NAGASAKI BRANCH OF CENTRAL LIAISON OFFICE

October 3, 1946.

From: Chief, Nagasaki Branch, Central Liaison office.

To: Commanding Officer of Nagasaki Military Government Team Headquarters.

Subject: Application for Return of ex-Military Installation

We have received application for return of Workers' Dormitory formerly belonged to ex-Naval Arsenal, Kawatana, as per lists attached hereto. Those buildings will be removed to Sasebo using them for the purpose of reconstructing primary school there which was burnt down during the war.

We deem it very urgent matter, and wish the same will be returned so early.

T. Nakamatsu

T. Nakamatsu, Chief of
Nagasaki Branch, Central Liaison Office.

NAGASAKI
PREFECTURAL GOVERNMENT

October 3, 1946.

From: Governor of Nagasaki prefecture.

To : Commanding Officer of Nagasaki Military Government Team Headquarters.

Subject: Application for return of former military installations.

We wish to submit to you, as per attached, application for return of former military installations which formerly belonged to Japanese Navy.

We should be appreciated it greatly if you would kindly take necessary procedures to return it to the Japanese Home Ministry, as the installation will be used for peacetime purpose.

S. Sugiyama

S. Sugiyama, Governor,
Nagasaki prefecture.

APPLICATION FOR RELEASE OF FORMER MILITARY INSTALLATIONS

1. Location of the property in terms of map number, map scale, and military grid coordinates and the Chome-Cho-Ku address if known.

SHEET 44 Scale 1:250,000 (1291.5 - 1100)
Shiraishi-go, Kawatana-machi, Higashisonoki-gun,
Nagasaki-ken.

2. Acreage:

20,686 sq.mtrs.

3. Number and type of buildings:

12- Wooden two-storied tile roofed houses.
4- Wooden one-storied tile roofed houses.

4. General description of the whole installation:

These buildings were formerly Workers' Dormitories, belonging to ex Kawatana Naval Arsenal; and they are vacant at present and damaged considerably.

No conversion or improvement has been made.

5. Proposed use:

The above will be used for restoration of Primary Schools buildings which have been suffered by war. The above materials will be removed for that purposes.

6. Recommendations:

Shiraishi-go Kawatana-
cho Higashisonogi-gun

EDA/tk

APO 929
17 Sept. 1946

SUBJECT: Reparations Selection within the Shipyard Industry.

TO : CG, I Corps, APO 301.

THROUGH: CO, Kyushu Military Gov't Regional Hq & Hq. Det.

1. Reference is made to SCAPIN 1135 dated 13 August 1946 and Inclosure 1 thereto.

2. Included in reference 1 is a Sasebo Naval Yard address Kawabata-machi, Higashihisaki-gun, Sasebo City. Which is to be held for reparations. Investigation by the local Finance Ministry and this Headquarters proves that either the company name, address, or possibly both are incorrect.

3. The only shipyard or similiar facility located in Higashisonogi-gun, other than Kawatana Naval Arsenal, is the Omura Torpedo Firing Range of Torpedo Factory Ordnance Dept. Sasebo Arsenal. A map of the buildings (Incl) and a list of the plant's machines and their disposition (Incl 2) are attached hereto. The exact address is Mitsugoe, Kawatana machi, Higashisonogi-gun, Nagasaki Prefecture. This gun is located about 15 miles south of Sasebo City, and its borders do not extend near there.

4. Request that either the plant be deleted from the reparations list or the name and address corrected, as this is not a true branch factory but one of the many plants dispersed by the Sasebo Arsenal in preparation for war.

FOR THE COMMANDING OFFICER:

RAY W. FORD,
Capt., CMP
Adjutant.

1st Ind LAW/smh

KYUSHU MIL GOVT REGION HQ & HQ DET, APO 929, 11 Oct 1946

TO: Commanding General, I Corps, APO 301
Attn: Military Government Section

1. Inclosure to SCAPIN 1135 of 13 August 46 lists under Japanese Ex-Naval Shipyards, the Sasebo Naval Yard with address given as Kawabate-machi, Higashihinoki-gun, Sasebo City. This address is erroneous inasmuch as there is no location known as Kawabate-machi. As basic communication indicates in paragraph 2, Higashisonogi-gun is located about 15 miles south of Sasebo City.

2. Revised List Number 1 of 1 June 46, as Inclosure to Operational Directive 5/2, Headquarters Eighth Army, dated 6 June 46 included the Kawatana Naval Arsenal, the only shipyard or similar facility located in Higashisonogi-gun with the exception of the Omura Torpedo Firing Range of Torpedo Factory Ordnance Department, Sasebo Arsenal, sometimes referred to as the Kawatana Torpedo Range or the Katashima Torpedo Firing Range (Proving Ground).

a. Completed Reparations Inventories have been submitted for the Kawatana Naval Arsenal (27-1, Revised List No. 1).

b. Inventories for the Katshima Torpedo Firing Range (present name) were submitted as a part of the Sasebo Naval Arsenal (2703) inventories, the former being considered a branch of the Sasebo Naval Arsenal.

(1) As concerns items listed on inclosures, the machinery and/or equipment considered subject to reparations was included in the inventory of the Sasebo Naval Arsenal.

3. It is recommended that SCAPIN 1135 be amended to indicate the address of Sasebo Naval Yard as "Sasebo City, Nagasaki Prefecture" rather than "Kawabate-machi, Higashihinoki-gun" - a non-existent address.

FOR THE COMMANDING OFFICER:

NAGASAKI MIL GOVT TEAM, APO 929, Nagasaki, Kyushu, Japan, 16 August 1946

TO: Commanding Officer, Kyushu Mil Govt Region Hq & Hq Det, APO 929, Fukuoka

1. Custodians of the 21st Naval Air Depot, Omura, were instructed by this Headquarters, to remove this machinery from the Hasami Area approximately sixty days ago. At the time the instructions were given the condition of the road to this area made it impossible to move this machinery. The following reasons are given for removing this machinery:

a. Conditions of road to area is practically unpassable in wet weather.

b. Personnel not available in area for adequate maintenance and guarding of machines.

c. Although the machines are adequately housed, they are in a dispersed location.

d. The new location is in one building, where adequate storage, maintenance and guarding may be had and is easily accessible.

2. The following facts are given in regards to these machines:

a. The movement of these machines to the Momozu Area is practically complete.

b. The machines have not been inventoried.

c. The Hasami plant is a sub-plant of the 21st Naval Air Depot, Omura. It is not listed separately on OD 5-5/2. Will be inventoried as a part of 21st Naval Air Depot, Omura - 27-4 (code number).

d. The new location is in the "Momuzu Area", Kawatana Shi.

e. The Kawatana Naval Arsenal and the Kawadana Naval Arsenal are the same, and are listed in OD 5-5/2.

f. The machines of the Kawatana Naval Arsenal are stored in the "Momozu Area", Kawatana Shi.

g. The machines of the 21st Naval Air Depot, Omura, moved from the Hasami Area, will be stored separately from the machines of the Kawatana Naval Arsenal.

BASIC: Ltr, Nagasaki Mil Govt Team, subj: "Transmittal of Application to Move Controlled Machinery", dtd 24 July 46., (Continued)

h. The responsibility of storage, maintenance, guarding and inventoring of these machines will remain with the Custodians of the 21st Naval Air Depot, Omura.

SUBJECT: Disposition of Kawatana Naval Kyosaikai Property.

TO : Governor, Nagasaki Prefecture.

15 JUN 1946

1. Referring to our letter No.247, 20 April, 1946, and other correspondence on this subject, you are directed to take the following action in disposing of the real property now owned by the Kyosaikai:

a. Take custody of this property and by public announcement offer it in resale to former owners (or their survivors) from whom it was purchased by the Kyosaikai.

b. Offer in public sale that property not repurchased by former owners or their survivors.

2. Sale price of this property will be established at fair value based on price at which purchased by Kyosaikai plus value of improvements to guarantee previous owners against loss in this transaction.

3. Report in English will be submitted to this Headquarters not later than 1 July, 1946, giving the following information:

a. Copy of newspaper announcement offering sale of subject property.

b. Inventory of real property owned by Kyosaikai at the time of the surrender.

c. List of previous owners of Kyosaikai property and price at which they sold to Kyosaikai.

d. Statement of improvements upon property, if any, and price at which is now resold to individuals.

SUBJECT: Custody and Control of Kawatana Naval Arsenal.

TO: Commanding General,
Eighth Army,
APO 343.

1. Reference is made to letter 29th Military Government Company, subject: "Letter of Transmittal", dated 21 March 1946, and inclosures and indorsement thereto.

2. This headquarters had previously notified your headquarters in 2nd indorsement to above reference, that the local Japanese authorities were lacking in cooperation and were slow in complying with the directives of the occupation troops. The Military Government Company concerned was directed by this headquarters to conduct a recheck on their initial investigation, to assure that the management of this arsenal is complying with the directives regarding subject matter. A subsequent report, recently received by this headquarters, reveals the following facts:

a. An improved organization has been formed, with a new custodian in charge, to carry out the requirements of the directives.

b. Adequate storage space for the machines and equipment has been secured.

c. Adequate guards have been provided.

d. Water has been drained from the tunnels and caves.

e. Considerable care for the preservance of the machinery has been taken, and the installation appears to be making every effort to comply with the directives. The local military government unit is making frequent spot checks to assure continuance of compliance.

29TH MILITARY GOVERNMENT
HQ & HQ DET., NAGASAKI

25 April 1946

SUBJECT: Report of Routine Inspection of Ex-Kawatana Arsenal

TO : Captain Goldsby

On this date a thorough inspection was made of the ex-Kawatana Arsenal machinery, storage buildings for this machinery, etc, to determine how well the management there is complying with our Directive #5. The following paragraphs relate conditions as we found them.

1. Buildings for storage. These buildings are an ideal location for storing the machinery as they are all in one central location, highly accessible, very spacious and can be easily guarded. The building in which will be stored all the forging equipment is in good condition with exception to a small portion of roof which is being repaired now. The repairs on this building will be complete Saturday, 27 April, according to Mr. Kanda. The building for storing casting equipment is in good condition and is ready for the equipment. There will be 3 buildings used for machine shop equipment (lathes, milling machines, shapers, drilling machines, etc.) Number 1 is in good condition and ready for use. No. 2 is in bad condition; approximately 50% of roof is off and approximately 70% of windows are broken out. Mr. Kanda says that this b uilding will be fully repaired within 10 days to 2 weeks if he can get the needed materials. No. 3 has approximately 33% of its roof torn off, which will be repaired soon. This building must also be cleared of materials now located there. They are repairing these buildings now which is an effort on their part to comply with directive. The needed repairs will not or should not hinder them in the least in the maintenance or the moving of the machinery to this location for storage. The tool building is in very good condition. They have already moved several hundred boxes of tools inside for storage (approx. 50% of total quantity). It is fairly well arranged inside. Most of it is well packed and crated and is apparently in good condition. There are approximately 100 electric motors stored here for use as replacements on the machines coming in. They procured these motors from the Home Ministry.

2. Guards. In the Momozu Area, which is the warehouse area, they have a good guard system set up. There is only one entrance to the area and it has a guard shack there. Another shack is located near the back edge of area. There are guards on duty 24 hours a day here and they make routine trips of inspections through the entire area each hour. Out at the caves & shops though, they are very lax. For instance, in the Ishiki Area there are approximately 25 buildings full of equipment, yet there was no guard seen in the vicinity.

Routine Inspection of Ex-Kawatana Arsenal - Continued

3. Fence around warehouses. They have been working on this fence as stated in their report. It is 80% complete. Mr. Kanda says the reason it isn't completed is that they ran out of material. I asked him if he could not use some of the old fence inside the area and he said he could not as it belonged to the Marines. There is plenty of this fence material there if he could get permission to use it.

4. Maintenance. The condition of all the machinery in general is very bad. Most of the machinery is inside buildings or in caves. About 20% of the buildings have bad roofs or no roof at all on them. In one group of shops located in the Ishiki Area the machines are standing and laying in water which runs through the entire string of buildings continuously. Most of the equipment is entirely exposed to rain and weather all the time. In every shop and cave we inspected the machinery is rusting badly from exposure. There is no evidence of any effort at all on the part of the management of this ex-arsenal to clean this machinery and put on a rust preventive except in cave #16 in the Ishiki Area. In this cave they have more or less haphazardly smeared grease on the machinery without first cleaning the rust off. That is no good. In general, it is evident that they have made no effort toward the proper maintenance of this machinery, for which lack of effort there is no legitimate excuse.

5. Removal of Machinery to Momozu. Until today there has apparently been no physical effort made to move this machinery to Momozu. Beginning today they have 4 trucks moving it. They are starting to move out machines from cave #1 in the Ishiki Area and will continue up the valley, etc. This does show an effort on their part to comply with directive. At present time Mr. Kanda intends to move the machinery to the designated buildings in Momozu Area, place it then do the cleaning, etc. It is my opinion that by so doing it is going to be rather hard to do a good job of cleaning it and putting on rust preventive as there will not be enough space between them for men to work.

Attached are 3 Inspection Reports on individual machines.

Henry H. Turner

T/4 Henry H. Turner

2 MAY 1946

SUBJECT: Application for Use of a Part of the Kawatana Arsenal

TO: Commanding General
Eighth Army
APO 343.

1. Reference is made to the following:

a. Letter from your headquarters, file reference AG 004.04 (MG) dated 20 April 1946, subject same as above, and inclosures thereto appended as Inclosure 1.

b. Letter from 29th Military Government Company Headquarters, dated 21 March 1946, subject: "Letter of Transmittal", and inclosures and indorsements thereto appended as Inclosure 2.

2. This headquarters concurs in the recommendation that the Nippon Yogyo Company Ltd., be given permission to use the specified facilities of the Kawatana Naval Arsenal.

3. It is recognized that the procedure followed in making recommendation on subject case is not in strict accordance with the provisions of Operational Directive No. 34, your headquarters, issued under date of 26 March 1946. However, the application of subject company had been received in this headquarters and was being held pending final decision, when reference 1, a, above was received from your headquarters. Rather than retransmit the entire file to the 29th Military Government Company, it has been decided to forward the available information to your headquarters at this time.

4. Information is complete with the exception of the statement from a Ministry of the Imperial Japanese Government. It is felt that this

Ltr, Hq I Corps, file AG 004 - RA, subj: "Application for Use of a Part of the Kawatsma Arsenal", dtd 2 MAY 1946.

requirement is partially satisfied by the statement from the Central Liaison Office, Tokyo, which was appended to your letter of 30 April 1946, reference 1, a, above.

FOR THE COMMANDING GENERAL:

MG

2 Incls:
As indicated.

AG 3004

IMPERIAL JAPANESE GOVERNMENT

CENTRAL LIAISON OFFICE

TO : HEADQUARTERS, EIGTH U.S. ARMY.

FROM : Central Liaison Office, Tokyo.

SUBJECT: Temporary Utilization of a Part of Former Kawatana Naval Arsenal.

C.L.O. No.82(EF-CI) 13 April 1946

1. The Japanese Government submits herewith as per enclosure to the Headquarters of the Eigth U.S. Army an application for the temporary utilization of a part of the former Kawatana Naval Arsenal as a ceramic plant.

2. It is requested that your Headquarters be good enough to approve this application.

FOR THE PRESIDENT:

(S. Iguchi)
Director of General Affairs,
Central Liaison Office.

Enclosure: 3 copies of the application.

Application for Approval of the Temporary
Utilization of a Part of the Former
Kawatana Naval Arsenal

1. The Japanese Government is of opinion that the present conversion plan is deserving of unreserved commendation, being of the utmost importance in securing a stable living for the people.

The present project falls under C.L.C. No. 68, 20th March previously submitted by the Japanese Government. It is no way interfers with the execution of the SCAP Directive AG 004 (20 Jan 46) ESS/GD concerning "Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories".

The principal reason for commendation are as follows:

a. It is beyond question that there is an acute shortage of chinaware, and an adequate supply is of the utmost urgency. For instance, millions of repatriators and war-sufferers have to pay much efforts and expenses to acquire even on rice-bowl.

Moreover, now that ceramic has been specified one of the articles of exchange for imports, the importance of its position in our industry has been greatly increased. When the present project is realized, japanese exportation will be increased by 20% at the first stage of its operation, and when its full productive capacity comes under way, it will, backed by the idean geographical condition of the locality, fully replace the ceramic industry of Nagoya area and will surely meet our expectations of a remarkable increase in production.

b.

b. The area now occupied by the arsenal is the most ideal place for the ceramic industry coveted by every chineware manufacturer. Infact, before the establishment of the naval arsenal, the foundation of a large scale ceramic plant was attempted by Arita Chinaware manufactuerers, but the said plan was dropped owing to the establishment of the naval arsenal. The locality in question has the following qualifications as a most desirable site for the proposed establishment:

(1) Clay and coal, the two principal materials, can be obtained in abundance in the locality (is more advantageous than Nagoya area in this respect).

(2) At Arita, vicinity of Kawatana, there are hundreds of experts of traditional fame, who are eagerly seeking for an opportunity to advance from the present primitive domestic industry into modernized large scale industry.

(3) That the land and buildings of the arsenal can be utilized off hand is of the greatest advantage under the present pressing circumstances, the first ahd principal condition for the establishment is thus completely satisfied.

c. The part of the arsenal to be used for the present project is the northern section of the establishment not required for the collection, custody and protective maintenance of machinery and equipments in compliance with Jan. 20th. Directive. For this purpose the southern section, where there are superior installations such as forgoing, casting and machinery factories, is now used by the Government. The above-mentioned area is adequate and needs no more expansion in the future, and consequently the utilization of that part for this purpose will never

never interfere with the execution of what is required by the Diredtive.

d. The industry here proposed is perfect peacetime industry and the instruments and tools to be newly made are used exclusively for chinaware manufacture.

e. The use of part of the remaining machinery (8%) is desired for the manufacture of instruments and tools necessary for the project, for the first six months; its use will never exceed the anticipated period.

The Japanese Government will hold itself responcible for the maintenance of the abuve-mentioned machinery. Even if this temporary use of the part of the machinery should not be permitted, the execution of the project can be carried out by using the land and buildings, ordering the required instruments and tools from other factories. Without the said machinery, thus the realization of the project will be greatly delayed. Special consideration on the part of the Headquartersiis earnestly desired in this respect.

2. The Japanese Government will highly appreciate it, if the Headquarters of the Eighth Army, U.S. would be good enough to approve the above-mentioned application at their earliest convenience.

An

An application for the utilization of the Kawatana Naval Arsenal for the ceramic industry was made last December, to the Headquarters of the Sixth Army, U.S.

This plan appointed Saido Industries Company as its executor. However, on the issue of the SCAP Directive, the said company excused it self from the undertaking.

Whereupon, the Japanese Government taking into consideration the purport of the SCAP Directive dated Jan. 20th., re-examined the whole matter from a new view-point and selected the Nippon Yogyo Kaisha as the executor of the present project. It is a new democratic company having the support at general of the people of the locality.

The particulars of the application by the Nippon Yogyo Kaisha are enclosed herewith.

Enclosure:

Particulars of the application.

SUBJECT: Arsenals and Aircraft Plants (Kawatana Naval Arsenal)

TO : Commanding General I Corps, APO 301 (Through 95th Military Government Group)

1. Reference is made to Letter from Headquarters I Corps dtd 9 April 46, Subject:"Arsenals and Aircraft Plants. Inspection of Kawatana Naval Arsenal", and indorsements thereon.

2. Report referred to in paragraph 1 of reference letter was made after an inspection on or about 15 March 46. As noted in said report, at this time there was no organization formed to carry out the directives, and as a result, practically nothing was being done in regard to guarding and maintaining this equipment. Since this original inspection was made, the following results are noted:

a. A custodian was named by the Finance Ministry for supervision of this equipment. Under this custodian, an efficient organization has been formed to carry out the requirements of the directives.

b. Adequate storage space for the machines and equipment has been secured.

c. Ten heavy trucks have been secured from the Prefectural Government to move the machines and equipment. Additional moving equipment has been requisitioned from the Prefecturh Government.

d. Adequate guards have been provided.

e. Water has been drained from the tunnels and caves.

f. Boxes of tools and dies have been removed from water, cleaned, oiled and placed in adequate storage.

g. Delicate machines and instruments are being moved from inadequate storage points.

h. Maintenance crews are working on the machines, removing rust and applying rust preventives.

Arsenals and Aircraft Plants (Kawatana Naval Arsenal)
Continued

i. Machines are being checked for missing parts, and operational use.

j. 1 June 1946 was given as date for complete removal of machines to adequate storage points.

k. Weekly progress reports are submitted to this office.

3. Opinion is that this installation is making every effort to comply with the directives.

4. Spot inspections are made by this office, one to three times weekly, on the progress of the installation in compliance with the directives.

SUBJECT: Arsenals and Aircraft Plants. (21st Naval Air Depot, Omura.)

TO : COMMANDING GENERAL I Corps, APO 301 (Att Military Government Officer) (Through Commanding Officer 95th Military Government Group)

REFERENCE: (a) Operational Instructions No. 1, Headquarters I Corps. Paragraph 5, C, (1),(2) & (3)

1. The machinery and equipment or 21st Naval Air Depot Omura, is dispersed in three general areas as follows:

(a) Isahaya Shi, Nagasaki Prefecture

(b) Omura Shi, Nagasaki Prefecture

(c) Kamahasami Shi, Nagasaki Prefecture

The machinery and equipment is either in buildings within the above shis, or located in caves, tunnels and buildings on the outskirts. Roads leading to these outer places are in very bad condition.

Machinery and equipment located in the buildings, are for the most part, fairly well protected from the elements. However, in some instances the buildings were blown down on the machinery, this by the typhoon of last year. A few of the buildings are roofless or badly in need of repair.

Some of the moving parts of the machines are covered with a coating of heavy grease. This seemed to be in evidence only on the visible moving parts. Gears and moving slides in boxes or encased, showed lack of preservatives. Blades and cutters are fairly well protected.

The general condition of the machinery is only fair, this caused in part by:

(a) Lack of preservatives, many of the machines are rusting.
(b) Small parts, such as bolts, gears and driving chains are missing.
(c) Lack of any maintenance

2. Up to the time of this inspection there was very little evidence of any maintenance or repair of the machinery. Guards were considered inadequate, for complete protection of the machinery and equipment. At the time of the inspection, the instructions Contained in Operational Instructions No. 1. Headquarters I Corps, was given to the management verbally, later, in written form.

SUBJECT: Arsenals and Aircraft Plants. (Kawatana Naval Arsenal)

TO: COMMANDING GENERAL I Corps, APO 301 (Att; Military Government Officer) (Through Commanding Officer 95th Military Government Group)

REFERENCE: (a) Operational Instructions No. 1. Headquarters I Corps paragraph 5, c, (1), (2) & (3).

1. The machinery and equipment of the Kawatana Naval arsenal, is dispersed in three general Area's, as follows:

(a) Mumuzu-Machi, Nagasaki Prefecture.

(b) Ishiki-Machi, Nagasaki Prefecture.

(c) Inori-Machi, Nagasaki Prefecture.

The bulk of the machinery and equipment is located in caves and tunnels, near Ishihi-Machi, A small town approximately two miles notth of Kawatana.

Machinery and equipment is in fair condition, many small parts of machines are missing, and there is a general lack of maintenance and rust prevenitives. The machines stored in caves and tunnels show a great lack of attention. Machines are standing in up to two feet of water. Water is continually dripping from the roof, on unprotected machines. Boxes of tools and dies, are in some instances, standing in water.

Exposed parts of machines lack adequate rust prevenitives while many of the moving parts such as gears, slides etc, have no rust prevenitives on them. Approximately forty special boring machines, or jigs, were destroyed by occupation troops.

2. Steps are being takin to carry out the provisions of operational Instructions No. 1. three large buildings in Kawatana Shi Area have been selected for storing of the dispersed equipment. At the time of the inspection, the instructions contained in Operational Instructions No. 1. Headquarters I Corps, was given to management verbally, later, in written form.

Area of the site	approximately	200,000 sur.	(31% of the whole area)
Buildings	"	33,000 "	(43% of ")
Machines	"	100	(8% of the whole; to be used for about six months)
Tools	"	100 tons	(50% of the whole; to be used for six months)
Materials	"	6,000 "	(34% of the total)

3. Name and Address of the new user

Tetsuo Matsumoto,President of Nippon Yogyo Kaisha
(Japan Pottery Company,Inc.)

763 Momotsugo Kawatana-cho,Higashi-sonogi-gun,Nagasaki
Prefecture

4. The reasons for the present application:

v. Enclosure No.1

5. History of the main body of the enterprise:

The central figure of the present enterprise is Tetsuo Matsumoto,director and representative for Kyushu area of Nippon Pottery Trade Company and concurrently president of Nippon Yogyo Kaisha,and all the pottery manufacturers of Nagasaki Prefecture and the people in general of Kawatana town and its vicinity offer him their most sincere co-operation.

Thus the enterprise is about to start as a truly democratic one,but until the completion of its establishment,the Arita Pottery Company(with a capital of ¥ 170,000),of which Tetsuo Matsumoto has hitherto been the president,will,as the main body of the new enterprise,undertake the responsibility for its rights and duties,and the said company changed its title to Nippon Yogyo Kaisha(Japan Pottery Company,Inc.) on March 5,1946. As soon as the Allies' approval is granted,Nippon Yogyo Kaisha will start its operation with an increased capital.

6. Production plan

(1) Kinds of products:

(a) Chinaware

(b) Ironstonechina

(c) Porcelain kitchen ware

(d) Chinaware for sanitary and electromagnetic purposes

(e) Manufacture of machines & tools for Chinaware production (temporary)

(2) Schedule of production:

(a) Time of actual production: Eight months after the operation is started.

Note: As soon as the permission is granted from the Allied authorities the operation will be started.

(b) Productive capacity: production per year ¥36,000,000

Eight months after the commencement, the monthly production will be about one million yen(¥ 1,000,000); gradual increase is expected after that.

The full capacity will be under operation two years after the work has been started.

(3) Anticipated consumers:

(a) Homeland

(b) Korea and China

(c) Southern areas

(d) The United States of America

7. Buildings, Equipments and Materials to be used for the project:

(1) Buildings and Equipments: (v. Attached Chart)

	Momozu District		Machines and Tools	
	Land (sur.m	Buildings (sur.m	Machines (quantity)	Tools (Kilograms)
Existing amount	560,000	67,734	1,374	193,184
To be used for the project	(about) 200,000	(about) 33,000	(about) 100	(about) 100,000

Remark

(1) Parts required for Allied administration in compliance with SCAP Directive dated Jan. 20, 1946 be excepted.

(2) The area now used by the Allied forces is excepted.

(1) Machines and tools will be used for six months for manufacturing necessary articles for the enterprise.

(2) As to items and quantity, the enclosed sheet will show. (Enclosure No. 2)

Note: If the utilization of machines and tolls should not be approved, that of land and buildings is earnestly desired to be authorized.

(2) Materials

	Metal (tons)	Non-metals (tons)	Fuel	
			Coal (tons)	Coke (tons)
Existing amount	6,355	1,268	6,500	3,300
To be used for the project	2,533	(about) 250	2,000	1,500

8. Necessary Factors for the Management of the Plant

(1). Number of employees: 2,000 (approximately)

(2) Clay(monthly): 1,000 tons (approximately)

(Chiefly supplied from Amakusa district,Kumamoto Prefecture,and Kawatana-cho & its vicinity,Goto & Tsushima Islands,Nagasaki Prefecture)

(3) Coal(monthly): 1,000 tons (Chiefly supplied from Kita-Matsuura district,Nagasaki Prefecture)

(4) Various materials necessary for completing the preparations for the project: Necessary previous arrangements with government offices and firms concerned have already been finished & the above materials can be secured mainly in Nagasaki and Saga Prefectures.

(5) Necessary capital and its increase:

The main body of the present enterprise is the Nippon Yogyo Kaisha(Japan Pottery Company,Inc.) which,with a capital of 170,000 yen,has hitherto manufactured Chinaware and porcelain for the purpose of exportation;the workers,citizens and the Chinaware manufacturers of the districts,the suppliers of materials and fuels,and the agents in principal towns of Kyushu,all these will be the other stockholders of the increased capital;that is to say,the increased capital of the new enterprise is open to the general people of the locality. Thus the capital will gradually be increased,along with the construction of factory plants, till it reaches fifteen million yen(¥ 15,000,000) at the time of the completion of the plants.

As is quite obvious from the attached application signed by the nine chairmen of the towns and villages concerned and that signed by the chairman of the board of directors of Cermatic ~~Industrial~~ Association in Nagasaki Prefecture, the people in general and all the Chinaware manufacturers of the whole district ~~are~~ are not only agreed on underwriting the increased stocks, but also very anxious to see the present project realized as soon as possible. (v. Enclosures Nos. III & IV)

9. I certify that the information contained herein is true to the best of my knowledge and belief.

President of Nippon Yogyo Kaisha, Inc.

T. Matsumoto.

Enclosure No.1

Reasons for Application to utilize part
of the former Kawatana Naval Arsenal

1. Our sufferers from war disasters and the people in general are now experiencing an extreme inconvenience because of the heavy lack of teble wares,kitchen utensils,chamber-pots,wash basins, etc.,which are,of course,daily necesserles for common life;and this fact is one of the greatest obstacles for the recovery of post-war stability of civil life in the new born Japan.

The causes of the above sad state of things may be enumerated as follows:

(1) The principal Chinaware and porcelain production center of Japan in Nagoya area(Aichi,Gifu and Mie Prefectures),which used to produce approximately seventy per cent (70%) of the whole products of the country,has lost nearly fifteen per cent (50%) of its factory plants and equipments owing to the great earthquake of Mino(Dec.7,1944),war disasters and consolidation of enterprises during the war.

(2) The manufacture of Chinaware and porcelain,which is a peacetime industry,was severely restricted during the war. In addition,after the middle stage of the war,the plants were mostly convernted to manufacturing the cases of special chemicals employed for rockets,with the result that Chinaware for common use was reduced to next to nothing.

(3) Owing to the difficulty of transportation at the present time,the supply of coal(the whole of which has to be transported from Kyushu and Hokkaido) and clay(60% is supplied from Kyushu) for the remaining plants has been very low and

the productive capacity of the plants completely cut down. In view of the present state of transportation facilities, it is almost impossible to overcome the above difficulty in the near future.

Therefore, in order to secure the immediate supply of Chinaware for the purpose of meeting the minimum demand of popular life, it is essential to establish definitely a large scale productive plant elsewhere, to replace Nagoya area, where transportation of coal and clay can be managed most advantageously under the present circumstances.

2. For the Japanese nation to maintain her lowest level of living, she must do her utmost to export products manufactured with home resources and import daily necessaries from abroad, for she is very poor in natural resources. But as the production of the chief goods suitable for exportation is extremely restricted, as is explained below, a bright expectation is to be put in the production of Chinaware and porcelain, which can be manufactured in comparatively simple plants with easily obtainable materials, and whose production is capable of rapid expansion.

(a) Raw silk and silk goods:

As the cultivation of mulberry-trees cannot be extended so quickly, the production of these goods is naturally restricted.

(b) Marine products and canned goods:

Because of the loss of Northern seas fisheries and the extreme shortage of foodstuffs in the country, immediate increase of the

production of these goods cannot be expected.

(c) Isinglass,insectifuge and fruits:

Owing to the shortage of foodstuffs in the country,the acreage for their cultivation has been much reduced;the recovery to the pre-war state will surely be very slow.

(d) Cement and wood-work:

No much reserve of these goods can be expected because of the large demand on them-for post-war reconstruction.

3.Considering the fact that the town of Kawatana,Nagasaki Prefecture,Kyushu,can obtain plentiful supply of coal and clay from its immediate neighborhood(the former from Kita-Matsuura district of Nagasaki Prefecture and the latter from the vicinity of the town itself,Goto and Tsushima Islands in the same prefecture and Amakusa district in parts of Arita and its vicinity(the home of the noted Arita-yaki) ajacent to the town,it is quite clear that the establishment of Chinaware manufacturing plants at this town using the land and buildings of the former Kawatana Naval Arsenal is of a greatest advantage.

Moreover,we can anticipate a monthly production of Chinaware (essential for the nation's daily life and most suitable for exportation) worth one million yen(¥ 1,000,000) in eight months after the establishment of the plants,which will gradually be increased,till,in two years' time,approximately three million yen(¥ 3,000,000) worth monthly production is realized.

Thus the two great objectives of the present enterprise stated above(in paragraphs 1 & 2) will surely be attained.

4.Judging from the above statement none can reasonably deny that the town Kawatana,endowed with the three essential factors in materials,technique and buildings,is the ideal place for the establishment of pottery plants;the land and buildings of the former naval arsenal may be of immediate use,and the realization of the enterprise can contribute greatly to the economic reconstruction of the whole nation.

Moreover,the machines,tools and equipments necessary for Chinaware manufacturing are completely different from those used for the production of war supplies;they can never be converted for the latter purpose. As to the remaining machines,tools and equipments at the former naval arsenal,it is desired that only part of them(about 100 in number) be allowed for our use temporarily,till they are removed from the arsenal as part of reparation items;as for the rest we have no intention at all to make use of them.

5.The Japanese Government,therefore,has desired that the enterprise be immediately realized in accordance with the plan described in the main papers. The company to be started with an increased capital is a truly democratic one supported by the free popular will of Kawatana town and its vicinity,and prompted by the earnest and cordial desire of the whole people and all the Chinaware manufacturers of the same district.

Enclosure No.III

7 February,1946

From: Nine Chairmen of Towns and Villages having relations to the new plan of Nippon Yogyo Kaisha(Japan Pottery Company,Inc.,formerly the Daido China Company,Inc.,in Kawatana)

To: The General Hedquarters of the Allied Forces.

Subject: The Land and Buildings of the former Kawatana Naval Arsenal,Permission to use.

Nippon Yogyo Kaisha(Japan Pottery Company,Inc., formerly the Daido China Company,Inc.) has planned to establish a china and porcelain manufacturing factory using the land and buildings of the former Kawatana Naval Arsenal,and first applied and requested the co-operation of the civilians in Kawatana and its vicinities. We,chairmen of local towns and villages,representatives of civil opinion have often conferred with the responsible persons of that company,and invited them to the town assembly for their explanation of the plan. Their plan was presented to the committee of towns and villages,and was discussed by many civilians. Their new plan has been investigated in details and from all directions,and consequently it has been brought to the conclusion that the realization of this plan will build native industry and make a great contribution to the prosperity and welfare of the people in Kawatana and its vicinities. Thus we people in Kawatana and its vicinities will offer the fragmental funds, and cordially anticipate the immediate realization of the new plan.

We nine chairmen of towns and villages have the honor to submit an application for your approval that Nippon Yogyo Kaisha(Japan Pottery Company,Inc.) will use the land and buildings of the former Kawatana Naval Arsenal and immediately begin their productive work by your kind permission.

Location of the company: Kawatana Town,
Higashisonogi gun,Nagasaki Prefecture,
Kyusnu,Japan.

T. Matsuo
Mayor of Kawatana Town

B. Ikeda.
Mayor of Sonogi

E Kodama
Mayor of Kamihasami Town

Chairman of Oriose Village

K. Noguchi
Chairman of Chigata Village

S. Shigata
Chairman of Egami Village

K. Matsunaga.
Chairman of Sakharin Village

S. Sadohara
Chairman of Miyamura Village

Enclosure IV

7, February, 1946

From: Tsunehiko Nagata, Chairman of the Board of the Ceramic Regulating Industrial Association.

To: The General Headquarters of the Allied Forces.

Subject: The Land and Buildings of the former Kawatana Naval Arsenal, Permission to use.

Sirs: Nippon Yogyo Kaisha (Japan Pottery Co., Inc., formerly the Daido China Company, Inc.) has planned to establish a new china and porcelain manufacturing factory utilizing the land and buildings of the former Kawatana Naval Arsenal, and first applied and requested the co-operation of the pottery manufacturers in the Kawatana districts. All the pottery manufacturers in this area who belong to our association, have often discussed about the matter with the responsible persons of that company. The signification and idea of this plan are to adopt the mass-production system to mechanize our superior and traditional method of this district to save a lot of materials and fuel, to inquire into the large scale markets and to promote the pottery manufacture. Consequently, it has been concluded that we shall enjoy a lot of advantages for the sake of the development of the cermatic industry. We, the native pottery manufacturers are quite willing to offer our fragmental funds in order to have an intimate relation with that company, and anticipate the prompt realization of this plan.

We have the honor to submit an application for your approval that Nippon Yogyo Kaisha (Japan Pottery Co., Inc.) will use the land and buildings of the former Kawatana Naval Arsenal and immediately begin its productive work by your kind permission.

T. Nagata
