

# WMDE's product visions

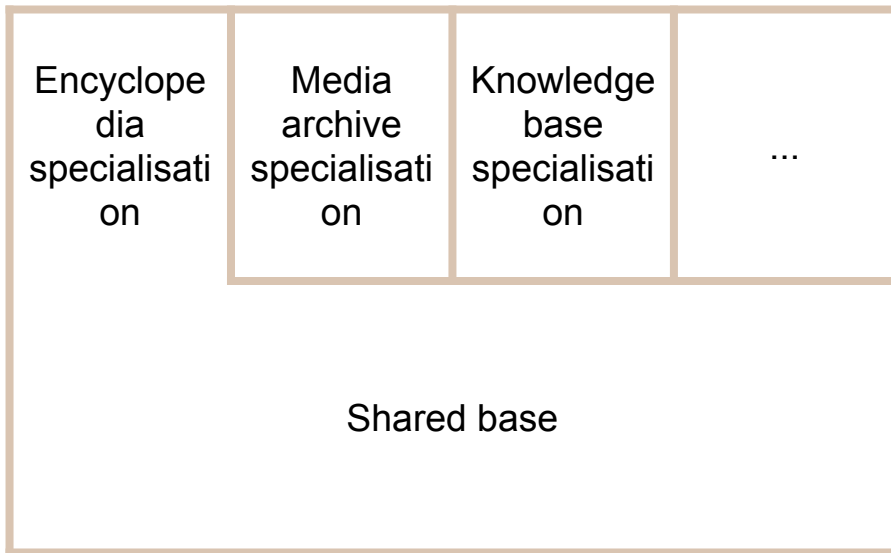

A dark blue, diagonal shape that starts from the bottom left corner and extends towards the top right corner, covering the lower half of the slide.

Dedicated products  
for dedicated  
projects.

We are one family  
with shared traits –  
but not the same.

but not the same.

- What are the family traits?
- Where and how should we stop trying to shoehorn things into a collaborative encyclopedia software?

Knowledge as a  
service includes  
contribution  
mechanism – not  
just consumption.

- How do we enable anyone to benefit from our content while still being able to sustain it?
- How does knowledge as a service change our projects' DNA?

Wikibase positions  
Wikidata as a  
central node in a  
large linked open  
data ecosystem.

Wikidata tightly  
connects all  
Wikimedia projects  
and increases their  
impact while  
breaking down  
barriers.

Our projects need to work together much more closely in order to benefit everyone and reach our vision.

Currently each project and language version is a silo, walled off against the others. Wikidata is the key to breaking down these barriers.
