QUANTITY OF SEEDS IN A PACKET Customers will please note that I state number of seeds in a packet, which will enable those wishing to plant borders and beds of a certain length or size to determine the number of packages required. **FULL COUNT GUARANTEED. No less quantity than a package can be sold.**

FREE PREMIUM 30 cents' worth of seeds extra allowed on all orders for seeds amounting to \$1.00; 15 cents' worth on all orders amounting to 50 cents. Seeds that Succeed

AS in the past 23 years, I am again sending you my catalogue of flower and garden seed, seeds fresh and sure to grow if right conditions are used. This year on account of the very high cost of paper, I shall reduce my issue of catalogues, and will ask you more especially than ever before to please hand the little book to some one else, if you are not at the present time interested in gardening.

My small nephew, Philip Kent Eichelzer, comes to you again on the cover, just one year older, and I hope he will come to you year after year, eventually to become a good seedsman.

Thanking you for past patronage, and hoping for an order this season. Please remember that early orders are very much appreciated, but all orders can be taken care of all the year around. Very sincerely yours,

CARRIE H. LIPPINCOTT.

THE CULTURE OF ASTERS

The cultivation of the Aster is simple. Do not sow the seed too early; the middle of March indoors is a very good time. Successive sowings should be made, if a constant supply of flowers is desired from July until frost. For early use sow the seed in shallow boxes, covering with one-fourth inch of soil. Later sowings may be made in hot-beds or cold frames; or in the open ground, when all danger of frost is past. Never use the same ground or location twice in succession. The soil should be rich and moist. Use wood ashes and phosphates as fertilizers. Allow plants plenty of room; rows should be 3 feet apart and 15 inches between the plants in the row, but the distance may be less according to the habit or growth of the variety.

The aster beetle or fly is one of the worst pests but there seems to be only one crop of them, and these if caught and killed, are not usually followed by others. Dusting the plants with air-slacked lime or dry ashes will be found beneficial. Root lice and cut worms are also troublesome. Applications of kerosene emulsion or tobacco water around the roots are effective. Aster blight or "yellows" can usually be traced to the work of the above pests. The plants should be pulled and burned if they should become badly diseased. Good cultivation and the timely use of the remedies suggested should produce healthy, vigorous plants.

LIPPINCOTT'S CHOICE ASTER SEEDS

QUEEN OF THE MARKET—Of graceful spreading habit, it is in full flower two weeks before most other Asters.

Deep blue, white, pink and rose in mixture. Pkt., 150 seeds, 5 cts.

WHITE OSTRICH PLUME

Plants of strong branching growth, 15 to 18 inches in height. The large size of the flowers, the fine feathery appearance, long stiff stem, and early flowering habit combine to make it most desirable for decorations.

Pkt., 150 seeds, 8 cts.

VICK'S ROSE KING ASTER

Is a bright, brilliant rose color. It possesses all the characteristics of a good Aster vigorous in habit, with stems frequently 2 feet in length, flowers large as saucers, crowns completely covered, a good keeping variety and unsurpassed for cutting.

Petals are stiff and strong and do not show the effects of cutting until long after many other varieties would be completely wilted. Pkt., 150 seeds, 8 cts.

DAYBREAK

The plants grow stiffly erect, eighteen to twenty inches in height, with ten to fifteen branches, each bearing a very large extremely double flower with incurved petals. The broad silvery petals are suffused with soft delicate pink. Pkt., 150 seeds, 8 cts.

MIKADO PINK "ROCHESTER"

In size and beauty the Rochester is equal to the Crego Aster. It comes into bloom about ten days earlier. The color is a most exquisite shade of lavender pink. The petals are long, narrow and curled. The vigorous growth of this aster makes possible its long slender upright stems, giving the plant an exceedingly graceful appearance as it supports its 15 to 20 immense feathery flowers. Pkt., 150 seeds, 8 cts.

EARLY SNOWDRIFT

IS CERTAINLY THE EARLIEST ASTER IN CULTIVATION—The leaves are narrow and sparse, and the branches spring from close to the ground. The entire energy of the plant seems given to the production of twelve to twenty long, slender, upright stems, crowned with immense feathery flowers. The flowers all come perfectly double. Pkt., 150 seeds, 8 cts.

NEW YELLOW ASTER

The form of the double flower is a perfect ball; the quills are close together and of the brightest sulphur yellow. The flowers are borne upon long, erect stems, excellent for cutting. Plants, 12 to 15 inches high, are of compact, hardy growth, and most abundant bloomers. Pkt., 150 seeds, 5 cts.

It is of the easiest culture, succeeding in any open, sunny position, and is not only desirable as a single plant in the mixed hardy border, but can be used with fine effect in masses or beds of any size. Pkt., 100 seeds, 8 cts.

HARLEQUIN ASTER

The color of the blossoms ranges through all the shades of red, from a pink to a fine, deep purple, with an intermediate bright red, edged with white. The face of the flower in some cases is regular in color, while in others it is lined and striped. Size of flowers, 3 to 3½ inches in diameter. Pkt., 150 seeds, 10 cts.

PANSY

PRESIDENT CARNOT—Flowers of great size and rounded form. The center of each of the large, rounded petals is heavily blotched with a soft, rich shade of violet purple; the edges distinctly outlined with a snow-white band. In the center of the lower petals the color deepens to a velvety brown tint, contrasting richly with the yellow of the small distinct eye. Pkt., 150 seeds, 10 cts.

NEW IMPERIAL GERMAN—This mixture embraces seed of over fifty colors and markings. Pkt., 150 seeds, 5 cts.

Monticello, Ind., Feb. 2, 1916.

Your seeds have all been very satisfactory and I feel like I can not say enough words of praise for the Cobaea Scandens. It is the most wonderful vine I have ever seen. It has beautiful bell-shaped flowers, grows so rapid and so clean and satisfactory in every way.

Miss Inez Benjamin.

"MASTERPIECE" OR RUFFLED PANSY

This strain comes nearer to "Double Pansy" than anything else introduced under the name. The number of petals is the same as that in the other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Pkt., 150 seeds, 10 cts.

BLACK PRINCE PANSY

A distinct Pansy of sterling merit. The rich, glossy black has a peculiar soft velvety appearance; the magnificent, large flowers are of fine circular form and carried upright well above the foliage; plants are of very compact bushy habit. Pkt., 150 seeds, 5 cts.

NEW GIANT TRIMARDEAU PANSY—Remarkable for extra large size of the flowers. Pkt., 150 seeds, 5 cts.

NEW RED MIXED PANSY—The most brilliant Pansy mixture ever offered; made up from a collection of all the best red and fiery shades. Pkt., 150 seeds, 5 cts.

FIRE KING PANSY—Comes almost absolutely true, scarcely a plant bearing flowers at variance from the type, which is very distinct and striking. The lower petals each have a large blotch of deep brown-red or magenta, margined with yellow, while the upper petals are of a bright reddish-brown. Pkt., 150 seeds, 5 cts.

SNOW QUEEN PANSY—Pure satiny white, with yellow dot in center of flower, sometimes marked near center with faint blue or purple lines. Pkt., 150 seeds, 5 cts.

PEACOCK PANSY—A beautiful variety of ultramarine blue in the upper petals of the flower, edged with a thin white line, within which is a space of purplish crimson, passing into a rich central blotch of deep blue, shading to black. Named "Peacock" because the blending colors resemble those of peacock feathers. Pkt., 150 seeds, 5 cts.

SWEET-SCENTED PANSIES—The perfume of the violet, the beauty of the pansy. This class is the result of crossing the Pansy with the Sweet Violet. The resulting hybrids, in addition to retaining the delightful Violet perfume, produce the most beautiful Pansy-like blossoms, 2 to 2½ inches across, of great substance and of an endless variety of colors. Mixed colors. Pkt., 150 seeds, 5 cts.

GOOD MIXED—Fine for bedding; many rich colors. Pkt., 300 seeds, 4 cts.

Larone, Me., March 27, 1916.

Notwithstanding the fact that your little catalogue is not decorated with impossible colored pictures of flowers that never grew, I am sending for a small order of seeds just because the seeds I purchased of you last season proved very good indeed. I think the petunias I raised last year were the best ever and they were the wonder of my garden and held the attention of all comers. I wish for others like them this season. I had two plants from the mixed seed that bore immense blossoms of green, something never before seen in this vicinity and they were of interest all the season.

Mr. and Mrs. Will P. Winslow.

For a good many years I have ordered seed from you. Always had good luck with them. We do get such lovely flowers from your seed. Mrs. Rose Knott.

VEGETABLE SEEDS

- ASPARAGUS, Columbian Mammoth White**—This large-stalked strain produces white stalks above the surface, which are as fine flavored as the best green-stalked. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 20 cts.; 1 lb., 60 cts.
- BEEF, Detroit Dark Red**—Form globular or ovoid; smooth roots, with small tops; skin blood-red; flesh dark red, zoned with a lighter shade, tender and sweet. Pkt., 5 cts.; oz., 15 cts.; $\frac{1}{4}$ lb., 40 cts.; 1 lb., \$1.25; postpaid.
- BEEF, Crimson Globe**—Skin smooth and form regular. The flesh is a deep purplish crimson, sweet and tender. The foliage is small, of a rich bronze-purple. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 30 cts.; 1 lb., 90 cts.; postpaid.
- BEEF FIRE BALL**—A new extra early beet; suitable for forcing. This beet is bright red in color, has a smooth skin and is solid and very sweet in flavor. The leaf stalks and tap roots are quite small, making it valuable for sowing in frames. It retains its fresh table qualities better than most beets and is also a valuable sort to sow in the open ground. Pkt., 5 cts.; oz., 15 cts.; $\frac{1}{4}$ lb., 40 cts.; 1 lb., \$1.25; postpaid.
- BRUSSELS SPROUTS, Danish Prize**—The plants are of strong, robust growth. The stalks are large, thick, and close-jointed, so that the sprouts set thickly on the stalk. The sprouts develop for nearly the entire height of the stalk at about the same time,—consequently a very large crop can be gathered. Even the sprouts formed at the base of the stalk are tightly folded; they are quite as fine and sold as those higher up. Pkt., 5 cts.; oz., 35 cts.
- BEAN, Giant Stringless Green-Pod Valentine**—The plants are of strong growth; pods slightly curved, very meaty; being broadly rounded and saddle-backed; brittle and stringless at all stages. Pkt., 8 cts., lb., postpaid, 35 cts.
- BEANS, Davis' White Wax**—Immensely productive, bearing large, handsome straight pods six inches in length. The pods are, however, tough and with decided strings. The dry seed being white, is desirable for winter market as a shelled bean. Pkt., 8 cts.; lb., postpaid, 35 cts.
- BEANS—Prolific Dwarf Black Wax**—Dwarf bush grown and very prolific. Pods four to five inches in length, usually curved, quite round; meaty; brittle and stringless; deep golden yellow, of excellent flavor. Pkt., 8 cts.; lb., postpaid, 35 cts.
- BEAN, Improved Golden Wax**—Moderately early, of vigorous, bushy growth, rust-proof. A reliable heavy cropper, whether sown in spring, summer or early fall. Pods long, thick and solid, absolutely stringless, of golden yellow color. Pkt., 8 cts.; lb., postpaid, 35 cts.
- BEAN, Burpee's Bush Lima**—Burpee's Bush Lima comes absolutely true from seed. The bushes grow 18 to 20 inches high, of stout growth and always erect, yet branching so vigorously that each plant develops into a magnificent circular bush from two to three feet in diameter. It is an immense yielder, the handsome large pods being well filled with very large beans, identical in size and luscious flavor with the well known large Pole Limas. Pkt., 8 cts.; lb., postpaid, 35 cts.
- BEANS, Kentucky Wonder Pole Bean**—The pods, seven to nine inches long, are so fleshy that they are greater in width than breadth, being deeply creased or "saddle-backed." They are solidly meaty, stringless when young, and of finest quality. If pods are gathered as they mature, the vines will continue to bear to the end of the season. Pkt., 8 cts.; lb., postpaid, 30 cts.
- CABBAGE, Early Summer**—It makes large, solid, round flattened, compact heads, of excellent quality. It is particularly true in the color of the plant, which has a peculiar bluish tinge. Pkt., 5 cts.; oz., 20 cts.; $\frac{1}{4}$ lb., 65 cts.

- CABBAGE, Hollander or Dutch Winter.** The best Cabbage for late spring sales and for shipping. The heads are of medium size, averaging about 8 lbs. and are very solid, and in their fine white color entirely distinct from other kinds. While the quality is good they are uniformly excellent keepers, the heads being often just as solid and perfect when taken out in the spring as when put away in the fall. Pkt., 5 cts.; oz., 30 cts.; $\frac{1}{4}$ lb., 85 cts.
- CABBAGE, Mammoth Rock Red**—The best large Red Cabbage. A sure header, of good red color to the center. Pkt., 5 cts.; oz., 25 cts.; $\frac{1}{4}$ lb., 75 cts.
- CUCUMBER, Extra Early White Spine**—This is a special strain of the popular White Spine Cucumber, which is most desirable for its extreme earliness. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 30 cts.; 1 lb., 90 cts.
- CUCUMBER, London Long Green**—This is an old-time popular garden favorite. Our carefully selected strain under favorable conditions, produces fruits averaging 10 to 12 inches in length. Skin a deep rich green; flesh solid, crisp and of excellent quality. Excellent alike for slicing or pickling. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 30 cts.; 1 lb., \$1.00.
- CUCUMBER, Fordhook Pickling**—This is one of the best and most prolific for producing pickles of medium size. The vines are extremely vigorous and healthy, yielding a large number of fruits if kept gathered at the proper stage. Skin extremely thin, tender, and free from toughness when pickled. If allowed to grow to full size, fruits are of excellent table quality, but where the largest quantity of pickles is desired fruits should be gathered while small. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 30 cts.; 1 lb., \$1.00.
- CARROT, Chantenay, or Model**—A very popular variety for general purposes; 5 to 6 inches long; very stump-rooted; about 3 inches thick at shoulder; tapering slightly; bright orange scarlet. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 30 cts.; 1 lb., 85 cts.
- CARROT, Danver's Half-Long**—The best variety for general purposes and the most largely used, not only for stock raising, but for table use as well. The perfect type is about 8 inches long and about $2\frac{1}{2}$ inches wide at the shoulder, tapering to a sort of a half-point at the bottom. Color is a bright, orange-scarlet. It is a very heavy cropper. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 25 cts.; 1 lb., 75 cts.
- CRESS, Fine Curled. (Pepper Grass)**—Quick growing; leaves finely cut and feathery, like a good parsley; growth dwarf and compact; ornamental, crisp and pungent; very refreshing. Pkt., 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 20 cts.; 1 lb., 65 cts.
- CAULIFLOWER, Early Snowball**—This is a popular extra early strain of dwarf compact growth. Under favorable circumstances nearly every plant will make a fine solid head of good size. It is valuable for both early and late. Pkt., 10 cts.; $\frac{1}{2}$ oz., \$1.00.
- CELERY, Golden Self-Blanching.** The best of all early "self-blanching varieties"—It is of dwarf compact habit, with thick, solid, heavily ribbed stalks which blanch easily to a clear waxen yellow. When grown in rich moist soil the stalks are numerous, each plant being fully as thick through as the largest of the tall late sorts, and with a large solid heart of beautiful golden-yellow stalks and leaves. Pkt., 10 cts.; oz., 45 cts.
- CELERY, Dwarf Golden Heart**—A fine long keeping dwarf celery. The heart is large, surrounded by a shapely solid stalk. After storing the heart blanches a beautiful golden, is unsurpassed in quality and is so large that little trimming is required for market. Pkt., 5 cts.; oz., 15 cts.
- CORN, Golden Bantam**—Of extreme hardness, can be planted earlier than any other true sweet corn, and will then produce the earliest supply of ears for the table. The ears are about six inches in length, completely filled with eight rows of golden-yellow grains, extending to the rounded tip. The flavor is exceptionally rich and sugary. Pkt., 8 cts.; lb., postpaid, 28 cts. By express, 3 lbs., 50 cts.; $\frac{1}{2}$ peck, 85 cts.
- CORN, Country Gentleman**—This late or main-crop variety is the result of a cross of the Ne Plus Ultra with the Stowell's Evergreen, producing a larger ear than the former, but retaining its productiveness, similar superb quality, and irregular "shoe-peg" arrangement of the crowded, slender, deep grains. Pkt., 8 cts.; 1 lb., postpaid, 28 cts. By express, 3 lbs., 50 cts.; $\frac{1}{2}$ peck, 85 cts.
- CORN, Stowell's Evergreen**—The best and most popular of all Sweet Corn varieties. Its reputation is based largely on its productiveness and large, handsome ears with fine flavored deep kernels, very white in color. Pkt., 8 cts.; 1 lb., postpaid, 28 cts. By express, 3 lbs., 50 cts.; $\frac{1}{2}$ peck, 75 cts.
- CORN, Peep O'Day**—One of the earliest of Sweet Corns. Grows about $3\frac{1}{2}$ feet high. Bears nearly always two ears on the stalks. Kernels of good white color. Pkt., 8 cts.; 1 lb., postpaid, 28 cts. By express, 3 lbs., 45 cts.; $\frac{1}{2}$ peck, 70 cts.
- CORN, Golden Cream**—This new extra early Sugar Corn originated in California, and is the result of a cross of Country Gentlemen and Golden Bantam. The ears are ready for use at a very early season, and are about the size of Golden Bantam; grains are long and pointed, rich cream color when ready, but turn to light golden-yellow when cooked. The quality is very fine, sweet and tender. Stalks are brownish-red, and make a healthy, rapid growth, producing from 2 to 4 ears each. Pkt., 8 cts.; 1 lb., postpaid, 28 cts. By express, 3 lbs., 50 cts.; $\frac{1}{2}$ peck, 85 cts.

- POP CORN, Queen's Golden**—It pops perfectly white, and a single kernel will expand nearly one inch. Pkt., 5 cts.; 1 lb., 20 cts. By express, 5 lbs., 40 cts.
- EGG PLANT, Improved New York, Large Purple**—This is the very best type of this standard variety. Absolutely spineless; the plants grow low, stocky and branching; early and almost continuous bearer. The fruits are very large, smooth and have a rich satiny purple color. Pkt., 5 cts.; ½ oz., 20 cts.; oz., 30 cts.; ¼ lb., \$1.00.
- EGG PLANT, Black Beauty**—An Egg Plant from ten to twelve days earlier than New York Spineless. The fruits are broad, thick, very attractive in form and of good flavor. Its rich, lustrous, purple black color adds to its attractiveness. Pkt., 5 cts.; oz., 35 cts.; ¼ lb., \$1.20.
- ENDIVE**—No vegetable garden is complete without this delightful Autumn and Winter Salad. Sow the seed from the middle of June until the end of August. White curled, very crisp and tender. Pkt., 5 cts.; oz., 15 cts.; ¼ lb., 35 cts.

- ONION, White Globe**—A very handsome, silvery-white, ball-shaped Onion of large size. Flesh firm, fine grained, of mild flavor and an excellent keeper. Its even, regular size and globular form, combined with the clear, silvery whiteness of the skin, make it one of the handsomest onions grown. Owing to its large size it is late in ripening. The Cream of the New Roses

ADMIRAL WARD (H. T.)—Vigorous, branching, erect growth. Large, glossy, bronzed foliage. Very large, full, globular flowers, freely and continuously produced. Color deep velvety crimson-red, shaded fiery-red. A grand garden Rose. 50 cents.

BRITISH QUEEN (H. T.)—We quote the introducer's description: "Experts who have seen British Queen growing, agree that it is the finest white Rose in existence, surpassing in beauty and elegance of form all other white varieties. The freedom with which it blooms is remarkable. It is in flower from June until winter, and on well cultivated plants the blooms are a model of perfection. The type of flower is between White Maman Cochet and Frau Karl Druschki, with Tea Rose form and refinement; frequently in the bud state it shows a slight flush; this disappears as the flower opens into purest whiteness. It is a good grower and sweetly scented. Awarded a gold medal by the National Rose Society of England. Those who have had the pleasure to

see this magnificent Rose blooming at Portsdown will never forget the sight. 20 cts. each; 2-year plants, 50 cts.

KILLARNEY BRILLIANT (Alex Dickson, 1914.)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost a crimson. Extra. 25 cts.; two-year plants, 60 cts.

KILLARNEY QUEEN (Budlong, 1912.)—A cerise-pink sport of Killarney that for clearness and brightness of color has not been equalled; exceptionally strong in growth, with foliage that is perfect, being larger than Killarney and more glossy. In size of petals Killarney Queen is larger than its parent, and for high grade bloom it is a very superior variety. Forces fine. 20 cts.; two-year plants, 50 cts.

LADY MARY WARD (H. T.)—Rich orange, shaded deeper apricot-orange, with a decided metallic flush. Very free-flowering, with fine habit of growth. Sweetly perfumed, attractive and decorative. Gold Medal, N. R. S. 20 cents; two-year plants, 50 cents.

OPHELIA (H. T.)—When Ophelia was sent out on its message of Rose beauty to entrance the world, there was placed a tablet in the hall of Rose fame to Wm. Paul & Son that will grow brighter as the flight of time goes on. Its lustre will never tarnish or grow dim. A more enduring memorial than anything else in the world can give. Think what joy and happiness, yea, peace, this Rose will produce as the ages go by, and how modest Mr. Paul & Son were in their description, which we give verbatim: "Salmon-flesh, shaded with rose; large, and of perfect shape; of excellent habit, the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous." Certainly a glorious Rose. Be sure to have "Ophelia" fixed in your memory. 25 cents; two-year plants, 60 cents.

I have bought Phlox "Drummondii Grandiflora" seed from you two different times and my Phlox were just lovely. I had such a lovely bed last summer.

BEAUTIFUL HOUSE FERNS

Nephrolepis Splendida, THE BIG 4 FERN—We place this grand variety first and foremost of all the Ferns. It is the most wonderful of them all, and is the first and only genuine combination Fern ever sent out, and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of "Big Four Fern." This is without question the most splendid of all the Nephrolepis. Be sure and try it. **Young plants, 25 cts.; strong plants, 50 cts.; extra strong plants, 75 cts.**

Nephrolepis Superbissima, THE "FLUFFY RUFFLES FERN"—This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth being much more compact, and its irregular shaped fronds which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. **Young Plants, 35 cts.; strong plants, 75 cts.**

Nephrolepis Whitmanii, THE "OSTRICH PLUME FERN"—A great Fern In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than the Boston Fern, which has had the most phenomenal sale of any decorative plant that has ever been grown, but which cannot be compared to the Ostrich Fern for beauty and general effectiveness. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. **Young plants, 20 cts.; strong plants, 50 cts.; extra strong plants, 75 cts.**

Nephrolepis Goodii, THE "BABY'S BREATH FERN"—This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety and the best of its type. Nothing is daintier or more exquisite than well-grown specimens in any size. Our reputation for it that no Fern in existence can compare with "Baby's Breath" in fluffiness. **Young plants, 25 cts.; strong plants, 50 cts.; extra strong plants, 75 cts.**

Nephrolepis Davallioides Furcans, THE "FISH TAIL FERN"—This is a grand Fern, entirely distinct from any of the other varieties of Nephrolepis. Throughout the South and especially at New Orleans this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the Nephrolepis. Grand for house culture. **Young plants, 20 cts.; strong plants, 50 cts.**

Nephrolepis Bostoniensis, THE "BOSTON FERN"—In the vicinity of Boston no other plant is so extensively used as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared to the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. **Young plants, 20 cts.; strong plants, 50 cts.; extra strong plants, 75 cts.**

Nephrolepis Exaltata, THE "OLD ORIGINAL SWORD FERN"—This is the "old original Sword Fern," the daddy of them all, the one plant from which all the Nephrolepis we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. **Young plants, 15 cts.; strong plants, 40 cts.**

As an ornamental tree Evergreens are unsurpassed. No other trees remain green through summer and winter; none are more beautiful. But while their value in this respect is great, Evergreens are most useful in other ways. They protect houses, stock and crops, from wind, sun and snow. They conserve the soil's natural moisture. They form a substantial shelter and nesting place for the birds that rid your acres of worms and destructive insects. They are a source of salable timber for fence posts and other uses. Plant some Evergreens around your garden and just see how much difference there is in the temperature and moisture. You will find that you can grow flowers, fruits and vegetables that you never could before.

These varieties have been thoroughly tested and proven absolutely hardy and reliable and will grow successfully in all parts of the country. Send in your order now. Shipment will be made during March, April or May—depending on locality.

Never forget to order one of these sprayers with your seeds. You need it!
