#### MARIPOSA CHRONICLE. MARIPOSA, CAL., MAY 5, 1854. VOL. 1. NO. 16. THE SPECCH OF ME. TWYSPER, OF BUNKUM, ALA-BAMA, ON STATE ALD." Mister Speeker, the free sufferins of the yoters of Bunkum at the ballad box have give me the onner of a sect on this flore, and i rise to let it be knone that my suffer-ins in this house will likewise all be for Bunkum. Sur, other gentlemen may talk about patritism and progris but i go in for Bunkum and bein elected. Wat's the good its going to do a feller if he give ev-ar sich a good vote for the Stait, if he's to be beet into doll rags the august foller-in. Sur, as i said in the beginnin of my spearch, the free sufferins of Bunkum put me here, and if i can find out how my county, or a majority of it wants me to go, ile go that way until my heels flies up. "Sur, fister Speaker, i'm ded. out agin Stait Ade. Well now that's the beginnin of the robbin of the people's monny, for it stands to reasen, i say, sur, that ei you or me, for an instunce, Mr. Speekur, has way from the public pile; it stands to reason we an't agoin to forgit to fill our own pockets, mister Speakur. Enny beddy would do it, that gets the chance. If I know enny thing, mistur 'Speakur, about the human famity, the fust thing there all you git. Aint that rail down agoni talk mistur Speekur i jist want we've had 3 tax-collectors hand-runnin in Bunkum that's tuck a good share of the public money, i dont mean no reflexion on them genitemen for they are all three any constichuents and my onnuble friends but jist to show, Mr. Speekur, what we all haven thing. i recken they ain't no better any they is prime apacity way we'l all dow speeker? genitemen need and it, mistur speaker we git the chance Aint it, mistur speaker is jist prime apacity way we'l all do when we git the chance Aint it, mistur speaker man the Stait, for that was the about securin the Stait banks and every-body knows that the members of the leg-site stele unar't down show the stait. MARIPOSA: FR'DAY MORNING, MAY 5, 1854

MR. PAUL S. NILES, Mail Carrier between this e and Sonora, is hereby authorised to ertisements, job work, subscriptions, or led for the Mariposa Chronicle.

We cannot imagine any possible sha dow of an excu-e for the manifest indif ference shown by the people of this cour ty, on the subject of improvements-the introduction of water from the Merced or Joaquin, for instance. This project is ad Joaquin, for instance. This project is au-mitted by all parties, to be of the utm si importance to the interests—directly or indirectly—of every man, woman, and child in the county. It is not the miner child in the county. alone, who will reap the advantages to be derived from this much talked of enterprise. With a plentiful supply of water, will come also an immense addition to our population, and what is evident to every erson, an increased demand for the ser ices of all classes and professions. It requires no argument to demonstrat

the immediate and urgent necessity of a supply of water, or to prove that without it, we shall lose what importance and advantages we do possess, and our residents find their way to other more favored por tions of California.

ons of California. It is not to be expected that the large amou t of money, ecessary to carry on an enterprise of such magnitude, can be spared from other pursuits in this immediate vicinity-scarcely in the county. All that is required is to make a start, organize an association composed of energetic business men, who possess a little of the go-ahead spirit; raise a portion of the requisite capital to show those who have the capital and are willing to invest it, that we are in earnest, and that the proiect is known to be important and value ble as an investment alone, by those who are, from their residence in the county, best qualified to judge. The Miners' Advocate, (Diamon-

The Miners' Adv.cate, (Diamond Springs,) in speaking of canals, says: "If the placers should be exhausted, (which cannot happen in a century,) th-sale of the water for manofacturing and agricultural purposes, will pay a large pe cent on the original outlay."

Every day that this subject is postponed only defers that "good time coming" to th

people of Mariposa. Considerable has been said lately of this subject, but it should be agitated and discussed until something is done. Let every body contribute according to his abil ty to the success of the good cause.

The trial of Senor De! Valie the Mex ican Consul in San Francisco has, after a great deal of arguing and noise, at las been brought to a close and the Seno found guilty. During the trial it was found necessary

to have the evidence of the French Con sul Mr. Dillon, and a polite request wa sent to him to attend the Court-this he refused to do, and Judge Hoffman issues an attachment to compel him to appear The arrest was made, after a protest o the ; art of the Consul against the author ity of the Court, and Mr. Dillon conduc ted to the court room where he still refused compliance. The whole matte was reconsidered by the Court and it was finally decided that the Consul was right and that the Court had no power to com pel him to testify

Mr. Patrick Dillon gave a loud crow struck his consular flag and awaits the action of his government. Some of the San Francisco papers af

NCE FROM THE CAPITAL Legislative Proceedings &c.

SACRAMENTO, May 1st 1854. Legislative business at the Capital, still "drags its slow length along,"—although but a few days more will clapse before a general stampede of the assembled wisdom of the State, will take place. A bill has passed the Senate, appropri

ating \$1723 for the relief of D. D. C. Iten, for services in pursuing and bringing back to the State,—from Missouri—a fugitive from justice. The crime committed, was stealing two yoke of oxen, worth abou Mr. McFarland thought this a very fine

plan for franking a man from one State to another. Debate elicited the fact that after all the expense, the man was not arresed at all. Also an act to exempt certain property from forced sale,-an amend nt to which provides that the Co House, Jail and land necessary for public

ourposes shall be exempt in each County In the Assembly, the Committee on Claims reported unfavorably to the passage of the bill for the relief of John Bo

ling, Sheriff of your County. Also passed the Assembly, a bill for he protection of owners of drift timbe

and logs. Also, to authorize J. R. Beals and others to build a toll-bridge across the Pajaro river.

Also, requiring the State Treasurer to keep the Public money under his

wn immediate control. Also, to amend the act for the security of State Prison Contracts, which reduces the mileage for transporting prisoners, to one half the present rates.

Also, a bill to prevent duelling, and preventing the testimony of Chinese being eceived in Courts of Justice, when white

nen are concerned. Also, a bill for the protection of gam and a bill providing for the appointment of Dept. County Treasurer.

The following bills have passed both nouses and are wating the signature of the Governor:

Defining the boundaries of Stanislaus County. To fix the place of residence o State officers at Sacramento. To create he office of State Printer, and providing for his election at the general election i 1855 and every two years thereafter.-This bill makes important reductions in he cost of public printing, by which a arge saving will be made annually.

The Governor has signed the following To provide an office for the County

Surveyor of San Francisco County. To fund the debt of Solano Co. To legalize affidavits taken before County Recorders.

To amend the City charter of San Fran

The above particulars include the whol of the most important business transacted since my last. A number of bills, many of them of importance have been intro-based, however, but as far as final action is concerned, nothing has been done with hem, further than referring to Committe where they will remain until the last day or two of the session, when the whole batch will be called up and passod in amp. Another grand attempt to entra the opponen's of an election this sessio was made 1 st week. The plan was pretty well arranged, but didn't win. The en husiasm of the Broderickites has about PETE. izzled out.

A GREAT SCHEME - A project has been started again to unite Lake Michigan and the Mississippi, by steamboat navigatio A writer in a Chicago paper suggests tha by turning the water of Lake Michigan hrough the south branch of the Chicago river to Bridgeport, thence by the north branch of the south branch to Mud Lake, and by a chanvel to be dredged through hat lake to the Des Plaines to the dista that might be found necessary, a suffiient supply may be obtained to prevent any interruption of navigation of the Illi nois and Mississippi rivers on account of

low water. The distance from Chicago to the Des Plaines, by the proposed route is only fourteen miles, and it is estimated that the deepest excavation would not exeed twenty-five feet. We have received the first number of

There appeared to be an understanding—rather implied than expressed, that whichever fenced to a certain point first, should be declared the winner.

and property? Last evening just at dusk, a man near the mouth of the Agua Frio was driving his animals into camp, when he received a volley of arrows, one of which sunk into his breast and came very near killing him. Was it for this he had paid his axes! About two weeks since several fine animals at Guadaloupe were stolen and one of them came into camp to die with an arrow half buried in his body. For what, did the owners of these animals pay taxes on them? About two nonths since, a part of an ox team was colen from this neighborhood, and tracked by Mr. Earley as near to an Indian encampment as he considered safe to ge alone. I might till your sheet with like samples of evils, which people are subjec-ted to who do not live in Mariposa street, and what answer do we get when we call for protection from those laws for which we have paid our taxes? Bring in the Indians and prove them guilty of shooting and stealing, and the law will punish them. Has the law no power to protect us, mi ners and working men though we are ?

After leaving Juan Bautista, we crossed a spur of the Coast Range Mountains, and entered the finest valley in the world—the Salinas Plains. This tract of country, which is watered by the Salinas and its branches\_formerly called the Buena Ventura river—is about 200 miles in length, by about seven or eight in breadth. Every foot of it is susceptible of cultiva-tion, and the soil is fully equal, if not su-perior to that of the Santa Clara Valley. These plains are carpeted with wild flow ers of every hue, and roved over by im-mense herds of stock; the sod is still vir-gin; scarcely a fence is to be seen in any direction, and yet the whole valley could be thrown into a wheat field by the sim-ple process of plowing and sowing— These plains alone, producing at an ave-rage of only sixty bushels of wheat to the acre—although it is well known that of-tentimes over a hundred have been reap-ed—would supply a population of over a million inhabit.nts. LATER FROM THE INDIAN RESERVATION.— Capt. Howard reached Stocton on Friday, with later intelligence from the Tejon. He informs the Republican, that affairs at the Reservation wear a most auspicious appearance. All is quiet, and the Indi-ans are delighted at their prospects. The crops look fine, permanent improvements, are in progress, and accession to the In-dian population arrive daily. The Indi-ans are now engaged in the construction of a large adobe "mission" building, a res-idence for the family of Lieutenant Beale, and huts for their own occupation. They idence for the family of Lieutenant Beale, and huts for their own occupation. They have opened an excellent road from Los Angeles to the Tojon Pass. It was ex-pected that the Indians of the Indian Chief Juan's tribe, some 5000 in number, would come in, but there was no certain-ity about it No incident of particular in-lerest had occured. Capt Howard repre-sents that the contry on King's, Kern, and Tulare rivers was fast being settled. The population has doubled within six months. An immense breadth of grain has been sown, and the crops have the most prom-ising appearance. He says that the Tu-iare country is better adapted for the rais-ing of hogs than any region he ever saw, there being an abundance of acorns and tule bottoms. ## MARIPOSA CHRONICLE.

From the San Francisco Prices Current and Shipping List The Branch Mint.

Panctual to public announcement, the Branch Mint of the United States, located in ISan Francisco, opened for deposit on the first of this month. This paper, in com-mon with the press generally of both city and country, announced the fact some weeks since, and several pub-likied a description of the building; but we propose to examine the subject of a mint here at our door, in the country which produces the gold, and to speculate a little upon its influences here and abroad, present and remote.

In 1848, a long time ago for California, the few of u who were in San Francisco found Collector Harrison that In 1848, a long time age for California, the few of us who were in San Francisco found Collector Harrison the guardian of the public moneys in the old adobe Custom House on the Hars. Gold dust passed in Indie at 316 per ounce, which was the price pervisoids garced uponat a motion for it, in exchange for coin, ranged from 510 to 512 per ounce. The accumulation of public money in the Collector's hands, actionally gave him serious measures; it was all in coin, for he did not deem himself authorised to receive gold dust, and previously sold at auction the amount accumulated on his hands as deposite for differ at about \$11,50 per ounce. It must be remembered that we had no brick vaults then. The Assay Office and coinage of Mesara. Moffatt & Co. worked some change ; but when those gentlemen commenced operations under their contract with government to assay bars and issue ingots of the denomination of \$20, training in gold dust summer a specific share, some of which have here productive of good—some have work clensum issue his contract with Mesara. Work and the lasts for our operations. Warking the private coins have been issued during the part four years, some of which have here productive of good—some have work cleans and between the distribution of the community. At the explanation of the contract with Mesara. Guita Star Weit, (the nuccessors of Mesara. Moffatt Ko.,)

At the expiration of the contract with Mesrs. Curtis, Ferry & Ward, (the successors of Mesrs. Mofatt & Co.,) efforts were made to proceed the event of buildings here, planned for an extensive mint. The Government were fortunet enough, however, to correct this, and to make instead an arrangement with Mesrs. Curtis, Perry & Ward, by which the latter turned over to them their building and machinery, both soficiently enlarged to meet our wants, by which we probably have a mint two prars soorer than if it had been concluded to erect one. It must be remembered that the first appropriation limit ted the sum at the disposel of the Secretary to an amount unch too small to erect a building according to the plan-proposed, and supply the same with the requisite machin ery. Another appropriation would have been necessary proposed, and supply the same with the requisite machine ery. Another appropriation would have been necessar for finishing, and as this want would have hand to com-before the present Congress, we may consider ourselv-truly fortunate in having escaped the chances of defe-which might have ensued in the present disturbed sta-of afkirs at the seat of government. Up to and including Saturday the 15th inst., the min-operations here were as follows: Amount of quid dust received. 40 000 or

The app	arently	sma	Il amount of coin made during t	ł

The apparently small amount of coin made during the fortnight, was in consequence of the delaymatural in the commencement of operations, and the partial disarrange-ment of the refining appendix. By the arrival of the starship *Golden Gate*, on Friday, the 14th inst, with the mail of April 20, from New York, the Sub-Treasure received permission to use a half a million of public money in paying of mini deposits, which is now done as soon as the value of their dust can be as-certained. The consequence returns are now made in from three to four days, instead of the two weeks necessary if compelled to await the refining of the specific gold dust deposited. The amount given above as pail of unit in tament, was disbursed on Saturday the 15th, the day fol-lowing the rescipt of the order.

manner, was disbursed on Saturday the 15th, the day fol-lowing the receipt of the order. The stamping of bars is likely to make some difficulty as it is questionable whether this branch mint has it right to stamp and issue any but refined bars. The of cers consider that they are acting properly in so doing but as it is not permitted at the other mints, we presum the Scoretary of the Treasury will not make any excep-tion in favor of the one located here, although to make fully useful such permission should be extended.

fully useful such permission should be extended The establishment of the Branch Mint amon The estamination of the Branch Must smoong us v be advantageous to the community generality, not ap-ally and particularly to the minors. This class has a long time part been receiving quite the value of th dust, and in some stellars of the State more than its f value per owner. The stability which a fixed stand will give us, can ough be amoughded be excited. will give us, can only be appreciated by experience : descriptions of money operations must be by it gre-facilitated. It is true we must not be too sanguine, some changes may yet take place in the Mint-itself ; some changes may yet take place in the Mint listed (: After some consideration, we think ourselves, that only one life) to be made is the alteration in the tentage charged for coinage. We have be identified and perfect and beautiful machinery will or can break dow-but the law which gave us this Mint contains a clause which the charges for coinage are to be regulated by actual cost of the same. The charge has been fixed h at 11-10 per cent. ROUTE BY NIGARAGUA TO NEW YORK — Many people prefer reaching the Eastern States by this line. It offers the shortest sca-passage, while the portion of transit across the land and by fresh water is re-place with mugnificant and varied scare. plete with magnificent and varied scene-ry. The extent of the land carriage is only twelve miles, and that too over a Macadamized road. It is asserted, we be-lieve with truth, that the route is the shortest, healthiest, and generally the quickest of any between this city and the Eastern ports. One advantage this line, by Lake Nicarage a, has over those by the Isthmus of Panama, is that the tickets are really *Arcough* tickets, comprehending the middle space from ocean to ocean. Pas-sengers, therefore, know at once how much they have to pay for the complete distance from San Francisco to New York.—Daily Cal. Chronicle.
