PREFATORY NOTE

The list on prison labor here presented notes the literature of the subject from the point of view of the prisoner, of the State or community, and of labor. It is printed to meet the demand for the literature itself, which arose from the introduction of several bills in Congress to limit the effect of the regulation of interstate commerce in convict made goods, and to prohibit the importation and entry of such goods.

Keeping in mind the main purpose of the list to aid in legislation, special efforts have been made to include the reports of prisons and other institutions of detention which have had actual experience with convict labor (see pages 29-35), and the reports of special investigations into the conditions and effects of prison labor (see pages 18-26).

Acknowledgment is due to Mr. Samuel Gompers, president of the American Federation of Labor, and to Mr. Frank Morrison, its secretary, for a number of reports and for pointing out a series of articles in the "American Federationist" and other periodicals which give the point of view of organized labor.

A general discussion of the subject in all its aspects will be found in the number of the *Annals of the American academy of political and social science* devoted to "Prison labor," vol. 46, whole no. 135 (see item no. 14 in the list).

The "Table of contents" (page 3) shows the classification of the references. The "Subject index" (pages 71-74) points out the literature on special and more minute phases of the subject.
