flaming upper after lasting or blocking, welt and stitchdown processes, blocking, sewing Indian specialties; in the making department—nailing heel seat, nailing sole on wedge heel, pressing wooden heel, nailing shank or toe, gouging heel breast, separating stitches, trimming crepe sole, jointing, scouring edge; in the finishing department—edge setting on wheel or brush, veneering, stoning or burnishing heel, finishing bottom.

Class 4: in the pattern maker department—tracing and cutting out patterns; in the cutting

department—cutting lining in leather or imitation leather, cutting or emptying cutout with knife by lining cutter; in the sole leather department—cutting lifts, half lifts from leather remnants, skiving sole edge (cement process), trimming middle sole, slip sole and shank, opening channel, building and tacking leather heel, cementing and glueing rands; in the lasting department—glueing counter, placing counter in upper, lasting cover by machine or by hand, lasting heel seat of slippers with cement, steaming upper of slipper, beating welt and seam, skiving and tacking welt end; in the making department—opening channel, rubbing down stitch, trimming lip of Louis heel, sanding heel breast, trimming corner of sole for cuban wooden heel, scouring heel breast, fudge wheeling; in the finishing department—cutting cutout with knife, beating toe or counter, examining, cleaning, repairing.

Class 5: in the pattern maker department—filing, sanding and stamping patterns; in the cutting department—cutting from remnants lining in leather or imitation leather, cutting openings, perforating with die; in the sole leather department—cutting in any material except leather, the top piece, box toe, counter, shank, heel pad, filler lift, cutting reinforcement, bevelling by hand, gauging sole by machine, sorting according to check, sorting leather remnants by size, splitting, skiving, gimping and moulding counters, splitting sole for full breast heel, perforating heel of sole or perforating for rivets, roughing edge of sole (cement process), splitting sole to obtain an insole, gouging middle sole or slip sole, setting duck on insole, riveting shank piece, fudge wheeling, pressing heel by hand; in the lasting department—tacking insole, trimming insole, turning slippers and baby soft sole shoes, inserting fibre sock lining, filling bottom, tracing shank (cement), cementing edge of upper, first pulling out of last, turning over Indian specialties, pulling out last, glueing lining; in the making department—shank reducing after rough rounding, trimming heel seat of the sole, sorting heels, sanding or scraping wooden heel breast before glueing lip, wetting, adjusting, glueing lip, nailing plate, top piece on heel, inserting, adjusting top piece in plate, relating, passing welt knife, cutting and pinching welt; in the finishing department—dressing, greasing, wheeling, stamping, bleaching, staining, washing, sponging, gumming, waxing unbuffered bottom, making traced panel, punching bird's eye, staining edge, brushing, cleaning upper, pulling out last, nailing wooden heel after taking out screw, trimming lining, laying metatarsal, cookie, sock lining, heel pad, creasing, moulding counter, ironing lining, spraying or dressing, steaming shoe, lacing, singeing thread ends, labelling, stamping sizes on boxes, inspecting shoe, pairing, boxing, packing, shipping, elevator operators.

Class 6: in the pattern maker department—pattern-maker's helper; in the cutting department—helper; in the sole leather department—slashing sole or insole for flexing, bevelling by machine, flexing on machine, embossing sole, marking size, sanding before laying box toe, shank, counter, insole, sole, heel, laying cookie, staining sole, viscolizing sole, cementing, glueing, wetting, staining when such operations do not belong to another class, building and tacking fibre heel, sanding, cementing, fixing rubber top piece on heel base, heel breasting before fixing; in the lasting department—sorting lasts, chalking last, placing upper on last, glueing lining, laying box toe; pulling out tacks, trimming

upper after lasting, tacking shank piece or filler, cutting twine, unbuttoning, returning lasts to bins, cementing, glueing, wetting, shel-lacking, staining, when such operations do not belong to another class; in the making department—cementing, rubbing own channel, cutting threads, filling bobbin, feeding heeling machine, wetting edge for trimming, opening sole edge, sanding heel seats, removing air from sole; in the finishing department—staining edge or heel, veneering, taking out screw, embossing sock lining, washing or cleaning lining, mopping shoe after treeing, inserting bamboos, wiping edge, messengers and sweepers.

In addition to the above six classes found in the above mentioned departments, the sewing department employees are divided into:

Class A: operations made by hand or machine on the outside part of the upper. Class B: operations made by hand or machine on the lining of the upper. Class C: other operations in this department.

Piece rates: the Joint Committee may accept piece rates instead of hourly rates provided they do not pay less than the minimum hourly rates and that the so established rates are equivalent to the rates paid for similar work in the majority of the shops of the same zone.

FUR INDUSTRY (RETAIL), MONTREAL AND
DISTRICT

An Order in Council, dated August 7, and gazetted August 10, amends the previous Orders in Council for this industry (L.G., Nov., 1944, p. 1363; April, 1945, p. 517, Aug., p. 1197, Oct., p. 1520). Present agreement to remain in effect until May 1, 1947, and thereafter from year to year until notice. Minimum weekly wage rates: cutters \$44.80 and \$52, operators (male) \$33.60 and \$40.80, operators (female) \$26 and \$32, male finishers \$30 and \$36.40, female finishers \$26 and \$32, blockers \$24 and \$32.80, female coat closers \$32, lining makers who cut and sew \$30, finisher foreladies and female finishers who distribute work to others or who themselves execute entire finishing work \$34, apprentices from \$11.20 during first 6 months to \$20 during fifth 6 months, apprentice cutters or trimmers from \$33.20 during first 6 months to \$42 during sixth 6 months. Any apprentice employed more than half the working time each week in operations

of a higher class than his, shall receive the hourly rate of the class in which he is working. For the territory outside the Island of Montreal in a town of less than 25,000, the above rates may be 15 per cent lower except for apprentices whose minimum rates may not be reduced.

The 40-hour week on the Island of Montreal may be increased to 44 hours at regular rates of pay in the months of September to December inclusive. (The original agreement allowed a 48-hour week in these months.) Outside the Island of Montreal (formerly on a 48-hour week) the regular working week is now 44 hours which may be increased to 48 hours in the months of September to December inclusive.

Manufacturing: Textiles and Clothing

CLOAK AND SUIT INDUSTRY, PROVINCE OF
QUEBEC

An Order in Council, dated July 17, and gazetted July 27, extends the term of the agreement (L. G., July, 1943, p. 989; May, 1944, p. 637; Aug., 1946, p. 1093, and previous issues) to October 1, 1946.

DRESS MANUFACTURING INDUSTRY, PROVINCE
OF QUEBEC

An Order in Council, dated July 17, and gazetted July 27, extends the term of the previous Orders in Council for this industry (L. G., April, 1945, p. 517; May, 1946, p. 627, July p. 930, and previous issues) to November 1, 1946.

EMBROIDERY INDUSTRY, MONTREAL

An Order in Council, dated July 17, and gazetted July 27, extends the term of the previous Order in Council for this industry (L. G., Dec. 1944, p. 1514) to October 1, 1946.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX INDUSTRY (UNCORRUGATED),
PROVINCE OF QUEBEC

A correction of the Order in Council (L. G., August, 1946, p. 1093) was published in the *Quebec Official Gazette* July 27. This correction does not affect the summary already given.

Another Order in Council, dated August 7, and gazetted August 10, amends the previous Orders in Council for this industry (L. G., Aug., 1945, p. 1197, Oct., p. 1520; Mar., 1946, p. 317, Aug., p. 1093). Minimum hourly rates in Zone I: Females—foreladies 38 cents; hand-work, first class, S & S machine operators, top-piece machine operators, covering machine operators, staying machine operators, tiers, stitchers, four-corner machine feeders 32 cents; hand-fed table gummers 28 cents; non-classified help 25 cents; apprentices 20 and 10 per cent less than minimum rate. The average minimum wage for females, including apprentices, shall not be less than 32 cents per hour. Males—foremen 68 cents; scorers, machinists 60 cents; cutters on knife 53 cents; end-piece operators, truck drivers 48 cents; Brightwood machine operators, four-corner stayer operators, automatic glueing machine operators 54 cents; Brightwood machine feeders 35 cents; splitter operators, circular saw operators 43 cents; bale press operators, maintenance and repairmen, assistant die makers 45 cents; punch operators 40 cents; shippers, cut press operators 52 cents; die makers 68 cents; cylinder box press operators 55 cents; cylinder box press feeders, cut press feeders 41 cents; strippers 30 cents;

stationary enginemen: chief enginemen \$36.95 and \$42.95 per week; other enginemen from 52 to 68 cents per hour; boiler firemen 42 cents; non-classified help 30 cents; apprentices 20 and 10 per cent less than minimum rate. Average minimum rate for male employees shall not be less than 50 cents per hour.

Work performed on any of the specified holidays is now payable at double time.

Apprentices: apprentices not to exceed 20 per cent of the total number of employees engaged in the classified operations, apprentices to serve one year.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

An Order in Council, dated July 17, and gazetted July 27, extends the term of the previous Orders in Council for this industry (L.G., Feb., 1946, p. 187, April, p. 499, July, p. 930, and previous issues) to October 1, 1946.

An Order in Council, dated August 7, and gazetted August 10, makes obligatory the terms of an agreement between "L'Association des Maitres Imprimeurs de Montreal, Inc.", Employing Printers Association of Montreal, Inc. and "La Fédération des Métiers de l'Imprimerie du Canada Enrg.", "Le Conseil Syndical des Métiers de l'Imprimerie, Inc.", "Le Syndicat National des Typographes, Inc.", "Le Syndicat National des Pressiers No. 1 de Montreal, Inc.", "Le Syndicat National des Relieurs, Inc.", "Le Syndicat de l'Industrie de l'Imprimerie de Hull.", "Le Syndicat des Imprimeurs de St-Jean, Que.", "Le Syndicat National des Imprimeurs de la Prairie, Inc.", "Le Syndicat National des Employés en Imprimerie de Joliette, Inc." The International Typographical Union, Local 176, The International Typographical Union, Local 145", The International Printing Pressmen & Assistants' Union, Local 52, The International Brotherhood of Bookbinders, Local 91.

Agreement to be in effect from August 10, 1946, to August 9, 1947, and thereafter from year to year, subject to notice. The agreement does not apply to the publication of daily newspapers and certain other exceptions.

Territorial jurisdiction includes the Island of Montreal and within 100 miles from its limits, in the Province of Quebec and is divided as follows: Zone I, the Island of Montreal and within 10 miles from its limits; Zone II, East Templeton, Granby, Hull, Joliette, St. Hyacinthe, St. Jean d'Iberville, St. Jerome, Sherbrooke, Sorel, Three Rivers and Valleyfield and within 2 miles from their limits, with the exception of establishments in Zone II which as at June 15, 1946, were publishing and printing one or more weekly newspapers; Zone III the remainder of the territorial jurisdiction and all those establishments which were excepted from Zone II.

Hours: until January 1, 1947, a 43-hour week in zone I, 47 in zones II and III; on or after January 1, 1947, and until January 1, 1949, the weekly hours of work are decreased annually by one hour in all zones, making the hours from January 1, 1949, 40 hours in zone I, 44 hours in zones II and III.

Overtime shall consist of all time worked by any employee before or after the regular hours of his shift and shall be paid at time and one half for the first 3 hours and double time thereafter. Double time for work between noon Saturday and 7 a.m. Monday; double time for

work on 8 holidays in French shops and 7 holidays in English shops. Holidays with pay: on the same 7 holidays in English shops, and on 7 of the holidays in French shops, regular rates to be paid although no work is done.

Minimum wage rates for day work are shown in the accompanying table. All employees on night shifts to be paid 15 per cent over the hourly rate for day workers. Piece work is prohibited.

Vacation: After one year's services employees entitled to vacation with pay or pay in lieu of vacation on the basis of one-half day for every 25 days of actual work computed from the date of termination of the preceding year's vacation.

Apprentices: The maximum number of apprentices in each department on each shift is limited to one to each three journeymen or fraction thereof. Until August 1, 1948, the parity committee may permit an establishment to hire one apprentice in excess of the ratio to allow a veteran to resume or commence his apprenticeship. Apprentices to serve 6 years. The number of female apprentices shall not exceed one third of the total number of female employees; female apprentices to serve two years.

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, SHERBROOKE

An Order in Council, dated August 7, and gazetted August 10, makes obligatory on this industry the terms of a new agreement between certain garages and service stations in the Sherbrooke district and "L'Association des Employés de l'Auto-Voiture des Cantons de l'Est, Inc.". Agreement to be in effect from August 10, 1946, to August 9, 1947, and thereafter from year to year until notice. Territorial jurisdiction comprises the city of Sherbrooke and all municipalities within a radius of 10 miles from its limits. The agreement governs professional employers, artisans and employees in garages, gasoline stations, service stations, parking grounds, scrapping yards and machine shops.

Hours: in garages, a 9-hour day, 5 on Saturday; in gas stations, an 11-hour day from May 1, to October 1, 9 hours during the rest of the year. Overtime to be paid at time and one-half, double time on Sundays and 12 specified holidays.

Minimum wage rates: journeymen wheelwrights, machinists, electricians, mechanics, glaziers, painters, upholstery cleaners, dyers, vulcanizers, bodymen, blacksmiths, upholsterers and testers from 52 to 67 cents per hour; journeymen radiator repairers and welders 67 cents, apprentices 35 first year and 45 cents second year; greasers 45 and 50 cents; journeymen vulcanizers 67 cents, apprentices 35 first year and 45 cents second year; stock room clerks in garages \$27 and \$35 per week, apprentice stock room clerks \$12 to \$20 per week after 4 years; apprentices in all other categories from 20 in first year to 40 cents per hour in fourth year; night service men 38 cents per hour; day service men 45 cents; gas station—head clerk \$35 per week; clerks from \$16 to \$22 during third year. Vacation: one week with pay after one year's service.

Provisions are made for apprenticeship regulations, uniforms and tools. No home work may be performed.

CLOCKMAKERS, MONTREAL.

An Order in Council, dated July 17, and gazetted July 27, amends the previous Orders in Council for this industry (L.G. Nov. 1943, p. 1530; Aug., 1944, p. 1007, Dec., p. 1515; May, 1946, p. 628). This amendment does not affect the summary already given.

Construction**BUILDING TRADES, JOLIETTE.**

An Order in Council, dated July 17, and gazetted July 27, amends the previous Orders in Council for this industry (L.G., May, 1940, p. 498; Mar., 1941, p. 334; June, 1942, p. 738; Sept., p. 1097; Feb., 1943, p. 220; July, 1944, p. 867; June, 1945, p. 873). Present agreement to remain in effect to February 28, 1947, and thereafter from year to year until notice.

BUILDING TRADES, SAINT JOHN AND IBERVILLE.

An Order in Council, dated July 17, and gazetted July 27, amends the previous Orders in Council for this industry (L.G., Feb., 1943, p. 220; July, 1944, p. 867; Mar., 1945, p. 349; May, p. 721, and previous issues). This amendment does not affect the summary already given.

BUILDING TRADES, MONTREAL.

An Order in Council, dated July 31, and gazetted August 3, with correction in the issue of August 10, makes obligatory the terms of an agreement between The Builders' Exchange, Inc., of Montreal, the Insulation Contractors Association; and "Le Conseil des Syndicats des Métiers de la Construction de Montreal", The Building and Construction Trades Council of Montreal and Vicinity. Agreement to be in effect from August 3, 1946, to September 1, 1947, and for 30 days more if necessary, pending the adoption of a new agreement. It applies to all engineering construction and building operations, landscape work (except maintenance landscape work), road work and all erection, repair and demolishing undertakings. Territorial jurisdiction comprises the Island of Montreal and within 15 miles of it and the City of Salaberry-de-Valleyfield; however, outside the Island of Montreal it does not apply to labourers nor to building operations costing less than \$25,000. The agreement does not apply to municipal or railway employees. For the elevator trades the structural steel trade, the trade of steam generating mechanics, boiler-makers and reinforcing steel erectors, the entire province of Quebec is included except in such places where a ratified collective labour agreement is in effect for these trades.

Hours: for qualified tradesmen, 8 per day, 4 on Saturday, a 44-hour week; for landscape workmen, shovel operators and pile driver men, team drivers, general trucking, cartage and hauling 55 per week; for common labourers and for mastic floor workmen, cement finishers and roofers other than sheet metal roofers, when necessary, 9 per day, 50 per week; for linoleum and tile layers, etc., 48 per week; for road construction 60 per week.

Overtime: time and one-half to midnight; after midnight and all work on Sundays and 11 specified holidays double time.

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (OCEAN NAVIGATION), MONTREAL

An Order in Council, dated July 17, and gazetted July 27, makes obligatory the terms of a new agreement between certain shipping and stevedoring companies and the International Longshoremen's Association, Local 375. Agreement to be in effect from July 27, to December 31, 1946, and thereafter from year to year, subject to notice. Territorial jurisdiction comprises the Harbour of Montreal.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, October, 1940, page 1075, and December, 1938, page 1423, with the principal changes as follows:

Hours: the starting time for day work shall be between 8.00 a.m. and 8.30 a.m. and between 1.00 p.m. and 1.30 p.m.

Wages: basic hourly wage rates are \$1 per hour for day work, \$1.20 per hour for evening work, and \$1.50 per hour for night work. Rates for special cargoes, specified in agreement, are \$1.15 per hour for day work, \$1.35 per hour for evening work and \$1.72½ per hour for night work. Double time shall be paid for work on ships in port with cargoes on fire. When men are ordered out to work at night, a minimum of 2 hours shall be paid whether men are put to work or not. Orders for men required at 7.00 p.m., who have not been working during the afternoon, shall be given on or before 1.30 p.m.

SHIPLINERS (OCEAN NAVIGATION), MONTREAL

An Order in Council, dated July 17, and gazetted July 27, makes obligatory the terms of a new agreement between certain shipping and stevedoring companies and the International Longshoremen's Association, Local 1552. Agreement to be in effect from July 27, to December 31, 1946, and thereafter from year to year, subject to notice. Agreement covers all fitting of ocean vessels lying in the Harbour of Montreal for grain and cattle and all woodwork in connection with the stevedoring gear, except where permanent gear men are employed.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, November, 1940, page 1203 and December, 1938, page 1424, with the following exceptions:

Hours: starting time for day work shall be between 8.00 a.m. and 8.30 a.m. and between 1.00 p.m. and 1.30 p.m.

Wages: basic hourly wage rates are \$1 per hour for day work, \$1.20 per hour for evening work and \$1.50 per hour for night work. Work in holds of steamers, in which bulk sulphur or bulk fertilizer has been stowed and where old wood is being used, is payable at \$1.10 per hour for day work, \$1.30 per hour for evening work and \$1.65 per hour for night work. Employees cleaning holds in which special cargoes, specified in agreement, have been stowed shall be paid at \$1.15 per hour for day work, \$1.35 per hour for evening work and \$1.72½ per hour for night work. Employees called to work during the night and whose services are not required shall receive a minimum of 2 hours' pay.

CHECKERS AND COOPERS (OCEAN NAVIGATION), MONTREAL.

An Order in Council, dated July 17, and gazetted July 27, makes obligatory the terms of a new agreement between certain steamship

companies and Local 1657, International Longshoremen's Association. Agreement to be in effect to December 31, 1946, and thereafter from year to year, subject to notice. Agreement governs all checkers and coopers working on ocean-going vessels in the Harbour of Montreal.

This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, July, 1943, page 989, except for the following changes:

Hours: day work is to start at 8.00 a.m. instead of the previous 7.00 a.m.

Hourly wage rates: 85 cents per hour for checkers and 84 cents per hour for coopers for day work; \$1.05 per hour for checkers and \$1.04 per hour for coopers for evening work; \$1.27½ per hour for checkers and \$1.26 per hour for coopers for night work.

Employees shall be informed before the expiry of any working period if they will be required for the following period.

Trade

RETAIL STORES, CHICOUTIMI.

An Order in Council, dated July 17, and gazetted July 27, makes obligatory the terms of a new agreement between "L'Association professionnelle des Marchands détaillants de Chicoutimi" and "Le Syndicat national des Employés de Magasin de Détail de Chicoutimi, section féminine", "Le Syndicat national des Employés de Magasin de Détail de Chicoutimi, section masculine". Agreement to be in effect from July 27, 1946, to July 1, 1947, and thereafter from year to year until notice. Territorial jurisdiction comprises the city of Chicoutimi and within 5 miles from its limits, with the exception of Arvida.

Hours: 51-hour week for female employees, 54 for male employees. No work to be performed on Sundays and specified holidays. Overtime is payable at time and one-half.

Minimum weekly wage rates: for men and women from \$8.50 during first 6 months to \$15.75 during fourth year; from fifth to eighth year for men \$21, for women \$19; eighth year and after \$26 for men, \$21 for women; departmental managers, assistant-managers, chief clerks—male \$36, female \$23; managers \$45; superintendents \$50; delivery men (truck or horse-drawn vehicle) \$30, helpers \$20; delivery boys with bicycle (furnished by employer) \$7.50; part time workers—men less than 40 hours per week 35 cents per hour, women less than 30 hours 25 cents. Men working more than 40 hours and women more than 30 hours but less than maximum weekly hours to receive full weekly wage.

Vacation: one week with pay after one year's service; after 2 years' service, one week with pay annually and an additional day for each year of service up to a 15-day vacation with pay. Double time shall be paid to an employee whose services cannot be dispensed with to permit a vacation period. There shall be no deduction on the commission of an employee paid on a salary and commission basis because of the vacation.

RETAIL STORES, RICHMOND AND MELBOURNE.

An Order in Council, dated July 17, and gazetted July 27, makes obligatory the terms of a new agreement between "Richmond and Melbourne Merchants' Association, Inc." and "Richmond and Melbourne Clerks' Union". Agreement to be in effect from July 27, 1946, to July 26, 1947, and thereafter from year to year

until notice. Territorial jurisdiction comprises the town of Richmond and the village municipality of Melbourne and within 3 miles from their limits.

Hours: 54-hour week. No work to be performed on Sundays and 13 specified holidays.

Minimum wage rates: males, from \$10 per week during first year to \$20 during fourth year; females, from \$8 during first year to \$15 during fourth year; part time employees 25 cents per hour. Vacation: one week with pay after one year's service. If room and board are provided, not more than \$7 per week for room and board or \$2 per week for room only may be charged.

RETAIL STORES, QUEBEC

In the June issue of the *Labour Gazette*, p. 783, the following employers' association was inadvertently omitted from the names of the contracting parties: L'Association Patronale du Commerce de Québec, inc.

Service: Public Administration

MUNICIPAL EMPLOYEES (GAS AND ELECTRICAL DEPARTMENTS), SHEBROOKE.

An Order in Council, dated July 17, and gazetted July 27, makes obligatory the terms of a new agreement between the City of Sherbrooke and "Les Employés des Services du Gaz et de l'Électricité de Sherbrooke Inc.". Agreement to be in effect from July 27, 1946, to January 1, 1947, and thereafter from year to year until notice. Agreement applies to the Corporation of the city of Sherbrooke and to its employees of the Gas and Electric Services.

Hours of work: 8-hour day 6 days a week for day workers, 8-hour shift 6 days a week for shift workers. Overtime is payable at time and one-quarter after 8 hours' work, time and one-half on Sundays and 11 observed holidays. Employees who must answer emergency calls on holidays are permitted to take a day off with pay as compensation for work done on the holiday.

Minimum weekly wages: network dispatchers, first class electricians, meter testers \$38; chief operators \$35 and \$36; operators \$27 to \$33; trouble men \$27; linemen \$31 to \$36; foremen (linemen) \$38 and \$40; specialized labourers \$25 to \$29; maintenance men \$26 and \$33; machinists \$36; mechanics \$39, helpers \$26 and \$28; joiners \$28; drivers (linemen) \$32; men committed to meter installation and replacement \$35; meter repairers \$25 to \$29; office clerks \$28 and \$34; draughtsmen, firemen \$33; meter readers \$20 to \$26; electric welders \$26.40 and \$32; common labourers \$26; apprentice operators 45 cents, apprentice linemen 50 cents per hour. Vacation: one week with pay annually after one year's service. Sick leave: 6 days per year with pay, which, if not taken may accumulate from year to year.

Provisions are made for seniority rights and for uniforms and equipment. The administration of present agreement to be ensured and supervised by the Municipal Services Joint Committee of Sherbrooke.

Service: Professional Establishments

HOSPITAL AND CHARITABLE INSTITUTION EMPLOYEES, QUEBEC DISTRICT.

An Order in Council, dated July 31, and gazetted August 10, amends the previous Order

in Council for this industry (L.G., Nov., 1944, p. 1369). "Le Syndicat des Employés des Institutions religieuses de Chicoutimi" and "Le Syndicat national catholique des Services hospitaliers des Trois-Rivières et district" are added as contracting parties. Territorial jurisdiction now includes the judicial districts of Quebec, Three Rivers, Abitibi, Chicoutimi, Roberval, Saguenay with the exception of the municipalities extending from Tadoussac to Hâvre St. Pierre inclusively, Nicolet, Arthabaska, Beauce, Montmagny, Kamouraska, Rimouski, Gaspé with the exception of Madeleine Islands, and Bonaventure. The village municipality of Thetford-South is added to Zone II.

Hours: no limitation of hours for female teachers.

Minimum wage rates: firemen 42 cents in zones I and II, 40 cents in zone III; chief baker \$30 per week in zone I, \$26.50 in zone II and \$25 in zone III; bakers \$27 per week in zone I, \$23.50 in zone II and \$22 in zone III.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, SAINT JOHN AND IBERVILLE.

An Order in Council, dated July 17, and gazetted July 27, amends the previous Orders in Council for this industry (L.G. May, 1943, p. 639; Jan., 1944, p. 71; Oct., 1945, p. 1521, and previous issues). This amendment does not affect the summary already given.

BARBERS AND HAIRDRESSERS, HULL.

An Order in Council, dated July 17, and gazetter July 27, amends the previous Orders in Council for this industry (L.G., Oct., 1941, p. 1316, Dec., p. 1573; Sept., 1942, p. 1098; March, 1943, p. 341; Oct., p. 1382; Nov., p. 1530). In zone I, the working hours for barbers and hairdressers are reduced to 47½ hours per week. In zone I, regular employees not working the entire week, as well as supernumerary employees, shall be paid 65 per cent of the receipts of their work. Vacation: in zone I, one week with pay at \$16 after one year's service.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the

Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the LABOUR GAZETTE, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Construction

CARPENTERS, SARNIA

An Order in Council, dated June 25, and gazetted July 13, makes binding the terms of a new schedule for the carpentry industry in Sarnia, to be in effect from July 23, 1946, "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Ordinary overtime performed on Saturday before 4 p.m. or during a three-hour period immediately following a regular working day is payable at \$1.52½ per hour; work performed at night, when it cannot be performed during regular working periods, is payable at \$1.05 per hour; all other overtime work \$2.10 per hour, unless advisory committee issues a special permit authorizing performance of the work at a lower rate. Work on Sundays and specified holidays is payable at \$2.10 per hour.

Minimum wage rate: \$1.05 per hour. The advisory committee may fix a lower rate for handicapped workers.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

CARPENTERS, GUELPH

An Order in Council, dated June 25, and gazetted July 13, makes binding the terms of a new schedule for the carpentry trade in Guelph, to be in effect from July 23, 1946, "during pleasure."

Hours: 8 per day, Monday to Friday, a 40-hour week. Ordinary overtime work performed during a three-hour period immediately following a regular working day is payable at \$1.42½ per hour; work performed at night, which cannot be performed during regular working periods, is payable at the regular rate for the first 8 hours only; all other overtime work on Sundays and seven specified holidays, \$1.90

per hour, unless advisory committee issues a special permit authorizing performance of the work at a lower rate.

Minimum wage rate: 95 cents per hour. The advisory committee may fix a special lower rate for handicapped employees.

This schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

Service: Business and Personal

BARBERS, KITCHENER

An Order in Council, dated May 28, and gazetted June 8, makes binding the terms of a new schedule for the barbering industry in Kitchener and Waterloo, effective June 18, "during pleasure."

Hours: Monday, Tuesday, (Wednesday of week in which a holiday occurs), Thursday, Friday, Saturday and on day preceding a holiday 8 a.m. to 6 p.m.; Wednesday 8 a.m. to 12.30 p.m.

Minimum wage rates: full time employment \$28 per week; full time employment on a commission basis \$18 per week plus 60 per cent of employee's proceeds in excess of \$25; a person who works 4 hours per day or less Monday to Friday, inclusive, and all day or less on Saturday \$12 per week plus 60 per cent of his proceeds in excess of \$17; a person working Saturday or the day before a holiday and on the previous evening only \$8 plus 60 per cent of his proceeds in excess of \$11; a person working Saturday only or the day before a holiday \$6 per day or part thereof plus 60 per cent of his proceeds in excess of \$8; a person working on days other than Saturday or the day before a holiday \$3.50 per day or part thereof plus 60 per cent of his proceeds in excess of \$5.

A minimum charge scale is included. The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

BARBERS, PARIS

An Order in Council, dated June 12, and gazetted June 29, makes binding the terms of a new schedule for the barbering industry at Paris, effective July 9, 1946, "during pleasure."

Hours: Monday, Tuesday, (Wednesday of week in which a holiday occurs on Thursday), Thursday and Friday 9 a.m. to 7 p.m., Saturday 9 a.m. to 9 p.m.

Minimum wage rates: full time employment \$22 per week; full time employment on a commission basis \$17 plus 50 per cent of employee's proceeds in excess of \$22; a person working 4 hours or less per day from Monday to Friday, inclusive, and all day or less on Saturday \$10 plus 50 per cent of his proceeds in excess of \$15; a person working on Saturday or the day before a holiday and on the previous evening only \$7 plus 50 per cent of his proceeds in excess of \$10; a person working on Saturday only or the day before a holiday \$5 per day or part thereof plus 50 per cent of his proceeds in excess of \$7; a person working on days other than Saturday or the day before a holiday \$3 per day or part thereof plus 50 per cent of his proceeds in excess of \$4.50.

A minimum charge scale is included. The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

BARBERS, BRANTFORD

An Order in Council, dated June 18, and gazetted June 29, makes binding the terms of a new schedule for the barbering industry at

Brantford, effective July 9, 1946, "during pleasure."

Hours: Monday, Tuesday, (Wednesday of a week in which a holiday occurs on Tuesday or Thursday), Thursday and Friday 8.30 a.m. to 6.30 p.m., Saturday 8 a.m. to 7 p.m.

Minimum wage rates: full time employment \$22 per week; full time employment on commission basis \$18 per week plus 50 per cent of employee's proceeds in excess of \$23; a person working 4 hours or less per day from Monday to Friday, inclusive, and all day or less on Saturday \$12 plus 50 per cent of his proceeds in excess of \$17; a person working on Saturday or the day before a holiday and on the previous evening only \$6 plus 50 per cent of his proceeds in excess of \$9; a person working on Saturday only or the day before a holiday \$5 per day or part thereof plus 50 per cent of his proceeds in excess of \$7.50; a person working on days other than Saturday or the day before a holiday \$3 per day or part thereof plus 50 per cent of his proceeds in excess of \$5.

A minimum charge scale is included. The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

BARBERS, STRATFORD

An Order in Council, dated June 12, and gazetted June 29, makes binding the terms of a new schedule for the barbering industry at Stratford, effective July 9, 1946 "during pleasure."

Hours: Monday, Tuesday, (Wednesday of week in which a holiday occurs on Thursday), Thursday and Friday 8.30 a.m. to 7 p.m., Saturday 8.30 a.m. to 9 p.m., Wednesday 8.30 a.m. to 12 noon

Minimum wage rates: full time employment \$21 per week; full time employment on commission basis \$15 per week plus 50 per cent of employee's proceeds in excess of \$21 and an additional 10 per cent of proceeds in excess of \$32; a person working 4 hours or less per day from Monday to Friday, inclusive, and all day or less on Saturday \$9 plus 50 per cent of his proceeds in excess of \$14; a person working on Saturday or the day before a holiday and on the previous evening only \$6 per week plus 50 per cent of his proceeds in excess of \$8.50; a person working on Saturday only or the day before a holiday \$5 per day or part thereof plus 50 per cent of his proceeds in excess of \$7; a person working on days other than Saturday or the day before a holiday \$3.50 per day or part thereof plus 50 per cent of his proceeds in excess of \$5.

A scale of minimum charges is included in the schedule. The schedule is subject to The Hours of Work and Vacations With Pay Act, 1944.

BARBERS, GANANOQUE

An Order in Council, dated July 4, and gazetted July 20, makes binding the terms of a new schedule for the barbering industry at Gananoque, effective July 30, "during pleasure."

Hours: Monday 9 a.m. to 12 noon, Tuesday, Thursday and Monday of week in which a holiday occurs on Tuesday 9 a.m. to 8 p.m., Wednesday and Friday 9 a.m. to 6 p.m., Saturday 9 a.m. to 10 p.m.

Minimum wage rates: full time employment \$20 per week; full time employment on commission basis \$13.50 plus 60 per cent of employee's proceeds in excess of \$20; a person working 4 hours or less from Monday to Friday inclusive, and all day or less on Saturday \$8.50 per week plus 60 per cent of his proceeds in excess of

\$13.50; a person working on Saturday or the day before a holiday and on the previous evening only \$6 plus 60 per cent of his proceeds in excess of \$8.50; a person working on Saturday only or the day before a holiday \$4.50 per day or part thereof plus 60 per cent of his proceeds in excess of \$6.50; a person working on days other than Saturday or the day before a holiday \$3 per day or part thereof plus 60 per cent of his proceeds in excess of \$4.50.

A minimum charge scale is included. The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

BARBERS, ORILLIA

An Order in Council, dated July 16, and gazetted August 3, makes binding the terms of a new schedule for the barbering industry in Orillia, effective August 13, "during pleasure."

Hours: Monday, Friday, (the Wednesday of week in which a holiday occurs on Thursday), 8 a.m. to 6 p.m., Tuesday and Thursday 8 a.m. to 8 p.m., Saturday 8 a.m. to 9 p.m.

Minimum wage rates: full time employment \$20 per week; full time employment on commission basis \$15 per week plus 50 per cent of employee's proceeds in excess of \$21 and plus an additional 10 per cent of his proceeds in excess of \$30; an employee working 4 hours or less per day from Monday to Friday inclusive, and all day or less on Saturday \$8.50 plus 50 per cent of his proceeds in excess of \$13.50; a person working on Saturday or the day before a holiday and on the previous evening only \$6 plus 50 per cent of proceeds in excess of \$8.50; a person working on Saturday only or the day before a holiday \$4.50 per day or part thereof plus 50 per cent of his proceeds in excess of

\$6.50; a person working on days other than Saturday or the day before a holiday \$3 per day or part thereof plus 50 per cent of his proceeds in excess of \$4.50.

A minimum charge scale is included. The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

BARBERS, ST. THOMAS

An Order in Council, dated June 25, and gazetted July 31, makes binding the terms of a new schedule for the barbering industry in St. Thomas, effective July 23, 1946, "during pleasure."

Hours: Monday, Tuesday, Thursday, Friday (and the Wednesday of week in which a holiday occurs on Thursday) 8 a.m. to 6 p.m., Saturday 8 a.m. to 8 p.m., Wednesday 8 a.m. to 12 noon.

Minimum wage rates: full time employment \$25 per week; full time employment on a commission basis \$16 plus 65 per cent of employee's proceeds in excess of \$22; a person working 4 hours or less per day from Monday to Friday inclusive, and all day or less on Saturday \$12 plus 65 per cent of his proceeds in excess of \$17; a person working on Saturday or the day before a holiday and on the previous evening only \$6 plus 65 per cent of his proceeds in excess of \$8.50; a person working on Saturday only or the day before a holiday \$4.75 per day or part thereof plus 65 per cent of his proceeds in excess of \$6.75; a person working on days other than Saturday or the day before a holiday \$3 per day or part thereof plus 65 per cent of his proceeds in excess of \$4.50.

A minimum charge scale is included in the schedule. The schedule is subject to The Hours of Work and Vacations with Pay Act, 1944.

Alberta

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, MEDICINE HAT

An Order in Council, dated June 25, and gazetted July 15, makes binding the terms of a schedule for the automotive repair and gasoline service station industry in Medicine Hat, effective July 25, 1946, to July 24, 1947, or thereafter "during pleasure."

Hours: 48-hour week of 5½ days. Overtime is payable at time and one-half. Time and one-half for work on Sundays and statutory holidays, except Christmas and New Year's Day, which are at double time. This does not apply to front-end men, floor service men, night watchmen, storage attendants and/or gas servicemen working on their regular shifts, who will be granted a day in lieu thereof within the ensuing 7 days, or be paid at time and one-half.

Minimum wage rates: mechanics from 70 to 80 cents per hour, washmen and greasemen 50 cents, non-mechanical service station employees permitted to do washing and greasing provided such duties do not exceed 50 per cent of their total time to receive not less than the minimum wage established by an Order pursuant to The Male Minimum Wage Act.

Vacation: automotive mechanics to receive 2 weeks with pay after one year's service.

Seniority to determine time vacation may be taken. Apprentices are governed by the terms of The Apprenticeship Act.

GARAGES AND SERVICE STATIONS, CALGARY

An Order in Council, dated July 5, and gazetted July 15, makes binding the terms of a new schedule for the automotive repair and gasoline service station industry in Calgary, to be in effect from July 25, 1946, to July 24, 1947, or thereafter "during pleasure."

Hours: 46½-hour week of 5½ days. Overtime is payable at time and one-half. Time and one-half for work on Sundays and statutory holidays except Christmas and New Year's Day, which are at double time.

Minimum wage rates: mechanics from 85 cents to \$1 per hour, washmen and greasemen 60 cents per hour, non-mechanical service employees to be paid not less than the minimum wage established by an Order pursuant to The Male Minimum Wage Act.

Vacation: automotive mechanic, helper, yardman, washman and greaseman one week with pay after one year's service, 2 weeks with pay after 2 year's service; all other employees to receive 2 weeks with pay after one year's service. Seniority to determine time vacation may be taken. Apprentices are governed by the terms of The Apprenticeship Act.

Fair Wage Conditions in Dominion Government Contracts

THE Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classes

of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are covered by the general provision that rates must equal those current in the district, and in addition, by the requirement that the rates must not be less than 35 cents an hour for male workers 18 years of age and over, 25 cents for female workers 18 years of age and over, and 20 cents for beginners and for workers under 18.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During July

During the month of July the Department of Labour prepared, on request, 53 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

Particulars of the contracts which have been entered into during this period by the various Government departments appear hereunder:—

(1) Works of Construction, Remodelling, Repair or Demolition

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour".

They also specify that the rates of wages set out therein are "minimum rates only" and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation or by direction of a War Labour Board".

Department of Mines and Resources

Construction of 80.9 miles of the Grimshaw-Great Slave Lake Highway in the Northwest Territories and located between Hay River

Settlement and the northern boundary of Alberta. Name of contractor, The Bond Construction Company, Ltd., Regina, Sask. Date of contract, June 26, 1946. Amount of contract, \$1,080,729. A fair wages schedule was included in the contract as follows:—

	Per Hour
Axemen	\$.65
Bridgemen (steel workers).....	1.24
Blacksmiths90
Blacksmiths' helpers81
Carpenters and joiners.....	1.10
Cement finishers.....	1.10
Concrete mixer operators—steam	1.00
Concrete mixer operators—gas. or elec.85
Compressor operators (gas or elec.).....	.85
Dragline operators, steam or gas.	1.25
Dragline firemen.....	.70
Dragline oilers.....	.70
Drivers (teamsters).....	.65
Drill runners.....	.85
Electricians (inside wiremen).....	1.15
Electricians' helpers.....	.81
Engineers, crane (steam, gas or elec.).....	1.25
Hoist operators—tower—gas. or elec.	
under 12 H.P.81
12 H.P. and over.....	1.12
Labourers65
Motor truck drivers.....	.65
Pipefitters (surface-temp. work).....	1.16
Pipefitters' helpers.....	.81
Machinists	1.00
Machinists' helpers.....	.81
Mechanics—gasoline equipment.....	.92
Mechanics—diesel equipment.....	1.02
Powdermen85
Road grader operators:	
Horsedrawn75
Motor driven.....	1.00
Road roller operators—steam or gas.	1.00
Steam shovel engineers.....	1.25
Steamshovel cranemen	1.25
Steam shovel firemen70
Steam shovel oilers70

	Per Hour
Shovel operators—gas. or diesel.....	1.25
Watchmen60
Welders and burners—on steel erection.....	1.25
Riveters—steel workers structural.....	1.10
Rock muckers.....	.80
Steel sharpener90
Tractor operators—	
Small85
Bulldozer85
Letourneau	1.05
Elevating grader.....	1.05

	Per Hour
Tile setters' helpers (all men assigned to help tradesmen)50
Tractor operators—	
Letourneau75
Small60
Watchmen40
Waxers and polishers (floor).....	.50
Welders and burners—acetylene or elec.75
Welders and burners—on steel erection.....	.90
Stonecutters75
Stonemasons85
Stonemasons' helpers (mixing and tempering mortar)75
Terrazzo layers.....	.75
Terrazzo finishers and helpers.....	.60

Construction of day school and teachers' residence, Eskasoni Indian Agency, N.S. Name of contractor, Mr. M. R. Chappell, Sydney, N.S. Date of contract, July 11, 1946. Amount of contract, cost plus fixed fee—cost not to exceed \$50,147 unless authorized by the Minister—fixed fee \$3,500. A fair wages schedule was included in the contract as follows:—

Department of Public Works

Electrical installation at the Winch Building, Vancouver, B.C. Name of contractor, Mott Electric Ltd., Vancouver, B.C. Date of contract, July 8, 1946. Amount of contract, \$8,046. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos insulation workers	\$.65
Blacksmiths65
Blacksmiths' helpers.....	.50
Brick and hollow tile layers.....	.85
Brick and hollow tile layers' helpers (mixing and tempering mortar).....	.50
Carpenters and joiners.....	.65
Cement finishers.....	.65
Cement and concrete mixer operators—steam	.70
Cement and concrete mixer operators—gas. or elec.55
Compressor operators—gas. or elec.55
Drivers45
Driver, horse and cart.....	.60
Driver, team and wagon.....	.75
Electricians (inside wiremen).....	.70
Engineers, operating, steam.....	.80
Engineers on steel erection.....	.90
Engineers, crane—steam, gas., or elec.80
Enginemen, stationary.....	.60
Hoist operators—tower—gas. or elec.60
Labourers45
Lathers—metal65
Lathers—wood60
Linoleum layers.....	.55
Mastic floor layers.....	.75
Mastic floor rubbers and finishers.....	.60
Mastic floor kettlemen.....	.60
Mastic floor labourers.....	.55
Motor truck drivers.....	.50
Motor truck driver and truck.....	1.50
Ornamental iron workers.....	.65
Painters (spray).....	.75
Painters and glaziers.....	.65
Pipefitters (surface-temp. work).....	.55
Pipelayers, caulkers and solderers.....	.55
Plasterers85
Plasterers' helpers (mixing and tempering material)50
Plumbers and steamfitters.....	.70
Powdermen55
Pumpmen50
Riggers (general).....	.60
Rodmen, reinforced steel.....	.55
Roofers, felt and gravel: patent: comp.50
Roofers, sheet metal.....	.70
Shinglers, wood, asbestos.....	.65
Steam shovel engineers.....	1.10
Steam shovel firemen.....	.65
Steam shovel oilers.....	.60
Shovel operators—gas.	1.10
Structural steel workers.....	.90
Tile setters, asphalt.....	.70

	Per Hour
Electricians (inside wiremen).....	\$1.19
Labourers65
Motor truck drivers (under 5 tons).....	.66
Motor truck drivers (5 tons and over).....	.75
Painters and glaziers.....	.97

Installation of drinking water services, Postal Terminal Building, Montreal, P.Q. Name of contractor, C. J. Dryden Co. Ltd., Westmount, P.Q. Date of contract, July 17, 1946. Amount of contract, \$6,967. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asbestos insulation workers.....	\$.96
Carpenters and joiners.....	.96
Cement finishers.....	.81
Cement and concrete mixer operators:	
Steam81
Gas. or elec.76
Drivers61
Driver, team and wagon.....	1.01
Electricians (inside wiremen).....	1.01
Labourers61
Motor truck drivers.....	.61
Motor truck driver and truck.....	1.61
Painters and glaziers.....	.86
Plumbers and steamfitters.....	1.01

Installation of fluorescent lighting, Langevin Block, Ottawa, Ont. Name of contractor, Fred A. Wilson Contracting Co. Ltd., Ottawa, Ontario. Date of contract, July 30, 1946. Amount of contract, \$36,533. A fair wages schedule was included in the contract as follows:—

	Per Hour
Carpenters and joiners.....	\$.96
Cement finishers.....	.75
Cement and concrete mixer operators:	
Steam80
Gas. or elec.65
Electricians (inside wiremen).....	.96
Labourers56
Motor truck drivers.....	.60
Motor truck driver and truck	1.60

	Per Hour
Painters and glaziers.....	.86
Plasterers	1.06
Plasterers' helpers (mixing and tempering material)60

Extension to breakwater, Boudreauville, Richmond County, N.S. Name of contractor, Mr. Colin R. MacDonald, Antigonish, N.S. Date of contract, July 30, 1946. Amount of contract, unit prices—approximate expenditure, \$7,970. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.65
Boatmen (rowboats).....	.45
Compressor operators—gas. or elec.55
Drill runners55
Drivers45
Driver, horse and cart.....	.60
Driver, team and wagon.....	.75
Hoist operators—tower—gas. or elec.60
Labourers45
Motor boat operators.....	.50
Motor truck drivers.....	.50
Motor truck driver and truck.....	1.50
Timbermen and cribmen (measuring, scribing and by the use of the axe, adze, etc., cutting and fitting timber).....	.55
Watchmen40

Reconstruction of wharf, Beauharnois, P.Q. Name of contractor, Mr. Alphonse Faubert, Chateauguay, P.Q. Date of contract, July 17, 1946. Amount of contract, unit prices—approximate expenditure \$20,860.60. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.80
Blacksmiths' helpers.....	.50
Carpenters and joiners.....	.65
Cement finishers.....	.60
Cement and concrete mixer operators:	
Steam70
Gas. or elec.55
Drivers45
Driver, horse and cart.....	.60
Driver, team and wagon.....	.70
Drill runners.....	.55
Enginemmen, stationary.....	.55
Labourers45
Motor truck drivers.....	.50
Motor truck driver and truck.....	1.50
Steam shovel engineers.....	.95
Steam shovel firemen.....	.65
Steam shovel oilers.....	.60
Shovel operators—gas.....	.95
Tractor operators—	
Small55
Letourneau, etc.65
Watchmen40
Compressor operators—gas. or elec.55
Pile driver and derrick foremen.....	1.05
Pile driver and derrick engineers.....	.95
Pile driver and derrick men (rigging, setting and signalling).....	.75
Pile driver and derrick firemen.....	.65
Pile driver and derrick labourers.....	.50

Repairs to wharf, Ste. Felicite, Matane County P.Q. Name of contractor, Leandre Thibault Enrg., Matane, P.Q. Date of contract, July 22, 1946. Amount of contract, unit prices—approximate expenditure \$53,412.60. A fair wages schedule was included in the contract as follows:—

	Per Hour
Blacksmiths	\$.65
Blacksmiths' helpers.....	.50
Boatmen (rowboats).....	.45
Compressor operators—gas. or elec.55
Drill runners.....	.55
Drivers45
Driver, horse and cart.....	.60
Driver, team and wagon.....	.70
Engineers, operating, steam.....	.75
Firemen, stationary.....	.55
Labourers45
Motor truck drivers.....	.50
Motor truck driver and truck.....	1.50
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber).....	.55
Watchman40

Reconstruction and Supply

Demolition of concrete chimneys and the replacement thereof with brick chimneys R.C.A.F. stations at Beaton River, Smith River and Fort St. John, B.C., and Teslin, Snag and Aishikik, Y.T. Name of contractor, Mr. S. H. Parsons, Edmonton, Alta. Date of contract, July 13, 1946. Amount of contract, \$5,571. Fair wages schedules were included in the contract as follows:—

Beaton River, Smith River and Fort St. John, B.C.

	Per Hour
Brick and hollow tile layers.....	\$ 1.50
Brick and hollow tile layers' helpers (mixing and tempering mortar).....	.95
Carpenters and joiners.....	1.22
Cement finishers.....	1.15
Labourers75
Plasterers	1.25
Plasterers' helpers (mixing and tempering material)95

Snag, Aishikik and Teslin, Y.T.

	Per Hour
Brick and hollow tile layers.....	\$ 1.54
Brick and hollow tile layers' helpers (mixing and tempering mortar).....	.95
Carpenters and joiners.....	1.33
Cement finishers.....	1.26
Labourers85
Plasterers	1.31
Plasterers' helpers (mixing and tempering material)95

Interior repainting of hospital building No. 54, H.M.C.S. "Naden", Esquimalt, B.C. Name of contractor, Messrs. Mort. Brown Limited, Vancouver, B.C. Date of contract, July 9, 1946. Amount of contract, \$5,850. A fair

wages schedule was included in the contract as follows:—

	Per Hour
Labourers (common).....	\$.65
Labourers (experienced building).....	.71
Painters (spray).....	1.05
Painters and glaziers.....	.96
Watchmen55
Waxers and polishers (floor).....	.71

Installation of kalamein fire doors at Joint Service Magazine, Bedford Basin, N.S. Name of contractor, Fundy Construction Company Ltd., Halifax, N.S. Date of contract, July 9, 1946. Amount of contract, \$9,095.30. A fair wages schedule was included in the contract as follows:—

	Per Hour
Brick and hollow tile layers	\$1.15
Brick and hollow tile layers' helpers (mixing and tempering mortar).....	.65
Carpenters and joiners.....	.95
Compressor operators—gas. or elec.70
Cement finishers.....	.80
Drivers60
Driver, team and wagon.....	.95
Labourers60
Lathers—metal.....	.80
Motor truck drivers.....	.65
Motor truck driver and truck	1.65
Painters (spray).....	.91
Painters and glaziers81
Plasterers95
Plasterers' helpers (mixing and tempering material)65
Sheet metal workers.....	.85
Watchmen55
Welders and burners (acetylene or elec.).....	.85
Welders and burners on steel erection.....	.90

Construction of cannon stop butt, R.C.A.F. Station, Dartmouth, N.S. Name of contractor, Lawrence Construction Company, Halifax, N.S. Date of contract, July 19, 1946. Amount of contract, \$15,000. A fair wages schedule was included in the contract as follows:—

	Per Hour
Axemen	\$.65
Blacksmiths85
Blacksmiths' helpers.....	.65
Boilermakers on construction.....	.90
Carpenters and joiners.....	.95
Cement finishers.....	.80
Cement and concrete mixer operators:	
Steam80
Gas. or elec.70
Compressor operators—gas. or elec.70
Dragline operators (steam or gas.).....	1.10
Dragline firemen.....	.70
Dragline oilers.....	.65

Labourers.....	.61
Motor truck drivers.....	.61
Motor truck driver and truck.....	1.61
Powdermen.....	.71
Road grader operators:	
Horsedrawn.....	.66
Including team.....	1.01
Gas.....	.76
Road roller operators (steam or gas).....	.86
Steam shovel engineers.....	1.16
Steam shovel firemen.....	.71
Steam shovel oilers.....	.66
Shovel operators (gas).....	1.16
Tractor operators—Letourneau, etc.....	.86
Small.....	.71
Watchmen.....	.56

Repairs to existing runways, Churchill Airport, Churchill, Man. Name of contractor, The Tomlinson Construction Company, Ltd., Toronto, Ont. Date of contract, July 25, 1946. Amount of contract, \$77,890. A fair wages schedule was included in the contract as follows:—

	Per Hour
Asphalters.....	\$.63
Dragline operators, steam or gas.....	.90
Dragline firemen.....	.60
Dragline oilers.....	.55
Drivers.....	.55
Driver, horse and cart.....	.70
Driver, team and wagon.....	.95
Engineers, operating, steam.....	.90
Enginemen, stationary.....	.60
Labourers, skilled.....	.57½
Labourers, common.....	.53
Motor truck drivers.....	.60
Motor truck driver and truck.....	1.60
Road grader operators—horsedrawn.....	.60
Road grader operators—incl. team.....	.95
Road grader operators—gas.....	.70
Road roller operators (steam or gas.).....	.80
Steam shovel engineers.....	.90
Steam shovel firemen.....	.60
Steam shovel oilers.....	.55
Shovel operators (gas.).....	.90
Tractor operators—Letourneau, etc.....	.86
Small.....	.70
Watchmen.....	.48

(2) Dredging Work

Note.—The labour conditions of contracts of this nature contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour, and also empower the Minister of Labour to deal with any dispute which may arise thereon.

National Harbours Board

Dredging Berth No. 1 at Jetty No. 1, Vancouver, B.C. Name of contractors, McKenzie Barge and Derrick Company, Ltd., Vancouver, B.C. Date of contract, July 12, 1946. Amount of contract, approximately \$4,970.

WARTIME HOUSING LIMITED

Construction of houses and underground services, Nelson, B.C. Name of contractor, Housing Projects (K. W. Jensen and Jas. P. Wallgren), Nelson, B.C. Date of contract, June 28, 1946. Amount of contract, \$150,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers.....	\$.75
Asphalt tampers, smoothers and spreaders....	.65
Brick and hollow tile layers.....	1.20
Brick and hollow tile layers' helpers (mixing and tempering mortar).....	.75
Carpenters and joiners.....	1.10
Cement finishers.....	.90
Cement and concrete mixer operators—steam.....	.90
Cement and concrete mixer operators—gas or electric.....	.70

	Per Hour
Compressor operators (gas. or elec.).....	.70
Dragline operators, steam or gas.....	1.22½
Dragline firemen79
Dragline oilers79
Drivers (teamsters)60
Drill runners70
Electricians (inside wiremen)	1.10
Engineers, operating, steam:	
single or double drum	1.10
three or more drums	1.22½
Engineers, crane (steam, gas. or elec.)	1.22½
Enginemmen, stationary79
Hoist operators—tower (gas. or elec.) under	
12 H.P.75
Hoist operators—tower (gas. or elec.) 12 H.P.	
or over	1.00
Labourers, common60
Labourers, experienced building65
Motor truck drivers (under 5 tons)60
Motor truck driver (5 tons and over)70
Ornamental iron workers90
Painters (spray)95
Painters and glaziers85
Pipefitters (surface—temp. work)70
Pipelayers, caulkers and solderers70
Plasterers	1.00
Plasterers' helpers (mixing and tempering	
material)75
Plumbers and steamfitters	1.10
Plumbers and steamfitters' helpers (all men	
assigned to help tradesmen)69
Lathers—metal on metal	1.10
Lathers—other than metal on metal	1.00
Riggers (general)75
Road grader operators—gas.95
Road roller operators (steam or gas.)75
Rodmen, reinforced steel70
Roofers, felt and gravel: patent: comp.65
Roofers, sheet metal	1.10
Sheet metal workers	1.10
Shinglers (wood, asbestos)	1.10
Steam shovel engineers	1.22½
Steam shovel cramenen	1.22½
Steam shovel firemen79
Steam shovel oilers79
Shovel operators (gas.)	1.22½
Tractor operators—Letourneau, etc.95
Tractor operators—small70
Watchmen55
Welders and burners—acetylene or elec.90

Construction of houses and underground services, Listowel and Palmerston, Ont. Name of contractor, Shaw Construction Company, Sarnia, Ont. Date of contract, July 4, 1946. Amount of contract \$49,770. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers	\$.65
Asphalt tampers, smoothers and spreaders55
Brick and hollow tile layers	1.10
Brick and hollow tile layers' helpers (mixing	
and tempering mortar)55
Carpenters and joiners86
Cement finishers70
Cement and concrete mixer operators—steam.	.75
Cement and concrete mixer operators—gas.	
or elec.65
Compressor operators (gas. or elec.)65
Dragline operators, steam or gas.	1.06
Dragline firemen66
Dragline oilers56
Drivers51
Driver, team and wagon85

	Per Hour

Labour Law

Labour Legislation Enacted by the Parliament of Canada in 1946

THE Parliament of Canada during its session from March 14 to August 31, 1946, enacted in statutory form, with some changes, the regulations providing workmen's compensation for merchant seamen, amended the Unemployment Insurance Act, consolidated the Reinstatement in Civil Employment Act and Regulations, and amended laws relating to family allowances, housing and income tax. A large body of veterans' legislation, both new and amending Acts, was also passed.

Unemployment Insurance

Major changes in the Unemployment Insurance Act, 1940, to come into effect by Proclamation, extend unemployment insurance benefits to merchant seamen, increase from \$1.00 to \$1.50 a day the amount of money which an unemployed person drawing benefits from the unemployment insurance fund may earn without being disqualified, and make the Employment Service responsible to the Minister of Labour.

The provisions of the Veterans Rehabilitation Act authorizing the granting of unemployment insurance to veterans have been repealed and now appear in Part IV of the Unemployment Insurance Act. A new amendment provides that "veteran" now includes merchant seamen. Employment in transport by water, both inland and deep sea, is thus made insurable, but the Minister of Labour in introducing the Bill pointed out that "until reciprocal arrangements have been completed with the United States and Great Britain our coverage of deep sea vessels will be somewhat limited, but a start is being made and it is fully anticipated that proper arrangements can be made with these other countries as to the jurisdiction over vessels of different registry."

Other amendments widen the interpretation of "dependent" to include persons who maintain a self-contained domestic establishment and support therein a wholly dependent person connected by blood relationship, marriage or adoption, and give the Unemployment Insurance Commission additional powers to make regulations, including power to require persons seeking employment and employers engaging employees to notify the Employment Service.

Workmen's Compensation for Merchant Seamen

The Merchant Seamen Compensation Act gives statutory form to the Merchant Seamen Compensation Regulations made under the War Measures Act by Order in Council (P.C. 4755), effective August 1, 1945, (L.G. 1945, p. 1347). The Act, like the Regulations, covers seamen employed on ships registered in Canada or chartered by demise to persons resident in Canada or having their principal place of business in Canada, when the ships are engaged on foreign or home-trade voyages. In addition, the Act provides that, if ordered by the Governor in Council, coverage may be extended to seamen engaged in Canada and employed on ships registered outside Canada and operated by persons resident in Canada or having their principal place of business in Canada.

The Act stipulates that the three members of the Merchant Seamen Compensation Board, appointed by the Governor in Council, are to hold office during pleasure and are to be paid such salary as the Governor in Council may fix. The Board may, with the approval of the Governor in Council, employ such professional, technical or clerical assistants as it deems necessary and fix their remuneration.

The system established is one of individual liability of the employer who is required to cover the seamen in his employ by insurance satisfactory to the Board. If the risks of compensation are not covered by insurance, the Board may give notice in writing to the chief officer of Customs and the ship may be detained until he receives notice from the Board that he may release the ship.

The benefits provided and other conditions are identical with the Regulations of 1945.

Reinstatement in Employment

The Reinstatement in Civil Employment Act, 1946, is a consolidation of the provisions of the 1942 Act which is now repealed and of certain Orders in Council made under the War Measures Act and the National Emergency Transitional Powers Act, 1945. These Orders in Council include the Reinstatement Regulations (P.C. 77), of January 11, 1945

(L.G. 1945, p. 192), Order in Council P.C. 5324 of August 2, 1945, (L.G. 1945, p. 1349) and Order in Council P.C. 6769 of November 6, 1945 (L.G. 1945, p. 1843) as amended by P.C. 1298 of April 9, 1946, (L.G. 1946, p. 683).

The Act defines "reinstatement period" as a period of three months after discharge from the service or from hospital treatment following discharge in Canada, or four months, if overseas. With the exception of persons undergoing training for employment as merchant seamen in Dominion Government Marine and Engineering Training Schools, the Act is declared not to apply to persons who were hired as merchant seamen on or after May 7, 1945. A new section fixes December 31, 1946, as the date upon which the service of a merchant seaman is deemed to have terminated for the purposes of reinstatement under the Act, or if he is engaged on a voyage on such date, the day that the voyage is concluded. A new provision extends the time limit to one year within which enforcement proceedings may be instituted.

Emergency Powers

An amendment in the National Emergency Transitional Powers Act, 1945, changes the date of the expiry of the Act from the fifteenth day to the sixtieth day after Parliament first meets in 1947, provided Parliament does not meet in November or December, 1946, in which case the Act will expire on December 31, 1946.

Housing

The National Housing Act, 1944, was amended to extend from 20 to 25 years the normal term of loans to home-owners, and to facilitate the making of loans jointly with lending institutions to assist in the construction of houses on farms. In addition to loans to owners, loans to lessees with long-term leases are also provided for. New sections enable the Central Mortgage and Housing Corporation to make direct loans to persons engaged in the mining, lumbering, logging or fishing industry, and make statutory provision for the operation of the Integrated Housing Plan instituted by Order in Council of October 12, 1945, by which the Corporation may enter into contracts with builders to encourage the building of houses for sale to prospective home-owners, and for the Home Conversion Plan. See page 1207 in this issue.

Family Allowances

Minor amendments in the Family Allowances Act, 1944, which are to come into effect by Proclamation, relating to conditions which result in the cutting off of an allowance, deal

mainly with the provision regarding school attendance. In view of the varied requirements of the provinces as to compulsory school attendance, it is now provided that an allowance will cease to be payable if a child does not regularly attend school in conformity with the age limits and other conditions laid down by the educational authorities of the province in which he resides, or, in the case of an Indian or Eskimo child or a child in the Northwest or Yukon Territories, by an educational authority prescribed by regulation. If not regularly attending school, any such child, in order to be eligible for an allowance must, in the opinion of the competent educational authorities, be receiving adequate equivalent training. The Act adds the proviso that where provincial educational authorities fail to supply any information requested, the Governor in Council may prescribe an alternative method of obtaining such information. A condition formerly implied in the Act was made explicit: it is stipulated that the allowance ceases to be payable when a child ceases to be maintained by a parent. Other changes made are for purposes of clarification and rearrangement.

Pensions for Employees of Government Corporations

Under the Government Companies Operation Act, which on Proclamation is to apply to any company incorporated under Part I of the Companies Act, 1934, companies, with the approval of the Governor in Council, may set up pension funds or group insurance plans for their employees or continue any such fund or plan already established. The Act states expressly that employees of such companies are within the scope of the Government Employees Compensation Act, and that the Civil Service Superannuation Act does not apply to them. It is stipulated, however, that a civil servant who becomes an employee of a company will continue to be eligible for all the benefits, except salary, as a civil servant that he would have been eligible to receive had he remained under the Civil Service Superannuation Act. If he continues while employed by the company to be a contributor under the Act, his service with the company is to be counted as service in the civil service and he or his dependants may be granted any gratuities provided by the Act. If he leaves the company's service he is to be eligible for re-appointment in the civil service or to receive the same benefits as if retiring under like circumstances from the civil service.

Every company to which the Act applies is to be considered an agent of His Majesty and

has the right to sue and be sued, and to contract, under its corporate name.

The Act requires every company to submit an annual report to the Minister containing its financial statements and such other information as the Minister may prescribe, to be tabled in Parliament, if in session, or if it is not, within 15 days after the next meeting of Parliament.

Veterans' Legislation

Twelve Acts, many of which represent the approval by Parliament of legislation already in effect by Order in Council under the War Measures Act, deal with veterans' affairs. These include amendments to the Pension Act, the Veterans Rehabilitation Act, the War Service Grants Act and the Veterans' Land Act. Other Acts authorize the provision of financial and other benefits to supervisors in the auxiliary services, to the Corps of Canadian Fire Fighters, to Canadian service men in the Allied Forces and their dependants and to certain veterans unemployable through disability. A special article on veterans' rehabilitation will appear in a later issue of the LABOUR GAZETTE.

Citizenship

The Canadian Citizenship Act defines who are Canadian citizens by birth and sets forth the qualifications for naturalization as a Canadian citizen. In future, non-Canadian British subjects must make application for certificates of citizenship. Subject to other qualifications, members of the armed services may become Canadian citizens after only one year's residence in Canada. Naturalized persons, not in certain excepted classes, who are absent from Canada for six years or more will automatically cease to be Canadian citizens unless they take steps to protect their citizenship.

The Immigration Act was also amended to bring its definitions into line with those in the Citizenship Act.

Income War Tax

Amendments in the Income War Tax Act include changes in the provisions relating to taxation of pension fund payments and of co-operatives.

Pensions

An amendment, effective June 27, 1946, applies to: payments out of a superannuation or pension fund or plan upon the death, withdrawal, or retirement of an employee, or former employee, in full satisfaction of his rights in the fund or plan; payments by an employer to an employee upon retirement, in recognition of long service; and payments by

a person to a former employee in respect of loss of office or employment. Such amounts are to be taxed, at the taxpayer's option, either as income for the year in which he received them or at a rate equal to the percentage which the tax upon the taxpayer's income during his last full year in employment is of that income. A change was also made in the deduction allowed from income of any person entitled to a payment out of an employees' superannuation or pension fund or plan, of which the investment income has been exempt from taxation, by reason of an election for such exemption by the trustees or corporation administering it. The deduction from income now allowed is either the proportion of the payment which was received out of such fund that the aggregate of the amounts paid by the employee into the fund or plan, while it was exempt from tax, is of the aggregate of all the amounts paid by him into the fund or plan; or the proportion that the aggregate of the amounts paid into the fund by the employee during such tax-exempt period with interest at 3 per cent from the end of the year of payment to the commencement of the pension is of the aggregate of all amounts paid by him with interest at 3 per cent per annum, whichever is the greater.

Co-operatives

Amendments relating to co-operative associations carry out a number of recommendations of the Royal Commission on Co-operatives which was appointed in November, 1944, under the chairmanship of Mr. Justice Errol McDougall, and which reported in September, 1945.

The sections of the Act exempting co-operative associations and co-operative banking institutions from taxation were repealed. Exemption is now granted, for the first three taxation years after commencement of its business, to a corporation which begins business on or after January 1, 1947, and which is incorporated under provincial legislation providing for the establishment of co-operative corporations for the purpose of marketing, including processing, of natural products produced by, or acquired from its members or customers or of purchasing supplies or equipment or household necessities for, or to be sold to, its members or customers. The conditions of such exemption are:—that the statute under which incorporation is effected or the charter or by-laws of the company or its contracts with its members or customers hold forth the prospect that payments will be made to them in proportion to patronage; that all members are individuals and no member

has more than one vote; that the rate of interest on capital subscribed by its members or the dividends on its shares do not exceed 5 per cent per annum; that the value of the products produced by, or acquired from, and supplies, equipment and household necessities purchased for, or sold to, and services performed for, its customers, other than members, does not in the taxation year exceed 20 per cent of the total value of such goods and services dealt in by the corporation during that year; that no member of the corporation holds shares in or has subscribed capital to the corporation in excess of 5 per cent of the shares of the corporation issued or of the total capital subscribed for them; and that the business carried on is not, in the opinion of the Minister, a continuation of a previous business in which a substantial number of the members of the corporation had a substantial interest either as shareholders of the corporation carrying on the previous business or otherwise.

As to co-operative banks, the income of a credit union or co-operative credit society is exempt if it derives its revenue primarily from loans made to members residing within the territorial limits within the Province to which it is restricted for carrying on its business; or, if its members are credit unions which derive their revenues primarily from loans made to their members or under provincial co-operative legislation or for religious, educational, or charitable purposes, or credit unions no part of whose income enures to the benefit of any of their members.

Co-operative associations may claim as deductions from income the aggregate of payments of patronage dividends made (a) within the taxation year or within twelve months thereafter to customers of the taxation year; or (b) made within the taxation year or within

twelve months thereafter to customers of a previous taxation year, the deduction of which from income of a previous year was not permitted under (a). It is provided, however, that if the co-operative association has not paid patronage dividends in proportion to patronage in respect of all his customers of the taxation year at the same rate, with appropriate differences for different types or classes, grades or qualities of goods, products or services, the deduction allowed from income is to be the lesser of the two following amounts:—(1) the aggregate of the payments mentioned above; or (2) the aggregate of:—the amount of the income derived from business done with the members plus the amount of allocations in proportion to patronage made to non-members.

If the amount to be deducted under these provisions would leave the association with a taxable income less than an amount determined by deducting from 3 per cent of the capital employed in the business at the beginning of the taxation year, the interest, if any, paid during that year on borrowed money other than money borrowed from a bank incorporated under the Bank Act or from a co-operative bank and deductible as an expense in computing income, only such portion of the amount that would be so deductible may be deducted as will leave the co-operative with an income subject to tax equal to the amount so determined.

A number of definitions were added to the section relating to co-operatives including rules for computing patronage dividends.

The exemption from tax of mutual insurance companies was cancelled except for those mutual insurance corporations deriving their premiums wholly from insurance of religious, educational or charitable institutions.

Recent Regulations Under Dominion and Provincial Legislation

THE regulations noted below include a Dominion Order providing unemployment benefits for seamen pending the Proclamation of the amendments to the Unemployment Insurance Act, rules of the Quebec Labour Relations Board stipulating the conditions under which trade unions will be

recognized by the Board for the purposes of the Quebec Labour Relations Act and Orders in Quebec raising the minimum wage-rates payable to most workers of the Province. Certain changes are made in the Saskatchewan Minimum Wage Orders which were noted in the LABOUR GAZETTE in July.

Dominion

Unemployment Insurance for Merchant Seamen

Certain unemployed merchant seamen will receive out-of-work benefits as a result of an Order in Council (P.C. 3396) issued under the National Emergency Transitional Powers

Act on August 9, 1946, and gazetted August 19. The Order, which authorizes the closing of merchant seamen manning pools from July 31, 1946, provided for the payment of benefits to these seamen until the Bill bringing seamen under the Unemployment Insurance

Act was enacted. This Bill was passed at the recent session of Parliament. The Act is to come into force on Proclamation.

The Regulations stipulate that to be eligible for "out-of-work" allowances for a period not exceeding 15 weeks in the 12 months beginning August 1, 1946, a merchant seaman: (1) must prove that he is unemployed and available for work but unable to secure suitable employment; (2) must be certified by the Director of Merchant Seamen as having been eligible for the War Service Bonus or Special War Bonus; (3) on July 31, 1946, must be a member of a manning pool; and (4) must reside at or near Halifax, Sydney, Saint John, Quebec City, Montreal, Vancouver, or Victoria.

The allowances, based on Unemployment Insurance benefits, will be paid weekly through the Unemployment Insurance Commission at

the daily rate of \$2.04 or \$2.40 for a seaman with dependents. Payment to a seaman of these benefits will be subject to the provisions of the Unemployment Insurance Act dealing with qualification for benefits except as to the qualifying period of employment and the payment of contributions.

Surcharge on Pilotage Dues

An Order in Council (P.C. 2454) of June 18, 1946, gazetted July 13, reduces the surcharge on pilotage dues from 25 per cent to the former rate of 15 per cent in the pilotage district of British Columbia (L.G. 1942, p. 307).

The same reductions were made for the Quebec, Montreal, and St. Lawrence—Kingston—Ottawa districts by Orders in Council dated April 16 and gazetted May 11, 1946.

Provincial

Quebec Apprenticeship Assistance Act

Another Apprenticeship Commission, that of the cloakmaking trade in Montreal, was incorporated under this Act (L.G. 1946, p. 994) by an Order in Council of August 7, gazetted August 10.

Quebec Labour Relations Act

By-law No. 1 of the Labour Relations Board, laying down certain requirements before unions can be recognized by the Board was gazetted on August 3 and approved by an Order in Council of July 31. To be considered a member of a union, a person must be at least 16, must have been regularly admitted to membership and signed a dated admission form, must have personally paid an initiation fee of at least \$1, be personally obliged to pay dues of at least 50 cents monthly, have paid at least one month's dues and not be more than three months in arrears, and must be in employment connected with the normal occupations of the employer against whom recognition is requested.

A certificate of "recognition", if cancelled, must be returned to the Labour Relations Board. The Board will notify the employer concerned when it grants, refuses, confirms or revokes the recognition of a union.

Quebec Minimum Wage Act

GENERAL ORDER 4

The minimum rates for most workers in commercial and industrial establishments have been raised and the new minimum for teachers

is \$600 yearly instead of \$300 as a result of amendments made to Order 4 governing all workers under the Act who are not covered by special Orders. The three amending Orders were approved by Orders in Council on July 31 and August 7 respectively. They were gazetted August 10.

A new Order, No. 2, approved by an Order in Council of July 31, gazetted August 3, stipulates that every hourly-paid worker covered by a Wage Order and not governed by a collective agreement must be paid at time and one-half his regular rate of pay for overtime as defined in the Wage Order, notwithstanding the provisions of any other Order. This follows the recent amendment to the Act giving the Minimum Wage Board specific authority to fix overtime rates for hourly-rated workers not within the scope of a collective agreement. (L.G. 1946, p. 681). Order 4 fixed the overtime rate at time and one-half the minimum rate.

INDUSTRIAL AND COMMERCIAL ESTABLISHMENTS

Higher minimum rates have been fixed for most Quebec workers excluding those within the scope of special Orders and those outside the Minimum Wage Act such as domestic servants, farm labourers and employees of religious or teaching institutions (except school boards) and a few others.

"Industrial establishments" in the Order include forest operations, mines, quarries, construction work of all kinds, factories, dairy and cheese factories, laundries and workshops of all kinds. "Commercial establishments" include shops, beauty parlours, banks, trust companies, financial offices of different kinds, public

utilities, theatres and other places of amusement, hotels and restaurants, boarding houses, public and school corporations and others.

Two minimum rates are now established for 75 and 25 per cent respectively of the experienced permanent workers in an industrial or commercial establishment, instead of three rates for 60, 25 and 15 per cent of them. As before, different rates apply to the four zones into which the Province is divided: Zone I, Montreal Island and district; II, places with 10,000 or more population; III, places with between 2,000 and 10,000 population; and Zone IV, other places.

The new rates for Zone I are: 35 and 30 cents an hour for 75 and 25 per cent respectively of the workers in an establishment instead of 26, 22 and 17 cents for 60, 25 and 15 per cent respectively; in Zone II, 32 and 28 cents instead of 24, 20 and 15 cents; in Zone III, 28 and 24 cents an hour instead of 22, 18 and 13; and in Zone IV, 25 and 20 cents an hour instead of 20, 16 and 12 cents an hour.

As before, there is a learning period of six months for inexperienced workers, but their minimum rates are raised to 27, 25, 21 and 18 cents in the four zones. The learners' rate was previously 10 per cent less than the minimum for the lowest paid group, 15 per cent of the experienced workers in an establishment.

For temporary workers, those who work no more than two days in a week or, during November and December at least 30 hours a week in shops, the new minimum rates are 30, 28, 24 and 20 cents in the four zones. The repealed rates were 25, 20, 18 and 15 cents, except in shops during November and December where they were 20, 15, 15 and 12 cents.

The same rates as those for temporary workers in industrial and commercial establishments now apply also to workers for whom minima are not fixed in any Wage Order, including persons employed by public corporations; these were formerly 25 cents in Zones I and II, 18 in III and 13 in IV.

OFFICE WORKERS

The increased rates for experienced office workers are the same as those for others in industrial and commercial places of business: 35, 32, 28 and 25 cents in the four zones; the old rates were 25, 22½, 20 and 15 cents. The new learning period is increased from one to two years, the hourly rates being 20, 18, 15 and 15 for the first six months, 25, 23, 18 and 18 for the next six months, and 30, 28, 24 and 20 for the second year. The learners' rates were previously 17, 15, 13 and 12 cents.

TEACHERS

The yearly minimum for teachers employed by school boards has been raised from \$300 to \$600. The Act to ensure the Progress of Education, recently proclaimed in effect (L.G. 1946, p. 682), provides that teachers in all municipalities must receive a minimum annual salary of \$600. As before, ⅓ of the minimum is payable monthly between September and June inclusive, and no deduction may be made for lodging supplied by a school board.

TRANSPORT

The minimum rates for drivers of horse-drawn vehicles employed by cartage and transfer companies and of motor vehicles are raised to 35, 32, 28 and 25 cents an hour in the respective zones from 25, 20, 18 and 15 cents. The minima for drivers of buses and commercial vehicles or delivery cars weighing at least 2½ tons are increased to 40, 37, 33 and 30 cents an hour from 30, 25, 23 and 20 cents.

Helpers of the above drivers and boys delivering articles of more than 25 lbs. must now be paid at least 30, 28, 24 and 20 cents, instead of 20, 18, 16 and 14 cents. For messengers and delivery boys the minimum is now 15 instead of 10 cents an hour in all zones, and 20 cents instead of 12, if the boy uses his own bicycle.

Garage employees must now be paid at least 40, 37, 33 and 30 cents an hour according to the zone; the former minima were 40, 35, 30 and 25 cents.

WATCHMEN

To watchmen at least 30, 28, 24 and 20 cents an hour must be paid instead of 25, 25, 20 and 15 cents. To workers employed in cleaning, heating and maintaining schools the new rates are the same as for watchmen; previously, they were 25, 25, 18 and 13 cents.

OVERTIME

The former provision in Order 4 calling for time and one-half the minimum rate for overtime, now superseded by Order 2 requiring time and one-half the regular rate, did not apply to certain workers, but the amended Order includes them in this provision. These workers are: (1) workers employed by the week, month or year and paid at least \$30 for each week, even if working less than a week in Zone I, \$25 in II and III, and \$20 in Zone IV; (2) those working intermittently and earning at least \$75 monthly; (3) camp servants; (4) workers for whom Order 4 set no regular work-week; (5) those working for more than one employer as watchmen, etc.; (6) those who received holidays at time and

one-half pay in lieu of overtime pay; and (7) office workers who had to work overtime because of their errors or negligence.

MISCELLANEOUS

A change in the Order makes bank messengers as well as other bank employees subject to a regular 48-hour week. No learners' rates in hotels and restaurants are set, the section calling for a rate 10 per cent less than that for experienced workers having been struck out. Workers hired by municipalities for snow removal or other casual work are no longer excluded from Order 4.

Saskatchewan Minimum Wage Act

Some changes have been made in the Orders of July 2 (Nos. 1-4, 7, L.G. 1946, p. 995), which fix minimum rates for all workers except farm labourers, domestic servants, janitors and charwomen, and those in places of amusement. The supplementary orders were gazetted on August 15 and became effective on August 31. Another Order of the same date, No. 8, increases the minimum rates in lumbering, logging and woodworking and replaces Order 9 (L.G. 1943, p. 1568). By the supplementary Orders, the minimum age of 16 for employment in certain summer resorts is omitted and the prohibited period for the employment of women, not living on the premises, in a hotel, restaurant or hospital, etc., begins now at 12.30 a.m. instead of 12 midnight.

In addition, the general Orders (1 and 3) and those for hotels, restaurants and hospitals, etc. (2 and 4) now stipulate: (1) that an employer is not required to pay a part-time worker, for whom an hourly rate is fixed, in any week more than the weekly minimum for a full-time worker; and (2) that an employer may reduce the wages of a worker absent from work in the proportion of the length of

the absence to the normal work-week. Apprentices governed by the Apprenticeship Act are specifically excluded from the general Orders.

The new Order applying to lumbering, logging, river driving, rafting, booming, or cutting, hewing, manufacturing, or producing lumber, shingles, lath, ties, telephone poles, timbers, fence posts, pulpwood, cordwood, boxwood, shingle bolts, and shim or veneer wood, raises the former minimum of 30 cents an hour for all workers to 50 cents an hour for all except cooks, cookees, bull cooks and watchmen whose minimum is now \$115 monthly. The cooks, etc. and watchmen, are excluded from the provisions requiring an employer to pay for waiting time and time spent in travelling from the employer's premises to or from the place of work. \$1.15 per day is the new maximum charge by an employer for three meals and lodging instead of 85 cents.

Saskatchewan Workmen's Compensation (Accident Fund) Act

New classes of workers have been brought within the Act from September 1 by amendment to the General Regulations (L.G. 1943, p. 1419) which was approved by Order in Council on July 19 and gazetted July 31. Brought under the Act are: retail shops and restaurants with at least two employees, including the employer's family; hotels, hospitals; servants, janitors or maintenance workers employed in building maintenance and operation in cities or towns; the repairing of watches, jewellery, shoes and harnesses; undertaking, funeral directing and ambulance service; photography; millinery; opticians, florists and radio dealers; sausage manufacturing, meat-cutting, coffee grinding, delivery of goods and baking; making up or repairing fabrics in any form of clothing; manufacture or erection of awnings or tents and the hauling of grain by an employer covered by the Act.

Canadian Vocational Training

THE following types of projects are now carried on under Canadian Vocational Training by the Dominion Department of Labour in co-operation with the Provincial Governments.

- (1) The vocational and pre-matriculation training of discharged members of the Forces.
- (2) Training of apprentices.
- (3) Retraining of workers released from employment.
- (4) Training of foremen and supervisors.
- (5) Training of young people and assistance to students.
- (6) Dominion financial assistance to the provinces for vocational schools.

Cumulative Enrolment

From the inception of the Training Program up to July 31, 1946, the gross enrolment of discharged members of the Forces for training has been 81,823

The gross enrolment in the training of supervisors and foremen has been.....124,052

Training of Discharged Members of the Forces

The total number of veterans enrolled on July 31, in all categories of training, represents only a slight increase over June 30, but there was a further substantial increase of 690 men and women training on the job in industry. Contrary to expectations, there was an increase

of 125 in the number of pre-matriculation students, but the following decreases were shown in other types of training:—

Private Trade Schools and Commercial Schools	285
Canadian Vocational Training Schools..	233

On July 31, the distribution of enrolment in the various types of training was as follows:—

Correspondence Courses	2.3%
Private Trade Schools and Business Colleges	11.3%
Training on the Job in industry....	28.6%
Pre-matriculation classes in special C.V.T. Centres	25.0%
Vocational and Commercial classes in Special C.V.T. Centres.....	32.8%

During the month of July the intake for C.V.T. schools was practically the same as the output, but it is not anticipated that this condition will continue. Many veterans who desire training have been working during the summer months. Others will have decided that a course of instruction will facilitate their rehabilitation. With an expected increase in enrolment in view, the facilities in schools have been built up and capacities increased. More living accommodation is being provided in those training centres where the veterans live in the centre. Arrangements are also being made which will ensure that those students enjoy reasonable recreational facilities.

United Kingdom Veterans' Training Scheme

Under the United Kingdom Government's Business Training Scheme, carefully selected ex-service men and women, and others who performed war service of national importance, are attending a three months' general business course to train them to take a place in the business administration of the country. The general course completed, the veteran is eligible for a specialised course, a second program also in business administration, but connected with a particular section of industry or commerce. Responsible firms throughout the country have been encouraged by the

Ministry of Labour and National Service, which is sponsoring the whole plan, to run classes for students who might qualify for jobs in those firms, following their apprenticeship. In this way the student has the opportunity of getting practical experience in a desired field, while the employer has a chance to train a man, with the Government paying the student a living allowance during training. Under this scheme training for business administration is now put on the same general footing as training for a profession.

Activities of Unemployment Insurance Commission

N.E.S. Special Placements Division—Insurance Registrations—Monthly Analysis of Claims and Benefit—Unemployment Insurance Fund—Current Benefit Years

TO the National Employment Service come a great variety of people looking for work. The majority of these have held jobs previously and are normal physically, so they can be dealt with in the regular way. But this does not take into account the physically handicapped job-seeker and the young men and young women who are looking for help in finding not merely employment but more particularly the right avenue of employment. It was recognized some years ago that these two important groups could not be given the individual attention they deserved through the ordinary channels of employment; i.e., the general placements section of the N.E.S. for the reason that they require the assistance of persons specially trained to deal with their unique employment problems. Hence the establishment in 1943 of the Special Placements Division of the N.E.S., with Mr. H. C. Hudson as Supervisor of Special Placements at Head Office which was followed by appointments of Regional Supervisors and the setting up of special sections in the larger N.E.S. offices across the Dominion.

Since that time the staff of Special Placements has studied the particular employment needs of these groups. In connection with the physically handicapped, the aim is to place the disabled worker in a job suited to his capacities—not one that could be filled by any handicapped person. The idea that the disabled should all have the watchman or elevator-operator label placed on them, regardless of their ability to do more satisfying work, was dropped at the outset. In its place was introduced a placement process which calls for complete and adequate knowledge about the ability of the individual and accurate information about available jobs, with the physical demands and environmental conditions of those jobs.

In addition, much has been done to gain the good will of employers and to encourage them to open the door of opportunity to disabled persons who have the ability to do what is required of them. A recent survey in Canada into the effectiveness of the physically handicapped as workers shows conclusively that disabled persons, both veteran and civilian, can take their places alongside the non-handicapped in industry with full assurance of efficient work performance.

Special Placements endeavours to arrange for prompt and careful placement of those whose handicap prevents their holding down their regular jobs and what is more—follows up to insure that they are properly adjusted and are giving satisfactory service to their employers.

During the first six months of 1946, 5,745 jobs were found for physically handicapped persons in Canada by local N.E.S. offices—an average of slightly less than 1,000 per month, 51 per cent of the male placements being handicapped ex-service men.

In connection with youth, the task of special Placements' officers is to assist the young person in choosing the type of work in which he or she will be happy and can expect advancement. This function of Special Placements involves close co-ordination with school guidance agencies which are in existence in many cities across Canada. It also involves the setting up of counselling and testing facilities in employment offices, to meet the needs of young men and young women who, for one reason or another, have not come within the purview of school guidance facilities. Testing procedures have been carefully studied at head office in Ottawa and occupational guidance will be available to boys and girls in the larger offices where Special Placements Sections have been established. In the city of Toronto a special Youth Centre has been organized under N.E.S. auspices, and test material, similar to that being used in Toronto, will be supplied to other offices as the need arises. Not all young men and women registering with Special Placements will be given tests. These will only be given in specific instances where it is considered it would be helpful in finding the broad employment field in which the youth would have the best chance of being successful.

Recognizing that the program could not be carried through without the co-operation of other government departments, organizations and special groups, close contact has been maintained with the Department of Veterans Affairs and with such organizations as the C.N.I.B., associations for the deaf and hard of hearing, welfare agencies, youth serving groups, departments of education and school boards. By all of these, helpful assistance has been readily given.

Special Placements also plays a part in selecting unemployment insurance benefit

claimants for courses of training. The work of the selection committees in local offices will be co-ordinated with the activities and responsibilities of Canadian Vocational Training. The N.E.S. does not itself conduct training courses for recipients of unemployment insurance benefit. The training will be provided by C.V.T., as and when training facilities for civilians become available. At present they are taxed to the limit by rehabilitation training for ex-service men and women, in addition to which the necessary agreements relating to civilian training have not yet been signed by all provinces. Nevertheless the necessary machinery has been set up to take advantage of developments in the training field immediately they occur.

In short, while Special Placements is interested in specific groups seeking employment or requiring training, it regards itself as an integral part of an efficient public employment service.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at July 31, 1946, 2,560,208 employees were issued with insurance books and had made contributions to the fund at one time or another since April 1, 1946, an increase of 149,643 since June 30, 1946.

As at July 31, 1946, 168,125 employers were registered as having insurable employees, an increase of 3,078 since June 30, 1946.

Registrations as to July 31, 1946, by regions are shown in Table I.

Unemployment Insurance Fund

Total employer-employee contributions for July amounting to \$5,855,302.11 showed an increase of \$393,057.14 or seven per cent over the previous month. In July last year employer-employee contributions amounted to \$5,094,565.65.

The increase over the corresponding month last year is the result of an increase in stamp sales by some \$600,000 and an increase in contributions received in respect of armed service from \$82,752.53 in July last year to \$432,655.03 in July this year. The latter increase is, of course, due to the fact that a larger number of veterans have now completed the required 15 weeks of insured employment which entitles them to credit of contributions in respect of their service in the armed forces.

For the second straight month benefit payments showed a decrease, dropping from \$4,468,245.05 in June to \$3,299,938.15 in July, a decrease of 26 per cent. In July last year benefit payments were \$601,135.66.

Current Benefit Years

THE maintenance of detailed statistical records of operations is a prime essential in the administration of any form of insurance. Without such records the element of "risk" cannot be adequately determined and this must be taken into account in the maintenance of equitable premium or "contribution" rates.

In the case of unemployment insurance, these and other related factors have to be considered. The compilation of statistical information obtained from the operations of the Unemployment Insurance Commission, is performed by the Dominion Bureau of Statistics, which issues regular reports respecting to those phases of the Commission's work that lend themselves to statistical presentation.

One of these, the "Annual Report on Current Benefit Years" for the calendar year 1944, was issued recently by D.B.S. It is divided into two parts; part 1 deals with the "insured population" and part 2 with "benefit years".

It is pointed out in the report that "a benefit year is established when an insured person, upon becoming unemployed, makes application in the prescribed manner and it is proved that 180 days' contributions have been made in his behalf while working in insurable employment during the two years immediately preceding the date of his claim."

In the case of a second or subsequent benefit year "it must also be proved that at least 60 days' contributions have been made in his behalf while working in insurable employment since the establishment of his immediately preceding benefit year."

For the purpose of the report, the insured population "may be taken as those to whom

insurance books for the year 1944-45 were issued up to May 31, 1944". The three leading tables cover 2,209,850 persons (1,447,530 males and 762,320 females) who were issued insurance books between April 1, and May 31, 1944, and classifies them by occupation, sex and province; industry, sex and age group; and, industry, sex and province.

It is shown that a total of 67,313 benefit years were established in Canada, during the year under review, by 66,934 persons (48,559 males and 18,375 females). Thus, 378 persons (313 males and 65 females) established two benefit years and one female, three benefit years. A total of 52,950 persons drew benefit amounting to \$3,390,010, for 1,815,070 benefit days. By provinces, Quebec led with 21,450 drawing a total benefit of \$1,611,850, for 847,428 benefit days. Ontario was in second place with 7,834 persons drawing \$523,260 for 266,502 benefit days.

Classified by industries the number establishing benefit years during the calendar year 1944, showed manufacturing in first place with 21,269 males and 10,570 females; followed by construction with 10,426 males and 198 females; mining, oil and quarrying, 6,200 males and 128 females; services 4,683 males and 3,130 females; and trade, 2,330 males and 3,183 females.

In addition, tables are also presented classifying the persons with current benefit years by dependency status; number of days benefit paid; and daily rate of benefit. Persons who established benefit years in 1944 are classified by age-group and occupation; and benefit years terminated are classified by age-groups, days authorized, and daily rate of benefit.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April, 1945 number of the LABOUR GAZETTE and continued in each of the succeeding issues. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike brief statements of the

principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

The selected decisions are published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU.-B. 59

(Nov. 19, 1945)

The claimant was offered employment in her usual occupation at wages lower than she previously received; she refused the employment and was disqualified and the disqualifica-

tion was upheld by the Court of Referees—HELD: Under the provisions of Section 31 of the Unemployment Insurance Act, 1940, employment at wages lower than those previously received is not unsuitable if the wages offered are not lower than the prevailing wages in the district, and if the employment offered is in the usual occupation of the claimant.

The material facts of the case are as follows:

The claimant, a married woman, aged 47 years, was employed as a switch-board operator by an aircraft manufacturing company from August 28, 1944 to March 3, 1945 at a rate of remuneration of \$27.00 per week for four and one-half hours per day. She was dismissed because of shortage of work and on March 5 she applied for benefit.

On June 11, 1945, she was notified by the local office of the Commission of available employment as telephone operator. The claimant telephoned the company and, upon being offered employment at a rate of remuneration of \$71.05 per month, she refused to accept the position because she felt that the salary was below that for which she was qualified. The claimant had been working four and one-half hours per day, while her previous hours were from 9:00 a.m. to 5:00 p.m.

The Insurance Officer disallowed the claim and disqualified the claimant under Section 43 (b) (i) of the Act for a period of six weeks beginning July 11, 1945, considering that the claimant had, without good cause, refused to accept employment which was suitable in her case and which was notified to her by the local office of the Commission.

From this decision the claimant appealed to the Court of Referees which unanimously sustained the decision of the Insurance Officer in principle but reduced the disqualification period to three weeks.

The claimant applied to the Chairman of the Court of Referees for leave to appeal to the Umpire and leave was granted.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons:

Section 31 of the Act provides that "an insured person shall not be deemed to have failed to fulfil the third statutory condition by reason only that . . . he has declined . . . an offer of employment in his usual occupation at wages lower, or on conditions less favourable, than those observed by agreement between employers and employees, or failing any such agreement, than those recognized by good employers." It is possible that the

claimant has read this provision of the Act as meaning that employment is not suitable if the rate of wages is lower than she has been receiving. However, that is not the effect of this provision. Rather, the employment may be suitable employment even though the wages are less than the claimant has recently been receiving if the wages offered are in line with those observed by agreement between employers and employees or than those recognized by good employers. It is, therefore, a straight question of fact. The claimant had been receiving rather good wages for less than the normal hours of employment but I think it reasonable to believe that the rate she had been receiving was somewhat higher than normal. The information before me establishes quite conclusively that the rate of wages offered to the claimant was the prevailing rate in the district for a person of her qualifications at the time of the offer of employment. I, therefore, find that the claimant refused an offer of suitable employment and the disqualification will, therefore, stand. While there is some doubt in my mind as to the Court's decision to reduce the disqualification period, I do not think it necessary to vary that finding.

CU-B. 61

(Nov. 19, 1945)

The claimant, when applying for benefit, stated that she would only work at night, as a clerk; she was disqualified on the ground that she was not available for employment—HELD: As the type of occupation followed by the claimant was only to be found in time of war and was not within the usual range of employment during normal times, and as she would not consider any other employment, she could not be considered available for work.

The material facts of the case are as follows:

The claimant, a married woman, aged 47 years, was employed by a municipality as a night clerk from June, 1943 to April 30, 1945, when she was laid off due to lack of work. On May 1, 1945, the claimant applied for benefit and made the following statement:

"I hereby declare that I am able to work in the same kind of work as I was performing at the Registrar's Office, as extra night clerk. I am not free to work in the daytime as I have my house to look after."

The Insurance Officer considered that the claimant was not available for work and disqualified her for six weeks on the grounds that she did not fulfil the third statutory condition set out in Section 28 (iii) of the Act.

From this decision the claimant appealed to the Court of Referees which, by a majority

decision found that the claimant was not available for work within the meaning of the Unemployment Insurance Act, 1940.

The claimant then appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons:

This case is not unlike many which I think will arise out of conditions brought about by a state of war. At the peak of our wartime activities we were able to meet our production goals only through adding to the number of persons ordinarily engaged in gainful employment. At this time there was a good deal of employment at hours other than what is the usual pattern in normal times and many married women not ordinarily employed found it possible to assist in the national war effort in this way.

However, with the cancellation of war contracts and a slackening in the acute man-

power shortage we are rapidly reverting to the normal hours of employment and there are obviously fewer demands for the services of married women in employment during hours which would not conflict with their ordinary household duties.

In this case the claimant made it perfectly obvious at the time of registering her claim for benefit that she would not consider any employment except under conditions substantially similar to those under which she had been working during the war period. For the reasons already indicated, there is very little of that type of employment now available in the claimant's district and there is little real prospect of placing the claimant, or others in similar circumstances, in the type of employment which was fairly common during the war years. The claimant has made it quite clear that she will not consider any other employment which might be available and I therefore find that she has not satisfied the third statutory condition and must dismiss the appeal.

Five-Year Growth of U. I. Fund

The amount to the credit of the Unemployment Insurance Fund at July 31, 1946 was \$328,304,394.84, according to a statement by the Unemployment Insurance Commission. The Fund is made up of contributions by employees, employers and the Dominion Government.

Since the creation of the Fund at July 1, 1941, the amount of \$303,617,954.17 has been contributed by employers and employees, while the Dominion Government has contributed an additional one-fifth of the amount paid by workers and employers, as required under the Unemployment Insurance Act: Government contributions to the Fund amounted to \$60,723,590.83 up to July 31, 1946.

In addition to the three-way contribution, the Fund has benefited by interest on investments and profit on sale of securities to a total of \$20,661,717.19, since it was established. The total sum paid into the Fund up to July 31,

1946, was \$385,003,262.19. All funds received for unemployment insurance purposes are invested in Dominion Government Securities by an investment committee appointed under the Act.

Disbursements for benefit payments have amounted to \$56,698,867.35 since first became payable near the end of January, 1942. Benefit payments for calendar years to date have been: 1942—\$349,655.94; 1943—\$929,219.33; 1944—\$3,265,707.67; 1945—\$14,561,475.71; and 1946 (first seven months)—\$37,592,808.70.

Under the Unemployment Insurance Act, the Dominion Government pays all costs of administering unemployment insurance and the National Employment Service, in addition to its direct payment into the Fund. This means that no expenses of management in connection with unemployment insurance are charged to the Fund.

Employment, Hours and Earnings

Summary

REPORTS received in the Department of Labour during the past month indicated that despite continuing labour disputes and resulting material shortages the employment outlook improved during August.

Employment and Payrolls at the beginning of July, 1946.—There was a substantial increase in industrial employment at the beginning of July, according to the monthly report on the employment situation and payrolls issued by the Dominion Bureau of Statistics.

While the general improvement was seasonal in character, the percentage gain in Canada as a whole was somewhat above normal for the time of year. Although there were general, if rather moderate advances throughout Canada, the gain is reported to have resulted in large measure from the resumption of operations following the settlement of the dispute in the lumber industries in British Columbia.

The Bureau tabulated data for the beginning of July from 15,933 firms. These had an aggregate working force of 1,733,712 men and women, as compared with 1,737,271 at June 1, an increase of 2.1 per cent. This raised the Bureau's index, on the base 1926 average=100 to 173.5, as compared with 169.9 in the preceding month and 175.5 at July 1, 1945.

Weekly salaries and wages distributed in the eight leading industries rose from \$55,043,483 in the week ending June 1, to \$57,192,594 in the week of July 1. The weekly average per capita earnings was \$32.24, compared with \$31.68 at the first of June and \$32.32 at July 1, 1945.

Employment conditions as reported by employment offices, July, 1946.—Reports received from the National Employment Service Offices of the Unemployment Insurance Commission during the five-week period June 28 to August 1, 1946, showed a fractional decrease when compared with the previous four weeks and a sharp decline in comparison with the five weeks June 29 to August 2, 1945, this computation being based on the average number of placements recorded daily. Under the first comparison agriculture, forestry and logging, public utilities operation and finance and insurance showed increases but all other industrial groups registered decreases. When compared with the five weeks ending August

2, 1945, apart from an increase in agriculture all industrial divisions showed decreases the most pronounced being a substantial decline in manufacturing, and moderate losses in public utilities operation, trade, forestry and logging and services. During the period under review there were 180,926 vacancies reported, 179,011 applications for employment and 89,919 placements in regular and casual employment.

Unplaced applicants registered at employment offices, August, 1946.—Despite continuing labour disputes and resulting material shortages, the employment outlook brightened during the month of August. Labour demand, following the slight drop in July, increased substantially showing the largest gain in any month since May. With the exception of Quebec, all regions required more workers than one month previous. The largest increase was in Ontario where an additional 4,224 workers were required. The increasing seasonal activity in the logging and canning and preserving industries accounted for most of the additional positions available. Unfilled vacancies in all occupations (exclusive of agriculture) numbered 112,465 (male 66,896 and female 45,569) at August 22.

Unemployment, as measured by unplaced applicants registered at employment offices, continued to decline, dropping to 145,541 at August 22 compared with 165,301 four weeks earlier.

Unemployment Insurance Statistics, July, 1946.—Claims for unemployment insurance benefit filed in local offices across Canada numbered 27,576 during July, a decline of 3,070 from the 30,646 filed during June. In July, 1945, a total of 10,886 was recorded. In all, 83,338 persons received one or more benefit payments during July, for a total of \$3,304,896 as compensation for 1,670,652 unemployed days. In June, 103,231 persons were paid \$4,472,995 for 2,243,727 compensated unemployed days, while in July, 1945, 18,257 persons were paid \$602,003 for 317,628 compensated days of unemployment.

Average weekly hours and earnings, June 1, 1946.—Average hours per week worked by hourly-rated wage-earners employed in manufacturing were 42 in the week of June 1, as compared with 43 in the week of May 1

and 44.3 in that of June 1 last year. Average hourly earnings were 69.1 at June 1, 68.9 at May 1, and 79.3 at June 1, 1945.

Labour Force Survey.—Total employment in Canada reached an estimated 4,702,000 by June 1, a gain of 390,000 since the end of February, according to the third quarterly labour force survey by the Dominion Bureau of Statistics, based on a sampling of 25,000 households in nearly 100 different areas across Canada. The number of unemployed, consisting of those who were looking for work and did no work in the week ending June 1,

totalled 126,000, about 87,000 below the estimate for February 23.

Unemployment in Trade Unions, June 30, 1946.—Trade union unemployment for the quarter ending June 30, 1946, recorded a decrease of approximately 1.4 per cent over the first quarter of the year. The percentage of unemployed union members, within a unit of 414,150 members of 2,238 locals, was 0.5 in the period under review.

The improvement resulted from better conditions for employment in manufacturing, transportation, building and construction, services, and wholesale and retail trade.

Employment and Payrolls at the Beginning of July, 1946

HERE was a substantial increase in industrial employment at the beginning of July; in large measure, the gain resulted from the resumption of operations on a more usual scale following the settlement of the dispute in the lumber industries in British Columbia, but there were general though rather moderate advances in the other provinces, in spite of strikes in the iron and steel, non-ferrous metal, rubber, textile, fur and other industries. Although the general improvement was seasonal in character, the percentage gain in Canada as a whole was somewhat above-normal for the time of year; this was due to the situation in British Columbia, the expansion in the remaining areas being rather below the average of preceding years.

The 15,933 co-operating employers reported a staff of 1,773,712 men and women; as compared with 1,737,271 at June 1, there was a gain of 36,441 persons, or 2.1 per cent, which was accompanied by a rise of 3.9 per cent in the weekly payrolls. Based on the 1926 average as 100, the index number of employment stood at 173.5, as compared with 169.9 in the preceding report, and 175.5 at July 1, 1945. The July 1 figures in immediately preceding years were as follows; 1944, 183.5; 1943, 183.7 and 1942, 175.7. With these exceptions, the latest index is the highest for July in the years since 1920, exceeding by nearly 50 per cent that of 115.8 at July 1, 1939. Since the expansion at the date under review was greater than usual for the early summer, there was an advance in the seasonally-corrected index, which rose from 169.9 at June 1, to 170.2 at the beginning of July.

There were large increases at July 1 as compared with a month earlier in the manufacturing and the non-manufacturing divisions. In the former category, the general gain exceeded 13,000 persons; over 14,700 additional workers were reported in the lumber-using industries,

many of whom had been on strike at June 1. There were also large seasonal advances in food, pulp and paper and other groups, while important losses were indicated in rubber, iron and steel and textile plants, due to some extent to industrial disputes. Within the non-manufacturing division, there was a moderate reduction in metallic ore mining, partly as a result of strikes in gold mines. Improvement on the whole was indicated in other branches of mining, and in logging, communications, transportation and storage, construction, services, trade and finance. The increase of nearly 13,300 persons in construction was the most pronounced, but was nevertheless below-normal for the time of year. The gain in logging took place in British Columbia, due to the settlement of the dispute in the lumbering industry, the trend in the remaining provinces being seasonally downward at the beginning of July.

Payrolls

As already stated, the decided advance in industrial employment at the first of July as compared with June 1 was accompanied by a relatively greater rise in the weekly salaries and wages distributed in the eight leading industries; these rose from \$55,043,483 in the last report, to \$57,192,594 at the date under review, or by 3.9 per cent. The higher percentage increase in the payrolls than in the personnel was partly due to the fact that the June 1 figures had in many cases been lowered by the loss of working time on Victoria Day, while strikes had also had an important effect upon the wages disbursed. On the other hand, the very general observance of St. Jean Baptiste Day as a holiday in Quebec, together with disputes in the iron and steel, rubber, textile and other groups, affected the earnings reported at the beginning of July. The weekly average per employee was \$32.24, 56 cents higher than

that of \$31.63 at the first of June; the per capita figures at July 1 in earlier years of the record were as follows:— 1945, \$32.32; 1944, \$31.72; 1943, \$30.97; 1942, \$28.49, and 1941, \$25.49. In the last five years, there has thus been an increase of 26.8 per cent in the average weekly earnings of the persons in recorded employment in the eight leading industries as a whole.

Table II summarizes the July 1 statistics of employment and payrolls for the leading industrial groups, the provinces and the leading cities, and gives comparisons with July 1, 1945. Table I contains a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1942. The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100; to facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100.

Table I indicates that in the period for which payroll data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 13.6 per cent, while the aggregate weekly earnings of those workers are higher by 41.9 per cent. Including finance, the gain in employment from June 1, 1941, to July 1, 1946, amounted to 14 per cent and that in payrolls, to 42.2 per cent. The explanation

previously given for the greater rise in the salaries and wages than in the numbers employed may again be stated:— (1) the concentration of workers still found in the heavy manufacturing industries, in spite of the declines which preceded and followed the end of hostilities; in this group of industries, rates of pay are above the average and in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944, (3) the progressive up-grading of employees as they gained experience in their work and (4) the payment of higher wage rates in an important number of cases.

Since 1941, employment in manufacturing, in spite of curtailment in the production of munitions and the existence of industrial disputes in a number of industries at July 1, 1946, has shown an increase of 11.4 per cent, while the reported payrolls at the date under review were higher by 38.5 per cent than when the monthly record was instituted. Among the non-manufacturing industries taken as a unit, there was in this comparison a gain of 16.5 per cent in employment and of 46.4 per cent in the salaries and wages disbursed at the date under review. The greater expansion in the latter group of industries than

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

TABLE I.—INDEX OF EMPLOYMENT AND PAYROLLS, BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS

(The latest figures are subject to revision)

Date	Eight Leading Industries			Manufacturing		
	Index Numbers of		Per Capita Earnings	Index Numbers of		Per Capita Earnings

July 1.....	113.6	141.9	32.24	111.4	138.5	32.36

in manufacturing reveals a situation at variance with that indicated during the war, when a much higher level of employment and payrolls in relation to the 1941 basic period existed in manufacturing than in the non-manufacturing classes.

With regard to the marked variations in the average earnings of workers in the different industrial classes it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations

in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of the utmost importance.

The Sex Distribution of the Persons in Recorded Employment

The 1,773,712 employees of the establishments co-operating at July 1 in the eight leading industries were made up of 1,382,265 men and 391,447 women, the proportions being 779 of the former sex and 221 of the latter in each 1,000 workers in recorded employment. The number of men showed an advance of 33,048, or 2.4 per cent as compared with June 1, and there was a gain of 3,393 women, or 0.9 per cent, in this comparison. The ratios at June 1

TABLE II.—EMPLOYMENT AND EARNINGS

Number of Persons Employed at July 1, 1946, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of Such Employees, Together with Index Numbers of Employment and Payrolls as at July 1, 1946, and June 1, 1946, with Comparative Figures for July 1, 1945, Where Available, Based on June 1, 1941 as 100 p.c.

(The latest figures are subject to revision)

Relative Weight of Employment by Provinces and Economic Areas as at July 1, 1946.	100.0	7.7	0.2	4.4	3.1	29.6	42.0	12.2	5.5	2.4	4.3	8.5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

were 777 men and 223 women per 1,000 employees.

Firms in the nine leading industries reported an increase of 36,642 persons in the month, of whom men numbered 33,143 and women 3,499. The percentage gain among the former amounted to 2.4 per cent, and that among the latter sex to 0.8 per cent. The ratio of women per 1,000 persons of both sexes in recorded employment in this group of industries was 231; as compared with 234 at June 1. The latest proportion, like that in the eight major industrial groups, was smaller than the ratio indicated in any earlier enquiry into sex distribution. The proportion of women workers in recorded employment had reached its highest point at October 1, 1944, when they constituted 261 per 1,000 persons reported in the eight industries, and 271 per 1,000 in the nine major industrial divisions. While the completion or the curtailment of war work is obvi-

ously a factor of very great importance in the falling-off recently indicated in the numbers and the proportions of women workers, the seasonal element and the existence of industrial disputes at July 1 also entered into the situation to a considerable extent. The last two factors affect the value of comparisons of the latest data with those obtained in the earlier surveys into sex distribution, made as at October 1 in 1942-45, and at April 1 in 1944 and 1945, and monthly from January, 1946.

There were increases at July 1 as compared with June 1 in the number of men reported in all the major industrial groups, the largest gains being in manufacturing and construction. Improvement in the situation for women was also indicated in manufacturing, logging, mining, communications, construction, services, trade and finance, while the number of such workers reported in transportation was smaller than that at June 1.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

(The latest figures are subject to revision)

Industries	¹ Relative Weight	July 1, 1946	June 1, 1946	July 1, 1945	July 1, 1939
Manufacturing	55.4	187.2	184.7	207.2	111.3
Animal products—edible.....	2.7	237.3	225.4	224.5	143.2

Report on Employment Conditions, August, 1946

THE following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market

by occupational groups, while the second section gives a more detailed analysis of employment conditions by regions.

The employment picture improved during August as seasonal activity increased labour requirements in several industries, particularly logging and food and kindred products. This

increase was sufficient to more than offset the retarding effect of current strikes. As junior workers return to school, it is expected that the demand for service and sales workers will increase. Western requirements for agricultural help are being well met by the transfer of eastern harvesters to the Prairies.

among persons registered as unskilled labour. The number of unplaced applicants declined in all regions—Quebec contributing 37 per cent of the total.

Table I shows labour demand and supply by main occupational group and by sex as at August 22, 1946. Table II presents a monthly

At August 22, the number of unfilled vacancies¹ in all occupations, exclusive of agriculture, totalled 112,465 as compared with 106,321 at July 25. The Ontario region accounted for 69 per cent of the increase in this period. In Quebec, on the other hand, labour demand fell by 2,286. Unplaced applicants² registered at employment offices fell by 19,760 during the four week period, to total 145,541 at August 22. Although most occupations showed a decline, over half the drop was

comparison of total labour demand and supply. Table III shows unfilled vacancies classified by main industry group and by sex as at August 22, 1946, with absolute and percentage changes in total demand during the last month.

¹Unfilled Vacancies are the number of unfilled jobs on file in employment offices at the date indicated.

²Unplaced Applicants are the number of Unreferred Applicants plus Unconfirmed Referrals. Unreferred Applicants are those who have not been referred to specific jobs as at the date indicated. Unconfirmed Referrals are applicants who have been referred but whose placement has not been confirmed.

Clerical Workers

Some improvement in the position of clerical workers took place in August. Not only did the number of unplaced clerks decline but the demand for these workers increased by 618. However, this group remains one of the more difficult with which to cope. Not only is there difficulty in adjusting the geographical distribution of demand and supply but also it is hard to fit local applicants into available positions. On the one hand, office jobs in many cases are low paying and qualified persons are reluctant to accept such poor salaries. On the other hand, it has been a problem to find sufficiently experienced workers for higher paying positions. Few qualified stenographers and typists are available and employers are having difficulty in obtaining the type of

worker they require. The placing of male clerical workers is still the main problem in this group as five men are available for every vacancy on file. This is quite an improvement over the previous month when the ratio was seven to one. At August 22, 7,644 clerical workers were required while 19,017 were seeking employment. Women made up 77 per cent of the demand and 51 per cent of the supply. The shortage of stenographers and typists persists with demand reaching 3,011.

Sales Workers

Expansion in wholesale and retail trade continues to be hampered by shortages of merchandise. The employment outlook in this occupational group is improving but applicants still outnumber vacancies by over two to one.

Unless wages are good, retail jobs are difficult to fill with competent sales workers. There is an increasing number of commission selling jobs but owing to the uncertainty of income response is poor. It is expected that with the additional seasonal expansion in the coming months and with the return of junior workers to school, demand for sales workers will increase. At August 22, there were 10,000 unplaced applicants seeking employment as sales workers compared to 11,011 four weeks

earlier. In the same period unfilled vacancies had increased by 190 to total 4,237.

Service Workers

The shortage of service workers continued during August, although the number of unfilled vacancies and unplaced applicants fell slightly in this period. There is a definite maladjustment in the sex distribution of labour demand and supply. Four-fifths of the requirements are for female workers while the males

TABLE III.—UNFILLED VACANCIES BY INDUSTRY AND BY SEX AS AT AUGUST 22, 1946
(excluding Agriculture)

Industry	Male	Female	Total	Change from July 25, 1946
