MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT.

THROUGH : Central Liaison Office, Tokyo.

SUBJECT : Reparations Selections Within the Precision Bearing Industry.

1. The Imperial Japanese Government is notified that all precision bearing plants on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This list designates plants subject to removal under the interim reparations program. Plants selected for reparations may continue to operate, but will be advised that 30 days following the publication of this directive they are subject to removal without advance notice. In all cases whether or not operations are permitted to continue in listed plants such measures will be taken as are necessary to insure proper protection, maintenance and safeguarding of equipment.

3. You will make available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control and protective maintenance.

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army to receive detailed instructions to accomplish the purpose of this memorandum.

5. Provisions of this memorandum shall not be construed to preclude immediate shut-down and removal of specific plants that may be designated by subsequent memoranda.

FOR THE SUPREME COMMANDER:

1 Incl:  
List of Precision Bearing Plants

Information of General application pertaining to Directive Number (SCAPIN 1136, file AG 387.6 (14 Aug 46) ESS/IN dtd 14 Aug 46 subject: "Reparations Selections within the Precision Bearing Industry."

1. With reference to memorandum Number (SCAPIN 1136), from the Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The purpose in issuing the attached letter to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army, is to insure availability for interim reparations removal of listed facilities in the best possible condition.

3. The facilities within listed plants which may be considered suitable for reparations are all major units and auxiliary equipment except those units composed principally of masonry and which are not sufficiently enclosed in metal framework as to prevent loosening of the masonry during transportation to another site.

4. It is not contemplated that buildings which are part of factories taken under custody and control will be used for reparations or destroyed except in special cases. Such cases may be those where part of the building frame forms a track for overhead cranes and the steel building skeleton can be easily dismantled. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations material it may be released to them.

5. The interim reparations program is designed to leave within Japan the capacity to manufacture 32.5 million yen worth of bearings based on 1943 and 1944 prices. Plants listed on SCAPIN 1136 while considered excess of 32.5 million yen capacity may be permitted to continue operations realizing that after 30 days they are subject to shut down and removal without advance notice.

6. It is contemplated that the Japanese will furnish personnel and material required by you; that they will use, for custodial personnel, individuals previously employed in each factory who are familiar with its layout and requirements for maintenance.

7. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing with necessary materials to be furnished by the Japanese Government when not available at the plants.

8. It is expected that a system will be established for spot-checking each installation periodically. When corrective action can be accomplished locally by explanation it should be done. In cases of wilful violation or neglect immediate report should be made through military channels.

9. A letter of Command instructions pertaining to the execution of the subject memorandum follows command channels.
