She Lays Claim to Share in **Business of Her** Son.

With the carrying of the Hopper muir case, in which Mrs. Joan Dunsmuir, the mother of the Lieut. r, was a party it was expecte of the immense Dunsmuir estate would be settled. Hon, James Dunsmuir's rights by the winning of the case before Privy Council were supposed to we been fully established. It seems owever, that a doubt still exists as to

however, that a doubt still exists as to this, and other actions are to follow. A writ has been served by counsel re-presenting Mrs. Joan Dunsmuir upon s Dunsmuir as a preliminary ve. The basis of the action is the count of all moneys received by him general agent for his mother and the payment of all sums found due. claim advanced by Mrs. Dunsmufr is that she still retains an interest in the estate, the control of which was mand by the sons Alexander and in return. Now it would appear, howe retained some interest which the sas trustees have administered for on this ground she claims the right demand an account being rendered and the payment of what may, accord-

ing to her contention, be due.
In addition to this another action is was commenced about 1909 in which claim was set up by Mrs. Joan Duns muir that the shares in the California, cancern, held by the late Alexander Dunsmuir, should by agreement with James Dunsmuir have been turned over to her. This action was dropped at the time owing to technical objections being introduced. It was never formally discharged, however, and will now be arged, however, and will now be

Charles White, of White & Middleton, Baltimore, a mechanical expert, gave this description of the accident:

"I witnessed the flying of the aeroplane, and it was performing beautifully for six or seven minutes, when suddenly one of the propellers broke near the end. This caused the machine to perform so thoroughly out of calance with the centrifugal force as balance with the centrifugal force as to make it unmanageable, and it made a dart to the ground while still under operation of the right propeller, causing it to strike the ground with great deal more force than it would have done by gravity. I do not feel that this is any defect in the machine, but merely want of better construction is this is any detect in the machine, merely want of better construction the propellers. Therefore, I do feel that the machine should be demned beyond this point. The dent was due entirely to defe propellers. The aeroplane was uperfect control, and the accident

Edmonton. Sept. 16.—Edward Francis Carey, who died here, is another of the pioneers of the Canadian west who has passed to the great beyond. Of the innumerable paths which lead to this common goal few in the west can be found more interesting than that trod by Mr. Carey. Like so many of his stamp he was born in the lap of civilization, heard the call to the wild in early manhood, and died amid scenes over the corner by the basket of kit-tens. He was a genuine old-timer, a distinct species of the race, one of Nature's nohlemen, who would do anything in the world for a friend and who scarcely knew what it was to have an enemy. His death breaks another link between the staid routine of the present and the romantic vicinstitudes of the past.

It was in London, Ont., in the year 1833 that Mr. Carey was born. His parents gave him a good education and doubtless outlined a career for him. The youthful Carey, however, nim. The youthful Carey, however, took matters in his own hands. For him gold, fortune, and California were synonomous and were matters of paramount, importance. In 1861 the rush to the gold fields of California carried him with it and for some years he was engrossed in the hunt for nuggets and gold dust. In the course of time he worked his way northward and he next appears as a prospector on the banks of the Fraser river in the year 1855, in company with Bill Cust. In all these years gold, for which he sought, seemed to clude him as there is no record of his having made any

Before leaving the Fraser River coun-try they fell in with Pete Toy, and to-gether the trio went to the Peace River district in the year 1862, under the guidance of Chief Teges. Here Mr. guidance of Chief Teges. Here Mr. Carey discovered and washed the first gold ever taken out of the Prace river. The three of them stayed with the find for about six weeks, and during that time they made an average of fifty dol-lars per day. Why did they not stay with it until each was a Croesus? Because their stock of provisions gave out and they were forced to retreat. It is stated on good authority that as they withdrew from the country their supply of caps became exhausted. THE ABERDEEN

ASSOCIATION

Organized comething over 70 years ago, through the initiation and personal efforts of Lady Aberdeen, the Aberdeen Association stands for a single idea—the free distribution of good literature to settlers in isolated parts of Canada, It is absolutely free from all bias—political, social, or denominational. Its mission is to brighten the homes of Canada's new elitsens in the remote districts of the great Norththe remote districts of the great North west. 10 furnish the means of educa-tion and recreation to those sturdy plo strengthen and enrich the Dominion.
The object of the Aberdeen Association
is, therefore, not merely philanthropic;
it is patriotic in the broadest sense of
the term.
The parent branch of the association.
The parent branch of the association
was formed at Winnipeg in 1896. Three
years later a second branch was organized at Halifax. Others were formed
to read association until to-day the

in rapid succession, until to-day the association embraces fourteen branches, with a central organization at Ottawa. For several years the work was confined to the distribution of literature to individual settlers, the effective to inividual settlers, the entertainty which is proved by hundreds of grateful letters received year by year at the different branches. Every application for literature is carefully investigated, and there is no doubt that the parcels hand magazines sent out, go and there is no doubt that the parcels of books and magazines sent out, go where they will do most good. The magnitude of this branch of the association's work may be gathered from the fact that up to the present time nearly a quarter of a million parcels of carefully selected literature have been distributed throughout the Dominion. ion. The association at present has on its lists about thirteen hundred names, its lists about thirteen hundred names, to which literature is sent periodically. Three years ago, with the object of increasing the effectiveness of the work and meeting changed conditions in the West, it was decided to establish small circulating libraries in the newly-settled districts, wherever there was sufficient population to make it worth while. This system of libraries is still in the experimental stage, but the re-

while. This system of interest is still in the experimental stage, but the results so far achieved lead to the belief that the association will find here an even broader field of usefulness than in its distribution of literature to individual settlers.

It has already become apparent, vidual settlers.

It has already become apparent, however, that our very limited and uncertain sources of revenue will not begin to meet the demands of this new and rapidly growing project. Since 1894 the post office, recognizing the farreaching benefits conferred by the association and its educational and social value to the most desirable class of settlers, has carried parcels of literaturin limitations as to size; and one of two of the railway and steamship companies have granted us similar privileges; but the pressure of regular mail and freight traffic may at any moment cause these favors to be withdrawn, and there are many other expenses connected with the collection and distribution of literature, especially in the form of libraries, which can only be met by the provision of an adequate annual revenue. Above all, the work of the association has grown to such an extent that no honorary secretary can afford the time to do it justice. It is imperative, therefore, that provision should be made for a permanent secrecourt yesterday. Newburgh was placed under arrest about neen and released on \$5,000 cash ball, having voluntarily given himself up, he said, as soon as he heard of the indictment against him; and Murphy appeared before the court late in the afternoon and gave bonds in the sum of \$16,000.

A pair of swans has been forwarded to the Vancouver parks board and at some future time the local board will be prepared to accept some animals in Xxhanses, but be prepared to accept some animals in exchange, but at present there is no accommodation for such. The swent which flew away from the park has returned. The totem pole received from the provincial government has not yet been erected in the park and to do so will require the expenditure of some money. The pole is carved from the bottom to the top and as it is hollow it will be necessary to erect another pole against which to place it. The board should see the pole first.

A draft amendment of by-law was submitted by the city solicitors to cover difficulty which was found in the nforcement of the original dog iw. This enacts that no dogs allowed in the public parks or a any public place unless securety under control by means of a leash. Any dogs found at large shall be impounded and all employees of the parks board are authorized to put them in pound. In addition to the usual fees, owners will have to pay \$1 to release their pets.

The chalrman expressed the opinion that the proper thing was being done in ridding the parks and business parts of the city of dogs running aclarge.

Ald. Cameron and other members doubted if \$1 was a heavy enough remaity and favored raising the figure. There was considerable discussion as to what should be done with the hylaw then. There were several others to be dealt with, and it was finally agreed to hold a special meeting to put these all through.

The bounds of Reacon Hill park as defined for the purposes of this by-law are as follows: From a point on the seashore at high water at the foot of Cook street, northerly to where the new road in continuation of Heywood avenue intersects, northwesterly upon Heywood avenue to Douglas street, southerly ulong that street to the shore line and thence easterly along the seashore. line and thence easterly along the sea

A case had been taken under the board's by law but had been thrown out on the grounds that there was nothing in the by-law to show that the owner of the dog knew he was on park property, that the clause prescribing that dogs might not be in the park except on least did not create an offense, and also that there was no penalty prescribed for its breach.

He recommended that a reward be offered for the capture of persons setting fires in the park or damaging the park property, which was adopted. In the matter of the request of owners on Douglas street, between Simees street and Niagara street, for a gravet walk, he reported that it would be necessary to cut down a number of trees and a quantity of brush and a considerable amount of grubbing would have to be done, all of which work would not benefit the park, but only a few individuals. According to Bulletin No. 8 of the Canadian Forestry Asso-ciation most efficient measures were taken to prevent the spread of such fires within the Dominion railway belt, ported during the year." There is no reason that we are aware of why just as efficient measures should not be taken by the provincial government to wealth of the people of British Columbia. The value of that property is steadily advancing with the rapid denudation of the forestry lands in other portions of the continent. It will hardly be contended that it will not pay to take any measures which may be necessary to prevent fires from being started and from spreading. Hungarian Partridges Are Protected Throughout

Season.

A. E. Todd, the importer of Hungar-ian partridges to Vancouver Island, dan partridges to Vancouver Island, draws attention this morning in a letter to the Times to the law against. shooting the birds imported at great expense by him and encloses a copy of the provincial galles and forest wardens warning regarding the same. The letter of Mr. Todd is as follows:

"Editor of Times:—The attached notice pretty well expalins, itself. Now that the bird shooting season is approaching there is danger of these birds being shot through accident,

"Last February and March twenty-two of these birds were released at Quanichan lake, near Duncaus, and fifteen birds between Keatings station and the Cement Works, Seanich.

"More birds will be put out this fall." A timely warning through your sporting calumns (along the lines of the enclosed notice) would have a good effect and prevent accidents through

"A. E. TODD." to reads as follows:

Notice is hereby given that Hungar-ian partridges have been released in this vicinity.

It is illegal to shoot, hunt or have these birds in possession at any time.

Hungarian partirdges are somewhat larger than a quali, and are of a brown color, and very slightly resemble a small willow grouse. Hunters shooting not to mistake these birds for willow

MERRIFIELD ASKS

Will Meet Miller if Given Time to Get Into Con-

"Driver" Miller's manager is looking for a match here with Merrifield for his man for the show week, and says that Miller is willing to go either 15 or 20 rounds at 123. He announces that Miller will not come below 125 pounds. This will suit Merrifield as far as the weight is concerned, and as far as the distances is concerned also. He announced this morning, however, that to quit his work for the purpose of taking on Miller he would have to give reasonable notice to his employers, and that another bar to the match would be that he has not sufficient time to get into form. In his present condition, having done no training or boxing, since last June, he will need at least three weeks to take off the extra weight and get into condition. Consequently he cannot box Miller next week, but if the other side are anxious to put their man against Merrifield and are not particular to the date, the matter can be arranged for any time that will allow Merrifield three weeks to get into form.

Miller's anxiety to have a match in this city is sudden, and does not look Merrifield three weeks to get into form.

Miller's anxiety to have a match in this city is sudden, and does not look as serious as it might when he rolls in at a minute's notice, doubtless in good form and condition, and requests any of the local men to the up with him at three days notice. In answer to Miller, Merrifield says that if the bout is properly gonducted and arranged and assurances given that it will be brought off he will be ready to meet Miller on the weight selected by the other man Bennett, Sergeant-Major McDonald, Sergt. Askey and Sergts. Robertson,

> ASSOCIATION FOOTBALL. TRIAL GAME TO-MORROW.

The soccer match to-morrow will commence at 3 o'clock and will take game. All the men are in good form and are playing for places on the Pacific coast team to play against Lady-smith Saturday week. The two trial teams published yesterday were picked with a view to opposing the strongest attack in the city and although there are three men who might be said to strengthen the team some by their presence. the aggregations chosen without them will be evenly matched and provide material for the selection of a champion team which will go a considerable distance in the Pacific Coast league race.

PENNANT WINNERS TO

TOUR SOUND CITIES

Victoria Wants a Double-Header When Plans Are Perfected.

There is a movement afoot in Van-couver to boost the Terminal City ball team throughout the Northwest in the event of their winning the league pen-ant which it is more than probable they will do. The proposal is to select a nine from the remaining five clubs of the league and tour the Northwest, including all the territory over which the league teams have been playing this season. The selected nine will play exhibition games in all the cities if the

grade ball to witness.

Will the all-star teams come to Vic-

Will the all-star teams come to Vic-toria on the trip is the question asked here this morning. Doubtless they would if there is any inducement of-fered them locally. The baseball fans here would be as keen on the games as those of any of the other cities and the visit would serve as a big boost to ball players here also.

-Notice is given in this week's Ga gette that the time has been extended for receiving contracts on the Van couver Island Trunk road, contract for which had been invited some time in the for which had been invited some time a penphable ago. This road, which commences at Goldstream, continues as far as Mill select clubs highway into that district which will havest, avoid the heavy grade over the mountains, which makes the present route aimost impassable. It will also be a fine scenic route as well as a means if the and through which it passes.

Expert "Specialism"

No Tailor accustomed to making whole suits could make so good a coat in a given time as he who makes coats only. Nor can the Tailor who makes coats only produce so good a collar in a given time as he who makes Collars only.

Semi-ready Clothes are made by rapid-action specialists.

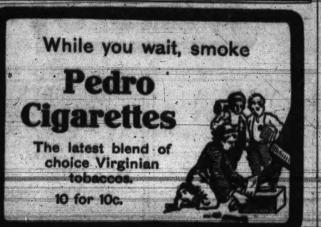

Some make collars only, others shape shoulders, while others are sleeve specialists, button-hole makers, basters, trimmers, pressers and finishers. In all thirty-one different expert tailors contribute to the making of each Semi-ready coat.

That is why you can buy a Semi-ready Suit for \$20 which a good Custom Tailor could not possibly reproduce for \$30.

Semi-ready tailors earn more money than Custom tailors—because they are skilled experts and can do three times as much work, and work of a higher grade of excellence.

WHY CANADA IMPORTS GOLD.

ns for the Recent Importation of \$10,000,000 From New Pork,

According to the agents in New York of several of the leading Canadian banks, the shipments of gold coin from this centre to Canada are being made as regular exchange transactions.

It is pointed out that New York exchange at Montreal is at a great discount and consequently, remittance. count, and, consequently, remittances in cash can be made materially cheaper than by sending the exchange. It is said that while the gold is being ship-ped in the regular course of business a large part of it will probably be used

for crop-moving purposes.

Another reason for the heavy outward movement of gold to the Domin ion is found in the fact that recent Canadian municipal loans which were placed in London are now being drawn

against by Canadian bankers in New York.

The total shipments to date approx-imate \$10,500,000. It is the general opinion among Canadian bankers that further shipments will be made, and in some quarters it is estimated that the movement is likely to reach \$20,000,000 or ubwards.

movement is likely to reach according to represent the considerably the considerably to be considerably to the constant to larger than in former years.

A QUIET HOTEL

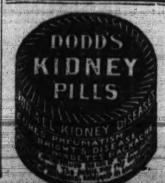

A new Alpine hotel is advertised as the ideal resort for those who want a complete rest cupe. All the places, dishes, cups and supers are made of papier mache, so that guests will be spared the clatter of a rectainent, and, as the material is no light, guests will suffer the least possible fatigue in lifting the cups to their lips.

To the slow music of violins this dance (which is a sort of minut). In soleminy performed, devoid of all freverence and levity. As the Docember festivat the vast church is in darkness, save for the lights of the high altar, and the effect is consequently most impressive; the chants which the choristers break out into merely add to the solemnity of the occasion, which is not in the least degree lessened by the sound of the castenets the seises play. There are two sets of music, and they are used upon alternate evenings, the sale of which is halously guarded against by the chapter.

The other legends are connected with the Jews of Toledo, who formed the only community of Mediaeval Eu-rope that was not confined to a Ghetto, with all its persecuting regulations.
One of the reasons given for this is that at the time of the crucifixion, or a little before, the Sanhedrin of Jerusalem sent round to all the Jewish colonies, asking whether or not the Christ was the long-surveyed Means and the long-surveyed Means are considered. was the long-expected Messiah, and the Jews of this city were the only ones who returned an affirmative enswer, who returned an affirmative answer, for which they received their freedom. Another legend says the cause of this singular circumstance was that when the Christians endeavored to confine these Jews to a Chetto, the latter proved that before the crucifixion their ancestors were living in Toledo, and so they were guilties, of that they

So Herr von Lucanus, the chief of the Kalser's privy council cabinet, who has just died in his seventy-sighth year, was known on account of the fact that he was invariably employed by the Kalser to convey to ministers who had ceased to possess the Royal confidence the notification that their services were no longer necessary. Lucanus was a purely self-made man. He was the fon of a poort apptheeury of Halberstadt, and rose by his ability, tact, and plinbility to the highest rank in the public service. Among the forty-six decorations on his breast was the chain of the Black Eagle order. He was next to the châncellor, the Katser's most intimate advisors in all matters dealing with the civil administration of the kingdome of Priessa and the fact that he held his office for twenty years is sufficient proof that he seldom, if ever, opposed His Majesty in any of his decisions. Herr you Lucanus was one of the Kaiser's most intimate personal friends, accompanying him on most of his journeys.

demand from China for the suc rulent sea sing, the beche-de-mer of the North Queensland coasts, is so beavy fifst at present that the indus-try has become very profitable, and many young fellows combine business many young fellows combine business with pleasure by embarking on the en-

A fair-sized boat of about twenty tons is required, with a draft not exceeding 5% feet. A large quantity of water must be carried. A smoke house has also to be erected on the boat. Bechee-mer has to be smoked and cured efore it is ready for market. A bechele-mer fishing boat carries a crew o bout eighteen colored men, who act as divers and smokehouse hands, and

one white man, who is captain.

The beche-de-mer is a fish found in the sea which washes about the Great. Barrier Reef of Queensland, and it looks exactly like a big offaque felly in the shape of a German sausage. There are four or five different species of the fish—and they are all to be found resting on little ledges of rock. The crew take the dinghys from the boat and row to the rocks, where, after collecting the fish lying about on the surface tooks, they dife for those below. The dives which these men perlow, The dives which these men per-form are really marvellous, some of form are really marvellous, some of them reaching to a depth of six and seven fathoms. When the fish have been collected, the men row back with them to the schooner, where the fish are split open and then boiled. After they have been boiled they are opened out and dried, and then put into the smoke-house over fires made from mangrove wood. When thoroughly cured, beche-de-iner is packed into bags and taken to Thursday Island, cured, beche-de-mer is packed into

where it is bought by Chinamen.

The Chinamen buy the commodity
only by tender, and they pay a high
price for it. Hongkong is the final
destination of the beche-de-mer, and the white men find it impossible to handle it either on this side or in China The Chinese are sole users of beche-de-mer, and if they are going to eat it in their soup they take good care that they are the only ones who handle it. Beche-de-mer has more of a standard value than pearl shell, and it always

SIDE-SHOWS TO BE

FEATURE OF EVENT

Many Thrilling Amusements Located on Grounds at Willows Beach.

Side shows for the amusement of patrons at the show next week will be numerous and comprise almost all things of mystery, except auseages, that the human mind can devise. Booths for the housing of the novelties are now being erected and the space alongside the main hall extending to the outside fence is practically all marked out by those who are bringing the novelties. From Scattle a man descended on the space contractor's the novelties. From Scattle a man descended on the space contractor's manager at the show ground yesterday and demanded room for some wild girls." The wild girls are to be accommodated and the price for the space they will require has been deposited. If the space is not used for wild girls doubtless something equally exciting will be in evidence but the Seattle man declared be was not jossing and would have his team on the spot Tuesday afternoon. The superstitious, if they are not superstitious as the temporate of the merhod will be able to peen into the future "just before the race, mother," and race to Mr. Jackson un-der the stand and lay their money the right way for there is to be a fortuneright way for there is to be a fortune-teller on the ground and quite handy to the race track. A special depart-ment for the picking of winners has not been announced but may be in-cluded to oblige such as desire it, any how the management has announced in terms emphatic that any fake shows will be shown the gate at express speed upon complaint being lodged. There is a gentleman devising a sky-straper on the ground inside of which will be shown the gate at express speed upon complaint being lodged. There is a femiliary to be a femiliary of the consenses of this place. The farm was formerly owned to the ground, inside of which he will oblige with a high dive performance and will provide his own tank while the management furnish the water. A second water event will be found in the duck pond, the exact description and definition of which has not yet been obtained by the one who rents out the space at \$50 per twelve square feet. When you have been and seen the gee gees run and entered all the other fun and cuitivated a glorious smile over spending the winnings, there will be a photographer on the ground to relieve patrons of some more spare change and render in return a faithful picture of the winners' smile. Candy booths for those with the one sweet tooth, pie stalls, ice drinks, and tea and coffee stalls are being erected and bedecorated with multi-colored ribbons and drapings, all tending to make the grounds bright and festive in appearance. Something for the fastidious has been provided stongside the "wild girls" in the way of a Spanish dancer and it is said that competition in this event will be keen as two Spanish dancers were yesterday booked for the season, while the interest in the proceedings will be maintained by the presence of "the human fish" which yesterday sent his representative along to mark out his abode for while the show is in progress. His voice is both alto and constraite, although styled as a contra tenor, and it is sweet and melodious. He presented an unusual sight seldom seen in a huge man possessing extreme width of shoulder and depth of chest, and at the same time an unusually mild voice.

The compdy, "Don't Tell My Wife," presented by Mr. Jose's company, was played to a poor house, and proved an hilarious entertainment for those who were at the theatre. The troubles of the

The Aberdeen Society of Canada is masking its annual appeal to the public for literature and money to supply residents in the outlying districts with literature during the winter months. Miss L. Angus, 55 Belcher street, is the secretary of the local branch and she will be glad to receive such donations of literature or money as anyone may see fit to forward.

There is a proposal to appoint a permanent secretary to have charge of the work throughout the Dominion, but this requires money, and for this purpose a special appeal is being made. been made for the continuous watering of the roadway lying between the gates and the car terminus. At the spring race mesting complaints were frequent it. The prices realized have been faired by high, perhaps too high for commercial purposes. The fact of the matter is that much of the land in the neighborhood of this city is being used for country residences by people who have made money enough to keep them and now want a beautiful home where the conditions are so favorable to this as here on Vancouver Island. The mildness of the climate, the large amount of sunshine, the agricular efforts be made to the country, and the nearness to the sea all tend to make this spot and itend to make that speed or horses drive under the most favorable conditions. It is no wonder then that people are willing to pay a good price for the lands.

Among the recent purchases made in Saanich is that of a farm of 28 acres.

of \$7,000.

These sales were negotiated by local agents and are simply, samples of what is going on in the country. There is also some demand for fruit farms, smaller than those above mentioned, and these are changing hands at even higher prices than the above.

HEROIC RESCUE OF

GIRL IN SEATTLE BAY

Dolly Foote, Former Resident of Fernie, B. C., Saved by Alaskan Miner.

Seattle, Sept. 17.-Discovered as she was sinking for the last time in the depths of the Sound, Dolly Foote, twenty years old, a former resident of Fernie, B. C., who flung herself into the bay from a pier at the foot of Battery street, was heroically rescued from drowning by S. C. Collins,

rescued from drowning by S. U. Collins, an Alaskan miner.
Collins heard a cry as he was passing along on the tracks, but at first paid little attention to it. Later he heard another, and this time ran to the end of the pier to see a young girl struggling in the waters of the Sound. Divesting himself of his coat, hat and collar, the Alaskan plunged into the cold waters and was soon at the girl's side, grasping her around the neck as she was going down for the last time.

The girl scratched, kicked and fought like a demon, as if resolute in her pur-pose to end her existence. The miner, tenacity of a bu

with the tenacity of a buildog, held to the girl, the while calling for help.

A person on the abore, seeing the struggling pair, rowed out to them. Throwing a rope to Collins, the latter fastened it around the body of the girl and then swam for the rowboat. Reaching it he aided in hauling the now seemingly life-less body of the young woman to the hoat. Patrolman R. Olmstead, who saw the heroic rescue by the Alaskan, called the pairol wagon, and had, the two taken to the police station. At the station the girl said she formerly lived at Pernic, but was driven out by the recent fire. She says she drank a glass of wine and could repember nothing afterward.

ALL OVER OSTRICH PLUME

New Westminster, Sept. 17.—The rival claims of ownership of a handsome estrich plume caused a deep investigation at the police court session this morning. The magistrate finally declared that he was unable to settle the matter as between the litigants and dismissed the charge.

Mrs. W. Fenton, the complainant said that last June she had given a fine ostrich feather to Mrs. Bishop to be used by the latter in the trimming of a hat for Mrs. Fenton. The hat had been returned, but the complainant declared that the feather used was not the one she owned, but a cheap substitute. A few days ago, Mrs. Fentone she owned, but a cheap substitute. There will also be a tax sale in Namaino on October 5th in the court house, commencing at 10 a.m.

The Dominion government has issued a new set of regulations dealing with the matter of fire protection on timber lands from which timber is being cut. The regulations are very stringent and should prove effective. An order has also been made to permit of the cutting of fire-killed timber in the rallway belt. Certificates of incorporation have been granted to the following new companies:

The Cariboo Timber, Company, Lid., capital \$300,000.

WHY DO OUR NEWSPAPERS NO PUBLISH A LIST OF REALTY

I am sure a list of sales for the past month would make us all "sit up."
If a regular weekly list were published it would surely help to equalize prices. It should assist buyer, seller and broker, though it might put the intermediate "friend" out of business.

East of the Park, in the neighborhood of Cook and Vancouver streets, is the present centre for sales.

Shrinking

The Wool

Stanfield's Underwear

A Talk by the Maker to the Wearer

(Chapter 2) In its natural state, wool consists of long, curly, silky fibres, dotted

with tiny prongs or branches. These prongs, when wet, interlock with the long strands and pull together, to protect the sheep from rain and dampness. When wool is woven, the same thing would happen, were it not for

the Stanfield process, which makes the prongs on each strand of wool lie down until the knitting is finished. Stanfield's Unshrinkable Underwear is made absolutely unshrinkable by this special process, invented and perfected by the Stanfields. It is the only method of

treating wool, which renders it unshrinkable and uninjured. One way of getting rid of the prongs, is to burn them off by plunging the wool into a tank containing lime. As the prongs are a part of the wool, naturally the lime will "eat" the wool as well as the prongs. This is why some imported, and some Canadian made "Unshrinkable," Underwear won't wear. It has been treated with lime in the effort to make it unshrinkable.

The illustrations above, show wool under the microscope both before and after going through the Stanfield process. They show that all the prongs that make it shrink are made-harmless, BEFORE the Underwear is woven. And as there is no "shrink" in the wool, there can be no "shrink" in the Underwess.

Every garment, bearing the Stanfield label, is sold with our standard guarantee of "Money Back If It Shrinks." All sizes from 22 to 70 chest measure. The label tells the weight-RED label

CLERGYMAN'S SON SHOT. Boy Mistaken for Deer While Out Hunt-

Ogdensburg, N. Y., Sept. 18.—Carl Coit, son of the Rev. O. B. Coit, a Methodist clergyman of New York city, was shot in mistake for a deer while he, with his brother and their father were hunting in the Adirondacks. The boy was carried 39 miles on an improvised stretcher and arrived at the hospital here late last night. He was struck in the hip by a bullet and was painfully injured, but may recover.

For the purpose of promoting a yacht race during show week between the Alexandra and the Spirit in local waters the show management yester-day announced that a cup valued at between \$50 and \$75 will be presented to the winning boat by the Victoria Agricultural Association if the Alexandria will come across for the race. Secretary and Manager J. E. Smart yesterday sent the following letter to Commodore Gibb, of the Victoria Yacht Club, in regard to the matter:

ANOTHER FINE FOR VIOLATING GAME LAWS

Magistrate Jay Finds Local Sportsman -Guilty

"Hunters shoud give game the bene-fit of any doubt," said Magistrate Jay in giving his decision this morning in the game case against Walter Milling-ton. H. H. Shandley appeared for the ton. H. H. Shandley appeared to. E. & N. railway, prosecutors in the case, and J. A. Alkman for Mr. Millington. The charge was similar to others laid since the season opened,

that of being in possession of a fawn under one year of age.

Magistrate Jay saild he had gone carefully over the evidence, While there was a difference between the carefully over the evidence. While there was a difference between the there was none as to the time of the year was none as to the time of the year when fawns were born. He could not accept the view that the fawn was one born last year, as he could see no difference in its size and that of those in court last week. Mr. Walton had spoken of their doubts as to the age of the fawn and of making a comparison with the head of a doe killed the same sky. It was unfortunate that they had not preserved the head.

"The whole provision of the act," said His Worship, "is one for the protection of deer and other game. It seems to me that where there is any doubt about the age of a deer, and there is certain to be in the case of young fawns seen at a distance in the woods, hunters should give the anismal the benefit of the doubt and not shoot unless quite satisfied it is of such age as is not protected."

A fine of \$29 and costs was imposed. Mr. Alkman remarked that the evidence left it open for a decision either way, but he maintained that the weight of it was in favor of his client. He asked for a stay of five days to consider the question of appeal.

A tay was given until Tuesday. The same day the case against H. H. Moss,

engineer who has been in charge of the surveys at Jordan Meadows on behalf of the B. C. Electric Company, will report favorably on the suitability of that water for a power supply. The Times has mentioned on several occasions that it is the intention of the company to spend large sums of money in developing this source of power if the engineer's report is favorable. It is expected now that work will commence as soon as the matter will commence as soon as the matter.
