

CITY OF SOMERVILLE

MASSACHUSETTS

ANNUAL REPORTS

1903

With Mayor's Inaugural Address
Delivered Jan. 4, 1904

SOMERVILLE JOURNAL PRINT

1904

INAUGURAL ADDRESS

DELIVERED BY

HON. LEONARD B. CHANDLER, MAYOR,

MONDAY, JANUARY 4, 1904.

GENTLEMEN OF THE BOARD OF ALDERMEN:—

By a provision of the city charter, it becomes the duty of the mayor on this occasion to address your board, and, through you, the citizens of Somerville, upon the condition of the various departments of the city, and to make such recommendations as he may deem proper. A newly-elected mayor is personally unfamiliar with the needs of the different departments, and therefore I have deemed it advisable at this time to make only such recommendations as appear to me to be absolutely necessary.

Gentlemen, I am confident that this day we assume the duties of the respective positions to which our fellow-citizens have chosen us with a clear realization of the responsibility that rests upon us, and with the single desire to discharge those duties to the best of our ability. Personally, I begin my term as mayor of Somerville untrammelled by pledges or promises of any kind, with no personal ambition to gratify, and with the firm determination to do all in my power to advance the interests of our municipality. I thoroughly believe that every member of your honorable board has the same intention, and by working harmoniously together, as I have no doubt we shall do, we shall be able to accomplish much that will redound to the credit and advantage of Somerville.

Finance.

The chief problem confronting every municipality is that of finance. To successfully solve this problem taxes to the utmost the administrative capacity of every city government. It is necessary for us to meet the increasing needs of our growing municipality without laying too heavy a burden of taxation upon

our citizens; to meet all immediate and indispensable demands upon our treasury, and yet to observe a wise economy. For the past few years there has been a gradual increase in our tax rate, until last year it reached the rate of \$17.20 per \$1,000, which appears to me to be somewhat higher than it ought to be. Therefore, I strongly recommend that an effort be made to retrench expenditures so far as is practicable without impairing the efficiency of any of the city departments.

Funded Debt.

The total funded debt of the city January 1, 1903, was \$1,477,000. This debt was increased during the year \$197,500. It was decreased \$169,000, leaving the net funded debt January 1, 1904, \$1,505,500, a net increase of \$28,500.

Taxable Property.

The total amount of taxable property is \$57,062,000, of which \$51,296,100 is real estate, and \$5,765,900 is personal estate, including non-resident bank shares. At a rate of \$17.20 on each \$1,000 of valuation, the tax is \$981,466.40. There are 18,381 polls at \$2.00, making \$36,762. We received from street watering \$20,621.44, making the total tax levy \$1,038,849.84. The total number of persons assessed, resident and non-resident, was 25,049.

Of the amount received in taxes, \$170,000 is required for the debt provisions; \$151,414.63 are state and county taxes, metropolitan sewer, etc., matters over which the city has no control; \$341,930 is used for current expenses of departments, over which the board of aldermen has no control; \$318,121.77 is the amount for current expenses within control of the board of aldermen. The same statement, based upon the \$17.20 per thousand, is as follows: Of each \$17.20, \$2.65 is for state, county and metropolitan taxes; \$2.98 for debt requirements; \$5.99 for current expenses, over which the board of aldermen has no control; \$5.58, current expenses within control of the board of aldermen.

In addition to the amount received from taxes, there was available last year the sum of \$225,615.36 on water income account; we received \$32,065.33 from corporation and bank taxes; from the clerk of the courts, \$5,239; from the county treas-

urer for dog licenses, \$3,393.02; from the state, the street railway tax, \$47,392.51; and from the Boston Elevated Railway tax, \$7,744.52; a total of \$321,449.74, making the total amount available from taxes and from other sources \$1,360,299.58.

The estimated borrowing capacity of the city January 1, 1904, was \$96,500. By the first of October this will be increased \$114,500, making a total borrowing capacity of \$211,000.

The City's Finances.

Funded Debt.—The funded debt of the city January 1, 1903, was as follows:—

Funded Debt, City Loan	\$1,066,000 00
Funded Debt, Sewer Loan	188,000 00
Funded Debt, Paving Loan	50,000 00
Funded Debt, Water Loan	146,000 00
Funded Debt, Metropolitan Park Assessment Loan	27,000 00
	<hr/>
	\$1,477,000 00

The debt was increased during the year by appropriations made by the board of aldermen as follows:—

Public Buildings Construction:—	
Bingham Schoolhouse Addition	\$34,500 00
Historical Building and Observatory on Prospect Hill	7,000 00
Engine House in Ward Two	43,000 00
Martha Perry Lowe School	18,000 00
Public Grounds:—	
Completion of Prospect Hill Park	1,000 00
Improvement of Playground, Poplar, corner of Joy Street	250 00
Highways:—	
Construction	15,000 00
Paved Gutters and Crossings	20,600 00
Thorndike-street Subway	3,800 00
Sidewalks Construction	11,350 00
Sewers Construction	25,000 00
Renewal of Funded Debt	18,000 00
	<hr/>
Amount borrowed during the year	\$197,500 00

The debt was reduced during the year by payments as follows:—

Funded Debt, City Loan	\$130,000 00
Funded Debt, Sewer Loan	10,000 00
Funded Debt, Paving Loan	5,000 00
Funded Debt, Water Loan	23,000 00
Funded Debt, Metropolitan Park Assessment Loan	1,000 00
	<hr/>
Amount paid during the year	\$169,000 00

Leaving the funded debt of the city January 1, 1904, \$1,505,500 (an increase of \$28,500 from the previous year), classified as follows:—

City Loan bonds bearing interest at 3½ per cent.	\$329,000 00
City Loan bonds bearing interest at 4 per cent.	779,500 00
City Loan Sewer bonds bearing interest at 3½ per cent.	52,000 00
City Loan Sewer bonds bearing interest at 4 per cent.	143,000 00
City Loan Sewer bonds bearing interest at 4½ per cent.	8,000 00
City Loan Paving bonds bearing interest at 4 per cent.	45,000 00
Water Loan bonds bearing interest at 4 per cent.	113,000 00
Water Loan bonds bearing interest at 5½ per cent.	10,000 00
Metropolitan Park Assessment Loan bonds bearing interest at 3½ per cent.	26,000 00
	<hr/>
Total Funded Debt January 1, 1904	\$1,505,500 00

The foregoing amount represents the net indebtedness of the city, the unfunded liabilities for the temporary loans, etc., being equalled by its assets, which consist of uncollected taxes, sewer and sidewalk assessments, etc.

Taxes.—The assessors' warrant for the tax levy assessed upon the polls and estates of the inhabitants, as of May 1, 1903, was duly submitted to the collector.

The total amount of taxable property was \$57,062,000, and the rate established was \$17.20 on each \$1,000 valuation, as follows:—

Real estate, valuation	\$51,296,100 00
Personal estate, valuation	5,685,260 00
Non-resident bank shares	80,640 00
	<hr/>
Total valuation	\$57,062,000 00

At a rate of \$17.20 on each \$1,000 valuation	\$981,466 40
Polls, 18,381 at \$2	36,762 00
Street watering	20,621 44
	<hr/>
Total amount of tax levy	\$1,038,849 84
Total number of persons assessed, resident and non-resident, 25,049.	

Appropriations.—The amount of revenue provided by the tax levy may properly be classified as follows:—

	Rates assessed on \$1,000 valuation.	Amount.
For current expenses within the control of the board of aldermen	\$5 58	\$318,121 77
Current expenses of departments over which the board of aldermen has no control	5 99	341,930 00
Debt requirements	2 98	170,000 00
State and county taxes, metropolitan sewer and park assessments, national bank tax, and Overlay account	2 65	151,414 63
	<hr/>	<hr/>
For total amount on a valuation of \$57,062,000 at \$17.20		\$981,466 40
Poll taxes assessed, credited to state and county		36,762 00
Street watering, in excess of amount appropriated		20,621 44
	<hr/>	<hr/>
Total amount of tax levy		\$1,038,849 84

The appropriations to the various accounts were as follows:—

ACCOUNTS WITHIN THE CONTROL OF THE BOARD OF ALDERMEN.

Assessors	\$10,075 00
City Auditor	725 00
City Clerk	6,350 00
City Engineer	11,900 00
City Messenger	2,000 00
City Solicitor	2,300 00
City Treasurer	9,000 00
	<hr/>
Amount carried forward	\$42,350 00

Amount brought forward	\$42,350 00
Clerk of Committees and Departments	4,200 00
Contingent Fund	3,800 00
Election Expenses:—	
City Clerk	750 00
Commissioner of Public Buildings	1,000 00
Pay of Election Officers	1,700 00
Registrars of Voters	1,600 00
Excess and Deficiency	2,101 77
Electrical Department	7,000 00
Executive Department	3,900 00
Fire Department	35,000 00
Highways:—	
Maintenance	2,100 00
Removing Brown-tail Moths	3,000 00
Watering Streets	1,000 00
Inspection of Buildings	4,100 00
Military Aid	500 00
Police	31,000 00
Printing and Stationery	2,500 00
Public Buildings Maintenance:—	
City Hall	3,800 00
City Hall Annex	800 00
Fire Department	4,400 00
Health Department	250 00
Highways	200 00
Police	2,600 00
Public Grounds	75 00
Public Library	3,800 00
Schoolhouses	51,170 00
Sewer Department	125 00
Support of Poor	600 00
Water Department	100 00
Public Grounds	10,500 00
Sealer of Weights and Measures	1,200 00
Sidewalks Maintenance	6,000 00
Soldiers' Relief	16,000 00
Somerville Hospital	5,000 00
Street Lights	63,900 00
<hr/>	
Total amount assessed on a valuation of \$57,062,000, at \$5.58	\$318,121 77

ACCOUNTS OVER WHICH THE BOARD OF ALDERMEN HAS NO CONTROL.

Health Department	\$39,000 00
Public Library	14,800 00
School Contingent	24,000 00
<hr/>	
Amount carried forward	\$77,800 00

Amount brought forward	\$77,800 00
School Teachers' Salaries	238,000 00
Support of Poor, City Home	4,500 00
Support of Poor, Miscellaneous	21,630 00

Total amount assessed on a valuation
of \$57,062,000, at \$5.99 \$341,930 00

ACCOUNTS PROVIDING FOR DEBT REQUIREMENTS.

Interest	\$52,000 00
Reduction of Funded Debt	118,000 00

Total amount assessed on a valuation
of \$57,062,000, at \$2.98 \$170,000 00

PROVIDING FOR STATE AND COUNTY TAXES, ETC.

State Tax	\$43,750 00	
Deduct one-half of poll taxes	18,381 00	
		\$25,369 00
County Tax	\$57,308 97	
Deduct one-half of poll taxes	18,381 00	
		38,927 97
Metropolitan Sewer Assessment	46,588 33	
Metropolitan Park Assessment	21,809 23	
National Bank Tax	1,387 01	
Overlay and Abatement	13,468 06	
Armory Tax	3,865 03	

Total amount assessed on a valuation
of \$57,062,000, at \$2.65 \$151,414 63

In addition to the above, the following appropriations were made from the various income accounts:—

From the Income of the Water Works:—

Water Maintenance	\$39,076 31
Water Loan Interest	5,610 00
Water Works Extension	11,530 00
Water Works, Abatements on Water Charges	1,137 84
Interest on Sewer Loan Bonds	7,120 00
Sewers Maintenance	12,300 00
Fire Department	31,000 00
Reduction of Funded Debt, Sewer Loan Bonds	10,000 00
Reduction of Funded Debt, Water Loan Bonds	23,000 00
Reduction of Funded Debt	7,552 78
Metropolitan Water Assessment	77,288 43
Total	\$225,615 36

From the Income from the State and County:—

Police, the amount received from the state for corporation and bank taxes . . .	\$32,065 33
Police, the amount received from the clerk of the courts for fines, costs, etc. . .	5,239 00
Public Library, the amount received of the county for dog licenses . . .	3,393 02
Highways Maintenance, from Boston Elevated Railway tax	7,744 52
Highways Maintenance, from street rail- way tax	47,392 51
	<hr/>
Total	\$95,834 38
Total from water income and from state and county	\$321,449 74
	<hr/> <hr/>

The aggregate appropriations from the tax levy and from income were as follows:—

From tax levy	\$1,038,849 84
From income	321,449 74
	<hr/>
	\$1,360,299 58

The following tables, giving a condensed history of the city's finances, are herewith presented for reference:—

YEAR.	Amount of Funded Debt.	Increase of Funded Debt.	Reduction of Funded Debt.	Tax Rate per \$1,000 Valuation on Account of Reduction of Funded Debt.

Highway Department.

There is no other department with whose work the average citizen is brought so much in daily contact as with that of the highway department, and there is no department whose work the public observes with a more critical eye. The citizens of Somerville require that our highways and sidewalks be maintained at the highest possible degree of excellence, and that particular attention be given to those main thoroughfares over which the bulk of local and out-of-town travel passes. The past year has seen a great deal accomplished in this respect, but much remains to be done. Eight new streets have been accepted, increasing the mileage of our public streets to 67.1 miles, and reducing that of our private streets to 25.5 miles. Much construction and repairing has been done on our highways the past year, 17,744 tons of crushed stone having been used in this work, of which 16,440 tons were crushed by the stone crusher of the department, and the remainder purchased. Eighteen thousand two hundred seventy-three feet of edgestones and inside curbing have

been set, and 5,988 square yards of stone gutters and 548 square yards of vitrified brick, granolithic, granite and concrete crossings have been laid. Eleven thousand eight hundred ten feet, making over two miles, of edgestones have been reset, and 6,328 square yards of brick sidewalks relaid. Eighty square yards of crossings, driveways, sewer trenches, etc., have been paved or re-paved with granite blocks; 230 square yards of granite crossings surfaced with concrete; and thirty square yards of driveways paved or repaved with bricks. Seven thousand five hundred three square yards of brick and 215 square yards of granolithic sidewalks have been laid.

The new subway at Thorndike street has been completed, is open for traffic, and fills a long-felt want in that district.

Seventy-eight trees have been set out, and forty-two have been cut down during the year. The city is not yet free from the brown-tail and gypsy moths, although vigorous work has been done to rid the city of the pest. A careful inspection by the highway department has resulted in discovering that most of the remaining nests are on private property, very few being found on the trees on the highways. With the experienced force at the disposal of the highway department, it would seem to me to be to the advantage of the property owners to enlist the services of the department in cleaning their trees, as the work would doubtless be performed in a more economical and satisfactory manner than if done by the individual owners.

The condition in which streets are left after the work of laying water, sewer and gas pipes, replacing poles and laying underground wires, demands serious attention. Making water service and sewer connections and replacing pavements by unskilled workmen destroys the streets more than all the ordinary wear to which they are subjected. I would strongly recommend that the various departments and companies making such openings be obliged to do all work of this description under the supervision and to the satisfaction of the street commissioner, with the exception of repaving, which should be done by the highway department itself; the entire expense to be borne by said departments or companies.

Street Watering.

In the street watering the taxpayer seems to receive the quickest and most apparent return for his money. This work

not only keeps dust out of our residences, but it aids greatly in preserving our streets.

Bridges.

It gives me great pleasure to state that the Boston & Maine Railroad has completed the construction of highly acceptable bridges over its tracks at Sycamore and School streets, all the expense of construction being borne by the road.

A new bridge under construction by the metropolitan park commission, over the Mystic river, on the line of the Fellsway boulevard and Middlesex avenue, has been completed, though not yet open for traffic. The boulevard in Somerville, between this bridge and Mystic avenue, is to be widened.

Steps should immediately be taken to have the Boston & Maine Railroad replace the bridge they removed from Lowell street some years ago. Lowell street is now a most important cross-town thoroughfare, and it is of the utmost importance that this matter receive prompt attention.

Grade Crossings.

Petitions filed by the city are now pending in the superior court, for abolishing all the crossings on the Fitchburg division of the Boston & Maine Railroad, and are awaiting further action by the city government or by the railroads concerned. I believe that these crossings are a constant menace to the safety of our citizens, proof of which is almost daily furnished, and I would recommend that this matter be pressed without further delay.

Boulevards.

At the last session of the legislature, a bill was passed appropriating \$3,000,000 for parks and boulevards, to be expended under the direction of the metropolitan park commissioners. It appears to me that this is the proper time to urge upon the commissioners the construction of the boulevard through the cities of Somerville and Cambridge, connecting the Fells and Fenway, and to call their attention to the advisability of taking the banks of the Mystic river for park purposes. Both of these projects were favorably considered by the committee on met-

ropolitan affairs of the legislature of 1903, and would have been reported upon favorably but for the fact that it was deemed advisable to report a blanket bill placing the matter in the hands of the metropolitan park commissioners. To properly press this matter before the commissioners, I would recommend that a special committee of your honorable board be appointed, and as this seems to me to be a subject in which our citizens at large should take an active interest, it is my purpose at an early date to appoint a citizens' committee, to consist of twenty-five eminent citizens of Somerville, to co-operate with and aid your committee in this matter.

Health of the City.

We have every reason to be thankful for the healthfulness of our city during the past year. We have been entirely free from epidemics of all kinds, and have not had a single case of smallpox during the year. The record of the board of health for 1903 is, briefly, as follows:—

The number of permits issued to pedlers was 106; number of permits renewed to pedlers, 142.

Forty-three permits were issued to keep 112 cows, and four persons were refused permission to keep twenty-six cows. Seven permits were granted to keep eight goats, none being refused. Out of fourteen applications to keep twenty-nine swine, eleven permits were granted to keep twenty-two swine. Nineteen applications were received to collect grease, seventeen of which were granted, and seven applications were granted to carry on the business of melting and rendering. Sixteen undertakers have been licensed. Twenty-eight petitions were received for permission to erect stables, eleven of which were granted. Nine hundred sixty-four nuisances have been investigated, most of which have been abated. Forty-six cases of glanders have been reported, with the result that forty-four horses were killed and two released.

Contagious Diseases.

Number of cases of diphtheria reported, 183; deaths from same, seventeen. Number of cases of scarlet fever reported, 143; deaths from same, thirteen. Number of cases of typhoid fever reported, twenty-nine; deaths from same, ten.

Bacteriological Laboratory.

The wisdom of establishing a bacteriological laboratory at the city hall has been realized.

The number of diphtheria cultures received was 772, of which 174 were positive and 598 negative. One hundred thirty-four specimens of sputum were examined for tuberculosis, twenty-five of which proved positive and 109 negative. Seventy Widal tests were received for examination for typhoid fever, twenty-six of which were positive and forty-four negative.

Physicians can leave specimens at any hour during the day or night at the city hall and obtain their results the next morning.

Sanitary Conditions.

It is impossible to place too much importance upon perfecting the sanitary conditions of the city. It is imperative that our sewers and drains be absolutely perfect, and that every modern improvement be immediately utilized and taken advantage of. During the past year the sewer department has done important construction work, a brief outline of which follows.

An agreement has been executed with the owners of the property lying between Mystic avenue and Middlesex avenue, near Winthrop avenue, whereby the city has obtained a permanent right of way for drainage purposes. For many years the city has paid an annual rental for the use of an old water course across this private property, and by the construction during the year of a permanent storm drain in the right of way obtained, the main drainage outlet for the eastern district of the city has been completed. The new structure extends from the tide-gate chamber, constructed in Middlesex avenue the previous year, southwesterly across the marsh land to Mystic avenue at Winthrop avenue, where it connects with the bell-mouth chamber previously built, and takes the drainage from three large structures discharging at this point. This new drain is constructed principally of concrete and expanded metal with I beams. It is ten feet wide and seven and one-half feet high, and is the largest drainage structure in the city.

The "separate system" sewers (those built for house drainage only) have been extended in various streets, and this work should continue yearly as the appropriation will allow, until all flooded areas in the city have a new sewerage system. All house drains

in these districts should be re-connected with the new sewers as soon as built.

A number of sewers have been constructed as petitioned for in different sections of the city, and portions of the cost of construction assessed upon the abutting estates. Fifteen sewers and drains have been constructed during the year, a length of 6,433 feet (1.2 miles). Thirty-nine catch-basins have been constructed on the highways during the past year, and the drainage of a number of streets improved. This makes a total of 1,267 catch-basins for street drainage purposes. Two hundred fifty-eight permits have been issued to licensed drain layers for connecting buildings with the main sewers under the supervision of the city's inspector. There are at present about 12,500 private drains connected with the city's drainage system. The total length of this system is 88.3 miles, 17.5 miles being under the new "separate system" sewers, and 4.7 miles being storm drains. The total cost of new sewer construction work for the year has amounted to about \$31,000, and the cost of maintaining the system for the past year (not including \$1,585 paid the city of Cambridge) has been about \$11,500.

Public Grounds.

Several improvements have been made in the city's public grounds during the past year, chief of which was the completion of the Prospect Hill park, which I have mentioned at some length elsewhere in this address. The old Bennett schoolhouse has been removed from the lot at the corner of Poplar and Joy streets, and the lot graded and put in use for the children in that district for a playground. At Lincoln park a large portion of the old clay pit has been filled in with material from Prospect Hill park, and with ashes deposited by the board of health teams. A new straight-away running track has been completed, and a fence ten feet high constructed on a portion of the westerly boundary of the park for the protection of the adjoining private property.

The city maintains at the present time three good athletic fields, namely,—a portion of Lincoln park, the enclosed field on Broadway near Powder House square, and the field on Broadway at the corner of Cedar street. These three grounds are in constant use by various athletic teams throughout the baseball and football seasons. The grounds on College avenue, op-

posite Morrison avenue, have been maintained for tennis playing and other games. I would recommend that an additional playground be provided by taking that portion of Broadway park adjoining Mystic avenue and converting it to that use, or by purchasing additional land in that section.

The rockery and basin, generously provided for in the will of the late Joseph F. Wilson, has been constructed in Central Hill park, and adds much to the beauty of the spot.

The total area of public grounds maintained by the city at the present time amounts to over fifty-eight acres, not including a boulevard about one and one-quarter miles in length. The cost of maintenance for the past year has been about \$11,300.

Prospect Hill Park.

One more area in the city's park system has been practically graded and completed during the year,—the land purchased on Prospect Hill. A roadway and walks have been laid out and beds of shrubbery and trees planted, which eventually will make it one of the finest pleasure parks in this section.

This park will always be of great historical interest on account of the encampment of soldiers on this hill, both in the Revolutionary and Civil wars. A portion of the old hill has been left at its original height, on top of which a granite observation tower has been erected. From the top of this tower an unobstructed view may be had for miles in every direction. Bronze tablets are being made, with inscriptions of historical events, and will be placed on the Munroe-street retaining wall at the base of the tower. The corner-stone of the tower was set July 7, and the park was dedicated with appropriate exercises on the twenty-ninth day of last October.

The entire cost of this park, including the building of the observation tower, will not exceed \$75,000, of which amount about \$50,000 was for the purchase of the land.

Engineering Department.

Very important work has been carried on by this department during the past year, practically all of which has been treated under other headings. The work of the department has been performed in an able, faithful and systematic manner, and to the satisfaction of all having business with the department.

Water Department.

The construction operations of the water department during the past year have been largely of a routine nature relating to the general maintenance and efficiency of the water works system, such as the renewal of street water mains, construction of mains in new streets, repairs of mains and house service pipes, inspection and maintenance of our extensive fire hydrant system, laying service pipes to new buildings, setting water meters, setting and maintaining waterposts for the street sprinkling department, setting new hydrants and stop-gates, and improving the water circulation. Every building in the city has been visited at least once for the purpose of obtaining data for the water-rate levy and for the restriction of water waste.

The year's work has been signalized by the removal of practically the last of the old cement-lined water mains, and the city now possesses a modern water distribution system that is second to none in point of efficiency. Six thousand, six hundred sixty-four feet of pipe have been renewed the past year, and in extending the water pipe system 3,280 feet of iron pipe have been laid, while 5,529 feet of service pipe have been used in making connections between the street mains and new houses. Thirty-one fire hydrants and forty-four stop-gates have been set and renewed, nine blow-off connections have been put in, and one waterpost has been constructed for the highway department. The length of water mains now in the city is over eighty-nine miles, and the appurtenances connected therewith comprise 973 fire hydrants, 1,319 stop-gates, sixty-nine waterposts, and eleven drinking fountains and troughs.

The subject of the general use of water meters has received much careful consideration during the year, and, in accordance with the policy proposed one year ago, 366 new premises have been metered, making a total of 635 operating meters in the city at the present time. The result of this metering has been generally very satisfactory; to the consumer in being able to obtain his water, in most cases, at a lower price than under the flat rate, and to the city in being able to stop, in some cases, excessive waste of water where other means have failed. The metropolitan water and sewerage board has completed its installation of meters on the main supply lines to our city with the view, in the near future, of measuring all the water supplied to us. I have been informed by the board that, if the present waste of

water continues, it will be necessary, in a very few years, to enlarge the works at an estimated expense of about \$40,000,000, of which amount Somerville will be called upon to pay approximately \$1,600,000. I have positive information that at the next session of the legislature a bill will be introduced, at the suggestion of the board, and will undoubtedly pass and become a law, providing that the water supplied the different cities and towns in the metropolitan water district shall be measured, and the state water tax assessed according to the amount consumed by the respective cities and towns. When the water tax is assessed on that basis, it will be of the utmost importance to take such action as will restrict the waste of water and bring the consumption down to a basis of liberal but legitimate use, and this can only be accomplished by the further extension of the meter system. Certainly the use of meters tends to an equalization of the water charges and to a restriction of water waste, both very desirable conditions, and therefore I recommend that the meter system be installed in all buildings where water is used for other than strictly domestic purposes.

The water furnished us by the state has been of good quality. The works of the metropolitan system, to the cost of which we are, next to Boston, the largest contributor, are making good progress toward completion. The assessment which Somerville paid this year as its proportion of the expenses of the works was \$77,288.43, and the total payment made by this city since the beginning, in 1898, is \$260,418.09. The water income of the city for 1903 was, approximately, \$223,000, an increase of about \$9,000 over the previous year. The expenses of maintenance, operation and extension of the local works, payment of maturing water bonds, and the metropolitan water works assessment, amounted to about \$158,000, leaving a surplus of about \$65,000.

Buildings Department.

The commissioner of public buildings has the care and maintenance of twenty-six school buildings, eight fire department buildings, the city hall, city hall annex, public library building and police building, together with the buildings connected with the health, highway, public grounds, sewer, poor and water departments. During the past year a number of routine repairs and several important improvements

were made, among which was the installing of a new electric switch-board and motor generator, contracted for in 1902, in the English High school building, to be used in connection with the chemical and physical laboratories and the stereopticon in the lecture hall. A radical change was also made in the arrangement of the first-floor rooms at the Latin school, the large classroom being made smaller, and two new recitation rooms being constructed on the westerly side. This change was made absolutely necessary by the increased attendance of pupils and the need of additional recitation rooms. The old-fashioned shutters in several of the older school buildings have been removed, and cloth shades substituted in their places. I would recommend that a sufficient appropriation be provided for the outside painting of several of the school buildings, as this work appears absolutely necessary to prevent the decay of the woodwork, which in some cases has already begun.

A considerable change has been made in the arrangement of the mayor's offices. A private lavatory has been provided, in connection with, and a private exit from, the Mayor's room. The offices have been partially refurnished, and are much more comfortable and attractive.

During the year 232 permits have been issued for the erection of new buildings and for alterations, the estimated cost of this work amounting to \$507,855. A systematic inspection of buildings under process of construction, and the plumbing of the same, has been made during the year, and the department has endeavored to see that the building regulations have been strictly complied with.

Department of Electric Lines and Lights.

This department has the care and maintenance of all electrical appliances belonging to the city, which include the fire alarm and police signal systems and the electrical apparatus of all schoolhouses and public buildings. It also has under its care the street lights and the supervision of all poles and wires in the public streets. During the year the department has successfully maintained its usual high standard in the care of all the electrical appliances under its charge, all alarms having been correctly transmitted, and the schoolhouses having received most careful attention.

Seven arc lights and twenty-one incandescent lights have been added to the city's lighting system during the past year, making a total of 485 arc lights and 453 incandescent lights now in service. Taken as a whole, Somerville is one of the best-lighted cities in the state, and there is every reason to believe that we shall continue to maintain our excellence in this respect.

Schools.

The American public school is the bulwark of our American institutions. In no country in the world are the people so intelligent, so well-read, and so well-informed as in the United States, and that this is so is due entirely to the influence of our public schools. While the public schools in Somerville, as elsewhere in the nation, continue to be the chief item of expense, it should be borne in mind that the returns from this expenditure are larger than could be obtained in any other way. Money expended in training our youth to be law-abiding, self-supporting American citizens is money well expended.

To-day there are 400 more children in our public schools than there were a year ago. That the number of pupils will continue to increase as long as our city continues to grow is certain, as is also the fact that we shall continue to need additional schoolhouses to provide for this increase. We shall undoubtedly be obliged to authorize a considerable expenditure to adequately accommodate our pupils, but I do not feel justified in recommending any specific appropriation for construction purposes until I have had further opportunity to acquaint myself with the condition of our schools, as well as with the financial condition of our city. I shall doubtless take occasion to make this matter the subject of a special message at some future date.

Public Library.

Our public library during the past year has done an increased amount of work in nearly all its departments. There has been a decided gain in circulation over previous years, upwards of 315,000 volumes having been given out. The number of books distributed through our schools has largely increased. Of 227 rooms in our public schools, 163 have been supplied with permanent libraries consisting, in most instances, of forty books. There can be no doubt that the public schools supply one of the

best possible mediums for getting good books before a large number of readers.

During most of the year the library has had seven distributing agencies, located in stores in different parts of the city. The policy of delivering books direct to the residences of the people by means of boy carriers has also been continued, upwards of 4,000 books having been delivered in this manner during the year. Both of these methods of delivery are much appreciated in localities remote from the central library.

The library has also sent to seven Sunday schools 1,511 books, and those schools that have accepted this service report it highly satisfactory.

Police Department.

The citizens of Somerville are to be congratulated on the efficiency of their police force. No city in our commonwealth is more free from crime, and in no section of our state are the perpetrators of crime more quickly apprehended.

Our police force at the present time consists of a chief of police, one captain, three lieutenants, five sergeants, one inspector, forty-one regular patrolmen, and ten reserve patrolmen, making a total of sixty-two. During the year Sergeant Christopher C. Cavanagh and Patrolman John Hafford were retired on half-pay, having become incapacitated for further duty, and young men were appointed in their places. The system of retiring men, who, by reason of advanced age, have become unfit for service, is an excellent one, in my opinion, as it is an incentive to every member of the force to do his full duty, knowing that he will be provided for when age and infirmities come upon him. In addition, it infuses new life into the department through the appointment of young men, and maintains its strength and efficiency at a minimum of expense.

At present the interior of the police building is undergoing a great change, as the whole second story is being fitted up for the occupancy of the department, a change that has been contemplated for some time and that has been made possible by the removal of company M to the new armory. Additional changes are under way in the first story of the building, which will give the matron and the female prisoners much more comfortable quarters. When all of the improvements are completed, Somerville will have a police building second to none in the commonwealth in the completeness of its equipment.

Fire Department.

Somerville is very fortunate in having a fire department that for general efficiency is equalled by few and excelled by none in the cities of the commonwealth. During the past year all alarms have been responded to so promptly, and all fires handled so skillfully, that we have again been free from a single conflagration. One hundred and eighty-eight bell alarms and 118 still alarms have been responded to, making a total of 306 alarms, but in only six cases has it been necessary to sound a second alarm to bring additional apparatus to the fire.

A new building is being erected for the department in Union square, to take the place of the old fire station situated on Somerville avenue, Washington and Prospect streets, the old building having become so thoroughly dilapidated that it was inexpedient to spend any money on it, either for alterations or repairs. The new building, when completed, will not only furnish accommodations for the apparatus necessary for the protection of the district, but it will be attractive in appearance, and will give evidence of the desire of the authorities to adequately protect this territory.

The general condition of the apparatus is very good, with the exception of engine number 4, which is sadly in need of a new boiler, only a limited steam pressure being permitted by the government boiler inspectors in its present condition. I recommend that a new boiler be purchased as soon as possible. A new and powerful engine has been purchased, and is now in service at the central station while engine number 1 is being repaired. At present the manual force of the department consists of 117 men, of whom thirty-five are permanently employed, the remaining eighty-two being call men.

Assessors' Department.

During 1903 our board of assessors, in addition to the outdoor work of visiting, examining and listing property, has held forty-one meetings, many of which were hearings on petitions for abatement and exemption. Seven hundred seventy-six such applications were received, nearly all of which have been acted upon and the applicants notified of decisions, according to law.

Personal property to the value of \$109,100 and real estate assessed at \$1,347,200 was exempted from taxation, under the provisions of the third and seventh divisions of section five, chapter twelve, of the revised laws.

While there may have been no criticism of the efficient work of the board in assessing property, there have been a number of complaints of negligence in assessing polls, and therefore I would recommend that the board give this matter careful attention, that such complaints may have no foundation in the future.

Poor Department.

The overseers of the poor have rendered efficient aid to the poor of the city during the past year, there being reason to believe that few, if any, cases of extreme destitution have escaped their notice. During the year 1,132 persons have been aided to a greater or less extent, and 220 families have been assisted at their homes. The city is now paying for the support of 106 insane, feeble-minded, and dipsomaniacs, and during the year has provided for 127 such persons. Five thousand dollars has been paid to the Somerville hospital for care and treatment of the sick poor settled in the city, and the hospital has also been paid \$2,190.87 for the care and treatment of sick poor not settled here, this latter amount having been collected from the state and from different cities and towns. One hundred and sixty city patients have been cared for at the hospital for periods ranging from one day to twenty weeks.

Sixteen men and eleven women have been cared for at the city home during the year, and at present there are thirteen men and seven women there. The expenses of the home for the year were \$7,548.39, and \$3,031.40 was received from the sale of wood and produce, and for the board of certain inmates.

The total expenditures of the department for the year have been about \$30,500.

Somerville Hospital.

I consider the hospital one of Somerville's most worthy institutions. In accordance with our custom for several years past, I recommend that there be appropriated for the care of the sick poor the sum of \$5,000.

Law Department.

A number of important matters have engaged the attention of the city solicitor during the past year. By chapter 504 of the acts of the legislature for the year 1902, the city was author-

ized to take for a public park in West Somerville a certain tract of land, the owners of which had been endeavoring unsuccessfully to secure the right of blasting. An agreement was made this year with Messrs. Collins and Ham by which they were allowed to blast for a limited time under certain restrictions, and the city obtains the privilege of a dumping ground, and expects eventually to become the owner of the land. No arrangement has yet been made with the city of Cambridge, which also desired the right to blast.

The question of apportioning between Somerville and the other municipalities the cost of the new bridge over the Mystic river at Middlesex avenue will soon come before the courts for adjustment. No arrangement has yet been made for giving the street railway company a location over the bridge or over Middlesex avenue, owing, I am informed, to the fact that the railway company is unwilling to accept the terms offered by the commissioners for a location on the bridge. The grade of Middlesex avenue will need to be changed when tracks are placed there, and it will doubtless be necessary for the city to negotiate with the railway company before the terms of a location can be determined.

By chapter 327 of the acts of the legislature for the year 1903, a special commission was created, consisting of the mayors of Cambridge and Somerville and the chairmen of the selectmen of Arlington and Belmont, to take charge of improvements in Alewife brook. The commission referred the matter in large part to our city engineer, but action has been delayed at the request of the metropolitan park commissioners, in order that, if possible, a comprehensive plan may be made for the improvement of the Mystic river at the same time.

Sealer of Weights and Measures.

The work of the sealer of weights and measures continues to increase rapidly, 72,211 tests having been made during the year 1903, as compared with 9,663 in 1897, the year in which the present sealer assumed the office. The expenses of the department for the year past were \$1,424.83, and the receipts \$392.77.

Inspector of Milk.

The work of this department has been practically the same as last year. About 800 samples of milk and fifty samples of

vinegar have been tested, as well as a few samples of butter. License fees and fines amounting to about \$600 have been turned over to the city treasurer.

It is pleasing to note that the quality of the milk tested has been better than in any previous year.

Soldiers' Relief.

During the year just passed the sum of \$19,586.27 was expended for the relief of veteran soldiers, soldiers' widows and families, under the provisions of the legislative act of 1890. That we have had this opportunity of partially lightening the burdens of those valiant men who risked their lives for their country, or of providing for their widows or families, must be gratifying to every Somerville citizen. Somerville has always been careful that its veterans should not want, and it will continue to exercise this same care.

No-License.

Somerville is to be congratulated on again voting no-license by an increased majority. There can be no doubt that our city's comparative freedom from crime is largely due to the no-license policy that we have pursued for so many years. It is needless for me to state that I purpose to vigorously enforce the no-license law, and that illicit liquor sellers, if there be any, will be prosecuted to the full extent of the law.

Gentlemen of the Board of Aldermen: We have accepted from our fellow-citizens a great trust and responsibility. Let us endeavor to so perform our duties, to so advance the interests of our city, and, above all, to so guard its welfare and protect its exalted name, that, when our official term shall end, we shall be deemed worthy of commendation by those who have entrusted so much to our care.

REPORT OF THE CITY TREASURER AND COLLECTOR OF TAXES.

Treasurer's Office, January 14, 1904.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen:—The undersigned presents herewith the thirty-second annual report of the financial condition of the city, and a statement showing, in detail, the receipts and disbursements for the year ending December 31, 1903.

Public Property.

The value of the public property of the city December 31, 1902, was \$3,602,384.98. The property acquired during the year was as follows:—

Contagious Disease Hospital and Land	\$400 00
Public Buildings Construction, Clark Bennett School	502 55
Public Buildings Construction, Martha Perry Lowe School	42,544 71
Public Buildings Construction, Addition to Bingham School	17,280 44
Public Buildings Construction, Engine House in Ward Two	15,910 69
Fire Department, New Steam Fire Engine	5,375 00
Fire Department, New Steam Fire Alarm Whistle	510 00
Public Grounds, Improvement Park, Poplar corner Joy Street	250 00
Prospect Hill Park, Completion	1,205 19
Public Buildings Construction, Historical Building and Observatory on Prospect Hill	8,706 16
Water Works Extension	16,694 49
Furniture, School	2,290 00
School Books	1,025 00
	\$112,694 23

Making the value of the public property December 31, 1903, as per Table A, \$3,715,079.21.

Funded Debt.

The funded debt December 31, 1902, as per Table B of the last annual report, was \$1,477,000.

The debt was increased during the year by appropriations as follows:—

Public Buildings Construction:—	
Bingham Schoolhouse Addition	\$34,500 00
Historical Building and Observatory on Prospect Hill	7,000 00
Engine House in Ward Two	43,000 00
	\$84,500 00
Amount carried forward	

Amount brought forward	\$84,500 00
Martha Perry Lowe School	18,000 00
Public Grounds:—	
Completion of Prospect Hill Park	1,000 00
Improvement of Playground, Poplar cor Joy street	250 00
Highways:—	
Construction	15,000 00
Paved Gutters and Crossings	20,600 00
Thorndike Street Subway	3,800 00
Sidewalks Construction	11,350 00
Sewers Construction	25,000 00
Renewal of Funded Debt	18,000 00
	<hr/>
Total amount of appropriations on Funded Debt account	\$197,500 00

To provide for the above-mentioned appropriations, the following bonds were issued, viz.:—

City Loan Bonds Nos. 3017 to 3026, payable 1904, interest 4 per cent.	\$10,000 00
City Loan Bond No. 3027, payable 1904, interest 4 per cent.	500 00
City Loan Bonds Nos. 3150 to 3151, payable 1904, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3028 to 3037, payable 1905, interest 4 per cent.	10,000 00
City Loan Bonds Nos. 3152 to 3153, payable 1905, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3038 to 3046, payable 1906, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3154 to 3155, payable 1906, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3047 to 3055, payable 1907, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3156 to 3157, payable 1907, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3056 to 3064, payable 1908, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3158 to 3159, payable 1908, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3065 to 3073, payable 1909, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3160 to 3161, payable 1909, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3074 to 3082, payable 1910, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3162 to 3163, payable 1910, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3083 to 3091, payable 1911, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3164 to 3165, payable 1911, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3092 to 3100, payable 1912, interest 4 per cent.	9,000 00
City Loan Bonds Nos. 3166 to 3167, payable 1912, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3101 to 3109, payable 1913, interest 4 per cent.	9,000 00
	<hr/>
Amount carried forward	\$110,500 00

Amount brought forward	\$110,500 00
City Loan Bonds Nos. 3168 to 3169, payable 1913, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3110 to 3113, payable 1914, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3170 to 3171, payable 1914, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3114 to 3117, payable 1915, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3172 to 3173, payable 1915, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3118 to 3121, payable 1916, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3174 to 3175, payable 1916, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3122 to 3125, payable 1917, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3176 to 3177, payable 1917, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3126 to 3129, payable 1918, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3178 to 3179, payable 1918, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3130 to 3133, payable 1919, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3180 to 3181, payable 1919, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3134 to 3137, payable 1920, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3182 to 3183, payable 1920, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3138 to 3141, payable 1921, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3184 to 3185, payable 1921, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3142 to 3145, payable 1922, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3186 to 3187, payable 1922, interest 4 per cent.	2,000 00
City Loan Bonds Nos. 3146 to 3149, payable 1923, interest 4 per cent.	4,000 00
City Loan Bonds Nos. 3188 to 3189, payable 1923, interest 4 per cent.	2,000 00
Sewer Loan Bonds Nos. 279 to 303, payable 1904 to 1928, \$1,000 annually, interest 4 per cent.	25,000 00
Total amount of bonds issued in 1903	<u>\$197,500 00</u>

The following bonds became due and were paid during the year, viz:—

City Loan Bonds Nos. 1656 to 1664, interest 4 per cent.	\$9,000 00
City Loan Bonds Nos. 1864 to 1881, interest 4 per cent.	18,000 00
City Loan Bonds Nos. 2116 to 2123, interest 4 per cent.	8,000 00

APPROVAL OF TREASURER'S REPORT.

In Committee on Finance, February 9, 1904.
To the Board of Aldermen of Somerville:—

The committee on finance, to which was referred the report of the treasurer and collector of taxes for the year 1903, reports that, in conjunction with the auditor, it has examined and audited the books and accounts of the treasurer and collector of taxes for the year ending December 31, 1903, and in the manner prescribed by section 7 of chapter 4 of the Revised Ordinances of 1900.

A careful comparison has been made with the books of the city auditor and with financial statements received from the several committees, boards, and officers of the city accountable for the use of the city funds.

The cash account has been verified by actual count of the cash on hand and the balances shown to be in the banks of deposit have been confirmed by the officials of the banks.

The committee reports that no errors were discovered in the accounts and books of the treasurer and collector, and recommends that his report be accepted and printed in the annual reports of 1903.

In Board of Aldermen, February 11, 1904. Accepted.

GEORGE I. VINCENT, Clerk.

REPORT OF THE SCHOOL COMMITTEE.

School Committee Rooms, December 28, 1903.

Ordered, that the annual report of the Superintendent be adopted as the annual report of the Board of School Committee, it being understood that such adoption does not commit the board to the opinions or recommendations made therein; that it be incorporated in the reports of the city officers; and that 1,000 copies be printed separately.

G. A. SOUTHWORTH,

Secretary of School Board.

SCHOOL COMMITTEE, 1903.

S. NEWTON CUTLER, Chairman
 GEORGE A. MILES, Vice-Chairman

Members.

	Term expires January.
WARD ONE.	
S. NEWTON CUTLER, 28 Flint street.	1904
GEORGE S. POOLE, 46 Mt. Vernon street.	1905
WARD TWO.	
JOHN H. O'NEIL, 44 Oak street.	1904
EDWARD J. FLYNN, 273 Washington street.	1905
WARD THREE.	
GEORGE E. WHITAKER, 75 Walnut street.	1904
DANA W. BENNETT, 41 Putnam street.	1905
WARD FOUR.	
GEORGE W. W. WHITING, 282 Broadway.	1904
WILLIAM P. JONES, 13-A Maple avenue.	1905
WARD FIVE.	
QUINCY E. DICKERMAN, 86 Central street.	1904
J. WALTER SANBORN, 183 Central street.	1905
WARD SIX.	
FREDERICK A. P. FISKE, 44 Cherry street.	1904
CHARLES H. HOOD, 2 Benton road.	1905
WARD SEVEN.	
GEORGE A. MILES, 249 Elm street.	1904
HENRIETTA B. H. ATTWOOD, 18 Herbert street.	1905

The committee holds its regular meetings on the last Monday evening of each month, except July, August, and December, at 8.15 o'clock. The last meeting of the year is held on the Friday next preceding the first Monday of January.

Superintendent of Schools.

GORDON A. SOUTHWORTH.

Office: City Hall Annex, Highland avenue.

Residence: 40 Greenville street.

The Superintendent's office will be open from 8 to 12, and from 1.30 to 5; Saturdays, 8 to 10. His office hours are from 4 to 5 on school days and 8 to 9 on Saturdays.

Office telephone, 314; house telephone, 12.

Cora S. Fitch, Superintendent's clerk, 69 Walnut street.

STANDING COMMITTEES, 1903.

High Schools.—Whiting, Cutler, Flynn, Bennett, Sanborn, Fiske, Miles.
LATIN, ENGLISH.

District (or Ward) I.—Cutler, Poole.
PRESCOTT, HANSCOM, DAVIS, BENNETT.

District (or Ward) II.—O'Neil, Flynn.
KNAPP, PERRY, BAXTER.

District (or Ward) III.—Whitaker, Bennett.
POPE, BELL, CUMMINGS.

District (or Ward) IV.—Whiting, Jones.
EDGERLY, GLINES.

District (or Ward) V.—Dickerman, Sanborn.
FORSTER, BINGHAM.

District (or Ward) VI.—Fiske, Hood.
CARR, MORSE, DURELL, BURNS, BROWN.

District (or Ward) VII.—Miles, Mrs. Attwood.
HIGHLAND, HODGKINS, LINCOLN, LOWE.

Additional School Accommodations.—Miles, Poole, O'Neil, Bennett,
Jones, Dickerman, Hood.

Evening Schools.—Dickerman, Bennett, Fiske.

Finance.—Bennett, Sanborn, Hood.

Industrial Education.—O'Neil, Whitaker, Mrs. Attwood.

Music.—Whitaker, Poole, Mrs. Attwood.

Private Schools.—Hood, Flynn, Whiting.

Repairs of School Buildings.—Jones, O'Neil, Hood.

Rules and Regulations.—Cutler, O'Neil, Jones.

Salaries.—Poole, Whiting, Sanborn.

Supplies.—Sanborn, Poole, Miles.

Text-Books and Courses of Study.—Fiske, Cutler, Flynn, Whitaker,
Jones, Dickerman, Mrs. Attwood.

Vacation Schools.—Mrs. Attwood, O'Neil, Dickerman.

Note—The member first named is chairman.

MARTHA PERRY LOWE SCHOOL.

5.—ATTENDANCE IN DECEMBER.

Per cent. of valuation spent to maintain schools	0.517	0.535	0.018
Per cent. of valuation spent for all school purposes	0.642	0.661	0.019

School Buildings. During the last ten years eight small, primitive, wooden schoolhouses have been abandoned, eleven commodious, modern, brick buildings have been erected, and four houses have been enlarged. The following shows the expenditure for increased accommodations for the decade:—

1894.	Durell.....	4 rooms,	\$19,383
1895.	English.....	15 "	147,725
1896.	Hodgkins.....	12 "	60,764
1897.	Hanscom.....	6 "	42,032
1898.	Carr.....	15 "	62,125
1899.	Perry.....	6 "	37,612
1899.	Forster Annex.....	6 "	35,638
1901.	Baxter.....	6 "	32,309
1901.	Brown.....	6 "	36,868
1902.	Bennett.....	12 "	48,755
1903.	Lowe.....	8 "	50,343
1894.	Bingham.....	4 " added,	14,917
1894.	Knapp.....	4 " "	16,857
1896.	Glines.....	5 " "	26,610
1899.	Burns.....	4 " "	19,681
Total.....		113 "	\$651,619

This is certainly a splendid record for ten years. It shows not only the rapid growth and continued prosperity of the city, but also the public spirit, the generosity, the loyalty and devotion of the people of Somerville to the educational welfare of their children. Besides, during this time an expenditure of \$2,385,394 has been made for the maintenance of schools.

The contribution of 1903 to our school accommodations is an eight-room building on Morrison avenue, near Grove street. While its location is not ideal, the structure itself is modern, substantial, and admirably adapted to school purposes. The cost, exclusive of grading, walks, fences, etc., is as follows:—

Land, 21,650 feet.....	\$3,500.00
Building and furnishings.....	46,843.16
Total	\$50,343.16

Elevation and floor plans are given elsewhere.

At the request of the school committee, the board of aldermen named the new school after Mrs. Martha Perry Lowe, a citizen long conspicuous for her interest and activity in every work having in view the improvement and uplifting of the community. The following sketch has been kindly furnished by a life-long friend:—

Mrs. Martha Perry Lowe was born in Keene, N. H., November 21, 1829, and died in Somerville, Mass., May 6, 1902. Her parents were General Justus Perry and Hannah Wood. She was a descendant of William Wood, the supposed author of "New England's Prospects," who left England and settled in Concord in 1638.

At the age of fifteen she was sent to the noted school of Mrs. Sedgwick, in Lenox, Mass. After her graduation she spent a winter in the West Indies, and the following year was passed in Madrid with her brother, who was a member of the Spanish legation.

In 1857 Miss Perry became the wife of the Rev. Charles Lowe. Mr. Lowe died in 1874, and at the time of his death was a member of the Somerville school committee.

Mrs. Lowe was the author of several books of prose and poetry; the most noted ones are "The Olive and the Pine," "Love in Spain," and a "Memoir of Charles Lowe."

She was interested in many public and private philanthropies, but her chief interests were in the public schools. She was among the first to advocate the teaching of cooking and sewing, and at her suggestion a sum of money was raised for that purpose, which is still held until needed by the schools.

At the meeting of the Middlesex County Teachers' Association in Somerville she was invited to deliver a poem. She was one of the founders of the Educational Union in Somerville, one of whose duties was a regular visitation of the schools by its members.

She was a member of the Society of American Authors of New York, the Authors' Club of Boston, the Woman's Education Association, the Unitarian Church Temperance Society, an honorary member of the Castilian Club, of the Heptorean Club, of the Teachers' Annuity Guild, honorary president of the Woman Suffrage League, a director of the Massachusetts Suffrage Association, president of the Woman's Alliance of the First Unitarian Church, and a member of the Cambridge Branch of the Indian Association.

One who knew her well writes: Mrs. Lowe has been the most loved and respected of all the women in her home city. It was a prominence won, not by the blind serving of social conventions, but by loyally following truth and conscience. So true as friend and adviser, so noble as citizen, so eminent as a moral force was she, that the community in which she lived may well bow its head in gratitude for the blessing of her presence through so many years."

Additional School Accommodations. There are to-day 388 more children in our schools than there were a year ago. There are 641 children of the first grade on half-time in wards one, four, five and six, besides several overcrowded rooms in the latter ward. The completion of the Bingham enlargement March first will fully relieve the situation as far as wards four and five are concerned. There will still be 800 children to be provided for, including a normal increase of 400 in 1904. The call for new schoolhouses in Somerville is becoming monotonous, but it is unavoidable so long as our city continues to grow. One of these days the supply will overtake the demand and there will be a respite. Let us consider present requirements somewhat in detail.

High Schools. The present membership of the Latin school is 406, an increase of 36 over last year. Two quite acceptable additional recitation rooms have been provided on the lower floor by taking eight feet from the master's room and adding it to teachers' rooms on the westerly side. Two additional teachers have been employed, making the present number thirteen, and giving 31.2 pupils as an average number to each. This number is altogether too large. Facilities should be furnished for at least three more teachers if the standard class unit of twenty-five is to be reached. And even with this increase, the head master would be obliged to curtail his supervisory work to engage in regular class instruction. The relief afforded by the extra rooms is temporary and wholly inadequate. All the arguments so often presented for a new building for this school still have full force. Each year of growth increases the urgency of the demand, and renders the attainment of satisfactory results more and more difficult.

Conditions in the English school are but slightly changed. Seven hundred and fifty-one pupils are at present enrolled as compared with 778 a year ago. The same contracted, unsuitable quarters are in use; there is the same congestion of various departments; there exists the same impossibility of the extension of work or even the satisfactory accomplishment of all that is undertaken. It is needless to reiterate what has been so often said regarding the pressing demands for better accommodations. The need is admitted on all sides, the only difference of opinion being as to the best way of securing what is needed. During the year, in the committee and in conferences with the city government, the whole subject has been discussed in all its phases. As to the necessity of increased accommodations there has been substantial agreement. As to the best way of securing them opinions have differed.

During the many discussions that have been held, four prominent plans of relief have been suggested. I mention them in the order in which they have been made, that all interested may know about them.

1. The addition to the English building of two wings connected by an assembly hall.

2. The construction of a new Latin building to be located east of the present structure, which in such an event would be occupied by the English school.

3. A comprehensive plan that provides for a new Latin building east of the present one, and the addition of a wing on the northeasterly corner of the English school, the two new structures to be connected by a building containing an exhibition hall and other rooms to be used by either school as necessary.

4. It has been suggested that the present English building might be occupied by the Latin school, and a new building constructed with an easterly frontage in which the present Latin building should be incorporated, the new building extending toward the front and rear as might be found necessary.

The financial side of the problem need not be here discussed. Suffice it to say that the future may well be asked to share with the present the expense of an undertaking from which both alike profit.

Ward One. There are still one hundred first-grade children on half-time in this ward. This is made necessary by the occupation of the needed room by the Hanscom kindergarten. Whatever may be said for or against half-time sessions it is certain that most parents prefer to have their children attend school all day. On the other hand patrons of the kindergarten protest strongly against its suspension.

The Hanscom schoolhouse was planned with the definite expectation of its enlargement by the addition of two rooms. This could be done with the minimum of expense, and would meet

the imperative needs of this section of the city. Such enlargement is strongly recommended.

The twelfth room in the Bennett school will probably be occupied in September next, thus justifying the construction of a twelve-room building in that section.

Wards Two and Three. There has been a small increase in the school population of these wards during 1903 according to the school census, but the six existing school buildings afford ample accommodation at present for all who wish to attend the public schools.

Wards Four and Five. The original recommendation of the board for a six-room addition to the Bingham schoolhouse was subsequently modified by a request for an eight-room enlargement with a view to housing pupils living in the Murdock-street district, and now attending the schools of ward six. This request was honored by the city government, and eight additional rooms will be ready for occupancy probably by the first of March next. Of the sixteen rooms then found in the Bingham plant, ten will be occupied by the children already there. Four others will be filled by classes now in the Forster, which were organized in September with this transfer in mind. Of the two rooms remaining, one will be used in September for kindergarten purposes, and the other will be crowded with new first-grade children. This with transfers from ward six schools will fill every available seat in the building. It is doubtful, however, whether these accommodations will long suffice, for no building can graduate forty at the top and receive one hundred at the bottom each year without soon overflowing.

Two of the four rooms vacated by transfers at the Forster are in the basement of the annex. They were designed for industrial-education purposes, are unsuitable for classrooms, and should remain unused unless occupied as originally planned. The third room of the four will at once be used by a first grade now on half-time, while the remaining room will remain vacant until September, when the transfer into it of a class from the Glines will relieve the half-time conditions in that school.

Ward Six. This is the largest ward in the city. Its schools contain more pupils and more teachers than those of wards two and four combined. Its schools are more urgently in need of relief from overcrowding than those of any other ward. They receive pupils from wards two, three, and five. In this respect they are not exceptional. Many of our schools are located on the border lines between wards, and of necessity receive pupils without reference to ward lines. A conspicuous example of this is the Brown school. This school was established three years ago in response to an urgent call from ward seven for additional school accommodations. It was wisely placed in the centre of a rapidly growing district. It was built on the ward six side rather than on the ward seven side of Willow

avenue because land free from rocky ledge could be had there at less price. The territory that it accommodates lies half in one ward and half in the other, and its pupils must of necessity come from both wards.

In the Carr, Morse, and Burns, three hundred first-grade pupils are on half time, and in the Durell and Morse, three extra teachers are employed in overcrowded classes. Some relief must be at once afforded.

The recommendation of last year that a six-room building be constructed on the Standpipe lot on Spring Hill is here renewed. The location is in the centre of the district to be accommodated. It would relieve the three crowded schools and allow room for future growth. The lot on Hudson street in the rear of the Armory is not as favorable a location for two reasons. First, it is situated in ward five rather than in the ward that needs relief. Secondly, it would naturally draw pupils from the Forster school, which will be relieved of any danger of overcrowding by the opening of the Bingham enlargement.

Ward Seven. The Martha Perry Lowe school was opened and filled at the beginning of the current school year in September. To it were sent all primary pupils from the Highland and Hodgkins with the exception of fifty first-grade pupils left in the latter school. All pupils of the Brown school living in ward seven were removed and sent either to the Lowe or the Highland, leaving in the Brown children from one-half of its natural district. This concentration of primary pupils instead of distributing them in buildings more conveniently located is a reversal of the general plan.

This new building affords but temporary relief to the ward. The Lincoln school is even now so large as to demand the services of an extra assistant. In September the Lowe school will graduate one class and will receive three classes, one second-grade class from the Hodgkins, and two first-grade classes of beginners. The Highland school will graduate two classes and receive three classes from its natural feeders. This makes three surplus classes to be accommodated in September next within or without the ward. The Brown school is easily accessible for this overflow. The building is not, however, large enough to accommodate all pupils who would naturally be sent to it even after it has made its contribution to the Bingham enlargement. This building was planned with especial reference to a four-room addition. This can easily be made at a minimum of expense, and will furnish ten rooms, and give us an additional grammar-school centre with nine grades in a locality which will very soon imperatively demand it. I recommend that the Brown school be at once enlarged by the addition of four rooms.

To recapitulate our needs in the order of their urgency:—

- 1, A new building for high school purposes.

2. A six-room building on the old Standpipe lot in ward six.

3. An addition of four rooms to the Brown school on Willow avenue.

4. The addition of two rooms to the Hanscom school in ward one.

School Census. In conformity with the laws of the state, enumerators were employed between September 1 and November 15 to ascertain the number of children between five and fifteen years of age resident in the city on the first day of October, 1903, and to record the full name, the date of birth, the age, the place of residence, the name of father or guardian, the school attended or reasons for non-attendance, and the number of illiterate minors. It may be well by the way to correct a wrong impression that the legal school age is between five and fifteen, and that the city is obliged to provide school accommodations for all such children. The fact that years ago the income of the state school fund was distributed among towns in proportion to the number of children between these ages resident in each town may have given rise to the impression. There is no statute affecting the age at which children may attend school. This matter is left optional with school committees. The only absolute requirement is that all children between the ages of seven and fourteen must attend school during the entire time that the schools are in session. An inexcusable absence of five days within any six months subjects the parent or guardian to prosecution and fine. Illiterate minors over fourteen years of age who are at work are required to attend evening schools under penalty laid upon such employers as neither insist upon such attendance nor discharge the delinquent employees. Minors between the ages of fourteen and sixteen must either attend school or be at work. Otherwise they are "habitual absentees" and may be proceeded against as if truants.

It is difficult to take a census of school children with absolute accuracy. Absence from home, the difficulty of communicating with non-English-speaking foreigners, changes in residence while the census is being taken, and a disposition on the part of some suspicious persons to withhold information are obstacles in the way. All possible care, however, is exercised by the enumerators. The following are the returns:—

	1903.	1902.	Change.
Ward 1.	1,780	1,701	+79
“ 2.	2,533	2,436	+97
“ 3.	947	936	+11
“ 4.	1,006	1,037	—31
“ 5.	1,881	1,880	+ 1
“ 6.	1,875	1,829	+46
“ 7.	1,400	1,384	+16
Total	11,422	11,203	+219

These returns as compared with those of 1902 show a loss of 31 in ward four and an increase in all the other wards, aggregating a net gain throughout the city of 219 children. On the first of October perfectly reliable returns from the schools showed an increase of 302 children as compared with the corresponding date last year. This difference of 83 is attributable to causes indicated above.

The most reliable basis for comparison to show the growth of the schools is their membership in December, the month of high water mark. In December, 1902, the schools contained 10,969 children; in 1903, the membership was 11,357. This indicates a gain during the year of 388 children. The increase in the membership of the schools for the last ten years is shown below:—

Year.	Membership.	Increase.
1894	7,649	
1895	8,191	532
1896	8,705	514
1897	9,078	373
1898	9,637	559
1899	10,075	438
1900	10,365	290
1901	10,642	277
1902	10,969	327
1903	11,357	388
Total increase.....		3,708
Average increase.....		412

Length of School Year. The statutes provide that the city shall maintain elementary schools for at least thirty-two weeks in the year, and a high school for forty weeks. For many years school vacations have been so arranged as to give all our schools a theoretical year of forty weeks. There have always been interruptions and losses from legal holidays, stormy weather, the extension of vacations by the board at Thanksgiving, Christmas, and at the end of the school year, by teachers' conventions, and the dismissal of schools on special occasions. The table below shows what the losses have been from these various causes during the last six years:—

	1898.	1899.	1900.	1901	1902.	Average 5 years.	1903.
No. of sessions in the theoretical school year	400	400	400	400	400	400	400
Lost — legal holidays	10	10	14	14	10	11.6	10
“ stormy weather	11	8	4	10	6	7.8	9
“ extension of vacations	11	10	11	11	12	11.0	22
“ Teachers’ Association	2	2	2	2	2	2.0	2
“ special occasions	1	0	0	2	0	0.6	2
Total	35	30	31	39	30	33.0	45
Actual school sessions	365	370	369	361	370	367	355

It will be seen that the average loss for the five years preceding 1903 has been thirty-three sessions, or three weeks one and one-half days. This year, owing to the fact that the second Monday of September comes at the latest possible date, an extra week has been lost, the schools having kept but thirty-five and one-half weeks. This average loss of eight per cent. of the year becomes a serious matter unless it is inevitable and without remedy or compensation. By general admission much more is required of the schools now than formerly, and yet there has been a loss rather than an increase of the time available for its accomplishment. There is, perhaps, no avoidance of loss of time from legal holidays. It may be an open question, however, whether the schools might not profitably keep on Washington’s Birthday and on Patriots’ day. There are no local celebrations to distract attention. School exercises in commemoration of the Father of his Country and of the heroism of the patriots, now held on other days, might be relegated to the holidays with a gain both in time and in the impressiveness of the lessons taught.

The loss of time resulting from “excessive heat or cold or severe storms” demands consideration. The ringing of the storm signal is the most perplexing and difficult duty the superintendent has to perform. On the one hand the danger of exposure of children to the inclemency of the weather, and on the other the loss to school work send the balances up or down. I am governed in the discharge of this duty by weather conditions at the hour appointed for striking the signal. If mistakes are made they come from inability to see far into the future. In the “good, old days,” and even now in very many localities, storm signals were and are unknown. Children were accustomed to face the elements and inured to exposure. The signal is doubtless rung on some days when nearly all pupils in the grammar schools could attend without endangering health. There are many days when the signal is not struck on which the superintendent’s tele-

phone is kept in active operation by disappointed inquirers as to schools' keeping, some of whom do not hesitate to reprimand him for neglect of duty.

It is doubtful whether the loss of a day on account of the annual meeting of the Middlesex County Teachers' Association is justified by the advantages resulting. The expression of opinion by the board that this convention should be held on a Saturday made no impression upon the association. This day may very properly be saved to the schools.

As to the extension of vacations, a day and a half may well be taken before and after Thanksgiving, and a half-day before Christmas. All other extensions are avoidable.

Schools began this year on the fourteenth of September. Six hundred pupils did not enter until the twenty-first and many delayed their return until October. It is probable that it would be difficult to fix a date for the fall opening of schools on which all pupils would begin work. The schools of Boston and Cambridge begin on a Wednesday. This gives three days in the week for the distribution of books and supplies and the organization of classes, and enables pupils to get down to solid work on the following Monday. This day for beginning the fall term seems an excellent one, and no substantial argument suggests itself against its adoption by us.

I venture to raise the inquiry whether it is not possible for us to lengthen the school year practically two weeks by extending the afternoon session a half hour during the five months of longest daylight. Children are now in school on the average 871 hours, less than a tenth of the year. If those exercises which less severely tax the strength of the pupils should engage the closing hour of the session no strain would be imposed that the normal child would be unable to bear. The suggestion is worthy of consideration.

In this connection it may be well to remark that the schools passed through the "coal famine" without the loss of a day on account of scarcity of fuel, thanks to the energy and foresight of Mayor Glines. One or two schools were frequently dismissed during the winter on account of cold rooms caused by janitors' neglect. The month of June was cold and sunless and fires were necessary for health and comfort. This abnormal condition of the weather, however, was not anticipated, and so the boilers in many of the buildings were dismantled and no heat was available. Several of the schools lost from three to ten sessions on this account.

School Attendance. Every teacher keeps two enrollment lists; one, for state officers, records the name of every pupil who has attended a school in this city for any length of time during the year, provided he has attended no other school in the state. The other list records the names of those pupils who have attended no other school in Somerville during the year. Accord-

ing to this latter list, 13,475 pupils have been enrolled in the city during 1903.

Not all of these pupils have been connected with the schools at one time. According to the rules of the state department of education a pupil's membership is terminated (1) by death; (2) by removal; (3) by withdrawal with no intention of returning; and (4) by ten consecutive days' absence from whatever cause. Excluding from the enrollment lists names dropped for any of these reasons, we reach the average membership of the schools, which for 1903 is 10,719, an increase for the year of 317. This average membership is important because it furnishes the basis for estimating the per capita cost of instruction.

The average attendance of the schools is determined by taking into account all absences from whatever cause during the period of membership. It shows the number of pupils who are in school on the average every day of the school year. The average attendance for 1903 is 10,056, an increase over last year of 326. The average attendance is 93.9 per cent. of the average membership, showing a loss of 6.1 per cent. occasioned by illness or other causes in most cases providential or unavoidable. The state recognizes the importance of regular attendance of children of the compulsory school age by providing for the prosecution and punishment by fine of any parent or guardian who keeps a child under his charge out of school more than five days within any six months. There have been infractions of this law in Somerville, but no prosecutions. Many children are kept out of school at the opening of the year, or are withdrawn near the close, and now and then a parent is found indifferent to the interests of his child who allows his absence for trifling reasons. As has been said before, the school year is very short. Every absence necessarily affects the progress of the child. The best results are obtained when every pupil is present every day from start to finish.

During the year there have been 3,428 cases of tardiness, which shows one instance of being behind time out of 1,013 chances of being prompt. As compared with other cities, and indeed with our own past records, this number is not large. Nevertheless, the responsibility for tardiness rests upon parents generally, and much of it is avoidable. Teachers use all legitimate means to secure regularity of attendance, and sometimes in their zeal bring influences to bear that are not wholly warranted.

In 1903 there have been 1,969 instances of parents requesting the dismissal of their children from school before the close of the session, one case in 1,764 opportunities.

In these days of pressure every moment of the school days should yield its full value. Some schools waste or misuse ten minutes daily. This is the loss of a week per year. In some buildings the majority of pupils will be found at their desks and at work fifteen minutes before the hour. They gain two weeks

of time annually in this way, besides being freed from exposure to the frequently pernicious influences of the playground.

In the ideal school every moment is utilized. The teacher comes early; her own preparation of the day's lessons has been previously made; every exercise has been planned; ink, paper, pencils, books,—everything is in its place ready for methodical distribution; promptly on time the doors are opened and pupils are seated and begin work, the blackboard furnishing ample directions; with the stroke of the clock school is opened; each exercise begins and ends at the appointed time, and has a well-designed object in view; the transition from one line of business to another is quickly and noiselessly made; there is no delay, no dawdling, no hurry. The silent influence of such a school for good is incalculable. Why should it be exceptional save that it requires energy, system, life, tact, ability in the teacher?

On the fifteenth of December, the number of pupils in the schools was as follows:—

In the Latin school.....	406
In the English school.....	751
In the elementary schools.....	10,000
In the kindergartens.....	200
A total of.....	<hr/> 11,357

Adding to this number the 1,708 pupils in private schools, we have 13,065 school children in the city.

Teachers. There are now 299 teachers regularly employed in the city, twenty-five men and 274 women. This does not include forty-four at present at work in evening schools, nor seven third assistants temporarily engaged. There were 369 names on the November pay-roll, including substitutes.

During 1903, twenty-one teachers have resigned. Three of them, Misses Blood, Damon, and Wilder, relinquished teaching altogether after a long and faithful service of twenty-one, twenty-four and twenty-nine years, respectively. Two left us on account of ill-health. Three others accepted positions at larger salaries, while the somewhat unusual number of thirteen resigned to be married. Excluding the three teachers mentioned, the average term of service of the remaining eighteen was only four years. Among the teachers who left us during the year were some of the very best in our corps, teachers whose service has been especially profitable not only in their influence and success within their own schoolrooms, but also in the stimulus their example gave to others. Such teachers it is difficult to replace.

Twenty-six teachers have been elected during the year, either to fill vacancies or for newly-established schools. In their selection, our long-established custom of securing the best teachers to be found for our maximum salary has been followed. Only thus can our losses be made good and our standards maintained. With two exceptions, these new teachers have had a

long and successful experience, and were ranked among the very best in the places they left. What I said in my report for 1894 concerning teachers every year's experience since then has most emphatically confirmed, and I repeat it here:—

How to secure and retain the best teachers is the perpetual and perplexing problem upon whose solution depends the success of all our efforts in education. The teacher is the heart and soul of the school. Upon her depend its life and power. In exact proportion as the teacher lacks high moral character, the power of personal influence, refined taste and manners, good scholarship, and thorough professional training, the school fails to accomplish its purpose. Given these qualities, and the highest success is certain, irrespective of material surroundings. We can get along with poor or crowded buildings, with meagre or ill-adapted appliances, with enriched or impoverished courses of study, but good teachers are indispensable.

It is interesting to note that of our present corps of 306 teachers, only eighty-four were in service ten years ago. During the last decade 294 teachers have been chosen and elected, 173 have resigned, and three have died. Of those that have resigned, twenty-three have retired from teaching for rest or other employment. Ill-health has caused sixteen resignations. Marriage has taken off seventy-four, while seventy have been drawn away by the attraction of larger salaries. Of the latter class, Boston has taken eighteen, the normal schools, eleven, Brookline, eight, Newton, four, and twenty-eight have gone to fill more attractive positions as principals or teachers elsewhere in New England. We have retained the services of five teachers now in the high schools by a slight increase of salaries, but the expected retention of teachers in competition with other cities by the general increase made three years ago has not been realized. We have lost the same relative numbers since the increase as before. These facts are given not only as information, but to show that in the future we may expect to lose about seven per cent. of our teaching force annually, four-fifths of whom will be drawn away in nearly equal numbers by the attractions of wedded life or larger incomes.

Latin School. This school now has a membership of 406, as against 370 a year ago. It is divided as follows:—

	1903.	1902.	Change.
Freshman	121	125	—4
Sophomore	106	97	+9
Junior	95	88	+7
Senior	84	60	+24

Allusion has already been made to the addition of two recitation rooms and to the consequent employment of two additional teachers, making the number now in the school thirteen, and giving an average of thirty-one pupils to a teacher, including the head master, who conducts recitations on ten of the twenty-five weekly periods. One of these new teachers is a graduate of the Somerville high school, with college training at Radcliffe and Dartmouth, and six years' high school experience at Concord,

N. H. The other is a Wellesley graduate of long and successful experience in the Dedham high school.

Any attempt here to set forth anew the limitations and needs of this school and the advantages of a lengthened course would be stale and unprofitable. The growth of the school only emphasizes the demand for suitable accommodations, and the early solution of a perplexing but important problem will secure facilities for making its work most effective.

The school graduated a class of forty-six in June. Thirty-six of the senior class are now pursuing advanced courses of instruction.

* Gain.

Number of students in the different departments in the Latin high school since September:—

English	414	Latin	414
History	219	French	115
Mathematics	414	German	163
Science	65	Greek	103

English School. The present membership of this school is 751, as against 778 one year ago. The classes number as follows:—

	1903.	1902.	Change.
Freshman	252	250	+2
Sophomore	190	214	—24
Junior	180	147	+33
Senior	112	151	—39
Special	17	16	+1

There are thirty-one teachers, exclusive of the head master and secretary. The average number of pupils to a teacher is 24.2. The head master meets all pupils for one period a week, but otherwise has no regular class work. The secretary does no teaching, being constantly occupied with other duties. The number of regular teachers is one less than last year, the place of

Mr. Leonard, away on leave of absence for a year, not having yet been filled.

There were 135 in the graduating class, of whom twenty-four are now pursuing advanced courses in other institutions.

Nothing has been done during the year to relieve the congested conditions which have so long handicapped this school and rendered the accomplishment of its best work extremely difficult, if not impossible. Two-thirds of all our high school students, deprived of farther educational advantages, depend upon this school to complete their academic training. They enter upon the activities of business life when they graduate. Their equipment should be the best we can furnish. It is excellent in many respects even now, but a wider range of subjects and an extension of courses would much improve it. But it is needless to enlarge on a question already often fully discussed. Each year doubtless brings us nearer the attainment of ideal conditions in our high schools, but delays, while they may save money, entail losses of opportunity that are remediless.

One new teacher has been added to the corps to fill the vacancy caused by the resignation of Miss Seaver, Nina A. Cummings, the first graduate of the school to occupy such a position.

The following tables show the number pursuing each subject of the curriculum since September, and the annual losses of various classes:—

English	784	Mechanical drawing	218
History	677	Freehand drawing	381
Mathematics	554	Commercial	159
Science	556	Stenography	295
Latin	107	Elocution	774
French	273	Manual training	160
German	137

Grammar and Primary Schools. The membership of these schools December 15 was 10,000. In the table which follows, the distribution of the number among the grades is shown. To indi-

cate changes, the percentage of distribution in all the grades, including the high schools, as recorded ten years ago, is also given:—

DISTRIBUTION OF PUPILS IN GRADES.

Grade	1903.		Percentage.		Change.
	1903.	1894.	1903.	1894.	
Grade 1.....	1,651	1,384	14.8	18.1	—3.3
“ 2	1,349	984	12.1	12.9	—0.8
“ 3	1,270	847	11.4	11.1	+0.3
“ 4	1,182	834	10.6	10.9	—0.3
“ 5	1,155	824	10.3	10.8	—0.5
“ 6	1,134	668	10.1	8.8	+1.3
“ 7	964	590	8.6	7.7	+0.9
“ 8	751	458	6.7	6.0	+0.7
“ 9	544	398	4.9	5.2	—0.3
“ 10	373	261	3.4	3.4	—
“ 11	296	177	2.7	2.2	+0.5
“ 12	275	130	2.5	1.7	+0.8
“ 13	213	94	1.9	1.2	+0.7
Total	11,157	7,649			

It will be seen from these figures that there are relatively fewer children in the five lower grades, while the number in the sixth, seventh and eighth grades has increased. There are fewer in the ninth grade, the number in the freshman class in the high school is proportionately exactly the same, and there has been a relative increase in the three upper classes of the high schools. It is encouraging, then, to notice that pupils are passing more quickly through the lower grades, and are remaining in larger numbers in the higher grades of the grammar and high schools.

The grammar schools graduated 484, of whom 354, or seventy-three per cent., entered the high schools, 112 going to the Latin and 242 to the English.

The numbers in the class as it has passed through the grades are as follows:—

	Loss.
December, 1897, fourth grade.....	964
December, 1898, fifth grade.....	950
December, 1899, sixth grade.....	860
December, 1900, seventh grade.....	756
December, 1901, eighth grade.....	616
December, 1902, ninth grade.....	513
June, 1903, graduates.....	484

It will be observed that more than one-third of the class dropped out between the sixth and ninth grades. This ratio of loss has been so often observed that it may be confidently expected that one-half of every fourth grade will leave school shortly after passing the compulsory school age.

There has been no increase in the number of grammar school graduates for three years, a fact which shows either that larger numbers are leaving school for business, or that the standard for passing from one to another of the higher grades is growing more rigid. The number of employment certificates issued to

children fourteen or fifteen years of age for the last five years is as follows:—

1899	162
1900	171
1901	176
1902	205
1903	243

The increase is disproportionate to changes in population. Possibly the labor laws are more strictly enforced. Whatever influence this factor may have in diminishing the number of grammar school graduates, a study of the promotion table found elsewhere will show that thirty per cent. of the seventh-grade pupils and twenty-eight per cent. of those of the eighth grade were either promoted conditionally or held back altogether in June of this year. This number seems unduly large. Pupils become discouraged under these conditions, and probably many drop out of school who would otherwise remain.

In connection with the expediency of the half-time plan in the lowest grade, I find that only twenty-one and one-half per cent. of first-grade children on full time were left behind to repeat the year, as against twenty-nine per cent. of the half-time children, a difference of seven and one-half per cent. in favor of the all-day session. In the second grade the same difference is noticeable, although not quite as marked, seventeen per cent. of the children on half-time the previous year being held back, as against eleven per cent. of full-time children. These facts indicate a distinct loss by the half-time plan, and weigh in favor of giving all children a full school day.

As showing the changes in membership that are constantly occurring, the following facts are interesting:—

Number entering from schools outside the city.....	1,348
“ “ first grade.....	1,171
“ that were graduated.....	665
“ that left school to go to work.....	243
“ that left school by removal from the city.....	1,223
“ of transfers from one school to another in the city,	2,194

Kindergartens. Four kindergartens have been maintained during the year in the Hanscom, Bennett, Baxter and Glines schools. The cost of instruction has been \$3,927, and of supplies, \$98.93. The per capita cost, based on the average membership, has been \$21.08.

There is an urgent demand for kindergartens in other parts of the city by people who recognize their advantages. It seems better, however, to forego these advantages, rather than to deprive older primary children of full-time sessions. A fifth kindergarten will doubtless be opened in the Bingham school when completed, and the system will be extended to all parts of the city whenever suitable accommodations for all are provided.

The following table shows facts in detail:—

	Hanscom.	Bennett.	Baxter.	Glines.	Total.
Enrollment	103	101	97	101	402
Average membership	48	50	45	48	191
Average attendance	44	39	38	41	162
Per cent. attendance	91.3	78.0	83.8	86.4	84.7
Age	4—8	4—7	4—9	4—7	4—8

Evening Schools. In the elementary schools the season of 1902-1903, extending from October to April, was, on the whole, the most satisfactory in our experience. Seven hundred forty-one students from fourteen to sixty years of age attended a portion of the time. Only 251 of them, or thirty-four per cent., attended all the time. This was only a slight increase in regularity, as compared with the previous season. This comparatively small attendance shows the crowning difficulty that the evening schools present. We have thus far found no way of retaining all the pupils who enter. Irresolute of purpose, they are drawn away, many of them quite early in the season, by other and to them stronger attractions. The attendance by months is as follows:—

October, 384	December, 223	February, 176
November, 320	January, 206	March, 123

The Prescott and Bell schools were kept ninety-six sessions, and the Highland and Forster seventy-seven sessions each. The latter two schools were closed the last of February, owing to the smallness of the numbers in attendance. The cost of these schools was a trifle less than last year, being \$0.279 per pupil per evening, or about fourteen cents an hour for each pupil in attendance. The cost per pupil per hour in the elementary day schools is about three cents.

In the evening drawing school 178 different students were enrolled, seventy-eight, or forty-four per cent., of whom attended on each of the forty-seven sessions. The attendance by months was:—

October, 109	December, 61	February, 65
November, 92	January, 71	March, 68

Although the number of pupils in February was forty-four less on the average than in October, the same number of teachers was employed. The forty-eight pupils that began in October and dropped out before the end of December received practically no profit whatever from the expensive instruction that was given them, and should have been excluded altogether. Some means should be devised, if possible, to secure continuous attendance from those who enter.

VACATION SCHOOL WORK.

and Lynn alone are without them. I recommend that such a school be opened in one of the high school buildings another year.

The following table shows the principal facts concerning evening schools for 1902-1903. Details may be found in the Appendix.

EVENING SCHOOLS.

	Elementary.		Drawing.		Total.

Vacation School. In January last the school board expressed its conviction that the vacation school in Somerville had ceased to be an experiment by adding to its list of standing committees one whose duties would be to manage such schools. Mrs. Attwood and Messrs. O'Neil and Dickerman constituted this standing committee.

All furniture having been removed from the Prospect Hill schoolhouse, the sessions of the vacation school were held in the Bell school. Here ten classes, composed of children from second to seventh grade, were organized, each holding a two-hour session between eight and twelve. Four hundred eighty-eight children were enrolled. Nineteen different day schools were represented, as shown below:—

Prescott,	1	Bell,	64	Brown,	3
Davis,	4	Cummings,	5	Durell,	4
Bennett,	20	Edgerly,	2	Morse,	39
Knapp,	40	Glines,	3	Lincoln,	2
Perry,	25	Forster,	10	Parochial,	40
Baxter,	12	Bingham,	98		
Pope,	24	Carr,	92	Total,	488

The attendance for each of the five weeks between July 13 and August 14 was 365, 357, 310, 273, 261. This shows a loss of 104 in the average attendance during the five weeks. Seventy-three children did not lose a session, and 131 others lost but one session. The school was under the efficient management of Harry F. Hathaway, aided by six experienced teachers from our regular corps. To the work of last year, consisting of wood working, cardboard construction, drawing, cutting, painting, weaving raffia, scrapbook making, and sewing, were added

basket making, crocheting, and weaving with raffia and worsteds on small looms. The children were absorbed enthusiastically in the work, rendering restraint and discipline needless.

The design of the school was not fully accomplished this year in that it failed to reach the poorer class of children, most of whose vacation life is spent in the streets. This was probably due to the location of the school outside of the centres to be benefited. It will probably be found better another year to divide the school, holding sessions at the Bennett, Perry, and Bingham school-houses. This would somewhat increase the expense, but the benefits will be commensurate. At least one thousand dollars should be appropriated this year for vacation school expenses. The cost and attendance of the school are shown below:—

	1901.	1902.	1903.
Appropriation	\$500.00	\$500.00	\$500.00
Paid teachers.....	\$405.00	\$427.50	\$377.50
Paid for supplies.....	99.26	123.43	162.64
Total	\$504.26	\$550.93	\$540.14
Average attendance.....	317	365	311
Per capita cost.....	\$1.59	\$1.51	\$1.73
Number of classes.....	10	12	10

Cost of the Schools. The total amount spent in the maintenance of the schools of Somerville in 1903 is \$304,945.81. This does not include the sums spent on schoolhouse repairs and for new buildings. It does cover first the amount paid for the care of school buildings, for janitors' services, and fuel and light. With this expenditure the school board has nothing to do, it being wholly in charge of the commissioner of public buildings, who hires janitors and fixes their salaries.

The amount paid for janitors is.....	\$21,041.74
The cost of fuel is.....	18,052.46
The cost of gas and electric light and power.....	2,015.30
A total of.....	\$41,109.50
The cost per capita.....	\$3.84

The fuel bill for 1903 is much larger than usual, owing to the high price of coal during the early part of the year. The expense for light is largely chargeable to evening schools, and also includes power used in running electric motors at the English high school and at the Glines.

The second important expenditure is wholly under the control of the board, and is covered by what is known as the "School Contingent" appropriation. The following are the chief items:—

Officers' salaries.....	\$4,800.00
Books	\$8,236.42
General supplies.....	3,953.73
Laboratory and manual training supplies...	1,747.98
Printing	1,032.98
Graduation exercises.....	1,178.16
Drawing supplies.....	1,003.53
Bookbinding	828.32
Truant officer's horse.....	240.00
Express and postage.....	200.00
Board of truants.....	629.29
School census.....	272.38
Telephones	194.89
Miscellaneous	1,355.02
	<hr/>
Total for school supplies, etc.....	20,872.70
	<hr/>
Total outlay on school contingent account.....	\$25,672.70
Estimate of the committee.....	25,000.00
Appropriation	24,000.00
Deficiency as compared with appropriation.....	1,672.70
Deficiency as compared with estimate of committee.....	672.70
Received for damage to school property and tuition of non-residents.....	133.86
Net deficiency.....	538.84

This deficiency is caused by an unusual expenditure for books, owing to the reorganization of the Highland, Hodgkins, and Bingham schools.

The third and by far the largest element of the cost of schools is the sum spent for the salaries of teachers. The following shows the monthly payments:—

January	\$23,959.22
February	23,753.39
March	23,683.33
April	22,928.02
May	22,918.22
June	22,326.29
August	377.50
September	23,322.10
October	24,807.36
November	24,861.99
December	24,726.19
	<hr/>
Total	\$238,163.61
Estimate of committee and appropriation.....	238,000.00
Deficiency	163.61

The total outlay for all purposes in 1903 is as follows:—

Teachers' salaries.....	\$238,163.61
Administration	4,800.00
Care of schoolhouses.....	41,109.50
School supplies.....	20,872.70
	<hr/>
Total for school maintenance.....	\$304,945.81
Paid for repairs.....	12,260.90
Paid for new buildings.....	59,822.15
	<hr/>
Total for all school purposes.....	\$377,028.86

Each dollar of the sum spent for the support of schools has been divided in the following proportion:—

	1900.	1901.	1902.	1903.
Teachers' salaries.....	\$0.799	\$0.790	\$0.800	\$0.781
Administration	0.018	0.017	0.017	0.013
Janitors' salaries.....	0.074	0.071	0.073	0.070
Heat and light.....	0.048	0.055	0.042	0.067
School supplies.....	0.061	0.067	0.068	0.069
Total	\$1.000	\$1.000	\$1.000	\$1.000

Per Capita Cost. The best way of comparing the cost of the schools year by year is by considering their cost for each pupil in the average membership. The following table shows

PER CAPITA COST FOR 1902 AND 1903.

	High Schools.			Grammar and Primary Schools.			All Schools.		
	1902.	1903.	In-crease.	1902.	1903.	In-crease.	1902.	1903.	In-crease.
Instruction	\$46 63	\$47 28	\$0 65	\$19 74	\$19 83	\$0 09	\$22 52	\$22 67	\$0 15
Supplies	5 10	5 32	0 22	1 49	1 56	0 07	1 86	1 95	0 09
Care	4 96	4 43	*0 53	2 98	3 77	0 79	3 19	3 84	0 65
Total	\$56 69	\$57 03	\$0 34	\$24 21	\$25 16	\$0 95	\$27 57	\$28 46	\$0 89

* Decrease.

From this table it will be seen that the cost of instruction in the high schools has been \$47.28, an increase of sixty-five cents per pupil. This is due mainly to the increase of salaries in the English school, in conformity to the schedule that adds \$100 annually to salaries of sub-masters until the maximum is reached. The per capita cost of supplies is twenty-two cents more than last year, being \$5.32. This is owing in part to the demand for new books in the English school, to replace those that have been discarded after seven years of use, and in part to the call for additional supplies in the departments of science and manual training. Of the \$6.53 per pupil paid for supplies in the English high, \$2.80 was for laboratory and manual training supplies, and \$3.73 for books and general supplies. The expense for care of buildings is \$4.43, fifty-three cents less than last year. This is because a portion of the year's coal bills is still unpaid. The net increase in the per capita cost of high schools is \$0.34, being \$57.03 for the year.

The per capita cost of instruction in the grammar and primary schools is \$19.83, nine cents more than in 1902. This is due to the employment of Professor Cone and to the unexpected increase in evening school expenditures. Supplies for these schools have cost seven cents per pupil more, owing to the unusual expenditures for the Highland and Hodgkins schools,

where several new upper-grade classes have been organized. The increase of seventy-nine cents in the sum paid for care of school buildings is to be charged to the Pennsylvania coal strike of 1902. The entire increase in the per capita cost of the elementary schools is ninety-five cents,—\$25.16 for the year. This includes evening and vacation schools and kindergartens.

For all schools in the city

The per capita cost in 1902 was.....	\$27.57
The per capita cost in 1903 was.....	28.46
	\$0.89

fifteen cents of which was for instruction, nine cents for supplies, and sixty-five cents for coal.

The salaries paid at the present time are as follows:—

2 men	\$3,000	1 man, 2 women.....	\$800
2 men	2,000	4 women	775
9 men, 2 women.....	1,900	15 women	725
4 men	1,700	4 women	700
2 men	1,650	200 women	650
2 men	1,500	9 women	600
1 man, 2 women.....	1,200	2 women	500
1 man, 1 woman.....	1,100	2 women	425
1 woman	1,050	2 women	400
7 women	1,000	3 women	350
1 man	950	4 women	275
20 women	900	1 woman	240

On this basis, the total salary list at present is \$236,115.

This does not include sums paid for evening and vacation schools and substitutes.

Stamp Savings. The system of stamp savings, introduced into the schools in September, 1902, by the Somerville Associated Charities, with the permission of the school board, was continued in operation throughout the school year, with results that were surprising to all concerned. The business transacted for the year is as follows:—

Received from sale of stamps.....	\$15,135.59
Received from sale of cards.....	156.53
Deposited in Somerville Savings Bank.....	8,069.85
Value of cards cashed.....	3,152.46
Number of bank books issued.....	2,000

It is difficult to estimate the advantages that have accrued and the lessons of thrift that these figures indicate. The fact that 2,000 children have been led to open an account with a savings bank is sufficient of itself to commend the plan and to justify much of the trouble that has been caused.

Business was resumed on the first of October, the same methods being employed. During the months of October and November there was a very noticeable falling off in the sale of stamps, as compared with the corresponding months of the previous year.

In 1902, sales of stamps for these months amounted to . . .	\$4,724.84
In 1903, " " " " " " " " " "	2,690.88

This diminution of forty-three per cent. in the business can be accounted for only on the ground that the novelty that at first attracted has worn off.

The conduct of the system, involving, as it does, the handling of \$15,000 mainly in small coins, has required considerable time and labor on the part of teachers. The great body of them have entered sympathetically into the work, believing that the end justifies the means. The services of everybody engaged are purely gratuitous. The zeal which heavily-burdened teachers have manifested in this direction is another evidence of the altruistic spirit generally found in large measure in those who teach.

Manual Training. It seems almost superfluous to mention this subject again in a Somerville school report. Three votes of the school board are on record authorizing the introduction into our schools of wood working for the boys and cooking for the girls of the eighth or ninth grades. Pressure for room for more urgent lines of work has three times postponed the consummation of the plan. Not only compliance with the statute, but also the benefits to be secured, should urge us to take advantage of what appears to be a propitious time to carry these votes into effect. There are rooms available for three manual training centres in the Prospect Hill, Forster, and Brown and Lowe schoolhouses. To suitably equip each centre would cost \$750, and the annual expense of maintaining all four would be about \$1,500.

The idea is still prevalent that the object of manual training in schools is to train mechanics, or cooks, or seamstresses. By no means. Any pursuit that has for its purpose to fit the pupil for some special life occupation is wholly out of place in public schools. Only such kinds of instruction should be given as are profitable to every child, whatever his future vocation may be. The true educational object of wood working is to cultivate the eye and hand in connection with mental training. Accuracy, precision, and perseverance are developed; good taste is cultivated; and respect and even a liking for manual labor and skill are engendered. Many a sluggish intellect has been roused into activity when called upon to direct muscular effort and labor intelligently.

The chief aim of instruction in cooking is by no means to teach practical cookery, though even this is worth the while. Intelligent teaching of all household duties, the sanitation of the home, the elementary facts of the chemistry and physiology of common foods, household economy, the diet for the well and the sick, promotes mental activity and furnishes as valuable training as can be got from arithmetic or grammar.

So, too, sewing is taught not simply to give skill with the needle, but to impart valuable educational lessons. The mental qualities of exactness, industry, perseverance, and good taste in regard to shape, fitness, color, and other aesthetic elements are worth development.

I trust the board will find it expedient at least to make a beginning in these lines of work.

In this connection it is worth while, also, to consider the advisability of introducing some form of raffia weaving or basket making or knife work for boys during the sewing hour, if nothing better can be done. Some kind of motor activity is needed to prevent the one-sided training of the faculties of the child. The avidity with which children in the vacation school engage in such occupations, and the skill they show, indicates that a need in their natural development is thus supplied.

Truancy. It is interesting to note that there is no more truancy in Somerville than there was fifteen years ago, when the number of school children was one-half as large. There were in 1903, 525 visits of truant officer to schools; 521 absences investigated; 152 cases of truancy; twenty-four truants arrested; nine sent to truant school; \$629.29 paid for board of truants.

In 1888 there were 164 cases of truancy. The cause of this decrease is to be found in the more vigorous method of dealing with truants. The establishment of the well-managed truant school at North Chelmsford, and the certainty that persistent offenders will be sent to it, has a deterrent influence. Nothing restrains crime like the prompt and impartial execution of the law. Embryo criminals, like the full-fledged, often mistake leniency for indulgence, and very quickly learn to place a fitting estimate upon promises of punishment. Severity in dealing with truancy is the greatest kindness to the offenders themselves and to the schools they corrupt. Due credit should be given to the efficiency of our single truant officer, whose vigilance has been an important factor in correcting the evil. Our use of the public telephones in connection with truancy has proved of great value.

Public Library and Schools. Ten years ago these two great agencies of popular education first came into alliance in our city, an alliance that has grown stronger and more productive of good year by year. There are few, if any, cities in the land in which these two institutions are in closer union. There are none in which the librarian is more studious of the needs of children or more ready to supply them. No library is more accessible, no trustees more generous, no attendants more courteous, no opportunities more extended. Ten years ago a few school children over fourteen years of age had library cards, and drew books from a meagre collection by title only. Now all children, irrespective of age, have access to a well-chosen and extended assortment of books, not a pernicious one in the number, on shelves in a room designed for them and devoted to their exclusive use. Then it was rare to meet a child in the library; now they are

found there by hundreds. Ten years ago the schoolhouses contained nothing but dry text-books. To-day there are 163 libraries, containing 9,042 interesting and instructive books adapted to all ages, distributed over the city in as many schoolrooms. Each schoolhouse is a branch library. Nor do these books gather dust. They are kept in circulation, and libraries are interchanged often enough to maintain interest and variety. Neither is it children alone that are benefited. Whatever books will aid teachers in instruction may be had in numbers for personal or class use. Books are constantly added by request of teachers as aids in either the professional or the practical side of their varied work. The value of all this is immeasurable. It is increasing the ability to read. It is fostering a love of reading. It is developing a taste for good books. It is a silent, but powerful, means of informing, educating, elevating. Its influence reaches far forward into the future of every child, an important element in moulding character.

More books and more reading impose additional obligations upon teachers in directing the choice of books and determining the formation of the taste and desire for what ennobles and enriches, rather than for that which merely amuses or entertains. No book at all is better than a bad book. Ignorance is better than misdirected learning. It is pleasant to feel that many teachers are taking advantage of their opportunities, and are doing all in their power to make books a blessing rather than a bane to those under their influence.

School Hygiene. Everywhere more and more attention is being given to whatever pertains to the health and physical well-being of school children. One-fifth of every city's population congregate daily in detachments of half a thousand each from all sorts of homes, and mingle freely together. No better scheme for carrying contagion could be devised. The sanitary condition of schools thus becomes a question of the health and safety of the public no less than of the individual, and demands utmost care and constant vigilance.

Hence the attention given in schoolhouse construction to ventilation, sanitation, and light. Hence the daily medical inspection of schools. (Paris has had it since 1833.) Hence the quarantining of children from infected homes and the examination of children's sight and hearing. Hence the tendency to revive the old-fashioned outdoor recess. Hence the much more frequent cleansing and purifying of schoolrooms, and the daily disinfection of books and pencils. Hence the re-covering of text-books and the discarding of the badly soiled. Hence the isolation of each child's clothing. Hence the rule in Chicago that every pupil absent four days, from whatever cause, must present a medical inspector's certificate of health. Hence every possible precaution and safeguard to secure ideal hygienic conditions.

Not only do we see all these negative efforts for the prevention of disease, but also equally general movements on the positive side, for the development of physical health and vigor. It is generally recognized that that education is defective which does not provide for distinct physical training in the daily programme. So we see all progressive cities employing directors of physical training with regular courses of scientific instruction. We see the twentieth-century schoolhouses equipped with gymnasiums for girls as well as boys, with baths and swimming tanks, with ample grounds for sports and recreation.

Along all these lines very little has been done in Somerville. Teachers are enjoined to watch vigilantly for signs of danger. The quarantine rules are strictly enforced. Nevertheless, within five years three of our largest schools have been closed for two, three, and four weeks, respectively, on account of scarlet fever or diphtheria. Medical inspection has been only discussed. All but two or three of our school buildings are in good hygienic condition. Very few of them, however, are as clean as a hospital, or a meeting house, or an average home. And yet during this year the schools have been largely free from interruption, save by children's diseases that periodically well-nigh break up primary classes.

On the positive side we are equally deficient. We have no gymnasiums, no school playgrounds, no scientifically directed course of physical training. Fourteen years ago, a supervisor of physical training was employed for a few months, and the Ling system of gymnastics set in operation in the elementary schools. After an interval of five years another supervisor was hired for five months, and a revival of interest resulted. Since then these exercises have been given regularly twice a day in nearly all grades. They have, however, become perfunctory and monotonous. Moreover, while they give a form of muscular exercise, they fail to furnish the relaxation from mental strain which children need at suitable intervals.

In the high schools there is no physical training of any sort. The need is becoming constantly greater as the courses become more exacting. But we have no facilities of any kind. For a few athletic sports, the track, baseball, football and questionable basket ball afford a substitute. But the many who most need the training can only sit by and cheer.

All sides of this important question should be investigated and discussed, and some reform instituted. If medical inspection is unwise or too expensive, if gymnasiums are not to be had, at least may we not follow the example of neighboring cities and employ a director of physical training to plan and execute a scientific system that will produce the results we seek?

Repairs of School Buildings. There is a committee of the school board having this matter in charge. It is a survival of the earlier times, when the school committee employed janitors,

determined the amount of fuel needed, and had full authority regarding school buildings. Since the change in charter placed all these matters in the hands of a commissioner of public buildings, this committee is only an "advisory committee." It makes annually a hurried visit of inspection to as many buildings as can be reached in a day, and turns over to the board the recommendations of principals with its endorsement, the matter being finally referred to the city government. The extent to which these recommendations are carried out is generally contingent on the amount of money available.

To keep a million dollars' worth of public buildings of any kind in proper repair requires a large annual outlay. This is more especially true when these buildings must be kept in perfect condition as to all forms of sanitation. This is the primary aim, to which other repairs are very properly subordinated.

It should, however, be borne in mind that schoolhouses are educational, not only in use, but in character. The school buildings of a city and their surroundings show the thrift and public spirit and aesthetic taste of its citizens. More than this, in their exterior as well as their interior, they are silent educators. If attractive and beautiful, they refine and elevate. It is for this reason they should receive constant care, not simply to keep them from falling into decay. Their adornment and beauty, as well as their comfort and cleanliness, are rights which the children may justly claim.

Most of our schoolhouses are in themselves a proper source of pride, but the surroundings of many of them neutralize this sentiment. The cultivation of a simple grass plot in front of the Cummings and of the Durell schoolhouses this year has added greatly to their attractiveness. Why should not school janitors take as much pains as railroad station agents with the grounds under their charge?

The importance of this side of the matter leads me to call special attention to certain urgent needs. I am aware that it is not possible to accomplish all we wish in a single year, but if effort is focused on a few things each year, before long all we wish may be attained.

1. The English high school is eight years old. Its walls have never been tinted. They are grimy and dust-stained. The enterprise of its pupils has provided \$2,000 for pictures and other decorations. Whatever else is done, the walls and ceilings of this building should be made worthy to receive them.

2. The Davis building needs a thorough interior renovation.

3. The limited yard of the Bennett should be curbed and concreted, and a brick walk should be laid about it.

4. Certain portions of the Knapp yard should be concreted, and the rear of the lot curbed. The interior of the building should be thoroughly renovated.

5. The space in front of the Baxter should be grassed over.

6. Curbing should be provided for the Perry school yard, a brick walk laid, the lawn should be put into condition, and flower beds made.

7. The interior of the Bell school is greatly in need of complete renovation.

8. The Carr school, in many respects the best building in the city, only needs to have the walls in rooms and corridors tinted to be made very attractive.

9. The walls in rooms and corridors of the Morse school should be colored.

10. The interior of the Highland school needs full renovation.

11. What has been said of the English school is true in part of the Hodgkins. All the walls and ceilings urgently demand attention.

I have thus in detail brought these matters before the committee, that its influence may be enlisted early in the year in securing appropriations that will be sufficient to accomplish the more important, if not all, of these improvements.

Administration. I approach this subject with some hesitation because the personal element may seem to enter too largely into it. It will be easy to impugn my motives. Nevertheless, I speak in the interests of the schools, and as far as possible with the personal factor eliminated, and assume the risk of misinterpretation.

Somerville has twice the population, twice as many school children, and twice as many teachers and schoolrooms as it had fifteen years ago. It spends more than twice as much money for schools as it spent in 1889. All this indicates a great increase of work in the administration of school affairs. And yet the administrative and supervisory force remains unchanged. It consists now, as it did then, of the superintendent and his clerk.

The city clerk now has five assistants instead of the one that sufficed fifteen years ago. The city treasurer requires five regular helpers where two formerly were enough, and in busy seasons eight or nine are needed. The same increase is observable in other departments of the city government. These changes result naturally from the growth of the city, and surprise no one.

The present business of the superintendent's office covers three distinct lines of work, usually put in charge of three separate departments in cities as large as Somerville.

First, by the terms of the city charter, the superintendent is made the secretary of the school committee. As secretary, he attends all meetings of the board and of its standing committees, and records and reports their proceedings; he examines and approves all bills, makes up the pay-rolls of bills and of teachers, and keeps a full and detailed account of all expenditures connected with each school; he has charge of all the statistical re-

ports of the schools, preparing and supplying suitable blanks therefor, and making returns to state and national officers.

Secondly, the superintendent acts as supply agent, under the direction of the standing committee on supplies, orders all text-books, stationery and supplies of every sort needed in the schools, and sees that they are duly delivered at the schoolhouses and receipted and cared for; he prepares annual inventories of the 110,000 text-books in use, and lists thereof for the committee, and looks after the rebinding and renewing of all books; and fills the requisitions that are constantly being made for material of one sort or another needed from kindergarten to high school.

Thirdly, the legitimate and most important business of the superintendent is that of the inspection and supervision of the work done in the schools and by the teachers. It has to do chiefly with questions of organization, classification, courses of study, methods of instruction, distribution of pupils, attendance, condition of buildings as to sanitation and convenience, the applications and employment of suitable teachers, assignment of substitutes, direction of teachers' meetings, conferences with parents and teachers, and other duties directly pertaining to the efficiency of the schools. In addition to the day schools, evening and vacation schools demand his attention. He is to direct the truant officer, to see that the school census is properly taken, to issue age and schooling certificates to all between fourteen and twenty-one, and to aid in securing the enforcement of attendance laws.

All these various duties, and others not detailed, naturally increasing from year to year, are being discharged by the present superintendent to the best of his ability, with the aid of his efficient clerk. Whether it is best to continue under existing conditions, or whether the general interests of the schools demand some sort of change, are questions for the decision of the school committee. As bearing on the subject, I call attention to the fact that Cambridge employs a superintendent and an assistant superintendent, who has charge of primary schools; a supply agent, who acts as secretary of the board and has charge of the evening schools, vacation schools, statistical returns, truant officers, and employment certificates. In addition, there are two women clerks and a porter. Springfield, a city of almost the exact size of Somerville, employs a superintendent, an assistant superintendent, a secretary and supply agent, and four women clerks.

A superintendent's time should be spent mainly in school supervision. He should have opportunity of coming constantly in contact with the vital forces of the schools. He should visit the schools and study the systems of other cities. He should attend conferences of his fellow superintendents. If he does this work as it ought to be done, the care of certain material interests of the schools should devolve upon some one else.

By reference to my notes, I find that I have made 274 visits to different school buildings during the year, besides forty-four visits to evening and vacation schools. Some of them have necessarily been brief. Some buildings have been visited more frequently than others. I have not seen every teacher at every visit. To spend an hour with each teacher in the city would consume three months of school time, to the exclusion of all other business. I can sit at my desk and talk without expense to any school principal or teacher in Everett, Malden, or Revere. To confer with principals or teachers in Somerville requires a personal visit to the schoolhouse and an hour's time, more or less. The installation of telephonic communication with every school principal would be a great convenience, and furnish an up-to-date method of doing business. I urge that this be done.

In Conclusion. This report has dealt mainly with the material and financial side of the school question,—the visible and the tangible. It is fitting to ask whether the work done and the results achieved in the schools are commensurate with the expenditures and efforts so generously made. Some facts have already been presented, from which deductions may be properly made concerning this matter.

Regularity and punctuality of attendance are signs of interest on the part of both pupils and parents. They are essential to good work. The harmonious relations between schools and homes are evidence of mutual confidence and co-operation,—vital forces moving towards the same end. The decrease in the number of corporal punishments indicates a growing moral power on the part of teachers and a self-governing power on the part of children. The atmosphere of most schoolrooms shows a spirit of mutual good will and helpfulness in their occupants. All these are necessary elements in the attainment of the ends which we seek.

It would be as interesting as it would be unjust to imitate the custom of early town school reports in which each teacher was mentioned by name, and the character and results of her labors analyzed with all the acumen of an old-fashioned committeeman. Such an attempt would reveal no perfect school, for no one has yet attained the ideal. It would doubtless disclose here and there a perfunctory worker, or an unprofessional teacher engrossed with outside cares, or one temporarily serving in the hope of a change of lot, or an unsympathetic one in whom the milk of human kindness has long since soured, or an ill-tempered one given to intemperate speech, or a self-satisfied one with nothing to learn. All these types would be reflected in their classes. But in the great majority of schoolrooms we should find growing, enthusiastic, faithful teachers and interested, busy, well-behaved children. We should find in the main good teaching, modern methods, freedom from restraint, cheerful, happy faces. We should see constant efforts to stimulate self-activity, to de-

velop power, to foster the spirit of civic loyalty and service, and to lead towards that highest goal, the attainment of noble character.

Much remains undone in the evolution of the ideal system of education. The era of experiment has not yet passed. Strong men are at work upon the great problem, and each year sees constant advance and brings the solution nearer.

At the magnificent meeting of the National Educational Association last summer, President Hyde, of Bowdoin, drew a suggestive picture of "what our educational system would be if it were everywhere as good as the best that has been anywhere attained," or "if it contained all the elements which are now present at isolated points."

He said:—

"We should have small boards of education composed of the best citizens, devoted exclusively to legislation, employing trained experts to carry out their measures. We should have trained teachers, whose attainments are years in advance of the stage at which they are teaching, granted, after careful selection and adequate probation, permanent tenure at salaries proportioned to their efficiency and length of service.

"We should have in the elementary schools kindergarten ideas, manual training, literature, and nature study; yet all in due subordination to the old-fashioned idea that the individual must master with the greatest economy of time the symbols of human knowledge and human intercourse.

"We should have attractive buildings, situated in spacious and beautiful grounds, used both summer and winter, day time and evening, by both children and adults, in the service whenever needed of social as well as of intellectual ends.

"We should have the length of each stage of education determined in part by individual performance, instead of by a rigid time-table imposed on all alike; so that, without lowering the standard of any single stage, a bright scholar might pass through them all in a substantially shorter time."

There are very few of these ideal conditions that we have yet attained. Some are beyond our reach at present. To others we have approximated. All will doubtless be realized in the good time coming. Let us all speed its coming!

For the wise direction and courteous consideration of the members of the board and the hearty co-operation of supervisors, principals, and teachers throughout another year of service, the superintendent offers his grateful acknowledgments.

Respectfully submitted,

G. A. SOUTHWORTH,
Superintendent.

December 28, 1903.

In Memoriam.

At a meeting of the board held October 26, 1903, the following memorial was adopted:—

Professor Benjamin G. Brown, recently deceased, was an honored citizen of Somerville for forty-six years, during all of which time he was connected with Tufts College as instructor in mathematics. Between 1872 and 1894, with patriotic and unselfish fidelity, he served the city for more than seventeen years as a member of the school board. Admirably qualified by education, experience, predilection, and association, he discharged the duties of the office with signal ability and devotion to the highest interests of the schools. Uninfluenced by personal considerations, he brought to the conduct of affairs a clear sense of justice, an independence of judgment, and a wisdom of action that made his services of the highest value to the city.

As a Christian gentleman, affable and courteous; as a friend and associate, loyal and true; as a citizen, interested and active in every good work; and as a public servant, courageous and conscientious in the discharge of duty, he had the respect and confidence of all who knew him.

The school that bears his name will perpetuate the memory of a service and a character worthy of imitation by every citizen who may receive his early training within its walls.

In grateful recognition of his long connection with the educational interests of the city, the school board places on its permanent records this tribute to his memory.

In Memoriam.

At a meeting of the board held November 30, 1903, the following memorial was adopted:—

Dr. Horace Carr White, for nearly thirty years an honored citizen of Somerville, was born in Bowdoin, Me., January 26, 1836, and died in this city November 26, 1903.

From 1881 to 1893, a period of twelve years, Dr. White was an influential member of the school board of this city. His early struggles and training, his wide experience, his practical good sense, his ready tact, his knowledge of the needs of the schools, his largeness of view, his wisdom and independence in action, his strong convictions and high standards, and his unselfish public spirit admirably fitted him to render efficient and valuable service in behalf of the schools. In the discharge of his responsibilities in wider fields to which he was called either by his own patriotic ardor or by the confidence and suffrages of his fellow citizens, he was conspicuous for his unselfish devotion to public interests and his unswerving fidelity to the high trust committed to his charge.

His frank and genial manner, the loyalty of his friendship, his tender and skillful ministrations to the sick and suffering, his warm and helpful sympathy with the needy, the generous impulses of his large heart, and the manliness and purity of his private life won for him the respect and affection of hosts of friends, and make the memory of his character and deeds at once a benediction and an inspiration.

In recognition of his worth as a man, and of his service in promoting the educational, philanthropic and civic interests of Somerville, its school board places upon its permanent records this memorial tribute.

Amendments to Rules. The following amendments have been made to the rules since the last compilation in 1902:—

Section 41 has been amended to read as follows:—

Section 41. He shall, at his discretion, in very stormy or excessively hot or cold weather, strike the signal on the fire alarm bells for the omission of the next session of the schools.

Section 3 has been amended by adding "(20) vacation schools" after the word "supplies."

The following paragraph has been added to Section 31:—

"The committee on vacation schools shall have in charge the organization and conduct of vacation schools, and the general supervision of the same."

The following has been substituted for the last sentence in the first paragraph of Section 52:—

The salaries of teachers shall be payable in ten equal installments.

The second paragraph in Section 56 has been changed to read:—

The supervisor of penmanship shall receive a minimum salary of \$1,000, to be increased \$100 annually until a maximum of \$1,500 is reached.

The third paragraph on page 18 has been changed to read:—

The superintendent's clerk shall be paid \$650, to be increased \$50 annually until a maximum of \$750 is reached.

Section 50 has been changed to read:—

Section 50. Teachers of high, grammar and primary schools, and supervisors of departments, and other employees of the board, shall be nominated by the standing committee having charge of the same. Whenever, in the opinion of said standing committee, it is thought best not to nominate any such person for re-election, such person shall be notified by the committee in writing of their decision at least one month before the April meeting of the board. Any appeal by the aggrieved party from this decision to the full board must be claimed in writing within two weeks after receiving the aforesaid notice. Pending such appeal, no new nomination shall be made by the committee.

ORGANIZATION OF SOMERVILLE SCHOOLS.

Information concerning our schools is frequently sought by citizens or by school men in other localities. Following are the principal facts concerning them. Additional knowledge may be gained from the rules and regulations:—

Kindergartens. The city supports four kindergartens, in the Hanscom, Bennett, Baxter and Glines schools. Vaccinated children between four and five years of age are admitted to the kindergarten nearest their residence during the months of September and April, and may remain until the July following their fifth birthday. Sessions from 9 to 12.

Head kindergartners receive \$600. One trained assistant is allowed when the number exceeds thirty, at a salary of \$275, \$350, or \$425, according to experience. Kindergarten teachers give five hours daily to their work, the afternoon being employed in visitation, preparation, mothers' meetings, and the like.

Primary Schools. Our elementary school course covers nine years, the first three of which are spent in primary schools. We have no exclusively primary school buildings, the ninety-one primary classes being distributed among twenty-two schoolhouses.

Vaccinated children five years of age, or who will reach that age on or before the first day of October, are admitted during the month of September only, provided they have never attended school before. Children able to enter existing classes will be admitted at any time. Applications for admission should be made to the principal of the school.

Only trained or experienced teachers are employed, the salaries being \$300, \$400, \$500, \$600, or \$650, according to length of service. Normal training is equivalent to a year's experience, and experience in other places is counted in determining salary.

First-grade teachers, with classes numbering fifty, are allowed an assistant, who is paid \$200, \$275, \$350, or \$425, according to years of service.

Grammar Schools. The grammar classes are found chiefly in eleven large buildings, of twelve rooms each. The course covers six years, and includes only those studies which the statute requires, with the addition of music, sewing, and elementary science.

The salaries of grammar school teachers are the same as those of primary teachers. Masters are paid \$1,900, and their assistants \$725. Other ninth-grade teachers are paid \$700.

Promotions. Promotions in all grades, from the first to the thirteenth, are made in June by the regular teacher and the principal, with the approval of the superintendent and district committee. They are based on the estimate of the pupil's daily work made by the teacher and recorded bi-monthly. An occasional brief, unannounced, written test is a factor in this estimate.

Where there is reasonable doubt of a student's fitness, he may be promoted on a trial of three months. In such cases the parent is notified and kept informed of his child's progress. At the end of this probationary period he may be returned to his former grade, provided it seems for his interests. In 1903 less than ten per cent. of those promoted on trial fell back.

Children capable of more rapid advancement may be promoted one or more grades at any time. Seventy-eight were thus promoted in 1903.

Fitness for graduation or for admission to the high schools is determined in precisely the same way. Diplomas are given in grammar and high schools to those who have satisfactorily completed full courses.

Latin High School. In September, 1895, in the forty-third year of its existence, the Somerville high school was divided, the classical, or college preparatory, departments remaining in the old building, erected in 1872, and the English departments occupying a new building, erected in 1894-'95.

Some facts concerning the Latin school are presented in the following table:—

School Year.	Average Number Belonging.	Number Entering.	Graduates.	Cost of Instruction.	Per Capita Cost.	Teachers.	Pupils to a Teacher.
1895-6	257	69	50	\$11,702	\$45.57	9	28.6
1896-7	262	81	51	11,840	45.19	9	29.1
1897-8	273	86	55	11,921	43.67	9	30.3
1898-9	264	78	51	11,935	45.21	9	29.3
1899-0	245	65	48	12,491	50.98	9	27.2
1900-1	271	104	56	12,676	46.74	9	30.0
1901-2	314	114	56	12,583	40.13	10	31.4
1902-3	358	125	46	14,170	39.58	11	32.5

The object of the school is, primarily, to furnish a suitable preparation for those pupils who desire to pursue either a regular or a special course of study at higher institutions of learning, but the school is open to all pupils who wish to take the courses of study offered.

The regular time for completing the course is four years. Pupils, at the request of their parents, can make the work of each year easier by taking five years for the course. Those who are

capable, and have good reason for shortening the time of preparation are allowed to complete the course in as short a time as their ability will permit.

Graduates of grammar schools are admitted to either high school on presenting a certificate of qualification signed by a master. All other pupils are admitted by an examination in grammar school studies, given usually on the Saturday preceding the opening of the schools in September.

The tuition for non-residents is the per capita cost for the year, payable in advance. The sessions of the school are from 8.30 to 1.30. The salaries paid high school teachers are given on later pages of this report.

English High School. This school was organized in September, 1895. Information concerning it is found in the following table:—

School Year.	Average Number Belonging.	Number Entering.	Graduates.	Cost of Instruction.	Per Capita Cost.	Teachers.	Pupils to a Teacher.
1895-6	456	213	67	\$20,102	\$44.13	21	21.7
1896-7	531	235	70	23,010	43.33	21	25.3
1897-8	535	224	75	24,843	46.44	22	24.3
1898-9	575	231	86	26,159	45.49	23	25.0
1899-0	669	316	83	31,322	46.82	27	24.8
1900-1	691	249	97	32,739	47.35	30	23.0
1901-2	738	294	108	35,989	48.74	34	21.7
1902-3	747	64	135	36,843	49.32	33	22.6

The course of study covers four years. Graduates are admitted to special courses when the conditions are favorable. Candidates for technical and normal schools take specific preparatory work.

The wide range of elective studies is a distinctive feature of the school. The choice of the first year may be one of the following: Latin, French, German, biology (botany and zoology), manual training, and mechanical drawing. To these physics is added for the second year, and chemistry, geology, and astronomy for the third and fourth. After the second year two or more electives may be taken.

During the third and fourth years the student may elect in a business course bookkeeping, commercial arithmetic, commercial law, penmanship, stenography, typewriting; in mathematics, advanced algebra, solid geometry, analytical geometry, and trigonometry; in advanced science, work in botany, zoology, physics, chemistry, and drawing.

Of the fifteen periods of prepared work, the course prescribes ten periods the first year, eleven periods the second year,

seven periods the third year, and seven periods the fourth year. The pupil has the privilege of selecting from the list of elective studies subjects whose recitation periods each week, or their equivalents, when added to the required prepared work, shall equal the necessary fifteen periods.

Concerning admission, sessions, etc., see Latin School.

A simple, healthful inexpensive lunch is served at the recess midway of each session to pupils desiring it.

Manual Training. Three rooms are fitted and equipped in the basement of the English high school for its manual training department. The course includes carpentry, wood-turning and carving, clay modeling, pattern making, moulding, and casting. A fourth room is devoted to mechanical drawing, with a full course. Manual training has not been extended to include grammar schools.

The sub-master in charge of the manual training department is paid \$1,700, and his assistants \$1,650 and \$800.

Sewing. Sewing is taught to the girls in the fifth, sixth, seventh and eighth grammar grades in weekly lessons of one hour each.

Three special teachers are employed at salaries of \$650.

Music. Weekly instruction in music is given exclusively in the high schools, and in part in the three upper grammar grades by a specialist, who is paid \$1,700. The books used are "The Euterpean," "The Cecilian Series of Music and Song," Nos. 2, 3, and 4, and "The Laurel Song Book."

In the six lower grades musical instruction is given by the regular grade teacher, under the supervision of a specialist, who visits each class once every thirteen days. She is paid \$900. The Normal system of music, with its books and charts, is used.

Gymnastics. In elementary grades the Ling system of Swedish gymnastics is practiced daily. No special teacher is employed.

Recesses. The Latin school has two brief recesses, breaking the daily session into thirds. The English school has a single recess at the end of the third period.

The four lower elementary grades have a five-minute recess midway of each session. The five upper grammar grades have no recess, though no unreasonable physical restraint is placed upon any pupil.

No detention of pupils is allowed at noon, and but a half-hour's detention at the close of the afternoon session, "for willful neglect of duty only."

Corporal Punishment. Corporal punishment, "which includes any infliction of physical pain or application of physical force," is not prohibited. It must, however, not be administered until twenty-four hours after the offense, the approval of the principal being first obtained. Each case must be reported in detail to the superintendent. There were 270 cases in 1900, 284 in 1901, 328 in 1902, and 299 in 1903.

Drawing. Two teachers of drawing are employed in the English high school at salaries of \$900 and \$600. In that school freehand drawing is compulsory for first-year pupils, and elective for all others. Drawing is not taught in the Latin school. A few Latin school pupils are taught drawing in the English school.

In the primary grades daily lessons, and in the grammar grades semi-weekly lessons, are given by the regular teacher, under the direction of a supervisor, who visits each class once a month and is paid \$1,000.

The course includes pictorial drawing from nature, models and objects; structural drawing from type solids; decorative drawing, designing, and color work, historic ornament and picture-study. No drawing books are used. Colored pencils are provided in primary grades, and water-colors and brush in grammar grades.

Penmanship. Intermedial slant writing is in use in the elementary schools, the Whitehouse system being used. The supervisor visits each class once in four weeks, and receives \$1,500.

Student Teachers. At the present time one student teacher is employed in the Latin school, and one in the English. Each serves without pay, under the direction of the head master.

The Public Library. The English school has a working library of 1,200 volumes, but it draws constantly on the public library, located in an adjoining building.

For four years there has been a constant use of the library by school children. Circulating libraries of fresh books are in use in the smaller buildings. Books are delivered and collected each week at the large grammar schools. As far as they can, the teachers aid in the selection of books by the children, and the librarian and his assistants cheerfully render all the help in their power.

Evening Schools. An evening drawing school for freehand and mechanical work is open in the Latin schoolhouse from October to April, on Tuesday and Thursday evenings, from 7.30 to 9.30. The principal is paid \$6, and assistants \$3 and \$4 an evening.

Elementary evening schools are open in the Prescott, Bell, Forster and Highland buildings from October 1, on four evenings a week, from 7.30 to 9.30. The length of the term is dependent on the interest and attendance. The course of study followed is that prescribed by the statute. Principals receive \$3 or \$4, and assistants \$2.50, \$2, \$1.50 or \$1 each evening.

Truants. The city employs one active truant officer, who is paid \$1,100 and the board of his horse. Truants are sent to the county truant school at North Chelmsford. There are now five truants from Somerville in the school.

Janitors. These important officers are appointed by the commissioner of public buildings, and are under his direction and that of the school principal. Their salaries will be found on the last page of this report.

Supervision. The superintendent of schools is the executive officer of the board, and upon him devolves the general management of the schools under its direction. He serves as the secretary of the board and as supply agent. His salary is \$3,000, and he is allowed a clerk, who receives \$750. His office is in the city hall annex, and his hours are from 4 to 5 each school day, and from 8 to 9 on Saturday. His office is open from 8 to 12 and from 1.30 to 5 on school days, and from 8 to 10 on Saturday.

The meetings of the school board are held on the last Monday evening of each month, except July, August, and December, at 8.15 o'clock.

CONTENTS OF APPENDIX.

Concerning Finance.

No. of Table.

1. Schedule of school property.
2. Cost of maintaining schools, 1903.
3. Cost per capita of maintaining schools, 1903.
4. Cost of maintaining schools for a series of years.
5. Cost per capita for maintaining schools for a series of years.
6. Amount spent annually for new school buildings and for repairs for a series of years.

Concerning Pupils.

7. Population and school census.
8. Attendance, etc., of the schools for 1903.
9. Statistics of the high schools, for school year 1902-1903.
10. Pupils by grades, December, 1903.
11. Separate statistics for grammar and primary schools, 1903.
12. Admissions to first grade in September.
13. Number of grammar school graduates, 1903.
14. Truant statistics, 1903.
15. Evening school statistics, 1903.
16. Grammar school graduates for a series of years.
17. Attendance statistics of all schools for a series of years.
18. Statistics of the high school for a series of years.
19. Promotions, 1903.

Concerning Teachers.

20. Resignations of teachers, 1903.
21. Teachers elected in 1903.
22. Leave of absence of teachers.
23. Transfers of teachers.
24. Number of teachers employed for a series of years.

Miscellaneous.

25. Changes in text-books, 1903.
26. High school graduation exercises, 1903.
27. Grammar school graduation exercises, 1903.
28. Organization of school board for 1904.
29. Teachers in service January, 1904.
30. Officers in service January, 1904.
31. School janitors.

	Latin.	English.
Number of teachers	11	33
Number of days school kept	181	182
Number enrolled	397	832
Average number belonging	358	747
Average daily attendance	344	708
Tardiness	163	221
Dismissals	174	286
In Class I. September, 1902	125	264
June	114	225
Per cent. of loss	9.0	14.8
In Class II. September, 1902	98	223
June	96	184
Per cent. of loss	2.0	17.5
In Class III. September, 1902	89	151
June	83	128
Per cent. of loss	8.0	15.2
In Class IV. September, 1902	56	155
June	53	144
Per cent. of loss	5.0	7.1
Special students, September, 1902	1	20
June	2	11
Total, September, 1902	369	813
June	348	692
Per cent. of loss	6.0	14.8
Number of graduates, male	20	47
Number of graduates, female	26	88
Total	46	135
Average age, male	18-6	18-9
Average age, female	19-3	18-11
Number entering college	36	4
Number of graduates entering technical schools	0	15
Number of graduates entering normal schools	0	5
Cost of instruction	\$14,170 00	\$36,843 25
Cost of supplies and equipment	1,208 62	4,999 20
Total cost	15,378 62	41,842 45
Per capita cost of instruction	39 58	49 32
Per capita cost of supplies and equipment	3 37	6 69
Total cost per capita	42 95	56 01

TABLE 26.—GRADUATION EXERCISES, 1903.**High Schools.**

The graduation exercises of the high schools occurred on Friday evening, June 26, at the First Methodist Episcopal Church, in the presence of a large audience of parents and friends.

The formal address to graduates was given by the Hon. Merrill E. Gates, LL.D., L. H. D., of Washington, D. C.

At the close of the address, the chairman of the school committee, S. Newton Cutler, presented diplomas to the 181 members of the graduating classes.

The graduation exercises were followed by a reception to the graduates and their parents, given by the school board, at which about 600 were present.

ORDER OF EXERCISES.

S. Newton Cutler, Chairman of School Board, presiding.

- Overture. "Festival March." H. K. Hadley
Hadley's Orchestra.
1. *Singing.
Soli and Chorus, "The Heavens Are Telling"—"Creation," Haydn
Miss Hodges, Messrs. Dunham and Wilson.
 2. Prayer.
Rev. George Skene, D. D.
 3. Singing.
Solo and Chorus, "Hear my Prayer" (Motet). Mendelssohn
Miss Eleanore M. Bragdon.
 4. Address.
His Honor, Mayor Edward Glines.
 5. Singing.
Two-part Song, "The Pilot" (Male Voices). Millard
 6. Address to Graduates.
"The Self and the Citizen."
Hon. Merrill E. Gates, LL.D., L. H. D., of Washington, D. C.,
Ex-President of Amherst College.
 7. Singing.
Unison Solo, "The Lost Chord." Sullivan
(With Orchestra and Organ.)
Master Dunham, Organist.
Orchestration by S. Henry Hadley.
 8. Presentation of Diplomas.
S. Newton Cutler, Chairman of the School Board.
 9. Singing.
Soli and Chorus, "Liberty" (Dramatic Scene). Fanning
Bass Solo, Master Wilson.

Argument.—The bitter hatred which had long existed between the two hereditary castes of the Roman people reached a climax during the government of the Council of Ten, of whom Appius Claudius was the chief. Cruelty upon cruelty had deepened, if possible, the hatred of this odious administration, and the people were driven to the verge of desperation, when Appius Claudius tried by force to obtain possession of Virginia, a beautiful maiden of humble birth. This act was the signal for an irresistible outbreak of fury, which resulted in the downfall of the Ten.

* All singing accompanied by Hadley's Orchestra, under the direction of S. Henry Hadley, teacher of music in the schools.

TABLE 27.—GRAMMAR SCHOOL GRADUATES.

The lack of a hall large enough to accommodate all the grammar school graduates and their friends compelled us to devote two evenings to the graduation exercises. Accordingly, Monday evening, June 29, and Tuesday evening, June 30, were set apart for the purpose.

The following was the order of exercises on Monday evening:—

Order of Exercises.

S. Newton Cutler, Chairman of School Board, Presiding.

1. Overture.
 "Poet and Peasant."
 ('Cello Solo by Arthur Hadley.)
 Hadley's Orchestra. Suppe
2. *Singing.
 Anthem, "Glorious Is Thy Name."
 (Orchestration by S. Henry Hadley.) G. A. Veazie

3. Prayer.
Rev. William Couden.
4. Singing.
Soli and Chorus, "Oh! Thou Whose Power," from "Moses
in Egypt." Rossini
5. Address to Graduates.
"Student Life."
Professor Will S. Monroe, Westfield Normal School.
6. Singing.
Patriotic Song, "Columbia." H. K. Hadley
7. Address to Graduates and Presentation of Diplomas to Gradu-
ates of the Forster and Carr Schools.
J. Walter Sanborn, Member of School Board, Ward 5.
8. Singing.
Three-part Song, "Rest" (Melodie in F). Rubinstein
(Girls' Voices.)
9. Presentation of Diplomas to Graduates of the Morse, High-
land and Hodgkins Schools.
Mr. Sanborn.
10. Singing.
Chorus, "The Flower of Liberty." L. B. Marshall

*All singing accompanied by Hadley's Orchestra, under the direction of S. Henry Hadley, teacher of music in the schools.

Names of Graduates.

REPORT OF THE TRUSTEES.

To His Honor, the Mayor, and Board of Aldermen of the City of Somerville:—

The trustees of the public library beg to submit herewith their thirty-first annual report.

It is gratifying to the trustees to be able to report a steady and rapid gain in circulation, which is in itself an evidence that the library is doing good work, and beyond all, that the opportunities offered to our citizens are appreciated.

The number of volumes delivered for home use during the past year exceeds that of the year previous about thirty-eight thousand, which is, indeed, a very substantial gain.

The public schools have made more than the usual demands upon the resources of the library this year. It is estimated that nearly fifteen hundred books, mostly duplicates, have been purchased for the use of the schools. One hundred and sixty-three schoolrooms are now supplied with these books. Considering the fact that it is only a very few years since the schools were offered the privileges of the library, it is remarkable to what extent the library is used in this particular line of education. Our resources and our facilities are often taxed to the utmost to satisfy the demands of the teachers and scholars for works of reference and scientific research. These demands are met with every means in our power, but with a limited amount available for this class of works it is impossible to furnish everything desired. The board feel that these demands should be answered more fully, and realize more and more each year that the city cannot make a better investment than by furnishing the schools with every possible assistance in the work of education.

A new registration of the library was commenced during the summer vacation, and although it is not yet entirely completed, nearly eight thousand names have been registered. The labor of the new registration has been considerable, but contrary to expectation was accompanied by no remonstrance on the part of the public.

Our plan of supplying books to the Sunday schools works to the utmost satisfaction of the Sunday schools as well as to the library. Seven Sunday schools now avail themselves of the privilege, most of them taking out the maximum number of one hundred books.

The several agencies have done their usual work, but with increasing difficulty. The new plan of giving out books directly from the agencies, although greatly appreciated by the public, adds a new burden to the general work, under which some of the agencies are justly restive, as the moderate compensation paid to them is certainly not commensurate with the labor involved.

In November a long petition signed by a large number of the residents of West Somerville was presented to the board asking that a reading room and a distributing station should be established in that section of the city, but this it was impossible to grant with the means at hand. The justice of the request was readily recognized and the subject was carefully considered. After looking the ground over and estimating the expense of the undertaking, it was decided to bring the matter forcibly to the attention of his honor, the mayor, who, having served on the board of library trustees, was quick to recognize the importance of establishing such a reading room and distributing station. A suitable location was found and a request was made by him to the honorable board of aldermen for authority to execute a lease, which after consideration was referred to the incoming city government. If in their opinion such a move is desirable in the near future, which has the hearty approval of this board, no pains or effort in their power will be spared to make it a success. It must be understood definitely, however, that such an expense cannot be incurred without a necessary appropriation to meet the added outlay. It is estimated that the expense of such a reading room and distributing station will be about two thousand dollars annually. The circulation of books at the West Somerville agency is constantly increasing, and with the necessarily very inadequate means of supplying the residents of this section with books, your board can but feel that some means should be devised to meet this demand. Surely every opportunity should be given to our citizens to enable them to enjoy the treasures which should be theirs for the asking. We commend the subject, therefore, to your favorable consideration.

The rapidly increasing business of the library from year to year demands a gradual increase of appropriation, and for the ensuing year it will be necessary for a small increase over that for the past year.

Free access to all the books under the regulations established previously has been more and more appreciated by the card holders, and has very largely been the means of satisfying the public when unable to obtain just the books desired. One very satisfactory result has been the circulation of books which have hitherto been little used.

Exhibitions of art work by the scholars in the public schools have been continued with interest to all.

The relations that exist among the employees at the library are of the pleasantest kind; the public as a whole seems grateful

for the many efforts put forth in its behalf; the growth and development of the whole library system is gratifying, and the outlook for the future is very hopeful.

In justice to our faithful librarian it must be said that we appreciate his services for the interest of the library in every detail, and it is a pleasure to the board to know that the value of his work is recognized by the association of librarians.

Respectfully submitted,

CHARLES A. WEST,

President.

December 29, 1903.

REPORT OF THE LIBRARIAN.

To the Trustees of the Somerville Public Library:—

I herewith submit the librarian's thirty-first annual report. Below is a statement in detail relative to the various departments:—

The Cataloguing Department.

With the beginning of February, Miss F. Mabel Norcross resigned as head of the cataloguing department, a position she had held with great acceptance since 1893. Her assistant for many years, Miss Esther M. Mayhew, was at once promoted to her place, and has since conducted the work of this rapidly-growing department of the library with entire satisfaction. Miss Edith B. Hayes, at her own request, was transferred from the school department and assumed the work of cataloguer's assistant.

The work of this department has grown to such proportions that were it not for the printed cards furnished by the library of congress, it would be impossible to accomplish the work with our present force. During the past twelve months we have purchased 8,306 of these printed cards at a cost of \$57.84. This is a remarkably small expenditure for the service rendered. It is anticipated that the time will come when practically all the cards needed for a public library can be furnished in this way by the library of congress and thus every library will be able to secure the most expert work in this line the country can furnish at an expenditure within its reach.

A new card cabinet has lately been installed at the Teele-square agency and supplied with these printed cards of the library of congress. These cards cover all the new books that have been purchased since January 1, 1901. Of course such a catalogue is very incomplete when compared with the general card catalogue in the central library. But it contains a list of the new books purchased for the past three years; and it is safe to say that such a list supplies the needs of ninety per cent. of the readers of a public library. I would recommend that these new card catalogues be gradually installed in all the successful agencies. Such catalogues are now in use in both West Somerville agencies and we are now purchasing extra cards from the library of congress with a view to starting a new one in a few years in the agency which shows itself most deserving of it.

Below are the statistics of books withdrawn from the library, books added to the library, and books bound by the library during the year:—

Books Withdrawn.

Number of books worn out	695	
“ “ “ lost by general readers	10	
“ “ “ “ in schools	15	
“ burned on account of infectious exposure	7	
		727
Total number withdrawn		727
Total number of books withdrawn to January, 1903		6,463
“ “ “ “ during 1903		727
		7,190
Total		7,190

Books Added.

Accession number January 1, 1903	63,002
“ “ January 1, 1904	69,244
Total number of books added during 1903	6,242
Books new to the library	3,071
Duplicates	3,171
Total number withdrawn	7,190
Total number of books in the library	62,054

Binding.

Volumes rebound	2,393
Periodicals bound	379
Paper-covered books bound	30
Pamphlets	34
	2,836
Total	2,836

The School Department.

The school department since February 1 has been under the direction of Miss Mary J. Warren. Perhaps no department of the library has grown more during the current year. Since the beginning of the year 9,042 books have been sent to the schools. Of these 4,480 were fiction and 4,562 were other works. Out of the 227 schoolrooms in the city, 163 are supplied with special libraries. Formerly twenty-five books was the maximum number sent in these school libraries; but since the beginning of the present school year a maximum of forty books has been permitted. In most instances this number is sufficient. But if the number of pupils in a schoolroom happens to exceed forty in number I think it advisable to send to such a room a number of books equal to its number of pupils.

The books sent out in these school libraries we count as circulating once in every two weeks. It is probable that they do circulate much more frequently than this. But it would add new burdens to the service to ask the teachers, already overworked, to keep an exact count of all the books circulated. So we content ourselves with this arbitrary system, which is sufficiently accurate for practical purposes, although in my judgment somewhat conservative. Counting the school circulation on this basis it amounts for the current year to 27,396 fiction and 38,250 other works, making a total of 65,646.

Many new books have been purchased for these school libraries during the past year but I know not how an equal expenditure of money could have been made to greater advantage.

Reference and Art Department.

The reference and art department under the supervision of Miss Mabel E. Bunker has continued to do useful work. Below is given the monthly attendance for the year:—

January	1,036
February	1,716
March	1,896
April	1,077
May	1,683
June	1,525
July	531
August	739
September	822
October	1,203
November	1,580
December	1,577
Total	15,385

During the year there have been fifteen art exhibits, as follows:—

- Photogravures of Gerome's paintings.
- Nuremberg.
- Russia.
- Cathedral series.
- Venice, No. 1.
- National Gallery.
- Manual training exhibit from Somerville high school.
- China.
- Paris, No. 2.
- American parks.
- Scotland, No. 1.
- Oviato.
- Art in Italy, Part 1.
- Art in Italy, Part 2.
- Canterbury and Salisbury cathedrals.

Many works of permanent value have been purchased for this department during the year, among which may be mentioned:—

- Encyclopedia Americana.
- New volumes of Encyclopaedia Britannica.
- Anglo-American encyclopedia and dictionary.
- Helmholtz's history of the world—4v.
- Photographs—100 views of American parks.
- Photogravures of Gerome's paintings.
- Forty-six of Soule's photographs of works of art.

Our art room is small, but there is ample room on its walls for good pictures. Visitors are naturally enough disappointed upon being shown into an art room, to find its walls entirely

bare of pictures. In fact, the whole library is singularly destitute of pictorial adornment. Our supply of wall space is very meagre; but we have no pictures of real merit with which to adorn the little wall-space we do have. This is one of the palpable needs of the library. We are trying to purchase photographs, stereoscopic views and temporary picture exhibits to foster the growing love of art so perceptible in this community. But the library should be adorned with a few original paintings of a high order of merit. These would be expensive, and, of course, cannot be purchased from the regular appropriation allowed by the city to the library. In many other localities these gifts have come through the private munificence of citizens or natives. The Somerville library is hopeful of similar donations.

The Children's Department.

The children's department, under the supervision of Miss Anna L. Stone, has done an excellent work. Great care is exercised in purchasing books for the children's room, and this department of the library should do much to foster a love of reading among young people. The circulation from the children's room by months is herewith appended:—

January	5,568
February	6,784
March	8,535
April	6,279
May	4,983
June	4,506
July	4,540
August	4,008
September	4,827
October	5,147
November	6,444
December	7,237
Total	<hr/> 68,858

Of this circulation 77.8 per cent. is fiction and 22.6 per cent. other works.

The walls of the children's room are very plain and bare. A few interesting pictures, suited to juvenile comprehension, would greatly enhance the appearance and add to the usefulness of this room.

General Work.

The general work of the library under the immediate supervision of Miss Adele Smith, the assistant librarian, has increased to a gratifying extent. Our vacation card system has been continued and has been increasingly appreciated by people who spend their summer out of town. The past summer 323 vacation cards were issued, on which 1,811 books were taken out, as against 1,371 last year.

The general circulation figures of the year are as follows:—

January	22,927
February	26,296
March	32,587
April	27,369
May	27,110
June	30,172
July	18,598
August	17,136
September	22,018
October	24,384
November	29,998
December	35,611
Total	<hr/> 314,206

Last year the circulation was 277,075, consequently there is a net increase the current year of 37,131 or a gain of .134 per cent. Of this circulation 70½ per cent. was fiction, and 29½ per cent. other works. Last year our percentage of fiction was 72½ per cent. and 27½ per cent. other works.

Below is given our circulation by classes exclusive of fiction:—

General works	6,730
Philosophy	1,335
Religion	3,537
Sociology	8,224
Philology	964
Natural science	6,749
Useful arts	3,856
Fine arts	7,987
Literature	13,034
History	23,792
Children's room	15,584
Schools, specials, etc.	1,186
Total	<hr/> 92,978

Below is the statistical statement of the general work of the year:—

Accession number January 1, 1904	69,244
Accessions in 1903	6,242
Total circulation	314,206
Delivered from children's room	68,948
“ “ Teele square	5,417

“ telephone	6 12
	<hr/>
Total	\$576 63

Sunday Schools.

Our policy, inaugurated last year, of furnishing all Sunday schools that desire the service with books to the maximum number of 100, has been continued without any serious trouble on the part of the library and to the general satisfaction of the Sunday schools. The Bow-street Methodist, the Broadway Congregational, the Prospect-hill Congregational, the Second Unitarian, the Winter-hill Congregational, the Winter-hill Universalist, and the Flint-street Methodist churches are now using these libraries. These churches send up representatives who select the books deemed desirable. These representatives are given a free range through the entire library. In every instance they have been permitted to select the books desired. If they select books for which the library feels an urgent pressing need we permit them even then to retain their selections and immediately purchase new copies of the book in question. If the library has such pressing need of a book that it cannot spare a copy for a Sunday school it is time to buy additional copies of that book.

During the year there have been delivered to the various Sunday schools and the Y. M. C. A. 1,129 books of fiction and 382 other works, making a total of 1,511.

New Registration.

During the year a new registration has been begun and is now practically completed. At the present date 7,699 names have been registered, and 7,699 new cards given out. According to our old registration 23,496 were registered as card-holders. It can now be seen that 15,797 of these have either died, moved away, or ceased to use the library. Our previous registration was made in 1895. In a period of eight years it is probable that only a moderate proportion of these 15,000 have died or moved away. The conclusion is inevitable that they have ceased to use the library. This is in accord with experience and observation. Many card-holders cease to use their cards after a short trial, and many use them only fitfully and occasionally. An inference to be drawn from this is that a large proportion of people fail to form a permanent habit of book-reading. Estimating the population of Somerville as 68,000, only one person in about nine is a card-holder, and it is safe to say that not more than 60 per cent. of our card-holders take out books with regularity. This leaves but a small percentage of the entire population. Even in Somerville, where we are inclined to be proud of our circulation, a limited number of the total aggregate of the people use the public library. I am more and more convinced of this truth every year. The public library

does not reach the people as a whole. Of course no compulsion or over-strenuous missionary work should be done to force the library upon the people. But the great problem of library management is to get its books generally read.

Agencies.

During most of the year the library has circulated books through seven different agencies. Early in November the library reluctantly abandoned its Beacon-street agency. The store at 287 Beacon street, where the library agency was located, was closed, and no other store in the vicinity could be secured to do the work. This agency was well patronized by its local community, and it is a matter of great regret that no means of opening a new one in that vicinity is as yet apparent.

There is so much work at present connected with the care of our agencies that it is a matter of growing difficulty to obtain suitable persons to conduct them. The time is drawing near when some other method of carrying on the agencies of the library must be devised.

Below is a table of circulation of the different agencies during the year:—

	West Somerville.	Teele Square.	East Somerville.	South Somerville.	Magoun Square.	Beacon Street.	Union Square.
January	773		371	279	11	135	
February	849		411	280	10	130

Remarks.

The present year, for the first time in the history of the library, we have purchased more duplicate than new books. This is in accordance with a deliberate purpose. It is believed that, outside the domain of fiction, a public library should have a

sufficient number of all the standard works to supply all legitimate public demands. The standard and great works in literature, history, science, music and the arts, in an ideal library, ideally conducted, should never be "out." There should always be duplicates enough to supply the demand. This ideal library can probably never be wholly realized, but it should be our aim to arrive at as close an approximation as possible. The library, for instance, that cannot furnish, upon demand, Tennyson's Poems, Spencer's "First Principles," Emerson's Essays, Plato's Dialogues, Fiske's Histories, or any of the works of the representative English or American authors, is not a thoroughly equipped library. To be sure the proper place for a public library book is "out." But an equally proper thing is for another book, just like it, to be "in." It should be the first aim of a library to get its books "out," and a second and equal aim to have other books "in" to supply their places. To this end a systematic effort has been made to purchase, as rapidly as the funds at our disposal will permit, an adequate number of duplicate copies of such works. This is an end that can be substantially accomplished in a period of three or four years, if a graduated increase of appropriation commensurate with our growing needs is secured. Very much has already been done along this line, and most standard books, outside of fiction and new books in great current demand, are usually "in" when asked for. It is a matter of chagrin that they are not always "in," and it is the aim of the library, in as short a time as it is feasible, to make it possible for such books always to be "in."

Of course this policy cannot be applied to novels. But a large number of novels should be bought. The literary genius of our time expresses itself largely through the novel; and it is the business of a public library to conserve and distribute the best product of the literary genius of all times. But most of the current novels are poor. When so they do not express the genius of the age, or genius of any kind. In such cases they should be ruthlessly rejected. But there are good novels, and a respectable number of them, published every year. These should be purchased and purchased in large numbers. Seventy per cent. of our people demand novels. They will read them; and if they are the right kind it is well they should. The duty of the library is then apparent. It should purchase this "right kind" and purchase them in large numbers. We should buy few individual novels. But these should be of the best and liberally supplied.

The library has had a prosperous and pleasant year. I wish to record my thanks for the faithful service of the staff, as well as for the generous co-operation of your board.

Respectfully submitted,

SAM WALTER FOSS,

Librarian.

December 29, 1903.

REPORT OF THE BOARD OF HEALTH.

OFFICE OF THE BOARD OF HEALTH, }
CITY HALL, January 1, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—We respectfully submit the following as the twenty-sixth annual report of the board of health, in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1903:—

Organization.

ALLEN F. CARPENTER, Chairman.

WILLIAM P. MITCHELL, Clerk.

CALEB A. PAGE, Agent.

Inspector of Animals and Provisions.

CHARLES M. BERRY.

Inspector of Milk.

JULIUS E. RICHARDSON.

Superintendent Collection of Ashes and Offal.

EDGAR T. MAYHEW.

Bacteriologist.

FRANK L. MORSE, M. D.

Nuisances.

A record of nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:—

NUISANCES ABATED IN EACH DISTRICT IN 1903.

(SEE DESCRIPTION OF DISTRICTS IN LATTER PART OF THIS REPORT.)

	I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Total.

Water-closet defective	20	8	7	13	9	14	11	7	5	14	108
Water in cellar	5	5	6	5	1	2	3	2	1	30
Water under stable	1	2	1	3	2	2	2	13
Total	197	71	112	103	76	113	76	47	54	69	918

Number of nuisances abated	918
Number of nuisances referred to board of 1904	54
Number of nuisances complained of	972
Number of complaints (many covering more than one nuisance)	582
Number of notices mailed	633
Number of notices served by constables	3

In addition to the above, 235 dead animals have been removed from the public streets, and many nuisances have been abated on verbal notice from the agent, without action by the board, of which no record has been made. Each spring the whole city is examined, and cellars, yards and alleyways where rubbish and filth have collected are required to be cleaned.

Glanders.—Fifty-one cases of glanders have been reported during the year. Prompt action was taken in every case, and forty-nine of the horses were killed, two being released from quarantine by order of the cattle commissioners.

Permits.

The record of permits to keep cows and swine, to collect grease, and to remove manure is as follows:—

Cows.—Forty-seven applications were received for permits to keep 138 cows. Forty-three permits to keep 112 cows were granted, and four permits were refused.

Swine.—Fourteen applications were received for permits to keep twenty-nine swine. Twelve permits were granted to keep twenty-five swine, and two permits were refused. The fee is one dollar for each swine.

Goats.—Seven applications were received for permits to keep eight goats. All were granted. The fee is one dollar for each goat.

Grease.—Nineteen applications were received for permits to collect grease, seventeen of which were granted. The fee is two dollars. Six of the parties licensed reside in Somerville, two in Charlestown, four in Cambridge, two in Boston, two in Chelsea, and one in Watertown.

Manure.—Fourteen permits were issued during the year for the carting of manure through the streets of the city in the daytime between May 1 and November 1. All permits issued for the removal of manure from the stables in the city in the daytime, or for carting through the streets of the city, remain in force until revoked. No fee is charged for these permits.

Melting and Rendering.—Seven parties have been licensed to carry on the business of melting and rendering, under the provisions of the revised laws of 1902, chapter 75, section 111.

Peddlers.

One hundred and six certificates of registration were issued to hawkers and peddlers during the year under the provisions of ordinance number 27—a decrease of sixteen from the year 1902. One hundred and forty-two certificates have been renewed during the year. Each peddler is required to present a writing from the sealer of weights and measures, showing that his measures have been properly sealed, before a certificate is issued to him. Peddlers are also required to present their vehicles at the police station the first Monday of each month for inspection by the agent of the board, that he may see they are kept in a clean condition, and are properly marked with the owner's name and number.

Ashes.

For several years past the ashes have been removed by this department with teams owned and men hired by the city, under a competent superintendent, who also superintends the collection of house offal.

Twenty-six men, with fifteen horses, thirteen carts, and four wagons for the collection of waste paper, are employed in the work.

The number of loads of ashes collected each month during the year was as follows:—

January	2,642
February	2,411
March	2,950
April	3,520
May	2,778
June	2,515
July	1,979
August	1,203
September	2,047
October	2,476
November	2,761
December	3,421
Total	<u>30,703</u>

The number of loads of paper collected each month during the year was as follows:—

January	180
February	145
March	201
April	286
May	267
June	270
July	231
August	194
September	211
October	239
November	215
December	220
Total	<u>2,659</u>

This paper has been sold to the Middlesex Paper Company, at seventy-five cents a load, and the amount credited to the appropriation for this department.

The collections are made weekly, as follows:—

Monday	in district one.
Tuesday	“ two.
Wednesday	“ three.
Thursday	“ four.
Friday	“ five.
Saturday	“ six.

MONDAY, DISTRICT NO. 1.

Comprises the entire area extending easterly to the cities of Boston and Cambridge, from a line drawn across Somerville, commencing on Mystic avenue, and extending through Cross street, Central square, Medford street, Washington street, Prospect street, Webster avenue, Tremont street to the Cambridge line, and including collection on both sides of the above-named streets along the division line described.

TUESDAY, DISTRICT NO. 2.

Comprises the entire area extending westerly from the previously-described district number 1 to a line drawn across the city, commencing on Mystic avenue, and extending through Wheatland street, across Broadway, through Walnut street, and extending across Bow street and Somerville avenue, through Hawkins street, Washington street, Perry street, Wyatt street, Concord avenue, crossing Beacon street to the Cambridge line, and including collection on both sides of the above-named streets along the division line described.

WEDNESDAY, DISTRICT NO. 3.

Comprises the entire area extending westerly from the previously-described district number 2, to a line drawn across the city, commencing at the Medford boundary line at Main street, and extending easterly along said Main street, across Broadway, through Sycamore street, thence easterly on Highland avenue, through School street, thence westerly on Somerville avenue, through Dane street and Washington street to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

THURSDAY, DISTRICT NO. 4.

Comprises the entire area extending westerly from the previously-described district number 3, to a line drawn across the city, commencing at the Medford line at Magoun square, and extending on Medford street to Lowell street, thence easterly on Somerville avenue and through Park street to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

FRIDAY, DISTRICT NO. 5.

Comprises the entire area extending westerly from the previously-described district number 4, to a line drawn across the city, commencing on Broadway, and extending through Willow avenue to the Cambridge line, and including the collection on both sides of the above-named streets along the division line described.

SATURDAY, DISTRICT NO. 6.

Comprises the entire area extending westerly from Willow avenue to the Medford, Arlington, and Cambridge lines.

RULES AND REGULATIONS FOR COLLECTION OF ASHES
AND OFFAL.

Ashes must be put in suitable receptacles not larger than an ordinary flour barrel, and must be kept free from all other refuse matter.

House offal or garbage must be kept free from all other refuse matter, and in suitable vessels.

All other refuse, such as paper, rags, excelsior, straw, mattresses, old clothes, pasteboard boxes, carpets, etc., must be kept free from ashes and garbage, and placed in suitable packages or barrels to prevent being scattered in handling.

All ashes and refuse matter for removal must be placed on the outer edge of the sidewalk, on or before seven o'clock in the morning of the day when the collection is to be made.

Earth, gravel, bricks, mortar, stones, lime, plaster, cement, concrete, or refuse material from repairs or construction of buildings will not be removed by this department.

The department will remove tree trimmings, vine cuttings, and yard cleanings during the spring and summer months.

Employees of this department are not allowed to enter cellars, cellar-ways, bulkheads, or areas for the removal of ashes or offal.

House Offal.

The house offal has been collected by the city during the year under the same system that has been employed in the removal of ashes, and which was adopted in both departments in the year 1895.

The force employed consists of twenty men, with ten horses and twelve wagons.

The following table, showing the number of loads collected each month during the year, may be of interest:—

January	542
February	480
March	520
April	520
May	510
June	520
July	520
August	520
September	550
October	555
November	520
December	515
Total	6,272

Stables.

Under the provisions of sections 69 and 70 of the revised laws of 1902 twenty-eight petitions for licenses to erect and use stables were received and disposed of as follows:—

Number granted	13
Number refused	14
Number referred to board of 1904	1

Board of Infants.

Seven parties, whose applications were first approved by this board, have been licensed by the state board of charity to care for fourteen children, in this city, under the provisions of chapter 83 of the revised laws of 1902.

Deaths.

There were 955 deaths and fifty-eight stillbirths in the city during the year, as specified in the following table, which shows an increase of deaths over the previous year of sixty-five:—

Deaths at Somerville hospital during the year	38
Deaths at home for aged poor (Highland avenue)	65

DEATHS BY AGES.

AGES.	Total.	Male.	Female.

Of the parents of the stillborn, 24 fathers and 27 mothers were natives of the United States, and 32 fathers and 30 mothers were of foreign birth. Birthplaces of two fathers and one mother unknown.

Diseases Dangerous to the Public Health.

This board has adjudged that the diseases known as small-pox, scarlet fever, diphtheria, membranous croup, typhus fever, typhoid fever, chicken-pox, and cholera are infectious, or contagious, and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either of these diseases and all cases of measles coming under their care, and postal cards conveniently printed and addressed are supplied to them for the

purpose. On receipt of a card from a physician, the superintendent of schools, the principal of the school in the district in which the patient resides, and the librarian of the public library are notified.

Scarlet Fever.—One hundred forty-six cases of scarlet fever have been reported during the year, ten of which resulted fatally. In 1902 there were seventy-eight cases, three of which resulted fatally.

Diphtheria.—Two hundred and eight cases of diphtheria have been reported during the year, nineteen of which were fatal. In 1902 there were two hundred twenty-four cases, nineteen of which proved fatal. Anti-toxin has been provided by the state board of health, and placed by this board in central locations for use by physicians in cases where people are unable to purchase the same. Culture tubes for diphtheria and sputum bottles for suspected tuberculosis have been obtainable at the same stations.

Warning cards are used in dealing with scarlet fever and with diphtheria, and the premises are fumigated by the use of the formaldehyde gas regenerator, immediately after the termination of the case. An inspection is made by the agent of the board of the premises where diphtheria is reported, and all sanitary defects discovered are required to be remedied as soon as possible.

Typhoid Fever.—Thirty-eight cases of typhoid fever have been reported during the year, ten of which have proved fatal. In 1902 there were twenty-eight cases reported, six of which were fatal.

Typhus Fever, Cholera.—No cases of typhus fever or cholera have been reported the past year.

Smallpox.—No cases of smallpox have been reported during the year.

Number of houses placarded	354
Premises disinfected by agent	438

Disinfection.

It will be seen by the foregoing figures that, in addition to the 354 premises infected with scarlet fever or diphtheria, eighty-four other premises were disinfected. This work was done at the request of attending physicians whose patients, in nearly all cases, had been ill with consumption, typhoid fever, or cancer. It has become the general practice among physicians to ask that rooms which have been occupied by persons suffering from consumption or cancer be disinfected.

Many library books have also been disinfected and quantities of infected bedding and other material have been burned.

TABLES.

The prevalence of scarlet fever, diphtheria and typhoid fever in the city during the several months of the year 1903 is shown by the following table, and in the table next following is given the number of deaths from these three diseases, by months, during the last ten years : —

Scarlet Fever, Diphtheria and Typhoid Fever Reported in 1903.

Compulsory Vaccination.

The work of compulsory vaccination was continued from January 1 to February 28, 1903. The board having been instructed by his honor, the mayor, that the work could not longer continue on account of lack of money wherewith to prosecute it, there being no cases of smallpox in the city, and the districts already vaccinated comprising nearly all the infected areas, it was voted February 17 that the work be suspended, and that the smallpox hospital be closed and the services of the matron dispensed with after February 19.

Following will be found the recapitulation of the work done from October 24, 1902, to February 28, 1903, inclusive:—

Number of Hours Worked.	Number of Inspections.	Number of Vaccinations.
3,652½	39,726	7,905

Statement of the total expenditures for compulsory vaccination from October 24, 1902, to February 28, 1903:—

Compensation to physicians	\$7,255 00
Clerical services	138 00
Janitor's services	97 27
Vaccine points	475 00
Card index, (including cards and case)	152 70
Printing	62 26
Advertising	52 50
Postage	11 05
Cotton, alcohol, etc.	33 25
Total	<hr/> \$8,277 03

Bacteriological Department.

The work of this department was performed by Frank L. Morse, M. D., whose report is appended to this report:—

Specimens will be received at the laboratory at the city hall daily, including Sunday, at any time, and they will be examined and reported upon the morning following their reception.

SPECIMENS AND ANTI-TOXIN.

Outfits for specimens for tuberculosis and diphtheria, and diphtheria anti-toxin, may be obtained at the laboratory and at the following places:—

Charles H. Crane, 154 Perkins street.

Milton H. Plummer, 25 Union square.

Percy A. Hall, 2 Studio building, Davis square.

Herbert E. Bowman, 529 Medford street, Magoun square.

Eugene B. Carpenter, 10 Broadway.

Julius E. Richardson, 310 Broadway.

Outfits for typhoid fever and malaria will be supplied from the laboratory only.

After the specimen is collected, it must be taken or sent directly to the laboratory at the city hall.

Districts.

The accompanying map shows the boundaries of the ten health districts into which the city was divided by the board of health of 1878.

A record has been kept from year to year of the number of deaths, the death rate per thousand, the prevalence of dangerous diseases, and the number of nuisances abated in these several districts, and is continued in the following tables, and in the table near the beginning of this report.

The estimated population in the several districts was originally based on the number of assessed polls in each, and upon the population of the entire city; the ratio of polls to population being presumed to be the same in all the districts. Substantially the same method of estimating the population has been continued, the census of every fifth year being taken as a basis for calculation.

The number of dwellings and of assessed polls May 1, 1903, has been obtained from the assessors' books.

Undertakers.

Under the provisions of section 44 of chapter 78 of the revised laws of 1902, sixteen persons have been duly licensed as undertakers, and two petitions for such licenses refused.

Examiners of Plumbers.

The public statutes provide for a board of examiners of plumbers, consisting of the chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Greene, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

Regulations.

The following health regulations have been adopted since the publication of the Somerville Municipal Manual of 1901, which contained the regulations then in force : —

CITY OF SOMERVILLE. }
IN BOARD OF HEALTH, November 4, 1901. }

Ordered, that the following regulation be and hereby is adopted:—

REGULATION FOR BARBER-SHOP.

The place of business shall be kept at all times in a cleanly condition. Mugs, shaving-brushes and razors shall be sterilized by immersion in boiling water after every separate use thereof. A separate clean towel shall be used for each person. Alum, and other material used to stop the flow of blood, shall be used only in powdered form, and applied on a towel. The use of powder puffs is prohibited. The use of sponges is prohibited. Every barber-shop shall be provided with running hot and cold water. No person shall be allowed to use any barber-shop as a dormitory. Every barber shall cleanse his hands thoroughly immediately after serving each customer.

The penalty provided for violating the above regulation is a sum not exceeding one hundred dollars.

CITY OF SOMERVILLE. }
IN BOARD OF HEALTH, July 21, 1902. }

Ordered, that the following regulation be and hereby is adopted:—

The Board of Health hereby adjudges that the exercise of the trade or employment of keeping one or more cows in the city of Somerville is a nuisance, hurtful to the inhabitants, injurious to their estates, dangerous to the public health, and attended by noisome and injurious odors, and hereby prohibits the keeping of one or more cows within the limits of the City of Somerville, without a written permit from this board.

Every person keeping a cow shall cause the place where it is kept to be well ventilated and drained, and kept at all times in a cleanly and wholesome condition. Such permit may be revoked at any time when such revocation shall appear to the board to be necessary for the public health and safety. All such permits shall expire on the first day of May annually.

Chapter XI. of the regulations of this board is hereby repealed.

CITY OF SOMERVILLE. }
 IN BOARD OF HEALTH, August 19, 1902. }

Ordered, that the following regulation be and hereby is adopted:—

No person other than members of this board and its agent and persons authorized by one of said members, or by said agent, shall approach nearer than one hundred and fifty feet of the hospital buildings now or hereafter located near North street in Somerville, and used for the reception of persons having smallpox.

Whoever violates the foregoing regulation shall forfeit not less than ten dollars nor more than one hundred dollars for each offence.

CITY OF SOMERVILLE. }
 IN BOARD OF HEALTH, November 9, 1903. }

Ordered, that the following regulation be and hereby is adopted:—

The Board of Health hereby adjudges that the exercise of the trade or employment of keeping one or more hens in the City of Somerville is a nuisance, hurtful to the inhabitants, injurious to their estates, dangerous to the public health, and attended by noisome and injurious odors, and hereby prohibits the keeping of one or more hens within the limits of the City of Somerville, without a written permit from this board.

Every person keeping hens shall cause the place where they are kept to be well ventilated and drained, and kept at all times in a cleanly and wholesome condition. Such permit may be revoked at any time when such revocation shall appear to the board to be necessary for the public health and safety. All such permits shall expire on the first day of May annually.

ALLEN F. CARPENTER, Chairman,
 ALBERT C. ALDRICH, M. D.,
 EDMUND S. SPARROW,

Board of Health.

REPORT OF BACTERIOLOGIST.

Somerville, January 26, 1904.

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith present the report of the bacteriologist for the year 1903.

During the latter part of December, 1902, in accordance with your vote, a laboratory was established at the city hall and regular bacteriological examinations were commenced upon January 1, 1903.

During the year, 817 examinations were made of cultures for the diphtheria organism, 137 examinations made of sputum from patients suspected of having tuberculosis, 72 examinations to detect the Widal reaction in typhoid fever, and seven examinations for making a diagnosis of malaria in patients showing symptoms of that disease.

With the beginning of the year your board established regulations, which required, in cases of diphtheria, that no patient should be released from quarantine until two consecutive negative cultures had been obtained from the patient, one by the attending physician and one by a physician representing the board, thus making the work more extensive than had been previously required. Culture stations were also established at four different parts of the city, which were later increased to six in number, to more generally accommodate the physicians of the city, at which places, in connection with the laboratory, culture outfits and sputum bottles could be obtained. The outfits for typhoid fever and malaria were to be obtained at the laboratory only. To avoid delay in the examination of specimens, it was required that all specimens should be sent to the laboratory at the city hall, thus obviating any delay through the culture stations. Specimens left at the city hall as late as midnight are placed in the thermostat immediately, making it possible for a result to be obtained early the next morning.

Diphtheria.—Eight hundred and seventeen cultures have been examined for diphtheria, 387 being in males, and 430 in females. Diphtheria being a disease of children, 282 of these examinations have been made in children under five years of age, 199 in those from five to ten years of age, 125 from ten to twenty and 185 in adults over twenty years. In twenty-six cases the age of the patient was not stated. Three hundred and sixty examinations were made for the diagnosis of the case, ninety-four proving positive, and 266 negative. Of the positive results fifty-six were of cases in which the attending physician's diagnosis of diphtheria was confirmed, eleven in which the clinical diagnosis was tonsilitis, and twenty-seven in which no definite diagnosis was made. Of the 266 negative examinations, thirty-five were obtained in which the clinical diagnosis was diphtheria, 122 in which the diagnosis was tonsilitis, and 109 in which no diagnosis had been made.

Four hundred and fifty-seven cultures were taken for release of patients from quarantine, ninety-five of which were positive, and 362 negative. The importance of taking release cultures is demonstrated by these figures, over fifty per cent. of the patients showing the presence of the bacilli in the throat after the clinical evidence of the disease has disappeared. In five examinations there was no growth upon the serum tube.

Tuberculosis.—One hundred thirty-seven examinations have been made of sputum suspected of containing the tubercle bacillus, twenty-six of which were positive and 111 negative. In thirty cases, a definite diagnosis of this disease had been made by the attending physician, but in four of them the organism could not be detected. In the remainder of the cases, seventy-four were stated as not showing evidence of the disease, and in thirty-three cases no statements were made giving information as to its character. Although printed directions accompany each outfit, telling how the specimen should be obtained, it has not been unusual for specimens to be sent to the laboratory containing only saliva from the mouth with no secretion from the lungs or bronchial tubes. Physicians should be urged to give definite instructions to each patient, relating to the collection of the sputum, for in some instances a negative report would mislead both physician and patient. Consumption, to-day, is recognized as an infectious disease, and all persons afflicted with it should be instructed in the modern methods for preventing its spread. In some cases this is not done by the attending physician, and it would seem wise for your board to require that this disease be reported to you, as other infectious diseases are to-day, and that printed instructions and advice be sent to each patient ill with the disease. The decrease in the death rate of consumption, and the cure of persons afflicted with it, is due to the improved and intelligent manner with which cases are treated, and the prevention of further spread of the disease is a subject which is of importance to all local boards of health.

Typhoid Fever.—Seventy-two examinations of the blood of patients suspected of having typhoid fever have been made, twenty-seven of which proved positive. In twenty-nine cases a positive diagnosis of this disease had been made by the attending physician; in six, it was definitely stated not to be typhoid fever; and in the remainder, no statement was made relating to the diagnosis.

Malaria.—Seven examinations were made of the blood of patients suspected of having this disease, all of which proved negative, and the disease cannot be considered as one of prominence in this city.

Respectfully submitted,

FRANK L. MORSE, M. D.,

Bacteriologist.

REPORT OF INSPECTOR OF ANIMALS AND PROVISIONS.

Somerville, January 1, 1904.

To the Honorable, the Mayor, and the Board of Aldermen:—

Gentlemen,—I submit the following report as inspector of animals and provisions for the year ending December 31, 1903.

I have inspected, examined, condemned, and caused to be destroyed,—3,863 pounds fresh beef, 169 pounds corned beef, 453 pounds veal, 34 calves, 9 livers, 221 pounds fresh pork, 94 pounds mutton, 569 pounds poultry, 1,192 mackerel, 1,263 herring, 1,167 pounds cod and haddock, 65 pounds halibut, 723 pounds pollock, 14 boxes smelts, 181 pounds swordfish, 39 lobsters, 116 crabs, 3 bushels clams, 15 quarts clams, 1 bushel oysters, 212 cabbage, 39 bushels potatoes, 17 bushels sweet potatoes, 11 barrels greens, 13 barrels squash, 4 bushels parsnips, 5 bushels carrots, 5 boxes celery, 14 crates tomatoes, 683 bananas, 54 boxes berries, 15 boxes lemons, 3 barrels and 8 boxes oranges, 8 bushels apples, 6 bushels pears.

Twelve hundred and ninety-three horses have been examined for contagious diseases, of which fifty-one were quarantined, forty-nine being subsequently killed, and two released.

One hundred and forty-five cows kept within the confines of the city have been examined, as required by the state board of cattle commissioners. One, which was quarantined, was afterward killed, it having tuberculosis. All cow barns in the city have been measured.

The bakeries and restaurants throughout the city have been inspected. I find great improvement in them as to cleanliness.

Stores, markets and peddler carts to the number of 1,448 have been examined.

The number of animals killed at the five slaughtering establishments in the city was as follows: 1,127,458 swine, 329,517 sheep, 54,969 calves, 23,494 cattle; total, 1,535,438.

I have performed the duties as agent for the society for the prevention of cruelty to animals to the best of my ability.

Respectfully submitted,

CHARLES M. BERRY,

Inspector of Animals and Provisions.

REPORT OF INSPECTOR OF MILK AND VINEGAR.

Somerville, January 1, 1904.

To the Board of Health:—

Gentlemen,—I herewith submit my report for the year ending December 31, 1903.

I have issued 258 licenses to sell milk, cream, and condensed milk. I have collected and analyzed 575 samples of milk from stores, and 241 from wagons on the street, making a total of 816 samples collected and analyzed.

I found it necessary to send only sixty-one notices that milk was below the standard, which shows that our supply of milk is the best of my three years in the office.

I have collected and tested thirty-six samples of vinegar, and have made no complaints, as they all practically stood the test of Massachusetts standard.

I have inspected butter wagons as I found them on the street. None of these are licensed to sell oleomargarine, but several stores have been so licensed.

Three hundred and ninety stores and 135 wagons have been licensed to sell milk. Five wagons have been licensed to sell cream, one to sell skimmed milk, and two condensed milk. There are about 2,800 cans, or 5,600 gallons of milk delivered to families in the city every day, and about fifty cans of cream.

I have had one butter complaint from a citizen, and found upon analysis it was renovated butter, and so reported to the complainant. He was not sure of the store where he bought it so nothing further was done.

Several citizens have brought samples of milk for analysis, reports of which have been made to them. I wish to repeat my last year's invitation to any citizen who thinks the milk he receives is not up to the standard, to have it tested free of charge by bringing a sample to my office. Milk of the quality required by law is what every one is entitled to receive, and my duty is to see if they get it. Therefore, I ask every citizen's co-operation.

I have paid to the city treasurer the following amounts:—

For licenses	\$129 00
For postage stamps	1 18
For cans and stoppers sold	1 86
Total	<hr/> \$132 04

The city treasurer has received from court fines imposed through the prosecutions of this office the sum of \$188, as follows:—

1 milkman, for coloring milk	\$50 00
1 milkman, for selling poor milk	10 00
6 storekeepers, for selling poor milk, \$10 each	60 00
1 storekeeper, for watering his milk	50 00
1 storekeeper, for selling poor milk	15 00
1 storekeeper, for selling milk without license	3 00
	<hr/>
Total	\$188 00

making the total returned to the city from this office \$320.04.

I spent eight days in court.

My office, at 310 Broadway, is open every day from 7 A. M. to 10 P. M.

Respectfully,

JULIUS E. RICHARDSON,

Inspector of Milk and Vinegar.

Telephone, 21837 Somerville.

REPORT OF OVERSEERS OF THE POOR.

OFFICE OF THE OVERSEERS OF THE POOR, }
Somerville, Mass., December 31, 1903. }

To the Honorable, the Mayor, and Board of Aldermen, of the City of Somerville:—

Gentlemen,—According to our usual custom, we herewith submit our annual report for the year 1903.

Owing to the increase in expenditures, especially for the support of the insane, the appropriation amounting to \$21,630 was not sufficient to pay the bills of this account, by some \$1,491.11. The aid to families has been about the same as in 1902, although less coal was given; but the high prices the first of the year more than balance the smaller quantity, making the cost about the same. Families have been aided to dry goods, clothing, boots and shoes, and groceries, in about the same quantities as in 1902. Aid in burials has cost the city about one-half of what it did last year. There have been 218 families aided during the year, comprising 1,119 persons. The city home and Somerville hospital are of great value in the work of the department. Nine state paupers have been committed to the state hospital at Tewksbury.

The amount paid out for the support of the insane poor, including the feeble-minded and dipsomaniacs, has been \$16,651.44. We shall need about one-quarter of this amount for this purpose the next year, owing to the fact that the bills for their support will be paid by the state after January 1, 1904. The last quarter of this year, from October 1 to December 31, however, will have to be provided for in the appropriation of 1904. The law authorizing the state to take charge of the insane January 1, 1904, was passed in 1900, and is as follows:—

1900. Chapter 451.

AN ACT TO PROVIDE FOR THE CARE OF THE INSANE BY THE STATE BOARD OF INSANITY AND TO ESTABLISH THE STATE COLONY FOR THE INSANE.

SECTION 1. The Commonwealth, from and after the first day of January in the year nineteen hundred and four, shall, by the officers and boards authorized thereto, have the care, control and treatment of all insane persons who are now cared for by the Commonwealth, or by any city or town, or by any board of officers thereof, or who may be committed to the institutions of the Commonwealth established by law for the care of the insane; and no city or town shall hereafter establish any asylum or other institution for the care of the insane, nor after said date

maintain any such institution or be liable for the board, care, treatment or act of any insane person. As soon as practicable after the first day of January in the year nineteen hundred and four the state board of insanity may transfer all insane persons who are cared for by the Commonwealth, or by any city or town, or by any board of officers thereof, and who are not cared for in any hospital, asylum or receptacle maintained by the Commonwealth, to such hospital, asylum or receptacle so maintained as the said board of insanity may deem expedient; but nothing contained in this act shall be held to prevent the state board of insanity from placing insane persons at board in accordance with the provisions of law.

The following tables give the details of the work of the department:—

City Home.

Owing to grading the lawns and other permanent work which has been done to improve the grounds during the past season the farm work has been somewhat retarded.

Considering the cold, backward season and short crops of vegetables we have had a very successful season on the farm. Better prices have been received than during 1902, two thousand five hundred and fifty-seven dollars and sixteen cents having been realized from the sale of produce and pork.

During the year four hundred and sixty-six feet of steel wire fence have been built on Broadway. Also, thirteen hundred and seventy-seven feet and six inches of six-foot high wooden picket fence have been built from the bridge on Broadway to the rear of the city home buildings and from the rear of the Irving Russell house along North street and the boulevard to Alewife brook.

The old spring in the meadow has been drained by laying two hundred and thirty-eight feet of six-inch tile pipe, bringing three fourths of an acre more land under cultivation.

The produce raised on this land during the season has practically paid for all the expense incurred in draining the spring.

One hundred feet of six-inch pipe have been laid and a covered cesspool built to take care of the waste water from the wash house.

A driveway with a stone foundation has been built in the rear of the outbuildings with an entrance from North street. All heavy teaming will now be done over this driveway.

The lawns, which were partly graded during the fall of 1902, were brought to grade and seeded down, which adds greatly to the appearance of the grounds.

Three hundred and ninety-eight and five-tenths square feet of artificial stone walk with steps and buttresses have been laid from Broadway to the front entrance and the office door.

Products of Farm.

The following is the amount of produce raised on the farm during the past year, but which does not include the vegetables required for use in the home:—

46,000 roots celery; 11,526 heads lettuce; 16,451 bunches beets; 13,484 bunches radishes; 2,403 bunches onions; 1,342 bunches carrots; 1,608 heads endive; 4,733 cucumbers; 450 summer squash; 213 bushels beet greens; 121 bushels string beans; 107 bushels onions; 409 bushels spinach; 181 bushels dandelions; 94 bushels celery leaves; 6 bushels peppers; 19 bushels beets; 18 bushels peas; 20 bushels tomatoes; 15 bushels carrots; 18 barrels apples; 3,127½ pounds pork, 77 pigs.

EDWARD B. WEST,	}	<i>Overseers of the Poor.</i>
ALBERT W. EDMANDS,		
HERBERT E. MERRILL,		

REPORT OF THE CITY PHYSICIAN.

OFFICE OF CITY PHYSICIAN, }
January 20, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—The following is a summary of the work I have performed during the year ending December 31, 1903:—

Thirteen hundred and eleven house visits have been made. Six hundred fifty-five persons were treated at my office. Forty persons were vaccinated. Eleven women were attended in childbirth. One hundred eleven persons have had teeth extracted. Twenty-three visits have been made at the police station. Under the rules of the board of health two hundred and nine cultures for release have been taken in cases of diphtheria.

A hospital for contagious diseases is becoming more and more a necessity. I believe that in not a few instances lives would be saved if the first case of diphtheria or scarlet fever that appears in a household could be removed to the hospital. The lack of proper sanitation in many of the homes, especially of the poor, without doubt increases the mortality.

Many cases should be cared for by a trained nurse. Again, the time of the quarantine would be much less, which is a matter of no small importance. Sometimes the children of two families are kept from school for three or more weeks on account of one case. Such an institution is much needed and would be a blessing to our city. Whatever tends to promote the health and safety of the community should not be neglected. I therefore recommend that a hospital for contagious diseases be established.

Respectfully submitted,

ALVAH B. DEARBORN,

City Physician.

REPORT OF THE CITY ENGINEER.

OFFICE OF THE CITY ENGINEER, }
CITY HALL, SOMERVILLE, January 20, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—In accordance with the provisions of the city charter, the following report of the work done and expense incurred for the year ending December 31, 1903, by the departments under my charge and supervision, including Engineering, Sewers, Public Grounds, and other public works, is herewith presented.

ENGINEERING DEPARTMENT.

Statement of Expenses, 1903.

Salary City Engineer (including maintenance of team)	\$2,800	00
Salaries of assistants	8,101	91
Stakes, tools, and general supplies (outside work)	78	89
Draughting materials and office supplies (inside work)	115	15
Maps and binding plans	64	25
Setting stone bounds for defining street lines	252	19
Car fares	209	57
Telephone, postage, and incidentals	96	89
Transferred to Observatory on Prospect Hill account	303	03
Total expenditure in the department		\$12,021 88
CREDIT.		
Appropriation	\$11,900	00
Amount received for making acceptance plans	28	00
Amount received for inspection services, sewer construction work	3	75
Amount received from Boston Elevated Railway Co., services rendered	107	80
Amount received from City of Medford, services rendered	120	23
Amount received from Metropolitan Park Commission, services rendered	20	00
		\$12,179 78
Balance unexpended		\$157 90

Classification of Expenditures, Assistants' Salaries.

Sewers,—comprising surveys, estimates, profiles, lines, grades, titles, plans, assessments, and all engineering work relating to sewers	\$2,441 11
Highways,—comprising plans, estimates, titles, profiles, lines and grades, and all other engineering relating to the department	756 66
Sidewalks,—comprising profiles, lines, grades, measurements, titles, costs and assessments	959 38
Bridges and Subways,—comprising surveys, plans and estimates	58 02
Water Works,—comprising lines, grades, locations of mains, gates, hydrants and services, and other matters relating to water department	221 11
Public Grounds,—comprising surveys, plans, estimates, profiles and grades, including laying out of parks and grounds	283 81
Public Buildings,—comprising surveys, estimates, lines and grades, and other work relating to construction	66 04
Street Numbering,—comprising locations of buildings, plans and affixing street numbers on houses	351 82
Street Lines and Grades,—comprising establishing of lines, grades, and miscellaneous data given parties for building and grading	105 91
Middlesex Registry,—comprising copying of plans and abstracts from deeds filed, and examination of titles	131 27
City Survey,—comprising lines, angles, and measurements, calculations of traverses, and locations of division lines and buildings	764 84
Prospect Hill Park,—comprising surveys, calculations, taking of land plans, construction plans, profiles, deeds, and general engineering work in laying out and constructing	760 69
Railway, Telephone, Electric Light, and Gas Light Companies,—comprising grades, plans, profiles, and office notes, locations of poles and conduits	49 74
Stone Bounds,—locating and setting	182 43
Office Work,—comprising records of all locations, indexing, typewriting, calculations, and general draughting	603 16
Miscellaneous Work,—comprising preliminary surveys, designs, sketches, etc., relating to various schemes for different committees	50 74
Vacations and Sickness	315 18
Total	<hr/> \$8,101 91

Office Records and Value of Instruments.

Number of survey note books, sewer permit books, and deed books	250
Number of plans, including sewers, highways, parks, house lots, etc.	6,000
Value of field instruments, tools, and office instruments	\$1,500 00

The total cost of maintaining the city engineer's department since it was established (1872-1903, both years inclusive), has amounted to \$203,020.50.

General Work. The number of assistants employed during the year has varied according to the amount of work, the regular department force being ten and the maximum number employed fourteen.

The office work has been continued on the same general system as in past years, all survey notes and records of sewers, drains, highway work, water works, etc., have been indexed, all plans of estates in Somerville filed at the registry of deeds, East Cambridge, have been copied and indexed, and all new plans of work made in the office recorded for future reference.

Titles have been examined and abstracts from deeds made at the East Cambridge registry for the purpose of assessing on the property owners of estates assessable for the construction of new highways, sidewalks, and sewers; and amounts computed and schedules of assessments made out for the proportional part of the cost of construction.

A number of street names have been changed and new street numbering plans have been made, old plans revised, houses plotted and numbers affixed to buildings throughout the entire city. There are many streets, avenues, courts, and places in the city of the same or very similar name, which should be changed to prevent the confusion and inconvenience now existing.

During the year the department has made plans and established grades for the acceptance under the betterment act, of eight new public streets, a total length of one mile; all of these plans have been copied and filed at the Middlesex registry as required by law. A portion of these streets have been graded and macadamized and assessments levied.

In conjunction with the acceptance and laying out of Clarendon avenue as a public highway by the city, agreements have been executed with the abutting owners of ledge property so that blasting and the removal of stone from this ledge can be carried on under certain restrictions, and when the work is entirely completed the present dangerous and unsightly ledge-hole, over which there has been so much controversy in the past as to blasting rights, will have been improved in appearance and the city's valuation increased in this locality.

A number of plans have been made and photographs taken at the request of the city solicitor, for the various departments, to be used in court cases and hearings where accidents have occurred and the city's interests were involved or damages claimed by reason of some work done by the city.

Surveys and plans have been made for the purpose of acquiring land for new public buildings, and lines and grades given for construction work on new schoolhouses and fire stations.

A large amount of engineering services has been required in making plans and profiles, and laying out and constructing the new park and observation tower on Prospect Hill and new playgrounds in different sections of the city.

Lines and grades have been given for setting 18,273.5 linear feet (3.46 miles) of new edgestone, and the resetting of 11,810.5 (2.24 miles) of old edgestone, and the measurements taken for computing assessments.

7,617.7 square yards of new brick sidewalks and 215.4 square yards of granolithic walk have been laid (about 2.08 miles in length) and 5,856.6 square yards of old brick sidewalks relaid.

5,988 square yards of new paved gutters have been laid and 548 square yards of new brick, concrete, and granite crossings constructed, requiring lines, grades, and measurements. (See tables in this report for cost of work and total lengths of sidewalks constructed in the city.)

The average cost for the year of setting edgestone has been eighty-one and one-half cents per linear foot and laying brick sidewalks ninety cents per square yard.

Lines and grades have been given, measurements taken, and computations made for the laying out and constructing of new streets, the reconstructing and repairing of old streets. In the construction of new streets and sidewalks the department work should be so changed that the city engineer shall keep a tabulated account of the total cost of the entire work, including all measurements and materials used, so that the correct cost is readily obtainable and assessments can be accurately made.

Lines and grades have been given for paving with granite blocks a section of Church street, south of Somerville avenue, an area of 728 square yards.

Lines and grades have been given the water department when requested.

9,480 feet of new mains with hydrants and gates have been located; 144 water services located and sketches made showing the buildings, services, gates, etc., for the water office.

During the year stone bounds have been set in concrete at street intersections and angles, for permanently defining street lines, and there are many more of these bounds to be set in various parts of the city as the yearly appropriation will allow.

The gas, electric light, telephone and street railway companies have filed plans showing locations in the city's streets of mains and tracks laid and poles erected as required by the city ordinances.

THORNDIKE-STREET SUBWAY, WEST SOMERVILLE.

The Boston Elevated Railway Company has been granted permission to lay double tracks in sections of Springfield street for turnouts and when completed there will be less delay on this line. This being a narrow street the roadway is to be paved from curb to curb where the turnouts are laid. Alterations and improvements have been made in the track locations at the junction of Cross street and Broadway, and the double track location rebuilt with heavy rails on Broadway, from the Charlestown line to Winter Hill, the grade being materially changed through the parkway. A petition is still pending before the board of aldermen for a double track location in Mystic and Middlesex avenues from the Charlestown line to the Fellsway boulevard, and extending to Wel'ington and Medford.

The laying of these tracks will necessitate the filling to grade, macadamizing, and constructing of these avenues to their full width, sixty-six and sixty feet, respectively, at a cost of about \$7,400.

Bridges, Subways, and Grade Crossings. The new bridge over the Boston & Maine railroad at Sycamore street, commenced in 1902, has been completed, and at School street a new bridge has been constructed the full width of the highway, fifty feet. Granite abutment walls were built in new locations, lengthening the bridge and necessitating the changing of the grade of the city's highway; the railroad company bearing the total expense of constructing these bridges.

Another highway bridge should be constructed over the line of this railroad, at Lowell street, a most important cross-town street in the centre of the city. Probably satisfactory arrangements can be made with the railroad company for the building of this bridge in the near future.

A new bridge has been constructed by the metropolitan park commission over Mystic river, on the line of the Fellsway boulevard and Middlesex avenue. This bridge is about 515 feet long in Somerville, and seventy feet wide, with a roadway fifty-four feet in width and equipped with a retractile draw. The boulevard in Somerville between this bridge and Mystic avenue is to be widened.

A subway has been constructed for foot passengers under the Lexington and Arlington branch of the Boston and Maine railroad at Thorndike street, West Somerville. This under-pass is wholly within the railroad location, being eighty-five feet long, eight feet wide, and seven feet high, inside dimensions, constructed mainly of Portland cement concrete with I beams supporting the roof. The side walls are finished with opalite tile and the floor and steps of granolithic construction with iron hand-rails and guards at the entrances.

The contract was awarded by the Boston and Maine railroad company and the work completed under the supervision and in-

spection of the city's engineering department; the total cost of the structure amounting to about \$3,800, the city bearing the total expense.

On the Fitchburg division of the Boston and Maine railroad, there are nine grade crossings within the city limits, a number of which are dangerous and should be abolished as speedily as possible. The city has a petition pending before the courts in reference to the abolition of these grade crossings.

Two of these crossings, at Somerville avenue and Medford street, on account of their location must be changed at the same time, and will require a large expenditure of money and extensive alterations in streets, railroads, buildings, and other property in the vicinity, involving the interests of many parties; the other seven crossings could be abolished independently of the Somerville avenue and Medford street work.

There are also six grade crossings on the line of the Lexington and Arlington branch of the Boston and Maine railroad in Somerville, where any contemplated change in grade would necessitate the treatment of all these crossings at one time and require the co-operation of the city of Cambridge.

The past year an act was passed by the Legislature authorizing the cities of Somerville and Cambridge and the towns of Arlington and Belmont to improve the condition of Alewife brook and streams above.

After a number of conferences with the representatives of these cities and towns, Somerville's engineer was selected to present a plan for this proposed improvement and surveys. Plans and estimates and considerable engineering work has been done and data presented to the Metropolitan park commission to be used in preparing plans and estimates for the proposed improvement of a large district adjacent to Mystic river and Alewife brook, to be treated in a manner similar to the Charles river dam scheme. A report and plan will probably be presented early the coming year.

Streets Accepted as Public Highways in 1903 under the Betterment Act.

Materials on hand December 31, 1902	684 64	
		\$34,017 70
Balance unexpended		\$1,374 58

In the construction of sewers the past year a portion of the work has been done by the city, employing day labor, and the remainder by contractors. The "separate system" sewers (those built for house drainage only) have been extended during the past year in various streets in different sections of the city, and this work should continue yearly, as the appropriation will allow, until all flooded areas in the city have a new sewerage system; all house drains in these districts should be re-connected with the new sewers as soon as built.

One of the main lines has been extended on the southwesterly side of Beacon street, from Museum street to Harris street, about 1,403 feet of ten-inch pipe being laid. Another main has been extended on the southerly side of Somerville avenue, from the Fitchburg railroad crossing easterly, about 346 feet of twelve-inch pipe being laid to take the drainage from one of the slaughtering houses. Separate system sewers have also been laid in College avenue and Elmwood terrace. In Maple street the old sewer has been converted into a separate system sewer.

Sewers on the "combined system" have been built and extended in Highland road, Lexington avenue, Munroe street, Osipee road, Packard avenue, and Teele street, Powder House boulevard, and Winslow avenue.

VIEWS—STORM DRAIN OUTLET,
MIDDLESEX AVENUE, 10 FEET X 7.5 FEET.

An agreement has been executed with the owners of the marsh land lying between Mystic and Middlesex avenues, near Winthrop avenue, whereby the city has obtained a permanent right of way for drainage purposes.

For many years the city has paid an annual rental for the use of an old water course across this private property, and by the construction during the year of a permanent drain in the right of way obtained, the main drainage outlet for the eastern district of the city has been completed.

The new structure built extends from the tide-gate chamber constructed in Middlesex avenue the previous year, southwesterly in Middlesex avenue and across the marsh land in the proposed location of a new street to the junction of Mystic and Winthrop avenues, where it connects with the bell-mouth chamber previously built and takes the drainage from an area of over 400 acres discharging through three large structures at this point.

The new drain is constructed principally of Portland cement concrete re-enforced with expanded metal and I beams in the roof construction, and is ten feet wide, seven and one-half feet high and about 880 feet long, being the largest structure in the city's drainage system.

In connection with this work and on either end of the new structure the tide-gate and bell-mouth chambers have been completed.

A short section of storm drain has been constructed in Vernon street between Glenwood road and Partridge avenue, and a new drain for storm water laid in Maple street.

Drainage has been completed for the Thorndike-street subway, the pond and fountain on Central Hill park, the tower on Prospect Hill park, the Broadway athletic field, the Morse school yard and brick masonry gate chambers constructed for the water department.

Metropolitan Sewer Connections. The city's assessment for the metropolitan system for the past year was \$28,438.09 on construction, and \$18,150.28 for maintenance.

There are ten connections with the north metropolitan sewerage system within the city's limits and four connections through other cities, taking the discharge of the city's entire house drainage system.

The cost of making these main sewer connections has been \$17,870.76 and the amount paid the state to January 1, 1904, on construction account has been \$299,371.93, and for maintenance \$120,860.24, making a total cost to the city to date on account of the construction of the metropolitan sewerage system \$438,102.93.

At the Somerville-avenue and Poplar-street connection with the metropolitan sewer, records compiled from an automatic recording clock placed in the regulator chamber on the combined system, show this outlet to have been cut off as follows:—

Year 1900	completely closed	353	hours,	partly closed	114	hours.
“ 1901	“	386	“	“	225	“
“ 1902	“	376	“	“	377	“
“ 1903	“	180	“	“	167	“

Summary of Work. Fourteen new sewers and drains have been constructed during the year, a total length of 6,527.6 feet (1.24 miles) and plans made and assessments levied amounting to \$2,850.49. (See table of sewers.)

The total length of the city’s drainage system is 88.36 miles, 17.38 miles being on the “separate system” and 4.68 miles of storm drains, and the entire cost of construction has been about \$1,131,211.00 exclusive of the amount paid the state for the construction and maintenance of the north metropolitan system.

Thirty-eight new catch basins have been constructed on the highways during the year at an average cost of \$49.67 per basin, making a total of 1,266 catch basins in the city for street drainage purposes.

Sewers Maintenance Account.

STATEMENT OF EXPENSES, 1903.

Maintenance of sewers, including cleaning and flushing	\$4,165 50
Maintenance of catch basins, cleaning and flushing	4,447 01
Changing line and grade and repairing man-holes	122 75
Changing line and grade and repairing catch basins	843 47

Value of tools and property used in mainte- nance of sewers		\$809 86

The work and cost of maintaining the city's drainage system increases yearly as new lengths of sewers and storm drains are built and more catch basins added, requiring continuous labor in cleaning, flushing, repairing, etc., to be kept in working order, that the sanitary condition of the city may be maintained at its best.

Over 6,000 cubic yards of material have been removed from catch basins and sewers during the past year, and many blow-off connections from the water mains opened and the sewers flushed. Ninety-seven catch basins have been repaired, grade changed or re-built; twenty-nine manholes, line or grade changed, and ten sewers or storm drains repaired. About one hundred feet of sewer has been re-laid and three new manholes built on old sewers.

During the year 259 permits have been issued to licensed drain layers for connecting buildings with the main sewers, thirty-five being for repairs; all of the work being done under the supervision of the city's inspector. There are about 12,525 private drain connections with the city's drainage system.

The automatic recorder in the regulator chamber at the Somerville-avenue and Poplar-street connection with the metropolitan sewer shows this outlet to have been completely closed for 167 hours and partially closed 180 hours during the year.

Two of the city's largest outlets for storm drainage are through the city of Cambridge into tide water; the one for the southeasterly section of the city, extending through East Cambridge and discharging into Charles river, was constructed many years ago, Somerville paying five-ninths of the cost of construction and has paid five-ninths of the cost of maintenance of this outlet for nearly thirty years, under an act of the legislature. This matter should be considered and re-adjusted on a more equitable basis, the prevailing conditions being far different from what existed many years ago, when the present act was passed and would require the passage of a new act by the legislature authorizing a change.

PUBLIC GROUNDS DEPARTMENT.

The department covers a varied line of work, including the designing, laying out, and constructing of new parks, boulevards and drives, athletic fields and smaller playgrounds, the care and maintenance of all the grounds after completion, the control of all the various athletic games on the different playgrounds, the purchasing of all supplies and a general supervision, at present, over sixteen separate parcels of land located in all parts of the city, amounting to about fifty-eight acres, and a boulevard one and one-third miles in length.

New Work. The land previously purchased for park purposes on Prospect Hill and partially laid out has been practically completed during the year. The roadway has been finished, walks graded, steps built, and beds of shrubbery and trees planted.

An observation tower has been constructed on top of a portion of the old original hill, left at its highest elevation, opposite Greenville street. This tower is built of rock-faced, Deer Isle granite laid in broken-ashlar masonry, the elevation of the top floor being 161.8 feet above mean low tide. The corner stone was laid July 7, 1903, and the park was dedicated with appropriate exercises on October 29, 1903.

This park will always be of historical interest on account of the encampment of soldiers on this hill both in the revolutionary and civil wars, and bronze tablets with inscriptions of historical events (prepared by the Somerville Historical Society) have been erected.

The inscription on the tablet placed in the tower is as follows:—

THIS TABLET IS ERECTED
IN MEMORY OF THE
SOLDIERS OF THE REVOLUTION
AND OF THE CIVIL WAR
WHO ENCAMPED ON
PROSPECT HILL
AND OF THE BANNERS
UNDER WHICH THEY
VALIANTLY FOUGHT.

THIS TOWER AND PARK
DEDICATED OCTOBER 29, 1903.

Another tablet placed on the face of the granite retaining wall at the base of the tower has five inscriptions, as follows:—

THE AMERICAN ARMY UNDER GENERAL PUTNAM
ON JUNE 17, 1775
WITHDREW FROM BUNKER HILL TO THIS HEIGHT
AND HERE ERECTED THE
CITADEL
THE STRONGEST WORK
IN THE BESIEGING LINES OF BOSTON
AND WHICH FOR NINE MONTHS WITHSTOOD
THE BRITISH BOMBARDMENT
JUNE 17, 1775, TO MARCH 17, 1776.

HERE ON JULY 18, 1775
WAS RAISED AMID GREAT REJOICING THE FLAG
PRESENTED TO GENERAL ISRAEL PUTNAM
AND HIS HEROIC SOLDIERS,
BEARING THE MOTTO OF CONNECTICUT
"QUI TRANSTULIT SUSTINET"
AND OF MASSACHUSETTS, "AN APPEAL
TO HEAVEN."

FROM THIS EMINENCE
ON JANUARY 1, 1776
THE FLAG OF THE UNITED COLONIES,
BEARING THIRTEEN STRIPES AND THE CROSSES
OF SAINT GEORGE AND SAINT ANDREW,
FIRST WAVED DEFIANCE TO A FOE.

"THE FLOWER OF THE BRITISH ARMY"
PRISONERS OF WAR
WHO SURRENDERED AT SARATOGA
WERE QUARTERED ON THIS HILL
FROM NOVEMBER 7, 1777, TO OCTOBER 15, 1778
GUARDED BY AMERICAN TROOPS
UNDER GENERAL WILLIAM HEATH.

ON THIS HISTORIC HILL
ANSWERING THEIR COUNTRY'S CALL
IN 1862
ENCAMPED THE SOLDIERS OF SOMERVILLE
WHOSE RECORD OF PATRIOTISM AND FORTITUDE
IN THE CIVIL WAR
IS WORTHY OF HIGHEST HONOR
AND COMMEMORATION.

On Central Hill park a rockery and basin with two smaller drinking fountains have been constructed with money left under the will of Joseph F. Wilson. The rockery is composed of irregular shaped rock cemented together in the form of a pyramid, from which many streams of water spout into a pond at the base, and so constructed that it can be illuminated by electric lights when desired. Shrubbery is to be added for a background the coming spring. The cost of the work follows:—

VIEWS OF OBSERVATION TOWER, PROSPECT HILL PARK.

A small area at the corner of Poplar street and Joy street (the old Bennett school lot) has been put in use as a playground for the children; the old schoolhouse has been removed, the lot graded and swings, tilts, etc., added.

At Lincoln park a large portion of the old clay pit has been filled with ashes and other material, a straight-away running track completed and a new fence, ten feet in height, erected along the westerly boundary of the park for the protection of the adjoining property.

A system of under-drains has been laid for taking care of the surface and ground water at the city's athletic field on Broadway, near Powder House square; and on Central Hill park new steps and hand rails have been placed at the Medford-street and Walnut-street entrances.

The principal parks, Broadway, Central Hill, Prospect Hill, Lincoln, and Tufts, have been policed by regular officers from the police department during the summer months. Trees and shrubs have been added, bulbs, plants, and flowers furnished in their seasons and skating provided during the winter.

Three ball fields, out-doors gymnasium, bicycle track, tennis courts, etc., have been kept in condition and used constantly throughout the year by various athletic teams.

The Powder House boulevard has been maintained at small expense and a number of buildings have been erected on this driveway the past year.

The remaining portion of the field at the corner of Broadway and Cedar street should be graded and the Glen-street grounds enlarged by additional land in the rear, making a better proportioned playground, whenever an appropriation is available.

APPENDED TABLE.

Following this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1901 report a table was given showing the locations and names of public squares in the city.

ERNEST W. BAILEY,
City Engineer.

TABLE SHOWING THE LOCATION, LENGTH AND WIDTH OF PUBLIC AND PRIVATE STREETS.

STONE CRUSHER PLANT.

CITY LEDGE, HOLLAND STREET AND BROADWAY.

REPORT OF THE STREET COMMISSIONER.

OFFICE OF THE STREET COMMISSIONER, }
January 1, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

I herewith present to you the twenty-eighth annual report of the highway department, which covers the work performed during the year ending December 31, 1903.

The question, how to make and how to maintain good streets, is constantly being agitated by the public as one of the most important concerns of the highway department.

During the past years miles of streets have been dug up for sewers, and for laying water, gas and various other kinds of pipes.

Tunneling under paved driveways and street crossings ought never to be allowed where the tunnel is more than six inches in diameter; and when borings are made for pipes the bore should be made only large enough to allow the pipe to be put in position. From my experience it can safely be said that it is impossible to refill a horizontal tunnel so that the pavement over the trench will not settle and require repairs which make extra expense for the department.

Street Openings.

The condition in which streets are left after the work of laying water, sewer and gas pipes, replacing poles and laying underground wires, demands attention. In making water service and sewer connections, the relaying of pavements by unskilled workmen destroys the streets more than all the ordinary wear to which they are subjected.

What is the best plan to adopt in these cases?

The various departments and companies making such openings should be obliged to do all work of this description under the supervision and to the satisfaction of the street commissioner, with the exception of repaving, which ought to be done by the street department, the entire cost of the same to be paid by the department or company making the opening.

Street Cleaning.

Pressing demands for cleaner streets are constantly being brought to our attention, and the accumulation of rubbish, waste paper, tin cans and shop bills has increased to such an extent that we have been called upon to increase the force of patrol men, this system giving great satisfaction.

There are four sweeping machines, one Barnard scraper, two Mentzer cleaners, and eleven small hand carts for use in this branch of the work.

Street Watering.

Only accepted streets can be watered under the law providing for assessment of the cost of said watering upon the abutters, and when private streets are watered the cost of same must be paid in advance by the abutters.

In this department are thirty-one carts, three of which have been purchased during the year. The work is let out at a uniform price of eighty-five dollars per month for each contractor, who provides two horses and a driver, said contractor being required to keep all the streets in his district properly watered at all times.

This force is under the direction of an assistant during the street watering season, and the city is divided into districts corresponding to the number of carts, each district averaging about two miles of streets.

City Ledge.

The work of removing the stone from the Holland-street ledge between Holland street and Broadway is fast nearing its end and by the close of another year the supply will be nearly exhausted.

Stone Crusher.

The stone crusher has been kept constantly at work during the year, but has not been able to supply the demands for stone, 16,440 tons having been crushed. Besides this, the city has purchased 1,304 tons, all of which has been used on the streets.

Bridges.

Boston-avenue bridge over Mystic river and Broadway bridge over Alewife brook are in good condition. The railings of both have been painted during the year.

The new bridge over Mystic river at Middlesex avenue and the Fellsway boulevard, which is being constructed by the metropolitan park commission, is nearly completed.

Subways.

During the year a new subway has been built at Thorndike street under the railroad, and upon its completion it was put into the hands of the highway department.

The subways at Kent and Sacramento streets are in good condition, but require constant care to keep them neat and clean.

Brown-Tail and Gypsy Moths.

The city is not yet free from the brown-tail and gypsy moth pests, although much has been done toward their destruction, and at present most of them are found on private property.

After making a personal inspection, I find the trees in the highways are comparatively free from them. When they are removed from the trees by this department, the nests are all taken to the city yard and burned in a furnace; this being the only sure way to destroy them.

CLARENDON AVENUE, LOOKING TOWARD BROADWAY, FROM POINT
NEAR CAMBRIDGE LINE.

CLARENDON AVENUE, LOOKING TOWARD BROADWAY, FROM POINT
NEAR STONE QUARRY.

Shade Trees.

Much interest in shade trees has been manifested within the last five years, and the interest is increasing. The conditions with which the shade trees have to contend in the cities is a serious drawback to their growth, the principal damage being caused by the electric wires, which burn the limbs, thereby necessitating much injurious pruning.

Seventy-eight trees have been set out and forty-two cut down during the year.

Steam Road Rollers.

The city has two Buffalo Pitts rollers, one fifteen and one twelve-ton; also one five-ton asphalt roller. All of these have been in use nearly the entire year, and are in good condition.

Wide Tires.

The legislature of 1900 passed an act (chapter 334) to regulate the width of tires on draft wagons as follows:—

Section 1. On and after the first day of January in the year nineteen hundred and two, it shall be unlawful, except as provided in section four of this act, to use upon any road, street or way in this Commonwealth a draft wagon or cart having tires of iron or steel, or of any substance equally hard, which are less in width than one and one-half times the diameter of the axle, measured at the shoulder thereof; but in no case shall a tire more than four inches in width be required, and wagons or carts built with wooden or hollow axles shall have tires not less in width than the diameter of the axle, measured at the shoulder thereof.

Section 2. This act shall apply to all wagons and carts, the axles of which are two inches or more in diameter, measured as aforesaid, and to all stage coaches, tally-ho coaches, barges and other passenger vehicles not built to run on iron or steel rails, and constructed to carry eight or more persons.

Section 3. Whoever violates any provision of this act shall be punished by a fine not exceeding one hundred dollars.

Section 4. This act shall take effect on the first day of January, in the year nineteen hundred and two, but shall not apply to wagons or other vehicles owned and used in this state on that date. (Approved May 23, 1900).

Under the above act, the city has placed wide tires on all its carts.

Clarendon Avenue.

An order having been passed by the board of aldermen June 25, 1903, for the laying out of Clarendon avenue, from Broadway to the Cambridge line, work was begun on said avenue soon after its acceptance, and \$1,613.41 have already been expended. The city has until the first day of May, 1905, to complete the construction of said avenue.

Middlesex Avenue.

December 11, 1902, a hearing was given before the board of aldermen on the petition of the Boston Elevated Railway Company for track locations on Mystic avenue, from the Boston line

to Middlesex avenue, and thence through Middlesex avenue to the Fellsway boulevard. The location has not yet been granted, and before such action is taken I would recommend that the avenue be raised to grade sixteen.

Packard Avenue.

Packard avenue was laid out as a public highway from Broadway to Professors row. Considerable work has been done toward its construction during the year, the sum of \$2,376.44 having already been expended.

Miscellaneous Work.

There have been 1,403 loads of snow and ice, 6,241 loads of dirt, 8,903 loads of scrapings, and 3,301 loads of old macadam removed from the streets and 5,328 loads of ashes and 2,730 loads of ballast used in the streets.

476 permits were issued for the use of streets and sidewalks, and 406 defects in the streets and sidewalks which were reported by the chief of police were promptly repaired.

The Boston Elevated Railway Company has laid 150 feet of new rails on Newton street, and a cross-over on Highland avenue, at Davis square.

7,503.5 square yards of brick and 215 square yards of granolithic sidewalks have been laid; 18,273.5 feet, or nearly three and one-half miles, of edgestone and inside curbing were set; 5,988 square yards of stone gutters and 548 square yards of vitrified brick, granite, granolithic and concrete crossings were laid.

11,810.5 feet, or over two miles, of edgestone were re-set, and 6,328.6 square yards of brick sidewalks re-laid.

80 square yards of crossings and driveways have been paved or re-paved with granite blocks, 280 square yards of granite crossings surfaced with concrete, and 30 square yards of driveways paved or re-paved with brick.

The Cambridge Gas Light Company dug up 6,474 feet of trenches to lay main pipes.

Recommendations.

I would recommend that Medford street, from Broadway to Lowell street, be paved, and that the gutters be paved and the edgestones set on the southerly side of Washington street, from the Boston line to Tufts street; also that Somerville avenue be paved with block stone, from Kent street to Elm street; that Linwood street be macadamized; that Washington street be re-surfaced, from Union square to the Cambridge line; that Jaques street, from Bond street to Temple street, be re-surfaced; and that a new shed be built at the city yard to shelter the water carts, as at present there is not room enough to properly care for them.

Respectfully submitted,
 JOHN P. PRICHARD,
 Street Commissioner.

Engine House - Ward 2
Somerville, Mass
Walter T. Littlefield, Commissioner of Public Buildings
Architect

NEW FIRE STATION IN UNION SQUARE
Designed by Walter T. Littlefield, Commissioner of Buildings

REPORT OF COMMISSIONER OF PUBLIC BUILDINGS.

OFFICE OF COMMISSIONER OF PUBLIC BUILDINGS, }
City Hall, Somerville, January 1, 1904. }

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen: I have the honor, as commissioner of public buildings, to submit the following report of this department for the year 1903.

Section 41, article third, of the city charter, relating to this department, is as follows: "The public buildings department. This department shall be under the control of the commissioner of public buildings, who shall have charge of the construction, alteration, repair, maintenance and care of public buildings, and shall also be the inspector of buildings."

In addition to the regular work of this department during the year 1903, there have been several needed improvements made in some of the public buildings of the city. A description of this special work will be found fully outlined in this report. The inspection of private building construction, which has been made during the year, has been performed systematically, and, as a result, the various builders have carried on their work with very few violations of the building ordinances.

Inspection of Buildings.

There have been issued, during the year 1903, permits for 237 new buildings and alterations. This number is fifteen less than in 1902.

The total estimated cost of new buildings and alterations in 1903 was \$635,259.00, while the same in 1902 was \$791,175.00, showing a decrease of \$155,916.00.

During the year 1903 there have been made 1,185 inspections of private buildings in the course of construction. These have included the inspections of fire-stopping, chimneys, buildings damaged by fire, and foundations.

The following is a table showing the number of permits in each ward for buildings, etc., and the uses for which they were intended:—

BUILDINGS.	WARDS.							TOTALS.
	1	2	3	4	5	6	7	
Dwellings	11	14	8	7	14	45	61	160
Dwellings and stores	4	4	0	4	4	0	4	20
Stables	1	0	1	1	0	0	0	3
Miscellaneous	7	6	10	6	6	6	7	48
Brick buildings	1	2	0	2	0	1	0	6
Totals	24	26	19	20	24	52	72	237

Inspection of Plumbing.

The number of plumbing permits issued during the year was	382
Permits for plumbing in new buildings	142
Permits for plumbing in old buildings	240
Number of buildings in which pipes were tested by water	287
Number of master plumber's licenses, 7 at \$2.00	\$14 00
Number of journeyman plumber's licenses, 5 at \$.50	2 50
Number of master plumber's licenses renewed, 38 at \$.50	19 00
Number of journeyman plumber's licenses renewed, 34 at \$.50	17 00

One application for journeyman plumber's license was rejected.

Amount received in fees \$52 50

Latin High School.

At the Latin high school, a radical change was made in the arrangement of the rooms on the first floor. The large classroom was reduced in size, and two additional recitation rooms arranged on the westerly side of the building. This change was made necessary by the increased attendance of pupils at this building, and a lack of sufficient accommodations for recitations.

English High School.

At the English high school, an electric switch board and motor generator was installed on the third floor of the building, in the apparatus room adjoining the physical laboratory. This apparatus is used in connection with the work of the chemical and physical laboratories, and the stereopticon in the lecture hall.

Police Building.

At the police department building, an entire change of the rooms on the second floor was made, which gives this space to the uses of the police department. These rooms were formerly occupied by the militia company. The arrangement of the partitions, adjacent to the private offices of the chief of police, was

changed somewhat, and the walls, ceilings, and woodwork of all the rooms was thoroughly cleaned and re-painted or re-varnished. This general renovation was also carried out on the first floor, and is at the present time nearing completion.

The rearrangement of partitions, the general cleaning and painting, and the refurnishing have made the police quarters very attractive and comfortable, and the city now has police accommodations as good as any in the state.

Hose Number Two.

The fire department building on Marshall street, occupied by hose company number 2, was given a thorough overhauling, and the interior of the building was cleaned and re-painted throughout. In addition to this work a new hot water heating apparatus was installed, which is in operation at the present time and giving perfect satisfaction.

Bingham School.

In accordance with an order passed by the board of aldermen, his honor, the mayor, requested this department to prepare drawings and specifications for an eight-room addition to the Bingham school on Lowell street.

Drawings and specifications were prepared and estimates asked for, which were received, and opened in the mayor's office, as follows:—

Dillon Brothers	\$31,639 00
Arthur W. Berry	29,500 00
Lord Brothers	28,334 00
William Crane	27,570 00
George M. Davis & Son	26,824 00
Orne and Lawrence	26,670 00
J. M. Andrews & Son	24,990 00
F. C. Alexander	24,670 00
John E. Locatelli	23,600 00

The lowest bidder was John E. Locatelli, of Somerville, and he was awarded the contract.

The work on the addition was commenced immediately after the contract was signed, has progressed satisfactorily, and is fast nearing completion. It is expected that the new part will be ready for occupancy April 1, 1904.

Estimates were received for the heating and ventilating of the addition to the Bingham school, as follows:—

Cleghorne & Co.	\$5,300 00
W. B. Ross	4,893 00
Huey Brothers	4,697 00
Bradlee & Chatman	4,687 00
Merrill & Co.	4,638 00
Alexander Duncan & Co.	4,436 00
A. A. Sanborn & Co.	4,335 00

The lowest bidder was A. A. Sanborn & Co., and they were awarded the contract.

Estimates were also received for the plumbing work in the addition to the Bingham school as follows:—

Thomas F. Martin	\$1,995 00
Armstrong Brothers	1,873 00
C. W. Cahalan	1,862 00

The lowest bidder was C. W. Cahalan, and he was awarded the contract.

Martha Perry Lowe School.

The new Martha Perry Lowe school was completed during the year and opened for school purposes at the beginning of the school term in September.

Early in the year estimates were requested for the heating and ventilating and also for the plumbing work in the building. The following estimates were received:—

HEATING AND VENTILATING.

James Tucker & Sons	\$4,049 00
Cleghorne & Co.	4,000 00
Braman, Dow & Co.	3,931 00
Laskey, Whitten and Jackson	3,867 00
Albert B. Franklin	3,834 00
A. A. Sanborn & Co.	3,795 00
Merrill Company	3,749 00
John F. Foster	3,650 00
Pierce & Cox	3,645 00
Isaac Coffin & Co.	3,628 00
Alexander Duncan & Co.	3,492 00
Bradlee Chatman Co.	3,585 00
Huey Brothers	3,457 00

PLUMBING.

James Tucker & Sons	\$2,490 00
Frank O. Johnson	2,405 00
Kellsey & Stack	2,193 00
Thomas W. Naughton	2,070 00
Armstrong Brothers	1,849 00
C. W. Cahalan	1,828 00
Thomas W. Martin	1,785 00

The lowest bidders were the Huey Brothers, for the heating and ventilating, and Thomas W. Martin for the plumbing, and they were awarded the contracts.

There are in this building eight classrooms, each having a seating capacity of fifty pupils.

Each classroom has a closet for the storage of books, etc., is fitted with slate blackboards, and is otherwise well equipped for school purposes.

Each classroom has in connection its separate coat room, which is accessible from both the corridor and the room itself.

At either end of the building leading from the stair landings there are three small rooms, one of which is used for teachers' retiring rooms, one for the principal's office, and one for a hospital room.

The entire sanitary system is located in a separate building, which connects with the main building by a corridor, and is two stories in height.

The heating and ventilating is by the gravity system. The steam plant consists of two forty-eight-inch boilers, from which the steam is carried to the heat coils in three air rooms, from which the tempered air is distributed through the building to the various schoolrooms, entering at a point eight feet above the floor. The vitiated air is taken from each room through an opening at the floor into brick ducts which lead through the roof to the open air. Each of these ducts is provided with a steam coil, that there may be a perfect circulation of air continually.

School Buildings, Care and Repair.

In addition to the special work on the various school buildings, which is found described elsewhere in this report, the general work of caring for them has been carried on as usual. The continual demand for modern improvements in the various buildings must be met by the expenditure of a liberal amount of money for such changes.

The work during the year 1903 has been largely routine, and has consisted, in addition to the ordinary repairs, of painting the walls, concreting yards, remodelling of sanitariums, and installing new shades in place of the old shutters.

On account of the large increase of the school attendance each year it is necessary to provide new school furniture and especially has this been the case this year.

Several of the older buildings were fitted with the old-fashioned shutters on the inside of the windows. These have been gradually taken down and cloth shades put in their places. The Highland and Lincoln schools are still fitted with these shutters and I would recommend that they be removed the coming year and shades substituted.

I would recommend that an electric motor be installed at the high schools to operate the ventilation fan, in order that the entire capacity of the boilers may be used for the steam supply. I believe that if this is done a material saving of fuel will be made.

I would recommend that the grounds around the Clark Bennett and the Martha Perry Lowe schools be graded and concreted.

Engine House, Ward Two.

In accordance with an order passed by the board of aldermen, his honor, the mayor, requested this department to prepare drawings and specifications for an engine house in Union square,

on land previously purchased for that purpose. The drawings and specifications were prepared and estimates received and opened in the mayor's office as follows:—

	Estimate for buff brick.	Estimate for red brick.
Stephen Brennan	\$42,192 00	\$40,762 00
Orne & Lawrence	30,223 00	28,973 00
Lord Brothers	29,711 00	28,700 00
John E. Locatelli	29,705 00	28,587 00
William I. Mabie		28,967 00
J. M. Andrews & Son	28,675 00	28,021 00
Alfred H. Hines	28,373 00	26,973 00
George M. Davis	28,001 00	29,651 00
Arthur W. Berry	27,200 00	25,660 00
F. C. Alexander	27,185 00	25,685 00
Walsh Brothers	26,995 00	25,366 00

The lowest estimate was in excess of the amount of money available, and the three lowest bidders were invited to submit estimates based on a revised specification. These estimates were received and opened in the mayor's office, as follows:

Arthur W. Berry	\$21,650 00
Walsh Brothers	21,575 00
F. C. Alexander	21,354 00

The lowest bidder was Mr. F. C. Alexander, of Somerville, and he was awarded the contract.

It is expected that this building will be completed and ready for occupancy about August 1, 1904.

Expenditures.

The cost of maintaining the several public buildings, with the amounts of the various classes of expenditure, will be found in the following tables:—

Classified Expenditures on Fire and Departmental Buildings for the Year Ending December 31, 1903.

	Carpentry.	Masonry.	Painting and Whitewashing.	Plumbing and Gas-fitting.	Electric Work.	Roofing.	Heating and Ventilating.	Gas Light.	Electric Light.	Fuel.	Janitors.	Furniture.	Supplies.	Miscellaneous.	Totals.

REPORT OF COMMISSIONER OF ELECTRIC LINES AND LIGHTS.

OFFICE OF COMMISSIONER OF ELECTRIC LINES AND LIGHTS, }
January 1, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—I submit herewith my eighth annual report, for the year ending December 31, 1903.

Electrical Department.

Under this head comes the care and maintenance of the fire alarm and police signal systems, and all work of an electrical nature belonging to the city.

Fire Alarm.

This most important branch of the electrical department has received its usual careful attention during the year. One new fire alarm box has been added. All boxes in service have been carefully tested and newly painted and varnished. All alarms have been given correctly and promptly, which means quick response on the part of the fire department and small fires in consequence.

A steam whistle has been placed in the East Somerville district, which fills a long-felt want, as it enables the residents of that section to hear the no-school signal on stormy days.

The equipment of this department is as follows: One hundred and two signal boxes, one eight-circuit repeater, one eighteen-circuit fuse board, eight tower strikers, thirty-one gongs, eight indicators, twenty small tappers, forty open circuit tappers, three hundred and ninety-two cells storage battery, and one hundred and twenty-five miles of wire.

A large portion of the old outside construction has been replaced by new, putting this part of the system in good condition.

I would recommend the placing of high tension wires underground, as every year sees more of these dangerous wires on the streets.

A switch-board designed by the commissioner has been placed in the English High school, which gives that school an equipment for electrical experimental work equal to any in the state.

Police Signal.

Several miles of new wire have been run during the year. A new fuse board has been installed in the police station.

The equipment has received its usual careful attention, and is in good working order.

Street Lights.

During the year seven new arc lights and twenty-one new incandescent lights have been placed in service, making a total of four hundred and eighty-five arc lights, four hundred and fifty-three incandescent lights, and three Welsbach lights.

During the coming year several new lamps will be needed, especially on the Powder House boulevard, between Powder House square and North street.

Our lighting service at the present time is especially good, very few outs occurring, and these are remedied very quickly.

ELECTRICAL DEPARTMENT.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX CO., MASSACHUSETTS.

Area of city, including land and water, about 4.22 square miles.

Population, estimated, 67,000.

Entire population on line of pipe and supplied with water.

Water works owned by City of Somerville.

Construction commenced in 1868.

Source of supply : Metropolitan system, taking water of the
Nashua river at Clinton, Mass.

Mayor

HON. EDWARD GLINES.

Water Commissioner

FRANK E. MERRILL.

Office of the Water Department,

Room 10, City Hall.

Department Buildings and Yard,

Cedar street, near Broadway.

REPORT OF THE WATER COMMISSIONER.

OFFICE OF THE WATER COMMISSIONER, }
February 1, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

I present herewith my report for the year ending December 31, 1903, this being the thirtieth annual report made by the water department:—

Water Income.

Water bills have been issued as follows:—

“Annual” water charges, amounting to	\$161,978 00
“Additional” water charges, amounting to	7,977 15
“Metered” water charges, amounting to	61,299 71
	\$231,254 86
Abatements made on the above charges	6,919 43
	\$224,335 43
Leaving net amount of bills rendered	\$224,335 43
The account has credit for the amount received from the commonwealth of Massachusetts, distribution of entrance fees, water supplied outside of district, and water furnished water companies, 1903, under section 3, chapter 488, Acts 1895	1,279 93
	\$225,615 36
Total amount credited to Water Income account	\$225,615 36

The water income was used under appropriation orders of the board of aldermen as follows:—

For water works purposes:—

Water works maintenance	\$39,076 31
Water works extension	11,530 00
Refunds	1,137 84
Interest on water loan bonds	5,610 00
Maturing water loan bonds	23,000 00
Metropolitan water works assessment	77,288 43
	\$157,642 58

For other municipal purposes:—

Sewers, maintenance	\$12,300 00
Interest on sewer loan bonds	7,120 00
Maturing sewer loan bonds	10,000 00
Fire department	31,000 00
Reduction of funded debt (balance)	7,552 78
	67,972 78
	\$225,615 36

In addition to the appropriations from water income to other municipal purposes enumerated above, water has been furnished without charge to all the city departments that have required its use. The value of this water, based on the charges of the year 1899, is about \$12,000.

Department Receipts and Disbursements.**WATER MAINTENANCE ACCOUNT.**

	DR.	CR.
Amount appropriated by board of aldermen from water income		\$39,400 00
Sundry receipts for labor and materials sold,		1,842 46
Receipts from other sources		302 00
Amount expended for labor and materials for maintenance of the water works and renewals of pipe	\$39,378 31	
Miscellaneous accounts	1,842 46	
Unexpended balance of appropriation	323 69	
	\$41,544 46	\$41,544 46

WATER WORKS EXTENSION ACCOUNT.

	DR.	CR.
Amount appropriated by board of aldermen from water income		\$11,600 00
Receipts from 144 water service assessments,		2,527 28
Sundry receipts for materials sold		109 93
Labor and materials used in extension of the water works	\$14,057 28	
Miscellaneous accounts	109 93	
Unexpended balance of appropriation	70 00	
	\$14,237 21	\$14,237 21

REFUND ACCOUNT.

	DR.	CR.
Amount appropriated by board of aldermen from water income		\$1,000 00
Amount refunded, and abated on charges of previous years, to water consumers	\$1,137 84	
Balance		137 84
	\$1,137 84	\$1,137 84

Cost of Water Works.

The total cost of the water works on December 31, 1902, as represented by the expenditures from appropri- ations for water works extension, was	\$801,830 14
Expended during the year 1903, on extension account	14,057 28
Total expenditures, December 31, 1903	\$815,887 42

Water Debt.

Water loan bonds have been issued on funded debt account to the amount of \$1,017,000; this has been reduced by payments amounting to \$894,000, leaving the water debt on December 31, 1903, \$123,000.

The outstanding bonds mature as follows:—

YEAR.	AMOUNT.	YEAR.	AMOUNT.
1904	\$15,000	1913	\$6,000
1905	6,000	1914	6,000
1906	16,000	1915	5,000
1907	17,000	1916	5,000
1908	7,000	1917	5,000
1909	6,000	1918	5,000
1910	6,000	1919	4,000
1911	6,000	1920	2,000
1912	6,000		

Extension of Street Mains.

Comparatively little has been required of the department during the last year for new street mains. Pipes have been laid for new buildings in Lexington avenue, Lowden avenue, Malvern avenue, Teele street, and Yorktown street, and for circulation in Howard street and School street. In the latter street advantage was taken of the construction of the bridge over the Boston & Maine Railroad tracks to add another connection between the Winter Hill and Central Hill high-service districts. The total number of feet of pipe added to the system was 3,280, and the main pipe mileage of the city is now approximately 88 miles, 2,261 feet.

Renewal of Street Mains.

The year's work has been signaled by the removal of practically the last of the old cement-lined mains and the substitution of cast-iron pipes therefor. The principal work of pipe renewal was carried on in Albion street, Bartlett street (ward 1), Central street, Franklin street, Hudson street, James street, Lowell street, Melvin street, Packard avenue, and Partridge avenue.

Eight leaks in the street mains have occurred; one on six-inch, one on eight-inch, one on twelve-inch, three on fourteen-inch, one on sixteen-inch, and one on twenty-inch pipe.

Hydrants, Gates, etc.

The winter season to date, having been of unusual severity, has demanded more than the ordinary vigilance in the care of the fire hydrant system. An inspection force has been constantly at work on the hydrants during the winter, and their efficiency has been fully maintained. Thirty-one hydrants were set during the past year, and thirteen were removed, the net increase being eighteen, making the total number in the city 973. The Derby Desk Company has set one hydrant in their factory yard, increasing the number of private fire hydrants taking water from the city mains to forty-five.

Forty-seven water gates have been set, and eleven removed or abandoned. The total number in the city is 1,319. Nine blow-offs have been constructed, and there are now 132 connected with the system.

One new waterpost has been set for the street watering department on Curtis street, near Professors row. The waterpost on Broadway, near Franklin street, was removed to a suitable location on Franklin street, near Broadway. The post on Medford street, near Sycamore street, was moved around the corner on Sycamore street, and the one on Gilman street, near Walnut street, was moved to the opposite side of the street. There are sixty-nine waterposts in the city.

Water Services.

One hundred and forty-four new service pipes were laid during the year; the total length was 5,529 feet, and the amount received therefor from property owners supplied was \$2,527.28. The total length of service pipe in the city is approximately sixty-nine miles, 1,379 feet, and the number of house connections 10,854. One hundred and thirty-seven leaks in service pipes were discovered and repaired.

Water Meters.

The mayor, on January 10, officially approved a reduction in the minimum meter rate from \$15 to \$10 per year, and authorized the general installation of water meters. In pursuance of that policy, 369 meters were set during the year, and there are now in operation in the city 638 meters of the kinds and sizes shown in the following table:—

METERS IN USE DECEMBER 31, 1903.

	5/8"	3/4"	1"	1½"	2"	3"	4"	6"	Total.
Nash . . .	76								76
Empire . . .	1								1
Crown . . .	6	6	5	1	2	1	1	1	23
Gem . . .							1		1
Hersey . . .	10		7	1	1	3			22
Hersey Disc	97	8	6	1	2				114
Torrent . .								1	1
Trident . .	88	45	21	6	6	1	1		168
Union . . .	6	10	10	2	5	1	2		36
Union Special	6	14	6						26
Lambert . .	164	6							170
Totals . .	454	89	55	11	16	6	5	2	638
Motor and ele- vator registers									9
									647

The quantity of water passed through these meters during the year was 56,959,259 cubic feet, or 426,055,257 gallons; the

amount received therefor was \$61,164.59. This gives an average of about 10.74 cents per 100 cubic feet, or about 14.35 cents per 1,000 gallons.

Summary of Pipes and Fixtures.

Following is a general summary of the pipes and fixtures of the water system, December 31, 1903:—

Feet of main pipe (approximately)	. . .	466,901
Feet of service pipe (approximately)	. . .	335,699
Service connections (approximately)	. . .	10,854
Public fire hydrants	973
Private fire hydrants	45
Gates	1,319
Check valves	7
Meters	638
Waterposts	69
Blow-offs	132
Drinking fountains and troughs	11

Inventory.

The annual inventory of stock on hand, tools and machinery, teams and stable equipment, pumping apparatus, and furniture, shows a valuation of \$22,971.70; the land and buildings of the department are valued at \$32,000, and the general distribution system of the water works has an estimated valuation of \$865,000.

Metropolitan Water Works.

The metropolitan water board has completed the installation of its Venturi water meters, and now has in this city the following:—

Location.	Service.	Size. Inches.	Throat Diam. Inches.
Professors Row, at Boston avenue	. High	12	3.75
Broadway, at Cedar street	. High	16	5.75
Broadway, at Willow avenue	. Low	16	5.25
Elm street, at Willow avenue	. Low	16	5.75
Medford street, at Central street	. Low	12	3.75
Broadway, at Marshall street	. Low	12	4.25
Pearl street, at Walnut street	. Low	16	5.00
Webster avenue near R. R. crossing	. Low	20	5.75

It has been found that the water consumption of the city has not yet reached a point requiring the use of all these meters, so those in Broadway at Willow avenue and Broadway at Marshall street have been temporarily cut out of service. An average of about 6,000,000 gallons of water passes through the operating meters daily.

The amount of assessments paid by this city as its proportionate part of the cost and operation of the metropolitan water works is here given:—

Year.	Sinking Fund.	Maintenance.	Interest.	Total.
1898	No division made			\$14,250 19
1899	"	"	"	20,975 58
1900	"	"	"	28,689 24
1901	\$12,491 73	\$12,033 79	\$32,291 24	56,816 76
1902	19,014 85	12,955 64	30,427 40	62,397 89
1903	15,748 56	12,763 10	48,776 77	77,288 43

Water Consumption and Waste.

The annual house-to-house inspection for water waste has been carried on in a thorough manner, and repairs have been required wherever defective water fixtures were discovered. In eleven cases where requests for repairs to be made were disregarded it was deemed expedient to set water meters.

The metropolitan water and sewerage board advises that "It is for the interest of every municipality in the district to cooperate with the board in the adoption of all reasonable measures for the prevention of leakages, waste, and misuse of water." The board states that if present conditions of water waste in the metropolitan water district are allowed to continue, the present sources of water supply will prove inadequate within ten years, so that it will be necessary within five years from the time when the Nashua river works are completed to prepare for the construction of new works. The present system of water works will have cost when finished about \$10,000,000, and it is estimated that the cost of the additional works required within the next twenty-five years to supply the probable demand for water, if waste is unchecked, will be at least \$32,000,000 more. And not only is the cost of construction and maintenance of the works for supplying water largely increased by its unnecessary use, but the cost of the sewage systems for the disposal of the water after it has been used is also largely increased, and within a comparatively few years the entire north metropolitan sewerage works must be duplicated, if the quantity of sewage to be provided for continues to increase at the present rate.

The board concludes: "If waste of water is allowed to continue, all the available sources of water supply east of the Connecticut river will be required during the next twenty-five years, and an immense sum of money must be expended for the construction of works to bring to the district water which will serve no useful purpose, but will, on the other hand, cause inconvenience and expense to the metropolitan district through making necessary additional water mains and sewerage works."

The state meters have been in operation since July 1, 1903, and records of the quantity of water supplied to this city have been obtained for that period. These meters are under the control of the metropolitan water and sewerage board, and the statistics of water consumption furnished by the board for the last six months of the year show that this city has used a daily average of eighty-five gallons of water per inhabitant. This figure tallies

very closely with the estimate of eighty-eight gallons per inhabitant made by your Water Commissioner in 1897, by methods necessarily indirect, as the water supplied to us was not then measured.

As the state meters record as well as measure the quantity of water passing through them, it is possible to ascertain the consumption at any given time. From the records thus made, it is shown that for the period between July 1 and January 1 the night consumption of water in this city between one and four o'clock in the morning, at a time when the legitimate use is at its minimum, amounts in the low-service district to a rate of fifty-four gallons per capita, and in the high-service district to thirty-eight gallons per capita, per twenty-four hours.

That the consumption of water is affected considerably by weather conditions is indicated by the following table:—

	Period of hot and dry weather. Week ending July 11, 1903.	Period of cool and rainy weather. Week ending Aug. 8, 1903.	Period of cold weather. Week ending Jan. 9, 1904.
Daily per capita consumption; high service	87	64	92
“ “ “ “ low service	98	80	146

The conclusions are that a considerable waste of water is going on continually in all seasons from defective water pipes and fixtures; that a very large waste of water is caused in the winter season by continual running to prevent freezing, and that in the hot season water is allowed to run more freely than is necessary, for cooling and for sprinkling purposes.

The metropolitan water board has, after careful and extended study, given its opinion that an average of sixty gallons per inhabitant per day is a sufficient supply of water for any community for all necessary and legitimate purposes, and has reaffirmed its early suggestion that the present basis of assessing the state water tax should be changed by substituting the element of water consumption for that of population, making it thus an incentive to the cities and towns in the water district to restrict the water waste.

Appendix.

Further details of the department work during the year, locations of fire hydrants and other water works fixtures, are shown in the tables that follow.

Respectfully,

FRANK E. MERRILL,
Water Commissioner.

Gates—Construction Account.

New gates have been set in the following locations:—

Albion street, 8-inch gate, 13 feet 4 inches out from north line, on west line of Centre street.
 Albion street, 6-inch gate, 11 feet east from west line of building No. 110, and 10 feet out from north line of Albion street; for blow-off.
 Central street, 6-inch gate, 19 feet out from east line, and 14 feet south from north line of Berkeley street; for blow-off.
 Curtis street, 2-inch gate, 4 feet 6 inches out from waterpost located 50 feet east from Professors row.
 Day street, 6-inch gate, 8 feet south from north line of Orchard street, and 17 feet east from west line of Day street; for blow-off.
 Elm street, 12-inch gate, 17 feet 6 inches out from east line, and 10 feet south from south line of Willow avenue.
 Elm street, 6-inch gate, 9 feet out from east line, and 22 feet north from south line of Willow avenue; for blow-off.
 Emery street, 6-inch gate, 9 feet out from east line, on south line of Ward street.
 Franklin street, 12-inch gate, 16 feet out from east line, on south line of Perkins street.
 Franklin street, 6-inch gate, 18 feet out from east line, and 88 feet 6 inches south from south line of Broadway; for blow-off.

- Fremont street, 6-inch gate, 13 feet out from north line, on east line of Main street.
- Horace street, 6-inch gate, 10 feet out from east line, on south line of Ward street.
- Howard street, 6-inch gate, 3 feet 8 inches out from north line, on west line of Thorndike street.
- Hudson street, 6-inch gate, 10 feet out from north line, and 2 feet west from west line of building No. 135.
- Hudson street, 4-inch gate, 13 feet out from north line, and 9 feet west from west line of building No. 143-A; for blow-off.
- James street, 6-inch gate, 13 feet out from east line, on north line of Pearl street.
- Lexington avenue, 6-inch gate, 11 feet 6 inches out from south line, on east line of Hancock street.
- Lexington avenue, 6-inch gate, 11 feet 6 inches out from south line, and 31 feet east from east line of Hancock street.
- Lexington avenue, 6-inch gate, 13 feet 4 inches out from south line, on west line of Cedar street.
- Lowden avenue, 8-inch gate, 13 feet 4 inches out from east line, on north line of Fosket street.
- Lowden avenue, 8-inch gate, 13 feet 4 inches out from east line, on south line of Kidder avenue.
- Lowell street, 12-inch gate, 13 feet 4 inches out from west line, and 6 feet north from north line of building No. 320.
- Lowell street, 12-inch gate, 13 feet 4 inches out from west line, and 3 feet north from north line of Vernon street.
- Lowell street, 4-inch gate, 16 feet out from west line, and 10 feet north from south line of Vernon street; for blow-off.
- Malvern avenue, 6-inch gate, 13 feet 4 inches out from north line, on east line of Yorktown street.
- Malvern avenue, 6-inch gate, 13 feet 4 inches out from north line, on west line of Cameron avenue.
- Medford street, 12-inch gate, 18 feet out from south line, and 22 feet west from west line of Central street.
- Packard avenue, 10-inch gate, 15 feet 6 inches out from east line, on south line of Talbot avenue.
- Packard avenue, 10-inch gate, 20 feet out from east line, on north line of Powder House boulevard.
- Pearl street, 6-inch gate, 15 feet out from north line, and 57 feet east from east line of Walnut street.
- Poplar street, 6-inch gate, 15 feet out from north line, and 8 feet east from west line of Maple street; for blow-off.
- Powder House boulevard, 12-inch gate, 17 feet out from north line, on west line of Curtis street.
- School street, 10-inch gate, 16 feet 8 inches out from west line, on south line of Medford street.
- School street, 4-inch gate, 3 feet out from west line, and 46 feet north from north line of building No. 160; for blow-off.
- School street, 10-inch gate, 16 feet 8 inches out from west line, and 22 feet north from north line of building No. 160.
- Teele avenue, 6-inch gate, 13 feet 4 inches out from north line, on east line of Curtis street.
- Teele avenue, 6-inch gate, 13 feet 4 inches out from north line, on west line of Packard avenue.

Gates—Renewal Account.

The following changes have been made in the size and location of main gates:—

- Albion street, 8-inch gate, set 13 feet 4 inches out from north line, on west line of Central street, and 6-inch gate removed from same location.
- Albion street, 6-inch gate, removed from 16 feet out from north line, on west line of Central street.
- Franklin street, 12-inch gate, set 16 feet out from east line, on south line of Broadway, and 8-inch gate removed from same location.
- Franklin street, 2-inch gate, set 4 feet out from waterpost located 127 feet south from Broadway, and 2-inch gate removed from old waterpost location on Broadway, 42 feet east from Franklin street.
- Gilman street, 2-inch gate, set 3 feet out from waterpost located 63 feet south from Walnut street, and 2-inch gate removed from old waterpost location 69 feet south from Walnut street.
- Melvin street, 6-inch gate, set 13 feet out from east line, on north line of Bonair street, and 4-inch gate removed from same location.
- Pearl street, 12-inch gate, set 15 feet out from north line, and 22 feet east from east line of Walnut street, and 12-inch gate removed from 15 feet out from north line, and 16 feet east from east line of Walnut street.
- Perkins street, 8-inch gate, set 16 feet out from south line, on east line of Franklin street, and 6-inch gate removed from same location.
- School street, 6-inch gate, set 17 feet out from south line, on west line of Medford street, and 6-inch gate, 19 feet out from south line and 20 feet west from east line of Medford street, on old connection with 30-inch Metropolitan Water Works pipe, was closed and abandoned.
- Sycamore street, 2-inch gate, set 3 feet out from waterpost located 28 feet west from Medford street, and 2-inch gate removed from old waterpost location on Medford street, 45 feet south from Sycamore street.
- Thorndike street, 3-inch gate, set 14 feet out from east side, and 3 feet north from north line Boston & Maine railroad location, and 6-inch gate removed from 14 feet out from east side, on north line of Boston & Maine railroad location.

Summary of Statistics

FOR THE YEAR ENDING DECEMBER 31, 1903.

In form recommended by the New England Water Works Association.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX COUNTY, MASS.

GENERAL STATISTICS.

Population by census of 1900, 61,643.

Date of construction: commenced in 1868.

By whom owned: City of Somerville.

Source of supply: Metropolitan water system.

Mode of supply: water is delivered into the city's mains, under both high and low pressures, by the Metropolitan Water Works.

STATISTICS OF CONSUMPTION OF WATER.

1. Estimated total population at date, 68,000.
2. Estimated population on lines of pipe, 68,000.
3. Estimated population supplied, 68,000.
4. Total consumption for the year, estimated for first six months and measured the last six months, 2,120,650,000 gallons.
5. Passed through meters, 426,055,257 gallons.
6. Percentage of consumption metered, 20.1.
7. Average daily consumption, 5,810,000 (estimated).
8. Gallons per day to each inhabitant, 85.

STATISTICS RELATING TO DISTRIBUTION SYSTEM.**MAINS.**

1. Kind of pipe, cast-iron.
2. Sizes, from 4-inch to 20-inch.
3. Extended 3,280 feet during year.
5. Total now in use, 88.4 miles.
6. Cost of repairs per mile, \$3.79.
7. Number of leaks per mile, .09.
9. Number of hydrants added during year (public and private), 19.
10. Number of hydrants (public and private) now in use, 1,018.
11. Number of stop gates added during year, 36.
12. Number of stop gates now in use, 1,319.
14. Number of blow-offs, 132.
15. Range of pressure on mains, 35 pounds to 100 pounds.

SERVICES.

16. Kind of pipe: Lead; wrought iron—lead-lined; wrought iron—cement-lined.
17. Sizes, one-half to six inches.
18. Extended, 5,529 feet.
20. Total now in use, 69.26 miles.
21. Number of service taps added during year, 144.
22. Number now in use, 10,854.
24. Average cost of service for the year, \$19.10.
25. Number of meters added, 369.
26. Number now in use, 638.
27. Percentage of services metered, 5.87.
28. Percentage of receipts from metered water, 27.3.
29. Number of motors and elevators added, 0.
30. Number now in use, 9.

REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT.

OFFICE OF CHIEF ENGINEER OF FIRE DEPARTMENT. }
 December 31, 1903. }

To His Honor, the Mayor, and the Board of Aldermen:—

I herewith present the annual report of the fire department for the year ending December 31, 1903.

Fires.

Number of bell alarms	196	
Number of still alarms	99	
	295	
Total alarms		295
Value of buildings at risk		\$330,550 00
Damage to buildings		32,891 00
Insurance on buildings		247,600 00
Value of contents		124,250 00
Damage to contents		21,289 23
Insurance on contents		78,525 00
Total value		454,800 00
Total damage		54,180 23
Total insurance		326,125 00

The work of the department during the past year has been successfully performed, having won expressions of commendation and gratitude from the chief executive of our city, as well as from the owners of the property at risk.

In only six cases was a second alarm necessary to call out additional apparatus. No better evidence of the efficiency of the department can be shown than the limited number of second alarms and the number of fires extinguished without serious damage.

In March, the efficiency of the officers and other members of the department was put to a test unlike any known in its previous history. A fire alarm brought men and apparatus to the furniture factory of Brown & Symonds, on Mystic avenue. The situation was such that a second alarm became necessary. The fire was well under way, the entire first story being in flames, when the discovery was made that the Hillson tin-factory, a short distance away, was on fire, the flames bursting from the second story on both sides of the building. The fire apparatus that was due at the scene of the first fire on the sounding of the second alarm had been sent to the Hillson factory, when word was received that the carriage factory of Welsh, Dwyer & Grady, on Mystic avenue, was also on fire. Assistance was asked from Bos-

ton and Cambridge, and through the combined efforts of the three departments the principal part of the works of all three of these large business industries was saved. The fires were all of incendiary origin.

Causes of Bell Fire Alarms.

Boiling over of tar kettle	1
Bonfires	1
Breaking of kerosene lamp	9
Burning of rubbish	8
Children playing with matches	14
Chimney fire	3
Cigar dropped on awning	1
Cigar dropped in wooden cuspidor	3
Clothing in contact with lamp	1
Clothing near stove	1
Curtain in contact with gas jet	1
Defective chimney flue	5
Electric wires	1
Explosion	3
False alarm	12
Fire crackers	5
Fire in Charlestown	1
Fire in Medford	2
Fumigating	1
Gas stove in contact with curtains	1
Gas stove overheated	4
Grass fire	5
Hot ashes in wood receptacle	7
Igniting of Christmas tree from candle	1
Incendiary	12
Melting wax on stove	2
Overheated coal stove	2
Overheated furnace	1
Overheated incubator	2
Overheated oil stove	13
Plumber's torch	1
Rats and matches	1
Smoke mistaken for fire	5
Spark from chimney on roof	11
Spark from fire-box under boiler	2
Spark from forge	1
Spark from machinery	2
Spark from railroad engine	10
Spark from snap-match	4
Spark from tobacco	5
Spontaneous combustion	8
Steam mistaken for fire	2
Thawing water pipes	4
Unknown	16
Wood near stove	1
Total alarms	196

Manual Force.

The manual force of the department consists of 113 members,—34 permanent men, and 79 callmen, distributed as follows:—

STOREHOUSE OF MIDDLESEX PAPER COMPANY, WATER STREET.

	Perma- nent.	Call.	Total.
Chief engineer	1		1
Assistant engineer	1		1
One engine company	4	9	13
One engine company	5	8	13
One engine company	5	9	14
One chemical company	3		3
One chemical engine and hose company	3	5	8
One chemical engine and hose company	3	4	7
Two hose companies, each	2	8	20
One hose company	1	7	8
One hook and ladder company	2	12	14
One hook and ladder company	2	9	11
Total force			113

Equipment.

The apparatus is, generally speaking, in good working order. A new engine has been bought, and is now in service at the central station. Repairs have been made on engines 1 and 4, and they are now in fair condition.

A new building is in process of erection in Union square, on land bounded by Washington and Prospect streets and Somerville avenue. It will replace the old station of ladder one and hose three, which has become thoroughly dilapidated. The new structure, when completed, will be most attractive in appearance, and will furnish ample accommodations for the apparatus necessary for the proper protection of the district.

There is great need of a combination wagon for carrying ladders and chemical tanks, at the station of engine two at the corner of Broadway and Cross street. The nearest ladder truck is at Union square; a location too remote to insure quick service, so important during the first stages of a fire. Such a piece of apparatus could be conveniently housed in the station above-named, and would be of immeasurable value in the district bounded by Charlestown Neck, Winter Hill, Mystic river, and Pearl street.

Four old horses have been replaced by new ones.

The total number of horses is apportioned as follows:—

Engine 1	3	horses.
Engine 1 hose wagon	2	“
Engine 2	3	“
Engine 2 hose wagon	2	“
Engine 4	3	“
Engine 4 hose wagon	2	“
Hose 2	2	“
Hose 3	2	“
Hose 5	2	“
Hose 6 (Combination Hose and Chemical)	3	“
Hose 7 (Combination Hose and Chemical)	2	“
Chemical A	2	“

Ladder 1	3	horses.
Ladder 2	3	"
Chief of Department	1	"
Assistant chief	1	"
Spare	1	"
Electrical Department	2	"
<hr/>		
Total	39	

Test of New Engine.

A new steam fire engine, to be known as engine number three, was built for the city in the fall of 1903 by the American Fire Engine company.

An exhibition test of this engine was given on Broadway park on the afternoon of October 21, a report of which was made by Engineman Cook, of engine number two, as follows:—

Time of lighting fire,	2.32 P. M.
with one gauge of cold water,—	
3 minutes,	7 pounds steam;
4½ minutes,	20 pounds steam;
6½ minutes, started engine,	40 pounds steam.

Time of starting engine,	2.38½ P. M.
Large safety valve set 135 pounds, small 130 pounds.	
Generated 135 pounds steam in 8½ minutes.	

No. 1 test—One line hose, 200 feet, 2½-inch,
Size of nozzle, 1½-inch.
Steam, 135 pounds. Water, 250 pounds.

No. 2 test—One line hose, 200 feet,
Siamesed, two lines, 200 feet each.
Size of nozzles, two 1-inch.
Steam, 130 pounds. Water, 230 pounds.

No. 3 test—Two lines hose, 100 feet each,
Siamesed, four lines, 50 feet each.
Size of nozzles, ¾-inch each.
Steam, 135 pounds. Water, 240 pounds.

No. 4 test—Two lines hose, 100 feet each, pipe connected to siamese direct.
First part of this test used 1½-inch nozzle,
Second part of this test used 1¼-inch nozzle.
Steam, 140 pounds. Water, 270 pounds.
135 pounds. 260 pounds.

No. 5 test—One line hose, 100 feet.
Size of nozzle, 1½-inch.
Steam, 140 pounds. Water, 265 pounds.

CLARENCE V. COOK,
Engineman, Engine No. 2.

To James R. Hopkins,
Chief Engineer Fire Department.

STEAM FIRE ENGINE ("METROPOLITAN") NO. 3. PURCHASED IN 1903.

Don'ts.**Suggestions for the Prevention of Fires.**

1. Don't place gas or other light where a blown curtain can reach it.
 2. Don't go to bed and leave a kerosene lamp burning.
 3. Don't use a light when you look for escaping gas in the cellar.
 4. Don't leave matches about except in metal or earthen boxes.
 5. Don't use snap matches.
 6. Don't keep matches where rats or mice can get at them.
 7. Don't place ashes in wooden receptacles.
 8. Don't neglect to watch gas and oil stoves when in use.
 9. Don't leave a room where fat is boiling.
 10. Don't use an open grate without a screen.
 11. Don't use kerosene to kindle fires.
 12. Don't allow flues to become defective.
 13. Don't leave oily rags,—animal, or vegetable,—about.
 14. Don't neglect to ascertain immediately the cause of unusual smoke or smell of smoke. If it indicates fire telephone to a fire station.
 15. Don't forget the location of the nearest fire-alarm box, and where the key is kept.
 16. Don't delay sending in an alarm when you discover a fire.
 17. Don't hesitate to send in an alarm or telephone to a fire station if you cannot find the cause of unusual smoke in your building.
 18. Don't use a receptacle filled with sawdust for a cuspidor.
 19. Don't be without means for extinguishing small fires at any time.
 20. Don't invite fires by neglecting to guard against and to be prepared for them.
- Eternal vigilance is the price of freedom from fires.

In Memoriam.

The following members of the department have died during the year:—

Charles H. Stearns, born December 7, 1854; died January 23, 1903.

Daniel W. McDermott, born March 14, 1846; died March 29, 1903.

George F. Hughes, born October 6, 1852; died April 14, 1903.

Caleb W. Kimball, born July 16, 1874; died November 17, 1903.

Harry W. Elwell, born April 21, 1868; died October 7, 1903.

Thomas H. Daley, born April 3, 1845; died December 10, 1903.

William A. Burbank, born March 6, 1842; died December 30, 1903.

These men were good citizens and good firemen. We record them as dead; yet they are not wholly dead to their companions, much less to those who were nearer and dearer to them. They remain with us in memory; we recall the hours when we labored together, the social hour, and their descriptive scenes of active service as firemen.

“Their memories brighten o’er the past,
As when the sun, concealed behind some cloud that near us hangs,
Shines on a distant field.”

Recommendations.

I desire to renew the recommendation which I have repeatedly made in former years, that the city ordinance concerning the construction of buildings be so amended as to prohibit shingled roofs. The safety of our city also demands that the outer walls of buildings covering an area of over 4,000 feet and more than one story in height should be of stone, brick, or iron, and the roof protected with some non-inflammable material. When roofs are dry sparks from a small fire may kindle twenty other fires, and if a strong wind is blowing, the city may be placed in great peril.

In rendering this report, it is fitting that thanks be extended to his honor, the mayor, the board of aldermen, and all others who have assisted in furthering the work of the department, and contributing to its success. To the members of the fire department, also, my thanks are due for their uniformly efficient service and cheerful co-operation.

REPORT OF THE CHIEF OF POLICE.

OFFICE OF THE CHIEF OF POLICE, }
 January 4, 1904. }

To the Honorable, the Mayor and Board of Aldermen of the City of Somerville:—

Gentlemen,—I respectfully submit a report of the doings of the police department for the year ending December 31, 1903.

Arrests.

Whole number of arrests made	1,846
Males	1,756
Females	90
Americans	942
Foreigners	904

Miscellaneous.

NUMBER HELD FOR TRIAL FOR THE FOLLOWING CRIMES AND OFFENCES.

Assault and battery	123
Assault felonious	3
Bastardy	6
Breaking and entering building	31
Contempt of court	3
Disturbing the peace	29
Drunkenness	917
Forgery	1
Fraud	2
Idle and disorderly	4
Incest	1
Keeping for sale adulterated food	19
Keeping disorderly house	3
Larceny	138
Larceny in building	3
Larceny from person	8
Lewdness	6
Malicious mischief	20
Neglected children	18
Neglect to support family	28
Peddling without license	10
Profane swearing	2
Receiving stolen property	4
Stubborn child	12
Threats	10
Unlawfully keeping Great Dane dog	1
Violation of city ordinances	77
Violation of health regulations	7
Violation of liquor law	6
Violation of Lord's Day	64
Vagrancy	10
Walking on railroad track	115
Wilful trespass	80
Total	1,761

POLICE SIGNAL, PATROL WAGON AND AMBULANCE SERVICE.

Number of en-duty reports made by patrolmen	213,828
Number of runs made with wagon	1,153
Number of prisoners conveyed to station	1,334
Number of miles run with wagon	1,930
Number of telephone calls registered	9,818
Number of persons conveyed in the ambulance	306

In General.

While the number of arrests has increased somewhat this year over any previous year, there has been less crime, as the table of arrests shows only an increase in minor offenses and a less number of serious cases.

Two officers were retired upon half pay, on account of being incapacitated for further police service, and the vacancies were filled by new men; the department now consists of a chief, one captain, three lieutenants, five sergeants, one inspector, and forty-one regular and ten reserve patrolmen; total, sixty-two, all of whom are well equipped with revolvers, hand-cuffs, and clubs.

Official Roster of Department.**MELVILLE C. PARKHURST, CHIEF.**

Robert R. Perry, Captain.	Dennis Kelley, Lieutenant.
Eugene A. Carter, Lieutenant.	Charles E. Woodman, Lieutenant.
Edward McGarr, Sergeant.	George H. Carleton, Sergeant.
Arthur E. Keating, Sergeant.	Eugene H. Gammon, Sergeant.
James M. Harmon, Sergeant.	Thomas Damery, Inspector.

Patrolmen.

Phineas W. Skinner.	Edward M. Carter.
John E. Fuller.	Francis A. Perkins.
George L. Smith.	Jacob W. Skinner.
William H. Johnston.	David A. Bolton.
Theodore E. Heron.	Ira S. Carleton.
Michael T. Kennedy.	Ezra A. Dodge.
Charles W. Stevens.	Daniel G. Simons.
James J. Pollard.	Frederick H. Googins.
Samuel Burns.	William J. Davidson.
Jotham Chisholm.	John A. Dadmun.
Elmer E. Drew.	George L. Rice.
Eugene A. Woodsum.	John A. Ray.
Myron S. Gott.	Charles W. Reick.
Herbert Hilton.	Frank C. Hopkins.
Charles E. Byrnes.	Hudson M. Howe.
Charles W. Allen.	Ernest S. Goff.
Frederick J. Balcom.	Frank H. Graves.
Sanford S. Lewis.	Harry L. Allen.
Henry A. Sudbey.	William J. Sutherland.
Harvey R. Fuller.	Thomas F. McNamara.
Albion L. Staples.	

Reserve Police Force.

Louis F. Arnold.
James M. Lynch.
Martin Sharry.
Robert T. Blair.
Theodore S. Hall.

Charles S. Johnston.
George E. Reece.
Henry Y. Gilson.
Ernest Howard.
George A. C. Peters.

In conclusion, I wish to thank the honorable Edward Glines, mayor, the board of aldermen, the honorable justices, and the clerk of the police court for their uniform support to myself and officers of the department. To the officers in my command I also extend thanks for their constant support and strict attention to duty.

Respectfully submitted,

MELVILLE C. PARKHURST,

Chief of Police.

REPORT OF SEALER OF WEIGHTS AND MEASURES.

OFFICE OF SEALER OF WEIGHTS AND MEASURES, }
City Hall Annex, Somerville, January 7, 1904. }

To His Honor, the Mayor, and the Board of Aldermen:—

The following report of the sealer of weights and measures for the year ending December 31, 1903, is respectfully submitted.

Section 21, chapter 62, of the Revised Laws provides that sealers of weights and measures shall annually give public notice, by advertisement or by posting in one or more public places in their respective cities and towns, notices to all inhabitants or persons having usual places of business therein who use weights, measures or balances for the purpose of selling goods, wares, merchandise, or other commodities, or for public weighing, to bring in their weights, measures and balances to be adjusted and sealed. Such sealers shall attend in one or more convenient places, and shall adjust, seal and record all weights, measures and balances so brought in.

Section 34 of the same chapter provides that each sealer of weights and measures, including the county treasurer, shall receive a fee of one dollar for sealing each platform balance if weighing 5,000 pounds or more, and fifty cents if weighing less than that amount, and three cents each for sealing all other weights, measures, scales, beams, or balances. He shall also have a reasonable compensation for all necessary repairs, alterations and adjustments made by him.

When weights, measures and balances are sealed, as provided in Section 21 (that is, brought to the office), no fee is charged for sealing.

In compliance with the foregoing Section 21, the customary notice was given by advertisement in the Somerville Journal in March.

During the year the sealer visited all places in the city where goods were sold or bought, and tested and sealed all scales, weights and measures which were found correct, and condemned all found beyond repair and useless. One hundred and thirty-four scales, weights and measures were adjusted before sealing, and nine scales were tagged for repairs, five of which were repaired as ordered, and the remaining four put out of use.

Work done in the office during the year 1903 was as follows:—

Number of scales sealed	225	
Number of weights sealed	201	
Number of dry measures sealed	542	
Number of glass milk jars sealed	63,516	
Number of tin liquid measures and milk cans sealed	4,283	
Number of coal baskets sealed	50	
	<hr/>	
Total number of all kinds sealed		68,817
Number of scales adjusted and sealed	36	
Number of weights adjusted and sealed	8	
Number of dry measures adjusted and sealed	1	
	<hr/>	
Total number adjusted and sealed		45
Number of scales tagged for repairs	4	
Number of scales repaired as ordered	3	
	<hr/>	
Total number tagged and repaired		7
Number of scales condemned	8	
Number of dry measures condemned	12	
Number of liquid measures condemned	2,122	
Number of coal baskets condemned	4	
	<hr/>	
Total number condemned		2,146
	<hr/>	
Total number of tests of all kinds in the office		71,015
Work done outside of the office:—		
Number of scales sealed	1,081	
Number of weights sealed	3,613	
Number of dry measures sealed	1,006	
Number of liquid measures sealed	1,292	
Number of yard sticks sealed	89	
Number of coal baskets sealed	8	
	<hr/>	
Total number sealed		7,089
Number of scales adjusted and sealed	61	
Number of weights adjusted and sealed	27	
Number of dry measures adjusted and sealed	1	
	<hr/>	
Total number adjusted and sealed		89
Number of scales tagged for repairs	5	
Number of scales repaired as ordered	2	
	<hr/>	
Total number tagged and repaired		7
Number of scales condemned	2	
Number of dry measures condemned	27	
Number of liquid measures condemned	6	
Number of yard sticks condemned	2	
Number of coal baskets condemned	2	
	<hr/>	
Total number condemned		39
	<hr/>	
Total number of tests outside of the office		7,224
	<hr/>	
Total number of tests in and out of the office		78,239

Receipts for the year 1903:—

Appropriation	\$1,200 00	
Received for sealing	392 27	
Received for adjusting	4 50	
	<hr/>	
		\$1,596 77

Expenditures for the year 1903:—

Printing, books, and supplies	\$61 03	
Amount paid helper	159 00	
Amount paid for team	210 00	
Salary of sealer	1,000 00	
	<hr/>	\$1,430 03
Unexpended balance		<hr/> \$166 74

There has been a marked increase in the business of this department since 1897, my first year as sealer. The number of tests for that year was 9,663, while in the year 1903 the number was 78,239, or more than eight times as many in 1903 as in 1897. The increase has been mostly in work brought to the office, for which there is no charge for sealing; consequently the receipts have not increased at the same rate as the work. In 1897 the receipts were \$283.78, and in 1903 they were \$396.77, making an increase in receipts of only forty per cent., while the work has increased over eight hundred per cent.

JOHN H. DUSSEAULT,
Sealer of Weights and Measures.

REPORT OF THE CITY SOLICITOR.

Somerville, February 16, 1904.

To His Honor, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—The following is my report as city solicitor for the year 1903.

By chapter 129 of the Acts of the Legislature of the year 1903, the city was authorized to use for a public school or any other municipal purpose such portions of the land on Highland avenue and Hudson street, acquired in the year 1902 for the erection of an armory, as are not occupied by the armory building.

By chapter 327, a special commission was created, consisting of the mayors of Cambridge and Somerville and the chairmen of the boards of selectmen of Arlington and Belmont, to make certain improvements in Alewife brook and its tributaries. The matter was referred by the commission in large part to the city engineer of Somerville; but action has been delayed at the request of the metropolitan park commissioners, who are now engaged in investigations with a view to the improvement of the shores of Mystic river at the same time.

With representatives of other municipalities, I joined in successful opposition to the petition by the mayor of Newton for the withdrawal of that city from the metropolitan water district, by which its contribution to the expenses of the district would have ceased.

A petition by the town of Wakefield for legislation obliging the north metropolitan sewerage district to pay \$180,000, for the cost of constructing a large drain within the limits of that town, was opposed by myself and by representatives of several other municipalities in the district, at hearings before committees of the legislature. The expense to Somerville of the legislation proposed would exceed \$25,000, and, if it were treated as a precedent, the expense would become much greater than that sum. A bill on the petition, notwithstanding the opposition, was reported on favorably by several committees of the legislature and passed both houses. Believing the bill to be an unjust measure, I obtained from mayors and other officials of the cities of Somerville, Cambridge, Medford, Malden, Melrose and Everett, and the towns of Belmont, Arlington and Winchester, letters to the governor requesting him to veto the bill, and presented the letters to him, with a written statement of facts and arguments, together with documents bearing upon the subject matter, and took part

in a hearing before him. The governor vetoed the bill and the house failed to pass it over his veto.

The bridge over Mystic river at Middlesex avenue, authorized by chapter 491 of the acts of the year 1901, has been completed and the question of apportioning the cost among Somerville and other municipalities will soon come before the courts for adjustment.

Agreements have been made with the owners of certain ledges in West Somerville, under chapter 504 of the acts of the year 1902, which will probably prevent any repetition of the attempts of previous years to secure legislation obliging the city to grant licenses to blast in that district. No agreement has been made as yet with the city of Cambridge, which also desired the privilege of blasting in its ledge.

Petitions for the abolition of five grade crossings of the Fitchburg division of the Boston & Maine railroad and the crossing of the Boston & Albany division of the New York and Hudson River railroad at Somerville avenue are still pending in the superior court, awaiting action on the part of the railroads or of the city government.

Thirty-five cases are now pending in various courts, in which the city is interested.

A case brought by the contractor who constructed the Winthrop-avenue storm water drain was settled, after many hearings before an auditor, for about the sum originally offered by the city, with interest. Two land damage suits for change of grade in Myrtle street were settled for \$112.50 each, and one for change of grade in Broadway was settled for \$500. Four highway accident cases were settled for \$40, \$90, \$100, and \$750, respectively. A case was tried for injuries claimed by a woman to have been received by falling into a manhole in the Sacramento-street subway, and a verdict was given in favor of the city. A case was tried for injuries received by a workman from blasting during the excavation by the city of a trench for a sewer, and a verdict was given in favor of the city. Two highway accident cases were settled without expense to the city; by a drain layer, in one case, and by a property owner, in the other, who were summoned in by the city to defend. Suits brought by the city against a contractor and against the Boston Elevated Railway Company to recover expenses incurred by the city in connection with a former highway accident case, which was decided against the city after trial, were settled, the contractor paying the city the sum of \$1,000, being the full amount of the verdict against the city in the original case.

Very respectfully,

FRANK W. KAAH,

City Solicitor.

REPORT OF THE CITY CLERK.

OFFICE OF THE CITY CLERK, }
January 28, 1904. }

To the Honorable, the Mayor, and the Board of Aldermen:—

Gentlemen,—The following is respectfully submitted as the thirty-second annual report of the city clerk of the city of Somerville, and is for the year ending December 31, 1903.

grounds for the purposes of the celebration	1
For use of part of Central Hill Park by Ladies' Volunteer Aid So-	
ciety, July 4	1
To charitable organization to parade in streets with music (fee	
remitted)	1
To semi-military organization to drill on public park	1

The West End Street Railway Company has been granted locations for a turnout in Springfield street, about midway between the two ends of the street, and an extension of the turnout in Concord avenue into Springfield street.

The same company has also been granted a new location for its tracks in Broadway, from the parkway to Marshall street, for the purpose of straightening them so as to lessen the friction in running heavy cars.

Permission has been given to operate the cars on all these locations by the overhead single trolley electric system of motive power.

Locations have been granted in the streets for gas mains, and for poles for the support of electric wires to be used for telephonic and electric lighting, heating and power purposes.

Before an order granting any of these privileges to use the streets takes effect an agreement is filed by the company obtaining such privilege, for the adequate protection of the city.

Births.

Number of births (exclusive of still-births) in Somerville in 1903 registered		1,626
More than previous year		101
Males	827	
Females	799

1903	2,248	4,410	550	11,346	67,000

* Census.

The vote on this question does not apply to licenses of the sixth and seventh classes. The board of aldermen is required by law to grant annually one or more licenses of the sixth class, and it may also grant licenses of the seventh class to suitable persons.

These two classes of licenses are defined in the law as follows:—

Sixth Class,—Licenses to retail druggists and apothecaries to sell liquors of any kind for medicinal, mechanical or chemical purposes only, and to such persons only as may certify in writing for what use they want them.

Seventh Class,—Licenses to dealers in paints or in chemicals to sell alcohol for mechanical, manufacturing or chemical purposes only.

GEORGE I. VINCENT,
City Clerk.

ORDINANCES.

Somerville, March 18, 1904.

The following ordinances have been adopted since the printing of the annual reports for the year 1902.

GEORGE I. VINCENT,
City Clerk.

No. 44.

An Ordinance to Amend Section Four of Chapter Twenty-Seven of the Revised Ordinances of 1900, Entitled "Hawkers and Pedlers."

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. Section four of chapter twenty-seven of the Revised Ordinances of 1900, entitled "Hawkers and Pedlers," is hereby amended by adding thereto the following words: "No person so licensed shall cry his wares or calling in a street earlier in the day than seven o'clock A. M., nor later in the day than 7 o'clock P. M., and no person so licensed shall ring a bell in a street earlier in the day than seven o'clock A. M., nor later in the day than 9 o'clock P. M."

Section 2. This ordinance shall take effect upon its passage.

Approved May 29, 1903.

No. 45.

An Ordinance Relative to the Removal of Snow and Ice from Sidewalks.

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. No owner, tenant or occupant of property abutting upon a sidewalk within the limits of any highway or townway in this city, and no agent of such owner having the charge of such property shall place or suffer to remain on such sidewalk for more than six hours between sunrise and sunset on any day any snow nor any ice, unless such ice is made even and covered with sand or other suitable material to prevent slipping.

Section 2. Whoever violates any of the provisions of section one of this ordinance shall be liable to a penalty of not more than twenty dollars for each offense.

Section 3. Upon neglect or violation of the duty imposed by section one of this ordinance, such duty may be performed by the street commissioner of this city at the expense of the person liable to perform the same as above provided.

Section 4. No owner or tenant of land abutting upon a sidewalk within the limits of any highway or townway in this city shall suffer to remain on such sidewalk for more than six hours between sunrise and sunset on any day any snow nor any ice, unless such ice is made even and covered with sand or other suitable material to prevent slipping. Such owner and tenant shall remove all snow and ice from such sidewalk within the time and in the manner herein specified.

Section 5. Whoever violates any of the provisions of section four of this ordinance shall forfeit to the city a sum not to exceed twenty dollars for each offense.

Section 6. The city treasurer, with the approval of the mayor, may in civil actions prosecute and adjust claims inuring to the city under the provisions of this ordinance.

Section 7. Section thirty-three of chapter fifteen of the Revised Ordinances of 1900 is hereby repealed.

Section 8. This ordinance shall take effect upon its passage.

Approved December 4, 1903.

No. 46.

An Ordinance Relative to Snow and Ice on Sidewalks.

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. No owner or tenant of land abutting upon a sidewalk within the limits of any highway or townway in this city shall suffer to remain on such sidewalk for more than six hours between sunrise and sunset, on any day, any snow nor any ice, unless such ice is made even and covered with sand or other suitable material to prevent slipping. Such owner and tenant shall remove all snow and ice from such sidewalk within the time and in the manner herein specified.

Section 2. Whoever violates any of the provisions of section one of this ordinance shall forfeit to the city the sum of twenty-five dollars for each offense.

Section 3. This ordinance shall be enforced in the following manner only: The city treasurer, with the approval of the mayor, may in civil actions prosecute and adjust claims inuring to the city under the provisions of this ordinance.

Section 4. Sections 4 and 5 of an ordinance approved December 4, 1903, entitled "An Ordinance Relative to the Removal of Snow and Ice from Sidewalks," are hereby repealed.

Section 5. This ordinance shall take effect upon its passage.

Approved February 12, 1904.

JURY LIST OF THE CITY OF SOMERVILLE.

Prepared by the Registrars of Voters, under Chapter 176 of the Revised Laws, January 25, 1904.

Posted February 13, 1904, and accepted by the Board of Aldermen February 25, 1904.
