LETTER OF TRANSMITTAL

DR. W. S. RANKIN, *Secretary,*
State Board of Health,
Raleigh, N. C.

MY DEAR DOCTOR:—I hereby transmit to you, and through you to the State Board of Health and the Governor and General Assembly, a report for the year 1920, being the seventh annual report of the North Carolina Sanatorium for the Treatment of Tuberculosis.

Very respectfully yours,

L. B. McBRAYER,
Superintendent.

A DOLEFUL TALE—BUT THE SUN STILL SHINES

This has been perhaps the most trying year in some respects the institution has had—the general unrest, the disinclination of most laboring people to work, has made it very difficult to secure sufficient employees to properly handle the place. As an example, it cost the Sanatorium \$147.00 in traveling expenses, one month, to replace the turnover in help, and then the help was not sufficient in amount or satisfactory in service.

The psychology of the after-the-war unrest affected the patients, too, to a small extent comparatively. We have been caring for an average of forty ex-service men since the beginning of the necessity for such treatment, and have had splendid results and little trouble until the last year. The men we are getting now do not seem to be interested in getting well of tuberculosis, the large amount of compensation they are receiving seeming to add to that attitude, and they are, without knowing it, interfering with the treatment of civilian patients. We feel that we have discharged our obligation to the tuberculous ex-service men and that the United States Government is now prepared to give them proper care, and with the approval of our Board we will in the very near future cease to admit ex-service men and will not renew our agreement with the United States Public Health Service. We have been glad to render them this service until such time as the United States Government was prepared to take care of them.

Since we have been caring for the tuberculous ex-service men we have had two agencies that have been very helpful, (1) Occupational Therapy by the Federal Board for Vocational Education, and we were one of the first two institutions in the United States to put in this service, and (2) The Medical Social Service of the American Red Cross. Both of these will cease when we cease to admit ex-service men for the United States Public Health Service.

Our religious services have continued about as usual. Sunday school every Sunday evening and mid-week prayer-meeting, conducted by the patients, with such help as they needed from the staff. We also have an occasional service by a minister, and we are especially indebted to Rev. Mr. T. E. White of the Christian Church, Sanford, who has come once every month and spent the whole day, visiting with the patients confined to bed during the morning hours and holding service in the afternoon. Miss Grace MacKinnon, a trained nurse of Bennettsville, S. C., has been sending money to buy

literature for the Sunday school for several years. Entertainment has been usually sufficient. The Woman's Club of Sanatorium has provided many pleasant evenings, the patients themselves usually forming the caste for the plays. Mrs. Leonard Tufts, of Pinehurst, brought over one afternoon each week during the winter some splendid entertainment; for example, Miss Annie Oakley gave an exhibition of her expert shooting; Mr. Edgar A. Guest recited some of his own productions, etc., etc. The ladies from Carthage have given a few delightful concerts. Many others have contributed to the pleasure and entertainment of the patients.

Our building program has gone along, though very slowly; the unrest and disinclination to work showing its effect markedly in this work.

We could not close without expressing appreciation for the loyalty and coöperation of those employees who have stood by the institution and us through all the turmoil of war and its aftermath. From cooks, waiters and orderlies all the way up to the staff there have been some that were faithful and dependable always.

On the whole our work has progressed along all lines. The results of our treatment have continued good, very good, and the influence of our work throughout the State is rapidly becoming deeper and wider and more far-reaching. The decrease in the actual number of deaths in the State by more than 30% in seven years is eloquent testimony.

Respectfully submitted,

L. B. McBRAYER,

Superintendent.

MEDICAL REPORT

DEFINITIONS OF TERMS EMPLOYED

ON ADMISSION

These definitions indicate the furthest extent of disease and the greatest severity of symptoms that a patient can present and still belong to the stage defined. All patients beyond the incipient stage fall under the moderately advanced stage, unless the physical signs and symptoms exceed those of the moderately advanced stage, when they should be classified as far advanced.

Incipient.

Slight or no constitutional symptoms (including, particularly, gastric or intestinal disturbance or rapid loss of weight). Slight or no elevation of temperature or acceleration of pulse at any time during the twenty-four hours.

Expectoration usually small in amount or absent. Tubercle bacilli may be present or absent.

Slight infiltration limited to the apex of one or both lungs or a small part of one lobe.

No tuberculous complications.

Moderately Advanced.

No marked impairment of function, either local or constitutional.

Localized consolidation moderate in extent with little or no evidence of cavity formation; or infiltration more extensive than under incipient. No serious complications.

Far Advanced.

Marked impairment of function, local and constitutional.

Marked consolidation of entire lobe.

Or disseminated areas of beginning cavity formation.

Or serious complications.

Miliary Tuberculosis.

ON DISCHARGE

Arrested.

All constitutional symptoms and expectoration with bacilli absent for a period of six months; the physical signs to be those of a healed lesion.

Apparently Arrested.

All constitutional symptoms and expectoration with bacilli absent for a period of three months; the physical signs to be those of a healed lesion.

Quiescent.

Absence of all constitutional symptoms, expectoration and bacilli may or may not be present; physical signs stationary or retrogressive. The foregoing conditions to have existed for at least two months.

Improved.

Constitutional symptoms lessened or entirely absent; physical signs improved or unchanged; cough and expectoration with bacilli usually present.

Unimproved.

All essential symptoms and signs unabated or increased.

TERMS USED IN DEFINITION OF "INCIPIENT"

1. *Slight Constitutional Disturbance.*

Slight loss of appetite, of strength, of weight; lassitude; possibly slight acceleration of pulse or possibly slight elevation of temperature. The impairment of health may be so slight that the patient does not look or feel sick in the ordinary sense of the word.

2. *Slight Elevation of Temperature.*

Maximum temperature after rest for one hour, never goes 99.5 to 100 degrees F. by mouth (or 100.5 per rectum).

3. *Slight Acceleration of Pulse.*

Maximum pulse rate not over 90 after rest for one hour, sitting or lying, except when due to causes other than tuberculosis.

4. *Absence of Tubercle Bacilli.*

Each monthly examination (if the sputum be negative) to consist of a careful microscopic examination, with a mechanical stage, of two smears, devoting at least three minutes to each smear, made from selected particles (at least six from different parts) of the sputum on each of three successive days. The morning sputum should always be obtained, or, better, the minute bits that some arrested patients raise at very infrequent intervals. It is not yet deemed wise to insist on digestion and centrifugalization, or inoculation of guinea pigs.

5. *Infiltration.*

Physical signs of slight prominence of the clavicle, lessened movement of chest, narrowing of apical resonance with lessened movement of base of lung, slight or no change in resonance, distant or loud and harsh breathing, with or without some change in the rhythm (i. e., prolonged expiration); vocal resonance possibly slightly increased; or fine or moderately coarse râles present or absent. If sputum contains tubercle bacilli, any one of these.

6. *Apex.*

That portion of the lung situated above the clavicle and the third vertebral spine.

7. *Small Part of One Lobe.*

An area of one or two intercostal spaces, or an area not exceeding 60 to 80 sq. cm. in extent, according to the size of the patient.

TERMS USED IN DEFINITION OF "MODERATELY ADVANCED"

8. *Marked Impairment of Function, Either Local or Constitutional.*

Local: Marked dyspnea on exertion, limiting seriously the patient's activity.

Constitutional: Marked weakness, anorexia, tachycardia.

9. *Moderate Extent of Localized Consolidation.*

An area of one-half lobe or less, but may involve both apices; marked dullness, bronchial or decidedly broncho-vesicular breathing; markedly increased vocal resonance; râles usually present. These signs are to be sharply limited as to area instead of gradually shading into normal physical signs.

10. *Evidences of Destruction of Tissue.*

Presence of tubercle bacilli or elastic fibers in the sputum or the presence of the physical signs of a cavity. There are no absolutely certain physical signs of cavity, but a combination of any four of the following signs is to be taken as indicative of a cavity: (1) cracked-pot note; (2) amphoric breathing; (3) intense whispering pectoriloquy; (4) a veiled puff or post-tussive suction; (5) bubbling or resonant râles. "Physical signs of softening" do not admit of any definition apart from that of cavity formation, and the terms should not be used.

11. *Disseminated Fibroid Deposits.*

More or less localized areas of fibrous tissue, producing on physical examination some change or dullness in the percussion note, more or less increase of vocal resonance, harsh, suppressed, or broncho-vesicular breathing, râles sibilant or sonorous usually, but at times fine and moderately coarse.

12. *Serious Complications.*

These should be limited to tuberculous complications, such as meningitis, pharyngitis, laryngitis (except slight thickening in the posterior interarytenoid space, and superficial ulceration of a vocal chord), enteritis, peritonitis, nephritis, cystitis, orchitis, adenitis (unless very slight), etc.

SUMMARY MEDICAL REPORT DECEMBER 1, 1919, to NOVEMBER 30, 1920

Patients admitted:

Incipient.....	100
Moderately advanced.....	124
Far advanced.....	87
Not classified.....	20
Not tuberculous.....	18
Total.....	349

Patients discharged:

Arrested.....	21
Apparently arrested.....	30
Quiescent.....	79
Improved.....	120
Unimproved.....	43
Died.....	18
Not tuberculous.....	18
Not classified.....	20
Total.....	349

Hospital days.....41,189

LABORATORY REPORT

Sputa: (Miks.).....	1,632
(Chem.).....	54
Urinalysis: (Miks.).....	694
(Chem.).....	1,319
24-hour specimens.....	53
Blood counts:	
W. B. C. Dif. counts.....	53
W. B. C. counts.....	150
R. B. C. counts.....	80
Hemoglobin.....	73
Color index.....	52
Arneth.....	24
Complete count.....	32
Malaria.....	9
Wassermann.....	76
Cultures.....	11
Widal.....	10
Smears for plasmodia.....	7
Pleural fluid.....	17
Pleural pus.....	3
Feces.....	489
Gastric.....	37
Vaginal smears.....	15
Autogenous vaccines.....	1
Fistula discharge.....	7
Urethral discharge.....	7
Pus from ear.....	1
Total.....	4,872

A. W. SNOW, *Assistant Secretary*

ANNUAL REPORT
NORTH CAROLINA TUBERCULOSIS ASSOCIATION
1920

We desire to direct attention to the Annual Report of the North Carolina Tuberculosis Association. This is a volunteer association, and is financed wholly by the annual sale of Tuberculosis Christmas Seals. While it has no connection whatever in fact with the Division of Tuberculosis of the State Board of Health, yet its aims and purposes are largely the same, and the absence of overlapping and the close coöperation with tuberculosis work of every kind in the State make it a most valuable asset in the fight against tuberculosis in North Carolina. In fact, but for the coöperation of this Association the appropriation to the Division of Tuberculosis would have been totally and wholly inadequate in keeping pace with the advance of tuberculosis work in our State.

We are in position today to use to great advantage 100% more money than is in hand from both the State appropriation and the State Tuberculosis Association.

Let us mention one or two items of work done by the State Tuberculosis Association: The Tuberculosis Clinic conducted by Dr. J. L. Spruill has examined 1,419 people, of whom 25% were positive for tuberculosis. It has aroused the interest of the people in tuberculosis to such an extent that we expect to have more than one county Tuberculosis Hospital in the near future.

The Moving Picture Car for negroes has carried the moving picture theatre to the negroes in rural districts, spending one week in each of fifty counties, and 42,861 people have seen the pictures. Films on Health, Civics, Agriculture, and other subjects of value have been presented, and usually there is shown each evening a comic picture, bringing out rollicking fun.

We desire to direct your earnest attention to the detailed report herewith.

In submitting report of the 1920 seal sale your Executive Secretary advises that the following local chairmen have not made report of sale, and the amounts due from these towns are, therefore, not included in this report; Mrs. P. W. Vaughn, Durham; Mr. E. F. Redding, Lucama; Dr. E. G. McMillan, Maxton; Mr. T. F. Limrick, Monroe; Mr. Alex H. White, Pollocksville; Mrs. W. W. Williams, Rocky Mount;

Mr. L. A. McGeachey, St. Pauls; Dr. B. H. Palmer, Shelby; Mr. G. G. Nichols, Sparta; Miss Elizabeth Garden, Spray; Mrs. J. W. Manning, Williamston.

According to the sale of seals last year we are due to receive a total of \$2,143.84 from these eleven towns, of which amount \$535.96 will be due the Executive office. A report of this amount is made under schedule "q" and will be referred to later.

It will be noted that the amount raised in the seal sale of 1919 exceeded this year's sale by approximately \$3,500.00, but it must be borne in mind that the financial condition of the country was vastly different in 1919 to what obtained in 1920. The outlook for an increase in the sale was bright until November, at which time the cotton mills and other industries began closing down, thereby creating a depression in the employment of labor, with its accompanying shortage of money.

These conditions did not obtain in Greensboro, Winston-Salem, Charlotte, Wilmington, Asheville, or towns of like size, but it will be remembered that North Carolina has numerous towns with a population ranging from 1,500 to 7,000, a large number of which are "cotton mill towns." It was therefore in these smaller towns that the financial depression was felt worst and was reflected in a much smaller sale of seals than in previous years.

It will also be remembered that the purchasing power of the dollar was depreciated in 1919 to about 50% of its normal power. This condition is improving, and we believe as much or more work can be accomplished this year with the receipts realized as was done last year.

Much credit is due the chairmen and committees in the larger towns above mentioned for the success of the sale this year. The harmonious organization in these towns was wonderful; add to this the interest of these workers in the health of their citizens and the determination to raise sufficient funds that the tuberculosis work may not suffer, and we begin to understand to some extent the success which attended their efforts, all the larger towns mentioned showing increased sales over 1919.

The colored seal sale chairmen working in 42 counties exceeded the amount raised last year by a few hundred dollars.

We had intimated that \$8,500 would be required to operate two traveling moving picture outfits this year, and prepared budgets for the chairmen on this basis. You will notice the net receipts were \$3,000 less. But again when we realize that the amount raised by the colored people of 42 counties, most of which was raised in the rural sections, exceeds by 6c the total seal sale in North Carolina for 1913, we feel like saying, "Well done, thou good and faithful servant."

The mail sale was not used as extensively this year as last. There was a total of 12,500 mail sale letters containing 100 seals and 1,200 letters containing 500 seals sent. It will be noticed that the cash returns received from this number was approximately 33%, calculated on the basis of \$1.00 per letter, which is the same in proportion as the cash return of last year.

Before taking up the analysis of receipts and expenditures for the fiscal year it would be well to consider the policies and plans of the National Association for the coming year.

At the conference of Tuberculosis Executives at Chicago, January 5-6-7, it was voted that the official date for the seal sale be from November 25th to December 25th. (Thanksgiving to Christmas.)

It was voted that the sale of Health Bonds be continued, but that they be smaller in size. The seal design is to include Santa Claus, the child and the double-barred cross.

It was decided that State Associations purchase supplies from the National Association on the same general plan as last year, providing for payment on July 1st, August 1st, and September 1st.

It was the sentiment of the Secretaries present that the percentage of the seal sale proceeds to be paid to the National Association shall remain at 5% of the gross receipts.

Dr. Hatfield stated that one Director of the National Association is to be named by each affiliated and represented association, and that the selection of this director be made at the annual meeting of such association.

In defining the meaning of "affiliated and represented associations" the National Association states that they must maintain the following qualifications:

1. They shall not be under the direction or control of any state or local governmental agency.
2. Such association must have:
 - (a) A membership which has representation and participation in its affairs.
 - (b) A president and other officers, an executive committee, a salaried executive or similar officer, and a board of directors representative of the territory covered by the association.
 - (c) The membership must meet at least once a year; the board of directors or executive committee must meet at least four times a year.
 - (d) The association must operate under a constitution and by-laws, with an annual program and budget.
 - (e) The accounts must be audited by a certified public accountant or his equivalent at least once a year and a copy filed with the National Association.

- (f) An annual report of accomplishments, receipts and expenditures shall be prepared and made available to officers, members and the public and given all possible publicity.
- (g) All associations shall comply with and carry out the aims and objects of the National Association, submitting such reports as may be required by the Association, and must accept the responsibility of working out and sharing with the National Association means of financing their mutual activities.

It is further proposed that the Executive Committee of the National Association shall be the sole judge of the foregoing qualifications for affiliated and represented associations, and of their right to membership and representation on the Board of Directors of the National Association.

At present the affiliated and represented associations consist of the State Tuberculosis Associations and five local city associations. Thus it will be seen that the State Associations will have representation on the Board of Directors of the National Association to the extent of 53 members. These directors may not be elected for a period of more than two years and are not eligible unless they are directors of the State or local organization.

Your Executive Secretary recommends that the qualifications mentioned be submitted to the chairmen of our local organizations in order that they may organize associations to conform to these requirements if they so desire.

On December 28, 1920, the National Association advised your Executive Secretary that they had registered the double-barred cross as the trade-mark of the National Tuberculosis Association and that its use would not be permitted by "affiliated and representative associations," unless all matter bearing the trade-mark was first submitted to the National Association for approval. In this connection it will be remembered that the "North Carolina Anti-Tuberculosis Association," which is the parent of our present association, was organized in 1904 and has at all times used and endeavored to popularize the use of the double-barred cross; and that the National Association was not organized until the same year, and therefore has no priority of right in the use of the double-barred cross. Your Executive Secretary further submits that it is not feasible to submit material to the National Association before publication; that to do so will occasion delays in our work that will be exceedingly harmful; that it will defeat the purpose of having an emblem to distinguish tuberculosis work in that its use will be so restricted that it will appear on pamphlets and publications only at rare intervals. Your Executive Secretary believes that the use of the double-barred cross should be so restricted as to pre-

vent its use by unauthorized persons or organizations, but believes that the state and local organizations should be given full authority for its use on all matters approved by said Association. This matter is under consideration by the National Association Directors at this time.

The Executive Office is confident that through the use of the double-barred cross and the publicity given the work of the North Carolina Tuberculosis Association during the past year that the Association has gained wonderfully in prestige and that its work is better known and approved in the State today than ever before. A great deal of credit for this is due the local associations that during the past year placed their work before the public by means of the press and publications. The favorable opinion created and the popularization of the cross will be much curtailed if the policy of the National Association in this respect is pursued. In this connection it is proper to say that the publicity given the tuberculosis work in general and the seal sale in particular by the newspapers of Winston-Salem is worthy of special mention, as is the work of Dr. R. L. Carlton, who made it possible.

By referring to the analysis of expenditures under schedule (a) it will be seen that the campaign expenses for the year totaled \$5,937.62, for which an appropriation of \$3,000.00 was made. Included in this amount, however, is \$1,319.60 paid the National Association for seal supplies. Formerly, these supplies were furnished free, the State Association, however, was required to pay 10.7% of the gross receipts to the National Association, which amount was reduced to 5% and the local associations required to pay for all supplies ordered. The State Association shows a saving of \$500.00 by this arrangement.

The cost of postage stamps was also a large item in these expenses, a total of \$900.00 being required. Of course a large proportion of this was used on the mail sale letters, it being required that we enclose a stamped, self-addressed envelope for return of remittance, with all seals sent out.

The subscription blanks as recommended for last year were secured at a cost of \$171.00, and were, we believe, productive of good results in increasing the sale of seals and bonds.

The salaries for the entire office force used during the three months of the campaign are included under this heading and aggregate a total of \$1,842.09 for the 8 employees used.

Under schedule (b) a part of the appropriation was used for the purchase of a dairy wagon. This appropriation is a balance carried over from 1919, as it was thought wise to let it continue until the dairy plant was completed. We are pleased to report that the dairy bottling plant is now modern in every respect and that the Sanatorium appreciates greatly the assistance given by the Association in this respect.

(c) You will notice a total of \$5,558.50 has been expended under the loan appropriation to build a workshop to be used for occupational therapy and a garage building. Without this loan it would not have been possible for the Sanatorium to have erected this building until the latter part of this year or possibly next year. We will then have had the use of the building two years earlier than would have been the case without this loan. The Sanatorium expects to repay this loan during the present year and cognizance is taken of this in figuring the assets of the Association for the year.

The building has made possible a wide range of vocational work that is important in keeping the ambulatory patients contented and has also enabled the patients to make salable articles and thus contribute toward expense of treatment. The shop is equipped by the Federal Board for Vocational Education with a great many modern appliances that enable the patients to manufacture articles that would otherwise be impossible for them to do. The shop is used by discharged soldiers and civilian patients alike.

(d) The appropriation for a consultant clinic physician has been a distinct addition to our work this year. The work was begun on May 1, 1920, with Dr. J. L. Spruill as clinic physician, and is steadily growing in popularity. We have been forced to make engagements several months in advance in order to take care of the numerous requests for this service. At this time engagements have been made up until July. During the ten months the clinic has been in operation a total of 1,419 examinations for tuberculosis have been made. Addresses on the nature, care and prevention of tuberculosis have been made by Dr. Spruill at 43 places to a total audience of 8,446. This work has been instrumental in interesting towns and counties in the tuberculosis problem to the extent of securing a pavilion addition for the treatment of tuberculosis to a general hospital; for the ordering of an election to vote bonds for the purpose of erecting a county sanatorium; for interesting local units in providing public health nurses, and for interesting corporations in providing better care for employees.

(e) A loan of \$200.00 was made under this appropriation to Miss Alice B. Casey to complete the course in public health nursing. Immediately upon completing this course Miss Casey accepted the position as County Public Health Nurse of Robeson County. Owing to the shortage of Red Cross funds in this county Miss Casey has since been transferred to Davidson County. This amount makes a total of \$300.00 loaned Miss Casey and is payable to the Association, without interest, during the two-year period following completion of the course. This account is carried in the assets under schedule (q).

(f) No expenditures were made under the appropriation to pay for board and treatment for discharged soldiers, as the Government is now paying these bills promptly.

(g) \$225.00 was used under the colored public health nursing appropriation to pay the salary of Blanche Hayes, a colored registered nurse attached to the Health Department of Edgecombe County, immediately under the direction and instruction of Miss Clara Ross, Public Health Nurse for Edgecombe County, for a period of three months. This enabled the Health Department to provide visiting nursing service for the colored patients during the influenza epidemic of last year. Financing this work was of a temporary nature and was done to demonstrate the usefulness of colored public health nursing and aid the county until funds could be secured to continue the work. Blanche Hayes is now on the staff of the Charlotte Health Department.

(h) The appropriation for additional X-ray equipment has not been used. At the last annual meeting it was recommended that this appropriation be continued, as the Sanatorium would need some additional X-ray equipment as soon as the new infirmary and office building were completed. We had expected the building to be finished before the expiration of the fiscal year, but such was not the case, and we ask that this appropriation be continued for another year.

(i) Not used.

(j) The appropriation for the moving picture car to be used among colored people was sufficient to purchase and equip the car and make the circuit of all counties participating in the sale of tuberculosis seals. This schedule was completed in December and upon examination of the truck used we found that it would not be possible to use the same truck without extensive overhauling. As it was not desired to interrupt this service, that was proving of such help in educating the colored people in regard to tuberculosis, it was decided, upon the sanction of the President, to purchase an entire new equipment and operate both cars during the coming year.

The new car is now in operation and repairs on the old car have been completed with the exception of repainting, which can be done in a few days. We have been unsuccessful in securing a properly qualified man to operate this car. We have not, however, pushed the matter, as it is estimated that it will require at least \$8,500.00 to keep both of the cars in operation for the entire year, and your Secretary concluded this was a larger amount than you would deem advisable to spend in this branch of the work during 1921. Since the car was put in operation on March 15, 1920, it has visited 50 counties, staying one week in each county, and has shown and explained health educational pictures to a total audience of 42,861. In addition to exhibiting the pictures, Dr. Ransom, the operator, has visited over 1,500 families

in their homes, teaching the principles of good health and aiding the members in many other ways.

(k) The appropriation of \$2,000.00 for health work among the negroes was insufficient to carry out the program for the year and fulfill our contract for the year with other agencies coöperating. This appropriation was used to pay one month's salary for 41 colored supervising teachers. By coöperating with the State Agent of Rural Colored Schools we were enabled to secure approximately one-sixth of the working time of these supervisors. We have made use of this time by having the supervisors instruct the colored people of their county along general health lines with especial reference to tuberculosis. During the year these supervisors have reached 311,005 by word of mouth; distributed health educational literature to many thousands more; given illustrated lantern slide lectures to 15,000; raised \$5,253.13 in the seal sale and established the Modern Health Crusade in a number of colored schools in each county, enrolling a total of 16,500 crusaders since September, 1920. You will be interested to know that the deaths from tuberculosis among the negroes have declined 21.4% in the last two years, according to reports of deaths sent the Bureau of Tuberculosis. There are 1,791 deaths recorded in 1918 against 1,407 in 1920.

(1) Self-explanatory.

(m) The major portion of the appropriation for moving picture films was not used, as plans for photographing the pictures desired have not been completed. We did, however, purchase three 1,000-foot films from the National Association and have made use of these films on the moving picture car and as a loan to any party that could secure an exhibition of the films in either theater or school. The films have been exhibited in the latter manner 14 times to an audience of 1,700.

It is hoped the Association will continue this appropriation to be used in the manner hereinafter explained.

(n) The Modern Health Crusade has been enthusiastically received this year. A total of 40,224 crusaders have been enrolled since September, 1920. It will be noticed that \$989.65 of this appropriation has been used. Of this amount \$465.64 has been recovered by the sale of supplies, and there is due the Association at this time \$259.45, which makes a cost of \$264.56 to the Association for conducting the Crusade. This difference in receipts and expenditures is accounted for by the Association furnishing supplies to the colored schools at one-half cost. This was necessary, as it was found that the colored schools could not raise the funds to pay the entire cost of crusade supplies without financial assistance. There are also a large number of sample copies of supplies sent out without charge. An item for mailing supplies to the amount of \$40.00 is also included in expenditures.

We are hoping to simplify the Crusade somewhat this year in order to overcome the objection of some school authorities and thus obtain more universal adoption. The Crusade is filling an important place in teaching health rules to the school children by performance, and we strongly recommend its continuance.

(o) Self-explanatory.

(p) The miscellaneous expenditures under this schedule are all self-explanatory. We have endeavored to keep the miscellaneous expenditures within the appropriation allowed, but find the amount was inadequate, as we were forced to pay bills from this account not especially appropriated for.

(q) From this schedule it will be seen that the possible assets for this coming year total the net amount of \$22,384.79, of which amount \$14,380.27 is on deposit at the Merchants and Farmers Bank at Aberdeen, N. C., as shown by certificate from bank attached hereto. It will be noted that the certificate from the bank shows a balance of \$14,452.02. The difference is accounted for in the financial statement in outstanding checks.

A total of \$8,745.50 is due the Association by the Sanatorium account of loans to cover bills for board and treatment of discharged tuberculous soldiers and for the erection of the building for occupational therapy. It is expected that this amount will be paid during the year.

We are attaching hereto a budget carrying recommendation for expenditures somewhat in excess of the total of our net assets, and ask that this budget be adopted and the Executive Committee authorized to carry out the recommendation in so far as is possible with the funds available.

BUDGET OF NORTH CAROLINA TUBERCULOSIS ASSOCIATION

For the fiscal year ending February 28, 1922

Publicity Director.....	\$ 1,800.00
Publication of Bulletin.....	3,000.00
Campaign expenses (seal sale).....	5,000.00
Clinic Physician, salary \$3,500, expenses \$1,500.....	5,000.00
Clinic Physician, for examination of school children.....	5,000.00
Scholarship public health nurse.....	500.00
Additional X-ray equipment.....	650.00

Modern Health Crusade.....	1,000.00
Miscellaneous expense.....	3,000.00
Total	\$ 36,450.00

The National Association advise that they will not send any regular press material to the local papers this year, and recommend that each state employ a Director of Publicity. We heartily concur in this recommendation and call attention to the fact that the Publicity Director would be used not only to secure publicity for the seal sale, but would be expected to issue a monthly or bi-monthly bulletin of an educational character. The Publicity Director would also be expected to assist in the preparation of special bulletins and be available for consultation service to local associations. It is recommended that the tuberculosis diagnostic clinic be continued and that in addition the Executive Committee be empowered to employ an additional clinic physician for the examination of school children during the school term and to be used at local clinics when the school term is over.

It is desired to prepare a moving picture film of local interest in which we can bring before the people of North Carolina health educational matter in an interesting manner. We have received bids for preparing a film along the lines desired at a cost of 45c per foot. The expense of the photographer to be in addition.

For some time we have felt the need that more research work looking to the care and prevention of tuberculosis should be done. We realize that the Sanatorium presents an unequalled opportunity for making studies that should not be neglected. There is much research work in tuberculosis that can be done in no other place, and we are anxious that the North Carolina Tuberculosis Association shall be among the first of the associations to adopt a progressive policy along this line.

That there is a need for such work is plainly evident when we make a survey of the tuberculosis situation in North Carolina. The population of the State, based on the 1920 census, is given at 2,556,486. Based on the most reliable estimates and from information on file there are known to be 25,000 of this number who are ill with tuberculosis and in need of treatment. This does not take into consideration the large number of inactive, cured, and cases not sufficiently advanced to be generally diagnosed. From statistics received to date 2,763 deaths were recorded. This number, we are glad to say, is a considerable reduction over previous years, the highest recorded number of deaths having occurred in 1913, at which time 4,800 were reported as due to tuberculosis. It will be remembered, also, that this reduction was made during the time an increase in population of 350,000 was made. If we can make these large gains in the fight against tuberculosis almost exclusively by educational methods, how much more we can hope to accomplish when the veil that shrouds the method to be used in the cure and prevention of tuberculosis is fully

removed. Our part is to do what we can to bring the light of knowledge on some of these dark points, and to this end we respectfully recommend the appropriation of \$2,000.00 for this purpose.

The other appropriations recommended are for continuing work already under way of which the Directors are familiar.

Your Executive Secretary believes the membership of the Board of Directors should be increased in order that fuller representation may be secured. The Directorate at this time is represented by the following cities: Charlotte, Hendersonville, Wilmington, Candor, Durham, Asheville, Winston-Salem, Greenville, Oxford, Arden, and Gastonia. There should be a Director elected from Greensboro, one from Goldsboro, and one additional from Winston-Salem and such other towns as deemed advisable. It is further recommended that the local associations pay expenses of their Director to the State Association.

All of which is respectfully submitted.

L. B. McBRAYER,
Executive Secretary.

REPORT OF AUDIT

RALEIGH, N. C., March 31st, 1921.

*North Carolina Tuberculosis Association,
Sanatorium, N. C.*

GENTLEMEN :—

In accordance with your instruction I have audited the books and accounts of Dr. L. B. McBrayer, Secretary, and respectfully submit the following report as a result of said audit.

I find the books accurately and systematically kept and I had no difficulty in securing the information desired.

I desire to extend congratulations on the great showing that you have made.

Respectfully submitted,

J. J. BERNARD,
Certified Public Accountant.
