

Guide for typing in Punjabi in Punjabi Wikipedia

Go to pa.wikipedia.org, Click on **Input Method** which is on the top, Choose **Enable**. Now you will be able to type in Punjabi.

There are two types of typing schemes available on Punjabi wikipedia:

- Gurmukhi Punjabi Transliteration
- Gurmukhi Punjabi InScript

Gurmukhi Punjabi Transliteration

This keymap could be used to help users to type in Punjabi Gurmukhi in transliteration from Latin letters. The Punjabi character will be shown when you type using the Latin letter as shown in the table.

Click here for [Full explanation about the transliteration keyboard](#).

If you want to type regular characters without getting them transliterated, type \ before the character. For example, typing '\~' produces ~.

To turn off the keyboard completely press Input Method at the top and then uncheck Enable (\$1).
