# INSURANCE COMMISSIONER OF THE STATE OF GALIFORNIA 

VOLUAIE I. FIRE AND FIRE AND MARINE

April 28, 1929.

## To His Excellency, C. C. Young, Governor of the State of California.

Sir: Pursuant to the provision of Section 595 of the Political Code, I respectfully submit Volume I of the Sisty-first Annual Report of the Insurance Department of the State of California, containing synopses of the statements of all fire and marine insurance companies, statistical tables and other information relative to these classifications of insurance, for the calendar year ending December 31, 1928.

## IMPORTANCE OF INSURANCE BUSINESS IN CALIFORNIA

In my report of June 6, 1928, I called attention to the fact that California is now the fourth state in the Union in volume of insurance business transacted and second in volume of casualty and marine insurance. It still stands in this position, and in consequence there have been, as indieated elsewhere in this report, a continuing number of applications of companies for admission to this state. The year 1928 was also characterized by the organization of several new companies with large capital, generally by interests associated with existing companies. Several of these have been admitted to do business in this state, notwithstanding that they had not previously done any substantial business in their home state. Our law does not preseribe any period during which a company must have been in business before it can be admitted in this state, as in the case of some other jurisdictions. Consequently these companies were able to comply with our laws, and while we might feel uneasy if these were new organizations gotten together by inexperienced men, their management by ahle and experienced men in association with other substantial companies gives us reasonable assurance of their success.

## INVESTMENTS OF FOREIGN INSURANCE COMPANIES

In discussing the admission of foreign companies in my last report I called attention to the fact that in the opinion of the Attorney General, the decision of the Supreme Court of this state in the case of C'ommonwealth Acceptance Corporation vs. Jordan, 198 Cal. 618, pre-
eluded my insistence upon the companies complying with the investment statute of this state. Disenssing this, I pointed ont that it seemed unfortunate and that exactly this issue, whether the investment statutes of a state applied only to the companies domiciled in that state, or whether it applied to all companies admitted to do business in the state, was before the Federal Court in New York. In the discussion I quoted an editorial from one of the leating insurance journals, pointing ont that if the local law did not apply, it clearly should apply. This case was tried before the U. S. District Court in New York and the Superintendent of Insurance sustained in his contention that the New York law governed a New Jersey company. The matter was carried to the U. S. Supreme Court and decided at the Jannary, 1929, term, sustaining the lower court. This decision is reported in 1929 Fecteral !. (Firemen's Insurance Company vs. Comway). While of course this opinion is not binding in this state as is the opinion of our Supreme Court referred to above, nevertheless, it seems likely to be persuasive to our courts in an insurance case, particularly where the matter of the security of California policyholders is at stake.

## INTERNATIONAL LIFE AFFAIR

In my last report I called attention to the fact that examinations of certain life insurance companies of St. Louis, Missouri, were then proceeding under the joint auspices of several insurance departments representing the National Convention of Insurance Commissioners, with Mr. Nelson B. Hadley, chief examiner of life companies in the New York department, in charge by courtesy of that department.

These examinations were initiated by my action. I regret to report that my misgivings, at least as regards the International Life Insurance Company, were more than justified by the findings, and that in the course of the examination it was disclosed that the president of the company was a defanlter to the extent of approximately three and a half million dollars. The discovery of this condition necessitated my personally spending considerable time in St. Loutis, as application had been made by stockholder interests for receiverships. The commissioners under whose auspices the examination had been undertaken arranged for a committee to act, of which I was a member, and we were fortmate in securing an offer of reinsurance which protected the policyholders and to some extent the stockholders. Certain interests opposed the reinsurance, but we were able to convince the Federal ('ourt that this was the proper procedure, and it directed that its receiver aceept the reinsmrance agreement. The diselosure of this default developed other irregularities in the conduct of its president, who has recently been convicted of over-issue of stock in connection with his transactions and who is still under indietment for the use of the mails to defrand, and other shady practices.

While conditions in the case of the Continental Life were not foume ideal, the company was found solvent and its license was renewed. I believe that this investigation, in addition to saferuarding these particular polieyholders, will have a salutary effect on the life insurance business in general, since it willastand as a waming to those who may happen to control their stock, that such institutions are essentially of a trustee character and the trust must be respected.

## OTHER ENAMINATIONS

Examination of many other California companies was made during the year. In one case we found a eompany in bad enndition due to bad mrestments and mismanagement, and in this casc of the West American Fire Insurance Company and the West American Casualty Company, we were able to bring about reinsurances without loss to policyholders and probably without loss to stockholders.

## WESTERN MUTUAL LIFE ASSOClATION

Early in 1928 an examination was made of this association operating in California under the Fraternal Benefit Act, whose affairs had for years been dominated by the secretary of the association. Why previous examinations by the Insurance Department and by public accountants had failed to disclose earlier the true conditions, it is impossible now to say, but this examination disclosed that the secretary had commingled the association's funds and his own. and had otherwise mismanaged its affairs. Withont going into the details of the case, protection of the policyholders was secured by a satisfactory contract of reinsurance with the Occidental Life Insurance Company, and other arrangements made whereby a considerable amount of property will be salvaged for the henefit of policyholders, the contract with the Occidental being so drawn as liberally to give the polierholders the benefit of such salrages.

## ASSESSMENT ASSOCIATIONS

In my last report I called attention to the large number of new organizations started in this state under Sections $452 a$ and 4.53 of the Civil Code, and pointed out the danger therein. and particularly the fact that these were largely promoted for the benetit of and controlled by their organizers. On August 8. 1928, the Attorner General rendered an opinion that these transactions were illegal, and that I would be justified in applying for a receiver in such cases. T'nfortunately this was just at the time when the larger interests in St. Louis were in jeopardy and required my presence there, and as all those associations were able to technically reconstruct their affairs so that my position would have been greatly weakened in any appeal to the courts. I was not in position to follow the matter through.

Although the department is presenting not another bill dealing with this matter at the current session of the legislature, two such bills have been introduced by others and are now under consideration.

## WOODMEN OF THE WORLD

On August 12, 1927. I was invited by C'ommissioner Cochrane of Colorado, in which state the home office of the Woodmen of the World is located, to participate in an examination of this fraternal order because it had a large number of members in California, and I was particularly requested to send an actuary, as the Colorado department did not have one for this work. Accoringly, Mr. Barrett N. Coates, consulting actuary, represented both this department and the c'olorado department in the examination of this order. The Woodmen relied upon the monreserve assessment system for operation but had accumulated a substantial guarantee fund. which by its constitution was not to
be used for payment of current claims. The examination disclosed that this provision of the ennstitution had heen violated and a meeting was held of representatives of the insurance commissions of all the states of the Pacific slope in which the order did business. Strong representations were made as to the unsatisfactory condition, and at the meeting of the head camp lield in Oakland in June, 1928, readjustment was agreed npon so as to bring the business of the order upon an actuarial reserve basis. Tnfortunately, the members were not fully advised and the plan was not clearly drawn, and there has been great dissatisfaction thronghout the state with the manner in which the order has been endeavoring to earry this throngh. As the order has a large number of old members, the problem of reorganization is an exceedingly difficult one, though such a reorganization always creates a great deal of dissatisfaction. The order's funds must be used so far as may be for the best interest of all concerned. So far as I have learned, their actions are not in contravention of the fraternal act of this state and there is no basis upon which the department can act, even though many complaints may be made to it from dissatisfied members.

## LEGISLATION

During the past two years a memorandum has been kept in the department with respect to the various sections of the law which required correction. Having in mind your desire that only such legislation as was deemed important be presented, the department prepared twelve bills for introduction. In addition, three bills were prepared by the Life Underwriters and presente! by the department. Two of these, early in the session, were "tabled" at the request of both this office and the life companies interested therein. This action was taken as a result of a nation-wide investigation which is now being conducted in connection with the sulbject matter thereof.

Of the department's own bills, the most important was that known as the "Office Bill," under the provisions of which all collections of the department are hereafter to be deposited in the State Treasury tc the credit of the "Insurance Fund," which fund has been ereated in lien of the Insurance Commissioner's Special Fund as heretofore. The bill also makes provision for the employment by the department of a special attorney.

The second bill was prepared after several eonferences with members of the Department of Finance, its purpose being to reduce our income to a figure more nearly in kecping with our expense of operation. Accordingly, the $\$ 20$ fee for filing annual statements has been eliminated, and the fee for the issuance of renewal of brokers' licenses has been reduced from $\$ 10$ to $\$ 5$.

The present law defining "Marine" insurance was enacted in 1872. The business having since that date materially changed, it was decmed necessary to request a definition in keeping with present day conditions. We, therefore, selected the definition contained in the model code adopted by Congress for the District of Columbia, and later enacted in the state of New York.

During the past fonr years, the department has received a vast number of applications from various persons desiring to organize so-ealled mutual benefit and life associations. The present law has been found
entirely inadequate to properly eontrol the operations of these organizations and, therefore, a bill setting forth the various requirements to be eomplied with, was prepared. The bill places certain limitations as to number and age of members, as well as governing the expense of operation. This will, to some extent, prevent the organization of purely commercial associations in the guise of mutual benefit associations.

The business of insurance in this state has heretofore been divided into eighteen classifieations. It has been found, however, that with the increased use of the aeroplane, not only the pleasure plane, but also in connection with the handling of the United States mails, transportation of passengers and freight, the demand for "aireraft" insurance made it necessary to establish a special classifieation for that coverage by amending the present Section 594 of the Political Code. In addition, the classification of "Land Value" insurance has been added to said section, legislation having been enaeted at the 1925 session of the legislature, governing such insurance.

As just stated, "Land Value" insuranee was made possible by lecislation enaeted in 1925 . As a result of the department's experience with this class of insurance in the past four years, it was deemed advisable to submit a bill providing for an increased eapitalization for this class of insurance. The present law requires a $\$ 100,000$ capital, whereas the bill presented to the legislature provides for a capital of $\$ 200,000$ to be deposited with the Insurance Commissioner for the protection of holders of polieies issued by sueh companies. This is deemed advisable due to the fact that claims are not payable under "Land Value" policies until the expiration of a ten-year period following the purchase of the property, the value of which is insured.

The "Surplus Line" law, as it appears on the statute books today, refers only to "Insurance on Property,' whereas it has been found that a large portion of the insurance business of the state not confined to "property" is being written in enmpanies not authorized to transact business in California. An amendment to said law has been offered governing all policies on "property or risks" located in this state. Provision has also been made for the examination hy the department of the books and accounts of all persons licensed under said law as "Surplus Line" brokers.

The Corporate Securities Aet of the state having been amended so as to eliminate supervision over insurance companies, an amendment has been prepared, under the terms of which the sale of stock or securities of insurance companies will hereafter be controlled by the Insurance Commissioner.

Under the laws of many states, life insurance companies are prohibited from issuing what are known as "Special" or "Advisory" Board" contracts. These are special privilege contracts granted to certain groups of policyholders, and are frequently sold together with stock of the insurance company in question, in conneetion with life policies. An amendment prohibiting the sale of these contracts in California has been presented.

Three other bills, one with respect to the qualification bond of insurance companies, one referring to insurance solicited through the mails or by means of advertisements without first having secured a license to operate in California, and the other referring to the amount which
could be accepted by an insurance eompany under any one risk, were presented. However, after a general discussion of these bills, and a more careful analysis of the subject matter thereof, we requested that same be "tabled" in committee. The bill with respect to the solicitation of insurance by unauthorized companies was presented in accordance with the request of the National Convention of Insurance Commissioners. Until such time as a similar bill has been introduced in a number of the states, however, it has been deemed inadvisable to seek to restrict our home companies by the enactment of such legislation. As our difficulty is with insurance companies of other states, such a law could not reach their operations.

Numerous other bills have been introduced by various parties. I am, however, not commenting thereon, due to my inability at this date to determine just which of these bills will become a law. If all are enacted I may say the work of this department will be very materially increased.

Respectfully submitted.
Cilarles R. Detrick,
Insurance Commissioner.

## REPORT OF INSURANCE COMMISSIONER

## DEPARTMENT COLLECTIONS AND EXPENDITURES, 1928

The total number of insurance companies and associations which transacted fire and marine business in the State of California during the period ending December 31, 192s. is three hmmed twentr-two, classified as follows:

CLASSIFICATION OF COIIPANIES LICENSED IN CALIFORNIA, 1928

| Kind | Class | California | Of other states | Of foreign countries |
| :---: | :---: | :---: | :---: | :---: |
| Fire and marine | Stoek | 11 | 190 | 55 |
| Fire and marine | Mutual County mutual | 25 | 22 |  |
| Fire and marine | Interinsurance. |  | 19 |  |
| Totals |  | 36 | 231 | 55 |

# SIXTY-FIRST ANNUAL REPORT 

OF THE

# INSURANCE COMMISSIONER OF THE STATE OF CALIFORNIA 

VOLUME II. LIFE AND FRATERNAL

Insurance Department, San Francisco, April 15, 1929.

To His Excellency, C. C. Youna, Governor of the State of California.

Sir: Pursuant to the provision of Section 595 of the Political Code, I respectfully submit Volume II of the Sixty-first Annual Report of the Insurance Department of the State of California, containing synopses of the statements of all life insurance companies and fraternal benefit societies, statistical tables and other information relative to these classifications of insurance, for the calendar year ending December 31, 1928.

Attention is also called to the fact that in Volume I of this report, covering the business of fire and marine companies, you will find a communication reviewing, generally, certain other important facts with regard to insurance business not wholly confined to fire insurance companies.

Respectfully submitted.

> Charles R. Detrick, Insurance Commissioner.

## SUMMARY OF COMPANIES

    Governor of the State of California.
```

Sir: Pursuant to the provision of section 595 of the Political Code, 1 respectfully submit Volume III of the Sixty-first Annual Report of the Insurance Department of the State of California, containing synopses of the statements of all casualty and miscellaneous companies, statistical tables and other information relative to these classifications of insurance, for the calendar year ending December 31, 1928.

Attention is also called to the fact that in Volume I of this report, covering the business of fire and marine companies, you will find a communication reviewing generally certain other important facts with regard to insurance business not wholly confined to fire insurance companies.

Respectfully submitted.
Charles R. Detrick,
Insurance Commissioncr.
