A PRONOUNCING GLOSSARY

OF

SCOTTISH WORDS AND PHRASES

THE Scottish dialects, or Scottish language as they are called by some, are forms of the Northumbrian English which was the language of the Angles who had settled along the eastern seaboard, and which up to the 15th century was spoken as well in Yorkshire and Northumberland as in the Scottish Lowlands. Originally the terms "Scot" and "Scottish" were applied to the Celtic people of Ireland and those of western Scotland that came from Ireland and conquered the English of the southeast and the earlier Celtic people of the west and north, but the language of their non-Celtic subjects became the literary language of the land, and is now the language which is meant by "Scotch," "Scottish dialects," or "Scottish language."

Scottish literature practically began in the 14th century, with the works of John Barbour, a contemporary of Chaucer, and of others of his time, — whose writings are in fact Northumbrian English. By the end of the 15th century the language had under various influences, political, racial, etc., developed the general form which it retained during its chief literary period, and down to the time of the union of the kingdoms of England and Scotland in 1707.

The use of Scotch as the general language of literature of the country ceased about the time of the accession of James VI. of Scotland to the English throne, although it still continued to be the common language of the people. Subsequent to that, however, there was a brilliant period of revival in ballad and lyric poetry in which Scotch forms a considerable part, and still more recently the Scottish dialect has been freely used in descriptions of Scottish life and character by Scott, Galt, Macdonald, Black, Barrie, MacLaren, and others up to the present time.

As the works of some of these authors, especially Burns among the poets, and Scott and other more recent authors among the prose writers, are extensively read in England and America, the want of a general glossary of the words and phrases used by them is often felt; and it is to meet this want that this glossary is offered to the public, in the belief that it will be deemed a useful and appropriate addition to an English dictionary.

The Scotch is not one dialect; but there are numerous dialects differing from each other, not only in pronunciation, but also in vocabulary, grammar, and spelling.

The vocabularies of the Scottish dialects vary with the different shires, according as they have felt more or less the influence of the Gaelic, French, or Scandinavian languages, and these differences are noticeable even among the dialects of Lowland Scotch, where the Scandinavian influences are less marked. The body of this glossary is the dialect of Burns, but some words peculiar to other dialects are also given because found in works familiar to English readers.

The orthography of modern Scotch is extremely arbitrary and variable; and the spelling of a word affords no reliable guide to its pronunciation. Of the two principal systems or fashions which prevail, one (seldom used except in connection with an archaic diction) employs the spelling of the writers of the 15th and 16th centuries, regardless of pronunciation. The other, and much the commoner of the two, is based upon the standard English spelling, and conforms the spelling of Scotch words to English where the sounds of the English and Scotch are near to each other; and also where the sounds are different, but the English spelling represents to a Scotchman more or less accurately the Scottish pronunciation. Where a word or form is distinctly Northern or is wanting in the English, the Scottish orthography is followed, as *streek* for *stretch*, *kirk* for *church*, *ee* for *eye*, etc.; but whatever spelling is used, the words when spoken by Scotchmen are given their Scottish sounds.

The result of this is that Lowland Scotch as written or printed is largely the same as common literary English, with some words not found in English and some peculiarities of idiom and grammatical construction, etc.: Thus Burns in the poem "A Man's a Man for a' That" uses in all 115 different words, of which only 18 words do not occur in English. Much modern Scottish literature is therefore

quite intelligible to an English person reading it, which would be mostly unintelligible to him if it were spoken with a Scottish dialect pronunciation.

Because of this lack of any standard of orthography for Scottish words, in works of modern writers they are frequently spelled phonetically to represent the Scottish pronunciation to the English ear, as in other dialect story writing; but these forms have not been recognized in this glossary except in a few exceptional instances.

The vocabulary and the number of definitions in this edition have been much enlarged. In the preparation of the glossary full use has been made of Webster's New International Dictionary, and of special dictionaries, concordances, glossaries, etc., including various works which have become available since the last edition was published. Chief among these are Wright's "English Dialect Dictionary," the Oxford English Dictionary, and the "Scots Dialect Dictionary" by Warrack and Grant.

The difficulty to be overcome in attempting to give an English or American reader an idea of the correct pronunciation of the Scottish dialect is very great. The aim pursued has been to indicate, as fully as could be done with the English equivalents, the pronunciation of native-born Scotchmen. For this purpose the pronunciations or the entire galley proofs were submitted to various persons of Scotch birth and education, and to them are due many suggestions both as to pronunciation and subject matter.

The Scottish pronunciation has changed comparatively little from what it was three centuries ago when the languages of England and of Scotland were, comparatively, but slightly different. The consonant skeleton of the Scottish dialect is practically the same as that of the English, the only consonant used in the Lowland Scotch and not used in English being the guttural sound of *ch*, *gh*, in *licht*, *bught*, etc., corresponding to the sound of *ch* in German *ich*, *doch*. The letter *r* is strongly trilled; and *wh* and *h* are more strongly aspirated than in English. Some of the combinations of consonants in Lowland Scotch are treated differently from what they are in English; thus in *wr* and *kn* initial the *w* and *k* are audibly pronounced, though the modern tendency is to ignore them; while in *mb*, *pt*, *kt*, *ct*, the *b* and *t* are regularly silent, as in *tumble* (tüm'l), *except* (čk-sěp'), *expect* (čks-pěk'). Final *d* and *g* are dropped in *nd* and *ng*, as *lan(d)*, *mendin(g)*.

The vowel system of the Scottish (as well as the Northern English) dialects, however, is as a whole distinct from the vowel system of ordinary English speech, so that there are few, if any, vowel elements in the Scottish dialects identical with those of the English system. The two have nearly corresponding vowels; but almost every vowel of the Scottish dialect is recognized to differ either in quantity or quality from the corresponding vowel in English; and, although each of these differences may be slight, yet their combined effect, as exaggerated by the peculiar Scotch intonation and syllabic accent, is to give to the Scottish dialect or language as a whole a marked individuality distinct from that of English.

In respelling the words for pronunciation in this glossary the symbols used in the body of the book are employed, those being used which indicate most accurately the sound of the Scotch word to the English ear. The confused and uncertain spelling of Scotch words, and the difference of pronunciation in different localities, add to the difficulty of giving any practical system of rules for pronunciation in the space which is here available. Generally speaking, it may be noted that:

1. The letter *a* is chiefly used with sounds corresponding to those it has in English *arm* (ä), *ask* (â), and *ace* (ā), the peculiar ä of English being foreign to the Scottish dialect.

2. The letter *e* before *r* frequently has the sound of *e* in *error* (ě), when in English it has the sound of *e* in *her* (û).

3. The short *i* after a consonant mostly sounds like the English *ě*, as *rig* (rčg), or, esp. after *w*, as *ű*, as *will* (wűl).

- 4. The initial element of the long *i* is regularly cut shorter than in English.
- 5. In many words which in English are pronounced with *ö*, as *rod*, *bog*, *on*, etc., the Scottish pronunciation gives the long *o*, but cut short; and in these cases the sound is indicated by *ö*.
- 6. The letter *u* in many Scottish words has the sound of the French *u*, which is indicated in the respelling by *ü*.
- 7. The diphthong *ae* regularly represents the sound of English long *a* cut short, and is indicated by *ä*.
- 8. The diphthong *ei* regularly has the value either of *ē* or less often *ī*; *ey* is usually equivalent to *ī*.
- 9. The diphthong *oi* is often nearly like English *i*.
- 10. The letters *oo* are sometimes pronounced like French *eu* in *peur* (represented in this glossary by *û*), and sometimes like English *oo* in *ooze* (*öö*).
- 11. The diphthong *ou* is regularly equivalent to English *oo* in *ooze*, and is indicated by *öö*.
- 12. The diphthong *ow* has both the value of *oo* in English *ooze* (*öö*), and also that of *ou* in English *house* (*ou*).
- 13. The diphthong *ui* as in *guid*, *puir*, etc., is nearly the same as the French *u* in *plume*, and is indicated by *ü*.

- 14. The digraphs *ch* and *gh*, as in *aneuch* and *aught*, are harsh gutturals equivalent to the German *ch* in *ich* and *doch*, and represented by *x* in the respelling.
 - 15. The digraph *ng* in the middle of a word has the sound of *ng* in *sing*, but the hard *g* sound is not carried through to the next syllable; e. g., *single* (*sëng' l not sën'g' l*), *hungry* (*hüng' rī not hüg'grī*).
 - 16. The letter *l* is usually elided after the vowel *a*, as well as before *k* and *m*; but when final or following *e* or *i* is pronounced.
 - 17. The letters *lz* and *ly* in such words as *capercailzie*, *capercaillyie*, *spuilzie*, *spuillyie*, etc., represent the older *l3*, which was the symbol for the liquid *l* (older Fr. *ll mouillé*), pronounced like *lli* in *William*. The *l* and *z* are now often pronounced with their customary sounds.
 - 18. The termination *-ed* is regularly changed into *-it*, as *bleared* (*blër'it*), *ragged* (*räg'it*).
- The foregoing will serve to give a general idea of the most striking peculiarities of the Scottish pronunciation as distinguished from English, but cannot be taken as a guide for the pronunciation of all Scotch words, there being many exceptions to most of these rules, though not here noted.

VOCABULARY OF RIMES

§1. The two most common forms of rimes are rimes of monosyllables or final accented syllables (called *single*, or *masculine*, rimes), and rimes of two syllables the first of which is accented (called *double*, or *feminine*, rimes), such as *faster*, *pastor*, *aiding*, *fading*, *double*, *trouble*, etc.; but of these two forms much the more common is that of single, or masculine, rimes, which alone are given in this vocabulary.

§2. *Correspondence in sound and accent the test of a rime.*—Theoretically, a rime is the correspondence, in two or more words or verses, of terminal sounds beginning with an accented vowel, which, in modern English usage, must be preceded by different consonant sounds, or by a consonant sound in one case and none in the other. In a strict rime there is, therefore, exact correspondence in sound and also exact correspondence in accent. In practical usage, however, this theoretical standard of what constitutes a rime is not always observed, but more or less freedom is exercised in using as rimes sounds which in careful pronunciation are distinguished from each other, or syllables the accent or stress of which is somewhat unequal.

§3. *Correspondence in accent.*—Strictly speaking, single rimes must consist only of monosyllables or of final syllables having a primary accent. There are, however, many words which have a primary accent on the antepenult, but in pronunciation receive a secondary, or sufficiently strong, accent, or stress, upon the final syllable to make it proper to use that syllable as a rime to another final syllable which receives a primary accent, or to use it as a rime to a monosyllable of the same sound; thus, *accumulate* may be used to rime with *date*, *expedite* to rime with *sight*, etc. In the case of some very common terminations, such as *-al*, *-an*, *-ant*, *-or*, etc. (see *-AL*, *-AN*, *-ANT*, *-OR*), there is a tendency in words accented on the antepenult to slight the final syllable in ordinary pronunciation so that it does not have the vowel quality which is given to it when distinctly pronounced. In these cases the words are suitable for single rimes only when the final syllable is distinctly pronounced; and such use is to be avoided where the distinct pronunciation would sound stilted or awkward. There are some monosyllabic words, such as prepositions, articles, etc., which are slurred over in speech, and do not receive an accent, or stress, sufficiently strong to make them suitable as rimes in serious verse; and, for the same reason, the like use of an adjective at the end of a line with its substantive in the next line is usually objectionable.

§4. *Correspondence in sound.*—No definite line can be drawn between vowel sounds which so closely resemble each other as to make it proper to use them as rimes with each other and those which do not. In this vocabulary some sounds which are very closely related, or are commonly confused with each other, have been treated together under the same vocabulary entries, as well as those which for the sake of convenience are represented by different symbols. These cases are *ā* and *â* (as in *blanch*, *branch*, *band*, *command*, *ant*, *rant*; see Guide to Pronunciation, §§ 4 and 7); *ē* and *û* (as in *amateur*, *theater*; see Guide to Pronunciation, §§ 27, 28, and 88).

Besides these sounds there are a number of others which are less closely allied, or less commonly identified, but which, nevertheless, more or less nearly constitute riming sounds, and are not infrequently so used by careful writers, such as *ô* and *ō*; *ū* and *oo* (the final element of the *ū* being *oo*); *ä* and *ö*.

§5. *Words differently pronounced.*—Some words have more than one pronunciation recognized as being in good usage, and the more common of these, when they can be used in single rimes in either or both pronunciations, are given in the vocabulary in each group with which they may rime; thus, *trait* (see pron. in Vocab.) is given under *-ate* and *-ay*, *wrath* under *-ath* and *-oth*, etc.

§6. *Obsolete, archaic, or provincial rimes.*—There are many cases in the older poets where words are used as rimes in apparent contradiction to the present rules of riming and good pronunciation; but generally the words so

used were formerly so pronounced or accented as to constitute proper rimes, and some of these pronunciations, now obsolete among the educated, are still retained in local dialects.

Most English words terminating in *-ain*, as *gain*, *main*, *rain*, etc., are still pronounced with the *ā* sound for the *ai*, and this pronunciation is still recognized as good usage in verse and poetry for the word *again*, which is in ordinary speech pronounced only *â-gén'*. *Again* therefore is given under *-ain* as well as under *-en*.

The digraph *ea* was frequently pronounced *ā*, and hence the sound of *ea* was the same as that of *ay*; and *peal*, *real*, *steal*, etc., were properly used to rime with *male*, *quail*, *sale*, etc., and *tea* with *obey*, as by Pope.

The diphthong *oi* was formerly pronounced nearly as *ī*, as in *join*, *boil*, *roil*, etc., and such words were formerly properly used to rime with *fine*, *mile*, *while*, etc. The word *roil* still preserves its archaic pronunciation in the variant form *rile*, and is provincially so pronounced; similarly *boil* is still provincially or archaically pronounced *bīl*.

Final syllables in *-y* and *-ie* were formerly often accented, and were pronounced with an *ē* sound, as in the following lines from Chaucer:—

Lat see now of your wommanly pitee.
He is a kinges brother sone, pardee;
And, though he were a povre bachelor,
Sin he hath served yow so many a yeer,
And had for yow so greet adversitee,
It moste been considered, levesth me.

In the case of these words there has been a change in the accent as well as in the vowel sound, the accent having formerly, under the influence of the French, been on the final syllable. Subsequently the accent shifted from the final syllable, and the final vowel sound was changed from that of an *ē* sound to an *ī* sound; and the syllable is now pronounced with such an entire absence of stress that, in serious verse, even when the primary accent is on the antepenult (see *Correspondence in accent*, above), the final syllable is no longer proper for use as a single rime, except as a distinct archaism.

Besides these there are many other cases where rimes occur in the older poets which could no longer be used as such; as the riming of *queen*, *seen*, etc., with *sane*, *bane*; although many of these are still used in dialectal poetry.

§7. In some words which came into English through the French the letter *l* was silent where it is now always pronounced, as for example in the word *fault*, which was rimed by Pope, and properly so in his day, with *thought*.

§8. *Rimes by contraction, elision*, etc.—The final two syllables of a word are often pronounced like a single syllable with a long vowel sound, by slurring over or slighting one of the syllables in the pronunciation, or by dropping a consonant or vowel. Thus *plyer*, *higher*, *sover*, *lower*, as ordinarily pronounced, may be used to rime with *lyre*, *fire*, *lore*, *pore*; and *over* in the poetical form *o'er* is pronounced so as to rime with *lore*, *roar*, etc.; and *never* in the poetical form *ne'er* rimes with *care*, *stair*, etc. In dialectal or illiterate pronunciation such contractions and elisions are of frequent occurrence, but these are not recognized in this vocabulary.

§9. *Vocabulary arrangement.*—Only that part of the word or last syllable is considered which corresponds in sound with that of its rimes, and this part of each word is treated as a termination or ending. All of these terminations must, therefore, begin with the last sounded vowel or diphthong of the word; hence, any particular word with its rimes can be readily found in this vocabulary by looking for such ending. Thus in the case of *be*, *band*, *made*, *brain*, *league*, *due*, *blight*, *amend*, *pontoon*, *terminus*, etc., look in the vocabulary for *-e*, *-and*, *-ade*, *-ain*, *-eague*, *-ue*, *-ight*, *-end*, *-oon*, *-us*, etc., respectively, and under those entries will be found either the riming words or references to the headings under which they are given. Rime groups are in all cases given under the accented vowel sound. Thus *done* and its rimes will be found under *-un*, *sign* under *-ine*, *warn* under *-orn*, *yacht* under *-ot*, etc.

PRONOUNCING DICTIONARIES OF GEOGRAPHICAL AND BIOGRAPHICAL NAMES

ANCIENT AND MODERN

In these vocabularies, the intention has been to record the names of such places and persons as are of largest interest in history and literature, both ancient and modern. Mere size, however, has not been considered a sufficient reason for inserting the name of a place, nor have all the names of a class, as, for example, the divisions of a country, been included unless each possessed individual distinction. American names, naturally, occupy a relatively large amount of space, but the names of the greater leaders of all countries and the names of all places that are of importance in general history have been included.

Each entry is given the most approved spelling and pronunciation, with alternatives if supported by sufficient usage.

In the geographical entries are given the location of each place, the height of mountain peaks, the highest elevation of mountain ranges or groups, the length of rivers, the population of cities and of countries (*in nearest thousands; thus, p. 300 = population 300,000*), the area in square miles, and the name of the nation having jurisdiction, where this information is of interest, and often some item that marks the place as of note.

In the biographical entries are given (*in parentheses*) the dates of birth and death, or the date of death (indicated by d.) where this alone is known, or the date of the person's greatest activity (indicated by fl., *flourished*) where more precise data are lacking. In the case of kings and other rulers are given also the date of accession and the date of the end of the reign.

The special abbreviations used are explained below. For others, consult the general list of Abbreviations, p. 1206.

A PRONOUNCING VOCABULARY OF

COMMON ENGLISH CHRISTIAN NAMES

WITH THEIR ORIGIN, SIGNIFICATION, FOREIGN EQUIVALENTS, ETC.

The design of the following Vocabulary is, in part, to supplement that of the Vocabulary of Proper Names. Besides the English Christian Names, and their corresponding Latin forms, the principal equivalents in modern foreign languages are given in this Vocabulary, as well as those nicknames and diminutives which are well established or are etymologically important.

With one or two exceptions only, no notice is taken in

this Vocabulary of surnames, which are often used as Christian names; such for example, as Addison, Harvey, Jefferson, Sidney, etc.

The etymologies given are intended only to indicate the source from which the name is derived (often through some other intermediate language), and do not mean that the English word is in the original form. Literal meanings of all names are given, except in cases of etymological uncertainty.

NOTE. The abbreviation *L. id.* indicates that the Latin form of the name is the same as the English.

ABBREVIATIONS

USED IN WRITING AND PRINTING

NOTES: Do not use abbreviations in written or printed matter that consists of formal sentences or connected discourse.

Exceptions: Mr., Mrs., Messrs., Jr., Sr., when used with proper names; forms like **A. B., LL.D., P.M., A.M., B.C., A.D.,** and a few others of exceptional character are rarely if ever spelled out. **Rev., Hon., Dr., Prof., Gov., Gen.,** while spelled out before surnames, as *Governor Robinson*, are sometimes used before full names, as *Gen. U. S. Grant*, though even here the full spelling is preferred in the most formal matter.

Abbreviations are freely used in various headings (as of dates in the superscription of a letter), in tabular statements, commercial accounts, footnotes, references, etc.

Abbreviations of proper names must begin with a capital; others may or may not, according to the circum-

stances of use. The form given in the list is the one commonly used.

An abbreviation with the period at the end, as **Dept., Sec.,** etc., is generally to be used in preference to a contraction using the apostrophe, as *Dep't, Sec'y,* etc.

The forms **1st, 2d** (or, less properly, **2nd, 3d** (less properly **3rd, 4th,** etc., used for *first, second, third, fourth,* etc., as in designating the days of the month, are not, properly speaking, abbreviations, and take no period. The Roman numerals, **I, II, V,** etc., when designating the serial number of a thing, as a page or chapter, are used either with or without the period; after names, as in *George V., Leo X.,* etc., they usually take the period.

The sign **&** (ampersand) is used in names of business firms or corporations, and often in lists, advertisements, etc., but not in ordinary reading matter.

PUNCTUATION, USE OF CAPITALS, ETC.

I. PUNCTUATION

While the following rules for punctuation exhibit the best professional practice, there is much diversity in the use of certain of the marks, especially the comma. Many such differences have been duly noted. The rules have been made as few, as concise, and as clear as possible. Some rules that are of service only rarely have been omitted.

In general, punctuation in the best usage is more "open" than was formerly the case, that is, the points, especially commas, are used more sparingly, being employed only where uniform custom demands them or where they are essential to clearness and precision. This style of punctuation is best suited to the more simple, direct forms of writing, such as plain narrative; but if carried to extremes it results in ambiguity and an appearance of slovenliness. The primary aim of punctuation is to convey to the reader the exact meaning intended, and any text should be punctuated more or less "closely," according as clearness demands.

The punctuation marks are: the period, or full stop [.], comma [,], semicolon [;], colon [:], exclamation mark [!], interrogation mark [?], dash [—], parentheses [()], brackets [[]], quotation marks [" "], and apostrophe ['].

1. THE PERIOD, OR FULL STOP [.]

A period is used at the end of a sentence, or any expression standing for a sentence, that is neither interrogative nor exclamatory.

Society is a wave. The wave moves onward, but the water of which it is composed does not. The same particle does not rise from the valley to the ridge. Its unity is only phenomenal. The persons who make up a nation to-day, next year die, and their experience dies with them.

So much for Nestor.

A period is used after an abbreviation; also, before a decimal, and, therefore, between dollars and cents expressed in figures.

The MSS. were badly scorched. Mr. and Mrs. James Brown. James Brown, Esq., Bath, O. Dr. James Brown. David Livingstone, LL.D. (b. 1813; d. 1873). Maj. Gen. Wm. Prescott Scott. It measured 16.63 feet. The English pound sterling is worth about \$4.86.

☞ A few publishers omit the period after the abbreviations *Mr*, *Mrs*, and *Dr*; as, *Dr* Brown.

A period is commonly used after Roman numerals in such expressions as Maximilian I., George III., 2 Sam. xxii. 3, etc. This was formerly the universal practice, but many publishers now omit the period, especially when such numbers designate the serial number of a thing, as a page, chapter, etc.

After "cent," in the phrase "per cent," the period is now usually omitted.

☞ The terms 1st, 2d, 3d, 8vo, 12mo, etc., do not require the period. Cf. ORDINAL, n., *Note*, in the Vocabulary.

☞ In title pages, the period, as well as all other punctuation, is often omitted at the ends of lines.

2. THE COMMA [,]

Of all the marks of punctuation, the comma offers the most difficulty in use, and is used with the least uniformity. Some inexperienced or careless writers seem almost to insert

it at random, without any regard to its logical effect upon the meaning of the sentence. In the following extract five commas have been improperly inserted. They are inclosed in parentheses.

Still, notwithstanding (,) the truth of the above considerations, it must be acknowledged by any one acquainted with Canadian sentiment (,) that the idea of annexation finds little (,) or no favor amongst Canadians. For annexation means the obliteration (,) and extinction of all national life (,) and characteristics.

In reporting a sermon a reporter wrote:

Paul said the Bishop was ready to preach to those who were at Rome.

The reporter omitted two commas essential to the meaning of the sentence, which should have read:

Paul, said the Bishop, was ready to preach to those who were at Rome.

Parenthetic words, phrases, and clauses, or such as interrupt the sequence, or do not form a part, of a simple sentence, are set off by the comma.

The question, therefore, is still open.

His true ambition, and a lofty one it must be counted, was to affect the course of events in his time by affecting the course of thought.

Springfield, Mass., is often called the City of Homes.

On the wall hangs the picture of George Washington, the first president of the United States.

The man in black, stately and old, rose slowly in his place.

☞ The comma is not used between a noun and its appositive when so closely connected in thought as to form one idea.

My partner Johnson is in Europe.

Her daughter Agnes is at Vassar.

Before "of" in phrases indicating residence, position, or title a comma is used.

Theodore Roosevelt, of Oyster Bay, New York. Senator Henry Cabot Lodge, of Massachusetts. Col. Henry Smith, of the 5th Massachusetts.

Between a proper name and a following academic or honorary title a comma is used; also, between two or more such titles used together.

W. T. Harris, Ph.D., LL.D., editor in chief.

Adverbs and adverbial phrases and clauses that modify an entire clause or sentence are set off by a comma.

In the first place, he will tell you a fairy story.
Afterwards, we shall all go for a ride.

Between words, phrases, and clauses, that are in the same construction and not connected by a conjunction, expressed or implied, a comma is used.

Joy, sorrow, care, hope, are the common heritage.
Early to bed, early to rise, make a man healthy and wealthy and wise.

☞ Where there are two adjectives that qualify the same noun and there is no danger of ambiguity, the comma may be omitted.

A sturdy young fellow. A cold clear morning.

Repeated words in the same construction in a clause or sentence are separated by a comma.

I wait, wait, hoping against hope.

Before a conjunction connecting the last two words in a series of three or more a comma is used.

The estate was left to John, Robert, and William.

A declarative sentence is set off by a comma from an immediately following interrogative sentence that depends for its full meaning upon the declarative sentence.

You will come home soon, won't you?
This is Monday, isn't it?

The ellipsis of words that are common to two or more parts of a sentence, but are expressed only in one part, is indicated by a comma.

Reading maketh a full man; conference, a ready man; and writing, an exact man.

Phrases or clauses which possess in common a word modified or governed by a different word in each are set off by the comma.

An article made of, or containing, bone.
He looked directly at, not away from, the picture.

Words placed out of their natural position, as for clearness or emphasis, are set off by the comma if the expression would be awkward or the construction forced or ambiguous without the comma.

To the wise and upright, old age brings many joys.
Exasperated by the continual bickerings, he resigned the secretaryship.

Contrasted words and phrases are set off by the comma.

Work, not words, is what is needed.
Gold and silver, not common metals, were sought for.

Words used in direct address are set off by the comma.

Listen, my children, and you shall hear
Of the midnight ride of Paul Revere.

After "namely," "viz.," "that is," "i. e.," "as," "e.g.," etc., introducing an illustration or example, a comma is used.

The New England States are six: namely, Maine, New Hampshire, etc.

After "Yes," "No," "Well," "Why," etc., introducing a sentence or a clause, a comma is used.

Yes, I think so. Well, I am in no hurry to go.

After the formal closing phrase of a letter a comma is used.

Yours truly, Yours very sincerely, Your loving son,
I am, Respectfully yours,

☞ In the superscriptions of letters, all punctuation at the ends of lines is omitted by many.

Before a short quotation that is not made a separate paragraph a comma is used; also, after a direct quotation that is the subject or object of a following verb.

Then he said, "Good night!" and with muffled oar
Silently rowed to the Charlestown shore.
As Prior says, "Virtue is its own reward."
"The train is coming," said his companion.

Two adjacent sets of figures are separated by a comma.

In the year 1862, 62 children in the village died of diphtheria.

A date explaining a previous date is set off by the comma.

Robert Louis Stevenson was born on Nov. 13, 1850, at 8 Howard Place, Edinburgh.

Large numbers are separated into groups of three figures each by the comma.

The population of the United States in 1915 was 101,151,000.

Volume, page, or line numbers following the names of books, magazines, plays, or poems are set off by the comma.

National Geographic Magazine, XXIX, 217.
Paradise Lost, l. 880.

3. THE SEMICOLON [;]

Phrases or clauses containing commas are separated from other phrases or clauses in the same sentence by the semicolon.

The seasons come and go, and the years pass on; but love abides.

There is a continual warfare between evil and good in the world; but good is in the ascendant, and must be victorious at last.

The yield was: 1889, 660 bbls.; 1899, 886 bbls.

Two or more sentences in which the relation in thought is very close, and which are therefore written as one sentence, are separated by the semicolon.

A knife and inkhorn hung on his dress; we see a rosary in his hand; and when he was alone he walked swiftly.

Biblical references to separate successive chapter numbers are separated by the semicolon.

Rev. xxi.1; xxii. 5.

4. THE COLON [:]

After the salutatory phrase in a letter or in an address the colon is used.

Dear Sir: Gentlemen: My dear Sir: My Lord Archbishop:

Ladies and Gentlemen:

Before a formal quotation a colon is generally used.

Literally translated, the words of the song were these: "The poor white man, faint and weary, came and sat under our tree."

☞ A comma may be used before a short quotation unless the quotation is made a separate paragraph.

There is much truth in the proverb, "Without pains, no gains."

After a clause or sentence introducing a series of particulars a colon is used.

The results of the mission so far are: Natives baptized, 126; regular communicants, 101; mission schools, 3; native teachers, 8; native workers other than teachers, 42.

5. THE EXCLAMATION MARK [!]

An exclamation mark is used after an ejaculation, a command, or any other expression of an exclamatory nature, and at the end of a sentence beginning with an interjection.

Pshaw! Go, go! How beautiful! Alas, that I should live to see this day! Oh that those lips had speech!

☞ In clauses introduced by the interjection *Oh*, *O*, the exclamation mark is not used immediately after the interjection, but at the end of the clause. When used in direct address, *Oh* is separated by a comma from the name of that which is addressed; but *O* so used is generally not followed by the comma.

O for the wings, for the wings of a dove!
Oh, mother! Oh, Janice!

6. THE INTERROGATION MARK [?]

An interrogation mark is used at the end of a direct question.

Where wast thou when I laid the foundations of the earth?

Is it well to wish thee happy?

☞ The interrogation mark is not used when an expression denoting inquiry is not in the form of a direct question.

I was asked if I would write a short account of it.

An interrogation mark, inclosed in parentheses, is used to express doubt about something in the text to which it is related by its position.

He offered me a bag of real (?) alligator skin.

7. THE DASH [—]

The dash is used to mark a suspension of the sense, a faltering in speech, a sudden change in the construction, or an unexpected turn of the thought.

If you will listen, I will explain — but perhaps you do not care to hear.

A self-hunting dog is — a canine — that is — a dog of peculiar traits.

I saw her — my pulse even now stops at the thought — in the direct path of the runaway animal.

He sometimes counsel takes — and sometimes snuff.

The dash is used to set off parenthetical matter, as a clause repeated for emphasis; also, to indicate the omission of words or letters, as between the first and last dates of a period, etc.

I will never — never, I say — agree to this iniquitous proposal.

During the decade 1870 — 1880.

Secretary B —.

8. PARENTHESES [()]

Parentheses, or marks of parenthesis, are used to set off a clause, translation, or the like, which is inserted in a sentence but is independent of it in construction.

Know, then, this truth (enough for man to know):

Virtue alone is happiness below.

We were now nearing our destination (we had been five days on the river), and our spirits rose.

Nil desperandum (Never despair)!

9. BRACKETS [[]]

Brackets are used to inclose sentences, phrases, or words inserted in, or appended to, quotations or interpolated in a text as being additional or foreign to it.

He is just as cheerful as when you was [were] here.

The city at this time [early in the eighteenth century] had but 4,000 inhabitants.

The next definition is: "Another term for the ear. [So in Latin.]"

The eruption began [I was present myself at the time] with a detonating report.

10. QUOTATION MARKS [" "]

Quotation marks (consisting of two inverted commas at the beginning and two apostrophes at the end of the quoted word or words) are used to inclose all direct quotations.

"When I am dead," said one of the keenest of modern minds, one of the greatest of modern poets, "lay a sword on my coffin, for I was a soldier in the war for the liberation of humanity."

☞ In all quotations, excepting extracts from plays, quotation marks are put at the beginning of every paragraph occurring within the quotation, in addition to those at the beginning and at the end of the extract.

☞ Commas and periods should be placed within the closing quotation marks; semicolons and colons, without. The interrogation point and exclamation point should be placed within the quotation marks when part of the quotation; otherwise, outside.

Single quotation marks (consisting of a single inverted comma at the beginning and a single apostrophe at the end of the quoted words) are used to indicate a quotation within a quotation.

The witness said: "I distinctly heard him say, 'Don't be late'; and then I heard the door close."

☞ Some American publishers, following English practice, reverse this usage and inclose with the double marks a quotation which is included within a quotation, while using the single marks at the beginning and end of the entire extract.

☞ The single marks are now often used to inclose a single quoted word or short phrase.

'Go', he said sharply.

11. THE APOSTROPHE [']

The possessive of most singular nouns is formed by adding an apostrophe followed by an s.

The dog's teeth. James's book. Burns's poems. Dickens's *Tale of Two Cities*. Hortense's gown. St. Boniface's teachings. A friend of George's.

☞ The apostrophe is used in *other's*, *one's*, *another's*, but not in *its*, *hers*, *his*, *ours*, *yours*, *theirs*.

It was another's fault. The book is hers. A friend of ours.

An apostrophe without an added s is used to form the possessive of singular nouns ending in a sibilant, where the repeated sibilant would be disagreeable to the eye or ear, as in words of two or more syllables, with the last syllable unaccented, esp. when the following word begins with a sibilant.

Moses' commands. For conscience' sake. Dickens' stories. Ulysses' son.

The possessive of plural nouns not ending in s is formed by adding an apostrophe followed by an s.

Men's and women's shoes. Children's toys.

The possessive of plural nouns ending in s is formed by adding an apostrophe.

Boys' caps. Girls' coats. Carpenters' tools.

An apostrophe is used before an s added to the last of two or more nouns in the same construction to indicate the possessive.

The Representative from Vermont's vote. Brown and Jones's arithmetic.

☞ This construction is usually to be avoided as clumsy and inelegant.

The omission of a letter or letters from a word or of one or more figures from a date is marked by an inserted apostrophe.

Don't. I've. He's. Who'd. 'Tis. 'Gainst. O'er. You'll. I'd. The class of '94.

An apostrophe followed by an s is used to form the plurals of figures and signs, of words mentioned without regard to the meaning, and one form of the plural of letters.

A million is written by 1 followed by six 0's.

He uses too many I's. The sentence has three *and's* in it. A's. B's.

II. THE USE OF CAPITALS

The first word of a sentence, or of any expression standing for a sentence, is capitalized; also, the first word of a complete line of poetry.

We eat of the bread which grows in the field. We live by the air which blows around us. Yea, my lord.

Ring out old shapes of foul disease;
Ring out the narrowing lust of gold;
Ring out the thousand wars of old,
Ring in the thousand years of peace.

The first word after a colon is capitalized when what precedes is introductory to a complete passage or a sentence.

Finally, I wish to say this: We shall get better results from a small committee than from a large one.

As the old proverb has it: "The more haste, the less speed."

Proper nouns, words used as proper nouns, and (generally) derivatives from them are capitalized.

George, Elizabeth, Paul; France, Spain; Bible, Talmud, Koran.

Georgian, Elizabethan, Pauline; French, Spanish; Biblical, Talmudic, Koranic.

Do not capitalize words derived from proper nouns when there is no longer any conscious association with the proper noun, as in the case of many words used to describe common articles of merchandise or common operations.

Fine china (ware), cashmere (fabric), champagne (wine), morocco (leather), derby (a hat), boycott, macadamized, japanned, italicize.

In French, German, Italian, and various other modern languages, proper adjectives are not capitalized.

The rules (1) to (21) below are merely specific applications of the general rule as to capitalizing proper nouns and their derivatives.

(1) Epithets used as parts of proper names or as substitutes therefor are capitalized.

Alexander the Great. Charles the Bold. Richard the Lion-hearted. Cœur de Lion.

God, Lord Jehovah; the Father, the Son, the Holy Ghost; the Messiah, the Redeemer, the Savior; the Supreme Being, the Almighty, the Eternal; the Virgin Mary, the Blessed Virgin, St. Mary the Virgin.

Trust in the Lord and in His mercy, and He will bring it to pass. O Lord! Thou that watchest o'er Thy people.

In the Bible and in the Book of Common Prayer, such pronouns and pronominal adjectives are left uncapitalized, so as to avoid a multiplicity of capitals.

(3) Names of the divisions, books, and versions of the Bible, titles of parables, etc. are capitalized.

Old Testament (abbreviated, O. T.), New Testament (N. T.); the Book of Job, the Acts of the Apostles; Authorized Version (A. V.), Revised Version (R. V.); parable of the Sower, the Lord's Supper, Lord's Prayer.

(4) The word Church is capitalized when it designates a specific body of Christian believers, or when it forms part of the name of a particular edifice. The names of religious denominations, of monastic orders, or of their members are also capitalized.

(10) Names of genera, but not of species, in binomial scientific names in zoölogy and botany are capitalized.

The tall buttercup (*Ranunculus acris*), the harp seal (*Phoca granlandica*).

(11) New Latin names of classes, families, etc., in botany and zoölogy, are capitalized, but not adjectives and English nouns derived from them.

Hexapoda, hexapod, Gastropoda, gastropod.

Such names are not capitalized when used as common names of plants, flowers, etc.

Geranium (genus), geranium (plant or flower).

(12) Names of the stars, constellations, etc. are capitalized.

The North Star, the Milky Way, the Dipper, Charles's Wain, the Southern Cross.

(13) Generic terms for political divisions when used as part of the names of specific political or governmental organizations or territories are capitalized.

Holy Roman Empire, United Kingdom, French Republic, Northwest Territory, Larkins Township.

(14) Names of political parties, names of legislatures and other governmental bodies, and of offices, civil and military titles when used specifically, and all titles of honor, nobility, and respect are capitalized.

(16) Names of personifications of the seasons and of abstract ideas or objects are capitalized.

Where Spring her verdant mantle cast.
Of old sat Freedom on the heights.

(17) Names of the points of the compass, when used to designate definite geographical portions of a country, names of divisions of the world or of a country, and nouns or adjectives derived therefrom are capitalized.

The South, the West, the Orient, New England, the Old World; Southerner, Oriental, New Englander.

☞ When used to denote direction only, terms denoting points of the compass should not be capitalized.

The torrent took a course due east.

Pacific Ocean, Red Sea, Gulf of Mexico, Straits of Gibraltar, Missouri River, Rocky Mountains, Pike's Peak, Death Valley, Lake Superior; County Mayo, Cook County, Cass Avenue, Court Square, Park Street; Philippine Islands,

☞ When the word *dear* does not begin the phrase, it is usually spelled with a small letter.

Dear Mother: My dear Mr. Smith: My Lord Duke:

III. MISCELLANEOUS

1. ELLIPSES

Ellipses, or omissions, of letters, words, or sentences, are indicated by the apostrophe or the dash, or by a series of periods or of asterisks (stars). The dash is used also to denote the omission of figures. To indicate the omission of one or more complete lines of poetry, a full line of periods or stars is used. In quotations, an ellipsis should be regarded as a part of the matter quoted, and inclosed in the quotation marks.

Five o'clock. O'Connor. Mrs. B—n, B...n, or B***n (for Mrs. Brown).

The expense... of repairing the dam will be enormous. The years 1807-17.

2. FOOTNOTES

References from the text of a work to notes at the foot of a page are indicated by superior figures, by superior letters, or by the following signs in the order given: the asterisk, or star (*), the obelisk, or dagger (†), the double dagger (‡), the section (§), parallels (||), and the paragraph mark (¶).

3. THE USE OF ITALIC LETTERS

Italicize words to which it is desired to give emphasis.

Not *real* philanthropy, merely the *outward show* of it.

☞ The frequent use of italic merely for the sake of emphasis is in bad taste.

Italicize foreign words and phrases used in an English text.

Ab origine; *ancien régime*; *con amore*; *garçon*; *bona fides*; *in propria persona*; *nolens volens*. As the French have it, *Chacun à son goût*.

Italicize names of ships and titles of books.

The battleship *Pennsylvania*; Bryce's *The American Commonwealth*.

Italicize New Latin scientific names of plants or animals, esp. when included parenthetically apart from the context.

The goldenseal (*Hydrastis canadensis*). The quahog, *Venus mercenaria*, has a thick shell.

4. ABBREVIATIONS

Abbreviations should be used sparingly in all literary work (including letters). Only those that are known to be used by writers of standard English prose should be used in general work. Reference works, catalogues, lists, etc., in which conciseness is a necessary consideration, are forced to adopt many abbreviations that are not in general use.

The following abbreviations are in good general use: *Mr.*, *Mrs.*, *Messrs.*, *Rev.*, *Hon.* when used before proper names; *Jr.*, *Esq.*, and all recognized abbreviations for academic honorary titles, such as, *A.B.*, *Ph.D.*, *M.D.*, *M.C.*, *S. J.*, *U.S.A.*, etc., when used after proper names; also, the recognized general abbreviations, *viz.*, *etc.*, *i.e.*, *e.g.* *A.M.*, *P.M.*, *A.D.*, *B.C.*, etc.

☞ There is a growing tendency to spell out such personal titles as *Captain*, *Colonel*, *General*, *Governor*, *President*, *Professor*, etc. The title *Reverend* is now usually spelled out when preceded by *the* or *Right*. Many careful writers spell out (in addresses) the names *Alaska*, *California*, *Colorado*, *Idaho*, *Iowa*, *Maine*, *Mississippi*, *Missouri*, *Ohio*, and *Utah* owing to the fact that the abbreviation *Cal.* is sometimes mistaken for *Col.*, *Miss.* for *Missouri*, etc.

☞ Business correspondence admits of a much larger number of abbreviations than does personal correspondence; but it must not be forgotten that clearness is even more to be desired than brevity.

Abbreviations should be used with discrimination. The proper use of abbreviations can be learned only by observation and practice. One properly says: He left at 6 A. M., but not, He left this A. M. In the heading of a letter, one writes: Oct. 3, 1920, but not, He came in Oct., etc.

5. BIBLIOGRAPHIES, ETC.

In making lists of books, magazine articles, etc., for bibliographies, catalogues, and the like, the author's name usually comes first, followed by the title of the book (in italics) or the title of the article (in quotation marks), the place of publication, or the name of the periodical, and the date. The following may serve as examples:

Bryce, James, *The Ho'y Roman Empire*. Enlarged and revised edition. New York: Macmillan.

Scudder, Horace E., *Ohio* ("American Commonwealths"). Boston and New York: Houghton, Mifflin, & Co., 1888.

Shakespeare, *King Lear* (W. J. Craig, ed.). in "Dowden edition." Indianapolis, Ind., Bowen-Merrill Co., 1902.

White, John Claude, "The World's Strangest Capital," *National Geographic Magazine*, March, 1916.

"The Tension between Turkey and Greece," *American Review of Reviews*, August, 1914. [Use this form if the article is unsigned.]

Longfellow, Henry Wadsworth, "Evangeline," in *Poems* (Household Edition). Boston: Houghton, Mifflin Co., 1884.

IV. PREPARATION OF COPY FOR THE PRESS

GENERAL SUGGESTIONS

1. **Copy should be made on single sheets of paper** of a uniform size, *one side only* being used. The paper should not be too large. Sheets about 8 x 10 inches are the most convenient. The sheets should be numbered, and plain white or neutral (gray, yellow, or brown) paper is best.

2. **Copy should be easily legible**, preferably typewritten, but if not, then clearly written in black ink. There should be not less than half an inch of clear space between the title and the subject matter, and the first line of each page should begin not less than an inch from the top of the page. There should be a blank margin of at least an inch at the left side of the page. A part of a line should not be left blank after the end of a sentence, unless that sentence ends the paragraph.

3. **Copy should be revised by the proof reader** before it goes to the compositor. The dimensions of the page, size and style of types, whether the matter is to be leaded or set solid, the various divisions (as chapters, etc.) and subdivisions, headlines, notes, etc., should all be determined before setting type.

4. **Copy should embody the final ideas of the author.** Allowance must be made for some changes, but, to avoid expense, the copy as sent to the compositor should be as complete and perfect as possible. Changes in matter already set are more costly than the original setting. Compositor and proof reader are bound to "follow copy" *literally*, except in the case of obvious mistakes in punctuation or spelling, which they correct, calling attention to all such changes.

5. **Abbreviations** should be used only for words usually so written. See p. 1206.

6. **All proper names, technical and scientific words, references, quotations, and figures** should be verified in the MS.

7. **Spelling should be uniform.** For words that have two or more accepted spellings, one form should be adopted and adhered to throughout. The spellings in this Dictionary are those most generally accepted.

8. **Capital letters should be used** according to a uniform style. A word that may be written with either a capital or a small letter should not be written now one way and now the other. Whether a word is to be begun with a capital or not is shown by the vocabulary entry in the Dictionary. For rules, see p. 1216.

9. **Punctuation should be as uniform as possible.** Unfortunately not only is there often a difference of opinion in regard to what is the best or the correct punctuation, but also it is difficult for even the same writer to be always consistent in this matter. For rules, see p. 1213.

10. **Paragraphing** should be indicated on copy, not left to the compositor or proof reader.

11. **Directions to the press** should be inclosed in circles or curved lines, to avoid confusion with corrections, etc.

12. **The kind of type to be used**, if not ordinary roman, is indicated by underscoring. Underscore once for *italics*, twice for SMALL CAPITALS, three times for CAPITALS, and once with a wave line for **boldface**.

TECHNICAL TERMS

Body.—The main part of a type below the raised character. According to their size, measured at right angles to the printed lines, type bodies are called *pica*, *long primer*, or 4½ point, 5 point, etc. See TYPE, in the *Vocabulary*.

Displayed matter.—Matter, as headings, titles, etc., made prominent by being set in relatively large type or with varying lengths of line, etc.

Electrotype.—A facsimile plate for printing, made from type, woodcuts, etc., by depositing a thin plate of copper in a mold by an electroplating process, and backing this with type metal.

Em.—The square of the body of a type of any size; that is, a square whose side is the greatest dimension of the body of the type. The *em* is the unit in calculating the amount of type in printed work, or that set by a compositor.

Font.—A complete assortment of any particular size and style of type.

Form.—Set-up matter from which an impression is to be made, secured in a chase, or frame.

Half title.—The name alone of a book, placed on a separate page or at the head of the first page of text; also, any similar sectional title.

Indentation.—The setting-in of a line from the margin. In *hanging indentation*, the first line begins at the margin, the other lines are set in.

Justify.—To make lines of type even or true by proper spacing; to adjust the type.

Leaders (lēd'ērz).—Dots or dashes to *lead* the eye, as, in an index, from the end of a partly filled line to the figures.

It is read and corrected at the press before the *author's proof* is sent out.—**Author's proof** is taken after the corrections of the *office proof* are made. It is sent, with the MS., to the author.—**Galley proof** is taken from the type in the galley (printer's metal frame with flanges on three sides). In extended work, it is usually taken on long sheets of paper. The first *author's proof* is generally *galley proof*.—**Revised, or second, proof** is taken after the corrections indicated in the first *author's proof* have been made.—**Foundry proof** is taken after the corrections on the last *author's proof* have been made, and before the forms are cast.—**Plate proof** is taken after the plates have been cast. Changes in the *plates* are very expensive.—**Foul, or dirty, proof** contains more errors than ordinary.

Quad (Quadrat).—A short blank piece of metal, lower than the type, to fill blank spaces, etc.—**Em Quad.**—A quad the size of an "em."

Stereotype.—A plate made by casting type metal in a mold taken in plaster of Paris, paper pulp, or the like, from some printing surface (as a page of type).

MAKE-UP OF A BOOK

The following is the order commonly observed in the make-up of a book. 1. Half title (name alone) and blank page. 2. Full title and blank page or copyright notice. 3. Dedication and blank page. 4. Preface or Introduction. 5. Table of Contents. 6. List of Illustrations. 7. Text. 8. Appendix. 9. Glossary. 10. Bibliography. 11. Index.

In a printed work the even pages or folios (2, 4, 6, etc.) are the left-hand ones, the odd pages are the right-hand ones.

The independent parts of a book, as the title, preface, text, appendix, glossary, index, etc., should each begin on an odd page.

III. CHEMICAL.

+ signifies "and," "together with," and is used between the symbols of substances brought together for a reaction or produced by such reaction. Placed above a symbol or to its right above the line, it signifies a unit charge of positive electricity. Thus; Ca⁺⁺ denotes the ion of calcium, which carries two positive charges. It is sometimes used to indicate, in organic chemistry, a base or alkalioid, when placed above the initial letter of the name of the substance; as, $\overset{+}{M}$, morphine; $\overset{+}{Q}$, quinine.

— signifies a single "bond," or unit of attractive force or affinity, and is used between the symbols of elements or groups which unite to form a compound; thus, H—Cl for HCl, H—O—H for H₂O; Ca—O for CaO; Al≡(OH)₃ for Al(OH)₃. Placed above a symbol, or to its right above the line, it signifies a unit charge of negative electricity; thus, SO₄⁻⁻ denotes an ion of sulphuric acid, carrying two negative charges. It also indicates, in organic chemistry, an acid, when placed above the initial letter of the name of the acid; as, $\overset{-}{C}$, citric acid. It is also sometimes used as a simple sign of subtraction to indicate the removal of a part from a compound.

' often indicates valence; as, Fe^{''} denotes bivalent iron; Fe^{'''}, trivalent iron.

• is sometimes used instead of — to indicate a bond; as, H•Cl for H—Cl, CH₂:CH₂ for CH₂=CH₂, etc.

◊ in organic chemistry, denotes the benzene nucleus.

ψ Pseudo-

☞ Every elementary substance is represented, in chemical notation, by a symbol consisting of the initial or abbreviation of its Latin or New Latin name: as, H for hydrogen, O for oxygen, Ag (from *Argentum*) for silver, etc. A compound is represented by the symbols of the respective constituents written side by side; as, HCl, a compound of one atom or equivalent of hydrogen with one of chlorine, forming hydrogen chloride. To express more than one atom or equivalent of a substance, a number is used, either prefixed to the symbol, or, more commonly, written after it, below the line; as, 2O, or O₂, two atoms of oxygen (O₂ signifies that the two atoms are united, forming a molecule, 2O does not). Thus H₂O represents water, or two atoms of hydrogen united to one of oxygen; CaCO₃, calcium carbonate; H₂SO₄, sulphuric acid. Sometimes these are written with a comma or a period between the symbols of the original compounds from which they are theoretically derived; as, CaO,CO₂, calcium carbonate.

⊥ The perpendicular; perpendicular to; as, draw AB ⊥ CD. || Parallel; parallel to; is parallel to; as, AB || CD. ○ Circle; circumference; 360°.

logarithms. b The eccentricity of a conic section. g The acceleration of gravity, or, at latitude 45°, 32.17076 feet per second per second. [grees.] ° Degrees of arc; as, 60°, sixty degrees. LINCOLN'S GETTYSBURG ADDRESS.

“Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal. THE HIGH STANDING OF
**Webster's New International
Dictionary**

Upon which

Webster's Collegiate Dictionary, Third Edition,

Is based, is indicated by the following Testimonials.

**United States Court of Claims and
State Supreme Courts.**

United States Court of Claims: This court finds the legal definitions accurate and in fact of so full and extensive a character as practically to supersede the necessity for the publication of separate law dictionaries.

New York Court of Appeals: The judges of the Court of Appeals of the State of New York make constant use of Webster's New International Dictionary in the discharge of their official duties. They regard it as an unsurpassed authority.

New Jersey Supreme Court: Constant reliance upon Webster's International Dictionary for the exact meaning and precise definition of English words has proved eminently satisfactory to us.

Kansas Supreme Court: A feature of the work which lawyers will appreciate is that definitions of words of legal usage are accurate and conform with judicial interpretation as found in the latest decisions of the highest courts of the country.

South Dakota Supreme Court: The definitions of legal terms and phrases we find to be remarkable for their completeness, accuracy, and conciseness.

Missouri Supreme Court: Special attention seems to have been paid to the treatment of law terms, the definitions of which, so far as we have consulted them, are accurate and authoritative.

Similar testimonials have been given by hundreds of Judges of the Supreme Courts of the United States and Canada.

Noted Writers.

Ray Stannard Baker: Webster's New International Dictionary seems to be a great improvement over the older editions and I am sure that I shall find it highly serviceable in my work.

David Starr Jordan, Ph.D., LL.D.: I am very much pleased with the thoroughness of the revision and the compactness and accuracy of the definitions. The device of placing technical and unusual words at the foot of the page is a very useful feature. It is a wonder that publishers of lexicons have not used it before.

Miss Agnes Repplier, Litt.D.: Your New International Dictionary is all that you have claimed for it, and more. Such a compendium of information I have never elsewhere seen.

Palmer Cox: Webster's New International Dictionary will be readily appreciated by literary workers, who are accustomed to dealing with so many words not in general use, and, in fact, by any person who wishes to speak the English language.

Sir Gilbert Parker, D.C.L.: A resource for the mind, and a court of appeal for the uncertain intelligence. I prize this great book with the miser's regard.

Enoch Arnold Bennett: One section which appeals to me as much by its originality as by its patent usefulness, is that devoted to the explanation of signs, and of course the lists of synonyms are invaluable, especially to writers.

Similar testimonials have been given by many of the prominent American and foreign authors.

College Presidents and Professors.

Harvard University, H. Langford Warren, A.M., Professor of Architecture. The best for ready reference with which I am familiar.

Yale University, E. P. Morris, Litt.D., Professor of the Latin Language and Literature. Then I looked for the terms of grammar, which is also a hobby of mine. I happened first upon parataxis, about the definition of which I have been obliged to differ with some of my philological friends, and lo! there was my own definition! You will understand that I am now ready to vouch for your accuracy from cover to cover.

Columbia University, Nicholas Murray Butler, LL.D., Ph.D., President. Both in contents and in arrangement, it marks new advances even upon its excellent predecessor.

Cornell University, J. G. Schurman, LL.D., President. The horizontal division of the page at once facilitates reference to the ordinary vocabulary and it is quite as easy to find the obsolete, unusual words when grouped together as they are here.

Vassar College, Henry Noble MacCracken, Ph.D., President. Absolutely indispensable in my own work, both as searcher and student. No more satisfying aid in the way of a dictionary has ever been prepared than this latest triumph.

University of Cincinnati, Chas. W. Dabney, LL.D., President. The New International is a marvel of perfection in text, arrangement, paper, illustrations, and binding.

Similar testimonials have been given by nearly all of the College Presidents of the United States and Canada.

**United States Com. of Education and
State Superintendents of Schools.**

Washington, D. C., Bureau of Education: Any word of commendation of a book so well known and so generally adopted as a standard as is Webster's New International Dictionary must seem superfluous. For comprehensiveness, accuracy and convenience of arrangement, it attains a very high degree of excellence. It is used as a standard in the Bureau of Education. — P. P. Claxton.

California: A dictionary which is fully modern and comprehensive. A most desirable reference book for daily use. — Edward Hyatt.

Missouri: Webster's New International Dictionary seems to be complete in every respect. I believe it will answer every need that a dictionary could fill. — Howard A Gass.

Hon. Henry Cabot Lodge, *Senator from Massachusetts*. Even a glance was enough to show me how thoroughly the work had been done and also that the revision had been cared for by scholars of high authority.

Hon. Champ Clark, *Speaker of the House of Representatives*. I learned to spell out of Webster's old blue-backed speller, and have used Webster's Dictionary from my youth up.

Representative Publications.

New York Herald: It is not only a guide for the student of language, but it is the handbook of the common man, woman, and child, as they read the newspaper, book of travel, or novel.

Chicago Record-Herald: The first change that strikes the eye is the novel division of each page into two sections, the upper in the familiar Webster type, the lower in smaller type. This rather daring innovation is a stroke of genius.

Philadelphia Public Ledger: The main vocabulary is not encumbered or confused by a multitude of words or forms not properly part of a living language.

Boston Globe: One of the wealthiest mines of information in the world is the just-out issue of Webster's New International.

Indianapolis Star: The book is a monument to the greatness of our language.

St. Louis Globe: Webster's New International Dictionary fills the reader's mind with wonder, evenly divided between the mind which created the work in its original form and the skill with which it has been brought down to the needs of the present minute.

San Francisco Call: More than being a mere dictionary, the New International is encyclopedic; it is titanic, complete and modern — a publication that promises to become a necessity in every literary workshop of the English-speaking world.

The Earl of Crewe, K.G., P.C., *Secretary of State for the Colonies*. For variety and accuracy it is not approached by any other one-volume dictionary.

Viscount James Bryce, *Ex-British Ambassador, Washington, D. C.* I have been greatly struck by the care with which the new edition has been prepared and by the general accuracy of the information it contains.

Hon. Sir Charles Moss, *Ex-Chief Justice of Ontario*. The superiority of the New International seems very apparent.
