Flight Operations  
Search and Tracking  
Base Operations  
Maintenance

Lieutenant E. H. VOORHEES in a PB4Y-1P aircraft of Fleet Air Photographic Squadron ONE took off from Iwo Jima on 30 May 1945 at 0935 King to photograph enemy installations on Marcus Island. While enroute to the target, his No. 2 engine began to give trouble and he was forced to feather the propeller about fifty miles short of the objective. He continued on his mission however, but because he was unable to maintain altitude, he could not get the vertical coverage desired. He did, however, take oblique photographs from an altitude of 10,000 ft. He then proceeded to return toward Guam. In order to lighten the plane, all of the loose advanced base gear, the belly turret, the armor plate in the nose and all ammunition was jettisoned. When he was 200 miles from Saipan, the oil pressure on No. 4 engine dropped considerable. He, therefore, changed course to Saipan and landed there at 2027 King. The following day, he returned to base at Agana Field, Guam.
