

# Using Wikipedia Zero to increase coverage of Suriname in Wikidata

Andra Waagmeester & Vincentius Kenswil  
@andrawaag @VincentiusRoue

# Suriname

- North eastern part of South America
- 90% landmass covered by forest
- Diverse population
  - Both ethnic and religious
- Native languages are non-latin based
- Until 1975: Dutch colony

# Three introductory sessions on Wikidata

# Challenges

- No local data on mosquito's
- Economic crisis
  - More incentives are needed to engage the community at large
- Access is mostly through mobile devices

C

Magnus

Someone please merge Q29197672 and Q25063971 (I'm on mobile...)

- Health data is for a large part maintained by foreign organisations
  - Wikidata can act as a infrastructure to capture local health knowledge (e.g. Malaria maps)
- More narratives are needed
- Hackathons are instrumental in creating awareness on Wikidata, however many, many more are needed.
