WHEREAS we look back with pride upon the noble achievements and the courageous deeds of the living and remember in affection the devoted service, and the heroic sacrifices of the dead; and

WHEREAS we look forward to the increasing importance of American air power in preserving the peace; in defending America against aggression; and in strengthening the Union of our own country by swift, space-ignoring flight;

**PART 3290—TEXTILE, CLOTHING AND LEATHER**

[Conservation Order M-84, as Amended July 15, 1946]

**MANILA (ABACA) AND AGAVE FIBER AND CORDAGE**

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of manila and agave and products made from them for defense for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 3290.221 *Conservation Order M-84—*  
(a) *Restrictions on processing of fiber or yarn into rope.* (1) No processor may put into process manila fiber or manila yarn to manufacture rope except for an end use allowed in Schedule A.

(2) [Deleted Feb. 5, 1946]

(b) *Restriction on processing fiber or yarn into other products.* No processor may put into process any manila or agave, or yarns made from those fibers, to manufacture any product (other than rope) except products permitted in Schedule B, and binder twine and baler twine as specifically authorized or directed in writing by the Civilian Production Administration.

(c) *Further restrictions on processing.* (1) The Civilian Production Administration may issue specific directions to pro-

essors who have received manila or agave, by allocation under this order or any other Civilian Production Administration order or by delivery from any United States Government agency, as to the extension of more critical fibers by mixture with less critical ones (i. e. use of "extenders") in the manufacture of any product permitted in paragraphs (a) and (b) above.

(2) The Civilian Production Administration may from time to time issue specific instructions regarding the percentage of extender to be used in the manufacture of agave sisalana rope.

(d) *Restrictions on delivery of rope and twine.* (1) No processor or dealer may sell, deliver, or accept delivery of new rope or new twine, produced in the United States in whole or in part from manila or agave fiber or yarn, for end uses for which the product may not be manufactured under this order.

(2) No person may sell or deliver new binder or new baler twine if he knows or has reason to believe that:

(i) The binder twine will not be used with mechanical harvesting equipment or in the growing, harvesting or delivering of agricultural crops, or that the binder twine will be converted into rope or any other product.

(ii) The baler twine will not be used in a self-tying machine for baling hay, straw or other fodder crops.

(3) No person may use new binder or new baler twine to manufacture rope for sale.

(4) [Deleted Feb. 5, 1946]

(e) [Deleted Mar. 22, 1946.]

(f) *Allocation of fiber.* (1) No processor shall make or accept delivery of any manila or agave fiber contrary to directions which from time to time the Civilian Production Administration may issue. The Civilian Production Administration may from time to time allocate to processors the available supplies of manila and agave fiber and specifically direct the time, manner, and quantities in which deliveries to processors shall be made or withheld.

(2) In general allocations of fiber for rope and products permitted in Schedule B to individual processors will be made upon the following basis: the aggregate allocation of manila and agave fibers to each processor will be in proportion to his average monthly sales of both types of rope during the period January 1, 1939 through December 31, 1941; the manila fiber allocated to each processor for rope will be in proportion to his average monthly sales of manila rope during the period January 1 through December 31, 1939; and the agave fiber allocated to each processor will be in proportion to his aggregate allocation for both fibers, less that for manila. A manufacturer who was not in the hard fiber cordage business during 1939-40-41 may apply to the Civilian Production Administration, Textile Division, Washington 25, D. C., for an allocation. The application should be filed by letter stating the quantity of fiber desired, and should include a statement of the facilities available for the manufacture of cordage products, as permitted under Order M-84, the maximum poundage of fiber which can be processed with his facilities on the basis

of a 40-hour week, and the minimum poundage of fiber needed for economical operation during a three-month period. Applications from new manufacturers will be considered on an equitable basis in view of the allocations given to other manufacturers.

(3) Allocations of agave fiber for binder twine and baler twine will be prorated among processors on the basis of information previously filed with the War Production Board and Civilian Production Administration as to productive capacity, method and rate of operation.

(g) *End use information.* No person may sell or deliver any product controlled by this order to any person who he knows or has reason to believe will use the product in a manner which this order does not permit. He should satisfy himself as to this in some reasonable manner before delivering. He may, but need not, require a statement in writing showing the specific purpose or use for which the item is ordered.

(h) *Restrictions on the use of damaged material.* Any processor or dealer who has in his possession damaged or defective manila or agave fiber or cordage, may report by letter the extent of the damage and state to the Civilian Production Administration the percentage not suitable for the manufacture of products or for use permitted by this order. He may then upon receipt of acknowledgment, without objection from the Civilian Production Administration, use or dispose of any portion unsuitable for the manufacture of products permitted by this order, free from its restrictions.

(i) *Reports.* (1) Processors of manila and agave fiber shall report monthly on CPA-2901, sections 1 and 2.

(2) The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Imports.* The importation of material or products covered by this order shall be made in conformity with the provisions of General Imports Order M-63, as amended from time to time.

(k) *Definitions.* In this order:

(1) "Manilla" means fiber, spinnable over machinery which is commonly known in the trade by this term and also known as abaca or Manila hemp, wherever grown (either stripped or decorticated), but does not mean the fiber grades of T2 and T3, O or Y, or equivalent, as established by the Insular Government of the Philippine Islands, processor's mill waste or bagasse.

(2) "Agave" means fiber, spinnable over machinery of the species agave sisalana, agave fourcroydes, and agave cantala, of all grades and qualities including tow and fiber under 20' in length, commonly known in the trade as sisal, henequen, cantala, and maguey, and sometimes preceded by an adjective designating the country or district of origin, but does not include processor's mill waste or bagasse.

(3) "Rope" means any rope or cable, treated or untreated, composed of three or more strands each strand composed of two or more yarns, and not less than 10 percent cordage lubricant (excluding tent and awning rope), but does not in-

clude strings and twines of whatever construction which are commonly used for tying, sewing, baling or other commercial packaging use.

(4) "Twine" means any single or plied yarn or roving, including marlin, for use as a tying material, for sewing or for any similar purpose, but does not include any product falling within the definition of "rope", "binder twine" or "baler twine."

(5) "Binder twine" means a single yarn twine usually containing agave, but sometimes containing manila, istle, jute, coir, hemp, cotton or paper, suitable for use in a harvesting machine and of the type customarily heretofore manufactured. It is put up in balls of approximately five to eight pounds, packed six to ten to the bale. It measures five hundred feet to the pound with a plus or minus tolerance of five per cent, and contains a lubricant of at least ten per cent of the weight of the twine and an insect repellent. It is also known as binding twine.

(6) "Baler twine" means a single yarn usually made of agave fiber and used in a self-tying machine for baling hay, straw or other fodder crops.

(7) [Deleted Feb. 5, 1946]

(8) [Deleted Feb. 5, 1946]

(9) "Processor" means any person (other than a United States Government agency) who spins, twists or otherwise uses any fiber or yarn in the manufacture of rope or twine, or who uses manila or agave fiber in the manufacture of any other product.

(10) [Deleted Mar. 22, 1946.]

(l) *Appeals.* Any appeal from the provisions of this order should be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(m) *Applicability of regulations.* Except as specifically otherwise provided this order and all transactions affected thereby are subject to all applicable provisions of the regulations of the Civilian Production Administration as amended from time to time.

(n) *Violations.* Any person who willfully violates any provision of this order, or who in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance by the Civilian Production Administration.

(o) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to the Textile Division, Civilian Production Administration, Washington 25, D. C., Ref.: M-84.

End use	Definition
Auxiliary line-Lyle gun	A 3" circ. hawser-drawn to or from a vessel by means of a whip line and which is used to support a breeches buoy.
Cracker	A short length of fiber drilling cable used in conjunction with a wire drilling cable affording spring or elasticity to the wire line.
Drilling cables-oil, water and gas wells	Used for operating the tools in "cable tool" drilling.

Such marking shall be in the form of a distinct raised letter "S" and numeral of a minimum height of 5/16" on both sides of the tires.

so consumed does not exceed 7.5# per 1,000# (dry weight) of total rayon and cotton cord treated. Natural rubber latex may be consumed in the treatment of nylon cord without limit. Dispersions of natural rubber may be used for cord treatment and the amount of natural rubber solids so consumed shall be included in the maximum content natural rubber permitted for each tire.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

Subchapter B—Licenses and Special Radio Regulations

PART 3—STANDARD AND HIGH FREQUENCY BROADCAST STATIONS

STANDARDS OF GOOD ENGINEERING PRACTICE CONCERNING FM BROADCAST STATIONS

The Commission in meeting on June 20, 1946 amended Paragraph M *Antenna height above average terrain* of Section 1 *Definitions*, and Section 2 *Engineering standards of allocation* of the Commission's Standards of Good Engineering Practice Concerning FM Broadcast Station, effective immediately, to read as follows:

SECTION 1. *Definitions.* \* \* \*

M. *Antenna height above average terrain.* (1) For Class A stations the term "antenna height above average terrain" means the height of the radiation center of the antenna above the terrain 10 miles from the antenna.

(2) For Class B stations the term "antenna height above average terrain" means the height of the radiation center of the antenna above the terrain 2 to 10 miles from the antenna. (In general a different antenna height will be determined for each direction from the antenna. The average of these various heights is considered as the antenna height above average terrain for Class B stations.)

SEC. 2. *Engineering standards of allocation.* A. Sections 3.202 to 3.206 inclusive of the rules and regulations describe the basis for allocation of FM broadcast stations, including the division of the United States into Areas I and II. Where reference is made in the rules to antenna heights of Class A stations, section 2 E (1) of these standards should be consulted; for Class B stations, section 2 E (2) should be consulted.

B. In determining the predicted and measured field intensity contours of FM broadcast stations the following shall govern:

(1) Class A stations will normally not be required to determine their contours.

(2) Class B stations shall determine the extent of their 1000 uv/m and 50 uv/m contours.

The above contours shall be determined in accordance with the methods prescribed in these standards.

C. Although some service is provided by tropospheric waves, the service area is considered to be only that served by the ground wave. The extent of the service is determined by the point at which the ground wave is no longer of sufficient intensity to provide satisfactory broadcast service. The field intensity considered necessary for service is as follows:

TABLE I

Area:	Median field intensity
City business or factory areas--	1000 uv/m
Rural areas-----	50 uv/m

A median field intensity of 3000 to 5000 uv/m should be placed over the principal city to be served, and a median field intensity of 1000 uv/m should be placed over the business district of cities of 10,000 or greater within the metropolitan district served. The location of the main studio of a Class A station is specified in § 3.203 of the rules. A field intensity of 5000 uv/m should be provided over the main studio of a Class B station except as otherwise provided in § 3.204 of the rules. These figures are based upon the usual noise levels encountered in the several areas and upon the absence of interference from other FM stations.

D. A basis for allocation of satellite stations has not yet been determined. For the present, applications will be considered on their individual merits.

E. The service area is predicted as follows:

(1) *Class A stations.* A map, topographic where obtainable, shall be submitted for the area within 15 miles of the proposed antenna site. On this map shall be indicated the antenna location and a circle of 10 miles radius with the antenna location as center. Representative points shall be picked on this circle 15 degrees apart and the elevation of these points determined. The average elevation of these points will be considered the average elevation of the circle. The difference between the elevation of the center of the radiating system and the average elevation of this circle shall be considered the height of the antenna over the terrain 10 miles from the transmitter. In cases where the applicant believes

this method to be grossly in error due to peculiarities of the terrain, this method shall be used for determining the antenna height but a showing may be made, if desired, determining the height by other means and describing the method used. Calculations of the service contours of Class A stations are not required.

(2) *Class B stations.*

(No changes in present section 2 E (2).)

PART 3—STANDARD AND HIGH-FREQUENCY BROADCAST STATIONS

MISCELLANEOUS AMENDMENTS

The Commission in meeting on June 20, 1946, amended § 3.202 *Areas of the United States*, § 3.203 *Class A stations*, § 3.204 *Class B stations*, § 3.205 *Station location*, and adopted § 3.206 *Main studio* to read as follows:

§ 3.202 *Areas of the United States.* For the purpose of allocation the United States is divided into two areas. The first area—area I—includes southern New Hampshire; all of Massachusetts, Rhode Island, and Connecticut; southeastern New York as far north as Albany-Troy-Schenectady; all of New Jersey, Delaware, and the District of Columbia; Maryland as far west as Hagerstown; and eastern Pennsylvania as far west as Harrisburg.<sup>1</sup> The second area—area II—comprehends the remainder of the United States not included in area I.

§ 3.203 *Class A stations.* (a) A class A station is a station which operates on a Class A channel and is designed to render service primarily to a community or to a city or town other than the principal city of an area, and the surrounding rural area. The transmitter power and antenna height of a class A station shall normally be capable of coverage equivalent<sup>2</sup> to a minimum of 0.1 kw and a maximum of 1.0 kw effective radiated power at 250 feet antenna height, as determined by the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcast Stations. Class A stations will not be authorized

<sup>1</sup> In some of the territory contiguous to area I, the demand for frequencies requires that applications be given careful study and consideration to insure an equitable distribution of facilities throughout the region. This region includes the remainder of Maryland, Pennsylvania, and New York (except the northeastern corner) not included in area I; Virginia, West Virginia, North Carolina, South Carolina, Ohio, and Indiana; southern Michigan as far north as Saginaw; eastern Illinois as far west as Rockford-Decatur; and southeastern Wisconsin as far north as Sheboygan. Other regions may be added as required.

<sup>2</sup> For the purpose of determining equivalent coverage, the 1000 uv/m contour should be used.

with more than 1 kw effective radiated power. Standard power ratings of transmitters used for Class A stations shall be not less than 250 watts nor more than 1000 watts. A normal minimum separation for class A stations of 50 miles will be provided on the same channel and 35 miles on adjacent channels.

(b) Twenty channels beginning with 104.1 mc and ending with 107.9 mc (channels 281 through 300) are designated as Class A channels. All of these channels are available for assignment in cities which are not the central city or cities of a metropolitan district. Ten of these channels are also available for assignment in central cities of metropolitan districts which have fewer than six class B stations.<sup>2</sup>

(c) The main studio of a class A station shall be located in the city served and the transmitter shall be located as near the center of the city as practicable.

§ 3.204 *Class B stations.* (a) A class B station is a station which operates on a class B channel and is designed to render service primarily to a metropolitan district or principal city and the surrounding rural area, or to rural areas removed from large centers of population. The service area of a class B station will not be protected beyond the 1000 uv/m contour; however, class B assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service. Standard power ratings of transmitters used for class B stations shall normally be 1000 watts or greater. In the following subsections, antenna height above average terrain and effective radiated power are to be determined by the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcast Stations.

(1) In area I, class B stations will be licensed to operate with a service area equivalent<sup>3</sup> to a minimum of 10 kw effective radiated power and antenna height of 300 feet above average terrain and a maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.<sup>4</sup> In metropolitan districts in area I with a population greater than 250,000 the minimum service area shall be the equivalent<sup>3</sup> of 20 kw effective radiated power and an antenna height of 350 feet above average terrain. Class B stations in area I will

<sup>2</sup> For the purpose of determining equivalent coverage, the 1000 uv/m contour should be used.

<sup>3</sup> For the time being, until more FM broadcast stations are authorized, the Commission will not authorize class A stations in central cities of metropolitan districts having four or more standard broadcast stations.

<sup>4</sup> In the determination of appropriate coverage, consideration should be given to population distribution, terrain, service from other FM stations, trade area and other economic factors. Among the recognized trade area authorities are the following: J. Walter Thompson (Retail Shopping Areas), Hearst Magazines, Inc. (Consumer Trading areas), Rand McNally Map Co. (Trading Areas) and Hagstrom Map Co. (Four Color Retail Trading Area Map).

not be licensed with an effective radiated power greater than 20 kw.

(2) In area II, class B stations will be licensed to operate with a service area equivalent<sup>3</sup> to a minimum of 2 kw effective radiated power and antenna height of 300 feet above average terrain and a normal maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.<sup>4</sup> The use of greater power and antenna height will be encouraged in those portions of Area II where such use would not result in undue interference to stations already authorized or to probable assignments insofar as can be determined at the time of the grant. In such case, the power, antenna height and area will be determined on the merits of each application, with particular attention being given to rural areas which would not otherwise receive service.

(b) Sixty channels beginning at 92.1 mc and ending 103.9 mc (channels 221 through 280) are designated as class B channels.

§ 3.205 *Station location.* (a) Each FM broadcast station shall be considered located in the state and city where the main studio is located.

(b) The transmitter of each FM broadcast station shall be so located that satisfactory service is delivered to the city where the main studio is located, in accordance with the Standards of Good Engineering Practice Concerning FM Broadcast Stations; *Provided, however,* Upon special showing of need, authorization may be granted to locate the transmitter so that adequate service is not rendered to this city, but in no event shall this city be beyond the 50 uv/m contour.

§ 3.206 *Main studio.* The term "main studio" means the studio from which the majority of local programs originate and/or from which a majority of station announcements are made of programs originating at remote points.

##### UNION STOCK YARDS, CHICAGO, ILL.

##### NOTICE OF PETITION FOR MODIFICATION

By documents filed on June 17, 19, 1946, the respondents requested a modification of the temporary rates and charges now being assessed by them at the Union Stock Yards for their services.

By orders entered on January 8 and March 12, 1934, pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), the Secretary prescribed reasonable rates and charges to be applied by the respondents for their services as market agencies. On December 26, 1945, an order (4 A. D. 992) was entered suspending until June 30, 1946, the orders entered on January 8 and March 12, 1934. The order of December 26, 1945 is the latest of a series of supplemental orders entered as a result of stipulations specifying rates and charges higher than those prescribed in the orders of January 8 and March 12, 1934. By an order entered on June 27, 1946, the temporary rates and charges presently being applied by respondents were continued in effect for an indefinite period to allow appropriate action to be taken on the petition for modification referred to above. The petition for modification seeks to modify the rates and charges now in effect so as to permit the respondents to publish and file with the Secretary an amendment to their tariff making effective the following rates and charges:

#### FEDERAL POWER COMMISSION.

[Docket No. G-743]

PANHANDLE EASTERN PIPE LINE CO.

NOTICE OF APPLICATION

JULY 12, 1946.

Notice is hereby given that on June 27, 1946, Panhandle Eastern Pipe Line Company (applicant), a Delaware corporation, having principal offices at 1221 Baltimore Avenue, Kansas City 6, Missouri, and at 135 South La Salle Street, Chicago 3, Illinois, filed an application with the Federal Power Commission, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, to authorize the applicant to construct and operate an inter-connection of its pipe line system with the Central Illinois Light Company at a point approximately midway between Yates City and Elmwood, Illinois, where the applicant's 8-inch Galesburg lateral crosses Central Illinois Light Company's 4-inch line.

From the application and exhibits submitted therewith it appears that the applicant presently maintains connections and points of delivery of natural gas to the Central Illinois Light Company, at the town border of Peoria, Illinois, for distribution and resale by that company at Peoria, Elmwood, Yates City and other municipalities in Illinois, under FPC Rate Schedule No. 64 and supplements thereto. It further appears that applicant has been requested by Central Illinois Light Company for an additional connection

at the point hereinbefore described for the purpose of enabling the Central Illinois Light Company to maintain sufficient pressure in its 4-inch pipe line to meet demands of attached customers in Yates City and Elmwood, Illinois, on peak days.

Applicant states that no change is proposed to be made in the total volumes of gas to be delivered to Central Illinois Light Company under the existing contract with that Company, nor is any change contemplated in existing rates and charges, and that, there will be no impairment of service to Applicant's other customers who are presently served by the Galesburg lateral serving the Central Illinois Light Company.

Applicant estimates the total cost of the proposed connection and constructing metering and regulator station and appurtenant facilities will be approximately \$4,600.00.

Any interested State Commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of Part 67 of the provisional rules of practice and regulations under the Natural Gas Act, as amended, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

Any person desiring to be heard or to make any protest with reference to the application of the Applicant should file with the Federal Power Commission, Washington 25, D. C., not later than 15 days from the date of this publication, a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

WASHINGTON WATER POWER CO.

NOTICE REGARDING FILING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 11th day of July A. D. 1946.

Notice is hereby given that a declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by The Washington Water Power Company ("Washington"), an electric utility subsidiary of American Power & Light Company, a registered holding company subsidiary of Electric Bond and Share Company, also a registered holding company.

Notice is further given that any interested person may, not later than July 25, 1946 at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be

held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter, such declaration as filed or as amended may be permitted to become effective pursuant to Rule U-23 of the rules and regulations promulgated pursuant to said act. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

All interested persons are referred to said document, which is on file in the office of this Commission, for a statement of the transactions therein proposed which are summarized as follows:

Washington proposes to call in, redeem and retire, at the redemption price of \$110 per share, plus accrued dividends, 68,753 shares of the 103,753 shares of its no par value \$6 preferred stock presently outstanding in the hands of the public. At April 30, 1946, the aggregate stated value on the books of Washington of the shares to be retired was \$6,869,258, or approximately \$99.91 per share. The overall cash cost to the company to retire said shares is estimated at \$7,636,583, including estimated expenses of \$5,000 and the payment of accrued dividends.

It is proposed to retire all shares of Washington's \$6 preferred stock now held by stockholders whose post offices addresses now of record with the company are outside of Washington's service area, which consists of Stevens, Lincoln, Spokane, Adams, Whitman and Asotin Counties in the State of Washington; the towns of Chelan, Chelan Falls, Lakeside and Manson in Chelan County, Washington; the town of Hartline in Grant County, Washington; the towns of Cusick and Usk in Pend Oreille County, Washington; the Counties of Kootenai, Shoshone, Latah, Benewah, Nez Perce, Lewis, Idaho and Clearwater in the State of Idaho. The difference between the number of shares called for retirement from holders outside the service area and the 68,753 total shares to be retired is proposed to be made up by selecting, by lot, shares held by holders within the service area.

The articles of incorporation of Washington provide that if less than all of the shares of the \$6 preferred stock are to be redeemed, the shares to be redeemed shall be selected in such manner as the Board of Trustees or the Executive Committee shall determine.

Upon consummation of the proposed transactions described above, Washington will have outstanding 35,000 shares of \$6 preferred stock with an aggregate stated value of \$3,496,850.

Washington has designated section 12 (c) of the Public Utility Holding Company Act of 1935 and Rule U-42 thereunder as applicable to the proposed transactions.

By the Commission.

## NOTICE OF FILING OF AMENDMENTS TO PLAN

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 12th day of July 1946.

Thos. W. Delzell and R. L. Clark, Independent Trustees of Portland Electric Power Company ("PEPCO"), a registered holding company, and a debtor now in reorganization under Chapter X of the Bankruptcy Act, as amended, in the District Court of the United States for the District of Oregon, having filed an amended plan, a first alternative amended plan and a second alternative amended plan for the reorganization of PEPCO, pursuant to section 11 (f) of the Public Utility Holding Company Act of 1935; and

The Commission having, on January 14, 1946, issued its findings, opinion and order (Holding Company Act Release No. 6365) approving the Trustees' second alternative amended plan for submission to said District Court subject to certain terms and conditions, *inter alia*:

1. That prior to the submission of the plan to the District Court, the Trustees shall file with the Court and the Commission an amendment or amendments to their second alternative amended plan (a) reserving to themselves the right, at

any time prior to the consummation of the plan, to apply to the Court and to the Commission for approval of the sale of the common stock of Portland General Electric Company or Portland Traction Company, (b) deleting from the second alternative amended plan, paragraph (I) of Article VII thereof, and (c) deleting therefrom the language of the introduction quoted in the Findings and Opinion of the Commission herein and paragraph (D) of Article IV, relating to the sale by Portland General Electric Company of the stock of Seattle Gas Company and the status of Portland General Electric Company as a registered holding company; *Provided, however*, That submission of said amendment or amendments to the Court need not await the Commission's further approval thereof;

2. That jurisdiction be reserved to the Commission over any sale of the stocks of Portland General Electric Company or Portland Traction Company;

3. That jurisdiction be reserved to the Commission to review and reexamine the allocations of securities provided in the plan, in the event that the stocks of Portland General Electric Company or Portland Traction Company are sold; and

The Trustees having filed the amendments to their second alternative amended plan in compliance with Condition 1 contained in our order of January 14, 1946; and the Court having on June 29, 1946 entered its order approving the Trustees' second alternative amended plan of reorganization, as amended, in compliance with said conditions, and as further amended by inserting a paragraph in said plan to the effect that acceptance of the plan by holders of two-thirds in amount of bonds, represented in proofs of claim individually filed and allowed herein, is essential to the confirmation of the plan; and

The Court having on April 26, 1946 entered its order approving the sale by the Trustees to Portland Transit Company of the stock of Portland Traction Company ("Traction") and the assets of the electric interurban railway division of PEPCO ("Interurban") for a total consideration of \$7,900,000 pursuant to an alternative proposal of Portland Transit Company dated April 4, 1946;

Notice is hereby given that the Trustees have now filed an application for approval of certain amendments to their second alternative amended plan for the reorganization of PEPCO in compliance with Conditions 2 and 3 of our order of January 14, 1946.

Notice is further given that any interested person may, not later than the 26th day of July, 1946 at 5:30 p. m. e. d. s. t., request the Commission in writing that a hearing be held on such amendments, stating the reason for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter, such plan, as amended, may be approved. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

All interested persons are referred to said amendments which are on file in the office of this Commission for a complete statement of the changes proposed in the

plan which may be summarized as follows:

The amendments state that subsequent to the approval by the Commission of the Trustees' second alternative amended plan, the Trustees entered into a contract with Portland Transit Company for the sale of all the capital stock of Traction and the assets of Interurban for the sum of \$7,900,000 in cash (subject to a reduction equal to a dividend to be paid by Traction prior to the consummation of the sale).

The amendments further state that if the contract for the sale of the Traction stock and the assets of Interurban to Portland Transit Company is consummated, the Trustees will immediately apply to the Court for an order declaring that the sale has been consummated. Upon the entry of such an order, the allocations provided in the second alternative amended plan will be based upon the excess of the proceeds from such sale over the valuation of the respective assets and upon the reduction of taxes resulting from such sale (on the basis of the same claims and with the value of Portland General Electric Company ("PGE") common stock the same as heretofore approved by this Commission and by the Court) as follows:

1. Prior to the consummation of the plan and as of such date as the Court may indicate, PGE will: (a) Transfer to PEPCO \$93,000 principal amount of 1934 bonds as a dividend; (b) pay to PEPCO a further dividend of not less than \$1,500,000 cash.

2. The holders of 1934 bonds will receive in full satisfaction for each \$1,000 bond and accrued interest thereon:

- \$680.00 in cash.
- 34.50 shares of PGE common stock.

3. The holders of 1937 bonds will receive in full satisfaction for each \$1,000 bond and accrued interest thereon, and a proportionate amount with respect to a principal amount of less than \$1,000:

- \$594.80 in cash.
- 30.00 shares of PGE common stock.

4. The holders of prior preference stock will receive in full satisfaction for each share of such stock and all accrued and unpaid dividends thereon:

- 6 1/2 shares of PGE common stock.

5. The holders of the first preferred stock will receive in full satisfaction for each share of such stock and all accrued and unpaid dividends thereon:

- 2 1/2 shares of PGE common stock.

6. No certificate for fractions of a share of PGE common stock will be issued to either the holders of bonds or preferred stock, but in lieu thereof scrip certificates will be issued by PGE which shall be calculated to the nearest 1/10th of a share.

7. It is stated that should the Court, upon notice to all persons affected, fix a time to expire not sooner than 10 years after the final decree in the reorganization proceedings closing the estate, within which, as provided in the plan, holders of bonds and certificates for stock shall present or surrender the same and should any holder thereof fail to present or surrender such securities within such

time, the distribution such holder would otherwise be entitled to receive will be transferred to PGE as capital contributions free from all claims.

8. All creditors with the exception of the holders of bonds will be paid in full.

9. The Trustees reserve to themselves the right at any time prior to the consummation of the plan to apply to the Court and to the Commission for approval of the sale of the common stock of PGE.

It is further stated in said amendments that the sum of \$500,000 was paid at the time said contract was entered into with Portland Transit Company, the balance to be payable on the closing date of said sale which according to the terms of the contract will occur prior to July 30, 1946. In the event certain conditions do not occur prior to this date, and unless the time is extended by mutual agreement, the contract will terminate and said sum of \$500,000 will be returned to Portland Transit Company.

The amendments further state that if all conditions to the obligation of Portland Transit Company to complete the purchase of Traction and the assets of Interurban occur prior to June 30, 1946, or within such time as may be agreed upon, and Portland Transit Company defaults in the payment of the balance of the purchase price, the Trustees will apply to the Court for an order declaring such default and the forfeiture of said sum of \$500,000 heretofore paid by Portland Transit Company to the Trustees as agreed liquidated damages. Upon the entry of such an order, the allocations provided in the second alternative amended plan will be based upon the additional assets of PEPCO (on the basis of the same claims and with the value of PGE and Traction common stocks and Interurban Railway assets, Center Street shops and carhouses the same as heretofore approved by this Commission and by the Court) as follows:

1. The holders of 1934 bonds will receive in full satisfaction for each \$1,000 bond and accrued interest thereon:

- \$235.75 in cash.
- 41.50 shares of PGE common stock.
- 23.50 shares of Traction common stock.

2. The holders of 1937 bonds will receive in full satisfaction for each \$1,000 bond and accrued interest thereon and a proportionate amount with respect to a principal amount of less than \$1,000:

- \$235.75 in cash.
- 35.50 shares of PGE common stock.
- 19.80 shares of Traction common stock.

3. The holders of the first preferred stock will receive in full satisfaction for each share of such stock and all accrued and unpaid dividends thereon:

- .23 shares of PGE common stock.
- .333 shares of Traction common stock.

4. No change will be made in the allocation to the prior preference stockholders.

It is ordered, That the Secretary of the Commission shall serve a copy of this notice and order by registered mail on Thos. W. Delzell and R. L. Clark, Independent Trustees of Portland Electric Power Company, the subsidiaries of Portland Electric Power Company, Guaranty

Trust Company of New York, Indenture Trustee, the parties who have heretofore entered their appearance herein, or their respective counsel of record, and on the Public Utilities Commissioner of the State of Oregon and the Department of Public Utilities of the State of Washington; and that notice be given to all other persons by publication of this notice and order in the FEDERAL REGISTER.

By the Commission.

## PORTLAND GAS &amp; COKE CO.

## SUPPLEMENTAL ORDER RELEASING JURISDICTION OVER LEGAL FEES

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 11th day of July A. D. 1946.

Portland Gas & Coke Company ("Portland"), a gas utility subsidiary of American Power & Light Company, a registered holding company, having filed pursuant to section 11 (e) and other applicable sections of the Public Utility Holding Company Act of 1935 a plan designed to enable it to meet the standards of section 11 (b) of the act, and as an initial step of said plan having filed an application and amendments thereto pursuant to section 6 (b) of the act for exemption from the provisions of sections 6 (a) and 7 of the act of the issue and sale by Portland, in accordance with the competitive bidding requirements of Rule U-50, of \$10,000,000 principal amount of First Mortgage Bonds, ----%, due 1976, and other matters stated in said application; and

The Commission having, by order dated July 2, 1946, granted said application, as amended, subject to the condition that said issue and sale of bonds shall not be consummated until Portland obtains from the Public Utilities Commissioner of Oregon a certificate of authority expressly authorizing the issue of the ----% of First Mortgage Bonds, due 1976, and having reserved jurisdiction over the price to be paid to Portland for such bonds, the interest rate thereon, the underwriters' spread and its allocation, and all legal fees to be paid in connection with the proposed issuance and sale of securities; and

Portland having filed a further amendment to said application stating that, in accordance with the said order of the Commission, dated July 2, 1946, it offered such bonds for sale pursuant to the competitive bidding requirements of Rule U-50 and has received the following bids:

Bidders	Percent of principal amount (1)	Interest rate	Cost to company
		Percent	
Halsey, Stuart & Co., Inc.	100.2839	3 3/8	3.110376
Blyth & Co., Inc.	100.80	3 1/4	3.208276
White, Weld & Co.	101.475	3 3/8	3.297201
Harris, Hall & Co.	100.389	3 3/8	3.354336

(1) Exclusive of accrued interest.

Said amendment further stated that Portland has accepted the bid of Halsey, Stuart & Co., Inc. for the bonds as set forth above and that the bonds will be

offered for sale to the public at a price of 101.46%, resulting in an underwriters' spread of 1.176%; and

The Commission having examined said amendment and having considered the record herein, and finding no reason for imposing terms or conditions with respect to the price to be paid for said bonds, the redemption prices thereof, the interest rate thereon, and the underwriters' spread and its allocation; and the Public Utilities Commissioner of Oregon having issued a certificate of authority expressly authorizing the issue of said bonds; and

It appearing to the Commission that the legal fees to be paid in connection with the proposed issuance and sale of securities are not unreasonable and that jurisdiction over them should now be released;

It is ordered, That jurisdiction heretofore reserved over the prices to be paid for said bonds, the redemption prices thereof, the interest rate thereon, and the underwriters' spread and its allocation, be, and the same hereby is, released; and said application, as further amended, be, and the same hereby is, granted, subject, however, to the terms and conditions prescribed in Rule U-24; and

It is further ordered, That jurisdiction heretofore specifically reserved over the legal fees in connection with the proposed issuance of securities be, and the same hereby is, released.

By the Commission.
