THE SYSTEM OF DETECTING COUNTERFEIT BANK NOTES!

WITH DESCRIPTION OF BOTH GENUINE AND COUNTERFEIT PLATES,

Is certainly the most ready and reliable means extant.

THE LEARNER SHOULD TAKE TIME TO OBSERVE ALL THE RULES CAREFULLY.

THE GEOMETRIC LATHE.

The "Geometric Lathe," is a very perfect and costly Engraving Machine, which produces very fine and ornamental patterns of geometric circles of such complication, uniformity, and perfection, that it cannot possibly be imitated in any manner. It engraves or turns the circular or oval pattern on the dies in the genuine bills, on which the figures, representing the denominations of the notes, are placed. This work, in the counterfeit, is done by hand.

RULE I.

The patterns produced by the Geometric Lathe are concentric—eccentric or geometric circles radiating from a common centre, and beautifully interwoven into each other, forming a perfectly regular and uniform fancy pattern, so exactly true and uniform in its radiations that there never is the slightest possible irregularity or imperfection. It is because the patterns are of such exquisite beauty and perfection, and at the same time so extremely fine and complicated, that it is utterly impossible to imitate them by hand, or by any other process whatever. And it is perfectly impossible to imitate the genuine, and there is such a striking difference between them that no one need to fail in detecting them, as the counterfeiters are very pale, flat and sunken, with a coarse, scratchy appearance.

The Geometric Lathe does not engrave the patterns upon the plate, but upon dies, which being transferred upon the plate, will print white eccentric circles upon a black ground. This is what gives the patterns of bills work such a look raised appearance.

In counterfeit these patterns are cut directly upon the plate, instead of being transferred; and it will print dark lines upon a white ground work. When two or more genuine dies pretend to be alike on the same bill, they are precisely alike, being both transferred from the same original. Counterfeiters will fail in getting two or more dies alike, as it is impossible to engrave them exactly alike on the same plate.

DESCRIPTION OF RULING MACHINE, AND

RULE II.

The Ruling Machine is used for shading the letters, skies, &c., in the genuine bank notes. Underneath, and sometimes on the face of the letters, in the title or name of the bank, as well as other lettering, there appears a soft, smooth, pale, greyish color, which to the naked eye, appears to be painted with a brush, but on close examination, it proves to be fine parallel lines, and when done by the Ruling Machine the lines are, 1st, all exactly of the same size; 2d, regular distances apart; 3d, perfectly parallel to each other; 4th, uniform in their direction; and 5th, it is perfection in these four points which gives it such a smooth and perfect appearance, and the least deviation from which will prove to be hand work. In counterfeit this shading is imitated by hand, and it is impossible to do it in this way as perfect as by the Ruling Machine; some lines will be coarser than others, some wider apart than others, and not parallel to each other, some not perfectly straight, which gives the whole a scratchy appearance—in fact, the least deviation in any of the points, will show at once, and destroys the appearance of the whole.

MEDALLION PENTAGON RULING.

[INIMITABLE.]

The Medallions are raised patterns or line engravings, generally representing a head, or some raised fancy patterns in Genuine Bank Notes, which looks as if raised up from the paper. They are called Medallions, because they are always copied from a medal or previously formed pattern of raised work.

ALTERED DENOMINATIONS.

This is altering from a small denomination to a larger, as ones altered to tens or twenties. This is done in various ways: one way by pasting a die of some broken bank on to a genuine, but is more generally done by extracting the ink of the figures and the dies containing them by some chemical process, and printing in their place a counterfeit die, and sometimes a worn out genuine die, as a number of years since an engraving company fitted and sold some of their dies at auction, which fell into the hands of counterfeiters.

Some times the name or a part of the name of a broken bank may be altered, by extracting the original name and printing the name of a sound bank in its place, for instance: "The Potomac River Bank, Georgetown, D. C." altered to read and pass for the "The Millers River Bank, Athol, Mass." The word Potomac being extracted and the word Millers printed in its place. The shading of the words River Bank is perfect, being done by the ruling engine, and will harmonize with the other shading of the bill, while in the word Millers the shading is done by hand, which is coarse and uneven, and not of the same shade as the other, and easily detected by any one understanding the ruling engine work.

In this case the solid print does not harmonize as it does in all genuine bank notes. This will be found a very valuable test in detecting altered bills where the denomination or name of the bank, town, and state are engraved in solid print.

When the denomination is placed on an engine ruled die, it is impossible to extract it, and reprint another so as to compare with the other ruling on the same bill, which are always the same shade.

When the denomination is on lathe work, and both are extracted, it is impossible to reprint a counterfeit die which is not easily detected by any one understanding the Geometric Lathe work.

The red letters or figures representing the denomination of the note, being Geometrical Lathe Work, when extracted it is impossible to reprint it again in a distinct, perfect manner.

When the medallion work, on which the denomination is often placed, is extracted, it is impossible to be replaced and show that clear metallic appearance, always seen in genuine.

CONCLUDING REMARKS.—It is not required of the pupil to commit these rules to memory, but that he shall understand and know how to apply them. In looking at the various points in the bill, to decide whether it is genuine or not, it is always best to have some uniform method: 1st, look at the Lathe work, then the Ruling, then the Medallions, &c., &c. The habit of scrutinizing a bill so thoroughly in all the points, will soon enable the learner to judge readily, and at sight. There is a peculiar feature in the other shading of the bill, which is done by hand, which is coarse and uneven, and not of the same shade as the other, and easily detected by any one understanding the ruling engine work. No ease and facility in judging money is only acquired by either very many years of experience in handling money, or by first becoming acquainted with the various parts of genuine and counterfeit notes, and the process by which they are engraved. It is not calculated the learner will become a perfect judge of money by simply reading the rules a half hour, but that he will obtain therefrom an infallible key for the detection of counterfeiters, with the aid of which he will not (if careful) be deceived once in five thousand times.

RULE III.

The points in determining genuine metallions from counterfeiters, are, the lines in the genuine ground, run in one general direction; they are always full length lines across the whole pattern; they never cross each other. Every undulation in the pattern on the guide or medal, is copied with the most exacting exactness, and articulated distinctly and beautifully correct, which is impossible to be done so perfectly by hand. In the counterfeit the lines are apt to break off in the pattern; some lines are apt to be coarser than others. In the genuine the lines crowd together in the parts of the pattern that appears depressed or sunken, and spread apart more where the pattern appears raised, and looks whiter, producing the lights and shades with the most magnificent ease and effect. In the counterfeit, done by hand, the lines do not crowd and spread apart again according to the pattern, with such ease and effect, but the pattern appears stiff, flat, or imperfectly raised.

RULE IV.

SKY AND DRAPERY.

The sky in vignettes in genuine is sometimes ruled by the Ruling Machine, and always appears soft, smooth, and perfectly done, and in this case the lines taper off gradually. Imitations of this by hand will appear uneven and scratchy; some lines coarser than others. All genuine skies, however, are not done by the Ruling Machine, but are sometimes fine dots, or wavy lines which fade off into fine dots, and sometimes heavy rolling clouds, with circular lines, but it is always done perfectly and beautifully, and looks smooth and natural, being always done, in genuine bills, by first cast artists, while the sky in counterfeiters is generally apt to appear coarse and scratchy, and not fading off gradually enough.

The drapery in the genuine beautifully represents the folds and texture of different kinds of cloth, sometimes the dark, heavy and glossy appearance of broadcloth is produced; sometimes the light, flowing appearance of silk or muslin; that folds look easy and flowing—no stiffness. In counterfeiters the drapery appears scratchy and stiff, sometimes having the "solid" appearance of cast iron work in coarse wire cloth, twisted up in a snarl, in trying to imitate the easy and natural folds of the genuine.

RULE V.

THE HUMAN COUNTENANCE.

In the genuine there is a bold, easy, natural life-like expression, raised from a fine lack ground on the counterfeiters the expression looks wild, dead and unnatural; in the genuine the eyes have a perfect natural expression, while in the counterfeiters they are generally two clumsy dots. This work is always done by hand, both in the genuine and counterfeit; but in the genuine it is always done by first class artists—men who are at the head of their profession, and who can always get such a remuneration for their labor that there cannot possibly be any temptation for them to counterfeit. It is only second, third, fourth, and sometimes hundredth rate artists that counterfeit, runaway apprentices, and cast-off journeymen, and possibly amateurs.

RULE VI.

ENGRAVER'S NAME.

The Engraver's name in the genuine, is a die, cut in the most perfect manner, the letter very neat and perfect, and perfectly uniform in every respect. In counterfeiters it is not a die, but letter cut up by hand, and never so perfect as the genuine—clumsy, not uniform distances apart, nor in size or slant, and not at all in a straight line; generally looks heavy and blurred.

HODGES' AMERICAN BANK NOTE

NEW ENGLAND MUTUAL LIFE INS. CO.,

All over and above the actual liens and charges against the Company, returned in cash to all the insured, every five years, thus making it purely mutual. Last Cash Dividend, 29 7/8 cent.

COMPANY'S BUILDING.

This Company has never failed to make large dividends, and pay them in cash. An uniform prosperity and economy have marked its course since its organization—a period of twenty years.

BOSTON & NEW YORK. ORGANIZED, 1843.

BRANCH OFFICE, METROPOLITAN BANK BUILDING,
No. 110 BROADWAY, N. Y.

CAPITAL - - - TWO MILLIONS, ONE HUNDRED THOUSAND.
SURPLUS - - - ONE MILLION.

Last dividend paid in cash to all the policy holders, 33 7/8 cent., amounting to over \$400,000, and making nearly \$1,000,000 thus paid since the company began business. The past year, 1861, notwithstanding the adversities of the times, was one of marked prosperity.

WILLARD PHILLIPS, Pres.

B. F. STEVENS, Sec.

Economy, care in its risks, and prudent investments characterize this Company. The last report of the Insurance Commissioners, comparing this company with all the principal companies, makes this the leading company in the United States, in surplus and economy.

This Company being purely mutual, insures at the lowest possible rates; and, if the premiums paid exceed the actual cost, the surplus is returned to the parties insuring.

Every five years, at the time of declaring the dividends, the business is, as it were, closed, so that its actual position and solvency are made manifest at that time; and the surplus funds are divided *pro rata*, among all the insured. This guards the assured against any possible loss from inefficiency on the part of the Company, and is a sure guaranty as regards the future.

The terms of payment are peculiarly advantageous to the insured. Premiums can be paid annually, semi-annually, quarterly, or one half of the first five annual premiums on life policies loaned to the insured, if desired.

Insurances may be effected for the benefit of married women, beyond the reach of their husband's creditors. Creditors may insure the lives of their debtors.

Documents of an interesting character, showing the benefits of the mutual plan, explaining the different forms of policies and the manner of making payments, furnished gratis, upon application, by mail or otherwise, to

JOHN HOPPER,

Agent and Attorney for the Co.,

(Metropolitan Bank Building) 110 Broadway, New York City.

ENDORSEMENTS

Of the Leading Bank Note Engravers of the Country, in Favor of this Work.

OFFICE OF THE NATIONAL BANK NOTE COMPANY,
New York, December 19, 1861.

E. M. HODGES, Esq.: Sir—We have examined the copy of your "Bank Note Safe-Guard" submitted to our inspection, and cheerfully recommend it as a work of unquestionable utility, well deserving the patronage of bankers, merchants, and tradesmen, throughout the country. As the merits of your work are very apparent, it will, doubtless, receive the liberal patronage of all who have occasion to handle paper money.

Yours, &c.,

J. MACDONOUGH, SECRETARY.

OFFICE OF DANFORTH, WRIGHT & CO.,
New York, March, 1859.

E. M. HODGES, Esq.: Sir—Your "Bank Note Safe-Guard" seems to possess unequalled merit, in the detailed description it gives of all Genuine Bank Notes; and combined with the "Journal of Finance and Bank Reporter," you certainly offer a work of great utility, as a protection against frauds in paper currency.

Respectfully yours,
DANFORTH, WRIGHT & CO.

OFFICE OF RAWDON, WRIGHT, HATCH & EDSON,
New York, March, 1859.

E. M. HODGES, Esq.: Sir—Having examined the plan proposed in your "Bank Note Safe-Guard," for enabling the public to detect Spurious and Altered Bank Notes, by furnishing accurate descriptions of the Genuine Notes of all the Banks of the country, we take pleasure in expressing our approval of the same, as affording a simple and effectual protection against that species of fraudulent paper money.

Respectfully yours,
RAWDON, WRIGHT, HATCH & EDSON.

OFFICE OF WELLSTOOD, HAY & WHITING,
New York, March, 1859.

E. M. HODGES, Esq.: Sir—We regard your "Bank Note Safe-Guard" as a work that should receive the most favorable attention from all who are accustomed to handle Bank Notes. The facility with which Altered, Spurious, or Counterfeit notes can be detected, is such that the most inexperienced can scarcely go astray. And we have no hesitation in commending the work to the public as one which is much required, and as fully accomplishing its object.

With best wishes for the success of your efforts to prevent imposition, through the medium of your publication,
We remain, truly yours,
WELLSTOOD, HAY & WHITING.

OFFICE OF THE NEW ENGLAND BANK NOTE CO.,
Boston, March, 1859.

E. M. HODGES, Esq.: Sir—Allow me to express to you my unqualified opinion in favor of your "Bank Note Safe-Guard." The simplicity of it is what I most admire; the most experienced of the great mass, who are in the habit of taking Paper Currency can at once detect, an altered or spurious note, which are much more dangerous than counterfeit, and more numerous in circulation. You have my best wishes for its success, believing it to be the best work of its character ever published.

ISAAC CARY, Agent.

New York, March, 1859.

E. M. HODGES, Esq.: Sir—We take great pleasure in endorsing Mr. Cary's opinion of your "Bank Note Safe-Guard," and in recommending it as a work of the greatest utility.

Respectfully yours,
TOPPAN, CARPENTER & CO.

OFFICE OF THE AMERICAN BANK NOTE CO.,
New York, March, 1860.

E. M. HODGES, Esq.: Sir—Attempts at literal imitation, or counterfeiting, in the present advanced state of Bank Note Engraving, are of infrequent occurrence, most of the notes represented in Bank Note Detectors and Reporters being either Spurious or Altered Notes.

Spurious Bank Notes merely retain the name of the Bank and place of issue—not always using the true name of the President and Cashier, and are made up of devices unlike those of the genuine notes, a want of familiarity with which, on the part of the public, being counted on in perpetrating these frauds.

Your "Bank Note Safe-Guard," supplies a desideratum in a manner so simple and so easy of reference, that there can be no danger of snuffing from Spurious or Altered Bank Notes, if brought to the test of comparison which it furnishes.

Respectfully yours,
JOCELYN, DRAPEL, WELSH & CO.

TERMS.

THE SAFE-GUARD.

This work is at length thoroughly completed, being now arranged GEOGRAPHICALLY AND ALPHABETICALLY, thereby obviating the only objection that ever was to it. The notes of each Bank are all on one page, and it is but the matter of a moment to find any note required. This work has cost us many years of toil and expense, and we now present it to the public, with the assertion that no work was ever published that is of greater utility for commercial purposes. It is of interest and importance to every individual, of every age, condition, or sex, who handles a dollar of the magnificent and precious paper currency of our country.

The paper money of the United States is of such infinite varieties of design and execution, that the artful and accomplished counterfeiter can sport upon and defy the perception of the great majority of our people. And the frequent and cruel impositions so repeatedly practiced upon the honest and credulous, have derived their impunity from the fact that other works and Detectors have only attempted to direct attention to the spurious and counterfeit, while, in our SAFE-GUARD ALONE, the idea has been developed of minutely describing the genuine Bank notes.

A new counterfeit, or spurious Bank note, is prepared by a rogue, who, with his numerous accomplices and confederates, distribute and circulate their issue simultaneously in different and distant localities. These notes (not being described in the Reporters and Detectors) being readily taken by the unsuspecting, and by the imperfect judges, in a short time obtain an extensive circulation; and days, weeks, and, in some instances, months have elapsed, before the VIGILANT Bank Note Reporters have informed the community that they have been fearfully victimized. Thus, being at last exposed, but not until he has reaped a rich harvest from his first issue, the counterfeiter again takes the plate to his haunt and alters it to some other bank or denomination, and may do the same thing again and again, and each time with impunity and profit, before the Detectors can act as an efficient check on his proceedings.

But the SAFE-GUARD always, and in every case, acts as a check and preventative against these impositions and frauds, by describing every OXENY Bank note, and every part of every note, dissecting and analyzing all denominations of all notes, of every Bank, organized and doing business in the United States and British North America, showing each note, made up of different designs, vignettes, &c.; each denomination differing so materially, that no one of the notes could be altered to another and larger denomination, without the certainty of an immediate detection on reference to the fac-simile of the plates (in the SAFE-GUARD) of the particular bank on which such fraud has been perpetrated. Herein is exemplified the great superiority of the SAFE-GUARD over all Reporters and other Bank Note Detectors.

Spurious, altered, or raised notes are by far the most numerous class of bad money, and bear no resemblance to the genuine. They are detected at a glance by reference to the SAFE-GUARD, there being therein portrayed a perfect Daguerreotype of the genuine notes; the dress and design of which are as unlike the spurious as is light to darkness.

Counterfeits, or fac-simile notes, are comparatively rare. They are intended to resemble and imitate the true, and calculated to circulate where the genuine are well-known, but can be more easily detected, by close inspection, than any other class of bad bills. Very few of this description are in circulation. Nine-tenths of the bad bills in circulation being altered, raised, or spurious. On reference to our Reporter this will be seen.

Within a few years, photograph imitations have made their appearance. They can be detected by applying cyanide of potassium, which turns the bills white.

In a word, THE SAFE-GUARD detects all PAST, PRESENT, and FUTURE spurious, altered, and raised notes, and is of more utility and security to the commercial interests of the country, than all the Detectors, Bank Note Lists, and other works which, up to this time, have been published. In fact, THE SAFE-GUARD is almost indispensable; FOR IT GOES AHEAD OF, AND ANTICIPATES THE COUNTERFEITER, cutting off his success, while the Reporters and Bank Note Lists but follow AFTER, and to use a homely but forcible expression, "can only lock the stable after the horse is stolen."

We have herein endeavored to show the utility and importance of this work, and with the promise that it shall be always correct to the date of its issue, we are satisfied to send it forth to the public on its own merits.

On another page will be found commendations from all the first class BANK NOTE ENGRAVING COMPANIES in the Union, endorsing HODGES' AMERICAN BANK NOTE SAFE-GUARD. This testimony, together with the approval and patronage of nearly every Banker and Broker in America, at once stamps it as the most valuable publication of the times—indispensable to every well-regulated counting room or business place.
