RETAIL PRICE LIST

OF THE

Jefferson * County * Nurseries,

FOR THE SPRING OF 1891.

THE G. J. CARPENTER CO., -:- FAIRBURY, NEBRASKA.

(Successors to Carpenter & Gage.)

In offering this Price List to the public we ask you to read the following: We guarantee good packing and good stock. Boxing and bailing free. Orders by express must contain one fourth cash, and if that amount is sent we will send the order C. O. D. Order early, while our stock is complete. We commence shipping in the fall about October 1st, and in the spring about March 15th. We can ship to the south at any time during the winter from our frost proof cellar. We ship by the St. Joe. & Grand Island branch of the U. P. R. R., by the B & M. R. R., and the Rock Island R. R. and by the Pacific, Wells Fargo, and U. S. Express Companies. At these prices all freight and express charges must be paid by the purchaser. *In ordering always give age, size and price per our list.* Our references are the Goodrich Bank of Fairbury and the First National Bank of Fairbury, Nebraska.

A Word to the Public: Our Nurseries are located in the midst of one of the best fruit-growing regions of the west. Our scions are cut from bearing trees. We use the best improved implements for digging, and send roots with the trees.

Our new brick packing house, 80x100 feet, with cellar beneath, gives us the best facilities in the west for careful handling of stock. We have 8 1/2 miles of private telephone line, and are connected by telephone with the leading towns of the state. Our motto: "Large sales and small profits." *Give us a trial.* Remember everyone who buys \$1.00 worth of trees receives our paper, devoted to fruit growing, for one year free of charge. We will make special prices on orders that exceed \$10.00.

*** Price List. ***

5 trees at 10 rates, 50 trees at 100 rates, 500 trees at 1000 rates.

Mammoth Dewberry or Russian Blackberry.

The plants are perfectly hardy and healthy, and remarkably productive. The flowers are very large and showy. The fruit, which ripens with the Mammoth Cluster Raspberry, is often one and a half inches long, by one inch in diameter, soft, sweet and luscious throughout, without any hard center or core.

As the Dewberry roots only from the tips, and does not sprout like blackberries, this will be much more desirable for garden culture, and the training habit of the plant will render winter protection easily accomplished in cold climate where that protection may be necessary.

Russian Apricot.

Among the fruits whose cultivation is sadly neglected, we find the Apricot; and why, is more than we can tell, for it is among the oldest and most delicious fruits. It is hardy as the plum and has fewer enemies. It is much hardier than the peach and does not suffer from the attacks of the borer, and it ripens earlier than either. The tree is an ornament to the lawn or garden. The hardiest of the Apricots is the Russian or Prunus Siberica. It was brought to the United States about 1875 by the Russian Mennonites and was extensively planted by them in their Kansas and Nebraska settlements. Last year the trees were densely loaded with fruit which sold for three dollars a bushel. Fruit medium size and of the best quality. Some of the pits contain a sweet kernel as fine for eating as the almond. Although some of the trees had a severe test of 35 degrees below zero, we have yet to see the first tree that is not perfectly healthy, vigorous and symmetrical, and it will, we hope, be largely planted, for it is a valuable tree.

New Plums.

BOTAN—JAPANESE—The best in leaf and growth of any of the Japanese plums; color, bluish red, with a white bloom, exceedingly sweet, rich, juicy and delicious. Ripens August 1st. Hardy where wild Goose will stand.

OGAN—JAPANESE.—Tree hardy; fruit very large, heart-shaped; color, reddish yellow; meaty and excellent. August 1st.

PRUNUS SIMONII—APRICOT PLUM—This new plum, a native of northern China, is believed to be the most valuable new fruit introduced for many years, being hardy as far north as Central Iowa and Nebraska, and in protected situations even further. It will ripen about the first of July in this latitude and shows no defects from attacks of the curculio. It is very firm and meaty, and equal in flavor to any of the Blue Plums. It will carry any desired distance. Tree very thrifty, upright, an early and abundant bearer, stands drouth well and succeeds well in the southern states.

POTTAWATTAMIE—A plum of the Chickasaw family, but quite distinct from any other variety. Perfectly hardy and an immense early annual bearer. Four year old trees are said to have borne a crop of two bushels to the tree. Fruit is yellow overspread with a bright pink and prominent white dots; flesh beautiful golden yellow, luscious, good. Ripens in July. The sting of the curculio does not seem to effect the fruit, as every plum ripens evenly and perfectly. It is a good early plum, and cannot be surpassed for canning.

Acme Apricot.

This new and celebrated apricot was brought from Northern China by a missionary. The tree is noted for its ironclad hardness and immense growth, while the fruit is large and of a luscious flavor. We offer a limited number of these trees four to five feet high at one dollar each.

Russian Cherries.

We would call the attention of our patrons to these new and promising Cherries. They are much harder than any of the old standard sorts, enduring the very coldest winters in the north, and bearing a full crop of fruit the following season. The fruit is of good quality, some of it better than Early Richmond or English Morelo. We can cheerfully recommend them for Dakota and other northern states. See Prices within.

DOLLAR COLLECTION.

Of Trees, Plants, Etc., of sizes suitable for mailing, postage paid by us. Goods carefully wrapped in wet moss.
