DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

1. A public safety commission will dispatch police officials for assistance if it is requested by the public safety commission of the affected area who deems it necessary in case of a riot, a disturbance, or an urgent need of vigilance in its area.

2. The expenses needed for the assistance mentioned in the preceding paragraph, will be defrayed by the public safety commission who receives the assistance. However, under a special condition such burden will be shared by the parties concerned by mutual understanding.

3. If a public safety commission is asked assistance and co-operation for arrangement regarding arrest and criminal search by any other public safety commission, every effort will be taken whole-heartedly same as in a case happened in its own area.

4. If a public safety commission is asked an emergency call of the police force, exchange of informations and necessary investigations concerned with handling of police affairs by any other public safety commission, sincere and fair cooperation will be extended by it.

5. Detailed rules necessary for implementing these agreements will be decided by the conference of police directors.

Fire-fighting Division (including Fire Team)

(Matters concerning liaison with fire-companies of cities, towns and villages in case of an emergency)

1. Organization:

Fire Team consists of the following staff,

Head of the team - Chief of the Local Administration Section.

Members - Secretary 4; commissioned officer 2; assistant clerk 2.

2. Measures to be taken in advance:

(1) Warnings against a disaster.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

a. The Chief of Fire-fighting Division (that means, heretoafter, Head of Fire Team handling business by the instruction of Chief of Fire-fighting Division) will issue disaster-warnings through disaster relief branch corps, based on the reports from the meteorological station.

b. The disaster-warnings mentioned in the preceding paragraph includes the following items:

Fire alarm,

To be issued in the event of the minimum humidity below 50% with a wind of a velocity 7 m. or expected to increase above 7 m.

Special fire-alarm,

To be issued in the event of the minimum humidity below 40% with a wind of a velocity 10 m. or expected to increase above 10 m.

Special weather report,

To be issued in the event of increasing rain and wind that threaten to cause disasters.

c. Disaster-warnings will be transmitted through the exclusive police telephone system or by the common telephone service, and by radio if necessary for the general public.

3. Disaster-prevention measures:

According to a disaster-warning received, a chief of disaster relief sub-corps will publicize it to the entire community directly, in the case of a city sub-corps, or through dister relief units, in the case of a sub-corps attached to a district office. The chief will also take a leadership in carrying out the following matters in concert with the police and the fireman:

(1) A roll-call for vigilance or fire-fighting, and a spot check of available water sources in the area.

(2) An inspection and adjustment of fire-engines and other implements.

(3) Checking of communication installation and adjustment thereof.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(4) Adjustment of roads.

(5) Encouragement of the fastening of the door, preservation of water against fire, the fitting attire for the emergency of every household.

(6) Prohibition of building a fire outdoor.

(7) Warnings and guidance relating to damages or collapse by a flood, sustained by vessels, buildings or other installation for the prevention of disaster.

(8) Matters requested from the technical view point in the event of disaster.

(9) Other preventive measures against the disaster.

Under an acute situation of a disaster, fire-bells will be rung and sirens will be whistled to inform the people of the pressing emergency.

4. Emergency measures.

(1) The chief of disaster relief branch corps of the striken area will make every effort without delay to execute the following matters, keeping a close contact with the police and fire-companies in his area:

a. Rescue of victims' lives.

b. Prevention of destruction against various recources.

c. Prevention and control of the calamity.

d. Guidance and taking care of refugees.

e. First aid to the sufferers.

f. Control of circulation of sensational rumors and issuing of notices to quiet down the uneasiness of the people in general or other necessary guidance.

(2) Sending guard forces (comprising firemen) for assitance:

The Chief of Fire-fighting Division will instantly send guard forces to the stricken area by the request of the head of the relief branch corps in that area, if he deems it necessary under the situation.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

5. Making a demand to the Occupation Forces or the police forces outside the prefecture for an action of rescue:

In the case where the Chief of Fire-fighting Division deems it necessary to ask help from the Occupation Forces or the police forces outside the prefecture to check a disaster in larger scale, he will make a demand to the Commander of Disaster Relief Corps to that effect.

Information Team, Fire-fighting Division.

(1) Organization:

Information Team consists of the following staff:

Head of the team Chief of Local Administration Section

Members of the team Secretary 5, commissioner 1, assistant clerk 3.

(2) Function:

The head of the team will submit the disaster informations given from the relief sub-corps chief and other reports on sending of rescue teams and other activities, to the following points to keep in touch with them:

a. Superintendent, National Fire-fighting Forces.

b. Commander, Tokushima Prefectural Disaster Party.

c. Each division chief of the Prefectural Government

d. Commanding Officer, Tokushima Mil. Govt Team.

e. C. I. C.

f. 29th F. S. B.C.O.F.

g. Neighboring prefectures.

(3) Sending Information Collecting Teams:

The Chief of Fire-fighting Division (or Head of Information Team) will dispatch, by the instruction of the commander of Disaster Relief Party, Information Collecting Teams, composed of members of Information Team, to the disaster stricken area to secure informations for the disaster plan.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Sanitary Division - Medical Treatment Team.

(Matters concerning medical treatments and epidemic prevention)

1. Tokushima Prefectural branch of the Japan Red Cross will assume the task of medical treatment in a disaster emergency in cooperation with the prefectural Sanitary Division.

2. Organization:

The organization of the Medical Treatment Team is as follows:

(1) Head of the team — Vice-Director, Tokushima Prefectural Branch of the Japan Red Cross.

(2) The team will be sub-divided as follows -

Liaison & Information Sub-team
Medical Treatment Sub-team
Accounting Sub-team

3. Function:

(1) Liaison & Information Sub-team:

Attached to the Rescue Headquarters this sub-team will set up necessary rescue measures according to the situation and degree of the calamity, collecting informations from local rescue teams and keeping a contact with chief of Sanitary Division.

(2) Medical Treatment Sub-team:

This sub-team will assume the task of first aid to the sick and wounded in the stricken area.

(3) Accounting Sub-team:

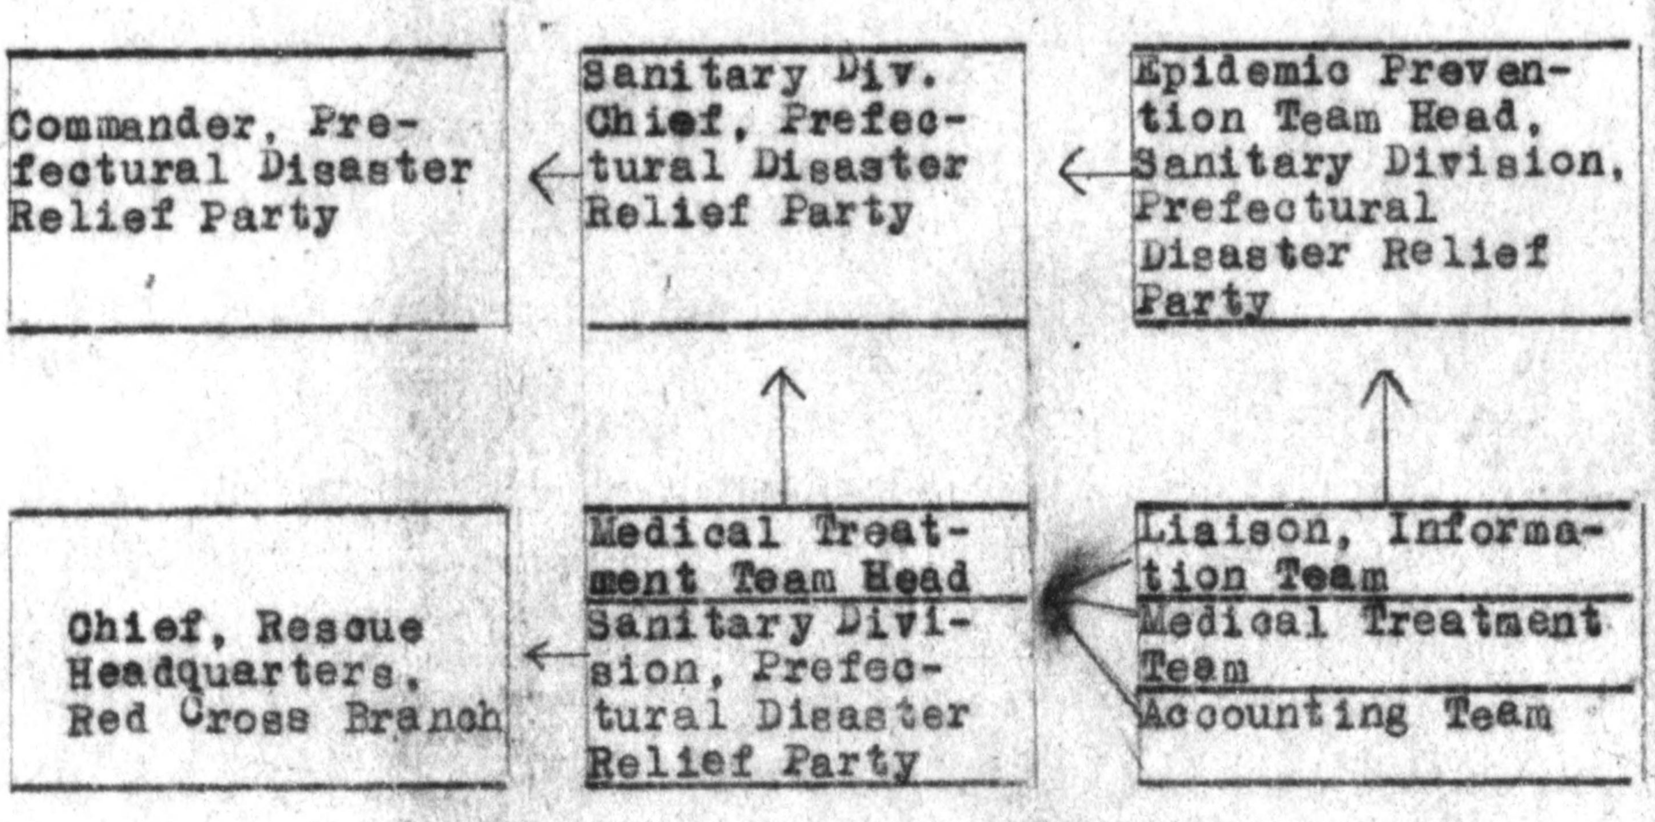
Attached to the Rescue Headquarters, this sub-team will be responsible to receiving in and paying out of cash, medical supplies and delivery thereof.

4. Setting up of Rescue Headquarters:

In the event of a disaster emergency, Rescue Headquarters will be set up within the Tokushima Prefectural Branch of the Japan Red Cross, to get in touch with the Prefectural Disaster Relief Party and other concerned organizations for the speedy activities of its function.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115013

5. The liaison with the Prefectural Disaster Relief Party and control will be executed following the channel shown below:



6. To meet a disaster, the Permanent Rescue Teams will be set up as follows:

Each team, comprising two doctors, one head nurse, seven nurses, will be stationed as per the following list to meet any emergency through the entire rescue network.

Formation of permanent rescue team station in each community

Location	Number of members comprised by teams			No. of teams	Total members
	Doctor	Chief nurse	Nurse		
Tokushima-Shi	2	1	7	2	20
Naruto-Shi	2	1	7	1	10
Myodo-gun	2	1	7	2	20
Myozai-gun	2	1	7	2	20
Awa-gun	2	1	7	2	20
Oe-gun	2	1	7	2	20
Itano-gun	2	1	7	2	20
Mima-gun	2	1	7	2	20
Miyoshi-gun	2	1	7	2	20
Katsuura-gun	2	1	7	2	20

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

Naka-gun	2	1	7	2	20
Kaifu-gun	2	1	7	2	20
Total				23	230

Note: The duty of chief nurses and nurses given above will be taken by the nurses from the Japan Red Cross.

The duty of doctors given above will be assumed by the staff of the attached hospital of the Tokushima Medical University and the Tokushima National Hospital.

7. First aid treatment:

Upon occurance of a disaster, reserve members necessary for the requirement according to its degree will be called up instantly, by the instruction of the commander of the Disaster Relief Party. At the same time, measures will be taken for urgent needs; a concrete plan for activities to meet the actual calamity will be set up, keeping a contact with the chief of Sanitary Division, Prefectural Disaster Relief Party. If rescuing units becomes short of hands owing to a larger scale of the disaster, the adjoining communities will render assistance under a mutual agreement.

The first aid treatment will be carried out in cooperation with Epidemic Prevention Team, Sanitary Division of the Prefectural Disaster Relief Party as well as units of the Relief Branch Corps.

8. Medical supplies reserve plan:

Medical supplies will be equipped for reserve at each rescue team of a city or a gun, for every 100 patients at one unit as follows:

2. The team will have the following sub-teams as its sub-organization:

(1) General affairs sub-team.
(Chief: Chief of Supervision Section)

(2) Road sub-team
(Chief: Chief of Road Section)

(3) River and port sub-team.
(Chief: Chief of River and Port Section)

II. Allotment of function.

The allotment of function of respective sub-team will be fixed as follows:

1. General affairs sub-team:

Conveying of informations to branch corps, collecting of informations from branch corps, establishment of collecting plan of required persons, securing of materials needed, unification and arrangement of respective sub-teams and other general affairs.

2. Road sub-team:

Prevention of damages of roads and bridges and emergent repairing of them.

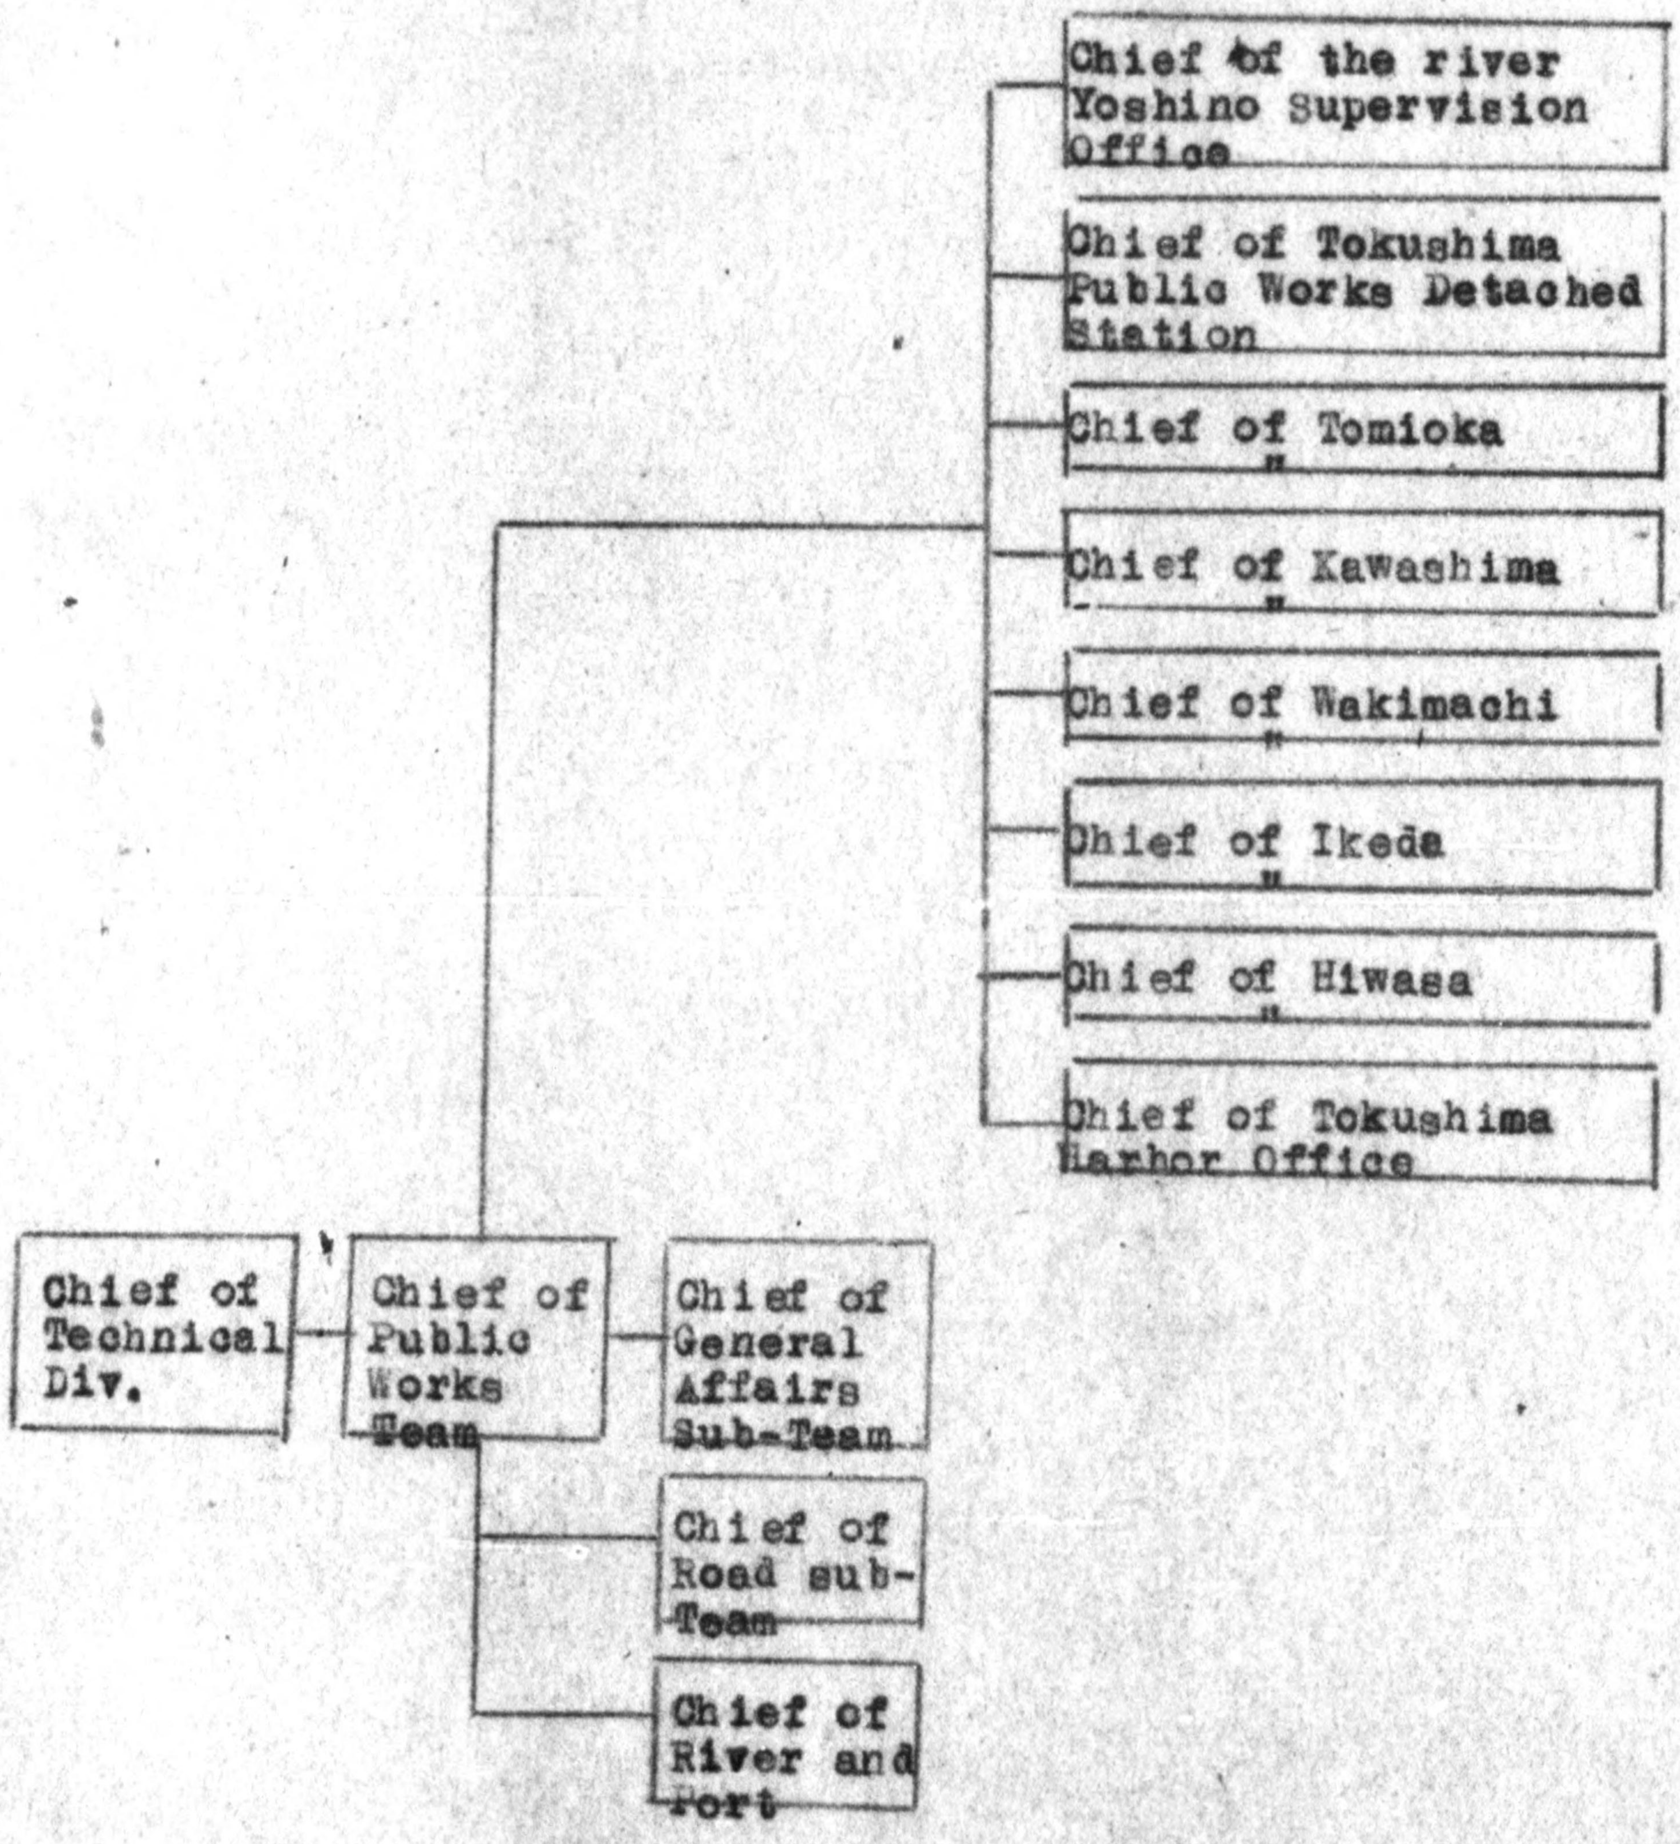
3. River and port sub-team:

Prevention of damages of rivers, coasts, harbors and other attached institutions and emergent repairing of them.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

Relief organization, and information and report system.

Relief organization, and information and report system of public works team will be as follows:



DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

II. Pre-fact approval.

1. Chief of public works team will make the authorities of towns and villages and water-defense associations concerned which are situated in the neighborhood of the places to be in fear of water-damages equip fully with emergent water-defense materials (stake, straw-bag and straw-rope) and instruments (saw, sickle, maul and shovel)

2. Chief of public works team will secure the minimum amount of needed materials at an adequate place, when an emergent water damage will take place and furthermore keep incessant connection with the food team of the economic division and construction materials team of the construction materials division relating to the location and the amount of the materials mentioned above in order to make them clear.

3. Chief of public works team will make chiefs of the division await the order at the prescribed arrangement, when he forecasts the occurrence of the emergent case of water-damage.

4. Chief of public works detached station (Chief of the river Yoshino supervision office and chief of harbor office) make the personnel of stations take the emergent post fixed particularly in order to keep a complete watch, when he forecasts the occurrence of the emergent case of water-damage.

5. The personnel of the stations who are arranged to the posts, when they affirm the occurrence of emergency, report it quickly to the sides concerned such as town or village office, police station, or police box, fire-fighting association, water-defence association, irrigation association, etc. where they are stationed and take emergent measure by asking them for their emergent action and at the same time make a detail report quickly to their chief and chief of public works team of the prefectural damage relief corps.

6. Chief of public works team, when he is asked for an emergent measure by chief of public works detached station or the person stationed on the spot, will fix the plan of measure and make chief of respective team report to construction materials team of the construction materials division as to lumber and to foods team of the economic division as to straw-bags, straw-rope, straw-mats, etc. and to rail-way transit team, overland transit team or marine transit team as to transportation

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

of the materials mentioned above respectively in order to send them directly to the post and make them guide and encourage the emergent measure.

III. Emergent-measure after occurrence of damages.

1. In case where damages took place, chief of a public works detached station will give orders to the personnel of the station and encourage them to enforce emergent works with city, town or village unit located in the damaged area and in the neighborhood.

   In the above case chief of the station will report quickly the summary to chief of public works team of the prefectural damage relief corps.

   And he will make consultation with chief of public works team on important emergent rehabilitation and then enforce it.

IV. The items of emergent measure ~~areas~~ are as follows:

1. Relating to roads, bridges and embankments.

   (1) Detachment of workmen to repair main road and bridge to be passable (To give order to chief of respective public works detached station and chief of the river Yoshino supervision office to detach the personnel of the station and the office)

   (2) Chief of respective public works detached station will decide the maximum carrying capacity of remaining bridges and then when he finds they are unpassable, he will make notice of no thoroughfare or limitation of carrying weight and at the same time report it to the nearest police station, too.

   (3) Chief of respective public works detached station must prepare fully to be able to obtain quickly the rehabilitation materials as well as prepare to prompt action of local city, town, or village damage relief unit to the area threatened to breaking or bursting of an enbankment, or flowing out, in order to make repairing of roads and bridges, and river and coast embankments as soon as possible, and at the time of damage, by obtaining the allotment after reporting to foods team of the economic division or construction materials

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

team of the construction materials division respectively in case where a great deal of straw-mats, straw-bags, straw-rope, stake, etc. is needed due to breaking or bursting of an embankment, and as to lumber, by obtaining delivery allotment from a lumber plant nearest to the damaged area after reporting immediately to public works team of the prefectural damage relief corps, and as to metals, by obtaining delivery from the nearest stores or plants as well as in case of lumber delivery in case where a great deal of lumber or metals is needed due to flowing-out of bridges, and by other adequate method, he will obtain materials quickly and complete repairing works.

2. On equipment relating to harbor.

(1) Quick rehabilitation of watch measure in the marsh and on the sea (buoy or flashing lantern) will be carried out by the following allotted charge.

The South light-house, North light-house of eastern breakwater of Komatsushima port. The light house of nothern breakwater of Komatsushima port.

Takasone light sign out side of Komatsushima port at Kamenose light sign
-- Chief of Komatsushima port branch office

Tokushima port light-house
-- Chief of Tokushima harbor office.

Nakanose light sign, Muya
-- Chief of Muya port branch office.

Gamoda cape light-house
-- Chief of Tomioka public works detached station.

Mugi port breakwater light-house
-- Chief of Hiwasa public works detached station.

Wadanohana light-house
-- Chief of Tomioka public works detached station.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

(2) Establishment of coast fitted to landing the emergent materials:

By Chief of river and port section.

(3) Repairing of lighting instruments in case where use of wharf is impossible:

By Chief of harbor office or chief of public works detached station in jurisdiction.

(4) Rehabilitation of cranes and other like installations.

By respective owner, for there are no prefectural ones.

(5) Planning of prompt rehabilitation of regular operation.

By Chief of harbor office and chief of public works detached station in jurisdiction.

3. Supply of water:

(1) Inspecting of a reservoir and a water main not to be muddy.

By chief of epidemics prevention team of the sanitary division.

(2) Establishment of the plan of use of water source in shifts for water supply.

Make head of city, town or village where drinkfng water is being used carry on in liaison with chief of epidemics prevention team.

(3) Establishment of water supply pond at the most emergent time.

Make head of city, town, or village in the damaged area under the guidance and supervision of respective chief of public works detached station.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

(4) Submission of model sample of drinking water to sanitary officials for examining bacteria:

Make respective chief of public works detached station and chief of the river Yoshino supervision office in liaison with sanitary officials.

(5) Supervision of purification of water:

By chief of epidemics prevention team.

(6) Rehabilitation of regular water supply as soon as possible.

Make head of city, town, or village in management. Carry on quickly under guidance and supervision of respective chief of public works detached station and chief of the river Yoshino supervision office.

(7) This team must prepare to give aid to the following matters in case of being asked help by officials responsible for besides the duties mentioned above.

Railway.
Supply of electric power.
Gas.
Telegram and telephone.

Make respective chief of public works detached station and chief of the river Yoshino supervision office carry on.

(8) Planning of repairing of drainage, ditch for filth or other sanitary installations:

Make head of city, town, or village in management immediately by the order of respective public works detached station in liaison with chief of epidemics prevention team.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Construction Team, Technical Division.

(Emergent repairing of ~~installations~~ establishment, equipments, etc. and other technical matters)

Plan of activities.

(1) At the time of damage, chief of the team will collect the personnel of the construction team on the basis of organizing plan provided particularly and engage in counter measure of damages by coordinating with chief of the Tokushima Branch Office of the construction Board.

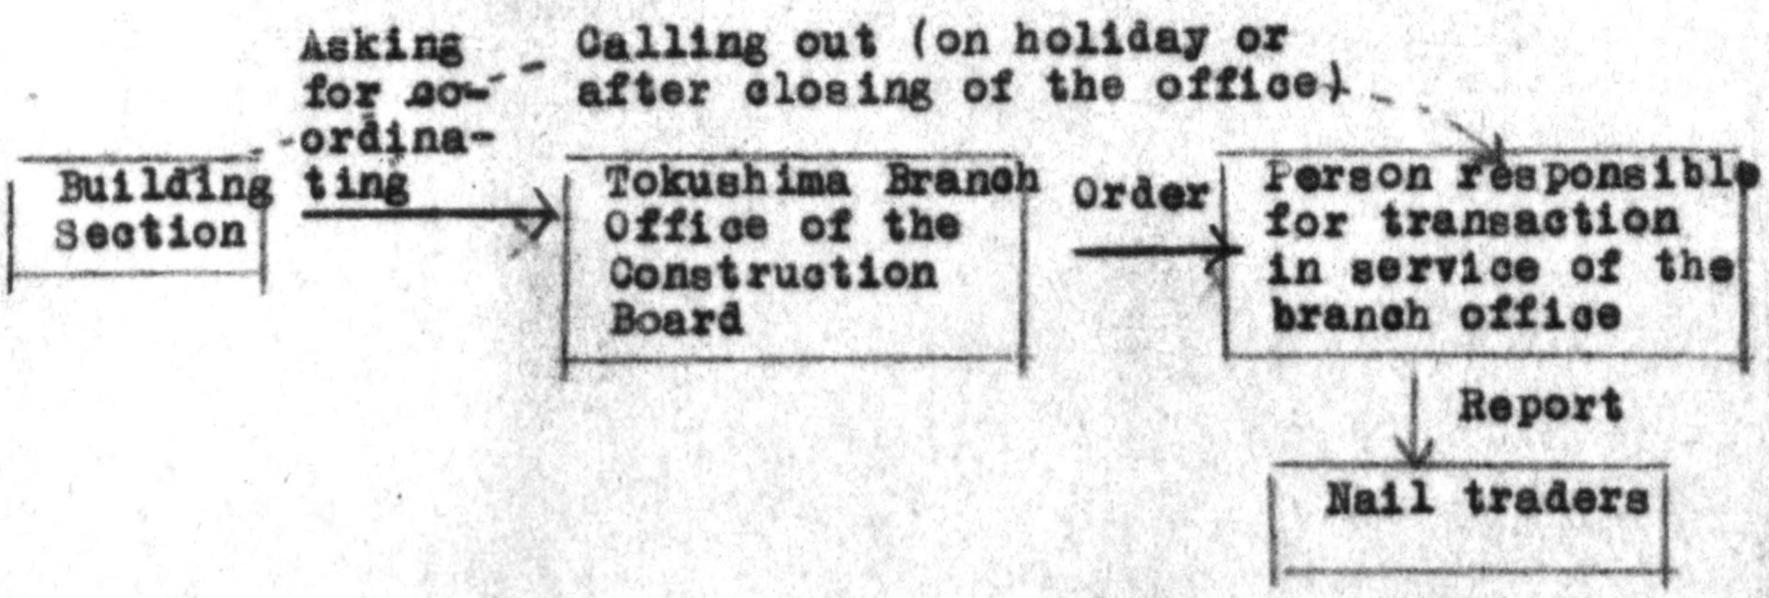
(4) Nails for building will be obtained through the following method.



DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(Nail trader is the following person and as to delivery of nails the directive is already given to him)

Kampei Morizumi, metal trader in front of Marushin departmentstore located at Higashi Shin-machi, Tokushima-shi.

Railway team, Technical division.

(Emergent repairing of ~~installations~~ establishment and equipments and other technical matters)

Railway transit team, Railway transit division.

(Matters relating to railway transit of materials and goods for relief of the sufferers)

The operation of the Tokushima-Ken damage relief corps organized by the personnel of the Tokushima superintendent office of the Shikoku Railway Bureau, Railway team of the technical division, and Railway transit team of the Railway transit division (the name of Railway corps will be applied hereafter) will be enforced by the following points.

(1) Organization:

The headquarters of the railway corps will be located in the Tokushima superintendent office of the Shikoku Railway Bureau and will have the following sub-teams.

General affairs sub-team
Transit sub-team
Operation sub-team
Equipment sub-team
Accounting sub-team

Commander of the corps will be the chief of the superintendent office and chief of respective sub-team will be chief of section in charge.

(2) Function:

Commander of the corps will preside over the affairs of the corps.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

Chief of a sub-team will direct the personnel of the team and manage the functions in charge by commander's order.

The personnel of a sub-team will take charge of relief by the order of the chief of the team.

(3) The allotment of function of respective sub-team will be fixed as follows.

General affairs sub-team:

1. Matters relating to the sufferers' relief.

2. Matters relating to borrowing of lodgings for relief.

Transit sub-team:

1. Matters relating to establishment of method of transitting of passengers and goods.

2. Matters relating to relief of the suffered travellers and disposition of delivered goods.

3. Matters relating to transit plan of emergent rehabilitation materials, persons needed for operation and relief materials.

4. All matters relating to public safety.

5. Matters relating to the liaison with the prefectural damage relief corps.

Operation sub-team:

1. Matters relating to running of train in the damaged area.

2. Matters relating to the running plan of extra train and directive for it.

Equipment sub-team:

1. Matters relating to the plan and the directive of emergent rehabilitation works of the damaged area.

2. Matters relating to collection of rehabilitation materials and calling together the required persons.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

3. Matters relating to asking of running transit train of rehabilitation materials and the required persons.

4. Matters relating to asking city, town, or village relief unit to meet emergency.

Accounting sub-team:

1. Matters relating to procuring emergent rehabilitation materials.

2. Matters relating to payment of the rent of lodgings for the sufferers and workmen's wages.

3. Matters relating to solatium for the sufferers or payment of other expenses.

(4) The organization of the corps will be as follows:

Commander of the corps:

Chief of Superintendent Office.

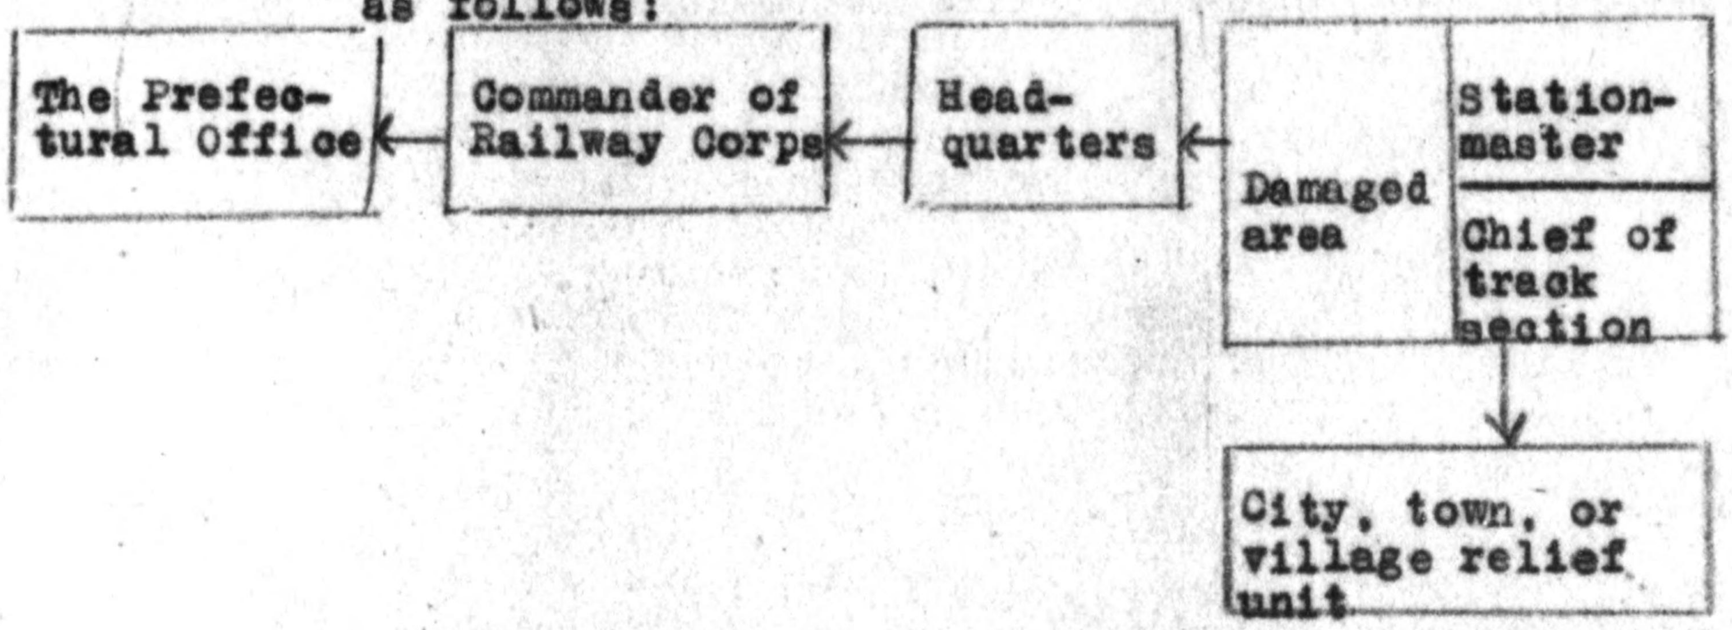
Name of sub-team	Chief of sub-team	Personnel of sub-team
General affairs sub-team	Chief of general affairs section	Personnel of general affairs section
Equipment "	Chief of Equipment section	Personnel of Equipment Section
Transit "	Chief of Business Section	Personnel of Business section
Operation "	Chief of Operation section	Personnel of Operation section
Accounting "	Chief of accounting section	Personnel of Accounting section

(5) Report:

1. When the spot overseer knows or receives the report of the occurrence of an emergent damage, he will report to the headquarters immediately on its circumstances and furthermore report it again after investigation in detail.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

2. The method of reporting and liaison will be as follows:



(6) In case where an emergency takes place the following measure will be taken:

In case where an emergency takes place, the spot overseer will endevor to rehabilitate the damaged area, encouraging the men under his command, while he must report on the circumstances of the damage without delay to the headquarters, and then he will make every effort in rehabilitating promptly of the transit of passengers and freights with the aid of other spot overseers or other local coordinating groups, if necessary.

And the headquarters, if necessary, will report it to the prefectural relief corps and will take an adequate step relating to relief and other matters.

The plan of transportation of the suffered and the materials for emergency will be established and ~~enforced immediately~~ after the rehabilitation of ~~installations~~ establishment and equipments mentioned above.

(7) Others:

Matters which are not provided in the above regulations will be regulated separately.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

(Note) Of the regulations provided separately, the important ones are as follows:

The relief process of railway transit accidents.

The guard regulations for natural calamities and accidents.

The Communication team, The technical division.

(Matters relating to emergent rehabilitation of ~~installations~~ establishment and equipments)

(1) Organization:

The following teams will be always set up in the post office, and all the staff will take part in them from their own accord and will operate actively in order to expect the prompt rehabilitation of electricity and communication at the time of emergencies.

1. Chief of the team:

Master of the post office.

2. General affairs sub-team
(Chief: Chief of general affairs section).

Line sub-team
(Chief: Chief of Line section)

Machine sub-team
(Chief: Chief of machine section)
and Komatsushima, Hiwasa, Naruto, Anabuki and Ikeda detached stations.

3. The functions in charge of respective team.

a. General affairs sub-team:

Fullest preparing of rehabilitation materials procuring and distribution of needed instruments and materials basing on rehabilitation plan, hiring of workers, securing of lodgings and foods, liaison with the headquarters of relief corps.

b. Line sub-team:

Establishment of rehabilitation measure for installations of electric communication (line), enforcement of works, guarding.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

c. Machine sub-team:

Establishment of rehabilitation measure of electric communication installations and machines, collection of reports of enforcement of works, inspection of coils.

d. Respective detached station will take charge of enforcement of rehabilitation works and guarding of electric communication installations (line).

(2) Pre-fact approval.

1. Plan of collecting the needed persons

a. Chief of a team and chief of a sub-team will fix beforehand order, route, method, etc. of conveying of directives, considering the arrangement of dwelling houses of all the staff and will post them at a notice board within the post officers or detached stations.

b. Chief of a team will train all the staff to make them know well the method of inspection of the spot to be guarded and the condition of collection of materials.

2. Guarding:

The members of a team, the members of a branch, the members of a sub-office will take their posts in spite of whether there is an alarm or not, in case where they recognize the fear of occurrence of disasters, and chief of a sub-team will effort to prevent occurrence of accidents by guarding the installations, receiving the instructions of chief of a team.

b. The members of a detached station will make the section in charge of respective member to be inspected and guarded, and the method of inspection clear at the time of emergency.

c. Chief of a team will take every caution to store always an adequate amount of materials in materials warehouse and respective detached station not to be hindered in relation to emergent rehabilitation.

As to classification, amount and method of keeping in custody of the articles to be always stored up, the fixed amount will be regulated in accordance with the situation.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(3) Emergent rehabilitation after the calamities took place.

1. Reporting and emergent measure.

a. Inspecting guardians will take possible emergent measure and at the same time will report on the following matters quickly, when they finds disaster.

(a) Time and place of disaster.

(b) The summary of damaged state and its development.

(c) The estimated number of persons needed and the required materials.

(d) Need or not of the aid from other section.

b. Rehabilitation measure sub-team will grasp the real state of disaster and make plan of emergent rehabilitation after considering with respective sub-team.

c. Rehabilitation sub-team for installations located inside and out-side of the post office will establish the rehabilitation works plan quickly and connect with required sub-teams and propel rehabilitation works, arranging required persons to the post.

d. Materials preparing sub-team will take charge of procuring, preparing and transporting of materials asked by rehabilitation sub-team and will plan to secure emergently the unsufficient materials at Official Duties Allotment Board of Communication Bureau or from the traders of materials.

e. When the helps from other post offices or local groups are recognized to be necessary in accordance with disaster extent, the plan relative to the number of person and amount of materials needed will be decided and reported to the sides concerned.

f. The report on the state of disaster and emergent rehabilitation will be collected and sent to the commander of the prefectural relief corps one by one.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(4) Liaison with transit, communication and other organs.

As to the transportation of materials and the report of circumstances a concrete coordinating plan with detached agencies will be established under the close contact with the prefectural relief corps for fear of interruption of transportation and communication organs in proportion to the extent of disaster.

As to medical treatment, lodging, foods, etc. the same measure will be taken.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115015

TECHNICAL DEPARTMENT

Electric power team

(Matters pertaining to urgent repairing of electric installations and equipments and other technique)

Activities of Tokushima Prefectural Disaster Relief Corps, technical dept., electric power team will be executed as per following schedule.

I. Organization

1. The following sub-teams will permanently be installed in the Tokushima Branch of Shikoku Electric Supply Co., Ltd. and will be participated by all company personnel and will intend urgent rehabilitation of installations and constructions in case of emergency.

(1) Team Chief --- branch office chief

Team chief will govern all sub-teams and intend to promote rehabilitation plan under his command and supervision.

(2) Information and rehabibitation measure sub-team

The sub-team will collect informations from general affairs section, labor section, business section, all business offices and camps and will keep contact with prefectural disaster relief corps, main office, meteorological observatory and other organizations concerned and will set up calling plan of required force and rehabilitation plan and will conduct general adjustment of all sub-teams and matters of lodging and cooking.

(3) Power supplying installations rehabilitation sub-team --- Electric power Section

In accordance with rehabilitation measures, the sub-team will take direct charge of planning and execution of rehabilitation of power generating installations, power transforming installations, power supplying station and other pivotal installations and constructions, and detailing and controlling of rehabilitation technicians.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

(4) Electric wiring rehabilitation sub-team
--- Electric Wiring Section

In accordance with rehabilitation measures, the sub-team will take direct charge of rehabilitation of electric wiring such as planning and execution of rehabilitation works of indoor and outdoor wiring equipment, and detailing and controlling of required force.

(5) Rehabilitation materials sub-team
--- General Affairs Section

The sub-team will take charge of procurement, forwarding, distribution and custody of materials required for execution of rehabilitation works.

2. Each business office will permanently organize a branch of electric power team with business office personnel and camp personnel.

II. Pre-facto measures

1. Calling plan of required force

(1) Team chief will decide order, route, method etc. for transmitting orders in consideration of address and working place of all team members and will placard it on a certain place of each office.

(2) Team chief will decide vigilance places, storing condition of materials, method of guard etc. and make all team members have full knowledge of them.

2. Guard

(1) In case there is fear of disaster, team members will, according to their respective function, guard, patrolling at various installations under their control irrespective of warning or no warning and strive for prevention of accident.

(2) Each business office (camp) workers will keep clear share of guard section, patrolling route and method in case of disaster.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(3) Team chief will permanently prepare reasonable amount of standing materials at warehouses, business offices and camps under his control in order to make smooth an urgent rehabilitation work.

As to item and quantity of standing materials, they will be decided according to situation of time.

III. Emergency measures after outbreak of disaster

1. Report of situation and emergency measures

(1) In case of outbreak of disaster, a patrolling guard must make possible effort for emergency and at the same time, send urgent report of the following items to information sub-team.

a. Time and place of disaster

b. Summary of damage and development

c. Summary of persons and materials needed for rehabilitation

d. Requirement or no requirement of sectional help

(2) Rehabilitation measure sub-team will work out urgent rehabilitation measures in consultation with other sub-teams and in gripping actual state of circumstance.

(3) Power supplying installation rehabilitation sub-team will immediately set up rehabilitation works plan, inform other sub-teams of required materials, quickly detail required force and launch rehabilitation works.

(4) Electric wiring rehabilitation sub-team will, according to its function, launch rehabilitation work same as above.

(5) Materials sub-team will consult with main office and materials possessing bodies concerned and decide method and route for procuring materials which would be required for rehabilitation.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

(6) In case help is considered necessary from other organizations and local people according to degree of disaster, the electric power team will report to prefectural disaster relief corps and will set up a plan for required force and materials.

(7) As to state of rehabilitation, information and rehabilitation measure sub-team will report to prefectural disaster relief corps, main office and others concerned.

2. Liaison with transportation, communication and other organs

In anticipation of blocade of transportation and communication facilities according to condition of disaster, the team will set up concrete plan of co-operation with transportation and communication agencies as to transportation of materials, information and liaison in close contact with prefectural disaster relief corps.

It is same with measures for medical treatment, lodging and food.

ARABLE LAND DIVISION

Arable land team

(Matters pertaining to urgent repairing of lock-gate, flood-gate and arable land)

I. Organization

Arable land team will be formed of the following sub-teams:

Team chief --- Chief of arable land section

Liaison sub-team --- Sub-team chief and some members

Urgent materials sub-team --- "

No.1 Section aid sub-team --- "

No.2 Section aid sub-team --- "

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

II. Plan of activities

1. In case public installations such as arable land, bank and embankment, irrigation pond, farm road or water way is or is afraided to be damaged by wind and rain and quake or so reported, the team chief will call sub-team chiefs and members without delay and take quick and proper measures to meet the case.

   In the above case, the team chief will report the situation to prefectural disaster relief corps and arable land division chief. In case team chief is absent, liaison sub-team chief will take charge of the case.

2. Liaison sub-team chief will, under direction of team chief, mobilize sub-team members and take charge of liaison business with prefectural disaster relief committee office, all local administrative offices, all cities, towns and villages, ministry in charge and other organs concerned.

   The above liaison will be conduct by telegraph, telephone, documents and official travelling.

3. Urgent materials sub-team chief will, under direction of team chief, mobilize sub-team members and will take charge of collection, distribution and transportation of materials in close contact with other sub-teams.

4. No.1 section aid sub-team will, under direction of team chief, mobilize sub-team members and proceed to the spot to help local administrative office or city, town or village in close contact with other sub-teams and engage in urgent measures and investigation.

   No.1 section covers the following districts:

   districts under jurisdiction of Kaifu, Naka, Katsumyo local Administrative Offices

5. No.2 section aid sub-team will, under direction of team chief, mobilize sub-team members and proceed to the spot to help local administrative office or city, town or village in close contact with other sub-teams and engage in urgent measures and investigation.

   No.2 section covers the following districts:

   Districts under jurisdiction of Itano, Awa, Oe, Mima and Miyoshi local administrative offices.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

6. Each sub-team will make mutual assistance in accordance with place and degree of disaster

Emergency call and temporary formation of prefectural officials

I. In case the commander of prefectural disaster relief corps considers that scale of disaster is too big and is more than the relief corps can manage, he will apply to the governor for prefectural officials' help.

II. In the above case, the governor will take the following steps.

1. Emergency call will be made for prefectural officials in order to secure required force.

2. Prefectural officials will be despatched to help-wanting divisions and sections in accordance with degree of disaster.

3. Teams will be formed, if need be and will be despatched to disaster relief branch corps and disaster relief unit of disaster-stricken area.

OVERLAND TRANSIT DIVISION

Overland transit division

(Matters pertaining to overland transit of materials for disaster sufferers)

I. Organization

Overland transit team of overland transit division will be organized with personnel of Tokushima road transit control office of Ministry of Communication and will have following formation:

Chief of Overland transit division
--- director of Tokushima road transit control office of Ministry of Communication

Chief of overland transit team
--- Chief of transit section of the above office

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

The following sub-teams will be established as subordinate structure of team

1. General affairs sub-team chief)
2. Transit ") - Chief of transit section

General affairs sub-team members) - transit section members
Transit ")

3. Materials sub-team chief - Chief of materials preparing section

Materials sub-team members - Materials preparing section members

4. Fuel sub-team chief - Chief of fuel section

Fuel sub-team members - fuel section members

II. Breakdown of functions

Functions of the team will be broken down as follows:

1. General affairs sub-team

(1) Matters pertaining to general affairs for relief

(2) Matters pertaining to information and liaison

(3) Matters pertaining to call of motor vehicles

2. Transit sub-team

(1) Matters pertaining to transit of relief materials for sufferers

(2) Matters pertaining to tramsit of urgent rehabilitation materials

3. Materials sub-team

Matters pertaining to supply of tyres, tubes and other parts for transit motor vehicle use.

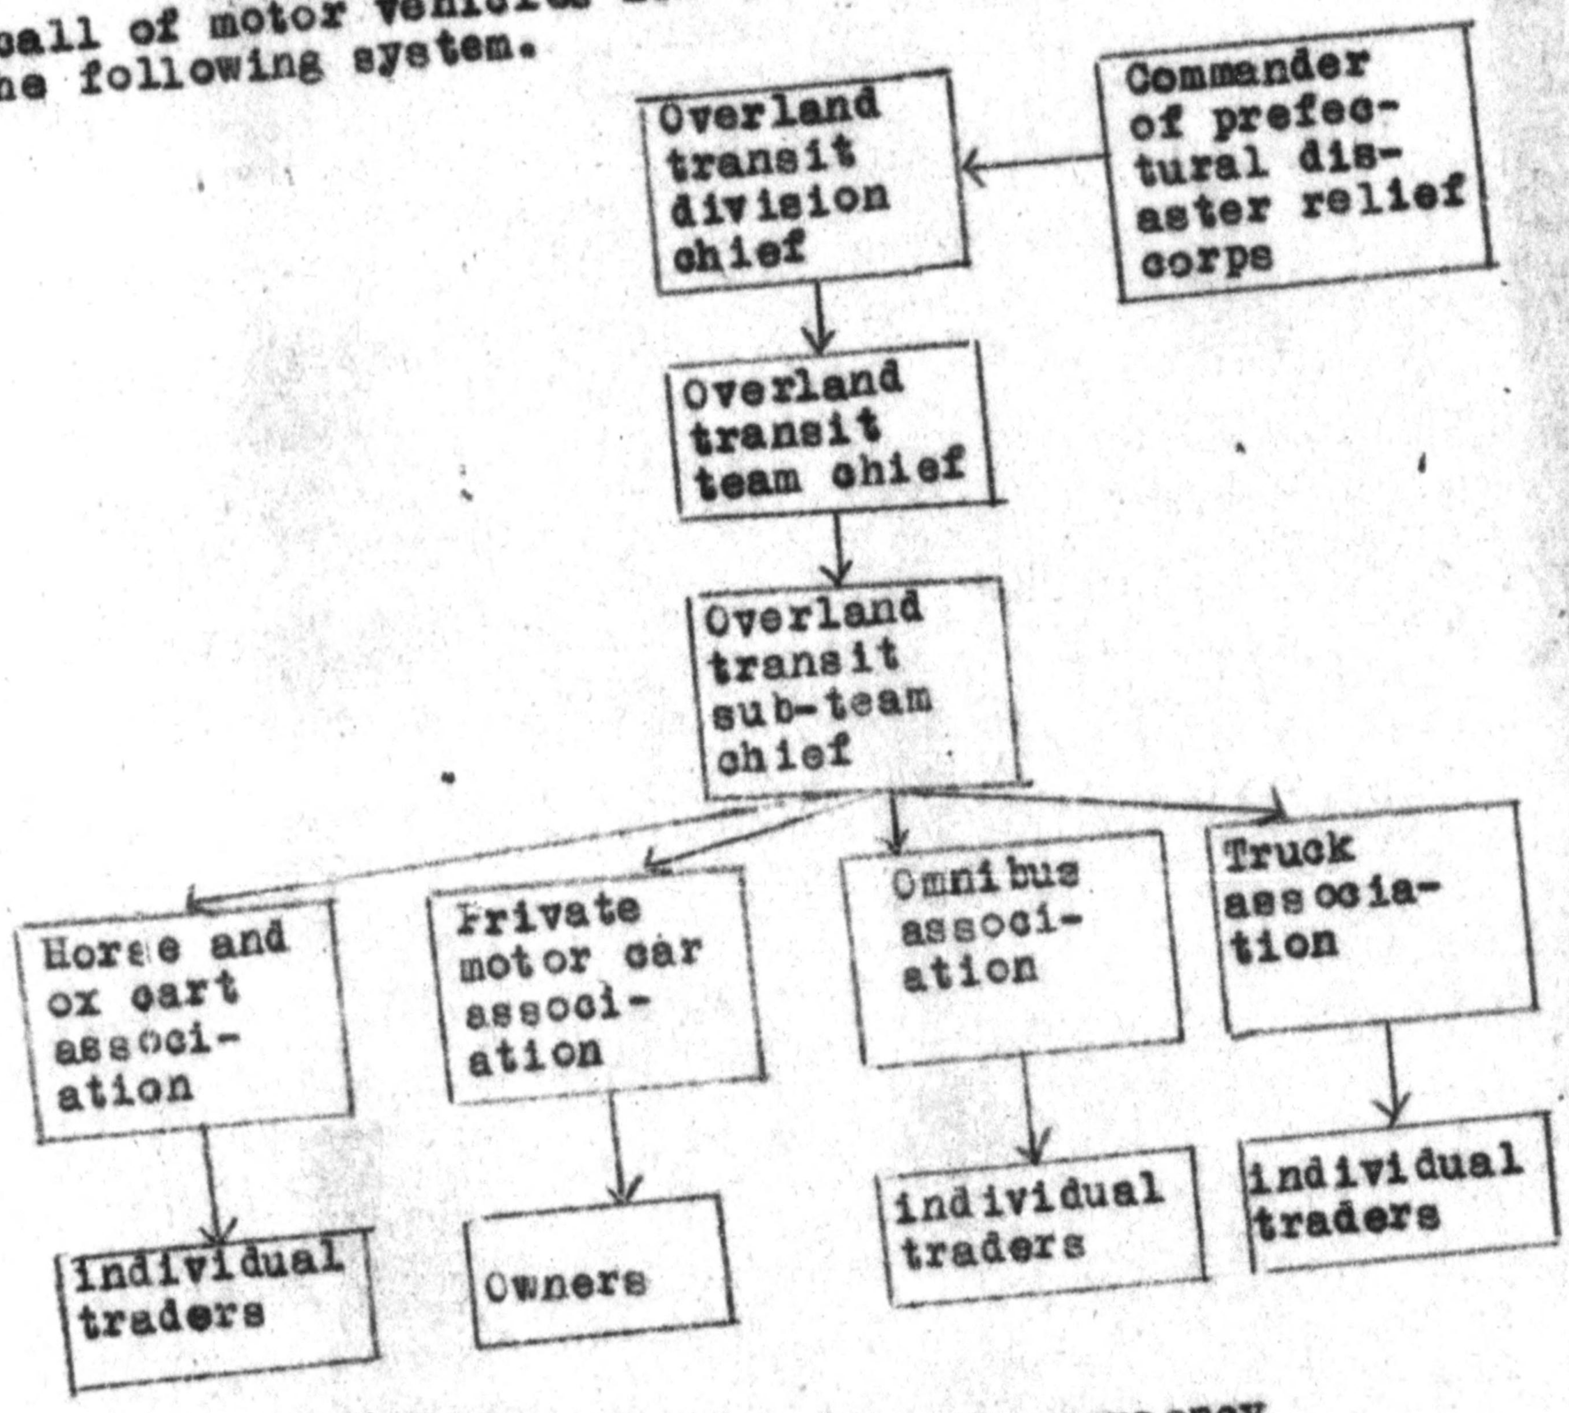
4. Fuel sub-team

(1) Matters pertaining to fuel for transit motor vehicle use.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

III. Call of motor vehicles for transit use at time of emergency

The call of motor vehicles for transit use will be made by the following system.



IV. Overland transit diagram at time of emergency

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

Remarks:

I. Starting order for relief will be as follows:

1. Trucks for business use, buses of civil operation, taxies

2. Trucks for owners' use, motor cars for owners' use

3. Trucks of government operation, buses of government operation, ox and horse carts

II. Being given about number of workable motor vehicles, this diagram will be amended every three months.

MARINE TRANSIT DIVISION

Marine transit team

(Matters pertaining to transit of relief materials for sufferers)

I. Organization

Marine transit team of marine transit division will be organized with personnel of Tokushima branch office of Takamatsu shipping Control Dept. and will have formation as follows:

Chief of marine transit division
Chief of marine transit team

and the following sub-teams will be established as subordinate structure.

1. General affairs sub-team

2. Liaison and information sub-team

3. Transit sub-team

Breakdown of func-tions

Breakdown of team functions will be as follows:

1. General affairs sub-team

(1) General affairs pertaining to relief

2. Liaison and information sub-team

(1) Matters pertaining to information and liaison

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

(2) Matters pertaining to call of vessels

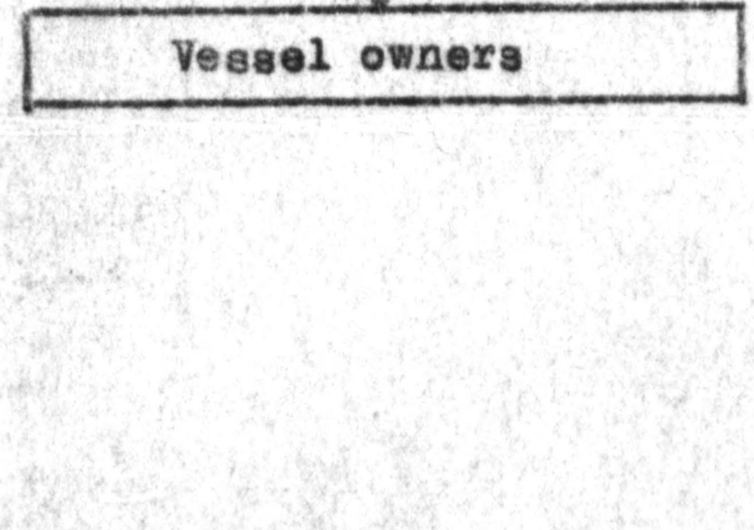
3. Transit sub-team

(1) Matters pertaining to transit of relief supplies for sufferers

(2) Matters pertaining to transit of urgent rehabilitation materials

(3) Matters pertaining to supply of fuel

III. Call of vessels for transit use at time of disaster will be conducted under the following system:



DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

Number of vessels and transit capacity tonnage for each port

Port	Number of vessels	Gross tonnage	Capacity tonnage (deadweight)

FINANCE DIVISION

Budget team

(Matters pertaining to budgetary measures for disaster)

I. As to budgetary measures for relief as provided for in disaster relief law and for other emergency measures taken against other disaster, the sub-team will have consultation with other divisions and will meet the case in full.

II. Exemption or reduction of tax will be exercised to sufferers, if need be.

COORDINATING DIVISION

Coordinating team

(Matters pertaining to liaison and control of coordinating activities of organizations)

I. Function

Along with activities of government and public offices and Japan red cross society at time of disaster, in order to obtain cooperation as an urgent measure, the team will have close contact with various medical,

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

material-possessing and other civil organizations for smooth execution of relief.

II. Establishment of coordinating committee

A disaster relief coordinating committee will be set up with representatives of civil coordinating organizations and will deliberate on basic plan for disaster relief and will decide general principles.

Immediate after outbreak of disaster, the team will call the committee, which will work out countermeasures for relief.

III. Plan for medical treatment and child delivery

1. Coordinating bodies

(1) Doctors' association

(2) Nurses, mid-wives, health nurses association branch

(3) Dental surgents' association

(4) Druggists' association

(5) Hospitals, clinics, lying-in hospitals and medical schools in cities and Gun.

(6) Medicines and chemicals distribution agencies and medical supplies association

2. Formation of Medical Coordina ting Organization

The above medical organizations will be organized according to the following breakdown and make them cooperate with medical team of sanitary division of disaster relief corps.

(1) City, town and village disaster relief unit coordinating team

Tokushima City	12 teams	(with city doctors' association as its nucleus)
Naruto City	4 teams	(")
Town or village	1 team each	

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

(2) Coordinating organizations for disaster relief branch corps will be organized by unit of doctors' association of each Gun.

(3) Coordinating organizations for medical team, Sanitary division, prefectural disaster relief corps, coordinating units for city, town or village disaster relief unit, coordinating organizations for disaster relief branch corps will be organized.

Personnel and kind of the above coordinating organizations will be investigated all the time.

3. Drilling

Coordinating units will be sought to participate in relief drills of Japan red cross society head office and branch offices and will be made known area of action, scope of activities and methods of urgent relief.

4. Liaison

Liaison will be taken charge of by chief of disaster relief branch corps in case disaster is limited to a certain town or village and by chief of coordinating division of disaster relief corps in case disaster ranges over several towns and villages.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

III. Labor service plan.

1. Coordinating organizations:

(1) Servicing associations.

(2) Women's associations.

(3) Young men's associations.

(4) Juvenile red-cross associations.

(5) Other laborers associations.

2. Training:

Participation is solicited in the training of the Red-cross Relief Team and the following trainings are usually conducted.

(1) Alarm forwarding.

(2) Transportation of patients.

(3) Guidance of refuge taking.

(4) Information forwarding.

(5) Transportation of resources.

(6) Supplying food and water.

(7) Distribution of food stuffs.

(8) Distribution of clothings and others.

3. Composition:

One or two teams are formed in every city, town and village, and the personnel of the team are alway kept re-enforced and the recognition of their duties is increased.

4. Connection:

When a disaster occurs only in one city, town or village, the commander of the local detachment corps will make a connection with others and other wise the commander of the coordinating division will do.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

IV. Plan of offering facilities and materials.

1. Coordinating organizations:

(1) Schools and temples.

(2) Wood distributing corporations.

(3) Staple foodstuff distributing corporations.

(4) Meat distributing corporations.

(5) Milk and production thereof distributing corporations.

(6) Fruits and vegetables distributing corporations.

(7) Clothings distributing corporations.

(8) Daily necessities selling stations.

(9) Fire-wood and charcoal distributing corporations.

2. Arrangements:

Representatives of all organizations are called up and the following matters are discussed to meet any emergency.

(1) Name of articles to be offered or to be able to offer.

(2) Quantity.

(3) Shape and no. of articles.

(4) Location of articles.

(5) Name and address of owners or custodians.

(6) Value and others of articles.

3. Connection:

As soon as a disaster take place, the chief of the coordinating division inquire about existence and quantity of articles to be offered and ask to supply those, if necessary.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

V. Plan of offering transportation facilities.

1. Coordinating organizations:

Motor-car companies.

2. Arrangements:

Representatives of all motor-car companies are called up and requested to inform and register the kind and number of sets of motor-car, and the number of drivers.

3. Arrangements:

Arrangements will be made by the chief of the co-ordinating division, in case a disaster occurs.

VI. Survey of the actual number of persons and ever ready materials.

Some persons are alway assigned to the arrangements making work as members of the liaison servicing team of the red-cross servicing corps in order to keep situations informed and to grip the actual number of the following facilities all the time.

Survey of facilities in each Gun and city which can be controlled by the stipulations of the Disaster Relief Law, Article 26: Item 1.

Tables for reference

I. Names of towns and villages to be threatened by collapse of banks of major rivers of the prefecture

North bank of Yoshino River:

Ichijo, Takashi, Matsushima, Oyama, Matsusaka, Sakae, Banzai, Bando, Otsu, Matsushige, Kitashima, Ojin, Sumiyoshi, Aizono, Kita-inoue, Nii and Kakishima (17)

South bank of Yoshino River:

Kamoshima, Nishio, Moriyama, Ushishima, Takahara, Urasho, Aihata, Kita-inoue, Takagawara, Ishii, Minami-inoue, Kokufu and Nii (13)

Akui River:

Minami-inoue, Kokufu, Kami-hachiman, Tokushima, Kita-inoue and Nii (6)

Katsuura River:

Tokushima, Katsuura, Takara, Yokose, Ikuhina and Komatsushima (6)

Kaifu River:

Kawanishi, Kawahigashi, Tomooku and Kawakami (4)

Miyagochi River:

Gosho, Oyama, Matsushima, Ichijo, Matsusaka, Sakae and Takashi (7)

Sonose River:

Tokushima, Kamihachiman, and Katsuura (3)

Left bank of Naka River:

Sakano, Imazu, Tatsue, Hanoura, Ono and Hirashima (6)

South bank of Naka River:

Nakanpshima, Takarada, Nagaike, Hirashima and Ono (5)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

II. Estimated amount of damage of cities, towns and villages to be stricken by collapse of banks of major rivers of the prefecture

1. Yoshino River (Left bank)

Category	Length or width	Amount of money (¥)
Road over 2 m.	89,820 m.	7,796,270
Road over 3 m.	74,790 m.	15,705,470
Bank	20,500 m.	133,050,000
Paddy field	2,600 Chobu	143,971,000
Upland field	1,000 "	34,127,500
Homestead	238.5 "	2,980,800
Houses inundated	7,471	109,000,000
Bridges	2	500,000
Decrease in crop	3,600 Chobu	43,070,250
Total		490,201,290

Names of cities, towns and villages to be affected:

Kakishima-son, Ichijo-cho, Matsushima-son, Takashi-son, Oyama-son, Matsusaka-son, Sakae-son, Banzai-cho, Kita-inoue-son, Nii-son, Aizono-son, Bando-cho, Sumiyoshi-son, Ojin-son, Kitajima-cho, Horie-son, Otsu-son, Naruto-shi and Matsushige-son.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

2. Yoshino River (Right bank)

Category	Length or width	Amount of money (¥)
Road over 2 m.	59,450 m.	7,143,850
Road over 3 m.	70,650 m.	20,371,350
Bank	6,000 m.	46,600,000
Paddy field	1,600 Chobu	74,188,400

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

Measures to be taken by Minsei-iin in case of disaster

1. In case of disaster, the relief corps of the stricken district will immediately call out chiefs of divisions and teams and make them start the relief activities for sufferers on the basis of the plan for operation of the disaster relief corps.

2. Disaster Relief Information Team:

   This team will successively report relief activities and later situations of the stricken district to the Military Government Team and Prefectural Disaster Relief Policy Council and at the same time announce the same to the general public of the prefecture through the media of local newspapers and the broadcasting station.

3. The relief corps will ask the co-operation of various public and private organizations (police stations, prefectural chapter of the Japan Red Cross Society, Minseiiins, youngmen's associations, fire-brigades, women's associations and various organizations concerned with economics), by establishing close touch with these organizations immediately after the occurrence of the disaster.

4. Information Team members of the relief corps who are working at the actual scene will appropriate an estimated expenditure needed for emergency relief by making sure of the extent of the damage.

5. Information-collection Team members will investigate, with the co-operation of Minsei-iin, the damage situation of each household and at the same time will make out relief application forms to be filed at the Relief Division.

   (Items to be investigated)

   a. No. of family members who lost houses.

   b. No. of dead

   c. No. of persons injured (No. of wounded persons requiring hospital treatment)

   d. No. of houses totally destroyed

   e. No. of houses partially destroyed.

   f. No. of households which suffered damage on household effects.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175815

g. Damage on barn and other buildings, cattle and fowls and farm machines and tools

h. Extent of damage on private enterprises

6. The Information-collection Team is responsible for submitting the first information on the occurrence of the calamity to the Military Government Team and reporting in succession later situation of the stricken district. At the same time, the team will announce to prefectural people the actual situation of the stricken district and the relief activities at the interval of several hours by media of radio, local newspapers and other means.

7. Information Centers will be established in proper places of the stricken district for information regarding welfare situations of the stricken district and safety of victims. Information Team members will conduct this business with the co-operation of Minsei-iins and members of Youngmen's Associations of the district.

8. Supply Team of the Relief Division will make sure that an adequate amount of commodities for emergency relief are kept in stock at the devastated district and if they find that the amount is insufficient, they will ask help to neighbouring towns and villages.

9. Places of temporary shelters:

Victims who have no relatives and aquaintances to go to will be sheltered at schools, Shinto Shrines, temples and public halls. In case of necessity, they will be sheltered at spacioms houses of private persons, but in this case, we must make minsei-iins investigate the situation and obtain consent of the owners of the houses beforehand.

10. Relief Materials Supply Team:

As designated merchants handling relief goods, we will select beforehand those merchants who have credit with the public of respective districts. We will make a contract with these merchants that in case of disaster they will be sure in supplying a necessary amount of relief goods at official prices.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

11. Damage relief measures will be divided into two categories; emergency relief measures and rehabilitation relief measures.

a. Emergency relief: Immediately after the occurrence of the disaster, the victims will be provided with such emergency relief goods as food, clothing, shelter and medical supplies.

b. Rehabilitation relief: This relief activities will be conducted on the basis of "Case work" method.

12. Case work method is utilized in determining allocation of relief goods. Even if a person suffered a great damage, he will not be entitled to be relieved if he can bear the damage he suffered. He must be revived on his own energy and expense.

13. The chief objective of case work is to aid individual households. Guidance and help must be accorded to individual victims so that they will get back to normalcy as early as possible. However, individual households, on their part, must exert their utmost along the lines set forth by the guidance.

14. When applications for relief are received, Minsei-iins will conduct investigation by visiting each applicant. Then the Minsei-iins will prepare reports. The investigation will cover the following items.

a. Family record of the applicant pre-disaster days.

b. Dead or injured situation of the family.

c. Extent of damage as a result of the disaster.

d. Assets (including income by employment)

e. Liabilities.

f. Extent of relief to be made.

g. Certificate showing that the family is victim.

h. Rehabilitation program planned by the family.

15. In preparing the report, Minsei-iins should not enter unnecessary items. They will be trained for this survey in ordinary times. These reports which include family affairs must be kept confidential.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

16. The family should assume responsibility for the program it formulated.

17. Minsei-iin, ~~after~~ in preparing the report, should make recommendations as to whether the application should be approved or rejected by clarifying reasons for it.

18. Awarding of relief goods and money will be properly adjusted on the basis of the report.

19. Supervisors of case work (headmen of cities, towns and villages) should account for the expenditure of the damage relief fund. Accordingly these supervisors are requested to make re-investigation of the case, after the case was closed.

20. Presents to victims of a catastrophe should not be distributed to families whose investigations have not been completed. These goods presented will be fairly distributed as early as possible to victims in proportion to the extent of the damage which respective victims suffered.

21. Rehabilitation relief should not be limited to a fixed form of relief. We must take measures suited to the damage situation of respective families.

22. Regarding expenditure of relief funds, especially expenditure of construction and repairing of houses, Minsei-iin must arrange receipts from building contractors and dealers of construction materials and must have them annexed to a file of cases.

Damage report form

Name of damage--relief district :

by Child Minsei-iin

1. Orderly duty and guidance of victims at the stricken district.

2. Bicycle orderly.

3. Office work at Relief Headquarters and Guard Headquarters

4. Assistant to recreation activities

5. Examination of received relief goods and shipment of the goods

6. Collection of materials necessary to reply inquiries concerning welfare.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

Feb. 11, 1947.

To : Tokushima Military Government Team.

From : Chief of G.L.O., Tokushima Ken.

Subject: Points of Counter Measures to be taken against Disasters.

The following counter measures will be taken readily and properly against such disasters as earthquake, storm, conflagration, etc. so that there may not be left much to be desired.

1. Matters to be taken care of beforehand.

(a) The stocked amount of such rehabilitation materials as staple food, seasoning and daily life necessities are to be always secured. (The present circumstances, however, cannot afford to store against disasters, therefore in case of emergency the relief distribution cannot but be carried out by picking up materials from those stocked as ordinary use.)

(b) The prefectural govt must always keep close touch with agencies in charge of collecting and distributing the above items and ready for the emergency.

(c) The minimum distribution amount in case of emergency to sufferers as relief use and the storing places thereof are;

Classification	Standard distribution	Storing place
Staple food	2.3 go per capita. (3-5) days ration.	Foodstuff Controlling and Distributing Corporation.
Bean-mash	10 momme per capita	Prefectural Bean-mash Co., Ltd.
Soy	1 go per capita	Prefectural Soy Co., Ltd.
Pickled radish or plums	10 momme per capita	Prefectural Pickle Controlling Corporation.
Clothing	Little per capita	Prefectural Fibre Textile Controlling Corporation.
Vegetable	100 momme per capita	Prefectural Agricultural Corporation.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175813

Classification	Standard distribution	Storing place
Candle	10 pcs. per household	Daily Life Necessities Controlling Corporation.
Match	1 pce. per household	-do-
Charcoal	1 bale per household	-do-
Fire-wood	5 bundles per household	-do-
Medicament	Ordinary narcotic, Sanitary materials, Disinfectane,	Medicament Controlling Co., Ltd.

The above standard need not always be fixed, but may be revised according to the period and circumstances of disasters.

Sufferers will be distributed other materials if necessary and possible.

2. Steps to be taken as soon as disasters break out.

(a) Possibly early attendance to the govt office of all the of ficials concerned in case of disasters.

(b) Establishment of the temporary counter measures headquarters.

(c) Determination of the following items director playing part of the leader.

A. Investigation measures of the damage.

B. Determination of relief goods.

C. Transportation measures.

D. Determination of the person in charge and of business allotment.

(d) The owners of goods will be ordered to deliver minimum quantity of relief goods according to the degree of damage as above mentioned in whose transportation the govt railroads and trucks belonging to the respective bodies keeping the goods will be available, or trucks and ships will be summoned up to help the transportation by issuing orders to the Truck Transportation Work Corporation and the Sailing Vessel Corporation respectively.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

(e) In the distribution of the above relief goods emergently transported to the damaged spots every means is expected to be taken, but as a rule the distribution will be carried out by the agencies dispatched by the dodies that delivered relief goods through the control of the respective local offices, towns and villages.

3. The goods whose unit and amount are certain among those under custody as relief use are as follows.

Item	Unit	Amount
Rice	1 bale	60 kgs.
Bean-mash	1 barrel	84
Soy	do.	92
Pickled radish	do.	82.5
Candle	1 box	25.65
Match	do.	30
Charcoal	1 bale	15
Fire-wood	1 bundle	10.6
Medicament	1 box	15 - 20

Chief of G. L. O.
Tokushima Ken.
